and the post 5 April 2008 loss is £6 million.

A capital payment of £5 million is made to beneficiary Y.

In 2011-12 the trustees dispose of an asset. The chargeable gain is £5 million: the pre 6 April 2008 gain is £4 million and the post 5 April 2008 gain is £1 million.

Capital payments are made to beneficiaries X and Y of £2 million each.

In 2012-13 an underlying company within s.13 wholly owned by the trustees disposes of an asset.⁵⁹ The loss on the asset is £2 million.⁶⁰ But substituting the market value as at 6 April 2008 creates a post 5 April gain of £1 million. The trustees also dispose of an asset. The chargeable gain is £3 million: the pre 6 April 2008 gain is £2 million and the post 5 April 2008 gain is £1 million.

Capital payments are made to beneficiaries X and Y of £2 million each.

The EN sets out a table to summarise these facts which for ease of reference I set out here slightly expanded. It is easier to follow the example with the fuller spreadsheet which is available on www.kessler.co.uk (not set out here because it requires an A4 sheet).

	Pre 6/4/08 gain/loss	Post 5/4/08 gain/loss	“A”	s.2(2) amount “B”	A/B	Cap P’t to X	Cap P’t to X
2010-11	£8m	(£5m)	£0	£3m	0	-	£5m
2011-12	£4m	£1m	£1m	£5m	1/5	£2m	£2m
2012-13	£2m	£2m	£2m(?)	£3m	2/3(?)	£2m	£2m

The HMRC analysis is as follows:

2010-11

The s.2(2) amount is £3 million. Match capital payment of £5 million against trust gains of £3 million: chargeable gains of £3 million treated as accruing to Y. But Y is not UK domiciled so para [126] applies.

Only £3 million×(A÷B) of the matched capital payment is chargeable to tax. However, the s.2(2) amount based on the market value of the assets as at 6 April 2008 is £0. Therefore A÷B is zero and none of the chargeable gains treated as accruing to Y is chargeable to tax.

2010-11: £2 million unmatched capital payments to Y.

59 The example confusingly adds that the disposal is for £5m. But that is irrelevant, as what matters for tax is the gain or loss on the disposal, not the amount of the sale proceeds.

60 [Author’s Footnote] This loss is not allowable; careful planning might have avoided that result.

2011-12

The s.2(2) amount is £5 million. Match capital payments of £4 million in the year against trust gains of £5 million; chargeable gains of £2 million treated as accruing to each of X and Y.

There are £1 million trust gains of 2011-12 unmatched. Step 5 of s.87A(2) applies.

Match 2011-12 £1 million trust gains to unmatched capital payments of £2 million to Y of 2010-11.

Chargeable gains of £1 million treated as accruing to Y. Unmatched capital payment to Y of 2010-11 reduced to £1 million.

X is chargeable to tax on £2 million in respect of 2012-13.

Y has chargeable gains of £3 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)] £3 million $\times (A \div B)$ of the matched capital payment is chargeable to tax.

$A \div B$ is $1/5$ so £600,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.

£1 million unmatched capital payments to Y originating from 2010-11 to carry forward.

2012-13

The s.2(2) amount is £3 million. The disposal of the asset by the underlying company does not form part of the s.2(2) amount because only s.13 gains are brought into s.87. However, by applying the market values to the assets as at 6 April 2008 there is a gain attributable to the disposal of the asset by the company. Match the capital payments of £4 million to the s.2(2) amount. Chargeable gains are treated as accruing to X and Y of £1.5 million each under part (b) of Step 3 of s.87A(2).

X is chargeable to tax on £1.5 million in respect of 2012-13.

Y has chargeable gains of £1.5 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)], £1.5 million $\times (A \div B)$ of the matched capital payment is chargeable to tax. $A \div B$ is $2/3$ so £1 million of the chargeable gains treated as accruing to Y in 2012-13 are taxable. While the kink in the value of the company's asset has increased the proportion of gains on which Y is chargeable to tax, Y is still better off than if no election had been made.

This assumes that the company's asset is a "relevant asset". However it is not a relevant asset, as it is not the case that "by reason of the asset, chargeable gains are treated under s.13 TCGA as accruing to the trustees in the relevant tax year." The correct figure for A/B is $1/3$ and not $2/3$ and the taxable gain after rebasing relief is £0.5m and not £1m.

There are £1.5m unmatched capital payments to Y to carry forward - £1m from 2010-11 and £0.5m from 2012-13.

There are £0.5m unmatched capital payments to X to carry forward all originating from 2012-13.

70. Example 3: keeping track of pre 6 April and post 5 April gains and losses.
The trustees of a settlement make an election under para [126](1). The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK. There are no unmatched trust gains or capital payments relating to earlier years.

In 2010-11 the trustees dispose of an asset. The chargeable gain is £8 million: the pre 6 April gain is £7 million and the post 5 April 2008 gain is £1 million.

A capital payment of £2 million is made to each of beneficiaries X and Y.

In 2011-12 the trustees make a further capital payment to X and Y of £2 million each.

The example may be easier to follow if the facts are set out in a table:

	Pre 6/4/08 gain/loss	Post 5/4/08 gain/loss	“A”	s.2(2) amount “B”	A/B	Cap P’t to X	Cap P’t to X
2010-11	£7m	£1m	£1m	£8m	1/8	£2m	£2m
2011-12	0	0	n/r	£5m	n/r	£2m	£2m

The HMRC analysis is as follows:

2010-11

The s.2(2) amount is £8 million.

Match capital payments of £4 million in the year against trust gains of £8 million: chargeable gains of £2 million treated as accruing to each of X and Y. X is chargeable to tax on £2 million in respect of 2010-11.

Y has chargeable gains of £2 million in respect of 2010-11. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)] £2 million \times (A \div B) of the matched capital payment is chargeable to tax.

A \div B is 1/8 so £250,000 of the chargeable gains treated as accruing to Y in 2010-11 are taxable.

The reduced s.2(2) amount for 2010-11 for the purposes of matching with future capital payments is £4m.

2011-12

There is no s.2(2) amount for the year. Apply s.87A matching rules to earlier year.

Match capital payments of £4 million in 2011-12 to s.2(2) amount (as reduced) for 2010-11 of £4m:

chargeable gains of £2 million treated as accruing to each of X and Y.

X is chargeable to tax on £2m in respect of 2011-12.

Y has chargeable gains of £2 million in respect of 2011-12. But Y is not UK domiciled so para [126] applies.

Under para [126(7)(8)] £2 million \times (A \div B) of the matched capital payment is chargeable to tax.

A÷B is 0.5/4 so £250,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.

The table below shows how the s.2(2) amount for the year and the underlying gains (or losses) relating to the period before and after 6 April 2008 are matched.

2010-11 matching of capital payments	Pre 6 April gain/loss	Post 5 April gain/loss	Total trust gains (section 2(2) amount)
2010-2011	£7m	£1m	£8m
Less matched to capital payment in 2010-11	£3.5m	£500,000	£4m
Unmatched in 2010-11	£3.5m	£500,000	£4m
Less matched to capital payments in 2011-12	£3.5m	£500,000	£4m
Unmatched in 2011-12	£0	£0	£0

48.30 Rebasing: minor rules

48.30.1 *Asset derived from another asset*

Para 126(13) Sch 7 FA 2008 extends the relief where one asset is derived from another asset; this will not be very common. It must be read with s.43 TCGA in order to follow the sense:

If and so far as, in a case where assets have been merged or divided or have changed their nature or rights or interests in or over assets have been created or extinguished, the value of an asset is derived from any other asset in the same ownership, an appropriate proportion of the sums allowable as a deduction in the computation of a gain in respect of the other asset under paragraphs (a) and (b) of section 38(1) shall, both for the purpose of the computation of a gain accruing on the disposal of the first-mentioned asset and, if the other asset remains in existence, on a disposal of that other asset, be attributed to the first-mentioned asset.

If a case where s.43 applies, one turns to para 126(13):

If—

- (a) by reason of an asset which would not otherwise be a relevant asset (“the new asset”), chargeable gains or allowable losses accrue, or are treated under s.13 as accruing, to the trustees in the relevant tax year,
- (b) the value of the new asset derives wholly or in part from another asset (“the original asset”), and
- (c) s.43 of TCGA 1992 applies in relation to the calculation of the

chargeable gains or allowable losses,
the new asset (or part of that asset) is a “relevant asset” if the condition in sub-para (10)(b) or the conditions in sub-para (11)(b) and (c) would be met were the references there to the asset to be read as references to the new asset or the original asset.

48.30.2 *Inter-group transfer*

Para 126(14)(15) extends rebasing relief where there is an inter-group transfer:

- (14) If—
 - (a) on or after 6 April 2008, a company (“company A”) disposes of an asset to another company (“company B”), and
 - (b) s.171 of TCGA (transfers within groups) (as applied by s.14(2) of that Act) applies in relation to the disposal, for the purposes of sub-para (11) (and this sub-paragraph) treat company B as having owned the asset throughout the period when company A owned it.
- (15) If an asset is a relevant asset by virtue of sub-para (14), for the purposes of sub-para (9)—
 - (a) treat the chargeable gains as having accrued to the company which owned the asset at the beginning of 6 April 2008, and
 - (b) treat the proportion of those chargeable gains attributable under s.13 of TCGA 1992 to the trustees as being the proportion of the chargeable gains actually accruing that are so attributable.

Para 126(16) to (18) deals with the situation where an asset is held by a company, and the trustees have held different interests in the company at different times:

- (16) If—
 - (a) an asset would otherwise be a “relevant asset” within sub-para (11), and
 - (b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset (“the relevant proportion”) is greater than the minimum proportion, for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.

(17) “The minimum proportion” is the smallest proportion of chargeable gains (if any) that would have been attributable to the trustees on a disposal of the asset at any time in the relevant period (as defined by sub-para (12)).

(18) “The appropriate proportion” is the minimum proportion divided by the relevant proportion.

This does not work. Suppose for example a trust held 50% of the shares in a non resident company, T Ltd before 2008, and later acquired all the shares. T Ltd realises a gain of £100 on an asset (the company’s asset) held before 2008. The gain is deemed to accrue to the trust under s.13. The terms of subpara 16 are met:

- (a) the company’s asset would otherwise be a “relevant asset” within sub-para (11), and
- (b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset (“the relevant proportion” - 100%) is greater than the minimum proportion (which under the definition in 126(17) is 50%.

So subpara 16 directs:

for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.

We need to ascertain the appropriate proportion. That is one half divided by the relevant proportion. So we need to know the relevant proportion. That is:

$A \div B$ where—

A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and

B is the s.2(2) amount for the settlement for the relevant tax year.

B is £100. In order to work out A we need to know what is the relevant asset, but we do not know what is a relevant asset until we have applied subpara 16. Presumably we are to ignore the subpara 16 reduction, in

which case the company asset is the relevant asset. Assume that the company asset was worth £50 on 6 April 2008, so the relevant proportion is one half. Then the appropriate proportion is one half divided by one half, = one. I suspect that the drafter has confused “divided” with “multiplied”. What a shambles! Fortunately the problem may not often arise.

48.31 Rebasing: OIG amounts

Paragraph 101 Sch 7 FA 2008 provides equivalent rebasing relief for OIGs:

- (1) This paragraph applies if—
 - (a) the trustees of a settlement have made an election under paragraph 126(1) (re-basing election),
 - (b) income is treated under regulation 17 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001) as arising to an individual in the tax year 2008–09 or any subsequent tax year (“the relevant tax year”) by reason of the matching, under section 87A of TCGA 1992 as applied by regulation 20 of those Regulations, of an OIG amount with a capital payment received by the individual from the trustees, and
 - (c) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.
- (2) The individual is not charged to income tax on so much of the income as exceeds the relevant proportion of that income.
- (3) Sub-paragraphs (9) to (18) of paragraph 126 (meaning of “the relevant proportion”) apply for the purposes of sub-paragraph (2) above as if—
 - (a) references to section 2(2) amounts were to OIG amounts,
 - (b) references to chargeable gains were to offshore income gains,
 - (c) references to allowable losses were omitted, and
 - (d) references to anything accruing were to it arising (and similar references were read accordingly).

Amended as para 101(3) requires, para 126(9) to (13) provide:

- (9) The relevant proportion is $A \div B$ where—

A is what would be the ~~section 2(2) amount~~ OIG amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company

concerned) and immediately re-acquired by them (or it) at the market value at that time, and

B is the ~~section 2(2) amount~~ OIG amount for the settlement for the relevant tax year.

(10) For the purposes of sub-paragraph (9) an asset is a “relevant asset” if—

- (a) by reason of the asset, ~~a chargeable gain or allowable loss accrues~~ an offshore income gain arises to the trustees in the relevant tax year, and
- (b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

(11) For those purposes, an asset is also a “relevant asset” if—

- (a) by reason of the asset, ~~chargeable gains~~ offshore income gains are treated under section 13 of TCGA 1992 as ~~accruing~~ arising to the trustees in the relevant tax year,
- (b) the company to whom the ~~chargeable gains~~ offshore income gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those ~~chargeable gains~~ offshore income gains, and
- (c) had the company disposed of the asset at any time in the relevant period, part of the ~~chargeable gains~~ offshore income gains (if any) accruing on the disposal would have been treated under section 13 of TCGA 1992 as ~~accruing~~ arising to the trustees.

(12) In sub-paragraph (11)(c) “the relevant period” means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the ~~chargeable gains~~ offshore income gains.

(It is not necessary to set out the rest of para 126, as amended).

48.32 Rebasing: transfers between trusts

Para 127(1) Schedule 7 FA 2008 provides:

This paragraph applies if—

- (a) in the tax year 2008-09 or any subsequent tax year, the trustees of a settlement (“the transferor settlement”) transfer all or part of the settled property to the trustees of another settlement (“the transferee settlement”),
- (b) s.90 of TCGA 1992 applies in relation to the transfer,

- (c) the trustees of the transferor settlement have made an election under para 126(1),
- (d) by virtue of the matching of a capital payment with the s.2(2) amount for the transferee settlement for the tax year 2008-09 or any subsequent tax year (“the relevant tax year”), chargeable gains are treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and
- (e) the individual is resident, but not domiciled, in the UK in that year.

48.32.1 *Transferee trust makes rebasing election*

Para 127(2) Sch 7 FA 2008 provides:

If the trustees of the transferee settlement have made an election under para 126(1), para 126(7) to (9) have effect in relation to the transferee settlement for that year as if the reference in para 126(9) to relevant assets included relevant assets within the meaning of this paragraph.

48.32.2 *Transferee trust does not make rebasing election*

Para 127 Sch 7 FA 2008 provides:

(3) If the trustees of the transferee settlement have not made an election under para 126(1), the individual is not charged to capital gains tax on so much of the chargeable gains mentioned in sub-para (1)(d) above as exceeds the relevant proportion of those gains.

(4) The relevant proportion is—

where—

A is what would be the s.2(2) amount for the transferee settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the company concerned and immediately re-acquired by it at the market value at that time, and B is the s.2(2) amount for the transferee settlement for the relevant tax year.

(5) For the purposes of this paragraph an asset is a “relevant asset” if—

- (a) by reason of the asset, chargeable gains are treated under s.13 of TCGA 1992 as accruing to the trustees of the transferee settlement in the relevant tax year,
- (b) the company to whom the chargeable gains actually accrue has

- owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains,
- (c) had the company disposed of the asset at any time in the relevant period, part of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to—
 - (i) the trustees of the transferor settlement (if the disposal had been made before the transfer), or
 - (ii) the trustees of the transferee settlement (if it had not).
- (6) In sub-para (5)(c) “the relevant period” means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains.
- (7) Sub-paras (13) to (18) of para 126 apply for the purposes of this paragraph (with such modifications as are necessary) as they apply for the purposes of that paragraph.

January 2009 Qs & As provides:

Q7 In applying the allocation rules to transfers between settlements, the transferor trust gains carried across will be treated as having accrued to the transferee trust in the year in which they in fact accrued to the transferor trust. Those gains that have been matched with capital payments out of transferor trust in the year of transfer or previous years will be left out of account. Gains carried across will be allocated to a capital payment from the transferee trust on a ‘last in first out’ (LIFO) basis. Gains on such assets will be governed by whether or not the transferor trust has made a rebasing election under paragraph 126 sch 7 FA 2008.

If the transferor settlement has made a rebasing election by the time of the transfer of the transferee settlement, then pre and post April 2008 gains which are deemed to have accrued on the actual disposal of an asset go across *pro rata*.

If the transferor settlement has not made a rebasing election by the 31 January following the year of the transfer, then even if no capital payment has yet been made, the right to rebase is lost in relation to the transferred assets and any assets retained in the transferor trust.

However, it should be noted that any transfers between settlements made prior to 6 April 2008 will not trigger a time limit on rebasing and any assets moving over to the transferee settlement as a result of a transfer made prior to 6 April 2008 will not be affected by any subsequent election for rebasing made by the transferor trust. If the asset appointed over to the transferee settlement before 6 April 2008 includes shares in

a company within s.13 TCGA 1992, then the transferee settlement may wish to elect for rebasing in its own right. An election made by the transferee settlement may cover gains made by such a company – see para 127 Sch 7 FA 2008. Transferee settlements which receive property on or after 6 April 2008 cannot elect for rebasing in relation to the transferred assets – the decision is solely that of the transferor settlement.

Example

Trust 1 — £300,000 gains made

Capital payment made of £10,000 to a remittance basis user.

Election for rebasing made: 90% (£270,000) of gains relate to the period pre 6 April 2008 and 10% (£30,000) post 5 April 2008.

The capital payment is matched only to post 5 April 2008 gains and taxed on remittance basis. £290,000 gain carried forward (£270,000 pre 6 April and £20,000 post 5 April 2008). So now 6.90% is post 5 April 2008 gain and 93.10% is pre 6 April 2008 gain.

Trust 1 appoints cash to Trust 2 of £2.5m at a time when Trust 1 is worth £20m (i.e. 12.5% of fund). £36,250 gains are transferred to Trust 2 (12.5% of £290,000). 93.1% of these relate to the period pre 6 April 2008 and 6.9% after.

Trust pool in Trust 1 reduced to £253,750 (93.1% pre 6 April and 6.9% post 5 April 2008).

48.32.3 *Transfer between trusts: OIG amounts*

Para 102 Sch 7 FA 2008 provides equivalent rules for OIG amounts:

(1) This paragraph applies if—

- (a) in the tax year 2008–09 or any subsequent tax year, the trustees of a settlement (“the transferor settlement”) transfer all or part of the settled property to the trustees of another settlement (“the transferee settlement”),
- (b) section 90 of TCGA 1992 applies in relation to the transfer,
- (c) the trustees of the transferor settlement have made an election under paragraph 126(1),
- (d) by virtue of the matching (under section 87A of TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001)) of a capital payment with an OIG amount of the transferee settlement, income is treated under such regulations (regulation 17 of those Regulations []) as arising to an individual in a tax year (“the relevant tax year”), and
- (e) the individual is resident or ordinarily resident, but not

domiciled, in the UK in the relevant tax year.

(2) If paragraph 101 applies in relation to the transferee settlement, paragraph 126(9) as applied by paragraph 101(3) has effect as if the reference there to relevant assets included relevant assets within the meaning of paragraph 127(4) (as modified by sub-paragraph (4)(b) below).

(3) If paragraph 101 does not apply in relation to the transferee settlement, the individual is not charged to income tax on so much of the income mentioned in sub-paragraph (1)(d) above as exceeds the relevant proportion of that income.

(4) Sub-paragraphs (4) to (7) of paragraph 127 (meaning of “the relevant proportion”) apply for the purposes of sub-paragraph (3) above as if—

- (a) references section 2(2) amounts were to OIG amounts,
- (b) references to chargeable gains were to offshore income gains, and
- (c) references to anything accruing were to it arising.

48.33 CGT planning aspects of non-resident trusts

When are non-resident trusts advantageous for CGT?

One situation is to maximise use of losses: losses of remittance basis taxpayers are generally unallowable, but losses of non-resident trusts can be set against s.2(2) amounts (trust gains). However no-one *plans* to realise losses so that is not generally a planning point.

48.33.1 Where capital payment basis better than arising basis

Non-resident trusts are in principle better than ownership of UK situate property by UK resident foreign domiciled individuals directly (or through a non-resident company), even if the individuals are remittance basis taxpayers.

That is, suppose a trust holds:

- (1) UK situate property; or
- (2) a company within s.13 TCGA which holds UK situate property.

If the trust property is held by the settlor directly, gains on the UK situate property are chargeable on an arising basis; if the same property is held on a trust, the gains are taxable on a capital payments basis.

For individuals who are arising basis taxpayers, similar points apply regardless of the situs of the trust property. That is, where an individual does not wish to pay the remittance basis charge, it may be worthwhile

setting up a non-resident trust to ensure that gains are taxed on a s.87 capital payment basis and not on the arising basis.

48.33.2 *Where capital payment basis better than remittance basis*

Non-resident trusts may be better than absolute ownership of foreign situate property by remittance basis taxpayers as they may avoid the application of the mixed fund rule.

Example 1 (trust better than absolute ownership)

Suppose a foreign situate asset is acquired for £1m, sold for £2m, giving a gain of £1m. If the asset is held by a remittance basis taxpayer (T) who remits £1m, there is a CGT charge on £1m as the remitted sum is all gain.

By contrast, suppose:

- (1) the asset is held in a non-resident trust.
- (2) the trust makes a capital payment of £1m to T offshore.
- (3) in the following year, the trust makes a capital payment of £1m to T onshore.

The offshore payment has reduced the s.2(2) amount to nil, so the second payment is free of CGT.

However to take advantage of this requires careful timing of gains and payments that is often not practical. Often, the remittance basis will be better than the capital payments basis.

Example 2 (trust worse than absolute ownership)

Suppose 3 foreign situate assets are each acquired for £1m, sold for £2m, giving a gain of £1m each. If the assets are held by a remittance basis taxpayer (T) who remits the £2m proceeds of one of the assets, there is a CGT charge on £1m only. (Assume the proceeds are not paid into a single account, ie are not mixed.)

By contrast, suppose:

- (1) the assets are held in a non-resident trust.
- (2) the trust makes a capital payment of £2m in the UK.

There is then a CGT charge on £2m.

48.33.3 *Where non-resident trusts not desirable*

Non-resident trusts are not desirable where the settlor is non-UK resident, since trust gains are s.2(2) amounts and gains accruing to the settlor are in

principle CGT free.

48.33.4 *Should trustees hold assets through an underlying company?*

Trustees may hold trust assets directly or through a wholly owned non-resident company (here called “**an underlying company**”). Which is better?

For CGT an underlying company has no CGT advantage and some disadvantages as there may be a double CGT charge:

- (1) Gains accruing to the company are attributed to the trustees under s.13⁶¹ and so constitute s.2(2) amounts.
- (2) In addition, there may be a chargeable gain when the offshore trustees dispose of the company’s shares and so further s.2(2) amounts.

There is normally no relief for that double charge.⁶²

Losses of the underlying company are restricted and easily lost altogether.

If the property is a residence, CGT private residence relief is lost by use of a company.⁶³

So an underlying company should not be used unless there is some good reason (which might be IT or IHT or some other reason.)⁶⁴ If the trustees need limited liability, a limited partnership (which is transparent for CGT) is an alternative which avoids the CGT problems.

48.34 **Four basic strategies for the s.87 charge**

In outline the position is as follows:

48.34.1 *Indefinite deferral*

Beneficiaries are only liable to the s.87 charge if they receive a capital payment. But there may be no need for a capital payment to be made. Instead, the capital of the trust fund may be retained. The beneficiaries of the settlement would enjoy a trust fund unreduced by the burden of CGT.

61 See 50.1 (Gains of non-resident companies).

62 There are some reliefs: see 50.20 (Company distribution relief). However these only help the person who pays tax under s.13, so would only be relevant to a settlor-interested trust within s.86.

63 See 50.27 (Private residence relief).

64 See too 31.31 (Transfer from non-resident trust to underlying company).

In this way the charge may be postponed until further tax planning becomes possible – or indefinitely.

48.34.2 *Non-resident beneficiary*

Section 2(2) amounts are treated as chargeable gains accruing to a beneficiary who receives capital payments. But a beneficiary who is neither resident nor ordinarily resident in the UK is not subject to CGT on those gains. Such a beneficiary may therefore receive capital payments from the trust tax free, just as they can realise capital gains of their own without incurring any tax charge. The temporary non-residence rules need to be considered, see 8.1 (Temporary non-residence).

48.34.3 *Mixed UK and foreign beneficiaries: simple capital payments*

Section 2(2) amounts which have been matched with a capital payment to a beneficiary in an earlier tax year cease to be available for the purpose of the s.87 charge in the following year. This principle applies whether or not the beneficiary was subject to the s.87 charge. Suppose that s.2(2) amounts are matched with capital payments to a non-resident beneficiary and the capital payments equal the total s.2(2) amounts. Those s.2(2) amounts are sometimes said to have been “washed”. In subsequent tax years these are not taken into account and a capital payment may be made to a UK beneficiary without incurring any tax charge under s.87. Careful timing is essential. The payment to the exempt beneficiary must be made in one tax year and the payment to a UK beneficiary must be postponed until the following tax year. Section 2(2) amounts accruing in a subsequent tax year may be taxed on the UK beneficiary.

48.34.4 *Mixed UK and foreign beneficiaries: capital payment/resettlement*

If one or more of the beneficiaries of the settlement are not UK resident, the trustees might consider advancing trust capital to those beneficiaries absolutely. The beneficiaries might then independently resettle the property and may gain additional inheritance tax advantages. The CGT position would be substantially improved for the other beneficiaries by washing s.2(2) amounts equal to the advancement. But successfully implementing arrangements of this kind is easier said than done. See 75.33 (Planning to create trust with foreign domiciled settlor).

48.35 Record keeping

HMRC s.87 guidance note provides:

133. Before 6 April 2008 trustees of non-UK resident settlements that have no UK domiciled beneficiaries, or beneficiaries who may become UK domiciled, will not have had to consider the possible UK Capital Gains Tax liabilities of the beneficiaries. From 6 April 2008 they will have to consider the possibility that a charge under section 87 or Schedule 4C TCGA may accrue to UK resident but non-UK domiciled beneficiaries.

134. In relation to pre 6 April 2008 transactions HMRC recognise that in such cases trustees

- May not have kept sufficient records to calculate precisely the post 5 April 2008 Capital Gains Tax liabilities that may accrue on UK resident but non-UK domiciled beneficiaries, or
- May not want to incur the expense of searching through old records to obtain all the necessary information to calculate precise Capital Gains Tax liabilities.

135. In such cases HMRC will consider any reasonable solution suggested to them. Usually proposed solutions will have to be considered on a case by case basis.

The guidance note concludes:

One solution that HMRC will accept generally is that all assets held by trustees or underlying companies at midnight on 5 April 2008 are treated as having a zero acquisition cost. Provided the trustees make a valid election under paragraph 126 of Schedule 7 there will be no disadvantage to the beneficiaries. This is because the chargeable gain is restricted to the growth in the value of asset since 6 April 2008.

If a rebasing election is made, historic gain does not often matter, but there are situations in which it does.

48.36 Tax return: disclosure of s.87 gains

S.87 gains are returned in Box 32 in the Capital Gains Summary pages (form SA108) 2010/11. The note beside this box reads:

Attributed gains from 23 June 2010 where personal losses cannot be set

off.

48.37 Criticism of s.87 regime

The Jersey court have commented on the s.87 regime, in the context of a variation of trusts case, and were not flattering:

In essence, as we understand it, as a result of the changes introduced in the 1998 Finance Act of the United Kingdom, [extending the s.87 regime to settlements with foreign domiciled settlors] UK resident beneficiaries are liable to be assessed for capital gains tax on the uplift in capital value in the underlying settlement assets between the date of the Settlement and the date of any appointment to them. ... such liability might be very significant and indeed account for a major proportion of the Trust assets ever appointed to them. It appears that this particular tax regime disregards the fact that the beneficiaries were not the owners of the assets during which time the gains were made, had no control over what gains were made or how the assets were invested or whether income or capital was appointed or retained. It is not as if the underlying settlement assets were UK beneficially owned assets either or naturally fell within the UK tax net during the period of the Settlements. The tax, as the Court understands it, is calculated by reference to the time during which the beneficiaries were only discretionary objects of the Trust, artificially treating them as if they had a control which neither legally or actually they had. ... this is the clearest possible case where the artificial and unduly harsh nature of the basis of taxation would indeed prompt the exercise of discretion [to vary the trusts].⁶⁵

The essence of the criticism is that the s.87 regime in its post-1998 form is an excessively wide jurisdiction. There is no doubt that it operates very unfairly. The Court approved a variation - adding the settlor as a beneficiary - whose purpose was to facilitate tax planning to avoid the charge.

CHAPTER FORTY NINE

BORROWING BY NON-RESIDENT TRUST: SCH 4B TCGA

49.1 Borrowing by non-resident trust: introduction

This chapter considers schedules 4B and 4C TCGA, which are designed to counter a set of tax avoidance schemes informally known as flip-flop schemes.

49.1.1 Cross references

Trustees borrowing can raise so many other issues it is impossible to set out a full list, but see in particular:

Loan to trusts and s.624: see 26.3.3 (Beneficial loan or guarantee).

Repayment of loan & s.677: see 26.13 (Settlor receives capital sum).

Transfer of assets: see 28.11 (Transferor receives a capital sum).

Loan to trusts and definition of relevant person for remittances: see 10.5 (Relevant persons: trusts).

Loans to trusts and pre-owned assets: see 72.8 (POA intangible property charge).

For IHT issues which arise when trustees borrow, see 61.9 (Deduction for debts of trustees).

For 2008 transitional rules relating to sch 4B and 4C, see 48.21 (Ascertaining s.2(2) amounts as at end 2007/8); 48.24 (Pre-2008 inter-trust transfer).

49.2 Explanation of flip-flop schemes

In order to understand the law it is helpful to review these schemes. They were designed avoid ss.86, 77 and 87 TCGA and I refer to them as “**s.86, 77, and 87 schemes**”.

The s.86 scheme was as follows. Suppose non-resident trustees of a settlor-interested trust wished to dispose of an asset. The gain on the disposal would in principle be taxed on the settlor under s.86 TCGA. The following steps could be taken:

- (1) The trustees borrow money up to the value of the asset.
- (2) They transfer the borrowed money to a second settlement (“trust 2”).
- (3) The trustees exclude the settlor and designated persons from the first settlement (“trust 1”) so that s.86 ceases to apply to it.¹
- (4) In the following tax year, the trustees of trust 1 may sell the asset and realise a gain to which s.86 does not apply. They may then repay the loan.

This scheme was in principle successful² (though in practice it was often combined with a payment to the settlor from trust 2, which turned out to be taxable under s.87).

The s.77 scheme was designed to avoid s.77 TCGA. It involved (more or less) the same steps as the s.86 scheme. In this case however the legislation was (slightly) differently worded, and the scheme was eventually held to be unsuccessful in *West v Trennary* 76 TC 713, where the result (appropriately) flip-flopped through taxpayer success before the Commissioners, failure in the High Court, success in the Court of Appeal, to eventual failure in the House of Lords. Section 77 is now repealed, so this is now of historic interest only, though the background explains one or two features which survive in the present legislation.

The s.87 TCGA schemes came in two versions. The first version was as follows. Suppose non-resident trustees of a trust (“trust 1”) without any s.2(2) amount (trust gains) wished:

- (1) to dispose of an asset on which trust gains would accrue, and
- (2) to make a capital payment to UK beneficiaries.

The beneficiaries would in principle be chargeable under s.87. The following steps could be taken:

- (1) The trustees of trust 1 borrow money up to the value of the asset.
- (2) They transfer the borrowed money to a second settlement (“trust 2”).
- (3) The trustees of trust 2 made a capital payment to the beneficiary.
- (4) In the following tax year, the trustees of trust 1 sell the asset and realise a gain. The capital payment from trust 2 is not matched with

1 See para 47.4 (Settlor-interested condition).

2 *Burton v HMRC* [2009] SFTD 682. It is striking that the transactions took place in 2000 but the appeal was not heard until a decade later.

the gain in trust 1.

(5) The trustees may then repay the loan.

A second (and more popular) version of the s.87 scheme could be used for a trust which did have trust gains. Suppose the trustees wished to make a capital payment to UK beneficiaries. The beneficiaries would in principle be chargeable under s.87. The following steps could be taken:

- (1) The trustees of trust 1 borrow money.
- (2) They transfer the borrowed money to trust 2.
- (3) The trustees of trust 2 make a capital payment to the beneficiary. The capital payment from trust 2 is not matched with the trust gains of trust 2. Section 90 TCGA would have stopped this scheme (it carried the trust gain across to trust 2 where the gain would be matched to the capital payment from trust 2). However this section was absentmindedly disapplied by Sch 4B TCGA in 2000, which led to a flurry of tax planning until the mistake was finally corrected in 2003.³

(4) In due course, the trustees of trust 1 may repay the loan.

The s.87 schemes were held to be unsuccessful in *Herman v HMRC*.⁴

It is striking that most of these expensive and widely marketed schemes failed, contrary (I think) to the general expectation of the profession. In both *West v Trennary* and in *Herman* the reader may think that the taxpayer had the better of the argument. What lessons should be learned from that debacle? I leave readers to ponder over that.

The key features of the schemes were trustee borrowing and a transfer of trust property in year 1, followed by a disposal in a subsequent year. Schedule 4B produces a deemed disposal in year 1, which counteracts the s.86 (and s.77) schemes and the first version of the s.87 scheme. Schedule 4C contains a modified version of the s.87 regime, which allows gains of trust 1 to be matched with capital payments from trust 2; this counteracts the second version of the s.87 schemes.

The provisions were introduced in 2000 and revised in 2003 and 2008.

49.2.1 *What about income tax flip-flop schemes?*

Since schedule 4B only applies for CGT purposes, the reader may wonder

³ See 48.18.4 (Interaction with schedule 4B).

⁴ See 48.7.1 (Indirect receipt from trustees).

if similar schemes could work for IT. Suppose non-resident trustees of a settlor-interested discretionary trust wished to receive income (for instance by surrendering a life policy or receiving dividends) which would fall within s.624 or s.720. Could the following steps be taken:

- (1) The trustees borrow money up to the anticipated income.
- (2) They transfer the borrowed money to a second settlement.
- (3) The trustees use their powers to exclude the settlor (etc) from the first settlement so that the settlement ceases to be settlor-interested.
- (4) In the following tax year, the trustees of the first settlement receive the income and repay the borrowing.

The answer is that the capital payment provisions, s.633 ITTOIA and s.727 ITA, fill that gap but there may be occasions where planning of that kind is practical.

Similarly, since sch 4C only applies for CGT and OIG purposes, the reader may wonder if planning of this kind would work for s.731; the answer is no, as transfers between trusts do not isolate relevant income; see 29.32 (Transfer between trusts). In this respect s.731 operates rather like schedule 4C.

49.3 The key conditions

Para 1 Sch 4B TCGA provides:

- (1) This Schedule applies where trustees of a settlement—
 - (a) make a transfer of value (see paragraph 2) in a year of assessment in which the settlement is within section 86 or 87 (see paragraph 3), and
 - (b) in accordance with this Schedule the transfer of value is treated as linked with trustee borrowing (see paragraphs 4 to 9).

Thus the three key conditions, or sets of conditions, are:

- (1) A transfer of value (in my terminology, “**a Sch4B-transfer**”)
- (2) Trustee borrowing
- (3) The Sch4B-transfer is “linked” with trustee borrowing

When these conditions are all satisfied, there is what I call “**a Sch4B-disposal**”.⁵

⁵ See 49.12 (Sch4B-disposal).

49.4 Sch4B-transfer

The statutory term “transfer of value” is unfortunate. Firstly the term is usually used with a specific IHT meaning. Secondly, the term is artificially defined to include loans and other transactions which do not constitute a transfer of value in the normal sense of the term. Although it is normally better to adopt statutory terminology, in this case I think it is clearer to use the term “**Sch4B-transfer**”.

The fact that there is a Sch4B-transfer does not necessarily mean that there is a Sch4B-disposal: the transfer is only the first of the three conditions that must be met for a Sch4B-disposal.

There are three types of Sch4B-transfer. Para 2(1) Sch 4B TCGA provides:

For the purposes of this Schedule trustees of a settlement make a transfer of value if they—

- (a) lend money or any other asset to any person,
- (b) transfer⁶ an asset to any person and receive either no consideration or a consideration whose amount or value is less than the market value of the asset transferred, or
- (c) issue a security of any description to any person and receive either no consideration or a consideration whose amount or value is less than the value of the security.

Trustees do not make a Sch4B-transfer if an underlying company held by them lends, transfers, or issues a security.

The CG Manual does not add much to the statute but I set it out for completeness:

35124. Transfer of value [February 2006]

Under TCGA 1992, SCH 4B, para 2(1) trustees make a transfer of value if they

- (a) lend money or any other asset, regardless of whether a commercial rate of interest or hire is charged, or
- (b) transfer an asset, including cash, see paragraph 13(1), for no consideration or a consideration less than its market value, or
- (c) issue a security for no consideration or a consideration less than its value.

⁶ See 49.25.2 (“Transfer”).

35125. Transfer of value [February 2006]

References to transfers of value include everything that is or is treated as a disposal under TCGA 1992, and also include transfers or loans of money, and loans of other assets. Note that this includes disposals of assets such as government stock or a dwelling house occupied as a beneficiary's principal private residence, even though there would be no chargeable gain on the disposal. It also includes the occasion of a beneficiary becoming absolutely entitled as against the trustee but in this context see CG35128.

Some part disposals involve the creation of a new asset. In this situation any reference in the legislation to the transfer of an asset refers to the (part) disposal of the old asset.

CG35124(b) above makes it clear that a sale of an asset, whether to an unconnected person or a beneficiary, is not a transfer of value provided it is for full consideration.

49.4.1 *Sch4B-transfer type (b): actual transfer*

This is the most important type of 4B-transfer.

RI 259 provides:

B1 Paragraph 2(1)(b)—cash distributions which are income

Where trustees of a discretionary trust make a distribution which is income of the recipient for UK tax purposes, this is not a “transfer of value” within para 2, which is concerned with capital transactions.

49.4.2 *Sch4B-transfer type (a): loans*

I cannot see the reason for Sch4B-transfer type (a) (loans). An effective flip-flop scheme would require a transfer which must fall within (b). There is no scope for tax avoidance via a loan. I would be grateful to any reader who could explain.

RI 259 provides:

B2 Paragraph 2(1)(a)—beneficiary exercising rights under [TLATA]⁷ 1996 s 12

In certain circumstances a beneficiary's occupation of property, instead

⁷ The original refers erroneously to the “Trustee etc Act”.

of being the consequence of the volition of the trustees, may result from personal rights under Trusts of Land and Appointment of Trustees Act 1996 s 12. Our view is that if the rights of the beneficiary arise as a consequence of the wording of the deed or will, then the occupation does not give rise to a transfer of value. It may be otherwise where the rights have arisen as a consequence of the exercise by the trustees of a power of appointment or advancement.

RI 259 provides:

B7 What happens when trustees put money into a conventional current or deposit account at a bank or building society?

Although in general law this is regarded as a loan from the customer to the bank, in the context of this legislation we do not consider that this comes within the meaning of “lend” for the purposes of para 2(1)(a). The currency in which the deposit is made is immaterial.

This is purposive, bordering on wishful, thinking; but since it usually suits the taxpayer, it will not usually be challenged.

49.4.3 Sch4B-transfer type (c): issuing a security

It is normally companies rather than trustees who issue securities so this is of somewhat theoretical interest. RI 259 provides:

B3 Paragraph 2(1)(c)— “issue a security”

We have been asked what the expression “issue a security” covers. It caters for those exceptional circumstances where trustees issue to a beneficiary or to the trustees of another trust a document acknowledging liability. Schedule 4B para 13(2) provides that references to the transfer of an asset include everything that is or is treated as a disposal of an asset. The issue of a security is not in itself the disposal or part disposal of an asset. Therefore para 2(1)(b) does not apply to it, and it was necessary to have a specific provision to cover this possibility.

I find the idea that any flip flop scheme could be carried out by issuing a security somewhat implausible. Assuming it was necessary, a neater solution would have been to define transfer to include the creation of an asset (as for the TAA provisions); but it does not do much harm.

49.4.4 *Amount of value transferred*

Para 2 Sch 4B TCGA provides:

- (3) In the case of a loan, the amount of value transferred is taken to be the market value of the asset.
- (4) In the case of a transfer, the amount of value transferred is taken to be—
 - (a) if any part of the value of the asset is attributable to trustee borrowing, the market value of the asset;
 - (b) if no part of the value of the asset is attributable to trustee borrowing, the market value of the asset reduced by the amount or value of any consideration received for it...
- (5) In the case of the issue of a security, the amount of value transferred shall be taken to be the value of the security reduced by the amount or value of any consideration received by the trustees for it.
- (6) References in this paragraph to the value of an asset are to its value immediately before the material time, unless the asset does not exist before that time in which case its value immediately after that time shall be taken.

49.5 Settlement “within section 86 or 87”

Para 3 Sch 4B TCGA provides (more or less) commonsense definitions.

49.5.1 *Within s.86*

Para 3 Sch 4B TCGA provides:

- (1) This paragraph explains what is meant in this Schedule by a settlement being “within section 86 or 87” in a year of assessment.
- (3) A settlement is “within section 86” in a year of assessment if, assuming—
 - (a) that there were chargeable gains accruing to the trustees by virtue of disposals of any of the settled property originating from the settlor, and
 - (b) that the other elements of⁸ the condition in subsection (1)(e) of

8 The words “the other elements of” are otiose: para 3(3)b requires one to assume that the condition in s.86(1)(e) is met, in other words, the condition need not be met. That makes sense. For this condition, see 47.10 (Section 86 trust gains condition).

that section were met,
chargeable gains would, under that section, be treated as accruing to the settlor in that year.

Expressions used in this sub-paragraph have the same meaning as in section 86.

49.5.2 *Within s.87*

Para 3 Sch 4B TCGA, as inserted by s.92(2) FA 2000, used to provide:

(4) A settlement is “within section 87” in a year of assessment if, assuming—

(a) there were trust gains for the year within the meaning of subsection (2) of that section, and

(b) that beneficiaries of the settlement received capital payments from the trustees in that year or had received such payments in an earlier year,

chargeable gains would, under that section or section 89(2), be treated as accruing to the beneficiaries in that year.

Expressions used in this sub-paragraph have the same meaning as in section 87.

This para was rewritten by para 130 Sch 7 FA 2008:

In paragraph 3 of Schedule 4B (transfers of value by trustees linked with trustee borrowing: settlements), for sub-paragraph (4) substitute—

“(4) A settlement is “within section 87” for a tax year if—

(a) section 87 applies to the settlement for that year,⁹ or

(b) chargeable gains would be treated under section 89(2) as accruing in that year to a beneficiary who received a capital payment from the trustees of the settlement in that year.

(5) The reference in subsection (4)(b) to chargeable gains treated as accruing includes offshore income gains treated as arising.”

The drafter absentmindedly repealed the final sentence of para 4, “Expressions used in this sub-paragraph have the same meaning as in

9 See 48.3 (Non-resident settlement condition).

section 87”.¹⁰ However, that the context shows that the expressions in para 3(4) are nevertheless to be construed with their s.87 meanings.

49.6 Trustee borrowing

Para 4(1) Sch 4B TCGA provides a wide definition of borrowing:

For the purposes of this Schedule trustees of a settlement are treated as borrowing if—

- (a) money or any other asset is lent to them, or
- (b) an asset is transferred to them and in connection with the transfer the trustees assume a contractual obligation (whether absolute or conditional) to restore or transfer to any person that or any other asset.

In the following provisions of this Schedule “loan obligation” includes any such obligation as is mentioned in paragraph (b).

RI 259 provides:

The fact that money was borrowed before 21 March 2000 does not prevent it from being outstanding trust borrowing.

Where trustees are presented with a bill, for example for repairs to trust property, bona fide delay in payment would not convert this into a borrowing for the purposes of paragraph 4.

The second paragraph is wrong, since a debt on a bill for *repairs* cannot constitute borrowing within para 4; para 4(b) only applies on a loan or transfer of *assets*.

49.6.1 *Loan from underlying company to trust*

In the following discussion, a company wholly owned by a trust is called **“an underlying company”**.

A loan to a trust from an underlying company constitutes “trustee borrowing” for the purposes of sch 4B TCGA. RI 259 states that HMRC take this point:

¹⁰ Some databases failed to notice this (accidental) repeal and still include this sentence in para 3 Sch 4B TCGA.

B4 Paragraph 4(1): meaning of “borrowing”

It is not unusual for the trustees of a non-resident trust to borrow money from a non-resident company which they control. In this situation, if the company were resident in the UK, [s.455 CTA 2010] might well be applicable. It has been suggested that in this situation the trustees are effectively “borrowing” from themselves and therefore outside para 4(1). We consider this incorrect, particularly in the light of *Chamberlain v IRC*, 25 TC 357. It does not matter whether the borrowing is from a company controlled by the trustees or their associates, or from an entirely unconnected company. What matters is the use to which the borrowing is put.

At first sight this seems unnecessary. If a trust borrows from an underlying company, rather than a third party, and makes a Sch4B-transfer, it seems odd that there should be a Sch4B-disposal and that sch 4C should apply. But in fact a flip flop scheme could be carried out if trustees borrow from an underlying company, just when they borrow from a third party. Sympathetic courts have allowed trustees to avoid the unfairness by setting aside loans made in (understandable) ignorance of these counterintuitive rules.¹¹ In practice I have not come across a case where HMRC have taken the point but one could in principle avoid it by arranging a capital payment from the company to a beneficiary, rather than a loan to trustees who make the capital payment.

49.6.2 *Amount borrowed*

Para 4(2) Sch 4B TCGA provides:

The amount borrowed (the “proceeds” of the borrowing) is taken to be—
(a) in the case of a loan, the market value¹² of the asset;

11 *Re Leumi Overseas Trust* [2007] JRC 248; *Barclays Private Bank v Chamberlain* 9 ITELR 304. It is an interesting question whether offshore courts will follow the decision of the English Court of Appeal in *Pitt v Holt* [2011] STC 809 which (more or less) abolishes the rule in *Hastings-Bass* on which these decisions were based; discussion must wait until *Pitt v Holt* is final.

12 Defined para 4(3):

“References in this paragraph to the market value of an asset are to its market value immediately before the loan is made, or the transfer is effectively completed, unless the asset does not exist before that time in which case its market value immediately after that time shall be taken.

- (b) in the case of a transfer [ie a transaction within para 4(1)(b)], the market value of the asset reduced by the amount or value of any consideration received for it.

49.7 Sch4B-transfer “linked” with trustee borrowing

49.7.1 *Terminology*

The expression “linked with trustee borrowing” is defined in paras 5-8 Sch 4B. These paragraphs employ the following terms:

- (1) **“Linked with trustee borrowing”**
- (2) **“Outstanding trustee borrowing”**
- (3) **“Normal trust purposes”**
- (4) **“Ordinary trust assets”**

Each of these expressions are best regarded as a labels for complex sets of rules. In each case the label is not particularly apt and the definition can be described as artificial; the labels taken literally would be misleading. The cosy expressions conceal the complex and arbitrary nature of the concepts to which they refer. However it is difficult to think of better terms, and for the purposes of discussion it is best to adopt the statutory terminology *faute de mieux*.

49.7.2 *“Linked” with trustee borrowing*

Para 5(1) Sch 4B TCGA provides:

For the purposes of this Schedule a transfer of value by trustees is treated as linked with trustee borrowing if at the material time there is outstanding trustee borrowing.

49.7.3 *“Outstanding trustee borrowing”*

Para 5(2) Sch 4B TCGA provides:

For the purposes of this Schedule there is outstanding trustee borrowing

The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer.”

at any time to the extent that—

- (a) any loan obligation¹³ is outstanding, and
- (b) there are proceeds of trustee borrowing that have not been either—
 - (i) applied for normal trust purposes, or
 - (ii) taken into account¹⁴ under this Schedule in relation to an earlier transfer of value.

49.7.4 *The material time*

Para 2(2) Sch 4B TCGA provides:

References in this Schedule to “the material time”, in relation to a transfer of value, are to the time when the loan is made, the transfer is effectively completed or the security is issued.

The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer.

The CG manual provides:

35128. The material time [February 2006]

The expression ‘the material time’ is important for two reasons.

The first is that the test whether the transfer of value is linked with trust borrowing is applied at the material time.

The second is that the deemed disposal by the trustees occurs at the material time.

[The Manual sets out para 2(2) and continues] So if say trustees appoint a cash sum to a beneficiary, he would become unconditionally entitled when the money had been transferred to his bank account, not when the cheque was handed to him, for at that stage the trustees might have no

13 Defined in para 4(1): see 49.6 (trustee borrowing).

14 Para 5(3) Sch 4B TCGA provides a commonsense definition:

“An amount of trustee borrowing is “taken into account” under this Schedule in relation to a transfer of value if the transfer of value is in accordance with this Schedule treated as linked with trustee borrowing.

The amount so taken into account is—

- (a) the amount of the value transferred by that transfer of value, or
- (b) if less, the amount of outstanding trustee borrowing at the material time in relation to that transfer of value.”

funds to meet the cheque.

49.8 Normal trust purposes

Para 6(1) Sch 4B TCGA provides:

For the purposes of this Schedule the proceeds of trustee borrowing are applied for normal trust purposes in the following circumstances, and not otherwise.

There are three types of “normal trust purposes”:

- (1) Payment for ordinary trust assets
- (2) Repayment of loan
- (3) Payment of expenses

Para 9 Sch 4B TCGA provides power to amend paras 6-8 by regulation. Presumably HMRC were worried that they might have left some loophole for future tax avoiders. In practice no regulations have been made.

49.9 Normal trust purposes: Payment for ordinary trust assets

Para 6(2) Sch 4B TCGA provides:

They are applied for normal trust purposes if they are applied by the trustees in making a payment in respect of an ordinary trust asset and the following conditions are met—

- (a) the payment is made under a transaction at arm's length or is not more than the payment that would be made if the transaction were at arm's length;
- (b) the asset forms part of the settled property immediately after the material time or, if it does not do so, the alternative condition in paragraph 8 below is met; and
- (c) the sum paid is (or but for section 17 or 39 would be) allowable under section 38 as a deduction in computing a gain accruing to the trustees on a disposal of the asset.

49.9.1 *Ordinary trust assets*

The label “ordinary trust assets” is not apt and many common trust assets do not count as “ordinary”. Para 7 Sch 4B TCGA provides:

(1) The following are “ordinary trust assets” for the purposes of this Schedule—

- (a) shares or securities;¹⁵
- (b) tangible property, whether movable or immovable, or a lease of such property;
- (c) property not within paragraph (a) or (b) which is used for the purposes of a trade, profession or vocation carried on—
 - (i) by the trustees, or
 - (ii) by a beneficiary who has an interest in possession in the settled property;
- (d) any right in or over, or any interest in, property of a description within paragraph (b) or (c).

Thus securities are ordinary trust assets but interests in securities are not. The distinction between securities and interests in securities raises some deep questions, though there is no reason to think that the drafter gave any thought to them.

If trustees lend to an underlying company they have not incurred normal trust expenditure; if they subscribe for redeemable shares they have done so (though redeemable shares are commercially equivalent to a loan).

RI 259 provides:

We have been asked to say whether a futures contract relating to commodities is an “ordinary trust asset”. Such a contract is not a tangible asset nor does it give the holder an interest in such an asset. Therefore, it is not an “ordinary trust asset”.

49.9.2 *Grant of lease*

RI 259 provides:

B8 What happens when money is borrowed to purchase the freehold interest of a property which is then rented on a commercial basis?

... Under para 13(2) references to the transfer of an asset include references to anything that is a disposal, and under TCGA 1992 s 21(2) references to a disposal include references to a part disposal. Paragraph

15 Defined (after a fashion) in para 7(2): “In sub-paragraph (1)(a) “securities” has the same meaning as in section 132.” In this section I use the word “securities” to include shares.

13(3) provides that references to a transfer of an asset do not include the transfer of an asset which is created by the part disposal of another asset. The grant of a lease is a part disposal of the freehold interest and therefore the grant of a lease is a transfer of the freehold interest for the purposes of para 2(1)(b) and is not regarded as the transfer simply of the lease. If the freehold interest was bought with borrowed money it meets the test in para 2(4)(a), and the amount of value transferred equals the market value of the freehold.

Assuming that there is outstanding trustee borrowing at “the material time”, which is defined in para 2(2) as the time the transfer is effectively completed, it is then necessary to consider whether the transfer of value is linked with trustee borrowing. Under para 7 tangible property, and any interest in such property falls within the expression “ordinary trust assets”. However the property concerned must under para 6(2)(b) either form part of the settled property immediately after the material time, or meet the alternative condition in para 8(1)(b) that it is represented by ordinary trust assets which form part of the settled property immediately after the material time. Paragraph 6(2)(b) and para 8(1)(b) may be looked at together. In this situation we say that the reversion to the lease is still part of the settled property, and the lease itself is represented by the right to the rental stream.

Therefore where trustees borrow money to acquire the freehold interest in a property which is then let commercially and, at the material time, there are no outstanding trustee borrowings other than those which have been applied for normal trust purposes, Sch 4B does not apply. But the position will be different if at that moment there are outstanding trustee borrowings applied for other purposes.

The same considerations apply where trustees acquire a long lease which is sublet, and where the asset in question is a chattel rather than land or buildings.

49.9.3 *Asset becoming valueless*

Para 8 Sch 4B TCGA provides:

- (1) The alternative condition referred to in paragraph 6(2)(b) in relation to an asset which no longer forms part of the settled property is that—
 - (a) the asset is treated as having been disposed of by virtue of section 24(1), or
 - (b) one or more ordinary trust assets which taken together directly or indirectly represent the asset—
 - (i) form part of the settled property immediately after the

material time, or

- (ii) are treated as having been disposed of by virtue of section 24(1).

(2) Where there has been a part disposal of the asset, the condition in paragraph 6(2)(b) and the provisions of sub-paragraph (1) above may be applied in any combination in relation to the subject matter of the part disposal and what remains.

(3) References in this paragraph to an asset include part of an asset.

49.10 Normal trust purposes: Repayment of loan

Para 6(3) Sch 4B TCGA provides:

They are applied for normal trust purposes if—

- (a) they are applied by the trustees in wholly or partly discharging a loan obligation of the trustees, and
- (b) the whole of the proceeds of the borrowing connected with that obligation (or all but an insignificant amount) have been applied by the trustees for normal trust purposes.

49.11 Normal trust purposes: Payment of expenses

Para 6(4) Sch 4B TCGA provides:

They are applied for normal trust purposes if they are applied by the trustees in making payments to meet bona fide current expenses incurred by them in administering the settlement or any of the settled property.

RI 259 provides:

B5 Paragraph 6(4)—application of proceeds to meet current expenses

We have been asked whether trustee borrowings to meet payments on account or provision for future or past expenses are covered by the expression “current expenses”. One circumstance in which borrowings are applied for “normal trust purposes” (para 6) is where they are applied by the trustees in making payments to meet bona fide current expenses incurred by them.

One may note that there are three tests to be met—

- The borrowings have been applied by the moment of the transfer of value (para 5(2)(b)(i)).

- They have been applied to meet bona fide “current expenses”.
- The expenses are expenses of “administering” the settlement or any of the settled property.

In the case of borrowing to meet future expenses it is hard to see how the borrowings can be said to have been applied. But the time for making the test is not when the money is borrowed, but the time of the transfer of value (this is “the material time”, as defined in para 2(2)). In the case of payments on account there would be the requisite application and the liability to pay would have been incurred.

We do not regard “current” as restricting qualification to expenditure which for accounting purposes must fall in the year of borrowing, but we should regard it as excluding borrowing to make a provision for future expenditure or to meet expenditure that was incurred long before but left unpaid. In general where contracts for repairs of an ordinary kind have been entered into, we should regard the expenditure anticipated under those contracts to be current expenses at the moment of borrowing. Where trustees as the owner or tenant of a flat are obliged by contract or under the terms of the lease to make payments into a common fund to meet future maintenance or repair expenditure this would be regarded as a current expense.

The expression “administering the settlement or any of the settled property” should be construed widely to cover not only those expenses properly chargeable to income, or which would be so chargeable but for express provisions of the trust deed, but also capital expenditure such as capital taxes in the UK or elsewhere, or legal costs of a reorganisation, in particular the costs of an application under the Variation of Trusts Act. Other capital expenditure would often be expenditure on the asset itself, and therefore qualify under para 6(2). Contributions to the day-to-day running costs of a nominee company controlled by the trustees would also qualify.

49.11.1 *Unproductive expenditure*

RI 259 provides:

B9 What happens when money is spent unproductively, for example on a planning application that fails?

Under para 6(2) there are three conditions that must be met by a payment in respect of “an ordinary trust asset” if it is to be regarded as applied for normal trust purposes. The third, in para 6(2)(c), is that the sum is allowable under TCGA 1992 s 38 (or would be but for s 17 or 39) as a deduction in computing a gain accruing to the trustees on a disposal of

the asset. If an application for planning permission fails, then when the land is actually sold the costs relating to the application are generally not allowable; this is because they are not “reflected in the state or nature of the asset at the time of the disposal”. Paragraph 6(2)(c) however must be referring to a notional disposal not to a real one. In the context of para 6 we consider that the reference can only be to a notional disposal taking place at the time when the expenditure is incurred.

Although one could not lay down as a universal rule that the expenditure would always qualify, the test is whether the existence of the current application for planning permission is reflected in the state or nature of the asset at the time of the notional disposal.

49.12 Sch4B-disposal

Para 1(2) Sch 4B TCGA provides an outline:

Where this Schedule applies the trustees are treated as disposing of and immediately reacquiring the whole or a proportion of each of the chargeable assets that continue to form part of the settled property (see paragraphs 10 to 13).

I refer to this as a “**Sch4B-disposal**”. Para 10 Sch 4B TCGA provides the details:

(1) Where in accordance with this Schedule a transfer of value by trustees is treated as linked with trustee borrowing, the trustees are treated for all purposes of this Act—

(a) as having at the material time¹⁶ disposed of, and

(b) as having immediately reacquired,

the whole or a proportion (see paragraph 11) of each of the chargeable assets that form part of the settled property immediately after the material time (“the remaining chargeable assets”).

(2) The deemed disposal and reacquisition shall be taken—

(a) to be for a consideration equal to the whole or, as the case may be, a proportion of the market value of each of those assets, and

(b) to be under a bargain at arm's length.¹⁷

¹⁶ See 49.7.4 (The material time).

¹⁷ This deeming prevents hold-over relief (which might otherwise apply to a UK resident trust).

49.12.1 *Chargeable asset*

The key term here is “chargeable asset”. Para 10(3) Sch 4B provides:

For the purposes of sub-paragraph (1) an asset is a chargeable asset if a gain on a disposal of the asset by the trustees at the material time would be a chargeable gain.

An offshore fund (within the OIG regime) is not a chargeable asset as no chargeable gain can arise on a disposal.

49.12.2 *The extent of the disposal*

Para 11 Sch 4B TCGA provides:

(1) This paragraph provides for determining whether the deemed disposal and reacquisition is of the whole or a proportion of each of the remaining chargeable assets.

(2) If the amount of value transferred—

- (a) is less than the amount of outstanding trustee borrowing, and
- (b) is also less than the effective value of the remaining chargeable assets,

the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:

$$VT \div EV$$

where—

VT is the amount of value transferred, and

EV is the effective value of the remaining chargeable assets.

(3) If the amount of value transferred—

- (a) is not less than the amount of outstanding trustee borrowing, but
 - (b) is less than the effective value of the remaining chargeable assets,
- the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:

$$TB \div EV$$

where—

TB is the amount of outstanding trustee borrowing, and

EV is the effective value of the remaining chargeable assets.

(4) In any other case the deemed disposal and reacquisition is of the whole of each of the remaining chargeable assets.

(5) For the purposes of this paragraph the effective value of the remaining chargeable assets means the aggregate market value of those

assets reduced by so much of that value as is attributable to trustee borrowing.

(6) References in this paragraph to amounts or values, except in relation to the amount of value transferred, are to amounts or values immediately after the material time.

49.12.3 HMRC example: part disposal

RI 259 provides an example (I have slightly amended the layout for enhanced clarity):

B10 How should we compute the base cost of assets for future disposals?

... Suppose that an asset cost £600, the trustees are treated as disposing of two thirds of the asset at the material time (paragraph 10(1)), and the respective values of two thirds and one third immediately after that time are £900 and £450.

HMRC compute the gain on the Sch4B-disposal:

Deemed Proceeds	900
Cost [two thirds of 600]	<u>-400</u>
Gain	<u>500</u>

HMRC compute the base cost for a future disposal as:

Remaining original cost	600 – 400	200
Deemed Acquisition		<u>900</u>
Revised base cost		<u>1100</u>

49.13 Treatment of gain or loss arising on Sch4B-disposal

If a gain arises on Sch4B-disposal to a trust within s.86, the position is straightforward: the settlor is taxable on the gain.

If a loss arises, it can in principle be set against other gains of the trustees.

In the HMRC view, if a Sch4B-disposal is deliberately made to realise a loss, the loss is disallowed under s.16A TCGA.¹⁸ CG Manual25 June

18 Discussed in more detail in 51.13 (Inter-spouse transfer).

2012 Appendix 9 provides:

Example 18 - trustees make a deliberate transfer of value [February 2010]

1. A body of trustees who fall within the terms of Schedule 4B have outstanding borrowing which has not been used for trust purposes (Schedule 4B is a measure introduced to discourage trustees avoiding capital gains tax by incurring debt and advancing funds from the settlement). The trustees intentionally make a transfer of value which triggers off a charge under Schedule 4B, and as they expect this transaction results in a capital loss. The trustees have realised chargeable gains in the same year, and claim to set the loss against those gains.

2. It is necessary to look at the arrangements which have been entered into by the trustees to determine whether these have been entered into with a main purpose of securing a tax advantage. There are arrangements in this case, so the question is whether or not those arrangements were entered into with a main purpose of securing a tax advantage, and to decide this it is necessary to take account of all the circumstances surrounding the transactions. It will be relevant to consider what the trustees' overall economic objective was, and whether that objective is being fulfilled in a straightforward way, or whether additional, complex or costly steps have been inserted. It is significant that Schedule 4B is itself anti-avoidance legislation, intended to counter avoidance of tax on gains by contrived arrangements between settlements. The fact that the trustees have deliberately triggered the operation of the schedule is an indicator that one of their main purposes was to secure the advantage of the capital loss. In such a case, the TAAR [s.16A TCGA 1992] will apply and the loss will not be an allowable loss.

49.14 Schedule 4C: introduction

The position for s.87 following a Sch4B-disposal is more complicated. Section 85A(1) TCGA provides:

Schedule 4C to this Act has effect with respect to the attribution of gains to beneficiaries where there has been a transfer of value to which Schedule 4B applies.

This takes us to schedule 4C. Para 1(1) Sch 4C TCGA provides:

(1) This Schedule applies where the trustees of a settlement ("the

transferor settlement”) make a transfer of value to which Schedule 4B applies (“the original transfer”)....

(5) References in this Schedule to a transfer to which Schedule 4B applies include any such transfer, whether or not any chargeable gain or allowable loss accrues under that Schedule by virtue of the transfer.

That is, sch 4C applies if the trustees make a Sch4B-disposal. Schedule 4C contains a modified version of the s.87 regime. Section 85A(2) TCGA provides:

Sections 86A to 95 have effect subject to the provisions of Schedule 4C.

49.15 Schedule 4C pool

Para 1 Sch 4C TCGA provides:

(2) The transferor settlement is regarded for the purposes of this Schedule as having a “Schedule 4C pool”.

I abbreviate this to “**Sch4C pool**”.

(3) The Schedule 4C pool contains the section 2(2) amounts for the settlement that are outstanding at the end of the tax year in which the original transfer is made (see paragraph 1A).

49.15.1 “Outstanding section 2(2) amounts”

We need to ascertain “the section 2(2) amounts for the settlement that are outstanding at the end of the year”. Para 1A(1) Sch 4C TCGA provides:

(1) The following steps are to be taken for the purpose of calculating the section 2(2) amounts for a settlement that are outstanding at the end of a tax year (“the relevant tax year”).

Step 1 provides a commonsense starting point:

Step 1 Find the section 2(2) amount for the settlement for the relevant tax year and earlier tax years, as reduced under section 87A as it applies for the relevant tax year and earlier tax years....

See 48.5 (Section 2(2) amount).

(2) For the purposes of Step 1 of sub-paragraph (1) take into account the effect of section 90 in relation to any transfer of settled property from or to the trustees of the settlement made in or before the relevant tax year.

Section 90 TCGA does not apply to a Sch4B-transfer, but it would apply if there had been an earlier transfer between trusts which was not a Sch4B-transfer.¹⁹

So far the rules are the same as for the s.87 trust gain pool.

49.15.2 *Capital payment to non-resident beneficiary: effect on Sch4C pool*

Para 1A(1) Sch 4C TCGA provides:

Step 2 This Step applies if, by virtue of the matching of the section 2(2) amount for the settlement for a tax year (“the applicable year”) with a capital payment, chargeable gains are treated under section 87 or 89(2) as accruing in the relevant tax year to a beneficiary who is not chargeable to tax for that year.

Increase the section 2(2) amount for the applicable year (found under Step 1) by the amount of the chargeable gains....

(3) For the purposes of this Schedule a beneficiary is “chargeable to tax” for a tax year if the beneficiary is resident or ordinarily resident in the UK in that year.

Thus capital payments to non-residents which reduce the s.87 trust gains pool²⁰ are added back to the Sch4C pool. Effectively they do not take trust gains out of the Sch4C pool. I refer to this as “**non-resident’s disallowance**”.

I can see no good reason for this distinction between s.87 and sch 4C; perhaps it just reflects a desire to penalise Sch4B-disposals.

The capital payments which are disallowed are those where the s.87 gain accrues (ie is matched) in the year of the Sch4B-disposal. Other capital payments are not disallowed.

19 See 48.18.4 (Interaction with schedule 4B).

20 See 48.34.3 (Mixed UK and foreign beneficiaries: simple capital payments).

49.16 “Schedule 4B trust gains”

49.16.1 Adding Sch4B trust gains to the Sch4C pool

Section 85A(3) TCGA provides:

- [a] When calculating the section 2(2) amount for a settlement for a tax year (within the meaning of section 87), no account is to be taken of any chargeable gains or allowable losses accruing by virtue of Schedule 4B.
- [b] Nothing in this subsection affects any increase in a section 2(2) amount by virtue of paragraph 1(3A) or 7B(2)(b) of Schedule 4C.

When computing the s.2(2) amount (trust gains), s.85A(3)[a] says that one disregards gains on the Sch4B-disposal. Then para 1A(3A) Sch 4C TCGA (flagged by s.85A(3)[b]) puts them back in, though in a remarkably complex manner:

The section 2(2) amount for that tax year is increased by—

- (a) the amount of Schedule 4B trust gains accruing by virtue of the original transfer (see paragraphs 3 to 7), and
- (b) the total amount of any further Schedule 4B trust gains accruing by virtue of any further transfers of value to which that Schedule applies that are made by the trustees in that tax year.

The key term here is “Sch 4B trust gains”. This term is artificially and somewhat clumsily defined: it does not mean the gains accruing on the Sch4B-disposal. For clarity, I write the expression with scare quotation marks.

49.16.2 Meaning of “sch 4B trust gains”

Para 3 Sch 4C TCGA provides:

- (1) This paragraph explains what is meant for the purposes of this Schedule by “Schedule 4B trust gains”.
- (2) The Schedule 4B trust gains are computed in relation to each transfer of value to which that Schedule applies.
- (3) In relation to a transfer of value the amount of the Schedule 4B trust gains for the purposes of this Schedule is given by—
CA – SG – AL ...

In short:

CA is Chargeable Amount

SG is the Settlor's Gains

AL is Allowable Losses

Each of these terms is elaborately defined. Para 3(3) continues with an outline:

CA is the chargeable amount computed under paragraph 4 or 5 below,
SG is the amount of any gains attributed to the settlor that fall to be deducted under paragraph 6 below, and
AL is the amount of any allowable losses that may be deducted under paragraph 7 below.

49.16.3 *Chargeable amount: non-resident trust*

Para 4 Sch 4C TCGA provides:

- (1) If the transfer of value is made in a year of assessment during which the trustees of the transferor settlement are at no time resident and ordinarily resident in the UK the chargeable amount is computed under this paragraph.
- (2) Where this paragraph applies the chargeable amount is the amount on which the trustees would have been chargeable to tax under section 2(2) by virtue of Schedule 4B if they had been resident and ordinarily resident in the UK in the year (and had made the disposals which Schedule 4B treats them as having made).

The wording is based on the s.87 definition of s.2(2) amount.²¹

49.16.4 *Chargeable amount: dual resident trust*

Para 5 Sch 4C TCGA provides:

- (1) If the transfer of value is made in a year of assessment where—
 - (a) the trustees of the transferor settlement are resident and ordinarily resident in the UK during any part of the year, and
 - (b) at any time of such residence and ordinary residence they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,

²¹ See 48.5 (Section 2(2) amount).

the chargeable amount is computed under this paragraph.

(2) Where this paragraph applies the chargeable amount is the lesser of—

- (a) the amount on which the trustees would be chargeable to tax under section 2(2) by virtue of Schedule 4B on the assumption that the double taxation relief arrangements did not apply (and the disposals which Schedule 4B treats them as having made were made), and
 - (b) the amount on which the trustees would be so chargeable to tax by virtue of disposals of protected assets.
- (3) For this purpose “protected assets” has the meaning given by section 88(4).

The wording is based on the s.87 rules for dual resident trusts.²²

49.16.5 *Settlor's gains*

Para 6(1) Sch 4C TCGA provides:

For the purposes of this Schedule the chargeable amount in relation to a transfer of value shall be reduced by the amount of any chargeable gains arising by virtue of that transfer of value that—

- (a) are by virtue of section 86(4) treated as accruing to the settlor,

The wording is based on the s.87 rules.²³

or

- (b) where section 10A applies, are treated by virtue of that section (as it has effect subject to paragraph 12 below) as accruing to the settlor in the year of return.

For the s.87 equivalent rules, see 49.22.1 (Temporarily non-resident settlor: s.86 charge).

49.16.6 *Losses of trust within s.86*

Para 6(2) Sch 4C TCGA provides:

²² See 48.17 (Dual resident trust).

²³ See 48.5 (Section 2(2) amount).

In determining for the purposes of sub-paragraph (1)(a) the amount of chargeable gains arising by virtue of a transfer of value that are treated as accruing to the settlor, there shall be disregarded any losses which arise otherwise than by virtue of Schedule 4B.

This applies where a trust within s.86 has losses and then realises gains on a Sch4B-disposal. The losses are set against the gains, so no gains are treated as accruing to the settlor. This provision is needed to ensure that those gains are not added to the Sch4C pool.

49.16.7 *Allowable losses accruing on Sch4B-disposal*

Para 7 Sch 4C TCGA provides:

(1) An allowable loss arising under Schedule 4B in relation to a transfer of value by the trustees of a settlement may be taken into account in accordance with this paragraph to reduce for the purposes of this Schedule the chargeable amount in relation to another transfer of value by those trustees.

(2) Any such allowable loss goes first to reduce chargeable amounts arising from other transfers of value made in the same year of assessment.

If there is more than one chargeable amount and the aggregate amount of the allowable losses is less than the aggregate of the chargeable amounts, each of the chargeable amounts is reduced proportionately.

(3) If in any year of assessment the aggregate amount of the allowable losses exceeds the aggregate of the chargeable amounts, the excess shall be carried forward to the next year of assessment and treated for the purposes of this paragraph as if it were an allowable loss arising in relation to a transfer of value made in that year.

(4) Any reduction of a chargeable amount under this paragraph is made after any deduction under paragraph 6.

49.17 **Restrictions on use of losses**

It is necessary to distinguish between losses accruing on a Sch4B-disposal and other losses.

Section 85A(3) TCGA provides:

When calculating the section 2(2) amount for a settlement for a tax year (within the meaning of section 87), no account is to be taken of any

chargeable gains or allowable losses accruing by virtue of Schedule 4B....

Thus losses on a Sch4B-disposal cannot be set against gains in computing the s.2(2) amount for s.87 purposes.

Section 85A(4) TCGA provides:

No account shall be taken of any chargeable gains or allowable losses to which sections 87 to 89 apply in computing the gains or losses accruing by virtue of Schedule 4B.

Thus losses on a non-Sch4B-disposal cannot be set against gains accruing on a Sch4B-disposal.

There is no reason for these complicated rules, but complication was not of concern to the drafter of sch4C, who clearly regarded loss relief with deep suspicion, though I cannot see why.

49.18 Subsequent Sch4B-disposal

Para 7B Sch 4C TCGA provides:

- (1) This paragraph applies if the trustees of the transferor settlement make a further transfer of value to which Schedule 4B applies in a tax year (“the year of the transfer”) after the tax year mentioned in paragraph 1(3).²⁴
- (2) If the settlement has a Schedule 4C pool at the beginning of the year of the transfer—
 - (a) the section 2(2) amounts in the Schedule 4C pool are increased by the section 2(2) amounts for the settlement that are outstanding at the end of the year of the transfer, and
 - (b) the section 2(2) amount in the pool for the year of transfer is increased (or further increased) by the amount of Schedule 4B trust gains accruing by virtue of the further transfer.
- (3) If the settlement does not have a Schedule 4C pool at the beginning of the year of the transfer, this Schedule applies in relation to the further transfer as it applied in relation to the original transfer.
- (4) For the purposes of this paragraph a settlement has a Schedule 4C

24 “The tax year mentioned in para 1(3)” (sch 4C TCGA) is the tax year in which the original transfer is made; see 49.15 (Schedule 4C pool).

pool until the end of the tax year in which all section 2(2) amounts in the pool have been reduced to nil.

49.19 Attribution of Schedule 4C gains to beneficiaries

49.19.1 Exclusion of s.87 regime

Section 85A(2A) TCGA provides:

For the purposes of sections 87 to 89, no account is to be taken of any section 2(2) amount in a Schedule 4C pool (see paragraph 1 of Schedule 4C).

This takes amounts in the Sch4C pool out of the usual s.87 regime. Instead they fall within the Sch4C regime.

Trustees therefore need to keep two sets of computations

- (1) a computation of the s.87 pool of s.2(2) amounts and
- (2) a computation of the Sch4C pool.

49.19.2 Schedule 4C regime

Para 8 Sch 4C TCGA²⁵ provides:

(1) Chargeable gains are treated as accruing in a tax year (“the relevant tax year”) to a beneficiary who has received a capital payment from the trustees of a relevant settlement in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 2(2) amount in the Schedule 4C pool for the relevant tax year or any earlier tax year.

This is best understood by comparing it with the usual s.87 rule. Section 87(2) provides (highlighting the changes):

(2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees of a relevant settlement in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section

25 Flagged (somewhat unnecessarily) in para 1(4): “Paragraphs 8 to 9 provide for the attribution of gains in a settlement's Schedule 4C pool.”

87A as it applies for the relevant tax year) with the section 2(2) amount ~~in the Schedule 4C pool~~ for the relevant tax year or any earlier tax year.

Para 8 continues:

- (2) The amount of chargeable gains treated as accruing is equal to—
 - (a) the amount of the capital payment, or
 - (b) if only part of the capital payment is matched, the amount of that part.

This is based on the s.87 rules.

(3) Section 87A applies for a tax year for the purposes of matching capital payments received from the trustees of a relevant settlement with section 2(2) amounts in the Schedule 4C pool as if—

- (a) references to section 2(2) amounts were to section 2(2) amounts in the Schedule 4C pool,
- (b) references to a capital payment received from the trustees by a beneficiary were to a capital payment received from the trustees of a relevant settlement by a beneficiary who is chargeable to tax for that year, and
- (c) for section 87A(3)(b) there were substituted—
 - “(b) all section 2(2) amounts in the Schedule 4C pool have been reduced to nil.”

Amended as para 8 directs, s.87A provides:

(1) This section supplements s.87.

(2) The following steps are to be taken for the purposes of matching capital payments with s.2(2) amounts in the Schedule 4C pool.

Step 1

Find the s.2(2) amount in the Schedule 4C pool for the relevant tax year.

Step 2

Find the total amount of capital payments received by the beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement in the relevant tax year.

Step 3

The s.2(2) amount in the Schedule 4C pool for the relevant tax year is matched with—

- (a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount in the Schedule 4C pool for the relevant tax year, each capital payment so received by the beneficiaries who are chargeable to tax for that year from the trustees of a relevant

settlement, and

(b) otherwise, the relevant proportion of each of those capital payments. “The relevant proportion” is the s.2(2) amount in the Schedule 4C pool for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.

Step 4

[1] If para (a) of Step 3 applies—

(a) reduce the s.2(2) amount in the Schedule 4C pool for the relevant tax year by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

[2] If para (b) of that Step applies—

(a) reduce the s.2(2) amount in the Schedule 4C pool for the relevant tax year to nil, and

(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

Step 5

[1] Start again at Step 1 (unless subs.(3) applies).

[2] If the s.2(2) amount in the Schedule 4C pool for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—

(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

(3) This subsection applies if—

(a) all of the capital payments received by beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement in the relevant tax year or any earlier tax year have been reduced to nil, or

(b) all section 2(2) amounts in the Schedule 4C pool have been reduced to nil, the section 2(2) amounts for the relevant tax year and all earlier tax years have been reduced to nil.

(4) The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

Para 1A(3) Sch 4C TCGA defines “chargeable to tax”:

For the purposes of this Schedule a beneficiary is “chargeable to tax” for a tax year if the beneficiary is resident or ordinarily resident in the UK in that year.

49.19.3 *Priority between Sch 4C and s.87*

Para 8(4) Sch 4C provides:

Section 87A applies for a tax year by virtue of this paragraph before it applies for that year otherwise than by virtue of this paragraph; but this is subject to sub-paragraph (5).

Thus schedule 4C has priority.

49.19.4 *Priority between OIG Sch 4C and CGT Sch 4C*

Para 8(5) Sch 4C provides:

If section 87A applies for a tax year by virtue of section 762(3) of the Taxes Act²⁶ (offshore income gains), it applies for that year by virtue of that provision before it applies for that year by virtue of this paragraph.

49.20 “Relevant settlements”

Para 8A Sch 4C TCGA provides:

- (1) This paragraph specifies what settlements are relevant settlements in relation to a Schedule 4C pool.
- (2) The transferor and transferee settlements in relation to the original transfer of value are relevant settlements.
- (3) If the trustees of any settlement that is a relevant settlement in relation to a Schedule 4C pool—
 - (a) make a transfer of value to which Schedule 4B applies, or
 - (b) make a transfer of settled property to which section 90 applies,any settlement that is a transferee settlement in relation to that transfer is also a relevant settlement in relation to that pool.
- (4) If the trustees of a settlement that is a relevant settlement in relation to a Schedule 4C pool make a transfer of value to which Schedule 4B applies, any other settlement that is a relevant settlement in relation to that pool is also a relevant settlement in relation to the Schedule 4C pool arising from the further transfer.

26 The reference to ICTA is obsolete. However the legislation still works, because the continuity of law provisions in (for example) para 5 Sch 2 CTA 2010 require old references to take effect as references to the rewritten provisions.

49.20.1 *Disregard of certain capital payments*

Para 9 Sch 4C TCGA provides:

(1) For the purposes of paragraph 8 (and section 87A as it applies for the purposes of that paragraph), no account is to be taken of a capital payment to which any of sub-paragraphs (2) to (4) applies (or a part of a capital payment to which sub-paragraph (4) applies).

There are three disregards:

(2) This sub-paragraph applies to a capital payment received before the tax year preceding the tax year in which the original transfer is made.

That is relatively straightforward.

- (3) This sub-paragraph applies to a capital payment that—
- (a) is received by a beneficiary of a settlement from the trustees in a tax year during the whole of which the trustees—
 - (i) are resident and ordinarily resident in the UK, and
 - (ii) are not Treaty non-resident,
 - (b) was made before any transfer of value to which Schedule 4B applies was made, and
 - (c) was not made in anticipation of the making of any such transfer of value or of chargeable gains accruing under that Schedule.

This must be the rare case of a UK trust within s.87.

- (4) This sub-paragraph applies to a capital payment if (and to the extent that) it is received (or treated as received) in a tax year from the trustees by a company that—
- (a) is not resident in the UK in that year, and
 - (b) would be a close company if it were resident in the UK,
- (and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

I do not understand the reason for this.

49.20.2 *Residence of trustees from whom capital payment received*

Para 10(1) Sch 4C TCGA provides:

Subject to paragraph 9(3), it is immaterial for the purposes of paragraph 8 that the trustees of any relevant settlement are or have at any time been resident and ordinarily resident in the UK.

Why is this needed?

49.21 Remittance basis

Para 8AA Sch 4C TCGA provides:

Section 87B (remittance basis) applies in relation to chargeable gains treated under paragraph 8 as accruing as it applies in relation to chargeable gains treated under section 87 as accruing.

This incorporates the s.87 remittance basis.²⁷

49.22 Temporary non-resident rules

The provisions are to be amended in the FA 2013. The draft clauses in the SRT response paper published in June 2012 are left blank at this point; the work was not yet done.²⁸

49.22.1 Trust within s.86 TCGA

Para 12 Sch 4C TCGA provides:

- (1) This paragraph applies if—
 - (a) by virtue of section 10A, an amount of chargeable gains within section 86(1)(e) that accrued in an intervening year to the trustees of a settlement would be treated as accruing to a person (“the settlor”) in the year of return, and
 - (b) after paragraph 8 has applied for the year of return, the section 2(2) amount for the intervening year that is in the Schedule 4C pool for the settlement is less than the amount mentioned in paragraph (a).

²⁷ See 48.15 (Section 87 remittance basis).

²⁸ The residence response paper expressed the point more tactfully: “6.3 ... the legislation on anti-avoidance in Part 4 is at an earlier stage and the Government is aware that these parts will need refining...”

(2) The amount of chargeable gains treated as mentioned in sub-paragraph (1)(a) as accruing to the settlor in the year of return is limited to the section 2(2) amount referred to in sub-paragraph (1)(b).

(4) Where the property comprised in the transferor settlement has at any time included property not originating from the settlor, only so much (if any) of any capital payment taken into account for the purposes of paragraph 8 above as, on a just and reasonable apportionment, is properly referable to property originating from the settlor shall be taken into account in computing the amount charged to beneficiaries.

(5) Expressions used in this paragraph and section 10A have the same meanings in this paragraph as in that section; and paragraph 8 of Schedule 5 shall apply for the construction of the references in sub-paragraph (4) above to property originating from the settlor as it applies for the purposes of that Schedule.

49.22.2 *Trust within s.87*

Para 12A Sch 4C TCGA provides:

(1) This paragraph applies where by virtue of section 10A an amount of gains would (apart from this Schedule) be treated under section 87 as accruing to a person (“the beneficiary”) in the year of return by virtue of a capital payment made to him in an intervening year.

(2) Where this paragraph applies, a capital payment equal to so much of that capital payment as exceeds the amount otherwise charged shall be deemed for the purposes of this Schedule to be made to the beneficiary in the year of return.

(3) The “amount otherwise charged” means the total of any chargeable gains attributed to the beneficiary under section 87(2) or 89(2) by virtue of the capital payment.

(4) For the purposes of paragraph 13(5)(b) a deemed capital payment under this paragraph shall be treated as made when the actual capital payment mentioned in sub-paragraph (1) above was made.

(5) Expressions used in this paragraph and section 10A have the same meanings in this paragraph as in that section.

49.23 **Interest supplement**

Para 13 Sch 4C TCGA provides:

(1) This paragraph applies if—

- (a) chargeable gains are treated under paragraph 8 as accruing to a beneficiary by virtue of the matching (under section 87A) of all or part of a capital payment with the section 2(2) amount for a tax year (“the relevant tax year”), and
 - (b) the beneficiary is charged to tax by virtue of the matching.
- (1A) Where part of a capital payment is matched, references in sub-paragraphs (2) and (3) to the capital payment are to the part matched.
- (2) The tax payable by the beneficiary in respect of the payment shall be increased by the amount found under sub-paragraph (3) below, except that it shall not be increased beyond the amount of the payment; and an assessment may charge tax accordingly.
- (3) The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this paragraph) carried interest for the chargeable period at the specified rate.
- The “specified rate” means the rate for the time being specified in section 91(3).
- (4) The chargeable period is the period which—
- (a) begins with the later of the 2 days specified in sub-paragraph (5) below, and
 - (b) ends with 30th November in the year of assessment following that in which the capital payment is made.
- (5) The 2 days are—
- (a) 1st December in the tax year immediately after the relevant tax year, and
 - (b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

49.24 Settlement ceasing to exist after Sch4B-disposal

Para 13A Sch 4C TCGA provides:

Where a settlement ceases to exist after the trustees have made a transfer of value to which Schedule 4B applies, this Schedule has effect as if a year of assessment had ended immediately before the settlement ceased to exist.

49.25 Definitions

There are different sets of definitions for sch 4B and sch 4C.

49.25.1 *Assets and market value*

Para 13(1) Sch 4B TCGA provides:

In this Schedule any reference to an asset includes money expressed in sterling.

References to the value or market value of such an asset are to its amount.

49.25.2 *“Transfer”*

Para 13 Sch 4B TCGA provides:

(2) Subject to sub-paragraph (3), references in this Schedule to the transfer of an asset include anything that is or is treated as a disposal of the asset for the purposes of this Act, or would be if sub-paragraph (1) above applied generally for the purposes of this Act.

(3) References in this Schedule to a transfer of an asset do not include a transfer of an asset that is created by the part disposal of another asset.

49.25.3 *“Settlement” and “trustee”*

“Settlement” in sch 4C means settlement-arrangement (and “trustee” has a similarly extended meaning).²⁹ Whereas “settlement” in sch 4B has the CGT/IT definition. This reflects the difference between s.87 and s.86.³⁰ But sch 4C only applies if the trustees make a Sch4B-disposal,³¹ so sch 4C can only apply where there is a settlement within the CGT/IT meaning.

49.25.4 *Misc schedule 4C definitions*

Para 14 Sch 4C TCGA provides:

(1) In this Schedule—

- (a) “transfer of value” has the same meaning as in Schedule 4B; and
- (b) references to the time at which a transfer of value was made are to the time which is the material time for the purposes of that

29 See 48.2 (“Settlement” and “trustee”).

30 See 47.3.1 (“Settlement” and “settlor”).

31 See 49.14 (Schedule 4C: the key condition).

Schedule.

- (2) In this Schedule, in relation to a transfer of value—
- (a) references to the transferor settlement are to the settlement the trustees of which made the transfer of value; and
 - (b) references to a transferee settlement are to any settlement of which the settled property includes property representing, directly or indirectly, the proceeds of the transfer of value.
- (3) References in this Schedule to beneficiaries of a settlement include—
- (a) persons who have ceased to be beneficiaries by the time the chargeable gains accrue, and
 - (b) persons who were beneficiaries of the settlement before it ceased to exist,
- but who were beneficiaries of the settlement at a time in a previous year of assessment when a capital payment was made to them.

49.26 OIG sch 4C

Regulation 20(3) OFTR incorporates Sch 4C TCGA rules. So far as relevant, this provides:

- ... Schedule 4C to, TCGA 1992 apply in relation to OIG amounts as if—
- (a) references to section 2(2) amounts (except those in paragraph 7B(2)(b) and (4) of Schedule 4C) were to OIG amounts,
 - (b) references to chargeable gains (except the one in paragraph 1(5) of Schedule 4C) were to offshore income gains,
 - (c) references to anything accruing were to it arising³² (and similar references, except the one in paragraph 1(5) of Schedule 4C, were read accordingly),
 - (d) ... paragraphs 1(3A), 3 to 7 and 12 of Schedule 4C were omitted
- ...

For the application of s.87-98 TCGA to OIGs, see 34.13 (OIG s.87 charge).

It is necessary to distinguish the CGT sch 4C rules and the OIG sch 4C rules because the rules are not identical. It might be helpful to use the following terminology:

32 The terminology of the Taxes Acts is that CGT chargeable gains *accrue*; but OIGs *arise*. There is no difference in meaning so it seems somewhat pedantic to make the change of terminology when incorporating the CGT s.87 provisions for OIGs; but it does no harm.

- (1) “**CGT sch 4C**”, the provisions of sch 4C TCGA.
- (2) “**OIG sch 4C**”, the provisions of sch 4C as amended, which apply when the trust has “**OIG amounts**”.

The omission of para 1(3A) and paras 3-7 Sch 4C makes sense as sch 4B does not apply to OIGs. It would have been logical to omit para 7B; instead the drafter neutralises it by not amending references to it.

The omission of para 12 Sch 4C makes sense, as s.86 TCGA does not apply to OIGs.

49.27 Commentary

In accordance with the then government policy, there was no consultation or discussion on the enactment or multiple amendments of Sch 4B and 4C, but it is worth looking back now to assess them.

HMRC would regard Sch 4B and 4C (in their current form) as successful, as they have successfully stopped the schemes at which they are addressed.

Measured by any other criteria they are a failure. They are far too wide (applying to arrangements where there is no avoidance). They are so wonderfully complicated and counterintuitive that one could not expect even conscientious trustees to comply, except some of the largest trusts with large budgets for UK professional advice. A full analysis - which would be several times the length of this long chapter - will never be written.

I expect that the drafter only expected HMRC, and taxpayers, to look at the rules in cases of “abuse”; an attitude HMRC have expressed in relation to other over-wide anti-avoidance legislation.³³ They are in practice generally ignored, by HMRC and by taxpayers. They remain like unexploded ammunition from a distant war: exceptionally careful taxpayers avoid it; others disregard it, generally with impunity as HMRC will rarely know and may not care. While never satisfactory, the problems have been made much worse by the extension of the scope of the s.87 charge in 2008.

In all these respects, of course, schedules 4B and 4C are not very different from other anti-avoidance legislation of their time.

33 For an example, see Kessler & Brown, *Taxation of Charities and Non-profit Organisations*, 8th ed, para 6.16.2 (Can bona fide charities safely ignore the substantial donor rules?) (online version www.taxationofcharities.co.uk).

If a serious attempt is ever made to rationalise the UK taxation of offshore trusts, something much better can be devised. The easiest course would be to restrict the rules with a focussed motive test, ie they only apply where there is a purpose specifically to avoid s.87 or s.86. The schemes at which they are aimed are complex and artificial ones where the avoidance intention is hardly to be denied.

CHAPTER FIFTY

GAINS OF NON-RESIDENT COMPANIES

50.1 Section 13 TCGA – Introduction

Non-resident companies generally pay no UK tax on chargeable gains. This presents an obvious means of CGT avoidance. HMRC's first answer to this is s.13 TCGA. The same problems arise for income of non-resident companies and for income and gains of non-resident trusts, but the statutory solutions are entirely different.

I refer to the gains treated as accruing to a participator under section 13 TCGA as “**s.13 gains**”.

50.1.1 *Cross references*

The following s.13 topics are dealt with elsewhere:

6.16.1 (Gains accruing in the year of arrival and departure)

37.4 (Gains accruing to unit trust).

55.7 (Double Taxation relief).

EU law aspects: see 56.3 (EC infringement proceedings) and 56.11 (Section 13 TCGA).

For s.13 gains accruing to charities, see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations*, (8th ed, 2011) para 4.6 (Section 13) (online version www.taxationofcharities.co.uk).

50.1.2 *Forthcoming reforms*

On 6 December 2011 HMRC said:

The Government will propose amendments in Finance Bill 2013 to ... section 13 of the Taxation of Chargeable Gains Act 1992 (gains on assets held by foreign companies closely controlled by UK participators)

... A further announcement will be made around Budget 2012 and the Government intends to publish a consultation including draft legislation at that time.

This is no doubt a response to the EC infringement proceedings.¹ A consultation on anti-avoidance provisions of this kind is a new and encouraging development.

As usual, the timetable fell behind. Budget 2012 provides:

2.78 As announced in December 2011 the Government will amend ... section 13 of the Taxation of Chargeable Gains Act 1992 (gains on assets held by foreign companies closely controlled by UK participators). The Government will consult on draft legislation after Budget 2012 and will implement changes in Finance Bill 2013. The changes, which are unlikely to be to a taxpayer's disadvantage, will have retrospective effect to 6 April 2012 but, exceptionally, a taxpayer may elect for the new rules to apply from 6 April 2013.

At the time of finalising this chapter in July, no-one knew what the rules are, even though the rules will take effect retrospectively from 6 April 2012. That is (fortunately) unusual in UK taxation, though not entirely unprecedented.

50.2 Non-resident close company

Section 13(1) TCGA provides:

This section applies as respects chargeable gains accruing to a company—

- (a) which is not resident in the UK, and
- (b) which would be a close company if it were resident in the UK.

For the definition of close company see 80.19 (Definition of “close company”).

In this chapter when I refer to a company I assume it is a non-resident close company.

¹ See 56.3 (EC infringement proceedings).

50.3 Attribution of s.13 gains to participator

Section 13(2) TCGA provides:

Subject to this section, every person

[a] who at the time when the chargeable gain accrues to the company is resident or ordinarily resident in the UK, and

[b] is a participator in the company,

shall be treated for the purposes of this Act as if a part of the chargeable gain had accrued to him.

The sidenote to s.13 calls this “attribution” of gains.² Section 13(4)(9)(10) refers to gains “apportioned” to participators. The terms “attribute” and “apportion” are interchangeable.

50.4 Non-resident trustees

Non-resident trustees would not be within s.13(2) TCGA because that only applies to UK residents. However, s.13(10) TCGA provides:

The persons treated by this section as if a part of a chargeable gain accruing to a company had accrued to them shall include the trustees of a settlement who are participators

[a] in the company, or

[b] in any company amongst the participators in which the gain is apportioned under subsection (9) above,

if when the gain accrues to the company the trustees are neither resident nor ordinarily resident in the UK.

Section 13(10) was added to the legislation in 1981, and its clumsy drafting raises some difficulties, discussed below.

50.5 Computation of non-resident company gains on CT principles

It is necessary to ascertain the amount of the chargeable gains accruing to the non-resident company.

² The sidenote reads: “Attribution of gains to members of non-resident companies”. The reference to *members* has been wrong since 1995 and should read *participators* but nothing turns on that.

Section 13 only applies to chargeable gains, so reliefs (including substantial shareholding relief) which prevent a gain from being a chargeable gain apply for the purposes of s.13.

Section 13(11A) TCGA provides:

For the purposes of this section the amount of the gain or loss accruing at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on capital gains.

Indexation relief is applicable because a company within the charge to CT qualifies for that relief.

Section 295(1) CTA 2009 provides:

The general rule for corporation tax purposes is that all profits arising to a company from its loan relationships are chargeable to tax as income in accordance with this Part.

Gains on debts and other loan relationships (including life policies and foreign exchange gains) are not within s.13. Applying the deeming provision of s.13(11A) they are chargeable to tax as income, so no chargeable gain accrues on the disposal.³ The same applies to:

- (1) Derivative contracts, gains from which are chargeable to corporation tax as income under part 7 CTA 2009.
- (2) Intangible fixed assets, gains from which are chargeable to corporation tax as income under part 8 CTA 2009.

For a participator who is an individual or a trust, this seems too good to be true, which raises the question whether a court should construe the deeming provision purposively so as to avoid that result.⁴ However, s.13 also applies to a participator which is a company. It would be anomalous if a corporate participator did *not* obtain indexation relief, and somewhat surprising if loan relationship (etc) gains were treated as chargeable gains. The battle of the anomalies does not give a clear result, and the deeming provision should be given full effect.

³ Section 37 TCGA 1992. The 2012 relief on disposals of foreign currency bank accounts applies to individuals, trustees and PRs but not to companies, because companies do not need the relief: see 49.10 (Foreign currency bank accounts: CGT).

⁴ As was done in *De Rothschild v Lawrenson* 67 TC 300.

HMRC accept this reasoning. They say:

As a consequence of the application of the loan relationship rules, a gain which accrues to a non-UK resident company on disposal of a debt represented by a balance in a non-sterling bank account will not be a chargeable gain. If the company has no chargeable gain, section 13 is not engaged, and therefore UK resident participators cannot be liable to tax in respect of such disposals. This difference in treatment between non-sterling bank accounts held directly and those held indirectly via a non-UK resident company is long standing and there are no plans for its amendment.⁵

The 2012 foreign currency reforms were enacted on this basis.⁶

Gains on debts and policies often qualify for other CGT reliefs, so the question whether such gains could fall within s.13 may not arise.

50.6 Identifying the participators

It is necessary to identify the participators in the non-resident company. Section 13(12) TCGA provides:

In this section “participator”, in relation to a company, has the meaning given by section 454 of CTA 2010.

This takes us to the elaborate standard definition; see 80.17 (Definition of participator). It was not drafted with s.13 in mind. One company can have too many participators for s.13 to cope with easily. I refer to this as the problem of “**overlapping participators**”.

The problem may arise in the case of trusts,⁷ loan creditors⁸ and chains of companies.⁹ The problem is solved in different ways in each case.

50.7 Overlapping participators: trustees and beneficiaries

Suppose a company is owned by a trust. The trustees are participators.

5 Statement published online 9 Dec 2009 www.hmrc.gov.uk/cnr/remittance-basis.htm.

6 See 52.10 (Foreign currency bank accounts: CGT).

7 See 50.7 (Overlapping participators: trustees and beneficiaries).

8 See 50.10 (Overlapping participators: loan creditors).

9 See 50.12 (Chains of companies).

The beneficiaries, except perhaps discretionary beneficiaries, are participators under s.454(1) CTA 2010 since they have an interest in the trust property. See 80.17.4 (Trustees and beneficiaries).

The difficulties this would cause for s.13 TCGA were recognised, and beneficiaries are taken out of s.13 by s.13(14) TCGA:

For the purposes of this section, where—

- (a) the interest of any person in a company is wholly or partly represented by an interest which he has under any settlement (“his beneficial interest”), and
- (b) his beneficial interest is the factor, or one of the factors, by reference to which that person would be treated (apart from this subsection) as having an interest as a participator in that company,

the interest as a participator in that company which would be that person’s shall be deemed, to the extent that it is represented by his beneficial interest, to be an interest of the trustees of the settlement (and not of that person), and references in this section, in relation to a company, to a participator shall be construed accordingly.

The CG Manual correctly provides:

57222 Basic conditions for Section 13 TCGA 1992: Beneficiaries: Section 13(4) TCGA 1992 [April 2011]

Where the trustees of a settlement, whether resident in the UK or not, are participators in a non-resident company then in certain circumstances a beneficiary of the settlement will also be within the definition of participator. The effect of Section 13(14) is that once you reach shares or other interests held by trustees, except in the case of a bare trust, see CG34300, you stop there. In deciding how the chargeable gain of the company should be apportioned, you treat the trustees as if they were the beneficial owners of their shares or other interests and apportion the gain to them as appropriate, ignoring the interests of the beneficiaries. If the trustees are resident then their share of the gain is assessed on them, [or on the settlor under TCGA 1992, S 77 in relevant cases].¹⁰ If the trustees are non-resident then the gain is subject to TCGA 1992, S 86 and TCGA 1992, S 87, see CG57395. Any interest as a participator in the non-resident company which the beneficiary holds in their own right, for example by a personal holding of shares in

¹⁰ Words in square brackets are out of date since 2008.

the non-resident company, will remain within Section 13.

50.8 Foundations

At first sight, a foundation may be a close company within s.13. At first sight, s.13(14) does not apply to a foundation as “settlement” in s.13(14) has the IT/CGT meaning: a foundation is not a settlement in that sense..

If that is right, two questions arise:

- (1) are beneficiaries of a foundation participators?¹¹
- (2) assuming they are participators, what is the extent of their interest under s.13(3)?

These questions raise imponderable and unexplored sub-issues: what are the rights of the beneficiaries (a matter of the construction of the foundation constitution under the law of the foundation); and do those rights amount to “interests” for these purposes (a matter of UK law)?

It is suggested that the presumption against double taxation applies: since a foundation is a settlement for the purposes of s.87, it should not fall within the scope of s.13. The better view is that a foundation is a settlement within the protection of s.13(14); but an alternative route to the same destination is that a foundation is not a company within the meaning of s.13.

In practice HMRC accept that foundations should be taxed as trusts so these questions do not arise.¹²

50.9 Amount of gain attributed to each participator

Once one has identified the participators, one asks how much of the company’s gain is attributed to each of them. Section 13(3) TCGA provides:

That part shall be equal to the proportion of the gain that corresponds to the extent of the participator’s interest as a participator in the company.

This takes us to s.13(13) TCGA:

In this section—

¹¹ See 80.17.4 (Trustees and beneficiaries).

¹² See 79.6.6 (HMRC view).

- (a) references to a person's interest as a participator in a company are references to the interest in the company which is represented by all the factors by reference to which he falls to be treated as such a participator;...

That is, "interest" in s.13(3) is not construed in a narrow or technical manner. The section continues:

- (b) references to the extent of such an interest are references to the proportion of the interests as participators of all the participators in the company (including any who are not resident or ordinarily resident in the UK) which on a just and reasonable apportionment is represented by that interest.

What is just and reasonable? The CG Manual starts with general comments:

57260 Section 13 TCGA 1992: Participators' fractional interests
[April 2011]

...

The just and reasonable requirement

It is quite possible for the different criteria by which persons are participators to produce different percentages for one person's interest in a company. So under one test, for example entitlement to income, A may have 60% and B have 40% and under another test, for example entitlement to capital, A have 36%, B have 54% and C have 10%. This can happen even with relatively simple company structures, for example where there are preference shares, or loans. The total amount of gains apportioned cannot exceed the chargeable gain of the non-resident company. In this situation the gain has to be apportioned as is just and reasonable. This includes taking into account the interests of non-residents.

In considering a just and reasonable apportionment you should take into account all relevant factors, and not simply make an arithmetical adjustment. It would not usually be correct merely to average out the interests using the different factors. The aim of the provisions is to ensure that the gain is attributed to the participators who have the real economic interest in the non-resident company and who will derive the benefit of the gain however indirectly. The just and reasonable apportionment prevents an inappropriate part of the gain being attributed to persons without real economic interests, for example commercial loan creditors, see below.

50.10 Overlapping participators: loan creditors

The problem of overlapping participators including loan creditors is solved, or fudged, by a just and reasonable apportionment. The CG Manual provides:

57260. Section 13 TCGA 1992: Participators' fractional interests [April 2011]

Loan creditors

Any loan creditor of the non-resident company is within the definition of participator as applied for the purposes of Section 13. The aim of the provisions is to ensure that the gain is attributed to the participators who have the real economic interest in the non-resident company. There will be cases where a loan creditor will be a person or institution (such as a bank or similar financial institution) which has loaned money to the non-resident company as a matter of business on commercial terms. The interest of such a loan creditor acting at arms length will be limited to an expectation of repayment of the amount loaned together with payments of interest at a commercial rate. There will be no expectation that the loan creditor can or will benefit from the profits or gains of the non-resident company. In such a case it would not be just and reasonable to apportion any of the gain to a loan creditor of this type. The attribution should be made to those participators who have a real economic interest in the capital gains.

Where there are participators who are loan creditors it will be necessary to review all of the circumstances to satisfy yourself that the interests of the loan creditors can be excluded for the reasons in the preceding paragraph. In some cases the persons with the real economic interest in the non-resident company will be loan creditors whether or not they are participators under one or more of the other tests set out in CG57221. In such cases, where there is participation in more than one way, it may be appropriate, depending on the facts of the case, to aggregate their interests of those persons in reaching an apportionment that is just and reasonable. In other cases the persons with the real economic interest in the non-resident company may be providing the funds which the loan creditor has loaned to the company, and may be persons who are entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for their benefit, see the test in CG57221, and may be participators in their own right by virtue of that test.

50.11 CG Manual examples: shareholders v. loan creditors

50.11.1 *Non-resident shareholder*

The CG Manual starts with a very simple example:

57280. Computation of TCGA 1992, S 13 charge [April 2011]

Facts

- a non-resident company has issued share capital of 100 Ordinary shares
- A, B, C and D each own 25 shares
- A, B, C are all R/OR and domiciled in the UK. D is NR/NOR
- the non-resident company realises a gain of 200,000

CGT computations

You compute the TCGA 1992, S 13 charge as follows.

STEP 1

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 200,000.¹³

STEP 2

Determine the interests of all participants, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances. In this case each of the four participants has a 25 per cent interest.

STEP 3

Calculate the proportion of the gain apportionable to the interests of each participant. Calculate the interests of all participants, including any who are not resident in the UK. In this case the proportion for each participant is 25% of 200,000 = 50,000

STEP 4

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is just and reasonable. Gains of 50,000 are attributed to each of A, B and C and treated as gains accruing to them on the date on which the gain actually accrued to the company.

D is not liable to UK taxation. But it would not be just and reasonable to reapportion D's gain of 50,000 to A, B and C as D has a real economic interest in the non-resident company.

50.11.2 *Examples with loan creditors*

The CG Manual then gives two examples involving loan creditors. The first involves a loan on commercial terms:

13 Chargeable gains can accrue whether or not a company is UK resident. See 46.1 (Territorial scope of CGT), but the method of computation of the gain is different for a UK resident company. However this does not make any difference to the examples.

57281. Computation of TCGA 1992, S 13 charge [April 2011]

Facts

- A and B each own 50 shares
- A and B are both R/OR and domiciled in the UK
- C is a loan creditor for 400,000. The loan is an arm's length commercial transaction and interest is payable at a fully commercial rate on the loan
- the non-resident company realises a gain of 500,000
- the total capital of the non-resident company after the gain is 1,000,000

The solution is to disregard the loan creditor, though the Manual takes many lines to reach this conclusion:

CGT computations

You compute the TCGA 1992, S 13 charge as follows.

STEP 1

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 500,000.¹⁴

STEP 2

Determine the interests of all participants, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.

A is a 50% participant by reference to the shareholding of 50 shares

B is a 50% participant by reference to the shareholding of 50 shares

C is a participant as a loan creditor, being entitled to an amount of 400,000 out of the total capital of 1,000,000

STEP 3

Calculate the proportion of the gain apportionable to the interests of each participant. In this case the proportion for each participant is

A (as shareholder) $500,000 \times 50\% = 250,000$

B (as shareholder) $500,000 \times 50\% = 250,000$

C (as loan creditor) $500,000 \times 40\% = 200,000$

STEP 4

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is not just and reasonable as the total of the gains under the initial apportionment exceeds the actual gain. C is a participant only by virtue of being a commercial loan creditor, see CG57265. C's entitlement as loan creditor should be ignored, subject to a review of the circumstances to establish that C is merely a commercial loan creditor and has no entitlement to a share of profits or gains, and that there are no other arrangements. In this example it is assumed that there are no other arrangements and therefore the whole of the gain should be apportioned by reference to the interests in shares. The final apportionment becomes

A (as shareholder) $500,000 \times 50\% = 250,000$

B (as shareholder) $500,000 \times 50\% = 250,000$

¹⁴ See above footnote.

The second example is the same but the loan is interest-free and from a shareholder:

57282. Computation of TCGA 1992, S 13 charge [April 2011]

Facts

- a non-resident company has issued share capital of 100 Ordinary shares
- A and B each own 50 shares
- A and B are both R/OR and domiciled in the UK
- A is a loan creditor for 200,000. No interest is payable on the loan
- the non-resident company realises a gain of 500,000.
- the total capital of the non-resident company after the gain is 1,000,000

The solution is *still* to disregard the loan creditor, though the Manual is not quite so confident in its answer:

CGT computations

You compute the TCGA 1992, S 13 charge as follows.

STEP 1

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 500,000.¹⁵

STEP 2

Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.

A is a 50% participator by reference to the shareholding of 50 shares

B is a 50% participator by reference to the shareholding of 50 shares

A is also a participator as a loan creditor, being entitled to an amount of 200,000 out of the total capital of 1,000,000. If all of the assets of the company were to be distributed immediately after the accrual of the gain the entitlements of A and B would be

A: 200,000 (as loan creditor) plus 50% of the balance of 800,000 (as shareholder), a total of 600,000 or 60% of the assets.

B: 400,000, 50% of the balance of 800,000 (as shareholder), or 40 % of the assets.

STEP 3

Calculate the proportion of the gain apportionable to the interests of each participator. In this case there are two possible apportionments.

A: $500,000 \times 50\% = 250,000$

B: $500,000 \times 50\% = 250,000$

or

A: $500,000 \times 60\% = 300,000$

B: $500,000 \times 40\% = 200,000$

¹⁵ See above footnote.

STEP 4

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. As there are at least two possible apportionments we must consider all of the facts relating to the arrangements under which A's loan was made and the arrangements regarding profits and gains of the company.

- Does the loan agreement give A any preferential rights to profits or gains, or simply to a repayment of the capital?
- Is B entitled to an equal share of profits or gains?

In such cases there is no easy answer and a full consideration of all of the relevant circumstances is necessary. On the bare facts of this example A has no preferential rights and consequently an apportionment by reference to the shareholdings, effectively excluding A's participation as loan creditor, may be just and reasonable. If so, the gain would be attributed

A: $500,000 \times 50\% = 250,000$

B: $500,000 \times 50\% = 250,000$

50.11.3 *Two classes of shares*

The CG Manual's next example concerns a company with two classes of shares:

57283. Computation of TCGA 1992, S 13 charge [April 2011]

Facts

- a non-resident company has issued share capital of 100 A shares and 100 B shares.
- both classes of shares carry equal voting rights but the B shares carry no entitlement to dividends or distributions in a winding-up.
- the A shares are owned by X who is R/OR and domiciled in the UK
- the B shares are owned by Y who is NR/NOR
- the non-resident company realises a gain of 200,000.

CGT computations

You compute the TCGA 1992, S 13 charge as follows.

STEP 1

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 200,000.¹⁶

STEP 2

Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances. voting rights distributions

X 50% 100%

Y 50% 0%

¹⁶ See above footnote.

X is a 50% participator by reference to voting rights attached to the shareholding in A shares.

Y is a 50% participator by reference to voting rights attached to the shareholding in B shares.

X is a 100% participator by reference to rights to dividends and distributions attached to the shareholding in A shares.

STEP 3

Calculate the proportion of the gain apportionable to the interests of each participator.

X (rights to income and capital) $200,000 \times 100\% = 200,000$

Y (voting rights) $200,000 \times 50\% = 100,000$

STEP 4

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is not just and reasonable as the total of the gains under the initial apportionment exceeds the actual gain. A full review of all of the circumstances would be necessary. It appears that the true economic interest in the non-resident company is held solely by X. Y's entitlement should be ignored, and the whole of the gain apportioned to X.

50.12 Chains of companies

50.12.1 *Overlapping participators: chains of wholly owned companies*

Suppose a chain of wholly owned companies:

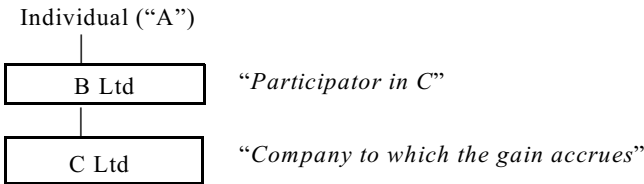

C Ltd is a participator in D Ltd under s.454(1) CTA 2010. But A and B Ltd are also participators, under s.454(2)(c) CTA 2010.¹⁷ This is so wherever the companies are resident. Chains of wholly owned companies raise the problem of overlapping participators.

Section 13(9) TCGA provides:

¹⁷ See 80.17.2 (Chain of wholly owned companies).

- [a] If a person who is a participator in the company at the time when the chargeable gain accrues to the company is itself a company which
 - [i] is not resident in the UK but which
 - [ii] would be a close company if it were resident in the UK,
- [b] [i] an amount equal to the amount apportioned under subsection (3) above out of the chargeable gain to the participating company's interest as a participator in the company to which the gain accrues
 - [ii] shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and
- [c] subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned,
- [d] and so on through any number of companies.

Suppose a simple chain of two wholly owned non-resident companies:

If a gain accrues to C, what is apportioned to A? Under s.13(9)[b][i] it is “an amount equal to the amount apportioned under s.13(3)” to B as a participator in C. This is not well drafted, as nothing is apportioned under s.13(3) to B. No apportionment can be made since B is not UK resident!¹⁸ But the courts must correct that infelicity and construe the words to mean, the amount that would have been apportioned to B, had it been UK resident.

The CG Manual provides:

57290. Indirect interests : Introduction [April 2011]

Without special rules UK resident shareholders or participators could avoid the TCGA 1992, S 13 charge by placing another non-resident company between themselves and the company making the gain. TCGA 1992, S 13(9) prevents this by allowing the Revenue to look through a

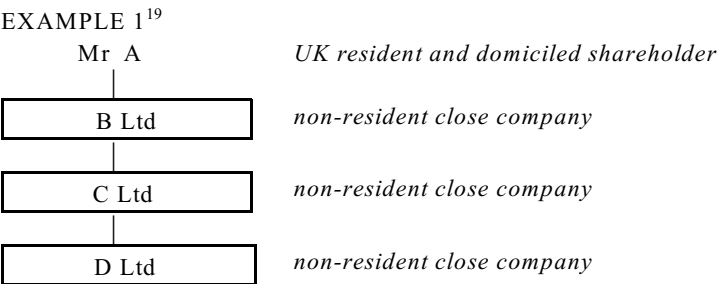

18 One might also argue that apportionment is under s.13(2) and not s.13(3).

chain of non-resident companies. The gain is apportioned to the first tier of UK residents or non-resident trusts in the chain of interests. For TCGA 1992, S 13(9) to apply each company in the chain must itself satisfy the basic conditions outlined in CG57220.

Therefore each company must be

- a company that is not resident in the UK and
- a company that would be a close company if it was resident in the UK.

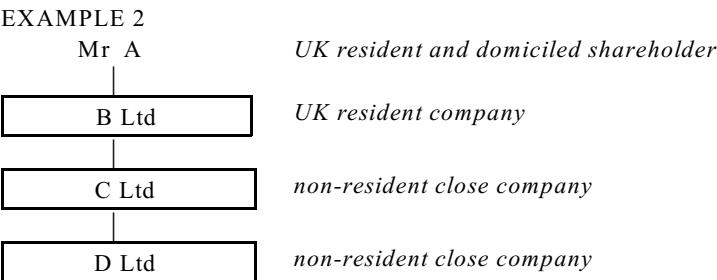

The CG Manual begins with a straightforward example:

Gains accruing to D Ltd are not attributed to C under s.13(2) because C is not UK resident. See s.13(2)[a]. But the CG Manual correctly notes:

Any gains of D Ltd can be apportioned to Mr A because TCGA 1992, S 13(9) allows you to look through the chain of non-resident closely controlled companies.

The next example concerns a chain including a resident company:

19 I have added the diagrams to increase clarity.

The Manual analyses this as follows:

Any gains of D Ltd can be apportioned to B Ltd but not Mr A. This is because B Ltd is the first UK resident shareholder in the chain.

This was correct before 1995, when s.13(2) and (9) TCGA only apportioned gains to a *shareholder* in a non-resident company. A is not a shareholder of D Ltd. But why can't A be assessed now under s.13(2) or (9)? A is a participator in D Ltd. Perhaps this restricted rule is implied by s.13(9) TCGA. Or if not, perhaps it would be just and reasonable to apportion under 13(2) to company B and to no-one else. One way or the other, the problem of overlapping participators in chains of companies is solved by stopping at the first UK resident company.

EXAMPLE 3

Any gains of D Ltd can be apportioned to C Ltd but not Mr A even though Mr A owns shares in B Ltd a closely controlled non-resident company. (Gains which accrue to B Ltd in its own right on disposal of its own assets can be apportioned to Mr A.)

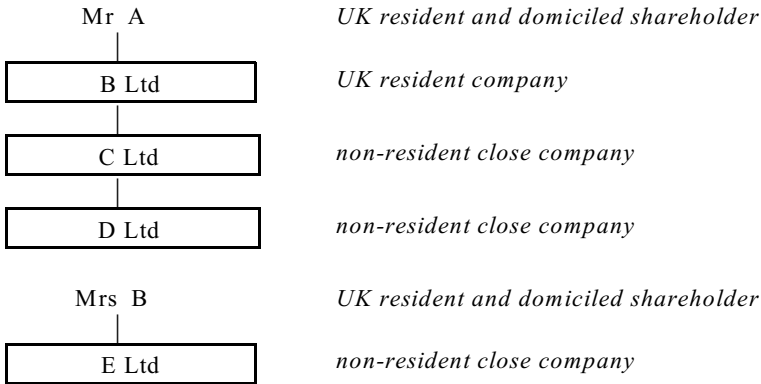

The next Manual example is a straightforward variation on the above:

57291. Indirect interests: UK resident shareholder in the chain of participators [April 2011]

When considering the operation of TCGA 1992, S 13(9) each chain of shareholdings must be considered separately.

Example

20 The express "closely controlled" is used here (somewhat unhelpfully) as a synonym of "close".

The gains of [E Ltd]²¹ can be apportioned to Mrs B because she is the first UK resident shareholder in that chain of shareholdings. The gains of D Ltd cannot be apportioned to Mr A because B Ltd is the first UK resident shareholder in that chain of shareholdings.

50.13 Chains of companies not wholly owned

We have so far considered simple chains of wholly owned companies. The CG manual continues with an example of a less than 100% chain:

57291. Indirect interests: UK resident shareholder in the chain of participators [April 2011]

... You calculate the extent of a person's indirect interest on a particular test of participation by multiplying the proportional interest in the assets of each company in the chain.

EXAMPLE

If D Ltd makes gains of 100,000 the TCGA 1992, S 13 charge on Mr A is $£100,000 \times 50\% \times 75\% \times 75\% = £28,125$.

21 The original reads "D Ltd" which must be a slip for "E Ltd", if the diagram is correct.

Mr A is a participator in B Ltd. Mr A is not a participator in D Ltd but that does not matter because C Ltd is a participator in D Ltd, B Ltd is a participator in C Ltd, and gains of D Ltd are attributed to Mr A under s.13(9) TCGA. It is assumed for the purposes of the example that D Ltd is close, which is not necessarily the case; it depends on the other shareholdings, which are not specified in the example.

50.14 Section 13 remittance basis

Section 14A TCGA provides a relief which I call “**the s.13 remittance basis**”. Section 14A(1) provides:

This section applies if—

- (a) by virtue of section 13, part of a chargeable gain that accrues to a company on the disposal of an asset is treated as accruing to an individual in a tax year, and
- (b) the individual is not domiciled in the UK in that year.

In short, the relief applies to a remittance basis taxpayer.

Section 14A(2) provides the relief:

The part of the chargeable gain treated as accruing to the individual (“the deemed chargeable gain”) is a foreign chargeable gain within the meaning of section 12 if (and only if) the asset is situated outside the UK.

Although the statutory term is “deemed chargeable gains” I prefer to use the term “**s.13 gains**” to distinguish them from other deemed chargeable gains. Section 14A(2) brings s.12 TCGA into application and so provides for the remittance basis.

Section 14A(3) TCGA provides:

For the purposes of Chapter A1 of Part 14 of ITA 2007 (Remittance Basis)—

- (a) treat any consideration obtained by the company on the disposal of the asset as deriving from the deemed chargeable gain, and
- (b) unless the consideration so obtained is of an amount equal to the market value of the asset, treat the asset as deriving from the deemed chargeable gain.

In the absence of express provision, it might be argued that the s.13 gain could not be remitted as it does not exist. Section 14A(3)(a) deals with that problem.

Section 14A(3)(b) is necessary since the equivalent rule in s.809T ITA only applies to gains accruing on a disposal by an individual.

Suppose:

- (1) A non resident company (“OC”) disposes of a foreign situate asset and realises a gain.
- (2) The gain (or part) is deemed to accrue to T (an individual taxable under the remittance basis).

T is subject to tax on the gain if OC brings/receives/uses the sum in the UK, if a company is a relevant person in relation to T. A company within s.13 will in principle be a relevant person in relation to T.

If OC distributes the sum by way of dividend and T brings/receives/uses the sum in the UK then T is arguably subject to two charges:

- (1) CGT on the s.13 gain (for what F receives is derived from the gain) and
- (2) IT on the distribution.

The same applies if OC is held by an IP trust.

Likewise if OC is wound up and the liquidator distributes the sum by way of capital distribution, and F brings/receives/uses the sum in the UK then F is arguably subject to two charges:

- (1) CGT on the s.13 gain (for what F receives is derived from the gain) and
- (2) CGT on the disposal of the shares in OC.

If there are two charges, company distribution relief may apply. But the better view is that there is only a single charge to tax in these cases. One receipt cannot give rise to two charges under the remittance basis.²²

50.15 10% *de minimis* exemption

Section 13(4) TCGA provides:

Subsection (2) above shall not apply in the case of any participator in the company to which the gain accrues where the aggregate amount falling under that subsection to be apportioned
[a] to him and

²² See 10.14.11 (Income from income/gains).

[b] to persons connected with him
does not exceed one tenth of the gain.

I refer to this as “**the 10% *de minimis* exemption**”.

Suppose a non-resident trust holds less than 10% of a non-resident company. Can the trust qualify for the *de minimis* exemption? The difficulty is that s.13(4) does not in terms disapply the whole of s.13: it disapplies s.13(2). The provision governing a non-resident trust is s.13(10) which provides:

The persons treated *by this section* as if a part of a chargeable gain accruing to a company had accrued to them shall include the trustees of a settlement who are participators
[a] in the company, or
[b] in any company amongst the participators in which the gain is apportioned under subsection (9) above,
if when the gain accrues to the company the trustees are neither resident nor ordinarily resident in the UK.

The words “by this section” must refer in particular to section 13(2), for that is the provision which treats persons as a part of the chargeable gain accruing to the non-resident company had accrued to them. Accordingly, the disapplication of s.13(2) in a *de minimis* case must also disapply the attribution in subsection (10).

50.15.1 *Aggregation of connected person's interest*

In order to be satisfied that a participator (“A”) in a non-resident company (“OC”) qualifies for the 10% *de minimis* exemption, it is necessary to identify all persons connected with A (ie co-participators in OC) to whom gains fall to be apportioned under s.13(2).

In deciding whether A qualifies for the *de minimis* exemption, one does not add up the interests in OC of A and *all* persons connected with A and ask if that amounts to more than 10% of OC. One only counts connected persons *to whom gains fall to be apportioned under s.13(2)*. One ignores connected co-participators if gains do not fall to be apportioned to them under that subsection.

For example, assume OC is a straightforward non-resident company and:
(1) A owns 8% of the shares in OC. (Unless the connected person rule applies, A would qualify for the 10% *de minimis* exemption.)

- (2) C (the only participator in OC who is connected with A) owns 3% of the shares in OC. (So if the interest of C is aggregated with the interest of A, A does not qualify for the *de minimis* exemption.)²³

It is necessary to consider separately the cases where C is an individual, a company and a trust, and the cases where C is resident and non-resident, so there are at least six possibilities.

A does not qualify for the 10% *de minimis* exemption if C is

- (1) a UK resident individual taxed on the arising basis²⁴
- (2) a UK resident company, or
- (3) a UK resident trust.

In all these cases the gains of OC do fall to be apportioned to C under s.13(2).

A does qualify for the *de minimis* exemption if C is a *non-resident individual*. In this case, gains cannot be apportioned to C under s.13(2). This is the case even if C is within the temporary non-residence rules.

A does qualify for the *de minimis* exemption if C is a *non-resident company*. In this case, gains of OC might be apportioned to participators in C, but that does not prevent A from qualifying for the *de minimis* exemption unless those participators are themselves connected with A.

Lastly, does A qualify for the 10% *de minimis* exemption if C is a *non-resident trust*? The question is whether gains of OC fall to be apportioned to the trust, under s.13(2). Section 13(10) says (or assumes) that the trustees are treated *by this section* as if gains of OC had accrued to them. The gains are attributed to the trustees under the combined effect of subsection (2) and subsection (10). Whether or not that could be described as an attribution *under s.13(2)* is a matter that could be answered either way, depending on context. In this context, it is suggested that A does qualify for the *de minimis* exemption. This result is consistent with the position for non-resident companies and non-resident individuals. If this result was contrary to common sense (particularly in a tax avoidance context) a court might construe section 13(4) more loosely. But there may be many connected co-participators and A may not be able to know whether they are trustees or not, particularly in the case of non-residents.

23 Similarly, C would not qualify for the *de minimis* exemption, but we focus on the position of A.

24 Further consideration would be needed if C were a remittance basis taxpayer who did not remit the s.13 gain.

So it is sensible to disregard the interests of non-resident trustees for the purposes of the aggregation test.

Even adopting this approach, it will often not be possible for a participator to know whether the 10% *de minimis* exemption applies or not, but one must do the best one can.

Interests held by pension funds cannot be aggregated for the 10% *de minimis* exemption. See 50.18 (Pension schemes).

50.16 Non-resident trading company

Section 13(5) TCGA provides some relief for a non-resident trading company:

This section shall not apply in relation to ...

- (b) a chargeable gain accruing on the disposal of an asset used, and used only—
 - (i) for the purposes of a trade carried on by the company wholly outside the UK, or
 - (ii) for the purposes of the part carried on outside the UK of a trade carried on by the company partly within and partly outside the UK.

50.17 Non-resident company within CT

Section 13(5) TCGA provides:

This section shall not apply in relation to ...

- (d) to a chargeable gain in respect of which the company is chargeable to tax by virtue of section 10B.²⁵

Thus the CT charge has priority over a s.13 charge.

50.18 Pension schemes

Pension schemes qualify for CGT relief under s.271(1)(c) and (1A) TCGA:

²⁵ See 81.1 (Why does permanent establishment matter?).

(1) The following gains shall not be chargeable gains—

...

- (c) any gain accruing to a person from his acquisition and disposal of assets held by him as part of a fund—
 - (i) mentioned in section 614(2) of the Taxes Act,
 - (ii) to which section 615(3) of the Taxes Act applies, or
 - (iii) mentioned in section 648, 649, 650, 651 or 653 of ITEPA 2003;

...

(1A) A gain accruing to a person on a disposal of investments held for the purposes of a registered pension scheme is not a chargeable gain.

This does not confer relief from s.13 gains but s.13(10B) TCGA provides relief:

A chargeable gain that would be treated as accruing to a person under subsection (2) above shall not be so treated if—

- (a) it would be so treated only if assets that are assets of a pension scheme²⁶ were taken into account in ascertaining that person's interest as a participator in the company, and
- (b) at the time the gain accrues a gain arising on a disposal of those assets would be exempt from tax by virtue of section 271(1)(c) or (1A).

A beneficiary of a pension scheme might be a participator in a non-resident company held by the scheme, but they are protected by the exclusion for beneficiaries.²⁷

Section 13(10B) also prevents aggregation of a pension scheme's interest with the interest of a person connected with the trustees of the pension scheme, for the purposes of the 10% *de minimis* exemption. That will not normally arise, as trustees of a pension scheme are not usually connected to other persons, but it could happen, eg if the trustees were partners in an investment partnership.

²⁶ This expression is defined in s.13(10B):

"In para (a) above 'assets of a pension scheme' means assets held for the purposes of a fund or scheme to which any of the provisions mentioned in para (b) above applies."

²⁷ See 50.7 (Overlapping participators: trustees and beneficiaries).

50.19 Partnership holding non-resident company

Suppose a partnership holds a non-resident company to which a gain accrues. Section 59(1) TCGA provides:

Where 2 or more persons carry on a trade or business in partnership—

- (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
- (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

This does not apply to a s.13 gain, which is not a gain on the disposal of a partnership asset. But the partners are participators in the company, and it is just and reasonable (because it fits the scheme of the TCGA) to attribute the s.13 gain to the partners under s.13(2) TCGA. That is, HMRC do not need s.59 TCGA to tax the partners.

50.20 Company distribution relief

Section 13 could often give rise to double taxation and there are three reliefs to prevent this. Statute does not provide names for the reliefs, so I coin the following terminology:

“Company distribution relief”: s.13(5A) relief on distribution by non-resident company.

“Company disposal relief”: s.13(7) relief on disposal of interest in non-resident company.

“Reimbursement relief”: s.13(11) relief on reimbursement by non-resident company.

Section 13(5A) TCGA provides:

Where—

- (a) an amount of tax is paid by a person in pursuance of subsection (2) above, and
- (b) an amount in respect of the chargeable gain is distributed (either by way of dividend or distribution of capital or on the dissolution of the company) before the end of the period specified in subsection (5B) below,

the amount of tax (so far as neither reimbursed by the company nor

applied as a deduction under subsection (7) below) shall be applied for reducing or extinguishing any liability of that person to income tax, CGT or corporation tax in respect of the distribution.

In short, the s.13 tax is set against tax on the distribution.

The CG manual provides:

57351. Gains accruing on/after 28/11/95: Outline of tax credit relief
[April 2011]

[The manual summarises s.13(5A) and continues] It is important to note that relief under Section 13(5A) TCGA 1992 is only due where a charge arises under Section 13 in respect of a gain and a further charge arises in respect of a distribution of an amount in respect of the same gain, and that both charges arise on the same person. Where a gain is attributed to participator A and the distribution is made to participator B no relief can be given to B as B has not paid tax under Section 13...

57360. Quantifying tax set-off available following capital dividends or distributions [April 2011]

... Once capital gains tax has been paid under section 13(2), then the whole of that tax is available for set-off against any tax liability on a subsequent distribution where the conditions for relief are met. Should only half of the gain be distributed this does not mean that only half of the section 13 capital gains tax can be set off. The section 13 tax represents a pool of tax credit to be used up against tax liability arising from appropriate distributions in respect of the same gain. Thus if only half of the gain is distributed but the tax liability on the distribution is at a higher rate than the tax on the section 13 gain, the tax credit relief will be more than half of the Section 13 tax.

57362. Need to have paid tax under Section 13(2) [April 2011]

It is a condition of section 13(5A) relief that the tax arising on the gain attributed under section 13 must have been paid. In some cases the liability on the section 13 gain and on the distribution will arise in the same year of assessment or accounting period, and in other cases the tax on the section 13 gain will not have been paid.

In practice relief may be given by set off providing that the only reason preventing relief being given is that tax on the section 13 gain is unpaid.

For the purpose of s.13(5A) it is necessary to ascertain the liability of the participator to income tax in respect of the distribution from the company.

Section 13(7A) TCGA provides:

In ascertaining for the purposes of subsection (5A) or (7) above the amount of CGT²⁸ or income tax chargeable on any person for any year on or in respect of any chargeable gain or distribution—

- (a) any such distribution as is mentioned in subsection (5A)(b) above and falls to be treated as income of that person for that year shall be regarded as forming the highest part of the income on which he is chargeable to tax for the year;

28 The reference to CGT is not appropriate after the FA 2008 repealed s.13(7A)(b) (c) (d) because s.13(7A) now deals with income tax only. Similarly, the reference to s.13(7) is not appropriate as from 2008, s.13(7A) is only relevant for the purposes of company distribution relief in s.13(5A) and does not apply to company disposal relief in s.13(7). The references made sense before the former paragraphs (b) to (d) were part of s.13(7A). Before 2008, s.13(7A) continued:

“(b) any gain accruing in that year on the disposal by that person of any asset representing his interest as a participator in the company shall be regarded as forming the highest part of the gains on which he is chargeable to tax for that year; (c) where any such distribution as is mentioned in subsection (5A)(b) above falls to be treated as a disposal on which a gain accrues on which that person is so chargeable, that gain shall be regarded as forming the next highest part of the gains on which he is so chargeable, after any gains falling within para (b) above; and (d) any gain treated as accruing to that person in that year by virtue of subsection (2) above shall be regarded as the next highest part of the gains on which he is so chargeable, after any gains falling within para (c) above.”

The CG Manual provides:

57375. Tax adjustment and reliefs: Tax relief ordering rules: Section 13(7A) TCGA 1992 [April 2011]

Before tax year 2008-09, where the events which could give rise to relief under section 13(5A) and (7) occurred within a single tax year, there could, in certain circumstances, be computational problems. To prevent this subsection (7A) set out the order of priority to be given to each tax charge. In ascertaining for the purposes of subsections (5A) and (7) the amount of CGT or IT which is chargeable on a person for a year, the order was

- a. any distribution which is chargeable as income is treated as the top slice of income for that year
- b. any gain accruing on the disposal of any asset representing the participator's interest in the non-resident company is treated as the top slice of gains for that year
- c. any gain accruing on a capital distribution is treated as the second slice of gains for that year
- d. the gain attributed to the participator under Section 13 is treated as the third slice of gains for that year.

In 2008-09 and later years Capital Gains Tax is charged at a fixed rate regardless of an individual's income and so these priority rules are not necessary. [Author's note: the provision might have been retained to deal with the CGT annual exemption, but that is trivial.]

50.20.1 HMRC examples

The CG Manual tries to provide two straightforward worked examples. The first sets s.13 tax against a dividend. The second sets it against a capital distribution:

57365. Examples of relief under Section 13(5A) TCGA 1992 on a distribution to participators [April 2011]

This example illustrates the operation of Section 13(5A) TCGA 1992 if the company realises a gain and distributes an amount in respect of the gain to participators.

Facts

- A UK resident shareholder owns half the shares in a non-resident close company. The company structure is straightforward and the UK resident is a 50% participator. The shareholder does not claim the remittance basis.
- In January 2009 the non-resident company sells an asset realising a gain of £100,000.
- The UK resident has no other gains in 2008-09 but is chargeable to Capital Gains Tax at 18%.
- In June 2009 the company makes a distribution of £100,000 to its shareholders. The UK resident is chargeable at 40% on the amount received.²⁹

Capital Gains Tax treatment

January 2009 - The ordinary rules of Section 13 TCGA 1992 apply. Half the gain of £100,000 is attributable to the shareholder and is chargeable to Capital Gains Tax in 2008-09. The tax due is

Section 13 gain	£50,000
less annual exempt amount	<u>-£ 9,600</u>
Gain	£40,400
CGT @ 18%	£ 7,272

June 2009 – The tax paid under section 13(2) is available for set off. The Income Tax due on the distribution for 2009-10 is

²⁹ The rate of tax would not normally be 40%. The error arose because the author amended the dates of the text of the example in order to appear up to date (the earlier text is preserved in the 7th edition of this work) but (somewhat negligently) did not make the consequential amendment to the rate which should follow from the change of date.

Distribution	£50,000
IT @ 40%	£20,000
less Section 13 tax	<u>-£ 7,272</u>
Tax due	<u>£12,728</u>

57366. Examples of relief: Section 13(5A) TCGA 1992: Company dissolved: Payment to participators [April 2011]

This example illustrates the operation of Section 13(5A) TCGA 1992 if the company realises a gain, is then dissolved and there is a payment to the participators.

Facts

A UK resident shareholder owns half the shares in a non-resident close company. The company structure is straightforward and the UK resident is a 50% participator.

- The shares cost £10,000 in July 2009.
- In March 2010 the non-resident company sells an asset realising a gain of £100,000.
- The UK resident has no other gains in 2009-2010 but is chargeable to Capital Gains Tax at 40%.³⁰
- In July 2011 the non-resident company is dissolved. There is an excess of assets over liabilities. The liquidator makes a capital distribution to shareholders. The total sum distributed to shareholders is £200,000.
- The UK resident has no other gains in 2011-12 but is chargeable to Capital Gains Tax at 18%.

Capital Gains Tax treatment

March 2010 - The ordinary rules of Section 13 TCGA 1992 apply. Half the gain of £100,000 is attributable to the shareholder and is chargeable to Capital Gains Tax in 2009-10. The tax due is:

Section 13 gain	£50,000
Less annual exempt amount (say) ³¹	<u>-£10,000</u>
	£40,000
CGT @ 18%	<u>£ 7,200</u>

June 2011 - As an amount in respect of the whole of the gain has been distributed, the whole of the tax paid is available for set off. But a capital gain has now accrued to the shareholder because a capital distribution has been received from the liquidator. Section 122 TCGA 1992 applies.

³⁰ See above footnote for the reason for this.

³¹ The correct figure is £10,100 but the author presumably composed the example before the amount of the annual exemption was known.

The Capital Gains Tax liability for 2011-12 is	
Proceeds	£100,000
Less cost	- £ 10,000
Gain	£ 90,000
Less annual exempt amount (say) ³²	-£ 10,500
	£ 89,500 ³³
CGT @ 18% ³⁴	£ 16,110
Less Section 13 tax	-£ 7,200
Tax due	<u>£ 8,910</u>

50.20.2 *Time limit for distribution*

Section 13(5B) TCGA sets out the time limit for company distribution relief:

The period referred to in subsection (5A)(b) above is the period of three years from—

- (a) the end of the period of account of the company in which the chargeable gain accrued, or
- (b) the end of the period of twelve months beginning with the date on which the chargeable gain accrued,

whichever is earlier.

The drafting is convoluted, but in plain English the time limit is the earlier of:

- (1) three years from the end of the accounting period; or
- (2) four years from the date of the gain.

50.20.3 *Remittance basis taxpayer participator*

Company distribution relief applies to foreign s.13 gains which are taxed on a remittance basis, but the relief only sets tax on the s.13 gain against

32 The correct figure is £10,600 but the author presumably composed the example before the amount of the annual exemption was known.

33 The author of the manual appears to have made a careless arithmetical mistake here. The reader is invited to speculate what penalty HMRC would think appropriate if a tax return contained as many errors as the two worked examples in the HMRC manual.

34 The correct rate is likely to be 28% but the author presumably composed the example before rate was known.

tax on the distribution, so the relief does not apply unless the s.13 gain is remitted (so tax is paid on it), and the distribution is remitted (so tax actually paid on the distribution qualifies for relief). Thus suppose:

- (1) Year 1: A company realises a gain deemed to accrue to a remittance basis taxpayer under s.13 but not taxed as it is not remitted.
- (2) Year 3: The company declares a dividend in respect of the gain. The dividend is RFI but not taxable as it is not remitted.
- (3) Year 10: the gain and the dividend are remitted.

The relief applies. The time limit is met as the distribution was within 3 years of the relevant time, the time that the gain accrued to the company. The date of the remittance is not relevant.

50.21 Company disposal relief

Section 13(7) TCGA provides:

The amount of CGT paid by a person in pursuance of subsection (2) above (so far as neither reimbursed by the company nor applied under subsection (5A) above for reducing any liability to tax) shall be allowable as a deduction in the computation under this Act of a gain accruing on the disposal by him of any asset representing his interest as a participator in the company.

This sets tax against the gain, so it is not generous. The CG Manual provides:

57370. Tax adjustment and reliefs: disposal of interest by UK resident participator: Section 13(7) TCGA 1992 [April 2011]

[The manual summarises s.13(7) and continues] No deduction is due if the tax was paid by the non-resident company, see CG57390. Indexation allowance is not given on the tax paid. Although the tax is allowed as a deduction in computing the gain it is not expenditure within Section 38(1)(a) TCGA 1992 or Section 38(1)(b) TCGA 1992. Therefore it is not relevant allowable expenditure for indexation allowance purposes, see CG17240.

NOTE. If a taxpayer is within the charge to Capital Gains Tax, neither indexation allowance nor taper relief apply to disposals of assets on or after 6 April 2008. Previously indexation allowance had been frozen at April 1998. For indexation allowance see CG17207+ and for taper relief see CG17895+.

The point about indexation would only be relevant to a corporate taxpayer.

57371 Disposal of interest/shares by UK resident [April 2011]

This example illustrates the deduction under Section 13(7) TCGA 1992 if the taxpayer sells shares in a non-resident company whose gains have been apportioned under Section 13 TCGA 1992.

Facts

- June 2008 a taxpayer buys 500 out of the 750 issued shares in X Ltd, a non-resident close company, at a cost of £100,000.
- March 2009 X Ltd realises a gain of £6,000. $500/750 \times £6,000 = £4,000$ is apportioned to the taxpayer. The amount is included in the 2008-09 Capital Gains Tax assessment. The taxpayer is liable at 18% and tax of £720 is due.
- August 2010 the taxpayer sells the shares for £130,000.

Chargeable Gain

		£
Disposal proceeds		130,000
less Cost	100,000	
less Section 13(7) deduction	720	-100,720
Chargeable gain		29,280
less Annual exempt amount (say)		-10,200
Amount chargeable		<u>19,080</u>

NOTE. If a taxpayer is within the charge to Capital Gains Tax, neither indexation allowance nor taper relief apply to disposals of assets on or after 6 April 2008. Previously indexation allowance had been frozen at April 1998. For indexation allowance see CG17207+ and for taper relief see CG17895+.

This is wholly theoretical as in this situation the taxpayer would and should claim company distribution relief under s.13(5A). The only possible use of company disposal relief would be

- (1) to increase an allowable loss, or
- (2) in cases where the disposal gave rise to a loss or relief for other losses would obviate the gain.

50.22 Reimbursement by non-resident company

Tax on the s.13 gain is due from the UK resident participator and not from the company. The participator has no statutory right of indemnity against the company. But it is possible that the company might pay the tax on the s.13 gain voluntarily, or perhaps a participator might protect himself by entering into a contract requiring the company to pay the tax.

Section 13(11) TCGA provides:

If any tax payable by any person by virtue of subsection (2) above is paid
[a] by the company to which the chargeable gain accrues,
[b] or in a case under subsection (9) above is paid by any such other company,
the amount so paid shall not for the purposes of income tax, CGT or corporation tax be regarded as a payment to the person by whom the tax was originally payable.

The CG Manual provides a précis:

57390. Payment of UK tax by NR company

The non-resident company may pay the UK tax due from a UK resident when gains have been apportioned to him under TCGA 1992, S 13. If so, TCGA 1992, S 13 (11) provides that the payment of the tax on behalf of the UK resident does not give rise to any further liability in the hands of the UK resident. You do not treat the payment as income of the resident or as a capital distribution in respect of the shares in the non-resident company. TCGA 1992, S 13 (11) will also apply if the liability arises because a UK resident has an indirect shareholding in the non-resident company. The liability can be paid by any of the non-resident close companies in the chain.

Reimbursement is better than an income distribution in respect of the gain as the reimbursement is tax free, whereas an income distribution is subject to income tax (at income tax rates) with the benefit of CGT relief (at CGT rates). Of course, the non-resident company will need to consider whether it would be proper to make the reimbursement as a matter of company law (eg are there other shareholders who may be prejudiced?).

50.23 Loss accruing to non-resident company

50.23.1 Arising basis participant

Section 13(1)(2) TCGA only attributes gains (not losses) to a participant, so in the absence of further provision a participant would have no relief for losses accruing to the non-resident company. Section 13(8) TCGA provides some relief for losses:

[a] So far as it would go to reduce or extinguish chargeable gains

accruing by virtue of this section to a person in a year of assessment this section shall apply in relation to a loss accruing to the company on the disposal of an asset in that year of assessment as it would apply if a gain instead of a loss had accrued to the company on the disposal,

- [b] but shall only so apply in relation to that person;
- [c] and subject to the preceding provisions of this subsection this section shall not apply in relation to a loss accruing to the company.

The CG Manual correctly provides:

CG57295 - NR companies: losses: - general [April 2011]

S13 TCGA 1992 is concerned with the apportionment of gains not losses. If the disposal by the non-resident company gives rise to a loss then that loss cannot be apportioned to UK residents for them to set it off against their other gains. However, the loss can be set-off

- against gains made by the same company in the same year of assessment
- against gains made by other non-resident companies which have been apportioned to the taxpayer in the same year of assessment.

Losses of the same company (S13(8) TCGA 1992)

If the non-resident company makes gains and losses in the same year of assessment the losses can be set off against the gains. Any surplus losses cannot be carried forward or back to set-off against gains arising in a different year of assessment.

Losses of different companies

If the UK resident is a participator in more than one non-resident company the proportion of the gains and losses of those companies apportioned to the UK resident can be set off against each other in the same year of assessment. Any surplus loss cannot be carried forward or back to set against the gains arising in different years of assessment.

Careful timing of disposals is needed to ensure that the loss relief is used: s.13 losses should not exceed s.13 gains in any year.

What is the meaning of s.13(8)[b] that loss relief shall only so apply in relation to that person? Perhaps it is intended to cover the situation where:

- (1) A owns a company.
 - (2) The company disposes of asset 1 and realises a loss.
 - (3) A transfers the company to B.
 - (4) The company disposes of asset 2 and realises a gain (in the same year).
- Perhaps the intention is that the loss is not available to B. Though that is

far from clear.

50.23.2 *Remittance basis participator*

Section 14A(4) TCGA 1992 provides:

If—

- (a) the deemed chargeable gain is a foreign chargeable gain (within the meaning of section 12),
 - (b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the year mentioned in subsection (1), and
 - (c) any of the deemed chargeable gain is remitted to the UK in a tax year after that year,
- the chargeable gain treated under section 12(2) as accruing may not be reduced or extinguished under section 13(8).

Careful planning is needed to ensure that loss relief is available.

50.23.3 *Non resident trust participator*

The position is similar as for a UK participator. The aim should be that company losses should not exceed s.13 gains in any year, so that the losses can be set against the gains under s.13(8) TCGA.

50.24 **Negligible value claims**

Section 24 TCGA provides:

- (1A) A negligible value claim may be made by the owner of an asset (“P”) if condition A or B is met.

The usual case is condition A:

- (1B) Condition A is that the asset has become of negligible value while owned by P.³⁵

³⁵ Condition B (not discussed) arises when the disposal by which P acquired the asset was a no gain/no loss disposal.

The claim should be made by the non-resident company, though in practice HMRC have accepted claims by UK resident participants.³⁶ It is possible that the non-resident company might authorise a person to make claims on its behalf, especially if that person is the direct or indirect owner and subject to tax under s.13 on 100% of the company's gains.

Section 24(2)(a) TCGA provides the relief:

Where a negligible value claim is made:

(a) this Act shall apply as if the claimant had sold, and immediately reacquired, the asset at the time of the claim or (subject to paragraphs (b) and (c) below) at any earlier time specified in the claim, for a consideration of an amount equal to the value specified in the claim.

Section 24(2)(b) TCGA specifies the limit of the carry back:

- (b) An earlier time may be specified in the claim if:
- (i) the claimant owned the asset at the earlier time; and
 - (ii) the asset had become of negligible value at the earlier time; and either
 - (iii) for capital gains tax purposes the earlier time is not more than two years before the beginning of the year of assessment in which the claim is made; or
 - (iv) for corporation tax purposes the earlier time is on or after the first day of the earliest accounting period ending not more than two years before the time of the claim.

The time limit here is that in (iv), on or after the first day of the earliest accounting period of the non-resident company ending not more than two years before the time of the claim, since s.13(11A) TCGA provides:

For the purposes of this section the amount of the gain or loss accruing at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on capital gains.

³⁶ Private correspondence.

50.25 Group relief

50.25.1 UK group relief

In outline, the definition of group is in s.170(3) TCGA:

Subject to subsections (4) to (6) below—

- (a) a company (referred to below and in sections 171 to 181 as the “principal company of the group”) and all its 75 per cent subsidiaries form a group and, if any of those subsidiaries have 75 per cent subsidiaries, the group includes them and their 75 per cent subsidiaries, and so on, but
- (b) a group does not include any company (other than the principal company of the group) that is not an effective 51 per cent subsidiary of the principal company of the group.

Under this definition both resident and non-resident companies may form a group. However s.171 TCGA, which provides CG group relief, (in short) restricts the relief to UK group companies:

(1) Where—

- (a) a company ("company A") disposes of an asset to another company ("company B") at a time when both companies are members of the same group, and

(b) *the conditions in subsection (1A) below are met,*

company A and company B are treated for the purposes of corporation tax on chargeable gains as if the asset were acquired by company B for a consideration of such amount as would secure that neither a gain nor a loss would accrue to company A on the disposal.

(1A) *The conditions referred to in subsection (1)(b) above are—*

- (a) *that company A is resident in the United Kingdom at the time of the disposal, or the asset is a chargeable asset³⁷ in relation to that company immediately before that time, and*
- (b) *that company B is resident in the United Kingdom at the time of the disposal, or the asset is a chargeable asset in relation to that company immediately after that time.*

I refer to this as “UK group relief”.

37 “Chargeable asset” has a commonsense definition in s.171(1A)(b) TCGA: “ For this purpose an asset is a "chargeable asset" in relation to a company at any time if, were the asset to be disposed of by the company at that time, any gain accruing to the company would be a chargeable gain and would by virtue of section 10B form part of its chargeable profits for corporation tax purposes.”

A full discussion of CG group relief requires a book to itself. In particular, s.171 goes on to set out 11 exceptions where group relief does not apply; these are not discussed here.

50.25.2 *Non-resident group relief*

Section 14 TCGA provides:

- (1) This section has effect for the purposes of section 13.
 - (2) The following provisions ...
 - (b) section 171 (except subsections (1)(b) and (1A)) ...
- shall apply in relation to non-resident companies which are members of a non-resident group of companies as they apply in relation to companies which are members of a group of companies.

This extends UK group relief to a transfer from a non-resident group company to another non-resident group company. I refer to this as “**non-resident group relief**”.

50.25.3 *Meaning of “non-resident group”*

Section 14(4) TCGA provides a commonsense definition:

- For the purposes of this section—
- (a) a “non-resident group” of companies—
 - (i) in the case of a group, none of the members of which are resident in the UK, means that group, and
 - (ii) in the case of a group, 2 or more members of which are not resident in the UK, means the members which are not resident in the UK;
 - (b) “group” shall be construed in accordance with section 170.

The CG Manual provides 3 examples:

57401. NR group

...³⁸

38 I omit the text, which has not been properly updated for the reforms in the FA 2000; however the points made in the examples are correct. I have created the diagrams to increase clarity.

EXAMPLE 1

B Ltd and C Ltd form a non-resident group.
A Ltd is not a member of the non-resident group but it does have the effect of overseas “grouping” B Ltd and C Ltd.

EXAMPLE 2

B Ltd and C Ltd do not form a non-resident group because they are not members of any group.

EXAMPLE 3

B Ltd and C Ltd form a non-resident group because all of the companies in the group are not resident.

50.25.4 Scope of non-resident group relief

The CG Manual raises the question whether non-resident group relief applies for all participants or just for company participants subject to corporation tax:

57404. Section 14 – UK resident [April 2011]

As shown in Example 3 in CG57401 [set out above] Section 14 TCGA 1992 applies even if the UK resident shareholder³⁹ is not a company.

³⁹ This should read: “participant”.

Some taxpayers and tax advisers are uncertain about this because Section 171 TCGA 1992 includes the words ‘so far as relates to Corporation Tax on chargeable gains’.⁴⁰ They suggest this means Section 14 can only apply if the Section 13 TCGA 1992 charge would be to Corporation Tax on chargeable gains. We do not take this restrictive view. This practice was published in Tax Bulletin, Issue 7, page 74.⁴¹

At the time it was published, this seemed a somewhat cavalier view; HMRC did not explain why one should apply to non-companies (not within CT) a relief restricted by the (then) words ‘so far as relates to CT on chargeable gains’. But the legislation has since changed and since 1998 the HMRC view is supported by s.13(11A) TCGA which provides that the non-resident company’s gain is computed as if the non-resident company were within the charge to CT.⁴²

Normally the HMRC view favoured the taxpayer and so it is not surprising that it was never challenged. Now the pre-1998 position is (more or less) of historic interest only; though one could imagine cases where it would be in the taxpayer’s interest to argue that group relief did

40 The Manual is more than a decade out of date; since 2000 the wording is “for the purposes of corporation tax on chargeable gains”.

41 May 1993, now classified as RI 43 which provides:

“Non-resident companies: attribution of gains to UK shareholders: ‘non-resident groups’

In some circumstances gains realised by non-resident companies may be attributed to shareholders who are resident or ordinarily resident in the UK. The main provisions are in TCGA 1992 s 13. The scope of the legislation is not quite as wide ranging as it may seem because some of the group provisions which apply to UK groups for the taxation of gains—for example those relating to intra-group transfers—are imported for s 13 purposes from elsewhere in TCGA 1992 (see s 14). An intra-group transfer by members of a ‘non-resident group’ would thus be treated as taking place at no gain and no loss so there would be no gain on the disposal to attribute to UK shareholders.

In relation to the application of the no gain/no loss rule in these circumstances [HMRC] have been asked whether the words ‘so far as relates to corporation tax on chargeable gains’ in TCGA 1992 s 171 limit its application to situations where the gain on the intra-group transaction would otherwise be within the charge to corporation tax.

In [HMRC’s] view the no gain/no loss rule is not limited in this way. The benefit of the rule is given whether the shareholder is assessable to CGT or to corporation tax. A similar view is also taken when considering the operation of any of the other sections referred to in TCGA 1992 s 14.”

42 See 50.5 (Computation of non-resident company gains on CT principles).

not apply on a pre-1998 inter-group disposal.

What about a disposal from a non-resident company to a UK resident group company? Non-resident group relief does not apply because the companies are not members of a non-resident group; it is suggested that relief is available under UK group relief, since the disposing company's gain is (for s.13 purposes) deemed to be within the charge to CT. In practice this question may not arise, as a transfer from a non-resident company (within the scope of s.13) to a UK company in the same group would be unusual.

50.26 Group relief clawback charge

Section 14(3) TCGA provides:

Section 179 (except subsections (1)(b) and (1A)) shall apply for the purposes of section 13 as if for any reference therein to a group of companies there were substituted a reference to a non-resident group of companies, and as if references to companies were references to companies not resident in the UK.

So the clawback rules for which apply to UK group relief are incorporated into non-resident group relief. Amended as s.14(3) directs, s.179 TCGA (in outline) provides:

(1) This section applies where—

(a) a company not resident in the UK ("company A") acquires an asset from another company not resident in the UK ("company B") at a time when company B is a member of a non-resident group,

...

(c) company A ceases to be a member of that non-resident group within the period of six years after the time of the acquisition.

References in this section to a company not resident in the UK ceasing to be a member of a non-resident group of companies not resident in the UK do not apply to cases where a company not resident in the UK ceases to be a member of a non-resident group in consequence of another member of the non-resident group ceasing to exist...

50.26.1 Two or more associated companies leave group at same time

Amended as s.14(3) directs, s.179 TCGA (in outline) provides:

(2) Where 2 or more associated⁴³ companies not resident in the UK cease to be members of the non-resident group at the same time, subsection (1) above shall not have effect as respects an acquisition by one from another of those associated companies not resident in the UK.

(2A) Where—

- (a) a company not resident in the UK (“company A”) that has ceased to be a member of a non-resident group of companies not resident in the UK (“the first non-resident group”) acquired an asset from another company not resident in the UK (“company B”) which was a member of that non-resident group at the time of the acquisition,
 - (b) subsection (2) above applies in the case of company A’s ceasing to be a member of the first non-resident group so that subsection (1) above does not have effect as respects the acquisition of that asset,
 - (c) company A subsequently ceases to be a member of another non-resident group of companies not resident in the UK (“the second non-resident group”), and
 - (d) there is a connection between the two non-resident groups,
- subsection (1) above shall have effect in relation to company A’s ceasing to be a member of the second non-resident group as if it had been the second non-resident group of which both companies not resident in the UK had been members at the time of the acquisition.

(2B) For the purposes of subsection (2A) above there is a connection between the first non-resident group and the second non-resident group if, at the time when company A ceases to be a member of the second non-resident group, the company not resident in the UK which is the principal company of that non-resident group is under the control⁴⁴ of—

- (a) the company not resident in the UK which is the principal company of the first non-resident group or, if that non-resident group no longer exists, which was the principal company of that non-resident group when company A ceased to be a member of it;
- (b) any person or persons who control the company not resident in the UK mentioned in para (a) above or who have had it under their control at any time in the period since company A ceased to be a member of the first non-resident group; or
- (c) any person or persons who have, at any time in that period, had under their control either—
 - (i) a company not resident in the UK which would have been a person falling within para (b) above if it had continued to exist, or
 - (ii) a company not resident in the UK which would have been a person falling within this paragraph (whether by reference to a company

43 “Associated” is defined in s.179(10) TCGA: “For the purposes of this section (a) 2 or more companies not resident in the UK are associated companies not resident in the UK if, by themselves, they would form a non-resident group of companies not resident in the UK”.

44 “Control” is defined in s.179(9A) TCGA.

not resident in the UK which would have been a person falling within that paragraph or to a company not resident in the UK or series of companies not resident in the UK falling within this subparagraph)...

50.26.2 The clawback charge

Amended as s.14(3) directs, s.179 TCGA (in outline) provides:

(3) If, when company A ceases to be a member of the non-resident group, company A, or an associated company not resident in the UK also leaving the non-resident group, owns, otherwise than as trading stock—

- (a) the asset, or
- (b) property to which a chargeable gain has been carried forward from the asset on a replacement of business assets,

then, subject to subsection (4) below, company not resident in the UK A shall be treated for all the purposes of this Act as if immediately after its acquisition of the asset it had sold, and immediately reacquired, the asset at market value at that time.

(4) Any chargeable gain or allowable loss accruing to company A on the sale referred to in subsection (3) above shall be treated as accruing to company A at whichever is the later of the following, that is to say—

- (a) the time immediately after the beginning of the accounting period of that company not resident in the UK in which or, as the case may be, at the end of which the company not resident in the UK ceases to be a member of the non-resident group; and
- (b) the time when under subsection (3) above it is treated as having reacquired the asset;

and sections 138 to 142 of CTA 2010 have effect accordingly as if the actual circumstances were as they are treated as having been.

50.26.3 Principal company becomes member of another group

Amended as s.14(3) directs, s.179 TCGA (in outline) provides:

(5) Where, apart from subsection (6) below, a company not resident in the UK ceasing to be a member of a non-resident group by reason only of the fact that the principal company of the non-resident group becomes a member of another non-resident group would be treated by virtue of subsection (3) above as selling an asset at any time, subsections (6) to (8) below shall apply.

(6) The company in question shall not be treated as selling the asset at that time; but if—

- (a) within 6 years of that time the company in question ceases at any time (“the relevant time”) to satisfy the following conditions, and
- (b) at the relevant time, the company in question, or a company not resident in the UK in the same non-resident group as that company, owns

otherwise than as trading stock the asset or property to which a chargeable gain has been carried forward from the asset on a replacement of business assets,

the company in question shall be treated for all the purposes of this Act as if, immediately after its acquisition of the asset, it had sold and immediately reacquired the asset at the value that, at the time of acquisition, was its market value.

(7) Those conditions are—

- (a) that the company not resident in the UK is a 75 per cent subsidiary of one or more members of the other non-resident group referred to in subsection (5) above, and
- (b) that the company not resident in the UK is an effective 51 per cent subsidiary of one or more of those members.

(8) Any chargeable gain or allowable loss accruing to the company not resident in the UK on that sale shall be treated as accruing at the relevant time.

(9) Where—

- (a) by virtue of this section a company not resident in the UK is treated as having sold an asset at any time, and
- (b) if at that time the company not resident in the UK had in fact sold the asset at market value at that time, then, by virtue of section 30, any allowable loss or chargeable gain accruing on the disposal would have been calculated as if the consideration for the disposal were increased by an amount,

subsections (3) and (6) above shall have effect as if the market value at that time had been that amount greater.

50.27 Private residence relief

Suppose T owns a non-resident company, which holds a house that is T's main residence. If the company disposes of the house, and a gain accrues to T, does private residence relief apply? Section 222(1) TCGA provides:

This section applies to a gain accruing to an individual so far as attributable to the disposal of, or of an interest in—

- (a) a dwelling-house or part of a dwelling-house which is, or has at any time in *his* period of ownership been, his only or main residence, or
- (b) land *which he has* for his own occupation and enjoyment with that residence as its garden or grounds up to the permitted area.

(emphasis added)

The gain does accrue to an individual, and it is attributable to the disposal of the dwellinghouse. However, no relief applies because:

- (1) the condition in (b) is not met: there is no land which T *has*;

(2) the condition in (a) is not met: the company's period of ownership is not *his* period of ownership.

T might argue that the section should be read non-literally, but it is not absurd to deny private residence relief when a house is held through a company. The policy is consistent with s.13(11A) TCGA which computes gains as if the company were within the charge to CT, and no-one suggests a UK resident company qualifies for private residence relief.

Likewise if the company is held by a trust, no relief applies to the trustees and the gain on the disposal is a s.2(2) amount (s.87 trust gain) or a s.86 trust gain.

50.28 Administration and appeals

The CG Manual provides:

57270. Liaison: other offices [April 2009]

As you are required to make an apportionment that is just and reasonable by reference to the interests of all of the participators, you will need to liaise with other officers dealing with participators in the non-resident company. In appropriate cases you should agree that a single nominated officer co-ordinate the progress of the enquiries, or conduct the enquiry in respect of some or all of the participators, for example, where all of the participators are represented by the same agent. In any case where a non-resident trust is involved Specialist PT (Residence), see CG57395, should be notified and will normally act as the office co-ordinating HMRC's enquiries.

... It will usually be appropriate to ensure that all appeals relating to the extent of the interests of participators with regard to a particular gain are heard at the same hearing, see AH1795.

CHAPTER FIFTY ONE

CAPITAL LOSSES

51.1 Capital losses – Introduction

This chapter considers CGT relief for losses.

In this chapter:

“**Personal losses**” means losses accruing to individuals.

“**Trust losses**” means losses accruing to trustees.

51.1.1 *Cross references*

The following topics are considered elsewhere:

6.18.1 (Losses in the year of arrival and departure)

8.5 (losses of temporary non-residents)

34.22 (Offshore fund losses)

50.23 (Loss accruing to non-resident company; s.13 loss)

54.1.15 (Interaction of loss relief and foreign tax credits)

51.2 Deduction of losses

Section 2(2) TCGA provides for the deduction of losses against gains:

Capital gains tax shall be charged on the total amount of chargeable gains accruing to the person chargeable in the year of assessment, after deducting—

- (a) any allowable losses accruing to that person in that year of assessment, and
- (b) so far as they have not been allowed as a deduction from chargeable gains accruing in any previous year of assessment, any allowable losses accruing to that person in any previous year of assessment (not earlier than the year 1965–66).

Section 2(2) refers to a “person”, so it applies to individuals, trustees, companies and PRs.

Section 2(2)(a) deducts current year losses and s.2(2)(b) deducts brought forward losses. Section 2(3) TCGA disallows carry-back of losses (unnecessarily) and provides two commonsense restrictions on loss relief:

- [a] Except as provided by section 62,¹ an allowable loss accruing in a year of assessment shall not be allowable as a deduction from chargeable gains accruing in any earlier year of assessment, and
- [b] relief shall not be given under this Act more than once in respect of any loss or part of a loss, and
- [c] shall not be given under this Act if and so far as relief has been or may be given in respect of it under the Income Tax Acts.

The restriction on carry-back of losses means that careful timing of disposals may make the difference between losing and using the losses.

51.3 Allowable loss

Section 2(2) TCGA refers to “allowable” losses. This is a label which brings in a large number of rules; for whenever the drafter wishes to disallow a loss they direct that it is not allowable.

Section 16(1) TCGA first provides a fairly commonsense rule to compute the amount of a loss:

Subject to sections 261B, 261D and 263ZA and except as otherwise expressly provided the amount of a loss accruing on a disposal of an asset shall be computed in the same way as the amount of a gain accruing on a disposal is computed.

Section 16(2) TCGA then defines “allowable loss”:

Except as otherwise expressly provided, all the provisions of this Act which distinguish gains which are chargeable gains from those which are not, or which make part of a gain a chargeable gain, and part not, shall apply also to distinguish losses which are allowable losses from those which are not, and to make part of a loss an allowable loss, and part not; and references in this Act to an allowable loss shall be

¹ See 51.5 (Carry-back of losses on death).

construed accordingly.

Section 16(2A) TCGA requires a claim to be made when the loss accrues (which may be some years before the loss is used):

A loss accruing to a person in a year of assessment shall not be an allowable loss for the purposes of this Act unless, in relation to that year, he gives a notice to an officer of the Board quantifying the amount of that loss; and sections 42 and 43 of the Management Act shall apply in relation to such a notice as if it were a claim for relief.

In this chapter I assume losses are allowable unless otherwise stated.

51.4 Loss accruing to non-resident

Section 16(3) TCGA provides:

- [a] A loss accruing to a person in a year of assessment during no part of which he is resident or ordinarily resident in the UK shall not be an allowable loss for the purposes of this Act
- [b] unless, under section 10 or 10B, he would be chargeable to tax in respect of a chargeable gain if there had been a gain instead of a loss on that occasion.²

In short, a loss accruing to a person who is neither resident nor ordinarily resident in the UK is not an allowable loss. This gives a symmetry with the rule that a gain accruing to such a person is not in principle subject to CGT. Section 16(3) refers to a “person”, so it applies to individuals, trustees, companies and PRs. However, there is some relief for non-resident trusts within s.86, 87 TCGA,³ and non-resident companies within s.13 TCGA.⁴

The realisation of losses outside the scope of CGT is wasteful. Unless the temporary non-residence rules apply:

- (1) An individual leaving the UK may consider realising losses before they become non-resident.

2 The situation in s.16(3)[b] is very rare: see 46.8 (Non-resident trader with UK branch).

3 See 51.6 (Loss accruing to non-resident trustees).

4 See 50.23 (Loss accruing to non-resident company).

- (2) An individual planning to come to the UK may postpone the disposal of assets with inherent losses until they acquire UK resident status.

51.5 Carry-back of losses on death

Section 62(2) TCGA provides for carry-back of losses on death:

Allowable losses sustained by an individual in the year of assessment in which he dies may, so far as they cannot be deducted from chargeable gains accruing in that year, be deducted from chargeable gains accruing to the deceased in the 3 years of assessment preceding the year of assessment in which the death occurs, taking chargeable gains accruing in a later year before those accruing in an earlier year.

Section 62(2A) TCGA provides:

Amounts deductible from chargeable gains for any year in accordance with subsection (2) above shall not be so deductible from any such gains so far as they are gains that are treated as accruing by virtue of section 87 or 89(2) (read, where appropriate, with section 10A).

Thus the disallowance of personal losses against s.87 gains continues on death. That is consistent with the general rule.⁵

51.6 Loss accruing to non-resident trustees

51.6.1 Section 87 and trust losses

Section 87(4) TCGA provides:

The section 2(2) amount for a tax year for which this section applies to the settlement is—

- (a) the amount upon which the trustees would be chargeable to tax under section 2(2) for that year if they were resident and ordinarily resident in the UK in that year ...

Under this definition, losses accruing to trustees in a tax year could be set against gains accruing to the trustees in the same year, in computing the

⁵ See 51.7 (Disallowance of personal losses of beneficiary against s.87 gains).

s.2(2) amount. But losses of an earlier year in which the trustees were not resident could not be carried forward and set against gains of a later year, because s.16(3) TCGA disallows such losses.⁶ However s.97(6) TCGA allows losses to be carried forward:

Section 16(3) shall not prevent losses accruing to trustees in a year of assessment for which section 87 of this Act or section 17 of the 1979 Act applied to the settlement from being allowed as a deduction from chargeable gains accruing in any later year (so far as they have not previously been set against gains for the purposes of a computation under either of those sections or otherwise).

Carried forward losses will usually be used to reduce s.2(2) amounts of a subsequent year. But if the trust became UK resident they could be set against gains to reduce the trustees' own liability. A trust is therefore sometimes better than absolute ownership by a remittance basis taxpayer, whose personal losses may be disallowed.

For the interaction of trust losses and sch 4C TCGA, see 49.16.7 (Allowable losses).

51.6.2 *Section 86 and trust losses*

Under s.86 TCGA the settlor is taxed on what I call “**the s.86 trust gains**”, which is the amount on which trustees would be charged to tax if UK resident.⁷ Under this provision losses accruing to trustees in a tax year could be set against gains accruing to the trustees in the same year, in computing the s.86 trust gains. But losses of an earlier year in which the trustees were not resident could not be carried forward and set against gains of a latter year because s.16(3) TCGA disallows such losses. However para 1(2) sch 5 TCGA provides:

In construing section 86(1)(e) as regards a particular year of assessment [that is, in order to ascertain the s.86 trust gains] —

- (a) any deductions provided for by section 2(2) shall be made in respect of disposals of any of the settled property originating from the settlor, and

⁶ See 51.4 (Loss accruing to non-resident).

⁷ See 47.10 (Section 86 trust gains condition).

- (b) section 16(3) shall be assumed not to prevent losses accruing to trustees in one year of assessment from being allowed as a deduction from chargeable gains accruing in a later year of assessment (so far as not previously set against gains).

For losses and sch 4B TCGA, see 49.16.6 (Losses of trust within s.86).

51.6.3 *Loss accruing before s.86 conditions satisfied*

Para 1(6) sch 5 TCGA provides:

The following rules shall apply in construing section 86(1)(e) as regards a particular year of assessment (“the year concerned”) in a case where the trustees fall within section 86(2)(a)—

- (a) if the conditions mentioned in section 86(1) are not fulfilled as regards the settlement in any year of assessment falling before the year concerned, no deductions shall be made in respect of losses accruing before the year concerned;
- (b) if the conditions mentioned in section 86(1) are fulfilled as regards the settlement in any year or years of assessment falling before the year concerned, no deductions shall be made in respect of losses accruing before that year (or the first of those years) so falling,

but nothing in the preceding provisions of this sub-paragraph shall prevent deductions being made in respect of losses accruing in a year of assessment in which the conditions mentioned in section 86(1)(a) to (d) and (f) are fulfilled as regards the settlement.

51.6.4 *Loss on disposal before 19 March 1991*

For completeness, para 1(7) Sch 5 TCGA provides:

In construing section 86(1)(e) as regards a particular year of assessment and in relation to a settlement created before 19th March 1991, no account shall be taken of disposals made before 19th March 1991 (whether for the purpose of arriving at gains or for the purpose of arriving at losses).

51.7 **Disallowance of personal losses of beneficiary against s.87 gains**

Section 2(4) TCGA provides:

If chargeable gains are treated by virtue of section 87 or 89(2)⁸ as accruing to a person in a tax year (“the relevant deemed gains”)—

- (a) subsection (2) has effect as if the relevant deemed gains had not accrued, and
- (b) the amount on which the person is charged to capital gains tax for that year is the sum of—
 - (i) the amount given by subsection (2) as it has effect by virtue of para (a), and
 - (ii) the amount of the relevant deemed gains.

This is clumsily expressed.⁹ The drafting technique is to isolate the “relevant deemed gains” (ie the s.87 gains) from the loss relief in s.2(2) TCGA. The effect is that personal losses may not be set against s.87 gains accruing to the individual.

51.7.1 *Commentary*

The disallowance of personal losses against s.87 gains was introduced in 1998 because of the difficulties of interaction with taper relief. The CG Manual provides:

34272 Personal losses [June 2005]

... For 1998–99 onwards the beneficiary’s personal allowable losses are not available to reduce these attributed gains. It is not possible to identify any particular gain with a capital payment and so the changes introduced for Section 77 and Section 86 gains, see CG34865+, for 2003–04 onwards could not be extended to Section 87 gains.

The repeal of taper in 2008 should have allowed personal losses to be set once again against s.87 gains. Presumably this point was overlooked or perhaps the deliberate decision was made to discourage the use of trusts. It is submitted that the rule disallowing personal losses against s.87 gains

8 Section 2(5) TCGA provides: “In subsection (4) the reference to section 87 or 89(2) is to that section read, where appropriate, with section 10A.”

9 Section 62(2A) TCGA illustrates how the point could be clearly expressed; see 51.5 (Carry-back of losses on death).

Obscurity in statutory drafting *does* matter. In *Futter v Futter* [2011] STC 890 trustees made an appointment in the mistaken belief that personal losses could be set against s.87 gains. If s.2 had been clearly drafted, it is unlikely that the mistake would have been made.

should be repealed.

51.8 Personal losses of settlor and s.86 gains

The settlor can set their personal losses against s.86 gains, under s.2(2) TCGA.

For completeness, s.2(7) TCGA deals with the situation where a settlor has made two or more settlements:

Where in any year of assessment—

- (a) there are amounts treated as accruing to a person by virtue of section 86,
 - (b) two or more of those amounts, or elements of them—
 - (i) relate to different settlements,
 - (c) losses are deductible from the amounts or elements mentioned in para (b) above but are not enough to exhaust them all,
- the deduction applicable to each of the amounts shall be the appropriate proportion of the aggregate of those losses.

The “appropriate proportion” is that given by dividing the amount in question by the total of the amounts.

This is only necessary to ascertain what amount can be recovered under the settlor’s indemnity against each settlement.

51.9 Loss accruing to remittance basis taxpayer

51.9.1 “*Foreign/UK loss*” “*Foreign/UK gain*”

The legislation distinguishes between foreign losses and other losses. Section 16ZA(6) TCGA gives “**foreign loss**” a commonsense meaning:

In this section “foreign loss” means a loss accruing from the disposal of an asset situated outside the UK.

The legislation also distinguishes between foreign chargeable gains and other gains. This expression has its usual commonsense meaning. Section 12(4) TCGA provides:

In this section “foreign chargeable gains” means chargeable gains accruing from the disposal of an asset which is situated outside the UK.

This only applies for the purposes of s.12, so the definition has to be incorporated by reference in s.16ZB(5) and again in s.16ZC(7) TCGA. (If the drafter had made this a TCGA-wide definition, s16ZB(5) and Section 16ZC(7) TCGA would not have been necessary.)

In this chapter, “**UK loss**” means a loss which is not a foreign loss, ie a loss on a disposal of a UK situate asset; and “**UK gain**” means a gain which is not a foreign gain, ie a gain on a disposal of a UK situate asset

51.9.2 *Background*

The complex rules can be better understood if one understands the constraints faced by the drafter. It is difficult to think of a satisfactory rule for losses of a remittance basis taxpayer. Relief for all losses is too generous when only some gains are taxable. Relief for foreign losses remitted to the UK is not satisfactory, as it would usually be easy to remit the losses to the UK, so that amounts to a relief for (almost) all losses, at least for a well advised taxpayer. Moreover in the case of the extinction of an asset there may be nothing to remit.

The pre-2008 solution was to disallow relief on foreign losses on foreign domiciliaries (to whom the remittance basis applied compulsorily – there was no claim needed). The CGT remittance basis was a package with advantages and this disadvantage. This was a rough and ready solution, but simple and workable. However the introduction of the claim for the CGT remittance basis in 2008 changed the situation. If foreign losses of foreign domiciliaries were disallowed only in years that the individual claimed the remittance basis, then individuals may claim the remittance basis in the year that they realise gains and not in the year that they realise losses. On the other hand, the failure to claim would often be expensive in other ways, and as a simple and pragmatic solution it has much to commend it.

The FD draft clauses 2007 proposed to disallow all foreign losses of foreign domiciliaries, but that was EU non-compliant (not to mention unfair). HMRC presumably agreed, and a new solution had to be devised in the rushed weeks between publication of the FD draft clauses and the Finance Bill, allowing insufficient time for HMRC to consider the issues, and none at all for consultation.

51.9.3 *Summary*

EN FB 2008 provides this summary:

355. The overall effect of these new rules is that:

[1] on the first occasion when a non-UK domiciled individual claims remittance basis for a tax year, the individual may make an election in relation to their foreign losses;

[2] if the individual does not make an election, foreign losses of that tax year and all future tax years will not be allowable losses; and

[3] if the individual makes an election, special rules apply to the deduction of allowable losses where there are foreign chargeable gains.

356. The effect of the special rules is that:

[1] where foreign chargeable gains are remitted to the UK in a tax year later than that in which the asset was disposed of:

[a] no losses of that later year, or of any year later than that in which they arose, are deductible from those gains, and

[b] they may not be covered by the AEA [annual exempt amount] of the year in which they are remitted; and

[2] if remittance basis is claimed for the tax year in which foreign chargeable gains arise, the allowable losses available for deduction from gains of that year are deducted

[a] first from foreign chargeable gains that both arise and are remitted in that year,

[b] then against foreign chargeable gains arising but not remitted in that year, and

[c] only then from any other (non-foreign) chargeable gains arising in that year.

51.9.4 *Relevant tax year*

The legislation uses the expression “**relevant tax year**”. Section 16ZA(1) TCGA provides:

In this section “the relevant tax year”, in relation to an individual, means the first tax year for which—

(a) section 809B of ITA 2007 (claim for remittance basis) applies to the individual, and

(b) the individual is not domiciled in the UK.

In short, the relevant tax year is the first year that the individual claims the

remittance basis (it does not matter whether or not the individual is a long-term resident, ie whether or not the remittance basis claim charge is due). One can put off the relevant year by not making a remittance basis claim but that is not generally going to be worthwhile. In most cases the relevant tax year will be 2008/09 or the earliest year of UK residence if later.

An individual within s.809D or 809E (sub £2k taxpayer or non-taxpayer) is not within s.809B so all losses are allowable in the usual way.

51.9.5 *Loss election*

Section 16ZA TCGA provides:

(2) An individual may make an election under this section for the relevant tax year (in which case sections 16ZB and 16ZC have effect in relation to the individual for the relevant tax year and all subsequent tax years). ...

(4) Sections 42 and 43 of the Management Act (procedure and time limit for making claims), except section 42(1A) of that Act, apply in relation to an election under this section as they apply in relation to a claim for relief.

(5) An election under this section is irrevocable.

Thus a taxpayer on claiming the remittance basis has a once in a lifetime opportunity to make an election under s.16ZA (which I call a “**loss election**”) and this election (if made) applies for the rest of their life. It is impossible to know what will be the best choice and the taxpayer will have to guess. This is almost unprecedented in tax legislation.

RDR Manual provides:

32060 - Foreign chargeable gains loss election [July 2010]

The election should be made for the first year for which the remittance basis is claimed, irrespective of whether the individual has any foreign chargeable gains or overseas losses in that year. The election will usually be made within the white space in the Capital Gains supplementary pages of the same SA Return as the first remittance basis claim is made.

51.9.6 *Time limits*

Section 16ZA(4) TCGA provides:

Sections 42 and 43 of the Management Act (procedure and time limit for making claims), except section 42(1A) of that Act, apply in relation to an election under this section as they apply in relation to a claim for relief.

Thus the usual time limits apply. The best approach may be to wait until the time limit approaches and make the decision then to elect or not, with the benefit of four year's hindsight.

51.9.7 *HMRC guidance and examples*

The CG manual provides:

CG25330 - Remittance basis: losses: introduction

Losses on non-UK assets arising before 6 April 2008 to remittance basis users were not allowable losses. For tax year 2008-09 onwards an individual may elect that such "foreign losses" which arise in the year of election or subsequent years are allowable, subject to certain special rules, against chargeable gains (TCGA92/S16ZA). The election is irrevocable and has effect in the year it is made and all subsequent years.

The special rules for giving relief in respect of foreign losses have two main effects:

- They prevent any loss (not just a foreign loss) of a later year being allowed against a foreign chargeable gain which arose in an earlier year but which is not remitted (and so not taxed) until the year of the loss or later (TCGA92/S16ZB). This is analogous to the "no carry back" rule where the remittance basis is not in point.
- They limit the amount of losses available for relief against chargeable gains in a year by imposing a strict order in which they are matched with gains of various classes, including unremitted foreign chargeable gains (TCGA1992/S16ZC).

Correct operation of these rules is likely to demand careful record-keeping by the taxpayer.

51.10 **Disallowance of foreign losses if no election is made**

Section 16ZA(3) TCGA provides:

If an individual does not make such an election, foreign losses accruing to the individual in—

- (a) the relevant tax year, or
- (b) any subsequent tax year except one in which the individual is domiciled in the UK

are not allowable losses.

In short, if no election is made, foreign losses accruing to a foreign domiciliary are not allowable. UK losses are allowable in the usual way.

Section 16ZA(3) only applies to foreign losses accruing in the relevant tax year. What about foreign losses accruing to a UK resident foreign domiciled individual before 2008/09? The answer is that such losses would normally be disallowed under s.16(4) TCGA as it had effect before 2008/09:

In accordance with section 12(1), losses accruing on the disposal of assets situated outside the UK to an individual resident or ordinarily resident but not domiciled in the UK shall not be allowable losses.¹⁰

51.10.1 *Planning*

It may sometimes be possible to avoid this problem by taking action before disposing of an asset on which an (otherwise) non-allowable loss will accrue. Consider:

- (1) making assets UK situate prior to disposal;¹¹
- (2) an inter-spouse transfer.¹²

A foreign domiciliary who claims the remittance basis may be worse off than if they had not made the claim, if (1) they fail to make the loss election (2) they realise disallowed foreign losses; and (3) they remit sufficient gains to the UK.

51.11 Position if loss election is made

In the following discussion:

“Promptly remitted gains” means foreign gains taxed on the remittance basis which are remitted in the year that the gains accrue.

10 This wording is confusing. It means that losses accruing to a foreign domiciliary on a disposal by the foreign domiciliary of foreign situated property are not allowable. It does not mean that losses are not allowable on a disposal (by any person) to a foreign domiciliary.

11 Contrast 46.5 (CGT planning: making property non-UK situate).

12 See 51.13 (Inter-spouse transfer).

“Postponed remitted gains” means foreign gains taxed on the remittance basis which are remitted in a year after the gains accrue. Statute calls these “relevant gains.” (It is generally better to adopt statutory terminology, for better or worse, but my terminology is clearer than “relevant gains” and makes the discussion rather easier to follow.)

“Unremitted gains” means foreign gains which are not remitted and so (un)taxed on the remittance basis.

Section 16ZB TCGA provides:

16ZB Individual who has made election under section 16ZA: foreign chargeable gains remitted in tax year after tax year in which accrue¹³

(1) This section applies to an individual for a tax year (“the applicable tax year”) if—

- (a) the individual has made an election under section 16ZA,
- (b) foreign chargeable gains accrued to the individual in or after the relevant tax year (within the meaning of section 16ZA) but before the applicable tax year, and
- (c) by reason of the remission¹⁴ of any of the foreign chargeable gains to the UK, chargeable gains are treated under section 12 as accruing to the individual in the applicable tax year (“the relevant gains”).

The key terms here are

- *relevant tax year* (the first year the remittance basis is claimed).¹⁵
- *relevant gains*. Relevant gains are in my terminology **postponed remitted gains**.
- *applicable tax year* (the year – after the relevant tax year – in which the postponed remitted gains are remitted).

In short, s.16ZB applies if there are postponed remitted gains. At this point the drafting becomes exceptionally clumsy.¹⁶

13 *Sic*: the heading is incoherent.

14 Section 16ZB(6) TCGA provides (somewhat unnecessarily): “For the purposes of subsection (1)(c) foreign chargeable gains are remitted to the UK if they are regarded as so remitted for the purposes of section 12.”

15 See 51.9.4 (Relevant tax year).

16 The drafter had adopted the clumsy drafting technique of s.2(4) TCGA which it is helpful to read first, in order to understand s.16ZB; see 51.7 (Disallowance of personal losses against s.87 gains).

Section 16ZB(2) TCGA continues:

Section 2(2) or (4) has effect for the applicable tax year as if the relevant gains had not accrued.

Section 16ZB(2) isolates the postponed remitted gains from the loss relief in s.2(2) TCGA. Then s.16ZB(3) TCGA provides:

The amount on which the individual is charged to capital gains tax for the applicable tax year is (instead of the amount given by section 2(2) or (4)(b), as reduced under section 3) the sum of—

- (a) the adjusted taxable amount, and
- (b) the amount of the relevant gains [postponed remitted gains].

51.11.1 *The adjusted taxable amount*

Section 16ZB(4) TCGA provides:

“The adjusted taxable amount” is—

- (a) if section 3(1) (annual exempt amount) does not apply to the individual for the applicable tax year, the amount given by section 2(2) or (4)(b) as it has effect by virtue of subsection (2), and
- (b) otherwise, so much of that amount as exceeds the exempt amount for the applicable tax year (within the meaning of section 3).

In short, the adjusted taxable amount is the amount of gains less losses (and less the CGT annual exemption if available) apart from the postponed remitted gains.

So in short, if one makes the loss election:

- (1) all losses (UK and foreign losses) are allowable against:
 - (a) UK gains
 - (b) foreign gains if
 - (i) taxed on an arising basis (because no remittance basis claim is made in the year that the gains accrue); or
 - (ii) promptly remitted gains (remitted in the year that the gains accrue).
- (2) under s.16ZB postponed remitted gains do not qualify for:
 - (a) any loss relief (either UK losses or foreign losses) or
 - (b) the CGT annual exemption.

The CG manual provides an example:

CG25330B - Remittance basis: no effective carry back of foreign allowable losses: TCGA92/S16ZB

If an election has been made for foreign losses to remain allowable losses (see CG25330A) then a loss may not be set against chargeable gains taxable on the remittance basis in a tax year - known as the applicable tax year- after the foreign chargeable gains which are being remitted arose, if the foreign chargeable gain arose in a year before the loss. This means that a loss cannot be “carried back” and set against a foreign chargeable gain of an earlier year, even if that gain is not taxed until the year of loss because of the remittance basis.

Example: (Henri)

H elects to use the remittance basis in 2008-09 and has an unremitted foreign chargeable gain of £1m in that year. He also elects for his foreign losses to remain allowable losses.

In 2010-11 he remits the gain to the UK and has a foreign loss of £500,000. He does not elect to use the remittance basis in 2010-11.

The HMRC analysis is as follows:

The relevant tax year is 2008-09 and the applicable tax year is 2010-11. Foreign chargeable gains accrued in or after the relevant tax year but before the applicable tax year and a chargeable gain is treated as accruing in the applicable tax year when those gains are remitted. The conditions of TCGA92/S16ZB(1) are therefore satisfied. The remitted gains are known as relevant gains [postponed remitted gains] and are excluded from the total amount of chargeable gains from which losses are deducted under TCGA92/S2. The relevant gains are nonetheless included in the amount on which Capital Gains Tax is charged for the applicable tax year (TCGA92/S16ZB(2)-(3)). So the £500,000 loss may not be set against the chargeable gain of £1m treated as accruing to H in 2010-2011.

Note that this prohibition of carry-back applies to all losses, not just to foreign losses.

Note also that this prohibition applies whether or not the remittance basis applies in the applicable year, ie the year in which the foreign chargeable gain is remitted.

Section 16ZC TCGA relaxes the rule in (2)(a) by allowing some losses against postponed remitted gains:

16ZC Individual who has made election under section 16ZA and to whom remittance basis applies

- (1) This section applies to an individual for a tax year if—
- (a) the individual has made an election under section 16ZA for the tax year or any earlier tax year,
 - (b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the tax year, and
 - (c) the individual is not domiciled in the UK in the tax year.

In short, the section applies to a remittance basis taxpayer who makes a loss election.

Section 16ZC continues:

- (2) The following steps apply for the purpose of calculating the amount on which the individual is to be charged to capital gains tax for the tax year.

Step 1 Deduct any relevant allowable losses from the chargeable gains referred to in subsection (3) in the order in which they appear there (starting with para (a) of that subsection).

“Relevant allowable losses” simply means allowable losses. (The drafter is overfond of the word “relevant”). Section 16ZC(7) TCGA provides:

In this section “relevant allowable losses” means the allowable losses that section 2(2) provides may be deducted from chargeable gains accruing to the individual in the tax year, ...

51.11.2 *The loss deduction order*

This takes us to s.16ZC(3) TCGA which sets out the deduction order:

The chargeable gains are—

- (a) foreign chargeable gains accruing to the individual in the tax year, to the extent that they are remitted¹⁷ to the UK in that year,
- (b) foreign chargeable gains accruing to the individual in that year, to the extent that they are not so remitted in that year, and
- (c) chargeable gains accruing to the individual in that year (other

¹⁷ Section 16ZC(6) TCGA provides (somewhat unnecessarily): “For the purposes of subsection (3) foreign chargeable gains are remitted to the UK if they are regarded as so remitted for the purposes of section 12.”

than foreign chargeable gains).¹⁸

So in my terminology, losses are set against gains in this order:

- (a) promptly remitted gains;
- (b) unremitted foreign gains;
- (c) UK gains.

Losses set against (2) are not wasted but they are not used until the unremitted gains are remitted.

51.11.3 *Use of deductions*

Our journey takes us to Step 2:

Step 2 Treat the amount referred to in section 2(2) or (4)(a) or 16ZB(3)(a) as being equal to—

- (a) the amount it would be if there were no relevant allowable losses, minus
- (b) the total amount deducted under Step 1 from chargeable gains within subsection (3)(a) or (c).

For completeness, s.16ZC(4) TCGA provides:

Chargeable gains treated as accruing under section 87 or 89(2) (read, where appropriate, with section 10A) are not within any paragraph of subsection (3).

This maintains the disallowance of personal losses against s.87 gains.¹⁹

Section 16ZD TCGA provides:

- (1) This section applies if section 16ZC applies to an individual for a tax year.
- (2) Any allowable loss deducted under step 1 of section 16ZC(2) is to be regarded (for the purposes of section 2(2)(b)) as allowed as a deduction from chargeable gains accruing to the individual in the tax year.

¹⁸ For completeness, s.16ZC(5) TCGA provides: “Chargeable gains treated as accruing under s.12 are not within subsection (3)(c)” – though I do not see why it was necessary to say that – it seems clear in any event.

¹⁹ See 51.7 (Disallowance of personal losses against s.87 gains).

(3) If a deduction is made under step 1 of section 16ZC(2) from a foreign chargeable gain within section 16ZC(3)(b), the amount of the foreign chargeable gain is reduced by the amount deducted.

51.11.4 *Insufficient losses*

Step 16ZC continues:

If allowable losses are deductible from the chargeable gains referred to in subsection (3)(b) but are not enough to exhaust them all—

- (a) those chargeable gains are to be ordered according to the day on which they accrued,
- (b) the losses are to be deducted from those gains in reverse chronological order (starting with the last chargeable gain to accrue), and
- (c) if allowable losses are deductible from chargeable gains that accrued on a particular day but are not enough to exhaust all of the chargeable gains that accrued on that day, the amount deducted from each of those chargeable gains is the appropriate proportion of the losses.

In para (c) “the appropriate proportion”, in relation to a chargeable gain, is the amount of that gain divided by the total amount of the chargeable gains that accrued on the day in question.

51.11.5 *HMRC example*

The CG manual provides:

CG25330C - Remittance basis: matching rules for relieving losses: TCGA92/S16ZC

If an election has been made for foreign losses to remain allowable losses (see CG2530A) then, in a tax year in which the remittance basis applies and the individual is not domiciled in the United Kingdom, special rules apply to determine how gains are to be relieved by losses. In summary, the allowable losses deductible under TCGA92/S2 are matched:

- Firstly, against foreign chargeable gains accruing in the tax year to the extent that they are remitted to the United Kingdom in that year
- Secondly, against foreign chargeable gains accruing in that year to the extent that they are not so remitted and
- Thirdly, against chargeable gains accruing in that year other than foreign chargeable gains (this does not include chargeable gains treated as accruing under TCGA92/S12 ie on the remittance basis).

And then the amount on which Capital Gains Tax is charged in the year is the

total amount of chargeable gains accruing in the year less the losses matched against gains in the first and third categories only.

This means in effect that allowable losses which are matched with unremitted foreign chargeable gains are not available for relief against gains on UK assets, which therefore remain chargeable. The unremitted foreign chargeable gains are reduced by the losses matched with them, and so will not give rise to any tax charge if or when they are remitted (TCGA92/S16ZD(3)).

Chargeable gains which are treated as accruing under TCGA92(S87) (attribution of gains to beneficiaries) or TCGA92/S89(2) (migrant settlements etc) are not within any of these three categories of gain. This means that relief for losses is not available against these sorts of gain.

A taxpayer will need to keep records to allow the correct operation of these provisions to be verified.

CG25330D - Remittance basis: matching rules for relieving losses: example: Section S16ZC TCGA 1992

Example (Johann)

J is a remittance basis user in all years. He has made an election under Section 16ZA TCGA 1992 so his foreign losses are allowable, subject to the rules in Section 16ZB TCGA 1992 and Section 16ZC TCGA 1992. His history of gains and losses is as follows:

	UK gains	UK losses	Foreign gains	Cash brought to UK	Foreign losses
2008-09	100,000	25,000	30,000	0	
2009-10	17,000	5,000	50,000	60,000 *	30,000
2010-11	0	0	12,000	20,000 **	25,000

* accepted after enquiry to establish facts and application of mixed fund rules (if necessary - see CG25385+) as being £30,000 from 2008-09 plus £30,000 from 2009-10

** accepted after enquiry to establish facts and application of mixed fund rules (if necessary - see CG25385+) as being all from 2009-10

2008-09

Relevant allowable losses are £25,000 (Section 16ZC (7) TCGA 1992)

Chargeable gains classified and ordered according to Section 16ZC (3) TCGA 1992:

- a) 2008-09 foreign chargeable gains remitted Nil
- b) 2008-09 foreign chargeable gains not remitted 30,000
- c) 2008-09 other chargeable gains 100,000

Step 1: deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

- a) 2008-09 foreign chargeable gains remitted Nil
- b) 2008-09 foreign chargeable gains not remitted 5,000
- c) 2008-09 other chargeable gains 100,000

Step 2: the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses (i.e. £100,000 UK gains) LESS the total amount deducted at step 1 from gains in classes (a) and (c) (i.e. £Nil).

So in 2008-09 Capital Gains Tax is charged on £100,000. The effect of the rules

is to use allowable losses to frank unremitted foreign chargeable gains even though that leaves UK gains in charge.

The foreign chargeable gain not remitted is reduced by the allowable UK loss deducted from it at step 1 so going forward it becomes £5,000 (Section 16ZD (3) TCGA 1992). This is important to remember if it is remitted in a later year (see below).

2009-10

Relevant allowable losses are £35,000 (Section 16ZC(7) TCGA 1992)

Chargeable gains classified and ordered according to Section 16ZC(3) TCGA 1992:

a) 2009-10 foreign chargeable gains remitted	30,000
b) 2009-10 foreign chargeable gains not remitted	20,000
c) 2009-10 other chargeable gains	17,000

Step 1: deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

a) 2009-10 foreign chargeable gains remitted	Nil
b) 2009-10 foreign chargeable gains not remitted	15,000
c) 2009-10 other chargeable gains	17,000

Step 2: the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses (i.e. £35,000 remitted gains (£5,000 from 2008-09 after set-off of 2008-09 losses plus £30,000 from 2009-10) plus £17,000 UK gains = £52,000) LESS the total amount deducted at step 1 from gains in classes (a) and (c) (i.e. £30,000).

So in 2009-10 Capital Gains Tax is charged on £22,000 (52,000 - 30,000). The effect of the rules is to use allowable losses to frank unremitted foreign chargeable gains even though that leaves UK gains in charge.

The foreign chargeable gain not remitted (category (b)) is reduced by the loss deducted from it at step 1, so it becomes £15,000 (Section 16ZD(3) TCGA 1992). This will be significant if it is remitted in a later year (see below).

2010-11

Relevant allowable losses are £25,000 (Section 16ZC(7) TCGA 1992)

Chargeable gains classified and ordered according to Section 16ZC(3) TCGA 1992:

a) 2010-11 foreign chargeable gains remitted	Nil
b) 2010-11 foreign chargeable gains not remitted	12,000
c) 2010-11 other chargeable gains	Nil

Step 1: deduct relevant allowable losses from the gains so ordered. The net gains are therefore:

a) 2010-11 foreign chargeable gains remitted	Nil
b) 2010-11 foreign chargeable gains not remitted	Nil
c) 2010-11 other chargeable gains	Nil

Step 2: the total amount of chargeable gains on which tax is charged by Section 2(2) TCGA 1992 is equal to the amount it would be if there were no relevant allowable losses (i.e. £15,000, the adjusted residue of the 2009-10 gain; see above) LESS the total amount deducted at step 1 from gains in classes (a) and (c) (i.e. £Nil).

So in 2010-2011 Capital Gains Tax is charged on £15,000. Note that none of the foreign loss arising in 2010-2011 can be relieved against the chargeable gain which accrued in the earlier year, even though that gain was not remitted until the year of loss. This is consistent with the fact that UK losses cannot be carried back to set against gains of earlier years.

The foreign chargeable gain not remitted (category (b)) is reduced by the loss deducted from it at step 1, so it becomes £Nil (Section 16ZD (3) TCGA 1992). It has been franked by the loss of the period and will not give rise to a taxable remittance if cash etc representing it is brought to the UK in a later year.

The unused balance of allowable losses (£25,000-£12,000 = £13,000) is carried forward and may be used to relieve chargeable gains of later years. (Section 16ZD (2) TCGA 1992).

51.11.6 *Record-keeping*

The record-keeping from 2008 is extremely onerous. Before 2008 a taxpayer had only to keep a total of brought forward losses and remitted gains. But now (if a taxpayer makes a loss election) they need to keep track of which year losses accrue, and which day and year postponed remitted gains accrue, in order to apply these loss rules.

51.12 When is a loss election worthwhile?

Careful timing of realisation of losses and of remittances is necessary in order to maximise loss relief if a loss election is made. A few general points can be made.

A person who will realise UK losses and not foreign losses should not make a loss election.

A person who will realise UK losses and foreign losses, but can use inter-spouse transfers to avoid disallowable foreign losses should not make an election.

A person who will realise foreign losses and not UK losses should make an election.

In other cases it is a matter of guesswork.

51.13 Inter-spouse transfer

Suppose a foreign domiciled individual (“H”) owns a foreign situate asset which will give rise to a loss. It will often happen that:

- (1) The loss on the disposal by H will not be allowable.
- (2) If

- (a) H gives the asset to H's spouse ("W") and
 - (b) W disposes of the asset
- then W will realise an allowable loss (for instance W may not have made a remittance basis claim).

In principle, W can realise an allowable loss. However s.16A TCGA provides:

- (1) For the purposes of this Act, "allowable loss" does not include a loss accruing to a person if—
 - (a) it accrues to the person directly or indirectly in consequence of, or otherwise in connection with, any arrangements, and
 - (b) the main purpose, or one of the main purposes, of the arrangements is to secure a tax advantage...
- (3) For the purposes of subsection (1) it does not matter—
 - (a) whether the loss accrues at a time when there are no chargeable gains from which it could otherwise have been deducted, or
 - (b) whether the tax advantage is secured for the person to whom the loss accrues or for any other person.²⁰

"Tax advantage" has the standard definition. Section 16A(2) TCGA provides:

- "tax advantage" means—
- (a) relief or increased relief from tax,
 - (b) repayment or increased repayment of tax,
 - (c) the avoidance or reduction of a charge to tax or an assessment to tax, or
 - (d) the avoidance of a possible assessment to tax,
- and for the purposes of this definition "tax" means capital gains tax, corporation tax or income tax.

Looking at the words of the section, one would think that the position was as follows. An allowable loss is a relief and so a "tax advantage." So if one of the main purposes of an inter-spouse transfer is to obtain the loss,

20 What is the point of s.16A(3)(b) TCGA? How can a tax advantage be secured for any person *other* than the person to whom the loss accrues? The answer is if the loss accrues to a non-resident company or trustee, for the tax advantage might be enjoyed by a settlor (under s.86) or a beneficiary (under s.87) or a participator (under s.13). But this is not relevant to inter-spouse transfers.

the loss is disallowed. Of course it depends on the precise facts whether that is actually a main purpose, but in many (I think, most) cases it would be so. HMRC rightly say in relation to identifying the main purpose:

16. Hence it will be relevant to draw a comparison in order to consider whether, in the absence of the tax considerations:

- the transaction giving rise to the advantage would have taken place at all;
- if so, whether the tax advantage would have been of the same amount; and
- whether the transaction would have been made under the same terms and conditions.

It will very often be the case that the inter-spouse transfer is made only for tax reasons and would not be made in the absence of tax. However, HMRC say:

17. ... Nor will the new legislation *ordinarily* prevent a genuine loss on a real disposal of an asset from being set off against a person's own gains, including the case where, before the real disposal that gives rise to the genuine loss, the person acquires the relevant asset from a spouse or civil partner at no gain/no loss under section 58 [TCGA].²¹

21 "Avoidance of tax through the creation and use of capital losses: HMRC Guidance." The guidance passed through various drafts to versions of March 2007 and the current guidance of July 2007, accessible www.hmrc.gov.uk/cgt/cgt-recent-developments.pdf and reprinted (with variations) in the CG Manual Appendix 9 [February 2010]. See too example 5:

"40. Mr H has shares in S plc which are standing at a loss. Mrs H has shares in a separate company, T plc, standing at a gain. Mr H transfers his shares to Mrs H under the no-gain, no-loss rule in section 58 TCGA, and she then sells both holdings of shares. The loss on the shares in S plc covers the gain arising from the shares in T plc, and so no CGT is payable by Mrs H.

41. Taking the spouses together, Mr and Mrs H each have shares which they want to sell. What happens in fact is that they do sell their shares, and the economic consequence is that they realise a gain on one set of shares and a loss on the other set. To decide whether or not the TAAR applies, it is necessary to consider whether there have been arrangements, and whether a main purpose of those arrangements was the securing of a tax advantage. In this case, it seems clear that there have been arrangements, namely the transfer of the shares from Mr H to Mrs H. It is then necessary to look at what the main purpose of Mr and Mrs H in entering into these arrangements was. This can be determined only by looking at all the circumstances surrounding the arrangements. In the present example, Mr and Mrs H wanted to

(Emphasis added)

According to this, s.16A does not apply to genuine losses, and the loss in the case under discussion is genuine.

The first question this raises is: what is meant by genuine loss and why is the spouse's loss genuine? At first the unlawyerlike term "genuine" seems almost impossible to pin down, but I suggest that the concept intended here is the tax avoidance/mitigation distinction.²² A loss is genuine (in the intended sense) if it is in accordance with the intention of Parliament, a special tax regime, and has economic consequences. The inter-spouse transfer in principle meets those criteria. This view is confirmed by para 13 of the Guidance Note:

The straightforward use of a statutory relief does not of itself bring arrangements within the TAAR.

The straightforward use of a statutory relief could obviously be and frequently is done with the purpose of obtaining a tax advantage, but it is not tax avoidance.²³

The guidance at para 17 uses the word "ordinarily". When will it not apply? An example is if there is an arrangement under which the donee

dispose of their shareholdings, and they did this in a straightforward way. They made use of the provisions of section 58 TCGA, which provides the opportunity for spouses (or civil partners) to bring together gains and losses, but again the straightforward use of a statutory relief in this way does not (of itself) bring arrangements within the TAAR. Moreover, the tax outcome of the transactions reflects the economic reality of Mr and Mrs H's situation. In all the circumstances, this suggests that there was no main purpose of achieving a tax advantage, and where there is no such main purpose the rule does not apply."

But the factual inference in the last sentence is implausible, for the reasons explained above.

²² See 31.17.3 ("Genuine").

²³ Para 5 of the Guidance Note issued on 27 March 2007 stated this expressly:

"5. The effect of the legislation will be to restrict the use of capital losses resulting from the arrangements where *tax avoidance* is the main purpose or one of the main purposes of the arrangements." But presumably HMRC noticed the inconsistency and the guidance note of 19 July 2007 was unhelpfully amended to read: "The legislation is intended to have effect where a person enters deliberately and knowingly into arrangements to gain a tax advantage."

spouse immediately returns the proceeds of the disposal to the donor spouse. In that case the inter-spouse gift has no “economic consequences”.

The next difficulty is to reconcile that guidance with the words of the statute. One might simply give up at this point:

We think that the words “**tax avoidance**” should be substituted for “**tax advantage**”... the guidance contradicts the legislation. Some transactions (such as transfers between spouses) are stated in the guidance not to be caught by the TAAR,²⁴ when it is strongly arguable that they are caught.²⁵

If that is right, then the decision whether or not to apply the legislation in relation to inter-spouse transfers (and indeed many other cases) is made by HMRC with no redress by the taxpayer (outside judicial review discussed below). However, it is suggested, having regard to *Pepper v Hart*, that the reference to “tax advantage” should be read to mean tax avoidance in the strict sense. The fact that the definition here is based on words which in other contexts have been understood differently²⁶ does not determine the issue.

The reader may wonder whether this discussion matters, given that HMRC have stated that they will not normally challenge the transfer of losses by inter-spouse transfers. On a constitutional level it matters to those who believe that tax should be based on law and not concession and discretion. On a practical level it matters if HMRC later decide to change their practice (which as the IR20 debacle shows is not a theoretical possibility) or if they choose to apply it inconsistently.

The IFS commentary deserves to be set out in full:

24 A note on terminology. The label which HMRC give to anti-avoidance provisions of the s.16A type is *targeted* anti-avoidance rule (“**TAAR**”). This terminology was coined by HMRC and first used in a press release of 5 December 2005. The term has become so degraded that the Institute for Fiscal Studies can say without obvious irony that “TAARs need to be well targeted ... costs can outweigh the expected amount of lost revenues when a poorly targeted TAAR is compared with a well-targeted TAAR”. The same report refers later to a “wide-ranging TAAR”. Countering Tax Avoidance in the UK, TLRC discussion paper no.7, March 2009, para 8.18 accessible www.ifs.org.uk/comms/dp7.pdf.

25 Response of CIOT to consultation (8 February 2007).

26 See 31.14 (Consequence and Purpose).

7.4 However, the width of this relatively simple provision [s.16A TCGA] meant that HMRC needed to publish 17 pages of detailed Explanatory Notes to explain how the legislation would be applied. So, considering the example of the person who sells shares standing at a loss in order to set the loss against a gain on another disposal, the Explanatory Notes explain that this transaction will not be prevented, albeit that the legislation could be used to prevent this.

7.5 There are several problems with this approach. First, the Explanatory Notes are not themselves subject to the scrutiny and care in drafting given to legislation. By their nature, Explanatory Notes are not drafted in the precise way required for legislation.

7.6 Second, HMRC does not have the power to legislate: taxation can only be imposed by the legislature²⁷ and while HMRC may decide upon its own interpretation of the legislation, that interpretation is not binding on taxpayers save to the extent confirmed by the courts. ‘HMRC’s role is to administer the UK’s tax and customs systems.’

7.7 Third, the ability of taxpayers to rely on the guidance depends upon the type of transaction involved: if it is a single transaction entered into in reliance on specific guidance, the taxpayer can rely on the guidance (although enforcement may be cumbersome, for the reasons explained below). In contrast, if the taxpayer is seeking to rely on guidance in relation to a continuing state of affairs, the taxpayer is exposed to changes in that guidance. ...

51.13.1 *Is the HMRC guidance binding?*

The reader may regard these constitutional fundamentals as irrelevant to practice, but the IFS then turn to discuss the important issue of whether the guidance is enforceable:

7.8 To enforce guidance, the taxpayer must seek judicial review. Judicial review is a process that is costly and time consuming and which is not easily achieved. In order for a taxpayer to seek judicial review, an application for leave to apply for judicial review must be made within three months of the decision that is being challenged. The application is made to the High Court by a form setting out the grounds of the application and an affidavit setting out the factual background. Clearly,

27 [footnote original] Article 4 Bill of Rights 1689: [“That levying money for or to the use of the Crown by pretence of prerogative, without grant of Parliament, for longer time, or in other manner than the same is or shall be granted, is illegal.”]

three months is an extremely short deadline even for the well-advised taxpayer. If the judge considers that the papers show an arguable case, leave to apply for judicial review is granted, but after this initial tight timescale matters may then move very slowly.

7.9 Consequently, a major drawback of judicial review at present is that it is effectively unavailable to most potential applicants: they do not know about it, cannot understand it, cannot afford it, or find the prospect of going to the High Court too daunting. This situation would be improved if the new Tribunals, which will handle tax appeals from 2009, have jurisdiction to review the exercise of discretionary acts by HMRC and review the application of HMRC guidance.²⁸

7.10 In addition to the procedural and costs issues, the ability of taxpayers to use judicial review in the context of non-legislative rule-making is not always clear. It is beyond the scope of this paper to set out in detail the present state of the law with regard to the use of judicial review in relation to the exercise of powers by HMRC. However, certain points are addressed below, as the limits of challenge may be increasingly important as new ways of tackling avoidance are explored by the government.

7.11 In the context of this paper, the key issues limiting the ability to challenge by way of judicial review concern the application of judicial review to situations where HMRC has issued guidance to taxpayers generally regarding the application of legislation.

7.12 First, there are situations where HMRC guidance appears to differ from the conclusion that would be reached just by reading the legislation. An example of this arises in connection with the wide-ranging capital gains tax TAAR found in Section 16A TCGA 1992, where the legislation could be read to apply much more widely than HMRC maintains is the case in its Explanatory Notes. Where the HMRC treatment is recognised by HMRC as being a concession from the strict reading of the law, then there is the system of extra-statutory concessions. Even these raise issues of enforcement. The judiciary has frequently indicated that it is uncomfortable with the concessions system: for example, “One should be taxed by law and not be untaxed by concession”.²⁹

7.13 That said, extra-statutory concessions have been upheld by the courts (although they are not enforceable in cases of avoidance). At the same time, the courts have decided that the power to grant them should

28 The hope that the new Tribunals will improve the position has not been realised.

29 [Footnote original] Walton J in *Vestey v IRC (No. 2)* [1979] 3 WLR 915.

only be exercised as part of HMRC's duty of care and management. This was made clear in the case of *R (oao Wilkinson) v IRC* where the Court of Appeal held that the Inland Revenue had no power to grant a concession to overrule an unequivocal piece of legislation unless this could be said to "facilitate the overall task of collecting taxes". As a result of this case, the government announced that the power to make concessions from the strict application of tax law is not as wide as had previously been thought and consequently the concessions are being reviewed to determine those that are not within HMRC's powers of "collection and management". Section 160 of the Finance Act 2008 gives the Treasury power to make any existing concession statutory by order. In so doing, it defines an existing concession to include a statement of any sort – whether it is described as an extra-statutory concession, a statement of practice, an interpretation, a decision, a press release or in any other way – that provides a concession that a taxpayer would not, or may not, be entitled to under the law. This power of the Treasury only applies to existing concessions. Going forward, HMRC's administrative powers have been limited by the Wilkinson case.

7.14 More difficulty is posed by statements made by HMRC that explain the legislation and are not considered by HMRC to deviate from the legislation. What if a taxpayer considers that HMRC's guidance is wrong in law? The taxpayer could rely on making their argument through the courts, but that raises enormous cost issues and risk issues for the taxpayer. Alternatively, the taxpayer could seek judicial review on the basis that the HMRC treatment as shown by the guidance was "ultra vires". However, in order to seek judicial review, the taxpayer also needs to show that they have sufficient interest in the matter to qualify them to make the application. These are high hurdles (albeit not impossible, as cases such as *R v Department of Social Security ex p. Overdrive Credit Card*³⁰ show) and it must be asked whether many taxpayers would feel confident of passing these hurdles or be prepared to spend the money in order to do so. If the answer to that is that very few would, then effectively HMRC is legislating by default.

7.15 The other potential source of problems in HMRC guidance is the guidance changing. Usually, the reason given for a change in guidance is that HMRC has been advised that its guidance is wrong in law. Again, judicial review is potentially available, but the case of *R v C&E Commissioners ex parte F & I Services* held that while a taxpayer could rely on the legitimate expectation generated by guidance, that

expectation is limited to circumstances where reliance has been placed on the changed statement. In that case, a VAT clearance for a voucher scheme was withdrawn following a change in view of the Customs and Excise as to the operation of the law. The taxpayer had incurred expense on the introduction of the scheme. It was stated by Lord Justice Sedley that “the law recognises no legitimate expectation that a public authority will act unlawfully. It is only where the expectation is of a particular exercise of managerial discretion that the court will begin to examine its legitimacy.”³¹

7.16 Consequently, this paper maintains that the more tax rules are dealt with by way of non-legislative methods, the more exposed taxpayers become to these limited forms of redress. Government should only permit the increased use of non-legislative rule-making if the problems highlighted here are adequately tackled. ...³²

Scope for judicial review is in my view even weaker than the IFS here suggest, for Guidance Note para 26 is intended to give HMRC freedom to disregard their own guidance note (or at least to give freedom to decide when it should or should not apply, which comes to the same thing):

Examples of how the legislation will apply in particular circumstances are set out below. These examples are intended to show how different factors will be taken into consideration in deciding whether or not the TAAR applies in a given set of circumstances. They are not designed as templates for deciding whether a loss is or is not caught by the TAAR in any particular case.

Thus unless my view on the construction of s.16A TCGA is adopted, the guidance is for all practical purposes unjusticiable. The position is not so much that HMRC are above the law, but that there is no law, only discretion. The uncertainty caused by provisions such as s.16A (which apply to corporation tax as well as CGT) is a factor which encouraged companies such as WPP, Shire, Regus, Henderson, Charter, Beazley, Brit Insurance and UBM to leave the UK for Ireland or Switzerland.³³

32 Countering Tax Avoidance in the UK, TLRC discussion paper no.7, March 2009, accessible www.ifs.org.uk/comms/dp7.pdf.

33 A majority of Main Survey respondents expressed exasperation with the complexity and unpredictability of current anti-avoidance rules, all but one asserting that this was a phenomenon hindering the competitiveness of the UK economy. Freedman et al,

Nevertheless, HMRC regard the provision as “successful”³⁴ (which if the only measure of success is preventing avoidance it no doubt is). So the current position will continue until HMRC change their view that preventing tax avoidance is a priority that trumps other policy considerations such as certainty and the rule of law.

CHAPTER FIFTY TWO

FOREIGN CURRENCY ISSUES

52.1 Foreign currency issues – introduction

It is generally accepted that UK tax is assessed in sterling. For instance, the RDR Manual provides:

31190 Exchange Rates

All entries on the SA Return should be in pounds sterling.

Foreign currency must be translated into sterling. For this purpose it is obviously necessary to decide the date(s) on which the exchange rate is determined (“**the currency conversion date**”).

HMRC have put their views in a technical note dated 12 October 2009 (“**the HMRC currency technical note**”).

Once one has identified the currency conversion date, one needs to ascertain the exchange rate on that date. Exchange rates at 31 March and 31 December can be found on the HMRC website.¹ Daily rates can be found on commercial websites. These may use slightly different criteria, and disagree slightly among themselves, but I expect in practice any published rate would be acceptable.²

1 www.hmrc.gov.uk/exrate. This will not assist in the matters discussed in this chapter except for transactions which happen to occur on 31 March or 31 December.

2 The BI Manual provides:

“39507. Exchange rate for tax purposes [January 2010]

... Traders may use London closing rates (BIM39505) when translating foreign currency amounts into sterling in their accounts. Equally they may use other exchange rates, such as an exchange rate quoted by their bank, or the monthly average rates published by HMRC for VAT purposes. You only need to query the rate of exchange used if, exceptionally, it diverges markedly from rates obtained from reputable sources of this nature.”

Similarly, the SAI Manual provides:

52.1.1 *Cross references*

For life policies in foreign currency, see 32.3.5 (Computation of gains). For deeply discounted securities in foreign currency, see 36.3 (Securities denominated in foreign currency). For the (somewhat academic) IHT relief see 58.18 (Non-residents foreign currency bank accounts).

The position of UK resident companies is not considered.

52.2 CGT: Currency conversion date

There are two possible ways to compute the gain where an asset is purchased and sold in a foreign currency.

Method 1:

- (a) Compute the gain using the foreign currency prices. For instance, suppose an asset is purchased for \$100 and sold for \$200; the gain is the \$ sale price less the \$ acquisition price = \$100;
- (b) then convert that foreign currency gain to sterling at the date of disposal.

Method 2: Compute:

- (a) The sale price converted to sterling at the rate on the date of disposal; less
- (b) The acquisition cost converted to sterling at the rate on the date of

“4310. Special calculations: Foreign currency securities [July 2007]

...Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently.”

Similarly, International Manual provides:

“162160. Rate of exchange to use [January 2011]

... Any reasonable established basis of conversion which has previously been applied in any particular case may continue to be used in that case if the taxpayer agrees to its consistent application. If there is a dispute which cannot be resolved within the terms of the established practice, the general basis described above should be adopted.”

Where the official rate of exchange is different, it is considered that one should use commercial (black market) rates; this view is adopted in the USA: *Cinelli v Commissioner of Internal Revenue* (1974) 502 F2d 695 United States Court of Appeals, Sixth Circuit.

acquisition.

For CGT it is well settled that the second solution is correct. In *Bentley v Pike* 53 TC 590 the taxpayer inherited German property when it was worth DM132k, and later sold it for DM152k. She argued that the gain was the difference between the two Deutschmark values, ie DM30k, and the currency conversion date was the date of disposal. The Court held that the gain was the sterling equivalent of the DM proceeds (currency conversion date at the date of disposal) less the value of the property at the time of acquisition. This decision was approved in *Capcount Trading v Evans* 65 TC 545 where the issue was argued more fully before the Court of Appeal. In short, the taxpayer acquired shares for \$85m and sold them for \$50m. The taxpayer argued that they made a loss of \$35m. That was rejected. The gain was calculated as the value of the proceeds (converted into sterling at the date of disposal) less the acquisition cost (converted into sterling at the date(s) of acquisition).

The CG Manual provides:

25391 - Remittance basis: gains to be computed in Sterling [April 2010]

Sterling is the currency in which capital gains computations are carried out (see *Bentley v Pike*, (53 TC 590) and *Capcount Trading v Evans* (65 TC 545)). You should therefore carry out a computation of the gain arising on the disposal of the foreign assets in sterling. Where transactions take place in foreign currency you should convert each separate entry for the computation into sterling using the spot rate applying at the date that part of the transaction occurred.

This approach is used whether the gain is taxed on an arising or the remittance basis. The RDR Manual provides:

31190 Exchange Rates [June 2010]

Foreign Chargeable Gains

Foreign chargeable gains are calculated using sterling translations at the date of acquisition and the date of disposal. So the consideration received will be translated into sterling using the exchange rate at the time of disposal and allowable deductions will be translated using the exchange rate(s) at the time the expenditure was incurred (for example, when the asset was acquired). Thus the gain will be denoted in pounds sterling and will be the same whether taxed on the arising or the remittance basis.

If the gain is held as foreign currency, the taxable sterling amount of the gain will not change, but separate gains or losses may accrue if the foreign currency gains or losses value with respect to sterling before the gain is remitted.

52.3 Trading income and property income

The position for trading income is governed by SP 2/02 (not discussed here).

Property income is computed on the accountancy principles, just like trading income, so the same practice ought to apply.

52.4 Income taxed on arising basis: currency conversion date

The RDR Manual 31190 provides:

31190 Exchange Rates [June 2010]

Foreign Income

Foreign income taxed on the arising basis is converted to pounds sterling at the exchange rate applicable on the day that it arose overseas.

This is not controversial. HMRC accept the use of the average rate for a tax year where income arises regularly through the year.³

52.5 Sterling income converted to foreign currency

The HMRC currency technical note provides:

6. Income that is regarded as ‘foreign income’ may be received offshore in sterling. It may later be converted into a foreign currency, for example if paid into a non-sterling account. In such cases the amount of a remittance basis user’s foreign taxable income will be the amount actually due and originally received in sterling. It is of no relevance whether the eventual ‘taxable remittance’ that is, or that is derived from, that income is made in a foreign currency or is converted back into sterling before being remitted.

This is not controversial.

³ Private correspondence.

52.6 Income taxed on remittance basis: currency conversion date

Where income is taxed on the remittance basis, there are two possible views:

- (1) The currency conversion date is the date of remittance. I refer to this as “**the HMRC view**”.
- (2) The currency conversion date is the date that the income arises. I refer to this as “**the practitioners view**” since it is adopted by the ICAEW and the great majority of practitioners.

52.6.1 *HMRC view*

The RDR Manual 31190 provides:

31190 Exchange Rates [June 2010]

Foreign Income

... Foreign income taxed on the remittance basis ... is subject to UK tax only when it is remitted to the UK. This remitted income should be translated into sterling at the exchange rate prevailing on the date of remittance.

The Manual gives a straightforward example.⁴

Similarly, the EI Manual provides:

40033: General earnings taxable when remitted to the UK [January 2009]

For earnings that are taxable when remitted to the UK the conversion should be made at the date they were remitted.

52.6.2 *Basis for HMRC view*

The HMRC currency technical note sets out HMRC’s arguments in

⁴ “*Example (remittance) - Christophe*

C is a remittance basis user and has €8,000 income paid into his French bank account in June 2011 when the exchange rate is €0.705 to the pound, the equivalent of £5,642. He remits all €8,000 of this foreign income on 1 May 2013 when the exchange rate was €0.681.

He uses this 1 May exchange rate to convert this amount, giving a remitted amount of foreign income of £5,453; this is the amount he is taxed on.”

support of the view that the currency conversion date is the date of remittance and not the date of receipt.

5. [1] Remittance basis users may receive income offshore in a foreign currency.

[2] Such foreign income and earnings which are chargeable to tax on the remittance basis only become chargeable to UK tax when they are remitted to the UK. The remittance to the UK is the event that triggers the UK tax charge.

[3] It is only at this point that it is necessary to ascertain the taxable amount (in sterling) remitted to the UK that is taxable as foreign income.

[4] It follows that it is the date on which that amount is treated as remitted to the UK that the translation to sterling should occur.

Para 5[2] is not correct in relation to RFI. RFI is chargeable whether or not remitted, though the amount of the charge is limited to what is remitted.⁵ The same applies for RFE. It is arguable that chargeable gains are only chargeable on remittance but HMRC do not say that gains are converted at the date of remittance

Para 5[3] is correct but [4] does not follow from it. For CGT it is likewise only necessary to ascertain the taxable amount when there is a remittance but no-one suggests that gains are converted at the date of remittance.

The HMRC technical note contains a lengthy discussion of case law, but there are no cases which address the issue, and analogies from CGT and IT cases in other contexts are not decisive. HMRC say:

15. There is little case law that addresses this point directly. Some early case law from the 1920s and 1930s deals with the taxation of companies and whether foreign exchange gains or losses should be regarded as capital or investment items, or form part of the company's trade. It is possible to draw only tentative principles from this, especially as in many cases the issue of arising or remittance basis was not in point.

16. The 1933 case of *Magraw v Lewis* (18 TC 222) concerned a pension of 229 South African pounds, paid to a UK resident, which had been awarded by the Government of the Union of South Africa and was paid by them through the High Commissioner of the Union Government in London. At the time such foreign income was chargeable when received in the UK. The case concerned

5 See 9.11 (Nature of charge on remitted RFI).

certain deductions made by the SA Government from the pension, but during the case the issue of how much should be taxed in British pound sterling was raised. In *Magraw*, the *pension was actually paid to the appellant in the UK in sterling*, so the exchange issue was a little different.⁶ In the course of his judgement at the High Court Finlay J said, at page 225,

What happened was this. The Appellant was paid a particular sum in UK pounds and by reason of the state of the exchange, the amount which he was paid in UK pounds was larger-a greater number of pounds-than the pension awarded to him in South Africa reckoned in South African pounds.

He says that he ought not to pay Income Tax upon the amount which he has received in this country. I am bound to say that in regard to that the law appears to be as plain as in the other case...It is clear that the Income Tax authorities can have regard only to what is paid. What is paid is a pension of a particular amount in UK pounds, £268 I think it is -but the exact amount does not matter- that is paid to the Appellant.

That is what he has to pay tax upon, and he has to pay on that in the appropriate number of pounds in British currency. As I say, about that point there does not appear to be any legal difficulty-indeed, I do not think there is any legal difficulty about either point...I cannot myself see that any one, even a layman, could conceive that there was any grievance when he gets a particular income in UK pounds, in paying tax in UK pounds at the appropriate rate upon that income.

17. In *Thomson v Moyse* 39 TC, whilst addressing a point about whether a remittance required a transmission from abroad, at the House of Lords Lord Reid said at p329 (bold emphasis added)

Before considering these authorities, I think it well to see what the effect would be if this view were right. I take a case which no one has ever even suggested would not be within the scope of these provisions - the case of a bank acting as a collecting agent. If a customer hands to an English bank for collection a cheque drawn on a foreign bank, the English bank will send the cheque abroad for collection and, when notified that the money has been collected, it will give to the customer in this country the equivalent in sterling **at the current rate of exchange**.

18. References to other case law have been made to HMRC with regard to this issue.

Bentley v Pike [1981] STC 360 and *Capcount Trading v Evans* [1993] STC 11 - these concern Capital Gains Tax on chargeable gains accruing on the disposal of an asset, and therefore have no bearing on the issue of overseas income. They state that where there is an acquisition and disposal in a foreign currency the taxable capital gain is calculated by deducting the sterling value of the acquisition at the time of acquisition from the sterling value of the sale proceeds at the time of sale.

Pattison v Marine Midland 57 TC 219 related to tax on trading profits and the

6 [Author's note] Since the pension was paid in sterling, the exchange issue did not arise at all.

House of Lords upheld the decision of the Court of Appeal rejecting HMRC's contention that, with respect to a loan made by a company, the difference in sterling terms between the value of the dollars at the time of the loan and the time of the repayment represented a taxable trading profit of the company. In *Capcount* the Court of Appeal specifically distinguished *Marine Midland* on the basis that it was concerned with trading profits whereas *Capcount* was concerned with capital gains. Nolan LJ states:

“Against that background I do not find it surprising that, in the case of trading companies operating abroad the commercial accounting procedures which, it seems, commonly result in the profit being first computed in the particular overseas currency and then translated into sterling for tax purposes should be adopted and accepted by the Revenue...the income tax legislation, unlike the capital gains tax legislation, is not generally concerned with the measurement of a gain or loss on a single disposal but with a balance at the year end and computed on accounting principles.”

19. The calculation of gains arising on non-sterling acquisitions and/or disposals in sterling is different from the calculation of the amount of taxable income in sterling; it is clear from *Bentley v Pike* that the sterling translation must be made using the exchange rate in force at the dates of the transaction (i.e. date of acquisition for acquisition cost, and disposal for disposal proceeds) and the calculation completed in sterling. This is understandable for CG calculation purposes, as CG is fundamentally a transaction-based tax.

20. Apart from the £2,000 threshold (see below), this note only concerns remittances of foreign income. *Bentley* and *Capcount* concern capital gains, not income, and are therefore not relevant. *Marine Midland* supports the approach taken by HMRC in the guidance. *Marine Midland* concerned trading profits rather than income but an individual's income is more on a par with the profits of a business than with capital gains because neither an individual's income nor the profits of a business require individual disposals. Consequently, there is no conflict between the principles established in *Marine Midland* and HMRC's position on the treatment of an individual's income.

For completeness, the HMRC currency technical note also states:

7. In all cases HMRC will tax the individual's foreign income as income; the question is simply what sterling value to give that income, and more importantly, when is it necessary to calculate that value. HMRC will never tax an amount greater than the income received; for example, if \$50,000 US dollars are received then only \$50,000 US dollars will ever be subject to tax - that is, the sterling equivalent of that \$50,000 for income tax purposes at the time at which the UK tax liability occurs.

8. For a remittance basis user whose foreign income is received offshore in, say, dollars, there is no requirement to value the dollars twice (that is on date of receipt offshore and on the date an amount becomes taxable by virtue of being remitted to the UK). In other words, for income tax purposes, in order to tax the income received in dollars the conversion into sterling should only be made

once, namely on the occasion that the income comes into charge...

12. This approach is in the remittance basis user's favour. This is because, whether the exchange rate on the date the income arises or the date it is remitted is used to translate the foreign income into sterling, there has to be consistency between the two - it has to be one or the other. An individual has an element of control over the date of remittance and can choose to remit income when the exchange rate is in his favour or not to remit income when the exchange rate is not in his favour. An individual does not generally have similar control over the date on which foreign income arises.

These are not arguments, or at least not arguments to be taken seriously.

52.6.3 *Currency conversion date: the correct view*

Since there is no statutory guidance and no clear guidance from the case law, the right answer is that which best suits the scheme of the provisions. It is considered that the correct view (which I have called "the practitioners view") is that the currency conversion date is the time the income arises not the date of remittance.

The HMRC view gives rise to many anomalies. Firstly, contrast the arising basis where the currency conversion date is the date income arises. Secondly, contrast the CGT remittance basis where the currency conversion date is (in short) when the gain arises. The anomaly is more striking when one bears in mind that some offshore income gains are computed on CGT principles but subject to income tax on remittance. Thirdly, contrast the IT remittance basis where income is received in sterling and immediately converted into a foreign currency.⁷ Fourthly, contrast tax credits in a foreign currency where the currency conversion date is the date the income arises, or near that date.⁸

The next set of problems arises on the HMRC view if a remittance basis taxpayer receives foreign currency income and converts it into another asset, rather than paying it directly into a bank account. Suppose T receives income in euros and converts the euros into sterling and remits the sterling.

(1) Does T adopt the euro rate at the time of conversion into sterling?

⁷ The HMRC view assumes that one always knows what currency income is received, but in the case of deemed income that is not the case, and in the case of trading income it may depend on the arbitrary choice or accounting practice.

⁸ See 52.9 (Tax credit relief: currency conversion date).

Then tax depends on administrative acts such as how the receipt is dealt with.

- (2) Does T then adopt the euro rate at the time of remittance? That would be absurd and also gives rise to this further problem: Suppose T receives equal amounts of (a) foreign interest in euros and (b) foreign interest in sterling; T converts the euros to sterling and pays all the interest into one foreign sterling account, and later remits one half of the account to the UK. If one converts at the time of remittance T needs to decide whether T has remitted the sterling or the (formerly) euro interest. The answer is far from clear. On the practitioners view of course no problem arises.

Section 731 raises further problems on the HMRC view. If relevant income arises in a foreign currency, when does one convert that to sterling? If one converts at the time the income arises there is a further anomaly between s.731 and ordinary income. If one converts at the time there is a benefit, then a currency conversion may have to be done every time a benefit is conferred, which is unworkable.

52.6.4 *Problems arising when foreign currency depreciates against sterling*

HMRC say that their view (currency conversion date is the date of remittance) produces the right result where foreign currency depreciates against sterling, whereas the practitioners view causes an additional tax charge for taxpayers which they are concerned to avoid. The technical note provides:

13. ... Compare two taxpayers: Mr A is taxed on the arising basis. Mrs R on the remittance basis. Both receive RFE:

Exchange rates:

1 May Year 1	\$1 = £1.20.
1 May Year 2	\$1 = £1.10.
1 May Year 3	\$1 = £1.50

Mr A and Mrs R receive \$100,000 on 1 May in Year 1.

Mr A will have to pay tax on £120,000 in Year 1. Whether he brings the \$100,000 in to the UK on 1 May in Year 1 when it is worth £120,000, or on 1 May in Year 2 when it is worth £110,000, or on 1 May in Year 3, when it is worth £150,000, has no impact on Mr A's income tax liabilities.

If Mrs R, on the other hand, translates her foreign income into sterling on 1 May Year 1 she will, on [the practitioners view], be said to have taxable RFE of £120,000.

- In Year 2, she could remit every one of the \$100,000 dollars received, which

would translate only to £110,000 and yet still pay tax on £120,000 - which would appear that we are taxing an additional \$9090,⁹ or we are applying a tax rate of c.43.5%.

14. ...Theoretically, given large fluctuations in currency exchange rates, or with changes in higher tax rates, a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK ...

It is indeed unfair for a remittance basis taxpayer to be taxed on a sum larger than the sum which they remits to the UK. But this observation does not much support the HMRC view. First, this is in the HMRC view the position in relation to CGT. For CGT, HMRC appear to have no compunction in taxing a larger amount than remitted. In the HMRC view “a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK.”

The RDR Manual provides an example where the essential facts¹⁰ are as follows:

35030 Conditions A and B - remittances derived from foreign income or gains [June 2010]

Example 4 (Marianne)

M used £25,000 of her foreign chargeable gains to purchase a car.

M kept the car outside the UK.

M later brings the car to the UK. The market resale value of the car is then £14,000.

The HMRC analysis is as follows:

The amount remitted is still £25,000, that being the amount equal to the chargeable gains from which the property – the car – derived.

9 The correct figure appears to be \$10,000.

10 The example in full (including its irrelevant detail) is as follows:

In example 1 above, Marianne, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. The car is regarded as derived from foreign income and gains.

Instead of bringing it straight to the UK, Marianne kept the car at her Italian villa for use on her visits to Italy. A few years later she then decides to bring the car to the UK for her and her daughter to use. At this time the approximate market resale value of the car is £14,000.

If - which is open to doubt - the HMRC CGT analysis is right, there is (on the practitioners view) a consistent unfairness and on the HMRC view an anomalous distinction between CGT and IT.

More fundamentally, HMRC have overlooked the mixed fund rules. The remittance is a transfer from a mixed fund, and s.809Q(3) ITA defines the extent to which such a remittance is to be regarded as income or capital. The rule is that such a remittance is to be regarded as income first, not income *and* capital gain. Further, under the mixed fund rule, the amount of the remittance does not exceed the value of the sum remitted.

52.7 Sub-£2k taxpayer: currency conversion date

The RDR Manual provides:

31190 Exchange Rates [June 2010]

Remittance basis users below the “£2,000 threshold”

... For the purposes of determining whether the amount of an individual's foreign income which is “not remitted” in a tax year is below £2,000 they obviously cannot apply [what HMRC regard as] the usual principle for remittance basis users of using the exchange rate at time of remittance. Instead the balance of the unremitted foreign income is converted to pounds sterling *at the rate of exchange prevailing on the date last day of the tax year*.

ITA07/s809D(2) provides that the amount of an individual's “unremitted” foreign income and gains for a tax year is-

- (a) the total amount of what would (if this section applied) be the individual's foreign income and gains for that year, minus
- (b) the total amount of those income and gains that are remitted to the UK in that year.

So the above formula may be carried out in the foreign currency, looking at total income received and total income remitted, per currency, during the tax year. The balance which is left is the “unremitted foreign income”. This is translated into sterling using the exchange on the last day of the tax year (5 April) to ascertain whether the ‘unremitted foreign income’ is below the £2,000 limit.

Thus the currency conversion date is that on 5th April of each year. I refer to this as “**the 5 April conversion view**”. This practice only applied for the purposes of the £2k test and only for income, not for gains:

This practice applies for the purposes of deciding whether ITA07/s809D applies ONLY. All of the individual's foreign income amounts for a tax year must be taken into account.

Example: Michaela

M received foreign income on 10 April of \$5,000 when the exchange rate was (£1=\$2).

She remitted \$1,500 to the UK on 15 May when the exchange rate was £1=\$1.50 She will pay tax on the sterling amount of £1,000.

At the end of the tax year, M's 'unremitted foreign income' will be calculated using the exchange rate at the end of the tax year, which is £1=\$1.80.

This is calculated as follows:

Total foreign income and gains for that year	\$5,000
less	
Amount of that foreign income remitted during year	<u>(\$1,500)</u>
Unremitted foreign income	<u>\$3,500</u>

If the exchange rate at the end of the year was £1=\$1.50 then the \$3,500 unremitted foreign income would be £2,333, which is above the threshold. ...

The HMRC currency technical note provides the reason for the 5 April conversion view:

29. On further consideration of the wording of s809D, HMRC took the view that for foreign income, this calculation can only be made on the last day of the tax year, as that is the only date an individual's total and unremitted foreign income for a tax year can be ascertained. Consequently the foreign currency should be translated into sterling on that date also, for both the total foreign income and the remitted foreign income for the purposes of s.809D only.

30. Although UK income tax is charged on sterling amounts, it does not follow that the calculations to get to an income threshold such as this in s809D necessarily have to be made in sterling. Consequently the formula of deducting the remitted income from the total income can be carried out in the foreign currency on the last day of the tax year and then the balance which is left namely the "unremitted foreign income" can be translated into sterling on that date to ascertain whether it is below the £2,000 limit.

Thus the basis for the 5 April conversion view is the (erroneous) HMRC view that the currency conversion date for remitted income is the date of remittance. If the practitioners view is accepted, that the currency conversion date is the date that the income arises, s.809D does not raise any problem, as obviously the same approach should apply there also.

52.8 Nominated income and gains: currency conversion date

The RDR Manual provides:

31190 Exchange Rates [June 2010]

Nominated income and gains

Nominated income and gains are charged to UK tax on the arising basis... This means that any foreign income that is nominated for the purpose of the Remittance Basis Charge is converted to pounds sterling at the exchange rate that applied on the date the income arose.

Foreign chargeable gains are always calculated in pounds sterling at the rate of exchange that applied on the date the gain is realised.

The Manual gives a straightforward example.¹¹

52.9 Tax credit relief: currency conversion date

International Manual provides:

162160. Rate of exchange to use [January 2011]

For the purpose of computing tax credit relief, foreign tax, payable directly or by deduction, should be converted into sterling at the rate of exchange obtaining on the date when the foreign tax for which credit is to be allowed becomes payable.

In practice

1. Officers need not make enquiries in all cases in order to establish the precise date on which the foreign tax became payable under the foreign country's laws. Where the date is not known, the date of payment of the tax can normally be taken as the payable date. Where the foreign tax has been deducted at source from income, for example, from dividends, interest or royalties, the payable date will normally be the same date as the date on which the income is paid. If, however, the customer objects, or a substantial amount of tax is involved, the actual payable date should be determined. In many cases the date can be obtained from the demand note, provided that there has been no appeal against the foreign charge.

¹¹ “*Example (Francoise)*”

F is a non-domiciled individual who is subject to the Remittance Basis Charge. She decides to nominate €20,000 of foreign income. The exchange rate on the date the income arose was €0.744 to the pound. She uses this rate to calculate the equivalent nominated amount of foreign income in sterling, which is £14,880.”

If any difficulty arises in determining the payable date, in a case where such date is material, or if the customer objects to this basis, the case should be submitted to the Offshore Personal Tax Team (part of Charity, Assets & Residence) in the case of individuals and to CTIAA Business International, Outward Investment Team in all other cases....

The Manual does not distinguish between an arising basis taxpayer and a remittance basis taxpayer. So on the HMRC view, the currency conversion date for remitted income is the date of remittance, but the currency conversion date for the tax credit on the same income is the date that the tax was paid, which may not even be close. That is yet another anomaly arising from the HMRC view that the currency conversion date is the date of remittance.

52.10 Foreign currency bank accounts: CGT

The legislation deals separately with foreign currency bank accounts and foreign currency not in a bank account (coins and banknotes).¹² But bank accounts are the usual way to hold money, so that is the more important area.

A bank account is a debt, and a chargeable gain does not usually arise from a debt. Section 251 TCGA provides:

Where a person incurs a debt to another, whether in sterling or in some other currency, no chargeable gain shall accrue to that (that is the original) creditor or his personal representative or legatee on a disposal of the debt...

Until 2012 this relief was disapplied for foreign currency bank accounts.¹³ Section 252(1) TCGA still notionally disapplies the relief, but then adds an exception so large that the relief is in effect wholly restored:

(1)[A] Section 251(1) does not apply in relation to a gain accruing to a person on a disposal of a foreign currency debt (or an interest in such a debt)
[B] unless that person is.

¹² See 52.11 (Foreign currency held in coins or banknotes).

¹³ Another exception concerns a debt on a security but that is not relevant to bank accounts.

- (a) an individual,
 - (b) the trustees of a settlement, or
 - (c) the personal representatives of a deceased person.
- (2) A “foreign currency debt” is a debt.
- (a) owed by a bank¹⁴ in a currency other than sterling, and
 - (b) represented by a sum standing to the credit of an accountholder in an account in that bank.¹⁵

The relief does not apply to companies, but that does not matter, as:

- (1) UK companies are governed by the loan relationship rules (not discussed here)
- (2) Foreign currency debts of non-resident companies are essentially outside the scope of CGT.¹⁶

It would have been simpler to apply the relief to all persons, but there it is.

The problems raised of the old law, which took up about 50 pages of the 2011/12 edition of this work, have become (more or less) academic. It is just possible to envisage circumstances in which they might still arise, eg on secondhand debts, but it is not necessary to consider the problems here.

52.11 Foreign currency held in coins or banknotes

Foreign currency is an asset on which a gain may accrue. Section 21(1) TCGA provides:

All forms of property shall be assets for the purposes of this Act, ... including ...

(b) currency, with the exception (subject to express provision to the contrary) of sterling ...

¹⁴ “Bank” is not defined, but that does not matter.

¹⁵ The CG Manual 78330 formerly provided: “Foreign currency certificates of deposit in bearer form are not within TCGA 1992, s.252.” The passage was deleted in April 2010. One is left to speculate as to whether HMRC have changed their view. The issue would require an examination of the nature of certificates of deposit.

¹⁶ See 50.5 (Computation of non-resident company gains on CT principles). HMRC say: “There is no need to include companies in the exemption because companies’ returns from FCBAs are not liable to tax on capital gains.” Reform of the taxation of non-domiciled individuals: summary of responses to consultation (December 2011) para 2.102 accessible www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

CG Manual provides:

78316 Identification of disposals with acquisitions [April 2010]

Foreign currency is subject to the same rules of identification and pooling as unquoted shares and securities. See CG50500+.

Here the share matching rules¹⁷ do apply.

52.11.1 Foreign currency for personal expenditure

There is an exemption for foreign currency needed for personal expenditure abroad. This is not likely to affect remittance basis taxpayers, as gains on disposals of this kind are not likely to be remitted, but it is important for others. Section 269 TCGA provides:

A gain shall not be a chargeable gain if accruing on the disposal by an individual of currency of any description acquired by him for the personal expenditure outside the UK of himself or his family or dependants (including expenditure on the provision or maintenance of any residence outside the UK).

52.11.2 Commentary

The taxation of foreign currency should be the same as foreign currency bank accounts, and the relief in s.251 should be extended. However in practice this is not so important as it would be unusual for a person to hold substantial foreign currency outside a bank account (except perhaps as trading receipts outside CGT).

52.12 Interaction with mixed fund rules and HMRC examples

The CG Manual provides examples of the following:

- (1) Remittance of part of FC account holding capital gain (Fatima)
- (2) Ditto with previous offshore transfer (example 2)
- (3) Remittance of part of FC account holding income & gain (example 3)

The RDR Manual provides examples of the following:

- (4) Remittance of part of FC account holding income (Julius).

¹⁷ The rules are discussed in the 2011/12 edition of this work.

(5) Remittance of part of FC account holding RFI and RFE (Tom)

(6) Ditto with previous offshore transfer (Gelda)

The examples are discussed in the 2011/12 of this work, but this is not set out here as it is overtaken by the 2012 reforms.

52.13 Commentary: solution to remaining foreign currency problems

The 2012 reform, which was advocated in the 2011/12 edition of this book, genuinely deserves the title of simplification. The problems which remain could be solved as follows.

Yearly exchange rate averaging The problem (for arising basis and remittance basis taxpayers) is the general impracticability when there are a significant number of transactions of converting foreign currency to sterling at a variety of moments during the year: the moment that income arises, the moment that gains arise, and the moment that capital expenditure is incurred. The solution is in the HMRC practice to allow use of an annual average rate in any currency during the year and to average out acquisitions and disposals. HMRC should publish rates each year for every currency. Provided taxpayers are not allowed to switch adventitiously between accurate and average exchange rates, this would have no significant cost implications.

Currency conversion date The second set of problems (for remittance basis taxpayers only) arise from HMRC's mistaken view that the currency conversion date for income of a remittance basis taxpayer is the date of remittance. The solution is to recognise the existing law, or (if that is not accepted) to amend the law to the practitioners view. This would have no cost implications.

CHAPTER FIFTY THREE

DOUBLE TAXATION ARRANGEMENTS: INTRODUCTION

53.1 DT reliefs – Introduction

The UK has more than 100 double tax treaties. A full discussion would need almost as many volumes, and will never be written.

The discussion in this book is mainly by reference to the OECD Model Double Taxation Convention on Income and on Capital (“**the OECD model**”) though I refer at points to specific treaties.

The OECD model is a good starting point, because it has been the basis for tax treaties between developed countries since published, in draft in 1963 and finally in 1977. In any particular case the DTA concerned would need to be reviewed.

A full discussion of the OECD model would itself need a volume for every article (except article 7 which would require several volumes). Many books have been written on the topic; as the issues are worldwide, we can benefit in the UK from the work of scholars, practitioners and Revenue authorities across the world.

Before the OECD model there was a “**Colonial Model**” and a few treaties of this form still survive. The Colonial Model was not published as such; the expression is used to refer to early UK treaty practice within the Commonwealth.

I only consider the UK side of the matter, ie whether a DTA provides exemption from UK tax and whether foreign tax can be used as a credit against UK tax. In any particular case it will also be necessary to consider the foreign tax position.

I do not consider corporation tax.

53.1.1 *Cross references*

In this chapter I consider general aspects of DTAs. The next two chapters consider foreign tax credit relief, and the interaction of DTA relief with UK tax legislation (especially anti-avoidance legislation).

Specific DT exemptions are considered in the chapter on that type of income; see:

13.34 (DT relief for employment income)

15.20 (DT relief for trading income)

16.8 (DT relief for property income)

19.12 (DT relief for interest)

18.8 (Alimony and maintenance income)

19.17.1 (Credit for special withholding tax) - EU savings directive

22.7 (DT relief for royalties)

35.16 (Double Taxation relief) - accrued income scheme

The following topics are dealt with elsewhere:

5.1 (Treaty-residence)

38.9 (DTA relief for partnership)

For discretionary trusts, see 24.9 (Discretionary trusts treated as transparent to allow beneficiaries reliefs); 24.11 (UK trust - non resident beneficiary: DTA relief); 24.12 (Are discretionary trusts “beneficial owners” for DTA purposes?)

For IP trusts, see 25.4 (DT reliefs)

For charities, see Kessler & Brown, *Taxation of Charities & Non-profit Organisations*, (8th ed., 2011), Chapter 15 (Double Taxation Treaties and Charities) (online version www.taxationofcharities.co.uk).

53.2 Treaty terminology

The terms DT treaty/convention/arrangement/agreement are synonymous. The OECD Model use the word “convention” and UK tax legislation uses the term “double taxation arrangements”. I prefer the word “treaty” as it seems clearest, but adopt the abbreviation DTA which has become standard usage.

Treaties commonly refer to income (or gains) “**derived by**” a person where the usual UK tax terminology would be that the income (or gains) arise or accrue to the person, or are received by the person; the meaning is the same. In American English the verb can be used transitively, eg: “*a resident is treated as deriving the income.*”

Treaties similarly refer to income **“derived from”** a state where the usual UK tax terminology would be income arising in a state or having a source in the state.

DTAs refer to “contracting state” but I abbreviate this to **“treaty state”** or just **“state”** and where that state is not the UK, I refer to it as **“the foreign state”**. The state where the source of income arises is **“the source state”** and the state where the individual is treaty-resident is **“the residence state”**.

53.3 Types of DT relief

There are two main categories of relief:

(1) In some cases income/gains are taxable in one state (almost always the residence state) only:

- (a) art 7 business profits (in absence of a PE)
- (b) art 8 shipping and air transport
- (c) art 11 interest (in some treaties)
- (d) art 12 royalties
- (e) art 13 gains (most types)
- (f) art 18 pensions
- (g) art 19 Government service
- (j) art 21 other income

(2) In other cases income can be taxed in both states, in the case of dividends and interest with a limit on the source state’s tax, but (under article 23) the residence state gives credit for the foreign tax:

- (a) art 6 income from immovable property
- (b) art 7 business profits where there is a PE in the other state
- (c) art 10 dividends
- (d) art 15 employment income
- (e) art 17 artistes and athletes

We need terms for the various types of DT relief, and in this chapter I use the following terminology.

“DT exemption” applies where a DTA provides an exemption from tax.

“Foreign tax credit relief” applies where foreign tax is set against UK tax. This may be

- (a) **“DTA tax credit”** where a DTA confers a credit or
- (b) **“Unilateral tax credit”** where UK tax law (not a DTA) confers a credit.

“IT/CGT computation deduction” applies where foreign tax is deducted

in computing income or gains.

I refer to all these reliefs together as **“DT reliefs”**.

53.4 Types of residence and dual residence

The starting point is to note that there are (at least) three distinct concepts of residence. We need terms to describe them, and in this book I use the terms:

- (1) **“UK-law residence”** and **“UK-law UK resident”**
- (2) **“Foreign-law residence”**
- (3) **“Treaty-residence”**. A person may be:
 - (a) **“treaty-resident in the UK”** or
 - (b) **“treaty-resident in a foreign state”**. One could use the term “treaty resident outside the UK.” Statute sometimes calls this *“treaty non-resident”* but I think my term is clearer.

For a discussion of these terms, see 5.1 (Treaty-residence).

“Dual residence” means residence in two countries, but is an ambiguous term until one specifies what type(s) of residence are involved. In its widest sense it means a person who is UK-law UK resident and also foreign-law resident in a foreign state. A dual resident person in that sense may be:

- (a) treaty-resident in a foreign state
- (b) treaty-resident in the UK or
- (c) not treaty-resident anywhere (if there is no applicable DTA).

The term “dual resident” is sometimes used specifically to mean a person within (a)¹ but that usage is not adopted in this chapter.

“UK-law UK resident only” means a person who is UK-law UK resident and not foreign-law resident in a foreign state (ie not dual resident in any sense.) Such a person cannot be treaty-resident in the foreign state.

These are clumsy terms but it is difficult to think of better.

53.5 Significance of DT reliefs to different classes of residents

DT reliefs matter to all individuals, but different classes of individual are interested in different aspects of the reliefs. The permutations can be summarised thus:

¹ See 48.17 (Dual resident trust – s.88 TCGA).

Case (1): Individuals who are UK-law UK resident only. Where there is an applicable DTA they will also be treaty-resident in the UK.

Case (2): Individuals who are UK-law UK resident and also resident in a foreign state under the tax laws of that state. These may be:

- (a) treaty-resident in a foreign state
- (b) treaty-resident in the UK or
- (c) not treaty-resident anywhere (if there is no applicable DTT).

Case (3): Individuals who are not UK-law UK resident. These may be:

- (a) treaty-resident in a foreign state
- (b) not treaty-resident anywhere (if there is no applicable DTA).

Case 1: UK-law UK resident only. These do not directly qualify for any DT exemption but they may qualify for foreign tax credit relief (or IT/CGT computation deduction). They may also qualify for indirect DT relief if income or gains accruing to a trust or company which is treaty-resident in a foreign state are deemed to accrue to them under an anti-avoidance provisions such as s.624, TAA, s.13, etc.

Case (2)(a): UK-law UK resident and treaty-resident in a foreign state. As UK residents they are in principle subject to IT or CGT on all UK and foreign income and gains (subject where applicable to the remittance basis). However as treaty-resident in a foreign state they may qualify for DT exemptions from UK and foreign source income and gains. This category has become much more important from 2008/09, for two reasons. First, many individuals who before 2008 would have claimed the remittance basis now prefer to claim treaty relief, as a remittance basis claim will incur the remittance basis claim charge. Secondly following the withdrawal of IR20 and its replacement by the hopelessly vague HMRC 6, many more individuals find that they may possibly be UK-law UK resident and since they may be UK resident they claim treaty relief just in case. (This should cease to be such a problem when the statutory residence test takes effect in 2013/14).

Case (2)(b)(c): UK law UK resident and treaty-resident in the UK or not treaty-resident anywhere. These are in the same position as case 1.

Case (3)(a): Not UK-law UK resident and treaty-resident in a foreign state. As non-residents they are in principle subject to IT on UK source income only. As treaty-resident in a foreign state they may qualify for some DT exemptions (eg the OECD other income article and relief for UK

source interest under the some treaties).

Case (3)(b) Not UK-law UK resident and not treaty-resident anywhere.

As non-residents they are in principle subject to IT on UK source income (though the non-residents exemption will mitigate this). They will not qualify for any DT exemptions.

53.6 Interpretation of DTAs: ordinary meaning & purposive construction

Short formulations of the principles of interpretation can only be expressed at a high level of generality which makes their application doubtful and their usefulness to the practitioner questionable. In short, as Voltaire observed, language is difficult to put into words. Nevertheless most cases start with these generalities so it is worth a brief summary here.

The starting point is article 31(1) of the Vienna Convention on the law of treaties:

A treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose.

The following statement of principles has often been approved:

(1) It is necessary to look first for a clear meaning of the words used in the relevant article of the convention, bearing in mind that “consideration of the purpose of an enactment is always a legitimate part of the process of interpretation”... . A strictly literal approach to interpretation is not appropriate in construing legislation which gives effect to or incorporates an international treaty A literal interpretation may be obviously inconsistent with the purposes of the particular article or of the treaty as a whole. If the provisions of a particular article are ambiguous, it may be possible to resolve that ambiguity by giving a purposive construction to the convention, looking at it as a whole by reference to its language as set out in the relevant UK legislative instrument....

(2) The process of interpretation should take account of the fact that--
“The language of an international convention has not been chosen by an English parliamentary draftsman. It is neither couched in the conventional English legislative idiom nor designed to be construed exclusively by English judges. It is addressed to a much wider and more varied judicial audience than is an Act of Parliament which deals with purely domestic law. It should be interpreted,... 'unconstrained by

technical rules of English law, or by English legal precedent, but on broad principles of general acceptance'...

(3) Among those principles is the general principle of international law, now embodied in Article 31(1) of the Vienna Convention on the Law of Treaties. [The Judge sets out article 31 and continues] A similar principle is expressed in slightly different terms in McNair on the Law of Treaties (1961) at page 365, where it is stated that the task of applying or construing or interpreting a treaty is “the duty of giving effect to the expressed intention of the parties, that is, their intention as expressed in the words used by them in the light of the surrounding circumstances”. It is also stated at page 366 of that work that references to the primary necessity of giving effect to “the plain terms” of a treaty or construing words according to their “general and ordinary meaning”, or their “natural signification” are to be a starting point or *prima facie* guide and “cannot be allowed to obstruct the essential quest in the application of treaties, namely the search for the real intention of the contracting parties in using the language employed by them”.

(4) If the adoption of this approach to the article leaves the meaning of the relevant provision unclear or ambiguous or leads to a result which is manifestly absurd or unreasonable recourse may be had to “supplementary means of interpretation” including *travaux préparatoires*:

...

(5) Subsequent commentaries on a convention or treaty have persuasive value only, depending on the cogency of their reasoning. Similarly, decisions of foreign courts on the interpretation of a convention or treaty text depend for their authority on the reputation and status of the Court in question...

(6) Aids to the interpretation of a treaty such as *travaux préparatoires*, international case law and the writings of jurists are not a substitute for study of the terms of the convention. Their use is discretionary, not mandatory, depending, for example, on the relevance of such material and the weight to be attached to it...²

53.7 Context of treaties

Article 31(2) of the Vienna convention provides:

2. The context for the purpose of the interpretation of a treaty shall

2 *IRC v Commerzbank* 63 TC 218 at p.235; I omit some references given in the original.

comprise, in addition to the text, including its preamble and annexes:

- (a) any agreement relating to the treaty which was made between all the parties in connection with the conclusion of the treaty;
 - (b) any instrument which was made by one or more parties in connection with the conclusion of the treaty and accepted by the other parties as an instrument related to the treaty.
3. There shall be taken into account, together with the context:
- (a) any subsequent agreement between the parties regarding the interpretation of the treaty or the application of its provisions;
 - (b) any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation;
 - (c) any relevant rules of international law applicable in the relations between the parties.
4. A special meaning shall be given to a term if it is established that the parties so intended.

Article 32 Supplementary means of interpretation

Recourse may be had to supplementary means of interpretation, including the preparatory work of the treaty and the circumstances of its conclusion, in order to confirm the meaning resulting from the application of article 31, or to determine the meaning when the interpretation according to article 31:

- (a) leaves the meaning ambiguous or obscure; or
- (b) leads to a result which is manifestly absurd or unreasonable.

53.8 Treaties in two languages

Article 33 of the Vienna convention provides:

- 1. When a treaty has been authenticated in two or more languages, the text is equally authoritative in each language, unless the treaty provides or the parties agree that, in case of divergence, a particular text shall prevail.
- 2. A version of the treaty in a language other than one of those in which the text was authenticated shall be considered an authentic text only if the treaty so provides or the parties so agree.
- 3. The terms of the treaty are presumed to have the same meaning in each authentic text.
- 4. Except where a particular text prevails in accordance with paragraph 1, when a comparison of the authentic texts discloses a difference of meaning which the application of articles 31 and 32 does not remove, the meaning which best reconciles the texts, having regard to the object and

purpose of the treaty, shall be adopted.

53.9 Variations between DTAs

The Australian revenue discuss this issue:

46. It is important for interpretation purposes to remember that each DTA is the product of a separate bilateral negotiation process. While, therefore, there is a general template structure to Australia's DTAs, each contains variations in terms from other DTAs because they are negotiated against the background of the particular languages, legal systems, tax rules, tax treaty and wider economic policies and expectations of the respective countries at the time, as well as some historical influences.

47. Those factors, and the fact that treaty negotiations are conducted against the general background of the OECD and United Nations Model Tax Conventions (which, being products of international compromise and consensus, are couched in comparatively broad terms) mean that the Australian negotiators, administrators and courts cannot expect the terms of the DTAs to be expressed with the same precision as our ordinary domestic tax legislation. Nor is it possible to always maintain consistency in how the terms of a particular Article are expressed in the various DTAs, because of the different 'mix' of the above factors in different negotiations and the 'give and take' that is a necessary incident of international negotiations.

48. This is an important point to bear in mind, because it means that the network of DTAs is not drafted in an absolutely uniform manner in relation to residents of all treaty partners, or in relation to similar activities or situations.

49. Differing wording in two DTAs may represent the same intended meaning (such as, in the ATO's view, the terms 'beneficial entitlement' in the Dividends, Interest and Royalties Articles of some DTAs and 'beneficial ownership' in the corresponding Articles in other DTAs). Often such differences exist because a country wants to avoid unintentionally 'picking up' a domestic law usage for an undefined term that may be different to the international tax meaning of the phrase more usually relied on. Alternatively, it may be because a country does not recognise a particular concept and regards the use of a term as potentially creating uncertainty before its courts and in the

administration of the DTA.³

50. In other cases, differences in wording may represent specific negotiating intentions (e.g., the reference simply to 'income' rather than 'income, profits or gains' in many of our pre-capital gains DTAs is, in the ATO's view, significant as is noted in Taxation Ruling TR 2001/12).⁴

51. It is sometimes possible that the same wording in different DTAs could present a different intended meaning. DTA negotiators will generally seek to identify the differences between a DTA under negotiation and their existing treaty network wording and as far as possible avoid the same wording having different usages, but that will not always be possible.

52. One practical example of the potential significance of different wording between DTAs is that, although the business profits/permanent establishment ('PE') principle is common to all the DTAs, the definition of a PE in one DTA may be substantively different to the definition in another DTA.

53. For example, the definition of a PE in the United States Convention is wider than the definition in the Japanese Agreement. Accordingly, Australia may have a taxing right under the Business Profits Article of the United States Convention in respect of certain profits of a United States enterprise but not under the Business Profits Article of the Japanese Agreement in respect of like profits of a comparable Japanese enterprise.⁵

The same would apply in the UK.

53.9.1 *Foreign court decisions*

The Australian revenue discuss this issue:

119. Since Australian courts have recognised that interpretation in a way

3 [Footnote original] Such as the concepts of 'citizenship' and 'nationality' - frequently only one or the other of these has a clear domestic law meaning for a DTA party, or the meaning may differ as between the Parties. Because of this, an Article such as the Government Service Article in the Austrian Agreement and some of Australia's other DTAs refers to 'a citizen or national' of a country.

4 [Footnote original] At paragraphs 56 and 59.

5 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

conducive to producing a uniform international interpretation is an important goal in interpreting treaties,⁶ it follows that foreign court decisions on similar provisions may give valuable guidance about the meaning of a term. They need to be treated with some caution, since they may be founded on different interpretative principles or approaches. Some courts may, for example, less strictly follow the Vienna Convention rules, or may apply a domestic law meaning of a term when they should apply an accepted international tax meaning. A court may also, quite properly, apply a domestic law meaning to a term left undefined by the DTA, whereas the same approach before Australian courts may lead to a different domestic law meaning being 'picked up'.

120. Nevertheless, a foreign court's decisions, including on the foreign language text, may provide important insights. Some foreign courts have considerable experience and expertise in interpreting DTAs. In *Lamesa*, the Full Federal Court did not need to (or wish to) express a concluded view on the issue. The Court noted, however, that:⁷

We would, however, express our agreement with the distinction drawn by Lindgren J in *Allstate Life Insurance Co v. Australia and New Zealand Banking Group Ltd (No 6)* (1996) 64 FCR 79 between the content of foreign law which is receivable in evidence and the application of that law to facts once its content has been ascertained which is not. However, where the construction of an international treaty arises, evidence as to the interpretation of that or subsequent treaties in one of the participating countries forms part of a matrix of material to which reference could properly be made in an appropriate case. As presently advised we would not wish it to be thought that a limited view of the material to which reference could be made in interpreting a double tax treaty should be taken. Had there been some decision of an appropriate Dutch court interpreting a treaty with identical or similar language, then, in our view, evidence of such a decision might well have been admissible.

121. There are also strong reasons to consider, as a matter of practice, the decisions of courts from countries other than the treaty partner (an issue not addressed by the *Lamesa* Court). Any such consideration would need to be consistent with the comments of the High Court in *Cook v Cook*⁸ that:

6 See paragraph 87.

7 97 ATC 4229 at 4757.

8 (1986) 162 CLR 376 at 390.

Subject, perhaps, to the special position of decisions of the House of Lords given in the period in which appeals lay from this country to the Privy Council, the precedents of other legal systems are not binding and are useful only to the degree of the persuasiveness of their reasoning.⁹

53.9.2 *Foreign revenue guidance*

The Australian revenue discuss this issue:

125. Extrinsic materials of various types are extensively relied on by some countries. Some, such as the 'Technical Explanations' which are a feature of United States domestic procedures for consideration of a DTA, may help explain the views being put by the relevant DTA partner or a taxpayer. As the 'Technical Explanations' are, however, developed as part of the internal processes of the United States when implementing a DTA, they are of little or no usefulness in objectively proving the intent of both parties to a DTA. They are primarily designed to reflect the views of the United States negotiators, upon which there may not necessarily be a consensus ad idem ('meeting of minds'), but they may in some cases provide useful signposts to that consensus.¹⁰ Even if they might not be admissible in court, or might be of little probative value, they may better inform an understanding of the DTA as a whole.¹¹

53.10 Status of OECD commentary

The OECD have adopted the following formal recommendation:

THE COUNCIL ... RECOMMENDS the Governments of Member countries:

1. To pursue their efforts to conclude bilateral tax conventions on

9 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

10 [footnote original] See on the use of United States materials and the different approaches taken to such materials by the courts of other countries, *Edwardes-Ker Tax Treaty Interpretation* (1994) at paragraph 25.04. Edwardes-Ker notes, importantly, that this does not supplant the rule that a treaty must be interpreted in accordance with the common intention of both States.

11 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

income and on capital with those Member countries, and where appropriate with non-member countries, with which they have not yet entered into such conventions, and to revise those of the existing conventions that may no longer reflect present-day needs;

2. When concluding new bilateral conventions or revising existing bilateral conventions, to conform to the Model Tax Convention, as interpreted by the Commentaries thereon;

3. That their tax administrations follow the Commentaries on the Articles of the Model Tax Convention, as modified from time to time, when applying and interpreting the provisions of their bilateral tax conventions that are based on these Articles.¹²

The OECD commentary provides:

29. As the Commentaries have been drafted and agreed upon by the experts appointed to the Committee on Fiscal Affairs by the Governments of Member countries, they are of special importance in the development of international fiscal law. Although the Commentaries are not designed to be annexed in any manner to the conventions signed by Member countries, which unlike the Model are legally binding international instruments, they can nevertheless be of great assistance in the application and interpretation of the conventions and, in particular, in the settlement of any disputes.

29.1 The tax administrations of Member countries routinely consult the Commentaries in their interpretation of bilateral tax treaties. The Commentaries are useful both in deciding day-to-day questions of detail and in resolving larger issues involving the policies and purposes behind various provisions. Tax officials give great weight to the guidance contained in the Commentaries.

29.2 Similarly, taxpayers make extensive use of the Commentaries in conducting their businesses and planning their business transactions and investments. The Commentaries are of particular importance in countries that do not have a procedure for obtaining an advance ruling on tax matters from the tax administration as the Commentaries may be the only available source of interpretation in that case.

29.3 Bilateral tax treaties are receiving more and more judicial attention as well. The courts are increasingly using the Commentaries in reaching their decisions. Information collected by the Committee on Fiscal Affairs shows that the Commentaries have been cited in the published

12 C(97)195/FINAL 23 October 1997; I omit the recitals.

decisions of the courts of the great majority of Member countries. In many decisions, the Commentaries have been extensively quoted and analysed, and have frequently played a key role in the judge's deliberations. The Committee expects this trend to continue as the world-wide network of tax treaties continues to grow and as the Commentaries gain even more widespread acceptance as an important interpretative reference.

30. Observations on the Commentaries have sometimes been inserted at the request of Member countries that are unable to concur in the interpretation given in the Commentary on the Article concerned. These observations thus do not express any disagreement with the text of the Convention, but usefully indicate the way in which those countries will apply the provisions of the Article in question. Since the observations are related to the interpretations of the Articles given in the Commentaries, no observation is needed to indicate a country's wish to modify the wording of an alternative or additional provision that the Commentaries allow countries to include in their bilateral conventions. Reservations of certain Member countries on some provisions of the Convention

31. Although all Member countries are in agreement with the aims and the main provisions of the Model Convention, nearly all have entered reservations on some provisions, which are recorded in the Commentaries on the Articles concerned. ... It is understood that insofar as a Member country has entered reservations, the other Member countries, in negotiating bilateral conventions with the former, will retain their freedom of action in accordance with the principle of reciprocity.

32. The Committee on Fiscal Affairs considers that these reservations should be viewed against the background of the very wide areas of agreement that has been achieved in drafting this Convention.

The Australian revenue refer to the OECD resolution and say:

101. ... While not binding (since they are not formal OECD 'Decisions', binding on OECD Members under the OECD Constitution), the OECD Model and Commentaries create a general or 'quasi-political', rather than 'legal', expectation that OECD Members will basically comply, subject to specific 'Observations' and 'Reservations' lodged with the OECD. Those Observations and Reservations place on record that the relevant DTA policies and practices of the countries concerned are based on a different approach than that indicated in the OECD Model or its Commentaries. Australia has lodged various Observations and

Reservations to the OECD Model and Commentaries over time which (like Observations and Reservations lodged by other OECD Member countries) are reproduced in the OECD Commentaries. The status and interpretative relevance of Observations and Reservations is considered further below.¹³

102. In *Thiel*, the High Court judges all accepted that the OECD Model Taxation Convention's official Commentaries may be relevant to the interpretation of DTAs based on the OECD Model. In *Thiel*, McHugh J (with whom the majority agreed in their joint judgment) approved recourse to the OECD Model and Commentaries under Article 32 of the Vienna Convention (that is, as supplementary means only available for consideration when there is ambiguity or the like, or to confirm a meaning reached by examining Article 31 materials).¹⁴

103. Dawson J also approved reference to the Model and Commentaries 'as a supplementary means of interpretation to which recourse may be had under Article 32 of the Vienna Convention'.¹⁵ His Honour went further than the other judges, however, by expressing the view that the OECD Model and Commentaries were also relevant under Article 31 of the Vienna Convention, as primary materials to be considered even when there was no ambiguity or the like.¹⁶ In so doing, Dawson J nevertheless acknowledged that 'some doubts have been expressed about the applicability, as a matter of language, of Article 31 to the Commentaries in the case of a bilateral treaty such as a double taxation agreement'.¹⁷

104. The Commentaries, with the various Observations and Reservations of OECD Member countries which they reproduce (and which are further considered below),¹⁸ therefore provide important guidance on interpretation and application of the OECD Model and as a matter of practice will often need to be considered in interpretation of

13 At paragraph 109ff.

14 *Thiel v FC of T* (1990) 90 ATC 4717, at 4727 and 4720.

15 *Ibid*, at 4723.

16 [Footnote original] Dawson J, in his discussion of Article 31 of the Vienna Convention at 4723, had stated: "For my part, I do not see why the OECD model convention and commentaries should not be regarded as having been made in connection with and accepted by the parties to a bilateral treaty *subsequently concluded* in accordance with the framework of the model". (emphasis added).

17 [Footnote original] *Thiel v FC of T* (1990) 90 ATC 4717, at 4723. He cited, as to the doubts, Avery Jones et al Part II at 92. Edwardes-Ker *Tax Treaty Interpretation* (1994) similarly considers that the OECD Commentaries do not fall within the meaning of Article 31(2) of the Vienna Convention: paragraph 15.03.

18 Paragraph 109ff.

DTAs, at least where the wording is ambiguous, which (as noted above)¹⁹ is inherently more likely in treaties than in general domestic legislation.

105. In addition, the Commentaries, with the Observations and Reservations, do provide part of the historical context of the DTA negotiations. They also have a role in testing the interpretation reached by other means, although if they conflict with, rather than confirm, that interpretation there may be an issue of whether this would be admissible in a court, since the matter was left unresolved by the *Thiel* judgments.

...

Observations & Reservations

109. A further point which needs to be considered is the relevance for interpretation purposes of the previously mentioned Observations and Reservations of individual OECD Member countries to the OECD Model Tax Convention and its Commentaries, as Australia, like some of its DTA partners, sometimes depart significantly from the OECD Model. OECD Member Countries lodge 'Reservations' when they do not agree with either the relevant text of an OECD Model Article or any variations in text permitted by the Commentaries (and where they therefore wish to put other countries on notice of their views and intentions in negotiating the terms of the DTA). Countries enter 'Observations' if they do not object to the Model Article's text, but do not concur with the interpretation of that text set out in the Commentaries.

110. The theory behind the Observations and Reservations is most clearly stated in the Introduction to 'Non-Member Positions'²⁰ section in the OECD Model Convention Commentaries. The Introduction reads: 2. ... Recognising that non-Member countries could only be expected to associate themselves to the development of the Model Tax Convention if they could retain their freedom to disagree with its contents, the Committee also decided that these countries should, like Member countries, have the possibility to identify the areas where they are unable to agree with the text of an Article or with an interpretation given in the Commentary. ...

5. ... For each Article of the Model Tax Convention, the positions that are presented in this document indicate where a country disagrees with the text of the Article and where it disagrees with an interpretation given

¹⁹ Paragraph 109ff.

²⁰ [Footnote original] The term 'positions' is used since countries that are not OECD Members cannot formally lodge Observations or Reservations to the OECD Model.

in the Commentary in relation to the Article.

111. Observations and Reservations may be of considerable relevance in explaining variations from the OECD Model, both when interpreting implementing legislation under section 15AA of the Acts Interpretation Act 1901 and when applying Article 31 of the Vienna Convention. They may not ultimately be admissible in court except to confirm the interpretations otherwise reached under those provisions or when considering ambiguous provisions under Article 32 of the Vienna Convention or, possibly, under section 15AB of the Acts Interpretation Act 1901.²¹

53.10.1 *Changes to commentary*

The OECD model commentary provides:

33. When drafting the 1977 Model Convention, the Committee on Fiscal Affairs examined the problems of conflicts of interpretation that might arise as a result of changes in the Articles and Commentaries of the 1963 Draft Convention. At that time, the Committee considered that existing conventions should, as far as possible, be interpreted in the spirit of the revised Commentaries, even though the provisions of these conventions did not yet include the more precise wording of the 1977 Model Convention. It was also indicated that Member countries wishing to clarify their positions in this respect could do so by means of an exchange of letters between competent authorities in accordance with the mutual agreement procedure and that, even in the absence of such an exchange of letters, these authorities could use mutual agreement procedures to confirm this interpretation in particular cases.

34. The Committee believes that the changes to the Articles of the Model Convention and the Commentaries that have been made since 1977 should be similarly interpreted.

35. Needless to say, amendments to the Articles of the Model Convention and changes to the Commentaries that are a direct result of these amendments are not relevant to the interpretation or application of previously concluded conventions where the provisions of those conventions are different in substance from the amended Articles. However, other changes or additions to the Commentaries are normally applicable to the interpretation and application of conventions

21 Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

concluded before their adoption, because they reflect the consensus of the OECD Member countries as to the proper interpretation of existing provisions and their application to specific situations.

36. Whilst the Committee considers that changes to the Commentaries should be relevant in interpreting and applying conventions concluded before the adoption of these changes, it disagrees with any form of a *contrario* interpretation that would necessarily infer from a change to an Article of the Model Convention or to the Commentaries that the previous wording resulted in consequences different from those of the modified wording. Many amendments are intended to simply clarify, not change, the meaning of the Articles or the Commentaries, and such a *contrario* interpretations would clearly be wrong in those cases.

36.1 Tax authorities in Member countries follow the general principles enunciated in the preceding four paragraphs. Accordingly, the Committee on Fiscal Affairs considers that taxpayers may also find it useful to consult later versions of the Commentaries in interpreting earlier treaties.

Avery Jones says:

If the OECD suddenly came up with a better model, it would be a long time before it generally was adopted in practice and meanwhile, there would be a long transition while the existing 1,400 treaties were renegotiated. There is therefore a tendency to change the Commentary instead. The hope is that the new Commentary then will apply to all the existing treaties. As someone said, it is like the Bible; the words stay the same, only the commentary changes. Does anyone know what courts will do when they are faced with interpreting a treaty when the Commentary makes fundamental changes subsequent to the treaty? There are few cases so far, probably because many of the fundamental changes are recent. Unless there is a reasonable expectation that courts will give effect to some of the fundamental changes that are being made to the Commentary, and I doubt if this is the case, there is no point in making fundamental changes to the Commentary. In fact, from the point of view of the tax authority, changing the Commentary in this way could make matters worse. In light of statements in the Introduction to the Model Treaty that existing treaties should be interpreted in light of new Commentaries, the tax authority may feel that it cannot properly argue against the interpretation contained in Commentaries made later than the treaty in question, but the taxpayer can, and probably will succeed if he does. It follows that the only fundamental changes that can have effect are those in favor of the taxpayer, which may not be quite what tax

authorities sitting round the OECD table in Paris intend.

[Avery Jones sets out the comments of the Commentary on the issue and continues]: It seems to me that too little attention is paid to the legal effect of later Commentaries in internal law, and I am doubtful about whether any legal weight should be given to the Committee's retrospective views about proper interpretation. Tax treaties are different from normal international treaties under which the contracting states can agree to any interpretation;²² they are also part of internal tax law affecting taxpayers and subject to interpretation by courts in that country. In relation to the latter, these statements in the Introduction may be wishful thinking on the part of the members of the Committee rather than a statement of what the legal position actually is. ...I think we would say in the United Kingdom, that later Commentaries should not even be considered.

...On the other hand, it does seem odd that if a country makes a new treaty today, which in a particular respect is in exactly the same form as an older one made with another country at the time of an earlier Commentary, the two treaties will have different meanings, which does seem contrary to the whole principle of having Commentaries. It is not as if parliaments (certainly in my country) take any notice of changes in the Commentary in approving treaties, particularly so when there is no mention of the Commentary in the treaty. If - and this may be a big if - parliaments were prepared to approve a statement in the treaty that it was to be interpreted in the light of the Commentaries from time to time in force, would this be desirable? It effectively would be a statement that the parties intended that a special meaning, determined in the future by the OECD, should apply, which as far as the two tax authorities are concerned, is of course exactly what they do intend, as the Introduction makes clear.²³

There must be a boundary between interpretation and change. If the later Commentary says that black now means white, there seems little doubt that article 32 will not help to give a treaty that interpretation. If, on the other hand, the parties have stated in advance that, as a special meaning to be determined later, black does mean white, a court might give effect to it. You may say that this is so extreme an example that it would never happen. Unfortunately, there are examples of the Commentary changing

22 Under art. 31(3) of the Vienna Convention on the Law of Treaties, subsequent agreements between the parties have the same status as context.

23 OECD Commentary, note 31, Introduction, PP33-36.

its meaning from black to white....²⁴

If changes in the Commentary in the past had been restricted to what might be argued to be interpretation, there would be a strong case for an approach giving effect to future Commentaries as a special meaning, always assuming that parliaments would accept it. But, as the OECD has made such major changes to later Commentaries, it is very doubtful that this solution will now be acceptable. ... The extent to which the later Commentary has effect is in the hands of the court, which will not accept that a change from black to white is confirming the ordinary meaning or resolving ambiguities or obscurity, or avoiding manifestly absurd or unreasonable results. On the other hand, it is likely that more minor changes will be effective, which will assist the harmonization of interpretation of treaties. It is already the case that courts in many countries do refer to later Commentaries in the case of minor changes and including something to that effect in the treaty will encourage courts in all countries to do so.²⁵

The Australian revenue say:

Subsequent revisions to OECD Commentaries

106. There is some debate over whether subsequent changes to the OECD Commentaries should be used as an aid to interpretation of earlier DTAs. On one hand, there is the view that the OECD Commentaries are only relevant to those DTAs subsequently concluded. Einfeld J expressed this view in the Federal Court decision of the first instance in *Lamesa Holdings BV v FC of T*. His Honour referred to the Full High Court decision in *Thiel* and to the comments made by Dawson J in that case.²⁶

Further extrinsic material, referred to in *Thiel* as permissible by Mason CJ, Brennan and Gaudron JJ, who agreed with McHugh J, is consideration of the 1977 OECD Model and Commentaries in construing a double tax agreement. Dawson J added an important caveat to this view, namely that the OECD model and commentaries are only applicable to those bilateral treaties subsequently concluded.

107. On the other hand, the Introduction to the OECD Commentaries now indicates more clearly that the later Commentaries are intended by

24 Avery Jones gives an example from Article 15 (employment income); see 13.35.5 (Who is the employer?).

25 Avery Jones, "Are Tax Treaties Necessary?" 53 Tax Law Review 1.

26 97 ATC 4229 at 4237.

OECD Member states to be used for interpretation and application of DTAs concluded before their adoption, except where the OECD Model has been changed in substance. The Year 2000 update to the OECD Model and Commentaries states: [text set out above]...

108. These changes to the Commentaries reflect the fact that the Commentaries are usually expressed not as forming an agreement between countries as to a new meaning but as reflecting a common view as to what the meaning is and always has been. Accordingly, unless it is apparent that the substance of the OECD Model has itself changed since a DTA was negotiated or the treaty in question does not conform to the OECD Model, or unless the Commentaries make clear that a former interpretation has actually been substantively altered, rather than merely elaborated, the ATO considers it appropriate, as a matter of practice, to consider, at least, the most recently adopted/published OECD Commentaries (currently the Year 2000 Commentaries) as well as others which may have been available at the time of negotiation.²⁷ Often, if a DTA provision is to be fully understood, the changes that have occurred to the relevant OECD Commentaries over time will need to be examined and considered.²⁸

53.10.2 *Summary*

A great deal of ink has been spilt on this topic, but all it comes down to is that a Judge may ignore any OECD commentary if sufficiently minded to

27 [Footnote original] This approach may also be justified in terms of Article 31(3) of the Vienna Convention, with the Commentaries representing either 'a subsequent agreement between the parties regarding the interpretation of the treaty' (Article 31(3)(a)) or 'any subsequent practice in the application of the treaty which establishes the agreement of the parties relating to its interpretation' (Article 31(3)(b)). In *Lamesa*, Einfeld J in fact referred to the 1977 OECD Commentaries when interpreting the 1976 Netherlands Agreement (Schedule 10 to the Agreements Act) on the basis that the relevant part was based on an OECD Report released in 1974 and widely available.

28 [Footnote original] An example is the amendment to paragraph 8 of the 1977 Model Commentaries on Article 5 (permanent establishments) by the 1992 Commentaries (in response to a 1983 Report). The amendments treated the leasing of industrial, scientific and commercial equipment as a matter for the Business Profits Article, rather than the Royalties Article. Australia and some other countries disagreed, and lodged a 'Reservation' (a concept discussed at paragraph 109ff) to the OECD Model Royalties Article, to this effect: see paragraph 39 of the OECD Model Commentary on Article 12. The history of the OECD Model and Commentaries is found in Volume 1 of the loose-leaf (and most authoritative) version of the OECD Model.

do so, and may ignore post-treaty amendments to the commentary with a relatively easy conscience.

53.11 Undefined terms have domestic law meanings

Article 3(2) OECD model convention provides:

As regards the application of the Convention at any time by a Contracting State, any term not defined therein shall, unless the context otherwise requires, have the meaning that it has at that time under the law of that State for the purposes of the taxes to which the Convention applies, any meaning under the applicable tax laws of that State prevailing over a meaning given to the term under other laws of that State.

Avery Jones states:

At first sight, it seems obvious that a treaty term should mean the same in both states, rather than have different internal law meanings in each of them; indeed, there are those who advocate this. But this approach overlooks that the tax systems in internal law do not have the same scope. Article 3(2) has the effect that the relieving provisions of the treaty correspond exactly to the taxing provisions of internal law. If expressions meant the same in both countries, this would not be the result. It would not lead to a sensible result if one country had a wider meaning of a type of income that it had to exempt than the other, and the treaty meaning was the same in both countries. The likely result would be that something covered by the internal law charge would not be exempt as a result of the treaty, or, less importantly, part of the treaty meaning would have no effect.

A problem that article 3(2) appears to encourage is for each state to use its own meaning of terms not only when relieving tax in the source state, which is mainly what the treaty is about, but also when it is giving relief as the residence state. This can lead to double taxation when the residence state says that if it had been the source state, it would not have taxed, so it will not give any relief for the tax that the source state, in fact, has charged because on its interpretation, the treaty does not prevent it. Or the reverse, when the residence state says that it would have taxed if it had been the source state, and so it will exempt the income even though the source state did not tax (although at least this problem does not arise in our countries as we, as the residence state,

would tax and give credit for nothing). I do not believe that either result is intended by the Model Treaty; it would be a strange model treaty if it did. It would be nice if the Commentary said so plainly, rather than implying the reverse in an obscure section dealing with thin capitalization.²⁹ I shall not set out the arguments here as my co-authors and I have written extensively about it.³⁰ It would be a considerable improvement to the Model Treaty and Commentaries if this point were clarified.³¹

53.12 Tax avoidance using DTAs

53.12.1 OECD commentary

The Commentary to OECD treaty article 1 provides:

Improper use of the Convention

7. The principal purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons. It is also a purpose of tax conventions to prevent tax avoidance and evasion.

7.1 Taxpayers may be tempted to abuse the tax laws of a State by exploiting the differences between various countries' laws. ...

The Commentary gives two examples of abuse:

9.[1] This would be the case, for example, if a person (whether or not a resident of a Contracting State), acts through a legal entity created in a State essentially to obtain treaty benefits that would not be available directly.

[2] Another case would be an individual who has in a Contracting State both his permanent home and all his economic interests, including a substantial shareholding in a company of that State, and who, essentially in order to sell the shares and escape taxation in that State on the capital gains from the alienation (by virtue of paragraph 5 of Article 13), transfers his permanent home to the other Contracting State, where such gains are subject to little or no tax.

29 FN original: OECD Commentary, note 31, art. 23, P68.

30 Footnote original: See Avery Jones *et al* "Credit and Exemption Under Tax Treaties in Cases of Differing Income Characterization", (1996) 36 European Taxation 118.

31 Avery Jones, "Are Tax Treaties Necessary?" 53 Tax Law Review 1.

Should case [2] be categorised as abuse? In *Reed v Clark* the taxpayer had carefully organised his year abroad to reduce his tax liability but that was irrelevant:

Residence abroad for a carefully chosen limited period of work there ... is no less residence abroad for that period because the major reason for it was the avoidance³² of tax.³³

9.1 This raises two fundamental questions that are discussed in the following paragraphs:

— whether the benefits of tax conventions must be granted when transactions that constitute an abuse of the provisions of these conventions are entered into (cf. paragraphs 9.2 and following below); and

— whether specific provisions and jurisprudential rules of the domestic law of a Contracting State that are intended to prevent tax abuse conflict with tax conventions (cf. paragraphs 22 and following below).

9.2 For many States, the answer to the first question is based on their answer to the second question. These States take account of the fact that taxes are ultimately imposed through the provisions of domestic law, as restricted (and in some rare cases, broadened) by the provisions of tax conventions. Thus, any abuse of the provisions of a tax convention could also be characterised as an abuse of the provisions of domestic law under which tax will be levied. For these States, the issue then becomes whether the provisions of tax conventions may prevent the application of the anti-abuse provisions of domestic law, which is the second question above. As indicated in paragraph 22.1 below, the answer to that second question is that to the extent these anti-avoidance rules are part of the basic domestic rules set by domestic tax laws for determining which facts give rise to a tax liability, they are not addressed in tax treaties and are therefore not affected by them. Thus, as a general rule, there will be no conflict between such rules and the provisions of tax conventions.

32 Nowadays one should use the term “mitigation” rather than “avoidance” here, see 31.7 (“Avoidance”, “mitigation”, “tax reduction”, “evasion”: introduction). Contrast the Special Commissioner in *Shepherd v IRC* 78 TC 389 at [62]: “Although the Appellant’s intention in going to Cyprus was to *mitigate* tax, I do not regard that as a relevant factor in deciding whether he was resident in the UK.”

33 58 TC 528 at p.556.

9.3 Other States prefer to view some abuses as being abuses of the convention itself, as opposed to abuses of domestic law. These States, however, then consider that a proper construction of tax conventions allows them to disregard abusive transactions, such as those entered into with the view to obtaining unintended benefits under the provisions of these conventions. This interpretation results from the object and purpose of tax conventions as well as the obligation to interpret them in good faith (see Article 31 of the Vienna Convention on the Law of Treaties).

9.4 Under both approaches, therefore, it is agreed that States do not have to grant the benefits of a double taxation convention where arrangements that constitute an abuse of the provisions of the convention have been entered into.

The commentary formerly said the opposite. Before 21 September 1995 paragraph 7 read as follows:

7. ... taxpayers have the possibility, double taxation conventions being left aside, to exploit differences in tax levels between States and the tax advantages provided by various countries' taxation laws, but it is for the States concerned to adopt provisions in their domestic laws to counter such manoeuvres. Such States will then wish, in their bilateral double taxation conventions, to preserve the application of provisions of this kind contained in their domestic laws.

9.5 It is important to note, however, that it should not be lightly assumed that a taxpayer is entering into the type of abusive transactions referred to above. A guiding principle is that the benefits of a double taxation convention should not be available where a main purpose for entering into certain transactions or arrangements was to secure a more favourable tax position and obtaining that more favourable treatment in these circumstances would be contrary to the object and purpose of the relevant provisions.

53.12.2 *Case law approach to avoidance schemes*

In a tax avoidance context, HMRC will argue for a non-literal approach, and in some cases this submission has fallen on fertile soil:

[16] In this case, the preamble to the Treaty is very brief and states simply that the parties are “Desiring to conclude a new Convention for the avoidance of double taxation and the prevention of fiscal evasion

with respect to taxes on income and capital gains.”

[17] These words, however, make it clear that the primary purposes of the Treaty are, on the one hand, to eliminate double taxation and, on the other hand, to prevent the avoidance of taxation. In seeking a purposive interpretation, both these principles have to be borne in mind. Moreover, the latter principle, in my judgment, means that the Treaty should be interpreted to avoid the grant of double relief as well as to confer relief against double taxation.³⁴

53.12.3 *Unallowable purpose tests in DTAs*

Some recent treaties have an express unallowable purpose test, applicable to certain provisions. The France/UK DTA has express provisions in the dividends, interest, royalties, and other income articles: eg art.11(6):

The provisions of this Article shall not apply if it was the main purpose or one of the main purposes of any person concerned with the creation or assignment of the shares or other rights in respect of which the dividend is paid to take advantage of this Article by means of that creation or assignment.³⁵

There are similar provisions in the Germany/UK DTA. In addition, a Joint Declaration by UK and Germany provides that the two countries Have reached the following understanding:

1. Improper use of the Convention

Having regard to paragraphs 7 to 12 of the Commentary to Article 1 of the OECD model tax convention, it is understood that this Convention shall not be interpreted to mean that a Contracting State is prevented from applying its domestic legal provisions on the prevention of tax evasion or tax avoidance where those provisions are used to challenge arrangements which constitute an abuse of the Convention.

It is further understood that an abuse of the Convention takes place where a main purpose for entering into certain transactions or arrangements is to secure a more favourable tax position and obtaining that more favourable treatment in these circumstances would be contrary

34 *Bayfine UK v HMRC* (CA).

35 For French guidance, see Bulletin Officiel Des Impôts, 14 B-1-11 “Commentaires de la Convention Fiscale Signée Avec le Royaume-uni le 19 Juin 2008” accessible <http://www11.minefi.gouv.fr/boi/boi2011/14aipun/textes/14b111/14b111.pdf>

to the object and purpose of the relevant provisions of the Convention.

This was based on the commentary..

53.12.4 *The 2011 proposals*

In August 2011 HMRC proposed draft legislation of a kind which has become familiar:

(1) This section applies if, but for provision made by double taxation arrangements. income of a UK resident would be chargeable to relevant UK tax ...

(2) Where the avoidance conditions are met, the provision does not prevent the income being ... chargeable to relevant UK tax ...

(3) The avoidance conditions are.

(a) that a scheme is put in place by one or more persons,

(b) that the provision would not apply to the income in the absence of that scheme, and

(c) that the main purpose, or one of the main purposes, of a person in putting the scheme in place is to ensure that the provision does apply to the income. scheme in place is to ensure that the provision does apply to the income, profits or gains.³⁶

If this were the law, then in general no-one would have any idea whether tax treaty relief applied, and relief would depend to a large extent on HMRC practice. In this respect the anti-avoidance provision is no different from most others introduced since HMRC under the Blair/Brown administrations started its campaign against tax avoidance.³⁷ If the legislation were adopted by our treaty partners, then the availability of foreign tax relief (eg whether UK tax could be set against foreign tax) under a DTA would be similarly unknowable.

The proposed reform was precipitately abandoned. The consultation period expired 22 September 2011, but on 9 September we read:

36 Tax Treaties Anti-avoidance Technical Note (1 August 2011) accessible www.kessler.co.uk. The reader is invited to speculate whether the 1st August publication date was co-incidental. (The 6 week consultation period ought to be extended to exclude the holiday break but that is not the practice.)

37 Eg CGT losses anti-avoidance: see 51.13 (Inter-spouse transfer).

The Exchequer Secretary to the Treasury (Mr David Gauke):

On 1 August HMRC published for consultation a technical note and draft legislation outlining a proposed approach to combating tax avoidance arrangements which exploit the provisions of double taxation agreements. The responses so far received have made it clear that the proposed legislation, as drafted, could cause significant uncertainty for compliant³⁸ UK businesses and overseas investors about its intended scope and its practical effect.

The Government is committed to providing certainty to taxpayers and acknowledges the concerns raised in the responses to the consultation. It has therefore decided not to proceed further with the consultation on the proposed legislation and will not include it in Finance Bill 2012.

What happened? The matter did not take its usual course of consultation, responses and decision. In the absence of an explanation it is tempting to speculate. The most likely explanation is quiet but effective high level lobbying, not by the tax practitioners organisations such as the CIOT (who are mostly ignored, especially in the area of anti-avoidance) but by multinational companies who bypassed HMRC and dealt with ministers.

53.13 Incorporation of DTAs into UK law

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by statute. Accordingly, s.2 TIOPA provides:

- (1) If Her Majesty by Order in Council declares—
 - (a) that arrangements specified in the Order have been made in relation to any territory outside the UK with a view to affording relief from double taxation in relation to taxes within subsection (3), and
 - (b) that it is expedient that those arrangements should have effect, those arrangements have effect.
- (2) If arrangements have effect under subsection (1), they have effect in accordance with section 6.
- (3) The taxes are—
 - (a) income tax,

³⁸ On this usage of the contested word “compliant”, see 41.6.4 (Investment manager condition E: customary remuneration).

- (b) corporation tax,
- (c) capital gains tax,
- (d) petroleum revenue tax, and
- (e) any taxes imposed by the law of the territory that are of a similar character to taxes within paragraphs (a) to (d)...

Section 3(1) TIOPA allows retrospective relief:

Section 2(1) gives effect to arrangements even if the arrangements include—

- (a) provision for relief from tax for periods before the passing of this Act, or
- (b) provision for relief from tax for periods before the making of the arrangements.

Section 3(2) TIOPA extends this:

Section 2(1) gives effect to arrangements even if the arrangements include—

- (a) provision as to income that is not subject to double taxation,
- (b) provision as to chargeable gains that are not subject to double taxation ...

Under s.2 TIOPA a DTA has effect “in accordance with s.6” so we turn to s.6 TIOPA. Section 6(1) provides that DTAs override UK tax legislation:

Subject to this Part and Part 18 of ICTA, double taxation arrangements have effect in accordance with subsections (2) to (4) despite anything in any enactment.

Section 6(2) TIOPA sets out seven matters which a DTA can achieve:

Double taxation arrangements have effect in relation to income tax and corporation tax so far as the arrangements provide—

- (a) for relief from income tax or corporation tax,

This is what one would expect. Section 6(2) continues:

- (b) for taxing income of non-UK resident persons that arises from sources in the UK,

- (c) for taxing chargeable gains accruing to non-UK resident persons on the disposal of assets in the UK,

In practice, as far as I am aware, DTAs are not used to impose taxes.

- (d) for determining the income or chargeable gains to be attributed to non-UK resident persons,
- (e) for determining the income or chargeable gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons,
- (f) for determining the income or chargeable gains to be attributed to UK resident persons who have special relationships with non-UK resident persons, or
- (g) for conferring on non-UK resident persons the right to a tax credit under section 397(1) of ITTOIA 2005 in respect of qualifying distributions made to them by UK resident companies.

Section 6(3) TIOPA provides equivalent rules for CGT:

Double taxation arrangements have effect in relation to capital gains tax so far as the arrangements provide—

- (a) for relief from capital gains tax,
- (b) for taxing capital gains accruing to non-UK resident persons³⁹ on the disposal of assets in the UK,
- (c) for determining the capital gains to be attributed to non-UK resident persons,
- (d) for determining the capital gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons, or
- (e) for determining the capital gains to be attributed to UK resident persons who have special relationships with non-UK resident persons.

53.13.1 *Claims*

Section 6(6) TIOPA provides:

Relief under subsection (2)(a), (3)(a) or (4) requires a claim.

³⁹ Defined by reference in ss(7): “In subsection (3) ‘UK resident person’ and ‘non-UK resident person’ have the meaning given by section 989 of ITA 2007.”

The claim is made on form HS302.

53.14 Interaction of DT reliefs and the remittance basis

The commentary to Art.1 of the OECD model treaty provides:

26.1 Under the domestic law of some States, persons who qualify as residents but who do not have what is considered to be a permanent link with the State (sometimes referred to as domicile) are only taxed on income derived from sources outside the State to the extent that this income is effectively repatriated, or remitted, thereto. Such persons are not, therefore, subject to potential double taxation to the extent that foreign income is not remitted to their State of residence and it may be considered inappropriate to give them the benefit of the provisions of the Convention on such income. Contracting States which agree to restrict the application of the provisions of the Convention to income that is effectively taxed in the hands of these persons may do so by adding the following provision to the Convention:

“Where under any provision of this Convention income⁴⁰ arising in a Contracting State is relieved in whole or in part from tax in that State and under the law in force in the other Contracting State a person, in respect of the said income, is subject to tax by reference to the amount thereof which is remitted to or received in that other State and not by reference to the full amount thereof, then any relief provided by the provisions of this Convention shall apply only to so much of the income as is taxed in the other Contracting State.”

Although this text was only added to the OECD Commentary in 2003, some provision of this kind is standard in UK DTAs. A provision of this kind is included in the US/UK DTA, on which the IRS comment:

For example, if a UK resident who is not domiciled in the UK maintains a brokerage account in Ireland into which is paid \$100 in U.S.-source dividend income, the United States may impose withholding tax at the statutory rate of 30% because the dividend income will not be taxed in

40 Author’s note: This draft refers only to income, but in the UK foreign gains also qualify for the remittance basis so DTAs with a capital gains article generally extend the rule to gains. If the applicable DTA fails to do this then there may be a gap in that gains which are (un)taxed in the UK on the remittance basis are not taxed in the foreign state because of DT relief.

the UK as it has not been remitted to the UK. If the dividend income instead is paid into a brokerage account in London, the UK resident will be subject to tax in the UK and the United States will reduce the rate of withholding tax to 15%.⁴¹

Note that it is US tax, not UK tax, which is in issue here. UK tax issues only arise where the UK has a treaty with another state where the *foreign* state has a remittance basis. The only examples of which I am aware are Ireland⁴² and Japan.

41 Department of the Treasury Technical Explanation of the Convention, accessible www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf

42 Ireland/UK DTA art.6 (Limitation of relief) and art.14(5) (gains).

CHAPTER FIFTY FOUR

FOREIGN TAX CREDIT RELIEF

54.1 Foreign tax credit relief

This chapter considers foreign tax credit relief. For an introduction to DTAs and terminology, see 53.1 (DT reliefs – Introduction).

54.1.1 “*Unilateral relief arrangements*”

Section 8(1) TIOPA provides:

In this Part [Part 2 TIOPA] “unilateral relief arrangements”, in relation to a territory outside the UK, means the rules set out in sections 9 to 17.

I prefer the term “**unilateral tax credit**”, which seems clearer.

54.1.2 “*Tax*”

Section 8(2) TIOPA provides:

In sections 11 to 17, and in Chapter 2 (except section 29) in its application to relief under unilateral relief arrangements, references to tax payable or paid under the law of a territory outside the UK include only—

- (a) taxes which are charged on income and which correspond to income tax,
- (b) taxes which are charged on income or chargeable gains and which correspond to corporation tax, and
- (c) taxes which are charged on capital gains and which correspond to capital gains tax.

Since this is expressed to apply only for the specified sections, the rules have to be set out again in s.9.

54.1.3 “Corresponding to IT, CT or CGT”

Section 8(3) TIOPA provides:

For the purposes of subsection (2), tax may correspond to income tax, corporation tax or capital gains tax even though it—

- (a) is payable under the law of a province, state or other part of a country, or
- (b) is levied by or on behalf of a municipality or other local body.

54.1.4 *Rule 1: unilateral entitlement to credit for non-UK tax*

Section 9(1) TIOPA provides the rule for IT:

Credit for tax—

- (a) paid under the law of the territory,
- (b) calculated by reference to income arising, or any chargeable gain accruing, in the territory,¹ and
- (c) corresponding to UK tax,

is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.

Section 9(2) TIOPA is the equivalent for CGT:

Credit for tax—

- (a) paid under the law of the territory,
- (b) calculated by reference to any capital gain accruing in the territory, and
- (c) corresponding to UK tax,

is to be allowed against any capital gains tax calculated by reference to that gain.

For rule 2 (accrued income profits) see 35.16 (Double taxation relief).

1 For the issue of where income arises, see 15.5 (Trading income of non-resident) or the chapters on the type of income concerned.

54.1.5 “Corresponding to UK tax”

Section 9 TIOPA provides:

- (4) For the purposes of subsection (1)(c), tax corresponds to UK tax if—
 - (a) it is charged on income and corresponds to income tax, or
 - (b) it is charged on income or chargeable gains and corresponds to corporation tax.
- (5) For the purposes of subsection (2)(c), tax corresponds to UK tax if it is charged on capital gains and corresponds to capital gains tax.
- (6) For the purposes of subsections (4) and (5), tax may correspond to income tax, corporation tax or capital gains tax even though it—
 - (a) is payable under the law of a province, state or other part of a country, or
 - (b) is levied by or on behalf of a municipality or other local body.

This repeats s.8(2)(3) and is necessary because those sections do not apply for the purposes of s.9.

54.1.6 *Channel Islands and Isle of Man*

Section 9(7) TIOPA provides:

If the territory is the Isle of Man or any of the Channel Islands, subsections (1)(b) and (2)(b) have effect with the omission of “in the territory”.

Amended as these subsections direct, s.9(1)(2) TIOPA provide:

- (1) Credit for tax—
 - (a) paid under the law of the territory,
 - (b) calculated by reference to income arising, or any chargeable gain accruing, ~~in the territory~~, and
 - (c) corresponding to UK tax,is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.
- (2) Credit for tax—
 - (a) paid under the law of the territory,
 - (b) calculated by reference to any capital gain accruing ~~in the territory~~, and
 - (c) corresponding to UK tax,

is to be allowed against any capital gains tax calculated by reference to that gain.

Since the Channel Islands and the IoM do not have a CGT, it is not immediately obvious what is the role of s.9(2). Maybe it applies where a gain is subject to IT in the Islands but subject to CGT in the UK.

54.1.7 *Rule 3: interaction between DTAs and unilateral tax credit*

Section 11 TIOPA provides:

- (1) Credit for tax paid under the law of the territory is not allowed under section 9 or 10 in the case of any income or gains if any credit for that tax is allowable in respect of that income or those gains under double taxation arrangements made in relation to the territory.
- (2) If credit in respect of an amount of tax may be allowed under double taxation arrangements made in relation to the territory, credit is not allowed under section 9 or 10 in respect of that tax.
- (3) If double taxation arrangements made in relation to the territory contain express provision to the effect that relief by way of credit is not to be given under the arrangements in cases or circumstances specified or described in the arrangements, credit is not allowed under section 9 or 10 in those cases or circumstances.

54.1.8 *Rule 4: Credit for dividends*

Section 12 TIOPA provides:

- (1) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed only if section 13, 14, 15 or 16 so provides.
- (2) If credit is allowed in principle as a result of at least one of sections 14, 15 and 16, any tax in respect of P's profits that is paid by P under the law of the territory is to be taken into account in considering whether any, and (if so) what, credit is in fact to be allowed under section 9 in respect of the dividend.
- (3) If credit is allowed in principle as a result of at least one of sections 15 and 16, there is to be taken into account, as if it were tax payable under the law of the territory, any tax that would be so taken into account under section 63(5) if the recipient of the dividend—
 - (a) directly or indirectly controlled, or

- (b) were a subsidiary of a company that directly or indirectly controlled,
at least 10% of the voting power in P.
- (4) For the purposes of subsection (3), the recipient is a subsidiary of another company if the other company controls, directly or indirectly, at least 50% of the voting power in the recipient.

54.1.9 *Rule 5: credit for tax charged directly on dividend*

Section 13 TIOPA provides:

- (1) This section applies for the purposes of section 12(1).
- (2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if—
 - (a) the overseas tax is charged directly on the dividend (whether by charge to tax, deduction of tax at source or otherwise), and
 - (b) neither P nor the recipient of the dividend would have borne any of that tax if the dividend had not been paid.

That is straightforward.

54.1.10 *Rule 6: credit for underlying tax on dividend paid to 10% associate of payer*

Section 14 TIOPA provides:

- (1) This section applies for the purposes of section 12(1).
- (2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if conditions A and B are met.
- (3) Condition A is that—
 - (a) the recipient of the dividend is a company resident in the UK, or
 - (b) the recipient is a company resident outside the UK but the dividend forms part of the profits of a permanent establishment of the recipient in the UK.
- (4) Condition B is that the recipient—
 - (a) directly or indirectly controls, or
 - (b) is a subsidiary of a company which directly or indirectly controls,
at least 10% of the voting power in P.
- (5) For the purposes of subsection (4), the recipient is a subsidiary of

another company if the other company controls, directly or indirectly, at least 50% of the voting power in the recipient.

54.1.11 *Rule 7: credit for underlying tax on dividend paid to sub-10% associate*

Section 15 TIOPA provides:

- (1) This section applies for the purposes of section 12(1).
- (2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if each of conditions A to C is met.
- (3) Condition A is that—
 - (a) the recipient of the dividend is a company resident in the UK, or
 - (b) the recipient is a company resident outside the UK but the dividend forms part of the profits of a permanent establishment of the recipient in the UK.
- (4) Condition B is that the recipient—
 - (a) directly or indirectly controls, or
 - (b) is a subsidiary of a company which directly or indirectly controls,
 less than 10% of the voting power in P.
- (5) If condition B is met, in subsection (6) "the held percentage" means the voting power in P which is directly or indirectly controlled by—
 - (a) the recipient, or
 - (b) a company of which the recipient is a subsidiary.
- (6) Condition C is that—
 - (a) the held percentage has been reduced below 10%,
 - (b) the recipient shows that the reduction below the 10% limit (and any further reduction)—
 - (i) could not have been prevented by any reasonable endeavours on the part of the recipient, a parent or an associate, and
 - (ii) was due to a cause or causes not reasonably foreseeable by the recipient, a parent or an associate when control of the relevant voting power was acquired, and
 - (c) the recipient shows that no reasonable endeavours on the part of the recipient, a parent or an associate could have restored, or (as the case may be) increased, the held percentage to at least 10%.
- (7) For the purposes of subsection (6) a company is an "associate" if—
 - (a) the company is neither the recipient nor a parent,
 - (b) before the reduction, the voting power in P that is in question

- was controlled otherwise than directly by the recipient, and
- (c) the company is relevant for determining whether, before the reduction, the recipient—
 - (i) indirectly controlled, or
 - (ii) was a subsidiary of a company which directly or indirectly controlled,
 - at least 10% of the voting power in P.
- (8) In subsections (6) and (7) "parent" means a company of which the recipient is a subsidiary.
- (9) In subsection (6) "the relevant voting power" means—
 - (a) the voting power in P as a result of which relief was due under section 14 before the reduction, or
 - (b) if control of the whole of that voting power was not acquired at the same time, that part of the voting power of which control was last acquired.
- (10) For the purposes of this section, the recipient is a subsidiary of another company if the other company controls, directly or indirectly, at least 50% of the voting power in the recipient.

54.1.12 *Rule 8: credit for underlying tax on dividend paid by exchanged associate*

Section 16 TIOPA provides:

- (1) This section applies for the purposes of section 12(1).
- (2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if each of conditions A to C is met.
- (3) Condition A is that—
 - (a) the recipient of the dividend is a company resident in the UK, or
 - (b) the recipient is a company resident outside the UK but the dividend forms part of the profits of a permanent establishment of the recipient in the UK.
- (4) Condition B is that the recipient—
 - (a) directly or indirectly controls, or
 - (b) is a subsidiary of a company which directly or indirectly controls,
 - less than 10% of the voting power in P.
- (5) If condition B is met, in subsection (6) "the held percentage" means the voting power in P which is directly or indirectly controlled by—
 - (a) the recipient, or
 - (b) a company of which the recipient is a subsidiary.

- (6) Condition C is that—
 - (a) the held percentage has been acquired in exchange for voting power in another company ("X"),
 - (b) before the exchange, the recipient—
 - (i) directly or indirectly controlled, or
 - (ii) was a subsidiary of a company which directly or indirectly controlled,
at least 10% of the voting power in X,
 - (c) the recipient shows that the exchange (and any reduction after the exchange)—
 - (i) could not have been prevented by any reasonable endeavours on the part of the recipient, a parent or an associate, and
 - (ii) was due to a cause or causes not reasonably foreseeable by the recipient, a parent or an associate when control of the relevant voting power was acquired, and
 - (d) the recipient shows that no reasonable endeavours on the part of the recipient, a parent or an associate could have restored, or (as the case may be) increased, the held percentage to at least 10%.
- (7) For the purposes of subsection (6) a company is an "associate" if—
 - (a) the company is neither the recipient nor a parent,
 - (b) before the exchange, the voting power in X that is in question was controlled otherwise than directly by the recipient, and
 - (c) the company is relevant for determining whether, before the exchange, the recipient—
 - (i) indirectly controlled, or
 - (ii) was a subsidiary of a company which directly or indirectly controlled,
at least 10% of the voting power in X.
- (8) In subsections (6) and (7) "parent" means a company of which the recipient is a subsidiary.
- (9) In subsection (6) "the relevant voting power" means—
 - (a) the voting power in X as a result of which relief was due under section 14 before the exchange, or
 - (b) if control of the whole of that voting power was not acquired at the same time, that part of the voting power of which control was last acquired.
- (10) For the purposes of this section, the recipient is a subsidiary of another company if the other company controls, directly or indirectly, at least 50% of the voting power in the recipient.

54.1.13 *Rule 9: credit in relation to dividends for spared tax*

Section 17 TIOPA provides:

- (1) Subsection (2) applies if—
 - (a) under the law of the territory, an amount of tax ("the spared tax") would, but for a relief, have been payable by a company resident in the territory ("company A") in respect of any of its profits,
 - (b) company A pays a dividend out of those profits to another company resident in the territory ("company B"),
 - (c) company B, out of profits which consist of or include the whole or part of that dividend, pays a dividend to a company resident in the UK ("company C"), and
 - (d) the circumstances are such that, had company B been resident in the UK, it would have been entitled, as a result of the operation of section 20(2) in relation to double taxation arrangements made in relation to the territory, to treat the spared tax for the purposes of Chapter 2 as having been payable.
- (2) The spared tax is to be taken into account—
 - (a) for the purposes of sections 9 to 16, and
 - (b) subject to section 31(4), for the purposes of Chapter 2 in its application to relief under these rules in relation to the dividend paid to company C,as if it had been payable and paid.
- (3) References in these rules and that Chapter—
 - (a) to tax payable or chargeable, or
 - (b) to tax not chargeable directly or by deduction,are to be read in accordance with subsection (2).
- (4) Except as provided by subsection (2), in relation to any dividend paid—
 - (a) by a company resident in the territory,
 - (b) to a company resident in the UK,credit as a result of these rules is not to be given under section 63(5) in respect of tax which would have been payable under the law of the territory, or under the law of any other territory outside the UK, but for a relief.
- (5) Subsection (4) has effect despite any double taxation arrangements—
 - (a) made in relation to the territory, or
 - (b) made in relation to any other territory outside the UK,which make provision about a relief given, under the law of the territory in relation to which the arrangements are made, with a view to

promoting industrial, commercial, scientific, educational or other development in a territory outside the UK.

(6) In this section "these rules" means sections 9 to 16 and this section.

54.1.14 *Quantum of income/gains*

The INT Manual provides:

165030 Computation – assessable amount [January 2011]

Where credit is claimed against UK Income Tax for foreign tax paid on income from a foreign source, the amount of that income for all UK tax purposes is:

a) Foreign income assessable on the arising basis

No direct foreign tax is to be deducted. Where, exceptionally, the double taxation agreement provides for relief for underlying tax on a dividend (see INTM164410) the underlying tax should be added to the amount of the income. Treat the whole of a foreign pension as chargeable to UK tax notwithstanding the deduction of one tenth under Section 65(2) ICTA 1988.

Example:

An individual receives a dividend of 100 from which 15 foreign withholding tax was deducted. The amount of income assessable is 100.

b) Foreign income assessable on the remittance basis

Add the amount of direct foreign tax attributable to the amount of income remitted. Where, exceptionally, the agreement provides for relief for underlying tax on a dividend (see INTM164410), the underlying tax should also be added to the amount of the dividend remitted. If you have difficulty in determining the amount of foreign tax attributed to income remitted, refer to the Personal Tax Team International - Advisory (part of Charity, Assets & Residence).

Example

[Gross foreign income]	£1,000
Foreign tax	£400
Net foreign income	<u>£600</u>
Remitted to UK	<u>£300</u>

UK measure of the income

Income remitted	£300
Plus foreign tax ($300/600 \times 400$)	<u>£200</u>
Therefore UK measure is	<u><u>£500</u></u>

This summarises the rules in s. 31, 32 TIOPA.

Similarly for CGT; the INT Manual provides:

169080. Remittance basis [January 2011]

An individual who is resident or ordinarily resident but not domiciled in the UK and who makes a chargeable gain on the disposal of an asset situated outside the UK is only liable on the amount of the gain received in the UK (Section 12 TCGA 1992 see CG25300 onwards). When such an individual is chargeable on the gain received in the UK and claims credit for foreign tax charged on the same gain, the liability in the UK will be on the sum of the amount remitted to the UK plus the foreign tax attributable to the amount remitted.

Any difficulty in determining the correct addition for the foreign tax, should be referred to Personal Tax International (part of Charity, Assets & Residence).

54.1.15 HMRC practice: quantum of relief

The INT Manual provides:

169100. Amount of foreign tax credit relief – general [January 2011]

Similar principles to those set out in INTM161210 onwards for Income Tax apply to Capital Gains Tax. The amount of credit for foreign tax is not to exceed the lesser of the foreign tax charged on the foreign gain and the UK tax charged on the doubly taxed gain at the taxpayer's marginal rate.

If the foreign tax exceeds the UK tax, the excess can neither be deducted from the amount of the gain chargeable to Capital Gains Tax, nor can it be repaid.

The foreign tax should not be increased by any indexation allowance.

A taxpayer's marginal rate for Capital Gains Tax is the rate at which the tax is charged for the year of assessment.

169110. Amount of foreign tax credit relief – more than one gain [January 2011]

The amount of foreign tax credit relief must be calculated separately for each gain. An excess of foreign tax over UK tax on one gain cannot be credited against UK tax on another foreign gain or on the gain on the disposal of a UK asset.

169120. Amount of foreign tax credit relief – losses [September 2011]

Allowable losses should be set firstly against chargeable gains on which no foreign tax credit relief is due. It would normally be to the taxpayer's advantage to set any balance of losses, in order, against the gains on which the lowest level of foreign tax has been paid. This should secure

the maximum amount of foreign tax credit relief.

169130. Amount of foreign tax credit relief – exemption from tax
[September 2011]

Where the total of the chargeable gains in any year of assessment exceeds the exempt amount provided by TCGA 1992 Section 3, the exempt amount should, as far as possible, consist of gains on which no foreign tax has been charged. This will enable credit for foreign tax charged on the gains to be allowed against the UK Capital Gains Tax charged on those gains.

The following example demonstrates the application of this paragraph and of INTM169120

In 2009–10, an individual has the following chargeable gains:

UK	£10,000	
Country X	£20,000	Foreign tax £2,000
Country Y	£6,000	Foreign tax £2,700

He has losses of £6,000 available for deduction. The exemption limit for 2009–10 is £9,600. The computation of his liability is as follows:

	UK Gain	Country X Gain	Country Y Gain
	£10,000	£20,000	£6,000
Less Loss	£6,000		
	<u>£4,000</u>	<u>£20,000</u>	<u>£6,000</u>
Less Exempt Amount	£4,000	£5,600	
	<u>0</u>	<u>£14,400</u>	<u>£6,000</u>
Tax at 18%	0	£2,592	£1,080
Less FTCD	0	£2,000	£1,080
Tax Payable	<u>Nil</u>	<u>£592</u>	<u>Nil</u>

The balance of Country Y's tax of £1,620 (2,700 less 1,080) cannot be set off against the Capital Gains Tax payable on the Country X gain and cannot be repaid.

169140. Amount of foreign tax credit relief – extent to which a gain is doubly taxed [January 2011]

As mentioned in INTM169100, credit for foreign tax cannot exceed the UK tax due on the doubly taxed gain. There may be situations where the amount of the UK gain is different from the amount of the gain that is taxed in the other country; or where the period of ownership of the asset that is taken into account in computing the UK gain is different from the period of ownership of the asset that is taken into account in computing the gain in the other country. In either case, the amount of the foreign tax allowable for foreign tax credit relief may need to be restricted. For further details on this, see CG14395 –CG14425.

169150. Amount of foreign tax credit relief – basis of allowance
[September 2011]

Credit may be claimed for the foreign tax paid on foreign capital gains against the UK tax due on the same gain, irrespective of the tax year in which the foreign tax is charged.

Where credit is claimed on any other basis or where there are difficulties in determining the amount of foreign tax credit relief due, advice may be sought from Personal Tax International (part of Charity, Assets & Residence).

However HMRC changed their minds in Brief 17/10:

Introduction

The purpose of this brief is to publicise a change to the established practice of restricting the amount of Foreign Tax Credit Relief (FTCR) that can be deducted when calculating the amount of UK tax due on a chargeable gain.

Background

Where a gain is chargeable to UK Capital Gains Tax or UK Corporation Tax and the same gain has also been taxed in another country then FTCR can be claimed in respect of the foreign tax paid.

Our practice has been to restrict the amount of FTCR if different periods of ownership of the asset are considered when arriving at the gain assessable in the UK and the foreign gain, or if the amount of the UK gain is less than the foreign gain.

We have reconsidered our view and are revising our practice so that the whole of the foreign tax is allowable as FTCR up to the amount of the UK tax on the gain.

The current practice

The established practice has been to restrict the amount of FTCR in the following two situations:

Situation one

The amount of gain charged to foreign tax may be calculated by reference to a longer period of ownership than the period on which the gain charged to UK tax is based. The most common instance is where assets were acquired before the 31 March 1982 and the gain chargeable in the UK is based only on the period from 31 March 1982 onwards. In such cases the established practice has been to restrict the FTCR due by the following calculation:

$$((\text{period of time assessed by UK}) \div (\text{period of time assessed by foreign authority})) \times \text{foreign tax} = \text{allowable FTCR}$$

For example, where the asset was acquired on 31 March 1971 and disposed of on 31 March 1993, with foreign tax of £10,000 charged then the maximum amount of FTCR would be restricted as follows:

31 March 1993 minus 31 March 1982 equals 11 years
 Divided by 31 March 1993 minus 31 March 1971 equals 22 years
 multiplied by £10,000 equals £5,000

Situation two

Where the gain charged in the UK is less than the gain charged to foreign tax, the established practice has been to restrict the maximum amount of FTCD due by the following calculation:

(amount of UK assessment) ÷ (amount of foreign assessment)
 multiplied by foreign tax = allowable FTCD

For example, where

the UK assessed a gain of £55,000,

the gain charged to foreign tax was £75,000 and

the foreign tax was £15,000 then the FTCD would be restricted as follows:

$(£55,000 \div £75,000) \times £15,000 = £11,000$

How we intend to implement the revised practice

From 19 March 2010 the practices described above that restrict the allowable FTCD will end. In all cases where FTCD is claimed against UK tax on chargeable gains, the whole of the foreign tax will be allowable up to the amount of the UK tax on the gain, provided that the gain charged in both countries relates to the same disposal.

In the examples above, the maximum allowable FTCD would now be the full £10,000 of foreign tax in the first case and the full £15,000 of foreign tax in the second, provided, in each case, that this amount was less than or equal to the UK tax.

This change will bring the chargeable gains practice in line with the Income Tax practice, which does not restrict the amount of FTCD allowed where the amount assessed in the UK is less than the amount of income assessed to foreign tax.

Implications

If tax returns were submitted with a claim to FTCD on the basis that the FTCD should be restricted, and those returns are still open or within the self-assessment window for amendment, they may be amended to reflect the change in practice. In other cases where FTCD has been restricted a claim can be made for additional relief within the normal time limits...

See too 52.9 (Tax credit relief: currency conversion date).

54.2 Foreign tax credit relief: property income

The Property Income Manual provides:

PIM4705 - Rent from property outside the UK: CT [February 2006]
Credit for foreign tax

If the overseas income has suffered foreign tax and a claim to tax credit relief is made, it will be necessary, for the purposes of the source by source rule (see INTM161210) to identify the amount of UK tax attributable to income from each particular property. Where, therefore, tax credit relief is claimed separate computations of profits and losses for each property will be required. For the purposes of calculating tax credit relief, losses should be deducted in the order most favourable to the company's claim. Normally this will mean that losses should be allocated first against the source which has suffered at the lowest rate of foreign tax.

A company's flexibility in deciding how to allocate the deduction set out in Section 797(3) ICTA 1988, subject to the limitations in respect of deficits on non-trading loan relationships set out at Section 797(3)(A) and (B) ICTA 1988, is unaffected by any of the changes.

54.3 CGT/IT computation deduction

Section 112 TIOPA provides:

112 Deduction from income for foreign tax (instead of credit against UK tax)

(1) The amount of any income arising in any place outside the UK is reduced for the purposes of the Tax Acts—

- (a) by any amount which has been paid in respect of non-UK tax² on that income in the place where the income arose, or
- (b) if subsection (2) applies, by the lesser amount mentioned in that subsection.

(2) This subsection applies if credit would, were it allowable in respect of the income, be reduced under section 39 (reduction by reference to accrued income losses) to the lesser amount given by section 39(5).

(2A) But if X is less than Y, an amount equal to the difference between X and Y must be subtracted from the amount by which any income of a person ("the relevant income") is reduced under subsection (1)(a).

(2B) In subsection (2A)—

X is the amount of the relevant income that the person would (disregarding this section) be required to bring into account for income tax or corporation tax purposes, less any deduction that the person would

² Section 112(6) TIOPA provides a commonsense definition: "In subsection (1) "non-UK tax" means tax under the law of a territory outside the UK."

be allowed to make for the amount paid in respect of non-UK tax, and Y is the amount of the relevant income (that is to say, the amount on which the amount in respect of non-UK tax is paid).

Credit must be given for a foreign tax repayment:

- (3) If—
 - (a) income of any person (“P”) is reduced under subsection (1) by an amount paid in respect of tax on that income in the place where the income arose, and
 - (b) a payment is made by a tax authority to P, or any person connected³ with P, by reference to that tax, the amount of P’s income is increased by the amount of the payment.
- (4) Subsection (1)—
 - (a) has effect subject to section 31(2)(a) (no deduction for foreign tax if credit allowed and UK tax calculated otherwise than by reference to the amount received in the UK),
 - (b) has effect subject to section 143(5) and (6) (no deduction for special withholding tax if UK tax calculated otherwise than by reference to the amount received in the UK),
 - (c) does not apply to income the tax on which is to be calculated by reference to the amount of income received in the UK, and
 - (d) does not require any income to be reduced by an amount of underlying tax which, under section 60(3), is to be left out of account for the purposes of section 57.

Section 113 TIOPA has the equivalent rule for CGT:

113 Deduction from capital gain for foreign tax (instead of credit against UK tax)

- (1) Subsection (2) applies to tax if it is—
 - (a) chargeable under the law of any territory outside the UK on the disposal of an asset, and
 - (b) borne by the person making the disposal.
- (2) The tax is allowable as a deduction in the calculation of the gain.
- (3) Subsection (2) is subject to—
 - (a) Chapters 1 and 2 so far as they apply for corporation tax purposes (see, in particular, section 31),

³ Defined s.112(7) TIOPA: “For the purposes of subsection (3), whether a person is connected with P is determined in accordance with section 1122 of CTA 2010.”

- (b) Chapters 1 and 2 so far as they apply for capital gains tax purposes (see, in particular, section 31), and
 - (c) section 143 (which includes provision about taking account of special withholding tax when calculating a gain for capital gains tax purposes).
- (4) In subsection (1) “asset” and “disposal” have the same meaning as in TCGA 1992 (see, in particular, section 21 and the following provisions of TCGA 1992).

Thus foreign tax credit relief (if claimed) has priority over an IT/CGT computation deduction.

At first sight it is not obvious when an IT/CGT computation deduction would be better than foreign tax credit relief. One case is where foreign CGT is payable but UK CGT is not (because of a difference in valuation rules or because some UK relief applies). In such a case the computation deduction may increase the loss allowable for UK CGT purposes (similarly for IT). But that must be a rare case.

The INT Manual provides:

169090. Deduction not credit [June 2011]

A deduction for the foreign tax should be made in the computation of the gain or loss when there is no claim to foreign tax credit relief or when no UK tax is chargeable on a gain; for example, when the UK computation shows a loss on the disposal and consequently there is no UK tax against which credit for any foreign tax can be given. No deduction is due, however, when credit relief is claimed, for any part of the foreign tax paid on a gain which does not qualify for credit because it exceeds the UK tax chargeable on the same gain.

INT Manual provides:

161050. Deduction instead of credit [September 2011]

It may sometimes be to the taxpayer's advantage not to make a claim to tax credit relief, for example where a business's trading profits are wholly covered by capital allowances so that there is no Income Tax or Corporation Tax payable on those profits, or where the trading results show a loss. If, for any reason, tax credit relief is not claimed, the foreign tax paid must be deducted from the income from the foreign source in computing the amount of the income for UK tax purposes (Section 112 ICTA 1988). This may serve to create or increase a loss which can be dealt with under the normal provisions for losses.

Section 112 refers to ‘any sum which has been paid in respect of non-UK tax’ on income. This means tax alone and not, for example, interest paid in the foreign country for late payment of the foreign tax. Nor may a deduction be allowed for ‘tax spared’ (INTM161270) as it is not tax which has been paid; nor for underlying tax (INTM164060 and INTM164360) as it is not paid on the dividend in question; nor for taxes similar to UK VAT (see, however, INTM161080). Refer to Business International (Outward Investment Team), any case where it is not clear that the tax for which a deduction is sought under Section 112 is a tax on income.

Section 112 allows a deduction for foreign tax paid on income ‘in the place where the income arose’. Refer to Business International (Outward Investment Team), any case where a deduction is sought for foreign tax paid on income which arises wholly or partly from work carried out in the UK.

Some foreign taxes, if not deductible under sections 112 to 115, may still be allowable expenses in computing the profits of a trade or profession (see INTM161080, BIM45900 onwards).

CHAPTER FIFTY FIVE

DTAs: INTERACTION WITH UK TAX LEGISLATION

55.1 Indirect DT reliefs

This chapter considers the interaction of DTAs and UK tax provisions, especially anti-avoidance legislation.

For an introduction to DTAs and terminology, see 50.1 (DT reliefs – Introduction).

55.1.1 *Third party claiming DT exemption*

Article 1 OECD Model provides:

This Convention shall apply to persons who are residents of one or both of the Contracting States.

DT exemptions are not in principle restricted to the person to whom the income/gains accrue. Where a DT provides that income of a person treaty-resident in the foreign state shall be taxable only in the foreign state, a settlor or transferor who is treaty-resident in the UK cannot be taxable on that income. Sections 2 and 6 TIOPA authorise DT exemptions to apply in this way, for they simply provide “relief”, ie relief for anyone.¹ I refer to this as “**indirect DT exemption**”.

This is self-evident, but authority can be cited if necessary. In *Lord Strathalmond v IRC*,² US source income arose to Lady Strathalmond. The

1 One might also refer to s.6(2)(f) TIOPA; but DTAs usually take the form of providing relief, rather than the form of disattributing income otherwise attributable to a settlor or transferor.

2 48 TC 537.

rule at that time (only repealed in 1988) was that income of a married woman was deemed to accrue to her husband, so in the absence of treaty relief, Lord Strathalmond would have been taxable. The wife was treaty-resident in the USA but the husband was treaty-resident in the UK. Nevertheless he was entitled to DT exemption. The treaty exempted the income, not the treaty-resident individual, so a third party otherwise taxed on the income could claim the benefit of treaty relief even though not treaty-resident in the USA. Lord Millett summarised the point:

[*Strathalmond*] shows that the relief from UK tax accorded by a double taxation agreement can enure for the benefit of a third party.³

Again, in *Padmore v IRC*⁴ a partner was entitled to DT exemption on income of a Jersey partnership where the partnership was a person treaty-resident in Jersey but the partner was not.

I stress this because there is a comment to the contrary by the Special Commissioner in *IRC v Willoughby*⁵ but that must be dismissed as erroneous.

Indirect DT exemption is restricted in the case of trading income: see 15.20.3 (Treaty override for trading income).

55.1.2 *Third party claiming foreign tax credit relief*

The position is the same for DTA tax credit. The position is the same for unilateral tax credit, because s.9(1) TIOPA allows “relief” or “credit” ie relief and credit for anyone.

SP 6/88 provides:

Double taxation relief: chargeable gains

[The SP cites the relevant statutory provisions and continues:]

3 The principal requirement for the granting of credit for overseas tax against liability to capital gains tax (or corporation tax on chargeable gains) is therefore that the overseas tax should be computed by reference to the same gain as the UK tax. There is no requirement that the respective tax liabilities should arise at the same time nor that they

3 *Bricom v IRC* 70 TC 272 at p.290.

4 62 TC 352.

5 [1995] STC 143 at p.169.

should be charged on the same person.

The SP gives four examples:⁶

4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and TA 1988 s 790 and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains.

- (i) The overseas tax charges capital gains as income.
- (ii) Overseas tax is payable on a disposal falling within TCGA 1992 s 171 (transfers within a group of companies treated as taking place on a no gain/no loss basis) and a liability to UK tax arises on a subsequent disposal.⁷
- (iii) An overseas trade carried on through a branch or agency is domesticated (ie transferred to a local subsidiary) and relief is given under TCGA 1992 s 140. There is a subsequent disposal of the securities (or the subsidiary disposes of the assets within six years) giving rise to a liability to UK tax and overseas tax is charged in whole or in part by reference to the gain accruing at the date of domestication.⁸
- (iv) Overseas tax is payable by reference to increases in the value of

6 INTM 169040 gives a fifth example, where "overseas tax is payable in its country of residence by a non-resident company on the disposal of an asset and in the UK the gain is charged on a UK resident individual under s.13 TCGA". See 55.8 (Foreign tax credit: s.13 TCGA).

7 The former ITH para 619 explains the point more clearly: "A similar situation could occur with transfers under Section 171 TCGA 1992 between UK group companies. If the assets involved are situated abroad and the foreign tax authority taxes the UK company making the transfer, the benefit of that tax can be taken by the transferee group company when there is a disposal outside the group generating a UK tax charge on the relevant asset."

8 The former ITH para 619 explains the point more clearly: "An example of this situation is found in Section 140 TCGA 1992 which deals with the charge on capital gains where a branch or agency overseas is domesticated, that is to say transferred to a non-resident company in exchange for shares. In those circumstances a charge on the gains on branch assets transferred is deferred until either the transferor sells the shares or the transferee sells the assets (in the latter case the sale has to be within six years of the acquisition). In that latter instance where the transferee sells the asset, any foreign tax on the gains is paid by the transferee. But the UK company is charged in respect of the capital gains on those same assets and qualifies for credit relief because the gain has been taxed abroad, although the tax has actually been charged on the transferee."

assets although there has been no disposal. There is a subsequent disposal of the assets on which a liability to UK tax arises.

5 It will be seen that relief is conditional upon the subject of the overseas tax being identified with the gains on which the UK tax liability arises. In contrast, where roll-over relief is claimed, for example under TCGA 1992 s 152, the gain on disposal of the old asset is not subjected to UK tax. The gain on realisation of the new asset remains a gain separate from that realised on sale of the old asset and overseas tax payable as a result of the sale of the old asset is not creditable against UK tax payable on the gain realised on sale of the new asset. However, in such circumstances [s.113 TIOPA] allows the overseas tax to be claimed as a deduction in computing the gain for roll-over relief purposes.

This raises the issue of characterisation.

55.2 Characterisation

DT reliefs provide relief for particular types of income, and so relief only applies if the taxpayer receives that type of income. The characterisation of income in the hands of the UK taxpayer is a central question. I refer to this as “**the characterisation issue**”.

*Hughes v Bank of New Zealand*⁹ concerned exemption for interest on FOTRA securities, not a DTA, but the characterisation issue is not restricted to DT reliefs: it can arise wherever an exemption applies to a particular type of income. This case concerned a non-resident bank with a UK branch. The branch’s profits were taxable. The branch’s trading receipts included interest from FOTRA securities (exempt from UK tax in the hands of a non-resident). The interest retained its exemption.¹⁰ Lord Millett summarised:

[*Hughes*] is authority for the proposition that exempt interest retains its character as interest even when it is taxable as a component element of the recipient’s trading profits. ... Interest from exempt securities does not cease to be such by being included as a component element of the

9 21 TC 472.

10 The law has changed and nowadays the FOTRA exemption is restricted so as not to apply in this type of case. But that does not alter the general principle.

recipient's taxable profit.¹¹

On the other side of the line, according to Lord Millett, is *IRC v Australian Mutual Provident Society*.¹² This concerned a non-resident life assurance company with a UK branch. The branch's profits were taxable. The taxable profits were calculated in an unusual way: the relevant rule provided that an unidentifiable portion of the world-wide income of the company derived from the investment of its life assurance fund, calculated in accordance with a mathematical formula, should be charged to tax as income derived from business in the UK. It was held that the rule did not tax the company's investment income as such but something different, described as "a conventional sum calculated in accordance with the rule"; the sum to be taxed was not interest, even though interest from FOTRA securities constituted one of the elements in the calculation.

Millett LJ summarised:

... the question turns on the nature of the statutory process... where tax is charged on a conventional or notional sum which exists only as the product of a calculation, the fact that one of the elements in the calculation is measured by reference to the amount of exempted income does not make the exempted income the subject of the tax: *Australian Mutual Provident Society*.¹³

The characterisation issue often arises in cases where indirect DTA exemption is sought (though it is not restricted to such cases). Assuming the income in the hands of the treaty-resident recipient third party qualifies for DT relief, is the income which the UK taxpayer receives (or better, is deemed to receive) the *same* income? Or has the income "changed its character" (in which case DT reliefs do not apply)?

IRC v Willoughby offers an example. Here the transferor ("T") paid a premium to a life assurance company which was treaty-resident in the Isle of Man. Under s.720 T was (in principle) subject to tax on the income arising to the life assurance company from the premium. The IOM DTA provided relief for the commercial profits of the life assurance company;

¹¹ *Bricom v IRC* 70 TC 272 at p.290.

¹² 28 TC 388 "as explained by Lord Radcliffe" in *Ostime v Australian Mutual Society* [1960] AC 459 at p.479, 38 TC 492.

¹³ *Bricom v IRC* 70 TC 272 at p.290..

but the income on which T was subject to tax could not be characterised as the commercial profits of the life assurance company; T's income was merely one (in the context of the whole, trivial) element by reference to which those profits were computed. So for this reason (there could be others) T could not claim indirect DTA exemption.¹⁴

55.2.1 *The correct approach to characterisation*

Suppose:

- (1) Income accrues to A ("A's actual income").
- (2) A statutory provision ("the deeming provision") provides that income is deemed to accrue to B ("B's deemed income").

The deeming provision may or may not change the character of the income, that is, B's deemed income may or may not be a different type from A's actual income. It is a question of construction of the deeming provision.

The question is similar to the question of whether an entity is classified as transparent or opaque¹⁵ but here the focus is on the deeming provision rather than on the nature of the entity.

In straightforward cases, where B's deemed income is exactly equivalent to A's actual income, it is suggested that the courts should normally conclude that the legislation does not change the character of the income. That is, if there is a change in the character of the income, the legislation needs to say so expressly or by implication. One reason that this is the case is that otherwise there would be a breach of the treaty. If a DTA provides income is exempt, Parliament may breach the treaty in a straightforward manner and provide that the income is still taxable. Parliament may also breach the treaty in a more subtle manner, by recharacterising the income and taxing it under its new name. However that is still a breach of the treaty. DTAs are not construed so technically. While the UK can breach a treaty, tax legislation should be construed in a treaty-consistent manner where possible.

A second reason is that in a simple case where B's deemed income is exactly equivalent to A's actual income, there is no rational distinction to be drawn between A's income and B's deemed income.

¹⁴ Though this is not quite the way that the Special Commissioner dealt with the point: 70 TC 57 at p.90. The taxpayer wisely did not appeal on the DTA issue.

¹⁵ See 79.1.1 ("Transparent" and "opaque").

This is consistent with a purposive approach. Lord Steyn said:

The tendency should therefore generally speaking be against literalism. What is literalism? It will depend on the context. But an example is given in *The Works of William Paley*... the tyrant Temures promised the garrison of Sebastia that no blood would be shed if they surrendered to him. They surrendered. He shed no blood. He buried them all alive. This is literalism. If possible it should be resisted in the interpretative process.¹⁶

It is worth stepping back to remember that the purpose of double tax treaties is to allocate taxing rights between countries.

55.2.2 *Bricom*

Bricom v IRC concerned a claim for indirect DT exemption where:

- (1) Income accrued to a subsidiary company treaty-resident in a foreign state (“the CFC”).
- (2) The parent company (“the parent”) was domestic-law UK resident and not treaty-resident in a foreign state.
- (3) The parent was subject to tax under the Controlled Foreign Company (“CFC”) provisions.

The CFC provisions operate in three stages:

Stage 1. *Ascertainment*: the CFC’s chargeable profits are ascertained.
Stage 2. *Apportionment*: the CFC’s chargeable profits (less any creditable tax) are apportioned among its shareholders. In *Bricom* the CFC was a wholly-owned by the parent, so all its chargeable profits were attributed to the parent.

16 *Sirius International Insurance v FAI General Insurance* [2004] 1 WLR 3251 at [19]. But for a defence of Temures see Goldberg, “The Problem is the Perception” GITC Review Vol. 4 No. 2 accessible www.taxbar.com (“Of course, the garrison should have been advised by a lawyer before accepting the surrender terms.”)

Stage 3. *Assessment*: The parent is assessed on “a sum equal to corporation tax at the appropriate rate on that apportioned amount of profits” (less the apportioned amount of creditable tax) and the sum assessed is recoverable from the parent “... as if it were an amount of corporation tax chargeable on the parent”.

The Special Commissioners held that interest received by the CFC lost its character as interest at stage 1. Millett LJ disagreed:

It is ... a reflection of the Revenue’s unsuccessful argument in *Hughes*, viz: that interest from exempt securities loses its character as income by being included in the computation of the recipient’s trading profits.

So far so good. But the interest lost its character at stage 2:

The correct analysis is that the interest received by [the CFC] is not included in the sum apportioned to the taxpayer on which tax is chargeable. It merely provides a measure by which an element in a conventional or notional sum is calculated, and it is that conventional or notional sum which is apportioned to the taxpayer and on which tax is charged. ...

Bricom was on the wrong side of the distinction because “the chargeable profits” as defined by s.747(6)(a) are *a notional sum*. Why are they more notional than the profits of any company?

They do not represent any profits of [the CFC] on which UK corporation tax is chargeable, for there are no such profits.

Obviously correct, but not relevant. The question is not whether the CFC income of the parent represents profits of the CFC *on which UK corporation tax is chargeable*. The question is whether it represents the profits of the CFC (or more accurately, whether its type is the same as those profits). The judgment then turns to this:

Nor do they represent any actual payments or receipts of [the CFC], whether of interest or anything else.

Why not?

They are merely the product of a mathematical calculation made on a hypothetical basis and making counterfactual assumptions.¹⁷ The “chargeable profits” which are defined by s.747(6)(a) exist only as a measure of imputation. What is apportioned to the taxpayer and subjected to tax is not [the CFC’s] actual profits but a notional sum which is the product of an artificial calculation.

The mere fact that taxable profits are ascertained by a mathematical calculation does not by itself change the character of the profits. The amount of profits on which tax is charged is in every case the product of a mathematical calculation.¹⁸

Bricom is authority for the following propositions:

- (1) The application of DT reliefs requires that the income of the taxpayer is the same income as that which qualifies for relief. (This is right and could not be doubted.)
- (2) The characterisation issue is a matter of construction of the relevant provisions.
- (3) The CFC provisions specifically did alter the character of the income received by the parent.¹⁹ This decision does not, it is submitted, shed a great deal of light on the question of construction of the other provisions considered in this chapter.

One would like to think that the unfairness of *Bricom* was a factor in the ECJ decision that the CFC legislation was contrary to EU law.²⁰ That would have been just.

55.2.3 *Four types of deeming*

Tax provisions often use the word “deem” or its plain English equivalent, “treated as”. When considering the characterisation issue in relation to deeming provisions, it is important to bear in mind that there are several different fictions that deeming provisions may be used to achieve:

- (1) *Deeming which changes the recipient*: Statute may deem that whereas

17 Millett wisely does not state what the hypothetical and counterfactual assumptions are: one must assume that the CFC is UK resident.

18 For CGT the tax charge is on gains less losses; for IT the charge is on total income.

19 I do not consider how convincing is the reasoning, but note that in France the opposite view was reached: *Re Société Schneider Electric* (2002) 4 ITLR 1077 (Conseil d'Etat).

20 See 56.5 (Public policy exemption).

income actually arose to A, it is deemed to arise to B.

- (2) *Deeming which changes the timing*: Statute may deem that whereas income actually arose at one time, it is deemed to arise at another time.
- (3) *Deeming which changes quantum*: Statute may deem that whereas the amount of income which actually arose to A was £x, it is deemed to be of a different amount, £y.
- (4) *Deeming which changes character*:
 - (a) Statute may deem that whereas income which actually arose was of type A, the taxpayer is deemed to receive income of another type (type B).
 - (b) Statute may deem that whereas what arises is gains, it is deemed to be income.
 - (c) Statute may deem that whereas no income or gains arise to anyone, the taxpayer is deemed to receive income or gains.

Case (1) does not by itself change the character of the income. This is (I think) self-evident, but there is authority:

Exempt income does not change its character or lose its exemption merely because it is deemed to be the income of another person or is imputed to him: *Strathalmond*.²¹

The same applies if the UK provision apportions income to the taxpayer: “apportion” has the same meaning as “deems to accrue to” or “impute”.²² The term “attribute” is also the same.²³

Likewise in cases (2) and (3) DT reliefs will still apply.

In case (4)(a) DT relief applicable to type A income only (not type B income) will not exempt the taxpayer. Cases (4)(b)(c) need further consideration.

So the mere fact that the legislation uses the terminology or technique of deeming does *not* mean that DT reliefs cease to apply. One must ask what is the deeming, and in particular, is it deeming which changes the character of the income?

In *Huitson* the point is correctly stated but in somewhat pejorative

²¹ *Bricom v IRC* 70 TC 272 at p.290.

²² *Bricom v IRC* 70 TC 272 at p.290.

²³ The terms “apportion” and “attribute” are used synonymously in s.13 TCGA; see 50.3 (Attribution of gains to participator).

language:

[The DTA] issue has spawned a somewhat metaphysical debate as to whether the “notional” income under section 739 is different from the “real” income in the hands of the foreign resident, so that taxation of the “notional” does not conflict with relief of the “real”.²⁴

The debate should be no more metaphysical than any question raised by deeming provisions, which are very common in taxation, but it has perhaps been confused by an argument based on the words “an amount equal to”.

55.2.4 “An amount equal to” the income

In Bricom:

The taxpayer lays stress on the fact that what is apportioned under s.747(3) is not “a sum equal to the chargeable profits” but the chargeable profits themselves; and that the subject of the charge to tax in s.747(4)(a) is not “a sum equal to the apportioned part of the chargeable profits” but the apportioned part of the chargeable profits itself.

The distinction proposed is between statutory provisions referring to “the profits” provisions referring to “an amount equal to the profits.” The taxpayer (it seems) raised this distinction but it did not help. The characterisation of income may be altered even though the statute does not use the expression “an amount equal to”. That is, the absence of that expression does not determine the characterisation issue. Conversely, the use of the expression “an amount equal to” does not conclude the characterisation issue. While it is apt to describe a change of character, it does not necessarily do so. The issue is one of construction, and must be decided in the context of the provisions as a whole. I identify below some cases where this phrase is used without changing the character of the income. Indeed, a distinction between income and “an amount equal to” the income strikes me as a distinction without a difference, a foolish

²⁴ *R oao Huitson v HMRC* [2010] STC 715 at [64]. The point was not discussed in the Court of Appeal.

distinction to introduce into tax jurisprudence, which is bound to lead to confusion, muddle and uncertainty.

55.3 DT reliefs and gains of remittance basis taxpayer

After this lengthy theoretical discussion, we can turn to some practical questions. Section 12 TCGA provides:

- (1) This section applies to foreign chargeable gains accruing to an individual in a tax year (“the foreign chargeable gains”) if—
 - (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
 - (b) the individual is not domiciled in the UK in that year.
- (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
- (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year.

Art.13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Suppose:

- (1) a remittance basis taxpayer is domestic-law UK resident and treaty-resident in a state with a standard capital gains article.
 - (2) the taxpayer receives gains which are in principle subject to CGT.
- Can the individual claim DT relief? This raises a characterisation issue. (The individual is not claiming indirect treaty relief but as noted, the characterisation point is not restricted to that.) However, everyone agrees that DT exemption applies to gains taxable on the remittance basis. Section 12(2) TCGA imposes a deeming which changes timing, that is, the gains which actually accrue on disposal are deemed to accrue when remitted. Section 12(3) imposes a deeming which changes the amount. The character of the gains is not altered. That is, the chargeable gains which are “treated as accruing” are the actual gains which accrued to the individual, and not different (notional) gains.

55.3.1 *Timing: interaction with remittance basis*

DT relief requires in principle that the alienator is treaty-resident in the foreign state at the time the gain accrues.²⁵ What if the gain is a foreign gain of a remittance basis taxpayer? The gain is deemed to accrue at the time that the gain is remitted. If that deeming applies for DT purposes, then odd consequences would follow. In the following examples, assume that foreign gains accrue to a remittance basis taxpayer who is domestic-law UK resident throughout. Suppose two cases:

- (1) The individual is not treaty-law resident in a foreign state when the gains accrue but is treaty-law resident when the gains are remitted.
- (2) The individual is treaty-law resident in a foreign state when the gains accrue but is not treaty-law resident when the gains are remitted.

If the timing rule applies for DT purposes, DT relief applies in case (1) and not in case (2). That is absurd. It would often lead to double taxation or double non-taxation. So it is considered that the timing rule does not apply for DT purposes, so DT relief can apply in case (2) but not in case (1).

55.4 DT reliefs: s.624 ITTOIA

This section considers the position of a settlor-interested trust whose settlor is domestic-law UK resident. There are four states potentially involved:

- (1) the state where the settlor is resident (here assumed to be the UK)
- (2) the state where the trustees are resident
- (3) the state where a beneficiary is resident
- (4) the state where the source of the income arises

Thus there are many ways s.624 could lead to double taxation. In addition to the settlor's UK tax liability under s.624:

- (1) The trustees may be subject to foreign tax in another state
 - (a) on income with a source in that state
 - (b) on any income if they are resident in that state.
- (2) In the case of an IP trust, the life tenant may be subject to foreign tax in another state

²⁵ *Smallwood v HMRC* [2009] STC 1222. This will need to be reviewed when the case is final.

- (a) on income with a source in that state
- (b) on any income if they are resident in that state.

55.4.1 *Foreign tax credit relief*

Where trust income is subject to a foreign tax, foreign tax credit relief in principle applies for the benefit of a settlor within s.624. That follows from first principles but if authority were needed, see s.623 ITTOIA.²⁶ HMRC agree. The TSE manual provides:

TSEM4017 - Calculation of Income - S623 ITTOIA [16 Apr 2010]
Section 623 ITTOIA allows the settlor 'the same deductions and reliefs' the settlor would have been entitled to had the settlor actually received the income. Thus reliefs which can only be set against a particular type of income, such as a credit under a DTA for foreign tax suffered by the trustees on foreign source income, is available to the settlor even though the charge on the settlor is under Part 5 of ITTOIA ('Miscellaneous Income').

The INT Manual considers the position where a beneficiary is taxed in the UK and a settlor is taxed in some other country under a foreign equivalent of s.624:

161040. Same income [January 2011]

The credit Article in an agreement and the corresponding provision for unilateral relief in s.9 TIOPA 2010 are concerned with relief from double taxation on income or gains. For credit to be allowed, it is not a requirement that the foreign tax on income or gains has to be borne by the same person who is liable to UK tax on the same income or gains. For example, if the foreign country taxes a settlor on the income of a UK resident beneficiary, who is chargeable to UK tax on that income, credit may be given to the beneficiary for the foreign tax paid by the settlor. However, it must be the same income which is being taxed in both countries. ...

55.4.2 *Trustees treaty-resident outside UK*

This section considers whether DT exemptions are available where:

²⁶ See 26.2.7 (Settlor's deductions and reliefs).

- (1) income accrues to a settlor-interested trust whose trustees are treaty-resident in a foreign state.
- (2) the settlor is not treaty-resident in a foreign state.

The settlor is subject to tax under s.624. It is considered that the settlor can claim indirect DT exemption.

Section 619 and 624 ITTOIA must be read together:

619(1) Income tax is charged on ... (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest) ...

624(1) Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone...

Section 624 imposes a deeming which changes the recipient, that is, the income which actually arises to the trustees is deemed to accrue to the settlor. The character of the income is not altered. That is, the income which is “treated as the income of the settlor” is the actual income of the trustees, and not different (notional) income.²⁷

It follows that the settlor can in principle claim indirect DT exemption provided that the income is of a type which qualifies for DTA relief.

Why in fact is there a charge to tax under s.619? If the settlor is treated as receiving (say) interest income, the income would be chargeable to tax under the charging provisions relating to interest. No separate charge to tax is needed. The drafter is in my view slightly muddled as to whether the income of the settlor is the settlement income or notional income. The confusion is understandable, for it is not rational to try to draw a distinction between the two, they amount to exactly the same thing.

It might be argued that since the income is deemed to be the income of the settlor and of the settlor alone, it is deemed not to be the income of the trustees, so the deeming disapplies the DT exemption. But that construction would put the UK in breach of the treaty, so it should not be regarded as correct. In any case, in the HMRC view, s.624 is not a defence to trustees from an assessment.

55.4.3 Settlor treaty-resident outside UK

This section considers whether DT exemptions are available where:

²⁷ See 55.1.1 (Can a third party claim a DT exemption?).

(1) income accrues to a settlor-interested trust whose trustees are not treaty-resident in a foreign state (so the settlor cannot claim indirect treaty relief).

(2) The settlor is treaty-resident in a foreign state.

The settlor is in principle subject to tax under s.624. It is considered that the settlor can claim DT exemption directly.

In some cases, DT exemption only applies if the income is “beneficially owned” by the settlor. In the case of a common form settlor-interested discretionary trust, the income is not “beneficially owned” by the settlor as a matter of English property/trust law. But since for tax purposes it is deemed to be the income of the settlor, this requirement is deemed to be satisfied. The OECD Commentary is helpful here:

12 ... The term “beneficial owner” is not used in a narrow technical sense, rather, it should be understood in its context and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.²⁸

In the US/UK DTA, this is expressly dealt with: see 55.15.1 (Section 624, 720 income; s.13, 86 gains).

55.4.4 *HMRC view*

The TSE Manual provides:

3665. Relief for overseas tax: trust income deemed not to be the beneficiary’s [February 2006]

For tax purposes, income may be deemed to be that of someone other than a beneficiary. For example, the anti-avoidance provisions may treat trust income as that of the settlor. The trustees can claim tax credit relief on the income.

If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.

The International Manual raises some of these questions but does not tell us what HMRC regard as the answers:

28 See 24.12.2 (Discretionary trusts: beneficial owners for DTA purposes).

339550 - DT applications and claims: Applicants/claimants - Trusts
[December 2011]

Claims by non-resident trustees of discretionary trusts

You may receive a claim or application from non-resident trustees of a discretionary trust. For specific information about claims by non-resident trustees see the country specific pages. If the trust's entitlement to claim is not clear from previous papers, you will need to ask for details of the trust to establish whether relief is due. The necessary information is requested on the form 4467(trustee)/FD.

What to do if the settlor of a discretionary trust is not excluded from benefit under the trust

Where the settlor of a non-resident discretionary trust is not excluded from benefit under the trust, the trust may be subject to the provisions of ICTA88/S660. In this situation the trust may be described as a 'caught settlement'. The settlor will be chargeable on the income of the trust as their own personal income, regardless of whether the income is accumulated or distributed. Where we have a claim or application from trustees of a discretionary trust from which the settlor is not excluded from benefiting, Specialist Personal Tax, PT International Advisory will need to refer the papers to Specialist PT, Trusts & Estates for advice. They will also consider whether the settlor or the trustees need to make a UK tax return.

If the settlement is caught, a claim by the trustees will not be valid.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

55.5 DT reliefs: s.720 ITA

55.5.1 Foreign tax credit relief

Where income of the person abroad is subject to foreign tax, foreign tax credit relief in principle applies for the benefit of the transferor. That follows from first principles but if authority were needed, see s.746 ITA.²⁹

55.5.2 Person abroad treaty-resident outside UK

This section considers whether DT exemptions are available where:

- (1) Income accrues to a person abroad who is treaty-resident in a foreign state.
- (2) The transferor is domestic-law ordinarily UK resident and not treaty-resident in a foreign state.

²⁹ See 26.2.7 (Settlor's deductions and reliefs); 28.10.4 (Transferor's deductions and reliefs).

(3) The transferor is in principle subject to tax under s.720.³⁰

Under the pre-ITA wording, it is considered that the s.739 ICTA deemed income of the transferor was the same as the income of the person abroad.³¹ It follows that the transferor could in principle claim DT exemptions provided that the income qualifies for the relief.³²

What is the position now under ITA? Sections 720(2) and 721(1) ITA must be read together:

720(2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).

721(1) Income is *treated as arising* to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A and B are met.

I refer to income treated as arising under s.721 as “**s.720 income**”. The question is whether this is the same as the income of the person abroad.

At first sight the reference to income being *treated as* income of the transferor might be taken to suggest that the s.720 income is different from the income of the person abroad. However this is not the case: the expression “treated as” is neutral, and the deeming may simply be a deeming which changes the recipient: that the transferor is (contrary to the actual position) treated as entitled to the actual income of the person abroad. The wording is the same as s.624 where that is indeed the position. One needs to review all the provisions to see if there is a deeming which changes the character of the income.

HMRC have argued that the s.720 income is *not* the same income as that arising to the person abroad, so treaty relief is in principle not available for

30 Similar points apply to s.727; see 28.11.1 (Nature of s.727 charge).

31 This was view for which *HMRC* argued, and which was accepted by the Special Commissioners, in *Carvill v IRC* [2000] STC (SCD) 143, 75 TC 477 at [100] - [102], cited at 27.14.1 (Dividend income of person abroad: net or grossed up?).

32 See the quote from 28.10.1 (Power to enjoy part of income of person abroad). David Goy QC agrees: “Double Tax Treaties and ss.739 and 740 ICTA 1988”, *GITC* Vol. V no.2, accessible www.taxbar.com. See too Venables, “Double Taxation Treaties: the Antidote to Anti-avoidance Provisions” (1996) *OTPR* Vol. 6 p.151.

It appears in *R oao Huitson v HMRC* [2010] STC 715 at [61] that *HMRC* tacitly accepted this and I think *Huitson* was broadly supportive. The issue was not considered in the Court of Appeal.

s.720. The former ITH provided:

- [1] The anti-avoidance provisions of [sections 720 and 731 ITA] go in that direction, but not far enough to get within the credit rule [foreign tax credit relief], either because
- [a] the income which is assessed on the UK resident cannot be identified with any particular part of the income which the non resident has received or
- [b] because the resident is charged by reference to a benefit received out of the assets rather than on the income itself.
- [2] We take the view that where the UK charge is made on deemed income or gains, such income or gains are not the same income or gains charged abroad.

The argument at [1][a] is not convincing because the s.720 income can easily be identified with the particular part of the income of the person abroad which arises from as a result of the transfer. The argument at [1][b] relates only to s.731, considered below. The argument at [2] is based on the use of the word “deemed” in s.739 (or “treated” in s.720) and is clearly invalid.

I refer to this as the official HMRC view, but it appears that HMRC accept that their position is wrong, at least in relation to the pre-ITA legislation.³³

It is necessary to look at the entire TAA code to see if the s.720 income is the same as the income of the person abroad.

Rebecca Murray³⁴ refers to s.721 ITA which continues:

- (2) Condition A is that the individual has power in the tax year to enjoy *income of a person abroad* as a result of ... a relevant transfer ...
- (3) Condition B is that *the income* would be chargeable to income tax if it were the individual's and received by the individual in the UK.
- (4) For the purposes of subsection (2), it does not matter whether *the income* may be enjoyed immediately or only later.
- (5) It does not matter for the purposes of this section—

33 The author of “Technical Exchange” - Issue 63 of 31 July 2002 (a HMRC document) thought that it was “extremely unlikely” that HMRC could apply s.739 where the person abroad was treaty non-resident; see *R oao Huitson v HMRC* [2010] STC 715 at [61]. The HMRC's “Technical Exchange” is not public; an interested person might try a FOI application to obtain it.

34 Murray, “Tax Avoidance: Transfers Abroad” Taxation 7 Jun 2007 p. 638.

(a) whether *the income* would be chargeable to income tax apart from section 720 ...

(Emphasis added)

She argues:

... s.721(5) ... appears to close the issue. If the income chargeable under s.720 were only an amount equal to income, it would be impossible to ask the question whether it would be chargeable apart from s.720, since it would just be an amount equal to income only chargeable by virtue of s.720. It must be the same income in order to ask this question.³⁵

The references in s.721(2)(3)(4) and (5) are to the actual income of the person abroad, but this does not show that the reference to the s.720 income is the same income.

The pre-2008 s.726 ITA (foreign domicile defence) is more helpful. This provided:

(1) An individual is not chargeable to income tax under section 720 in respect of any income treated as arising to the individual under section 721 if conditions A and B are met. ...

(3) Condition B is that if the income had in fact been the individual's income, because of being so domiciled the individual would not have been chargeable to income tax in respect of it.

This did seem to equate the income treated as arising with the actual income of the person abroad. However, the post-2008 s.726 does distinguish between the income of the person abroad and the deemed income:

(1) This section applies in relation to income treated under section 721 as arising to an individual in a tax year ("the deemed income") if—

(a) section 809B, 809D or 809E (remittance basis) applies to the individual for the year, and

(b) the individual is not domiciled in the UK in the year.

(2) For the purposes of this section the deemed income is "foreign" if (and to the extent that) the income mentioned in section 721(2) would be relevant foreign income if it were the individual's.

35 *Taxation* Vol. 159, 7 June 2007 at p.640.

- (3) Treat the foreign deemed income as relevant foreign income of the individual.

Section 726(3) is drafted on the assumption that the s.720 income is different from the original income of the person abroad.

Does s.746 ITA (set out above) shed any light on the issue? This supports the argument that DT reliefs to apply to s.720 income because if the income is different the deductions and reliefs would not apply. Section 743(4) ITA also assumes that the s.720 income is the same as the income of the person abroad.

My conclusion is that under the former ICTA 1988 and under the pre-2008 ITA the deemed s.720 income is the same as the actual income of the person abroad. The 2008 reforms move one step towards separating the two types of income, based no doubt on the HMRC official (but in their own view mistaken) position of the pre-2008 legislation. The current legislation is for this reason confused and inconsistent on the issue of whether the income treated as arising to the transferor is the actual income of the person abroad or fictional income.

55.5.3 Transferor treaty-resident outside UK

This section considers whether DT reliefs are available where:

- (1) income accrues to a person abroad who is not treaty-resident in a foreign state
- (2) the transferor is domestic-law ordinarily resident in the UK but treaty-resident in a foreign state
- (3) the individual is in principle subject to tax under s.720.

As the person abroad is not treaty-resident in a foreign state the transferor cannot claim indirect treaty relief. Can the transferor claim DT exemptions directly? If the official HMRC view is correct, the transferor may do so under the “other income” article, regardless of the type of income which accrued to the person abroad; even if, say, the income of the person abroad is of a type which would not normally qualify for DT exemption.³⁶ If my view is correct, the DT exemption is available if the type of income of the person abroad qualifies for the exemption.

In some cases DT exemption only applies if the income is “beneficially

³⁶ See 55.6.2 (Individual treaty-resident outside UK).

owned” by the transferor. The point is the same as for s.624.³⁷ In a s.720 case the income is not “beneficially owned” by the transferor as a matter of property law. But since for tax purposes it is deemed to be the income of the transferor, this requirement is deemed to be satisfied.

In the US/UK DTA, this is expressly dealt with: see 55.15.1 (Section 624, 720 income; s.13, 86 gains).

55.6 DT reliefs: s.731 ITA

55.6.1 Person abroad treaty-resident outside UK

This section considers whether DT reliefs are available where:

- (1) income accrues to a person abroad who is treaty-resident in a foreign state
- (2) an individual (not the transferor) is domestic-law ordinarily resident in the UK and not treaty-resident in a foreign state
- (3) the individual is in principle subject to tax under s.731.

DT exemption is not applicable for s.731 ITA. ITA EN provides:

2170. The method statement [s.733 ITA 2007] makes it clear that “relevant income” in relation to an individual is not actually taxable income of the individual, but is an element in the calculation of taxable income. “Relevant income” is actual income arising to a person abroad; the income charged under section 731 is income treated as arising to the individual in question. This deemed income may be more or less than “the relevant income of the tax year” in relation to the individual and the tax year identified at Step 3.

That was also the position under the pre-ITA wording. The former ITH passage cited above showed that HMRC took this view. Section 731 may be regarded as a charge on a benefit, or a charge on fictional income, but it is not a charge on the income arising to the person abroad.

There is no foreign tax credit relief. However, income used to pay foreign tax is not relevant income as it cannot be used to benefit a beneficiary.

37 See 55.4.3 (Settlor treaty-resident outside UK)

55.6.2 Individual treaty-resident outside UK

This section considers whether DT reliefs are available where:

- (1) an individual (not the transferor) is domestic-law UK ordinarily resident and treaty-resident in a foreign state
- (2) the individual is in principle subject to tax under s.731.

Can the individual claim treaty relief directly? It is considered that exemption is available under OECD Model Art.21(1) (other income):

Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.³⁸

Most UK treaties restrict this relief by adding: *other than income paid out of trusts or the estates of deceased persons in the course of administration*. That exclusion does not prevent relief for s.731 income. It has an entirely different purpose.³⁹ S.731 income is fictional income and not “paid out of trusts” even if relevant income accrues to a trust.

Some DTAs restrict this relief to income *beneficially owned* by a resident of a Contracting State.⁴⁰ That restriction does not prevent relief for s.731 income for one of two reasons:

- (1) As a matter of property law, s.731 deemed income is not “beneficially owned” by the individual or anyone else: it is fictional income which does not exist. But since for tax purposes it is deemed to be the income of the individual, this requirement is deemed to be satisfied.⁴¹
- (2) Section 731 deemed income is “beneficially owned” by the individual because s.731 is a tax by reference to a benefit which is beneficially owned by the individual.⁴²

Suppose s.731 income arises where a beneficiary enjoys the benefit of occupying land in the UK. Article 6 OECD Model provides (so far as relevant):

38 See Wattel & Marres, "Characterization of Fictitious Income under OECD-Patterned Tax Treaties", 43 *European Taxation* 3 (2003), p.66.

39 See 24.11.2 (DTAs with restriction on “other income” article).

40 Eg art.22 US/UK DTA.

41 See 29.11.1 (Benefit giving rise to s.731 charge in year of receipt)

42 This point is the same as for s.624. See 55.4.3 (Settlor treaty-resident outside UK).

1. Income derived by a resident of a Contracting State from immovable property ... situated in the other Contracting State may be taxed in that other State...
3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property

It is considered that s.731 income is not “income derived from immovable property” even if the charge is by reference to the occupation of UK land.

55.7 DT relief: s.13 TCGA

In the following discussion I use the following terms to distinguish between types of company residence:⁴³

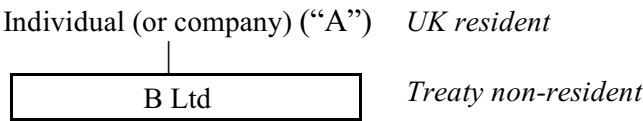

Type of residence	Domestic-law UK resident	Treaty-resident in State with DTA with CG article
Treaty non-resident	No	Yes
Simple non-resident	No	No
UK resident	Yes	No

In this terminology, for instance, a Jersey resident company is *simple* non-resident (the Jersey/UK DTA has no CG article) but a Luxembourg resident company is *treaty* non-resident.

I assume the company is close and so in principle within s.13 TCGA.

55.7.1 Company treaty non-resident

Suppose an individual (or a company) owns a treaty non-resident company which realises a gain:

Section 13(2) TCGA provides that A:

43 A treaty non-resident company must be domestic law non-UK resident so it is not necessary to consider the position of a company which is UK resident but treaty-resident outside the UK.

shall be treated for the purposes of this Act as if a part of the chargeable gain had accrued to him.

The sidenote to s.13 calls this “attribution” of gains. The text of s.13 refers to gains “apportioned” to participators. Section 13(10A) TCGA (repealed) used the words “treated as”.⁴⁴ It all comes to the same thing. This is a deeming which changes the recipient, and the s.13 gain treated as received by A is the same gain as the gain actually received by B Ltd. A can claim DT relief for gains accruing to B Ltd (deemed to accrue to A) under s.13 TCGA.

HMRC agree. The CG Manual provides:

57380 Double taxation agreements [April 2011]

You should always check whether there is a double taxation agreement between the UK and the country in which the company making the gain is resident. If there is no double taxation agreement any TCGA 1992, s.13 charge is unaffected. Similarly if the agreement does not refer to capital gains or CGT the charge under TCGA 1992, s.13 is unaffected. But, if the agreement provides that gains of the type realised by the non-resident company are only taxable in that company’s country of residence TCGA 1992, s.13 cannot apply. For example, Article 15(4) of the Kenya/UK Double Taxation Agreement⁴⁵ would prevent TCGA 1992, s.13 applying to the disposal of stocks and shares by a company resident in Kenya. Agreements will often treat gains on the disposal of particular types of asset differently.⁴⁶

44 Section 13(10A) provided: *A gain which is treated as accruing to any person by virtue of this section shall not be eligible for taper relief.*

45 The Kenya/UK DTA follows the OECD Model, so what is stated here of Kenya is generally true for DTAs which have a capital gains article.

46 Likewise INT Manual provides:

169060 Resident shareholders in non-resident companies - Section 13 TCGA 1992 [September 2011]

This Section enables the UK, in certain circumstances, to tax a UK resident in respect of gains made by a non-resident company in which he is a shareholder (participator where the gains accrue on or after 28 November 1995 - Section 174 FA 1996)(see CG57200 onwards). However the Capital Gains Articles in double taxation agreements may override it.

If the non-resident company disposes of immovable property; for example, land, buildings etc, in the UK, double taxation agreements normally provide that any gain can be taxed in UK. Although UK domestic law may prevent a capital gains tax charge on the non-resident company (see Section 10 TCGA 1992), Section 13

The FA 2008 introduced new terminology. Section 14A(2) TCGA provides:

The part of the chargeable gain treated as accruing to the individual (*“the deemed chargeable gain”*) is a foreign chargeable gain within the meaning of section 12 if (and only if) the asset is situated outside the UK.

This does not alter the DTA position: the expression “deemed chargeable gain” does not show that the gain changes its character. The wording reflects the deeming which changes the recipient and in that sense the s.13 gain accruing to the participator can be called a deemed gain. The character of the gain is not altered. That is, the gain deemed to accrue to the participator is the actual gain accruing to the company, and not a different (notional) gain.

The wording does perhaps suggest that the drafter was not conscious of the distinction between the actual gain and an equivalent notional gain, but that is understandable since it is a distinction without a difference.

55.7.2 *Non-standard form DTAs*

The INT Manual correctly states:

169060 Resident shareholders in non-resident companies - Section 13 TCGA 1992 [September 2011]

... The text of the Capital Gains Article in the agreement with the country concerned will need to be examined to see whether there are any variations from the general principles outlined above...

For instance, article 14(6) France/UK DTA qualifies the CG article:

The provisions of paragraph 5 shall not affect the right of a Contracting State to levy according to its law a tax chargeable in respect of gains from the alienation of any property

TCGA 1992 can be applied to tax the UK resident shareholder.

If the asset disposed of is not immovable property in the UK; for example, immovable property situated outside the UK, shares etc, then the Capital Gains Article will normally prevent a charge to tax under Section 13 TCGA 1992 being made on the shareholder...

[a] on a person who is, and has been at any time during the previous six fiscal years, a resident of that Contracting State or

[b] on a person who is a resident of that Contracting State at any time during the fiscal year in which the property is alienated.

This would preclude DT relief for a participator in a company resident in France (though the EU law defence would usually fill that gap). Perhaps a provision of this kind will become more common in new treaties.

55.7.3 Participator treaty non-resident

Suppose an individual who is domestic-law UK resident but treaty non-resident owns a simple non-resident company which realises a gain:

The gain treated as received by A is the same gain as the gain received by NR Ltd. But art.13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the *alienator* is [treaty-resident].

On a literal reading, A does not qualify for treaty relief on a gain accruing to NR Ltd. A (though treaty non-resident) is not the alienator. NR Ltd is the alienator but (on the facts of this example) NR Ltd is not treaty resident in the foreign state which confers DT reliefs. So the terms of art.13(5) are not satisfied. The US treaty is wider and DT exemption applies to individuals who are treaty-resident in the US.⁴⁷ Even under the OECD Model, the same result is arguable on the grounds that the gain is treated as accruing to A, so A should be deemed to be the alienator; or the word “alienator” does not require that one must alienate property, only that the gain on the alienation accrues to the person.

47 See 55.15.1 (Section 624, 720 income; s.13, 86 gains).

55.7.4 Chain of companies

Suppose there is a chain of companies:

Individual (or company) (“A”) - *UK resident*

Suppose a gain accrues to C (“C’s gain”). We have the following possibilities:

	Case 1	Case 2	Case 3
B Ltd	UK resident	simple non-resident	treaty non-resident
C Ltd	treaty non-resident	treaty non-resident	simple non-resident

Case 1: If B Ltd is UK resident, and C Ltd is treaty non-resident:

- (1) C’s gain is deemed to accrue to B Ltd; B Ltd may claim DT relief, as noted above.
- (2) A does not need to claim relief, as
 - (a) C’s gain is not deemed to accrue to A under s.13(9) and
 - (b) apparently C’s gain is not deemed to accrue to A under s.13(2) (but if it did, DT relief would be available.)

Case 2: If B Ltd is simple non-resident and C Ltd is treaty non-resident, C’s gain in principle accrues to A. Section 13(9) TCGA provides:

- [a] If a person who is a participator in the company at the time when the chargeable gain accrues to the company is itself a company which
 - [i] is not resident in the UK but which
 - [ii] would be a close company if it were resident in the UK,
- [b] [i] *an amount equal* to the amount apportioned under subsection (3) above out of the chargeable gain to the participating company’s interest as a participator in the company to which the gain accrues
 - [ii] shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and

- [c] subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned,
- [d] and so on through any number of companies.

HMRC accept that A can claim DT relief. This is so even though s.13(9) refers to “an amount equal to” the gain. The words do not show there is a change in the character of the gain (though they do perhaps show some confusion on the point).

Case 3: If C Ltd is simple non-resident, but B Ltd is treaty non-resident, C’s gain is deemed to accrue to A, but A cannot claim DT relief.

55.7.5 Disallowance of DT relief for trust participator

Section 79B TCGA provides:

- (1) This section applies where the trustees of a settlement are participators⁴⁸—
 - (a) in a close company, or
 - (b) in a company that is not resident in the UK but would be a close company if it were resident in the UK...
- (2) Where this section applies, nothing in any double taxation relief arrangements shall be read as preventing a charge to tax arising by virtue of the attribution to the trustees under s.13, by reason of their participation in the company mentioned in subsection (1) above, of any part of a chargeable gain accruing to a company that is not resident in the UK.

Suppose a UK trust owns a treaty non-resident company which realises a gain:

DT relief is disallowed under s.79B(1)(b) and the trustees are taxable.

Similarly if a non-resident trust within s.86 owns a treaty non-resident company which realises a gain: DT relief is disallowed under s.79B(1)(b) and the settlor is taxable.

⁴⁸ Section 79B(1) provides: “For this purpose ‘participator’ has the same meaning as in section 13”.

In these circumstances the UK is in breach of the treaty, but there it is.

I am unable to see the point of s.79B(1)(a). If the trustees are participators in a *close* company, gains accrue to that company and are not attributed to the trustees. I would be grateful if any reader could offer an explanation.

Section 79B(3) TCGA provides:

Where this section applies and—

- (a) a chargeable gain accrues to a company that is not resident in the UK but would be a close company if it were resident in the UK, and
- (b) all or part of the chargeable gain is treated under section 13(2) as accruing to a close company which is not chargeable to corporation tax in respect of the gain by reason of double taxation arrangements, and
- (c) had the company mentioned in para (b) (and any other relevant⁴⁹ company) not been resident in the UK, all or part of the chargeable gain would have been attributed to the trustees by reason of their participation in the company mentioned in subsection (1) above,

section 13(9) shall apply as if the company mentioned in para (b) above (and any other relevant company) were not resident in the UK.

Section 79B(3) addresses the more challenging case where:

- (1) a trust owns a holding company (“UK Ltd”) which is UK resident;
- (2) UK Ltd holds a treaty non-resident subsidiary (“TNR Ltd”):

49 Section 79B(4) TCGA provides:

“The references in subsection (3) above to ‘any other relevant company’ are to any other company which if it were not resident in the UK would be a company in relation to which section 13(9) applied with the result that all or part of the chargeable gain was attributed to the trustees as mentioned in that subsection.”

UK Ltd is not taxed under s.13 on TNR's gain as UK Ltd can claim DT relief. In the absence of s.79B(3), TNR's gain apparently cannot be apportioned to the trust under s.13(9) or s.13(2). The trust does not need DT relief. Section 79B(3) treats UK Ltd as non-resident, so that the gain accruing to TNR can be attributed to the trust under s.13(9).

55.8 Foreign tax credit: s.13 TCGA

SP D23 provides:

Non-resident company: TCGA 1992 s 13

- [1] Where a UK participator in a non-resident company which would be a close company if resident in the UK is chargeable to CGT on a proportion of a capital gain accruing to that company, tax credit relief may be given against UK CGT for the appropriate proportion of any overseas tax payable by the company in the country where it is resident in respect of its gain [s.9(2) TIOPA];
- [2] alternatively, under [s.113 TIOPA], the appropriate proportion of the overseas tax may be deductible in computing the shareholder's gains to the extent that the overseas tax has not qualified for relief under [s.9(2) TIOPA].

This relates to two reliefs:

- (1) Foreign tax credits
- (2) CGT computation deduction

The CG Manual summarises these two reliefs and gives a worked example:

57381. Overseas tax payable by NR SP D23 [April 2011]

The non-resident company may have to pay tax on the gain in its country of residence. UK residents to whom the gain is apportioned will get relief for this tax. The two methods of giving relief are set out in SP D23.

- Either the UK resident can claim tax credit relief, see CG57382 or
- a proportionate part of the tax can be claimed in computing the apportioned gain, see CG57383.

57382. Tax credit relief [April 2011]

The UK resident can claim tax credit relief under [s.9(2) TIOPA]. Relief is given on a proportion of the foreign tax equal to the proportion of the total gain attributable to the UK resident. This amount is set-off against the charge to CGT or Corporation Tax on the relevant chargeable gains.

See the example at CG57384. If tax credit relief is allowed no deduction under [s.113 TIOPA] can be allowed in computing the chargeable gain. See CG57383.

57383. Tax deducted in computing gain [April 2011]

If the UK resident does not want to claim tax credit relief, the tax can be deducted in computing the gain, [s.113 TIOPA]. The foreign tax paid does not qualify for indexation allowance. Although it is an allowable deduction in computing the gain it is not a deduction within TCGA 1992, s.38(1)(a) or TCGA 1992, s.38(1)(b). This means it is not relevant allowable expenditure for indexation allowance purposes, see CG17240. In all other respects you compute and apportion the gain in the usual way allowing the foreign tax paid as a deduction. See the example in CG57384. For further guidance on [s.113 TIOPA] see CG14410+.

The Manual gives a worked example:

57384. Foreign tax paid by a NR company [April 2011]

This example illustrates the differences between allowing any foreign tax paid by the non-resident company as tax credit relief or as a deduction in computing the gain.

Facts

- The non-resident company realises a gain of £20,000 computed under the normal CGT rules.
- It has to pay £5,000 tax on this gain in its country of residence.
- 75% of the gain is attributable to a UK resident.

CGT treatment

A TCGA 1992, s.13 [gain]⁵⁰ of £20,000 @ 75% = £15,000 is apportioned to the UK resident. Relief for the tax paid can be claimed in two ways.

- TAX CREDIT RELIEF, SEE CG57382.

Suppose the UK resident is liable to CGT at 40%. The tax payable would be £6,000. The UK resident can claim tax credit relief on the foreign tax of £5,000 paid by the company in the same proportion as the gain is apportioned. £5,000 @ 75% = £3,750. The total tax payable by the UK resident becomes £2,250.

- DEDUCTION IN COMPUTING THE GAIN, SEE CG57383.

The foreign tax paid of £5,000 can be deducted in computing the gain. No indexation allowance is due on this deduction. The gain to be apportioned becomes £20,000 – £5,000 = £15,000. The taxpayer's share

⁵⁰ The original erroneously says: charge.

is £15,000 @ 75% = £11,250. At a rate of 40% the tax payable would be £11,250 @ 40% = £4,500.

In this example you would expect the taxpayer to claim tax credit relief.

55.9 DT reliefs: s.86 TCGA

55.9.1 Trustees treaty-resident outside UK

Assume the fundamental conditions in s.86(1) TCGA are satisfied. Section 86(4) TCGA provides:

Where this section applies—

- (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in the year ...

The HMRC view is the fact that the trustees are resident in a foreign state with standard form DTA CGT relief does not allow the settlor to claim relief from s.86. HMRC raise two arguments in the manuals. The first is a categorisation, *Bricom*-type argument. The CG Manual provides:

38313 Double taxation relief [February 2006]

The gain which is chargeable on the settlor is not the same gain as that which accrues to the trustees, but only an amount equivalent to that gain.

Therefore articles in particular Double Taxation agreements, under which chargeable gains from the alienation of particular property are exempt from UK tax, will not operate to exempt the settlor from liability under [TCGA] Schedule 5.

I think this argument is doubtful. However HMRC have a better argument, at which the CG Manual provides a hint. The Manual first explains why DTA relief did apply to the former s.77 TCGA when trustees were treaty-resident in a foreign state with a capital gains article

34912. Double taxation relief [August 2007]

A settlor may be able to claim exemption [from s.77 TCGA] on some or all of the attributed trust gains, but this depends on the terms of the particular double taxation agreement. The gain which is chargeable on the settlor is not the same as the gain which accrues to the trustees. Therefore Articles which exempt trustees from UK tax on gains accruing

on the disposal of particular property do not necessarily operate to exempt the settlor from liability under Section 77. However section 77(1)(b) requires there to be an amount on which the trustees would have been chargeable for the year in respect of the gains in question. So if the correct interpretation of the Double Taxation Agreement by reference to the relevant acts is that the trustees would be exempt if they were chargeable then there is no liability.⁵¹

HMRC say this argument does not run for s.86 because the legislation is differently worded:

This is by way of contrast with section 86 where there is a hypothesis in subsections (1)(e)(i) and (3) that the trustees are in fact resident in determining whether the section applies and therefore one cannot take into account the actual non-residence. Compare *Bricom Holdings v IRC* 70 TC 272.

But this is not necessarily right; see the discussion on s.87 below.

Another argument is that s.86(3) envisages a charge in a case where trustees are dual resident in the sense of being domestic-law UK resident but treaty-resident in a foreign state. In that case the treaty is intended to be overridden. By implication the same should apply where the trustees are treaty-resident in a foreign state and not UK resident at all.

HMRC accept that foreign tax credit relief is available. The CG Manual provides:

38313 Double taxation relief [February 2006]

... Where, however, the particular article provides for the allowance, as

51 Section 77(1) TCGA (now repealed) provided, so far as relevant:

(1) Where in a year of assessment—

(a) chargeable gains accrue to the trustees of a settlement from the disposal of any or all of the settled property,

(b) after making any deduction provided for by section 2(2) in respect of disposals of the settled property there remains an amount on which the trustees would be chargeable to tax for the year in respect of those gains ... , and

(c) at any time during the year the settlor has an interest in the settlement,

[i] the trustees shall not be chargeable to tax in respect of those gains but

[ii] instead chargeable gains of an amount equal to that referred to in para (b) shall be treated as accruing to the settlor in that year.

a credit, of overseas tax payable on gains, that tax can be allowed as a credit. This is because UK tax is computed by reference to the same chargeable gains in respect of which the overseas tax is computed. If there is no Double Taxation agreement, then unilateral relief is available on the same basis.

55.9.2 *Settlor treaty-resident outside UK*

Suppose the settlor is domestic-law UK resident but treaty-resident in a foreign state. Can the settlor claim direct relief? The point is the same as for s.13 gains. Art.13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the *alienator* is [treaty-resident].

On a literal reading, the settlor does not qualify for treaty relief because (though treaty non-resident) the settlor is not the alienator. The trustees are the alienator but (on the facts of this example) the trustees are not treaty non-resident. So the terms of art.13(5) are not satisfied. The US treaty is wider and DT exemption applies to a settlor who is treaty-resident in the US.⁵² Even under the OECD model, the same result is arguable on the grounds that the gain is treated as accruing to the settlor, they should be deemed to be the alienator; or the word “alienator” does not require that one must alienate property, only that the gain on the alienation accrues to the person.

55.9.3 *Trust owns company which is treaty-resident outside UK*

If a non-resident trust within s.86 owns a treaty non-resident company which realises a gain DT relief is disallowed and the settlor is taxable; see 55.7.5 (Disallowance of DT relief for trust participator).

55.10 **Restriction on DTR for gains of trustees and settlors**

It is easiest to understand the legislation if one bears in mind the tax avoidance schemes it was intended to block. Suppose a non-resident

⁵² See 55.15.1 (Section 624, 720 income; s.13, 86 gains).

settlor-interested trust within s.86 TCGA. The trustees would take two steps:

- (1) arrange to dispose of an asset at a time when they are treaty-resident in a foreign state with a DTA with a CGT article and
- (2) become UK resident later in the same tax year.

In the absence of an anti-avoidance rule, this works as s.86 does not apply and the trustees (although within the charge to CGT) claimed DTR.⁵³

This arrangement is counteracted by s.83A TCGA.

(1) This section applies if a chargeable gain accrues to the trustees of a settlement on the disposal by them of an asset in a year of assessment and the trustees—

- (a) are within the charge to capital gains tax⁵⁴ in that year of assessment, but
- (b) are non-UK resident at the time of the disposal.

The expression “non-UK resident” in (b) is defined in s.83A(4) TCGA:

For the purposes of this section the trustees of a settlement are non-UK resident at a particular time if, at that time,—

- (a) they are neither resident nor ordinarily resident in the UK, or
- (b) they are resident or ordinarily resident in the UK but are Treaty non-resident.

This is a slightly artificial definition, but it is difficult to think of a better label.

If these conditions are satisfied, s.83A(2) TCGA overrides DT relief:

Where this section applies, nothing in any double taxation relief arrangements shall be read as preventing the trustees from being chargeable to capital gains tax (or as preventing a charge to tax arising,

53 The reader may have considered a similar arrangement where the non-resident trust was not within s.86 but is within s.87. In the absence of an anti-avoidance provision, the same steps would be taken in order to avoid a s.2(2) amount. But this is caught by s.88 TCGA; see 48.17 (Dual resident trust – s.88 TCGA).

54 Section 83A(3) gives this expression a commonsense definition:

“For the purposes of this section the trustees of a settlement are within the charge to capital gains tax in a year of assessment—

- (a) if, during any part of that year of assessment, they are resident and ordinarily resident in the UK and not Treaty non-resident”.

whether or not on the trustees) by virtue of the accrual of that gain.

EN FA 2005 explains the words in brackets:

4. Subsection (2) of section 83A has effect to provide that where section 83A applies, nothing in the terms of any Double Taxation Agreement (DTA) can be read as preventing the trustees being chargeable to capital gains tax, or of preventing a charge to tax arising (whether on the trustees or another person), by virtue of the accrual of the gain.

5. The reason for the reference to “another person” in paragraph 4 above is that, in certain circumstances where the trustees of a settlement are within the charge to capital gains tax in a tax year, the rules in section 77 TCGA provide that the trustees do not actually suffer a tax charge in respect of chargeable gains which arise to them on the disposal of settled property which originates from a UK resident or ordinarily resident settlor who has an interest in the settlement at any time in the year. Chargeable gains are instead treated as arising to the settlor, who is then chargeable to tax in respect of them.

Now that s.77 has been repealed, the words in brackets in s.83A(2) should be repealed, as they can never apply, but they do no harm. Section 83A is still needed in order to deal with the s.86 scheme.

Section 83A is somewhat wider than it needed to be in order to deal with these two schemes, and considerable care is needed where trustees become or cease to be treaty non-resident, but in practice difficulties are fairly rare.

55.11 DT reliefs: s.87 TCGA

55.11.1 Trustees treaty-resident outside UK

This section considers whether DT reliefs are available where:

- (1) Gains accrue to a trust which is treaty-resident in a foreign state.
- (2) A UK resident beneficiary receives a capital payment so a s.87 deemed gain accrues to them.

At first sight, the DTA offers no defence to the charge on the beneficiary. The gain accruing to trustees meets the requirements for DTR but the s.87 deemed gain accruing to the beneficiary under s.87 TCGA is not the same gain as the gain accruing to the trustees. Section 87 may be regarded as a charge on the capital payment or a charge on fictional gains but it is not a charge on the gains accruing to the trustees.

This has always been a potential cause of injustice, but since the extension of s.87 to foreign domiciliaries in 2008 it has become a major cause of injustice.

There is however an argument that gains accruing to the trustees are not s.2(2) amounts (trust gains). The definition is:

the amount upon which the trustees of the settlement would be chargeable to tax under s.2(2) for that year if they were resident and ordinarily resident in the UK in that year

The argument is that assuming the trustees were UK resident, they would still be treaty non-resident, so “the amount on which they would be chargeable to tax” would be nil!⁵⁵ I refer to this as “**the DT argument**”. It is the old question of how far one carries through the deeming.⁵⁶

Unfortunately an argument of this kind was put in a similar context in *Bricom v IRC* where it was rejected. This was a CFC case. One issue was to ascertain the chargeable profits of the CFC. “Chargeable profits” is defined in s.747(6) ICTA which provides (so far as relevant):

In relation to a company resident outside the UK—

(a) any reference in this Chapter to its chargeable profits for an accounting period is a reference to the amount which, on the assumptions in Schedule 24, would be the amount of the total profits of the company for that period on which ... corporation tax would be chargeable.

Para 1(1) sch.24 provides:

The company shall be assumed to be resident in the UK.

Bricom was resident in the foreign state, and treaty-resident there, and it argued that although it was deemed to be UK resident, the deeming did not undo those facts. Accordingly, the CFC’s chargeable profits should be ascertained on the assumption that the CFC was dual resident and entitled to the benefit of the DTA. The Court of Appeal rejected the argument:

⁵⁵ This assumes that the trustees would claim treaty relief, but that is merely an administrative matter and should not be an obstacle.

⁵⁶ See App 2.1 Construction of Deeming Provisions).

... para 1(1) of Sch 24 is a statutory assumption, and is ambiguous. The question is: what is the nature of the assumption?...

In the present case the purpose for which the assumptions are required is self-evident (!). A controlled foreign company is *ex hypothesi* resident outside the UK. As a non-resident, it will not normally be subject to UK corporation tax and will have made no claim to relief from such tax. The computation of the profits on which corporation tax is chargeable, therefore, involves ascertaining a hypothetical amount, that is to say the amount which would have represented the amount of such profits if the controlled foreign company had been resident in the UK and had made all necessary claims for relief. The assumptions which Sch 24 requires are not additional assumptions to be made in combination with the actual facts. In relation to the matters which they cover they are substituted for the actual facts. [The CFT] was resident outside the UK; this means that it had no profits actually chargeable to corporation tax; accordingly its chargeable profits are to be ascertained on the footing that it was resident in the UK instead. It is as simple as that. There is no question of dual residence.

... The chargeable profits referred to in s 747(4)(a) must be ascertained without reference to the double taxation agreement⁵⁷

The reader may think this a particularly blatant case of assuming the answer and then “construing” the statute to yield that answer. However that may be, *Bricom* is not a general rule for the construction of provisions deeming UK residence, but a case on the construction of the CFC legislation. The point in the s.87 code must be considered independently.

If the DT argument were correct, there would be an anomaly between:

- (1) trusts which were domestic-law non-resident and treaty non-resident, ie within the scope of a DTA; and
- (2) trusts which were domestic-law UK resident and treaty non-resident, for these are caught by s.88 TCGA.⁵⁸

If the DT argument is not correct, a CGT computation deduction is available so foreign tax paid by the trustee is deducted in computing the s.2(2) amount. This is because:

- (1) The s.2(2) amount is the amount on which trustees would have been chargeable to tax if UK resident; and

⁵⁷ *Bricom v IRC* 70 TC 272 at p.289.

⁵⁸ See 48.17 (Dual resident trust - s.88 TCGA).

- (2) UK resident trustees would qualify for a CGT computation deduction, which reduces the amount on which trustees would be chargeable to tax.

55.11.2 *Beneficiary treaty-resident outside UK*

Suppose now the beneficiary is UK resident but treaty-resident in a foreign state, in a foreign state with a DTA with a common form CGT article. Can the beneficiary claim treaty relief directly? Art.13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

It is suggested that the beneficiary cannot claim DT relief because:

(1) The beneficiary is not the alienator.⁵⁹

(2) The gain is not “from the alienation of any property”.

The contrary is arguable, but does require a very loose reading of the provision.

55.12 **DT reliefs: offshore income gains**

55.12.1 *OIGs accruing directly to treaty-resident individual*

Suppose an individual who is UK resident and treaty-resident in a foreign state disposes of offshore funds so that OIGs accrue directly to them.

Article 13(5) OECD Model provides (with immaterial exceptions):

Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Article 21(1) OECD Model provides:

Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

⁵⁹ See 55.7.3 (Participator treaty non-resident).

It is an interesting question whether the individual claims relief under Art.13 or Art.21. At first sight OIGs are “gains” which arise from the alienation of property, even though not chargeable gains and even though subject to income tax rather than CGT. But OIGs are also “income” if that word is given its UK tax meaning. Of course it does not normally matter which of the articles apply, if the treaty has both. But if a particular treaty has an equivalent of art.21 (other income) but no capital gains article, then it is considered that treaty relief is still in principle available.

55.12.2 s.13 OIGs: company treaty-resident outside UK

Suppose OIGs accrue to a company which is treaty-resident in a foreign state and so are deemed to accrue to a UK resident participator under s.13 TCGA. In principle, DT reliefs apply to OIGs deemed to accrue under OIG s.13 just as they do for chargeable gains deemed to accrue under CGT s.13.⁶⁰

I have considered reg. 24(6) OFTR which provides:

If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

This does not disapply treaty relief, either because it has no application for the purposes of the treaty or because (while deeming the participator to be the disponor) it does not say that the non-resident company is not the alienator.⁶¹

55.12.3 s.13 OIGs: participator treaty-resident outside UK

In the case of CGT s.13 gains, the participator has a difficulty in obtaining relief under a CG article, in that they are not at first sight the “alienator”.⁶² However it is considered that the other income article provides relief, in the case of OIGs. If the capital gains article is in point, it is arguable that reg. 24(6) OFTR deems the participator to be the alienator.

60 For this terminology, see 34.14 (OIG s.13 charge).

61 For the reason for this provision, see 34.13.4 (Deemed disposal).

62 See 55.7.3 (Participator treaty non-resident).

55.12.4 s.87 OIGs: *beneficiary treaty-resident outside UK*

In the case of CGT s.87 gains, the beneficiary has a difficulty in obtaining relief, in that they are not at first sight the “alienator” and the gain is not “from the alienation of any property”. See 55.11.2 (Beneficiary treaty-resident in a foreign state). However in the case of OIGs it is considered that the other income article provides relief. If the capital gains article were in point, it is arguable that reg.20(5) OFTR deems the beneficiary to be the alienator but the problem remains that the gain is not “from the alienation of any property”.

55.13 DT reliefs: policies

55.13.1 *Chargeable event gains arising directly to treaty-resident individual*

Suppose an individual who is UK resident and treaty-resident in a foreign state disposes of a policy so that chargeable event gains accrue directly to them. The position is similar to OIGs: see 55.12.1 (OIGs accruing directly to treaty-resident individual). It is an interesting question whether the individual claims relief under Art.13 or Art.21. At first sight chargeable event gains are “gains” which arise from the alienation of property, even though not chargeable gains and even though subject to income tax rather than CGT. But the gains are also “income” if that word is given its UK tax meaning. Of course it does not normally matter which of the articles apply, if the treaty has both. But if a particular treaty has an equivalent of art.21 (other income) but no capital gains article, then it is considered that treaty relief is still in principle available.

If chargeable event gains accrue without an alienation, relief is not available under Art.13 but may be available under Art 21.

55.13.2 *Policy held by trust or by company*

If the policy is held by a trust, the position is similar to s.624; see 55.4 (DT reliefs: s.624 ITTOIA). If the policy is held by a company within s.720, s.720 issues arise: see 55.5 (DT reliefs: s.720 ITA).

55.14 US/UK DTA

The US/UK DTA follows the US model which differs significantly from the OECD model. A full discussion would require a book to itself.

For the US/UK DTA definition of treaty residence, see 5.19 (US/UK treaty).

55.14.1 US/UK DTA: savings clause

Article 1(4) US/UK DTA provides:

Notwithstanding any provision of this Convention except paragraph 5 of this Article, a Contracting State may tax its residents (as determined under Article 4 (Residence), and by reason of citizenship may tax its citizens, as if this Convention had not come into effect.

This is called **“the savings clause”**.

So subject to the art 1(5) exceptions:

- (1) US may tax US citizens and US treaty-residents ignoring treaty relief.
- (2) UK may tax UK treaty-residents ignoring treaty-relief.

On the other hand, UK must allow treaty relief to US treaty-residents, and US must allow relief to UK treaty-residents who are not US citizens.

The US Department of the Treasury Technical Explanation of the Convention⁶³ provides:

Paragraph 4 contains the traditional saving clause found in U.S. tax treaties. The Contracting States reserve their rights, except as provided in paragraph 5, to tax their residents and citizens as provided in their internal laws, notwithstanding any provisions of the Convention to the contrary. For example, if a resident of the UK performs professional services in the United States and the income from the services is not attributable to a permanent establishment in the United States, Article 7 (Business Profits) would by its terms prevent the United States from taxing the income. If, however, the resident of the UK is also a citizen of the United States, the saving clause permits the United States to include the remuneration in the worldwide income of the citizen and

63 Accessible

www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf

subject it to tax under the normal Code rules (i.e., without regard to Code section 894(a)). However, subparagraph 5(a) of this Article preserves the benefits of special foreign tax credit rules applicable to the U.S. taxation of certain U.S. income of its citizens resident in the UK. See paragraph 6 of Article 24 (Relief from Double Taxation).

For purposes of the saving clause, "residence" is determined under Article 4 (Residence). Thus, an individual who is a U.S. resident under the Internal Revenue Code but who is deemed to be a resident of the UK under the tie-breaker rules of Article 4 would be subject to U.S. tax only to the extent permitted by the Convention. For example, if an individual who is not a U.S. citizen is a resident of the United States under the Code, and is also a resident of the UK under its law, and that individual has a permanent home available to him in the UK and not in the United States, he would be treated as a resident of the UK under Article 4 and for purposes of the saving clause. The United States would not be permitted to apply its statutory rules to that person if they are inconsistent with the treaty.⁶⁴

55.14.2 *Article 1(5) exceptions*

The list of exceptions in art 1(5) is quite limited:

The provisions of paragraph 4 of this Article shall not affect—

- (a) the benefits conferred by a Contracting State under
 - [i] paragraph 2 of Article 9 (Associated Enterprises),
 - [ii] sub-paragraph (b) of paragraph 1 and paragraphs 3 and 5 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support),
 - [iii] paragraphs 1 and 5 of Article 18 (Pension Schemes) and

64 The treaty continues with a comment that UK treaty-residence does not preclude US domestic-law residence, a point only relevant to the US (though a comparable rule applies in the UK): "However, the person would be treated as a U.S. resident for U.S. tax purposes other than determining the individual's U.S. tax liability. For example, in determining under Code section 957 whether a foreign corporation is a controlled foreign corporation, shares in that corporation held by the individual would be considered to be held by a U.S. resident. As a result, other U.S. citizens or residents might be deemed to be United States shareholders of a controlled foreign corporation subject to current inclusion of Subpart F income recognized by the corporation. See Treas. Reg. section 301.7701(b)-7(a)(3). The application of the saving clause to former citizens and long-term residents is addressed not in paragraph 4 but in paragraph 6."

- [iv] Articles 24 (Relief From Double Taxation),
- [v] [Art] 25 (Non-discrimination), and
- [vi] [Art] 26 (Mutual Agreement Procedure) of this Convention; ...

The US Department of the Treasury Technical Explanation of the Convention⁶⁵ summarises the exceptions:

Some provisions are intended to provide benefits to citizens and residents even if such benefits do not exist under internal law. Paragraph 5 sets forth certain exceptions to the saving clause that preserve these benefits for citizens and residents of the Contracting States.

Subparagraph (a) lists certain provisions of the Convention that are applicable to all citizens and residents of a Contracting State, despite the general saving clause rule of paragraph 4:

(1) Paragraph 2 of Article 9 (Associated Enterprises) grants the right to a correlative adjustment with respect to income tax due on profits reallocated under Article 9.

(2) Subparagraph 1(b) and paragraphs 3 and 5 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support) provide exemptions from source or residence State taxation for certain pension distributions, social security payments and child support.

(3) Paragraph 1 of Article 18 (Pension Scheme) provides an exemption for certain investment income of pension schemes located in the other State, while paragraph 5 provides benefits for certain contributions by or on behalf of a U.S. citizen to certain pension schemes established in the UK.

(4) Article 24 (Relief from Double Taxation) confirms the benefit of a credit to citizens and residents of one Contracting State for income taxes paid to the other, even if such a credit may not be available under the Code.

(5) Article 25 (Non-Discrimination) requires one Contracting State to grant national treatment to nationals of the other Contracting State in certain circumstances. Excepting this Article from the saving clause requires, for example, that the United States give such benefits to a national of the UK even if that person is a citizen of the United States.

(6) Article 26 (Mutual Agreement Procedure) may confer benefits on residents or nationals of the Contracting States. For example, the statute of limitations may be waived for refunds and the competent authorities

65 www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf

are permitted to use a definition of a term that differs from the internal law definition. As with the foreign tax credit, these benefits are intended to be granted by a Contracting State to its citizens and residents.

The list of exceptions in art 1(5) continues:

The provisions of paragraph 4 of this Article shall not affect ...

- (b) the benefits conferred by a Contracting State under
 - [i] paragraph 2 of Article 18 (Pension Schemes) and
 - [ii] Articles 19 (Government Service),
 - [iii] Art 20 (Students),
 - [iv] Art 20A (Teachers), and
 - [v] Art 28 (Diplomatic Agents and Consular Officers)

of this Convention, upon individuals who are neither citizens of, nor have been admitted for permanent residence in, that State.

The US Department of the Treasury Technical Explanation of the Convention⁶⁶ provides:

Subparagraph (b) of paragraph 5 provides a different set of exceptions to the saving clause. The benefits referred to are all intended to be granted to temporary residents of a Contracting State (for example, in the case of the United States, holders of non-immigrant visas), but not to citizens or to persons who have acquired permanent residence in that State. If beneficiaries of these provisions travel from one of the Contracting States to the other, and remain in the other long enough to become residents under its internal law, but do not acquire permanent residence status (i.e., in the U.S. context, they do not become "green card" holders) and are not citizens of that State, the host State will continue to grant these benefits even if they conflict with statutory rules. The benefits preserved by this paragraph are: the host country exemptions for the following items: government service salaries and pensions under Article 19 (Government Service); certain income of visiting students, trainees, teachers, professors, and researchers under Articles 20 (Students) and 20A (Teachers); the income of diplomatic agents and consular officers under Article 28 (Diplomatic Agents and Consular Officers); and the beneficial tax treatment of pension fund contributions under paragraph 2 of Article 18 (Pension Schemes).

⁶⁶ www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf

Green card holders are at a disadvantage compared to US citizens since they pay US taxes but do not have the same benefits under the treaty. HMRC say:

HMRC explained that the UK was not obliged to give credit where the US taxed a green card holder on a world wide basis and the taxpayer was not tax resident in the US, but where we see a recharge to the US for US workdays we will accept the US has the primary taxing rights in the same way as for US citizens and we will give credit for the US tax paid on those US workdays by green cardholders. In the US a green card holder is debarred from claiming relief under a treaty. HMRC suggested that an individual who is taxed in the US on their world wide income because he retains his green card and so is treated as a resident of the US for the purposes of Article 1(4) even though they would be treaty resident in the UK may not have taken all reasonable steps to minimise their US liability, as required by s.795A ICTA if he were to qualify for credit relief. As such, although strictly Article 24(6) may not apply to green card holders in these circumstances, the effect of the minimisation requirement is that the UK will limit relief given in the UK under the treaty to that which would be given if Article 24(6) did apply. Representatives pointed out that giving up the green card might trigger expatriation taxes in the US.

The HMRC position is that we will not give relief in the UK for tax paid in the US as a result of Article 1(4). We believe that the US will give unilateral relief for the UK tax paid on their income at least to the extent it arises in the UK so as far as we know this should not lead to double taxation although it could lead to higher tax payable in the US as a result of the alternative minimum tax provisions.⁶⁷

55.15 US/UK DTA: fiscally transparent bodies

Article 1(8) of the US/UK DTA provides:

An item of income, profit or gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered to be derived by a resident of a Contracting State to the extent that the item is treated for the purposes of the taxation law of such Contracting State as the income, profit or gain of a resident.

⁶⁷ www.hmrc.gov.uk/consultations/expat-mins-160409.htm

It is essential to have in mind which state is which; the paragraph is easier to follow if it is expanded to read:

An item of income/gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered
 [i] to be derived by a resident of the UK to the extent that the item is treated for the purposes of the taxation law of the UK as the income/gain of a resident of the UK and
 [i] to be derived by a resident of the US to the extent that the item is treated for the purposes of the taxation law of the US as the income/gain of a resident of the US.

This is not in the OECD Model Treaty but it is in the US Model Income Tax Convention from 1996 and is now standard in US treaties.

If both the UK and the USA regard an entity as transparent (eg a partnership) then this provision is not needed, for (say) partnership income would in any event be regarded as income of the partners. The provision is needed for a hybrid entity, ie an entity which is regarded as transparent in one state but not in the other. The IRS explain:⁶⁸

Paragraph 8 addresses special issues presented by fiscally transparent entities such as partnerships and certain estates and trusts. In general, paragraph 8 relates to entities that are not subject to tax at the entity level, as distinct from entities that are subject to tax, but with respect to which tax may be relieved under an integrated system. This paragraph applies to any resident of a Contracting State who is entitled to income derived through an entity that is treated as fiscally transparent under the laws of either Contracting State. Entities falling under this description in the United States include partnerships, common investment trusts under section 584 and grantor trusts. This paragraph also applies to US limited liability companies (“LLCs”) that are treated as partnerships for US tax purposes.

Under paragraph 8, an item of income, profit or gain derived by such a fiscally transparent entity will be considered to be derived by a resident of a Contracting State if a resident is treated under the taxation laws of that State as deriving the item of income.

The IRS give some examples:

68 US Department of the Treasury Technical Explanation of the Convention, accessible www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf

[1] For example, if a UK company pays interest to an entity that is treated as fiscally transparent for US tax purposes, the interest will be considered derived by a resident of the US only to the extent that the taxation laws of the United States treats one or more US residents (whose status as US residents is determined, for this purpose, under US tax law) as deriving the interest for US tax purposes. In the case of a partnership, the persons who are, under US tax laws, treated as partners of the entity would normally be the persons whom the US tax laws would treat as deriving the interest income through the partnership.

[2] Also, it follows that persons whom the United States treats as partners but who are not US residents for US tax purposes may not claim a benefit for the interest paid to the entity under the Convention, because they are not residents of the United States for purposes of claiming this treaty benefit. (If, however, the country in which they are treated as resident for tax purposes, as determined under the laws of that country, has an income tax convention with the UK, they may be entitled to claim a benefit under that convention.)

[3] In contrast, if, for example, an entity is organized under US laws and is classified as a corporation for US tax purposes, interest paid by a UK company to the US entity will be considered derived by a resident of the United States since the US corporation is treated under US taxation laws as a resident of the United States and as deriving the income.

[4] The same result obtains even if the entity were viewed differently under the tax laws of the UK (e.g., as not fiscally transparent in the first example above where the entity is treated as a partnership for US tax purposes). Similarly, the characterization of the entity in a third country is also irrelevant, even if the entity is organized in that third country. The results follow regardless of whether the entity is disregarded as a separate entity under the laws of one jurisdiction but not the other, such as a single owner entity that is viewed as a branch for US tax purposes and as a corporation for UK tax purposes. These results also obtain regardless of where the entity is organized (i.e., in the United States, in the UK, or, as noted above, in a third country).

[5] For example, income from US sources received by an entity organized under the laws of the United States, which is treated for UK tax purposes as a corporation and is owned by a UK shareholder who is a UK resident for UK tax purposes, is not considered derived by the shareholder of that corporation even if, under the tax laws of the United States, the entity is treated as fiscally transparent. Rather, for purposes of the treaty, the income is treated as derived by the US entity.

[6] These principles also apply to trusts to the extent that they are

fiscally transparent in either Contracting State. For example, if X, a resident of the UK, creates a revocable trust in the United States and names persons resident in a third country as the beneficiaries of the trust, X would be treated under US law as the beneficial owner of income derived from the United States. In that case, the trust's income would be regarded as being derived by a resident of the UK only to the extent that the laws of the UK treat X as deriving the income for UK tax purposes by application of the UK "settlor trust" rules.

An Exchange of Notes between the Governments of the UK and USA discusses the relation of para 1(8) (transparency) and para 1(4) (savings clause):

With reference to paragraph 8 of Article 1 (General scope)—

[1] it is understood that where an item of income, profit or gain is derived through a person which is a resident of a Contracting State the provisions of the paragraph shall not prevent that Contracting State from taxing the item as the income, profit or gain of that person.

The IRS continue:⁶⁹

[7] Paragraph 8 is not an exception to the saving clause of paragraph 4.⁷⁰ Accordingly, the notes confirm that paragraph 8 does not prevent a Contracting State from taxing an entity that is treated as a resident of that State under its tax law. For example, if a US LLC with UK members elects to be taxed as a corporation for US tax purposes, the United States will tax that LLC on its worldwide income on a net basis, without regard to whether the UK views the LLC as fiscally transparent. The portion of the notes relating to Article 24 (Relief from Double Taxation) provides rules for determining which Contracting State has the primary right to tax and which State must provide a credit in such circumstances.

I do not find this easy to follow, but think one can draw out 6 examples from the 7 paragraphs of the IRS explanation (my numbering):

69 US Department of the Treasury Technical Explanation of the Convention, accessible www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf

70 See 55.14.1 (US/UK DTA: Savings clause).

<i>eg</i> <i>no.</i>	Entity					resid. of person with interest in entity			For DT, item derived by:		IRS para
	<i>Transparent</i>	<i>Resid. (if opaque)</i>		<i>example</i>		<i>UK</i>	<i>US</i>	<i>3rd state</i>	<i>person</i>	<i>entity</i>	
	in UK	in US	3rd state	in US

2	n/r	y	n/r					y	n		[2],[4]
3	n/r	n	n/r	y	corp'n						[3],[4] ⁷¹
4	n				corp'n	y			n	y	[5]
5	y ⁷²				revoc. trust	y			y ⁷³		[6]
6	n ⁷⁴		n/r		revoc. trust	y			n ⁷⁵	n/r	[6]

The Exchange of Notes continues:

- [2] It is further understood that, where, by virtue of [para 1(8)],
- [a] an item of income, profit or gain is considered by a Contracting State to be derived by a person who is a resident of that Contracting State, and
- [b] the same item is considered by the other Contracting State to be derived [by that person or]⁷⁶ by a person who is a resident of that other Contracting State,

the paragraph shall not prevent either Contracting State from taxing the item as the income, profit or gain of the person considered by that State to have derived the item of income, profit or gain.

It is essential to have in mind which state is which; the paragraph is easier to follow if it is expanded to read:

- It is further understood that, where, by virtue of para 1(8),
- [a] an income/gain is considered by the UK to be derived by a person who is a resident of the UK, and
- [b] the same item is considered by the US to be derived by that person

⁷¹ US will tax corporation under savings clause.

⁷² So far as s.624 applies.

⁷³ So far as s.624 applies.

⁷⁴ So far as s.624 applies.

⁷⁵ So far as s.624 applies.

⁷⁶ I do not understand the words in brackets and would be grateful to any reader who could explain.

or by a person who is a resident of the US,
the paragraph shall not prevent

- [i] the UK from taxing the item as the income/gain of the person considered by the UK to have derived the item;
- [ii] the US from taxing the item as the income/gain of the person considered by the US to have derived the item.

55.15.1 *Section 624, 720 income; s.13, 86 gains*

The Exchange of Notes continues:

[3] It is further understood that, in applying [para 1(8)], the UK shall, exceptionally, regard an item of income, profit or gain arising to a person as falling within the paragraph where another person is charged to UK tax in respect of that item of income, profit or gain—

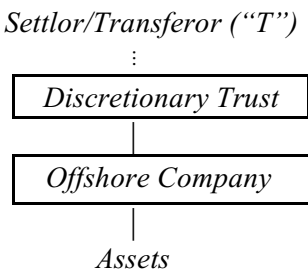

- (a) under [what is now s.624 ITTOIA & s.720 ITA]; or
- (b) under section [77]⁷⁷ or 86, TCGA 1992.

[4] It is further understood that, in applying the paragraph, a person shall be regarded as fiscally transparent under the laws of the UK in relation to an item of income, profit or gain where a charge is made on another person on that item either—

- (a) by virtue of section 13, TCGA 1992; or
- (b) because that other person has (or, under [what is now s.464 ITA]⁷⁸), is treated as having) an equitable right in possession in a trust.

Thus trusts within s.624 and companies within s.720 are regarded as fiscally transparent for IT; trusts within s.86 and companies within s.13 are regarded as fiscally transparent for CGT.

Take a standard structure:

77 [Author's note. Section 77 is now repealed.]

78 See 25.1.4 (Scots trusts).

Suppose:

- (1) T is domestic-law ordinarily UK resident but treaty-resident in the US.
 - (2) The entities are transparent for US tax so T regarded for US purposes as receiving OC's income.
 - (3) S.720 applies so T is taxed for UK tax purposes on OC's income
- This is a straightforward case within example 1 of my table. For US/UK treaty purposes, T is treated as receiving OC's income.

55.15.2 *Relationship to art.24 (foreign tax credit)*

The Exchange of Notes continues:

With reference to Article 24 (Relief from double taxation)—

it is understood that, under paragraph 4 or 8 of Article 1 (General scope), the provisions of the Convention may permit the Contracting State of which a person is a resident (or, in the case of the United States, a citizen), to tax an item of income, profit or gain derived through another person (the entity) which is fiscally transparent under the laws of either Contracting State, and may permit the other Contracting State to tax

- (a) the same person;
- (b) the entity; or
- (c) a third person

with respect to that item. Under such circumstances, the tax paid or accrued by the entity shall be treated as if it were paid or accrued by the first-mentioned person for the purposes of determining the relief from double taxation to be allowed by the State of which that first-mentioned person is a resident (or, in the case of the United States, a citizen), except that, in the case of an item of income from real property to which paragraph 1 of Article 6 (Income from real property) of the Convention applies, or a gain from the alienation of real property to which paragraph 1 of Article 13 (Gains) applies, the tax paid or accrued by the person who is a resident of the Contracting State in which the real property is situated shall be treated as if it were paid or accrued by the person who is a resident of the other Contracting State.

In the case where the same item of income, profit or gain derived through a trust is treated by each Contracting State as derived by different persons resident in either State, and

- (a) the person taxed by one State is the settlor or grantor of a trust; and
- (b) the person taxed by the other State is a beneficiary of that trust, the tax paid or accrued by the beneficiary shall be treated as if it were

paid or accrued by the settlor or grantor for the purposes of determining the relief from double taxation to be allowed by the State of which that settlor or grantor is a resident (or, in the case of the United States, a citizen), except that, in the case of an item of income from real property to which paragraph 1 of Article 6 (Income from real property) of the Convention applies, or a gain from the alienation of real property to which paragraph 1 of Article 13 (Gains) applies, the tax paid or accrued by the person who is a resident of the Contracting State in which the real property is situated shall be treated as if it were paid or accrued by the person who is a resident of the other Contracting State.

It is further understood that paragraphs 2 and 5 of Article 24 shall apply to such an item of income, profit or gain to the extent necessary to provide relief from double taxation.

55.15.3 *US partnerships and LLCs*

In the Double tax guidance note 3: Partnerships and LLCs claiming relief under the 2002 UK/USA DTC, HMRC say:

How the DTC treats US partnerships and LLCs

[HMRC set out Art.1(8) of the DTC and continue:] A transparent concern itself is therefore not given the right to found a claim for relief.

The reason that a transparent entity does not claim DT relief is that it is not “liable to tax” in a state which regards it as transparent, and so is not treaty-resident in that Contracting State.⁷⁹

Instead, that right is given individually to those ‘qualifying persons’ defined by the General Definitions Article [4]⁸⁰; and as further qualified by the Limitation on Benefits Article [23]⁸¹, who have derived their beneficial entitlement to income, profit or gain through their participation in the transparent concern.⁸²

The text throughout erroneously refers to “qualifying persons”; the correct

79 See 5.15 (Treaty Residence: Partnerships).

80 The original erroneously refers to article 3.

81 The original erroneously refers to article 27.

82 HMRC add: “It will be noted that this is not so very different from the situation that obtained under Article 4(1)(b)(i) of the ‘old’ 1980 DTC.” I am not sure about that, but the point does not now arise.

expression is *qualified* persons. HMRC continue with a concession:

What this would mean for partners and LLC members

Strictly speaking, HMRC should accept claims only from those partners and members who themselves fall to be regarded as ‘qualifying persons’ in their own right.

In practice, this would mean as many separate claims for one item of UK-source income paid to a transparent concern such as a partnership or LLC⁸³ as there are beneficial owners to whom it is then being paid on or distributed.

HMRC recognises that applying the DTC provisions in such a literal way would be unwelcome to its customers and could possibly hamper the business interests of both countries. It would be a retrograde step in customer service terms, and would not be justified on either an assessment of risk to the UK Exchequer or on compliance grounds. HMRC wants to keep a proper balance between the ease with which US residents should be able to claim relief with the administrative procedures and paperwork that must be employed by the UK Revenue to verify and give effect to such a claim.

HMRC’s approach to partnerships and LLCs

Accordingly, HMRC intends to continue its previous practice of taking claims in the names of both partnerships and LLCs.

These concerns should use the form US/Company 2002, and should provide (as before) a list of the names and addresses of the partners or members, with details of their respective shares of income. This is covered by the second bullet of the form’s own Guidance Note 2.

This form is tailored for use by the majority of those non-individual businesses and concerns which are covered by detailed provisions of the DTC - most notably by the Limitations on Benefit Article 23, which lays down very specific tests for defining the ‘qualified persons’ who can benefit under the treaty. There is therefore no separate section for transparent concerns such as partnerships or LLCs.

What partnerships and LLCs are asked to do

HMRC Residency ask partnerships and LLCs to complete the US/Company 2002 as follows

- * Parts A and B in full
- * Part C in full, as appropriate
- * Part D if repayment of UK tax is claimed
- * Part E if appropriate
- * Part F in full, with the general or managing partner/member signing the declaration
- * With the additional details as requested in the US-Company 2002 Notes, which is part of the claim form.

Claimants are also free to attach any statement or schedule in support of the claim, as they believe would help explain their circumstances or the basis of the

83 The manual is considering a LLC which is transparent under US law.

claim.

What HMRC will do

HMRC will consider the replies to all the above, and the information supplied. Consistent with previous practice, where the facts allow the reasonable conclusion that all beneficial owners of the income for whose shares relief is being claimed are ‘qualifying persons’ within the meaning of the DTC, then HMRC will process things in the normal way. This will more often than not involve a reference to the tax office for the UK payer, under normal internal liaison arrangements.

If the information given in with the claim form does not allow this conclusion, considering in particular the tests set out in Article 23, HMRC will probably have to contact claimants with further specific questions and requests for information before it can consider finalising processing of things.

HMRC do not want to add to the time taken to resolve matters. Where possible, it will start processing the claim, on a ‘without prejudice’ basis and pending satisfactory conclusion of any correspondence.

HMRC will be as quick as possible, with due consideration for customers’ business needs, and with sympathy and understanding for any compliance difficulties that the process might cause them.

As with any claim, letting HMRC have an advance copy of the form US/Company 2002 (at the time it is submitted to the IRS for certification) may allow it to flag up any points of difficulty at an early stage, and opens up the possibility of anticipating what is needed or might be done before the certified form arrives.

No doubt some high level lobbying has taken place. In relation to claims for relief from deduction at source, HMRC say (inconsistently) that they adopt a strict approach.⁸⁴

55.16 “Subject to tax”

Some treaties provide exemption for income which is “subject to tax”. This is not in the OECD Model, and only survives in a diminishing number of treaties, but for instance Art. VI (Interest) of the Greece/UK treaty provides:

Any interest or royalty derived from sources within one of the territories by a resident of the other territory, *who is subject to tax in that other territory in respect thereof* and does not carry on a trade or business in the first territory through a permanent establishment situated therein, shall be exempt from tax in that first territory.

84 See 19.12.5 (Relief when borrower is a partnership).

So far as the issue concerns foreign tax it would ultimately be decided by foreign tax authorities and courts, but the HMRC view may well represent an international consensus. So it is relevant to note that INT Manual provides:

162020. ‘Subject to tax’ [September 2011]

The terms of some agreements provide that a resident of the UK will be entitled to exemption or relief from the foreign tax on certain types of income only if he is subject to tax on that income in the UK.

A person is regarded as subject to tax if, for example ...

- e) the remittance basis applies (see RDRM30005 onwards): he is subject to tax only on the sums remitted.

Similarly, in the context of the lower-paid employee exemption, the RDR Manual provides:

32070 - Remittance Basis: Accessing the remittance basis: Claiming the remittance basis: Calculation of income tax liability - exemption for non-domiciles with small amounts of foreign employment income [June 2010]

...Subject to Foreign Tax

Although ‘subject to a foreign tax’ might in some circumstances mean that the individual has actually paid some tax on the foreign income to a foreign tax authority, actual payment is not a necessary requirement to take advantage of this exemption.

For example, given the levels of foreign income involved there might be nothing due to be paid on part or all of the income, as a result perhaps of a foreign countries’ own personal allowances systems, or similar tax provisions which are akin to such allowances, such as a tax rate band of 0 per cent. Such income would still be considered to be ‘subject to a foreign tax’ in the context of this exemption.

CHAPTER FIFTY SIX

EU LAW AND UK TAXATION

56.1 EU law and UK taxation – Introduction

This chapter considers the effect of EU law on UK tax law. A full discussion would require (at least) a book to itself. Many such books have been written; as the issues are EU wide, we can benefit in the UK from the work of scholars across the EU.

The terminology used to describe European law and institutions can be confusing. I follow the guidance in “The European Union: a guide to terminology, procedures and sources”.¹

Under the Lisbon Treaty, the Treaty Establishing the European Community is renamed: the Treaty on the Functioning of the European Union (TFEU). It may be helpful to set out the former and present numbers of the articles discussed here:²

Subject	EC Treaty	TFEU	EEA Agreement
Freedom of establishment	43	49	31
- public policy exception	45	51	32
- for companies	48	54	34
Free movement of capital	73b	63	40
- justification	73d	65

56.1.1 *Cross references*

See too 7.9 (EU restriction on exit taxes).

56.2 Relationship of EU law and UK law

The primacy of EU law over UK domestic law hardly needs to be stated, but to begin at the beginning: in *Thoburn v Sunderland City Council*, Laws LJ stated the fundamental proposition:

All the specific rights and obligations which EU law creates are by the 1972 Act³ incorporated into our domestic law and rank supreme: that is, anything in our substantive law inconsistent with any of these rights and obligations is abrogated or must be modified to avoid the inconsistency. This is true even where the inconsistent municipal provision is contained in primary legislation.⁴

It follows that there is a “tension, if not an inconsistency between national jurisdiction over direct taxation and EC Treaty freedoms, at least once those freedoms are interpreted as prohibiting unjustified differential tax treatment of national and foreign EU companies.”⁵

Settled case law puts it this way:

although direct taxation falls within the competence of the Member States, the latter must none the less exercise that competence consistently with Community law.⁶

56.2.1 *CJEU case law*

CJEU case law is unlike case law in common law jurisdictions such as the

3 The reference is to s.2 European Communities Act 1972 which provides: “All such rights, powers, liabilities, obligations and restrictions from time to time created or arising by or under the Treaties, and all such remedies and procedures from time to time provided for by or under the Treaties, as in accordance with the Treaties are without further enactment to be given legal effect or used in the UK shall be recognised and available in law, and be enforced, allowed and followed accordingly.”

4 [2003] QB 151 at [69].

5 *Thin Cap Claimants v HMRC* [2011] STC 738 at [7].

6 *Stauffer* at [15].

UK.⁷

The CJEU gives one short, single judgment.

This contains a set of short, broad propositions, mostly repeated verbatim from earlier cases. Once repeated often enough, the propositions are described as “settled case-law...” The selection of case(s) to cite as authority for these propositions is therefore somewhat arbitrary; one cannot cite them all.

There is little detailed consideration of earlier cases.

There is little consideration of the precise words of the TFEU. The language of the TFEU is of course different from UK statutory drafting, and typically states broad principles and contains vague evaluative terms which give the CJEU freedom to develop its own principles. Decisions are based on policy considerations to a greater extent than is the case, or at least than is expressed to be the case, in the common law.

Because the judgment is translated into English, the prose occasionally contains infelicities or errors of translation.

The EC maintain a useful updated list of CJEU cases relating to direct taxation.⁸ At the present time it lists about 500 cases. New case law is constantly arriving, and almost all this chapter needs review from year to year.

56.3 EC infringement proceedings

The European Commission has formally requested the UK to amend two anti-avoidance rules: the TAA provisions and s.13 TCGA. The request takes the form of reasoned opinions, the second step of the infringement procedure.⁹

The text of the reasoned opinions is not published, but it is not hard to guess. An EC press release provides the essential details. The first point relates to s.720 ITA:

The first infringement relates to the UK's “transfer of assets abroad” legislation. Under this legislation, if a UK resident individual invests in a company by transferring assets to it, and if this company is

7 In this respect Scotland is like a common law jurisdiction.

8 http://ec.europa.eu/taxation_customs/resources/documents/common/infringements/case_law/court_cases_direct_taxation_en.pdf

9 Art.258 TFEU.

incorporated and managed in another Member State, then the investor is subject to tax on the income generated by the company to which he/she contributed the assets. However, if the same individual invested the same assets in a UK company, only the company itself would be liable for tax.

The second point relates to s.13 TCGA:

The second infringement relates to the attribution gains to member of non-UK resident companies regime. Under this legislation, if a UK-resident company acquires more than a 10% share of a company in another Member State, and the latter company realises capital gains from the sale of an asset, the gains are immediately attributed to the UK company, which becomes liable for corporation tax on these capital gains. If, on the other hand, the UK company had invested in another UK resident company, only the latter would be taxable on its capital gains.

The EC analysis is as follows:

In both cases, the Commission considers there to be discrimination, seeing as investments outside the UK are taxed more heavily than domestic investments. The difference in tax treatment between domestic and cross-border transactions restricts two fundamental principles of the EU's Single Market, namely of the freedom of establishment and the free movement of capital contrary to Articles 49 and 63 TFEU and Articles 31 and 40 of the EEA Agreement.

The Commission is of the opinion that both restrictions are disproportionate, in the sense that they go beyond what is reasonably necessary in order to prevent abuse or tax avoidance and any other requirements of public interest.¹⁰

The invalidity of these important anti-avoidance rules ought to be a matter of considerable public concern. It should not however be a matter of surprise, since practitioners have taken this view for some years, and the CIOT have publically lobbied the European Commission to take this step.¹¹

Where an EU defence is in point, taxpayers should not pay the tax, and where they have paid tax in the past they should now put in repayment claims.

¹⁰ IP/11/158, 16 February 2011.

¹¹ Letters from CIOT to EC dated 6 Feb 2009 (s.720) and 10 Feb 2009 (s.13).

In the absence of a satisfactory response the Commission may refer the UK to the CJEU. But reforms have been announced¹² though the details are not available at the time of finalising this chapter.

56.4 Which freedom?

In this chapter we are primarily concerned with freedom of establishment (“FoE”) and free movement of capital (“FMC”).

Generally a case could be brought under more than one head, but it is settled law that CJEU picks the main one - the one which gives the best arguments that there is a breach of EU law - and ignore others. For instance, in *Geurts*:

The legislation at issue in the main proceedings primarily affects freedom of establishment and falls, in accordance with the case-law of the Court, within the scope only of the Treaty provisions concerning that freedom. If, as submitted by the applicants in the main proceedings, it were to be accepted that such a national measure has restrictive effects on the free movement of capital, such effects would have to be seen as an unavoidable consequence of any restriction on freedom of establishment and do not justify an independent examination of that measure in the light of Articles 56 EC to 58 EC.¹³

This approach has the attraction of shortening the arguments.

A consequence is that there is no case law discussing the differences in defences between the different freedoms, but being so policy based, they probably come to the same even if differently expressed.

56.5 Freedom of establishment

Article 49 TFEU provides:

[1] Within the framework of the provisions set out below, restrictions on the freedom of establishment of nationals of a Member State in the territory of another Member State shall be prohibited.

12 See 27.1.1 (TAA forthcoming reforms); 50.1.2 (S.13 forthcoming reforms).

13 Case C-464/05 at [16].

The following fundamental points are settled case law:

- (1) Even though Article 49 TFEU is, according to its terms, aimed particularly at ensuring that foreign nationals are treated in the host Member State in the same way as nationals of that State, it also prohibits the Member State of origin from hindering the establishment in another Member State of one of its own nationals as well as of nationals of other Member States residing in its territory.
- (2) The rules regarding equal treatment prohibit not only overt discrimination by reason of nationality or, in the case of companies, their seat, but all covert forms of discrimination which, by the application of other criteria of differentiation, lead in fact to the same result.

56.5.1 What is “establishment”?

Article 49 TFEU continues:

[2] Such prohibition shall also apply to restrictions on the setting-up of agencies, branches or subsidiaries by nationals of any Member State established in the territory of any Member State.

[3] Freedom of establishment shall include

[a] the right to take up and pursue activities as self-employed persons and

[b] to set up and manage undertakings, in particular companies or firms within the meaning of the second paragraph of Article 54, under the conditions laid down for its own nationals by the law of the country where such establishment is effected, subject to the provisions of the chapter relating to capital.

In *Stauffer*¹⁴ an Italian charity (tax exempt in Italy) received rent from property in Germany. German law allowed charity tax exemption only for charities established in Germany. Accordingly the German Revenue sought to impose German tax on the rental income.

The ECJ held that there was no breach of freedom of establishment:

14 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

18 According to the case-law of the Court, the concept of establishment within the meaning of the Treaty is a very broad one, allowing a Community national to participate, on a stable and continuous basis, in the economic life of a Member State other than his State of origin and to profit therefrom, so contributing to economic and social interpenetration within the Community in the sphere of activities as self-employed persons.

19 However, in order for the provisions relating to freedom of establishment to apply, it is generally necessary to have secured a permanent presence in the host Member State and, where immovable property is purchased and held, that property should be actively managed. It is clear from the account provided by the national court that the foundation does not have any premises in Germany for the purposes of pursuing its activities and that the services ancillary to the letting of the property are provided by a German property management agent.

20. It must therefore be concluded that the provisions governing freedom of establishment are not applicable in circumstances such as those in the dispute in the main proceedings.

The charity did not carry out any charitable work in Germany and did not actively manage its German investment property. The German property was not an agency, branch, subsidiary or undertaking. The charity did not have an “establishment” in Germany.

While the premiss seems correct, the conclusion that FoE is not applicable is far from self-evident. There was a restriction of Stauffer’s freedom to establish itself *outside* Germany. Because the foundation was established in Italy, it incurred a German tax burden which would not have been paid if it had been established in Germany. However the argument was not put on this basis and the ECJ did not consider it.

Suppose the foundation had had an establishment in Germany - for instance if it ran a college there or provided services to its tenant rather than using a German property management agent. In that case it would have had an establishment in Germany. Assuming Germany would have denied the charity exemption, would it then have succeeded under this head? Since it succeeded under free movement of capital, the point seems somewhat academic.

56.5.2 What is a restriction on freedom of establishment?

Cadbury Schweppes v IRC [2006] STC 1908 concerned this corporate

structure:

The ECJ summarised the CFC legislation thus:

44 Where the resident company has incorporated a CFC in a Member State in which it is subject to a lower level of taxation within the meaning of the legislation on CFCs, the profits made by such a controlled company are, pursuant to that legislation, attributed to the resident company, which is taxed on those profits. Where, on the other hand, the controlled company has been incorporated and taxed

[1] in the UK or

[2] in a State in which it is not subject to a lower level of taxation within the meaning of that legislation,

the latter is not applicable and, under the UK legislation on corporation tax, the resident company is not, in such circumstances, taxed on the profits of the controlled company.

It is not self-evident that the CFC legislation restricted the UK parent's FoE, but the ECJ held that it did:

45 That difference in treatment creates a tax disadvantage for the resident company to which the legislation on CFCs is applicable. Even taking into account ... the fact ... that such a resident company does not pay, on the profits of a CFC within the scope of application of that legislation, more tax than that which would have been payable on those profits if they had been made by a subsidiary established in the UK, the fact remains that under such legislation the resident company is taxed on profits of another legal person. That is not the case for a resident company with

[1] a subsidiary taxed in the UK or

[2] a subsidiary established outside that Member State which is not subject to a lower level of taxation.

46 ... the separate tax treatment under the legislation on CFCs and the resulting disadvantage for resident companies which have a subsidiary

subject, in another Member State, to a lower level of taxation are such as to hinder the exercise of freedom of establishment by such companies, dissuading them from establishing, acquiring or maintaining a subsidiary in a Member State in which the latter is subject to such a level of taxation. They therefore constitute a restriction on freedom of establishment within the meaning of Articles [49 & 54 TFEU].

The CFC rules only applied to companies in some member states, namely, those subject to a lower level of taxation (as defined). Because of this selective operation the CFC rules clearly restricted FoE, since given the choice in siting a subsidiary in:

(1) a MS with a lower level of taxation or

(2) a MS with a higher level of taxation (but less than the UK)

one would in principle prefer the latter. But the point made at 44[1] and 45[1] shows that the CFC rules would restrict freedom of establishment even if they applied to every MS, regardless of the level of taxation just because they did not apply to a UK subsidiary. At first sight that seems surprising. But the income of the CFC is subject to foreign tax as well as UK tax. Although UK tax allows a credit for the foreign tax, the burden of dealing with two tax systems is a significant one.¹⁵ That might be a deterrent against a UK parent establishing a CFC in any other MS.

56.5.3 *Generalising from CFCs to other anti-avoidance rules*

The CFC legislation attributes income of a non-resident to a UK resident. The attribution of income or gains of a non-resident to a UK resident is also a feature of all the anti-avoidance rules discussed in this chapter.

56.5.4 *Who is entitled to freedom of establishment?*

Article 49 prohibits restrictions on the freedom of establishment of “nationals of a Member State” ie non-nationals do not have FoE.

Article 54 TFEU extends the freedom to companies and firms:

[1] Companies or firms formed in accordance with the law of a Member State and having their registered office, central administration or principal place of business within the Community shall, for the purposes

15 DTA relief was (unfairly) denied: see 55.2.2 (*Bricom*).

of this Chapter, be treated in the same way as natural persons who are nationals of Member States.

Article 54 goes on to define “companies or firms”:

"Companies or firms" means companies or firms constituted under civil or commercial law, including cooperative societies, and other legal persons governed by public or private law, save for those which are non-profit-making.

56.6 Public policy exemption to restriction on FoE

Article 52 TFEU provides an exception for public policy:

The provisions of this Chapter and measures taken in pursuance thereof shall not prejudice the applicability of provisions laid down by law, regulation or administrative action providing for special treatment for foreign nationals on grounds of public policy, public security or public health.

56.6.1 Abuse and justification compared

In *Cadbury Schweppes* the ECJ considered separately (1) whether there was abuse of EU law and (2) whether the CFC legislation was justified. I would have thought that the two questions were linked, for provisions to prevent abuse would necessarily be justified.

Perhaps the distinction is:

- (1) in cases of abuse, the EU law defence fails (even if UK provisions are unlawful in EU law);
- (2) in the absence of abuse, the EU law defence succeeds (assuming the UK's provisions are contrary to EU law).

56.6.2 Abuse

Cadbury Schweppes dealt with abuse quite shortly:

35 It is true that nationals of a Member State cannot attempt, under cover of the rights created by the Treaty, improperly to circumvent their national legislation. They must not improperly or fraudulently take advantage of provisions of Community law.

Here of course everything depends on the meaning of the elastic term “improperly”. (“Fraudulently” adds nothing since anything which is fraudulent must also be improper.)

37 As to freedom of establishment, the Court has already held that the fact that the company was established in a Member State for the purpose of benefiting from more favourable legislation does not in itself suffice to constitute abuse of that freedom ...

38 ... it follows that the fact that in this case Cadbury Schweppes decided to establish [its CFCs] in [Ireland] for the avowed purpose of benefiting from the favourable tax regime which that establishment enjoys does not in itself constitute abuse.

We do not know what abuse is, but we know what it is not, and if this is not abuse then use of a MS company (ie a company established in any MS) for tax avoidance is never an abuse.

56.6.3 *Justification*

The ECJ next considered whether there was a justification for the CFC legislation:

55 ... in order for a restriction on the freedom of establishment to be justified on the ground of prevention of abusive practices, the specific objective of such a restriction must be to prevent

- [1] conduct involving the creation of wholly artificial arrangements which do not reflect economic reality,
- [2] with a view to escaping the tax normally due on the profits generated by activities carried out on national territory.

There are two requirements for justification: [1] is a conduct requirement and [2] is an intention requirement. Both must be present but the conduct requirement is the more important because if there are “wholly artificial arrangements which do not reflect reality” then the intention requirement is likely to be satisfied.

“Artificial” is of course vague.¹⁶ What is the conduct requirement?

16 See 31.17.2 (Artificial transactions and devices).

... objective circumstances showing that, despite formal observance of the conditions laid down by Community law, the objective pursued by freedom of establishment, as set out in paras 54 and 55 of this judgment, has not been achieved.

When is the objective of FoE not achieved?

65 In those circumstances, in order for the legislation on CFCs to comply with Community law, the taxation provided for by that legislation must be excluded where, despite the existence of tax motives, the incorporation of a CFC reflects economic reality.

What is economic reality?

66 That incorporation must correspond with an actual establishment intended to carry on genuine economic activities in the host Member State, as is apparent from the case-law recalled in paras 52 to 54 of this judgment.

The expression “genuine economic activities” does not take us much further.

67 ... that finding must be based on objective factors which are ascertainable by third parties with regard, in particular, to the extent to which the CFC physically exists in terms of premises, staff and equipment.

68 If checking those factors leads to the finding that the CFC is a fictitious establishment not carrying out any genuine economic activity in the territory of the host Member State, the creation of that CFC must be regarded as having the characteristics of a wholly artificial arrangement. That could be so in particular in the case of a “letterbox” or “front” subsidiary.

The metaphors of “letterbox” and “front” and the epithet “fictitious” and “artificial” are conclusions rather than useful tests or even indications of what is “economic reality”. The use of the words “genuine”, “reality” and “artificial” is normally a sign of intellectual desperation. The ECJ offers a comment on “artificial”:

69 On the other hand, as pointed out by the Advocate General in point 103 of his Opinion, the fact that the activities which correspond to the

profits of the CFC could just as well have been carried out by a company established in the territory of the Member State in which the resident company is established does not warrant the conclusion that there is a wholly artificial arrangement.

On the other hand, “premises, staff and equipment” are easily understood. The question is: how large a premises, how many staff and how much equipment is needed?

My conclusion is that what constitutes “genuine economic activities” is still at present a fairly open question.¹⁷ The answer should become clearer when the *Cadbury Schweppes* litigation is complete.

56.7 Free movement of capital

Article 63 TFEU provides:

1. Within the framework of the provisions set out in this Chapter, all restrictions on the movement of capital between Member States and between Member States and third countries shall be prohibited.

17 For HMRC views see “Taxation of the foreign profits of companies: a discussion document” (June 2007) accessible

www.hm-treasury.gov.uk/consult_foreign_profits.htm:

“In *Cadbury Schweppes*, the ECJ confirmed that there is a legitimate role for CFC rules under the Treaty, so long as the rules do not tax the profits of genuine economic activities in overseas subsidiaries.

The Government considers that, in making this judgment, the Court intended to draw a meaningful distinction between profits from a genuine commercial activity and profits that have been artificially divorced from the activity that creates them. So CFC rules should not be protectionist: but at the same time they may permit the fair allocation of taxing rights between Member States, so respecting the Treaty.

Commentators who have criticised the changes the Government has made in [s.751A ICTA] claim that in the light of *Cadbury Schweppes* only highly artificial transfers may be targeted by CFC rules. Subsequent rulings from the Court (e.g. on the thin capitalisation case) support the Government’s wider reading – but full certainty on this point is unlikely to be achieved in the short term.”

But the EC did not agree with HMRC: Reference: IP/11/606, 19 May 2011:

“Despite the corrective measures taken by the UK, the Commission considers that the UK is still not fulfilling its obligations under Articles 49 and 63 (freedom of establishment and free movement of capital) of the Treaty on the Functioning of the EU Indeed, UK provisions may lead, in certain cases, to an additional taxation of profits made by subsidiaries engaged in genuine economic activities in other EU Member States or EEA countries..”

2. Within the framework of the provisions set out in this Chapter, all restrictions on payments between Member States and between Member States and third countries shall be prohibited.

In this book I refer to third countries as “**non-EU states**” as that seems clearer.

56.7.1 *Meaning of “movement of capital”*

The TFEU does not define “movement of capital” or “payments between member states”. In practice the CJEU has regard to the list in directive 88/361/EEC (now repealed).¹⁸ The list - too long to set out here - is not exhaustive.¹⁹ It includes gifts and inheritance. It is not necessary that the donor or donee actually themselves engage in cross-border economic activity for the applicability to inheritances of the free movement of capital provisions, so free movement of capital is important for IHT.

56.7.2 *What is a restriction on movement of capital?*

In *Stauffer*²⁰ the ECJ held that a charity income tax relief applying only to income of charities established in Germany constituted a restriction on free movement of capital (which one might have thought a clear case).

Similarly in *Persche*²¹, an income tax relief for donors to German charities only constituted a restriction on free movement of capital. This was just a rerun of the arguments in *Stauffer* and the conclusion was inevitable.

The point was followed again in *Missionswerk*²² at [24]- [26] where a Belgian succession duty relief restricted to Belgian non-profit organisations was held to be a restriction on free movement of capital.

18 Directive for the implementation of Article 67 of the Treaty, 24 June 1988.

19 See *Missionswerk Werner Heeukelbach eV v 'État belge* Case C-25/10 at [15].

20 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

21 *Persche v Finanzamt Lüdenscheid* [2009] STC 586.

22 *Missionswerk Werner Heeukelbach eV v 'État belge* Case C-25/10.

56.7.3 *Movement of capital to non-EU countries*

Free movement of capital applies not just between member states but also between member states and non-EU countries. It is the only one of the four basic freedoms which applies to non-EU countries.

There is however a transitional relief in the case of non-EU countries. Article 64 provides:

1. The provisions of Article 63 shall be without prejudice to the application to third countries of any restrictions which exist on 31 December 1993 under national or Union law adopted in respect of the movement of capital to or from third countries involving direct investment — including in real estate — establishment, the provision of financial services or the admission of securities to capital markets. ...

Most important UK anti-avoidance legislation already existed in 1993, so this would preclude EU law remedies based on FMC for a non-EU country.

56.8 Justification for restriction on free movement of capital

Article 65 TFEU provides an exception to the general principle of free movement of capital:

1. The provisions of Article 63 shall be without prejudice to the right of Member States
 - (a) to apply the relevant provisions of their tax law which distinguish between taxpayers who are not in the same situation
 - [i] with regard to their place of residence or
 - [ii] with regard to the place where their capital is invested.
 - (b) to take all requisite measures to prevent infringements of national law and regulations, in particular in the field of taxation and the prudential supervision of financial institutions, or to lay down procedures for the declaration of capital movements for purposes of administrative or statistical information, or to take measures which are justified on grounds of public policy or public security.
2. The provisions of this Chapter shall be without prejudice to the applicability of restrictions on the right of establishment which are compatible with this Treaty.

One might have thought that article 65(1) must be in point, as UK and non-UK entities are not “in the same situation with regard to their place of residence.” However the provision is limited by what follows:

3. The measures and procedures referred to in paragraphs 1 and 2 shall not constitute a means of arbitrary discrimination or a disguised restriction on the free movement of capital and payments as defined in Article 63.

It is not the case that *any* discrimination on the ground of residence or location of property is permitted as restrictions must not be “arbitrary” or “disguised restrictions on free movement of capital”.

This is settled law, for instance, in *Mattner*:

32 In so far as that provision of Article [65 TFEU] is a derogation from the fundamental principle of the free movement of capital, it must be interpreted strictly. It cannot therefore be interpreted as meaning that all tax legislation which draws a distinction between taxpayers on the basis of their place of residence or the Member State in which they invest their capital is automatically compatible with the Treaty...

33 The derogation in Article 58(1)(a) EC is itself limited by Article 58(3) EC, which provides that the national provisions referred to in paragraph 1 of that article ‘shall not constitute a means of arbitrary discrimination or a disguised restriction on the free movement of capital and payments as defined in Article 56’.

These principles leave the CJEU free to devise its own principles and that has been the main issue in the CJEU case law.

56.8.1 “*Objectively comparable*”

The test of where the CJEU draw the line is settled law, for instance, *Stauffer*:

32. According to the case law, for national tax legislation such as that at issue in the main proceedings, ... to be regarded as compatible with the Treaty provisions on the free movement of capital, the difference in treatment must concern situations which are not objectively comparable...

The CJEU are fond of the word “objectively” but it seems to me that it adds rather little; perhaps the point is that the answer is decided by the CJEU and not by anyone else.

“Comparable” is the word always used in this context, but “substantially the same” would, I think, be more idiomatic English. That would highlight the fact that the formula poses, rather than answers, the question of what is required. In other words, “objectively comparable” is a vague and evaluative expression, which should perhaps be enclosed in quotation marks.²³

56.8.2 *Necessity*

Stauffer continues:

... or be justified by overriding reasons in the general interest, such as the need to safeguard the coherence of the tax system or effective fiscal supervision ... In order to be justified, moreover, the difference in treatment between charitable foundations with unlimited tax liability [ie qualifying for tax exemption] in Germany and foundations of the same kind established in other member states must not go beyond what is necessary in order to attain the objective of the legislation in question.²⁴

56.8.3 *Excessive tax cost of abolishing restrictions on free movement of capital*

The CJEU does not think much of this argument. In *Thin Cap Claimants v HMRC*:

It is settled law that reduction in tax revenue does not constitute an overriding reason in the public interest which may justify a measure which is in principle contrary to a fundamental freedom.²⁵

56.8.4 *Need to prevent tax avoidance*

The need to prevent avoidance is accepted as a reason for a restriction on EU freedoms only if the legislation is targeted so that it is limited to cases

23 Contrast the discussion of the view that people who are “relevantly equal” should pay the same amount of tax; see 1.3.1 (What is fairness?).

24 *Stauffer* at [32].

25 [2007] STC 326 at [36].

of tax avoidance. The idea that tax avoidance legislation should be limited in this way is something to which the UK government have paid lip-service but it has not been reflected in practice:

... at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.²⁶

It will not surprise tax practitioners that when UK legislation is put to this test, it regularly fails. This is not just a UK problem:

37. As regards more specifically the justification based on the risk of tax evasion,²⁷ it is important to note that the legislation at issue here does not have the specific purpose of preventing wholly artificial arrangements, designed to circumvent German tax legislation, from attracting a tax benefit, but applies generally to any situation in which the parent company has its seat, for whatever reason, outside the Federal Republic of Germany. Such a situation does not, of itself, entail a risk of tax evasion, since such a company will in any event be subject to the tax legislation of the State in which it is established²⁸

56.8.5 *Need for effective supervision of taxpayers/to prevent fraudulent evasion*

This has not helped national governments. The CJEU takes the view that the mutual assistance directive, now 2010/24/EU, allows national governments “to obtain all the information that may be necessary to effect a correct assessment of a taxpayer’s liability to tax”.²⁹

56.8.6 *Counteracting tax advantages of non-residents*

Mattner concerned German gift tax which made an allowance where donor or donee was resident in Germany. If donor and donee were not resident in Germany, the allowance was not available but the taxpayers had the advantage that German gift tax applied only to property in

26 Ussher and Walford, *National Treasure* (Demos, 2011) accessible www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925.

27 The meaning is “avoidance”: see

28 *Lankhorst-Hohorst GmbH v Finanzamt Steinfurt* [2003] STC 607.

29 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439 at [50].

Germany.

The CFEU did not regard this as justification:

40 In the first place, the Finanzamt submits that if the ErbStG provided in such a case for the application of the same allowance to gifts between non-residents and gifts involving a resident, Ms Mattner would be able, by making use of the same tax advantages in her Member State of residence, in which she has unlimited tax liability, to benefit from multiple allowances.

41 On this point, the Court has already held, in its case-law on the free movement of capital and inheritance tax, that a national of a Member State cannot be deprived of the possibility of relying on the provisions of the Treaty on the ground that he is profiting from tax advantages which are legally provided for by the rules in force in a Member State other than his State of residence

42 In any event, the Member State in which the immovable property which is the subject of the gift is located cannot, in order to justify a restriction on the free movement of capital arising from its own legislation, rely on the possibility, beyond its control, of the donee benefiting from a similar allowance by another Member State, such as that in which the donor and the donee resided on the date of the gift, which might wholly or partly offset the loss incurred by the donee as a result of the smaller allowance when calculating the gift tax payable in the former Member State ...

43 A Member State cannot rely on the existence of an advantage granted unilaterally by another Member State – in this case the Member State in which the donor and the donee reside – to escape its obligations under the Treaty, in particular under the Treaty provisions on the free movement of capital ...

44 That is all the more the case if, as the German Government submitted at the hearing, the Member State in which the donor and the donee reside applies a smaller allowance than that granted by the Member State in which the immovable property which is the subject of the gift is situated, or sets the value of that property at a higher figure than that determined by the latter State.

45 Moreover, it appears from the case-file submitted to the Court that, in calculating the tax on gifts, the national legislation at issue in the main proceedings purely and simply excludes the full-rate allowance where the donor and donee are not resident in the Member State in which the property gifted is situated, without taking into consideration the possible grant of a similar allowance in another Member State, such as that in which the donor and the donee reside, or the method of

determining the value of the property in the latter Member State.

56.8.7 *Ensuring a balanced allocation between members states of the power to tax*

This was recognised as a possible justification in the *Thin Cap* case [2011] STC 738 at [55].

56.8.8 *Cohesion*

In *Stauffer* the ECJ said:

52 In that regard, the Court has acknowledged that the need to safeguard the cohesion of a tax system may justify a restriction on the exercise of the fundamental freedoms guaranteed by the Treaty.

I am not sure what is meant by the metaphorical terms “coherence” or “cohesion” of the tax system, if it is anything other than a general term for the more specific needs set out above: the need to collect enough tax, and to prevent avoidance and evasion. However the concept does not justify much. It did not help the German government in *Stauffer*. In *Thin Cap Claimants v HMRC* the Court of Appeal concluded:

The permissible scope of the justification of the need to maintain the coherence of the tax system was held to be very narrow indeed, so narrow as to approach vanishing point.³⁰

56.9 Freedom to provide services

Article 56 TFEU provides:

Within the framework of the provisions set out below, restrictions on freedom to provide services within the Union shall be prohibited in respect of nationals of Member States who are established in a Member State other than that of the person for whom the services are intended.

In *Cadbury Schweppes* the Advocate General considered and dismissed arguments based on this:

30 [2011] STC 738 at 26. The point will need to be reviewed when the case is final.

34 The applicants submit that the provisions of the Treaty on freedom to provide services also apply in this case. They claim that the legislation at issue makes the supply of financial services by [the CFCs] to their UK resident parent company more difficult. ...

35 I am not convinced by the applicants' argument....

36. Admittedly, if the legislation at issue has the result that a resident company is dissuaded from establishing a subsidiary in another Member State, it also has the result that the supply of services by such a subsidiary out of that Member State is prevented. However, that latter restriction is a consequence of the hindrance to establishment. In the present case, it is exactly the freedom to establish a subsidiary in that Member State which is at the core of the proceedings. I do not therefore see the relevance of reliance on the rules on freedom to provide services as well. In any event, I do not believe that examination of the legislation at issue in the light of that freedom, in addition to freedom of establishment, can change the result of my analysis.

56.10 Other aspects of EU law

56.10.1 Free movement of persons

Article 45 TFEU provides:

1. Freedom of movement for workers shall be secured within the Union.
2. Such freedom of movement shall entail the abolition of any discrimination based on nationality between workers of the Member States as regards employment, remuneration and other conditions of work and employment..."

56.10.2 Discrimination on grounds of nationality

Article 18 TFEU provides:

Within the scope of application of the Treaties, and without prejudice to any special provisions contained therein, any discrimination on grounds of nationality shall be prohibited...

56.10.3 State aid

State Aid rules constitute a significant restriction on the UK's freedom to impose tax rules.

There is an interesting interaction with Scottish devolution. The UK government cannot set a corporation tax rate that varies across the UK: this would be regarded as providing preferential treatment for different areas. Different rates can only therefore be achieved by devolving tax powers. To be EU law compliant the proposal would have to meet the criteria set out in *Portugal v Commission*, (the Azores case): institutional autonomy, procedural autonomy and fiscal autonomy.³¹

Gibraltar's proposed corporation tax regime was held to breach the rules in *Commission v Government of Gibraltar and United Kingdom*.³²

State Aid may sometimes be convenient for the government in that it provides a convenient defence for actions which might otherwise be more controversial.³³

This only rarely concerns practitioners in the context of the issues discussed in this book.

56.11 Section 13 TCGA

Section 13 TCGA is a restriction on FoE of an individual who owns a non-resident company established in a MS. That is less than self-evident, since:

- (1) A UK company pays tax on its chargeable gains at the corporation tax rate;
- (2) An individual setting up a foreign company, pays tax on its gains at the personal CGT rate.

The tax rates have fluctuated wildly. At the present time, the personal CGT rate is higher than the mainstream corporation tax rate, so the rule does discourage and so indirectly restrict FoE. In some years the personal CGT rate has been lower than the mainstream corporation tax rate.³⁴ Far from being a restriction on FoE, the rule was then one which encouraged foreign establishment! But if one focuses on the individual alone and not on the structure as a whole, there was still a FoE restriction.

What if the individual owns less than 100% of the MS company? FoE confers only a right to "set up and manage". But this is not taken too strictly. In *Geurts* there was a breach of FoE where:

³¹ Case C-88/03

³² Cases C-106/09, C-107/09.

³³ See 4.1 (Trustee residence – Introduction).

³⁴ Though that was not so before 2008/09 when the top personal CGT rate was 40%.

the exemption in question in the main proceedings applies to family companies, namely those in which at least 50% of the share capital was held, in the three years preceding the death, by the deceased, perhaps jointly with members of his close family, which gave those persons influence over the decisions of the company concerned and made it possible for them to decide upon its activities.³⁵

What if the company is owned by a trust? The right to FoE is a right of nationals of a MS (extended to companies and firms). What is the nationality of a trust? One might look to the nationality of the trustees in their private capacities, or treat the trust as an entity with a nationality.

There can be no question of justification, because the CFC legislation has a motive exemption³⁶ but s.13 TCGA has none.

This view is recognised by the reforms proposed in the FA 2013: see 47.1.2 (Forthcoming reforms).

56.12 Transfer of assets abroad

Section 720 ITA restricts FoE where:

- (1) the transferor is a national of a MS; and
- (2) the person abroad is a MS company.

In fact (unlike the CFC case) the restriction on FoE is self-evident: if an individual sets up a foreign company within s.720 they would pay income tax on the profits of the company, and the amount of tax was more than would have been if the company had been UK resident because income tax rates generally exceed corporation tax rates.

Is the restriction justified? Only if one can construe the motive defence in a manner compatible with the CJEU guidelines. Obviously by ordinary principles of construction that is not possible, but that did not stop the Court of Appeal in *Vodafone 2 v HMRC (No 2)* [2009] STC 1480.

If the person abroad is a trust in another MS, s.720 is incompatible only if the trust is an undertaking within the meaning of Article 49 TFEU. But in such cases s.624 ITTOIA will usually apply, and as that applies to UK as well as non-resident trusts, it does not restrict freedom of establishment.

This view is recognised by the reforms proposed in the FA 2013: see

³⁵ Case C-464/05at [13].

³⁶ Which might be stretched to meet the conduct requirement; see *Vodafone 2 v HMRC* [2009] STC 1480.

25.1.1 (Forthcoming reforms).

56.13 Section 86 TCGA

Section 86 TCGA constitutes a restriction on FoE where the settlor is a MS national, provided the trust is an undertaking within the meaning of Article 49 TFEU.³⁷

56.14 IHT and EU law

In December 2011 the EC stated:

... The second³⁸ inheritance tax problem that citizens can encounter is discrimination. Some Member States apply a higher tax rate if the assets, the deceased and/or the heir are located outside their territory. In such cases, EU law is clear: Member States are obliged to respect the basic principles of non-discrimination and free movement set out in the Treaties. The Working Paper published today sets out the principles on non-discriminatory inheritance and gift tax, using case-law to illustrate them. This will help Member States to bring their provisions into line with EU law, while also raising citizens' awareness of the rules which Member States must respect....

Next steps

... In 3 years time, the Commission will present an evaluation report showing how the situation has evolved, and decide on this basis whether further measures are necessary at national or EU level. Meanwhile, the Commission, as guardian of the Treaties, is continuing to take the necessary steps to act against discriminatory features of Member States taxation rules.³⁹

IHT is gradually becoming EU law compliant, with recent changes including the extension of agricultural property relief to land in the EU

37 As to whether a trust is an “undertaking” see Dennis Weber, *Tax Avoidance and the EC Treaty Freedoms*, Kluwer Law International, (2005), p.27.

38 The first problem was a lack of IHT DTAs; see 64.4 (EU law aspects).

39 Press release IP/11/1551. For the Communication, Recommendation and Staff Working Paper, see:

http://ec.europa.eu/taxation_customs/taxation/personal_tax/inheritance/index_en.htm

(2009) and the extension of IHT relief to EU charities (2010 - 2011).⁴⁰

The EC Working Paper provides a helpful summary of case law relevant to IHT as at December 2011.⁴¹ The CJEU found a breach of EU law in 8 of the 10 reported cases. The success rate is comparable to that of HMRC in the UK Courts.

56.14.1 *Discrimination against non-residents*

A number of cases involved more favourable rules given to residents of the domestic MS as against residents of other MS: these have regularly been held to breach FMC or FoE:

Barbier:⁴² Domestic IHT law allowed a deduction from the value of an estate if the deceased lived in that Member State at the time of death but not if the deceased resided in another Member State. The rule breached FMC. The value of an obligation attached to the property should be taken into account for tax purposes irrespective of the Member State of residence of the deceased.

Eckelkamp:⁴³ Domestic IHT law disallowed a deduction for charges on immovable Belgium property owned by non-resident. The rule breached FMC.

Arens-Sikken:⁴⁴ Domestic IHT law allows an heir is to deduct debts relating to the property inherited only where the person whose estate is being administered was residing, at the time of death, in the Member State in which the property is situated. The rule breached FMC. For the purposes of assessing the compatibility with EC law of domestic inheritance tax legislation, the existence of a tax advantage (ie tax credit)

40 See Kessler & Brown, *Taxation of Charities and Non-profit Organisations* (8th ed, 2011) para 2.4 (New tax definition of charity) (online version www.taxationofcharities.co.uk).

41 Commission Staff Working Paper, "Non-discriminatory inheritance tax systems: principles drawn from EU case-law"
http://ec.europa.eu/taxation_customs/resources/documents/taxation/personal_tax/inheritance/working_paper_en.pdf

42 Case C-364/01.

43 Case C-11/07.

44 Case C-43/07.

granted unilaterally by another Member State is not relevant.

Mattner:⁴⁵ A domestic gift tax relief applicable only where donor and donee are resident in Germany. The rule breached FMC.

Thus the restriction on the IHT spouse exemption for foreign domiciled spouses is not EU law compliant.⁴⁶

Van Hilten-Van Der Heijden:⁴⁷ Domestic IHT law taxed the estate of a national who dies within 10 years of ceasing to be resident in that MS: rule compatible with FMC, particularly if the legislation in question allowed relief for inheritance taxes levied by other States. The important point was that the rule did not distinguish between residents and non-residents.

Thus UK IHT deemed domicile rules are EU law compliant.

56.14.2 *Discrimination against foreign property*

Jäger:⁴⁸ Domestic IHT law allowed relief comparable to IHT agricultural property relief for agricultural land in Germany. The rule breached FMC.

For practical implications, see 58.4.3 (Exemption for foreign government securities).

56.14.3 *Miscellaneous*

Geurts:⁴⁹ Domestic IHT law allowed an exemption for family undertakings which employed at least five workers in the same Member State. The rule breached FoE.

Halley:⁵⁰ Domestic IHT law provided a limitation period for the tax authority to challenge valuations in IHT returns. The period was 2 years from the date on which the IHT return was made. However, in the case

45 Case C-510/08.

46 See 69.2.1 (EU law aspects).

47 Case C-513/03 [2008] STC 1245.

48 Case C-256/06.

49 Case C-464/05.

50 Case C-132/10.

of shares held in a company whose centre of effective management was situated outside Belgium, the period was 10 years. The rule breached FMC.

56.15 Reimbursement of tax paid in breach of EU law

The EC say:

The European Commission has formally requested the United Kingdom to change its Finance Act 2007 to ensure that the abolition of the "remedy for repayment of taxes paid in mistake of law" is subject to proper transitional rules. Under EU law, the reimbursement of taxes paid in violation of EU rules should be granted according to the national rules on internal tax reimbursements and should not be made impossible or excessively difficult. A retroactive limitation of the rights of taxpayer in this respect contravenes this principle. The request of the Commission takes the form of a 'reasoned opinion', the second step of an EU infringement procedure. In the absence of a satisfactory response within two months, the Commission may refer the United Kingdom to the EU's Court of Justice.

The UK's Finance Act 2007 retroactively abolishes one of the remedies used by taxpayers seeking reimbursement of taxes paid in breach of EU law, thereby preventing the exercise of rights conferred by EU law in certain cases. This measure seems to exceed the limits of national procedural autonomy stemming from Article 4(3) of the Treaty on the European Union.

Since the limitation period introduced does not provide for any proper transitional rules (except in certain circumstances), it is therefore almost impossible to exercise the rights conferred by EU law.⁵¹

Proceedings have now begun. The EC say:

The European Commission has decided to refer the United Kingdom to the EU's Court of Justice for abolishing the "remedy for repayment of taxes paid in mistake of law" without proper transitional rules.

Under EU law, taxes that must be reimbursed when these taxes have been levied in breach of EU rules should be repaid according to the national rules on internal tax reimbursements. This reimbursement

⁵¹ IP/10/1251 (30 September 2010).

should not be made impossible or excessively difficult. In this respect, a retroactive limitation of the rights of taxpayers without proper transitional rules goes against this principle.

The UK retroactively abolished one of the remedies used by taxpayers seeking reimbursement of taxes paid in breach of EU law. No proper transitional rules are provided for (except in certain limited circumstances). As a result, it is therefore practically impossible in certain cases to exercise the rights conferred by EU law. This goes against EU rules as this measure exceeded the limits of national procedural autonomy (Article 4(3) of the Treaty on the European Union).

On 30 September 2010 the Commission already formally requested the United Kingdom (IP/10/1251) to ensure compliance with the EU rules, but the latter refused to change its law.⁵²

It will be interesting to see how this develops.

52 IP/12/64 (26/01/2012)/

DEEMED DOMICILE FOR IHT

57.1 Deemed domicile for inheritance tax – Introduction

In principle, an individual must have either a UK domicile or a foreign domicile; there is no middle way.¹ But a foreign domiciliary could often secure effective exemption from inheritance tax and live almost indefinitely in the UK without acquiring a UK domicile of choice. The inheritance tax code therefore seeks to identify foreign domiciliaries who have close UK connections and provides that for IHT purposes, such individuals are generally treated as if they were UK domiciliaries.

57.1.1 *Exceptions*

The three situations where the IHT deemed domicile rule does not apply are discussed elsewhere:

- (1) FOTRA securities and qualifying certificates of Islanders²
- (2) Pre-CTT double tax treaties³
- (3) Visiting forces⁴

57.2 Deemed UK domicile

Section 267(1) IHTA provides:

¹ See 2.1 (Domicile).

² See 58.5.1 (Disapplication of IHT deemed domicile rule). For these exemptions generally, See 58.4 (Non-settled property: FOTRA securities); 58.11 (Trusts: FOTRA Securities); 58.8 (Individual domiciled in Channel Islands or Isle of Man).

³ See 65.4 (Domicile requirement of treaty IHT exemption).

⁴ See App 4.5.1 (Deemed domicile).

A person not domiciled in the UK at any time (in this section referred to as “the relevant time”) shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if—

- (a) he was domiciled in the UK within the three years immediately preceding the relevant time, or
- (b) he was resident in the UK in not less than seventeen of the twenty years of assessment ending with the year of assessment in which the relevant time falls.

In this book:

“Actual domicile” means domicile under the general law.

“Deemed domicile” means UK domicile treated existing for IHT purposes under this provision.

“The 3 year domicile rule” is condition (a)

“The 17-year residence rule” is condition (b)

57.2.1 *3-year domicile rule*

The first rule concerns the person who is actually UK domiciled and who loses their UK domicile. Such a person is deemed domiciled in the UK for three years from the date of their change of domicile. Unlike the 17 year residence rule, this period is not related to years of assessment.

57.2.2 *17-year residence rule: time of acquisition of deemed domicile*

The second rule concerns the person who is not actually UK domiciled but who becomes resident here. Once they have been resident in the UK for 17 out of the last 20 years of assessment they become deemed UK domiciled. In the discussion below I abbreviate “years of assessment” to “tax years”.

A person may meet this condition before they have been present in the UK for 17 complete years. In theory, fifteen years and two days may suffice. An individual who arrives in the UK on 5 April 1983 may arguably be resident in the UK in the tax year 1982/83. (Although this seems surprising, this would be the HMRC view, if the individual came to the UK to live here permanently or intending to stay for three years or more.) If they were still here on 7 April 1998 they may be resident in the tax year 1998/99. The 17-year residence condition would then be satisfied.

57.2.3 17-year residence rule: time of loss of deemed domicile

If an individual has been UK resident continuously for a block of 17 tax years, they must reach their fourth year of non-residence before ceasing to be deemed domiciled under the 17-year residence rule. The matter is best illustrated by a table:

Year	Resident Years	20 years ending year:				
		1999/00	2000/01	2001/02	2002/03	2003/04
1980/81	<i>Not relevant</i>	1				
1981/82	<i>Not relevant</i>	2	1			
1982/83	<i>Not relevant</i>	3	2	1		
1983/84	Resident 1	4	3	2	1	
1984/85	Resident 2	5	4	3	2	1
1985/86	Resident 3	6	5	4	3	2
1986/87	Resident 4	7	6	5	4	3
1987/88	Resident 5	8	7	6	5	4
1988/89	Resident 6	9	8	7	6	5
1989/90	Resident 7	10	9	8	7	6
1990/91	Resident 8	11	10	9	8	7
1991/92	Resident 9	12	11	10	9	8
1992/93	Resident 10	13	12	11	10	9
1993/94	Resident 11	14	13	12	11	10
1994/95	Resident 12	15	14	13	12	11
1995/96	Resident 13	16	15	14	13	12
1996/97	Resident 14	17	16	15	14	13
1997/98	Resident 15	18	17	16	15	14
1998/99	Resident 16	19	18	17	16	15
1999/00	Resident 17	20	19	18	17	16
2000/01	Non-resident 1		20	19	18	17
2001/02	Non-resident 2			20	19	18
2002/03	Non-resident 3				20	19
2003/04	Non-resident 4					20
Deemed domicile in 2003/04		Yes	Yes	Yes	Yes	No

Suppose an individual is resident in the UK throughout the block of 17 tax years from 1983/84 to 1999/00. We have to identify a relevant time. We then have to identify the tax year in which the relevant time falls. The table considers transfers of value in each of the 5 years 1999/00 to 2003/04.

We then have to identify “the twenty years of assessment ending with

the year of assessment in which the relevant time falls”. For each of the years 1999/00 to 2003/04 those 20 years include the 17-year block (shaded in the table), so the individual is deemed UK domiciled.

57.2.4 *Comparison of the two rules*

It is easy to envisage cases where a person is caught by one rule and not by the other.

For instance, consider a person who has always been UK resident and domiciled and who ceases to be UK domiciled on 1 August 1998. They cease to be caught by the 3-year domicile rule on 1 August 2001. However, as they were UK resident in 1998/99, they will still be deemed UK domiciled under the 17-year residence rule until 6 April 2002 (the start of the year 2002/03).

Again, a UK domiciled person may reside outside the UK for twenty years, and subsequently acquire an actual foreign domicile. Such a person is not affected by the 17-year residence rule. But three more years must pass before they cease to be UK domiciled under the 3 year domicile rule.

57.2.5 *Meaning of “residence” for 17-year residence rule*

Section 267(4) IHTA provides:

For the purposes of this section the question whether a person was resident in the UK in any year of assessment shall be determined as for the purposes of income tax.

Thus in this context “residence” has its normal income tax meaning, whatever that is.

For years prior to 1993/94 s.267(4) IHTA provided:

For the purposes of this section the question whether a person was resident in the UK in any year of assessment shall be determined as for the purposes of income tax *without regard to any dwelling house available in the UK for his use.*

This excluded the (supposed) available accommodation rule but it went further and disregarded available accommodation for all residence

purposes.⁵ This remained significant when determining residence for the years up to 1992/93 which ceased to feature as part of the 17-year calculation in 2010. The issue might still arise in determining whether trust property is excluded property, as that depends on the domicile of the settlor at the time the trust was made.

IHT Manual provides:

10685. D31- Domicile outside the United Kingdom [July 2011]

We follow any residency rulings made by CNR with one qualification. For the tax years before 6 April 1993, someone was considered to be resident in the UK if they set foot here during the year and had a dwelling house in the UK, which was available for their use. However, availability of a dwelling house was ignored for the purposes of our 17/20 rule (Section 267(4) IHTA 1984). In the absence of any information, you should assume that residency rulings for Income Tax made prior to 93/94 were **not** made on the basis of this rule alone.

It is considered that the split year concession (ESC A11) does not apply, so years of arrival and departure are counted as full years of residence.

57.3 Deemed domiciliary leaving the UK

Suppose:

- (1) A person who is not actually UK domiciled becomes deemed UK domiciled, having spent 17 tax years resident here.
- (2) They then cease to be resident in the UK. In the fourth tax year after departure, they cease to satisfy the 17-year residence rule.

Is the person still treated as domiciled here for three years under the 3-year domicile rule? In other words, does the deemed domicile rule in (a) apply to a person who was only a deemed domiciliary under (b)? The answer is, no. If that were wrong, then the following absurdity arises. Suppose T, non-resident for many years, ceases to be actually UK domiciled. In years 1 -3 T is still deemed domiciled. In year 4 T ceases to be deemed domiciled. HMRC could argue that since T was (deemed) domiciled in year 3, T must wait three more years before T can cease to be deemed domiciled. Then, of course, three years later T is still deemed domiciled. T can never throw off the deemed domicile. This shows that “domicile”

⁵ See 3.6 (Accommodation in the UK).

in s.267(1)(a) means actual domicile and not deemed domicile. The word should have the same meaning throughout the section.⁶

57.4 Domicile of child of a deemed domiciliary

A child in principle acquires the domicile of their father at the time of their birth as a domicile of origin; and if the father's domicile changes while the child is under 16, the child in principle acquires the father's new domicile as a domicile of dependency. Does one have regard to the deemed domicile rule for this purpose? Suppose:

- (1) A father ("F") is actually foreign domiciled but deemed UK domiciled when his child ("C") is born; or
- (2) F is not deemed UK domiciled when C is born but becomes deemed UK domiciled while C is under 16.

It is the old question of how far one carries the deeming. It is suggested that the deemed domicile of F does not affect the domicile of C. The question may not arise directly in that form, as the domicile of children and young persons only rarely needs to be ascertained. When C is adult, it is suggested that his domicile for IHT purposes is determined on the basis of his actual foreign domicile of origin; one does not deem C to have a fictional UK domicile of origin. For s.267 only requires F to be treated as UK domiciled. The section is not needed for C, as C will himself become deemed UK domiciled once he has been UK resident for 17 tax years.

57.5 1974 transitional rules

Section 267(3) contains five transitional rules:

Para (a) of subsection (1) above shall not apply in relation to a person who (apart from this section) has not been domiciled in the UK at any time since 9th December 1974 ...

This disapplies the 3-year domicile rule only. It would only apply in a relatively rare case of someone who was actually UK domiciled and ceased to be so before 9 December 1974.

⁶ This is consistent with *Russell v IRC* [1988] STC 195.

and para (b) of that subsection shall not apply in relation to a person who has not been resident there at any time since that date ...

This disapplies the 17-year residence rule only. It would only apply to someone who had been UK resident for 17-years and ceased to be so before 9 December 1974.

and that subsection shall be disregarded—

- (a) in determining whether settled property which became comprised in the settlement on or before that date is excluded property,

This applies to pre-9 December 1974 settlements.

that subsection shall be disregarded— ...

- (b) in determining the settlor's domicile for the purposes of section 65(8) above in relation to settled property which became comprised in the settlement on or before that date, and
- (c) in determining for the purpose of section 65(8) above whether the condition in section 82(3) above is satisfied in relation to such settled property.

This applies to the exemption for FOTRA securities.

57.6 Tax planning for the deemed domiciliary

(1) The emigrant deemed domiciliary

An individual who has emigrated from the UK (ie acquired a foreign domicile of choice) remains an “emigrant” deemed domiciliary for three years. The individual's inheritance tax planning, if in good health, is simple; they should refrain from making any gifts until they have ceased to be deemed UK domiciled. If they wish to make substantial gifts before then, they might consider purchasing FOTRA securities or some other property which qualifies as excluded property. Deathbed planning would be the same. In addition they might consider taking out a loan to purchase excluded property: see 61.6 (Individual borrows and acquires excluded property).

(2) The immigrant deemed domiciliary

The immigrant deemed domiciliary is the foreign domiciliary who has resided for a long period in the UK and become deemed UK domiciled.

Their scope for planning is greatly restricted; they should really take proper steps before the statutory deadline when their deemed domicile arises.

If the individual is actually domiciled in the Isle of Man or in the Channel Islands then he has some scope for acquiring excluded property in the form of exempt saving certificates.⁷ Otherwise it may be possible to cease to be UK resident for the necessary period of three tax years so that the deemed domicile rules cease to apply.

⁷ See 58.8 (Individual domiciled in Channel Islands or Isle of Man).

CHAPTER FIFTY EIGHT

EXCLUDED PROPERTY FOR IHT

58.1 Excluded property – Introduction

“Excluded property” is broadly¹ outside the scope of inheritance tax.

There are nine classes of excluded property:

- (1) Non-settled property:²
 - (a) foreign situate property;
 - (b) AUTs and OEICs;
 - (c) FOTRA securities.
- (2) Settled property:
 - (a) foreign situate property;
 - (b) AUTs and OEICs;
 - (c) FOTRA securities.
- (3) Qualifying certificates of Islanders (Channel Islands/Isle of Man domiciliaries).
- (4) Property of visiting forces.³
- (5) Reversionary interests in settled property.

Thus with an economy of language the exemptions for excluded property are used to serve several purposes:

- (1) A territorial exemption.
- (2) Limiting the scope of IHT:
 - (a) in order to encourage UK investment by foreigners (FOTRA securities, UK funds);
 - (b) to fit the scheme of the Act or avoid double taxation (relief for

1 See 58.15 (Occasions where excluded property is relevant for IHT).

2 A note on terminology. I use the term “non-settled property” to describe property which is not held in a settlement for IHT purposes. The term used in the IHT Manual is “unsettled property”.

3 See App 4.4.1 (Excluded property).

reversionary property, etc).

This chapter sets out the definitions of excluded property. It also considers works of art, foreign bank accounts and foreign pensions, which (though not excluded property) qualify for some similar exemptions.

See too 60.1 (IHT consequences of transfers between trusts).

58.2 Non-settled property: foreign situate property

Section 6(1) IHTA provides:

Property situated outside the UK is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.

Excluded property status depends on the domicile of the individual at the time the disposition is made. Likewise, excluded property status depends on the location of assets at that time only. It is irrelevant that the assets may previously have been situate in the UK. If a foreign domiciled individual transfers their property out of the UK the moment before they die, or the moment before they make a gift of the property, they obtain the full benefit of excluded property status: see *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728. On the situs of assets, see 77.1 (Concepts of situs).

58.2.1 *Gift from foreign bank account to UK account*

What is the position if a foreign domiciled donor makes a gift from their foreign bank account (ie, not a UK situate asset) to a UK bank account of the donee? In general, as a matter of banking law, the donor's cheque or other instruction to the bank to transfer funds from the donor's account to another account is revocable until it is carried out.⁴ So the gift will be regarded as taking effect when completed, in short, when the money is credited to the donee's UK account. Nevertheless the gift is not a transfer of value for IHT purposes. When funds are held in A's account, A has an asset (a debt). When funds are transferred from A's account to B's account, A's asset comes to an end and B acquires a new asset (a debt).

⁴ For completeness: in any particular case it would be relevant to consider the documentation and proper law concerned; but that is not going to affect the IHT analysis.

“It is something of a misnomer to speak of the transfer of funds, as there is no actual transfer of coins and bank notes from the payer to the payee, and no assignment of the debt owed to the payer by their own bank.”⁵

Section 3 IHTA provides:

(1) ... a transfer of value is a disposition made by a person ... as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition; ...

(2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

The terms of section 3(2) are met, so the gift is not a transfer of value. I stress this because the contrary has been suggested, but the position is perfectly clear.

58.3 Non-settled property: authorised unit trusts and OEICs

Section 6(1A) IHTA provides:

[a] A holding in an authorised unit trust⁶ and

[b] a share in an open-ended investment company⁷

is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.

AUTs and OEICs will generally be UK situate assets. I refer to them together as “**UK funds**”. These are excluded property for all IHT purposes.

The relief only applies to a *holding* in an AUT or a *share* in an OEIC so

5 Brindle & Cox, *The Law of Bank Payments* (4th ed 2010), para 3-002; Fox, *Property Rights in Money* (2008) para 5.23-5.31. See *R v Preddy* [1996] AC 815.

6 Defined in s.272 IHTA:

“‘authorised unit trust’ means a scheme which is a unit trust scheme for the purposes of the Income Tax Acts (see section 1007 of the ITA 2007) and in the case of which an order under section 243 of the Financial Services and Markets Act 2000 is in force.”

7 Defined in s.272 IHTA:

“‘open-ended investment company’ means an open-ended investment company within the meaning given by section 236 of the Financial Services and Markets Act 2000 which is incorporated in the UK.”

other interests in AUTs and OEICs (for instance, options) are not excluded property. Perhaps that does not arise in practice.

The exemption for UK funds uses the expression “beneficially entitled” and the exemption for FOTRA securities uses the expression “beneficial ownership” but it is considered that the two have the same meaning; for a discussion see 58.6 (Beneficial ownership).

58.4 Non-settled property: FOTRA securities

The next category of excluded property consists of FOTRA securities⁸ (certain UK government securities popularly called exempt gilts). FOTRA securities are UK situate assets. Section 6(2) IHTA provides:

Where securities have been issued by the Treasury subject to a condition authorised by section 22 of the F(No.2)A 1931 (or section 47 of the F(No. 2)A 1915) for exemption from taxation so long as the securities are in the beneficial ownership of persons of a description specified in the condition, the securities are excluded property if they are in the beneficial ownership of such a person.

FOTRA securities issued from 1 April 2005 are titled “Treasury Gilts”. Earlier securities have one of the following names:

- Treasury Loan/Stock
- Conversion Loan/Stock
- Exchequer Loan/Stock
- Consolidated Loan/Stock
- War Loan

These names have only historic significance.

Products issued by National Savings and Investments are not FOTRA securities.

58.4.1 *Interest on FOTRA securities*

The IHT Manual provides:

27260 Exclusion of interest on exempt securities [February 2006]

The exclusion for exempt securities can also apply to certain payments

⁸ “Free of Tax to Residents Abroad”.

etc of interest on the securities. Payments that qualify for the exclusion are:

- [1] warrants or coupons for interest already received but not encashed at the date of the relevant chargeable event
- [2] apportionment of interest due up to, but receivable after, the date of the chargeable event
- [3] in the case of a trust, any interest payments already encashed but held – at the date of the chargeable event – by the trustees pending distribution in the administration of the trust. This is so even if no separate moneys can be identified as relating directly to interest on exempt securities.

The **exclusion for interest does not apply** to any warrants or coupons already encashed, or payments of interest already received, by the beneficiary in his lifetime, in connection with any chargeable event occurring after the encashment or the receipt. This is so whether he is the absolute owner of the exempt securities or a beneficiary under a trust.

This is correct, but point [3] seems generous.⁹

58.4.2 *Use of FOTRA securities for tax planning*

The exemption is useful for individuals who are:

- (1) UK domiciled (or deemed domiciled);
- (2) not ordinarily resident in the UK (so they can satisfy the conditions for exemption).

⁹ For completeness, the Manual continues:

“27261 Exclusion of repayment of IT on exempt securities [February 2006]

Repayment of income tax relating to interest on exempt securities also falls within the exclusion for such securities:

if an existing warrant for repayment remains uncashed at the date of the relevant chargeable event

in the case of a trust, if the proceeds of an encashed warrant are held – at the date of the chargeable event – by the trustees pending distribution in the administration of the trust or

if the repayment due up to the date of the chargeable event is receivable after the date. A repayment encashed – before a chargeable event – by the person beneficially entitled to the repayment is not eligible for the exclusion on that event.”

Before 1998 interest was generally paid subject to deduction of tax. But now interest is paid without deduction of tax (unless the owner asks for tax to be deducted) so this point will not arise.

58.4.3 *Exemption for foreign government securities*

The EC say:

The underlying [EU law] principles could equally prohibit, inter alia, inheritance tax treatment that ...

c. is less favourable in the case of public debt securities issued by other Member States than in the case of similar securities issued by the taxing Member State.¹⁰

Although this is expressed tentatively, it is considered that the exemption conferred on UK gilts is in breach of EU law: it is an unjustified restriction on free movement of capital.¹¹ Similar exemption ought to be allowed for foreign national securities. This matters for two classes of individuals who are not ordinarily UK resident:

- (1) Those who are deemed UK domiciled but not actually domiciled. They would qualify for IHT exemption on all FOTRA securities, and under EU law qualify for exemption on equivalent foreign state securities.
- (2) Those who are actually UK domiciled. They qualify for IHT exemption on (in short) FOTRA securities issued after

Of course, foreign securities are non-UK situate property so in the hands of individuals who are foreign domiciled and not deemed UK domiciled, the IHT treatment is the same and no EU law issues arise.

58.5 Conditions for FOTRA exemption

FOTRA securities were first issued under s.47 F(No 2)A 1915. This was a temporary measure:

The Treasury may, if they think fit, during the continuance of the present war and a period of twelve months thereafter, issue any securities which they have power to issue for the purpose of raising any money or any loan with a condition that neither the capital nor the interest thereof shall

10 Commission Staff Working Paper “Non-discriminatory inheritance tax systems: principles drawn from EU case-law” (December 2011) para 3 accessible http://ec.europa.eu/taxation_customs/resources/documents/taxation/personal_tax/inheritance/working_paper_en.pdf

11 See 56.14.2 (Discrimination against foreign property).

be liable to any taxation, present or future, so long as it is shown in manner directed by the Treasury that the securities are in the beneficial ownership of persons who are neither domiciled nor ordinarily resident in the UK, and securities issued with such a condition shall be exempt accordingly.

This section was repealed in 1927, but the repeal did not affect tax exemptions for securities previously issued and one such security (War Loan 1952 Or After) is still in existence.

Section 22(1) F(No.2)A 1931 provides:

Any securities issued by the Treasury under any Act may be issued with the condition that -

(a) so long as the securities are in the beneficial ownership of persons who are not ordinarily resident in the UK, the interest thereon shall be exempt from income tax; and

(b) so long as the securities are in the beneficial ownership of persons who are neither domiciled nor ordinarily resident in the UK, neither the capital thereof nor the interest thereon shall be liable to any taxation present or future.

Subsequent statutory provisions do not specify the condition for exemption: they give the Treasury a discretion to specify the condition in the terms of the issue. Section 60 FA 1940 provides:

The power of the Treasury under s.22 F(No.2)A 1931 to issue securities with the condition as to exemption from taxation specified in that section shall extend to the issuing of securities with that condition so modified, whether as to the extent of the exemption or the cases in which the exemption is to operate, as the Treasury may specify in the terms of the issue.

So the details must be found in the prospectus for each gilt concerned.¹² Section 154(1) FA 1996 provides:

The modifications which, under s.60 of the FA 1940, may be made for the purposes of any issue of securities to the conditions about tax

¹² Prospectuses can be found on

www.dmo.gov.uk/rpt_parameters.aspx?rptCode=D8E&page=Prospectuses

exemption specified in s.22 of the F(No.2)A 1931 shall include a modification by virtue of which the tax exemption contained in any condition of the issue applies, as respects capital, irrespective of where the person with the beneficial ownership of the securities is domiciled.

It is hard to see the need for this, but it does no harm.

Before 6 April 1998 some gilts were issued without FOTRA conditions. These have now been given the benefit of FOTRA conditions by s.161 FA 1998:

(1) Subject to the following provisions of this section, any gilt-edged security¹³ issued before 6 April 1998 without FOTRA conditions shall be treated in relation to times on or after that date as if—

- (a) it were a security issued with the post-1996 Act conditions; and
- (b) those conditions had been authorised in relation to the issue of that security by virtue of s.22 of the F(No. 2)A 1931.

[(2)(3) are transitional provisions now spent]

(4) In this section “FOTRA conditions” means any such conditions about exemption from taxation as are authorised in relation to the issue of a gilt-edged security by virtue of section 22 of the Finance (No 2) Act 1931...

(5) In this section “the post-1996 Act conditions” means the FOTRA conditions with which 7.25% Treasury Stock 2007 was first issued by virtue of s.22 of the F(No. 2)A 1931.¹⁴

(7) This section does not apply to any 3½% War Loan 1952 Or After which was issued with a condition authorised by virtue of s.47 of the F(No. 2)A 1915.

So all UK government securities have had FOTRA status, irrespective of the original terms of issue but there are two classes of FOTRA securities with different conditions attached:

- (1) Gilts where the condition requires the individual to be domiciled and ordinarily resident outside the UK. These include:
 - (a) 3½% War Loan 1952 Or After, issued under s.47 F(No.2)A 1915.
 - (b) Gilts issued under s.22 F(No.2)A 1931, where this was the

13 “Gilt-edged securities” has the CGT definition: see s.161(6) FA 1998.

14 This was one of the first gilts issued in 1996/97. The condition provides: “the Stock will be exempt from all UK taxation, present or future, so long as it is shown that the Stock is in the beneficial ownership of persons who are not ordinarily resident in the UK”.

condition set out in the prospectus.

- (2) Where the condition requires the beneficial owner to be ordinarily resident outside the UK but domicile is irrelevant. This applies to:
- (a) Gilts issued before 6 April 1998 without FOTRA conditions; these now have the benefit of “post-1996 Act conditions” under s.161 FA 1998.
 - (b) Gilts issued after 1996, where the prospectus set out this condition. I understand that all gilts issued after 29 April 1996 contain this condition.

IHT Manual 27243 sets out a list of gilts where the requirement is that the beneficial owner is ordinarily resident outside the UK (domicile irrelevant). Para 27244 sets out a list of the gilts where the requirement is that the beneficial owner is neither domiciled nor ordinarily resident in the UK. However, it would be wise to check the prospectus in each case.

58.5.1 *Disapplication of IHT deemed domicile rule*

Section 267(2) IHTA provides:

Subsection (1) above [deemed domicile for IHT] shall not apply for the purposes of section 6(2) or (3) or 48(4) above ...

That is, the deemed domicile rules do not apply for the purposes of the exemptions conferring excluded property status on FOTRA securities and qualifying certificates of Islanders.¹⁵

The reason is historical. The concept of deemed domicile was introduced with CTT in 1974. At that time gilts had been issued free from taxation (including Estate Duty) if the owner was not (actually) UK domiciled. The deemed domicile rule could not have been applied to those gilts. All that the drafter needed to do was to disapply the deemed domicile rule to FOTRA securities in issue at the time of the introduction of CTT (now IHT). It was not necessary to disapply the deemed domicile rule to gilts issued later. But that is the rule. Presumably the intention was to avoid having two classes of FOTRA securities governed by different rules; or to encourage foreigners to continue to invest in FOTRA securities issued after 1974.

¹⁵ See 58.8 (Individual domiciled in Channel Islands or Isle of Man).

No doubt the same reasoning applied to qualifying certificates of Islanders.

The practical importance of this rule is diminished by the fact that it is only relevant to those FOTRA securities where IHT FOTRA exemption requires the owner to be domiciled outside the UK; in (I think) most cases, the exemption only requires the owner to be non-ordinarily resident, and domicile (deemed or actual) is irrelevant.

58.6 “Beneficial ownership” of FOTRA securities

The gilts must be in the “beneficial ownership” of the individual. The expression here has its English law/trust law meaning:

Although I might not, with Lord Diplock, have gone so far as to think that the expression “beneficial ownership” is a term of art, it is certainly one which has for several centuries had a very well-recognised meaning amongst property lawyers. And there can be no doubt that, in enacting a provision such as s 532(3) [ICTA], Parliament must have intended to adopt that meaning. It means ownership for your own benefit as opposed to ownership as trustee for another. It exists either where there is no division of legal and beneficial ownership or where legal ownership is vested in one person and beneficial ownership or, which is the same thing, the equitable interest in the property in another.¹⁶

In the following discussion I abbreviate the term to “ownership”.

There have been many cases discussing “ownership” in the context of company groups, and the reader who wishes to research this area further should refer to the discussion on group relief in corporation tax and SD textbooks. Unfortunately the case law is in disarray and a number of contradicting dicta can be found. But two propositions seem reasonably clear. Gilts remain in the ownership of a person even if they have granted a mortgage or charge.¹⁷ Gilts are not in the ownership of a person if they have entered into a contract of sale, even a conditional contract.¹⁸

Gilts remain in the ownership of an individual even if they have granted put and call options, according to *Sainsbury v O'Connor* 64 TC 208.

16 *J Sainsbury PLC v O'Connor* 64 TC 208 at p.250. For other meanings, see 24.12.1 (Meaning(s) of “beneficial ownership”).

17 *English Sewing Cotton v IRC* [1947] 1 All ER 679.

18 *Wood Preservation v Prior* 45 TC 112.

Ownership is not a precise term in English law and is used with a variety of meanings. Its common meaning is to denote the sum of all the rights which a person has over an asset; that is, ownership is a bundle of rights, or if you prefer, ownership has a number of incidents.¹⁹ In the case of gilts the bundle (or incidents) consists of the right to dividends, capital on redemption and rights of disposal.

Clearly, one can make some dent in the usual array of rights or incidents and still be regarded as an owner. This explains why one remains beneficial owner after granting a charge or licence. Where does one draw the line? The courts answer to this question has been confused because they insist that ownership must (with limited exceptions) be regarded as vested in one person or another.

This causes artificial results when property is subject to a contract of sale and it is said that ownership must be vested in either the vendor or purchaser. There is no reason why that should be so, if one remembers that ownership is no more than a convenient term for a bundle of rights. The better analysis is that ownership rights are split between vendor and purchaser. Neither should be regarded as “the” beneficial owner.²⁰ Likewise for property subject to an option. On this analysis, *Wood Preservation* was rightly decided but for the wrong reasons, and *Sainsbury* was wrongly decided. But however unconvincing the reasoning, the law on this point is settled below the Supreme Court.

58.6.1 *Beneficial ownership in Scotland*

The IHT Manual at 04031 discusses the expression “beneficially entitled”, in a passage which sheds a little light on beneficial ownership:

The use of the words ‘beneficially entitled’ means broadly that the estate includes only property

19 See Turner, “Some Reflections on Ownership in English Law” (1941) 19 Can. Bar Review 342; Harris *Property and Justice* (1996) p.125.

20 Likewise the courts have come to reject the dogma that “where ownership is vested in a trustee, equitable ownership must necessarily be vested in someone else because it is an essential requirement of a trust that it confers upon individuals a complex of beneficial legal relations which may be called ‘ownership’”. See *CPT Custodian Pty v Commissioner of State Revenue* [2005] 2 ALR 196 at [25] accessible www.austlii.org. Of course, the context in which the expression “beneficial owner” is used should always be considered.

- to which a person is entitled, or
- in which they have an interest for their own benefit.

In England, Wales and Northern Ireland this includes property which a person owns either legally or beneficially (IHTM04441).

So far, the text is unexceptionable. The discussion then turns to Scotland:

In Scotland, the term ‘ownership’ does not necessarily equate to beneficial entitlement, for example where the land that is being transferred is subject to missives of sale [or]²¹ there is an unrecorded disposition. This is because of the Scottish system of unitary ownership. Any case where the question is in point should be referred to TG (IHTM01081) for advice.

The text raises the interesting suggestion that the position in Scots law is not the same as in English law.²² The passage concludes:

A person is not beneficially entitled to property held

- purely in a fiduciary capacity (for example as a trustee)
- in a representative capacity (for example as an executor or a trustee in bankruptcy), or
- by way of security (for example as a mortgagee prior to foreclosure).

...

This is clearly right.

58.6.2 *Registration*

IHTM04294 [September 2008] provides:

If a government security is a FOTRA gilt (IHTM04291) you will have to consider who is beneficially entitled (IHTM04031) to that security to work out whether it is excluded property for IHT purposes..

21 The original reads “of”. The emendation to “or” makes sense, though it might be that some text is missing here.

22 I would be grateful to any Scots reader who could direct me to relevant authority. Barr and Eden, *Inheritance Tax in Scotland* (Butterworths), or McDonald and Pagan, *Inheritance Tax in Scotland: Tax Annual* (Bloomsbury) may help here.

If a worthwhile amount is at stake²³ you should investigate the possibility of a last-minute purchase. Except where the available information (e.g. inclusion of sufficient income/interest) reasonably rules out that possibility, you should seek specific confirmation that the securities concerned were in fact registered in the transferor's, or the trustee's, name(s) at the date of the relevant transfer.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

I do not think that the IHT Manual means to say that relief only applies if the securities are registered in the name of the individual or the trustees. The point is that no relief applies if the securities are purchased but not paid for. The purchaser is not the beneficial owner until payment, or even if they were, securities not paid for have no value because of the vendor's lien. So if the gilts are not registered in the name of the individual, further evidence may be needed to show that the individual actually is the beneficial owner.

In practice, register the gilts in the name of the individual or the trustees to avoid possible dispute. Perhaps the withheld text instructs Inspectors how to identify false claims for relief.

58.7 UK funds v foreign funds

As far as tax is concerned, which is better for the foreign domiciliary: UK funds or foreign funds?

- (1) A remittance basis taxpayer will prefer a foreign fund to a UK one, so that income and gains from the fund will be taxed on the remittance basis.²⁴ Likewise a settlor-interested trust whose settlor is a remittance basis taxpayer will prefer a foreign fund to a UK one; similarly if the transfer of asset rules may apply, as UK source income from the fund may be taxed where foreign source income in principle will not.
- (2) A non-resident non-domiciled individual will not mind (for IHT, CGT or IT) whether they purchase a UK or a foreign fund. However,

23 Understandably, the HMRC view on what is "worthwhile" in this context is not in the public domain.

24 If the individual plans to remit income from the fund, it may be better to have a UK fund. But that is a special case.

taxation at fund level is another matter, and the additional burden on UK funds, particularly SDRT, has encouraged fund managers to set up new funds offshore.²⁵

Thus the IHT exemption for UK funds represents a pragmatic decision by the Government, but, like so much in the tax system, falls short of consistency or joined-up thinking.²⁶

58.8 Individual domiciled in Channel Islands or Isle of Man

Section 6(3) IHTA provides:

Where the person beneficially entitled to the rights conferred by any of the following, namely—

- (a) war savings certificates;
- (b) national savings certificates (including Ulster savings certificates);
- (c) premium savings bonds;
- (d) deposits with the National Savings Bank or with a trustee savings bank;
- (e) a certified SAYE savings arrangement within the meaning of section 703(1) ITTOIA;

is domiciled in the Channel Islands or the Isle of Man, the rights are excluded property.

In the following discussion:

- (1) **“Qualifying certificates”** are investments within (a) to (e).
- (2) **“Islanders”** are persons domiciled in the Channel Islands or the Isle of Man.

The deemed domicile rule does not apply for the purposes of this section: see s.267(2) IHTA.

The IHT Manual para 27270 correctly states:

Other points to note are:

²⁵ See “Taxation and the Competitiveness of UK Funds” (October 2006) <http://www.investmentuk.org/research/research/> (scroll down to 2006 and click on first link). The report also notes that the uncertainty and instability of the UK tax regime is regarded as making the UK an unsuitable location.

²⁶ See 1.2.2 (Attitudes to the economic argument).

- [1] the exclusion applies not only to securities etc owned by a domiciled Islander absolutely but also to any settled securities in which he has a beneficial interest in possession²⁷
- [2] the exclusion does not extend to settled securities in which there is no interest in possession, i.e. which are held on discretionary trusts
- [3] the relevant domicile is that of the transferor (and not the transferee) of the securities, at the time of the transfer

Points [2] and [3] are obvious but point [1] is important.

The exemption could be particularly useful for an individual who is:

- (1) domiciled in the Channel Islands or the Isle of Man, and
- (2) deemed UK domiciled (so in principle within the scope of IHT), and
- (3) ordinarily resident in the UK (so the FOTRA securities exemption is not available).

The exemption is also useful for a trust with such a person as life tenant.

The exemption dates back to 1931²⁸ and was presumably an attempt to market the certificates to Islanders, who would otherwise not find them an attractive choice. It seems surprising that the exemption is limited to Islanders; no doubt there were reasons.

58.9 Trusts: foreign situate property

Section 48(3) IHTA provides:

Where property comprised in a settlement is situated outside the UK—
(a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made ...

This is the main category of settled excluded property, roughly corresponding to the main category of non-settled excluded property. Three important consequences arise from the definition.

First, the resident and domicile status of the beneficiaries is irrelevant for this purpose. The residence of the trustees is similarly irrelevant.

27 [Author's note] From 2006 this will now only apply to an estate IP.

28 Section 41 FA 1931. The exemption for FOTRA securities was revived in the same year.

Secondly, excluded property status depends on the domicile of the settlor at the time the settlement was made. The domicile at the time of the transfer or chargeable event is ignored.²⁹ Contrast the IT and CGT position. The identity of the settlor is therefore crucial: see 75.3.4 (IHT definition of settlor).

Thirdly, the location of the assets held in the settlement matters only at the moment a charge arises; provided the assets are then situated abroad, it is irrelevant that they may previously have been situated in the UK. So trustees could transfer the settled property out of the UK the moment before the death of a life tenant, or the occasion of a ten-year charge, and obtain the full benefit of excluded property status: see *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728.

HMRC accept this. IHT Manual provides:

4274. Identifying settled property [February 2006]

The expression ‘property comprised in a settlement’ in Section 48(3) IHTA 1984 means the items of property (IHTM04030) held in the settlement (IHTM16000) at the time of the chargeable event that you are considering. In determining the locality (IHTM27071) of any particular property, therefore, you should consider the property in its current form and not its previous history.

Example

S, when domiciled in Germany, settles some German realty³⁰ and some securities then situated in the UK on X for life with remainder to Y. On X’s death the life interest comes to an end and the settled fund consists of

- a. a villa in Spain, or
- b. land in the UK, or
- c. a house in Spain and some English securities.

With a., the villa is excluded property even though it partly represents the proceeds of what was previously UK property (the securities). The land in b. is not excluded property although it is partly derived from the German realty. In c., the house is excluded property but the securities are not.

29 See 58.13 (Initial interest of settlor or spouse) for an exception where the settlor or their spouse has an initial interest in possession in the settled property.

30 [Author’s footnote] The question whether this is possible as a matter of German law is ignored for the purposes of the example.

58.10 Trusts: authorised unit trusts and OEICs

Section 48(3A) IHTA provides:

Where property comprised in a settlement is a holding in an authorised unit trust or a share in an open-ended investment company—

- (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made, and
- (b) section 6(1A) above applies to a reversionary interest in the property but does not otherwise apply in relation to the property;³¹

but this subsection is subject to subsection (3B) below.³²

58.10.1 *Exit charge on purchase of UK funds?*

Suppose a discretionary trust with a foreign domiciled settlor uses UK situate property to purchase UK funds. This section considers whether this gives rise to an IHT exit charge. Section s.65(1) IHTA provides:

There shall be a charge to tax under this section—

- (a) where the property comprised in a settlement or any part of that property ceases to be relevant property (whether because it ceases to be comprised in the settlement or otherwise)...

The question is whether trust property has “ceased to be relevant property” within the meaning of s.65(1). It is helpful to approach this question historically. The position before the 2003 reforms was straightforward. Section 58 IHTA provides (so far as relevant):

- (1) In this Chapter “relevant property” means settled property in which no qualifying interest in possession subsists, other than ...
 - (f) excluded property.

The trust property is “settled property in which no qualifying interest in possession subsists” and so is relevant property unless it is excluded

31 For a discussion of s.48(3A)(b), see 58.12.2 (Foreign situate property and UK funds in estate IP trust).

32 For the subsection 3B exception, see 58.17.3 (Purchased equitable interests).

property. If UK trust property becomes non UK situate, it ceases to be relevant property. However in that event, s.65(7) IHTA provides relief:

Tax shall not be charged under this section by reason only that property comprised in a settlement ceases to be situated in the UK and thereby becomes excluded property by virtue of section 48(3)(a) above.

Press Release 16 October 2002 (OEICs and AUTs) para 6 explained the reason for the 2003 reforms:

Overseas investors are in theory liable to inheritance tax on their OEIC and AUT holdings, because they are regarded as being situated in the UK for tax purposes on the investors' death. Competing centres do not charge tax in parallel circumstances. Removing the potential inheritance tax charge will help UK managers compete on an equal footing with overseas fund providers.³³

Accordingly, s.186 FA 2003 provides:

- (1) The Inheritance Tax Act 1984 (c. 51) is amended as follows....
- (3) [This inserts s.48(3A) IHTA] ...
- (8) This section has effect in relation to transfers of value or other events occurring on or after 16th October 2002.

Thus on 10 July 2003 (when the FA 2003 came into force), and with effect in relation to transfers of value or other events occurring on or after 16th October 2002, UK funds became excluded property. If a discretionary trust with a foreign domiciled settlor held UK funds on 10 July, the assets ceased to be relevant property and became excluded property.

The drafter of the 2003 provisions copied the wording of s.48(3). Unfortunately the drafter did not copy the words of s.65(7). If one construes the words of the section literally, then there are three consequences:

³³ Similarly, EN FB 2003 provides:

“8. This clause is one of two measures to boost the competitiveness of UK authorised funds announced by Treasury press notice (105/02) dated 16 October 2002. From that date, holdings by non-UK domiciled investors or their trusts in authorised unit trusts and open-ended investment companies will not be chargeable to IHT.”

- (1) A foreign trust holding UK funds on 10 July 2003 became subject to an exit charge under s.65 IHTA.
- (2) A foreign trust became retrospectively subject to an exit charge if it had acquired AUTs or OEICs out of UK situate property between 16th October 2002 and 10 July 2003.
- (3) A foreign trust became prospectively subject to an exit charge if it acquired AUTs or OEICs out of UK situate property after 10 July 2003.

I think it is safe to say that HMRC did not seek to collect tax under category 1 or 2 in 2003, and would not do so now. It would be inconsistent to seek IHT in a category 3 case. The point is the same in each of the three cases. Is section 65 to be construed literally? The issue raises in a very pure form the question of how the courts construe taxing statutes. The reader will, I think, hardly need to be told that the House of Lords/Supreme Court have vehemently rejected the literal approach.³⁴

There can be no doubt about the purpose of the legislation. If there were a charge on the coming into force of the FA 2003, or on the acquisition of UK funds out of UK situate property, then that would directly obstruct the purpose.

For this reason the occasion of a trustee purchasing UK funds is not an occasion that Parliament intended, following the 2003 reforms, to be included in the reference to property “ceasing to be relevant property.” Such was the intention of Parliament. The concept of the “intention of Parliament” is a construct. It is to be deduced from the words of the legislation; in most cases one cannot say what would be the intention(s) in the many hundreds of minds involved in both Houses, and it would be idle to speculate. However if a proverbial “officious bystander” had asked any member of Parliament in 2003 whether they intended an IHT charge to arise in these circumstances, the response would be: of course not!

It is not, I think, ever suggested that purposive construction is a one way street which can be used if it favours HMRC. That is clear on principle, but if authority is needed, there is *Bibby v Prudential Assurance* 73 TC 235:

69. ... The warning [in *Ramsay*] against a literal construction that would permit the use of a taxing provision for a purpose never intended or

34 See the House of Lords in *Barclays Mercantile Business Finance v Mawson* 76 TC 446 at [28] - [32]. The passage is too well known to need to be set out here.

contemplated by Parliament was directed at taxpayers, or their tax advisers, but must, in my judgment, be heeded also by the Revenue. The assessments in the present case have represented, in my view, an attempt to use s 95 for a purpose never intended or contemplated by Parliament. Such an attempt is no more acceptable from the Revenue than it would be from a taxpayer.

At least some within HMRC would agree. Chris Tailby former director of the HMRC anti-avoidance group has written:

The point applies equally to the government (I use the term to include HM Treasury and HMRC) which should not stretch tax law to attempt to collect tax which Parliament did not intend to collect.³⁵

The IHT Manual was amended in September 2010 and now provides:

4262 Holdings in Open End Investment Companies (OEICs) and Authorised Unit Trusts (AUTs) [September 2010]

... However, this exclusion does not always apply to relevant property trusts as IHTA84/S48(3A) is excluded from IHTA84/S65(7). Any case where the transfer concerns property held in a (relevant property trust where:

- the trust was created by a settlor domiciled outside the UK, and
- the trust disposes of UK situs (IHTM27071) assets and also acquires AUTs / OEICs

must be referred to Technical Group.

It appears that HMRC are at present taking the point, but it is considered that the better view is that there is no exit charge; and the sooner that is officially acknowledged, the better for the UK investment management industry.

The matter may be dealt with for the future by law reform. HMRC say:

... in some situations property that becomes ‘excluded property’ (that is, property which is no longer regarded as relevant property) is not subject to an exit charge when the change occurs, for example, when it is moved overseas or invested in exempt Government securities. But other changes are caught, such as when property ceases to be relevant property

35 Tailby, “Some reflections on Tax Avoidance” [2011] PCB 41 at 44.

because it is invested in an Authorised Unit Trust or Open-ended Investment Company. The Government is minded to align the rules so that no exit charges arise when relevant property is invested in an AUT or OEIC.³⁶

58.11 Trusts: FOTRA securities

FOTRA securities held by trustees may be excluded property. Under this exemption the domicile of the settlor is irrelevant; one must look at the ordinary residence of the relevant beneficiary or beneficiaries and, if appropriate, their domicile.

For the interaction with s.44(2) IHTA, see 60.4.1 (When separate settlements fiction does not apply).

58.11.1 *Estate IP trust*

Section 48(4) IHTA provides:

Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; but the securities are excluded property if—

- (a) a person of a description specified in the condition in question is entitled to a qualifying interest in possession in them.

Qualifying IP is defined in s.59(1) IHTA:

- (1) In this Chapter “qualifying interest in possession” means—
 - (a) an interest in possession—
 - (i) to which an individual is beneficially entitled, and
 - (ii) which, if the individual became beneficially entitled to the interest in possession on or after 22nd March 2006, is an immediate post-death interest, a disabled person’s interest or a transitional serial interest, or
 - (b) an interest in possession to which, where subsection (2) below applies, a company is beneficially entitled.³⁷

36 HMRC Consultation Document, “Inheritance Tax: Simplifying Charges on Trusts” (July 2012) para 3.9.

37 The position for companies entitled to IPs is not considered here.

That is, a qualifying IP is what this book describes as an estate IP. The 2006 reforms have (inadvertently?) restricted the scope of the exemption for FOTRA securities in settlements.

58.11.2 *Other trusts*

Section 48(4) IHTA provides:

Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; but the securities are excluded property if—

...

- (b) no qualifying interest in possession subsists in them but it is shown that all known persons
 - [i] for whose benefit the settled property or income from it has been or might be applied, or
 - [ii] who are or might become beneficially entitled to an interest in possession in it,are persons of a description specified in the condition in question.

The IHT Manual correctly states:

27248 - Unknown persons [February 2006]

The legislation refers to “known persons”. Accordingly, when considering the question of domicile and ordinary residence you should disregard the possibility that some (currently) unknown person (e.g. an unborn child or future spouse/civil partner of an existing beneficiary) might become a beneficiary in the future.

27249 - UK charities [October 2010]

In the case of *Von Ernst and Cie S.A. v IRC* [1980] 1 WLR 468 the Court ruled **that any payment or potential payment** from the settled property to an incorporated UK charity – to be used by the charity for its charitable purposes – would not be an application for the “benefit” of the charity. Accordingly you should not deny the exclusion for exempt securities merely because a UK charity (whether incorporated or not) has received or might receive any of the settled property or income from it.

58.11.3 Exit charge on acquisition of FOTRA securities

Section 65(1) IHTA provides:

There shall be a charge to tax under this section—

- (a) where the property comprised in a settlement or any part of that property ceases to be relevant property...

The acquisition of FOTRA securities would give rise to a charge but s.65(8) IHTA provides relief:

If the settlor of a settlement was not domiciled in the UK when the settlement was made, tax shall not be charged under this section by reason only that property comprised in the settlement is invested in securities issued by the Treasury subject to a condition of the kind mentioned in section 6(2) above and thereby becomes excluded property by virtue of section 48(4)(b) above.

If the settlor is UK domiciled, there is still an exit charge.

58.12 Estate IP trust

58.12.1 The question

As we have seen, there are two sets of definitions of excluded property:

- (1) Section 6 IHTA defines categories of excluded property for non-settled property to which a person is beneficially entitled.
- (2) Section 48 IHTA defines corresponding categories of excluded property for trust property.

Property is either settled or not, so at first sight the definitions appear to be mutually exclusive. However, a settlement under which a beneficiary has an estate interest in possession raises a doubt. Property held in a settlement with an estate IP is certainly settled property (so *prima facie* the s.48 rules apply). However, s.49(1) IHTA provides (for an estate IP):

A person beneficially entitled to an interest in possession in settled property shall be treated for the purposes of this Act as beneficially entitled to the property in which the interest subsists.

Since the person is treated as beneficially entitled, should the s.6 IHTA rules apply to settled property?

58.12.2 *Foreign situate property and UK funds in estate IP trust*

The answer is provided by s.48(3)(b) IHTA:

Where property comprised in a settlement is situated outside the UK...

- (b) section 6(1) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property*;

Thus for settled foreign-situate property the s.48 definition applies and the s.6(1) definition is disapplied. The operation of these rules can be illustrated by two examples:

- (1) Suppose a foreign domiciled beneficiary has an estate IP in a settlement made by a UK domiciled settlor. The trust property is situated outside the UK.

The trust property is not excluded property as it does not meet the requirements of s.45(3)(a). It would meet the requirements of s.6(1) but s.48(3)(b) disapplies s.6(1).

- (2) Suppose the reverse situation – a UK domiciled beneficiary has an estate IP in a settlement created by a foreign domiciled settlor. The trust property is again situated outside the UK.

The tax position is now reversed. The trust property would not qualify as excluded property under s.6(1) but it does qualify under s.48(3)(a). Section 48(3)(b) disapplies s.6(1) but that is irrelevant: the trust property is excluded property.

For UK funds, the same answer is provided by s.48(3A)(b) IHTA:

Where property comprised in a settlement is a holding in an authorised unit trust or a share in an open-ended investment company ...

- (b) section 6(1A) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property*;

Thus for settled AUTs and OEICs, the s.48 definition applies and the s.6(3A) definition is disapplied.

58.12.3 *FOTRA securities in estate IP trust*

Section 48(4) IHTA provides:

Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; ...

Again, the s.48(4) definition of excluded property applies and the s.6(2) definition is disapplied. This is not actually necessary because s.6(2) and s.48(4)(a) lead to the same result, but it does no harm.

58.12.4 *Qualifying certificates in estate IP trust*

Qualifying certificates of an individual domiciled in the Channel Islands or the Isle of Man (“**an Islander**”) are excluded property.³⁸ If an Islander is entitled to an estate IP in qualifying certificates, the certificates are not excluded property under s.48(3) or s.48(4). But it is considered that the property does qualify as excluded property under s.6(3) since the individual is to be treated as if they were beneficially entitled. In this case there is no express provision that s.48 overrides s.6. Section 48 and s.6 do not contradict each other: they offer two alternative routes to attain excluded property status. Such settled property is therefore excluded property. HMRC agree with this view.

58.13 Initial interest of settlor or spouse

58.13.1 *The s.80 fictions*

Special rules apply where the settlor or spouse have an estate interest in possession in a trust when it is made (“**an initial IP**”). The basic rule is set out in s.80(1) IHTA:

Where a settlor or his spouse or civil partner is beneficially entitled to an interest in possession in property immediately after it becomes comprised in the settlement,

38 See 58.8 (Individual domiciled in Channel Islands or Isle of Man).

- [a] the property shall for the purposes of this Chapter³⁹ be treated as not having become comprised in the settlement on that occasion;
- [b] but when the property or any part of it becomes held on trusts under which neither of those persons is beneficially entitled to an interest in possession, the property or part shall for those purposes be treated as
 - [i] becoming comprised in a separate settlement
 - [ii] made by that one of them who ceased (or last ceased) to be beneficially entitled to an interest in possession in it.

Thus where the settlor or spouse has an initial IP, s.80 imposes three fictions (“**the s.80 fictions**”):

- (1) Property which is actually held in one settlement (“**the actual settlement**”):
 - (a) is treated as non-settled property (so long as the settlor/spouse have an interest in possession); and subsequently:
 - (v) is treated as being held in a separate settlement (“**the notional settlement**”).
- (2) The notional settlement is treated as having the following qualities:
 - (a) The person who is treated as the settlor of the notional settlement may be the spouse, ie different from the real settlor of the actual settlement.
 - (b) The time at which trust property is treated as becoming held in the notional settlement is when the settlor/spouse IP ceases, which is different from the time that property actually became held in the actual settlement.

58.13.2 *Transitional rules: trusts before 1974 and after 2006*

Section 80(3) IHTA provides:

This section shall not apply if the occasion first referred to in subsection (1) above occurred before 27 March 1974.

“The occasion first mentioned in subsection (1)” is the date that the property becomes held in the actual settlement, ie the date that the settlement is made. So:

- (1) Section 80 does not apply to property settled before 27 March 1974.

39 “This Chapter” is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

(2) Section 80 can apply to property settled between 27 March 1974 and 22 March 2006.

The position for property settled after 22 March 2006 is governed by s.80(4) IHTA:

Where the occasion first referred to in subsection (1) above occurs on or after 22 March 2006, this section applies—

- (a) as though for “an interest in possession” in each place where that appears in subsection (1) above there were substituted “a postponing interest”, and
- (b) as though, for the purposes of that subsection, each of the following were a “postponing interest”—
 - (i) an immediate post-death interest;
 - (ii) a disabled person’s interest.

Amended as s.80(4) IHTA directs, s.80(1) provides for settlements made from 22 March 2006:

Where a settlor or his spouse or civil partner is beneficially entitled to ~~an interest in possession~~

- (i) an immediate post-death interest; [or]
- (ii) a disabled person's interest.

in property immediately after it becomes comprised in the settlement,
[a] the property shall for the purposes of this Chapter⁴⁰ be treated as not having become comprised in the settlement on that occasion;
[b] but when the property or any part of it becomes held on trusts under which neither of those persons is beneficially entitled to ~~an interest in possession~~

- (i) an immediate post-death interest; [or]
- (ii) a disabled person's interest.

the property or part shall for those purposes be treated as

- [i] becoming comprised in a separate settlement
- [ii] made by that one of them who ceased (or last ceased) to be beneficially entitled to an interest in possession in it.

Section 80 can apply to trusts made from 22 March 2006 only if the trust confers an IPDI (which only applies to will trusts) or a disabled person’s interest (which will be rare).

40 “This Chapter” is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

What is the position if:

- (1) A trust is made before 22 March 2006 and confers an initial IP on the settlor (“H”).
- (2) That IP comes to an end during the lifetime of H and the spouse (“W”) acquires an IP which is not an estate IP?

The drafter of the 2006 reforms failed to address this case. A purposive construction is called for, or the provisions are nonsensical. It is suggested that the reference to an “interest in possession” in s.80 means an interest in possession to which s.49 IHTA applies. The non-estate IP of W does not count as an interest in possession. So the trust property is treated as becoming comprised in a notional settlement on the death of H.

58.13.3 *Time of 10 year anniversary when s.80 applies*

The date of the 10 year anniversaries is normally ascertained in a straightforward manner. First there is a commonsense definition of the commencement date of a settlement. Section 60 IHTA provides:

In this Chapter references to the commencement of a settlement are references to the time when property first becomes comprised in it.

Then s.61(1) IHTA provides:

In this Chapter “ten-year anniversary” in relation to a settlement means the tenth anniversary of the date on which the settlement commenced and subsequent anniversaries at ten-yearly intervals, but subject to subsections (2) to (4) below.

However, s.61(2) provides a special rule for the s.80 notional settlement:

The ten-year anniversaries of a settlement treated as made under section 80 below shall be the dates that are (or would but for that section be) the ten-year anniversaries of the settlement first mentioned in that section.

The section 80 fictions do not apply for the purposes of ascertaining the ten-year anniversary date of the notional trust: that is fixed by reference to the date of the actual settlement. I cannot see the reason for that rule.

58.13.4 *Trusts with only some property within s.80 fictions*

It is possible that one trust may hold some property which is within the scope of s.80 and some property which is not. This could happen in various ways, but the common example will be a trust conferring an interest in possession on the settlor where:

- (1) Property (“pre-2006 property”) was settled before 22 March 2006
- (2) Other property (“post-2006 property”) was added after 22 March 2006.

In that case:

- (1) The pre-2006 property is treated as held in a separate notional settlement governed by the s.80 fictions.
- (2) The post-2006 property is treated as held in the actual settlement.

The actual commencement date of the actual settlement is the date that property was first comprised in it. However pre-2006 property is “treated as not having become comprised in the settlement” at that date. The first time that property that is held by the actual settlement is when post-2006 property is added. That date is treated as its commencement date, and anniversaries of that date are treated as its 10 year anniversaries.

58.13.5 *Spouse with initial IP: excluded property rule*

Suppose:

- (1) In Year 1, H creates a trust under which W has an initial IP.
- (2) In Year 2, W dies (so her IP comes to an end). H does not become entitled to an estate IP at the time that W dies.

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 2 and W is treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if W was foreign domiciled at the time of her death in Year 2. The domicile of H would be irrelevant. This would benefit the taxpayer if (for instance) H was UK domiciled and W was not, and could sometimes be used for tax avoidance.

Therefore where s.80 applies, s.82 IHTA imposes a further condition

relating to excluded property.⁴¹ This provides:

(1) For the purposes of this Chapter⁴² ... property to which section 80 ... applies shall not be taken to be excluded property by virtue of section 48(3)(a) above unless the condition in subsection (3) below is satisfied (in addition to the conditions in section 48(3) that the property is situated outside the UK and that the settlor was not domiciled there when the settlement was made).

...

(3) The condition referred to in subsection (1) ... is—

(a) in the case of property to which section 80 above applies, that the person who is the settlor in relation to the settlement first mentioned in that section ...

was not domiciled in the UK when that settlement was made.

The “settlement first mentioned” in s.80 is the actual settlement made by H. (The notional settlement treated as made by W is the second settlement mentioned in s.80.)

In relation to foreign situate trust property, s.82 prevents the s.80 fictions from benefiting the taxpayer. The fictions may however benefit HMRC. Suppose:

(1) H is the settlor.

(2) W has an initial IP.

(3) Subsequently the settled property is held on trusts where neither H nor W has an interest in possession.⁴³

It is necessary to look at the domicile of H at the time when the actual settlement was actually made *and* at the domicile of W at the time her interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded property. Both must be domiciled outside the UK (at the right time) in order for foreign situate property to qualify securely for excluded property status.

41 With an economy of drafting, s.82 is also used for the purposes of the same settlement fiction but although there is some overlap, it is easiest to discuss that aspect separately. See 60.9.1 (Section 81 excluded property rule).

42 “This Chapter” is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

43 Whether an estate IP or not. This is anomalous, but the drafter of the 2006 rules did not think through the consequences for s.80.

58.13.6 *Settlor with initial IP: excluded property rule*

In practice in lifetime trusts it is rare for the settlor's spouse to have an initial IP but it is common for the settlor to have an initial IP. Suppose first that:

- (1) Year 1: H has an initial IP; and
- (2) Year 2: that IP comes to an end (without W becoming entitled to an estate IP).

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 2 though H is still treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if H was foreign domiciled in Year 2. The domicile of H at the time the trust was made would be irrelevant. This could not be used for tax avoidance, but s.82 IHTA nonetheless imposes its further condition relating to excluded property. It is necessary to look at the domicile of H at the time when the actual settlement was actually made *and* at the time their interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded property. H must be domiciled out of the UK at both times in order for foreign situate property to qualify securely for excluded property status.

Suppose:

- (1) In Year 1, H creates a trust under which H has an estate IP.
- (2) In Year 2, H dies and W becomes entitled to an estate IP.
- (3) In year 3, W's interest comes to an end (H not at that time becoming entitled to an estate IP).

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as held in a notional trust, which is treated as made in Year 3 and W is treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if W was foreign domiciled at the time of her death in Year 3. The domicile of H would be irrelevant. Once again, s.82 IHTA imposes a further condition relating to excluded property. In relation to foreign situate trust property, s.82 prevents the s.80 fictions from benefiting the taxpayer. It may however benefit HMRC. It is necessary to

look at the domicile of H at the time when the actual settlement was actually made *and* at the domicile of W at the time her interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded property. Both must be domiciled out of the UK (at the right time) in order for foreign situate property to qualify for excluded property status.

58.13.7 *Planning for partly excluded property trust*

I use the term “**partly excluded property trust**” to refer to a trust where:

- (1) the trust property in the actual settlement is excluded property on ordinary principles; but
- (2) it is not excluded property in the notional settlement under s.80/82 rules.

The s.80/82 rules apply only for the purposes of “this chapter”: the relevant property trust regime. They have no wider application. So foreign property of a partly excluded property trust:

- (1) is not excluded property for the purposes of the relevant property trust taxation; but
- (2) is excluded property for all other IHT purposes (eg GWR and the estate IP trust regime).

Before 2006, s.80 did not much matter as a partly excluded property trust could remain IP in form throughout its life. So in practice it qualified as excluded property. Now it cannot do so. So the tax position of these trusts has been seriously affected as an accidental result of the 2006 reforms.

58.13.8 *Avoiding s.80/82 problems: trusts made on or after 22 March 2006*

No difficulty arises for lifetime trusts from 22 March 2006, unless the trust confers a disabled person’s interest (which will be rare).

Section 80 still poses a trap for will trusts, where the testator is not UK domiciled and the spouse is UK domiciled. One needs to avoid an IPDI.

A simple solution is to arrange that the will trust is discretionary at the outset, ie the widow does not have an initial interest in possession. A two-year discretionary period will in principle be needed to avoid s.144 IHTA. This is easy to arrange if the property given to the trust is not UK situate.

58.13.9 *Avoiding s.80/82 problems: trusts made before 22 March 2006*

In cases where an existing trust conferred an initial IP on the settlor/spouse, it would be desirable to revoke the IP before the settlor becomes deemed UK domiciled. It does not matter that the settlor/spouse may have an initial IP provided that when it comes to an end⁴⁴ the life tenant is not UK domiciled or deemed domiciled.

58.13.10 *Avoiding s.80/82 problems by FOTRA securities or UK funds*

Section 80 provides that property shall not be taken to be excluded property *by virtue of* s. 48(3) IHTA. So it prevents foreign situate property from being excluded property. It does not apply to FOTRA securities and AUTs.

58.13.11 *Commentary*

What is the purpose of the three s.80 fictions? The standard IHT trust regime would not work well where the settlor or their spouse has an initial estate interest in possession under a settlement commencing after 26 March 1974. Dymond explains:

In such a case there will be no chargeable transfer when the settlement was made and so no occasion to value the settled property for CTT or IHT at that time. If an exit charge arose nearly 10 years later, it might be difficult to ascertain the value at the commencement of the settlement, as required by s.68(5)(a) IHTA, because important evidence might have been lost or destroyed. It might also not be easy to ascertain the settlor's cumulative total at that time as required by s.68(4)(b) IHTA. The same difficulty with the settlor's cumulative total might occur at the time of the 10 yearly charge, because of s.66(5)(a).⁴⁵

Section 80 solves this administrative problem but the reader may agree with the author that even before 2006 the cure was worse than the disease. This does explain why the s.80 fictions only apply for the purposes of the standard IHT trust regime.

⁴⁴ Not being followed by another IP for the settlor/spouse.

⁴⁵ *Dymond's Capital Taxes*, para 19.700.

Since 2006 the operation of the rules is bizarre, but (as is generally the case with bizarre law) careful planning can mitigate much of the unfairness.

It is suggested that the rules should be repealed.

58.14 Settlor adds property to trust after change of domicile

Suppose:

- (1) a settlor creates a trust when not UK domiciled; and
 - (2) the same settlor⁴⁶ adds funds to the trust later when UK domiciled.
- Can the added property be excluded property? The IHT Manual para 4272 provides:

4272. When the settlement was made [January 2008]

The legislation refers to the settlor's (IHTM16000) domicile (IHTM13000) 'at the time the settlement was made'. You should proceed on the basis that, for any given item of property (IHTM04030) held in a settlement, the settlement was made when that property was put in the settlement. Refer any case where this view is challenged to TG.

Example

S, when domiciled abroad, creates a settlement of Spanish realty. Later he acquires an UK domicile and then adds some Australian property to the settlement.

The Spanish property is excluded property because of S's overseas domicile when he settled that property. However, the Australian property is not excluded property as S had a UK domicile when he added that property to the settlement.⁴⁷

The relevant time in s.48(3) is not "the time when the property was settled"; it is "the time the settlement was made". HMRC seek to treat the transfer of an asset to an existing settlement as the making of a new settlement. It would follow that a person adding property to an existing settlement would be creating a second settlement or as many settlements as there are additions.

⁴⁶ This section considers the position where the *settlor* adds to a trust. For the position where others add to a trust, see 60.5 (B adds property to A's trust).

⁴⁷ This view is repeated in RI 166 and IHTM27220 - Foreign Settled Property With Non-UK Domiciled Settlor.

There is nothing conceptually impossible in HMRC's view that a separate settlement is deemed to be made where a person adds property to an existing settlement made by them.⁴⁸ But since adding property does not in fact create a new and separate settlement, two separate settlements do not exist;⁴⁹ one needs something express or implied in the legislation to deem what is in fact one settlement to be treated as two. When new property is added to an existing settlement, the new property *becomes comprised* in the settlement at that time, but that is not the same as saying the settlement (or a new settlement) was made at that time. The HMRC view leads to a more sensible result. But the legislation is so clearly inconsistent with the HMRC view that even a purposive construction cannot assist.⁵⁰

Section 43 IHTA provides:

(1) The following provisions of this section apply for determining what is to be taken for the purposes of this Act to be a settlement, and what property is, accordingly, referred to as property comprised in a

48 This fiction is applied when there are two settlors, see 60.4 (The separate settlements fiction). The same fiction could in principle apply when the settlor adds property to an existing settlement.

49 This is self-evident but if authority is needed see *Truesdale v FCT* (1970) 120 CLR 353 at p.362 accessible <http://law.ato.gov.au>.

"The words created a trust in s.102 are not, I think, apt to describe the payment of money to a trustee to hold under a trust already constituted. There is an obvious difference between creating a trust in respect of property, on the one hand, and, on the other, transferring property to a trustee to hold upon the terms of an established trust. To read the section as if it applied to such a transfer would be, in the absence of a context, to expand it. Such a reading would be tantamount to saying that the transfer to the trustee of property to be held as part of the assets of an already constituted trust would be to create a second trust, whereas, from the point of view of both the trustee and of the beneficiary, there would be but one trust and the property transferred would be nothing more than an addition to the property subject to the trust."

Contrast Civil Procedure Rules 64.4(2) which distinguishes the person who created a trust from one who provided property for the purpose of the trust.

50 "It may be perfectly proper to adopt even a strained construction to enable the object and purpose of legislation to be fulfilled. But it cannot be taken to the length of applying unnatural meanings to familiar words or of so stretching the language that its former shape is transformed into something which is not only significantly different but has a name of its own. This must particularly be so where the language has no evident ambiguity or uncertainty about it." *Clarke v Kato* [1998] 1 WLR 1647 at p.1655.

settlement or as settled property.

(2) “Settlement” means any *disposition or dispositions* of property, whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby the property is for the time being—

- (a) held in trust for persons in succession or for any person subject to a contingency, or
 - (b) held by trustees on trust to accumulate the whole or part of any income of the property ... or
 - (c) charged ... with the payment of any annuity ...
- (Emphasis added)

Perhaps the HMRC argument is that because a “settlement” means any disposition of property, each disposition constitutes a new and separate settlement. However, the words “any disposition or dispositions of property” indicate that more than one disposition can create a single settlement. One example would be where an original trust has been modified by a disposition by beneficiaries;⁵¹ another would be where the settlor has made separate dispositions to the same trust. So these words do not help the HMRC argument.⁵² See *Rysaffe v IRC* [2003] STC 536 at [13]:

Section 43 does not specifically address a numerical question: what is the number of relevant settlements existing in a particular inheritance tax situation? In the absence of specific statutory provisions the answer to the numerical question is to be found in the general law of trusts.

Further, the HMRC view is incompatible with many provisions of the IHTA. If each addition to an existing trust is a new settlement it makes nonsense of the added property provisions in s.67 IHTA and the many references to added property in the surrounding sections. It also makes nonsense of the separate settlements fiction⁵³ which assumes (in the absence of s.44(2) IHTA) that one settlement may have two settlors.

51 See 75.10.1 (The trust law background).

52 The drafter of the words “disposition or dispositions” almost certainly had in mind the reference to “instrument or instruments” and “compound settlement” in the earlier legislation and the comments in *Dymond’s Death Duties*, 15th ed, p.129.

53 See 60.4 (The separate settlements fiction).

The HMRC view is not consistent with s.49(5) FA 1977. This section clearly distinguished between:

- (1) “the time when a settlement was made”, and
- (2) “the time when [added] property was settled”.

It did so in the context of excluded property. That section is now repealed but the fact that the drafter took this view in 1977 remains relevant.

On the other hand, the transitional relief for the deemed domicile rule appears to assume the HMRC view, that excluded property status depends on domicile of the settlor at the time the property was added.⁵⁴ But overall this factor is outweighed by the others.

It might take litigation before HMRC amend their published stance on this issue but I think they would be advised not to fight. Until the point is clear, trustees should follow this advice in RI 166:

Trust records

... the trustees of a settlement should keep adequate records to enable any necessary attribution of the settled property to be made if ...the settlor has added further assets to the settlement after it was made...

Suppose a settlor creates a trust when UK domiciled and adds property to it when foreign domiciled. On my view, none of the property is excluded property. However, HMRC must abide by their statement (at least until it is officially and publically withdrawn with appropriate transitional relief) and accept the added property may be excluded property! Thus, the consequence of their statement (if my view is right) is that HMRC have the worst of both worlds. Of course, a well advised settlor should not be in this situation, but it does arise from time to time by accident.

58.14.1 *Contract to transfer to trust*

It may be possible to avoid this problem if a foreign domiciled person contracts to assign property to a trust; provided that the contract is made while non-UK domiciled, domicile at the time of the transfer may not matter.

⁵⁴ See 57.5 (Pre-1974 transitional rules).

58.14.2 *Same settlor adds property to company held by trust after acquisition of UK domicile*

Suppose:

- (1) A settlor creates a trust while domiciled outside the UK;
- (2) The settlor becomes UK domiciled; and
- (3) The settlor gives property to a company owned by the trust.

Then HMRC's argument does not run at all. The shares in the company (if not UK situate) must be and remain excluded property. But watch out that the gift may be a gift with reservation and/or a chargeable transfer for IHT.

58.15 Occasions where excluded property is relevant for IHT

RI 166 states:

However, an “excluded” asset is not always completely irrelevant for the purposes of IHT. So—

- [1] an “excluded” asset in a person's estate may still affect the valuation of another asset in the estate, for example, an “excluded” holding of shares in an unquoted company may affect the value of a similar holding in the estate which is not “excluded”;
- [2] the value of an “excluded” asset at the time the asset becomes comprised in a settlement may be relevant in determining the rate of any tax charge arising in respect of the settlement under the IHT rules concerning trusts without [estate] interests in possession—ss 68(5), 66(4) and 69(3).

This is correct, but point [1] does not arise in practice and point [2] will only rarely be significant.

58.16 Transfer of value by close company

In this section I consider the position where a close company (UK resident or not) makes a transfer of value. In practice these issues only rarely need to be considered. A full discussion would need a chapter to itself, and I focus on the issues closest to the themes of this book. I do not consider the even more specialist topics of alterations of share capital or interests in possession held by companies.

58.16.1 *Individual participators*

Section 94(1) IHTA provides:

[i] Subject to the following provisions of this Part of this Act, where a close company⁵⁵ makes a transfer of value, tax shall be charged as if each individual to whom an amount is apportioned under this section had made a transfer of value ...

Section 94 goes on to specify the amount of the transfer:

[ii] of such amount as after deduction of tax (if any) would be equal to the amount so apportioned, less the amount (if any) by which the value of his estate is more than it would be but for the company's transfer; but for this purpose his estate shall be treated as not including any rights or interests in the company.

Section 94(2) IHTA explains how the apportionment is made:

For the purposes of subsection (1) above the value transferred by the company's transfer of value shall be apportioned among the participators according to their respective rights and interests in the company immediately before the transfer, and any amount so apportioned to a close company shall be further apportioned among its participators, and so on; but—

The transfer of value if it arises is immediately chargeable, not a PET; the reason for this rule is unclear.

Section 94(2) sets out two exceptions where there is no apportionment. The first concerns company payments of an income nature.⁵⁶ The second

55 Section 102(1) IHTA provides a referential definition of "close company":

"In this Part of this Act— 'close company' means a company within the meaning of the Corporation Tax Acts which is (or would be if resident in the UK) a close company for the purposes of those Acts."

For a note on this terminology, see 80.22.1 (Non-resident close company).

56 "(a) so much of that value as is attributable to any payment or transfer of assets to any person which falls to be taken into account in computing that person's profits or gains or losses for the purposes of income tax or corporation tax (or would fall to be so taken into account but for section 1285 of the Corporation Tax Act 2009 (exemption for UK company distributions) shall not be apportioned..."

exception concerns foreign domiciliaries:

- (b) if any amount which would otherwise be apportioned to an individual who is domiciled outside the UK is attributable to the value of any property outside the UK, that amount shall not be apportioned.

This exemption does not apply to FOTRA securities because they are UK situate. This was presumably an oversight and the IHT Manual extends the exemption to cover this:

14854. Foreign aspects [January 2010]

[The Manual summarises the statutory exemption and continues:]

[1] A transfer of value by

- a company incorporated abroad (hence domiciled abroad - *Gasque v IRC* [1940] 2 KB 80)... of
- property situate abroad

is **not** excluded property since s.6(1) IHTA only applies to individuals.

[2] Nevertheless, if such a company

- is resident abroad and
- makes a transfer of exempt Government securities within s.6(2) IHTA,

they **do** qualify as excluded property.⁵⁷

There is no exemption for UK situate AUTs or OEICs. An HMRC concession would be sensibly consistent with the practice on FOTRA securities and it might be worth asking HMRC in an appropriate situation.

58.16.2 *Trustee participators*

Section 94(1) IHTA only applies to individuals Section 99 IHTA provides:

- (1) Subsection (1) of section 94 above shall not apply in relation to a

⁵⁷ Sentence [1] is not technically accurate. It would be strictly correct to say that foreign situate *property* of a company incorporated abroad is not excluded property, because the definition of excluded property in s.6(1) only applies to property of individuals; however that is beside the point because (as the Manual has just noted) s.94(2) confers an equivalent exemption. But the important point here is that (however clumsily worded) sentence [2] extends the exemption to FOTRA securities.

person who is a participator in his capacity as trustee of a settlement, but—

- (a) the reference in subsection (2) of that section to subsection (1) shall have effect as including a reference to subsection (2) of this section, and
- (b) in relation to tax chargeable by virtue of subsection (2) of this section, sections 94(4) and 95 above shall apply with the necessary modifications.

Amended as s.99 directs, s.94(2) provides:

For the purposes of ~~subsection (1) above~~ s.99(2) IHTA the value transferred by the company's transfer of value shall be apportioned among the participators according to their respective rights and interests in the company immediately before the transfer, and any amount so apportioned to a close company shall be further apportioned among its participators, and so on; but ...

Of the two exemptions which follow in s.94(2) para (a) still applies (exemption for payments of an income nature.) However para (b) does not apply to a trustee, as it provides:

(b) if any amount which would otherwise be apportioned to an *individual* who is domiciled outside the UK is attributable to the value of any property outside the UK, that amount shall not be apportioned.

This takes us to s.99(2) IHTA which incorporates the charge into the code of rules for IP and non IP trusts:

Where any part of the value transferred by a close company's transfer of value is apportioned to a trustee of a settlement under section 94 above, then—

- (a) if a qualifying interest in possession subsists in the settled property, a part of that interest corresponding to such part of the property as is of a value equal to the part so apportioned less the amount specified in subsection (3) below shall be treated for the purposes of Chapter II of Part III of this Act as having come to an end on the making of the transfer,

This incorporates the rules in s.52 IHTA.

- (b) if no qualifying interest in possession subsists in the settled property, Chapter III of Part III of this Act shall have effect as if on the making of the transfer the trustee had made a disposition as a result of which the value of the settled property had been reduced by an amount equal to the part so apportioned less the amount specified in subsection (3) below;

and where a qualifying interest in possession subsists in part only of the settled property paragraphs (a) and (b) above shall apply with the necessary adjustments of the values and amounts referred to there.

(3) The amount referred to in paragraphs (a) and (b) of subsection (2) above is the amount (if any) by which the value of the settled property is more than it would be apart from the company's transfer, leaving out of account the value of any rights or interests in the company.

This incorporates the rules in s.65 IHTA, which can have some quirky results.

If the trust property is excluded property, there is no charge to IHT so the exemption in s.94(2)(b) is not needed.

Thus there is an interesting distinction between the rules for settled and non-settled companies. Where a company makes a transfer of value:

- (1) Where a foreign domiciled individual is the participator, there is no IHT charge if the property which the company transfers is not UK situate; the situs of the shares in the company is not relevant.
- (2) Where an excluded property trust is the participator, there is no IHT charge if the company's shares are not UK situate (the situs of the company's property is not relevant).

58.17 Interests in trust property

An interest in trust property (an equitable interest) is itself an item of property which may be subject to IHT. That would lead to double taxation, eg in a trust for A for life, remainder to B, there might be

- (1) tax on the death of A (if A has an estate IP) or 10 year charges; and
- (2) tax on the death of B (if the reversionary interest is an asset of B's estate).

58.17.1 Reversionary interest

Section 48(1) IHTA deals with this problem by providing that a reversionary interest is generally excluded property:

- (1) A reversionary interest is excluded property unless—
- (a) it has at any time been acquired (whether by the person entitled to it or by a person previously entitled to it) for a consideration in money or money's worth, or
 - (b) it is one to which either the settlor or his spouse [or civil partner] is or has been beneficially entitled, or
 - (c) it is the interest expectant on the determination of a lease treated as a settlement by virtue of section 43(3) above.

What about a reversionary interest within (a) to (c)? Section 48(3) IHTA provides:

Where property comprised in a settlement is situated outside the UK—

- (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made, and
- (b) section 6(1) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property*

...

but this subsection is subject to subsection (3B) below

The words in italics make it clear that the non-settled property rules apply. An equitable interest which is a reversionary interest may be excluded property if it meets the conditions of s.48(1) or if it is not UK situate and owned by a foreign domiciliary.

58.17.2 *Interest in possession*

An equitable interest which is an estate IP is excluded property only if it is owned by a foreign domiciliary and is not UK situate. However, the disposal of the interest is not a transfer of value; s.51 IHTA. Tax is charged under s.52 only if the settled property is not excluded property.

58.17.3 *Purchased equitable interests*

Section 48(3) and (3A) IHTA both provide:

but this subsection is subject to subsection (3B) below. ...

Section 48(3B) IHTA is an anti-avoidance provision which applies to two

categories of settled excluded property: foreign situate property and UK funds. It provides:

Property is not excluded property by virtue of subsection (3) or (3A) above if—

- (a) a person is, or has been, beneficially entitled to an interest in possession in the property at any time,
- (b) the person is, or was, at that time an individual domiciled in the UK, and
- (c) the entitlement arose directly or indirectly as a result of a disposition made on or after 5th December 2005 for a consideration in money or money's worth.

EN FB 2006 explains:

8. ... By purchasing interests in existing trusts originally settled by a person domiciled outside the UK, UK-domiciled individuals have increasingly exploited this exemption to convert their wealth into IHT-free form.

9. This clause is aimed at blocking such avoidance by providing that property is not excluded property by virtue of section 48(3) or section 48(3A) IHTA if, at any time, a person domiciled in the UK has had an interest in possession in it, and their interest arose from a disposition for a consideration in money or money's worth. This applies whoever paid the money, and if the interest was acquired indirectly (for example, under a will or by intestacy) or has been passed on to someone else.

Section 48(3C) IHTA expands on this:

For the purposes of subsection (3B) above—

- (a) it is immaterial whether the consideration was given by the person or by anyone else, and
- (b) the cases in which an entitlement arose indirectly as a result of a disposition include any case where the entitlement arose under a will or the law relating to intestacy.

Section 48(3C)(a) confirms (what would have been clear) that the provision can apply if an interest is purchased by A and then given by A to B. I am unable to see the point of s.48(3C)(b).

58.17.4 *F(No.1) A 2010 and FA 2012 rules*

Consideration is also needed for the anti-avoidance rules introduced in 2010 and 2012: ss.52, 53 F(No.1)A 2010 s.48(3D)-(3F) IHTA and s.74A, 74B IHTA. This topic will require many pages to discuss. It is some way from the themes of this book but I hope to address it in a future edition.

58.18 Non-residents foreign currency bank accounts

58.18.1 *Individual's account*

Section 157(1)(a) IHTA provides a limited relief for non-residents foreign currency bank accounts:

(1) In determining for the purposes of this Act the value of the estate immediately before his death of a person to whom this section applies there shall be left out of account the balance on—

(a) any qualifying foreign currency account of his ...

(5) In this section “qualifying foreign currency account” means a foreign currency account with a bank⁵⁸; and for this purpose—

(a) “foreign currency account” means any account other than one denominated in sterling.

Section 157(2) IHTA explains who qualifies for the relief:

This section applies to a person who is not domiciled in the UK immediately before his death, and is neither resident nor ordinarily resident⁵⁹ there at that time.

58 Section 157(6) IHTA provides: “In this section ‘bank’ has the meaning given by section 991 of the Income Tax Act 2007.”

59 Section 157(4) IHTA incorporates the income tax definitions of residence and ordinary residence:

“For the purposes of this section—

(a) the question whether a person is resident or ordinarily resident in the UK shall, subject to para (b) below, be determined as for the purposes of income tax;”

(Para (b) deals with trustee residence, discussed below).

58.18.2 *Trustees bank account*

Section 157(1)(b) IHTA provides a similar restricted relief for trustees foreign currency bank accounts:

(1) In determining for the purposes of this Act the value of the estate immediately before his death of a person to whom this section applies there shall be left out of account the balance on ...

(b) subject to subsection (3) below, any qualifying foreign currency account of the trustees of settled property in which he is beneficially entitled to an interest in possession.

(3) Subsection (1)(b) above does not apply in relation to settled property [a] if the settlor was domiciled in the UK when he made the settlement, or

[b] if the trustees are domiciled, resident or ordinarily resident in the UK immediately before the beneficiary's death.

For the definition of trust residence see 4.14 (Trust residence for IHT). Domicile presumably depends on the domicile of the trustees in their personal capacity (the rule that trustee domicile should be relevant is difficult to understand).

58.18.3 *Overdrawn account*

The IHT Manual provides at para 4380:

IHTM04380 - foreign currency bank accounts [January 2008]

Where the conditions are met, the balance on the account, whether in credit or in debit should be left out of account. You should refer any case of difficulty, especially if you are seeking to disallow a debit balance, to TG.

The second sentence suggests, perhaps, that HMRC are not entirely confident in this interpretation. It seems literally correct on a first reading, and provides a certain symmetry of treatment with accounts with a positive balance; on the other hand it is a daft rule, a petty trap easily avoided by the well advised, and inconsistent with the general approach

of deduction for debts.⁶⁰ I do not think it could have been the intention of Parliament.

58.18.4 *Commentary*

This is a limited relief. The bank account is *not* excluded property for IHT purposes. It is only disregarded on the death of the owner or life tenant, so it is taken into account for lifetime gifts of individuals, and ten-year anniversary charges on trusts. The conditions for the relief are also stricter than for excluded property. It would in almost all cases be better to use a foreign bank account (which will be excluded property) rather than to rely on this exemption.

If the purpose of the relief is to encourage foreign domiciliaries to deposit funds with UK banks, these restrictions make no sense. It is suggested that foreign currency accounts (indeed all accounts) ought simply to qualify as excluded property in the same way as non-UK accounts. That change would also ensure the deductibility of overdrawn accounts. Otherwise the relief is just clutter in the system and if (as I expect) it is not much used it would be better to repeal it.

58.19 Works of art

The IHTA provides a pragmatic relief for works of art. Section 5(1) IHTA provides relief on death:

For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...

- (b) the estate of a person immediately before his death does not include ... a foreign-owned work of art which is situated in the UK for one or more of the purposes of public display, cleaning and restoration (and for no other purpose).

Section 64(2) IHTA provides relief from ten year charges:

For the purposes of subsection (1) above, a foreign-owned work of art which is situated in the UK for one or more of the purposes of public display, cleaning and restoration (and for no other purpose) is not to be

60 See 61.5 (Deduction for debt of foreign domiciled individual).

regarded as relevant property.

Section 272 IHTA defines these terms:

“foreign-owned”, in relation to property, means property in the case of which the person beneficially entitled to it is domiciled outside the UK or, if the property is comprised in a settlement, in the case of which the settlor was domiciled outside the UK when the property became comprised in the settlement;

“public display” means display to which the public are admitted, on payment or not, but does not include display with a view to sale;

The reason is self-evident. Dawn Primarolo (then Financial Secretary to the Treasury) explained:

the public interest would not be served if foreign owners of works of art were unwilling to send them to the UK for [purposes of public display, cleaning or restoration] for fear of a potential inheritance tax charge.⁶¹

This relief falls short of a complete exemption but in practice it is sufficient, and the gaps are not sufficiently important to discuss further here. See too 11.23 (Public access rule).

58.20 Overseas Pensions

A full discussion of the IHT treatment of pensions needs a book to itself. This section focusses on the issues closest to the themes of this book. See too 58.20 (Situs of pension and death benefits).

The IHT Manual provides:

17140. Overseas pensions [June 2009]

Under Section 153 IHTA 1984 certain overseas pensions are left out of account in determining the value of a person’s estate (IHTM04029) immediately before their death. See the part of the table at IHTM17132 (IHTM17132) dealing with overseas service for further details.

Where a UK domiciliary (IHTM13000) is a member of an overseas pension scheme although the scheme cannot be ‘approved’ (IHTM17121) for Section 151 IHTA 1984 purposes it may well still

61 Ministerial Statement 25 February 2003 [2003] STI 303.

qualify as a sponsored (IHTM17122) superannuation scheme. On the death therefore the relieving provisions of Section 151 IHTA 1984 will still apply to any pension rights terminating and in respect of the pension scheme discretionary trusts itself.

Where the member dies in service and a death benefit (IHTM17030) is paid the IHT treatment is along the normal lines (IHTM17052) and depends on the terms of the pension scheme in question and, in particular, the rules governing payment of the lump sum death benefit. If the death benefit is held by the trustees of the pension scheme on discretionary trusts as regards payment then no claim will arise and Section 151 IHTA 1984 may apply (see IHTM17121 (IHTM17121)). If however the payment is due to the estate as of right (IHTM17052) or if the member has a general power (IHTM17081) of appointment over the funds or if they have assigned rights (IHTM17071) into trust whilst in ill health or where they can withdraw the funds at any time then a charge to IHT may arise.

The concept of a trust is alien in many overseas countries (although the type of pension foundation found in Switzerland and the Netherlands is sometimes considered to be somewhat akin to a UK trust arrangement). It follows that there is not usually a degree of discretion in those arrangements which would mirror a UK trust and they are therefore generally vulnerable to an IHT claim.

Details of lump sums payable under overseas pensions should be included in the form D6 (IHTM10033) at question 2 and will be considered by the Pension Specialist in TG at IHT Edinburgh.

As overseas pension schemes are not approved they are not covered by SP10/86 (IHTM17073). The funds in a pension scheme are regarded (IHTM17125) as provided by the employee whether contributed by the employee or the employer and accordingly the employee would be regarded as the settlor of any trust affecting these funds. If the employee were a beneficiary or possible beneficiary under these trusts the question of a reservation of benefit (IHTM14025) pursuant to Section 102 FA 1986 would be relevant.

Claims under this head will normally be identified by TG on examination of the Trust Deed or Scheme Rules.

Section 153 IHTA provides a narrow relief:

(1) In determining for the purposes of this Act the value of a person's estate immediately before his death there shall be left out of account any pension payable under the regulations or rules relating to [a] any fund vested in Commissioners under section 273 of the

- Government of India Act 1935 or
[b] to any fund administered under a scheme made under section 2 of the Overseas Pensions Act 1973 which is certified by the Secretary of State for the purpose of this section to correspond to an Order in Council under subsection (1) of the said section 273....
- (3) Subsection (1) above shall be construed as if contained in section 273 of the Government of India Act 1935 ...
- (4) If, by reason of Her Majesty's Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty's Government in the UK.

58.21 IHT planning for individual

A foreign domiciliary should endeavour to secure, as far as possible, that their assets are situated outside the UK so that they qualify as excluded property and fall outside the inheritance tax net. The foreign domiciliary's property becomes excluded property the moment that it becomes non-UK situate; there is no qualifying period such as is required for agricultural or business property reliefs. The same applies to trustees of a settlement made by a foreign domiciliary. The question is: how is the individual's property to be transferred abroad?

The transfer abroad of £ Sterling from a UK bank account poses no problem. The transfer of bearer instruments abroad raises no problem. The transfer abroad of foreign currency in a UK bank account abroad needs consideration as to CGT. Chattels could be physically moved abroad but that may not be practical.

It is possible to turn UK situate shares and securities into non-UK situate assets for IHT: see 77.7 (Bearer documents).

Any UK asset could be sold and the proceeds remitted abroad. This is simple and satisfactory for inheritance tax; however, a sale may be ruled out by CGT or commercial reasons.

If the foreign domiciliary does not wish assets to be sold, they might give them to a company owned wholly by them. The shares in the company

should not be UK situate.⁶² The company should normally be non-resident. The gift would not be a transfer of value for IHT because the donor's estate would not be reduced in value. It is considered that it is not a disposal by way of gift, as there is no gratuitous intent. In *Shiu Wing v Commissioner of Estate Duty*⁶³ the Hong Kong Court of Final Appeal refused to apply the *Ramsay* doctrine to arrangements made by the taxpayer to create property situated abroad (in this case situated outside Hong Kong). The gift would, of course, be a disposal for CGT purposes and hold-over relief would not normally be available. Accordingly, this option will only be a satisfactory solution either if no capital gain arises or if hold-over relief is available.⁶⁴

If the individual is in good health, there is a lot to be said for doing nothing and ignoring IHT planning. The only inheritance tax risk in this strategy is that the individual might die so suddenly that no steps to save tax can be taken. This risk is reduced (but not eliminated) if the spouse exemption is available. It might be possible to take out insurance. In principle it is clearly undesirable to allow a beneficiary in poor health to retain an interest in possession in non-excluded property.

58.22 IHT planning for non-estate IP trusts

A discretionary trust (and a non-estate IP trust) is subject to IHT on its ten-year anniversaries. If the settlor is not UK domiciled when they made the trust, all that matters for IHT is the situs of the trust fund on that date.⁶⁵ The trustees may safely invest in the UK for a number of years, provided that, by the deadline, they hold foreign situate assets.

In principle this short-term planning may be extended indefinitely:

- (1) As each ten-year anniversary approaches the trustees could sell the UK trust property (or even mortgage it) and invest in excluded property.

62 See 77.4 (Situs of registered shares) and 77.7 (Bearer documents).

63 2 ITELR 794.

64 A gift to the company by way of *donatio mortis causa* solves the CGT problem: s.62(5) TCGA. But such a gift is not effective for inheritance tax purposes. The donor retains the right of revocation which would not be excluded property on their death.

65 Note also the possible tax charge on the death of the settlor, under the gift with reservation rules, if the property is UK situate: see 59.13 (GWR death charge: excluded property rules for settled property) and following.

- (2) Immediately after the anniversary they might sell and revert to UK investments.

In practice such a course might be subject to *Ramsay* but it depends on how it is done. Ideally the trustees should look for a different strategy such as holding the UK assets in a foreign registered company.

58.23 IHT planning for trustees of settlement with UK domiciled settlor

If the settlor is UK domiciled when the settlement was made, trust property is not normally excluded property even if the beneficiary is foreign domiciled.

58.23.1 Beneficiaries not ordinarily resident

If the life tenant is not ordinarily resident in the UK, the trustees might invest in FOTRA securities. The trust property would then be excluded property. See 58.11 (Trusts: FOTRA securities).

Likewise if all the known beneficiaries of a discretionary trust are ordinarily resident abroad. This option is not available if any of the beneficiaries are domiciled or ordinarily resident in the UK. A deed of appointment might be needed to satisfy these conditions. This would give rise to an exit charge unless the settlor is foreign domiciled when the settlement was made: see s.65(8) IHTA. However, the amount of the charge may be moderate or small.

58.23.2 UK settlor: foreign domiciled beneficiary

The best option – if circumstances allow – may be to bring the present settlement to an end by appointment to the foreign domiciled beneficiary absolutely. CGT needs consideration if the trust is UK resident and s.87 TCGA needs consideration if it is not. The beneficiary may after an appropriate period re-settle.⁶⁶ This may also be appropriate where the settlor has become foreign domiciled after making the settlement.

An alternative course may be to confer a general testamentary power on the foreign domiciled beneficiary. The beneficiary may on their death create a new trust with excluded property.

⁶⁶ See 75.33 (Planning to create trust with foreign domiciled settlor).

58.23.3 *Life tenant domiciled in Channel Islands or Isle of Man but deemed UK domiciled*

For this case, see 58.8 (Individual domiciled in Channel Islands or Isle of Man).

CHAPTER FIFTY NINE

RESERVATION OF BENEFIT

59.1 GWR – Introduction

Here is a rendezvous of questions and question marks! A full discussion needs a book to itself. I focus on matters closest to the themes of this book, but it is necessary to consider the provisions generally in order to see the issues in their context.

I do not consider the special rules for insurance policies and for agricultural and business property relief. The IHT Manual contains much fascinating material which cannot be set out here.

59.2 The basic conditions

Section 102(1) FA 1986 provides:

... this section applies where, on or after 18 March 1986, an individual disposes of any property by way of gift and either—

- (a) possession and enjoyment of the property is not bona fide assumed by the donee at or before the beginning of the relevant period;¹ or
- (b) at any time in the relevant period the property is not enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise ...

There are two sets of conditions:

¹ Section 102(1) provides:

...“in this section ‘the relevant period’ means a period ending on the date of the donor’s death and beginning seven years before that date or, if it is later, on the date of the gift.”

- (1) An individual (in this chapter “**the donor**”) makes a disposal of property by way of gift. There are three separate elements here: a *disposal*, of *property*, which must be *by way of gift*.
- (2) Condition (a) or (b) above must be satisfied (a reservation of benefit).

59.3 Terminology

Section 102(2) FA 1986 provides one defined term:

If and so long as—

- (a) possession and enjoyment of any property is not bona fide assumed as mentioned in subsection (1)(a) above, or
 - (b) any property is not enjoyed as mentioned in subsection (1)(b) above,
- the property is referred to (in relation to the gift and the donor) as property subject to a reservation.

In the following discussion:

- (1) “**GWR property**” is property subject to a reservation.
- (2) “**Settled GWR property**” is GWR property which becomes settled property by the gift (ie the gift is to a settlement).
- (3) “**Non-settled GWR property**” is GWR property which does not become settled property by the gift (ie the gift is not to a settlement).
- (4) “**The GWR death charge**” is the charge imposed by s.102(3) FA 1986.
- (5) “**The GWR PET charge**” is the charge imposed by s.102(4) FA 1986.

59.4 Disposal before 18 March 1986

The GWR rules only apply to disposals on or after 18 March 1986. The IHT Manual states correctly:

14311 Initial requirements [January 2010]

A pre-18 March 1986 settlement which would have been caught by the GWR provisions had it been made after 17 March 1986 will therefore escape the GWR charge unless further gifts into settlement are made after that date. The GWR provisions will apply to the property settled by those further gifts. ...

Example

On 1 January 1985 the donor settled £100,000 on discretionary trusts under which he was a potential beneficiary. On 1 January 1989 he added a further

£50,000 to the settlement. The donor dies 1 April 1992 having remained a potential beneficiary throughout.

The GWR provisions apply to the 1989 addition but not to the property originally settled. The GWR claim extends to the assets in the settled fund at 1 April 1992 representing that £50,000. The Double Charges Regulations (IHTM 14711) will be in point.

But GWR does apply to pre-1986 settlements on the termination of an estate IP.²

59.5 “Disposal by way of gift”

There are some general issues on the meaning of a “disposal by way of gift”. Is the surrender of a lease or life interest a “disposal”? Or the giving of consent to an exercise of a power of advancement or appointment? Is a sale at an undervalue “by way of gift”? Or a transfer to a settlement in which the settlor has an estate interest in possession? These questions are not considered here. Generally one is dealing with gifts where the position should be clear.

It is considered that a sale at market value, where the purchase price is left outstanding as an interest-free loan, repayable on demand, is not a disposal “by way of gift”.

59.6 Reservation of benefit

The words used in the statute are notoriously vague. While in most cases the matter will be clear enough there are significant areas of uncertainty. Some doubtful areas have been resolved for practical purposes by HMRC statements.

59.6.1 *Gift to discretionary trust, settlor a beneficiary*

IHT Manual provides:

14393 Settlement on discretionary trusts [January 2010]

If a donor makes a settlement and is one of the members of the discretionary class of beneficiaries, this is a GWR.

² See 59.16 (GWR on termination of interest in possession).

- The donor's position as a member of the discretionary class of beneficiaries is not an equitable interest retained by them (and so not included in the gift) and
- as the donor is a member of the class, they have not been excluded (IHTM14333), or virtually excluded, from enjoyment. The fact that they do not receive any tangible benefit during the relevant period is immaterial.

This is correct.³ It is considered that the same applies where an individual makes a gift to a discretionary trust under which:

- (1) the settlor is not included in the class of beneficiaries; but
- (2) the trustees have an unrestricted power to add the settlor to the class of beneficiaries.⁴

59.6.2 *Gift from A to B followed by gift to trust by B*

The position is different where:

- (1) A makes a gift to B.
- (2) Later, by an independent transaction, B creates a discretionary trust under which A is a beneficiary (or where A can be added as a beneficiary).

In these circumstances A is *not* the settlor. It is considered that there is no reservation of benefit merely because A is a discretionary beneficiary. There will be a reservation of benefit if A actually receives a benefit.

59.7 IHT on the disposal by way of gift

A gift which is a chargeable transfer will give rise to a charge to IHT (assuming it exceeds the nil rate threshold) whether or not it is a gift with

3 *IRC v Eversden (Greenstock's Executors)* 75 TC 340. (The Court of Appeal did not consider this point.)

4 The HMRC view is, however, equivocal. The IHT Manual provides:
"14393 Settlement on discretionary trusts [November 2009]

Example 2

... The question of whether the possibility that A's name might be added to the class is a reservation is one which you can only determine on the particular facts. Refer any case where the point is material to the Litigation Section".

a reservation.⁵ The reservation of benefit does not affect this charge; just on the death of the donor there may be a further charge to tax. The Inheritance Tax (Double Charges Relief) Regulations 1987 mitigate a double charge. This chapter does not consider the IHT which might arise on a gift; it considers only the GWR aspects.

59.8 Gift of excluded property

Section 102 FA 1986 applies when an individual disposes of any property by way of gift. A foreign domiciliary is certainly “an individual”. A gift of UK situate property by a foreign domiciliary is clearly within the GWR rule.

What is the position where a foreign domiciliary disposes of excluded property by way of gift? There is nothing which expressly takes the gift out of the scope of the GWR rules. However, it is considered that s.3(2) IHTA does so obliquely. Section 3 IHTA provides:

Transfers of value

(1) Subject to the following provisions of this Part of this Act, a transfer of value is a disposition made by a person (the transferor) as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition; and the amount by which it is less is the value transferred by the transfer.

(2) For the purposes of subsection (1) above no account shall be taken

5 The IHT Manual makes this somewhat elementary mistake:

“14316 Sales for less than full consideration [November 2009]

Example 1

In 1989 the donor sold a house, then worth £100,000, to his son for £25,000. This is a disposition partly by way of sale and partly by way of gift. The donor dies in 1993.

- If the donor has been excluded from enjoyment of the property throughout the period, the gift is a PET chargeable on his death. The loss to his estate is the value of the entirety of the property less the consideration received (£100,000 less £25,000 = £75,000).
- If the donor was not excluded from enjoyment of the property, for instance because he resided at the property following the disposition, the disposal by way of gift is a GWR. The value of the property disposed of by way of gift is 75% of the value of the whole property. Thus, if the property is still subject to a reservation immediately before the donor’s death, 75% of its death value is treated as property to which the donor was beneficially entitled.”

of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

On a literal approach to construction this makes no difference. The fact that no account is taken of the value of excluded property for the purposes of s.3(1) does not mean that the disposition is not a "disposal by way of gift". However, a purposive construction suggests otherwise. It is absurd that there should be a charge to tax in circumstances where:

- (1) a foreign domiciliary with no UK connection makes a gift of excluded property to another person with no UK connection, and enjoys some benefit; and
- (2) the foreign domiciliary dies many years later at a time when property representing the property given is situated in the UK.

Nobody would expect the foreign domiciled donor or their executors to comply or to be able to comply with an obligation to pay IHT in such circumstances. The purpose of s.3(2) IHTA is to take excluded property out of the scope of inheritance tax and a disposal of excluded property is by implication ignored. Since it is ignored it is not a disposal "by way of gift". This conclusion is also supported by the use of the term "excluded property" – the property is regarded as excluded from IHT.

HMRC do not appear to accept this view.

59.9 GWR spouse exemption

This section considers the GWR position on inter-spouse gifts. For other IHT spouse exemption issues see 59.18 (IHT spouse exemption defence to GWR death charge), 63.1 (IHT spouse exemption on death of a foreign domiciliary).

Section 102(5) FA 1986 provides a relief which I call the "**GWR spouse exemption**":

This section does not apply if or, as the case may be, to the extent that the disposal of property by way of gift is an exempt transfer by virtue of any of the following provisions of Part II of the [IHTA],—

- (a) section 18 (transfers between spouses or civil partners) ... ;

In short, the GWR rules do not apply on gifts between spouses if the IHT

spouse exemption applies.⁶

Where a UK domiciled individual makes a gift to a foreign domiciled spouse, the IHT spouse exemption is restricted⁷ and a gift over the limit will be within the scope of GWR, unless some other exemption⁸ is in point. One solution to this problem is to sell assets at market value, so there is no disposal by way of gift. Watch the SDRT/SDLT implications.

One common situation is where one spouse gives an interest in the family home to the other spouse, but as long as the property is jointly occupied, there is in principle no GWR: see s.102B FA 1986.

59.9.1 *Inter-spouse gift of excluded property*

What is the position when a foreign domiciled individual makes a gift of excluded property to their spouse? On a literal construction, the gift will fall within the GWR rules. A gift of excluded property is not a transfer of value, so outside the scope of the IHT spouse exemption, so it is outside the scope of the GWR spouse exemption! But that is absurd and cannot be the correct construction, even if words must be strained to reach this result. This consideration supports the view taken here that gifts of excluded property, and gifts within s.11 IHTA, are deemed not to be by way of gift.⁹

Such property is nevertheless “subject to a reservation” and so qualifies for the GWR exemption to the pre-owned asset rules.

59.10 GWR death charge

Section 102(3) FA 1986 provides:

-
- 6 I use the term “**IHT spouse exemption**” to refer to the exemption on inter-spouse transfers in s.18 IHTA. See 59.18 (IHT spouse exemption defence to GWR death charge).
 - 7 See 69.2 (Restriction on IHT spouse exemption for foreign domiciled spouse).
 - 8 Such as the family maintenance exemption: see 69.4 (Disposition for maintenance of spouse and other exemptions).
 - 9 If my view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

If, immediately before the death of the donor, there is any property which, in relation to him, is property subject to a reservation then ... that property shall be treated for the purposes of the [IHTA] as property to which he was beneficially entitled immediately before his death.

I refer to this as “**the GWR death charge**”. Section 102(3) is a deeming provision; the donor is not in fact beneficially entitled to the property subject to the reservation but the property is treated as if they were so entitled. To understand the significance of this, it is necessary to set out the short series of sections that normally impose an inheritance tax charge on property to which a person is beneficially entitled at death.

Section 4(1) IHTA imposes the IHT charge on death:

On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death.

The key word here is “estate”. Section 5(1) IHTA defines estate by reference to beneficial entitlement:

.... a person’s estate is the aggregate of all the property to which he is beneficially entitled, except that ...

(b) the estate of a person immediately before his death does not include excluded property ...

So if there is a GWR until death and the property is *not* excluded property:

- (1) the property is treated as property to which the donor was beneficially entitled (in all cases);
- (2) the property is part of their estate.

If there is a GWR until death and the property *is* excluded property:

- (1) the property is treated as property to which the donor was beneficially entitled (in all cases);
- (2) the property is not part of their estate.

59.11 GWR over debt owed by the deceased

Suppose:

- (1) S creates a discretionary settlement under which S is a beneficiary;
- (2) the trustees lend to S;

(3) S dies.

The debt (“the GWR debt”) is treated as being in the estate of S. However a person cannot owe a debt to himself. If the GWR debt is treated as property beneficially owned by the debtor, it must be treated as if it ceased to exist. For this reason there is no IHT charge on the debt under the GWR rules, on the death of S, even if the GWR debt is UK situate.¹⁰

59.12 GWR death charge: non-settled property excluded property rules

Suppose:

- (1) A gives property to B, an individual, outright.
- (2) There is a reservation of benefit: A enjoys benefits at the time of A’s death.
- (3) The property is not UK situate at the time of A’s death.

A is treated as if A were beneficially entitled to the property at the time of A’s death. It forms part of their estate unless it is excluded property at that time. How do the excluded property rules work in these circumstances?

Here we are concerned with non-settled property. The relevant rule is that:

Property situated outside the UK is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.¹¹

In the example above, B is *in fact* beneficially entitled to the property. A is *treated* as beneficially entitled. Who is “beneficially entitled” for the purpose of applying the excluded property rule; is it A or is it B? This does not matter if A and B are both foreign domiciled, but it does if one is and the other is not. One common case is in a gift from a UK domiciled donor to their foreign domiciled spouse.¹² The answer is to be found by applying the general rule of construction which applies to deeming provisions.¹³ Applying this principle it follows that the domicile of the donor A is what matters for excluded property status. Thus if A has a

10 If the debt is non-UK situate it may also be outside the scope of IHT because of the excluded property rules. On the question of a deduction for the GWR debt, see 61.7.3 (Debt owed by settlor to settlor-interested discretionary trust).

11 Section 6(1) IHTA.

12 See 59.9 (GWR spouse exemption).

13 See App 2.1 (Construction of Deeming Provisions).

foreign domicile, the property (if not UK situated) is excluded property. The domicile of the donee B is irrelevant. This conclusion is confirmed by the context. It would be absurd if the taxation of A depended on the domicile of B. The taxation of A should depend on A's own domicile position.

For the purposes of the excluded property rule, therefore:

- (1) The domicile of the donor at the time of gift is irrelevant (contrast the position where the gift is made in trust).¹⁴
- (2) The situs of the property at the time of the gift is irrelevant to the operation of the excluded property rules on the death of the donor. HMRC agree. The IHT Manual provides:

14318 The gift: exempt transfers which cannot be GWRs
[September 2011]

...

Excluded property

Under the charging provisions (IHTM04072), excluded property (IHTM04251) cannot be the subject of a GWR...

*Example*¹⁵

Example 3 (George)

G is originally domiciled in the UK, but moves to New Zealand and acquires a domicile of choice there. He gives some New Zealand shares to his son, R, but continues to enjoy the dividends until his death ten years later. He dies domiciled in New Zealand.

The property is subject to a reservation and is therefore deemed to be part of G's estate on death. However, the property is situated outside the UK and the donor, who is treated as beneficially entitled to it, was domiciled outside the UK at his death. The property is therefore excluded property within IHTA84/S6 (1) and escapes the GWR charge.

This is correct; the Manual continues:

However, if G had returned to the UK and his domicile of origin had revived, there will be a GWR claim on his death, or if the reservation had ceased in his lifetime and within 7 years of his death, the ending of the reservation will be treated as a deemed PET. This is because at the

14 See 59.13 (GWR death charge: excluded property rules for settled property) below.

15 This example was reworded and improved in 2010, probably in response to criticisms of the former wording in the 2010/11 edition of this book.

time the GWR charge arises, G is domiciled in the UK so IHTA84/S6(1) does not apply...

While it is correct that s.6(1) does not apply on the facts of this version of the example, it is arguable that there is no GWR.¹⁶

The same applies to gifts to companies, including companies held by trusts.

59.13 GWR death charge: excluded property rules for settled property

Suppose:

(1) S (not UK domiciled) gives property to a discretionary settlement.

(2) There is a reservation of benefit, eg S is a beneficiary.

(3) The property is not UK situate¹⁷ at the time of the death of S.

S is treated as if S were beneficially entitled to the property at the time of S's death. It forms part of S's estate unless it is excluded property at that time. How do the excluded property rules work in these circumstances?

59.13.1 *The rival solutions*

There are two sets of excluded property rules, relating to settled and non-settled property. Which does one apply?

The Settled Property Solution The property subject to a reservation is in fact settled property, so on this view one applies the settled property rules set out in s.48(3) IHTA:

Where property comprised in a settlement is situated outside the UK—

(a) The property ... is excluded property unless the settlor was domiciled in the UK at the time the settlement was made. ...

So on this view, where an individual makes a gift to a settlement with reservation of benefit, and dies, the property is excluded property for the GWR rules if:

(1) the donor is domiciled outside the UK at the time the settlement was

¹⁶ See 59.8 (Gift of excluded property).

¹⁷ The position is the same if the property consists of UK AUTs or OEICs, but for convenience I refer to non-UK situate property only.

made. (The domicile of the donor at the time of death is irrelevant);
and

(2) the property is not situated in the UK at the time of death.

I call this “**the Settled Property Solution**”.

The Non-settled Property Solution The settled property GWR is to be treated as property to which the donor is “beneficially entitled”. On this view one applies the deeming provision to its logical conclusion: if a person is beneficially entitled to property, it is not settled property. So on this view, where an individual makes a gift to a settlement with reservation of benefit, and dies, the property is excluded property for the GWR rules if:

(1) the donor was domiciled outside the UK at the time of their death.

(The domicile of the donor at the time the settlement was made is irrelevant for GWR, though it is relevant for other purposes); and

(2) the property is not situated in the UK at the time of death.

I call this “**the Non-settled Property Solution**”.

59.13.2 *The correct solution*

The Non-settled Property Solution has supporters.¹⁸ Nevertheless it is generally regarded as wrong. What about the deeming provision that the property is to be treated as if the donor were beneficially entitled to it? The answer is that the property must still be regarded as “settled property” for the application of the excluded property rules. One does not carry the implications of the deeming provisions as far as the Non-settled Property Solution suggests. One way to reach this conclusion is to note that the deeming provision does not deem the donor to be beneficially and *absolutely* entitled to the settled property. One can be beneficially entitled to property which is settled property. (Bear in mind that “settlement” has a wide definition for IHT. It includes property held subject to a contingency, property charged with the payment of an annuity, and a lease for life. A person entitled to such property may nevertheless be said to be “beneficially” entitled.)

This view is supported by s.49(1) IHTA which provides:

18 Venables, “Excluded Property Trusts and GROBs” [2003] OITR Vol 11 p.75; Akin, *GITC Review*, Vol 1 Issue 2, p.1, accessible www.taxbar.com.

A person beneficially entitled to an interest in possession in settled property shall be treated for the purposes of this Act as *beneficially entitled* to the property in which the interest subsists.

[Emphasis added]

No-one suggests that property to which s.49(1) applies is to be treated as non-settled property for the purposes of the GWR rules. The wording of the deeming provision in s.102(3) is materially the same.

Under the Non-settled Property Solution, the property is simultaneously excluded property (for general IHT purposes) and non-excluded property (for GWR purposes). While that is not impossible, it would be remarkable, even in as convoluted an area as this, and for this reason too the Settled Property Solution is to be preferred.

It has been said that a purposive construction favours the Non-settled Property Solution: the purpose of the GWR rules is to put the donor in the same position as if they had not made the gift. This is the general purpose in the case of gifts by UK domiciliaries. However, arguments on purposive construction only run when one knows the general purpose and is confident that the general purpose applies in the particular circumstances of the case. This argument *assumes* that that purpose necessarily extends to the foreign domiciliary – which begs the question. Perhaps Parliament intended there to be a difference between the two cases. One cannot apply a purposive construction unless the purpose is clear.¹⁹

Even adopting the Settled Property Solution, there will arguably²⁰ be a charge to IHT on the death of a settlor who enjoys a benefit over trust property if at the time of their death the trust property is UK situated (and not UK AUTs or OEICs). Though I doubt if much notice is taken of that in practice.

In short, if the settlor is a beneficiary it is safer not to invest directly in UK situate property during their life.

19 In the battle of the anomalies HMRC might instance the case where a foreign domiciliary made a settlement shortly before becoming UK domiciled, and say that it is absurd that a settlement made in such circumstances should avoid IHT on the death of the settlor. But (1) this is certainly the case where the foreign domiciliary enjoys no benefit from the settlement; and (2) this was the case under estate duty; and (3) this was the case under HMRC practice in the first 15 years or so of IHT; in the circumstances it is wrong (if not absurd) to describe that result as absurd.

20 See 59.8 (Gift of excluded property).

Note that the Non-settled Property Solution favours the taxpayer if a UK domiciliary makes a GWR settlement, and becomes non-UK domiciled before their death. However that won't often happen.

59.13.3 *HMRC view*

After a decade of dithering²¹ HMRC now agree with the Settled Property Solution. The IHT Manual provides:

14396 Settled property: Settlement created when the settlor is domiciled outside the UK [January 2011]

Where the settlor was domiciled outside the UK at the time a settlement was made, any foreign property in the settlement is excluded property and is not brought into charge for Inheritance Tax (IHT) purposes (IHTM27220). This rule applies where property is subject to a reservation of benefit even though the settlor may have acquired a domicile of choice in the UK, or be deemed to be domiciled in the UK, at the time the GWR charge arises (IHTM04071).

Reservation ceasing on death

At the material date FA86/S102(3) deems the donor to be beneficially entitled to property that is, at that time, settled property. As the property in which the reservation subsisted is 'property comprised in a settlement', it is the provisions of IHTA84/S48(3) that are in point. It is the domicile of the settlor at the time the settlement was made that is relevant in deciding whether foreign property in which the reservation subsisted is excluded property.

Example (Henry)

H, who is domiciled in New Zealand, puts foreign property into a discretionary trust under which he is a potential beneficiary (IHTM14393). He dies five years later having acquired a domicile of choice in the UK and without having released the reservation. The property is subject to a reservation on death but it remains excluded property and is outside the IHT charge.

The Manual continues by noting three exceptions:

Exceptions to the rule

There are, however, circumstances where this rule does not apply:

[1] If the trustees had sold the foreign assets so that at the date of death

21 See the 2010/11 edition of this work para 51.12.3.

the settled property was invested in UK assets, the exclusion would not apply as the property comprised in the settlement was not situated outside the UK, so IHTA84/S48(3) cannot apply.

[2] If the donor has acquired a domicile of choice (or is deemed domiciled) in the UK and adds other property to the settlement (irrespective of the situs (IHTM27071) of the property), we regard the donor as creating a separate settlement (IHTM04272). All the trust assets will be property subject to a reservation, but the foreign assets settled when the donor was domiciled outside the UK will be excluded property, whereas the assets settled when the donor was domiciled in the UK will be subject to IHT

[3] And in the reverse situation, if a donor who is domiciled (or deemed domiciled) in the UK creates a settlement with foreign assets and the settled property remains subject to a reservation at death, the trust assets will be subject to IHT under FA86/S102(3) even if the settlor dies domiciled outside the UK as IHTA84/S48(3) does not apply - as well as being subject to relevant property trust charges (IHTM42000).

Point [1] is correct that s.48(3) does not apply but it is arguable that there is no GWR for other reasons.²² Point [2] is very doubtful: see 58.14 (Settlor adds property to trust after change of domicile). Point [3] is correct, assuming the settled property solution is correct. The unfairness of the double charge (which does not seem to trouble HMRC) may be avoidable by winding up the trust.

59.14 Gift to foreign domiciled donee who creates a settlement

Suppose:

- (1) A makes an outright gift to B.
- (2) B makes a gift of that property to a settlement.
- (3) A is a beneficiary of that settlement and enjoys benefits so that there is a reservation of a benefit in relation to A's gift.
- (4) B (and not A) is the settlor of the settlement; see 75.4 (Gift from A to B followed by gift to trust by B).

Now which set of excluded property rules is applied? It is suggested that one must apply the rules applicable to settled property for the reasons given in 59.13 (GWR death charge: excluded property rules for settled property). FA 1986 Sch. 20 para 5 needs to be considered but, properly

²² See 59.8 (Gift of excluded property).

understood, nothing there deems A to be the settlor of the settlement. If that is right, there is no reservation of benefit problem if:

- (a) B (the settlor) was not domiciled in the UK when the settlement is made; and
 - (b) the property is not situated in the UK at the time of the death of A.
- Conversely, on this view, there is a GWR problem if B (the settlor) is UK domiciled (regardless of the domicile of A).

59.15 GWR PET charge

So far we have considered the position where the benefit continues until the death of the donor. Section 102(4) FA 1986 provides:

If, at a time before the end of the relevant period, any property ceases to be property subject to a reservation, the donor shall be treated for the purposes of the 1984 Act as having at that time made a disposition of the property by a disposition which is a potentially exempt transfer.

I refer to this as “**the GWR PET charge**”. Section 102(4) is a deeming provision; it is a different deeming from s.102(3), the GWR death charge. In s.102(3) the donor is deemed to be beneficially entitled. Here, the donor is deemed to have made a PET. To understand the significance of this, it is necessary to set out the definition of a PET. A PET is a particular kind of transfer of value (s.3A IHTA) and s.3 IHTA provides:

- (1) [a] ... a transfer of value is a disposition made by a person (the transferor) as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition;
 - [b] and the amount by which it is less is the value transferred by the transfer.
- (2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

Note that s.3(1) contains two definitions: s.3(1)[a] defines “transfer of value” and s.3(1)[b] defines “value transferred”. For both purposes s.3(2) states that excluded property is (in short) disregarded.

59.15.1 *Non-settled GWR PET charge*

Suppose:

- (1) a non-UK domiciliary makes a non-settled GWR of non-UK situate property; and
- (2) the property ceases to be subject to a reservation (while the donor is still non-UK domiciled).

No-one could sensibly suggest that there is a possible IHT charge. The reason is in s.3(2): the donor is deemed to have made a disposition of excluded property. While one can (just) call that a PET, the value transferred is ignored and no charge to IHT can arise. Nothing in the deeming provision requires one to ignore the application of s.3(2) to s.3(1)[b]. What matters is the domicile of the donor (and the situs of the GWR property) at the time the reservation ceases. There would be a deemed PET if:

- (1) F (a foreign domiciliary) makes a GWR.
- (2) F becomes UK domiciled.
- (3) The GWR is released.²³

59.15.2 *Settled GWR PET charge*

Suppose settled property ceases to be subject to a reservation; eg a donor ceases to be a beneficiary of a trust they have created, and becomes excluded from all benefit. The issues are similar to the case of the GWR death charge: how far do you carry the implications of the deemed PET? Do you deem the GWR property which is actually settled property to be non-settled property? Although the deeming is marginally different, the context is the same as for GWR on death.

The answer must be decided consistently with the answer to the related issue for a GWR on death. If (as concluded above) the Settled Property Solution is correct on death then there is also no charge on a lifetime cessation of GWR. HMRC agree, and (having eventually come down in favour of the Settled Property Solution) accept the view that there is no charge. The IHT Manual provides:

14396 - Settled property: Settlement created when the settlor is

²³ There is a hint of this in IHTM 14318, but the point is not addressed clearly.

domiciled outside the UK [January 2011]*... Reservation ceasing during lifetime*

Where the reservation is released during the donor's lifetime, FA86/S102(4) treats the donor as making a disposition of the property by a disposition which is a potentially exempt transfer (PET) (IHTM04072). This is different to the basis of the charge arising on death, but as property in which the reservation ceases is 'property comprised in a settlement' the provisions of IHTA84/S48(3) are again in point to decide whether any foreign property is excluded property.

As FA86/S102(4) treats the donor as making a disposition, it is the treatment of excluded property when disposition is made that is relevant. IHTA84/S3(2) states that no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of disposition.

So as the donor is treated as making a disposition, property is treated as ceasing to form part of their estate. Provided that property is excluded property, IHTA84/S3(2) applies to exclude the assets in which the reservation ceased from charge.

This vindicates the view taken in the pre-2011 editions of this work. ("The taxpayer should conduct their affairs on the basis of the Settled Property Solution. ... One should not be deterred by the ghost of an argument rattling its chains in the IHT Manual.")

The Manual continues with three exceptions:

The same exceptions to the above will apply as regards

[1] foreign property which is replaced by UK situs property (IHTM27071),

[2] property added to the settlement when the donor is domiciled in the UK, and

[3] in the reverse situation outlined above, a charge will arise under FA86/S102(4) if the reservation ceases before the donor's death.

For these exceptions, see 59.13.3 (HMRC view).

59.16 GWR on termination of interest in possession

Before 22 March 2006, GWR did not in principle apply on the termination of an interest in possession, because the termination did not usually involve a disposal by way of gift. Now s.102ZA FA 1986 provides:

- (1) Subsection (2) below applies where—
 - (a) an individual is beneficially entitled to an interest in possession in settled property,
 - (b) either—
 - (i) the individual became beneficially entitled to the interest in possession before 22nd March 2006, or
 - (ii) the individual became beneficially entitled to the interest in possession on or after 22nd March 2006 and the interest is an immediate post-death interest, a disabled person's interest or a transitional serial interest, or falls within section 5(1B) of the 1984 Act and
 - (c) the interest in possession comes to an end during the individual's life.
- (2) For the purposes of—
 - (a) section 102 above, and
 - (b) Schedule 20 to this Act,the individual shall be taken (if, or so far as, he would not otherwise be) to dispose, on the coming to an end of the interest in possession, of the no-longer-possessed property²⁴ by way of gift.

On the termination of an interest in possession, the former life tenant is in the same position as the settlor of the trust. See 59.13 (GWR death charge: excluded property rules for settled property).

If the life tenant does not enjoy any GWR, no problem arises.

If the former life tenant does enjoy a benefit the position is thought to be as follows:

- (1) The GWR rules do not apply if the GWR property is excluded property.
- (2) The GWR property is excluded if:
 - (a) the settlor was not UK domiciled when the settlement was made; and
 - (b) the trust property is not UK situate (or UK funds excluded property) at the time of the GWR charge (the death of the former life tenant or the time of cessation of benefit).

²⁴ "The no-longer-possessed property" is defined in s.102ZA(3):

"In subsection (2) above 'the no-longer-possessed property' means the property in which the interest in possession subsisted immediately before it came to an end, other than any of it to which the individual becomes absolutely and beneficially entitled in possession on the coming to an end of the interest in possession."

59.17 GWR property subject to debt

Debts are in principle deductible in computing a GWR charge. HMRC accept this. IHT Manual provides:

14401. The property comprised in the gift [June 2012]

... Example

In 1990 the donor settles £1 on discretionary trusts of which he is, and remains until his death in 2000, an object. Shortly after the creation of the settlement he advances £50,000 to the trustees by way of loan, interest free and repayable on demand.

At the time of his death, the settled property comprises £1 cash (representing the original £1 gift into settlement) and the proceeds of an insurance policy (purchased with the borrowed monies) on the donor's life amounting to £250,000.

The loan of £50,000 has been repaid at the rate of £2,500 per annum by the trustees and £25,000 is outstanding at the date of death.

The proceeds of £250,000, *less the loan of £25,000*, are derived from the original loan, and you can treat them as part of the death estate. (The balance outstanding under the loan – £25,000 – forms part of the free estate).

(Emphasis added)

59.18 IHT spouse exemption defence to GWR death charge

This section considers whether the IHT spouse exemption can apply on the death of the donor so as to override the GWR death charge.²⁵

Suppose:

- (1) H makes a gift to S which is a GWR so the gifted property is GWR property.
- (2) H dies and leaves H's entire estate to his spouse W (and the IHT spouse exemption applies to H's estate).

On the death of H the position for the GWR property is governed by s.102(3) FA 1986:

²⁵ For other IHT issues see 59.9 (GWR spouse exemption); 69.1 (UK domiciliary married to foreign domiciliary) and 63.1 (IHT spouse exemption on death of a foreign domiciliary).

...that property shall be treated for the purposes of the [IHTA] as property to which [H] was beneficially entitled immediately before his death.

The GWR property is not excluded property (even if S is foreign domiciled).²⁶ So H will in principle be subject to inheritance tax on the GWR property on H's death.

The spouse exemption is not available on the death of H to avoid this GWR charge. The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

- ... is an exempt transfer to the extent that the value transferred is
- [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
- [b] so far as the value transferred is not so attributable, to the extent that that estate is increased.

This exemption does not apply to the GWR property since it does not become comprised in the estate of W. HMRC agree. The IHT Manual provides:

14303 Devolution of GWR property [July 2006]

It is important to keep in mind that the GWR rules are fictitious treatments created only for the purposes of preventing IHT avoidance. They do not affect the **actual** devolution of the property in real life, so the gifted property does not actually pass on death under the will or intestacy, neither was any gift actually made at the time the reservation ceased.

The gifted property passed to the actual donee at the time it was actually made. Thus, any reliefs or exemptions (IHTM11001) that may be available on death, or that apply to PET's, such as spouse or civil partner relief (IHTM11032), charity relief or annual exemptions, will **not** apply to the transfer deemed to be made on death, or deemed to be made when the reservation ceases.

Suppose:

- (1) H (UK domiciled) makes a gift to W (foreign domiciled at the time of

26 See 59.12 (GWR death charge: non-settled property excluded property rules).

the gift).²⁷

- (2) The gift does not qualify for the IHT spouse (or any other) exemption and H continues to enjoy benefits from the property until H's death so the gifted property is GWR property.
- (3) W still owns the GWR property at the time of the death of H.
- (4) W has become UK domiciled (or deemed domiciled) at the time of the death of H.

At first glance it might seem that the IHT spouse exemption does not apply. On the facts of this example the conditions of the relief are not in reality satisfied. The GWR property does not “become” comprised in the estate of the spouse; and on the occasion of the death of H, the estate of the spouse has not “increased”. However, one must remember that s.102(3) FA 1986 is a deeming provision. It is the old question of how far one carries the deeming.²⁸ If one deems, as s.102(3) requires, the GWR property to be property to which H was beneficially entitled, it would follow that one must deem the estate of W to be increased by reason of the death of H. The conclusion is supported by considering the object of the GWR rules. The object is to put the donor in the same position as if they had not made the gift. If H had not made H's gift then (on the facts of the above example) H would qualify for the spouse exemption.

The IHT spouse exemption would also apply to defeat a GWR death charge if H made a gift to a trust under which H's spouse acquired an estate interest in possession on H's death.

The same would apply if A made a GWR gift to B and A was not married to B at the time of the gift but was married at the time of A's death.

59.18.1 *Remedial tax planning where there has been a GWR*

Where H has made a gift to W, and a reservation of benefit problem arises, the following solutions may be considered:

- (1) H ceases to enjoy any benefit.
- (2) W gives the property back to H.
- (3) Arrange that the spouse exemption applies on the death of H. (Not possible if H is UK domiciled and W is not UK domiciled at the time

²⁷ The gift is a PET (but assume H survives seven years so no tax charge arises on the PET).

²⁸ See App 2.1 (Construction of deeming provisions).

of the death of H).

- (4) W settles the property: see 69.9.2 (Gift to foreign domiciled spouse, followed by settlement by spouse).

59.19 Identifying the property disposed of by way of gift: tracing

The identity of the property disposed of by way of gift matters for several reasons:

- (1) To determine whether the donor has reserved a benefit over it.
- (2) To apply the excluded property rules.
- (3) To identify the property subject to the GWR charge.

Sch 20 FA 1986 contains some tracing rules.

59.19.1 “The material date”

The legislation uses the term “material date” which is (in short) the date on which the GWR charge occurs. Para 1 Sch 20 FA 1986 provides:

"the material date", in relation to any property means, in the case of property falling within subsection (3) of the principal section [s.102], the date of the donor's death and, in the case of property falling within subsection (4) of that section, the date on which the property ceases to be property subject to a reservation;

59.19.2 *Property received in substitution for gifted property*

Para 2(1) Sch 20 FA 1986 provides the general rule:

Where

[a] there is a disposal by way of gift and,

[b] at any time before the material date, the donee ceases to have the possession and enjoyment of any of the property comprised in the gift, then on and after that time the principal section [s.102] and the following provisions of this Schedule shall apply as if the property, if any, received by the donee in substitution for that property had been comprised in the gift instead of that property (but in addition to any other property comprised in the gift).

Para 2(3) Sch 20 FA 1986 provides a commonsense definition of “in substitution”:

In sub-paragraph (1) above the reference to property received by the donee in substitution for property comprised in the gift includes in particular—

- (a) in relation to property sold, exchanged or otherwise disposed of by the donee, any benefit received by him by way of consideration for the sale, exchange or other disposition; and
- (b) in relation to a debt or security, any benefit received by the donee in or towards the satisfaction or redemption thereof; and
- (c) in relation to any right to acquire property, any property acquired in pursuance of that right.

Para 2(2) Sch 20 FA 1986 provides two exceptions. The first relates to settled property.²⁹ The second is a puzzle:

- (2) This paragraph does not apply if the property disposed of by the gift ...
 - (b) is a sum of money in sterling or any other currency.

Taken at face value, this suggests that if there is a non-settled gift of money which is then invested, GWR ceases to apply. Could that really be correct?

59.19.3 *Gift by donee*

Para 2(4) Sch 20 FA 1986 provides:

Where, at a time before the material date, the donee
[a] makes a gift of property comprised in the gift to him,
[b] or otherwise voluntarily divests himself of any such property otherwise than for a consideration in money or money's worth not less than the value of the property at that time,
then, unless he does so in favour of the donor, he shall be treated for the purposes of the principal section and sub-paragraph (1) above as continuing to have the possession and enjoyment of that property.

Para 2(5) Sch 20 FA 1986 defines “voluntarily”::

For the purposes of sub-paragraph (4) above—

²⁹ See 59.19.8 (Tracing rule for settled property).

- (a) a disposition made by the donee by agreement shall not be deemed to be made voluntarily if it is made to any authority who, when the agreement is made, is authorised by, or is or can be authorised under, any enactment to acquire the property compulsorily; and
- (b) a donee shall be treated as divesting himself, voluntarily and without consideration, of any interest in property which merges or is extinguished in another interest held or acquired by him in the same property.

59.19.4 *Tracing in cases of gift of shares*

Para 1 Sch 20 FA 1986 provides:

(6) Where

[a] any shares in or debentures of a body corporate are comprised in a gift and

[b] the donee is, as the holder of those shares or debentures, issued with shares in or debentures of the same or any other body corporate, or granted any right to acquire any such shares or debentures, then, unless the issue or grant is made by way of exchange for the first-mentioned shares or debentures, the shares or debentures so issued, or the right granted, shall be treated for the purposes of the principal section and this Schedule as having been comprised in the gift in addition to any other property so comprised.

(7) In sub-paragraph (6) above the reference to an issue being made or right being granted to the donee as the holder of shares or debentures shall be taken to include any case in which an issue or grant is made to him as having been the holder of those shares or debentures, or is made to him in pursuance of an offer or invitation made to him as being or having been the holder of those shares or debentures, or of an offer or invitation in connection with which any preference is given to him as being or having been the holder thereof.

This is needed because a bonus issue is not “in substitution” and so not within para 2(1). If the drafter had used the modern term “derived from” it would not have been necessary, but the drafter has taken the language from the old estate duty provision in the FA 1957.

59.19.5 *Deduction for new consideration in tracing cases*

Para 3 Sch 20 FA 1986 provides:

(1) Where either sub-paragraph (3)(c) or sub-paragraph (6) of paragraph 2 above applies to determine, for the purposes of the principal section, the property comprised in a gift made by a donor—

- (a) the value of any consideration in money or money's worth given by the donee for the acquisition in pursuance of the right referred to in the said sub-paragraph (3)(c) or for the issue or grant referred to in and said sub-paragraph (6), as the case may be, shall be allowed as a deduction in valuing the property comprised in the gift at any time after the consideration is given, but
- (b) if any part (not being a sum of money) of that consideration consists of property comprised in the same or another gift from the donor and treated for the purposes of the 1984 Act as forming part of the donor's estate immediately before his death or as being attributable to the value transferred by a potentially exempt transfer made by him, no deduction shall be made in respect of it under this sub-paragraph.

(2) For the purposes of sub-paragraph (1) above, there shall be left out of account so much (if any) of the consideration for any shares in or debentures of a body corporate, or for the grant of any right to be issued with any such shares or debentures, as consists in the capitalisation of reserves of that body corporate, or in the retention by that body corporate, by way of set-off or otherwise, of any property distributable by it, or is otherwise provided directly or indirectly out of the assets or at the expense of that or any associated body corporate.

(3) For the purposes of sub-paragraph (2) above, two bodies corporate shall be deemed to be associated if one has control of the other or if another person has control of both

59.19.6 *Donee dies before the material date*

Para 4 Sch 20 FA 1986 provides:

Where there is a disposal by way of gift and the donee dies before the date which is the material date in relation to any property comprised in the gift, paragraphs 2 and 3 above shall apply as if—

- (a) he had not died and the acts of his personal representatives were

- his acts; and
- (b) property taken by any person under his testamentary dispositions or his intestacy (or partial intestacy) were taken under a gift made by him at the time of his death.

59.19.7 *Tracing rule on termination of estate interest in possession*

Para 4A Sch 20 FA 1986 provides:

- (1) This paragraph applies where—
 - (a) under section 102ZA of this Act, an individual ("D") is taken to dispose of property by way of gift, and
 - (b) the property continues to be settled property immediately after the disposal.
- (2) Paragraphs 2 to 4 above shall not apply but, subject to the following provisions of this paragraph, the principal section and the following provisions of this Schedule shall apply as if the property comprised in the gift consisted of the property comprised in the settlement on the material date, except in so far as that property neither is, nor represents, nor is derived from, property originally comprised in the gift.
- (3) Any property which—
 - (a) on the material date is comprised in the settlement, and
 - (b) is derived, directly or indirectly, from a loan made by D to the trustees of the settlement,shall be treated for the purposes of sub-paragraph (2) above as derived from property originally comprised in the gift.
- (4) If the settlement comes to an end at some time before the material date as respects all or any of the property which, if D had died immediately before that time, would be treated as comprised in the gift,—
 - (a) the property in question, other than property to which D then becomes absolutely and beneficially entitled in possession, and
 - (b) any consideration (not consisting of rights under the settlement) given by D for any of the property to which D so becomes entitled,shall be treated as comprised in the gift (in addition to any other property so comprised).
- (5) Where, under any trust or power relating to settled property, income arising from that property after the material date is accumulated, the accumulations shall not be treated for the purposes of sub-paragraph (2) above as derived from that property.

59.19.8 *Tracing rule for settled property*

Para 2(2) disapplies the usual GWR rule for non-settled property.³⁰

This paragraph does not apply if the property disposed of by the gift—
 (a) becomes settled property by virtue of the gift...

Instead, para 5 Sch 20 FA 1986 provides:

(1) Where there is a disposal by way of gift and the property comprised in the gift becomes settled property by virtue of the gift,

[a] paragraphs 2 to 4 above shall not apply

[b] but, subject to the following provisions of this paragraph, the principal section and the following provisions of this Schedule shall apply as if the property comprised in the gift consisted of the property comprised in the settlement on the material date, except in so far as that property neither is, nor represents, nor is derived from, property originally comprised in the gift.

(2) If the settlement comes to an end at some time before the material date as respects all or any of the property which, if the donor had died immediately before that time would be treated as comprised in the gift,—

(a) the property in question, other than property to which the donor then becomes absolutely and beneficially entitled in possession, and

(b) any consideration (not consisting of rights under the settlement) given by the donor for any of the property to which he so becomes entitled,

shall be treated as comprised in the gift (in addition to any other property so comprised).

(3) Where property comprised in a gift does not become settled property by virtue of the gift, but is before the material date settled by the donee, sub-paragraphs (1) and (2) above shall apply in relation to property comprised in the settlement as if the settlement had been made by the gift; and for this purpose property which becomes settled property under any testamentary disposition of the donee or on his intestacy (or partial intestacy) shall be treated as settled by him.

(4) Where property comprised in a gift becomes settled property either by virtue of the gift or as mentioned in sub-paragraph (3) above, any

30 See 59.19.2 (Tracing rule for non-settled property).

property which—

- (a) on the material date is comprised in the settlement, and
- (b) is derived, directly or indirectly, from a loan made by the donor to the trustees of the settlement,

shall be treated for the purposes of sub-paragraph (1) above as derived from property originally comprised in the gift.

(5) Where, under any trust or power relating to settled property, income arising from that property after the material date is accumulated, the accumulations shall not be treated for the purposes of sub-paragraph (1) above as derived from that property.

CHAPTER SIXTY

IHT CONSEQUENCES OF TRANSFERS BETWEEN TRUSTS

60.1 Transfers between trusts and adding to trusts – Introduction

This chapter considers the IHT consequences of transfers between trusts and adding property to trusts. There are three main tiers of rules:

- (1) General principles of trust law and tax law which apply in the absence of specific IHT provisions.
- (2) A specific IHT provision which applies generally for IHT trust taxation: s.44(2) IHTA. I refer to this as “**general IHT law**”.
- (3) Specific IHT provisions which apply only to the taxation of relevant property¹ which I call “**relevant property taxation**”: ss.81–82 IHTA.

The main significance of these rules relates to excluded property status, especially if there has been a change of domicile of the settlor. The rules can affect other matters such as the date and computation of a ten-year charge.

For completeness: a fourth tier of rules applies to employee trusts² and pension trusts.

60.1.1 *Cross references*

Transfers between trusts raise other issues not discussed in this chapter: For s.87 issues, see 48.18 (Transfer between trusts). For sch 4B issues, see 49.1 (Flip-flop schemes). For s.731 issues, see 29.32 (Transfer between trusts).

¹ That is, trust property which is relevant property as defined by s.58 IHTA. Before 2006 this meant discretionary trusts, but (from March 2006) it includes non-estate IP trusts.

² See s.86(4)(5) IHTA (not discussed here).

Another issue (not discussed in this book) is that the transfer may be a transfer of value or may give rise to an exit charge under s.65 IHTA.

For IT and CGT aspects of trusts with two settlors, see 76.1 (Trusts with two settlors – Introduction).

For the rather special case of property added after March 2006 to a pre-2006 trust under which the settlor or spouse has an initial interest in possession, see 58.13.4 (Trusts with only some property within s.80 fictions).

60.2 Trust law background

There are several ways by which property can move between settlements (without a person becoming beneficially entitled to the property in the meantime). For the purposes of this chapter the two important ways are as follows:

- (1) Trustees may exercise a power to transfer trust property to another trust.³
- (2) (a) A beneficiary who is entitled to a contingent or reversionary interest in the capital of the trust fund of trust A may assign that interest to trust B; and
(b) the trustees of trust B in due course become absolutely entitled to the trust fund of trust A.

60.3 General tax principles

The position is in short as follows:⁴

- (1) If trustees exercise a power to transfer property from trust A to trust B, then, at least to the extent of the transferred property, the settlor of

3 A transfer to a separate settlement needs to be distinguished from the situation where trustees exercise a power to vary the terms on which they hold trust property without a transfer to another trust. The distinction is a trust law concept. A discussion is beyond the scope of this book: see *Dymond's Capital Taxes* para 16.230.

Trust law questions also arise: whether trustees have a power to transfer to another trust and restrictions on accumulation and perpetuity periods. These issues are not discussed here.

4 See 75.7 (Transfer from trust A to trust B by exercise of trustees' power).

trust A is a settlor of trust B.⁵

- (2) If a beneficiary with an equitable interest under trust A transfers this interest to trust B, then, at least to the extent of the interest transferred, the beneficiary is a settlor of trust B.

60.4 The separate settlements fiction

Section 44(2) IHTA provides:

Where more than one person is a settlor in relation to a settlement and the circumstances so require, this Part of this Act (except s.48(4) to (6)) shall have effect in relation to it as if the settled property were comprised in separate settlements.

I refer to this as “**the separate settlements fiction**”.

The fiction is needed because inheritance taxation of trusts depends on:

- (1) the domicile of the settlor
- (2) the transfers made by the settlor in the 7 years before commencement of the trust (which affect the trust’s nil-rate band for RP taxation).

The rules are drafted on the basis that every trust has one settlor and only properly work on that basis; instead of making provision for a trust with multiple settlors, the scheme is to regard such trusts as multiple trusts.

IHT Manual provides:

42253. More than one settlor [February 2006]

... This separation has 3 main effects

- [1] Where more than one trust exists each will have its own nil-rate band for rate purposes.
- [2] The value of property may be affected. For example, holdings of unquoted shares in a single trust might amount to a control holding whereas the same parcels of shares would be minority holdings if taken separately.
- [3] The separate trust made by the second person will have its own starting date. (IHTM42221)

⁵ That is:

- (1) If all the property of trust B is derived from A, directly or indirectly, then A is the only settlor of trust B.
- (2) If some of the property of trust B is derived from A and some from B, then A and B become joint settlors.

This is correct as far as it goes, but it ignores the settlor domicile aspects of the rule.

When the separate settlements fiction applies, the settled property is treated as being in separate settlements (which I call “**notional trusts**”). It is important to note that these are fictional or notional trusts. They do not exist in the sense that the trust with several settlors exists. Each notional trust must (for IHT purposes) be regarded as possessing three features: (1) notional trust property (2) a notional settlor and (3) a notional date on which it was made. These features are as notional or fictional as the notional trust itself. The statute does not expressly tell us what they are: context and common sense must fill that gap.

60.4.1 *When separate settlements fiction does not apply*

The separate settlements fiction is expressed to apply for the purposes of Part 3 IHTA (not generally), but all the important provisions which govern trust tax are in Part 3.⁶

There are two cases where the separate settlements fiction does not apply.

Firstly, the fiction does not apply unless “the circumstances so require”. Normally the circumstances do so require, but the drafter was aware that the separate settlements fiction might not always be appropriate. Most likely the drafter could identify any cases where the fiction should not be applied but thought there might be some such cases; another possibility is that the drafter identified some cases but thought they were too difficult or insufficiently important to set out in the statute. So that has been left to the courts to sort out.

Secondly, the fiction does not apply for the purposes of s.48(4) to (6), ie for the purposes of the exemption for FOTRA securities. The reason was that FOTRA exemption does not depend on the identity of the settlor, it depends on the identity of the beneficiaries.⁷ It was therefore unnecessary to apply the separate settlements fiction. As far as I can see the fiction would not have done any harm, but it would not have had any effect: presumably the drafter thought it safer or simpler not to have to bother with the separate settlements fiction.

⁶ The separate settlements fiction has to be repeated in s.201(4) IHTA in order to apply it to s.201 (because that is not in Part 3).

⁷ See 58.11 (Trusts: FOTRA securities).

60.5 B adds property to A's trust

Suppose:

- (1) an individual ("A") creates a trust ("the real trust"), and
- (2) another⁸ individual ("B") adds property to it.⁹

The real trust has two settlors, A and B. The separate settlements fiction applies, and one must imagine that the trust fund of the real trust is comprised in two notional trusts, "notional trust A" and "notional trust B".

Common sense suggests:

- (1) Notional trust A is regarded as if:
 - (a) It holds the property given by A.
 - (b) A is its sole settlor.
 - (c) It was made at the time A made the real trust.
- (2) Notional trust B is regarded as if:
 - (a) It holds the property given by B.
 - (b) B is its sole settlor.
 - (c) It was made at the time B added property to the real trust.

60.5.1 *More than one addition to a trust*

Suppose:

- (1) An individual ("A") creates a trust ("the real trust").
- (2) Another individual ("B") adds property to it ("the first addition").
- (3) B later adds more property to the trust ("the second addition").

It is considered that there are still two notional trusts. Notional Trust A is as before. Notional trust B is regarded as if:

- (a) It holds the property given by B.
- (b) B is its sole settlor.
- (c) It was made at the time of the first addition
- (d) B added property to the notional trust at the time of the second addition.

It follows that trust property added by the second addition may be excluded property if B was not UK domiciled at the time of the first

⁸ For the position where the settlor adds to their *own* trust, see 58.14 (Settlor adds property to trust after change of domicile).

⁹ The same analysis applies if A and B together transfer funds to a new jointly made trust.

addition.¹⁰

60.5.2 *Adding value indirectly*

It is suggested that the same applies if B adds value indirectly to the real trust (eg by a gift to a company held by the real trust). The real trust has two settlors, A and B.¹¹ The circumstances require the real trust to be regarded as two separate notional trusts. A division of the trust property of the real trust into two parts representing the value given by A and the value given by B is still possible. It may not be easy but it is no harder than many apportionments required for tax.¹²

60.6 Direct settlor and indirect settlor

Suppose there is an arrangement under which:

- (1) A gives property to B, and
- (2) B gives the property to a trust (“the real trust”).

It appears at first sight that there are then two settlors: an indirect settlor (A) and a direct settlor (B).¹³ Both have provided the *same* property.

What is the IHT analysis? On one view the separate settlements fiction applies so that the settled property in the real trust is treated as being comprised in separate trusts (which I call “notional trust A” and “notional trust B”). On this view the consequence is said to be that:

- (1) Notional trust A:
 - (a) holds *all* the trust property of the real trust;
 - (b) A is its sole settlor;
 - (c) I do not know when proponents of this view would say that notional trust A was made. It would either be at the time A gave the property to B or the time that B settled it, and this poses perhaps another difficulty with this view.
- (2) Notional trust B:
 - (a) also holds *all* the trust property of the real trust;

10 See 58.14 (Settlor adds property to trust after change of domicile).

11 See 75.14 (Provision of property for company held by trust).

12 For instance, apportionment of gains of non-resident companies to participators.

13 See 75.4 (Gift from A to B followed by gift to trust by B). This issue usually arises in the context of failed tax planning of the kind discussed at 75.33 (Planning to create trust with foreign domiciled settlor).

- (b) B is its sole settlor;
- (c) was made at the time B created the real trust.

The difficulty with this view is that it leads to double taxation¹⁴ and the separate settlements fiction which only applies “if the circumstances so require” should not be used to give that result. So the better view is that the circumstances do not “so require” and the separate settlements fiction does not apply.

We have therefore one real settlement with two settlors. What is the position for excluded property if A is foreign domiciled and B is not? It will be recalled that settled property is (in short) excluded property “unless *the settlor* was domiciled in the UK at the time the settlement was made”. There are two possible solutions:

- (1) One cannot say that “the settlor” was domiciled in the UK unless both settlors were domiciled here. In that case the trust property may be excluded property if either A or B are foreign domiciled.
- (2) To read the word “the settlor” in this context as meaning “the settlor or one of the settlors”.¹⁵ In that case the trust property is only excluded property if A and B are both foreign domiciled.

Both solutions have anomalous results, though in one case the anomaly favours the taxpayer and in the other it favours HMRC.

The best solution to this conundrum is that one should identify A as the “real” settlor and infer that B should not be regarded as a settlor.¹⁶ Then the anomalies do not arise.

60.6.1 *The HMRC view*

RI 166 provides:

Several persons contribute to a single settlement [February 1997]
 ...
 [Section 44(2)] is similar in terms to FA 1975 Sch 5 para 1(8), which

¹⁴ This view is supported by comments in *Hatton v IRC* [1992] STC 140 at pp.160–161. But (1) the comments are obiter (2) the judge did not have the benefit of counsel’s arguments on the issue (3) the judge did not appreciate the double taxation difficulties which arise on their view; in the circumstances it is considered that these comments do not represent the law.

¹⁵ Applying (perhaps extending) the rule of construction that the singular includes the plural.

¹⁶ See 75.4.2 (If A is indirect settlor, is B also the settlor?).

was considered by Chadwick J in *Hatton v IRC* [1992] STC 140. In the light of the decision in that case [HMRC] take the view

- [1] that the determination of the extent to which overseas assets in a settlement are excluded property by reason of the settlor's domicile is a relevant "required circumstance"; and that
- [2] where a clear, or reasonably sensible, attribution of settled property between the contributions made by several settlors is possible, there will be a separate settlement, with its own attributed assets, for each contributor for IHT purposes;
- [3] if such an attribution is not feasible, each separate settlement will comprise all the assets of the single, actual settlement.¹⁷

Trust records

It follows from the comments above that the trustees of a settlement should keep adequate records to enable any necessary attribution of the settled property to be made if ... two or more persons have contributed funds for the purposes of the settlement.

Point [2] is correct. Point [3] is difficult to apply and doubtful. It is difficult to apply because how does one know whether attribution is "feasible"? I suggest it should always be feasible where two or more persons have contributed funds.¹⁸ Point [3] is doubtful because it rests on a shaky obiter comment, discussed above, which was actually considering the different situation of *reciprocal* settlors. I do not wish to consider reciprocal settlors here because they are hardly ever found in practice, but if the Judge's comments are right at all, they should be restricted to the case of reciprocal settlors, where it might more plausibly be said that attribution between settlors is not feasible. RI 166[3] suggests that penal taxation may arise as a result of inadequate record keeping, but that cannot

¹⁷ In similar vein, IHT Manual provides:

"42253. More than one settlor [February 2006]

... In practice, you can take the phrase 'and the circumstances so require' to mean, 'in a simple and straightforward case'.

- [1] You can accept the separateness of direct additions made by the settlor's favourite aunt,
- [2] but if for instance the added property is situate in Liechtenstein and transferred by a nominee in Liberia to a trust company in Jersey you would need to satisfy yourself as to what the circumstances were and whether they require treatment as separate trusts."

Para [2] unhelpfully ducks the issue.

¹⁸ This is assumed in s.471 ITA; see 75.7.3 (IT and CGT rule).

be right.

In practice it is perhaps better to avoid joint settlors (or for one person to add property to a settlement made by another). This avoids the complication of the separate settlements fiction. But in a straightforward case there should not be any difficulty as long as:

- (1) all settlors are foreign domiciled or all are UK domiciled; or
- (2) the settlors include both UK and foreign domiciliaries, but trust record keeping is adequate. (Ordinary trust accounts should suffice.)

It is likewise best to avoid indirect additions to a trust fund (eg a beneficiary using their own funds to improve trust property), where the original settlor is foreign domiciled and another person adding property is UK domiciled. If the settlor adds property to a trust of which they are the settlor, this problem does not arise.¹⁹

60.7 Transfer from trust made by A to trust made by B

This paragraph considers the general IHT position though if (as is usually the case) the trust property is relevant property, s.81 also needs consideration.²⁰

Suppose:

- (1) A gives property (“A’s fund”) to trust A (“real trust A”).
- (2) B gives property (“B’s fund”) to trust B (“real trust B”).
- (3) The trustees of real trust A transfer A’s fund to real trust B.²¹

Real trust B has two settlors, A and B. The separate settlements fiction applies and one imagines that the settled property is comprised in two notional trusts (“notional trust A” and “notional trust B”).

Notional trust A is regarded as if:

- (1) it holds the property provided by A;
- (2) A is its sole settlor;
- (3) The important question is: at what time is notional trust A regarded as being made? The choice is:
 - (a) at the time that real trust A was made;
 - (b) at the time of the transfer to real trust B.

The latter view cannot be right, for various anomalies would then arise.

19 See 58.14 (Settlor adds property to trust after change of domicile).

20 See 60.9 (The same settlement fiction: s.81).

21 The same analysis applies if the trustees of real trusts A and B each transfer their trust funds to a third real trust C.

- (1) Suppose A died before the transfer to real trust B. One cannot then apply the rule that the excluded property status of the trust depends on the domicile of the settlor “at the time the settlement was made”.²²
- (2) Suppose a transfer from trust A to trust B and A changes domicile after the date of trust A but before the transfer:
 - (a) If A is UK domiciled when A made real trust A and foreign domiciled at the time of the transfer to real trust B, A’s fund would become excluded property after the transfer. One would not expect HMRC to agree with that.
 - (b) Conversely, if A is foreign domiciled when A made real trust A and UK domiciled at the time of the transfer to real trust B, the trust fund would cease to be excluded property.

These are not equivalent or self cancelling anomalies, for in case (a) no transfers would usually take place, whereas in case (b) transfers would take place every time.

Under my analysis, there is in principle no IHT advantage or disadvantage from a transfer to another trust, regardless of changes in the settlor’s domicile, or the settlor’s death, which is logical and sensible. I see no difficulty in a rule that the notional trust is regarded as made before the transfer, for once one accepts that the notional trust is fictional, it can logically be regarded as being made on any date.

This view is also consistent with the principle in *Muir v Muir* [1943] AC 468.

22 It has been argued that if A is UK domiciled when A made real trust A and dead at the time of the transfer to real trust B, A’s fund can be excluded property after the transfer. The argument is:

- (1) Notional trust A is regarded as made at the time of the transfer to real trust B.
- (2) A is regarded as not “domiciled in the UK” at that time (because a dead person has no domicile).

The view that notional trust A is regarded as made at the time real trust A was made avoids obvious anomalies and is to be preferred.

If (contrary to my view) notional trust A is regarded as made at the time of the transfer to real trust B, after the death of A, one might regard A as having at that time the domicile A had:

- (1) at the time of A’s death; or
- (2) at the time A made real trust A.

Another view is that s.44(2) only applies if the circumstances so require, and they do not so require. However adopting my approach, s.44(2) gives a sensible result.

60.8 Transfer from trust made by A to another trust made by A

This section considers the general IHT position though if (as is usually the case) the trust property is relevant property, s.81 also needs consideration.²³

Suppose:

- (1) A creates two separate trusts, trust A1 and A2.
- (2) The trustees of trust A1 transfer property (“the transferred property”) to trust A2.

Trust A2 has only one settlor, A, and the separate settlements fiction does not apply to it. The possibilities are as follows:

A is UK domiciled when A made trust A1 but not when A made trust A2. It is suggested that the transferred property in trust A2 may in principle qualify as excluded property. Trust A2 *does* satisfy the condition that the settlor was foreign domiciled at the time that *this* settlement was made.

A is foreign domiciled when A made trust A1 and UK domiciled when A made trust A2. The result is reversed. The transferred property in trust A2 is not excluded property. Trust A2 does not satisfy the condition that the settlor was foreign domiciled when this settlement was made.

Thus there is a distinction between:

- (1) transfer from trust made by A to a trust made by B (change of A’s domicile irrelevant); and
- (2) transfer from trust made by A to another trust made by A (change of A’s domicile significant).

This is anomalous but the anomaly naturally follows from the fact that the separate settlements fiction applies in case (1) and not in case (2).

60.8.1 *Transfer from trust made by A to empty trust*

It is tentatively suggested that the same applies where trustees of trust A1 transfer the trust fund to new trustees who hold on the terms of a new declaration of trust which is an “empty trust”, there being no trust property before the transfer (“trust A2”). In this case too the separate settlements

23 See 60.9 (The same settlement fiction: s.81).

fiction does not apply.

The view that trust A2 is regarded as made at the time trust A1 was made, applying the principle of *Muir v Muir* [1943] AC 468, gives a sensible result but is hard to reconcile with s.60 IHTA which provides:

In this Chapter references to the commencement of a settlement are references to the time when property first becomes comprised in it.

It is considered that the transferred property may in principle be excluded property if A is living and foreign domiciled at the time of the transfer, even though A was UK domiciled when A made trust A1.

What if A is dead at the time of the transfer? On a literal reading, one might argue that (regardless of the domicile of A during A's life) the settlor A was not UK domiciled when trust A2 was made, since a deceased person has no domicile. The scope for tax avoidance would make that result unacceptable to a court in a case where A was UK domiciled at the time A made trust A1 and at the time of A's death. A court is likely to regard A as retaining after A's death the domicile A had during A's life. This is not as much of a stretch as first appears. If a company can be regarded as having a domicile (by analogy to the domicile rules of a living individual) why not a deceased person? However, it is suggested that the trust property in trust A2 may be excluded property if A was not UK domiciled at the time of A death.

60.9 The same settlement fiction: section 81

Section 81(1) IHTA provides:

Where property which ceases to be comprised in one settlement becomes comprised in another then, unless in the meantime any person becomes beneficially entitled to the property (and not merely to an interest in possession in the property), it shall for the purposes of this Chapter²⁴ be treated as remaining comprised in the first settlement.

I call this “**the same settlement fiction**”.

What is the purpose of the same settlement fiction? It must be intended to counter IHT avoidance based on moving property between settlements.

²⁴ “This Chapter” is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

Suppose a trust (“the old trust”) is approaching its 10-year anniversary (on which a 10-year charge would arise). Simple examples of tax avoidance by transfer to a new trust (in the absence of s.81) are as follows:

- (1) The trustees might transfer the trust property to a new trust (made by the same settlor), whose 10-year anniversary is 10 or nearly 10 years ahead.
- (2)
 - (a) The trustees might appoint a reversionary interest to a beneficiary.
 - (b) The beneficiary transfers that interest to a new trust.
 - (c) The new trust becomes entitled to the trust property before the ten year anniversary of the old trust.

These schemes would avoid the 10-year charge on the old trust.²⁵ Section 81 effectively counteracts both these schemes by deeming the trust property to remain in the old trust. This explains why the same settlement fiction applies only for the purpose of relevant property taxation.

IHT regards trust property as a continuing fund,²⁶ so s.81 does not apply on a sale between trusts at full value, for no property moves between settlements.

Section 81 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest free loan repayable on demand, because the promise to repay is full consideration.

The section only applies on a transfer of trust capital: if trustees of a discretionary trust distribute trust income to another trust, it is considered that s.81 does not apply, because the income is not “settled property”.

What if property is transferred from trust A to trust B and the terms of the trusts are different? Although the property transferred from is deemed to be held in trust B, it is considered that it is not deemed to be held on the terms of trust A: it is regarded as held on the terms set out in trust B as if they had been incorporated in trust A. For instance, a transfer from a discretionary trust to an estate IP trust gives rise to an exit charge: the property is deemed to remain held in the first trust but the trust property ceases to be relevant property.

25 For completeness: these schemes might also be advantageous if the settlor had made chargeable transfers in the 7 years before the creation of the old trust, as the second trust might have a better nil-rate band in the computation of its ten years charges.

26 Contrast SP E9 “Property is regarded, for the purposes of s.48(3) IHTA, as becoming comprised in a settlement when it, *or other property which it represents*, is introduced by the settlor.”

60.9.1 *Section 81 excluded property rule*

Where s.81 applies, s.82 IHTA imposes an additional requirement for trust property to qualify as excluded property.²⁷ This provides:

(1) For the purposes of this Chapter²⁸ ... property to which section ... 81 above applies shall not be taken to be excluded property by virtue of section 48(3)(a) above unless the condition in subsection (3) below is satisfied (in addition to the conditions in section 48(3) that the property is situated outside the UK and that the settlor was not domiciled there when the settlement was made).

(2) [Transitional rules: see 60.9.7 (Section 81 transitional rules).]

(3) The condition referred to in subsection (1) ... above is ...

(b) in the case of property to which subsection (1) or (2) of section 81 above applies, that the person who is the settlor in relation to the second of the settlements mentioned in the subsection concerned,

was not domiciled in the UK when that settlement was made.

I refer to the rule in s.82 (as it applies in a s.81 case) as “**the s.81 excluded property rule**”.

This rule only applies in determining whether foreign situate property is excluded property, so it does not apply for AUTs and OEICs.²⁹

This rule only applies for the purposes of relevant property taxation, so one must distinguish:

- (1) excluded property for the purposes of relevant property taxation (“**RP excluded property**”); and
- (2) excluded property for other IHT purposes (but the scope of this has been greatly reduced by the 2006 reforms.)

The consequences of this rule depend on the circumstances of the inter-trust transfer.

27 With an economy of drafting, s.82 is also used for the purposes of the s.80 fictions, but although there is some overlap, it is easiest to discuss that aspect separately. See 58.13 (Initial interest of settlor or spouse).

28 “This Chapter” is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

29 See 58.10 (Trusts: authorised unit trusts and OEICs).

60.9.2 *Transfer from trust made by A to another trust made by A*

Suppose:

- (1) A creates two separate trusts, trust A1 and trust A2.
- (2) The trustees of trust A1 transfer property (“the transferred property”) to trust A2.

The possibilities are as follows:

A is not UK domiciled when A made trust A1 but UK domiciled when A made trust A2. The transferred property in trust A2 is not excluded property under general IHT principles.³⁰

A is UK domiciled when A made trust A1 but not UK domiciled when A made trust A2. The transferred property may be excluded property under general IHT principles. However, s.82 prevents foreign situate transferred property in trust A2 from qualifying as RP excluded property. (This is probably an accidental consequence of the wording, because if the drafter had had the point in mind they would have made s.82 IHTA apply for all IHT purposes and not only for the purposes of relevant property taxation.)

In short, for foreign situate transferred property to qualify as RP excluded property, A must be domiciled outside the UK at the time A made trust A1 and trust A2.

60.9.3 *Transfer on to third trust or back to first trust*

Suppose:

- (1) A creates three separate trusts, A1, A2 and A3.
- (2) The trustees of trust A1 transfer property (“the transferred property”) to trust A2.
- (3) The trustees of trust A2 transfer the transferred property to trust A3. The transferred property is treated as remaining in trust A1. It is only excluded property if A was not UK domiciled when A made “the second of the settlements mentioned” in s.81(1), but that refers (it is considered) to trust 3. The domicile of A at the time A made trust A2 is not relevant.

Thus if trustees of an excluded property trust transfer property to a non-

30 See 60.9.5 (B transfers equitable interest to another settlement).

excluded property trust made by the same settlor, they have fallen into a trap: foreign situate transferred property ceases to be excluded property.³¹ But they can extricate themselves from the trap if the trustees of trust A2 transfer the property back to trust A1; or if they transfer it on to trust A3 (if A3 is a trust made when the settlor is not UK domiciled).

60.9.4 *Transfer from trust made by A to trust made by B*

Suppose:

- (1) A gives property (“A’s fund”) to a settlement (“real trust A”).
- (2) B gives property (“B’s fund”) to a separate settlement (“trust B”).
- (3) The trustees of real trust A transfer A’s fund to trust B.

For general IHT purposes, A’s fund is regarded as in a notional trust and may be excluded property if A was not UK domiciled when real trust A was made. At first sight the position for the purposes of RP trust tax seems to be different:

- (1) A’s fund is treated as remaining comprised in real trust A (applying the same settlement fiction); and
- (2) foreign situate property in A’s fund can only be excluded property if:
 - (a) A is foreign domiciled at the time real trust A was made; and
 - (b) B is foreign domiciled at the time trust B was made (applying the s.81 excluded property rule).

There is a better view. On these facts the separate settlements fiction of s.44(2) applies. A’s fund is treated for IHT as if it were transferred to a separate notional trust. The same settlement fiction applies as if there is a transfer from real trust A to the separate notional trust deemed to be made by A at the time (I think) of real trust A. So, for RP trust tax purposes, A’s fund may be excluded property if A is not UK domiciled at the time A made trust A. That is, the s.82 rule does not add anything to the general excluded property rule. The domicile of B is irrelevant. That gives a fair result and is consistent with what I take to be the purpose of s.82; see below.

A similar result applies if the trustees of trust A transfer A’s fund to a company held by trust B.

31 If this was unforeseen, the transfer might well be invalid under the rule in *Hastings-Bass*.

60.9.5 *B transfers equitable interest to another settlement*

The position is different if:

- (1) A gives property (“A’s fund”) to a settlement (“trust A”).
- (2) B has an equitable interest under trust A (perhaps a reversionary or contingent right to trust capital).
- (3) B assigns B’s equitable interest to a separate settlement (“trust B”).
- (4) Trust B becomes entitled to A’s fund (perhaps because the reversionary interest falls into possession or the contingency is satisfied).

B is in principle the settlor of trust B for general tax purposes. The position for the purposes of RP trust taxation is that:

- (1) A’s fund is treated as remaining in trust A (applying the same settlement fiction); and
- (2) A’s fund can only be RP excluded property if:
 - (a) A is foreign domiciled at the time that trust A was made, and
 - (b) B is foreign domiciled at the time trust B was made (applying the s.82 rule).

It would be possible to avoid these consequences if the trustees of trust B sell the equitable interest before it falls into possession, or if they transfer it to a company.

60.9.6 *Purpose of section s.81 excluded property rule*

What is the purpose of the s.81 excluded property rule? It often happens that an artificial deeming rule which closes up one avoidance scheme can be exploited for another. The same settlement fiction is an example. Dymond explains what might be done in the absence of the s.81 excluded property rule. Suppose:

- (1) A, who is domiciled outside the UK, settles foreign property on discretionary trusts for a short period with remainder to A absolutely.
- (2) B, who is UK domiciled, buys A’s reversion and settles it on discretionary trusts.³²

Under general IHT law, B would in principle be the settlor of trust B, which would be within the scope of IHT in the usual way. However

³² *Dymond’s Capital Taxes*, 19.810. These are the facts considered in 60.9.5 (B transfers equitable interest to another settlement).

applying the same settlement fiction, A would be the settlor and (because of A's domicile) B's trust would be an excluded property trust!

Section 82 counteracts this scheme. If my analysis is right,³³ then s.82 works, though it does not produce the fair result in every case. Suppose the facts were reversed:

- (1) A, who is domiciled in the UK, settles foreign property on discretionary trusts for a short period with remainder to A absolutely.
- (2) B, who is foreign domiciled, buys A's reversion and settles it on discretionary trusts.

There is no obvious fairness here in the rule that B's trust should be within the scope of IHT but the example is somewhat contrived and perhaps it does not much matter.

An incidental result is to restrict or prevent tax advantages on a transfer from trust A1 to A2 where A was UK domiciled when A made trust A1 but foreign domiciled at the time A made trust A2.³⁴

60.9.7 *Section 81 transitional rules*

Section 81(2)(3) IHTA sets out three transitional rules:

(2) Subsection (1) above shall not apply where the property ceased to be comprised in the first settlement before 10 December 1981; but where property ceased to be comprised in one settlement before 10 December 1981 and after 26 March 1974 and, by the same disposition, became comprised in another settlement, it shall for the purposes of this Chapter be treated as remaining comprised in the first settlement.

(3) Subsection (1) above shall not apply where a reversionary interest in the property expectant on the termination of a qualifying interest in possession subsisting under the first settlement was settled on the trusts of the other settlement before 10 December 1981.

60.10 Pension benefits

For completeness: there is a special rule for pension benefits. Section 151(5) IHTA provides:

³³ See 60.9.4 (Transfer from trust made by A to trust made by B).

³⁴ See 60.9.2 (Transfer from trust made by A to another trust made by A).

Where

- [a] a benefit has become payable under
 - [i] a registered pension scheme
 - [ii] a qualifying non-UK pension scheme or
 - [iii] a section 615(3) scheme, and
 - [b] the benefit becomes comprised in a settlement made by a person other than the person entitled to the benefit,
- the settlement shall for the purposes of this Act be treated as made by the person so entitled.

This is not discussed here.

CHAPTER SIXTY ONE

IHT DEDUCTION FOR DEBTS

61.1 IHT deduction for debts – Introduction

This chapter is concerned with IHT deductions for debts.¹ One could write a short book on this important and misunderstood topic. This chapter sets out basic principles and their application to foreign domiciliaries. There is some interesting material in the IHT Manual which is not discussed here.

61.2 Liability of individual

Section 5(3) IHTA provides the authority for deducting an individual's liabilities (or so one might think):

In determining the value of a person's estate at any time his liabilities at that time shall be taken into account, except as otherwise provided by this Act.

In *Green v IRC* the judge regarded s.5(3) IHTA as merely confirming a

¹ It may also be necessary to consider other issues:

- (1) Whether the benefit of debt is a UK situate asset, relevant for CGT and IHT position of the owner of the debt; see 77.1 (Concepts of situs).
- (2) Whether interest on the debt has a UK source, relevant for:
 - (a) the recipient of the interest who may suffer UK income tax; and
 - (b) the payor, who may be required to deduct tax.See 19.1 (Interest).
- (3) Effect of the debt on the POA charges, see 72.17 (Excluded liability rule). Consistent with the patchwork nature of UK tax law, different (though overlapping) considerations apply in these contexts.

deduction, not authorising it,² but that does not ultimately matter.³

The general rule has seven exceptions. The first is in s.5(5) IHTA which provides:

Except in the case of a liability imposed by law, a liability incurred by a transferor shall be taken into account only to the extent that it was incurred for a consideration in money or money's worth.

This does not often apply, because liabilities are normally incurred for full consideration.⁴ In particular, if an individual borrows money, the liability to repay the lender is in principle outside the scope of s.5(5), because it is a debt incurred for full consideration. By contrast, if an individual gratuitously covenants to pay money to a person, their liability to pay under that covenant is not taken into account for IHT.

Section 162(1) IHTA provides a second, self-explanatory exception:

A liability in respect of which there is a right to reimbursement shall be taken into account only to the extent (if any) that reimbursement cannot reasonably be expected to be obtained.

The third exception, mentioned only for completeness, relates to “any liability arising under or in connection with a policy of life insurance”; see s.103(7) FA 1986. The fourth exception applies if the debt is trust

-
- 2 [2005] STC 288 “... the property of the deceased ... is his personal estate net of his liabilities. In other words, it is at that stage that the liabilities are dealt with. It is not necessary for section 5(3) to provide for a second time that the debts are to be deducted in arriving at the value of the deceased's property (or estate) and in my view it is not really doing that. It is in part confirmatory, but in the main it is intended to provide a qualification or qualifications to the principle that debts are deductible— the meat of the subsection is in the closing words ‘except as otherwise provided by this Act’. One finds provisions in the Act which qualify that right in sections 5(4), 5(5) and 162. Its confirmatory nature is supported by the use of the phrase ‘taken into account’, which is more general than ‘shall be deducted’. I accept that the nature of section 5(3) would be clearer without the comma, but nevertheless it seems to me to be clear enough.”
 - 3 The judge construed the section this way in order to reach his (sensible) conclusion that an individual's debt is not allowable against trust funds. However, there were other ways to reach that result.
 - 4 For a discussion of the meaning of “consideration” in tax legislation, see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations* (8th ed., 2011), para 22.4 (Meaning of ‘consideration’) (online version www.taxationofcharities.co.uk).

property to which the debtor is treated as entitled as life tenant.⁵ The fifth exception applies if the debt is property to which the debtor is treated as entitled under the GWR rules.⁶ The sixth (arguable) exception relates to liabilities on non-residents overdrawn foreign currency bank accounts.⁷

A liability is in principle deductible even though it is owed to a connected person. But in this case s.103 FA 1986 will sometimes apply.

61.3 Section 103 FA 1986

The last and most important restriction on deducting debts for IHT is the anti-avoidance provision in s.103 FA 1986. This applies (in short) where an individual owes a debt to a person to whom they have previously made a gift.

The section was described in *McDougal v IRC* 31 ATC 153 as “intricate and involved in expression”. The reader who studies this chapter will agree! But if one works patiently through it a few times the meaning becomes clearer; contrast the less convoluted but hopelessly vague wording of s.102.

Section 103 must be split up into separate parts in order to distil the sense:

Treatment of certain debts and incumbrances

(1) Subject to subsection (2) below, if, in determining the value of a person’s estate immediately before his death, account would be taken, apart from this subsection, of a liability consisting of

- [i] a debt incurred by him or
 - [ii] an incumbrance created by a disposition made by him,
- that liability shall be subject to abatement to an extent ...

Thus, subject to certain defences, s.103(1) disallows the deduction for the liability to a certain extent. The section then goes on to specify the extent of the disallowance:

... to an extent proportionate to the value of any of the consideration given for the debt or incumbrance which consisted of—

⁵ See 61.10 (Debt owed by estate IP trust to life tenant).

⁶ See 61.7.3 (Debt owed by settlor to settlor-interested discretionary trust).

⁷ See 58.18.3 (Overdrawn account).

- (a) property derived from the deceased; or
- (b) consideration (not being property derived from the deceased) given by any person who was at any time entitled to, or amongst whose resources there was at any time included, any property derived from the deceased.

Thus s.103(1) works like this:

- (1) One needs to identify the consideration given for the liability.
- (2) One asks to what extent the consideration consists of the type of consideration described in s.103(1)(a) and (b).
- (3) To that extent the liability is in principle disallowed. (There are defences. I will come to those later.)

61.3.1 *Section 103(1)(a) disallowance*

One needs first of all to ascertain whether the consideration for the liability was “property derived from the deceased”. If so, the liability is disallowed under s.103(1)(a). The liability is wholly disallowed if all the consideration is “property derived from the deceased” or partly disallowed if the consideration is partly “property derived from the deceased”.

The expression “property derived from the deceased” is given a commonsense definition in s.103(3):

In subsections (1) and (2) above “property derived from the deceased” means, subject to subsection (4) below,

- [a] any property which was the subject matter of a disposition made by the deceased, either by himself alone or in concert or by arrangement with any other person or
- [b] which represented any of the subject matter of such a disposition, whether directly or indirectly, and whether by virtue of one or more intermediate dispositions.

The IHT Manual gives this simple example:

28365 How Section 103 FA 1986 applies when the consideration is ‘property derived from the deceased’? [September 2011]

Example

On 19 March 1987 A gives his brother B £25,000.

On 25 April 1987 A borrows back from B £25,000.⁸

On 7 April 1994 A dies.

Without the legislation A's estate contains the original £25,000. But if the money were still owing when A died the debt might be claimed as a deduction against his estate. And the PET in 1987 is exempt as more than seven years have elapsed.

The legislation disallows the deduction for IHT purposes ...

The IHT Manual explains "property derived from the deceased":

28367 Definition of 'property derived from the deceased' for Section 103 FA 1986 purposes [September 2011]

... In practice, income from property given absolutely by the deceased is treated as falling outside the above definition [contained in s.103(3)]. But where the deceased settled the property, the definition includes income payable under the disposition.

You should treat money raised by the sale or mortgage of property derived from the deceased as though it was property derived from the deceased.

61.3.2 Section 103(1)(b) disallowance

Assuming one passes unscathed past the s.103(1)(a) disallowance, the journey takes us to s.103(1)(b). One must identify the person who gave the consideration for the liability. One then asks whether this is a person:

who was at any time entitled to, or amongst whose resources there was at any time included, any property derived from the deceased.

If so, the liability is disallowed under s.103(1)(b). In principle the liability is wholly disallowed.⁹ The IHT Manual gives this simple example:

28366 How Section 103 FA 1986 applies when there is 'consideration given by any person whose resources at any time included property derived from the deceased'? [September 2011]

8 [Author's Note] It is assumed that this £25,000 is, or represents, the £25,000 given to B.

9 Unless the consideration for the debt is given by more than one person (very unusual); but see below on defences to the s.103(1)(b) disallowance.

... Example

On 19 March 1987 A gives his brother B a parcel of land worth £25,000.

On 25 April 1987 A borrows £25,000 from B.

On 7 April 1994 A dies, at which time B retains the land which is non-income producing.¹⁰

The PET was made more than seven years before the death so that no claim arises on the death. As the consideration for the debt is not derived from the deceased s.103(1)(a) FA 1986 would not apply.¹¹ But this arrangement is caught by s.103(1)(b) FA 1986 and the liability is not an allowable deduction for Inheritance Tax purposes.

61.3.3 *Section 103(2) defences to section 103(1)(b)*

Section 103(2) offers defences to the s.103(1)(b) disallowance.¹² This provides:

If, in a case where the whole or a part of the consideration given for a debt or incumbrance consisted of such consideration as is mentioned in subsection (1)(b) above, it is shown that

[a] the value of the consideration given, or of that part thereof, as the case may be, exceeded

[b] that which could have been rendered available by application of all the property derived from the deceased,

[c] other than such (if any) of that property—

(a) as is included in the consideration given, or

(b) as to which it is shown that the disposition of which it, or the property which it represented, was the subject matter was not made with reference to, or with a view to enabling or facilitating, the giving of the consideration or the recoupment in any manner of the cost thereof,

no abatement shall be made under subsection (1) above in respect of the excess.

It is helpful to consider this as three distinct defences.

¹⁰ But whether the land is income producing is not directly relevant.

¹¹ [Author's Note] It is assumed that the £25,000 which B lends to A does not represent the land.

¹² Section 103(2) does not override the s.103(1)(a) disallowance.

61.3.4 *Section 103(2)[b] defence*

“The s.103(2)[b] defence” is my term for the defence given by the words of s.103(2) down to the end of s.103(2)[b], ie ignoring s.103(2)[c].

The IHT Manual gives a simple example:

28369 - Allowing part of a debt under s.103(2) FA 1986 [September 2011]

Even if an arrangement (IHTM28366) is caught by FA86/S103 (1) (b), a deduction may still be allowed for part of the debt. If the value of the consideration given by the [lender]¹³ exceeded the amount that would have been available if the lender had applied all the property derived from the deceased, then the debt is reduced only to the extent of that lower amount.

Example

A gives his son B shares worth £20,000.

B lends A £25,000, out of his separate resources, at a time when the shares were worth £17,000.

A dies and a deduction of £25,000 is claimed.

The amount of the deduction is the realisable value at the time the debt was created. So the liability is reduced by £17,000 - leaving £8,000 as a valid deduction.

The s.103(2)[b] defence allows a deduction (overriding the s.103(1)(b) disallowance) to the extent that the debt exceeds the value of the property derived from the deceased. That is obviously fair.

61.3.5 *Section 103(2)[c](a) defence*

The next defence is the extension of s.103(2)[b] by s.103(2)[c](a). This prevents double counting with the s.103(1)(a) disallowance. The IHT Manual gives an example at 28369 [March 2009]:

28369 Allowing part of a debt under Section 103(2) FA 1986 [June 2011]

... Example

A gives shares worth £15,000 to B

¹³ The IHT Manual erroneously reads: “deceased”.

18 months later B sells half the shares back to A for £7,500 – which is not paid but left as a debt repayable on demand.

B lends A £12,000 entirely from his own resources.

A dies owing B £19,500 [ie both debts remain outstanding].

The £7,500 debt is disallowed under s.103(1)(a). The reason is that the consideration for the £7,500 debt (the shares) is property derived from the deceased. The Manual correctly makes this point, though it uses a sloppy paraphrase of the statutory language:

The debt of £7,500 is clearly referable to the earlier gift of shares – and falls within s.103(1)(a) FA 1986. This liability is not deductible.

The Manual then turns to the £12,000 debt:

Were it not for the provisions of s.103(2)(a) FA 1986 it would be possible to take into account that £7,500 in considering the debt of £12,000. The result would be that the entire debt of £12,000 would be non-deductible, meaning that the whole of the claimed £19,500 would be disallowed. But because under s.103(1)(b) FA 1986 half the value of the shares is included in the consideration given for the debt there remains an excess of £4,500. This figure of £4,500 for the allowable debt is arrived at by calculating the resources available to B against the second loan of £12,000 as £7,500, being the original gift of shares less the £7,500 disallowed. So the balance of £4,500 is deductible without restriction because under s.103(2)(a) FA 1986¹⁴ this amount is the excess consideration.

61.3.6 *Section 103(2)[c](b) defence*

The s.103(2)[c](b) defence is the extension of s.103(2)[b] by sub-para [c](b). The Manual does not give an example of a defence within s.103(2)[c](b); though this is perhaps the most important of the three. The result in the s.103(1)(b) examples in the IHT Manual would be different if the gift from A to B was not made (in short) with a view to enabling B to lend to A.

¹⁴ The Manual wrongly refers to s.103(2)(a) IHTA 1984.

61.3.7 Section 103(4) defence

Section 103(4) provides an important defence to the s.103(1)(a) and (b) disallowances:

If

[a] the disposition first-mentioned in subsection (3) above¹⁵ was not a transfer of value and

[b] it is shown that the disposition was not part of associated operations which included—

(a) a disposition by the deceased, either alone or in concert or by arrangement with any other person, otherwise than for full consideration in money or money's worth paid to the deceased for his own use or benefit; or

(b) a disposition by any other person operating to reduce the value of the property of the deceased,

that first-mentioned disposition shall be left out of account for the purposes of subsections (1) to (3) above.

Suppose:

(1) S (not UK domiciled) transfers excluded property (ie non-UK situate property) to a trust.

(2) S borrows from the trustees and retains or spends the sum borrowed. At first sight, the debt is disallowed as the consideration is property derived from the deceased, S. However, the s.103(4) defence applies. The disposition to the trust is disregarded, because it is the disposition first-mentioned in s.103(3)[a] and:

[a] the disposition is not a transfer of value;

[b] the disposition is a simple gift. It is not part of associated operations within s.103(4)[b](a) or (b).

Thus a debt to an excluded property trust is not usually disallowed under s.103. The same applies if the gift is to a trust where the settlor has a estate IP (eg a gift to an IP trust before 22 March 2006) because such a gift is not a transfer of value.

Suppose:

(1) The trustees lend to the settlor, S.

¹⁵ That is, the disposition made by the deceased. See 61.3.1 (Section 103(1)(a) disallowance).

(2) S gives the borrowed money to a trust.

In this case the deduction for the debt is disallowed. The s.103(4) defence does not apply. Condition [a] is satisfied but condition [b] is not, because the gift to the trust is an associated operation.

61.3.8 *Section 103(5) deemed PET*

Section 103(5) FA 1986 provides:

If, before a person's death but on or after 18 March 1986, money or money's worth, is paid or applied by him—

(a) in or towards the satisfaction or discharge of a debt or incumbrance in the case of which subsection (1) above would have effect on his death if the debt or incumbrance had not been satisfied or discharged, or

(b) in reduction of a debt or incumbrance in the case of which that subsection has effect on his death,

the [IHTA] shall have effect as if, at the time of the payment or application, the person concerned had made a transfer of value equal to the money or money's worth and that transfer were a potentially exempt transfer.

There is no express exemption for a foreign domiciliary. However, the principle of territorial limitation requires that some exemption is implied. The best solution is that the deemed PET should be regarded as not only "equal to the money or money's worth" but made out of the money or money's worth. Thus, if the individual is not UK domiciled at the time they repay the debt, *and* the debt is repaid out of excluded property, then no tax charge arises. This would be broadly consistent with the similar provision in section 102(4) FA 1986.¹⁶

61.3.9 *Assignment of debts*

Suppose:

(1) A borrows from a bank.

(2) B purchases the debt from the commercial lender for its market value.

It is suggested that the purchase price paid by B to the bank is

¹⁶ See 59.15 (GWR PET charge).

“consideration given for the debt”. So A’s liability is disallowed if the purchase price which B pays to the bank is property derived from A. Otherwise the section is easy to avoid.

Conversely if A’s debt is disallowable because it is made in consideration of property derived from A, it continues to be disallowed even if the debt is sold to a third party. In other words, “consideration for the debt” means the consideration for the creation of the debt but also includes consideration for the assignment of the debt.

61.3.10 Pre-1986 transitional rules

Section 103(6) FA 1986 provides:

Any reference in this section to a debt incurred is a reference to a debt incurred on or after 18 March 1986 and any reference to an incumbrance created by a disposition is a reference to an incumbrance created by a disposition made on or after that date ...

This cannot often apply now.

61.4 The amount of deduction for a debt

Section 162(2) IHTA provides:

Subject to subsection (3) below, where a liability falls to be discharged after the time at which it is to be taken into account it shall be valued as at the time at which it is to be taken into account.

This only states expressly what one would have expected in any event.

61.5 Deduction for debt of foreign domiciled individual

A UK domiciled individual will not usually mind whether a deduction for their liabilities is set against UK or foreign property as it is usually all subject to IHT.

Suppose a foreign domiciled person with a liability that is deductible for IHT has:

- (1) UK situate (non-excluded) property; and
- (2) excluded property.

From which property is the deduction for the debt made? If it is made from the excluded property the deduction is wasted.

61.5.1 *Debt is incumbrance*

Section 162(4) IHTA provides:

A liability which is an incumbrance on any property shall, so far as possible, be taken to reduce the value of that property.

If a liability is an incumbrance on both UK and non-UK assets there must be an apportionment. If the incumbrance on the UK assets has priority, then the deduction should be against that property first.

If it is desired to secure a liability on non-UK property (but to keep the IHT deduction against UK property), a back-to-back guarantee may be a solution. That is:

- (1) T borrows from a third party (“the primary liability”).
- (2) T’s primary liability is guaranteed by a bank.
- (3) Under the terms of the guarantee, T is required to reimburse the bank if the guarantee is called upon (“the second liability”). This second liability is secured on foreign assets.

Section 162(4) will not apply to the primary liability, which can in principle be deducted from UK property. But watch *Furniss v Dawson*.

Conversely, if on those facts the second liability is secured on UK property, the primary liability is not secured on that property and the deduction is not set against that property.

Note the need to comply with the Bills of Sale Acts if securing loans on chattels.

61.5.2 *Debt not an incumbrance*

Section 162(5) IHTA provides:

Where a liability taken into account is a liability to a person resident outside the UK which neither—

- (a) falls to be discharged in the UK, nor
 - (b) is an incumbrance on property in the UK,
- it shall, so far as possible, be taken to reduce the value of property outside the UK.

This identifies three connecting factors. Where a debt is not an incumbrance on any property, there are two connecting factors and four possibilities:

Case No.	1	2	3	4
Liability to UK resident	No	No	Yes	Yes
Discharge out of the UK	No	Yes	No	Yes

Section 162(5) tells us the answer to Case 1: the debt is set against non-UK property. There is nothing about Cases 2 to 4. However, the implication is that in Cases 2 to 4 the debt reduces the value of the property in the UK.

What is the priority between s.162(4) and (5)? It is considered that (4) is applied first. A liability which is an incumbrance on any property is so far as possible to be taken to reduce the value of that property. Only if it is not an incumbrance on any property, or if the amount of the liability exceeds the value of the property, does one apply the rules in s.162(5). The IHT Manual shows that HMRC accept this:

28395 Deducting liabilities where there is excluded property
[February 2006]

You will see cases where there is excluded property in the estate and deductions may be properly payable out of both excluded and other property. In this situation, provided the debts are to UK creditors, you may allow a deduction in full against the non-excluded property. But, in view of s.162(4) IHTA 1984 this does not apply to debts that are charged on excluded property.

61.5.3 *Where does debt fall to be discharged?*

In outline, the place where a liability falls to be discharged is that specified in the contract, or (if not specified) the residence of the creditor.¹⁷ The IHT Manual shows that HMRC broadly accept this:

28396 Deducting UK debts when there is both UK and foreign property in the estate [September 2011]

¹⁷ See *Chitty on Contracts*, (30th ed, 2010) para 21-054 (Place of payment). Further consideration is needed for a contract not governed by English law.

If the deceased's estate includes both UK and foreign assets you should first deduct any UK debts against the UK assets and the deficiency, if any, against the foreign assets. Debts are UK debts if one of the following applies

- *they are owed to creditors resident solely in the UK*
- *they are charged on property in the UK, or*
- *they are contracted to be paid in the UK. ...*

(Emphasis added)

A debt which is set against UK property (but which is not charged on specific property) will be set against UK property rateably. Some of the deduction will be wasted if the individual owns UK property outside the scope of IHT: property qualifying for APR or BPR, UK AUTs or OEICs, or FOTRA securities.

61.5.4 *Conclusion*

It should be possible to arrange that a debt of a foreign domiciliary is in principle fully deductible against non-excluded property. This can be done without making the debt UK situate but it may give interest on the debt a UK source for income tax.

61.6 Individual¹⁸ borrows and acquires excluded property

Suppose F is not UK domiciled and owns UK situate property worth £1m. F faces an IHT charge on that amount on F's death.

F borrows £1m charged on the UK property and deposits that sum outside the UK ("the offshore deposit").

The value of their UK situate property is reduced by £1m and the value of their excluded property is increased by £1m. No IHT liability arises on the death of F.¹⁹

This may be useful "deathbed" planning since it avoids liability to IHT even if F dies immediately after it has been carried out. It also avoids the need for a CGT disposal (and the opportunity for a CGT-free uplift on death is preserved).

Of course, the debt must not be charged on the offshore deposit. There

18 See also 61.11 (Trustees borrow and acquire excluded property).

19 Except so far as property prices rise.

could in principle be a back-to-back loan to minimise interest charges.

Technically the proposal cannot be faulted. Will the *Ramsay* principle apply? The risk varies depending on exactly how the arrangement is set up.

61.7 Debt owed by individual to trust

61.7.1 *Debt owed by non-settlor life tenant to estate IP trust*

Suppose the life tenant (not the settlor) owes a debt to trustees of an estate IP trust (as happens when a pre-2006 IP trust lends money to the life tenant). At first sight, the position seems to be:

- (1) The life tenant can claim a deduction for the burden of the debt on their death.
- (2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. If the benefit of the debt is excluded property (ie foreign domiciled settlor at the time the settlement was made and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

- (1) a deduction for the burden of the debt in the estate of the life tenant; and
- (2) no IHT on the benefit of the debt, being excluded property.

Robert Venables QC disagrees. He cites Lord Asquith's familiar comment on the construction of deeming provisions²⁰ and continues:

If one applies Lord Asquith's dictum, what is deemed to happen when the settlor²¹ in fact borrows money from the trustees? As he is deemed to own the money before it is borrowed [s.49 IHTA], he cannot borrow it from himself. The transfer of the money to himself is a non-event for inheritance tax purposes. His estate is subject to no debt, as a man cannot owe a debt to himself. The question of any such debt being treated as non-deductible in computing the value of his estate for

20 See App 2.1 (Construction of deeming provisions).

21 Venables is considering the position of a settlor life tenant, but the same applies to a non-settlor life tenant.

inheritance tax purposes therefore does not arise. Conversely, however, the settled property does not include the right to sue the settlor for the money borrowed, as a man cannot have a right against himself.²²

I agree. The effect of s.49(1) IHTA is therefore to disallow the deduction for the debt.

A practical solution may be to arrange that the debt is not due to the trustees, but to a company owned by the trustees. Alternatively, perhaps, arrange that the debtor beneficiary ceases to be life tenant.

61.7.2 *Debt owed by life tenant settlor to estate IP trust*

Suppose the life tenant settlor owes a debt to trustees of an estate IP trust (as happens when a pre-2006 IP trust lends money to the life tenant settlor). At first sight, the general position seems to be:

- (1) The settlor can claim a deduction for the burden of the debt on their death.
- (2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral. There are however two special cases.

If the benefit of the debt is excluded property, at first glance the result is a mismatch which could benefit the settlor (deduction for the burden of the debt, no charge on the benefit of the debt).²³

If the deduction for the debt is disallowed (eg under s.103²⁴) the result is a mismatch which would favour HMRC (no deduction for the burden of the debt, but a charge on the benefit of the debt, unless it is excluded property).

However on the view set out in para 61.7.1 (Debt owed by non-settlor life tenant to trust), the burden of the debt and the asset of the trust cancel each other out and both are ignored for IHT purposes. This is a sensible

22 Venables, "An IHT Trap for Settlers of Non-UK Resident Trusts", OTPR, vol 4, issue 3, p.165.

23 This might happen if the settlor was not UK domiciled, but needed the deduction for the debt as their property was UK situate.

24 But this would not often apply to excluded property trusts or to trusts where the settlor has an initial estate IP: see 61.3.7 (Section 103(4) defence).

result, which fits the purpose of the legislation. In practice HMRC appear to accept this.

61.7.3 *Debt owed by settlor to settlor-interested discretionary trust*

Suppose the settlor (“S”) owes a debt to trustees of a discretionary trust (as happens when a discretionary trust lends money to the settlor).

At first sight, the position seems to be:

- (1) The settlor can claim a deduction for the burden of the debt on their death.
- (2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the settlor under the GWR rules.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (ie foreign domiciled settlor at the time the settlement was made and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

- (1) a deduction for the burden of the debt in the estate of the settlor;²⁵ and
- (2) no IHT on the benefit of the debt, being excluded property.

It is considered that the debt is disallowed under s.102(3) FA 1986. Under this section the benefit of the debt is treated as property to which the settlor was beneficially entitled on their death. The analysis is therefore the same as where the settlor is a life tenant, see above. This is so whether the GWR debt is UK situate or foreign situate.²⁶

61.8 Debts to and from trusts

Do not confuse two situations:

- (1) The situation where an individual owes money to trustees (eg the trustees have lent money to the individual). Here:
 - (a) the individual may be entitled to an IHT deduction for the burden of the debt in their estate;
 - (b) the trustees have an asset, the benefit of the debt (which may or may not be excluded property).

25 Since s.103 does not usually apply: see (Section 103(4) defence).

26 As to whether the GWR debt is subject to IHT under the GWR rules, see 59.11 (GWR over debt owed by the deceased).

- (2) The reverse situation, where trustees owe money to another person (eg an individual has lent to the trustees). Here:
- (a) the individual owns an asset in their estate, the benefit of the debt, which may or may not be excluded property;
 - (b) the trustees or beneficiaries may be entitled to an IHT deduction for the burden of the debt on the trust property.

The issue of deduction for debts of trustees raises entirely different questions to which we now turn.

61.9 Deduction for debts of trustees

It is clear that trust liabilities are in principle deductible for IHT purposes, although there is no provision which states this expressly, which has caused some confusion.

Let us consider first the position where the trustees have borrowed funds and an estate interest in possession terminates during the lifetime of the life tenant. There is of course a transfer of value and the value transferred is:

equal to the value of the property *in which his interest subsisted*.
(Section 52(1) IHTA, emphasis added)

What is “the property in which their interest subsists”? In my view it is not the settled property; it is the property subject to the trustees’ lien.²⁷ For the trustees’ lien takes priority over the interest of the life tenant. The trustees’ lien is a lien over both income and capital of the trust fund. The value of property is its market value. Market value of property subject to a lien will be the net value, the value after deducting the value of the lien. In this valuation exercise we are not strictly claiming a “deduction” for the lien. We are simply ascertaining what property will fetch in the market.

For the same reason, trustees debts are deductible when an estate IP terminates on the death of the life tenant and in computing ten-year and

27 Where a trustee has incurred a liability as trustee, they may in principle reimburse himself out of the trust fund. For this purpose the trustee has a lien over the trust fund. One exception is where the trustee has committed a breach of trust. In the discussion here, it is assumed that is not the case.

exit charges.²⁸

This is the correct reason why trustee liabilities are allowable.²⁹

Section 103(1) FA 1986 provides:

... if, in determining the value of a person's estate immediately before his death, account would be taken, apart from this subsection, of a liability consisting of a debt *incurred by him* or an incumbrance created by a disposition *made by him*, that liability shall be subject to abatement.

This does not apply to debts of trustees as we are not concerned with a debt or disposition made by the individual.

61.9.1 *Against which trust property is deduction set?*

Where a trust has a UK domiciled settlor one may not usually mind whether a deduction for a trust debt is set against UK or foreign property as it is all subject to IHT. Where it does matter (eg where a trust with a foreign domiciled settlor has UK and excluded property) the principles are as follows:

- (1) If the liability is an incumbrance on specific trust property, the deduction is set against that property: s.162(4) IHTA.³⁰
- (2) If the liability is not an incumbrance on specific trust property, it is under general trust law principles an incumbrance on the trust fund as a whole and deducted from the trust assets *pro rata*. The place of payment and residence of creditor are not relevant, and s.162(5) IHTA

28 Section 65(5) IHTA assumes liabilities are deductible, though it is not necessary to rely on this.

29 In *Green v IRC* [2005] STC 288 at [12] the judge took a short cut to reach the same destination:

“... s.49 IHTA [deems] the deceased to be beneficially entitled to ‘the property’ in which his life interest subsists. It does not say ‘net property’ (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree that in practice that is the effect the Revenue gives to the section.” The point is discussed in detail in the 3rd ed of this book para 27.9 but it is not necessary to set this out now that *Green v IRC* has confirmed the principle that trustee debts are deductible for IHT.

On HMRC practice see for instance IHT Manual 10541 (deduction for trustees’ costs).

30 If under the terms of the trust a liability is payable out of certain property it is for this purpose a incumbrance on that property.

does not apply.

61.10 Debt owed by estate IP trust to life tenant

Suppose trustees of an estate IP trust owe a debt to the life tenant (as happens when a life tenant lends to a pre-2006 IP trust). At first sight, the position seems to be:

- (1) The trust can claim a deduction for the burden of the debt on the death.
 - (2) The benefit of the debt is part of the estate of the life tenant.
- These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (ie foreign domiciled life tenant and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

- (1) a deduction for the burden of the debt in the trust;³¹ and
- (2) no IHT on the benefit of the debt, being excluded property.

It is considered that s.49 IHTA does not disallow the debt.

61.11 Trustees³² borrow and acquire excluded property

61.11.1 Foreign domiciled settlor; trust owns non-excluded property

Suppose L is the life tenant under an estate IP trust made by a foreign domiciled settlor. The trust owns UK situate property. The trust property is not excluded property. The trustees face an IHT charge on the death of L.

The trustees may borrow, charge the borrowing on the UK property, and invest the borrowed funds outside the UK. In principle, the value of the UK situate property is reduced by the borrowing. The value of excluded property is increased. The IHT liability on the death of L is reduced accordingly.³³

Alternatively, the sum borrowed may be advanced to a (foreign

31 Of course in most cases the trust property is excluded property so there is no need for the deduction, but that is not necessarily the case: the trust may hold UK property.

32 See also 61.6 (Individual borrows and acquires excluded property).

33 Except so far as property prices increase.

domiciled) beneficiary. Schedule 4B TCGA needs consideration.³⁴

61.11.2 *UK domiciled settlor but foreign domiciled beneficiary*

Suppose L is the life tenant under an estate IP trust made by a UK domiciled settlor. The trust property is not excluded property. L is not UK domiciled.

The trustees could solve this problem by transferring the trust property to L absolutely, but this may be impractical, and may have a substantial CGT cost.

The trustees borrow and advance that sum to L, who invests it in excluded property. Alternatively, if L is not ordinarily resident, the trustees may borrow themselves and invest in FOTRA securities.

In principle, the value of the trust property is reduced by the borrowing. The borrowed funds are excluded property. The IHT liability on the death of L is reduced accordingly.

These examples may be useful “deathbed” planning since IHT is avoided even if L dies immediately after it has been carried out. Will the *Ramsay* principle apply? It depends how the arrangement is carried out. More care is needed than for equivalent planning by an individual.

61.12 Deduction for foreign taxes

Foreign inheritance taxes and similar taxes may be available as a credit to set against IHT: see 68.1 (Foreign IHT credit relief). Such taxes are not deductible for IHT purposes under s.5(3) as they arise on the death and IHT is charged immediately before the death.

Unpaid foreign taxes which accrue during a person’s lifetime are in principle deductible. They are liabilities imposed by law.

The IHT Manual provides:

28100 Overseas taxes [September 2011]

Special rules (IHTM27181) apply to overseas taxes that are similar in nature to Inheritance Tax (IHT). These may in some cases be set against the IHT liability.

For other types of overseas taxes the general rule is that they can normally only be deducted from the value of property in the country that

³⁴ See 49.1 (Borrowing by non-resident trustees).

imposes the tax. This is because the taxes are unenforceable in other countries, *Government of India v Taylor* [1955] AC 491.

The proposition that foreign taxes are unenforceable in other countries now needs to be qualified because under international treaties foreign taxes often are enforceable in other countries. So far as foreign taxes are unenforceable and unpaid it seems right in principle that there should be no deduction and a court would be expected to reach that conclusion even though there is no express provision to that effect. But it is difficult to see why the deduction should be against property in the country concerned: it should be against non UK property generally, under s.162(5) IHTA, unless the foreign tax legislation imposes an incumbrance (which does not seem likely).

61.12.1 *Irish tax liabilities*

The IHT Manual provides:

28101 Deduction for tax debts in the Republic of Ireland [September 2011]

If the deceased died owing tax in the Republic of Ireland, you should allow a deduction against the free estate for any tax that has actually been paid to the Irish authorities provided the deceased

- was domiciled in the United Kingdom, and
- had no assets in the Republic of Ireland.

Where, in these circumstances, the deceased also has assets in a third country, you should apportion the tax debts.

If a deduction is claimed for any 'Probate Tax' paid in the Republic of Ireland, you must refer the matter to Technical for advice. This tax, which is paid by the executors or administrators of an estate, is not covered by our Double Taxation Convention with the Republic of Ireland.

61.12.2 *Canadian income tax liabilities deducted for IHT*

The IHT Manual explains the Canadian tax background:

28102. Canadian income tax [September 2011]

Under Canadian law, the estate of an individual is deemed to have been disposed of immediately before his death. Income tax is charged on any

resulting gains. If, under the (Income Tax) Double Taxation Agreement the deceased was resident in Canada, the charge applies to all property wherever situate. But if the deceased was resident in the UK the charge applies only to Canadian immovable property and to certain business property.

(There was a similar charge to CGT in the UK between 1965 and 1971. The UK abolished the CGT charge on death; Canada abolished its Estate Duty instead, a wiser decision). ESC F18 provides:

1. Under IHTA 1984 s 5(3) a person's liabilities at the time of death are taken into account in arriving at the value of their estate for the purposes of IHT. The Board of Inland Revenue will by concession regard this provision as applying to income tax in Canada charged on a deemed disposal immediately before death, even though the liability may not in strictness have arisen until the person had died.
2. Where there is an IHT charge on a deceased person's world-wide estate, and income tax in Canada is charged on deemed gains which are attributable to assets forming part of that estate, the Canadian tax will rank as a deduction in arriving at the value of the estate for IHT purposes. The Canadian tax will normally be treated as reducing the value of assets outside the UK whether those assets are liable to IHT or not; but if the Canadian tax exceeds the value of those assets, the excess will be set off against the value of the UK assets.

61.12.3 *Foreign tax on UK situate shares*

The IHT Manual provides:

27201. Procedure for relief by concession on shares [February 2006]
Occasionally shares in a company, although situated in some part of the UK by UK law, are also treated as liable to tax in a foreign country on the grounds, for example, that the company carries on business there. In this circumstance, by concession the amount of foreign tax is allowed as a deduction against the value of the shares. This concession operates whether the company is incorporated in the UK or elsewhere.

The concession applies in the same way where the obligation to pay foreign tax on death falls upon the company and the company has the right to be reimbursed by the personal representatives of the deceased shareholder before it registers a transfer of the shares.

The concession does not apply to cases covered by the statutory reliefs provided for by Section 158 IHTA 1984 and Section 159 IHTA 1984.

Nor does it apply to shares that become liable to the foreign tax by reason of the operation of a Double Taxation Convention to which the UK is not a party.

I would have thought in this situation s.158 or 159 relief would normally apply, and in other cases relief would be available by law and not by concession. I would be interested if any reader can identify the foreign taxes to which this paragraph is applicable.

61.13 Funeral expenses

Section 172 IHTA provides:

In determining the value of a person's estate immediately before his death, allowance shall be made for reasonable funeral expenses.

The IHT Manual provides:

10376 Overseas funerals of non-domiciled deceased [April 2010]

You should allow overseas funeral expenses as a deduction against the UK estate, even if the deceased was not domiciled in the UK for IHT purposes.

Although s.162(5) IHTA 1984 might seem to justify the deduction of such expenses from the non-UK estate, that sub-section cannot apply as funeral expenses are not a liability for the purposes of s.5 IHTA 1984 or s.162 IHTA 1984.

CHAPTER SIXTY TWO

IHT PLANNING BEFORE AND AFTER A CHANGE OF DOMICILE

62.1 IHT planning in anticipation of acquiring UK domicile

The basic strategy for the foreign domiciliary is to transfer their assets to a trust. If the settlor has a foreign domicile when at the time the trust is made, settled property can be excluded property and will retain that status indefinitely, even if the settlor later become domiciled here. This has been common practice since 1975, and HMRC accept it.

62.1.1 *Time limit*

The opportunity, once missed, cannot be regained so it is desirable to ascertain the exact moment when a UK domicile is acquired. There are three possibilities:

- (1) The individual who has decided to make a permanent home in the UK will acquire a UK domicile as soon as they arrive here. Such an individual must carry out the tax planning before setting foot in this country.
- (2) The individual who arrives here to take up residence without such an intention will acquire a UK domicile if and when they later form the intention to live here permanently. They must carry out the tax planning before their mind is made up, ie while their long-term intentions remain unclear.
- (3) The individual who arrives and remains residing in the UK without deciding to live here permanently will acquire a deemed UK domicile after 15 to 17 years' residence here: see 57.2 (Deemed UK domicile). This is the long-stop deadline for the IHT planning, although limited planning opportunities remain available for the deemed domiciliary: see 57.6 (Tax planning for the deemed domiciliary).

62.1.2 *Form of trust*

A life interest trust will normally be suitable, ie :

- (1) income is to be paid to the settlor for life;
- (2) subject thereto the trust fund held on discretionary trusts for the benefit of the family of the settlor.

Trust income will belong to the life tenant but (if not UK domiciled) they may mandate the trustees to retain the income and add it to capital. This may be useful to avoid relevant income: see 29.16 (Is income of life tenant relevant income?).

A simple discretionary settlement is a possible alternative.

62.2 **IHT planning: trust with foreign domiciled settlor**

There are two general points. The first is to avoid UK situate property, at least at the time when it matters: see 58.21 (IHT planning for individual).

Trust property in a settlement created by a true foreign domiciliary can remain effectively free of IHT so long as the trust continues to exist. The trustees should be reluctant to appoint trust capital to a beneficiary who is or may become UK domiciled; that property may cease to be excluded property. On the contrary, if necessary, steps should be taken to extend its life by exercising powers of appointment or advancement.

If a UK domiciled beneficiary has substantial assets in their own estate then it may be worth adopting a policy of gradually spending their own assets while allowing their trust fund to accumulate or invest for capital growth. It may be attractive for the beneficiary to purchase an income tax efficient annuity.

62.3 **Trust with UK domiciled settlor who later acquires foreign domicile**

What is the best form of tax planning where a settlor has made a settlement while UK domiciled and later acquires a foreign domicile? If nothing is done the trust property cannot be excluded property.

A good solution is to transfer the trust property back to the settlor. That may be impractical if the settlor is not a beneficiary and commercial or foreign tax or UK CGT considerations make this course unattractive.

In such a case, a second-best but workable solution may be:

- (1) the settlor creates a new trust; and
- (2) the trustees of the old trust transfer the trust property to the new trust.

See 60.8 (Transfer from trust made by A to another trust made by A).

A third-best solution involves loans: see 61.11 (Trustees borrow and acquire excluded property).

CHAPTER SIXTY THREE

IHT ON DEATH: WILLS AND IOVs

63.1 IHT spouse exemption on death of a foreign domiciliary

Section 18 IHTA provides:

- (1) A transfer of value is an exempt transfer to the extent that the value transferred is
 - [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
 - [b] so far as the value transferred is not so attributable, to the extent that that estate is increased.¹

I refer to this as “**the IHT spouse exemption**”.²

Suppose:

- (1) H (not UK domiciled) dies leaving an estate which consists of:
 - (a) UK property (not excluded property), and
 - (b) foreign situate property (which is excluded property).
- (2) Part of H's estate passes³ to H's widow W.

This raises the interesting question of the interaction of the excluded property rules and the IHT spouse exemption. Sections 4 and 5 IHTA

1 I add for completeness that ss.18(3) and 56 contain anti-avoidance provisions rarely in point and not discussed here. There is a full discussion on the (almost) identical charity provisions in Kessler & Brown, *Taxation of Charities and Non-Profit Organisations*, (8 ed., 2011) (online version www.taxationofcharities.co.uk). For the restriction for foreign domiciled spouses, see 69.2 (Restricted IHT spouse exemption for foreign domiciled spouse).

2 References to spouse, marriage, and widow/ers here include a civil partner, civil partnership and a surviving civil partner. See App 1.2 (Meaning of spouse) and App 1.3 (Meaning of "civil partner").

3 By will, by survivorship or by the relevant succession law; this makes no difference.

provide:

4 Transfers on death

(1) On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death. ...

5 Meaning of estate

(1) For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...

- (b) the estate of a person immediately before his death does not include excluded property or a foreign-owned work of art which is situated in the United Kingdom for one or more of the purposes of public display, cleaning and restoration (and for no other purpose).

The following propositions are clear:

- (1) IHT is charged as if H made a transfer of value ("the deemed transfer of value").
- (2) The estate of H immediately before H's death did not include H's excluded property.
- (3) The value transferred by the deemed transfer of value is equal to the value of H's estate (which is the value of the UK situate property).

Suppose, first, that on the death of H only H's foreign situate (excluded) property passes to H's spouse. Does the spouse exemption apply?

Section 18(1) IHTA provides:

A transfer of value is an exempt transfer to the extent that the value transferred is

- [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
- [b] so far as the value transferred is not so attributable, to the extent that that estate is increased.⁴

The deemed transfer of value is not exempt under s.18(1)[a]. There is "property which becomes comprised in the estate of the spouse". However, the value transferred is not attributable to that property. That

⁴ In the case considered here the restriction in s.18(2) does not apply since H (the transferor) is not domiciled in the UK.

leaves the exemption in s.18(1)[b]. A transfer of value is an exempt transfer to the extent that the estate of the spouse is increased. The estate of the spouse is increased on the death of H.⁵ It is therefore considered that the spouse exemption does apply on a plain reading of the words.⁶ Is this result so absurd that the courts should not adopt a plain reading? I do not see why it should be regarded as absurd. If W is UK domiciled the application of the spouse exemption on the death of H is reasonable, because W's estate is increased and the property W receives will be subject to tax on the death of W. It might be said to be anomalous because a simple lifetime gift of excluded property by H to H's spouse would not be a transfer of value, so it would not qualify as an exempt transfer under the IHT spouse exemption. But of course in such a case the spouse exemption is not needed.⁷ If the contrary view were adopted, then the practical consequence should not be to raise more funds for HMRC, but only to pose a trap for taxpayers and their advisors.

Now suppose H leaves W a pecuniary legacy. The IHT Manual provides:

11013 Quantifying the exemption [July 2011]

... Example ...

•Where the will of a person domiciled (IHTM13000) abroad disposes of their UK estate and some or all of their world estate, exemption for pecuniary legacies (IHTM12082) should be given against the UK estate in the proportion it bears to the worldwide estate, and not against the UK estate alone. Any case where you have difficulty obtaining details of the world estate, or where our official practice meets resistance, should be referred to Technical.

This is correct in relation to charities. The IHT charity exemption is more narrowly worded. But for spouses, it is not consistent with the words of s.18(1)[b]. It is suggested that the spouse exemption applies to the full extent of the pecuniary legacy. It makes no difference whether the

-
- 5 This is the case even if the property is excluded property in the estate of W (which will be the case if W was not UK domiciled). Excluded property is "property" for IHT and (except immediately before death) a person's estate includes their excluded property.
 - 6 Exemption is given to the extent of the value of the property given to W.
 - 7 The end result is consistent with the exemption for funeral expenses, which are set against UK property alone; see 61.13 (Funeral expenses).

pecuniary legacy is subsequently paid out of UK or foreign situate property.

Chapter 3 Part 2 IHTA (Allocation of Exemptions) does not shed much light on the issue. Section 36 IHTA provides that these rules apply where (*inter alia*) s.18 IHTA applies:

in relation to a transfer of value but the transfer is not wholly exempt ...

In the circumstances we are envisaging, the transfer will be “wholly exempt” if the value given to the spouse equals the value of the UK situate property. What happens if the value given to the spouse is less than the value of the UK situate property so the transfer is not wholly exempt? Let us assume that what the spouse receives is a “specific gift” as defined in s.42(1). Section 38(1) IHTA provides that:

Such part of the value transferred shall be attributable to specific gifts as corresponds to the value of the gifts ...

This confirms the view taken above.

63.2 Will drafting: General approach

There has always been considerable scope for tax saving through an appropriately drafted will. On disclosure rules on death, see 82.12 (Reporting on death of foreign domiciled individual).

63.2.1 *UK domiciled testator: foreign domiciled beneficiaries*

Here the testator should in principle give their estate to beneficiaries absolutely so that the property may qualify as excluded property in their hands. A short-term discretionary will trust within s.144 IHTA is just as good from a tax viewpoint, and allows additional flexibility.

63.2.2 *Foreign domiciled testator: UK domiciled beneficiaries*

From an IHT viewpoint, the will should in principle provide that the estate is held on trust for the beneficiaries so that trust property situated outside the UK will remain excluded property.

63.2.3 *Gift to spouse by will: foreign domiciled testator and foreign domiciled spouse*

Where a foreign domiciled testator has non-excluded property and excluded property, and the spouse is foreign domiciled so the IHT spouse exemption is fully available, the safe course will be:

- (1) to give the non-excluded property to:
 - (a) the spouse; or
 - (b) a trust where the spouse has an interest in possession (better where the spouse is UK domiciled).
- (2) to give excluded property to other persons.

A pecuniary legacy to the spouse should be charged on non-excluded property. Watch the drafting.

This course should avoid a dispute with HMRC. However, it is not necessary.

63.2.4 *Gift to spouse by will: UK domiciled testator and foreign domiciled spouse*

Where a UK domiciled testator has a foreign domiciled spouse, the usual IHT spouse/civil partner exemption does not apply (ignoring the small £55k allowance). The choice for the will lies between a discretionary will trust or an absolute gift to the foreign domiciled spouse. Which is better? Either way, there is a charge to IHT on the death of the testator. But if the property is given to the spouse, it is outside the scope of IHT thereafter, so long as it is not UK situate. If the property is given to a will trust, it remains within the scope of IHT, it is not excluded property, as the will trust has a UK domiciled settlor. So at first sight, the absolute gift seems better. Having said that, if property goes into the discretionary will trust and out to the spouse again within two years, the IHT position is just the same as a direct gift: s.144 IHTA 1984. And it may be desired to pass the property to others, perhaps giving it to the next generation (particularly if not UK domiciled). Also when the testator makes the will, one would not usually know the domicile position at the time of the death. If the spouse/civil partner lives long enough, she may become deemed UK domiciled for IHT purposes. All things considered, the discretionary will trust seems the more flexible and safer course for the will, in a routine case. In most cases, the will trust is likely to be wound up within two years. But the only cost is the cost of the deed of appointment.

63.2.5 *Charitable gift by will*

Where a foreign domiciled testator has non-excluded property and excluded property, the correct strategy will be:

- (1) to give the non-excluded property to UK charities or EU charities which qualify for UK tax relief⁸;
- (2) to give excluded property to other persons.

A pecuniary legacy to the charity should be charged on non-excluded property.

63.3 Instruments of variation (“IOVs”)

The IHT Manual provides:

35094 Redirection of excluded property [February 2006]

Another scheme (see also IHTM35093) where the taxpayers seek to take advantage of the provisions of s.142 IHTA 1984 without there being a bona fide variation is where the estate contains excluded property (IHTM04251) such as government securities.

The deceased, domiciled (IHTM13000) outside the UK, may leave property in this country to chargeable beneficiaries and excluded property to the spouse or civil partner (IHTM11032). An IoV may then be used for the spouse’s or civil partner’s entitlement to be switched from excluded property to the ordinary UK estate without any change in the amount the spouse or civil partner receives.

You should refer cases of this type immediately above to TG (IHTM01081) without making any preliminary enquiries provided the basic facts are clear.

I do not understand in what sense it could be said that this is not a “bona fide variation”.⁹ Section 142(5) IHTA expressly envisages an IOV relating to excluded property.

A variation of this kind cannot sensibly be challenged if properly carried out. If the author’s view of the spouse exemption is right, however, an IOV would not be necessary. It may nevertheless be desirable as a useful

8 See Kessler & Brown, *Taxation of Charities and Non-Profit Organisation* (8th ed., 2011) (online version www.taxationofcharities.co.uk).

9 It would be different if there was an arrangement under which the spouse later swapped the UK property for the excluded property.

precaution where a will has not been drafted in the manner recommended above.

CHAPTER SIXTY FOUR

DOUBLE INHERITANCE TAXATION - INTRODUCTION

64.1 International estate and inheritance taxes

Many states (though by no means all) impose tax on the transfer of wealth occurring on death. These taxes may be divided into two types:

- (1) The taxable person may be the deceased or his/her estate.
 - (2) The taxable persons may be the beneficiaries of the estate (the heirs).
- In international tax terminology, type (1) is called an estate tax and type (2) is called an inheritance tax. Under this terminology IHT is strictly an estate tax and its title “inheritance tax” is a misnomer. However no confusion arises as long as one remembers that and I use the term “inheritance taxes” to include both types.

Jurisdiction to charge inheritance tax (as for income tax) is normally based one of two criteria:

- (1) personal nexus to the state: domicile, residence or nationality or the deceased or of the beneficiary;
- (2) situs of assets (a source rule).

These wide and differing criteria are the cause of double inheritance taxation:

(1) **Residence-source conflict** when

- (a) State A imposes tax on the deceased (estate tax) or the heir (inheritance tax) because of their personal nexus to the state (residence, domicile or nationality),
- (b) State B imposes tax because the assets are situated in that state.

A residence-source conflict will result in the double taxation of the assets situated in state B.

(2) **Residence-residence conflict** when more than one state imposes tax

on the same person because of their residence, domicile or nationality. A residence- residence conflict will typically result in double taxation on worldwide assets.

- (3) **Source-source conflict** where state A regards an asset as situate in state A and state B regards the asset as situate in state B, because they have different rules determining situs. Here the conflict results in double taxation on the dual situate assets.

For a general discussion of the problems, see Study on Inheritance Taxes in EU Member States and Possible Mechanisms to Resolve Problems of Double Inheritance Taxation in the EU.¹

64.2 Incorporation of IHT DTAs into UK law

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by statute. Accordingly, s.158(1) IHTA provides:

If Her Majesty by Order in Council declares—

- (a) that arrangements specified in the Order have been made with the government of any territory outside the UK with a view to affording relief from double taxation in relation to capital transfer tax payable under the laws of the UK and any tax imposed under the laws of that territory which is of a similar character or is chargeable on or by reference to death or gifts inter vivos, and
- (b) that it is expedient that those arrangements should have effect, the arrangements shall, notwithstanding anything in this Act, have effect
 - [i] so far as they provide for relief from capital transfer tax, or
 - [ii] for determining the place where any property is to be treated as situated for the purposes of the tax.

Under s.158(1)[ii] a DTA could in theory *increase* the scope of IHT, by providing that property which is not UK situate on general principles is to be regarded as UK situate. However in practice DTAs do not do this.

¹ Copenhagen Economics, commissioned by the European Commission, Directorate-General for Taxation and Customs Union, Aug 2010.
http://ec.europa.eu/taxation_customs/resources/documents/common/consultation/s/tax/2010/08/inheritance_taxes_report_2010_08_26_en.pdf

64.3 IHT double taxation treaties

In the following three chapters I consider

- (1) the pre-CTT IHT DTAs (India, Pakistan, Italy and France.)
- (2) the USA IHT treaty
- (3) foreign IHT credit relief

I hope to deal with the other treaties in future editions.

64.3.1 *The OECD model*

The OECD approved their Estate and Inheritance Draft Model Convention in 1966. This model was revised in 1982 (Model Double Taxation Convention on Estates and Inheritances and on Gifts). It is therefore somewhat outdated.

64.4 EU law aspects

The CJEU have ruled that the EU Treaty does not oblige Member States to eliminate double inheritance taxation which arises from the exercise of fiscal sovereignty by Member States.² However the European Commission are looking at this area. In December 2011 the EC stated:

EU citizens that inherit foreign property are frequently faced with a tax bill from more than one Member State. In fact, in extreme cases the total value of a cross-border inherited asset might even have to be paid in tax, because several Member States may claim taxing rights on the same inheritance or tax foreign inheritances more heavily than local inheritances. Citizens may be forced to sell inherited assets, just to cover the taxes, and small businesses may face transfer difficulties on the death of their owners. To tackle these problems, the Commission today adopted a comprehensive package on inheritance taxation. Through a Communication, Recommendation and Working Paper, the Commission analyses the problems and presents solutions related to cross-border inheritance tax in the EU. ...

there are two main problems when it comes to cross-border inheritance tax in the EU:

The first is double or multiple taxation, where more than one Member State claims the right to tax the same inheritance. Divergent national

2 Case C-67/08 *Block*.

rules, a shortage of bilateral inheritance tax conventions, and inadequate national double tax relief measures can result in citizens being taxed twice or more on the same inheritance. Member States are free to apply national inheritance rules as they see fit once they are in line with EU rules on non-discrimination and free movement. The Commission is not proposing any harmonisation of Member States' inheritance tax rules. Instead it is recommending a broader and more flexible application of national double taxation relief measures so as to provide a pragmatic, speedy and cost-effective solution to the significant tax burdens facing many citizens. The Recommendation in today's Package suggests how Member States could improve existing national measures to ensure that there is adequate double tax relief. It sets out solutions for cases in which several Member States have taxing rights. The Commission invites Member States to introduce the appropriate solutions into national legislation or administrative practices.

The second inheritance tax problem that citizens can encounter is discrimination...³

Although cross-border inheritance tax problems may seriously affect individuals, revenues from domestic and cross-border inheritances taxes account for a very small share - less than 0.5% - of total tax revenues in Member States. Cross-border cases alone must account for far less than that figure.

Next steps

The Commission will launch discussions with Member States to ensure appropriate follow up to the Recommendation. ... In 3 years time, the Commission will present an evaluation report showing how the situation has evolved, and decide on this basis whether further measures are necessary at national or EU level. ...⁴

Accordingly, some major changes can be expected in this area in a few years time.⁵

CHAPTER SIXTY FIVE

IHT DTAs: INDIA, PAKISTAN, ITALY, FRANCE

65.1 IHT double tax treaties – Introduction

In recent times the UK has had three death/gift taxes:

Estate Duty: 1894 - 1974

Capital Transfer Tax: 1974 - 1986

Inheritance Tax: 1986 -

In this chapter I consider the four IHT double tax treaties which were made before the introduction of CTT. I refer to these as “**the India, Pakistan, Italy and France IHT DTAs**”¹ or together as “**the pre-CTT DTAs**”. These treaties are important to those who are deemed domiciled in the UK, but treaty-domiciled in India, Pakistan, Italy or France.

I comment only on the UK aspects of the treaties. Foreign law advice

1 For some reason DTAs do not have short titles. The full titles are:

- (1) Agreement between the Government of the United Kingdom and the Government of India for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1956 No. 998]
- (2) Agreement between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of Pakistan for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1957 No. 1522]
- (3) Convention between the United Kingdom of Great Britain and Northern Ireland and France for the Avoidance of Double Taxation with respect to Duties on the Estates of Deceased Persons [SI 1963 No. 1319]
- (4) Convention between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the Italian Republic for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Duties on the Estates of deceased persons [SI 1968 No. 304]

will also be needed in any case where a treaty applies. The provisions relating to exchange of information are not discussed.

The four pre-CTT DTAs are similar but not identical, and the many small differences can be important. This does make a coherent exposition rather difficult. It is surprising that no standard model form was adopted, but there it is. It does make one appreciate the tremendous value of the OECD model IT/CGT convention.

65.2 Application of pre-CTT DTAs to IHT

India IHT DTA Art. I provides:

The duties which are the subject of the present Agreement are

- (a) In India, the estate duty imposed under the Estate Duty Act, 1953, and
- (b) In the UK, the estate duty imposed in Great Britain.

Article II (1) provides commonsense definitions of India, Great Britain, UK, territory, and duty, which need not be set out here.

Although the treaty refers to Great Britain, it also applies in Northern Ireland.²

The treaty refers to UK estate duty but it is extended to IHT by s.158(6) IHTA:

Where arrangements with the government of any territory outside the UK are specified under any Order in Council which—

- (a) was made, or has effect as made, under section 54 of the Finance (No 2) Act 1945 or section 2 of the Finance Act (Northern Ireland) 1946, and
 - (b) had effect immediately before the passing of this Act,
- the Order shall, notwithstanding the repeal of that section by the Finance Act 1975 remain in force and have effect as if any provision made by those arrangements in relation to estate duty extended to capital transfer

2 India IHT DTA Art. X provides: “The present Agreement shall apply in relation to the estate duty imposed in Northern Ireland as it applies in relation to the estate duty in Great Britain, but shall be separately terminable in respect of Northern Ireland by the same procedure as is laid down in Article XII.” This was because Northern Ireland was from 1921 a separate unit for estate duty purposes.

tax³ chargeable by virtue of section 4 above; ...⁴

The Pakistan, Italy and France IHT DTAs are substantially the same: see Arts. I and II of each DTA.

65.3 Treaty IHT exemption

Each treaty provides an IHT exemption in slightly different terms.

India IHT DTA Art. III(3) provides:

- [a] Duty shall not be imposed in Great Britain on the death of a person who was not domiciled at the time of his death in any part of Great Britain but was domiciled in some part of India on any property situated outside Great Britain :
- [b] Provided that nothing in this paragraph shall prevent the imposition of duty in Great Britain on any property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

Italy IHT DTA Art. V(2) provides:

Where duty is imposed in the territory of one Contracting Party on the death of a person who at the time of his death was not domiciled in any part of that territory but was domiciled in some part of the territory of the other Contracting Party, no account shall be taken, in determining the amount or rate of such duty, of property situated outside the former territory, provided that this paragraph shall not apply to duty imposed in the territory of a Contracting Party on property passing under a settlement governed by its law.

France IHT DTA Art. V(1) provides:

3 The reference to CTT has effect as a reference to IHT: s.100 FA 1986.

4 The Italy treaty adds:

“The present Convention shall also apply to any other duties of a substantially similar character to the duties referred to in para (1) above which may be imposed in Great Britain or Italy subsequently to the date of signature of the present Convention.”

This is also in the France and Pakistan DTAs. It is missing from the India treaty but it makes no difference as s.158 does the same work.

Where a person was at the time of his death domiciled in some part of France duty shall not be imposed in Great Britain on any property which neither is situated in Great Britain, nor passes under a disposition or devolution regulated by the law of some part of Great Britain; and, in determining the amount or rate of duty payable in Great Britain, such property shall be disregarded.

I refer to this as “**treaty IHT exemption**”.

The exemption applies to duty imposed on a death.⁵ That includes the charge which applies on property in the individual’s free estate, property in an estate IP trust, and property within the GWR charge on death.

The Pakistan IHT DTA contains an amusing error. Pakistan DTA Art.V(2) provides:

(2) Where a person at the time of his death was domiciled in some part of Pakistan and was not domiciled in some part of Great Britain, duty shall not be imposed in Great Britain on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—

(a) is situated in Pakistan [*sic*], or

(b) passes under a disposition or devolution regulated by the law of some part of Great Britain;

and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded.

There is clearly a typographical error here and the word “Pakistan” in (a) should read “Great Britain”.⁶ It is considered that the error can be

5 This is stated expressly in the India, Pakistan and Italy IHT DTAs. In the France IHT DTA it is not stated expressly but is clearly implied.

6 I am grateful to Simon McKie for drawing this point to my attention. The corresponding mistake is made in Art V(1):

“Where a person at the time of his death was domiciled in some part of Great Britain and was not domiciled in some part of Pakistan, duty shall not be imposed in Pakistan on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—

(a) is situated in Great Britain [*sic*], or

(b) is settled property of which the deceased was life tenant where the settlor was domiciled in some part of Pakistan at the time that the settlement took effect, or

(c) passes under a devolution regulated by the law of some part of Pakistan and in determining the amount or rate of duty payable in Pakistan, property falling within (a), (b), or (c) shall be disregarded.

corrected as a matter of construction under the slip rule. HMRC practice is (rightly) not to take this point.⁷

65.3.1 *Failed PETs*

What about the charge on a lifetime PET which becomes a chargeable transfer because the transferor dies within 7 years, known as a “**failed PET**”? The treaties must be considered separately, since the wording of each treaty IHT exemption varies.

India and Italy IHT DTAs provide exemption from duty *on the death*. In the case of a failed PET, the IHT charge is on the lifetime transfer of value. Strictly, the charge is not “on the death”, even though it is only on the occasion of death that the transfer becomes chargeable. However a purposive construction is appropriate. The relief would have applied to the estate duty charge on lifetime gifts within 7 years of death. In substance the charge on failed PETs is a charge on death. This is a strong argument, for treaties are not interpreted strictly or literally. A relief for a charge “on” the death means a relief for a charge which becomes payable *at the time of the death*.⁸

In France, the IHT exemption does seem to apply to a failed PET since the words “on the death” are not present, and the point does not arise.

In Pakistan the case for IHT exemption seems somewhat weaker since it is a very loose construction to say that the charge on a failed PET is a charge on property which “passes or is deemed to pass” on a death (the terminology is from Estate Duty legislation where it had a somewhat technical meaning). Nevertheless the purposive argument is still arguable.

However there is a serious difficulty. Section 158(6) IHTA provides that the treaties have effect only in relation to IHT “chargeable by virtue of s.4 IHTA”. The IHT charge on a failed PET is not under s.4, so the treaty does not have effect in relation to that charge. It is considered, therefore,

and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded.”

In some published versions the error has been corrected, but I am not aware of any authority for that. The original is accessible on www.kessler.co.uk.

⁷ Private correspondence.

⁸ Further support can be found from the area of transferable nil-rate bands. This relief increase the nil-rate band “for the purposes of the charge to tax *on the death* of the survivor”; see s.8A(3) IHTA. HMRC accept that this relief applies to the charge on a failed PET.

that although the terms of the treaties of France (relatively clearly), India and Italy (reasonably clearly) and Pakistan (arguably) do provide relief for a failed PET, this does not help the taxpayer, because UK domestic law (in breach of the treaty obligations) does not do so.

The conclusion is that there is no treaty relief for a failed PET. This is odd, perhaps absurd. But the treaties give rise to many other anomalies. There is no relief on ten-year charges on trusts. There is clearly no relief on a lifetime chargeable transfer which is not a PET, such as a straightforward gift to a trust.⁹

65.3.2 *Planning*

This raises tricky planning choices for a person who qualifies for IHT treaty exemption. One strategy is for an elderly individual *not* to make any gifts, to retain property until death. The lifetime gift may be taxable and the death estate tax free. But the risk of that approach is that by the time of the death the treaty may have been repealed. The lifetime gift may be better—if the donor survives seven, or at least three years.

Sometimes one spouse is and the other is not within the scope of the treaty. In that case inter-spouse gifts (or will trusts conferring an IP on the appropriate spouse) will bring the property within the scope of the treaty.

65.4 Domicile requirement of treaty IHT exemption

65.4.1 *Individual not UK domiciled*

A requirement for IHT exemption in the India and Pakistan DTAs is that the individual must not be domiciled in the UK. For this purpose the deemed domicile rule does not apply. Section 267(2) IHTA provides:

Subsection (1) above [deemed domicile rule] ... shall not affect the interpretation of any such provision as is mentioned in section 158(6) above [pre-CTT treaties].

The reason is that estate duty had no equivalent of the deemed domicile rule. The subsequent application of a deemed domicile rule to the treaties

⁹ It appears from an incoherent passage in the IHTM para 13024 that HMRC agree.

would have raised a number of difficulties.¹⁰ The obvious solution was to keep the treaties free from the deemed domicile rule.

IHT exemption in the Italy IHT DTA also has the requirement that the individual is not domiciled in the UK. However, this treaty has a tie-breaker for an individual who is both domiciled in the UK and treaty-domiciled in Italy. If Italy wins under the tie-breaker, it is clear that the individual is regarded as not UK domiciled. So the requirement to be non-UK domiciled adds nothing.

IHT exemption in the France IHT DTA (which also has a domicile tie-breaker) does not include the requirement that the individual is not domiciled in the UK. Since the Italy IHT DTA (1968) came well after the France IHT DTA (1963) it is strange that the Italy wording did not copy the France one. But there it is.

65.4.2 *Domicile in treaty state*

The requirement for IHT exemption in each treaty is that the individual must be domiciled in the treaty state. But “domicile” here has a non-standard meaning so I refer to it as “**treaty-domicile**”.

65.4.3 *Treaty-domicile: India*

India IHT DTA Art. II(2) provides:

For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments shall be determined in accordance with the law in force in that territory.

Thus the question whether one is domiciled in India is governed by the law of India. It appears from *Saini v. State of Uttarakhand*¹¹ that domicile

¹⁰ It is an interesting question whether it would have been a breach of the treaties. Even if not a technical breach, the treaty countries could reasonably have objected. Deemed domiciled individuals would have suffered double taxation. An alternative would have been to renegotiate existing treaties (introducing new rules at least for treaties which lacked a tie-breaker) but presumably that was thought to be impractical or too much trouble.

¹¹ AIR 2010 Utr 36
<http://legalperspectives.blogspot.com/2010/08/only-one-domicile-for-entire-india-high.html>

is governed by the Indian Succession Act 1925.¹² That Act sets out statutory rules based on the common law rules, and the Indian High Court referred to Halsbury's Laws of England, which also suggests that the Indian Law has not moved from its common law origins. India is a single state for domicile purposes, so a person is domiciled in India, not in any part of India.¹³

65.4.4 *Treaty-domicile: Pakistan*

Pakistan is differently worded but the same in substance. Pakistan DTA Art. II(2) provides:

For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of Great Britain or in any part of Pakistan shall be determined in accordance with the law in force in Great Britain and Pakistan respectively.

Thus the question whether one is domiciled in Pakistan is governed by the law of Pakistan.¹⁴

65.4.5 *Treaty-domicile: Italy and France*

Italy IHT DTA Art. II(2) repeats the India IHT DTA but goes on to add a tie-breaker clause:

- (a) For the purposes of the present Convention, the question whether a deceased person was domiciled at the time of his death in any part of the territory of one of the Contracting Parties shall be determined

12 http://indianchristians.in/news/images/resources/pdf/indian_succession_act_1925.pdf

13 Article III(3) India IHT DTA refers to a person being domiciled "in some part of India" but that may have reflected the position of the Princely States, and French and Portuguese territories, which subsequently became part of a unified India.

14 *Dymond's Death Duties* (15th edition 1973) states:

"The Indian (and Pakistan) law (contained in the [Indian] Succession Act 1925) is basically similar to British law but somewhat less stringent in its requirements, ie. the conception of 'domicile' is a little nearer to that of 'residence'."

I would be grateful to any reader who could supply further information about the position under Pakistani law.

- in accordance with the law in force in that territory.
- (b) Where by reason of the provisions of the preceding paragraph a deceased person is deemed to be domiciled in the territory of each of the Contracting Parties, then this case shall be solved in accordance with the following rules:
- (i) he shall be deemed to be domiciled in the territory of the Contracting Party in which he had a permanent home available to him at the time of his death; if he had a permanent home available to him in the territory of each of the Contracting Parties he shall be deemed to be domiciled in the territory of the Contracting Party with which his personal and economic relations were closest (centre of vital interests);

It is not often necessary to look beyond this point but, for completeness, the DTA continues.

- (ii) if the Contracting Party in whose territory he had his centre of vital interests cannot be determined, or if he had not a permanent home available to him in the territory of either Contracting Party, he shall be deemed to be domiciled in the territory of the Contracting Party in which he had an habitual abode;
- (iii) if he had an habitual abode in the territory of each of the Contracting Parties, or in the territory of neither, he shall be deemed to be domiciled in that of which he was a national;
- (iv) if he was a national of both territories or of neither of them, the taxation authorities of the Contracting Parties shall determine the question by mutual agreement.

The tie-breaker wording follows the tie-breaker in the OECD Model Convention definition of residence, Art. 4(2) and reference should be made to the OECD Commentary.¹⁵ France is the same as Italy: France IHT DTA Art. II(3). A key question is what is required for a person to be domiciled in Italy under Italian law.

65.5 Treaty-situs

The next requirement of treaty IHT exemption is that the property must not be situate in the UK. For this purpose the DTAs contain situs rules.

¹⁵ See 5.8 (Tie-breaker tests for individuals).

It is therefore necessary to distinguish between ordinary IHT situs and what I shall call “**treaty-situs**”. The rules are those recommended in a report on Double Taxation prepared for the League of Nations in 1923 by Professors Bruins and Seligman and our own Sir Josiah (later, Lord) Stamp, and the report is worth reading as it give the background. Many of the rules repeat the usual IHT situs rules but some are different.

65.5.1 *Treaty-situs: India, Pakistan, Italy*

India IHT DTA Art. IV(1) provides:

Subject to para (2) of this Article, where a person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments, ...

This is the case we are considering.

... the situs of any property *which for the purposes of duty passes or is deemed to pass on his death* shall, for the purposes of the imposition of duty and of the credit to be allowed under Art. VI, be determined exclusively in accordance with the rules in Art. V of the present Agreement.

However there is a condition in Art. IV(2):

Para (1) of this Article shall apply if, and only if, apart from the said Art. V—

- (a) duty would be imposed on the property under the law of each of the Contracting Governments; or
- (b) duty would be imposed on the property under the law of one of the Contracting Governments and would, but for some specific exemption, also be imposed thereon under the law of the other Contracting Government.

This condition will never be satisfied under the Indian treaty, since estate duty in India was repealed in 1985. (Significantly, about the same time, the Thatcher Government was drawing the teeth of CTT, though the UK did not follow India all the way to abolition.) So the treaty situs rules in the India IHT DTA will never apply.

Pakistan is the same: Pakistan IHT DTA Art. III. Pakistan’s estate duty

was abolished in 1979. One wonders why these treaties have survived, more than three decades after losing their *raison d'être*.

Italy and France are substantially the same.¹⁶ They omit the phrase italicised above, but those words add nothing.

The Italy treaty situs rules ceased to apply in 2001 because Italy abolished its succession duty and estate duty (*imposta sull'asse ereditario globale*) – a Berlusconi reform. However, in November 2006 the Prodi Government reintroduced a succession tax.

65.5.2 Treaty-situs: France and Italy

France retains its duty on successions on death, so the treaty situs rules are relevant. I here set out the rules in the French Treaty Art. 4 highlighting in italic those significantly different from IHT-situs:

The rules referred to in paragraph 1 of Article III are :

- (a) land shall be deemed to be situated at the place where it is located; rights or interests (otherwise than by way of security) which constitute immovable property shall be deemed to be situated at the place where the land to which they relate is located; the question whether rights or interests constitute immovable property shall be determined in accordance with the law of the place where the land to which they relate is located;
- (b) tangible movable property (other than such property for which specific provision is hereinafter made) and rights or interests (otherwise than by way of security) therein shall be deemed to be situated at the place where it is located at the time of the deceased person's death or, *if in transitu, at the place of destination*; and bank or currency notes or other forms of currency recognised as legal tender in the place of issue shall be treated as tangible movable property for the purpose of this subparagraph;
- (c) debts, secured or unsecured, excluding those for which specific provision is made in this Article, *but including debentures and debenture stock issued by a company, bills of exchange, promissory notes and cheques shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;
- (d) *securities issued by any government, county council, département, municipality or other public authority shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;
- (e) *shares or stock in a company (including any such property held by a nominee, whether the beneficial ownership is evidenced by scrip certificates or otherwise) shall be deemed to be situated at the place where the company was incorporated*;

¹⁶ Italy IHT DTA Art. III.

- (f) *moneys payable under a policy of assurance or insurance shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;*
- (g) *an interest in a partnership, which term includes a société en nom collectif, a société en commandite simple and a société civile under French law, shall be deemed to be situated at the place where the business is principally carried on; and in the case of a société civile immobilière this shall be where the land developed in accordance with the objects of the société is located;*
- (h) *goodwill as a trade, business or professional asset shall be deemed to be situated at the place where the trade, business or profession to which it pertains is carried on;*
- (i) *ships and aircraft and shares thereof shall be deemed to be situated at the place of registration of the ship or aircraft;*
- (j) *patents, trade marks, designs, copyright, and rights or licences to use any patent, trade mark, design or copyrighted material shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;*
- (k) *rights or causes of action ex-delicto¹⁷ surviving for the benefit of the estate of a deceased person shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;*
- (l) *judgment debts shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;*
- (m) *any other right or interest shall be deemed to be situated at the place determined by the law in force in the territory of the Contracting Party where the deceased person was not domiciled at the date of his death.*

65.6 Proper law

Treaty IHT exemption in India, Pakistan and France does not apply to property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

Italy is not quite the same. The restriction is that the exemption does not apply to property passing under a *settlement* with a UK law (so the exemption could apply in Italy to property passing under a UK law will, but not elsewhere).

This follows estate duty principles, where the territorial limits of the tax depended partly on domicile and situs (as IHT) but also on whether the proper law of the disposition or devolution under which the property passes was a law of the UK. The requirement makes little sense for the IHT regime, but logic is not to be expected when estate duty treaties are

¹⁷ ie torts, not contractual rights.

left unamended to apply to IHT.

This is a complex topic, with many cases to consider. For a discussion, see the scholarly *Dymond's Death Duties*, (15th edition, 1973) pp 1286–1312 and Parkinson, “A disposition or devolution regulated by the law of some part of Great Britain: the Proviso to the Limitation of Taxing Rights in the IHT Treaties with France, India and Pakistan” [2011] PCB 126.

Where relief is lost because an English law will apply, the problem could in principle be resolved by an IoV, though the drafting would require some care.

65.7 Transferable nil rate bands and IHT DT reliefs

Section 8A IHTA provides

8A Transfer of unused nil-rate band between spouses and civil partners

(1) This section applies where—

- (a) immediately before the death of a person (a “deceased person”), the deceased person had a spouse or civil partner (“the survivor”), and
- (b) the deceased person had unused nil-rate band on death.

Section 8A(2) IHTA defines “unused nil rate band on death”:

A person has unused nil-rate band on death if—

$M > VT$

where—

M is the maximum amount that could be transferred by a chargeable transfer made (under section 4 above) on the person’s death if it were to be wholly chargeable to tax at the rate of nil per cent. (assuming, if necessary, that the value of the person’s estate were sufficient but otherwise having regard to the circumstances of the person); and

VT is the value actually transferred by the chargeable transfer so made (or nil if no chargeable transfer is so made).

The availability of a transferable nil rate band depends on whether there was a chargeable transfer on the death of the first spouse. Assuming there would be a chargeable transfer (but for IHT DTA relief) does the availability of DTA relief alter the position? The IHTM para 43025

provides:

Transferable Nil Rate Band: interaction of ability to transfer unused nil rate band with double taxation agreements, double taxation relief and successive charges relief [October 2009]

The extent to which an estate is chargeable to tax may be governed by a double taxation agreement [IHTM27161], or a liability to tax may be reduced to nil by double taxation relief [IHTM27181] or successive charges relief [IHTM22041].

[1] Where, under the terms of a double taxation agreement, an asset is not subject to tax, then if this means that the chargeable estate is below the nil rate band, the amount unused is available for transfer.

[2] However, where there is a liability to tax that is reduced to nil by either double taxation relief or successive charges relief, the nil rate band remains fully used. We do not repay any “excess” relief and there is no provision to convert “excess” relief into unused nil rate band.

Unilateral IHT credit relief takes the form of a credit against IHT. It falls within [2]. Where that relief applies there is still a chargeable transfer so that transferrable NRB relief does not become available.

The India France and Pakistan IHT DTAs provide that “duty shall not be imposed” on certain property. The USA DTA provides that certain property “shall not be taxable” in the UK. These reliefs fall within [1]. It is not obvious that this prevents there being a chargeable transfer but it might be said to follow from a commonsense reading. Treaties are not to be construed technically. HMRC read the legislation in this way, so that the transferable nil rate band is available to the surviving spouse.

The Italy IHT DTA provides that “No account shall be taken, in determining the amount or rate of duty” on death, in relation to certain property. It is considered that the effect is the same as the other pre-CTT DTAs.

65.8 Claims for treaty IHT exemption

A claim is required for foreign IHT credit relief or for a refund of tax.¹⁸ There is no requirement to make a formal claim for treaty IHT exemption. However if an IHT account is in principle required on a death,¹⁹ a treaty

18 See 68.9 (Claims for foreign IHT credit relief).

19 See 82.12 (Reporting on death of foreign domiciled individual).

saying that tax “shall not be imposed” or property “shall not be taxable” (as most of the pre-CTT DTAs or the US IHT DTAs) does not override this requirement. The same applies to the differently worded exemption in the Italy IHT DTA (“no account shall be taken in determining the amount or rate of duty...”).

Similarly, for a deemed domiciled individual, the US treaty does not override the duty to disclose a lifetime chargeable transfer or the making of a non-resident settlement.²⁰

So the usual returns should be made with a claim for DTA relief.

65.9 Deductions

Article V(1) Italy IHT DTA provides:

In determining the amount on which duty is to be computed, permitted deductions shall be allowed in accordance with the law in force in the territory in which the duty is imposed.

This seems unnecessary. Perhaps there were Estate Duty or foreign law reasons for it? I would be grateful to any reader who could explain.

In *Eckelkamp*²¹ a Belgian rule disallowing a deduction for charges on immovable Belgium property owned by non-resident was held in breach of EU free movement of capital. Maybe the provision was intended to undo discrimination of that kind.

Identical wording is found in the Pakistan Treaty art 5(3) and also in some post-CTT DTAs, eg USA IHT art.8(1). There is no equivalent in other treaties but the omission does not matter.

20 See 82.11 (IHT reporting requirement on creation of settlement).

21 Case C-11/07.

CHAPTER SIXTY SIX

IHT DTA: USA

66.1 USA IHT treaty – Introduction

This chapter considers the USA IHT Treaty.¹

For some reason DTAs do not have short titles. I use the expression “**USA IHT DTA**” (or, for short, just DTA) to refer to the DTA dated 19 October 1978 officially called “the Convention between the Government of the USA and the Government of the UK for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on estates of deceased persons and on gifts”.

I comment only on the UK aspects of the treaty. Separate US advice will be needed in any case where the treaty applies.

66.1.1 *Cross references*

Issues and wording which the USA IHT DTA has in common with other treaties are discussed elsewhere. See:

65.7 (Transferable nil rate bands and IHT DT reliefs).

65.8 (Claims for treaty IHT exemption)

60.9 (Deductions)

68.8 (USA DTA: Credit for foreign IHT)

68.9 (Claims for foreign IHT credit relief).

66.2 Scope

Article 1 USA IHT DTA provides:

¹ The text is accessible on http://uniset.ca/misc/us-uk_esttax.html

This Convention shall apply to any person who is within the scope of a tax which is the subject of this Convention.

Thus the DTA applies to trustees as well as to individuals, even if the trustees are not themselves US treaty-domiciled.

66.3 Taxes covered

Article 2 USA IHT DTA provides:

- (1) The existing taxes to which this Convention shall apply are:
 - (a) in the US: the Federal gift tax and the Federal estate tax, including the tax on generation-skipping transfers; and
 - (b) in the UK: the capital transfer tax.
- (2) This Convention shall also apply to any identical or substantially similar taxes which are imposed by a Contracting State after the date of signature of the Convention in addition to, or in place of, the existing taxes. The competent authorities of the Contracting States shall notify each other of any changes which have been made in their respective taxation laws.

The DTA applies to IHT which is “substantially similar” to CTT.

66.3.1 “Tax”

Article 3(f) USA IHT DTA provides:

the term “tax” means:

- (i) the Federal gift tax or the Federal estate tax, including the tax on generation-skipping transfers, imposed in the US, or
- (ii) the capital transfer tax imposed in the UK, or
- (iii) any other tax imposed by a Contracting State to which this Convention applies by virtue of the provisions of para (2) of Article 2, as the context requires.

66.4 Definitions

The DTA provides commonsense definitions of the following terms, which are not set out here: US; UK; Enterprise; Competent Authority; Contracting State.

66.4.1 “National”

Article 3(e) USA IHT DTA provides:

the term “nationals” means:

- (i) in relation to the US, US citizens, and
- (ii) in relation to the UK any citizen of the UK and Colonies, or any British subject not possessing that citizenship or the citizenship of any other Commonwealth country or territory, provided in either case he had the right of abode in the UK at the time of the death or a transfer.

66.4.2 “Decedent”

The DTA uses the term “decedent” which is an Americanism for “deceased”.

66.4.3 *Undefined terms*

Article 3(2) USA IHT DTA provides:

As regards the application of the Convention by a Contracting State, any term not otherwise defined shall, unless the context otherwise requires and subject to the provisions of Article 11 (Mutual Agreement Procedure), have the meaning which it has under the laws of that Contracting State relating to the taxes which are the subject of the Convention.

66.5 Treaty-domicile

For present purposes there are three types of domicile:

- (1) domicile in the ordinary UK law sense (“**UK law domicile**”);
- (2) deemed UK domicile for IHT (“**deemed UK domicile**”);
- (3) domicile for the purposes of the treaty (“**treaty-domicile**”).

The definition of treaty-domicile is distinctly non-standard. Article 4(1) USA IHT DTA provides:

For the purposes of this Convention an individual was domiciled:

- (a) in the US:
 - [i] if he was a resident (domiciliary) thereof or

- [ii] if he was a national thereof and had been a resident (domiciliary) thereof at any time during the preceding three years

The definition of resident (domiciliary) is crucial: this is a matter of US law.²

Article 4(1) USA IHT DTA provides:

For the purposes of this Convention an individual was domiciled: ...

(b) in the UK:

- [i] if he was domiciled in the UK in accordance with the law of the UK [ie if UK law domiciled]
- [ii] or is treated as so domiciled for the purpose of a tax which is the subject of this Convention [i.e. if deemed UK domiciled].

Next come a series of tie-breakers to deal with persons who under (1)(a) and (b) would be treaty-domiciled in both jurisdictions:

(2) Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and

- (a) was a national of the UK but not of the US, and
- (b) had not been resident in the US for Federal income tax purposes in seven or more of the ten taxable years ending with the year in which that time falls,

he shall be deemed to be domiciled in the UK at that time.

(3) Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and

- (a) was a national of the US but not of the UK, and
- (b) had not been resident in the UK in seven or more of the ten income tax years of assessment ending with the year in which that time falls,

he shall be deemed to be domiciled in the US at that time.

For the purposes of this paragraph, the question of whether a person was so resident shall be determined as for income tax purposes but without regard to any dwelling-house available to him in the UK for his use.

2 The term “resident” for estate tax is defined in Treasury Reg: 20.0-1(b).
For gift tax see Treasury Reg: 25.2501-1(b).

The last sentence is based on wording formerly in the IHT deemed domicile rule, see 57.2.5 (Meaning of “residence” for 17-year residence rule).

Where these tie-breakers fail to break the tie, we turn to Art. 4(4):

Where by reason of the provisions of para (1) an individual was domiciled in both Contracting States, then, subject to the provisions of paras (2) and (3), his status shall be determined as follows:

- (a) the individual shall be deemed to be domiciled in the Contracting State in which he had a permanent home available to him. If he had a permanent home available to him in both Contracting States, or in neither Contracting State, he shall be deemed to be domiciled in the Contracting State with which his personal and economic relations were closest (centre of vital interests);
- (b) if the Contracting State in which the individual’s centre of vital interests was located cannot be determined, he shall be deemed to be domiciled in the Contracting State in which he had an habitual abode;
- (c) if the individual had an habitual abode in both Contracting States or in neither of them, he shall be deemed to be domiciled in the Contracting State of which he was a national; and
- (d) if the individual was a national of both Contracting States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This is the standard OECD Model wording: see 5.8 (Tie-breaker tests for individuals).

66.5.1 *Resident of possession of the US*

Article 5(5) USA IHT DTA relates to nationality and treaty-domicile:

An individual who was a resident (domiciliary) of a possession of the US and who became a citizen of the US solely by reason of his

- (a) being a citizen of such possession, or
 - (b) birth or residence within such possession,
- shall be considered as neither domiciled in nor a national of the US for the purposes of this Convention.

I understand that the possessions of the US are mainly uninhabited islands³ so few (if any) individuals are affected by this provision.

66.6 IHT exemptions for individuals

Article 5 USA IHT DTA provides two exemptions for individuals. Article 5(1) provides:

- (a) [i] Subject to the provisions of Articles 6 (Immovable Property (Real Property)) and 7 (Business Property of a Permanent Establishment and Assets Pertaining to a Fixed Base Used for the Performance of Independent Personal Services) and the following paragraphs of this Article,
 - [ii] if the decedent or transferor was domiciled in one of the Contracting States at the time of the death or transfer, property shall not be taxable in the other State.
- (b) Sub-para (a) shall not apply if at the time of the death or transfer the decedent or transferor was a national of that other State.

This can confer IHT exemption. To qualify for IHT exemption under Art. 5(1) the individual must be:

- (1) treaty-domiciled in the USA and
- (2) not a UK national.

Article 5(2) USA IHT DTA provides:

Subject to the provisions of the said Articles 6 and 7, if at the time of the death or transfer the decedent or transferor

- [a] was domiciled in neither Contracting State and
- [b] was a national of one Contracting State (but not of both),

property which is taxable in the Contracting State of which he was a national shall not be taxable in the other Contracting State.

Can this confer IHT exemption? In order to need and qualify for IHT exemption under art. 5(2):

- (1) the individual must be:
 - (a) treaty-domiciled in neither state (so in particular not UK domiciled or deemed domiciled) and

3 Howland Island; Baker Island; Jarvis Island; Navassa Island; Johnston Atoll; Midway Islands; Palmyra Atoll; Wake Islands; Guantanamo Bay; Kingman Reef.

- (b) a US national and not a UK national
- (2) property must be taxable in the UK (or no relief is needed) so it must be UK situate.

- (3) the property must be taxable in the USA.

This is just possible. Condition (1) is possible because a US national is not necessarily treaty-domiciled in the USA. If such an individual held UK situate property, it would be exempt from IHT under Art. 5(2) provided it was taxable in the USA. In practice though this will be rare.

These two exemptions applies to charges on death and on lifetime gifts. The exemptions even apply to UK situate property (so long as the property is not land or a permanent establishment).

66.7 IHT exemption for trusts

Article 5(4) USA IHT DTA provides:

- [a] Paras (1) and (2) shall not apply in the UK to property comprised in a settlement;
- [b] but, subject to the provisions of the said Articles 6⁴ and 7⁵, tax shall not be imposed in the UK on such property if at the time when the settlement was made the settlor was domiciled in the US and was not a national of the UK.

Article 5(4)[b] provides exemption from:

- (1) IHT 10 year and exit charges;
- (2) the charge on the death of an individual with an estate IP;
- (3) GWR lifetime and death charges.

The exemption applies to UK situate assets (so long as the asset is not land or a permanent establishment).

It is an interesting question whether a common form grantor trust is a settlement for this purpose: it is (I think) a settlement for US purposes but not for IHT purposes.⁶ It is also an interesting question whether or to what extent UK rules determining when a settlement is made (and who is the settlor) apply for the purposes of this relief.

⁴ See 66.10 (Immovable property).

⁵ See 66.11 (Business property).

⁶ See 79.5 (American revocable trusts (grantor trusts)).

66.8 Requirement to pay foreign tax

Article 5(5) USA IHT DTA provides:

If by reason of the preceding paragraphs of this Article

[a] any property would be taxable only in one Contracting State and

[b] tax, though chargeable, is not paid (otherwise than as a result of a specific exemption, deduction, exclusion, credit or allowance) in that State,

tax may be imposed by reference to that property in the other Contracting State notwithstanding those paragraphs.

The IHT Manual provides:

27177. Certification of disclosure and tax enforcement procedure with the USA [January 2008]

Before we give up our rights to tax property in accordance with Article 5(1) of the DTC with the USA, we require the US authorities to certify that disclosure has been made to them and that payment of any appropriate tax has been made or will be enforced. This is because Article 5(5) of the DTC withdraws this restriction and allows us to tax the property if the USA is unable to enforce its right to tax. Conversely, we also need to certify to the above if the US authorities must give up their right to tax property.

Cases in which para (1) operates to exclude some UK property from the charge to IHT and which are, or but for that exclusion would be, taxpaying should not be closed until the US authorities have certified on Form 742 that disclosure has been made to them and that payment of any appropriate tax has been made or will be enforced.

This requirement should be explained to the taxpayer and 2 prints of Form 742 issued to them. Attention should be directed to the appropriate paragraphs of the form, which the taxpayer is required to complete. In particular where by reason of the Convention the UK is giving up its taxing rights, only para 1 is in point, and paras 2 to 7 are not appropriate. On receipt of a correct and duly certified form the case may be closed: any error or difficulty should be referred to TG. Where the USA gives up the right to tax property under Article 5(1), US form 706 CE will be forwarded to this Office in duplicate for certification.

After checking (it is important that the forms themselves should not be marked in any way) they and the file should be sent with a note of any error or omission to TG for the issue of the appropriate certificate.

66.9 Dual-situate assets

Article 5(6) USA IHT DTA provides:

If at the time of the death or transfer

[a] the decedent or transferor was domiciled in neither Contracting State and

[b] each State would regard any property as situated in its territory and
[c] in consequence tax would be imposed in both States,
the competent authorities of the Contracting States shall determine the situs of the property by mutual agreement.

This is not relevant if IHT exemption or US tax exemption applies. It is a different technique from dealing with the problem of dual-situate assets from that adopted in the pre-CTT treaties, which set out their own treaty-situs rules (as did the previous US estate duty treaty.)

66.10 Immovable property

Article 6 USA IHT DTA provides:

(1) Immovable property (real property) may be taxed in the Contracting State in which such property is situated.

(2) The term “immovable property” shall be defined in accordance with the law of the Contracting State in which the property in question is situated, provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats, and aircraft shall not be regarded as immovable property.

(3) The provisions of paras (1) and (2) shall also apply to immovable property of an enterprise and to immovable property used for the performance of independent personal services.

This is what one would expect.

66.11 Business property

Article 7(1) USA IHT DTA provides:

Except for assets referred to in Article 6 (Immovable Property (Real

Property)) assets forming part of the business property of a permanent establishment of an enterprise may be taxed in the Contracting State in which the permanent establishment is situated.

I do not set out the lengthy provisions relating to permanent establishment here, since this will rarely arise.

66.12 Extension of IHT spouse exemption

Under domestic IHT law, the usual IHT spouse exemption is restricted when the transferor is UK domiciled and the spouse is foreign domiciled. Article 8 restricts this restriction. There are separate provisions for absolute transfers and for transfers to a trust under which the spouse has an IP. There is no relief for the situation where H has an interest in possession and on H's death W acquires an interest in possession (where the IHT spouse exemption is sometimes available under s.49D IHTA 1984).

66.12.1 Relief for absolute inter-spouse transfers

Article 8(3) USA IHT DTA provides:

Property which passes to the spouse from a decedent or transferor who was domiciled in or a national of the US and which may be taxed in the UK shall, where

- (a) the transferor's spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
- (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention, be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

In order for this to be needed and to apply the following conditions must be satisfied:

The transferor is:

- (a) Treaty-domiciled in the US or a US national.
- (b) UK law domiciled or deemed UK domiciled (or else the IHT spouse

exemption is not restricted under IHT domestic law).

The transferee (spouse) is:

- (a) not treaty-domiciled in the UK.-
- (b) not UK law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).

This relief applies on death and on lifetime transfers.

66.12.2 *Meaning of “spouse”*

For IHT purposes, the term “spouse” has its UK law meaning.⁷ Strictly a civil partner is not a spouse; and a person who has entered into a same-sex marriage in a county which allows same-sex marriages is classified as a civil partner but is not a spouse.⁸ However, it is suggested that the word “spouse” in relation to IHT should here be construed loosely, to include civil partners.

66.12.3 *Transfer to settlement under which spouse has IP*

Article 8(4) USA IHT DTA provides:

- (a) Property which on the death of a decedent domiciled in the UK became comprised in a settlement shall, if the personal representatives and the trustees of every settlement in which the decedent had an interest in possession immediately before death so elect and subject to sub-para (b), be exempt from tax in the UK to the extent of 50 per cent of the value transferred (calculated as in para (3)) on the death of the decedent if:
 - (i) under the settlement, the spouse of the decedent was entitled to an immediate interest in possession,
 - (ii) the spouse was domiciled in or a national of the US,
 - (iii) the transfer would have been wholly exempt had the spouse been domiciled in the UK, and
 - (iv) a greater exemption for transfers between spouses would not

⁷ See 66.4.3 (Undefined terms).

A person who has entered into a same-sex marriage may be regarded as a spouse for US tax purposes, depending on the relevant state law; see *Windsor v US* www.nysd.uscourts.gov/cases/show.php?db=special&id=185 but that is not relevant.

⁸ Dicey, Morris & Collins *Conflict of Laws* 14th ed, para 18-088; see App. 1.2 Meaning of "spouse"

have been given under the law of the UK apart from this Convention.

- (b) Where the spouse of the decedent becomes absolutely and indefeasibly entitled to any of the settled property at any time after the decedent's death, the election shall, as regards that property, be deemed never to have been made and tax shall be payable as if on the death such property had been given to the spouse absolutely and indefeasibly.

In order for this to be needed and to apply the following conditions must be satisfied:

The transferor is:

- (a) Treaty-domiciled in the UK.
- (b) UK law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

The transferee (spouse) is:

- (a) treaty-domiciled in the US or a national of the US.
- (b) not UK law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

In addition:

- (1) An election is required.
- (2) The spouse must be entitled to an immediate IP (this probably rules out relying on s.144 IHTA (discretionary will trusts)).
- (3) This relief only applies on the death of the transferor.

66.13 Non-discrimination

Article 10(1)(a) USA IHT DTA provides:

Subject to the provisions of sub-para (b), nationals of a Contracting State shall not be subjected in the other State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances are or may be subjected.

This would extend IHT Agricultural property relief to US agricultural property, which could be relevant to companies holding agricultural land but the point will not often arise.

Article 10 continues:

(2) The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other State than the taxation levied on enterprises of that other State carrying on the same activities.

(3) Nothing contained in this Article shall be construed as obliging either Contracting State to grant to individuals not domiciled in that Contracting State any personal allowances, reliefs and reductions for taxation purposes which are granted to individuals so domiciled.

(4) Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected.

(5) The provisions of this Article shall apply to taxes which are the subject of this Convention.

66.14 Other articles

The following articles of the USA IHT DTA are not discussed here:

Article 11: mutual agreement procedure.

Article 12: exchange of information.

Article 13: diplomatic and consular officials.

Article 14: entry into force.

Article 15: termination.

CHAPTER SIXTY SEVEN

IHT DTA: SWITZERLAND

67.1 Swiss IHT treaty – Introduction

This chapter considers the Swiss IHT Treaty¹ found in S.I. 1994 No 3214.

For some reason DTAs do not have short titles. I use the expression “**Swiss IHT DTA**” (or, for short, just DTA) to refer to the DTA called “the Convention between the United Kingdom of Great Britain and Northern Ireland and the Swiss Federation for the avoidance of double taxation with respect to taxes on estates and inheritances”.

I comment only on the UK (IHT) aspects of the treaty. Separate Swiss advice will be needed in any case where the treaty applies.

For the interaction of the DTA and transferable nil rate bands, see 65.7 (Transferable nil rate bands and IHT DT reliefs). For claims and disclosure issues see 65.8 (Claims for treaty IHT exemption) and 68.9 (Claims for foreign IHT credit relief).

67.2 Scope

Article 1 Swiss IHT DTA provides:

This Convention shall apply:

- (a) to estates and inheritances where the deceased was domiciled, at the time of his death, in one or both of the Contracting States; and
- (b) to property comprised in a settlement made by a person who was domiciled, at the time the settlement was made, in one or both of the Contracting States.

1 Accessible on <http://www.legislation.gov.uk/ukSI/1994/3214/schedule/made>

67.3 Taxes covered

Article 2(1) Swiss IHT DTA provides:

- (1) The existing taxes to which this Convention shall apply are:
 - (a) in the UK, the inheritance tax, insofar as it applies to the estate of a deceased person (hereinafter referred to as “UK tax”);
 - (b) in Switzerland, the cantonal and communal taxes imposed on estates and inheritances (hereinafter referred to as “Swiss tax”).

Thus there is no relief for IHT on lifetime gifts or for 10 year and exit charges on trusts. There is relief for trusts conferring an estate interest in possession.

67.4 Definitions

The DTA provides commonsense definitions of the following terms, which are not set out here: UK; Switzerland; Contracting State; Enterprise; Competent Authority; tax.

67.4.1 “National”

Article 3(g) Swiss IHT DTA provides:

- (g) the term “national” means:
 - (i) in relation to the UK, any British citizen or any British subject not possessing the citizenship of any other Commonwealth country or territory, provided he has the right of abode in the UK and any legal person, partnership, association or other entity deriving its status as such from the law in force in the UK;
 - (ii) in relation to Switzerland, any Swiss citizen and any legal person, partnership, association or other entity deriving its status as such from the law in force in Switzerland;

67.4.2 Undefined terms

Article 3(2) Swiss IHT DTA provides:

As regards the application of the Convention by a Contracting State, any

term not defined therein shall, unless the context otherwise requires, have the meaning which it has under the law of that State concerning the taxes to which the Convention applies.

67.5 Treaty-domicile

The definition of treaty-domicile is non-standard. Article 4(1) Swiss IHT DTA provides:

For the purposes of this Convention, a deceased person was domiciled:

- (a) in the UK if he was domiciled in the UK in accordance with the law of the UK or is treated as so domiciled for the purposes of a tax which is the subject of the Convention;

That applies to a person who is UK law domiciled and one who is deemed UK domiciled. The treaty continues:

For the purposes of this Convention, a deceased person was domiciled:

- (b) in Switzerland if he was domiciled or was resident in Switzerland in accordance with the law of Switzerland or if he was a Swiss national and Swiss civil law requires his succession to be ruled in Switzerland.

I assume this means:

For the purposes of this Convention, a deceased person was domiciled:

- (b) in Switzerland if
 - [i] he was domiciled *in Switzerland in accordance with the law of Switzerland* or
 - [ii] was resident in Switzerland in accordance with the law of Switzerland or
 - [iii] if he was a Swiss national and Swiss civil law requires his succession to be ruled in Switzerland.

That is, the words “and Swiss civil law requires his succession to be ruled in Switzerland” govern only [iii].

The treaty adds:

However, a deceased person shall be deemed not to be domiciled in one of the States if that State imposes tax only by reference to property situated in that State.

I do not see how this could apply, but it does not matter.

The definition of domiciled/resident in Switzerland in accordance with the law of Switzerland is crucial: this is a matter of Swiss law. The 1993 Protocol clarifies which Swiss law applies.²

Next come a series of tie-breakers to deal with persons who under (1) would be domiciled in both jurisdictions:

(2) Where by reason of the provisions of paragraph (1) of this Article a deceased person was domiciled in both States, then, subject to the provisions of the attached Protocol, his status shall be determined as follows:

- (a) he shall be deemed to have been domiciled in the State in which he had a permanent home available to him; if he had a permanent home available to him in both States, he shall be deemed to have been domiciled in the State with which his personal and economic relations were closer (centre of vital interests);
- (b) if the State in which he had his centre of vital interests cannot be determined, or if he did not have a permanent home available to him in either State, he shall be deemed to have been domiciled in the State in which he had an habitual abode;
- (c) if he had an habitual abode in both States or in neither of them, he shall be deemed to have been domiciled in the State of which he was a national;
- (d) if he was a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This is standard OECD Model wording: see 5.8 (Tie-breaker tests for individuals).

The 1993 Protocol provides:

(1) With reference to Article 4:

An individual who was a national of one of the Contracting States without being a national of the other Contracting State and who was domiciled in the State of which he was a national immediately before coming to the other State shall not be domiciled in the other State for the

2 It provides: "The reference to Swiss civil law concerns chapter 6 of the loi fédérale sur le droit international privé of 18th December 1987."

purposes of this Convention if:

- (a) he was temporarily present in that other State by reason only of his employment or was a spouse or other dependent of a person temporarily in that other State for such purpose; and
- (b) that individual had retained the domicile of the State of which he was a national; and
- (c) that individual had no intention of becoming a permanent resident of the other Contracting State.

This could help a Swiss national who is a long term employee in the UK as it could confer better treaty relief even after they become deemed UK domiciled, but that will not often arise. It could similarly hinder a UK national who is an employee in Switzerland as it could prevent them claiming relief.

67.5.1 *Types of domicile*

When dealing with treaties it is always necessary to distinguish between three different concepts of domicile:

- (1) domicile in the domestic English law sense (“**UK law domicile**”);
- (2) deemed UK domicile for IHT (“**deemed UK domicile**”);
- (3) domicile for the purposes of the treaty (“**treaty-domicile**”).

The Swiss IHT DTA is unusual as it distinguishes between persons:

- (1) domiciled in UK/Switzerland under paragraph (1) of Article 4 “solely in one of the Contracting States” whom I call “**solely UK/Swiss domiciled**”. Someone who is “solely Swiss domiciled” cannot be UK law domiciled or deemed UK domiciled for IHT purposes.
- (2) domiciled in UK/Switzerland under paragraph (2) of Article 4 whom I call “**tiebreaker UK/Swiss domiciled**”. Someone who is tiebreaker Swiss domiciled is UK law domiciled or deemed UK domiciled but treaty-domiciled in Switzerland because of the tiebreaker clause in the treaty.

67.6 IHT exemption

There are special rules for immovable property and permanent establishments (articles 5 and 6 discussed below) and ships and aircraft (article 7 not discussed here.)

Subject to that, Article 8 Swiss IHT DTA provides various exemptions

for individuals.

67.6.1 *UK situate property of solely Swiss domiciliary*

Article 8(1) provides:

- (1) Subject to the following provisions of this Convention:
 - (a) property not dealt with in Articles 5, 6 and 7 which is situated in either Contracting State and forms part of the estate of a person:
 - (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States shall, subject to paragraph (2) of this Article, be taxable only in that latter Contracting State;

Thus UK situate property of a solely Swiss domiciliary qualifies for treaty exemption on death even though not of course excluded property. To this rule there are four exceptions. Firstly property covered by articles 5, 6, 7 (land, PEs ships and aircraft). Secondly, shares in UK incorporated companies, as article 8(2) provides:

Shares in a company incorporated in the UK which form part of the estate of a person domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in Switzerland at the time of his death may also be taxed in the UK.

There is not much left for this treaty exemption to apply to, though it could be relevant (eg to UK situate debentures). From a planning point of view it is not generally important since it is usually possible for a solely Swiss domiciliary to avoid IHT by avoiding UK situate property but it could be useful for, say, UK situate chattels.

67.6.2 *Swiss situate property of tiebreaker Swiss domiciliary*

Article 8(1) provides:

- (1) Subject to the following provisions of this Convention:
 - (a) property not dealt with in Articles 5, 6 and 7 which is situated in either Contracting State and forms part of the estate of a person
 - ...

- (ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States shall, subject to paragraph (3) of this Article, be taxable only in the Contracting State in which it is situated;

Thus in principle Swiss situate property of a tiebreaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is UK law domiciled or deemed domiciled for IHT purposes). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: property covered by articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(3) provides:

Any property which is situated in Switzerland and which would be taxable only in Switzerland under paragraph (1)(a)(ii) of this Article may also be taxed in the UK if the deceased was:

- (a) by virtue of the provisions of paragraph (2) of Article 4 domiciled in the UK at the time of his death; or
- (b) by virtue of those provisions domiciled in Switzerland at the time of his death but:
 - (i) had been domiciled [ie treaty-domiciled] in the UK at any time within the five years preceding his death; and
 - (ii) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national³ cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is UK law domiciled or deemed domiciled could in principle do so.

67.6.3 *Property outside UK and Switzerland*

I refer to property outside the UK and Switzerland as “**third country property.**”

Article 8(1)(b) provides

- (1) Subject to the following provisions of this Convention:

3 Unless also a Swiss national, ie a dual national.

- (b) property not dealt with in Articles 5, 6 and 7 which is not situated in either Contracting State and forms part of the estate of a person:
 - (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States shall be taxable only in that Contracting State;
 - (ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States shall, subject to paragraph (4) of this Article, be taxable only in the Contracting State in which, under paragraph (2) of Article 4, the deceased was domiciled at the time of his death.

Art.8(1)(b)(i) is not relevant for IHT since non UK situate property of a solely Swiss domiciliary is excluded property in any event. However art.8(1)(b)(ii) is important.

However in principle third country property of a tiebreaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is UK law domiciled or deemed domiciled for IHT purposes). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: property covered by articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(4) provides a rule equivalent to article 8(3):

- (4) Any property which is not situated in either Contracting State and which would be taxable only in Switzerland under paragraph (1)(b)(ii) of this Article may also be taxed in the UK if the deceased:
 - (a) had been domiciled in the UK at any time within the five years preceding his death; and
 - (b) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national⁴ cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is UK law domiciled or deemed domiciled could in principle do so.

4 Unless also a Swiss national, ie a dual national.

67.6.4 *Situs rule*

The 1993 Protocol provides:

(3) With reference to Article 8:

The situs of any property dealt with in that Article shall be determined by the law of the UK in effect at the date of entry into force of this Convention.

67.7 Extension of IHT spouse exemption

Under domestic IHT law, the usual IHT spouse exemption is restricted when the transferor is UK domiciled and the spouse is foreign domiciled. Article 10(2) restricts this restriction:

(2) Property which passes to the spouse from a deceased person who was domiciled in or a national of Switzerland and which may be taxed in the UK shall, where:

- (a) the spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
- (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention,

be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

Civil partners are not mentioned (as the treaty was made before the introduction of civil partnerships). One might construe spouse widely to include “civil partner” particularly if Swiss tax law treats civil partners like spouses.

67.8 Immovable property

Article 5 Swiss IHT DTA provides:

(1) Immovable property which forms part of the estate of a person domiciled in a Contracting State and which is situated in the other Contracting State may be taxed in that other State.

(2) The term “immovable property” shall have the meaning which it has under the law of the Contracting State in which the property in question is situated provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, an interest in the proceeds of sale of land which is held on trust for sale, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships and aircraft shall not be regarded as immovable property.

(3) The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of professional services or other activities of an independent character.

This is fairly standard form.

67.9 Business property

Article 6(1) USA IHT DTA provides:

(1) Except for assets referred to in Articles 5 and 7 and in paragraph (2) of Article 8, movable property of an enterprise which forms part of the estate of a person domiciled in a Contracting State which is the business property of a permanent establishment situated in the other Contracting State, may be taxed in that other State.

This is standard form. I do not set out the lengthy provisions relating to permanent establishment here, since this will rarely arise.

67.10 Other articles

The following articles of the Swiss IHT DTA are standard forms and not discussed here:

Article 11: non-discrimination

Article 12: mutual agreement procedure.

Article 13: exchange of information.

Article 14: diplomatic and consular officials.

Article 15: entry into force.

Article 16: termination.

CHAPTER SIXTY EIGHT

FOREIGN IHT CREDIT RELIEF

68.1 Foreign IHT credit – Introduction

“**Foreign IHT credit relief**” arises where foreign tax is set against UK IHT. This may be “**DTA IHT credit**” where a DTA confers a credit or “**Unilateral IHT credit**” where UK tax law (not a DTA) confers a credit.

In this chapter I first consider unilateral IHT credit and then five IHT DTAs: the four pre-CTT DTAs and the USA IHT DTA.

For the interaction of unilateral relief and transferable nil rate bands, see 65.7 (Transferable nil rate bands and IHT DT reliefs). For deduction for foreign IHT (as opposed to credit) see 61.12 (Deduction for foreign taxes). For interaction with concession for UK situate property, see 61.12.3 (Foreign tax on UK situate shares).

68.2 Unilateral IHT credit

Unilateral IHT credit is important as the UK does not have many IHT DTAs. Section 159(1) IHTA provides:

Where the Board are satisfied that in any territory outside the UK (an “overseas territory”) any amount of tax imposed by reason of any disposition or other event is attributable to the value of any property, then, if—

- (a) that tax is of a character similar to that of capital transfer tax or is chargeable on or by reference to death or gifts inter vivos, and
- (b) any capital transfer tax chargeable by reference to the same disposition or other event is also attributable to the value of that property,

they shall allow a credit in respect of that amount (“the overseas tax”) against that capital transfer tax in accordance with the following provisions.

Statute calls this “unilateral relief” but I prefer the term “**unilateral foreign IHT credit**” (or foreign IHT credit relief) which seems clearer. I refer to the foreign tax (which statute calls “the overseas tax” as “**foreign IHT**”.

Unilateral relief is based on the international understanding that the state where an asset is located has the primary right of taxation and the state whose claim to tax depends on a personal nexus (residence or, as in the UK, domicile) should provide unilateral relief for double taxation.

The IHT Manual provides:

27185 Introduction [January 2008]

... Under Section 159 IHTA 1984, credit can be allowed not only on death but also in respect of lifetime dispositions where some type of gift tax is charged in the foreign country. The basic conditions to be satisfied in connection with a lifetime or death transfer are that both Inheritance Tax and overseas tax must be chargeable by reference to the same event and attributable to the value of the same property, and that the foreign tax is similar in character to IHT. In cases of doubt, you must take advice from TG.

68.3 Requirement to pay foreign IHT

The requirement that the foreign IHT must actually be paid is slipped into the definition of “tax imposed”. Section 159(6) IHTA provides:

In this section references to tax imposed in an overseas territory are references to tax chargeable under the law of that territory and paid by the person liable to pay it.

The IHT Manual provides:

27185. Introduction [January 2008]

... Before relief can be finalised, the taxpayer must produce evidence of payment of the foreign tax in the form of the assessment of foreign tax (or other document showing details of the property charged) and the official receipt.

Once you decide on the amount of relief available this should be entered in the ‘reliefs against tax’ box in the appropriate ‘raising an assessment’ COMPASS screen. If necessary, the relief must be apportioned between the instalment and non-instalment option property assessments. (See IHTM31189)

68.4 Use of foreign IHT credit

Credit is only set against “that capital transfer tax” ie tax attributable to the value of the same property as is subject to the foreign IHT.

The IHT Manual provides:

27185. Introduction [January 2008]

... The relief cannot exceed the amount of Inheritance Tax charged with respect to the particular item of property.

No IHT can be treated as imposed on property comprised in a transfer, which by some provision is made wholly exempt from the tax. Where a transfer is partly exempt, any tax charged will be attributed to the chargeable part of the transfer of value. Thus any wholly exempt property cannot be regarded as taxed in both countries and any credit will be restricted accordingly.

Where Quick Succession Relief (IHTM22041) is allowed, the amount of IHT attributable to the property is the net amount after allowing the relief.

68.5 Amount of credit

The rules determining the amount of IHT credit differ depending on

- (1) situs of property under UK law and
- (2) situs of property under the foreign law.

The IHT Manual provides:

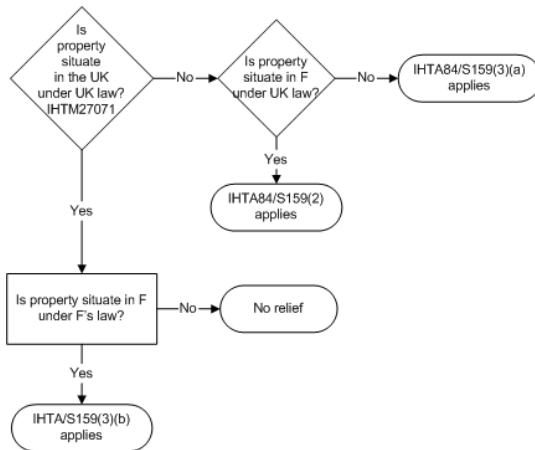

27185. Introduction [January 2008]

... Because of the terms of Section 159(2), (3) and (4) IHTA 1984 it is necessary to consider the situs (IHTM27071) of property according to UK law and, possibly, according to a foreign law when allowing a credit for foreign tax. You must raise any questions necessary to establish the situs as soon as it seems likely that a Section 159 IHTA 1984 credit will be claimed. ...

The amount of the credit allowed under Section 159 IHTA 1984 is the Sterling equivalent of the foreign tax paid (converted using the exchange rate on the date of payment) so far as that tax is attributable to the foreign property on which IHT has been paid. Any part of the sum paid to the foreign Revenue authorities representing interest or penalties should be excluded, as should any part of the foreign tax that is attributable to income accruing since the date of the transfer. ... SAV

(Foreign) will provide the exchange rate required...

27186 Procedure chart [January 2008]

The reader is invited to consider whether flow charts like these are helpful.

68.5.1 *Situs in overseas territory*

Section 159(2) IHTA provides:

Where the property is situated in the overseas territory and not in the UK, the credit shall be of an amount equal to the overseas tax.

The IHT Manual provides:

27187. Relief under Section 159(2) IHTA 1984 [January 2010]

Where the property concerned is situate (under UK law) in the foreign country, relief is due under Section 159(2) IHTA 1984 and the credit due is equal to the foreign tax paid.

In practice, the credit cannot exceed the IHT attributable to the property concerned.

More accurately, the *credit* (as defined) can exceed the IHT attributable to the property, but this credit is only set against the IHT attributable to the property, so the amount of the relief is the lesser of the credit and that IHT. The IHT Manual goes on to give an example:

Example

B died in September 2002, leaving an apartment in Spain valued at £50,000. B's total estate amounts to £300,000 (there were no lifetime gifts), with total IHT payable of £20,000.

The Spanish authorities charge tax equivalent to Sterling £4,000 on the apartment on B's death.

The IHT payable on the apartment is:

$$£50,000 \times (£20,000/£300,000) = £3,333.33$$

Accordingly, the double taxation credit due under Section 159(2) IHTA 1984 is restricted to £3,333.33.

The effect of the credit is that the total tax paid is the higher of the UK and the foreign IHT rates.

68.5.2 *Situs in third country or dual situate property*

Section 159(3) IHTA provides:

Where the property—

(a) is situated neither in the UK nor in the overseas territory, or

(b) is situated both in the UK and in the overseas territory,

the credit shall be of an amount calculated in accordance with the following formula—

$$\frac{A}{A + B} \times C$$

where

A is the amount of the capital transfer tax,

B is the overseas tax and

C is whichever of A and B is the smaller.

The IHT Manual provides:

27188. Relief under Section 159(3) and Section 159(4) IHTA 1984

[October 2008]

Relief is due under Section 159(3) IHTA 1984 where the UK and another foreign country tax the same property and that property is situate:

- neither in the UK nor in the foreign country, or
- both in the UK and in the foreign country.

Where relief is due under Section 159(3) IHTA 1984, it is given on a split credit basis and will be less than the foreign tax paid. [The Manual sets out the formula in s.159(3) and continues:]

Example 1

Country X and the UK tax an item of property which is situate neither in Country X or UK.

Country X charges tax of £40

UK charges IHT of £60

The credit is: $60/(60 + 40) \times (40) = £24$

HMRC IHT Customer Guide gives two examples of unilateral relief calculations:¹

Example 1

Ann is domiciled in Ruritania, but is also treated as domiciled in the UK. She makes a gift of property situated in Utopia.

Item	Amount
UK inheritance tax (A)	£3,000
Ruritanian inheritance tax (B)	£1,000
C is the smaller of A and B	£1,000
Credit against UK IHT is $£3,000 / (£3,000 + £1,000) \times £1,000 = £750$	
Net UK tax	£2,250

Example 2

Tom is domiciled in Utopia but holds shares in a Ruritanian company, which maintains a duplicate share register in the UK. Under UK law we regard the shares as situated in the UK, but Ruritanian law regards them as situated in Ruritania. Tom dies (but his estate is not liable to Utopian tax).

Item	Amount
UK inheritance tax (A)	£1,000
Ruritanian inheritance tax (B)	£4,000
C is the smaller of A and B	£1,000
Credit against UK IHT is $£1,000 / (£1,000 + £4,000) \times £1,000 = £200$	
Net UK tax	£800

This may not be fully adequate to eliminate double taxation. Where an IHT DTA applies a more generous form of credit may apply.

¹ www.hmrc.gov.uk/cto/customerguide/page20.htm#15.

68.5.3 *Property taxed in more than one overseas territory*

Section 159(4) IHTA provides:

Where tax is imposed in two or more overseas territories in respect of property which—

- (a) is situated neither in the UK nor in any of those territories, or
 - (b) is situated both in the UK and in each of those territories,
- subsection (3) above shall apply as if, in the formula there set out,

B were the aggregate of the overseas tax imposed in each of those territories and

C were the aggregate of all, except the largest, of A and the overseas tax imposed in each of them. ...

The IHT Manual provides an example:

27188 Relief under Section 159(3) IHTA 1984 and Section 159(4) [October 2008]

Example 2

Each of Country X, Country Y and the UK tax an item of property which is not situate in Country X, Country Y nor the UK.

Country X charges £40

Country Y charges £20

UK charges IHT of £60

The credit is $60/(60+40+20) \times (40 + 20) = £30$

68.5.4 *Interaction of s.159(2)(3)*

Section 159(5) IHTA deals with the interaction of the two reliefs:

Where credit is allowed under subsection (2) above or section 158 above in respect of overseas tax imposed in one overseas territory, any credit under subsection (3) above in respect of overseas tax imposed in another shall be calculated as if the capital transfer tax were reduced by the credit allowed under subsection (2) or section 158; and where, in the case of any overseas territory mentioned in subsection (3) or (4) above, credit is allowed against the overseas tax for tax charged in a territory in which the property is situated, the overseas tax shall be treated for the purposes of those provisions as reduced by the credit.

The IHT Manual provides:

27188 Relief under Section 159(3) IHTA 1984 and Section 159(4) [October 2008]

... If relief is due under Section 159(3)(a) IHTA 1984 or Section 159(4)(a) IHTA 1984, Section 159(5) IHTA 1984 must be considered when calculating the foreign tax paid (B in the formulas above). If the foreign country has allowed a credit against its tax for tax paid in another foreign country, please refer to TG.

Where relief is due under Section 159(3)(b) IHTA 1984 or Section 159(4)(b) IHTA 1984, above, the foreign tax at B is simply the gross amount paid – no account need be taken of any credit for tax paid in another country.

27189. Procedure when both Section 159(2) and Section 159(3) IHTA 1984 apply [February 2006]

It may happen that relief is due under both Section 159(2) IHTA 1984 – or convention relief under Section 158 IHTA 1984 – and under Section 159(3) IHTA 1984.

If this is the case, Section 159(5) states that the credit allowed under Section 159(3) must be calculated on the basis that A in the formula (the Inheritance Tax paid) is the net amount of Inheritance Tax after allowing the credit under Section 158 or Section 159(2)

...

68.5.5 *Interaction of unilateral IHT credit relief and DTA credit relief*

Section 159(7) IHTA provides:

Where relief can be given both under this section and under section 158 above [double tax treaties], relief shall be given under whichever section provides the greater relief.

The IHT Manual provides:

27200. Procedure when both forms of relief apply [January 2008]

Unilateral relief and relief under a DTC are **not** mutually exclusive. Where both reliefs are prima facie due with reference to the same item of property, relief is restricted by Section 159(7) IHTA 1984 to whichever is the greater. In practice, where the amount of credit is the same under either basis, the credit should be treated as Convention relief. In cases where, either;

(a) both reliefs are due, but the unilateral relief appears the greater or
 (b) the interaction of the two reliefs gives rise to undue difficulty
 you must refer the case to TG (IHTM01081). In Scotland, your Team
 Leader should be consulted in cases of difficulty.

Unilateral relief may be given for a State tax in addition to unilateral or Convention relief in respect of tax levied by the country of which the State forms part.

Example

Deceased, a British citizen, dies domiciled in the UK. His estate includes an apartment in New York, stocks and shares in US Companies and a New York bank account.

The world-wide estate will be subject to UK tax, but US Federal Estate Tax will (because of the terms of the DTC) be payable only on the immovable property in the USA. The UK will give credit for the US tax under the DTC.

NY State will also charge State Estate Tax on the movable assets situate there and the UK will give unilateral relief for this tax.

But the total unilateral and convention credit cannot exceed the amount of UK IHT payable on the property concerned.

68.5.6 *Concession for Canada Estate Duty?*

The IHT Manual provides:

27186 Procedure Chart [January 2008]

Relief should be given under Section 159(2) IHTA 1984 rather than Section 159(3)(a) where tax is paid, under an agreement between the provinces concerned, in Quebec or Ontario on shares which by UK law are situate in the other province. This applies also to a similar arrangement between Quebec and British Columbia.

Canada abolished estate duty in 1972. This passage is therefore 40 years out of date! For the current Canadian position, see 61.12.2 (Canadian income tax liabilities deducted for IHT). However it illustrates an approach which may perhaps be applied to federal estate duties in other federal jurisdictions, if there are any.

68.6 Planning

The rule is in short that the relief is the lesser of (1) foreign IHT and (2) UK IHT attributable to the same property. This requires careful planning

to maximise the benefit of the relief.

Suppose T owns land in country X which on T's death will bear IHT in country X. If T makes a chargeable gift of the land (eg a gift by will to T's children) then the foreign IHT credit is available. If T makes an exempt gift (eg to T's spouse or to charity) the foreign IHT credit is lost. Foreign jurisdictions do not normally allow death duty exemption on the grounds that a gift is made to a UK charity. (In some cases EU member states may allow relief.) For instance, suppose T wishes to make a will giving foreign property to a UK charity. The gift may bear foreign death duties which are set against UK IHT so the effective IHT burden is reduced or eliminated.² It would be better:

- (1) to give the foreign property to beneficiaries who are chargeable under UK law.
- (2) to give other (perhaps UK) property to the UK charity which would otherwise bear inheritance tax at the full rate.

In some cases the matter could be put right by a deed of variation.

68.7 DTA IHT credit: pre-CTT DTAs

Article VI of the UK/France IHT DTA provides:

Where one Contracting Party imposes duty on the death of a person who was domiciled in its territory at the time of his death on any property which, under the present Convention, is situated in the territory of the other Contracting Party, the former Party shall allow against so much of its duty, ascertained in accordance with its law, as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed by the other Contracting Party as is attributable to such property.

Similarly, art. VI of the UK/Italy IHT DTA provides:

(1) Where one Contracting Party imposes duty on any property which is not situated in its territory but is situated in the territory of the other Contracting Party, the former Party shall allow against so much of its duty (as otherwise computed) as is attributable to that property a credit

2 The position may be complicated further by foreign rules which make the rate of death duty depend on the relationship of the beneficiary to the deceased; forced heirship rules may also need to be considered.

(not exceeding the amount of the duty so attributable) equal to so much of the duty imposed in the territory of the other Contracting Party as is attributable to such property.

(2) For the purposes of this Article, the amount of the duty of a Contracting Party attributable to any property shall be ascertained after taking into account any credit, allowance or relief, or any remission or reduction of duty other than in respect of duty payable in the territory of the other Contracting Party

This does not add much to the unilateral IHT credit otherwise available under domestic law but it would be relevant for an asset which is UK situate under domestic situs rules but not UK situate under treaty situs rules.

India and Pakistan DTAs have similar articles but since these countries do not impose IHT, the articles have no effect.

68.8 USA DTA: Credit for foreign IHT

Article 9 USA IHT DTA provides:

(2) Where under this Convention the UK may impose tax with respect to any property other than property which the UK is entitled to tax in accordance with the said Article 6 or 7 (that is, where the decedent or transferor was domiciled in or a national of the UK), then, except in the cases to which para (3) applies, double taxation shall be avoided in the following manner:

- (a) Where the US imposes tax with respect to property in accordance with the said Article 6 or 7, the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.
- (b) Where the US imposes tax with respect to property not referred to in sub-para (a) and the decedent or transferor was a national of the UK and was domiciled in the US at the time of the death or transfer, the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.

(3) Where both Contracting States impose tax on the same event with respect to property which under the law of the US would be regarded as property held in a trust or trust equivalent and under the law of the UK would be regarded as property comprised in a settlement, double taxation shall be avoided in the following manner:

- (a) Where a Contracting State imposes tax with respect to property in accordance with the said Article 6 or 7, the other Contracting State shall credit against the tax calculated according to its law with respect to that

- property an amount equal to the tax paid in the first- mentioned Contracting State with respect to that property.
- (b) Where the US imposes tax with respect to property which is not taxable in accordance with the said Article 6 or 7 then
- (i) where the event giving rise to a liability to tax was a generation-skipping transfer and the deemed transferor was domiciled in the US at the time of that event,
 - (ii) where the event giving rise to a liability to tax was the exercise or lapse of a power of appointment and the holder of the power was domiciled in the US at the time of that event, or
 - (iii) where (i) or (ii) does not apply and the settlor or grantor was domiciled in the US at the time when the tax is imposed,
- the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property. ...
- (4) The credits allowed by a Contracting State according to the provisions of paras (1), (2) and (3) shall not take into account amounts of such taxes not levied by reason of a credit otherwise allowed by the other Contracting State. No credit shall be finally allowed under those paragraphs until the tax (reduced by any credit allowable with respect thereto) for which the credit is allowable has been paid. Any credit allowed under those paragraphs shall not, however, exceed the part of the tax paid in a Contracting State (as computed before the credit is given but reduced by any credit for other tax) which is attributable to the property with respect to which the credit is given.³

The IHT Manual provides:

27170. USA [January 2008]

Where a DT credit is due you may give a provisional allowance but the case must not be closed until the payment has been certified by the US authorities on Form 742.

You must send the taxpayer two prints of form 742 ask them to complete the forms and send them to the US authorities at the address given on the form. One of these copies is certified and returned to this office and the other is retained by the US authorities. The certified form must be checked and the appropriate credit allowed. If you have any difficulty applying the DTC or calculating the tax attributable to the property please seek advice from TG.

- The credit given cannot exceed the amount of tax payable in the UK on the property concerned.

Certification of IHT paid for the US authorities

The US form 706 CE is forwarded to this Office in duplicate for certification. After checking (it is important that the forms themselves should not be marked in any way) they and the file must be sent with a note of any error or omission

³ Art 9(5) deals with claims; see 68.9 (Claims for foreign IHT credit relief).

to TG. If the case is closed TG arranges for one copy to be certified and sent with a schedule of any necessary amendments to the US authorities; the other copy is filed. The taxpayer is informed that the certificate has been sent and is provided with a copy of any amending schedule.

Where a certificate of tax paid cannot be issued on application because the amount of tax has not been finalised and paid, an explanation must be given to the taxpayer together with a reminder that it is open to them to lodge a provisional claim for a credit with the US authorities (there is a time limit – Article 9). When the case is ready for certification the application is referred with the file to TG to issue the certificate.

If there is any adjustment of tax after a certificate has been issued the file must again be referred to TG for the issue of an amending certificate.

68.9 Claims for foreign IHT credit relief

There is no domestic law provision requiring a claim for unilateral IHT credit relief or for IHT DTA relief (unlike the position for IT and CGT where a claim is required by statute). However the treaties assume that a claim is to be made for a credit or a refund of tax and so by implication impose a claim requirement in these cases. The wording varies between treaties.

Article VII India IHT DTA provides:

1. Any claim for a credit or for a refund of duty founded on the provisions of the present Agreement shall be made within six years from the date of the death of the deceased person in respect of whose estate the claim is made, or, in the case of a reversionary interest where payment of duty is deferred until the date on which the interest falls into possession, within six years from that date.
2. Any such refund shall be made without payment of interest on the amount so refunded.

Article VII Pakistan IHT DTA is the same. Article VII France IHT DTA provides:

1. Any claim for a credit or for a refund of duty founded on the provisions of the present Convention shall be made within five years from the date of the death of the deceased person in respect of whose estate the claim is made, or, where the event causing duty to be payable occurs at some later date, within five years from that date.
2. Any such refund shall be made without payment of interest on the amount so refunded.

Article VII Italy IHT DTA is the same but lacks para 2.

Article 9(5) USA IHT DTA provides:

Any claim for a credit or for a refund of tax founded on the provisions of the present Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due. The competent authority may, in appropriate circumstances, extend this time where the final determination of the taxes which are the subject of the claim for credit is delayed.

CHAPTER SIXTY NINE

UK DOMICILIARY MARRIED TO FOREIGN DOMICILIARY

69.1 UK domiciliary married to foreign domiciliary – Introduction

This chapter considers the position of a UK domiciled individual who is married to a foreign domiciled spouse.¹ It is necessary to consider the various taxes separately.

69.1.1 *Cross references*

For IHT issues relating to joint bank accounts, see 71.3 (Joint accounts).

69.2 Restricted IHT spouse exemption for foreign domiciled spouse

Section 18(1) IHTA normally provides complete exemption for transfers between spouses.² Section 18(2) imposes an important exception:

If, immediately before the transfer, the transferor but not the transferor's spouse or civil partner is domiciled in the UK the value in respect of which the transfer is exempt (calculated as a value on which no tax is chargeable) shall not exceed £55,000 less any amount previously taken into account for the purposes of the exemption conferred by this section.

-
- 1 References to “spouse”, “marriage”, and “widow/er” include a civil partner, civil partnership and a surviving civil partner. See App 1.2 (Meaning of spouse) and App 1.3 (Meaning of “civil partner”).
 - 2 For the interaction of the IHT spouse exemption and excluded property rules, see 63.1 (IHT spouse exemption on death of a foreign domiciliary).

So where:

- (1) the transferor is UK domiciled (or deemed UK domiciled), and
 - (2) the transferee (the spouse of the transferor) is foreign domiciled
- the exemption is restricted to £55,000 only.³ While it is generally true that

3 The IHT manual provides:

11033. Spouse or civil partner domiciled outside UK [April 2012]

The exemption is limited to £55,000 where immediately before the transfer

- the transferor is domiciled (IHTM13031) in the United Kingdom, or is treated as so domiciled under Section 267 IHTA 1984, but
- the transferor's spouse or civil partner (IHTM11032) is neither domiciled nor treated as domiciled in the United Kingdom

The £55,000 limit does not apply if

- both the transferor and their spouse or civil partner are domiciled outside the UK, or
- the transferor is domiciled outside the UK but the spouse or civil partner is domiciled in the UK

The £55,000 limit applies to

- the value before grossing (IHTM26121)
- the cumulative total of all transfers to a spouse or spouses or civil partner domiciled outside the UK. So you should take into account the amounts allowed under earlier transfers in which the Section 18(2) IHTA 1984 limitation applied in considering whether the £55,000 is exceeded
- transfers on or after 9 March 1982. For transfers before that date the limit was lower, and you should refer to the Taxes Acts 1982 Edition held in the library

Where the £55,000 limit is exceeded, you should allocate the exemption in the way which is most favourable to the spouse or civil partner. Factors you should bear in mind include which assets bear the tax and whether business relief (IHTM25131), agricultural relief (IHTM24001) or any other reliefs are available.

Example 1

In 1998, Mr Allsop, who was domiciled in the UK transferred £200,000 to Mrs Allsop, who was not domiciled in the UK. Of this transfer, £55,000 is exempt under IHTA1984/Section 18(2), and £145,000 is a PET and assumed to be exempt. Mr Allsop dies in 2007 and leaves all his property to his wife, who remains domiciled outside the UK. Even though Mr Allsop has survived for 7 years after making the transfer, the limited exemption under IHTA1984/Section 18(2) has all been used and is not available on his death.

Example 2

In 1998 Mr Costa transfers a UK property worth £500,000 to Mrs Costa. Both are domiciled outside the UK. Exemption under IHTA1984/Section 18(1) is available in full. In 2006 Mr Costa is deemed to be domiciled in the UK and a year later gives £100,000 to his wife, who remains domiciled outside the UK. The limited exemption under IHTA1984/Section 18(2) is not then available because the amount of exemption already given under IHTA1984/Section 18 as a whole exceeds £55,000.

a foreign domicile is a passport to tax saving, this is one circumstance in which a foreign domicile is a serious drawback.

This restriction does not apply the other way round, where the foreign domiciled individual makes a transfer to their UK domiciled spouse. That makes sense because such a transfer brings assets which would have been outside the scope of IHT within its scope.

The restriction does not apply where both spouses are not domiciled in the UK.

The restriction is modified by the USA and the Swiss IHT DTAs.⁴

Transfers which do not qualify for the spouse exemption will be PETs unless some other exemption is in point.

One solution to this problem may be to wait until the foreign domiciled spouse becomes deemed UK domiciled.⁵

69.2.1 *EU law aspects*

Where the foreign domiciled spouse is domiciled in another member state, the discrimination is unlawful in EU law: it is a breach of free movement of capital.

The government justify the discrimination on the grounds of the “potential avoidance risk”.⁶ The application of the exemption would undoubtedly lead to a loss of UK IHT. (The loss of tax should not be called “avoidance” but nothing turns on that.) However the fund which fall outside the scope of UK IHT in principle fall within the scope of estate or gift taxes in the MS in which the spouse is resident. If the spouse enjoys some tax saving it is because the MS concerned does not impose the tax or not at the UK’s (comparatively) high rates. That does not justify the restriction on free movement of capital.⁷

69.2.2 *Interaction of £55,000 spouse exemption and other exemptions*

An inter-spouse gift within the £55,000 limit is *not* a PET. Section 3A(1A)(b) IHTA provides that a PET is a transfer of value “which, apart

⁴ See 66.12, 67.7 (Extension of IHT spouse exemption).

⁵ See 57.2 (Deemed UK domicile)

⁶ Public Bill Committee debate on Finance Bill, Hansard 13 May 2008 col.181.

⁷ See 56.8.6 (Counteracting tax advantages of non-residents); 56.14.1 (Discrimination against non-residents).

from this section, would be a chargeable transfer”.⁸ So if one spouse makes a gift to the other, that gift uses up the lifetime £55,000 limit even though the gift is made more than seven years from the death and would otherwise qualify as an exempt transfer, as a PET.

The position is different for a gift of excluded property.⁹ Such a gift is not a transfer of value at all and therefore it is not a transfer which qualifies for the spouse exemption and does not use up the £55,000 exemption.

The position is less clear for a transfer (outside s.11) which qualifies for the annual or normal expenditure exemptions. Such a transfer is an exempt transfer under those exemptions: does it also use up the £55,000 limit for inter-spouse gifts? There is no clear answer in the legislation but it is suggested that these transfers do not use up the £55,000 limit. That would seem to better fit the scheme of the legislation.

See 63.1 (IHT spouse exemption on death of a foreign domiciliary); 63.2 (Will drafting - general approach); and 59.9 (GWR spouse exemption).

69.2.3 *Position from 2013/14*

Budget 2012 provides:

2.79 [1] The Government intends to increase the IHT-exempt amount that a UK-domiciled individual can transfer to their non-UK domiciled spouse or civil partner.

[2] The Government similarly intends to allow individuals who are domiciled outside the UK and who have a UK-domiciled spouse or civil partner to elect to be treated as domiciled in the UK for the purposes of IHT.

These proposals will be subject to a technical consultation.

Proposal [2] should make the law EU law compliant. It will be interesting to see what will emerge.

8 Transfers before 22 March 2006 are governed by s.3A(1) IHTA but the wording on this point is the same.

9 Likewise a gift within s.11 IHTA; see 69.4 (Disposition for maintenance of spouse and other exemptions).

69.3 Spouse or widow of settlor becomes entitled to settled property

The termination of an estate interest in possession (during the life of the life tenant) is a transfer of value under s.52 IHTA. Section 53(4) IHTA provides:

Tax shall not be chargeable under s.52 above if on the occasion when the interest comes to an end—

- (a) the settlor's spouse or civil partner, or
- (b) where the settlor has died less than two years earlier, the settlor's widow or widower or surviving civil partner, becomes beneficially entitled to the settled property and is domiciled in the UK.¹⁰

This relief only applies if the spouse is UK domiciled. The restriction on s.53(4) relief is broadly consistent with the restriction to the spouse exemption considered above (and indeed this or something similar is necessary to prevent avoidance of the restriction on s.18 relief).

Section 54(2) IHTA sets out similar rules for the termination of an estate interest in possession on the death of the life tenant.

69.4 Disposition for maintenance of spouse and other exemptions

Where the IHT spouse exemption does not apply, another exemption may sometimes fill the gap. An inter-spouse gift may qualify for relief under s.11(1) IHTA:

- A disposition is not a transfer of value if it is made by one party to a marriage¹¹ or civil partnership in favour of the other party ... and is—
- (a) for the maintenance of the other party ...¹²

This should normally¹³ apply, in particular, to the common case where an

10 Section 53 goes on to set out some exceptions not discussed here.

11 "Marriage" is defined to include a former marriage in certain cases: s.11(6) IHTA.

12 I mention for completeness the further relief in s.11(3) which overlaps with s.11(1). In practice an inter-spouse gift which qualifies under s.11(3) will also qualify under s.11(1).

13 It would be different if the purpose of the gift was not to provide for the spouse but some other purpose, such as IHT planning.

individual gives a half share in the family home to their spouse. The most basic requirement of “maintenance” is to have a secure roof over one’s head.¹⁴ In *Phizackerley v IRC*¹⁵ the Special Commissioners correctly stated that the normal reason for such a gift is to give the donee spouse security in her own home. Unfortunately he concluded that it was not “for the maintenance” of the other party, it was to give the other party security. With respect, this can hardly be right, because “security” and “maintenance” are not alternatives. It is because the gift gives the spouse security that it is for her maintenance. But it will now be necessary to appeal to the High Court to establish this point.

A gift which is within s.11 IHTA (Disposition for family maintenance) is outside the scope of the GWR rules. For such a disposition is not a transfer of value; so it is deemed not to reduce the transferor’s estate: s.3 IHTA. So by implication it must be treated as not being a “disposal by way of gift”. (Any other conclusion would lead to absurd results. For a disposition between spouses within s.11 is not a transfer of value, and so not within the IHT spouse exemption, and so would come within the GWR rules even if both spouses were UK domiciled.)¹⁶

The normal expenditure exemption (s.21 IHTA) may also be in point. Gifts which qualify for this exemption are still within the reservation of benefit rule.

69.5 Transferable nil-rate band

The IHT Manual provides:

43042 Domicile of first spouse or civil partner to die [October 2009]

Every person, UK domiciled or not, is entitled to the full nil rate band that can be set against their estate that is subject to IHT.

14 Lump sum payments can constitute “maintenance”. Contrast s.2(1)(b) Inheritance (Provision for Family and Dependants) Act 1975 (formerly s.1(4) Inheritance (Family Provision) Act 1938) which states that lump sum payments may constitute “maintenance” for the purpose of the Act. This is also assumed in Sch 15 para 10(1)(d) FA 2004 (which takes gifts within s.11 out of the pre-owned assets rules).

15 [2007] STC (SCD) 328.

16 If my view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR, because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

The availability of TRNB on the estate of the first to die of a non domiciled spouse or civil partner is calculated only by reference to property that is potentially subject to an UK IHT charge. For a non domiciled spouse or civil partner, **VT** [IHTM43020] will be calculated only by reference to their estate in the UK. Assets held outside the UK, by a person not domiciled, or deemed domiciled in the UK, regardless of the devolution of those assets are not taken into account when calculating the available unused nil rate band.

Thus where the survivor dies in the UK and their spouse or civil partner, who held no UK assets, died abroad leaving all their all overseas assets to their children, none of the nil rate band was used on the first death and the personal representatives of the survivor may claim to transfer 100% of the nil rate band to the estate of the survivor.

*Example*¹⁷

Abdul [died] domiciled abroad. His only asset situated in the UK was a US dollar account containing US\$250,000. He left this and the remainder of his estate to his son, Jamil who lives in the UK.¹⁸ After the death, his wife, Soroya, moved to the UK to live with Jamil and died domiciled in the UK.¹⁹

The assets situated outside the UK are not liable to IHT. The US dollar account is left out of account [IHTM04380] in determining Abdul's estate at death. So although whole estate passed to Jamil, no property was chargeable to IHT, leaving the nil rate available for transfer in full on Soroya's death..

IHTM43043 - Domicile: calculation where the domicile of the survivor at the first death is outside the UK [October 2009]

On the death of the first spouse or civil partner, exemption for assets passing to the surviving spouse or civil partner may be limited to £55,000 in accordance with s8(2) IHTA if the surviving spouse or civil partner was not domiciled or deemed domiciled in the UK. [IHTM11033]

If the entire estate passed to the surviving spouse or civil partner, anything over £55,000 is a chargeable legacy. Where the net estate is above the nil rate band plus £55,000 there will be no nil rate band to transfer, as illustrated below.

Example

Susan died in 2002/03. She left an estate worth £450,000 all to her husband Lars who is domiciled in Sweden.

Unused nil rate band calculation

M = £250,000

VT = £395,000 (Estate of £450,000 less limited spouse exemption of £55,000)

M is not greater than **VT**, so there is nothing to transfer.

Where the net estate is less than the nil rate band plus £55,000, there will still be an amount of nil rate band available to transfer. This example shows how both

17 The HMRC example, as is the current trend, contains several facts which are wholly irrelevant to the tax position and which only serve to make it harder to identify the relevant points. The following footnotes identify these.

18 Where the son lives, and where he is domiciled (which might not be the same) are completely irrelevant to the example.

19 Where the widow lives and where she dies domiciled, are irrelevant to the example.

the amount that the net estate is below the nil rate band, and limited spouse exemption combine to produce the amount of nil rate band available to transfer.

Example

Charles died in 2002/03. He left an estate worth £200,000 all to his wife Helga who is domiciled in Sweden.

Unused nil rate band calculation

M = £250,000

VT = £145,000 (Estate of £200,000 less limited spouse exemption of £55,000)

M is greater than **VT** by £105,000

Transferable nil rate band calculation

E = £105,000

NRBMD = £250,000 so

$(105,000 \div 250,000) \times 100 = 42.0000\%$

On Helga's death, the nil rate band on her death would be uprated by 42%. This approach will be appropriate on the death of the survivor when either

- they remain domiciled abroad and their UK assets exceed the single nil rate band, or
- between the first death and their own, they became domiciled, or deemed domiciled in the UK.

69.6 Inter-spouse gift of 100% BPR or APR property

This section considers a gift of property qualifying for 100% business or agricultural property relief from a UK domiciled individual to their non-UK domiciled spouse. It is necessary to consider IHT on the gift and the gift with reservation rules. For convenience I refer to "business property" but similar rules govern agricultural property.

69.6.1 IHT on the gift

In the normal case of a gift of property qualifying for 100% BPR, the value transferred by the gift is nil. However, s.113A IHTA provides:

Transfers within seven years before death of transferor

- (1) Where any part of the value transferred by a potentially exempt transfer which proves to be a chargeable transfer would (apart from this section) be reduced in accordance with the preceding provisions of this Chapter, it shall not be so reduced unless the conditions in subsection (3) are satisfied.

The conditions which must be satisfied are set out in subsection (3):

The conditions referred to in subsections (1) and (2) above are—

- (a) that the original property was owned by the transferee throughout the period beginning with the date of the chargeable transfer and ending with the death of the transferor; and
- (b) except to the extent that the original property consists of shares or securities to which subsection (3A) below applies that, in relation to a notional transfer of value made by the transferee immediately before the death, the original property would (apart from s.106 above) be relevant business property.

In brief, BPR is lost unless the property is retained by the donee for seven years. (There is an exception for replacement property which is not discussed here.)

69.6.2 *GWR on the gift if the donor survives seven years*

What about GWR? The position varies according to whether or not the donor survives seven years from the gift.

If the donor does survive seven years then s.113A has no application. By subsection (1) it applies to a PET *which proves to be a chargeable transfer*. If the donor survives seven years then the PET does not “prove to be a chargeable transfer”. Accordingly the value transferred by the gift remains at nil. The gift therefore normally qualifies as an exempt transfer under:

- (1) s.20 IHTA (small gifts); or
- (2) s.18 IHTA (IHT spouse exemption).

The gift therefore falls outside the scope of the GWR rules by virtue of s.102(5) FA 1986.

The principle applies to:

- (1) outright gifts of 100% BPR property whether or not to spouses;
- (2) gifts to trusts under which the spouse has an interest in possession even if such gifts are not “outright gifts” (but consider s.102(5A)).

It does not matter that the property is sold or disposed of by the donee within the seven years as long as the donor has survived seven years. Section 113A(7A) IHTA provides:

The provisions of this Chapter for the reduction of value transferred shall be disregarded in any determination for the purposes of this section of whether there is a potentially exempt or chargeable transfer in any case.

This is irrelevant because the disregard is only for the purposes of s.113A, not for the purposes of ss.18, 20 IHTA and s.102 FA 1986.

69.6.3 *GWR if donor dies within seven years*

The position is different if the donor dies within seven years. Suppose:

- (1) H (UK domiciled) gives 100% BPR property to W (foreign domiciled);
- (2) H dies within seven years;
- (3) The conditions in s.113A(3) are not satisfied (for instance the property has been sold²⁰ or disposed of by the donee).

In that case the value transferred is *not* reduced: s.113A(1). It is considered that the disallowance of BPR applies for all purposes of IHT. So the gift falls outside the protection of ss.18 and 20 IHTA (assuming the value transferred exceeds the limits of £55,000 and £250 respectively) and the GWR provisions can in principle apply.

It is impossible to believe anybody actually thought through these rules at the time the legislation was enacted. But these are the consequences of the words used and the result, if a little complicated, is relatively sensible.

69.7 Divorce settlement where IHT spouse exemption not available

Suppose:

- (1) H transfers assets to W in order to settle a divorce claim, and
- (2) The disposition falls outside the IHT spouse exemption.²¹

No IHT charge arises. First, the disposition is not a transfer of value, if made under court order.²² Secondly, s.10 IHTA provides:

Dispositions not intended to confer gratuitous benefit

(1) A disposition is not a transfer of value if it is shown that it was not intended, and was not made in a transaction intended, to confer any gratuitous benefit on any person and either—

- (a) that it was made in a transaction at arm's length between

20 Though there is a possibility of reinvestment relief in this case: see s.113B IHTA.

21 This may be because H is UK domiciled and W is not; or because the transfer is made after the marriage is dissolved.

22 See *McCutcheon on IHT*, 5th ed, para 2.35. Relief may also be available under s.11 IHTA; see 69.4 (Disposition for maintenance of spouse and other exemptions).

persons not connected with each other, or
(b) that it was such as might be expected to be made in a transaction at arm's length between persons not connected with each other.

H does not normally intend to confer any "gratuitous benefit" on W. (Assume the divorce settlement is negotiated at arm's length.) Accordingly the disposition falls within s.10 IHTA and is not a transfer of value for IHT purposes.

There is a theoretical HMRC argument that the condition in s.10(1)(b) IHTA is not satisfied. The argument would be that a divorce settlement cannot be "such as might be expected to be made in a transaction at arm's length between persons not connected with each other" since persons not connected with each other would not be in a divorce situation. In my view this argument is not correct. It is the old question of how far one carries the fiction of a deeming provision. The argument carries it too far because it reaches a conclusion which does not fit in with the scheme of the IHTA. IHT Manual (while not explicit) suggests that HMRC do not take the point.²³

69.8 Associated operations on inter-spouse gift

The IHT Manual provides:

14833 Gifts between spouses or civil partner [January 2010]

Where property

- given unconditionally by one spouse or civil partner to the other is
 - subsequently transferred by the latter to a third party,
- you cannot use the associated operations provisions to attribute the transfer to the first spouse or civil partner.

The Chief Secretary to the Treasury assured Parliament that this would be HMRC's practice, and it was publicised in a Press Release dated 8 April 1975.

However, where the transfer between spouses or civil partners is part of a more complex series of transactions which taken together are the means whereby one of them makes a disposition to a third party, it may be more

23 IHTM 4165 [September 2008]: "Dispositions made on divorce or dissolution of a civil partnership (IHTM11032) for the benefit of a former spouse or civil partner, whether under a Court Order or as a result of arm's length negotiations, are normally within s.10 IHTA 1984."

appropriate to use the associated operations to allocate the transfer(s) to the correct transferor.

69.9 IHT planning for mixed marriage

69.9.1 Simple gift to foreign domiciled spouse

A simple and obvious short- and medium-term course is:

- (1) the UK domiciled spouse should give assets to their foreign domiciled spouse absolutely;
- (2) the foreign domiciled spouse keeps the assets in a form where they are not UK situate, so they remain excluded property.

The gift may be a PET but that may not in practice be a serious concern. If the reservation of benefits rule applies, however, this effectively neutralises any tax saving. Indeed it may make the position worse. See 59.18 (IHT spouse exemption defence to GWR death charge). This often makes simple gifts impractical.

69.9.2 Gift to foreign domiciled spouse, followed by settlement by spouse

A more sophisticated option is:

- (1) the UK domiciled spouse gives assets to their foreign domiciled spouse; and
- (2) the foreign domiciled spouse subsequently gives the assets to a settlement.

In principle the property in the settlement may be excluded property. One advantage of this is if the donee spouse later becomes UK domiciled: see 62.1 (IHT planning in anticipation of acquiring UK domicile). Another advantage is CGT planning. A third advantage is that this should avoid the gifts with reservation rule.²⁴ Of course this strategy only works if the UK domiciled spouse is not a settlor: see 75.33 (Planning to create trust with foreign domiciled settlor).

69.10 CGT spouse exemption

Section 58(1) TCGA provides:

²⁴ See 59.14 (Gift to foreign domiciled donee who creates a settlement).

If, in any year of assessment,

(a) an individual is living with his spouse or civil partner, and

(b) one of them disposes of an asset to the other,

both shall be treated as if the asset was acquired from the one making the disposal for a consideration of such amount as would secure that on the disposal neither a gain nor a loss would accrue to the one making the disposal.

I refer to this as “**the CGT spouse exemption**”. This exemption applies regardless of the domicile of the spouses. It applies to sales at market value as well as gifts.

The relief does not apply to (1) unmarried couples or (2) married couples living apart. Section 58(2) contains (usually) immaterial exceptions which are not discussed here.

69.11 CGT planning for mixed marriage

69.11.1 *Asset yielding a gain*

Suppose the UK domiciled spouse owns an asset which will give rise to a gain on a disposal. A simple and obvious course is:

- (1) The UK domiciled spouse transfers²⁵ the asset to their foreign domiciled spouse.
- (2) The foreign domiciled spouse may be in a position to sell the asset without CGT: see 46.1 (Capital Gains Tax of individuals).

Watch *Furniss v Dawson*!

69.11.2 *Non-resident spouse*

The relief applies regardless of residence, so similar planning points arise if one spouse is UK resident and the other is not. CG Manual accepted this:

²⁵ The transfer may be a gift or a sale at market value. The latter avoids the IHT problems discussed at 69.2 (Restriction on IHT spouse exemption for foreign domiciled spouse) and 59.9 (GWR spouse exemption) but take care on implementation, especially s.58(2) TCGA. In the case of a sale the spouse will need independent legal advice.

22300 NR spouse or NR civil partner [April 2008]

... There is no longer any authority to treat a non-resident spouse as separated from a resident spouse merely because of their residence status. Similarly a non-resident civil partner may not be treated as separated from a resident civil partner merely because of their residence status. So the possibility of passing assets outside the UK tax net remains.

This paragraph has been quietly deleted²⁶ but the law is unchanged.

69.12 Income tax planning for mixed marriage

A simple and obvious course is:

- (1) the UK domiciled spouse should give assets to their foreign domiciled spouse absolutely; and
- (2) the foreign domiciled spouse invests in property giving rise to foreign investment income which is not remitted.

The inter-spouse gift, strictly, satisfies the transfer of asset conditions. The transferor would then fall within s.720 ITA since they have “power to enjoy” their wife’s income. This is because s.714(4) ITA provides:

(4) In this Chapter references to individuals include their spouses or civil partners.

However, RI 201 provides relief:²⁷

Unless transactions are part of a wider arrangement, Revenue practice is not to seek to assess a UK domiciled individual on the income of a non-UK domiciled spouse, where that income arises from a transfer of assets by that spouse and would be outside the charge to tax under s 739 ICTA by virtue of the provisions of s 743(3) ICTA.

The gift would also be a “settlement” for the purposes of s.624 ITTOIA. However, s.626 ITTOIA normally provides relief:

²⁶ Probably in June 2008 when para 22300 was amended, or perhaps subsequently but by July 2009.

²⁷ This is perhaps a concession but the better view is that the inter-spouse transfer is tax mitigation not tax avoidance so the motive defence applies. Tax Bulletin 81 states (obviously) that the same practice applies to civil partners.

626 Exception for outright gifts between spouses or civil partners

- (1) The rule in s.624(1) does not apply in respect of an outright gift—
 - (a) of property from which income arises,
 - (b) made by one spouse to the other or one civil partner to the other, and
 - (c) meeting conditions A and B.
- (2) Condition A is that the gift carries a right to the whole of the income.
- (3) Condition B is that the property is not wholly or substantially a right to income.
- (4) A gift is not an outright gift for the purposes of this section if—
 - (a) it is subject to conditions, or
 - (b) there are any circumstances in which the property, or any related property²⁸—
 - (i) is payable to the giver,
 - (ii) is applicable for the benefit of the giver, or
 - (iii) will, or may become, so payable or applicable.

28 s.626(5) ITTOIA provides that:

“‘Related property’ has the same meaning in this section as in s.625.”

So we turn to s.625(5) which provides:

“In this section ‘related property’, in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of, or of income from, that property or income from it.”

CHAPTER SEVENTY

THE FAMILY HOME AND ITS CHATTELS

70.1 Home owned by foreign domiciliary

There are several ways to arrange the ownership of a UK family home for a foreign domiciled individual. The first possibility is that the individual should own the property directly. This has the attraction of simplicity.

The property is in the individual's estate and in principle within the scope of IHT on his death. One possible method to mitigate this problem is to provide by will that the property should pass to the individual's surviving spouse, or to a trust under which she has an interest in possession. That normally postpones IHT until the occasion of the death of the survivor of the individual and his spouse.¹

The risk of IHT may quite cheaply be covered by insurance. Watch that the insurance policy is not subject to IHT on the death of the individual. Perhaps arrange that the policy is not UK situate² (so the policy is excluded property) or transfer the policy to a trust (under which the individual is excluded). The amount to be insured will need to be reviewed from time to time in line with house inflation and possible changes in the rate of IHT.

It should be possible to take steps to avoid IHT even at very short notice, if the death of the owner became imminent:

- (1) transfer the property to a company so as to acquire excluded property status (but the SDLT penal rate may make this unattractive).
- (2) Borrow secured on the property.

So in practice the IHT risk should be limited to the risk of the sudden death of the individual (or the sudden joint deaths of individual and

¹ See 59.18 (IHT spouse exemption defence to GWR death charge).

² See 77.19 (Insurance policy).

spouse).

There will be no CGT on the sale of property if main private residence relief applies. If the individual has another residence inside or outside the UK, it may be appropriate to make an election under s.222 TCGA.

There is in principle a taxable remittance, if the purchase price is paid out of foreign income or chargeable gains within the scope of the remittance basis.

Similar points apply to chattels in the home except there is no CGT exemption, apart from the exemption for chattels under £6,000: s.262 TCGA.

70.1.1 *Non-tax aspects of direct ownership*

The Inheritance (Provision for Family and Dependants) Act 1975 (in short) allows family and dependants to claim against a deceased's estate on the grounds that the deceased had not made reasonable provision for them. At present this applies only if the deceased was domiciled in England at the time of death. However the Law Commission propose to extend the jurisdiction to cases where a non-English domiciled individual dies holding land in England.³ In some cases this will be a drawback to a foreign domiciled individual holding land in England: the difficulty may be increased by the uncertainty whether the circumstances will give rise to a claim under the Act on their death. It would in principle be possible to avoid the Act by disposal of the land before the death, but the individual may not want to rely on that.

The use of a trust or company avoids the need for an English grant of probate after the death of the individual and avoids the Inheritance (Provision for Family and Dependants) Act 1975.

Personal ownership may be necessary, or at least desirable, in order to secure that the owner of a long lease acquires the right to enfranchisement.

Further consideration will be needed for property in Scotland and Northern Ireland.

3 Law Com no 331 *Intestacy and Family Provision Claims on Death* (December 2011) para 7.37 and para 2 schedule 2 of their proposed Inheritance and Trustees' Powers Bill.

70.2 Home acquired by company: SDLT penal rate

70.2.1 *Introduction*

The FA 2012 has introduced a 15% SDLT charge on the purchase of high value residential property by companies and some company-like entities.

I refer to this as **“the SDLT penal rate”**. I do not think that is tendentious, though it is not, of course, the statutory term.

I do not consider the special rules for developers, exercise of collective rights by tenants of flats orcrofting communities.

For a discussion of the reasons for the new rules, see 70.5 (Homes held by non-natural persons: commentary).

70.2.2 *“Enveloping”*

Budget 2012 refers to purchase by companies as **“enveloping”**. I half balk at this neologism: it is a simplistic reification which does not aid clarity of thought. But the basic problem is the substance of the reforms, not the terminology.

70.2.3 *Imposition of SDLT penal rate*

Para 3 Sch 4A FA 2003 provides:

- (1) Where this paragraph applies to a chargeable transaction—
 - (a) the amount of tax chargeable in respect of the transaction is 15% of the chargeable consideration for the transaction, and
 - (b) the transaction is not taken to be linked to any other transaction for the purposes of section 55(4).
- (2) This paragraph applies to a chargeable transaction if—
 - (a) the transaction is a high-value residential transaction, and
 - (b) the condition in sub-paragraph (3) is met.

70.2.4 *“High-value residential transaction”*

There is the usual cascade of definitions. First para 1 sch 4A FA 2003 defines “interest in a single dwelling” and “higher threshold interest”:

- (1) In this paragraph “interest in a single dwelling” means so much of the subject-matter of a chargeable transaction as consists of a chargeable interest in or over a single dwelling (together with appurtenant rights).
(2) An interest in a single dwelling is a higher threshold interest for the purposes of this Schedule if chargeable consideration of more than £2,000,000 is attributable⁴ to that interest.

“Appurtenant rights” is defined in para 9 sch 4A FA 2003:

In this Schedule—

“appurtenant rights”, in relation to a chargeable interest that is, or is part of, the subject-matter of a transaction, means any rights or interests appurtenant or pertaining to the chargeable interest that are acquired with it

Then para 2 sch 4A FA 2003 defines “high-value residential transaction”:

- (1) Sub-paragraphs (2) to (8) apply to a chargeable transaction whose subject-matter consists of or includes a higher threshold interest.
(2) If the main subject-matter of the transaction consists entirely of higher threshold interests, the transaction is a high-value residential transaction for the purposes of paragraph 3.

£2m is a substantial threshold, but I expect it will not be increased in line with inflation, so it will gradually reduce in real terms.

70.2.5 *Corporate purchaser condition*

Para 3(3) sch 4A FA 2003 provides:

The condition is that—

- (a) the purchaser is a company,
- (b) the acquisition is made by or on behalf of the members of a partnership one or more of whose members is a company, or
- (c) the acquisition is made for the purposes of a collective

⁴ “Attributable” is (unnecessarily) given a commonsense definition in para 9 sch 4A FA 2003: “attributable” means attributable on a just and reasonable basis.

investment scheme.⁵

I refer to these as “**corporate purchasers**”. That is not entirely accurate but no short label could do justice to the definition. I refer to the condition in para 3(3) as “**the corporate purchaser condition**”.

“Company” is defined in para 9 sch 4A FA 2003:

In this Schedule—

“company” means a body corporate other than a partnership.⁶

The drafter has overlooked the existing definition in s.100 FA 2003. Para 3(4) sch 4A FA 2003 excludes corporate trustees:

References in sub-paragraph (3) to a company do not include a company acting in its capacity as trustee of a settlement.

This is needed as SDLT does not have the rule that trustees are deemed to be separate persons.⁷

The charge applies to UK and non UK resident companies.

Para 3(5) sch 4A FA 2003 deals with joint purchasers:

If there are two or more purchasers acting jointly, the condition in sub-paragraph (3) is treated as met if it is met in relation to at least one of those purchasers.

Para 3(6)(7) sch 4A FA 2003 relate to the complex anti-avoidance provision concerning certain partnership transactions; these are not discussed here as a discussion of partnership SDLT would need a chapter to itself.

70.2.6 *Bare trusts*

Para 3(8) sch 4A FA 2003 provides:

5 “Collective investment scheme” has the usual definition; para 9 sch 4A FA 2003 provides: “collective investment scheme” has the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see section 235 of that Act).

6 “Partnership” is defined in para 1 sch 15 FA 2003; the SDLT treatment of partnerships is not addressed in this book.

7 See 4.3 (Trustees treated as single and distinct person).

For the purposes of sub-paragraph (3), paragraph 3 of Schedule 16 (bare trustees) applies as if sub-paragraphs (2) and (3) of that paragraph were omitted.

To follow this one needs to set out the whole of para 3 sch 16 amended as para 3(8) directs:

(1) Subject to sub-paragraph (2), where a person acquires a chargeable interest or an interest in a partnership as bare trustee, this Part applies as if the interest were vested in, and the acts of the trustee in relation to it were the acts of, the person or persons for whom he is trustee.

~~(2) Sub-paragraph (1) does not apply in relation to the grant of a lease.~~

~~(3) Where a lease is granted to a person as bare trustee, he is treated for the purposes of this Part, as it applies in relation to the grant of the lease, as purchaser of the whole of the interest acquired.~~

(4) Where a lease is granted by a person as bare trustee, he is to be treated for the purposes of this Part, as it applies in relation to the grant of the lease, as vendor of the whole of the interest disposed of.

Para 3(1) is the sensible rule. The reason for the exception in para (2)(3) is not clear; but that exception is disapplied for the purposes of the SDLT penal rate.

The SDLT bare trust provisions are a mess which the SDLT penalty provisions only partly address; a full discussion is beyond the scope of this book.

70.2.7 *Consideration in form of rent*

Para 3(9) sch 4A FA 2003 provides:

In the case of a transaction for which the whole or part of the chargeable consideration is rent, this paragraph has effect subject to section 56 and Schedule 5 (amount of tax chargeable: rent).

70.2.8 *Future amendment of rules*

HMRC appear to have anticipated that para 3(3) may not be well drafted. Para 3(10) sch 4A FA 2003 provides power to amend by statutory instrument:

The Treasury may by order amend this paragraph for the purpose of limiting the circumstances in which the condition in subparagraph (3) is to be treated as met.

70.2.9 *Apportionment*

The rest of para 2 sch 4A FA 2003 deals with apportionment cases:

(3) If the main subject-matter of the transaction includes a chargeable interest other than a higher threshold interest, the transaction (“the primary transaction”) is to be treated for the relevant purposes as two separate chargeable transactions as follows—

- (a) a transaction whose subject-matter is all the higher threshold interests, together with any appurtenant rights;
- (b) a transaction whose subject-matter is the remainder of the subject-matter of the primary transaction.

(4) For those purposes, the chargeable consideration for a transaction treated as occurring under sub-paragraph (3) is so much of the chargeable consideration for the primary transaction as is attributable to that transaction.

(5) The transaction mentioned in sub-paragraph (3)(a) is a high-value residential transaction for the purposes of paragraph 3.

(6) “Relevant purposes” means the purposes of—

- (a) paragraphs 3 and 5 of this Schedule,
- (b) section 55 (amount of tax chargeable: general),
- (c) Schedule 5 (amount of tax chargeable: rent),
- (d) Schedule 6B (transfers involving multiple dwellings), and
- (e) any other provision of this Part, so far as it is necessary because of any of paragraphs (a) to (d) to treat the purposes in question as relevant purposes.

70.2.10 *Multiple transactions*

Para 4 Sch 4A FA 2003 provides:

(1) Sub-paragraphs (2) and (3) apply if—

- (a) the subject-matter of a chargeable transaction includes a chargeable interest in or over a dwelling,
- (b) one or more land transactions, the subject-matter of each of which includes a chargeable interest in or over the dwelling, are linked to that chargeable transaction, and

- (c) the total consideration attributable to the interests mentioned in paragraphs (a) and (b) (and to any appurtenant rights, but disregarding any rent) is more than £2,000,000.
- (2) Each of those chargeable interests is treated as a higher threshold interest for the purposes of this Schedule.
- (3) If the condition in paragraph 3(3) is met in the case of the transaction mentioned in sub-paragraph (1)(a), it is also treated as met in the case of each transaction mentioned in sub-paragraph (1)(b) that is a chargeable transaction.

70.3 Home held by company: proposed annual SDLT charge

Budget 2012 provides:

2.174 Enveloping⁸ of high value residential properties ... the Government will consult on the introduction of an annual charge on residential properties valued over £2 million owned by certain non-natural persons with the intention of introducing legislation next year and the measure coming into effect in April 2013.

I refer to this as **“the annual SDLT charge”**.

At the time of the announcements of the annual SDLT charge most basic questions were left unanswered, and I doubt if HM Treasury had given much thought as to how this should work. The details were subsequently provided in the consultation document published May 2012 and tendentiously entitled “Ensuring the fair taxation of residential property transactions”.⁹ I refer to it as **“The Residential Property Consultation Document”**.

70.3.1 *Rates and yield*

The proposed rates are as follows:¹⁰

⁸ See 70.2.2 (“Enveloping”).

⁹ www.hm-treasury.gov.uk/d/consult_ensuring_fair_taxation_residential_property_transactions.pdf.

¹⁰ These were tucked away in a document called “Budget 2012 policy costings” http://cdn.hm-treasury.gov.uk/budget2012_policy_costings.pdf and are now in the consultation document

Prop. Value	Annual Charge	Contrast with SDLT @7% on sale
£2m to £5m	£15k	£140k - £350k
£5m to £10m	£35k	£350k - £700k
£10m to £20m	£70k	£700k - £1.4m
> £20m	£140k	> £1.4m

On this basis it would take 10 or 20 years for the annual charge to equal the SDLT, but:

- (1) The annual charge is payable sooner and will be index linked
- (2) A vendor may want to purchase the property, not the company. (The scope of SDLT avoidance by sale of companies rather than of land is more limited than the authors of these tax reforms appear to think.)

So it will not be cost effective to pay the annual charge, unless, exceptionally, the purchaser anticipates a prompt resale of the company (which would also raise the question of whether the purchaser was trading).

The policy costings document continues:

Post-behavioural costing

The costing takes into account a range behavioural effects, including those who choose:

- not to envelope;
- to envelope and pay the new charges;
- to envelope and use a new avoidance route; or,
- to remove a property from an envelope.

A further adjustment has been made to allow for the impact on price and transaction levels for the affected properties. The costing assumes that the majority of new enveloping ceases and the stock of properties currently within envelopes falls significantly within two to three years.

Post-behavioural Exchequer impact (£m)

Year	Yield
2012-13	neg.
2013-14	+65
2014-15	+65
2015-16	+65
2016-17	+75

The Residential Property Consultation Document provides:

2.49 The annual charge will be indexed to Consumer Price Index (CPI)¹¹ and uprated in April each year based upon the CPI of the previous September. This uprating will commence from the second year of charge; namely, 1 April 2014. For example, if CPI in September 2013 is 2 per cent then the lowest band will be charged at £15,300 for the year commencing 1 April 2014 (and the highest band at £142,800). The uprating calculation will round the CPI figure down to the nearest 0.1 per cent and round the increase in the annual charge down to the nearest £50. Where CPI is negative there will be no calculation carried out.

2.50 The charging bands will remain the same and there is no intention to lower the starting threshold.

There is no need to lower the starting threshold, as inflation will gradually achieve that.

70.3.2 *Application of charge*

The Residential Property Consultation Document provides:

What will the charge apply to?

2.25 The new annual charge will apply to interests owned in residential property.

2.26 It is proposed to use the terms and definitions used for the 15 per cent SDLT rate included within the proposed Section 55A and Schedule 4A of FA 2003 introduced in Finance Bill 2012.

2.27 The charge will therefore apply to a residential dwelling, which may be all or part of a residential or mixed use property. For example:

- If the residential dwelling is part of a larger property including

11 The CPI and RPI are similar, although the precise weights attached to the individual items in each index differ. There are, however, some differences. For example, the RPI includes a number of items chosen to represent owner-occupier housing costs, including mortgage interest payments and depreciation costs, all of which are excluded from the CPI. The differences are summarised in ONS (2010) 'Differences between the RPI and CPI Measures of Inflation' and described in greater detail in Roe, D. and Fenwick, D. (2004), 'The New Inflation Target: the Statistical Perspective'. See www.ons.gov.uk/ons/rel/cpi/cpi-rpi-basket/2012/index.html. Parliament has now decided to use the CPI instead of the RPI on the questionable grounds that it is a more appropriate measure of the general level of prices. The basis of this conclusion is that it more accurately reflects consumer shopping patterns, it is the basis of the Bank of England's inflation target and it is more consistent with international indices.

non-residential parts (e.g. a penthouse flat above an office block) then the property to be valued will be the residential part only.

- If the property consists of a number of self-contained dwellings (e.g. a block of 10 self-contained flats), then each dwelling will normally be separately valued.

2.28 However, it is proposed that if the property comprises of a main dwelling with one or more parts suitable for use as staff accommodation then the valuation will be of the main dwelling in its entirety.

2.29 Some unusual types of properties that may satisfy the definition of residential property will be exempted from the tax. For example, boarding schools accommodation, hospitals, student halls of residence, military accommodation, care homes and prisons.

70.3.3 *Valuation*

The Residential Property Consultation Document provides:

Interest in property subject to annual charge

2.30 The interest to which the charge will apply will be the freehold or leasehold interest owned by the non-natural person within the charge (or jointly owned with other people outside the charge).

2.31 In the majority of cases, there is unlikely to be any distinction between legal and beneficial ownership of an interest in a property. However, if beneficial and legal ownership of the interest in the property are separated, as for instance where ownership is through a bare trustee, then as is the case for SDLT the legal ownership will be treated as combined with the beneficial ownership

2.32 Where there is a freehold interest and one or more subordinate leasehold interests in the same dwelling, and each is owned by unconnected persons within the charge, each will need to value their distinct interest and each may be liable to the annual charge based on those valuations. So, for example, when a property is purchased on a lease but the freehold is owned by a separate company, then both the freehold and the leasehold will be valued and the annual charge applied separately to the freehold (if valued over £2 million) and the leasehold (if valued over £2 million if also owned by a non-natural person).

2.36 The value of the property interest which will be relevant for the annual charge for the five years from 1 April 2013 is proposed to be:

- The value of the property interest on 1 April 2012 if the interest was owned on that date.
- The value on acquisition if the interest is acquired later.
- The value on any later creation or cessation of a relevant subordinate

property interest.

2.37 Property valuations for the annual charge will be self-assessed by the persons liable to the charge and submitted to HMRC as part of their annual charge tax return. HMRC will have powers to enquire into returns and also to make assessments so that non-compliance can be effectively challenged.

2.38 The valuation date has been set at 1 April 2012 to ensure that valuations can be carried out before the proposed annual charge comes into effect in April 2013. Non-natural property owners will need to establish that they come within the charge band and where they are in doubt may wish to obtain a valuation report providing a valuation of their property at 1 April 2012.

2.39 HMRC guidance will set out that a valuation provided to a taxpayer by a suitably qualified valuer of real estate would normally protect the taxpayer from possible penalties should it be subsequently established that their property has been significantly undervalued. A self valuation would bear a higher risk of not providing such protection.

2.40 Non-natural persons who believe they own a residential dwelling below, but in the region of, £2 million pounds may be liable to penalties if they fail to take proper care to establish a correct valuation on the appropriate date, and the property interest is in fact worth more than £2 million.

2.41 Properties will be re-valued every five years.

2.42 The valuation should provide a point valuation (i.e. a specific price). The property can then be placed within one of the banding structures in Table 2.A. That band will apply to the property for the year of the valuation and the next four charging years with the exception of properties which are enveloped, or re-enveloped within that five year charging period when they will be re-valued at the point of purchase into the envelope (the value in all likelihood being the consideration given), so a further valuation will not be required again until 1 April 2018, when the relevant valuation date will be 1 April 2017.

2.43 Valuations submitted to HMRC will be subject to checking by the Valuation Office Agency (VOA).

Basis of valuation

2.44 The valuation required will be an assessment of the 'market value' of the residential property on 1 April 2012. 'Market value' will be defined in similar terms to the definitions used for capital gains tax, as described in the Royal Institution of Chartered Surveyors Valuation Standards UKGN3 and the VOA Guidance Manuals: <http://www.voa.gov.uk/>

3 The revaluation will cover all properties paying the charge on 1 April

2017 plus all those properties which are not currently paying the charge but whose value has appreciated sufficiently to put it above the £2 million threshold.

Information to be provided by property owners

2.45 Property owners may, as part of their annual charge tax return, provide a professional valuation report. The provision of this information will reduce the number of cases where the VOA needs to make an internal inspection of the property.

Prior agreement of property valuations

2.46 To assist taxpayers in compiling their annual charge tax return HMRC and the VOA will offer a pre-return valuation checking service to property owners. Property owners will be able to submit their proposed valuations to HMRC for checking and in any case where a proposed banding cannot be accepted the VOA will advise the taxpayer and enter into discussions to endeavour to agree the appropriate banding.

Appeals

2.47 Any disputes over the annual charge tax liability will be referred to HM Courts and Tribunals Service in the same manner as in other HMRC administered taxes. In cases where there is a dispute over the property valuation and consequent banding the matter will be determined by the Upper Tribunal (Lands Chamber).

HM Treasury wisely do not attempt to assess the cost to the taxpayer of professional 5 yearly valuations.

70.3.4 *Anti-avoidance*

The Residential Property Consultation Document provides:

2.33 It is proposed that there will also be rules to ensure that the charge cannot be avoided through any other artificial arrangements solely or mainly intended to avoid the annual charge.

Note that the GAAR proposed for 2013 is not to be relied on here. The Aaronson report had said:

Enacting an anti-abuse rule should make it possible, by eliminating the need for a battery of specific anti-avoidance sub-rules, to draft future tax rules more simply and clearly. Also, fewer schemes would be enacted

and so there will be less call for specific remedial legislation.¹²

But I do not think anyone seriously believed that.

70.4 Home held by non-resident non-natural person: proposed CGT

Budget 2012 provides:

2.7 The Government will consult on the introduction of a CGT charge on residential property owned by non resident, non natural persons. Legislation will be introduced in Finance Bill 2013 with the measure coming into effect in April 2013. This measure will be consulted on in conjunction with the SDLT enveloping annual charge for high-value residential properties.

I refer to this as “**the CGT non-natural person charge**”. That is not a convenient label but it is difficult to think of a better one.

At the time of the announcements of the CGT non-natural person charge the most basic questions were left unanswered, and I doubt if HM Treasury had given any thought as to how this should work. The Residential Property Consultation Document now provides some but not all of the essential details.

70.4.1 Reason for CGT non-natural person charge

The Residential Property Consultation Document provides:

1.17 Under existing CGT rules, non-UK residents are not liable to a charge on gains arising from the disposal of UK residential property. This means that a non-UK resident seeking to make arrangements to circumvent the annual [SDLT] charge has a clear financial advantage over a similarly-minded UK resident. It is therefore necessary to extend CGT to support the annual charge.

1.18 More generally, this proposal also creates a more equal tax treatment between UK residents and non-residents and brings UK tax policy more into line with other countries, many of whom already tax capital gains made by non-residents....

12 Aaronson, GAAR Study (November 2011) para 1.7
accessible www.hm-treasury.gov.uk/d/gaar_final_report_111111.pdf.

3.1 The Government announced in the Budget that it will extend the CGT regime from April 2013 to gains on the disposal of UK residential property by non-resident non-natural persons, such as companies. The measure creates a more equal treatment in the CGT regime between UK residents and non-residents, and brings the UK's tax policy in line with that of other countries, many of whom already tax non-residents' gains. It will broadly align the tax treatment of gains on disposals of UK residential properties by the persons in which the properties are enveloped, irrespective of whether those persons are resident in the UK or elsewhere. This will act as a further discouragement for residential property to be held through enveloping¹³ arrangements.

3.2 Under existing rules, tax is generally only applied on chargeable gains accruing to a UK resident person. The extended regime will therefore also help ensure that non-UK resident non-natural persons making disposals of UK residential property also pay their fair share of tax and will ensure that, where they choose to de-envelope a property, a non-resident does not have a clear financial advantage over a UK resident.

These are not arguments which merit serious analysis or consideration.

How much money will the new CGT charge raise? Any assessment must wait for the details of the new rules, but in most cases it will be to wind up the company and elect for private residence relief, in which case no CGT charge will be due, except for some unfortunate victims of existing structures, who may well feel like they have been mugged - though it may turn out that some form of planning is possible.

It appears that this charge, like the SDLT penal and annual charges, is primarily a penalty to discourage corporate ownership, not a charge intended to generate tax revenue.

70.4.2 “Non-natural person”

The Residential Property Consultation Document provides:

3.6 Gains on UK residential property held directly by a non-resident individual will not come into the CGT regime, as any disposal of a non-enveloped property will attract a SDLT charge.

3.7 “Non-natural person” is a general term that applies to any person

¹³ See 70.2.2 (“Enveloping”).

who is not considered to be an individual. Without further qualification or restriction, this will include:

- Companies and other bodies corporate;
- Trustees (excluding bare trustees but including trustees who are themselves individuals) and collective investment vehicles;
- Personal representatives;
- Clubs and associations; and
- Entities that exist in other jurisdictions that allow property to be held indirectly.

3.8 To support the annual charge, the categories of non-resident non-natural person to whom the CGT regime will be extended will necessarily have to include those categories that are subject to the annual charge. This consultation considers what additional categories should be included to ensure that non-UK resident persons pay their fair share.

70.4.3 *£2m minimum*

The Residential Property Consultation Document provides:

Value of the residential property

3.13 In order to be consistent with the design of the annual charge, it is envisaged that the extension of CGT will only apply to the disposal of residential properties where, for capital gains purposes, the amount or value of the consideration for the disposal exceeds £2 million.

3.14 In proposing that the charge is limited in this manner it is recognised that, like the annual charge, the inclusion of a £2 million threshold will create a cliff-edge between those properties that do and do not come into charge, and create additional complexity in certain circumstances, for example where there are part disposals. Consideration will also need to be given to whether such a threshold could easily be manipulated, and appropriate safeguards where necessary.

70.4.4 *Scope of charge to include companies*

The Residential Property Consultation Document provides:

Interest in the property

3.15 The extension of the CGT regime will apply to gains on the disposal, or part disposal, of relevant UK residential property, including

the grant of an option over such property.

3.16 It will also apply to the whole of any gains that accrue on the disposal of assets (of whatever form) that represent directly or indirectly relevant UK residential property. The latter category will include shares, interests or securities in a property-owning company where more than 50 percent of the value of the asset is derived from UK residential property.

The paper does not mention - the authors may or may not have been aware - that similar proposals were raised before for SDLT and rejected as unworkable. Some other countries have tried legislation along these lines. If it is practical to devise such rules, then the sale of shares in land-rich companies could be made subject to SDLT, and the annual charge and penal rate would not be necessary.

70.4.5 *Residential property*

The Residential Property Consultation Document provides:

3.17 This measure is only applicable to UK residential property, consistent with the aims of the annual charge.

3.18 It is proposed that the definition of residential property follows the meaning of 'dwelling' used for the 15 per cent SDLT rate and the new annual charge (see Annex B).

3.19 The CGT regime will apply irrespective of the use to which the residential property is put. It will apply to commercially let residential property and property owned by an employer to provide accommodation for its employees or directors.

70.4.6 *No transitional relief*

The Residential Property Consultation Document provides:

3.20 In order to maintain consistency with the existing CGT regime, gains will be computed in accordance with the normal CGT provisions in the Taxation of Chargeable Gains Act (TCGA) 1992, providing for the deduction of allowable costs in accordance with the current legislation.

3.21 The measure will apply to the total gain accrued during ownership of the property (and not only the gain accrued after implementation of the new charge in April 2013).

This unfair rule will cause a flurry of work before 6 April 2013, to trigger pre-2013 disposals.

70.4.7 *Interaction with existing anti-avoidance rules*

The author of the consultation document was aware of existing anti-avoidance provisions but did not know what to do about them. The Residential Property Consultation Document provides:

3.28 There are situations under the current rules in which gains accruing to a non-resident non-natural person can effectively be charged to CGT. In particular:

- Section 13 of TCGA 1992, which attributes gains of certain non-resident companies to UK participants; and
- Sections 86 and 87 of TCGA 1992, under which settlors or beneficiaries of non-resident trusts can be charged to tax on gains accruing to the trustees.

3.29 As part of the development of the policy, the interactions between such provisions and the rules for the extended regime will be considered with the aim of avoiding unnecessary complexity and to ensure a sensible prioritisation of charging provisions.

70.4.8 *Reliefs*

The Residential Property Consultation Document provides:

3.9 The current CGT regime includes a number of specific reliefs or special treatment for particular arrangements. The intention is to replicate such treatment for their non-resident equivalents, where there is a valid case for doing so, and where it is practically possible without opening up the regime to avoidance opportunities.

In the absence of further details, one can infer that the author of the consultation document had not worked out any answers to these issues.

70.4.9 *Interaction with private residence relief*

The Residential Property Consultation Document provides:

3.30 Sections 222 to 226B TCGA 1992 will, in general, not be

available as the disposal will not be by an individual. Where a resident non-natural person is eligible for PRR under the existing CGT regime, it is proposed that similar treatment will apply to their non-resident equivalents, subject to this being practically possible and consideration of any avoidance concerns.

70.4.10 Interaction with DTAs

The Residential Property Consultation Document provides:

3.31 Double Taxation Agreements routinely preserve the right of the Contracting State to tax gains arising from the disposal of immoveable property situated in that State. As part of the consultation and design process, the Government will ensure that the final design of the proposed CGT extension is compatible with international tax agreements and EU law.

70.4.11 Partnerships

The Residential Property Consultation Document provides:

3.10 Partnerships carrying on a trade or business will be treated as transparent in accordance with the normal CGT rules. Any gain on the disposal of a UK residential property would, as now, be apportioned between the partners in accordance with their respective shares in the property. To the extent that any gains are apportioned to ‘non-natural’ partners resident outside the UK, tax would be chargeable on them.

70.4.12 Charity reliefs

The Residential Property Consultation Document provides:

3.11 A charity currently exempt from tax on its gains will similarly be exempt from the extended CGT regime.

70.4.13 The next steps

The Residential Property Consultation Document provides:

1.25 ... The Government will publish a response to the consultation in

the autumn. Draft legislation will be published for consultation in the autumn and introduced in Finance Bill 2013.

The professional bodies will certainly be severely critical. But I expect that HMRC will pay no attention - some will in fact be pleased¹⁴ - and procure the legislation along the proposed lines.

70.5 Homes held by non-natural persons: commentary

Budget 2012 introduced three new charges, the SDLT penal rate, the annual SDLT charge, and the CGT non-natural person charge. They should be evaluated as parts of a single programme of tax reform.

70.5.1 Purpose of the new charges

The purpose of the SDLT penal rate and annual charge is not to raise tax but to force properties out of corporate ownership.

EN FB 2012 provides:

This measure [the SDLT penal rate] aims to disincentivise the ownership of high value residential property in structures that would permit the indirect ownership or enjoyment of the property to be transferred in a way that would not be chargeable to SDLT. The intention is to stop or reduce the number of properties that will enter such complex ownership structures.¹⁵ Taken together with the introduction of an annual charge in 2013 on such property owned by the same sorts of non-natural persons, this will result in a reduction in the number of high value properties owned in such structures.

The Residential Property Consultation Document provides:

¹⁴ See 1.9 (The tax consultation framework).

¹⁵ It difficult to believe that the authors of the EN were so unfamiliar with private client practice that they thought that companies could be properly described as "complex ownership structures", though I suppose it is not impossible. Readers may infer that the authors of the EN were concerned with soundbites, not accuracy, and were not interested in engaging in serious debate; or at least, did not regard an EN as the place to provide material for serious debate. One wonders what the authors of the EN would say about the relief given to companies holding non-UK properties; see 70.27 (Foreign homes relief).

2.2 The Government is concerned at the prevalence of enveloping of high value residential properties and the potential for SDLT avoidance on subsequent changes of ownership of the properties. The annual charge is a new tax being introduced to encourage those who own UK residential properties valued over £2 million in envelopes to take them out of those envelopes. This will ensure that any future transfers of the property will be subject to SDLT, and that a fair share of tax is paid on these properties...

2.12 The aim of the new annual charge is both to deter avoidance and to ensure the owners of high value residential property pay their fair share of tax. The charge will encourage individuals who have put such high value property into envelopes for reasons including tax avoidance to take them out, thereby ensuring that the onward sale of the property is subject to SDLT and a fair share of tax is paid. Individual owners of high value residential property who wish for other reasons to continue to hold them within an envelope will have to pay a charge to do so...

2.59 The aim of the annual charge is to ensure the owners of high value residential property do not avoid paying their fair share of tax by encouraging the de-enveloping of property and imposing a significant charge on those individuals who chose to keep their property within an envelope.¹⁶

The object is not to raise tax but to prevent the use of corporate owners of companies. Thus the 15% SDLT charge is not a tax but a penalty.

70.5.2 *Targeting*

The Residential Property Consultation Document provides:

2.5 The Government recognises that there are a number of reasons, in addition to offering a future SDLT avoidance opportunity, why residential properties are enveloped. For companies this is likely to be the default (and indeed only) option, supporting good business practice and limiting liability. For individuals, this may include: to protect ownership, for inheritance planning, for family reasons, and to comply with laws in foreign jurisdictions.

2.6 The Government aims to target the annual charge at those circumstances where tax avoidance may be a significant factor whilst

16 See 70.2.2 (“Enveloping”).

minimising the wider impact for bona fide businesses

There is little sign of this in the consultation document, which suggests that all companies (except land dealers) will be caught.

70.5.3 *Merits of the new charges*

The stated objection to corporate purchasers is that resale of the company allows avoidance of SDLT. This raises various questions:

- (1) How much SDLT has been avoided in this way? I suspect not much:
 - (a) In my experience SDLT was not usually a major factor in the choice of a company purchaser (IHT and non-tax reasons were much more important)
 - (b) Purchasers would generally prefer to purchase the land, not the company.

It might be that the increase in the non-corporate rate of SDLT, now 7%, would increase attractiveness of this SDLT planning.

- (2) Are there other or better methods of addressing the problem? One might refer, for instance, to former HMRC proposals on an SDLT charge for land-rich companies.

None of this has been addressed.

There are a number of serious objections:

- (1) This is the rabbit out of hat approach to tax reform, which the Government promised to renounce in the tax consultation framework.¹⁷
- (1) The uncertainty imposes imponderable choices on those currently wishing to purchase property or wondering what to do with existing structures. As details become available, the contents of this chapter will need to be reviewed in the light of the responses to consultation, again in the light of draft legislation, and again in the light of the Finance Bill and the Finance Act 2013.
- (2) The new programme is a breach of the promise of stability¹⁸ – though perhaps no-one had seriously believed that.
- (3) The new CGT charge is highly anomalous in its scope:
 - (a) It has a trust/non-trust anomaly, discriminating against non-resident trusts in favour of purchase by non-resident individuals.
 - (b) It has a company/non-company discriminating against corporate

17 See 1.9 (The tax consultation framework).

18 See 1.8 (The promise of stability).

ownership. There are good non-tax reasons why it may be desired to purchase land in a company or a trust. In fact most offshore trusts used foreign companies to hold land, as a matter of routine, regardless of tax, because:

- (i) limited liability
- (ii) conflict of laws issues; the validity of a disposition of immovable property and the settlor's capacity to make it are determined by the law of the State where the property is situated.
- (iii) convenience of segregation of a trustees assets.

The new law may reflect an unexamined assumption that tax planning involving residential properties is more objectionable than other tax planning. It may reflect the Liberal Democrat desire for a mansion tax (the unsatisfactory nature of the reforms reflecting the fact that “mansion tax” is a slogan: apart from the fact that it involves high-value residential property, it does not have any settled meaning. But there is no reason to think that anyone who understands the current law and practice had thought about the issues at all.)

Law enacted on this basis is cannot be expected to be satisfactory and is not likely to be stable. But there seems to be no prospect of serious discussion taking place.

70.5.4 *A proposal*

The author's solution would be:

- (1) Scrap the new CGT charge: as the object is to penalise the use of companies, not to raise tax, the SDLT penal and annual charges are sufficient.
- (2) Make the SDLT charges avoidable by an election that the company should be regarded as transparent for UK IHT, CGT and SDLT. The election out of the POA charge is a precedent. That would allow the use of companies for non-tax reasons to continue.

70.6 Home owned by estate IP trust

The IHT position is broadly the same as absolute ownership by the foreign domiciled individual. This course is only practical, however, for estate IPs where:

- (1) the life tenant is the settlor; or
- (2) the settlor is dead; or
- (3) the settlor has no interest in the settlement; or
- (4) the settlor can be excluded from a sub-fund (which will hold the UK home); or
- (5) the settlement was made before 18 March 1986.

Otherwise HMRC may argue that there is a charge on the death of the settlor under the GWR rules.¹⁹

The use of a non-resident trust involves a capital payment received in the UK, giving a possible s.87 charge if chargeable gains accrue to the trust. Chargeable gains may arise on a disposal of the house, if the private residence exemption is not fully available, for instance if:

- (1) the grounds exceed the “permitted area”; or
- (2) there is another private residence which qualifies for the relief; or
- (3) in relation to chattels which do not qualify for exemption.

70.7 Home owned by discretionary trust

In principle a discretionary trust or non-estate IP trust could hold the UK home between ten year anniversaries. This might be a convenient short or medium term way to hold a family home. This course is only practical, however, where:

- (1) the settlor is dead; or
- (2) the settlor has no interest in the settlement; or
- (3) the settlor can be excluded from a sub-fund (which will hold the UK home); or
- (4) the settlement was made before 18 March 1986.

Otherwise HMRC may argue that there is a charge on the death of the settlor under the GWR rules.²⁰

70.8 Loan secured on property

It clearly makes IHT sense for any existing loans to be secured on the UK property. It is also possible to borrow in order to mitigate IHT.²¹ Commercial borrowing is likely to be an expensive solution to the IHT

¹⁹ See 59.8 (Gift of excluded property).

²⁰ See 59.8 (Gift of excluded property).

²¹ See 61.1 (IHT deduction for debts).

problem but borrowing from a friendly trust may be practical.

70.9 Home owned by non-resident company

70.9.1 *IHT advantages and sham*

For inheritance tax, the obvious course is for the UK home of a foreign domiciliary to be owned beneficially by a foreign company. The shares in the company are not UK situate, and qualify as excluded property for IHT. The company would usually be held by an offshore trust.

An argument that an arrangement of this kind was a sham was rejected in *Skyparks v Marks* [2001] WTLR 607. But sham is a question of fact in each case. In some badly created structures the taxpayer may wish to argue that the company is a sham, or that it holds its assets as nominee, to avoid a benefit in kind charge or other charges associated with companies.

70.9.2 *Ownership by non-resident company: CGT*

The company will not be subject to CGT or corporation tax on chargeable gains provided it is not resident.

If the company is owned by an individual, the gains will be treated as accruing to the individual under s.13 TCGA.²²

If the company is held by a trust, the gains would be treated as accruing to the trust, and so be s.2(2) amounts for s.87 purposes.

70.10 Home owned by company: benefit in kind charge

The charge on living accommodation is to be found in ss.97 and 102 ITEPA:

97 Living accommodation to which this Chapter applies

(1) This Chapter applies to living accommodation provided for—

- (a) an employee, or
 - (b) a member of an employee's family or household,
- by reason of the employment.

...

102 Benefit of living accommodation treated as earnings

²² See 50.27 (Private residence relief).

- (1) If living accommodation to which this Chapter applies is provided in any period—
 - (a) which consists of the whole or part of a tax year, and
 - (b) throughout which the employee holds the employment, the cash equivalent of the benefit of the accommodation is to be treated as earnings from the employment for that year.
- (2) In this Chapter that period is referred to as “the taxable period”.

The EI Manual contains much interesting material on these provisions which cannot be set out here for lack of space.

70.11 “Employee” “Family” and “household”

70.11.1 “Employee”

For the meaning of “employee” see 13.2.1 (“Employer”, “employee” and “employment”) and 70.15 (Who is a shadow director?).

Former employees are not caught. HMRC agree. The EI Manual provides:

EIM11408 - Living accommodation: meaning of by reason of the employment: provided by someone other than the employer
[February 2006]

...Part 3 Chapter 5 ITEPA 2003 does not apply to a pensioner or a former employee. But if the continued use of living accommodation is provided after termination of employment see EIM12805 onwards [Termination payments and benefits]...

The disguised remuneration rules would need consideration.

70.11.2 “Family”

Section 721(4) ITEPA defines “family”:

For the purposes of this Act the following are members of a person’s family—

- (a) the person’s spouse or civil partner,
- (b) the person’s children and their spouses or civil partners,
- (c) the person’s parents, and
- (d) the person’s dependants.

Stepchildren are excluded, as are parents-in-law. They will however still qualify as family if they are dependants.

Illegitimate children do not count as “children”; see s.721(6) ITEPA.²³ This is anomalous by contemporary standards but it will not often be relevant and the parent of illegitimate children is not likely to complain. Section 721(6) should obviously be repealed.

70.11.3 “Household”

Section 721(5) ITEPA provides:

For the purposes of this Act the following are members of a person’s family or household—

- (a) members of the person’s family,
- (b) the person’s domestic staff, and
- (c) the person’s guests.

70.12 “By reason of the employment”

The expression “by reason of the employment” is extended by s.97(2) ITEPA so it does not mean “by reason of the employment” at all. In order to follow s.97(2) one needs to read it with s.97(1):

(1) This Chapter applies to living accommodation provided for—

- (a) an employee, or
- (b) a member of an employee’s family or household,

by reason of the employment.

(2) Living accommodation provided for any of those persons by the employer is to be regarded as provided by reason of the employment ...²⁴

Thus:

²³ In Scots law there are no illegitimate children so this does not apply to Scots domiciled individuals: s.21 Family Law (Scotland) Act 2006.

²⁴ For completeness: s.97(2) continues:

“unless—

- (a) the employer is an individual, and
- (b) the provision is made in the normal course of the employer’s domestic, family or personal relationships.”

The exception is not relevant here.

- (1) Where the accommodation is provided by the employer, one does not ask whether it is actually provided by reason of employment: it is deemed to be so provided.
- (2) Where accommodation is provided by a person other than the employer, the living accommodation charge only applies if the accommodation is actually provided by reason of the employment.

Suppose a company A owns living accommodation (occupied by T) and holds another company, B Ltd:

If T is an employee of A Ltd, T is in principle taxable on the living accommodation. The fact that the property is not provided by reason of the employment is irrelevant as the deeming provision in s.97(2) applies. If T is an employee of B Ltd, T is only taxed if T actually occupies the property by reason of T's employment.

B Ltd is (by definition) a person involved in providing the accommodation²⁵ but B Ltd is not deemed to provide the accommodation.

70.12.1 *Third party benefits*

The EI manual provides:

EIM20503 - The benefits code: "by reason of the employment": expenses paid and benefits provided by someone other than the employer: third party benefits [December 2011]

Expenses payments and benefits made or provided by someone other than the employee's employer are often called "third party benefits".

Such payments and benefits are within the rules in the benefits code (EIM20006) where they are made or provided "by reason of the employment" (EIM20501) under the normal meaning of those words. But they are not chargeable under those rules if they are otherwise chargeable as earnings, for example, under Section 62 ITEPA 2003.

²⁵ See 70.17.1 (Person involved in providing the accommodation).

Examples of benefits which are chargeable as earnings are at EIM00530 onwards.

Interaction of "by reason of the employment" with Section 62 ITEPA 2003

It is important to understand the distinction between Section 62 on the one hand, and Sections 70(1) and 201(2) on the other hand. Section 62(1) applies to earnings "in relation to an employment", including anything that is an "emolument of the employment" (Section 62(2)(c)). Section 70(1) and Section 201(3) apply to expense payments and benefits provided "by reason of the employment". Section 62 is based on what was previously Section 19 ICTA 1988, which charged to tax emoluments "from an employment". Case law shows that the phrase "by reason of the employment" has a wider meaning than "from the employment" (EIM00600). The words "from the employment" are not reproduced in Section 62 but earnings chargeable under that section include emoluments "of the employment" and in this context "of the employment" has the same meaning as "from the employment".

Case law guidance: by reason of the employment

In *Wicks v Firth* (56 TC 338) Lord Denning said that "by reason of the employment" covered cases where an employee would not have received a benefit unless he had been an employee. The employment must be one of the causes of the benefit being provided. It need not be the sole cause or even the main one. But it must be an operative cause in the sense that it was a condition of the benefit being granted.

In the same case Lord Oliver said that the question to ask is "what is it that enables the person concerned to enjoy the benefit?" If the answer to that question properly includes "the employment" as one of the factors then that is "by reason of" the employment.

In *Mairs v Haughey* (66 TC 273) Lord Chief Justice Hutton preferred Lord Oliver's way of expressing the test. In particular where the employment was only an incidental factor in past history, and not a current reason for the benefit being provided, his view was that did not amount to "by reason of employment".

These judicial comments were given as general observation and whilst they carry weight they are not a legally binding restriction on the meaning of the words "by reason of". In practice you can normally assume that a benefit which is provided by someone other than the employer and which is plainly connected with the employee's employment has been provided by reason of the employment...

The EI Manual provides:

EIM11408 - Living accommodation: meaning of by reason of the employment: provided by someone other than the employer
[February 2006]

... Where the living accommodation is provided by someone other than the employer, it is necessary to show that the individual's employment is a factor in its provision. The employment need not be the main reason or the only one so long as it is a factor (see EIM20503).

This goes too far and is not consistent with the first passage cited above.

70.13 Accommodation available but not used

EIM provides:

11405 Living accommodation: meaning of provided: the legislation
[February 2006]

...

Provided is not defined in the legislation and its meaning has not been considered by the courts in relation to a charge under s.145 ICTA 1988. (s.145 has now become part of Part 3 Chapter 5 ITEPA 2003). The word provided must be given its ordinary dictionary meaning of supplied or furnished with a thing.

In some cases provided will mean available for use whereas in others it will mean actually used (see EIM11406 for more detail). The meaning of provided is often an issue in the case of provided holiday living accommodation.

11406 Living accommodation: Meaning of provided: Practical considerations [February 2006]

For details of the relevance of the word "provided" in living accommodation cases see EIM11405.

In deciding in a particular case whether provided means available for use, or means actually used, the following questions should be asked.

- Who can use the living accommodation? We accept that if living accommodation is genuinely available for use by more people than could actually use it at any one time then provided only means the periods actually used. For example if five unrelated employees were allowed to use an employer owned two bedroom holiday villa we would only seek a provided living accommodation charge on each employee for the period in which that employee actually used the villa.

- Why was the living accommodation bought or rented and how has it been used since acquisition? If the living accommodation was bought as holiday accommodation for a director and family, provided is likely to mean available for use. By contrast if it was bought as a genuine letting business by the employer and has been let out commercially then provided will only mean the periods of actual use by the employee.

For examples illustrating these points see example EIM11421 onwards.

EIM 11421 to 11423 provides three examples:

11421. Living accommodation: Meaning of provided: Example 1 [October 2007]

[Example 1 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The employer advises that the sole reason the property was bought was as a holiday home for the husband and wife. It has only been used by them as a holiday home.*

[Emphasis added to show how example 1 differs from the others]

We would argue in this case that provided is equivalent to available for use. Assuming that the flat was habitable for the whole of the year we would seek a benefit under Part 3 Chapter 5 measured on availability for the whole of the year. The employer may argue that the husband and wife work full time and that this prevents them using the flat for more than the 4 weeks in the year of actual use and so they are effectively only provided with it for 4 weeks. We do not accept that argument.

If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91b the Inland Revenue restricts the cash equivalent of the benefit to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £15,600 (£500 × 26 + £100 × 26). Under s.108 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

11422. Living accommodation: Meaning of provided: Example 2 [October 2007]

[Example 2 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife

who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The company bought the property to let as a commercial letting business. They have employed professional agents to let the property and have managed to let the property for 12 weeks of the year in addition to the period it was used by the husband and wife directors.*

[Emphasis added to show how example 2 differs from the others]

In this case we would accept that provided is equivalent to actual use.

If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91b the Inland Revenue restricts the cash equivalent of the benefit to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £1,200 ($£15,600 \times 4/52$). Under s.108 ITEPA 2003 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

You may ask why the s.105 ITEPA 2003 charge is not £1,600 (being 3 weeks at £500 in the skiing season and 1 week at £100 outside the season). The answer is that the wording of s.105(3) requires us to look at a proportion of the annual rent rather than the rent for the actual weeks it was used.

11423. Living accommodation: Meaning of provided: Example 3 [December 2006]

[Example 3 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The employer says that the property was bought to let commercially and for the use of other employees of the company. In fact there have been no commercial lettings during the year and it has only been used for one week of the year by an employee of the company who was the director's secretary.*

[Emphasis added to show how example 3 differs from the others]

This is a case where in practice we would seek to test whether what the employer was telling us was correct. For example, what if any evidence is there of attempts to let the property commercially or to advise other employees of the company of its availability for use by them? Based on that evidence it is then a matter of judgement whether in reality the sole reason the property was bought was as a holiday home for the husband and wife directors, in which case the tax consequences would be as in example EIM11421. Or it may be that genuine attempts have been made to let the property commercially and make it available for use by other employees of the company, in which case the tax consequences in example EIM11422 will follow.

70.14 Shadow directors

The House of Lords decided in *R v Dimsey & Allen* 74 TC 263 that the benefit in kind provisions apply to shadow directors.²⁶ The reasoning continues to apply under ITEPA. The charge is unfair to a shadow director who does no work for the company. Income tax should be a tax on income. This is a tax on nothing.²⁷

EI Manual states:

11413 Living accommodation: Avoidance area: Shadow directors [February 2006]

A person in accordance with whose directions or instructions the directors of a company are accustomed to act is deemed to be a director of that company by s.67(1) ITEPA. Where such a person (known as a shadow director) is provided with living accommodation by the company the individual will be within Part 3 Chapter 5 ITEPA in the same way as if the individual had held a formal appointment as a director. ...

Many shadow directors are individuals who, although not domiciled in the UK, have come to work and reside here. In order to avoid a possible charge to inheritance tax, which could be imposed if such an individual died whilst working in the UK, an arrangement is made to set up an offshore company that owns the UK property in which the individual lives. Where the individual is a shadow director of that offshore company s.97(2) ITEPA deems the UK property to be provided to the shadow director by reason of the deemed employment.

In practice taxpayers (if they have considered the matter at all) generally seem to have taken the view on their facts that they are not shadow directors. HMRC have themselves had to identify the cases suitable for investigation. But in the author's experience even cases that HMRC have identified are not often pursued with much gusto. Perhaps (this is surmise) HMRC "officially" take the point to deter IHT planning, but at

26 This reversed an unreported Special Commissioners' decision that the provisions did not apply to shadow directors (or even properly appointed directors) unless they were actually employees. That decision remains relevant to penalty and negligence issues relating to periods before the decision in *Dimsey & Allen*.

27 The problem did not unduly concern the House of Lords because of the countering unfairness to HMRC of the case where the services of a shadow director were as valuable as a full-time employee. It appears that two wrongs made a right to tax.

the same time don't bother much about it in practice because of the unfairness of the charge. If so, the tactic (while contrary to the rule of law) works up to a point. Taxpayers cannot afford to plan on the assumption that HMRC's benign neglect of the provisions will apply to them.

70.15 Who is a shadow director?

Section 67(1) ITEPA provides:

In the benefits code “director” ... includes any person in accordance with whose directions or instructions the directors of the company (as defined above) are accustomed to act.

Such a person is referred to as a “shadow director”.²⁸

In *Secretary of State for Trade and Industry v Deverell* Morritt LJ comments on this in numbered paragraphs:²⁹

(1) The definition of a shadow director is to be construed in the normal way to give effect to the parliamentary intention ascertainable from the mischief to be dealt with and the words used. In particular, as the purpose of the Act is the protection of the public and as the definition is used in other legislative contexts, it should not be strictly construed because it also has quasi-penal consequences in the context of the Company Directors Disqualification Act 1986.

This suggests that the comments in *Deverell* will apply in all contexts where the standard definition of “shadow director” is used, including tax contexts. It is difficult to argue that the “shadow director” concept should have a different meaning in a tax context than in the director disqualification context of *Deverell*. But *Deverell* is considering “shadow directorship” in the context of a commercial trading company. The position of a relatively quiescent property holding company is different.

28 A note on terminology. This useful and now familiar label was first used in the Companies Act 1980. The wording of the concept behind the label goes back to the Companies (Particulars as to Directors) Act 1917.

29 [2001] Ch 340 at p.354. *cf.* Kerr LJ's comment on “quotable pontific paragraphs, preferably numbered” in his readable memoir *As Far as I Remember*, Hart Publishing, (2006) p.285.

... (2) The purpose of the legislation is to identify those, other than professional advisers, with real influence in the corporate affairs of the company.

This paraphrase does not take us very far because it only raises the question as to what is meant by “real³⁰ influence”.

But it is not necessary that such influence should be exercised over the whole field of its corporate activities. ...

This is uncontentious. The income tax charge could apply where a trust held a company holding both a home and investments, even though the “shadow director” did not give “instructions” relating to the investments but only to the home.

(3) Whether any particular communication from the alleged shadow director, whether by words or conduct, is to be classified as a direction or instruction must be objectively ascertained by the court in the light of all the evidence.

Obviously.

In that connection I do not accept that it is necessary to prove the understanding or expectation of either giver or receiver. In many, if not most, cases it will suffice to prove the communication and its consequence. Evidence of such understanding or expectation may be relevant but it cannot be conclusive.

This is extraordinary. “Directions or instructions” are a subset of “communications” and the feature that distinguishes them is that a person giving instructions expects them to be followed and the person receiving them understands this.

Certainly the label attached by either or both parties then or thereafter cannot be more than a factor in considering whether the communication came within the statutory description of direction or instruction.

30 The dangerous and beguiling word “real” is normally an indicator of vague if not sloppy legal thinking.

This at least is correct.

(4) Non-professional advice may come within that statutory description. The proviso excepting advice given in a professional capacity³¹ appears to assume that advice generally is or may be included.

This is equally extraordinary, for the concept of “directions or instructions” is the antithesis of the concept of “advice”. The distinguishing feature is that the former is mandatory and the other is not. Of course, one may slide into the other. For instance, if a solicitor advises a company that a particular act is required by law, that failure to act would be a criminal offence, and that if the company broke the law the solicitor would refuse to act, such advice may arguably be characterised as a direction or an instruction. Since the proviso excepting advice given in a professional capacity can be taken to refer only to this situation it does not shed any light on the general meaning of “shadow director”. The inference from the proviso excepting advice is invalidly drawn.³²

Moreover the concepts of “direction” and “instruction” do not exclude the concept of “advice” for all three share the common feature of “guidance”.

The less said about this line of reasoning the better.

31 See s.67(2) ITEPA:

“... a person is not to be regarded as a person in accordance with whose directions or instructions the directors of the company are accustomed to act merely because the directors act on advice given by that person in a professional capacity.”

32 The Court of Appeal overlooked the explanation in *Gore-Browne on Companies* (loose-leaf), para 25.4.2:

“The saving for professional advice might appear, at first sight, to support a wider interpretation of the definition, for the saving would be unnecessary unless a wider meaning were given to that definition. There are two possible explanations. The first, and probably correct, explanation is that the saving appears as a result of pressure from the relevant professions to ensure that no attempt can be made even to argue that their activities are, as such, within the scope of shadow director provisions in company legislation. The second is that it is intended to deal with the case where professional advice is obtained from a person who happens to be a member of the company and, as an ‘insider’, potentially a shadow director.”

(5) It will, no doubt, be sufficient to show that in the face of “directions or instructions” from the alleged shadow director the properly appointed directors or some of them cast themselves in a subservient role or surrendered their respective discretions. But I do not consider that it is necessary to do so in all cases. Such a requirement would be to put a gloss on the statutory requirement that the board are “accustomed to act” “in accordance with” such directions or instructions. It appears to me that Judge Cooke, in looking for the additional ingredient of a subservient role or the surrender of discretion by the board, imposed a qualification beyond that justified by the statutory language.

If the statutory language were: “in accordance with whose *wishes* the directors were accustomed to act” this would be a fair comment. But the expression “directions or instructions” shows that the position must be one where the shadow director commands and the properly appointed directors obey.

The points made in the passage are wholly negative. That is, in determining the issue of “shadow directorship”:

- (1) The understanding or expectation of the parties is *not* conclusive.
- (2) The label attached by the parties is *not* conclusive.
- (3) The fact that the communication is “advice” is *not* conclusive (except in the case of professional advice).
- (4) The fact that the properly appointed directors surrender their discretions or act in a “subservient” role is *not* essential.

This does not answer the question: how *does* one identify a shadow director? The mere fact that there is a stream of communications from the individual to the company, which is acted on by the company, is not conclusive. The author regularly sends “communications” to the internet bookshop Amazon, and Amazon act on those communications without fail. Yet the author is not a shadow director of Amazon. The author regularly sends directions (a cheque is a direction) to his bank and Barclays act on those directions without fail. Yet the author is not a shadow director of Barclays Bank. In the 4th edition of this work I therefore concluded:

that one can expect some back-tracking, refinement or qualification from the Courts in cases they regard as more meritorious than that of Mr. Deverell.

This has now been confirmed by *Ultraframe v Fielding*:³³

1267 ... where the alleged shadow director is also a creditor of the company, he is entitled to protect his own interests as creditor without necessarily becoming a shadow director.

1268 [Counsel] submitted that it is critical to distinguish the position of a lender (whether or not also a shareholder) from that of a director. A lender is entitled to keep a close eye on what is done with his money, and to impose conditions on his support for the company. This does not mean he is running the company or is emasculating the powers of the directors, even if (given their situation) the directors feel that they have little practical choice but to accede to his requests. Similarly with customers who may, because of their buying power, be able effectively to dictate conditions to their suppliers (or the other way around). In other words a position of influence (even a position of strong influence) is not necessarily a fiduciary position. To find otherwise would place a wholly unfair and unnatural burden on men of business. In broad terms, I accept this submission.

The approach which applies to a creditor of the company also applies to a beneficiary of a trust which holds the company: they are entitled to “protect his own interests ... without necessarily becoming a shadow director ... In other words a position of influence (even a position of strong influence) is not necessarily a fiduciary position [ie is not necessarily a shadow directorship].”

HMRC sometimes argue that where someone resides in a property held by a company which is held by a trust of which that person is a beneficiary, it is (at least) highly likely that that person must be a shadow director.³⁴ This is unjustified for the reason set out in *Ultraframe*.

Suppose a person treats the property owned by the company as their own and has no dealings with the directors: they just ignore them. They do nothing (except perhaps charge their fees). In such a case the company may be a sham (or nominee ship). Whether or not that is so, the individual is not a shadow director. They give no instructions.

33 [2005] EWHC 1638, [2007] WTLR 835.

34 Note that there is no support for this view in the HMRC Manuals. Employment Income Manual 11413 states correctly that *where* an individual residing in property is a shadow director, there is a benefit-in-kind charge. It conspicuously does *not* state that the mere fact of occupation makes a shadow directorship “highly likely”.

A non-resident person may be a “shadow director”.

70.15.1 *When is an agent of a company a shadow director?*

HMRC accepted that the activities of an agent appointed by trustees to manage the day to day affairs of a trust are not normally relevant in determining the place of general administration (formerly relevant for the purposes of CGT trust residence).³⁵ It is suggested that a similar principle applies in the context of shadow directorship. An agency agreement under which the occupier of a property is responsible for routine maintenance matters on behalf of the company would not make the individual a “shadow director” as long as the decision to enter into contract was properly made by the directors and the directors properly supervise the work of the individual. This should not be difficult if the directors understand their duties are to all beneficiaries of the trust (not just to the settlor) and if the individual occupier of the property also understands this. It would be different if the agency agreement covered matters not usually delegated by an investment company to an agent.

70.15.2 *Arranging that an occupier is not a shadow director*

Suppose an existing company purchases a home on the open market for a UK resident foreign domiciliary. The choice of a home is a personal one and the individual would normally have to give a “communication” to the company which HMRC may regard as “directions or instructions”. So it would normally be difficult to ensure that the individual was not a shadow director (at least applying *Deverell* at face value).

The position is different if:

- (1) trustees purchase property directly, and
- (2) the trustees transfer the property to a foreign company on their own initiative and without reference to the occupier.

The trustees may reason that if the life tenant dies (or on a ten year anniversary), the UK property would not be excluded property and a charge to inheritance tax would arise – the liability for which would fall on the trust fund. In discharge of their fiduciary duty they could transfer

35 See the 5th edition of this book, para 5.6.2.

the property to a foreign company to create excluded property and protect the trust from the liability. The point is that the occupier has *not* instructed or even requested the company to purchase the property for them.³⁶ SDLT makes this expensive but the variant idea of assigning a contract entered into by the trustees may be practical.

It would be best if the directors and trustees were separate persons. All communications should be through the trustees and not the directors of the company. If the foreign domiciliary desires to sell and, perhaps, purchase another property, they should communicate their wishes to the trustees. Then:

- (1) The trustees could put the company into liquidation. The liquidator would sell the property.
- (2) Alternatively, the trustees may sell the company. That has stamp duty advantages, and should be attractive for a purchaser who is a foreign domiciled individual or non-resident trust.

The procedure may then be repeated for a new purchase. In these circumstances it would continue to be difficult for HMRC even to argue that the occupier was a shadow director.

70.16 The cash equivalent: ss.105 and 106 computations

The charge is on the “cash equivalent”. Section 103 ITEPA provides:

Method of calculating cash equivalent

- (1) The cash equivalent is calculated—
 - (a) under s.105 if the cost of providing the living accommodation does not exceed £75,000; and
 - (b) under s.106 if the cost of providing the living accommodation exceeds £75,000.

Thus there are two methods of calculating the cash equivalent, here called a s.105 computation and a s.106 computation. This is for historical reasons, the s.106 computation having been introduced by the FA 1983 to supplement the ancestor of s.105. This structure makes the law twice as complicated as it need be.

³⁶ I am grateful to Peter Vaines for this suggestion.

70.17 Cost of providing accommodation

One needs to know the “cost of providing living accommodation”:

- (1) in order to decide between the s.105 and s.106 computation;
- (2) in order to make the s.106 computation (if applicable, as it usually is).

This expression is defined in s.104:

General³⁷ rule for calculating cost of providing accommodation

For any tax year the cost of providing living accommodation is given by the formula $A + I - P$

In short, *A* is Acquisition cost, *I* is Improvement cost, and *P* is Payment of reimbursement. In full detail:

A is any expenditure incurred in acquiring the estate or interest in the property held by a person involved in providing the accommodation,

I is any expenditure incurred on improvements to the property which has been incurred before the tax year in question by a person involved in providing the accommodation, and

P is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—

- (a) reimbursement of *A* or *I*, or
- (b) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

I consider reimbursement further in 70.24 (Property purchase financed by the foreign domiciliary).

70.17.1 *Person involved in providing the accommodation*

Section 112 ITEPA provides the wide definition:

For the purposes of this Chapter “person involved in providing the accommodation” means any of the following—

- (a) the person providing the accommodation;
- (b) the employee’s employer (if not within para (a));

³⁷ For the exception see 70.20 (Revaluation of cost in cases of delayed occupation).

- (c) any person, other than the employee, who is connected³⁸ with a person within para (a) or (b).

This defined phrase is only used in the definition of “cost of providing living accommodation”.³⁹ ITEPA EN explains:

412. This definition makes it clear that it is necessary to look beyond the employer and the apparent owner of an interest in the accommodation. This is anti-avoidance legislation to counter schemes which depress the cost to the employer by using intermediate owners of interests.

70.18 Accommodation costing £75,000 or less: section 105 computation

Section 105 applies where the cost of providing accommodation does not exceed £75,000. This was a meaningful figure when the legislation was introduced in 1983 but inflation, the Chancellor’s friend, has whittled away the real value of this limit so it must be exceptional now to find a purchase of less than £75,000. One might think the s.105 computation was a dead letter and one can turn directly to s.106. But s.106 refers back to s.105 so one needs to make the s.105 computation even in a s.106 case.

Section 105 ITEPA provides:

Cash equivalent: cost of accommodation not over £75,000

- (1) The cash equivalent is to be calculated under this section if the cost of providing the living accommodation does not exceed £75,000.
- (2) The cash equivalent is the difference between—
 - (a) the rental value of the accommodation for the taxable period, and
 - (b) any sum made good by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The key concepts are “rental value of the accommodation” and “making

38 Section 718 ITEPA provides:

“Section 993 of ITA 2007 (how to tell whether persons are connected) applies for the purposes of this Act.”

39 See 70.17 (Cost of providing accommodation) and 70.20 (Revaluation of cost in cases of delayed occupation).

good”.

70.18.1 “*Rental value of the accommodation*”

As from 22 April 2009, s.105 ITEPA provides:

- (3) The “rental value of the accommodation” for the taxable period is (subject to subsections (4) and (4A) the rent which would have been payable for that period if the property had been let to the employee at an annual rent equal to the annual value. ...
- (4) Subsection (4A) applies where—
 - (a) a rental amount is payable by the person (“P”) at whose cost the accommodation is provided in respect of the whole or part of the taxable period (“the relevant period”), and
 - (b) the amount so payable is payable at an annual rate greater than the annual value.
- (4A) Where this subsection applies—
 - (a) subsection (3) does not apply to the relevant period, and
 - (b) instead the “rental value of the accommodation” for the relevant period is the rental amount payable by P in respect of the relevant period.
- (4B) A reference in subsection (4) or (4A) to a rental amount payable by P in respect of the relevant period is to the sum of—
 - (a) any rent for the period payable by P, and
 - (b) any amount attributed to the period in respect of a lease premium (see sections 105A and 105B)
- (5) If the rental value of the accommodation for the taxable period does not exceed any sum made good by the employee as mentioned in subsection (2)(b), the cash equivalent is nil.

The key expression is “annual value”. This is defined in s.110 ITEPA but it is not usually necessary to refer to that for UK property. ITEPA Explanatory Note states:

404. [Section 110] does not affect the Inland Revenue practice of using the gross rateable value as a proxy for “annual value”. That practice will continue. The main use of this section is to provide guidance on how to arrive at the annual value of properties for which rent is not paid and in practice is only needed in cases where no gross

rateable value can be found.⁴⁰

The EI Manual provides:

11434 Living accommodation: Meaning of annual value for United Kingdom properties [February 2006]

The amount of annual value for UK properties is set out in the table below.

Country	When first valued	Annual value to take
England & Wales	All cases	The 1973 gross rating value
Northern Ireland	All cases	The 1976 gross rating value
Scotland		$100/270 \times 1985$ gross rating value
Anywhere in UK	No gross rating value set	Ask the appropriate District Valuer to confirm any estimated figure provided by the employer that you want to check. ⁴¹

For the formula to convert a net rating value figure to a gross rating value figure see EI Manual 11438.

Thus for most purposes the s.105 computation is rateable value less sums “made good” to the employer. That is usually a trivial amount which has no relation to the value of the benefit of the living accommodation. It is a substantial amount in two cases:

- (1) where the company employer pays a market rent for the property;
- (2) where the property is not UK situate (and so there is no rateable value).

This practice (which is concession not law) exists for historical reasons. It is not surprising the Tax Law Rewrite did not think it appropriate to express all this in ITEPA. The rules are incoherent.

70.18.2 *“Making good”: meaning*

The EI Manual provides:

⁴⁰ Likewise the EN at Change 23:
“These provisions [ss.110 and 207 ITEPA] will clarify how to find annual values in respect of those properties for which the practice of using gross rateable values or a proxy for them is inapplicable – for example overseas properties. In the case of both these and other properties, all the current practices used in quantifying the cash equivalent of the benefit of living accommodation will continue.”

⁴¹ The Manual continues:
“If no such estimate is provided or the estimate is not acceptable the District Valuer will provide a (not negotiated) figure. If the taxpayer does not accept that figure the District Valuer will try to agree a figure with the taxpayer. For the procedure for referring to the District Valuer see EI Manual 11437.”

21120 The benefits code: What is meant by “making good” [July 2006]

“Making good” simply means giving something in return for the benefit. What is being made good is the expense incurred by the employer or other person providing the benefit. It follows that in order to make good that expense the employee will give money, or something that can be measured in money. Usually the employee will “make good”:

- by a direct payment or
- by deduction from salary or
- by a suitable debit to the employee’s current account in the employer’s books and records.

Any of these methods is acceptable.

The giving of services by the employee, or anything that is not measured in money terms is not “making good”, see *Stones v Hall* (60 TC 737).

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)⁴²

As regards “making good” by waiver of remuneration see EI Manual 21122.

It is clearly “making good” if:

- (1) the company pays the costs of maintenance and insurance; and
- (2) the individual reimburses the company by a cash payment.

Does the employee make good the cost if they pay the cost of maintenance and insurance directly? Section 110 ITEPA envisages that this expenditure will be paid by the employer. In addition, the maintenance of the building is probably not a “sum” made good. EIM Manual is equivocal:

11439. Living accommodation: annual value of UK property: Employee responsible for repairs or insurance. [June 2006]

...

An employee may be responsible for the cost of repairs or insurance under the terms of his or her lease or employment. *(This text has been withheld because of exemptions in the Freedom of Information Act*

42 [Author’s Note] The “text withheld” announcement was added in June 2006. Previously the Manual stated “In any case where the taxpayer argues that an interest-free loan has been made to this employer specifically to make good the cost or value of a benefit, make a submission to Personal Tax (Technical), Solihull.” That instruction probably survives in the withheld text.

2000.)⁴³ As regards the discharge of the employee's pecuniary liability in respect of such items *see* EIM00520.

Note that the payment of a sum "making good" may constitute taxable property income of the company which receives it. The IHT and CGT implications may also need to be considered, but the sums involved are not usually significant.

70.18.3 *Making good: timing*

EIM provides:

21121. The benefits code: When must making good take place?
[February 2006]

The legislation does not set a time limit on the "making good". This will usually happen shortly after the expense is incurred by the person providing the benefit. But you need not object to a belated "making good" if it is done within a reasonable time of the employee becoming aware that the chargeable benefit can be reduced, in whole or in part, by reimbursing the expense incurred by the provider.

What constitutes a "reasonable time" will depend on the facts of the case. Do not allow a deduction for "making good" which takes place after a charge to tax on the benefit concerned has become final and conclusive.

70.19 Accommodation over £75,000: section 106 computation

Section 106 ITEPA provides:

Cash equivalent: cost of accommodation over £75,000

- (1) The cash equivalent is calculated under this section if the cost of providing the living accommodation exceeds £75,000.
- (2) To calculate the cash equivalent—
 - Step 1* Calculate the amount that would be the cash equivalent if s.105 applied (cash equivalent: cost of accommodation not over

43 The text formerly read:

"If an employee claims an adjustment to the annual value (derived from the table in EI Manual 11434) because the facts of an employee's case are not those envisaged by s.110 ITEPA, make a full report to Personal Tax (Technical), Solihull."

It seems a safe bet that that passage survives in the withheld text.

£75,000).

See 70.18 (Accommodation costing £75,000 or less: section 105 computation).

Step 2 Calculate the following amount (“the additional yearly rent”)—
 $ORI \times (C - £75,000)$

In short, *ORI* is **O**fficial **R**ate of **I**nterest; *C* is **C**ost. In full detail:

ORI is the official rate of interest in force for the purposes of Chapter 7 of this Part (taxable benefits: loans) on 6 April in the tax year, and
C is the cost of providing the accommodation calculated—

- (a) in accordance with s.104 (general rule for calculating cost of accommodation),⁴⁴ or
- (b) in a case where s.107 applies (special rule for calculating cost of providing accommodation), in accordance with that section instead.⁴⁵

The label “additional yearly rent” is misleading: the “additional yearly rent” calculated in this way will not bear a close relationship with any actual market rent.

Step 3 Calculate the rent which would have been payable for the taxable period if the property had been let to the employee at the additional yearly rent calculated under step 2.

This step reduces the “additional *yearly* rent” to that for the “taxable period” (defined in s.102(2)).

Step 4 Calculate the cash equivalent by—

- (a) adding together the amounts calculated under steps 1 and 3, and
 - (b) (if allowed by subsection (3)) subtracting from that total the excess rent paid by the employee.
- (3) In step 4—
- (a) para (b) only applies if, in respect of the taxable period, the rent paid by the employee in respect of the accommodation to the person providing it exceeds the rental value of the

⁴⁴ See 70.17 (Cost of providing accommodation).

⁴⁵ See 70.20 (Revaluation of cost in cases of delayed occupation).

accommodation for that period as set out in s.105(3) or (4)(b), as applicable, and

(b) “the excess rent” means the total amount of that excess.

In short, the charge is (1) the s.105 computation (rateable value) and (2) (official rate of interest on purchase price less £75,000) less rent.

This works (more or less) where the s.105 computation is based on the nominal amount of rateable value. It gives double taxation where the s.105 computation is based on actual market rental value. ESC A91 gives relief here:

Living accommodation provided by reason of employment

This concession applies to living accommodation treated as earnings under ITEPA 2003 Part 3, Chapter 5. Where ITEPA 2003 s.106 applies and the cash equivalent of the benefit of the accommodation is calculated by reference to the annual rent the property might fetch on the open market, the Inland Revenue will disregard “the additional yearly rent”. If “the additional yearly rent” is disregarded then the amount of “the excess rent” is deemed to be nil.⁴⁶

70.20 Revaluation of cost in cases of delayed occupation

Normally the s.106 computation is based on the employer’s acquisition cost (ie historic cost). Market value of the property later is not relevant. This rule could favour the HMRC, but as time passes it is likely to favour the taxpayer. In one case only there is an adjustment to market value. Section 107(1) ITEPA provides:

This section contains a special rule for calculating the cost of providing living accommodation which—

- (a) operates for the purposes of step 2 of s.106(2) (calculating the additional yearly rent), and
- (b) accordingly only operates where the cost of provision for the purposes of s.106(1) (as calculated under s.104) exceeds £75,000.

In practice condition (b) will almost always be satisfied (except perhaps

⁴⁶ I do not understand the point of the last sentence, for if the additional yearly rent is disregarded, the “excess rent” is irrelevant.

for property purchased many years ago).

Section 107(2) ITEPA provides:

This section applies if, throughout the period of 6 years ending with the date when the employee first occupied the accommodation (“the initial date”), an estate or interest in the property was held by a person involved in providing the accommodation.

It does not matter whether it was the same estate, interest or person throughout.

In short, this condition is that the property has been owned by the company for six years before the employee moves in.

Section 107(3) ITEPA provides:

For any tax year the cost of providing the living accommodation for the purposes mentioned in subsection (1)(a) is given by the formula—

$$MV + I - P$$

In short, *MV* is **Market Value**; *I* is **Improvement cost**; *P* is **Payments in return**. In full detail:

MV is the price which the property might reasonably be expected to have fetched on a sale in the open market with vacant possession as at the initial date,

I is any expenditure incurred on improvements to the property which has been incurred during the period—

- (a) beginning with the initial date, and
- (b) ending with the day before the beginning of the tax year, by a person involved in providing the accommodation, and

P is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—

- (a) reimbursement (up to an amount not exceeding *MV*) of any expenditure incurred in acquiring the estate or interest in the property held on the initial date,
- (b) reimbursement of *I*, or
- (c) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

This may arise where:

- (1) a foreign domiciliary (or trust) purchases a company holding a property acquired more than six years previously;

- (2) an individual then occupies the property and becomes a shadow director.

Next is an anti-avoidance provision to block an obvious scheme to devalue MV. Section 107(4) ITEPA provides:

In estimating MV no reduction is to be made for an option in respect of the property held by—

- (a) the employee,
- (b) a person connected with the employee, or
- (c) a person involved in providing the accommodation.

Lastly, for completeness, there is transitional relief where the employee first occupied the property before 31 March 1983: para 21 Sch.7 ITEPA.

70.21 Accommodation provided for more than one employee

Section 108 ITEPA provides:

Cash equivalent: accommodation provided for more than one employee

(1) If, for the whole or part of a tax year, the same living accommodation is provided for more than one employee at the same time, the total of the cash equivalents for all of the employees is to be limited to the amount that would be the cash equivalent if the accommodation was provided for one employee.

(2) The cash equivalent for each of the employees is to be such part of that amount as is just and reasonable.

EIM provides at 11411:

11411 - Living accommodation: provided to more than one employee in the same period: practical points [February 2006]

The following is an example of how s.108 ITEPA 2003 works.

An employer provides a ten room house for the shared use of three unrelated employees. Each employee has sole use of a bedroom and shared use of the other seven rooms. Without s.108 the cash equivalent of the benefit of the living accommodation provided to each employee would be 80% of the whole house. However s.108 limits the sum of the charges on the three of them to one full charge on the whole house. If there are no special factors each employee will be chargeable on the cash equivalent of a benefit of 33.3% of the cash equivalent for the

whole house.

Section 108 is not relevant in some family situations. For example a husband and wife both work for the same employer and live together in a house provided by their employer. The husband's job is the one that has accommodation provided with it and the wife's does not. The true construction here is that the living accommodation is only provided by the employer to the husband and the wife lives in it with her husband as part of normal domestic arrangements. So the full living accommodation charge would be on the husband with no charge on the wife.

By contrast for an example of s.108 being relevant in a family situation see example EIM11421.

70.22 Ways to avoid benefit in kind

Ways to avoid the entire benefit in kind charge are (in short):

- (1) to ensure that the occupier is
 - (a) not an officer (ie not a director or company secretary), which is straightforward;
 - (b) not an employee (which should be straightforward); and
 - (c) not a "shadow director"; or
- (2) not to use a company; or
- (3) to reimburse the company for its expenditure.

70.23 Reimbursement as solution to IT charge

Reimbursement of "A" and "I" will solve the s.106 charge if it reduces the "cost of providing the accommodation" to nil (or at least to below £75,000). It does not avoid the s.105 charge (but that may be trivial or avoided by "making good" or arranging that the individual is not a shadow director).

70.23.1 *Who makes the reimbursement?*

Reimbursement is only deductible if it is made by the employee. For example, if

- (1) a company purchases property;
- (2) an individual (F) reimburses the cost;
- (3) another individual (G) comes to occupy the property (and is a shadow director);

then F's reimbursement will not reduce the s.106 computation for G.

Again, if a member of the family or household of the shadow director occupies the property, and that member of the family or household reimburses the company, that reimbursement will not reduce the s.106 computation for the shadow director. In practice this is not likely to happen often.

The IHT and CGT implications of making the reimbursement need to be considered.

70.24 Property purchase financed by the foreign domiciliary

Sometimes a company structure is set up specifically for the purpose of purchasing the home. That is, there is an arrangement under which:

- (1) The individual agrees in principle to purchase a property.
- (2) The individual:
 - (a) lends the purchase price to a company, or
 - (b) transfers the purchase price to a trust which lends the purchase price to a wholly owned company.
- (3) The company makes the purchase.

This section considers whether an arrangement of this kind offers a defence to the benefit in kind charge.

70.24.1 “Making good” and s.105 computation

The s.105 computation allows a deduction for:

any sum made good by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The taxpayer would have to show that the interest forgone on the interest-free loan from the individual (directly or indirectly to the company):

- (1) is a “sum”, and
- (2) “makes good” the provision of the accommodation.⁴⁷

Whether the interest forgone “makes good” the provision of accommodation is a question of fact. Assuming the reason the interest is forgone is to enable the company to provide the accommodation, this condition should be satisfied.

⁴⁷ It is assumed that the interest forgone exceeds the annual or rateable value of the accommodation, which will normally be the case.

Whether the interest forgone is a “sum” is a question of law; it is suggested that the word should not be construed strictly or technically, and an amount of interest forgone may be a “sum”. See 70.18.2 (“Making good”: meaning).

70.24.2 *Loan to company as defence to section 106 computation*

Sums “made good” are not deductible as such in the s.106 computation. Rent is deductible in a s.106 computation but the interest forgone on an interest-free loan is not rent. No-one suggests that the company would be taxable on the interest forgone as property income!

It has been suggested that a company financed by an interest-free loan has not incurred expenditure. If this is so then it is a complete answer to the s.106 charge because the figure *A* in the formula for the cost of providing accommodation is reduced to zero. The suggestion is raised in Brandon, *Taxation of Non-UK Resident Companies and their Shareholders*, paras 5.3.3.8 to 5.3.3.15 citing *Wicks v Firth* [1983] STC 25 at 31:

The scholarships were provided at the cost of ICI and not at the cost of the Trustees because the Trustees with moneys supplied by ICI were only performing fiduciary duties ...

However (as Stephen Brandon QC recognises), it is a step from this to argue that a company which is not performing fiduciary duties does not incur expenditure. If the house is in the accounts of the company as an asset, how could it have acquired that asset without “incurring expenditure”? Suppose the boot were on the other foot: a company lent money interest-free to a shadow director to finance his own purchase. Would anyone accept that the company had provided the accommodation purchased by the individual? This is an argument to take *in extremis*.

70.24.3 *Reimbursement by the individual*

In computing the “cost” of providing the accommodation one may deduct payments representing reimbursement. This deduction would reduce the

s.106 computation.⁴⁸ However, the interest forgone on the loan is not “reimbursement”. In addition, it is also not a “payment”.

70.24.4 *Release of loan*

A possible solution would be for the individual to release the debt which is due to them from the company.

Statute requires a “payment” representing a reimbursement. It is a moot point whether the release of the debt would be a “payment”. One should take the cautious view that it may not be. The matter should be dealt with as follows:

- (1) The individual transfers the funds to the company. They should be received in the company’s bank account. This should be accompanied by a letter to the company saying: “I have today procured the payment of £X to your account. This is reimbursement for the expenditure you have incurred in acquiring [the property]. However, I require repayment of the debt due to me of £X.”
- (2) The company may then use its funds to repay its debt due to the individual.

Although this is a circular transaction (the payment being matched by immediate repayment) that does not nullify it for tax purposes: compare *MacNiven v Westmoreland* [2001] STC 237.

If the company incurs additional improvement expenditure in the future, this should be matched by further reimbursements so the total cost of providing the living accommodation (A+I-P) remains less than £75,000.

The reimbursement of the company is not a transfer of value for IHT purposes if the individual is (or is treated as) the beneficial owner of the company. For the same reason the reimbursement is not a disposal by way of gift and so is outside the scope of s.102 FA 1986 (gifts with reservation).

The effect of the gift (the reimbursement) is to increase the value of the shares of the company without any corresponding rise in the CGT base cost. So the gift increases the chargeable gain on the disposal. This should not matter so long as the law remains in its current form.

48 See 70.23 (Reimbursement as solution to IT charge).

70.24.5 *Reimbursement: timing*

When must reimbursement be made? It is considered that the time limit is the same as for “making good”. Reimbursement must be done within a reasonable time of the taxpayer becoming aware that the benefit in kind charge can be reduced by reimbursement.⁴⁹ In practice HMRC accept this.

70.25 Co-ownership defence to living accommodation charge

This section considers the position where an individual owns a share in the property jointly with the company.

Co-ownership raises similar but not identical issues for all provisions which charge tax on benefits, such as s.87 TCGA, s.731 ITA, s.203 ITEPA, and IHT gift with reservation rules as well as the living accommodation charge. The discussion here is limited to the case where an individual and a company are co-owners. Similar but not identical issues arise with these provisions where an individual and a trust are co-owners.

70.25.1 *The land law position*⁵⁰

The starting point is to ascertain the rights of the co-owners as a matter of land law. Co-owned land in England and Wales is always held on trust. The person(s) holding legal title to the land are here called “the trust-of-land trustees”.⁵¹ The position is governed by the Trusts of Land and Appointment of Trustees Act 1996.⁵² Section 12(1) TLATA provides:

49 See 70.18.3 (Making good: timing)

50 I am grateful to Charles Harpum for his assistance on this section.

51 (The term used in the legislation is “the trustees of land”.) The company may be the (or one of the) trust-of-land trustees; it makes little practical difference and no difference at all for tax. (If the company is not a trustee it can apply to court to require the trustees to exercise their powers.) The shares in the company may also be held on trust but that trust is not relevant here.

52 Further consideration is needed for:

- (1) Land outside England and Wales.
- (2) Jointly owned chattels.

TLATA does not apply in Northern Ireland. I would be grateful to any reader who could inform me of the position in Scotland.

A beneficiary who is beneficially entitled to an interest in possession in land subject to a trust of land is entitled by reason of his interest to occupy the land at any time if at that time—

- (a) the purposes of the trust include making the land available for his occupation (or for the occupation of beneficiaries of a class of which he is a member or of beneficiaries in general), or
- (b) the land is held by the trustees so as to be so available.

Prior to 1997, a co-owner of land had a right to occupy that land, in the absence of any contrary indication or agreement with the other co-owners:

It has been well established law ... that a tenant-in-common under a trust for sale has the right to occupy the whole property without payment of rent ...⁵³

This co-ownership right has been superseded and replaced by s.12 TLATA. In *IRC v Eversden*, Lightman J explained:

On and after 1 January 1997 when the TLATA came into force, a tenant in common in equity ... was no longer automatically entitled ... to occupation of the property purchased. Section 12 of the TLATA provided that he should only become so entitled if one of two alternative conditions were satisfied...⁵⁴

While arguments might be advanced to the contrary this analysis should be followed, because it is a clear and workable rule. Otherwise it would be necessary to consider the pre-1997 law and try to work out the combined effect of that when read with s.12.⁵⁵

53 *IRC v Lloyds Private Banking* [1998] STC 559 at p.561; likewise *City of London Building Society v Flegg* [1988] AC 54 at p.81.

54 [2002] STC 1109 at [24] reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

55 Barnsley “Co-owner rights to occupy land” [1998] CLJ 123 is a minority view; contrast Smith, *Plural Ownership* (2005) p.136.

This conclusion is not affected by *Re Byford* [2003] EWHC 1267; [2004] 1 P&CR 159. In this case the co-owners were a wife and her former husband’s trustee in bankruptcy. The issue was the relative size of their shares. The wife claimed a larger share because she had paid the mortgage since her husband’s bankruptcy. The issue is not covered by any provision in TLATA. So the common law principles (known as “equitable accounting”) applied. The general principle of equitable accounting is that one co-owner cannot take the benefit of an increase in the value of the property

In the following discussion, the entitlement to occupy land conferred by s.12(1) is called the “statutory occupation right”.

The individual will obviously have a statutory occupation right to occupy the property under s.12 because:

- (1) They are a beneficiary under the trust-of-land.
- (2) They are beneficially entitled to an interest in possession in the land.
- (3) Both conditions (a) and (b) of s.12(1) are satisfied:⁵⁶
 - (a) the purposes of the trust-of-land include making the land available for their occupation; and
 - (b) the land is held by the trust for land trustees so as to be available for the purpose.

The company does not have a statutory occupation right. It does not meet the conditions of s.12(1). No third person would have a statutory occupation right even if the company sold or sub-let their interest under the trust-of-land to that person. The third person would not satisfy conditions (a) or (b) of s.12(1).⁵⁷

The trust-of-land trustees have various powers, but they do not have power to override the individual’s occupation right or to require them to pay an occupation rent. This is fundamental so I set out the provisions in detail.

Section 13(1) TLATA provides:

Where two or more beneficiaries are (or apart from this subsection would be) entitled under s.12 to occupy land, the trustees of land [ie the trust-of-land trustees] may exclude or restrict the entitlement of any one or more (but not all) of them.

without making an allowance for what has been expended by the other in order to obtain it. Thus the wife had credit for her payments of mortgage capital and improvement expenditure. She wanted credit for interest payments, but it was held that she must set against that credit the benefit of occupation (the wife had occupied the property and the trustee in bankruptcy of course had not occupied). There is nothing in this which affects rights of occupation or other rights under ss.12, 13 TLATA; though note Helen Conway’s criticism in [2003] *The Conveyancer* 533.

⁵⁶ Though it would suffice if only one of the conditions of s.12(1) were satisfied.

Section 12(2) provides: “Subsection (1) does not confer on a beneficiary a right to occupy land if it is either unavailable or unsuitable for occupation by him.” This will not apply here.

⁵⁷ Also s.12(2) TLATA would probably apply, though it is not necessary to rely on that.

The trust-of-land trustees cannot under s.13(1) override the individual's statutory occupation right because it is not the case that "two or more beneficiaries are ... entitled under s.12 to occupy land".

Section 13(6) TLATA provides:

Where the entitlement of any beneficiary to occupy land under s.12 has been excluded or restricted, the conditions which may be imposed on any other beneficiary under subsection (3) include, in particular, conditions requiring him to—

- (a) make payments by way of compensation to the beneficiary whose entitlement has been excluded or restricted, or
- (b) forgo any payment or other benefit to which he would otherwise be entitled under the trust so as to benefit that beneficiary.

The trust-of-land trustees cannot require the individual to pay compensation (an occupation rent) to the company under s.13(6) because the company has no statutory occupation right: s.13(6) assumes that compensation can only be required in a case where:

- (1) a co-owner had such a right; and
- (2) the right was excluded or restricted (which can only be done under s.13(1)).

Section 13(3) TLATA provides another power:

(3) The trustees of land [ie the trust-of-land trustees] may from time to time impose reasonable conditions on any beneficiary in relation to his occupation of land by reason of his entitlement under s.12.

...

(5) The conditions which may be imposed on a beneficiary under subsection (3) include, in particular, conditions requiring him—

- (a) to pay any outgoings or expenses in respect of the land, or
- (b) to assume any other obligation in relation to the land or to any activity which is or is proposed to be conducted there.

The trust-of-land trustees can do little under s.13(3) except to require the individual to pay outgoings.⁵⁸

58 In particular, the trust-of-land trustees cannot use this power to require the individual to pay an occupation rent, as that must be done under s.13(6) or not at all. Otherwise s.13(6) would be entirely otiose. There is a further restriction in s.13(7) but that is not so important here.

It is reasonably clear that ss.12–14 TLATA are a comprehensive code and there is no common law right to an occupation rent except in a case of ouster.

The trust-of-land trustees also have power to sell the property but the court has discretion either to prevent or to require a sale.⁵⁹ The question here is whether the court would require a sale of the property if the individual did not want a sale but the company did. In my opinion a court would not do so, unless either the individual no longer wished/ceased to occupy the property, or the company had a good reason for a sale, eg it was insolvent. Section 15(1) TLATA provides:

The matters to which the court is to have regard in determining an application for an order under s.14 include—

- (a) the intentions of the person or persons (if any) who created the trust,
- (b) the purposes for which the property subject to the trust is held,
- (c) the welfare of any minor who occupies or might reasonably be expected to occupy any land subject to the trust as his home, and
- (d) the interests of any secured creditor of any beneficiary.

None of these factors would support a sale.⁶⁰

In short, the company, although co-owner, can do almost nothing while the individual remains in occupation, except require them to pay the outgoings.

Since this is the case, then the fact that the company does nothing, and the individual remains in occupation, does not mean that the company has provided accommodation, or conferred a benefit, in the years in which the

⁵⁹ Sections 6, 14 TLATA.

⁶⁰ An individual's position is even stronger if they have more than a 50% share, as s.11(1) TLATA normally gives them further support. This provides:

“The trustees of land shall in the exercise of any function relating to land subject to the trust—

- (a) so far as practicable, consult the beneficiaries of full age and beneficially entitled to an interest in possession in the land, and
- (b) so far as consistent with the general interest of the trust, give effect to the wishes of those beneficiaries, or (in case of dispute) of the majority (according to the value of their combined interests).”

See too s.15(3) TLATA which requires a court to have regard to the beneficiary with a majority share. But it is not necessary to rely on this.

individual occupies. This is because the individual has the right of occupation independently of anything the company does or can do.

In *IRC v Eversden*⁶¹ the settlor gave a trustee co-owner a 95% share in a house, the settlor retaining 5%. The settlor continued to occupy. It was held that the trustee had not provided a benefit as the settlor was entitled to occupy. This took place before the TLATA 1996 but the position would be the same under the TLATA.

The matter is made more complicated by *Christensen v Vasili* 76 TC 116. This concerned a co-owned car. The question was whether there was a tax charge under (what is now) s.144 ITEPA which applies where a car is “made available” to an employee. The Special Commissioner held that the car was not made available:

As co-owners the employer and employee each have the right to use the car, but they each have that right because they are each owners, not because one has “made available” the car to the other.⁶²

This conclusion was plainly right. Unfortunately it was flatly if unconvincingly rejected in the High Court:

In their ordinary sense, the question “who made the car available to Mr. Vasili?” must be answered in the sense that his employer did so ...⁶³

It is suggested that *Vasili* must be distinguished from the normal co-ownership situation because:

- (1) in *Vasili* both employer and employee were entitled to possession of the car: in the co-ownership situation considered here the company is not entitled to occupation;
- (2) in *Vasili* the car belonged to the employer before he sold a 5% share to the employee. In that sense the employer made the car available. The position would have been different if the car had been purchased in those shares from the outset.

It is unfortunate that *Eversden* was not cited in *Vasili* since the two cases are difficult to reconcile.

61 [2002] STC 1109 reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

62 76 TC 116 at p.124, para 22.

63 76 TC 116 at p.131, para 13.

70.25.2 *Employment-related benefit*

It might be argued that the company co-owner provides a benefit other than living accommodation:

- (1) If the company is the trustee, by not exercising its powers of sale (or to require the individual co-owner to pay an occupation rent); or
- (2) If the company is not sole trustee, by consenting to the trustees not exercising those powers.

There is normally no benefit here because the trustees have no such powers. If there were a benefit, the value of the benefit is “the expense incurred in or in connection with the provision of the benefit”. The company incurs no expense, so the value of the benefit for tax purposes is nil.⁶⁴

If the company incurs costs of maintenance, that is an employment related benefit.

70.25.3 *Benefit provided by company entering into co-ownership arrangement*

It follows that the company provides a significant benefit to the individual when and if it uses its funds to acquire a share as co-owner (unless it pays a discounted price for the share). Could this benefit be taxable?⁶⁵

In *IRC v Eversden (Greenstock's Executors)* trustees purchased a 95% share in a house (“Meadows”), and the settlor purchased 5%. The judge said:

Under the agreement with the trustees (providing as it did for the settlor to pay 5% of the purchase price of Meadows and acquire in consequence a right of occupation) *the trustees conferred on the settlor the right to occupy Meadows for an indefinite period rent free.*⁶⁶
(Emphasis added)

⁶⁴ It is considered that this particular benefit does not “consist of an asset being placed at the disposal of the employee” so the valuation is not in accordance with s.205 ITEPA.

⁶⁵ This issue does not arise where the company receives its share of the land gratuitously.

⁶⁶ 75 TC 340, [2002] STC at p.1129. The point was rightly not appealed. Prior to purchasing Meadows another house in joint ownership had been sold. The position for Meadows would be different if the sale of the first house had been conditional on the purchase of Meadows (the new one), that is, if the settlor only agreed to join in the sale of the first if the trustee agreed to join in the purchase of Meadows.

This took place before the TLATA 1996, but the position would be the same now.

In a case where the company provides its funds towards a joint purchase of a new property, and the individual holds as co-owner, the company has provided a benefit of indefinite rent-free occupation; more accurately the benefit is giving the individual the opportunity to acquire a right to indefinite rent-free occupation at a “knockdown price”. The benefit is provided at the time the company completes the contract to purchase the land as co-owner.

The benefit would in principle be chargeable in co-ownership cases under s.87 TCGA or s.731 ITA. Since there are no express valuation rules the charge would be on the market value, which would have to be ascertained as best as one can in the light of the circumstances.

For employment income purposes the position is different. It is arguable that:

- (1) The benefit is not the provision of living accommodation.
- (2) The value of the benefit for IT purposes is nil because:
 - (a) The company incurs no expense in connection with its provision.
(The purchase price is not such an expense, because the money going out is matched by a property share coming in.)
 - (b) The special valuation rules of ss.205, 206 ITEPA do not apply.

70.25.4 *The HMRC view*

The EI Manual provides at 11414:

Living accommodation: Avoidance area: Co-ownership cases
[July 2007]

In these cases the employer and employee co-own the living accommodation. The usual arrangement is that the employer and employee own the property as tenants in common through a trust.

A tenant in common has a legal right to use 100% of the property 100% of the time even though a tenant in common may only own a much smaller interest in the property (say 30%). It is argued against us in such a case that the employee’s rights to use the living accommodation come from the employee’s legal rights as a tenant-in-common. So it is argued that no living accommodation has been provided by reason of the employment.

There are arguments to support a benefit charge within Part 3 Chapter 5 ITEPA in these cases and the strength of those arguments will depend

on the facts of the case. PAYE Technical for any case in which you want to argue the point.⁶⁷ Your submission should include a copy of any trust deed under which the land is held.

It is interesting to note that HMRC accept that there is not always a charge in co-ownership cases: “it depends on the facts of the case”. That is consistent with the view taken here.

In the context of s.87 TCGA, the current HMRC view is that there is an annual benefit which is the difference between:

- (1) the rental value of the property in question; and
- (2) the hypothetical rental value of a hypothetical property of a value equal to the proportionate value of the taxpayer’s share in the property, ie if the taxpayer holds a 50% share, one looks to the rental value of a property worth 50% of the actual property.⁶⁸

But this view is very difficult to defend.

70.26 Other defences to BiK charge

70.26.1 The caretaker’s defence

Section 99 ITEPA provides:

Accommodation provided for performance of duties

- (1) This Chapter does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the employee’s duties that the employee should reside in it.
- (2) This Chapter does not apply to living accommodation provided for an employee if—
 - (a) it is provided for the better performance of the duties of the employment, and
 - (b) the employment is one of the kinds of employment in the case of which it is customary for employers to provide living accommodation for employees.

It has been suggested that one can use this to avoid the charge. The idea is to enter into a contract whereby the individual who is to occupy the

⁶⁷ *Sic*. Presumably a phrase such as “Please submit your papers to ...” was accidentally omitted from the start of this sentence.

⁶⁸ Private correspondence.

property does so as caretaker for the company. This does not work. While it may normally be necessary or customary for a caretaker to reside in accommodation, a person does not become a “caretaker” just by being labelled as such. If the individual is occupying an extremely valuable property with only nominal caretaking duties, this is not the same “type of employment” as a normal caretaker. The EI Manual rightly provides:

11342 Living accommodation exemption: Necessary for proper performance of the duties: Types of employee [May 2010]

Part 3 Chapter 5 ITEPA does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the duties that the employee live in the accommodation provided (see EI Manual 11341).

The following types of employee may be accepted as being within the exemption: ... Caretakers living on the premises. This only covers those with a genuine full time caretaking job. ...

70.26.2 *Payment of rent*

The payment of rent will count as “making good” for the s.105 computation and reduce the s.106 computation. However, this proposal raises the problems of IT on the rent. Also, to reduce the s.106 computation to zero, the rent may have to exceed the market rent, especially for very valuable properties.⁶⁹

70.26.3 *Lease premiums*

The FA 2009 inserts the long and complex provisions of s. 105A, 105B ITEPA, which I hope to consider in a future edition.

The EIM suggests an argument that premiums should sometimes be treated as rent. This was discussed in detail in the 2008/09 edition of this work, but I expect that HMRC will generally abandon that point now (if indeed they ever took it seriously).

70.27 **Foreign homes relief**

Section 100A(1) ITEPA provides a relief which I call “**foreign homes**

⁶⁹ By contrast a market rent for the use of chattels will prevent there being a “benefit” for the purposes of the benefit in kind charge on chattels.

relief”:

This Chapter does not apply to living accommodation outside the UK provided by a company for a director or other officer of the company (“D”) or a member of D’s family or household if—

- (a) the company is wholly owned by D or D and other individuals (and no interest in the company is partnership property), and
- (b) the company has been the holding company of the property at all times after the relevant time.

I refer to the company providing the property as “**the provider company**”. I refer to the condition in (1)(a) as “**the wholly owned condition**” and the condition in (1)(b) as “**the holding company condition**”. Thus the relief applies where:

- (1) The provider company provides accommodation for a director⁷⁰ of the provider company (“D”) or a member of D’s family or household. If the accommodation is provided for an employee who is not a director (or a member of a director’s family or household) of the provider company the relief will not apply. In practice that is not likely to matter.
- (2) The provider company meets the wholly owned condition.
- (3) The provider company meets the holding company condition.

70.27.1 Wholly owned condition

The relief does not apply if any shares in the provider company are held by a trust or partnership, or if some of the shares are held by a company. The position for 100% subsidiaries is considered below.

70.27.2 Holding company condition

Before considering the definition of “holding company of the property” it is necessary to set out a subsidiary definition. Section 100A(4) ITEPA defines “relevant interest in the property”:

“Relevant interest in the property” means an interest under the law of

⁷⁰ Or other officer; for brevity references to “directors” in this section include other officers.

any territory that confers (or would but for any inferior interest confer) a right to exclusive possession of the property at all times or at certain times.

We can now turn to the definition of “holding company” of the property. Section 100A(2) ITEPA provides:

The company is “the holding company of the property” when—

- (a) it owns a relevant interest in the property,
- (b) its main or only asset is that interest, and
- (c) the only activities undertaken by it are ones that are incidental to its ownership of that interest.

70.27.3 *Subsidiary holding company*

Suppose the property is held via a subsidiary company thus:

S is in principle the holding company of the property but it does not meet the wholly owned condition. P is not the holding company of the property within s. 100A(2). However s. 100A(3) ITEPA provides:

The company is also “the holding company of the property” when—

- (a) a company (“the subsidiary”) which is wholly owned by the company [*ie the parent company*] meets the conditions in paras (a) to (c) of subsection (2),
- (b) the company’s [*ie the parent company’s*] main or only asset is its interest in the subsidiary, and
- (c) the only activities undertaken by the company [*ie the parent company*] are ones that are incidental to its ownership of that interest.

Thus P also qualifies as “the holding company of the property.” Strictly this does not help as P is not the company providing the accommodation but in practice the relief is clearly intended to apply here.

70.27.4 “The relevant time”

Section 100A(5)(6) ITEPA defines “relevant time”:

(5) “The relevant time” is the time the company first owned a relevant interest in the property; but this is subject to subsection (6).

(6) If—

(a) none of D’s interest in the company was acquired directly or indirectly from a person connected with D, and

(b) the company owned a relevant interest in the property at the time D first acquired an interest in the company,

“the relevant time” is the time D first acquired such an interest.

70.27.5 *Exceptions*

Section 100B ITEPA sets out three wide exceptions to this narrow relief:

(1) Section 100A(1) does not apply if subsection (2), (3) or (4) applies.

The first two exceptions concern connected⁷¹ companies:

(2) This subsection applies if—

(a) the company’s interest in the property was acquired⁷² (directly or indirectly) from a connected company at an undervalue, or

(b) the company’s interest in the property derives from an interest⁷³ that was so acquired.

(3) This subsection applies if, at any time after the relevant time—

71 “Connected” is very widely defined in s.100B(9) ITEPA:

“In this section ‘connected company’ means—

(a) a company connected with D, with a member of D’s family or with an employer of D, or

(b) a company connected with such a company.”

72 Section 100B(5) ITEPA provides a commonsense definition:

“In subsection (2), references to the acquisition of an interest include the grant of an interest.”

73 Section 100B(6) ITEPA provides a commonsense definition:

“For the purposes of that subsection [subsection (2)], an interest is acquired at an undervalue if the total consideration for it is less than that which might reasonably have been expected to be obtained on a disposal of the interest on the open market; and ‘consideration’ here means consideration provided at any time (and, for example, includes payments by way of rent).”

- (a) expenditure in respect of the property has been incurred (directly or indirectly) by a connected company, or
- (b) any borrowing of the company (directly or indirectly) from a connected company has been outstanding (but see subsection (7). ...
- (7) For the purposes of subsection (3)(b), no account is to be taken of—
 - (a) any borrowing at a commercial rate, or
 - (b) any borrowing which results in D being treated under Chapter 7 (taxable benefits: loans) as receiving earnings.

Lastly there is an all-purpose tax motive restriction:

- (4) This subsection applies if the living accommodation is provided in pursuance of an arrangement⁷⁴ the main purpose, or one of the main purposes, of which is the avoidance of tax or national insurance contributions.

70.27.6 *Commentary*

Foreign homes relief would serve as a case study for what has gone wrong with tax reform in the Blair/Brown administration. Almost every restriction on this relief is anomalous. Why should there be a relief for a company owning land and not for chattels? Yachts and aeroplanes are generally held through companies. Why should the relief apply to companies held by individuals and not by trusts? We need rationalisation and simplification, not yet another narrowly targeted relief. But there it is.

70.28 **Benefit in kind: remittance basis taxpayer**

This section deals with the position of a remittance basis taxpayer who is an employee, director or shadow director and receives the benefit in kind of living accommodation.

A specified amount (the cash equivalent) “is treated as earnings from the employment”. I refer to this as “**BiK earnings**”.

⁷⁴ Section 100B(8) ITEPA provides an unnecessary definition (this seems now to be in the Parliamentary drafter’s handbook):

“In subsection (4) ‘arrangement’ includes any scheme, agreement or understanding, whether or not enforceable.”

70.28.1 *Are BiK earnings “chargeable overseas earnings”?*

BiK earnings qualify as “chargeable overseas earnings” if (in short) the duties of the employment are performed wholly outside the UK.⁷⁵ Thus one has to ascertain:

- (1) what the duties are;
- (2) where they are performed.

To ascertain the duties of an employee or formally appointed director is straightforward. To ascertain the duties of a shadow director is problematic. A shadow director has no positive “duties” in the normal sense of the word.

It might be argued that a shadow director has no “duties” within the meaning of s.23 ITEPA. The consequence would be anomalous.⁷⁶ I think a court is not likely to accept this. If a shadow director is deemed to have an employment, it follows that they should be deemed to have some “duties”.

The harder question is: exactly what are the (deemed) “duties” of the “employment” of a shadow director? The duties may be regarded as the instructions or directions which they give to the properly appointed directors.

Another possible view is that everything that the shadow director does for the company (or its assets) is regarded as part of their (deemed) “duties”; or alternatively everything they do if:

- (1) they act with the consent of the formally appointed directors; or
- (2) their actions concern matters which would (apart from them) be the responsibility of the actual directors.

Whichever of these is correct, where a company holds a UK dwelling house, it would be difficult in practice for a UK resident foreign domiciled individual to ensure that all his “duties” are performed outside the UK. However, it should be possible in other cases, eg where the BiK consists of non-UK situate accommodation or chattels, or for the BiK of employment-related loans. It may help to have a contract of employment which sets out the duties (all of which are to be performed abroad).

⁷⁵ See 13.11 (Chargeable overseas earnings).

⁷⁶ (1) Benefits in kind of a UK resident foreign domiciled shadow director would never qualify as chargeable overseas earnings.

(2) Benefits in kind of a non-resident shadow director would never be subject to tax.

70.28.2 *Are BiK earnings remitted to the UK?*

If BiK earnings are “chargeable overseas earnings”, they are taxable only if remitted to the UK.

If the accommodation is not in the UK then the BiK earnings are not on any view remitted here.

If the accommodation is in the UK, common sense suggests that there ought to be a charge. But there is a sound technical argument that the deemed earnings cannot be remitted because they do not exist. The tax charge arises only if the earnings are remitted. The property (or the benefit of its occupation) is not the same as the earnings.

HMRC may not agree. The EI Manual provides:

20508 Expense payments to and benefits provided for a director or employee whose earnings are taxable on remittance [February 2006]

The earnings of a director or employee, except in an excluded employment (EI Manual 20007), who is chargeable on remittances to the UK under either s.22 or s.26 ITEPA include

- expenses payments remitted to the UK
- expenses paid in the UK
- *benefits provided or enjoyed in the UK (for example, a motorbike available for use in the UK)...*

40303 Meaning of “remitted to the United Kingdom”: benefits in kind and UK-linked debts⁷⁷ [January 2009]

Benefits in kind

The definition of “remitted to the United Kingdom” in Section 809L ITA 2007 (see EIM40302) includes general earnings brought to, received in or used in and enjoyed in the United Kingdom in a form other than money. The benefits code as defined by Section 63(1) ITEPA 2003 provides a number of examples of earnings that are capable of satisfying the definition including taxable benefits arising from the provision of:

- * *living accommodation*
- * loans
- * cars available for private use.

⁷⁷ I am not sure when this text was updated, though it was in place by August 2009. The term “UK-linked debts” is out of date after the 2008 reforms, but it does not matter.

This view was doubtful before 2008, but it is even harder to defend under the ITA remittance basis because where there is deemed income or gains, the statute specifically deals with the issue by deeming some assets to be derived from those income or gains.

70.29 Benefits in kind: non-resident individual

This section deals with the position of a non-resident individual who is an employee, director or shadow director and receives benefits in kind. Earnings are taxable only in respect of duties performed in the UK.⁷⁸ Thus one must ascertain:

- (1) what the duties are;
- (2) whether the earnings are in respect of the duties;
- (3) where the duties are performed.

The question of what (if any) are the “duties” of a shadow director is discussed in the above paragraph. I conclude there are no real duties but there are deemed duties. Are the earnings “in respect of” the deemed duties? It is tentatively suggested that the answer is “no”. Certainly if there were no deemed duties there would be no earnings, but that is not enough. The benefit of living accommodation (which the earnings represent) would arise independently of the deemed duties. There is no income tax avoidance possibility here, because in the sort of case where substantial services were provided by a shadow director (as valuable as an actual director) then the earnings could be in respect of the duties.⁷⁹

If I am wrong on “in respect of”, but all the “duties” are performed outside the UK, the non-resident shadow director is not subject to tax under the benefit in kind provisions. If some of them are performed here, there is an apportionment. The difficulty of apportionment is immense, which suggests that my interpretation of “in respect of” is the correct one. This conclusion is also consistent with the POA non-residence exemption (though consistency between different tax codes does not count for much).

In practice, so far as the author is aware, HMRC do not assess non-resident individuals on benefits in kind. Of course, in many cases, collection of tax would be problematic. But it is significant that EI Manual para 11413 refers only to UK residents.

⁷⁸ See 13.17 (Non-resident employee).

⁷⁹ See *R v Dimsey & Allen* [2002] 1 AC 509 at [19].

70.30 Other planning possibilities using companies

More complex possibilities involve:

- (1) acquiring a property,
- (2) granting (say) a ten-year lease to trustees or to the individual, and
- (3) transferring the freehold reversion to a company. Watch SDLT.

The living accommodation charge would not apply, because the company would not be providing living accommodation. Similar arrangements can be carried out with options. In practice, arrangements of this complexity would not often be needed.

70.31 Dealing with companies at risk of IT charge

Many company structures have been set up in the past. The risk of a living accommodation charge depends on the facts of every case, but in practice it is often a serious concern. What can be done?

70.31.1 Planning involving winding-up of the company

If practical, the safest course is to extract the property from the company so as to put an end to the charge (or risk of a charge) under the benefit in kind rules. One way to do this for trusts, where the occupier has a recognised interest in possession, is to liquidate the company.

The liquidation may give rise to a capital gain which may rule out this course. The property will be in the estate of the life tenant for IHT purposes but in practice that may not be too much of a problem: see 70.1 (Home owned by foreign domiciliary). Another company structure may be entered into later, as set out above.

Another possibility might be for a company to sell the property to the trust, the purchase price remaining outstanding as a loan. In principle the loan is deductible from the value of the property, thus substantially reducing any IHT exposure. See 61.9 (Deduction for debts of trustees). Watch SDLT. CGT may rule out this course.

Another possibility may be to reimburse the company for the cost of providing the accommodation. Watch the CGT implications.

70.31.2 Planning not involving winding up the company

CGT may make it impractical to wind up the company. In that case take

stringent steps to ensure that the individual is not a shadow director.

70.32 Dealing with living accommodation enquiries in practice

In practice, as *Al Fayed v Advocate General* frankly reports,⁸⁰ shadow directorship arguments before the decision in *R v Dimsey & Allen* were “settled by horse trading as opposed to on any strict statutory basis”. It is likely that this will continue to be the case. Except for companies which were very carefully set up and run, HMRC will at least be able to exact a sum equal to the cost of litigating the issue before the Tax Tribunal or beyond.

70.33 Living accommodation charge: commentary

Anyone who has followed the text to this point will agree that the law in this area is seriously defective. It is unnecessarily complicated, rests to a large part on formal and informal concessions, and is sometimes so very unfair that HMRC do not exert themselves to act in accordance with the law as correctly set out in their own Manuals. The following reforms would solve these problems:

- (1) Abolish the s.105 charge and extend s.106 to cover the first £75,000 of acquisition cost. All the concessions would then drop away.
- (2) It would be fair to charge a little less than ORI rates, since residential market rents are less than the official rate of interest.
- (3) The application of the charge to shadow directors who do no real work for the company is a nonsense. Given the widespread use of holding companies to hold wealth, *Dimsey & Allen* is arguably one of the worst tax decisions made by the House of Lords in recent times. Simply to abolish the charge (reversing *R v Dimsey & Allen*) would go too far the other way, since it is fair that a shadow director who receives what is in reality remuneration from a company should be charged. The solution is to restrict the rule that any benefit from an employer is deemed to be “by reason of employment”. The deeming should not apply to a shadow director (whose connection with the company may be tenuous). That would strike the right balance.

The present BiK rules are being used by HMRC as a raid on ill-advised

80 [2002] STC 910 para 44.

taxpayers or as a weapon to discourage IHT planning (placing homes in companies for IHT reasons). The latter is not the purpose for which the BiK rules were designed, and it is not surprising that they do not do this job well.

70.34 Section 731 charge

One should arrange, if possible, that any trust or company holding the home and chattels has no relevant income within s.731. Otherwise the use of the property would be a benefit giving rise to an income tax charge on the occupier.⁸¹ This only applies if the benefit is not otherwise chargeable to income tax. If there is a shadow director charge, there is no charge under s.731. One possibility is to arrange that the amount of the shadow director charge is a small one (eg by a reimbursement of the company's expenditure). Whatever the charge is, it will avoid a taxable benefit under s.731.

70.35 Transfer pricing and non-resident company holding family home

The transfer pricing provisions (in short) deem transactions between persons under common control to be at arm's length prices.⁸² HMRC accept that transfer pricing applies only to transactions between two "enterprises".⁸³ Where a non-resident company controlled by foreign

81 See 29.4.4 (Interest-free loan and enjoyment of asset in kind).

82 See 17.6 (Transfer pricing and thin capitalisation).

83 Accepting the argument of Venables "The Transfer Pricing Provisions and Benefits from Offshore Structures", 8 OTR 165. See INTM 432090:

"432090. The affected persons: Enterprises [November 2011]

Section 147 TIOPA 2010 refers to provision made or imposed between any two (connected) persons, suggesting a broad scope for the schedule, as the term persons includes bodies corporate, partnerships and individuals. However, subsection (1)(d) requires the actual provision to be compared with the arm's length provision that would have been made between independent enterprises.

Section 164 TIOPA 2010 requires Part 4 to be construed in accordance with the OECD model convention, as interpreted by the OECD transfer pricing guidelines. Article 9 of the convention sets out the arm's length principle by reference to conditions made or imposed between enterprises. Article 3 defines enterprise as "the carrying on of any business".

This suggests that Part 4 TIOPA 2010 should be applied only where both parties are enterprises, but that this term should be interpreted broadly. The term encompasses more than trading activity, but a natural interpretation implies an intention to make profit or gain, or to undertake activity in a businesslike or commercial way.

In most situations where Part 4 TIOPA 2010 potentially applies there is likely to be little

trustees provides accommodation in the UK for the use of a beneficiary rent free, no charge to tax arises since the individual is not an enterprise. Tax Bulletin 46 (April 2000) provides:

Will a charge be imputed on a non-resident landlord providing rent-free residential accommodation within the UK to a UK individual who is a participant?

It will not be Inland Revenue practice to impute a charge under Sch 28AA [ICTA] in these circumstances.

International Manual provides:

doubt that both the parties to a provision are enterprises. Situations where this may be less clear include the potential application of the schedule to individuals and to charities. It is clear that both individuals and charities can act in a way that would cause them to be regarded as enterprises. This conclusion will follow whenever a trade is being carried on or in other cases where activity is carried on in an organised way with a view to profit or gain. The nature of the activity and whether it carries a commercial flavour will also be relevant. It is necessary to consider whether a particular provision to which Part 4 TIOPA 2010 potentially applies is one made between two enterprises. Hence it is possible that different conclusions will follow for different provisions made by the same person - some transactions may be made in a capacity unrelated to an enterprise that is being carried on while others may be made in the context of the enterprise.

Examples - Individuals:

- Participation in the management or control of a company does not in itself constitute the carrying on an enterprise. It follows that the office of director, or other employment by a controlled company would not normally constitute a provision made between two enterprises.
- If a company provides residential accommodation rent free to a participant who just makes personal use of it as their home, transfer pricing rules would not generally apply (though other tax rules, eg relating to employee benefit or distributions, might well be relevant).
- Similarly, holding investments in a close investment holding company would not constitute an enterprise for the purpose of considering provisions made between the company and the individual.
- Holding properties for rent in general does constitute an enterprise. However, if an individual holds property principally for private purposes, incidental letting activity that is intended to offset costs rather than to generate income is not likely to constitute an enterprise.
- Lending to connected companies may or may not constitute an enterprise. If the activity is undertaken in a businesslike way with a view to generating gains on shares in the company, this is likely to represent a form of enterprise. On the other hand, isolated loans where the intention is to provide long term funding for a family business may well not be made in the context of an enterprise.
- Where an individual is carrying on an enterprise, it follows that the SME exemption will potentially apply, provided the employment and financial limits are met. These limits will apply on an aggregate basis, including the individual and all connected businesses, including those carried on by controlled companies."

432090 TIOPA10 Part 4 - how it works: The affected persons - enterprises [November 2011]

Examples - Individuals

...If a company provides residential accommodation rent free to a participant who just makes personal use of it as their home, transfer pricing rules would not *generally* apply (though other tax rules, eg relating to employee benefit or distributions, might well be relevant).
(Emphasis added)

I do not understand why the text says “generally”. The provisions could apply in the (unusual) case where:

- (1) the individual is using the accommodation in an enterprise, but that is not “just personal use”;
- (2) a rent (less than a market rent) is charged.

70.36 SDLT on living accommodation charge

Para 12 Sch 4 FA 2003 provides:

(1) Where a land transaction is entered into by reason of the purchaser’s employment, or that of a person connected with him, then—

- (a) if the transaction gives rise to a charge to tax under Chapter 5 of Part 3 of the ITEPA (taxable benefits: living accommodation) and—
 - (i) no rent is payable by the purchaser, or
 - (ii) the rent payable by the purchaser is less than the cash equivalent of the benefit calculated under s.105 or 106 of that Act,

there shall be taken to be payable by the purchaser as rent an amount equal to the cash equivalent chargeable under those sections;

- (b) if the transaction would give rise to a charge under that Chapter but for s.99 of that Act (accommodation provided for performance of duties), the consideration for the transaction is the actual consideration (if any); ...

This will not usually affect a foreign domiciliary who occupies a UK home through a company, even if the foreign domiciliary is a shadow director and within the BiK provisions. The reasons are:

- (1) The acquisition of a licence (as opposed to a lease) is not a land transaction. The distinction between lease and licence is fraught but usually the individual will occupy under licence and not a lease.
- (2) Even if the shadow director acquires a lease, they will not usually do so by reason of their employment. The extended definition in the BiK code⁸⁴ does not apply here.

70.37 Chattels held by companies

Chattels situate in the UK may be placed in a company for the same reasons as the family home: to make them excluded property. This raises IT problems similar but not identical to the living accommodation charge.

70.37.1 The charge

The charge is in s.203(1) ITEPA:

The cash equivalent of an employment-related benefit is to be treated as earnings from the employment for the tax year in which it is provided.

The key expressions are “employment-related benefit” and “cash equivalent”.

70.37.2 Employment-related benefit

This is defined in s.201(2) ITEPA:

In this Chapter—
“benefit” means a benefit⁸⁵ or facility of any kind;

There is no benefit – and so no charge – if full consideration is paid for the use of chattels. This is so even if the amount paid is less than the “cash equivalent” as it usually will be; contrast the living accommodation

84 See 70.12 (“By reason of the employment”).

85 For the meaning of “benefit” see 29.4 (Benefit).

charge. HMRC accept this.⁸⁶ EI Manual provides:

21002 What is meant by a “benefit” [February 2006]

However, something (other than a loan where special provisions apply, see EIM26101 and EIM26111) which is a “fair bargain” (EIM21004) between the employer and the employee is not a “benefit”.

Section 201(2) continues:

“employment-related benefit” means a benefit, other than an excluded benefit,⁸⁷ which is provided in a tax year—

- (a) for an employee, or
- (b) for a member of an employee’s family or household, by reason of the employment.⁸⁸

70.37.3 *“Cash equivalent” etc*

This is defined in s.203(2) ITEPA:

The cash equivalent of an employment-related benefit is the cost of the benefit less any part of that cost made good⁸⁹ by the employee to the persons providing the benefit.

This takes us to the elaborate definition of “cost of the benefit”. The starting point is s.204 ITEPA:

The cost of an employment-related benefit is the expense incurred in or in connection with provision of the benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters).

There are two exceptions to this basic rule:

86 HMRC do not argue that the word “facility” applies to a facility which is not a benefit in the ordinary sense. Thus s.201(2) is a non-definition of benefit (it only says that “benefit” means benefit); but non-definitions are quite common in tax legislation.

87 “Excluded benefit” is defined in s.202.

88 For the definitions of expressions used here see 13.2.1 (“Employer”, “employee” and “employment”).

89 “Made good” is discussed at 70.18.2 (“Making good”: meaning).

- (1) asset made available without transfer;
- (2) transfer of used or depreciated asset.

Point (2) is not discussed here. The rule in (1) is in s.205 ITEPA:

(1) The cost of an employment-related benefit (“the taxable benefit”) is determined in accordance with this section if—

(a) the benefit consists in—

- (i) an asset being placed at the disposal of the employee, or at the disposal of a member of the employee’s family or household, for the employee’s or member’s use, or
- (ii) an asset being used wholly or partly for the purposes of the employee or a member of the employee’s family or household, and

(b) there is no transfer of the property in the asset.

(2) The cost of the taxable benefit is the higher of—

- (a) the annual value of the use of the asset, and
- (b) the annual amount of the sums, if any, paid by those providing the benefit by way of rent or hire charge for the asset,

together with the amount of any additional expense.

This takes us to the definitions of “annual value” and “additional expense”:

(3) For the purposes of subsection (2), the annual value of the use of an asset is—

- (a) in the case of land, its annual rental value;⁹⁰
- (b) in any other case, 20% of the market value⁹¹ of the asset at the time when those providing the taxable benefit first applied the asset in the provision of an employment-related benefit (whether or not the person provided with that benefit is also the person provided with the taxable benefit). ...⁹²

(4) In this section “additional expense” means the expense incurred in or in connection with provision of the taxable benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters), other than—

90 “Annual rental value” is defined in s.207 ITEPA. This charge only applies to land other than living accommodation, so in practice it is not important.

91 “Market value” is defined in a commonsense way in s.208 ITEPA.

92 There is transitional relief where those providing the taxable benefit first applied the asset in the provision of an employment-related benefit before 6 April 1980.

- (a) the expense of acquiring or producing the asset incurred by the person to whom the asset belongs, and
- (b) any rent or hire charge payable for the asset by those providing the asset.⁹³

70.37.4 *Asset available but not used*

EI Manual provides:

21631 Cash equivalent of assets placed at the disposal of a director or employee [May 2010]

Note that a tax charge may arise if the asset is available for the use of the director or employee. Whether or not it is used is immaterial. This is because the legislation refers to the benefit as being an asset “placed at the disposal of” the employee. Assets commonly placed at the disposal of directors and employees to which the rule applies are yachts, aircraft, paintings, furniture, TV sets and video machines.

This is correct. The EI Manual gives examples:

21633. Assets placed at the disposal of a director or employee: Example [February 2006]

The following example shows how the chargeable benefit relating to a yacht is calculated. It would apply to all other assets except cars, vans, land and buildings.

Facts

On 6 April a company buys a yacht on the open market for £25,000.

It immediately makes this available for the sole use of a director and his family throughout the tax year.

In the same year the company spends £2,400 on insurance, fuel, maintenance, servicing and mooring charges for the yacht. It also pays £4,500 interest on a loan obtained to purchase the yacht.

The company requires the director to pay £1,500 a year for the use of the yacht.

Calculation of the benefit

The amount chargeable on the director for the benefit from the yacht being made available for his and his family’s use is:

93 EIM states at 21631:

This will include expenditure on running costs and could include expenditure on alterations or improvements, repairs, maintenance, etc depending on whether it was incurred for the purpose of providing the benefit. It would not include interest paid on a loan to acquire the asset.

“Annual value of the use of” the yacht: 20% of its market value of £25,000	5,000
Running costs borne by the employer	<u>2,400</u>
	<u>7,400</u>
Less “made good” by the director	1,500
Amount of the benefit	<u>5,900</u>

Notes on the example

Note that in the example the “market value” of the yacht is taken as £25,000 as this was the open market price paid by the company immediately before it was first applied as a benefit.⁹⁴

If the company had leased the yacht for £6,000 a year from 6 April, £6,000 would have been substituted for the “annual value of the use of the yacht” of £5,000 shown above (see EIM21630 and EIM21632).

If, exceptionally, the company had leased the yacht for less than the “annual value” of £5,000, the lease rent would have been disregarded. The calculation would have remained as shown in the example above, based on the annual value of £5,000.

The interest paid on the loan to buy the yacht does not enter into the benefit calculation.

21634 Particular benefits: Assets placed at the disposal of a director or employee: Asset unavailable for part of a year [May 2010]

Where an asset is not available for part of a year the annual value of its use has to be apportioned (s.204 ITEPA 2003).

For instance, if in the example at EIM21633 the yacht is only made available to the director from 6 October, the chargeable benefit is:

- one half (6/12 months) of the annual value of its use plus
- expenditure on the asset by the person providing it from 6 October to the following 5 April less
- any amount made good by the director (see EIM21120).

21635 Particular benefits: Assets placed at the disposal of a director or employee: Asset also used in the business or by other employees [February 2006]

An apportionment of the full amount of a benefit is required if an asset is made available to two or more directors and employees or is provided partly to the employee as a benefit and is also used partly by the employer in its business (see EIM21200).

For example, if a yacht is made available to two directors and they agree that its availability is shared equally by them, apportion one half of the benefit to each of them. Similarly if the yacht is used partly for business purposes, such as hiring to customers, a proper proportion of the full annual value of its use would not be chargeable.

21636 Particular benefits: Assets placed at the disposal of a director or employee: Asset used by the employee partly for private purposes and

94 [Author’s Note] This would not be correct if the yacht was purchased new, as market value would be the secondhand value, which is lower.

partly for work purposes [February 2006]

When an asset is available for the private use of a director or employee but it also has to be used in the performance of his duties, the director or employee may be able to get relief for the work use. This is accomplished by treating the value of the benefit as if it were expenditure so that the business proportion can qualify for deduction under s.336 to 338 ITEPA 2003 (see EIM31620 onwards). Note that a deduction will not be due if the private and business use of the asset is concurrent, such as a suit of ordinary clothes worn at work (see EIM31660). Only if the use of the asset is at some times exclusively for business, such as a fax machine provided to the employee at home partly for work use, will a part deduction be due (see EIM31661). See example EIM31617.

21637 Particular benefits: Assets placed at the disposal of a director or employee: Assets used partly for private purposes and partly for work purposes: Mixed use benefit; Background to example in EIM21638 [May 2010]

See EIM21638 for an example of the interaction between:

- the calculation of the cash equivalent of a benefit where an asset is placed at the disposal of a director or employee (s.205(1)(a)(i) ITEPA 2003) and
- making an apportionment of that benefit where it is available to a director and for “other matters” (s.204 ITEPA 2003).

Where a benefit is provided partly for the use of a director or employee and partly for “other matters” the cost of the benefit must be apportioned (see EIM21200) between the different uses.

Note that an asset placed at the disposal of a director or employee represents a benefit (s.205(1)(a)(i)) regardless of the use, if any, to which the director or employee puts the asset. But see EIM21631 for details relating to the two alternative measures of charge and when to apply one or the other.

If the asset is used wholly for business purposes, this does not prevent the provision of the asset representing a benefit. If the business use satisfies the terms of s.365(1) ITEPA 2003, the director or employee will be entitled to a deduction equivalent to the full amount of the benefit, leaving no amount chargeable to tax. **But this is not the same as there being no benefit.** A benefit has been provided but because of the deduction for business use, the chargeable amount has been reduced to nil.

If the benefit is used by a director or employee for private purposes and for business purposes, the business use is not an “other matter” which can be included in the amount of the benefit to be apportioned under Section 204 ITEPA 2003. The full amount of the mixed use of the benefit is chargeable to tax, subject to a deduction under s.365(1) ITEPA 2003 for any business use that meets the conditions of s.336 to 338 ITEPA 2003 (see EIM21210).

On the other hand, use of the asset by other employees, or by the employer company (for example, for transporting goods or customers), or hire to third parties, are “other matters” to be taken into account in an apportionment.

There are no hard and fast rules for calculating the proportion of cost attributable to different uses but the end result should produce an apportionment that is reasonable in the light of the facts of the case and the statutory context in s.204

(see EIM21200).

See the example at EIM21638.

21638 Particular benefits: Assets placed at the disposal of a director or employee: Assets used partly for private purposes and partly for work: Example [May 2010]

For some background information relevant to this example see EIM21637.

Facts

- On 6 June a company purchases a 10 seater aircraft for £800,000,
- the principal shareholder of the company and managing director (MD) holds a pilot's licence,
- the plane is kept at an airfield near to both the company premises and the MD's home. It is available to the MD to use at all times – sometimes, at weekends, he decides on the spur of the moment to take a flight on the plane. The plane is not available to any other director or employee unless given specific permission,
- the company incurs costs on the plane of £20,000 for the 9 months from 6 June to 5 April for landing fees, fuel, insurance, etc.,
- when he uses the plane for private purposes the MD reimburses the company £100 per day as a contribution towards the employer's costs.
- Inspection of the logbook for the period 6 June to 5 April (274 days) shows use as follows:
 1. 10 days – by the MD for travel to business meetings
 2. 20 days – by the company (using an outside pilot hired by the day) to deliver sensitive documents to customers in remote locations
 3. 10 days – commercial hire to third parties at £2,000 per day
 4. 10 days – another director of the company wishes to learn to fly and uses the plane for flying lessons with an instructor
 5. 60 days – private use by the MD.

What is the amount of the benefit chargeable on the MD?

Section 205(2)(a) ITEPA 2003 determines that when an asset is placed at the disposal of a director or employee (see EIM21631), the amount of the cash equivalent of the benefit is the annual value (s.205(3)(b)) plus additional expenses.

Annual value of plane ($£800,000 \times 9/12 \times 20\%$)	£120,000
Additional expenses	£20,000
Total amount of the benefit	£140,000

As the plane is made available for several different purposes, if any of those purposes amounts to an “other matter” (s.204), an apportionment of the benefit may be due. Use by the MD, whether for business or private purposes, is not an “other matter”. But use by other employees, or use by the company, are “other matters” – 2, 3 and 4 above which amount to 40 days in total.

The amount of the benefit is based on the 274 days in the year when the plane was available for use. On 40 days it was used for “other matters” and the benefit must be apportioned accordingly. On the remaining 234 days it was entirely at the disposal of the director to use as and when he wished. If the plane was not available to the director, or not solely available to him, on all these days, the

calculation of the benefit could be different (see EIM21639). the calculation of the benefit must be:

- apportioned to take account of these other matters and
- reduced by any amount made good by the MD to the employer.

Total amount of the benefit	£140,000
Less proportion for “other matters” (40/274)	£20,438
Benefit after apportionment	£119,562
Less made good by MD (£100 × 60)	£6,000
Amount of the benefit chargeable	£113,562

Finally, if the director’s use of the plane satisfies the terms of s.336 ITEPA 2003 he will be due a deduction under s.365(1) for the amount of expenses on business purposes that could have been deducted if incurred by him. This figure may be quantified based on the facts of the case. In this instance the MD used the plane for a total of 70 days in the year, 10 days for business and 60 days for private purposes. A reasonable basis for calculating the deduction due under s.365(1) may be 10/70 of the chargeable benefit – $10/70 \times 113,562 = 16,223$.

Less deduction for business use (10/70 days)	£16,223
Amount chargeable on MD	£97,339

Note it is necessary to use judgement and common sense when determining the amount that would have been deductible for expenses under s.365(1).

In this case a deduction of approximately £1,600 per day has been allowed for the MD’s travel to business meetings. This may seem a large amount but if the alternative is for the company to hire a similar plane for the day at the commercial rate of £2,000, for which the MD paid himself and was later reimbursed by the company, he would be entitled to a deduction for this amount. Apart from extreme cases, it is better not to become involved in a debate concerning what form of transport (and at what cost) is suitable for the director to use to attend meetings.

The other director who uses the plane for flying lessons will also be chargeable on a benefit based on his 10 days private use of the plane.

70.37.5 *Conveyancing issues for chattels*

The Bills of Sale Act 1878 (in short) applies where a person makes a transfer of goods (a “Bill of Sale” is widely defined) and retains possession of the goods. This could apply on a transfer to a trust or to a company. The transfer is void as against the trustees in bankruptcy of the transferor unless the Bill of Sale is registered in a public register. This is to prevent fraud on creditors. However, it really does not matter if a transfer of chattels is void as against a trustee in bankruptcy, in the event that the individual became bankrupt. After all, every gift and transaction at an undervalue can in principle be set aside by a trustee in bankruptcy for two years, under s.339 Insolvency Act 1986, but no-one suggests that has significant tax implications for solvent taxpayers. Thus it is not necessary

to register the transfer of the chattels (the “Bill of Sale”) under the Act.

70.38 “Person providing benefit”

This is defined in s.209 ITEPA:

Meaning of “persons providing benefit”

For the purposes of this Chapter the persons providing a benefit are the person or persons at whose cost the benefit is provided.

CHAPTER SEVENTY ONE

JOINT ACCOUNTS

71.1 Introduction

This chapter considers a joint bank or building society account held by two account holders. I refer to money in the account as “account money”.

I consider three topics:

- (1) IHT on payments into and out of the account.
- (2) Remittances
- (3) Taxation of interest arising on a joint account.

71.2 The property law background

First one must ascertain the rights of the account holders. It would need a chapter to analyse the relevant case law.¹

There is an important distinction between:

- (1) an account on which either account holder can draw a cheque;
- (2) an account on which both account holders must sign a cheque.

This chapter only considers the first type of account.

In outline, three distinct questions arise:

- (1) *Beneficial ownership of the account money while in the account.* The possibilities are:
 - (a) Entitlement in equal shares (the most common case)

¹ For a summary see *Dymond's Capital Taxes*, para 10.400; Law Commission, “Cohabitation: the financial consequences of relationship breakdown” Law Com No 307 (2007), para A.46, accessible <http://lawcommission.justice.gov.uk>. Further consideration is needed for an account not governed by English law (but an English court will assume English law principles apply in the absence of evidence to the contrary). English law principles apply in Ireland: *Lynch v Burke* ITR Vol 5 p.271.

- (b) Entitlement in proportion to contributions and withdrawals²
- (c) One account holder beneficially entitled to the whole.
- (2) *Beneficial ownership of money withdrawn from the account* (or assets purchased with that money). The possibilities are:
 - (a) Individual who withdraws funds becomes beneficial owner (the most common case)³ or
 - (b) Same as beneficial ownership of the account money (as to which see above).
- (3) *Beneficial ownership of account money on death of an account holder*. The possibilities are:
 - (a) The survivor is beneficially entitled by survivorship.
 - (b) The deceased owner's share (as to which see (1) above) passes under their will or intestacy.

The answer to one of these three questions does not determine the answers to the others. For instance, account money may belong beneficially to one of the account holders, eg H and W may hold as nominees for H. Such an account may be held on terms that:

-
- 2 In practice the court will assume this is not the case unless there is evidence, such as appropriate records kept by the account holders. *Sillars v IRC* [2004] STC (SCD) 180 at [11] gives cogent reasons for rejecting this analysis for the parent/child account.
 - 3 See *Re Bishop* [1965] Ch 450 at p.456:
“Where a husband and wife open a joint account at a bank on terms that cheques may be drawn on the account by either of them, then, in my judgment, in the absence of facts or circumstances which indicate that the account was intended, or was kept, for some specific or limited purpose, each spouse can draw upon it not only for the benefit of both spouses but for his or her own benefit. Each spouse, in drawing money out of the account, is to be treated as doing so with the authority of the other and, in my judgment, if one of the spouses purchases a chattel for his own benefit or an investment in his or her own name, that chattel or investment belongs to the person in whose name it is purchased or invested: for in such a case there is, in my judgment, no equity in the other spouse to displace the legal ownership of the one in whose name the investment is purchased. What is purchased is not to be regarded as purchased out of a fund belonging to the spouses in the proportions in which they contribute to the account or in equal proportions, but out of a pool or fund of which they were, at law and in equity, joint tenants. It also follows that if one of the spouses draws on the account to make a purchase in the joint names of the spouses, the property purchased, since it is purchased in joint names, is, prima facie, joint property and there is no equity to displace the joint legal ownership. There is, in my judgment, no room for any presumption which would constitute the joint holders as trustees for the parties in equal or some other shares.”

(a) on the death of H, the account money passes to W by survivorship;⁴
or

(b) the account money may pass under the will of H.

The permutations are almost endless. Note that joint tenancy/tenancy in common is not a comprehensive categorisation since those two terms alone are insufficient to determine the answers to the three questions which may arise.

The property law position depends on the intention of the account holders. In practice spouses and cohabitants generally operate joint accounts without giving any consideration to the ownership of the money, except a general desire to pool resources. A search for intention is unrealistic, and the default position is that:

- (1) Account money is beneficially owned in equal shares.
- (2) Withdrawals belong to the account holder who withdraws the funds.
- (3) Beneficial ownership passes by survivorship.

I refer to this as a “**common form account**”.

The circumstances in which parent/child joint accounts arise are different so the rights of the account holders tend to be materially different. For instance, the terms of the account may be that:

- (a) One account holder (“P”) may withdraw up to the whole amount of P’s benefit and the others may make no withdrawal at all during P’s lifetime.
- (b) The balance may pass to the survivor by survivorship.⁵

In this case the fund is in the estate of P for IHT purposes. The funds are not in the estate of the other account holder during the life of P: their rights have no substantial value.

The following analysis applies to a common form account.

71.3 Joint account: IHT

71.3.1 *Account money in estate of both account holders*

In strict law the *whole* of the account money is in the estate of both account holders, under s.5(2) IHTA which provides:

4 As in the parent/child joint account *O’Neill v IRC* 1998 STC (SCD) 110; the apparent breach of the Wills Act 1837, and the possibility that this is a settlement for IHT, are tacitly ignored.

5 This was found to be the case on the facts in *Sillars v IRC* [2004] STC (SCD) 180.

A person who has a general power which enables him... to dispose of any property other than settled property, ... shall be treated as beneficially entitled to the property ... and for this purpose “general power” means a power or authority enabling the person by whom it is exercisable to appoint or dispose of property as he thinks fit.⁶

Beneficial ownership is therefore irrelevant for IHT and GWR is irrelevant on death of an account holder.

71.3.2 *Payment into joint account by one account holder*

Payment into the joint account by an account holder is not a transfer of value because the estate of the payor is not decreased. HMRC agree. The IHT Manual provides:

15043 Lifetime gifts arising out of a transfer of an account into joint names [September 2011]

Where A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account.

Payment into the joint account by an account holder is not a GWR. HMRC do not accept that⁷ but in practice GWR does not often matter.

6 This was accepted without discussion in the Court of Appeal in *IRC v Melville* 74 TC 372 at [36]:

“... the inheritance tax regime produces instances of double taxation ... A clear example is one falling within s 5(2) of the Act, the very common case of a joint bank account which permits any holder to draw on that account. The same property, the moneys in the account, is under s 5(2) taxable on the death of each holder. The Revenue in practice do not strictly enforce that provision and treat each holder as beneficially entitled only to the proportion of monies in the account which he has contributed”.

7 The IHT Manual is garbled; so far as relevant it provides:

“15061 Gifts with reservation [September 2011]

An example of a joint ownership arrangements involving a GWR is ... if ... A transfers ... a joint money account into joint beneficial ownership of himself and his son, and then A either

- receives (or has the right to receive) all the ... interest for his own benefit or
- has the right to withdraw all the money in the joint account for his own benefit.”

Presumably the manual means to say that there is a GWR if A transfers *his money*

71.3.3 *Death of an account holder*

Each account holder is strictly subject to IHT on death on the whole of the account money (subject to exemptions such as the spouse exemption). This rule would result in double taxation but that is undone by concession. The IHT Manual provides:

15042 Joint money accounts [September 2011]

Applying the Inheritance Tax provisions (IHTM15012) to joint accounts can be particularly difficult. In practice:

- You should normally regard each account holder as beneficially entitled (IHTM15011) to the proportion of the account which is attributable to their contributions. So - if the deceased provided the whole of the money, the whole of the account at death should be included in the IHT400 (IHTM10021)
- When calculating this proportion you should assume that any money withdrawn by each person should be set as far as possible against their own contributions, despite, the rule in *Clayton's Case* [1816] 1 Mer 572
- You may want to make enquiries about any withdrawals made from funds the deceased provided by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). You should pay particular attention to joint accounts opened shortly before the death.
- In most cases each joint owner has an unrestricted right to withdraw any part of the amount in credit in the account and keep the funds for their own use (for example, see *Re Bishop* [1965] Ch 450). *You should not use the fact that this right exists to argue that tax is due (for example, by referring to the definition of 'property' in IHTA84/S272 or the 'general power' provision in IHTA84/S5(2)) on a share of the account that is greater than the share provided by the joint owner.*
- When establishing the share based on the deceased's contributions you should note that the true legal position is far from clear so it is

into a joint account and has the right to withdraw all the money. This view is supported by *Sillars v IRC* [2004] STC (SCD) 180 (where the taxpayer was not represented by counsel). But it is considered that a payment into an account of this kind is not a disposal by way of gift. If it were a GWR, many difficulties arise which the Tribunal did not consider in *Sillars*. On the death of A, however, since the property is in the estate of the individual, it does not matter whether payment into the account was a GWR.

important to establish the facts and obtain any relevant documents, such as application forms, withdrawal mandates, passbooks, terms and conditions of account before considering the legal and equitable rules... Refer to Technical any case in which the taxpayer or agent disputes the claim. Remember you do not need to consider the question if the deceased's interest passes to an exempt beneficiary, such as a surviving spouse or civil partner (IHTM11032). You should also avoid enquiries on this subject unless the amount of tax at stake is substantial.

71.3.4 *IHT spouse exemption on death of account holder*

There are two possibilities:

- (1) The account holders may not qualify for the spouse exemption because
 - (a) They are married but one is, and one is not, UK domiciled.⁸ (This scenario is closest to the themes of this book, but one cannot examine it in isolation from the others.)
 - (b) They are cohabitants.
 - (c) There is some other unmarried relationship, such as parent and child.
- (2) The account holders may qualify for the IHT spouse exemption.

In the second case, the IHT spouse exemption applies to the transfer of value on the death of an account holder. HMRC agree. The IHT Manual passage continues:

Refer to TG (IHTM01081) any case in which the parties dispute the claim. However, there is no need to refer if the deceased's interest passes to an exempt beneficiary, such as a surviving spouse or civil partner (IHTM11032). You should also avoid questions and arguments on this subject unless the amount of tax at stake is substantial.

This is correct, though it needs a slightly purposive construction to say that property "becomes comprised" in the estate of the surviving spouse when the property is already in that estate.

⁸ In this section I ignore the limited IHT spouse exemption.

71.3.5 *One account holder pays in and other withdraws*

Suppose:

- (1) A transfers A's money into the joint account held by A and B and
- (2) B withdraws that money into B's own name.

A's estate is reduced at stage (2). A does not make a transfer of value at stage (2) within the normal definition, as that requires a disposition. Section 3(1) IHTA provides (in short):

... a transfer of value is a disposition made by a person ... as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition...

A does not make a disposition.

One might think that A makes a transfer of value by omission under s.3(3) IHTA. This provides:

Where the value of a person's estate is diminished, and the value—

- (a) of another person's estate, or
- (b) of any settled property, other than settled property treated by s.49(1) below as property to which a person is beneficially entitled,

is increased by the first-mentioned person's omission to exercise a right, he shall be treated for the purposes of this section as having made a disposition at the time (or latest time) when he could have exercised the right, unless it is shown that the omission was not deliberate.

But the value of the estate of B, the account holder who withdraws the funds, is not increased so s.3(3) does not apply.

However, s.272 IHTA provides an extended definition of "disposition":

"disposition" includes a disposition effected by associated operations;

It is considered that A makes a disposition (and hence a transfer of value) by associated operations at stage (2). Section 268(3) IHTA provides:

Where a transfer of value is made by associated operations carried out at different times it shall be treated as made at the time of the last of

them;⁹

“Associated operation” is defined in s.268(1) IHTA. This provides (so far as relevant):

(1) In this Act “associated operations” means ... any two or more operations of any kind, being—

- (a) operations which affect the same property, or one of which affects some property and the other or others of which affect property which represents, whether directly or indirectly, that property, or income arising from that property, or any property representing accumulations of any such income, or
- (b) any two operations of which one is effected with reference to the other, or with a view to enabling the other to be effected or facilitating its being effected, and any further operation having a like relation to any of those two, and so on,

whether those operations are effected by the same person or different persons, and whether or not they are simultaneous; and “operation” includes an omission.

The associated operations are:

- (1) A’s payment into the account.¹⁰
- (2) B’s withdrawal from the account.

HMRC agree. The IHT Manual provides:

15043 Lifetime gifts arising out of a transfer of an account into joint names [September 2011]

Where A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account. But if any part is subsequently withdrawn for the benefit of B, the other

9 For completeness: s.268(3) continues with a proviso:

“...but where any one or more of the earlier operations also constitute a transfer of value made by the same transferor, the value transferred by the earlier operations shall be treated as reducing the value transferred by all the operations taken together, except to the extent that the transfer constituted by the earlier operations but not that made by all the operations taken together is exempt under s.18 above.”

But that is not relevant here.

10 It might be argued that the associated operation is A’s omission to withdraw from the account; it makes no difference if this is the case.

joint owner, there may be a transfer at that time.

Refer to TG any case where

- there is such a withdrawal
- it is claimed that there was an immediate gift when the money was paid into the joint account
- there is evidence that an immediate gift was intended, or
- the position is more complicated, for example where withdrawals need both signatures

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

15042 Joint money accounts [September 2011]

...You may want to make enquiries about any withdrawals made from funds the deceased provided by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). You should pay particular attention to joint accounts opened shortly before the death.....

71.3.6 *IHT spouse exemption on lifetime withdrawal*

The IHT spouse exemption may apply to the transfer of value on the lifetime withdrawal by an account holder. Since HMRC accept the application of the spouse exemption on death, they must also accept its application during the lifetime of the account holders.

The exemption does not of course apply when one spouse is and the other is not UK domiciled because the IHT spouse exemption is restricted. The transfer of value takes place when the funds are withdrawn from the account so that is the point where the conditions for the spouse exemption need to be satisfied. For instance if:

- (1) Year 1: H makes a payment into the joint account
- (2) Year 2: W makes a payment from the joint account

The IHT spouse exemption applies if the conditions for the exemption are satisfied in Year 2. It does not matter whether or not they are satisfied in Year 1.

71.3.7 *One account holder pays in and same account holder withdraws*

Suppose:

- (1) A transfers A's money into the joint account held by A and B.
- (2) A withdraws that money into A's own name.

A does not make a transfer of value. What about B? B's estate is reduced at stage (2). But it is considered that B makes no transfer of value.

Section 3(3) IHTA does not apply.¹¹ It might be said that B makes a transfer of value by associated operations, but although B makes an omission, which is an associated operation, B does not make a transfer of value by associated operations, since he does not make a disposition. That is consistent with the policy of s.3(3) IHTA.

71.3.8 *Third party pays into account*

The discussion above assumes that the account money is provided by one or both account holders.

Suppose:

- (1) A third party (“C”) transfers C’s money into a joint account held by A and B.
- (2) A dies.

In strictness A is taxed on the whole account, but by concession it appears that A is taxed on half. The IHT Manual provides:

15042 Joint money accounts [September 2011]

Example

A, B and C share a joint account. They all contribute to it. A dies and his proportion of the account accrues by survivorship to B and C. After A’s death, the entitlement of B and C should take into account A’s contributions.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

Presumably this means that after A’s death, B and C are each regarded as entitled to (1) their own contributions to the account and (2) half of the contribution of A.

Suppose:

- (1) A third party transfers their money into a joint account held by A and B and
- (2) A withdraws that money into A’s own name.

It is considered that B does not make a transfer of value; see 71.3.7 (One account holder pays in and same account holder withdraws).

¹¹ See 71.3.5 (One account holder pays in and other withdraws).

71.3.9 *Payment out of account by way of gift*

If B draws on the account to make a gift to a third party donee, B makes a transfer of value.

If A had paid the account money into the joint account A has also made a transfer of value by associated operations at the time of B's withdrawal.¹² But that is not the case if B, or a third party, has provided the funds. Thus the gift by B gives rise to two transfers of value, a transfer of value by A and a transfer of value by B. It may be in practice HMRC would allow some concession.

71.4 Who is the settlor of trust made from joint account

If a trust is created by a payment from a joint account, it is considered that the account holder who writes the cheque or makes the transfer is the settlor. The other account holder is only the settlor if they have provided the property indirectly for the settlement, which requires some element of arrangement; see 75.4 (Gift from A to B followed by gift to trust by B).

71.5 Scottish joint account

The IHT Manual provides:

15050. Special destinations and proof of donation [September 2011]

If two or more people purchase an asset jointly there may be a contractual agreement between them which determines how the property passes on death.

If the title is just in their joint names, such as to A and B, they own an equal share which passes to their executors (IHTM05012) on their deaths and is part of their free estate.

But if the title is to A and B and the survivor and they have paid equally for the asset, the survivor will be entitled to the whole on the death of the first to die (*Perrett's Trs v Perrett* [1909] 46 SLR 453). This is known as special (or survivorship) destination.

Both parties do, however, have the right to dispose of their shares in life (*Steele v Caldwell* [1979] SLT 228), which will defeat the operation of the special destination.

If the price was not provided equally the question of whether the donor has

¹² A does not make a transfer of value under s.3(3) IHTA because although the estate of the third party donee is increased, it is not increased by any failure to exercise a right. But A does make a transfer of value by associated operations.

conferred an immediate beneficial interest (IHTM15011) on the other party will depend on their intention. Such a donor can revoke the survivorship destination, explicitly, by Will (IHTM12047) under s.30 Succession (Scotland) Act 1964. But the donee may not do the same to defeat the donor's right to the whole of the asset. If the whole of a joint asset was provided by one person they retain ownership of the whole until they put title into joint names, or, by some other act, show they intend to make an immediate gift to the other joint owner.

- Proof of gift requires evidence of both intention and delivery. Evidence of intention' does not need to be in writing and oral evidence is acceptable.
 - Delivery may be:
 - actual, for example, physically handing over the asset to the donee,
- or
- constructive, for example, handing over one book from a collection.

If there is no immediate gift (by intention and delivery) the asset remains part of the provider's estate and will only pass to the other under the survivorship destination on their death, unless the Will contains a clause that explicitly revokes it and conforms to s.30 Succession (Scotland) Act 1964.

15051. Joint money accounts [September 2011]

The fact that a bank account is held in joint names and that receipts for deposits into it are issued in joint names does not necessarily mean it is held in equal shares. Neither does it mean there is survivorship destination. The extent of each owner's interest will be a question of fact depending on

- the extent of their identifiable contributions, and
- if contributions are unequal whether there can successfully be established donation (IHTM15050) by the greater contributor to the other, or alternatively, whether the asset was held in joint names merely for administrative convenience

You should resist any suggestion by the taxpayer or agent that the terms in which the account is held can effect either a lifetime gift - or pass the property to a survivor, unless there is other supporting evidence. Any cases of difficulty should be referred to Technical.

15052. Land [September 2011]

The title to heritage is proof of its ownership, and the owners interests in it – unless there is evidence to the contrary, normally by way of written document. If there is no special destination (IHTM15050) and there is equal provision of the price, each co-owner can dispose of his own share as part of his estate and there is no accretion among them.

If spouses or civil partners (IHTM11032) are the joint owners you should keep the 'related property' (IHTM09731) provisions in view (S.161 IHTA 1984).

If it is claimed the beneficial interests (IHTM15011) vary from those indicated by the title and the absence of gift is claimed, strong proof is required of parties intentions such as a contemporaneous writing. In cases of difficulty refer to TG (IHTM01081).

15053. Which law to apply to joint investments owned by someone domiciled in Scotland [September 2011]

Scottish law applies to shares of a company registered in Scotland. If the IHT400 (IHTM10021) or other account does not indicate whether a company is Scottish

or not, you should be able to find this information on the Internet. If the taxpayer is of Scots domicile (IHTM13000) a joint holding in Government Stock may be regarded as subject to Scots law (*Cunningham's Trs v Cunningham* [1924] SLT 502).

15054. Joint money accounts and special destination [September 2011]

Under Scots Law where Bank or Building Society Accounts are held in joint names and the survivor the special (or survivorship) destination (IHTM15050) does not by itself pass the ownership of the money in the account to the survivor. An account with a Bank or Building Society is not a document of title as it is not a Deed of Trust in terms of the Bank Bonds and Trusts Act 1696. It is a contract between the Bank and the customer which regulates the conditions on which the account is to be operated and is for administrative convenience only. See for example *Cairns v Davidson* 1913 SC 1054.

For this reason the ownership of the funds in the account is determined according to the ordinary principles of ownership. The owner of the funds in the account remains the owner unless and until some transfer of ownership occurs.

Example

James and Lucy (who are married) open an account, governed by Scots law, in their joint names and the survivor. James has provided all the funds. James dies and is survived by his wife, Lucy. On his death:

- In the absence of any act of transfer of ownership to Lucy (for example, a separate Deed of Gift) the whole account should be included in the IHT400.
- If the account passes to (say) the children under the terms of James' Will then the asset will be chargeable to Inheritance Tax
- If the account passes to Lucy under the terms of the will (IHTM11032) then exemption under IHTA84/S18 will apply/

This applies to all Bank/Building Society accounts governed by Scots Law. So it will apply to taxpayers living in England, Wales and Northern Ireland who have an account which is governed by Scots Law.

I would appreciate views of Scottish readers as to whether this is entirely correct. See too the discussion in the Trusts Discussion Forum (May 2007) under the thread "Scottish bank accounts".¹³

71.6 Remittances from joint accounts

This section considers remittance aspects of joint accounts.

The RDR Manual provides:

33510 Joint Accounts [July 2010]

Where a remittance basis user has an offshore bank account held jointly with another person there may be additional difficulties in identifying the nature of the

13 Accessible www.trustsdiscussionforum.co.uk/

monies in the account, and any transfers of monies from the account. You will need to read these pages together with the rest of RDRM35200: Mixed Funds. *Earned Income*

Employment income and pensions are not regarded as “joint property” when received by the employee or pensioner – refer to the Independent Taxation Manual IN127+. So any foreign earnings or foreign pension income (taxed as relevant foreign income) is attributable only to the employee or pensioner to whom they “belong”.

Income from jointly held property

S.836(2) ITA 2007 provides that where a married couple or civil partners are living together and income arises from property held in their joint names, both individuals are treated for income tax purposes as beneficially entitled to one-half of the income regardless of their actual respective beneficial entitlements, unless they make a joint declaration that it shall be otherwise under s.837 ITA 2007. Refer to the Independent Taxation Manual IN115+ for further details.

This general “equal division” rule at s.836(2) ITA 2007 does not apply in some cases (referred to in s836 ITA 2007 as “exceptions”).

These are:

- Exception A - any income to which neither of the individuals is beneficially entitled
- Exception B – where the spouses/civil partners make a joint election to HMRC under the terms of s.837 ITA 2007 that one of them is beneficially entitled to the income to the exclusion of the other or they are both entitled to the income in unequal shares
- Exception C - partnership income
- Exception D - income from a UK property business
- Exception E - distributions from close companies
- Exception F – where one of the persons is beneficially entitled to the income but it is treated as being the income of someone else under any other provision of the Taxes Acts

Broadly then, unless the individuals have made a declaration otherwise, foreign income arising from jointly held property will be regarded as belonging to each individual in an equal (that is usually a 50:50) share.

Any interest arising on the jointly held offshore bank account will be split equally between the account holders.

Of course married couples or civil partners may also hold assets separately; and they can divide up joint assets so that they hold them separately for the future. In these circumstances each spouse or civil partner is then taxed on the income from the assets each holds in his or her own name, in the same way as for “earned income”.

Analysing the account

Where an individual has a “joint account” with someone else and one or both of them chooses to be taxed on the remittance basis it is necessary to fully analyse the account (with due regard being given to the “exceptions” identified above). You will need to do this in order to apply Step 1 s.809Q(3) ITA 2007 (refer to RDRM35200: Mixed funds) which deals with transfers from mixed funds and

requires you to find each of the categories of the remittance basis user's income and gains in the mixed fund. A joint account will almost certainly be a mixed fund.

Analyse the account by putting each credit to the account into separate columns, divided between each individual.

Likewise with the debits; transfers out of the account that are clearly made by or for one or other of the individuals and intended to be made out of "their" share of the income should be debited "under" their column.

"Joint" expenses, for example items such mortgage payments where the debt is held jointly, or council tax bills and so on may, if appropriate, be split equally between each individual. Alternatively, such debits may be fully appropriated to just one of the account holders if that reflects the reality of their joint financial arrangements; for example it may be that only one partner is working and contributes most of the "credits" to the account in the form of their income. In such circumstances it may be more appropriate to attribute all expenditure to that partner in so far as the overall balance of the account permits. When separating the account in this way it is important that the overall balance remains consistent. In practice you should try to take the most pragmatic approach that best reflects the reality of both individuals' situations.

Cases where only one account holder is a remittance basis user

Individuals who are not using the remittance basis are liable to tax on the arising basis, so they will, where appropriate, have paid UK tax in respect of their share of the income and gains that have been credited to the joint account in the tax year. Because UK tax has been (or will be) paid by that individual he or she may bring to the UK or otherwise use their share of the funds that are in the account in any way they wish without triggering an additional tax charge.

However, if at any time during the year they bring to the UK or otherwise use amounts in excess of their share of the funds in the joint account at that point in time then they will be regarded as using their partner's income or gains instead.

Example:

An offshore bank account was opened on 20 June. It is held jointly by A and B, who are civil partners. A is a remittance basis user in this year. The account shows:

Date	Credit (Debit)	Balance	Attributable to
20 June	£2,000	£2,000	A – foreign earnings
27 June	£1,000	£3,000	A – relevant foreign income
1 July	(£800)	£2,200	B – cash taken out in London
27 July	£90	£2,900	B – UK rental income

In analysing the account you need to look at what was in the account **immediately before** each debit. In this case, the cash withdrawn by B in London on 1 July can only be attributed to A's income credits and, as B is relevant person RDRM33030, A will be regarded as having remitted that £800. Also refer to RDRM35230: Remittances from mixed funds.

Remember that in most cases the account holders are likely to be relevant persons in relation to each other, so even transfers from the non-remittance basis using individual may be a taxable remittance on the other partner if it is regarded

as consisting of or deriving from the other partner’s foreign income or gains.

Cases where both account holders are remittance basis users

You will still need to analyse the account in order to determine which transfers from the mixed fund are taxable remittances, and to determine which account holder is liable to pay any tax due. Again, you should try to take the most pragmatic approach that best reflects the reality of the situation.

Once the account has been split between the individual account holders, any taxable remittances (refer to RDRM33020 Meaning of remittance) of the foreign income or gains that are the property of the remittance basis user are subject to the normal “ordering” rules that apply to remittances from a “mixed fund”.

The following example demonstrates the principles of analysing a joint account and then determining whether the “transfers” are a taxable remittance from a mixed fund. You will also need to refer to RDRM35230 Remittances from mixed funds.

RDRM33515 - Remittance Basis: Identifying Remittances: Specific Topics: Joint Accounts - example [June 2010]

(Erica and John)

E and J have been married for several years, and currently live in the UK. J is domiciled within the UK. E is not domiciled in the UK. E decides to claim the remittance basis for this year.

Both E and J have employment income that is credited to the account. For most of the year E works in the UK but she also has a separate part-time employment with a foreign employer outside of the UK for part of the year.

E and J have a joint bank account in the Isle of Man. Into this account is paid both of their salaries, and some bank interest. They use the account to pay their household bills, including the mortgage on their jointly owned UK home.

Table to show the amounts credited to the account

Date		Credit (Debit)	Balance
	Opening Balance		£0
30 April	UK salary (Erica)	£3,000	£3,000
30 April	UK salary (John)	£2,000	£5,000
30 April	Overseas salary (Erica) ¹⁴	£2,000	£7,000
30 April	Bank interest not taxed	£200	£7,200
1 May	Direct debit - UK energy co	(£200)	£7,000
5 May	Cash withdrawal (UK)	(£1,000)	£6,000
10 May	Cash withdrawal (UK)	(£1,000)	£5,000
17 May	Direct debit - mortgage	(£3,000)	£2,000
31 May	UK salary (Erica)	£3,000	£5,000
31 May	UK salary (John)	£2,000	£7,000
31 May	Overseas salary (Erica)	£800	£7,800
1 June	Direct debit - UK energy co	(£200)	£7,600
5 June	Cash withdrawal (UK)	(£1,000)	£6,600

14 The example adds: *not subject to foreign tax*. But that makes no difference here.

10 June	Cash withdrawal (UK)	(£800)	£5,800
17 June	Direct debit - mortgage	(£3,000)	£2,800

The credits and the debits account can be analysed between E and J with the following results:

		Erica Credit	Erica Balance	John Credit	John Balance	Joint a/c Balance	Note
30 Apr	UK salary	£3,000	£3,000			£3,000	1
30 Apr	UK salary	£2,000	£2,000			£5,000	1
30 Apr	Overseas salary	£2,000	£5,000			£7,000	
30 Apr	Bank interest	£100	£5,100	£100	£2,100	£7,200	2
1 May	Debit to UK co	(£100)	£5,000	(£100)	£2,000	£7,000	
5 May	Cash to UK	(£1,000)	£4,000			£6,000	3
10 May	Cash to UK			(£1,000)	£1,000	£5,000	3
17 May	Mortgage pay't	(£2,000)	£2,000	(£1,000)	£nil	£2,000	4
31 May	UK salary	£3,000	£5,000			£5,000	
31 May	UK salary			£2,000	£2,000	£7,000	
31 May	Overseas salary	£800		£5,800		£7,800	
1 Jun	Debit to UK co	(£100)	£5,700	(£100)	£1,900	£7,600	
5 Jun	Cash to UK	(£1,000)	£4,700			£6,600	
10 Jun	Cash to UK			(£800)	£1,100	£5,800	
17 Jun	Mortgage pay't	(£1,900)	£2,800	(£1,100)	Nil	£2,800	4

Note 1: Earned income is attributed to the employee only

Note 2: Because this is a joint account, the interest arising on it is split equally between E and J.

Note 3: This money is withdrawn in the UK by J and E to meet their own personal expenditure, for example travel, meals and so on.

In this example J's "personal expenditure" can be attributed to his "income" credits into the account. If instead the withdrawals by J were regarded as coming from E's "portion" of the pot, because J is a relevant person and money has been brought into the UK by a relevant person (so Condition A of s.809L(2)(a) ITA 2007 is met (refer to RDRM33120: Condition A – money and property) there might still be a taxable remittance, with the tax due payable by E (see below).

Note 4: The mortgage payment is made to a UK bank. The mortgage is held on J and E's UK home and is a joint debt of E and J, and each contributes half of the cost. To the extent that J has money in the account it can be accepted that he has used his taxed income to pay his share of the mortgage.

Money has been brought into the UK to pay this mortgage, so Condition A of s.809L(2)(a) ITA 2007 is met (refer to RDRM33120: Condition A – money and property) and there is a "transfer" from a mixed fund.

Because this is a mixed fund s.809Q(2) ITA 2007 is in point (refer to RDRM35230: Remittances from mixed funds). So in order to determine whether this money is regarded as consisting of, or deriving from, a remittance basis users' foreign income or gains (such that there is a taxable remittance under Condition B of s.809L(2)(a) ITA 2007) it is necessary to look at the composition of the fund immediately before the "transfer".

This shows that £2,000 of the mortgage payment made on 17 May must be attributable to E's income or gains in the mixed fund. Similarly, £1,900 of the mortgage payment of

17 June is attributable to E’s income in the mixed fund.
So far as E is concerned, her share of the account shows (for the purposes of calculating if and to what extent she has made a taxable remittance of her overseas income) is as follows:

<i>E’s share of the account</i>		Credit (Debit)	Category
30 April	UK salary	£3,000	Para (a)
30 April	Overseas salary ¹⁵	£2,000	Para (b)
30 April	Bank interest	£100	Para (d)
1 May	Direct Debit (energy co)	(£100)	
10 May	Cash	(£1,000)	
17 May	Direct Debit (mortgage)	(£2,000)	
31 May	UK salary	£3,000	Para (a)
31 May	Overseas salary	£800	Para (b)
1 June	Direct Debit (energy)	(£100)	
5 June	Cash	(£1,000)	
17 June	Direct Debit (mortgage)	(£1,900)	

Applying the rules at s809Q ITA 2007 (refer to RDRM35230: Remittances from mixed funds) to the first “transfer” to the UK, which is the payment to the energy company on 1 May. Remember the mixed fund rules require the account to be analysed before every “transfer”

Step 1 – Identify the “amount of transfer” in the relevant year		£100
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	Para (a) Employment income (UK employment income)	£3,000
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100

Step 2 – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund **Para (a)** £3,000

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So E’s transfer of £100 is treated as coming from her UK employment income; it is not thus a “taxable” remittance when brought to the UK.
Then apply the rules at s.809Q ITA 2007 (refer to RDRM35230: Remittances from mixed funds) to the next “transfer” to the UK, which is the cash withdrawal.

Apply the rules at s.809Q ITA 2007 to the next “transfer” to the UK, which is the case withdrawal

15 The example adds: *not subject to foreign tax*. But that makes no difference here.

Step 1 – Identify the “amount of transfer” in the relevant year

		£1,000
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	Para (a) Employment income (UK employment income)	£2,900
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100

Step 2 – Identify the earliest paragraph above **Para (a)** for the relevant year, which has an amount of income or gain in the mixed fund **£1,900**

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So E’s transfer of £1,000 is treated as coming from her UK employment income; it is not thus a “taxable” remittance when brought to the UK.

Then apply the rules at s809Q ITA 2007 (refer to RDRM35230: Remittances from mixed funds) to the next “transfer” to the UK, which is the mortgage payment.

Then apply the rules at s809Q ITA 2007 to the next “transfer” to the UK, which is the mortgage payment

		£2,000
Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer	Para (a) Employment income (UK employment income)	£1,900
	Para (b) Relevant foreign earnings (not subject to a foreign tax)	£2,000
	Para (d) Relevant foreign income (not subject to a foreign tax)	£100

Step 2 – Identify the earliest paragraph above **Para (a)** for the relevant year, which has an amount of income or gain in the mixed fund **£1,900**

Step 3 Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2. **£2,000 - £1,900 = £100**

Step 4 - Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

Step 2 - repeated **Para (b)** **£100**

Step 3 If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

£1,900 of the transfer is treated as coming from E's UK employment income; it is not thus a "taxable" remittance when brought to the UK. The remaining £100 is treated as a remittance of £100 of E's untaxed overseas earnings.

71.7 Income from property held jointly by spouses

Section 836 ITA provides:

- (1) This section applies if income arises from property held in the names of individuals—
 - (a) who are married to, or are civil partners of, each other, and
 - (b) who live together.
- (2) The individuals are treated for income tax purposes as beneficially entitled to the income in equal shares.¹⁶

How does this interrelate with the remittance basis? Suppose:

- (1) Property is held in the names of H and W, but belongs in equity to H alone.
- (2) Section 836 applies so that half the income is deemed to be the income of W.
- (3) W is a remittance basis taxpayer.

Income of W arising before 2008/09, being merely deemed income, could not be remitted and could not be subject to tax. But income arising from 2008/09 counts as remitted if it is remitted by H, since H is a relevant person in relation to W.

71.8 Planning implications

The best way to avoid the difficulties described in this chapter is that substantial sums should not be put in joint accounts at all (except where the account holders qualify for the full IHT spouse exemption). An alternative might be to use a joint account but to specify carefully the terms on which the account is held, but in practice it would be easier to use separate accounts. However in practice joint accounts frequently will be used, and (as the frequent references in the manual to withheld text suggest) this is an area with many anomalies and therefore scope for tax planning.

¹⁶ Section 836(3) sets out 7 exceptions, which are not considered here.

CHAPTER SEVENTY TWO

PRE-OWNED ASSETS

72.1 Pre-owned assets – Introduction

This chapter considers the provisions in Schedule 15 FA 2004 (“**POA provisions**”). A full discussion of this topic needs a book to itself.¹ This chapter focuses on the matters closest to the themes of this book, but it is necessary to review the general rules to understand these matters in their context.

The supplementary regulations (whose title is so long it cannot sensibly be used)² are referred to as “**the 2005 POA Regulations**”.

HMRC guidance is now provided in the Inheritance Tax manual, however it was formerly provided in its Website POA Guidance.

“**The CIOT Statement**” gives HMRC answers to a number of questions raised by CIOT, STEP and LITRG.³

The label “pre-owned assets” is convenient but inaccurate since the charge may apply to property not previously owned by the taxpayer.

The provisions impose three charges to income tax which I call:

- (1) “**The POA land charge**”.
- (2) “**The POA chattel charge**”.
- (3) “**The POA intangible property charge**”.

Land, chattel and intangible property are given commonsense definitions.⁴

1 And indeed such a book has been written: Chamberlain & Whitehouse, *Pre-Owned Assets and Estate Planning* (3rd ed, 2009).

2 The Charge to Income Tax by Reference to Enjoyment of Property Previously Owned Regulations 2005.

3 Accessible: www.step.org/resources/policy_and_technical/uk_policy/2006/pre-owned_assets_-_responses.aspx?link=contentMiddle. The current version of the statement is dated 31 August 2006; earlier versions were dated 13 October 2005 and 13 March 2006.

4 Para 1 Sch 15 FA 2004.

72.2 Human rights

The Parliamentary Joint Committee on Human Rights considered the POA provisions to be HR compliant⁵ – except (intriguingly) in relation to the spouse exemptions (which deny relief to cohabitants) but no-one took any notice of that. The prospect of a successful human rights challenge now seems slender.

72.3 POA land charge

Para 3(1) Sch 15 FA 2004 provides:

This paragraph applies where—

- (a) an individual (“the chargeable person”) occupies any land (“the relevant land”), whether alone or together with other persons, and
- (b) the disposal condition or the contribution condition is met as respects the land.

In the discussion below the “chargeable person” is called “T” and the land T occupies is called “land occupied by T” (rather than “the relevant land”).

“Occupation” is a legal concept extensively discussed in rating cases. The IHT Manual makes some general observations on the meaning of occupation at Para 44003.

72.4 The disposal conditions

Para 3(2) Sch 15 FA 2004 provides:

The disposal condition is that—

- (a) at any time after 17 March 1986 the chargeable person owned an interest—
 - (i) in the relevant land, or
 - (ii) in other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the relevant land, and

⁵ www.publications.parliament.uk/pa/jt200304/jtselect/jtrights/93/9305.htm.

- (b) the chargeable person has disposed⁶ of all, or part of, his interest in the relevant land or the other property, otherwise than by an excluded transaction.

This is best regarded as two conditions depending on whether (a) (i) or (ii) applies. I call them “**disposal conditions (i) and (ii)**”. Only one of them needs to be satisfied for the “disposal condition” to be met.

72.4.1 *Disposal condition (i)*

The essence of disposal condition (i) is that:

- (a) T owned an interest in the land occupied by him.... and
- (b) T has disposed of all, or part of, his interest in the land ...

Disposal condition (i) is aimed at IHT avoidance arrangements (*Eversden*, *Ingram* and double trust schemes) which would not normally be carried out by foreign domiciled individuals. It might, however, apply in many other situations, eg if a foreign domiciliary transferred their house to a trust or company.

What if T enters into a contract to purchase land and then assigns that contract to a trust or company? The contract is an interest in land. However, on completion the contract ceases to exist. That will normally be before the valuation date. Since the asset cannot be valued on the valuation date, it is tentatively suggested that disposal condition (i) does not apply in this situation.

The disposal condition is satisfied by a disposal of land for full consideration. However, in such a case the exclusion for arm's length transactions may apply.

72.4.2 *Disposal condition (ii)*

The essence of disposal condition (ii) is that:

- (a) T owned ... other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the land occupied by T, and

⁶ “Disposal” is defined in para 3(4) Sch 15 FA 2004.

- (b) T has disposed of all, or part of, his interest in the ... other property
...

Disposal condition (ii) is probably intended to deal with the situation where:

- (1) T disposes of land to A.
- (2) A sells the land and uses the proceeds to purchase other land occupied by T.

However, it may apply where:

- (1) T disposes of any property (not land or cash) to A; and
- (2) A disposes of that property and uses the proceeds to purchase land occupied by T.

This overlaps with the contribution conditions. The overlap matters because the excluded transaction defences to the contribution and disposal conditions are not the same.

72.5 The contribution conditions

Para 3(3) Sch 15 FA 2004 provides:

The contribution condition is that at any time after 17 March 1986 the chargeable person has directly or indirectly provided, otherwise than by an excluded transaction, any of the consideration given by another person for the acquisition of—

- (a) an interest in the relevant land, or
- (b) an interest in any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the relevant land.

This is best regarded as two conditions, depending on whether (a) or (b) applies. I call them “**contribution conditions (a) and (b)**”. Only one of them need be satisfied for the “contribution condition” to be met.

72.5.1 *Contribution condition (a)*

The essence of contribution condition (a) is that:

T has directly or indirectly provided...any of the consideration given by another person for the acquisition of ... the land occupied by T ...

This envisages that:

- (1) “another person” (which may be a company or trustee) acquires for consideration land occupied by T; and
- (2) T has provided that consideration directly or indirectly.

72.5.2 *Contribution condition (b)*

The essence of contribution condition (b) is that:

T has directly or indirectly provided ... any of the consideration given by another person for the acquisition of ... any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of ... the land occupied by T.

This applies where:

- (1) “another person” (“A”) acquires “other property” for consideration.
- (2) T has provided that consideration directly or indirectly.
- (3) A disposes of the other property.
- (4) The proceeds are (directly or indirectly) applied by “another person” (presumably either A himself or another person, “B”) towards the acquisition of the land occupied by T.

The drafter may be considering a situation where:

- (a) T transfers funds to A who purchases a property; and
- (b) A sells that property and uses the proceeds to buy another property occupied by T.

or

- (a) T transfers funds to A (eg trustees);
- (b) A transfers the funds to B (eg a company held by A);
- (c) B uses the funds to purchase a property occupied by T.

In both those cases I would have said that T had indirectly provided consideration given for the land and contribution condition (a) was already satisfied. I cannot think of a situation which falls within condition (b) and which does not fall within condition (a). But it does not much matter.

72.5.3 *Purpose of contribution conditions*

It is hard to see the purpose of the contribution conditions. *Ingram, Eversden* and double trust schemes would be caught by the disposal conditions. Perhaps it was meant to catch schemes set up on the occasion

of purchase of a new property where the settlor would provide cash to a trust. But this was never done in the past; it would have been better to frame more targeted anti-avoidance provisions than this blunderbuss approach.

72.6 “Provide”

“Providing” is the fundamental concept in the contribution conditions and it is not an easy one. Some guidance can be found in cases on the meaning of “settlor” where the statutory language is similar.⁷

It is considered that “provide” implies an element of bounty. So if T lends money on arm’s length terms to A, who uses the money lent to buy the property, T has not “provided” the consideration and the contribution condition is not satisfied.

What if T lends interest-free to A, who uses the money lent to buy the property? At first sight T has provided the consideration. But it might be argued that A provides the consideration himself (by A’s promise to repay T) and that T provides nothing.⁸ In practice HMRC now⁹ accept this.

7 Some guidance ought to be found from comparable wording in Stamp Duty and SDLT group relief. Unfortunately the SD/SDLT position is even more obscure than the POA: s.27 FA 1967; SP 3/98; para 2(2) Sch 7 FA 2003; Tax Bulletin 70.

8 One might say that T has provided the interest foregone on the loan, but interest foregone does not exist, and it is difficult to see how one could provide something which does not exist; see 75.16 (Interest-free or back-to-back loan).

9 This reverses the view taken in the CIOT Statement:

“6.2 The meaning of the ‘provision’ of ‘consideration’ in the context of the contribution condition needs to be clarified. On the basis of the case law the word provided suggests some element of bounty.

On this basis our view is that if there is a transfer of Whiteacre by A (or another asset) to his son at full market value which is then sold by son and the sale proceeds used to purchase Blackacre for A to occupy this is a breach of the disposal but not the contribution condition because it lacks the necessary element of bounty.

Similarly the provision of a loan on commercial terms by A to his son to enable son to purchase a house which A then occupies in our view does not fall within the contribution condition.

Question 32

Do HMRC agree with this analysis?

HMRC answer to question 32

In our view, it is arguable that the contribution condition does not depend on a degree of bounty for its application. If, on the contrary, a degree of bounty was necessary, might not the operation of the contribution condition provisions in paras 3(3) and 6(3) of Schedule 15 be circumvented by the relatively simple expedient of

IHT Manual 44005 [March 2012] provides:

However, the contribution condition is not met where the chargeable person resides in property purchased by another with money loaned by the chargeable person. This is because the outstanding debt will form part of the lender's estate for Inheritance Tax purposes, and the lender cannot be said to have provided a contribution to the purchase of that property when that money has to be repaid to them, even if the loan was interest free. It follows that the 'lender', in such an arrangement, is not subject to a POA charge.

What if

- (1) T lends interest-free to A,
- (2) A purchases the property, and
- (3) T later releases the loan or makes a gift to A which A uses to repay the loan (which comes to the same thing)?

Alternatively, more simply, what if:

- (1) A purchases the property
- (2) T makes a gift to A, or reimburses A for the expense (without being obliged to do so).

If T has not provided the consideration at the time that A purchases the

A, in your example, providing the wherewithal for the purchase of a house by his son by way of a loan, ostensibly on commercial terms, which is then left outstanding indefinitely?

Having said that, we have considered further the sort of case where a loan is made **and operated** on commercial terms eg a commercial rate of interest is specified and paid and there are provisions for repayment of the loan over the sort of period one would expect to find in a truly commercial loan. Having regard to paras 4(2)(c) or 7(2)(c) of Schedule 15, the chargeable amount would depend on the value of DV in R (or N) \times DV/V: that's to say on 'such part of the value of the land/chattel as can reasonably be attributed to the consideration provided by the chargeable person'. In the case where the loan is on truly commercial terms and conducted in a truly commercial way, we would accept that the attributable amount is nil or de minimis. In determining 'reasonable attribution' for the purposes of para 4(2)(c), it is the terms on which the loan is made and operated that are relevant, as indicated above. In that context, the period over which the loan is repaid as well as whether a commercial rate of interest is charged is relevant.

Thus, where an interest-free loan is repaid over a typical 'commercial' period, it would be reasonable to regard the interest foregone as attributable to the consideration provided by the chargeable person. In cases where the principal of the loan was left outstanding indefinitely, such principal could reasonably be regarded as attributable to the consideration provided."

property, T cannot provide it later. However if the steps form part of a single arrangement, it can probably be said that A has provided the consideration indirectly, even if slightly belatedly.

What if T subscribes for shares on arm's length terms? Probably T has provided funds to the company

72.6.1 *Arrangements involving third parties*

The position becomes more complex where more than two persons are involved.

Suppose T provides funds to A, an individual, who gives them to B, an individual, and B purchases the property. It is suggested that T has not provided the consideration if the "clean break" test is satisfied.¹⁰

Suppose T provides funds to a trust, who lend them to a company owned by the trust, which purchases the property. It is suggested that T has provided the consideration because the "clean break" test is not satisfied.

What if T gives funds to A and A borrows from a third party on the security of those funds, and uses the borrowed funds to buy the property? It is considered that T has not provided the consideration. If T provides fund X to a company or trust, which borrows fund Y from a third party, and the company or trust uses both funds to acquire the property, then T has provided fund X but not fund Y.

Traditional IHT planning for a foreign domiciliary's residence will often satisfy the contribution condition, for instance where:

- (1) an individual gives to a trust which purchases the home (without a company);
- (2) a foreign domiciliary gifts funds to a trust which lends interest-free to the company which acquires the home.

In most cases one exemption or another will apply but it is possible to fall between the gaps.

72.6.2 *Provision of funds for purpose of acquisition*

What is the position if T provides funds but not for the purpose of the acquisition of the land? Suppose:

- (1) In 1987 T created a trust. At the time T had no plans to move to the UK.

¹⁰ See 75.4.1 (When is A an indirect settlor?).

(2) In 2005 the trustees finance by interest-free loan a company which purchases a property which T occupies.

The foreign domiciled individual has directly provided the property for the purposes of the trust. They are probably to be regarded as having indirectly provided the consideration given for the acquisition of the land under the principle in *Muir v Muir*.¹¹ So contribution condition (a) is satisfied.

But if T gives funds to A, an individual, and A later uses those funds to buy a property, it is suggested that T has not provided the consideration, unless the two steps form a single arrangement.

72.6.3 *Guarantees*

Para 17 Sch 15 FA 2004 provides:

Where a person (“A”) acts as guarantor in respect of a loan made to another person (“B”) by a third party in connection with B’s acquisition of any property, the mere giving of the guarantee is not to be regarded as the provision by A of consideration for B’s acquisition of the property.

It is suggested that this applies even if A provides security for A’s guarantee or deposits funds with a bank as a back-to-back loan.

What if:

- (1) B borrows to purchase property (perhaps with a guarantee by T); and
- (2) T later gives funds to B who repays?

If the steps are independent, it is considered that T has not provided the consideration. If, however, the steps form part of a single arrangement, it is suggested that T can be said to have provided the consideration indirectly.

72.6.4 *Secondhand company*

The contribution condition will not be satisfied where:

- (1) A has provided funds to a company to purchase a house.

¹¹ [1943] AC 468. This is consistent with para 10(2)(c) Sch 15 FA 2004 which envisages a seven-year gap between the provisions of funds and the occupation of the land. But the contrary view is arguable.

(2) A sells the company to B who occupies the house.

B has not provided the funds for the purchase (unless the two steps form a single arrangement): see 27.8.1 (Purchase of secondhand company by individual).

72.7 POA chattel charge

Para 6 Sch 15 FA 2004 provides:

- (1) This paragraph applies where—
 - (a) an individual (“the chargeable person”) is in possession of, or has the use of, a chattel, whether alone or together with other persons, and
 - (b) the disposal condition or the contribution condition is met as respects the chattel.
- (2) The disposal condition is that—
 - (a) at any time after 17 March 1986 the chargeable person had (whether alone or jointly with others) owned—
 - (i) the chattel, or
 - (ii) any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of the chattel, and
 - (b) the chargeable person disposed¹² of all or part of his interest in the chattel or other property otherwise than by an excluded transaction.
- (3) The contribution condition is that at any time after 17 March 1986 the chargeable person had directly or indirectly provided, otherwise than by an excluded transaction, any of the consideration given by another person for the acquisition of—
 - (a) the chattel, or
 - (b) any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of the chattel

This follows the form of the POA land charge.

¹² “Disposal” is further defined in para 6(4) Sch 15 FA 2004.

72.8 POA intangible property charge

Para 8 Sch 15 FA 2004 provides:

- (1) This paragraph applies where—
 - (a) the terms of a settlement,¹³ as they affect any property comprised in the settlement, are such that any income arising from the property would be treated by virtue of section 624 of ITTOIA (income arising under settlement where settlor retains an interest) as income of a person (“the chargeable person”) who is for the purposes of Chapter 5 of Part 5 of that Act the settlor,
 - (b) any such income would be so treated even if section 625(1) of ITTOIA (settlor’s retained interest) did not include any reference to the spouse or civil partner of the settlor, and
 - (c) that property includes any property as respects which the condition in sub-para (2) is met (“the relevant property”).
- (2) The condition mentioned in sub-para (1)(c) is that the property is intangible property which is or represents property which the chargeable person settled, or added to the settlement, after 17 March 1986.

In common form settlor-interested discretionary trusts the GWR exemption will apply.

If S lends on favourable terms to a settlement from which S is excluded, s.624 applies¹⁴ but para 8 does not apply.¹⁵

In common form trusts where the settlor has an IP, the GWR exemption (or for an estate IP, the estate exemption) will apply.

Accordingly, the POA intangible property charge will not usually affect foreign domiciliaries.

The charge does not apply to intangible property held by a company held by a trust, since that is not property comprised in a settlement, and not caught by s.624, but the shares in the company will be intangible property (except perhaps bearer shares?).

The charge is intended to catch *Eversden* schemes marketed by life insurance companies (which will not normally have been carried out by

13 “Settlement” here has the IHT meaning, not the settlement-arrangement meaning: para 1 Sch 15 FA 2004. See 75.2 (Definitions of “settlement”).

14 See 26.3.2 (“Settlor-interested” for IT purposes).

15 Because s.624 only applies because of the loan and not because of the terms of the settlement (in the IHT sense).

foreign domiciliaries). But it is much wider than that. It applies (in short) to (almost) any settlor-interested trust unless GWR also applies. If A creates a trust to A for life remainder to B absolutely, or to B for life remainder to A absolutely, the charge applies. However, if there is a power of appointment in favour of A, the charge does not apply as in this case there is a GWR. There is no sense in this. Since s.102ZA FA 1986 stops the *Eversden* schemes, the intangible property charge is an anti-avoidance provision that has lost its purpose¹⁶ and only remains as clutter in the tax system which will occasionally trap the unwary (if anyone notices or cares).

72.9 Excluded transactions

A disposal of property by an excluded transaction is ignored for the disposal conditions; and the provision of property by an excluded transaction is ignored for the contribution conditions. Para 10(1) Sch 15 FA 2004 defines “excluded transaction” for the disposal conditions and para 10(2) Sch 15 FA 2004 defines the phrase for the contribution conditions. Each sub-paragraph contains five categories of excluded transaction, making 10 in all. Simplicity was evidently not an important consideration to the drafter of the POA rules.

Excluded transactions are not a defence to the POA intangible property charge.

72.10 Excluded transactions: disposal conditions

72.10.1 Arm’s length transactions

Para 10(1) Sch 15 FA 2004 provides:

For the purposes of ... [the disposal condition], the disposal of any property is an “excluded transaction” in relation to any person (“the chargeable person”) if—

- (a) it was a disposal of his whole interest in the property, except for any right expressly reserved by him over the property, either—
 - (i) by a transaction made at arm’s length with a person not connected with him, or

¹⁶ Except for arrangements made before 22 March 2006.

- (ii) by a transaction such as might be expected to be made at arm's length between persons not connected with each other.

There is no equivalent of this category of excluded transaction for the purposes of the contribution conditions. The reason is that a disposal at arm's length is not likely to amount to "providing" consideration.

This is extended to part disposals by reg. 5(1) of the 2005 POA Regulations:

Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if—

- (a) the disposal was by a transaction made at arm's length with a person not connected with him;
- (b) the disposal was by a transaction such as might be expected to be made at arm's length between persons not connected with each other, and
 - (i) the disposal was for a consideration not in money or in the form of readily convertible assets¹⁷, or
 - (ii) the disposal was made before 7 March 2005.

One might think the word "not" is included accidentally in reg.5(1)(b)(i) but it was deliberate. A written ministerial statement of Hansard 7 March 2005 provides:

We do not in general think it is appropriate to provide exemption for sales of a part interest which are made otherwise than at arm's length. If one member of a family needs to raise cash, and another member of the family is willing and able to provide it, there are other and more straightforward ways of structuring this than adopting the form of an equity release transaction.

Very few readers will find that satisfactory. But there it is. The statement continues:

The point was however made in consultation that some intra-family part disposals can arise from patterns of behaviour adopted for good family

¹⁷ Defined in reg.5(2).

or business reasons, for example where a child moves in to care for an aged parent and acquires an equitable interest in their shared home as a corollary of that, or where younger members of a family take over the active role in a family partnership, and in doing so acquire an interest from the partners who preceded them.

What is notable is that the drafter seems to have assumed that these are “transactions such as might be expected to be made at arm’s length between persons not connected with each other”.

The Inheritance Tax Manual provides:

44059. Sale of part share [March 2012]

Regulation 5(1)(b)(i)... may also apply where someone acquires their interest in a property by way of an equitable arrangement, rather than for cash, for example where the person has given up work to care for the owner of the property on the understanding that they will acquire a share of the property in return.

The former Website POA Guidance was more helpful (Appendix 1):

If Miss B acquired her interest in the property by way of an equitable arrangement rather than for cash – for example, she had given up work to care for Mr A on the understanding that she would receive a share of the property in return – the income tax charge will not apply: Regulation 5

In considering whether the conditions were satisfied, we would need information about how the essential elements of the transaction had been arrived at. We do recognise that there is a substantial body of case law dealing with the circumstances in which an interest in a house is acquired in consequence of a person acting to his detriment. The Ministerial Statement had these sorts of situations in mind and we would interpret Regulation 5 accordingly. In particular, we accept that the requirement that “the disposal was by a transaction such as might be expected to be made at arm’s length between persons not connected with each other” would be interpreted with such cases in mind. Where the parties had sought separate advice and acted upon it or had obtained a court order confirming the property entitlement, that would reinforce the claim that the conditions were satisfied. But we would not expect parties to such an arrangement to have done this. We recognise that detriment that the acquirer can demonstrate he has suffered can provide

consideration for the acquisition of the interest and prevent the transaction from being gratuitous.

It is straining credulity to describe this as a transaction that may have been expected to have been made at arm's length. But the legislation was not intended to catch this, and HMRC avoid the problem by informal concession dressed up as a statement of practice.

72.10.2 *Spouse exclusions*

The second and third categories of excluded transaction are in para 10(1)(b) and (c) Sch 15 FA 2004:

- (b) the property was transferred to his spouse or civil partner (or where the transfer has been ordered by a court, to his former spouse or civil partner),
- (c) it was a disposal by way of gift (or, where the transfer is for the benefit of his former spouse or civil partner, in accordance with a court order), by virtue of which the property became settled property in which his spouse or civil partner or former spouse or civil partner is beneficially entitled to an interest in possession.¹⁸

This applies whether or not the IHT spouse exemption applies on the transfer. The transfer to the spouse need not be by way of gift; but a disposal to a trust under which a spouse has an interest in possession must be by way of gift if the disposal is to be an excluded transaction. Perhaps the reason is to stop some variants of the double trust scheme, which involves a sale of a house to an interest in possession trust for consideration.

¹⁸ This is restricted by para 10(3) Sch 15 FA 2004:

“A disposal is not an excluded transaction by virtue of sub-para (1)(c) or (2)(b), if the interest in possession of the spouse or civil partner or former spouse or civil partner has come to an end otherwise than on the death of the spouse or civil partner or former spouse or civil partner.”

The former HMRC Website Guidance provided at 1.3.1:

“In cases where the spouse or civil partner or former spouse or civil partner has become absolutely entitled to the property, we would accept that the benefit of the exclusion is not lost.”

72.10.3 *Disposition for maintenance of family*

The fourth category of excluded transaction is in para 10(1)(d) Sch 15 FA 2004:

the disposal was a disposition falling within section 11 of IHTA (dispositions for maintenance of family).

72.10.4 *Annual exemption and small gifts*

The fifth category of excluded transaction is in para 10(1)(e) Sch 15 FA 2004:

the disposal is an outright gift¹⁹ to an individual and is for the purposes of IHTA a transfer of value that is wholly exempt by virtue of section 19 (annual exemption) or section 20 (small gifts).

This will include substantial gifts which qualify for 100% BPR or APR.

72.11 **Excluded transactions: contribution conditions**

72.11.1 *Four exclusions*

Para 10(2) Sch 15 FA 2004 provides:

For the purposes of ... (the contribution condition) the provision by a person (“the chargeable person”) of consideration for another’s acquisition of any property is an “excluded transaction” in relation to the chargeable person if—

- (a) the other person was his spouse or civil partner (or, where the transfer has been ordered by the court, his former spouse or civil partner),
- (b) on its acquisition the property became settled property in which his spouse or civil partner or former spouse or civil partner is beneficially entitled to an interest in possession.

These are the equivalent of the exclusions discussed above, see 72.10.2

¹⁹ See 72.12 (Meaning of “outright gift”).

(Spouse exclusions). The spouse trust exclusion here is wider than the spouse trust exclusion for the disposal condition, as the words “by way of gift” do not appear. The last two exclusions in para 10(2) Sch 15 FA 2004 are:

- (d) the provision of the consideration is a disposition falling within section 11 of IHTA (dispositions for maintenance of family), or
- (e) the provision of the consideration is an outright gift to an individual and is for the purposes of IHTA a transfer of value that is wholly exempt by virtue of section 19 (annual exemption) or section 20 (small gifts).

These are the equivalent of 72.10.3 (Disposition for maintenance of family) and 72.10.4 (Annual exemption and small gifts).

72.11.2 Outright gift of money

The remaining exclusion is in para 10(2)(c) Sch 15 FA 2004 where:

- (c) the provision of the consideration constituted an outright gift²⁰ of money (in sterling or any other currency) by the chargeable person to the other person and was made at least seven years before the earliest date on which the chargeable person met the condition in para 3(1)(a)²¹ or, as the case may be, 6(1)(a).²²

Para (c) applies only to the contribution conditions.

The exemption only applies to gifts of money. I am unable to see any reason for that. The IHT Manual provides:

44036 The contribution condition - outright gift of money [March 2012]

As the earliest date a POA charge can arise is 6 April 2005, any contribution by way of an outright gift of cash made before 6 April 1998 will be an excluded transaction, irrespective of when the person subsequently went into occupation.

²⁰ See 72.12 (Meaning of “outright gift”).

²¹ ie occupies the relevant land.

²² ie has possession of the chattels.

72.12 Meaning of “outright gift”

The expression “outright gift” is used in three of the ten categories of excluded transaction:

- (1) Outright gifts to individuals within s.19 (annual exemption) or s.20 (small gifts) are excluded transactions for the disposal and contribution conditions.²³
- (2) Outright gifts of money (whether or not to an individual) are excluded for the disposal condition.²⁴

“Outright gift” is not defined.²⁵ Clearly a loan and a subscription for shares is not an outright gift. It is suggested that a gift to a trust from which the settlor is excluded is in principle an outright gift.

It is tentatively suggested that a gift to an irrevocable discretionary trust of which the donor is merely a discretionary beneficiary is an outright gift. It must be envisaged that the donor occupies the land given or the exclusion will not apply.

72.13 Exemptions from charge

Para 11 Sch 15 FA 2004 provides a set of exemptions from the POA charges which (in my terminology) are as follows:

- (1) Estate exemptions
- (2) GWR exemptions
- (3) Para 11(5)(b) Sch 15 FA 2004 exemptions (charities and other specialist areas) not discussed here
- (4) Para 11(5)(c) Sch 15 FA 2004 exemption (jointly occupied property) not discussed here
- (5) Full consideration exemption

72.14 “Relevant property”

A key concept in para 11 Sch 15 FA 2004 is “relevant property” defined in para 11(9) Sch 15 FA 2004. The expression has three possible meanings.

23 See 72.10.4 (Annual exemption and small gifts); 72.11.1 (Four exclusions).

24 See 72.11.2 (Outright gift of money).

25 The term “outright gift” is partially defined in s.626 ITTOIA; see 69.12 (Income tax planning for mixed marriage), but that definition does not apply here.

In relation to the POA land and chattel charges, “relevant property” means:

- (i) where the disposal condition ... is met, the property disposed of,
- (ii) where the contribution condition ... is met, the property representing the consideration directly or indirectly provided.

In a contribution condition case, the relevant property is the property representing the consideration directly or indirectly provided. Since “provided” is a difficult concept,²⁶ this is also difficult.

If T gives money to A, who uses it to buy a house, the house represents the consideration provided.

What if T subscribes for shares in A Ltd which purchases the house. Is it the shares or the house which represent the property provided? It is suggested that the relevant property is the house, but the shares may be derived property: see below.

What if T lends money to A interest-free, who purchases a house? Is it the house or the benefit of the loan which represents the consideration provided? In this case HMRC accept that T does not provide the consideration so the contribution condition is not satisfied; but if it mattered, it is suggested that the relevant property is the house and the loan may be derived property.

In relation to the POA intangible property charge, “relevant property” has the meaning given in para 8 Sch 15 FA 2004 (roughly, the settled property).²⁷

72.15 Estate exemptions

72.15.1 Full estate exemption

Para 11(1) Sch 15 FA 2004 provides that the POA charges:

do not apply to a person at a time when his estate for the purposes of IHTA includes—

- (a) the relevant property, or
- (b) other property—

²⁶ See 72.6 (“Provide”).

²⁷ See 72.8 (POA intangible property charge).

- (i) which derives its value from the relevant property, and
- (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property.

I refer to this as “**the estate exemption**” (or “**the full estate exemption**” if necessary to distinguish it from the partial exemption discussed below).

If T transfers funds to a trust under which T has an estate interest in possession, the estate exemption will apply. Transfers after 2006 will not normally give rise to an estate IP, so the exemption is of less importance to post-2006 trusts.

72.15.2 *Partial estate exemption*

Para 11(2) Sch 15 FA 2004 provides:

Where the estate for the purposes of IHTA of a person to whom para 3, 6 or 8 applies includes property—

- (a) which derives its value from the relevant property, and
 - (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property,
- the appropriate rental value in para 4, the appropriate amount in para 7 or the chargeable amount in para 9 (as the case may be) is to be reduced by such proportion as is reasonable to take account of the inclusion of the property in his estate.

I refer to this as “**the partial estate exemption**”.

The concluding words “such proportion as is reasonable to take into account of the inclusion of the property in his estate” are somewhat incoherent. One can speak of “a proportion of a property”, but not of “a proportion of an inclusion”. Presumably it means: “such proportion as is reasonable to take into account of the property which is included in his estate”.

72.16 **Derived property**

In the following discussion:

- (1) “**Fully derived property**” is property falling within para 11(1)(b) Sch

15 FA 2004.²⁸ That is property:

- (i) which derives its value from the relevant property, and
- (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property.

(2) “**Partly derived property**” is property falling within para 11(2) Sch 15 FA 2004. That is property:

- (a) which derives its value from the relevant property, and
- (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property.

Thus there are three steps to decide whether property is “derived property”:

- (1) Is its value derived from the relevant property (the house)? If so:
- (2) Ascertain how far its value is attributable to the house.
- (3) Is that value (the value attributable to the house) “substantially²⁹ less” than the value of the house?

28 In para 11 Sch 15 FA 2004 this is simply called “derived property”.

29 “Substantially” is, obviously, not a precise word. The Inheritance Tax Manual provides:

44043. Property in a person’s estate that derives its value from the relevant property [March 2012]

“The exemption in FA04/Sch15/Para 11(1) (IHTM44041) also applies to relevant property where a person's estate includes property which derives its value from that property, FA04/Sch15/Para11(2). Where the value of the derivative property, so far as is attributable to the relevant property, is substantially less than the value of the relevant property

- the appropriate rental value of the relevant land, or
- the appropriate amount in respect of the chattel, or
- the chargeable amount in relation to the relevant intangible property

must be reduced by such proportion as is reasonable to take account of the inclusion of the derivative property in the person's estate. You should normally regard the value of the derivative property as being 'substantially less' than that of the relevant property where the difference in value is more than 20%. Any case where you consider the exemption should apply (or not apply) in full and there is a reduction of more (or less) than 20% should be referred to Technical.”

72.16.1 *Derived property: shares*

Suppose T subscribes for shares in a company which buys a house and has no other assets. The shares are fully derived property since:

- (1) the shares derive their value from the house (the relevant property); and
- (2) the value of the shares is attributable to the house; and
- (3) that value is not substantially less than the value of the house.

Suppose the company owns a house and other assets. The context shows that the shares are still to be regarded as fully derived property since:

- (1) they derive their value from the house;
- (2) their value is to some extent attributable to the house;
- (3) their value to that extent is not substantially less than the value of the house.

One might question whether it is the case that the shares derive their value from the house. They derive their value in part from the house and in part from other assets. However, the context shows that that satisfies the condition of para 11(1)(b)(i) Sch 15 FA 2004. Otherwise the condition in para 11(1)(b)(ii) Sch 15 FA 2004 is never satisfied.

Suppose the company owns only the house and is subject to a substantial debt. The shares are not fully derived property as their value is substantially less than the house. The shares are partly derived property.

Suppose the company owns the house and other assets, and is subject to a debt. It is suggested that the shares are fully derived property so long as the amount of the debt is less than the value of the other assets.

The estate exemption applies so long as T retains the shares in T's estate. If T gifts half the shares to T's spouse the estate exemption ceases to apply and POA land charge is due (but with some relief under the partial estate exemption). HMRC agree. The IHT Manual provides:

44043 - Property in a person's estate that derives its value from the relevant property [March 2012]

Example

Bruce transfers his house to a company wholly owned by him. The value of the shares in the company which are included in Bruce's estate is fully derived from the value of the house and so the exemption in FA04/Sch15/Para 11(1) applies.

But if Bruce gave the house to a company which was owned 25% by his civil partner then the value of the 75% shares he holds would be 'substantially less' than the value of the house, so although the POA

charge would apply, the appropriate rental value should be reduced by a reasonable proportion, perhaps 75%, to reflect the value of the shares in Bruce's estate.

72.16.2 *Derived property: benefit of loan*

Suppose T lends interest-free to a company which purchases the house and has no other assets. Initially the loan is fully derived property as the shares have no value. The loan derives its value from the house as, if the loan is called in, it could only be paid by the company:

- (1) selling the house and using the proceeds of sale, or
- (2) borrowing on the strength of the house (in the sense that no lender would lend if the company did not hold the house) and repaying out of that loan.

Can HMRC argue that:

- (1) the loan derives its value from the contractual undertaking that obliges the company to repay; and so
- (2) the loan does not derive its value from the underlying property (the house).

Point (1) is correct but point (2) does not follow and is not correct. It is the existence of the house which gives value to the contractual obligation to repay.

If the value of the house increases substantially, the shares and loan (taken together) are fully derived property and taken separately they are partly-derived property.

Unfortunately HMRC disagree. The CIOT Statement provides:

6.3 Clarification is requested on the position where a house is owned by a company but the company is funded by way of loan. The concern is over paras 11(1)(b) and 11(3)(b).

Example 9

- [1] B owns 100 £1 shares in X Limited and otherwise funds it by shareholder loan.
- [2] (Or the house is owned by a company held within an interest in possession trust for B and again the funding for the purchase comes by way of loan from trustees to company.)

X Limited buys the house in which B lives. B *prima facie* falls within the para 3 charge.

In fact HMRC accept that case [1] does not fall within the POA land

charge because the interest free loan is not providing consideration.³⁰ The CIOT Statement continues:

It would appear that para 11(1) protects him. The shares are not themselves property which derive much value from the house because they are worth substantially less than the house (see para 11(1)(b)(ii)) but the shares and the loan together are comprised in B's estate and between them indirectly derive their value from the house. On that basis para 11(1) does offer full protection.

Question 33

Do HMRC agree with this analysis or do they consider that the loan derives its value from the contractual undertakings that oblige the borrowing company to repay?

It would be odd if there is a POA problem when the company is funded by way of loan but not if it is funded by way of share capital.

HMRC

In our view, the loan, albeit an asset of B's estate, is not property that derives its value from the relevant property. However, our response to Q32 above would no doubt be applicable here in appropriate circumstances.³¹

This is plainly wrong and I would be surprised if HMRC tried to defend it if challenged.³²

The position is more complicated if T lends to a company which purchases the house and has other assets. Suppose, for example, the company's assets and liabilities consist of a house worth £1m, investments of £1m, and a debt of £1m. It is still plainly the case that the benefit of the debt and the shares taken together are fully derived property. It is suggested that if the debt is charged on the house it derives its value from the house, and if it is not charged then it does not do so (but the shares do derive their value from the house).

What if T lends to a trust which purchases a house? If the loan is on limited recourse terms³³ the loan is fully derived property. It is suggested that the same applies even if the trustees are personally liable for the loan.

30 See 72.6 ("Provide").

31 See 72.6 ("Provide").

32 But one could avoid the issue by avoiding loans, eg subscribe for redeemable shares, which are commercially equivalent to loans.

33 ie the trustees' liability to repay is restricted to the trust assets or their value.

72.16.3 *Derived property: equitable interests*

If T transfers property to a trust for A for life, remainder to T, T has a reversionary interest which is derived property. The interest is part of T's estate so the full (or partial) estate exemptions apply (depending on whether the value of the reversionary interest is equal to 80% or more of the value of the trust fund).

If T transfers property to a trust for T for life, remainder to A, T's life interest is derived property but it does not form part of T's estate (after 2006) so the estate exemption does not apply.

72.17 **Excluded liability rule**

Para 11(6) Sch 15 FA 2004 provides a restriction on the estate exemptions:

Where at any time the value of a person's estate for the purposes of IHTA is reduced by an excluded liability affecting any property...

I call this “**the excluded liability rule**”. The effect of the rule if it applies is:

... that property is not to be treated for the purposes of sub-para (1) or (2) as comprised in his estate except to the extent that the value of the property exceeds the amount of the excluded liability.

The excluded liability rule only applies for the purposes of the estate and partial estate exemptions. The question of to what extent debts may limit the GWR exemption is discussed at 59.17 (GWR property subject to debt).

72.17.1 “*Excluded liability*”

The term “excluded liability” is defined in para 11(7) Sch 15 FA 2004:

For the purposes of sub-para (6) a liability is an excluded liability if—

- (a) the creation of the liability, and
- (b) any transaction
 - [i] by virtue of which the person's estate came to include
 - [A] the relevant property or

- [B] property which derives its value from the relevant property or
- [ii] by virtue of which the value of property in his estate came to be derived from the relevant property, were associated operations, as defined by section 268 of IHTA.

I am unable to think of any liability affecting property which is not associated with the transaction within (b). The definition of associated operations is extremely wide. On a number of occasions where anti-avoidance provisions use the concept of “associated operations” restrictions have been read in by implication. An example is *Reynaud v IRC* [1999] STC (SCD) 185. This concerned a gift of shares followed by a sale of those shares, two associated operations. The case considered the definition of “transfer of value”. That term includes “a disposition effected by associated operations” which reduces the value of an estate. The Special Commissioners held that associated operations were only relevant if they were part of a scheme contributing to the reduction of the estate. See the decision at [17]. However, the decision was not based on the definition of associated operations. On the contrary, it was accepted that operations which do not form part of a scheme could nevertheless be associated. It was the concept of “*disposition effected by associated operations*” which was held to refer only to operations which formed part of a scheme. That is, the restriction was implied by the context of s.3(3) IHTA, not by the words of s.268.

One could argue that the context of para 11(7) Sch 15 FA 2004 implies a restriction that only associated operations forming part of a scheme are relevant for the definition of excluded liability. This would have to be a purposive construction since the words are not in fact there in para 11(7) Sch 15 FA 2004. But we know that the purpose of para 11(7) Sch 15 FA 2004 is to *catch* double trust plans. The effect of this construction would be to *defeat* the intention of the legislation. The argument asks the Courts to frustrate the actual intention of the legislation. So the argument is unlikely to succeed.

72.17.2 “Affecting” property

The rule only applies to a liability which “affects” property. It is suggested that a liability of an individual or company does not affect property of the individual or company unless secured on that property. A liability of a

company does not affect the shares of the company (even if it may reduce their value). A liability of a trust does affect the trust property since the trustees have a lien over the trust fund to meet the liability.

72.18 Value of estate “reduced” by liability

The excluded liability rule only applies if the value of a person’s estate is “reduced” by a liability. In what circumstances does a liability reduce the value of an estate? Plainly it does not do so if it is disallowed for IHT.³⁴

72.18.1 Trustees borrow from trust company

What if trustees owe a debt to a company held by the trust? It is considered that the debt does not reduce the life tenant’s estate since the benefit of the debt increases the value of the company’s shares: the two cancel each other out. (In addition, the GWR exemption will usually apply.)

72.18.2 Bank borrowing

What if T (or trustees of a trust in which T has an estate IP) borrow money from a bank or third party? It is considered that T’s estate is not “reduced” by the liability, since T’s estate is not reduced by the transaction: the liability is matched by the receipt of the borrowed money. Otherwise the excluded liability rule would apply whenever anyone borrows on the security of T’s house, which would be absurd.³⁵

72.18.3 Company borrows from individual

Suppose T lends to a company (owned by T) which purchases the property. The liability is an excluded liability as defined, but so long as T retains the benefit of the debt the excluded liability rule does not apply because the debt does not reduce T’s estate. What if T gives away the debt? The excluded liability rule does not apply unless the debt is

³⁴ See 61.2 (Liability of individual).

³⁵ Admittedly s.162(5) IHTA applies and uses the word “reduced” in connection with the same liability. But the question is not whether the value of an *asset* is reduced, but whether the value of the *estate* is reduced.

secured because the debt does not affect the property.

72.18.4 *Double trust schemes*

The excluded liability rule was intended to catch double trust schemes. Suppose:

- (1) T sells T's home to a trust under which T has an interest in possession in return for a debt.

At this point the excluded liability rule does not apply. The liability is an excluded liability as defined.³⁶ However, the benefit of the debt is in T's estate. It is considered that the value of T's estate is not "reduced" by the liability.

- (2) T gives the benefit of the debt to T's children or to a trust for their benefit.

Is the value of T's estate is now reduced by the liability? One can argue that it is reduced by the gift of the debt, not by the liability. But a purposive construction suggests that this cannot be right.

The provision works as intended.

72.18.5 *HMRC view*

The CIOT Statement provides:

2.5 A common scenario (both for foreign and UK domiciliaries) is where cash is settled into an interest in possession trust for the donor life tenant. The trustees then buy a house for the donor to live in using the gifted cash plus third party borrowings. Although not a home loan scheme, the legislation appears to affect such arrangements.

Example 4

E settles cash of £200,000 into an interest in possession trust for himself in 2003. The trustees purchase a property worth £500,000, borrowing £300,000 from a bank. There are other assets in the trust which can fund the interest but the borrowing is secured on the house which E then occupies.

In these circumstances, one would not expect a POA charge. There is no inheritance tax scheme since the property is part of E's estate and the

36 The transaction by which the person's estate included the house was its purchase not the sale to the trust. The creation of the liability is an associated operation because it affects the same property even if the purchase was many years earlier.

borrowing is not internal. One would argue that E's estate still includes the house and therefore protection is available under para 11(1). The difficulty is that on one view the loan is an excluded liability within para 11(7) reducing E's estate, albeit it is a loan on commercial terms with a bank.

We would argue that the relevant property for the purposes of para 11 is simply the value of the property net of the commercial borrowing. As this is part of E's estate there is no POA charge.

Question 13

Is the above analysis correct?

HMRC

We agree with your analysis in para 2.5.

It is quite correct that one would not expect a POA charge, as there is no IHT saving. However, what is the correct analysis of the provisions in this situation? The loan is clearly an excluded liability. It is quite wrong to say that the *property* for the purposes of para 11 Sch 15 FA 2004 is its *value* net of the liability, because that confuses two entirely different things: property and the value of property. It is also wrong to say that the asset for the purposes of para 11 Sch 15 FA 2004 is the asset net of the liability; if one said that, the legislation would not work at all. The best solution is to say that the liability does not reduce the estate of the individual, E, because E's estate is increased by the proceeds of the loan (as well as being reduced by the liability; the two cancel each other out).

72.19 GWR exemptions

72.19.1 Full GWR exemption

Para 11(3) and (5) Sch 15 FA 2004 provide:

- (3) Paras 3, 6 and 8 do not apply to a person at a time when—
 - (a) the relevant property, or
 - (b) any other property—
 - (i) which derives its value from the relevant property, and
 - (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property,

falls within sub-para (5) in relation to him.

...

- (5) Property falls within this sub-paragraph in relation to a person at a

time when it—

- (a) would fall to be treated by virtue of any provision of Part 5 of the 1986 Act (inheritance tax) as property which in relation to him is property subject to a reservation,
- (b) would fall to be so treated but for any of paras (d) to (i) of subsection (5) of section 102 of the 1986 Act (certain cases where disposal by way of gift is an exempt transfer for purposes of inheritance tax),
- (c) would fall to be so treated but for subsection (4) of section 102B of the 1986 Act (gifts with reservation: share of interest in land), or would have fallen to be so treated but for that subsection if the disposal by way of gift of an undivided share of an interest in land had been made on or after 9 March 1999, or
- (d) would fall to be so treated but for section 102C(3) of, and para 6 of Schedule 20 to, the 1986 Act (exclusion of benefit).

In short, the POA charges do not apply to property subject to a reservation. (**“GWR property”**).

I refer to this as **“the full GWR exemption”**.

The question of whether property is GWR property (subject to a reservation) is considered at 59.3 (Terminology).³⁷

Note that property may be GWR property even though it is excluded property. Suppose:

- (1) T transfers funds to a discretionary trust under which T is a beneficiary (a GWR).³⁸
- (2) The trustees lend the funds to a company which purchases a house occupied by T.

The shares and the benefit of the loan are derived property, and are subject to a reservation. This is so even if they are excluded property. So the GWR exemption applies.

A complication arises if T becomes UK domiciled: see 72.25 (Former foreign domiciliary).

37 For this purpose para 11(8) Sch 15 FA 2004 tinkers with the GWR tracing rules:

“In determining whether any property falls within sub-para (5)(b), (c) or (d) in a case where the contribution condition in para 3(3) or 6(3) is met, para 2(2)(b) of Schedule 20 [FA 1986] (exclusion of gifts of money) is to be disregarded.”

38 The position is the same for a non-estate IP trust if T is the object of a wide power of appointment (so there is a GWR).

72.19.2 *Partial GWR exemption*

Para 11(4) Sch 15 FA 2004 provides:

Where any property which falls within sub-para (5) in relation to a person includes property—

- (a) which derives its value from the relevant property, and
 - (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property,
- the appropriate rental value in para 4, the appropriate amount in para 7 or the chargeable amount in para 9 (as the case may be) is to be reduced by such proportion as is reasonable to take account of that fact.

I refer to this as the “**partial GWR exemption**”. It is the equivalent of the partial estate exemption discussed above (except that the words at the end of the subsection are grammatical).

72.20 **Reverter to settlor restriction**

72.20.1 *The purpose of the rule*

Para 11(11)(12) Sch 15 FA 2004 set out a restriction to the estate and GWR exemptions which I call the “**reverter to settlor restriction**”. It is helpful first to explain the problem which the reverter to settlor restriction is intended to address.

EN FB 2006 explains:

17. [The POA] income tax charge was designed to discourage disposals done in a contrived way to avoid IHT. The income tax charge does not therefore apply

[a] when the original owner has the property back in their estate for IHT purposes (para 11(1) Schedule 15 – for example, because it has been given back to them), or

[b] when it is treated as back in their estate (para 11(5) – for example, because the original transaction is caught by the IHT “gift with reservation” rules).

This explanation of the estate and GWR exemptions is in essence correct, though strictly speaking, GWR property is not in the individual’s estate; it is however taxed as though it is. I stress this point as it will be relevant

in the discussion below. The EN continues:

18. There is a mismatch between this relief and an existing IHT exemption for the settled property in “reverter-to-settlor” trusts. The property in such a trust is treated as part of the trust beneficiary’s [ie life tenant’s] estate for IHT purposes, but it is not actually charged when their interest ends.

19. In particular, section 54(1) IHTA provides that, when a person who is beneficially entitled to an interest in possession in settled property dies while the settlor is still living, and the property reverts to the settlor, its value is left out of account in determining the value of the person’s estate. [The EN summarises ss.53 and 54 IHTA and continues:]

20. This can be used to side-step both IHT and the pre-owned asset income tax charge. For example:

- B owns an asset, say a house, which he wants to carry on using. B gives it to S, who would otherwise inherit on B’s death;
- S then settles an interest in possession in the house back on B for life, with the condition that it reverts to S on B’s death [ie S settles the property on B for life with remainder to A],³⁹
- for IHT purposes, B is therefore treated as owning the house by virtue of section 49 IHTA and so para 11(1) Schedule 15 disapplies the “pre-owned asset” charge;
- however, although the house is part of B’s estate for IHT purposes, there is no IHT charge on B’s death by virtue of the exemption in section 54(1) IHTA.

Avoidance of this kind was in fact quite common between 2004 and 2006, and clearly something had to be done.

21. This clause is aimed at blocking such avoidance by ensuring that the income tax exemption [POA estate and GWR exemptions] does not apply where the property in question (or any derived property) is back in the chargeable person’s estate for IHT purposes by virtue of their being beneficially entitled to an interest in possession in it.

22. However, the clause also provides that, if the chargeable person does not wish to be subject to the income tax charge, they can elect (like other former owners otherwise liable to the “pre-owned asset” charge) that the property should fall back into their estate for IHT purposes. Thus the clause ensures an effective IHT charge in these circumstances

39 Author’s Note: This is not of course generally possible after 2006.

by providing that the [reverter to settlor] exemptions in sections 53(3), 53(4) and 54 IHTA will not apply.

72.20.2 *The reverter to settlor restriction*

Para 11(11)(12) Sch 15 FA 2004 set out the reverter to settlor restriction:

(11) Sub-para (12) applies where at any time—

- [i] (a) the relevant property has ceased to be comprised in a person's estate ... , or
- (b) he has directly or indirectly provided any consideration for the acquisition of the relevant property,

and

- [ii] at any subsequent time the relevant property or any derived⁴⁰ property is comprised in his estate ... as a result of section 49(1) IHTA.

(12) Where this sub-paragraph applies, the relevant property and any derived property—

- (a) are not to be treated for the purposes of sub-paras (1) and (2) as comprised in his estate at that subsequent time, and
- (b) are not to be treated as falling within sub-para (5) in relation to him at that subsequent time.

The effect of para 11(12) Sch 15 FA 2004 is to disapply the estate exemptions and the GWR exemption.

72.20.3 *IP Trust for settlor from outset*

The condition in para 11[i](b) is a paraphrase of the contribution condition. At first sight, wherever the contribution condition applies, the estate exemption is disapplied. For instance, suppose:

- (1) T transfers cash to an estate IP settlement; and
- (2) the trustees acquire a UK residence.

The condition in para 11(12)[i](b) is met. At first sight the condition in para 11(12)[ii] is also met: one might think that at *any subsequent time ... derived property is comprised in his estate ... as a result of section 49(1) IHTA*. So the reverter to settlor restriction applies (even though the

⁴⁰ Para 11(13) Sch 15 FA 2004 defines “derived property” in terms which repeat the wording of para 11(1)(b) Sch 15 FA 2004 verbatim.

reverter to settlor exemption does not apply). So it appears that the POA charge applies. But HMRC do not agree. They say that the condition in para 11(12)[ii] is not met. Published correspondence between STEP and HMRC provides:

STEP letter

Are the following cases caught by POAT ...

1. In 1987, A sets up an interest in possession trust for himself into which he gifts his house. If the house is still held by the trustees now there is no POAT charge because nothing has left his estate. However assume that the house has since been sold but he retains an interest in possession. The trust holds a mixture of investments and another house that A occupies. Is para 11(11)(b) satisfied on the basis that A has provided consideration for the acquisition of the land which land has subsequently become comprised in his estate. ...

3. In June 2006, C, a disabled person, sets up a trust for himself that qualifies as a disabled person's interest within s89B IHTA. C puts in cash and the trustees invest in equities or a house that C occupies. C will pay POAT. ...

These two examples raise the same point: they are both estate IP trusts (though after 2006 a trust of that kind can only be made for a disabled beneficiary). But HMRC say that the reverter to settlor restriction does not apply, as the condition in para 11(ii) is not met. That provides:

[ii] at any subsequent time the relevant property or any derived⁴¹ property is comprised in his estate ... as a result of section 49(1) IHTA.

The HMRC response is as follows:

As I understand your concern, it is that the new para 11(11)(b) in Schedule 15 FA 2004 will catch someone who has settled, say, cash on interest in possession trusts for themselves (either before 22 March 2006, or afterwards if it is a "disabled person's interest") and subsequently occupies property bought by the trustees; or where the property they settled initially has been sold and replaced by other property, while the settlor has retained their interest in possession.

41 Para 11(13) Sch 15 FA 2004 defines "derived property" in terms which repeat the wording of para 11(1)(b) Sch 15 FA 2004 verbatim.

... In our view, the words “at any subsequent time” should be read as meaning that a POA charge will arise where

[1] the consideration leaves the donor’s estate, as a result of which that estate is reduced, and

[2] later property acquired with such consideration becomes comprised in it again because of their interest in possession. This is consistent with the reasons for Schedule 15.

We do not, therefore, consider that there will be a charge in the scenarios numbered 1 and 3 in your letters, because the assets transferred into trust and any derived assets have always been in the settlor’s estate for IHT purposes. We believe that also applies if, in your second scenario, B set up an interest in possession trust from the outset before Budget Day. The taxpayer should self-assess on the basis that no POAT is due and there is therefore no need to put anything about POAT on the tax return or for him to make the election where the settlor has retained an interest in possession throughout and settled the cash or property directly into trust himself (rather than through any other funding vehicle such as another trust). This is because no POAT charge arises under s80 FA 2006.

In summary we do not consider that s.80 FA 2006 has any implications for:

- a settlement of cash on interest in possession trusts for oneself made before 22 March 2006, or made by a disabled person on or after that date, after which the trustees purchase a property in which the settlor resides; or
- the settlement of a house in the same way, which is subsequently sold by the trustees and replaced by other investments or another property.

That remains our view, on the basis that the words “at any subsequent time” mean that new para 11(11)(b) Schedule 15 FA 2004 will only be relevant where:

- the consideration in question leaves the donor’s estate, as a result of which that estate is reduced; and
- later, property acquired with such consideration becomes comprised in the estate once more by virtue of an interest in possession.

We do not agree that this interpretation makes para 11(11)(a) redundant,⁴² since that relates to cases where the disposal condition is

42 This paragraph addresses a point made in the STEP letter in these words: “The potential difficulty with paras 11(11) and 11(12) is that they do not distinguish between reverter to settlor trusts and any trust set up between March 1986 and 22 March 2006 where the settlor has a qualifying interest in possession and would in that

met and para 11(11)(b) to cases where the contribution condition is met.

This is a purposive construction, but taxpayers will not object.

72.20.4 *Discretionary trust subsequently becomes IP trust for settlor*

The STEP letter sets out one other example:

Are the following cases caught by POAT ...

2. B is a foreign domiciliary who before 22 March 2006 set up a discretionary trust into which he transferred cash. He remains a beneficiary of the trust. The trust then funds a company which buys a house or possibly holds UK investments (and B will pay income tax under [s720 ITA] in respect of any UK income). The trust was before 22 March 2006 converted into an interest in possession trust. If there are any UK intangibles or UK property occupied by A which are held by the trustees within the interest in possession structure he is now subject to POAT. Even if one reads “subsequent time” to mean some time must elapse between the date when the gift is made and the date the property comes back into B’s estate this would still not protect B in this example because the trust was originally discretionary.

HMRC comment on this:

We accept that a POA charge may arise where someone set up a discretionary trust that has subsequently been converted into an interest in possession trust for the benefit of the settlor. (Scenario 2 in your example). However, it remains possible in those circumstances to elect out of the charge. So, take the following example:⁴³

event be subject to inheritance tax on his death.

These difficulties arise because paras 11(11) and 11(12) catch not only those transactions where land has been given away and ceased to be comprised in the settlor's estate and then comes back into his estate (condition a above). They also catch transactions where a settlor contributed funds or property to a trust and the trust (or an underlying company) has then used those funds or property representing them to buy the relevant property i.e. the land now occupied (condition b above). There is nothing in the words about “any subsequent time” which suggests that under (b) the property had first to cease to be comprised in his estate before being caught by this provision. Indeed if that was the case the words in (a) would be redundant.”

43 [Author’s footnote] The HMRC reply simplifies the facts of STEP example 2 by omitting the company: that allows HMRC to ignore various additional complications.

- H settles a property on discretionary trusts before 22 March 2006;
- also before that date, the trust is converted into an interest in possession trust for H's benefit, with remainder to his wife, W;
- A POA charge therefore arises because of s.80 FA 2006 but H elects.

As we see it, the effects of the election are:

- the chargeable proportion of the property will be treated as subject to a reservation, but only so far as H is not beneficially entitled to an interest in possession in the property (*para 21(2)(b)(i), Schedule 15 FA 2004*) – i.e. not at all;
- section 102(3) and (4) FA 1986 will apply, but only so far as H is not beneficially entitled to an interest in possession in the property (*para 21(2)(b)(ii)*) – i.e. not at all; and
- the reverter-to-settlor exemptions in s.53(3) and (4) and s.54 IHTA will not apply to the actual interest in possession (*para 21(2)(b)(iii)*).

We do not, therefore, consider that the election affects the availability of spouse exemption on H's interest in possession on his death – or on its termination during his lifetime. That is because, as we have just noted, the election will not cause s.102(3) and (4) FA 86 to apply because of H's interest in possession, so there will be no deemed PET.

It is absurd to expect taxpayers to make an election in this case. It is considered that the condition in para 11(12)[ii] is not satisfied, just as it is not satisfied in STEP examples 1 and 3. The property is in the estate of the settlor as soon as the settlement was made. (The settlor did not have an interest in possession, but it is property subject to a reservation, and one may (loosely) regard such property as being in the estate of an individual. That was the view of the drafter of the provisions.⁴⁴) The statutory words *at any subsequent time the relevant property or any derived property is comprised in his estate* require that the property becomes comprised in the individual's estate by means of a disposition other than the original transfer to the trust by the individual.

In short, the reverter to settlor restriction can and should be construed purposively, so it only applies in cases where the reverter to settlor restriction is actually in point, because that, unquestionably, was the intention when it was enacted.

44 See 72.20.1 (The purpose of the rule).

72.21 Full consideration exemption

The full consideration exemption in para 11(5)(d) Sch 15 FA 2004 applies where (in my paraphrase) the relevant property or derived property:

would fall to be treated as property subject to a reservation but for s.102C(3) and Schedule 20 para 6 FA 1986.

There are two exemptions here.⁴⁵

(1) where the GWR rule would apply but for s.102C(3) FA 1986; and
(2) where the GWR rule would apply but for para 6 Sch. 20 FA 1986.
Section 102C is not discussed here. Para 6(1) Sch 20 FA 1986 provides two exemptions to the GWR rule. The first is:

In determining whether any property which is disposed of by way of gift is enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise—

- (a) in the case of property which is an interest in land or a chattel, retention or assumption by the donor of actual occupation of the land or actual enjoyment of an incorporeal right over the land, or actual possession of the chattel shall be disregarded if it is for full consideration in money or money's worth ...

I call this the “**full consideration exemption**”. This is particularly important in relation to chattels because full consideration would be much less than the deemed income charge. As to the meaning of “full consideration” see RI 55 and the published IR letter of 18 May 1987. At present HMRC argue that the industry standard 1% guideline as the market rent for chattels is too low.

The full consideration exemption only applies if there would otherwise be a GWR. If an individual has carried out an *Eversden* scheme, they will not qualify for the full consideration exemption even if they pay full consideration for use of the land (though the rent paid will reduce the quantum of the POA charge).

⁴⁵ Another possible reading is that the exemption only applies if s.102C(3) and Sch 20 para 6 both apply, ie it is not enough that Sch 20 para 6 applies if s.102C(3) does not. But a close reading of s.102C shows that s.102C(3) and para 6 Sch 15 FA 2004 are alternatives. They cannot both apply. *Hansard* confirms this (if it were necessary): HC 7 July 2004 col.881, 900.

The second exemption in para 6(1)(b) Sch 20 is less likely to be important in practice.

72.22 Partnerships

The former Website POA Guidance provided:

The treatment of a share of a partnership interest for Schedule 15 purposes follows that applied for IHT purposes. In other words, we do not regard the partnership interest as transparent, and the disposal of a share is unlikely to give rise to a Schedule 15 charge in any circumstances.

This is not a view which bears much examination. If a partnership holds land, a partnership interest is an interest in land, and a disposal of that interest meets the disposal condition.⁴⁶ But the legislation was not intended to catch partnerships and HMRC avoid the problem by informal concession dressed up as a statement of practice. The passage is not in the IHT Manual but HMRC practice may not have changed.

72.23 Non-resident taxpayer

Para 12(1) Sch 15 FA 2004 provides:

This Schedule does not apply in relation to any person for any year of assessment during which he is not resident in the UK.

This is straightforward.

72.24 UK resident foreign domiciliary

Para 12(2) Sch 15 FA 2004 provides:

Where in any year of assessment a person is resident in the UK but is

⁴⁶ Contrast the original HMRC guidance (so called “Technical Guidance” 2004) which took the correct (if worrying) line that the POA rules in principle apply “if C, an existing partner, brings his son D into partnership”; see the 6th edition of this work, para 43.10.1.

domiciled⁴⁷ outside the UK, this Schedule does not apply to him unless the property falling within para 3(1)(a), 6(1)(a) or 8(1)(c) is situated in the UK.

This provides three exemptions:

- (1) exemption to POA land charge where T occupies non-UK situate land;
- (2) exemption to POA chattel charge where T uses non-UK situate chattels; or
- (3) exemption to POA intangible property charge where intangible property is not UK situate.⁴⁸

Para 12 Sch 15 FA 2004 does not provide exemption where T transfers assets to a non-UK company which holds UK land occupied by T. But the GWR or estate exemption will usually apply.

72.25 Former foreign domiciliary

Para 12(3) Sch 15 FA 2004 provides:

In the application of this Schedule to a person who was at any time domiciled⁴⁹ outside the UK, no regard is to be had to any property which is for the purposes of IHTA excluded property in relation to him⁵⁰ by virtue of section 48(3)(a) of that Act.⁵¹

The words “was at any time domiciled outside the UK” refer to a person who was formerly foreign domiciled but who has become UK domiciled. The words do not refer to a person who was and remains foreign domiciled. (The words in isolation could, taken literally, apply in such a case, but the word *was* in para 12(3) Sch 15 FA 2004 is to be contrasted

47 “Domiciled” is defined in para 12(4) Sch 15 FA 2004:

“For the purposes of this paragraph, a person is to be treated as domiciled in the UK at any time only if he would be so treated for the purposes of IHTA.”

48 The exemption (anomalously) does not apply to exempt gilts and AUTs or OEICs which may be excluded property but which are UK situate.

49 See above footnote for definition of “domiciled”.

50 The words “in relation to him” are misconceived. Property is excluded property or not excluded; but it cannot be excluded property “in relation to” any particular beneficiary. It is considered that these words should simply be disregarded.

51 The exemption (anomalously) does not apply to exempt gilts and AUTs or OEICs which may be excluded property, but not under s.48(3)(a) IHTA.

with *is* in para 12(2) Sch 15 FA 2004.)

Suppose:

- (1) T (not UK domiciled) creates a discretionary trust of which T is a beneficiary;
- (2) The trust holds:
 - (a) Non-UK investments.
 - (b) A company holding UK property occupied by T.

At this point, the conditions for the POA intangible property charge and the POA land charge are satisfied but the GWR exemption provides relief in both cases.

(3) Suppose T becomes UK deemed domiciled (or actually domiciled). At first sight T ceases to enjoy the benefit of the GWR and estate exemptions as the trust property is excluded property, so “no regard” is to be had to it.

(1) In relation to the investments, there is still no POA intangible property charge, since the investments are excluded property, so no regard is to be had to them either.

(2) However, the land is not excluded property, so the POA land charge seems to apply.⁵² This was certainly not foreseen at the time the legislation was passed. It is suggested that para 12(3) Sch 15 FA 2004 is, like a deeming provision, to be construed to have effect so far as intended but it was not intended to disapply the GWR and estate exemptions. The modern purposive approach to construction of tax statutes may on this occasion assist the taxpayer. The 17 March 1986 POA start date supports this view. That date shows that the object of the rules is to prevent GWR avoidance, not other kinds of IHT mitigation.

HMRC agree. The CIOT Statement provides at para 7:

Para 12(3) states that no regard is to be had to excluded property. In a case where a trust settled by a foreign domiciliary owns a UK house through a foreign registered company the shares in the company (and any loan to the company) are excluded property. Concern has been expressed that since para 12(3) says that no regard is to be had to these assets, this in turn means that the shares and loan have to be ignored in applying para 11 and in particular cannot be taken into account in determining whether there is derived property which is in the taxpayer’s

⁵² A further tax charge would arise if (as some have argued) T is also caught by the GWR rules on his death; see 59.13 (GWR death charge: excluded property rules for settled property).

estate or GWR property in relation to him (which the shares and loans otherwise are). We think that this argument is misconceived but it has been advanced.

Question 42

Can HMRC confirm that they agree para 12(3) does not operate in this way and that para 11 can still work to protect the UK house or underlying assets owned by the offshore company in these circumstances?

HMRC

We agree with what you say in para 7.1 about the interaction between paras 12(3) and 11.

The former Website POA Guidance provided at 4.1:

Para 12(3) of the schedule provides that if any property situated outside the UK became comprised in a settlement when the person settling the property was domiciled outside the UK it will not be subject to the charge. Even if that person becomes domiciled in the UK at a later date this property will remain excluded from the charge.

Para 12(3) provides that a charge under this Schedule shall not arise in relation to property regarded as excluded by virtue of section 48(3) IHTA'84. We do not regard this provision as having an impact on para 11 in determining whether there is derived property in the taxpayer's estate, or GWR property in relation to him (see foreign domiciliary example in appendix).

The passage is not in the present IHT Manual, however HMRC practice may not have changed.

72.26 Quantum of charge: land

We find the usual cascade of definitions. Para 3(5) Sch 15 FA 2004 provides:

Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 4 is to be treated as income of his chargeable to income tax.

72.26.1 *The chargeable amount and deductible expenses*

One therefore turns to para 4 Sch 15 FA 2004 to find the quantum of the charge. Para 4(1) Sch 15 FA 2004 provides:

For any taxable period⁵³ the chargeable amount in relation to the relevant land is

- [a] the appropriate rental value ... less
- [b] the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the relevant land in respect of the occupation of the land by the chargeable person.

To obtain a deduction requires good paperwork:

- (1) a legal obligation; and
- (2) payment to the owner of the relevant land.

This is straightforward in an *Eversden* scheme, but who is the “owner” of the land in an *Ingram* scheme (where there is a lease owned by T and a reversion owned by others)? Who is owner of the land in a double trust scheme (where the land is held by trustees)?

72.26.2 *“The appropriate rental value”*

This is defined in para 4(2) Sch 15 FA 2004. This provides:

The appropriate rental value is $R \times (DV \div V)$

In short, R is the **R**ental value; V is the capital **V**alue. $DV \div V$ is (in a sense) the chargeable part of that value. **DV** stands, perhaps, for Disposal **V**alue.

72.26.3 *“Rental value”*

R is the rental value of the relevant land for the taxable period. “Rental value” is defined in the same manner as the income tax benefit in kind

⁵³ “Taxable period” is defined in a commonsense way in para 4(6) Sch 15 FA 2004:

“In this paragraph—

‘the taxable period’ means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person.”

rule: it means the “annual value”. The “annual value” is in turn defined in para 5 Sch 15 FA 2004. That is copied from s.110 ITEPA, except that s.110(3), (4) are omitted. It is here called “the POA Annual Value”. The POA Annual Value is defined as the rent which will be payable *on the assumption that the landlord (rather than the tenant) pays for all repairs and insurance*. The normal market rent will be lower than the POA Annual Value, because market practice is that the *tenant* pays the cost of repairs and insurance. The difference between POA annual value and normal market rent will vary from one property to another. The difference would be greater with large properties which are expensive to maintain and insure. In relation to other benefits in kind provisions, such as s.87 and s.731, beneficiaries have sometimes been given the benefit of living accommodation on terms that they are responsible for maintenance and insurance. If the maintenance and insurance cost is substantial, they argue that the value of the benefit is small or sometimes even nil. It was perhaps to avoid these arguments that the legislation was framed in this way. It seems extraordinary if one thinks that the legislation is intended to charge income tax on a benefit in kind. However, the object of the legislation is really to penalise taxpayers who have carried out some IHT planning schemes and so it does make sense.

The wording is derived from rating legislation. There is a substantial amount of case law, and to research this the reader should refer to rating law textbooks.

The reader will recall that the annual value for benefit in kind purposes is by concession taken to be the rateable value.⁵⁴ There is no reason to think that this concession will be applied for the POA Annual Value. POA Annual Value is (in short) slightly above market rental value.

72.26.4 *The proportion ($DV \div V$)*

The key expression is DV. Para 4(2) Sch 15 FA 2004 provides:

DV is—

(a) in a case falling within para 3(2)(a)(i),⁵⁵

[i] the value as at the valuation date of the interest in the relevant land that was disposed of as mentioned in para 3(2)(b) by the

⁵⁴ See 70.18.1 (“Rental value of the accommodation”).

⁵⁵ ie disposal condition (i), see 72.4.1 (Disposal condition (i)).

- chargeable person or,
- [ii] where the disposal was a non-exempt sale, the appropriate proportion of that value,
- (b) in a case falling within para 3(2)(a)(ii),⁵⁶
- [i] such part of the value of the relevant land at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,
 - [ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and
- (c) in a case falling within para 3(3),⁵⁷ such part of the value of the relevant land at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and
- V is the value of the relevant land at the valuation date.

The drafter does not deal with a case falling within the disposal and the contribution condition, eg if the individual disposes of an interest in a contract to purchase land to another person and also provides the purchase price.

72.26.5 $(DV \div V)$ and the valuation date

The valuation date is determined by the 2005 POA Regulations. The Consultation Document “Taxation of Pre-Owned Assets: Further Consultation” 16 August 2004 explains:

5. In the case of land, the “cash equivalent” of enjoyment in a particular tax year is derived from market rental that would be paid for use of the land over the “taxable period” (that is, the tax year or any shorter period for which the asset is “caught” by Schedule 15). This figure is then scaled down, in cases where the taxpayer’s “stake” in the caught asset is less than 100 per cent, in the proportion DV/V , where V is the value of the whole asset on the “valuation date” for the year, and DV is the value reasonably attributable to the taxpayer on that date. In many cases, however, we would expect that taxpayers and their advisors will be able to establish the ratio DV/V from the surrounding circumstances without necessarily establishing the absolute amount of V or DV.

⁵⁶ ie disposal condition (ii), see 72.4.2 (Disposal condition (ii)).

⁵⁷ ie the contribution condition, see 72.5 (The contribution conditions).

72.26.6 *Non-exempt sale*

Para 4(4) Sch 15 FA 2004 provides a relief for a “non-exempt” sale. Para 4(4) Sch 15 FA 2004 begins with the definition of this term:

The disposal by the chargeable person of an interest in land is a “non-exempt sale” if (although not an excluded transaction) it was a sale of his whole interest in the property for a consideration paid in money in sterling or any other currency;

The label (“non-exempt sale”) is chosen, presumably, because the sale is not an excluded transaction. (Perhaps “non-excluded sale” would have been clearer.)

The relief is given by the method of re-defining “the appropriate proportion” to a smaller amount. Para 4(4) Sch 15 FA 2004 continues:

and, in relation to a non-exempt sale, “the appropriate proportion” is $(MV - P) \div MV$

where—

MV is the value of the interest in land at the time of the sale;

P is the amount paid.

This will not often apply as a sale for full value will usually be an excluded transaction and a sale at an undervalue will probably qualify for the GWR exemption.

72.27 **Quantum of charge: chattels**

Para 6(5) Sch 15 FA 2004 provides:

Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 7 is to be treated as income of his chargeable to income tax.

72.27.1 *The chargeable amount*

Para 7(1) Sch 15 FA 2004 provides:

For any taxable period the chargeable amount in relation to any chattel

is

- [a] the appropriate amount (as determined under sub-para (2)),
- [b] less the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the chattel in respect of the possession or use of the chattel by the chargeable person.

This follows the format of the POA land charge.

72.27.2 *The appropriate amount*

Para 7(2) Sch 15 FA 2004 provides:

The appropriate amount is $N \times (DV \div V)$

In short, N is Notional interest. DV and V are similar to the POA land charge. In detail:

N is the amount of the interest that would be payable for the taxable period⁵⁸ if interest were payable at the prescribed rate on an amount equal to the value of the chattel [at]⁵⁹ the valuation date, DV is—

- (a) in a case falling within para 6(2)(a)(i),
 - [i] the value as at the valuation date of the interest in the chattel that was disposed of as mentioned in para 6(2)(b) by the chargeable person or,
 - [ii] where the disposal was a non-exempt sale,⁶⁰ the appropriate proportion of that value,
- (b) in a case falling within para 6(2)(a)(ii),
 - [i] such part of the value of the chattel at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,
 - [ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and
- (c) in a case falling within para 6(3), such part of the value of the

⁵⁸ Para 7(5) Sch 15 FA 2004 provides that “the taxable period” means the year of assessment, or part of a year of assessment, during which para 6 Sch 15 FA 2004 applies to the chargeable person.

⁵⁹ The statute erroneously reads “as”.

⁶⁰ Non-exempt sale is defined in para 7(3) Sch 15 FA 2004 following the form of the POA land charge: see 72.26.6 (Non-exempt sale).

chattel at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and
V is the value of the chattel at the valuation date.

72.28 Quantum of charge: intangible property

Para 8(3) Sch 15 FA 2004 provides:

Where this paragraph applies in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 9 is to be treated as income of the chargeable person chargeable to income tax.

72.28.1 The chargeable amount

Para 9(1) Sch 15 FA 2004 provides:

For any taxable period the chargeable amount in relation to the relevant property is N minus T

In short, **N** is Notional income; **T** is Tax payable. In more detail:

N is the amount of the interest that would be payable for the taxable period⁶¹ if interest were payable at the prescribed rate on an amount equal to the value of the relevant property at the valuation date, and

T is the amount of any income tax or capital gains tax payable by the chargeable person in respect of the taxable period by virtue of any of the following provisions—

- (a) section 461 [ITTOIA],
- (b) section 624 [ITTOIA],
- (c) sections 720 to 730 [ITA],
- (d) section 77 [TCGA], and
- (e) section 86 [TCGA],

so far as the tax is attributable to the relevant property.

Setting notional income against tax is penal and bizarre, but then, the POA

⁶¹ Para 9(3) Sch 15 FA 2004 provides:

“‘the taxable period’ means the year of assessment, or part of a year of assessment, during which para 8 applies to the chargeable person”.

charge is penal and bizarre.

There is no provision for carry forward or back if T exceeds N (but that will be rare).

If foreign income is unremitted and no tax is paid because of the s.624 remittance basis, it is considered that the amount of T is nil.

72.28.2 *The valuation date*

Para 9 Sch 15 FA 2004 continues:

(2) Regulations may, in relation to any valuation date, provide for a valuation of the relevant property by reference to an earlier valuation date to apply subject to any prescribed adjustments.

(3) In this paragraph—

...

“the valuation date”, in relation to a year of assessment, means such date as may be prescribed.

The date is prescribed in the 2005 POA Regulations.

72.29 **Overlap of land and intangible property charges**

Para 18 Sch 15 FA 2004 provides:

Persons chargeable under different provisions by reference to same property

(1) Where, in any year of assessment, a person (“the chargeable person”) is (apart from this paragraph) chargeable to income tax both—

- (a) under para 3 (land) or para 6 (chattels) by reason of his occupation of any land or his possession or use of any chattel, and
- (b) under para 8 (intangible property) by reference to any intangible property which derives its value (whether in whole or part) from the land or the chattel,

he is to be charged to income tax under whichever provision produces the higher chargeable amount in relation to him.

(2) Where sub-para (1) applies, only the amount under the paragraph under which he is chargeable is to be taken into account in relation to the chargeable person for the purposes of para 13(2).

72.30 Interaction with benefit in kind charge

Para 19 Sch 15 FA 2004 provides:

Where, in any year of assessment, a person is (apart from this paragraph) chargeable, in respect of his occupation of any land or his possession or use of any chattel, to income tax both—

- (a) under this Schedule, and
- (b) under Part 3 of ITEPA,

the provisions of that Part shall have priority and he shall not be chargeable to income tax under this Schedule, except to the extent that the amount chargeable under this Schedule exceeds the amount to be treated as earnings under that Part.

72.31 *De minimis* exemption

The Press Release announcing the POA regime promised “a substantial *de minimis* exemption” (*sic*). This turned out to be £5,000 per annum. As this book predicted, the “substantial” £5,000 figure has not been raised in line with inflation.

Para 13 Sch 15 FA 2004 provides:

(1) This paragraph applies where, in relation to any person who would (apart from this para) be chargeable under this Schedule for any year of assessment, the aggregate of the amounts specified in sub-para (2) in respect of that year does not exceed £5,000.

(2) Those amounts are—

- (a) in relation to any land to which para 3 applies in respect of him, the appropriate rental value as determined under para 4(2),
- (b) in relation to any chattel to which para 6 applies in respect of him, the appropriate amount as determined under para 7(2), and
- (c) in relation to any intangible property to which para 8 applies in respect of him, the chargeable amount determined under para 9.

(3) Where this para applies, the person is not chargeable for that year of assessment under any of the following provisions—

- (a) para 3(5) (land),
- (b) para 6(5) (chattels), or
- (c) para 8(3) (intangible property).

This is significant if annual value is (contrary to my expectation) construed by concession to mean rateable value. It could also be

significant where husband and wife entered into IHT planning arrangements jointly, since each have their own separate allowance. The exception applies to the “appropriate rental value”, so deductible expenses are not relevant. Another problem here is that the £5,000 limit must be satisfied every year.

The *de minimis* limit is not time apportioned so the full £5,000 can be set against a much shorter period of deemed income.

It is therefore necessary to ascertain “the appropriate rental value”. That takes us to para 4(2) Sch 15 FA 2004:

The appropriate rental value is $R \times (DV/V)$ where

R is the rental value of the relevant land *for the taxable period*

The “taxable period” is defined in para 4(6) Sch 15 FA 2004:

“the taxable period” means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person.

Thus it seems clear that if para 3 Sch 15 FA 2004 only applies for part of the year, the taxable period is reduced, so R is reduced, so the “appropriate rental value” is reduced and so (carrying the chain to the end) the *de minimis* exemption may apply. Note that the estate exemption in para 11(1) Sch 15 FA 2004 disapplies para 3 Sch 15 FA 2004: see para 11(1) Sch 15 FA 2004.

72.32 POA Election

One can elect out of the POA charges at an IHT cost. Para 21 Sch 15 FA 2004 deals with the POA land and chattels charges. Para 22 Sch 15 FA 2004 deals with intangible property. They are not quite the same but for reasons of space I only cover the former.

72.32.1 Conditions for election

Para 21(1) Sch 15 FA 2004 provides

This paragraph applies where—

- (a) a person (“the chargeable person”) would (apart from this paragraph) be chargeable under para 3 (land) or para 6 (chattels) for any year of assessment (“the initial year”) by reference to

- his enjoyment⁶² of any property (“the relevant property”), and
- (b) he has not been chargeable under the paragraph in question in respect of any previous year of assessment by reference to his enjoyment of the relevant property, or of any other property for which the relevant property has been substituted.

If an election is made by mistake (because the POA charge does not in fact apply) it has no effect.

72.32.2 *Effect of election*

Para 21(2) Sch 15 FA 2004 provides:

The chargeable person may elect in accordance with para 23 that—

- (a) the preceding provisions of this Schedule shall not apply to him during the initial year and subsequent years of assessment by reference to his enjoyment of the relevant property or of any property which may be substituted for the relevant property ...

This disapplies Schedule 15. The price is in sub-para (b):

..., but

- (b) so long as the chargeable person continues to enjoy the relevant property or any property which is substituted for the relevant property—
- (i) the chargeable proportion of the property is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property,
- (ii) section 102(3) and (4) of that Act shall apply, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property, and
- (iii) if the chargeable person is beneficially entitled to an interest in possession in the property, sections 53(3) and

62 “Enjoyment” is defined in para 21(4) Sch 15 FA 2004:

“For the purposes of this paragraph a person ‘enjoys’ property if—

(a) in the case of an interest in land, he occupies the land, and

(b) in the case of an interest in a chattel, he is in possession of, or has the use of, the chattel.”

(4) and 54 of IHTA 1984 (which deal with cases of property reverting to the settlor etc) shall not apply in relation to the chargeable proportion of the property.

Suppose a former foreign domiciliary makes an election in relation to a discretionary trust of which they are a beneficiary and the property is excluded property. How does s.102(3) apply? See 59.13 (GWR death charge: excluded property rules for settled property).

72.32.3 *The chargeable proportion*

This takes us to the definition of “chargeable proportion” in para 21(3) Sch 15 FA 2004:

In this paragraph, “the chargeable proportion”, in relation to any property, means $DV \div V$ where DV and V are to be read in accordance with para 4(2) or 7(2), as the case requires, but as if—

- (a) any reference in para 4(2) or 7(2) to the valuation date were a reference—
 - (i) in the case of property falling within subsection (3) of section 102 of the Finance Act 1986, to the date of the death of the chargeable person, and
 - (ii) in the case of property falling within subsection (4) of that section, to the date on which the property ceases to be treated as property subject to a reservation, and
 - (iii) in the case of property in which the chargeable person is beneficially entitled to an interest in possession, to the date of his death or if his interest comes to an end on an earlier date) that earlier date, and
- (b) the transactions to be taken into account in calculating DV included transactions after the time when the election takes effect as well as transactions before that time.

I do not see the purpose or effect of para 21(3)(b) Sch 15 FA 2004.
How does this work in the case of an *Ingram* scheme?

72.32.4 *Time limit for election*

Para 23(3) Sch 15 FA 2004 provides:

The election must be made on or before—

- (a) the relevant filing date, or
- (b) such later date as an officer of Revenue and Customs may, in a particular case, allow..

The key expression is “relevant filing date” which is defined in para 23(1) Sch 15 FA 2004:

“the relevant filing date” means 31 January in the year of assessment that immediately follows the initial year within the meaning of para 21 or (as the case requires) para 22.

Time runs from when the Schedule begins to apply. Normally that will be 6 April 2005,⁶³ because in the future no-one will deliberately enter into arrangements caught by the Schedule. But where a person is non-resident or domiciled, the Schedule may not begin to apply until a later time when they become UK resident or domiciled, and in such a case time for the election starts at that later time; a sensible rule.

72.32.5 Revocation of election

Para 23(5) Sch 15 FA 2004 provides:

The election may be withdrawn or amended, during the life of the chargeable person, at any time on or before the relevant filing date.

This will only be useful in very exceptional circumstances.

72.32.6 Retrospective effect of election

Para 23(6) Sch 15 FA 2004 provides:

Subject to sub-para (5), the election takes effect for the purposes of inheritance tax from the beginning of the initial year within the meaning of para 21 or (as the case requires) para 22 or, if later, the date on which the chargeable person would (but for the election) have first become chargeable under this Schedule by reference to the property to which the

63 Or 6 April 2007 for those caught by the reverter to settlor restriction in the FA 2006; see 72.20 (Reverter to settlor restriction).

election relates.

72.33 Election and *Eversden* schemes

If a client has lost their appetite for IHT planning, it would be better to unwind an *Eversden* scheme than to elect. Unwinding an *Eversden* scheme is straightforward.

By contrast, unwinding double trust schemes needs considerable care. Watch out for Fraud on a Power.

72.34 Election in case of double trust schemes

Suppose:

- (1) The client (“H”) has entered into a double trust plan: H has sold H’s home to a trust (before 22 March 2006) (“the property settlement”) in return for a debt, and given away the debt.
- (2) Under the terms of the property settlement, income is paid to H for life, and then for H’s widow (“W”) after H’s death.
- (3) Suppose first of all that the home has not increased in value, so that the net value of the trust fund of the property settlement is nil.
- (4) A POA election has been made.
- (5) H is survived by W.

72.34.1 *Effect of election*

The chargeable proportion (here = the whole) of the property:

is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation.

So it is treated as property to which H is beneficially entitled.

However, H is already entitled to the property as H has an interest in possession in it. The property is subject to the debt. Is this taken into account in valuing the estate of H on H’s death? If so the debt scheme still works! In *IRC v Ayrshire Employers Mutual Insurance Association* 27 TC 331 the House of Lords notoriously said that the legislation had “misfired”. But the modern approach of the Courts is to make sure that legislation does not “misfire” if they can. Indeed this approach is not so modern, and in 1965 Lord Diplock criticised the *Ayrshire* decision:

If the Courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed.

72.34.2 *Spouse exemption on death of H*

The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

... is an exempt transfer to the extent that the value transferred is
[a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner; or
[b] so far as the value transferred is not so attributable, to the extent that that estate is increased.

See s.18(1) IHTA 1984.

H does not qualify for exemption within [b]. We have to argue that the value transferred is “attributable to property” (the home) “which becomes comprised in the estate of the spouse or civil partner”.

Does it? Only subject to the debt. The Revenue may reply that “property” in s.49(1) IHTA means net property and this is supported by *Green v IRC*:

Section 49(1) IHTA 1984 [deems] the deceased to be beneficially entitled to “the property” in which his life interest subsists. It does not say “net property” (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree that in practice that is the effect the Revenue gives to the section.

On the facts of the above example, no net property becomes comprised in the estate of the spouse. A purposive construction supports that view. It does not make sense for the spouse exemption to apply there.

The spouse exemption would apply to the extent that the value of the property exceeds the debt.

If the debt were released, the problem disappears and it is clear that the spouse exemption would apply.

72.35 Unwinding existing structures

What is to be done when an existing structure falls within the POA land charge?

Do nothing and pay the POA tax? A suitable option where the client has a short life expectancy. Mitigate the charge by arranging that maintenance costs are deductible: see 72.26.1 (The chargeable amount and deductible expenses).

Elect out of the POA regime? Generally unattractive: you have the IHT charge on death usually without CGT uplift or spouse exemption on death.⁶⁴ Consider it if IHT is a long term problem (middle-aged clients). Perhaps a future government will scrap these rules in a decade or so's time.

It may be sensible to elect and retain the structure where:

- (1) IHT is not a problem (eg insurance is inexpensive);
- (2) Shadow directorship is not a problem (expect an investigation to follow the election); and
- (3) A sale of the company is envisaged in the short or medium term. See 72.6.4 (Secondhand company).

In most cases shadow directorship may be a problem; it will usually be better to liquidate the company if IHT, CGT and SDLT issues permit.

The best solution is usually unwinding, or reorganising so as to fall within the estate exemption.

72.36 Is existing scheme validly created?

In *Wolff v Wolff* [2004] STC 1633, a husband and wife entered into a reversionary lease of the property in favour of their daughters for 125 years starting from 2017. Subsequently, they became aware that from 2017 they had no right to stay in the property and were at the mercy of the owners of the lease! The lease was set aside for mistake.

72.37 Commentary

What is the nature of the POA charge? Although the tax charge is imposed under the Income Tax Acts, it is not an income tax (in the sense that it is not a tax on income or in any way relating to income). To put it

⁶⁴ See 59.18 (IHT spouse exemption defence to GWR death charge).

another way, the provisions impose an income tax charge on income which does not exist. Once it is accepted that income tax is not in general charged on an individual who occupies their own property⁶⁵ then it is anomalous to charge income tax on the benefit of occupation through a trust or company. And since the POA intangible property charge applies even if the property also produces income subject to income tax, it is obviously not income which Schedule 15 is seeking to tax.

The POA charge might be seen as an *ersatz* annual IHT charge on property which has slipped through the IHT net.⁶⁶ However, the quantum of the charge is penal (compared to IHT rates).

The true nature of the POA charge is therefore that it is a penalty for carrying out IHT planning (and not unwinding it). Hardly anyone is seriously expected to pay it. The object is to force taxpayers (by electing or unwinding) to bring themselves back into the IHT net.⁶⁷ The POA charge takes the clothes or label of income tax, but – looking beyond the label to the contents – it is not income tax; nor is it a tax at all, as that word is properly understood. It is well established that a fee, levy or toll may in fact be a tax despite its name.⁶⁸ Likewise provisions carrying the label of a tax do not necessarily constitute a tax. This point may be relevant to construction because the principle of construction that penalty provisions are to be strictly construed may have more force than the principle that clear words are required to impose a tax.

One controversial aspect of the provisions is that they are retrospective in effect. (One should avoid semantic – indeed Orwellian – debate about the meaning of “retrospective” and look at the effect.) Retrospective legislation is pernicious when it entails liability for conduct which would have been different if the agent had known of the terms of the retrospective law. The POA rules are unashamedly targeted at taxpayers who have made the following arrangements since 1986:

- (1) *Eversden*⁶⁹ schemes;
- (2) *Ingram*⁷⁰ and similar shearing schemes;
- (3) “double trust” schemes.

65 See Kay and King, *The British Tax System*, (5th ed., 1990), p.80.

66 It is significant that the pre-owned asset charge is dealt with in IHT textbooks and in the HMRC IHT manual.

67 And to stop similar arrangements being made in the future.

68 *Re a By-law of the Auckland City Council* [1924] NZLR 907 at p.911.

69 *IRC v Eversden (Greenstock's Executors)* 75 TC 340.

70 *Ingram v IRC* [1999] STC 37.

Those that carried out *Ingram* schemes were particularly unfairly treated. They entered into a package with an IHT advantage (generally) at a significant CGT cost. Parliament removed the benefit and left them with the cost.

In 2004 I said:

This is unprecedented in the UK tax system, which has traditionally allowed taxpayers to plan their affairs more securely on the basis of the law of the day. One may approve of this as an attack on tax avoidance, or disapprove as contrary to the rule of law. Views may divide on party political lines.

Since 2004, however, retrospective tax legislation has become a matter of routine, having been applied to a somewhat arbitrary selection of tax avoidance schemes and or simply as second thoughts to (what the need for retrospective legislation shows to be) ill thought out legislation.

Foreign domiciliary IHT planning using companies to avoid IHT on UK land or chattels were not a target of the POA rules; my guess is that any effect on former foreign domiciliaries is entirely accidental; no-one at all had worked it out as the provisions were frantically amended and re-amended.

No doubt the POA rules bring some revenue for the Government, though how much is a matter of speculation. Set against the tax raised (whatever it is) and the blow against tax avoidance (however one values or regards that) there are some entries to make on the debit side: the POA rules impose significant costs of compliance and tax planning (for they require taxpayers to incur professional fees in order to rearrange their affairs). They impose the unquantifiable burden of complexity and uncertainty which (combined with unfairness) will lead to an equally unquantifiable loss of taxpayer goodwill. One cannot put a value on that goodwill, but it is essential to successful tax administration.

Back in 2004, everyone who understood and cared about the UK tax system was aghast at the conception, enactment process and administration of the POA provisions.⁷¹ Looking back with hindsight it can be seen that the provisions were not an aberration. They are the

71 "The anti-avoidance Pre-Owned Assets regime ... is: retrospective in its effect, disproportionate to the mischief at which it is purportedly aimed, contrary to taxpayers' legitimate expectations, and arbitrary ..."

CIOT and ICAEW Tax Faculty (October 2004).

natural result of a fiscal policy with one and only one priority, the attack on tax avoidance, set against which any other *desiderata* of a tax system count for very little and views of practitioners count for nothing at all.

An interesting question now is to what extent this approach will continue under the coalition government. Only time will tell.

CHAPTER SEVENTY THREE

ESTATES OF DECEASED PERSONS - CGT

73.1 Succession law background

On the death of a person domiciled in England and Wales (“**the deceased**”) their property passes to their personal representatives (“**PRs**”).¹ The PRs pay the debts of the estate, including taxes. Provided that there are sufficient assets available, they pay pecuniary legacies and transfer property which the deceased has specifically gifted. Finally, they transfer the residue of the estate to the residuary legatees. These transfers are normally done by means of an “assent”. Thus on completion of the administration, the residuary legatee becomes entitled to the assets of the estate, and any income which the PRs have not expended in the course of administration. It is possible for PRs to assent specific assets before completion of administration.

During the period of administration, the PRs alone are said to be entitled to the assets which are comprised in the estate. The beneficiaries of the estate have the right to compel due administration of the estate, but it has been repeatedly held by courts of the highest authority that the beneficiaries have no legal or equitable interest in the assets of the estate.² Special taxation rules apply during this period of administration. The interplay of the rules produces some curious results where the deceased or a beneficiary is a remittance basis taxpayer or non-resident. There can sometimes be considerable scope for tax planning.

I consider CGT and in the following chapter income tax.

1 Further consideration is needed if a foreign law applies: see 73.11 (Succession governed by foreign law).

2 *Lord Sudeley v Attorney-General* [1897] AC 11; this (rather odd) principle was re-affirmed in *CSD v Livingston* [1965] AC 694; for a survey of the cases, see *Re Hemming* [2009] Ch 313.

The starting point is that PRs are “persons” (though not “individuals”) so they are in principle subject to IT and CGT.

Similar issues arise where charities are beneficiaries of estates, as to which see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations*, (8th ed., 2011) Chapters 31 and 32 (Estates of deceased persons) (online version www.taxationofcharities.co.uk).

73.1.1 *When is administration of estate completed?*

How long does the administration period last? This is a question of succession law, not tax law, but it often arises in tax contexts, including income tax, CGT, and estate duty, and has given rise to a substantial case law.

In *IRC v Aubrey Smith* 15 TC 661 Lord Hanworth MR said at p.672:

In Lord Sudeley’s case, [1897] AC at page 15, Lord Halsbury, then Lord Chancellor, says this:

The thing that the legatee was entitled to was one-fourth share of a residuary estate, consisting, it may be, of many things; and I think it was fallacious on the part of [counsel] to say that the residue was very nearly ascertained, because the question is not only of amount – although I think that of itself would not be sufficient if it were only of amount – but it is a question of substance as well as a question of amount. It is uncertain until the residuary estate has been ascertained of what it will consist:

–and on a further page he says this:

Until the thing has been ascertained, until the trust fund has been constituted, the thing of which the trustees are the trustees has not been ascertained. Whether you treat them, therefore, as trustees or executors, the same consideration arises. Now, if the only thing that the legatee is entitled to is the fourth share of an ascertained residuary estate, I say that to my mind it is impossible to maintain that the character of any part of that estate can be ascertained so as to make it possess a specific locality until that has happened; it is a condition precedent to know what the residuary estate is, and until that has been ascertained you cannot tell of what it will “consist.”

.... I read all those passages because they appear quite clearly to lay down that until the fact is ascertained, or can or ought to be inferred, that the residue has become defined so that the aliquot portion passing to the beneficiary can also be defined, the beneficiary has not, until that time, a definite interest in the sum which will ultimately fall to him.

Whatever be the contentions of the Respondent, it appears to me as Lord Haldane said in the case I first cited that it is largely a question of fact.

...

What has to be determined here ... is: Is it clear that the portion of each of the sons is ascertained, or has been ascertained, or is capable of ascertainment, and that ascertainment has been assented to by the executor-trustees?

The important points which emerge from the case law are that PRs continue to hold an asset as PRs until:

- (1) they “assent” an asset to a beneficiary; or
- (2) the administration of the estate is complete (at which point there is an implied assent). For this purpose:
 - (a) The estate must be completely ascertained. It remains in the course of administration even though this work is nearly done.
 - (b) The fact that debts of the deceased remain unascertained or unpaid is a relevant factor but not decisive.
 - (c) The fact that the PRs regard themselves as still administering the estate (producing “estate accounts” and not trust accounts) is a relevant factor but not decisive.
 - (d) In a marginal case the issue is said to be one of fact and there seems to be a fairly broad “grey area” in which the courts will not interfere with a decision of the Tax Tribunal.

The CG Manual (published 7/94) provides:

30700 Period of administration [January 2012]

The period during which the personal representatives are settling the estate is called a period of administration. The period starts with the death of the deceased person. The date on which it ends is a question of fact which is often difficult to resolve. During this period the liability for Capital Gains Tax on sales of assets from the estate falls on the personal representatives unless they have taken specific steps to vest the ownership of the assets involved in legatees in advance of the sale, see CG30910.

When considering when administration is complete the Courts look for a construction of the law that leads to an early conclusion of administration. The leading case in this respect is *CIR v Sir Aubrey Smith* 15TC661.

In his judgement Lord Hanworth MR set out a principle of general application when he said, at the bottom of page 675, top of page 676

‘The question is, in all cases: has the administration of the Estate reached a point of ripeness at which you can infer an assent, at which you can infer that the residuary estate has been ascertained and that it is outstanding and not handed over merely for some other reason’.

On this basis we would normally argue that the period of administration ends when residue has been ascertained, see CG30780+.

30710 Extended period of administration [January 2012]

There are some exceptional cases where all the figures are apparently available to enable residue to be ascertained but it has to be accepted that the period of administration is continuing.

One example is where distributing shares in accordance with legatees' fractional entitlements to residue would result in one legatee receiving a majority shareholding whilst the other legatees would only receive minority holdings. Because of the disparity in values between majority and minority holdings it may be necessary for the personal representatives to apply the rule from *Lloyd's Bank v Duker* [1987] 3 All ER 193. This would require them to sell these shares rather than distributing them in specie.

The period of administration would continue in such a case until the shares were sold and the Capital Gains Tax liability arising to the personal representatives was quantified.

The rule referred to above is of fairly limited application. The fact that a majority shareholding would be broken into minority holdings on distribution should not be accepted as preventing distribution of shares and thus the ending of the period of administration. Nor should minor valuation differences between minority shareholdings passing to the legatees be accepted as covered by the rule in the *Duker* case.

The period of administration may also be extended where the distribution of the estate is being challenged. The personal representatives may be unable to distribute the estate pending the outcome of litigation.

30720 Confusion over terminology [January 2012]

Even where ascertainment of residue marks the end of the administration period for Capital Gains Tax purposes, assets may remain in the hands of the personal representatives after that date. They may have to carry out administrative acts regarding transfer of assets to legatees. In some cases they may sell assets. If so they will be doing this as bare trustees for the legatees. Personal representatives and their agents sometimes regard these acts as forming part of the period of administration. This may lead to confusion when references are made to the period of administration.

Because of the possible confusion it is important to establish precisely what is meant when a reference is made to a period of administration. From the Inland Revenue's side we can try to avoid this confusion for the majority of cases by referring to events as falling before or after residue has been ascertained rather than simply referring to the period of administration.

30780 Necessary to establish if residue ascertained [January 2012]

There are a number of circumstances where it is important to establish whether residue has been ascertained, see CG30700, because it significantly affects the amount of Capital Gains Tax payable. Depending on the circumstances, the personal representatives and legatees may be arguing for residue having been ascertained at an early date or at a late date.

30781 Early date [January 2012]

If there is a will the personal representatives and legatees may claim that

administration has ceased and residue has been ascertained at an early date if:

- the legatees would be liable at a lower rate of Capital Gains Tax than the personal representatives on the disposal of assets in the estate
- have any unused annual exemption that could be used to cover the gains
- the legatee is a charity and any gain on the disposal would be exempt.

You will only see claims under the first two bullet points in cases of intestacy as a charity will not qualify as a legatee under the rules of intestacy.

Applying the rule that assets remain vested in the personal representatives until residue has been ascertained unless specific steps have been taken to vest the assets in advance of ascertainment of residue usually defeats unwarranted claims in this area.

30782 Early date

In the case of an intestacy the second of these categories may also be seen. The question of gifts to charity however will only arise in cases of intestacy if there has been a subsequent variation of the devolution of the estate since no charity will otherwise qualify as a legatee.

30783 Early date

Applying the rule that assets remain vested in the personal representatives until residue has been ascertained unless specific steps have been taken to vest the assets in advance of ascertainment of residue usually defeats unwarranted claims in this area.

30790 Late date

In contrast to the cases described in CG30781+ claims that there has been an extended period of administration are sometimes made when

- the legatee would be liable at the higher rate of tax as opposed to the basic rate applying for personal representatives, [This does not apply from 2008]
- the legatee has used his or her annual exemption against other gains but the personal representatives have unused annual exemption which could be set against the gains (although obviously there is little tax at stake in cases in this latter category).

30791 Late date

In considering such claims obtain the facts to establish precisely when residue was ascertained. In this context see also CG30840.

30800 How residue is ascertained [January 2012]

In order to ascertain residue the personal representatives must identify all the assets and liabilities of the estate. They then need to quantify these.

In the case of taxation liabilities this process will start with settling any Income Tax and Capital Gains Tax liabilities to the date of death. If any income arises to the personal representatives or if they realise any chargeable gains during the period of administration they will also need to agree their own liabilities for this period.

As far as Inheritance Tax is concerned the personal representatives will need to agree with HMRC - IHT whether any liability arises and if so in what amount. When seeking a grant of probate or letters of administration (or, in Scotland, a confirmation) the personal representatives have to supply HMRC - IHT with a provisional computation of the Inheritance Tax due. HMRC - IHT will review this and, where necessary, check valuations. When it is either agreed there is no

liability to Inheritance Tax or the amount has been quantified HMRC - IHT will issue a clearance certificate. We would not normally accept that residue had been ascertained at a date before the date of issue of a clearance certificate. See IHTM05001+ for detailed guidance on the Inheritance Tax procedures.

30810 Providing funds [January 2012]

When the assets and liabilities have been quantified the personal representatives have to consider how they can pay

- the estate's liabilities and
- any pecuniary legacies provided for in the will.

If they do not have sufficient liquid funds they will have to sell assets in order to raise funds. (Occasionally they may agree with legatees entitled to pecuniary legacies that the legatee should accept an asset in satisfaction or part satisfaction of the pecuniary legacy).

Disposing of assets may give rise to further Capital Gains Tax liabilities which have to be agreed before residue can be ascertained.

Residue is only ascertained when the personal representatives have both established the net worth of the estate and provided the liquid funds to pay liabilities and pecuniary legacies. Once that point is reached residue is ascertained and it is irrelevant that the assets have not been distributed.

30820 Executor's year [January 2012]

For estates in England and Wales, the personal representatives cannot be compelled to distribute the assets of the estate until at least one year has elapsed from the date of death (Section 44 Administration of Estates Act 1925). This is commonly referred to as the executor's year.

When dealing with a dispute about whether a disposal was by personal representatives in that capacity or in their capacity as bare trustees for legatees we would not normally contend that the disposal was on behalf of the legatees if it took place during the executor's year.

Although personal representatives cannot be compelled to distribute assets during the executor's year there is no bar to them doing so. In a simple estate they may have ascertained residue well before the year ends. If there is evidence that they have done and have then distributed assets to the legatees we can accept that the liability relating to disposals during that year but after the date assets were distributed does lie with legatees.

Scotland

In Scotland the rule is that the personal representatives are entitled to distribute the estate after six months from the deceased's death if they have provided funds for payment of all the estate debts and made reasonable enquiries for claims.

30840 Claims of prolonged administration

When personal representatives claim that administration has continued for a prolonged period and either

- this will significantly affect the tax payable, see CG30781or
- there are likely to be collection difficulties making it vital to ensure that assessments are made on the correct person the claim should be critically examined.

30790 Late Date [January 2012]

Unless it is an exceptional case where there are good reasons for accepting that

the period of administration must be extended beyond the date residue is ascertained, see CG30710 – CG30712, you should seek the full facts to enable you to determine when residue became ascertainable. You should then argue that the beneficial ownership of the assets vested in the legatees at that date. As stated in CG30701 the attitude of the Courts is to look for an interpretation that allows administration to be completed at an early date.

Unquantified debts

One claim that is sometimes met is that there is an unquantified debt preventing residue being ascertained. This may not be sufficient to prevent the administration period being treated as at an end. Such a situation was considered in *IRC v Sir Aubrey Smith* 15 TC 661. Lord Hanworth commented at page 674

For my own part I think the question of a mortgage debt or any other debt must take its proper place in perspective. It may be in some cases that that is a factor from which a strong inference may be drawn. It may be on the other hand that the device of leaving a debt unpaid is resorted to in order to pretend that the residue of the estate has not been ascertained and is not ascertainable. If such a device were resorted to in any case it ought to be held ineffective’.

When a Solicitor or other professional person is employed by the personal representatives to deal with the administration of the estate, his or her fees will be one of the estate’s debts. Sometimes when personal representatives wish to extend the period of administration they arrange that the Solicitor, etc, does not submit a bill in respect of at least some part of his or her fees. They then argue that this has prevented ascertainment of residue and has caused the period of administration to be extended. Any such claim should be resisted on the basis of the above quotation. It should be contended that the information to quantify the bill must be in the Solicitor’s records and that administration should therefore be considered to have ended.

73.1.2 *Importance of assents*

PRs transfer assets to beneficiaries by means of an “assent”. The assent is fundamental, since a sale after an assent to a non-resident or a remittance basis taxpayer may in broad terms be free of CGT and a sale before assent may not. (Conversely a sale by non-resident PRs or PRs with losses may be CGT free and a sale after an asset may be taxable.)

An assent of land in England and Wales must be in writing. An assent of other property may be oral or implied by conduct. No formal written assent is required if (say) shares are simply transferred to the name of a beneficiary by stock transfer form. If a portfolio of shares is registered in the names of PRs (or their nominees), and the legatee wants them to be sold, it may be administratively convenient if an assent is made under which the PRs (or their nominees) become nominees for the legatee. Then the shares can be sold without CGT and without the formality of a transfer

of legal title to the legatee.

73.2 Meaning of “PRs” for CGT

Section 288 TCGA provides:

“personal representatives” has the same meaning as in the Corporation Tax Acts (see section 1119 of CTA 2010);

Se we turn to s.1119 CTA 2010 which provides a commonsense definition:

“personal representatives”, in relation to a person who has died, means—

(a) in the UK, persons responsible for administering the estate of the deceased, and

(b) in a territory outside the UK, those persons having functions under its law equivalent to those of administering the estate of the deceased.

This is the same as the Income Tax definition.³

73.3 Residence and domicile of PRs for CGT

Section 62(3) TCGA provides:

In relation to property forming part of the estate of a deceased person

[a] the PRs shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the PRs), and

[b] that body shall be treated as having the deceased’s residence, ordinary residence, and domicile at the date of death.

The residence and domicile of the PRs in their private capacity is irrelevant. The definition of “residence” for PRs is different for IT.⁴

³ See 74.1 (Meaning of PRs for IT). If we had a taxes-act-wide definition the repetition would not have been necessary. However it is an improvement on the position before 2009, where there were different definitions of “PRs” for IT and for CGT.

⁴ See 74.2 (Residence of PRs for IT).

73.4 Acquisition by PRs

Section 62(1) TCGA provides:

For the purposes of this Act the assets of which a deceased person was competent to dispose—

- (a) shall be deemed to be acquired on his death by the personal representatives or other person on whom they devolve for a consideration equal to their market value at the date of the death, but
- (b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).

This is the so-called tax-free uplift on death.

The expression “assets of which a deceased person was competent to dispose” is given a commonsense definition in s.62(10) TCGA:

In this section references to assets of which a deceased person was competent to dispose are references to assets of the deceased which (otherwise than in right of a power of appointment or of the testamentary power conferred by statute to dispose of entailed interests) he could, if of full age and capacity, have disposed of by his will, assuming that all the assets were situated in England and, if he was not domiciled in the UK, that he was domiciled in England, and include references to his severable share in any assets to which, immediately before his death, he was beneficially entitled as a joint tenant.

73.5 Transfer from PRs to beneficiaries

73.5.1 Transfer from PRs to legatee

Section 62(4) TCGA provides:

On a person acquiring any asset as legatee (as defined in section 64)—

- (a) no chargeable gain shall accrue to the personal representatives, and
- (b) the legatee shall be treated as if the personal representatives’ acquisition of the asset had been his acquisition of it.

Section 64(2) TCGA defines legatee:

In this Act, unless the context otherwise requires,

[a] “legatee” includes any person taking under a testamentary disposition or on an intestacy or partial intestacy, whether he takes beneficially or as trustee, and

[b] a person taking under a donatio mortis causa shall be treated (except for the purposes of section 62) as a legatee and his acquisition as made at the time of the donor’s death.

73.5.2 *Appropriation of assets to beneficiary*

Section 64(3) TCGA provides:

For the purposes of the definition of “legatee” above, and of any reference in this Act to a person acquiring an asset “as legatee”, property taken under a testamentary disposition or on an intestacy or partial intestacy includes any asset appropriated by the personal representatives in or towards satisfaction of a pecuniary legacy or any other interest or share in the property devolving under the disposition or intestacy.

Thus, if PRs appropriate assets in satisfaction of a pecuniary legacy, the beneficiary acquires as legatee. This is so even if the appropriation needs the consent of the beneficiary.⁵

If the PRs had no power of appropriation, then an “appropriation” could be authorised only on the basis that it was in fact a sale of the asset to a

5 Although for stamp duty purposes that the transfer of the asset to a legatee amounted to a conveyance on sale where the consent of the legatee is required: *Jopling v IRC* [1940] 2 KB 282. CCAB Statement June 1967 provided:

“The Revenue stated that in their view [TCGA s.62(4)] does not apply in all cases where assets are transferred to beneficiaries in specie. Where assets are appointed by personal representatives to satisfy a legacy in circumstances where such appropriation requires the legatee’s consent, ie where the personal representatives do not have (whether by the terms of the will or under the Administration of Estates Act 1925 s.41) powers of appropriation without consent, the Revenue are advised that the acquisition of the asset has a contractual basis and is not strictly an acquisition qua legatee. In practice, however, the disposal of appropriated assets by the personal representatives to a legatee in these circumstances is not treated as an occasion of charge on the personal representatives provided that both they and the legatee agree that the legatee should be treated as acquiring the assets concerned as legatee for the purposes of [TCGA s.62(4)].”

This was written before the enactment of what is now s.64(3) TCGA (by the FA 1969). This brought the law into line with what was formerly HMRC practice.

beneficiary coupled with a payment of the legacy by way of set-off. In that case, the beneficiary would acquire as purchaser and not as legatee. Fortunately, PRs will generally have a power of appropriation: see s.41 Administration of Estates Act 1925.

73.5.3 *Appointment to beneficiary by executors under overriding powers*

Where executors exercise a power to appoint trust property to a beneficiary, that beneficiary takes under the appointment “as legatee”. This follows from the trust law principle that, for the purposes of the rules relating to perpetuities, where trustees exercise a power of appointment, the deed of appointment is read back into the original trust instrument. It is treated as coming into operation at the date of the instrument that creates the power.⁶ This rule has been applied for tax purposes, in a different context, in *Chinn v Collins* the exercise of a power of appointment merely “fills in a blank in the original settlement which left blank how the final distribution of a trust asset was to be made”.⁷

Quite apart from that, the beneficiary would take as “legatee” in the general sense of the expression. The definition in s.64(2) is inclusive and not a comprehensive definition. The reason that the beneficiaries take as legatee is that they acquire under an assent. They acquire from the PRs acting in their capacity as PRs.

This conclusion is consistent with the general scheme of the TCGA. A person who acquires under an appropriation acquires “as legatee”. It would be anomalous if a person who acquired under an appointment would not. (A power of appropriation is sometimes regarded as a dispositive power: *Re Freeston* [1978] Ch 741, though I would not regard that as an essential point.)

In CG Manual 31432–3 (although one might quibble with the language used) it seems that HMRC accept that an appointee acquires as legatee.

73.6 Deceased not UK resident

If the deceased was not UK resident at the time of their death (regardless of domicile) the PRs are in principle outside the scope of CGT. The estate

6 *Muir v Muir* [1943] AC 468; *Pilkington v IRC* 40 TC 416 at 441.

7 54 TC 311 at p.357.

is therefore a CGT free vehicle. In principle, it would be desirable to arrange that gains accrue to PRs. If the PRs assent assets to UK residents who sell the assets, the gain on the disposal is chargeable in full or on the remittance basis. If the PRs assent assets to non-resident trustees, who sell the assets, the gain is a s.2(2) amount. (By contrast, assets with losses should be transferred *in specie*.) It is also desirable to extend the administration period as long as possible.

73.6.1 *Is an estate a “settlement” within s.87 TCGA?*

Could gains accruing to non-resident PRs be s.2(2) amounts for the purposes of s.87 TCGA? That could only be the case if a deceased’s estate is a “settlement” for the purposes of s.87. Section 97(7) TCGA provides:

“settlement” has the meaning given by s.620 of ITTOIA ...

In this book this is called the “**settlement-arrangement**” definition of settlement.⁸

In *IRC v Buchanan* 37 TC 366 at p.374, Lord Goddard said:

I do not think for a minute that a will of a testator comes within section 20⁹ at all; it is not a settlement to which the Act applies.

Lord Goddard did not actually say that a will is not a settlement-arrangement but if that is what he meant, the comment was *obiter* and surprising. One might have thought that a deceased’s estate is a “settlement” in the sense of “arrangement”. There is an element of bounty in that the deceased decides who should benefit (or by not making a will, decides that the intestacy rules should apply). However, Lord Goddard’s comment was loyally followed.¹⁰ Accordingly CG Manual is right to provide:

⁸ See 75.2.1 (Terminology) and 75.2.3 (Settlement-arrangement definition of “settlement”).

⁹ Section 20 FA 1943, the predecessor of s.644 ITTOIA.

¹⁰ *Willingale v Islington Green Investment* 48 TC 547 at p.556. (The point was not argued on appeal.)

14590 Connected persons: Trustees [January 2010]

A will trust cannot be a Settlement for these purposes [for the purposes of the settlement-arrangement definition].

Similarly, the Company Taxation Manual provides:

60150 Tests: Associates [November 2011]

On the authority of *Willingale v Islington Green Investment Co* 48 TC 547, a settlement [under the settlement-arrangement definition] does not include a will trust.

For this reason a deceased's estate is not a "settlement" within s.87.

This is in fact the sensible result. The scheme of s.87 is designed with trusts in mind and would not work well if extended to estates. An assent by PRs in favour of a beneficiary is not (without a stretch) a capital payment. If, as is common, a will left legacies to (UK resident) legatees, and the residue on trust, it would be odd if the legatees were subject to CGT under s.87 by reference to gains accruing to the trust. Similarly suppose a testator left their estate for such of their children as attain the age of 30, and at the time of death one child has and one has not reached that age. The executors would transfer half of the estate to the older child and (on completion of administration) hold the other half on trust for the younger child until it reached the vesting age. It would be odd if the older child were subject to CGT under s.87 by reference to gains accruing to the younger child's share of the trust.

Section 87(6) TCGA provides:

For the purposes of this section a settlement arising under a will or intestacy shall be treated as made by the testator or intestate at the time of death.

The wording makes more sense if one remembers that it goes back¹¹ to a time when "settlement" for s.86 purposes meant CGT settlement. Thus there would be no doubt that a will trust was a settlement. However there would be doubt as to who was the settlor and when the settlement was made. These matters are resolved by (what is now) s.87(6). This is still needed since the identity of the settlor is relevant for s.87, though the

11 The wording was previously in s.s.97(7) TCGA but moved in the 2006 reforms.

relevance is now for transitional relief only.

Another effect of the provision now is to make it clear that a will trust is a settlement for the purposes of s.87.

Returning to the case above of a will trust for children at the age of 30: If one child is over 30, and receives its half share during the administration period, there is (at the time) no settlement and no capital payment, and s.87(6) does not retrospectively alter the position. If the trust fund is entirely distributed, no settlement ever comes into existence and s.87 does not operate. Similarly, suppose a discretionary will trust makes a distribution to a beneficiary during the administration period. There is (at the time) no settlement and no capital payment, and again it is considered that s.87(6) does not retrospectively alter the position. That is not the purpose of the deeming provision.

73.7 Gains accruing to non-resident company held by non-resident PRs

Suppose:

- (1) PRs hold a non-resident company.
- (2) The company disposes of an asset and realises a gain, which I call “the company gain”.

73.7.1 Position of company and PRs

The company is not subject to tax on the company gain because it is not UK resident. The PRs are participators. But if they are not UK resident, they are not treated as if the company gain had accrued to them. The condition in s.13(2)[a] TCGA is not satisfied.

73.7.2 Position of legatee

Assume that under the terms of the will the shares pass to a legatee. Is it possible that the legatee should be treated as if the company gain accrued to the legatee, so that:

- (1) a UK resident legatee would be subject to tax on the gain under s.13(2) TCGA; or
- (2) a non-resident trust legatee would be treated as receiving a s.2(2) amount under s.13(10) TCGA?

The first question is whether, at the time the gain accrues to the company (while the estate is still in the course of administration) the legatee is a

participator. Section 13(12) TCGA provides:

In this section “participator”, in relation to a company, has the meaning given by section 454 of CTA 2010.

A legatee is a participator under this definition.¹²

However s.13(3) TCGA (identifying the part of the chargeable gain which is deemed to accrue to the participator) provides:

That part shall be equal to the proportion of the gain that corresponds to the extent of the participator’s *interest* as a participator in the company.

*Sudeley and Livingston*¹³ decided that residuary¹⁴ beneficiaries of an estate have no legal or equitable interest in the assets of the estate. They have the right to enforce its proper administration but that right is not properly described as an “interest” in the assets. It is therefore considered that during the course of administration the legatee does not have an “interest” as a participator.¹⁵ Thus it does not matter that they are participators because nothing can be attributed to them under s.13.

The context can show that the word “interest” is to be understood in a loose or non-technical sense, in which case it might include the rights of a beneficiary in an estate. But there is no reason here to say the word is

12 See 80.17.5 (Personal representatives and beneficiaries of estates).

13 See 73.1 (Succession law background).

14 There is however no difference between residuary beneficiaries and specific legatees. The origin of the principle that a residuary legatee has no “interest” in the estate is historical: until the mid 19th century, estates were administered in the ecclesiastical courts and not the Chancery courts. That reasoning would apply to a specific legatee as to a residuary legatee.

15 See *Willingale v Islington Green Investment* 48 TC 547 at p.562D.

The expressions used in s.13(3) are partially defined in s.13(13):

In this section—

- (a) references to a person’s interest as a participator in a company are references to the interest in the company which is represented by all the factors by reference to which he falls to be treated as such a participator; and
- (b) references to the extent of such an interest are references to the proportion of the interests as participators of all the participators in the company (including any who are not resident or ordinarily resident in the UK) which on a just and reasonable apportionment is represented by that interest.

Section 13(13)(a) does not turn the legatee’s right into an “interest” if it is not already an interest.

used loosely or non-technically. My conclusion is supported by the fact that it is not clear what would be the “just and reasonable” apportionment of the gain as between UK resident PRs and legatees. Also if the will creates a will trust, the trust does not come into existence until completion of the administration of the estate.

That is not the end of the matter. Normally, on the completion of the administration of the estate the PRs will assent to the vesting of the shares to the legatee. What is the position of the legatee then?

The legatee is treated as having acquired the shares on the death.¹⁶ Does it follow that the legatee is treated as if they had an interest in the shares, for the purposes of s.13 TCGA, so the legatee is after all treated as if the company gain accrued to them? It is the old question of how far one carries through the deeming.¹⁷ In principle, one carries the deeming all the way and this does follow. However, several difficulties then arise:

- (1) Suppose the PRs were UK resident. They would have been taxed in the first instance on the company gain under s.13 TCGA. There is nothing to give them relief on their subsequently assenting the company to a legatee. (Section 62(4)(b) TCGA states that the *legatee* shall be treated as if the PRs acquisition had been theirs. It makes no comment about the position of the PRs. The approach of the House of Lords in *R v Dimsey & Allen* was that relief in this situation should not be implied.)
- (2) Another problem would arise if the PRs receive a dividend from the company, before distributing the shares to a legatee. The legatee would receive the shares but may not receive any funds representing the gain so it would not be fair that the company gain should be treated as accruing to them. The relief under s.13(5A) TCGA would not work properly.
- (3) There would be an anomalous distinction between:
 - (a) an assent of the shares (s.13 applies to the legatee); and
 - (b) sale (or liquidation) of the company and assent of the proceeds to the legatee (s.13 TCGA does not apply).

For these reasons it is suggested that the deeming of s.62(4)(b) TCGA does not extend to deem the legatee to receive the company gains under s.13. This construction is also consistent with the limited view of the

16 See 73.5.1 (Transfer from PRs to legatee).

17 See App 2.1 (Construction of deeming provisions).

deeming provision taken in *Marshall v Kerr* 67 TC 56.

73.8 Deceased UK resident

If the deceased was UK resident and domiciled, the PRs are UK resident and domiciled, and so subject to CGT on all chargeable gains (less losses).

73.8.1 *Deceased UK resident not UK domiciled*

Suppose at the time of their death the deceased was UK resident but foreign domiciled. The PRs are treated as UK resident but not UK domiciled. CG Manual provides:

30660 Remittance basis not in administration period [February 2006]

If the deceased was resident and/or ordinarily resident but not domiciled in the UK before his or her death, then on disposing of assets outside the UK he or she would have benefited from the application of the remittance basis in Section 12 TCGA Although the PRs have the same residence and domicile status as the deceased had, if they realise chargeable gains from disposals of assets situated outside the UK but do not remit those gains to the UK immediately they cannot benefit from this treatment. This is because the remittance basis applies only to individuals but Section 65(2) says that the body of PRs is not to be treated as an individual.

This remains valid after the 2008 reforms. At first sight this seems surprising, but on reflection, it is not absurd to draw a distinction between:

- (1) a UK resident foreign domiciled individual, taxed on the remittance basis, and
- (2) the PRs of that individual, taxed on an arising basis.

A remittance basis makes less sense for PRs whose role is generally short term.¹⁸

¹⁸ It has been argued that the HMRC view is wrong. The argument was largely based on a supposed anomalous position of PRs. Following the 2008 reforms, the anomalies work the other way (for if the remittance basis applied, it would be anomalous that PRs did not pay the remittance basis claim charge). The argument would require the word “individual” in s.12(1) TCGA to be construed so as to include PRs, which is quite contrary to general statutory usage. So I do not think the

Of course, if the PRs are actually outside the UK, especially if they are outside the EU, HMRC may not, in practice, be able to recover the tax.

DTR is in principle available to treaty non-resident PRs which may solve this problem.

73.9 CGT planning for UK resident PRs

If PRs sell assets in the course of administration, then any gain will be subject to CGT, even though the net proceeds of sale will in due course pass to a remittance basis taxpayer. If, by contrast, PRs transfer an asset *in specie* to a legatee to whom it has been bequeathed, whether specifically or as part of residue, then the PRs will not realise any chargeable gain but the base cost of the recipient beneficiary will be that of the PRs.¹⁹ Where the legatee is a remittance basis taxpayer (or a non-UK resident, or a charity), they will often be able to dispose of the asset free of CGT.

It is thus a fundamental principle of CGT planning that PRs should generally avoid, wherever possible, making disposals of assets which pass under the will to remittance basis taxpayers, non-residents or charities, if a gain (less losses) arises on the disposal.

Suppose that a remittance basis taxpayer is entitled to a pecuniary legacy of £1,000,000 under a will. The estate holds a foreign situate asset which had a value of £600,000 at the date of the death of the deceased and which is now worth £1,000,000. If the PRs sell the asset in order to pay the legacy, they will be liable to CGT. This liability can be avoided by the PRs agreeing to transfer the property to the legatee in satisfaction of their pecuniary legacy.

Suppose the PRs inherit an asset belonging to the deceased which is the subject matter of a specific gift in their will; that they then sell the asset, the sale giving rise to a charge to CGT, and that they subsequently transfer the whole or part of the proceeds of sale to the specific legatee. The common law doctrine of relation back does not apply here. This doctrine would appear to operate only where an asset owned by the deceased is subsequently vested in the legatee. In any case, the express provisions of the statutory code deal so comprehensively with the situation that any application of the doctrine of relation back to CGT is by necessary

argument now merits serious attention (but readers can find further discussion in the 2008/09 edition of this work).

19 See 73.5 (Transfer from PRs to beneficiaries).

implication excluded. So if there is such a sale, the PRs bear the CGT and transferring the proceeds of sale to the remittance basis taxpayer does not confer any exemption.

It may be necessary to sell some assets to pay liabilities of the PRs, and it may be that the assets available for sale will give rise to a chargeable gain.

One solution is as follows:

- (1) The PRs assent the asset to the beneficiary subject to a charge for their liabilities under s.36(10) Administration of Estates Act 1925.
- (2) The beneficiary then sells the asset: any gain on the sale accrues to the beneficiary: s.26(2) TCGA.
- (3) Under the charge the proceeds are used to pay the PRs' liability.

73.10 CGT planning by IoV

Where there is more than one residuary legatee and some are remittance basis taxpayers, non-residents or charities, it would often make sense for assets with inherent capital gains to be transferred to them rather than to UK resident and domiciled individuals. This can often be done by means of an appropriation under s.41 Administration of Estates Act 1925, but (depending on the terms of the will) an instrument of variation may be necessary. The variation must be made within two years of the death of the deceased.

The basic strategy should be to redirect foreign assets of the estate with inherent capital gains to the remittance basis taxpayer. UK resident and domiciled beneficiaries would instead receive cash or assets without inherent gains. The remittance basis taxpayer might in due course realise the gains free of tax. There would be an overall tax saving, which could be shared between the remittance basis taxpayer and the other beneficiaries by negotiation, or which could be allowed to accrue entirely to the remittance basis taxpayer if the other beneficiaries were so minded.

73.11 Succession governed by foreign law

Further consideration is needed if the succession is governed by a foreign law. Section 62(1) TCGA provides:

For the purposes of this Act the assets of which a deceased person was competent to dispose—

- (a) shall be deemed to be acquired on his death by the personal representatives *or other person on whom they devolve* for a consideration equal to their market value at the date of the death...

Under civil law jurisdictions property devolves directly on the beneficiary without the intervention of PRs during an administration period. *Bentley v Pike* 53 TC 590 concerned the position under German law (the deceased having died intestate owning a share of land in Germany). The evidence showed:

... the principle of *Universalsukzession* ... means that on the death of a person, his or her entire property passes immediately and automatically to his or her heirs. ... No distinction is made between movable and immovable property: on the death of the deceased person both types of property are automatically and without any interval in time or any further outward action of any kind vested in the heirs, whoever they may be, no matter whether they are known or whether it is necessary to take steps to ascertain their identity.

In these circumstances, the ownership of the property devolved on the beneficiary immediately on the death. The gain on the subsequent sale of the property therefore accrued to the beneficiary and not to the German equivalent of PRs.

CHAPTER SEVENTY FOUR

ESTATES OF DECEASED PERSONS: INCOME TAX

74.1 Income taxation of estates – Introduction

This chapter considers the income taxation of personal representatives and beneficiaries of estates of deceased persons. A full discussion needs a book to itself. I try to focus on matters closest to the themes of this book, but that can only be done in the context of a more general discussion of the rules.

I do not consider the equivalent provisions applicable for corporation tax which would apply to UK corporate beneficiaries.

For the succession law background, see 73.1 (Succession law background).

74.1.1 *Meaning of “PRs” for income tax*

Section 989 ITA provides a commonsense definition of PRs:

The following definitions apply for the purposes of the Income Tax Acts—

“personal representatives” in relation to a person who has died, means—

- (a) in the UK, persons responsible for administering the estate of the deceased, and
- (b) in a territory outside the UK, those persons having functions under its law equivalent to those of administering the estate of the deceased.

There is no rule that PRs are a single and continuing body of persons separate from the persons who are actually the PRs. This is anomalous, for such a rule applies to PRs for CGT and applies to trustees for both

taxes.¹ However it will not often matter.

74.2 Residence of PRs for income tax

PRs are UK resident for income tax if they are all UK resident in their personal capacity. They are non-resident if they are all non-resident in their personal capacity. HMRC agree. Form SA 906(Notes) 2012 (Notes on form SA 906 Trust and Estate Non-residence 2011/12) provides:

Deciding the personal representatives' residence status for Income Tax purposes

You can find out the personal representatives' residence status for Income Tax purposes by working through Questions 4 to 6.

4. Were **all** the personal representatives resident in the UK throughout the year to 5 April 2012?

If 'YES', the personal representatives as a whole are resident in the UK for Income Tax purposes. Tick box 6.1 [Resident in the UK for Income Tax purposes]. Go to Question 7.

If 'NO', go to Question 5.

5. Were **all** the personal representatives not resident in the UK throughout the year to 5 April 2012?

If 'YES', the personal representatives as a whole are not resident in the UK for Income Tax purposes. Tick box 6.2 [Not resident in the UK for Income Tax purposes.] Please also complete boxes 6.7 to 6.12 as appropriate. Go to Question 7.

If 'NO', go to Question 6 [mixed resident PRs].²

The position where an estate has both resident and non-resident PRs is governed by s.834 ITA:

- (1) This section applies for income tax purposes if the personal representatives of a deceased person ("D") include one or more persons who are UK resident and one or more persons who are non-UK resident.
- (2) If the following condition is met, the person or persons who are non-UK resident are treated, in their capacity as personal representatives, as UK resident.
- (3) The condition is that when D died D was UK resident, ordinarily UK

¹ See 73.2 (Meaning of "PRs" for CGT).

² Accessible www.hmrc.gov.uk/worksheets/sa906-notes.pdf.

resident or domiciled in the UK.

(4) If that condition is not met, the person or persons who are UK resident are treated, in their capacity as personal representatives, as non-UK resident.

Thus it is possible to arrange that PRs are not UK resident for income tax purposes. All of the PRs must be non-resident in their private capacities, (except in the case of a non-resident, non-ordinarily resident, non-domiciled testator where only one PR need be non-resident).

There are no statutory rules for domicile but the domicile of PRs will not often matter for IT purposes.

The position is different for CGT.³

74.3 Income taxation of PRs

PRs are “persons” and so pay income tax at the basic or dividend ordinary rate on the income of the estate if:

- (1) the PRs are UK resident, or
- (2) the income has a UK source.

74.3.1 Foreign domiciled testator

Form SA 906(Notes) 2012 (Notes on form SA 906 Trust and Estate Non-residence 2011/12) provides under the heading “Personal representatives: application to Income Tax”:

[1] If the personal representatives are resident in the UK, their taxable income will depend on the domicile of the deceased, whose estate is being administered, at the date of death.

[2] If the deceased was domiciled in the UK, then the personal representatives will be taxable in the normal way on both UK and overseas income.

[3] If the deceased was domiciled outside the UK, they will only be taxable on UK income. In such circumstances, you should not include such income. Please also tick box 6.6.⁴

³ See 73.3 (Residence and domicile of PRs for CGT).

⁴ Accessible www.hmrc.gov.uk/worksheets/sa906-notes.pdf. The reference is to box 6.6 in form SA106 (Trust and Estate Non-residence) which reads: “Tick box 6.6 if the deceased whose estate is being administered was domiciled outside the UK at the date

Point [3] is not right as a matter of law. UK resident PRs are as a matter of law liable to income tax on foreign income regardless of the domicile of the deceased. (Domicile of the deceased is sometimes relevant to the separate question of whether PRs are UK resident, but it is possible for a foreign domiciled deceased to have UK resident PRs.)

One is nevertheless entitled (perhaps bound) to assume that HMRC mean what they say, in a document as formal as guidance notes to a tax return, unless it is clear that there has been a blunder, ie unless it is clear that they cannot really mean what the sentence appears to say. HMRC clearly do mean what they say as they say it more than once and have said it for many years.⁵

There is therefore an informal concessionary practice. A concession is logical where the beneficiary of the estate is non-resident since income tax paid on foreign income would be reclaimed later when the income is paid to the beneficiary. The concession does raise a puzzle where the beneficiary is UK resident and the income is paid to the beneficiary: one might think that the foreign income should not be taken into account in computing the beneficiary's estate income, but that must be too good to be true. I think the effect of the concession should be to treat the PRs as non-resident for IT purposes and that should be followed through for payments made by the PRs (who therefore constitute a foreign estate). Thus a payment of the income to a UK resident beneficiary is taxable under the estate income regime, but a payment to a non-resident (or treaty non-resident) is not.

74.4 Income from specific legacy

If the PRs assent to the asset and its income vesting in the beneficiary, something rather peculiar happens. The beneficiary is deemed to have been the owner of the asset since the death. This rule – the doctrine of relation back – operates for income tax purposes: *IRC v Hawley* 13 TC 327. Thus, the beneficiary will, retrospectively, be treated as having received the income year by year as it arose and the PRs will be treated as

of death”.

⁵ The point has been made in the equivalent notes going back at least to the 2005 notes. Similar wording is found in form SA904(Notes) (Notes on form SA904 Trust and Estate Foreign 2011/12) under the heading “Special circumstances – Personal representatives.”

if they had not received it. The PRs may have paid UK tax. This will retrospectively be treated as being paid by the PRs on behalf of the beneficiary. Thus a beneficiary who is a remittance basis taxpayer can reclaim tax paid by UK resident PRs on unremitted foreign income. A non-resident beneficiary can also reclaim tax (it is not necessary to rely on ESC A14).

TSE Manual provides:

7490 Beneficiaries of estates: legacies [December 2011]

Tax rules for specific legacies.

A legacy may take the form of an asset that does not produce income – for example a picture or a piece of jewellery. The beneficiary does not receive income and has no tax liability in respect of the legacy.

Other assets can produce income – for example a bank account, shareholding or land. The general rule is that the beneficiary is entitled to the income arising to that asset from the death of the deceased person. Sometimes however the personal representatives may by law be entitled to use the income for some other purpose.

If the beneficiary gets the income it should be treated as his income for the year in which it arises. The authority for this is *IRC v Hawley* 13 TC 327. The beneficiary cannot however be taxed on or given repayment on income that he did not receive.

74.5 Income from residuary estate

In order to appreciate the law it is helpful to understand its history. In *R v Special Commissioners, ex p. Dr Barnado's Homes* 7 TC 646, the residuary legatee was a charity. Income arose to the PRs during the period of administration on which the PRs paid income tax. The residuary legatee was not entitled to the income of the residuary estate as it arose during the period of administration, so it could not at that time reclaim income tax paid. Instead it sought to recover the tax when it actually received the income, on completion of administration. The House of Lords held that although the sum received by the charity represented (or was derived from) the PR's income, it was received by the charity as a capital receipt (like accumulated income of a trust). The payment on the completion of administration did not confer retrospective title on the residuary legatee to such income as income. So income tax paid by the PRs could never be recovered by the charity. The doctrine of relation back was not extended to gifts of residue. That was a victory for the Revenue, who were no

doubt unperturbed about the unfairness to the charity. But subsequently, predictably, individual residuary legatees successfully contended that they were not liable to super-tax (which became surtax in 1927 and is now higher rate tax) on the income of a residuary estate arising during the administration period.⁶ The Revenue then realised they had made a rod for their own back. Legislation was therefore brought in which is now to be found in Chapter 6 Part 5 ITTOIA.

74.6 Absolute/limited/discretionary interest in residue

The legislation distinguishes absolute/limited/discretionary interests in residue.

74.6.1 Absolute interest in residue

Section 650(1) ITTOIA provides a fairly commonsense definition:

A person has an absolute interest in the whole or part of the residue of an estate for the purposes of this Chapter if—

- (a) the capital of the residue or that part is properly payable to the person, or
- (b) it would be so payable, if the residue had been ascertained.

74.6.2 Limited interest in residue

Section 650(2) ITTOIA provides a fairly commonsense definition:

A person has a limited interest in the whole or part of the residue of an estate during any period for the purposes of this Chapter if—

- (a) the person does not have an absolute interest in it, and
- (b) the income from it would be properly payable to the person if the residue had been ascertained at the beginning of that period.

In practice the usual example of a limited interest is a life interest.

⁶ eg *Corbett v IRC* 21 TC 449. There are several income tax cases on the issue of whether administration was completed.

74.6.3 *Discretionary interest in residue*

Section 650(3) ITTOIA provides a fairly commonsense definition:

A person has a discretionary interest in the whole or part of the residue of an estate for the purposes of this Chapter if—

- (a) a discretion may be exercised in the person's favour, and
- (b) on its exercise in the person's favour any of the income of the residue during the whole or part of the administration period (see section 653) would be properly payable to the person if the residue had been ascertained at the beginning of that period.

Section 650(4), (6) ITTOIA defines “properly payable” and s. 650(5) deals with the situation where PRs have an interest in another estate.

74.7 “UK estate” and “foreign estate”

The legislation distinguishes “UK estates” and “foreign estates”. The distinction matters for two purposes:

- (1) Computation of the basic amount.
- (2) Source of income (relevant to remittance basis taxpayers and non-residents).

These terms are defined in s.651(1) ITTOIA:

“UK estate”, in relation to a tax year, means an estate⁷ which meets conditions A and B, or condition C, for that year, and

“foreign estate”, in relation to a tax year, means an estate which is not a UK estate in relation to that year.

I refer below to “**UK estate conditions A to C**” to distinguish them from the myriad other conditions in ITTOIA. Unfortunately these conditions are in a tangle. An estate may be a UK estate in one year and a foreign estate in another year. The question must be addressed each year.

⁷ Section 649(2) ITTOIA provides a commonsense definition of “estate”:

In this Chapter—

“estate” means the estate of a deceased person (whether a UK estate or a foreign estate).

74.7.1 UK estate conditions A and B

Section 651 ITTOIA provides:

- (2) Condition A is that all the income of the estate either—
 - (a) has borne UK income tax by deduction, or
 - (b) is income in respect of which the personal representatives are directly assessable to UK income tax for the tax year.
- (3) Condition B is that none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident or not ordinarily UK resident.

If the PRs are UK resident, condition A is satisfied (they are directly assessable to IT) and condition B is satisfied⁸ so the estate is a UK estate.

If the PRs are UK resident but the testator was foreign domiciled, it appears that the estate is by concession treated as a foreign estate.⁹

If the PRs are non-resident, and have some foreign source income:

- (a) condition A is not satisfied (some of their income is not taxable)
- (b) it does not matter whether condition B is satisfied
- (c) condition C is not satisfied

so the estate is not a UK estate.

If the PRs are non-resident but have only UK source taxable income, condition A is satisfied (they are assessable) and condition B is satisfied (no foreign income) so the estate is a UK estate.

If the PRs are non resident and have some UK income which qualifies for exemption (eg gilts) the estate is a foreign estate.

It is easy to procure that an estate with non-resident PRs qualifies as a

8 It takes more than one reading to comprehend the triple negative in condition B (the source legislation was clearer before the ITTOIA rewrite). Suppose PRs are not UK resident and receive foreign source income. The position is that condition B is not satisfied because:

- (1) The PRs are not liable to IT on that income
- (2) The reason they are not liable is that they are not UK resident: had they been UK resident, they would have been liable.
- (3) Thus it is not the case that “none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident”.

The same applies if non ordinarily resident PRs receive income from exempt gilts.

9 See 74.3.1 (Foreign domiciled testator).

“foreign estate” by arranging that there is some foreign income or FOTRA securities.

74.7.2 *Disregarded income and condition C*

Section 651(4) ITTOIA provides:

For the purposes of conditions A and B sums within section 680(3) or (4) (sums treated as bearing tax) are ignored.

The list of disregards in s.680 ITTOIA is as follows:

(3) The following sums are treated as bearing income tax at the dividend ordinary rate—

- (a) a sum charged under Chapter 3 of Part 4 (dividends etc. from UK resident companies etc.), or
- (b) a sum that is part of the aggregate income of the estate because of falling within—
 - (i) section 664(2)(c) (stock dividends), or
 - (ii) section 664(2)(d) (release of loan to participator in close company where debt due from personal representatives).
- (4) A sum that is part of the aggregate income of the estate because of falling within section 664(2)(e) (gains from life insurance contracts etc) is treated as bearing income tax at the basic rate.

It is convenient to have a term to describe these categories of income, so I call it “**disregarded income**”.

Why is this income disregarded? Prior to 1996, s.233(1) ICTA 1988 (repealed) provided:

Where in any year of assessment the income of any person, not being a company resident in the UK, includes a distribution in respect of which that person is not entitled to a tax credit

(a) no assessment shall be made on that person in respect of income tax at the basic rate on the amount or value of the distribution ...

Thus non-resident PRs who received dividend income would not be assessable and so would count as a foreign estate.

Section 651(5) ITTOIA provides:

Condition C is that the aggregate income of the estate for the tax year consists only of sums within section 680(3) or (4).

74.8 “Payment”

The legislation uses the word “payment” but (like “capital payment” for s.87) this is widely defined. Section 681 ITTOIA provides:

- (1) For the purposes of this Chapter—
 - (a) a transfer of assets, or
 - (b) the appropriation of assets by personal representatives to themselves,
 is treated as the payment of an amount equal to the assets’ value at the date of transfer or appropriation.
- (2) The set off or release of a debt is treated for the purposes of this Chapter as the payment of an amount equal to it.
- (3) If at the end of the administration period—
 - (a) there is an obligation to transfer assets to any person, or
 - (b) personal representatives are entitled to appropriate assets to themselves,
 an amount equal to the assets’ value at that time is treated as payable then for the purposes of this Chapter.
- (4) If at the end of the administration period—
 - (a) there is an obligation to release or set off a debt owed by any person, or
 - (b) personal representatives are entitled to release or set off a debt in their own favour,
 a sum equal to the debt is treated as payable then for the purposes of this Chapter.

74.9 Charge to tax on estate income

Beneficiaries are subject to tax on estate income. There are essentially three parts to the legislation:

- (1) The charge to tax on estate income.
- (2) The definition of when estate income arises.
- (3) The quantification of the amount of estate income.

Section 649(1) ITTOIA provides the charge to tax:

Income tax is charged on estate income.

74.10 Estate income

Estate income is a label which brings in different rules for the different types of interest in residue. Section 649(2) ITTOIA provides a referential definition:

- (2) In this Chapter—
“estate income” means the income treated under this Chapter as arising from an absolute, limited or discretionary interest in the whole or part of the residue of an estate ...
- (3) Estate income is treated as income for income tax purposes.
- (4) If different parts of an estate are subject to different residuary dispositions, those parts are treated for the purposes of this Chapter as if they were separate estates.

The circumstances in which estate income is treated as arising depend on the type of interest in residue. These are set out in ss.652–655 ITTOIA. These provisions state *when* estate income is treated as arising. The question of the *amount* of estate income is addressed separately.

74.10.1 *When estate income arises: absolute interest in residue*

Section 652 ITTOIA provides:

- (1) Income is treated as arising in a tax year from a person’s absolute interest in the whole or part of the residue of an estate if—
 - (a) the person has an assumed income entitlement for the tax year in respect of the interest (see sections 665 to 670), and
 - (b) condition A or B is met.
- (2) Condition A is that a payment is made in respect of the interest in the tax year and before the end of the administration period (see section 653).
- (3) Condition B is that the tax year is the final tax year (see section 653).
- (4) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

The key term here is “assumed income entitlement;” see 74.14 (Assumed income entitlement).

For completeness, s.653 ITTOIA provides commonsense definitions of “administration period” and “final tax year”:

- (1) In this Chapter “the administration period”, in relation to the estate of a deceased person, means the period beginning with the deceased’s death and ending with the completion of the administration of the estate.
- (2) In the application of subsection (1) to Scotland, the reference to the completion of the administration is to be taken as a reference to the date at which, after discharge of, or provision for, liabilities falling to be met out of the deceased’s estate, the free balance held in trust for the residuary legatees or for the persons with the right to the intestate estate has been ascertained.
- (3) In this Chapter “the final tax year” means the tax year in which the administration period ends.

74.10.2 *When estate income arises: limited interest in residue*

Section 654 ITTOIA provides:

- (1) Income is treated as arising in a tax year from a person’s limited interest in the whole or part of the residue of an estate in cases A, B and C.
- (2) Case A is where—
 - (a) the interest has not ceased before the beginning of the tax year, and
 - (b) a sum is paid in respect of the interest in that year and before the end of the administration period.
- (3) Case B is where—
 - (a) the tax year is the final tax year,
 - (b) the interest has not ceased before the beginning of that year, and
 - (c) a sum remains payable in respect of the interest at the end of the administration period.
- (4) Case C is where—
 - (a) the tax year is a year before the final tax year,
 - (b) the interest ceases in the tax year, and
 - (c) a sum is paid in respect of the interest in a later tax year but before the end of the administration period, or remains payable in respect of it at the end of that period. ...
- (6) Income treated as arising as a result of this section or section 674 is estate income for the purposes of this Chapter.

74.10.3 *When estate income arises: discretionary interest in residue*

Section 655 ITTOIA provides:

- (1) Income is treated as arising in a tax year from a person's discretionary interest in the whole or part of the residue of an estate if a payment is made in the tax year in exercise of the discretion in that person's favour.
- (2) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

74.11 Amount of estate income

There are two aspects to the rules: quantifying the “basic amount”, and grossing up.

74.11.1 *UK estate*

Section 656(1) ITTOIA provides:

In the case of a UK estate, tax is charged under section 649 on the amount of estate income treated as arising in the tax year.

Section 656 defines the amount of estate income:

- (2) That amount is the basic amount of that income for the tax year (see subsection (4)) grossed up by reference to the applicable rate for that year (see section 663).
- (3) The gross amount is treated as having borne income tax at that rate.

The applicable rate is not discussed here. The key term is the “basic amount” of estate income. Section 656(4) ITTOIA provides four referential definitions.

In this Chapter “the basic amount”, in relation to estate income, has the meaning given by—

- (a) section 660 (basic amount of estate income: absolute interests),
- (b) section 661 (basic amount of estate income: limited interests),
- (c) section 662 (basic amount of estate income: discretionary interests), and
- (d) section 675 (basic amount of estate income: successive limited

interests).

74.11.2 *Foreign estate*

Section 657(1) ITTOIA provides:

In the case of a foreign estate, tax is charged under section 649 on the full¹⁰ amount of estate income treated as arising in the tax year.

The section goes on to specify the amount:

(2) That amount depends on whether the estate income arising in the tax year is paid from sums within section 680(3) or (4) (sums treated as bearing income tax).

(3) So far as the estate income is paid from such sums, that amount is the basic amount of that income for the tax year grossed up by reference to the applicable rate for that year (see section 663).

(4) That gross amount is treated as having borne income tax at that rate.

(5) So far as the estate income is not paid from sums within section 680(3) or (4), the amount of estate income treated as arising in the tax year is the basic amount of that income for that year.

The difference between UK and foreign estates is that in the latter case there is no grossing up.

74.12 **Person liable**

Section 659 ITTOIA identifies the person liable:

(1) If the estate income is from a person's absolute interest or limited interest, that person is liable for any tax charged under section 649 unless subsection (3) or (4) provides that another person is liable.

(2) If the estate income is from a discretionary interest, the person in whose favour the discretion is exercised in making the payment in question is liable for any tax charged under section 649.

That seems self-evident. Subsection (3)(4) (not set out here) deal with

¹⁰ Section 657 refers to the "full amount" and s.656 refers only to the "amount", but the word "full" is clearly otiose: there is no difference in meaning.

successive interests. We turn at last to the key concept “basic amount”.

74.13 “Basic amount of estate income”

The quantum of the “basic amount of estate income” depends on the type of interest in residue, ie whether there is an absolute, limited or discretionary interest.

74.13.1 Basic amount of estate income: absolute interest

Section 660 ITTOIA provides:

- (1) The basic amount of estate income relating to a person’s absolute interest in the whole or part of the residue of an estate for a tax year before the final tax year is the lower of—
 - (a) the total of all sums paid in the tax year in respect of that interest, and
 - (b) the amount of the person’s assumed income entitlement for the tax year in respect of it.
- (2) The basic amount for the final tax year is equal to the amount of the person’s assumed income entitlement for that year in respect of that interest.

The next key term is “assumed income entitlement”.

74.13.2 Basic amount of estate income: limited interest

Section 661(1) ITTOIA provides:

- (1) The basic amount of estate income relating to a person’s limited interest in the whole or part of the residue of an estate for a tax year is the total of the sums within section 654(2)(b), (3)(c) and (4)(c) for that year.

74.13.3 Basic amount of estate income: discretionary interest

Section 662 ITTOIA provides:

The basic amount of estate income relating to a person’s discretionary interest in the whole or part of the residue of an estate for a tax year is

the total of the payments made in the tax year in exercise of the discretion in favour of the person.

74.13.4 *HMRC practice*

These rules are too complicated and in practice no-one takes much notice of them. The TSEM provides:

7655. Statutory - conventional basis of taxation [March 2009]

The statutory basis

The statutory basis is provided in ITTOIA/Ss654, 656 and 661. This requires all sums paid during or payable on completion of the administration period to be taxed over the course of the administration period. The amounts are allocated to tax years as follows:-

1. where

- the interest has not ceased before the beginning of the tax year
 - the administration period continues after the end of the tax year
- then the amount is the sum paid in the tax year

2. where

- the interest has not ceased before the beginning of the tax year
 - the administration period ends in the tax year
- then the amount is the total of any sum paid in the tax year before the end of the administration period plus any amount still due to the beneficiary at the end of the administration period

3. where

- the interest ceases in the tax year
 - the administration period continues after the end of the tax year
- then the amount is the total of any sum paid in the tax year plus any amount still due when the interest ceases

The amounts allocated to each year are then deemed to be the net income of the beneficiary for that year. The amount concerned is grossed at the applicable rate...

The conventional basis

The beneficiary is treated as if he had been entitled to the income of the estate (or an appropriate part of the estate) as and when the income arose to the personal representatives. The basis applies for all purposes including repayments.

It is unlikely that there will be cases where it is worthwhile insisting on the statutory basis. If the beneficiary asks for the statutory basis to be applied, you should ask for a computation on that basis. If you have any problems with such a computation, ask HMRC Trusts Edinburgh for advice.

74.14 Assumed income entitlement

The key term “assumed income entitlement” is relevant to computation of the basic amount. For absolute interests, this is (in brief) calculated as follows.

First one calculates the “aggregate income of the estate”. This has a broadly commonsense definition in s.664 ITTOIA:

- (1) For the purposes of this Chapter the aggregate income of the estate for a tax year is
 - [a] the total of the income and amounts specified in subsection (2), but
 - [b] excluding the income specified in subsection (5).
- (2) The income and amounts are—
 - (a) the income of the deceased’s personal representatives in that capacity which is charged to UK income tax for the tax year,
 - (b) the income of the deceased’s personal representatives in that capacity on which such tax would have been charged for the tax year if—
 - (i) it was income of a UK resident who was ordinarily UK resident, and
 - (ii) it was income from a source in the UK,¹¹
 - (c) any amount of income treated as arising to the personal representatives under section 410(4) (stock dividends) that would be charged to income tax under Chapter 5 of Part 4 if income arising to personal representatives were so charged (see section 411),
 - (d) in a case where section 419(2) applies (release of loans to participator in close company: loans and advances to persons who die), the amount that would be charged to income tax under Chapter 6 of Part 4 apart from that section, and
 - (e) any amount that would have been treated as income of the personal representatives in that capacity under section 466 if the condition in section 466(2) had been met (gains from contracts for life insurance).
- (3) In calculating the amount of the income within subsection (2)(a), any allowable deductions are to be taken into account.
- (4) In calculating the amount of the income within subsection (2)(b), any deductions which would be allowable if the income had been

¹¹ I cannot see the point in (ii). If it is income of a UK resident, why does the source matter?

charged to UK income tax are to be deducted from the full amount of the income actually arising in the tax year.

Section 664(5) identifies income not included in “estate income”:

The excluded income is—

- (a) income to which any person is or may become entitled under a specific disposition¹², and
- (b) income from property devolving on the personal representatives otherwise than as assets for payment of the deceased’s debts.

Armed with the figure for the aggregate income of the estate, one next computes “the residuary income of the estate”. This brings in rules for allowable deductions. Section 666(1) ITTOIA provides:

For the purposes of this Chapter the residuary income of an estate for a tax year is

- [1] the aggregate income of the estate for that year, less
- [2] the allowable estate deductions for that year.

This is subject to section 669 (reduction in residuary income: inheritance tax on accrued income).

Section 666(2) ITTOIA identifies the deductions:

The allowable estate deductions for a tax year are—

- (a) all interest paid in that year by the personal representatives in that capacity (but see section 233 of IHTA 1984: exclusion of interest on unpaid inheritance tax),
- (b) all annual payments for that year which are properly payable out of residue,
- (c) all payments made in that year in respect of expenses incurred

12 Defined in subsection (6): “In subsection (5)(a) ‘specific disposition’ means a gift of specific property under a will, including—

- (a) the disposition of personal chattels by section 46 of the Administration of Estates Act 1925 (c 23) (succession on intestacy), and
- (b) any disposition which under the law of another country has a similar effect to a gift of specific property by will under the law of England and Wales, but excluding real property included in a residuary gift made by will by a specific or general description of it or, in Scotland, heritable estate included in such a gift.”

by the personal representatives in that capacity in the management of the assets of the estate, and

(d) any excess deductions from the previous tax year.¹³

This is subject to subsections (3) to (5).

Subsections (3) - (5) have some commonsense rules:

(3) No sum is to be treated as an allowable estate deduction if it is allowable in calculating the aggregate income of the estate.

(4) No sum is to be counted twice as an allowable estate deduction.

(5) Payments in respect of expenses are only allowable estate deductions if they are properly chargeable to income (ignoring any specific direction in a will).

In short, one deducts “allowable estate deductions” to obtain the “residuary income of the estate.”

Armed with the figure for the residuary income of the estate, we are at last in a position to compute the assumed income entitlement. Section 665 ITTOIA provides:

(1) Whether a person has an assumed income entitlement for a tax year in respect of an absolute interest in the whole or part of the residue of an estate depends on the results of the following steps.

Step 1 Find the amount of the person’s share of the residuary income of the estate that is attributable to that interest for that tax year and each previous tax year during which the person had that interest (see sections 666 to 669).

Step 2 If the estate is a UK estate in relation to any tax year for which an amount has been found under step 1, deduct from that amount income tax on that amount at the applicable rate for that year (see section 670).

Step 3 Add together the amounts found under step 1 after making any deductions necessary under step 2.

Step 4 Add together the basic amounts relating to the person’s absolute interest in respect of which the person was liable for income

13 This is defined in s.666(6):

“In this section ‘excess deductions from the previous tax year’ means so much of the allowable deductions for the previous tax year as exceeded the aggregate income of the estate for that year.”

This allows unused expenses to be carried forward.

tax for all previous tax years (or would have been so liable if the person had been a person liable for income tax for those years).

(2) For the purposes of this Chapter the person has an assumed income entitlement for the tax year if the amount resulting from step 3 exceeds the amount resulting from step 4.

(3) The assumed income entitlement is equal to the excess.

(4) [This deals with successive interests].

74.15 Beneficiary a trustee of a discretionary trust

Section 483 ITA provides:

(1) This section applies if, during or at the end of the administration period for an estate—

- (a) the personal representatives pay the trustees of a settlement a sum representing income of the personal representatives, and
- (b) if this Chapter had applied to personal representatives, income tax would have been charged on that income at the dividend trust rate or at the trust rate.

(2) The sum is treated as—

- (a) being paid as income, and
- (b) having borne income tax at the applicable rate.

Lastly we have some definitions by reference (which would have been unnecessary had there been taxes-act-wide definitions):

(3) In this section—

“administration period” has the meaning given by section 653 of ITTOIA 2005, and

“the applicable rate” means the rate referred to in section 663(1) of ITTOIA 2005 (the applicable rate for grossing up basic amounts of estate income).

The drafter has failed to incorporate the extended definition of “payment” but perhaps that may be implied.

74.16 Beneficiary a remittance basis taxpayer

Section 658 ITTOIA brings in the remittance basis:

(1) The charge to tax under section 649 on the amount of income arising

in a tax year is subject to Part 8 (foreign income: special rules).

(2) For the purposes of section 830(1) (meaning of “relevant foreign income”) amounts charged to tax under section 649—

- (a) are treated as arising from a source outside the UK if the estate is a foreign estate, and
- (b) are treated as not arising from such a source if the estate is a UK estate.

The section uses the words “treated as” because the income (being fictional income) does not have a source.¹⁴

If a beneficiary is a remittance basis taxpayer, it is important to ensure that the estate is a “foreign estate” and not a “UK estate” because the remittance basis only applies to a foreign estate.

Since the estate income is deemed income, not real income, it cannot be remitted. There is no rule that the PRs income or the beneficiary’s actual receipts are deemed to be derived from the estate income.

74.17 Non-resident beneficiary of UK estate: DTA relief

International Manual provides:

367510 Claims by beneficiaries of a UK estate [April 2007]

A distribution made to a beneficiary of income received by a UK estate during its administration period is considered to be a source of income in its own right.

Where a beneficiary receives a distribution of income that has arisen during the administration of a UK estate, that beneficiary may be entitled to relief on the income under a Double Taxation treaty. Relief will be available in one of two ways:

- Other Income article: where an other income article of a treaty does not exclude income paid out of a UK estate, that income is considered as other income. ...

The beneficiary is entitled to full relief from the total tax deemed to have been paid on the income.

- Extra Statutory Concession A14: where it is not possible to relieve the income under an other income article, Extra Statutory Concession A14 allows us to look through to the underlying sources of income received by an estate and allow relief as if the beneficiary

14 See 18.4.2 (Location of source of income when there is no source).

owned the sources of income in their own right.¹⁵ ...

International Manual para 367530 sets out a list of countries where relief is available under the Other Income article on distributions made by UK estates. For this list see 24.11.1 (DTAs with OECD model “other income” article).

367540 How to give relief by ‘looking through’ [April 2007]

A repayment claim will be supported by an R185 (Estate Income) (or an R185E) tax certificate prepared by the personal representative(s) showing the rate(s) at which the sources of income have been taxed.

It should be possible to identify the sources of income from the R185 (Estate Income). If so, you should apply relief at the treaty rate for the type of income. It may not be possible to identify the sources of income on an R185E; if so you will need to find out what they are. Remember that you will have to open an SA enquiry to ask for the information you need. See INTM331200 for guidance on how to open an enquiry. You should ask the claimant or their representative for a breakdown of the underlying sources of income arising to the estate.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

74.18 Non-resident beneficiary of UK estate: concessionary relief

ESC A14 provides:

A14 Deceased person’s estate: residuary income received during the administration period

A beneficiary who for a year of assessment is not resident or not ordinarily resident in the UK, and is deemed under ITTOIA ss.657, 658(2) and 830(1) to have received income from a UK estate in that year, may claim to have their tax liability on that income from the estate adjusted to what it would be if such income had arisen to them directly and as a result they—

- [1] could claim relief under TA 1988 s.278 (claim to personal reliefs by certain non residents); or
- [2] could claim entitlement to exemption in respect of FOTRA Securities issued in accordance with ITTOIA s.714; or

15 See 74.18 (Non-resident beneficiary of UK estate: concessionary relief).

- [3] could claim relief under the terms of a double taxation agreement;
or
- [4] would not have been chargeable to income tax.

The ESC goes on to specify the conditions for the relief.

Relief or exemption, as appropriate, will be granted to the beneficiary only if the personal representatives of the estate—

- have made estate returns for each and every year for which they are required, and
- have paid all tax due and any interest, surcharges and penalties arising, and
- keep available for inspection any relevant tax certificates, together with copies of the estate accounts for all years of the period of administration showing details of all sources of estate income and payments made to beneficiaries.

Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary is deemed to have received the income.

No tax will be repayable to the beneficiary in respect of income they are deemed to have received where the basic amount of estate income, if received by a UK resident beneficiary of an estate, is paid sums within ss.657(3), (4) and 680(3), (4) ITTOIA.

This is the equivalent of ESC B18 for trusts.¹⁶

74.19 Non-resident beneficiary of foreign estate

Section 577 ITTOIA provides the necessary exemption for non-residents:

- (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
- (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK...

The wording is the same as the equivalent exemption for savings and investment income, in part 4 ITTOIA; for a discussion see 18.4 (Why does

¹⁶ See 24.9 (Discretionary trusts treated as transparent to allow beneficiaries reliefs).

location of source matter?).

74.20 Time limits for claims and assessments

Section 682 ITTOIA provides:

- (1) This subsection applies if after the administration period ends it is apparent that a person is liable for income tax on estate income for any tax year who previously appeared not to be so liable or to be liable for tax on a lesser amount.
- (2) If subsection (1) applies—
 - (a) the person may be assessed and taxed for the tax year, and
 - (b) any relief or additional relief to which the person may be entitled for the tax year is to be allowed if a claim is made.
- (3) This subsection applies if after the administration period ends it is apparent that a person who previously appeared to be liable for income tax on estate income for any tax year is not so liable or is liable for tax on a lesser amount.
- (4) If subsection (3) applies—
 - (a) all necessary adjustments and repayments of income tax for the tax year are to be made, and
 - (b) if the person has been allowed relief which exceeds the relief that could have been given by reference to the amount actually charged for the tax year, income tax is charged on the person for that year under this subsection on the excess.
- (4A) The excess charged under subsection (4)(b) is treated as an amount of income for income tax purposes, except so far as it represents a tax reduction given effect at Step 6 of the calculation in section 23 of ITA 2007.
- (5) An assessment or adjustment made for the purposes of this Chapter or a claim made as a result of this Chapter may be made after the end of the period otherwise allowed if it is made on or before the third anniversary of the normal self-assessment filing date for the tax year in which the administration period ends.

International Manual provides:

367560 Statutory time limit for claims by beneficiaries [April 2007]

It is possible that a beneficiary may receive a distribution from an estate which includes income received by the personal representative outside the normal statutory time limit. However, Section 700(3) ICTA 1988 allows beneficiaries until 3 years from 31 January following the year in

which administration was completed to make their claims. This means that a beneficiary is not prevented from claiming relief from UK tax because of the time taken to complete the administration of the estate. For example, a death occurs during 1994/95. In the normal course of events, the time limit for a beneficiary to claim on administration period income arising in that year would have expired on 5 April 2001. However, if the administration of the estate is not completed until 2002/03 the time limit is extended and the beneficiary has until 31 January 2007 to make the claim.

WHO IS THE SETTLOR?

75.1 Why does it matter who is the settlor?

The identity of the settlor(s) of a settlement is relevant for many tax purposes. It is not practical to compile a full list, but the rules include the following:

- (1) Rules taxing a settlor on trust income and gains.¹
- (2) Rules taxing trustees (or beneficiaries) if the settlor is UK domiciled or resident. The tax status of the settlor is an appropriate connecting factor for the taxation of trustees and beneficiaries. The most important example is the IHT excluded property rule.² So the question of the identity of the settlor often arises in matters concerning foreign domiciliaries.
- (3) Connected person rules, which apply if a person is connected with a settlor.
- (4) Reverter to settlor rules.³

Subsidiary questions may also arise:

- Where a settlement has two settlors, what property each has settlor provided
- Whether a settlor provides additional property
- When a person provides property

The person named as “the settlor” in a trust document is not necessarily a settlor, or the only settlor, for tax purposes.⁴

1 See 26.1 (Settlor-interested trusts) and 47.2 (Fundamental s.86 conditions).

2 See 58.1 (Excluded property for IHT).

3 See s.54 IHTA.

4 On nominal settlors see Kessler & Sartin, *Drafting Trusts and Will Trusts*, (10th ed., 2010) para 10.14.

75.2 Definitions of “settlement”

Before discussing “settlor” we need to discuss “settlement”.

For most purposes the words “settlement” and “trust” are interchangeable,⁵ though when discussing statutory provisions it may be clearer to use the statutory terminology.

75.2.1 *Terminology*

There are three distinct definitions of “settlement”. We need labels to distinguish them, and I use the following terms:

(1) *Classic settlements*

(a) ***Standard IT/CGT definition of “settlement”***

This definition applies in the Income Tax Acts and TCGA unless the context otherwise requires. In some cases the context does “otherwise require” because the settlement-arrangement definition is applied. I cannot think of any other case where the context would “otherwise require”.

(b) ***IHT definition***: the definition for IHT purposes.

For present purposes (identifying the settlor) the IHT definition is effectively the same as the standard IT/CGT definition, there is no need to distinguish between them.

I use the term “**classic settlement**” to describe a trust which is a settlement within the standard IT/CGT and IHT definitions.⁶

(2) ***Settlement-arrangement***

This is the definition which applies for the purposes of the IT settlement provisions. It is also applied in various other contexts. In earlier editions I called this the IT definition but that terminology became inappropriate following the introduction of the standard IT/CGT definition in 2006; also the settlement-arrangement definition is adopted for several purposes for CGT.

Equipped with this terminology we can now consider the various definitions of “settlement”.

5 See Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010) p.lvii (Terminology).

6 This convenient term was first used in *Chinn v Collins* 54 TC 311 at p.339, and adopted in *Jones v Garnett* 78 TC 1 HL at [43].

75.2.2 *Standard IT/CGT definition of settlement*

Section 466 ITA provides:

466 Meaning of “settled property” etc

(1) This section applies for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.

(2) “Settled property” means any property held in trust other than property excluded by subsection (3)...

(4) References, however expressed, to property comprised in a settlement are references to settled property.⁷

This is formally a definition of “settled property” not “settlement” but, as subs.(4) illustrates, the definition also governs the meaning of the word “settlement”.

The exemption in s.466(3) relates to nominees or bare trustees, see 79.4 (Bare trusts/nomineeships).

CGT has equivalent provisions: s.60, 68 TCGA.

75.2.3 *Settlement-arrangement definition of settlement*

Section 620(1) ITTOIA provides:

In this Chapter “settlement” includes⁸ any disposition, trust, covenant, agreement, arrangement or transfer of assets...

In *Jones v Garnett*, Lord Hoffmann explains:

Not every transfer of property is a settlement for the purposes of [the settlement-arrangement definition]. There has to be an “element of bounty” in the transaction. This old-fashioned phrase, apparently derived from the judgment of Plowman J in *IRC v Leiner* 41 TC 589 and approved by the House of Lords in *IRC v Plummer* [1980] AC 896,

7 The legislation is set out in full in ITA and TCGA, but there are no significant differences, so I give the text of ITA only. The CGT equivalent is in ss.60, 68 TCGA 1992.

8 The context shows this is an exhaustive definition, ie the word “includes” really means “means”.

conjuring up the image of Lady Bountiful in *The Beaux' Stratagem*, is perhaps not the happiest way of describing a provision for a spouse or minor children. ... It is nevertheless exactly the kind of thing at which the anti-avoidance provisions are aimed. In *Chinn v Hochstrasser* [1981] AC 533 Lord Roskill cautioned against treating the word “bounty” as if it had been included in the statute. It seems to me that the general effect of the cases is that, under the arrangement, the settlor must provide a benefit which would not have been provided in a transaction at arms’ length.⁹

The expression “bounty” was criticised by Lady Hale in the same case, but it is likely to continue in use as a technical term. It is short, accurate, and memorable if archaic.¹⁰

The bounty requirement is not quite the same as a “commercial” requirement, but the concepts overlap. In *IRC v Levy* the judge stated that “a commercial transaction devoid of any element of bounty is not within the definition”. In that case an interest-free loan to a company wholly owned by the lender was held to be a *simple case of a commercial transaction devoid of any element of bounty* and hence not a settlement-arrangement.¹¹

By contrast, the standard IT/CGT and IHT definitions of “settlement” do not include a bounty requirement.

It is unfortunate that statute uses the word “settlement” as a label for this concept, but there is nothing to be done about that.

9 78 TC 1 at [7]. HMRC agree. The TSE Manual provides:

“4110 Restrictions to the definition of settlement [August 2010]

...A purely commercial transaction at arms length is outside the meaning of ‘settlement’.

Settlement must include an element of bounty, as decided in the tax case of *IRC v Plummer* (54 TC 1). Bounty is the provision of value without any corresponding quid pro quo, usually a gift or a transfer at less than full value.”

10 Lord Neuberger agreed in *Jones v Garnett* 78 TC 1 at [76]:

“The word ‘bounty’ rings slightly uncomfortably, at least to my ears. ... However, in the light of the judicial decisions on these provisions, it seems to me that the law is now tolerably clear and sensible, and, particularly given the need for clarity and the room for difficulties in this area, it would be inappropriate to risk introducing uncertainty or new complications by redefining the principles, even if only linguistically.”

11 56 TC 68 at p.87.

Is an estate of a deceased person, or a trust under a will or intestacy a settlement-arrangement? This question does not arise for the purposes of the IT settlement provisions. Even if it is a settlement-arrangement the settlor, that is, testator (being dead) will not be subject to tax. The settlement-arrangement definition is used in other contexts where the issue does arise: see 73.6.1 (Is an estate a “settlement” within s.87 TCGA?).

75.2.4 *IHT definition of settlement*

The IHT definition of “settlement” is different again. However for the purposes of this chapter (who is the settlor) it is equivalent to the standard IT/CGT definition.¹²

75.3 Definitions of “settlor”

75.3.1 *Terminology*

There are four distinct definitions of “settlor”. We need labels to distinguish them, and I use the following terms:

- (1) ***The standard IT/CGT definition of settlor.*** This definition applies in the Income Tax Acts and TCGA “unless the context otherwise requires”. In some cases the context does “otherwise require” because there is a separate definition of settlor. I cannot think of any other case where the context would “otherwise require”. The standard IT/CGT definition does not apply for the IT settlement provisions or for s.86 TCGA, so it is not usually important.
- (2) ***The settlement-arrangement definition of settlor.*** This is the definition which applies for the purposes of the IT settlement provisions. It is applied by reference in various other contexts.
- (3) ***The CGT s.86 definition of settlor:*** the definition for the purposes of s.86 TCGA.
- (4) ***The IHT definition of settlor:*** the definition for the purposes of IHT. Equipped with this terminology we can now consider the various definitions of settlor.

¹² The differences matter for issues relating to categorisation of foreign institutions; the IHT definition is discussed in 79.2 (Definition of “IHT-settlement”).

75.3.2 *Standard IT/CGT definition of settlor*

Section 467(1) ITA provides:¹³

In the Income Tax Acts (except where the context otherwise requires) “settlor”, in relation to a settlement, means the person, or any of the persons, who has made the settlement.

Section 467 ITA sets out various circumstances in which a person is treated as having made a settlement:

(3) A person (“S”) is treated for the purposes of the Income Tax Acts as having made a settlement if—

(a) S has made or entered into the settlement (directly or indirectly), ...

There are four possibilities here:

- (1) S is treated as having made a settlement if S has made the settlement directly. This is a tautology.
- (2) S is treated as having made a settlement if S has made a settlement indirectly. I am unable to see how one can make a settlement indirectly.
- (3) and (4) S is treated as making a settlement if S has entered into it (directly or indirectly). These words have been lifted from the context of the settlement-arrangement definitions of settlement and are not apt here.

I conclude that s.467(3)(a) achieves nothing, but it does no harm. One might take from it a general intent that “making a settlement” is not to be construed narrowly.

Section 467 ITA continues:

(3) A person (“S”) is treated for the purposes of the Income Tax Acts as having made a settlement if ...

(b) the settled property, or property from which the settled property derives, is or includes property within subsection (4).

(4) Property is within this subsection if—

(a) the settlement arose on S’s death (whether by S’s will, on S’s intestacy or in any other way), and

¹³ The legislation is set out in full in ITA and TCGA, but there are no significant differences, so I give the text of ITA only. The CGT equivalent here is s.68A TCGA.

- (b) immediately before S's death, the property was property of S—
 - (i) which was disposable property (see section 468), or
 - (ii) which represented S's severable share in any property to which S was beneficially entitled as joint tenant.

This is necessary because an intestate does not “make or enter into” the trusts arising on intestacy; and it might perhaps be argued that a testator does not “make or enter into” the trusts arising under their will.¹⁴

Section 467 continues:

- (5) In particular, S is treated for the purposes of the Income Tax Acts as having made a settlement if—
 - (a) S has provided property for the purposes of the settlement (directly or indirectly), or
 - (b) S has undertaken to do that.
- (6) If a person (“A”) makes or enters into a settlement in accordance with reciprocal arrangements with another person (“B”)—
 - (a) B is treated for the purposes of the Income Tax Acts as having made the settlement, and
 - (b) A is not to be treated for the purposes of the Income Tax Acts as having made the settlement just because of the reciprocal arrangements.

So far this definition of settlor is almost the same as the settlement-arrangement definition, the only difference is that the wording is recast in accordance with the conventions of plain English drafting and will trusts are included.

75.3.3 *Settlement-arrangement definition of settlor*

Section 620 ITTOIA provides the settlement-arrangement definition:

- (1) In this Chapter ...
“settlor”, in relation to a settlement, means any person by whom the settlement was made.
- (2) A person is treated for the purposes of this Chapter as having made a settlement if the person has made or entered into the settlement directly or indirectly.

14 See 73.6.1 (Is an estate a “settlement” within s.87 TCGA?).

- (3) A person is, in particular, treated as having made a settlement if the person—
- (a) has provided funds directly or indirectly for the purpose of the settlement,
 - (b) has undertaken to provide funds directly or indirectly for the purpose of the settlement, or
 - (c) has made a reciprocal arrangement with another person for the other person to make or enter into the settlement.

One can identify five parts of the definition. A person is a settlor if and only¹⁵ if they have:

- (1) made the settlement directly or indirectly;
- (2) “entered into”¹⁶ the settlement directly or indirectly;
- (3) provided funds directly or indirectly for the purpose of the settlement;
- (4) undertaken to provide funds directly or indirectly for the purpose of the settlement;¹⁷ or
- (5) made a reciprocal arrangement with another person to make or enter into the settlement.

75.3.4 *IHT definition of settlor*

Section 44(1) IHTA provides the IHT definition:

15 “Means” in s.620(1) is the term used for an exhaustive definition. The context shows that the words “is treated as” in s.620(2)(3) also constitute an exhaustive (not inclusive) definition.

16 The words “entered into” are not found in the CGT s.86 or IHT definitions of “settlor”. The reason is that (in the context of the settlement-arrangement definition) the word “settlement” includes an agreement or arrangement. One is said to “enter into” an agreement or arrangement even though it is not normal usage to say that one “enters into” a settlement (in the classic sense).

The drafter of the standard IT/CGT definition did not realise this, so they included the words infelicitously, though no harm is done.

17 In practice HMRC may ignore this. TSE Manual formerly provides at 4120: “In practice if someone has undertaken to provide funds, but actually does not, we would not seek to apply s.624 or s.629 ITTOIA.” The passage was quietly deleted in February 2011, but with no announcement of a change of practice. Undertakings to provide funds are not found in practice so this has no practical relevance. The IHT and CGT s.86 definitions omits this, presumably it was thought to be unnecessary. The drafter of the standard IT/CGT definition included the words; if they had thought about this they would probably have omitted them, but no harm is done.

In this Act “settlor”, in relation to a settlement, includes¹⁸ any person by whom the settlement was made directly or indirectly, and in particular (but without prejudice to the generality of the preceding words) includes any person who has provided funds directly or indirectly for the purpose of or in connection with the settlement or has made with any other person a reciprocal arrangement for that other person to make the settlement.

The IHT definition expands “for the purpose of the settlement” into “for the purpose of *or in connection with* the settlement”. It is considered that the words make no difference, for if something is provided “in connection with” a settlement it must be provided “for the purpose of” the settlement; one must bear in mind that “purpose” does not need to be a very focussed or intense purpose.¹⁹ The attraction of this view is that it makes the “who is the settlor” area of tax law more coherent if (so far as possible) the same test applies for all the taxes.²⁰

There are specific IHT provisions which may affect the identity of the settlement and settlor for IHT. So sometimes a person who is the actual settlor in the general sense is not regarded as the settlor for IHT. This chapter considers the general sense of settlor; for the IHT provisions see 60.1 (Transfers between trusts).

75.3.5 CGT s.86 definition of settlor

TCGA Schedule 5 paras 7, 8 provide the CGT s.86 definition:

18 The IHT definition (unlike the other definitions) uses the non-exhaustive “includes”. Perhaps the drafter of the IHT provision had in mind a case where a person was the “settlor” of a settlement in the natural sense of the word but was not within the IHT definition. I cannot think of such a case.

19 See 75.24 (Purpose: minor settlor).

20 Why did the drafter use a different form of words, if they wanted the same result? Perhaps the reason is that “settlement” for IHT is sometimes narrower than settlement-arrangement. The drafter may have considered cases where it may have been argued that A is a settlor of a settlement-arrangement (providing property for the purpose of the *arrangement*) but A is not a settlor for IHT purposes (not providing for the purposes of the IHT-settlement). For instance in *Crossland v Hawkins* 39 TC 493 the taxpayer accepted that (if there were an arrangement) he would be the settlor of the “arrangement”; but he argued (unsuccessfully) that he was not the settlor of the classic settlement. To anticipate such arguments, perhaps, the drafter added the words “or in connection with”.

Meaning of “settlor”

7 For the purposes of section 86 and this Schedule, a person is a settlor in relation to a settlement if the settled property consists of or includes property originating from him.

Meaning of “originating”

8— (1) References in section 86 and this Schedule to property originating from a person are references to—

- (a) property provided by that person;
- (b) property representing property falling within para (a) above;
- (c) so much of any property representing both property falling within para (a) above and other property as, on a just apportionment, can be taken to represent property so falling.

...

(3) Where a person who is a settlor in relation to a settlement makes reciprocal arrangements with another person for the provision of property or income, for the purposes of this paragraph—

- (a) property or income provided by the other person in pursuance of the arrangements shall be treated as provided by the settlor, but
- (b) property or income provided by the settlor in pursuance of the arrangements shall be treated as provided by the other person (and not by the settlor).

...

(6) For the purposes of this paragraph references to property representing other property include references to property representing accumulated income from that other property.

(7) For the purposes of this paragraph property or income is provided by a person if it is provided directly or indirectly by the person.

The CGT s.86 definition does not have the words “for the purpose of the settlement”. Instead what is provided must be the “settled property”. This is slightly narrower. What is provided must necessarily be for the purpose of the settlement (or it would not become settled property).

Very similar to this definition is para 9(3) sch 5 TCGA, which sets out one of the trigger conditions which may bring a pre-1991 trust within the scope of s.86 TCGA:

The first condition is that on or after 19th March 1991 property or income is provided directly or indirectly for the purposes of the settlement;²¹

21 See 47.5.1 (First s.86 trigger condition: provision of property).

For completeness, para 9(3) continues with two exceptions (arm’s length transactions and administrative expenses) but that is not relevant for the purposes of this chapter.

HMRC guidance on para 9(3) (which is quite extensive) is therefore relevant to the definitions of settlor more generally.

75.3.6 *Person ceasing to be settlor*

Section 469 ITA provides for someone to cease to be a settlor:

Person ceasing to be a settlor

(1) A person (“S”) who is a settlor in relation to a settlement ceases to be so when the following condition is met.

(2) The condition is that—

- (a) no property of which S is the settlor²² is comprised in the settlement,
- (b) S has not undertaken to provide property (directly or indirectly) for the purposes of the settlement in the future, and
- (c) S has not made reciprocal arrangements with another person for that other person to enter into the settlement in the future.²³

This section is not expressed to apply only to the standard IT/CGT definition of settlor, so it is considered that it also applies to the settlement-arrangement definition.

This has no equivalent in the IHT definition of “settlor”, though (if it mattered) it might, perhaps, be implied.

The CG manual provides:

33245 Settlor: from 6 April 2006: Basic principles [October 2007]
[The Manual paraphrases s.469 ITA and continues:] For example A and B execute a deed of variation under which property left to them by their

22 Section 467(2) ITA provides a commonsense definition of this expression:

“In the Income Tax Acts (except where the context otherwise requires) a person is a settlor of property if—

(a) the property is settled property because of—

- (i) the person’s having made the settlement, or
- (ii) an event which leads to the person being treated by this Chapter as having made the settlement, or

(b) the property derives from settled property within paragraph (a).”

This expression is defined for the purposes of the IT Acts, but it is only used here in s.469 apart from the (unimportant) IoV provisions.

The CGT equivalent is s.68A(1)(b) TCGA.

23 The CGT equivalent is s.68A(6) TCGA.

father's will is resettled on behalf of their children. Broadly speaking half the income and capital is held for the children of A and the other half for the children of B. From the time the variation is made, A and B are settlors of the settlement (see CG 33248). In due course the share relating to A's children has been wholly distributed. In this case we should say that A was no longer a settlor.

75.3.7 *Relevance of case law and HMRC statements*

In keeping with the patchwork nature of UK tax law, the three definitions of settlor are based on a common framework but they each have slight differences to the others. The settlement-arrangement definition originated in 1936 and is the ancestor of the other definitions. In IHT there has been a little tidying up of the settlement-arrangement definition; the CGT s.86 definition is perhaps an attempt to extract its essence. There is a single concept underlying all the definitions which also represents the normal meaning of "settlor" in trust law.²⁴ In most cases the differences in wording between the definitions do not matter.

Cases on one statutory provision will generally be relevant to them all. Similarly, HMRC statements made in connection with one provision are generally applicable to the other provisions.

There is also a link between the concept of bounty which is a requirement of a settlement-arrangement and the concept of providing property for the purposes of a settlement, so cases discussing "settlement-arrangement" can also be relevant to the question of who is the settlor.²⁵

There are circumstances where a person is a settlor of a settlement-arrangement but not the settlor of the classic settlement but this is not because of differences in the definitions of "settlor": it is because of differences in the definitions of "settlement".²⁶

75.3.8 *Tainting*

It does not generally matter if a person provides a trivial amount of property to a trust (whether the settlor adding to the trust or a person

24 Contrast the definition in Article 1 Trusts (Jersey) Law 1984 ("a person who provides trust property or makes a testamentary disposition on trust or to a trust").

25 See 75.2.3 (Settlement-arrangement definition of "settlement").

26 See 75.9 (Assignment or surrender of equitable interest).

adding to a trust made by another.) But occasionally penal tax rules apply if even trivial value is added. This is known as “**tainting**” a trust.

The most common examples are:

- (1) A post-1991 provision of funds to a pre-1991 trust may lose the benefit of 1991 transitional relief for s.86 TCGA: Schedule 5 para 9(3).
- (2) A provisions of funds by a UK domiciled person will lose the benefit of 1998 transitional relief for s.87.²⁷
- (3) A provision of funds by a UK-linked person may lose a beneficial mixed resident trustee rule for trustee residence.²⁸

In these cases, the question of when funds are provided may also arise.

75.3.9 *Commentary*

Three definitions of “settlement” seems complicated, but there are material differences between them and each definition is appropriate in its own context. However, four definitions of “settlor” is extravagant, for there is little difference between them.

A rational tax system would have one standard definition of settlor, which would apply for all taxes. Until 2006 we had a number of definitions of settlor in different contexts, which had developed piecemeal as the tax system evolved. The FA 2006 introduced the standard IT/CGT definition but only applied it for some (not all) purposes of IT and CGT. It has therefore increased the number of definitions of “settlor” and made a complex situation rather more complex. This is particularly curious because the authors of the proposals were emphatic that the two former definitions of trustee residence (a CGT and an IT definition) should be replaced by a single definition. We live in bad times for UK tax policy, but eventually, perhaps, someone will tidy up this mess. It would not be very hard to introduce a single definition.

75.4 Gift from A to B followed by gift to trust by B

Suppose:

²⁷ See 48.20 (1998 transitional relief).

²⁸ See 4.7 (Trustee residence condition C).

- (1) A gives property to B unconditionally;²⁹ and
- (2) B gives the same³⁰ property to a trust.

Two “settlor” questions arise:³¹

- (1) In what circumstances does one say that the A is the settlor of the trust, having provided the property indirectly? That is, what is the meaning of “providing indirectly”?
- (2) If A is the settlor (having provided property indirectly), can one say that B is not a settlor, perhaps on the grounds that A is the “real” settlor?

One might expect to find guidance to these questions in *Hatton v IRC*.³² The facts were as follows:

- (1) Mrs Cole (“the mother”) made a settlement (“the first settlement”) conferring on Mrs Hatton (“the daughter”) a valuable equitable interest.
- (2) The daughter transferred her interest to a new settlement (“the second settlement”).

So this was in essence a case of a gift to B followed by gift to trust by B. It is important to note the background facts:

Once the first settlement had been executed ... it was a virtual certainty that the second would be made on the following day provided that [the mother] was then still living.³³

29 The position is different if the gift from A to B is made on terms which require B to transfer the property to the trust. In that case, clearly:

- (1) A would be the settlor,
- (2) B would not be a settlor.

It is also different if the gift from A to B is made by instrument of variation: see 96.30 (Trust made by instrument of variation).

30 Similar points arise if B gives other property (not the property given by A) if this is part of an arrangement between A and B.

31 Other issues may also arise. If A is a beneficiary of the trust, A’s gift to B may become a gift with reservation: see 59.6.2 (Gift from A to B followed by gift to trust by B). Note that even if A is a settlor of the discretionary trust, A has not made a chargeable transfer and no IHT is payable by A on the gift to the trust by B.

32 67 TC 759. For another aspect of this decision see 75.25 (Purpose: advisers and agents of settlor).

33 67 TC at 771. The Special Commissioners added:

[The daughter] was content to leave the details to [the mother’s advisers]. There was no real likelihood that she would reject the suggestion that she should make the second settlement when Mr Willcox [her adviser] put it to her. But nothing turns on that.

75.4.1 When is A an indirect settlor?

The Special Commissioners held:

[the mother] was a settlor of the second settlement having directly or indirectly provided the only funds which were subjected to it.³⁴

The judge held (67 TC at p.789):

The Special Commissioners ... held that [the mother] was properly to be treated as a settlor of the second settlement on the ground that, by making the first settlement, [the mother] was a person who had provided funds directly or indirectly for the purpose of or in connection with the second settlement; and so, in relation to the second settlement, fell within the definition [of settlor]. In my view, they were entitled to reach that conclusion on the facts.

Hatton represents a relatively clear case of providing funds indirectly because the two gifts (from A to B, and from B to the trust) were part of an arrangement and it was a “virtual certainty” that the second gift would follow the first. Are these essential requirements? The Special Commissioners, and the court, did not address this important point.

It is clearly not sufficient that B’s funds are historically derived from A. Something more is required, but what? It might be said that all paraphrases are suspect and the court must return to the words of the statute. But when the words are so vague, some gloss is necessary to avoid hopeless uncertainty. At first sight, the concept of a “clean break” seems a useful one for determining whether property is provided indirectly. That is, if there is a clean break between A’s gift to B, and B’s gift to the trust, A has not provided property indirectly. But “clean break” is only a metaphor which itself needs elucidation. It is not much more than a colourful label.

It is suggested that A is a settlor (having provided property indirectly) only if (like *Hatton*) there is an arrangement under which:

- (1) A makes a gift of property to B, and intends that B should promptly make the gift to the trust.
- (2) B gives the property to a trust in fulfilment of the wishes of A.

34 At p.768G.

(3) It is virtually certain that B's gift will be made.

Of course, this formulation will not solve all problems, since the factual questions may arise as to whether there is an "arrangement", what is A's intention and whether B makes a gift in fulfilment of A's wishes. But this is probably the best that can be done. It is consistent with the "conscious association" comments in *Fitzwilliam*.³⁵ It might be said that this is too narrow a test and it favours the taxpayer as it allows tax planning of the kind considered in 75.33 (Planning to create trust with foreign domiciled settlor). However, the planning is not all that easy! No looser test can be applied without considerable uncertainty. Moreover (see below), the consequences of A being an indirect settlor is that B is not a settlor; this strongly suggests a narrower test is appropriate for if B is a genuinely independent agent B should be the settlor.

75.4.2 *If A is indirect settlor, is B also the settlor?*

In *Hatton* the Special Commissioners held that the daughter did not provide the funds for the second settlement.³⁶ The reason was, it appears, that the mother had provided the funds indirectly and this excluded the possibility that the daughter had provided them.

The judge held on the appeal that it was immaterial (for the purposes of the IHT provisions being considered) whether the daughter was also a settlor of the settlement.³⁷ The judge did suggest that the daughter might also be a settlor.³⁸

Approaching the matter as one of principle, untrammelled by authority, it is respectfully suggested that the Special Commissioners' approach is to be preferred. While as a matter of logic it is possible for A to provide property indirectly, and B to provide it directly, the legislation is framed on the basis that trust property can have only one "provider". This is clearly the case for the IT and CGT settlement provisions.³⁹ It is suggested

35 See 75.6 (Appointment from old trust to B followed by gift to new trust by B).

36 Page 768H. Confusingly, the Special Commissioners also say that the daughter *was* a settlor within the IHT definition. The reason, presumably, is that, although she did not provide property, she was a person by whom the second settlement was made. But nothing turns on that.

37 Page 791B.

38 The conclusion that the mother was a settlor "did not lead, necessarily, to the further conclusion that [the daughter] was not also a settlor". See p.791B.

39 See 76.4.1 (Direct and indirect settlors).

that the IHT definition should be construed in the same way. If property is provided indirectly by A, it should not be regarded as provided by B at all.

A similar issue arises in relation to the definition of capital payment (receipt of a benefit directly or indirectly from the trustees) where a similar analysis applies.⁴⁰

75.4.3 HMRC views

TSEM 4300 [December 2011] provides:

Indirect gift of shares from parent

Mr J owns 60 of the 100 issued £1 shares in J Limited. Mr J is the sole company director and is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but *shortly afterwards* she gifted them to her grandchildren. The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in *Jones v Garnett*). ...

This is essentially a case of:

- (1) A gift from Mr J to the grandmother; and
- (2) A gift from the grandmother to the grandchildren.

The Manual's tax analysis is as follows:

The true settlor here is Mr J *rather than the children's grandmother*. Section 629 [ITTOIA] therefore applies and attributes the dividends received by the children to Mr J for tax purposes.

The words in italics suggest that HMRC accept the views set out above: if J is the settlor then the grandmother is not.

Similarly Helpsheet 270 (Trusts and settlements – income treated as the settlor's) 2010/11:

Example 1

Sue gives £1,000 to her brother Roger to put into trust for her children.

40 See 48.7.1 (Indirect receipt from trustees).

Roger sets up a trust with this money and although he is the named settlor in the trust deed, Sue is treated as the real settlor because it was she who indirectly provided (or settled) the funds

It is clearly assumed that Roger is not the settlor.

Similarly, the CG manual provides:

CG33246 - Basic terms of trust law as applied to CGT: settlor: from 6 April 2006: anti-avoidance [1 Jan 2010]

... If A and B enter into 'reciprocal arrangements' under which A provides property for B's settlement in return for B providing property for A's settlement, then B, *and not A*, is the settlor of B's settlement, and vice versa.

A reciprocal settlement is just another way of providing property indirectly.

75.5 Trust created by B at request of A

Suppose that a man owing a debt of honour or of gratitude to a friend, without any legal obligation proposed to discharge it by paying £1,000 to the friend, and that the latter asks that the sum be paid not to him but to the trustees of a settlement, which is done. The payment of the money to the trustees would obviously be a provision of funds for the settlement. On a purely objective view the payer could be said to have made that provision, but I think that the friend should properly be regarded as the person making this provision. It would be just as if the money had been first paid to him and then paid by him to the trustees. *The payer would have acted at his behest.*⁴¹

This *obiter* comment is right if (as Buckley LJ assumes) the payer agrees (albeit without legal obligation) to make the payment at the direction of the friend so that the friend has *de facto* (though not *de jure*) power of disposition of the funds. The situation is different if a father proposed to make a gift to his son, and the son merely *asks* that the sum be paid to trustees of a settlement for himself and his family. For a father will feel moral obligations to his grandchildren as well as to his son; the father has no (even non-binding) obligation to make a payment to his son; the son

41 *Mills v IRC* 49 TC at 387 (Buckley LJ).

has no *de facto* power of disposition over the funds; in such circumstances the father (not the son) is the settlor. The son has not provided funds even indirectly.

If A asks B to transfer a nominal sum as an initial trust fund, and B does so, not because B wishes to benefit the beneficiaries by the payment, but because A has asked B to, as a favour to A, then applying this principle, A is the (indirect) settlor.

75.6 Appointment from old trust to B followed by gift to new trust by B

Fitzwilliam v IRC 67 TC 614 concerned an arrangement under which:

- (1) Trustees of a will trust exercised their power of appointment (“step 3”) to confer a valuable equitable interest on Lady Hastings.
- (2) Lady Hastings transferred this interest to a new trust shortly afterwards (“step 5”).

So this was a relatively simple case of an appointment from the will trust to B followed by a gift to a new trust by B. The question was who was the settlor of the new trust: Lady Hastings or the testator of the will trust (or both). Lord Keith said:

The argument for the Crown is that, by virtue of the appointment contained in step 3, property was provided to Lady Hastings directly or indirectly for the purpose of or in connection with the settlement which Lady Hastings later made under step 5. The person who provided that property is said to be Earl Fitzwilliam [the testator], because the appointment by the trustees falls to be read back into his will, under the principle of *Muir v Muir* [1943] AC 468 and *Pilkington v IRC* [1964] AC 612. These cases decided that for the purposes of the Scottish rule against successive liferents and the English rule against perpetuities the exercise of a power of appointment must be written into the instrument creating the power. Earl Fitzwilliam is, therefore, to be treated as the settlor so far as concerns the trust purposes contained in the appointment made by his trustees under step 3, but he cannot reasonably be regarded as having provided property directly or indirectly for the purpose of or in connection with the settlement made by Lady Hastings under step 5. The words “for the purpose of or in connection with” connote that there must *at least be a conscious association of the provider of the funds with the settlement in question*. It is clearly not sufficient that the settled funds should historically have been derived from the provider of them. If it were otherwise anyone who gave funds unconditionally to another

which that other later settled would fall to be treated as the settlor or as a settlor of the funds. It is clear that in the present situation there cannot possibly have been any conscious association of Earl Fitzwilliam with Lady Hastings' settlement.

(*Fitzwilliam v IRC* 67 TC at 732, emphasis added)

It seems therefore that if:

- (1) a trust ("trust A") exists and A is its settlor;
- (2) there is an arrangement under which:
 - (a) the trustees of trust A appoint trust property to B;
 - (b) B gives the property to a separate trust ("trust B");

B will be the settlor of trust B, and A will not be a settlor, unless the creation of trust B is envisaged by A at the time that trust A is made.

The "conscious association" test is an understandable and generally helpful paraphrase of the statutory words (though of course it does not solve much as the question may arise as to what is a "conscious association". Further, Lord Keith said there must *at least* be a conscious association, suggesting that it is a necessary, but may not be a sufficient, condition). The application of the conscious association test in the context of an appointment followed by a gift really is surprising, but the House of Lords have spoken. The matter is for most practical purposes ended – unless and until the Supreme Court speaks again. For implications for tax planning, see 75.33 (Planning to create settlement with foreign domiciled settlor).

75.7 Transfer from trust A to trust B by exercise of trustees' power

This section considers the general sense of settlor. Special rules apply for IHT: see 60.1 (Transfers between trusts – Introduction).

75.7.1 Transfer from trust A to new trust created by trustees

Suppose:

- (1) Trustees of a trust made by A ("Trust A") have power to transfer to a new trust.
- (2) The trustees transfer the trust fund to new trustees to hold on the terms of a newly created trust, Trust B. All the funds of Trust B are derived from Trust A.

Who is the settlor (in the general sense) of Trust B? The trustees of

Trust A cannot be the “settlor” as they have merely exercised a fiduciary power. So either A is the settlor or there is no settlor.⁴² The answer is that A is the settlor of Trust B. In *Eilbeck v Rawling* 54 TC 101:

- (1) a Gibraltar settlement (“Trust A”) made by “Settlor A” held £600,000;
- (2) a Jersey settlement (“Trust B”) made by “Settlor B” held £100;
- (3) £315,000 was transferred from Trust A to Trust B by exercise of the trustees’ powers.

Buckley LJ said at p.161:

The donee of a special power of appointment is charged with the exercise of a personal discretion which he cannot delegate. When he exercises that discretion in making an appointment, he acts as the delegate of the settlor. What the donee does in exercise of a special power of appointment is done vicariously by the settlor. It is also settled law of long standing that, for the purposes of the rule against perpetuities, when a special power is exercised, the limitations created under it are to be written into the instrument which created the power. This association of the interests arising under an appointment in the exercise of a special power with the settlement conferring that power is not, in my opinion, confined to the rule against perpetuities. If one asks who was the settlor of the £315,000 appointed by the appointment of 27 March 1975, the only possible answer is [Settlor A] the settlor of the £600,000 comprised in the Gibraltar settlement [Trust A]. The taxpayer’s brother [Settlor B] did not settle⁴³ the £315,000; he settled only £100. The Gibraltar trustee [the trustees of Trust A] did not settle the £315,000; it was not the Gibraltar trustee’s to settle, and making the appointment the Gibraltar trustee was only exercising a fiduciary power conferred on him by the Gibraltar settlor [Settlor A], whose delegate he was as donee of the power. The exercise of the power had, in my opinion, precisely the same effect as if the Gibraltar trustee had appointed the £315,000 in favour of the Jersey trustee to be held upon trusts identical with the trusts of the Jersey settlement [Trust B] but set out in extenso in the appointment without reference to the Jersey settlement. If the appointment had taken that form, there could, I think, be no doubt that the trusts so appointed would be trusts taking effect under the Gibraltar settlement.

42 If at the time of the creation of Trust A, the transfer to Trust B is already in contemplation, then A is the settlor of Trust B. It is here assumed that the transfer was not in contemplation at the time of the creation of Trust A.

43 Buckley is using the word “settle” as a paraphrase of the statutory word “provide”.

The House of Lords approved this reasoning on appeal.⁴⁴
 HMRC agree. The CG Manual provides:

33241 Settlor: Up to 5 April 2006 [October 2007]

Where trustees exercise a special power of appointment, or power of advancement, in such a way as to create a new settlement, see CG33800+, the settlor of the new settlement is the person who was the settlor of the old one. See, for example, *Pilkington v IRC*, 40 TC 416, p.442⁴⁵ and *Chinn v Collins*, 54 TC 311, p.351H.

The same point is made again at 34802.

It is considered that the same applies to a transfer for less than full consideration made in exercise of trustees dispositive powers, eg an interest-free loan from trust A to trust B.

75.7.2 Transfer from trust A to existing trust made by B

Suppose:

- (1) A transfers property (“A’s fund”) to a trust (“trust A”). The trustees have the standard power to transfer property to another trust.
- (2) B transfers property (“B’s fund”) to a separate trust (“trust B”).
- (3) The trustees of trust A transfer A’s fund to trust B.

Trust B now has two settlors: A has provided A’s fund indirectly, and B has provided B’s fund directly.

44 It may be objected that this is not consistent with *Fitzwilliam*: see 75.6 (Appointment from old trust to B followed by gift to new trust by B). There is no “conscious association” between A and Trust B. However, *Fitzwilliam* was a case where the Court found that an individual beneficiary who assigned an asset to the new trust was the “settlor”. The beneficiary displaced the testator from being a settlor by their independent act. There is no equivalent here.

The alternative conclusion that Trust B has no settlor for general tax purposes would have the result, attractive to taxpayers but absurd, that A might escape CGT on trust income and gains under the settlement provisions. The property in Trust B could be excluded property, as one could not say that “the settlor” was domiciled in the UK at the time that the settlement was made! That can hardly be right.

If (which is doubtful) further authority is needed, see *Trennary v West* [2005] STC 214 at [49].

45 [Author’s note] See 75.12.2 (Power of advancement).

75.7.3 IT and CGT rule

Section 470 ITA provides:⁴⁶

Transfers between settlements

(1) Section 471 applies in relation to a transfer of property⁴⁷ from the trustees of one settlement (“settlement 1”) to the trustees of another settlement (“settlement 2”) if the transfer—

- (a) is not for full consideration,
- (b) is not by way of a bargain made at arm’s length, and
- (c) is not excluded by subsection (2).

Section 470(2) ITA sets out three exceptions:

A transfer of property is excluded for the purposes of subsection (1) if—

- (a) it occurs only because of the assignment by a beneficiary under settlement 1 of an interest in that settlement to the trustees of settlement 2,
- (b) it occurs only because of the exercise of a general power of appointment, or
- (c) section 473(4) applies in relation to it.⁴⁸

In short, s.741 applies on a transfer between trusts by exercise of a trustee’s power.

This takes us to s.471 ITA:

Identification of settlor following transfer covered by section 470

(1) If there is a transfer of property in relation to which this section applies, then the following subsections apply for the purposes of the

46 The CGT equivalent is s.68B TCGA.

47 The expression “transfer of property” is defined in s.470(3) ITA:

“(3) In this section ‘transfer of property’ means—

- (a) a disposal of property by the trustees of settlement 1, and
- (b) the acquisition by the trustees of settlement 2 of—
 - (i) property disposed of by the trustees of settlement 1, or
 - (ii) property created by the disposal.
- (4) For the purposes of subsection (3) there is an acquisition or disposal of property if there would be an acquisition or disposal of property for the purposes of TCGA 1992.”

48 For this exception see (IT and CGT – IoVs from 6 April 2006).

Income Tax Acts, except so far as, in those Acts, the context otherwise requires.

(2) The settlor (or each settlor) of the property disposed of by the trustees of settlement 1 (“the disposed property”) is treated from the time of the disposal as having made settlement 2.

(3) If there is more than one settlor of the disposed property, each of them is treated in relation to settlement 2 as the settlor of a proportionate part of the property acquired by the trustees of settlement 2 on the disposal.

(4) So far as the disposed property—

(a) was provided for the purposes of settlement 1, or

(b) was derived from property so provided,

the property acquired by the trustees of settlement 2 on the disposal is treated from the time of the disposal as having been provided for the purposes of settlement 2.

(5) If as a result of subsection (4), property (“the transferred property”) is treated as having been provided for the purposes of settlement 2—

(a) the person who provided the disposed property, or the property from which it was derived, for the purposes of settlement 1 is treated as having provided the transferred property for the purposes of settlement 2, and

(b) if more than one person provided the disposed property, or the property from which it was derived, for the purposes of settlement 1, each of them is treated as having provided a proportionate part of the transferred property for the purposes of settlement 2.

This applies for IT and CGT purposes. But it is considered that this only codifies the general law position, so there is no difference here between IT/CGT and IHT. HMRC agree. The CG Manual provides:

33247 Settlor: from 6 April 2006: Transfer between settlements
[January 2010]

This section is concerned with the situation where the trustees of Settlement 1 [“S1”] transfer property to the trustees of Settlement 2 [“S2”], including cases where property is created by Settlement 1 on behalf of Settlement 2, such as the grant of a lease by the trustees of Settlement 1 to the trustees of Settlement 2.

Unless the transfer is for full consideration, or by way of a bargain at arm’s length Section 68B TCGA applies. The reason for having these two alternatives is to allow for the possibility that Settlement 1 and Settlement 2 are connected persons (so that any transaction between

them is not at arm's length by virtue of Section 18 TCGA 1992), and Settlement 1 sells an asset to Settlement 2 for its full market value. In such a case we do not want section 18 to cause section 68B to apply.

It is not unusual for trustees to appoint or advance assets to a newly created trust. See for example *Hart v Briscoe* 52 TC 53. Courts have said, see for example *Chinn v Collins* 54 TC 311, that the trustees in such a situation are perfecting the settlor's original gift in settlement. Therefore in such a case section 68B has the effect that it is the original settlor of Settlement 1 who is the settlor of Settlement 2. The property is treated as having been provided for the purposes of Settlement 2.

However there are three specific cases which are excluded.

[1] A beneficiary, B, of Settlement 1 may transfer to Settlement 2 his interest in Settlement 1. In this case it is B who is the settlor (or an additional settlor) of Settlement 2.

[2] Under the terms of Settlement 1 D may have a general power of appointment. If so D is the settlor (or additional settlor) of Settlement 2.

[3] If section 68C(6) applies (see CG 33248).

It is not considered that section 68B effected any change in the law.

75.8 Disclaimer

TSEM states at 1840:

1840 Deed of disclaimer [April 2012]

The person disclaiming is not a "settlor" within [the settlement-arrangement definition] (TSEM4120). Subsequent trusts that result from the disclaimer retain their original settlor.

A disclaimer, if possible, may be preferable to a surrender or assignment. The distinction between a disclaimer and a surrender/assignment is therefore important. This raises questions of trust law which cannot be fully discussed here, but for a broad outline see TSEM para 1840:

1840 Deed of disclaimer [April 2012]

A person uses a true disclaimer to refuse a gift due under a trust. Effectively the person steps aside. This allows subsequent provisions of the trust to take effect.

A disclaimer can relate to

- capital
- income
- both.

A disclaimer has retrospective effect. It applies from the date that the entitlement arose. There may be a lapse of time between the entitlement arising and the disclaimer. This is not conclusive evidence that the deed cannot be a true disclaimer. ...

The person making a disclaimer may still benefit from another part of the trust income or capital. This is irrelevant. If that person seeks to impose new trusts, the deed is not a disclaimer. It is an assignment (TSEM1845).

It sometimes happens that a will creates a trust but a spouse or child has forced heirship rights (in Scotland known as legitim and elsewhere, legitime) which if exercised would override the trust. A disclaimer of those rights does not make the spouse or child a settlor. This is consistent with the policy of s.142 IHTA which provides that the disclaimer is (in short) not subject to IHT. The same would apply in England to a person who chose not to exercise rights under the Inheritance (Provision for Family and Dependants) Act 1975.

75.9 Assignment or surrender of equitable interest

A person who assigns an equitable interest under Trust A to Trust B is the settlor of Trust B but does not of course become the settlor of Trust A.

If a person surrenders an equitable interest under Trust A there is no “Trust B”. In that case, that person is the settlor for the settlement-arrangement definition⁴⁹ so far as they have provided the income, but they are not a settlor of Trust A for the IHT definition, the CGT s.86 definition, or the standard IT/CGT definition. Similarly if a person assigns an equitable interest to another individual.

HMRC agree: CG Manual provides:

33242 Settlor: Up to 5 April 2006 [October 2007]

Normally the same person was the settlor for both Income Tax and CGT. But this is not the case where a person has assigned a right to income. Such an assignment could not have affected the identity of the settlor for CGT purposes.

The CG Manual also provides:

⁴⁹ *IRC v Buchanan* 37 TC 362.

34801. Meaning of settlor [October 2007]

In general if HMRC Trusts Head Office Bootle or Edinburgh, or their predecessors Financial Intermediaries and Claims Office or Claims Branch have advised or ruled that a person is the settlor for Part XV ICTA 1988 or Part 5 Chapter 5 ITTOIA2005 purposes then the same person should be regarded as the settlor for the purposes of these provisions. In exceptional cases, eg the assignment of a life interest, a person may have settled a right to income under an existing settlement without thereby creating a new settlement for CGT purposes. Although the Income Tax Settlements Legislation may apply as regards that income, that person is not thereby a settlor of the main settlement.

The position is similar to a variation of trust by beneficiaries; see below.

75.10 Variation or resettlement by beneficiaries**75.10.1 Trust law background**

Beneficiaries who are adult and absolutely entitled to trust property⁵⁰ may:

- (1) create a new settlement (“a resettlement”) or
- (2) (with the consent of the trustees) vary the terms of an existing settlement (“a variation”).⁵¹

50 If there are minor and unborn beneficiaries, a variation can similarly be made with the consent of the court under the VTA 1958.

51 See s.1(1) VTA 1958 which assumes that beneficiaries have power to vary a trust: “Where property...is held on trusts arising...under any will, settlement or other disposition, the court may if it thinks fit by order approve on behalf of [unborn or unascertained beneficiaries] any arrangement ... *varying* or revoking all or any of the trusts, or enlarging the powers of the trustees of managing or administering any of the property subject to the trusts. ...”

The Court only approves on behalf of unborn or unascertained beneficiaries, and adult beneficiaries can make a variation without the approval of the Court. See *Re Holt* [1969] 1 Ch 100 at p.120:

“Under an arrangement approved by the court [under the Variation of Trusts Act 1958] the trusts may be brought wholly to an end. On the other hand, they may be varied; and there is no limit, other than the discretion of the court and the agreement of the parties, to the variation which may be made. Any variation owes its authority not to anything in the initial settlement but to the statute and the consent of the adults coming, as it were, *ab extra*. *This certainly seems to be so in any case not within the Act where a variation or resettlement is made under the doctrine of Saunders v Vautier by all the adults joining together*; and I cannot see

The distinction between a variation and a resettlement is crucial, but careful drafting will normally achieve whichever is desired.

HMRC agree. The CG Manual provides:

Variations of trusts

37880. By agreement [February 2006]

If all the beneficiaries of the trust are 18 or over and agree, they may bring it to an end and share out between themselves (and others) the trust property. (There is an exception to this rule in Scotland in that a person with an alimentary liferent cannot exercise consent in this way.) In these circumstances there is a deemed disposal by the trustees of the whole of the settled property under TCGA 1992, s.71(1).

37881. [February 2006]

It is also possible, with the consent of the trustees, to vary the terms of the trust. There are all kinds of variation possible. Some property may pass absolutely to beneficiaries or existing separate settlements. Clearly this must involve disposals under TCGA 1992, s. 71(1). Other property is held on the same trusts as before and/or on different trusts.

37882. [February 2006]

In such circumstances it is necessary to consider, in the light of the principles set out in the preceding paragraphs and also CG33290-33304, what the correct analysis is. The alternatives are

- [1] mere variation of the terms of the existing settlement
- [2] continuation of the old settlement as regards part of the property, with the remainder being held on one or more new settlements
- [3] termination of the old settlement in its entirety being replaced by one or more new settlements. This last is an unlikely analysis unless a significant part of the property is being distributed absolutely. In such circumstances it may be helpful to refer to *Ewart v Taylor* where one reason for the court holding that a new settlement had come into existence was that it was part of a scheme for winding up the old settlement. See 57 TC 401 at 468, Section I.

...

37883. Under Variation of Trusts Act [February 2006]

The trusts of an existing settlement may be varied (in particular when the interests of unborn or minor beneficiaries are involved) by way of an Arrangement agreed between those parties of full age and approved by a Court Order under the Variation of Trusts Act 1958 (in Scotland Section 1 Trusts (Scotland) Act 1961) on behalf of those unable to give consent.

37884. [February 2006]

If so the principles of CG37880 –CG37882 apply. The degree of variation may exceptionally be such as to involve the termination of the original settlement in

any real difference in principle in a case where the court exercises its jurisdiction on behalf of the infants under the Act of 1958.”

whole or in part and the creation of a new settlement. The fact that the courts may only consent to variation of the trusts does not prevent this. (If so then consideration must be given to the identity of the settlor, see CG37900.) A variation may also cause a beneficiary to become absolutely entitled to assets as against the trustees. ...

37886. Instrument of variation of will or intestacy [October 2010]

It is quite common for instruments of variation of wills or intestacies to be executed within two years of the testator's (or intestate's) death. In England & Wales the usual form of the instrument is a deed. The general guidance is at IHTM35011+ and guidance on CGT at CG31600+. If an instrument of variation creates a continuing trust which replaces absolute interests in the original will, and there is no statement of intent in the deed or before 1 August 2002 no election, under Section 62(7) TCGA 1992, ... the person who gives up the absolute interest in favour of the trustees is to be regarded as the settlor for the purposes of the annual exempt amount and Section 77 TCGA 1992. His personal position is considered at CG32000+, assuming the variation is gratuitous.

This is clearly correct. The Manual then turns to our situation:

37887. [October 2007]

If, however, in a case where there is no such election or statement of intent, the will or intestacy provided for property to be held subject to trusts, and these trusts are varied or replaced by the deed of variation, then there are two questions to be answered.

- a. Is there a new separate settlement?
- b. If so, who is the settlor of that settlement?

If there are only minor variations clearly there is no new settlement and the deceased remains the settlor. Minor variations would include for instance changes in the administrative powers of the trustees, or the provision of an ultimate gift over, that is, a provision saying to whom the property is to pass if the trusts fail, or the appropriation of property to particular funds within the settlement. Otherwise it is necessary to determine whether there is a new settlement in accordance with the principles explained at CG37882, and see CG37889. If there is a new settlement then the identity of the settlor should be determined in accordance with CG37900. ...

37889. [October 2007]

One situation which is quite common⁵² is where there is a life interest trust for the spouse of the deceased. For Inheritance Tax reasons this is partly varied so that there is a discretionary trust up to the amount of the

52 [Author's footnote] This ceased to be common after the introduction of transferrable nil rate bands in 2007, but that does not affect the points being made.

Inheritance Tax nil rate band. In such a case, where the spouse continues to be a beneficiary of the new discretionary trust, it would often be appropriate to regard this, except for the purposes of Inheritance Tax, as little more than a cosmetic arrangement, particularly if the broad intention is that the bulk of the income should be paid to the spouse. So this would be regarded for Capital Gains Tax purposes as a variation of the original will trust, and not as giving rise to a new separate settlement. The deceased remains the settlor.

Para 37889 is correct though not for the reason given (which does not bear any examination) but for the reason given in 75.9 (Assignment or surrender of equitable interest).

75.10.2 *Tax consequences of resettlement*

A resettlement (unlike a variation) involves a disposal for CGT, and may lose the benefit of IHT relief for transitional serial interests. It also changes the settlor. The CG Manual provides:

37900. Identity of settlor [February 2006]

Where there is a variation of a trust of the kind described in CG37880+ [variation by beneficiaries] it is necessary to identify the settlor. If the conclusion taken is that there are no new settlements then for CGT purposes the identity of the settlor is unaffected. However if in effect interests in income have passed from one person to another, the former may well be the settlor of an arrangement for Income Tax purposes.

37901. Identity of settlor [October 2007]

If however one or more new settlements have come into existence, then the settlors of those settlements are one or more of the parties to the variation. The question should be tackled on a practical basis by determining where each beneficiary's share has gone. ...

37903. Example [October 2010]

Under a settlement made by X, A and B are each entitled to half the income. On A's death his son P gets half absolutely. On B's death her daughter Q gets half absolutely. The values of their respective interests are, say:

A's life interest	£60,000 [30% total value]
P's remainder	£40,000 [20% total value]
B's life interest	£75,000 [37.5% total value]
Q's remainder	£25,000 [12.5% total value]

Under the variation, which is considered to terminate the old settlement:

A takes 30% of the property.

20% goes to a new accumulation and maintenance settlement for P's children.

B takes 25% of the property.

The rest [25%] is held for Q for life with remainder to Q's son R. P should be regarded as the settlor, for the purpose of the annual exempt amount, of the accumulation and maintenance settlement, because this is how his share has been dealt with.

B and Q equally should be regarded as the settlors of the other settlement. ...

B and Q are joint settlors: see 76.1 (Trusts with two settlors).

75.11 Variation under Variation of Trusts Act 1958

Where a court approves a variation of trust on behalf of a minor beneficiary, under the VTA, it is considered that the minor beneficiary does not become a settlor. The reason is that the court in giving its approval does not merely act on behalf of the minor: the court has a wider role.⁵³ The position is analogous to trustees exercising a power of advancement.⁵⁴ But HMRC do not agree. CG Manual para 37902 provides:

Minor as settlor [August 2007]

It is considered that where a court has given consent on behalf of a minor, that minor can be a settlor. The authority lies in *Yates v Starkey*, 32 TC 38, where it was held that a person could be a settlor under compulsion, and *Mills v IRC*, 49 TC 367, where it was held that a minor with very little involvement in the transactions could be the settlor because she provided the property.

Neither of these cases compels a Court to accept the HMRC view.

53 *Re Steed* [1960] 1 Ch 407; *Re Remnant* [1970] Ch 560. This view is consistent with the fact that where a Court approves a variation on behalf of an unborn beneficiary, that beneficiary clearly does not become a settlor. Further consideration is needed if foreign trust laws apply.

54 See 69.12.2 (Power of advancement).

75.12 Exercise of power of appointment or advancement

75.12.1 *Special power of appointment*

The exercise of a special power of appointment does not make the appointor a settlor.⁵⁵

75.12.2 *Power of advancement*

Where trustees have a power of advancement (that is, a power to apply trust property for the benefit of a beneficiary) they may use that power to transfer trust property to a new trust.⁵⁶ The consent of that beneficiary is not needed and therefore that beneficiary is not the settlor of the new trusts.

Pilkington v IRC concerned a proposal to transfer property to a new settlement by exercise of a power of advancement in favour of a Miss Penelope. Lord Radcliffe said:

When one asks what person can be regarded as the settlor of Miss Penelope's proposed settlement, I do not see how it is possible to say that she is herself or that the trustees are. She is the passive recipient of the benefit extracted for her from the original trusts; the trustees are merely exercising a fiduciary power in arranging for the desired limitations. It is not their property that constitutes the funds of Miss Penelope's settlement: it is the property subject to trusts by the will of the testator and passed over into the new settlement through the instrumentality of a power which by Statute is made appendant to those trusts.⁵⁷

HMRC agree: see CG 33241 set out in 75.7 (Transfer from trust A to trust B by exercise of trustees' power).

⁵⁵ This is self-evident, but if authority is needed, see the quotations set out in 75.7.1 (Transfer from trust A to new trust created by trustees).

⁵⁶ See Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010) para 11.11 (Power of advancement used to create new trusts).

⁵⁷ *Pilkington v IRC* 40 TC 416 at p.442.

75.12.3 General power of appointment

A general power of appointment (whether testamentary or not) may be used:

- (1) in a manner which creates a new settlement, or
- (2) in a manner which merely varies an existing settlement.⁵⁸

In case (1) the appointor is the settlor of the new settlement. In case (2) it is considered that the appointor is not in principle the settlor, but is in the same position as a person who consents to the exercise of a power.

75.13 Consent to exercise of power

A trust sometimes provides that the trustees can only exercise a power of appointment with the consent of a particular beneficiary (typically the life tenant). If the power of consent is wholly personal (ie proprietary),⁵⁹ this raises some intriguing questions. A concise exposition is difficult because of the variety of possible circumstances and taxes. In outline the position is as follows:

- (1) A gratuitous consent to an appointment which terminates the consensor's interest in trust income probably makes the consensor the settlor, for the purposes of the settlement-arrangement definition. The consensor has provided income for the purpose of the settlement-arrangement because they have effectively given up their right to the income by their consent.⁶⁰

58 The position is analogous to 75.10 (Variation or resettlement by beneficiaries).

59 On this terminology and powers of consent generally see Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010) para 7.33 (Nature of powers of consent).

60 The position is analogous to a person who assigns or surrenders their life interest. The analogy is not exact. In one case the arrangement consists of the assignment alone. In the other case the arrangement consists of the consent and the exercise of the trustees' power of appointment. So in a sense there is an arrangement with two settlors: (i) the consensor and (ii) the (actual) settlor of the classic settlement who conferred the power of appointment on the trustees. But HMRC (or the actual settlor) may plausibly argue that the consensor (not the actual settlor) is taxable under the Settlement Provisions in these circumstances. They may take support from *Braybrooke v Att-Gen* 9 HLC 149 at p.165, accessible on www.commonlii.org. (A case on the Succession Duty Act 1853 whose provisions are analogous to the settlement provisions. Since Succession Duty was only abolished in 1949, the drafter of the original settlement provisions doubtless had it in mind.) The ground of the decision in *Braybrooke* was:

- (2) For similar reasons a gratuitous consent to an appointment which terminates the consensor's contingent interest in trust capital probably makes the consensor the settlor, for the purposes of standard IT/CGT and IHT⁶¹ definitions from the time that the contingency is satisfied. The consensor has provided capital for the purposes of the settlement because they have effectively given up their right to the capital by virtue of their consent.
- (3) By contrast, the giving of the consent to an appointment does not make the consensor a settlor (for any purpose) if:
- (a) the consensor had no interest in the trust immediately before giving the consent; or
 - (b) the appointment leaves the interest of the consensor in the trust unaffected.⁶²
- In these cases the consensor has not provided any property by their consent.
- (4) The giving of a consent is probably not a disposal for CGT⁶³ of:
- (a) the right to consent (even if it is extinguished); or
 - (b) the consensor's interest in the trust (even if that is extinguished).

“that, although the estate of the son arose under a joint power of appointment made by his father and himself, and although therefore the father was in a sense one of the settlors, yet he was not a settlor from whom the interest or any part of the interest of the son, in his character of successor, was derived. And the decision shews that, in order to ascertain who is the settlor ‘from whom the interest of the successor is derived,’ we must inquire, not who are the parties by whose conveyance the estate has been created, but who is the conveying party out of whose estate the interest in question has been derived.” See *Att-Gen. v Charlton* (1877) 2 Ex. D. 398 at p.417.

- 61 It is arguable that the consensor is not a settlor for IHT because the power of consent is a settlement power and so not property for IHT purposes. It is the old question of how far one carries through the deeming provisions. The better view is that one does not carry the deeming that far.
- 62 This is fairly clear from first principles, but some support can be found in two cases. In *Braybrooke* (see above fn) a tenant in tail exercised his power to dispose of the lands entailed, with the consent of the protector. The protector was not the creator of the disposition: “It cannot be argued that a person whose consent is apparently necessary to a disposition, makes that disposition.” In *Mills v IRC* the father's consent was apparently thought necessary for Hayley Mills to enter into the arrangements: see 49 TC 367 at p.403. This did not prevent Hayley being a settlor.
- 63 Under general principles or by virtue of s.24 TCGA (extinction of an asset constituting a disposal).

The contrary is arguable but it would not normally matter.⁶⁴

- (5) The giving of the consent is probably not a “disposal” for the purposes of the gift with reservation rule⁶⁵ and indeed it is likely that the power of consent is a “settlement power” and so not property for IHT: see s.272 IHTA.

HMRC do not appear to take any of these points at present; but there is cause for caution. The practical conclusion is that it is in principle better not to make a power of appointment subject to the consent of the life tenant (or any other beneficiary).

75.14 Provision of property for company held by trust

HMRC take the view that provision of property to a company wholly owned by a trust is in principle provision of property for the purpose of the trust, and so makes the provider a settlor. SP 5/92 provides:

16 The condition in TCGA Sch 5 para 9(3)⁶⁶ may be satisfied where property or income is provided to a company in which the trustees are participators.⁶⁷

64 It will matter if the usual CGT exemption on the disposal of an equitable interest does not apply (eg offshore trusts). It could matter if the conditions of TCGA Sch. 4A are satisfied, but that would be unusual.

65 See *Baird v Baird* [1990] 2 AC 548 at 557 [the exercise of a power of appointment] “disposes of no property of the appointor”. HMRC agreed. The former CTO Advanced Instruction Manual E.91 provided:

“Nor should you regard the giving of a consent by a limited owner to the exercise of the power of advancement as the making of a disposition.”

This passage does not seem to be in the current IHT Manual. This is one of a number of important statements (deliberately?) culled in the transition to the IHT Manual. But there is no reason to think that HMRC have changed their view.

66 The condition is that property is provided directly or indirectly for the purposes of the settlement; see 75.3.5 (CGT s.86 definition of settlor).

67 The SP continues with an exception:

“Where, however, the transaction is carried out with the sole object of leaving funds within the company for the company’s purposes and it can be shown that any indirect benefit to the trust is merely incidental to that object, the transaction is disregarded for the purposes of para 9(3).

17 Examples of transactions which may be so disregarded are—

- where another shareholder waives an entitlement to all or part of a dividend; or
- where a director restricts withdrawals of remuneration voted, in order to assist the company’s cash flow, and no payments are made, directly or

This is supported by *obiter dicta* in *Crossland v Hawkins* 39 TC at p.506 followed by Goulding J in *IRC v Mills* 49 TC at p.337. It is correct for the standard IT/CGT definition, the settlement-arrangement definition and the IHT definition.

However, for the CGT s.86 definition, the question is not whether a person has provided property for the purpose of the settlement. The question is whether a person has provided *settled* property. So if a person only provides property for a company held by a trust, the person is not the settlor under this definition.⁶⁸

75.14.1 *Transactions with wholly owned companies*

SP 5/92 para 18 provides:

In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are outside the scope of TCGA 1992 Sch 5 para 9(3).⁶⁹

This is right. There can be no element of bounty so a wholly owned company cannot “provide” property to its owner, just as shareholders cannot “provide” property to their company.

75.15 **Provision of services**

75.15.1 *Services envisaged when settlement made*

In two cases (the “film star” cases):

- (1) A friendly third party created a trust.
- (2) The trust acquired a company.⁷⁰

indirectly, to the trustees as a result of this. All relevant factors will be considered in determining whether it is appropriate to apply this practice in a particular case.”

68 This view, expressed in earlier editions of this work, was subsequently adopted by *Coombes v HMRC* [2008] STC 2984.

69 The SP sets out a commonsense definition of “wholly owned” and continues with a qualification:

“This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage.”

70 The company was UK resident, so transfer of assets abroad issues did not arise.

- (3) Well-known actors (Jack Hawkins, Hayley Mills) entered into a contract to provide services to the company at a substantial undervalue, and the company duly received what the earlier case described as the “enviable salary” for his work as artiste.
- (4) The company made profits and paid dividends to the trustees.

In both cases:

- (1) the classic trust created at step (1) was clearly a settlement-arrangement by itself;
- (2) Steps (1) - (4) together constituted an arrangement which was a settlement-arrangement.⁷¹

The question was who was the settlor. It was held that the actor was the settlor.⁷²

Viscount Dilhorne in *IRC v Mills* 49 TC at 408 considered two situations:

- (1) Employees of a company held by trustees contribute by their labour to the profits of the company, and so increase the company’s dividends and the income of the settlement.
- (2) A stockbroker who gives well founded advice to trustees of a settlement increases the value and income of the settlement.

One might have said that these were not settlors because they provide no bounty but what if they do act with gratuitous intent? For instance, suppose the stockbroker chose not to charge for his services? Viscount Dilhorne rightly⁷³ did not rely on the bounty point:

The difference between those cases, on the one hand, and *Crossland v Hawkins* and this case [*Mills*], on the other, is that in *Crossland v Hawkins* and in this case funds which ordinarily would have been received by Mr. Hawkins and by Miss Mills for their acting were diverted to companies which were channels for their transmission to trustees. It is not the provision of services but of funds which comes within the section.

71 This was disputed in *Crossland v Hawkins* on the (factually doubtful) grounds that the step (3) was not contemplated at the time of step (2) but the CA rightly found against that on the facts.

72 *Crossland v Hawkins* 37 TC 493 approved *Jones v Garnett* 78 TC 1; *IRC v Mills* 49 TC 367. More accurately, the actor was one of the settlors but the contribution by the third party who created the trust was ignored as insignificant.

73 It is still a principle (notwithstanding wide exceptions) that trustees should act gratuitously, but no-one suggests that trustees thereby become settlors.

The distinction is not between provision of services and provision of funds, because the actors did provide services; the key feature is the provision of services which yields funds *which would otherwise be received by the provider*. It is considered that the test should be whether one can identify funds which:

- (1) would (in the absence of the settlement) have been received by the individual, but
- (2) were diverted to the trust.

The settlement provisions do not apply unless one can *identify* the funds which are provided by the settlor. In Viscount Dilhorne's examples of employees and stockbrokers, this condition is not met.

Suppose:

- (1) an individual has an opportunity of purchasing land, or shares in a private company;
- (2) they allow the trust to take up the offer by advising the trust and not pursuing the opportunity themselves;
- (3) had the trust not taken up the offer they would have done so.

In this case the individual is a settlor if one can distinguish the return from the trust's investment from the profit from the advice. A clear case being where the trust only invested a nominal amount in the project. But if the trust provides substantial funds for the development, one cannot identify any money as coming specifically from the adviser. One should not apportion the profits between the adviser's contribution (advice) and the settlement's contribution (finance). It is impractical to do so as there is no sufficiently clear answer to how the apportionment should be made. If that is right, the *Mills* and *Hawkins* line of cases is effectively restricted to "one-man companies" with no substantial capital (as was the case in both *Mills* and *Hawkins*). It appears that HMRC agree. The TSE Manual provides:

TSEM4300 - Settlement For Minor Child Who Is Neither Married Nor In A Civil Partnership [December 2011]

...Indirect gift of shares from parent

Mr J owns 60 of the 100 issued £1 shares in J Limited. Mr J is the sole company director *and* is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but shortly afterwards she gifted them to her grandchildren.

The HMRC analysis is as follows:

The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in *Jones v Garnett*). The true settlor here is Mr J rather than the children's grandmother. Section 629 [ITTOIA] therefore applies and attributes the dividends received by the children to Mr J for tax purposes.

(Emphasis added.) The example derives from Tax Bulletin 64 Example 9 where HMRC expand on the analysis:

Since Mr. J

[1] is the person *responsible for making the company's profits* and

[2] decides on the level of dividends paid,⁷⁴

it is Mr. J who is the settlor rather than the children's grandmother.

The legislation could apply in a similar way if the children had subscribed for shares themselves with money received from a third party or even from bank accounts in their own names.

Suppose a stockbroker who is well disposed to the trust (perhaps a trustee or a beneficiary or a parent of beneficiaries) gives free investment advice to trustees to invest in quoted (easily obtainable) investments, and the trust profits from acting on their advice. There is an element of bounty but the stockbroker has not provided funds and is not the settlor. One cannot identify funds which would ordinarily have been received by the stockbroker. On the contrary, the stockbroker was free (if he or she had the resources) to make the same investments as those recommended to the trustees. This is a clear case.

Suppose a property developer who is well disposed to the trust gives free property market advice to trustees, and the trustees use their own funds invest in land successfully because of the advice. The developer has not provided property and is not the settlor. One cannot identify funds which would ordinarily have been received by them.

Suppose a director of a company held on trust seems reasonably well remunerated but HMRC argue that their remuneration is insufficient. Even if HMRC are right, the individual is not the settlor, because one cannot identify funds which would have been received by the director.

74 It is hard to see the relevance of [2].

Mills and *Hawkins* were cases where it was intended from the outset that the settlor should provide services at an undervalue. In those cases the settlor contracted to provide services. In *Jones v Garnett*, it was likewise anticipated from the outset that Mr. Jones would provide his services at an undervalue. Here there was no contract, but that made no difference:

It was the *expectation* of such events and the hope of profit which, together with the absence of any risk attached to the children's ownership of the shares, gives the "element of bounty" to the arrangement constituted by the allotment. What subsequently actually happened was not part of the arrangement.⁷⁵

75.15.2 *Services not envisaged when settlement made*

What is the position if:

- (1) a company is up and running and well established;
- (2) an individual ("T") *subsequently* provides services at an undervalue (to benefit shareholders).

The question may arise in three circumstances:

- (1) shares may be held by a spouse or minor children;
- (2) shares may be held by a trust:
 - (a) of which some other person is the settlor;
 - (b) of which T is the settlor.

In case (1) there is (or may be) no settlement-arrangement before T begins to provide T's services. The question is whether a settlement-arrangement comes into existence.

In case (2) there is a settlement already. The question in 2(a) is whether T becomes the settlor. In case 2(b) T is already the settlor. The question is whether they provide further property (which might taint the settlement).⁷⁶ Of course, all the questions are related and they come down to the same question: does T gratuitously provide property for the purposes of the settlement?⁷⁷ It is suggested that the answer is, strictly,

⁷⁵ *Jones v Garnett* 78 TC 1 at [22]. Likewise Lord Walker at [50]:

"A plan which existed when the structure was established."

⁷⁶ See 75.3.8 (Tainting).

⁷⁷ See *Jones v Garnett* 78 TC 1 at [83]:

"... the definition of settlement in [s.620 ITTOIA] and of the settlor in [s.620 ITTOIA] are closely connected, and it appears to me to be perfectly proper to rely upon observations as to what can be taken into account when considering who is

yes, if one can identify the funds that T has provided: see above. But it appears that HMRC do not take the point. In *Jones v Garnett*, Lord Neuberger envisages a case (1) situation (share held by Mr and Mrs Jones but no settlement-arrangement):

On that basis, I find it also very hard to see why Mr Jones's decision each year not to take anything like a full salary, thereby increasing substantially the dividend payable to his wife, does not involve an element of bounty. Neither [Counsel for HMRC] (no doubt reflecting the Revenue's policy) nor [Counsel for the taxpayer] (as it would involve his clients losing on this issue) was prepared to adopt this approach. Although it appears to me to be logically attractive, it would be inconvenient in practice, in that it would be difficult to administer, and it might well produce unfair, even arbitrary, results.⁷⁸

75.15.3 *Services provided for full consideration*

In *Mills* in the Court of Appeal, Buckley LJ noted other circumstances why a person who provides services to a trust or company may not be providing property:

- (1) A person does not provide funds for a settlement if:
 - (a) they are entirely ignorant of the settlement (which would generally be the case for employees of a company held by a trust), or
 - (b) they do not have the view of advancing the interests of the trust.
- (2) A person does not provide funds for a settlement if they do so for reward in the ordinary course of their professional business.

No-one would suggest that these persons providing their services to the company or trust should be regarded as settlors and the only question is why not? It is suggested that the correct reason is because there is no element of bounty.

75.15.4 *What is the arrangement?*

In *Jones v Garnett* Mr. Jones worked for a company held equally by himself and his wife. Lord Hoffmann gave "settlement-arrangement" a

a settlor, when deciding whether there is a settlement."

⁷⁸ See *Jones v Garnett* 78 TC 1 at [89].

somewhat limited meaning:

[HMRC's] second argument is that the transfer of the share [to Mrs Jones] was not the whole of the arrangement, which included the provision of services by Mr Jones, the dividend policy and so forth. Again, I think that would be inconsistent with the argument by which the revenue have, in my opinion, succeeded on the first point. The transfer of the share was in my opinion the essence of the arrangement. The expectation of other future events [i.e. provision of services by Mr Jones] gave that transfer the necessary element of bounty but the events themselves did not form part of the arrangement.⁷⁹

75.16 Interest-free or back-to-back loan

A person who lends interest-free (or on favourable terms) is in principle⁸⁰ a settlor. HMRC agree. SP 5/92 para 22 provides:

A loan made, directly or indirectly to a relevant settlement after 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is regarded as a provision of funds for the purposes of TCGA 1992 Sch 5 para 9(3). This is the case whether the loan is for a fixed period or repayable on demand.⁸¹

79 78 TC 1 at [29]. Lord Walker said the same at [54] stressing the absence of a contract of employment.

80 It is assumed that the loan is made with gratuitous intent. The position is different if the loan (though on favourable terms) is made without any gratuitous intent, which is conceivable, for instance, in the case of a loan by a life tenant.

81 As to whether an interest-free loan makes the trust a settlor-interested trust, see 26.3.3 (Beneficial loan or guarantee).

SP 5/92 para 19-21 deal with the CGT implications of loans to trusts before 19 March 1991. This is not now important but is set out here for completeness:

“19 A fixed-period loan made, directly or indirectly, to a relevant settlement prior to 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is, generally, regarded as a provision of property in pursuance of a liability incurred before 19 March 1991, provided the loan remains outstanding on the same terms. As such, it falls within the terms of TCGA 1992 Sch 5 para 9(3)(b) and the first condition set out in para 9(3) is not met.

20 There would, however, be a direct or indirect provision of property for the purposes of the settlement where a fixed-period loan falls to be repaid after 18 March 1991 but repayment is not made and so becomes a repayable on demand loan.

Likewise Tax Bulletin 8 provides:

Our view is that a person making a loan to the trustees on better than commercial terms is ... a settlor and transferor and within the provisions of [Chapter 5 Part 5 ITTOIA] or [s.727 ITA].

The same applies to a back-to-back loan. In *IRC v Wachtel*:

- (1) the trustees borrowed from a bank, and
- (2) an individual guaranteed the trustee loan and deposited funds equal to the trustee borrowing with the bank. The trustees paid only 1% interest on their loan.

The individual was rightly held to be a settlor.⁸²

While a person who lends interest-free is in principle a settlor, what is the property provided, and when is it provided? It is considered that the property provided is the money lent, and property derived from that. It is provided at the time that the interest-free loan is made. If the money lent is spent on expenses, there is no property derived from the loan and the lender ceases to be a settlor.

Suppose:

- (1) A settlor while abroad lends money to a trust with mixed resident trustees. The loan is interest-free and repayable on demand.
- (2) The settlor later comes to the UK and deliberately leaves the loan outstanding.⁸³

HMRC may contend that the settlor has provided property by deliberately leaving the loan outstanding but it is tentatively suggested that this is not the case: what is the “property” which the settlor has provided? It is not

21 An extra-statutory concession D41 ... sets out the position in the case of non-commercial, repayable on demand, loans for the purposes of applying TCGA 1992 Sch 5 para 9(3).”

82 46 TC 543 at p.555.

83 If the loan is to a company held by the trust, then even if the settlor does provide property by leaving the loan outstanding it did not matter for the CGT rules before 6 April 2007 as the settlor has not provided settled property (so long as company assets are not transferred to the trust). But from 2007 this argument does not apply because the question is not whether the settlor provides settled property, it is whether the settlor provides property for the purposes of the settlement. See 75.14 (Provision of property for company held by trust).

the interest foregone, as that does not exist.⁸⁴ Thus the trust continues to be non-resident.

75.17 Indemnities

SP 5/92 provides:

34 An indemnity given by the new trustees to retiring trustees is not considered as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).

This is right because there is no element of bounty. (Also the benefit of the indemnity is held by the *former* trustees so it is not property comprised in the settlement.)

Other types of indemnity are considered in light of the facts of a particular case.

The standard form indemnity given by a beneficiary who receives trust capital is not the provision of funds, it is made in consideration of the trustees not exercising their trustee lien.

75.18 Guarantees

SP 5/92 continues:

35 The giving of a guarantee is regarded as an indirect provision of funds under the terms of TCGA 1992 Sch 5 para 9(3).⁸⁵

84 Contrast *Re Marshall* [1965] NZLR 851 where the New Zealand Court of Appeal held that where interest on a debt is payable if demanded, but the right to call for payment is not exercised, there is no gift of the interest foregone. Also see 72.6 ("Provide").

85 SP 5/92 goes on to deal with the CGT implications of guarantees to trusts before 19 March 1991. This is not now important but is set out here for completeness:
 "Payment of an obligation under a guarantee given before 9 March 1991 is, in general, regarded as a payment in pursuance of a liability incurred before 19 March 1991 and within para 9(3)(b). This may not, however, apply where-
 - the contingent liability under the guarantee cannot be quantified with a sufficient degree of accuracy, eg where the guarantee is open-ended or the contingency is remote; or

It is not possible to identify the funds which a guarantor provides. So while a guarantee (if made with gratuitous intent) may amount to tainting a trust, it does not give rise to a charge under s.624 or s.86, unless there is not merely a guarantee but also a back to back arrangement of the kind found in *Wachtel*.

75.19 Repayment of loan made by trustees

SP 5/92 para 23 provides:

The repayment of any loan made, directly or indirectly, to any person by the trustees is not generally regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3). This does not, however, apply where

- [1] more is repaid than is due under the original terms of the loan or,
- [2] in the case of loans made after 19 March 1991, where the interest charged under the terms of the loan exceeds a commercial rate.

This is clearly correct (apart from point [2] but in practice that is not likely to arise). There is no element of bounty.

75.20 Sale or share issue at undervalue

A sale to a trust at a conscious undervalue is the provision of property and the seller is a settlor. Likewise a person is a settlor if they hold all the shares in a company and consent to the company issuing new shares to a trust at a conscious undervalue.⁸⁶ The TSE Manual provides:

TSEM4120 - Definition Of Settlor [December 2011]:

Example 1

X is the director and owns all the 150 issued ordinary £1 shares of X Ltd. X Ltd issues 100 new ordinary £1 shares which are acquired for £100 by the X Family Trust. The trust has been established for the benefit of X's family by his father, X Senior, who created the trust by settling cash of £100. Shortly after the issue of the new shares, a dividend of £100 per share is declared and paid and the trust receives

- the guarantor does not take reasonable steps to pursue his rights against the debtor.”

⁸⁶ This proposition is self evident but if authority is needed, see *Crossland v Hawkins* 39 TC 493 at pp.506–507.

dividends of £10,000. X controlled the arrangement for the issue of the shares at par followed by the dividend. X is therefore the true settlor of the settlement from which income of £10,000 arose. The original settlement of £100 by X Senior is usually disregarded on de minimis grounds.

A sale at market value is not the provision of property. HMRC agree. The CG Manual provides:

34891. Multiple settlors [April 2010]

Where property is acquired as a result of an arms length transaction the third party is not to be regarded as providing property for the purposes of the settlement, thereby becoming a settlor. Instead the property is regarded as representing the cash previously held.

A bargain at arm's length (at a price regarded by both sides as market value) is not the provision of property even if the parties have mistaken the value and the property is sold at an undervalue.⁸⁷

If values are uncertain the solution may be a market value adjustment clause. SP 5/92 provides:

13 Solely for the purposes of TCGA 1992 Sch 5 para 9(3)(a), a provision in the document governing the transaction for an appropriate adjustment to the consideration where the value agreed by the Revenue differs from the original consideration arrived at by an independent valuer and specified in the sale document is, in general, regarded as falling within the terms of the above definition of an arm's length transaction. The arm's length value of the transaction is to be determined in accordance with the principles set out in para 12 above. This will usually correspond to the value for capital gains tax purposes except, for example, where TCGA 1992 s 19 would apply.

14 It would also be necessary for the terms of the contract to provide for compensating interest at a commercial rate to be paid in either direction once the arm's length value is determined. For this purpose, the official rate of interest for ICTA 1988 s 160 purposes will usually be regarded as equivalent to a commercial rate of interest, although a different rate may be accepted as so equivalent if the circumstances of a particular

⁸⁷ This is consistent with the principles that a settlement-arrangement must have an element of bounty: see 75.2.3 (Settlement-arrangement definition of "settlement"), and that arm's length sales confer no "benefit": see 29.4.1 (Arm's length transaction).

case warrant this treatment.

15 This practice is, however, subject to the consideration passing on sale being realistically based, ie on a third party valuation by a qualified valuer, all the other terms of the transaction being at arm's length and the compensating interest being timeously paid. The position in a particular case depends on all the facts and circumstances.

75.21 Failure to exercise right of reimbursement

SP 5/92 para 24 provides:

- [1] Failure, by or on behalf of any relevant person, to exercise statutory rights to reimbursement e.g. under [s.646 ITTOIA], may be regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).⁸⁸

Point [1] only applies to a failure to exercise rights which is both deliberate and gratuitous (ie with an element of bounty). This is the reason for the exceptional case which para 24 then addresses:

- [2] The settlement could remain outside the terms of para 9(3) where the exercise of the right to reimbursement is unsuccessful, provided it could be shown that there had been a genuine attempt to enforce rights to reimbursement.

The exception is stingily worded (here as in several other points, SP 5/92

88 For completeness, Tax Bulletin 8 correctly qualifies this:

"Para 24 of the Statement of Practice [5/92] points out that failure to exercise statutory rights to reimbursement against non-resident trustees may be regarded as the provision of funds for the purposes of the settlement under para 9(3) of Schedule 5, TCGA 1992. This will not, however, apply in respect of a settlor's non-exercise of statutory rights to reimbursement out of the trust income account where the settlor has a life interest in all the assets of the trust. In such circumstances, failure to exercise the right to reimbursement would, effectively, not add funds to the trust since all income would, in any case, either be paid to the settlor under the terms of the trust deed or be used to meet expenses chargeable against income.

But even in such cases the settlor may have rights to reimbursement out of the trust capital account, eg in relation to accrued income charges, which if not exercised will be regarded as the provision of funds."

For other issues relating to reimbursement, see 29.4.10 (Reimbursement of tax under statutory indemnity) and 29.21 (Relevant income used to pay expenses)

gives the impression that it was intended to make life as difficult as possible for offshore trusts). It is not necessary to show “a genuine attempt to enforce rights to reimbursement”. It is sufficient to show that such rights are not enforceable, or that a decision not to obtain reimbursement is a commercial one or that enforcement would not be cost-effective.

75.22 Payment of administrative expenses

SP 5/92 specifies two cases where payment of capital expenses out of a life tenant’s income does not make the life tenant a settlor:

29 An expense on capital account paid out of trust income is not treated as a provision of income by a beneficiary for the purposes of TCGA 1992 Sch 5 para 9(3) provided that either—

[1] the trust deed permits payment of capital expenses from income and the beneficiary is entitled only to net income after such payments;⁸⁹
or

[2] the trustees borrow money from the income account which is subsequently restored, along with interest over the period of the loan. The appropriate rate of interest is considered to be that which a Court of Equity would order on the replacement of trust income.⁹⁰

89 For completeness, Tax Bulletin 8 expands on this:

“Para 29 of the Statement of Practice concerns, inter alia, trust deeds which permit capital expenses to be paid out of the income account. Neither the existence nor the exercise of this power would cause the trust to lose an interest in possession status for IHT purposes.”

90 For completeness, Tax Bulletin 8 expands on this. The bulletin sets out para 29[2] and continues:

“The appropriate rate of interest is considered to be equal to the rate payable on the Basic Account administered by the Court Office of the Supreme Courts of Justice. Such interest will constitute taxable income in the hands of the income beneficiary (either when it is credited in the case of a life tenant, or when it is paid or applied for the benefit of a discretionary beneficiary). It may also be treated as ‘relevant income’ for [s.731 ITA] purposes.

Income beneficiaries will only be liable on the net amount of income available after deduction of any income which has been applied to meet expenses on capital account. Only when the income account is made good will that income become taxable on the beneficiary.”

The question, more analytically, is whether the life tenant has provided intentional and gratuitous benefit to the trust. Clearly, in the two cases mentioned, the life tenant does not do this and so does not become a settlor.

Where a trust has no income, someone (typically a beneficiary) may voluntarily pay the expenses. In this case there may also be no gratuitous element. It may be in the beneficiary's interest to make the payment. Subject to that, the SP tacitly suggests that the intentional and gratuitous payment of trustees' expenses *does* make the payor a settlor. But this is not correct. First, in some cases, the payment of expenses may be a provision of services to the trust rather than the provision of property.⁹¹ Secondly, if a non-settlor pays trustees expenses, or pays a sum to the trustees which are immediately consumed in payment of expenses "no property of which S is the settlor" is comprised in the settlement, so the payor of expenses is not the settlor.⁹²

HMRC agree. The STEP/CIOT questions⁹³ consider the IHT problems that arise when:

- (1) a person (after 2006) adds property to an estate IP trust and
- (2) the property is spent on trust expenses.

Question 37(2)

... if an addition of cash was made which was then spent by the trustees and HMRC regard this addition as within the relevant property regime (eg an addition to pay expenses or improve properties), how would the proportion of the settled property subject to the new rules be calculated? Would a valuation be needed of the property before and after the improvement?

HMRC Answer

If a payment of cash was made and then spent immediately on, say, a tax liability or another administration expense, then that short period will be the extent of its time as "relevant property" and there will be no question of having to consider what proportion of the existing settled property represents it going forward.

If a payment was made towards the improvement of a property, then this would appear to require "with" and "without" valuations when there is

91 See 75.15 (Provision of services).

92 See 75.3.6 (Person ceasing to be settlor).

93 Accessible at <http://www.step.org/pdf/3October2008versionSch20FA2006letter.pdf>

a chargeable event.⁹⁴

*Note added 6 August 2008: HMRC have indicated that they are actively reconsidering this response with a view to producing further guidance shortly.*⁹⁵

75.23 Trust retains life tenant's income

SP 5/92 para 33 provides:

A life tenant is not regarded as having provided income or property for the purposes of the settlement merely because there is an administrative delay in paying out the income that has vested in that beneficiary. If, however, the beneficiary directs the trustees to retain this income on the terms of the settlement, this is regarded as a provision of funds within TCGA 1992 Sch 5 para 9(3).

This is fairly obvious.

75.24 Purpose: minor settlor

In *Mills v IRC* 49 TC 367, the funds of the settlement were derived from acting work of Hayley Mills, then aged 14. She was supposedly⁹⁶ unaware

94 The question goes on to ask: In HMRC's view, do all subsequent post Budget additions need to be kept physically segregated? HMRC say no, which is just as well as money spent can hardly be regarded as segregated:

"It is clearly up to trustees to decide whether to keep post-Budget additions separate from the rest of the trust fund. We think that it may be sensible to do so—or, at least, to keep good records of additions. (The trustees of discretionary trusts already need to do this, of course, in order for the 10-year anniversary value of each addition to be identified correctly in light of the relief in s 66(2) IHTA for property that has not been 'relevant property' for a full 10-year period)."

95 No such guidance has been produced, presumably the issues have been filed as too difficult.

96 The actual evidence recorded that she was "not very interested", which is not the same. The case should have been decided on the simple factual basis that Hayley Mills *did* intend to provide funds for the purpose of the settlement, even if she did not trouble to think very much about it. The judge made this point at p.378:

"The case was put on a factual assumption that Hayley Mills did not subjectively intend to provide funds. This was factually incorrect, and not even conceivable, because it was completely inconsistent with the view that the contract she signed was valid. If Hayley had not thought about it at all, the contract which she signed would be void under the rule *non est factum*."

of the settlement to which at her direction her earnings were paid. The argument was that she had not provided funds for the *purpose* of the settlement. Viscount Dilhorne said:

- [1] I do not agree with Lord Denning MR that the word “purpose” in this section connotes a mental element or with Buckley LJ that there must be a motivating intention. I do not myself think that it assists to consider whether the question he posed is to be answered objectively or subjectively. I do not consider it incumbent, in order to establish that a person is a settlor as having provided funds for the purpose of a settlement, to show that there was any element of *mens rea*.
- [2] Where it is shown that funds have been provided for a settlement a very strong inference is to be drawn that they were provided for that purpose,
- [3] an inference which will be rebutted if it is established that they were provided for another purpose.

It is difficult to see what point this sloppy passage is trying to make.⁹⁷ It is not that purpose is irrelevant: see [3]. That seems to contradict the sentence at [1], but it is obviously right. “Purpose” and “provide” inescapably connote a mental element. The best explanation of this passage is that it is considering the situation like the facts in *Mills* where Hayley Mills *did* intend to provide funds for the purpose of her trust (as shown by her signing a contract which had that effect) but she took almost no interest in the matter. That is, the comment is restricted to the facts of that particular case.

The legislation sometimes refers to purpose of the settlement (in the singular) and sometimes purposes (in the plural) but there is no distinction.⁹⁸

75.25 Purpose: advisers and agents of settlor⁹⁹

It is considered that in ascertaining purpose one may have regard not only

97 Dilhorne, who took a third in law, was “not in the highest flight of English lawyers” (DNB).

98 “The statute seems to me to use the word ‘purpose’ and ‘purposes’ indiscriminately”; *Crossland v Hawkins* 39 TC 493 at p.507.

99 See 31.15 (Purpose: advisors and agents of transferor).

to the mind of the settlor, but also the mind of those acting for him or her. Agency principles may be applied. See *Crossland v Hawkins* 39 TC 439 at p.508:

The mere fact that he did not concern himself with some of the ‘steps’ in the legal machinery involved does not make it any the less his arrangement within the section. A man does not avoid the incidence of [the income tax settlement provisions] by merely being absent from and leaving to his solicitors and accountants certain parts of the legal machinery if he is aware of the proposals for an ‘arrangement’ or a settlement and actively forwards them by personally carrying out and assisting in the vital parts in which his performance and co-operation are necessary. Nor can he avoid liability by merely giving his solicitors carte blanche to effect some scheme for the benefit of his family and refusing to concern himself with its precise form.

On this analysis many apparent difficulties fall away.

In *Mills*, the father acted on behalf of the daughter.¹⁰⁰ The purpose of the father was to provide the daughter’s funds for the purpose of the settlement. That suffices to make the daughter the settlor if she had no purpose of her own. Likewise in *Hatton*¹⁰¹ the purposes of Mrs Cole’s attorney was to provide funds for the settlement, and this purpose should be regarded as the purpose of Mrs Cole.

75.26 Settlement made by court for person lacking capacity

The court has power to make a settlement for a person lacking capacity “on his behalf”. It is considered that the person lacking capacity is the settlor.¹⁰² The Court of Protection agree:

Trusts set up by an order of the Court of Protection will take the form of a settlement, with the patient being the settlor. ... in the case of trusts set up by an order of the Court of Protection, provision can be made for

100 See 49 TC 367 at p.382 and p.385.

101 See 75.4 (Gift from A to B followed by gift to trust by B).

102 Sections 16, 18(h) Mental Capacity Act 2005. The tax position is the same for settlements made under the Mental Health Act 1983.

income to be accumulated, if appropriate, for the lifetime of the patient as section 164(1)(a) Law of Property Act 1925 applies.¹⁰³

75.27 Settlement made by compromise of claim of minor or person lacking capacity

Parties to litigation may make a settlement under a compromise on behalf of a claimant who is a minor or person lacking capacity.¹⁰⁴ The Court of Protection say:

An award of damages can be settled, by consent, in trust for the patient as part of the terms of compromise of the action between the plaintiff and the defendant, with the approval of the High Court, in circumstances where the award never becomes the absolute property of the patient.

Trusts set up following an order of the High Court can only be done in the form of a declaration of trust by the trustees The period over which income can be accumulated by the trustees is restricted to 21 years.¹⁰⁵

This assumes that the minor/person lacking capacity is not a settlor for trust law purposes. The first sentence (which is probably the basis for the conclusion) is unsound. While the *award* never becomes the absolute property of the patient, the award represents the claim, which is the property of the claimant.¹⁰⁶

But HMRC accept in practice that there is no settlor.¹⁰⁷ It would follow that the trust fund is excluded property, eg if it is an AUT, an OEIC, or not UK situate.

103 Court of Protection Practice Note, 15 November 1996, para 4.

107 Private correspondence.

75.28 Trust under Criminal Injuries Compensation Scheme

An award under the Criminal Injuries Compensation Scheme may be transferred to a trust.¹⁰⁸ The applicant under the Criminal Injuries Compensation Scheme is not the settlor of such a trust.¹⁰⁹ That is consistent with the position under the VTA. However, HMRC have apparently expressed the view that the claimant is the settlor, and in practice this view may well favour the taxpayer (as s.624 ITTOIA reduces the IT charge if the settlor is not a higher rate taxpayer).

75.29 Trust made in divorce settlement

In *Harvey v Sivyver* 58 TC 569 a separated husband made payments to his minor children under a deed of separation. The payments were not voluntary; they were pursuant to an obligation to maintain the children and contained no element of bounty.¹¹⁰ The taxpayer argued that for this reason that there was no “settlement” within the settlement-arrangement definition. The argument was rejected and the taxpayer was held to be the settlor. The judge tentatively reconciled his decision with the bounty requirement because “the natural relationship between parent and young child was one of such deep affection and concern that there must always be an element of bounty by the parent, even when the provision is on the face of things made under compulsion”.¹¹¹ This is romantic nonsense, as any family lawyer will attest. The better way to justify the decision is to note that the bounty requirement is not statutory, and not to be applied unthinkingly. The Court of Appeal noted in an earlier case, “if the

108 Para 50 Criminal Injuries Compensation Scheme 2001.

109 The drafter of Part 2 Chapter 4 FA 2005 assumed this, though one needs to dig a little into the provisions to see why this is so:

- (1) CICS trusts are within the provisions: s. 35 FA 2005.
- (2) Settlor-interested trusts are outside the scope of the provisions: see s.25(3) and 30 FA 2005. (In relation to CGT this was clearer before s. 77 TCGA was repealed in 2008).
- (3) The claimant under the CICS would always be a beneficiary, so if he was the settlor the trust would be settlor-interested.

So the drafter must have assumed that the claimant was not the settlor, or the provisions made no sense.

110 58 TC 569 at p.572.

111 58 TC 569 at p.577.

legislature had set a limit to the extent to which a taxpayer may divest himself for tax purposes of income by voluntary means, I see no reason why the same principle should not be applied to income of which the taxpayer is compulsorily divested".¹¹² So this is simply an exception to the bounty requirement. On this analysis, *Harvey v Sivyer* was correctly decided, though not for the right reasons.

75.30 Trust made by instrument of variation

75.30.1 *The usual situation*

Suppose:

- (1) B inherits property absolutely from the estate of a deceased, D.
- (2) B varies the will so as to create a settlement of that property; and s.142 IHTA and s.62 TCGA apply.

B is clearly the settlor in the general sense: see 75.4 (Gift from A to B followed by gift to trust by B).

75.30.2 *Settlor for IHT*

For inheritance tax purposes, the effect of s.142 IHTA is probably to override the general sense; the settlor is D and not B. HMRC agree. (The contrary view is arguable but it will not usually be in the taxpayer's interest to argue it.) IHT Manual provides:

**35151 - IHT implications of an Instrument of Variation:
effect of coming within s.142 [February 2006]**

When a variation satisfies the requirements of s.142(1) IHTA and there is a valid election or, on or after 1 August 2002, a valid statement of intent

- the variation is not a transfer of value, and
- the IHTA applies as if the deceased had effected the variation

Consequently, for example ...

- [1] if a variation sets up a non-interest in possession trust, the deceased is treated as the settlor, and
- [2] the GWR rules in s.102 FA 1986 cannot apply to a disposition which is accepted as a variation within s.142(1) IHTA.

¹¹² *Yates v Starkey* 32 TC 38 at p.53.

This is because the effect of s.142(1) IHTA is that the deceased is treated as the donor.

Point [1] states that the deceased is the settlor if a variation sets up a non-interest in possession trust. The same rule must in principle apply if the variation sets up an interest in possession trust (but with the added complication of the s.80 IHTA rules, if applicable). Likewise Tax Bulletin 15 provides:

Our view is that, as the relevant IHT legislation differs from the CGT provisions which were considered in *Marshall v Kerr*, that decision has no application to IHT. Variations which meet all the statutory conditions will continue to be treated for IHT purposes as having been made by the deceased.

75.30.3 *Settlor for IT: variation before 6 April 2006*

B is the settlor for IT purposes in the case of variations made before 6 April 2006.

75.30.4 *Settlor for CGT: variation before 6 April 2006*

The identity of the settlor for CGT is an unresolved question.¹¹³ The issue is whether s.62 TCGA overrides the general sense of settlor. The House of Lords held in *Marshall v Kerr* 67 TC 56 that for CGT the settlor is the beneficiary making the variation, not the testator. However, the reasoning relies entirely on the fact that the beneficiary settled a share in an unadministered estate. The position is therefore different if:

- (1) the IOV is made after administration of the estate has been completed;
or
 - (2) the will or intestacy is governed by the law of a jurisdiction (such as a civil law jurisdiction) which (unlike common law jurisdictions) does not recognise personal representatives and an administration period;
or
 - (3) the disposition varied is a joint tenancy (because, as in (2), there is no administration period in respect of property passing by survivorship).
- In the following discussion cases (1) to (3) above are called “non-

113 See “*Marshall v Kerr* Revisited”, *Taxation*, 3 May 2001 (Christopher Sokol QC).

administration” cases, and cases where the estate was in administration (like *Marshall v Kerr*) are called “administration cases”.

The reasoning of the House of Lords suggests that the law is as follows:

- (1) In administration cases; if the IOV is made before 31 July 1978 (the passing of the FA 1978) the beneficiary is the settlor: that, at least, is clear from *Marshall v Kerr*.
- (2) In non-administration cases whenever the IOV is made, it is considered that the deceased is the settlor.
- (3) In administration cases after 31 July 1978, it is suggested that the deceased is the settlor. *Marshall v Kerr* has been reversed by (what is now) s.62(9) TCGA: this subsection was not in force in the tax years relevant to *Marshall v Kerr*.

To distinguish between administration and non-administration cases is highly anomalous, so this view of s.62(9) TCGA brings welcome consistency into the law. It also brings CGT into line with IHT.

It appears to be the HMRC view that the beneficiary is the settlor even in cases (2) and (3). CG Manual 37888 [August 2007] provides:

The Revenue had always considered that Section 62(7) was concerned with computational matters only, and had no effect on the question whether a new settlement had come into existence or the identity of the settlor. The majority of the House of Lords, in *Marshall v Kerr*, 67TC56, preferred slightly different reasoning in holding that a residuary legatee, who had executed an instrument of variation so that her 50 per cent share of the estate was settled, was the settlor for the purposes of Section 87 TCGA 1992 (charge on beneficiaries of non-resident settlements). It may be noted that the case was concerned with the pre-1978 version of the relevant legislation and it is considered that the Revenue’s arguments in that case are stronger under the later legislation.

Where the instrument was executed before 6 April 2006 this decision should be applied for the purposes of Section 77 TCGA 1992 & Section 86 TCGA 1992 (charge on settlors of certain settlements) and TCGA 1992/SCH1 (annual exempt amount for trustees).

Where the instrument was executed on or after 6 April 2006 and notice is given under Section 62(7) Section 68C TCGA 1992 applies with these consequences.

- Where under the will or intestacy property was to pass absolutely to an individual, and a variation is executed settling that property (or property deriving from that property), then the person to whom the property would have passed is the settlor with regard to that

- property.
- Where under the will or intestacy property was to be settled, but the variation is such that a new settlement is created (see CG37887) then the deceased is the settlor.
 - Where under the will or intestacy property was to be settled, but the variation is minor, then the deceased would be the settlor without the new legislation in FA 2006 and therefore this case is not provided for specifically.¹¹⁴

The author has been expecting further litigation on this aspect since 1994, but it has not happened yet. In view of the 2006 reforms, HMRC may not dispute the position for variations before 6 April 2006.

75.30.5 *IT and CGT – IoVs from 6 April 2006*

Section 472 ITA provides:¹¹⁵

- (1) This section applies if—
 - (a) a disposition of property following a person's death is varied, and
 - (b) section 62(6) of TCGA 1992 applies in relation to the variation.
- (2) [i] If property becomes settled property because of the variation
[ii] and would not, but for the variation, have become settled property),
a person within subsection (3) is treated for the purposes of the Income Tax Acts (except where the context otherwise requires)—
 - (a) as having made the settlement, and
 - (b) as having provided the property for the purposes of the settlement.
- (3) The persons within this subsection are—
 - (a) a person who immediately before the variation was entitled to the property, or to property from which it derived, absolutely as

114 Likewise TSEM 1815 [January 2008]:

“The settlor of a trust created by a deed is not the deceased, unless it's a disclaimer (TSEM1840). It is the person who was entitled to the gift that has now gone into trust. The gift can be capital or income or both. The case of *Marshall v Kerr* (67 TC 56) is relevant. There may be more than one settlor.”

115 The CGT equivalent is s.68C TCGA.

legatee,¹¹⁶

- (b) a person who immediately before the variation would have been so entitled if that person had not been an infant or otherwise lacking legal capacity,
- (c) a person who, but for the variation, would have become so entitled, and
- (d) a person who, but for the variation, would have become so entitled if that person had not been an infant or otherwise lacking legal capacity.

Section 472 (and its CGT equivalent, s.68C TCGA) applies in the usual situation, where a beneficiary absolutely entitled to property under a will varies the will so as to create a settlement. Section 68C TCGA enacts the HMRC view that the beneficiary is the settlor for CGT. Section 472 confirms (which no-one ever doubted) that the beneficiary is the settlor for IT.

This applies not just for the standard IT/CGT definition, but for all purposes of IT and CGT. Although the drafter adds the words except “where the context otherwise requires”, I cannot think of a case where the context would “otherwise require”; and I expect the drafter has copied without much thought the wording used (appropriately) in s.467 ITA.

Section 473 ITA provides:

- (1) This section applies if—
 - (a) a disposition of property following the death of a person (“D”) is varied, and

116 Section 472 provides:

“(4) For the purposes of subsection (3)—

- (a) ‘legatee’ includes a person taking property—
 - (i) under a testamentary disposition or on an intestacy or partial intestacy, whether beneficially or as trustee, or
 - (ii) under a donatio mortis causa, and
- (b) a person who is a legatee as a result of para (a)(ii) is treated as acquiring the property when the donor dies.
- (5) For the purposes of subsection (4)(a) property taken under a testamentary disposition or on an intestacy or partial intestacy includes any property appropriated by the personal representatives in or towards satisfaction of—
 - (a) a pecuniary legacy, or
 - (b) any other interest or share in the property devolving under the disposition or intestacy.”

- (b) section 62(6) of TCGA 1992 applies in relation to the variation.
- (2) If—
 - (a) property would have become comprised in a settlement within subsection (3), but
 - (b) as a result of the variation, the property, or property derived from it becomes comprised in another settlement,
 D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.
- (3) A settlement is within this subsection if—
 - (a) it arose on D's death (whether by D's will or on D's intestacy or in any other way), or
 - (b) it was in existence immediately before D's death (whether or not D was a settlor in relation to it).
- (4) If—
 - (a) immediately before the variation property is comprised in a settlement and is property of which D is a settlor, and
 - (b) immediately after the variation the property, or property derived from it, becomes comprised in another settlement,
 D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.
- (5) A settlement treated as made by D as a result of this section is treated for the purposes of the Income Tax Acts as made by D immediately before D's death.
- (6) But subsection (5) does not apply in relation to a settlement which arose on D's death.

Section 473 applies in the highly unusual situation where property settled by will is re-settled by beneficiaries.¹¹⁷ Here the opposite rule is enacted: the beneficiaries are *not* settlors for IT or CGT.

Where s.472 applies, s.472(2) imposes two rules:

- (a) the beneficiary ("B") is deemed to have made the settlement;
- (b) B is deemed to have provided the property for the purposes of the settlement.

By contrast, where s.473 applies, we only have rule (a): the deceased is deemed to have made the settlement. By implication, rule (b) must also apply: the deceased must be deemed to have provided the property.

¹¹⁷ See 75.10 (Variation or resettlement by beneficiaries).

75.30.6 Commentary

What is the reason for s.473? Perhaps because it can be hard to identify settlors on variations of settlements. Perhaps because, if the will actually settled the property, there is little need or scope for tax planning by IOVs. In practice s.473 is not important. It appears to be dead letter tax law (not the only dead letter tax law enacted under the banner of trust modernisation). Does it matter to have on the statute book complex provisions that never apply and no-one need take notice of? I think it does, and maybe some day some reformer will sweep it away, and bring CGT and IHT into alignment. The IHT rule is a sensible one, for it fits the object of the IOV rules, which is to allow beneficiaries to avoid the tax unfairnesses of badly drafted wills.

75.31 Pension trusts and employee benefit trusts

75.31.1 *Is a pension trust or employee benefit trust a settlement?*

Employers generally create pension trusts and employee benefit trusts for commercial reasons. There is normally no element of bounty on the part of the employer. Nor is there any bounty on the part of the employee, who is not in a position to negotiate or reject the arrangements. Such a trust is here called “**a commercial trust**”.

A commercial trust is a settlement under the classic settlement definition. However, a commercial trust is not a settlement under the settlement-arrangement definition.¹¹⁸

HMRC agree. CG Manual 14596 provides:

Pension funds

... It is considered that for the purposes of Income Tax¹¹⁹ a pension fund, certainly an approved one, is not a settlement, because of the absence of ‘bounty’; (see *Berry v Warnett*, 55 TC 92 for a discussion of the bounty test). Accordingly transfers of assets to Pension Funds are not connected persons transactions and there is no restriction of availability of losses under section 18(3) TCGA 1992.

118 See 75.2.3 (Settlement-arrangement definition of “settlement”).

119 The author means, for the purposes of the settlement-arrangement definition of “settlement.”

75.31.2 *Who is the settlor of a commercial trust?*

Since a commercial trust is not a settlement-arrangement, the question of who is the settlor does not arise when the settlement-arrangement definition of settlement is applicable. However the question arises as to who is the settlor of the commercial trust where a classic definition of settlement is applicable.

The answer depends on which definition of settlor applies.

75.31.3 *Settlor of commercial trust: standard IT/CGT & IHT definitions*

Let us look first at the standard IT/CGT definition and the IHT definition of settlor. Under these definitions “settlor” includes (1) the person who provides property and (2) the person who makes the settlement. It is considered that the position is as follows:

- (1) “Providing” property requires an element of bounty, and no-one can be said to “provide” property to a commercial trust.
- (2) To “make” (or perhaps to “enter into”) a settlement does not require an element of bounty.

HMRC agree. The CG manual provides:

33245. Settlor: from 6 April 2006: Basic principles [October 2007]

...Basically under Section 68A(1) to (3) [TCGA] a person is a settlor if:
[1] he made or entered into the settlement. This describes the person who has had the deed drawn up on his behalf. The property may come from elsewhere; or the transfer of property to the settlement may be without ‘bounty’ (see next bullet),

[2] he has provided property for the purposes of the settlement. On the basis of *IRC v Leiner* 41 TC 589 these words are regarded as applying only where there is ‘bounty’. See CG35021 on ‘bounty’,

[3] the property is settled as a result of his will or intestacy.

34800 - Settlor trusts: meaning of settlor [5 Oct 2007]

For the purposes of TCGA92/S77 a person is a settlor in relation to a settlement if the settled property consists of or includes property directly or indirectly provided by him. A settlor cannot avoid liability by arranging for another person to provide the property under reciprocal arrangements (“arrangements” includes any scheme, agreement or understanding, whether or not legally enforceable). The word ‘provided’ is regarded as importing the ‘bounty’ test, see CG35020+.

The employer normally “makes” a commercial trust (normally the employer is a party to the trust deed and the deed is drawn on his behalf) and so the employer is a settlor under the standard IT/CGT definition and the IHT definition. HMRC agree. CG Manual provides:

33240 Settlor: Up to 5 April 2006 [October 2007]¹²⁰

... There is no judicial guidance on the precise meaning of “made” and “entered into” although they have been present in the Income Tax legislation for many years. They would appear to be descriptive of anyone who can reasonably be described as settlor in accordance with the relevant legislation but also anyone who has created a settlement as a formality or put property into a settlement other than for full consideration....

Because a person who has ‘made’ or ‘entered into’ a settlement is within the definition of settlor it is not considered necessary for ‘bounty’ to have been provided. Therefore employee trusts have a settlor. See CG33580 and CG35020+. ...

33580. Trusts for employees [February 2012]

Except where specific rules provide otherwise, trusts set up for the benefit of employees are subject to the normal rules relating to settled property. For the purposes of determining the annual exempt amount the settlor is the person who made or entered into the settlement, generally the employer. ... In addition any individual or company which adds property to the settlement is also a settlor. ...

If the employer is the settlor, and is a company, it follows that excluded property status depends on the domicile (ie place of incorporation) of the company. That is a relatively sensible rule. IHT cannot operate on the basis that the employees cannot usually be the settlors of an EBT for employees as a group, since they are a large and fluctuating body. It would be odd if an EBT had no settlor for IHT purposes.

120 This passage is considering Sch 1 TCGA before the 2006 amendments. At that time the Sch 1 applied a classic definition of settlement (so an employee benefit trust was a settlement), and it applied the settlement-arrangement definition of settlor (so someone who made or entered into a settlement was a settlor). The point made here therefore applies to the standard IT/CGT and IHT definitions of settlor which contain similar wording.

75.31.4 *Settlor of commercial trust: s.86 definition*

The CGT s.86 definition of “settlor” is different and does *not* include the person who makes or enters into a settlement. So the employer is not a settlor for the purposes of s.86. HMRC appear to agree. This can be inferred from comments in the CG Manual on s.77 TCGA. That section was repealed in 2008 but the comments are relevant because the definition of settlor for s.77 was (in short) the same as for s.86 TCGA. The CG Manual provides:

34804 Corporate Settlers [October 2007]:

Companies frequently create settlements. These are generally settlements for employees, see CG35020, or other commercial arrangements, see CG35023. Such settlements are usually excluded from TCGA Section 77 because of the bounty test.

More analytically, a commercial settlement was a “settlement” for the purposes of s.77 (which applied the IT/CGT definition, not the settlement-arrangement definition). However s.77 did not apply because the company was not within the s.77 definition of settlor. Until February 2012 the CG Manual provided:

33580. Trusts for employees [June 2003]

... CG35020+ shows that in many circumstances the employer is not the settlor for TCGA 1992 Section 77.

Similarly:

35020. Settlor trusts: Share option schemes: Trusts for employees [February 2006]

There is nothing in Section 77 [TCGA] itself to prevent it being applied to a company.¹²¹ In particular, where a company has set up a settlement for its employees, the deed may provide that if all the trusts fail, the property may revert to the company. The most common cases are share option schemes and unapproved pension schemes. In the latter case it can also be argued that the employees themselves are also settlors.

The Revenue Booklet entitled ‘The tax treatment of Top-Up Pension Schemes’, Para 2.7.5, states:

121 This sentence is debatable, but the issue is now of historic interest only.

‘The ‘benefit to settlor’ rules in [s.624] and [TCGA 1992, Sections 77 – 79] can apply to top-up pension schemes. But this is not likely to be the case where the structure and operation of a scheme are broadly similar to an approved pension scheme.’

35021. Settlor trusts: Share option schemes: Trusts for employees [February 2006]

The legal basis of this is that a person is a settlor under Section 79 [TCGA] to the extent that that person has provided property for the purposes of the settlement. The courts have indicated in dealing with similarly worded Income Tax legislation that this means that is necessary for the settlor to have provided ‘bounty’, and that a commercial transaction does not normally contain bounty. Therefore if a settlement can fairly be regarded as part of an employer’s normal commercial arrangements for the remuneration of his employees, neither the employer nor the employees should be regarded as settlors.

35022. Settlor trusts: Share option schemes: Trusts for employees [February 2006]

The absence of approval for a share option scheme or a top-up pension scheme does not prevent it from being ‘normal’. Cases should only be challenged if the benefits are provided for a very small number of employees, particularly directors and/or shareholders.

35023. Settlor trusts: Other commercial arrangements [February 2006]

In exceptional circumstances trusts may be set up for commercial reasons other than to benefit employees. In general Section 77 should not be applied to genuine commercial arrangements, where the main beneficiaries are members of the public, and it is not intended that funds should revert to the person setting up the trust. On the other hand it is possible that the main beneficiary is the settlor, in which case the application of Section 77 should be contended for.

If the company is a close company, see 75.32.1 (Trust made by company: s.86 definition of settlor).

75.31.5 Could employees be settlors of an employee benefit trust?

CG Manual para 35020 states in relation to unapproved pension schemes:

... it can also be argued that the employees themselves are also settlors.

Similarly, the comment that employers and employees are not settlors is

said in the passage set out above to apply only to “normal commercial arrangements”.

Why are employees not settlors in normal cases? There may be two reasons:

- (1) The employee may not have provided anything as they normally gave up no rights when the employer made the transfer to the trust. The trust is created at the discretion of the employer and these employees play no part in it.
- (2) Common form employee benefit trusts benefit a wide class of beneficiaries, so one may not be able to identify any particular part of the trust fund as provided by any particular employee (even if it is the case that a class of employees have jointly provided the trust property). That would preclude any charge to tax on any employee.

Employees may be settlors where these factors are both absent.

The TSE Manual provides:

5355 Summary for FURBS/EFRBS non-resident trustees [December 2011]

...The Settlements Legislation

Information The Settlements legislation in Chapter 5 Part 5 ITTOIA will not apply if the scheme is operating on normal commercial lines as part of an employment package. But in certain circumstances you may consider whether the Settlements legislation applies to charge the FURBS/EFRBS trust's income and gains on a director.

Action The Settlements legislation provisions can apply if the trust is apparently not genuinely to provide retirement benefits and/or the beneficiary of the trust has directly or indirectly provided funds for the settlement (see TSEM4120). Apply the following guidelines when examining trust returns and accounts and liaise with the tax office for the company and the employment income tax office, or submit to HMRC Trusts & Estates Technical Edinburgh, as necessary.

- The Settlements legislation will not apply where only the employer makes contributions - unless the contributions are
 - made by a close company which the member controls and
 - unrealistically large by normal commercial standards.
 - For example, if there is only one director who is also the sole shareholder of the employing company, and substantial contributions are made into the FURBS/EFRBS, you may consider whether the Settlements legislation applies to treat the director/shareholder as the settlor. If you think this may be the case, you must liaise with the tax office for the company. They will consider whether to deny a

deduction for the contributions.

- The Settlements legislation will not apply if the member makes contributions and these are reasonable compared with the member's salary. However, if the member makes **any** contributions, refer the case to the Divisional Technical Adviser.

If you consider the Settlements legislation may apply, submit your papers to HMRC Trusts & Estates Technical Edinburgh.

75.31.6 *Trust of pension scheme death benefits*

The IHT Manual provides:

17125. The identity of the settlor [February 2006]

The settlor in relation to a discretionary trust created over death benefits (IHTM17030) when the member first joined the scheme is the member themselves.

The settlor is considered to be the member even in the case of a non contributory scheme. The reason for this is that pension benefits and rights are the product of sums paid into the pension fund by the employer as deferred or delayed remuneration for the employee's current work (see *Parry v Cleaver* [1970] AC 1 and *The Halcyon Skies* [1976] 2 WLR 514).

A member is clearly the settlor if he or she has a general power of appointment over the death benefit and creates the trust by exercise of that power.

In other cases the position is less clear. It is well-settled that:

... pensionable employment is more valuable to a man than the mere amount of his weekly wage. It is more valuable because by reason of the terms of his employment money is being regularly set aside to swell his ultimate pension rights whether on retirement or disablement. His earnings are greater than his weekly wage. [Where the wage is £20 with total contributions to the pension fund of £4 per week] his employer is willing to pay £24 per week to obtain his services, and it seems to me that he ought to be regarded as having earned that sum per week. The products of the sums paid into the pension fund are in fact delayed remuneration for his current work. That is why pensions are regarded as

earned income.¹²²

The non-tax cases cited in the IHT Manual do not address the issue of who is the settlor for IHT purposes. The fact that a pension is delayed remuneration does not answer the tax issue. If the member was not the settlor of the pension trust before the transfer to the death benefit trust, how can they become the settlor? At first sight the transfer from a pension trust to the trust of the death benefit should not alter the identity of the settlor.¹²³ It may be said that the pension trust represents earning of all the members but the death benefit trust isolates or represents earnings of one particular member. But the required element of bounty is missing.

75.32 Trust made by company: are shareholders settlors?

The position here is again made more complicated by the differences between the definitions of settlor.

75.32.1 Trust made by company: s.86 definition of settlor

The s.86 definition of settlor is unique in that it makes express provision to treat shareholders and other participators as settlors, where a close company is a settlor. Para 8(4) sch 5 TCGA provides:

For the purposes of this paragraph—

122 *Parry v Cleaver* [1970] AC 1 at p.16C. Similarly, *Imperial Group Pension Trust v Imperial Tobacco* [1991] 1 WLR 589 at p.579:

“Pension scheme trusts are of quite a different nature to traditional trusts. The traditional trust is one under which the settlor, by way of bounty, transfers property to trustees to be administered for the beneficiaries as objects of his bounty. Normally, there is no legal relationship between the parties apart from the trust. The beneficiaries have given no consideration for what they receive. The settlor, as donor, can impose such limits on his bounty as he chooses, ... a pension scheme is quite different. Pension benefits are part of the consideration which an employee receives in return for the rendering of his services. In many cases, ... membership of the pension scheme is a requirement of employment. In contributory schemes ... the employee is himself bound to pay for his or her contributions. Beneficiaries of the scheme, the members, far from being volunteers have been given valuable consideration. The company employer is not conferring a bounty.”

123 See 75.7 (Transfer from trust A to trust B by exercise of trustees' power).

- (a) where property is provided by a qualifying company¹²⁴ controlled¹²⁵ by one person alone at the time it is provided, that person shall be taken to provide it;
 - (b) where property is provided by a qualifying company controlled by 2 or more persons (taking each one separately) at the time it is provided, those persons shall be taken to provide the property and each one shall be taken to provide an equal share of it;
 - (c) where property is provided by a qualifying company controlled by 2 or more persons (taking them together) at the time it is provided, the persons who are participators in the company at the time it is provided shall be taken to provide it and each one shall be taken to provide so much of it as is attributed to him on the basis of a just apportionment;
- but where a person would be taken to provide less than one-twentieth of any property by virtue of paragraph (c) above and apart from this provision, he shall not be taken to provide any of it by virtue of that paragraph.

The wording is based on s.96(3)-(5) TCGA; see 48.9.3 (Consequences of capital payment).

Why does the s.86 definition have this provision which is not found in any other definition of settlor? The answer may be because the s.86 definition is narrower than the others, lacking the rule that someone who makes a settlement is a settlor.¹²⁶

If para 8 applies (so that a participator is “taken to provide” the trust property) it is considered that the company should be taken not to provide the property, ie, it is not the settlor.

75.32.2 *Trust made by company: other definitions of settlor*

Where a company makes a settlement, the individual controlling shareholder(s) will be settlor(s) if they can be said to provide property indirectly.¹²⁷ In relation to companies with only one or two shareholders,

124 Para 8(5) sch 5 TCGA provides: “For the purposes of sub-paragraph (4) above a qualifying company is a close company or a company which would be a close company if it were resident in the UK.” For a note on this terminology, see 80.22.1 (Non-resident close company).

125 See 47.3.2 (“Control”).

126 See 75.31.4 (Settlor of commercial trust: s.86 definition).

127 Contrast 28.3.2 (Transfer procured by individual).

this may well be the case if there is an element of bounty, though it depends on the facts. The CG Manual para 34804 [August 2007] provides:

Companies frequently create settlements. These are generally settlements for employees, see CG35020, or other commercial arrangements, see CG35023. Such settlements are usually excluded from Section 77 TCGA 1992 because of the bounty test. Exceptionally it may be appropriate to argue that TCGA Section 77 applies to the particular settlement. *Although there is no specific provision comparable to TCGA Schedule 5 Para 8(4), nevertheless it may be appropriate in such a case to consider whether the property entering the settlement has been provided indirectly by the shareholders, both for the purposes of TCGA Section 77 and for the purposes of Section 619 ITTOIA [the settlement-arrangement definition].*

(Emphasis added)

75.33 Planning to create trust with foreign domiciled settlor

The “who is the settlor” question may arise in a tax planning context where it is desired to create a foreign domiciled trust by transferring property to a foreign domiciled settlor. These arrangements are always challenging and sometimes impossible to carry out in practice, for it depends ultimately on intention, and that cannot be manufactured to suit the circumstances.

Example 1

- (1) H (UK domiciled) gives property to H’s wife W (not UK domiciled);
and
- (2) W gives it to a trust.

Who is the settlor: H or W or both?

The success of schemes involving a transfer to a foreign domiciliary who creates a settlement depends on how the transaction is carried out. Does W have a genuine and wholly independent role?¹²⁸ It is suggested that W should retain the property for at least one year; that no decision be made as to whether or not to create a settlement at the time of the gift from H to W; *a fortiori* no decision should be made on the terms of the trust; and W

128 See 75.4 (Gift from A to B followed by gift to trust by B).

should receive independent legal¹²⁹ advice on any proposed gift to a settlement.

Example 2

- (1) Trustees of a trust (with a UK domiciled settlor) appoint property to a beneficiary (“B”) (not UK domiciled); and
- (2) B gives the property to a new trust.

In principle, the settlor of the new trust will be B, not the settlor of the old trust.¹³⁰ But it is different if B is acting at the behest of the settlor.¹³¹

Watch the trust law rule of fraud on a power, and *Furniss v Dawson*. It would be better if the terms of the new settlement are different from the terms of the old. For an (almost unbelievable) example of botched execution of this scheme, see *Anker-Petersen v Christensen* [2002] WTLR 313.

129 W may also need tax advice, but what matters here is that W has independent advice on the property law aspects of the gift.

130 See 75.6 (Appointment from old trust to B followed by gift to new trust by B).

131 See 75.5 (Trust created by B at request of A).

CHAPTER SEVENTY SIX

TRUSTS WITH TWO OR MORE SETTLORS

76.1 Trusts with two settlors – Introduction

This chapter considers the IT and CGT position where a settlor-interested trust has more than one settlor. I deal with this in one chapter as the IT issues and CGT issues overlap.

76.1.1 *Cross references*

For settlor-interested trusts with only one settlor, see 26.1 (IT) and 47.1 (CGT).

For IHT aspects of trusts with two or more settlors, see 60.1 (Transfers between trusts and adding to trusts – Introduction).

76.2 Two or more settlors of settlor-interested trust: IT

76.2.1 *Position where multiple settlor provision does not apply*

In *Herbert v IRC* 25 TC 93, the facts (in short) were:

- (1) Property was held on trust for L for life, remainder to R.
- (2) L and R directed that the property should be transferred to a new trust, which was revocable (and so settlor-interested).

L and R were joint settlors of the new trust. The Revenue assessed R on the income of the new trust under a provision equivalent to s.624 ITTOIA.¹ The judge observed:

¹ I guess that they did not assess L because he was non-resident.

[R] is not the only settlor. [L] is also a settlor... The Section provides that the income "shall be treated as the income of the settlor and not as the income of any other person". [L] is admittedly a "settlor" and, therefore, the income must be treated as his income and not as the income of any other person: [R] is another person and, therefore, the income cannot be treated as his. If [L] were assessed, the same argument could be raised. If there is no flaw in the argument and the words of the Section are imperative, as they seem to be, the result is that where there is more than one settlor the provisions of the Section become inapplicable.

...the Act does not prescribe what is to happen when there is more than one settlor ... It is not suggested that all the settlors can all be assessed in respect of all the income. That, indeed, would seem to be an extravagant proposition. Nor is it suggested by the Crown that the income should be distributed between them....

The interpretation of the Section put forward on behalf of the Respondents was that where there are two or more settlors the Crown has the option to assess any one of the settlors to the exclusion of the other, and that, in the case of an assessment to Income Tax ... the option must be exercised by the local Inspector of Taxes and that there was no right of appeal by the taxpayer against the Inspector's choice. ... I find myself unable to accept that interpretation. It seems to me fantastic to suppose that Parliament has conferred upon Inspectors of Taxes, or even upon the Special Commissioners, a choice as to whether A, or B, or C should be liable to Income Tax

76.2.2 *Multiple settlor provision*

Section 644 ITTOIA now makes provision for a settlement with multiple settlors:

- (1) In the case of a settlement where there is more than one settlor, this Chapter has effect in relation to each settlor as if that settlor were the only settlor.
- (2) This works as follows.
- (3) In this Chapter, in relation to a settlor—
 - (a) references to the property comprised in a settlement include only property originating from the settlor, and
 - (b) references to income arising under the settlement include only income originating from the settlor....

[Subsections (4) and (5) deal with ss. 629, 631 and 632 ITTOIA - settlements for minor children of the settlor - not discussed here.]

Section 645 ITTOIA² defines “property originating from a settlor”:

- (1) References in section 644 to property originating from a settlor are references to—
 - (a) property which the settlor has provided directly or indirectly for the purposes of the settlement,
 - (b) property representing property so provided, and
 - (c) so much of any property which represents both property so provided and other property as, on a just and reasonable apportionment, represents the property so provided.
- (2) References in sections 627 and 644 to income originating from a settlor are references to—
 - (a) income from property originating from the settlor, and
 - (b) income provided directly or indirectly by the settlor.
- (3) In this section references to property or income which a settlor has provided directly or indirectly—
 - (a) include references to property or income which has been provided directly or indirectly by another person under reciprocal arrangements with the settlor, but
 - (b) do not include references to property or income which the settlor has provided directly or indirectly under reciprocal arrangements with another person.
- (4) In this section references to property which represents other property include references to property which represents accumulated income from the other property.

Thus on the facts of *Herbert*, the income of the new settlement would in principle be treated as the income of L for his life, under s.624, and as the income of R after the death of L.

Section 644 applies where there is *one* settlement with more than one settlor. In some IT cases one might say that there are two settlement-arrangements. Eg if S creates a trust and (subsequently and independently) X adds to it, one might say that there are two distinct settlement-arrangements (even if there is only one classic settlement) and S and X are the (sole) settlors of their settlement-arrangement. However s.644 is another route to the same destination, so it does not matter which analysis one takes, and s.644 seems a clearer solution.

² Flagged by s.644(6).

76.3 Two or more settlors of settlor-interested trust: CGT

The s.86 charge only applies to disposals of settled property “originating from the settlor”.³ This expression is defined in TCGA Sch 5 para 8: see 75.3.5 (CGT s.86 definition of “settlor”). This incorporates rules similar to the IT rules discussed above.

The CG Manual contains guidance which relates to s.77 TCGA (repealed 2008) but which would still be applicable to s.86:

34893. Multiple settlors [April 2010]

Section 79 provides that trust gains are only to be attributed to each settlor to the extent that those gains accrue on property originating from that person. Where the assets provided by two or more settlors are managed as separate funds, there should be no difficulty in determining to which settlor the gains on the disposal of particular items of property should be attributed. Where the assets provided by different settlors are not appropriated into separate funds, the legislation provides for a just apportionment as between the settlors.

34894. Multiple settlors [April 2010]

If HMRC Trusts Head Office Bootle or Financial Intermediaries and Claims Office (formerly Claims Branch) have given advice on apportionment for Income Tax purposes, this should be followed for CGT. Otherwise, if settlors together make the settlement, the gains in such a case should be apportioned according to the amounts each put in. If a settlor adds to a settlement, then the amount put in should be compared with the value of the settlement at that time. Trust Offices should endeavour to reach a fair and easily worked solution.

34895. [April 2010]

If one settlor is within Section 79 and the other is not, the gains are apportioned on the lines suggested, but those relating to the settlor who is outside Section 79 are assessed on the trustees in the normal way after deducting the trustees' annual exempt amount.

34900. Example 1 [April 2010]

A and B each settle ordinary shares in X Limited on a trust under which both Mrs A and Mrs B have an interest as defined by the new provisions. A settles 500 such shares and B 1500. It is accepted that there is only one settlement for CGT purposes and the shares are not appropriated into separate funds.

In 1988-89 there is a gain of £2,000 on the sale of some of the shares, a

3 See 47.10 (Section 86 trust gains condition).

loss of £400 on the sale in 1989/90 of further shares and in 1990-91 a gain of £500 on the sale of shares in Y Limited acquired with the sale proceeds of the shares in X Limited.

The HMRC analysis is as follows:

In 1988-89, as A and B settled property in the proportion 1:3, there is, on a just apportionment, a chargeable gain of £500($2000 \times 1/4$) accruing to A.

Similarly a gain of £1500 is treated as accruing to B. Each is assessed as appropriate.

That is straightforward. The example then turns to consider the losses.

The loss of £400 in 1989-90 is apportioned £100 to A and £300 to B. The gain of £500 in 1990-91 is apportioned £125 to A and £375 to B. The loss of £100 in respect of the property provided by A is set against the gain of £125, leaving a net gain of £25 to be attributed to A. Similarly the loss of £300 in respect of the property provided by B is set against the gain of £375 on the property provided by him, leaving a net gain of £75 assessable on B.

This is not correct. The losses are not attributed to A or to B (either under the former s.77 or under the existing s.86.) They are carried forward and set against future gains of the trustees. The net gains in 1990/91 is £100 which is apportioned £25 to A and £75 to B. But although the analysis is not correct, the end result is the same.

34901. Example 2 [April 2010]

The facts are as in Example 1 except that by a deed executed during 1988-89 Mrs B irrevocably excludes herself from the class of beneficiaries.

The HMRC analysis is as follows:

The gains of that year are apportioned and attributed as before because Mrs B had an interest in the settlement at some time during the year.

This is straightforward.

The losses of 1989-90 and the gains of 1990-91 are apportioned in the

same way, and the net gains of £25 for 1990-91 are attributed to A.

This is not correct. The losses are set against the trustees gains; but it is correct that of the net £100 gains, £25 is attributed to A on a just and reasonable apportionment.

There can be no attribution to B in 1990-91 because neither he nor his spouse has an interest in the settlement in that year. Accordingly the gains on the assets deriving from the property provided by B are assessable on the trustees and the trustees can claim the annual exemption due to them. If this exceeds the gains of 1990-91 (£375), the losses brought forward of £300 do not need to be set against those gains, see CG18030. The losses of £300 will instead be carried forward and set against subsequent gains accruing on disposals of the settled property which derives from B, again making a just apportionment of the trust gains.

76.4 Multiple settlors: cases where apportionment not possible

The multiple settlor provisions are straightforward if one individual (“A”) creates a trust and another (“B”) adds property to it. A and B are both settlors and the property originating from A and B can be identified.

76.4.1 *Direct and indirect settlors*

Suppose there is an arrangement under which:

- (1) A makes a gift of property to B, and
- (2) B gifts the property to a trust.

A is a settlor (having provided property indirectly) and it seems at first as if B is also a settlor (having provided the property directly).⁴ But A and B have provided the *same* property. There is no provision how to apportion trust income or gains between A and B and, since the income and gains cannot be subject to tax twice, it is considered that s.624 and s.86 do not apply at all; see 76.2.1 (Position where multiple settlor provision does not apply). The solution to the problem is that A is the “real” settlor B is not to be regarded as the settlor.

This issue sometimes arises in the context of failed tax planning of the

4 See 75.4 (Gift from A to B followed by gift to trust by B).

kind discussed at 75.33 (Planning to create trust with foreign domiciled settlor).

76.4.2 *Beneficial loans, guarantees, payments of trust expenses*

Similar issues arise where:

- (1) S makes a settlement; and
 - (2) X provides further funds indirectly to the settlement, for instance by way of beneficial loans, guarantees, payments of trust expenses, etc.
- X may be a joint settlor, but (even if the trust is settlor-interested) s.624 still does not apply to X unless it is possible to identify the income provided by X, ie arising from X's act of bounty. In some cases one may say that all the income originates from S, so that s.624 applies to S but not to X. In other cases the contribution of S may be nominal, and one may be able to say that all the income originates from X.

SITUS OF ASSETS FOR IHT

77.1 Concepts of situs

Situs¹ of assets is relevant for many tax and some non-tax purposes, of which the most important are IHT excluded property and the CGT remittance basis.²

Situs (like domicile) is in origin a concept of private international law (or conflict of law) which has been adopted for tax purposes. The rules are laid down by the common law. The common law rules apply for tax, except so far as modified by specific rules in tax legislation.

IHT situs is almost entirely based on the common law rules. These are discussed in this chapter. Some IHT double tax treaties override the usual IHT situs rules.³

CGT has statutory situs rules which cover most situations, and the common law is only needed to fill in a few gaps. So CGT situs is best regarded as a separate subject, though in a few cases the common law/IHT principles still apply for CGT. Situs for CGT is discussed in the next chapter.

1 A note on terminology. The IHTA and TCGA generally refer to the “situation” of assets though the heading to s.275 TCGA refers to “location”. Section 59 Stamp Act 1891 (repealed) used the term “locally situate” and some of the older cases referred to the “local situation”. The concept in each case is the same. “Situs” has become adopted into legal English usage and should not be written in italics.

2 Other tax issues where situs may arise include (1) the ITA remittance basis and (2) foreign IHT and CGT credit relief. In most cases the issue is whether or not the asset is situated in the UK, and if outside the UK it does not matter where. However in cases of foreign IHT and CGT credit relief, it may be necessary to identify the state where assets are situated.

3 See 65.5 (Treaty situs).

The rules which determine the location of a source of income for income tax purposes are different from situs.⁴ For instance, dividends from UK situate shares may be foreign source income and vice versa; interest from a foreign situate debt may be UK source income and vice versa. Situs only occasionally matters for IT, but where it does, the common law rules discussed in this chapter will apply.

Strictly one should not refer to situs in the abstract, but to situs for a specific purpose (CGT, IHT, or whatever) but context may supply the reference, and in this chapter, situs means situs as determined by the common law rules which apply for IHT purposes.

77.1.1 *Commentary*

The situs of land and chattels seems obvious (but occasionally the law does not adopt the obvious solution). For intangible assets (shares, debts, etc.), the law must choose connecting factors to link the asset to a jurisdiction. There is a large choice of possible connecting factors, and the selection of the determining factor must sometimes be arbitrary.⁵ One might think that it would not matter much what the rule was, as long as there is some rule and its application is clear. But the desirable rule (at least from the HMRC viewpoint) is one which minimises the scope for tax planning. The common law rules do not achieve that, and so this is an

4 See 18.4 (Why does location of source matter?).

5 In *R v Williams* [1942] AC 549 the Privy Council said:

Shares in a company are “things in action” which have in a sense no real situs, but it is now settled law that for the purposes of taxation ... they must be treated as having a situs which may be merely of a fictional nature.

Similarly, in *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.119 the situs rules were described as “legal fictions”. It is of course true that an asset with no corporeal existence, such as a debt or other chose in action, has no material position in the material world. Nevertheless a better analysis is to say that “situs” (of a chose in action) is a metaphorical term describing an abstract concept. The situs of a chose in action is not “fictional”, but perfectly “real” (or at least as real as concepts such as “residence” or “domicile” or indeed “chose in action”) though the concept may be described as “technical” or (if one prefers a pejorative term) “artificial”. Lawyers are entitled to use ordinary words in special senses and to call a situs (of a chose in action) a “fiction” is inapt and misleading. See J.H. Baker, *The Law’s Two Bodies* (2001), Lecture 2 (“Legal Fictions”); Neil MacCormick, *Institutions of Law* (2007), p.136.

area of law with many anomalies. The common law situs rules are not well suited to serve as a territorial limitation for tax. It is not surprising that the role of situs in private international law has decreased, and very few of the common law rules apply to CGT.

Amendment of the IHT rules is however difficult because of the problem of double inheritance taxation. To the extent that different states adopt the same common law situs rules, they effectively prevent double taxation which otherwise arises if state A regards an asset as situate in state A for IHT purposes and state B regards the same asset as situate in state B. That was perhaps why in 1974 CTT (now IHT) adopted the common law situs rules and not the CGT statutory situs rules. The disparities between CGT and IHT situs are not accidental.⁶

Two reforms would improve the position:

- (1) Treat all assets other than UK land and securities as non-UK situate for the purposes of excluded property rules. That would be a simplification and it is most unlikely that the IHT charge on such assets of foreign domiciliaries brings in any significant tax. The abolition of stamp duty on UK situate property (other than securities) is a precedent.
- (2) A counterside would be to introduce a charge on UK private residences held via non-resident close companies.⁷ Rules analogous to the relevant property 10 year and exit charges would not work. Rules treating the shares of property companies as if they were UK situate are not practical. The rough and ready but workable solution is an entry charge on acquisition by such a company, avoidable by an election that the company should be regarded as transparent for IHT. The precedents are the 1.5% SDRT entry charge and the election out of the POA charge. The SDLT regime would provide the administrative structure for enforcement. Double taxation aspects would need consideration but would not be insoluble.

6 It could of course arise that state A regards an asset as situate in state A for CGT purposes and state B regards the same asset as situate in state B; however that is less likely to cause problems in practice, because (among other reasons) a DTA following the OECD model convention will normally determine which state imposes CGT.

7 To be EU compliant the same rules would have to apply to UK resident close companies, but in practice such companies do not usually acquire a UK residence.

77.2 Every asset has one situs

Under the common law rules, every asset is situate in one jurisdiction⁸ and only in one jurisdiction. In *R v Williams* [1942] AC 541 at p.559 the Privy Council said:

Property, whether movable or immovable, can ...⁹ have only one local situation.¹⁰

This rule is self evidently necessary since the purpose of situs rules in private international law is to resolve conflicts of jurisdiction, and one purpose in tax is to avoid double taxation. It is also implicit in the word situs: the physical fact that a physical object (above the level of quantum physics) can be situate in only one place. I stress this as some old cases considered assets could be dual situate. They no longer represent the law.

77.3 Situs of shares: general principle

In *Brassard v Smith* [1925] AC 371 the Privy Council said:

This is, in their Lordships' opinion, the true test. Where could the shares be effectively dealt with?

In *R v Williams* [1942] AC 541, the Privy Council approved this passage and said:

It may be useful here to make some general remarks on the meaning and effect of the principle laid down in *Brassard v Smith* and in the *Erie Beach* case. The first observation is that the phrase used in laying down the principle clearly means “where the shares can be effectively dealt with as between the shareholder and the company, so that the transferee

8 *English Scottish and Australian Bank v IRC* [1932] AC 238.

9 The omitted words are “... for the purposes of determining situs as among the different provinces of Canada in relation to the incidence of a tax imposed by a provincial law upon property transmitted owing to death”. These words do not qualify the general principle as there is only one common law situs concept and (subject to statute) that applies for all purposes.

10 Likewise *Laidlay v Lord Advocate* (1890) 15 App Cas 468 at p.483: “locality cannot be both England and India—the choice has to be made between the two”.

will become legally entitled to all the rights of a member,” e.g., the right of attending meetings and voting and of receiving dividends. If the phrase only meant “effectively dealt with as between transferor and transferee of shares,” the test would obviously be almost completely useless, since the rights of a shareholder as between himself and a transferee can, speaking generally, effectively be transferred in any part of the world.

These cases concerned registered shares, but the comments (cited in the IHT Manual at 27122) are not so restricted and apply to bearer shares also.

The question which follows from this test is: How to identify the place where shares can be dealt with?

77.4 Situs of registered shares

77.4.1 Place-of-register rule¹¹

The IHT Manual provides:

27121 Usual location [February 2006]

For the purposes of Inheritance Tax an inscribed¹² and registered security¹³ (a shareholding in a Company for example) is located at the place where the title of ownership must be registered – see *Att Gen v Higgins*.¹⁴...

It makes no difference that the business of the company is totally administered outside the country in which the register is kept: see *Baelz v Public Trustee* [1926] Ch 863.

I call this “**the place-of-register rule**”.¹⁵ This is a straightforward application of the general principle that shares are situate where they can be dealt with.

11 See Robert Venables QC, “The Situs of Registered Shares”, PTPR Vol 9 p.115.

12 Author’s footnote: “Inscribed” securities are those whose legal owners are inscribed in a register; the term is, as far as I can see, only an old-fashioned synonym of “registered”.

13 Author’s footnote: “Securities” here includes shares as well as debt securities.

14 (1857) 2 H & N 339 accessible on www.kessler.co.uk. This was approved in *AG v Winans* (No. 2) [1910] AC 27.

15 A “register” is only a record of stockholders and their assignees: see *Ramsay v IRC* 54 TC 101 at p.133.

It is necessary for completeness to mention *Macmillan v Bishopsgate Trust (No. 3)* [1996] 1 WLR 387. This concerned a company incorporated and with its share register in New York. Auld LJ adopted the place-of-register rule: see p.411E. Alarming, Aldous LJ stated without discussion that the situs is the place of incorporation: p.423F. Staughton LJ inclined to the same view but expressed himself more cautiously: p.405E. However, this was a case where the court did not have to decide between place-of-register and place of incorporation as rival situs rules. The court's attention was not on the point and the relevant cases were not discussed. In the circumstances, it is suggested that no weight whatsoever should be given to these dicta. The IHT Manual tactfully ignores this case. Thus the majority of the Court of Appeal have accidentally introduced into the law if not an uncertainty at least an inconsistency which needs to be explained away. But there it is.

77.4.2 *Overseas branch register*

Multiple registers raise a problem for a place-of-register rule. If there is only one register applicable to the shares in question, that is where the shares can be dealt with. The IHT Manual provides:

27122 Branch registers [February 2006]

If a company has more than one register, and any changes must be recorded on one of the registers, the relevant securities are situate in the place where that register is required by law to be kept – not in the place of the head office of the company.

This requires an examination of company law to identify which of the two registers is applicable. The IHT Manual summarises the company law background:

27124 Overseas branch registers of UK companies [February 2006]

Under UK law a share cannot, at one and the same time, be registered on more than one register.

The rule applies even as regards overseas branch registers (these are branch registers of members resident in the country to which the register relates). Under [s.132 CA 2006], a company that maintains an overseas branch register has to keep a duplicate thereof at the place where its principal register is kept.

And “no transaction with respect to any shares registered in an overseas

branch register shall, during continuance of the registration, be registered in any other register” – see [s.133 CA 2006].

Shares on the overseas branch register of a UK company are therefore situated, for Inheritance Tax purposes, in the country where the register is kept.

Under [s.129 CA 2006] a company may maintain an overseas branch register. The countries and territories in which overseas branch registers may be kept are specified in [s.129 CA 2006]. [S.129 CA 2006] enable[s] the provisions as to overseas branch registers to be extended by Order in Council to countries within the jurisdiction, or under the protection, of the Crown.

This view is confirmed by s.133(3) CA 2006:

An instrument of transfer of a share registered in an overseas branch register—

- (a) is regarded as a transfer of property situated outside the UK.

77.4.3 *Transfer office*

Another solution may be that the company has only one register and merely a “transfer office” elsewhere:

27125 - Duplicate or multiple registers of non-UK companies [January 2008]

Some overseas company laws allow a shareholder to use duplicate (or multiple) share registers to record the transfer of their securities.

The South African Companies Act, for example, authorises South African companies to maintain branch registers in any foreign country. Shares can be transferred on any register, but no transfer of shares passing on death can be registered in the UK until any death duty claimed by South Africa on the shares has been paid.

Remember that some registers merely record information about transfer of securities without providing the legal basis for the transfer. These registers do not affect the locality of the security (IHTM27071)

Details of transfer arrangements given in the Stock Exchange Year-Book¹⁶ do not always make the position clear and, if necessary, you

16 Author’s note: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

must ask the taxpayer to explain.

77.4.4 *Two effective registers*

If that fails one must look for another territorial connection:

27125 - Duplicate or multiple registers of non-UK companies [January 2008]

Where there are many registers the register upon which the shares would normally be dealt with in the ordinary course of business is the register that determines the locality of the security – see *Treasurer of Ontario v Aberdeen* [1947] AC 24.

But which is the register which would normally be used? The Manual explains:

If the share certificates are here, one of the alternative registers is here, and transfers can be effected here the shares will normally be regarded as legally situate here (*Re Clark, McKechnie v Clark* [1904] Ch 294).

R v Williams [1942] AC 541 is another example: the location of a (signed and endorsed) share certificate acting as a tie-breaker between two competing jurisdictions (each with a share register).¹⁷ The Manual continues:

This is only an assumption and as such can be rebutted by the particular circumstances of the case (see *Standard Chartered Bank v IRC* [1978] 1 WLR 1160). But if tax is offered on shares in a foreign company with transfer facilities in the UK, you can assume that the register here is the one on which the shares would normally be dealt with in the ordinary course of business.

¹⁷ IHT Manual para 27150 [October 2007]:

“If the company has more than one register on which the holding could be effectively transferred, and the share certificates are found at the material time at a place where a register is located, the holding is for Inheritance Tax purposes situated at that place – see *R v Williams* [1942] AC 541. Cases where none of the effective registers is located where the certificates are found must be referred to TG or your Team Leader, in Scotland.”

77.4.5 *Company without “register” (in true sense)*

The IHT Manual provides:

27123 Effectiveness of register [February 2006]

If shares are entered on a list, which could be called a register, but the register does not affect the legal holding of the security, the place where the list is situated does not affect the locality of the security.

In *Erie Beach v Att Gen for Ontario* [1930] AC 161, certain shares (on the view that they could, under the Ontario Companies Act, be effectively dealt with only in Ontario) were held to be situated in that province for the purposes of Ontario Succession Duty, notwithstanding that they had in fact been entered on a “register” opened elsewhere.

It was explained however, in *R v Williams*, that the *Erie Beach* decision was based on the finding that the particular shares in question could be dealt with effectively in Ontario only. It is not an authority for holding that any company subject to the Ontario Companies Act is precluded from establishing registers outside Ontario on which effective transfers can be made, and Ontario companies like other Canadian companies may establish branch registers kept by “transfer agents” which are equivalent to duplicate or multiple registers (IHTM27125).

77.4.6 *Register of share transfers*

The IHT Manual provides:

27127 Transfer agencies [February 2006]

Many companies incorporated under Canadian law keep a register, or branch register, of **transfers kept by one of the company’s duly appointed “transfer agents”, not a register of shareholders as with UK companies.**

When we ask ourselves “where could the shares be effectively dealt with” (*Brassard v Smith*), we must find out where the company has established transfer agents to operate a register, or branch register, of transfers. There usually is more than one such transfer agent with whom it is open to a shareholder to transfer his holding, regardless of where the relevant share certificate was issued; some (but relatively few) companies have such transfer agents in the UK. These equally available transfer arrangements in various places are said to be “interchangeable”, and for the purposes of locality in relation to Inheritance Tax can be taken as equivalent to duplicate or multiple registers (IHTM27125).

This applies to shares registered in the name of the taxpayer or his nominee (including marking names), and applies whether or not the share certificates are endorsed in blank (*Treasurer of Ontario v Aberdeen* [1947] AC 24). This will apply whether the company in question was incorporated under Canadian dominion or provincial law.

77.4.7 *Miscellaneous*

The IHT Manual provides:

27128 Branch registers of British Colombian and Newfoundland companies [February 2006]

Branch registers can be kept outside the provinces so the location of the branch register will determine the locality of any shares registered thereon.

In certain circumstances shares registered on a branch register in the name of a **deceased** member can be transferred only on a duplicate register kept at the registered office of the company. This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.

27129 - Canadian companies: Nova Scotia companies [January 2008]

Every company incorporated under the laws of Nova Scotia must keep a duplicate of any branch register kept outside the province at its registered office in the province. As regards transfers inter vivos, a distinction is understood to arise between:

1. Companies incorporated under the Nova Scotia Companies Acts, in which case a transfer inter vivos on a branch register appears to be valid and effectual in itself. Accordingly if the securities are registered on a branch register in the UK they must be treated as situated in the UK.
2. Companies incorporated under other Acts, in which case no transfer on a branch register is effectual until entered in the principal register. On that footing, registered securities may be regarded as situated in Nova Scotia, even though they may be registered on a branch register in the UK.

This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.

77.5 Registered debt securities

The rules for debt securities¹⁸ are, in general, the same as for registered shares; the passage from the IHT Manual set out above refers to securities, generally meaning both shares and debt securities.

77.5.1 *Place-of-register rule v specialty rule*

Shares are not “specialties” so the specialty rule cannot apply to them.¹⁹ A debenture may be a specialty so the question arises as to the priority between the place-of-register rule and the specialty rule. The IHT Manual provides:

27079 Bonds and debentures under seal [February 2006]

Debentures if under seal, are specialty debts, locally situated where the document is found. So, also, are debts due from the Crown, or under a statute, whether under seal or under hand, and even when they are secured by registered bonds.

Thus for debentures the specialty rule overrides the place-of-register rule. For HMRC views as to which securities are “specialties”, see 77.13.2 (Situs of specialty).

77.6 Securities of international organisations

For convenience this section deals with CGT situs as well as IHT situs, as the rules are the same.

77.6.1 *Designated organisations*

Section 126 FA 1984 provides power to designate:

(1) Where—

- (a) the UK or any of the Communities is a member of an international organisation; and
- (b) the agreement under which it became a member provides for

¹⁸ I use the term “debt securities” to mean securities which are not shares.

¹⁹ See 77.13 (Specialty obligation).

exemption from tax in relation to the organisation, of the kind for which provision is made by this section;

the Treasury may, by order made by statutory instrument, designate that organisation for the purposes of this section....

(4) The Treasury may, by order made by statutory instrument, designate any of the Communities or the European Investment Bank for the purposes of this section, and references in subsections (2) and (3) above to an organisation designated for the purposes of this section include references to a body so designated by virtue of this subsection.

Section 126(2)(3) set out the consequences of designation:

(2) Where an organisation has been so designated, the provisions mentioned in subsection (3) below shall, with the exception of any which may be excluded by the designation order, apply in relation to that organisation.

(3) The provisions are—

(b) any security issued by the organisation shall be taken, for the purposes of capital transfer tax to be situated outside the UK;

The IHT Manual provides:

27141List of non-UK situs organisations [January 2008]

Unless in bearer form and situated physically in the UK²⁰ securities issued by the following organisations are effectively outside the charge to IHT where:

1. they form part of the estate of a person domiciled outside the UK; or
2. they are comprised in a settlement and the settlor was not domiciled in the UK at the time the settlement was made, namely:

[a] the International Monetary Fund: The Bretton Woods Agreement Order in Council, 1946 ((SR & O) 1946 No 36)

[b] the International Bank for Reconstruction and Development²¹: The Bretton Woods Agreement, as above

[c] the International Finance Corporation: The International Finance Corporation Order, 1955 (SI 1955 No 1954)

[d] the International Development Association: The International Development Association Order, 1960 (SI 1960 No 1383)

This list of organisations may not be exhaustive if you receive a claim for exemption in respect of a security issued by any other international body refer the papers to TG or your Team Leader (Scotland).

20 I do not understand the basis for this exception, but in practice the point may never arise.

21 [Author's footnote] More commonly known as the World Bank.

27142 Designated as non-UK by Treasury [February 2006]

The following organisations have been so designated.

1. The Asian Development Bank: The International Organisations (Tax Exempt Securities) Order 1984 (SI1984/1215) made on 2 August 1984
2. The African Development Bank: The International Organisations (Tax Exempt Securities) (No 2) Order 1984 (SI1984/1634) made on 22 October 1984
3. The European Community; The European Coal and Steel Community; The European Atomic Energy Community; The European Investment Bank: The European Communities (Tax Exempt Securities) Order 1985 (SI 1985 No 1172) made on 25 July 1985 in respect of a. and d.
4. The European Bank for Reconstruction and Development: The International Organisations (Tax Exempt Securities) Order 1991 (SI1991/1202) made on 16 May 1991.

Accordingly any security issued by the above mentioned organisations automatically has a foreign situs for IHT where the event occurred on or after the date of the order.

Section 265 TCGA provides:

(1) Where—

- (a) the UK or any of the Communities is a member of an international organisation; and
- (b) the agreement under which it became a member provides for exemption from tax, in relation to the organisation, of the kind for which provision is made by this section;

the Treasury may by order designate that organisation for the purposes of this section.

(2) The Treasury may by order designate any of the Communities or the European Investment Bank for the purposes of this section.

(3) Where an organisation has been designated for the purposes of this section, then any security issued by the organisation shall be taken, for the purposes of this Act, to be situated outside the UK.

The CG Manual provides:

12440 Types of asset (2): Shares and securities etc [January 2010]

Securities of International/European Organisations

Special rules are provided for dealing with securities issued by certain designated international organisations.

Section 265 TCGA 1992 allows the Treasury to designate for special treatment certain organisations whose membership includes the UK or any of the Communities of which the UK is a member. Once such an organisation has been designated any securities issued by it are deemed for the purposes of Capital Gains Tax to be located outside the UK. The list of organisations that have been

designated under this provision is as follows.

- International Bank for Reconstruction and Development
- Asian Development Bank
- African Development Bank
- The European Economic Community
- The European Investment Bank
- The European Bank for Reconstruction and Development
- The European Coal and Steel Community
- The European Atomic Energy Community

77.6.2 *Inter-American Development Bank and OECD support fund*

Section 131 FA 1976 provides:

- (1) The following provisions of this section shall have effect on the UK's becoming a member of the Inter-American Development Bank ("the Bank").
- (2) A security issued by the Inter-American Development Bank shall be taken for the purposes of capital transfer tax ... to be situated outside the UK.

Section 266 TCGA provides a corresponding CGT exemption:

A security issued by the Inter-American Development Bank shall be taken for the purposes of this Act to be situated outside the UK.

Section 4 OECD Support Fund Act 1975 provides:

- (1) A person not resident in the UK shall not be liable to income tax in respect of income from any security issued by the support fund established by the Agreement if he would not be liable but for the fact that—
 - (a) the security or income is issued, made payable or paid in the UK or in sterling; or
 - (b) the support fund maintains an office or other place of business in the UK;
 and such a security shall be taken for the purposes of capital transfer tax and capital gains tax to be situated outside the UK.

77.7 **Bearer documents**

The place-of-register rule cannot apply to bearer shares as there is no

register of shareholders.

77.7.1 *Bearer shares*

The general principle is that the shares are situate where they can be legally transferred: see 77.3 (Situs of shares: general principle). Applying this rule it is clear that bearer shares are situate where the certificate is held.

77.7.2 *Bearer debt securities*

The leading case is *Att Gen v Bouwens*.²² This concerned foreign bearer bonds which were marketable in England and it was not necessary to do any act outside England in order to transfer them. Lord Abinger said at p.192:

No ordinary²³ in England could perform any act of administration within his diocese, with respect to debts due from persons resident abroad, or with respect to shares or interests in foreign funds payable abroad, and incapable of being transferred here; and therefore no duty would be payable on the probate or letters of administration in respect of such effects. But, on the other hand, it is clear that the ordinary could administer all chattels within his jurisdiction; and if an instrument is created of a chattel nature, capable of being transferred by acts done here, and sold for money here, there is no reason why the ordinary or his appointee should not administer that species of property. Such an instrument is in effect a saleable chattel, and follows the nature of other chattels as to the jurisdiction to grant probate.

The situs of bearer debt securities is where the document is to be found. Dicey agrees.²⁴ HMRC also agree. The IHT Manual provides:

22 (1838) 4 M & W 171 accessible www.commonlii.org. This was approved in *Att Gen v Winans* (No. 2) [1910] AC 27.

23 Situs governed the jurisdiction of the Ordinary (an ecclesiastical office). The jurisdiction passed to the Court of Probate in 1857, and to the Chancery Division in 1875, but nothing turns on that.

24 *The Conflict of Laws* (14th ed, 2006), para 22-044. But for a dissenting view, see 77.11 (Letter of allotment of shares).

27076 Bearer securities²⁵ [February 2006]

A security which is represented by a document of title, the property in which passes by delivery, is locally situated, for Inheritance Tax purposes, in the place where that document is found at the material time. *Att Gen v Bouwens*,²⁶ *Winans v Att Gen* [1910] AC 27.

77.7.3 Eurobonds

HMRC have commented specifically on the situs of Eurobonds in a passage which I mention for completeness but which adds nothing to the general principles:

We have also explained that, in the Revenue's view, the *situs* for IHT purposes of Eurobonds and similar fungibles in any issue depends on the terms of that issue and, in particular, where under those terms the bondholder's rights to or rights of action for property exist. Those rights will be determined by reference to general, not Revenue, law principles. So where title to the rights under an issue passes by delivery, the *situs* for IHT purposes of such rights is where the instrument of title is physically.²⁷

77.8 Intermediaries and depositories

77.8.1 The securities law background

In order to determine situs of an asset one must of course identify the asset and its legal nature. The Law Commission explain:

2.7 ...immobilisation entails depositing securities in paper form with a depository linked to a settlement system so that they are held indirectly.

25 This passage applies to both shares and debt securities.

26 (1838) 4 M & W 171 accessible www.kessler.co.uk.

27 [1994] PCB 139. For completeness, the passage concludes:

"There is little we can add to the foregoing guidance. In particular we cannot offer any undertaking about the likely future IHT liability which may arise in respect of rights to particular Eurobond issues currently extant or which may be issued in future. However, in order to be as helpful as possible, we can say that where a Eurobond issue satisfies the terms and conditions of section 124 ICTA 1988, the Revenue will treat for IHT purposes the rights and interests of the beneficiary-investors in such issues as rights to and interests in a bearer security."

A eurobond within s.124 (now repealed) had to be a bearer security, so this does not take matters much further.

Where a new issue of securities is immobilised from the outset, the entire issue will be typically constituted by a single ‘global’ or ‘jumbo’ certificate which remains in the vaults of the depository.²⁸ The depository (or its nominee) becomes the owner of the securities either by registering the securities in its name with the issuer (in the case of registered securities) or by physical possession of the global certificate (in the case of bearer securities).

2.8 Participants in the settlement system keep interests in the immobilised securities by holding an account with the securities depository. These account holders are able to transfer and pledge their interests in the securities through book entries on the depository’s books rather than by re-registration or by delivery of the underlying securities. Following the computerisation of settlement systems in the late twentieth century, the depository’s ‘books’ that record ownership are now electronic records....

2.11 Recording investors’ interests in securities as electronic bytes of information enables these interests to be transferred with ease from one account holder to another simply by a credit and debit in the computerised accounts of an intermediary. As long as the legal system recognises this as a valid transfer of an interest in securities, traditional formalities associated with the transfer of underlying securities (for example, the execution of stock transfer forms and the issuance of new certificates) can be avoided. Greater transferability of securities enhances liquidity and consequently their value.

Pooled Accounts

2.17 ... Where an intermediary holds fungible securities for more than one investor it will typically pool these securities in a single client account. To do so, the intermediary opens an account with the issuer or intermediary above it in its own name and records in its own books each individual investor’s allocation in the pooled account. In most legal systems, the only reference to an investor’s specific allocation is made in its intermediary’s accounts and not in the accounts of any higher-tier intermediary or in the register of the issuer...

Central Securities Depositories in indirect holding systems

2.19 The efficiencies generated by intermediation led the Group of

28 Footnote original: Interests in the global note may be exchangeable for definitive certificates, so that the investor can acquire a direct relationship with the issuer. Usually, however, the global note is intended to be permanently immobilised and cannot be split into definitive certificates other than in extreme circumstances, such as the failure of a bond trustee to act on the instructions of the investors upon a default.

Thirty to recommend in 1989 that each domestic market should establish a central securities depository (CSD) to hold both physical and dematerialised securities in the relevant market. Immobilisation of securities is therefore centralised in a single depository (or through a nominee of the CSD). An indirect holding system based on the immobilisation of securities in a domestic CSD is the most common model in advanced countries²⁹ and there are about thirty systems operating in this manner in Europe alone. As we explain below, the UK does not operate a centralised depository for domestic securities in this way.

National CSDs do not usually raise issues for situs as the situs of the register of the CSD is usually the same as the situs of the underlying securities. However the issue does arise for international CSDs and other intermediaries.

2.20 In addition to national CSDs, Euroclear in Brussels and Clearstream in Luxembourg operate as international central securities depositories (ICSDs). ICSDs were originally established to manage clearing and settlement of Eurobonds for which there was no supporting market infrastructure. Since their creation over thirty years ago, the business of ICSDs has expanded to also cover most domestic and internationally traded securities. Euroclear and Clearstream maintain links to CSD counterparts in all the significant domestic financial markets, facilitating cross-border securities trading, clearing and settlement...³⁰

The Law Commission then turn to the legal analysis. This is complicated by the variety of jurisdictions which may be involved. I concentrate on Belgium and Luxembourg as they are the homes of Euroclear and Clearstream. The Law Commission say:

LEGAL ANALYSIS OF INTERMEDIATED SECURITIES

2.24 Intermediation has had a substantial effect in transforming the legal nature of investor's rights in securities. In the UK and elsewhere, the traditional analysis of an investor's rights arising from its direct

29 Footnote original: In America, the Depository Trust and Clearing Corporation has custody, through its nominee Cede & Co, of between 60% to 80% of all publicly traded securities in the US. In 1999, this amounted to securities worth \$23 trillion.

30 Law Com., *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).

relationship with an issuer and based on its physical possession of securities or by an entry in the issuer's register no longer reflects the reality of the market place....

2.31 Belgium³¹ and Luxembourg³² are each home to major ICSDs (Euroclear and Clearstream respectively) and both have recently clarified their respective securities laws. Investors that hold securities through an intermediary in an omnibus account are treated as having a co-ownership right in the pool of fungible securities, exercisable only against the intermediary. Should the intermediary fall insolvent, the investor is given a right of revendication, that is to say, a claim for the return of property enforceable against the intermediary and its creditors...

Direct enforcement versus indirect enforcement

2.35 In all common law jurisdictions (such as the UK and the US) and a number of civil law countries (for example Belgium and Luxembourg), an investor that holds through an intermediary is unable to exercise the rights it may have in the underlying securities directly against the issuer of those securities.³³ The investor can only enjoy the fruits of its investment by enforcing its rights against its intermediary. Furthermore, the investor will be generally prohibited from making a claim against securities held in the account of a higher tier intermediary but must rely on the contractual and fiduciary obligations of its own intermediary to pursue such claims....

2.49 The effect of commingling securities in a pooled account is generally to preclude the continuing existence of direct property rights of individual owners in the specific securities held prior to commingling...

LEGAL PROTECTION BASED ON CO-OWNERSHIP

2.51 In a number of EU Member States, account holders are given proprietary rights (or the equivalent protection) by treating their interests in a commingled account as co-ownership (or co-proprietary) interests in a fungible pool.

2.52 In Belgium³⁴ and Luxembourg,³⁵ statute converts what would otherwise be a mere contractual claim against the intermediary into an

31 Footnote original: Belgian Royal Decree No. 62, as co-ordinated by Royal Decree of 27 January 2004.

32 Footnote original: Luxembourg Law of 1 August 2001 on the circulation of securities and other fungible instruments, Articles 6.7 and 15.

33 Footnote original: Unless the issuer permits otherwise by contract or provisions in a deed poll or trust deed.

34 Footnote original: Belgium Royal Decree No 62, Article 2.

35 Footnote original: [Luxembourg] Securities Act 2001, Article 7.

intangible co-ownership right in a pool of fungible book-entry securities held by the intermediary.³⁶

A note on terminology. It is apparent from the above that the terms “depository” and “intermediary” may be used synonymously. I prefer the word “**intermediary**” as an asset may be held through a number of intermediaries and “depository” only seems apt for the first of the chain.

I use the word “**investor**” to describe the ultimate holder of the securities through one or more intermediaries. I refer to the investors assets as “**intermediated securities**” but without prejudging the issue of whether those assets are properly described as securities in the normal sense of that rather vague word. I refer to the asset held by the ultimate depository as “**the underlying security**”.

77.8.2 *Situs*

There are no relevant statutory provisions, so the common law rules apply for IHT.

The relevant principle is that an asset is situate where it can be dealt with. An intermediated security is dealt with (ie transferred) in the jurisdiction of the intermediary. That is the jurisdiction where litigation over the transfer of the intermediated security would normally take place. So that is the situs of the intermediated security; the situs of the underlying security is irrelevant.

It might be argued that the situs of the investor’s asset (the intermediated security) must be that of the underlying security since:

- (1) A simple bare trust or nominee ship is transparent for IHT situs.³⁷
- (2) The underlying security is held on a bare trust, though of course that does depend on the documentation and law involved.

However the trust (if there is one) is not a simple bare trust since it allows pooling and change of title is effected by registration; in fact it is not properly described as a bare trust in the strictest sense of that expression.³⁸

Dicey agrees:

36 Law Com. *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).

37 See 77.25 (Interest under bare trust or nominee ship).

38 See 79.4.1 (Definition(s) of bare trust and associated terminology).

... the general principle is that the *situs* of a chose in action is where it is recoverable or may be enforced. ... Furthermore, there is an analogy between immobilised securities and registered securities (which are normally regarded as situated where the register is located). Accordingly, the *situs* of immobilised securities should be regarded as the place where the depository is established and where it keeps the database in which the entitlements of the depositors are recorded.³⁹

This is also supported by Canadian authority:

The place where the central securities depository control account is located could [and should] be considered the situs of “dematerialized” securities. In a multi-tiered holding system, the account would be situated at the financial investment intermediary on whose books the interest of the debtor appears. This is the place where the record that determines title is to be found.⁴⁰

The Law Commission agree:

21.6 The concentration of the investor’s interests into one account *with a single situs* can also greatly simplify conflicts of laws issues. This is of particular benefit to lenders wishing to take security over a portfolio of securities. Provided that the choice of law rules applied to the different intermediated securities are clear, the lender need only concern itself with the perfection requirements of the jurisdiction in which the account is located rather than the requirements of each of the jurisdictions applicable to the various underlying securities.⁴¹

Thus the situs of the intermediated security (the asset held by the investor) may be different from the situs of the underlying securities. However such differences are not surprising since, as the Law Commission say, “Intermediation has had a substantial effect in transforming the legal

39 14th ed para 22-043. This view is enthusiastically supported by Benjamin, *Interests in Securities* (2000), Chap 7. See too the Trusts Discussion Forum archive accessible www.trustsdiscussionforum.co.uk under the thread “Will for Shares of British Virgin Islands (IBC) Holding”.

40 *Re Bloom* [2004] BCSC 70, 27 BCLR (4th) 176, accessible www.canlii.org.

41 Law Com. *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).
<http://lawcommission.justice.gov.uk/>

nature of investor's rights in securities.” Investors may ignore the difference between intermediated securities and underlying securities, but if so they may be surprised on the insolvency of an intermediary, as actually happened in the case of Lehman Brothers.

77.8.3 *HMRC view(s)*

HMRC take a different view. The IHT Manual provides:

27077 Eurobonds and American depository receipts [January 2008]

The situs of securities dealt with through computerised clearing systems (e.g. Euroclear; CEDEL [which became Clearstream in 2002]) is regarded as determined by the terms of issue of the particular security.

...

That is, HMRC regard clearing systems as transparent for situs; what matters is the situs of the underlying security. Another HMRC statement makes the same point:

... where a financial institution or other intermediary has purchased Eurobonds or similar fungibles through Euroclear or Cedel [now Clearstream] on behalf of a client-investor, the Revenue will treat the financial institution or intermediary as the nominee or agent of the client-investor, unless the terms of the particular issue prescribed otherwise. So, save in the excepted circumstances, the Revenue will look through the intermediary and treat the beneficiary-investor as owning the underlying Eurobonds or similar fungibles.⁴²

The CG Manual discusses the issue under the heading “depository receipts”. The Manual first discusses the securities law background and practice:

50240 Depository receipts [May 2012]⁴³

You may come across assets referred to as Depository Receipts (DRs). The commonest are American Depository Receipts (ADRs). DRs are used as substitute instruments indicating ownership of securities such as shares. Although DRs may be owned by anyone, they are

42 [1994] PCB 139.

43 The current text was announced in HMRC Brief 14/12 (May 2012).

designed primarily to enable investors to hold and deal in shares of companies located in countries other than their own. Such activities might otherwise be inhibited by difficulties in transferring original share certificates from one country to another. The investors hold or trade the DRs rather than the share certificates themselves.

A person holding shares for which DRs are available can convert them into DR form by depositing the share certificates with a local branch of a depository (a financial institution such as a bank). The depository issues a DR. This document certifies that the depository, or an appointed custodian in the country of the underlying shares, holds the share certificates and that the owner of the DR is entitled to the share certificates on surrender of the DR. The precise detail of the arrangements may vary, but the holder of a DR will generally have many of the benefits associated with share ownership. In particular:

- the DR can be exchanged for the underlying shares on demand by the DR holder
- any dividends, subject to a handling fee, flow through to the DR holder.
- the holder of shares in DR form may at any time cancel the arrangement by asking for delivery of the share certificates in respect of their underlying shares, and surrendering the DRs at a local branch of the depository.

We have been asked to clarify how holding shares via DRs will affect liability to Capital Gains Tax or Corporation Tax on chargeable gains following the decision of the First Tier Tribunal in the Stamp Duty Reserve Tax case of *HSBC v HMRC*, [2012] UKFTT 163 (TC).

UK-issued DRs

Where a DR is issued in the UK the HMRC view is that the holder of a DR is the beneficial owner of the underlying shares.

More accurately, whether a trust is created would depend on the terms of the deposit agreement construed in accordance with the law governing the agreement.⁴⁴ But I do not think that is likely to matter very often, because if (I am unsure) UK law DRs are found in practice, one would expect the terms of the agreement to provide for a trust.

Assuming there is a trust-based DR, the Manual goes on to set out the tax implications:

The practical implications include that:

⁴⁴ That is self-evident, but if authority is needed, see *HSBC* at [85].

[1] a transfer of shares by a shareholder to a depository in exchange for an issue of DRs is not a disposal of the shares for capital gains purposes because the shareholder retains beneficial ownership of the shares

[2] a disposal of the DRs is a disposal of both the DRs themselves and a disposal of the underlying shares.⁴⁵ In practice the value of a DR will track the value of the underlying shares very closely and to that extent the consideration for the disposal of the DRs should be regarded as consideration for the disposal of the shares

[3] in a share exchange or company reconstruction in which shareholders have an option to receive DRs instead of being issued with shares we accept that the shares are to be treated for the purposes of TCGA92/S135 as being issued to the shareholders, see CG52500+.

Curiously, the current manual deleted the passage formerly found which stated that the situs of the DR is the situs of the underlying security. That might reflect a hesitant change of view or just an accident. But as far as I know, HMRC practice has not changed. There is a certain common sense in (what I take to be) the HMRC view that situs of the DR is determined by the situs of the underlying security. However, situs is not a matter of common sense, and that view cannot stand against the authorities set out above. The common law situs rules look to the situs of the DR, not the underlying security. (For CGT purposes specific CGT provisions reverse the common law rule; I consider that elsewhere.)⁴⁶

It must be frustrating for HMRC to see a significant part of the economy taken out of the scope of IHT by means of clearing systems and depository receipts. But in practice the loss of tax will be nil or next to nil, for well advised UK resident foreign domiciliaries will not hold UK situate investments, above the nil rate band, and for non-residents, IHT on such assets is largely uncollectable. Indeed the current law could aid the UK economy by encouraging UK investment, or at least it could do so if

45 [Author's note]. This assumes that the investor holds two assets, "the DRs themselves" and the underlying securities. That is not correct. A DR should be regarded as a matter of general law as one asset and not two. Admittedly a DR confers a number of different rights, but that is also true of a share, a unit in a unit trust, an equitable interest, and most if not all types of property which are nevertheless regarded as single items of property and not as two or more distinct items. However, it does not matter as the Manual goes on to effectively ignore the two-asset analysis. In the view of the Manual, the only asset which matters is the beneficial interest in the underlying share.

46 See 78.9 (Intermediaries and depositories).

HMRC acknowledged it.

77.8.4 *Contract-based depositary receipts*

There are in principle two possible types of depositary receipts:

- (1) The depositary may hold the underlying investment on trust for the investors (directly or through intermediate depositories). I refer to that as a **“trust-based”** depositary receipt, and the discussion until this point has assumed that is the general form that is used.
- (2) The depositary may hold the underlying investment beneficially, and have a merely contractual obligation to transfer money or assets to the investor. I refer to those as **“contract-based”** depositary receipts.

Until 2012 it was, I think, generally accepted that ADRs used in practice were trust-based, and this was the view expressed in the CG manual.

However, in *HSBC Holdings v HMRC*⁴⁷ it suited HMRC to argue that HSBC depositary receipts were contract-based. The tribunal heard expert evidence and clearly preferred the view that the ADRs, which were “fairly typical”⁴⁸, were contract-based, though the conclusion is tentatively expressed:

148. Overall our conclusion is that we are not satisfied as a matter of fact that under the law of the State of New York the holder of an HSBC ADR has a beneficial interest in the underlying fund of HSBC shares

While in the HSBC litigation it suited HMRC to argue for contract-based ADRs, that conclusion would often favour the taxpayer. Accordingly HMRC now seek to return to what was formerly understood to be the position. The CG manual provides:

50240 Depositary receipts [May 2012]⁴⁹

... DRs issued outside UK

Where a DR is issued outside the UK the question of whether the holder of the DR is the beneficial owner of the underlying shares will be determined by reference to the law of the territory in which the DR is issued.

47 [2012] UKFTT 163 (TC).

48 at [97].

49 The current text was announced in HMRC Brief 14/12 (May 2012).

More accurately, whether a trust is created would depend on the terms of the deposit agreement construed in accordance with the law governing the agreement. The CG manual continues:

Information on beneficial ownership may be provided to investors by the depository.

That seems unlikely.

Beneficial ownership not conclusively determined by overseas law

Where beneficial ownership of the underlying shares cannot conclusively be determined by reference to the law governing the arrangements relating to the issue of the DRs, for tax purposes HMRC will continue to determine beneficial ownership according to its understanding of the principles of UK law. This means that HMRC will continue to apply its longstanding practice of regarding the holder of a DR as holding the beneficial interest in the underlying shares.

The ADRs referred to in the HSBC decision fall into this category.

Thus HMRC first disregarded their longstanding practice, enshrined in the CG Manual, and now disregard the tribunal's decision in favour of HMRC's expert's evidence. The reader may think this a not very impressive display of administration. Now it is done, the genie is not so easily returned to the bottle. If it suits them, taxpayers may properly proceed on the basis that the Tribunal correctly decided that the HSBC ADRs, and any others in standard form, are contract-based.

77.8.5 *Tax position of contract-based ADRs*

Lastly, the CG manual turns to consider the tax position of contract-based DRs:

Beneficial ownership determined by overseas law

Where the relevant law means that the holder of a DR is not the beneficial owner of the underlying shares the practical implications include that:

[1] a transfer of shares by a shareholder to a depository in exchange for an issue of DRs is a disposal of the shares for capital gains purposes because the shareholder loses beneficial ownership of the shares

[2] a disposal of the DRs is not a disposal of the underlying shares

[3] in a share exchange or company reconstruction in which shareholders have an option to receive DRs instead of being issued with shares the conditions of TCGA92/S135 will not be met by shareholders who take DRs as they have not been issued with shares.

In addition:

- (1) The situs of the ADR for IHT purposes would be New York.
- (2) The situs of the ADR for CGT purposes would however be the situs of the underlying asset, if UK situate.
- (3) The income from the ADR would be foreign source income (but subject to the manufactured dividends rules, if applicable).

77.9 CREST

The Law Commission explain the securities law background:

2.21 Investment securities constituted under English, Scots and Northern Irish law can take either certificated or dematerialised ('uncertificated') form. CREST is the main securities settlement system in the UK and settles securities in uncertificated form. Unlike system operators in most national settlement systems, CREST does not hold domestically issued securities⁵⁰ as a central securities depository for account holders. CREST has no proprietary rights in the securities and is not treated as 'holding' these securities from the issuer on behalf of its participants. Rather, the CREST member is treated as holding directly from the issuer. This CREST member alone is entitled to exercise voting, dividend and other rights attaching to the shares and may do so directly against the issuer.

2.22 Instead, it is the register operated by CREST which, in the case of UK securities, is actually constituted by statute⁵¹ as the sole legal record of entitlement to the securities. Although the issuer will maintain a regularly reconciled record of what is held in CREST for corporate events purposes, it is the CREST register that confers legal title and which determines the person or entity named in the register as the

50 Footnote original: That is, in the UK, Republic of Ireland, Isle of Man, Guernsey and Jersey.

51 Footnote original: For UK companies it is the entry in the CREST register that confers legal title on the owner: Uncertificated Securities Regulations 2001, SI 2001 No 3755 reg 24. For Irish, Manx, Guernsey and Jersey securities, the pre-2001 system still operates. Settlement is through CREST but legal title is transferred when the entry is made in the issuer's register.

shareholder for company law purposes.

Thus holding a security through CREST (rather than in certified form) does not make any difference as to situs.

77.10 Share certificate endorsed in blank

The IHT Manual explains the background law and practice as follows:

27150 Share certificates endorsed in blank [January 2008]

Certificates of many American and Canadian railroads and of certain other companies have a printed form of transfer and/or power of attorney endorsed, which enables the certificates, when the form is signed by the registered holder of the shares, to be transferred by delivery.

It is common practice for such certificates to be “endorsed in blank”, i.e. for the endorsement to be signed by the registered owner as transferor, the name of the transferee being left blank.

Dividends are paid by the company to the registered owner, and if these shares have in fact changed hands by delivery, the beneficial owner for the time being recovers his dividends from the registered owner.

Usually the shares are registered in the name of a recognised broker, bank, discount house, etc, known in England as a “good Marking Name” or, in America, as a “Street Name”. This helps to make sure that the purchaser receives their dividends with minimum of trouble and risk.

A list of good Marking Names recognised by the London Stock Exchange is printed in the Stock Exchange Official Year Book.⁵²

However the beneficial owner can have them registered in their own name, or in the name of some nominee other than a good Marking Name.

I doubt if this is still current practice, but set out the HMRC comments for completeness:

The local situation of shares for Inheritance Tax purposes is determined as follows:

[a] If the registered owner is a good Marking Name, the shares are situated where the register is kept, not where the certificates are

52 Author’s note: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

found. ...⁵³

- [b] If the registered owner is the beneficial owner himself, or a nominee of the beneficial owner, or, in the case of settled property, the trustees of the settlement or their nominees, the rules are as at (a) above.⁵⁴

The HMRC view is that one ignores the fact a share transfer form has been endorsed in blank. This is right, because the endorsed certificate does not alter the place where registered shares are dealt with as between shareholder and company: see 77.3 (Situs of shares: general principle). At this point the Manual becomes confused:

- [d] If the registered owner is neither a good Marking Name, the beneficial owner, nor any other of the persons named at (b) above, and the certificates are physically present in the UK at the material time, the shares are locally situated in the UK for Inheritance Tax purposes, (*Stern v The Queen* [1896] 1 QB 211).

I find it hard to see how [d] can apply: the registered owner will always be one of the persons named at [b] (beneficial owner or a nominee).

Certificates of this kind, not containing any express obligation or promise, are not specialty debts – see the *Williams* case at [1942] AC 556.

That is correct.

77.11 Letter of allotment of shares

A letter of allotment confers the right to an issue of shares. The letter is normally transferable by delivery, just like a bearer security. One would have thought that the bearer security rule would apply. However, in

⁵³ Omitted text set out at 77.4.2 (Overseas branch register).

⁵⁴ The Manual continues:

“[c] In such cases it is considered that the legal and only title of the holder consists in his registration as owner. By bringing the certificates to the UK he is in a position to create, in a purchaser, an equitable interest in the shares which would be situated here, but until he does so the beneficial interest has not been severed from the legal interest so as to have a different locality.”

This is garbled, or muddled and wrong.

Young v Phillips 58 TC 232 a letter of allotment in respect of a company with UK registered shares was held to be situate in the UK, not where the letter of allotment was held. This case concerned the common law rules before s.275A TCGA and is still relevant for situs for IHT, and for CGT in the case of foreign incorporated companies. Nicholls J cited the passage in *Att Gen v Bouwens* set out above⁵⁵ and said:

From this it is apparent that for an instrument to be treated as analogous to a chattel for situs purposes more is required of it than mere transferability of title by delivery. A simple contract debt owed by a foreign debtor to a person resident in England and evidenced by a promissory note might be, and normally would be, freely and effectively transferable in England, but such a debt has as its situs the country where the debtor resides, not the place where the creditor lives or currently holds the promissory note. What is required is that in practice the value of the instrument can be realised by a sale of the instrument for money in the country where the instrument is found: the reason being that if an instrument in England could be so sold, the ordinary could properly and effectively administer that asset by selling it here, there being no need in such a case to have recourse to where the foreign debtor lived. When so saleable an instrument is in practice realisable in the same way as a saleable, valuable chattel, and hence, for situs purposes, it falls to be treated in the same way. ...

This approach requires an investigation into whether a market exists. The judge said:

In the instant case there are no grounds for concluding that in practice the value of the letters of allotment, *which were issued with a life-span of a little over two months*, could have been realised by a sale of those documents for money wherever they were to be found. The Special Commissioners pointed out that no evidence had been led before them to prove that there existed a market in letters of allotment of shares in private companies. Having regard to the fact that shares in private companies may not be the subject of a public issue, they expressed themselves as being far from prepared to assume the existence of such a market. With that approach I agree. And it is to be noted that the “sales” of the letters of allotment which did take place in Sark were not

⁵⁵ See 77.7 (Bearer documents).

arm's length transactions but were to purchasers wholly under the control of the vendors, and they had been prearranged even before the letters of allotment were issued. Accordingly, applying the principles I have mentioned to the facts of this case, the renounceable letters of allotment in the UK companies do not fall to be treated as saleable chattels, realisable where they might be found from time to time. They are documents evidencing rights against UK companies, which rights were enforceable in the UK.

(Emphasis added)

The requirement for “marketability” is not well founded in the cases, nor does it make good sense. A buyer could be found for any valuable asset in any community where private property exists and one buyer makes a market.⁵⁶ Whether a market exists is a question of fact, so application of the marketability test will result in assets moving from one jurisdiction to another as markets come and go. It seems conceivable that there was no market in Sark (population 600). But with improved communications markets are no longer local to jurisdictions, as was assumed in *Young v Phillips*. An asset can be sold anywhere.

It seems that *Young v Phillips* stretched the law in order to defeat a tax avoidance scheme, and in doing so has left something of a mess.

The CG Manual provides:

12440 Types of asset (2): Shares and securities etc [January 2010]
Letters of allotment

Letters of allotment should be treated as located in the country where the company issuing the letters is registered. In the case of *Young v Phillips* 58 TC 232 bonus shares were issued in respect of registered shares located in the UK. The issue was made in letter of allotment form. The letters were then taken to the Channel Islands and disposed of there. It was held that the letters of allotment were located in the UK because they evidenced rights which were properly enforceable only in the UK.

⁵⁶ This is self-evident, but for an illustration see *FGP v Union of India* 2004 (168) Excise Law Times 289 (Supreme Court of India) accessible www.kessler.co.uk. Contrast the sophisticated definition of “asset for which there is a liquid market” in ICAEW Tech 7/03 para 19 (Guidance on the determination of realised profits and losses in the context of distributions under the CA 1985).

Thus in the HMRC view *Young v Phillips* is relevant to letters of allotment only, it has no relevance to the situs of bearer debt securities or shares which are governed by cases of much higher authority. It is suggested that the reasoning should be restricted to short life assets (such as the letters of allotment in that case which, it was stressed, had a life of only two months).

Even letters of allotment may be situate where the letter is situate, if there is a “market” there.

77.12 Simple contract debt

The basic principles are well established:

As to the locality of many descriptions of effects, household and moveable goods, for instance, there never could be any dispute; but to prevent conflicting jurisdictions between different ordinaries, with respect to choses in action and titles to property, it was established as law, that judgment debts were assets, for the purposes of jurisdiction, where the judgment is recorded; leases, where the land lies; specialty debts, where the instrument happens to be; and simple contract debts, where the debtor resides ...⁵⁷

The IHT Manual provides:

27091 Debts: contractual [February 2006]

In English law, a **simple**⁵⁸ **contract** debt is situated where the debtor resides: *Att Gen v Bouwens*;⁵⁹ *English, Scottish and Australian Bank v IRC* [1932] AC 238.

I call this “**the place-of-debtor rule**”. It can be traced back to Elizabethan times.⁶⁰

A winding-up order against the debtor does not affect the situs of the

57 *Att Gen v Bouwens* (1838) 4 M & W 171 accessible www.commonlii.org.

58 [Author’s note] A “simple” contract is one which is not a specialty. Different rules apply to judgment debts and bank accounts: see below.

59 (1838) 4 M & W 171 accessible on www.kessler.co.uk.

60 *English Scottish & Australian Bank v IRC* [1932] AC 238 at p.248.

debt,⁶¹ but judgment against the debtor (turning the debt into a judgment debt) does do so.⁶²

77.12.1 *Meaning of “residence” and dual resident debtor*

In order to apply the place of debtor rule one needs to determine where the debtor resides. For this purpose the test of residence for a company is not the usual test (management and control) but where the company carries on business:

Now, when you are dealing with a corporation, you are dealing again with a legal notion, and you have to examine the question where the debt can be said to be situate. It appears to me plain that a corporation according to our law is deemed to reside for the purposes of suit in the place where it carries on business in its own name ...⁶³

The *rule* has a certain logic, for situs of a simple debt is (or at least, in the past broadly was) decided by reference to jurisdiction, and jurisdiction over a company depends (or at least, in the past broadly depended) on its place of business and not its tax-residence.⁶⁴

The *terminology* used in the rule is inapt, and it would be better if some other word were used, rather than using (or rather, misusing) the word “residence” in this non-standard meaning. But the terminology having arisen for historic reasons, there is not much to be done about it. It does not matter too much as long as one remembers that “residence” here has this non-standard meaning, in relation to companies. In practice it is rare for there to be any difference between tax-residence and residence under this test.

Where the debtor is dual resident, the place-of-debtor rule does not provide a solution. A tie-breaker is need, and the solution adopted in *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 is, where the debt was payable.

61 *Wight v Eckhardt* [2004] 1 AC 147. In practice this issue will not usually arise.

62 See 77.16 (Judgment debt).

63 *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.120 followed *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733.

64 See *Dicey Conflict of Laws* (14th ed., 2006), para 14-059 and 30-007.

77.12.2 *Place-of-debtor rule v. jurisdiction where debt enforced*

Many cases simply state the place-of-debtor rule without giving any reason for it. There is no reason why the rule should have a reason, as any rule is bound to be arbitrary and any clear rule is better than none.

Some cases offer the reason that (1) the debt is situate where it can be enforced, and (2) it is enforced where the debtor resides.⁶⁵ However the background law (that is, conflict of law or private international law) has moved on considerably since *New York Life Insurance* was decided in 1924. It is now largely governed by international conventions, under which it is only very approximately correct to say that residence of the debtor is the test of jurisdiction, even though in many cases the end result is the same.⁶⁶ This raises a difficulty where the debtor resides in one jurisdiction but the debt is enforceable in another. Do we continue to apply the historic residence tests, or do we say the debt is situate where it is enforceable, ignoring the place that the debtor resides? *Raiffeisen Zentralbank v Five Star Trading* [2001] QB 825 notes the difficulty:

[36] In the case of intangible property, English law has, for various purposes (e.g. inheritance), traditionally allocated to it a situs at the place of the debtor's residence. This is on the basis that the debtor is there directly subject to the coercive power of the courts to enforce the obligation. The location of a right of action in this or any way is, however, evidently artificial. Parenthetically, I add that "coercive power" would itself appear to be an unstable international concept, capable of widely differing interpretation ...

[37] Modern conditions underline the artificiality of selecting supposed control at the debtor's residence as an appropriate basis for

65 *New York Life Insurance v Public Trustee* [1924] 2 Ch 101. It has also been suggested that the reason for the rule is that the debtor's place of residence is where the assets used to satisfy the debt will most probably be found: *New York Life Insurance* at p.114 following *Commissioner of Stamp v Hope*. But it would be better to say the rule has (and needs) no reason than to give such a slender reason as this, for if a debtor is resident in country A, but has assets in country B, no-one suggests the debt is situate in country B.

66 The background private international law is discussed in slightly more detail in connection with the location of the source of interest, where HMRC suggest similar issues arise: see 19.6.5 (Impact of modern private international law). A full discussion of the background law would need a book to itself (which is another good reason for not using jurisdiction for the purposes of tax law).

characterisation or choice of the relevant law to determine questions regarding the validity or effect as against the debtor of an assignment. Jurisdiction may be grounded on consent and various other bases apart from residence. Obligations are commonly enforced today not against the person, but against assets. Debtors often trade or hold some or even all of their assets overseas. Proceedings are as a result often begun and enforced against debtors in countries other than that of their residence, as in this case. The move towards single legal markets, like those involving countries party to the Brussels and Lugano Conventions, makes judgments readily exportable between countries.

It is considered that although jurisdiction was the historic reason for adopting the place-of-debtor rule, now the rule has been chosen, one should continue to look to residence, regardless of where the debt would be enforced. So a debt is situate where the debtor resides even though enforceable elsewhere, eg under an exclusive jurisdiction clause. Although the historic reason for the place-of-debtor rule no longer holds much if any validity, the rule is as good as any other. Well-established precedents are not overturned merely because their historic reason has become unsound. So it is considered that the law is settled.

77.13 Specialty obligation

77.13.1 *Meaning of “specialty”*

“Specialty” is an opaque technical term whose meaning can only be ascertained from the case law. Four categories of asset are “specialties”:

- (1) The paradigm example of a specialty is a debt due under a deed.
- (2) The term also applies to deeds which create or record obligations which are not debts.⁶⁷ A life policy, contract for deferred annuity, capital redemption policy and the like are specialties if made by deed. Shares are not specialties.⁶⁸
- (3) The term also includes a debt incurred under a statute, whether or not

67 In *Aiken v Steward Wrightson Agency* [1995] 1 WLR 1281 the term was applied to a contract by deed to provide services (and an action for breach of that contract was held to be an action “upon a specialty” so as to qualify for a 12-year limitation period).

68 *R v Williams* [1942] AC 541.

it is a debt under a deed.⁶⁹

(4) Certain debts are by statute given the nature of a specialty debt.⁷⁰

77.13.2 *Situs of specialty*

The IHT Manual provides:

27091 Contractual [February 2006]

A specialty debt is situated where the instrument happens to be.

I call this “**the specialty rule**”.⁷¹ This rule (like the place-of-debtor rule) can be traced back to Elizabethan times.⁷² So a debt due from a UK resident can be made non-UK situate for IHT by drafting the debt as a specialty and keeping the document offshore. Conversely a debt, policies, and other specialties can be made UK situate for IHT by bringing the deed here.

The specialty rule requires one to ascertain whether a debt is a specialty, and the IHT Manual offers a little guidance:

27079 Bonds and debentures under seal [February 2006]

Debentures if under seal, are specialty debts, locally situated where the document is found. So, also, are debts due from the Crown, or under a statute, whether under seal or under hand, and even when they are secured by registered bonds.

Most UK government securities (e.g. Treasury Loan, Exchequer Stock, War Loan) are registered, so that their locality is determined by the place of registration. However, some bonds issued by the UK government (containing an express obligation to pay) are governed by the general rule that a debt due from the Crown is a specialty debt, situated where the document evidencing the obligation is physically found.

In *Royal Trust v Att Gen for Alberta* [1930] AC 144, the decision related to registered bonds of the Dominion of Canada and their situation for the

69 *Royal Trust v AG for Alberta* [1930] AC 144.

70 eg s.14(2) CA 1985: “Money payable by a member to the company under the memorandum or articles is a debt due from him to the company, and in England and Wales is of the nature of a specialty debt.”

71 *Att Gen v Bouwens* (1838) 4 M & W 171 accessible on www.kessler.co.uk. This was approved in *AG v Winans (No. 2)* [1910] AC 27; *Comr of Stamps (New South Wales) v Hope* [1891] AC 476.

72 *English Scottish & Australian Bank v IRC* [1932] AC 238 at p.248.

purpose of Alberta death duties.

27080. Treasury Bills, British Savings Bonds, National Savings Income Bonds [February 2006]

Securities falling within the specialty rule includes [sic] Treasury Bills and British Savings Bonds.

Although no actual bonds are in existence holders receive a bond book or, in some cases, a certificate. When the person beneficially entitled to these bonds is domiciled outside the UK, the bonds are regarded for Inheritance Tax purposes as situated outside the UK at any time that the bond book or certificate is situated outside the UK.

National Savings Income Bonds, however, are securities registered on the National Savings Stock Register and as such are situated in the UK.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

Perhaps the withheld text states how HMRC check that bonds are not omitted from IHT account. The Manual continues:

27091 Contractual [February 2006]

... Corporation mortgages, issued by local authorities under seal, and Northern Irish Land Bonds, are examples of specialties, situated where the instrument is located. (Corporation mortgages should not be confused with Corporation stock, which is far more common and which is a registered security situated where the register is kept.)

This rule overrides the place-of-register rule: see 77.4 (Situs of registered shares).

77.13.3 *What is a “deed”?*

A document governed by law which recognises the concept of deeds is a specialty if it is executed in accordance with the that law’s requirements of a deed. The requirements which must be met for a document to be a “deed” (and so a “specialty”) vary substantially between jurisdictions. I cannot cover every jurisdiction in this book, but comment on some of the more important ones.

77.13.4 *English law requirements of a deed*

For a document to be a “deed” in English law it was formerly a

requirement that the document must be sealed. The requirements under the Law of Property (Miscellaneous Provisions) Act 1989 are now that a deed must be signed, witnessed, delivered, and must “make it clear on its face that it is intended to be a deed”. These rules govern the meaning of “specialty”. So a seal is not now required for an English law document to be a “specialty”.⁷³ No particular form is necessary to be a “specialty” beyond the formalities of a deed.

The same applies in Northern Ireland.⁷⁴

As a shorthand, a deed was formerly referred to as a document “under seal” and a non-deed as a document “under hand”. This usage is now out of date (at least in England) but it is still found in HMRC Manuals.

77.13.5 *Isle of Man law requirements of a deed*

In the Isle of Man a seal was never required, except for corporations, though for a document to be a deed the parties must intend it to be a deed.⁷⁵

77.13.6 *Scotland and jurisdictions which do not recognise “deeds”*

The concept of a “deeds, ie a distinction between a deed (however defined) and a simple document which is not a deed, applies in common law jurisdictions. As far as I know, it is not found in other jurisdictions. What is the position if a document is governed by a law which does not recognise the concept of a deed? There is authority that the document will be a specialty if it is executed in accordance with the English law requirements of a deed.⁷⁶

Jersey and Guernsey do not have a concept of a deed.

Scots law does not have the concept of a deed:

[16] In my opinion the board minute of 5 March 1991 amounted to a “deed” for the purposes of clause 4(1) of the 1989 Supplemental

73 The Law Commission took this view in Working Paper No. 85 (1985) and Report No. 253, para 2.12.44.

74 Article 3 Law Reform (Miscellaneous Provisions) (NI) Order 2005.

75 *Aall Trust & Banking Corporation v Samuel McCormick* 2 OFLR 85, Butterworths Offshore Service Cases, Vol 2, p.479.

76 *Alliance Bank of Simla v Carey* (1880) 5 CPD 429.

Definitive Deed. ... I reach this conclusion for the following reasons. First, it is clear that the word “deed” has no technical meaning in Scots law. In *Henderson's Trs v IRC*, 1913 SC 987, a case dealing with the question of whether a minute of acceptance of office by trustees engrossed upon a trust disposition and settlement was a deed for the purposes of the Stamp Act 1891, LP Dunedin stated (at 989):

“Now the Stamp Act does not define what a deed is, and I think it unnecessary to consider whether the word 'deed' is there used as a term of art, because in any case it is only in England that it is so used. I am quite content to take 'deed' is being used in the popular sense. The statute has not defined what a deed is, nor am I tempted to give a definition, but I am certainly clearly of opinion that, whatever is a deed, this acceptance of trust is not”.

Lord Kinnear stated (at 990):

“I am entirely of the same opinion, and I agree with your Lordship that for the purpose of this case the word 'deed' is a word of ordinary language, because it is not in our system a term of art. I agree also that it is unnecessary to attempt any exact definition of what the word 'deed' means; but I take the definition which was suggested in the ingenious argument for the Inland Revenue, in which it was said that a deed was any formal instrument which creates a legal relation”.

In *Lennie v Lennie's Trs*, 1914 1 SLT 258, Lord Dewar quoted from the last case and continued (at 260):

“In the absence of any definition of what a deed is, the question just comes to be whether it is reasonable to suppose that a business man would regard a pencil jotting on the back of an envelope as a 'deed'. I do not think that he would. He would never think of calling it a deed in ordinary conversation or speak of it as he would of his title 'deeds' or trust 'deed' or 'deed' of co-partnery. The word 'deed' would, I think, suggest to his mind some document his solicitors prepared, or at all events something of a much more formal character that we have here”.

It is unnecessary for present purposes to attempt any definition of the word “deed”. Nevertheless, I take from these cases that the significant characteristics of a deed are first that it should have some degree of formality and secondly that it must demonstrate an intention to create a legal relation.

[17] The minute of the board meeting of a company, duly signed by the chairman, is to my mind clearly a formal document. Section 382 of the Companies Act 1985 ... provided in subsection (1) that every company shall cause minutes of all proceedings at meetings of its directors to be

entered in books kept for that purpose. The reason for that provision is that the minutes serve an important purpose in recording the formal decisions of the board, which is of course the body that is responsible for managing the company. Thus board minutes are important documents. Subsection (2) then provides:

“Any such minute, if purporting to be signed by the chairman of the meeting at which the proceedings were had... is evidence of the proceedings”.

That too indicates a degree of formality in the notion of board minutes; they may have to be relied on in future, and it is important to establish precisely what the directors decided on any particular matter. Apart from the provisions of the Companies Act, section 2 of the Trusts (Scotland) Act 1921 states that the expression “trust deed” shall mean and include “any... resolution of any corporation”. That again suggests that formal resolutions taken by a company, whether in general meeting or through its board of directors, are to be regarded as documents that have the requisite degree of formality to constitute a deed. ...

The IHT Manual provides:

27092 Debts in Scotland [January 2008]

In Scotland, the rule that a debt is situated where the debtor resides applies alike to specialty debts and to those due on simple contract. For Inheritance Tax purposes debts due from persons resident in Scotland are regarded as locally situated there. If any difficulty arises in applying this rule, refer the case to TG (IHTM01081).

Any case where a Scottish instrument under seal is outside the UK and the locality of the asset determines whether or not an allowance under s.159 IHTA is admissible must also be referred to TG for consideration.

This direction relates to specialty debts generally. It covers, for example,

- [1] mortgages under seal,
- [2] policies under seal, and
- [3] covenant debts, and
- [4] also applies to debts due from the Crown, or due under a statute.

It is suggested that a Scots law document should be held to be a specialty if it satisfied English law requirements of being a deed; but the outcome might depend on whether the issue is litigated in an English tribunal (applying English law principles of situs) or a Scots tribunal (applying Scots law principles, if they are different). I would be grateful to any reader who could direct me to relevant Scots authority.

77.13.7 Reason for the specialty rule and future developments

What is the reason for the specialty rule? In *R v Williams* [1942] AC at 555 the Privy Council offer this explanation:

Such an obligation [a specialty debt] was for centuries treated as very different from an ordinary debt. Indeed, the act of creating a specialty by deed was at one time possible only to men of the highest rank. Unlike debt, it was enforced by an action of covenant⁷⁷: Holdsworth, *A History of English Law*, 3rd ed., vol. iii., p. 417. The deed itself was the foundation of the action, the original debt, if any, being merged. The terms of the deed were conclusive. Specialty debts till recent [?] times conferred special rights. They used to rank in the administration of the estate of a deceased person in priority to simple contract debts;⁷⁸ and, unlike such debts, were enforceable against the real estate.⁷⁹ They were said to be “of a higher nature” than debts by contract. It is, therefore, not surprising that specialty debts by deed were treated from an early date as bona notabilia [i.e. assets situate] where the deeds were found at the time of the death, unlike ordinary debts which were said “to follow the person of debtor”.

In this reasoning the conclusion does not follow from the premises, and in any case the premises have long ceased to be valid in English law. The rhetorical language (not for the first time) conceals a weakness in the reasoning. One might conclude that the specialty rule has no good reason but *Commissioner of Stamps v Hope* [1891] AC 476 offers a better explanation:

... the distinction drawn and well settled has been and is whether it is a debt by contract or a debt by specialty. In the former case, the debt being merely a chose in action – money to be recovered from the debtor and nothing more – could have no other local existence than the personal residence of the debtor, where the assets to satisfy it would presumably be, and it was held therefore to be bona notabilia [i.e. assets situate] within the area of the local jurisdiction within which he resided; but this

77 This rule was abolished by the Civil Procedure Act 1833.

78 This rule was abolished by the Administration of Estates Act 1869.

79 This rule was abolished by the Administration of Estates Act 1833.

residence is of course of a changeable and fleeting nature, and depending upon the movements of the debtor, and inasmuch as a debt under seal or specialty had a species of corporeal existence by which its locality might be reduced to a certainty ... it was settled in very early days that such a debt was bona notabilia where it was “conspicuous”, i.e. within the jurisdiction within which the specialty was found at the time of death: see *Wentworth on the Office of Executors*, ed. 1763, pp. 45, 47, 60(1).

The reason for the rule is not that the specialty has a “species of corporeal existence”.⁸⁰ The reason is that the specialty rule is certain and easier to apply than a place-of-debtor rule. There is a little sense in that.

The Supreme Court could sweep these dusty cobwebs away. But in tax cases the point should not often arise as HMRC should not argue the point against their own Manual. It will not normally be in the interest of a taxpayer to argue against the specialty rule, as a well-advised taxpayer will keep their specialties outside the UK. So the UK courts are not likely to have to examine the issue (though it could arise in Scotland). The courts have shown themselves prepared to amend long established common law rules, such as the rule that there is no recovery for payments made under a mistake of law. But they have done so when the old law not only lacks a logical basis but is also conducive to injustice. That is not the case here. Well-established rules are not overturned merely because the underlying principle is logically unsound. Moreover, situs is a question of international law and it is “of great importance that some fixed common principles should guide the Courts in every country on international questions. In questions of international law we should not depart from any settled decisions, nor lay down any doctrine inconsistent with them”.⁸¹ So it is considered that the rule will remain even if challenged in the Supreme Court. It should be abolished (if at all) by Parliament.⁸²

80 That is either tautologous (if “having a species of corporeal existence” means “situate where the deed itself is situate”) or metaphysical (if “having a species of corporeal existence” means anything more than “situate where the deed is situate”). It is not, after all, the case that transfer of the deed brings about a transfer of the debt or right to which the deed relates.

81 *Udny v Udny* 1 Sc.&Div. 441 at p.452.

82 It is interesting to note that the specialty rule was disappplied for probate duty: s.39 Revenue Act 1862 and it does not usually apply for CGT.

77.14 Debt secured on land

77.14.1 *Specialty debt charged on land*

In the case of a specialty debt charged on land, the choice lies between the location of the land and the specialty rule (location of deed).

Let us look at the matter as one of principle. Is the rule that situs depends on location of the land a sensible or workable rule? It is not, for the following reasons:

- (1) One debt may be charged on land in two different countries. A secured debt confers a bundle of different rights, including:
 - (a) right to sue on the covenant;
 - (b) right to sell if the debt is unpaid;
 - (c) right to foreclose if the debt is unpaid.However, this bundle is a single asset. It cannot be situate in both countries.
- (2) The rule becomes absurd if a large debt happens to be secured on an asset of small value. Would one say a £100m debt is situate in Jersey if it is secured on a property there worth £100,000? But obviously one cannot have a rule where the situs depends on relative values of the debt and the security which may fluctuate enormously from time to time.
- (3) It has never been suggested that a debt charged on (say) shares is situate where the shares are situate but there is no good reason to distinguish between shares and land.

The only sensible rule therefore is to apply the specialty rule and ignore the fact that the debt is secured.

The case law is complicated. The law got off on the right footing with *Commissioner of Stamps v Hope* [1891] AC 476. Here the debt was a specialty secured on land in New South Wales. The deed was held in Victoria. The question was situs for the purpose of probate duty and the Privy Council held that the debt was situate in Victoria.

Only three years later the Privy Council muddled the waters in *Walsh v The Queen* [1894] AC 144. Here there were a variety of debts, some secured on property in and out of Queensland. It was held that the debt should be regarded as being in Queensland up to the value of the property there. The best explanation of this case is that it did not concern the common law situs rule. The case turned on the specific statute (the Queensland Dividend Duty Act 1890) which (by implication) operated an

entirely different situs rule. This explains why the earlier case of *Commissioner of Stamps v Hope* was not referred to in the judgment of the Privy Council.

Payne v R [1902] AC 552 concerned a specialty debt charged on land in Victoria. The deed was in New South Wales. The Privy Council held at p.560 (without citing authority or any discussion) that a mortgage debt was a specialty debt in New South Wales and a simple contract debt in Victoria. That is obviously wrong. They also held the asset was situate in Victoria and New South Wales, which (although followed in *Henty v The Queen* [1896] AC 567) is not now the law.⁸³ The comments must be dismissed as now overruled or *per incuriam*.

Toronto General Trust Corporation v The King [1919] AC 679 is an exceptional case that proves the existence of the general rule. Here a mortgage debt was represented by two duplicate deeds, one in Ottawa and one in Alberta. In such a case one cannot apply the rule that the debt is situate where the deed is situate, so it is sensible to fall back on the simple contract rule. But had there been only one deed, it is plain that the debt would have been situate where the deed was.

A comment of the Special Commissioner in *Hafton Properties v McHugh* also supports this view.⁸⁴

Dicey notes that a mortgage debt is normally a specialty and continues.⁸⁵

- [1] A mortgage of land confers an interest in land and will be held situate where the land is situate,⁸⁶
- [2] but where it is necessary (e.g. for taxation purposes) to distinguish between the situs of the mortgagee's interest in land and that of the mortgagor's personal obligation to repay, then the latter (if in the form of a specialty) will be held situate where the deed is situate from time to time.⁸⁷ ...
- [3] In the conflict of laws the distinction between the interest in land and the personal obligation is not normally made for the purposes of

83 See 77.2 (Every asset has one situs).

84 "... the debt was a mortgage debt. Such a debt is regarded for private international law purposes (at any rate) as a speciality debt, the situs of which is to be found where the mortgage deed is to be found;" 59 TC 420 at p.426.

85 Dicey, *Conflict of Laws*, (14th ed, 2006), para 22-035.

86 [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179.

87 [Dicey's footnote] See *Walsh v The Queen* [1894] AC 144; *Payne v R* [1902] AC 552. Also *Henty v The Queen* [1896] AC 567.

situs, and the asset is regarded as a unity which is situate in the country where the land lies.⁸⁸

Dicey's view at [1] and [3] is that the location of the land prevails. With respect, this overlooks the authorities cited above. The case cited, *Re Hoyles*, does not support Dicey. It shows that for the purposes of succession law a mortgage debt is dealt with according to the law of the land. However, it does not follow from this that the debt should be regarded as situate in that country for the purpose of the situs rules and situs as such is nowhere discussed in *Re Hoyles*. The suggestion at [2] is that tax law may distinguish between the mortgagee's interest in land and the mortgagees's right to payment. But the distinction is an almost impossible one, and nowhere drawn in tax law (apart from *Walsh*, not a situs case).

The IHT Manual passage cited above⁸⁹ suggests that the HMRC view is (like mine) that the specialty prevails, not the location of the land.

77.14.2 Simple debt charged on land

In the case of a simple debt charged on land (not made by deed) the choice lies between:

- (1) The location of the land.
- (2) The simple debt rule (situs is residence of debtor).

The arguments of principle suggest that the simple debt rule prevails. This conclusion is also supported by the passage from *Raiffeisen* cited in 77.12 (Simple contract debt). This conclusion is consistent with the position for specialty debts secured on land.

77.15 Debt under letter of credit

The IHT Manual provides:

27091 Contractual

⁸⁸ [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179; *Dicey* para 22–012; c.f. Falconbridge, *Selected Essays on the Conflict of Laws*, (2nd ed. 1954) pp.573–580 for an acute discussion of the problem raised in this paragraph.

⁸⁹ 77.13.2 (Situs of specialty); note the references to mortgages in the quotation from the IHT Manual.

A debt under a letter of credit has been held to be situated in the place where it is in fact payable against documents (*Power Curber International v National Bank of Kuwait* [1981] 3 All ER 607).

77.16 Judgment debt

A judgment debt is situate where the judgment is recorded.⁹⁰ Obtaining judgment may therefore have the effect of changing situs, for better or worse.

77.17 Bank account

The IHT Manual provides:

27093 Debts: Bank accounts [January 2008]

A bank account is a debt, and under general law is situated at the branch of the bank where the account is kept: *R v Lovitt* [1912] AC 212.⁹¹

This general law rule may be modified for IHT purposes by a Double Taxation Convention ...

This is not a special rule for bank accounts: it is an application of the general rule that, in the case of a company carrying business in two places, a simple debt is situate where payable; see 77.12.1 (Meaning of “residence” and dual resident debtor).

UK bank accounts may qualify for IHT relief.⁹² Guidance on what constitutes a branch of a bank can be found in the discussion of branch and PE.⁹³

77.18 Building society account

A standard form building society account is not a debt, it is an interest in the society, so corporation situs rules rather than debt rules should be applied.

The IHT Manual provides:

90 *AG v Bouwens* (1838) 4 M & W 171 accessible on www.commonlii.org.

91 In the Law Reports the name of this case is: *The King v Lovitt*.

92 See 58.18 (Non-residents foreign currency bank accounts).

93 See 81.2 (Meaning of permanent establishment); 81.12 (Meaning of “branch or agency”).

27151[Bank or]⁹⁴ building society accounts in Channel Islands and Isle of Man [January 2008]

Any case in which it is claimed that an account with a UK Building Society must be treated as situated in the Channel Islands or the Isle of Man, and therefore as exempt from IHT, must be referred to TG (IHTM01081), your Team Leader must be consulted in Scotland.

77.19 Insurance policy

For the purpose of common law situs rules a policy is treated in the same way as a debt, so the place-of-debtor and specialty rules apply.⁹⁵ The IHT Manual correctly provides:

27101 Policy monies: general rule [February 2008]

When the policy is under hand the policy monies are situated where the debtor (company) is resident (generally the head office of the company)

...

27102 Payment made at place other than Head Office [February 2006]

Where under the terms of the policy, payment is to be made at some place other than the residence of the head office the monies are deemed to be situated at the place of payment (*New York Life Insurance v Public Trustee* [1924] 2 Ch 101).

27103 Policy issued at branch office [January 2008]

If⁹⁶ a policy is issued by, or through, a branch office of a UK company, outside the UK, and no reference is made in the terms of the policy as to the place where the policy monies are to be paid.

Policy monies are to be treated as situated in the country of the branch office provided that the whole course of business in relation to the policy had been transacted in that country.

The “whole course of business” connotes the happening of all the following events in the country of the branch office:

- that the policy is issued to a resident in that country from the branch in that country

94 The reference to a “bank” in the heading seems to be erroneous since the text only relates to building societies.

95 *New York Life Assurance v Public Trustee* [1924] 2 Ch 101.

96 The text has gone wrong here: The previous Manual read: “A further type of case is one in which the policy *etc*”; and that is clearly the meaning. Probably the first two paragraphs are intended to form one sentence.

- that the holder of the policy remains resident and retains the policy there, pays the premiums to the branch there, and dies there
- that representation to his estate is taken there and the money collected there.

With regard to condition (b) if at the date of the life assured's death, the policy is in the UK at the Assurance Company's head office and the life assured has assigned the policy to the assurance company as security for a loan, do not assume that the policy was situated in the UK without considering the other circumstances surrounding the policy.

Divergence in detail (for example, discontinuous residence) would not necessarily lead to a different conclusion. However if any of the conditions is not fulfilled, or where the locality of the policy has to be determined before the policy holder's death, each case must be considered on its own facts. Any such case must be referred to TG (IHTM01081).

Where a policy under hand in terms provides for payment **either at its head office or** at a branch office, and the "whole course of business", in the sense indicated above, takes place in the country of the branch office, the monies are also treated as locally situated in that country.

Some of para 27103 is doubtful but the practice will normally favour the taxpayer so the issues will not often arise.

77.19.1 *Policy made by deed*

The IHT Manual correctly provides:

27104 Policies under seal [February 2006]

Policies under seal are specialty debts (IHTM27078).

This is correct. It requires one to investigate whether policies are specialties. The IHT Manual gives a little guidance:

Most Lloyds policies are embossed with a seal but they are not specialties unless additionally they bear the witnessed personal signature of the General Manager of Lloyds Policy Signing Office.

On IHT treatment of UK situate policies see 32.12 (IHT on policy held by foreign domiciliary).

77.20 Land

The IHT Manual provides:

27074 Land and interest in land [January 2008]

Immovable property is situated where it is actually located, but you must note that in the case of some types of interest either in land or relating to land, different legal systems may take opposing views as to whether they constitute movable or immovable property.

These differences are resolved (under Private International Law, and also by specific provision in Double Taxation Conventions where these apply) by the adoption of the view taken by the law of the country in which the land itself is situated: *Johnstone v Baker* (1817) 4 Madd 474; *Macdonald v Macdonald* [1932] SLT (HL) 381.

Land is usually classed as immovable property, and so is generally governed by the law of the country in which the immovables are situated. This issue of devolution may be especially significant here when ascertaining the exemption of foreign property that may or may not pass to a surviving spouse or civil partner (IHTM11032).

77.21 Chattels

The rule is what one would expect. The IHT Manual provides:

27075 Chattels

Chattels are situated where they happen to be at the relevant time.⁹⁷

It is suggested that this applies even where:

- (1) a chattel is moved out of the UK;
- (2) the chattel is transferred to another person or trust;
- (3) the chattel is returned to the UK.

The temporary removal of the asset at the time of the disposal cannot be ignored, for tax purposes, even if the time spent out of the UK is short.

77.22 Ships and aircraft

The IHT Manual provides:

⁹⁷ The text is found twice: IHT Manual paras 21047 and 27075. For a concession on works of art see 58.19 (Works of art).

27073 Ships [February 2006]

A ship on the high seas is deemed to be situated at its port of registry but when it comes within territorial waters this artificial situs is displaced by the actual situs: *Trustees Executors & Agency v IRC* [1973] Ch 254.

The situs of aircraft for IHT is, surprisingly, undecided. The choice lies between the chattel rule, the ship rule and the place of registration. In *Kuwait Airways v Iraqi Airways (Nos 4 & 5)* [!] [2002] 2 AC 833 no attempt was made even to argue for place of registration. It is suggested that the ship rule is the most sensible solution.

See now *Dornoch v Westminster International* [2009] EWHC 889.

77.23 Goodwill and intellectual property

Goodwill is situate where the trade or profession is carried on (see *IRC v Muller* [1901] AC 217).

For intellectual property, see *Forster's Australia v CIT* 302 ITR 289 (AAR) 10 ITLR 939.

Because of IHT business property relief, these issues will not often arise.

77.24 Property subject to contract of sale

An interest in English land subject to a contract of sale is still situated in the UK: *Re Clore, IRC v Stype Investments* [1982] STC 625. It is suggested that a contract of sale does not affect situs.

77.25 Interest under bare trust or nomineehip

The interest of a beneficial owner in property held by a nominee or bare trustee is situate where the underlying asset is situate: a nomineehip⁹⁸ or bare trust is transparent for situs. In *Re Clore, IRC v Stype Investments* land in England (the Guy's estate was held by a Jersey nominee (Stype Investments):

Immediately after the conveyance of the Guy's estate to Stype

98 For present purposes the terms "bare trust" and "nomineehip" are used synonymously.

Investments and the execution of the declaration of trust which acknowledged that the Guy's estate would "continue to remain in the beneficial ownership of Sir Charles," the Guy's estate belonged in equity to Sir Charles in fee simple and his interest constituted property situate in England. Stype Investments was entitled to be paid any outgoings or charges in respect of the estate, but this entitlement did not affect the nature, quality or situation of the interest of Sir Charles in the estate.⁹⁹

The position is different for unit trusts¹⁰⁰ and intermediated securities¹⁰¹ which are not straightforward bare trusts and maybe best not described as bare trusts at all.¹⁰²

77.26 Equitable interest under a substantive¹⁰³ trust

The situs of an equitable interest under a substantive trust is not often relevant for IHT, but it may matter, eg where a reversionary interest is not excluded property for IHT.

There are many connecting factors which might be used to attribute a situs to an equitable interest, and the courts have not had to consider all possible permutations. *Favorke v Steinkopff* [1922] 1 Ch 174 concerned an English law will trust, with English trustees, but German situate property; the equitable interests of an annuitant, life tenant and remaindermen were held to be situate in England. It is suggested that an equitable interest is normally situate where the trustees are resident. If the trustees are resident in different jurisdictions, situs would be determined by an exclusive jurisdiction clause if there is one, or failing that, by the proper law.¹⁰⁴

There is a sound basis to say that situs of the assets of the trust fund is not relevant to the situs of the equitable interest. If the trust assets are situate in different jurisdictions it would be impossible to ascertain the situs of the equitable interest (if the equitable interest is regarded as a single asset). An equitable interest such as a life or reversionary interest should not be regarded as several separate interests in as many assets as

99 [1982] STC 625 at p.633-4.

100 See 37.5 (Situs of unit).

101 See 77.8 (Intermediaries and depositories).

102 See 79.4.1 (Definition(s) of bare trust and associated terminology).

103 By "substantive" I mean a trust other than a bare trust (nomineeship) or unit trust.

104 For a contrary view see Harris, *The Hague Trusts Convention*, (2002), Chapter 9 (Situs of equitable interests).

are held by the trustees. Such an equitable interest is generally regarded as one asset and not as many assets as there are items of trust property.

Where the equitable interest is a power of revocation the position is even clearer. Where the equitable interest is an annuity, it would often be impossible to locate the annuity by reference to the situs of the trust assets, because one cannot identify any particular trust asset and say that asset is (to any fixed extent) the source of the annuity.

77.27 Unadministered estate of deceased person

The IHT Manual provides:

27072 Unadministered estates or shares therein [February 2006]

In general a person who takes an absolute interest as a residuary legatee, under English law and many other legal systems,¹⁰⁵ is entitled, not to the assets **in specie of the testator, but to a chose in action**, enforceable against the executors.

This means the executors must administer the estate and transfer the clear residue, or a share thereof, as the case may be to the beneficiary. The same rule applies in the case of intestacy.

This is a similar rule to the **ius crediti** to which a Scots beneficiary is entitled.

The chose in action is situate where it is enforced, ie where the executors are. The situs of the assets of the estate is not relevant. See *CSD v Livingston* [1965] AC 694. The IHT Manual continues:

For IHT however, the deceased is treated as having a direct interest (in the whole or a share, as the case may be) in the net assets of the testator's (or intestate's) residuary estate. See IHTM22031¹⁰⁶

Consequently you must, in such a case, consider separately the situs of each of the underlying assets.

For example, the excluded property provisions in s.6(2) IHTA may apply to qualifying securities included in the unadministered estate (IHTM04260)

105 Author's Note: Further consideration will be required for jurisdictions other than England and Wales, especially civil law jurisdictions.

106 See s.91 IHTA.

77.28 Situs of partnership share

The situs of a partnership share may not matter for IHT, because of BPR, but the issue will sometimes arise.

An interest in a partnership is an asset (a chose in action) distinct from the assets of the partnership. It has its own situs distinct from the situs of the partnership assets. HMRC agree. The HMRC website POA guidance provided at Appendix 1:

For IHT purposes ... we do not regard the partnership interest as transparent.

This passage is not in the current guidance, but there is no reason to think that HMRC have changed their view.

There are several factors that the court might have used to determine situs. In practice the situs of an interest in a general¹⁰⁷ partnership is the place where the partnership business is carried on.¹⁰⁸ This is not necessarily the place where the partners reside: there is no concept here of carrying on business by tacit oversight.¹⁰⁹ The same applies to a limited partnership.

77.28.1 *Situs of LLP*

A LLP is a body corporate and its situs for private international law will be determined by the rules applying to companies. For IHT purposes, however, s.267A IHTA provides:

For the purposes of this Act and any other enactments relating to inheritance tax—

- (a) property to which a limited liability partnership is entitled, or which it occupies or uses, shall be treated as property to which its members

107 That is, a partnership which is not a limited liability partnership.

108 See *Laidlay v Lord Advocate* (1890) 15 App Cas 468, followed *Commissioner of Stamp Duty v Salting* [1907] AC 449. Since *Laidlay* is a Scottish case, the law of England and Scotland on this point must be taken to be the same. In a case where it is not clear where the partnership business is carried on, it would be logical to adopt the partnership residence test of control and management. Further consideration would be needed if the partnership is not governed by UK law.

109 See 15.3 (Trading income of UK resident).

- are entitled, or which they occupy or use, as partners,
- (b) any business carried on by a limited liability partnership shall be treated as carried on in partnership by its members,
 - (c) incorporation, change in membership or dissolution of a limited liability partnership shall be treated as formation, alteration or dissolution of a partnership, and
 - (d) any transfer of value made by or to a limited liability partnership shall be treated as made by or to its members in partnership (and not by or to the limited liability partnership as such).

This deems the LLP's property to be property to which its members are entitled *as partners*. It does not deem the partners to be entitled to the assets, but puts a LLP in the same position as a conventional partnership. An obscure passage in the IHT Manual para 25094¹¹⁰ [October 2007] suggests that HMRC may not have reached this view, but it seems clear enough.

77.29 Situs of pension and death benefits

Death in service benefits payable in respect of service under the Crown, local authorities or overseas governments are generally payable at discretion and so not liable to IHT. However the situs does matter in the exceptional case where the benefit is an asset in the estate of the deceased. Section 153(2) IHTA provides:

- (2) For the purposes of this Act—
 - (a) a pension paid under the authority of a scheme made under section 2 of the Overseas Pensions Act 1973 which
 - [i] is constituted by the Pensions (India, Pakistan and Burma) Act 1955 or
 - [ii] is certified by the Secretary of State for the purposes of this section to correspond to the said Act of 1955
- shall be treated as if it had been paid by the Government of India

¹¹⁰ Para 25094 provides:

Limited liability partnerships [January 2008]

... A further change is that an interest in a LLP is deemed to be an interest in each and every asset of the partnership, while an interest in a traditional partnership is a 'chose in action', valued by reference to the net underlying assets of the business. This may require you to consider issues of situs of property. In cases of doubt refer to Technical Group (TG) (IHTM01081) for advice."

- or the Government of Pakistan (according as the arrangements in pursuance of which the pension was first paid under the said Act of 1955 were made with the one or the other Government);
- (b) a pension paid out of any fund established in the UK by the Government of any country which, at the time when the fund was established, was, or formed part of, a colony, protectorate, protected state or UK trust territory shall, if the fund was established for the sole purpose of providing pensions, whether contributory or not, payable in respect of service under the Government be treated as if it had been paid by the Government by which the fund was established;
 - (c) a pension paid out of the Central African Pension Fund established by section 24 of the Federation of Rhodesia and Nyasaland (Dissolution) Order in Council 1963 shall be treated as if it had been paid by the Government of a territory outside the UK; and
 - (d) so much of any pension paid to or in respect of any person under—
 - (i) the scheme which by virtue of subsection (3) of section 2 of the Overseas Pensions Act 1973 is constituted under that section by section 2 or subsection (2) of section 4 of the Overseas Service Act 1958 or
 - (ii) such other scheme made under section 2 of the Overseas Pensions Act 1973 as is certified by the Secretary of State for the purposes of the Taxes Act to correspond to section 2 or subsection (2) of section 4 of the Overseas Service Act 1958as is certified by the Secretary of State to be attributable to service under the Government of an overseas territory shall be treated as if it had been paid by the Government of that territory.
- (3) ... for the purposes of subsection (2) above—
- (a) “pension” includes a gratuity and any sum payable on or in respect of death, and a return of contributions with or without interest thereon or any other addition thereto;
 - (b) “UK trust territory” means a territory administered by the Government of the UK under the trusteeship system of the United Nations;
 - (c) “overseas territory” means any country or territory outside the UK;
 - (d) references to the Government of any such country or territory as is mentioned in paragraph (b) or (d) of that subsection include a Government constituted for two or more such countries or

territories and any authority established for the purpose of providing or administering services which are common to, or relate to matters of common interest to, two or more such countries or territories.

(4) If, by reason of Her Majesty's Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty's Government in the UK.

The important effect of this is that the pension (defined to include a death benefit) is not UK situate if it is treated as payable by a foreign government. The IHT Manual provides:

17132 Crown, local authorities and overseas governments [January 2008]

... The following table is therefore for general guidance only and is not intended to be exhaustive.

Overseas Service : Sums payable on death to personal representatives by way of return of subscriptions under the regulations of

- the Indian Military Widows and Orphans Fund;
- the Superior Services (India) Family Pension Fund
- the Indian Military Service Family Pensions Fund; and
- the Indian Civil Service family pension fund

Lump sum payable on death to personal representatives under a scheme constituted under the Pensions (India, Pakistan and Burma) Act 1955 or a corresponding scheme (a foreign asset by virtue of Section 153(2)(a)

Whether payment included in estate: Yes if the deceased died domiciled (IHTM13000) in the UK (excluded property under Section 6(1) IHTA 1984 if not so domiciled)

Benefits payable to personal representatives as of right on death of a Colonial Government servant (a foreign asset by virtue of Section 153(2)(b))

Whether payment included in estate: Yes if the deceased died domiciled in the UK (excluded property under Section 6(1) IHTA 1984 if not so domiciled)

Benefits payable under s 1 Overseas Pensions Act 1973 other than

‘statutory increases’ thereof (a foreign asset by virtue of Section 153(4) and Section 153(2)(b))

Whether payment included in estate: Yes if the deceased died domiciled in the UK (excluded property under s 6(1) if not so domiciled)

Benefits payable out of the Central African Pension Fund (a foreign asset by virtue of Section 153(2)(c))

Whether payment included in estate: Yes if the deceased died domiciled in the UK (excluded property under s 6(1) if not so domiciled)

Lump sum payable on death to personal representatives as of right under scheme constituted under the Overseas service Act 1958, or a corresponding scheme (a foreign asset by virtue of Section 153(2)(d))

Whether payment included in estate: Yes if the deceased died domiciled in the UK (excluded property under s 6(1) if not so domiciled)...

CHAPTER SEVENTY EIGHT

SITUS OF ASSETS FOR CGT

78.1 Situs of assets for CGT – Introduction

This chapter deals with situs of assets for CGT. Strictly one should not refer to situs in the abstract, but to situs for a specific purpose (CGT, IHT, or whatever) but in practice where the context is clear it is sufficient to refer to situs, and in this chapter references to situs means situs for CGT purposes.

78.1.1 *Cross references*

The following topics are dealt with elsewhere:

37.5.2 (Situs of unit for CGT)

38.6 (Situs of partnership assets)

77.1 (General introduction to situs)

77.6 (Securities of international organisations)

78.2 Meaning of “shares” and “debentures”

The CGT situs rules make specific provision for shares and debentures, so it is necessary to consider the meaning of these terms.

The meaning of debenture is particularly important, because there is an significant distinction for CGT situs between:

- (1) debts which are not debentures, whose situs is generally the residence of the creditor;¹
- (2) debts which are debentures, whose situs is:
 - (a) UK if issued by UK incorporated company, or
 - (b) if registered and issued by a non-UK incorporated company, the

¹ See 78.10 (Debt situs rule).

place of the register.

There are two statutory provisions which relate to the definitions but they are of very limited scope. It is convenient to mention them first to clear them out of the way.

78.2.1 *Company with no share capital*

Section 275(2)(a) TCGA provides:

In subsection (1) above—

(a) in paras (d), (da) and (e), the references to shares or debentures, in relation to a company that has no share capital, include any interests in the company possessed by members of the company, ...

In UK company law the only type of company with no share capital is a company limited by guarantee. There are also foreign entities which are classified as companies for tax purposes which have no share capital, but I cannot think of any to which s.275(2)(a) is likely to be significant.

So far as it concerns *shares* the rule makes sense up to a point. In short, the rule is that “shares” includes the interest of members of a guarantee company. The only puzzle is why the rule is needed. In practice the situs of interests in guarantee companies will rarely if ever arise. A provision of this kind is quite common in tax.² The rule was enacted in other areas to prevent avoidance and perhaps the drafter put it in here without much thought as to whether it was actually needed.

I do not understand why the statutory provision refers to *debentures* and suspect the drafter may be under a misapprehension here. A debenture is a right against the company, not an interest in the company. Whether the company has a share capital is (in the absence of the definition) highly relevant in deciding whether an asset is a “share” but it is wholly irrelevant in deciding whether an asset is a “debenture”. I would be grateful to any reader who could offer an explanation. In practice it does no harm.

78.2.2 *Securities issued by non-company*

Section 275(2)(b) TCGA provides:

² There are too many to list; see for instance s.135(4)(5) TCGA.

in paras (d) and (e), the references to debentures, in relation to a person other than a company, include securities.

This assumes that (in the absence of this definition) securities issued by a non-company would not be, or may not be, debentures. I think that is doubtful. The term “debenture” is normally used in the context of companies, but the concept is not restricted to companies.³

Section 275(1)(d) refers to debentures issued by a government authority.⁴ Treasury gilts, though “securities” are not normally called “debentures” so perhaps the provision is useful to avoid doubt..

Similarly, other non-companies, such as trusts or individuals, can in theory create “securities” and if such assets might not be regarded as “debentures” then this provision could be needed (though in practice this does not happen).

While unnecessary, this provision does no harm.

78.2.3 *Change from “securities” to “debentures” in 2005*

Before 2005 the legislation referred to “securities” where it now has the word “debentures.” HMRC explained the reason for the change:

The scope of the existing rules in s 275 which apply in relation to securities will be extended so that they apply in relation to debentures - this means, for example, that ... all registered debentures (rather than just those which are securities) of a company which is not incorporated in the UK will be treated as being situated where they are registered ...⁵

HMRC were concerned that there might be a debenture which was not a security. I think that is doubtful. I would have thought that any debenture must necessarily be a security.⁶

3 See Gower and Davies, *Principles of Modern Company Law* (7th ed 2003), p.806: “The word “debenture” is not restricted to securities of companies or bodies corporate. Clubs not infrequently issue debentures and the name may even be applied to bonds issued by an individual; eg to those issued by the Tichborne Claimant...” This passage is not in the current edition but the point is sound.

4 See 78.4 (Municipal and government securities).

5 BN 36, 16 March 2005.

6 See s.738 CA 2006: “In the Companies Acts “debenture” includes debenture stock, bonds and any other securities of a company...”

The reform raises the question of whether an asset could be a security but not a debenture; if there were such an asset the effect of the 2005 reform was to take it outside the scope of the statutory situs rules, which was not intended! The better view is that any registered debt security is a debenture so this problem does not arise.

If that is correct, the substitution of “debentures” for “securities” in 2005 was misconceived, but it did no harm.

78.2.4 *Meaning of “debenture”*

In the absence of applicable statutory guidance, the word “debentures” should be given its normal meaning. It is a wide and somewhat vague term:

If we begin by asking what the word “debenture” means, apart from any definition, the reply must be that it has no precise meaning. Chitty J. observed in the case of *Levy v Abercorris Slate and Slab Co.*,⁷ that the word “means a document which either creates a debt or acknowledges it, and any document which fulfills either of these conditions is a debenture.” ... Sir Nathaniel Lindley had previously stated simply, “What the correct meaning of 'debenture' is I do not know”: *British India Steam Navigation Co. v IRC*.⁸ In *Lemon v Austin Friars Investment Trust*⁹, the same ignorance was professed in the Court of Appeal. Warrington LJ in particular, after observing that it had been said “by a wiser man than himself” that it was impossible to give an exhaustive definition of the word “debenture,” went on to remark that he did not propose to incur the reproach of venturing where wise men fear to tread. The textbooks are agreed at least in this that no accurate definition of the word can be found.¹⁰

Company law draws a distinction between an ordinary debenture and debenture stock:

Debenture stock is merely borrowed capital consolidated into one mass for the sake of convenience. Instead of each lender having a separate

⁷ (1887) 37 Ch D 260.

⁸ (1881) 7 QBD 165.

⁹ [1926] 1 Ch 1.

¹⁰ *Knightsbridge Estates Trust v Byrne* [1940] 1 AC 613 at p.621.

bond or mortgage, he has a certificate entitling him to a certain sum, being a portion of one large loan; and generally debenture stock differs from a debenture in form rather than in substance.¹¹

No-one doubts that debenture stock is within the general meaning of “debentures”.

In the following discussion, I use the word “**securities**” to mean either shares or debentures.

78.3 Co-owned assets

Section 275C TCGA provides:

- (1) This section applies for determining for the purposes of this Act—
 - (a) the situation of an interest (see subsection (4)) in an asset, or
 - (b) whether the situation of an interest in an asset is in the UK.¹²

“Interest” is normally a wide term, but s.275C(4) defines it narrowly:

In this section “interest”, in relation to an asset, means an interest as a co-owner of the asset (whether the asset is owned jointly or in common and whether or not the interests of the co-owners are equal).

Thus we are concerned here with co-ownership interests, or shares of assets. Section 275C applies to co-owned assets of all kinds but the most important cases are co-owned securities.

Section 275C goes on to lay down two rules which govern situs of co-ownership interests:

- (2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.
- (3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

I refer to these as “**the co-ownership situs rules**”.

¹¹ *Re Herring* [1908] 2 Ch 493 at p.497.

¹² Paragraph (b) is otiose since the matter is fully covered by (a); but it does not matter.

At first sight it is hard to see the point of these rules. If an asset is situate in a jurisdiction, one would expect a share in the asset to be situate in the same place and a statutory provision to that effect seems unnecessary.

However, s.275 stipulates the situs of shares, debentures, debts, etc and it might be argued that a person who owns a co-ownership interest in a share, debenture, debt, etc does not own a share, debenture, debt, etc; so it might be argued that these statutory situs rules do not apply to co-ownership interests. Hence s.275C(2) has a role to play.

Section 275C(3) is needed where situs depends on the residence of the owner and the asset is co-owned. For instance, if a debt or a ship is jointly owned by two persons, one UK resident and one non-resident, the interest of the UK resident is regarded as UK situate and the interest of the non-resident is regarded as non-UK situate.

78.4 Municipal and government securities

Section 275(1)(d) TCGA provides:

shares or debentures¹³ issued by any municipal or governmental authority, or by any body created by such an authority, are situated in the country of that authority.

The CG Manual provides:

12440 Location of assets: Shares and securities [November 2009]
[The Manual sets out s.275(1)(c) and continues:] This applies to shares and securities issued by such bodies whether they are in registered form or in bearer form.

78.5 Securities of UK incorporated company

Section 275(1)(da) TCGA provides:

Subject to para (d) above, shares in or debentures of a company incorporated in any part of the UK are situated in the UK.

This rule prevents CGT remittance basis planning for UK incorporated companies by use of bearer shares and foreign share registers. That was

13 For the meaning of “debentures” see 78.2.2 (Securities issued by non-company).

common practice before 2005. The spur to the 2005 reform was probably *Chandrasekaran v Deloitte & Touche* [2004] EWHC 1378 which discussed and raised the awareness of this planning.

78.6 Registered securities: non-UK company

Section 275(1)(e) TCGA provides:

subject to paras (d) and (da) above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.

This applies to shares and debentures of foreign incorporated companies but not UK incorporated companies. It (more or less) restates the common law rules.¹⁴

The CG Manual provides:

12440 Types of asset (2): Shares and securities etc [January 2010]

Shares and securities

...Registered shares and securities¹⁵ other than those dealt with in the previous two paragraphs are situated where they are registered. This will normally be in the country where the company was incorporated. If they are registered on more than one register then they are located where the principal register is located, Section 275(1)(e) TCGA 1992. Which register is the principal register is a question of fact.

78.7 Bearer shares

Bearer shares of non-UK incorporated companies are governed by the common law rule.¹⁶ They are situated where the document is situated.

78.8 Bearer debentures: non-UK company

What is the position for bearer debentures? Unless one of the statutory situs rules applies, the common law rule will apply and the debenture will

¹⁴ See 77.4 (Situs of registered shares).

¹⁵ Following the 2005 reforms, the reference to securities should strictly read “debentures” as that is now the statutory term. But it makes no difference.

¹⁶ See 77.7 (Bearer documents).

be situate where the document is situate. Two statutory rules need consideration: the debt situs rule and the UK-law rule.

78.8.1 *Does debt situs rule apply to bearer debentures?*

Section 275(1)(c) TCGA (the debt situs rule) provides:

subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.¹⁷

Debenture stock is not a debt¹⁸ so the debt situs rule does not apply to debenture stock.¹⁹

An ordinary debenture (not debenture stock) is a debt in the normal sense of the word. At first sight it seems that the debt situs rule applies, so a bearer debenture is situate where the creditor is resident. If that were right the situs of the document of a bearer debenture would never determine situs. However it is considered that the context of s.275, the reference to a debt in the debt situs rule means a simple debt and not a debenture. The debt situs rule does not apply to any debentures.

HMRC agree. The CG Manual provides:

CG12440 Types of asset (2): Shares and securities etc [January 2010]
Shares and securities

... The Companies Acts allow companies to issue ‘share warrants to bearer’ or ‘stock warrants to bearer’ provided the company’s Articles of Association allow it. These are commonly called bearer shares and securities. The name of the owner of such bearer securities is not recorded in the register of the company. They can be sold without any necessity to notify the company. The holder of the warrant is entitled to receive payment of dividends and, provided certain conditions are

17 See 78.10 (Ordinary debt)

18 For the meaning of “debenture stock” see 78.2.4 (Meaning of “debenture”). A person who holds debenture stock is not a creditor: *Re Dunderland Iron Ore* [1909] 1 Ch 446. So the asset is not a “debt”.

19 Against this, it might be argued that the co-ownership situs rule applies so the situs of the debenture stock is the situs of the underlying debenture. But it is considered that (1) the co-ownership situs rule does not apply in this case and (2) even if it does, the situs of the underlying debenture is not governed by the debt situs rule as the underlying debenture is not a debt for the purposes of that rule.

complied with, to vote at general meetings.

The location of bearer securities issued by any body other than

- a municipal or governmental authority or
- any body created by such an authority, or
- a company incorporated in the UK

is not covered by a specific capital gains rule. Therefore it has to be decided in accordance with general law, see CG12420-CG12421. General law provides that such securities are located where the certificate is located. As for chattels, the location can change if the certificate is moved in or out of the UK.

78.8.2 *Does UK-law rule apply to bearer securities?*

A debenture is an intangible asset and if it is “subject to UK law” (as widely defined) then in principle it appears that the UK-law rule applies, and the debenture will be UK situate.²⁰

The CG Manual does not refer to the UK-law rule. One might argue that the reference to an intangible asset in s.275A means intangible assets other than debentures, in which case a debenture of a foreign incorporated company is not UK situate even if it is subject to UK law. This appears to be the HMRC view since the manual passage above says that the location of bearer securities “is not covered by a specific capital gains rule”.

78.8.3 *Planning implications*

Remittance basis taxpayers will generally avoid investing in debentures which are UK situate for CGT purposes. Non-UK incorporated companies who issue debentures and want their investors to include remittance basis taxpayers will in principle wish to ensure that their debentures should not be UK situate for CGT purposes.

To achieve this:

- (1) The debenture could be registered and the register kept outside the UK; in that case the position is clear.
- (2) The debenture could be a bearer instrument and
 - (a) kept outside the UK and
 - (b) not “subject to UK law” (as defined) though that may not be

²⁰ See 78.13.2 (The UK-law rule).

necessary.

78.8.4 *Commentary*

The combination of statutory and common law rules for securities of non-UK incorporated companies is intricate and sometimes impractical. It has never been thought through. It is suggested that the rule should be that *all* securities are situate in the place of incorporation of the company. That would be logical, and a simplification, with no loss of tax.

78.9 Intermediaries and depositories

The starting point is to understand the securities law background and the common law situs rules; see 77.8 (Intermediaries and depositories) where I conclude (contrary to the HMRC view) that under the common law situs rule, the situs of intermediated securities²¹ (where the investor has an interest in the underlying security) is that of the intermediary on whose books the interest of the investor appears. This is the place where the record that determines title is to be found. The situs of the underlying security does not matter.

In the absence of a statutory provision, the same rule will apply for CGT. Six statutory provisions need consideration: the co-ownership situs rules, s.60 TCGA, the UK-law rule, and three rules dealing with securities in s.275(1)(d)(da)(e).

78.9.1 *Intermediated securities of non-UK companies*

The reader will recall that s.275(1)(e) TCGA provides:

subject to paras (d) [government securities] and (da) [UK incorporated companies] above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.²²

In this paragraph I assume we are not concerned with government

21 For the terminology - “intermediated securities” “depository” “intermediary” “investor” “the underlying security” - see 77.8 (Intermediaries and depositories).

22 See 78.6 (Registered securities: non-UK company).

securities or UK incorporated companies within paras (d) or (da).

I first consider debentures and then shares.

As far as debentures are concerned, there are two questions:

- (1) are intermediated debentures (the interests held by investors) properly described as “debentures” within the meaning of 275(1)(e)?
- (2) if so are intermediated debentures “registered” debentures?

Since debenture stock count as “debentures”²³ it seems reasonably clear that the intermediated debentures are properly described as “debentures”.

Intermediated debentures are registered in the sense that the investors interests are recorded on the intermediary’s register.²⁴ At first sight one might think that the register referred to in s.275(1)(d) must be a register kept by the company which issued the debentures. However a company does not have to keep a register of its debenture holders (unlike a shareholder register). The distinguishing feature of a register is that it determines or provides evidence of ownership.²⁵ So it is considered that intermediated debentures are “registered” on the intermediary’s register. It follows that:

- (1) If the underlying debenture is not registered, the intermediary’s register is the only register, and the investors interests are situate where the intermediary’s register is situated.
- (2) If the underlying debenture is registered, there are two registers:
 - (a) The company’s register of the underlying debenture (which will record the intermediary as the registered holder).
 - (b) The intermediary’s register of the intermediated debenture (which will record the investor as the registered holder).

It is considered that the company’s register does not come into the picture, since the asset which the investor owns is the intermediated debenture and not the underlying debenture. But even if that is not correct, the intermediary’s register should be regarded as the principal register so that is the one which governs situs.

23 See 78.2.4 (Meaning of “debenture”).

24 Benjamin, “Interests in Securities” (2000) para 2.91: “Interests in securities [Intermediated securities] may properly be characterised as a form of registered securities, even where the underlying securities are in bearer form.”

25 The intermediary’s register is not open to inspection, unlike a register under s.744 Companies Act 2006, but open access is not an essential feature of a register, and there is no reason to expect foreign law to apply English company rule principles.

For these reasons, an intermediated debenture of a non-UK incorporated company is situate where the intermediary keeps its register.

In practice it does not often matter whether the situs of an intermediated debenture (of a non-UK incorporated company) is in the place of the intermediary's register or the situs of the underlying debenture. Either way, the asset will not usually be UK situate. But it could matter, for instance, if the debenture is a bearer debenture and the document is in the UK. In such a case it is sensible to look to the intermediary's register rather than to the place of the document of the underlying debenture, since an investor could not be expected to know where the document of the underlying debenture is situated.

The same applies when the underlying security is shares in a non-UK incorporated company, rather than debentures.

78.9.2 *Securities of UK incorporated companies*

It is considered that intermediated securities of UK incorporated companies are properly described as shares or debentures and so fall within the rules in s.275(1)(d) TCGA. If that is correct, the registered securities rule in 275(1)(e) does not apply: it does not matter whether the securities are regarded as registered. Intermediated securities of UK incorporated companies are UK situate.

78.9.3 *Municipal and government securities*

For the same reason, intermediated securities of government or municipal authorities are situated in the authority concerned: s.275(1)(d) TCGA.

78.9.4 *Another view*

In the case of co-ownership interests the co-ownership situs rules²⁶ in s.275C TCGA provide:

- (2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.

²⁶ See 78.3 (Co-ownership interests).

(3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

Do investors hold interests in the underlying securities as co-owners (within the meaning of the co-ownership rule)? That depends on the terms of the agreement with the intermediary but it is likely to be the case.²⁷ If so, it appears at first sight that these rules override the common law situs rule, so the situs of the investor's interest for CGT is that of the underlying security.

Section 60(1) TCGA provides another route to the same destination:

In relation to property held by a person

[a] as nominee for another person, or

[b] as trustee

[i] for another person absolutely entitled²⁸ as against the trustee,

[ii] or for any person who would be so entitled but for being an infant or other person under disability

[iii] (or for 2 or more persons who are or would be jointly so entitled),

this Act shall apply as if the property were vested in, and the acts of the nominee or trustee in relation to the property were the acts of, the person or persons for whom he is the nominee or trustee

Does the intermediary hold for the investors as bare trustee (within the s.60 sense of that expression)? That depends on the terms of the agreement with the intermediary but it is likely to be the case. If so, it appears at first sight that the effect of s.60 TCGA is to treat the investors as co-owners of the underlying security, so the situs of the investor's interest is that of the underlying security.

It is considered however that these deeming provisions do not alter the fact that the investor's intermediated securities are "registered" so that s.275(1)(e) continues to apply. This also overrides the UK-law rule²⁹ even if the underlying security was subject to UK law, or if the intermediary arrangement was subject to UK law.

27 See 77.8.1 (The securities law background).

28 Section 60(2) TCGA defines "absolutely entitled" but need not be set out here.

29 See 78.13 (Intangible assets).

78.9.5 *Conclusion*

The CG Manual formerly stated that the situs of an intermediated security for CGT purposes is that of the underlying security rather than that of the intermediary's register.³⁰ That is correct for securities of UK incorporated companies. It is considered that situs of securities of non-UK companies depends on the place of the intermediary's register. That could be different from the situs of the underlying security, though circumstances in which the difference matters will be rare.

78.9.6 *Contract-based depository receipts*

The analysis is different for contract-based DRs (ie those where the investor has no interest in the underlying securities).³¹ In this case, if the DR will be UK situate for CGT purposes if governed by UK law, under the UK law rule, or if it is a future or option. Otherwise it will be non-UK situate.

78.10 Debt situs rule

A debt is in some cases a chargeable asset for CGT, so its situs may be relevant for CGT. Section 275(1)(c) TCGA provides:

subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.

I refer to this as “**the debt situs rule**”. This reverses the common law rule (under which a simple debt is situate where the *debtor* is situate).

A debt is UK situate if the creditor is dual-resident.

This provision overrides the UK-law rule and common law rules such as the specialty rule and the bearer security rule. However, it is subject to the rules relating to:

- (1) debentures;
- (2) judgment debts;
- (3) bank accounts.

³⁰ See 77.8.3 (HMRC view(s))

³¹ See 77.8.4 (Contract-based depository receipts).

The debt situs rule (if applicable) generally³² disapplies the CGT remittance basis because a debt owned by a remittance basis taxpayer is deemed UK situate so the gain from the debt is taxed on an arising basis.

78.11 Judgment debt

Section 275(1)(k) TCGA provides:

a judgment debt is situated where the judgment is recorded.

The CG Manual explains:

12430 Types of asset (1): Land, tangible property and debts

[January 2010]

Judgment debts, that is, debts created by the judgments, decrees, etc, of courts of record, are located where the judgment is recorded, Section 275(1)(k) TCGA 1992.

Obtaining judgment may have the effect of changing situs.

78.11.1 Commentary

It is considered that there is no point in a separate rule for judgment debts, and s.275(1)(k) should be repealed. That would be a small but worthwhile simplification. The statutory rule is based on the common law rule, but that is no reason to retain it.

78.12 Bank account

A foreign currency bank account is normally a chargeable asset for CGT.³³ The question therefore arises as to the situs of the asset. Section 275(1)(l) TCGA provides:

a debt which—

- (i) is owed by a bank, and

³² An exception is if the individual disposes of the debt while temporarily non-resident.

³³ See 52.10 (Foreign currency bank account).

- (ii) is not in sterling, and
- (iii) is represented by a sum standing to the credit of an account in the bank of an individual who is not domiciled in the UK,
is situated in the UK if and only if
 - [a] that individual is resident in the UK and
 - [b] the branch or other place of business of the bank at which the account is maintained is itself situated in the UK.

In short, for UK resident foreign domiciled individuals, the situs of a foreign currency account is the situs of the branch.

This restates the common law rule for bank accounts; it is needed because without this provision the situs of the account would be the residence of the creditor (ie the account holder).

In cases where the conditions (i), (ii) and (iii) are not all satisfied, the usual CGT debt rule applies. The moral is that a foreign domiciled UK resident individual should keep foreign currency in non-UK bank accounts.

Section 275(1)(l) only applies to individuals bank accounts. However the situs of a bank account held by a trust or a company does usually matter for CGT.³⁴

78.13 UK-law rule

Section 275A(1) TCGA provides:

This section applies for the purpose of determining whether the situation of an intangible asset (“asset A”) is in the UK if the situation of asset A is not otherwise determined (see section 275B(1)).

Section 275B(1) TCGA provides a commonsense explanation of “not otherwise determined”:

³⁴ If it did matter, the usual CGT debt rule would apply so all accounts held by a non-resident trust or non-resident company would be non-UK situate, as situs would depend on residence of the account holder. This means that UK services relating to the account qualify for foreign services relief under s.809W ITA. That could be important for a bank account held by a non-resident close company, which is a relevant person, but in practice the point will rarely if ever arise as such a company would not normally use a UK account.

For the purposes of section 275A, the situation of an asset is not otherwise determined if, apart from that section, this Act does not make any provision for determining—

- (a) the situation of the asset, or
- (b) whether the situation of the asset is in the UK.

Thus all the rules in s.275 TCGA have priority to this rule.

78.13.1 *Meaning of “intangible asset”*

Section 275A(2) TCGA provides a commonsense definition of “intangible asset”:

In this section “intangible asset” means—

- (a) intangible or incorporeal property and includes a thing in action, or
- (b) anything that under the law of a country or territory outside the UK corresponds or is similar to intangible or incorporeal property or a thing in action.

This includes policies and bonds, futures and options.

78.13.2 *The UK-law rule*

Section 275A(3) TCGA provides:

If asset A is subject to UK law (see section 275B(2)) at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

I refer to this as “**the UK-law rule**”.

The expression “subject to UK law” is widely defined in s.275B(2):

For the purposes of section 275A, an intangible asset is subject to UK law at a particular time if any right or interest which comprises or forms part of the asset is, at that time,—

- (a) governed by, or otherwise subject to, or
- (b) enforceable under,
the law of any part of the UK.

78.14 Futures and options

78.14.1 *Definitions of “future” and “option”*

Section 275B(3) TCGA provides:

In section 275A—

“future” has the meaning given by section 581 of CTA 2009, and
“option” has the meaning given by section 580 of that Act.

So we turn to s.580 CTA 2009 for the definition of option:

- (1) In this Part “option” includes a warrant.
- (2) References in this Part to an option do not include a contract whose terms—
 - (a) provide—
 - (i) that, after setting off their obligations to each other under the contract, a cash payment is to be made by one party to the other in respect of the excess, if any, or
 - (ii) that each party is liable to make to the other party a cash payment in respect of all that party's obligations to the other under the contract, and
 - (b) do not provide for the delivery of any property.
- (3) Subsection (2) does not prevent an option whose underlying subject matter is currency from being an option.

Section 710 CTA 2009 defines a “warrant”:

In this Part [Part 7]

“warrant” means an instrument which entitles the holder to subscribe for—

- (a) shares in a company, or
- (b) assets representing a loan relationship of a company, whether or not the shares or assets exist or are identifiable.

Section 581 CTA 2009 defines a “future”:

- (1) In this Part “future” means a contract for the sale of property under which delivery is to be made—
 - (a) at a future date agreed when the contract is made, and
 - (b) at a price so agreed,

but this is subject to subsection (3).

(2) For the purposes of subsection (1)(b), a price is agreed when the contract is made even if—

- (a) the price is left to be determined by reference to the price at which a contract is to be entered into on a market or exchange or could be entered into at a time and place specified in the contract, or
- (b) in a case where the contract is expressed to be by reference to a standard lot and quality, provision is made for a variation in the price to take account of any variation in quantity or quality on delivery.

(3) References in this Part to a future do not include a contract whose terms—

- (a) provide—
 - (i) that, after setting off their obligations to each other under the contract, a cash payment is to be made by one party to the other in respect of the excess, if any, or
 - (ii) that each party is liable to make to the other party a cash payment in respect of all that party's obligations to the other under the contract, and
- (b) do not provide for the delivery of any property.

(4) Subsection (3) does not prevent a future whose underlying subject matter is currency from being a future.

Sections 580(2),(3) and 581(3),(4) contain identical exclusions. This excludes futures and options, such as financial futures over the FTSE 100 index, which are settled in cash, rather than by delivery of the underlying subject matter.

I surmise that the purpose of the rules relating to futures and options is to prevent avoidance by shifting value from UK incorporated companies (UK situate for CGT) into futures and options which might (but for these rules) be situate outside the UK. That explains why financial futures are not affected by these rules. But if that is right, s.580(3) and 591(4), bringing currency options within the rules, make no sense.

78.14.2 “*Underlying subject matter*”

This expression is given a commonsense definition by s.275B(4) TCGA:

For the purposes of section 275A—

- (a) the underlying subject matter of a future is the property which,

- if the future were to run to delivery, would fall to be delivered at the date and price agreed when the contract is made, and
- (b) the underlying subject matter of an option is the property which would fall to be delivered if the option were exercised.

78.14.3 *Underlying subject matter in existence*

If a future/option is subject to UK law when created, it is UK situate under the UK-law rule. Special rules apply to a foreign law future/option. The drafting makes some formal gestures to the conventions of plain English legal drafting, but its structure is so convoluted that one wonders whether the drafter was trying to make a point about it (or perhaps a joke).

Section 275A(4) TCGA provides:

Subsections (5) to (9) below have effect if asset A—

- (a) is a future or option (see section 275B(3)), and
- (b) is not subject to UK law at the time it is created.

The rule is in s.275A(6) TCGA:

That rule is that where, in the case of any intangible asset,—

- (a) the asset is a future or option,³⁵
 - (b) the underlying subject matter (see section 275B(4)) of the asset consists of or includes an asset which is an intangible asset, and
 - (c) either—
 - (i) [A] that intangible asset is subject to UK law at the time it is created and,
 - [B] on the assumption that there were no rights or interests in or over that asset, the situation of that asset would not be otherwise determined, or
 - (ii) that intangible asset is treated by this subsection as being so subject [ie subject to UK law] at that time,
- the intangible asset mentioned in para (a) above [i.e. the future or option] is to be treated for the purposes of subsection (5) above and this subsection as being so subject at the time it is created.

This triggers s.275A(5) TCGA:

³⁵ This is otiose, since it repeats s.275A(4)(a); but it does not matter.

If, as a result of the application of the rule in subsection (6) below in relation to asset A or any other asset or assets, asset A falls to be treated as being subject to UK law at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

Thus a foreign law future/option over a UK law underlying intangible asset is itself UK situate.

EN FB 2005 explains the point of s.275A(6)(c)(ii):

These rules apply recursively. In any case where there is a “nested sequence” of futures or options in which the underlying subject matter of each contract in the sequence consists of or includes the next contract in the sequence, subsection (5) has effect to provide that the first contract is taken for TCGA purposes to be situated in the UK at all times if the [relevant] requirements ... are met in relation to any of the contracts in the sequence.

One might think that s.275A(6)(c)(i)[B] leaves a gap where the situs of the underlying subject matter *would* be otherwise determined. However, that gap is filled by s.275A(8)(b)(i)[B]:

(7) If—

- (a) asset A is not taken to be situated in the UK by virtue of subsection (5) above, and
- (b) as a result of the application of the rule in subsection (8) below in relation to asset A or any other asset or assets, asset A falls to be treated as being situated in the UK at any time,

it shall be taken for the purposes of this Act to be situated in the UK at that time.

(8) That rule is that where, in the case of any intangible asset,—

- (a) the asset is a future or option, and
- (b) the underlying subject matter of the asset consists of or includes an asset—
 - (i) which is, by virtue of
 - [A] subsection (9) below or of
 - [B] any provision of this Act apart from this section, situated in the UK at any time, or
 - (ii) which is treated by this subsection as being so situated [ie UK situate] at any time,

the intangible asset mentioned in para (a) above is to be treated for the purposes of subsection (7) above and this subsection as being so situated

at that time.

Thus a foreign law option over a UK situate share or debenture is UK situate.

78.14.4 *Underlying subject matter unissued shares or debentures*

Section 275A(9) TCGA makes provision for the case where the underlying subject matter is unissued shares or debentures:

Where—

- (a) the underlying subject matter of a future or option consists of or includes shares or debentures issued by a company incorporated in any part of the UK, but
- (b) at the time the future or option is created, those shares or debentures have not been issued,

the underlying subject matter of the future or option, so far as consisting of or including those shares or debentures, is to be taken, for the purposes of subsection (8) above, to consist of or include an asset which is situated in the UK at all times.

78.15 Insurance policy

The situs of policies rarely matters for CGT, because of the relief for policies. UK policies will be UK situate under the UK-law rule and for others the common law rule will apply.³⁶

78.16 Land

Section 275(1)(a) TCGA provides:

the situation of rights or interests (otherwise than by way of security) in or over immovable property is that of the immovable property.

The CG Manual provides:

12430 Types of asset (1): Land, tangible property and debts
[January 2010]

³⁶ A policy is not a debt for the purposes of the CGT debt situs rule.

Land and buildings (Section 275(1)(a) TCGA 1992)

Land and buildings are located in the country where they are found. This applies to all rights and interests in the land and buildings. It will therefore apply to leases of land, tenancies etc.

78.17 Chattels

Section 275(1)(b) TCGA provides:

subject to the following provisions of this subsection, the situation of rights or interests (otherwise than by way of security) in or over tangible movable property is that of the tangible movable property.

The CG Manual provides:

12430 Types of asset (1): Land, tangible property and debts
[January 2010]

Chattels (Section 275(1)(b) TCGA 1992)

Items of tangible moveable property (chattels) are located where they are found at any point in time. This applies to all rights and interests over such assets also. Therefore a lease of a chattel can change from being located in the UK to being located elsewhere if the chattel is removed from the UK to another country.

For the position of temporarily exported chattels, see 77.21 (Chattels).

78.18 Ships and aircraft

Section 275(1)(f) TCGA provides:

a ship or aircraft is situated in the UK if and only if the owner is then resident in the UK, and an interest or right in or over a ship or aircraft is situated in the UK if and only if the person entitled to the interest or right is resident in the UK.

The CG Manual provides:

12430. Types of asset (1): Land, tangible property and debts
[January 2010]

Ships and aircraft (Section 275(1)(f) TCGA 1992)

... Contrary to the general rules of international law,³⁷ for capital gains purposes the location of a ship or aircraft does not depend on its country of registration. Instead the ship or aircraft is located in the UK if and only if the owner is resident in the UK. Similarly any interest or right in or over the ship or aircraft is located in the UK if and only if the owner of the interest or right is resident in the UK.

This generally³⁸ disapplies the CGT remittance basis since a ship/aircraft owned by a remittance basis taxpayer is deemed UK situate and the gain taxed on an arising basis. If the individual holds the ship/aircraft through a non-resident company the asset is treated as not UK situate which has two advantages:

- (1) The s.13 remittance basis is available on a disposal by the company.
- (2) Relief is available under s.809W ITA for services relating to the asset.

78.19 Goodwill

Section 275(1)(g) TCGA provides:

the situation of good-will as a trade, business or professional asset is at the place where the trade, business or profession is carried on.

The CG Manual provides:

12450 Types of asset (3): Intangible assets - goodwill, patents, trademarks etc [January 2010]

Goodwill (Section 275(1)(g) TCGA 1992)

Goodwill which is an asset of a trade, profession or vocation is located where the trade, profession or vocation is carried on. If the trade etc is carried on in more than one country part of the goodwill appropriate to the part of the trade etc carried on in any one country should be treated as located in that country.

78.20 Interest under bare trust or nominee ship

The interest of a beneficial owner in property held by a nominee or bare

37 The Manual's view (that under international law ships and aircraft are situate where registered) is erroneous: see 77.22 (Ships and aircraft).

38 An exception is if the individual disposes of the asset while temporarily non-resident.

trustee is situate where the underlying asset is situate: s.60 TCGA reinforces the common law rule on this point.³⁹

For unit trusts see 37.5.2 (Situs of unit for CGT).

78.21 Equitable interest under a substantive trust

The situs of an equitable interest under a substantive trust only rarely matters for CGT because of the exemption for equitable interests. However it may matter, eg in the case of a purchased interest or an interest in a non-resident trust.

If the trust is “subject to UK law” (as defined) the interest will be situate in the UK. This clearly includes the case of a trust with a UK governing law; it may arguably apply to any trust with UK trustees. In other cases the common law rules will apply.

78.22 Intellectual property

Section 275(1)(h) TCGA provides:

patents, trade marks, registered designs and corresponding rights are situated where they are registered, and if registered in more than one register, where each register is situated, and licences or other rights in respect of any such rights are situated in the UK if they or any right derived from them are exercisable in the UK,

A different solution must be found for copyright, since such rights do not need registration. Section 275(1)(j) TCGA provides:

copyright, design right, franchises, and corresponding rights, and licences or other rights in respect of any such rights, are situated in the UK if they or any right derived from them are exercisable in the UK.

“Corresponding rights” has a commonsense definition in s.275(3) TCGA:

In subsection (1) above, in each of paras (h) and (j), “corresponding rights” means any rights under the law of a country or territory outside the UK that correspond or are similar to those within that paragraph.

39 See 77.25 (Interest under bare trust or nomineehip).

This will not often concern remittance basis taxpayers. It is important for non-residents carrying on a trade in the UK through a permanent establishment, who are (in short) subject to CGT on UK situate trading assets.

It seems at first sight that intellectual property is (uniquely) capable of being situate for CGT purposes in more than one jurisdiction. But it is considered that intellectual property exercisable in a number of jurisdictions should be regarded as a number of separate assets, one situate in each jurisdiction. The CG Manual provides:

12450 Types of asset (3): Intangible assets - goodwill, patents, trademarks etc [January 2010]

Copyright, design rights, franchises etc (Section 275(1)(j) TCGA 1992)

- Copyright, design rights and franchises
- Any rights or licences to use
 - any copyright work
 - any design in which design rights subsist

are situated in the UK if they or any right derived from them are exercisable in the UK.

78.23 Unadministered estate of deceased person

If the estate is subject to UK law, it is UK situate for CGT. Other estates are governed by the common law rule.⁴⁰

⁴⁰ See 77.27 (Unadministered estate of deceased person).

CHAPTER SEVENTY NINE

FOREIGN ENTITIES

79.1 Introduction

UK tax law categorises entities (in short) as companies, partnerships or trusts.¹ With more or less difficulty (depending on the similarity of the law of the country concerned) it is necessary to shoehorn foreign entities into these categories; or more accurately, it is necessary to decide whether references to companies, trusts, partnerships, persons, etc in any particular statutory provision include some particular foreign entity. Similarly, it is necessary to decide whether terms such as “share capital” or “interest in possession” are apt to include rights in or under foreign entities (or indeed whether individuals have any “right” or “interest” in a foreign entity at all).

Memec v IRC explains the general approach:

When an English tribunal has to apply the provisions of an UK taxing statute to some transaction, arrangement or entity which is governed by a foreign system of law, the tribunal must take account of the rules of that foreign system (properly proved if not admitted) in order to determine the nature and characteristics of the transaction, arrangement or entity. But having informed itself in this way, the tribunal must then apply the taxing statute as part of English law.²

1 And lastly, PRs but PRs are not discussed in this chapter.

2 71 TC 77 at p.92. Most OECD countries adopt the same approach:

“11. In most [OECD] Member countries, as a matter of principle, tax laws apply on the basis of the legal relationship deriving from other branches of the law. Thus the tax laws of these countries, when referring to partnerships, will, absent special tax definitions, refer to those entities that constitute partnerships according to domestic civil or commercial law.

12. Difficulties often arise, however, where income is derived by an entity

Thus in order to say whether a reference to (say) a trust or trustee in any particular statutory provision include some particular foreign entity or person, one must ask some fundamental questions:

- (1) What are the determinative characteristics of a trust or trustee (within the meaning of the section), a question of UK law; and
- (2) Does the foreign entity or person have those characteristics, a question of the foreign law.

Similar issues arise in the application of DTAs to foreign (and UK) entities, for instance, whether an entity is a “person” or a “body corporate” for the purpose of a DTA. Similar issues arise in non-tax contexts.³

So far as the topic raises issues of foreign law I necessarily rely on

organised under the laws of another jurisdiction. In that case, the entity will have to be classified for purposes of the application of the tax laws of the country where the income is derived, regardless of whether or not that classification is compatible with the civil or commercial law system of the jurisdiction from which the entity derives its legal status.

13. For example, if the tax system of a country recognises only individuals, companies and partnerships (but not trusts) as taxpayers and provides for a different tax treatment for these three types of taxpayers, that country will have to ‘force’ foreign entities in one or the other of these categories (with more or less difficulty depending on the similarity of the civil and commercial law of the countries concerned) for purposes of applying its tax system to domestic income derived by these foreign entities.

14. In doing so, the practice of most countries is to adopt the same approach as the one they apply in a purely domestic context. They will therefore apply their domestic tax classification to foreign entities on the basis of the foreign law’s legal characteristics of the entity. In the previous example, the country, for the purposes of taxing the domestic income of a trust established under the law of a foreign jurisdiction, will typically examine the legal characteristics of the trust as they derive from the trust law of the foreign jurisdiction in order to determine whom it should tax and whether that person should be taxed as an individual, company or partnership, which are the only categories recognised under its tax law.”

See OECD, “The Application of the OECD Model Tax Convention to Partnerships” (1999) accessible (at a small charge) from www.oecd.org; J Avery Jones “Characterisation of Other States’ Partnerships for Income Tax”, [2002] BTR 375 is essential reading in this area.

- 3 See for instance s.1208 Companies Act 2006: “partnership” means—
- (a) a partnership within the Partnership Act 1890, or
 - (b) a limited partnership registered under the Limited Partnerships Act 1907, or a firm or entity of a similar character formed under the law of a country or territory outside the UK”.

secondary material. I would be interested in comments from readers with foreign law expertise if views expressed in this chapter need correction or expansion, and in particular if they disagree with HMRC official views.

A full discussion of the deeply intriguing issues raised in this chapter would require a book to itself.

HMRC published their views in Tax Bulletin 83 (also called RI 279) but the HMRC website now states that this statement is “superseded by INTM180000”. Accordingly the quotes are taken from the International Manual.

79.1.1 “Transparent” and “opaque”

UK tax law categorises entities as transparent or opaque.⁴ The International Manual explains this terminology:

180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes [April 2012]

... Entities are described [in the official list set out below] as either fiscally “transparent” or “opaque” solely for the purposes of deciding how a member is to be taxed on the income they derive from their interest in the entity. In the case of a “transparent” entity the member is regarded as being entitled to a share in the underlying income of the entity as it arises and is charged to tax in the UK on their share of the profits on that basis. But, in the case of an “opaque” entity the member generally is taxed only on the distributions made by the entity.

The terminology is also used for CGT (eg a partnership is transparent for CGT); and for IHT (eg a partnership is not transparent for IHT). Indeed, one should strictly not use the term “transparent” without specifying a tax, because an entity may be transparent for one tax and not for another, but the term is used most often with IT in mind.

Classification of an entity as transparent ought logically to entail that the entity is regarded as not entitled to the income/gains (since its members, or those who own or have an interest in the entity, are regarded as so entitled). For instance, a partnership is transparent and income accrues to the partners and not to the partnership. Perhaps illogically, this is not

⁴ A note on terminology. The term sometimes used is “fiscally transparent” (or “fiscally opaque”) but that is synonymous with “transparent” (or “opaque”).

always the case. For instance, despite the undoubted fact that an IP trust is transparent, the trustees may still be taxable on the trust income; likewise a settlor-interested trust within s.624. That rule favours HMRC (by offering an alternative person liable for the tax) but in the case of DT exemptions, it may favour the taxpayer (by offering an alternative route to DT relief).

Thus classification as transparent or opaque does not necessarily answer all the tax questions which may arise in relation to an entity; but it is normally enough.⁵

The International Manual continues:

180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes [April 2012]

It should be noted that the expressions “transparent” and “opaque” are not interchangeable with “partnership” and “company” or “body corporate”. For example, a fiscally transparent entity is not necessarily a partnership. Likewise an UK company is a “body corporate” and is opaque for the purposes of UK tax on income, but a fiscally opaque entity is not necessarily a “body corporate” or a “company” for UK tax purposes.

Although the expressions are not interchangeable, the issues overlap. A transparent entity is not necessarily a partnership⁶ but a partnership is always transparent for IT and CGT.⁷

The International Manual explains HMRC’s approach to categorising an entity as transparent or opaque:

180010. Factors to consider in classifying a foreign entity for UK tax purposes [January 2012]

... When considering the classification of a foreign entity (i.e. whether

5 The Tax Tribunal expressed doubts about the terminology in *Swift v HMRC* [2010] UKFTT 88 at [18]:

“The issue is whether the UK tax is ‘computed by reference to the same profits or income’ or whether he is taxable on the equivalent of a dividend. Asking whether SP LLC is transparent or opaque may be another way of asking the same question but we consider that it is preferable to apply the words of the Treaty.”

It is considered that the labels transparent/opaque are nevertheless useful shorthand.

6 For instance, an IP trust is also transparent: see 25.1 (Taxation of Life Tenant).

7 See 38.3 (Transparency of partnership for IT); 38.6 (Transparency of partnership for CGT).

it is either opaque or transparent) for UK tax purposes, due regard is given to the approach of the Court of Appeal in the case of *Memec plc v IRC* (71 TC 77) and the line of case law that precedes it. In particular, the following matters should be considered:

- (a) Does the foreign entity have a legal existence separate from that of the persons who have an interest in it?
- (b) Does the entity issue share capital or something else, which serves the same function as share capital?
- (c) Is the business carried on by the entity itself or jointly by the persons who have an interest in it that is separate and distinct from the entity?
- (d) Are the persons who have an interest in the entity entitled to share in its profits as they arise; or does the amount of profits to which they are entitled depend on a decision of the entity or its members, after the period in which the profits have arisen, to make a distribution of its profits.
- (e) Who is responsible for debts incurred as a result of the carrying on of the business: the entity or the persons who have an interest in it?
- (f) Do the assets used for carrying on the business belong beneficially to the entity or to the persons who have an interest in it?

Some of those factors may point in one direction; others may point in another. An overall conclusion is reached from looking at all the factors together, though some have more significance than others. Particular attention is paid to factors c. and d.

In considering these factors we look at the foreign commercial law under which the entity is formed and at the internal constitution of the entity. ... The conclusion that is reached is then used in considering the relevant piece of UK tax law.⁸

79.1.2 *Significance of foreign law classifications and terminology*

HMRC say in the International Manual passage cited above:

How the entity is classified for tax purposes in any other country is not relevant.

⁸ This passage is also set out in INT Manual 180010. I deal with the omitted sentence in the following paragraph.

If the foreign tax law is sufficiently similar to UK law, it is considered that a foreign law classification as transparent/opaque ought to be relevant, though not of course decisive; but in practice that condition is often not satisfied, or at least, in the event of a dispute, the question whether the foreign law is “sufficiently similar” is likely to be contested.

Similarly, whether foreign law describes something as, say, a trust, does not mean that it is a trust for UK tax law purposes, though that ought to be relevant if the law is sufficiently similar. As the upper tribunal have said:

The meaning of the word [dividend] in the tax legislation is a matter of English law not of Cayman law.

Although Cayman law uses the word “dividend” to cover the distributions made in the present case ... it does not follow that the Preference Dividends are therefore “dividends” with the meaning of the UK tax legislation.⁹

79.2 Definition of “IHT-settlement”

It was noted above that UK tax law categorises entities as companies, partnerships and trusts. “Partnership” is in general undefined, and the definition of “company” (discussed below) is fairly standard. However quite different definitions of trusts are used in different taxes.

I discuss terminology in more detail in 75.2.1 (terminology); in summary:

“IHT-settlement” means a settlement within the IHT definition

“Standard IT/CGT settlement” is a settlement within the standard IT/CGT definition.

“Settlement-arrangement” is a settlement within s.620 ITTOIA, which applies for the purposes of the IT settlement provisions and many other purposes of which the most important is s.87 TCGA.

The terms trust and settlement are used interchangeably.

Because the definitions are different, it is a mistake to ask if an entity is a trust “for tax purposes”. One must ask if it is a trust for IT/CGT, or for IHT purposes or if it is a settlement-arrangement. An entity may be a trust within one, or two, or all three definitions.

⁹ *HMRC v First Nationwide* [2011] STC 1540 at [23]. The point was not doubted on appeal. For another example, see 79.5 (American revocable trust (grantor trust)).

I discuss the IT/CGT and settlement-arrangement definitions elsewhere.¹⁰ Section 43(2) IHTA provides the IHT definition:

“Settlement” means any disposition or dispositions of property, whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby the property is for the time being—

- (a) held in trust for persons in succession or for any person subject to a contingency, or
- (b) held by trustees on trust to accumulate the whole or part of any income of the property or with power to make payments out of that income at the discretion of the trustees or some other person, with or without power to accumulate surplus income, or
- (c) charged or burdened (otherwise than for full consideration in money or money’s worth paid for his own use or benefit to the person making the disposition) with the payment of any annuity or other periodical payment payable for a life or any other limited or terminable period,
- [d] or would be so held or charged or burdened if the disposition or dispositions were regulated by the law of any part of the UK;
- [e] or whereby, under the law of any other country, the administration of the property is for the time being governed by provisions equivalent in effect to those which would apply if the property were so held, charged or burdened.

79.2.1 *Limb [d]: would be so held if disposition were regulated by UK law*

This limb is present for historic reasons only. The estate duty definition of “settlement” in s.22(1)(i) FA 1894 formerly provided (so far as relevant):

The expression ‘settlement’ means any instrument, whether relating to real property or personal property, which is a settlement within the meaning of the Settled Land Act, 1925, or if it related to real property would be a settlement within the meaning of that Act

Dick Taverne, then Financial Secretary to the Treasury, explained the problem posed by this definition:

¹⁰ See 75.2 (Definition of “settlement”).

The definition is primarily by reference to the Settled Land Act 1925, but it brings in property other than settled land by references to instruments which if related to real property in England and Wales would be a settlement within the meaning of the Act. We now see that it is arguable that we have done no more than equate an English settlement of personalty with one of realty and that we have not caught foreign settlements.¹¹

Hence s.36(5) FA 1969 extended the definition:

In the enactments relating to estate duty—

- (a) the expression ‘settlement’— (i) for the avoidance of doubt is hereby declared to include—
- (aa) any disposition whereby property is held by trustees on trust to accumulate the whole or part of any income of that property or with a power for the trustees to make payments out of that income at the discretion of the trustees or some other person with or without a power to accumulate surplus income; and
- (bb) *any disposition regulated by the law of a territory outside Great Britain which would constitute a settlement within the meaning of section 22(1)(i) of the Finance Act 1894 if it had been regulated by the law of England or, as the case may require, of Scotland;*

The words now in s.43(2)[d] IHTA are derived from s.36(5)(i)(bb) FA 1969. Now, the definition of settlement for IHT is not by reference to the SLA 1925 and applies to UK and foreign law trusts, so the words in s.36(5)(i)(bb) FA 1969 were not needed. The drafter of the current definition possibly did not notice, but probably thought the words desirable to preclude an argument that “trust” in s.43 meant a trust governed by a UK law. That argument would not have been very convincing but given the history of the provisions might not have been self-evidently wrong.

Limb [d] therefore has no practical effect.

79.2.2 *Limb [e]: provisions equivalent in effect to a trust*

The standard IT/CGT definition has no equivalent of s.43(2)[e]. So while

¹¹ Hansard Standing Committee F, 24 June 1969, col 721.

the IT/CGT definition requires that property is held “in trust” it is (in short) sufficient for IHT that the property is governed by provisions which are equivalent in effect.

The statute refers to the *administration* of the property being governed by provisions equivalent in effect. Trust law draws a distinction between administrative and dispositive provisions, but the context here shows that this is referring to all the provisions which govern the use of the property, and not just administrative provisions in the strict sense.

Two difficulties lie in the short phrase “equivalent in effect”:

- (1) Equivalent *in effect* presumably requires effective (or substantive) rather than exact equivalence, but where does one draw the line?
- (2) Trusts can have the same effect as entails, usufructs, wills, corporations, charges by way of security over assets, and so on, though they are none of those things. A trust is a flexible, protean institution which can have markedly different effects.

In deciding whether a foreign institution is equivalent in effect to a trust, a court should have regard to the context - is it appropriate in the scheme of IHT that an entity should be subject to IHT in the same manner as a trust? This consideration supports the view taken below that a foundation (stiftung) is an IHT-settlement but a usufruct is not.

79.3 Meaning of “company”

Section 1121(1) CTA 2010 provides the definition for the corporation tax acts:

In the Corporation Tax Acts “company” means any body corporate or unincorporated association, but does not include a partnership, a local authority or a local authority association.¹²

Section 992(1) ITA provides the identical definition for the income tax acts. Section 288 TCGA provides a similar definition for the TCGA:

“company” includes any body corporate or unincorporated association but does not include a partnership, and shall be construed in accordance with section 99;

¹² This is subject to some minor (unnecessarily complicated) exceptions but those need not be considered here.

The IHTA does not provide a definition of “company” but the definition of close company in the close company rules incorporates the CTA definition. Section 102(1) IHTA provides:

(1) In this Part of this Act—
‘close company’ means a company within the meaning of the Corporation Tax Acts which is (or would be if resident in the UK) a close company for the purposes of those Acts;

For SDLT, s.100(1) FA 2003 provides a similar definition:

In this Part “company”, except as otherwise expressly provided, means any body corporate or unincorporated association, but does not include a partnership.

79.4 Bare trusts/nomineeships

79.4.1 Definition(s) of bare trust and associated terminology

Section 466 ITA provides:

- (2) “Settled property” means any property held in trust other than property excluded by subsection (3).
- (3) Property is excluded for the purposes of subsection (2)
 - (a) it is held by a person as nominee for another person,
 - (b) it is held by a person as trustee for another person who is absolutely entitled to the property as against the trustee, or
 - (c) it is held by a person as trustee for another person who would be absolutely entitled¹³ to the property as against the trustee if that other person were not an infant or otherwise lacking legal capacity.

The phrase “absolutely entitled to property as against a trustee” is defined in s.466(5) ITA:

13 The term “absolutely entitled” is defined in s.466(6) ITA:

“References to a person who is or would be so entitled include references to two or more persons who are or would be jointly absolutely entitled as against the trustee.”

A person is absolutely entitled to property as against a trustee if the person has the exclusive right to direct how the property is to be dealt with (subject to the trustees' right to use the property for the payment of duty, taxes, costs or other outgoings).

I use the following terms:

“A bare trust” (or **“nomineeship”**, the terms are for present purposes synonymous) is a trust of property:

- (1) within s.466(3) ITA and its CGT equivalent, s.60 TCGA (ie, not settled property for IT/CGT purposes) and
- (2) not within s.43 IHTA (ie, not settled property for IHT purposes).¹⁴

These two definitions are not quite identical, but in practice they usually amount to the same.

“A substantive trust” is a trust that is not a bare trust.

This is now standard usage among private client practitioners. But in the past the expression “bare trust” was used in a variety of different senses.¹⁵

This is now of historic interest only, but it needs to be kept in mind, especially when reading older cases, that references to a bare trust may not be a reference to a bare trust in the above sense.

There is some debate as to whether what I call a bare trust should always be described a “trust” but that makes no difference for tax purposes.

79.4.2 *Tax treatment of bare trust*

In short:

- (1) A bare trust is transparent for CGT,¹⁶ for IT and for IHT.
- (2) A bare trust is not an IT/CGT settlement.
- (3) A bare trust is not an IHT-settlement as the property is not held on trust for persons in succession (or governed by provisions equivalent in effect).
- (4) A bare trust may be a settlement-arrangement. However it is not within s.87 TCGA as gains do not accrue to the trustees, so there are no s.2(2) amounts (trust gains).

The question of whether a trust is classified as a bare trust or a substantive trust is therefore of some importance.

¹⁴ See 79.2 (Definition of “IHT-settlement”).

¹⁵ The old cases are assembled in *Re Blandy Jenkins* [1917] 1 Ch 46.

¹⁶ Section 60 TCGA.

79.4.3 *The trust law background*

In classifying an entity as a bare or a substantive trust, three rules of trust law (or succession law) are particularly relevant:

- (1) A substantive trust must confer rights on more than one person. If a trust has only one beneficiary, it can only be a bare trust.
- (2) A testamentary disposition has no effect during the life of the testator/settlor, so if a disposition is classified as testamentary, it can only be a bare trust during the lifetime of the testator/settlor.
- (3) A trust which is a sham is generally a bare trust.

Of course a foreign law entity may be classified as a bare trust, just as an English law trust may constitute a bare trust.

79.4.4 *Substantive trust must confer rights on more than one beneficiary*

Whether a trust confers rights on more than one beneficiary is a question of construction.

There may be a substantive trust even if the interest of the second beneficiary is a future interest of no economic value. There is no *de minimis* requirement.

Thus in *Corlet v Isle of Man Bank Limited* [1937] 3 DLR 163, and *Anderson v Patton* [1948] 2 DLR 202 lifetime trusts conferred what one might regard as minimal future revocable interests on beneficiaries other than the settlor, but the trusts were valid. The latter case concerned a document reciting:

received from A \$5,000 which I am to hold in trust for A and which I am to pay out as instructed to X and Y if anything should happen to A. The money will be returned if A should demand it.

The Court held by a majority that even this was a valid trust. (One can see the force of the minority view that this was actually intended to be testamentary.)

Lewin on Trusts says:

The reservation by the settlor of large beneficial powers and interests

may leave the lifetime trusts declared in favour of others so squeletic¹⁷ as to be considered illusory. If a power of revocation is also reserved, this can turn a settlement into a will.¹⁸

This may be read to suggest that a trust may purport to confer some interest on other beneficiaries, but if that interest is insufficiently large or important it does not count. I refer to this as a *de minimis* principle.

The term sometimes used is “illusory trusts”, but I think it causes confusion to use the term “illusory” unless it is clear what is required to be “illusory”; in other words, to call a trust or an interest “illusory” represents a conclusion of invalidity, rather than a useful test of how to reach that conclusion.

While a substantive trust must confer rights on more than one person, there is no rule that the rights of the second person must exceed some *de minimis* requirement. It is well established that a settlor (“S”) may create a valid trust conferring a life interest on S, with power of revocation exercisable by S, and subject to that, for R. The reversionary interest of R is not so small it should be disregarded. But R’s interest has a nil economic value and a lifetime settlement of this kind has in substance the same effect as a will. How does one distinguish between revocable reversionary interests, which are valid, and (even) less significant interests (which are not)? Unless one knows what is too small an interest (and different views on that would be possible) it will be impossible to say whether trusts are substantial trusts or bare trusts.

The authorities do not provide any support for a *de minimis* requirement of this kind. The relevant cases are not consistent with any *de minimis* requirement of this kind. The question of whether there is a substantive trust is not determined by asking whether a beneficiary’s interest was “squeletic”. The question is whether the “beneficiary” (using that word in a non-technical way) has an interest at all.

79.4.5 Testamentary/non testamentary dispositions

English law (and foreign laws which adopt common law principles) draw between:

¹⁷ This word is not in the OED, but one of the authors of Lewin tells me it means: skeletal.

¹⁸ 18th ed, 2008, para. 1-14

- (1) testamentary dispositions;
 - (2) non-testamentary dispositions (here called “lifetime dispositions”).
- The distinction matters for many reasons including the following:
- (1) Different (stricter) formalities apply to testamentary dispositions.¹⁹
 - (2) A testamentary disposition only takes effect on death. A lifetime disposition takes effect before death, normally when executed.
 - (3) A testamentary disposition is revocable until death. A lifetime disposition is only revocable if this is expressly stated, and even if it is revocable, circumstances which revoke a testamentary disposition (eg making a new will in common form, or marriage) may not revoke a lifetime disposition.

In particular, if a disposition which creates a trust is a testamentary disposition, the trust must be a bare trust during the life of the settlor/testator.

Statute law recognises the testamentary/non-testamentary distinction²⁰ but gives no guidance on it. There is a certain amount of (mainly antique) case law. A disposition is testamentary if it is the intention of the writer of the document “that death was the event that was to give effect to it”.¹²

A disposition which confers a life interest on the settlor and also a power of revocation is in principle a valid lifetime disposition, not testamentary. In *Thompson v Browne*²² the Court said:

If there be anything in that decision [*Attorney-General v Jones*] to support the notion, that where a person by deed settles property to his own use during his life, and after his decease for the benefit of other

19 If a foreign law entity were a testamentary disposition under English law, it might be valid under foreign law even though it would not satisfy English law formality requirements (two witnesses, etc). The entity may then be void in English law, lacking the formalities required for a valid will; but it may be saved by the Wills Act 1963. If the entity is void in English law but valid in foreign law, the applicable conflict of law principles must be applied to see which legal system has priority.

20 Section 1 Wills Act 1837 merely says that the term “will” includes a testamentary disposition.

21 *Milnes v Foden* (1890) 15 PD 105 at p.107; or (which comes to the same thing) “that it is dependent on the death for its vigour and effect”; *Cock v Cooke* (1866) 1 P&D 241 at p.243. If the document calls itself a will, the intention is usually obvious, but it is not necessary to use the word “will”. For instance, a conveyance “not to take effect until after my decease” is obviously testamentary: *In the Goods of Morgan* (1866) 1 P&D 214.

22 (1835) 3 My & K 32.

persons, a power of revocation reserved in such a deed alters the character of the instrument, and renders it testamentary, ... I can only say that, if this were law, a great number of transactions of which the validity has never been doubted would be liable to be impeached.²³

The beneficiaries of a lifetime trust have an equitable interest from the date of the gift, known as a present future interest. They could in theory take proceedings in the event of a breach of trust. However in practice this may be a theoretical possibility only. The difference between a testamentary disposition and a trust of this kind is then essentially one of form and not one of substance. There is no economic difference. In cases of this kind it could be harder to construe the document and determine whether the intention of the writer is:

- (1) to confer a present future interest or
- (2) that death is the event which gives effect to the document.

Since it makes no real (economic) difference, the writer of the document may not have formed a clear intention on the point, or even if they have, they may not have expressed that intention clearly in the document. In these cases the form of the document is an important guide to construction. If the document takes the form of a will, (ie describing itself as a will and executed with the formalities of a will) the intention of the writer must be that it is testamentary. If it takes the form of a lifetime settlement (ie describing itself as such and executed as a deed), the intention of the writer must be that it is a lifetime disposition. Of course the form of the document is not decisive. The context may show otherwise. However, the form certainly gives some guidance and in the absence of contrary indications it must be determinative.

The rule that a testamentary disposition does not create a substantive trust during the lifetime of the settlor/testator should be regarded as distinct from the rule that a substantive trust must confer an interest on more than one beneficiary. In the case of a testamentary disposition, there would be someone who is intended to benefit after the death of settlor/testator, but the question is whether they are intended to benefit immediately or on death. However, in practice, factors which might tend to show that the intention of the writer of the document is testamentary might also show that there was no intention to confer any interest on a beneficiary during the lifetime of the settlor, so the two rules can overlap.

23 The point is also stated in *Baird v Baird* [1990] 2 AC 548 at p.556.

79.4.6 *Sham*

The doctrine of sham applies to trusts and not to other entities such as companies.

Whether or not a foreign entity is void as a sham depends on the applicable foreign law of sham, or some similar doctrine, if the foreign law has one. Most common law jurisdictions broadly follow English law principles and an English court will assume English law applies in the absence of evidence to the contrary.

79.5 American revocable trust (grantor trust)

Revocable trusts are commonly used in the USA for estate planning.²⁴ With an American settlor these are almost always grantor trusts (a USA income tax concept) and transparent for USA tax purposes as to income and capital gains, though with non-USA settlors they are only transparent in limited circumstances.

The classification of a USA revocable trust turns on the nature of the rights conferred by the trust, which depends on the drafting and proper law of the trust.²⁵ Only general comments are possible here.

Under a common form revocable trust, the settlor (the synonymous terms grantor, trustor, creator or donor are often used in American trust documentation) is sole trustee, the trust is revocable and the income and capital is paid to the settlor on demand. Section 603 of the American Uniform Trust Code²⁶ provides:

While a trust is revocable [and the settlor has capacity to revoke the trust],²⁷ rights of the beneficiaries are subject to the control of, and the

24 I am grateful to Ian Watson for his comments on this section. For other USA trusts, see Sanborn, "US tax classification of trusts", (2005) TQR Vol 3 issue 2 p.16 accessible to STEP members on www.step.org.

25 Each USA state is a separate common law jurisdiction, with its own trust law, ultimately derived from English law but with statutory and case law variations.

26 Accessible www.nccusl.org. The uniform code project is an attempt to standardise USA law. Adoption of uniform codes is far from universal, however, and each state adopting them may do so with variations. Some state statutes (eg, California Probate Code section 15800) impose rules almost identical in effect to UPC section 603, though independently of the uniform code project.

27 Square brackets in original, as the wording is intended to be optional.

duties of the trustee are owed exclusively to, the settlor.

A USA revocable trust of this kind is not an IT/CGT settlement as the property is not held “in trust”. This seems paradoxical, but the fact that American lawyers describe something as a trust does not mean that it is a trust within the meaning of the word as used in UK statutes.²⁸ In English law, “there is an irreducible core of obligations owed by the trustees to the beneficiaries and enforceable by them which is fundamental to the concept of a trust. If the beneficiaries have no rights enforceable against the trustees there are no trusts.”²⁹ The USA revocable trust may appear at first sight to grant rights to beneficiaries, but during the lifetime of the settlor (or at least while the settlor is mentally competent) the rights are unenforceable and do not amount to “rights” at all.

If the settlor is not the sole trustee, there is a trust; but if (in the words of the Uniform Trust Code) “the duties of the trustee are owed exclusively to the settlor” it is considered that the USA revocable trust is a bare trust for UK tax purposes. For CGT, the settlor is absolutely entitled as against the trustee. A USA revocable trust of this kind is similarly not an IHT-settlement, since:

- (1) if the settlor is sole trustee there is no trust;
- (2) if the settlor is not sole trustee there is only a bare trust.

The property is not held in trust for persons in succession. The better view is that a USA revocable trust of this kind is also not equivalent in effect to a trust for persons in succession. The element of succession is that of a will. In other words, a USA revocable trust of this kind is in English law a bare trust and a testamentary disposition.³⁰ This view was adopted in *BQ v DQ*.³¹

28 See 79.1.2 (Significance of foreign law classifications and terminology).

29 *Armitage v Nurse* [1998] Ch 241 at p.253. Likewise Hague Convention art.2 (“A trust has the following characteristics ... (c) the trustee has the power and the duty, in respect of which he is accountable, to manage, employ or dispose of the assets in accordance with the terms of the trust ...”). The rule goes back to *Morice v The Bishop of Durham* (1804) 9 Ves Jun 399 at p.405: “There must be someone in whose favour the Court can decree performance.”

30 See 79.4 (Bare trusts/nomineeships). Underhill & Hayton agree: *Law of Trusts & Trustees* (18th ed 2010), para 4.8 fn1.

31 Supreme Court of Bermuda [2011] WTLR 373; [2011] TLI 23 accessible www.gov.bm.

Depending on the wording, a USA revocable trust of this kind may cease to be a bare trust, and become a settlement (for IHT and IT/CGT) if the settlor loses mental capacity. This could of course have significant UK tax consequences.

One could if desired draft a trust which meets the USA requirements to be a grantor trust and which is a settlement for IT/CGT and IHT purposes. It would need to be one where (during the lifetime of the settlor) the trustees owed duties to beneficiaries other than just the settlor.

79.6 Foundation (*Stiftung*)³²

79.6.1 Terminology

This section is concerned with non-charitable foundations which are found in Liechtenstein, Jersey, the Bahamas and many civil law jurisdictions. I focus on Liechtenstein foundations (*Stiftungen*) though I refer at points to other foundations.

Foundation jurisdictions differ widely. I am not aware of any differences that matter for the purposes of this section; but one should not assume that foundations in all jurisdictions are so similar that they must be classified in the same way in the UK, just because they share the same name. One should not even assume that all foundations in the same jurisdiction must be classified the same way, as the drafting of the particular foundation's documentation may make all the difference.³³

The word "foundation" is sometimes used in the UK as a name for a charity (eg "the British Heart Foundation") but the word has no specific technical meaning in English law. In the USA "private foundation" is a technical term used to describe a specific category of charities and NPOs, in short, those which receive their funds from one person and which are regarded as donor-controlled.³⁴ I am not concerned with charitable

32 On this topic see Venables, *The Taxation of Foundations* (2010); Easun, "Trusts & Foundations", ITPA Journal Vol 5, No. 3; Baker, "Beneficiaries of Trusts and Foundations" accessible www.taxbar.com/gitc.html.

33 For instance, an entity which the USA is called a lifetime trust may (depending on drafting) be regarded in the UK as a testamentary disposition and not a trust: see 79.5 (American revocable trust (grantor trust)).

34 See US Internal Revenue Code § 509 (Private foundation defined).

foundations here.³⁵

79.6.2 *Is a foundation an IT/CGT settlement, or a company?*

A Liechtenstein foundation normally has legal personality. Biedermann explains:

Since, in most cases, the Liechtenstein foundation has legal personality, it is subject to the general provisions concerning legal persons and it has a corporate structure with a board of foundation. The *in rem* aspect of the beneficial rights under trusts, i.e. non-reachability of trust property by creditors of the trustee, is not necessary for foundations, since the foundation has its own personality. The beneficial rights under a foundation may be less strong, because there is no specific tracing possibility *vis-à-vis mala fide* purchasers and volunteers. However, this deficiency is overcome by the public faith principle, since anyone dealing with a foundation has to look at the objects and competence clause of a foundation in order to know whether a board of foundation is entitled to *e.g.* sell some specific foundation property.³⁶

On the evidence of this passage it is considered that property in a foundation is not held “in trust”. An essential (or almost essential)³⁷ characteristic of a trust is that “the assets constitute a separate fund and are not a part of the trustee’s own estate”.³⁸ A foundation does not have this

35 For the question of whether foreign charities qualify for UK charity tax reliefs, see Kessler & Brown, *Taxation of Charities and Non-profit Organisations* (8th ed, 2011), chapter 2 (Definitions of Charity) (online version www.taxationofcharities.co.uk).

36 Biedermann, “Foundations vs Trusts” [1993] PCB 283.

37 It is hard to make any comment about trusts without qualification. A charitable trustee incorporated under s.50 Charities Act 1993 might not constitute a separate fund. But that is an anomalous and unusual case and perhaps itself not a “trust” in the ordinary sense.

38 See Article 2 Hague Convention on the Law applicable to Trusts and on their Recognition. *Lewin on Trusts* (18th ed., 2008) regards the Hague Convention definition as “generally applicable”: para 1-01. See too Hayton “Principles of European Trust Law” p.23 in *Modern International Developments in Trust Law* 1999, ed. Hayton (“While many mainland European jurisdictions have the functional equivalent of a charitable purpose trust in the guise of a foundation which has legal personality, we deliberately rejected extending our [conception of] trust to cover such functions. It is because a trust is not a company, not a corporate person, but a segregated fund owned by trustees, that different rules from those for companies

characteristic: A foundation holds property, but there is only one fund, not a fund separate from the foundation's own assets (as would be the case for a trustee). So it is not an IT/CGT settlement.

There are of course other significant differences between a Liechtenstein foundation and a trust, in particular the beneficiaries of a foundation have different and somewhat weaker rights. But the failure to meet what the Hague Convention on the law applicable to Trusts identifies as a defining characteristic is crucial.

A foundation is a body corporate.³⁹ It is therefore a company for UK tax purposes. A foundation is therefore subject to UK corporation tax on its income and gains if it is UK resident and subject to income tax on UK source income at the basic rate if non-resident. The test of residence is the company test of central management and control.

A foundation is usually a close company as:

- (1) The members of the board are directors.
 - (2) The members of the board are participators.
 - (3) The foundation is under the control of directors who are participators.
- However this depends on the constitution of the foundation.

A foundation is a settlement-arrangement⁴⁰ so it is a "settlement" for the purposes of s.87 TCGA; see too 48.2 ("Settlement" and "trustee").

As to whether a foundation is within s.13 TCGA, see 50.8 (Foundations).

79.6.3 *Foreign law views on foundations*

The Tax Court of Canada⁴¹ has held that an Austrian Privatstiftung is classified as a trust for the purposes of Canadian tax law:

[66] In summary, the essential ingredients of a trust under Canadian law

developed for trusts.")

39 See the quote from Biedermann set out above. The OECD commentary on the Model Treaty article 3(3) agrees: "... the term 'person' includes any entity that, although not incorporated, is treated as a body corporate for tax purposes. Thus, e.g. a foundation (*fondation*, *Stiftung*) may fall within the meaning of the term 'person'."

40 Assuming (as will generally be the case) that the bounty test is satisfied.

41 *Sommerer v The Queen* 2011 TCC 212, 13 ITLR 869 accessible www.canlii.org. The tax court is the court of first instance. It is a federal court and appeals lie to the Federal Court of Appeal, and thence to the Supreme Court of Canada. So its status is analogous to the English High Court. Its decisions are binding in all jurisdictions in Canada.

that I wish to address are:

- a) segregated property;
- b) owned by a person (trustee) having control of the property;
- c) for the benefit of persons (beneficiaries);
- d) to whom the trustee has a fiduciary duty enforceable by the beneficiaries.

If I find these essential features in the arrangement by which the [foundation] held the Vienna shares, then I will have no difficulty finding the three certainties were met to create the trust....

Ingredients (a) - (c) were found to be satisfied without much discussion. The argument focused on whether the trustee owed a fiduciary duty to the beneficiaries. The taxpayer argued that the Foundation owed no duties at all to the beneficiaries, but only a moral obligation. That was implausible, and the judge rejected it. The taxpayer then argued that the duty was not “fiduciary” but it was held to be “close enough to the Canadian fiduciary duty to find this final essential element for a trust exists in the [foundation] arrangement.”

[80] Finally, the Appellant relies on the wording of the Foundation document itself to suggest the income beneficiaries have no legal claim. The Foundation Declaration states: “Beneficiaries and those who may become beneficiaries based on the purpose of the Foundation have no legal claim to grants from the Foundation”. Firstly, I interpret this provision to be dealing with income beneficiaries only, not the ultimate beneficiaries. This simply makes clear the discretionary nature of income grants. They can only be to the Sommerer family, but no individual family member can come knocking on the [foundation]’s door asking to be paid a grant. This evidence is no more than that, and is not sufficient to strip away the character of a discretionary trust.

[81] On balance, I have not been convinced that there is no fiduciary duty enforceable by the Sommerer family. Certainly, the rights may not be as extensive as one might find in many common law trusts, but for purposes of trying to determine if an arrangement involving an Austrian Private Foundation has the elements of a common law trust, it is unnecessary to find every possible right of a beneficiary against a trustee, but more appropriately the question should be, are there sufficient rights that reasonably resemble those found in the Canadian trust? I conclude there are.

There are difficulties in relying on foreign tax case law in the UK, in

particular in relation to the international issues discussed in this chapter. It is not clear how closely the Canadian tax law is applying *Memec* principles set out at 79.1 (Introduction); UK tax cases are not cited. It is not clear how similar is an Austrian *privatstiftung* to foundations in other jurisdictions which are the focus of the discussion in this chapter. The decision is partly dependent on findings of fact relating to the law of Austria and the documentation of the particular foundation. For these reasons, the decision should not have even persuasive authority in the UK. Leaving aside issues of authority, the reasoning employed in the decision could of course be employed in arguing the case that a foundation is an IT/CGT settlement; but the presence of enforceable rights are necessary but not a sufficient condition for there to be a trust; the reasoning does not show that in UK law a foundation should be classified as a company rather than a trust: persons with an interest in a company also have enforceable rights.

International tax law would of course be simpler if all jurisdictions treated entities the same way. But then, it would be simpler if all jurisdictions had the same or similar tax systems, and that is not the case. English common law has been remarkable successful and is established in commonwealth countries and in the USA; but the UK tax system has not been similarly adopted. Those familiar with it will not find that so surprising.

In the USA, a Luxemburg *stiftung* is classified for tax purposes as a trust.⁴² However the USA has statutory rules on entity classification which are different from UK tax law, so the USA material has no relevance in the UK.

79.6.4 *Is a foundation an IHT-settlement?*

Foundation property is normally held “for persons in succession” or “held with power to make payments out of the income”. The question is whether a foundation is “governed by provisions equivalent in effect” to a trust. This raises a question of Liechtenstein law as to the effect of a foundation. Lorenz says:

42 IRS Memorandum AM2009-012 16 October 2009 (Entity Classification of Liechtenstein Anstalts and Stiftungs) www.irs.gov/pub/irs-utl/am2009012.pdf.

It now appears that the Liechtenstein Supreme Court has used Liechtenstein trust law as a basis for the development of a coherent pattern of principles applicable to all types of Liechtenstein asset planning devices, in particular foundations and establishments, and not just the trust ...

... the internal design of foundations will increasingly come to resemble that of trusts, and that disputes relating to foundations will increasingly be resolved by applying principles of trust law.⁴³

Biedermann says:

Operationally speaking, there is no difference between a family foundation and a family trust.⁴⁴

HMRC say:

In case of family foundations, business activity is not permitted. Accordingly, while a foundation has its own legal personality, its essence and purpose is to preserve and maintain assets for the beneficiaries, as is that of a trust.⁴⁵

On the basis of this evidence it is considered that a foundation is “equivalent in effect” to a trust and is therefore an IHT-settlement. (The contrary argument would focus on the word “equivalent”, and state that since there are undoubtedly some differences, the two are not equivalent. The expression “equivalent in effect” is looking at the broad substance rather than absolute equivalence but where to draw the line is hard to tell.)

It is sometimes argued that a foundation cannot be an IHT-settlement if beneficiaries of the foundation have no enforceable rights and no interest in foundation property. But beneficiaries of a charitable trust have no rights and no interests in the trust property, and a charitable trust is clearly

43 *Disputes involving Trusts*, edited by Ledim Vogt, published by C H Beck, 1999, p.213.

44 Biedermann, “Foundations vs Trusts” [1993] PCB 283. Nosedá makes a similar point: “The Foundations (Jersey) Law 2009: A Civilian Perspective” [2010] *The Jersey & Guernsey Law Review* 48 at [13].

45 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 www.hmrc.gov.uk/international/joint-declaration-lich.pdf.

an IHT-settlement. All that matters is that there is some legal mechanism which recognises their rights and prevents the board of a foundation treating the foundation property as their own.

79.6.5 *Is a foundation an interest in possession settlement for IHT purposes?*

Since a foundation is an IHT settlement, the question may arise whether a beneficiary's interest under the settlement is an interest in possession. (This question does not often matter for IHT for foundations made after 2006.)

This raises two issues: what exactly is the test for an "interest in possession", a question of UK law; and whether any particular interest meets those requirements (a matter of applying Liechtenstein law to the document in question).

It is arguable a beneficiary of a foundation cannot have an interest in possession. "Interest in possession" is a term of English trust law, a foundation is not a trust, so the beneficiary's interest cannot be an IP. This view is supported by s.46 IHTA which expressly extends the definition of IP to Scottish entities which confer rights somewhat less than those of a life tenant of an English law trust. However the better view is that where "settlement" is given an extended meaning, the meaning of related terms such as interest in possession should be given a comparable extended meaning. Thus a beneficiary has an IP if they have the right to the income of the foundation as it arises. It might follow from this view that s.46 IHTA is otiose, but that is not a very strong objection.

Whether that requirement is met depends on the drafting (construed in accordance with Liechtenstein law). At the borderline the distinction between IP and non-IP trusts is one of form rather than substance, and not appropriate to a foundation which is not even a trust, but merely equivalent in effect. In such cases one can only answer the question on the basis of "doing the best one can" and with the benefit of appropriate foreign law advice.

68.6.4 *Is a foundation transparent for IT purposes; nature of foundation distributions for IT*

The taxation of a UK resident beneficiary on a distribution from a foundation raises interesting and unexplored questions. It is suggested that one should apply trust law principles by analogy rather than company

law principles even though a foundation is a company and not an IT/CGT trust.

If that is right, the position depends on the drafting of the power which the foundation uses to make or authorise the distribution.⁴⁶ If the receipt is classified as income, it is classified as an annual payment, like a trust distribution. Where the terms of the foundation require distributions to a beneficiary, the distributions are income and the question is whether the foundation are classified as transparent under *Baker/Garland* principles

If the receipt is classified as capital the position is more straightforward as the usual s.731 and s.87 rules will apply.

79.6.6 HMRC view

HMRC say:

... foundations (“Stiftungen”) [are] to be characterised, recognised and treated as *trusts* for UK tax purposes.⁴⁷

TDSI guidance notes⁴⁸ para 2.3 provide:

Anstalts & Stiftungs [March 2010]

[1] Anstalts and Stiftungs are Liechtenstein business entities which are

46 See 24.8 (Payment from discretionary trust: income or capital?).

47 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 www.hmrc.gov.uk/international/joint-declaration-lich.pdf. This is subject to a disclaimer and qualification:

“The Government of the Principality of Liechtenstein has considered and agreed with HMRC the following written guidance and consistent approach on characterisation, recognition and treatment of legal entities and fiduciary relationships for purposes related to the MOU, provided that provisions under Liechtenstein and UK law remain the same as currently as related to such characterisation, recognition, and treatment.

For avoidance of doubt, nothing contained herein is to affect the ability of affected persons to rely on UK law or practice permitting alternative characterisation, recognition and treatment. The parties further recognise that the ultimate UK taxation consequences for UK taxpayers will depend on the particular facts as is the case where UK or other common law entities or fiduciary relationships, such as trusts, are involved.”

48 www.hmrc.gov.uk/tdsi/guidance-notes.pdf. For TDSI (tax deduction scheme for interest) see 19.13 (Withholding tax on interest from deposit-takers).

fiscally opaque. ...

[2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong to the settlor⁴⁹ and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.

[3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

Point [3] assumes that a foundation can be transparent for IT which contradicts point [1].

HMRC do not refer to any statutory provisions but are clearly saying that in their view foundations are trusts for all tax purposes. It is true that HMRC recognise that there may be special circumstances but in the absence of special circumstances, if it suits the foundation to take the view that the foundation is a trust for all tax purposes, including the IT/CGT definition, it could properly do so. That might be relevant, for instance, to obtain the benefit of ESC B18, or if a taxpayer wished to argue that a foundation was an interest in possession trust and transparent for income tax purposes.

79.7 Liechtenstein *Anstalt* (Establishment)

Liechtenstein Companies House explains the nature of an anstalt.⁵⁰

TDSI guidance notes⁵¹ para 2.3 provide:

Anstalts & Stiftungs

Anstalts ... are Liechtenstein business entities which are fiscally opaque. The current HMRC view is that Anstalts should all be dealt with as if they are companies. For TDSI, this means that Anstalts should receive gross interest.

Despite this statement, and classification in the official list as “opaque”,

49 [Author’s footnote] It is assumed that the foundation is a settlor-interested trust.

50 www.llv.li/pdf-llv-gboera-merkblatt_zur_neueintragung_einer_anstalt.pdf

51 Accessible www.hmrc.gov.uk/tdsi/guidance-notes.pdf. For TDSI (tax deduction scheme for interest) see 19.13 (Withholding tax on interest from deposit-takers).

HMRC practice has not always been consistent.⁵² The Liechtenstein disclosure facility takes a different approach:

- 1) An establishment (“Anstalt”) in Liechtenstein to be characterised, recognised, and treated for UK tax purposes as follows:
 - a) An establishment that according to its articles is permitted to undertake a business activity (“*nach kaufmännischer Art geführtes Gewerbe*”), and therefore is obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as a *company*.
 - b) An establishment that according to its articles is *not* permitted to undertake a business activity (“*nach kaufmännischer Art geführtes Gewerbe*”), and therefore is *not* obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as follows:
 - i) *An establishment with founder’s rights or shares* to be characterised, recognised and treated as a *company*.
 - ii) *An establishment with no founder’s rights or shares* to be characterised, recognised and treated as a *trust*.

For avoidance of doubt, in case of an establishment with founder’s rights as used above, the founder (settlor) with founder’s rights has full powers to decide upon who the beneficiaries are and to change the beneficiaries, and such powers are transferrable.⁵³

In the USA, a Luxemburg anstalt is classified as a company for tax purposes.⁵⁴ However the USA has statutory rules on entity classification which are different from UK tax law, so the USA material has no relevance in the UK.

79.8 Liechtenstein Treuunternehmen

The Liechtenstein disclosure facility records the HMRC view:

⁵² Private correspondence.

⁵³ Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters Signed on 11 August 2009 www.hmrc.gov.uk/international/joint-declaration-lich.pdf. This statement is subject to a disclaimer and qualifications set out at 79.6.6 (HMRC view).

⁵⁴ IRS Memorandum AM2009-012 16 October 2009 (Entity Classification of Liechtenstein Anstalts and Stiftungs) www.irs.gov/pub/irs-utl/am2009012.pdf.

2) A trust enterprise (“Treuunternehmen”) in Liechtenstein to be characterised, recognised, and treated for UK tax purposes in an analogous way as an establishment.⁵⁵

This is controversial.

79.9 Liechtenstein Treuhandenschaft

HMRC say:

Trusts (“Treuhandschaften”) ... [are] to be characterised, recognised and treated as *trusts* for UK tax purposes.⁵⁶

79.10 Other Liechtenstein entities

The Liechtenstein disclosure facility provides:

1) The European Union harmonised company forms, such as “Aktiengesellschaft” or “AG”; “Gesellschaft mit beschränkter Haftung” or “GmbH”; “Societas Europaea” or “SE”, to be characterised, recognised and treated as a *company* for UK tax purposes.

2) Entities formed as “Kommanditgesellschaft” or “KG” or “Kollektivgesellschaft” to be characterised, recognised and treated as a *partnership* for UK tax purposes.

79.11 Legal life interest (Northern Ireland)

Legal life interests (Northern Ireland) and proper liferents (Scotland) are rare in practice, but I discuss them here because (aside from the intrinsic interest of the questions which arise) that sheds some light on the treatment of civil law usufructs.

The CG Manual provides:

⁵⁵ See above footnote.

⁵⁶ Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 www.hmrc.gov.uk/international/joint-declaration-lich.pdf. This statement is subject to a disclaimer and qualifications set out at 79.6.6 (HMRC view).

31303 Northern Ireland [October 2007]

The land law of Northern Ireland, except where there is specific legislation to the contrary, is basically the same as the pre-1925 law of England & Wales. Accordingly it is possible to have a legal interest ‘limited for life’. Under Section 43(5) IHTA 1984 in such a situation the property is deemed to be settled property.

This is correct. Section 43(5) IHTA provides:

In the application of this Act to Northern Ireland this section shall have effect as if references to property held in trust for persons included references to property standing limited to persons...

The Manual continues:

There was no comparable provision for CGT until Section 63A TCGA 1992 was enacted in FA 2006 with effect from 6 April 2006. Under this provision where a person with a legal interest limited for life dies, a person who acquires in fee simple or fee tail in possession as a consequence of the former person’s death is deemed to acquire all the assets forming part of the property at market value at death. This does not apply to land in Ireland outside Northern Ireland.

Section 63A TCGA provides:

- (1) The provisions of this Act, so far as relating to the consequences of the death of a person to whom property in Northern Ireland stands limited for life (“the deceased”), shall have effect subject to the provisions of this section.
- (2) A person who acquires property in fee simple absolute or fee tail in possession as a consequence of the deceased’s death shall be deemed to have acquired all the assets forming part of the property at the date of the deceased’s death for a consideration equal to their market value at that date.

This confers a tax free uplift on death⁵⁷ but does not make the legal life interest into a settlement for IT/CGT purposes. Thus if the life tenant and

⁵⁷ This applies even if the life interest is not an estate IP: the drafter of the 2006 reforms overlooked Northern Ireland life interests.

the remainderman sell their interests:

- (1) the relief in s.76 TCGA does not apply.
- (2) the life tenant may qualify for CGT private residence relief but the remainderman will not qualify (unless they occupy the property as their main private residence, which would not be usual). The relief in s.225 TCGA will not apply.

In practice, if private residence relief applies, it is better to create a classic settlement and not a legal life interest because then the property can be sold during the lifetime of the life tenant free of CGT.

79.12 Proper liferent (Scotland)

The CG Manual helpfully explains the Scots law background:

31301 Scottish proper liferents [October 2007]

In Scotland the expression 'liferent' is used to describe the situation where the income from particular property is to be paid to a person, the liferenter, for a specified period, generally his or her lifetime. At the end of the period the property will generally pass to a person known as the *fiar*.

There are two ways in which a liferent can be set up. In the first case, where the interest is known as an improper liferent, the property is vested in trustees who administer the property and pay the income to the liferenter. In general the trustees have the power to sell the property in question and replace it by other property, whether land and buildings or other assets. On the death of the liferenter the provisions of s.72, s.73 and s.74 TCGA apply as appropriate. See CG36450+.

An improper liferent appears to be a classic settlement, and its tax treatment is straightforward. We are concerned with proper liferents. The Manual continues:

In the second case, the title to heritable property (land and/or buildings) is held by the liferenter. In this situation he or she is a proper liferenter. A proper liferenter cannot dispose of a greater title than his own. He cannot dispose of the property in his will. On his death the property passes to the *fiar*.

Where property in Scotland passes to a person for life under a will, and there is no suggestion that it is to be held by trustees, he has a proper liferent.

The Manual goes on to consider the CGT treatment:

A proper liferent does not make the relevant property settled property [for CGT]. Section 43(4)(c) IHTA 1984 provides that it is settled property for IHT purposes. TCGA does not go so far, but Section 63 provides that the person entitled to possession on the death of a proper liferenter shall be deemed to have acquired all the assets forming part of the property at their market value at death.

Section 63 TCGA provides:

- (1) The provisions of this Act, so far as relating to the consequences of the death of a proper liferenter of any property, shall have effect subject to the provisions of this section.
- (2) On the death of any such liferenter the person (if any) who, on the death of the liferenter, becomes entitled to possession of the property as *fiar*⁵⁸ shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date.

The Manual concludes:

The disposal or termination of a proper liferent may qualify for private residence relief under section 222 TCGA as it is an interest in land.

As in Northern Ireland, this confers a tax free uplift on death⁵⁹ but it does not make the proper liferent a settlement for CGT purposes. Thus if the liferenter and the remainderman sell their interests:

- (1) The relief in s.76 TCGA does not apply.
- (2) The liferenter may qualify for CGT private residence relief but the remainderman will not qualify (unless they occupy the property as their main private residence, which would not be usual). The relief in s.225 TCGA will not apply.

In practice, if CGT private residence relief applies, it is better to create a classic settlement and not a proper liferent, because then the property can be sold during the lifetime of the liferenter free of CGT.

⁵⁸ Some databases erroneously read "heir".

⁵⁹ This applies even if the liferent is not an estate IP: the drafter of the 2006 reforms overlooked Scottish liferents.

The IHT Manual provides:

16071 Introduction [February 2006]

The original view was that a proper liferenter was beneficially entitled to the property which was the subject of the liferent and that a proper liferent was a “settlement” within the meaning of [s.43 IHTA 1984] with the result that the liferenter fell to be treated as beneficially entitled to the settled property.

However the Board were advised that a proper liferenter was beneficially entitled only to his right to the liferent and not to the property itself so that on the death of a proper liferenter the liferenter was beneficially entitled to the liferent and not to the capital in which it subsisted. It follows that on the death of the liferenter the value to be placed on the proper liferent was nil.

16072. IHT position [February 2006]

Section 93 FA 1980 brought proper liferents into line with the settled property regime of the [IHTA] ... [The Manual then summarises the legislative provisions referred to below].

Section 43(4) IHTA provides:

In relation to Scotland “settlement” also includes...

- (c) any deed creating or reserving a proper liferent of any property whether heritable or moveable (the property from time to time subject to the proper liferent being treated as the property comprised in the settlement);

and for the purposes of this subsection “deed” includes any disposition, arrangement, contract, resolution, instrument or writing.

Sections 46, 47 IHTA provide:

46 Interest in possession: Scotland

In the application of this Act to Scotland,

[1] [a] any reference to an interest in possession in settled property is a reference to an interest of any kind under a settlement by virtue of which

[i] the person in right of that interest is entitled to the enjoyment of the property or

[ii] would be so entitled if the property were capable of enjoyment,

[b] including an interest of an assignee under an assignation of an

- interest of any kind (other than a reversionary interest) in property subject to a proper liferent;
 [2] and the person in right of such an interest at any time shall be deemed to be entitled to a corresponding interest in the whole or any part of the property comprised in the settlement.

47 Reversionary interest

In this Act “reversionary interest” means

- [a] a future interest under a settlement, whether it is vested or contingent (including an interest expectant on the termination of an interest in possession which, by virtue of section 50 below, is treated as subsisting in part of any property) and
- [b] in relation to Scotland includes an interest in the fee of property subject to a proper liferent.

Lastly, for completeness, s. 142(7) IHTA provides that for the purposes of s. 142 IHTA (deeds of variation):

In the application of subsection (4) above to Scotland, property which is subject to a proper liferent shall be deemed to be held in trust for the liferenter.

79.13 Usufructs

79.13.1 *The property law background*

A discussion of the law(s) of usufructs⁶⁰ is not possible here. In outline, Article 578 of the French Code Civil provides:

An usufruct is the right to enjoy property belonging to another, as if its owner, at the expense of preserving that property.⁶¹

The owner of the right is called “**the usufructuary**” and the owner of the property subject to the right is here called “**the encumbered owner**”. (I think this is a clearer term than “bare owner” which would be a more

60 I do not distinguish here between usufructs under different civil law jurisdictions, though it is possible that there are material differences; I would be grateful for the comments of any reader with expertise in these areas.

61 *L’usufruit est le droit de jouir des choses dont un autre a la propriété, comme le propriétaire lui-même, mais à la charge d’en conserver la substance.* The Code Civil is accessible in French on www.legifrance.gouv.fr.

literal translation of the French term *nu-propriétaire*.)

79.13.2 *Is a usufruct an IT/CGT settlement?*

The CG Manual provides:

31305 Other interests [October 2007]

... A usufruct governed by French law would be regarded as a non-trust arrangement as it is broadly similar to a Scottish proper liferent.

This is clearly right. Thus if the usufructuary and the encumbered owner sell their interests:

- (1) The relief in s.76 TCGA does not apply.
- (2) The usufructuary may qualify for CGT private residence relief but the encumbered owner will not qualify (unless they occupy the property, which would be unusual). The relief in s.225 TCGA will not apply.

There is no CGT uplift on the death of the usufructuary.⁶²

The result is a CGT discrimination against usufructs. If the usufruct is in an EU jurisdiction, this discrimination is very difficult to justify, and it is suggested that an uplift on death should be available under EU law principles, and, arguably, private residence relief on a sale during the lifetime of the usufructuary.

If an individual creates a usufruct under which they retain an interest, this is a part disposal for CGT purposes as s.70 TCGA (transfers into settlement) does not apply. Some foreign tax laws (eg France) have rules which quantify the relative values of the usufructuary and the encumbered owner, but those rules do not apply for UK tax purposes, so the usual market value rules must be applied.

62 A Scottish liferent qualifies for the CGT uplift on death, under s.63 TCGA, (and there is similar provision in s.63A for Northern Ireland.) However that provision will not apply to a usufruct unless the phrase “proper liferenter” is construed to include a usufructuary, which is a strained construction and inconsistent with the heading to the section (“Death: application of law in Scotland”).

It is not possible to avoid this problem by creating a classic settlement instead of a usufruct, because civil law systems do not usually recognise trusts; even if a trust is theoretically possible, it is probably not practical for tax reasons or because it raises too many uncertainties.

79.13.3 *Is a usufruct an IHT-settlement?*

Is a usufruct governed by provisions equivalent in effect to a classic life interest settlement, and so a settlement within the IHT definition? There is an element of succession, but there are major differences. A usufruct is more like a lease for life or a legal life interest than a classic settlement. Overall it is sufficiently unlike a settlement that it is suggested that the two should not be regarded as equivalent in effect, so it is not an IHT-settlement.⁶³ It has no settled property and no trustees.⁶⁴

If a usufruct is an IHT-settlement, there could be charges to IHT on the creation of the usufruct, on ten-year anniversaries⁶⁵ and on the death of the usufructuary, though the property will often qualify as excluded property (depending of course on the domicile of the settlor and, if a spouse, the domicile of the usufructuary). DTA relief will sometimes be available. Pre-owned assets would also need consideration.

On the other hand, if the usufruct is an IHT-settlement, the interest of the encumbered owner is a reversionary interest and so in principle excluded property, which is helpful to the taxpayer if the encumbered owner is UK domiciled. So depending on the circumstances it will sometimes be in the taxpayers' interest to argue the issue one way and sometimes the other; and the same applies for HMRC.

A common case is where an owner of property creates a usufruct under which they are the usufructuary and a child is the encumbered owner. If the usufruct is an IHT-settlement, and the owner is UK domiciled, then:

- (1) the owner makes a transfer of value equal to the value of the property⁶⁶ but
- (2) the gift is a PET so far as attributable to the child's reversionary interest.⁶⁷

That is so absurd as to make one question whether the analysis that a usufruct is an IHT-settlement can be correct.

63 This issue does not arise for proper liferents (Scotland) or legal life interests (Northern Ireland) since the last paragraph of the definition dealing with provisions "equivalent in effect" only applies to non-UK legal systems.

64 See too 48.2 ("Settlement" and "trustee").

65 Though a usufruct created on death will qualify as an IPDI.

66 See s. 3(1) IHTA; the value of the usufructuary's interest is disregarded as an interest in possession in settled property; s.5(1)(a)(ii) IHTA.

67 See s.3A(1)(c) and 3A(2)(a) IHTA. The encumbered owner's interest is excluded property but nevertheless forms part of their estate

In practice I expect that (if the issue is considered at all) a taxpayer takes whichever view suits them better and indeed in this toss-a-coin area, and in the absence of HMRC guidance, a taxpayer is entitled to do that. HMRC might adopt whichever view suits them better, or whichever view the taxpayer adopts or even perhaps whichever view leads to a fair result on the facts of the case. It appears that HMRC have on occasion accepted the view that a usufruct is an IHT-settlement⁶⁸ but one cannot infer guidance from specific instances.

79.14 Société civile and société en nom collectif

The former ITH provided:

304. Company and partnership distinguished

A company, therefore, acts for itself and not as agent or representative of its members. When profits arise they arise to the company and not to the shareholders. The shareholders have no right to them as profit. The rights of the shareholders include the right to a dividend when formally declared. In a partnership, on the other hand, each partner is the agent of the other partners. The profits arise to each partner according to the provisions of the partnership agreement. It is the existence of that agency relationship which distinguishes a partnership from a company. It is broadly true to say that a partnership does not have, as a company does, distinct legal persona but the presence of legal persona is not in itself conclusive. In Scotland a partnership is a distinct legal entity but there is, at the same time, an agency relationship between the firm and its members and between its members. That agency relationship is the hallmark of partnership and characterises the Scots partnership as a partnership rather than as a company. Considerations of this sort are important when dealing with some unfamiliar European company cum partnership creations. The French Société Civile is one such body and the Société en nom Collectif is another. Broadly speaking we regard the first as a company the second as a partnership. Both have legal personality but in the former case the profits arise to the body itself and in the latter case we take the view that the profits arise to the partners. There is more about how we decide which category is appropriate in chapter 16 (ITH1672–ITH1675). ...

68 McCutcheon on Inheritance Tax, 5th edition para 32.60.

1673. Establish facts

The first stage is one of factual enquiry and in relation to any appeal procedure is a matter for the Appeal Commissioners. It can be a difficult stage – even for trained Revenue lawyers. Experts have been known to differ and in a case about these bodies *Dreyfus v IRC* 14 TC 560 we think the Commissioners came to a wrong decision and we do not follow the Courts ruling. The case involved a French SNC and the Courts said it was a company, being guided by the Commissioners’ finding of fact about foreign law. We – after listening to expert advice – think it analogous to a partnership. This question of foreign law is difficult. Where the foreign law is a common law it will often share basic concepts with English law and that eases things a little. But if the foreign law is a civil law – a written code of law – the chances of a communications gap developing between a foreign expert adviser and an English lawyer seeking his advice are much greater.

There are no hard and fast rules governing this question of foreign law; every association has to be considered separately and in the light of its Articles of Association or equivalent code. We look for indicators as to whether the Association carries on the business itself or whether the participators do so jointly; and whether the profits accrue directly to the participators or whether they accrue to the Association which then distributes them to the participators. These conclusions should then help us decide whether the members of the Association are carrying on a trade, profession or vocation solely or in partnerships and, if so, whether the income is immediately derived by the member from the carrying on of that trade.

79.14.1 Société civile immobilière

The Employment Income Manual provides:

11371 Homes outside the United Kingdom owned through a company: General background [January 2009]

...Meaning of company

Company is defined in section 992 ITA 2007 as any body corporate or unincorporated association other than a partnership, a local authority or a local authority association. This wide definition is not restricted to companies registered in the UK and includes a number of entities formed under foreign law through which individuals may acquire homes outside the UK. Such entities will generally be classified as opaque for UK tax purposes. Examples include the ownership of a home in France through a “Societe Civile Immobiliere” (SCI) or in the United States through a

Limited Liability Company (LLC).

The view that a SCI is a company for UK tax purposes is controversial.⁶⁹ A société civile is classified as a partnership in the UK/France IHT DTA.⁷⁰ The introduction of benefit in kind foreign homes relief and the subsequent France/UK DTA have made the issue somewhat less important but it still matters.

The issue arose in *Joseph Carter v Baird* 72 TC 303 where a company sold land and purchased a SCI. The company claimed roll-over relief which only applied on a purchase of land. The company failed since it acquired an interest in the SCI and not land. Unfortunately the question of whether an SCI was transparent for CGT was not argued and the necessary expert evidence was not put to the general commissioners. (The litigant appeared in person and was not represented by counsel). The case therefore has no authority at all, and on another occasion there is nothing to stop a taxpayer putting forward the argument for transparency, properly supported by evidence.

79.15 Jersey general and limited partnerships

A Jersey general partnership is transparent.⁷¹

HMRC classify a Jersey limited partnership as transparent in the official list.

79.16 Foreign limited liability partnership

References to a LLP in UK legislation are references to UK incorporated LLP (unless the context otherwise requires.)⁷² It is considered that the statutory rules which (generally) make a UK LLP transparent for IT and CGT do not apply to a foreign LLP.

69 See Frimston and Urquhart, “La Vie en France” Taxation, 13 Jun 2002 (Vol 149, Issue 3861), p.296.

70 See 65.5.2 (Treaty situs rules: France and Italy). See too John Avery Jones “Characterisation of Other States’ Partnerships for Income Tax”, [2002] BTR at p.425.

71 *Padmore v IRC* 62 TC 352; see Jersey Law Commission “The Jersey Law of Partnership” (consultation paper, 2008) para 21.12 (“Viewed as a whole, in fact the law of partnership of [England and Jersey is] essentially the same...”).

72 See 38.7.1 (Definition of LLP).

HMRC agree. Business Income Manual provides:

72145 Limited Liability Partnership: International aspects [February 2006]

UK branches of overseas LLPs

The tax treatment of a UK branch of an overseas LLP, and the members of such a LLP, depends on how the foreign entity is regarded for the purposes of the UK taxation provisions. Where the foreign LLP is regarded as a ‘body corporate’ for the purposes of the UK Taxes Acts the profits of the UK branch will be chargeable to CT. On the other hand if it is regarded as a partnership then members are separately liable to tax on their share of the branch’s profits under the existing legislation for partnerships rather than under the LLP Act. The latter Act only applies to UK registered LLPs.

HMRC classify a Jersey LLP as opaque in the official list. This is controversial.⁷³ However the issue is at present academic because (partly as a result of the HMRC view and partly due to burdensome Jersey law requirements) no Jersey LLP has yet been registered.

This discrimination would however be in breach of EU law so LLPs in Member States may be treated as transparent.

79.17 Hindu undivided property

The CG Manual provides:

31305 Other interests [August 2007]

... a case involving Hindu Undivided Property would be regarded as a discretionary trust rather than an unincorporated association.

79.18 Japanese tokkin

HMRC regard a tokkin as transparent. The INTM provides:

73 Walker, “Limited Liability Partnerships: True Partnerships” [1998] JLR 1 argues that a Jersey limited liability partnership is a partnership in the ordinary sense of the word. In *R v IRC ex p. Bishopp* 72 TC 322 the Court was asked but refused to express a view on that.

On the transparency of partnerships generally, see 38.3 (Transparency of partnership for IT) and 38.6 (Transparency of partnership for CGT).

355160 Claims by Japanese “Tokkin” funds [February 2006]

‘Tokkin’ is an abbreviation of ‘tokutei kinsen’, and means ‘designated monetary trust’.

Cash or other assets for this type of fund are deposited by the investor(s) with a trustee who manages them on behalf of the investor(s), and in accordance with his/her/their instructions. The tokkin is set up and managed under the terms of a written agreement between the parties, drawn up under Law No 62 of 21/4/1922 of Japan.

Because the Dividends and Interest Articles of the convention provide for relief **only to the beneficial owner** (INTM332000) of the income, claims in respect of income paid to tokkin funds **must** be made by the beneficial owner of the tokkin (the ‘investor(s)’ above), and **cannot** validly be made by the tokkin’s manager.

So if you see a claim or supporting voucher which makes any reference to tokkin, you should ensure that you consider only claims made by the beneficial owner, that is, the **original investor**, in respect of his/her/their share in the tokkin.

There is no reason why a single investor should not own **all** the funds in a tokkin, but you should make certain that your claim has been made by the beneficial owner and not by the trustee, or an investment manager.

The original investors/beneficial owners may be either individuals or companies.

But it should be clear in either case that **no** relief can be due to the tokkin **itself**.

79.19 Korean Hapja Hoesa

The Australian Revenue have guidance on this subject:

Classification of a Korean Hapja Hoesa for Australian income tax purposes

Issue

Is the Korean Hapja Hoesa a company pursuant to the definition within section 995-1 of the Income Tax Assessment Act 1997 (ITAA 1997)?

Decision

Yes. The Korean Hapja Hoesa is a company within the meaning of section 995-1 of the ITAA 1997.

Facts

The Hapja Hoesa is a legal form of corporation, which may be established under the Korean Commercial Act (Commercial Act). The Hapja Hoesa is also a private equity fund which is regulated by the Korean Indirect Investment Asset Management Business Act (IIAMBA).

In essence, the Hapja Hoesa is an unlimited investment specialty vehicle that is

established for the purpose of investing the assets of the entity into the shares or equity of other entities - with the purpose of increasing the value of such entities through participation in the management of the entities or improving the business structure or control structure of the entities. The Hapja Hoesa may be used only for private equity investment purposes.

Currently under Korean legislation, a Hapja Hoesa has the following features:

- a Hapja Hoesa is incorporated, and is formed by registering its incorporation (Article 144-5(2) of the IIAMBA; Article 172 of the Commercial Act);
- a Hapja Hoesa has a legal personality that is separate from the members (Article 171(1) of the Commercial Act);
- a Hapja Hoesa does not have partners, it has members (Article 268 of the Commercial Act);
- a Hapja Hoesa has members with limited liability and members with unlimited liability (Article 144-3 of the IIAMBA; Article 268 of the Commercial Act);
- a Hapja Hoesa has articles of incorporation (Article 144-5 of the IIAMBA; Article 178 of the Commercial Act);
- a Hapja Hoesa exists for a specific term, which must be specified in the articles of incorporation, but after the term expires, the Hapja Hoesa may continue with consent of all or some members (Article 144-5(1) of the IIAMBA; Article 229 of the Commercial Act);
- a member's interest in a Hapja Hoesa is referred to as a share (Article 197 of the Commercial Act);
- in order to transfer their share in the Hapja Hoesa, a member needs the consent of other members (Article 197 of the Commercial Act);
- members can transact with the Hapja Hoesa (Articles 199 and 275 of the Commercial Act);
- subject to limitations for Limited Liability Members, members are jointly and severally liable if assets of the company are insufficient to satisfy its obligations (Articles 212 and 279(1) of the Commercial Act);
- distributions by the Hapja Hoesa are referred to as 'dividends' (Article 279(1) of the Commercial Act).

The articles of incorporation of this particular Hapja Hoesa include the following terms:

- a Limited Liability Member may not transfer any part of their interest in the Hapja Hoesa without the consent of all Unlimited Liability Members;
- an Unlimited Liability Member may not transfer any part of their interest without the consent of all members;
- a Limited Liability member may not withdraw from the Hapja Hoesa without transferring their interest, and the transfer of an interest requires the consent of all Unlimited Liability Members;
- a member does not have a right to a distribution of distributable cash. Instead, a resolution of members is required before any profits can be distributed;
- meetings of the Hapja Hoesa will be convened by the Manager or on request of members;
- a member has one vote per unit of their interest in the Hapja Hoesa;
- members may pass resolutions on dissolution of the Hapja Hoesa; extension or reduction in the term of the Hapja Hoesa; approval of distributions;
- business cannot be transacted at a meeting of the Hapja Hoesa unless a quorum is

present;

- the Hapja Hoesa will be dissolved on expiration of its term; with a resolution of the Members; on bankruptcy or insolvency; on an order of the court; or if the Korean Financial Supervisory Commission denies or cancels registration.

Reasons for Decision

'Company' is defined in section 995-1 of the ITAA 1997 as:

- (a) a body corporate; or
 - (b) any other unincorporated association or body of persons;
- but does not include a partnership or a non-entity joint venture.⁷⁴

As the term 'body corporate' is not defined in Australia's income tax legislation, the ordinary meaning of the term applies. The Butterworths Concise Australian Legal Dictionary Second edition defines a body corporate as 'an artificial legal entity having separate legal personality'.

Being an entity that was created by registration, and that has separate legal personality, the Hapja Hoesa is a 'body corporate'. Consequently, it will be a company under paragraph (a) of the definition of 'company' in section 995-1 of the ITAA 1997, providing that it is not also a partnership.

Section 995-1 of the ITAA 1997 defines 'partnership' as:

- (a) a body of persons (other than a company or limited partnership) carrying on business as partners or in receipt of ordinary income or statutory income jointly; or
- (b) a limited partnership.

The Hapja Hoesa has some features commonly associated with a partnership, and some features associated with a company.

The following features favour characterisation of this particular Hapja Hoesa as a company.

- a resolution of members is required before profits can be distributed. This indicates that profits belong to the Hapja Hoesa, and that the members are not in receipt of income jointly;
- distributions are referred to in the Commercial Act as 'dividends' rather than as a share of profits;
- the Hapja Hoesa was formed by registration of its incorporation, whereas a partnership is generally formed by a partnership agreement between the partners;
- the Hapja Hoesa has members rather than partners;
- the Hapja Hoesa has articles of incorporation, and not a partnership agreement;
- the Hapja Hoesa has a form of perpetual succession. It will not terminate on the withdrawal of a member, as is the case with a partnership. Instead, it will continue until the occurrence of one of the events specified in its articles of incorporation.

The features which favour characterisation of this Hapja Hoesa as a partnership include:

- to withdraw from the Hapja Hoesa a Limited Liability Member in effect needs the consent of all Unlimited Liability Members;
- members' interests are not freely transferable; in order to transfer their share in the Hapja Hoesa, a member needs the consent of other members.

The predominance of characteristics favours classification as a company rather than a partnership. Further, as the Hapja Hoesa does not have partners who carry on its business

74 The same applies in the UK; see 79.3 (Meaning of company).

or who receive income jointly, it is not a partnership for the purpose of the definition of 'partnership' or 'company' in section 995-1 of the ITAA 1997.

As the Hapja Hoesa is a body corporate and not a partnership, it follows that it is a company within the meaning of section 995-1 of the ITAA 1997.⁷⁵

It is considered that the same reasoning should apply in the UK.

79.20 Dutch bewind

Kortmann and Verhagen say:

The *bewind* cannot be characterised as a trust in the sense of Article 1 of the Principles. A trust in the sense of the Principles only exists in situations where the trustee legally owns the assets to be managed, which is not so in the case of *bewind*. In the case of *bewind* the beneficiary is legal owner of the assets to be managed. There are, however, restrictions on the beneficiary's right to dispose of the assets placed under *bewind*. Either the legal owner cannot dispose of these assets at all, or he can only do so subject to the *bewind*. The *bewindvoerder*, as the administrator is usually called, acts in the case of *bewind* only as agent for the owner of the assets (the beneficiary). Because the assets to be managed are not legally owned by the *bewindvoerder*, the assets remain unaffected by the bankruptcy of the *bewindvoerder*.⁷⁶

On this basis it is considered that a *bewind* is a bare trust.⁷⁷

79.21 Netherlands Fonds voor gemene rekening (closed funds for mutual account)

In 2010 the UK and the Netherlands reached the following agreement regarding the application of the UK/Netherlands DTA to investors in closed funds for mutual account *fonds voor gemene rekening* ("closed FGR"):

⁷⁵ ATO ID 2010/27 (28 January 2010) accessible <http://law.ato.gov.au>

⁷⁶ Hayton, Kortmann and Verhagen, *Principles of European Trust Law, Law of Business and Finance* Vol 1, (1999) p.199. Similarly Gretton "Trusts Without Equity" (2000)

49 Int'l & Comp. L.Q. 599: "Though it functions as a trust, the *bewind* is not a trust, for a simple reason: the location of legal title is the reverse of the trust."

⁷⁷ See 79.4 (Bare trusts/nomineeships).

This Agreement applies to closed FGRs formed in conformity with the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. A closed FGR can act as a pooled investment vehicle for the assets of pension funds and other investors. The closed FGR invests these assets on behalf of those investors.

The competent authorities of the Netherlands and the UK agree that a closed FGR⁷⁸ is fiscally transparent.

A closed FGR can also consist of several closed FGRs as described in par. 4 of the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. Such an umbrella fund is also fiscally transparent. Since a closed FGR is fiscally transparent, all income and gains derived by the fund from the fund assets are allocated to the investors in the closed FGR in proportion to their participation in the fund.

Request for application of the benefits of a Convention on behalf of the participants

A closed FGR which is established in the Netherlands and which receives income arising in the UK may itself, represented by its fund manager or its depository, in lieu of and instead of the investors in the closed FGR, claim the benefits of an agreement for the avoidance of double taxation to which the UK is a party and which is applicable to those investors on behalf of those investors in the closed FGR.

Such claims may be subject to enquiry and, where requested, a fund manager or depository shall provide relevant information which may include a schedule of investors and allocated income relevant to a claim. A closed FGR may not make a claim for benefits on behalf of any investor in the closed FGR if the investor has itself made a claim for benefits in respect of the same income. If a closed FGR intends to make a claim for benefits on behalf of an investor, the fund manager or its depository should clearly communicate this to the investor to avoid duplicate claims in respect of the same income.

This Agreement shall be subject to regular review.

79.22 Dutch Stichting

The Australian Revenue have guidance on this subject:

Issue

Does Australia have the right to tax Australian sourced business profits that a Dutch Stichting (Stichting) receives as a unitholder in an Irish Common Contractual Fund

78 [Footnote original] Various translations of 'Fonds voor Gemene Rekening' are possible, such as 'fund for mutual account' or 'fund for joint account'.

(CCF), under Article 7 of Schedule 10 of the International Tax Agreements Act 1953 (the Netherlands Agreement)?

Decision

No. Australia does not have the right to tax the Australian source business profits the Stichting receives as a unitholder in a CCF under Article 7 of the Netherlands Agreement.

Facts

The Stichting is a legal entity incorporated in the Netherlands.

The Stichting is a pension fund whose sole purpose is to provide superannuation benefits for non-resident persons upon retirement or death.

The Stichting is exempt from income tax in the Netherlands under the tax laws of the Netherlands.

The Stichting has received a declaration from the Netherlands Inspector of Tax Administration to the effect that it is a resident of Netherlands for tax treaty purposes.

The Stichting is not a resident of Australia for the purposes of Australian tax.

The Stichting does not carry on business through a permanent establishment in Australia.

The Stichting is the only unitholder in an Irish CCF.

Irish CCFs are regulated by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2003 (the Regulations). According to the Regulations a CCF is a contractual arrangement under which participants participate in the co-ownership of assets.

The CCF is not a resident of Ireland or Australia for the purposes of the tax treaty between Australia and Ireland.

The CCF receives Australian source business profits from investing the funds of the CCF.

The CCF does not carry on business through a permanent establishment in Australia.

The relationship between the manager and custodian of the CCF and the Stichting is considered a trust relationship for Australian tax purposes. The manager and custodian are the trustees, and the Stichting is the beneficiary.

Reasons for Decision

Article 7(1) of the Netherlands Agreement states:

The profits of **an enterprise of one of the States** shall be taxable only in that State unless the **enterprise** carries on business in the other State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State, but only so much of them as is attributable to that permanent establishment. **(emphasis added)**

An ‘enterprise of one of the States’ is defined in Article 3(1)(j) of the Netherlands Agreement, which states:

the terms “enterprise of one of the States” and “enterprise of the other State” mean an enterprise carried on by a **resident of Australia** or an enterprise carried on by a **resident of the Netherlands**, as the context requires; **(emphasis added)**

The concept of residency is defined in Article 4 of the Netherlands Agreement. In particular, Article 4(1) of the Netherlands Agreement states:

For the purposes of this Agreement, a **person** is a resident of one of the States-

- (a) in the case of Australia, subject to paragraph (2), if the person is a resident of Australia for the purposes of Australian tax; and
- (b) in the case of the Netherlands, if the person is a resident of the Netherlands for the purposes of Netherlands tax but not if he is liable to tax in the Netherlands in respect only of income from sources therein. **(emphasis added)**

Accordingly, for Article 7(1) of the Netherlands Agreement to apply to the Australian sourced business profits derived by the Stichting, the Stichting must be:

- a person
- a resident of the Netherlands, and
- an enterprise.

for the purposes of the Netherlands Agreement.

Is the Stichting a ‘person’ for the purposes of the Netherlands Agreement?

Article 3(1)(d) of the Netherlands Agreement defines the term ‘person’ to mean ‘an individual, a company and any other body of persons’. The term ‘company’ is defined in Article 3(1)(e) of the Netherlands Agreement to mean ‘any body corporate or any entity which is assimilated to a body corporate for tax purposes’. The term ‘body corporate’ is not defined for the purposes of the Netherlands Agreement, and in accordance with Article 3(3) of the Netherlands Agreement, the term takes its meaning from the tax laws of Australia unless the context otherwise requires.

As there is no definition of the term ‘body corporate’ under Australia’s domestic tax law provisions, the ordinary meaning of the term applies as per tax treaty interpretation principles contained in Taxation Ruling TR 2001/13 Income tax: Interpreting Australia’s Double Tax Agreements.

The Butterworths Concise Australian Legal Dictionary Second edition defines a body corporate as ‘an artificial legal entity having separate legal personality’.

According to Article 285 of Book 2 of the Netherlands Civil Law Code :

A Stichting is a legal personality created by a legal Act. It has no members and is created to achieve the objectives as defined in its Articles.

As the Stichting is created under Netherlands law and has a legal personality under Netherlands law, it should be recognised as a legal entity in Australia in accordance with the principle in *Chaff and Hay Acquisition Committee v. Hemphill* (1947) 74 CLR 375 (Chaff’s Case).

In Chaff’s Case, it was found by the High Court that a committee constituted in South Australia under the Chaff and Hay (Acquisition) Act 1944 (SA) was a legal entity despite not being incorporated under South Australian law. Chief Justice Latham found that as the committee was a legal entity in South Australia as distinct from the legal personalities of the natural persons who constitute it, then it is by comity recognised as a legal entity elsewhere. His Honour went on to state (at 384-5) that the same principle applied to the recognition of bodies created by foreign law which have the rights and liabilities distinct from those of the natural persons who constitute them. Justice Starke J further stated (at 388) that ‘recognition is given in the case of companies or artificial persons which have come into existence in countries whose law of incorporation is based on principles different from those of England and Australia’.

This principle is also recognised in the Foreign Corporations (Application of Laws) Act 1989. This Act applies in determining a question arising under Australian law where it is necessary to determine the question by reference to a system of law other than Australian law. Section 7(2) provides that any question relating to whether a body or person has been validly incorporated in a place outside Australia is to be determined by reference to the law applied by the people in that place.

As the Stichting is a legal entity created by legal authority in the Netherlands to achieve certain purposes, the Stichting has the features of a body corporate under the ordinary meaning of the term. As such, the Stichting is a ‘person’ for the purposes of the

Netherlands Agreement.

Is the Stichting a resident of the Netherlands for the purposes of the Netherlands Agreement?

Article 4(1)(b) of the Netherlands Agreement requires that the person must be a resident for the purposes of Netherlands tax but must not be liable to tax in the Netherlands in respect only of income from sources therein.

The Stichting here has received a declaration from the Netherlands Inspector of Tax Administration to the effect that it is a resident of Netherlands for tax treaty purposes. The Stichting therefore satisfies this requirement.

Is the Stichting an enterprise for the purposes of the Netherlands Agreement?

The High Court in *Thiel v. Federal Commissioner of Taxation* (1990) 171 CLR 338; (1990) 21 ATR 531; 90 ATC 4717 considered the meaning of the expression ‘the profits of an enterprise of one of the contracting states’ in the Business Profits Article of the tax treaty between Australia and Switzerland.

Chief Justice Mason and Justices Brennan and Gaudron stated:

this statement recognises that an activity, as well as a framework within which activities are engaged in, may constitute an “enterprise” for the purposes of the Agreement.

Moreover, we agree with Sheppard J. in thinking that an enterprise “may consist of an activity or activities and be comprised of one or more transactions provided they were entered into for business or commercial purposes”: (1988) 21 F.C.R. 122 at p. 146.”

In carrying out the activities of a pension fund, the Stichting is considered to constitute an enterprise as the activities it conducts are entered into for business or commercial purposes.

Conclusion

Accordingly all the necessary elements of Article 7(1) of the Netherlands Agreement are satisfied by the Stichting in order for the taxing rights of the Netherlands and Australia to be determined under Article 7(1) of the Netherlands Agreement.

The Stichting does not have a permanent establishment in Australia and Article 7(1) of the Netherlands Agreement provides a residence-only taxing right to the Netherlands over the business profits of the Stichting. Accordingly, Australia, as the country of source of the business profits, does not have a right to tax the business profits under the Netherlands Agreement.⁷⁹

The Netherlands agreement is in OECD model form, so the same should apply in the UK.

79.23 US S-Corps and LLCs

79.23.1 Transparency and treaty-residence

The DTR manual provides:

79 ATO ID 2008/62 (21 April 2008) accessible <http://law.ato.gov.au>

DT19853A United States of America: United States limited liability companies [September 2011]

Generally speaking, United States federal income tax is charged on the profits of LLCs on the basis that they are fiscally transparent, ie tax is imposed on the members of the LLC and not on the LLC itself.

However, for the purposes of UK tax we have taken the view in relation to those LLCs that we have so far considered that they should be regarded as taxable entities and not as fiscally transparent. Accordingly we tax a UK member of a LLC by reference to distributions of profits made by the LLC and not by reference to the income of the LLC as it arises.

However, in *Swift v HMRC*⁸⁰ a Delaware LLC was held to be transparent. HMRC say:

HMRC has appealed the decision and intends, for the time being, to continue with its current general practices in relation to US LLCs. If, however, any member of a US LLC feels that the UK treatment of a particular LLC should be reviewed in the light of the decision of the Tribunal, they should write to [HMRC contact] setting out fully why they believe that to be the case.⁸¹

Tax Bulletin 29 also contained a concession but the problem is now dealt with in the 2001 treaty, see 55.14 (US/UK DTA). Also see 79.27.3 (Ordinary share capital: Delaware LLC).

The Canadian Revenue Agency say:

US S-Corps and LLCs

The Department views U.S. S-Corps to be resident in the United States for the purposes of the Convention. This view is based on the fact that they are “liable to tax” under the Internal Revenue Code (IRC) unless they make an election to be treated as a partnership. Furthermore, notwithstanding the election, an S-Corp. would be taxed in the United States on its world-wide income if certain conditions are not met.

80 [2010] UKFTT 88. The Tribunal noted at [17] that its decision concerned only this particular Delaware LLC, and since there is wide freedom to contract the terms of a Delaware LLC, it may not be of general application. However I understand that the LLC did not in fact have any particularly unusual features.

81 “Swift v HMRC: UK tax treatment of a US LLC” 20 May 2010
www.hmrc.gov.uk/international/swift-v-hmrc.htm.

The Department recognizes that the above position is arguably inconsistent with its view that U.S. LLCs are not resident in the U.S. for the purposes of the Convention. [The Department continues to be of the view that a U.S. LLC that is treated under U.S. tax law as a partnership and which is therefore not liable to tax in the United States, is not a resident of the United States for the purposes of Article IV of the Convention.] Possibly if the Department had had the knowledge and experience it now has in the area of residency determination when it formed its opinion regarding the residence of U.S. S-Corps, it may have reached a different conclusion regarding the residence of U.S. S-Corps. In the context of the foreign affiliate legislation, a U.S. LLC which is treated as a partnership under the IRC and which is a foreign affiliate of a resident of Canada would qualify as resident in the United States (i.e., a designated treaty country) under paragraph 5907(11.2)(b) of the Income Tax Regulations provided that such LLC was resident only in the United States under the common law test of residency.⁸²

79.23.2 *Capital contribution: company law background*

Capital contributions are a common method for Delaware companies to raise additional capital. The CG Manual explains the company law background:

43500 General [October 2010]

The company law provisions of some foreign jurisdictions, notably the USA, provide for the making of capital contributions to companies. A capital contribution is a contribution to the equity capital of a company, but is not made in exchange for shares issued to the contributor and it does not constitute a separate asset in its own right. See INTM503050 where any equity function arguments are raised.

An overseas company receiving a capital contribution may treat it in a number of ways, depending on the law of the foreign jurisdiction concerned and the conditions attaching to the payment. These may give the company a choice whether to designate the contribution as ‘surplus’ or as ‘capital’. Amounts designated as ‘surplus’ may be available for distribution to shareholders, subject to solvency requirements. Amounts

82 www.cra-arc.gc.ca/E/pub/tp/itnews-16/itnews-16-e.html The Agency go on to comment on Barbados exempt insurance companies, but that is too specialist to be considered here.

designated as ‘capital’ may only be repayable by way of a capital reduction. A company’s balance sheet will generally show capital contributions made to it as an item of shareholders’ funds separate from paid up share capital. Capital contributions may be described, for example, as ‘additional paid in capital’.

Capital contributions are not recognised under UK company law and if a payment is not made as part of the terms of issue of shares, it is possible it is either a loan or a gift. If a UK taxpayer contends that a sum paid to an overseas company is a capital contribution rather than a loan or gift, evidence to support that contention should be sought.

For example if a UK company suggests a payment to an overseas affiliate is a capital contribution rather than a loan or gift there should be evidence of the appropriate treatment in the company accounts. If however there is a possibility that the money can be repaid, it is likely to be a debt within the loan relationships regime, see CTM51200. It is therefore necessary to examine all the circumstances surrounding the money transfer before coming to any conclusion as to what the nature of the payment is. If however agreement cannot be reached as to the nature of the payment and therefore the tax consequences (see CG43501 and CG43502 below), the decision lies with the Tribunals and the Courts.

Occasionally a capital contribution may be made to a UK company. As capital contributions are not a concept formally recognised within UK company law, a contribution received by a UK company should be reported within distributable reserves either as a gift or possibly a donation. If however it can be repaid in any circumstances it should be considered as a loan falling within the loan relationships regime.

The International Manual also makes some comments:

503050 Issues affecting equity function cases [April 2012]

... Capital contributions

As mentioned in INTM502010, company law provisions of some foreign jurisdictions, notably the USA, allow for the making of capital contributions to companies. A capital contribution is a contribution to the equity capital of a company. It is not a loan and creates no obligation to transfer economic benefit to the maker of the contribution.

In the UK there is no company law provision regarding capital contributions. If a UK company receives a capital contribution it will appear as such on the balance sheet within shareholders’ funds. If the company makes a capital contribution, it will normally be included in the accounts as an added cost of investment in a subsidiary.

If a UK company contends that a sum paid to an overseas affiliate is a

capital contribution rather than a loan, HM Revenue & Customs can only accept the contention if there is evidence supporting it. For example, there should be a written agreement that a capital contribution has been made rather than a loan, and evidence of the appropriate treatment in the company accounts. If there is a possibility that the money can be repaid, it is a 'money debt' under the loan relationships legislation. It is necessary to examine all the circumstances surrounding the money transfer before making a decision. From HMRC's point of view, the amount contributed should not be distributable.

In *Fenston v HMRC* [2007] STC (SCD) 316 the position was explained as follows:

... assuming that at all relevant times the assets of the Company exceeded its liabilities, ... as a result of the Contributions, the state of the Company's stock changed in the sense that the amount of funds distributable with respect to the Shares as a dividend or upon liquidation was increased by the amount of the Contributions.

Under Delaware law, the funds available for payment of dividends, if and when declared by a corporation's board of directors, are payable out of "surplus". 8 Del. C. § 170. "Surplus" is defined in relation to "capital". "Capital" with respect to no par stock, such as the Shares, is defined as that portion of the consideration received by a corporation for the issued shares of its capital stock that the directors determine to be capital, or if no such determination is made, the amount of consideration received. 8 Del. C. § 154. The excess, if any, at any given time, of the net assets of the corporation over the amount so determined to be capital shall be "surplus". 8 Del. C. § 154. "Net assets" means the amount by which total assets exceed total liabilities. 8 Del. C. § 154. Therefore, the "surplus" of a corporation is an amount equal to the total assets of the corporation, minus the total liabilities of the corporation, minus the capital of corporation, minus the total liabilities of the corporation, minus the capital of the corporation (as just described). Here, the Contributions increased the Company's net assets, and thus its surplus, thus increasing the amount of funds the Company could lawfully have distributed to the trustees (as stockholders) as a dividend.

With respect to entitlement to distributions on dissolution, when a corporation dissolves, its assets are held in trust for the benefit of creditors, and if creditors are paid in full, the stockholders. Accordingly, when a corporation dissolves it must first pay or provide for its creditors, both fixed and contingent, in full before any distribution can be made to stockholders. However, once creditors are paid or provided for, any

residual assets are to be distributed to the corporation's stockholders. 8 Del. C. § 281. As described above, the Contributions increased the Company's total assets. If the Company had been dissolved immediately after such Contributions had been made (which the trustees, as the sole stockholders, could have done pursuant to Section 275(c) of the General Corporation Law, 8 Del. C. § 275(c), then the amounts the trustees (as stockholders) would have been entitled to receive as stockholders upon dissolution with respect to the Shares would [have] been increased by the amount of the Contributions assuming, in each case, that amounts would remain for distribution to the stockholders following the payment in full of the Company's creditors.

Therefore, the Contributions would have increased the amounts that could have been distributed with respect to the Shares either as a dividend or as a liquidating distribution.'

79.23.3 *Capital contribution: tax analysis*

The CG Manual then turns to the tax analysis:

43501 Made under terms of share issue [February 2006]

A shareholder may make a capital contribution to a company at the same time as the shareholder acquires shares in the company. If the capital contribution is made as part of the terms of issue of the shares, then the capital contribution should be accepted as consideration given wholly and exclusively for the acquisition of the shares within TCGA 1992, Section 38(1)(a). If a capital contribution is made as part of the terms of a share issue which is treated as a reorganisation for capital gains purposes, then the capital contribution should be accepted as consideration given for the new holding for the purposes of TCGA 1992, Section 128(1). The amount of the capital gains deduction will remain subject to the other general rules, such as TCGA 1992, Section 17 and TCGA 1992, Section 128(2), see CG14530+ and CG51840+-

So far the law is fair. However the Manual continues:

43502. Other contributions not allowable [January 2008]

Where shares are disposed of in a company to which a capital contribution has been paid a claim may be made for a deduction in respect of that contribution in the capital gain computation. The claim will normally be for the contribution to be allowable as enhancement expenditure under Section 38(1)(b)TCGA 1992.

Although a capital contribution will typically affect the value of the

shares in the company to which the contribution is made, it does not represent either

[1] expenditure on the shares,⁸³ or

[2] expenditure reflected in the state or nature of the shares at the time of their disposal.

The Special Commissioners decision in the case of *The Trustees of the F. D. Fenston Will Trusts v HMRC* (SpC589/07) confirmed that a capital contribution which is not made as part of the terms for the issue of shares is not, in the absence of anything to indicate that the rights and privileges attaching to the shares have been enhanced, an allowable deduction within Section 38 TCGA 1992 when shares in the company are disposed of. In particular, the capital contribution does not represent enhancement expenditure within Section 38(1)(b)TCGA 1992.

In applying this decision it may be argued there are circumstances where the tax result will be distorted if the amount of tax payable takes account of value realised, directly or indirectly, by a shareholder from a capital contribution, but the capital contribution itself is not reflected in allowable expenditure for capital gains purposes. Below are some examples where such distortion may be alleged.⁸⁴

[1] A capital contribution is returned by a company to its shareholders as a dividend or distribution and they are taxed on the distribution but the shareholder will have had no deduction for the contribution. Our view is that a dividend or distribution is paid out of the surplus of the company so therefore is not a direct return of the capital contribution paid by the shareholder (in which case it is probably a loan). The nature of the receipt is changed when a dividend or distribution is made in comparison with the time when the capital contribution was paid.

[2] A capital contribution is retained by the company at a time when there is a sale of shares in the company. The contribution may be reflected in an increased consideration for the disposal of the shares but a capital gains deduction will not be given.

[3] There is similar scope for distortions where a capital contribution is followed by a share exchange, reconstruction or amalgamation treated as a share reorganisation for capital gains purposes, see CG52500+. This is then followed by a disposal of the new holding for an amount which reflects the capital contribution made to the company in which

83 Author's footnote: Point [1] is wrong and directly contradicted by the decision in *Fenston* but it would be sufficient if HMRC are right on point [2].

84 Author's footnote: "Distortion" is a euphemism for unfairness, and "alleged" is tendentious since the unfairness of [2] and [3] is obvious and undeniable.

the original shares were held, and the capital contribution is not allowable expenditure on the original shares.

In these last two cases, unless the capital contribution resulted in a change in the rights and privileges attaching to the shares, and that change is reflected in the nature of the shares at the time of their disposal, it is not an allowable deduction within Section 38(1)(b) TCGA 1992 when those shares in the company, or replacement shares in that or a different company acquired by virtue of a share reorganisation are disposed of.

Section 38(1)(b) TCGA allows a deduction for:

the amount of any expenditure wholly and exclusively incurred on the asset by him or on his behalf for the purpose of enhancing the value of the asset, being expenditure reflected in the state or nature of the asset at the time of the disposal ...

In *Fenston*, the Special Commissioners correctly held that the capital contribution was expenditure “on the asset for the purpose of enhancing the value of the asset.” Unfortunately they held that the expenditure was not reflected in the state or nature of the asset at the time of the disposal:

23 ... [1] Further, ‘state and nature’ for these purposes must be something other than merely the value of the asset—otherwise this phrase would add nothing to the immediately preceding words.

[2] In this case the capital contributions did not result in any increase in the number of shares in issue, or result in any change in the rights or restrictions attaching to the shares. The only effect of the capital contributions was to increase the surplus of the company—which would increase the amount available for distribution to shareholders, and therefore presumably the value of the shares. We do not consider this sufficient for the expenditure on the capital contributions to be reflected in the state and nature of the shares, either at the time the expenditure was incurred or at any time subsequently.

Point [1] is wrong⁸⁵ and point [2] is not in the least convincing. It is

85 The words “reflected in the state or nature of the asset” are needed to cover this situation: suppose T spends £x on a kitchen in T’s home. 15 years later the kitchen is replaced by a new kitchen. The £x was “incurred on the asset for the purpose of enhancing the value of the asset” but was not “reflected in the state or nature of the asset” at the time of disposal. In this case it is sensible to disallow the capital

considered that the decision ought not to be followed, though a taxpayer who challenges it risks litigating to the Court of Appeal.

The CG manual discusses the possibility of relief under the last part of s.38(1)(b) TCGA which allows a deduction for “expenditure wholly and exclusively incurred by them in establishing, preserving or defending his title to, or to a right over, the asset.”

There may also be cases where companies call on their shareholders to provide further capital to meet a specified purpose, in circumstances where a shareholder who fails to provide the additional funds may lose the entitlement to the shares held. In this situation, depending on the particular facts, the shareholder may be able to establish that the additional payment represents expenditure on preserving or defending the title to the shares within the terms of Section 38(1)(b)TCGA 1992.

79.23.4 *Planning implications*

The tax planning advice is that companies should if possible be funded by subscriptions for shares or loans, and not by capital contributions, because the expense of the capital contributions will in most cases be disallowed for CGT purposes (or else the taxpayer will have to litigate to a high level to obtain them).

The HMRC view that “If there is a possibility that the money can be repaid, it is likely to be a debt” mitigates some of the unfairness of the treatment of capital contributions by reducing the number of occasions where a transaction is categorised as a capital contribution.

79.23.5 *Commentary: fairness and the tax system*

Fenston raises an interesting question of policy, leaving aside the narrower legal question of whether it was rightly decided by the Tribunal. Assuming this was an issue where two views of a legal provision were possible, it was a case where one view lead to a fair and sensible result - tax on an economic gain. The other view lead to a patently unfair result. There can be no doubt about that.

- (1) Adopting the traditional view summarised in the slogan that “there is no equity in a taxing statute” a tax administration would be expected

to take any point. The only criterion is the prospect of success in a court:

The Inland Revenue is not slow - *and quite rightly* - to take every advantage which is open to it under the taxing statutes for the purpose of depleting the taxpayer's pocket. And the taxpayer is, in like manner, entitled to be astute to prevent, so far as he honestly can, the depletion of his means by the Revenue.⁸⁶

- (2) The more modern view pays much more regard to fairness and “the right amount of tax.” On this view the appeal should not have been taken, and the decision to take the appeal is greatly to be regretted. One might perhaps adopt the view that fairness applies in favour of HMRC but not the taxpayer; but no-one has had the temerity to advocate that.

Of course the consequence of unfair taxation may be to some extent to increase the tax yield, but unfair tax law has an intangible cost in that it brings the UK tax system into disrepute. There seems no prospect of legislative reform, indeed such reform would difficult to draft. This is another reason for hoping that an appeal will eventually overturn *Fenston*: that would restore credibility to the UK tax system. But there it is.

79.24 USA limited partnership

The Australian Revenue have guidance on this subject:

US Limited Partnership: whether it is a company for the purposes of Article 10 of the US Convention

Issue

Is a United States (US) limited partnership (US LP), which is treated as a partnership for US federal tax purposes, a company for the purposes of Article 10 of the Convention between Australia and the US contained in Schedules 2 and 2A to the International Tax Agreements Act 1953 (the US Convention)?

Decision

No. A US LP which is treated as a partnership for US federal tax purposes is not a

⁸⁶ *Ayrshire Pullman Motor Services v IRC* 14 TC 794. (The passage is well known for the rhetoric that immediately preceded this: “No man in this country is under the smallest obligation, moral or other, so to arrange his legal relations to his business or to his property as to enable the Inland Revenue to put the largest possible shovel into his stores.”)

company for the purposes of Article 10 of the US Convention.

For the purpose of the US Convention, US LP is neither a ‘body corporate’ nor ‘an entity which is treated as a company or body corporate for tax purposes’. Consequently it is not a company for the purposes of Article 10 of the US Convention, and does not qualify for either of the reduced rates for certain cross-border inter-corporate dividends flowing between Australia and the US.

Facts

US LP is a limited partnership established under US (Delaware) state law (the Delaware Revised Uniform Limited Partnership Act (DRULPA)).

A limited partnership under the DRULPA is formed upon the execution and filing of a certificate of limited partnership under section 17-201 of the DRULPA.

As a limited partnership formed under the DRULPA, US LP is an unincorporated hybrid business entity having features commonly associated with both a business carried on by partners as partners and with a company.

The DRULPA does not incorporate a limited partnership, nor does it provide that a limited partnership is a body corporate.

US LP is a separate legal entity, and exists as such until cancellation of the certificate of limited partnership under paragraph 17-201(b) of the DRULPA. Section 15-201 of the DRULPA also provides that US LP has separate legal personality distinct from its partners.

US LP is ‘for all purposes a partnership’, per section 15-202 of the DRULPA.

US LP is treated as a partnership (and so is fiscally transparent) for US federal tax purposes and not as a taxable unit.

All income derived by US LP is subject to US tax in the hands of its US resident partners. All partners are US resident corporations.

US LP is a ‘person’ under Article 3(1)(a) of the US Convention.

US LP is a ‘resident’ of the US for tax treaty purposes within the meaning of Article 4(1)(b)(iii) of the US Convention, because Article 4(1)(b)(iii) treats a US partnership as a US resident for tax treaty purposes to the extent that the income it receives is subject to US income tax either in its hands or in the hands of a partner.

US LP is not treated as a company by the US for tax treaty purposes because it is treated as a partnership for US federal tax purposes.

US LP owns all the shares in an Australian resident company. During the income year the Australian resident company paid an unfranked dividend (not assessable income and not exempt income) to US LP, which was legally and beneficially entitled to that dividend.

US LP would be taxed as a company under Australian domestic law (Division 5A of the Income Tax Assessment Act 1936, ITAA 1936) if it derived Australian source assessable income. US LP is not a resident of Australia under section 94T of Division 5A of the ITAA 1936.

US LP is not a ‘foreign hybrid limited partnership’ under section 830-10 of the Income Tax Assessment Act 1997 (ITAA 1997) as it is not a CFC (per paragraph 830-10(1)(e)) of the ITAA 1997.

Reasons for Decision

To qualify for benefits under the US Convention the claimant must first be a ‘person’ and a ‘resident’ for the purposes of the US Convention. In this case US LP, being a US domestic partnership, is both a ‘person’ and a US ‘resident’ according to the terms of the US Convention. Note that the US Convention is unusual in that it applies treaty benefits

for income derived through fiscally transparent entities such as a partnership, at the level of the entity (in this instance US LP).

Article 10 of the US Convention provides that certain cross-border inter-corporate dividends flowing between Australia and the US are either:

- subject to a maximum of 5% rate of source country tax if the person beneficially entitled to those dividends is a company which holds directly at least 10 per cent of the voting power in the company paying the dividends (Article 10(2)(a) of the US Convention); or
- exempt from source country tax where the person beneficially entitled to the dividends is a company that has owned shares representing 80 per cent or more of the voting power of the company paying the dividends for a 12 month period ending on the date the dividend is declared, and satisfies certain other conditions (Article 10(3) of the US Convention).

The words of the US Convention are quite specific. For the reduced dividend withholding tax rates under Article 10(2)(a) or Article 10(3) of the US Convention to apply to an unfranked dividend paid by an Australian resident company, the person beneficially entitled to the dividend must be a 'company'. Here, the 'person' beneficially entitled to the dividends paid by the Australian resident company is US LP.

Article 3(1)(b) of the US Convention defines 'company' for the purposes of the Convention 'unless the context otherwise requires', to mean 'any body corporate or any entity which is treated as a company or body corporate for tax purposes'.

Accordingly, for the purposes of our analysis, US LP will be a 'company' for the purposes of the US Convention if:

- (a) it is a body corporate; or
- (b) it is an entity that is treated as a company or body corporate for tax purposes - unless the context of the US Convention otherwise requires.

(a) Is US LP a 'company' for the purpose of the US Convention by virtue of being a 'body corporate'?

US LP is not a 'company' for the purpose of the US Convention by virtue of being a 'body corporate' for Australian purposes.

The term 'body corporate' is not defined in the US Convention. Thus, in accordance with Article 3(2) of the US Convention, the term will generally take its meaning from the taxation laws of the country applying the tax treaty (being in this case Australia), 'unless the context otherwise requires'. As 'body corporate' is not defined in Australia's domestic income tax law legislation, the ordinary meaning of the term in Australia may then apply (see the tax treaty interpretation principles set out in paragraphs 63 to 71 of Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements).

The *Butterworths Australian Legal Dictionary*, 1997 defines a 'body corporate' as 'an artificial legal entity having separate legal personality'. The *Macquarie Dictionary*, Fourth edition, 2005 defines 'body corporate' in its legal context, as 'a person, association or group of persons legally incorporated in a corporation'. Generally a 'body corporate' is established under an Act of Parliament or under a statutory procedure of registration, such as the Corporations Act 2001 (refer to paragraphs 22-23 of Taxation Ruling IT 2634 and paragraphs 30-34 of Miscellaneous Taxation Ruling MT 2006/1).

As US LP is created under Delaware state law and has a legal personality under that law, it should be recognised as a legal entity in Australia in accordance with the principle in *Chaff and Hay Acquisition Committee v. Hemphill* (1947) 74 CLR 375.

While US LP is a legal entity having legal personality, it is essentially quite different in

character from the bodies which are incorporated under corporations law in Australia. For example, while a corporation continues in existence until it is dissolved notwithstanding changes in its membership or business, a limited partnership formed under the DRULPA is usually formed for a limited period of time and terminates in the same way as a partnership. A corporation in Australia has perpetual succession, a personality that is continuous and free transferability of interests. US LP does not. Further, the partners of US LP derive the profits made by US LP, and a partner's individual share of the profits in US LP is ascertained in accordance with its interest in US LP, rather than on the basis of distributions made.

Notwithstanding, as US LP is an artificial legal entity having a form of separate legal personality, it is *prima facie* a 'body corporate' under the ordinary meaning of the term in Australia. Although, generally a 'body corporate' has the 'ability to continue in existence indefinitely and to keep its identity regardless of changes to its membership' (see paragraph 30 of MT 2006/1) and US LP does not enjoy such a continued existence. But, as highlighted above, the requirement in Article 3(2) of the US Convention to in this case interpret an undefined term such as 'body corporate' in accordance with Australian taxation law, applies only if the 'context' does not require an alternative interpretation, see paragraphs 72 to 76 of TR 2001/13. Thus, it is essential to derive the meaning of the term 'body corporate' from the 'context' in the relevant tax treaty - including the function of the Article in question. Taxation Ruling TR 2001/12 notes at paragraph 45 that 'the accepted international rules for treaty interpretation focus particularly on the context of a text finalised between negotiating countries'. The meaning of a term must be an accurate representation of the 'bargain' or 'consensus ad idem' which objective evidence shows has been reached by the negotiating countries (see paragraph 74 of TR 2001/13).

Paragraph 75 of TR 2001/13 notes that treaty 'context' should be taken in its broadest sense, and that includes the full range of materials open to consideration under Articles 31 and 32 of the Vienna Convention on the Law of Treaties. In *Thiel v. Federal Commissioner of Taxation* (1990) 171 CLR 338; 90 ATC 4717 (at CLR 344, ATC 4720); the judges agreed that the OECD Model Taxation Convention's OECD Model Convention and the associated commentaries are relevant to the interpretation of tax treaties based on the OECD Model, see paragraph 102 of TR 2001/13. Paragraph 104 of TR 2001/13 accordingly provides that the OECD Model Tax Convention and Commentary will often need to be considered in interpreting tax treaties.

Paragraph 12 of the OECD Commentary on Article 3 emphasises that the interpretation set out in the 'undefined terms' provision applies 'only if the context does not require an alternative interpretation'. It adds that the 'context' is determined in particular by the intention of the Contracting States, as well as 'the meaning given to the term in question in the legislation of the other Contracting State (an implicit reference to the principle of reciprocity on which the Convention is based)'. However, US federal tax law does not specifically define the term 'body corporate'.

In this case, the OECD Commentary on the definition of 'company' is particularly relevant to the context of the term 'body corporate'. Paragraph 3 of the OECD Commentary on Article 3 provides the following:

3. The term "company" means in the first place any body corporate. In addition, the term covers **any other taxable unit** that is treated as a **body corporate according to the tax laws** of the Contracting State in which it is **organised**. The definition is **drafted with special regard to the Article on dividends**. The term "company" has a bearing only on

that Article, paragraph 7 of Article 5, and Article 16. [Emphasis added]

It follows from the OECD Commentary's statement that the second limb of the term covers any other taxable unit, that the first limb of the definition of 'company' is designed to deal only with entities which are bodies corporate under general law and also taxable units under tax law (which is a central consideration in applying the terms of Australia's tax treaties).

While the requirement for the entity to also be a 'body corporate' for tax law purposes under the first limb is not explicit, treaties should be interpreted more 'liberally' than domestic legislation to smooth over the gaps, imprecision and ambiguities in the treaty text in a way that addresses the context and meets the object and purpose of the treaty, (see *Fothergill v. Monarch Airlines Ltd*, [1981] A.C. 251; per Lord Diplock; *Thiel v. Federal Commissioner of Taxation* (1990) 171 CLR 338; (1990) 90 ATC 4717; (1990) 21 ATR 531 per Dawson J; *Commissioner of Taxation v. Lamesa Holdings BV*, (1997) 77 FCR 597; (1997) 97 ATC 4752; (1997) 36 ATR 589 per Burchett, Hill and Emmett JJ, Courts Plc [2005] BVC 2003 and paragraphs 90-94 of TR 2001/13). Where the context of a term allows a specific tax law meaning and a non-tax law meaning, the former should prevail (see paragraph 68 of TR 2001/13).

In addition, it is clear from the OECD Commentary on Article 3 that the question of whether a dividend recipient is an entity 'treated as a body corporate' for tax purposes must be made by reference to 'the tax laws of the Contracting State in which it is organised' - and not the state of source. Thus, paragraph 3 of the OECD Commentary on Article 3 provides with regard to the terms 'company' and 'body corporate' that the relevant taxation laws to consider are those of the country in which the entity was created (i.e. being the domestic laws that apply to the entity). The 'context' requires an examination of US taxation law and not Australian taxation law to determine whether a US entity is a 'company' for the purpose of qualifying for the reduced rate of withholding tax on inter-corporate dividends.

Hence, in determining whether an entity is treated as a 'body corporate' for tax treaty purposes, reference is not made to the tax law of the country applying the treaty (in this case Australia), unless the entity was organised there. Specifically, as indicated above, the 'context' surrounding the terms 'company' and 'body corporate' in the US Convention, for the purpose of US LP qualifying for the either of the reduced rates of withholding tax on the unfranked dividends paid by the Australian resident company, requires an examination of US taxation law.

Accordingly, to determine whether US LP is a 'body corporate' under the US Convention, the relevant consideration is where US LP was organised. US LP was not organised in Australia, but in the US. Hence, the potential Australian tax treatment of US LP (that is, that the entity can be treated as a company for Australian tax purposes by virtue of Division 5A of the ITAA 1936) is irrelevant. Rather, only the US tax treatment of US LP is relevant.

US LP is not a taxable unit and so is not treated and taxed as a 'body corporate' for US federal tax purposes - but is treated and taxed as a partnership.

Finally and importantly, paragraph 3 of the OECD Commentary on Article 3 emphasises that the definition of 'company' is '**drafted with special regard to the Article on dividends**' and 'the term "company" has a bearing only on that Article, paragraph 7 of Article 5, and Article 16.'

Paragraphs 10-11 of the OECD Commentary on Article 10 explains the rationale behind

reduced taxation rates for inter-corporate dividends as follows:

10. On the other hand, a lower rate (5 per cent) is expressly provided in respect of dividends paid by a subsidiary company to its parent company. If a **company** of one of the States owns directly a holding of at least 25 per cent in a company of the other State, it is reasonable that **payments of profits by the subsidiary to the foreign parent company** should be taxed less heavily to avoid recurrent taxation and to facilitate international investment. The realisation of this intention depends on the **fiscal treatment of the dividends** in the State of which the **parent company is a resident**....

11. If a partnership is **treated as a body corporate under the domestic laws** applying to it, the two Contracting States may agree to modify sub-paragraph (a) of paragraph 2 in a way to give the benefits of the reduced rate provided for parent companies also to such partnership. (Emphasis added)

Paragraph 2 of Article 10 of the OECD Model Tax Convention is not materially different from paragraph 2 of Article 10 in the US Convention, with the exception of the differences in the percentage holding thresholds in the respective treaties.

Klaus Vogel on Double Tax Conventions, Vogel, K et al 1997, 3rd edition, Kluwer Law, The Hague, makes the following statements (at pages 583-584 and 599) about paragraph 2 of Article 10 of the OECD Model Tax Convention:

Art. 10 is still completely geared to the 'classical' system of company taxation... and is, consequently, based on the conception that it is appropriate to subject income derived by a company (within the meaning of Art. 3(1)(b)MC) to a tax of its own distinct and separate from the tax imposed on the distributions received by a company's shareholders ... the maximum rates on inter-company dividends should differ from those on 'all other' dividends.... Such preferential treatment, however, applies only where direct investments are held by companies and does not apply where a substantial interest is held by an individual or a partnership....

If, under the law of its State of residence, a partnership is considered a body corporate, but is ... not itself subjected to tax ... there would be no justification for allowing it to benefit from the limited rate of 5 per cent, because its interposition actually does not result in any double taxation.

It is apparent, from all of the above, that the intention of Article 10(2) of the OECD Model Tax Convention is to provide reduced rates of withholding tax for dividends derived by companies from direct investments on a reciprocal basis. It would be contrary to the intention of Article 10(2) if the reduced inter-corporate dividend withholding tax rate was to apply where the tax law of the resident country treated the beneficial owner of the dividends as a partnership.

Specifically, in the case of US LP, it would be inappropriate for a partnership formed under US state law and treated as a partnership for US tax purposes, to be able to access the inter-corporate rate of withholding tax for dividends under either Article 10(2) or Article 10(3) of the US Convention. The purpose behind Article 10(2) and 10(3) is to prevent multiple layers of taxation of corporate economic groups. Where the recipient does not have tax imposed (that is, because it is treated as a partnership in its state of residence), the rationale for granting the reduction in (or exemption from) withholding tax disappears.

The context of Article 10 and the OECD Commentary requires the implicit inclusion in the first limb of the definition of 'company', that a 'body corporate' is a taxable unit under the relevant taxation laws. Further, the relevant taxation laws are clearly the domestic laws

affecting the entity - that is, those laws under which the entity is organised or created. US LP is not a taxable unit and not a 'body corporate' for US tax purposes. Therefore, US LP does not satisfy the first limb of the meaning of the term 'company' in Article 3(1)(b) of the US Convention. It follows that US LP will not be a 'company' for the purposes of Article 10 of the US Convention by virtue of being a 'body corporate' for Australian purposes.

(b) Is US LP a 'company' for the purpose of the US Convention under the second limb of the meaning of the term 'company' - that is to say, is US LP an entity that is treated as a 'company' or 'body corporate' for tax purposes?

The OECD Commentary on the definition of 'company' (outlined above) makes it clear that, under the second limb of the definition, the determination is to be made by reference to the laws of the State in which the entity is **organised** (in this case US federal tax law). US LP is not taxed as a 'company' or 'body corporate' for US federal tax purposes. Rather it is treated and taxed as a partnership. This is essentially because, although US LP has a form of separate legal personality under Delaware state law, the US federal tax position is that while state law attributes of an entity control various aspects of business relations, they are not controlling under US tax law (unless the tax law so provides) - see *Morrissey v. Commissioner of Internal Revenue*, 296 U.S. 344 (1935); *United States v. R Kintner*, 216 F.2d 418 (9th Cir. 1954); *McNamee v. Dept of the Treasury*, 2007 U.S. App. LEXIS 12016, 488 F.3d 100, (2nd Cir. 2007).

In general, under the US 'check-the-box' (CTB) Treasury Regulations, any separate business entity other than an incorporated entity may choose its classification for tax purposes. Specifically, US CTB Treasury Regulations §301.7701-2(b)(1) and §301.7701-3(a) do not allow an entity organized under a Federal or State statute, that refers to the organization as 'incorporated', 'corporation', 'body corporate', or 'body politic', to elect its classification. Instead, such an entity is taxed as a corporation; see Checking in on "Check-the-Box", *Loyola of Los Angeles Law Review* [Vol. 42:451], by Heather M. Field.

The DRULPA does not refer to a limited partnership created under its provisions as 'incorporated', a 'corporation', 'body corporate' or 'body politic' and US LP is not mandatorily taxed as a corporation. Rather, US LP is taxed as a partnership unless it elects to be taxed as a corporation. As no such election was made by US LP, it is not a taxable unit and is not taxed as a corporation under the tax laws of the US.

Hence, US LP is not an 'entity that is treated as a company or body corporate for tax purposes' and so does not satisfy the second limb of the meaning of the term 'company' for the purposes of the US Convention.

Conclusion

For the purpose of the US Convention, US LP is neither a 'body corporate' nor an 'entity that is treated as a company or body corporate for tax purposes'. Consequently it is not a 'company' for the purpose of Article 10 of the US Convention, and does not qualify for either of the reduced rates for certain cross-border inter-corporate dividends flowing between Australia and the US.

This is consistent with the US position for tax treaty purposes which is that a US partnership which does not elect to be taxed as a corporation will not be a 'company' for US treaty purposes. The Issues in International Taxation No. 6 'The Application of the OECD Model Tax Convention to Partnerships' report includes the US response to the OECD Partnership Report at page 127. This response states that US partnerships

(including limited partnerships such as Delaware limited partnerships, but also US LLCs and LLPs) not electing to be treated as corporations are not considered to be companies for the purposes of US tax treaties.

Note. Article 10(2)(b) of the US Convention provides a reduced rate of 15% in some circumstances, and does not require the recipient of the dividend to be a company. US LP will be entitled to the reduced rate of 15% if it satisfies all of the requirements for that reduction.⁸⁷

79.25 HMRC official list of transparent and opaque entities

The International Manual provides:

180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes [April 2012]

A list of foreign entities where we have been asked our view on the question of transparency/opacity is set out in INTM180030.

I refer to this as “**the HMRC official list**”.

It should be noted that the list only gives our general view as to the treatment of the specified foreign entity. In a particular case regard may also need to be had to:

- (a) The specific terms of the UK taxation provision under which the matter requires to be considered;
- (b) The provisions of any legislation, articles of association, by-laws, agreement or other document governing the entity’s creation, continued existence and management, and;
- (c) The terms of any relevant Double Taxation Agreement.

It should also be borne in mind that in relation to the classifications set out on the list:

In some instances HMRC’s view was given many years ago, and there may have been significant changes in the relevant foreign law which may mean that a different conclusion as to the status of that entity might now be reached. Changes in foreign law after the publication of this article may be significant for the same reason. ...

Where clarification is sought in relation to a foreign entity we will attempt to give a view in particular cases in line with Code of Practice 10.

87 ATO ID 2010/81, 9 April 2010, accessible <http://law.ato.gov.au>

An OECD Report⁸⁸ sets out a helpful list of entities of OECD countries giving their main characteristics. I here set out a combination of three lists: the TB 83 list in full, together with the additional references in the version of that list in INT Manual 180030 [November 2010].⁸⁹ I add the English translation from the OECD list; the reader who needs basic information about an entity in that list should turn to the OECD report.

79.27 Share capital

79.27.1 *Significance of ordinary share capital*

If an entity issues ordinary share capital, it may be a “75% subsidiary” for tax purposes. It follows that it is possible for the entity to qualify for CGT and IT group reliefs, and to benefit from CGT reliefs for share exchanges.

79.27.2 *When does a body have ordinary share capital?*

HMRC Brief 87/09¹¹⁹ provides:

Corporation Tax: Meaning of Ordinary Share Capital

HM Revenue & Customs (HMRC) have been asked to provide a list of foreign entities that they consider to have ‘Ordinary Share Capital’ for the purposes of TA 1988, s 832. Unfortunately as each case will have its own particular set of facts it is not feasible for an exhaustive list to be created, nor, in the context of considering legal systems other than the UK’s, that are subject to change, would it be practical to do so.

Set out below is HMRC’s interpretation of TA 1988 s 832 and information that, it is hoped, will be useful to companies and advisors, as well as officers within HMRC, in deciding whether a particular non-UK entity has ‘Ordinary Share Capital’ for the purposes of TA 1988 s 832. Also included below are some details of our position on two of the most often queried foreign entities, the Delaware LLC and the German GmbH. Please note, this brief only seeks to consider the meaning of ‘Ordinary Share Capital’ for the purposes of TA 1988 s 832. Specifically, it does not cover the classification of a foreign entity for UK tax purposes (whether it is ‘transparent’ or ‘opaque’). ...

The reader should also note that the Companies Act 2006 received Royal Assent on 8 November 2006 and the Government has announced its intention to commence all parts of the act by 31 October 2008. The DBERR has published an implementation timetable

117 HMRC original erroneously reads: commandit.

118 “A verein” is a misprint but I do not know what is intended.

119 12 January 2010. An earlier version appeared in HMRC Brief 54/07.

according to which the relevant sections of Part 17, A Company's Share Capital, will come into force on 1 October 2008. This article will be reviewed in due course to ensure it takes account of any necessary amendments due to legislative changes.

Definition

Ordinary share capital is defined in TA 1988 s 832 as follows:

“ ‘ordinary share capital’, in relation to a company, means all the issued share capital (by whatever name called) of the company, other than capital the holders of which have a right to a dividend at a fixed rate but have no other right to share in the profits of the company;”

This definition therefore includes all of the issued share capital of a company, apart from capital carrying a right to a dividend at a fixed rate only. The bracketed wording ‘by whatever name called’ should not be overlooked as it is important to note that companies often categorise share capital into shares bearing different names, eg A Ordinary; B Ordinary, for purposes which may be of no relevance to the application of the definition above.

Characteristics of issued share capital in a UK company—general principles**UK companies**

Ordinarily, references to a company will be understood to mean a limited liability company. Limited liability companies are so called because the liability of each shareholder for the company's debts and other liabilities is limited to the amount which remains unpaid on his shares. There are two types of limited liability company in the UK, public and private. The main difference between these types of company is that a public company can apply to be listed and offer its shares to the public in order to raise capital. There are, however, other types of less commonly used company forms: unlimited companies, with or without share capital, and companies limited by guarantee.

In the latter case the members' liability is limited to amounts they undertake to contribute in the event of a winding up; the amount of this maximum liability of each of the members will be set out in the ‘guarantee clause’ of the company's memorandum. The total commitment of the members, taken together, is known as the ‘guarantee fund’; this fund only comes into existence on a winding up. In practice, this form of vehicle is usually unsuitable for most businesses but is often used, for example, by charities.

Companies limited by guarantee incorporated on or after 22 December 1980 cannot also have a share capital (Section 1(4) Companies Act 1985). Companies limited by guarantee incorporated before that date may, however, also have share capital.

In 1999 the Special Commissioners considered the status of ‘founders’ deposits’ with a company limited by guarantee in the case *South Shore Mutual Insurance v Blair* [1999] STC (SCD) 296. They came to the conclusion that the deposits were not issued share capital; the company did not, in fact, have any authorised share capital and, as a consequence, could not have issued share capital. Although the decision is not binding authority, the case contains a useful review of some of the authorities about share capital.

Shares in UK companies

A company limited by shares is currently required to stipulate the maximum share capital the company may issue and the number and nominal value of the shares into which it is divided, its ‘authorised share capital’, in a document called the company's memorandum of association (section 2(5)(a), Companies Act 1985).

Note: The reader should note that the Companies Act 2006 abolishes the requirement for a company to have an authorised share capital by the repeal of section 2(5)(a). This

should take effect from 1 October 2008. The new act nonetheless requires that, on formation, a company with a share capital will be required to submit a statement of capital and initial shareholdings to the Registrar at Companies House.

The memorandum is one of two essential documents that must be filed at Companies House on incorporation, the second is the company's articles of association; these documents together set out provisions governing the manner in which the company will operate. The amount of authorised share capital set out in the company's memorandum may be later increased by an ordinary resolution of the shareholders (requiring a simple majority of the vote).

The company's assets are owned by the company itself, not by the shareholders individually, although in turn the shareholders together have ownership of the company. The shares express the shareholders' proprietary relationship with the company.

In principle, shares are transferable, but in practice there are often restrictions on transfer, found in the company's articles of association.

The principal rights that usually attach to a share are rights to dividends declared, a right to vote and a right to share in the company's assets in a winding up. The principal responsibility that attaches to a share is to pay what is due on the share. The rights and duties are all subject to the memorandum and articles of association.

For a company limited by shares, the share capital must be stated in a fixed amount. In *Ooregum Gold Mining of India v Roper* [1892] AC 125 Lord Halsbury said:

"The capital is fixed and certain, and every creditor is entitled to look at that capital as his security."

A share certificate is *prima facie* evidence of ownership of a share. However, it does not, of itself, constitute ownership of the share and is not essential to demonstrate that share capital has been issued. In order to be a member of a company, under the Companies Act, a person must be entered in the company's register of members. See s 112 Companies Act 2006. The decision in *National Westminster Bank plc v IRC* ([1994] STC 580), confirms this position, ie the 'issue' of share capital is only complete when members are recorded in the company's register of members.

Characteristics of issued share capital in a body incorporated in another country—relevant factors

When looking at whether a body incorporated under the law of another country, it is self evident that UK company law is not directly applicable. In *Ryall v The Du Bois* 18 TC431, Lord Hanworth M.R. said:

'a share in a foreign company may be something different from and, indeed, is almost necessarily different from, a share as we know it in an incorporated company.'

Slessor L.J. said

'We have to consider what would be analogous to stocks and shares in Germany in dealing with what is a company, and allowing for differences of law in that country'.

Slessor L.J.'s comments were given in the statutory context of whether foreign income was income from stocks and shares for the purposes of Case V Schedule D. However we consider them as authority for proceeding by analogy in deciding whether the capital of a foreign company can be considered as 'issued share capital'.

A number of factors are relevant in deciding whether or not a foreign 'company' has 'issued share capital'.

Firstly the body concerned must have a legal personality separate and distinct from that of its members, able to carry on business and owning its assets in its own right, in the

same way as a UK company. If that characteristic is absent the members cannot have the type of proprietary interest which is characteristic of holders of issued share capital of a company incorporated under the laws of the UK.

If the body concerned possesses a separate legal personality, as described above, the following factors will then become relevant to the question of whether a member's interest in such company is analogous to an interest in 'issued share capital' as understood in the UK:

- whether the member's interest is like shares (that is, a portion of the fixed capital of the corporate body) or like debt (that is, money owed by the body corporate to the members)
- whether any subscription for the members' interests is payable
- whether the subscription payable for the 'shares' remains the member's property or whether it becomes the property of company
- what proprietary rights, such as rights to participate in control by voting, rights to receive a dividend out of the company's profits and rights to share in a distribution out of the company's assets in the event of a winding up, attach to the member's interests and what responsibilities, such as a responsibility to pay up on the 'share' if called, attach to the member
- whether the member's interest can be legally evidenced in accordance with local laws; for example, by being registered in a company-held document, or with a public authority, or by a certificate or similar document
- whether the member's interest is denominated in a stated fixed value
- whether the member's interest forms a fixed and certain amount of capital, or a part of that, to which creditors can look as security
- whether the non-UK law concerned requires amounts subscribed to be allocated to capital of the company which is fixed capital, and the extent to which subscriptions are so allocated
- whether the member's interests is capable of transfer and if so whether such a transfer would be similar to a transfer of a portion of the capital of the company, with attendant proprietary rights, rather than similar to a transfer of money or a loan account; and
- any other factors which point to the member's interests being 'issued' and having the character of ordinary share capital.

The background information a company or its advisers are likely to want to consider includes the following documentation:

- The corporate law of the foreign country which governs the body in question.
- Whatever general commentaries are available on the legal and commercial status of the body in question.
- The documents establishing the body, and any other documents which regulate its activities, especially those which deal with subscription for capital and those which govern what happens to the profits and assets of the body.

The accounts that show the state of affairs of the body, in particular the balance sheet, may be helpful in showing whether, and to what extent, money subscribed or otherwise provided by the members of the body is allocated to a fixed amount of permanent capital or whether it is loan debt.

In deciding whether the body has issued share capital, it is not necessary for every factor to be present, but there should be a preponderance of indicators pointing to there being issued share capital. Different weight may need to be given to the various factors. For

instance it would be of considerable importance if the member's interest had the character of debt. However restrictions on transfer of a member's interest would be of lesser importance. It is by no means uncommon for there to be restrictions on transfer of shares in a UK company.

79.27.3 *Ordinary share capital: Delaware LLC*

HMRC Brief 87/09 provides:

Delaware Limited Liability Companies

... Section 18–702c of the Delaware Limited Liability Act provides that:

‘Unless otherwise provided in a limited liability company agreement, a member's interest in a limited liability company may be evidenced by a certificate of limited liability company interest issued by the limited liability company.’

If a DLLC issues ‘shares’ in this way and the other factors relating to the company suggest that it has share capital then we will accept that these ‘shares’ may be regarded as ‘ordinary share capital’ for the purpose of Section 832 ICTA 1988.

It should be noted that not all DLLCs issue share certificates but they may still have ‘ordinary share capital’. Regard must be had to the particular terms of the agreement by which the LLC has been created. In any case of doubt or difficulty regarding the status of the share certificates HMRC will advise in particular cases in line with Code of Practice 10. The contact point is ...

Other States within the United States of America have comparable legislation to Delaware. Where it can be shown that a particular State has legislation analogous to the Delaware legislation with which we are familiar, HMRC would expect to be able to provide advice in line with that for DLLCs.

In *Swift v HMRC* [2010] UKFTT 88 the Tribunal found that the membership interest in a Delaware LLC was not similar to share capital but something more similar to partnership capital of an English partnership. The interest would not have been ordinary share capital. However HMRC do not intend to take any notice of that, at least for now:

HMRC similarly intends to continue its general practice in this respect

in relation to US LLC's.¹²⁰

Taxpayers are not likely to complain about that.

79.27.4 *Ordinary share capital: German GmbH*

HMRC Brief 87/09 provides:

A Gesellschaft mit beschränkter Haftung (GmbH) in Germany, literally a 'company with limited liability', is an entity of a very similar kind to a UK private limited liability company. An Aktiengesellschaft (AG), sometimes called a 'joint stock company' may be considered more akin to a UK public limited liability company (plc) as its stock may be listed.

Under German law, the capital of a GmbH is not divided up into small units. However, a GmbH has a fixed amount of capital (Stammkapital) which corresponds to the maximum amount of share capital that the company may issue, similarly to a UK limited liability company's 'authorised share capital'. The amounts originally contributed (Stammeinlagen) by the members (Gesellschafter) will also be noted, just as in the UK the initial subscriber shares will be noted in the memorandum of a limited liability company.

Article 5 of the German GmbH law sets out a minimum amount of Stammkapital (authorised share capital) as €25,000, and the minimum amount of Stammeinlage (original contribution/subscription) of each Gesellschafter (member) at €100. Based upon GmbH cases HMRC have previously considered, the amounts of Stammeinlage subscribed by the members may normally be regarded as issued share capital for the purposes of the Taxes Acts.

120 "Swift v HMRC: UK tax treatment of a US LLC" 20 May 2010

www.hmrc.gov.uk/international/swift-v-hmrc.htm. The position will need to be reviewed when the decision is final.

CHAPTER EIGHTY

CONTROL, CONNECTED, CLOSE AND RELATED EXPRESSIONS

80.1 Introduction

This chapter considers meaning of the terms “control”, “connected person”, “close company” and associated terms such as “participator”.

The definitions interlink but need to be considered separately.

80.2 Control

80.2.1 *Why does control matter?*

Control of a company is a concept used so often in tax legislation that it is impossible to write a full list.

The concept is important in particular for the definition of connected person: a person is connected to a company they control. The concepts of control and connected overlap.

80.2.2 *Meaning(s) of “control”*

There are two main definitions of control in the Taxes Acts (as well as numerous specialist definitions not considered here). The legislation does not have terminology to describe them, so I coin the following terminology:

- (1) **“Control in the ultra-wide sense”** - the definition in s.450 CTA 2010.
- (2) **“Control in the strict sense”** - the definition in s.995 ITA.

Sometimes the word control is used without definition; I refer to that as **“control in the natural (undefined) sense”**.

Section 989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts—

“control”, in relation to the control of a body corporate or a partnership, is to be read in accordance with section 995,¹

Thus for IT the strict sense is the default meaning, though in practice the ultra-wide sense is more common.

By contrast, s.288(1) TCGA provides:

In this Act, unless the context otherwise requires—

“control” shall be construed in accordance with sections 450 and 451 of CTA 2010;

Thus for CGT the ultra-wide sense is the default meaning.

For IHT, s.269 IHTA provides yet another definition of control. Such is the patchwork nature of UK taxation. The IHT definition is not discussed here as it does not arise in the IHT issues closest to the themes of this book.

80.3 Control in ultra-wide sense

80.3.1 *Five heads of definition of control*

Section 450 CTA 2010 provides:

- (1) This section applies for the purpose of this Part.
- (2) A person (“P”) is treated as having control of a company (“C”) if P—
 - (a) exercises,
 - (b) is able to exercise,² or
 - (c) is entitled to acquire,
 direct or indirect control over C’s affairs.
- (3) In particular, P is treated as having control of C if P possesses or is entitled to acquire—
 - (a) the greater part of the share capital or issued share capital of C,
 - (b) the greater part of the voting power in C,

1 The point is repeated (unnecessarily) in s.1021(2) ITA: “Section 995 (meaning of “control”) applies for the purposes of this Act unless otherwise indicated.”

2 Section 450(2)(a) is otiose for any person within (a), who *exercises* control, must also be within (b), *able to exercise* control. But it does not matter.

- (c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators, entitle P to receive the greater part of the amount so distributed, or
- (d) such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive the greater part of the assets of C which would then be available for distribution among the participators.

Section 450(2) refers to a person who is *able to exercise* or is entitled to acquire control; s.450(3) refers to a person who *possesses* or is entitled to acquire certain rights; but there is no difference in meaning. Presumably the drafter felt that the correct legal terminology is that one *exercises* control but one *possesses* rights.

The CT Manual identifies the five heads of control:

60210 Control: Definition [September 2011]

Control is defined under several headings:

- [1] Control over the affairs of the company (see CTM60220).
- [2] Control through voting power (see (a) of CTM60220).
- [3] Control through share capital or through issued share capital (see (b) of CTM60220).
- [4] Control over income of the company (see (c) of CTM60220).
- [5] Control over assets of the company (see (d) of CTM60220).

In *R v IRC ex p. Newfields Developments* 73 TC 532 Lord Hoffmann said:

[10] It will be seen that although this definition starts in subs (2) with a concept of control which reflects its meaning in ordinary speech ('a person shall be taken to have control of a company if he exercises, or is able to exercise or is entitled to acquire, direct or indirect control over the company's affairs'), that fairly simple notion is enormously widened by subsequent subsections. ...

[11]... The effect of those cumulative definitions is that for the purpose of deciding whether a person 'shall be taken to have control of a company' under [what is now s.450], it may be necessary to attribute to him the rights and powers of persons over whom he may in real life have little or no power of control. Plainly the intention of the legislature was to spread the net very wide.

80.3.2 *Control over a company's affairs*

P is treated as having control C if P—
(a) exercises,
(b) is able to exercise, or
(c) is entitled to acquire,
direct or indirect control over C's affairs.

In the last line of this head, “control” is used in the natural (undefined) sense.

In *Steele v EVC International* 69 TC 88 the Court of Appeal said:

In my view, control of the affairs of the company in s [450] means control at the level of general meetings of the company in the sense explained in the cases to which I have referred. Those cases recognise that control at that level carries with it the power to make the ultimate decisions as to the business of the company and in that sense to control its affairs.

The CT Manual provides:

60220 Control: Over the company's affairs [September 2011]

The House of Lords' judgment in the case of *R v IRC ex parte Newfields Developments* 73 TC 532 makes it clear that Section [450 CTA 2010] approaches the question of control of a company from two angles.

It begins with the proposition in the opening words of Section [450] that a person has control of a company if he or she exercises or is able to exercise or is entitled to acquire control, whether direct or indirect, over the company's affairs. That is a test of actual control, reflecting its meaning in ordinary speech.

As regards the level at which control is exercised, the judgment in *Steele v EVC International NV* 69 TC 88 confirms that what is required is control at the participator or general meeting level, not at administrative or board level.

SP 1/01 provides:

54. Where the establishment of a connected person's relationship depends on the question of whether a person falls to be regarded as having control of a company's affairs within the terms of s 416(2) ICTA 1988, it is not considered that a person's ability (whether de facto or de

jure) to appoint the majority of the Board of directors will itself constitute control of the company's affairs—unless, that is, the Board exercises powers which would normally be exercised by the shareholders at a general meeting.

80.3.3 *Shares*

P is treated as having control of C if P possesses or is entitled to acquire ... (a) the greater part of the share capital or issued share capital of C.

This is straightforward.

80.3.4 *Votes*

P is treated as having control of C if P possesses or is entitled to acquire ... (b) the greater part of the voting power in C.

This is otiose, since a person with the greater part of the votes has control under s.450(2) CTA 2010: they are able to exercise control over the company's affairs.

80.3.5 *Right to income*

P is treated as having control of C if P possesses or is entitled to acquire ... (c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators, entitle P to receive the greater part of the amount so distributed.

The CT Manual provides:

60240. Control: Summary [February 2006]

... The test in (c) of CTM60220 depends on the dividend rights of the issued capital and will be mainly of interest where shares with no voting rights carry the right to a high dividend.

But this is not the only case. The life tenant of an IP trust holding a majority of the shares in a company in principle has control of the company under this head.

80.3.6 *Right to capital*

P is treated as having control of C if P possesses or is entitled to acquire ... such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive the greater part of the assets of C which would then be available for distribution among the participators.

The CT Manual provides:

60230. Control: Right to receive most assets [September 2011]

Control under (d) of CTM60220 exists where a person or persons have a right to receive the greater part of the assets then available for distribution among participators, in any circumstances, (for example, on redemption of redeemable share capital or on repayment of loans to the company) but also, specifically, on a winding up of the company.

‘Participators’ for this purpose includes loan creditors (unlike (c) of CTM60220). As regards the definition of loan creditors, see CTM60130. If a loan creditor is an open company, see CTM60300.

The test under CTA2010/S450 (3) (formerly ICTA88/S416 (2) (c)) only applies to the assets that would come to a participator in that capacity. In the case of a bank, for example, no regard would be had to any assets that would come to it in respect of loans made in the ordinary course of its banking business, because it is not deemed to be a loan creditor (and, hence it is not a participator) in respect of such loans by virtue of CTA2010/S453 (4) (formerly ICTA88/S417 (9)).

60240. Control: Summary [February 2006]

...3. The test in CTM60230 will normally be of interest only where loan creditors are participators (see CTM60130) or there exist special rights to participate in the assets available for distribution in a winding-up or in any other circumstances for example, on redemption of redeemable share capital.

But this is not the only case. If trustees hold a company on trust for A for life, remainder to B absolutely, then B has control under this head: for B will in the future be entitled to the assets of the company. If trustees hold a company on trust for B contingently (eg on attaining the age of 25, if B is under 25) then B does not have control under this head.

80.3.7 “Entitled to acquire”

Section 451 CTA 2010 provides:

- (1) This section applies for the purposes of section 450.
- (2) A person is treated as entitled to acquire anything which the person—
 - (a) is entitled to acquire at a future date, or
 - (b) will at a future date be entitled to acquire.

The INT Manual comments on identical wording in the CFC legislation, s. 749B ICTA:

210050 ‘Entitled to acquire’ and ‘entitled to secure’ [February 2006]

The terms ‘entitled to acquire’ and ‘entitled to secure’ in (a), (b) and (c) of INTM210040 apply both where a person is presently entitled to acquire or secure an asset at a future date and where a person will at a future date be entitled to acquire or secure that asset. They do not extend to situations where, in an entirely arm’s length transaction, one party temporarily has future rights over the other’s property, for instance, in the period between exchange of contracts and completion of a sale of land.

A person whose entitlement to acquire or secure is contingent on a default of any person, including the controlled foreign company in question, will not be treated as having an interest in the controlled foreign company, unless that default has occurred.

So, for example, a person will have an interest in a controlled foreign company if, by means of a contractual right or some other arrangement, he can

- require a shareholder to transfer shares to him, or
- secure the issue to him of unissued share capital of the company, or
- secure that if a distribution is made by the company he has a share in the distribution or premium.

A person will not have an interest in a controlled foreign company solely by virtue of rights over the income or assets of the company which are exercisable on the default of any person. Thus the contingent rights of banks, trade creditors, etc. to acquire some or all of the company’s assets in the event of a default would not amount to an interest in the company in advance of the default.

See too 80.17.6 (“Entitled to do”).

80.4 “Nominees”

Section 451(3) CTA 2010 provides:

If a person—

- (a) possesses any rights or powers on behalf of another person (A), or
- (b) may be required to exercise any rights or powers on A’s direction or behalf,

those rights or powers are to be attributed to A.

It is self-evident that the powers of a nominee should be attributed to its principal. The section is in fact wider than that, since the cases where “A may be required to exercise rights at the direction of B” extend beyond the case where A is a nominee for B in the strict sense of nominee. However the subsection is otiose, for if A may be required to exercise rights on the direction of B, or on behalf of B, then these are rights which B possesses or is entitled to acquire, so the rights would be taken into account in any event in the test of control.

See Howard, “Remote Control” (Sep 2011) Tax Adviser, p.45.³

80.5 Associates

The concept of associates is important because (in short) a person is treated as holding the rights of all their associates.

For the difficulties caused by the width of the definition, see 80.7.3 (Commentary).

The definition of associate has four parts:

- (1) Relatives and partners
- (2) Trustees
- (3) Companies
- (4) Personal representatives

³ Accessible

www.tax.org.uk/Resources/CIOT/Documents/2011/09/Control_company_RC.pdf

80.5.1 *Relatives and partners*

Section 448(1) CTA 2010 provides

In this Part “associate”, in relation to a person (“P”), means—
(a) any relative or partner of P,

Section 448(2) CTA 2010 defines relative:

In this section, “relative” means—
(a) a spouse or civil partner,⁴
(b) a parent or remoter forebear,
(c) a child or remoter issue, or
(d) a brother or sister.

The Company Taxation manual provides:

CTM60150 Tests: Associates [November 2011]

... Separated spouses should be regarded as associated with each other but divorced persons should not. Other relatives in (a)(ii) to (iv) should be regarded as associated only if there is a blood relationship, for example, half-brothers are associated but stepbrothers are not...

80.5.2 *Trustees*

Section 448(1) CTA 2010 provides:

In this Part “associate”, in relation to a person (“P”), means ...
(b) the trustees of any settlement in relation to which P is a settlor,
(c) the trustees of any settlement in relation to which any relative of P (living or dead) is or was a settlor,
(d) if P has an interest in any shares or obligations of a company which are subject to any trust, the trustees of any settlement concerned,

80.5.3 *Companies*

Section 448(1) CTA 2010 provides:

⁴ Contrast the definition of relative in the definition of connected person, under which a spouse is not a relative; see 80.10 (Connection with family members). But one gets to the same result with either definition.

In this Part “associate”, in relation to a person (“P”), means ...

(e) if P—

- (i) is a company, and
- (ii) has an interest in any shares or obligations of a company which are subject to any trust,
any other company which has an interest in those shares or obligations ...

(g) if P—

- (i) is a company, and
- (ii) has an interest in any shares or obligations of a company which are part of the estate of a deceased person,
any other company which has an interest in those shares or obligations.

80.5.4 *Personal representatives*

Section 448(1) CTA 2010 provides:

In this Part “associate”, in relation to a person (“P”), means ...

- (f) if P has an interest in any shares or obligations of a company which are part of the estate of a deceased person, the personal representatives of the deceased,

80.6 Attribution of rights of associates and controlled companies

Section 451(4) CTA 2010 provides that for the purposes of the definition of control in the ultra-wide sense:

There may also be attributed to a person all the rights and powers—

- (a) of any company of which the person has, or the person and associates of the person have, control,
- (b) of any two or more companies within paragraph (a),
- (c) of any associate of the person, or
- (d) of any two or more associates of the person.⁵

In short, a person is treated as holding the rights of associates and controlled companies. Section 451(5) CTA 2010 provides:

⁵ Para (b) and (d) must be otiose, but it does not matter.

- (5) The rights and powers which may be attributed under subsection (4)—
- (a) include those attributed to a company or associate under subsection (3) [nominees], but
 - (b) do not include those attributed to an associate under subsection (4).

One is not treated as holding the rights of an associate of an associate.

Section 451 uses the word “may” but here that means “shall”. Section 451(6) CTA 2010 provides:

Such attributions are to be made under subsection (4) as will result in a company being treated as under the control of 5 or fewer participators if it can be so treated.

I refer to this as “**the attribution rule**”. This rule does not apply for the purposes of the definition of participator (that is, the fact that A is an associate of a participator does not mean that A is a participator).

80.7 Examples

80.7.1 *Chain of wholly owned companies*

A chain of companies is straightforward. Suppose:

A controls X Ltd. A controls Y Ltd, either as he controls it (in the undefined sense) or because the rights of X Ltd are attributed to A.

It also follows that A is connected to X Ltd and Y Ltd. That is what one might expect.

80.7.2 *Associates each own a company*

Suppose two persons are associates and each own a company:

X controls X Ltd and also “controls” Y Ltd: the rights of X are attributed to Y.⁶

It also follows that:

- (1) X is connected to X Ltd and to Y Ltd.
- (2) X Ltd is connected to Y Ltd (as the same person has “control” of both companies).

80.7.3 *Commentary*

The attribution rule - together with the wide definition of associates - is what makes the s.450 definition of control ultra-wide. It is so wide that the word “control” is not apt to describe the concept (“some loose association” would be nearer the mark). It is confusing to depart from statutory terminology, but where the ultra-wide sense of control is used, the actualities demand quotation marks. For instance:

- (1) A has “control” of a company owned by a relative (say, a sister in law) even though A has no beneficial interest in the company, and, of course, no right to know that the relative owns the company or anything about the company.
- (2) A has “control” of a company owned by a trust of which a relative is a settlor, even though A is not a beneficiary and has no right to know that the trust had been made, let alone to know anything about the trust or its property. Indeed the relative need not be the settlor but only *a* settlor, so the rule would apply if (say) a sister in law provides a nominal amount of property to a trust.
- (3) A partner has “control” of a company owned by a partnership even if it is an investment partnership with a large number of unconnected

⁶ See 80.6 (Attribution of rights of associates and controlled companies).

partners. The modern use of partnerships as collective investment vehicles raises this problem, because investment partnerships have large numbers of partners, and partners do not know who their fellow partners are.

This has three noteworthy consequences.

The first is practical: it is not possible for a person to know whether they control a company, or to draw up a list of all companies which they control. In practice there is substantial innocent non-compliance and selective or arbitrary enforcement, where HMRC sufficiently dislike a taxpayer to make enquiries not normally made.

The second point is presentational but nevertheless important: anti-avoidance provisions which refer to control may appear to the non-tax specialist to be reasonable because control seems a sensible limiting factor; but they generally operate unreasonably widely (because the meaning of *control* is so wide).

Thirdly, this leads to complexity. On occasions where the difficulty caused by the extravagance of the definition has come to be recognised, the definition of control⁷ is then restricted.⁸ However this is only done on a piecemeal basis, where taxpayer lobbying has for some reason given rise to governmental action. So the result is a complexity which would not arise if a more restrained definition of control had been adopted in the first place.

The same difficulties apply to provisions using the term “connected person” (since that term uses the concept of “control” in the ultra-wide sense). It will in practice be impossible for a person to identify all persons who are “connected” with them. One individual might easily have 500

7 or some concept in which the word control is used, such as associate or connected person.

8 For instance, ss.27, 29, 30 CTA 2010. Section 27 CTA 2010 provides:

“(2) In the application of section 451 (meaning of ‘control’: rights to be attributed) for the purposes of the determination, the references in section 451(4) and (5) to an associate of a person (“P”) include a partner of the person only if the condition in subsection (3) below is met.

(3) The condition is that tax planning arrangements which—

(a) involve P and the partner, and

(b) secure a relevant tax advantage,

have at any time had effect in relation to the taxpayer company.”

persons connected with them. If one could write a full list, it would vary continuously. Even an attempt to enquire would be grossly intrusive.

The point was made in the responses to the 2008 consultation on the substantial donor rules:

charities described the connected persons rule as an “impossible requirement”, a “substantial administrative burden” and a “compliance nightmare”.⁹

There was nothing particularly unusual in the substantial donor rules, except, perhaps, that the charities who responded to the consultation felt a greater obligation than most taxpayers to seek to comply with the tax rules: this difficulty applies generally to the use of the concept of control and connected persons. But HMRC’s priority in anti-avoidance legislation is not to produce legislation with which everyone can comply: it is to produce legislation which catches everything that they may wish to catch. Thus the definition of connected person in the tainted donation rules (which replaced the substantial donor rules in 2011) is even wider than the standard ultra-wide definition.¹⁰ But there it is.

80.8 Control by two or more persons together

Section 450(5) CTA 2010 provides:

If two or more persons together satisfy any of the conditions in subsections (2) and (3), they are treated as having control of C.

For instance, if A and B each hold 50% of a company, then A and B together have control. Why does it matter? This does not mean that A (alone) has control or that B (alone) has control. It matters for the following purposes:

- (1) Two companies are connected if (in short) they are under the control of the same (or connected) persons.¹¹
- (2) Two companies are associated (for the purposes of small profits relief)

⁹ Substantial Donors to Charity Consultation Responses Document, 2 January 2009 para 3.12, [2009] STI 65.

¹⁰ See s.809ZQ ITA.

¹¹ See 80.14 (Connection with company).

if (in short) both are under the control of the same persons. So it is often necessary to identify the persons who together control a company.

The CT Manual provides:

60250 Control: In multiple [September 2011]

More than one person or one group of persons may ‘control’ a company. For example, one person may have the greater part of the voting power, while two people hold the greater part of the issued share capital and a group of three people are entitled to the greater part of the assets in a winding up. All three combinations of people can be taken to have control of the company at the same time.

If say three persons, A, B and C, each hold one third of the shares in a company, and they are not connected in any way which would allow the rights and powers of one to be attributed to another, then control is held by A and B, or B and C, or A and C but not A, B and C together.

This is because in determining whether companies are ‘associated companies’, you should only consider ‘minimum’ controlling combinations. You should disregard combinations containing superfluous members. For example, a company controlled by the unconnected persons A, B and C, but not by any one or two of them alone should not be regarded as associated with any company controlled by one of them alone (as in the first subparagraph above) or by any two of them (as in the second subparagraph above). (See also CTM03730 for an example of this.)

However deciding on the ‘minimum’ controlling combination for any of the tests set out at ICTA 1988/416(2)(a) to (c) does not mean you have to establish the smallest controlling combination of each company when determining whether companies are associated companies.

In his High Court judgment in *R v IRC ex parte Newfields Developments* (73 TC 532 at page 541B) Moses J said that Section 416 [ICTA] had to be exercised for the statutory purposes for which it was conferred:

“In the context of Section 13 [ICTA], that purpose is to ascertain whether, in the instant case, two companies are under the control of the same person pursuant to Section 13(4). That is the statutory question. If it is possible to answer that in the affirmative, by exercising the power of attribution, in my judgment, that power must be exercised. Conversely, if that question, namely, are the two companies under the control of the same person, can only be answered in the affirmative by refraining from the exercise of the power, then the power should not be exercised”.

So in the first sub-paragraph above, you may be able to determine that two companies are associated because the three people who together have an entitlement to the greater part of the assets in a winding up also together hold the greater part of the voting power in another company. In that case you would take this group as controlling the company and not the single or two person combinations. As this example shows, the identical controlling combination does not need to be established by the same test in each company.

This passage is written in the context of (what is now) s.25(4) CTA 2010 which provides:

For the purposes of this Part, a company is an associated company of another at any time when—

- (a) one of the two has control of the other, or
- (b) both are under the control of the same person or persons.

The same approach would apply to the definition of connected person: see 80.14 (Connection with company).

80.9 Connected person

80.9.1 *Definitions of connected person*

There are separate definitions for the separate taxes.

“Connected person” is defined for CGT in s.286 TCGA. Section 286(1) TCGA provides:

[a] Any question whether a person is connected with another shall for the purposes of this Act be determined in accordance with the following subsections of this section ...

Section 989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts—

"connected", in relation to two persons being connected with one

another, is to be read in accordance with sections 993 and 994.¹²

Thus the IT s.993 definition applies for IT (in the absence of a contrary indication).

The CT position is similar. The definition is found in s.1122 CTA 2010 which is similar to s.993 ITA. Section 1122(1) CTA 2010 provides:

This section has effect for the purposes of the provisions of the Corporation Tax Acts which apply this section (or to which this section is applied).

But s.1176(1) CTA 2010 provides:

Section 1122 (how to tell whether persons are connected) applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).

Section 1316 CTA 2009 is identical. Thus the CT s.1122 definition applies for the CTAs 2009 and 2010 unless disapplied. It could have been done more neatly.

IHT adopts the CGT definition of “connected person” with a little tinkering.¹³

In this chapter I consider the CGT and IT definitions. These two definitions are substantially the same but for IT the drafting is improved in some respects. Where they are the same, I give the text of the TCGA and the IT provision in footnotes. What is said about IT is generally applicable to CT

There are many other definitions elsewhere, sometimes the same and sometimes different.

12 The point is repeated (unnecessarily) in s.1021(1) ITA: “Section 993 (meaning of “connected” persons) applies for the purposes of this Act unless otherwise indicated.”

13 Section 270 IHTA provides:

“For the purposes of this Act any question whether a person is connected with another shall be determined as, for the purposes of the 1992 Act it falls to be determined under section 286 of that Act, but as if in that section ‘relative’ included uncle, aunt, nephew and niece and ‘settlement’, ‘settlor’ and ‘trustee’ had the same meanings as in this Act.”

It is a pity that the tax law rewrite did not tidy up this mess; the opportunity is now lost. However the definition considered in this chapter can be considered the standard definition.

80.9.2 *Definition in outline*

The definition of connected person has five parts:

- (1) Family members
- (2) Trustees
- (3) Companies held by trusts
- (4) Partnerships
- (5) Companies generally

80.9.3 *Reciprocity of connection*

Section 286(1) TCGA continues:

[b] (any provision that one person is connected with another being taken to mean that they are connected with one another).

The meaning is that “connected” is a reflexive relationship: if A is connected with B then B is connected with A. For IT, s.994(4) ITA is makes the same point more clearly:

If any provision of section 993 provides that a person (“A”) is connected with another person (“B”), it also follows that B is connected with A.

80.10 Connection with family members

Section 286(2) TCGA provides:

A person is connected with an individual if that person is

- [a] the individual’s spouse or civil partner,
- [b] or is a relative,
- [c] or the spouse or civil partner of a relative,
- [i] of the individual or

[ii] of the individual's spouse or civil partner.¹⁴

The CG Manual unpacks this definition:

14580 Connected persons [October 2011]

A person is connected with an individual if that person is

- [1] the individual's spouse or civil partner
- [2] a relative of the individual
- [3] the spouse or civil partner of a relative of the individual
- [4] a relative of the individual's spouse or civil partner
- [5] the spouse or civil partner of a relative of the individual's spouse or civil partner.

Section 286(8) TCGA provides:

In this section "relative" means brother, sister, ancestor or lineal descendant.

The CG Manual provides:

14580. Connected persons [October 2011]

... The term 'relative' does not cover all family relationships. In particular, it does not include nephews, nieces, uncles and aunts.

14580. Connected persons [October 2011]

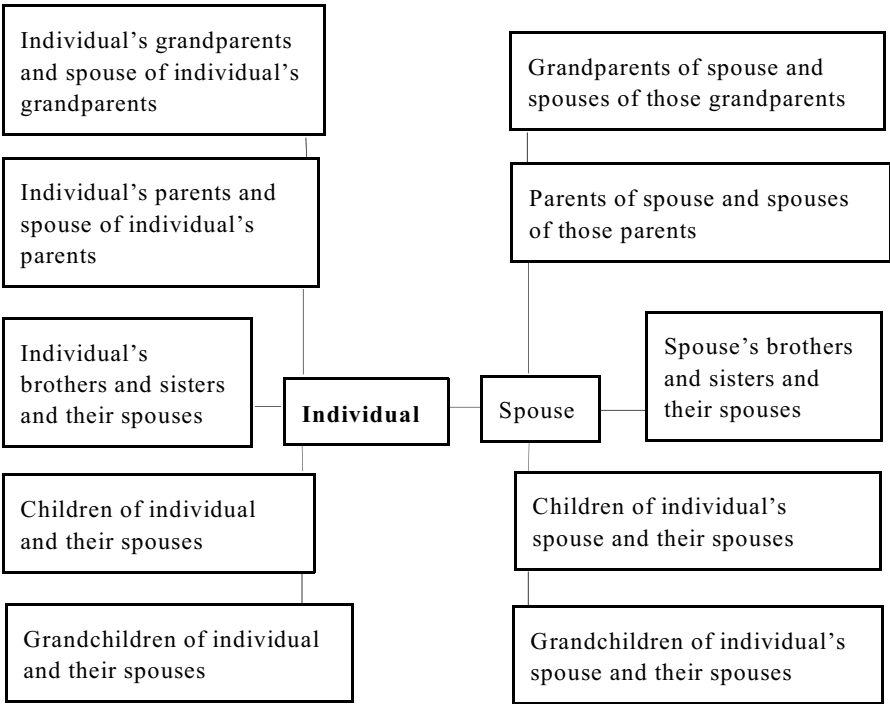

The following diagram illustrates the provisions of Section 286(2) TCGA 1992. All of the people in the diagram are connected with the individual. They are not all connected with each other¹⁵

14 For IT, s.993(2) ITA provides similarly:

"An individual ("A") is connected with another individual ("B") if—

- (a) A is B's spouse or civil partner,
- (b) A is a relative of B,
- (c) A is the spouse or civil partner of a relative of B,
- (d) A is a relative of B's spouse or civil partner, or
- (e) A is the spouse or civil partner of a relative of B's spouse or civil partner."

15 In this diagram "spouse" includes civil partner.

All the persons in the diagram are connected with the individual. Excluded are the widows or widowers, or surviving civil partners, of deceased persons, or relatives of a deceased spouse or of a deceased civil partner unless connection can be established by a route not involving the deceased. A dissolution of a civil partnership or a divorce can similarly lead to persons in addition to the former civil partner or spouse ceasing to be connected with the individual.

Readers are invited to speculate whether this diagram is or is not a useful aid to comprehension.

For the definition of control for IHT purposes, “relative” also includes an aunt, uncle, nephew and niece. See s.270 IHTA. A two dimensional diagram could not do justice to that.

80.11 Connection with trustees

80.11.1 *Settlors and settlor-connected persons*

Section 286(3) TCGA provides:

A person, in his capacity as trustee of a settlement, is connected with—

- (a) any individual who in relation to the settlement is a settlor,
- (b) any person who is connected with such an individual ...¹⁶

Similarly for IT, s.993(3) ITA provides:

A person, in the capacity as trustee of a settlement, is connected with—

- (a) any individual who is a settlor in relation to the settlement,
- (b) any person connected with such an individual,

The CG Manual provides:

14590. Connected persons: Trustees [January 2010]

... The trustees are no longer connected to the persons connected to the settlor after the settlor has died.

More accurately, trustees are not connected with family members or other persons who would have been connected with the settlor when the settlor was alive.¹⁷

The CG Manual provides:

14590. Connected persons: Trustees [January 2010]

[1] A settlor is considered to be connected with the trustee at the moment when property is put into the settlement.

[2] For the purposes of determining whether a trustee is connected with an individual, the identity of the trustee is irrelevant. So, for example, if the trustee is the wife or civil partner of the individual, he or she is only connected in his or her capacity as trustee if the case is within one of the three cases in CG14590.

16 For IT, s.993(3) ITA provides similarly:

A person, in the capacity as trustee of a settlement, is connected with—

- (a) any individual who is a settlor in relation to the settlement,
- (b) any person connected with such an individual ...

17 The Tribunal took this view in *Harris v HMRC* [2010] SFTD 1159 at [33]: “Section 839(3)(b) [ICTA] is expressed in the present tense, and s 839(3)(a) requires the settlor at the relevant time to be an individual who *is* the settlor. None of this is apt to include a deceased settlor.” In s.993 ITA, the tax law rewrite has deleted the second *is* but that makes no difference.

Contrast the definition of associates. See 80.5 (Meaning of “associate”).

Point [2] is correct since trustees are regarded as distinct from the persons who are actually the trustees.

The CG Manual provides:

14590. Connected persons: Trustees [January 2010]

Although under the tests outlined an individual is not connected with particular trustees, this may not prevent him or her from being connected with a company controlled by the trustees.

This is correct: see 80.14 (Connection with company). The Manual continues:

Under ICTA 1988, S 417, a beneficiary of a trust can be attributed with the rights and powers of trustees. In such circumstances he or she may control the company through the tests in ICTA 1988, S 416 and ICTA 1988, S 417 and hence be connected under TCGA 1992, S 286.

There is no general rule that the rights of trustees are attributed to beneficiaries. However the attribution will often be made on the grounds that the beneficiaries are relatives of the settlor¹⁸ or (sometimes) that they possess rights to income or capital.¹⁹

Suppose:

(1) A creates a trust (trust A) and
(2) B (who is connected with A, eg a spouse) creates a trust (trust B).
A is connected with the trustees of trust A (A is the settlor). A is connected with the trustees of trust B (a connected person is the settlor). However the trustees of trust A are not connected with the trustees of trust B. For the position if the trusts own companies, see 80.14.10 (Connected trusts owning separate companies).

For completeness: s.286(3)(d)(e) TCGA deal with sub-fund settlements.²⁰ Since these settlements are (virtually) never found in practice, this is dead-letter law which need not be considered even in a

18 See 80.6 (Attribution of rights of associates and controlled companies).

19 See 80.3.5 (Right to income); 80.3.6 (Right to capital).

20 (d) if the settlement is the principal settlement in relation to one or more sub-fund settlements, the trustees of the sub-fund settlements, and

(e) if the settlement is a sub-fund settlement in relation to a principal settlement, the trustees of any other sub-fund settlements in relation to the principal settlement.

work which seeks to be comprehensive.

Trustees are not connected with a corporate settlor.

80.11.2 *Meaning of settlement and trustee*

Section 286(3ZA) TCGA defines “settlement”:

For the purpose of subsection (3) above-

- (a) “settlement” has the same meaning as in section 620 of ITTOIA 2005

Why is the settlement-arrangement definition applied? (Contrast the definition of associate.) Perhaps non-corporate employers complained that a transfer by them to a pension fund was (before 2006) a connected person transaction whereas a transfer by a company to a pension fund was not. Now a transfer to a pension fund is not a connected person as the transferor is not in principle connected with a pension trust.²¹ But that is speculation as no reason was ever provided. A consequence is that will trusts are not settlements for the purposes of the connected persons rules, which is odd.²²

Before 2006, the settlement-arrangement definition applied for IT but not for CGT. The reason for the CGT change might have been that the same rule should apply for both taxes. Of course an alternative would have been to bring IT in line with CGT. Had a reason for the change been given, the issues could have been publically discussed. But there it is.

Section 286(3ZA)(b) TCGA defines “trustee”:

“trustee”, in relation to a settlement in relation to which there would be no trustees apart from this paragraph, means any person in whom the settled property or its management is for the time being vested.

For the definition of control for IHT purposes, “settlement” “settlor” and “trustee” have their IHT meanings: s.270 IHTA.

21 See 75.31.1 (Is a pension trust or employee trust a settlement?)

22 See 73.6.1 (Is an estate a “settlement” within s.87 TCGA?). For completeness: This was overlooked in an obiter passage in *Harris v HMRC* [2010] UKFTT 385 at [32] where the relevant authorities were not cited.

80.12 Company connected with trustees

Section 286(3) TCGA provides:

A person, in his capacity as trustee of a settlement, is connected with ...
(c) any body corporate²³ which is connected with that settlement,

This takes us to s.286(3A) TCGA which provides:

For the purpose of subsection (3) above a body corporate is connected with a settlement if-

- (a) it is a close company (or only not a close company because it is not resident in the UK) and the participators include the trustees of the settlement; or
- (b) it is controlled (within the meaning of section 1124 of the Corporation Tax Act 2010) by a company falling within paragraph (a) above.

It is confusing that the drafter used the expression “connected with a settlement” since in that expression the term “connected” is not used in the normal CGT sense of connected persons. But it does not matter.

The IT equivalent is more clearly drafted. Section 993(3) ITA provides:

A person, in the capacity as trustee of a settlement, is connected with ...

- (c) any close company whose participators include the trustees of the settlement,
- (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement,
- (e) any body corporate controlled (within the meaning of section 995) by a company within paragraph (c) or (d)

Thus trustees are connected with any close company in which they have any interest, no matter how small, but non-trustees are connected only if there is some element of “control”.

23 I do not know why the subsection refers to body corporate rather than company, but I don't think it makes any difference.

80.13 Connection with partners

Section 286(4) TCGA provides:

Except in relation to acquisitions or disposals of partnership assets pursuant to bona fide commercial arrangements, a person is connected with

[a] any person with whom he is in partnership,

[b] and with

[i] the spouse or civil partner

[ii] or a relative

of any individual with whom he is in partnership.²⁴

A partner is connected with a company controlled by a partnership because the partner has “control” of the company²⁵ and a person is connected to a company of which they have “control”.²⁶

80.14 Connection with company

Apart from the rule connecting trustees with companies, s.286 TCGA provides two ways by which a company may be connected with another person:

(1) company and person with control;

(2) company and persons acting together to exercise control.

In addition there are two ways by which a company may be connected with another company (an “inter-company connection”):

(1) 2 companies with common control;

(2) 2 companies with groups of connected controllers.

For completeness: the standard definition of company is disapplied for the

24 For IT, s.993 (4) ITA provides similarly:

“A person who is a partner in a partnership is connected with—

(a) any partner in the partnership,

(b) the spouse or civil partner of any individual who is a partner in the partnership, and

(c) a relative of any individual who is a partner in the partnership.

But this subsection does not apply in relation to acquisitions or disposals of assets of the partnership pursuant to genuine commercial arrangements.”

25 See 80.5.2 (Partners as associates).

26 See 80.14.4 (Person controls a company).

purposes of s.993 and 994 ITA (though not for CGT purposes).²⁷ So s.994 needs to provide its own definition of company,²⁸ but since the definition is the same as the standard definition, this drafting quirk makes no difference. Perhaps some day someone will tidy up this mess, but it does not matter.

For IT, s.994(1) ITA provides:

In section 993 and this section ...

“control” is to be read in accordance with sections 450 and 451 of CTA 2010 (except where otherwise indicated)

The only place where the context indicates that “control” is not used in the ultra-wide sense is in the phrase “acting together to secure or exercise control” and for all other references the ultra-wide sense applies. For this reason the concept of being connected with a company is also ultra-wide and no-one can draw a complete list of all the companies with which they are connected.

The CGT equivalent is s.288(1) TCGA. The wording is slightly different: but the position is exactly the same.

80.14.1 *Inter-company connection: one person controls two companies*

Section 286(5)(a) TCGA provides:

A company is connected with another company-
(a) if the same person has control of both...

A simple case is if one person owns two companies:

²⁷ See 79.3 (Meaning of “company”)

²⁸ Section 994 ITA provides:

“(1) In section 993 and this section—

‘company’ includes any body corporate or unincorporated association, but does not include a partnership (and see also subsection (2)),...

(2) For the purposes of section 993—

(a) a unit trust scheme is treated as if it were a company, and

(b) the rights of the unit holders are treated as if they were shares in the company.”

X Ltd is connected with Y Ltd.

80.14.2 *Inter-company connection: connected persons control two companies*

Section 286(5)(a) TCGA provides:

A company is connected with another company-

(a) if ..

[I] a person has control of one and

[ii] [A] persons connected with him, or

[B] he and persons connected with him,

have control of the other,

If two persons (“X” and “Y”) are associates, this is not needed because the rights of X are attributed to Y.²⁹ It is relevant in a case where two persons are connected but not associates.

80.14.3 *One group controls two companies*

Section 286(5)(b) TCGA provides:

A company is connected with another company...

(b) if

[i] a group of 2 or more persons has control of each company,
and

[ii] the groups either

[A] consist of the same persons or

[B] could be regarded as consisting of the same persons by
treating (in one or more cases) a member of either
group as replaced by a person with whom he is
connected.

²⁹ See 80.6 (Attribution of rights of associates and controlled companies).

The group may be vast and does not need any common purpose or identity. In *Kellogg Brown v HMRC*³⁰, two quoted companies each with over 16,000 shareholders were connected by a somewhat unimaginative construction of this head, since there was sufficient overlap between the two groups.

X Plc and Y Plc are connected.

80.14.4 *Person controls a company*

Section 286(6) TCGA provides:

A company is connected with another person, if
 [a] that person has control of it ...

Since control is ultra-wide, this head of control is also ultra-wide. See 80.7.2 (Associates each own a company).

80.14.5 *Connected persons control a company*

Section 286(6) TCGA provides:

A company is connected with another person, if ...
 [b] if that person and persons connected with him together have control of it.³¹

30 *Kellogg Brown & Root Holdings (UK) Ltd v HMRC* [2010] STC 925

31 For IT, s.993 ITA provides similarly:

- (5) A company is connected with another company if—
- (a) the same person has control of both companies,
- (b) a person (“A”) has control of one company and persons connected with A have control of the other company,
- (c) A has control of one company and A together with persons connected with A have control of the other company, or

If two persons (“X” and “Y”) are associates, this is not needed because the rights of X are attributed to Y.³² For instance, suppose:

(1) X and Y are relatives or partners.

(2) X owns 30% of A Ltd and Y owns 30% of A Ltd.

X “controls” A Ltd so this provision is not needed. It is only relevant in a case where two persons are connected but not “associates”.

Suppose

(1) A and B are connected persons but not associates.

(2) B controls X Ltd and A has no interest in X Ltd.

It is considered that A is connected to X Ltd. It might be argued that A and B do not *together* have control, but various anomalies would arise, and that is reading too much into the word *together*.

80.14.6 *Persons acting together to exercise control*

Section 286(7) TCGA provides:

Any 2 or more persons acting together to secure or exercise control of a company shall be treated in relation to that company as connected with one another and with any person acting on the directions of any of them to secure or exercise control of the company.³³

For the purposes of discussion I abbreviate “secure or exercise control” to “exercise control”.

The CG Manual comments on the phrase “acting together to exercise control”:

(d) a group of two or more persons has control of both companies and the groups either consist of the same persons or could be so regarded if (in one or more cases) a member of either group were replaced by a person with whom the member is connected.

(6) A company is connected with another person (“A”) if—

(a) A has control of the company, or

(b) A together with persons connected with A have control of the company.

32 See 80.6 (Attribution of rights of associates and controlled companies).

33 For IT, s.993(7) ITA provides similarly:

“In relation to a company, any two or more persons acting together to secure or exercise control of the company are connected with—

(a) one another, and

(b) any person acting on the directions of any of them to secure or exercise control of the company.”

14622 Companies: 2 or more persons acting together to control
[February 2006]

... For this subsection to operate it is not sufficient for the persons to have control of the company, the persons do have to act in some way to control the company. However, for example, exercising control could mean refraining from voting in a particular way and so enabling another person to win a vote, as well as by actually voting.

In *Steele v EVC International* 69 TC 88 one issue was whether two joint shareholders were “acting together”. The Court of Appeal said:

the mere coincidence of voting the same way at general meetings is insufficient. Likewise, combining together to carry a particular resolution would not normally be sufficient to constitute acting together to exercise control either at all or on any continuing basis cf *Commissioners of Inland Revenue v Lithgows Ltd* 39 TC 270.

So far so good. The Court continued:

the shareholders’ agreement set out in great detail how EVC was to be constituted and administered. At all material times the agreement was in force and performed and observed by each of the shareholders. ... such performance and observation constituted the necessary “acting together”.

The mere fact of a shareholders agreement does not show that the shareholders are acting together to exercise control. It is a question of fact. In this particular case, most of its terms seem to me to be indicative of each side protecting its interest acting separately! The agreement ensured that the company was deadlocked at board level as it was at general meeting level. But the following term is certainly acting together:

that EniChem and ICI should procure that not less than two-thirds of the profits of the joint venture available for dividend should be distributed to the shareholders and should procure that the shareholders vote accordingly to achieve this.

In *Foulser v MacDougall*³⁴ is another example of acting together, but the

34 [2005] STC (SCD) 374. The finding was not challenged on appeal.

facts were unusual. A director owned a company through a life policy wrapper. He arranged the sale of a company on behalf of the insurance company shareholder. He was held to be acting together with the shareholder to exercise control.

The Manual explains what it means to be connected “in relation to the company”:

TCGA 1992, S 286(7) makes two or more directors connected persons only in relation to transactions with the company.

This sentence assumes that the directors are acting together to exercise control at shareholder level.

80.14.7 *Directors*

The CG Manual considers the position of directors:

14623. Directors of a company [August 2009]

Directors of a company are not necessarily connected persons in relation to transactions between themselves. Whether or not one of them controls the company or two or more together control the company, they are not connected persons unless they are ‘relatives’, see CG14580, or partners, see CG14610. Section 286(7) TCGA 1992 makes two or more directors connected persons only in relation to transactions with the company.

That is correct.

80.14.8 *Personal representatives*

The definition of control does not mention PRs (unlike the definition of “associates”). PRs cannot be connected with individuals or trustees.³⁵ PRs may be connected with a company. They are “persons” so they are connected if (inter alia) they have control of the company or if they act with others to exercise control.

³⁵ The same conclusion was reached, though in a more roundabout way, in *Harris v HMRC* [2010] UKFTT 385 at [31] - [33].

80.14.9 *Example: unconnected persons jointly own a company*

Suppose individuals A and B (who are not connected or associated) each own 50% of X Ltd.

If A and B are not acting together to exercise control then they are not connected with each other or to X Ltd.

Suppose A and B are acting together to exercise control (as is likely to be the case). In that case they are “treated in relation to that company as connected with one another.” A and B are also connected with the company. However, A does not control the company.

Suppose X Ltd has a subsidiary thus:

It is considered that A is connected to Y Ltd since A and persons connected to A (ie X Ltd) together control Y Ltd.³⁶

Of course, A and B together control X Ltd. Suppose A and B own two companies thus:

X Ltd and Y Ltd are connected with each other.

³⁶ See 80.14.5 (Connected persons control a company).

80.14.10 *Example: Connected trusts own separate companies*

Suppose:

- (1) A creates a trust (trust A) which owns a company (A Ltd) and
- (2) B (who is a relative or spouse of A) creates a trust (trust B) which owns a company (B Ltd), thus:

The analysis is as follows:

- (1) A is connected with Trust A (because A is the settlor).
- (2) A has “control” of A Ltd (the trustees of trust A are associates of A, because A is the settlor; so their rights are attributed to him).
- (3) A is connected with A Ltd (because of that control).
- (4) A is connected with the trustees of trust B (because a connected person is the settlor).
- (5) A has “control” of B Ltd (the trustees of trust B are associates of A because a relative is the settlor; so their rights are attributed to him).
- (6) A is connected with B Ltd (because of that control).
- (7) A Ltd is connected with B Ltd (because A has “control” of both).

The trustees of trust A are not connected with the trustees of trust B but that does not stop their companies from being connected. Note that it is not necessarily possible for A Ltd or the trustees of trust A to know that A Ltd is connected with B Ltd.

What if A and B have died? If there is any person alive who is a relative of A and B, as defined, the relative has control of both companies and so A Ltd and B Ltd are still connected. But if A and B have no relatives (as defined) then the two companies are not in principle connected.

80.14.11 *Example: Unconnected trusts jointly own a company*

Suppose individuals Mr A and Ms B (who are not otherwise connected) are settlors of trusts which each own 50% of X Ltd. The trustees are Trustee-A and Trustee-B.

If none of Mr A, Ms B, Trustee-A and Trustee-B are acting together to exercise control then none of Mr A, Mr B, Trustee-A, Trustee-B or X Ltd are connected.

Suppose Mr A, Ms B, Trustee-A and Trustee-B are all acting together to exercise control (as is likely to be the case). In that case they are “treated in relation to that company as connected with one another.” Mr A is also connected with the company. They would similarly be connected with a subsidiary of the company. Mr A does not control the company.

80.15 Control in strict sense

This section considers the meaning of what I call “control in the strict sense”.³⁷

Section 995 ITA provides:

- (1) This section has effect for the purposes of the provisions of the Income Tax Acts which apply this section.
- (2) In relation to a body corporate (“company A”), “control” means the power of a person (“P”) to secure—
 - (a) by means of the holding of shares or the possession of voting power in relation to that or any other body corporate, or
 - (b) as a result of any powers conferred by the articles of association or other document regulating that or any other body corporate,that the affairs of company A are conducted in accordance with P’s wishes.
- (3) In relation to a partnership, “control” means the right to a share of more than half the assets, or of more than half the income, of the partnership.

³⁷ See 80.2.2 (Meaning(s) of “control”).

For corporation tax the equivalent definition is in s.1124 CTA 2010. The CT Manual provides:

80165. Arrangements - transfer of company to another group [May 2011]

... The test is whether a person is able to secure that the affairs of the company, including the business of the company as managed by its Board, are conducted in accordance with his wishes. Usually shareholders cannot dictate to or overrule the Board on management matters entrusted to the Board. So a necessary element of control is the ability to determine the composition of the Board, or failing that, to appoint directors who have the power to impose their decisions on directors appointed by any other shareholder.

The voting rights shareholders can exercise in general meetings will normally include the right to vote on the appointment and removal of directors. However, it is not safe to assume that possession of the majority of voting rights will bring automatic control of the Board. In *Irving v Tesco Stores (Holdings) Ltd* 58 TC 1, the claimant did not have Boardroom control of the surrendering company because:

- more than half of the directors were to be appointed by the minority shareholder and could not be removed without his consent, and
- the directors appointed by the claimant could not impose their decision on the directors appointed by the minority shareholder.

80170. Control [May 2011]

Section [995 ITA] does not define “control” merely in terms of direct shareholdings and voting rights in the company concerned. A person or persons have Section [995] control if they have power to secure that the affairs of the company are conducted in accordance their wishes. So you may have to consider:

- shareholdings and voting rights in any company, and also
- powers conferred by the documents regulating any company if these affect the “control” situation.

So, to determine whether relevant arrangements exist, you will need to consider:

- the Memorandum and Articles of Association of the company (and any other document regulating the company), and
- the various documents relating to loans made to the company.

Where a company other than the parent company holds shares, etc, you may also need to consider the shareholdings, etc, of that company.

The same point is made in Employee Share Schemes Unit Manual:

43210. Control of the scheme company [March 2009]

... “Control” for this purpose is defined as having the meaning given in Section 719 ITEPA 2003. This means having the power to secure that the affairs of the scheme company are conducted in accordance with its wishes.

Control will not necessarily be obtained simply because of the size of a share holding in the scheme company. Shareholders cannot ordinarily dictate to or overrule the Board of Directors in respect of matters of management entrusted to them. So a necessary element of control is (by voting powers or other powers) to have economic control of the company and the power of a person to secure that the affairs of the company are conducted in accordance with their long term wishes. The ability to determine the composition of the Board, or failing that, to appoint directors who have the power to impose their decisions on directors appointed by any other shareholder are indicators of control. Further information about Section 719 ITEPA 2003 is at CTM60210.

...

The Corporate Finance Manual provides:

35120. What is control? [January 2012]

Section 472 CTA 2009 gives the meaning of control. The test is whether a person can ‘secure that the company’s affairs are conducted in accordance with his wishes’. A person (an individual or company) can do this by

- holding most of the shares, or
- holding most of the voting rights in the company (or another company, such as the ultimate parent), or
- through any other powers, given through any document (such as the company’s Memorandum and Articles of Association).

Control through shares

A majority shareholding will usually ensure control, unless different classes of shares carry different voting rights. Share held on trading account and their voting rights are ignored for this purpose.

Control through voting rights: example

MK Ltd’s issued share capital is made up of

- ordinary shares, carrying one vote each
- 2,000 ‘A’ ordinary shares with no voting rights.

KB Ltd owns 800 ordinary shares.

JR Ltd owns 200 ordinary shares and 2,000 ‘A’ ordinary shares.

Although JR Ltd has the majority of the issued shares, KB Ltd has control because it has the majority of the shares with voting rights, and

can therefore use those voting rights to ensure that MK Ltd acts according to its wishes.

Control through other powers: example

AV Ltd owns 40% of the shares of BK Ltd, but it has the power, through BK Ltd's Articles, to appoint more than half of BK Ltd's board of directors. These directors will manage the business according to AV Ltd's wishes, so AV Ltd has control...

See Howard, "Remote Control" Taxation Practitioner, Sep 2011 p.45.

80.16 Why does it matter who is a participator?

The term "participator" is used throughout the Taxes Acts, and it is not practical to give a full list. For the purposes of this book, the term is particularly important in the following contexts:

- (1) The definition of "relevant person" for the ITA remittance basis.
- (2) Section 13 TCGA (non-resident company gains attributed to participators).
- (3) The test of whether trustees control a company.³⁸
- (4) The definition of "close company".

80.17 Definition of participator

Section 454(1) CTA 2010 provides a general statement:

For the purposes of this Part, "participator", in relation to a company, means a person having a share or interest in the capital or income of the company.

Section 454(2) CTA 2010 goes on to list five specific categories of participator:

In particular, "participator" includes—

- (a) a person who possesses, or is entitled to acquire, share capital or voting rights in the company,
- (b) a loan creditor of the company,

³⁸ See 80.12 (Company connected with trustees).

- (c) a person who possesses a right to receive or participate in
 - [i] distributions³⁹ of the company or
 - [ii] any amounts payable by the company (in cash or in kind) to loan creditors by way of premium on redemption,
- (d) a person who is entitled to acquire such a right as is mentioned in paragraph (c), and
- (e) a person who is entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for the person's benefit.

This is so wide that it is difficult to think of a case falling within (1) which is not within (2).

The definition is expressed to apply for the purposes of Part 10 CTA 2010, but it should be a taxes-act-wide definition. When the word participator is used in connection with close companies, the definition is almost always incorporated and where there is no definition it must be implied. Occasionally the definition is adopted with changes: s.454(6) CTA 2010 anticipates this:

This section does not affect any provision of this Part requiring a participator in one company to be treated as being also a participator in another company.

80.17.1 *Charge over shares*

Suppose a person has a charge over shares to secure a debt. The charge is an interest in the shares of the company, but not an interest in the capital or income of the company, and it is not in principle within any of the categories of s.454(2). Accordingly a chargee is not in principle a participator.

80.17.2 *Chain of wholly owned companies*

Suppose a chain of wholly owned companies:

³⁹ Section 454(4) CTA 2010 defines “distribution”: “In subsection (2) ‘distribution’ is to be construed without regard to section 1000(2) (extended definition of distribution for close companies).”

C Ltd is obviously a participator in D Ltd. But A and B Ltd are also participators in D Ltd, under s.454(2)(e) CTA 2010.⁴⁰ This is so wherever the companies are resident.

80.17.3 Chain of partly owned companies

Suppose a chain of partly owned companies which do not confer control, such as:

Example 1

Example 2

A is a participator in B Ltd. A does not control C Ltd⁴¹ and it is considered that A is not a participator in C Ltd. It might be argued that the rights of a minority shareholder are such that A is a participator within s.454(2)(e) - ie that A has the right to secure that the income of C Ltd is applied for A's benefit. I refer to this as the wide view. But this is very doubtful and in practice it appears that HMRC do not take the wide view. Section 455(5) CTA 2010 provides a wider than standard definition of "participator":

⁴⁰ This view is not universally held.

⁴¹ In the absence of special facts, eg provisions in the company articles or shareholder agreements.

If a company (C) controls⁴² another company (D), a participator in C is to be treated for the purposes of this section as being also a participator in D.⁴³

This applies in a few specific circumstances, in particular:

- (1) For the definition of relevant person in the ITA remittance basis.⁴⁴
- (1) For s.1064 CTA 2010 (extended meaning of “distribution” for close companies.)
- (2) For s.455 CTA 2010 (loans to participators).

The CT Manual provides:

60110 Participator: Extended meaning of [November 2011]

... If, for example, Company B holds all the issued share capital of Company T and Company T makes a loan to W, a shareholder in Company B, that loan is within [s.455 CTA 2010] since W as well as being a participator in Company B is deemed also to be a participator in Company T.

This example is essentially example 2 above. It assumes that the wide view is not correct; that is why the extended definition of “participator” is needed.

80.17.4 *Trustees and beneficiaries*

Suppose trustees hold a share or interest in a company. The trustees are participators under s.454(1) CTA 2010. A person holding a share or interest as trustee is not a participator in their personal capacity since trustees are (at least for IT and CGT purposes) deemed to be a separate person. Beneficiaries of the trust, other than merely discretionary beneficiaries, are also clearly participators under s.454(1) since they too have an interest in the trust property. HMRC agree. The CT Manual provides:

60160. ‘Interested in’ [February 2006]

The words ‘interested in’ have a wide meaning and, for example, where shares are held by trustees, the trustees, the beneficiaries and the

42 The ultra-wide definition of “control” applies: see 80.3 (Control in ultra-wide sense).

43 This provision is also found in s.459(4) CTA 2010.

44 See 10.4.1 (“Participator”).

remainderman (if any) of the trust are interested in the shares. Where shares are held by trustees under a will for persons in succession, the life tenant and the remainderman, as well as the trustees, are interested in the shares. (See, in this connection, *IRC v Park Investments* 43 TC 200, particularly the judgment of Danckwerts LJ at page 225, *IRC v Tring Investments* 22 TC 679, and *Alexander Drew and Sons v IRC* 17 TC 140.)

As to whether a person holding as nominee is a participator in their private capacity, see *Bramwell on Corporation Tax* (looseleaf) para A.11.1.16.

What about beneficiaries of a discretionary trust? The question is whether they have an “interest” in the company. The general rule is that the word “interest” is ambiguous and may or may not be taken to include the rights of a discretionary beneficiary: the context must decide the question; see *Leedale v Lewis* 56 TC 501. The difficulty is that the concept of participator is used in many contexts, and the definition section itself does not offer much context. *Bramwell on Corporation Tax* takes the view that beneficiaries of a discretionary trust are participators, and for practical purposes it would be safest to proceed on the basis that that may well be correct.

80.17.5 *Personal representatives and beneficiaries of estates*

Suppose PRs hold shares in a company. The PRs are participators under s.454(1) CTA 2010.

A person holding shares as PR is not a participator in their private capacity for CGT purposes as for CGT the PRs are deemed to be a separate person. The Tribunal has reached the same conclusion for IT purposes even in the absence of a provision expressly deeming PRs to be a separate person.⁴⁵

45 *Harris v HMRC* [2010] UKFTT 385 at [31]: “There must be a distinction between a benefit being received by an individual beneficiary and a benefit being received, albeit by the same person, in a representative capacity.... Otherwise a different result would obtain depending on whether the residuary beneficiaries were the same persons as, or different persons from, the personal representatives.” However *Bibby v IRC* 29 TC 167 was not cited.

Beneficiaries of the estate are not participators under s.454(1) since they do not have a legal or equitable “interest” (in the strict sense) in the assets of the estate. However they are participators under s.454(2)(a)(c)(d) by virtue of their right to compel administration of the estate.

The CT Manual provides:

60160. ‘Interested in’ [February 2006]

...The executors or administrators are interested in the assets of a deceased person’s estate during the period of administration (*Willingale v Islington Green Investment* 48 TC 547). The beneficiaries should be regarded as interested in any assets of the estate from which they may benefit.

80.17.6 “*Entitled to do*”

Section 454(3) CTA 2010 provides:

For the purposes of subsection (2), a person is treated as entitled to do anything which the person—

- (a) is entitled to do at a future date, or
- (b) will at a future date be entitled to do.

The CT Manual provides:

60120. Entitled to acquire or secure [November 2011]

The words ‘entitled to acquire’ and ‘entitled to secure’ introduce the concept of a potential participator. So, for example, a person is a participator if, by means of a contractual right or by rights arising under a trust deed, they can:

- require a shareholder to transfer shares to that person, or
- secure the issue to that person of unissued capital of the company, or
- secure that if the company makes a distribution or if a loan is redeemed by the company at a premium, that person has a share in the distribution or the premium.

Similarly, a person is a participator if by means of a contractual right or some other arrangement they can secure that income or assets of the company will be applied directly or indirectly for their benefit. See too 80.3.7 (“Entitled to acquire”).

80.18 Loan Creditor

80.18.1 *Why does it matter who is a loan creditor?*

The expression is used too often to set out a full list, but in particular:

- (1) A loan creditor is a participator.
- (2) The expression is used in the definition of close company.

80.18.2 *Definition of loan creditor*

Section 453 CTA 2010 provides:

- (1) For the purposes of this Part, “loan creditor”, in relation to a company, means a creditor—
 - (a) in respect of any debt within subsection (2), or
 - (b) in respect of any redeemable loan capital issued by the company.

But this is subject to subsection (4).

- (2) Debt is within this subsection if it is incurred by the company—
 - (a) for any money borrowed or capital assets acquired by the company,
 - (b) for any right to receive income created in favour of the company, or
 - (c) for consideration the value of which to the company was (at the time when the debt was incurred) substantially less than the amount of the debt (including any premium on the debt).

The CT Manual paraphrases this provision and continues:

60130. Loan creditor [November 2011]

A person is not a participator merely because he or she is a normal trade creditor of the company.

As the normal debenture issued by a company is redeemable, debenture holders are participators.

Payments to be made under a hire purchase agreement would not normally be regarded as part of the company’s loan capital. This is because under the usual hire purchase agreement there will be no debt for capital assets acquired by the company. The terms of the typical agreement make it clear that the assets remain in the ownership of the hire company until the final instalment is paid. The payments not made in order to acquire a capital asset, but rather they are rent for the use of

the asset.

An example of a sum owing in the circumstances described in [s.453(2)(b)] is where a person contracts to make annual payments to the company, in return for a capital sum due at some later date. The capital sum is treated as loan capital of the company and the person will be a participator.

... It should be borne in mind that [s.1000 CTA 2010] provides that the interest etc on certain loans is a distribution. As regards such loans, the creditor is in any case a participator as he or she ‘possesses a right to receive or participate in distributions of the company’ (see [s.454(2)(c)]).

80.18.3 *Interest in debt*

Section 453(3) CTA 2010 provides:

(3) A person who—

- (a) is not the creditor in respect of any debt or loan capital to which subsection (1) applies, but
 - (b) has a beneficial interest in that debt or loan capital,
- is, to the extent of that interest, treated for the purposes of this Part as a loan creditor in respect of that debt or loan capital (but this is subject to subsection (4)).

The words “to the extent of that interest” are not well expressed, since a person either is or is not a loan creditor. One cannot be a loan creditor “to an extent”. But it does not matter.

80.18.4 *Bank creditor*

Section 453(4) CTA 2010 provides:

A person carrying on a business of banking is not treated as a loan creditor in respect of any debt or loan capital incurred or issued by the company for money lent by the person to the company in the ordinary course of that business.

The CT Manual provides:

60130. Loan creditor [November 2011]
Banking business

[The manual summarises the provision and continues:] Where a company has borrowed money from a person, that person is a participator unless the person carries on the business of banking and made the loan in the ordinary course of that business (Section 453(4) CTA 2010 (formerly Section 417(9) ICTA 1988). There is no statutory definition of what constitutes carrying on a banking business (the definition of bank in Section 1120 CTA 2010 (formerly Section 840A ICTA 1988) does not apply to Section 453 CTA 2010 (formerly Section 417 ICTA 1988)) so we rely instead on the common characteristics of banking established in the (non-tax) case of *United Dominions Trust Ltd v Kirkwood* 1966 2 QB 431 and endorsed in *Hafton Properties Ltd v McHugh* 59TC420.

If you have any queries on whether a person is carrying on a business of banking, or whether a loan is made in the ordinary course of that business, please consult CTIAA (Technical).

80.19 Close company: Introduction

“Close” company is a concept used so often in tax legislation that it is impossible to write a full list. For the purposes of this book, the concept is important in particular in the definitions of relevant person (for remittances); connected person, and for the application of s.13 TCGA.

“Close company” is one of the most elaborately defined expressions in the taxes acts, and that is really saying something. There are two main tests of close, the control test and the winding up test.

The definition in the CTA is for the purposes of the corporation tax acts. This is extended to income tax by s. 989 ITA:

The following definitions apply for the purposes of the Income Tax Acts—

“close company” is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act)

The definition is extended to CGT by s.288(1) TCGA:

In this Act, unless the context otherwise requires—

“close company” shall be construed in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439)

80.20 Control test

Section 439(1) CTA 2010 provides:

For the purposes of the Corporation Tax Acts, a “close company” is a company in relation to which condition A or B is met.

I refer to “**close company conditions A and B**” to avoid confusion with the myriad other conditions in the CTA.

80.20.1 *Close company condition A: Control of five or fewer participators*

Section 439(1) CTA 2010 provides:

Condition A is that the company is under the control—

- (a) of 5 or fewer participators, or
- (b) of participators who are directors

Control has the ultra-wide sense.

80.20.2 *Control of participators who are directors*

This takes us to the idiosyncratic definition of director in s.452 CTA 2010:

- (1) In this Part, “director”, in relation to a company, includes—
 - (a) a person occupying the position of director of the company, by whatever name called,
 - (b) a person in accordance with whose directions or instructions the directors of the company are accustomed to act, and
 - (c) a person within subsection (2).

(1)(a)(b) are standard form; but (c) leads to a distinctly non-standard extension:

- (2) A person (P) is within this subsection if P—
 - (a) is a manager of the company or otherwise concerned in the management of the company’s trade or business, and

- (b) is—
 - (i) the beneficial owner of, or
 - (ii) directly or indirectly able to control,
 at least 20% of the ordinary share capital of the company.
- (3) For the purposes of subsection (2)(b), P is treated as owning or controlling (as the case may be) what any associate of P owns or controls.

A company controlled by director-participants is a close company, even if the number of director-participants exceeds five. Directors have “control” of a company if (*inter alia*) they exercise direct or indirect control over the company’s affairs. This is puzzling as (under standard articles)⁴⁶ company law directors manage the business of the company, and may exercise all the powers of the company. In one sense, directors always control their company. It cannot be that every company whose directors happen to be participants is made a close company under this part of the definition. The answer is that “control” here means control at shareholder level, the ability to pass an ordinary resolution in general meeting. Directors do not “control” a company, in the relevant sense, unless they control the company at that level.⁴⁷

It follows that a charitable company is normally close if its directors constitute all or a majority of the members of the company.⁴⁸

As to whether a foundation is a close company, see

The CT Manual gives some examples:⁴⁹

46 The Companies (Model Articles) Regulations 2008 Model Article para 3; (formerly Table A paragraph 70.)

47 *Steele v EVC International* 69 TC 88 at p.127. See Venables, *The Taxation of Foundations* (2010) para E2.1.4.3 (Direct or Indirect Control over the Company’s Affairs).

48 For example, an Oxford college (a body corporate) may be a close company, since:

- (1) Its fellows may be “participants”, if they possess voting rights in the body corporate.
- (2) Its fellows manage the business of the body corporate, so they are (in principle) “directors”.
- (3) Its fellows control the body corporate, at shareholder level (or more accurately, at corporate member level).

It appears that HMRC do not take this point in practice.

49 In these examples I omit internal Manual cross references and alter the formatting for increased clarity.

60420 Examples

The examples refer to companies having shares that are not dealt in or quoted on a stock exchange.

Example 1

Company X has 1,000 issued shares of £1 held as below.

Trustees of A's settlement	449
Mrs A (settlor)	60
Ten other shareholders	<u>491</u>
Total issued ordinary shares	<u>1,000</u>

The ten shareholders are not associated with each other or with A or Mrs A and no one of them holds more than 50 shares.

The trustees of A's settlement are associates of Mrs A by virtue of Section 417(3)(b) ICTA 1988, and their rights and powers may be attributed to Mrs A who therefore controls the company.

Company X is therefore a close company.

This is correct, but it is not necessary to rely on the associates rule. The company would be close even if Mrs A were not the settlor since it is under the control of two (less than five) persons. The Manual continues:

Example 2

The £1 issued shares in a trading company are owned as follows.

Ordinary shares

Directors

A	4
B (cousin of A)	4
Others	

12 individuals equally, none of whom is a nominee associate, etc, of any other shareholder

	<u>4,992</u>
Total issued ordinary shares	5,000

5% preference shares

A (see above)	<u>5,000</u>
---------------	--------------

Total nominal and issued capital	<u>10,000</u>
---	---------------

There are no loan creditors ranking as participators or members.

Control by reference to possession of the greater part of the issued share capital (Section 416(2)(a) ICTA 1988).

The company is a close company because A possesses more than half the issued capital.

Example 3

The issued ordinary shares in a trading company carry one vote each but the 'A' ordinary shares do not confer voting rights. The shareholders are as below.

	Ordinary	'A' ordinary
A	280	
Wife of A	100	
B (brother of A)	10	

Trustees of A's settlement	40	
Company X (controlled by A)	<u>80</u>	
	510	
Mrs C (daughter of B)	20	
10 other equal holdings	<u>470</u>	<u>500</u>
Total issued shares	<u>1,000</u>	<u>500</u>

The shares carry equal rights to dividend. A's wife has made a loan of £20,000 to the company at 5% interest. There is no share premium account or other comparable account.

Control by voting rights (Section 416(2)(a) ICTA 1988).

The associates of A are:

1. his wife and his brother, (Section 417(3)(a) and (4) ICTA 1988, and
2. the trustees of A's settlement, (Section 417(3)(b) ICTA 1988.

The rights and powers attributable to A are:

- a. the rights and powers of his associates Section 416(6) ICTA 1988, and
- b. the rights and powers of Company X Section 416(6) ICTA 1988.

As a total of 510 votes are thus possessed by A or attributable to him, the company is a close company controlled by one person.

This is correct, but it is not necessary to rely on the associates rule. The company would be close even if none of the shareholders were associates, since it is under the control of five participators. A's wife's loan is wholly irrelevant and it is difficult to see why the example mentions it.

Alternatively control by holding the greater part of the issued share capital, (Section 416(2)(a) ICTA 1988, - any eight of the other equal holdings will control the company by holding the greater part of the issued share capital.

I do not understand this comment. Perhaps the text of the example is corrupt.

Example 4

The authorised and issued share capital of Company X is £1,000 in the form of 1,000 ordinary shares of £1 each, held as below.

A	200
B	100
C	50
D	50
E	40
Company Y	99
Other shareholders	<u>461</u>
Total issued ordinary shares	<u>1000</u>

A, B and C are directors.

The issued capital of Company Y, is £100 in the form of 100 ordinary shares of

£1 each, held by:

F (son of E)	60
G	<u>40</u>
Total issued shares	<u>100</u>

The shareholders in Company X, other than Company Y, are all individuals and none are related or otherwise associated. No 'other shareholder' holds more than 50 shares.

Control - the rights in the shares held by Company Y in Company X may be attributed to F who controls that company (Section 416(6) ICTA 1988).

F is an associate of E but the rights attributed to F cannot be further attributed to E (Section 416(6) ICTA 1988).

No group of five participators or fewer can control Company X, nor do the director/participators control, and nor would the winding up test be of assistance here.

Company X is not a close company.

Example 5

The facts are the same as in Example 4 except that F is the holder of one share in Company X.

Control rights can be attributed to F as below.

Shares held in own right	1
Shares held by E (an associate)	40
Shares held by Company Y (controlled by F)	<u>99</u>
	<u>140</u>

Thus A, B, C, D and F hold (or have attributed to them) the rights in 540 shares and control the company.

Company X is a close company.

This example neatly illustrates the arbitrary nature of the rules. At the margin, there is obviously some scope for tax planning.

Example 6

Company X has authorised capital of £5,000 in £1 ordinary shares of which £3,000 is issued as below.

A	150
B	150
C	150
D	250
E	250
F	250
20 other shareholders (no one holder having over 100 shares)	<u>1800</u>
Total issued ordinary shares	<u>3000</u>

The 20 other shareholders are individuals and none of the shareholders is an associate of any other. A, B and C are the directors. They each enter into a

service agreement providing that they are to remain directors⁵⁰ for five years from 1 January 1992, and that on 31 December 1996, they shall each have the right to purchase 500 £1 shares in the company at par.

Control - A, B and C each exercises or is entitled to acquire rights in 650 shares (Section 416(2)(a) ICTA 1988 and Section 416(4) ICTA 1988).

Thus A, B, C, D and E (or A, B, C, D and F, or A, B, C, E and F) together constitute a group which is 'able to exercise or is entitled to acquire, control' of the company (with 2,450 shares out of 4,500, i.e. the 3,000 issued plus the 1,500 to be issued to the directors).

The company is a close company from 1 January 1992.

Example 7

The authorised and issued capital of an investment company is £33,000 and is owned equally by eleven individuals who are not associated. The loan creditors are:

A (director and shareholder)	£35,000
B (not a shareholder)	£13,500

Neither A nor B is a bank. B is not an associate of a director.

In a winding up, the value of the net assets distributable among members, including loan creditors, would be £120,000 as below.

Deposits with local authorities	£30,000
Market value of quoted investments (representing the remainder of the assets)	£110,000
	<u>£140,000</u>
Deduct sundry creditors	
Management expenses	£300
Bank overdraft	£19,700
Value of net assets	<u>£120,000</u>

Control - the company cannot be shown to be controlled by five or fewer participators under Section 416(2)(a) or (b) ICTA 1988. In a liquidation, the assets would, however, be distributed as below.

A as loan creditor	£35,000
B loan creditor	£13,500
Shareholders (£6,500 each)	<u>£71,500</u>
Value of net assets	<u>£120,000</u>

More than half of this sum would be received by three persons, that is:

A (£35,000 plus £6,500)	£41,500
B	£13,500
Any shareholder other than A	<u>£6,500</u>
Distribution to three persons	<u>£61,500</u>

The company is therefore a close company by reference to Section 416(2)(c) ICTA 1988 because the inclusion of loan creditors as participators shows that it is controlled by three participators.

⁵⁰ The right to remain directors is irrelevant to the tax analysis.

80.21 Close company condition B: winding-up test

Condition B provides for a case where the participators have rights which do not confer control. Section 439(3) CTA 2010 provides:

- (3) Condition B is that 5 or fewer participators, or participators who are directors, together possess or are entitled to acquire—
 - (a) such rights as would, in the event of the winding up of the company (“the relevant company”) on the basis set out in section 440, entitle them to receive the greater part of the assets of the relevant company which would then be available for distribution among the participators, or
 - (b) such rights as would, in that event, so entitle them if there were disregarded any rights which any of them or any other person has as a loan creditor (in relation to the relevant company or any other company).

The CT Manual provides:

60320 Rights in a winding-up [November 2011]

The tests so far considered in determining whether a company is a close company have depended on the question of control. With effect from 1 April 1989 there is a further test, in which control is irrelevant, based on rights in a winding-up. It is in Section 444 to 449 CTA 2010 and provides that a company ('the relevant company') is close if five or fewer participators, or participators who are directors, together possess or are entitled to acquire such rights as would, in the event of the winding-up of the company, entitle them to receive the greater part of the company's assets then available for distribution among the participators. By reason of Section 451 (4) to (6) CTA 2010 (formerly Section 416(6) ICTA 1988) there is attributed to any participator all the rights of his associates.

This test is applied first on the basis that loan creditors are included as participators and then on the basis that they are disregarded. The company is close if it satisfies the test on either basis.

Section 440 CTA 2010 sets out the basis of the notional winding-up:

- (1) This section applies for the purposes of section 439(3).
- (2) In the notional winding up of the relevant company, the part of the

assets available for distribution among the participators which any person is entitled to receive is the aggregate of—

- (a) any part of those assets which the person would be entitled to receive in the event of the winding up of the relevant company, and
 - (b) any part of those assets which the person would be entitled to receive if—
 - (i) any other company which is a participator in the relevant company and is entitled to receive any assets in the notional winding up were also wound up on the basis set out in this section, and
 - (ii) the part of the assets of the relevant company to which the other company is entitled were distributed among the participators in the other company in proportion to their respective entitlement to the assets of the other company available for distribution among the participators.
- (3) In the application of subsection (2)—
- (a) to the notional winding up of the other company mentioned in paragraph (b) of that subsection, and
 - (b) to any further notional winding up required by that paragraph (or by any further application of that paragraph),
- references to “the relevant company” are to be read as references to the company concerned.

Section 441 CTA 2010 provides:

- (1) The following provisions apply for the purpose of determining whether under subsection (3) of section 439 five or fewer participators, or participators who are directors, together possess or are entitled to acquire rights such as are mentioned in paragraph (a) or (b) of that subsection.
- (2) A person is to be treated as a participator in or director of the relevant company if the person is a participator in or director of any other company which would be entitled to receive assets in the notional winding up of the relevant company on the basis set out in section 440.
- (3) No account is to be taken of a participator which is a company unless the company possesses or is entitled to acquire the rights in a fiduciary or representative capacity.
- (4) But subsection (3) does not apply for the purposes of section 440.

CT Manual provides:

60320 Rights in a winding-up [November 2011]

If in the course of the deemed winding-up of the relevant company assets would be received by a participator which is a company, we proceed on the basis that the corporate participator is itself wound-up and that the assets it received from the winding-up of the relevant company are distributed to its own participators in proportion to their respective entitlement to the assets of that corporate participator. If in the course of that deemed winding-up assets would be received by a further company the process is repeated. The process continues to be repeated until all of the assets of the relevant company are distributed to individuals (with the exception referred to below). The effect is that we ‘look through’ all participators which are companies.

The exception to this looking through is any company whose rights are possessed purely in a fiduciary or representative capacity. These stand with the individual participators in determining whether five or fewer participators would be entitled to receive the greater part of the assets available for distribution.

For the purposes of this test, then, the assets of the relevant company which would be distributed to any participator are the sum of what he would receive directly from the winding-up of that company plus what he would receive indirectly through the winding-up of participators which are companies.

For the purposes of this provision a person is treated as a participator in the relevant company if he is a participator in any company itself entitled to receive assets, directly or indirectly, in the winding-up of the relevant company.

80.22 Exceptions to close company test

80.22.1 *Non-resident close company*

Section 442 CTA 2010 sets out three exceptions to the general rule:

A company is not to be treated as a close company if—
(a) it is non-UK resident

A note on terminology. The rule that only a UK resident company counts as a close company is often disapplied. There are three different drafting techniques used to achieve this:

- (1) Statute most often makes provisions which apply to a company “which would be a close company if it were resident in the UK”.

- (2) Statute sometimes uses the term “qualifying company” defined to mean a close or a non-resident close company.⁵¹
- (3) Statute sometimes redefines the term “close company” to include a non-resident close company.⁵²

There is no consistency of terminology across tax legislation; perhaps that is too much to expect. In this book I refer to such a company as “**a non-resident close company**” which I think is the clearest term.

80.22.2 *Industrial & provident society or building society*

For completeness: s.442 CTA 2010 provides:

A company is not to be treated as a close company if ...

- (b) it is a registered industrial and provident society, or
- (c) it is a building society.

80.22.3 *Company controlled by the Crown*

Section 443 CTA 2010 provides:

- (1) A company is not to be treated as a close company as a result of section 439(2) if it is controlled by or on behalf of the Crown.
- (2) A company is “controlled by or on behalf of the Crown”, for the purposes of this section, if it is under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person.
- (3) But a company is not controlled by or on behalf of the Crown, for the purposes of this section, if it is a close company as a result of being under the control of persons acting independently of the Crown.

EN CTA 2010 provides:

1340. The [words *as a result of section 439(2)*] leave it open for a company controlled by or on behalf of the Crown to be a close company if condition B in section 439(3) is met. Section 439(3) is based on

51 For examples see 48.8.1 (“Qualifying company”); 75.32.1 (Trust made by company: s.86 definition of settlor).

52 See 58.16 (Transfer of value by close company).

section 414(2) of ICTA.

1341. The italicised words also leave it open for a company controlled by or on behalf of the Crown to be a close company if condition A in section 439(2) is satisfied by reference to persons acting independently of the Crown. See subsection (3).

1342. In short, section 414(1)(c) of ICTA is a qualified exception to section 414(1) of that Act but not an exception to section 414(2) of that Act.

The CT Manual provides:

60270 Control: By the Crown [September 2011]

A company is to be treated as controlled by or on behalf of the Crown (and therefore not a close company) if, and only if, it is by any of the control tests under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person. If, however, it can be shown that under some other control test:

- five or fewer participators, or
- participators who are directors,

control the company and those participators (or director/participators) act independently of the Crown, the company is a close company.

The Crown for this purpose includes any Minister, Government Department or other person acting on behalf of the Crown.

60280. Control: Overseas governments and local authorities [September 2011]

A company should not be treated as a close company if the only persons who can be taken to have control of that company are any of the following:

- Overseas governments.
- The Crown Agents for Overseas Governments and Administrations.
- Local authorities or local authority associations exempt from tax under Section 984 CTA 2010 (formerly Section 519 ICTA 1988) (see CTM40850 onwards).

Nor should a company be treated as a close company if the only persons who can be taken to have control of that company are any of the above together with:

- a company or companies resident in the UK which are not close, or
- an overseas company or companies which, if resident in the UK, would not be close.

80.22.4 *Control by open company*

The next, important, exception concern companies controlled by open (ie non-close) companies. Section 444 CTA 2010 provides:

- (1) A company is not to be treated as a close company if condition A or B is met.
- (2) Condition A is that the company—
 - (a) is controlled by one or more companies none of which is a close company, and
 - (b) cannot be treated as a close company except by taking, as one of the 5 or fewer participators requisite for its being so treated, a company which is not a close company.
- (3) Condition B is that the company—
 - (a) would not be a close company were it not for paragraph (a) of section 439(3) or paragraph (d) of section 450(3), and
 - (b) would not be a close company if the references in those paragraphs to participators did not include loan creditors which are companies other than close companies.
- (4) References in subsections (2) and (3) to a close company include a company which, if UK resident, would be a close company.

The CT Manual provides:

60290 Control: By another company [September 2011]

A company is not to be treated as a close company where:

- the company is controlled ... by an open company, or by two or more open companies, and
- it cannot be treated as a close company ... except by including an open company in the group of five or fewer participators.

A company is also not to be treated as a close company where:

- the company can only be shown to be close under the control test in Section 450(3)(d) CTA 2010 (formerly Section 416 (2)(c) ICTA 1988) (entitlement to receive the greater part of the assets in a winding-up, etc, see CTM60230), and
- the company would not be close under the control test if the reference to 'participators' in Section 450 (3) excluded loan creditors who are open companies.

Where, in considering the above, you have to take into account a company not resident in the UK, the non-resident company is to be treated as a close company if, were it resident in the UK, it would be such a company.

60300 Open company loan creditor

A company is not to be treated as a close company if:

- i) it is only close by virtue of the control test in Section 450 (3)(d) CTA 2010 (formerly Section 416 (2)(c) ICTA 1988 (see CTM60220) or the 'winding- up' test in Section 439 (3)(a) CTA 2010 (formerly Section 414 (2)(a) ICTA 1988)) (see CTM60320), and
- ii) it would not be close if, for the purposes of those tests, open companies were not regarded as participators in respect of their interests in the company as loan creditors.

In arriving at the amount available for distribution among the participators, any amount due to an open company as a loan creditor (including any amount due to it as a holder of loan capital) may be disregarded if the result is that the company ceases to be close (Section 414(5)(b) ICTA 1988).

If the open company loan creditor also holds shares in the company, it will remain a participator in respect of that holding and any amount which would be distributed to it in respect of those shares should be taken into account for the purposes of Section 416(2)(c) and Section 414(2)(a).

80.23 Pension schemes

Section 445 CTA 2010 provides:

- (1) If shares in a company (“C”) are held on trust for a registered pension scheme, the persons holding the shares are to be treated, for the purposes of section 444(2) and (3)—
 - (a) as the beneficial owners of the shares, and
 - (b) in that capacity, as a company which is not a close company.
- (2) But subsection (1) does not apply if the scheme is established wholly or mainly for the benefit of—
 - (a) directors, employees, past directors or past employees of a company within subsection (3), or
 - (b) dependants of an individual within paragraph (a).
- (3) The companies within this subsection are—
 - (a) C,
 - (b) an associated company of C,
 - (c) a company which is under the control of—
 - (i) a director of C,
 - (ii) an associate of a director of C, or
 - (iii) two or more persons each of whom is such a director or

- associate, and
- (d) a close company.

The CT Manual summarises this and provides:

60290 Control: By another company [September 2011]

The broad effect of the above conditions is that the fund or scheme must be one established for the benefit of employees, etc, of an unrelated company which is not close. A joint fund for the benefit of employees of two or more companies is not disqualified if the majority of the beneficiaries are or were employees of qualifying companies or are dependants of such employees.

80.24 Quoted company exemption

Section 446 CTA 2010 provides:

(1) A company is not to be treated as a close company at a particular time if—

- (a) shares in the company carrying at least 35% of the voting power in the company have been allotted unconditionally to, or acquired unconditionally by, and are at that time beneficially held by, the public, and
- (b) any such shares have within the preceding 12 months been the subject of dealings on a recognised stock exchange, and the shares have within those 12 months been listed on such an exchange.

(2) But subsection (1) does not apply to a company at any time when the total percentage of the voting power in the company possessed by all of the company's principal members exceeds 85%.

(3) For the purposes of this section, a person is a principal member of a company if the person possesses a percentage of the voting power in the company of more than 5% (but see subsection (4)).

(4) If there are more than 5 persons within subsection (3), a person is a principal member of the company only if—

- (a) the person is one of the 5 persons who possess the greatest percentages, or
- (b) in a case where there are no such 5 persons because two or more persons possess equal percentages of the voting power in the company, the person is one of the 6 or more persons (including those two or more who possess equal percentages) who possess the greatest percentages.

(5) In determining for the purposes of this section the voting power which a person possesses, there is to be attributed to the person any voting power which would be attributed to the person if section 451(3) to (6) applied for the purposes of this section.

(6) In this section “shares”—

- (a) include stock, but
- (b) do not include shares entitled to a fixed rate of dividend, whether with or without a further right to participate in profits.

The CT Manual provides:

60310 35% or more voting power held by public [November 2011]

... The total voting power for the purpose of (i) and (ii) above is that of all the issued shares (or stock) including that of shares, etc, entitled to a fixed dividend, etc, which are excluded under (i) above in determining the voting power in the hands of the public. ...

1. Where the company holding the shares loses its beneficial interest on commencement of winding-up (see CTM36125) you should not normally contend that a company which was not close before the commencement of that winding-up, thereby becomes a close company.

2. Shares beneficially held by an authorised unit trust (see CTM48200 onwards) are to be regarded as beneficially held by a company which is not a close company unless five or fewer persons hold more than half of the units issued by the trust. In determining the number of units held by a person, there should be attributed to him or her any units held by his or her associates (see CTM60150) or by his or her nominees or by any company (or companies) of which he/she has, or he/she and his associates have, control.

80.24.1 “*Held by the public*”

Section 447 defines “shares beneficially held by the public”:

(1) For the purposes of section 446, shares in a company (C) are beneficially held by the public if they are—

- (a) beneficially held by a UK resident company which is not a close company, or by a non-UK resident company which would not be a close company if it were UK resident,
 - (b) held on trust for a registered pension scheme, or
 - (c) not comprised in a principal member’s holding.
- (2) But shares are not beneficially held by the public if they are held—

- (a) by a director of C,
 - (b) by an associate of such a director,
 - (c) by a company which is under the control of one or more persons each of whom is such a director or associate,
 - (d) by an associated company of C, or
 - (e) as part of a fund the capital or income of which is applicable or applied wholly or mainly for the benefit of any of individuals within subsection (3).
- (3) Those individuals are—
- (a) employees, directors, past employees or past directors of C or of any company within subsection (2)(c) or (d), and
 - (b) dependants of any individuals within paragraph (a).
- (4) The reference in section 446(1) to shares which have been allotted unconditionally to, or acquired unconditionally by, the public is to be read in accordance with subsections (1) to (3).
- (5) For the purposes of subsection (1), a principal member's holding consists of the shares which carry the voting power possessed by him.
- (6) The reference in subsection (2) to shares held by any person includes shares the rights or powers attached to which would be attributed to the person if section 451(3) applied for the purposes of that subsection.
- (7) Subsections (3) to (5) of section 446 (meaning of "principal member" and determination of voting power possessed) apply for the purposes of this section as they apply for the purposes of that section.
- (8) In this section, "shares" includes stock.

The CT Manual provides:

CTM60310 35% or more voting power held by public [November 2011]

Where a company in [s.315(5)(b)(c)] above loses its beneficial interest in the shares, etc, on commencement of winding-up (see CTM36125) you should not normally accept that a company which was close before the commencement of that winding-up, thereby ceases to be close. ... For the purpose of (b)(iii) above, shares held in accordance with (b)(i) or (ii) above are deemed to be beneficially held by the public (provided that they are not excluded by (c) above) even if they are comprised in a principal member's holding.

The CT Manual para 60420 provides two simple examples of the quoted company exemption:

60420 Examples [November 2011]

Example 8

The issued ordinary capital of a trading company (other issued capital having no voting rights) is held as below.

Company A (not a close company)	280
Company B (a close company)	270
Company C (not a close company)	230
D (director)	40
E (director)	30
F (an individual)	30
20 others	<u>120</u>
Total issued ordinary shares	<u>1,000</u>

Control -the requirements of CTA2010/S444 (2) (a) (formerly ICTA88/S414 (5)(a)(i)) (see (a) of CTM60290) are regarded as satisfied because, upon one combination of shareholdings, control is in the hands of Company A and Company C, even though by other combinations a controlling group which includes only one of those companies may be established. The company is not a close company if the requirements of CTA2010/S444 (2) (b) (formerly ICTA88/S414 (5)(a)(ii)) are also satisfied, that is, if none of the control tests enables control by five or fewer participators to be established without including a non-close company among those participators, and the company is not controlled by its directors and cannot be shown to be close on the or winding up test (CTM60320) without including a non-close company among the five or fewer participators (see, however, Example 9 below).

Example 9

The ordinary shares are held as in Example 8. G, an individual, holds redeemable loan stock and would receive in a winding-up more than half of the assets available for distribution among the participators.

Control - as G is in control of the company by reference to CTA2010/S450 (3) (d) (formerly ICTA88/S416 (2)(c)) (see CTM60230), the requirements of CTA2010/S444 (3) (formerly ICTA88/S414 (5)(b)) are not met and, irrespective of the control by open companies, the company is a close company.

CHAPTER EIGHTY ONE

PERMANENT ESTABLISHMENT AND BRANCH/AGENCY

81.1 Why does permanent establishment matter?

It is not practical to set out a complete list of the significance of PE for tax, but the following are the most important.

In the absence of a PE, a non-resident company trading in the UK is subject to income tax on its income. A company trading through a PE is subject to corporation tax. Section 5 CTA 2009 provides:

- (1) A UK resident company is chargeable to corporation tax on all its profits wherever arising.
- (2) A non-UK resident company is within the charge to corporation tax only if it carries on a trade in the UK through a permanent establishment in the UK.¹

In the absence of a PE, a non-resident company is not subject to CGT. A company trading in the UK through a PE is subject to corporation tax on its chargeable gains. Section 10B TCGA provides:

- (1) Subject to any exceptions provided by this Act, the chargeable profits for the purposes of corporation tax of a company not resident in the UK but carrying on a trade² in the UK through a permanent establishment there include chargeable gains accruing to the company on the disposal of—
 - (a) assets situated in the UK and used in or for the purposes of the trade at or before the time the gain accrued, or

¹ The drafting is based on article 7 of the OECD Model Convention.

² For completeness, s.10B(4) TCGA defines “trade” to include an office, but in practice this will not often be significant.

- (b) assets situated in the UK and used or held for the purposes of the permanent establishment at or before the time the gain accrued or acquired for use by or for the purposes of the permanent establishment.
- (2) Subsection (1) does not apply unless the disposal is made at a time when the company is carrying on a trade in the UK through a permanent establishment there. ...

PE is relevant for double tax treaties. In particular, art. 7(1) OECD model treaty provides:

The profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.

Last but not least, PE of a corporate trustee is relevant to trust residence.

If a non-resident *individual* or trustee is carrying on a trade in the UK, their UK tax position is not affected whether or not they are carrying on their trade through a PE but the PE may be relevant for a DTA and will normally constitute a branch/agency.

PE and branch/agency (or very similar concepts) are also relevant for many non-tax purposes, such as civil jurisdiction.

81.1.1 *Carrying on business through a branch or agency*

The statutory provisions refer to a company carrying on a trade through a PE, so one might think that there are two distinct questions:

- (1) whether a PE exists
- (2) whether the company is carrying on business through the PE.

However PE is defined as “a fixed place of business through which the business of the company is carried on”; so if a company owns (say) an office building which it does not use (or which it does not use for its business) then strictly the office building is not a PE at all.

81.1.2 *Extent of profits chargeable through PE*

Section 5(3) CTA 2009 identifies the amount on which CT is charged:

A non-UK resident company which carries on a trade in the UK through a permanent establishment in the UK is chargeable to corporation tax on all its profits wherever arising that are chargeable profits as defined in section 19 (profits attributable to its permanent establishment in the UK)...

Section 19 CTA 2009 defines “chargeable profits”:

- (1) This section applies if a non-UK resident company carries on a trade in the UK through a permanent establishment in the UK.
- (2) The company’s chargeable profits are its profits that are—
 - (a) of a type mentioned in subsection (3), and
 - (b) attributable to the permanent establishment in accordance with sections 20 to 32.
- (3) The types of profits referred to in subsection (2)(a) are—
 - (a) trading income arising directly or indirectly through or from the establishment,
 - (b) income from property or rights used by, or held by or for, the establishment, and
 - (c) chargeable gains falling within section 10B of TCGA 1992 (non-resident company with UK permanent establishment)—
 - (i) as a result of assets being used in or for the purposes of the trade carried on by the company through the establishment, or
 - (ii) as a result of assets being used or held for the purposes of the establishment or being acquired for use by or for the purposes of the establishment.

The question of how profits are attributed to a PE needs a long book to itself; it is not discussed here.

81.2 Meaning(s) of “permanent establishment”

The definition(s) of PE need a long book to itself.³ This chapter is a relatively brief introduction.

The term “permanent establishment” is used in different places with

³ For further reading, there is a bibliography in Reimer, Urban and Schmid (ed), *Permanent Establishments* (2011), para 1.3. See too IFA, *Is there a Permanent Establishment?* Cahiers du Droit International, (Vol 94a, 2009); [2006] BTR at p.722.

different definitions. It is strictly necessary to distinguish between:

- (1) “**UK law PE**” (which the INT Manual calls domestic law PE), defined in s.1141 CTA 2010.
- (2) “**OECD Model PE**” defined in the OECD Model. The INT Manual calls this “treaty PE” but I prefer the term “OECD Model PE” because different treaties have different definitions.⁴

There are two types of PE which I call:

- (1) “**fixed place of business PE**” and
- (2) “**agency PE**”.

Investment managers and brokers may be an agency PE, but have a special exemption; see 41.1 (Investment manager exemptions - Introduction).

81.2.1 *Scope of UK law definition*

Section 1141 CTA 2010 provides:

For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if ...

Thus this definition applies only for the purposes of the corporation tax acts.

For CGT, s.288 TCGA provides:

In this Act, unless the context otherwise requires—
“permanent establishment”, in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010;

Similarly, for IT, s.989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts—
“permanent establishment”, in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010...

Thus we have a taxes-act-wide definition but it only applies in relation to companies. The statutory definition does not apply in relation to a non-company. If PE were ever used in that context it would (subject to

⁴ For instance, see 81.9 (PE in pre-OECD Model treaties).

context) bear its normal meaning. If the view expressed here is right that UK law PE has the same meaning as OECD law PE, that would be the meaning to apply here too. But perhaps the term PE is only used in relation to companies, in which case the issue does not arise.

81.3 Fixed place of business PE

Section 1141 CTA 2010 provides:

For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if)—

- (a) it has a fixed place of business there through which the business of the company is wholly or partly carried on ...

OECD Model PE is substantially the same as UK law PE. Article 5(1) provides:

For the purposes of this Convention, the term “permanent establishment” means a fixed place of business through which the business of an enterprise is wholly or partly carried on.

INTM para 264060 discusses UK law PE but that merely repeats and refers to the INTM discussion of OECD Model PE:

266050 Fixed place of business permanent establishment [September 2011]

[The manual refers to model treaty Article 5(1) and continues:]

This definition therefore contains the following essential features, all of which must be present:

- a. there must be a geographic place of business, possibly premises or a site, although it can, in certain circumstances, be machinery or equipment.
- b. the place of business must be fixed, that is, have a certain degree of permanence, and
- c. the non-resident’s business must be carried on through this fixed place of business, normally by the personnel of the enterprise.

It is possible for an enterprise to have more than one fixed place of business permanent establishment if it carries on business activities from more than one place for the necessary duration of time.

The INTM then goes on to consider these three conditions in more detail.

81.3.1 *Geographic condition*

INTM para 266060 provides:

Fixed place of business permanent establishment – Geographic condition
[February 2006]

The words used in article 5(1) make it clear that there is a geographical condition within the fixed place of business treaty permanent establishment definition. There must be a distinct place of business being used for carrying on the business of the enterprise. The place could be premises, facilities, plant or machinery or even a site or installation. But equally the place of business could consist only of a space where premises are not necessarily required for the activities concerned. For example, a street vendor or market barrow enterprise could meet the geographic place condition where the business was carried out from appreciably one place whereas a French travelling salesman arriving in the UK and trading his French produce from door to door before returning to France would not meet the geographic condition and there would be no fixed place of business in the UK. For guidance on the scope for automated machinery to constitute a permanent establishment see INTM266090.

A place of business of one enterprise could be situated in the business premises of a second enterprise, including possibly an affiliated company, if some space were put at the disposal of the first enterprise. In considering whether a place of business is ‘at the disposal of’ an enterprise it makes no difference whether that enterprise’s use is exclusive or shared, whether the enterprise owns, rents or even occupies a place illegally. As an example of when premises would be considered to be ‘at the disposal of an enterprise’, a travelling salesman would not be considered to have the premises of each of his prospective customers at his disposal, but a parent company using an office in the headquarters of a subsidiary company to oversee that subsidiary for a period would have had that office space at its disposal. Other examples can be found in the commentary to Article 5.

81.3.2 *Degree of permanency*

INTM para 266070 provides:

Fixed place of business permanent establishment – Time condition – Degree of permanence of activities [February 2006]

The words used in article 5(1) make it clear that there is a time or degree of permanence condition inherent within the term ‘fixed place of business’ but it is not necessary that equipment or plant be physically fixed to the ground before it could constitute ‘a fixed place of business’. There is no certain rule on the period that must pass before a place of business becomes ‘fixed’ and this can

often depend on the nature of the activities. But it is immaterial how long an enterprise operates in another Country if it does not do so at a distinct place. Since the place of business must be fixed, it also follows that a PE can be deemed to exist only if the place of business has a certain degree of permanency, i.e. if it is not of a purely temporary nature. A place of business may, however, constitute a PE even though it exists, in practice, only for a very short period of time. It is sometimes difficult to determine whether this is the case. Whilst the practices of the different Member States of the OECD are not necessarily consistent in so far as time requirements are concerned, experience has shown that PEs have normally not been considered to exist in situations where a business has been carried on in a country through a place of business that was maintained for less than six months. Conversely practice shows that there were many cases where a PE has been considered to exist where the place of business was maintained for a period longer than six months. One exception to the six month yardstick has been where the activities were of a recurrent nature; in such cases, each period of time during which the place is used needs to be considered in combination with the number of times during which that place is used (which may extend over a period of years). Another exception has been made where activities constituted a business that was carried on exclusively in that country; in this situation, the business may have short duration because of its nature but since it is wholly carried out in that country, its connection with that country is stronger. Temporary interruptions of business activities do not cause a PE to cease to exist.

Where a place of business which was, at the outset, designed to be used for such a short period of time that it would not have constituted a PE but it is in fact maintained for such a period that it can no longer be considered as a temporary one, it becomes a fixed place of business and [as brought out at para 6.3 of the commentary to model treaty article 5(1)] can thus retrospectively be a PE. A place of business can also constitute a PE from its inception even though it existed, in practice, for a very short period of time, if as a consequence of special circumstances, e.g. death of the taxpayer, investment failure etc, it was prematurely terminated.

A PE begins to exist as soon as the enterprise commences to carry on business through a fixed place of business. A period of preparation, as distinct from the real business activities, should not be treated as the business being carried out. The PE ceases to exist with the disposal of the fixed place of business or with the cessation of any activity through it.

A single place of business will generally be considered to exist where, in light of the nature of the business, a particular location within which the activities are moved may be identified as constituting a coherent whole commercially and geographically with respect to the business. For example, the market stall mentioned already if it moved position within a market area. Similarly, a painter who undertook under a single contract to paint a multi-occupied estate would have a single place of business and the duration of his activities at that place would be gauged accordingly. But if the painter entered into individual contracts with unrelated occupants of premises on an estate his activities should be considered separately rather than as a coherent whole.

81.3.3 *Personnel condition*

INTM para 266080 provides:

Fixed place of business permanent establishment – Personnel condition

[February 2006]

For a fixed place of business to constitute a PE the business of the enterprise must have been carried on through that place, i.e. persons working in the business must have worked from that place. Those persons could be employees, the entrepreneur or proprietor themselves or any other persons receiving instructions from the enterprise e.g. self-employed consultants.

It would follow that property let out to third parties is not a PE of the landlord.

266090. Fixed place of business permanent establishment – Automated equipment [February 2006]

Where the business of an enterprise is carried out through automated machinery a PE may nevertheless exist if personnel are required to set up, operate, control or maintain such equipment. Whether or not gaming or vending machines and the like set up by a foreign enterprise in another State constitute a PE thus depends on whether or not the enterprise carries on a business activity besides the initial setting up of the machines. A PE does not exist if an enterprise merely sets up a machine and then leases it to another enterprise but it could if the first enterprise also operated and maintained the machine for its own account. This also applies if the machine is operated and maintained by an agent dependent (INTM266150) on the enterprise.

266100. Fixed place of business permanent establishment – E-commerce/E-tailers/servers/internet trading [November 2004]

The development of e-commerce places a strain on the traditional definition of a PE in cases where the computer equipment is positioned in one territory whilst the enterprise has no personnel active in the business in that territory. The UK does not concur with other OECD Member States on whether a server of itself can constitute a fixed place of business permanent establishment. Accordingly the UK has made an observation to that effect in the commentary to the Model Treaty Article 5(1).

In the UK, we take the view that a server either alone or together with web sites could not as such constitute a PE of a business that is conducting e-commerce through a web site on the server. We take that view regardless of whether the server is owned, rented or otherwise at the disposal of the business.

Other OECD Member States take the view that a server, as distinct from mere web sites (which cannot fulfil the geographic situs condition) could constitute a PE where the equipment is in fact fixed, i.e. that in fact it is not moved and is located at a specific location for a sufficient duration to indeed become fixed (INTM266050). See also INTM263000 for place of contract in e-commerce.

81.3.4 *Items specifically included as PE*

Section 1141(2) CTA 2010 provides a list of items which constitute a fixed place of business PE. The first seven are:

For this purpose a “fixed place of business” includes (without prejudice to the generality of that expression)—

- (a) a place of management,
- (b) a branch,⁵
- (c) an office,
- (d) a factory,
- (e) a workshop,
- (f) an installation or structure for the exploration of natural resources,⁶
- (g) a mine, an oil or gas well, a quarry or any other place of extraction of natural resources; ...

This is based on OECD Model Art 5(2). The INTM para 266110 [February 2006] sets out a précis of the article and continues:

The wording of article 5(2)⁷ make it clear that this is not an exhaustive list of the places that could be a permanent establishment.

Obviously. The INTM continues:

Furthermore, it is clear that, to be a treaty permanent establishment, any of these types of places would also need to have the general attributes of a fixed place of business, i.e. the geographic, period of duration and personnel conditions.

The point was less clear and it is helpful to see it in writing.

81.3.5 *Building site, construction or installation project*

This is the eighth item in the list in s.1141(2) CTA 2010:

⁵ See 81.12.2 (Meaning of “branch or agency”).

⁶ This is not in the OECD Model definition.

⁷ The text erroneously reads: 5(1).

For this purpose a “fixed place of business” includes (without prejudice to the generality of that expression)— ...

(h) a building site or construction or installation project.

The OECD Model moves this item into a paragraph of its own, and the wording is not quite the same. Article 5(3) provides:

A building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months.

This item, like the first seven in the list, is only a PE if it also meets the geographic, time and personnel conditions.

The INTM para 266130 provides:

Fixed place of business permanent establishment – Building sites or construction or installation projects [September 2011]

The model treaty article 5 includes specific provisions in para 3 that a building site or construction or installation project constitutes a treaty permanent establishment only where it lasts more than 12 months. The commentary makes it clear that this includes also the construction of roads, bridges or canals, the renovation (involving more than mere maintenance or redecoration) of buildings, roads, bridges or canals, the laying of pipes-lines and excavating and dredging. Additionally, the term ‘installation project’ is not restricted to an installation related to a construction project; it also includes the installation of new equipment, such as a complex machine, in an existing building or outdoors.

The OECD member states have made this type of activity the subject of a specific rule because of the frequency with which it caused difficulties of interpretation. And, for clarity in the model treaty, 12 months duration has been taken to be a sufficient indication that the activity is a fixed place of business permanent establishment. Of course particular treaties may vary from the model in this respect and indeed different durations are included in many of the UK’s treaties all of which can be referred to in full at DT2140 onwards. The UK domestic charging provisions in [s.1142(2)(h) CTA 2010] define permanent establishment (see INTM264050) in a way that specifically includes all building sites or construction or installation projects without duration qualification. Although initially this may [!] appear inconsistent you should remember that the treaty provisions will override the domestic legislation. In that way, any duration specified in any applicable treaty within which the site will become a permanent establishment will be the duration that applies.

If the non-resident is involved (directly or indirectly through subcontractors) in more than one site or project, each should be considered as a potential permanent establishment separately from the others. The 12 months or other duration test applies to each site or project. A site or project should be regarded as a single potential permanent establishment even if it is based on several contracts

provided that it forms a coherent whole commercially and geographically. If it appears that a single site or project has been fragmented to avoid the appearance of being a PE the facts of the original tendering should be investigated.

A site or project exists from when the contractor begins work, including any preparatory work, in the country where the construction etc. is to be established. It continues to exist until the work is completed or permanently abandoned. Temporary discontinuation, seasonal or other temporary interruptions should be ignored.

81.4 Agency PE

Section 1141 CTA 2010 provides:

For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if) ...

(b) an agent acting on behalf of the company has and habitually exercises there authority *to do business on behalf of the company*.

OECD Model PE is different. Article 5(5) provides:

[a] Notwithstanding the provisions of paras 1 and 2, where a person – other than an agent of an independent status to whom para 6 applies – is acting on behalf of an enterprise and has, and habitually exercises, in a Contracting State an authority *to conclude contracts in the name of the enterprise*, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise,

[b] unless the activities of such person are limited to those mentioned in para 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.⁸

I refer to this as “**agency PE**” though the term “dependent agency PE” is sometimes used.

81.4.1 *Distinctions between OECD and UK law PE*

Dawn Primarolo (then Paymaster General) explained why the wording of UK law PE differs from OECD law PE:

⁸ See 81.7 (PE: preparatory and auxiliary activities).

Dawn Primarolo: ... the wording used in clause 147(1)(b) [FB 2003, now s.1141 CTA 2010] to define “dependent agent” varies from the exact wording in article 5(5) of the OECD model tax convention. Instead, it is based on guidance given in the commentary on article 5, which can be found in paragraphs 31 to 45, because article 5 refers to an agent who has the authority to conclude contracts in the name of the enterprise.

However, the OECD commentary on article 5 makes it clear that that phrase is not necessarily to be taken at face value. For instance, it covers contracts in the name of an enterprise, contracts binding on the enterprise but not in its name, and contracts recognised by the agent but signed by some other person, while excluding contracts that do not relate to the business proper of the enterprise, although concluded by the agent. The area is very complicated and there is an interaction between the commentary and the article itself.

UK legislation cannot be directly interpreted by reference to the commentary,⁹ so the phrase used in clause 147 is intended to encapsulate the current OECD interpretation in respect of dependent agents. That would not have been achieved if the wording in article 5(5) were copied directly into UK domestic law.

Mr. Burnett: The Paymaster General will recall that one of the arguments used by me, the hon. Member for Eddisbury and one or two others who spoke on the matter was that the Inland Revenue confirmed that the reference to an agent in clause 147 is restricted to those persons who contractually can and do bind their principals and not to persons acting in some other representative capacity falling short of having such authority. The Paymaster General is obviously well aware of *Pepper v Hart* and the reliance people may put on what she says in Committee. I would welcome her comments on that point raised by the Law Society.

Dawn Primarolo: I was coming to that important point, which was outlined in a letter to the Law Society and the Chartered Institute of Taxation on 8 May.

I was trying to explain that the article wording must be read in parallel with the commentary. The commentary needed to be part of the description that went into UK legislation in order to make that clear. In drafting the legislation, the importance of maintaining certainty on international understanding and practice on the OECD guidelines and model conventions while understanding how the commentary affects their operation was one of the major points, which was continually made

⁹ This is not correct, but fortunately no-one present reminded Ms Primarolo of (what is now) s.164 TIOPA (Application of OECD principles).

to the Revenue and me. That is how we chose the clause's wording. Amendment No. 101 seeks to add to the definition of dependent agent used in clause 147(1)(b). It would mean that an agent would be a dependent agent of a foreign company as long as they had the authority to enter into arrangements on its behalf and had entered into contractually binding arrangements with it. That may not have been the amendment's intended effect, but I ask the Committee to reject it nevertheless. The suggested addition is unnecessary and the language used in clause 147(1)(b) already reflects the current OECD position on dependent agents. As such, no further clarification or definition is required.... The Bill does not extend the charge to tax on non-resident companies and there is no less certainty for an agent of a non-resident company on whether they are within the charge to corporation tax. The rules are set out in the OECD treaty and commentary and in UK law, which has had and will have specific rules to facilitate foreign investment in the City.¹⁰

Similarly, the INTM para 264050 provides:

Permanent establishment – Domestic law definition [April 2007]

The definition of domestic law permanent establishment is at [s.1141 CTA 2010]. This is similar to and has the same broad effect as the OECD model treaty article 5 definition of permanent establishment which is an important factor bearing in mind that treaty law takes precedence over domestic law. So it is unlikely that the application of a treaty that followed the model article 5 would cause any variance to the UK domestic charge to tax on a non-resident trading in the UK through a permanent establishment as defined under domestic law. Because of the similarities of wording and effect between PE under domestic law and under the OECD model treaty the guidance on interpretation of treaty PE at INTM266000 is understandably substantially applicable to domestic law PE as well.

A lot of our interpretation of treaty PE is based on the Commentary to Article 5 of the OECD Model Treaty (INTM266030). Although the Commentary is not imported into UK domestic law the UK has contributed to and agreed the content except in specific instances where the UK has put on record either an observation or a reservation to a specific section of the Commentary. So, where the wording of the UK domestic law PE provisions are the same as those used in the OECD Model Treaty Article 5 then the commentary interpretation on those words will apply to those provisions and this guidance will contain cross-references into the guidance on treaty PE at INTM266000. If the

10 House of Commons Standing Committee B, accessible
www.publications.parliament.uk/pa/cm200203/cmstand/b/st030520/pm/part1/30520s06.htm

Commentary interpretation of PE were to materially vary through periodic update or amendment the changes would have to be accepted by the UK Parliament before they could be taken to apply also to interpretation of UK domestic law PE.

The simpler way to achieve the intention would have been to incorporate the OECD definition by reference, but it is considered that the UK law definition has reached that destination, even though by a less satisfactory route.¹¹ EN CTA 2010 agrees:

3253. This Chapter determines what constitutes a permanent establishment in a territory of a company which is not resident in that territory. ...

3254. The determination is in line with various internationally recognised characteristics commonly used in the UK's double tax agreements.

81.4.2 *OECD model agency PE*

The OECD Commentary provides:

31. It is a generally accepted principle that an enterprise should be treated as having a permanent establishment in a State if there is under certain conditions a person acting for it, even though the enterprise may not have a fixed place of business in that State within the meaning of paragraphs 1 and 2. [Article 5(5)] intends to give that State the right to tax in such cases. Thus paragraph 5 stipulates the conditions under which an enterprise is deemed to have a permanent establishment in respect of any activity of a person acting for it. The paragraph was redrafted in the 1977 Model Convention to clarify the intention of the corresponding provision of the 1963 Draft Convention without altering its substance apart from an extension of the excepted activities of the person.

The commentary then turns to the phrase *authority to conclude contracts in the name of the enterprise* which is at the heart of OECD model agency PE:

32. Persons whose activities may create a permanent establishment for the enterprise are so-called dependent agents i.e. persons, whether employees or not, who are not independent agents falling under para 6. Such persons may be either

11 If that is right, it answers the concerns expressed in Nias, "Taxation of non-resident companies and the meaning of agent" [2003] BTR 468.

individuals or companies. It would not have been in the interest of international economic relations to provide that the maintenance of any dependent person would lead to a permanent establishment for the enterprise. Such treatment is to be limited to persons who in view of the scope of their authority or the nature of their activity involve the enterprise to a particular extent in business activities in the State concerned. Therefore, para 5 proceeds on the basis that only persons having the authority to conclude contracts can lead to a permanent establishment for the enterprise maintaining them. In such a case the person has sufficient authority to bind the enterprise's participation in the business activities in the State concerned. The use of the term "permanent establishment" in this context presupposes, of course, that that person makes use of this authority repeatedly and not merely in isolated cases.

The commentary turns to the phrase *in the name of the enterprise*:

32.1 Also, the phrase "authority to conclude contracts in the name of the enterprise" does not confine the application of the paragraph to an agent who enters into contracts literally in the name of the enterprise; the paragraph applies equally to an agent who concludes contracts which are binding on the enterprise even if those contracts are not actually in the name of the enterprise.

The commentary turns to the phrase *authority to conclude contracts*:

Lack of active involvement by an enterprise in transactions may be indicative of a grant of authority to an agent. For example, an agent may be considered to possess actual authority to conclude contracts where he solicits and receives (but does not formally finalise) orders which are sent directly to a warehouse from which goods are delivered and where the foreign enterprise routinely approves the transactions.

33. The authority to conclude contracts must cover contracts relating to operations which constitute the business proper of the enterprise. It would be irrelevant, for instance, if the person has authority to engage employees for the enterprise to assist that person's activity for the enterprise or if the person were authorised to conclude, in the name of the enterprise, similar contracts relating to internal operations only.

It seems to me that "agent" can be used in three broad senses:

- (1) A person who can *legally* enter into contracts which bind their principal. I refer to that as a "**contract-law agent**".
- (2) A person who can *effectively decide whether* to enter into a contractual relationship which binds their principal though the further step to create a contract is required as a legal formality or "rubber stamping".
- (3) In a looser, colloquial sense, an intermediary, spokesperson, or

representative (who lacks power to make an effective decision).¹² The meaning here is meaning (2). If in practice a person can commercially give a commitment, they will be regarded as an agent even if they lack formal authority of a contract-law agent, so that any contract needs to be formally endorsed by the principal.¹³

The commentary then turns to the requirement that the authority must be exercised in the state concerned. What about arranging that the negotiating work is done by the agent in a state, but the contract is signed elsewhere? This does not work:

Moreover the authority has to be habitually exercised in the other State; whether or not this is the case should be determined on the basis of the commercial realities of the situation. A person who is authorised to negotiate all elements and details of a contract in a way binding on the enterprise can be said to exercise this authority “in the State”, even if the contract is signed by another person in the State in which the enterprise is situated or if the first person has not formally been given a power of representation. The mere fact, however, that a person has attended or even participated in negotiations in a State between an enterprise and a client will not be sufficient, by itself, to conclude that the person has exercised in that State an authority to conclude contracts in the name of the enterprise. The fact that a person has attended or even participated in such negotiations could, however, be a relevant factor in determining the exact functions performed by that person on behalf of the enterprise.

The article 5(4) exemption (auxiliary & preparatory work, etc)¹⁴ applies to agents:

Since, by virtue of paragraph 4, the maintenance of a fixed place of business solely for purposes listed in that paragraph is deemed not to constitute a permanent establishment, a person whose activities are restricted to such purposes does not create a permanent establishment either.

12 “The use of the word ‘agent’ in any mercantile transaction is, of itself, wholly uninformative of the legal relationship between the parties and the use of the words ‘independent agent’ takes the matter no further. Either is consistent with a self-employed person acting either as a true agent who puts his principal into a contractual relationship with a third party or with such a person acting as a principal.” See *Potter v CE* [1985] STC 45 at p.51 cited with approval in *Umbro International v HMRC* [2009] STC 1345 at [29].

13 The point has been decided the same way in relation to branch/agency: see 81.12.5 (Difference between branch/agency and PE).

14 See 81.7 (PE: preparatory and auxiliary activities).

The commentary comments on “habitually” (which echoes the requirement of “degree of permanency” for a fixed place of business PE):

33.1 The requirement that an agent must “habitually” exercise an authority to conclude contracts reflects the underlying principle in Article 5 that the presence which an enterprise maintains in a Contracting State should be more than merely transitory if the enterprise is to be regarded as maintaining a permanent establishment, and thus a taxable presence, in that State. The extent and frequency of activity necessary to conclude that the agent is “habitually exercising” contracting authority will depend on the nature of the contracts and the business of the principal. It is not possible to lay down a precise frequency test. Nonetheless, the same sorts of factors considered in para 6 would be relevant in making that determination.

And lastly two general points:

34. Where the requirements set out in paragraph 5 are met, a permanent establishment of the enterprise exists to the extent that the person acts for the latter, i.e. not only to the extent that such a person exercises the authority to conclude contracts in the name of the enterprise.

35. Under paragraph 5, only those persons who meet the specific conditions may create a permanent establishment; all other persons are excluded. It should be borne in mind, however, that paragraph 5 simply provides an alternative test of whether an enterprise has a permanent establishment in a State. If it can be shown that the enterprise has a permanent establishment within the meaning of paragraphs 1 and 2 (subject to the provisions of paragraph 4), it is not necessary to show that the person in charge is one who would fall under paragraph 5.

The INTM provides:

266160. UK common law – Variance with civil law [September 2011]

The majority of European countries have civil law codes whereas the UK has a common law code. Any matters of interpretation of undefined terms used in article 5 or any other article of a treaty should be interpreted in the UK under UK law or at least common meaning. The civil law concept of agency is different from that under common law in that civil law will not usually regard the actions of an agent as though they were the actions of the principal. Civil law separates the relationship between the principal and the agent on the one hand and that between the agent and the third party (including a customer) on the other. Thus civil law countries do not, as the UK does, necessarily see the presence of the non-resident principal in the actions of the resident agent. In the UK, under common law, we interpret any actions carried out by an agent as having been performed for the principal and binding the principal in the same way as though they had carried out those actions themselves. For example, a contract arranged

by an agent in the UK to deliver goods owned by a foreign principal to a customer would be treated for UK tax purposes as though the foreign principal themselves had contracted in the UK for the delivery. This is the case, regardless of whether the contract is written in the name of the principal or in the name of the agent (commentary to model treaty article 5(5), para 32.1 of July 2010 version).

The former ITH provided:

851. Treaties following the example of the OECD Model are influenced by the civil law concept of agency. Para 5 of Article 5 of the Model deems an agent to be a permanent establishment if the agent has and habitually exercises an authority to conclude contracts in the name of the enterprise of the treaty partner state, unless the agent is an agent of independent status within para 6. There are two pointers here to civil law influence. One is ‘contracts in the name of the enterprise’, the other is ‘agent of independent status’.

852. In the name of principal

The making of contracts in the name of the principal would be regarded by civil law countries as a characteristic of a dependent agent whereas contracts made in the agent’s own name would be characteristic of independent status (though the wording of the Article does not preclude the possibility of independent status even if the contracts are in the name of the ‘enterprise’). In our law, if the contracts are made on behalf of and with the authority of the principal the relationship of the agent to the principal is not affected by whether the contract is made in the name of the principal or in the agent’s own name. So agents, who in all other respects would be dependent agents according to the OECD Model, could in our law make contracts in their own name. We would not wish such agents to be regarded as agents of independent status under a treaty and therefore resist the literal meaning of ‘in the name of’ and argue that the words should be interpreted as ‘on behalf of’, which is an acceptable translation of the words ‘au nom de’ which appear in the French version of the Model Convention. The commentary on Article 5 of the 1992 Model included a note of our view at para 45 and in 1994 a sentence was added to the commentary itself at para 32 confirming that this is now the accepted interpretation.

The INTM discussion of OECD Model PE at 266140 [March 2007] is a lightly adapted version of the OECD commentary, so is not set out here.

81.4.3 *USA DTA*

Article 6(5) USA/UK DTA provides a definition of agency PE very

similar to the OECD model.¹⁵

The US Department of the Treasury Technical Explanation of the Convention¹⁶ provides:

The OECD Model uses the term “in the name of that enterprise” rather than “binding on the enterprise”. There is no substantive difference. As indicated in paragraph 32 to the OECD Commentary on Article 5, paragraph 5 of the Article is intended to encompass a person who “concludes contracts which are binding on the enterprise, even if those contracts are not actually in the name of the enterprise”.

The contracts referred to in paragraph 5 are those relating to the essential business operations of the enterprise rather than ancillary activities. For example, if the agent has no authority to conclude contracts in the name of the enterprise with its customers for the sale of the goods produced by the enterprise, but it can enter into service contracts in the name of the enterprise for the enterprise’s business equipment used in the agent’s office, this contracting authority would not fall within the scope of the paragraph, even if exercised regularly.

81.5 Independent agent

Section 1142(1) CTA 2010 provides:

A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent’s business.

The OECD Model is slightly differently worded, but the differences do not seem material. Article 5(6) provides:

15 “Notwithstanding the provisions of paragraphs 1 and 2 of this Article, where a person—other than an agent of an independent status to whom paragraph 6 of this Article applies—is acting on behalf of an enterprise and has and habitually exercises in a Contracting State an authority *to conclude contracts that are binding on the enterprise*, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities that the person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 of this Article that, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.”

16 Accessible www.irs.gov/pub/irs-trty/temod006.pdf

An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

The OECD Commentary summarises:

36. Where an enterprise of a Contracting State carries on business dealings through a broker, general commission agent or any other agent of an independent status, it cannot be taxed in the other Contracting State in respect of those dealings if the agent is acting in the ordinary course of his business (cf. paragraph 32 above). Although it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis.

The view that the independent agent exception is only inserted for the avoidance of doubt is important in contexts (such as colonial model treaties) where the exception is not found.

37. A person will come within the scope of paragraph 6, i.e. he will not constitute a permanent establishment of the enterprise on whose behalf he acts only if

- a) he is independent of the enterprise both legally and economically, and
- b) he acts in the ordinary course of his business when acting on behalf of the enterprise.

The requirements of independent status and “ordinary course of business” overlap slightly but it is best to consider them separately.

81.5.1 *Independent status*

The OECD commentary provides::

38. Whether a person is independent of the enterprise represented depends on the extent of the obligations which this person has vis-a-vis the enterprise. Where the person’s commercial activities for the enterprise are subject to detailed instructions or to comprehensive control by it, such person cannot be regarded

as independent of the enterprise. Another important criterion will be whether the entrepreneurial risk has to be borne by the person or by the enterprise the person represents.

38.1 In relation to the test of legal dependence, it should be noted that the control which a parent company exercises over its subsidiary in its capacity as shareholder is not relevant in a consideration of the dependence or otherwise of the subsidiary in its capacity as an agent for the parent. This is consistent with the rule in paragraph 7 of Article 5. But, as paragraph 41 of the Commentary indicates, the subsidiary may be considered a dependent agent of its parent by application of the same tests which are applied to unrelated companies.

38.2 The following considerations should be borne in mind when determining whether an agent may be considered to be independent.

38.3 An independent agent will typically be responsible to his principal for the results of his work but not subject to significant control with respect to the manner in which that work is carried out. He will not be subject to detailed instructions from the principal as to the conduct of the work. The fact that the principal is relying on the special skill and knowledge of the agent is an indication of independence.

38.4 Limitations on the scale of business which may be conducted by the agent clearly affect the scope of the agent's authority. However such limitations are not relevant to dependency which is determined by consideration of the extent to which the agent exercises freedom in the conduct of business on behalf of the principal within the scope of the authority conferred by the agreement.

38.5 It may be a feature of the operation of an agreement that an agent will provide substantial information to a principal in connection with the business conducted under the agreement. This is not in itself a sufficient criterion for determination that the agent is dependent unless the information is provided in the course of seeking approval from the principal for the manner in which the business is to be conducted. The provision of information which is simply intended to ensure the smooth running of the agreement and continued good relations with the principal is not a sign of dependence.

38.6 Another factor to be considered in determining independent status is the number of principals represented by the agent. Independent status is less likely if the activities of the agent are performed wholly or almost wholly on behalf of only one enterprise over the lifetime of the business or a long period of time. However, this fact is not by itself determinative. All the facts and circumstances must be taken into account to determine whether the agent's activities constitute an autonomous business conducted by him in which he bears risk and receives reward through the use of his entrepreneurial skills and knowledge. Where an agent acts for a number of principals in the ordinary course of his business and none of these is predominant in terms of the business carried on by the agent legal dependence may exist if the principals act in concert to control the acts of the agent in the course of his business on their behalf.

The INTM provides:

264080 Independent agents do not create a permanent establishment [April 2007]

[The INTM summarises s.1142(1) and continues:] Whether an agent is of independent status is tested by reference to the legal, financial and commercial characteristics of the particular business relationship between the non-resident and the agent. If the relationship between them is the same as a relationship between independent businesses dealing with each other at arms length then the agent will be 'an independent agent'. For example, an agent who acted for other independent unconnected businesses on the same terms as those under which he acted for the non-resident could be an 'independent agent' and it would be clear that the agent had been acting in the ordinary course of his business if his activities were repeated for various unconnected customers. Dependent or independent status does not turn on the shareholding relationship between principal and agent. The fact that an agent is a subsidiary company does not necessarily make it a dependent agent.¹⁷ However, a subsidiary company will constitute a domestic law agency PE of its parent company in the same way as any other agent of the parent company if independence by reference to the factors detailed in the guidance that follows cannot be demonstrated.

Whether an agent acts in the ordinary course of their own business is something that should be considered by reference to the behavioural facts as opposed to intentions not followed through in business performance. Matters relevant would include (but not necessarily be limited to) the number of unrelated principals that the agent acted for and the extent of the business activities customarily carried out by independent agents in the specific business sector concerned.

Assuming they did act in the ordinary course of their own business, in general, an agent would be independent and would not constitute an agency PE of the foreign enterprise for which it acts where it is independent of the principal enterprise both legally and economically. The perspective of application of this test is with relevance to the business conducted by the agent for the principal rather than, for example, any shareholding relationship between the principal and agent. Other relevant factors of independence may include:

- the extent of the obligations which the agent has vis-à-vis the non-resident;
- whether the agent is subject to detailed instructions or comprehensive control;
- whether the agent bears the entrepreneurial risk for the business that the agent carries out for the non-resident;
- the degree of reliance on the agent's special skill and knowledge by the principal in the business done, and
- Whether there is reference by the agent to the principal for approval of the manner in which the business is to be conducted.

There will undoubtedly be circumstances where, whether deliberately or not, the relationship between a non resident and a UK agent is obscure or even where the declared terms of that relationship are very different from the actual terms. In such cases there is no substitute for detailed enquiry into the relationship to see

17 See 81.6 (Controlled companies and group companies).

whether it falls within the category of dependent or independent agent.

INTM discusses the OECD Model wording. It partly duplicates the text of the discussion on domestic law agency PE. The other parts provide:

266150. Agent of independent status – Article 5(6) [September 2011]

... The work done by an agent, where that work was all done for one non-resident client, is unlikely to be viewed as the conduct of his ‘own business’ but more likely that of the non-resident’s business. An exception to that view might be where the concentration on one client was an unusual occurrence within a settled continuous trade involving several clients. ...

81.5.2 “*Ordinary course of business*”

The OECD commentary provides:

38.7 Persons cannot be said to act in the ordinary course of their own business if, in place of the enterprise, such persons perform activities which, economically, belong to the sphere of the enterprise rather than to that of their own business operations. Where, for example, a commission agent not only sells the goods or merchandise of the enterprise in his own name but also habitually acts, in relation to that enterprise, as a permanent agent having an authority to conclude contracts, he would be deemed in respect of this particular activity to be a permanent establishment, since he is thus acting outside the ordinary course of his own trade or business (namely that of a commission agent), unless his activities are limited to those mentioned at the end of paragraph 5.

38.8 In deciding whether or not particular activities fall within or outside the ordinary course of business of an agent, one would examine the business activities customarily carried out within the agent’s trade as a broker, commission agent or other independent agent rather than the other business activities carried out by that agent. Whilst the comparison normally should be made with the activities customary to the agent’s trade, other complementary tests may in certain circumstances be used concurrently or alternatively, for example where the agent’s activities do not relate to a common trade.

39. [This deals with insurance companies and is not discussed here].

81.5.3 *USA DTA*

Article 4(6) USA/UK DTA is similar to the OECD model.¹⁸

¹⁸ “An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent, or any other agent of an independent status, provided that such person is acting in the ordinary course of his business as an independent agent.”

The US Department of the Treasury Technical Explanation of the Convention¹⁹ provides:

Whether the agent and the enterprise are independent is a factual determination. Among the questions to be considered are the extent to which the agent operates on the basis of instructions from the enterprise. An agent that is subject to detailed instructions regarding the conduct of its operations or comprehensive control by the enterprise is not legally independent.

In determining whether the agent is economically independent, a relevant factor is the extent to which the agent bears business risk. Business risk refers primarily to risk of loss. An independent agent typically bears risk of loss from its own activities. In the absence of other factors that would establish dependence, an agent that shares business risk with the enterprise, or has its own business risk, is economically independent because its business activities are not integrated with those of the principal. Conversely, an agent that bears little or no risk from the activities it performs is not economically independent and therefore is not described in paragraph

Another relevant factor in determining whether an agent is economically independent is whether the agent has an exclusive or nearly exclusive relationship with the principal. Such a relationship may indicate that the principal has economic control over the agent. A number of principals acting in concert also may have economic control over an agent. The limited scope of the agent's activities and the agent's dependence on a single source of income may indicate that the agent lacks economic independence. It should be borne in mind, however, that exclusivity is not in itself a conclusive test; an agent may be economically independent notwithstanding an exclusive relationship with the principal if it has the capacity to diversify and acquire other clients without substantial modifications to its current business and without substantial harm to its business profits. Thus, exclusivity should be viewed merely as a pointer to further investigation of the relationship between the principal and the agent. Each case must be addressed on the basis of its own facts and circumstances.

81.5.4 *Broker and general commission agents*

The precise meanings of broker and general commission agent in the

19 Accessible www.ustreas.gov/offices/tax-policy/library/teus-uk.pdf

OECD Model PE definition do not greatly matter since both terms are subsumed into “other agent of independent status”.

For completeness, “broker” is discussed at 41.5.2 (“Broker”). The former ITH explained “general commission agent” in a passage too amusing to omit:

935. General commission agent

... Although the words general commission agent appear in the legislation, nobody really knows what a general commission agent is and textbooks on agency make no reference to such a character; the expression is indeed used in our Double Taxation Agreements but it is not a term that our treaty partners are familiar with. They say it has no particular meaning for them and think that it is there because the British were rather insistent about it.

936. London Produce case

The one case to which we most often turn for guidance on who may or may not be a general commission agent is the London Produce case [*Fleming v London Produce Co* 44 TC 582]. The London Produce company acted as agents in importing meat from New Zealand and selling it for commission on the London market. 95 per cent of its business was carried out for one principal. It claimed to be a general commission agent.

Megarry J enjoyed himself with the expression saying that he found it puzzling and unidentified. He wondered whether he might get at a meaning by looking at the words general, commission and agent separately and then adding the constituent parts together. He felt, however, that that was not a good idea because one could not arrive at the meaning of a particular high office by adding together the separate words lord, privy and seal. He came to the conclusion that a general commission agent must have broker-like qualities as it is included in the term ‘broker’ in the Section and that it is someone who holds himself out as being ready to work for clients generally. In his view Section 82(1) [TMA] (then Section 373(1) ITA 1952) could not be relevant if ‘in substance what is done is that (the non-resident) carries on business within the UK through the medium of an agent who is virtually a sole agent running the entire business for him and merely sending him remittances on request’. London Produce lost the case.

The only other case is the earlier one of *Boyd v Stephen* [10 TC 698] (concerned with bacon) when Rowlatt rather summarily dismissed the suggestion that the agents were general commission agents on the grounds that they did much more than such an agent would normally do. What the words are probably getting at is somebody like an import

commission agent. That is someone, probably more common in 1915, who, acting for a non-resident producer, will sell goods through a broker on the market in return for a commission. It is unlikely that the authors of the Section had in mind the smaller domestic markets such as meat and bacon.

81.6 Controlled companies and group companies

Article 5(7) OECD Model provides:

The fact that a company which is a resident of a Contracting State controls or is controlled by a company which is a resident of the other Contracting State, or which carries on business in that other State (whether through a permanent establishment or otherwise), shall not of itself constitute either company a permanent establishment of the other.

The OECD commentary provides:

40. It is generally accepted that the existence of a subsidiary company does not, of itself, constitute that subsidiary company a permanent establishment of its parent company. This follows from the principle that, for the purpose of taxation, such a subsidiary company constitutes an independent legal entity. Even the fact that the trade or business is carried on by the subsidiary company is managed by the parent company does not constitute the subsidiary company a permanent establishment of the parent company.

41. A parent company may, however, be found, under the rules of paragraphs 1 or 5 of the Article, to have a permanent establishment in a State where a subsidiary has a place of business. Thus, any space or premises belonging to the subsidiary that is at the disposal of the parent company (see paragraphs 4, 5 and 6 above) and that constitutes a fixed place of business through which the parent carries on its own business will constitute a permanent establishment of the parent under paragraph 1, subject to paragraph 3 and 4 of the Article (see for instance, the example in paragraph 4.3 above). Also, under paragraph 5, a parent will be deemed to have a permanent establishment in a State in respect of any activities that its subsidiary undertakes for it if the subsidiary has, and habitually exercises, in that State an authority to conclude contracts in the name of the parent (see paragraphs 32, 33 and 34 above), unless these activities are limited to those referred to in paragraph 4 of the Article or unless the subsidiary acts in the ordinary course of its business as an independent agent to which paragraph 6 of the Article applies.

41.1 The same principles apply to any company forming part of a multinational group so that such a company may be found to have a permanent establishment in a State where it has at its disposal (see paragraphs 4, 5 and 6 above) and uses premises belonging to another company of the group, or if the former company is deemed to have a permanent establishment under paragraph 5 of the Article (see paragraphs 32, 33 and 34 above). The determination of the existence of a permanent establishment under the rules of paragraphs 1 or 5 of the Article must, however, be done separately for each company of the group. Thus, the existence in one State of a permanent establishment of one company of the group will not have any relevance as to whether another company of the group has itself a permanent establishment in that State.

42. Whilst premises belonging to a company that is a member of a multinational group can be put at the disposal of another company of the group and may, subject to the other conditions of Article 5, constitute a permanent establishment of that other company if the business of that other company is carried on through that place, it is important to distinguish that case from the frequent situation where a company that is a member of a multinational group provides services (e.g. management services) to another company of the group as part of its own business carried on in premises that are not those of that other company and using its own personnel. In that case, the place where those services are provided is not at the disposal of the latter company and it is not the business of that company that is carried on through that place. That place cannot, therefore, be considered to be a permanent establishment of the company to which the services are provided. Indeed, the fact that a company's own activities at a given location may provide an economic benefit to the business of another company does not mean that the latter company carries on its business through that location: clearly, a company that merely purchases parts produced or services supplied by another company in a different country would not have a permanent establishment because of that, even though it may benefit from the manufacturing of these parts or the supplying of these services.

There is no equivalent of art 5(7) in UK law PE, but it is considered that the same rules should be implied.

81.7 PE: preparatory and auxiliary activities

Section 1143 CTA 2010 provides:

(1) If the condition in subsection (2) is met, a company is not regarded

as having a permanent establishment in a territory by reason of the fact that—

- (a) a fixed place of business is maintained there for the purpose of carrying on activities for the company, or
 - (b) an agent carries on activities there for and on behalf of the company.
- (2) The condition is that, in relation to the business of the company as a whole, the activities carried on are only of a preparatory or auxiliary character.
- (3) For this purpose “activities of a preparatory or auxiliary character” include (without prejudice to the generality of that expression)—
- (a) the use of facilities for the purpose of storage, display or delivery of goods or merchandise belonging to the company,
 - (b) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of storage, display or delivery,
 - (c) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of processing by another person, and
 - (d) purchasing goods or merchandise, or collecting information, for the company.

This is a slight rewrite of OECD Model but the differences in wording do not seem significant.

INTM para 264050 discusses this, but need not be set out as it only refers to (and repeats some material from) the INTM discussion of OECD Model PE:

266120 Fixed place of business permanent establishment – Activities specifically excluded from the definition of permanent establishment [April 2007]

Model treaty Article 5(4) lists certain activities that are not to be treated as permanent establishments even if they are carried on through a fixed place of business.

The Manual sets out a précis of the article and continues:

In deciding whether or not a fixed place of business of a non-resident enterprise is used for activities of a preparatory or auxiliary nature, consider the following factors:

- a. Are the services it performs so remote from the actual realisation of profits by the enterprise that it would be difficult to allocate any part of the profit to the fixed place of business? If they are, then the fixed place of business will not be a permanent establishment. The benchmark to gauge the activities against are

those of the trade as a whole entity. So, for example, if the UK activities are no different to the essence of the trade, e.g. the UK personnel collect market research information and the non-resident company's main trade is concerned with market research, then the activities in the UK would not be preparatory or auxiliary and there could be a permanent establishment in the UK.

An example is a research division of a trading or manufacturing company.

- b. Does the activity of the fixed place of business form an essential and significant part of the enterprise as a whole?

This sentence is from the OECD commentary but with respect it cannot be a correct or helpful test since all the activities specified as auxiliary are significant and some of them are essential.

A fixed place of business whose general purpose is identical to the general purpose of the enterprise is not used for activities of a preparatory or auxiliary nature. Examples of this are fixed places of business used for the purpose of managing an enterprise, or where a fixed place of business is maintained to supply spare parts of machinery supplied by the enterprise to customers and to service such machinery.

Note that the exclusion of activities of a preparatory or auxiliary nature from the definition of a permanent establishment only applies if these activities are solely for the non-resident enterprise. If the activities are performed not only for the enterprise but also for other enterprises, including other companies in the same group, then the fixed place of business will not be within the scope of the exclusion.

I find the last paragraph rather surprising though it is in the OECD Commentary. The OECD Commentary explains the reason for the exemption for collecting information:

The reference to the collection of information in subpara d) is intended to include the case of the newspaper bureau which has no purpose other than to act as one of many “tentacles” of the parent body; to exempt such a bureau is to do no more than to extend the concept of “mere purchase”.

81.8 Alternative finance arrangements

Section 1144 CTA 2010 deals with alternative finance arrangements, and is not discussed here.

81.9 PE in Colonial Model treaties

Article 2(1) of the UK/Jersey DTA provides a different definition of PE:

The term “permanent establishment”, when used with respect to an enterprise of one of the territories, means a branch, management or other fixed place of business, but does not include an agency unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of such enterprise or has a stock of merchandise from which he regularly fills orders on its behalf.

Guernsey and the Isle of Man are the same. This wording is based on s.17 FA 1930.

To what extent is this different from OECD Model PE? It is suggested that the Courts ought to have regard to the general international law understanding of PE (that is, OECD Model PE) and construe it in the same way. Notwithstanding the multiplicity of definitions, a multiplicity of concepts should be avoided or minimised so far as possible. Otherwise we will never know much about the meaning of this definition as there is will not be the litigation to answer all the puzzles which could arise.

81.10 Commentary: let's have one definition of PE

We only need one definition of PE and it is suggested that the statutory PE should be repealed and replaced by rule that PE has the same meaning as in the OECD model definition. That is indeed what the current statutory definition is intended to achieve.

It would also be a simplification if the old-style treaties could be amended to adopt standard OECD model wording. Obviously, that cannot be achieved by the UK unilaterally, and the point may not have much priority in the agendas of tax simplification or treaty negotiation, but in the fullness of time it should happen.

81.11 Why does branch/agency matter?

It is not possible to give a full list, but a branch/agency is important to an individual or trust for the following purposes:

- (1) The branch/agency gives rise to a liability to CGT: see 46.8 (Non-resident traders with UK branch).

(2) IT and CGT may be collected from the branch/agency.²⁰

(3) The branch/agency may affect the residence of non-corporate trustees. Lastly, the branch/agency is likely to be a PE, which is relevant for DTAs.

Branch/agency is not relevant to companies. In theory one can envisage a situation where a non-resident company does not have a UK PE but does have a UK branch/agency, and such a company would be within the scope of CGT under s.10 TCGA. In practice, this does not happen, or if it does, no-one takes any notice.²¹

81.12 Meaning of “branch or agency”

81.12.1 The statutory (non-)definition

Section 10(6) TCGA provides:

In this Act, unless the context otherwise requires,

[a] “branch or agency” means any factorship, agency, receivership, branch or management, but

[b] does not include any person within the exemptions in section 82 of the Management Act (general agents and brokers).

For the purposes of UK representatives rules²² the term is likewise defined to mean “any factorship, agency, receivership, branch or management”. The definition here does not include the restriction for general agents and brokers but these categories are taken out of the UK representative rules by other provisions.

The definition in s.10(6)[a] TCGA is completely useless, since it incorporates both words being defined, merely adding three further obscure or archaic terms which seem to mean “agent” if they mean

20 See 40.1 (Collection of tax from UK representatives).

21 See for instance the HMRC trustee residence guidance which states conveniently (if not strictly accurately):

“This is in line with section 10B Taxation of Chargeable Gains Act 1992 *which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here.*” (Emphasis added).

22 See 40.1 (Collection of tax from UK representatives).

anything.²³ The INTM expresses the same point more tactfully:

264090. Branch or agency – Statutory definition and practical recognition of a branch [April 2007]

...

There is a statutory definition of ‘branch or agency’ at Section 834(1) ICTA 1988 thus – “any factorship, agency, receivership, branch or management”.²⁴ This is not particularly helpful so we must look for authority elsewhere including case law.

81.12.2 *Meaning of “branch”*

The former ITH stated at para 842:

There is very little guidance on the meaning of ‘branch’. We have been advised that the presence of a principal (in the case of a sole trader or partnership) or of employees on a more or less regular basis is likely to be an essential ingredient of a branch (though employees may also be agents).

That repeats the personnel condition in the definition of PE. The INTM discusses the meaning of branch at para 264090 [March 2007]:

Most people recognise a branch of a foreign business when they see one and the impression given to the public is helpful in deciding whether or not a branch exists. For example there are many branches of foreign banks that trade on the High Streets of many towns and cities in the UK.

23 The former ITH explained at 842:

“Factorship and receivership are forms of agency and so, usually, would ‘management’ be. The former two categories are found in the 1842 machinery provisions, ‘Management’ was added in 1915 but has acquired more modern associations with the growth in the use of managers such as project managers and investment managers.”

To be fair, s.10(6)[a] was not intended to be a definition as such, but simply as an abbreviation, to avoid the more cumbersome wording of, e.g. s.370 ITA 1952:

“A non-resident person shall be assessable and chargeable in respect of any profits or gains arising, whether directly or indirectly, through or from any factorship, agency, receivership, branch or management, and shall be so assessable and chargeable in the name of the factor, agent, receiver, branch or manager.”

24 [Author’s Note.] The reference should be s.126(8) FA 1995. However, the definition there is the same, so it does not matter.

We know this, whether we bank with these branches or not, because the name of the foreign bank will be displayed across the shop front of the UK branch. The personnel running the UK branch will be carrying on the part of the foreign bank's trade that takes place in the UK. This amounts to the UK presence of the foreign bank's trade, i.e. a branch of its trade. That's an easy example in part because banks actually call themselves branches but it is worth stressing that whatever terminology is used it is the activities carried on in the UK in relation to the foreign enterprise's overall business activities that are most relevant in deciding whether the UK activities are a branch of the foreign business.

81.12.3 *Meaning of "agency"*

The INTM continues:

264100. Agency – Common law concept [February 2006]

Practical experience will have introduced all of us to the idea of agency. We do not always deal directly with the principal because we sometimes deal with an intermediary or agent. The agent represents the principal in accordance with the terms of the agreement in place between them. That agreement may be oral or in writing and in legal terms is called the agent's authority. In representing the principal the agent may bring about a legal relationship between that principal and a third party. Typically the agent may conclude a contract on the principal's behalf with a third party – the common situation is that of the UK agent who makes a contract with an UK third party to sell some goods on behalf of a foreign principal.

The English common law concept of agency is sometimes described by legal writers as the doctrine of identity. This conveys the concept that the agent is the alter ego of the principal. In the act of the agent we see directly the act of the principal; we regard what the agent does for the principal in just the same way as we would have regarded the same act if the principal had been here and had done it. If a contract for sale were made in the UK it would follow that a non-resident making a contract here through an agent would be trading here. Thus our domestic law concept of trading within the UK by non-residents and our common law concept of agency are intimately linked although the word agent appears nowhere in the income tax charging legislation. This contrasts with the legal position under civil law, which is detailed in the guidance at INTM266160.

The “agent” need not be an agent in the contract law sense of a person empowered to enter into contracts on behalf of a principal.²⁵

81.12.4 *Exception for general agents*

Section 10(6)[b] TCGA provides that branch or agency:

does not include any person within the exemptions in section 82 of the Management Act (general agents and brokers).

The reference is to s.82 TMA 1970 which was repealed in 1995! This provided:

[a] Nothing in this Part of this Act shall render a non-resident person chargeable in the name of a broker or in the name of an agent not being an authorised person carrying on the regular agency of the non-resident person, in respect of profits or gains arising from sales or transactions carried out through such a broker or agent:

[b] Provided that where sales or transactions are carried out on behalf of a non-resident person through a broker in the ordinary course of his business as such and the broker

(a) is a person carrying on bona fide the business of a broker in the UK, and

(b) receives in respect of the business of the non-resident person which is transacted through him remuneration at a rate not less than that customary in the class of business in question,

then, notwithstanding that the broker is a person who acts regularly for the non-resident person as such broker, the non-resident person shall not be chargeable in the name of that broker in respect of profits or gains arising from those sales or transactions.

In this subsection, “broker” includes a general commission agent.

There are two exceptions here. The exception at [a] applies only to cases where there is no regular agency.²⁶ This is similar to the rule that casual

²⁵ See *Brackett v Chater* 60 TC 134.

²⁶ The phrase “not being an authorised person carrying on the regular agency of the non-resident person” governs “broker” as well as “agent”, ie the section means: “Nothing in this Part of this Act shall render a non-resident person chargeable [I] in the name of a broker *not being an authorised person carrying on the regular agency of the non-resident person*, or [ii] in the name of an agent not being an authorised person carrying on the regular agency of the non-resident person,

agents do not constitute an agency PE.²⁷ The exception at [b] is similar to the broker exemption. There is no statutory exemption for investment managers or other independent agents. This is, I think, an oversight. It is considered that the exemption (or something like it) should be held to be implied.²⁸ As far as investment managers are concerned, in practice it does not matter much, as individuals or trusts are not likely to be trading in securities (and if they were, I do not expect that anyone would take any notice).

81.12.5 *Difference between branch/agency and PE?*

It is considered that “branch” should have (more or less) the same meaning as fixed place of business PE, and “agency” should have (more or less) the same meaning as agency PE, so the composite expression has (more or less) the same meaning as PE.

HMRC agree. The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]

Definition of UK representative

Branch or agency has the statutory definition at Section 126(8) FA 1995 of ‘Any factorship, agency, receivership, branch or management’ but it is interpreted on broadly equal lines to ‘permanent establishment’...²⁹

In *Brackett v Chater*,³⁰ the Special Commissioners took a different approach. They treated the term “branch or agency” as composite phrase containing a single concept. They did not think it correct to consider separately whether there was a branch, and whether there was an agent.

in respect of profits or gains arising from sales or transactions carried out through such a broker or agent...”

27 See 40.5 (Agents not treated as UK representatives).

28 See 81.5 (Independent agent) citing the OECD Model commentary:

“... it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis.”

29 Similarly the HMRC trustee residence guidance: “The examples all relate to non-UK resident companies that are trustees. The same principles would apply for other non-UK resident persons who are trustees (and for whom the relevant UK-based entity would be a branch or agency rather than a permanent establishment).”

30 60 TC 134 & 639, at p.646.

The difficulty with this approach is that it is far from clear what the single concept is, if it is distinct from the concepts of branch and agency and PE. (The statutory definition, as noted, does not help.) The Special Commissioners' solution is to ignore the wording altogether.³¹ It is not necessary to go that far, even when dealing with these 19th century fossils, and at a time when more emphasis is placed on a purposive approach.

The Special Commissioners continued:

Mr. Brackett represents Drishane in this country and is in sole charge of the day to day conduct of the trading operations other than the formation of contracts. It is not straining language, in our opinion, to say that by entrusting those operations to his care Drishane has established at least a branch in this country. Alternatively Mr. Brackett can properly be described as the manager of those operations, because he personifies them. Nor can we accede to Mr. Brackett's argument that it is inappropriate to assess him as "agent for Drishane" because he does not have the status of an agent under the general law. The definition of "branch or agency" in s 118 Taxes Management Act adds that "branch or agent" shall be construed accordingly. We take that to mean that the term "agent" is used as the cognate noun to describe a person who represents a branch or agency. Mr. Brackett is undoubtedly the personification of the branch or management of Drishane's business in this country and is, in our opinion, properly assessed as "agent for Drishane" on the authority of s 79.

This conclusion does follow from the finding of fact in the first sentence, though the only support it received in the High Court was that the decision was one which the Special Commissioners were entitled to reach.

81.13 Can you trade in the UK without a branch/agency or PE?

In *Brackett v Chater* the judge said:

... I find it difficult to imagine how a non-resident company which carries on a trade with any degree of continuity in the UK can do so

31 "It would, in our view, be perverse to hold that Drishane, which was effectively trading only in this country, through Mr. Brackett, is not within the charge to tax because of some semantic difficulty in fitting its arrangements with him to the wording of the definition of a branch or agency."

otherwise than through a “branch or agency” as defined in the Taxes Management Act 1970.³²

This is *obiter*, but given the breadth of the expression it seems right as a general rule but not as an absolute rule. This applies to a PE as well as to a branch/agency.

The former ITH at 846 took the view that trading in the UK without a branch or agency was rare:

Although such cases are rare it is possible for a non-resident individual to trade here other than through a branch or agency. A non-resident individual might come to this country for a short time so as not to become resident and carry on an itinerant trade. There would in such a situation be no branch and no agency. It is rather more difficult to imagine situations of that sort where the person concerned is a company. But notwithstanding the judge’s comments in the *Brackett* case there may be cases where the UK activities of a non-resident company are divided between various persons in such a way that, although the activities amount to trading here, no one person or group of persons can be identified as a branch or agency through which the trade is carried on.

81.14 Commentary: let’s abolish branch/agency

The FA 2003 replaced “branch or agency” with “PE” for the purposes of corporation tax. A press release explained the reason:

The rules also alter our current terminology so that in future we tax “permanent establishments”, (a term recognised internationally and used in our double taxation agreements), rather than “branches”. The new rules are to be interpreted in accordance with OECD guidelines, to ensure that the UK is in accord with international consensus that reflects UK agreement. If internationally agreed changes are made in the future, then any new guidance can be included to assist in the interpretation of the UK rules, if the UK government decides it wishes to adopt them.³³

This was a good reason to change corporation tax, and it is an equally good reason to bring IT and CGT into line. We do not need both

³² 60 TC 134 at p.149.

³³ REV BN 25 para 8 (17 April 2002).

concepts. The term PE should be extended to replace “branch or agency” altogether. This would be a worthwhile and trouble-free simplification in the law. It would make no difference whatsoever in practice, because in practice the two terms come to much the same thing, and no-one takes any notice of such differences as there may be, but it would remove some puzzles and complexity in the law.

CHAPTER EIGHTY TWO

DISCLOSURE AND COMPLIANCE

82.1 Disclosure and compliance – Introduction

A full discussion of disclosure and compliance issues requires a book to itself. This chapter focuses on matters closest to the themes of this book. The topics of DOTAS and duties of disclosure under the Proceeds of Crime Act 2002 each require books to themselves (and such books have been written); they are not discussed here.

82.1.1 *Cross references*

This chapter discusses general principles. The question how specific types of income/gains are disclosed on a tax return is considered in the chapters on that type of income; see:

- 26.8 (Tax return – disclosure of s.624 income)
- 28.16 (Tax return – disclosure of s.720 income)
- 29.39 (Tax return – disclosure of s.731 income)
- 31.45 (Tax return – disclosure of motive defence)
- 48.36 (Tax return – disclosure of s.87 gains)

82.2 Standards of disclosure and mistake

82.2.1 *Standards of care: culpability of mistakes*

It is helpful first to define some terminology and draw some distinctions. Errors may be classified by certain standards:

“**An honest error**” is one where the maker meets the standard of honesty.
“**A non-careless error**” is one where the maker meets the standard of reasonable care.

“A reasonable-excuse error” is one for which the maker has a reasonable excuse. This is similar to a non-careless error, but perhaps it reflects a higher standard: it is perhaps possible to envisage an error which is not careless but for which one still cannot find a reasonable excuse. But the difference (if any) is only a matter of nuance and for most purposes they are the same.

The minimum level of care required is that of reasonable care, ie if there is a mistake in a return (or any other document given to HMRC) the error is honest and non-careless.

82.2.2 *Standards of disclosure*

Taxpayers disclosure may be classified by various standards:

“Minimum disclosure” – the minimum required by statute.

“Above-minimum disclosure” meeting some higher standard above that minimum. This is a (deliberately) loose expression since (in the absence of context) a variety of standards might be applied. One particular standard (discussed below) I call **“Veltema-disclosure”** but there can be other standards.

“Full disclosure” (in the absence of context) is not an apt expression, and I prefer to avoid it, because one cannot disclose *everything*: that is not practical. Indeed even to try would swamp HMRC with information so they could not identify what is relevant. HMRC are themselves aware of this. SP 1/06 provides:

9. A taxpayer can further restrict the opportunity for discovery [assessments] by providing enough information for an HMRC officer to realise within the enquiry period that the self-assessment is insufficient. However taxpayers are encouraged to submit the minimum necessary to make disclosure of an insufficiency. The *Veltema* judgement does not require the provision of enough information to quantify the effect on the assessment. Information will not be treated as being made available where the total amount supplied is so extensive that an officer ‘could not have been reasonably expected to be aware’ of the significance of particular information and the officer’s attention has not been drawn to it by the taxpayer or taxpayer’s representative.

82.3 Self-assessment tax return: minimum disclosure

A tax return is a series of questions, and the statutory duty of taxpayers (and advisers) is simply to answer them. The answers should be honest and non-careless. That is, one cannot always avoid error, but any error in the return should be honest and non-careless.

The standard of honesty is the ordinary standard of reasonable and honest people.¹ In practice debate normally focuses on neglect.

82.4 Carelessness

82.4.1 *Significance of carelessness*

Carelessness is relevant to time limits of assessment and to penalties.

As far as time limits are concerned, it is convenient to read s.34(1) and 36(1) TMA together:

34(1) Subject to the following provisions of this Act, and to any other provisions of the Taxes Acts allowing a longer period in any particular class of case, an assessment to income tax or capital gains tax may be made at any time not more than 4 years after the end of the year of assessment to which it relates. ...

36(1) An assessment on a person in a case involving a loss of income tax or capital gains tax brought about carelessly by the person may be made at any time not more than 6 years after the end of the year of

1 But what is that standard? It ultimately depends on the view of the judge or jury as finders of fact. Did Pepys reflect those standards when he wrote in his diary for 10 December 1660:

“This afternoon there was a Couple of men with me, with a book in each of their hands, demanding money for polemony; and I overlooked the book and saw myself set down *Samuel Pepys, gent.*, 10s for himself and for his servants 2s. Which I did presently pay without any dispute; but I fear I shall not escape so, and therefore I have long ago laid by 10l: for them; but I think I am not bound to discover myself”

The point of the entry is that he was liable to pay £10 under the Act (12 Car. II c.9) as an esquire. Pepys’ good fortune continued under the next poll tax: The entry of 20 March 1667 reads:

“I ... assessed by the late Pole-bill, where I am rated at an Esquire; and for my office, all will come to about 50l – but not more then I expected, nor so much by a great deal as I ought to be for all my offices – so I shall be glad to escape so.”

assessment to which it relates (subject to subsection (1A) and any other provision of the Taxes Acts allowing a longer period)...

(1B) In subsections (1) and (1A), references to a loss brought about by the person who is the subject of the assessment include a loss brought about by another person acting on behalf of that person.

In short, there is normally an (approximately) 4-year limit on assessments. In the case of carelessness, assessments may be made up to 6 years, and in other specified cases up to 20 years.

The taxpayer may be subject to penalties if they are guilty of carelessness. In penalty matters the carelessness must (in short) be personal carelessness of the taxpayer, not of their agents (though it is of course possible for both taxpayer and agent to be guilty of carelessness).²

82.4.2 *Meaning of “carelessness”*

A note on terminology. Enquiry Manual correctly provides:

5125 Culpability: Neglect, Negligence and Negligent Conduct
[January 2010]

The terms neglect, negligence and negligent conduct are interchangeable.

Modern drafting uses the word “careless”, defined to mean “failure to take reasonable care”.³ This is just a Plain English synonym of “negligence” or “neglect”. HMRC agree. Compliance Handbook provides:

53400. What is careless behaviour? [February 2012]

The 6-year time limit applies where income tax, capital gains tax or corporation tax has been under-assessed or over-repaid due to the careless behaviour of

- the person, see CH51600, or
- a person acting on their behalf, see CH53200.

“Careless” means a failure to take reasonable care in relation to your tax affairs.

Carelessness can be likened to the longstanding concept in general law

² Para 18(3) Sch 24 FA 2007.

³ See s.29(4) and s.118 TMA as amended; similarly the penalty provisions in Sch 24 FA 2007.

of “negligence”.

In the 1856 case of *Blyth v Birmingham Waterworks Co*,⁴ Baron Alderson said

Negligence is the omission to do something which a reasonable man, guided upon those considerations which ordinarily regulate the conduct of human affairs, would do, or doing something which a prudent and reasonable man would not do. The defendants might be liable for negligence, if, unintentionally, they omitted to do that which a prudent and reasonable person would have done, or did that which a person taking reasonable care would not have done.

There is no question of whether or not the person intended to make the inaccuracy or fail to comply with the obligation. If they did that would be deliberate, see CH53700. It is simply a question of examining what the person did or failed to do and asking whether a prudent and reasonable person taking reasonable care would have done that or failed to do that in those circumstances.

Repeated inaccuracies may form part of a pattern of behaviour which suggests a lack of care by a person in developing adequate systems for the recording of transactions or preparing tax returns. Similarly, repeated failures in relation to the relevant obligations in CH53900 to CH54100 inclusive may suggest a lack of care. It is, however, important to keep a sense of proportion. For example, repetition of the same inaccuracy would not always, of itself, indicate a failure to take reasonable care.

People do make mistakes. We do not expect perfection. We are simply seeking to establish whether the person has given the care and attention that could be expected from a reasonable person taking reasonable care in similar circumstances....

This definition will do as well as any other.

The question must be decided in the light of the position as it was at the relevant time without the benefit of hindsight. The fact that a view later turns out to be mistaken does not show that it was careless to form that view. Otherwise any judge whose decision is reversed on appeal would be guilty of carelessness and how often does that happen!

The onus of proof rests on HMRC to prove carelessness. An allegation of carelessness is a serious one and it should not be lightly made. I stress these points because HMRC ignore them and allege neglect as a matter of course, whenever carelessness is necessary to justify out of time

4 (1856) 11 Ex 781, p784.

assessments.⁵

Depending on which statutory provision is in point, it may be necessary to ascertain:

- (1) whether the taxpayer is guilty of carelessness; or
- (2) whether the taxpayer's agent is guilty of carelessness.

82.4.3 *The standard of care: taxpayers*

A taxpayer who is not an expert in taxation must leave technical tax issues to their professional advisers. When tax law is complicated a properly represented taxpayer cannot be expected to identify their advisers' mistakes. So where there are technical errors of law, the issue is normally whether the taxpayer's professional advisers have been guilty of carelessness. HMRC agree (if grudgingly):

A taxpayer who

- [1] goes to an ostensibly competent professional adviser,
- [2] provides a full and accurate account of the facts,
- [3] checks that advice to the limit of his or her ability and competence,
- [4] and then follows the agent's advice (or signs the return prepared on that basis)

has not been negligent. He or she has taken reasonable care. If it turns out that the agent has made a careless error in giving the advice or in preparing the tax return the taxpayer who has taken reasonable care will not be penalised.⁶

This wording is somewhat overfavourable to HMRC, at [2] and [3] which (depending on what nuance one puts on the expressions used) do seem to exceed a requirement of reasonable care. But the basic point made is

5 See eg International Manual which contains this revealing and extraordinary statement:

"268520 Assessing time limits [September 2011]

...If we come to the reasonable conclusion that there is a PE, or that the company is resident in the UK, there must have been careless or deliberate conduct in the failure to notify."

6 "Modernising Powers, Deterrents and Safeguards: Working with Tax Agents" 22 April 2009, accessible:

http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageVAT_RatesCodesTools&propertyType=document&id=HMCE_PROD1_029453

correct.

An interesting question is what the taxpayer should do if their advisers disagree. A safe course then (if the amounts involved make this reasonable) is to seek the advice of counsel, or more senior counsel, or a QC, but what is to be done if two tax QCs disagree or if the amounts do not justify that expense? It is suggested that the correct course is as follows:

- (1) The individual must ask himself whether one view or the other is obviously or glaringly wrong. However it is not to be expected that this will often provide a solution.
- (2) Subject to that, the individual can in principle follow whichever view suits them, provided that the person whose advice is adopted is suitably experienced, has seen the contrary advice and maintains their view. Then (even if the practitioner whose view is adopted turns out to be wrong) any error is non-careless and a reasonable-excuse error.

82.4.4 *The standard of care: tax practitioners*

The question then is what reasonable tax practitioners should do in advising or completing a tax return for a client. The standard of care is that to be expected of a reasonable practitioner.⁷

A solicitor or accountant is entitled to rely on advice given by an appropriate expert counsel (provided it is not obviously or glaringly wrong). A person who acts in this way is not careless.⁸ This rule applies in the completion of a tax return. So where counsel has advised, HMRC would normally need to allege that counsel is guilty of carelessness in order to make an out of time assessment.

What should a practitioner do if the law is so unclear that they are unable to form a view? Common examples include residence and the source of interest: in many cases the only honest answer to the question of how a court would decide is “I don’t know” or “toss a coin”. In such cases the proper course is to complete the tax return on whichever view best suits

⁷ Of course, the adviser’s duty is not merely (merely?) to understand the law. He/she must explain it, record it in writing, and identify the risk factors to the client. Is this so obvious that it is unnecessary to say? It is not: *Chandrasekaran v Deloitte & Touche Wealth Management* [2004] EWHC 1378 at [72].

⁸ *Locke v Camberwell Health Authority* [1991] 2 Med LR 249 accessible www.kessler.co.uk.

the client.

A trickier question is where professional views differ between view A and view B, the practitioner prefers view A, but view B suits the client. It is suggested the practitioner can advise the client to fill in their return on view B. Take, for example, the old chestnut problem of GWR and trusts. In my view there is no IHT charge on the death of a deemed domiciled individual who has a GWR in an excluded property trusts. Some practitioners (I think, a minority) took the view that there is a charge. Should they really advise their clients to complete the return on that basis? I would have thought not. If that were wrong, then the best advice one could give would be to change advisers, which can hardly be right.⁹

82.5 Significance of reasonable excuse

It is not possible to give a full list. The most important is s.59C TMA which imposes a 5% surcharge on tax paid more than 28 days late and another 5% on tax paid more than 6 months late. It is not a requirement that the taxpayer or their agent be guilty of carelessness. (This is no doubt why the term used is “surcharge” and not “penalty”.) Instead there is a defence for a taxpayer with a “reasonable excuse”.

82.6 Advantages of above-minimum disclosure

This section considers whether a tax return should contain more than the minimum disclosure of answering the questions asked. The “white box” section of a tax return “Any other information” is designed for this purpose, or material may of course be put in a covering letter.

Any such disclosure is strictly voluntary. Everyone who is responsible for completing tax returns has to ask questions and decide on the answers. If an answer is reached, there is in general no obligation to disclose this process of reasoning to HMRC. Failure to do so does not render answers in the return (even if they turn out to be wrong) to be dishonest or careless errors.

The CIOT used to say that clearly:

⁹ This passage was written before HMRC issued guidance accepting the view put forward in this book, which for practical purposes resolves the problem, but I retain the text as the example still illustrates the point.

*In the preparation of a tax return, there is no duty to provide more information to the tax authorities than the return requires simply because some pieces of information known to the member might support a different tax treatment from that which the member, after due consideration of all the information available to him, honestly considers to be the tax treatment.*¹⁰

That continues to be the law, and the CIOT have not changed their view, but in the 2011 version of the code they no longer have the confidence to express it in such clear and uncompromising terms:

A tax return must contain at least the minimum information required by law.¹¹

That sentence is a truism, and not in any meaningful sense guidance, for the question is to identify the information which is “required by law”. However one can infer from what follows that the CIOT view has not changed, as the passage goes on to identify reasons for *voluntary* disclosure:

In general it is likely to be in a client’s own interests to ensure that factors relevant to his tax liability are adequately disclosed to HMRC ... In addition, it may be desirable to make fuller disclosure than is strictly necessary.¹²

The fact that there is a possibility that the courts might disagree with an adviser’s view does not in itself require any disclosure. The law could not sensibly take any other view, as that possibility almost always exists, even if the law seems clear. Reader will easily bring to mind long lists of

10 CIOT, *Professional Conduct in Relation to Taxation* (2004), para 3.10.

The Keith Committee recommended that taxpayers’ doubts should be disclosed to HMRC but the recommendation was rightly rejected as impractical: see Committee on Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.6 and HMRC consultation papers “The Inland Revenue and the Taxpayer” and “Keith: Further Proposals” (1988).

11 CIOT, *Professional Conduct in Relation to Taxation* (Jan 2011), para 3.9 [2011] STI p.215, accessible www.tax.org.uk.

12 CIOT, *Professional Conduct in Relation to Taxation* (Jan 2011), para 3.10, 3.11 [2011] STI p.215, accessible www.tax.org.uk.

strange decisions, some corrected on appeal¹³ and others not,¹⁴ to illustrate the uncertainties – or (which comes to the same thing) the lottery element in litigation.

The same of course applies both ways. When HMRC assess tax to the best of their judgement, they disclose what tax they consider due, but not their doubts or reasons.

Voluntary disclosure (in the words of the CIOT, “fuller disclosure than is strictly necessary”) may be desirable for any one or more of the following reasons:

- (1) It may curtail HMRC’s enquiry period.
- (2) It may facilitate good relations with HMRC.
- (3) It may help avoid allegations of misconduct, which might later arise if the view taken turns out to be in error, and tax is due:
 - (a) Allegations of dishonesty (based on a suspicion that the taxpayer might be relying on HMRC not finding out the facts).
 - (b) Allegations of carelessness.
 - (c) Allegations of no reasonable excuse.

82.7 Voluntary disclosure to curtail enquiry period

HMRC usually have 12 months in which to begin an enquiry into a tax return. However, s.29 TMA provides an extension of time in certain cases:

- (1) If an officer of the Board or the Board discover, as regards any person (the taxpayer) and a year of assessment—
 - (a) that any income which ought to have been assessed to income tax, or chargeable gains which ought to have been assessed to capital gains tax, have not been assessed,the officer or, as the case may be, the Board may, subject to subsections (2) and (3) below, make an assessment in the amount, or the further amount, which ought in his or their opinion to be charged in order to make good to the Crown the loss of tax.
- (3) Where the taxpayer has made and delivered a return under section 8 or 8A of this Act in respect of the relevant year of assessment, he shall not be assessed under subsection (1) above—

13 For example, *Rysaffe and Grimm v Newman* [2002] STC 1388.

14 For example, *Phizackerley*.

- (a) in respect of the year of assessment mentioned in that subsection; and
 - (b) in the same capacity as that in which he made and delivered the return,
- unless one of the two conditions mentioned below is fulfilled.

I refer to these conditions as “**the culpable mistake condition**” and “**the innocent mistake condition**”. The terminology is from *Veltema*.

82.7.1 *The culpable mistake condition*

Section 29(4) TMA provides:

The first condition is that the situation mentioned in subsection (1) above was brought about carelessly or deliberately by the taxpayer or a person acting on his behalf.

This condition will not be satisfied in the absence of fraud or carelessness. That takes us to the second condition.

82.7.2 *The innocent mistake condition*

Section 29(5) TMA provides:

The second condition is that at the time when an officer of the Board—

- (a) ceased to be entitled to give notice of his intention to enquire into the taxpayer’s return under section 8 or 8A of this Act in respect of the relevant year of assessment; or
 - (b) informed the taxpayer that he had completed his enquiries into that return,
- the officer could not have been reasonably expected, on the basis of the information made available¹⁵ to him before that time, to be aware of the

15 Section 29(6) TMA provides:

“For the purposes of subsection (5) above, information is made available to an officer of the Board if—

- (a) it is contained in the taxpayer’s return under section 8 or 8A of this Act in respect of the relevant year of assessment (the return), or in any accounts, statements or documents accompanying the return;
- (b) it is contained in any claim made as regards the relevant year of assessment by the taxpayer acting in the same capacity as that in which he made the return, or

situation mentioned in subsection (1) above.

The advantage of voluntary disclosure is that HMRC cannot (after the one-year period has passed) make any further enquiries into the return. If a taxpayer wants security that the matter is closed after one year, therefore, it would be necessary to disclose relevant facts. I refer to disclosure which meets the requirements of the innocent mistake condition as “*Veltema-standard disclosure*”.

Taxpayers are entitled to weigh up the advantages of *Veltema*-standard disclosure (curtailing the enquiry period) against the disadvantages (possible costs).

82.8 *Veltema*-standard¹⁶

82.8.1 *HMRC* views

The Enquiry Manual provides:

3260 Discovery in SA years - Made Available [January 2010]

...

In *Langham v Veltema* 76 TC 259, Auld LJ considered two issues relating to s 29(6).

The first issue was ‘whether [the inspector’s] awareness or inference of actual insufficiency is required to negative the [innocent mistake] condition, or would awareness that it was questionable do’.

The second issue was ‘what is the relevant information before the Inspector on the basis of which he could be said to have been reasonably expected to be aware of an insufficiency’.

First issue

-
- in any accounts, statements or documents accompanying any such claim;
 - (c) it is contained in any documents, accounts or particulars which, for the purposes of any enquiries into the return or any such claim by an officer of the Board, are produced or furnished by the taxpayer to the officer; or
 - (d) it is information the existence of which, and the relevance of which as regards the situation mentioned in subsection (1) above—
 - (i) could reasonably be expected to be inferred by an officer of the Board from information falling within paras (a) to (c) above; or
 - (ii) are notified in writing by the taxpayer to an officer of the Board.”

¹⁶ See Gordon, “Discovery Assessments – The Consequences of the Decision in *Corbally v Stourton*” 12 PTPR 45.

In addressing this Auld LJ concluded:

‘.. it is plain from the wording of the statutory test in s 29(5) that it is concerned ... with what he could have been reasonably expected to be aware of. It speaks of an Inspector’s objective awareness, from the information made available to him by the taxpayer, of ‘the situation’ mentioned in s 29(1), namely an actual insufficiency in the assessment. ...

It is a mark of the way in which the subsection provides an objective test of awareness of insufficiency, expressed as a negative condition in the form that an officer ‘could not have been reasonably expected ... to be aware of the insufficiency. It also allows as s 29(6) expressly does, for constructive awareness of insufficiency, that is, for something less than an awareness of an insufficiency, in the form of an inference of insufficiency.’

Second issue

Auld LJ considered:

‘It seems to me that the key to the scheme is that the Inspector is to be shut out from making a discovery assessment under the section only when the taxpayer or his representatives, in making an honest and accurate return or in responding to a Section 9A enquiry, have clearly alerted him to the insufficiency of the assessment in question.’

There is more HMRC guidance in SP 1/06. This comments on valuation and accountancy issues (not discussed here) and then provides:

Taking a Different View

18. It is open to a taxpayer properly informed or advised to adopt a different view of the law from that published as HMRC’s view. To protect against a discovery assessment after the enquiry period, the return or accompanying documents would have to indicate that a different view had been adopted. This might be done by comments to the effect that the taxpayer has not followed HMRC guidance on the issue or that no adjustment has been made to take account of it. This would offer an opportunity to HMRC to take up the return for enquiry.

It is not necessary to provide all the documentation that HMRC might need to quantify that insufficiency if an enquiry into the Return is made.

19. Provided the point at issue is clearly identified and the stance adopted is not wholly unreasonable, the existence of an under-assessment or insufficiency is demonstrated by the statement that a different view of the law has been followed. In these circumstances the taxpayer achieves finality if no enquiry is opened within the statutory

time limit.

82.8.2 Case law

There is a growing body of case law and a full discussion would need a long chapter to itself.¹⁷

In *R v HMRC ex p. Pattullo*¹⁸ the taxpayer entered into a CGT tax avoidance scheme. In his return he put the following:

1. On [date] I settled an interest in possession trust with £6,000.
2. The trust is called ‘The Pattullo 2004 Life Interest Settlement’.
3. I had borrowed on commercial terms a sum of £2,665,000 from Investec Bank UK Limited and settled this amount into the trust.
4. The trustees ‘Nexus Trustee Company Limited’ used the funds to acquire a number of capital redemption contracts [and transferred them]¹⁹ to me on 4 March 2004.
5. I surrendered the Capital redemption contracts on 8 March 2004 and received redemption proceeds of £2,600,000.
6. This has given rise to a capital loss as a consequence of Section 37(1) TCGA 1992 amounting to £2,665,000.

I would have thought this made it obvious to any competent inspector exactly what had happened. However the Court of Session held that this did not reach *Veltema*-standard. The Court said:

[114] ...the white space does not contain the following:

1. A statement that Mr Pattullo was a participant in the CRC Mark II tax avoidance scheme.
2. A statement that the petitioner and his advisers had adopted a different view of the law from that published as HMRC’s namely: they had taken a view in respect of the tax treatment of Capital Redemption Contracts which is the opposite of that taken by HMRC Capital Gains Tax Manual [*sic*] at CG69004 ... is not contained within the white space.²⁰ ...

17 See Gordon, “Discovery Assessments – The Consequences of the Decision in *Corbally v Stourton*” 12 PTPR 45.

18 [2010] STC 107. Note incidentally that the Latin tag *ex parte* which has been rejected in English law usage seems to have survived in Scotland.

19 The context shows that some words like this were omitted from the law report.

20 This may be factually incorrect, the judge does not set out the relevant text of the Manual, but that does not affect the point of principle.

The judge erroneously continues:

The necessity to make such a declaration in order to comply with the duty to clearly alert has been held to exist in *HMRC v Household Estate Agents* where it was held as follows:

“Taxpayers who adopt a different view of the law from that published as HMRC’s can protect against a discovery assessment after the enquiry period. The return and accounts would have to indicate that a different view had been adopted by entering comments to the effect that they did not follow HMRC guidance on the issue or that no adjustment had been made to take account of it.”

This is a reference to a submission made by HMRC, which did not form part of the Commissioners decision in favour of the taxpayer.²¹

3. There is no explanation as to how Mr Pattullo contends that Section 37 operates in order to produce the capital loss.
4. The details other than the basics of the transactions which have been entered into are not contained within the white space.

The judge wisely does not seek to identify what details were missing.

5. There is no indication of any doubt in the disclosure that the petitioner is entitled to the loss. I accept ... that the taxpayer does not require in order to clearly alert to say there is an insufficiency as of course that is not his position. However, in circumstances such as this a reference to doubt or as I have said to the fact that it is, a position contrary to HMRC’s would be necessary to comply with the duty incumbent upon him.

In the absence of information of the type as above described an inspector of the skill and knowledge as I have earlier defined it could not in my judgment have been aware of actual insufficiency. ...

The judge does not say whether it is generally necessary to indicate a doubt. It is suggested that this should not be necessary except in special cases. There must always be a doubt when there is a white box disclosure, for if there is no doubt, what is the point of disclosure?

In the 10th edition of this work I concluded:

21 78 TC 705 at [10]. For completeness, the Commissioners decision in *Household Estate Agents* was reversed on other grounds on appeal.

One can, I think, expect some back-tracking, refinement or qualification from the Courts for taxpayers they regard as more meritorious than Mr. Pattullo.

Subsequently, a less onerous view of the *Veltema*-standard was taken in *Charlton v HMRC*²² though the taxpayer was no more meritorious. The disclosure was essentially as follows:

I acquired an AXA Isle of Man Ltd life assurance policy on [date] for £205303.

I made a partial surrender of the policy on [date] for proceeds of £192577.

I later sold my residual interest in the policy on [date] for proceeds of £9981.

The loss on sale is calculated as the difference between the sale proceeds and the cost of acquisition.

Proceeds from the partial surrender are excluded from the capital gains calculation as they have already been taken into account as a receipt in computing income for the purposes of income tax.

The DOTAS scheme number was also disclosed on the return.²³ It was not mentioned that the scheme had been held to be unsuccessful by the Special Commissioners in *Drummond v HMRC*, the taxpayers advisors having formed the view²⁴ that *Drummond* (at least as far as concerned their own scheme) was wrongly decided and likely to be reversed on appeal. It was held this met the *Veltema*-standard

82.8.3 IHT: voluntary disclosure to curtail enquiry

The IHT rules are differently worded (and more concise) but the standard of disclosure is similar. A certificate of discharge discharges “all persons from any further claim for the tax on the value transferred by the chargeable transfer concerned”. See s.239(3) IHTA. However, s.239(4) provides:

22 [2011] UKFTT 467; the position will need to be reviewed when the decision is final.

23 This did not happen in *Pattullo* where the transactions were carried out before the DOTAS rules took effect.

24 Which the tribunal found to be a reasonable view, though subsequently the Special Commissioner’s decision was upheld: *Drummond v HMRC* 79 TC 793.

A certificate under this section shall not discharge any person from tax in case of fraud or failure to disclose material facts. ...

82.9 Above-minimum disclosure for sake of good relations with HMRC

CIOT Professional Conduct in Relation to Taxation used to provide:

It may be in the client's best interest to furnish more information than he is strictly required to do because this is likely to lead to a more reasonable approach by the tax authorities, thereby saving money and time in the long run ...

In the 2010/11 edition of this work I commented:

The CIOT are tentative (note the *may*) and the validity of the point is not easy to assess: it may vary from client to client²⁵ and from time to time. It seems to me that the only tangible incentive for above-minimum disclosure is to curtail the enquiry period, and obtaining “a more reasonable approach by the tax authorities” is uncertain, unquantifiable, unenforceable and ultimately chimerical. But readers who deal directly with HMRC on a daily basis will be in a better position than I am to form a view on this issue, and this is (understandably) an attitude that HMRC wish to encourage.²⁶

The CIOT may agree, since in 2011 they watered down this passage which now reads:

In general it is likely to be in a client's own interests to ensure that factors relevant to his tax liability are adequately disclosed to HMRC

25 The trade-off may be different for large businesses who have a “client relationship manager”, where HMRC expressly offer the carrot of “far fewer interventions” in return for behaviour which meets the HMRC low risk criteria; and, conversely, the stick of “more intensive scrutiny” for “high risk customers”: see HMRC, Approach to Compliance Risk Management for Large Business, March 2007, <http://www.hmrc.gov.uk/lbo/risk-update.pdf>.

26 See comments on the “enhanced relationship” in the OECD Study into the Role of Tax Intermediaries, 2008, www.oecd.org/dataoecd/28/34/39882938.pdf and the OECD's “Engaging with High Net Worth Individuals on Tax Compliance” (May 2009); http://www.oecd.org/document/5/0,3746,en_2649_33749_42902277_1_1_1_1,00.html.

because:

- His relationship with HMRC is more likely to be on a satisfactory footing if he can demonstrate good faith in his dealings with them ...²⁷

This debate should be seen in the context of a broader fundamental controversy concerning the relationship between the Revenue and the taxpayer. The traditional view has been that:

- (1) The relationship is adversarial: the interests of HMRC and taxpayer are distinct.
- (2) The relationship should be characterised by adherence to legal rules (substantive tax rules determining the amount of tax due, supplemented by procedural rules such as courtesy, honesty and efficiency).

A rival (and more recent²⁸) view is the opposite:

- (1) The relationship should be a mutual one, taxpayer and state working together in harmony towards a common goal, to ascertain the proper amount of tax.
- (2) The proper amount of tax is defined only partly in legal rules but also discernable from a more insubstantial spirit of the rules.²⁹ (Perhaps HMRC consider themselves the arbiter of this spirit, or perhaps no arbiter is needed: since the point is not governed by law, the question can be fudged.)³⁰

27 CIOT, *Professional Conduct in Relation to Taxation* (Jan 2011), para 3.10, 3.11 [2011] STI p.215, accessible www.tax.org.uk.

28 It is difficult to identify a specific date when this school of thought emerged, but I think it reflects a change of administration around the beginning of the second term of the Labour Government (2001). Contrast the discussion on the term “compliant” in 41.6.4 (Investment manager condition E: customary remuneration).

29 A good example is the Code of Practice on Taxation for Banks, (December 2009) which prescribes that banks should “not undertake tax planning that aims to achieve a tax result that is contrary to the intentions of Parliament; ... not engage in tax planning other than that which supports genuine commercial activity... Remuneration packages for bank employees ... should be structured so that the bank reasonably believes that the proper amounts of tax and national insurance contributions are paid... Relationships with HMRC should be transparent and constructive, based on mutual trust [adding with jarring realism: “wherever possible”]. The features of this relationship should include disclosing fully the significant uncertainties in relation to tax matters... engaging in a co-operative, supportive and professional manner in all interactions ... working collaboratively....”

30 HMRC say: “Any disagreements arising under the Code will be dealt with using existing processes.” See “A Code of Practice on Taxation for Banks - Consultation Response Document” (December 2009).

The controversy raises empirical questions of whether HMRC and taxpayers actually regard the later as the correct model of their relationship, or pretend to do so, and political and moral questions of whether they should do so, or the extent to which they should do so. These are important questions. They are not legal questions³¹ and they lie beyond the scope of this book, but they will not go away. For a recent restatement of the traditional view, see the first speech of Anthony Thomas, president of the CIOT:

We need to return to the “healthy tension” between HMRC and the tax profession that existed ten to 20 years ago: no special relationships, no cosy conferences; no favours, deals and understandings; no inside tracks and private access. ... Senior tax officials did not subject directors, businesses and the professions to the kind of lectures one would expect from a politician. The job of civil servants is, and always has been, to apply the rule of law in an even handed manner.³²

82.10 Above-minimum disclosure to avoid allegation of misconduct

Disclosure may be sensible to avoid allegations of misconduct, which might later arise if the view taken turns out to be in error, and tax is due: that is, allegations of dishonesty, carelessness or absence of “reasonable excuse”. Cases where disclosure is needed for this reason are rare, but examples are:

- (1) Where the taxpayer has carried out a complex, artificial, and aggressive tax avoidance scheme. In such a case (even though it is reasonably considered the scheme should succeed) full disclosure of the transactions should be made so HMRC have a proper opportunity to review the matter. In practice such cases will generally be caught by the tax avoidance scheme disclosure rules so the issue of disclosure on a tax return does not arise.
- (2) Where the taxpayer is taking a view which is contrary to a HMRC view which has been formally published in a SP or RI. The same applies if the HMRC view is clearly known from more informal

31 HMRC rightly say (under the heading “The Rule of Law”): The Code is not law. See “A Code of Practice on Taxation for Banks - Consultation Response Document” (December 2009).

32 “We Need Trust”, *Taxation* (2 June 2011) p.7.

sources, such as the HMRC Manuals, or informally published correspondence, unless the HMRC view expressed is fairly clearly wrong.

- (3) Where the adviser is following a view in the profession which they themselves do not share.

That should be regarded as best practice rather than a requirement.

82.11 IHT reporting requirement on creation of settlement

Section 218(1) IHTA provides:

Where any person, in the course of a trade or profession carried on by him, other than the profession of a barrister,³³ has been concerned with the making of a settlement and knows or has reason to believe—

- (a) that the settlor was domiciled in the UK, and
- (b) that the trustees of the settlement are not or will not be resident in the UK,

he shall, within three months of the making of the settlement, make a return to the Board stating the names and addresses of the settlor and of the trustees of the settlement.

The duty of disclosure rests on a person (“the practitioner”) acting in the course of their trade or profession. The duty rests on the firm or company acting and not directly on its employees.

Barristers are exempt. The reason must be that they will usually be instructed by others who are subject to the duty.

The practitioner must be concerned with the making of a settlement. This would include not only solicitors who might draft the settlement but other advisers who advise in relation to the creation of a settlement, even if the actual execution of the settlement were delegated to foreign advisers.

The practitioner might advise on the matter generally, leaving the client to take whatever action they wish in light of the advice, perhaps in conjunction with the trustees; in such circumstances they are probably not “concerned with the making of a settlement”; this presupposes the settlement had been established. What if the client had decided against a non-resident settlement after all or wanted to think about it? The

³³ Section 272 IHTA provides: “barrister” includes a member of the Faculty of Advocates.

practitioner may not know what the client eventually decided to do. The obligation under s.218 must be restricted to those who are able to provide the relevant information.

The practitioner must know or have reason to believe that the settlor is domiciled in the UK. A settlement may have more than one settlor.³⁴ Suppose one settlor is domiciled in the UK but the other is not. Does the reporting requirement arise? On a literal construction one could not say “the settlor” is UK domiciled and the reporting requirement would not arise. A purposive construction suggests that the duty does arise. That is the better view at least if the foreign domiciled settlor only provides a nominal amount. A practitioner should err on the side of caution.

A question also arises about the time when the settlor’s domicile is relevant. Section 218 merely says that it applies if the settlor *was* domiciled in the UK. Does this mean domiciled in the UK at the time the settlement was made? Or does it mean that the settlor had at any time been domiciled in the UK? Context and common sense dictate that the provision is referring to the domicile of the settlor at the time the settlement was made because that is the date that matters for IHT.

IHT Manual para 42993 [April 2010] formerly provided³⁵:

42993 Section 218 notices [April 2010]

Where settlor is a company

A s.218 notice is still required because s.218 refers to settlors domiciled in the UK

- ‘settlor’ in relation to a settlement includes any person by whom the settlement was made (s.44 IHTA)
- In terms of the Interpretation Act 1889 Rule 19 ‘the expression person shall, unless the contrary appears, include any body of persons corporate or unincorporate’³⁶
- In general a company is domiciled where it is registered – *Gasque v IRC* [1940] 2 KB 80.

So where a non-UK resident [Employee Benefit Trust] is established by a company registered in the UK a s.218 notice is mandatory.

34 “Settlor” for this purpose has the usual IHT meaning: see 75.1 (Who is the settlor?). The separate settlements fiction does not apply for this purpose: see 60.4 (The separate settlements fiction).

35 HMRC was rewriting the guidance at the time of publication.

36 The text is 30 years out of date; the reference should now be to Sch. 1 Interpretation Act 1978, but the point is still valid.

The person must know or have reason to believe that the trustees of the settlement are not or will not be resident in the UK

In marginal cases the practitioner may be placed in difficulty. It may be necessary in some cases to disclose the creation of the settlement to HMRC out of caution.

There is no requirement under s.218 to notify the amount or nature of the settled property. However, HMRC have power in s.219 IHTA to require information to be provided by “any person” and they would know from the notification to whom further enquiries could be directed.

Sch. 5A TCGA imposes overlapping reporting requirements relating to non-resident settlements. But s.218 IHTA is wider in some respects. It applies to settlements which are not necessarily non-resident under the CGT rule.³⁷ Thirdly, the CGT duty is imposed on the settlor. The IHT duty is on the professional advisers.

For the position where IHT DTA relief applies see 68.9 (Claims for foreign IHT credit relief).

82.11.1 *Non-resident practitioner*

It is suggested that no duty will arise on foreign practitioners who have no UK connection; the usual territorial limitation must apply: see *Clark v Oceanic* 56 TC 183. At first sight the requirement that the settlor is domiciled in the UK is sufficient to meet the territorial requirement so that no further territorial limitations should be implied. But the domicile connection may be a faint one. Suppose an individual leaves the UK in 2000 and settles in the USA, and in 2003 he makes a settlement. The individual may still be deemed domiciled in the UK, but it is not realistic to expect the US practitioner to file a s.218 return (particularly having regard to the fact that the USA IHT DTA provides some IHT exemption).

82.11.2 *Penalty for failure to disclose*

Failure to make the return gives rise only to a nominal penalty.³⁸ More seriously, the practitioner faces criminal liability for fraud on HMRC or conspiracy to defraud if:

37 For IHT Trust residence, see 4.14 (Trustee residence for IHT).

This is quite different from the IT/CGT definition.

38 Section 245A(1) IHTA 1984.

- (1) the practitioner dishonestly fails to disclose in breach of the duty to do so; or
- (2) any person dishonestly agreed with another practitioner or a client that there shall be no disclosure in breach of the duty to do so.

82.11.3 *The future*

A consultation paper was published December 2009.³⁹ I predict substantially increased penalties for HMRC's customers and their advisors will arrive in due course.

82.12 Reporting on death of foreign domiciled individual

I consider here the reporting duty of personal representatives on the death of an individual not domiciled in the UK. The legislation draws a distinction between:

- (1) “**excepted estates**”; and
- (2) “**ordinary estates**”; I use this term to describe an estate which is not an “excepted estate”.

For the position where IHT DTA relief applies see 68.9 (Claims for foreign IHT credit relief).

82.12.1 *Ordinary estates*

Section 216(1) IHTA provides (so far as relevant):

Except as otherwise provided by this section or by regulations under section 256 below, the personal representatives of a deceased person ... shall deliver to the Board an account specifying to the best of his knowledge and belief all appropriate property...and the value of that property.

“Appropriate property” is defined in s.216(3) IHTA which provides (so far as relevant):

Subject to subsections (3A) and (3B) below,⁴⁰ where an account is to be

³⁹ “Modernising Powers, Deterrents and Safeguards: Tackling Offshore Tax Evasion”.

⁴⁰ Subsections (3A) and (3B) are not relevant here.

delivered by personal representatives ... the appropriate property is—

- (a) [i] all property which formed part of the deceased's estate immediately before his death
 - [ii] (or would do apart from s.151A(3)(b) or 151C(3)(b) above),
 - [iii] other than property which would not, apart from section 102(3) of the Finance Act 1986, form part of his estate; and
- (b) all property to which was attributable the value transferred by any chargeable transfers made by the deceased within seven years of his death.

Excluded property does not form part of a person's estate immediate before death, so there is no statutory duty to disclose details of excluded property in a person's estate on death. Nevertheless Question 22 of HMRC form IHT 401 asks:

Did the deceased leave any assets outside the UK? If yes give approximate value.

There is no legal duty to supply this information.⁴¹ But refusal to answer the question may give rise to further enquiries.

There is no statutory duty to disclose details of gifts of excluded property which the deceased made before death. (The gifts do not fall within s. 216(3)(b) IHTA since a gift of excluded property is not a transfer of value.) However the IHT Account (form IHT 400 April 2010) Question 30 provides:

Gifts and other Transfers of Value: Did the deceased make any lifetime gifts or other transfers of value on or after 18 March 1986?

It is considered that the reference in the question to “gifts” means gifts which are transfers of value so that it is proper to answer “no” even if the deceased made gifts of excluded property. The guidance in IHT 400 Notes (April 2010) shows that the question is not read literally:

41 HMRC form D2 (Notes, 12/05) tacitly recognised this:

“If the deceased was domiciled outside the UK when they died, any assets they owned abroad will not be liable to inheritance tax. Even so, you can help us to deal with this estate more quickly if you can give us a rough idea of the value of all of the deceased's estate outside the UK.”

I have not found a similar comment in the current forms which were revised in 2008.

Gifts and other transfers of value

You can enter 'No' and do not need to provide any details if the only gifts made by the deceased were:

- to their husband, wife or civil partner and spouse or civil partner exemption applies
- outright gifts to any individual which do not exceed £250 in any one year. (These will be covered by the small gifts exemption.)
- outright gifts to any individual of money or listed stocks and shares that are wholly covered by the annual exemption
- outright gifts made regularly from income that did not exceed £3,000 in total each year.

These exemptions are detailed on page 72 of this guide. If the deceased had made any other gifts or 'transfers of value' since 18 March 1986, including transfers into trust, payment of insurance premiums for the benefit of another person, advances out of a trust fund or any assets that were taken out of a trust before death, you must fill in Schedule IHT403 *Gifts and other transfers of value*. In general, a 'transfer of value' is any transaction where the deceased did not receive full value in exchange.

Question 45 IHT 400 provides:

Assets held in trust: Did the deceased have any right to benefit from any assets held in trust (including the right to receive assets held in a trust at some future date)? No/Yes – Use Schedule IHT418.

The word "right" only includes fixed interests, it is not apt to describe discretionary trusts. But it appears that "right to benefit" here is used (confusingly) to mean a right to an estate interest in possession. IHT 400 Notes (April 2010) provides:

Schedule IHT418 Assets held in trust

You must complete Schedule IHT418 if the deceased had an interest in possession and the trust is one of the following.

- A trust that was set up before 22 March 2006 from which the deceased was entitled to benefit.
- An immediate post-death interest.
- A disabled person's interest.
- A transitional serial interest.

This would include an excluded property trust where the deceased had an estate interest in possession. In such a case the answer to Question 45 is,

“yes”. However only limited information needs to be disclosed in form IHT 418. IHT 400 Notes (April 2010) provides:

Foreign trusts If the deceased had a right to benefit from settled property where the assets are overseas and the person who set up the trust was domiciled outside the UK when the trust was created, please answer questions 2 to 5 only.

82.12.2 *Excepted estates*

The IHT (Delivery of Accounts) (Excepted Estates) Regulations 2004 provides different rules for so-called “excepted estates”. Regulation 4(1) provides:

An excepted estate means the estate of a person immediately before his death in the circumstances prescribed by paras (2), (3) or (5).

Thus there are three categories of excepted estate. The first two apply to a person who dies domiciled in the UK.⁴² The third applies where:

- (a) the person died on or after 6 April 2004;
- (b) that person was never domiciled in the UK or treated as domiciled in the UK by section 267 [IHTA];
- (ba) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions⁴³ applies; and

42 It is doubtful whether a person who is deemed domiciled qualifies under these categories. Reg. 4(5)(b) distinguishes between someone domiciled and someone treated as domiciled in the UK. However, it would be absurd if the estate of a deemed UK domiciliary can never be an excepted estate so it is suggested that the reference to “domiciled in the UK” includes someone deemed domiciled for IHT purposes. But HMRC may disagree. IHT Manual 6020 states that a deemed domiciliary’s estate cannot qualify as an excepted estate regardless of the value. The Manual is out of date (as it often is) and is here considering the 2002 Regulations, but the point is the same.

43 Reg 4(9) provides:

“In this regulation ‘the alternatively secured pension fund provisions’ means the following sections of the 1984 Act—

- (a) section 151A (person dying with alternatively secured pension fund);
- (b) section 151B (relevant dependant with pension fund inherited from member over 75); and
- (c) section 151C (dependant dying with other pension fund).”

- (c) the value of that person's estate situated in the UK is wholly attributable to cash⁴⁴ or quoted shares or securities passing under his will or intestacy or by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination, the gross value of which does not exceed £150,000.⁴⁵

However, while a so-called excepted estate is not required to put in an account *under s.216 IHTA* it is required to deliver more or less the same information set out in reg.6(2):

The information specified for the purpose of para (1) is—

- (a) the following details in relation to the deceased—
 - (i) full name;
 - (ii) date of death;
 - (iii) marital or civil partnership status;
 - (iv) occupation;
 - (v) any surviving spouse or civil partner, parent, brother or sister;
 - (vi) the number of surviving children, step-children, adopted children or grandchildren;
 - (vii) national insurance number, tax district and tax reference;
 - (viii) if the deceased was not domiciled in the UK at his date of death, his domicile and address;
- (b) details of all property to which the deceased was beneficially entitled and the value of that property;
- (c) details of any specified transfers, specified exempt transfers and the value of those transfers;
- (d) the liabilities of the estate; and
- (e) any spouse, civil partner or charity transfers and the value of those transfers.

It is considered that there is no obligation to give information about excluded property. This is a purposive construction, because, strictly, excluded property is “property to which the deceased was beneficially entitled” even though it does not form part of their estate for IHT purposes immediately before their death. However, it is absurd to say that there is an obligation on excepted estates to disclose excluded property, when

44 IHT Manual 6018 shows that HMRC sensibly construe “cash” widely, so as to include a bank account.

45 See reg.4(5).

there is no such obligation on ordinary estates. In practice the relevant form (IHT 207) does not ask about non-UK property.

82.12.3 *Territorial limitations*

The statutory provisions (as recast in 2004) utterly fail to provide any territorial limitation on the duty to disclose. They merely provide two regimes of disclosure, one for ordinary estates and one for excepted estates. The Courts must devise some territorial limitation, as they have on occasion done elsewhere: *Clark v Oceanic* 56 TC 183. The question is, what should it be? It is suggested that no duty applies to foreign personal representatives of excepted estates. But disclosure in one form or another will be required in all cases where the personal representatives need a UK grant of probate.

82.12.4 *Commentary*

The 2004 Regulations impose a significant burden on (primarily) small estates which would not formerly have had to provide these details. Whether this is a necessary burden is a matter on which views may differ. However, the chutzpah in the explanatory notes still deserves to be recorded:

7. Impact

7.1 These Regulations do not impose new costs on business or charities.

82.12.5 *Conclusion*

Disclosure is required for an excepted estate even though no tax is payable on the death (eg because the property falls within the nil rate band). How well observed this requirement is in practice is another matter. However, if a foreign domiciled individual wishes to ensure that their personal representatives are under no duty to put in UK returns on their death, they must not have any UK situate property at the time of their death and should appoint foreign executors. Then there is no duty to disclose the assets of the estate.

APPENDIX ONE

SOME COMMON STATUTORY TERMS

App. 1 Introduction

This appendix considers some ubiquitous statutory terms:

- United Kingdom,
- Spouse and Civil Partner,
- “Living together as husband and wife”.

App. 1.1 “United Kingdom” and related expressions

App. 1.1.1 “*United Kingdom*”

Interpretation Act 1978 Sch 1 provides that “United Kingdom” means Great Britain and Northern Ireland.

The Isle of Man and the Channel Islands do not form part of the UK.

App. 1.1.2 “*Great Britain*”

“Great Britain” means England, Wales and Scotland: s.1 Union with Scotland Act 1706 provides:

That the two Kingdoms of England and Scotland shall upon the First day of May which shall be in the year One thousand seven hundred and seven and forever after be united into one Kingdom by the name of Great Britain ...

App. 1.1.3 “*England*”

The definition of “England” is not usually an issue for tax. However, for completeness, para 5(a) Sch 2 Interpretation Act 1978 provides:

in any Act passed before 1st April 1974, a reference to England includes Berwick upon Tweed and Monmouthshire and, in the case of an Act passed before the Welsh Language Act 1967, Wales.

App. 1.1.4 *Territorial sea*

“Territorial sea” extends 12 nautical miles from shore, further defined in the United Nations Convention on the Law of the Sea.

Section 1013 ITA provides:

The territorial sea of the UK is treated for the purposes of the Income Tax Acts as part of the UK.

Section 276 TCGA and s.830 ICTA make the same point for CGT and corporation tax. Section 172 SSCBA makes the same point for NIC.

There is no equivalent provision in the IHT legislation so the territorial sea is not part of the UK for IHT purposes (though this will not often be important).

App. 1.2 **Meaning of “spouse”**

The word “spouse” is used frequently in tax legislation so its meaning is important. The IHT Manual provides:

11032. Definition of spouse and civil partner [July 2011]

The IHT legislation does not define ‘spouse’ or ‘civil partner’ so the definitions come from general law. Consequently, the exemption applies to transfers between people who are lawfully married to each other at the time of the transfer and to transfers between people who are registered as civil partners of each other at the time of the transfer.

Spouses include

- people who are legally married but separated
- parties to a valid polygamous marriage.¹ The marriage confers the Section 18 IHTA 1984 exemption on all transfers to all the spouses of

¹ [Author’s note] See CG Manual:

22070 Definitions [March 2006]

A polygamous marriage may be recognised as valid in UK law if it was valid in the country in which the ceremony occurred and, broadly, it was contracted by persons domiciled in that country.

the transferor or deceased who qualify under Section 18 IHTA 1984. Where the Section 18(2) IHTA 1984 limit applies because of foreign domicile of those spouses (IHTM11033), the total exemption (including any similar lifetime exemptions) may not exceed the Section 18(2) IHTA 1984 limit of £55,000.

The following are not spouses

- people who are living together but not lawfully married, however long the relationship may have lasted (in England, Wales and Northern Ireland)
- In Scotland the one form of irregular marriage that has been recognised by Scots law is that by cohabitation with habit and repute. This arises where a man and woman cohabit together as husband and wife and behave towards each other as such for a considerable length of time, so it is generally believed by the society and neighbourhood in which they live, and among their friends and relatives that they are married. They are then presumed to be married, although it is impossible to state precisely the place and a time when they exchanged the consent which is essential for marriage. Marriage by cohabitation with habit and repute was abolished by The Family Law (Scotland) Act 2006. It will remain an issue for the Courts for some time to come, however, since claims can still be admitted if based on a period of cohabitation that occurred before the commencement of the Act. If it is claimed that this common law style of marriage entitles the parties to the exemption under Section 18(1) IHTA 1984 in either a death or lifetime situation you should refer the file to Technical.
- parties to a bigamous marriage
- people who were formerly lawfully married but divorced before the date of death/transfer

The argument that discrimination between married and unmarried couples is in breach of Art. 14 ECHR (Prohibition of discrimination) has failed, though only narrowly.²

UK legislation distinguishes between a civil partner and a spouse in its terminology and, strictly, the word “spouse” does not (in the absence of special context) include a civil partner. However for (almost) all practical purposes the two are in the same position and in loose language they are elided. It is tiresome to constantly refer to spouse/civil partner. So in the discussion in this book “spouse” is generally used to mean either a spouse

² *Holland v IRC* [2003] STC (SCD) 43; *Burden v UK* [2007] STC 252.

or a civil partner. The Law Commission does the same³ and I expect this will become standard usage outside the very formal context of statute and trust drafting.

For the definition of “spouse” in special contexts, see:

26.3.4 (Meaning of “spouse/civil partner” in settlement provisions)

66.12.2 (Meaning of “spouse” in US/UK IHT DTT)

App. 1.3 Meaning of “civil partner”

The IHT Manual provides:

11032. Definition of spouse and civil partner [July 2011]

...

Civil partners are same-sex couples in the UK who have entered into a contractual partnership formally recognised by law under the Civil Partnership Act 2004, which came into effect on 5 December 2005.

The term ‘civil partners’ will not apply to those individuals whose civil partnership had been dissolved by a court order before the date of death/transfer

Schedule 1 Interpretation Act 1978 provides:

“Civil partnership” means a civil partnership which exists under or by virtue of the Civil Partnership Act 2004 (and any reference to a civil partner is to be read accordingly).

This takes us to s.1(1) Civil Partnership Act 2004 which provides:

A civil partnership is a relationship between two people of the same sex (“civil partners”)—

- (a) which is formed when they register as civil partners of each other—
 - (i) in England or Wales (under Part 2),
 - (ii) in Scotland (under Part 3),
 - (iii) in Northern Ireland (under Part 4), or

3 Law Commission, *Intestacy & Family Provision Claims on Death* (December 2011), para 1.38: “The legal treatment of husbands, wives and civil partners is identical in the law of intestacy and family provision claims, and for brevity we use the term “spouse” in this Report to refer to all three...”

- (iv) outside the United Kingdom under an Order in Council made under Chapter 1 of Part 5 (registration at British consulates etc. or by armed forces personnel), or
- (b) which they are treated under Chapter 2 of Part 5 as having formed (at the time determined under that Chapter) by virtue of having registered an overseas relationship. ...

Thus there are two types of civil partnership: those made under UK law, and overseas relationships.

App. 1.3.1 *Overseas relationships treated as civil partnerships*

Section 212(1) CPA 2004 provides:

For the purposes of this Act an overseas relationship is a relationship which—

- (a) is either
 - [i] a specified relationship or
 - [ii] a relationship which meets the general conditions, and
- (b) is registered (whether before or after the passing of this Act) with a responsible authority in a country or territory outside the United Kingdom ...

Thus there are two types of overseas relationships: specified ones, or those not specified which meet the general conditions.

Section 213 and schedule 20 CPA 2004 defines “specified relationships”:

Country or territory	Description
Andorra	unió estable de parella
Australia: Tasmania	significant relationship
Belgium	cohabitation légale, wettelijke samenwoning or gesetzliches zusammenwohnen
Belgium	marriage
Canada	marriage
Canada: Nova Scotia	domestic partnership
Canada: Quebec	union civile or as civil union
Denmark	registreret partnerskab
Finland	rekisteröity parisuhde or as registrerad partnerskap
France	pacte civile de solidarité
Germany	Lebenspartnerschaft
Iceland	staðfesta samvist
Luxembourg	partenariat enregistré or eingetragene partnerschaft
Netherlands	geregistreerde partnerschap

Netherlands	marriage
New Zealand	civil union
Norway	registrert partnerskap
Spain	marriage
Sweden	registrerat partnerskap
USA: California	domestic partnership
USA: Connecticut	civil union
USA: Maine	domestic partnership
USA: Massachusetts	marriage
USA: New Jersey	domestic partnership
USA: Vermont	civil union

Section 214 CPA 2004 explains the “general conditions”:

The general conditions are that, under the relevant law—

- (a) the relationship may not be entered into if either of the parties is already a party to a relationship of that kind or lawfully married,
- (b) the relationship is of indeterminate duration, and
- (c) the effect of entering into it is that the parties are—
 - (i) treated as a couple either generally or for specified purposes, or
 - (ii) treated as married.

I understand this includes:

- USA: Hawaii
- Switzerland: Cantons of Genève and Zurich.

I would be interested if a reader could identify a website which provides up to date lists of jurisdictions that satisfy the general conditions.

App. 1.3.2 *Pre-2000 civil partnerships under foreign law: transitional rules*

Section 215 CPA 2004 provides:

215 Overseas relationships treated as civil partnerships: the general rule

- (1) Two people are to be treated as having formed a civil partnership as a result of having registered an overseas relationship if, under the relevant law, they—
 - (a) had capacity to enter into the relationship, and
 - (b) met all requirements necessary to ensure the formal validity of the relationship.

- (2) Subject to subsection (3), the time when they are to be treated as having formed the civil partnership is the time when the overseas relationship is registered (under the relevant law) as having been entered into.
- (3) If the overseas relationship is registered (under the relevant law) as having been entered into before this section comes into force, the time when they are to be treated as having formed a civil partnership is the time when this section comes into force.

Civil partners with existing overseas relationships became civil partners in England law without doing anything more.

For most tax purposes, the position of civil partners is the same as spouses. It is clumsy to say “spouse or civil partner”, or “marriage or civil partnership”. So in this book (unless otherwise indicated) the word “spouse” includes civil partners; the word “marriage” includes civil partnerships; and widow/er includes a surviving civil partner.

In strict language (and in contexts other than tax, strict language may be the norm) these terms are not so widely construed, and “spouse” will not include civil partner, etc.

App. 1.4 “Living together as husband and wife”

The Claimant Compliance Manual provides:

15040 Couples who are Unmarried and Not Civil Partners [April 2010]

... The legislation does not say what conditions must exist before we will conclude that a couple are LTAHAW [living together as husband and wife]. We have therefore adopted the approach used by the DWP. Using the same approach for same-sex couples means they are not treated any more or less favourably. Since 1977 the Department for Work and Pensions (DWP - formerly the Benefits Agency) has followed a standard approach to the question of whether a man and woman are living together based on a list of criteria to be considered both individually and as a whole. Working Families' Tax Credit (WFTC) adopted the same criteria and this has continued for WTC and CTC. This approach ensures unmarried couples are not treated any more or less favourably than married couples.

Living together as husband and wife (LTAHAW) has its normal meaning in every day language, but the Courts and administrative practice have developed a number of criteria to help apply that meaning to every day situations. They are:-

- living in the same household - CCM15070-CCM15075
- stability of relationship - CCM15080

- financial support - CCM15090
- dependent children - CCM15100
- public acknowledgement - CCM15110

Remember that these are only indicators to help you form a sustainable view of whether a couple are living together for the purposes of the tax credit claim. They are not intended as a crude checklist and you should not apply a blanket “four out of five ticked” type test. The weight and worth of each indicator will vary from relationship to relationship and you should arrive at your conclusions on the balance of evidence, based on the facts (see CCM15060). However, you need to be aware of the changing nature of relationships - see CCM15045.

15045 Modern-Day Relationships [April 2010]

Since the LTAHAW criteria was devised in the 1970’s, the United Kingdom has undergone major social and economic changes. These have had an impact on the nature of personal relationships.

In the 1970’s a typical couple might not have lived together before marriage and, after marrying, they might have pooled the whole of their income with the man as the main breadwinner and the woman possibly working part-time and responsible for childcare and running the household.

By 2004, 70% of first domestic partnerships involved unmarried couples and it is now common for each party in a couple to work full-time, keep their own incomes and bank accounts and perhaps only pay money into a joint account for items of joint responsibility. Often because of demands on time both parties share childcare and domestic tasks.

It may therefore be more difficult to identify the criteria shown at CCM15040 but you should still explore all of these items.

15060 Balance of Evidence [October 2008]

It is not possible to lay down hard and fast rules about the weight and worth of the various criteria in establishing that a couple are living together. You will need to decide every case on its merits and on the balance of evidence. Sometimes the conclusion will be obvious, and at other times it will be a very fine judgement. Although you must consider each of the five criteria listed at CCM15040 you might not be able to gather evidence for each of them. For example the claimant might say they have no idea what others think of their relationship.

If you are having difficulties in making up your mind about what the evidence means, you may find it helpful to list the evidence on both sides of the argument. This should help you identify where the balance of evidence lies – though you should not base your decision on a crude numerical assessment, as some elements of the evidence may be far more critical than others.

If you still cannot decide, you may want to discuss the issues with your manager, or with another colleague in your team. If the issues are particularly difficult, you may, after consulting your manager, want to refer to your Claimant Compliance Group Manager.

Where there is no reply to your opening letter – see CCM15370.

15070 Living in the Same Household [April 2010]

The claimant may admit they live in the same household as the suspected partner but that does not automatically mean they are Living Together as Husband and

Wife (LTAHAW) or Living Together as Civil Partners (LTACP).

There may be any number of reasons why a man and woman share accommodation. They include:

- a couple with disabilities or ill health may care for and support each other
- one of them may require care/support to live a normal life
- the claimant may provide accommodation for a friend, or relative or tenant
- the claimant may have been provided with accommodation by a friend, relative or landlord in that person's own home.
- a formerly married or unmarried couple may still live in the same house until they reach a financial agreement. During periods when property prices or rents are high, the property market is sluggish, or negative equity is common, former couples may be compelled by economic necessity to share the same premises for some time after the relationship has ended- see CCM15395

The relevant factors to consider when determining whether a couple are living in the same household may be:-

- how/why the couple came together
- is rent received or paid? If so the income will (unless it is exempt under the rent a room scheme) be treated as income in the hands of the recipient.
- what kind of accommodation they share
- if there is no formal rent agreement how are costs shared? How would exceptional expenditure be met? For example, if major unexpected repairs had to be carried out or home improvements made.
- any absences from the household - why and how often - see CCM15073
- any other reasons for them living in the same household.

Even if you establish a couple are living in the same house this does not necessarily mean they are LTAHAW or LTACP. Before you can amend the award you must therefore consider the other criteria detailed at CCM15080-CCM15110.

15073 Absences From The Home [April 2010]

Absences from the home, whether occasional or regular, do not necessarily mean that a couple is not LTAHAW or LTACP. For instance, the absence could be due to:-

- work (eg. oil rig worker or long distance lorry driver)
- hospital in-patient
- holiday
- visit to relatives
- higher education
- custody of less than 52 weeks
- armed forces

This list is not exhaustive, but gives some suggestions to the types of absence. The common feature of all of these reasons for absence is their temporary nature. There is no specific period of time after which an absence ceases to be temporary and you will need to draw conclusions based on the particular facts of each case. Factors to be considered include:

- the length of the absence
- how much longer it is expected to last

- to what extent the couple have maintained contact
- their future intentions

One situation you might encounter is where the partner works away for a few days at a time and either lives with friends or in hotels/bed and breakfast accommodation. They only return to the claimant's home for a couple of days at a time, the suggestion is this is purely to see the children and they stay at the claimant's home as they have nowhere else to stay in the area. As well as exploring the other criteria described in CCM15080-CCM15110 you will need to establish

- the reason why they have this arrangement
- how long has the arrangement lasted
- how much longer is it likely to last?
- what would happen if the partner lost their job?

15075 Undisclosed Partner has No Other Address [April 2010]

A claimant may accept that the suspected partner uses their address for mailing purposes. This could be for:

- tax and benefit purposes
- financial purposes (bank account, credit card, loan)
- for motor vehicle purposes (insurance, vehicle registration)

The claimant might suggest this is because the suspected partner has no fixed abode and simply drifts around a series of friends or because their mail is not secure at their own home.

You are entitled to ask for evidence of the suspected partner's other accommodation address and often an appeal tribunal will ask for this sort of information. However, you cannot demand that they provide such information nor can you say that if they do not provide evidence of an alternative address you will treat them as LTAHAW or LTACP and terminate their award.

The absence of such evidence is not conclusive proof that the claimant is living with the suspected partner. Where the claimant cannot provide such evidence you must still look at all of the other criteria and decide their various strengths and weaknesses. In addition, you should consider whether it is reasonable for the suspected partner to be using the claimant's address.

15080.Stability of Relationship [April 2010]

The length of time a couple have been together does not necessarily indicate how stable the relationship is. At one end of the scale you may come across couples who have known each other only a few weeks or days, but who have moved in together with the firm intention of staying together.⁴ At the other end of the scale may be couples who have divorced after say 25 years of marriage and who are still both occupying the formal marital home until they can afford to live apart. Some couples may also have a history of repeated temporary splits and

4 The RDR Manual makes the same point:

33030. Relevant person - definition [July 2010]

... There is no minimum period for cohabitation; it is a question of fact as to whether two individuals are living together as spouses or civil partners.

reconciliations.

Relevant factors may be: –

- on what basis they split household chores and responsibilities, such as cooking, cleaning and paying bills
- whether they are both involved in caring for any children who live in the household
- whether they tend to spend their leisure time together or separately
- whether they normally take joint holidays
- whether they plan any future activities or responsibilities jointly or separately
- whether they intend to get engaged or married
- whether the relationship has a volatile history ie. the couple is known to have had several splits and reconciliations.

An established pattern of domestic or financial activity will usually indicate an established relationship.

15090 Financial Support [April 2010]

How a couple organise their finances will vary from couple to couple. Relevant factors may be:

- the existence of joint accounts or investments. If the claimant claims that the joint account is being maintained because one of them is credit blacklisted, does the pattern of transactions suggest that the other person is withdrawing his/her wages for their own use? Or are there indications that the wages are available to meet general household expenditure?
- the extent to which money and other financial resources are pooled.
- who pays the household expenses?
- whether the suspected partner makes regular payments to the claimant, and if so, what they are for.
- whether the suspected partner would provide financial support if the claimant's income ceased.
- whether the claimant would support the suspected partner if their income ceased.
- whether a set amount of maintenance to be paid by the absent parent following a decision by the CSA or a binding agreement between the parties.

At any meeting you should attempt to establish the claimant's incomings and outgoings so that you can see whether they could exist on their own income. If you have already seen bank statements and household bills you should be ready to challenge suspect items. For example deposits into the bank account, direct debits, patterns of withdrawal or any expenses for which you would have expected to see bills but none have been produced.

15100 Dependent Children [April 2010]

Joint responsibility for a child or children (who may belong to either or both of the couple) may be an indication that the couple is LTAHAW or LTACP, but it is not conclusive proof. Relevant factors may be:

- parentage of the child or children.
- whether, and how, the couple exercises joint responsibility, for example:
 - who visits the school or delivers/collects to and from the school
 - who would the school contact in an emergency

- who arranges and takes the children to and from medical and dental appointments
- who exercises control of or offers guidance to the children
- who the Child Benefit Office has as the alternative payee
- who provides financial support/pocket money/pays for treats
- who buys the clothes and or toys.

An intention to adopt by the non-birth partner could be a particularly telling indication of the couple's long term view of the family unit. You should not, because of its sensitivity, seek out the information; but if it is spontaneously offered you should give it proper weight in arriving at your conclusions. Be wary of drawing conclusions about the current relationship based on say the fact that the children continue to be known by the surname of the ex-husband or ex-partner as this is common practice and is not evidence of a continuing relationship between the parents. Nor does the presence of photographs of the child's father or mother indicate the claimant is living with that person.

15110 Public Acknowledgement [October 2005]

An important consideration is how the outside world (including family, friends, neighbours, social workers, employers, schools, childcare providers, etc.), perceive the couple. Relevant factors may be:

- Whether both members use the same surname
- Whether schools/child care providers/employers/others regard them as a couple
- Whether they engage in social activities together
- Whether they are joint members of clubs/leisure centres/societies
- Whether they plan and organise their lives jointly.

CCM5500 lists the third parties you can legally approach for information during the course of your examination. You cannot obtain information from family members, friends, neighbours, social workers or schools, unless they also fall into one of the categories listed at CCM5500.

For example – A family member may also be an employer, or a neighbour may also provide registered child care. But it is perfectly acceptable for you to ask the claimant what their family/neighbours etc. would say if they were asked whether they regarded him/her as being a member of a couple.

15120 Sexual Relationship [January 2008]

DWP used to consider the couple's sexual relationship as one of the criteria for determining LTAHAW but this is no longer the case. The couple's sexual relationship is of little help in deciding whether they are living together as husband and wife or living together as civil partners. There may be no sexual relations in a marriage or civil partnership and sexual relationships of a casual nature, where neither partner has any lasting commitment to the other, are a common feature of contemporary life.

You must not ask any questions about a couple's sexual relationship. If the claimant introduces the subject, you should take note of any information volunteered but should bear in mind (and explain to the claimant) that it is unlikely to have any relevance to the question of whether they are living together as husband and wife.

Appeal tribunals sometimes ask claimants about their sexual relationships,

however, it remains our policy that you must not ask such questions. If a tribunal asks you why you have not established the position you should say that our internal policy, in common with that in DWP, is not to ask about this side of the relationship.

In one particular appeal case the Social Security Commissioner said that where there has never been a sexual relationship between the parties, strong alternative grounds are needed to reach the conclusion that the relationship is akin to husband and wife. However, absence of a sexual relationship at anytime where there has been one in the past is not itself indicative that the couple are not LTAHAW.

Where the claimant's sole objection to your conclusion is that they have no sexual relationship with the suspected partner or they appeal against a decision on these grounds you should seek further advice from the Benefits and Credits Technical team in Preston.

15150 Reasons for Failure To Report A Partner [April 2010]

Claimants may offer a range of reasons or excuses for their failure to report the existence of a partner. These may include:

- S/he does not stay here all of the time - see CCM15073.
- S/he lives at another address but uses my address as a post box - see CCM15075.
- I thought s/he could stay 3 nights a week without it affecting my entitlement.
- S/he does not give me any money, or payments are not regular - see CCM15090.
- S/he is not the mother/father of my child (ren).
- S/he is a lodger - see CCM15070.
- S/he is just a friend.
- It is hard being a single parent.
- The Government does not pay people like me enough.
- The rules on income are not fair.
- We do not have a sexual relationship - see CCM15120.

The 3 nights rule is a popular misconception. No such legal loophole exists. If a suspected partner spends 3 nights with the claimant on a regular basis, s/he may be a member of an established couple. Also, the children's parentage is not, in isolation, reliable evidence.

You will need to explain to the claimant the criteria which we use to determine whether they are living together as husband and wife or living together as civil partners - see CCM15040. You will then need to establish the facts by considering all the evidence from all legally available sources, including the claimant.

15160 Respecting Claimant's Privacy [February 2006]

In all your contacts with claimants you must always be aware of Human Rights issues, and of the need to respect the claimant's privacy. It is particularly important that you adopt this approach in any discussions which may touch on their private life.

You should avoid any impression that you are examining the claimant's home or household for signs of any such relationship. You must not ask about the claimant's sleeping arrangements in an attempt to find out whether s/he shares

a bedroom with another adult.

Claimants may however volunteer information of this kind when, for example, confirming the number of children who live there; describing how friends or relatives sometimes stay to help out with childcare or explaining that their ex-partners stays in the spare room whenever they come to visit the children. If the claimant simply says their partner stays overnight when they come to visit or care for the children you must not ask where they sleep.

You should not normally ask claimants about the number of bedrooms in their house but if the claimant has suggested that an adult who lives in the house is a paying lodger, it is reasonable to expect the lodger would have his/her room rather than sleeping on a sofa or floor.

In the circumstances it will be appropriate to ask how many bedrooms there are and what room(s) the lodger occupies, and to test the answer in the light of other information/evidence. The number of bedrooms and the ages/sexes of the other occupants of the house will be relevant. For example the claimant may live in a 3 bedroom house with 2 children, a boy of 12 and a girl of 16, and it will be reasonable to ask what arrangements have been made so that the lodger can occupy his/her own room.

It is important that any questions you need to ask should be directed at establishing the room the lodger occupies and their relationship with the claimant and not at establishing who the claimant sleeps with.

15170 (This text has been withheld because of exemptions in the Freedom of Information Act 2000) [June 2006]

15180 (This text has been withheld because of exemptions in the Freedom of Information Act 2000) [June 2006]

15190 Claimant Has Been Involved in Different Relationships [February 2006]

Where the claimant has been involved in relationships with different partners at different times during the year, you should treat the ending of one and beginning of another as a CoC on each occasion. However, where the claimant has split up and reconciled with the same partner, you should normally ignore the splits and treat the claimant and partner as a couple throughout the period.

If the claimant objects to this approach you should consider whether in spite of the temporary break in the relationship, the claimant and partner would still be considered a couple in accordance with other relevant criteria eg. nature of any financial support. If you cannot establish that the couple were effectively living together throughout the period, you should apply the CoC provisions to each break in the relationship.

15195 Date on which Claimants Became A Couple [February 2006]

The question of whether the claimant was in reality a member of a couple is not just relevant to the date at which the claim commenced. Becoming or ceasing to be a member of a couple is a notifiable change of circumstances so it is also relevant at all other times during the year.

You will sometimes have evidence that places the suspected partner at the claimant's address at one or more dates during the year for example a series of letters signed by the partner to his/her employer or tax office. However, you may not be able to point to anything which strongly indicates their presence at the

beginning of the year or claim period.

When challenged about the existence of a partner, claimants may be reluctant to admit to their failure to declare the partner on the claim, claiming instead that s/he only moved in some time later.

You will need to use your judgement in these cases. As a general rule if you are confident the evidence you have is reasonable proof that the claimant was a member of a couple from the date the claim commenced, you should put that date forward to the claimant. If you feel there is some doubt around that date, or you would have difficulty in substantiating it, but you are convinced that the claimant was a member of a couple at some point during the year, you should propose to the claimant an appropriate date from which they should be treated as a member of a couple. You should be prepared to negotiate the date with the claimant bearing in mind the important factor of getting the claim on the right basis for the future. However, you must remember that your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.

15200 Information held by HMRC [February 2006]

A case identified for enquiry on the grounds of a suspected undisclosed partner will usually have been selected because information held by us indicates another adult living at the claimant's address. The CCRO will have checked HMRC and other databases and other available information sources, before passing the case to you. You will therefore already have most of the evidence you will want to discuss with the claimant before you open the case.

The information is likely to include some or all of the following sources.

Type	Identifies
Voter's List	Suspected partner listed?
HMC address database	What address does the HMRC hold for suspected partner?
Telephone Directory	What address/phone number is listed for suspected partner?
Yellow Pages/Other	Ditto for self employed suspected partner.
SA	Ditto for self employed suspected partner.
TRP Data Mart	Any joint bank accounts etc, listed?
COP/CODA	Any additional allowances?
Child Benefit	Partner shown on original claim/as alternative payee?
Previous Claims	Was partner shown on earlier WFTC/DPTC/WTC/CTC claims?
Equifax/Experian	Is suspected partner shown at claimant's address?
DWP	Intelligence suggesting a live-in partner?
CSA	Maintenance paid? Reference to partner in interview notes.
Housing or Council Tax Benefit	Details of occupants. CT reduction for single adult being Received?
Letters on File	Any indication (particularly recent) of suspected partner living at claimant's address?

15210. Information from Claimant [April 2010]

Despite the information that will have been given to you by the CCRO there will also be information you can only obtain from the claimant or with the claimant's

agreement, for example:

- Bank statements - are they joint? If not, do they contain evidence of joint incomings/outgoings/spending?
- Utilities and other bills - who are these sent to?
- Council tax bills - a single occupier is entitled to a reduction, which will be identified on the statement.
- Mortgage claims/statement - whose name appears on any documentation?
- Rent book - whose name appears in the book as landlord and tenant?
- Hire purchase agreements - whose name is on the documents?
- Services and rentals eg. TV, satellite, telephone agreements - whose name are they in?
- Marriage certificate - does it show a recent marriage to the suspected partner?

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

15220 Short Term Relationships [February 2006]

In some cases the claimant might admit they had a partner during the period under review but says they are no longer a couple. You will need to review the facts to establish whether they are in fact still a couple.

Where the claimant admits to a short term relationship which you accept has now ended you will need to decide whether the relationship amounted to them living together as husband and wife (LTAHAW) or living together as civil partners (LTACP). You will need to explore the criteria at CCM15040.

There are no hard and fast rules as to the length of time a couple are together before we consider it to be LTAHAW or LTACP. If they are LTAHAW or LTACP then we will treat them as a couple for tax credit purposes even if they are only together a short time. However, in reality a short term relationship (less than 3 months) is unlikely to meet the criteria at CCM15040. They may satisfy one of the criteria but not the others. In such cases you will have to use your judgement and you should consult your manager if necessary. Remember your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.⁵

The Law Commission consultation paper “Intestacy and Family Provision” (October 2009) has some useful comments:

2.70 The requirement that the applicant should have been living “as” the spouse or civil partner of the deceased has been the subject of analysis by the courts. In *Re Watson*, it was said that the test is:

whether, in the opinion of a reasonable person with normal

5 Earlier versions of this guidance are (1) The Independent Taxation Manual (paragraphs now withdrawn) and (2) the ACG–WFTC/DPTC Applicant Compliance Guide para 9010 (not set out here as it adds nothing to the Claimant Compliance Manual). The text is in the 9th ed of this work.

perceptions, it could be said that the two people in question were living together as husband and wife; but, when considering that question, one should not ignore the multifarious nature of marital relationships.⁶

2.71 Accordingly, it was not determinative in that case that Mr Watson and Miss Griffiths had not continued a sexual relationship during the period when they were living together, nor that they had informally agreed to share outgoings, nor that Miss Griffiths had rejected Mr Watson's marriage proposal. On the whole of the evidence the judge reached the conclusion that Miss Griffiths had been living "as the wife" of Mr Watson.

2.72 The couple must have been living in the same household, which means that it does not matter if the parties each have a separate home, provided that they have formed one joint household. It has been said that this seems:

To have elements of permanence, to involve a consideration of the frequency and intimacy of contact, to contain an element of mutual support, to require some consideration of the degree of voluntary restraint upon personal freedom which each party undertakes, and to involve an element of community of resources.⁷

The Law Commission also consider the salacious possibility that an individual may have more than one cohabitee:

4.108 ... where the deceased was a party to more than one cohabiting relationship at the date of death, it may be more difficult to determine whether the deceased "was sufficiently involved in either household for one or both to amount to cohabitation at all".⁸ However, cases may arise in which it can be shown that both partners are cohabitants within the definition adopted, for example where there are religious marriages which do not qualify as legal marriages.

6 [Footnote original] [1999] 1 FLR 878, 883, by Lord Neuberger of Abbotsbury.

7 [Footnote original] *Churchill v Roach* [2002] EWHC 3230, [2004] 3 FCR 744, 761. See also *Kotke v Saffarini* [2005] EWCA Civ 221, [2005] 2 FLR 517, a case on similar wording in section 1(3)(b) of the Fatal Accidents Act 1976, where the Court of Appeal held at [59] that it was correct to distinguish between "wanting and intending to live in the same household, planning to do so, and actually doing so".

8 [Footnote original] *Cohabitation: the Financial Consequences of Relationship Breakdown* (2007) Law Com No 307, para 3.68.

App. 1.4.1 *Prohibited Relationships*

The Claimant Compliance Manual provides:

15025 Prohibited Relationships [February 2006]

The law prohibits certain relationships by relatives. For example a woman cannot marry or form a civil partnership with her grandfather or her uncle and a man cannot marry or form a civil partnership with his daughter or sister. A full list of prohibited relationships is contained at CCM15030.

Where you establish that a claimant is living as a couple with a relative who appears on the list of prohibited relationships we do not consider this to be an LTAHAW or LTACP situation. The reason for this is that the couple cannot marry or become civil partners in law so we cannot say they are living together as husband and wife as they could never be husband and wife or living together as civil partners as they could never be civil partners. The claimant will therefore be treated as a single claimant.

15030 List of Prohibited Relationships - Marriage [April 2010]

Throughout the United Kingdom and Guernsey, Jersey and the Isle of Man, the law prohibits certain blood relatives, step relatives and relatives-in-law from getting married.

A man cannot marry his:

- mother
- adopted mother/ former adoptive mother
- daughter
- adoptive daughter/ former adoptive daughter
- grandmother
- granddaughter
- sister
- aunt
- niece

A woman cannot marry her:

- father
- adopted father/ former adoptive father
- son
- adoptive son/ former adoptive son
- grandfather
- grandson
- brother
- uncle
- nephew

Additionally, people cannot marry if:

- either of them is aged less than 16, or
- in a 'step' relationship, the younger person had, before reaching age 18:
 - lived in the same household as the older person, and/or
 - been treated as a child of the older person's family, or
- in an 'in-law' relationship:

- either person involved is aged less than 21, and/or
- any person originally involved in creating the ‘in-law’ relationship’ is still alive, for example we do not consider LTAHAW if a man lives in the same household as his daughter-in-law and the man’s son or wife is still alive.

If you are unsure whether the claimant is in a prohibited relationship you should seek further advice from the Benefits and Credits Technical Team in Preston.

15032. List of Prohibited Relationships - Civil Partners [April 2010]

The law in the United Kingdom prohibits certain blood relatives, step relatives and relatives by civil partnership from forming a civil partnership. The legislation in Scotland is slightly different from the legislation that applies in England, Wales and Northern Ireland.

In England, Wales and Northern Ireland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent’s brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

If:

- either of them is aged less than 21, or
- the younger person had, before reaching age 18:
- lived in the same household as the older person, and/or
- been treated as a child of the older person’s family, or

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of parent
- Former spouse of parent

If:

- either person involved is aged less than 21, and/or
- any person originally involved in creating the relationship is still alive, for example we do not consider LTACP if a woman lives in the same household as her daughter-in-law and the woman’s son or husband is still alive.

In Scotland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent's brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

APPENDIX TWO

CONSTRUCTION OF DEEMING PROVISIONS

App. 2.1 Construction of Deeming Provisions

The general topic of the interpretation (or construction) of statutes requires a book to itself, and many such books have been written. However most of the principles of interpretation can only be expressed at a high level of generality which makes their application doubtful and their usefulness to the practitioner questionable. In short, as Voltaire observed, language is difficult to put into words.

This appendix concerns the specific topic of the construction of deeming provisions. These are common in tax statutes, and the same issues arise at various points in this book. It is therefore convenient to consider them as a separate topic.

The general rule of construction which applies to deeming provisions is this:

If you are bidden to treat an imaginary state of affairs as real, you must surely, unless prohibited from doing so, also imagine as real the consequences and incidents which, if the putative state of affairs had in fact existed, must inevitably have flowed from or accompanied it.¹

... [B]ecause one must treat as real that which is only deemed to be so, one must treat as real the consequences and incidents inevitably flowing from or accompanying that deemed state of affairs...²

However context can show that the general rule should not be applied. It

¹ *East End Dwellings v Finsbury Borough Council* [1952] AC 109 at p.132.

² *Marshall v Kerr* 67 TC 56 at p.79A.

is merely a general canon of construction from which “only limited assistance can be derived in choosing between alternative interpretations of the Act”.³ Experience shows that Parliament has often failed to foresee all the consequences of its deeming, and nowadays the courts apply deeming provisions in a purposive and context-sensitive manner.⁴ This is reaffirmed in *Bricom v IRC*⁵ where the Court of Appeal referred to the dictum:

The hypothetical must not be allowed to oust the real further than obedience to the statute compels.

The Court of Appeal said:

... I do not read this as intending to lay down a special rule which requires a statutory hypothesis to be narrowly and literally construed. The scope of a deeming provision is a question of construction and is not subject to any special rule. As on any other question of statutory construction, the Court must attempt to ascertain the intention of Parliament from the words used in the light of the legislative purpose. A statutory hypothesis, no doubt, must not be carried further than the legislative purpose requires, but the extent to which it must be carried depends upon ascertaining what that purpose is.

³ *Russell v IRC* [1988] STC 195 at p.205.

⁴ In *Murphy v Ingram* [1973] Ch 363 at p.446 Megarry J said:

A research student in search of a suitable topic for a thesis might do worse than to choose as his subject “the Dangers of Deeming”.

But the modern approach reduces these dangers and *Murphy* itself would be decided differently today. For an example, see *De Rothschild v Lawrenson* 67 TC 300 at p.316.

⁵ *Bricom v IRC* 70 TC 272

APPENDIX THREE

MEMBERS OF PARLIAMENT

App. 3.1 Residence & domicile of MPs and members of House of Lords

Section 41 Constitutional Reform and Governance Act 2010 provides special rules for MPs and members of the House of Lords (“MLs”):

- (1) Subsection (2) applies if a person is for any part of a tax year¹—
 - (a) a member of the House of Commons, or
 - (b) a member of the House of Lords.²
- (2) The person is to be treated for the purposes of the taxes listed in subsection (3) as resident, ordinarily resident and domiciled in the UK for the whole of that tax year.
- (3) The taxes are—
 - (a) income tax,
 - (b) capital gains tax, and
 - (c) inheritance tax.

In practice this means MPs and MLs are deemed UK resident and

1 IHT does not use the concept of tax years, so s.41(9) CRGA 2010 provides:
“In this section, in relation to inheritance tax—

(a) ‘tax year’ means a year beginning on 6 April and ending on the following 5 April,
and

(b) ‘the tax year 2010-11’ means the tax year beginning on 6 April 2010.”

2 Section 41(5)(10) CRGA 2010 defines ML:

For the purposes of this section and section 42 a person is a member of the House of Lords if the person is entitled to receive writs of summons to attend that House....

(10) In determining for the purposes of this section and section 42 whether a person is entitled to receive writs of summons to attend the House of Lords, ignore—

(a) section 2 of the Forfeiture Act 1870;

(b) sections 426A and 427 of the Insolvency Act 1986.

domiciled for almost all tax purposes, though minor taxes such as NICs slip through the net. EN CRGA provides:

269. The section provides that MPs and peers are deemed ROD [resident ordinarily resident and domiciled] for the whole of each tax year in which they are a member of either House (including those tax years in which they are a member for only part of the year). This means that they will be deemed ROD from the start of the tax year in which they become a member of that House and to the end of the tax year in which they cease to be a member.

DT relief may apply where a treaty has a suitable tie-breaker.

Section 41(4) CRGA 2010 defines when a person becomes or ceases to be a MP or a ML:

For the purposes of this section a person—

- (a) becomes a member of the House of Commons when (having been elected to that House) the person makes and subscribes the oath required by the Parliamentary Oaths Act 1866 (or the corresponding affirmation), and
- (b) ceases to be a member of that House when—
 - (i) the Parliament to which the person was elected is dissolved,
 - or
 - (ii) the person's seat is otherwise vacated.

Since a person will know the exact date when they become an MP or ML, they have an opportunity for pre-appointment planning and there may even be some scope for further planning when deemed UK domiciled (eg in relation to the IHT spouse exemption if the spouse is UK domiciled).³ Note that when a person ceases to be a ML or MP, they will continue to be deemed IHT domiciled for another three or four years.

Sinn Fein MPs do not take their seats at Westminster so happily escape deemed UK residence and domicile.

Section 41(6) CRGA 2010 excludes judges⁴ and bishops (the section is after all only a *political* exercise). This level of micro-detail cannot

³ See Slevin “Not Quite the Same”, Taxation, (19 May 2011).

⁴ This makes sense, as a ML who holds a disqualifying judicial office is disqualified from sitting or voting in the House of Lords: s.137(7) Constitutional Reform Act 2005.

sensibly be covered even in this book which seeks to be comprehensive: it would be surprising if there are more than one or two individuals concerned (if indeed there are any at all).

App. 3.2 Members of the European Parliament

The rules do not apply to MEPs. EN CRGA 2010 para 275 discusses the position of a MEP who is also a member of the House of Lords but as far as I am aware no-one falls in this category.

App. 3.3 Commentary

The Financial Secretary to the Treasury (Stephen Timms) said:

This is how the vast majority of the UK population is taxed, so it seems right to me ... that MPs and Members of the House of Lords should be taxed on that basis and should not have access to the remittance basis. It is helpful that there is now clear, albeit rather belated, cross-party support for action, following the Conservative's change of position to supporting the principle that MPs and Members of the House of Lords should be required to pay tax in full on their overseas income, gains and assets.⁵

A great deal more could be said about the policy issues relating to these provisions. They were not debated in Parliament: the clauses were a late amendment to the CRGA, which was enacted in a breathless ping pong procedure just before the dissolution of Parliament. But the context of the rules is wholly political - the scrabble for public approval and to knock the opposition - so it would be unrealistic to expect cool and considered reflection. The debate is long-standing.⁶

⁵ Hansard, 5 Jan 2010, Column 52WH.

⁶ There was a comparable debate in relation to Lord Vestey who (though resident and domiciled when ennobled in 1922) had shortly before been a tax exile: see "*Vestey: Royal Commission evidence and ensuing debate*" accessible in the TFD archive www.kessler.co.uk.

APPENDIX FOUR

VISITING FORCES

App. 4.1 The treaty background

The taxation of visiting forces is based on three treaties:

- (1) NATO Status of Forces Agreement 1951.¹
- (2) Partnership for Peace Status of Forces Agreement 1995.²
- (3) EU Status of Forces Agreement.³

The Partnership for Peace Status of Forces Agreement 1995 incorporates the 1951 treaty by reference. Article 16 EU Status of Forces Agreement is based on the NATO Status of Forces Agreement 1951.

App. 4.2 Residence for IT and CGT

Treaty background

Article X NATO Status of Forces Agreement 1951 provides:

-
- 1 The full title is: Agreement Between the Parties to the North Atlantic Treaty Regarding the Status of Their Forces 19 June 1951.
Accessible www.nato.int/cps/en/natolive/official_texts_17265.htm.
 - 2 The full title is: Agreement among the States Parties to the North Atlantic Treaty and the other States participating in the Partnership for Peace regarding the Status of their Forces, 19 June 1995.
Accessible www.nato.int/cps/en/natolive/official_texts_24742.htm.
 - 3 The full title is: Agreement between the member states of the European Union concerning the status of military and civilian staff seconded to the institutions of the European Union, of the headquarters and forces which may be made available to the European Union in the context of the preparation and execution of the tasks referred to in article 17(2) of the treaty on European Union including exercises, and of the military and civilian staff of the member states put at the disposal of the European Union to act in this context.
Accessible www.official-documents.gov.uk/document/cm75/7572/7572.pdf.

1. [a] Where the legal incidence of any form of taxation in the receiving State depends upon residence or domicile, periods during which a member of a force or civilian component is in the territory of that State by reason solely of his being a member of such force or civilian component shall not be considered as periods of residence therein, or as creating a change of residence or domicile, for the purposes of such taxation...

A period of presence would not normally create a change of domicile (except for IHT deemed domicile) but the drafter also had in mind civil law conceptions of domicile which is more like habitual residence.

Article 16 EU Status of Forces Agreement is similar:

With a view to avoiding double taxation, for the application of double taxation Conventions concluded between Member States and without prejudice to the right of the receiving State to tax military and civilian staff who are its nationals or who are ordinarily resident in the receiving State:

1. Where the legal incidence of any form of taxation in the receiving State depends upon residence or domicile, periods during which military or civilian staff are in the territory of that State by reason solely of their being military or civilian staff shall not be considered as periods of residence therein, or as creating a change of residence or domicile, for the purposes of such taxation...

App. 4.2.1 “*Visiting Forces*”

Section 833 ITA provides:

- (1) This section applies to an individual who—
 - (a) is a member of a visiting force of a designated country or of a civilian component of such a force,
 - (b) is in the UK, but only because of being a member of the force or the civilian component, and
 - (c) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
- (2) For the purposes of subsection (1)—
 - (a) members of the armed forces of a designated country who are

- attached to a designated international military headquarters⁴ are treated as a visiting force of that country, and
- (b) whether an individual is a member of a civilian component of such a force is to be determined accordingly.
- (2A) This section also applies to an individual within subsection (3) or (3A).
- (3) An individual is within this subsection if the individual—
- (a) is of a category for the time being agreed between Her Majesty's Government in the UK and the other members of the North Atlantic Council,
 - (b) is employed by a designated allied headquarters,
 - (c) is in the UK, but only because of being employed by the designated allied headquarters, and
 - (d) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen
- (3A) An individual is within this subsection if the individual—
- (a) belongs to the EU civilian staff,
 - (b) is in the UK, but only because of serving as part of that staff, and
 - (c) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.....
- (6) Subsections (1) to (3) are to be interpreted as if—
- (a) they were in Part 1 of the Visiting Forces Act 1952, and
 - (b) references in that Act to a country to which a provision of that Act applies were references to a designated country.

I refer to a person within (1) as visiting forces.

Forty countries have been designated:

- (1) Belgium, Canada, Denmark, France, Greece, Italy, Luxembourg, the Netherlands, Norway, Portugal, Turkey, and the USA.⁵
- (2) The Federal Republic of Germany.⁶
- (3) Albania, Bulgaria, the Czech Republic, Estonia, Hungary, Latvia,

4 Defined in subsection (7):

“In this section—

“allied headquarters” means an international military headquarters established under the North Atlantic Treaty, and

“designated” means designated for the purpose in question by or under an Order in Council made for giving effect to an international agreement.”

5 Visiting Forces and Allied Headquarters (Income Tax and Death Duties) (Designation) Order 1961.

6 Visiting Forces (Income Tax and Death Duties) (Designation) Order 1964.

Lithuania, Poland, Romania, the Slovak Republic, Slovenia, Spain and Sweden.⁷

- (4) Armenia, Austria, Azerbaijan, Finland, Georgia, Kazakhstan, Kyrgyzstan, the Former Yugoslav Republic of Macedonia, Moldova, Russia, Switzerland, Ukraine, and Uzbekistan.⁸
- (5) Belarus and Turkmenistan will be included in this list when they become parties to Partnership for Peace Status of Forces Agreement 1995.⁹

The following HQs have been designated:

- (1) Channel Committee, Channel Command, Eastern Atlantic Area Command, Supreme Headquarters Allied Powers Europe, Allied Command Atlantic Headquarters.¹⁰
- (2) Headquarters of the Supreme Allied Commander Atlantic
Headquarters Eastern Atlantic
Headquarters Maritime Air Eastern Atlantic
Headquarters Submarine Forces Eastern Atlantic
Headquarters Allied Forces North Western Europe
Headquarters Allied Naval Forces North Western Europe
Headquarters Allied Air Forces North Western Europe
NATO Airborne Early Warning Force Headquarters and NATO E-3A Component.¹¹

HMRC TDSI Guidance Notes provide:

4.48 Civilian component of visiting armed forces

... A person is a member of a civilian component of a visiting force if his or her passport contains

- an uncanceled entry made by or on behalf of the sending country stating that the bearer is a member of a civilian component of a

7 Visiting Forces and Allied Headquarters (Income Tax and Capital Gains Tax) (Designation) Order 1998 SI no. 1513.

8 Visiting Forces and Allied Headquarters (Income Tax and Capital Gains Tax) (Designation) Order 1998 SI no. 1514.

9 www.state.gov/documents/organization/91332.pdf

10 Visiting Forces and Allied Headquarters (Income Tax and Death Duties) (Designation) Order 1961.

11 Visiting Forces and Allied Headquarters (Income Tax and Capital Gains Tax) (Designation) Order 1998 SI no. 1513.

- visiting force of that country, and
 - an uncanceled recognition stamp of the UK Home Office.
- Employees of foreign contractors hired in the UK are not members of the civilian component of a visiting force. Their residence status is determined according to the normal rules

App. 4.2.2 *Residence and domicile relief*

Section 833(4) provides the relief:

If this section applies to an individual throughout a period, the period is not treated for income tax purposes as—

- (a) a period of residence in the UK, or
- (b) creating a change of the individual's residence or domicile.

Section 11(1) TCGA extends the relief to CGT:

If section 833 of ITA 2007 (visiting forces and staff of designated allied headquarters) applies to an individual throughout a period, the period is not treated for capital gains tax purposes as—

- (a) a period of residence in the UK, or
- (b) creating a change of the individual's residence or domicile.

App. 4.2.3 *Personal allowances*

Section 833(5) ITA provides:

Subsection (4) does not affect the operation of section 56 or 460 of this Act (residence etc of claimants) in relation to an individual for any tax year.

EN ITA explains:

2498. Subsection (5) ensures that an individual to whom this section applies has the benefit of the personal reliefs to which the individual would be entitled if resident in the UK. Such reliefs will, accordingly, be available in calculating the individual's liability to UK income tax on such income as, for example, UK bank interest, dividends from UK resident companies and UK-based earnings which are not exempt under section 303 of ITEPA.

App. 4.2.4 *Ordinary residence, and spouses of visiting forces*

HMRC TDSI Guidance Notes provide:

4.47 Visiting armed forces

Members of visiting armed forces are treated as NOR [not ordinarily resident]... but the residence status of their spouses is determined according to the normal rules. ...

4.48 Civilian component of visiting armed forces

Members of the civilian components of visiting forces are treated as NOR if they have come to the UK solely because they are a member of such a force.

App. 4.3 Employment income

App. 4.3.1 *Treaty background*

Article X.1 NATO Status of Forces Agreement 1951 provides:

... Members of a force or civilian component shall be exempt from taxation in the receiving State on the salary and emoluments paid to them as such members by the sending State or on any tangible movable property the presence of which in the receiving State is due solely to their temporary presence there.

Article 16.2 EU Status of Forces Agreement is similar:

Military and civilian staff shall be exempt from taxation in the receiving State on the salary and emoluments paid to them as such staff by the sending State or on any tangible movable property the presence of which in the receiving State is due solely to their temporary presence there.

App. 4.3.2 *The relief*

Section 303 ITEPA provides:

- (1) No liability to income tax arises in respect of earnings if—
 - (a) they are paid by the government of a designated country to a member of a visiting force of that country or of a civilian component of such a force, and

- (b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
- (2) [*This is a definition provision identical to s.833(2) set out above*]
- (3) No liability to income tax arises in respect of earnings if they are paid by a designated international military headquarters to an employee of a category for the time being agreed between Her Majesty's government in the UK and the other members of the North Atlantic Council.
- (4) But where the employee is a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, subsection (3) only applies if it is necessary for it to do so to give effect to an agreement between parties to the North Atlantic Treaty.
- (4A) No liability to income tax arises in respect of earnings if—
 - (a) they are paid by the government of a designated country to a person belonging to the EU civilian staff, and
 - (b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
- (5) & (6) [*These are definition provisions identical to s.833(6)(7) set out above*].

App. 4.4 IHT reliefs

App. 4.4.1 Excluded property

Section 155(1) IHTA provides:

Section 6(4) above applies to—

- (a) the emoluments paid by the Government of any designated country to a member of a visiting force of that country, not being a British citizen, a British Dependent Territories citizen, a British National (Overseas) or a British Overseas citizen, and
- (b) any tangible movable property the presence of which in the UK is due solely to the presence in the UK of such a person while serving as a member of the force.

This takes us to s.6(4) which provides:

Property to which this subsection applies by virtue of section 155(1) or (5A) below is excluded property.

In short, emoluments and tangible movable property of visiting forces qualify as excluded property for IHT purposes.

App. 4.4.2 *Deemed domicile*

Section 155(2) IHTA provides:

A period during which any such member of a visiting force as is referred to in subsection (1) above is in the UK by reason solely of his being such a member shall not be treated for the purposes of this Act as a period of residence in the UK or as creating a change of his residence or domicile.

Thus (in short) visiting forces do not become deemed domiciled even if they reside 17 or more years in the UK (but in practice I expect that hardly ever happens). It is considered that the relief does not apply to members of visiting forces who are British citizens (etc) even though on a literal reading one might say that such persons are “referred to” in s.155(1).

App. 4.4.3 *“Visiting Force” and other definitions*

Section 155 IHTA provides

(3) References in subsections (1) and (2) above to a visiting force shall apply to a civilian component of a visiting force as they apply to the force itself, and those subsections shall be construed as one with Part I of the Visiting Forces Act 1952 but so that for the purposes of this section references to a designated country shall be substituted in that Act for references to a country to which a provision of that Act applies.

(4) For the purpose of conferring on persons attached to any designated allied international military headquarters the like benefits as are conferred by subsections (1) and (2) above on members of a visiting force or civilian component, any members of the armed forces of a designated country shall, while attached to any such headquarters, be deemed to constitute a visiting force of that country, and there shall be a corresponding extension of the class of persons who may be treated as members of a civilian component of such a visiting force.

(5A) Section 6(4) also applies to—

- (a) the emoluments paid by the Government of any designated country to a person belonging to the EU civilian staff, not being a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, and
 - (b) any tangible movable property the presence of which in the UK is due solely to the presence in the UK of such a person serving as part of that staff.
- (5B) A period during which any such person belonging to the EU civilian staff as is referred to in subsection (5A) is in the UK by reason solely of that person belonging to that staff is not to be treated for the purposes of this Act as a period of residence in the UK or as creating a change of that person's residence or domicile.

Section 155 IHTA provides:

- (6) For the purposes of this section—
“allied headquarters” means any international military headquarters established under the North Atlantic Council;
“designated” means designated for the purpose in question by or under any Order in Council made for giving effect to any international agreement.
“the EU civilian staff” means—
- (a) civilian personnel seconded by a member State to an EU institution for the purposes of activities (including exercises) relating to the preparation for, and execution of, tasks mentioned in Article 43(1) of the Treaty on European Union (tasks relating to a common security and defence policy), as amended from time to time, and
 - (b) civilian personnel (other than locally hired personnel)—
 - (i) made available to the EU by a member State to work with designated international military headquarters or a force of a designated country, or
 - (ii) otherwise made available to the EU by a member State for the purposes of activities of the kind referred to in paragraph (a).
- (7) Any Order in Council made under section 73 of the Finance Act 1960 which is in force immediately before the passing of this Act shall have effect for the purposes of this section as if had also been made under this section, and may be varied or revoked accordingly.

The exemption is not available to spouses of visiting forces.

App. 4.5 SDLT

Section 74A FA 1960 provides an exemption for land acquired as barracks or for training; this is too specialist a topic to be discussed here.

APPENDIX FIVE

STUDENTS

App. 5.1 Introduction

In general a student is taxed in the same way as any other individual. There is a special rule for ordinary residence; see 3.33 (Students).

App. 5.2 DT relief

Article 20 OECD Model Convention provides:

Payments which a student or business apprentice who is or was immediately¹ before visiting a Contracting State a resident of the other Contracting State and who is present in the first-mentioned State solely for the purpose of his education or training receives for the purpose of his maintenance, education or training shall not be taxed in that State, provided that such payments arise from sources outside that State.

The OECD commentary provides:

3. The Article covers only payments received for the purpose of the recipient's maintenance, education or training. It does not, therefore, apply to a payment, or any part thereof, that is remuneration for services rendered by the recipient and which is covered by Article 15 (or by Article 7 in the case of independent services). Where the recipient's training involves work experience, however, there is a need to distinguish between a payment for services and a payment for the

¹ The OECD commentary provides: “2. The word “immediately” was inserted in the 1977 Model Convention in order to make clear that the Article does not cover a person who has once been a resident of a Contracting State but has subsequently moved his residence to a third State before visiting the other Contracting State.”

recipient's maintenance, education or training. The fact that the amount paid is similar to that paid to persons who provide similar services and are not students or business apprentices would generally indicate that the payment is a remuneration for services. Also, payments for maintenance, education or training should not exceed the level of expenses that are likely to be incurred to ensure the recipient's maintenance, education or training.

4 For the purpose of the Article, payments that are made by or on behalf of a resident of a Contracting State or that are borne by a permanent establishment which a person has in that State are not considered to arise from sources outside that State.

DTR manual provides:

1930 Visiting students and apprentices [February 2006]

Most double taxation agreements provide that students and business apprentices who visit the UK solely for the purpose of their education or training and who, immediately before coming here, were residents of the other country shall be exempt from UK tax on payments which they receive from outside the UK for their maintenance, education or training. Some agreements also provide that certain remuneration which a student or business apprentice receives from employment in this country shall be exempt from UK tax. Various limitations are imposed in particular agreements, often relating to monetary limits, the student's need to supplement grant income, or the type of employment. In every case when an agreement provides an exemption of this type, details of any limitations are given in Part IV of this volume.

Claims for exemption under a students' Article are dealt with in the District which, but for the agreement, would have dealt with any tax on such payments or remuneration. In examining claims, refer to the relevant double taxation agreement to ensure that the conditions for exemption are fulfilled. The following notes give some guidance on matters to be taken into account in considering whether exemption is due

- (a) The exemption does not extend to income or capital gains derived by a student or business apprentice from his own investments or from trust income to which he is absolutely entitled.
- (b) Whether payments or remuneration are for the student's etc. maintenance, education or training, or for supplementing his resources, or are reasonably necessary, is a question of fact and the onus is on the claimant to provide the evidence. The figures quoted in Statement of Practice SP4/86 (see SE1314) can be

used as a guide. Where the payments or remuneration seem to be unreasonably high, refer the case to Personal Tax Division (Schedule E), Sapphire House, Solihull.

- (c) If the payments or remuneration exceed the amount needed for the student's etc. maintenance, education or training, the whole amount is taxable and not merely the excess.
- (d) Where the Article provides that remuneration is to be exempted up to a certain monetary limit and the student or business apprentice is resident in the UK under UK domestic law, that amount is additional to the personal allowances available under UK law. For example, if the monetary limit in the agreement is 1,000 and the claimant is entitled to a personal allowance in the relevant year of 3,445, earnings of 4,445 or less will be exempt.

APPENDIX 6

HOW TO IMPROVE RESIDENCE AND DOMICILE TAXATION

“To tax and to please, no more than to love and to be wise, is not given to men.”¹ The following proposals are restricted to short technical improvements with no significant tax cost, no significant winners or losers, and not politically contentious. It represents some cheap and easy improvements to residence and domicile taxation to which no-one should object or find difficult: this is the “low lying fruit” of tax reform.

Proposal	Reference
Naturalised citizens should be deemed UK domiciled.	See 2.10.5 (Commentary)
IT/CGT definition of trustee residence should apply for IHT.	See 4.14.1 (Commentary)
Repeal s.82 and s.65(3) TCGA (collection of exit charge from trustees).	See 7.5.2 (Commentary)
“Relevant persons” for remittance purposes should just be the taxpayer, spouse, CP, cohabitee and minor children.; investment relief can be abolished as unnecessary.	See 10.7.1 (Commentary) 10.10 (Relevant persons - commentary: let's simplify relevant person rules); 11.19 (Remittance investment relief: commentary).
Delete Services relief condition B.	See 11.21.4 (Services relief condition B: commentary)

1 Edmund Burke, First Speech on the Conciliation with America (1774).

Source of interest should be as specified in OECD model.	No-one knows what the current test is. See 19.7.1 (Commentary)
Define “ordinary place of abode” in line with residence.	See 19.10.6 (Commentary).
The DTA self-certificate system for royalties should apply to interest.	See 19.12.8 (Commentary)
Repeal relief for exempt foreign currency securities	See 20.8 (Exempt foreign currency securities)
Align treatment of Baker & Garland trusts, ie extend s.464 ITA to all trusts	See 25.1.5 (Commentary)
S.731 remittance basis should apply only if benefit is remitted (like the s.87 remittance basis)	See 29.35.9 (Commentary)
The statutory definition of “commercial” in s.738 ITA should be repealed.	See 31.6.4 (Commentary)
Restore motive defence old condition B.	See 29.12.8 (Commentary)
Abolish Accrued Income remittance basis (make gains subject to CGT)	See 35.10.2 (Commentary)
Transactions in financial assets should in principle be deemed non-trading. The IME, AIF and OFTR exemptions can be repealed	See 39.11 (Commentary)
Repeal s.56(3)(a)-(f) - an odd list of entitlements to personal allowances	See 44.6.3 (Commentary)
Repeal s.87 interest surcharge.	See 48.13.1 (Commentary)

Schedule 4B & 4C TCGA should only apply where there is a purpose specifically to avoid s.87 or s.86.	See 49.27 (Commentary)
Personal CGT losses should be deductible against s.87 gains	See 51.7.1 (Commentary)
The taxation of foreign currency should be the same as foreign currency bank accounts.	See 52.11.2 (Commentary)
Yearly exchange rate averaging; Currency conversion date for income remittance is date of receipt, not date of remittance	52.13 (Commentary: solution to remaining foreign currency problems)
Repeal s.80 IHTA. The cure is worse than the disease.	See 58.13.11 (Commentary)
UK bank accounts to qualify as excluded property as non-UK accounts	58.18.4 (Commentary)
Repeal s.731(6) ITEPA (illegitimacy taken into account)	See 70.11.2 ("Family")
Abolish the s.105 charge and extend s.106 to cover all the acquisition cost.	See 70.27.6 (Commentary)
Shadow directors should be taken out of the benefit in kind charge.	See 70.33 (Living accommodation charge: commentary)
A single definition of "settlor" which applies for all taxes.	See 75.3.9 (Commentary)
Repeal Section 473 ITA (& CGT equivalent); dead letter law.	See 75.30.6 (Commentary)

Treat all assets other than UK land and securities as non-UK situate for the purposes of IHT excluded property rules	See 77.1.1 (Commentary)
All securities situate for CGT in the place of incorporation of the company.	See 78.8.4 (Commentary)
Repeal s.s.275(1)(k) TCGA (situated of judgement debt).	See 78.11.1 (Commentary)
Define PE by reference to OECD model definition.	See 81.10 (Commentary: let's have one definition of PE)
Replace branch/agency with PE.	See 81.14 (Commentary: let's abolish branch/agency)
