To my Jane

*My friend,
my partner, my lover,
my everything*

INTRODUCTION AND WHAT'S NEW

Scope of this book

There are three themes to this book:

- (1) Taxation of foreign domiciliaries
- (2) Taxation of non-residents on UK assets; and
- (3) Taxation of UK residents on foreign assets.

To attempt to cover all these topics is ambitious, and this book is in danger of bursting, particularly because often foreign aspects can only sensibly be discussed in a wider context. But one cannot address the first topic without the second and third: in taxation, as in life, everything is connected to everything else. I hope as a result that the book will help with all offshore aspect of UK tax.

Thus what started as a book on foreign domiciliaries has become a book on offshore taxation. I revised the title accordingly.

The year 2012/13 in review

The chancellor stated in the Budget speech 2011

our tax code has become so complex that it recently overtook India to become the longest in the world”.¹

Parliament immediately added an additional 400 pages in the FA 2011. The FA 2012 adds a record 687 pages of legislation: the table of contents is 14 pages long. Set against that, the Office of Tax Simplification has

1 The comment is probably based on CIOT, “The Making of Tax Law” (June 2010) para 3.3, <http://www.tax.org.uk/tax-policy/public-submissions/2010/The+Making+of+Tax+Law>. It is hard to empirically assess a claim that the UK has the longest tax code in the world, but there seem to be no other serious contenders for that title.

achieved little, and it may be unrealistic to hope for much.²

The Exchequer Secretary to the Treasury, David Gauke MP, said:

This year's Finance Bill shows just how committed the coalition Government is to ... simplifying the tax system.³

Indeed it does, though not in the way that the minister intended.

Important changes in the FA 2012 include:

- (1) Increase of the remittance basis charge from £30k to £50k.
- (2) Remittance investment relief.
- (3) A welcome abolition of CGT on foreign currency bank accounts, including repeal of particularly foolish provisions in F(no.2) A 2010.

The Swiss Tax Agreement offers a novel approach to the problem of evasion via Swiss bank accounts; I consider that topic in a separate ebook.⁴

Thanks ...

I am very grateful to my colleagues Robert Venables QC and Stephen Brandon QC for discussions on many aspects of tax. I owe a great debt to Jane Hunt who works patiently on an intractable manuscript throughout the year, and to Phillan Amin who undertook the daunting task of proofreading.

... and request for help

Comments from readers would be of the greatest value and interest to the author. Four years have passed since what the House of Lords Economic Affairs Committee called the “absolute shambles” of the FA 2008. I am still making new discoveries and do not believe that a full analysis could ever be written.

The pleasure in writing this book consists in the interest of the questions which it raises and the success which it may have achieved in answering

2 “[The OTS] cannot be an effective solution to the problem of over-complication without the Treasury allowing it a far more fundamental role.” Ussher and Walford, *National Treasure* (Demos, 2011) accessible www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925.

3 HM Treasury press release 26/12, 29 March 2012 [2012] STI 1192.

4 Kessler, *The Swiss Tax Agreement*; www.khplc.co.uk.

them. It seeks to state the law as at 20 July 2012.

OBTAINING FURTHER ADVICE - AND DISCLAIMER

Further advice

If you want advice on which you are legally entitled to rely you can obtain it - but not from this work.

In particular, you may instruct the author to advise. I enjoy writing, but spend most of my time giving independent specialist professional advice in private client matters especially areas covered in this work. For further details see www.kessler.co.uk.

TFD online

TFD Online is an online version of this book and more. It can be used:

- (1) to search the text of this book or to access it online.
- (2) to see if the book has been updated
- (3) to correct or contribute to the book

TFD Online is a free service to individuals and firms who have purchased the current edition of this work. It is moderated by Amanda Hardy, a member of Tax Chambers, 15 Old Square, Lincoln's Inn.

TFD Online is accessible on www.foreigndomiciliaries.co.uk. The authorisation code is in the inside cover of this volume.

Disclaimer

It is a sign of the times that the CIOT issue *professional guidance* with a disclaimer:

While every care has been taken in the preparation of this guidance the Chartered Institute of Taxation, the Association of Taxation Technicians and all those involved in the preparation and approval of this guidance do not accept any responsibility for any loss occasioned by reliance on this

guidance.¹

Similarly, the views contained in this book are put forward for consideration only and are not to be relied upon. Neither the author nor the publisher accept any responsibility for any loss to any person arising as a result of any action taken or refrained from in reliance of this work.

A note to the lay reader

This book is not intended as a self-help guide, and is addressed to tax practitioners, but it is readable for a lay person. Initiation in these matters must often be by the taxpayer. If you wish to research this subject in depth, and so take more control of your own tax affairs, read on. But for implementation you will need to find professionals to advise you. Self-help guides extol “the benefit of bypassing expensive lawyers”; but the bypass may prove the more expensive route in the long run.

Edition history

1 st Edition 2001	6 th edition 2007
2 nd Edition 2003	7 th edition 2008
3 rd Edition 2004	8 th edition 2009
4 th Edition 2005	9 th edition 2010
5 th Edition 2006	10 th edition 2011

This book was called *Taxation of Foreign Domiciliaries* for the first nine editions and changed to *Taxation of Non-residents & Foreign Domiciliaries* in the 10th edition.

CHAPTER ONE

Foreign Domicile: Tax Policy and Reforms

Introduction.	1.1
Tax competition arguments.	1.2
Fairness.	1.3
Suitability of domicile as a fiscal test.	1.4
Approaches to reform of foreign domiciliary taxation	1.5
History of reform of foreign domicile taxation.	1.6
2008 reforms: assessment.	1.7
The promise of stability.	1.8
The tax consultation framework.	1.9
The future.	1.10

CHAPTER TWO

Domicile

Why does domicile matter?	2.1
The concept of domicile.	2.2
Domicile of origin.	2.3
Domicile of choice	2.4
Retaining foreign domicile of origin while UK resident.	2.5
Acquisition of foreign domicile of choice.	2.6
Loss of domicile of choice.	2.7

Dual residence and domicile..	2.8
Presence in UK because of illness.	2.9
Domicile and citizenship.	2.10
Refugees, illegal immigrants and temporary visas.	2.11
Married women..	2.12
Child's domicile of dependency.	2.13
Republic of Ireland/Northern Ireland.	2.14
HMRC rulings and domicile investigations.	2.15
Domicile of company.	2.16

CHAPTER THREE

Residence of Individuals

Residence and ordinary residence – Introduction.	3.1
The concepts of residence and ordinary residence.	3.2
Temporary UK purpose and 183-day rules.	3.3
Occasional residence abroad rule.	3.4
Statutory residence rules and natural meaning of “residence”.	3.5
Accommodation in the UK.	3.6
CGT statutory residence rules.	3.7
Case law on residence..	3.8
Case law: ordinary residence.	3.9
Period for enquiry into residence.	3.10
Non-residence motivated by tax considerations.	3.11
Commentary: Assessment of case law tests.	3.12
Dual residence/dual ordinary residence	3.13
Ordinary resident but not resident.	3.14
HMRC practice before 2008/09: IR20.	3.15
HMRC6..	3.16
The 183-day rule.	3.17
Short absences.	3.18
Full-time work abroad.	3.19
Seafarers.	3.20
Year settled abroad.	3.21
Year travelling abroad.	3.22
Leaving the UK permanently or indefinitely.	3.23
Days of arrival and departure.	3.24
Method of calculating 91 day average.	3.25
Calculating annual average visits: illness & exceptional circumstances.	3.26
Coming to the UK.	3.27
The three years in the UK practice	3.28
Remaining in the UK for two years.	3.29
Visitors.	3.30

Calculating annual average visits for visitors rules.	3.31
Ordinary residence.	3.32
Students	3.33
Diplomats, UN/EU officials.	3.34
HMRC forms, rulings and certificates.	3.35
Scottish taxpayers (from 2016)..	3.36

CHAPTER THREE A

Residence of Individuals From 2013/14

Residence from 2013/14 – Introduction	3A.1
Scope of statutory residence test.	3A.2
Outline of statutory residence test.	3A.3
Automatic residence tests.	3A.4
Automatic overseas tests.	3A.5
The sufficient ties test.. . . .	3A.6
Days spent.. . . .	3A.7
“Home”.. . . .	3A.8
Work.. . . .	3A.9
UK ties.	3A.10
Family tie.	3A.11
Accommodation tie.. . . .	3A.12
Work Tie.. . . .	3A.13
90-day Tie	3A.14
Country tie.	3A.15
International transportation workers.. . . .	3A.16
Continuing significance of old residence law.	3A.17
Ordinary residence.	3A.18

CHAPTER FOUR

Residence of Trustees

Trustee residence – Introduction.	4.1
Who are the trustees?.	4.2
Trustees treated as single and distinct person.	4.3
Trustee residence for income tax and CGT.	4.4
Trustee residence condition A: all trustees UK resident.	4.5
Trustee residence condition B: mixed resident trustees.. . . .	4.6
Trustee residence condition C.	4.7
Accidental residence: a trap.	4.8
Sub-funds.	4.9
Transfer between settlements.. . . .	4.10
Permanent establishment residence rule.. . . .	4.11
When is there a UK PE?.. . . .	4.12

UK protector and trustee residence	4.13
Trustee residence for IHT.	4.14
Commentary: Let's abolish the relevance of trustee residence.	4.15

CHAPTER FIVE

Treaty-Residence

Three concepts of residence.	5.1
Relationship between treaty- and UK-law residence.	5.2
Residence under art. 4.1.	5.3
"Person".	5.4
"Liable to tax".	5.5
Change of residence during tax year.	5.6
Exception where source tax only.	5.7
Tie-breaker tests for individuals.	5.8
Permanent home.	5.9
Centre of vital interests.	5.10
Habitual abode.	5.11
Nationality and mutual agreement procedure.	5.12
Period for enquiry into individuals tie-breaker tests.	5.13
Treaty-residence: Trusts.	5.14
Treaty-residence: Partnerships.	5.15
Partnerships under non-OECD model DTAs.	5.16
RICs, REITs and REMICs	5.17
Place of effective management ("POEM").. . . .	5.18
USA/UK DTA.	5.19

CHAPTER SIX

Year of Arrival and Departure

Arrival and departure – Introduction.	6.1
Income tax: statutory split year rule.	6.2
Concession A11.	6.3
IT computation where ESC A11 applies.	6.4
IT Computation in year of arrival: RFI.	6.5
IT computation in year of departure: RFI.	6.6
Interest from FOTRA securities.	6.7
Income within s.624 ITTOIA.	6.8
Income within s.720 and s.731 ITA.	6.9
UK source investment income.	6.10
Gains from life policies, etc.	6.11
Accrued income scheme.	6.12
Withholding tax on interest.	6.13
UK resident individual becoming ordinarily resident during the year. . .	6.14

Income tax on trustees.	6.15
CGT statutory split year rule.	6.16
Concession D2.	6.17
Computation of CGT.	6.18
CGT on trusts: year of arrival and departure.	6.19
CGT planning: postponing disposals until non-resident.	6.20
Tax planning before arrival in the UK.	6.21
Appeal against withdrawal of concession.	6.22
Reforms proposed for 2013/14.	6.23
Terminology.	6.24
Split year reliefs.	6.25
Year of acquisition of UK domicile.	6.26

CHAPTER SEVEN

Exit Taxes

Exit taxes – Introduction.	7.1
Clawback of hold-over relief on emigration of individual.	7.2
Clawback of EIS relief.	7.3
Charge on emigration of trust.	7.4
Liability of trustees for exit charge.	7.5
Charge on treaty-emigration of trust.	7.6
Disclosure of emigration or treaty-emigration of trust.	7.7
Emigration of individual trader.	7.8
EU restriction on exit taxes.	7.9
Council Resolution on coordinating exit taxation.	7.10

CHAPTER EIGHT

Temporary Non-residence

Temporary non-residence – Introduction.	8.1
Purpose of the temporary non-residence rules.	8.2
Temporary non-resident conditions	8.3
“Residence requirements”.	8.4
Gains and losses accruing in intervening years.	8.5
Interaction with remittance basis.	8.6
Pre-departure income.	8.7
Interaction with double taxation relief.	8.8
Post-departure acquisitions.	8.9
Section 10A and non-resident trusts/companies.	8.10
Time limit for assessment.	8.11
Offshore funds.	8.12
DTA and other short term non-residence rules.	8.13
Temporary non-residence from 2013.	8.14

Temporarily non-resident and other terms from 2013.	8.15
Gains and losses accruing in intervening years from 2013.	8.16
Remittance of income in intervening years from 2013.	8.17
Distributions to participators in close companies.	8.18
Chargeable event gains in intervening years from 2013.	8.19
Specific employment income.	8.20
Minor definitions.	8.21

CHAPTER NINE

The Remittance Basis

Remittance basis – Introduction.	9.1
HMRC guidance.	9.2
“Foreign income and gains”.	9.3
History of the remittance basis.	9.4
Who qualifies for the remittance basis?.	9.5
Remittance basis claimants: s.809B.	9.6
Sub-£2k taxpayer: s.809D.	9.7
Non-taxpayers: s.809E.	9.8
Time of foreign domicile.	9.9
Remittance basis claim charge	9.10
Nature of charge on remitted RFI.	9.11
Charge on remitted gains.	9.12
Remittance in year after income/gains arise.	9.13
Remittance after acquisition of UK domicile.	9.14
Remittance in year when taxed on arising basis.	9.15
RFI/gains arising when resident, remitted when non-resident.	9.16
Remittance after death.	9.17
Remittance after source has ceased.	9.18
RFI/gains arising when non-resident, remitted when resident.	9.19
RFI from Ireland.	9.20
Remittance basis for trustees.	9.21
Forward tax agreements.	9.22

CHAPTER TEN

The Meaning of Remittance

Meaning of remittance – Introduction.	10.1
Relevant person: introduction.	10.2
Relevant person: close family.	10.3
Relevant persons: companies.	10.4
Relevant persons: trusts.	10.5
Body connected with trust	10.6
Companies as connected persons: examples.	10.7

Relevant person transitional rule: pre-2008/09 income and gains.	10.8
Relevant and other persons: compliance.	10.9
Commentary: let's simplify remittance and relevant person rules.	10.10
Remittance condition A (link to UK).	10.11
Remittance condition B (link to foreign income/gains).	10.12
Property is the income or the gains.	10.13
Derived property.	10.14
Debt remittance rules.	10.15
Relevant debt.	10.16
Debt "relating" to property (debt-related asset).	10.17
"Use in respect of" a relevant debt.	10.18
Becoming/ceasing to be a relevant person: conditions A & B.	10.19
Debt becoming/ceasing to be a relevant debt.	10.20
Remittance condition C (gift recipients).	10.21
Remittance condition D (connected operation).	10.22
Amount remitted.	10.23
CGT disposal not for market value.	10.24
Purchase of family home.	10.25
Payment of school fees.	10.26
Remittance before income or gains arise.	10.27
Partnerships.	10.28
Proceeds of divorce settlement.	10.29
Debit, credit and charge cards.	10.30
Gift to charity by remittance basis taxpayer.	10.31
Transitional relief for property acquired before 2008.	10.32
Transitional loan relief: pre-2008 loans.	10.33
Basic remittance basis planning.	10.34
Reform.	10.35

CHAPTER ELEVEN

Remittance Reliefs

Remittance reliefs - introduction.	11.1
Remittance investment relief.	11.2
Relevant event.	11.3
The relief.	11.4
Anti-avoidance.	11.5
Claims.	11.6
Qualifying investments.	11.7
Investment condition A (trading company/group).	11.8
Investment condition B (no benefit).	11.9
Clawback remittance charge.	11.10
Potentially chargeable event.	11.11

The appropriate mitigation steps.	11.12
Taking offshore.	11.13
“The disposal proceeds”.	11.14
The grace period.	11.15
Exceptional circumstances.	11.16
Extension of grace period.	11.17
Effect of taking mitigation steps.	11.18
Order of disposals.	11.19
Mixed funds.	11.20
Remittance investment relief: commentary.	11.21
Relief for payment of remittance basis charge.	11.22
Foreign services relief.	11.23
Exempt property.	11.24
Public access rule.	11.25
Personal use rule.	11.26
Repair rule.	11.27
Temporary importation rule.	11.28
De minimis rule.	11.29
Exempt property clawback charge.	11.30

CHAPTER TWELVE

Mixed Funds

Mixed funds – Introduction.	12.1
Definition of “mixed fund”.	12.2
Ingredients of a mixed fund.	12.3
Onshore transfer mixed fund rule.	12.4
Offshore transfer mixed fund rule.	12.5
Mixed fund with different types of RFI.	12.6
Mixed funds held by third parties.	12.7
Unremitted income transferred to trust.	12.8
From which fund is remittance made: bank errors.	12.9
Mixed fund anti-avoidance rule.	12.10
ITA mixed fund rules: commentary.	12.11
Transitional rules for pre-2008 mixed fund.	12.12
Pre-2008 mixed fund rules.	12.13
Pre-2008 mixed funds: HMRC examples.	12.14
Remittance of nominated income or gains.	12.15
Nominated income: commentary.	12.16

CHAPTER THIRTEEN

Employment Income

Employment income – Introduction.	13.1
---	------

Terminology.	13.2
The charge to tax on employment income.	13.3
Amount charged to tax (taxable earnings).	13.4
Taxable earnings.	13.5
Earnings “for” a year, “from the employment in a year” and “received in a year”.	13.6
Earnings “for” a tax year.	13.7
Pre-commencement and post-cessation earnings.	13.8
Resident ordinarily resident and UK domiciled employee.	13.9
Resident, ordinarily resident and foreign domiciled employee.	13.10
Chargeable overseas earnings.	13.11
Foreign employer.	13.12
Incidental duties in UK.	13.13
Dual contract arrangements.	13.14
Record Keeping and Disclosure	13.15
Resident but not ordinarily resident employee.	13.16
Non-resident employee.	13.17
Duties “performed in the UK”.	13.18
Earnings “in respect of” duties performed in the UK.	13.19
Relocation expenses.	13.20
Remittance after year which earnings are “for”.	13.21
Remittance after employment ceases.	13.22
Remittance of earnings “for” year that employee is not UK resident.	13.23
Remittance when non-resident.	13.24
Receipt or remittance after death of employee.	13.25
Remittance from earnings for mixed UK/foreign duties.	13.26
Earnings from Ireland.	13.27
Termination payments.	13.28
Overseas Crown employment.	13.29
Seafarers.	13.30
Lower-paid employee exemption.	13.31
Tax equalisation.	13.32
Accountancy services benefit.	13.33
DT Relief: employment exercised outside UK.	13.34
DT relief: employment exercised within UK.	13.35
DTA defence to BiK charge	13.36
DTAs: Directors Fees.	13.37
DT relief: government service.	13.38
DT relief: claims.	13.39
Workday relief from 2013/14.	13.40
Meaning of “based” in the UK.	13.41

CHAPTER FOURTEEN

PAYE

PAYE – Introduction.	14.1
Non resident and NOR employees.	14.2
PAYE adjustment to recapture lost personal allowance.	14.3
Repayment of overpaid PAYE.	14.4
Short-term business visitors: PAYE exemption.	14.5
Foreign tax credit relief: PAYE exemption.	14.6
Tax equalisation.	14.7

CHAPTER FIFTEEN

Trading Income

Trading income – Introduction.	15.1
Charge on trading income.	15.2
Trading income of UK resident.	15.3
To whom does trading income arise?	15.4
Trading income of non-resident.	15.5
Place where contract made.	15.6
Rejection of place of contract test.	15.7
Where profits in substance arise.	15.8
Trading in UK: preparatory and auxiliary activities.	15.9
Buying from UK sellers.	15.10
Buying and selling to UK purchasers.	15.11
Services	15.12
Construction and engineering works.	15.13
Manufacturing.	15.14
Use of UK commodity markets.	15.15
Leasing and licensing tangible property.	15.16
Research division and shop windows.	15.17
Where is contract made?	15.18
Trade partly in UK: apportionment.	15.19
DT relief for trading income.	15.20

CHAPTER SIXTEEN

Property Income

Property income – Introduction.	16.1
Property income terminology.	16.2
Taxation of income from property business.	16.3
Losses of overseas property business	16.4
Losses from 2008/09.	16.5
Losses before 2008/09.	16.6
Border between trading income and property income.	16.7

Double Taxation Relief.	16.8
------------------------------	------

CHAPTER SEVENTEEN

Deduction of Interest in Computing Property Income

Deduction of interest – Introduction.....	17.1
Basis for deduction.....	17.2
Capital or revenue expenditure.....	17.3
Wholly and exclusively.	17.4
Tax relief schemes and arrangements.....	17.5
Transfer pricing and thin capitalisation.	17.6
The participation condition.	17.7
The general rule.	17.8
“Differ from the provision that would have been made”.....	17.9
Securities (loans).	17.10
Definitions.	17.11
Potential advantage in relation to UK taxation.	17.12
Exemption for small companies.	17.13
Election into transfer pricing regime.	17.14
Resident of non-qualifying territory.....	17.15
Qualifying Territory.....	17.16

CHAPTER EIGHTEEN

Savings and Investment Income

Savings and investment income – Introduction	18.1
Why does “capital v. income” matter?.....	18.2
Source of income.	18.3
Location of source of income.....	18.4
Building societies.....	18.5
Open-ended investment companies and AUTs.....	18.6
Industrial and provident societies	18.7
Alimony and maintenance income.....	18.8
Income from contracts (casual income).	18.9

CHAPTER NINETEEN

Interest Income

Interest – Introduction.	19.1
Definition of interest.....	19.2
Interest: charge.	19.3
Interest: location of source.....	19.4
Case law on source of interest.	19.5
HMRC view(s)	19.6
Source of interest: conclusion.	19.7

Non-resident's withholding tax.	19.8
To whom is interest paid?	19.9
Usual place of abode.	19.10
Exceptions to obligation to deduct	19.11
Double tax treaty relief.	19.12
Withholding tax on interest from deposit-takers.	19.13
Relevant investment.	19.14
Exceptions for non-residents.	19.15
Duty on deposit-taker.	19.16
EU Interest and Savings Directive.	19.17

CHAPTER TWENTY

Exempt Interest of Non-Residents

Exempt interest – Introduction.	20.1
Meaning of “FOTRA Securities”	20.2
Deduction at source.	20.3
FOTRA exemption.	20.4
Beneficial ownership.	20.5
FORTA securities held on trust.	20.6
Interaction of FOTRA exemption and DT relief.	20.7
Exempt foreign currency securities.	20.8
Securities of international organisations.	20.9

CHAPTER TWENTY ONE

Dividends and Distributions

Dividends and distributions – Introduction.	21.1
Income from UK resident company.	21.2
Income from non-resident company.	21.3
Receipt from a non-resident company: income or capital?	21.4
Income distribution from non-resident company: location of source	21.5
Distribution to non-shareholder.	21.6
DT relief.	21.7

CHAPTER TWENTY TWO

Royalty Income

Royalties – Introduction.	22.1
Classification of royalty income for tax.	22.2
Non-trade royalties.	22.3
Where is the source of non-trade royalties?	22.4
Withholding tax.	22.5
Trade royalties.	22.6
DT relief for royalties.	22.7

Films and sound recordings.	22.8
-------------------------------------	------

CHAPTER TWENTY THREE

Pension Income

Pension Income – Introduction.	23.1
UK pension.	23.2
Foreign pension.	23.3
Commonwealth government pensions.	23.4
Canadian RRSP and RRIF.	23.5
US IRAN.	23.6
Double Taxation relief.	23.7
Social security income.	23.8
US Pensions and IRAs.	23.9

CHAPTER TWENTY FOUR

Discretionary Trusts: Income Tax

Discretionary trusts – introduction	24.1
Tier 1: charge on trustees on receipt of income.	24.2
Tier 3: Discretionary income payment: charge on beneficiary.	24.3
Beneficiaries tax credit	24.4
Tier 2: Charge on trustees making discretionary income payment.	24.5
Trustees tax pool credit.	24.6
HMRC example.	24.7
Payment from discretionary trust: income or capital receipt?.	24.8
Discretionary trusts treated as transparent to allow beneficiary reliefs.	24.9
ESC B18 relief for non-resident trust.	24.10
UK trust - non resident beneficiary: DTA relief.	24.11
Are discretionary trusts "beneficial owners" for DTA purposes?.	24.12
Scots trusts and Scots beneficiaries (from 2016).	24.13

CHAPTER TWENTY FIVE

IP Trusts: Income Tax

Taxation of life tenant.	25.1
Trustees expenses.	25.2
Taxation of IP trustees.	25.3
DT reliefs.	25.4
Baker or Garland trust jurisdiction?.	25.5

CHAPTER TWENTY SIX

Settlor-Interested Trusts

Settlor-interested trusts – Introduction	26.1
Meaning of “income arising under a settlement”.	26.2

Meaning(s) of “settlor-interested”	26.3
Section 624 beneficiary relief.	26.4
Section 624 remittance basis.	26.5
S.624 remittance basis planning.	26.6
Non-resident settlor.	26.7
Tax return: disclosure of s.624 income.	26.8
Taxation of trustees of settlement within s.624.	26.9
Taxation of life tenant (not settlor) of settlor-interested trust.	26.10
Settlor indemnity	26.11
Section 624 v. s.720: comparison and priority.	26.12
Settlor receives capital sum.	26.13
Interaction of s.624 and s.37 TCGA.	26.14
Corporate settlor.	26.15

CHAPTER TWENTY SEVEN

Transfer of Assets Abroad: Introduction

TAA – Introduction.	27.1
“Relevant transfer”	27.2
A “transfer” of “assets”.	27.3
Person abroad.	27.4
Income “becomes payable” to person abroad.	27.5
Situs of transferred assets.	27.6
Transfer for full consideration.	27.7
Income accruing to person abroad: causation conditions.	27.8
Associated operation: definition.	27.9
Significance of associated operations.	27.10
Person abroad receives income as indirect consequence of transfer.	27.11
Income of person abroad.	27.12
Capital receipts deemed to be income.	27.13
The amount of income of person abroad.	27.14

CHAPTER TWENTY EIGHT

Transfer of Assets Abroad: Transferors

TAA charges on transferor.	28.1
Who is liable?	28.2
Who is the transferor?	28.3
Must the transferor avoid or intend to avoid IT?	28.4
Transferor not ordinarily resident.	28.5
Section 721 Condition A (power to enjoy).	28.6
“Power to enjoy”.	28.7
Power to enjoy: causation condition.	28.8
Income chargeable: Section 721 Condition B.	28.9

Amount of s.720 charge.	28.10
Transferor receives capital sum.	28.11
The capital receipt conditions.. . . .	28.12
Time extent of s.727 charge.	28.13
Section 720 remittance basis.	28.14
No indemnity for transferor	28.15
Tax return: disclosure of s.720 income.	28.16

CHAPTER TWENTY NINE

Transfer of Assets Abroad: Non-Transferors

Non-transferors – Introduction and terminology.	29.1
Relevant transfer condition.. . . .	29.2
Ordinary residence condition.	29.3
Benefit.	29.4
Who is the recipient of a benefit?.. . . .	29.5
Valuation of benefits.	29.6
Benefit causation condition.	29.7
Benefit causation condition: two transfers of assets.	29.8
Transferor’s s.731 defence.	29.9
S.731 capital condition.	29.10
Is a benefit within s.731 a capital payment?.. . . .	29.11
Computation of charge.	29.12
Section 733 computation when benefit subject to CGT.. . . .	29.13
“Relevant income”: definition.	29.14
Deemed income of person abroad.	29.15
Is income of life tenant relevant income?.. . . .	29.16
Is trust income within s.624 relevant income?.. . . .	29.17
Is income within s.720 relevant income?.. . . .	29.18
Income which “can” be used to benefit another person.	29.19
When does one ask?: the timing issue.	29.20
Relevant income used to pay expenses.. . . .	29.21
Relevant income of trust distributed as income in year it arises.	29.22
Relevant income of trust distributed as income after year it arises.	29.23
Relevant income of trust accumulated.	29.24
Corporate income distributed to trust.. . . .	29.25
Distributed income: HMRC view.. . . .	29.26
Relevant income reinvested: tracing.. . . .	29.27
Tracing: are distributions out of relevant income?.. . . .	29.28
Distributing income: tax planning.	29.29
Is income of company held by a trust relevant income?.. . . .	29.30
Individual not a beneficiary when income arises.	29.31
Transfer between trusts.. . . .	29.32

Tax and tax credits of person abroad.	29.33
Section 731 remittance basis	29.34
Section 731 matching rules.	29.35
Where is a benefit received?.. . . .	29.36
Section 720 and 731 remittance basis compared	29.37
Summary of responses to s.731.	29.38
Tax return: disclosure of s.731 income.	29.39

CHAPTER THIRTY

Transfer of Assets Abroad: Double Taxation Issues

TAA reliefs – Terminology.	30.1
Undistributed UK taxable income of offshore company	30.2
Distribution to T of income of company within s.720.	30.3
Distribution relief.	30.4
Distribution (not to T) of income of company within section 720.	30.5
Double-counting relief.	30.6
Section 720 trust/company and company/subsidiary structure.	30.7
Life policies.	30.8
Section 731 charge followed by income distribution.	30.9
Section 731 trust/company structure.	30.10

CHAPTER THIRTY ONE

Transfer of Assets Abroad: Motive Defence

Motive defence – Introduction.	31.1
Motive defence condition A	31.2
Motive defence condition B	31.3
Enactment history.	31.4
“Commercial” in Old Condition B	31.5
“Commercial” in New Condition B.	31.6
“Avoidance”, “mitigation”, “tax reduction”, “evasion”: introduction.	31.7
Meaning of “avoidance” in motive defence.	31.8
Meaning of “taxation” in the motive defence	31.9
Identifying and classifying purpose: the old conditions.	31.10
Identifying and classifying purpose: the New Conditions.	31.11
Transfer made for tax and non-tax purposes.	31.12
Foresight and purpose.	31.13
Consequence and purpose	31.14
Purpose: advisors and agents of transferor.	31.15
Avoidance/mitigation distinction.	31.16
Failed indicia of tax avoidance.	31.17
Intention of Parliament v intention of Government.	31.18
How to ascertain “the evident intention of Parliament”?	31.19

Reduction, deferral and unsuccessful avoidance.	31.20
Practical examples: introduction.	31.21
Trust transfers where settlor excluded.	31.22
Foreign settlor; UK and non-UK beneficiaries.	31.23
Foreign settlor; only UK beneficiaries.	31.24
UK settlor and UK beneficiaries.	31.25
UK settlor; foreign beneficiaries.	31.26
UK settlor; UK and foreign beneficiaries.	31.27
Transfer to trust; settlor a beneficiary.	31.28
Appointing non-UK trustees of UK trust: avoiding IT or CGT?.	31.29
When is a trust transfer made for the purpose of avoiding IHT?.	31.30
Transfer from non-resident trust to underlying company.	31.31
Non-resident foreign domiciled individual transfers UK property	31.32
Transfer by UK resident foreign domiciled individual to offshore	31.33
Transfer to UK resident foreign incorporated company.	31.34
Transfer from one trust to another trust.	31.35
Time to ascertain purpose of transferor.	31.36
Time to ascertain intention of Parliament and changes in law.	31.37
Associated operations: introduction.	31.38
Associated operations and motive defence before 5 December 2005.	31.39
Transfer and associated operations all after 4 December 2005.	31.40
When do associated operations have a tax avoidance purpose?.	31.41
Consequences of tainted operation.	31.42
Income arising before tainted operation.	31.43
Transfer before and operation after 5 December 2005.	31.44
Tax return: disclosure of motive defence claim	31.45
Dealing with HMRC enquiries.	31.46
Appeals.	31.47
Can an individual disclaim the motive defence?.	31.48
Motive defence: commentary.	31.49

CHAPTER THIRTY TWO

Life Policies and Contracts

Policies – Introduction.	32.1
Policies: definitions.	32.2
Outline of provisions.	32.3
Liability of individuals and individual "creators".	32.4
Liability of UK trust.	32.5
Non-resident trusts and companies.	32.6
Section 624 and chargeable event gains.	32.7
Liability of personal representatives.	32.8
Planning for immigrant to UK.	32.9

Personal portfolio bonds.....	32.10
CGT exemption for policies.....	32.11
IHT on policy held by foreign domiciliary.....	32.12

CHAPTER THIRTY THREE

Offshore Funds: Definitions

Offshore funds – Introduction.....	33.1
Meaning of “participant”.....	33.2
Meaning of “offshore fund”.....	33.3
“Mutual fund”.....	33.4
Winding-up exemption.....	33.5
Share buy-backs and share issuance.....	33.6
Companies in course of liquidation.....	33.7
Umbrella arrangements.....	33.8
Arrangements comprising more than one class of interest.....	33.9
“Reporting” and “non-reporting” funds.....	33.10

CHAPTER THIRTY FOUR

Offshore Funds: Taxation

Taxation of offshore funds – Introduction.....	34.1
Definitions.....	34.2
Charge to tax on OIGs.....	34.3
Meaning of “disposal”.....	34.4
Death of individual.....	34.5
OIG accruing to partnership.....	34.6
OIG remittance basis.....	34.7
OIG arising to UK trust.....	34.8
OIG non-residence defence.....	34.9
OIG arising to non-resident trust.....	34.10
Outline of OIG anti-avoidance provisions.....	34.11
OIG TAA provisions.....	34.12
OIG s.87 TCGA charge.....	34.13
OIG s.13 charge.....	34.14
OIGs and s.86 TCGA.....	34.15
Interaction of anti-avoidance provisions.....	34.16
Priority between OIG s.87 TCGA and OIG TAA provisions.....	34.17
Priority between OIG s.720 and OIG s.87.....	34.18
Interaction of OIG s.87 TCGA and OIG TAA provisions where motive defence applies.....	34.19
Computation of OIGs.....	34.20
Computation of CGT chargeable gain on disposal of offshore fund.....	34.21
Losses.....	34.22

Exemptions.	34.23
Exemption for transparent fund.	34.24
Distributed income of offshore fund.	34.25
Undistributed income of reporting funds (deemed RF income).. . . .	34.26
Transparent funds.	34.27
Non-reporting fund with interest in reporting fund.	34.28
Fund transactions treated as non-trading.	34.29
Conversion from non-reporting fund to reporting fund.	34.30
2009 transitional rules.	34.31

CHAPTER THIRTY FIVE

Accrued Income Profits

Accrued income profits – Introduction.. . . .	35.1
AIP securities.	35.2
“Transfer”.. . . .	35.3
Transfer “with accrued interest”.. . . .	35.4
Deemed interest payment, credit and debit.	35.5
Accrued income profits and losses	35.6
Charge on AIP income.	35.7
Relief for accrued income losses.	35.8
AIP remittance basis.. . . .	35.9
HMRC examples.	35.10
Excluded persons.	35.11
AIP non-residence defence.. . . .	35.12
Trusts.	35.13
Settlor-interested trusts.. . . .	35.14
Transfer of assets abroad.	35.15
Double taxation relief.. . . .	35.16
Interaction with CGT.	35.17
Foreign currency securities.. . . .	35.18

CHAPTER THIRTY SIX

Deeply Discounted Securities

DDS – Introduction	36.1
Meaning of “deeply discounted security”.	36.2
Securities denominated in foreign currency.. . . .	36.3
Excluded occasions of redemption.. . . .	36.4
Meaning of “disposal”.	36.5
Meaning of “profit”.	36.6
Charge to tax on disposal of DDS.	36.7
DDS remittance basis.	36.8
UK resident trust.. . . .	36.9

Non-resident individual.	36.10
Non resident trust.	36.11
Transfers of assets abroad.	36.12
Non-resident company.	36.13
Interaction with CGT.	36.14

CHAPTER THIRTY SEVEN

Unit Trusts

Unit Trusts – Introduction.	37.1
Income accruing to unit trust.	37.2
Unauthorised unit trust: foreign trustees.	37.3
Gains accruing to unit trust.. . . .	37.4
Situs of unit	37.5
Gain accruing on disposal of unit.	37.6
Luxembourg Fonds Commun de Placement	37.7

CHAPTER THIRTY EIGHT

Partnerships

Partnerships – Introduction.. . . .	38.1
“Partnership” “person” “trade” and “firm”.	38.2
Transparency of partnership for IT.. . . .	38.3
Partnership income: remittance basis.	38.4
Partnership with resident and non-resident partners.	38.5
Transparency of partnership for CGT.	38.6
Limited liability partnership.	38.7
Residence of partnership.	38.8
DTA relief for partnership.	38.9
SD and SDLT position of partnerships.	38.10

CHAPTER THIRTY NINE

Non-residents Income Tax Relief

Non-residents IT relief – Introduction	39.1
Non-resident individual/trustee IT relief.	39.2
Amount A (tax deducted at source).	39.3
Amount B (tax on non-disregarded income and reliefs).	39.4
Trusts: UK beneficiary rule.	39.5
Disregarded income.	39.6
Disregarded savings and investment income.	39.7
Disregarded annual payments.. . . .	39.8
Disregarded pension/social security income.	39.9
Non-resident company IT relief.	39.10
Commentary.	39.11

CHAPTER FORTY

Collection of Tax From UK Representatives

Collection of tax directly from non-residents.....	40.1
Collection of tax from UK representative.	40.2
UK representative.....	40.3
Partnerships.	40.4
Agents not treated as UK representatives.....	40.5
Casual agent exemption.	40.6
Subsidiary points.	40.7
Significance and meaning of "independent agent".....	40.8

CHAPTER FORTY ONE

Investment Manager Exemptions

Investment manager exemptions – Introduction.....	41.1
IME PE relief.	41.2
IME non-residents IT relief.	41.3
IME UK representative relief.....	41.4
Defined terms in IME legislation.	41.5
Investment manager conditions.	41.6
The 20% rule.	41.7
Independent broker conditions.....	41.8
Transactions through brokers.....	41.9
Relevance of financial trading to IME.....	41.10
When is there a trade in financial assets?.....	41.11

CHAPTER FORTY TWO

Loans From Non-Resident Companies

Advantages of loans from non-resident companies.	42.1
Non-tax aspects.....	42.2
Loans to participators.....	42.3
Benefits to participators.....	42.4
Employment-related loan.	42.5
Meaning of "employment-related loan".....	42.6
Foreign currency loan.....	42.7
Transactions in securities.....	42.8
The TiS motive defence.....	42.9
The IT circumstances.....	42.10
Discussion.....	42.11

CHAPTER FORTY THREE

Rates of Tax

IT rates – Introduction.	43.1
-------------------------------	------

Basic/higher/additional rates.	43.2
Starting rate for savings income.	43.3
Rates of tax on dividend income.	43.4
Settlor-interested trust: rates of tax on settlor.	43.5
Rates of tax on transferor within s.720 ITA.	43.6
Rates of CGT.	43.7
Scots rates of income tax.	43.8

CHAPTER FORTY FOUR

Personal Allowances

Personal allowances - Introduction.	44.1
CGT annual exemption.	44.2
Entitlement to personal allowances.	44.3
Withdrawal of personal allowances for high earners.	44.4
Withdrawal of personal allowances & CGT annual exemption for remittance basis claimants.	44.5
Requirements of s.56.	44.6
Personal allowances under DTAs.	44.7

CHAPTER FORTY FIVE

National Insurance Contributions

NICs – Introduction.	45.1
Meaning of "employed" and "self-employed".	45.2
Meaning of "secondary contributor".	45.3
Territorial Limitation.	45.4
ROW: Employed in GB.	45.5
ROW: Residence requirements.	45.6
Primary and Secondary Class 1 NIC: HMRC examples.	45.7
ROW: Class 2 NIC.	45.8
ROW: Class 3 NIC.	45.9
Place of business in UK.	45.10
Residence and ordinary residence.	45.11
The EU Regulation.	45.12
Persons covered by Regulation 883/04.	45.13
EEA: Tie-breaker rules.	45.14
EEA: Self-employed rules.	45.15
Special cases by agreement.	45.16
Class 4 contributions.	45.17
Partnerships.	45.18

CHAPTER FORTY SIX

Capital Gains of UK Residents

Territorial scope of CGT.	46.1
CGT remittance basis.	46.2
Interaction of remittance basis and abolition of taper.	46.3
Liquidation of offshore company.	46.4
CGT planning: making UK situate property non-UK situate	46.5
Structure for holding UK company.	46.6
UK resident trust.	46.7
Non-resident trade with UK branch	46.8
CGT treaty relief.	46.9

CHAPTER FORTY SEVEN

Gains of Non-Resident Settlor-interested Trusts: S.86

CGT on non-resident trusts – Introduction	47.1
Fundamental s.86 conditions.	47.2
Minor definitions.	47.3
Settlor-interested condition.	47.4
Pre-1998 protected trusts.	47.5
Qualifying settlement	47.6
Pre-1991 protected trusts.	47.7
Trustee residence condition.	47.8
Settlor residence and domicile condition.	47.9
Section 86 trust gains condition.	47.10
Year of death of settlor.	47.11
Death or divorce of certain beneficiaries.	47.12
Attribution of s.86 gains to settlor.	47.13
Interaction of s.86 and s.13 TCGA.	47.14
Interaction of ss.86 and 87 TCGA.	47.15
Corporate settlor.	47.16
UK resident trust.	47.17

CHAPTER FORTY EIGHT

Capital Payments From Non-resident Trusts: S.87

The s.87 charge – Introduction.	48.1
“Settlement” and “trustee”.	48.2
Non-resident settlement condition.	48.3
The s.87 charge.	48.4
Section 2(2) amount.	48.5
Capital payment.	48.6
Receipt from the trustees.	48.7
Capital payment from close company.	48.8

Capital payment to non-resident close company.	48.9
Matching.	48.10
Planning by matching.	48.11
Capital payment received by non-beneficiary.	48.12
Interest surcharge.	48.13
Non-resident beneficiary.	48.14
Section 87 remittance basis.	48.15
Migrant settlements.	48.16
Dual resident trust – s.88 TCGA.	48.17
Transfer between trusts.	48.18
1981 transitional relief.	48.19
1998 transitional relief.	48.20
Ascertaining s.2(2) amounts as at end 2007/8.	48.21
Pre-2008 capital payments.	48.22
Pre-2008 capital payment matched after 2008; Pre-2008 s.2(2) amounts matched after 2008.	48.23
Pre-2008 inter-trust transfer.	48.24
Pre-2008 trust immigration.	48.25
Rebasing: introduction.	48.26
Rebasing: the election.	48.27
Rebasing: the relief.	48.28
Rebasing - HMRC examples.	48.29
Rebasing: minor rules.	48.30
Rebasing: OIG amounts.	48.31
Rebasing: transfers between trusts.	48.32
CGT planning aspects of non-resident trusts.	48.33
Four basic strategies for the s.87 charge.	48.34
Record keeping.	48.35
Tax return: disclosure of s.87 gains.	48.36
Criticism of s.87 regime.	48.37

CHAPTER FORTY NINE

Borrowing by Non-resident Trust: Sch 4B TCGA

Borrowing by non-resident trust: introduction.	49.1
Explanation of flip-flop schemes.	49.2
The key conditions.	49.3
Sch4B-transfer.	49.4
Settlement “within section 86 or 87”.	49.5
Trustee borrowing.	49.6
Sch4B-transfer “linked” with trustee borrowing.	49.7
Normal trust purposes.	49.8
Normal trust purposes: Payment for ordinary trust assets.	49.9

Normal trust purposes: Repayment of loan.	49.10
Normal trust purposes: Payment of expenses.	49.11
Sch4B-disposal.	49.12
Treatment of gain or loss arising on Sch4B-disposal.	49.13
Schedule 4C: introduction.	49.14
Schedule 4C pool.	49.15
“Schedule 4B trust gains”.	49.16
Restrictions on use of losses.	49.17
Subsequent Sch4B-disposal.	49.18
Attribution of Schedule 4C gains to beneficiaries.	49.19
“Relevant settlements”.	49.20
Remittance basis.	49.21
Temporary non-resident rules.	49.22
Interest supplement.	49.23
Settlement ceasing to exist after Sch4B-disposal.	49.24
Definitions.	49.25
OIG sch 4C.	49.26
Commentary.	49.27

CHAPTER FIFTY

Gains of Non-Resident Companies

Section 13 TCGA – Introduction	50.1
Non-resident close company.	50.2
Attribution of s.13 gains to participator.	50.3
Non-resident trustees.	50.4
Computation of non-resident company gains on CT principles.	50.5
Identifying the participators.	50.6
Overlapping participators: trustees and beneficiaries.	50.7
Amount of gain attributed to each participator.	50.8
Overlapping participators: loan creditors.	50.9
CG Manual examples: shareholders v. loan creditors.	50.10
Chains of companies.	50.11
Chains of companies not wholly owned	50.12
Section 13 remittance basis.	50.13
10% de minimis exemption.	50.14
Non-resident trading company.	50.15
Non-resident company within CT.	50.16
Pension schemes.	50.17
Partnership holding non-resident company.	50.18
Company distribution relief.	50.19
Company disposal relief.	50.20
Reimbursement by non-resident company.	50.21

Loss accruing to non-resident company.....	50.22
Negligible value claims.	50.23
Group relief.....	50.24
Group relief clawback charge.....	50.25
Two or more associated companies leave group at same time.....	50.26
Private residence relief.....	50.27
Administration and appeals.	50.28

CHAPTER FIFTY ONE

Capital Losses

Capital losses – Introduction.	51.1
Deduction of losses.....	51.2
Allowable loss.	51.3
Loss accruing to non-resident.....	51.4
Carry-back of losses on death.....	51.5
Loss accruing to non-resident trustees.....	51.6
Disallowance of personal losses of beneficiary against s.87 gains.	51.7
Personal losses of settlor and s.86 gains.....	51.8
Loss accruing to remittance basis taxpayer.	51.9
Disallowance of foreign losses if no election is made.....	51.10
Position if loss election is made.....	51.11
When is a loss election worthwhile?.....	51.12
Inter-spouse transfer.....	51.13

CHAPTER FIFTY TWO

Foreign Currency Issues

Foreign currency issues – introduction.....	52.1
CGT: Currency conversion date.....	52.2
Trading income and property income.....	52.3
Income taxed on arising basis: currency conversion date.	52.4
Sterling income converted to foreign currency.	52.5
Income taxed on remittance basis: currency conversion date.	52.6
Sub-£2k taxpayer: currency conversion date.	52.7
Nominated income and gains: currency conversion date.....	52.8
Tax credit relief: currency conversion date.	52.9
Foreign currency bank accounts: CGT.....	52.10
Foreign currency held in coins or banknotes.	52.11
Interaction with mixed fund rules and HMRC examples.....	52.12
Commentary: solution to remaining foreign currency problems.	52.13

CHAPTER FIFTY THREE

Double Taxation Arrangements: Introduction

DT reliefs – Introduction.	53.1
Treaty terminology.	53.2
Types of DT relief.	53.3
Types of residence and dual residence.	53.4
Significance of DT reliefs to different classes of residents.	53.5
Interpretation of DTAs: ordinary meaning & purposive construction.	53.6
Context of treaties.	53.7
Treaties in two languages.	53.8
Variations between DTAs.	53.9
Status of OECD commentary.	53.10
Undefined terms have domestic law meanings.	53.11
Tax avoidance using DTAs.	53.12
Incorporation of DTAs into UK law.	53.13
Interaction of DT reliefs and the remittance basis.	53.14

CHAPTER FIFTY FOUR

Foreign Tax Credit Relief

Foreign tax credit relief.	54.1
Foreign tax credit relief: property income.	54.2
CGT/IT computation deduction.	54.3

CHAPTER FIFTY FIVE

DTAs: Interaction with UK Tax Legislation

Indirect DT reliefs.	55.1
Characterisation.	55.2
DT reliefs and gains of remittance basis taxpayer.	55.3
DT reliefs: s.624 ITTOIA.	55.4
DT reliefs: s.720 ITA.	55.5
DT reliefs: s.731 ITA.	55.6
DT relief: s.13 TCGA.	55.7
Foreign tax credit: s.13 TCGA.	55.8
DT reliefs: s.86 TCGA.	55.9
Restriction on DTR for gains of trustees and settlors.	55.10
DT reliefs: s.87 TCGA.	55.11
DT reliefs: offshore income gains.	55.12
DT reliefs: policies.	55.13
US/UK DTA.	55.14
US/UK DTA: fiscally transparent bodies.	55.15
"Subject to tax".	55.16

CHAPTER FIFTY SIX**EU Law and UK Taxation**

EU law and UK taxation – Introduction	56.1
Relationship of EU law and UK law.	56.2
EC infringement proceedings.	56.3
Which freedom?.	56.4
Freedom of establishment.	56.5
Public policy exemption to restriction on FoE.	56.6
Free movement of capital.	56.7
Justification for restriction on free movement of capital.	56.8
Freedom to provide services.	56.9
Other aspects of EU law.	56.10
Section 13 TCGA.	56.11
Transfer of assets abroad.	56.12
Section 86 TCGA.	56.13
IHT and EU law.	56.14
Reimbursement of tax paid in breach of EU law.	56.15

CHAPTER FIFTY SEVEN**Deemed Domicile for IHT**

Deemed domicile for inheritance tax – Introduction.	57.1
Deemed UK domicile.	57.2
Deemed domiciliary leaving the UK.	57.3
Domicile of child of a deemed domiciliary.	57.4
1974 transitional rules.	57.5
Tax planning for the deemed domiciliary.	57.6

CHAPTER FIFTY EIGHT**Excluded Property for IHT**

Excluded property – Introduction.	58.1
Non-settled property: foreign situate property.	58.2
Non-settled property: authorised unit trusts and OEICs.	58.3
Non-settled property: FOTRA securities.	58.4
Conditions for FOTRA exemption.	58.5
"Beneficial ownership" of FOTRA securities.	58.6
UK funds v foreign funds.	58.7
Individual domiciled in Channel Islands or Isle of Man.	58.8
Trusts: foreign situate property.	58.9
Trusts: authorised unit trusts and OEICs.	58.10
Trusts: FOTRA securities.	58.11
Estate IP trust.	58.12
Initial interest of settlor or spouse.	58.13

Settlor adds property to trust after change of domicile.	58.14
Occasions where excluded property is relevant for IHT.	58.15
Transfer of value by close company.	58.16
Interests in trust property.	58.17
Non-residents foreign currency bank accounts.	58.18
Works of art.	58.19
Overseas Pensions.	58.20
IHT planning for individual.	58.21
IHT planning for non-estate IP trusts.	58.22
IHT planning for trustees of settlement with UK domiciled settlor. . . .	58.23

CHAPTER FIFTY NINE

Reservation of Benefit

GWR – Introduction.	59.1
The basic conditions.	59.2
Terminology.	59.3
Disposal before 18 March 1986	59.4
"Disposal by way of gift".	59.5
Reservation of benefit.	59.6
IHT on the disposal by way of gift.	59.7
Gift of excluded property.	59.8
GWR spouse exemption	59.9
GWR death charge.	59.10
GWR over debt owed by the deceased.	59.11
GWR death charge: non-settled property excluded property rules	59.12
GWR death charge: excluded property rules for settled property. . . .	59.13
Gift to foreign domiciled donee who creates a settlement.	59.14
GWR PET charge.	59.15
GWR on termination of interest in possession.	59.16
GWR property subject to debt.	59.17
IHT spouse exemption defence to GWR death charge.	59.18
Identifying the property disposed of by way of gift: tracing.	59.19

CHAPTER SIXTY

IHT Consequences of Transfers Between Trusts

Transfers between trusts and adding to trusts – Introduction	60.1
Trust law background.	60.2
General tax principles	60.3
The separate settlements fiction	60.4
B adds property to A's trust.	60.5
Direct settlor and indirect settlor.	60.6
Transfer from trust made by A to trust made by B.	60.7

Transfer from trust made by A to another trust made by A.	60.8
The same settlement fiction: section 81.	60.9
Pension benefits.	60.10

CHAPTER SIXTY ONE

IHT Deduction for Debts

IHT deduction for debts – Introduction.	61.1
Liability of individual.	61.2
Section 103 FA 1986.	61.3
The amount of deduction for a debt.	61.4
Deduction for debt of foreign domiciled individual.	61.5
Individual borrows and acquires excluded property.	61.6
Debt owed by individual to trust	61.7
Debts to and from trusts.	61.8
Deduction for debts of trustees.	61.9
Debt owed by estate IP trust to life tenant.	61.10
Trustees borrow and acquire excluded property.	61.11
Deduction for foreign taxes.	61.12
Funeral expenses.	61.13

CHAPTER SIXTY TWO

IHT Planning Before and After A Change of Domicile

IHT planning in anticipation of acquiring UK domicile	62.1
IHT planning: trust with foreign domiciled settlor.	62.2
Trust with UK domiciled settlor who later acquires foreign domicile.	62.3

CHAPTER SIXTY THREE

IHT on Death: Wills and IOVs

IHT spouse exemption on death of a foreign domiciliary.	63.1
Will drafting: General approach.	63.2
Instruments of variation (“IOVs”).	63.3

CHAPTER SIXTY FOUR

Double Inheritance Taxation - Introduction

International estate and inheritance taxes.	64.1
Incorporation of IHT DTAs into UK law	64.2
IHT double taxation treaties.	64.3
EU law aspects.	64.4

CHAPTER SIXTY FIVE

IHT DTAs: India, Pakistan, Italy, France

IHT double tax treaties – Introduction	65.1
Application of pre-CTT DTAs to IHT.	65.2
Treaty IHT exemption.	65.3
Domicile requirement of treaty IHT exemption.	65.4
Treaty-situs	65.5
Proper law.	65.6
Transferable nil rate bands and IHT DT reliefs.	65.7
Claims for treaty IHT exemption.	65.8
Deductions.	65.9

CHAPTER SIXTY SIX

IHT DTA: USA

USA IHT treaty – Introduction.	66.1
Scope.	66.2
Taxes covered.	66.3
Definitions.	66.4
Treaty-domicile.	66.5
IHT exemptions for individuals.	66.6
IHT exemption for trusts.	66.7
Requirement to pay foreign tax.	66.8
Dual-situate assets.	66.9
Immovable property.	66.10
Business property.	66.11
Extension of IHT spouse exemption.	66.12
Non-discrimination.	66.13
Other articles.	66.14

CHAPTER SIXTY SEVEN

IHT DTA: Switzerland

Swiss IHT treaty – Introduction.	67.1
Scope.	67.2
Taxes covered.	67.3
Definitions.	67.4
Treaty-domicile.	67.5
IHT exemption.	67.6
Extension of IHT spouse exemption.	67.7
Immovable property.	67.8
Business property.	67.9
Other articles.	67.10

CHAPTER SIXTY EIGHT

Foreign IHT Credit Relief

Foreign IHT credit – Introduction.	68.1
Unilateral IHT credit.	68.2
Requirement to pay foreign IHT.	68.3
Use of foreign IHT credit.	68.4
Amount of credit.	68.5
Planning.	68.6
DTA IHT credit: pre-CTT DTAs.	68.7
USA DTA: Credit for foreign IHT.	68.8
Claims for foreign IHT credit relief.	68.9

CHAPTER SIXTY NINE

UK Domiciliary Married to Foreign Domiciliary

UK domiciliary married to foreign domiciliary – Introduction.	69.1
Restricted IHT spouse exemption for foreign domiciled spouse.	69.2
Spouse or widow of settlor becomes entitled to settled property.	69.3
Disposition for maintenance of spouse and other exemptions.	69.4
Transferable nil-rate band.	69.5
Inter-spouse gift of 100% BPR or APR property.	69.6
Divorce settlement where IHT spouse exemption not available.	69.7
Associated operations on inter-spouse gift.	69.8
IHT planning for mixed marriage.	69.9
CGT spouse exemption.	69.10
CGT planning for mixed marriage.	69.11
Income tax planning for mixed marriage.	69.12

CHAPTER SEVENTY

The Family Home and its Chattels

Home owned by foreign domiciliary.	70.1
Home acquired by company: SDLT penal rate.	70.2
Home held by company: proposed annual SDLT charge.	70.3
Home held by non-resident non-natural person: proposed CGT.	70.4
Homes held by non-natural persons: commentary.	70.5
Home owned by estate IP trust.	70.6
Home owned by discretionary trust.	70.7
Loan secured on property.	70.8
Home owned by non-resident company.	70.9
Home owned by company: benefit in kind charge.	70.10
“Employee” “Family” and “household”.	70.11
“By reason of the employment”.	70.12
Accommodation available but not used.	70.13

Shadow directors.	70.14
Who is a shadow director?	70.15
The cash equivalent: ss.105 and 106 computations.	70.16
Cost of providing accommodation.	70.17
Accommodation costing £75,000 or less: section 105 computation. . .	70.18
Accommodation over £75,000: section 106 computation.	70.19
Revaluation of cost in cases of delayed occupation.	70.20
Accommodation provided for more than one employee	70.21
Ways to avoid benefit in kind.	70.22
Reimbursement as solution to IT charge.	70.23
Property purchase financed by the foreign domiciliary.	70.24
Co-ownership defence to living accommodation charge.	70.25
Other defences to BiK charge.	70.26
Foreign homes relief.	70.27
Benefit in kind: remittance basis taxpayer.	70.28
Benefits in kind: non-resident individual.	70.29
Other planning possibilities using companies	70.30
Dealing with companies at risk of IT charge.	70.31
Dealing with living accommodation enquiries in practice.	70.32
Living accommodation charge: commentary.	70.33
Section 731 charge.	70.34
Transfer pricing and non-resident company holding family home. . .	70.35
SDLT on living accommodation charge.	70.36
Chattels held by companies.	70.37
“Person providing benefit”	70.38

CHAPTER SEVENTY ONE

Joint Accounts

Introduction.	71.1
The property law background.	71.2
Joint account: IHT.	71.3
Who is the settlor of trust made from joint account.	71.4
Scottish joint account.	71.5
Remittances from joint accounts.	71.6
Income from property held jointly by spouses.	71.7
Planning implications.	71.8

CHAPTER SEVENTY TWO

Pre-Owned Assets

Pre-owned assets – Introduction.	72.1
Human rights.	72.2
POA land charge.	72.3

The disposal conditions.	72.4
The contribution condition.	72.5
“Provide”.	72.6
POA chattel charge.	72.7
POA intangible property charge.	72.8
Excluded transactions.	72.9
Excluded transactions: disposal conditions.	72.10
Excluded transactions: contribution conditions.	72.11
Meaning of “outright gift”.	72.12
Exemptions from charge.	72.13
“Relevant property”.	72.14
Estate exemptions.	72.15
Derived property.	72.16
Excluded liability rule.	72.17
Value of estate “reduced” by liability.	72.18
GWR exemptions.	72.19
Reverter to settlor restriction.	72.20
Full consideration exemption.	72.21
Partnerships.	72.22
Non-resident taxpayer.	72.23
UK resident foreign domiciliary.	72.24
Former foreign domiciliary	72.25
Quantum of charge: land.	72.26
Quantum of charge: chattels.	72.27
Quantum of charge: intangible property	72.28
Overlap of land and intangible property charges.	72.29
Interaction with benefit in kind charge.	72.30
De minimis exemption.	72.31
POA Election.	72.32
Election and Eversden schemes.	72.33
Election in case of double trust schemes.	72.34
Unwinding existing structures.	72.35
Is existing scheme validly created?.	72.36
Commentary.	72.37

CHAPTER SEVENTY THREE

Estates of Deceased Persons - CGT

Succession law background.	73.1
Meaning of “PRs” for CGT.	73.2
Residence and domicile of PRs for CGT.	73.3
Acquisition by PRs.	73.4
Transfer from PRs to beneficiaries.	73.5

Deceased not UK resident.	73.6
Gains accruing to non-resident company held by non-resident PRs.	73.7
Deceased UK resident.	73.8
CGT planning for UK resident PRs.	73.9
CGT planning by IoV.	73.10
Succession governed by foreign law.	73.11

CHAPTER SEVENTY FOUR

Estates of Deceased Persons: Income Tax

Income taxation of estates – Introduction.	74.1
Residence of PRs for income tax.	74.2
Income taxation of PRs.	74.3
Income from specific legacy.	74.4
Income from residuary estate.	74.5
Absolute/limited/discretionary interest in residue.	74.6
“UK estate” and “foreign estate”.	74.7
“Payment”.	74.8
Charge to tax on estate income.	74.9
Estate income.	74.10
Amount of estate income.	74.11
Person liable.	74.12
“Basic amount of estate income”.	74.13
Assumed income entitlement.	74.14
Beneficiary a trustee of a discretionary trust.	74.15
Beneficiary a remittance basis taxpayer.	74.16
Non-resident beneficiary of UK estate: DTA relief.	74.17
Non-resident beneficiary of UK estate: concessionary relief.	74.18
Non-resident beneficiary of foreign estate.	74.19
Time limits for claims and assessments.	74.20

CHAPTER SEVENTY FIVE

Who is the Settlor?

Why does it matter who is the settlor?.	75.1
Definitions of “settlement”.	75.2
Definitions of “settlor”.	75.3
Gift from A to B followed by gift to trust by B.	75.4
Trust created by B at request of A.	75.5
Appointment from old trust to B followed by gift to new trust by B.	75.6
Transfer from trust A to trust B by exercise of trustees' power.	75.7
Disclaimer.	75.8
Assignment or surrender of equitable interest.	75.9
Variation or resettlement by beneficiaries.	75.10

Variation under Variation of Trusts Act 1958.	75.11
Exercise of power of appointment or advancement.	75.12
Consent to exercise of power.	75.13
Provision of property for company held by trust.	75.14
Provision of services.	75.15
Interest-free or back-to-back loan.	75.16
Indemnities.	75.17
Guarantees.	75.18
Repayment of loan made by trustees	75.19
Sale or share issue at undervalue.	75.20
Failure to exercise right of reimbursement.	75.21
Payment of administrative expenses.	75.22
Trust retains life tenant's income.	75.23
Purpose: minor settlor.	75.24
Purpose: advisers and agents of settlor.	75.25
Settlement made by court for person lacking capacity.	75.26
Settlement made by compromise of claim of minor or person.	75.27
Trust under Criminal Injuries Compensation Scheme.	75.28
Trust made in divorce settlement.	75.29
Trust made by instrument of variation.	75.30
Pension trusts and employee benefit trusts.	75.31
Trust made by company: are shareholders settlors?	75.32
Planning to create trust with foreign domiciled settlor	75.33

CHAPTER SEVENTY SIX

Trusts with Two Or More Settlers

Trusts with two settlers – Introduction.	76.21
Two or more settlers of settlor-interested trust: IT.	76.2
Two or more settlers of settlor-interested trust: CGT.	76.3
Multiple settlers: cases where apportionment not possible.	76.4

CHAPTER SEVENTY SEVEN

Situs of Assets for IHT

Concepts of situs.	77.1
Every asset has one situs.	77.2
Situs of shares: general principle.	77.3
Situs of registered shares.	77.4
Registered debt securities	77.5
Securities of international organisations.	77.6
Bearer documents.	77.7
Intermediaries and depositories.	77.8
CREST.	77.9

Share certificate endorsed in blank.....	77.10
Letter of allotment of shares.....	77.11
Simple contract debt.....	77.12
Specialty obligation.....	77.13
Debt secured on land.....	77.14
Debt under letter of credit.....	77.15
Judgment debt.....	77.16
Bank account.....	77.17
Building society account.....	77.18
Insurance policy.....	77.19
Land.....	77.20
Chattels.....	77.21
Ships and aircraft.....	77.22
Goodwill and intellectual property.....	77.23
Property subject to contract of sale.....	77.24
Interest under bare trust or nominee ship.....	77.25
Equitable interest under a substantive trust.....	77.26
Unadministered estate of deceased person.....	77.27
Situs of partnership share.....	77.28
Situs of pension and death benefits.....	77.29

CHAPTER SEVENTY EIGHT

Situs of Assets for CGT

Situs of assets for CGT – Introduction.....	78.1
Meaning of "shares" and "debentures".....	78.2
Co-owned assets.....	78.3
Municipal and government securities.....	78.4
Securities of UK incorporated company.....	78.5
Registered securities: non-UK company.....	78.6
Bearer shares.....	78.7
Bearer debentures: non-UK company.....	78.8
Intermediaries and depositories.....	78.9
Debt situs rule.....	78.10
Judgment debt.....	78.11
Bank account.....	78.12
UK-law rule.....	78.13
Futures and options.....	78.14
Insurance policy.....	78.15
Land.....	78.16
Chattels.....	78.17
Ships and aircraft.....	78.18
Goodwill.....	78.19

Interest under bare trust or nominee ship.	78.20
Equitable interest under a substantive trust.	78.21
Intellectual property.	78.22
Unadministered estate of deceased person.	78.23

CHAPTER SEVENTY NINE

Foreign Entities

Introduction.	79.1
Definition of "IHT-settlement"	79.2
Meaning of "company"	79.3
Bare trusts/nominee ships.	79.4
American revocable trust (grantor trust).	79.5
Foundation (Stiftung).	79.6
Liechtenstein Anstalt (Establishment).	79.7
Liechtenstein Treuunternehmen.	79.8
Liechtenstein Treuhandshaft.	79.9
Other Liechtenstein entities	79.10
Legal life interest (Northern Ireland).	79.11
Proper liferent (Scotland).	79.12
Usufructs.	79.13
Société civile and société en nom collectif.	79.14
Jersey general and limited partnerships.	79.15
Foreign limited liability partnership.	79.16
Hindu undivided property.	79.17
Japanese tokkin.	79.18
Korean Hapja Hoesa.	79.19
Dutch bewind.	79.20
Netherlands Fonds voor gemene rekening (closed funds for mutual account).	79.21
Dutch Stichting	79.22
US S-Corps and LLCs.	79.23
USA limited partnership.	79.24
HMRC official list of transparent and opaque entities	79.25
Stamp Taxes Manual body corporate list.	79.26
Share capital.	79.27

CHAPTER EIGHTY

Control, Connected, Close and Related Expressions

Introduction.	80.1
Control.	80.2
Control in ultra-wide sense.	80.3
"Nominees"	80.4

Associates.....	80.5
Attribution of rights of associates and controlled companies.	80.6
Examples.....	80.7
Control by two or more persons together.....	80.8
Connected person.....	80.9
Connection with family members.....	80.10
Connection with trustees.....	80.11
Company connected with trustees.....	80.12
Connection with partners.....	80.13
Connection with company.....	80.14
Control in strict sense.....	80.15
Why does it matter who is a participator?.....	80.16
Definition of participator.....	80.17
Loan Creditor.....	80.18
Close company: Introduction.....	80.19
Control test.....	80.20
Close company condition B: winding-up test.....	80.21
Exceptions to close company test.....	80.22
Pension schemes.....	80.23
Quoted company exemption.....	80.24

CHAPTER EIGHTY ONE

Permanent Establishment and Branch/Agency

Why does permanent establishment matter?.....	81.1
Meaning(s) of "permanent establishment".....	81.2
Fixed place of business PE.....	81.3
Agency PE.....	81.4
Independent agent.....	81.5
Controlled companies and group companies.....	81.6
PE: preparatory and auxiliary activities.....	81.7
Alternative finance arrangements.....	81.8
PE in Colonial Model treaties.....	81.9
Commentary: let's have one definition of PE.....	81.10
Why does branch/agency matter?.....	81.11
Meaning of "branch or agency".....	81.12
Can you trade in the UK without a branch/agency or PE?.....	81.13
Commentary: let's abolish branch/agency.....	81.14

CHAPTER EIGHTY TWO

Disclosure and Compliance

Disclosure and compliance – Introduction.....	82.1
Standards of disclosure and mistake.....	82.2

Self-assessment tax return: minimum disclosure.	82.3
Carelessness.	82.4
Significance of reasonable excuse.	82.5
Advantages of above-minimum disclosure.	82.6
Voluntary disclosure to curtail enquiry period.	82.7
Veltema-standard.	82.8
Above-minimum disclosure for sake of good relations with HMRC.	82.9
Above-minimum disclosure to avoid allegation of misconduct.	82.10
IHT reporting requirement on creation of settlement.	82.11
Reporting on death of foreign domiciled individual.	82.12

TABLE OF CASES

4Cast v Mitchell 2005 STC 280.....	31.12.2
Aall Trust & Banking Corporation v Samuel McCormick 2 OFLR 85.	77.13.5
Addy v IRC 51 TC 71.	31.10.4; 31.15

CHAPTER ONE

FOREIGN DOMICILE: TAX POLICY AND REFORMS

1.1 Introduction

The topics of this chapter are:

- (1) The policy arguments for and against a lighter tax regime for foreign domiciliaries (or some similar class of footloose individuals)¹
- (2) A history of foreign domicile tax reforms
- (3) An assessment of the reforms of the FA 2008

The chapter concludes with a glance into the future

1.2 Tax competition arguments

All UK residents have a choice where to reside, but foreign domiciled individuals are in general less securely attached to the UK. Tax competition arguments claim that if their tax burden was as great as that of a UK domiciliary, fewer would choose to live in the UK, and overall the UK economy would lose:

- (1) directly, from tax paid by the foreign domiciliaries (including VAT); and
- (2) indirectly, from investment and expenditure in the UK which is more likely to be made by UK residents.²

1 For discussion on policy issues, see STEP, “Residence and Domicile: Response to Background Paper”(June 2003); CIOT, “Reviewing the Residence and Domicile Rules” (August, 2003); CIOT, “PBRN18 (Residence & Domicile Review)” (November 2007); all accessible www.kessler.co.uk.

2 Except to the extent that the tax system makes investment by UK resident foreign domiciliaries difficult, which has been the case since 2008: see 11.19 (Remittance investment relief: commentary).

Similarly, UK firms competing for expertise in the international labour market will find recruitment easier if the tax regime for foreign employees is lighter. Some potential employees would not choose, or could not afford, to come if the UK tried to tax them as it does its own domiciliaries.

To put the point in a nutshell, the UK benefits from foreign domiciliary reliefs.

1.2.1 *Assessing the strength of foreign tax competition*

There are two distinct issues:

- (1) to assess the existence and strength of international tax competition.
- (2) to assess what the UK tax system should do in the light of that tax competition.

The first question is essentially one of fact; the second is more a question of opinion or politics.

In principle there are many low-tax or preferential tax regimes where wealthy individuals may choose to reside. Switzerland, for instance, has a lump sum taxation regime for non-Swiss citizens specifically targeted for this purpose.³

In assessing the tax competitiveness of the UK relative to other countries, several points must be borne in mind.

Effective low tax may be achieved in other countries by relaxing legal provisions at administrative level, in a non-transparent way.

One paragraph summaries of other countries tax systems are bound to be misleading.

The terms of statutory tax law are only one aspect of tax competition. Compliance costs are important. The quality of tax administration is important. An OECD study lists six desiderata: a developed legal system, confidentiality, impartiality, proportionality, responsiveness [I am not sure what is meant by that] and competence. They add:

Frequent changes in legislation, particularly where there has been an

3 Though this is currently politically controversial and it was abolished in Zurich in January 2010.

The OECD study “Engaging with High Net Worth Individuals on Tax Compliance” para 34 (May 2009) singles out Ireland, France, the Netherlands and the UK for what it terms “preferential regimes for specifically defined groups of taxpayers”; see www.oecd.org/document/5/0,3746,en_2649_33749_42902277_1_1_1_1,00.html

absence of consultation, can have an adverse impact on the taxpayers and their advisers trust in the tax system.⁴

But there are others: can a tax authority subject an individual to an expensive and intrusive tax investigation without any evidence to justify doing so? Certainty is very important. Perception matters as much as reality. By many of these measures, the UK scores poorly.⁵

In the 6th and earlier editions of this book, I said:

4 “Engaging with High Net Worth Individuals on Tax Compliance” (May 2009) para 208 and 243; see

www.oecd.org/document/5/0,3746,en_2649_33749_42902277_1_1_1_1,00.html.

5 Not just in foreign domicile taxation. See, for instance, KPMG, *Taxation & the Competitiveness of UK Funds* (October, 2006):

“For all fund types, the UK tax regime is viewed less favourably than those of Ireland and Luxembourg ...The negative perception of the UK tax regime is driven more by uncertainty than by any specific factor. ...A key feature of [structured] products is that promoters must be as certain as possible of the tax analysis for investors over a period of five years and more, and hence the uncertainty of the UK regime in this area makes the UK an unsuitable domicile location. Accordingly, most firms look immediately overseas when establishing these products. ... The most common concern with the UK tax regime is not a specific tax measure that can be fixed by a change in legislation. Rather, it is the overall management of the UK tax regime, characterised by the pace of change and the style of consultation... The majority of participants made strong calls for certainty and stability, regarding the lack of these as a key adverse factor of the UK tax regime. ...The lack of constructive consultation has led to an increasing number of surprising changes to the regulations and a number of proposed changes that were reversed after further prolonged consultation. ... Comments on derivatives caused uncertainty by questioning the appropriateness of an accounts based regime that was introduced just two years before, and the suggestion that QIS would not benefit from the established regime for authorised funds, significantly slowed development of UK based QIS. As one participant commented: ‘By this stage Ireland and Guernsey were laughing.’ ...There is also a view among participants that HMRC is focused on targeting avoidance rather than creating an environment to support industry development and growth. ...

“The UK tax system undergoes constant change, or threat thereof, which results in ongoing uncertainty as to the tax treatment of funds and investors on assets totalling many billions. The UK Revenue can overturn arrangements without consultation albeit of very many years standing and is not seen to be working with the industry for the benefit of UK Plc, quite the reverse. This approach is very much at odds with that in other territories.”

The UK tax system is largely⁶ based on the rule of law rather than informal practice and discretion.

To the extent this is true it is something to boast of,⁷ and a feature which makes the UK an attractive choice for anyone choosing where to reside. However, it is far less the case than formerly, due to:

- (1) very wide, very complex, or very vague anti-avoidance provisions mitigated by informal practice, discretion or oversight.⁸
- (2) an increasing use of retrospective legislation.⁹

1.2.2 *Attitudes to tax competition arguments*

The debate about international tax competition is long standing and is not restricted to foreign domicile taxation.¹⁰

Most though not all commentators would accept that tax competition is an important factor in framing UK taxation.

Where the UK faces tax competition, those making the law sometimes acknowledge it expressly:

The [investment manager] exemption enables non-residents to appoint UK-based investment managers without the risk of UK taxation and is one of the key components of the UK's continuing attraction for investment managers.¹¹

6 But see 9.22 (Forward tax agreements).

7 The boast is an old one: Blackstone's Commentaries on the Laws of England (1765) vol 2 chap 37 provides: "a country like this, which boasts of being governed in all respects by law and not by will...".

8 Examples include the POA rules (2004); restrictions on allowable losses (2007); the ITA remittance rules (2008).

9 Examples include the IHT reforms (2006); the ITA remittance rules (2008).

10 See the evidence of Lord Vestey to the 1920 Royal Commission, accessible www.kessler.co.uk.

11 SP 1/01. Another example is the IHT exemption for OEICs and AUTs:

"Overseas investors are in theory liable to inheritance tax on their OEIC and AUT holdings, because they are regarded as being situated in the UK for tax purposes on the investors' death. Competing centres do not charge tax in parallel circumstances. Removing the potential inheritance tax charge will help UK managers compete on an equal footing with overseas fund providers."

Press Release 16 October 2002 (OEICs and AUTs) para 6. The text continues (inaccurately):

"This very rarely generates any significant yield, because UK assets still have to

The present coalition government seems well aware of the point, at least in relation to companies:

In recent years too many businesses have left the UK amid concerns over tax competitiveness. It's time to reverse this trend.¹²

Similarly the budgets 2011 and 2012 stated the Government's aim to create:

the most competitive tax system in the G20.¹³

Those opposed to the consequences of this line of argument deride it as a "fiscal race to the bottom" but most sober commentators recognise that the UK could not act alone, as if there were no such thing as international tax competition.

Devolution raises the possibility of tax competition within the UK. So

exceed the inheritance tax threshold ... before any tax is due. But it is a deterrent in marketing terms".

I suspect that the true reason that the old IHT rule raised little IHT was rather different, namely that no-one (if properly advised and wishing to comply with UK tax rules) would invest more than the IHT threshold in AUTs or OEICs. Undetectable non-compliance must also be reckoned with. But that does not affect the point made here.

Another example:

"The location of ownership, flagging (registration) and management activities is very 'footloose', since it can easily be transferred from one country to another. This makes it vital to have regard to the fiscal regimes in other countries if we want to maintain a successful shipping industry in the UK. The modern armoury in the battle for success invariably includes a virtually tax-exempt fiscal regime."

(Independent Enquiry into a Tonnage Tax, Lord Alexander, HM Treasury 1999.)

Another example is the exemptions for major sports events. The first (as far as I know) is s.68 FA 2006 (Olympic Games 2012) but now this is becoming standard: sch. 20 FA 2010 (Champions League 2011); s.13 FA 2012 (Champions League 2013); Commonwealth Games 2014. These events would not be held in the UK in the absence of tax exemption.

12 HM Treasury, "Corporate Tax Reform: delivering a more competitive system", November 2010.

13 The phrase occurs seven times in Budget 2011: this was described as an "ambition"; presumably the word "intention" was thought too strong. The claim is similarly made nine times in Budget 2012.

http://cdn.hm-treasury.gov.uk/2011budget_complete.pdf

far, debate has focused on the possibility of Northern Ireland and Scotland having a lower corporation tax rate than England:

a lower headline rate of corporation tax could encourage greater investment by Scottish and UK firms in both physical and human capital and in research and development within Scotland.

At the same time, it could make the country more attractive as a location for multi-national investment. It could also act as an important signal to global companies and investors as to Scotland's ambition to be a location for competitive business.¹⁴

Perhaps at some point it may occur to politicians and commentators that similar arguments apply to taxation of individuals.

Unfortunately, it is always hard to predict what will be the overall economic effect of any reform, and predictions tend to reflect the views and wishes of those who make them.¹⁵ Ascertaining the effect of reforms after they are made is scarcely less difficult.

1.2.3 *EU and international law aspects*

The freedom of the UK to enter into tax competition against other countries

14 "Corporation Tax: Discussion Paper Options for Reform" (August 2011), accessible www.scotland.gov.uk/Resource/Doc/919/0120786.pdf. The consultation paper does not consider the possibility that England might match the Scottish lower rate and does not address the question of what constitutes a Scottish company for the purpose of the lower rate. Likewise in Northern Ireland: HM Treasury, "Rebalancing the Northern Ireland economy" (March 2011) accessible www.hm-treasury.gov.uk/d/rebalancing_the_northern_ireland_economy_consultation.pdf. Wales would also like to join in:

"If Northern Ireland is allowed to cut corporation tax, it would be outrageous if Welsh politicians did not have the option of doing the same"

Gerald Holtham, chair of the Holtham Commission for Wales (Cited in the Scottish consultation paper).

So we may have no shortage of tax competition with the UK.

15 HMRC estimate that a reduction in the rate of Corporation Tax in Scotland to 12.5% would cost £2.6bn, but the Scottish Parliament say the impact will be positive: "Corporation Tax: Discussion Paper Options for Reform" (August 2011) p.43, accessible www.scotland.gov.uk/Resource/Doc/919/0120786.pdf.

The reduction in the UK corporation tax rates in Budget 2012 may partly be motivated by anticipation of Scottish tax competition, though this was tactfully not mentioned.

is subject to certain constraints of EU and international law and politics. International fiscal co-operation in this area at present operates only to a limited extent, but it has made some progress in a (non-binding) EU code of conduct on business taxation¹⁶ and may in the future become a more important aspect of tax policy.

State Aid rules also impose restrictions on UK's freedom to tax and untax.¹⁷

The EC has expressed disapproval of the remittance basis:

The Commission does not advocate remittance base taxation, as it may lead to double non-taxation.¹⁸

That does not seem to have had any effect on UK domestic politics.

Since tax competition extends beyond the EU, and increasing EU powers in relation to tax is (to say the least) politically controversial, those hoping for a body to curb international tax competition tend to look to the OECD.¹⁹

1.2.4 “Customers” of HMRC

In the 2010/11 edition of this work I stated:

Where there is tax competition, the term “customer”, which HMRC have (controversially) applied to taxpayers since 2001²⁰ is slightly less

16 http://ec.europa.eu/taxation_customs/taxation/company_tax/harmful_tax_practices/index_en.htm

17 *Commission and Spain v Government of Gibraltar and United Kingdom* C-106/09 P.

18 László Kovács (EU Taxation and Customs Commissioner) IP/07/445 (30 March 2007).

19 Eg Jeffrey Sachs “Stop this race to the bottom on corporate tax” *Financial Times*, March 28 2011.

20 A press release at the time provided: (14/06/01) “M and C Saatchi, a leading advertising agency, has been appointed by the IR to rebrand the department. Branding and design consultants, Corporate Edge, will also be working with the IR and M and C Saatchi to 'create a customer driven department.'”

In 2003 Sir Nicholas Montagu (then Chairman of the Board of Inland Revenue) said that the reason for the change was to remind Revenue staff that the needs of the consumer of public services should be considered first: see “The Customer is always right” *Tax Advisor*, February 2003.

inapt. UK resident foreign domiciliaries are in principle more free than other taxpayers to take their “custom” elsewhere.

As far as I am aware, no other Revenue department in the world has adopted this terminology. It will not cease to give rise to derision as long as the current generation of tax practitioners remain in practice.²¹ It is conceivable that the terminology will last until a future generation sees nothing to laugh at in expressions such as “*penalties designed to change customer behaviour*”²² but I think that unlikely.

Rowan Williams (Archbishop of Canterbury 2003-2012) sees the issue in a wider context, and his objections to the terminology are more profound:

The language of customer and provider has wormed its way into practically all areas of our social life, even education and healthcare, and we forget that it is a metaphor when we call a student, a patient or a traveller a “customer”. The implication is that the most basic relation between one human being and another or one group and another is that of the carefully calibrated exchange of material resources; the most basic kind of assessment we can make about the actions of another, from the trader to the nurse to the politician, is the evaluation of how much they can increase my liberty to negotiate favorable deals and maximize my resources.²³

21 See eg Cameron, “Customer Service?” *Taxation* 10 Apr 2008, p.361: “It never ceases to amaze me that HMRC have adopted the word ‘customer’ to describe the taxpaying public. A customer is someone who chooses to patronise a business.” Andy Wells agrees: “I will never be a ‘customer’ of HMRC. This disregard for the English language irks just about every tax professional I come across...” *Taxation* 4 June 2009, p.549. Similarly Anthony Thomas (then president of CIOT): “HMRC now refer to taxpayers as customers, but they do not treat them as customers”; “We need Trust”, *Taxation* (2 June 2011) p.7; Truman, “Still Not a Customer” *Taxation* 14 Jun 2012 p.8.

22 www.hmrc.gov.uk/e-learning/New_Penalties_Awareness/Inaccuracy_Pen_ext/HTML/Inaccuracy_Pen_ext_106.html. Similarly House of Commons Treasury Committee, “Administration and effectiveness of HMRC” Sixteenth Report of Session 2010–12 at 143: “we question whether a strategy focused around shifting customers’ behaviour can truly be described as customer-centric.”(!)

23 Williams, “Knowing our Limits” in Williams and Elliott (ed), *Crisis and Recovery* 2010, p.20.

The change of terminology from taxpayers to “customers” of HMRC has come at a time which has seen a substantial increase in HMRC’s powers and in its desire to use them to impose civil and criminal penalties.²⁴ The reader may speculate whether that is wholly coincidental.

1.3 Fairness

The other consideration in the assessment of foreign domicile taxation is fairness.

1.3.1 *What is fairness?*

The starting point for any serious discussion of fairness in tax is economists terminology:

- (1) **“horizontal equity”**, the view that people who are relevantly equal should pay the same amount of tax.
- (2) **“vertical equity”**, the view that people who are relevantly different should pay different amounts of tax, which leads to the (more or less) accepted view that fair taxation should be progressive rather than regressive.

Economists have developed these concepts with considerable sophistication²⁵ but their limitations are painfully exposed when one tries to apply them in a real life context, such as an assessment of the fairness of the taxation of foreign domiciliaries. The concept of horizontal equity

24 “The Department expects the new [civil] penalty regime to result in higher penalties as the minimum penalty for deliberate evasion and concealment is 50%. The Department should track the level of penalties imposed to ensure that it is applying the new regime rigorously.” “We’re going to significantly increase the number of criminal investigators and the number of prosecutions we’re going to carry forward”. House of Commons Committee of Public Accounts, “HM Revenue & Customs: Managing civil tax investigations” (March 2011)

www.publications.parliament.uk/pa/cm201011/cmselect/cmpubacc/765/765.pdf

25 For a starting point, see Kaplow, “Horizontal Equity: Measures in Search of a Principle” National Tax Journal 42, no. 2 (1989) p.139-55 accessible [http://ntj.tax.org/wwwtax/ntjrec.nsf/A4CE18763C5BB9608525686C00686DAC/\\$FILE/v42n2139.pdf](http://ntj.tax.org/wwwtax/ntjrec.nsf/A4CE18763C5BB9608525686C00686DAC/$FILE/v42n2139.pdf)

Musgrave “Horizontal Equity Once More” National Tax Journal 43, no. 2 (1990) p.113-23 accessible [http://ntj.tax.org/wwwtax/ntjrec.nsf/0/a42168feab9541ff8525686c00686dca/\\$FILE/v43n2113.pdf](http://ntj.tax.org/wwwtax/ntjrec.nsf/0/a42168feab9541ff8525686c00686dca/$FILE/v43n2113.pdf)

is not so much a definition of fairness as an approach to identifying the issues in any serious discussion of fairness. In deciding whether one group (foreign domiciliaries, say) is fairly taxed, one needs to identify another group by way of comparison (UK domiciliaries, say) and ask if they are relevantly equal.

1.3.2 *Is a distinction between UK and foreign domiciliaries fair?*

In the author's view, domicile is in general a useful and practical measure of UK linkage, and to regard UK and foreign domiciled residents as completely equivalent is facile. Or put the other way, foreign domicile does constitute a significantly weaker UK link than UK domicile. Accordingly conferring a lighter UK tax regime on foreign domiciliaries, such as a remittance basis, is indeed fair. This is especially so bearing in mind that mere residence does not require a very close connection to the UK – merely passing the 183 or 91 day tests or (under HMRC 6) having vaguer and more remote connections.

Further, a foreign domiciliary may not have had a fair opportunity to arrange their affairs with UK tax in mind; for instance creating settlements from which they were excluded.

Another consideration is the impracticality (both for taxpayers and HMRC) of untangling ownership of assets, especially in family ownership arrangements which are common in third world countries.

This view is not universally held. Some maintain that any distinction (for IT or CGT) between UK residents based on domicile is unfair. The two are relevantly equal. The same view has been expressed in Ireland, which has similar rules:

Equity requires that taxpayers who are in a comparable situation should be afforded the same treatment for tax purposes. Making a distinction between individuals based on their domicile results in a situation where taxpayers who are otherwise in a comparable situation are treated for tax purposes in different ways. This is inequitable. Thus, for example, an individual who, although domiciled outside of Ireland, is a permanent resident should be treated the same as any other resident taxpayer. The special treatment afforded to individuals who are resident, but not domiciled, in Ireland whereby they are only taxable in Ireland on foreign source income and capital gains to the extent that the income and gains

are remitted to Ireland is inequitable and should be discontinued.²⁶

It is difficult to see how the dispute between the rival views can be judged, or what either side could do or say to convince the other. The concept of fairness is insufficiently precise to resolve the dispute. One might say that it comes down to a matter of impression, which is to say the same thing.

Many of those who advocate this view most strongly are not tax practitioners, and I think would be surprised to find how little is required to be UK resident: their views may be based on a paradigm of a foreign domiciliary who is a very long-term UK resident.

It also has to be said that in political debate, much depth of analysis is not to be expected; assessment of fairness is visceral, and sensitive ears might sometimes detect elements of class or wealth hostility and xenophobia.

1.3.3 *Is a remittance basis fair?*

Even if it is accepted that it is fair to tax foreign domiciliaries less than UK domiciliaries, the question of what constitutes a fair reduction is a separate issue. The 2008 reforms accepted the principle of a distinction (which is why they did not go far enough for some commentators) but significantly reduced the extent of the tax reduction by making the remittance basis less attractive.

The remittance basis of taxation is in effect a form of qualified non-taxation. In assessing its fairness it is relevant to compare different groups of foreign domiciliaries:

- (1) *Short-term residents* who are:
 - (a) wealthy individuals, who can elect for the remittance basis and are able to retain (or spend) significant foreign income/gains abroad, and
 - (b) less wealthy individuals for whom the remittance basis offers no benefits since they cannot afford to retain (or spend) foreign income/gains abroad.
- (2) *Long-term residents*
 - (a) ultra-wealthy individuals, who can elect for the remittance basis and are able to retain significant foreign income/gains abroad, and

26 [Ireland] Commission on Taxation Report (2009) para 6.2.2 accessible <http://www.commissionontaxation.ie/downloads/Commission%20on%20Taxation%20Report%202009.pdf>

- (b) less wealthy individuals for whom the remittance basis does not justify the remittance basis charge.

The effective rate of tax under the remittance basis approximately declines with income and it can be described as regressive taxation. If one accepts that taxation ought in principle to be progressive, which has been a broad feature of UK taxation, then there is the basis for an argument that the remittance basis is unfair.

What effect have the 2008 reforms had in this area? So far as they have decreased the attractiveness of the remittance basis by withdrawal of personal reliefs as a cost of the remittance basis they have decreased the unfairness.

So far as they have introduced the remittance basis claim charge, the reforms have targeted the benefit of the remittance basis at a small number of ultra-wealthy individuals. That may make some sense under the tax competition argument, but from a fairness point of view it is difficult to justify.

1.4 Suitability of domicile as a fiscal test

The domicile concept is not ideally framed to identify the “footloose” individuals, whose UK links are less, and for whom a lighter tax regime is appropriate on fairness or tax competition arguments. The adhesive quality of a domicile of origin, and the restrictive rules for the acquisition of a domicile of choice, allow some fortunate individuals to enjoy foreign domicile tax treatment, despite very close UK links and only tenuous, historical and fortuitous links to their domicile of origin. To the extent that they do so the current tax system fails both on economic and fairness criteria.

In considering this objection to domicile, however, one should bear in mind that no perfect criteria exists: the question is not whether domicile always produces the right answer, but whether one can do significantly better with other concepts.

Other concepts are sometimes used:

- (1) Long term residence, of which UK tax uses a variety of tests:
 - (a) IHT deemed domicile rule: 17 years residence.
 - (b) Long-term residence rules: 8 years residence.
 - (c) Temporary non-residence rules: 4/7 years residence and 5 years absence.
 - (d) Ordinary residence (vague but like a 3 year residence test)

(2) Citizenship (not much used in UK domestic tax law but used in some IHT DTAs and in the OECD model treaty).

These are all alternative ways to make the distinction between UK residents with strong and weaker UK links; whether they would serve better than a domicile test is very doubtful.

1.5 Approaches to reform of foreign domiciliary taxation

It is helpful to distinguish different ways of altering the tax system for foreign domiciliaries:

- (1) Alter the definition of domicile for general purposes and so restrict the class who qualify for foreign domicile tax treatment.
- (2) Alter the definition of foreign domicile for some or all tax purposes.
- (3) Alter tax laws applying to all foreign domiciliaries.
- (4) Identify subclasses of foreign domiciliaries with close UK links so as to tax them more heavily.

One can of course achieve the same end result by more than one technique. There is a lot to be said for approach (4) both on economic and fairness grounds.

1.6 History of reform of foreign domicile taxation²⁷

1.6.1 1974-2002

The 1974 Finance Bill included a provision (clause 18) that an individual ordinarily resident in the UK for five out of the preceding six years of assessment should be deemed UK domiciled for IT and CGT purposes. This was withdrawn from the Bill.²⁸

In 1987 the Law Commission published recommendations for minor reforms of the general law of domicile²⁹ but despite initial acceptance by the Government, there was no change in the law. In 1996 the proposals

²⁷ See too 9.4 (History of the remittance basis).

²⁸ For an account of the lobbying behind this, see Barnett, *Inside The Treasury* (1982) p.28–9.

²⁹ Law Com. No. 168 *The Law of Domicile*, accessible www.scotlawcom.gov.uk/download_file/view/228/

were formally abandoned.³⁰

The 1988 Consultative Document (Residence in the UK) made radical proposals. The remittance basis would be abolished. Those resident here for less than seven out of 14 years (and, perhaps, who are also not UK domiciled) would qualify for a new “intermediate basis” of taxation. This would require disclosure of worldwide income in order to tax it at an effective rate of 2% or less. This proposal was abandoned.

In the first edition of this work (2001) I said:

It seems more likely than not that, apart from tinkering changes, the present regime will continue for the foreseeable future. But “the major distinguishing feature of the British tax system is its instability”.³¹ There is also the possibility of EU pressure for reform. If what has been a backwater acquires political prominence, perhaps due to no more than a campaign by a single newspaper, there will certainly be major changes.

1.6.2 2003 background paper on residence and domicile

In 2002 a newspaper campaign emerged³² which pressed the Blair Government into action, or at least into the appearance of action. The Budget of April 2003 delivered a “background paper” called “Reviewing the Residence and Domicile Rules as they affect Taxation”.³³ This was a facile document³⁴ but it may be unfair to criticise its (unnamed) authors.

30 According to Hansard HC, 16 Jan 1996 Col 487:

“The Government have decided not to take forward these reforms on the basis that, although they are desirable in themselves, they do not contain sufficient practical benefit to outweigh the risks of proceeding with them and to justify disturbing the present long established body of case law on this subject.”

This was the right reason for the right decision. However, the true reason for the decision may well have been pressure of the foreign domicile lobby: see “Rules for Determining Domicile”, Law Reform Commission of Hong Kong (2005) para 4.28 accessible www.hkreform.gov.hk.

31 This was noted in Steinmo, *Taxation and Democracy*, (1993) p.44 but the instability has markedly increased since then.

32 See for instance, *The Sunday Times*, 1 March 2002; *The Guardian*, 11 and 12 April 2002.

33 See www.kessler.co.uk

34 It contained an outline of the law (a rehash of IR20) and one paragraph summaries of the law of 29 other countries (of insufficient detail to be of any use and generally said to be misleading). The paper did not consider any proposals or their possible impact.

Their instructions may have been to be uncontroversial; by saying nothing, there was nothing in the document to which anyone of any political view could object.

Nothing then happened from 2003 to 2008 except an often repeated statement that:

The review of the residence and domicile rules ... is ongoing.³⁵

It is clear that the review of foreign domicile tax did not follow the normal course of consultation, decision and implementation. In the absence of a frank explanation of what went on, it is tempting to speculate. The likely explanation is that the Blair Government wanted to do nothing, but prevaricated to avoid an announcement which would have led to a furore from those in favour of reform.³⁶ Blair resigned in June 2007. A change of power led to an unannounced U-turn from that unannounced policy.

1.7 2008 reforms: assessment

The 2003 background paper on domicile recited the principles that taxation of foreign domiciliaries:

- [1] should be fair;
- [2] should support the competitiveness of the UK economy; and
- [3] should be clear and easy to operate.³⁷

It (consciously?) ignored every earlier discussion of reform: the Royal Commissions of 1920 and 1955, the 1936 Codification Committee, the 1974 Finance Bill, the 1987 Law Commission Report and the 1988 Consultation Paper.

For an account of the decline in quality of Government white and green papers, see Forster, *British Government in Crisis* (2005), p.134.

35 The history is set out in more detail in the 9th edition of this work para 1.3.2. The last outing of (by then extremely tired) statement was Hansard 12 July 2007 Col 1605 by which time almost no-one believed it, but by then it was possibly true.

36 See Osborne, *The Rise of Political Lying* (2005).

37 The paper might have cited Adam Smith *The Wealth of Nations* (1776) Book 5 chapter 2, accessible www.bibliomania.com/2/1/65/112/frameset.html

The paper did not point out (though Adam Smith did) that these objectives are to a substantial extent irreconcilable.

It seems reasonable to assess the 2008 reforms by these criteria.

The 2008 reforms increased the tax burden on foreign domiciliaries in three main ways:

- (1) The remittance basis claim charge for long-term residents
- (2) The withdrawal of personal allowances for all remittance basis claimants
- (3) The extension of anti-avoidance provisions to remittance basis taxpayers (in particular, the ITA remittance basis, the s.720, s.13 and s.87 remittance bases, and the AIP remittance basis).

1.7.1 *Clear and easy to operate*

It will be evident to anyone who skims this book that by this criteria the 2008 rules are an abject failure. The rules are unclear, often difficult and sometimes impossible to operate. In these respects they are unquestionably worse than the pre-2008 rules. The terms of the 2012 review suggest that this is tacitly accepted.

Government policy normally requires an impact assessment.³⁸ None was carried out in relation to any of the 2008 reforms. Many features of the reforms could not have survived if it had been.

1.7.2 *Competitiveness of the UK economy*

On one side of the account is the gain of more tax paid by foreign domiciliaries. On the other is:

- (1) Tax and investment lost from individuals who leave the UK, and those who (because of the reforms) decide not to come.
- (2) The loss to the economy that the new rules in many cases prevent investment in the UK and prevent use of UK services (to a much greater extent than is necessary from the concept of a remittance basis).

In the 2008/09 edition of this work my initial assessment was as follows:

Overall it seems to me implausible that the reforms will make a positive contribution to the UK economy. One can test the matter this way. If a wealthy individual, a beneficiary of offshore trusts created by himself or his family, asked for advice on the desirability of choosing the UK as a

³⁸ www.berr.gov.uk/files/file44544.pdf

residence, what would one say? Even now the individual could still do worse; and if enough advance planning and restructuring is possible, the problems may be ameliorated, at an administrative cost. Thus tax may still not prevent an individual from coming to the UK if he wants to sufficiently. Also, the old cliché about the tax tail and the commercial dog still holds good. But all this is a far cry from the pre-2008 position, where one would simply respond that the UK was clearly a desirable place to reside.

This view is now supported by a number of surveys.

A KPMG survey found that as a result of the 2008 changes, 24% of foreign domiciliaries were planning to leave the UK within two years, with an additional 24% hoping that the rules will be changed and looking to review their position in the medium term. More than nine out of ten said that the changes had damaged the UK's competitiveness.³⁹

A Knight Frank survey found that up to 7% of foreign domiciliaries left UK in the months following the tax announcements and a further 31% were planning or actively considering departure.⁴⁰

Stonehage research suggests that the changes will produce an initial tax gain diminishing to a tax loss beginning from a date between 2014 and 2018.⁴¹

My own anecdotal experience - consistent with the above - is of a number of individuals who decide - I think wisely - not to come to the UK because of the uncertainties relating to taxation.

It is of course difficult if not impossible to disentangle the 2008 reforms from other disincentives to coming to the UK, such as the increase in income tax rates to 50%, the enormous uncertainties caused by the transfer of asset abroad changes in 2005, and corporation tax changes.

Corporate departures from the UK have been widely publicised; they include WPP, Shire, Regus, Henderson, Charter, Beazley, Brit Insurance, UBM, Shore Capital, Informa and Aureos Capital. Individual departures from the UK are not readily identifiable, and losses from those who decide not to come are almost totally unmeasurable.

HMRC offer the following statistics:

³⁹ March 2009, accessible

www.kpmg.co.uk/news/docs/NomDoms_FinanceAct2008_Access3.pdf

⁴⁰ www.knightfrank.com Press Release, 20 June 2009.

⁴¹ "Non Doms and the UK Economy", March 2010, accessible www.stonehage.com.

	Non-doms	Tax paid	RBC payers	Total RBC paid
	<i>Total no</i>	<i>total £billion</i>	<i>average per person</i>	
2004-05	110,000	3.3	£30,000	
2005-06	111,000	4	£36,036	
2006-07	117,000	5	£42,735	
2007-08	140,000	6.9	£49,286	
2008-09	123,000	5.9	£47,967	£162m

The figures are interesting but it is impossible to draw any economic conclusions from them.

1.7.3 *Fairness of 2008 reforms*

The FA 2008 contained a wide ranging package of reforms and any short assessment of its fairness must necessarily be limited to its main features.

The remittance basis claim charge distinguishes between short term and long-term residents, and taxes the latter more heavily, the connecting factor here being an 8/10 year residence test. One cannot categorise that distinction as unfair.

On the other hand, among long-term foreign domiciliaries, the charge distinguishes between the extremely wealthy (to whom the remittance basis is still attractive) and others (to whom it is not). This offends against the principle of vertical equity, which suggests that people with higher incomes should pay more tax. That is not fair, though it is an unfairness arising directly out of a decision to maximise the economic advantage by targeting the remittance basis to the wealthiest.

The withdrawal of personal allowances as a quid pro quo of a remittance basis is not unfair (though it comes at a cost in terms of complexity).

Of perhaps greater importance is the other aspects of a package of reforms which affect all foreign domiciliaries, not just long-term residents.

The new and wider ITA remittance basis is not unfair, except for the wilder reaches of the relevant person definition and the supposed rule (probably ignored in practice) that the taxable amount remitted may exceed the value of the asset remitted.

The extended 2008 anti-avoidance rules can work unfairly but complete fairness is impossible to achieve in this area.

The transitional rules are another matter. The rules are retroactive in that their impact on individuals depends on income and gains arising before 2008, and unfair in that they impose tax on those income/gains in a manner that no-one before 2008 would have anticipated. These rules are

unquestionably and grievously unfair.

All in all, the 2008 reform may be given some limited marks for fairness. This is not to say that the pre-2008 rules should be regarded as unfair: the concept of fairness (especially if viewed through the lense of practicality) is so vague that a very wide range of tax policies may all be categorised as “fair”.

Some of the hardest hit are long-term UK resident US citizens, who pay

- (1) US tax on a citizenship basis and
- (2) substantially greater UK tax liabilities under the 2008 regime.

with only treaty relief to mitigate double taxation, as far as it goes. That is unfair, but the reason is not that UK unfairly taxes its long-term residents, but that the US (I think, uniquely in the world) imposes US tax on non-resident citizens, so all its non-residents face the burden of double taxation: US tax and tax in their country of residence (subject to limited tax credit relief).

1.7.4 *Process of implementation*

The manner in which the FA 2008 was introduced deserves to be recorded.

In January 2008, 26 pages of draft clauses were published whose unwritten message to wealthy non-residents was broadly: *do not come to the UK if possible; if you must, do not under any circumstances invest any money here*. The clauses were officially described as work in progress, but this was unfit for publication.

HMRC presumably agreed. On 27 March the Finance Bill was published, containing 54 pages of legislation. The FB clauses bore almost no resemblance to the January draft. One consequence is that the professional time and clients’ money spent considering the old clauses was almost entirely wasted. That certainly cost many £millions. Another consequence was that the profession had nine frantic days to scramble around before the end of the tax year. Because of the absence of sensible transitional reliefs, large amounts of tax depended on decisions and actions taken in those days. Sensible consideration of difficult and important matters was rendered impossible.

On the date of publication the Treasury announced that the Finance Bill was incomplete and amendments covering almost every aspect of the

rules⁴² were made in the course of progress of the Finance Bill.⁴³ Thirty pages of amendments duly emerged in mid June – far too late in the Finance Bill timetable to give them any serious consideration. Forty eight more Report Stage amendments were published on 26 June. The report stage and third reading (after which no further amendments could be made) were held on 1 and 2 July 2008. John Avery Jones notes that “Report Stage amendments are usually a disaster.”⁴⁴

As a result, the final legislation poses problems which will occupy practitioners and HMRC for many years, but it is also noteworthy that during the first three months of 2008/09 taxpayers could not know what laws governed transactions which they might wish to carry out, or what record keeping would be required of them.

The former editor of *Taxation* is blunt:

The standard of strategic policy making at the Treasury has been unacceptably poor in recent years, but this must surely have been one of its lowest ebbs ever.⁴⁵

The CIOT say:

when corners are cut, especially under time pressures, there can be serious deficiencies.

and their example to illustrate the point is the non-domicile rules in the FA 2008.⁴⁶

42 Explanatory notes to Schedule 7, para 36 (mixed funds); para 47 (s.87 charge); para 52 (non-resident trusts); para 74 (Schedule 4C); para 91 (TAA provisions); para 106 (works of art); para 107 (employment related securities).

43 In the 2008/09 edition I said:

“This is a new development in tax legislation. While from time to time inadequately drafted clauses have always been found in Finance Bills, this is as far as I am aware the first time that the Government has had to announce that fact at the time of publication of the Finance Bill.”

It seems however to be a trend as there are similar examples in the FA 2009.

44 See “Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis”, John Avery Jones in *Studies in the History of Tax Law* (Vol 1 2004) accessible www.kessler.co.uk.

45 *Taxation* 12 June 2008 Vol 161 No. 4160 p.627 (Malcolm Gunn).

46 The Making of Tax Law, para 3.2, CIOT, June 2010
www.tax.org.uk/resources/CIOT/Documents/2010/09/themakingoftaxlaw.pdf

The House of Lords Economic Affairs Committee comment in measured language:

Our private sector witnesses would not have used words like “a real shambles” if they did not feel strongly about this. ...

176. We recommend that, if they have not already done so, HMT and HMRC should carry out a full review of the reasons why there were so many difficulties in the development of this policy initiative. They should ensure that the lessons are learned so that these problems do not emerge in other initiatives.

177. We also recommend that if another policy initiative gets to the point where the legislation cannot be finalised for inclusion in the Finance Bill, that initiative should not be included in the Bill, or, if feasible, the part which is not finalised should not be included. We cannot support the approach of the Finance Bill’s still being subject to much amendment at the time it is published, particularly when the proposals come into effect from the beginning of the tax year, as in this case.⁴⁷

No review has been carried out.

Does it now matter? Readers may think it pointless to cry “foul” in a game which has no referee, and whose result has now been declared. But I think the story deserves to be recorded as what Lord Howe described as “an object lesson in how not to legislate”.⁴⁸

1.8 The promise of stability

There is a long tradition of instability in the UK tax system. In 1981:

One of the most noticeable characteristics of the British tax system is that it is under continual change.⁴⁹

In 1993:

47 Select Committee on Economic Affairs, 2nd Report of Session 2007–08, The Finance Bill 2008

www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf.

48 Making Taxes Simpler - The final report of a Working Party chaired by Lord Howe (July 2008) www.tax-news.com/asp/res/makingtaxessimpler.pdf.

49 James & Nobes, *Economics of Taxation* (1st ed, 1981) p.135.

The major distinguishing characteristic of the British tax system is its instability. The British tax system changes faster, more frequently, and more radically than any other tax system I have observed.⁵⁰

The development in recent years is a series of promises of stability without any change of practice. In 2008 Alistair Darling (then Chancellor of the Exchequer) said:

There will be no further changes to this regime [for foreign domiciliaries] for the rest of this Parliament or the next.⁵¹

No-one seriously believed that.⁵² In the 2008/09 edition of this work I said:

The statement is constitutionally wrong, as Parliament cannot bind its successor. But leaving aside (if one can) constitutional fundamentals, it would be rash to rely on it. On the contrary, I predict that further tinkering (at least) is likely as the effect of the present rules gradually becomes evident.

The FA 2009 did just that, with more tinkering in the F(no.1) A 2010 and a rewrite of the offshore fund rules.

The 2011 budget had another promise of stability:

There will be no other substantive changes to these rules for the

50 Steinmo, *Taxation and Democracy* (1993) p.44.

51 Budget speech www.hm-treasury.gov.uk/budget/budget_08/bud_bud08_speech.cfm.

52 The House of Lords Economic Affairs Committee said:

"227. In his Budget Statement, the Chancellor promised that the rules in this area would not be substantially revised for the rest of this or the next Parliament. We do not take this to mean that there will not be legislation in coming Finance Bills to address defects in the current legislation. We think it inevitable that, given the evident pressure under which this legislation was produced, there will be such defects." 2nd Report of Session 2007–08, The Finance Bill 2008
www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf.

In the Consultation Document "Modernising Powers, Deterrents and Safeguards: Tackling Offshore Tax Evasion" 9 December 2009 para 4.43 HMRC tactfully misquoted the then Chancellor, saying "At Budget 2008, the Chancellor of the Exchequer gave a commitment that there would be no *significant* changes to the *policy underlying* the remittance basis for the lifetime of that Parliament and the next."

remainder of this Parliament.⁵³

In the 2011/12 edition of this work I commented:

The coalition government (correctly) does not promise to bind the next Parliament. The promised period of stability is therefore for three years, from 2012 (assuming the proposed 2012 changes are enacted on schedule) until 2015 (assuming Parliament lasts the full 5 year period).

In December 2011 the Government announced that they were postponing some reforms until 2013, so even this had to be watered down:

... the full package of measures announced at Budget 2011 will be implemented in a two-step programme that will be completed in Finance Bill 2013. The Government remains committed to making no further substantive changes to these rules for the remainder of this Parliament.⁵⁴

The Government continue to promise and indeed to boast about stability:

2.2 ... The commitment to making no further substantive changes for the rest of this Parliament was seen as a clear indication that the Government recognises the importance of providing certainty....

2.12 The Chancellor made a commitment at Budget 2011 that there would be no further substantive changes to non-domicile taxation for the rest of this Parliament. This commitment applies to the level of the RBC. The Government believes this will provide certainty and stability for non-domiciles.⁵⁵

But Budget 2012 broke this commitment by announcing changes from 2013 which, while not restricted to foreign domiciliaries, will affect them primarily.⁵⁶

These promises should be regarded as lip-service to the desideratum of stability. A practice which lies very deep in the culture of government is

53 HMRC "Overview of Tax Legislation and Rates" (23 March 2011) para 3.7.

54 Ministerial Statement 6 December 2011 [2011] STI 3355.

55 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011)

56 See 43.2 (CGT charge on residential property held by non-residents).

not changed by mere announcement. It is easier to talk about stability than to achieve it.

1.9 The tax consultation framework

These have been bad times for tax policy. The CIOT expresses itself strongly: “the way tax law is developed and effected in the UK is deeply flawed.”⁵⁷

Two recent publications shed a good deal of light on what has gone wrong with tax legislation in recent years. Firstly, Demos:

The centralisation of [tax policy-making power] is a particular problem because of the lack of institutional accountability of the Treasury on taxation policy and the lack of accountability of chancellors themselves in matters of taxation. ... The concept of checks and balances in tax policy is nonexistent.

... the current relationship between the Treasury and HMRC was ‘very dysfunctional’, had ‘almost gone as wrong as it could have gone’...

At the moment, pursuing a career only in tax policy is not valued within the Treasury hierarchy. Officials pass through the tax teams rather than making tax policy a career choice. ... High turnover results in a lack of experience in the tax section and little institutional memory...

... There are traditional areas that are ring-fenced as not for consultation, including tax rates and anti-avoidance measures. ...

... ‘at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.’

At present, policies are frequently changed without understanding the impact the policy has initially had in practice.⁵⁸

Along with a decision not to consult is a government policy which is not so much deaf to the views of the tax profession as vociferous in their rejection. The Director of the HMRC Tax Avoidance Group 2004-2009 records:

... I was never happier than when a new tax avoidance initiative was

57 Letter from CIOT to George Osborne, 19 May 2010 accessible www.tax.org.uk/Resources/CIOT/Migrated%20Resources/t/to-santos_40.pdf

58 Ussher and Walford, *National Treasure* (Demos, 2011) accessible www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925.

greeted with howls of protest from the tax avoidance quarter.⁵⁹

This confirms what anyone could have inferred from a variety of provisions, that preventing avoidance – a term which HMRC do not construe narrowly – has been a priority that trumps all other policy considerations such as certainty, workability and the rule of law; and listening to the tax avoidance quarter - a term which includes STEP, the CIOT, and almost any practitioner who said what HMRC did not want to hear - has been ruled out.

The consequences of a decade or so of that policy can be seen in seeking to state the law, as this book seeks to do, or in seeking to understand the law, as you the reader will do now.

1.9.1 *The tax consultation framework*

The tax consultation framework promises a fresh start:

2. There are five stages to the development and implementation of tax policy:

Stage 1 Setting out objectives and identifying options.

Stage 2 Determining the best option and developing a framework for implementation including detailed policy design.

Stage 3 Drafting legislation to effect the proposed change.

Stage 4 Implementing and monitoring the change.

Stage 5 Reviewing and evaluating the change.

3. Where possible, the Government will:

- engage interested parties on changes to tax policy and legislation at each key stage of developing and implementing the policy;
- make clear at what stage (or stages) the engagement is taking place so that its scope is clear;
- carry out at least one formal, written, public consultation in areas of significant reform;
- set out, as the policy develops, its strategy for stakeholder engagement including planned formal consultation periods, informal discussions, working groups and workshops;
- consult, where it can, on the policy design, draft legislation and implementation of anti-avoidance and other revenue protection measures, provided this does not present additional risk to the

⁵⁹ Tailby, "Some Reflections on Tax Avoidance" [2011] PCB 41.

Exchequer;

- minimise the occasions on which it consults only on a confidential basis. Where confidential consultation has been necessary the Government will be as transparent as possible about its outcome and consult openly if pursuing the policy change further; and
 - provide feedback which sets out the Government's response to the views received and makes clear what changes, if any, have been made to the planned approach as a result of those views.
4. At each stage of consultation, the Government will set out clearly:
- the policy objectives and any relevant broader policy context;
 - the scope of the consultation, in particular what is already decided and where there is still scope to influence the outcome;
 - its current assessment of the impacts of the proposed change and seek to engage with interested parties on this analysis. A final assessment of impacts will be published once the final policy design has been confirmed; and
 - which department and official is leading on the consultation (or specific elements for joint HMT and HMRC consultations).
5. Informal consultation will be as transparent as possible, consistent with the need to protect revenue. The best principles of formal consultation will be applied to informal consultation to ensure clarity of scope, impact, accessibility, and meaningful feedback. Comments will only be attributed to a representative body when it is clear that the individual consulted is commenting on behalf of that representative body. It is recognised that individuals need time to consult others before they can provide comments on behalf of a representative body. Informal consultation can run alongside formal consultation but will often be most appropriate at the earliest and latest stages of tax policy development to identify options and then to fine-tune the detailed legislation and implementation of change.

Exceptions

8. The Government will generally not consult on straightforward rates, allowances and threshold changes, or other minor measures; recognising, however, that even in these cases some level of consultation can often be informative. It may also adopt a different approach for revenue protection or anti-avoidance measures where following this Framework could present a risk to the Exchequer. In other circumstances where the Government decides not to consult during tax policy development it will explain the reasons for that decision.

9. There will be times when it will be necessary to deviate from this Framework. In these circumstances the Government will be as open as possible about the reasons for such deviations.

It is easier to announce these good intentions than to abide by them. The editor of taxation discussing the budget 2012 cap on charitable reliefs concluded:

It seems that the policy has been abandoned, and we are back to the 'rabbit out of a hat' approach.

The same applies to the 2012 and 2013 reforms for taxation of companies holding residential property.

There is one route and one route only to a good tax system: sound tax policy devised by those with a sound understanding of the current tax system; a leisurely timetable of consultation and legislative drafting; and the 10 tax tenets of the ICEAW.

That is not an easy prescription, and it is tempting to look for an easier solution. Recent unsuccessful attempts include the tax law rewrite and (perhaps) the HMRC charter.

1.10 The future

Many important changes are promised for 2013/14 including:

- (1) A statutory residence test.
- (2) New SDLT and CGT charges on non-resident entities holding residential property.
- (3) Extension of IHT relief on a gift to a non-domiciled spouse.
- (4) Amendments to the transfer of asset rules and s.13 TCGA.
- (5) Changes to the definition of the source of interest.

The Swiss Tax Agreement, which takes effect in 2013, offers a novel approach to the problem of evasion via Swiss bank accounts; I consider that topic in a separate ebook.⁶⁰

In the longer term we will see changes to exit charges on companies; perhaps those reviewing this topic will also consider the exit charges on individuals and trusts.

The big idea on the agenda for the forthcoming year is a GAAR. It will be interesting to see how much of the checks and balances recommended in the report of the General Anti Avoidance Rule Study Group materialise in the promised legislation.

60 Kessler, *The Swiss Tax Agreement* (2012); see www.khplc.co.uk.

CHAPTER TWO

DOMICILE

2.1 Why does domicile matter?

Domicile is fundamental for many tax purposes, of which the most important are:

- (1) The remittance basis for IT and CGT.
- (2) IHT on foreign situate assets.

Domicile is also important for many non-tax purposes including aspects of family law, civil jurisdiction and succession law.

The RDR Manual has lengthy guidance. For discussion of the general law of domicile, see Dicey, Morris & Collins, *Conflict of Laws*, (14th edition, 2006) (“Dicey”); this is the book that HMRC and the courts most often cite. For an important reminder of the need for legal realism in this area, see Fawcett, “Result Selection in Domicile Cases” (1985) OJLS vol 5 p.378.¹

2.1.1 Cross references

The following matters are considered elsewhere:

Deemed domicile for IHT: see 57.1

Residence and domicile of MPs and members of the House of Lords: see App 2.1.

2.2 The concept of domicile

Domicile is a concept of private international law. The rules are laid down by common law, but modified by statute. These rules apply for tax

¹ Concluding that the policy of not allowing individuals with a UK domicile of origin to escape UK taxes is influential in determining the result in domicile cases. Accessible www.ojls.oxfordjournals.org/content/5/3/378.full.pdf.

purposes except so far as modified by tax law.

The law in Scotland is (almost) the same as England, and indeed the leading case of *Udny v Udny* is a Scottish case. The law in Northern Ireland is the same as England.

“Domicile” has a technical meaning in UK law and should not be confused with:

- (1) “Domicile” in civil law jurisdictions.²
- (2) “Domicile” in EU regulations and international treaties (where a definition generally overrides the UK law sense of domicile).
- (3) “Domicile” in ordinary English usage.³

Everyone has one and only one domicile. The expression “**non-domiciled**” is in a literal sense inapt, because everyone is domiciled somewhere. It is, however, an acceptable and convenient abbreviation (in context) for non-UK domiciled (just as “non-resident” means, in context, non-UK resident).

A person must be domiciled in a single legal jurisdiction. The expression “**UK domiciled**” is in a literal sense inapt because a person must be domiciled in England, Scotland or Northern Ireland. It is, however, universally used to describe someone who is domiciled in England, Scotland or Northern Ireland.⁴ For tax purposes it makes no difference where in the UK one is domiciled, though for non-tax purposes that may be important.

2.3 Domicile of origin

Dicey states:

-
- 2 Article 102 of the French Civil Code provides: “Le domicile de tout Français est au lieu où il a son principal établissement” (The *domicile* of a French person is where he has his main establishment).
 - 3 e.g. in the lines from Walt Disney’s *Lady and the Tramp*:
“Now we lookin’ over our new domicile
If we like we stay for maybe quite a while”(!)
 - 4 Section 721(3) ITEPA (somewhat pedantically) states this expressly:
“Any reference in this Act to being domiciled in the UK is to be read as a reference to being domiciled in any part of the UK.”
The tax law rewrite team must have realised this was unnecessary as (quite correctly) they did not put an equivalent clause in any subsequent rewrite legislation. Section 721(3) ought to be repealed as otiose.

- (1) Every person receives at birth a domicile of origin:
 - (a) A legitimate child born during the lifetime of his father has his domicile of origin in the country in which his father was domiciled at the time of his birth;
 - (b) A legitimate child not born during the lifetime of his father, or an illegitimate child, has his domicile of origin in the country in which his mother was domiciled at the time of his birth; ...
- (2) A domicile of origin may be changed as a result of adoption, but not otherwise.⁵

This is one of the few areas of English law where legitimacy still matters. The position in Scotland is slightly different: see 2.13 (Child's domicile of dependency).

2.4 Domicile of choice

Dicey states:

Every independent person can acquire a domicile of choice by the combination of residence and intention of permanent or indefinite residence, but not otherwise.⁶

I shall consider “residence” and “intention” separately.

2.4.1 “Residence”

“Residence” here means “residence as an inhabitant” which is something more than “presence as a traveller”.⁷ This is not necessarily the same as residence for tax purposes but in practice it ought to come to the same thing, since tax residence is supposed to represent the ordinary meaning of the word residence. If at all possible it would be best to avoid having

⁵ Dicey, Morris & Collins, *Conflict of Laws* (14th ed., 2006), para 6R-025.

⁶ Dicey, Morris & Collins, *Conflict of Laws* (14th ed., 2006), para 6R-033.

⁷ In the case of acquisition of a domicile of choice, the precise definition of residence is never a real issue, because a person acquiring a domicile of choice in a country must *ex hypothesi* have the intention to reside there permanently; so if they are present in the country at all, they must be “resident as an inhabitant” and not “present as a traveller”. But the point is relevant for abandonment of domicile of choice.

two concepts of residence, one for tax and one for domicile.

Assuming a person resides as an inhabitant, there is no minimum period of residence required: residence commences immediately on arrival if the intention is to stay.⁸

2.4.2 “Permanent or indefinite” residence

“Permanent” residence is straightforward but the concept of “indefinite” residence needs comment.

“Indefinite” (in short) requires that the individual intends to reside in a country “until the end of his days”. It seems to me that “indefinite” is an unfortunate word to use because in its normal sense it is used to describe any period whose duration is not known exactly, even a short period. For instance the duration of a strike is indefinite;⁹ so is the duration of a contract of employment. That is not the meaning here. However there is no single English word which neatly encapsulates the intended meaning. “Unlimited” is sometimes used and is more apt, but this too needs clarification. *IRC v Bullock* 51 TC 522 commented on the classic statement that a domicile of choice is acquired when:

a man fixes voluntarily his sole or chief residence in a particular place with an intention of continuing to reside there for an *unlimited* time.¹⁰

Buckley LJ said at p.540:

I accept that statement ... with this qualification only that the expression “unlimited time” requires some further definition. A man might remove to another country because he had obtained employment there without knowing how long that employment would continue but

8 *Fasbender v AG* [1922] 2 Ch 850 at p.858; *Bell v Kennedy* (1868) LR 1 Sc & Div 307 at p.320.

9 This is self-evident, but if authority is needed, see *Howard E. Perry v. British Railways Board* [1980] 1 WLR 1375 at p.1380 which described the period of a strike as “clearly ... indefinite. It may be short, or it may be long; but it is plainly uncertain.” The Law Commission made the same point in *Private International Law* Law Com 186 para 5.12: “‘Indefinitely’ by itself is insufficient: it could, on one view, cover an intention to live in a country for a short time for some temporary purpose, for example a short holiday of indefinite duration.”

10 *Udny v Udny* (1869) LR 1 Sc & Div App 441 at p.458. (Emphasis added.)

without intending to reside there after he ceased to be employed. His prospective residence in a foreign country would be indefinite but would not be unlimited in the relevant sense. On the other hand, ... I do not think that it is necessary to show that the intention to make a home in the new country is irrevocable or that the person whose intention is under consideration believes that for reasons of health or otherwise he will have no opportunity to change his mind.

And crucially:

In my judgment, the true test is whether he intends to make his home in the new country until the end of his days unless and until something happens to make him change his mind.¹¹

The requirement to intend to reside somewhere “indefinitely” is very strict. In *IRC v Bullock* 51 TC 522 the taxpayer resided in England for 40 years but hoped to return home to Nova Scotia (to which his wife objected) should he survive her or persuade her to change her mind. This contingency had sufficient substance to represent a real determination to return home rather than a vague hope or aspiration. Mr Bullock did not acquire a UK domicile of choice but retained his domicile of origin.¹²

This may be contrasted with *Furse v IRC* where the taxpayer intended to live in England for the rest of his life except that he would return to America in the event that he were to become physically incapable of taking an active interest in his UK farm. This was held to be too insubstantial:

That contingency is altogether indefinite. It has no precision at all. A man's idea of an active physical life is likely to contract with the years. At the age of 80, after 40 years in England, the testator was still living at West Hoathly and, although he had been ill, he had no firm plans at all for leaving England.

The testator's expressed intention, it seems to me, depended entirely on his own assessment of whether an ill-defined event had occurred. I think

11 This test was reaffirmed in *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [10] to [15].

12 There are many examples of long periods of UK residence without acquiring a UK domicile: *Buswell v IRC* 49 TC 334; *Cyganik v Agulian* [2006] ITCLR 762; *Ramsay v Liverpool Royal Infirmary* [1930] AC 588 (36 years); *Winans v AG* [1904] AC 287 (37 years).

it really amounted to no more than saying, 'I will leave England when I feel I want to leave England'. That is substantially the same as Buckley LJ's example of the man who says he will leave 'when I've had enough of it'.¹³

Accordingly Mr Furse acquired a domicile of choice in England. Again:

If a man intends to return to the land of his birth upon a clearly foreseen and reasonably anticipated contingency, e.g., the end of his job, the intention required by law is lacking; but, if he has in mind only a vague possibility, such as making a fortune (a modern example might be winning a football pool), or some sentiment about dying in the land of his fathers, such a state of mind is consistent with the intention required by law.¹⁴

Tax may be relevant to intention. For instance if a Swedish tax exile remains in the UK, intending to return home if and when Sweden's tax regime is relaxed, they would not acquire a domicile of choice here. Likewise if an individual intended to remain in the UK only so long as UK tax law continues to allow a remittance basis, they would not acquire a domicile of choice here.

2.4.3 *Proof of intention*

In the event of a dispute the court must determine what is or was the individual's intention. In order to do so the court will have regard to every factor which might shed light on the individual's intention – except registration and voting as an overseas elector (which will be ignored in a tax appeal unless the taxpayer wishes otherwise).¹⁵

The burden of proof lies on HMRC to show that an individual has acquired a UK domicile of choice. The courts regard the acquisition of a domicile of choice as a serious matter which is to be found only on clear

13 [1980] STC 596 at p.604.

14 [1980] STC 596 at p.604.

15 See s.200 FA 1996; the section was (unhelpfully) rewritten for IT purposes in s.835B ITA 2007. This unprincipled provision was intended to encourage UK expatriates to vote without imperiling their claim to be non-UK domiciled: it did not help the Government in the 1997 election. (In practice if voting was not mentioned in evidence, a judge might make a quiet inference that the individual did do so.)

and compelling evidence.¹⁶ However, “the importance of onus of proof is easily exaggerated. While the burden of proof always exists, few substantial cases turn upon it and in making their factual findings the judge is usually expressing their considered judgment as to what in truth occurred”.¹⁷ If that is right, the reform often proposed of amending the burden of proof in domicile cases should have no practical effect.

2.5 Retaining foreign domicile of origin while UK resident

Suppose an individual with a foreign domicile of origin comes to the UK and wishes to retain their foreign domicile. The concern is not to acquire a UK domicile of choice.

The primary advice to be given is clear: the individual may live in the UK as long as they wish from year to year but should not form the intention to settle here permanently. Unless they do so, the essential condition for the acquisition of a new domicile will not be satisfied.

However, the individual should not be content with this mental step unless their stay here is short or fixed term. They should also take such appropriate steps to broadcast the absence of any intention of residing here permanently and to manifest an intention to return elsewhere in due course. This is important because the court will decide for itself the true intention of the individual and will be influenced by the way that the individual conducts their affairs while in the UK.

The individual should if possible retain ties with their country of origin. There are many ways to do so and they need not adopt them all. Possibilities for consideration include regular and extended visits home; local business interests, bank accounts and investments; membership of local social, political and religious organisations. The individual should make a will taking effect under local law.¹⁸ The will should include a declaration that the individual intends to return home in due course or the circumstances in which that is to occur. The will might if appropriate express a desire to be buried in that country. The declaration should be

16 But just how “clear and compelling” the evidence needs to be depends on the facts of the case in point: *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [84] to [96].

17 Bingham, “The Judge as Juror”, *Current Legal Problems* (1985) p.2; reprinted in *The Business of Judging*, (2000) p.2 (good holiday reading).

18 A separate UK will may also be appropriate to deal with UK property.

drafted in accordance with the individual's specific circumstances; a standard form declaration of domicile is inadequate.¹⁹

Conversely, the individual's social and business commitments in the UK should be minimised. The purchase of a home in this country might indicate a greater degree of permanence than rented accommodation, but purchasing a property may imply nothing more than an intention of medium-term residence. The development of other long-term commitments to the community, such as changing one's name (or its spelling) to accord with UK usage, are to be avoided.

The purchase of a burial plot provides some indication of an intention to be buried in that country. If that is the country of residence it might indicate an intention to remain in that country for the rest of the individual's life. If the burial plot is in the country of origin it provides some evidence of an intention to return home in due course. However, this is not necessarily a matter which carries much weight and if done at the suggestion of a tax advisor, it carries no weight at all.

The assembling of evidence of an intention to return to the country of origin, while obviously helpful, is not strictly necessary and in some cases will be unnecessary, maybe even inappropriate. The retention of the foreign domicile of origin is not dependent on establishing a positive intention to return home; rather, it is determined negatively by the absence of an intention to stay in the UK. An intention to move from the UK, whether to the country of origin or somewhere else, would be enough to enable the domicile of origin to be retained.

2.5.1 *Involvement in politics*

The general rule is that involvement in UK politics is compatible with a non-UK domicile though it is a factor to be taken into account in ascertaining domicile. However, MPs and members of the House of Lords are deemed UK resident and domiciled²⁰ and the position of other foreign

19 For an example of a simple declaration rightly disregarded, see *Reddington v MacInnes* [2002] ScotCS 46 accessible www.bailii.org. (If those drafting the will had considered domicile more carefully, the litigation might have been avoided.) For precedents, see Kessler & Sartin, *Drafting Trusts & Will Trusts* (10th edn, 2010) para 18.23 (Best form of will for foreign domiciled testator).

20 See App 2.1 (Tax status of MPs and members of the House of Lords).

domiciled politicians is politically fraught.²¹

The rule that only a UK resident and domiciled person may make a gift (above a nominal amount) to a political party²² is a further restriction on the rights of non-residents and foreign domiciliaries to engage in UK politics.

2.6 Acquisition of foreign domicile of choice

The domicile rules are favourable to foreign domiciliaries since they may stay many years in this country without acquiring a UK domicile and becoming exposed to the concomitant tax burden. But the rules are correspondingly unfavourable to the individual who wishes to replace their UK domicile of origin by the acquisition of a foreign domicile of choice. Such a person must not only reside in that other country; they must maintain and manifest their intention to remain resident there permanently.

An individual cannot shed their UK domicile of origin without acquiring a domicile of choice in another territory; it is not enough to intend to leave the UK permanently, never to return. The domicile of origin is not lost by abandonment but by replacement. Departure from the UK must therefore be accompanied by permanent residence in the chosen territory. If any time is spent in the UK, the UK must not be the chief residence

The acquisition of a foreign domicile which is motivated purely by tax considerations is possible in theory but may be difficult in practice as the intention to live in the territory may prove to be insufficiently firm. Sir Charles Clore is an example:

... Sir Charles was ... unhappy in Monaco and often said that he would really like to return to England permanently and accept the tax consequences. [A witness] asked him why he had decided to go there when all his interests were elsewhere. Sir Charles said that he did not know and that he was thinking of changing his mind and returning to live in England... he did not feel at home in Monaco.²³

21 This has been the case at least since the 1920's where the peerage given to Lord Vestey (who had been a tax exile) gave rise to some debate: see "*Vestey: Royal Commission evidence and debate*" accessible in the TFD archive www.kessler.co.uk.

22 Section 54 Political Parties, Elections and Referendums Act 2000 (as amended by the Political Parties and Elections Act 2009).

23 *Re Clore* (No. 2) [1984] STC 609 at p.615.

On those facts the Court found that Clore did not acquire a domicile of choice in Monaco.

In order to acquire a domicile of choice in a jurisdiction, one must *want* to live there. If a UK domiciliary has plans of a business or personal nature which lead them to want to settle abroad, then acquiring a foreign domicile may be feasible. Links with the UK must be kept to a minimum, particularly at first, and the facts must be clear. Fawcett concluded in 1985 that an unspoken policy of not allowing individuals with a UK domicile of origin to escape UK taxes was influential in determining the result in domicile cases²⁴ and subsequent cases suggest this is still true.²⁵

2.7 Loss of domicile of choice

Dicey states:

(1) A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise.

For the meaning of “reside” and “indefinitely” see 2.4 (Domicile of choice). Dicey continues:

(2) When a domicile of choice is abandoned, either
(i) a new domicile of choice is acquired; or
(ii) the domicile of origin revives.²⁶

The concern of a person who has a UK domicile of origin but has acquired a foreign domicile of choice is that they may lose their domicile of choice. They must:

- (1) maintain their residence in the country of domicile of choice; or
- (2) maintain the intention to reside there permanently; or
- (3) acquire a new foreign domicile of choice.

24 “Result Selection in Domicile Cases” (1985) OJLS vol 5 p.378.

Accessible www.ojls.oxfordjournals.org/content/5/3/378.full.pdf.

25 Cases in which an apparently strong claim of a UK domiciliary to acquire a foreign domicile of choice failed include: Portland; Plummer; Gaines-Cooper.

26 *Conflict of Laws*, 14th ed., paras 6R-033 and 6R-074.

2.8 Dual residence and domicile

The tests of residence and intention to reside are straightforward if a person resides (and intends to reside) in only one country. What if the person resides (or intends to reside) in more than one country? Increased mobility makes this a greater problem than in the past.

2.8.1 *Acquisition of domicile of choice by dual resident*

In *Udny v Udny* Lord Westbury said that a domicile of choice is acquired when:

a man fixes voluntarily his sole *or chief* residence in a particular place, with an intention of continuing to reside there for an unlimited time.²⁷

If a person resides in a number of countries, it is considered that they acquire a domicile of choice in country A if and only if:

- (1) country A is their chief residence; and
- (2) their intention is permanently to reside in country A as their chief residence.

Plummer v IRC 60 TC 452 comments on the *Udny* dictum. Hoffmann J said:

... a person who retains a residence in his domicile of origin can acquire a domicile of choice in a new country only if the residence established in that country is his chief residence. [Counsel for the taxpayer] submitted that a person whose presence in a new country is sufficient to amount to residence may, notwithstanding that his chief residence remains in his domicile of origin, acquire a domicile of choice by evincing an intention to continue to reside permanently in the new country. I think that this submission is inconsistent with the passage which I have quoted from Lord Westbury and which has always been treated as an authoritative statement of the circumstances in which a domicile of choice may be acquired.

27 (1869) LR 1 Sc & Div App 441 at p.458. (Emphasis added.)

This should not be controversial.²⁸

2.8.2 *Loss of domicile of choice by dual resident*

The judge continued:

Rule 13(1) of Dicey and Morris, if read literally, appears to go too far. This says that:

“A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise.”

These words might suggest that a domicile of choice (and presumably a fortiori a domicile of origin) cannot be lost unless the person in question has ceased altogether to reside there. I do not think that the rule was framed with dual residence in mind. At any rate, it seems to me that *Udny v Udny* (1869) LR 1 Sc & Div App 441 shows that loss of a domicile of *origin or choice* is not inconsistent with retention of a place of residence in that country if the chief residence has been established elsewhere.

(Emphasis added)

This passage is obiter and has caused confusion. One needs to consider domicile of origin and domicile of choice separately:

- (1) *Loss of domicile of origin.* The only way to “lose” a domicile of origin is to acquire a domicile of choice. This passage (so far as it concerns a domicile of origin) is correctly stating the point made at 2.8.1 (Acquisition of domicile of choice by dual resident).
- (2) *Loss of domicile of choice.* There are two ways to “lose” a domicile of choice:
 - (a) by acquiring a new domicile of choice;
 - (b) by abandonment without acquiring a new domicile of choice.

28 “It is possible for a person to have two homes, each in a different territory. In that event, the relevant enquiry is which of the two homes is the chief residence”: *Re Shaffer* [2004] WTLR 457 at [11]. The same point is made in *IRC v Bullock* 51 TC 522 at p.539F where the expression used is “principal home”. The concept is similar to the OECD tie-breaker test of “centre of vital interests.”

In *IRC v Duchess of Portland* 54 TC 648, Nourse J said that the test was, in which of the two countries did the individual reside “as an inhabitant”. That comes to the same thing, but to ask which of the two countries is the chief or principal residence is a much clearer and more direct way to approach the question.

The judge here is considering acquisition of a new domicile of choice.²⁹ The passage (so far as it relates to a domicile of choice replaced by a new domicile of choice) correctly states the point made at 2.8.1 (Acquisition of domicile of choice by dual resident) above.

What is the test for abandonment of a domicile of choice (without acquiring a new domicile) in a dual residence context? It is considered that Hoffmann is correct to say that T abandons his domicile of choice where:

- (1) T acquires a domicile of choice in country A.
- (2) T continues to reside in country A but
 - (a) they cease to reside there as their chief residence; and
 - (b) they cease to intend to reside there as their chief residence.
- (3) T does not acquire a domicile of choice elsewhere.

This is consistent with the test of acquisition of domicile: see 2.8.1 (Acquisition of domicile of choice by dual resident).

2.8.3 Which is the “chief” residence?

The next question is exactly how one ascertains which of two competing residences is the chief one. There is guidance in *Plummer v IRC* 60 TC 452. Here, Miss Plummer had a domicile of origin in England. She intended to live in Guernsey, but was studying at university in London, so she spent only some weekends and holidays in Guernsey. In all, two-thirds of her time was spent in England and one-third in Guernsey. It was held that England remained her chief residence but the test was not just a matter of counting days:

[Counsel for the taxpayer] submitted that the commissioners paid no regard to anything except the relative amounts of time which the taxpayer spent in England and Guernsey during the years in question. They ignored the quality of her presence in each country: the fact that she was in England solely for the purpose of education and in Guernsey because it was her family home. I do not think that this is a fair reading of the commissioners’ decision. They set out at length the taxpayer’s ties with Guernsey and her reasons for remaining in England. In deciding whether the house in St. Peter Port had become her chief residence, they

29 Hence the words at the end of the passage (“if the chief residence has been established elsewhere”).

said:

“We accept the [taxpayer’s] evidence that she likes Guernsey and enjoys the amenities of the island when she is there, quite apart from enjoying the company of her family ... We do not underestimate the part which Guernsey plays in her thinking..”

Nevertheless they said that these considerations did not outweigh the fact that the taxpayer had resided for the greater part of the year in England and that there had been no “break in the pattern” which would justify a finding that she had ceased to have her chief residence in England. She had not, to use the language of Lord Hatherley in *Udny v Udny*, LR 1 Sc & Div 441, settled in Guernsey.

I think that this was a conclusion to which the commissioners were on the evidence entitled to come. I go further and say that in my judgment it was the right conclusion. If the taxpayer had in 1980 broken altogether with England and settled in Guernsey like her mother and sister and then, even after a relatively short interval, returned to England for study, the quality of her presence here might have been such as to prevent a revival of her domicile of origin. But the fact is that she has not yet settled in Guernsey, and the reasons why she has been unable to do so are in my view irrelevant. When there is no competing place of continuing residence, settlement may be established by presence for a very short time; even for a single day. But an inference of settlement from a short stay is difficult to draw when the person in question divides his physical presence between two countries at a time. To treat the house in Guernsey as her chief residence simply because it is the sole residence of her mother and sister would in my view be attributing to her a kind of quasi-dependent domicile for which there is no legal justification. And the fact that the taxpayer may intend to settle in Guernsey after her education and training are completed and then to remain permanently is not sufficient to give her a proleptic domicile of choice.³⁰

2.9 Presence in UK because of illness

In *Moorhouse v Lord*, Lord Kingsdown said:

30 Likewise *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [104]: “[The] test of chief residence ... cannot simply be a reference to the main home in terms of size or amenities. Nor can it be a reference to the home in which the subject spends the most time. The court has to look at the quality of the residence in order to decide in which country the subject has an intention to reside permanently.”

Take the case of a man labouring under a mortal disease. He is informed by his physicians that his life may be prolonged for a few months by a change to a warmer climate and that at all events his sufferings may be mitigated by such a change. Is it to be said that if he goes out to Madeira he cannot do that without losing his character as an English subject, without losing his right to the intervention of the English laws as to the transmission of property after his death, and the construction of his testamentary instruments. My lords, I apprehend that such a proposition is revolting to common sense, and the common feelings of humanity.³¹

Someone who comes to or stays in the UK for medical treatment will not become domiciled here. This is so even if the individual comes or stays for treatment of a final illness and knows that they will not recover to return home. This is so even if the individual has a UK domicile of origin, acquires a foreign domicile of choice, and returns here only for medical treatment.

However, that applies only to one who stays here purely for medical treatment or palliative care.³² If, say, an individual comes to England who is housebound and needs long-term care, or because the weather in Bournemouth is better for their health than Falkirk,³³ the individual may acquire an English domicile; it depends of course on intention in each case.

2.10 Domicile and citizenship

2.10.1 *Retention of existing citizenship*

In *IRC v Bullock*, the court said:

Domicile is distinct from citizenship. The fact that the taxpayer chose

31 (1863) 10 HLC 272 at p.292. In *Udny v Udny* (1869) 1 LR Sc & Div 441, Lord Westbury said at p.458:

“There must be a residence freely chosen, and not prescribed or dictated by any external necessity, such as ... the relief from illness ...”

32 Citation of Tax Tribunal or Special Commissioners’ decisions on domicile is not generally appropriate, as there are more than enough cases of higher authority. However, *Allen v HMRC* [2005] STC (SCD) 614 offers a convenient illustration.

33 As in *Reddington v MacInnes* [2002] ScotCS 46.

to retain his Canadian citizenship and not to acquire UK citizenship would not be inconsistent with his having acquired a domicile in the UK, but his adherence to his Canadian citizenship is, in my opinion, one of the circumstances properly to be taken into consideration in deciding whether he acquired a UK domicile.³⁴

Similarly, in *Gaines-Cooper* the Commissioners noted that the taxpayer retained British citizenship, and did not apply for citizenship in the Seychelles.³⁵ Perhaps more significantly, his wife applied for British citizenship.

2.10.2 *Change of citizenship*

Similarly the House of Lords have said:

Naturalisation is one thing; change of domicile is another: it is not the law either that a change of domicile is a condition of naturalisation, or that naturalisation involves necessarily a change of domicile.³⁶

This is correct. However when British citizenship is acquired, it is necessary to look in a little detail at the circumstances of the case.

2.10.3 *Acquisition of British citizenship where home must be in the UK*

The current legislation is the British Nationality Act 1981. In order for a person to become a British citizen under this Act, it is often a requirement that:

his intentions are such that, in the event of a certificate of naturalisation as a British citizen being granted to him, his home or (if he has more than one) his principal home will be in the UK.³⁷

34 51 TC 522 at p.540. The point was also made in *Udny v Udny* 1 Sc & Div 441 at p.452: "The question of naturalization and of allegiance is distinct from that of domicile;" similarly at p.457.

35 *Gaines-Cooper v HMRC* [2008] STC 1665 at [141].

36 *Wahl v Attorney-General* (1932) 147 LT 382; [1938] All ER 922 at p.926 accessible www.kessler.co.uk.

37 See Sch 1 British Nationality Act 1981.

A person whose intention is that *their home will be in the UK* will generally acquire a UK domicile of choice. Although conceptually the requirement that ones “home is in the UK” is distinct from, and might fall short of, an “intention to reside in the UK indefinitely” (in the domicile sense) the gap is exiguous and for practical purposes someone who has the one intention will have the other.

There are exceptions where a person who is naturalised on the basis that they intend their home to be in the UK may nevertheless not acquire a UK domicile of choice:

- (1) In *F v IRC*³⁸ the individual lied in his naturalisation application; in the circumstances he did not acquire a UK domicile of choice.
- (2) A person who intends their home to be in the UK might not have decided whether to reside in England, Scotland or Northern Ireland: one cannot acquire a UK domicile of choice unless and until one intends to reside in one specific jurisdiction. However, in practice this will rarely if ever arise, since a person who intends their home to be in the UK (and by the time that they have made an application for naturalisation) will normally have decided where in the UK that home is to be.

A naturalised citizen may of course later change their intention and lose their domicile of choice in the UK.

2.10.4 *Acquisition of British citizenship where home need not be in the UK*

In some cases an applicant for naturalisation is not required to intend that their home will be in the UK. This was the case under the pre-1981 law and is sometimes the case under the present law.³⁹ In these cases it is strictly speaking consistent to say that the individual, though a naturalised citizen, may not necessarily have acquired a UK domicile of choice. However the fact of naturalisation still tends to suggest that the individual

38 [2000] STC (SCD) 1.

39 A full discussion of naturalisation law is not possible here, but one alternative requirement is that the person intends, in the event of naturalisation, “to enter into, or continue in,

[a] Crown service under the government of the UK, or

[b] service under an international organisation of which the UK or Her Majesty’s government therein is a member, or

[c] service in the employment of a company or association established in the UK.”

See Sch 1 British Nationality Act 1981.

has formed the intention to live in the UK permanently: the issue is one for the Tribunal to decide in the light of all the facts.

The case law in this area needs some care as a cursory reading will mislead.

Wahl v Attorney-General concerned an individual naturalised under the Naturalization⁴⁰ Act 1870. Naturalisation then required an intention to reside in the UK. However in his application he went further and declared that he intended to reside permanently in the UK and had no intention of permanently leaving the UK. The House of Lords somewhat implausibly⁴¹ found nevertheless that he did not intend to make his home in the UK and did not acquire a UK domicile of choice. But that was a finding of fact (not law) which depended on all the facts of the case.⁴²

The point was reargued in *Steiner v IRC* concerning an individual naturalised under the British Nationality and Status of Aliens Act 1914. Here the naturalisation requirement was merely “to reside in His Majesty’s dominions” but the individual went further and stated in his application that he intended “to reside *permanently* in His Majesty’s dominions” (which, in the context, meant England). The Court rightly brushed *Wahl* aside:

The Special Commissioners attached some importance to the declaration associated with the naturalisation application, and so do I ... I bear in mind, of course, the views expressed in the House of Lords in *Wahl v Attorney-General*. But the significance of such matters must be judged in the context of any particular case and the background against which the application for naturalisation and the statements therewith is to be viewed. ... I think it would be quite wrong for this Court to dismiss the view of the Special Commissioners ...

And again:

Now, it is true that in *Wahl v Attorney-General* a similar application and a statement in somewhat similar terms were regarded by the majority of the House of Lords as not affording any strong evidence of intention to

40 This is the spelling of the 1879 Act.

41 (1932) 147 LT 382; [1938] All ER 922 accessible www.kessler.co.uk. Lord Macmillan dissented and the failure of the mainstream law reports to report the case may be taken as tacit disapproval.

42 Nowadays the Supreme Court would not concern itself with issues of fact.

reside permanently in England; but Lord Macmillan, in a dissenting speech, was of opinion that considerable weight should be attached to these matters, and Lord Atkin, who was one of the majority, said, at page 385: "I am far from saying that an application for naturalisation is not a matter to be carefully considered as part of the evidence in a case of domicile"; and the opinion of Lord Atkin was entirely concurred in by Lord Dunedin. In those circumstances, it appears to me that the Special Commissioners acted entirely properly in taking into account the fact of the application for naturalisation, to which they indicated that they did not attach great weight, and further in taking into account the statement made as to the applicant's intentions as to residence.⁴³

2.10.5 *Commentary*

Naturalisation involves entering into a reciprocal relationship by which an individual offers loyalty to the state in exchange for protection.⁴⁴ It is suggested that there should be a rule that naturalised citizens are deemed to be UK domiciled for UK tax purposes.⁴⁵ On this point tax exemption for foreign domiciliaries could without difficulty be better targeted. Of course this would only affect the minority of naturalised citizens (I do not know how small but there are apparently some⁴⁶) who are not UK domiciled under general principles.

This would also reverse the unsatisfactory result in *F* (who was held not UK domiciled because he lied about his intentions in his naturalisation application).⁴⁷

2.11 Refugees, illegal immigrants and temporary visas

Refugees may be forced to sever most of their links with their country of

43 49 TC 13. For completeness, *Wahl* was cited in *F v IRC* [2000] STC (SCD) 1 but *Steiner* was not cited and *F* has nothing to add.

44 See *Citizenship: Our Common Bond* (the Goldsmith report), 2008, accessible www.justice.gov.uk/reviews/docs/citizenship-report-full.pdf.

45 An alternative is to say that a naturalised citizen is deemed UK domiciled for all purposes. But then the legislation would need to specify whether the deemed domicile was in England, Scotland or Northern Ireland which might occasionally be problematic.

46 *Al Fayed v Advocate General* [2002] STC 910 at [23] records the HMRC view in 1985 that naturalisation would have no effect on Mr Fayed's domicile.

47 *F v IRC* [2000] STC (SCD) 1.

origin. But while that may show they had no intention to return to their country of origin, it would not, by itself, show that they had acquired an intention to reside in the UK permanently.

A person in a country illegally may become domiciled there, though the illegality is a factor in deciding whether they have a genuine intention of remaining there.⁴⁸

In *Barlow Clowes International v Henwood*:

He was not able to live there on a permanent basis without the permission of the Mauritian government. His residence was ... in that sense precarious. This does not make it impossible for him to acquire a domicile of choice in Mauritius but makes it less likely that he did so.⁴⁹

2.12 Married women

2.12.1 *Marriage after 1 January 1974*

Until 1 January 1974, a married woman had the domicile of her husband (a “domicile of dependency”). However, s.1 Domicile and Matrimonial Proceedings Act 1973 now provides:

(1) Subject to subsection (2) below, the domicile of a married woman as at any time after the coming into force of this section shall, instead of being the same as her husband’s by virtue only of marriage, be ascertained by reference to the same factors as in the case of any other individual capable of having an independent domicile. ...

(3) This section extends to England and Wales, Scotland and Northern Ireland.

Although a wife does not automatically acquire the domicile of her husband, the decision to marry and set up a home in the UK may be evidence of an intention to reside in the UK permanently, but of course that depends on all the facts.⁵⁰

48 *Mark v Mark* [2006] AC 98.

49 [2008] EWCA Civ 577 at [119].

50 This is obvious but if authority is needed, see *Cyganik v Agulian* 8 ITELR 762 at [46]. Likewise the fact that T’s spouse is UK resident may tend to suggest that T has not acquired a foreign domicile of choice; see (if authority is needed) *Gaines-Cooper*

2.12.2 *Marriage existing on 1 January 1974*

The position of women who married before 1 January 1974 is more complex. Section 1(2) Domicile and Matrimonial Proceedings Act 1973 provides:

Where immediately before this section came into force a woman was married and then had her husband's domicile by dependence, she is to be treated as retaining that domicile (as a domicile of choice, if it is not also her domicile of origin) unless and until it is changed by acquisition or revival of another domicile either on or after the coming into force of this section.

In *IRC v Duchess of Portland* 54 TC 648, a foreign domiciled wife married a UK domiciled husband before 1974, and so she acquired a UK domicile of dependency. She resided in the UK but never intended to reside in the UK permanently. After 1974 she continued to reside in the UK. She therefore retained her former domicile of dependency ("as a domicile of choice"). That domicile could only be abandoned by ceasing to intend to reside in the UK permanently (which she did) *and* ceasing to reside in the UK (which she did not).

In Ireland the wife's domicile of dependency was held unconstitutional⁵¹ and it is an interesting question whether the UK transitional provision is consistent with the Human Rights Act 1998. In practice the issue may never arise.

2.12.3 *Marriage ended before 1 January 1974*

In *Re Wallach*⁵² a widow died five days after the death of her husband. The judge held that a married woman retained her domicile of dependency when the marriage ceased, unless and until she changed it (by abandonment or by acquisition of a new domicile of choice).

It has been said that the test for abandonment of a domicile of dependency is more lenient than the test for abandonment of a domicile

^v *HMRC* [2008] STC 1665 at [46] [47].

⁵¹ *JW v JW* (1992) 4 Irish Tax Reports p.437.

⁵² [1950] All ER 199.

of choice.⁵³ However, it is considered that the *test* is the same: the individual must (1) cease to reside in the place of domicile of dependency and (2) cease to intend to reside there permanently. However, in the case of a domicile of dependency the individual may never have intended to reside there permanently, so requirement (2) may in practice be easier to satisfy. The test is more lenient in that the onus of proof is more easily satisfied.

2.12.4 *Woman a US national*

The US/UK DTA⁵⁴ undoes the effect of a UK domicile of dependency for a woman who is a US national. Article 4(6) of the treaty provides:

A marriage before January 1st, 1974 between a woman who is a United States national and a man domiciled within the UK shall be deemed to have taken place on January 1st, 1974 for the purpose of determining her domicile for UK tax purposes, on or after the date on which this Convention first has effect in relation to her.

The IRS comment:

under UK law, a female US citizen who married a UK domiciliary male before January 1, 1974, does not have the same opportunity to prove a domicile outside the UK as does a male US citizen who married a UK domiciliary female before January 1, 1974. Paragraph 6 of the Convention equalizes the treatment of male and female US citizens in this situation.⁵⁵

As far as I am aware, the US Treaty is the only one which does this. Perhaps this reflects a cultural difference, a greater sensitivity to gender equality issues in the US. This rule does not however apply where a *UK* woman marries a *US* man before 1 January 1974. In that case the woman keeps her domicile of dependency. In this situation a woman is in a better position than a man.

53 *IRC v Duchess of Portland* 54 TC 648 at p.655.

54 That is, the IT/CGT treaty of July 2001. The USA IHT DTA does not contain the same rule.

55 Department of the Treasury Technical Explanation of the Convention.

2.13 Child's domicile of dependency

The domicile of children is not usually important during their minority. However if a child acquires a domicile of dependency during their minority that domicile will continue until lost by abandonment or by acquisition of a new domicile of choice, so the issue occasionally arises well after a child has become an adult.

2.13.1 *Child's domicile in England and Northern Ireland*

Dicey states:

Subject to [s.4 Domicile and Matrimonial Proceedings Act 1973 discussed below] the domicile of an unmarried child under sixteen is determined as follows:

- (1) the domicile of a legitimate child is, during the lifetime of his father, the same as, and changes with, the domicile of his father;
- (2) the domicile of a legitimated child is, from the time at which the legitimation takes effect, during the lifetime of his father, the same as, and changes with, the domicile of his father;
- (3) the domicile of an illegitimate child and of a child whose father is dead is, in general, the same as, and changes with, the domicile of his mother;
- (4) the domicile of a legitimate or legitimated child without living parents, or of an illegitimate child without a living mother, probably cannot be changed;
- (5) the domicile of an adopted child is determined as if he were the legitimate child of the adoptive parent or parents.⁵⁶

Section 4 Domicile and Matrimonial Proceedings Act 1973 provides:

Dependent domicile of child not living with his father.

- (1) Subsection (2) of this section shall have effect with respect to the dependent domicile of a child as at any time after the coming into force of this section when his father and mother are alive but living apart.
- (2) The child's domicile as at that time shall be that of his mother if—
 - (a) he then has his home⁵⁷ with her and has no home with his father;

⁵⁶ Conflict of Laws, 14th ed, para 6R-090.

⁵⁷ See 5.9.1 ("Home").

or

- (b) he has at any time had her domicile by virtue of paragraph (a) above and has not since had a home with his father.
- (3) As at any time after the coming into force of this section, the domicile of a child whose mother is dead shall be that which she last had before she died if at her death he had her domicile by virtue of subsection (2) above and he has not since had a home with his father.
- (4) Nothing in this section prejudices any existing rule of law as to the cases in which a child's domicile is regarded as being, by dependence, that of his mother.
- (5) In this section, "child" means a person incapable of having an independent domicile.
- (6) This section extends to England and Wales, Scotland⁵⁸ and Northern Ireland.

2.13.2 *Child's domicile in Scotland*

The position is different in Scotland. Section 22 Family Law (Scotland) Act 2006 provides:

Domicile of persons under 16

- (1) Subsection (2) applies where—
 - (a) the parents of a child are domiciled in the same country as each other; and
 - (b) the child has a home with a parent or a home (or homes) with both of them.
- (2) The child shall be domiciled in the same country as the child's parents.
- (3) Where subsection (2) does not apply, the child shall be domiciled in the country with which the child has for the time being the closest connection.
- (4) In this section, "child" means a person under 16 years of age.

Scots law (like most countries but not, yet, England) has abolished the status of illegitimacy and this provision reflects that principle.

It is an interesting question whether this reform of the law of domicile applies for the purposes of taxation. Taxation is (in general) a reserved matter over which the Scottish Parliament has no competence. It is suggested that a reform of domicile law, which has an merely incidental

⁵⁸ Schedule 3 Family Law (Scotland) Act 2006 repeals this section in relation to Scotland. However see below on whether this has effect for the purposes of taxation.

consequential effect on taxation, is within the power of the Scottish Parliament.

But then what is the position of a person who is UK domiciled under English law principles but not under Scots law (or vice versa)? Probably the tax position would depend on whether the case were litigated before a Scots or an English Tribunal; or else some system of priority would need to be devised as a judicial ad hoc solution. Neither is satisfactory. Admittedly, the same problem could in theory have arisen even before the 2006 Scots law, but in practice it probably never did.

The RDR manual para RDRM22120 assumes that the Scottish provision does have effect for tax purposes. It is possible to envisage circumstances where a taxpayer may wish to argue the opposite, but perhaps fortunately, the issue will not often arise.

2.14 Republic of Ireland/Northern Ireland

Para 8 Government of Ireland (Adoption of Enactments) (No. 1) Order, 1922 provides:

For the purpose of determining the domicile of any person, Northern Ireland shall be deemed always to have been a separate part of the UK.

In *Re M*⁵⁹ the question arose concerning a person's domicile prior to the partition of Ireland in 1922. A person who lived all their life in what is now Northern Ireland was held to be domiciled in the part of the divided territory in which they had resided.

2.15 HMRC rulings and domicile investigations

There is no statutory rulings procedure.⁶⁰ HMRC formerly provided an informal rulings service but that was abolished in HMRC Brief 34/10. The official reason for the change of practice was as follows:

⁵⁹ [1937] NI 159. This was followed in *Re P* [1945] Ir Jur Rep 17.

⁶⁰ The ruling procedure for ordinary residence and domicile in ss.42 and 43 ITEPA and s.9(2) TCGA was repealed in 2008. It is a matter of speculation, but perhaps the decision to withdraw the informal residence and domicile rulings procedure had already been made at that stage (though not implemented until a year later).

The publication of our new guidance on domicile, plus the fact that from 2008-09 onwards a claim to the remittance basis is no longer mandatory, and must be made on a year by year basis where an individual has unremitted foreign income or gains of £2,000 or more arising in the tax year, mean that HMRC will no longer accept initial non-domicile claims on form DOM 1 or form P86. Form DOM 1 is being withdrawn completely. It will be replaced by the new comprehensive domicile guidance mentioned above that will allow the vast majority of people to self assess their own domicile status.

The true reason was no doubt that the former rulings procedure was judged not to be efficient use of limited HMRC resources.

Domicile rulings are obtainable on a death. The form is IHT401 (Domicile outside the UK). IHT manual 13011 explains the HMRC practice on receipt of this form.

2.15.1 *Effect of old HMRC rulings*

HMRC Brief 17/09 provides:

Where an individual has already submitted a form DOM 1 or P86 and obtained an initial view from HMRC about their domicile status it will be unusual for us to open an enquiry into domicile status in the few years after that, unless new information becomes available that indicates our initial view was incorrect or there has been a change in circumstances. However with the passage of time, circumstances and intentions change and so that initial view from HMRC can become less and less useful as an indicator of domicile status. For example if an individual had advised HMRC on their arrival in England a decade or so ago that they planned to leave the UK after five years but had since married, had a family and decided to make England their permanent home then they will have adopted a domicile of choice within the UK.

Domicile and Inheritance Tax

... As is currently the case, where HMRC has expressed an opinion on the domicile status of a settlor for Inheritance Tax purposes we will not normally seek to reconsider that opinion unless new information becomes available that indicates our initial opinion was incorrect or there has been a material change in the circumstances of the settlor. However, when we make a decision it applies only to the date of the transaction concerned. So if circumstances change, the individual returns to the UK for example, that individual's domicile may need to be

considered again at another point in time. Domicile is not a static thing, it can change as people's circumstances and intentions change.

... Where HMRC has expressed a view on an individual's domicile status for income tax or capital gains tax purposes, as a result of an enquiry, then that view will also apply for Inheritance Tax purposes at that time. Likewise a HMRC view expressed for Inheritance Tax purposes, following a Part VIII IHTA enquiry, will also apply for income tax and capital gains purposes at that time. However, it is important to remember that each decision on domicile will be made at a certain point in time, if circumstances have changed since the time of the relevant decision, the domicile of the taxpayer may also have changed.

2.15.2 *When will HMRC make domicile enquiries?*

In the absence of a ruling, the usual enquiry system applies. HMRC Brief 17/09 provides:

Enquiries into domicile status

... if HMRC decides to enquire into an individual's domicile status this will be by way of a section 9A TMA enquiry into their Self Assessment tax return. (Alternatively in appropriate cases HMRC may enquire into an individual's domicile status by way of a Part VIII IHTA enquiry into an Inheritance Tax return.) Where a claim to the remittance basis is not challenged for that year it does not mean HMRC necessarily accepts the individual's domicile is outside the UK and does not prevent HMRC from later opening an enquiry to consider the domicile status of the individual in relation to that, or any earlier year.

HMRC Brief 34/10 provides:

In future HMRC will consider opening an enquiry where domicile could be an issue, or making a determination of Inheritance Tax in such cases, only where there is a significant risk of loss of UK tax.

The significance of the risk will be assessed by HMRC using a wide range of factors. The factors will depend very much on the individual case but will include, for example:

- a review of the information available to HMRC about the individual on HMRC databases
- whether there is a significant amount of tax (all taxes and duties not just Inheritance Tax) at risk

HMRC does not consider it appropriate to state an amount of tax that would be considered significant, as the amount of tax at stake is only one

factor.⁶¹ It should be borne in mind that HMRC will take into account the potential costs involved in pursuing an enquiry, and also those of potential litigation should the enquiry not result in agreement between HMRC and the individual; clearly such costs can be substantial.

Where HMRC does open an Inheritance Tax enquiry in any of these cases, it will keep the factors in view and may stop the enquiry at any stage if it considers the continuation of the enquiry is not cost effective. The outcome of such an enquiry may be that HMRC does not consider it appropriate to make a determination of the Inheritance Tax.

Individuals should also bear in mind that enquiries into domicile involve a detailed inquiry into all of the relevant facts and HMRC is likely to require considerable personal information and extensive documentary evidence about the taxpayer and the taxpayer's close family.

2.15.3 *How HMRC investigates domicile*

HMRC Brief 17/09 provides:

Enquiries aimed at establishing an individual's domicile are, by their very nature, examinations of an individual's background, lifestyle, habits and intentions, possibly over the course of a lifetime. Consequently, any such enquiries conducted by HMRC will, where necessary, extend to areas of individuals' and their families' affairs that may not normally be regarded as relevant to their UK tax position. ...

The RDR Manual provides:

RDRM23080 - Domicile: Enquiries into domicile status: Schedule of useful information and documents

The list below shows the types of information that might be requested during an enquiry. It should not be regarded as either prescriptive or comprehensive, and the individual may offer other relevant information or evidence for consideration too.

Any information request should be tailored to the particulars of the individual's claim, and their present circumstances. It is always important to think about the relevance of particular items of information to the detailed subject matter of each enquiry. An information request need not be limited only to the items listed here, nor will all items listed necessarily be appropriate in all cases. It may not be possible for some individuals to provide some of the items on the list, even if

61 [Author's footnote] This is obviously less than frank; the true (and perfectly proper) reason to withhold this information must be to prevent fraud.

they would be useful to an understanding of their domicile status. Given the inevitable passage of time in many cases, HMRC and the individual may need to consider how best the facts can be checked and tested.

Information

Date of birth.

Full name at birth.

Parents' full names, including mother's maiden name, and places of birth.

Place of birth, identifying the relevant law territory.

Background to the place of birth, if this was not in the same territory as the parental home at the time.

Details of any name changes, and where, if at all, such changes were registered.

Nationality (citizenship) at birth, including an explanation of its basis where this is not obvious from the context.

Details of any changes in or additions to the nationality (citizenship) at birth, with explanations of the relevant background.

Family background, including marital status of parents during the period of derived domicile.

Information about any adoption proceedings.

If parents were not living together at any time during the period of derived domicile, an explanation of the background to this matter and how parental responsibilities were exercised.

Information about relationships entered into by parents following their separation during the period of derived domicile.

Details of siblings

List of places of residence from birth to the time of the enquiry, including home addresses.

An explanation of the reason for residence at each place on the list.

Details of legal rights of residence in respect of each place and a summary of any visas, permits or other official documents required.

Summary of educational background, including places of education, periods of attendance and qualifications obtained.

Details of military service.

Details of governmental or diplomatic service.

Summary of employment and/or business history.

Explanation of employment and/or business plans, including anticipated retirement, and any arrangements that are in place in respect of these matters.

A detailed summary of properties that have been available for use other than as short-term holiday lettings. This should include the addresses of all the properties, a description of them, details of their ownership, the periods during which the properties have been available, and an explanation of how they have been used when not occupied by the individual.

Details of all marriages, civil partnerships, separations and divorces, including information relating to other relationships involving long-term cohabitation. These should cover the full names of any relevant parties, their dates, places of birth and nationalities, the periods during which the relationships existed, the dates of any formal acts or ceremonies, information relating to the domicile of the other parties, and explanations of any periods during which the parties to the relationship did not

live together.

Information about transfers of property, including those between spouses or civil partners.

A summary of the names, dates of birth and nationalities of the children of the individual.

Details of where any children were educated.

The current locations of any children and the relevant background.

Information relating to the exercise of political rights in any territory, as either a voter or a representative.

Membership of any political parties, or participation in campaigns or lobbying groups, and the extent of any activities.

Details of professional qualifications, membership of professional bodies and active participation in these, including offices held.

Summary of membership of clubs, societies, associations, organisations and other bodies, and details of the level of participation in these.

Information about any representative activities undertaken on behalf of a country, territory, or any political, territorial or other sub-division thereof.

The location of personal papers and any items of financial, sentimental or other value. If such items are moveable, the place where they are usually kept and details of any insurance policies in respect of them.

Details of any wills, including an explanation of the law by which the will is intended to be construed and upon which it relies for its formal validity.

Summary of any deeds, declarations, covenants and similar documents created, including those relating to dependants.

Information relating to any legal proceedings or other matters in which domicile was relevant, either as a basis for any action or as an evidential point.

Locations of members of the extended family, including a description of the relationship between the individuals.

Details of religious, cultural and social connections, including the degree of religious observation, the level of participation in social and cultural life, and ability to speak, read and write relevant languages.

Information about charitable and voluntary activities, including the foundation of charitable trusts, donations to charities and good causes, and active participation in the administration or fund-raising activities of third-sector organisations.

Summary of professional and personal advisers, including their locations and details of the nature and extent of the services that they provide.

An explanation of the individual's intentions for the future. What plans have been made? What contingencies have been taken into account? What would cause a change of residence? What provision has been made for the future? What has the individual actually done that provides evidence for the answers to these questions?

A summary of any connections not specifically mentioned above that the individual has with various territories. When did these begin and precisely what form have they taken over the years? How much time has the individual spent in each territory during the relevant period? What was the reason for such presence?

49620

The list in this paragraph deals with the types of documentary evidence that might be requested during an enquiry.

In some cases it might be necessary to request applications and other documents relating to the acquisition, loss or withdrawal of the items listed below.

Birth certificates

Adoption papers

Registrations of name changes

Marriage certificates

Civil Partnership certificates

Passports and identification documents

Social security documents

Applications for nationality (citizenship)

Documents renouncing nationality (citizenship)

Visas, residence permits, work permits and similar documents

Driving, firearms and other licences

Practising certificates and authorisations from professional or regulatory bodies

School records and reports

Examination certificates

Military service records

Employment contracts

Business accounts, reports and planning documents

Conveyances, leases, tenancy agreements and other documents relevant to the ownership, occupation or use of property

Mortgage and loan agreements

Health insurance policies

Property, motor and other insurance policies

Life assurance policies

Documents relating to savings, retirement and pension plans

Wills, expressions of wishes, deeds of covenant and other legal documents

Personal financial records, including bank account and credit card statements and documents relating to investments

Documents confirming membership of or participation in organisations and activities

Personal correspondence, photographs or electronic records relating to an individual's background, lifestyle and intentions

This is a daunting list, but forewarned is forearmed.

2.16 Domicile of company

The domicile of a company is where it is registered, which is the place of incorporation.⁶² Domicile of a company is only rarely significant for tax or any other purpose.

⁶² *Gasque v IRC* 23 TC 209; Dicey, Morris & Collins, *Conflict of Laws*, 14th ed, para 30-002.

CHAPTER THREE

RESIDENCE OF INDIVIDUALS

3.1 Residence and ordinary residence – Introduction

Residence is fundamental to the territorial limitations of income tax and CGT. It is not possible to give a full list but the most important are:

- (1) Income tax on foreign income is limited to UK residents.
- (2) Income tax on certain UK source income is limited for non-residents.
- (3) Capital gains tax is limited to UK residents.¹

Ordinary residence does not matter as much as residence. The main differences (all advantages) for an individual who is resident but not ordinarily resident in the UK (compared to one who is resident *and* ordinarily resident) are as follows:

- (1) The transfer of assets abroad provisions do not apply.²
- (2) Different employment income rules apply.³
- (3) The RFI remittance basis applies even if UK domiciled.⁴
- (4) Different NIC rules apply.⁵
- (5) FOTRA securities qualify for IT and IHT exemptions.⁶

Residence is also important for non-tax purposes, such as jurisdiction. Ordinary residence is occasionally important for non-tax purposes, and indeed the leading case (*ex p. Shah*) is a non-tax case.

The issue for tax is generally whether a person is resident in the UK,

1 See 15.1 (Savings and Investment Income), 13.1 (Employment income), 39.1 (Limitation on liability for non-residents) and 46.1 (Capital gains tax on individuals).

2 See 27.1 (Transfer of assets abroad: introduction).

3 See 13.1 (Employment income).

4 See 9.5 (Who qualifies for the remittance basis?).

5 See 45.5 (ROW: employed in GB); 45.6 (ROW: residence requirements).

6 See 58.4 (Non-settled property: FOTRA Securities).

though some very minor provisions⁷ refer to residence in Scotland or Northern Ireland specifically (rather than in the UK as a whole).

This chapter also discusses the definition of “Scottish Taxpayer” though that is not strictly a residence test.⁸

3.1.1 *Cross references*

This chapter considers residence of individuals; see too:

4.1 (Residence of trustees);

5.1 (Treaty-residence);

38.8 (Residence of partnership);

73.3 (Residence of PRs for CGT) and

74.2 (Residence of PRs for IT).

For special categories of individuals, see:

App 3.1 (MPs and members of the House of Lords).

App 4.1 (Residence of visiting forces).

Residence of companies is a subject which deserves to be addressed in length and depth. I omit it here as it is well covered elsewhere.⁹

The statutory residence test proposed from 2013/14 is discussed in the next chapter.

3.2 The concepts of residence and ordinary residence

3.2.1 *Residence is a status*

The concept of “residence” is distinct from physical presence. A person

7 (1) Income exemption for Ulster Savings Certificates refers to residence and ordinary residence in Northern Ireland: s.693 ITTOIA.

(2) Blind person's allowance refers to ordinary residence in Scotland and Northern Ireland: s.38 ITA.

8 See 3.36 (Scottish taxpayers).

9 For HMRC views see SP 1/90 and the International Tax Handbook chapters 3 and 4. For an important statement of judicial views, see Chadwick, “Control of Special Purpose Vehicles” [2007] *Jersey & Guernsey Law Review* 153 accessible www.jerseylaw.je/Publications/jerseylawreview. For general studies, see Couzin, *Corporate Residence and International Taxation* (2002); Brandon *Taxation of Non-UK Companies and their Shareholders* (2nd ed, 2002) and for historical perspective, see Avery Jones “Jurisdiction to Tax Companies” in Tiley (ed.) *Studies in the History of Tax Law* (Vol 4, 2010) accessible www.kessler.co.uk.

may be UK resident at a time when not present in the UK (eg if absent on a day trip abroad). A person may be present in the UK without being UK resident. Residence is a legal status; contrast physical presence, which is not a status, just a simple physical fact.

3.2.2 *Residence during part of tax year*

The concept of “residence” is used in tax statutes in slightly different ways:

- (1) Sometimes it is used to describe a status which one has (or does not have) at a particular moment of time.¹⁰
- (2) Sometimes it is used to describe a status which one has (or does not have) during a period of time. The period need not coincide with a tax year.¹¹

I have considered whether the term is ever used to describe a status which one must have (or not have) specifically for the period of a tax year. Under this usage one could not cease to have the status of resident during a tax year: residence could only change at the beginning or end of a tax year. But I think this is not the case. There is of course a rule that someone who is resident in part of a tax year is strictly subject to income tax and GCT on income and gains arising in any part of the tax year, and the individual in this situation is sometimes said to be “resident *for* the tax year” (the language used in ESC A11).¹² But this does not mean that the individual has the status of resident throughout the year.¹³ For instance,

10 For a non-tax example see s.4(1) Representation of the People Act 1983:

“A person is entitled to be registered in the register of parliamentary electors for any constituency ... if *on the relevant date* he (a) is resident in the constituency ...”.

For a tax example see 6.16.1 (Section 13).

11 For a non-tax example see s.4(2) Representation of the People Act 1983:

“A person is not entitled to be registered in the register of parliamentary electors for any constituency in Northern Ireland unless ... he has been resident in Northern Ireland *during the whole of the period of three months ending on the relevant date.*”

12 See 6.2.1 (“Residing in the UK in a tax year” and similar expressions).

13 See *Smallwood v HMRC* in the High Court [2009] STC 1222 at [31]:

“The UK tax provisions set out above create certain tax consequences for gains in a given year if [taxpayers] are resident here for part of the year. Where they apply, residence in part of the year gives rise to a charge to tax on gains made in another part of the year, but they do not do so by deeming the residence to be for any period longer than the actual period of residence. They do so simply by defining the gains by reference to the period in which they arise.”

ESC A11 goes on to refer to “the period of residence here during the year” it is obviously using the word “residence” to describe a status which changes during a tax year.

If it matters (in practice the issue does not often raise difficulties) the context must determine which sense is meant. Sometimes the context makes it clear, eg s.13 TCGA applies if a person is resident at the time when the gain accrues to the company. Sometimes the context provides at least an inference, eg the CGT exit charge (which applies when the taxpayer ceases to be UK resident) applies at the time that the individual actually leaves, not at the end of the tax year.¹⁴

3.2.3 *Ordinary residence during part of tax year*

Ordinary residence, like residence, is a legal status. Once again, the expression could be used in two different ways:

- (1) to describe a status which one has (or does not have) at a particular moment of time, or during a period of time which need not coincide with a tax year.
- (2) describe a status which one must have (or not have) specifically for a tax year. Under this usage one could not cease to be ordinarily resident during a tax year. Ordinary residence could only change at the beginning or end of a tax year.

But usage (1) is the normal meaning, and usage (2) would require a clear context to make it apply. It is considered that “ordinary residence”, in an income tax or CGT context, is (in the absence of special context) a status which may change during a tax year. It is not a status which has to last an entire tax year.¹⁵

3.2.4 *The source of the concepts*

Given the centrality of the concept, it is surprising that there is nothing

The same applies for income tax, though the provisions are not so clearly drafted. The High Court decision was reversed on appeal but that does not affect this point.

14 See 7.2 (Clawback of holdover relief on emigration of individual), 7.4 (Exit charge for trusts), and 7.8 (Emigration of individual trader); presumably the usage of s.2 TCGA applies generally for CGT.

15 Thus in *Genovese v HMRC* [2009] STC (SCD) 373 the taxpayer was held to be resident throughout 2001/02 but became ordinarily resident on 1 October 2002.

like a definition of “residence” in the legislation. Several statutory provisions impinge on the subject and residence has been discussed in a number of decisions by the courts. HMRC6 is also important, supplemented by other HMRC statements.

There is no statutory guidance on the meaning of “ordinary residence”. Like simple residence, the meaning has been discussed in the case law and HMRC6 is important in practice.

This chapter first considers the statutory provisions, then the case law and then HMRC6.

We need terminology for the statutory rules (for which statute does not provide a label) and I coin the following terms:

Temporary UK purpose rule: s.831(1)-(3) ITA

183-day rule: s.831(4)(5) ITA

Occasional residence abroad rule: s.829 ITA.

I refer to the three rules together as “**the statutory residence rules**”.

3.3 Temporary UK purpose and 183-day rules

3.3.1 *Temporary UK purpose rule*

Section 831(1) ITA provides:

Subsection (2) applies in relation to an individual if—

(a) the individual is in the UK

[i] for some temporary purpose only and

[ii] with no view¹⁶ to establishing the individual’s residence in the UK, and

(b) during the tax year in question the individual spends (in total) less than 183 days in the UK...¹⁷

16 ITA EN para 2477 states:

“Subsection (1)(a) refers only to ‘view’ and omits reference to ‘intent’ on the basis that ‘view’ is wider than ‘intent’ or ‘intention’.”

But it is considered that these words all mean the same thing.

17 A further paragraph follows: “In determining whether an individual is within para (a) ignore any living accommodation available in the UK for the individual’s use.” I deal with this paragraph at 3.6 (Accommodation in the UK).

If these conditions are satisfied, one turns to s.831(2):

Apply the following rules in determining the individual's liability for income tax.

Two rules now follow:

Rule 1

In relation to pension or social security income arising from a source outside the UK, treat the individual as non-UK resident for the purposes of the following ...

Rule 1 goes on to specify an exotic set of provisions in inordinate detail.¹⁸

Rule 2

In relation to income arising from a source outside the UK, treat the individual as non-UK resident for the purposes of any charge under a provision mentioned in section 830(2) of ITTOIA 2005 (which contains a list of provisions under which relevant foreign income is charged).¹⁹

-
- 18 “(a) Chapter 4 of Part 9 of ITEPA 2003 (tax on foreign pensions),
 (b) Chapter 5A of that Part (tax on pensions under registered pension schemes) but only if the income is an annuity under a registered pension scheme within para 1(1)(f) of Schedule 36 to FA 2004,
 (c) Chapter 10 of that Part (tax on employment-related annuities),
 (d) Chapter 15 of that Part (tax on voluntary annual payments),
 (e) section 647 of ITEPA 2003 (meaning of ‘foreign residence condition’) but only in its application for the purposes of section 651 of that Act (which provides an exemption for tax under Chapter 14 of Part 9 of that Act), and
 (f) Chapter 6 of Part 10 of ITEPA 2003 (taxable foreign benefits).
 See sections 566 and 657 of ITEPA 2003 for the definitions of ‘pension income’ and ‘social security income’.”

For completeness, s.831(3) ITA provides:

“Para (e) of Rule 1 in subsection (2) applies only if—

- (a) the individual makes a claim as mentioned in section 647(3)(a) of ITEPA 2003, and
- (b) the Commissioners are satisfied that subsection (2) of this section applies in relation to the individual.”

But all this is academic as the application of rule 1 never makes any difference in practice.

- 19 For completeness, the rule adds: “In this rule ‘income’ does not include income chargeable as a result of section 844 of ITTOIA 2005 (unremittable income: income charged on withdrawal of relief after source ceases).” But this is also academic.

The two rules have the same effect (in relation to the income to which they apply): they treat the individual as non-resident for certain purposes. I refer to them together as “**the temporary UK purpose rule**”. That label does not quite correctly summarise the conditions of s.831(1), no label could do so.

The rule is vague because of the word “temporary”. The words in s.831(1)(a)[ii] (“and with no view to establishing the individual’s residence in the UK”) should, I suggest, be regarded as a paraphrase or explanation of “for some temporary purpose only”. The additional words do not clarify the matter at all. A definition or explanation of residence cannot be helpful if it uses the word “residence” without explanation, as happens here.

The rule, however vague, is consistent with the natural meaning of residence since someone in the UK for a merely temporary purpose (whatever that means) would not be said to be resident in the ordinary sense (whatever that is).

Section 832 ITA provides the identical rule (set out in full) for the purposes of Chapters 4 and 5 Part 2 ITEPA (employment income). Note that the temporary UK purpose rule only applies for certain income tax purposes, and the question of residence may arise for other income tax purposes.²⁰

3.3.2 183-day rule

Section 831(4) ITA provides:

Subsection (5) applies in relation to an individual if subsection (2) would have applied in relation to the individual but for subsection (1)(b).

This convoluted wording is rather more difficult to follow now it is rewritten in plain English than it was before the 2007 rewrite. The reader who patiently works through the labyrinth will conclude that subsection (5) applies if:

²⁰ For instance, residence may be relevant for the purpose of non-residents income tax relief; see 39.1 (Non-residents income tax relief).

- (a) the individual is in the UK
 - [i] for some temporary purpose only and
 - [ii] with no view to establishing the individual's residence in the UK, and
- (b) in the tax year in question the individual spends in total 183 or more days in the UK.

If these conditions are satisfied, one turns to subsection (5):

Apply the rules set out in subsection (2) in determining the individual's liability for income tax.

But—

- (a) instead of treating the individual as non-UK resident in relation to the income and for the purposes mentioned in those rules, treat the individual as UK resident, and
- (b) ignore subsection (3).

Amended as subsection (5) requires, the rules in subsection (2) are:

Rule 1

In relation to pension or social security income arising from a source outside the UK, treat the individual as UK resident for the purposes of the following ... [the list is set out in the footnote above].

Rule 2

In relation to income arising from a source outside the UK, treat the individual as UK resident for the purposes of any charge under a provision mentioned in section 830(2) of ITTOIA 2005.

The two rules have the same effect (in relation to the income to which they apply): they treat the individual as UK resident for certain purposes. I refer to this as “**the 183-day rule**”, though once again, that label does not quite correctly summarise the conditions of s.831(4).

The rule is relatively precise, since it is easy to count the 183 days. It is also consistent with the natural meaning of residence since someone who spends 183 days in the UK can in the normal sense of the word be said to be resident here. Like the temporary UK purpose rule, it is extended for (some) employment income purposes by s.832 ITA, but it applies only for certain IT purposes.

3.3.3 Temporary purpose and 183-day rules: comments

The two rules only cover some of the possible permutations of fact:

Name of rule	Temporary UK purpose	183 UK days	Resident
Temporary UK purpose rule	Yes	No	No
182-day rule	Yes	Yes	Yes

What if a person is *not* in the UK for a temporary purpose? The section is silent. Presumably such a person:

- (1) is in the UK for a permanent purpose, in which case they are resident;
or
- (2) is not in the UK at all (or in the UK, but not for any purpose?) in which case they are not resident.

3.4 Occasional residence abroad rule

Section 829 ITA provides:

Residence of individuals temporarily abroad

(1) This section applies if—

- (a) an individual has left the UK for the purpose only of occasional residence abroad, and
- (b) at the time of leaving the individual was both UK resident and ordinarily UK resident.

(2) Treat the individual as UK resident for the purpose of determining the individual's liability for income tax for any tax year during the whole or a part of which the individual remains outside the UK for the purpose only of occasional residence abroad.

I call this the “**occasional residence abroad rule**”.

“Occasional residence abroad” is hopelessly vague in the modern world. But the rule, however vague, is consistent with the natural meaning of “residence” since someone leaving for occasional residence abroad (whatever that is) would not be said to be UK resident in the ordinary sense (whatever that is).

In addition, the occasional residence abroad rule only covers one of several possible permutations of fact. What if the individual has left the

UK for the purpose of occasional residence abroad (whatever that means) and before they left they were resident and not ordinarily resident, or they were not resident at all? The statute is silent. But presumably the individual would be regarded as non-resident.

This rule applies “for the purpose of determining the individual’s liability for income tax”. If one can identify other purposes the rule would not apply to it. The collection of tax from a UK representative of a non-resident individual would be an example, but the point is academic.

3.5 Statutory residence rules and natural meaning of “residence”

If the temporary UK purpose rule applies, the individual is treated as non UK resident (for certain IT purposes). If the 183-day rule applies, the individual is treated as UK resident (for certain IT purposes). If the occasional residence abroad rule applies, the individual is treated as UK resident for the purposes of determining the individual’s liability for IT (but not for other purposes, such as rules relating to collection of tax). The statutory residence rules are irrelevant for ordinary residence.

If this is taken literally, it creates an absurdly complicated situation. There are at least three classes of individual:

Case No.	UK resident (general meaning)	Temporary UK purpose	183 days in UK abroad	Occasional residence	Status for most IT purposes	Status for other IT purposes
1	Y	Y	N		Non-resident	Resident
2	N		Y		Resident	Non-resident
3	N			Y	Resident	Non-resident

The only solution to this problem is to downplay the importance of the statutory residence rules. One could say that the sections should be regarded as laying down rules which apply for income tax generally. Then the enormously detailed list in s.831(2) specifying types of income which are affected is unnecessary and inappropriate. There is a hint of this approach in the former Inspectors Manual para 43 which provided:

In practice, however, ICTA, s 336 [now s.831 ITA] is applied to other Schedules and cases as its language has an “illustrative value” (see Rowlatt, J, in *Lysaght v IRC* 13 TC 511 at p.515) on all questions of residence.

But no distinction is drawn between residence for IT purposes and

residence for NIC or jurisdiction purposes even though the latter have no equivalent statutory provisions. So the better view is that the statutory rules only state what would in any event be the normal meaning of residence. Then the statutory rules are entirely otiose.

If that is right, there is little point in considering separately “residence” in its ordinary meaning and then the statutory residence rules, as if they were separate and independent sets of rules.

In *Reed v Clark*, 58 TC 528, Nicholls J observes (at page 550 B):

Despite the long history of the statutory provision now reproduced as s 49, [now s.829 ITA, the occasional residence abroad rule] the researches of very experienced Counsel have not revealed any reported decision in which a claim to tax has succeeded only by virtue of that provision. ...

The judge concluded that there was “little scope in practice” for the operation of the occasional residence abroad rule. There was no case where any of the statutory rules mattered from the inception of income tax until *Reed v Clark* in 1985; as far as I am aware there has been no case since then. It seems safe to say that such a case will never be.

3.6 Accommodation in the UK

3.6.1 *The supposed available accommodation rule*

It was formerly the official HMRC view that:

Individuals are regarded as resident in the UK for tax purposes for a year, if they have accommodation available for their use and are present here at any time in the year.²¹

This is called “the available accommodation rule”. John Avery Jones states tactfully that “it is difficult to see how the available accommodation

21 Press Release 16 Mar 1993 [1993] STI 468. Likewise IR20 (1983 version) para 14: “If you go abroad permanently but have accommodation available for your use in the UK, you will be treated as resident here for any tax year in which you visit the UK. The length of the visit does not matter. ... A visitor who has accommodation available here will be regarded as resident for any year in which he comes to the UK, however short his visit may be...”

rule ever arose”.²² More bluntly, the rule did not exist.²³ The supposed rule was abolished by statute, in two stages.

3.6.2 *Full-time workers abroad*

From 1956, the supposed rule was abolished for those who worked full-time abroad. Section 830 ITA provides:

- (1) This section applies for income tax purposes if an individual works full-time in one or both of—
 - (a) a foreign trade, and
 - (b) a foreign employment.
- (2) In determining whether the individual is UK resident ignore any living accommodation available in the UK for the individual’s use.

Section 830 then elucidates the terms used in subsection (1):

22 [1993] BTR 286.

23 The rule was inconsistent with the case law: see 3.8 (Case law on residence). In *Gaines-Cooper v HMRC* [2007] STC (SCD) 23 at [165] the Special Commissioners rightly said:

“In general availability of accommodation is a *factor to be borne in mind* in deciding if a person is resident here ...”.

The rule was expressly rejected in *High Tech International v Deripaska* [2006] EWHC 3276 [2007] EMLR 15 at [25]; *Cherney v Deripaska* [2007] EWHC 965 (Com) [2007] ILR 49 at [45]; and *Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) at [487]

“Purchases of expensive property in England which, in the case of a man of ordinary wealth, would suggest settlement here, may have no such significance to someone for whom money is no object. Mr Abramovich’s use of the Lowndes Square property ... does not indicate that ... it was his usual or settled place of abode. It was not then the place in which, even for limited periods, he habitually and normally resided for a settled purpose. It was a place to which he came when visiting London...”.

How, then, did HMRC ever come to hold that the rule existed? I guess that the origins of the rule goes back to the late 19th or early 20th century, before home ownership became widespread. In those days the purchase of accommodation was an unusual and significant commitment, for the usual course was to rent or stay in a hotel, so it would generally be reasonable to regard anyone who made that commitment as UK resident. The change of home ownership patterns later made the rule a wholly inappropriate test for residence, but HMRC continued to propound it even after its rationale disappeared and was forgotten.

- (3) A trade is foreign if no part of it is carried on in the UK.
- (4) An employment is foreign if all of its duties are performed outside the UK.
- (5) An employment is also foreign if in the tax year in question—
 - (a) the duties of the employment are in substance performed outside the UK, and
 - (b) the only duties of the employment performed in the UK are duties which are merely incidental to the duties of the employment performed outside the UK in the year.
- (6) In this section—
 - “employment” includes an office, and
 - “trade” includes profession and vocation.²⁴

Section 830(2) requires a total disregard of available accommodation. It disapplies the available accommodation rule and disregards the accommodation for all purposes.

For the relationship between this statutory rule and HMRC practice, see 3.19 (Full-time work abroad).

3.6.3 *Partial disregard of accommodation*

In 1993 this disregard was extended. The drafting is opaque. Section 831(1)[A] ITA sets out the temporary UK purpose rule, discussed above:

- [A] Subsection (2) applies in relation to an individual if—
 - (a) the individual is in the UK for some temporary purpose only and with no view to establishing the individual’s residence in the UK, and
 - (b) in the tax year in question the individual spends (in total) less than 183 days in the UK.

This is then qualified by s.831(1)[B]:

[B] In determining whether an individual is within para (a) ignore any living accommodation available in the UK for the individual’s use.

²⁴ This uses terminology discussed elsewhere: if s.830(2) mattered, see 13.13 (Where are duties performed: incidental duties); and 3.19.1 (Meaning of “work full-time abroad”).

So one disregards available accommodation for the temporary UK purpose rule. But one does have regard to it for other purposes.²⁵ One purpose where one has regard to it is the occasional residence abroad rule.²⁶ Perhaps there are others. If this book is right that the temporary UK purpose rule is of nil or negligible importance, this was not the right way for Parliament to go about making the desired reform.

HMRC6 para 2.2 provides that one relevant factor in determining UK residence is:

Property ties include a house or apartment that you own or lease, or property held primarily for investment but that also provides you with accommodation when you are in the UK. A house or apartment provided for your use for the duration of your time in the UK as part of an employment package is ‘available accommodation’ and is a tie to the UK.

This is consistent with s.831(1)[B] ITA because the statutory disregard applies for the temporary UK purpose rule and not the occasional residence abroad rule. However, the former available accommodation rule has been abandoned: it is no longer suggested that one day’s presence and accommodation is sufficient to amount to UK residence.²⁷

3.7 CGT statutory residence rules

Section 9(1) TCGA provides:

25 Except for full-time workers abroad.

26 This was HMRC’s intention when enacting the original legislation. Press Release [1993] STI 468 para 5:

“Similarly, where an individual leaves the UK, the retention of a home here will continue to be a factor in considering whether he or she has left the UK permanently.”

See too John Avery Jones [1993] BTR 286 and Philip Baker OTPR Vol 3 p.143.

27 This was HMRC’s intention when enacting the legislation was similar but somewhat more precise. Press Release [1993] STI 468 para 5:

“There will be no change in the practice of treating as resident and ordinarily resident an individual who comes to and remains in the UK where he or she owns or acquires on a lease of 3 years or more accommodation in this country.”

See too John Avery Jones [1993] BTR 286 and Philip Baker OTPR Vol 3 p.143.

In this Act “resident” and “ordinarily resident” have the same meanings as in the Income Tax Acts.

The drafter was understandably unsure whether this would incorporate the 183-day and temporary UK purpose rules which (supposedly) apply only to some types of income, so s.9(3)(4) TCGA provides CGT rules to the same effect:

(3) Subject to sections 10(1) and 10A, an individual who is in the UK for some temporary purpose only and not with any view or intent to establish his residence in the UK shall be charged²⁸ to capital gains tax on chargeable gains accruing in any year of assessment if and only if the individual spends (in total) at least 183 days in the UK.

(4) The question whether for the purposes of subsection (3) above an individual is in the UK for some temporary purpose only and not with any view or intent to establish his residence there shall be decided without regard to any living accommodation available in the UK for his use.

There is no express CGT equivalent for the IT occasional residence abroad rule, but that arguably is incorporated into CGT by s.9(1) TCGA. However in *Hankinson* [2009] UKFTT 384 at [40] the argument was not raised, and the Tribunal considered that the occasional residence abroad rule did not apply for CGT:

s 334 [ICTA now the occasional residence abroad rule] relates only to income tax. Section 9(1) TCGA 1992 does not in terms extend the application of s 334 to capital gains tax; s 9(1) simply adopts for capital gains tax purposes the meanings which the expressions “resident” and “ordinarily resident” have in the Income Tax Acts. [chargeability to CGT] therefore depends on the presence or absence of residence and/or ordinary residence examined under common law principles.

If this book is right that the occasional residence rule is of nil or negligible importance, it does not matter; if not, we would have the undesirable position that a person might be resident for IT purposes but not for CGT.

28 The IT rules use the word ‘treated’; the CGT equivalent uses the word ‘charged’ but the end result is the same.

3.8 Case law on residence

A person who does not meet the 183-day rule may still be resident here, but in what circumstances? Since the statutory provisions do not give a clear answer we turn next to the case law. Tax residence case law is voluminous (the existence of voluminous case law is itself a sign that the law is in disarray). Case law on “residence” in non-tax statutes is also relevant, as it applies the “ordinary” meaning of residence and follows the principles of the leading tax cases.²⁹

The leading cases are *Levene v IRC* and *Lysaght v IRC* 13 TC 486 and 511. They reflect conditions of life in the 1920s but are still the basis for modern decisions.

There have been two recent attempts to summarise the case law. The first identifies eight points:

- [1] the concept of residence is not defined in the legislation; the word therefore should be given its natural and ordinary meaning (*Levene*).
- [2] The words “residence” and “to reside” mean “to dwell permanently or for a considerable time, to have one’s settled or usual abode, to live in or at a particular place”.
- [3] the question whether a person is or is not resident in the UK is a question of fact for the Special Commissioners.
- [4] no duration is prescribed by statute and it is necessary to take into account all the facts of the case; the duration of an individual’s presence in the UK and the regularity and frequency of visits are facts to be taken into account;
- [5] also, birth, family and business ties, the nature of visits and the connections with this country, may all be relevant.
- [6] in general the availability of living accommodation in the UK is a factor to be borne in mind in deciding if a person is resident here .. (although that is now subject to [s.831(1)[B] ITA]).
- [7] the fact that an individual has a home elsewhere is not decisive, because a person may be dual resident... However it may be a relevant factor (particularly if the home elsewhere is much more

29 Under the Civil Jurisdiction and Judgments Order 2001 (SI 2001/3929) jurisdiction depends (in part) on residence. See *Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) at [461]: “... the courts have sought to give the word [residence] the same ‘ordinary’ meaning in both tax cases (such as *Levene*) and jurisdiction cases (such as *Abbas*). It makes sense to do so. Resident for jurisdiction purposes but not resident for tax purposes is a distinction to be avoided if possible.”

important).

- [8] there is a difference between the case where a British subject has established residence in the UK and then has absences from it and the case where a person has never been resident in the UK at all.

The second summary of case law identifies 13 points. Some relate to ordinary residence and some are covered by the above, but the following are worth noting separately:

- (iv) Residence in a place connotes some degree of permanence, some degree of continuity or some expectation of continuity.
- (v) However, short but regular periods of physical presence may amount to residence, especially if they stem from performance of a continuous obligation (such as business obligations) and the sequence of visits excludes the elements of chance and of occasion...
- (xi) Although residence must be voluntarily adopted, a residence dictated by the exigencies of business will count as voluntary residence;
- (xii) The purpose, while settled, may be for a limited period; and the relevant purposes may include education, business or profession as well as a love of a place;
- (xiii) Where a person has had his sole residence in the UK he is unlikely to be held to have ceased to reside in the UK (or to have “left” the UK) unless there has been a definite break in his pattern of life.

Some of these considerations are similar to that part of the OECD model treaty definition of treaty-residence, under which an individual with a home in two states is deemed to be treaty-resident in the state with which their personal and economic relations are closer (centre of vital interests); though this does not much help to resolve any practical issues of residence as that formula is almost equally imprecise.

I deal with these points separately.

3.8.1 *Residence has its natural meaning*

- [1] the concept of residence is not defined in the legislation; the word therefore should be given its natural and ordinary meaning (*Levene*).

It is an interesting question whether the UK courts have really succeeded in (what is said to be) the aim of identifying and applying the “natural and ordinary meaning” of the word residence. It is difficult (perhaps

impossible) to assess the issue objectively, but I think the general public would be surprised how little was needed to constitute UK residence. This was also the view of the Canadian Supreme Court.³⁰

3.8.2 *Settled or usual abode*

- [2] The words “residence” and “to reside” mean “to dwell permanently or for a considerable time, to have one’s settled or usual abode, to live in or at a particular place” (*Levene*).

Viscount Cave said:

My Lords, the word “reside” is a familiar English word and is defined in the Oxford English Dictionary as meaning “to dwell permanently or for a considerable time, to have one’s settled or³¹ usual abode, to live in or at a particular place”.³²

There follows a comment on (presumably short) absences:

In most cases there is no difficulty in determining where a man has his settled or usual abode, and if that is ascertained he is not the less resident there because from time to time he leaves it for the purpose of business or pleasure.³³

30 *Thomson v Minister of National Revenue*, [1946] SCR. 209 at p.221, 224: ... “*Cooper v Cadwaladar*... is the case of an American citizen living in the United States, who owned shooting rights in Scotland, where he spent a few months annually, and who was held liable in Scotland for income tax. I feel quite confident that no Canadian court, in similar circumstances, would hold that such a person... is a “resident” ... “it must, I think, be said that the language of “plain men” was stretched to the breaking point to encompass the facts that had been found by the Commissioners [in *Lysaght v IRC*] to be residence...”

31 *Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) at [451] comments on the phrase “settled or usual place of abode”: “I do not, however, read the decision of the court as using those adjectives antithetically, but rather as differently nuanced ways of saying much the same thing. This appears particularly so given that the court regarded the phrase as connoting some degree of permanence or continuity.”

32 13 TC at 505.

33 13 TC at 505. For a more recent restatement of the principle, see *Grace v HMRC* [2009] STC 213 at [6]: “Physical presence in a particular place does not necessarily amount to residence in that place where, for example, a person’s physical presence there is no more than a stop gap measure: *Goodwin v Curtis* (1998) 70 TC 478, 510.”

Similarly:

(iv) Residence in a place connotes some degree of permanence, some degree of continuity or some expectation of continuity: *Fox v Stirk* [1970] 2 QB 463; *Goodwin v Curtis* 70 TC 478;

(v) However, short but regular periods of physical presence may amount to residence, especially if they stem from performance of a continuous obligation (such as business obligations) and the sequence of visits excludes the elements of chance and of occasion: *Lysaght v IRC* 13 TC 511...

3.8.3 Purpose

(xii) The purpose, while settled, may be for a limited period; and the relevant purposes may include education, business or profession as well as a love of a place: *R v Barnet LBC ex p Shah* [1983] 2 AC 309;

3.8.4 No home or establishment

Viscount Cave goes on to consider those who have no permanent home but live in hotels:

The above cases are comparatively simple, but more difficult questions arise when the person sought to be charged has no home or establishment in any country but lives his life in hotels or at the houses of his friends. If such a man spends the whole of the year in hotels in the UK, then he is held to reside in this country; for it is not necessary for that purpose that he should continue to live in one place in this country but only that he should reside in the UK.

But probably the most difficult case is that of a wanderer who, having no home in any country, spends a part only of his time in hotels in the UK and the remaining and greater part of his time in hotels abroad. In such cases the question is one of fact and degree, and must be determined on all the circumstances of the case (*Reid v IRC*, 10 TC 673). If for instance such a man is a foreigner who has never resided in this country, there may be great difficulty in holding that he is resident here. But if he is a British subject the Commissioners are entitled to take into account all the facts of the case.

To live permanently in hotels was, I think, not unusual in the 1920s. It

does not happen much now, but nowadays a house may be “not in the nature of home but a substitute for hotels”.³⁴

In *University College London v Newman*, the question was whether a student was ordinarily resident in the EU, but the case sheds light on residence as well ordinary residence:

He has put down roots nowhere. He used France “as my base for travelling.” He went from country to country, in short spells, returning again and again. His work record is spasmodic,... He was a rather aimless drifter who has spent his time in what is inelegantly but descriptively called colloquially “bumming” around Europe. He had never really settled anywhere.³⁵

Mr Newman was not ordinarily resident in England or in France, but he was ordinarily resident in the EU as all his time over 3 years was spend in one member state or another.

3.8.5 *Question of fact*

[3] the question whether a person is or is not resident in the UK is a question of fact for the Special Commissioners (*Zorab*).³⁶

3.8.6 *Duration, regularity and frequency of visits*

[4] no duration is prescribed by statute³⁷ and it is necessary to take into

34 *Cherney v Deripaska* [2007] EWCH 965 at [45] “The ‘quality’ of the use of the house is, I think, equally important. In many ways its use by Mr Deripaska resembles that of a private hotel. It is infrequent, intermittent, and generally fleeting. The house has the character of continuity and permanence; its use does not. It cannot, I think, in any normal sense of those words, be described as a ‘settled or usual place of abode’ of Mr Deripaska.”

Similarly, *Grace v HMRC* [2009] STC 213, Special Commissioners at [40].

35 The Times, 8 January 1986, accessible www.kessler.co.uk

36 This point is made in many cases, eg *Lysaght v IRC* 13 TC 511 at p.534, 536.

37 Likewise *Reid v IRC* 10 TC 673 at p.678:

“... the relation between a person and a place which is predicated by saying that a person ‘resides’ there includes inter alia the element of time, duration, or permanence, [but] that element – essential and important as it is – is not the sole criterion. ... one of the parties maintained that the element of time was so important as to dwarf all the others into insignificance; but I think the Lord Advocate rightly contended that the facts of the relation between a person’s life and the place in

account all the facts of the case; the duration of an individual's presence in the UK and the regularity and frequency of visits are facts to be taken into account;

Similarly in *Lysaught*:

My Lords, I think it is the shortness of the aggregate time during which Mr. Lysaght is here that constitutes the principal, though by no means the only point in his favour, but the question of a longer or a shorter time, like other questions of degree, is one peculiarly for the Commissioners. I do not say that time might not be so short, or again so long, as to make it right to hold, no matter what other evidence there was, that, as the case might be, there was either no evidence of residence or that the evidence was all one way in favour of it, but these questions are not before us.³⁸

Similarly in *Reid*:

In the *Wemyss* case, as here, one of the parties maintained that the element of time was so important. as to dwarf all the others into insignificance; but I think the Lord Advocate rightly contended that the facts of the relation between a person's life and the place in which part of it is spent may contain elements of quality, connected with the person's mode of life, and so on, which are equally relevant for consideration as the element of time, or the durability of the relation.³⁹

3.8.7 Birth, family and business ties

[5] also, birth, family and business ties, the nature of visits and the connections with this country, may all be relevant (*Zorab; Brown*).

3.8.8 Living accommodation

[6] in general the availability of living accommodation in the UK is a factor to be borne in mind in deciding if a person is resident here

which part of it is spent may contain elements of quality, connected with the person's mode of life, and so on, which are equally relevant for consideration as the element of time, or the durability of the relation."

38 Viscount Sumner in *Lysaught v IRC* at p528.

39 *Reid v IRC* 10 TC at p.679.

(*Cooper*) (although that is now subject to [s.831(1)[B] ITA]).⁴⁰

3.8.9 *Dual residence and foreign home*

[7] the fact that an individual has a home elsewhere is not decisive, because a person may be dual resident (*Cooper* and *Levene*).

However this may be a relevant factor (particularly if the home elsewhere is much more important).⁴¹

Viscount Cave considered dual residence in *Levine*:

But a man may reside in more than one place. Just as a man may have two homes – one in London and the other in the country – so he may have a home abroad and a home in the UK, and in that case he is held to reside in both places and to be chargeable with tax in this country. Thus, in *Cooper v Cadwalader* (5 TC 101) an American resident in New York who had taken a house in Scotland which was at any time available for his occupation, was held to be resident there, although in fact he had only occupied the house for two months during the year; and to the same effect is the case of *Loewenstein v de Salis* (10 TC 424).

3.8.10 *Difference between arrivers and leavers*

[8] there is a difference between the case where a British subject has established residence in the UK and then has absences from it (*Levene*) and the case where a person has never been resident in the UK at all (*Zorab*).⁴²

40 See 3.6 (Accommodation in the UK).

41 In *Gaines-Cooper* the Special Commissioners took a different view: “the fact that an individual has a home elsewhere is of no consequence.” But that view was tactfully (and correctly) rejected in *Grace v HMRC* in the Court of Appeal at [8]: “the proposition that a home elsewhere is of no consequence is not to be understood as meaning that the other home is entirely irrelevant to the necessary enquiry[!]. That would be inconsistent with the obligation to take into account all the facts of the case.”

42 This passage (apart from [7]) is a quote from *Gaines-Cooper v HMRC* [2007] STC (SCD) 23 at [165]. That passage was an almost verbatim quote from *Shepherd v IRC* 78 TC 389 at [58] (Special Commissioner). The references are to *Levene v IRC* 13 TC 486; *IRC v Zorab* 11 TC 289; *Bayard Brown v Burt* 5 TC 667; *Cooper v Cadwalader* 5 TC 101.

3.8.11 *Distinct break*

(xiii) Where a person has had his sole residence in the UK he is unlikely to be held to have ceased to reside in the UK (or to have “left” the UK) unless there has been a definite⁴³ break in his pattern of life: *Re Combe* 17 TC 405.

In *R (oao) Davies and Gaines-Cooper v HMRC* the Supreme Court comment on this:

20. [... in order to become non-resident in the UK] the ordinary law requires the UK resident to effect a distinct break in the pattern of his life in the UK. The requirement of a distinct break mandates a multifactorial inquiry. In my view however ... “severance of social and family ties” pitch the requirement, at any rate by implication, at too high a level. The distinct break relates to the pattern of the taxpayer’s life in the UK and no doubt it encompasses a substantial loosening of social and family ties; but the allowance, to which I will refer, of limited visits to the UK on the part of the taxpayer who has become non-resident, clearly foreshadows their continued existence in a loosened form. “Severance” of such ties is too strong a word in this context.

It seems to me that to enquire whether a (former) UK resident has effected a distinct break is just another way of enquiring whether the individual has ceased to be UK resident, so that “distinct break” is not so much a factor in determining residence but a paraphrase of the residence question: any factor relevant in determining whether a person is resident in the UK may be taken as relevant in determining whether a person has made a distinct break. *Barrett v HMRC* is a tribunal case of no importance to the law of residence, but the way in which it approaches the distinct break issue proves this point:

48. I consider that this is not a ‘distinct break’ case. I have considered all the circumstances in reaching this conclusion. However, I have been particularly influenced by the following factors though none of them is determinative and must be viewed in the context of all the circumstances and evidence.

a. Mr Barrett continued to be employed by CMO under the contract of

43 In this context “definite” break and “distinct” break are synonymous.

employment. I do not consider ... full time employment or business abroad was involved here.

b. Mr Barrett seems to have been doing much what he was doing before. ... His work did not change. He had worked abroad before ...

c. Mr Barrett did not establish a permanent home abroad. .

d. He did not establish an 'HQ' abroad.

e. His partner and family continued to be in the UK in the family home where they still live. His family ties were here.

f. He paid the UK bills from his UK accounts. He did not make special financial arrangement for his time abroad (such as bank account, credit card, medical insurance etc). He maintained and used his UK bank accounts and credit cards.

g. No special arrangements seem to have been made as to his car, driving licence,⁴⁴ residence permits, foreign identity card or similar matters.

h. His 'centre of vital interests' remained in the UK.

i. I found the lack of certainty as to when he went abroad surprising if it was a distinct break in the pattern of his life. ...

j. The 'diary' does not evidence a distinct break. ...

k. Mr Barrett showed none of the attributes that one would expect of a non-resident or of a person in the pattern of whose life there had been a distinct break.⁴⁵

(On the basis of the above, together with the fact that Mr Barrett was found to have spent about 50 days in the UK, UK residence seems the only possible conclusion, and the Commissioner so found.)

3.8.12 *Presence must be voluntary*

(xi) Although residence must be voluntarily adopted, a residence dictated by the exigencies of business will count as voluntary residence: *Lysaght v IRC* 13 TC 511.

The "voluntary" requirement does not have much practical role to play, as

44 In fact it is not necessary to notify the UK Driver and Vehicle Licensing Agency of a change of address when moving to live abroad. However the local driving licence authorities may have their own requirements.

45 [2008] STC (SCD) 268 at [48].

it only concerns imprisoned, kidnapped or shipwrecked taxpayers.⁴⁶

3.9 Case law: ordinary residence

There are no statutory provisions on ordinary residence so case law is all we have. Since the statutory provisions on residence are entirely unhelpful, this is no bad thing.

The leading case is *R v Barnet LBC ex p Shah*.⁴⁷ This is not a tax case but the expression “ordinary residence” has its natural and ordinary meaning which is the same in tax and non-tax contexts.⁴⁸

In *Shah* the House of Lords noted that ordinary residence was distinct from domicile and rejected a “real home” test (which was similar to a domicile test).

What is the test? A number of dicta were approved, saying more or less the same thing in different words:

I think that [ordinary residence] connotes residence in a place with some degree of continuity and apart from accidental or temporary absences.⁴⁹

“Ordinarily resident” refers to a man’s abode in a particular place or country which he has adopted voluntarily and for settled purposes as part of the regular order of his life for the time being, whether of short or long duration.⁵⁰

The important requirement is the residence must have the degree of continuity, or in other words, it must be “for settled purposes.” What does that mean?

There must be a degree of settled purpose. The purpose may be one; or

46 “The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor as to negative the will to be where one is.” *Shah* at p.344.

47 [1983] 2 AC 309. The case is noteworthy for the fact that oral argument over the two words “ordinarily resident” lasted 9 days.

48 *Shah* at p.340.

49 *Shah* at p.341 citing Viscount Sumner in *Lysaght v IRC* 13 TC 511 at p.528

50 *R v Barnet LBC ex p. Shah* [1983] 2 AC 309 at p.343. This passage has often been cited with approval.

there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the “propositus” intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled.⁵¹

3.9.1 *Accommodation*

Turberville at [9] notes that accommodation held long term is consistent with being non-ordinarily resident:

We consider the retention of the house and flat in the UK as fairly neutral; he had retained these (or predecessor properties) throughout the time he was working abroad.

Accommodation is however a relevant factor in deciding whether a person is “settled”.

3.9.2 *Minimum period before acquiring ordinary residence*

One would have thought that if a person settled in a country, they became ordinarily resident immediately. This is the view expressed in IR20 and HMRC6.

In *Tuczka v HMRC* [2011] UKUT 113 (TCC) however the Upper Tribunal suggested that there was a minimum time (though the minimum is not very long):

12. ...After referring also to the dicta in the tax cases, Lord Slynn concluded that it was “plain that as a matter of ordinary language a person is not habitually resident in any country unless he has taken up residence and lived there for a period.” Lord Slynn continued (at 1942G-1943B):

“It seems to me impossible to accept the argument at one time advanced that a person who has never been here before who says on

⁵¹ *Shah* at p.344.

landing, "I intend to settle in the United Kingdom" and who is fully believed is automatically a person who is habitually resident here.

Nor is it enough to say I am going to live at X or with Y. He must show residence in fact for a period which shows that the residence has become "habitual" and, as I see it, will or is likely to continue to be habitual...

The requisite period is not a fixed period. It may be longer where there are doubts. It may be short (as the House accepted in *In re S (A Minor) (Custody: Habitual Residence)* [1998] A.C. 750, my speech at p. 763A, and *In re F (A Minor) (Child Abduction)* [1992] 1 FLR 548, 555, where Butler-Sloss L.J. said: "A month can be ... an appreciable period of time")."

13. Even assuming for the purpose of argument that "habitually" and "ordinarily" mean the same thing, we do not regard *Nessa* as in any way departing from Lord Scarman's clear rejection of any requirement to establish an intention to reside permanently or for an indefinite period.

All that *Nessa* established in that regard is that a person would not qualify as "habitually resident" immediately on arrival, save in a case where he resumed his previous habitual residence. Some period of time is therefore needed to establish "habitual residence". But the fact that this period need not be long can be seen not only from Lord Slynn's reference to the observation of Butler Sloss LJ quoted above but from the resolution of the *Nessa* case itself. The House of Lords upheld the decision of the Court of Appeal that the case be remitted for rehearing before a social security appeal tribunal to determine whether the claimant had established habitual residence by the date of the initial tribunal hearing (ie, 6 December 1994, and thus less than four months after her arrival in the United Kingdom) or "even earlier": see at 1943D.

This overlooks the fact that the question of ordinary residence is determined with an element of hindsight: see 3.10 (The relevant period of investigation). It is considered that there is no minimum period.

3.9.3 *Intention*

In *Shah*, Lord Scarman said:

There are two, and no more than two, respects in which the mind of the "propositus" is important in determining ordinary residence. The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor

as to negative the will to be where one is.

I have already discussed “voluntarily.” The speech continues:

And there must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled. The legal advantage of adopting the natural and ordinary meaning, as accepted by the House of Lords in 1928 and recognised by Lord Denning M.R. in this case, is that it results in the proof of ordinary residence, which is ultimately a question of fact, depending more upon the evidence of matters susceptible of objective proof than upon evidence as to state of mind. Templeman L.J. emphasised in the Court of Appeal the need for a simple test for local education authorities to apply: and I agree with him. The ordinary and natural meaning of the words supplies one. For if there be proved a regular, habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences, ordinary residence is established provided only it is adopted voluntarily and for a settled purpose.

In *Tuczka v HMRC* [2010] UKFTT 53 the tribunal said:

The test requires objective examination of immediately past events, and not intention or expectation for the future ([1983] 2 AC 309 at 345).

It is considered that the concept of being “settled” necessarily requires an examination of intention or expectation for the future.

3.9.4 *Acquiring UK ordinary residence*

In *Tuczka v HMRC* [2011] UKUT 113 (TCC) the taxpayer came to the UK to work and intended to stay 33 months (2.5 years). There were other facts which suggested he was settled, in particular that his girlfriend came to join him.

It was argued that an intention to reside here for that period was too short to constitute a “settled purpose”. The argument was rejected. Even a period of just over one year could be sufficient.⁵²

3.9.5 Losing UK ordinary residence

In *Turberville v HMRC* [2010] UKFTT 69 the taxpayer left the UK in July 2001 to work abroad. The taxpayer remained ordinarily resident until July 2001 even though he had formed the intention to leave earlier, in February 2001:

8. In relation to 2001-02, while it was clear in February 2001 that he would go to Dallas in July 2001 we do not consider that this changes the quality of his residence between 6 April 2001 and 30 June 2001, which was a continuation of his residence during the previous four tax years. Although it was then known that such residence would cease about 1 July 2001 it was nevertheless part of his residence for settled purposes and the fact that the Appellant’s state of mind was such that he would be leaving the UK at around that time does not, until his actual departure, alter the position.

In July 2001 the taxpayer ceased to be ordinarily resident, though since he was ordinarily resident during part of the tax year 2001/02, he was described as ordinarily resident “for” that year.

In October 2001 the taxpayer unexpectedly lost his job, but remained non-ordinarily resident. The judgment at [8] continues:

From the date of actual departure, we consider that in deciding whether there was then a distinct break one should look at the position as it was in July 2001 without the benefit of hindsight. The three-year employment contract coupled with his expenditure on furnishing the apartment rented by his employer point to a distinct break.

In the absence of purchase of accommodation, three years has traditionally been regarded as the period of residence which is sufficient to amount to settled.

52 At [17] citing relying on *Reed v Clark* quoted at [15]; but *Clark* was not considering ordinary residence of the taxpayer (which was not an issue).

3.9.6 *Habitual residence and ordinary residence compared*

“Habitual residence” is a concept often used in non-tax legislation (the term is never found in tax legislation).

If the concept was the same as “ordinary residence” then cases which gave clear guidance on habitual residence might be valuable for tax. Unfortunately this line of enquiry leads nowhere.

It is considered that the terms habitual residence and ordinary residence should be regarded as synonymous and the House of Lords have so held.⁵³ The natural meaning of the two expressions is the same (or at least, equally vague in each case) and there is really no place or need for two separate concepts. However the point was not fully argued and the case law is not entirely consistent. Some cases suggest that habitual residence is “something more than” ordinary residence,⁵⁴ though that “something more” is elusive. It has also been said that the concepts merely share a “common core of meaning”.⁵⁵

In any case, the authorities on “habitual residence” do not provide a clear definition of the term.⁵⁶

3.9.7 *Residence and ordinary residence compared*

Tuczka has significantly reduced the difference between residence and ordinary residence or (if one prefers) it shows that the difference is not as great as had generally been thought:

[18] Nor is it correct to suggest that a finding that Dr Tuczka was ordinarily resident in the United Kingdom in the tax year 1998-99 erodes a fundamental distinction between the concepts of residence and ordinary residence. The distinction is not as wide or as basic as the present appellant seeks to suggest. Hence, in *Levene*, Viscount Cave LC stated at p507:

“The expression “ordinary residence” is found in the Income Tax Act of 1806 and occurs again and again in the later Income Tax Acts, where it is contrasted with the usual or occasional or

⁵³ *Mark v Mark* [2006] 1 AC 98 at [33].

⁵⁴ *Cruse v Chittum* [1974] 2 All ER 940 at p.943.

⁵⁵ *Nessa v Chief Adjudication Officer* [1999] 1 WLR 1937 at p.1941.

⁵⁶ Habitual residence is a question of fact to be determined by the circumstances of each case: *Re M* [1993] 1 FLR 495.

temporary residence; and I think that it connotes residence in a place with some degree of continuity and apart from accidental or temporary absences. So understood, the expression differs little in meaning from the word “residence” as used in the Acts...”

Unless the courts step back from this, HMRC6 is more generous than the law on the subject, a state of affairs which may not survive the next edition of HMRC6 (but statutory reform is likely to address the issue.)

3.10 Period for enquiry into residence

In *Levene* Viscount Sumner said:

It is suggested that the Commissioners misdirected themselves in point of law, because they took into account, with regard to the earlier years, conduct which only occurred subsequently. I agree that the taxpayer’s chargeability in each year of charge constitutes a separate issue, even though several years are included in one appeal, but I do not think any error of law is committed if the facts applicable to the whole of the time are found in one continuous story. Light may be thrown on the purpose with which the first departure from the UK took place, by looking at his proceedings in a series of subsequent years. They go to show method and system and so remove doubt which might be entertained if the years were examined in isolation from one another.⁵⁷

This was followed in *Hankinson v HMRC*:

We accept that the present case involves the consideration of liability in respect only of one year of assessment. However, we consider that the approach referred to by Viscount Sumner, of taking more than one year’s circumstances into account, is of assistance in reviewing a case where the liability in question arises by reference to a single year of assessment. There is a degree of artificiality in confining the examination to that single year where (as will almost always be the position, and was the case here) departure from the UK is likely to have occurred during the latter part of the preceding year of assessment. Further, it is clear from such cases as the decision of the Special Commissioners in *Gaines-Cooper* [2007] STC (SCD) 23, in particular at paragraph 166, that cultural, family and social connections over a

⁵⁷ 13 TC 486 at p.501.

longer period are relevant to the question whether an individual is resident for tax purposes in the UK, and similarly to the question whether he is ordinarily resident in the UK.⁵⁸

This contributes to the enormously lengthy (and therefore expensive) nature of litigation on residence issues. *Hankinson*, for instance, took 10 days before the tax tribunal. The reader is invited to speculate as to the costs of that appeal, or any residence appeal, and whether a system which incurs such costs is defensible.

3.11 Non-residence motivated by tax considerations

In *Reed v Clark* the taxpayer had carefully organised his year abroad to reduce his tax liability but that was irrelevant:

Residence abroad for a carefully chosen limited period of work there ... is no less residence abroad for that period because the major reason for it was the avoidance⁵⁹ of tax. Likewise with ordinary residence.⁶⁰

3.12 Commentary: Assessment of case law tests

The case law is bluntly but accurately summarised by Malcolm Gunn:

Residence is a question of fact. There are very few rules. Cases are decided as and when they arise, and without much reference to any other previous decision. The decisions might well conflict with each other but that's just tough luck and there is nothing anybody can do about it.⁶¹

58 [2009] UKFTT 384 at [31]

59 Nowadays one should use the term “mitigation” rather than “avoidance” here, see 31.7 (“Avoidance”, “mitigation”, “tax reduction”, “evasion”: introduction). Contrast the Special Commissioner in *Shepherd v IRC* 78 TC 389 at [62]: “Although the Appellant’s intention in going to Cyprus was to *mitigate* tax, I do not regard that as a relevant factor in deciding whether he was resident in the UK.”

60 58 TC 528 at p.556.

61 *Taxation*, 3 December 1992, Vol 130, p.234. Lord Clyde made the same point in *Reid v IRC* 10 TC 673: “The expression ‘resident in the UK’ and the qualification of that expression implied in the word ‘ordinarily’ so resident are just about as wide and general and difficult to define with positive precision as any that could have been used. The result is to make the question of law become (as it were) so attenuated, and

Viscount Sumner made the point judicially in *Levine*:

The words “resident in the UK”, “ordinarily” or otherwise, and the words “leaving the UK for the purpose only of occasional residence abroad”, simple as they look, guide the subject remarkably little as to the limits within which he must pay and beyond which he is free. This is the more likely to be a subject of grievance and to provoke a sense of injustice when, as is now the case, the facility of communications, the fluid and restless character of social habits, and the pressure of taxation have made these intricate and doubtful questions of residence important and urgent in a manner undreamt of by Mr. Pitt, Mr. Addington or even Sir Robert Peel. The Legislature has, however, left the language of the Acts substantially as it was in their days, nor can I confidently say that the decided cases have always illuminated matters. In substance persons are chargeable or exempt, as the case may be, according as they are deemed by this body of Commissioners or that to be resident or the reverse, whatever resident may mean in the particular circumstances of each case. The tribunal thus provided is neither bound by the findings of other similar tribunals in other cases nor is it open to review, so long as it commits no palpable error of law, and the Legislature practically transfers to it the function of imposing taxes on individuals, since it empowers them in terms so general that no one can be certainly advised in advance whether he must pay or can escape payment.⁶²

This is recognised in other contexts. In *Sifton v Sifton* a beneficiary had an interest under a trust “so long as she shall continue to reside in Canada”. The condition was void for uncertainty!

The majority of the Court of Appeal have found themselves unable to give any more precise direction than that the appellant may leave Canada for a limited period and for a purely temporary purpose, without being able to define either the word “limited” or the word “temporary.” ... the questions [in short, when would the appellant be resident in Canada?] do not at present admit of categorical answers. ... But if the appellant’s interest under the will is to be forfeited upon her “ceasing to reside in Canada,” she has a right to have those questions categorically

the field occupied by the questions of fact become so enlarged as to make it difficult to say that a decision arrived at by the Commissioners with respect to a particular state of facts held proved by them, is wrong.”

⁶² *Levene v IRC* 13 TC 486 at p.502.

answered; and inasmuch as they cannot be so answered, the words... are void for uncertainty.⁶³

3.13 Dual residence/dual ordinary residence

HMRC6 para 1 provides:

Even if you are resident (or ordinarily resident) in another country you may also be resident (or ordinarily resident) in the UK. This is sometimes referred to as dual residence.⁶⁴

Similarly HMRC6 para 8 provides:

You will **not** cease to be resident in the UK simply because you become resident elsewhere. You can become resident in another country and remain resident in the UK.

This is soundly based on case law: see 3.8 (Case law on residence).

Similarly for ordinary residence. HMRC6 provides:

3.2 ... You can be ordinarily resident in the UK and, at the same time, be ordinarily resident in another country

This is soundly based on comments in *Shah*.⁶⁵

3.14 Ordinary resident but not resident

A question arises whether an individual can be ordinarily resident in the UK but not resident. The natural meaning of the words suggests not, and *Levene* seems to confirm this:

63 [1938] AC 656 at p.665.

64 Similarly, EIM para 42820 provides:

“An individual can be resident and ordinarily resident in more than one country at the same time. The fact that an individual might prove to be resident or ordinarily resident elsewhere does not mean that they will be neither resident nor ordinarily resident in the UK.”

65 *R v Barnet LBC ex p. Shah* [1983] 2 AC at p.342; the point had already been made in *Reid v IRC* 10 TC 673 at p.680, 682.

I find it difficult to imagine a case in which a man while not resident here is yet ordinarily resident here.⁶⁶

However, the CGT legislation is clearly drafted on the basis that this is possible. Section 2(1) TCGA provides:

... a person shall be chargeable to CGT in respect of chargeable gains accruing to him in a year of assessment during any part of which he is resident in the UK, *or* during which he is ordinarily resident in the UK.

The drafter of these words (often copied into other contexts) clearly assumed it was possible to be ordinarily resident but not resident. This is supported by *Gaines-Cooper v HMRC*:

190. ...We are also of the view that the appellant would still be ordinarily resident in the UK even if there were an occasional year when he was not resident here.⁶⁷

In *Grace v HMRC*⁶⁸ the Special Commissioner reached a compromise view. It is possible to be ordinarily resident and non-resident, but it does not happen much if at all in practice:

If an individual is not resident in the UK, then it is difficult to find that he is ordinarily resident here.⁶⁹

3.14.1 *HMRC view(s)*

HMRC6 provides at para 3.2:

It is also possible (but unusual⁷⁰) to be not resident in the UK but remain

66 13 TC 485 at p.507. Likewise Viscount Sumner in *Lysaght v IRC* 13 TC 511 at p.518 clearly assumes that one must be resident in order to be ordinarily resident.

67 [2007] STC (SCD) 23 at [190].

68 [2009] STC 213 Special Commissioners at [48].

69 The point was not considered on appeal.

70 This is different from the 2009 version of HMRC6 which provided:

“In *exceptional* circumstances you may be not resident but still ordinarily resident in the UK. *This is very rare.*”

Presumably HMRC now wish to be able to argue that some of their non-resident

ordinarily resident here.⁷¹

The only case which HMRC cite is that of a person who spends a year travelling abroad, as to which see 3.22 (Year travelling abroad).

Similarly, the Residence Consultation Paper refers to “the very few people who are ordinarily resident but not resident”.⁷²

If (which I doubt) it did arise in practice that a person was non-resident but ordinarily resident in the UK, it would play havoc with the system of foreign tax credit relief. The individual would not usually be subject to income tax as that usually requires residence. But CGT is charged on an individual who is ordinarily resident even though not resident. The INT Manual points out the difficulty and (perhaps) coyly suggests that the matter is dealt with by quiet concession:

169050. Not resident but ordinarily resident [January 2011]

A person who is not resident in the UK is chargeable to Capital Gains Tax on chargeable gains accruing to him in a year of assessment if he is ordinarily resident in the UK (Section 2 TCGA 1992). Strictly, no foreign tax credit relief is due (either under a treaty or unilaterally), because the person concerned is not resident in the UK. If a claim to tax credit relief is made in these circumstances, the case should be submitted to the Offshore Personal Tax Team (part of Charity, Assets & Residence).

customers are ordinarily resident, and did not want HMRC6 to be cited against them.

71 HMRC6 makes the same point at 3.1: “Even if you are not resident in the UK, you may be ordinarily resident, ...”.

SA109 Notes 2008 formerly provided:

“Were you resident in the UK in the year to 5 April 2008?

If ‘NO’, you are not ordinarily resident in the UK. Put ‘X’ in box 2. [Box 2 states that the individual is not ordinarily resident].”

In 2009 the form changed. SA109 Notes 2009 provides:

Were you resident in the UK in the year to 5 April 2009? Yes No

If ‘No’, you are *likely* to be not ordinarily resident in the UK. Put ‘X’ in box 2. [Box 2 states that the individual is not ordinarily resident so the instruction which made sense before does not make altogether good sense.]

In SA109 notes 2010 the guidance was removed altogether; this can now be seen as an anticipation of the HMRC6 change of view.

72 HM Treasury, *Statutory Definition of Tax Residence: a Consultation* (June 2011) para 6.28.

3.15 HMRC practice before 2008/09: IR20

3.15.1 *Practice prior to 1936*

The topic of residence was considered by the Income Tax Codification Committee (1936), a committee including all the leading UK tax figures of the day. The Committee criticised the statute law. It was “remarkable” that the Income Tax Acts afforded no greater assistance in the solution of the problem than the statutory residence rules (now in ss 829–832 ITA 2007) which are “of limited application”. Nothing has changed.

The Committee also criticised the case law: “Nor are the decisions of the Courts very helpful.” Nothing has changed there either. The two House of Lords cases which governed the position back then (*Lysaght*, *Levine*) continue to do so now. Residence is now, as it was then, “a question of fact, on which the decision of the Commissioners before whom the matter comes on appeal is final unless the Courts decide that there was no evidence on which the Commissioners could properly have come to the conclusion at which they arrived”. The Committee concluded:

the present state of affairs, under which an enquirer can only be told that the question whether he is resident or not is a question of fact for the Commissioners but that by the study of the effect of a large body of case law he *may* [emphasis added] be able to make an intelligent forecast of their decision, is intolerable and should not be allowed to continue.⁷³

3.15.2 *Practice from 1936 to 2008/09*

The situation did not continue, though the change was not the one that the Committee asked for. The Committee reported that in the 1930s “no one subject which arises in the application of the Income Tax Acts has been more prolific of dispute than the question of the meaning of residence in the UK”. This was “in no way surprising” given the state of the law. However, immediately after (no doubt as a result of) the Codification Committee report, the position in this respect changed completely. For sixty years – from 1936 until *Shepherd v IRC* in 2006 – there were virtually no reported cases on residence, the only important exception being *Reed v Clark*. The topic of residence ceased to be “prolific of

⁷³ Income Tax Codification Committee Report Cmd.5131 pp.34–39.

dispute”. The reason was that the Revenue published guidance was understood to provide most of the bright line guidance which was needed, although the general tax law did not. From 1977 – 2009 the guidance was in IR20, though the basis of that guidance was already formulated in 1936 and is set out in the Codification Committee report.

In the 2007/08 edition of this work I noted some objections to the practice set out in IR20:

The first set of objections is constitutional ... The rules in IR20 – if they are worth the paper they are written on – are best regarded as tertiary legislation. Although IR20 purports to state the law on residence, it has only a tenuous connection with the law declared by Parliament and applied in the Courts. IR20 was issued without statutory authority. One consequence of this is that IR20 has been issued without the parliamentary scrutiny which tax legislation should receive. Nor have the rules ever been subject to public consultation. Another consequence is that appeals to the Courts are made very difficult. ... All in all, the current state of affairs (one cannot properly call it the current state of the law) is fit only for a banana republic.

The 1955 Royal Commission noted this was “unsatisfactory” and recommended reform.⁷⁴ The ill-fated 1988 Consultation Document (Residence in the UK) made proposals. More recently, STEP called for reform⁷⁵ as did the CIOT (“the law determining whether an individual is resident in the UK is a mess”).⁷⁶ The House of Lords Economic Affairs Committee agreed.⁷⁷

74 Royal Commission on Income Tax, Final Report, Cmd 9474 Chapter 14. The whole section on residence is worth reading and accessible on www.kessler.co.uk.

75 “Need for Statutory Residence Test” 23 November 2007, accessible: http://www.step.org/policy_and_technical/uk_policy/2007/step_uk_residence_test.aspx?link=contentMiddle

76 “Residence for tax purposes” 14 November 2007 accessible www.kessler.co.uk.

77 Select Committee on Economic Affairs, 2nd Report of Session 2007–08, The Finance Bill 2008, accessible www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf:

“223. We were unable to glean from officials why legislation was not included in this year’s package. They did not present the case for inclusion or against. It is disappointing that officials were less than forthcoming on this important issue.

224. We recognise that it will not be possible to include a comprehensive statutory definition of UK residence in this year’s Bill.

225. However, we think this is something which should be taken forward as rapidly

HMRC argued that they are not bound by the terms of IR20 even for the years before its revocation in 2009/10 but wisely dropped the argument before the Court of Appeal and the binding nature of IR20 (so far as it contains clear and unqualified statements) is now established. The Court of Appeal expressed itself strongly:

[IR20] sets out a limited number of specific situations in which a taxpayer will be treated as non-resident. If a taxpayer falls within the situation described by the Revenue, the Revenue has given an assurance that it will treat the taxpayer in accordance with the terms of the guidance. If a taxpayer comes, for example, within the terms of 2.2, the Revenue has given an assurance that it will treat that taxpayer as not resident and not ordinarily resident. It will not be permitted to resile from that assurance, unless and until it announces that it proposes, for the future, to alter the circumstances in which it will accept non-resident status.⁷⁸

[IR20] is the language of assurance, which the Revenue, in the interests of fair dealing, has bound itself to honour.⁷⁹

The Supreme Court does not offer a similar resounding statement of principle, but they did record:

27. The Revenue accepts first that, were it in the booklet to have made the representations about the circumstances necessary for the achievement of non-residence for which either the first appellants or the second appellant contend, such would have been within its powers; and second that, for so long as the representations remained operative, an individual would have had, and therefore have been able to enforce, a legitimate expectation that it would appraise his case by reference to them notwithstanding that they failed to reflect the ordinary law.

as possible so that Ministers are able to come to a view in good time before next year's Bill. We therefore recommend that HMT and HMRC should consult with the professional bodies over the coming months, building on the work which was done in 2003."

⁷⁸ *R oao Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [17].

⁷⁹ *R oao Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [25].

3.15.3 *The end of IR20 from 6 April 2009*

IR20 was summarily revoked on 31 March 2009, with effect from 6 April 2009, thus giving six days' notice of the new rules in HMRC6.

HMRC6 makes it clear that IR20 is dead and buried. Para 1 provides:

This guidance replaces the IR20. ... Any practices associated with the IR20 – whether overtly expressed or not – will not apply from 6 April 2009, unless provided for outside the IR20...

HMRC6 does not specify the practices which are withdrawn. HMRC Brief 17/09 mentioned “for example HMRC Brief 1/07, TB52, SP A10, SP 3/81, SP 2/91, SP 17/91.” The latter four SPs were still included in the HMRC list of SPs at 15 Feb 2011 so at that point it was still unclear whether they were withdrawn or not; but the list was finally amended, at least by 5 August 2011, and now provides that all four are “withdrawn with effect from 6 April 2009”.⁸⁰ So the position from 5 August 2011 is at last clarified, though it is an interesting question what was the position during the period that the SPs were included in the official list.

There was no transitional relief for those who might have been relying on IR20 in arranging their affairs for 2009/10. In this manner, a fundamental change to the scope of UK taxation was carried out without consultation, without parliamentary sanction, and without public discussion of any kind.⁸¹ This would not have been possible or even conceivable if the law had been on a proper statutory basis. One lesson to be learned is that constitutional fundamentals *do* matter.

The repeal of IR20 led to an explosion of tax litigation.⁸² We returned

80 Statements of Practice Issued up to 5 August 2011, accessible www.hmrc.gov.uk/practitioners/sop.pdf.

81 One cannot count the consultation issued on 15 September 2008. This gave no indication that major changes were to be made, and implied the opposite (“We recognise that the time has come for a complete rewrite to reflect changing circumstances such as increased international mobility since the IR20 was first written. We want our replacement guidance to reflect a style which meets our current guidelines, is engaging for our customers and meets the highest standards of customer service...we are not inviting comments on the legislation, HMRC policy or practice on residence and domicile issues ...”).

82 Including since the publication of HMRC6: *Gaines-Cooper, Davies, Grace, Genovese, Turbeville, Tuczka, Karim, Farquhar, Ogden, Broome, Kimber*.

to the pre-1936 position where “no one subject which arises in the application of the Income Tax Acts is more prolific of dispute than the question of the meaning of residence in the UK”. Of course anyone familiar with the Codification Committee report would find this “in no way surprising”.

There subsequently followed the decision in *R oao Davies & Gaines-Cooper*, where the Supreme Court held by 4:1, that IR20 did not in fact provide the bright line guidance which this book and many advisors had thought. IR20 was, it was said, “very poorly drafted”. But an “ordinarily sophisticated” reader should have concluded that the position of a UK resident individual looking to cease to be UK resident was this:

these general requirements in principle demanded – and might well in practice generate – a multifactorial evaluation of his circumstances on the part of the Revenue albeit subject to appeal. If invited to summarise what the booklet required, he might reasonably have done so in three words: a distinct break.⁸³

Readers may find the dissenting judgement of Lord Manse more convincing, but whether the argument of the majority is convincing or otherwise, the law is settled; fortunately statutory residence reform means that it will never have to be applied from 2013/14.

3.16 HMRC6

HMRC6 was published on 31 March 2009.⁸⁴ I refer to that as “**the 2009 version of HMRC6**”. In the 2009/10 edition of this work I predicted:

HMRC6 shows some signs of being a document prepared in haste. I infer that a decision was made to bring it out on 31 March because it could not have been published after 6 April if it was to take effect from 2009/10. One foreseeable development is a revised version of HMRC6.

⁸³ at [45].

⁸⁴ What was published was a draft and not a final version. Quite soon afterwards HMRC quietly replaced it with a revised version, more neatly laid out and with many stylistic improvements but no changes of substance as far as I could see. There was no public announcement but it seems that this was done by 17 April 2009. I infer that the unfinished draft had to be published as it needed to be in place before 6 April 2009.

This proved to be correct and a revised version was published February 2010. I refer to that as **“the 2010 version of HMRC6”**. In this manner, significant changes to the scope of UK taxation were made for the second time, without consultation or public discussion (though these changes were not on the same scale as the year before).

On about 3 November 2011 HMRC quietly revised HMRC6. Most of the changes were merely stylistic⁸⁵ but there were some minor changes of substance and nuance.

References in this book are to the current version unless otherwise stated. HMRC6 provides:

[1] HM Revenue & Customs does not consider that the latest revisions have altered the current position in most cases.

[2] However you can continue to use the wording in the previous version of HMRC6 for any tax liability that arises before 5 April 2011.⁸⁶

Point [1] correctly recognises that there are some significant changes in the new HMRC6. The archive on *www.kessler.co.uk* contains track change versions identifying the changes made in February 2010 and November 2011.

HMRC say:

The guidance [HMRC6] is aimed at unrepresented individuals.⁸⁷

There are in fact two aspects of HMRC6 (as there were for IR20). The first is a (relatively) brief guide to taxation generally. This is for unrepresented individuals, and professionals will not find it of interest. The second is a guide to residence and ordinary residence. This is vital to professionals (as was IR20) for at present it is the closest there is to an HMRC guide to the meaning of these terms. Further guidance was promised but that will probably be overtaken by statutory reform.

85 Those interested in such matters may note that “occasions” has become “times”; “consider” becomes “think;” “issue” becomes “send”; “obtain” becomes “get”.

86 Page 1 (there is no para no).

87 Replacement Guidance on Residence and Domicile – Feedback published 31 March 2009 accessible *www.hmrc.gov.uk/cnr/feedback.pdf*.

3.16.1 *HMRC6: who determines the issue of residence*

HMRC6 para 2 provides:

It is important that you understand what *we* mean by “resident in the UK” because this will determine what UK tax you have to pay.

Constitutionally, the question is what *Parliament* means by “residence” and not what HMRC mean. The (unnamed) authors of HMRC6 may think the distinction pedantic. The rule of law requires a system where taxpayers or their advisors can work out for themselves whether they are resident. Is this so obvious that it goes without saying?

3.16.2 *Is HMRC6 binding?*

One of the issues in *Davies and Gaines-Cooper* was whether IR20 is binding, ie, whether HMRC are free to disregard its content. It appears that HMRC wished to leave themselves free to argue against HMRC6. HMRC6 section 1 provides:

This guidance outlines our (HM Revenue & Customs) application and interpretation of legislation and case law. The material is provided for your guidance. It sets out the main factors that are taken into account based on the rulings of the courts. Whether any section of this general guidance is applicable to you depends on your particular facts, as each set of circumstances will be different. It also seeks to give practical examples of what the relevant law means; these are only illustrative examples.

Any practices described in this guidance are subject to periodic review and may subsequently be altered or withdrawn. If practices were to be changed or revoked this would not normally be done retrospectively.... This guidance will tell you the main factors to take into account when deciding your residence, ordinary residence and domicile status, and the potential consequences for your UK tax position. It is general guidance which is designed to help you reach a decision yourself. Depending on your circumstances this might not be straightforward and our guidance may not cover all of the issues which affect you.

I infer that the wording was drafted with one eye firmly on possible successor litigation to *Davies and Gaines-Cooper* even though HMRC6 contains far less clear guidance than IR20. However in that case HMRC lost so heavily on the issue that where unqualified statements in HMRC6 do occur, they will be binding on HMRC notwithstanding all the disclaimers. When HMRC argued in *Gaines-Cooper* that they were free to change their published practice retrospectively, the Court of Appeal were rightly outraged and HMRC wisely dropped the argument in the Supreme Court.⁸⁸ The HMRC position now is to say that they would not “normally” do so. That should still be a matter of public concern, as the word “normally” might mean little or much; but there it is.

3.16.3 *HMRC6: types of residence*

HMRC6 divides residence into various categories. Leaving aside the 183 day rule, the primary distinction is between:

- (1) those leaving the UK (“leavers”); and
- (2) those coming to the UK (“arrivers”).

These are subdivided as follows:

- (1) *Leaving the UK* is divided into three understandable categories:
 - (a) full-time workers abroad;
 - (b) permanent or indefinite leavers;
 - (c) the “year settled abroad” category.
- (2) *Coming to the UK* is divided in a more confusing way:
 - (a) the three years in the UK practice;
 - (b) remaining two years in the UK practice;
 - (c) visitors to the UK.

3.16.4 *HMRC6: connections to the UK*

HMRC6 para 2.2 provides:

You can also be resident in the UK if you are present here for fewer than 183 days in a tax year. This will depend on how often and how long you are here, the purpose and pattern of your presence and your connections to the UK. These might include the location of your family, your

⁸⁸ See 3.15.2 (Practice from 1936 to 2008/09).

property, your work life and your social connections.

The passage goes on to list relevant connections but starts with a disclaimer:

The following are examples, but they are not a complete list. These and any other relevant factors must all be considered together to give a complete picture.

The list is as follows:

- Family ties include having a spouse, civil partner, children or other family members you are close to, in the UK.
- Social ties include membership of clubs and societies and events that you regularly attend or host. It also includes any regular recreational engagement, such as returning each year for an annual sporting season.
- Business ties include owning or being a director of a business based in the UK, or having employment, including self-employment, in the UK. Regular employment duties in the UK are a tie and you need to consider the extent, frequency and nature of those duties. It does not matter if the duties themselves are not taxed, for example because of a DTA.
- Property ties include a house or apartment that you own or lease, or property held primarily for investment but that also provides you with accommodation when you are in the UK. A house or apartment provided for your use for the duration of your time in the UK as part of an employment package is ‘available accommodation’ and is a tie to the UK.
- If you think you may just be visiting the UK then part 7 will help you consider the pattern of your visits, but you must also consider the purpose of those visits. For instance, a short term one-off employment assignment to complete a project for a foreign employer might not in itself make you resident. But if you repeatedly come to the UK for regular business meetings then your visits have a non-temporary purpose. You need to look at the frequency of those visits alongside your other ties to the UK.

If the nature and degree of your ties to the UK show that it is usual for you to live in the UK, you are resident in the UK. It does not matter whether you live here for employment, leisure, or just because you like being in the UK.

3.17 The 183-day rule

HMRC6 adopts the 183 day rule:

2.2 ... The only occasion when the number of days that you are physically present in the UK will determine your residence status is when you are here for 183 days or more during a tax year. If you are here for 183 days or more in a tax year, you are resident in the UK. **There are no exceptions to this.**

This has a sound basis in the statutory 183-day rule.⁸⁹

3.18 Short absences

Para 8.1 HMRC6 2009 version provided:

If you normally live in the UK and go abroad for short periods – for example on holidays and business trips – you will continue to be resident here. This type of short absence from the country does not affect your UK residence and ordinary residence position.

This was obviously correct. It had a sound basis either in the ordinary meaning of “residence”⁹⁰ or perhaps in the occasional residence abroad rule. The current version of HMRC6 extends the point beyond short absences:

8.2 Leaving the UK for shorter periods of time

You will still be treated as resident in the UK if any periods of time you spend outside the UK are for occasional residence abroad only. Occasional residence means you have no settled purpose for a continuing absence from the UK. ‘Occasional’ does not mean that your absence must be isolated or of short duration. A series of business trips abroad is an example of periods of occasional residence abroad.

If you normally live in the UK and go abroad regularly, for example on extended holidays, you will continue to be resident here. This type of absence does not stop you being resident and ordinarily resident in the UK, because you have not made a definite break from the UK.

⁸⁹ See 3.3 (Temporary UK purpose and 183-day rules).

⁹⁰ See the passage from *Levene* set out at 3.8 (Case law on residence).

3.19 Full-time work abroad

HMRC6 para 8.5 provides:

8.5 Leaving the UK to work abroad as an employee

If you are leaving the UK to work abroad full-time, you will only become not resident and not ordinarily resident from the day after the day of your departure, as long as:

- you are leaving to work abroad under a contract of employment for at least a whole tax year
- you have actually physically left the UK to begin your employment abroad and not, for example, to have a holiday until you begin your employment
- you will be absent from the UK for at least a whole tax year
- your visits to the UK after you have left to begin your overseas employment will
 - total less than 183 days in any tax year, and
 - average less than 91 days a tax year...

I refer to this as “**the full-time work abroad practice**”. The main points of this practice have survived from IR20 though some details have changed.

One change concerns holidays. Under HMRC6, if the employee goes on holiday before work starts, they are still UK resident until work starts. I find that rule bizarre, but there it is.

In *Davies and Gaines-Cooper*, the taxpayer left the UK in March 2001 but did not start full-time employment abroad until after 6 April. The Court of Appeal said:

In my view, properly construed, [IR20] 2.2 does not entitle a person to non-resident status ... unless he leaves to work full-time either before or by the start of a tax year, in the instant case by 6 April 2001. To come within 2.2, a taxpayer must leave for and remain in full-time employment throughout the relevant tax year. Full-time employment throughout any subsequent tax years does not affect the date when a taxpayer first attained non-resident status; that date is determined by reference to the date the taxpayer left to work full-time abroad.⁹¹

⁹¹ *R oao Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [33].

The Supreme Court took the same view.⁹² This interpretation seems surprising to me (and it never occurred to the inspector of taxes who dealt with the case) but the position is settled. The same will apply to the HMRC6 para 8.5 which is similarly worded. The Court of Appeal did more helpfully state:

In [IR20] 2.2, it is not enough that the taxpayer has left the UK, he must have left to work full-time. Absence is not sufficient, it must be absence whilst engaged on full-time employment for at least a whole tax year. No more is, however, required. The absence need be neither permanent nor indefinite. Accordingly, ... there is no requirement, under 2.2, for a taxpayer to demonstrate that he has severed family and social ties within the UK. The Revenue accepts that the taxpayer need do no more than establish that he has left the UK for full-time employment abroad, and that the employment has continued throughout the relevant tax year. There is no need to be concerned with any persisting social or family ties in the UK, unless those ties themselves cast doubt on whether the employment is genuinely full-time.⁹³

The same will apply to HMRC6.

3.19.1 *Meaning of “work full-time abroad”*

There are two requirements here: the work must be:

- (1) “full-time” and
- (2) “abroad”.

The term “full-time” is explained in HMRC6 para 8.5:

What we mean by *full-time employment*:

UK tax law does not give a definition of *full time employment*. The decision on whether or not you are employed abroad full-time will depend on the particular circumstances of your case. If you say that you are working abroad full time, we would expect you to be able to show

92 With an element of judicial hyperbole: “[36]... no rational taxpayer could imagine that the route to non-residence by his pursuit of full-time employment abroad throughout a tax year could be successfully traversed even in relation to a preceding year. It is only the individual’s full-time employment abroad which yields the distinct break in the pattern of his life in the UK (see para 21 above) and the terms of paragraph 2.2 adequately convey its status as a pre-requisite to non-residence.”

93 *R oao Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [33].

that your employment:

- has a standard pattern of hours which can be compared to a typical UK working week or
- if your employment does not have a formal structure or fixed number of working days, it can, by looking at the local conditions and practices of the particular occupation, be compared to similar full-time employment in the country where you are working.

The former IR20 added:

If you have several part-time jobs overseas at the same time, we may be able to treat this as full-time employment. That might be so if, for example, you have several appointments with the same employer or group of companies, and perhaps also where you have simultaneous employment and self-employment overseas. But if you have a main employment abroad and some unconnected occupation in the UK at the same time, we will consider whether the extent of the UK activities was consistent with the overseas employment being full-time.⁹⁴

This is not in HMRC6. The comment seemed sensible, and perhaps the omission is deliberate. There is no indication either way.

Full time work “abroad”

Until recently there was no published guidance, and, it appears, no consistency in practice. The minutes of the Joint Expatriate Forum record:

6.5 HMRC were asked whether, if their position on FTWA [Full-time work abroad] changed, such changes would apply retrospectively. HMRC explained that generally changes were made prospectively, but in this case it is not entirely clear what the practice had been in the past, so they were unable to make a definitive statement before settling their legal advice.⁹⁵

HMRC have now issued the following guidance:

⁹⁴ RI 40 comments further on the meaning of “full-time”.

⁹⁵ Joint Expatriate Forum on Tax and Nics: 10 February 2011
www.hmrc.gov.uk/consultations/expat-mins-feb2011.pdf

HMRC accept that it has a practice whereby non residence can be demonstrated by working abroad full time even though some of the duties carried on in the UK are substantive. Although this is not in accordance with the definition of full time work at section 830 Income Tax Act 2007, HMRC's guidance on ceasing to be UK resident covers a wider range of issues than that section.

How much work can be carried on in the UK depends upon the facts and circumstances relevant to each individual. However HMRC will generally accept that working in the UK for fewer than 10 days in a year will not by itself prevent an individual claiming they have made a break with the UK because they are working full time abroad.⁹⁶ If more days than this are worked in the UK, whether an individual is working full time abroad will depend upon their particular circumstances.

Given that

(a) Residence is a long term issue affecting the entirety of a tax year and individuals and companies will have planned actions on the basis of HMRC guidance, and

(b) The government has announced that it will consult on a statutory residence test to codify the rules on residence

HMRC can confirm that for 2011/12 this practice will continue. It will however, be reviewed for future years having regard to the outcome of the consultation on a statutory residence test.⁹⁷

HMRC comment on the statutory provisions:

31. The term "merely incidental" duties applies in s830 ITA in relation to determining an individual's residence status and in relation to the interpretation of "full-time" work abroad. Whilst the interpretation of "merely incidental" duties in s830 is the same as in s39 [ITEPA], the concept of "full-time" work abroad is confined to s830.

32. In relation to "full-time" work abroad, HMRC's practice is to accept generally that non-United Kingdom residence can be demonstrated, even though some of the duties carried out in the United Kingdom are not incidental duties, as long as such duties do not exceed 10 days in one year. This is a concessionary practice agreed by HMRC in relation

96 Joint Expatriate Forum on Tax and NICs: 23 June 2011 Meeting Note provides: "5.7 HMRC gave further clarification on this point and confirmed that the 10day limit referred to substantive duties in UK and did not include incidental duties."

See www.hmrc.gov.uk/consultations/expat-mins-23june2011.pdf.

97 www.ion.icaew.com/TaxFaculty/22023 [2011] STI 1498.

to s830 [ITA] only. It has no relevance to s39 [ITEPA].⁹⁸

HMRC appear to assume here that s.830 ITA is the statutory basis of the full-time work abroad practice. But that is not strictly correct: s.830 (if its terms are met) simply requires the disregard of available accommodation.⁹⁹ Like most of the current residence rules, the practice is only loosely related to the statutory provisions.

HMRC say further:

HMRC statement on Full Time Work Abroad

In March of this year HMRC issued a statement clarifying the position on UK duties for those who are not resident because they are working full time abroad. We have now been asked about the impact of such duties on those who are not resident because of full time work abroad and who have returned to the UK temporarily because of the political situation in the Middle East.

The following applies to those people who have returned to, or remained in, the UK following FCO advice and relates to those countries where HMRC has confirmed that exceptional circumstances apply. This is Tunisia, Libya, Egypt, Syria, Bahrain and Yemen.

2010/11 – because the issues in those countries arose towards the end of the tax year, HMRC will accept that individuals who are temporarily brought back to the UK, and who have the intention of returning to their employment abroad, will not have their residence status affected by the duties undertaken in the UK during the period of exceptional circumstances.

2011/12 – given the much longer period that exceptional circumstances may potentially apply for this year, duties in the UK may mean that those affected are no longer working full time abroad. During 2011/12 we would expect that the statement on full time work abroad made on 31 March 2011 would in general apply to UK duties and that HMRC will therefore:

- Normally not consider any case where UK duties were undertaken in fewer than 10 days
- Look at other cases in light of their facts and circumstances.

98 “Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of “merely incidental” duties” published 19/3/2012.

www.hmrc.gov.uk/menus/dual-contracts.pdf

For s.39 ITEPA, see 13.13 (Where are duties performed: incidental duties).

99 See 3.6.2 (Full-time workers abroad).

HMRC said that if anyone felt that this approach would lead to unfairness or hardship for people who have had to return temporarily to the UK because of the political situation abroad, they should let them know so that they can consider the position further.¹⁰⁰

3.19.2 *Working abroad and home for weekends*

In *Davies and Gaines-Cooper* the Court of Appeal say:

long distance commuters, who work full-time abroad, but return at week-ends, providing their presence remains less than the number of days specified, are treated as not resident and not ordinarily resident.... advisers received explicit assurances that the Revenue's approach to mobile workers would not be applied to such commuters; they would continue to be regarded as coming within 2.2.¹⁰¹

In the HMRC view commuters are different from mobile workers, though it is not clear to me why this sharp distinction should be drawn.

3.19.3 *Return to the UK after working abroad*

HMRC6 para 8.6 provides:

8.6 Returning to the UK after working abroad

If you were not resident and not ordinarily resident when you were working abroad and you return to the UK when your employment ends, you will be not resident and not ordinarily resident in the UK until the day **before** you return to the UK. You will become resident and ordinarily resident on the day you return to the UK unless you can show that your return was simply a short visit to the UK between two periods of full-time employment abroad. ...

What if the employee has a holiday before return to the UK? Clearly the individual is not UK resident if the contract of employment continues (ie

100 Joint Expatriate Forum on Tax and NICs: 23 June 2011 Meeting Note; see www.hmrc.gov.uk/consultations/expat-mins-23june2011.pdf.

101 *R oao Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [54] and [71]. The assurances should of course have been made public but no doubt they could be obtained on a FOI application.

contractual holiday entitlement). Otherwise the statement does not cover the situation expressly, but it is suggested that UK residence does not arise until actual return to the UK.

3.19.4 Changes to employment while abroad

HMRC6 para 8.7 provides:

8.7 Changes to your employment when abroad

If your circumstances change while you are abroad, for example there is a break in full-time employment, you might no longer meet the requirements of paragraph 8.5 and so remain resident and ordinarily resident in the UK. You must tell us about such changes by contacting your tax office.

You must also tell us when you return to the UK at the end of an overseas employment, even if you are planning to go abroad again to work under a new contract of employment. You must do this even though you see your return to the UK as temporary and for a very short period. You should tell us this information by contacting your tax office.

Notwithstanding the peremptory terms of this paragraph, there is no obligation to disclose anything to HMRC unless the individual becomes UK resident.

3.19.5 Self-employment abroad

HMRC6 para 8.8 provides:

8.8 Leaving the UK to become self-employed abroad

If you are leaving the UK to work abroad for yourself in a trade, profession or vocation, then as long as your working circumstances are similar to those outlined in paragraph 8.5, you will be taxed in the same way.

3.19.6 Partly employed and partly self-employed

A published HMRC letter of 10 July 1979 provided:

... where an employee left the UK on 4 April 1979 and did not return until 6 April 1980 and was on a full-time service contract during that

period, he would be regarded as not resident and not ordinarily resident in the UK throughout the year 1979–80.

However this practice would not be extended to a taxpayer who was only partly in employment and partly self-employed during a similar period. In such circumstances the normal rules for determining an individual's residence status would apply and on the basis that no visits were made during the intervening period, the taxpayer would be regarded as not resident but ordinarily resident for the year 1979–80 in these circumstances.

I find this bizarre, and consider that a court is not likely to draw a distinction between those working full-time in either employment or self-employment, and those partly employed and partly self-employed. The former IR20 para 2.5¹⁰² watered this down to a “perhaps”. Now there is no guidance at all.

3.19.7 *Accompanying spouse concession: ESC A78*

ESC A78 provides:

1 The residence and ordinary residence status of a husband and wife is determined independently but the circumstances of one spouse may, in certain situations, be taken into account when determining the residence status of the other. This can apply when one spouse goes abroad for full-time employment, or to work full-time in a trade, profession or vocation, and is regarded as not resident and not ordinarily resident from the day following departure to the day before return. The following concession applies where an individual in this position is accompanied, or later joined, by his or her spouse who is not in full-time employment (or working full-time in a trade, profession or vocation) abroad.

2 Where the accompanying spouse is abroad for a complete tax year and interim visits to this country do not amount to—

- 183 days or more in any tax year; or
- an average of 91 days or more in a tax year (the average is taken over the period of absence up to a maximum of four years);

then the accompanying spouse's liability to UK tax which is affected by residence, for the years of departure and return at the beginning and end

102 Set out in 3.19.1 (Meaning of “work full-time abroad”).

of the period spent abroad, will be determined by reference to the period of his or her residence here during the year.

The concession (like all concessions) applies to civil partners.¹⁰³ HMRC6 para 8.9 provides:

8.9 Leaving the UK with your spouse or partner

When your husband, wife or civil partner leaves the UK to work abroad within the terms of paragraphs 8.5 or 8.8, you are able to receive the same tax treatment if you accompany or later join them abroad. This treatment is by concession (Extra-statutory Concession A78) and means that even when you yourself are not in full-time employment abroad, you will also be not resident and not ordinarily resident in the UK from the day after your departure. This treatment will apply as long as:

- you will be absent from the UK for at least a whole tax year, and
- your visits to the UK after you have left
 - total less than 183 days in any tax year, and
 - average less than 91 days a tax year. This average is taken over the period of absence up to a maximum of four years – see 8.5 which will show you how to work out this average....¹⁰⁴

You will remain not resident and not ordinarily resident in the UK until the day **before** you return to the UK. You become resident and ordinarily resident on the day you return to the UK.

3.20 Seafarers

*Rogers v Inland Revenue*¹⁰⁵ concerned a master mariner. Captain Rogers had a house in Fife where his wife and children resided. He had no home in any other country, but in the year 1878/79 he was entirely absent from the UK while in command of his ship. In fact he was away for much more than one calendar year as he left in July 1877. Captain Rogers was held

103 HMRC stated in their online list of ESCs:

“The Government’s commitment is that, for all tax purposes, same-sex couples who form a civil partnership will be treated the same as married couples.

As part of this commitment to tax parity, from 5 December 2005 all Extra Statutory Concessions or Statements of Practice should be taken as extended to apply equally to civil partners and married couples.”

104 The omitted passage is discussed elsewhere; see 3.32 (Calculating annual average visits: illness & exceptional circumstances).

105 1 TC 225, referred to with approval in *Levene* and *Lysaght* 13 TC at pp.223, 244.

to be resident here:

Every sailor has a residence on land, ... and the question is, Where is this man's residence? The answer undoubtedly is that his residence is in Great Britain. He has no other residence, and a man must have a residence somewhere.

(The ship was not regarded as a residence.)

The view that one can spend all year outside the UK and still be UK resident is supported by s.829(2) ITA.¹⁰⁶

However, HMRC practice is now quite different. The full-time work abroad practice is applied to sailors. EI Manual provides:

70230 Tax treatment of seafarers: Residence status: Employment outside UK territorial waters [February 2006]

A seafarer will normally be regarded as not resident and not ordinarily resident in the UK from the day following departure to the day preceding return where he or she:

- has been ordinarily resident in the UK and leaves the UK to take up full-time employment on a ship and
- the absence from the UK and the period of service includes a complete tax year and
- leave spent in the UK totals less than 183 days in any tax year and averages less than 91 days for each tax year (the average is taken over a period of absence up to a maximum of 4 years).

However, this will not include seafarers whose employment arrangements consist of frequent and regular voyages to and from the UK.

3.21 Year settled abroad

Dave Clark left the UK on 3 April 1978 and returned on 2 May 1979. I shall call that time **“the year settled abroad”**. He was UK resident before and after the year settled abroad, and UK domiciled at all times.

¹⁰⁶ “Treat the individual as UK resident for the purpose of determining the individual's liability for income tax for any tax year during the *whole or* a part of which the individual remains outside the UK for the purpose only of occasional residence abroad.” (Emphasis added)

During the year settled abroad he spent virtually the whole time in or around Los Angeles. The taxpayer worked in Los Angeles. Presumably he did not work full-time so he did not fall within the scope of the full-time work abroad practice. For the first ten weeks of his stay he lived in a house lent by a friend and thereafter in a house rented by his company. He retained a leasehold flat in Mayfair (also held by a company). He wisely spent no time in the UK at all.

It was held that the only possible conclusion from these facts was that he was not UK resident in the year settled abroad.¹⁰⁷

HMRC relied on *Rogers v Inland Revenue*.¹⁰⁸ The taxpayer argued that these cases were confined to wanderers with no place of residence except a base in the UK from which they started and to which they returned. It was different if a taxpayer establishes a home in another country. The court did not expressly accept this formulation, and declined “to define in the abstract circumstances in which it would or would not be open to Commissioners as the fact finding tribunal to conclude that a person physically absent for a whole year nonetheless resides here. Circumstances of particular cases vary widely, and each case must depend on its own facts”. But the taxpayer’s formulation seems soundly based. It was therefore relevant to the decision that Dave Clark was not merely out of the UK for the year: he lived in a new home, mostly in one fixed place of abode, and he worked from there. Los Angeles was his “headquarters”.

The second string to HMRC’s bow was the occasional residence abroad rule. It was argued that Dave Clark had left the UK for the purpose of “occasional residence”. On this point the Judge held that “occasional” residence was the opposite of “ordinary residence”. He said that Mr Clark was indeed “ordinarily resident” in America. Accordingly he had not left the UK for “occasional residence” abroad.

It follows that a person who:

- (1) wishes to leave the UK for a period of one tax year;
- (2) does not work full-time abroad, so does not come within the scope of the full-time work abroad practice

may acquire non-residence by a “year settled abroad”. I refer to this as “**year settled abroad**” non-residence, though “non-full-time worker’s

¹⁰⁷ *Reed v Clark* 58 TC 528.

¹⁰⁸ See 3.20 (Seafarers). A court may be less sympathetic to HMRC in a similar case now that HMRC are known to ignore *Rogers* in practice.

year settled abroad” would be more accurate. The individual should ideally spend no time whatsoever in the UK in the relevant tax year.¹⁰⁹ He should acquire a “base” in his new place of residence. Although Dave Clark worked (part-time), it is considered that the position would be the same had he not worked. Although Dave Clark had a single place of residence, it is considered that the position would be the same if he had more than one, as long as they were “bases” or “headquarters”.

3.22 Year travelling abroad

3.22.1 Position before 2011/12

The 2009 version of HMRC6 provided at 1.5.15:

You can be ordinarily resident in the UK but not resident. For example, if you normally live in the UK but, during a tax year, you have gone abroad for a long holiday and you do not set foot in the UK in the tax year. This is very rare.

This concerns individuals who:

- (1) do not work full-time abroad (so do not fall within the full-time work abroad practice); and
- (2) do not have a base abroad (so do not fall within the “year settled abroad” rule in *Reed v Clark*).

That is, individuals who leave the UK to wander the world for a year without coming back to the UK at any time in that year. Backpacking gap-yearers may fall into this category, or those on a leisurely world cruise. In practice, as HMRC say, this does not arise often, but it is not unknown.

There are two points in the HMRC6 statement, that a traveller who is not present at any time in a tax year:

- (1) is not UK resident but
- (2) is UK ordinarily resident.

I first consider point (1), residence. HMRC form SA109 Notes 2010 (Residence, remittance basis etc notes for 2009/10) makes the same point:

¹⁰⁹ In practice a few days in the UK should not make any difference. But it is impossible to say where the dividing line comes.

Put an 'X' in box 1 [claiming non-residence] if you were not present in the UK at any time during the year ended 5 April 2010.

As far as residence is concerned, this is I think an informal concession, as it is reasonably clear from *Reed v Clark* that an individual who is absent for a year is only non-resident if they have a *base* in their new place of residence. The statements are perfectly clear.¹¹⁰ Nevertheless there is a risk that HMRC may refuse to follow their published guidance, especially if there is an element of tax planning or tax avoidance. It is an interesting question to what extent the Courts might require HMRC to follow their guidance.

As far as ordinary residence is concerned, there are some doubts whether a person can be non-resident but ordinarily resident,¹¹¹ but since the strict analysis here is that the traveller remains UK resident they are no doubt also ordinarily resident.

3.22.2 Position from 2011/12

The passages set out above are not found in the current version of HMRC6 or in HMRC form SA109 Notes for 2010/11.

HMRC6 provides:

8.3 Complete absence from the UK

Residence is connected to physical presence. If you live outside the UK for a complete tax year and do not set foot in the UK you will not be resident in the UK for that tax year, unless your absence from the UK is for the purpose of occasional residence abroad only. For example, if your absence was for a one-off year long holiday after which your residence in the UK resumed its previous pattern, you would remain UK resident during your absence.

If you became not resident simply because of a complete absence from the UK, it is unlikely that your presence in the UK on your return is for a temporary purpose only if any of your UK ties remained throughout your period of absence. You would most likely become resident again on your return.

110 Indeed the practice goes back to at least 1979; see 3.19.6 (Partly employed and partly self-employed).

111 See 3.14 (Ordinary resident but not resident).

HMRC have changed their practice as regards residence and now wish to take the point that if “you have gone abroad for a long holiday and you do not set foot in the UK in the tax year” then you remain UK resident.

3.22.3 *Ordinary residence*

HMRC6 para 3.2 provides:

It is also possible (but unusual) to be not resident in the UK but remain ordinarily resident here. If you normally live in the UK you might become not resident solely for one tax year. As you would usually be resident in the UK and this is where you have your normal home, family ties and other social connections, you might still be ordinarily resident here.

Similarly HMRC6 para 8.3:

Even when you are absent for a whole tax year and so become not resident, you might remain ordinarily resident in the UK. You will need to consider the pattern of your residence over a number of years and the purpose and pattern of any ordinary residence abroad.

Thus regardless of residence, HMRC still argue for ordinary residence in this case.

3.23 Leaving the UK permanently or indefinitely

For at least six decades HMRC operated a 91-day test. In short – I omit refinements which do not affect the position in general – what a UK resident formerly had to do to lose UK resident status under IR20 was to average under 91 days in the UK over the four-year period. HMRC withdrew this practice in HMRC Brief 1/2007¹¹² and succeeded in changing their practice retrospectively.¹¹³

Whatever the position as to the past, from 2009/10 the 91-day test is no longer decisive. HMRC6 provides:

1.2 .. Your status is determined by the facts of your particular case. It is

112 This was later set out as an appendix in the May 2008 version of IR20.

113 *R oao Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [40] - [48].

not simply a question of the number of days you spend in the country.

2.2 There are many different factors which will determine whether you are resident in the UK. With one exception [the 183-day rule], it is not simply a question of the number of days you are physically present in the UK during a tax year, although this is an important consideration.

So we need to consider when a UK resident person loses UK resident status other than under the full-time work abroad rule (or the year settled abroad rule). HMRC6 para 8.1 provides some terminology. Firstly, there is a commonsense definition of “permanently”:

Leaving the UK ‘permanently’ means that you are leaving the country to live abroad and will not return here to live.

Next there is a definition of “indefinitely”:

Leaving ‘indefinitely’ means that you are leaving to live abroad for a long time (at least three years) but you think that you might eventually return to live here, although you do not currently have plans to do so.

This is a change from the 2009 version of HMRC6, which provided:

By leaving “indefinitely” we mean that you are leaving to live abroad for a long time (at least three years) but you acknowledge that you might eventually return to live here.

In the 2009/10 edition I criticised this wording as a slightly odd use of “indefinitely” (“long-term” would be nearer the mark) though not too confusing. The new definition changes the definition to accord with the natural meaning of the word indefinitely. But HMRC should have kept the definition and changed the label to long-term. For instance, an individual who goes for a 5 year posting has “plans” to return to the UK so taken literally they do not leave “indefinitely” in the 2011 sense of the word.

3.23.1 *Definite break*

HMRC6 places considerable emphasis on the requirement of a “definite break”. This is a new feature: the expression which occurs 8 times in the text of the current version is not found at all in the 2009 version. The

current version provides:

8.1 ... The act of leaving the UK does not necessarily make you not resident and not ordinarily resident. You must also make a definite break from the UK and any remaining ties you have with the UK must be consistent with not being resident here. If you say that you are no longer resident and ordinarily resident in the UK, we might ask you to give some evidence to show that you have left the UK permanently or indefinitely and that there has been a clear change in the pattern of your life. For example, we would expect you to show that when you left the UK you had acquired accommodation abroad to live in as a permanent home. If you still have property in the UK which you can use after you leave, we might want you to explain how retaining that property is consistent with leaving the UK....

8.2 Leaving the UK for shorter periods of time

[This passage is considered at 3.18 (Short absences).]

8.2.1 Evidence of a definite break

If you do not make a definite break and cut your UK ties then you remain resident in the UK. You could also be dual resident – that is resident in the UK and another country.

You might not have evidence of a definite break from the UK for some time after you leave the UK. In this situation you will need to review your residence status later to confirm whether you have become not resident, and when this happened.

For example, if you have travelled in and out of the UK fairly frequently, the exact timing of the end of your residence here could be difficult to establish. You should therefore keep evidence relating to your lifestyle before and after the date on which you think you ceased to be resident. If the circumstances of your life change gradually, then you will become not resident only when you have sufficiently reduced your ties to the UK and are more than occasionally resident abroad.

The evidence that you will be able to show that you have made a definite break will depend on the extent of your UK ties initially. If you had few initial connections with the UK you will have less evidence to show that you have made a definite break.

In those circumstances strong ties to another country, including a home and settled purpose for your presence there throughout a complete tax year, would be more of a factor in deciding if you have left the UK permanently or indefinitely.

This reflects the case law at least as developed in *Davies and Gaines-*

*Cooper.*¹¹⁴

3.24 Days of arrival and departure

It is important to know whether days of arrival or departure count as UK residence days for the purposes of the 183 day test (which is statutory) and it may be important to know for the purposes of the 91 day test.

Section 831 ITA provides:

(1A) In determining whether an individual is within subsection (1)(b) treat a day as a day spent by the individual in the UK if (and only if) the individual is present in the UK at the end of the day.

(1B) But in determining that issue do not treat as a day spent by the individual in the UK any day on which the individual arrives in the UK as a passenger if–

- (a) the individual departs from the UK on the next day, and
- (b) during the time between arrival and departure the individual does not engage in activities that are to a substantial extent unrelated to the individual's passage through the UK.¹¹⁵

Section 832(1A)(1B) ITA provides the same rule for employment income, and s.9(5)(6) TCGA provide the same rule for CGT.

When is a person “present in the UK”? I would have said a person is “present” once a boat reaches UK territorial sea¹¹⁶ or once a plane flies over the territorial sea. But HMRC take a different view:

The published answer [from HMRC] confirmed that “the point of arrival in the UK will be when, an aircraft lands, a train arrives at the first station in the UK, a boat docks at the quayside or drops anchor in territorial waters”. HMRC were asked to confirm that similar rules applied to determine the time of departure. HMRC confirmed that the departure rules were consistent with those described for arrival ie “the point of departure from the UK will be when, an aircraft takes off, a train leaves the last station in the UK, a boat leaves the quayside or its

¹¹⁴ See 3.8.11 (Distinct break).

¹¹⁵ For completeness, the 8th edition of this work para 3.20 contains a critique of misleading comments in EN FB 2008 on this provision, but this material is now omitted as it is not now of practical importance.

¹¹⁶ See App 1.1.4 (Territorial sea).

anchorage point in territorial waters”.¹¹⁷

That time is certainly easier to ascertain.

3.24.1 *Transit passenger*

Under s.831(1B)(b) ITA a day of arrival can only be disregarded even though the individual is present at midnight, if

during the time between arrival and departure the individual does not engage in activities that are to a substantial extent unrelated to the individual’s passage through the UK.

This is vague, but HMRC6 para 2.3 provides a gloss:

So if you attend a business meeting, visit a property you own, arrange to meet people socially or attend social activities, you must count that day as a day of presence if you are in the UK at the end of the day.

Example

You are resident of the Isle of Man and travel to the UK as part of a journey to the USA. You have to stay overnight in the UK before catching a flight to the USA the following day. Your being in the UK for that one night would not count as a day of presence in the UK. But, if you were to carry out an activity such as attending a business meeting, visiting the theatre or visiting family before catching the flight to the USA, the exception would not apply and the night spent in the UK would be counted as a day of presence.

EN FB 2008 provides some unexceptionable examples:

Example 1 – Peter works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt. He flies from Jersey to Gatwick and will catch his onward flight the next day to Frankfurt from London City airport. He travels from Gatwick to Canary Wharf for a meeting with several other HSBC colleagues before staying overnight in a nearby hotel.

The meeting with colleagues is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 2 – John works for the Jersey arm of HSBC and is travelling from

¹¹⁷ Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008 accessible www.hmrc.gov.uk/consultations/expat-mins-180908.htm

Jersey to Frankfurt via Gatwick and London City airport. In lobby of his hotel near London City Airport, he unexpectedly spots another colleague who has just arrived from Paris. They have a couple of pints together and their conversation covers a number of business-related issues. [John]¹¹⁸ then travels to London City airport to catch his onward connection.

This meeting was not planned and therefore it can be considered that John's activities in the UK substantially related to completing travel to a foreign destination. The transit passenger provisions will apply.

Example 3 – Shirley lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. She has planned to spend most of the day with her daughter and grandchildren, who live in Crawley and will also spend the night there before travelling to Heathrow for her onward flight.

Her visit is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 4 – Phil lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. His flight from Guernsey is delayed by fog and he arrives too late to make his onward connection to New Zealand that day. His son had already arranged to meet him at Gatwick and drive him to Heathrow, now he drives him to a hotel near Heathrow instead where Phil will stay overnight before catching his rearranged flight. At the hotel they have a snack together. These activities are substantially related to completing travel to a foreign destination – Phil would have eaten in the hotel even if he had been unaccompanied. The transit passenger provisions will apply.

Example 5 – George lives in the Isle of Man and is flying to New York on business via Manchester. He has made an appointment with a consultant orthopaedic surgeon based in Manchester to carry out a number of tests. He will stay in the clinic overnight before travelling on to New York the following afternoon.

The appointment is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

Example 6 – George lives in Jersey and is travelling to Stavanger. He does not fly and travels to the UK by ferry before continuing to London by train. He stays overnight at a West End hotel, having prearranged dinner and a trip to the theatre with friends. The next day he travels to Newcastle by train, where he boards a ferry to Stavanger. His activities in the UK are not substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

If the individual arrives in the UK and leaves on the *same* day, that day will not count even though work or other matters are done in between. The individual does not need to rely on the transit passenger exemption.

The rule is essential to the role of Heathrow airport as an international hub. Heathrow relies on transfer passengers for the viability of its hub

118 The original erroneously reads: Peter.

status. Transfer passengers facilitate network diversity and frequency. No passenger would arrange to change planes in the UK if it might make them UK resident.

3.24.2 *Transitional aspects*

The transitional issues were overlooked at the time of the FA 2008, but HMRC dealt with this in the December 2008 Qs and As:

Day counting

Q For determining residence in 2008-2009, do I need to count one of the arrival-departure days for each visit during the previous three tax years (2007-2008, 2006-2007, 2005-2006) or does the old rule for counting (excluding departure - arrival) apply for those years?

A For 2007-08 and before, the old day counting practice (excluding days of arrival and departure) will continue to apply. For 2008-09, the new practice (counting days where the individual is present at the end of the day) will be applied. So when calculating periods of residence that straddle both sets of practice, individuals will have to take into account both of the day counting practices. You should therefore exclude days of arrival and departure for 2005-06, 2006-07 and 2007-08.

From 2009/10 this is only relevant for the limited areas where the 91 day test remains important.

3.24.3 *Evidence of presence in UK*

The taxpayer should keep careful records. Note that it is hardly possible to be in the UK without leaving some trail behind. In *Morris v HMRC*:

the Revenue used their powers under s 20(3) TMA to obtain copies of the taxpayers' credit card and mobile phone records. These indicated that their credit cards and phones had been used in the UK on many more days than the taxpayers claimed they had been in the country. In subsequent correspondence, the solicitors said that this was because they had been used by other family members..."¹¹⁹

119 79 TC 184 at [6].

Perhaps sharing mobile phones and credit cards might be unwise for non-UK residents.

3.25 Method of calculating 91 day average

HMRC6 provides:

8.5 Leaving the UK to work abroad as an employee

... To calculate your annual average visits to the UK:

$$\frac{\text{Total days visiting UK}}{\text{Tax years you have visited (in days)}} \times 365 = \text{annual average visits}$$

After a disclaimer which does not seem to rate the intelligence of the reader very highly¹²⁰ the text continues with a straightforward example:

If you were to leave the UK on 20 May 2008 to work full-time abroad and you visit the UK for:

74 days in the tax year 2008–09 (320 days in the remainder of the tax year)

94 days in the tax year 2009–10 (365 days in the tax year)

92 days in the tax year 2010–11 (365 days in the tax year)

79 days in the tax year 2011–12 (366 days in the tax year)

The annual average of your visits would first be calculated after the end of the tax year

2009-10. You will be resident in the UK for the whole of 2008-09, regardless of how few days you spent there after 20 May 2008, although you will be entitled to split-year treatment if you met the conditions in ESC A11 (see paragraph 8.1.1 on page 44).

The average of your visits would be as follows:

2009-10 $(74+94) \div (320+365) \times 365 = 89.5$ days. This means that you are not resident

2010-11 $(74+94+92) \div (320+365+365) \times 365 = 90.4$ days. This means that you are not resident

2011-12 $(74+94+92+79) \div (320+365+365+366) \times 365 = 87.4$ days. This means that you are not resident

120 “This is for illustrative purposes and any calculation you make would be based upon your own circumstances – the date that you actually left the UK and the days that you have visited the UK in the period.” Bold font is original.

The calculation of average visits for the year 2012-13 will not include the visits or relevant days for the year of departure. The rolling period of four years is maintained by excluding the oldest year at each annual review.

...¹²¹

If you do not meet all of these conditions, you will remain resident and ordinarily resident in the UK unless paragraph 8.1 applies to you.

If your employment comes to an end and you do not return to the UK it will be necessary to consider if you continue to be not resident and not ordinarily resident in the UK.

3.25.1 *Day counting in the case law*

In *Gaines-Cooper v HMRC* [2007] STC (SCD) 23 the Special Commissioners adopted figures which:

- (1) counted days of arrival and departure as one day's presence (contrary to former IR20 principles) if the taxpayer stayed overnight;
- (2) counted days spent in the UK due to illness (contrary to IR20 principles).

It is considered that (apart from the 183 day test) the correct approach in law would be to take into account all days of arrival and departure, but with less weight than full days. But the *Gaines-Cooper* approach amounts to more or less the same.

3.26 **Calculating annual average visits: illness & exceptional circumstances**

HMRC6 provides lengthy guidance on calculating 91 day average visits, but from 2009/10 the average is not nearly as important as formerly. It is no longer decisive as to residence, it is merely one factor. Nevertheless I will set out the passages here. HMRC6 provides:

8.5 ... Any days you spend in the UK because of exceptional circumstances beyond your control, for example an illness which prevents

121 The omitted passage is discussed elsewhere; see 3.32 (Calculating annual average visits: illness & exceptional circumstances).

you from travelling, are not normally counted for this purpose.¹²²

This recognises that a person may spend up to 182 days present in the UK if necessary for medical care and still be non-resident. The practice is merciful to the non-resident and helpful to the private medical industry, except for long term patients.

Notwithstanding the use of the word “normally”, the only situation I can envisage where the practice would not apply is in cases of abuse, eg if a UK resident individual “left” the UK knowing they would need to return shortly for medical treatment.

Of course the practice would not apply if the illness was mild and did not actually cause the individual to stay here. The decision to stay must be “beyond your control”, a matter of compulsion rather than choice.

The former IR20 provided:

Any days spent in the UK because of exceptional circumstances beyond your control, for example the illness of yourself or a member of your immediate family, are not normally counted for this purpose.

The practice recognised that a person may need to spend time in the UK because of the illness of immediate family. (Remaining in the UK because of the illness of one’s family is strictly a matter of choice but “beyond your control” was obviously be taken realistically rather than literally.)

It is considered that illness of immediate family can still qualify as exceptional circumstances. Any other view is offensive to humanity, and, certainly, if HMRC wished to change their view it should have been stated expressly rather than left to be inferred.

This practice is applied to the non-statutory 91-day rule (if one can call it a rule) but it is not applied for the 183-day rule. There is perhaps a reason for this distinction: the 183-day rule is statutory, so to disregard days of illness or exceptional circumstances would have to be classified as a concession, not simply as an HMRC practice. But the 183-day rule can therefore operate rather harshly.

The exclusion of days spent in the UK due to exceptional circumstances

122 The same passage is found in HMRC6 para 8.9. For completeness: a similar practice is recorded in SP 2/91 but it appears from HMRC Brief 17/09 that this SP has now been withdrawn.

(eg illness) is only contained in the section on “leaving the UK” (see the example at para 8.5 and also para 8.9). This might suggest that if an individual come to the UK, days spent here due to illness might still count for the purposes of the 91 day test, but that may not be intended.

3.26.1 *Volcanic Ash: disruption to air travel 2010/11*

HMRC say:

HMRC confirmed that, where individuals had planned to leave the UK but were genuinely prevented from doing so because of the recent travel disruption caused by the Eyjafjallajökull volcano eruption, they would treat the situation as an exceptional circumstance and therefore covered by existing guidance in paragraph 2.2 of [the 2009 version of] HMRC6. This meant that any additional days spent in the UK purely as a consequence of this disruption may be disregarded when considering whether an individual is resident in the UK.

However, where an individual is present in the UK for 183 days or more in the year, including any days spent here because of exceptional circumstances, including this travel disruption, then they will be resident in the UK for that year.

HMRC also confirmed that individuals who wished to claim that any days spent in the UK were due to exceptional circumstances should keep sufficient evidence to support their claim as they would for similar claims.¹²³

3.26.2 *Unrest in Middle East*

HMRC say:

For those individuals who are evacuated from Egypt, Libya and Tunisia due to the current political situation, this situation would be treated as an exceptional circumstance and therefore covered by existing guidance in HMRC6. This will remain the case for the period that the FCO advice for the country they are leaving is in place.... Exceptional circumstances will only apply for the period individuals were advised by the Foreign and Commonwealth Office to leave Egypt, Libya and Tunisia and the

123 Minutes of Joint Expatriate Forum on Tax and NICS, 26 May 2010
www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf.

week thereafter.

The relevant periods and areas where an FCO advisory to leave has been, or is currently, in force are:

Egypt – For the period 29 January to 15 February 2011 those in Cairo, Alexandria and Suez were advised to leave.

Libya – Since 20 February 2011 the FCO have advised those who could to leave, this advisory remains in place.

Tunisia – For the period 15 January to 20 January 2011 the advisory was in place.

At the present time there are no restrictions on travel to Egypt or Tunisia.¹²⁴

Exceptional circumstances may similarly affect the requirement of full-time work abroad.¹²⁵

3.27 Coming to the UK

The reader will recall that those coming to the UK are divided into the following categories:

- (1) the three years in the UK practice;
- (2) visitors to the UK, not within (1), a category divided into:
 - (a) short-term visitors:
 - (i) indecisive visitors;
 - (ii) intentional visitors;
 - (b) longer-term visitors.

HMRC6 para 7 begins with the following general comments:

If you come to live here permanently or to work here for an extended period, or with no particular end date, you will become resident in the UK. But not everyone who comes to the UK becomes resident here. For example, those who are in the UK on holiday or for a short period of work will generally (!) not become resident in the UK.

In most cases it will be clear whether you become resident or not, but sometimes it needs careful thought about a number of factors. These include:

- whether you have been resident in the UK before
- how many days you spend here

¹²⁴ www.ion.icaew.com/TaxFaculty/21604.

¹²⁵ See 3.19.1 (Meaning of "work full-time abroad").

- the pattern of your presence in the UK or absence from it over a period of years
- whether your purpose for being in the UK is settled or temporary
- your family, social and work ties to the UK
- your accommodation arrangements.

3.28 The three years in the UK practice

HMRC6 provides:

7.2 When you come to the UK permanently, indefinitely, or to live or work for three years or more

[1] If your home has been abroad and you have come to the UK to live here permanently or indefinitely, you will be resident and ordinarily resident from the date you arrive.¹²⁶

[2] You will also be resident and ordinarily resident from the date you arrive if you have come to the UK to remain here for three years or more. This is because you are not simply visiting but have settled in the UK for the time being.

Para [1] refers to those who “come to live here”. Para [2] refers to those who “come to remain here”. Perhaps this means the same thing, so para [2] covers just about everyone in para [1].¹²⁷ Perhaps there is a difference in nuance, ie someone who comes to live in the UK permanently is resident even if they do not “remain” in the UK. In practice this is not likely to matter.

The heading “Coming to the UK permanently or indefinitely” is not an accurate label. I refer to this as “**the three years in the UK practice**”. HMRC6 continues:

If you have previously been resident in the UK and are returning after a period abroad, you will need to think about whether or not your absence from the UK was a period of non-residence. You may not have been entitled to the split-year treatment. If you were not resident you may

126 A sidenote adds: ‘From the date you arrive’ means from the beginning of the tax year, but you will not normally be charged tax for the period up to your arrival in the UK.

127 Since anyone within [1] (who intends to come to the UK to live here permanently) will usually be within [2] (they intend to come and remain here for three years or more).

have been ‘temporarily not resident’ and this might affect your liability to UK tax when you become resident in the UK again.

Whether or not you have lived here before, if you have come to the UK to live or work permanently, indefinitely, or for three years or more, you should tell us immediately so that you can make sure that you are paying the correct amount of tax as soon as possible.

Notwithstanding the peremptory terms of this paragraph, there is no obligation to disclose anything to HMRC unless the individual becomes UK resident and even then no obligation to do so “immediately”. The paragraph continues.

- If you work for an employer in the UK, they will give you the forms you need to complete for us and will deduct tax from your earnings on our behalf under PAYE – see part 6. The forms might include form P46.
- If you have been seconded to work in the UK while employed by a foreign employer, they should give you the form P46 (Expat) to complete. We will send you any other forms that you need.
- If you are going to work for yourself – that is, as a self-employed person – you can find out what you need to do at www.hmrc.gov.uk or you can phone our Self-employed Helpline. The helpline will be able to give you the advice you need to make sure that you pay the right amount of UK tax at the right time.
- If you have come to the UK to live (permanently or indefinitely or for three years or more) but do not intend to work here, you must tell us if you have any taxable income and/or gains.

3.28.1 *Meaning of “remain”*

HMRC6 para 7.2 formerly provided:

When we say “remain” in the UK we meant that you are here on a continuing basis - the only trips you make outside the UK are when you go abroad for holidays or short business trips.

This was an odd use of the word “remain”. “Stay full-time in the UK” would be a more accurate expression.

The current version of HMRC6 has deleted this passage but does not provide any explanation of the meaning of “remain”.

A person who “comes and remains” in the UK will satisfy the 183-day

rule and a person who “comes to live here” will do so too. So the practical relevance of the three years in the UK practice is:

- (1) to establish residence in the year of arrival (because the 183-day rule will not be satisfied by someone who arrives after about September);
- (2) to establish residence in the year of departure (because the 183-day rule will not be satisfied by someone who leaves before September);
and
- (3) to establish ordinary residence.

3.29 Remaining in the UK for two years

The current version of HMRC6 is quite different from the 2009 version. Para 7.4 provides:

7.4 When you come to the UK temporarily

If you are simply visiting the UK, then you might not be resident. But you are not simply visiting the UK if you have a purpose for being here which is not temporary. The nature and extent of your connections to the UK may indicate that your purpose in the UK is not temporary.

The term "visit" is vague. Whether someone was a “visitor” mattered under the 2009 version of HMRC6 and the former IR20, since a visitor was (subject to specific exceptions) classified as non-resident. Since now it is only the case that a visitor “might not” be UK resident the question of whether someone is a visitor is no longer so crucial. The 2009 version of HMRC6 used the term "visit" in a slightly defined and somewhat technical or artificial sense, which is not in the current version, but that does not matter any more.

Para 7.4 continues:

...If you remain in the UK for a period that spans two tax years and are resident in the second year then you will need to think about whether you were also resident in the first tax year. This will depend on all the facts.

It is possible that after you first come to the UK your circumstances change and you are going to live here permanently or indefinitely, or you are going to remain here for three years or more from the date of your arrival. In such a situation, you will become resident and ordinarily resident in the UK and you should read paragraph 7.7. If your circumstances change and you become resident in the UK, you should

tell us as soon as possible to make sure that you are paying the correct amount of tax.

HMRC6 para 7.7.1 provides:

7.7.1 Residence

[1] ...If you remain in the UK for a period that spans two tax years and are resident in the second year then you will need to think about whether you were also resident in the first tax year. This will depend on all the facts.

It is difficult to see how the guidance could be more vague or unhelpful if it tried. The passage continues:

[2] If you have come to the UK and will be remaining here for at least two years but for not more than three years, you will be resident from the date of your arrival (even if you are here for fewer than 183 days in the first tax year). This does not necessarily mean that you will also be ordinarily resident.

The category within point [2] (“remaining 2 years”) overlaps unhappily with the three years in the UK practice. A person who intends to remain three years is in the “three years in the UK category”. A person who only intends to remain two years is in category [2].

A person who “remains” in the UK for two whole years will be present in the UK during three tax years.¹²⁸ During the middle tax year the person will satisfy the 183-day rule. The relevance of the remaining-2-years category is to establish residence in the tax years of arrival and departure if the 183-day rule is not satisfied in those years.

The 2009 version of HMRC6 made it clear that the purpose of the distinction between the two practices is that a person who falls within the remaining-2-years category is resident but not ordinarily resident. A person within the three years in the UK practice is resident and ordinarily resident. The current version removes the clarity by saying that the person who remains 2 years is not “necessarily” ordinarily resident. It gives no further guidance. Perhaps the authors contemplated a further extension of the concept of ordinary residence, but in practice this should be

128 Unless the person arrives on 6 April and leaves two years later on 5 April.

overtaken by statutory reform.

3.30 Visitors

3.30.1 *One-off visit*

HMRC6 para 7.5 provides:

If you are making a one-off visit to the UK and leave before you have been here for 183 days in a tax year and you do not intend to return, you will not usually be resident or ordinarily resident in the UK.

The word “usually” was added in the current version of HMRC6, which adds to the vagueness and detracts from the usefulness of the passage. There is no guidance as to what takes the matter out of the “usual”. The point is to ensure that the taxpayer cannot rely on the passage if HMRC do not wish to follow it, but in practice no doubt that will happen rarely if at all.

3.30.2 *Repeated visits*

HRMC 6 para 7.5 continues:

But, if you are going to make a number of separate visits to the UK you need to think about whether this will make you resident and/or ordinarily resident here. It does not matter whether the visits are for the same purpose or different purposes, or varying lengths of time.

If you are making a number of separate visits, part 2 explains that you need to look at the pattern and regularity of your visits. The length of time required to establish a pattern will depend on your circumstances but after three¹²⁹ years it will usually be possible to judge the pattern that has emerged.

[1] You may not know how long you will continue to visit when you first arrive in the UK. If, after three¹³⁰ complete tax years, a pattern has emerged that these visits total more than 91 days on average and your visits continue, then you will become resident and ordinarily resident in

129 There is a significant change in the 2010 version of HMRC6 which has changed the figure from four years to three.

130 See above fn.

the UK from the start of the next tax year.

I refer to those within [1] as “**indecisive visitors**”. “Indecisive visitors” is not an entirely accurate label for this category of UK residence, but “those who come regularly for more than 90 days average over a four-year period without knowing that they will do so at the outset” is something of a mouthful. According to HMRC6 a 91 day test operates in this context. This is not reconcilable with their emphatic statement that residence is not just a matter of counting days, and it is clearly wrong in law,¹³¹ but it is a workable rule of thumb which has survived from IR20. HMRC have no objection to a workable rule of thumb which favours the Revenue.

HMRC6 continues:

But there are situations where you might become resident and ordinarily resident in the UK before you have been visiting for four years, for example:

- where you know, when you start visiting the UK that your visits here will be for an average of 91 days or more for each tax year. In these cases, you will be resident and ordinarily resident from 6 April of the tax year in which you first start making your visits.
- when you realise after starting to visit the UK regularly that your visits are going to be for an average of 91 days or more. In these cases you will be resident and ordinarily resident from 6 April of that tax year.
- when your circumstances change so that your purpose for being in the UK is no longer temporary.

It is possible that after you first come to the UK to visit, or after you have made a number of visits here, your circumstances change so that you are going to live here permanently or indefinitely, or are going to remain here for three years or more from the date of your first arrival. If this is the case, you will become resident and ordinarily resident in the UK and should read paragraph 7.7.

If your circumstances change and you become resident in the UK you should tell us as soon as possible so that you can make sure that you are paying the correct amount of tax.

I refer to those who fall in this category as “**intentional visitors**”.

A change from the former IR20 is that the text now reads “might” whereas IR20 formerly stated that intentional visitors “would” become

131 See 3.8 (case law on residence).

UK resident. I wonder if this is really what HMRC meant to say. If one takes “might” literally, there is no guidance of when a visitor would or would not be UK resident. Another change is that “intend” is replaced by the word “know” but in the present context I think that comes to the same thing.

Perhaps the changes are due to a problem of the former IR20 identified in the 7th edition of this work:

This category (intentional visitors) seems again to have the status of provisional and uncertain residence. Suppose T intends to average more than 90 days here over five years, and in year 1 he spends 99 days here; T may think he is UK resident in year 1 but he cannot be sure. If in year 4 T unexpectedly changes his intention and leaves the UK, he retrospectively finds that he is not resident in years 1, 2 and 3 after all!¹³²

Perhaps the reason for this change is the emphatic statements elsewhere in HMRC6 on the non-decisive nature of a day count test.¹³³

3.30.3 *Does a year with no day in UK restart the clock?*

The former Inspectors Manual provided at para 45:

An individual should be regarded as becoming resident if he visits the UK year after year so that his visits become in effect part of his habit of life and are annual visits for a substantial period or periods of time.

132 For completeness, the text continued:

“But possibly one is only expected to calculate the days here up to the year in question, not over a longer average? In practice no problems seem to arise, perhaps because:

(1) taxpayers take the view that ‘intention’ requires a firm, fixed and irrevocable intention and in practice few if any form such an intention (unless they fall within the three years in the UK practice or satisfy the 183-day rule).

(2) HMRC cannot usually know what a person’s intention of future residence is even if (which is rare) the person himself knows. A rule based on subjective intention is in practice unenforceable and so unworkable.”

133 HMRC6 para 2.2 provides:

“There are many different factors which will determine whether you are resident in the UK during a tax year. **With one exception [the 183-day test], it is not simply a question of the number of days you are physically present in the UK during a tax year although this is an important consideration.**”

Normally, an average annual period or periods amounting to 91 days or more should be regarded as substantial and the visits as becoming habitual after four years, *provided that there has been a visit in each of the four years*; such an individual should be regarded as resident for and from the fifth year.
(Emphasis added)

There has been no announcement of a change of practice on this point but one might infer that HMRC practice has changed.

Suppose:

- (1) Year 1: T spends a relatively short period in the UK (say 30 days).
- (2) Years 2–3: T spends much longer in the UK (say 160 days).

Suppose in year 1 T intends to spend the longer periods in years 2–4. Taking HMRC6 literally, T is resident in year 1 (assuming T's intention is carried out). But it is considered that unless T resides a sufficient period in year 1, T should not be regarded as resident in that year even if T expects to average 91 days. Where the line is to be drawn is unclear.

3.30.4 *Knowing that visits will average more than 91 days*

The current version of HMRC6 replaces “intend” with “know”.

What if someone comes to the UK on a visitor's visa, applies for a visa to remain in the UK, but is not sure whether the visa will be obtained? Such a person might “intend” to remain in the UK¹³⁴ but they do not “know” that they will remain in the UK.

3.31 Calculating annual average visits for visitors rules

The method of computation for the visitors rules is slightly different from the method used for those leaving the UK.

HMRC6 provides:

7.6 How to calculate your average days in the UK

Calculating your annual average days in the UK is a useful indication of

¹³⁴ This is consistent with the rule that an illegal immigrant may be UK domiciled: see 2.11 (Refugees, illegal immigrants and temporary visas). See Michael Bratman, “Intention, Plans, and Practical Reason”, CSLI Publications, (1999), pp.37, 38, accessible www.kessler.co.uk.

the extent of your connection to the UK. It may also indicate if – when you have visited the UK frequently – you have become resident here. If you need to calculate your annual average days in the UK, you do so like this:

$$\frac{\text{Total days in the UK}}{\text{Relevant tax years (in days)}} \times 365 = \text{annual average days}$$

The annual average is calculated over the number of years you have been visiting the UK, up to four years after which only the last four years are included in the average. (But if the pattern of your visits varies substantially year by year, it might be appropriate to look at the periods with different patterns separately and to calculate average days in the UK for each distinct period).

The text continues with a straightforward example though with a specific disclaimer before it¹³⁵ and a general disclaimer after it:

Example

If you were to leave the UK on 20 May 2008 to work full-time abroad and you visit the UK for:

74 days in the tax year 2008–09 (320 days in the remainder of the tax year)

94 days in the tax year 2009–10 (365 days in the tax year)

92 days in the tax year 2010–11 (365 days in the tax year)

79 days in the tax year 2011–12 (366 days in the tax year)

The average of your visits would be as follows:

2009-10 $(74+94) \div (320+365) \times 365 = 89.5$ days. This means that you are not resident

2010-11 $(74+94+92) \div (320+365+365) \times 365 = 90.4$ days. This means that you are not resident

2011-12 $(74+94+92+79) \div (320+365+365+366) \times 365 = 87.4$ days. This means that you are not resident

This is the general practice, but it will not necessarily be appropriate in all cases. If you spend very significant amounts of the year travelling internationally, you should keep a record both of the days you were present in the UK and of those days where you are here at midnight. Both will be factors when looking at the pattern and purpose of your

135 “This is for illustrative purposes only and any calculation you make would be based upon your own circumstances – the day that you actually started to visit the UK and the days that you have been here in the period.”

visits.

3.32 Ordinary residence

HMRC6 provides:

3.2 What does ordinary residence mean?

Ordinary residence is different from ‘residence’. The word ‘ordinary’ indicates that your residence in the UK is typical for you and not casual. It is important not to confuse ordinary residence with domicile (see part 4).

If you have always lived in the UK then you are ordinarily resident here. When you come to the UK you do not have to intend to remain in the UK permanently or indefinitely in order to be ordinarily resident here. It is enough that your residence has all the following attributes.

- Your presence here has a settled purpose. This might be for only a limited period, but has enough continuity to be properly described as settled.

Business, employment and family can all provide a settled purpose, but this list is not exhaustive.

- Your presence in the UK forms part of the regular and habitual mode of your life **for the time being**. This can include temporary absences from the UK. For example if you come to live in the UK for three years or more then you will have established a regular and habitual mode of life here from the start.

- You have come to the UK voluntarily. The fact that you chose to come to the UK at the request of your employer rather than seek another job does not make your presence here involuntary.

The pattern of your presence, both in the UK and overseas, is an important factor when you are deciding if you are ordinarily resident in the UK. You will also need to take into account your reasons for being in, coming to, or leaving the UK and your lifestyle and habits. Parts 7 and 8 will help you with this, as they explain the considerations for those coming to and leaving the UK.

....

HMRC6 para 3.3 gives two examples. After the usual four disclaimers¹³⁶

136 “These examples are only illustrative. You will need to consider all the facts in your own case, including the purpose of any previous visits, any emerging patterns and your total and average day counts. It is not possible to cover every eventuality in this

they are:

Example 1 (Sarah)

S is a British citizen who has lived in the UK most of her life. She has homes in London, California (USA) and France and has spent substantial amounts of time at her other homes or travelling on business.

The opportunity arises for S to travel more on business, especially in North America and she therefore spends less time in the UK and more time in her California home. S's partner and their children are based in the UK and the family spends the summer together in France. During the year ended 5 April 2010 S is present in the UK at the end of 43 days, although she typically arrives in the UK in the morning and leaves in the evening so many of the days she is in the UK do not get counted for the 183 day test.

S's 'end of day' counts for the years ended 5 April 2011, 5 April 2012 and 5 April 2013 are 85, 110 and 90 respectively. The average for the four years to 5 April 2013 is just under 82 days.

Although S has been present in the UK at the end of the day for an average of less than three months during the four years under review, she has remained resident and ordinarily resident here. This is because her presence in the UK in all years shows a pattern indicating residence here and that such residence is 'ordinary' for her. There is nothing casual about her residence – S has a home and family in the UK to which she returns whenever she wishes and her business allows. S's residence in the UK continues. Her presence in the UK is an integral part of the regular pattern of her life. The precise amount of time that S spends in the UK does not affect this fundamental point.

S has been and remains resident and ordinarily resident in the UK. It is possible that S is resident in France or the USA for the purposes of French or US federal and state income taxes. This does not affect her residence in the UK. If she is dual resident for any period it might be necessary to decide where S is treated as resident for the purposes of the relevant Double Taxation Agreement.

The next example is a straightforward case of non-ordinarily residence.

Example 2 (Juan)

J is a Spanish citizen and is seconded by his Spanish employer to work

guidance and you may like to contact us or take professional advice if your circumstances are not obviously covered in this part of the guidance. If any of the facts in the examples are changed then the status of the individuals might change."

on a project in the UK for approximately nine months from early June 2009. J's wife and family remain in Spain and he returns there to visit them every two weeks. He takes two weeks holiday in August 2009 which he spends outside the UK and another two weeks at Christmas which he spends in Spain with his family.

When he first arrives in the UK, J stays in hotels but he then takes a six-month lease on an apartment here that he extends for two months in early 2010. The project is completed and J returns to Spain in mid-March 2010.

J has spent more than 183 days in the UK. He is resident for the year ended 5 April 2010 but he is not ordinarily resident.

J takes up a new employment in Spain in July 2010. His new employer seconds him to their UK business to resolve a crisis in the business. His wife and family again remain in Spain, but he is not able to visit them very often and they visit him in the UK once a month. Between early September 2010 and 5 April 2011 J spends over 183 nights in the UK, either in a company flat or in various hotels. His secondment ends and he returns to Spain at the end of May 2011.

J is resident in the UK for the year ended 5 April 2011 but he is not ordinarily resident here.

His residence in the UK does not yet have a sufficiently settled purpose; it is still not 'ordinary' for him.

3.32.1 *Ordinary residence: arrivals*

HMRC6 provides:

7.7.2 Ordinary residence

Your ordinary residence status may affect what UK tax you have to pay and this status may change while you remain in the UK.

... Generally, you become ordinarily resident in the UK when it becomes normal ('ordinary') for you to be resident in the UK. Sometimes it is clear that you become ordinarily resident as soon as you arrive in the UK, but sometimes ordinary residence is established only after you have been here for a while. If you come to the UK for less than three years, you might not be ordinarily resident here but there are many factors to consider. You should read part 3 of this guidance which explains what is meant by 'ordinarily resident in the UK'.

If your circumstances change after you first arrive in the UK, it is possible that your ordinary residence status might change as a result.

7.7.3 Ordinary residence when you arrive

If you have come to the UK for a settled purpose, for example to live or

work in the UK for three years or more, you will be ordinarily resident from when you first arrive.

If you own or acquire accommodation on a long-term lease of three years or more in the year you arrive this is an indication that your presence in the UK forms part of the regular and habitual mode of your life for the time being. Such a mode of life means you are ordinarily resident from when you arrive. But the ownership of accommodation by itself will not make you ordinarily resident provided you dispose of it and leave the UK within three years of your arrival.

You can still be ordinarily resident in the UK even if you leave within three years, for example if your purpose for being here was settled when you first came here.

7.7.4 Ordinary residence after arrival

If you do not have a settled purpose on arrival you can still become ordinarily resident. You will become ordinarily resident with effect from the start of the tax year in which:

- you first have a settled purpose
- you decide to stay here for three years or more from the date of your arrival
- you remained for more than three years from the date of your arrival.

Factors that indicate you have made a decision to stay in the UK for more than three years include acquiring a lease on accommodation or accepting an employment contract lasting more than three years from the date of your arrival.

As explained above, if you have remained for more than three years from the date of your arrival you will be ordinarily resident here from the start of the tax year in which the third anniversary falls. While this applies to the vast majority of cases, there could be exceptions, where particular facts – that you would need to support with evidence – might indicate the contrary. For example, if you marginally overstayed a three-year period and then left the UK, perhaps because a project you were working on over-ran or a house purchase fell through, you might still be not ordinarily resident for the duration of your stay. (If you later return to the UK and become resident again, within two years of having left, you are very likely to become ordinarily resident on your return.)

In very unusual circumstances you may be resident in the UK for three years or more but remain not ordinarily resident. If this is the case, you will need to demonstrate that your residence in the UK is not ‘ordinary’ for you and that you have no settled purpose here. The circumstances in which this would apply and when you will become ordinarily resident will be taken on the facts of each case. You may wish to take professional advice if you think this applies to you.

If you are ordinarily resident in the UK, leave and return within two years, you will usually be ordinarily resident from the date of your return.

Para 7.8 HMRC6 gives three examples. After the standard disclaimers,¹³⁷ it provides:

7.8.1 Example 1 – Ordinary residence when you have remained in the UK for three years or more

When you arrived in the UK on 6 June 2009, in the tax year 2009–10, you did not think that you would be staying here for three years or more. Since then you have not bought any accommodation here or leased any accommodation for three years or more. The accommodation you have used has been on short-term leases.

On 7 June 2012 (tax year 2012–13) you are still in the UK. This is three years and a day since you first arrived here.

You will be ordinarily resident in the UK from 6 April 2012. This is because you have now been in the UK for a long enough period of time for your being here to be considered ‘ordinary’ for you. 6 April 2012 is the start of the tax year 2012–13 in which the third anniversary of your arrival in the UK occurred.

7.8.2 Example 2 – Ordinary residence when your circumstances change and you remain in the UK for longer than originally planned

When you arrived in the UK on 6 June 2009 you came on a fixed term appointment for a period of 18 months and did not think that you would be staying here for more than three years. In October 2010 you accepted a two year extension to your employment contract. You are contracted to remain in the UK until the end of 2012 which will be more than three years from the date you arrived here.

You will be ordinarily resident in the UK from 6 April 2010. This is because you are now going to be in the UK for a longer period than you first thought and the period is now long enough for your being here to be considered ‘ordinary’ for you. 6 April 2010 is the start of the tax year in which you made the decision to remain in the UK for longer than you originally planned.

¹³⁷ “These are illustrative examples to support the guidance outlined in 7.7.4. The examples are not exhaustive or definitive but will help you understand your ordinary residence status when you have come to the UK. Your ordinary residence in the UK will be based on your individual circumstances.”

If you had decided in December 2009 – in the same tax year as you arrived here, that you would be remaining in the UK until 2015 you would be ordinarily resident from 6 June 2009 which is the date you arrived in the UK. This is because – although you did not think you would be staying when you first arrived – you have decided to stay within the same tax year. The period for which you are now going to be here is long enough for your presence in the UK to be considered ‘ordinary’ for you.

7.8.3 Example 3 – Ordinary residence when you buy or lease accommodation for three years or more

When you arrived in the UK on 6 June 2009 you did not think that you would be staying here for three years or more. In May 2010 you buy a house in the UK to live in.

You will be ordinarily resident in the UK from 6 April 2010. This is because buying the house here shows that your being in the UK is now ‘ordinary’ for you. 6 April 2010 is the start of the tax year in which you bought the house.

but

If buying the house was the only reason you were ordinarily resident, and you sold the house and left the UK before 6 June 2012, you would be able to say that you were not ordinarily resident for the period you were here. The period of ownership was sufficiently short not to be classed as for a settled purpose of living in the UK.

HMRC say:

HMRC said that the recent First Tier Tribunal decision in the *Tuczka* case confirmed their interpretation of guidance on ordinary residence, building on the decision last year in *Genovese* which confirmed their interpretation of IR20 and SP 17/91 on the same matter. This meant that individuals originally intending to leave the UK within three years would be ordinarily resident from the beginning of the year in which that intention changed. At what point the decision was made to remain in the UK would always be a question of fact. The Tribunal decision in *Turberville* also confirmed HMRC’s published position. HMRC were asked whether a work permit constituted an indicator of an intention to work permanently in the UK. HMRC replied that it would be one of a series of facts about an individual’s circumstances which needed to be considered in their entirety. HMRC stressed that guidance could not be read as if it were legislation: it cannot provide a definitive answer to every situation which might arise in practice, but instead seeks to deal

with the most common cases. Whether a taxpayer's circumstances fit within these common cases will be determined by the facts. ... HMRC were asked for clarification of paragraph 7.7.3 of HMRC6 (ordinary residence in the year of arrival in the UK). They explained that it sought to make clear that an individual's circumstances could change twice within three years and that there could be no guarantee that residence in the UK for less than three years will in all cases result in a not ordinarily resident status. For instance, a trainee could be offered a permanent job in the UK which they hadn't anticipated after completing a one year placement in the UK, only to be made redundant 20 months later at which point they depart from the UK. The final paragraph of 7.7.3 makes clear that such situations might be unusual, and residence status will always depend on the actual facts of each case.¹³⁸

3.33 Students

HMRC6 provides one special rule for ordinary residence of students. Para 7.3 provides:

[1] If your home has been abroad and you have come to the UK for less than two years for a period of study or education, you might not be resident in the UK (see paragraphs 7.4 and 7.5).

We then come to the point:

[2] If you have come to the UK for more than two years but less than four years for study or education, you will be resident in the UK while you are here. But you will **not** usually be ordinarily resident if:

- you do not own or buy accommodation here
- you do not acquire accommodation here on a lease of three years or more
- when you leave the UK you do not plan to return here regularly for visits which average 91 days or more in a tax year (to calculate your average visits to the UK – see paragraph 7.6).

The word “usually” was added in the 2010 version of HMRC6, which once again adds to the vagueness and detracts from the usefulness of the passage. There is no guidance as to what takes the matter out of the

138 Joint expatriate Forum on tax and NICS: 26 May 2010
www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf.

“usual”. The point is to ensure that the taxpayer cannot rely on the passage if HMRC do not wish to follow it, but in practice no doubt that will happen rarely if at all.

It seems odd that a person here for three years to study is not ordinarily resident, but anyone else who is here for three years is ordinarily resident. Why do HMRC say this? I suspect that the practice may have a long history. The Education Act 1962 conferred student grants on those who were ordinarily resident in the UK. The Department of Education took the view that those who came to the UK to study did not become ordinarily resident (in order to deprive them of the right to a grant.) This was held to be wrong in *Shah*¹³⁹ which held that a student who comes to the UK to study comes for a settled purpose and so is ordinarily resident. The statement in HMRC6 (which presumably derives from the earlier practice, not reviewed since *Shah*) cannot possibly be defended. But it probably does not matter very often and taxpayers are not likely to complain.

DTAs often make special provision for students and will need individual consideration.¹⁴⁰

3.34 Diplomats, UN/EU officials

HMRC TDSI Guidance Notes provide:

4.44 Diplomats

... The rules for determining whether someone is resident or ordinarily resident in the UK apply to members of a Diplomatic Mission in the same way as they apply to everyone else. ...

4.45 United Nations

The salaries of United Nations workers are usually exempt from income tax but whether or not they are resident or ordinarily resident in the UK is decided in the usual way. ...

4.46 European Community (EC) Officials

139 See 3.9 (Case law: ordinary residence).

140 The OECD Model Convention art.20 provides:

“Payments which a student or business apprentice who is or was immediately before visiting a Contracting State a resident of the other Contracting State and who is present in the first-mentioned State solely for the purpose of his education or training receives for the purpose of his maintenance, education or training shall not be taxed in that State, provided that such payments arise from sources outside that State.”

... A brief outline of the residence status of officials of the European Community is

- an individual who was NOR in the UK, but was ordinarily resident in another member state before taking up such employment and who is working in a member state will remain NOR in the UK,
- an individual who was not ordinarily resident in any member state before taking up such employment will have his/her residence status determined according to the normal rules, or
- an individual who takes up employment as an official of the EC and who works outside the EC, will have his/her residence status determined according to the normal rules

An individual who was ordinarily resident in the UK before taking up employment as an official of the EC, and who works in a member state will remain ordinarily resident in the UK....

3.35 HMRC forms, rulings and certificates

3.35.1 P85 (*leaving the UK*)

The introduction to form P85 provides:

Use this form to claim tax relief or a repayment of tax if:

- you have lived or worked in the UK
- you are leaving the UK, and
- you may not be coming back or you don't know when you're coming back or,
- you are leaving the UK to work full-time abroad for at least a complete tax year.

Do not fill this form in if:

- you normally live in the UK and are going abroad for short periods, for example on holiday or a business trip
- you have completed, or are required to complete a Self Assessment tax return for the tax year that you leave the UK (unless you are leaving the UK to work full-time abroad for at least a complete tax year for a UK based employer).

The RDR Manual provides:

10115. Form P85 [December 2011]

When you know that an individual is leaving, or has left the UK

- issue form P85

Keep the completed form as a permanent note.

You are not likely to dispose of the liabilities of a departing taxpayer immediately or without continuing correspondence.

Keep personal records as file cases whilst liability is under review.

If the individual is within self assessment

The form P85 should be rejected if there is a continuing source of UK income. You should advise the customer that as he has a continuing UK source of income the SA Return issued at the end of the tax year should be completed in the normal way.

Providing the taxpayer has left the UK and all sources of UK income have ceased, the completed form P85 can be accepted as a request for an early settlement and an in-year return should be issued. (Refer to PAYE90020). However, if the taxpayer is leaving to work full time abroad for a UK employer for a period of at least a complete tax year, the form P85 can be completed to enable the taxpayer to receive a code NT. If a form P85 has not been received before the Return for the tax year of departure is issued, the following action may need to be taken

- issue the form P85 after the Return for the year of departure is received as part of a formal enquiry into the Return
- do not close the enquiry until you are sure that all the queries and action which are necessary after receipt of the completed form have been taken (particularly not before you have received advice on residence where the case needs to be sent to Specialist Personal Tax, PTI Advisory, Residence & Domicile Technical Team, Bootle.

There was formerly a form P85(S) for non UK citizens. HMRC say:

From 30 November 2010 the form P85(S) should no longer be used. Individuals claiming a tax refund on leaving the UK to work or live abroad, following the completion of a work assignment, should complete the form P85 (Leaving the UK – getting your tax right).

3.35.2 *Form P86 (arrival in the UK)*

HMRC form P86 (arrival in the UK) is now withdrawn. The RDR manual provides:

RDRM10215 - Residence: Coming to the UK: Form P86 [June 2011]

Since 1 June 2010 the form P86 has been withdrawn and new arrivals to the UK will be integrated into HMRC processes by existing means

- Form P46 or P46(Expat) for new employees
- CWF1 for newly self employed, or
- SA1 registration process for customers who are not self employed but who need to complete a tax return

Please refer to BGN 044/10 for further information (also refer to EIM42890 and PAYE81750).

3.35.3 *Form P46(expat)*

Form P46 is for new employees. Form P46(expat) is the version for employees seconded to the UK. The 04/10 version provides:

Only fill in this form if you have been seconded to work in the UK.

For the purposes of this form only, a seconded employee includes:

- individuals working wholly or partly in the UK for a UK resident employer on assignment whilst remaining employed by an overseas employer
- individuals assigned to work wholly or partly in the UK at a recognised branch of their overseas employer's business
- all individuals included by an employer within a dedicated expatriate scheme
- all individuals included by an employer within an expatriate modified PAYE scheme.

HMRC say:

The form P46 (Expat) has been designed specifically for use with inward assignee employees. HMRC procedures meant that without this special form, notification of commencement would be mis-directed within HMRC which could then lead to further difficulties for both customers and HMRC alike. It was essential that employers bringing inward assignees to the UK use form P46 (Expat) to notify commencement and indeed HMRC would no longer be able to accept forms P86 in lieu of a P46 (Expat). To do so would override fixed HMRC procedures and may generate penalties for employers. Accordingly, HMRC would no longer accept forms P86 or 64-8 as notification of a new employee where no P46 (Expat) was received and CAR Expats would return such forms where the P46 (Expat) was absent.

HMRC accepted that there may be cases where no PAYE obligation existed. In these circumstances, advisers can write to CAR Expats setting out the relevant circumstances and an SA record will be set up for the individual taxpayers.

Attention was drawn to recent publicity surrounding the SA1 process and in particular the need for National Insurance numbers to be quoted in this connection. HMRC is looking at the procedures in so far as they relate to inward

expatriates and is seeking to identify some individuals for whom an annual SA Return may not be required. This work is on-going but feedback will be provided to the Forum as soon as any is available. In the meantime, the SA1 process need not be followed for inward expatriates; CAR Expats will continue to issue an SA Return from receipt of the P46 (Expat).

HMRC confirmed that the national process related to the setting up of UTRs does not involve automatic notification to agents of the UTR created. However, in CAR Expats there will be automatic notification to agents of the UTRs where forms 64-8 have been submitted. Agents can also gain access to UTR information through the Gateway but HMRC can no longer handle requests for UTRs to be entered on to lists. It was recognised that there was some confusion around agents' codes which could lead to difficulties but HMRC felt that this was a simple thing for agents to resolve. CAR Expats was no longer resourced to handle requests for the entry of UTR details on lists provided by agents and, accordingly, would no longer be prepared to do so. Agents should therefore ensure that timely and accurate information was provided to HMRC in the first place to ensure that they were advised of the UTR on its creation and that they use the Gateway to gain access to UTRs belonging to their clients.¹⁴¹

Where s.828A ITEPA applies, an appropriate letter should be submitted with form 46(expat) to prevent issue of an SA return: see 13.31.9 (Administration: avoiding issue of SA return).

3.35.4 *Rulings*

HMRC will not give residence rulings. The International Manual provides:

162040. Determination of UK residence - individuals [January 2011]
Individuals within Self Assessment are able to certify their own residence status on their SA tax return. Residence 'rulings' as such are no longer be provided as a matter of course by HMRC. HMRC Officers who are required to certify that an individual is UK resident for the purposes of a treaty claim should act upon any relevant information provided by the customer for example on forms P85 or P86 or on the most recent SA tax return, but the provision of a certificate on that basis does not amount to the making of a formal determination of residence status. It remains open to Officers, in appropriate cases, to enquire into an individual's residence status as part of an enquiry into a tax return once it has been received.

www.hmrc.gov.uk/consultations/expat-mins-151009.htm.

3.36 Scottish taxpayers (from 2016)

HMRC say:

10.1 ... the Scotland Bill ... devolved a number of powers to the Scottish Parliament, including the power to set a Scottish rate of income tax. This would mean that Scottish taxpayers would pay an element of tax on their non-savings income direct to the Scottish Parliament at a rate to be determined. The tax would be first implemented in the tax year following the 2015 election.

10.2 This would entail significant changes to PAYE and SA systems and processes but HMRC stressed that the long lead-in times would enable them to be resolved before implementation. They also stressed that only the power to set the rate of tax was being devolved and that all other aspects of the tax system were reserved matters. This meant that there would be no impact on issues such as double taxation agreements and the remittance basis.

10.3 An individual will always be a Scottish taxpayer for a full tax year in which his sole or main residence is in Scotland. HMRC stressed, however, that split year treatment under ESC A11 would continue to be available to Scottish taxpayers entering or leaving the UK in the same way as it would for any other UK-resident taxpayer.¹⁴²

The Scotland Act 2012 introduces a definition of “Scottish taxpayer” in s.80D(1) Scotland Act 1998:

In any tax year, a Scottish taxpayer is an individual (T)—
(a) who is resident in the UK for income tax purposes, and
(b) who, for that year, meets condition A, B or C.

I refer to “**Scottish taxpayer condition A, B or C**”.

The definition of “Scottish taxpayer” is different from common law residence and distinct from the proposed statutory residence test.

3.36.1 *Scottish taxpayer condition A (close connection)*

Section 80D(2) Scotland Act 1998 provides:

142 Joint Expatriate Forum on Tax and NICs: 10 Feb 2011 Meeting Note.

T meets condition A if T has a close connection with Scotland (see section 80E).

Section 80E Scotland Act 1988 defines close connection:

- (1) To find whether, for any year, T has a close connection with any part of the UK see—
 - (a) subsection (2) (where T has only one place of residence in the UK), or
 - (b) subsection (3) (where T has 2 or more places of residence in the UK).
- (2) T has a close connection with a part of the UK if in that year—
 - (a) T has only one place of residence in the UK,
 - (b) that place of residence is in that part of the UK, and
- (3) T has a close connection with a part of the UK if in that year—
 - (a) T has 2 or more places of residence in the UK,
 - (b) for at least part of the year, T's main place of residence in the UK is in that part of the UK,
 - (c) the times in the year when T's main place of residence is in that part of the UK comprise (in aggregate) at least as much of the year as the times when T's main place of residence is in any one other part of the UK, and
 - (d) for at least part of the year, T lives at a place of residence in that part of the UK.
- (4) In this section "place" includes a place on board a vessel or other means of transport.

3.36.2 *Scottish taxpayer condition B (more days in Scotland)*

Section 80D(3) Scotland Act 1998 provides:

T meets condition B if—

- (a) T does not have a close connection with any part of the UK other than Scotland (see section 80E), and
- (b) T spends more days of that year in Scotland than in any other part of the UK (see section 80F).

Section 80F Scotland Act 1988 defines days spent in Scotland:

- (1) T spends more days of a year in Scotland than in any other part of the UK if (and only if)—

- (a) the number of days in the year on which T is in Scotland at the end of the day
equals or exceeds
- (b) the number of days in the year on which T is in any other part of the UK at the end of the day.
- (2) But T is not to be treated as being in the UK at the end of a day if—
 - (a) on that day T arrives in the UK as a passenger,
 - (b) T departs from the UK on the next day, and
 - (c) during the time between arrival and departure T does not engage in activities which are to a substantial extent unrelated to T's passage through the UK.

This is based on the residence rule: see 3.24 Days of arrival and departure).

3.36.3 *Scottish taxpayer condition C (MPs etc)*

Section 80D(4) Scotland Act 1998 provides:

- T meets condition C if, for the whole or any part of the year, T is—
- (a) a member of Parliament for a constituency in Scotland,
 - (b) a member of the European Parliament for Scotland, or
 - (c) a member of the Scottish Parliament.

See too 43.8 (Scots rates of income tax from 2016); 24.13 (Scots trusts and Scots beneficiaries from 2016); 25.3.5 (Scots trusts from 2016).

RESIDENCE OF INDIVIDUALS FROM 2013/14

3A.1 Residence from 2013/14 – Introduction

In June 2011 HMRC published a consultation paper entitled Statutory Definition of Tax Residence (“**the Residence Consultation Paper**”).¹ This proposed a new statutory residence test (“SRT”). Almost all the problems raised by the current (non)definition of residence will be swept away, thus carrying out the reform recommended by the Consolidation Committee in 1936.²

The Residence Consultation Paper proposed that the SRT would take effect from 2012/13. The timetable was unrealistic and in December 2011 the reform was sensibly put back to 2013/14:

The consultation on tax residence raised a number of detailed issues which will require careful consideration to ensure the legislation achieves its important aim of providing certainty for individuals and businesses. The Government will therefore legislate the statutory residence test in Finance Bill 2013 to take effect from April 2013 rather than April 2012. It will introduce any reforms to ordinary residence at the same time. This will give time to consult thoroughly on the detail of these changes well in advance of implementation.

The Government is committed to the form of the statutory residence test outlined in consultation. It will make a further announcement around Budget 2012 when it will publish its response to the recent consultation together with a further consultation on policy detail and draft legislation.³

1 Accessible www.hm-treasury.gov.uk/d/consult_condoc_statutory_residence.pdf

2 See 3.15.1 (Practice prior to 1936).

3 Ministerial Statement 6 December 2011 [2011] STI 3355.

In June 2012 HMRC published the response to the consultation (“**the Residence Response Paper**”)⁴ so legislation in the FA 2013 seems likely.

This chapter discusses the draft clauses. They are set out in two schedules, here called “**the SRT schedule**” and “**the Ordinary Residence Schedule**”.

The Residence Response Paper provides:

3.5 [1] The Government does not believe the test is complicated and [2] taxpayers will be able to determine their residence status with clarity if they know how many days they have spent in the UK and which of the relevant connection factors they have.

Tax complexity is a complex phenomenon⁵ but I do not expect anyone who reads this chapter will take point [1] seriously. It is however true that taxpayers will for the first time be able to determine their residence status (in the large majority of cases) with reasonable certainty. That is a tremendous improvement, and the SRT is a major achievement. The reform has benefited from the input of the professional bodies from an early stage of policy development, rather than being produced by HM Treasury/HMRC and then presented for comment in a complete form, at a consultation stage.

3A.1.1 *The next steps*

The Residence Response paper provides:

6.3 In general the Government considers that the SRT legislation is close to a final draft, subject to any changes that may be considered as a result of this consultation. However, the legislation on amendments to tax charging provisions in Part 3 and on anti-avoidance in Part 4 is at an earlier stage and the Government is aware that these parts will need refining, notwithstanding any other changes that may arise from this consultation. The anti-avoidance legislation on close company

4 HMRC, *Statutory definition of tax residence and reform of ordinary residence: a summary of responses* (June 2012)

www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf.

5 See Office of Tax Simplification, *Length of Tax Legislation as a Measure of Complexity* (April 2012)

www.hm-treasury.gov.uk/d/ots_length_legislation_paper.pdf

distributions is not yet included and will be published separately later.

...

6.5 In general the Government considers that the ordinary residence legislation is close to a final draft, subject to certain consequential changes which are not covered in this legislation, such as to Seafarers' Earnings Deduction. The Government recognises that changes will also be required to secondary legislation and plans to have draft legislation available in the autumn.

Nevertheless, I predict many changes.

The Residence Response paper provides:

6.6 Following this consultation, a revised draft of the legislation will be published in autumn 2012 as part of Finance Bill 2013 for a further 12-week period of consultation.

So the topic will need to be reviewed in the light that revised draft, again in the light of FB 2013, and finally in the light of FA 2013.

3A.2 Scope of statutory residence test

Para 1 SRT schedule provides:

- (1) This Part of this Schedule sets out the rules for determining for the purposes of relevant tax whether individuals are resident or not resident in the UK....
- (4) "Relevant tax" means-
 - (a) income tax,
 - (b) capital gains tax, and
 - (c) (so far as the residence status of individuals is relevant to them) inheritance tax and corporation tax.

The new rules do not apply for VAT⁶ or NIC.

The rules only apply to individual residence and not corporate residence.

Para 1(3) provides another exclusion:

The rules do not apply in determining for the purposes of relevant tax whether individuals are resident or not resident in England, Wales,

6 For residence for VAT purposes, see *1st Contact Ltd v HMRC* [2012] UKFTT 84.

Scotland or Northern Ireland specifically (rather than in the UK as a whole).

But that is a very rare case.

In practice I expect that the tax definition will informally be accepted in other contexts where practical. That would be sensible. The fewer residence tests we have the better.

Para 1(2) SRT schedule provides some straightforward terminology:

The rules are referred to collectively as “the statutory residence test”

Para 2 SRT schedule dots some *i*’s and crosses some *t*’s:

- (1) In enactments relating to relevant tax, a reference to being resident (or not resident) in the UK is, in the case of individuals, a reference to being resident (or not resident) in the UK in accordance with the statutory residence test.
- (2) Sub-paragraph (1) applies even if the reference relates to the tax liability of an actual or deemed person who is not an individual (for example, where the liability of another person depends on the residence status of an individual).

An example is trust residence which may depend on the residence of the individuals who are trustees.

3A.2.1 *How different is the SRT from existing residence law?*

The Residence Consultation Paper provides:

3.55 The SRT ... will broadly recreate the outcome of the current residence rules and, therefore, it is not envisaged that there will be any need to provide transitional rules to cover any change in residence status for individuals between the old rules and the new ones.

In short, the SRT is not generally intended to change the old law, only to clarify its vagueness.

3A.3 Outline of statutory residence test

Para 3, 4, SRT schedule provide:

- 3 An individual (“P”) is resident in the UK for a tax year (“year X”) if–
 - (a) the automatic residence test is met for that year, or
 - (b) the sufficient ties test is met for that year.
- 4 If neither of those tests is met for that year, P is not resident in the UK for that year.

3A.4 Automatic residence tests

Para 5 SRT schedule provides:

- (1) The automatic residence test is met for year X if P meets–
 - (a) at least one of the automatic UK tests, and
 - (b) none of the automatic overseas tests.
- (2) There are 4 automatic UK tests.

3A.4.1 *Automatic UK test 1: 183 days in UK*

Para 5(3) SRT schedule provides:

The first is that P spends at least 183 days in the UK in year X.

That reflects the existing law.

3A.4.2 *Automatic UK test 2: Home in UK*

Para 5(4) SRT schedule provides:

The second is that P’s only home⁷ is in the UK (or, if P has more than one home, all of them are in the UK) and that remains the case for–

- (a) a period of at least 91 days, all or part of which falls within year X, or
- (b) two or more separate periods within year X that together add up to at least 91 days.

3A.4.3 *Automatic UK test 3: Full-time work in UK*

Para 5(5) SRT schedule provides:

⁷ See 3A.8 (“Home”).

The third is that—

- (a) P works full-time in the UK for a period of 276 days,⁸
- (b) during that period, there are no significant breaks from work,
- (c) all or part of that period falls within year X, and
- (d) more than 75% of the total number of days in year X when P does more than 3 hours' work are days when P does more than 3 hours' work in the UK.

Para 5(6) SRT schedule defines “significant break from work”

A “significant break from work” is a period of 31 days or more where—

- (a) there is no day in the period on which P does more than 3 hours' work in the UK, and
- (b) the reason for that state of affairs is not that P was absent from work because he or she was on annual leave or on sick leave.

The Residence Response Paper invites responses on increasing the qualifying period from 9 to 12 months.

3A.4.4 *Automatic UK test 4: Year of death*

Para 5(8) SRT schedule provides:

The fourth automatic UK test is that—

- (a) P dies in year X,
- (b) for each of the previous 3 tax years, P was resident in the UK by virtue of meeting the automatic residence test,
- (c) even assuming P were not resident in the UK for year X, the tax year preceding year X would not be a split year as respects P (see Part 3 of this Schedule), and
- (d) when P died, P's normal home was in the UK (even if P was living temporarily overseas at the time).

8 Para 5(7) expands on this:

“Sub-paragraph (5)(a) is satisfied so long as there is a period of 276 days for which P works full-time in the UK, even if P in fact works full-time there for longer than that.”

One hopes that a Court would have reached that conclusion without being told.

3A.5 Automatic overseas tests

An automatic overseas test trumps an automatic UK test and leads to a conclusion of non-residence.

Para 6(1) SRT schedule provides:

There are 3 automatic overseas tests.

3A.5.1 *Automatic overseas test 1: Less than 16 days in UK*

Para 6(2) SRT schedule provides:

The first is that—

- (a) P was resident in the UK for one or more of the 3 tax years preceding year X, and
- (b) the number of days in year X that P spends in the UK is less than 16.

A special provision is needed where P dies in the year, or else any individual would be non resident in a tax year if they died between 6 and 20 April in the year. Para 6(5) SRT schedule provides:

If P dies in year X, this paragraph has effect as if the first automatic overseas test were omitted.

3A.5.2 *Automatic overseas test 2: 3 years non-residence & < 46 days in UK*

Para 6(3) SRT schedule provides:

The second is that—

- (a) P was resident in the UK for none of the 3 tax years preceding year X, and
- (b) the number of days that P spends in the UK in year X is less than 46.

This applies even if P dies in the year.

3A.5.3 *Automatic overseas test 3: Full-time work abroad & < 91 days in UK*

Para 6(4) SRT schedule provides:

The third is that–

- (a) P works⁹ full-time¹⁰ overseas¹¹ for year X,
- (b) the number of days in year X on which P does more than 3 hours' work in the UK is less than 21, and
- (c) the number of days in year X that P spends in the UK is less than 91.

The Residence Response Paper invites comments on raising the limit of working days in the UK from 20 to 25.

3A.6 The sufficient ties test

Para 7(1) SRT schedule provides:

The sufficient ties test is met for year X if–

- (a) P meets none of the automatic UK tests and none of the automatic overseas tests, but
- (b) P has sufficient UK ties for that year.

Para 7(3) SRT schedule defines “sufficient”

Whether P has “sufficient” UK ties for year X will depend on–

- (a) whether P was resident in the UK for any of the previous 3 tax years, and
- (b) the number of days that P spends in the UK in year X.

The SRT distinguishes between:

Those who have been resident in the UK for one or more of the 3 preceding years (“**leavers**”).

Those who have not been resident in the UK for any of the 3 preceding years (“**arrivers**”).

Para 8 SRT schedule defines sufficient ties for leavers:

The Table below shows how many UK ties are sufficient in a case where P was resident in the UK for one or more of the 3 tax years preceding year X–

⁹ See 3A.9.1 (Work).

¹⁰ See 3A.9.4 (“Full-time”).

¹¹ See 3A.9.3 (Location of work).

Days spent by P in the UK in year X	Number of ties that are sufficient
More than 15 but fewer than 46	At least 4
More than 45 but fewer than 91	At least 3
More than 90 but fewer than 121	At least 2
More than 120	At least 2

Para 9 SRT schedule defines sufficient ties for arrivers:

The Table below shows how many UK ties are sufficient in a case where P was resident in the UK for none of the 3 tax years preceding year X–

Days spent by P in the UK in year X	Number of ties that are sufficient
More than 45 but fewer than 91	All 4
More than 90 but fewer than 121	At least 3
More than 120	At least 2

3A.6.1 *Death in year*

Para 10 SRT schedule provides:

- (1) If P dies in year X, paragraph 8 has effect as if the words “More than 15 but” were omitted from the first column of the Table.
- (2) In addition, if the death occurs before 1 March in year X, paragraphs 8 and 9 have effect as if each number of days mentioned in the first column of the Table were reduced by the appropriate number.
- (3) The appropriate number is found by multiplying the number of days, in each case, by–

$A \div 12$

where “A” is the number of whole months in year X after the month in which P dies.
- (4) If, for any number of days, the appropriate number is not a whole number, the appropriate number is to be rounded up or down as follows–
 - (a) if the first figure after the decimal point is 5 or more, round the appropriate number up to the nearest whole number,
 - (b) otherwise, round it down to the nearest whole number.

3A.7 Days spent

“Days spent” matters for:

Automatic UK test 1: 183 days in UK

Automatic overseas test 1: Less than 16 days in UK

Automatic overseas test 2: 3 years non-residence, less than 46 UK days

Automatic overseas test 3: Full-time work abroad, less than 91 UK days

The sufficient ties tests

Para 12 SRT schedule provides:

- (1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK.
- (2) But it does not do so in the following two cases.

3A.7.1 *Days of arrival and departure*

Para 12(3) SRT schedule provides:

The first case is where—

- (a) P only arrives in the UK as a passenger on that day,
- (b) P leaves the UK the next day, and
- (c) between arrival and departure, P does not engage in activities that are to a substantial extent unrelated to P's passage through the UK.

See 3.24 (Days of arrival and departure).

The Residence Response Paper states that the Government are considering a rule which would apply to those resident in the UK in a very large number of days without being in the UK at midnight.

3A.7.2 *Exceptional circumstances*

Para 12(4) SRT schedule provides:

The second case is where—

- (a) P would not be present in the UK at the end of that day but for exceptional circumstances beyond P's control that prevent P from leaving the UK, and
- (b) P intends to leave the UK as soon as those circumstances permit.

Para 12(5) SRT schedule tries to explain the word “exceptional”:

Examples of circumstances that may be “exceptional” are—

- (a) national or local emergencies such as war, civil unrest or natural disasters, and
- (b) a sudden or life-threatening illness or injury.

Para 12 SRT schedule limits the number of exceptional days:

(6) The maximum number of days in year X to which sub-paragraph (2) may apply in reliance on sub-paragraph (4) is limited to 60 (so any days within sub-paragraph (4) above that number, whether involving the same or different exceptional circumstances, count as days spent by P in the UK).

(7) A day does not count as a day spent by P in the UK if P is not present in the UK at the end of that day.

Para 13 SRT schedule tries to explain the word “in”:

Any reference to a number of days spent in the UK “in” a specified period is a reference to the total number of days spent there (in aggregate) in that period, whether continuously or intermittently.

3A.8 “Home”

In the SRT, “home” matters for:

Automatic UK test 2: Home in UK

Automatic UK test 4: Year of death (normal home in the UK).

In other contexts, “home” also matters:

Treaty-residence.¹²

Child's domicile if parents living apart.¹³

Para 14 SRT schedule tries to elucidate the word “home”:

- (1) A “home” may be any place (including a vehicle or vessel).
- (2) A place may be P’s home whether or not P holds any estate or interest in it (and references to “having” a home are to be read accordingly).
- (3) A place that was P’s home does not continue to count as such merely because P continues to hold an estate or interest in it after P has moved

¹² See 5.9 (Permanent home).

¹³ See 2.13 (Child's domicile of dependency).

out.

The Residence Consultation Paper provides:

4.13 Residential accommodation is not treated as an individual's home if that accommodation is being advertised for sale or let and the individual lives in another residence.

See 5.9.1 ("Home").

3A.9 Work

"Work" matters for:

Automatic UK test 3: Full-time work in UK

Automatic overseas test 3: Full-time work abroad & < 91 days in UK

3A.9.1 *Work*

Para 15 SRT schedule provides:

(1) P is considered to be "working" (or doing "work") at any time when P is doing something—

- (a) in the performance of duties of an employment held by P, or
- (b) in the course of a trade carried on by P (alone or in partnership).

(2) In deciding whether something is being done in the performance of duties of an employment, regard must be had to whether, if value were received by P for doing the thing, it would fall within the definition of employment income in section 7 of ITEPA 2003.

(3) In deciding whether something is being done in the course of a trade, regard must be had to whether, if expenses were incurred by P in doing the thing, the expenses could be deducted in calculating the profits of the trade for income tax purposes (assuming P were chargeable to income tax).

(4) Time spent travelling counts as time spent working if—

- (a) the cost of the journey could, if it were incurred by P, be deducted in calculating P's earnings from that employment under ITEPA 2003 or, as the case may be, in calculating the profits of the trade under ITTOIA 2005, or
- (b) P does something else during the journey that would itself count as work.

- (5) Time spent undertaking training counts as time spent working if–
 - (a) in the case of an employment held by P, the training is provided or paid for by the employer and is undertaken to help P in performing duties of the employment, and
 - (b) in the case of a trade carried on by P, the cost of the training could be deducted in calculating the profits of the trade for income tax purposes (assuming P were chargeable to income tax).
- (6) Sub-paragraphs (4) and (5) have effect without prejudice to the generality of sub-paragraphs (2) and (3).

3A.9.2 “*Employment*”

Para 15(7) SRT schedule provides an unnecessary comment on the word “employment”:

A voluntary post for which P has no contract of service does not count as an employment for the purposes of this Schedule.

3A.9.3 *Location of work*

Para 16(1) SRT schedule provides:

Work is done where it is actually done, regardless of where the employment is held or the trade is carried on by P.

There are two exceptions. Para 16 SRT schedule provides:

- (2) But work done by way of or in the course of travelling by air or sea or via a tunnel under the sea–
 - (a) from an embarkation point overseas to a disembarkation point in the UK, or
 - (b) from an embarkation point in the UK to a disembarkation point overseas, is assumed to be done overseas.
- (3) This paragraph is subject to express provisions in this Schedule about the location of work done by international transportation workers.

3A.9.4 “*Full-time*”

Para 17 SRT schedule provides:

- (1) P works “full-time” in the UK or, as the case may be, overseas “for” a period if the number of hours per week that P works there, on average across the period, is 35 or more.
- (2) In determining whether that test is met, the length of the period may be reduced to take account of—
 - (a) reasonable amounts of annual leave taken by P during the period, and
 - (b) absences from work at times during the period when P is on sick leave and cannot reasonably be expected to work as a result of the illness or injury.
- (3) But no reduction is to be made for week-ends or public holidays.

Para 17 SRT schedule attempts to clarify the word “reasonable”:

- (4) “Reasonable” amounts of annual leave are to be assessed having regard to (among other things)—
 - (a) the nature of the work, and
 - (b) the country or countries where P is working.
- (5) If P holds more than one employment or carries on more than one trade during the period (whether consecutively or concurrently), the hours worked in the UK or, as the case may be, overseas with respect to each employment or trade are to be aggregated in determining whether P works there full-time for the period.
- (6) If P changes employment during the period—
 - (a) any gap of up to 15 days between the two employments may be deducted from the length of the period in determining whether the test in sub-paragraph (1) is met, but
 - (b) paragraph (a) permits a deduction only if P does not work at all at any time between the two employments.

3A.10 UK ties

Para 19 SRT schedule provides:

- (1) What counts as a “UK tie” depends on whether P was resident in the UK for one or more of the 3 tax years preceding year X.
- (2) If P was resident in the UK for one or more of those 3 tax years, each of the following ties counts as a UK tie.
 - (a) a family tie,
 - (b) an accommodation tie,
 - (c) a work tie,
 - (d) a 90-day tie, and

- (e) a country tie.
- (3) Otherwise, each of the following ties counts as a UK tie.
 - (a) a family tie,
 - (b) an accommodation tie,
 - (c) a work tie, and
 - (d) a 90-day tie.

3A.11 Family tie

Para 20(1) SRT schedule provides:

P has a family tie for year X if–

- (a) in year X, a relevant relationship exists at any time between P and another person, and
- (b) that other person is someone who is resident in the UK for year X.

3A.11.1 Relevant relationship

Para 20(2) SRT schedule provides:

A relevant relationship exists at any time between P and another person if at the time–

- (a) P has a husband or wife or civil partner and they are not separated¹⁴ at the time,
- (b) P and another person are living together as husband and wife or, if they are of the same sex, as civil partners, or
- (c) P is a parent of a child under the age of 18.

3A.11.2 Separated children

Para 20(3) SRT schedule provides:

P does not have a family tie for year X by virtue of sub-paragraph (2)(c)

14 Para 20(5) SRT schedule provides the common form definition of “separated”:

“Separated” means separated–

- (a) under an order of a court of competent jurisdiction,
- (b) by deed of separation, or
- (c) in circumstances where the separation is likely to be permanent.

if P sees the child in the UK on fewer than 61 days (in total) in—

- (a) year X, or
- (b) if the child turns 18 during year X, the part of year X before the day on which the child turns 18.

The drafter attempts to clarify the word “see”. Para 20(4) provides:

A day counts as a day on which P sees the child if P sees the child in person for all or part of the day.

3A.11.3 *Ascertaining residence of family member for family tie test*

In order for an individual to apply the family tie test, it is necessary to decide whether the spouse/child is resident in the UK. But in order to decide whether an individual’s spouse is resident under the SRT, it would be necessary to decide whether the individual is resident in the UK.

Para 21 SRT schedule solves that problem by amending the residence test:

(1) This paragraph applies in deciding for the purposes (only) of paragraph 20(1)(b) whether a person with whom P has a relevant relationship (“a family member”) is someone who is resident in the UK for year X.

(2) A family tie based on the fact that a family member has, by the same token, a relevant relationship with P is to be disregarded in deciding whether that family member is someone who is resident in the UK for year X.

Para 21 SRT schedule provides a special rule for residence of children:

(3) A family member falling within sub-paragraph (4) is to be treated as being not resident in the UK for year X if the number of days that he or she spends in the UK in the part of year X outside term-time is less than 21.

(4) A family member falls within this sub-paragraph if he or she—

- (a) is a child of P’s who is under the age of 18,
- (b) is in full-time education in the UK at any time in year X, and
- (c) is resident in the UK for year X but would not be so resident if the time spent in full-time education in the UK in that year were disregarded.

(5) In sub-paragraph (4)—

- (a) references to full-time education in the UK are to full-time education at a university, college, school or other educational establishment in the UK, and
- (b) the reference to the time spent in full-time education in the UK is to the time spent there during term-time.

3A.12 Accommodation tie

Para 22 SRT schedule provides:

- (1) P has an accommodation tie for year X if–
 - (a) P has a place to live in the UK,
 - (b) that place is available to P during year X for a continuous period of at least 91 days, and
 - (c) P spends at least one night at that place in that year.
- (2) If there is a gap of fewer than 16 days between periods in year X when a particular place is available to P, that place is to be treated as continuing to be available to P during the gap.
- (3) P is considered to have a “place to live” in the UK if–
 - (a) P has a home in the UK,
 - (b) P has a holiday home, week-end home, temporary retreat or something similar in the UK, or
 - (c) accommodation is otherwise available to P where P can live when P is in the UK.
- (4) Accommodation may be “available” to P even if P holds no estate or interest in it and has no legal right to occupy it.
- (5) If the accommodation belongs to a close relative of P, sub-paragraph (1)(c) has effect as if for “at least one night” there were substituted “a total of at least 16 nights”.
- (6) A “close relative” is–
 - (a) a parent or grandparent,
 - (b) a brother or sister,
 - (c) a child aged 18 or over, or
 - (d) a grandchild aged 18 or over,in each case, whether by blood or half-blood or by marriage or civil partnership.

The residence response paper provides:

3.143 The revised definition will generally exclude short stays in hotels and guesthouses because hotel rooms cannot be said to be available to an individual other than on nights which they are paid for. Only if the

individual books a hotel room for at least 91 days continuously in a tax year (subject to the 16 day rule referred to above) will it be treated as being available accommodation under the test.

3A.13 Work Tie

Para 23(1) SRT schedule provides:

P has a work tie for year X if P works in the UK for at least 40 days (whether continuously or intermittently) in year X.

Para 23(2) SRT schedule defines “works in the UK for a day”:

For these purposes, P works in the UK for a day if P does more than 3 hours’ work in the UK on that day.

The Residence Response Paper invites comments on increasing the time that constitutes a working day from 3 to 5 hours.

3A.14 90-day Tie

Para 24 SRT schedule provides:

P has a 90-day tie for year X if P has spent more than 90 days in the UK in—

- (a) the tax year preceding year X,
- (b) the tax year preceding that tax year, or
- (c) each of those tax years.

3A.15 Country tie

Para 25 SRT schedule provides:

(1) P has a country tie for year X if the country in which P spends the greatest number of days in year X is the UK.

(2) If—

- (a) P spends the same number of days in two or more countries in year X, and
- (b) that number is the greatest number of days spent by P in any country in year X,

P has a country tie for year X if one of those countries is the UK.

The country tie applies to leavers but not to arrivers. Presumably the object is that HMRC can notify tax authorities of the country where the individual spends most time, to see if tax should be paid there.

The question will sometimes arise as to what constitutes a single country. If an individual spends time in different states of a federal country, such as the USA, then the time counts as spent in one country. But some constitutional research will occasionally be necessary. Are Spain and Majorca one country? Or Guernsey, Alderney and Sark? Or are they separate countries?

3A.16 International transportation workers

3A.16.1 Meaning of “international transportation worker”

Para 18 SRT schedule provides:

- (1) An “international transportation worker” is someone who—
 - (a) holds an employment, the duties of which consist of duties to be performed on board a vehicle, aircraft or ship as it makes international journeys, or
 - (b) carries on a trade, the activities of which consist of the provision of services on board a vehicle, aircraft or ship¹⁵ as it makes international journeys.
- (2) But a person is not an international transportation worker by virtue of subparagraph (1)(b) unless, in order to provide the services, he or she has to be present (in person) on board the vehicle, aircraft or ship as it makes those journeys.
- (3) Any duties or activities of a purely incidental nature are to be ignored in deciding whether the duties of an employment or the activities of a trade consist of duties or activities of a kind described in sub-paragraph (1)(a) or (b).

The Residence Response Paper gives the examples of pilots, airline crew, truck drivers, mariners and ferry crew.

3A.16.2 Consequence of being international transportation worker

Para 5(9) SRT schedule provides:

¹⁵ Defined para 19(4) SRT schedule: “Ship” includes any kind of vessel.

If P is an international transportation worker at any time in year X, this paragraph has effect as if the third automatic UK test were omitted.

Para 6(6) SRT schedule provides:

If P is an international transportation worker at any time in year X, this paragraph has effect as if the third automatic overseas test were omitted.

See:

3A.4.3 (Automatic UK test 3: Full-time work in UK).

3A.5.3 (Automatic overseas test 3: Full-time work abroad).

There are special rules for UK work ties. Para 23 SRT schedule provides the general rule:

- (1) P has a work tie for year X if P works in the UK for at least 40 days (whether continuously or intermittently) in year X.
- (2) For these purposes, P works in the UK for a day if P does more than 3 hours' work in the UK on that day.

Para 23 SRT schedule then sets out the rule for international transport workers:

- (3) If P is an international transportation worker, P is assumed to do--
 - (a) more than 3 hours' work in the UK on any day on which P starts an international journey (as such a worker) that begins in the UK, and
 - (b) fewer than 3 hours' work in the UK on any other day.
- (4) The assumption in sub-paragraph (3)(a) applies--
 - (a) whether or not P completes the journey on that day,
 - (b) regardless of how late in the day the journey begins, and
 - (c) whether or not P also starts other international journeys on the same day that begin overseas.

3A.17 Continuing significance of old residence law

Para 111 SRT schedule provides:

- (1) This paragraph applies if--
 - (a) year X or, in Part 3 of this Schedule, the relevant year is the tax year 2013-14, 2014-15 or 2015-16, and
 - (b) it is necessary to determine under this Schedule whether an

individual was resident or not resident in the UK for a tax year before the tax year 2013-14 (a “pre-commencement tax year”).

(2) The question is to be determined in accordance with the rules in force for determining an individual’s residence for that pre-commencement tax year (and not in accordance with the statutory residence test).

(3) But an individual may by notice in writing to HMRC elect, as respects one or more pre-commencement tax years, for the question to be determined instead in accordance with the statutory residence test.

(4) A notice under sub-paragraph (3)–

- (a) must be given no later than the first anniversary of the end of year X or, in a Part 3 case, the relevant year, and
- (b) is irrevocable.

Because of the distinction between leavers and arrivers, the pre-SRT residence law will continue be directly relevant to determine whether a person is a leaver or an arriver:

2013/14: position depends on residence in 2009/10, 2010/11, 2011/12 applying pre-SRT residence law (in absence of election)

2014/15: position depends on residence in 2010/11, 2011/12 applying pre-SRT residence law (in absence of election)

2015/16: position depends on residence in 2011/12 applying pre-SRT residence law (in absence of election)

By **2016/17** the position will depends on residence in 2013/14 onwards, applying the new law; but the residence position in those years may in part depend on the old law. Thus it will take decades before the old law is completely obsolete, but the number of cases in which it matters will become small by 2016 and will diminish each year thereafter.

Probably in practice one will have regard to the SRT for pre-SRT years, (even when no election is made). That would be sensible since the new rules “broadly recreate the outcome of the current residence rules”.

An election would seem to be appropriate in all cases of doubt but it might have the downside of focussing HMRC attention on uncertain claims of non-residence in pre-SRT years.

3A.18 Ordinary residence

The Residence Response Paper provides:

4.5 ... The Government has therefore decided to abolish the concept of

ordinary residence for tax purposes but it will retain OWR [overseas workday relief] and put it on a statutory footing ...

Consequential changes

4.7 The Government will make changes throughout the tax code to remove references to ordinary residence and replace them with references to residence. The Government accepts that this will change the population who are affected by certain legislative provisions. For example, it will mean that more individuals will be capable of falling under the Transfer of Assets Abroad rules. The Government has reviewed the many areas of legislation affected and concluded that these changes are reasonable and proportionate. The table below summarises the most significant provisions affected.

Table 4.A: Summary of main tax provisions affected by abolition of ordinary residence

Provision	Current application	Current application Future application
General remittance basis	Available if tax resident and non-domiciled or not ordinarily resident	Available only if tax resident and non-domiciled
Overseas workday relief	Available if tax resident and ordinarily resident	Replaced with a statutory relief Relief will only be available if non-domiciled.
Transfer of Assets Abroad	Applies to individuals who are ordinarily resident	Will apply to individuals who who are tax resident
Seafarers Earnings Deduction	Available if ordinary resident in the UK or tax resident in an EU or EEA state	Available if tax resident in the UK (or resident in an EU or EEA state)
Foreign service relief for termination payments	Applies in respect of earnings related to UK duties for individuals who are not ordinarily resident	Will apply only in respect of earnings for overseas duties.
Capital gains tax	Applies to UK gains if individual is tax resident or ordinarily resident	Will apply to UK gains only if individual is tax resident

Capital gains tax temporary non-residence rule	Applies to individuals who are tax resident or ordinarily resident	Will apply to individuals who are tax resident
Taxable lump sums from pension schemes (ESC A10)	Applies in respect of earnings related to UK duties for individuals who are not ordinarily resident	Will apply only in respect of earnings for overseas duties
Individual Savings Accounts (ISAs)	Available to individuals who are tax resident and ordinarily resident	Will apply to individuals who are tax resident. ¹⁶
FOTRA securities	Applies where the holder is not ordinarily resident	Will apply where the holder is not tax resident.

...

4.9 There a small number of places where the Government does not wish to change the law and the existing reference to ordinary residence will remain in place. These are:

- eligibility for blind person's allowance which is linked to ordinary residence in Scotland or Northern Ireland rather than in the UK (section 38 ITA 2007);
- exemption condition for income from Ulster Savings Certificates which is linked to ordinary residence in Northern Ireland (section 693 ITTOIA 2005); and
- certification of diplomatic exemption which is linked to ordinary residence outside the UK (section 841 ITA 2007).

3A.18.1 *Ordinary residence transitional relief*

The Residence Response paper provides:

4.10 In recognition that abolishing ordinary residence is a fundamental change to the tax system, the Government will introduce transitional provisions to ensure that individuals who currently benefit from being not ordinarily resident do not lose out following abolition of ordinary residence. These will allow those who currently receive a particular tax treatment as a result of their ordinary residence status to continue to do so following the commencement of the new legislation, for as long as they would have continued to receive it under the existing rules; this will

¹⁶ This change will be made in subsequent secondary legislation.

be for a maximum of two complete tax years following commencement. 4.11 These transitional provisions will apply to instances in tax legislation where an individual can currently receive beneficial tax treatment or relief or be protected from tax charges due to being not ordinarily resident and could stand to lose that treatment following abolition of ordinary residence in future. Specifically, there will be transitional grandfathering provisions for:

- overseas workday relief;
- remittance basis;
- Transfer of Assets Abroad;
- Seafarers Earnings Deduction; and
- foreign service relief.

The Ordinary Residence schedule provides:

Commencement

24 The amendments made by this Part [part 1] of this Schedule have effect in relation to an individual's foreign income and gains for the tax year 2013-14 or any subsequent tax year.

Savings

25 (1) This paragraph applies to an individual who is not ordinarily resident in the United Kingdom at the end of the tax year 2012-13.

(2) Enactments relating to income tax or capital gains tax have effect, in relation to any eligible foreign income and gains of the individual, as if the amendments made by this Part of this Schedule had not been made.

(3) "Eligible foreign income and gains" means.

(a) if the individual was not ordinarily resident in the United Kingdom in the tax year 2011-12, foreign income and gains for the tax year 2013-14,

(b) otherwise, foreign income and gains for the tax year 2013-14 and the tax year 2014-15.

(4) Where, by virtue of this paragraph, it is necessary to determine whether an individual is (or is not) ordinarily resident in the United Kingdom at a time on or after 6 April 2013, the question is to be determined as it would have been in the absence of this Schedule.

CHAPTER FOUR

RESIDENCE OF TRUSTEES

4.1 Trustee residence – Introduction

Trustee¹ residence (like individual residence) is fundamental to the territorial limitations of IT and CGT.

There is one main definition of trustee residence, which is the same for IT and CGT.² The IT and CGT provisions are differently worded, but the effect of the rules is the same. In this chapter I set out both sets of provisions.³

The current rules adopt proposals originally made in the Trusts Consultative Document (1991).⁴ This is worth reading as it explains the background to the current rules.

The law before 2007/08 provided that a UK professional trustee of a trust with a non-resident, non-domiciled settlor was regarded as non-resident. This sensible provision allowed UK professional trustees to act without attempting to tax them. The object was to allow the UK to compete on equal tax terms with foreign trustees. The rule also helped keep administrative expenses down. The reason given for its abolition was that the Department of Trade and Industry had advised the rule breached EU

1 Strictly, one should refer to the residence of trustees, not the residence of a trust, but in practice the two expressions are used synonymously.

2 For IHT see 4.14 (Trustee residence for IHT).

3 Under the FA 2006, the wording was exactly the same (though the provisions were set out twice, once in ICTA and again in TCGA). But ITA repealed the ICTA provisions and recast them in its own plain English style. If (as the professional bodies asked at the time) the 2006 reform had been put back to 2007, this complication would have been avoided. But there it is.

4 Chapter 10, accessible www.kessler.co.uk.

restrictions on State Aid.⁵

4.1.1 *Cross references*

Different rules apply to PRs⁶ and to trustees of unit trusts.⁷

For the position where trustees change residence during a year, see 6.15 (Income tax on trustees).

4.2 Who are the trustees?

One needs first of all to identify the trustees.

“Trustee” is not usually defined for IT and CGT purposes and the identity of trustees of a classic settlement is a matter of trust law.

What if there has been an invalid appointment of new trustees, and the trust property has been transferred to the invalidly-appointed trustees? Trust law distinguishes between:

- (1) a validly appointed trustee, and
- (2) a person purportedly but invalidly appointed as trustee; such a person is not the proper owner and administrator of the trust assets, but is of course subject to the duty to transfer the trust assets to the correct trustees, and if they act in trust administration, they may become a trustee *de son tort*.

What confuses matters is that the term “trustee” is sometimes (but not always) used to describe a person in category (2).⁸ But it is considered that such a person is not a “trustee” in the full trust law sense, and so is not

5 There are strong arguments against that view of EU law, and indeed the former UK rule still applies in Ireland. However HMRC refused to disclose the DTI advice which makes it impossible to assess the advice which HMRC said they received. One might speculate as to whether this was a true reason or an excuse. Following an application under the Freedom of Information Act, the Information Tribunal “urged” HMRC to disclose their reasons (which were “bald and substantially unexplained.”) Unfortunately the Tribunal did not order HMRC to do so and HMRC disregarded the urging of the Information Tribunal as non-binding. So it remains a matter of speculation. For the freedom of information aspects, see www.kessler.co.uk/FoI.

6 See 73.3 (Residence and domicile of PRs for CGT) and 74.2 (Residence of PRs for IT)

7 See 37.3.2 (Residence of trustees of unit trust).

8 See R.C. Nolan’s learned article “Equitable Property” [2006] LQR 232.

a trustee for tax purposes.⁹

For the question whether a protector may be a trustee, see 4.13 (UK protector and trustee residence). For the identity of trustees of a settlement-arrangement which is not a classic trust, see 48.2 (“Settlement” and “trustee”).

4.3 Trustees treated as single and distinct person

Section 474(1) ITA provides:

For the purposes of the Income Tax Acts (except where the context otherwise requires), the trustees of a settlement are together treated as if they were a single person (distinct from the persons who are the trustees of the settlement from time to time).¹⁰

EN CTA 2010 Annex 1 change 3 explains this deeming provision:

Section 474(1) of ITA (which applies also for corporation tax purposes - see section 1169 of this Act) substitutes a notional person for the trustees. That notional person is not a company and so cannot be an associated company [for the purposes of s.25 CTA 2010]. It follows that [the former] ESC C9 is not needed to prevent a trustee company and a company which it controls from being treated as associated. Similarly, if section 474(1) of ITA treats the trustees of two settlements as separate notional person, the concession is not needed to prevent two companies controlled by different settlements from being treated as associated [even if the trustees are actually the same person].

Section 69(1) TCGA provides the equivalent rule for CGT:

For the purposes of this Act the trustees of a settlement shall, unless the context otherwise requires, together be treated as if they were a single person (distinct from the persons who are trustees of the settlement from time to time).

9 For CGT this is clearer as an invalidly appointed trustee would be a nominee within s.60 TCGA, but the same would apply for IT. In *Jasmine Trustees v Wells & Hind* [2007] STC 660 it was held that invalidly appointed trustees were “trustees” but were not “trustees of the settlement”, which is another route to the same destination.

10 The CGT equivalent is s.69(1)(3) TCGA.

4.4 Trustee residence for income tax and CGT

Section 475 ITA provides:

- (1) This section applies for income tax purposes and explains how to work out, in relation to the trustees of a settlement—
 - (a) whether or not the single person mentioned in section 474(1) is UK resident, and
 - (b) whether or not that person is ordinarily UK resident.
- (2) If at a time either condition A or condition B is met, then at that time the single person is both UK resident and ordinarily UK resident.
- (3) If at a time neither condition A nor condition B is met, then at that time the single person is both non-UK resident and not ordinarily UK resident.

Similarly, s.69(2) TCGA provides:

The deemed person referred to in subsection (1) shall be treated for the purposes of this Act as resident and ordinarily resident in the UK at any time when a condition in subsection (2A) or (2B) is satisfied.

There are therefore two circumstances in which trustees are UK resident: Condition A and Condition B. In the CGT legislation these are called Condition 1 and Condition 2. I refer to them as “**trustee residence conditions A and B**”, to avoid confusion with the myriad other conditions in ITA.

Since the same rules govern trustee-residence and trustee-ordinary residence, I generally refer just to “trustee-residence” and leave trustee-ordinary residence to be understood.

4.5 Trustee residence condition A: all trustees UK resident

Section 475(4) ITA provides:

Condition A is met at a time if, at that time, all the persons who are trustees of the settlement are UK resident.

Similarly for CGT, s.69(2A) TCGA provides:

Condition 1 is that all the trustees are resident in the UK.

One must identify the trustees' actual place of residence in their personal capacities, applying the tests of individual/corporate residence to each individual or corporate trustee. If all the trustees are UK resident, the trust is UK resident; conversely if all the trustees are not resident in the UK, then the trust is non-resident.

4.6 Trustee residence condition B: mixed resident trustees

Condition B deals with the position of trustees of mixed residence. Section 475(5) ITA provides:

Condition B is met at a time if at that time—

- (a) at least one person who is a trustee of the settlement is UK resident and at least one such person is non-UK resident, and
- (b) a settlor in relation to the settlement meets condition C (see section 476).

I refer to condition C as “**trustee residence condition C**”.

Similarly for CGT, s.69 TCGA provides:

(2B) Condition 2 is that:

- (a) at least one trustee is resident in the UK,
- (b) at least one is not resident in the UK, and
- (c) a settlor in relation to the settlement was resident, ordinarily resident or domiciled in the UK at a time which is a relevant time in relation to him.

(2C) In subsection (2B)(c) ‘relevant time’ in relation to a settlor—

- (a) means where the settlement arose on the settlor's death (whether by will, intestacy or otherwise), the time immediately before his death, and
- (b) in any other case, a time when the settlor made the settlement (or was treated for the purposes of this Act as making the settlement).

4.7 Trustee residence condition C

Condition C corresponds to the CGT relevant time rule. Section 476 ITA provides:

How to work out whether settlor meets condition C

- (1) This section applies for the purpose of working out whether a settlor

(“S”) in relation to a settlement meets condition C at a time.

Section 476(2) ITA deals with testamentary trusts:

If—

- (a) the settlement arose on S’s death (whether by S’s will, on S’s intestacy or in any other way), and
 - (b) immediately before S’s death, S was UK resident, ordinarily UK resident or domiciled in the UK,
- then S meets condition C from the time of S’s death until S ceases to be a settlor in relation to the settlement.

Section 476(3) ITA deals with lifetime trusts:

If—

- (a) the settlement is not within subsection (2)(a), and
 - (b) at a time when S made the settlement (or is treated for the purposes of the Income Tax Acts as making the settlement), S was UK resident, ordinarily UK resident or domiciled in the UK,
- then S meets condition C from that time until S ceases to be a settlor in relation to the settlement.

For the purposes of discussion it is convenient to have some terminology and I coin the following terms:

- (1) A “**UK-linked settlor**” is one within Condition C, i.e. (in short) who is resident, ordinarily resident or domiciled in the UK when they made the settlement.
- (2) A “**UK-linked trust**” is one where the settlor (or a settlor) was UK-linked when they made the settlement.
- (3) A trust has “**mixed resident trustees**” if some trustees are UK resident and some are not.

Thus (in my terminology) a trust with mixed resident trustees is UK resident if it is a UK-linked trust; conversely it is non-resident if it is not a UK-linked trust.

4.7.1 *Identifying settlor and date of provision: tainting*

In trusts with mixed resident trustees, it is necessary to identify the

settlor(s)¹¹ and to ascertain when the settlor(s) provide trust property.

A trust whose settlor is not UK-linked may have some UK trustees (as long as they are not the sole trustees). In that case, however, one must take care that no *other* UK-linked person provides even a nominal amount of funds because that will make them co-settlors and the trust UK resident. This is known as “tainting” the trust.¹²

Suppose:

- (1) Year 1: the settlor makes a trust when not UK resident;
- (2) Year 2: the *same* settlor comes to the UK and adds property to the settlement.

It is arguable that the time that S made the settlement was year 1; in year 2 S does not make a separate settlement; so the settlement is not UK-linked. However one should not plan on that basis.

For the position where a settlor leaves a loan outstanding after coming to the UK, see 75.16 (Interest-free or back-to-back loan).

4.7.2 *Split years*

Suppose a settlor makes a trust with mixed resident trustees and becomes UK resident later but in the same tax year. Since the reference is to residence at the (specific) time when S made the settlement, this is not a UK-linked trust.

4.8 **Accidental residence: a trap**

A trust may become UK resident if:

- (1) its sole trustee becomes UK resident; or
- (2) any trustee becomes UK resident and it is a UK-linked trust.

The consequences of a trust becoming UK resident will be disastrous for CGT and (except for IP trusts) for IT. Before 6 April 2007 this rule was mitigated for CGT, because a trust would not become UK resident for CGT if a trustee became resident for one year only.¹³ That has been withdrawn. So it is essential for an individual to resign trusteeship before becoming UK resident if (1) a sole trustee or (2) trustee of a UK-linked

¹¹ See 75.1 (Who is the settlor?).

¹² See 75.3.8 (Tainting).

¹³ See the 4th edition of this book para 5.6.1 (Administration “ordinarily” carried on outside UK).

trust. This includes trusteeships of foreign law charitable trusts.

This state of affairs is deliberate, for the 1991 consultative document discussed a relief for temporary resident trustees, but suggested, implausibly, that the problem was not significant. In practice, in cases of unfairness, I expect the problem will be overlooked or ignored by non-compliant taxpayers, and HMRC may not spot it or turn a blind eye.

4.9 Sub-funds

It is common for one trust to hold separate funds (“sub-funds”) on separate terms, and it is possible (though not common) for the sub-funds to have separate trustees. Section 474(2) ITA provides:

If different parts of the settled property in relation to a settlement are vested in different bodies¹⁴ of trustees, subsection (1) and sections 475 and 476 apply in relation to the different bodies as if they were all one body.

Thus the trust is UK resident unless the trustees of the sub-funds jointly meet the trustee residence conditions.

Section 474(3) deals with Settled Land Act settlements:

The cases covered by subsection (2) include cases where settled land (within the meaning of the Settled Land Act 1925) is vested in the tenant for life and investments representing capital money are vested in the trustees of the settlement.¹⁵

Settled Land Act settlements are obsolescent and not considered here.

The FA 2006 introduced a regime for sub-funds where there has been a sub-fund election. The regime is supposed to be a relief, but its conditions are so strict that it is almost never used. In the first year of the sub-fund regime, only *eight* sub-fund elections were made.¹⁶ The lengthy and complex provisions are dead letter tax law. There is a special residence rule for trusts subject to a sub-fund election: see s.477 ITA. In the

14 The drafter has here retained the expression “body of trustees” which has elsewhere been deleted from the legislation, but it does not matter.

15 The CGT equivalent is s.69(3) TCGA.

16 Private correspondence.

circumstances it is not necessary to consider this here.

4.10 Transfer between settlements

Section 476(4) ITA deals with transfers between settlements:

(4) Further, if—

- (a) there is a transfer of property in relation to which section 471 applies,
- (b) S is a settlor in relation to settlement 2 as a result of that section, and
- (c) immediately before the disposal by the trustees of settlement 1, S meets condition C as a settlor in relation to settlement 1 as a result of subsection (2) or (3) or this subsection,

then S meets condition C as a settlor in relation to settlement 2 from the time S becomes such a settlor until S ceases to be such a settlor.

(5) “Settlement 1” and “settlement 2” are to be read in accordance with section 470(1).

For CGT, the equivalent is the last paragraph of s.69(2C) TCGA:

and, in the case of a transfer of property from Settlement 1 to Settlement 2 in relation to which s.68B applies, “relevant time” in relation to a settlor of the transferred property in respect of Settlement 2 includes any time which, immediately before the time of the disposal by the trustees of Settlement 1, was a relevant time in relation to that settlor in respect of Settlement 1.

4.11 Permanent establishment residence rule

Section 475(6) ITA provides:¹⁷

If at a time a person (“T”) who is a trustee of the settlement acts as trustee in the course of a business which T carries on in the UK through a branch, agency or permanent establishment there, then for the purposes of subsections (4) and (5) assume that T is UK resident at that time.

¹⁷ The CGT equivalent is s.69(2D) TCGA.

I refer to this as the “**PE residence rule**”. The Trusts Consultative Document (1991) explains the reasoning:

10.21 The income tax test might need to be modified for certain foreign corporate trustees. A trust company, resident outside the UK, could be the sole trustee of a trust which was dealt with in this country by the company’s UK branch. It would not be appropriate if such a trust were treated as non-resident, because it would then be taxed more favourably than a similar trust dealt with by a branch of a UK corporate trustee, or by some other UK professional. That could both lead to a loss of tax and put UK professionals at a competitive disadvantage. It is therefore suggested that the UK branch of a foreign trustee should be treated as a trustee resident in the UK for the purpose of the common residence test.¹⁸

The PE residence rule has four requirements:

- (1) A trustee carries on a business.
- (2) It carries on business in the UK.
- (3) It carries on business through a branch, agency or PE in the UK.
- (4) It acts as trustee in the course of that business.

HMRC has published guidance on the PE residence rule (“**HMRC Trustee Residence Guidance**”).¹⁹ This is supplemented by another lengthy guidance issued in 2010 which is not discussed here, but which I hope to consider in the next edition.²⁰

4.11.1 “*A business*”

The PE residence rule only applies if the trustee carries on a business. A trustee which does not charge, or only charges to recoup expenses (such as a family trustee company) does not carry on a business. This may offer

¹⁸ accessible www.kessler.co.uk.

¹⁹ Accessible www.hmrc.gov.uk/cnr/trustee-res-guidance.pdf. The first edition was published July 2009 and lightly revised in December 2011 (though at present the website version is still misdated 1 July 2009). HMRC originally said that the guidance would be incorporated into the TSE Manual but they have either forgotten or changed their minds about that.

²⁰ Taxguide 3/10 Trustee Residence: Guidance note agreed by HMRC issued August 2010 by ICEAW, CIOT and STEP accessible www.icaew.com/en/technical/tax/tax-faculty/~media/Files/Technical/Tax/Tax%20news/TaxGuides/taxguide-3-10-trustee-residence.ashx.

a solution to the problem of the PE residence rule.

HMRC agree. HMRC Trustee Residence Guidance provides:

By business we mean the business of providing professional trustee services for a fee.

4.11.2 “Acting as trustee in the course of a business”

The business must be (or include) the business of acting as trustee. For instance, a trustee may run a property business in the UK, but is not acting as trustee in the course of running that business.

HMRC agree. HMRC Trustee Residence Guidance provides:

8. When considering the applicability of the [PE residence rule] the following three questions are relevant:

A. Is the trustee carrying on a business in the UK?

... This question does not relate to the business of a particular trust that might be conducted by the trustee. It enquires whether the person who is a trustee carries out business activities (as a professional or businessman, not as trustee of a particular trust) in the UK.

HMRC Trustee Residence Guidance provides:

8. When considering the applicability of the [PE residence rule] the following three questions are relevant ...

B. If the trustee is carrying on a business in the UK is it carrying on that business through a branch, agent, or permanent establishment in the UK?

Again this means that the trustee is carrying on through the branch, agency or permanent establishment the sort of activities from which it substantially derives its worldwide profits - providing professional services for a fee - and not what it is doing in relation to an individual trust.

In the case of a corporate trustee it might be the case that activities are carried out in the UK on its behalf by a dependent agent with the result that the trustee is treated as having a PE in the UK (see paragraph 3 of Part 2 of this guidance).

4.11.3 “Business carried on in the UK”

What if T carries on business partly in the UK and partly elsewhere? It is

suggested that T carries on business in the UK, so if the UK part is carried on through a PE, T is deemed UK resident. If this is right, the rule lacks all proportionality. There is no *de minimis* rule. If a tiny part of T's trust business is carried on through a UK PE, the entire trust may become UK resident. As to whether a business is partly carried on in the UK, see 15.5 (Trading income of a non-resident), but if the business is carried on through a PE in the UK, there must be a business carried on in the UK.

4.11.4 “Through a branch/agency and PE”

In tax, the concept PE is used for companies²¹ and “branch or agency” is used for individuals.²² It is considered that one asks whether an individual trustee is carrying on a trustee business through a branch/agency. One asks whether a corporate trustee is carrying on a trustee business through a PE. One does not ask if an individual has a PE, or if a company has a branch or agency. HMRC agree. HMRC Trustee Residence Guidance provides:

5. HMRC accept that for trustees the ‘branch’ and ‘agency’ tests apply to non-corporate trustees and the ‘*permanent establishment*’ test to corporate trustees. Non-UK resident companies that are trustees therefore need only be concerned about being treated as UK resident if they carry on a business through a permanent establishment in the UK. This is in line with section 10B Taxation of Chargeable Gains Act 1992 which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here. ...

In practice offshore trusts often do not have individuals as trustees, and where individuals do act, they do not usually do so “in the course of business”. Accordingly, the question will normally be whether a corporate trustee has a PE: branch/agency will not normally arise. Since branch/agency is a somewhat undeveloped concept that is just as well. If, exceptionally, the issue did arise, the concept of branch/agency is more or less the same as PE and for most practical purposes is identical.

21 The statutory definition only applies to companies. See 81.2.1 (Scope of UK law definition).

22 For discussion of these concepts, see 81.2 (Meaning(s) of “permanent establishment”); 81.12 (Meaning of “branch or agency”).

If, as advocated in this book, the concept of branch/agency was replaced altogether by PE, this problem would cease to arise.²³

4.11.5 *One trustee of several trusts*

What is the position if a person is trustee of several trusts and acts as trustee through a UK PE for one trust, but not the others? It is considered that only that one trust is UK resident. This view makes better sense in the context and is supported by the rule that trustees are a separate person from the person who is actually trustee. HMRC agree. HMRC Trustee Residence Guidance provides:

8. When considering the applicability of the [PE residence rule] the following three questions are relevant ...

C. If so is the trustee carrying on the activity of being a trustee of that particular trust in the course of its business through the branch, agent or permanent establishment?

For example, a corporate trustee could have a permanent establishment in the UK but it is only when it is acting as a trustee through that place that the deemed residence rules apply in relation to the particular trust for which the company acts as trustee. The test is on a trust by trust basis. So while a corporate trustee might be acting as a trustee in relation to one trust through a fixed place of business in the UK, other trusts must be considered separately according to their facts and circumstances.

The same principle applies in the case of a non-corporate trustee: the test is on a trust by trust basis.

4.11.6 *Several trustees of one trust*

Suppose:

- (1) a trust has two trustees, T1 and T2.
- (2) T1 is deemed UK resident (because it has a UK PE) but T2 is not (e.g. T2 is an individual who does not carry on business).

This is treated as a trust with mixed resident trustees; see 4.6 (Trustee residence condition B: mixed resident trustees). So where a trust does not have a UK-linked settlor, the appointment of a co-trustee who does not carry on trustee business would solve the difficulty posed by the PE

23 See 81.14 (Commentary: let's abolish branch/agency).

residence rule. HMRC agree. Trustee Residence Guidance example 4b provides:

Example 4b

As in example 4a but the significance of the meetings Mr. Monday has in the UK with the beneficiaries of the Tuesday Trust is sufficient for December Ltd to have a permanent establishment in the UK in respect of that trust. However December Ltd has a co-trustee Mr. Wednesday who is a non-UK resident trustee.

HMRC view: As there is a co-trustee who is non-UK resident and as the settlor of the Tuesday Trust was not resident or domiciled in the UK when he introduced property into the trust that means that the trustees of the Tuesday Trust as a body will not be UK resident.

4.12 When is there a UK PE?

4.12.1 *Which definition of PE?*

The term “permanent establishment” is used in different places with different definitions:

- (1) “**UK law PE**” defined in s.1141 CTA 2010.
- (2) “**OECD Model PE**” defined in the OECD Model.
- (3) PE as defined in any particular DTA.

The term is not defined for the purposes of trustee residence, so the applicable definition is UK law PE.²⁴

The HMRC Trustee Residence Guidance in its original form (2009) assumed that the applicable definition was OECD Model PE.

In December 2011, the following passage was added to the guidance:

Treaty Issues

13. Most UK treaties contain a permanent establishment threshold (Article 5 in the OECD Model) for taxing business profits of a non-resident. This applies to both corporate and non-corporate trustees. Although permanent establishment is generally relevant to corporate trustees, and branch and agency to non-corporates, where trustees are residents of a treaty country (and the treaty contains a permanent establishment threshold) then effectively that is the standard that needs to be met in the case of all trustees, non-corporate as well as corporate.

24 See 81.2 (Meaning(s) of “permanent establishment”).

This means that for treaty countries broadly the same considerations for permanent establishment as set out in the guidance will apply in the case of non-corporates. This includes the independent agent exemption outlined below.

14. Thus, where a treaty exists between the UK and the country in which the trustee is resident the permanent establishment article needs to be satisfied for the trustee to be treated as UK resident for the purposes of the trustee residence rules.

15. Annex A outlines in more detail how the OECD Commentary interprets Article 5. For example, in this context for there to be a permanent establishment Article 5 usually requires the trustee to operate from a fixed place of business for more than 6 months.

There are two points here. HMRC now say:

(1) Where a corporate trustee is treaty-resident in a foreign state under a DTA with a PE article, the expression PE in the PE residence rule is understood to refer to PE as defined in the treaty.

(2) For non-corporate trustees, the same rules apply.

Point (1) is wrong, as the statutory definition applies. The definition is a taxes-act-wide definition, though it only applies in relation to companies. I suspect that the author of the guidance (both the 2009 and the 2011 versions) overlooked the statutory definition of PE. Point (2) therefore does not arise.

This is all a terrible muddle, though it would easily be resolved by straightforward tax simplification.²⁵ However there is probably no difference between UK law PE and OECD model PE, and there is rarely much difference between OECD model PE and PE as defined in any particular treaty, so it will not often matter.

The more important question is what amounts to a PE, whichever definition applies. On that point the HMRC Residence Guidance offers only vague and heavily qualified generalities.

4.12.2 *Acts of the trustee in the UK*

HMRC Trustee Residence Guidance provides:

²⁵ See 81.10 (Commentary: let's have one definition of PE); 74.14 (Commentary: let's abolish branch/agency).

Core activities

9. In connection with Question C²⁶ and in line with the Commentary to the OECD Tax Model Convention, “carrying on the function of being a trustee” means in this context activities which are the core activities of a trustee and not those activities which are auxiliary or preparatory. This applies equally to non-corporate trustees.

It is correct that activities which are of a preparatory or auxiliary character cannot constitute a PE.²⁷ The use of the label “core activities” to describe those which are not merely preparatory or auxiliary is not entirely apt, but it is difficult to think of a better term. The Trustee Residence Guidance explains “core activities”:

10. A trustee is the person who has a legal duty to manage the assets of that trust in the best interests of the beneficiary or beneficiaries. The trustee manages, employs and disposes of the trust assets in accordance with both the terms of the trust and the duties and responsibilities which the law places upon trustees. The core activities of a trustee would therefore be regarded as including:

- 10.1 the general administration of the trusts
- 10.2 the over-arching investment strategy.
- 10.3 monitoring the performance of those investments.
- 10.4 decisions on how trust income will be dealt with and whether distributions should be made.²⁸

The Trustee Residence Guidance then explains “ancillary activities”:

11. There are other activities which trustees carry out which are not core activities central to their conduct and management of the trust, but are instead preparatory or auxiliary activities. These *generally* can include information gathering meetings, including meetings with independent agents or with beneficiaries but, as mentioned below, each case will have to be considered individually.

In fact, the rule that information gathering is auxiliary is a statutory rule.²⁹ But in practice meetings tend to move seamlessly from information

26 See 4.11.5 (One trustee of several trusts).

27 See 81.7 (PE: preparatory and auxiliary activities).

28 The draft guidance included a further paragraph 10.5: “accounting, making tax returns and record keeping.” Significantly, the final guidance has deleted this.

29 See 81.7 (PE: preparatory and auxiliary activities).

gathering to decision making.

12. In deciding whether the conduct and management of a particular trust is being carried on in the course of the corporate trustee's business through a permanent establishment, HMRC's approach will be to look at where the core activities are physically being carried out. If these core activities are being carried on in the UK through the corporate trustee's permanent establishment, the trustee would be treated as UK resident for the purposes of the particular trust. However as well as the nature or significance of the individual activities and meetings and whether they are core activities, we would also consider the issue of frequency. So where there is, in relation to a particular trust, evidence of considerable administrative work – such as meetings with investment managers or beneficiaries - being carried on in the UK through a permanent establishment, so that such meetings have become a major element of the trustee's activities in relation to that trust, and no longer preparatory or auxiliary, we would need to consider carefully whether as a matter of fact the non-UK resident corporate trustee was acting as a trustee through that permanent establishment.

Before turning to the examples, the Guidance sets out the usual disclaimer:

13. The guidance that follows sets out examples of when a corporate trustee may or may not be regarded as UK resident. This guidance is based on the law as it stood on the day of publication. HMRC will publish amended or supplementary guidance if there is a change in the law or in the Department's interpretation of it. Whilst the guidance is intended to be as extensive and helpful as possible, it should not be assumed that it will provide a definitive answer in every case. That will depend upon the facts of each individual case. You can of course take your own advice on this issue and where HMRC's view is that there is a liability to UK tax on the basis that it regards a trust as UK resident because of how these rules apply to the trustees then the trustees can appeal to an independent tribunal.

Marketing to prospective settlors is not carrying on trust business in the UK because no trust at that time exists. HMRC agree:

1. Preparatory work prior to the creation of any trust

1.1 A non-UK resident trust company that is to be a trustee of a settlement may carry out a number of activities in the UK before the trust is created. This might, for example, include discussions with clients such as potential settlors or

beneficiaries over the appropriate terms of any trust. It could also include research with specialist professionals about possible trust investments and assets. These discussions may take place even before the beneficiaries are chosen.

Example 1

Before the January Trust is established, February Ltd, a non-UK resident trust company holds several meetings in the UK at its Manchester office with the potential settlor Mr January. The meetings are to discuss the possible terms of the trust and suitable investments.

HMRC view: The January trust does not yet exist, so there is no need to consider the tests in section 69(2D) TCGA 1992 and section 475(6) ITA. In any case, introductory meetings and discussions of this type would generally be regarded as preparatory or auxiliary activities and not core activities.

Occasional visits to meet the settlor/beneficiaries or others cannot constitute a PE, which requires regularity.³⁰ HMRC agree:

2. Trustee carrying out duties for the administration of any trust

As mentioned in paragraphs 9 to 11 of the Background section of this guidance, a range of activities may be carried out by a trustee once a trust has been set up including meetings. When considering whether the corporate trustee is carrying on the administration of a particular trust in the course of their business through the permanent establishment, the frequency of the meetings will be looked at as well as their significance and quality.

Example 2

March Ltd, a non-UK resident trust company that is trustee of the April Trust, holds quarterly meetings in the UK at its London offices with investment advisers. The purpose of these meetings is for March Ltd to collect purely factual information about potential assets to inform future investment strategy for the April trust. The actual decisions about the investment strategy are taken by March Ltd at their home office outside the UK. No other activities or meetings relating to the April Trust are carried on in the UK.

HMRC view: March Ltd has a permanent establishment in the UK. However, the significance of the meetings with the investment advisers is not sufficient for March Ltd to be regarded as acting as a trustee in respect of April Trust through that permanent establishment. They will not, therefore, be regarded as UK resident for the purposes of the April Trust.

The correct analysis is that the trustee does not have a PE in the UK, for two independent reasons: information collecting is an auxiliary matter, and the office is not used with sufficient regularity to constitute a PE. (One is of course looking on the matter on a trust by trust basis).

The author assumes that the trustee does have a PE but does not carry on

³⁰ See 81.3.2 (Degree of permanency).

business through it. Strictly a PE means a place of business through which a business is carried on, so there is no PE. However the end result is the same.

By contrast:

Example 2a

May Ltd, a non-UK resident trust company, is sole trustee of the June Trust. May Ltd carries out all the work for the trust through its UK offices, including preparatory work, general administration, meetings with investment managers, accountants, beneficiaries etc.. The investment and distribution policies are also all determined in the UK office. Formal ratification of those strategies, including signature of documents, is made by May Ltd at very brief meetings outside the UK, with little or no further discussion of the proposals before approval is given.

HMRC view: Although the strategic decisions are core activities, all the administration of the June Trust has been carried out in May Ltd's UK office. The formal meetings outside the UK although prima facie core activities are in reality merely "rubber stamping" all the UK work. May Ltd has acted as a trustee in respect of the June Trust through its UK permanent establishment and so will be treated as UK resident for the purposes of the June Trust.

That seems correct.

Example 2b

July Ltd, a non-UK resident trust company is trustee of the August Trust. It always carries out the core activities of the August Trust at its office overseas. The beneficiary of the trust has a single one-off meeting with July Ltd at July's Manchester office to discuss the potential release of capital from the August trust. The discussion involves the imposition of certain conditions on the beneficiary before such a release. [The author here seems unfamiliar with trust terminology and practice, though nothing turns on that.]

HMRC view: On the face of it July Ltd by discussing the release of capital and the imposition of conditions with the beneficiary has engaged in a core activity and this has taken place at what is July's permanent establishment in the UK. So prima facie July Ltd is acting as trustee of the August Trust through a permanent establishment. However the whole context has to be looked at - i.e. where the decision making on the trust is being carried on and if the meeting in the UK was a one-off. If the trustee took the information from the meetings out of the UK with them and then discussed and made the decisions outside the UK, they would not be UK resident. If there was any doubt as to where the decision making is taking place we would as part of our considerations consider the frequency of any meetings both within and outside the UK.

More analytically, the issues (which are not clearly identified or addressed) are:

(1) Are the acts of the trustee in the UK merely preparatory (such as

information gathering)? If so, there is no PE.

(2) Is the office used with sufficient regularity to constitute a PE? On the given facts, a one-off meeting is clearly not sufficient and the office is not a PE, so (although the HMRC example does not reach any conclusion) the answer is that the trustees are not UK resident.

4.12.3 *Services provided by UK companies or other agents: the law*

UK companies (which may in the same group as the trustee company or may be unconnected) may provide accounting, tax or investment services to the trustees. Does this constitute a PE?

If the agent is an investment manager or broker, the question for a corporate trustee is whether the investment manager or broker exemption applies: if so there is no PE. In practice these exceptions will be met.

If the agent is any other agent, the question is whether there is an agency PE, which arises if (in short)

- (1) it has and habitually exercises authority to do business on behalf of the company and
- (2) it is not “an agent of independent status acting in the ordinary course of their business.”³¹

4.12.4 *Services provided by UK companies: the guidance*

The HMRC guidance in this area bears only a tenuous connection to the law. The original HMRC guidance did however have the merit of clarity:

I can confirm that our interpretation of the rules is that the provision of services on an arms length basis would not cause non-UK trustees to have a permanent establishment and therefore would not make the non-resident trustee UK resident.

More specifically, this would include where services are carried out by a subsidiary on a fully arms length basis, such as:

- maintaining the financial or accounting records
- preparation of accounts
- preparation and submission of tax returns for any settlement by a separate entity within the organisation contracting at arms length terms.

31 See 81.4 (Agency PE) and 81.5 (Independent agent).

Provided the services are contracted (at arms length terms) HMRC would not consider this constitutes a permanent establishment as the UK company will be rendering a service to the trust. Therefore, these activities would not cause the non-UK trustees to have a permanent establishment in the UK and the non-UK trustee is not made resident by [the PE residence rule].³²

The correct questions are whether the IM exemption applies, and whether the agent is of independent status and acting in the ordinary course of their business, not whether the agent is receiving an arm's length fee. However the HMRC arm's length fee test reflects the policy aims of the provision, would be a simpler and workable rule, and would not normally give a different result from the correct approach.

In the HMRC Trustee Residence Guidance, this approach is maintained but is unfortunately watered down with qualifications such as "likely" or "ordinarily":

3. Activities carried on for the trust other than by the non-UK resident trust company

3.1 Whilst a non-UK resident trust company acting as a trustee may not carry out trust business at a fixed place of business permanent establishment in the UK, it is also necessary to consider whether activities are carried out in the UK on that non-UK resident trust company's behalf by a dependent agent. If this is the case the trustee may be treated as having a permanent establishment in the UK. Annex A provides further information on dependent agents.

3.2 The activity of providing services to a non-UK resident trustee, whether by a connected person or not, does not of itself create a dependent agency permanent establishment (see paragraph 5 in the Annex). It is necessary to consider the capacity in which the person provides the services to the trust on behalf of the non-UK resident trustee. Where

- [1] the services that are provided to the trust are only those that the person is contractually obliged to provide under their agreement with the non-UK resident trustee and
 - [2] are remunerated at arm's length,
- then this is *unlikely* to create a dependent agency permanent establishment.

32 Extract from letter dated 18 July 2007 accessible
www.step.org/pdf/TrusteeResidenceALS.pdf

At first point [1] is hard to understand. Who would provide services without a contract? Perhaps the author has in mind a beneficiary providing services to the trust informally?

3.3 Whether there is a dependent agency permanent establishment will depend on the facts of the case; the position is the same whether it is an unconnected third party or a UK subsidiary or other connected person that carries out the work for the trust. Where, say, a UK subsidiary of a non-UK resident trust company is providing services to a trust, then unless the powers granted to it by the non-UK resident trust company are such that it becomes a '*dependent agent with authority to do business on behalf of the non-resident trustee*' (see paragraph 5 of Annex A) we will not contend that the UK subsidiary's actions cause the non-UK resident trustee company to have a permanent establishment.

This is correct.

Example 3

September Ltd, a non-UK resident trust company contracts with October Ltd which is a UK company within the same group. The services to be provided by October Ltd are for investment advice for the November Trust. The contract between September Ltd and October Ltd is on an arm's length basis and October Ltd has no powers granted to it by September Ltd.

HMRC view: October Ltd is providing a service for September Ltd and has contracted to do so on arm's length terms. They have no authority to do business on behalf of September Ltd so are not their dependent agent. Therefore, September Ltd will not be treated as having a permanent establishment through the work carried out by October Ltd in the UK. So September Ltd will not be treated as UK resident for the purposes of the November Trust.

This is straightforward. If the investment advisor had no authority to do business on behalf of its principal, then it is not an agent at all. It cannot be a dependent agent.

If the investment advisor did have power to do business on behalf of the trust, it is still not PE as long as it qualified for the IM exemption (which in practice will be the case).

Other examples which would be treated in the same way where there was an arm's length relationship are:

- Preparing trust accounts for the trustees' review and approval
- Preparing trust tax returns for the trustees' review and approval and filing the return on their behalf with HMRC
- Obtaining quotes for necessary repair work on trust property
- Having contact with workmen to ensure that those repairs are carried out
- Day to day management of let property (such as dealing with tenants etc)
- Signing small cheques such as paying for minor repairs

Example 3a

As above but October Ltd also has authority to buy and sell commodities with a view to realising profits for the trust subject to trading limits set by September Ltd. It receives an arm's length fee for this activity.

HMRC view: The investment manager is appointed by the trustee, and so is its agent. If it receives an arm's length fee for the investment management services, it will not *ordinarily* constitute a dependent agent of the non-UK resident trustee. If, however October Ltd was providing investment management services to the trustees other than on arm's length terms i.e. was acting as their dependent agent, rather than simply providing a service to them, in that case the trustees would be *likely* to have a dependent agent permanent establishment. (This is in line with the Investment Manager Exemption provisions – in particular that the provision of services at less than a customary rate can indicate that the investment manager is not an independent agent of the non-UK resident trustee.)

This is muddled because if the IM exemption applies, there is no PE.

4.12.5 UK resident director or employee of trustee

HMRC Trustee Residence Guidance provides:

4. UK resident directors or other employees of a non-UK resident trust company.

4.1 First, it is necessary to consider the role of the UK resident director or employee of the non-UK resident trustee.

4.2 If the UK resident employee is not carrying out activities that would be regarded as core trustee activities in relation to a particular trust then the presence in the UK of an employee of a non-UK resident trust company could not by itself cause a non-UK resident trustee to have a permanent establishment in the UK.

This is consistent with the point made at 4.12.2 (Acts of the trustee in the UK).

4.3 Where in relation to a particular trust the UK resident employee does carry out [core] trustee activities in the UK then it is likely that the non-UK resident trustee will have a permanent establishment in the UK. This will be the case if the employee operates from a fixed base, or does not have a fixed base but habitually acts on behalf of the non-UK resident trustee for the particular trust, i.e. is a dependent agent permanent establishment of the non-UK resident trustee. The crucial point in relation to a dependent agent permanent establishment is whether the non-UK resident trustee company has in the UK-resident employee a dependent agent with authority to conduct business on behalf of the non-UK resident trustee. If this UK resident employee of a non-UK resident trustee does have the authority to make decisions then s/he is likely to constitute a dependent agent permanent establishment of the non-UK resident trust company.

The first example is a simple variant of example 1 (marketing):

Example 4

December Ltd, a non-UK resident trustee has a director or other employee Mr. Monday who is resident in the UK. (This individual may also be an employee or director of UK resident group members.) The group provides office accommodation in the UK to Mr. Monday. His role is to market the business of the non-UK resident trust company in the UK which includes meeting with prospective settlors and other business contacts for this purpose.

HMRC view: In this case, Mr Monday's role is only meeting with prospective settlors and other business contacts for the purpose of marketing the business of December Ltd. Although these activities are carried out at the same place, they are not activities as a trustee that are carried out at a fixed place of business. They would generally be preparatory or auxiliary activities. This would not cause December Ltd to be treated as carrying on trustee business through a permanent establishment in the UK.

In the next example, the director does more than marketing:

Example 4a

As in example 4, but Mr. Monday's role also extends to meeting beneficiaries of existing trusts.

HMRC view: In this case, the importance of the subject matters discussed and the decisions taken at those meetings, and the frequency of the meetings held, will need to be analysed in relation to each trust in order to reach a conclusion as to whether December Ltd is carrying on a business through a permanent establishment in the UK for that trust through Mr Monday

If no office accommodation is at his disposal Mr Monday could still constitute a dependent agent permanent establishment of the non-UK resident trustee if he has authority to enter into contracts or otherwise do business on behalf of the trustee of the trusts i.e. more than simply meeting the beneficiaries and he habitually exercises that authority on behalf of his employer for the trust.

HMRC do not answer the question in the example, but the general approach to the answer is correct.

4.12.6 *Conclusion: Some guidelines on the PE residence rule*

It is considered that the following guidelines will avoid difficulties under the UK PE rule. It is assumed that the trust has only a corporate trustee, or if it has individual trustees, they are not carrying on a business (so it is necessary to consider PE issues but not branch/agency issues).

Use of professional UK investment managers and brokers is safe provided that the terms of the IM/broker exemptions are met, which in practice will be the case.

Use of professional UK advisors to prepare tax returns is safe, provided that they are acting in the ordinary course of their business, which in practice they will be.

Use of UK agents to manage UK property investments is safe, providing they are acting in the ordinary course of their business, which in practice they should be.

The trustees may if they wish to meet beneficiaries (or others) in the UK in the following circumstances:

- (1) If the meeting is at the offices of the beneficiaries (or others) and not in the trustees own offices, or in offices provided by a company in the same group as the trustees.
- (2) If the meeting is occasional. Less than once a year would be “occasional” for this purpose.
- (3) If the meeting is purely for information gathering purposes. (The minutes of the meeting should make that clear.) However it may be

difficult to restrict meetings to information gathering topics. The trustees should not appoint a beneficiary to act for the trustee (unless, exceptionally, the beneficiary is carrying on a business and acting in the course of that business).

Where the trustees own a house which is occupied by the beneficiary, I see no difficulty in the trustees authorising the beneficiary to maintain the house, as that does not constitute carrying on business in the UK.

There are no restrictions on marketing or meetings with prospective settlers.

The trustees would not normally have an employee or director who was UK resident, but if that did happen, the employee or director should not be involved in the management of the trust in the UK, except as above.

4.13 UK protector and trustee residence

It is common practice to appoint a “protector”³³ who has power:

- (1) to consent to certain key matters of trust administration; and
- (2) to appoint and dismiss trustees.

The protector may be a UK resident. A protector could not be regarded as a trustee³⁴ and so their actual residence is irrelevant in ascertaining the

33 On trust law and drafting aspects of protectors, see Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010), para 7.29.

34 The position is clear but since the question has been asked I set out the authorities in some detail.

Re Marshall [1945] Ch 21 held that trustees for the purpose of the obsolescent Settled Land Act 1925 are “trustees” for the purpose of the Judicial Trustee Act 1896. Although trust land is not vested in SLA trustees, capital money and investments other than land are vested in them, and *for this reason* they were held to be trustees.

In *Manoogian v Sonsino* a settlement provided:

“... the Bank shall make such investments as may from time to time be particularly and specifically directed to be made of it in writing from time to time by the Armenian Patriarchate of Jerusalem.”

The Patriarch was not a trustee for the purposes of the Charities Act 1993:

“His power to direct investments is not an obligation to do so. His position is analogous to powers of a life tenant under a conventional strict settlement. The life tenant is often given powers to possess land, direct investments and so on, but none of those things make him a trustee of the settlement.”

[2002] EWHC 1304 (Ch); [2002] WTLR 989; 5 ITELR 125 at [41].

In *Bridge Trustees v Noel Penny (Turbines)* [2008] EWHC 2054 (Ch) an employer had power to distribute the surplus assets of a pension scheme. The employer was not “a trustee properly so called, that is to say, a person in whom property is vested as

actual residence of the trustees in their personal capacities.

One must take care that the protector is not a permanent establishment of the trustees. This will not normally be the case, but it might be if the protector is given unusually wide powers.

4.14 Trustee residence for IHT

Trustee residence is not very important for IHT but the concept is used on a few occasions. IHT definitions of trustee residence are different from the IT/CGT definition.

For the (somewhat academic) relief for foreign currency bank accounts,³⁵ s. 157(4) IHTA provides:

For the purposes of this section—

- (a) the question whether a person is resident or ordinarily resident in the UK shall, subject to paragraph (b) below, be determined as for the purposes of income tax; but
- (b) the trustees of a settlement shall be regarded as not resident or ordinarily resident in the UK unless the general administration of the

trustee”; see at [23].

Underhill and Hayton, *Law of Trusts and Trustees* (18th ed, 2010), p.1.78, takes the same view: “Because the protector merely has powers vested in him and not trust property he is not a trustee”.

It might be a different matter if the protector’s powers extend beyond those traditionally given to a protector. One could imagine a trust deed under which:

- (1) persons named “trustees” held legal title to property; and
- (2) a person named (or mis-named) “protector” held all the administrative and dispositive powers normally given to trustees.

This case (depending on the drafting) might be equivalent to the common situation where trust property is vested in nominees. In such a case no one suggests that the nominees are “trustees” for the purposes of the trust residence rule. Although the legal title may not be vested in the trustees, the trustees have the right to call for it. Alternatively (depending on the drafting) the case may be equivalent to the situation where custodian trustees hold the trust fund on behalf of managing trustees under s.4 Public Trustee Act 1906. In such a situation, the (so-called) protector would be a trustee. This is hypothetical – I have never seen it in practice – but worth mentioning as warning of the problems which might arise if the powers of a UK resident protector were extremely extended.

Many offshore Trust Laws state expressly that a protector is not a trustee; but (i) that only states what would in principle be the position, and (ii) that could not be determinative of the meaning of “trustee” in a UK statute.

³⁵ See 58.18 (Non-residents foreign currency bank accounts).

settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are resident and ordinarily resident there.

For the duty to disclose the creation of non-resident trusts,³⁶ s.218(3) IHTA provides:

For the purposes of this section trustees of a settlement shall be regarded as not resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are for the time being resident in the UK.

For the purposes of s.201(1)(d) IHTA (collection of non-resident trust's tax from settlor), s.201(5) IHTA makes an identical provision.³⁷

For the question of where the administration of a settlement is carried on, see the 5th edition of this work, para 5.6. There are various interesting points that could in theory arise under these definitions, but I doubt if any of them will ever arise in practice.

4.14.1 *Commentary*

IHT trustee residence is a mess: essentially the same definition is repeated four times.

There is no need to have a separate definition of trustee residence for IHT at all, and if we need to keep the concept of trustee residence, it would be best to switch to the IT/CGT definition. Failing that, a single standard definition applying for all IHT purposes would be a small improvement.

4.15 **Commentary: Let's abolish the relevance of trustee residence**

Residence of individuals is a sensible connecting factor for UK taxation: everyone will accept that an individual who is UK resident should to some extent at least be subject to UK tax. Residence of trustees is a matter

³⁶ See 82.11 (IHT reporting requirement on creation of settlement).

³⁷ For completeness, the same definition is set out yet again in the IHT (Delivery of Accounts) (Excepted Settlements) Regulations 2008.

which is chosen by the appointment of trustees, and makes little sense as a connecting factor in the taxation of trusts.

An alternative (and, I suggest, a better) system would be that trusts pay IT and CGT regardless of the residence of the trustees: the connecting factor should be that property is provided by a UK domiciled or resident settlor. Conversely, trusts should be exempt from CGT and IT on foreign income in relation to property provided (or wholly provided) by foreign domiciled non-resident settlors. This is the basis of trust taxation in Canada, New Zealand and, I suspect, most other common law jurisdictions. It is also the basis of IHT. Of course, domicile and residence of the settlor are not perfect connecting factors. Such a thing does not exist. International families can sometimes break the link by tax planning.³⁸ But the mad anti-avoidance structure of ss.86 to 98 TCGA, bolstered (supposedly) by Schs 4A to 5, can be replaced with one based on s.731 ITA. The reform, like any, would bring winners and losers but the overall result could — if properly drafted — be a system which was fairer, simpler and much more effective.

38 See 75.33 (Planning to create trust with foreign domiciled settlor).

CHAPTER FIVE

TREATY-RESIDENCE

5.1 Three concepts of residence

The starting point is to note that there are (at least) three distinct concepts of residence. We need terms to describe them, and I coin the following terminology.

“UK-law residence” means residence for UK tax purposes. Where a person is resident in the UK for UK tax purposes, I describe them as **“UK-law UK resident”**.

“Foreign-law residence” means residence for some foreign law purposes.

“Treaty-residence” means residence for the purposes of a DTA. Where a person is a resident of the UK for treaty purposes I describe them as **“treaty-resident in the UK”**. Where they are resident in the foreign state, I describe them as **“treaty-resident in the foreign state”**. One could use the term “treaty resident outside the UK.” Statute sometimes calls this *“treaty non-resident”* but I think my term is clearer.

“Domestic law” means the law of the UK, or of a foreign state, as opposed to treaty law or international law.

This chapter discusses the meaning of treaty-residence. The discussion is mainly on the OECD model treaty, though I refer at points to the US and other treaties. In any particular case it will be necessary to review the terms of the actual treaty concerned.

DTAs refer to a resident *of* a treaty state and UK domestic law refers to a person who is resident *in* the UK; but nothing turns on the choice of preposition, and in this book I use *in* or *of* as grammar dictates, whichever the context.

5.1.1 “State”

DTAs refer to “contracting states” but I abbreviate this to “**treaty state**” or just “**state**” and where that state is not the UK, I refer to it as “**the foreign state**”.

Article 4 OECD Model Convention provides that “contracting state”

also includes that State and any political subdivision or local authority thereof.

For this reason, UK legislation generally uses the word “territory” rather than “state”.

5.1.2 *Cross references*

The following matters are dealt with elsewhere:

53.1 (Introduction to DTAs).

79.23 (US S-Corps and LLCs).

For further reading, see Maisto (ed.) *Residence of Individuals under Tax Treaties and EC Law* (2010); Venables “The interpretation of double taxation conventions: Residence of dual resident and temporarily non-UK resident individuals” (1999) 8 OTR 189.

5.2 Relationship between treaty- and UK-law residence

A person can of course be UK-law resident in two (or more) states.

A person cannot be treaty-resident in two treaty states: the tie-breaker test requires treaty-residence to be in one state alone.

However a person may be UK-law resident in the UK while treaty-resident in a foreign state. Treaty-residence in a foreign state does not preclude UK-law UK residence (except for companies).

The INT Manual provides:

154020. Dual residents [December 2011]

... Although the agreement overrides some of the normal consequences of being a UK resident, it does not, in the case of an individual, override the fact of UK residence itself for purely domestic law purposes. Even though an individual may be resident for agreement purposes elsewhere, he (as a resident of the UK for UK tax purposes) still has to complete

returns and fulfil any similar obligations imposed by the Taxes Management Act. He will also remain entitled to any personal allowances which may be due on account of his UK residence status.

Sometimes this rule works in favour of the taxpayer; for instance, it preserves the right to personal allowances (which are conferred on UK-law UK residents but not generally available to non-residents).¹ Often however the rule works in favour of HMRC. For instance, a year in which an individual is UK-law UK resident counts for the purposes of:

- (1) the long-term residence test for the remittance basis claim charge;²
- (2) deemed domicile for IHT;

even though the individual is treaty resident in a foreign state throughout the year.

5.3 Residence under art. 4.1

Article 4 OECD Model Convention provides:

1. For the purposes of this Convention, the term “resident of a Contracting State” means any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, place of management or any other criterion of a similar nature....

I describe a person who is within this paragraph as “**resident in a state under article 4.1**”.

For the purposes of discussion it is convenient to abbreviate the phrase “domicile, residence, place of management or any other criterion of a similar nature” to “UK-law residence”; in a UK context this is a permissible shorthand since it is UK-law residence (not the other criteria mentioned) which determines whether a person is liable to UK tax.

There are then four requirements to be a resident of a state under article 4.1:

- (1) There must be a “person”.
- (2) The person must be liable to tax in the state.
- (3) The person must be domestic-law resident in that state.
- (4) Domestic-law residence must be the reason for liability to tax.

1 See 44.7 (Personal allowances under DTAs: non-residents).

2 See 9.10.11 (Individual treaty non-resident).

A person may be a resident of one treaty state alone under article 4.1 , in which case they are treaty-resident in that state. A person may be a resident of both treaty states under article 4.1, in which case the tie-breaker tests discussed below are applied to identify the state of treaty-residence.

So far as the UK is concerned, a person who is UK-law UK resident is in general a resident of the UK under article 4.1.

What about the (probably theoretical) case of a person who under UK law is ordinarily resident in the UK but not resident? If the question arose, it is considered that such a person is also a resident of the UK under article 4.1, as the reference to “residence” in article 4.1 should be read as including ordinary residence.

5.3.1 *Certificate of residence*

HMRC helpsheet 302 (Dual Residents - 2011/12) provides:

If you:

- are resident in the UK under domestic law, and
 - are also resident in another country under that country’s rules, and
 - want to claim that you are a resident of the other country for the purposes of the DTA between the UK and that other country
- then you need to obtain a certificate from the overseas tax authority confirming that it regards you as resident there under its domestic law for the period in question, which must be stated on the certificate.

The certificate should be attached to your completed claim on pages 8 to 11 of this helpsheet and sent with your tax return.

A certificate is not needed for a USA treaty-resident who seeks relief under the USA/UK treaty: see 5.19 (USA/UK DTA).

A UK treaty-resident who seeks foreign tax relief under a DTA may need a certificate of UK residence for the foreign tax authorities. One can now apply online for a certificate of UK residence.³

5.4 “Person”

The first requirement of treaty-residence is that there must be a “person” and one must identify:

3 www.hmrc.gov.uk/news/cert-of-residence.htm.

- (1) who that person is; and
- (2) whether that person is an individual or a person other than an individual (because different tie-breaker tests apply).

The term “person” is defined (after a fashion). Article 3.1(a) OECD Model provides:

1. For the purposes of this Convention, unless the context otherwise requires:

a) the term “person” includes an individual, a company⁴ and any other body of persons;

For individuals (who are “natural persons”) and companies (which are “legal persons”) this is straightforward, but partnerships, trusts and some other entities are more problematic. See 5.14 (Treaty-residence: Trusts); 5.15 (Treaty-residence: Partnerships).

5.5 “Liable to tax”

“Tax” is usually defined to mean IT or CGT.

A remittance basis taxpayer is “liable to tax” (and so resident in the UK under article 4.1) because (among other reasons) the remittance basis is a form of tax liability.

The Canada Revenue Authority take this view:

The Department takes the view that individuals who are subject to tax on a remittance basis are liable to tax on a world income basis. Accordingly, persons who are liable to tax in a contracting state on a remittance basis, would not in our view, be precluded from being resident there for the purposes of paragraph 1 of the residence article of a convention.⁵

That is clearly right, and the OECD commentary also assumes that that is the case.⁶ The issue is normally one for foreign tax authorities rather than HMRC. It would matter for UK tax only if the foreign state operated a

4 Article 3.1(b) OECD Model defines company: “the term “company” means any body corporate or any entity that is treated as a body corporate for tax purposes”.

5 Canada Revenue Authority, “Income Tax -- Technical News No. 16”, (March 1999) www.cra-arc.gc.ca/E/pub/tp/itnews-16/itnews-16-e.html. The position is even clearer after the 2008 reforms as the remittance basis is a matter of a claim, not compulsory.

6 See 53.14 (Interaction of DT reliefs and the remittance basis).

remittance basis; the only examples of which I am aware are Ireland and Japan.

For whether partnerships are liable to tax, see 5.15.2 (Is a partnership “liable to tax?”).

5.6 Change of residence during tax year

5.6.1 *Change of residence of individual during tax year*

Suppose:

- (1) An individual is not resident in the UK during part of the tax year (“the non-resident period”).
- (2) The individual is UK resident during another part of a tax year (“the resident period”).⁷

The individual is a resident of the UK under article 4.1 even during the non-resident period, since:

- (1) they are liable to tax in the UK (during the non-resident period) and
- (2) the reason they are so liable is their residence (during the resident period).

Thus:

- (1) if an individual is UK-law UK resident for the first part of a year and then moves to a foreign state, they need to rely on the tie-breaker provision for treaty relief during the whole of the year of departure, including the non-resident period;
- (2) if an individual is UK-law non-UK resident for the first part of a year and then moves to the UK, they need to rely on the tie-breaker provision for treaty relief during the whole of the year of departure, including the earlier non-resident period.

This is reasonably clear on first principles, but if authority is needed, see *Smallwood v HMRC*.

Some DTAs expressly address the question of migration during the year. For instance, article 14(6) France/UK DTA qualifies the OECD model CG article:

The provisions of paragraph 5 [CGT relief] shall not affect the right of a Contracting State to levy according to its law a tax chargeable in respect of gains from the alienation of any property

⁷ For the purpose discussing treaties, the UK split year concessions are not relevant.

- [a] on a person who is, and has been at any time during the previous six fiscal years, a resident of that Contracting State or
- [b] on a person who is a resident of that Contracting State at any time during the fiscal year in which the property is alienated.

5.6.2 *Change of residence of trustee during tax year*

In *Smallwood v HMRC*⁸ a trust had three different trustees, resident in different states, in the course of one tax year:

Apr - Dec: Jersey resident trustees (“the Jersey period”)

Dec - Mar: Mauritius resident trustees (“the Mauritian period”)

Mar onwards: UK resident trustees (“the UK period”)

Gains accrued during the Mauritian period. During this period the trustees were residents of Mauritius under article 4.1 as they were liable to Mauritian tax⁹ by reason of their residence in Mauritius. The question was whether they were also residents of the UK under article 4.1.¹⁰

One might have thought that they were not. The Mauritian trustees were liable to tax in the UK during the Mauritian period, but not by reason of *their* residence: they were so liable by reason of *someone else’s* residence (namely, the residence of their successor trustees during the UK period). However the Court of Appeal held that for treaty purposes trustees should be regarded as a continuing body of persons distinct from the actual trustees.¹¹ The position therefore is just the same as for an individual who is UK resident during part of a year, discussed above. The trustee-body were residents of the UK under article 4.1 during the Jersey and Mauritian periods since:

8 *Smallwood v HMRC* [2010] STC 2045.

9 In fact the trustees were not liable to CGT in Mauritius, because Mauritius did not tax capital gains but only to income tax; but that made no difference because the trustees were liable to “tax” as defined.

10 A further question arose concerning POEM; see 5.18.2 (Short term period in foreign state).

11 The Court relied on s.69 TCGA which provides “In relation to settled property the trustees of the settlement shall *for the purpose of this Act* be treated as being a single and continuing body of persons.” It might have been argued that s.69 is irrelevant to DTAs. However art.3.1 would justify treating trustees as a continue body of persons, and the decision on this point seems right.

- (1) they were liable to UK tax¹² during that period; and
- (2) they were so liable by reason of “their” UK residence in the subsequent UK period.

During the Jersey and Mauritian periods (April - March) the trustees could not know that they were residents of the UK under article 4.1, as the facts which made them residents of the UK occurred later. That did not matter: “The issue of liability has to be looked at retrospectively”.¹³ That is not surprising, as during a tax year a non-resident individual or trustee never knows whether they are subject to UK CGT, since they will be subject to tax if they become UK resident later in the tax year.

Although the trustees were residents of the UK under article 4.1, they were also residents of Mauritius under article 4.1, so treaty-residence was decided under the tie breaker.

Smallwood is in part somewhat muddled and its reasoning is not quite that set out above. But however one reaches that result, the law should be regarded as settled.

In *Smallwood* the law decided by the CA favoured HMRC. However the rule will sometimes favour the taxpayer because income/gains arising at a time when a person does not meet the requirements to be a resident of a treaty state under article 4.1 may later meet those requirements, and retrospectively qualify for relief. Suppose:

- (1) A company within s.13 TCGA is resident in Jersey during part of a tax year (“the Jersey resident period”).
- (2) The company becomes resident in state A under the law of state A during part of the tax year (“the state A resident period”).
- (3) Under the tax law of state A the company is liable to tax throughout both periods. That is, state A has a rule similar to that which applies to individuals and trusts in the UK.
- (4) The company is at no time UK-law resident in the UK.

A gain arising in the Jersey resident period will retrospectively qualify for relief under a treaty between the UK and state A, which would benefit a UK participator within the scope of s.13. (Before the Court of Appeal’s decision in *Smallwood*, an advisor might have thought that the company had to be able to say at the time the gain accrued, that it was resident under article 4.1 at that time, in order for treaty relief to apply. But now we know

12 In fact it could have been argued that the trustees were *not* liable to tax in the UK, because of s.77 TCGA and s.624 ITTOIA; but the taxpayer did not take that point.

13 *Smallwood v HMRC* [2010] STC 2045 at [42].

the position is looked at retrospectively.)

5.6.3 HMRC view

The International Manual provides:

154040. Individuals [December 2012]

Different countries have different fiscal years, for example, the United States tax year ends on 31 December. An individual who wishes to make a treaty claim as a resident of the United States in respect of the United Kingdom tax year 2010/11 will need to demonstrate that he is a resident of the United States during both of the United States tax years 2010 and 2011. If an individual was resident in the United States during the tax year 2010 but ceased to be so resident after 31 December 2010, then he may make a claim as a United States resident for any 2010/11 income which arose during 2010 but no claim is possible in respect of income arising in 2011. If income arises partly during a period of residence in the other country and partly during a period of residence in the United Kingdom, the income may be apportioned between the periods on a time basis, unless it is clear that the income arose unevenly over the two periods, for example a bonus payable for duties performed in one of the periods.

5.7 Exception where source tax only

Article 4(1) OECD Model Convention continues:

This term, [“resident of a Contracting State”] however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein.

This only applies in the unusual case where:

- (1) A person is liable to tax in a state by reason of his domicile, residence, place of management or any other criterion of a similar nature; but
- (2) the person is only liable on income from a source in that state, or on gains on property in that state.

The US Department of the Treasury Technical Explanation of the Convention provides an example:

Thus, a consular official of the UK who is posted in the United States,

who may be subject to U.S. tax on U.S. source investment income, but is not taxable in the United States on non-U.S. source income, would not be considered a resident of the United States for purposes of the Convention. (See Code section 7701(b)(5)(B))....¹⁴

5.8 Tie-breaker tests for individuals

It is of course possible for a person to be:

- (1) a resident of state A under art. 4.1 during the whole of a tax year and
- (2) a resident of state B under art. 4.1 during the whole of the same period.

This may arise for various reasons:

- (1) Two states may have different domestic-law definitions of residence.
- (2) Residence (however defined) is distinct from presence: a person may be UK-law UK resident throughout a year while only present in the UK during part of the year (or even not present at all); such a person may be regarded by the foreign state as a resident of the foreign state.
- (3) Split residence years: see above.

In such cases the tie-breaker tests are needed. For individuals, there are a series of tie-breaker tests, in order of priority:

- (1) permanent home
- (2) centre of vital interests
- (3) habitual abode
- (4) nationality
- (5) mutual agreement.

5.9 Permanent home

Article 4 OECD Model Convention provides:

2. Where by reason of the provisions of paragraph 1 an individual is a resident of both Contracting States, then his status shall be determined as follows:

- a) he shall be deemed to be a resident only of the State in which he has a permanent home available to him;

¹⁴ www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.

While this is directed at the US DTA, the relevant wording is (more or less) the same: See 5.19 (USA/UK DTA).

For clarity of exposition it is helpful to consider separately the concepts of:

- (1) “home”
- (2) “permanent”
- (3) “available”

But this neat analysis is not practical: the three terms interact, for a property which is not “available” or “permanent” is less likely to be a “home”.

5.9.1 “Home”

The OECD commentary provides:

13 As regards the concept of home, it should be observed that any form of home may be taken into account (house or apartment belonging to or rented by the individual, rented furnished room).

The meaning of the word “home” is discussed in *Re Y* [1985] Fam 136 at p.140:

‘Home’ is defined thus in the Shorter Oxford English Dictionary:

“A dwelling-place, house, abode: the fixed residence of a family or household; one’s own house; the dwelling in which one habitually lives, or which one regards as one’s proper abode.”

It is a definition which, in my judgment, contains the essential elements of a “home” as it is to be understood for present purposes.

One fundamental characteristic of a “home” is that one lives there. As Sheldon J said:

I have no doubt that any individual may have two homes; but each, in my judgment, to be properly so called, must comprise some element of regular occupation (whether past, present, or intended for the future, even if intermittent), with some degree of permanency, based upon some right of occupation whenever it is required, where ... “You find the comforts of what is known as home”; the fixed residence of a family or household.

However, the *amount* of time that one spends in a place may not shed much light on whether that place is a “home”. One can spend relatively little time in a place which is still home. This point arose in *Frost v*

Feltham 55 TC 10. The issue in that case was to identify the taxpayer's "main residence". The expression "main residence" is somewhat narrower than "home", for a "main residence" must almost necessarily be a "home" but a "home" need not be a "main residence". In that case, Mr Feltham spent periods of two or three days in each month at a property called "Mount Severn". He spent the rest of the time in "The White Horse", a public house of which he was licensee. The judge noted that "viewed in isolation those are not long periods of time to spend at a house which can properly be described as the principal or more important residence of the persons concerned". Nevertheless, Mount Severn was held to be his main residence:

A residence is a place where somebody lives, and it is clear that Mr Feltham lived for the greater part of the year at the White Horse, Roydon. Therefore, he could not have used Mount Severn as his only residence. But that does not at all mean that he could not have used it as his principal or more important residence, even though he spent very little time there. If someone lives in two houses the question, which does he use as the principal or more important one, cannot be determined solely by reference to the way in which he divides his time between the two. I can test that by reference to an example far removed from the facts of this case and the conditions of our own times. In his "Lives of the Lord Chancellors" Lord Campbell tells how Lord Eldon was often prevented by the burdens of his office from visiting his estate at Encombe in Dorset for long periods at a time. Sometimes he was only able to get down there for three weeks or so in the year, for the partridge shooting in September. True it was that Lord Eldon also had a good house in Hamilton Place, but it could not really have been suggested that he did not use Encombe as his principal or more important residence.

A second fundamental characteristic of a "home" is identified in the Law Commission paper on the law of domicile. The Law Commission observes:

"Home" conveys ... the combined ideas of physical presence and emotional link.¹⁵

15 No. 168 CM 200 (1987), at para 4.20

The folk-saying is true that “home is where the heart is”. In the dictionary definition which Sheldon J approved, home is a place which one *regards* as one’s proper abode. The views of the individual himself are therefore highly relevant. It would be, to put it at its lowest, surprising if a place which an individual actually regarded as home was not in fact their home. The views of the parties as to which property was the main residence were held to be relevant in *Frost v Feltham*; see 55 TC at p.16; the same applies *a fortiori* in determining whether a property is a “home”.

The fact that one does not have a room set aside for oneself in a “home” does not shed much light on whether it is a “home”. The more important question is whether space is available when one wishes to use it. In Robert Frost’s epigram, “home is the place where, when you have to go there, they have to take you in”. This was the attitude taken by the Revenue in relation to the so-called “available accommodation rule” before 1993.

Fox discusses “home” from an interdisciplinary viewpoint, and concludes that the word “represents a complex amalgam of financial, practical, social, psychological, cultural, politico-economic, and emotional interests to its occupiers”.¹⁶

5.9.2 “Permanent”

The concept of “permanent” is more difficult than the concept of “home”. The OECD commentary is untrammelled by the restraint of precision:

11 The Article gives preference to the Contracting State in which the individual has a permanent home available to him. This criterion will frequently be sufficient to solve the conflict, eg where the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State.

12 Subparagraph (a) means, therefore, that in the application of the Convention (that is, where there is a conflict between the laws of the two States) it is considered that the residence is that place where the individual owns or possesses a home; this home must be permanent, that is to say, the individual must have arranged and retained it for his permanent use as opposed to staying at a particular place under such conditions that it is evident that the stay is intended to be of short

16 Fox, “The meaning of home: a chimerical concept or a legal challenge?” [2002] JLS p.580.

duration.

13. ... But the permanence of the home is essential; this means that the individual has arranged to have the dwelling available to him at all times continuously, and not occasionally for the purpose of a stay which, owing to the reasons for it, is necessarily of short duration (travel for pleasure, business travel, educational travel, attending a course at a school, etc).

Para 11 of the commentary looks at the situation where “the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State”. The commentary is not making a contrast between:

- (1) permanent, and
- (2) a stay of some length.

The point correctly being made is that the existence of one (undoubtedly) permanent home impacts on whether one regards *another* place as a permanent home.

Paras 12 and 13 contrast:

- (1) permanent use, and
- (2) a stay of short duration; exemplified as “travel for pleasure, business travel, educational travel, attending a course at a school, etc”.

This suggests that a stay of more than short duration qualifies as permanent.

5.9.3 “Available”

HMRC helpsheet 302 (Dual Residents - 2011/12) provides:

A permanent home is any form of accommodation which is continuously available to you for your personal use. It does not necessarily have to be owned by you.

5.10 Centre of vital interests

Article 4(2)(a) OECD Model Convention provides:

if he has a permanent home available to him in both States, he shall be deemed to be a resident only of the State with which his personal and economic relations are closer (centre of vital interests);

The OECD commentary provides:

15 If the individual has a permanent home in both Contracting States, it is necessary to look at the facts in order to ascertain with which of the two States his personal and economic relations are closer. Thus, regard will be had to his family and social relations, his occupations, his political, cultural or other activities, his place of business, the place from which he administers his property, etc. The circumstances must be examined as a whole, but it is nevertheless obvious that considerations based on the personal acts of the individual must receive special attention. If a person who has a home in one State sets up a second in the other State while retaining the first, the fact that he retains the first in the environment where he has always lived, where he has worked, and where he has his family and possessions, can, together with other elements, go to demonstrate that he has retained his centre of vital interests in the first State.¹⁷

This is only relevant where the tie-breaker is not decided by the question of a permanent home.

Contrast the expression of “centre of a debtor’s main interests” which is used in Council regulation (EC) No 1346/2000 of 29 May 2000 on insolvency proceedings; case law on that may also be helpful in relation to the expression centre of vital interests.

5.11 Habitual abode

Article 4(2) OECD Model Convention provides:

b) if

17 HMRC helpsheet 302 (Dual Residents - 2010/11) is based on this:

‘Personal and economic relations’ is a wide expression intended to cover the full range of social, domestic, financial, political and cultural links. The whole range of these factors must be taken into account, but considerations based upon your personal acts are given special weight.

For example, if you have a home in the UK and set up another in the other State while retaining the first, the fact that you have retained your home in the UK where you have lived, worked and where your family and possessions are, can, together with other factors, go to demonstrate that your centre of vital interests remains in the UK.

- [I] the State in which he has his centre of vital interests cannot be determined, or
- [ii] if he has not a permanent home available to him in either State, he shall be deemed to be a resident only of the State in which he has an habitual abode;

The OECD commentary provides:

16 Subparagraph (b) establishes a secondary criterion for two quite distinct and different situations:

- (a) the case where the individual has a permanent home available to him in both Contracting States and it is not possible to determine in which one he has his centre of vital interests;
- (b) the case where the individual has a permanent home available to him in neither Contracting State.

Preference is given to the Contracting State where the individual has an habitual abode.

17 In the first situation, the case where the individual has a permanent home available to him in both States, the fact of having an habitual abode in one State rather than in the other appears therefore as the circumstance which, in case of doubt as to where the individual has his centre of vital interests, tips the balance towards the State where he stays more frequently. For this purpose regard must be had to stays made by the individual not only at the permanent home in the State in question but also at any other place in the same State.

18 The second situation is the case of an individual who has a permanent home available to him in neither Contracting State, as for example, a person going from one hotel to another. In this case also all stays made in a State must be considered without it being necessary to ascertain the reasons for them.

19 In stipulating that in the two situations which it contemplates preference is given to the Contracting State where the individual has an habitual abode, subparagraph (b) does not specify over what length of time the comparison must be made. The comparison must cover a sufficient length of time for it to be possible to determine whether the residence in each of the two States is habitual and to determine also the intervals at which the stays take place.

HMRC helpsheet 302 (Dual Residents - 2011/12) provides:

You will be a resident of the State in which you have a 'habitual abode'. This test which is applied to each State is whether you live in that State

regularly, normally or customarily. The number of visits as well as the duration of the visits are taken into account and this test is applied over a sufficient period as is necessary depending on the facts of each case. If you cannot be said to have a habitual abode in either of the two countries or you have a habitual abode in both of them, you should move on to the next test.

5.12 Nationality and mutual agreement procedure

Article 4(2)(c)(d) OECD Model Convention provides:

- c) if he has an habitual abode in both States or in neither of them, he shall be deemed to be a resident only of the State of which he is a national;
- d) if he is a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

5.13 Period for enquiry into individuals tie-breaker tests

In *Hankinson v HMRC* [2010] STC 2640 at [60] the Tribunal said:

It seems therefore that while one applies the tie-breaker at the time of alienation in a case concerning capital gains, this does not mean that one cannot look at a longer period in applying the elements of the tie-breaker when appropriate, which it may not be for permanent home, but it is necessarily for habitual abode.

While one needs to determine whether a person is treaty-resident at a particular moment, one looks over an appropriate period of time to determine whether they are treaty-resident at that moment; contrast 3.10 (Period for enquiry into residence); 5.18.4 (Period for enquiry into POEM).

5.14 Treaty-residence: Trusts

The first step is to identify who is the “person” for treaty purposes.¹⁸

¹⁸ See 5.4 (“Person”).

5.14.1 *The trust law background*

The following propositions are well established.

- (1) A trust is not a person (ie does not have legal personality, which in short means the ability to hold property and be subject to liabilities). This is the case in English law, Scots law¹⁹ or, as far as I know, any other trust law.²⁰
- (2) A trustee is a person. It is often convenient to distinguish:
 - (a) a person acting in their capacity as trustee and
 - (b) that person acting in their private capacity.
 However trust law does not recognise the concept of separate personality, that is, there is only one person: the person acting in one capacity is not a different person from the person acting in another capacity. For instance, a person (as trustee) cannot enter into a contract with himself (as individual) because of the rule that a contract must be made between two persons.²¹

19 The Scottish Law Commission discussed but rejected a proposal to give trusts legal personality: *Discussion Paper on the Nature and the Constitution of Trusts* (October 2006) para 2.29-2.45.

20 Though a trust is close to being a person. Gretton, “Trusts Without Equity” (2000) 49 Int’l & Comp. LQ 599:

“In ordinary language the noun ‘trust’ is a person word. Idiom treats it like ‘company’. ‘This land is owned by a trust.’ ‘These shares are held by a trust’. ... ‘The trust is liable for this debt.’ Ordinary language is right.”

So one should not rule out the possibility that context may show that the word “person” is used (loosely rather than strictly) to mean or include a trust.

21 Discussion of the topic demands reference to *The Mikado*:

Ko-Ko. Pooh-Bah, it seems that the festivities in connection with my approaching marriage must last a week. I should like to do it handsomely, and I want to consult you as to the amount I ought to spend upon them.

Pooh-Bah. Certainly. In which of my capacities? As First Lord of the Treasury, Lord Chamberlain, Attorney General, Chancellor of the Exchequer, Privy Purse, or Private Secretary?

Ko-Ko. Suppose we say as Private Secretary.

Pooh-Bah. Speaking as your Private Secretary, I should say that, as the city will have to pay for it, don’t stint yourself, do it well.

Ko-Ko. Exactly — as the city will have to pay for it. That is your advice.

Pooh-Bah. As Private Secretary. Of course you will understand that, as Chancellor of the Exchequer, I am bound to see that due economy is observed.

Ko-Ko. Oh! But you said just now “Don’t stint yourself, do it well”.

Pooh-Bah. As Private Secretary.

It seems to me that the source of difficulty is not rule (1) that a trust is not a person: it is rule (2) that a trustee does not have a separate personality. Despite that rule, references in legislation to “individuals” have always been understood to exclude trustees (and references to trustees exclude individuals) and that usage takes us towards some concept of separate personality. Further, for UK IT and CGT purposes, a trustee is deemed to be a distinct, notional person.²² So in a tax context, at least, rule (2) does not apply: the person acting as trustee *is* generally regarded as a separate person from the same person acting in their private capacity.

5.14.2 *Position of trustees under OECD Model treaty*

One would expect:

- (1) Trustees (if more than one) to be treated as one person (“a trustee-person”). That avoids the difficulty which otherwise arises if a trust had trustees who are resident in different places in their private capacities.
- (2) Whether there is a single trustee, that person is to be treated as a person (again, one may use the expression “trustee-person”) who is distinct from the individual or company who is the trustee, acting in their private capacity. That allows for the possibility that the person may be treaty-resident in one state in their private capacity and treaty-

Ko-Ko. And now you say that due economy must be observed.

Pooh-Bah. As Chancellor of the Exchequer.

Ko-Ko. I see. Come over here, where the Chancellor can’t hear us. Now, as my Solicitor, how do you advise me to deal with this difficulty?

Pooh-Bah. Oh, as your Solicitor, I should have no hesitation in saying “Chance it —”

Ko-Ko. Thank you. I will.

Pooh-Bah. If it were not that, as Lord Chief Justice, I am bound to see that the law isn’t violated.

Ko-Ko. I see. Come over here where the Chief Justice can’t hear us. Now, then, as First Lord of the Treasury?

Pooh-Bah. Of course, as First Lord of the Treasury, I could propose a special vote that would cover all expenses, if it were not that, as Leader of the Opposition, it would be my duty to resist it, tooth and nail. Or, as Paymaster General, I could so cook the accounts that, as Lord High Auditor, I should never discover the fraud. But then, as Archbishop of Titipu, it would be my duty to denounce my dishonesty and give myself into my own custody as first Commissioner of Police.

Ko-Ko. That’s extremely awkward.”

22 See 4.4 (Trustee residence for income tax and CGT).

resident in another state in their trustee capacity.

Is there any difficulty in reading the model treaty to reach this result? Where there is more than one trustee, there is no difficulty at all: the trustees should be regarded as a body of persons (and so constitute one person) for treaty purposes. That trustee-person is necessarily distinct from the persons who act as trustees.

Where there is a sole trustee, it should still be regarded as a person distinct from the person who is actually the trustee in their private capacity. It would be odd to have one rule for a sole trustee and another where there is more than one trustee. One way to reach this result is to say that even a sole trustee is a “body of persons” but it seems odd to say that a single person constitutes a body of persons. So I think the better way to reach this result is to say that “person” is to be understood by reference to domestic tax law, domestic tax law treats the trustee as a separate person, despite the trust law rule to the contrary; and so the same rule applies for a treaty.

The trustee-person is not an individual, so its treaty-residence is decided by the POEM rule, not the rule for individuals (which would obviously not be appropriate).

Another possible analysis would be that the *trust* is a person for OECD model purposes. There are two difficulties with that:

- (1) A trust is not a “person” in English law.
- (2) Even if the trust were a person, it is only treaty-resident in a treaty state under article 4.1 if it is a person “liable to tax.” Whether a person is liable to tax is a matter of domestic law. In UK law, it is the trustees rather than trust which is liable to tax.

These arguments are not insuperable: since treaties can be loosely construed, there are no words from which there is no escape. One could say that a trust is a person (in the treaty sense) even though not a person in English law; and that the trust is “liable to tax” (in the treaty sense) since the trust fund will bear the tax. But there is no need to take this high-handed course, as to regard the trustee or trustees as a distinct trustee-person is the simpler and more satisfactory solution.²³

23 It has been suggested that the question whether the person for the purposes of the OECD Model is the trustees (as a body) or the trust is purely theoretical and makes no difference in practice. I have some sympathy with that view. But (1) it is always good to know what one is talking about; (2) HMRC need to know what name(s) to put

While it is possible that a foreign law might look at the matter differently, it would be desirable if possible for all countries to adopt the same approach, and in practice this seems to be the case.

HMRC agree. INT Manual provides:

162034. Certificates of Residence and trusts and charitable trusts
[January 2012]

Trusts are not themselves liable to tax in the UK, but the trustees on behalf of the trust may be liable to tax in the UK. A trust therefore cannot be a resident of the UK for the purposes of any UK Double Taxation Convention (DTC). Accordingly a certificate of residence cannot be issued in respect of any trust. However, some trusts are included within the definition of ‘resident of a Contracting State’ in specific DTCs. In those limited circumstances a certificate of residence can be issued in respect of a trust. It is therefore essential that the relevant DTC is checked on receipt of all applications.

Trustees as a body (rather than the trust) are regarded as a single person. Where the trustees as a body are regarded as resident in the UK they will be entitled to the benefits of a DTC as they are liable to tax in the UK in respect of the income of the trust. Subject to the comments in the next paragraph a certificate of residence can be issued in respect of a UK resident body of trustees.

The International Manual also provides:

353600. Claims by trustees in Ireland [January 2010]

Article 4(3) (Fiscal Residence) of the convention makes reference to ‘a person other than an individual’. Trustees act as a body of persons and so are persons other than an individual for the purposes of the article, and we therefore refer to the criteria in Article 4(3) to determine whether trustees of an Irish trust are resident in the Ireland for the purposes of the convention.

This is commenting on the Ireland/UK treaty but the same would apply generally as that follows the OECD model.

The same would apply to the estate of a deceased person.

On this topic, see Prebble, “Trusts and Double Taxation Agreements” *ejournal of Tax Research* (2004) vol 2 no 2 p192, accessible

www.atax.unsw.edu.au/ejtr/content/issues/previous/paper3_v2n2.pdf.

5.15 Treaty-residence: Partnerships

5.15.1 *Is a partnership a “person” for treaty purposes?*

This section considers whether a partnership is a treaty-resident of a state. For other DT issues see 38.9 (DTA relief for partnership).

The first question is whether a partnership is a “person” for treaty purposes.²⁴ Before turning to the definition, one might expect a partnership to be a person, since:

- (1) It avoids difficulty which would arise if a partnership had partners who were resident in different places in their private capacity.
- (2) It avoids an undesirable distinction between English partnerships (which are not legal persons) and Scottish partnerships (which are).
- (3) “It is highly improbable that so common a vehicle for commercial activity as a partnership should have been intended to be excluded from an Arrangement [a DTA]...”²⁵

Article 3.1(a) OECD Model provides:

1. For the purposes of this Convention, unless the context otherwise requires:

a) the term “person” includes an individual, a company²⁶ and any other body of persons;

There are three bases for arguing that a partnership is a person within this definition:

- (1) A partnership is a body of persons, and so within the definition (the “body of persons” argument).
- (2) A partnership is a person in the ordinary sense of the expression (the “ordinary person” argument.) If so it does not matter whether a partnership is a body of persons.
- (3) Partners (being individuals or companies) are persons (in their private capacities) and a partnership is a person because the singular includes

²⁴ See 5.4 (“Person”).

²⁵ *Padmore v IRC* 62 TC 352 at p.377.

²⁶ Article 3.1(b) defines company: “the term “company” means any body corporate or any entity that is treated as a body corporate for tax purposes”.

the plural (the singular/plural argument).

Discussion is made more difficult because of the variety of wording in different treaties.

The body of persons argument succeeded in *Padmore v IRC*, where the issue was whether a partnership was a person for the purposes of the Jersey/UK DTA. This is an old colonial model DTA, and the definition of “person” is not quite OECD model form. Para 2(1)(d) of the Jersey/UK DTA provides:

The term “person” includes any body of persons, *corporate or not corporate*;

The Court held that a partnership is a body of persons in the ordinary sense of that term.²⁷ Accordingly it constitutes a person within the Jersey/UK treaty definition.

The Revenue’s argument was a subtle one. They referred to the general principle that undefined treaty terms have domestic law meanings²⁸ and argued:

“Body of persons”, it is contended by the Crown, is a term of art in UK tax law and is defined in [what is now s.989 ITA] as follows:

“‘Body of persons’ means any body politic, corporate or collegiate, and any company, fraternity, fellowship and society of persons whether corporate or not corporate”.²⁹

The Jersey Law has a provision in the same terms³⁰

That is, the Revenue argued that (1) a partnership (although a body of persons in the general sense) was not a body of persons in the UK tax law sense and (2) the UK tax law sense applied in the treaty. The Court’s reason for rejecting the argument at point (2) was equally subtle:

If that [UK tax law] definition [of body of persons] is applicable, a

²⁷ See 5.4 (Is a partnership a “person?”).

²⁸ Article 2(3) of the Jersey/UK DTA, which is broadly similar to the OECD model form, see 53.11 (Undefined terms have domestic law meanings).

²⁹ Section 989 ITA copies the earlier provision verbatim. These terms are now of historical interest and it is a pity that the tax law rewrite failed to modernise and simplify this. Perhaps the Office of Tax Simplification could do so.

³⁰ *Padmore v IRC* 62 TC 352 at p.377.

partnership is (I will assume) not within it; because a partnership cannot be brought within any of the groups specified in the definition. ... however ... the [UK tax law] definition is not applicable. The draftsman of the Arrangement in para 2(1)(d) was giving a comprehensive definition of the word “person”. If he was assuming that the statutory definition of “body of persons” would apply, I see no reason why he should have added the words “corporate or not corporate”. They form part of the Article 2(1)(d) definition itself, and their inclusion had no purpose if the statutory definition applied. I do not think that they can be dismissed as mere tautology. On the face of the Arrangement they are a specific part of what is intended to be a self-contained definition for the purposes of the Arrangement. They are not, it seems to me, consistent with an intention on the part of the draftsman to utilise the statutory definition. They indicate a contrary intention. A partnership is, as a matter of the ordinary use of English, plainly a body of persons, and the language used by the draftsman does not, in my opinion, indicate that he was intending any different meaning.

Unfortunately that reasoning does not apply to the OECD model form, since that lacks the words “corporate or not corporate.” See Article 3.1(a) OECD Model set out above. It is however considered that “body of persons” in the OECD model should be given its ordinary meaning rather than its UK tax meaning. It is relevant to note that the term does not have a UK tax meaning, only an income tax meaning. There is no similar definition for CGT. Thus a partnership is a body of persons (within the meaning of the Model convention) and so a person within the OECD definition.

Avery Jones agrees:³¹

...it is hardly likely that the other State, if it had troubled to ask in the course of negotiations what body of persons meant in UK tax law, would wish to have an 18th century list of bodies govern the interpretation of the treaty. It is therefore not difficult to say that the context otherwise requires, and one should include partnerships either within the ordinary meaning of body of persons, or merely by reading the singular as the plural.³² On the basis a partnership may be included in those cases

31 Avery Jones, “Bodies of Persons” [1991] BTR 453 at p.464.

32 [Footnote original] This was mentioned as a possibility in *Padmore* [1989] STC 493, 498g but Fox L.J. stated that this was not sufficient for the taxpayer to succeed, as those persons were not all resident in Jersey. It is not clear why persons in

where wording similar to the 1977 Model is used.³³

Alternatively one could fall back on the ordinary person or the singular/plural arguments. The difficulty with that is that some treaties provide:

the term “person” *comprises* an individual, a company and any other body of persons;

Others provide:

the term “person” *means* an individual, a company and any other body of persons;

Avery Jones comments:

Normally in modern UK treaties the definition of person is that it *comprises* an individual, a company and any other body of persons, which was the wording of the 1963 model; at first sight this might prevent the ordinary meaning of *person* from being used.³⁴ The official French version of the Model, however, uses the same word *comprend* in both the 1963 and the 1977 versions. There may therefore be no difference between it and the 1977 Model, which makes it difficult to see why the UK persists in using the 1963 wording. In eight treaties the word *means* is used instead of the Model’s *includes*, in which case the ordinary meaning, in addition to the defined meaning, of person cannot be used. But certainly where *includes* and probably in the light of the French version where *comprises*, is used, the argument that the context includes partnerships under the ordinary meaning of body of persons is still available, as these words are not intended to be comprehensive. It is considered that partnerships are so included under that wording, on the

partnerships should not be given a single residence under TA 1988, s.112, which the court held to be applicable for the purpose of interpreting the treaty. The statutory definition of residence of trustees in FA 1989, s.110 does not give them a residence as a body but deems the resident trustees to be non-residence and vice versa.

33 [Footnote original] See art. 1 Comm. Paras. 2-6 of the application of the OECD Model to partnerships. The UK gives a residence to a partnership: TA 1988, s.112(1).

34 [Footnote original] The OECD Commentary (Art.3 Comm. Para.2), however, stated that the provision was not worded as an exhaustive definition and should be read as indicating that the term person is used in a very wide sense.

basis that they cannot have been intended to be excluded.³⁵

It is considered that any of these arguments will suffice, so a partnership is a “person” for DTA purposes in all cases, though the precise arguments which arise vary from one wording to another. The commentary to the OECD model convention supports this view. The commentary to article 3 provides:

Partnerships will also be considered to be “persons” either because they fall within the definition of “company” or, where this is not the case, because they constitute other bodies of persons.

5.15.2 *Is a partnership “liable to tax?”*

But even though a partnership is a person, it is only a resident of a treaty state within the OECD definition if it is a person liable to tax. Whether a person is liable to tax is a matter of domestic law.

In UK law, it is the partners rather than the partnership which is liable to tax. Partners are of course “persons” in their private capacity. They can be treaty-resident in the UK. It seems that a partnership (though a “person”) cannot be treaty-resident in the UK. A partnership could (depending on the foreign domestic law) be treaty-resident in a foreign state.

INT Manual provides:

162033. Certificates of Residence and partnerships [January 2012]

UK partnerships (including Scottish partnerships and UK LLPs) cannot be resident in the UK for the purposes of any of the UK’s Double Taxation Conventions (DTCs) because they are not themselves liable to tax in the UK. Therefore they cannot claim the benefits of any DTC. However, UK resident partners are entitled to such benefits as they are taxed in the UK on their share of the partnership worldwide profits.

This is correct for OECD Model treaty-residence. Para 5 of the OECD Commentary to article 1 similarly provides:

Where... a partnership is treated as fiscally transparent in a State, the

35 Avery Jones, “Bodies of Persons” [1991] BTR 453 at p.464.

partnership is not “liable to tax” in that State within the meaning of paragraph 1 of Article 4, and so cannot be a resident thereof for the purposes of the Convention.

The same (more or less) applies to LLPs. BI Manual provides:

72145 Limited Liability Partnership (LLP): International aspects
[February 2006]

... A UK LLP is not itself ‘liable to tax’ in the UK as the LLP tax provisions identify other persons (i.e. the members) as the persons who are to be taxed. Accordingly for the purposes of the Double Taxation Agreements (DTAs) the LLP is not regarded as being resident in the UK and cannot itself therefore claim relief from foreign taxes under such agreements. As is now the case with ordinary and limited partnerships the members must make the claim.

...In the very narrow circumstances where the LLP is not treated as transparent, but instead as a body corporate for tax purposes (such as when the LLP is in liquidation or being wound up in circumstances where transparency cannot be retained), we take the view that the LLP can itself claim relief for foreign taxes, including if appropriate underlying tax.

However HMRC do not always apply this view in practice.³⁶

5.15.3 *HMRC practice*

For US partnerships this practice is not followed and HMRC allow claims from partnerships.³⁷ There is no reason why American partnerships should be treated better than other partnerships, and other partnerships could therefore seek to obtain similar treatment, even though there would be no legal remedy if HMRC insist on applying the strict law. In practice HMRC accept such claims. INT Manual provides:

335510. Background [December 2011]

How Double Taxation Agreements treat partnerships

³⁶ See 55.15.3 (US partnerships and LLCs).

This view was rejected in India: *Linklaters LLP v Income Tax Officer* [2010] ITCLR 245. However in India (unlike the UK) a partnership is treated as a person for income tax purposes: s.2 [India] Income Tax Act 1961.

³⁷ See 55.15.3 (US partnerships and LLCs).

Double Taxation Agreements (DTAs) do not normally give a tax-transparent concern such as a partnership the right to claim treaty relief. Instead, in those cases where the income of the partnership is taxable in the hands of the partners (rather than at the level of the partnership) each partner should in strictness make a separate claim to treaty relief...

HMRC's approach to Partnerships

We recognise that applying the provisions of the DTA in such a literal way would be unwelcome and could possibly hamper the business interests of both countries.

Accordingly, HMRC may accept a single claim from a partnership on behalf of its partners. Where a partnership wishes to take advantage of this departure from the strict position and to claim treaty benefits on behalf of its partners, the general or managing partner should sign the declaration on the claim form. In addition to the normal information that is required by the claim form, a list of the names and addresses (residential addresses for individuals and registered addresses where the partners are companies) of the partners should be supplied. These lists should also normally show for each partner their respective percentage shares of the income that is the subject of the claim. In those cases where all of the partners are resident for tax purposes in the same country as the one in which the partnership is established (the country with which the DTA applies) it is not necessary to insist upon this information being provided.

Where any of the partners are resident for tax purposes in a country other than that in which the partnership is established, they should make separate claims to relief from UK tax under the terms of any relevant DTA.

In cases where such a partner is resident in a country which (unusually) does not regard the partnership as fiscally transparent - which would mean that it regards the partnership rather than the UK payer as the source of the payments its resident receives - then that partner may have difficulty in getting a claim form certified as relevant to a DT treaty with the UK. In such rare cases, you should consider accepting an uncertified claim form. If you decide to invite a claim in these circumstances you should ask for the claim form to be supported by additional evidence (for example copies of recent tax returns) to show that the partner is resident for tax purposes in the country concerned. Any such case should be referred to Specialist Personal Tax, PT International Advisory at an early stage.

335520. Examination of claims [December 2011]

What Personal Tax International will do

Where you are able to conclude that all of the beneficial owners of the income for which relief is being claimed are "qualifying persons" within the meaning of a DTA, then you should process the claim in the normal

way without further enquiry. This includes asking the tax office for the UK payer of the income to complete a report on forms in the 4450 series as appropriate.

If the supplementary information that is supplied with the claim form does not allow you to conclude that each of the partners is resident for tax purposes in the same country as that in which the partnership is established, you will have to ask for further information to be supplied. If any of the partners that are identified are themselves (at face value) transparent for tax purposes (for instance Limited Partnerships and Limited Liability Companies, as well as Trusts and some types of investment funds) you should ask for similar information to be supplied about these 2nd and 3rd level partners. Your aim should be to reach a reasonable level of assurance that all of the underlying participators in these concerns are themselves “persons” who would be able to claim double taxation relief if they were receiving the money directly rather than through the partnership.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

Where the partnership is unable to provide sufficient information about the identity of its partners to allow you to be satisfied that each person is entitled to relief from UK tax, the amount of relief to be allowed must be restricted to the percentage share of the income that is attributable to the partners who you accept as being entitled to treaty benefits in their own right.

INT Manual provides:

162033. Certificates of Residence and partnerships [January 2012]

UK partnerships (including Scottish partnerships and UK LLPs) cannot be resident in the UK for the purposes of any of the UK’s Double Taxation Conventions (DTCs) because they are not themselves liable to tax in the UK. Therefore they cannot claim the benefits of any DTC. However, UK resident partners are entitled to such benefits as they are taxed in the UK on their share of the partnership worldwide profits.

Accordingly, we will do what we can to assist UK resident partners to claim the benefits of a particular DTC to which they are entitled.

Partnerships with only UK Resident Partners

For partnerships where all partners are UK resident there should not be a problem as we will, if requested, confirm that although the partnership itself cannot be UK resident the individual partners are, and are therefore entitled to the relevant DTC benefits.

Partnerships with Non-Resident Partners

Non-resident partners are not entitled to the benefits arising from DTCs between the UK and its treaty partners because they are not persons resident in the UK as

set out in the residence Article of a DTC. But HMRC will, if requested, confirm that although the partnership itself cannot be UK resident, the UK resident partners are entitled to the relevant treaty benefits.

Information required

A request must be accompanied with the following details in writing before a letter of confirmation (certificate) can be issued:

1. Reason for requiring a certificate of residence;
2. The nature of the relevant transaction; and
3. Details of the income concerned.

For partnerships with UK partners only, HMRC will also need:

4. A list detailing the partners' names with confirmation that each and every partner is UK resident at the date of the request for the certificate of residence.

For partnerships with UK and non-resident partners, HMRC will also need:

5. A contact name and address for the partnership; and
6. A list detailing the partners' names, separately identifying those that are UK resident and those that are not and confirming that each of the UK partners is UK resident at the date of the request for the certificate of residence.

Where the source state has provided a form for claiming relief from its tax on the income in question (see the Double Taxation Relief manual at DT 2140+), that form should be used accompanied by the HMRC letter of confirmation where appropriate.

A letter of confirmation should not be issued if you think that to do so would not be in accordance with the relevant DTC. However, before a formal refusal is issued please refer to Business International.

Wording for letter of Confirmation to Partnership with UK resident partners only

To whom it may concern

The partnership of is not itself resident in the UK for the purposes of the UK/[name of other state] Convention.

However, I certify that to the best of HMRC's knowledge, the individual partners in as at [date] are resident in the UK in accordance with Article 4 of the Convention in force between the UK and [name of other state].

Date

Office Stamp Name and signature of Officer

To whom it may concern

The partnership of is not itself resident in the UK for the purposes of the UK/[name of other state] Convention.

However, I can confirm that the individual partners that are listed below are resident in the UK in accordance with Article 4 of the Convention in force between the UK and [name of other state]. There are other partners in the partnership who are not resident in the UK. Details of those partners can be obtained from the Managing Partner at the following address:

----- List of UK Partners -----

Office Stamp Name and signature of Officer

5.16 Partnerships under non-OECD model DTAs

Some DTAs do not follow the OECD model. The former ITH provided:

1656. Later DT Agreements

The significance of 1987 for partnerships and Double Taxation Agreements is that in 1986 the High Court gave its decision on the Padmore case which upset our view that a treaty did not apply to partnerships unless they were specifically mentioned. We look at the Padmore case and its consequences in the next paragraphs. Later treaties will normally have something about partnerships, either specifically excluding some or all of them from the treaty or preserving our right to tax the UK resident partners. The precise provisions may depend on the status of partnerships in the country of the treaty partner. Examples of later treaties where partnerships are mentioned are Italy and Bulgaria.

5.16.1 *Partnerships under UK/Switzerland DTA*

Article 4.1 of the UK/Switzerland DTA provides, unusually:

In the case of Switzerland, the term [resident of a Contracting State] includes a partnership created or organised under Swiss law.

The former ITH provided:

1655. Older DT Agreements

... the Swiss Agreement which includes as a resident of Switzerland a partnership created or organised under Swiss law. If this were the only provision it could mean that we would not have the right to tax under Case V a UK-resident partner in a Swiss partnership which had no permanent establishment in the UK. But our right to tax our resident partners is specifically protected by a separate provision.

The DTR Manual now provides:

DT18104 - Switzerland: Partnerships [September 2011]

The agreement makes it clear that, if a partnership is a resident of Switzerland and is entitled, in accordance with the provisions of the agreement, to exemption from UK tax on any income, the UK nevertheless has the right to tax a UK resident partner on his share of the partnership income. Such income is deemed to be income from a source

in Switzerland (Article 27(2)).

The agreement provides in Article 4 (1) that, in the case of Switzerland, the term ‘resident of a Contracting State’ includes a partnership created or organised under Swiss law. This provision should not be understood to override the general requirement that a resident must be liable to taxation in the relevant Contracting State. Where a claim is received in respect of the income of a Swiss partnership it should be ascertained that the income is actually taxed in Switzerland. Any claim that income of a Swiss partnership which has not been taxed in Switzerland should be relieved from taxation in the UK should be referred to Business Profits, International.

5.17 RICs, REITs and REMICs

The US Department of the Treasury Technical Explanation of the Convention³⁸ provides:

Certain entities that are nominally subject to tax but that in practice are rarely required to pay tax also would generally be treated as residents and therefore accorded treaty benefits. For example, RICs, REITs and REMICs are all residents of the United States for purposes of the treaty. Although the income earned by these entities normally is not subject to U.S. tax in the hands of the entity, they are taxable to the extent that they do not currently distribute their profits, and therefore may be regarded as “liable to tax.” They also must satisfy a number of requirements under the Code in order to be entitled to special tax treatment.

While this is directed at the US DTA, the wording in point (“liable to tax”) is the same generally and the same argument should apply to REITs in other states.

5.18 Place of effective management (“POEM”)

Article 4.3 OECD Model Convention provides:

Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, then it shall be deemed to be a resident only of the State in which its place of effective

38 www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.

management is situated.

This is the tie-breaker for trusts, companies and PRs. The OECD commentary provides:

24. ... The place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made. All relevant facts and circumstances must be examined to determine the place of effective management. An entity may have more than one place of management, but it can have only one place of effective management at any one time.

This has often been cited and adopted in UK cases, as one would expect. The UN commentary provides:

[The term "place of effective management"] is used in several provisions of the OECD Model Convention, as is the term "place of management". Neither term is defined explicitly in the Convention itself or in the commentary thereon, nor is it made clear whether the two terms are to be construed as having the same meaning or two different meanings. It is, however, understood that when establishing the place of effective management, circumstances which may, inter alia, be taken into account are the place where a company is actually managed and controlled, the place where the decision-making at the highest level on the important policies essential for the management of the company takes place, the place that plays a leading part in the management of a company from an economic and functional point of view, and the place where the most important accounting books are kept.³⁹

The International Manual provides:

353600. Claims by trustees in Ireland [January 2010]

... When you need to determine the place of effective management of an Irish trust

... So if you have a claim from a trust under the treaty with Ireland and find that the trustees are resident in more than one country, you will need to establish the trust's place of effective management.

39 United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries 2003.

You should ask Technical Advice Group to confirm any judgement you make on the residence of a group of individual trustees.

Criteria for determining the place of effective management of an Irish trust

You need to find out who generally controls and supervises the work of administering the trust. By administering the trust we mean: keeping accounts, conducting correspondence, arranging the trustees' meetings and putting the trustees' decisions into effect.

If the trustees are all individuals

You will need to find out which of the trustees is responsible for the tasks outlined above, and the dates and locations of all trustees' meetings held during the period of the claim.

If a professional body acts as a trustee

You can accept that the place of business of the professional body is the place of effective management of the trust.

For this purpose the professional body is appointed by the testator or settlor of the trust, and does not include:

- An individual who is a solicitor or an accountant
- An agent or an attorney administrator appointed by the trustees

Residence of a professional body

If a professional body acting as a trustee is a branch in Ireland of a UK bank or similar institution, it is considered to be in Ireland for the purposes of Article 4(3). A UK branch of an Irish bank would however not be considered to be in Ireland.

5.18.1 *"Effective" management*

In *Smallwood v HMRC* [2008] STC (SCD) 209 the Special Commissioners said at [112]:

We believe 'effective' should be understood in the sense of the French 'effective' (*siège de direction effective*) which connotes real, French being the other official version of the [OECD] model, though not of the [Mauritius/UK] treaty.

This does not take matters much further. The word "real" never does.

5.18.2 *Short term period in foreign state*

In *Smallwood v HMRC*, a trust had different trustees resident in different states, all in one tax year:

Apr - Dec: Jersey resident trustees

Dec - Mar: Mauritius resident trustees (“the Mauritian period”)

Mar onwards: UK resident trustees (“the UK period”)

It was necessary to apply the tie-breaker test.⁴⁰ Everything was done which could reasonably be done to ensure that the Mauritian trustees carried out effective management, but POEM was nevertheless in the UK throughout:

The scheme was devised in the UK by Mr Smallwood on the advice of KPMG Bristol. The steps taken in the scheme were carefully orchestrated throughout from the UK, both by KPMG and by Quilter. And it was integral to the scheme that the trust should be exported to Mauritius for a brief temporary period only and then be returned, within the fiscal year, to the UK, which occurred. Mr Smallwood remained throughout in the UK. There was a scheme of management of this trust which went above and beyond the day to day management exercised by the trustees for the time being, and the control of it was located in the UK.⁴¹

The dissenting decision of Patten LJ seems more convincing to me, and the majority dealt with the point in two short paragraphs, as if a fuller exposition of their reasons would be an embarrassment. However the conclusion must be that tax avoidance schemes requiring short term residence in a treaty state are likely to fail on factual POEM grounds.

5.18.3 *Comparison with “central management and control”*

In *Smallwood v HMRC* [2008] STC (SCD) 209 the Special Commissioners discussed POEM in the context of a trust, and said:

111. There was thus some debate about whether, or to what extent, POEM differed from CMC [central management and control]. We consider that this misses the point; the two concepts serve entirely different purposes. CMC determines whether a company is resident in the UK or not; POEM is a tie-breaker the purpose of which is to resolve cases of dual residence by determining in which of two states it is to be found. CMC is essentially a one-country test; the purpose is not to decide where residence is situated, but whether or not it is situated in the UK...

⁴⁰ See 5.6.2 (Change of residence of trustee during tax year).

⁴¹ *Smallwood v HMRC* at [70].

112. POEM, on the other hand, must be concerned with what happens in both states since its purpose is to resolve residence under domestic law in both states, caused for whatever reason, which could include incorporation in one state and management in the other, or different meanings of management applied in each state, or different interpretations of the same meaning of management applied in each state, or divided management. One must necessarily weigh up what happens in both states and according to the ordinary meaning to be given to the terms of the treaty in their context (to quote art 31 of the Vienna Convention on the Law of Treaties) decide in which state the place of effective management is found.

The same passage was applied in the context of a company.⁴²

But in *Smallwood v HMRC* (CA) at [58] Patten LJ says:

[In] *Wood v Holden* 78 TC 1 ... Chadwick LJ expressed the view that it was difficult to draw any meaningful distinction between the two tests [POEM and central management and control] but that even if they did in fact differ in substance, they were unlikely to lead to different results.

See Avery Jones, “The Definition of Company Residence in Early UK Tax Treaties” [2008] BTR 556.

5.18.4 *Period for enquiry into POEM*

While one needs to determine whether a person is treaty-resident at a particular moment, one looks over an appropriate period of time to determine the POEM: see eg *Smallwood v HMRC* (CA) at [47]. Contrast 3.10 (Period for enquiry into residence); and 5.13 (Period for enquiry into individuals tie-breaker tests)

5.19 USA/UK DTA

This section considers the definition of treaty-residence in the USA/UK DTA.

Article 4(1) of the US/ UK DTA provides:

⁴² *Laerstate BV v HMRC* [2009] UKFTT 209 at [48].

[a] Except as provided in paragraphs 2 and 3 of this Article, the term “resident of a Contracting State” means, for the purposes of this Convention, any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, *citizenship*, place of management, *place of incorporation*, or any other criterion of a similar nature.

This is standard OECD model form except for the addition of the italicised words, which reflect the US rule that citizens and US incorporated companies are liable to tax regardless of residence and other such criteria.

Article 4(1) of the US/ UK DTA continues:

[b] This term, however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or of profits attributable to a permanent establishment in that State.

This is close to standard OECD model form⁴³ and the differences do not seem material.

5.19.1 *US citizens/green card holders*

Article 4(2) of the US/ UK DTA provides:

An individual who is a United States citizen or an alien admitted to the United States for permanent residence (a “green card” holder) is a resident of the United States only if

[a] the individual has a substantial presence, permanent home or habitual abode in the United States and

[b] if that individual is not a resident of a State other than the UK for the purposes of a double taxation convention between that State and the UK.

The US Department of the Treasury Technical Explanation of the Convention⁴⁴ provides:

Paragraph 2 contains an exception to the general rule of paragraph 1 that residence under internal law also determines residence under the Convention. The exception applies with respect to a U.S. citizen or alien

43 See 5.7 (Exception where source tax only).

44 www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf

lawfully admitted for permanent residence (i.e., a “green card” holder). Under paragraph 1, a person is considered a resident of a Contracting State for purposes of the Convention if he is liable to tax in that Contracting State by reason of citizenship. Although this rule applies to both Contracting States, only the United States taxes its non-resident citizens in the same manner as its residents. In addition, aliens admitted to the United States for permanent residence (“green card” holders) qualify as U.S. residents under the first sentence of paragraph 1 because they are taxed by the United States as residents, regardless of where they physically reside.

Under the exception of paragraph 2, a U.S. citizen or green card holder will be treated as a resident of the United States for purposes of the Convention, and, thereby entitled to treaty benefits, only if he meets two conditions. First, he must have a substantial presence (see section 7701(b)(3)), permanent home or habitual abode in the United States. This rule requires that the U.S. citizen or green card holder have a reasonably strong economic nexus with the United States. Second, he must not be treated as a resident of a state other than the UK under any treaty between the UK and a third state. This rule prevents a U.S. citizen or green card holder who is a resident of a country other than the United States or the UK from choosing the benefits of the Convention over those provided by the treaty between the UK and his country of residence. If the U.S. citizen or green card holder’s country of residence does not have a treaty with the UK, however, then he will be treated as a resident of the United States as long as he meets the first requirement of an economic nexus. If such a person is a resident of both the United States and the UK, whether or not he is to be treated as a resident of the United States for purposes of the Convention is determined by the tie-breaker rules of paragraph 4.

The text goes on to give some examples:

Thus, for example, an individual resident of Mexico who is a U.S. citizen by birth, or who is a Mexican citizen and holds a U.S. green card, but who, in either case, has never lived in the United States, would not be entitled to benefits under the Convention. However, a U.S. citizen who is transferred to Mexico for two years would be entitled to benefits under the Convention if he maintains a permanent home or habitual abode in the United States and is not a resident of Mexico for purposes of the U.K.-Mexico tax treaty. If he were treated as a resident of Mexico under the U.K.-Mexico tax treaty, he could claim only the benefits of that treaty, even if the Convention would provide greater benefits.

The fact that a U.S. citizen who does not have close ties to the United

States may not be treated as a U.S. resident under the Convention does not alter the application of the saving clause of paragraph 4 of Article 1 (General Scope) to that citizen. For example, a U.S. citizen who pursuant to the “citizen/green card holder” rule is not considered to be a resident of the United States still is taxable on his worldwide income under the generally applicable rules of the Code.

HMRC helpsheet 302 (Dual Residents - 2011/12) provides:

Special rules apply where the other country is the United States of America (US), if you are claiming to be a resident of the US for the purposes of the UK/US Double Taxation Convention (DTC). Statements concerning residence should not normally be sought from the US Internal Revenue Service. This is because the US operates a special system whereby it taxes its ‘citizens’ on their worldwide income, wherever they may be resident. US citizens are not, however, necessarily ‘residents’ of the US for the purposes of the DTC.

Article 4(2) of the DTA provides that a citizen or green card holder will be treated as a resident of the US for purposes of the DTA, and thereby entitled to treaty benefits, only if two conditions are met:

- first, you must have a substantial presence (see below), permanent home or habitual abode in the US
- second, you must not be treated as a resident of a State other than the UK under any treaty between the UK and a third State.

5.19.2 *Substantial presence*

It appears that “substantial presence” is a technical term in US tax law (whose meaning applies in the treaty). HMRC helpsheet 302 (Dual Residents - 2011/12) provides:

Substantial presence test

You will have a substantial presence if:

- you were present in the US on at least 31 days in the calendar year under test, and
- the sum total of days on which you were present in the US in the year under test, and in the two preceding years, adds up to at least 183 days.

For the purposes of this calculation a day spent in the US in the year preceding the year under test counts as $\frac{1}{3}$, and a day in the year before that counts as $\frac{1}{6}$. Part days of presence in the US should be treated as

if they were whole days for this purpose.

Example 1

If you spent 48 days in the US in 2011, 250 days in 2010 and 365 days in 2009, the calculation would be as follows:

Year of test – 2011 (more than 31 days spent in the US)

2011 48 days $\times 1/1 = 48$

2010 250 days $\times 1/3 = 84$

2009 365 days $\times 1/6 = \frac{61}{193}$

Both conditions of the substantial presence test are passed and you will be regarded as resident in the US under that country's domestic law.

5.19.3 *Miscellaneous bodies*

The USA/UK DTA continues:

(3) The term “resident of a Contracting State” includes—

- (a) a pension scheme;
- (b) a plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is operated exclusively to administer or provide employee benefits and that, by reason of its nature as such, is generally exempt from income taxation in that State;
- (c) an organisation that is established exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes and that is a resident of a Contracting State according to its laws, notwithstanding that all or part of its income or gains may be exempt from tax under the domestic law of that State; and
- (d) a qualified governmental entity that is, is a part of, or is established in, that State.

The US Department of the Treasury Technical Explanation of the Convention⁴⁵ provides:

Paragraph 3 provides that certain tax-exempt entities such as pension funds and charitable organizations will be regarded as residents of a Contracting State regardless of whether they are generally liable for income tax in the State where they are established. The inclusion of this provision is intended to clarify the generally accepted practice of treating

45 www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.

an entity that would be liable for tax as a resident under the internal law of a State but for a specific exemption from tax (either complete or partial) as a resident of that state for purposes of paragraph 1.

Subparagraph (a) of paragraph 3 applies to pension schemes, as defined in subparagraph (o) of paragraph 1 of Article 3 (General Definitions). Subparagraph (b) applies to any plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is generally exempt from taxation in that State because it is operated exclusively to administer or provide employee benefits. The reference to a general exemption is intended to reflect the fact that under U.S. law, certain organizations that generally are considered to be tax-exempt entities may be subject to certain excise taxes or to income tax on their unrelated business income. Subparagraph © applies to an organization that is established exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes and that is a resident of a Contracting State. Thus, an exempt section 501© organization (such as a U.S. charity) that is generally exempt from tax under U.S. law is a resident of the United States for all purposes of the Convention. Subparagraph (d) applies to a qualified governmental entity, as defined in subparagraph (k) of paragraph 1 of Article 3, if it is the Contracting State itself, is established in a Contracting State or is a part of that State.

5.19.4 *Tie breaker*

For individuals, art.1(4) provides standard OECD model wording.

Art 1(5) USA/UK DTA provides:

Where by reason of the provisions of paragraph 1 of this Article a person other than an individual is a resident of both Contracting States, the competent authorities of the Contracting States shall endeavour to determine by mutual agreement the mode of application of this Convention to that person. If the competent authorities do not reach such an agreement, that person shall not be entitled to claim any benefit provided by this Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-discrimination) and Article 26 (Mutual agreement procedure).

The US Department of the Treasury Technical Explanation of the Convention⁴⁶ provides:

46 www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.

Dual residents other than individuals (e.g., companies, trusts, and estates) are addressed by paragraph 5. If such a person is, under the rules of paragraph 1, resident in both Contracting States, the competent authorities shall seek to determine a single State of residence for that person for purposes of the Convention. For example, a company is treated as resident in the United States if it is created or organized under the laws of the United States or a political subdivision. Under U.K. law, a company is treated as a resident of the UK if it is either established there or managed and controlled there. Dual residence, therefore, can arise if a U.S. company is managed and controlled in the UK. Paragraph 5 provides that the competent authorities will try to determine a single State of residence for such a company.

If the competent authorities do not reach an agreement on the single State of residence, that person may not claim any benefit provided by the Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-Discrimination), and Article 26 (Mutual Agreement Procedure). Thus, for example, a State cannot discriminate against a dual resident company, and such a company can bring issues to the competent authorities.

Dual resident companies also may be treated as resident for purposes other than that of obtaining benefits under the Convention. For example, if a dual resident company pays a dividend to a resident of the UK, the U.S. paying agent would withhold on that dividend at the appropriate treaty rate because reduced withholding is a benefit enjoyed by the resident of the UK, not by the dual resident. The dual resident company that paid the dividend would, for this purpose, be treated as a resident of the United States under the Convention. In addition, information relating to dual resident companies can be exchanged under the Convention because, by its terms, Article 27 (Exchange of Information and Administrative Assistance) is not limited to residents of the Contracting States.

CHAPTER SIX

YEAR OF ARRIVAL AND DEPARTURE

6.1 Arrival and departure – Introduction

This chapter is concerned with income and gains accruing in a year during which an individual or a trustee becomes or ceases to be UK resident. I also consider cases where an individual becomes or ceases to be ordinarily resident or UK domiciled.

Of course, a person who is present in the UK for part of a year may have the status of UK resident or ordinarily resident throughout the year and then the issues discussed in this chapter do not arise: we are concerned with those who acquire or lose the status of resident or ordinarily resident during the tax year.

The first part of this chapter discusses the position in 2012/13 and the second part outlines the reforms proposed from 2013/14.

It is necessary to consider income tax and CGT separately.

6.1.1 *Cross references*

For exit taxes on emigration see 7.1 (Exit taxes).

For employment income in the year of arrival and departure, see 13.7 (Earnings “for” a tax year); 13.8 (Pre-commencement and post-cessation earnings).

The topic of companies becoming or ceasing to be UK resident is not discussed.

6.2 Income tax: statutory split year rule

An individual who is resident during part of a tax year is strictly subject to income tax on all the income of the year, even income arising during the non-resident part of the year. I refer to this as the “**the statutory split**”

year rule.”

Confusingly, there is at present no clear statutory statement of this principle (though no-one doubts its correctness). There is not even any case which clearly decides or discusses it. However there are some that point clearly enough in that direction.

6.2.1 Residing in the UK “in a tax year” and “for a tax year”

Mitchell v IRC concerned the Special Contribution under the FA 1948 which (in short) was not charged “in the case of an individual who in the year 1947/48 was not domiciled in the UK.” The taxpayer ceased to be UK domiciled halfway through the year. The charge applied. The Court held that a person who was UK domiciled during part of the year was domiciled “in the year”.¹

Closer to home, *Neubergh v IRC* 52 TC 79 concerned the Special Charge under the FA 1968 which applied (in short) to a person who was resident and ordinarily resident in the UK “in the year 1967/68”. The taxpayer ceased to be resident and ordinarily resident during that year. The charge applied because the taxpayer could be said to be resident and ordinarily resident “in the year” even though he was only so resident during part of the year.

The expression residing in the UK “in a tax year” is sometimes contrasted with the expression residing in the UK “for a tax year”. The meaning of the latter expression was one of the issues in *Gubay v Kington*. Vinelott J thought that it generally meant resident *throughout* the year so that a person resident during only part of a tax year was not resident in the UK *for* the year. Dillon LJ took the opposite view. Everyone agreed, however, that the expression could be read either way, and context must decide the meaning. I suggest that it is best not to use that expression at all, and indeed it is rare in tax legislation.² It is easy to say clearly

1 33 TC 53. The Court went on to deal with the double negative in the provision, and held that the person domiciled during part of a year could not say that they were not UK domiciled “in the year”. I find this point unconvincing, but it does not matter for present purposes.

2 The expression “resident for” a tax year is no longer found in the context of the provision discussed in *Gubay*, though it survives in some double taxation contexts, eg ss.26, 28, 137 TIOPA, s.835O ITA. The special commissioners in *Gubay* 57 TC 601 at p.613 rightly said that “the suggested distinction between being ‘a person residing in the UK’ and being ‘resident in the UK for a year of assessment is

whatever is intended, as s.2 TCGA illustrates.

6.2.2 *Where is the authority for the statutory split year rule?*

With that in mind one can review the statutory provisions, such as s.368 ITTOIA:

368 Territorial scope of Part 4 charges

(1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.

(2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK

The terms “UK resident” and non-UK resident are defined in s. 989 ITA:

The following definitions apply for the purposes of the Income Tax Acts

...

“non-UK resident” means not resident in the UK (and references to a non-UK resident or a non-UK resident person are to a person who is not resident there),

“UK resident” means resident in the UK (and references to a UK resident or a UK resident person are to a person who is resident there),

Neubergh does not, it seems to me, justify the statutory split year rule, as it is a step from “resident in the UK” (the relevant statutory language now) to “resident in the UK in the year” (the terminology considered in *Neubergh*). But for all that, the principle has long been agreed.³

ESC A11 (Residence in the UK: year of commencement or cessation of residence) provides:

[1] The Income and Corporation Taxes Acts make no provision for splitting a tax year in relation to residence and an individual who is resident in the UK for any year of assessment is chargeable on the basis

excessively refined.” I stress this because the special commissioner revived this usage (I think, unhelpfully) in *Genovese v HMRC* [2009] STC (SCD) 373 at [54].

3 Rowlatt J alluded to it in *Back v Whitlock* 16 TC 723 at p.726: “As I understand it, there is no question under the Income Tax Acts of any apportionment or adjustment for Income Tax in time, with regard to the date when a person became resident and so became taxable.”

that he is resident for the whole year.⁴

I find this a slightly confusing way to express the statutory split year rule, but it is in principle correct.

Having said that, however, the statutory split year rule is subject to two exceptions of such breadth that the principle rarely applies:

- (1) Relief is available by concession ESC A11.
- (2) Relief may be available under Double Tax Treaties.

6.3 Concession A11

The concession continues:

[2] But where an individual—

- (a) comes to the UK to take up permanent residence or to stay for at least two years; or
- (b) ceases to reside in the UK if he has left for permanent residence abroad,

liability to UK tax which is affected by residence is computed by reference to the period of his residence here during the year.

[3] It is a condition that the individual should satisfy the Board of Inland Revenue that

[a] prior to his arrival he was, or

[b] on his departure is,
not ordinarily resident in the UK.

For cases where the concession does not apply, see

9.7.1 (Sub-£2k taxpayers: Interaction of £2k limit with split-year concessions);

9.10.2 and 9.10.12 (“Long-term UK resident”; Remittance basis claim charge in year of arrival and departure).

57.2.5 (Deemed domicile for IHT: 17-year residence rule).

4 Likewise HMRC6 para 2.4 provides:

“Strictly, you are taxed as a UK resident for the whole of a tax year when you are resident here for any part of it. But, if you leave or come to the UK part-way through a tax year, the year may, by concession, be split (Extra-statutory Concession A11). This means that the UK Income Tax you should pay because you are resident here is calculated on the basis of the period you are living here rather than the whole of that tax year. This has the effect of splitting the tax year into resident and not resident periods for the purposes of calculating the tax due.”

6.3.1 *Year of arrival*

The usual conditions for year of arrival treatment are therefore:

- The individual comes to the UK:
 - (a) to take up permanent residence or
 - (b) to stay for at least two years.

ESC [2](a).

- Prior to arrival, the individual was not ordinarily resident: ESC [3][a]. The first limb of condition [2](a) is otiose since anyone who comes to take up permanent residence will fall within the second limb (they come to stay for at least two years). In condition [2](a) I think the context shows that “stay for at least two years” must mean “be tax resident for two or more tax years”. So an individual who is here from 1 September 2000 to 31 September 2001, who is therefore resident in 2000/01 and 2001/02, qualifies for year of arrival treatment in the year of arrival.

The individual who comes to the UK so as to be resident for only one tax year will not qualify for IT year of arrival treatment. This is bizarre because they may qualify for IT year of departure treatment and (I think) may qualify for CGT year of arrival treatment.

Condition [3][a] would only affect someone who (prior to arrival) is non-resident but ordinarily UK resident, which in practice never or hardly ever happens.

6.3.2 *Year of departure*

The usual conditions for year of departure treatment are:

- The individual must leave for permanent residence abroad: A11 [2](b).
- The individual must cease to be ordinarily resident in the UK: A11 [3][b].

Condition A11 [2](b) – permanent residence abroad – is stricter than the equivalent rule for the year of arrival, A11 [2](a). If “permanent” is read strictly, a person who leaves for a number of years, three years or even five years, does not qualify for year of departure treatment, unless the employment exception applies. But perhaps a reasonable length period abroad, say three years, is regarded as “permanent” for this purpose.

In respect of this condition, ESC A11 continues:

The concession would not apply, for example, where an individual who had been ordinarily resident in the UK left for intended permanent

residence abroad but returned to reside here before the end of the tax year following the tax year of departure.

Why? Does this assume that the individual is not ordinarily resident abroad in the year following the year of departure? I would have said that they were ordinarily resident, until they changed their minds and decided to return. It is however an unusual case, so the question will not often arise.

6.3.3 *Absence under contract of employment*

Condition [2](b) (to leave for permanent residence abroad) is relaxed in one case. ESC A11 provides:

This concession is extended to the years of departure and return where, subject to certain conditions, an individual goes abroad for full time service under a contract of employment. These conditions are—

- the individual's absence from the UK and the employment itself both extend over a period covering a complete tax year; and
- any interim visits to the UK during the period do not amount to—
 - (i) 183 days or more in any tax year; or
 - (ii) an average of 91 days or more in a tax year (the average is taken over the period of absence up to a maximum of four years).

This is mainly relevant to year of departure treatment for an employee who leaves the UK but not for *permanent* residence abroad so they do not meet condition A11 [2](b). It could also apply to year of arrival treatment, for an employee who returns to the UK but only to stay for one year, so they do not meet condition [2](a). One could just imagine cases where an individual qualifies for year of arrival treatment under this paragraph, but normally if an individual leaves under a contract of employment for a year they cease to be ordinarily resident and will qualify under the usual conditions.

6.4 **IT computation where ESC A11 applies**

ESC A11 simply states:

liability to UK tax which is affected by residence is computed by reference to the period of his residence here during the year.

6.4.1 *What is the period of residence?*

ESC A11 refers to “the period of residence here during the year” and the first step is to ascertain this period.⁵

From 2008/09, days of arrival are counted, but days of departure are not: one applies the usual rule that a day only counts if one is present at the end of the day.

There is no other guidance on how to ascertain the period of residence here. Here is just a selection of cases:

	Days present: Case 1	Case 2	Case 3
April (from 6 th)	0	1	7
May	0	0	0
June	0	0	2
July-April	<i>present throughout in all three cases</i>		

In case 1 the individual’s period of residence begins 1 July. Is case 2 different because of the one day visit in April? It is thought not, for one would not describe the individual as resident here in the period April–June if they were only here for one day. It should be the same even if at the time of the day’s visit in April the individual had already decided to stay from July to the following April. If that is right then even in case 3, the individual’s period of residence starts in July. But where the dividing line comes is hard to say. What if they are resident in all of April, then away, and continuously present from October. Are they resident in the period April–October? Or only from the beginning of October? It is suggested that it depends on intention. If during the April visit they did not intend to come in October, they are not resident during that period. In practice no doubt we muddle through.

6.4.2 *Habitual visitors*

The Inspectors Manual provided at 1664:

Visitors resident from 6 April

An individual who, by reason of habitual and substantial visits, becomes

⁵ ESC A11 also refers to “arrival” and “departure” and clearly the period of residence is between those two.

chargeable as a resident for and from the fifth year of such visits (see (a)(ii) of IM45)⁶ should be treated as resident for the whole of the year for the purpose of this guidance.

The reason is presumably that in the case of a person making sporadic visits, there is often no obvious way of identifying the period of residence.

6.4.3 *Straightline time apportionment v income-of-period apportionment*

There are several possible ways of computing liability by reference to the period of residence. In particular:

- (1) One may ascertain the total income of the year and divide it by A/B where A is the UK resident period and B is the non-resident period; eg if someone leaves halfway through the year, the tax is on half the year's income. I refer to this as “**straightline time apportionment**”.
- (2) One may ascertain
 - (a) the income arising in the resident period and
 - (b) the income arising in the non-resident periodand compute liability by reference to (a).
I refer to this as “**income-of-period apportionment**”.

6.5 IT Computation in year of arrival: RFI

6.5.1 *RFI: arising basis*

IR20 (withdrawn from 2009/10) was difficult to follow by the time it reached its 2008 version, because parts of it were out of date, discussing the preceding year basis (abolished 1996/7) and paying and collecting agents rules (abolished in 2000). The 2008 updates to IR20 made no attempt to address this problem. But apart from some curious rules relating to source ceasing (which were anomalous before 2008 and presumably have no relevance subsequently) IR20 opted for straightline time apportionment. The former Inspectors Manual para 1663 (now withdrawn) provided an example which conveniently illustrated this approach:

⁶ This passage in the Inspectors Manual set out the short term visitors rules.

New arrivals on or after 6 April 1997

Where an individual arrives in the UK on or after 6 April 1997 and is regarded as resident from the date of arrival, his liability in respect of overseas income within Cases IV or V should be determined as follows.

(1) No liability arises where the source of income ceases before permanent residence begins.

(2) Liability for the year of arrival should be based

(a) where the arising basis applies, upon the proportion on a time basis from the date of arrival to the following 5 April, of the full amount of income arising in the year of arrival.

The Manual then gave an example which helpfully illustrated the rule:

For example, an individual arrives in the UK on 6 October 1997 and is regarded as UK-resident from that date. Case V income arose as follows:—

<i>30/6/97</i>	<i>£100</i>
<i>30/9/97</i>	<i>£200</i>
<i>31/12/97</i>	<i>£150</i>
<i>31/3/98</i>	<i>£250</i>
<i>[total</i>	<i><u>£700]</u></i>

If the arising basis applies, the amount chargeable for 1997–98 will be $6/12 \times £700 = £350$

This is what I describe as “straightline time apportionment”.

However, HMRC6 provides:

10.14.1 When you become resident in the UK

[a] When you come to the UK during a tax year and are resident from the date of your arrival, you are liable to UK tax on your UK investment income for the whole of the tax year, subject to the terms of any DTA which might apply to you.

[b] You will not be liable to UK tax on foreign investment income *arising before the date of your arrival* under Extra Statutory Concession A11.

[c] From the date of your arrival in the UK you will be liable to UK tax on your foreign investment income, subject to whether you use the remittance basis of taxation in the year of your arrival.

This suggests that HMRC may have altered their practice, and one now should identify when the income arose and income attributable to the pre-

arrival period is not taxed. This is consistent with the approach adopted for departure.

One would have expected a change of practice of that kind to be identified and discussed in advance, and possibly HMRC may continue to accept straightline time apportionment, at least when it gives roughly the same result as income-of-period apportionment.

6.5.2 *RFI: remittance basis*

The terms of the ESC require that tax is “computed by reference to the period of residence here during the year” which suggests that where the remittance basis applies:

- (1) income arising in the non-resident period should be disregarded; and
- (2) remittances made during a non-resident period should be disregarded.

HMRC6 10.14.1 (set out above) supports point (1); The January 2009 Qs & As suggest HMRC accept point (2):

Remittances of foreign income arising in the months before an individual came to the UK (assuming the individual was not temporarily non-resident) will not be taxable under the terms of the A11 concession.

6.6 **IT computation in year of departure: RFI**

6.6.1 *RFI: arising basis*

The method of computation for the year of departure was formerly different, and more generous, than for the year of arrival. IR20 (withdrawn from 2009/10) provided:

Investment income of those who leave, or come to, the UK part way through a tax year

Leaving the UK

6.15 For tax years up to the year ending 5 April 2008, for overseas investment income where you are **not** taxed on the remittance basis, you will pay tax on the smaller of

- [a] the actual overseas investment income arising for the period from 6 April to the date of your departure, and
- [b] the same fraction of your total overseas income for the year of departure as the fraction of the full tax year for which you are

resident in this country. For example, if you are resident in the UK from 6 April until 6 October in the same tax year, i.e. 6 months, the fraction is 6/12.

For tax years from 6 April 2008 onwards, the same rules will apply, depending on your personal circumstances. If you have chosen not to claim the remittance basis in the tax year of your departure you will be liable to pay UK tax on all of your income, including your overseas investment income, up to your departure from the UK – see paragraph 5.12.

Thus tax was on the lower of time apportionment and income-of-period apportionment. However the practice seems to have quietly changed. HMRC6 provides:

10.14.2 When you stop being resident in the UK

When you leave the UK during a tax year and become non-resident here on the day after your departure, you will be liable to UK tax on your UK investment income for the whole of the year.

If you meet the requirements of Extra-statutory Concession A11 you will not be liable to UK tax on your foreign investment income following the date of your departure. Up to the date of your departure from the UK you will be liable to UK tax on your foreign investment income, subject to whether you use the remittance basis in the tax year of your departure.

10.14.3 When you do not use the remittance basis

If you do not use the remittance basis in the year of departure you will, where you are entitled to apply Extra-statutory Concession A11, be liable to UK tax on your foreign investment income which arose before your departure from the UK.

This is again an income-of-period apportionment.

6.6.2 RFI: remittance basis

IR20 (withdrawn from 2009/10) provided:

*6.16 For overseas investment income where you are taxed on the **remittance basis** (see para 6.2), you will pay tax on the smaller of*

- [a] the actual overseas investment income remitted to the UK in the period from 6 April to the date of your departure, and*
- [b] the same fraction of the total overseas income you remit to the UK in the year of departure as the fraction of the full tax year for*

*which you are resident in this country.*⁷

However the practice seems to have quietly changed. HMRC6 provides:

10.14.4 When you use the remittance basis

If you use the remittance basis in the year of departure you will, where you are entitled to apply Extra-statutory Concession A11, be liable to UK tax on your foreign investment income which you remitted to the UK before your departure.

6.7 Interest from FOTRA securities

IR20 (withdrawn from 2009/10) para 6.6 provided:

*UK tax is not chargeable on interest arising on **UK Government ‘FOTRA’ securities**, if you are not ordinarily resident in the UK.⁸ ‘FOTRA’ stands for ‘Free of Tax to Residents Abroad’. Where we treat you as becoming, or ceasing to be, ordinarily resident in the UK part way through the tax year, no tax will normally be charged on interest payable while you are not ordinarily resident—that is, before the date you arrive here or after the date you leave.*

HMRC6 contains no guidance on the point, but there is no reason to think that HMRC practice has changed.

⁷ Similarly, the Inspectors Manual provided:

1667. Persons ceasing to be resident in UK

Where a person (other than an individual of the type referred to in IM45 [See 6.4.2 (Habitual visitors)]) takes up permanent residence abroad and ceases to be resident in this country, any liability under Case IV or V for the year in which residence here ceases should be based on—

(a) the proportion, appropriate to the period from 6 April to the date of departure, of the income arising or remitted, as the case may be, in the ... year of departure

...

or

(b) the actual amount of the income arising or remitted, as the case may be, in the period from 6 April to the date of departure, whichever is the less.

⁸ See 20.4 (FOTRA exemption).

6.8 Income within s.624 ITTOIA

The Manuals do not deal with this expressly, but ESC A11 is in general terms, so it must be assumed that the RFI rules set out above apply.

6.9 Income within s.720 and s.731 ITA

It is considered that one can split years by reference to the periods of ordinary residence.⁹

6.10 UK source investment income

ESC A11 provides:

Where the concession applies and the tax year is split, FA 1995 s 128 [now s.811 ITA] (limit on income chargeable on non-residents—income tax) does not apply for the period for which an individual is treated as not resident.¹⁰ That section only applies to complete years of non-residence.

In particular, although a non-resident is not chargeable on UK source dividends, pre-arrival UK dividends and post-departure UK dividends of a split year are taxed in full.

There is no good reason for this anomaly, but there it is.

6.11 Gains from life policies, etc.

ESC A11 does not apply to chargeable event gains.¹¹ There is some sense in this, because policies already qualify for non-resident period relief.¹²

6.12 Accrued income scheme

HMRC6 provides:

9 See 3.2.3 (Ordinary residence during part of tax year).

10 For a full discussion of the relief, see 39.1 (Non-residents Income Tax relief).

11 See 32.4.5 (Individual non-resident in year of chargeable event).

12 See 32.4.6 (Non-resident period relief).

10.13.2 UK Government securities

... If you hold securities with a nominal value of more than £5,000 during a tax year in which you are resident in the UK at any time, special tax provisions (the ‘accrued income scheme’) will apply when the securities are transferred. You will be charged UK Income Tax on the interest that has built up (‘accrued’) over the period you owned the securities following the last interest payment, even if you were not resident in the UK for part of that period.

In principle this is of course right, but it is not (I think) addressing the position in the year of arrival or departure. It is suggested that ESC A11 applies.

6.13 Withholding tax on interest

If an individual becomes non-ordinarily resident during a tax year, they are entitled to receive interest from UK deposit-takers free of withholding tax for the non-ordinarily resident part of the year.¹³ The relevant form must be completed. In this context, note that the TDSI Guidance Notes (February 2009) provide:

4.52 Emigration

Strictly, a declaration made in contemplation of, but before, leaving the UK is not acceptable. But Financial Institutions may accept such declarations provided they satisfy themselves, before paying interest without deduction of BRT, that the investor has left the UK. A note of any enquires made should be kept in the investor’s records.

Similarly if a person ceases to have a usual place of abode outside the UK, non-resident’s withholding tax ceases to apply at that time.¹⁴

6.14 UK resident individual becoming ordinarily resident during the year

So far we have considered the position of an individual who becomes or ceases to be UK resident. This section considers the position of an individual who is UK resident throughout a tax year but becomes

¹³ See 19.13 (Withholding tax on interest from deposit-takers).

¹⁴ See 19.8 (Non-resident’s withholding tax).

ordinarily resident during the year. In practice HMRC will generally accept that ordinary resident status begins at the start of a tax year, so this issue should not arise.

6.14.1 *Remittance basis claims*

Section 809B ITA provides:

- (1) This section applies to an individual for a tax year if the individual—
 - (a) is UK resident in that year,
 - (b) is not domiciled in the UK in that year or is not ordinarily UK resident in that year, and
 - (c) makes a claim under this section for that year.

If the individual is not UK domiciled they may claim the remittance basis (ordinary residence is not relevant). If the individual is UK domiciled they may make a remittance basis claim only if they are “not ordinarily UK resident in that year”. On the basis of *Mitchell*¹⁵, it is considered that the individual who becomes ordinarily resident during the year does not meet this condition, so a s.809B claim cannot be made.

6.14.2 *Employment income*

Section 26(1) ITEPA provides:

This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee is not ordinarily UK resident in that year...

On the basis of *Mitchell*,¹⁶ it is considered that the individual who becomes ordinarily resident during the year does not meet this condition, so a s.809B claim cannot be made.¹⁷

15 See 6.2.1 (Residing in the UK "in a tax year" and "for a tax year").

16 See 6.2.1 (Residing in the UK "in a tax year" and "for a tax year").

17 In *Genovese v HMRC* [2009] STC (SCD) 373 the Special Commissioner reached the same conclusion, at [51] to [54] (though without much discussion and without reference to the relevant cases; the taxpayer was not represented by counsel). Similarly in *Turberville v HMRC* [2010] UKFTT 69 at [8].

6.15 Income tax on trustees

If a trust changes residence the HMRC view is that the tax year is split into UK and non-UK resident periods for income tax purposes. HMRC Residency: Non-resident Trusts (published 1 April 2008) provides:

Change in residence status of body of trustees

A change in the residence status of a body of trustees is usually caused by a change in the trustees who make up the body. It can also happen where the trustees remain the same but one of them changes their residence status.

For income tax purposes if the residence status of a body of trustees changes during the tax year then the trustees are potentially liable for income tax on all their worldwide income for the period they were actually resident. They are only liable for income tax on their UK source income for the period they were actually non-resident.¹⁸

This view was probably formulated before the introduction in 2006 of the rule that trustees are a single and distinct person for IT;¹⁹ but HMRC do not argue that that rule has altered the position.

6.16 CGT statutory split year rule

Section 2(1) TCGA provides:

... a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment
[a] during any part of which he is resident in the UK, or
[b] during which he is ordinarily resident in the UK.

This is better drafted than IT, as the CGT statutory split year rule is clearly expressed. CGT is charged on gains of a year *during any part of which* the individual is UK resident. A UK resident individual who ceases to be UK resident is strictly subject to CGT on gains accruing until the following 6 April; a non-resident who realises a gain is strictly subject to CGT if they become UK resident before the following 6 April.

18 See www.hmrc.gov.uk/cnr/nr_trusts.htm. The statement in ESC A11 [1] that years are not split refers to an individual: see 6.2 (Income tax: statutory split year rule)

19 See 4.3 (Trustees treated as single and distinct person).

As with income tax, the CGT statutory split year rule is subject to two exceptions of such breadth that the general principle rarely applies:

- (1) Relief is available by concession: ESC D2.
- (2) Double Tax Treaties split UK tax years into treaty-resident and treaty-non-resident periods.

6.16.1 *Section 13 TCGA*

Section 13 TCGA is an exception: the charge only applies if the individual is resident at the time the gain arises, so it is not necessary to rely on ESC D2.

6.17 **Concession D2**

ESC D2 provides:

1. [a] An individual who
 - [I] comes to live in the UK and
 - [ii] is treated as resident here for any year of assessment from the date of arrivalis charged to capital gains tax only in respect of chargeable gains from disposals made after arrival,
 - [b] provided that the individual has not been resident or ordinarily resident in the UK at any time during the five years of assessment immediately preceding the year of assessment in which he or she arrived in the UK.
2. [a] An individual who
 - [I] leaves the UK and
 - [ii] is treated on departure as not resident and not ordinarily resident hereis not charged to capital gains tax on gains from disposals made after the date of departure,
 - [b] provided that the individual was not resident and not ordinarily resident in the UK for the whole of at least four out of the seven years of assessment immediately preceding the year of assessment in which he or she left the UK.²⁰

20 The concession continues:

“3.This concession does not apply to any individual in relation to gains on the disposal of assets which are situated in the UK and which, at any time between the

6.17.1 *Year of arrival*

The conditions for year of arrival treatment are:

- the individual comes to live in the UK: D2 1[a][I]
- the individual is treated as resident here from the date of arrival: D2 1[a][ii]
- the individual has not been resident at any time during the 5 years of assessment before the year of arrival: D2 1[b]

Condition 1[a][I] is not in fact a separate condition, since anyone who meets condition 1[a][ii] must come to live in the UK.

Condition 1[a][ii] is puzzling. If the concession applies the individual is treated as resident here from the date of arrival, if it does not, they are not, so that can hardly be a condition of the concession. Perhaps its point is to withhold the concession for habitual visitors who become UK resident in the fifth year of visits.²¹

Condition 1[b] was introduced as a consequence of the temporary non-residence rules in 1998. But the condition is stricter than the temporary non-residence rules.

It is necessary to ascertain the date of arrival and departure: see 6.4.1 (What is the period of residence?).

6.17.2 *Year of departure*

The conditions for year of departure treatment are:

- the individual leaves the UK: D2 2[a][I]
- the individual is treated on departure as not resident: D2 2[a][ii]
- the individual was not UK resident for at least 4 out of 7 of the years of assessment before the year of departure: D2 2[b].

Once again, condition 2[a][I] is otiose, but it does not matter. Condition

individual's departure from the UK and the end of the year of assessment, are either:

- used in or for the purposes of a trade, profession or vocation carried on by that individual in the UK through a branch or agency; or
- used or held for, or acquired for the use by or for the purposes of such a branch or agency."

This is consistent with the usual CGT rule for trades carried on through a branch or agency.

²¹ See 6.4.2 (Habitual visitors).

2[b] was introduced as a consequence of the temporary non-residence rules in 1998. But the condition is stricter than the temporary non-residence rules. Where the taxpayer has been resident or ordinarily resident in 4 out of the 7 preceding years then gains from disposals made in the year of departure, after the date of departure, are chargeable to CGT whether or not the taxpayer ever returns to the UK to become resident again.

There is an extended time limit for assessments for individuals leaving the UK if they return within five years.²²

6.18 Computation of CGT

ESC D2 operates differently from A11. One does not compute the total gains of the year and time apportion. D2 states that one ignores disposals in the non-resident part of the year.

Under the remittance basis, gains are treated as accruing when remitted.²³ It is suggested that this does not change the date of disposal for the purposes of the remittance basis, or else a foreign domiciliary who remits gains pays more CGT than a UK domiciled individual.

6.18.1 Losses

The concession says nothing about allowable losses accruing in the non-resident part of the year. The possibilities are:

- (1) losses of the period remain allowable although gains of the same period are not;
- (2) losses of the period are allowable only so far as they exceed the gains of the same period;
- (3) Losses of the period are not allowable at all.

Solution (1) is too good to be fair, but it is the most consistent with the words of the concession and it is tentatively considered that this is correct. Solution (3) is the most sensible, but cannot be applied, since it imposes more tax than would be the case without the concession. When the concession were made statutory (as is proposed for the FA 2013) this problem will cease to arise.

²² See 8.11 (Time limit for assessment).

²³ See 46.2.1 (Date of disposal under remittance basis).

6.19 CGT on trusts: year of arrival and departure

ESC D2 provides:

4. This concession does not apply to
 - [a] the trustees of a settlement who commence or cease residence in the UK²⁴ or
 - [b] to a settlor of a settlement in relation to gains in respect of which the settlor is chargeable under [TCGA sections 77–79, or]²⁵ TCGA section 86 and Sch 5.

The CGT concession does not apply to trustees or to a settlor who is chargeable on the gains of a non-resident settlement. This is an anomaly, but a necessary one, because if by concession the trustees or settlor were not charged to tax in a split year, the untaxed gains would not be s.2(2) amounts (trust gains), and so may escape tax altogether. Though if the concession was made statutory as it ought to be, this anomaly could easily be corrected.

Where UK trustees are considering retiring in favour of non-resident trustees, they should consider the alternative course of transferring trust assets to a separate non-resident trust. The chargeable gain on the transfer to a new trust is in principle the same as the exit charge on the appointment of non-resident trustees. However the new trust will not be within the scope of CGT for gains accruing after the transfer, whereas the migrating trust will remain within the scope of CGT for the rest of the tax year.

6.20 CGT planning: postponing disposals until non-resident

The obvious CGT planning for individuals is to postpone disposals until non-resident. The CG Manual discussion is mostly pedestrian and partly

24 The same point is made in SP 5/92 para 2:

Under TCGA 1992 s 69, a body of trustees is regarded as capable of changing its residence status part-way through a year of assessment. It must be borne in mind, however, that TCGA 1992 s 2(1) provides that the trustees are liable to tax on all chargeable gains of a tax year during any part of which they are resident or during which they are ordinarily resident in the UK.

25 The reference to s.77–79 TCGA is not applicable from 2008/09 as these sections have been repealed.

out of date; but the practitioner needs to read it to see how HMRC approach the issues:

25800. Arrival in and departure from the UK: avoidance risk on emigration [June 2012]

When an individual plans to emigrate from the UK they will often want to dispose of their assets located in the UK before departure. This is particularly true of privately run businesses carried on in the UK but it is often also true of other property located in the UK. For such assets it may be necessary, or at least convenient, for the individual to be in the UK to deal with negotiations for the sale. The individual may also need to have a definite sale arranged in order to ensure he or she has funds for use in the country to which he or she is emigrating.

The emigrating individual will have an expectation that he or she will be treated as not resident and not ordinarily resident from the date of departure.

If the disposal occurs before the date of departure the individual will be liable to a charge to UK Capital Gains Tax in respect of the chargeable assets disposed of.

But there is no form of capital gains 'exit charge' applying to individuals when they emigrate from the UK (see CG13400).

If the disposal occurs after the date of departure but before the following 6 April there will be no charge to CGT if the split year treatment in ESCD2 applies (see CG25760 above). And if the disposal occurs after 5 April following departure the gain will be exempt because when it occurs it is outside the scope of TCGA92/S2 (unless the individual later resumes residence in the UK and the temporary non-residence rules in TCGA92/S10A apply).

Thus if the sale is genuinely postponed until after the date of departure there will be no charge to UK Capital Gains Tax where the split year treatment applies. However, enquiries might reveal that despite appearances the disposal actually pre-dated the departure, or that HMRC is justified in withholding the benefit of ESCD2: see CG25805 and CG25980+.

25805. Establishing the correct time when a gain arises [May 2010]

An individual intending to emigrate from the UK and dispose of assets may arrange his or her affairs so that although they have certainty or near-certainty that the sale will occur before they cease to be UK resident, it appears that the disposal for tax purposes takes place after that date.

The CG Manual then sets out three ways to attack this planning:

There are three circumstances in which Capital Gains Tax liability may arise notwithstanding that the date of disposal appears to be after the date of emigration. These are where it can be shown that

- there was a binding agreement or contract for sale on or before the date of emigration or
- a business was carried on in the UK through a branch or agency in the period from the date of emigration to the date of disposal or
- an attempt has been made to use ESCD2 for tax avoidance.

Detailed guidance on each of these is contained in the following paragraphs.

25820. Establishing basic facts [Dec 2011]

When an individual claims that a disposal is exempt because it is made at a time when he is not resident and not ordinarily resident you should firstly establish the facts concerning two basic points

- what is the date of disposal in a written contract and
- what is the individual's residence status on that date?

In the case of a disposal under an unconditional contract the date of disposal is the date the contract is entered into not the date of completion (TCGA92/S28(1), CG14261+). However, it is not unknown for individuals and/or their agents to quote the date of completion as the disposal date. It can therefore be worth checking that the date quoted is not in fact the completion date.

Oh dear.

Once you are satisfied on this point the next step is to establish whether, and if so, on what date the individual became not resident and not ordinarily resident.

You should refer to the Residence, Domicile and Remittance Basis Manual and if necessary obtain advice from Specialist Personal Tax International (Advisory) before proceeding further with the case.

6.20.1 *Binding agreement before departure?*

The CG Manual turns to the first of the three lines of attack:

25850. Delayed written contracts [May 2010]

The most common situation is for the individual to negotiate the terms for a disposal but to delay signing the written contract until after the date of departure from the UK. One indicator that this may have happened will be if there is a very short interval between the date of departure and the date the contract is signed.

Cases have been seen where the vendor leaves the UK with a copy of the contract in his possession and posts it from the foreign airport on arrival there. Alternatively, he gives his solicitor a power of attorney under which the solicitor can sign and exchange the contracts on behalf of the vendor once he is outside the UK. There are many other variations.

The author's indignation is misplaced and somewhat naive.

In most straightforward cases, where there is no question of a continuing business or where arrangements have not been entered into to use ESC/D2 to avoid tax, it will not be possible to show there is liability to Capital Gains Tax. An agreement, oral or written, which remains 'subject to contract' is not a binding contract.

Where a formal written contract is entered into after emigration, there is a presumption that the parties intend to leave the transfer unagreed until that time even if it is not explicitly 'subject to contract'. It may be possible to displace that presumption if evidence can be obtained either that the benefit of ESCD2 is being sought as a means of avoidance, see CG25980+, or that the disposal was not in fact conditional or 'subject to contract' at the time of emigration, see CG25805.

25853 Binding contract pre-dating emigration [April 2011]

Legislation enacted with effect from 27 September 1989 requires all disposals of interests in land in England and Wales to be evidenced in writing if there is to be a valid contract, see CG70280 and CG14263. (This has always been the requirement for land in Scotland.) For disposals after that date an oral contract will not be a valid contract. This means that in cases where the written contract is delayed until after 5 April following departure from the UK you will not be able to establish the existence of a binding agreement preceding the date of sale (see CG25860).

In such circumstances it is still possible for there to be a gain chargeable to tax if any of the following apply:

- Section 10 TCGA 1992 (non-resident with UK branch or agency, see CG25500+)
- Section 10A TCGA 1992 (temporary non-residents, see CG26100+)
- Section 25 TCGA 1992 (non-residents: deemed disposals, see CG25570+)

You should note that the above applies only when the land is situated in England or Wales or Scotland. It does not apply if the land is situated in Northern Ireland or any other country where the legislation does not require the contract to be in writing in order for it to be valid.

25860 Binding contract pre-dating emigration [May 2010]

A disposal occurs at the earliest time at which there is a binding contract between the parties. Except where there is a statutory requirement for a contract to be in writing if it is to be valid (see CG25853 above), it does not matter whether the contract is oral or written. *Thompson v Salah* 47 TC 559 established that a binding oral contract can be just as effective as a written contract in giving rise to a disposal for Capital Gains Tax purposes.

Establishing the existence of a binding contract or agreement, oral or written, in advance of the formal contract presents considerable difficulty, see CG25850 above, and requires the facts of the case to be established in detail. Usually this will involve reviewing the correspondence, notes of meetings, telephone conversations, etc which have taken place between the vendor and purchaser (or more usually their professional representatives) prior to the date of signing the formal documents, to see whether there is evidence of a binding oral agreement or whether the correspondence itself constitutes a binding written agreement. It will not usually be worthwhile to undertake such a detailed review unless there are strong *prima facie* indications of a pre-emigration binding agreement.

If a binding agreement prior to the date of formal documentation can be established, the date of the earlier agreement is the date of disposal for Capital Gains Tax purposes.

6.20.2 *Branch/agency*

This is the second line of HMRC attack, though the circumstances in which it arises will be rare:

25900. Business through branch/agency [April 2011]

If an individual is carrying on a trade or profession (and possibly even if he or she is carrying on a vocation) in the UK prior to his or her emigration, that individual may find it necessary to sell the business as a going concern if the best price is to be realised. If the written contract for sale of the business assets is to be delayed until after departure, the individual will need to make arrangements for the business to continue operating in his or her absence. In most such cases we will be able to argue that in the period between departure and the date the contract is signed the activity has been carried on in the UK through a branch or agency.

In those circumstances

- if the disposal occurs after the date of emigration but before the following 6 April the disposal will be within Section 2 TCGA 1992 and ESC D2 will not apply (see CG25770)
- if the disposal takes place after 5 April following the date of emigration TCGA 1992, S 10 will apply (see CG25520+).

In either case the individual will be within the charge to Capital Gains Tax...

6.20.3 *Withdrawal of concession on grounds of tax avoidance*

This is the third line of HMRC attack:

25980. Withholding benefit of ESC D2 [May 2010]

A warning is published as part of the introduction to HMRC's guide to extra statutory concessions. This reads as follows.

'The Concessions described within are of general application, but it must be borne in mind that in a particular case there may be special circumstances which will require to be taken into account in considering the application of the concession. A concession will not be given in any case where an attempt is made to use it for tax avoidance.'

This is sometimes referred to as the 'health warning'.

25981. Withholding benefit of ESC D2 [May 2010]

If you are dealing with a disposal after the date of departure from the UK but before the following 6 April, exemption from Capital Gains Tax arises only by reason of ESC D2. The 'health warning' is therefore of relevance to all such cases. Where it can be established that the taxpayer has entered into arrangements in an attempt to use the terms of ESC D2 to avoid liability to Capital Gains Tax which would otherwise arise the Commissioners for HMRC will consider withholding the benefit of ESC D2 under the terms of the 'health warning'.

The case of *R v HMIT ex p. Fulford-Dobson* (60 TC 168) is an example of a case where the benefit of the concession was withheld because of attempts to use it for avoidance purposes.

In straightforward cases where the contract of sale is delayed until after the date of emigration, see CG25850, the Commissioners for HMRC have decided that they will not withhold the concession merely on the grounds that the disposal was arranged to take place after the date of departure from the UK. On its own, a genuine postponement of the disposal is not regarded as an attempt to use the concession for tax avoidance, but where coupled with other arrangements it might be so regarded.

Note that here, as throughout the passage, “genuine” is used as the opposite of “tax avoidance.”²⁶ The CG Manual continues:

Where the facts support the withholding of the concession and there is also an argument about the existence of a pre-emigration agreement which could be arbitrated by a hearing before Tribunal (see CG25880 above), the Commissioners for HMRC will normally wish to withhold the benefit of the concession as its primary action.

25984. Withholding benefit of ESC D2: Enquiries [December 2011]

In all cases where you think the Commissioners for HMRC may wish to consider withholding the benefit of ESCD2 you should obtain the full facts. Usually this will involve reviewing the primary documents including correspondence, notes of meetings, telephone conversations, etc which have taken place between the vendor and purchaser (or more usually their professional representatives) prior to the date of signing the formal documents.

If you are asked to explain the reasons for your enquiries you may point out to the taxpayer the existence of the 'health warning' and you may say that it is necessary to establish the facts to enable a decision to be made about whether or not the case falls into that category.

However, if you conclude that your case is one where the benefit of ESCD2 should be withheld you **MUST** submit your papers to Specialist PT (Capital Gains Technical Group) in Solihull before any mention of this is made to the taxpayer.

26020. Splitting a single contract [May 2010]

In this type of case, what would normally have been included in a single contract for sale is split into two contracts. For example, a farmer owning a farmhouse and associated farmland emigrates; he claims to have sold the farmhouse prior to departure (possibly to give immediate access to capital) and the farmland after the date of departure, and points to the fact that two separate contracts have been entered into. Relief under TCGA 1992, S 222 is claimed on the disposal of the farmhouse. In such cases, it may be possible to sustain an argument that, in reality, there is only a single disposal for capital gains purposes, the date of disposal of the farmland and the farmhouse being the same: that is to say, the earlier of the two dates.

It depends on the facts and the documentation.

²⁶ See 31.17.3 (“Genuine”).

26030. Conditional contracts [May 2010]

Cases have been seen where it is claimed that the date of disposal for capital gains purposes does not occur until the satisfaction of a condition written into the terms of the agreement for sale. To decide whether a condition is such as to make a contract conditional within the terms of TCGA 1992, S 28 (2) can be difficult. You will need to consider the full facts of the case in the context of contract law. There is guidance on dates of disposal and conditional contracts at CG14250+ and CG14270+.

26040. Options and cross-options [May 2010]

Sometimes the owner, before emigrating, grants an option to a potential purchaser to buy the asset, that option to be exercised during a specified period following the owner's emigration. If there is genuine uncertainty in the vendor's mind at the time of emigration as to whether the grantee will exercise the option, there are no grounds for withholding the benefit of the concession. As with pure delay cases, however, there may be evidence to show that the option was a sham and that the vendor is assured of his sale before he leaves the UK.

These are cases where the vendor and purchaser each grant an option to the other party to sell/buy the asset which is the subject of the agreements. Invariably in these cross-options cases, the options are granted before the vendor leaves the UK, but one of the options is exercised (usually by the purchaser) after the vendor's date of departure. The Board will consider withholding the benefit of ESC D2 if there appears to be no commercial reason for the issue of the cross-options.

26060. Transfer to émigré spouse or civil partner under no gain/no loss rule [May 2010]

In this type of case, a husband or wife or a civil partner owns a valuable asset which he or she wishes to sell. The spouse or civil partner of the owner of the asset is leaving the UK – probably for a limited period such as a fixed term employment abroad. The owner transfers the asset to the departing spouse or civil partner prior to departure and claims the protection of Section 58 TCGA 1992. The asset is subsequently sold by the transferee after the date of departure. This tactic was adopted – unsuccessfully – in the case of *R v HMIT ex p. Fulford-Dobson* (60 TC 168).

Cases of this type need to be distinguished from those where the transfer to the non-resident spouse or civil partner is made after that spouse or civil partner has become non-resident and in a year throughout the whole of which that spouse or civil partner is non-resident. In such cases the benefit of Section 58 can effectively be obtained as a result of the decision in *Gubay v Kington* (57 TC 601), see CG22300+.

6.21 Tax planning before arrival in the UK

The Manual discusses CGT planning by emigration but gives no guidance to the converse situation where:

- (1) a taxpayer arrives in the UK during a tax year;
- (2) a disposal takes place before arrival (but in the same tax year so that ESC D2 is in point).

In order to take advantage of the concession, a taxpayer might arrange disposals just before arriving in the UK. They might do this in various ways:

- (1) sell assets;
- (2) enter into an unconditional contract with delayed completion;
- (3) transfer assets to a trust or company, in which the taxpayer is interested.

Arrangement (1) above should not lose the concession (cf CG25981 cited above). But (2) possibly, and (3) clearly, take us into what HMRC would regard as “devices” (ie, avoidance) and should not be adopted unless there is a good non-tax reason.

A taxpayer might realise losses (which are in principle allowable) at the same time as realising gains which (under the concession) are not taxable. In these circumstances, HMRC might justifiably feel that the taxpayer is getting the best of both worlds and seek to withdraw the concession if they can identify any element of tax planning in the timing of disposals.

Similar points arise under ESC A11 if the taxpayer wishes to receive income in the part of a split year before becoming UK resident.

It is best, wherever possible, not to rely on the concession at all except in the simplest cases. Steps would ideally be taken in the tax year before arrival, but simple disposals might if necessary take place in the tax year of arrival, before the date of arrival, if reliance can be placed on ESC D2.

There are many possible strategies. A minimum course would be for the individual to dispose of UK situate assets with inherent gains so as to bring their base cost up to market value. This need only apply to UK situate assets which might be disposed of while the individual is resident here. The individual might go further and dispose of non-UK situate assets if they wish to have the ability to sell the asset and remit the gain.

Watch the pre-owned asset rules: see 72.1 (Pre-owned assets).

HMRC (rightly) take the point that the “bed and breakfasting” rules apply to a non-resident so they should not dispose of securities and re-acquire securities of the same class within 30 days: s.106A TCGA; RI

226.

Of course foreign tax on the disposal would need to be considered. It is sometimes possible to arrange a disposal which under UK rules takes place while non-resident but under foreign rules takes place while UK resident.

It may be appropriate to make capital payments from UK trusts before becoming UK resident.

6.22 Appeal against withdrawal of concession

There is strictly no appeal to the tax tribunal against a decision by HMRC to withdraw a concession. The CG Manual provides:

25880. Dispute over binding agreement [May 2010]

Where the written contract is made after 5 April following the date of departure an assessment to Capital Gains Tax made for the year of departure will only be supportable if there was a binding oral or written agreement in the year of departure. A dispute on this point can therefore be adjudicated by the First-tier Tribunal. If they find as a fact that there was such an agreement in the year of departure they can determine the appeal against the assessment for the year of departure in the appropriate figures. However, if they find there was no agreement they will discharge the assessment.

Where the written contract is made after the date of departure but before the following 6 April an assessment to Capital Gains Tax made for the year of departure will be supportable in law whether or not there was a binding agreement pre-dating departure. This is because Section 2 TCGA 1992 imposes liability whenever an individual is resident or ordinarily resident for any part of a year of assessment (see CG25200 above). If the disposal occurred in the period after the date of departure but before the following 6 April relief from assessment will only be possible if the individual receives the benefit of ESCD2, that is to say if the split year treatment applies. Since the First-tier Tribunal cannot concern themselves with the operation of Extra Statutory Concessions the Tribunal would be unable to discharge an assessment made on gains arising in this period.

25882. Dispute over binding agreement [December 2011]

If the pre-emigration agreement and the written contract are said to have been made in the same tax year then the gain computed at the time of either will be the same as the other. This means that a dispute about the existence of the pre-emigration agreement cannot be resolved by the

First-Tier Tribunal, because the amount of any assessment depends only on whether ESCD2 applies and the Tribunal cannot consider the effects of an Extra Statutory Concession: they would be bound to determine the assessment at the figure of the gain. In such cases, where the taxpayer does not accept that a pre-emigration agreement existed, Specialist PT (Capital Gains Technical Group) in Solihull will advise on what further action may be taken.

25883. Dispute over binding agreement [December 2011]

Referring a question of whether a pre-emigration agreement existed to the First-tier Tribunal in circumstances where the Commissioners for HMRC would, in any event, withhold the benefit of ESCD2 could give rise to criticism of HMRC. This is because such action would substantially remove the benefit of any Tribunal decision made in the individual's favour. You should therefore consider at an early stage of any enquiry the possibility of withholding the benefit of ESCD2 in accordance with CG25980 below. When dealing with such cases you should attempt to obtain all facts relevant to a decision on ESCD2 when obtaining facts about the possible existence of a pre-emigration agreement and then make a submission to Specialist PT (Capital Gains Technical Group) in Solihull in appropriate cases.

25884. Dispute over binding agreement [April 2009]

If the pre-emigration agreement and the written contract are alleged to have occurred in the same month (which will frequently occur when there is a very short interval between emigration and contract date) or in different months but the retail prices index for those months is the same, the amount of the assessment would be the same whether or not there was a pre-emigration agreement. As the Tribunal cannot consider the effects of an Extra Statutory Concession they would be bound to determine the assessment at this figure. In these circumstances the dispute about the existence of the pre-emigration agreement could not be resolved by referring the matter to the Tribunal. In such cases, where the taxpayer does not accept that a pre-emigration agreement existed, Capital Gains Technical Group will be pleased to advise on what further action may be taken.

In *Kimber v HMRC*²⁷ the Tribunal robustly ignored this difficulty and heard an appeal against the concession, in circumstances where HMRC did not make any objection. Fortunately the enactment of the statutory split year rule will resolve this problem for the future.

27 [2012] UKFTT 107 (TC) at [17].

It is possible to challenge HMRC by way of judicial review (or by application to HMRC adjudicator). It is an interesting question whether the taxpayer must show:

- (1) the HMRC decision that there is tax avoidance is one which no reasonable person could reach, or merely
- (2) the HMRC view is (in the Court's judgment) wrong (even if not unreasonable).

In practice few, if any, cases would turn on that fine distinction and either contention would be difficult to sustain.

6.23 Reforms proposed for 2013/14

The Residence Consultation Paper provides:

3.43 As part of introducing an SRT [Statutory Residence Test], the intention is broadly to recreate the circumstances in which split year treatment currently applies and to put it on a statutory footing. This will mean that ESCs A11, D2 and A78 (which applies where an individual is accompanied, or later joined, by his or her spouse who is not in full-time employment abroad) will be withdrawn and replaced by legislative rules.

In June 2012 HMRC published the response to the residence consultation (**“the Residence Response Paper”**)²⁸ and legislation in the FA 2013 seems likely. This chapter discusses the draft clauses set out in that paper. They are set out in part 3 of a schedule here called **“the SRT schedule”**.

The Residence Response paper provides:

6.3 In general the Government considers that the SRT legislation is close to a final draft, subject to any changes that may be considered as a result of this consultation. However, the legislation on amendments to tax charging provisions in Part 3 ... is at an earlier stage and the Government is aware that these parts will need refining, notwithstanding any other changes that may arise from this consultation...

6.6 Following this consultation, a revised draft of the legislation will be published in autumn 2012 as part of Finance Bill 2013 for a further 12-

28 HMRC, *Statutory definition of tax residence and reform of ordinary residence: a summary of responses* (June 2012)
www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf.

week period of consultation.

So the topic will need to be reviewed in the light that revised draft, again in the light of Finance Bill 2013, and again in the light of the FA 2013.

The SRT schedule provides:

26 This Part [Part 3]–

- (a) explains when, as respects an individual, a tax year is a split year,
- (b) defines the overseas part and the UK part of a split year, and
- (c) amends certain enactments to provide for special charging rules in cases involving split years.

27 Nothing in this Part, or in any special charging rules having effect by virtue of it, is intended to affect whether an individual falls to be regarded as resident in the UK for the purposes of double taxation arrangements.

28 Nothing in this Part, or in any special charging rules having effect by virtue of it, applies to individuals in their capacity as personal representatives or trustees of a settlement.

6.23.1 *Definition of a “split year”*

Para 29 SRT schedule provides:

- (1) As respects an individual, a tax year is a “split year” if–
 - (a) the individual is resident in the UK for that year, and
 - (b) the circumstances of the case fall within Case 1, Case 2, Case 3 or Case 4.
- (2) The 4 Cases are described in paragraphs 30 to 33.
- (3) In those paragraphs, the individual is referred to as “the taxpayer” and the tax year as “the relevant year”.

The Residence Consultation Paper provides:

3.44 It is not possible to recreate the conditions of the current extra statutory concessions exactly because they rely on the subjective and imprecise concept of becoming ‘permanently’ resident in the UK or elsewhere. Therefore, in keeping with the intention of introducing clear and objective rules, the statutory provisions on split years will be linked to the conditions contained in the SRT. This means the new rules will treat a tax year as being split into periods of residence and non-residence

if a person:

- becomes resident in the UK by virtue of their only home being in the UK;
- becomes resident by starting full-time employment in the UK;
- establishes their only home in a country outside the UK and becomes tax resident in that country and does not come back to the UK in that tax year;
- loses UK residence by virtue of working full-time abroad; or
- returns to the UK following a period of working full-time abroad.

3.45 A tax year will not be treated as split where an individual's residence status changes due to changes in the number of connection factors under Part C, such as the arrival or departure of their family.²⁹

6.23.2 Case 1: starting full-time work overseas

Para 30 SRT schedule provides:

- (1) The circumstances of a case fall within Case 1 if they are as described in subparagraphs (2) to (5).
- (2) The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).
- (3) On a day in the relevant year, the taxpayer starts to work full-time overseas for a period that continues to the end of the relevant year (whether or not it also continues beyond that point).
- (4) In the part of the relevant year beginning with that day—
 - (a) the number of days on which the taxpayer does more than 3 hours' work in the UK does not exceed the permitted limit, and
 - (b) the number of days that the taxpayer spends in the UK does not exceed the permitted limit.
- (5) The taxpayer is not resident in the UK for the next tax year because the taxpayer meets the third automatic overseas test for that year (see paragraph 6).
- (6) The permitted limit is—
 - (a) for sub-paragraph (4)(a), the number found by reducing 20 by the appropriate number, and
 - (b) for sub-paragraph (4)(b), the number found by reducing 90 by the appropriate number.
- (7) The appropriate number is the result of—

²⁹ HM Treasury, *Statutory Definition of Tax Residence: a Consultation* (June 2011) www.hm-treasury.gov.uk/d/consult_condoc_statutory_residence.pdf.

$$A \times B/12$$

where—

“A” is—

- (a) 20, for sub-paragraph (4)(a), or
- (b) 90, for sub-paragraph (4)(b), and

“B” is the number of whole months in the part of the relevant year before the day mentioned in sub-paragraph (3).

6.23.3 *Case 2: accompanying spouse etc*

Para 31 SRT schedule provides:

- (1) The circumstances of a case fall within Case 2 if they are as described in subparagraphs (2) to (6).
- (2) The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).
- (3) The taxpayer has a partner whose circumstances fall within Case 1 for the relevant year.
- (4) On a day in the relevant year, the taxpayer joins the partner overseas so they can live together while the partner is working full-time overseas.
- (5) In the part of the relevant year beginning with the deemed departure day—
 - (a) the taxpayer has no home in the UK at any time, or has homes in both the UK and overseas but spends the greater part of the time living in the overseas home, and
 - (b) the number of days that the taxpayer spends in the UK does not exceed the permitted limit.
- (6) The taxpayer is not resident in the UK for the next tax year.
- (7) The deemed departure day is the later of—
 - (a) the day mentioned in sub-paragraph (4), and
 - (b) the day on which the partner starts to work full-time overseas.
- (8) “The permitted limit” has the same meaning as it has in paragraph 30(4)(b).
- (9) “Partner” means—
 - (a) a husband or wife or civil partner,
 - (b) if the individual and another person are living together as husband and wife, that other person, or
 - (c) if the individual and another person of the same sex are living together as civil partners, that other person.

6.23.4 Case 3: leaving the UK to live abroad

Para 32 SRT schedule provides:

- (1) The circumstances of a case fall within Case 3 if they are as described in subparagraphs (2) to (7).
- (2) The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).
- (3) At the start of the relevant year the taxpayer's normal home was in the UK but—
 - (a) there comes a day in the relevant year when P ceases to have any home in the UK, and
 - (b) from then on, P has no home in the UK for the rest of that year.
- (4) The circumstances do not fall within Case 1 or Case 2 for the relevant year.
- (5) In the part of the relevant year beginning with the day mentioned in subparagraph (3)(a), the taxpayer spends fewer than 16 days in the UK.
- (6) The taxpayer is not resident in the UK for the next tax year.
- (7) By the end of the period of 6 months beginning with the day mentioned in sub-paragraph (3)(a), the taxpayer's normal home is overseas.

6.23.5 Case 4: coming to live or work full-time in the UK

Para 33 SRT schedule provides:

- (1) The circumstances of a case fall within Case 4 if they are as described in subparagraphs (2) to (5).
- (2) The taxpayer was not resident in the UK for the previous tax year.
- (3) Either or both of the following descriptions apply to the taxpayer—
 - (a) at the start of the relevant tax year, the taxpayer did not meet the only home test, but there comes a day in the relevant year when that ceases to be the case and the taxpayer then continues to meet the only home test for the rest of that year, or
 - (b) on a day in the relevant year the taxpayer starts to work full-time in the UK for a period that continues to the end of that year (whether or not it also continues beyond that point).
- (4) For the part of the relevant year before that day (or earliest day if there is more than one), the taxpayer does not have sufficient UK

- ties.
- (5) The taxpayer meets the second or third automatic UK test for the relevant year (see paragraph 5).
 - (6) The “only home test” is met if–
 - (a) the taxpayer has only one home and that home is in the UK, or
 - (b) the taxpayer has more than one home and all of them are in the UK.
 - (7) Paragraphs 4 to 9 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments–
 - (a) references in those paragraphs and that Part to year X are to be read as references to the overseas part of the relevant year, and
 - (b) each number of days mentioned in the first column of the Table in paragraphs 8 and 9 is to be reduced by the appropriate number.
 - (8) The appropriate number is found by multiplying the number of days, in each case, by–

$$A \div 12$$
 where “A” is the number of whole months in the relevant year after the day (or earliest day) mentioned in sub-paragraph (4).

This is different from the existing concessions.

6.24 Terminology

6.24.1 “Previous tax year” “next tax year”

Para 34 SRT schedule provides commonsense definitions:

- (1) This paragraph applies for the purposes of paragraphs 30 to 33.
- (2) A reference to “the previous tax year” is to the tax year preceding the relevant year.
- (3) A reference to “the next tax year” is to the tax year following the relevant year.

6.24.2 “Normal home”

Para 34(4) SRT schedule tries to define the word “normal”:

At any given time–

- (a) a person's "normal home" is in the UK if the UK is where the person generally lives at the time (even if the person occasionally lives overseas or is living temporarily overseas at the time), and
- (b) a person's "normal home" is overseas if overseas is where the person generally lives at the time (even if the person occasionally lives in the UK or is living temporarily in the UK at the time).

6.24.3 *Rounding fractions*

Para 34(5) SRT schedule provides:

If calculation of the appropriate number results in a number of days that is not a whole number, the appropriate number is to be rounded up or down as follows—

- (a) if the first figure after the decimal point is 5 or more, round the appropriate number up to the nearest whole number,
- (b) otherwise, round it down to the nearest whole number.

6.24.4 *The "overseas part" and "the UK part" of a split year*

Para 35 SRT schedule provides:

- (1) "The overseas part" of a split year is the part of that year—
 - (a) in Case 1, beginning with the day on which the taxpayer starts to work full-time overseas,
 - (b) in Case 2, beginning with the deemed departure day as defined in paragraph 31(7),
 - (c) in Case 3, beginning with the day on which the taxpayer ceases to have any home in the UK, and
 - (d) in Case 4, before the day (or earliest day) mentioned in paragraph 33(4).
- (2) "The UK part" of a split year is the part of that year that is not the overseas part.

6.25 Split year reliefs

The split year relief is inserted into the relevant charging provisions. The most important are the following:

6.25.1 *Employment income*

Section 15 ITEPA will be amended to provide:

(1) This section applies to general earnings for a tax year for which the employee is UK resident except that, in the case of a split year, it does not apply to any part of those earnings that is excluded.

(1A) General earnings are “excluded” if they–

- (a) are attributable to the overseas part of the split year, and
- (b) are neither–
 - (i) general earnings in respect of duties performed in the UK, nor
 - (ii) general earnings from overseas Crown employment subject to UK tax...

Section 26 ITEPA will be amended to provide:

26 Foreign earnings for year when remittance basis applies and employee meets section 26A requirements

(1) This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee is not ordinarily UK resident in that year, if the general earnings meet all of the following conditions.

(a) they are neither.

- (i) general earnings in respect of duties performed in the UK, nor
- (ii) general earnings from overseas Crown employment subject to UK tax, and
- (b) if the tax year is a split year as respects the employee, they are attributable to the UK part of the year.

(2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year...

6.25.2 *Trading income*

A new s.6(2A) ITTOIA will provide:

If the tax year is a split year as respects a UK resident individual, this section has effect as if, for the overseas part of that year, the individual were non-UK resident.

6.25.3 *Property income*

A new s.270 ITTOIA will provide:

(3) If, as respects an individual carrying on an overseas property business, the tax year is a split year, tax is charged under this Chapter on so much of the profits referred to in subsection (1) as arise in the UK part of the tax year.

(4) Any apportionment required for the purposes of subsection (3) is to be done on a just and reasonable basis.

6.25.4 *Savings and investment income*

A new s.368(2A) ITTOIA will provide:

If income arising to an individual who is UK resident arises in the overseas part of a split year, it is to be treated for the purposes of this section as arising to a non-UK resident.

6.25.5 *Chargeable event gains*

A new s.465(1A) ITTOIA will provide:

But if the tax year is a split year as respects the individual, the individual is not liable for tax under this Chapter in respect of gains arising in the overseas part of that year (subject to section 465B).

6.25.6 *Miscellaneous income*

A new s.577(2A) ITTOIA will provide:

If income arising to an individual who is UK resident arises in the overseas part of a split year, it is to be treated for the purposes of this section as arising to a non-UK resident.

6.25.7 *Relevant foreign income charged on remittance basis*

A new s.832(2) ITTOIA will provide:

For any tax year for which the individual is UK resident, income tax is charged on the full amount of so much (if any) of the relevant foreign income as is remitted to the UK—

- (a) in that year, or
- (b) in the UK part of that year, if that year is a split year as respects the individual.

6.25.8 *Capital gains on arising basis*

Section 2 TCGA will provide:

(1B) If the year is a split year as respects an individual, the individual is not chargeable to capital gains tax in respect of any chargeable gains accruing to the individual in the overseas part of that year.

(1C) But subsection (1B)—

- (a) does not apply to chargeable gains in respect of which the individual would have been chargeable to capital gains tax under section 10, had the individual been not resident in the UK for the year, and
- (b) is without prejudice to section 10A.

6.25.9 *Capital gains on remittance basis*

A new s.12(2A) TCGA will provide:

If that tax year is a split year as respects the individual, the chargeable gains are treated as accruing to the individual in the part of the year (the overseas part or the UK part) in which the foreign chargeable gains are so remitted..

6.25.10 *Section 13 gains*

A new s.13(3A) TCGA will provide:

Subsection (2) does not apply in the case of a participator who is an individual if—

- (a) the tax year in which the chargeable gain accrues to the company is a split year as respects the participator, and
- (b) the chargeable gain accrues to the company in the overseas part of that year.

6.25.11 Allowable losses

A new s.16(3A) TCGA will provide:

If the person is an individual and the year is a split year as respects that individual, subsection (3) also applies to a loss accruing to the individual in the overseas part of that year.

6.25.12 Section 86 gains

Section 86(4) TCGA will be amended to read:

Where this section applies—

- (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in the year or if, as respects the settlor, the year is a split year, in the UK part of that year, and
- (b) those gains shall be treated as forming the highest part of the amount on which he is chargeable to capital gains tax for the year.

6.25.13 Section 87 gains

A new s.87(7) TCGA will read:

If the relevant tax year is a split year as respects a beneficiary of the settlement--

- (a) the amount on which the beneficiary is chargeable to capital gains tax by virtue of this section for that year (in respect of the settlement) is a portion of the amount on which the beneficiary would have been so chargeable if the relevant tax year had not been a split year, and
- (b) the portion is the portion attributable to the UK part of the relevant tax year calculated on a time apportionment basis.

6.26 Year of acquisition of UK domicile

Tax Bulletin 29 provides:

In line with current practice, but depending on the circumstances of any particular case, we may only change the basis of assessment from 6

April following the date of change in domicile. Where it is difficult to pinpoint a precise date of change in domicile (and again depending on the circumstances of any particular case), the changes to the basis of assessment may take effect from the 6 April following the date our enquiries are concluded.

This coyly suggests a practice where a UK resident individual concedes the acquisition of a UK domicile of choice, in return for which HMRC will regard the domicile as commencing the following 6 April (and so avoiding all problems of a split domicile year). The strict rule is probably that the remittance basis is not available to a person who acquires a UK domicile in the year: see 46.2 (CGT remittance basis).

CHAPTER SEVEN

EXIT TAXES

7.1 Exit taxes – Introduction

This chapter considers exit taxes, that is, taxes imposed on emigration from the UK by individuals or trustees. They are as follows:

- (1) Clawbacks of holdover and EIS relief on emigration of individual.
- (2) Charges on emigration of a trust.
- (3) Charges on emigration of persons carrying on a trade.

I hope in a future edition to discuss restrictions on CGT share exchange relief which are akin to an exit charge; see *Coll v HMRC* [2010] STC 1849. Exit taxes on companies are not considered.

I use the term “**emigration**” to refer to a person becoming domestic law non-UK resident, and “**treaty-emigration**” to refer to a person becoming treaty-resident in a foreign state (ie resident for the purposes of a DTA.)

The emigration of a trust may also lose the benefit of certain transitional reliefs for the purpose of s.86 TCGA. See 47.5 (Pre-1998 protected trusts); 47.7 (Pre-1991 protected trusts).

7.2 Clawback of hold-over relief on emigration of individual

Section 168(1) TCGA provides a clawback of hold-over relief on emigration of individuals.

If—

- (a) relief is given under section 165 in respect of a disposal to an individual or under section 260 in respect of a disposal to an individual (“the relevant disposal”); and
- (b) at a time when he has not disposed of the asset in question, the transferee becomes neither resident nor ordinarily resident in the UK,

then, subject to the following provisions of this section, a chargeable gain shall be deemed to have accrued to the transferee immediately before that time, and its amount shall be equal to the held-over gain (within the meaning of section 165 or 260) on the relevant disposal.

There is no charge if the individual becomes treaty non-resident but remains UK resident. This gives some scope for tax planning. But given the EU issues discussed below, and the CGT temporary non-residence rules, this may not matter much.

7.2.1 *Disposal prior to emigration*

The clawback charge does not apply if the individual disposes of the asset before emigration. Section 168(2) TCGA deals with part disposals:

For the purposes of subsection (1) above the transferee shall be taken to have disposed of an asset before the time there referred to only if he has made a disposal or disposals in connection with which the whole of the held-over gain on the relevant disposal was represented by reductions made in accordance with section 165(4)(b) or 260(3)(b) and where he has made a disposal in connection with which part of that gain was so represented, the amount of the chargeable gain deemed by virtue of this section to accrue to him shall be correspondingly reduced.

Section 168(3) TCGA provides that inter-spouse disposals are disregarded:

The disposals by the transferee that are to be taken into account under subsection (2) above shall not include any disposal to which section 58 applies; but where any such disposal is made by the transferee, disposals by his spouse or civil partner shall be taken into account under subsection (2) above as if they had been made by him.

This is obviously right.

7.2.2 *Time limit*

Section 168(4) TCGA contains a time limit:

Subsection (1) above shall not apply by reason of a person becoming

neither resident nor ordinarily resident more than 6 years after the end of the year of assessment in which the relevant disposal was made.

7.2.3 *Relief for short term postings abroad*

Section 168(5) TCGA contains a relief for short term postings abroad:

Subsection (1) above shall not apply in relation to a disposal made to an individual if—

- (a) the reason for his becoming neither resident nor ordinarily resident in the UK is that he works in an employment or office all the duties of which are performed outside the UK, and
 - (b) he again becomes resident or ordinarily resident in the UK within the period of 3 years from the time when he ceases to be so, without having meanwhile disposed of the asset in question;
- and accordingly no assessment shall be made by virtue of subsection (1) above before the end of that period in any case where the condition in para (a) above is, and the condition in para (b) above may be, satisfied.

Section 168(6) TCGA deals with part disposals and inter-spouse disposals by the short term non-resident. The wording is based on s.168(2)(3) but its effect is different:

For the purposes of subsection (5) above a person shall be taken to have disposed of an asset if he has made a disposal in connection with which the whole or part of the held-over gain on the relevant disposal would, had he been resident in the UK, have been represented by a reduction made in accordance with section 165(4)(b) or 260(3)(b) ...

This is a strict rule, since even a part disposal loses the benefit of the relief for the entire asset. The subsection continues:

and subsection (3) above shall have effect for the purposes of this subsection as it has effect for the purposes of subsection (2) above.

Thus there is no exit charge on an asset if T goes non-resident, and gives the asset to the spouse, provided that T becomes UK resident again within 3 years and the spouse does not dispose of the asset during that period. It is irrelevant whether the spouse becomes UK resident.

7.2.4 *Collection of clawback charge from donor or trustee*

The tax may be collected from:

- (1) the donor who gave the asset to the individual; or
- (2) the trustee who transferred the asset to the individual.

This is not usually important for an individual donor because they will generally be prepared to take a view about the future actions of their donee. It is important for trustees who transfer assets to beneficiaries and claim hold-over relief to avoid a charge under s.71 TCGA.

Section 168(7) TCGA provides:

Where an amount of tax assessed on a transferee by virtue of subsection (1) above is not paid within the period of 12 months beginning with the date when the tax becomes payable then, subject to subsection (8) below, the transferor may be assessed and charged (in the name of the transferee) to all or any part of that tax.

Section 168(8) TCGA sets out a time limit:

No assessment shall be made under subsection (7) above more than 6 years after the end of the year of assessment in which the relevant disposal was made.

Thus a donor who makes a claim for hold-over relief is at risk of a clawback if the donee emigrates within (approximately) 4 years of the gift. Suppose:

- (1) In 2001/02 D makes a gift to E.
- (2) E emigrates in 2005/06.

The exit charge is payable on 31 January 2007.

E cannot be assessed until 12 months later, 31 January 2008. That is just within “6 years after the end of the year of assessment in which the relevant disposal was made”. But if E had made the gift in 2000/01 it would have been too late for HMRC to collect the tax from E.

Section 168(9) TCGA provides an indemnity (for what it may be worth):

Where the transferor pays an amount of tax in pursuance of subsection (7) above, he shall be entitled to recover a corresponding sum from the transferee.

7.2.5 *Prevention of double charge*

Section 168(10) TCGA provides:

Gains on disposals made after a chargeable gain has under this section been deemed to accrue by reference to a held-over gain shall be computed without any reduction under section 165(4)(b) or 260(3)(b) in respect of that held-over gain.

This prevents double UK taxation (if the individual later makes a disposal within the charge to CGT, eg if they return to the UK). It does not prevent double taxation if the individual pays foreign tax on the same gain. The EU have noted the issue and recommend member states to act, but the UK has not done anything and show no sign of taking any notice..

7.3 **Clawback of EIS relief**

There is a similar clawback of EIS relief if (in short) an individual becomes non-resident (and non-ordinarily resident) within three years of acquiring EIS shares: para 3 Sch 5B TCGA.

7.4 **Charge on emigration of trust**

Section 80 TCGA provides an exit charge for trusts:

- (1) This section applies if the trustees of a settlement become at any time (“the relevant time”) neither resident nor ordinarily resident in the UK.
- (2) The trustees shall be deemed for all purposes of this Act—
 - (a) to have disposed of the defined assets immediately before the relevant time, and
 - (b) immediately to have reacquired them, at their market value at that time.

Unlike the rule for individuals, this applies to all gains, not just held-over gains.

7.4.1 *Defined assets*

“Defined assets” is a label which brings in a number of rules which limit

the scope of the charge. Section 80(3) TCGA provides:

Subject to subsections (4) and (5) below, the defined assets are all assets constituting settled property of the settlement immediately before the relevant time.

7.4.2 *Assets of UK trade*

Section 80(4) TCGA brings in an exception for UK trades:

If immediately after the relevant time—

- (a) the trustees carry on a trade in the UK through a branch or agency, and
 - (b) any assets are situated in the UK and either used in or for the purposes of the trade or used or held for the purposes of the branch or agency,
- the assets falling within para (b) above shall not be defined assets.

No charge is needed as such assets remain within the charge to CGT.

7.4.3 *DTA exemption*

Section 80(5) TCGA brings in an exception for assets protected by DTAs:

Assets shall not be defined assets if—

- (a) they are of a description specified in any double taxation relief arrangements, and
- (b) were the trustees to dispose of them immediately before the relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

No charge is needed as such assets never were within the charge to CGT.

7.4.4 *Restriction of roll-over relief*

Section 80 TCGA provides:

(6) Section 152 shall not apply where the trustees—

- (a) have disposed of the old assets, or their interest in them, before the

- relevant time, and
- (b) acquire the new assets, or their interest in them, after that time, unless the new assets are excepted from this subsection by subsection (7) below.
 - (7) If at the time when the new assets are acquired—
 - (a) the trustees carry on a trade in the UK through a branch or agency, and
 - (b) any new assets are situated in the UK and either used in or for the purposes of the trade or used or held for the purposes of the branch or agency,
 the assets falling within para (b) above shall be excepted from subsection (6) above.
 - (8) In this section “the old assets” and “the new assets” have the same meanings as in section 152.

The CG Manual explains:

38357. Roll-over relief [February 2006]

Section 80(6) prevents roll-over relief under TCGA 1992, s.152 from applying so as to avoid the new exit charge where trustees dispose of assets before, then acquire new assets after becoming non-resident where the new assets are outside the UK tax charge.

7.4.5 *Accidental emigration on death of trustee*

Section 81 TCGA provides:

81 Death of trustee: special rules

- (1) Subsection (2) below applies where—
 - (a) section 80 applies as a result of the death of a trustee of the settlement, and
 - (b) within the period of 6 months beginning with the death, the trustees of the settlement become resident and ordinarily resident in the UK.

This could apply if for instance a trust has a UK and a foreign trustee, and the UK trustee dies.

- (2) That section shall apply as if the defined assets were restricted to such assets (if any) as—
 - (a) would be defined assets apart from this section, and
 - (b) fall within subsection (3) or (4) below.

That is, there is no charge apart from the exceptional cases of (3) and (4). Section 81(3) TCGA provides:

Assets fall within this subsection if they were disposed of by the trustees in the period which—

- (a) begins with the death, and
- (b) ends when the trustees become resident and ordinarily resident in the UK.

Since the trust will be UK resident in the year and subject to CGT on its gains, it is difficult to see the point of this. Section 81(4) TCGA provides:

Assets fall within this subsection if—

- (a) they are of a description specified in any double taxation relief arrangements,
- (b) they constitute settled property of the settlement at the time immediately after the trustees become resident and ordinarily resident in the UK, and
- (c) were the trustees to dispose of them at that time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

7.4.6 *Accidental immigration on death of trustee*

Section 81 goes on to give a relief where there has been an accidental immigration to the UK followed by emigration:

(5) Subsection (6) below applies where—

- (a) at any time the trustees of a settlement become resident and ordinarily resident in the UK as a result of the death of a trustee of the settlement, and
 - (b) section 80 applies as regards the trustees of the settlement in circumstances where the relevant time (within the meaning of that section) falls within the period of 6 months beginning with the death.
- (6) That section shall apply as if the defined assets were restricted to such assets (if any) as—
- (a) would be defined assets apart from this section, and
 - (b) fall within subsection (7) below.

There is only one exceptional case:

- (7) Assets fall within this subsection if—
 - (a) the trustees acquired them in the period beginning with the death and ending with the relevant time, and
 - (b) they acquired them as a result of a disposal in respect of which relief is given under section 165 or in relation to which section 260(3) applies.

This is only a limited relief, since it does not avoid the CGT charge on actual disposals of assets by the trustees in a year when accidentally UK resident.

7.5 Liability of trustees for exit charge

There are special rules. The usual rule for liability of trustees for CGT is in s.65(1) TCGA:

Subject to subsection (3) below, capital gains tax chargeable in respect of chargeable gains accruing to the trustees of a settlement or capital gains tax due from the personal representatives of a deceased person may be assessed and charged on and in the name of any one or more of the relevant trustees¹

Section 65(3) has an exemption for trustees who retired before an emigration without knowing of a proposed emigration:

Where section 80 applies as regards the trustees of a settlement (“the migrating trustees”), nothing in subsection (1) above shall enable any person—

- (a) who ceased to be a trustee of the settlement before the end of the relevant period,² and
- (b) who shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might become neither resident nor

1 Defined in s.65(4): “In this section ...

“the relevant trustees”, in relation to any chargeable gains, means the trustees in the year of assessment in which the chargeable gains accrue and any subsequent trustees of the settlement...”

2 Defined by reference in s.65(4): In this section—

“the relevant period” has the same meaning as in section 82;...”

ordinarily resident in the UK,
to be assessed and charged to any capital gains tax which is payable by
the migrating trustees by virtue of section 80(2).

Section 82 TCGA provides:

- (1) This section applies where—
 - (a) section 80 applies as regards the trustees of a settlement (“the migrating trustees”), and
 - (b) any capital gains tax which is payable by the migrating trustees by virtue of section 80(2) is not paid within 6 months from the time when it became payable.
- (2) The Board may, at any time before the end of the period of 3 years beginning with the time when the amount of the tax is finally determined, serve on any person to whom subsection (3) below applies a notice—
 - (a) stating particulars of the tax payable, the amount remaining unpaid and the date when it became payable;
 - (b) stating particulars of any interest payable on the tax, any amount remaining unpaid and the date when it became payable;
 - (c) requiring that person to pay the amount of the unpaid tax, or the aggregate amount of the unpaid tax and the unpaid interest, within 30 days of the service of the notice.
- (3) This subsection applies to any person who, at any time within the relevant period,³ was a trustee of the settlement, except that it does not apply to any such person if—
 - (a) he ceased to be a trustee of the settlement before the end of the relevant period, and
 - (b) he shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might become neither resident nor ordinarily resident in the UK.
- (4) Any amount which a person is required to pay by a notice under this section may be recovered from him as if it were tax due and duly demanded of him; and he may recover any such amount paid by him from the migrating trustees.
- (5) A payment in pursuance of a notice under this section shall not be allowed as a deduction in computing any income, profits or losses for any tax purposes.

³ Defined in s.82(6) as (in effect) one year.

SP 5/82 sets out HMRC practice:

5 Payment can only be sought from former trustees where the Revenue is unable to obtain payment from current trustees. In the first instance, payment will generally be sought from those persons who resigned as trustees immediately before the trust migrated and then from earlier trustees. Each case will, however, need to be considered in the light of the relevant facts.

SP 5/82 correctly states:

6 An amount recovered from present trustees by a former trustee in respect of capital gains tax under TCGA 1992 s 82 is not regarded as a capital payment under s 97. Further, such amounts do not fall within the provisions of [what is now s.720, 727 or 731 ITA] nor are there any inheritance tax implications.

7.5.1 *The relevant period*

This term is defined in s.82(6):

For the purposes of this section—

- (a) [this is a spent transitional rule for an emigration in 1991-2];
- (b) in any other case, the relevant period is the period of 12 months ending with the relevant time.

7.5.2 *Commentary*

In short, a trustee at the time of the emigration is liable, and a trustee who retired up to a year before is liable if aware of the proposal to migrate the trust. This may help HMRC (because they can go back to trustees in an earlier year) and it may help the trustees (if they can say that they were not aware of a migration). But it is not likely to make any difference either way. There is no good reason for special rules and s.82 and s.65(3) TCGA should be repealed, resulting in a small but worthwhile tax simplification.

7.6 Charge on treaty-emigration of trust

Section 83 TCGA provides:

(1) This section applies if the trustees of a settlement, while continuing to be resident and ordinarily resident in the UK, become at any time (“the time concerned”) trustees who fall to be regarded for the purposes of any double taxation relief arrangements—

- (a) as resident in a territory outside the UK, and
- (b) as not liable in the UK to tax on gains accruing on disposals of assets (“relevant assets”) which constitute settled property of the settlement and fall within descriptions specified in the arrangements.

(2) The trustees shall be deemed for all purposes of this Act—

- (a) to have disposed of their relevant assets immediately before the time concerned, and
- (b) immediately to have reacquired them, at their market value at that time.

This charge does not contain any of the exceptions applicable to the s.80 exit charge and has no special rules for trustee liability.

7.6.1 *Restriction of roll-over relief*

Section 84 TCGA provides:

(1) Section 152 shall not apply where—

- (a) the new assets are, or the interest in them is, acquired by the trustees of a settlement,
- (b) at the time of the acquisition the trustees are resident and ordinarily resident in the UK and fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,
- (c) the assets are of a description specified in the arrangements, and
- (d) were the trustees to dispose of the assets immediately after the acquisition, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

(2) In this section “the new assets” has the same meaning as in section 152.

This is the equivalent of s.80(6): see 7.4.4 (Restriction of roll-over relief).

7.7 Disclosure of emigration or treaty-emigration of trust

Para 5 Sch 5A TCGA provides:

- (1) This paragraph applies if—
 - (a) the trustees of a settlement become at any time (the relevant time) on or after the commencement day neither resident nor ordinarily resident in the UK, or
 - (b) the trustees of a settlement, while continuing to be resident and ordinarily resident in the UK, become at any time (the relevant time) on or after the commencement day trustees who fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.
- (2) Any person who was a trustee of the settlement immediately before the relevant time shall, before the expiry of the period of twelve months beginning with the relevant day, deliver to the Board a return specifying—
 - (a) the day on which the settlement was created,
 - (b) the name and address of each person who is a settlor in relation to the settlement immediately before the delivery of the return, and
 - (c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.
- (3) For the purposes of sub-paragraph (2) above the relevant day is the day when the relevant time falls.

There are minor exceptions in para 6 which need not be set out here.

7.8 Emigration of individual trader⁴

Section 17 ITTOIA provides:

- (1) This section applies if—
 - (a) an individual carries on a trade wholly or partly outside the UK otherwise than in partnership, and
 - (b) the individual becomes or ceases to be UK resident.
- (2) The individual is treated for income tax purposes—
 - (a) as permanently ceasing to carry on the trade at the time of the

⁴ References in this paragraph to a trade include a profession or vocation, since there is no difference between them.

- change of residence, and
- (b) so far as the individual continues to carry on the trade, as starting to carry on a new trade immediately afterwards....

The BI Manual provides:

70610. Changes in residence status [July 2007]

[The Manual summarises s.17 ITTOIA and continues:]

As there is no provision in the Taxes Acts for splitting a tax year in relation to residence, the deemed cessation and recommencement should strictly take place at the start of the tax year in which the taxpayer became resident in the UK or the end of the tax year in which the taxpayer ceased to be resident.

This is not correct, because the statutory provisions refer to “the time of the change of residence” which suggests that the deemed cessation and commencement take place at that moment, not at the end of the tax year. However the point does not arise in practice because the Manual continues:

But under ESC/A11, the business is treated as ceasing and recommencing on the actual date of arrival or departure if the taxpayer so chooses and the conditions of the ESC are met.

This practice is not referred to in ESC A11, but it is consistent with the approval of ESC A11. (It is considered that this is the law, rather than concession, but in practice that will not matter.)

7.8.1 *Emigration of partner in trading partnership*

For the equivalent rules for partnerships, see s.852(6) ITTOIA:

If—

- (a) the firm carries on the actual trade wholly or partly outside the UK, and
 - (b) the partner becomes or ceases to be UK resident,
- the partner is treated as permanently ceasing to carry on one notional trade when the change of residence occurs and starting to carry on another immediately afterwards.

7.9 EU restriction on exit taxes

7.9.1 Exit charge on emigration of individual to EU state

An EC communication on exit taxes⁵ provides:

2. EXIT TAXES: LEGAL FRAMEWORK

2.1. The decision of the ECJ in *de Lasteyrie*⁶ and its implications for individuals

On 11 March 2004, the ECJ gave an important interpretation of the freedom of establishment in the context of French legislation taxing unrealised increases in value of securities where individual taxpayers move their tax residence outside France. When Mr. de Lasteyrie du Saillant in 1998 moved from France to Belgium, he was subject to immediate taxation on the unrealised increase in value of the shares which he held in a French company.

The ECJ held that the French provision in question was likely to restrict the exercise of the freedom of establishment, having at the very least a dissuasive effect on taxpayers wishing to establish themselves in another MS, because they were subjected in the exit country, by the mere fact of transferring their tax residence outside France, to tax on a form of income that had not yet been realised, and thus to disadvantageous treatment by comparison with a person maintaining his residence in France.

Although the ruling in *de Lasteyrie* relates to the facts and circumstances of the case at issue, the ECJ's interpretation of EC Law implies conclusions as regards exit taxes in general.

Taxing residents on a realisation basis and departing residents on an accruals basis is a difference in treatment which constitutes an obstacle to free movement. Where a MS decides to assert a right to tax gains accrued during a taxpayer's residence within its territory, it cannot take measures which present a restriction to free movement.

This rules out the possibility of immediate collection of the tax due on the unrealised gains when taxpayers move their tax residence to another MS.

5 "Exit taxation and the need for co-ordination of Member States' tax policies" 19.12.2006 COM(2006) 825 final, accessible [ec.europa.eu/taxation_customs/resources/documents/taxation/COM\(2006\)825_en.pdf](http://ec.europa.eu/taxation_customs/resources/documents/taxation/COM(2006)825_en.pdf)

6 *de Lasteyrie du Saillant v Ministère de l'Économie, des Finances et de l'Industrie*, [2005] STC 1722.

This view has since been reaffirmed in *National Grid Indus BV v Inspecteur van de Belastingdienst Rijnmond / kantoor Rotterdam*.⁷

The communication then considers permitted forms of charges on departing residents (not applicable in the UK)⁸ and concludes:

Most MSs which had exit tax rules on individual shareholders similar to those at issue in *de Lasteyrie* have since abolished or amended them in line with the ruling. This has enabled the Commission to suspend infringement proceedings against a number of MSs on this particular aspect. The Commission will, however, continue to monitor MSs' rules in this area with a view to ensuring their EC law compatibility.

The UK has three exit charges on individuals, the hold-over clawback, the EIS clawback, and the charge on migrating traders. So far they seem to have escaped direct EU attention. If the migration is to a member state, these can hardly be described as compliant with EU freedom of establishment⁹ and freedom to reside.¹⁰

7 [2012] STC 114.

8 "The ECJ ruled in *de Lasteyrie* and in *N [N v Inspecteur van de Belastingdienst Oost/kantoor Almelo]*, [2008] STC 436] that the possible suspension of payment made subject, for example, to conditions that guarantees must be provided, constitutes a restrictive effect in that the taxpayer is deprived of enjoyment of the assets given as a guarantee. Similarly, it is clear from *de Lasteyrie* that suspension of payment cannot be made subject to the condition of designating a representative in the MS of origin. In general, any means of preserving the tax claim must be strictly proportional to that aim and must not entail disproportionate costs for the taxpayer.

As the ECJ confirmed in *N*, when a resident of a MS transfers his/her residence to another MS, the MS from which he/she departs is not prevented by EU law from assessing the amount of income on which it wishes to preserve its tax jurisdiction, provided this does not give rise to an immediate charge to tax and that there are no further conditions attached to the deferral. Such a practice is in line with the principle of fiscal territoriality, connected with a temporal component, namely residence within the territory during the period in which the taxable profit arises. A requirement, that the taxpayer submits a tax declaration at the time of the transfer of residence, necessary for the purpose of assessing the income, can be considered proportionate having regard to the legitimate objective of allocating the taxing powers, in particular so as to eliminate double taxation, between the MSs."

9 See 56.5 (Freedom of establishment).

10 Art. 21 TFEU provides:

"Every citizen of the Union shall have the right to move and reside freely within the territory of the Member States, subject to the limitations and conditions laid down

7.9.2 *Exit charge on emigration of trust to EU state*

What about the exit charge for trusts? The EC communication does not discuss trusts, but it does discuss companies:

3.1. **Implications of *de Lasteyrie* for companies**

The Commission is of the opinion that the interpretation of the freedom of establishment given by the ECJ in *de Lasteyrie* in respect of exit tax rules on individuals also has direct implications for MSs' exit tax rules on companies.

This is obviously correct since freedom of establishment applies to companies as well as individuals.¹¹ The same will apply to a trust either on the grounds that it is an “undertaking” within the meaning of the freedom of establishment rule¹² or on the grounds of the freedom of movement or of establishment of the trustee in its personal capacity.

7.9.3 *Exit charge on emigration to EEA state*¹³

The EC communication continues:

4.1. **Freedoms applicable to EEA-states**

The European Economic Area (EEA) Agreement provides for the same four basic freedoms as the EC Treaty (goods, persons, services and capital). It also includes horizontal provisions relevant to the four freedoms. Secondary Community legislation in the area of taxation, however, has not been incorporated in the EEA Agreement. The Mutual Assistance Directive and the Recovery Directive therefore do not apply to these states

4.2. **Emigration of individuals/transfer of seat of companies – free movement of workers/freedom of establishment**

Taxes levied in case of the emigration of individuals or the transfer of seat of companies would primarily appear to involve the free movement of workers (Article 39 EC/28 EEA Agreement) and the freedom of

in the Treaties and by the measures adopted to give them effect.”

¹¹ See 56.5 (Freedom of establishment).

¹² See 56.13 (Section 86 TCGA).

¹³ The states within the EEA (European Economic Area) are Norway, Iceland and Liechtenstein.

establishment (Article 43 EC/31 EEA Agreement) respectively. The exit taxes at issue in *de Lasteyrie* and *N* which applied to individuals with substantial shareholdings were found to contravene the freedom of establishment. As the same basic freedoms apply to EEA states, the rulings in *de Lasteyrie* and *N* are of direct relevance to them. The question is whether there are significant differences in situation which could justify such restrictions in the case of EEA states. The Commission is of the opinion that an immediate collection of tax may be justified in certain circumstances by overriding reasons in the general interest, in particular the need to ensure the effectiveness of fiscal supervision and to prevent tax evasion.

EEA states are not obliged to implement secondary Community legislation in the area of taxation, such as the Mutual Assistance Directive and the Recovery Directive. As a consequence, MSs do not necessarily have the same guarantees that deferred tax claims can be discharged at a later stage as they would have within the Community. In many cases, MSs have, however, concluded bilateral or multilateral tax conventions with EEA states which include information exchange obligations that provide for an equivalent level of mutual assistance. The Commission believes that in situations where a lack of administrative cooperation prevents MSs from safeguarding their tax claims they should be entitled to take appropriate measures at the moment of emigration or transfer.

Council Directive 2010/24/EU¹⁴ applies to MSs but not to EEA states. However, the Norway/UK and the Iceland/UK DTAs have an information exchange article which should suffice and so will the 2012 Liechtenstein/UK DTA when it enters into force. In the of an emigration to an EEA state, it would be necessary to review the treaties between the UK and that state in order to ascertain the position.

7.9.4 *Exit charge on emigration to other countries*

The EC communication continues:

5. EXIT TAXES IN RESPECT OF THIRD COUNTRIES

Of the four basic freedoms, only the free movement of capital and

14 16 March 2010, concerning mutual assistance for the recovery of claims relating to taxes, duties and other measures.

payments applies to third countries.

In respect of the emigration or transfer of seat to other third countries as such, the provisions on the free movement of persons do not apply and MSs remain free to assess and collect their taxes at the moment of departure. However, the emigration of an individual or the transfer of seat of a company may involve transactions which are covered by the provisions on the free movement of capital. The transfer of assets to a PE in a third country may also fall to be examined from the perspective of the free movement of capital.

Since the result of the application of the different freedoms should be the same, it would appear that an immediate collection of tax at the moment of transfer of such assets constitutes a restriction on the free movement of capital. However, as noted above, the Commission believes that a lack of administrative co-operation may justify a restriction in these circumstances. The Commission would encourage MSs, where appropriate, to enhance administrative co-operation with their non-EU partners, as this is the best means of ensuring tax compliance and preventing tax evasion.¹⁵

The European Parliament supports this view.¹⁶

In the case of an emigration to a third country (not a MS or EEA state), it would be necessary to review the treaties between the UK and that state in order to ascertain the position.

7.9.5 *EU proceeds against UK*

The EC say:

The European Commission has formally requested the UK to amend its legislation providing for exit taxes on companies.

The UK legislation at stake results in immediate taxation of unrealised capital gains in respect of certain assets when the seat or place of effective management of a company is transferred to another EU/EEA State. However, a similar transfer within the UK would not generate any such immediate taxation and the relevant capital gains would only be taxed once they have been realised.

The Commission considers that the UK has failed to fulfil its obligations

¹⁵ In EU terminology, “tax evasion” includes tax avoidance.

¹⁶ European Parliament resolution of 24 October 2007 on the contribution of taxation and customs policies to the Lisbon Strategy.

under EU rules by maintaining these restrictive provisions. Exit taxes may breach the freedom of establishment as they make it more expensive to transfer a company seat or place of effective management to another Member State than to another location in the UK.

The Commission's request takes the form of a reasoned opinion (second step of EU infringement proceedings). In the absence of a satisfactory response within two months, the Commission may refer the UK to the Court of Justice of the European Union.¹⁷

7.10 Council Resolution on coordinating exit taxation

The Council of the European Union (the Council of Ministers) adopted a resolution on 2 December 2008 which invites Member States to adopt the following guiding principles:

A. "Transfer of economic activities" means any operation whereby a taxpayer subject to corporation tax or a natural person engaged in a business:

1) ceases to be subject to corporate or personal income tax in a Member State (the exit State) while at the same time becoming subject to corporate or personal income tax in another Member State (the host State); or

2) transfers a combination of assets and liabilities from a head office or a permanent establishment in the exit State to a permanent establishment or a head office in the host State.

B. When, in connection with a transfer of economic activities, the exit State reserves the option to exercise its taxing rights on the reserves made (profits realised but not yet taken into account for tax purposes) and to take back, in full or in part, the provisions made (expenditure not yet incurred but already taken into account for tax purposes), the host State may provide for the creation of reserves or provisions of identical or different amounts, in accordance with the rules governing the tax base in that State, and allow deduction from taxable results for the year in which they were established.

C. When, in connection with a transfer of economic activities, the exit State reserves the option to exercise its taxing rights on the unrealised gains corresponding to the assets held by the taxpayer, calculated as the difference between the market value of these assets on the transfer date and their book value, the host State takes the market value on the transfer

¹⁷ IP/12/285, 22/03/2012.

date when calculating the subsequent added value in the event of disposal.

D. In case of disagreement between the host State and the exit State regarding the market value of the assets on the transfer date, the two States settle their dispute using the appropriate procedure.

E. The host State can require the taxpayer engaged in a transfer of economic activities to provide evidence that the exit State has exercised or will exercise its rights under the conditions set out above, as well as evidence of the market value applied by the exit State.

F. The provisions laid down at Community level in relation to Mutual Assistance provide the framework for the host State to assist the exit State, in particular for the purposes of determining the disposal date.

This does not seem to have much impact yet, at least in the UK, but the law is not stable. In the area of company migration (outside the scope of this work) the CIOT have been lobbying the EU for action.¹⁸

18 Letter dated 20 March 2007 accessible www.tax.org.uk (search for *Heydt*).

CHAPTER EIGHT

TEMPORARY NON-RESIDENCE

8.1 Temporary non-residence – Introduction

This chapter discusses the temporary non-residence rules (“**TNR rules**”). The rules were introduced in 1998 and have been amended several times, resulting in a fine tangle.

8.1.1 *Terminology*

In this book I use the term “**treaty-residence**” to mean residence for the purposes of a DTA, and “**domestic-law residence**” means residence for UK tax purposes (it is essential in this chapter to distinguish the two).

Where a person is resident in the UK for UK law purposes, I therefore describe them as “**domestic-law UK resident**” and similarly non residents are described as “**domestic-law non-UK resident**”.

Where a person is treaty-resident in the UK I refer to them as “**treaty UK resident**”. Where a person is treaty-resident in a state outside the UK, I adopt the statutory terminology “**treaty non-resident**” though it might be clearer to say “treaty non-UK resident”.

“**CGT treaty relief**” is CGT relief provided by a DTA.

These are somewhat clumsy terms but it is difficult to think of better.

8.2 Purpose of the temporary non-residence rules

It is helpful to outline the two sets of problems which the TNR rules are intended to address.

8.2.1 *Income and gains accruing to temporary non-resident*

In the absence of the TNR rules, income and gains of temporary non-

residents are not in principle subject to UK tax.

So a possible method of CGT planning for a UK resident would be as follows. An individual could become domestic-law non-UK resident and dispose of assets during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of domestic-law non-residence offered the opportunity of CGT-free disposals.

A variant of this planning is: an individual could remain domestic-law UK resident but become treaty non-resident (ie treaty-resident in a state with a DTA conferring CGT relief); the individual disposes of assets while treaty non-resident; following the disposal the individual could cease to be treaty non-resident. Thus relatively brief periods of treaty non-residence offered some opportunity of CGT-free disposals (so far as CGT treaty relief could be available).

Similarly for:

- (1) OIGs accruing to temporary non-residents.
- (2) Pension schemes withdrawals by temporary non-residents. (This topic is not discussed here; see : s.576A and s.579CA ITEPA).

All this planning is still possible, provided that the individual is not temporarily non-resident: the period abroad must be 5 years.

Other types of income accruing to temporary non-residents are still exempt but the categories of income caught by the TNR rules are to be increased from 2013/14.

8.2.2 *Remittance by temporary non-resident*

Similarly, in the absence of the TNR rules, a possible method of remitting RFI or gains tax free would be as follows. Suppose an individual had RFI/gains taxable on remittance (in this chapter called “**pre-departure income/gains**”).

The individual could become domestic-law non-UK resident and remit the pre-departure income/gains during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of domestic-law non-residence offered the opportunity of tax-free remittances. Section s.832A ITTOIA is intended to restrict this for RFI. The drafting of s.832A was based on the existing s.10A which was designed for a different situation, resulting in more anomalies.

The reader may wonder if a variant of this planning was possible: suppose an individual remained domestic-law UK resident but became

treaty-resident in a state with a DTA conferring the necessary relief (ie “treaty non-resident”); the individual remitted the pre-departure income/gains while treaty non-resident. However treaties do not provide relief in this situation so planning of this kind was not possible. Nevertheless s.832A does apply in this case. The drafter may perhaps have thought that this planning was possible, or they may have introduced the rule unintentionally by copying across in s.832A the s.10A(2) rules which were designed for a different situation.

Thus there are two distinct sets of rules, though they share a common framework:

- (1) Gains and certain types of income accruing to temporary non-residents.
- (2) Pre-departure income remitted during by temporary non-residents.

8.3 Temporary non-resident conditions

Section 10A TCGA sets out four conditions which must all be satisfied if the section is to take effect. I refer to these as the “**TNR conditions**”. Section 10A(1) TCGA provides:

This section applies in the case of any individual (“the taxpayer”) if—

- (a) he satisfies the residence requirements for any year of assessment (“the year of return”);
- (b) [i] he did not satisfy those requirements for one or more years of assessment immediately preceding the year of return but
[ii] there are years of assessment before that year for which he did satisfy those requirements;¹
- (c) there are fewer than five years of assessment falling between the year of departure and the year of return; and
- (d) four out of the seven years of assessment immediately preceding the year of departure are also years of assessment for each of which he satisfied those requirements.

Section 832A(1) ITTOIA is the same for IT.²

1 Limb [ii] appears to be otiose, given para (d); but it does not matter.

2 Section 832A(1) ITTOIA provides:

“This section applies if—

(a) an individual satisfies the residence requirements for any tax year (“the year of return”),

The legislation uses three defined terms with commonsense definitions:

- (1) Year of departure.³
- (2) Intervening year.⁴
- (3) Year of return.⁵

8.3.1 *Avoiding the TNR conditions*

The conditions allow (indeed invite) tax planning by ensuring that a person does not satisfy the residence requirements for at least a five year period. The way to do this is to remain domestic law non-resident or treaty non-resident for a five-year period.

8.3.2 *EU law compliance*

The rules give rise to an exit charge and where the charge arises on ceasing to reside in an EU member state, it is an interesting question whether the charge is EU law compliant.

8.4 “Residence requirements”

“Residence requirements” is defined in s.10A(9) TCGA:

- (b) the individual did not satisfy those requirements for one or more tax years immediately before the year of return but did satisfy those requirements for an earlier tax year,
 - (c) there are fewer than 5 tax years between—
 - (i) the last tax year before the year of return for which the individual satisfied those requirements (‘the year of departure’), and
 - (ii) the year of return, and
 - (d) the individual satisfied those requirements for at least 4 out of the 7 tax years immediately before the year of departure.”
- 3 Section 10A(8) TCGA provides:
“‘the year of departure’ means the last year of assessment before the year of return for which the taxpayer satisfied the residence requirements.”
- 4 Section 10A(8) TCGA provides:
“‘intervening year’ means any year of assessment which, in a case where the conditions in paras (a) to (d) of subsection (1) above are satisfied, falls between the year of departure and the year of return.”
That is, an intervening year is one in which the temporary non-resident conditions are satisfied.
- 5 Defined in s.10A(1)(a) TCGA as the year in which the temporary non-resident again satisfies the residence requirements.

For the purposes of this section an individual satisfies the residence requirements for a year of assessment—

- (a) if, during any part of that year of assessment, he is resident in the UK and not Treaty non-resident, or
- (b) if he is ordinarily resident in the UK during that year of assessment, unless he is Treaty non-resident during that year of assessment.

Section 832A(4) ITTOIA is the same for IT.⁶

One has to read s.10A(9) more than once, to assimilate the double negatives (s.832A(4) is better drafted), but the matter can be set out in a table:

Resident	Ord Resident	Treaty non-res.	Resident Reqs met
Y	Non relevant	N	Y
Y	Non relevant	Y	N
Not relevant	Y	N	Y
Not relevant	Y	Y	N
N	N	Not relevant	N

Section 10A(9)(b) only applies to the theoretical case of a person who is non-resident but ordinarily resident.

8.4.1 “Treaty non-resident”

“Treaty non-resident” is defined for CGT in s.288(7B) TCGA:

For the purposes of this Act, a person is Treaty non-resident at any time if, at that time, he falls to be regarded as resident in a territory outside the UK for the purposes of double taxation relief arrangements having effect at that time.

⁶ Section 832A(4) ITTOIA provides:

“For the purposes of subsection (1) an individual ‘satisfies the residence requirements’ for a tax year if—

- (a) at any time in that year, the individual is UK resident and not Treaty non-resident, or
- (b) the individual is ordinarily UK resident, and is not Treaty non-resident, for that year.”

Section 832A(5) is the same for IT.⁷

The key term is “double taxation relief arrangements” (here called “DTR arrangements”).

8.4.2 “DTR arrangements”: IT

Section 832A(6) ITTOIA defines DTR arrangements for the purposes of the IT provision:

In subsection (5) “double taxation relief arrangements” means arrangements which have effect under section 2(1) of TIOPA 2010.

8.4.3 “DTR arrangements”: CGT

Section 288(1) TCGA defines double taxation relief arrangements (“DTR arrangements”) for the purpose of CGT:

“double taxation relief arrangements”—

(a) in relation to a company⁸ means arrangements that have effect under section 2(1) of TIOPA 2010 except so far as they have effect in relation to petroleum revenue tax, and

(b) in relation to any other person means arrangements that have effect under section 2(1) of TIOPA 2010 but only so far as they have effect in relation to capital gains tax;

This is different from the IT definition because the treaty needs to contain a CGT provision. For instance, the Jersey DTA counts as “DTR arrangements” for IT but not for CGT because it applies for IT but not for CGT..

8.5 Gains and losses accruing in intervening years

Section 10A(2) TCGA sets out the consequence if the TNR conditions are met:

⁷ Section 832A(5) ITTOIA provides:

“For the purposes of subsection (4) an individual is ‘Treaty non-resident’ at any time if, at that time, he is regarded as resident in a territory outside the UK for the purposes of double taxation relief arrangements having effect at that time.”

⁸ Companies are not relevant to this chapter but one needs to read para (a) in order to follow para (b).

Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if—

- (a) all the chargeable gains and losses which (apart from this subsection) would have accrued to him in an intervening year,
 - (b) all the chargeable gains which under section 13 or 86 would be treated as having accrued to him in an intervening year if he had been resident in the UK throughout that intervening year ...⁹
- were gains or, as the case may be, losses accruing to the taxpayer in the year of return.

Para (a) works because gains accruing on disposals of assets by individuals are in principle chargeable gains even if the individual is non-resident. This needs to be supplemented by para (b) because s.13 gains and s.86 gains do not accrue to participators or settlors who are non-resident.

Section 10A(2) is a deeming provision. Gains which actually accrued in an intervening year are deemed to have accrued in the year of return. I refer to this as “**the s.10A(2) fiction**”. Applying the s.10A(2) fiction the intervening year gains are in principle taxable in the year of return.

Losses can be carried back, ie losses accruing in a later intervening year can be set against gains accruing in an earlier intervening year.

8.5.1 *Rate of tax*

The rate of tax is the rate in the year of return, even though the rate in the year the gain actually accrued may have been lower.¹⁰ Annual exemptions of intervening years are also lost.

8.6 Interaction with remittance basis

For a remittance basis taxpayer there could be a conflict between two deeming rules:

- (1) Section 12 TCGA (the CGT remittance basis) provides that gains are

⁹ S.10A(2)(c) TCGA deals with losses of non-resident companies: see 8.10.1 (Losses of non-resident company within s.13 TCGA).

¹⁰ Where the year of return was 2010/11, the 18% rate applied: Para 19 sch 1 F(No.2)A 2010 provided: “Gains treated as accruing to an individual under section 10A of TCGA 1992 (temporary non-residents) in the tax year 2010-11 are to be treated for the purposes of this Schedule as accruing before 23 June 2010.”

treated as accruing when remitted.

- (2) The s.10A(2) fiction which provides that gains are treated as accruing in the year of return.

Section 10A(9ZA) TCGA provides:

If—

- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, and
- (b) the taxpayer is not domiciled in the UK in that year, any foreign chargeable gains¹¹ falling within subsection (2)(a) which were remitted in an intervening year are treated as remitted in the year of return.

8.6.1 “Subsection (2)(a) gains”

Section 10A(9ZA) only applies to gains “falling within subsection (2)(a)” that is:

chargeable gains ... which (apart from subsection 2(a)) would have accrued to him in an intervening year,

That is, gains accruing in an intervening year and remitted in an intervening year: they are treated as accruing in the year of return, not when remitted. I refer to those as “**subsection (2)(a) gains**”. It is an interesting question how to treat gains accruing in an intervening year and not remitted until after the year of return.

I had previously considered that s.10A(9ZA) applied to pre-departure gains (foreign gains accruing while the individual was UK resident, ie gains before departure) which were remitted during an intervening year. That is the HMRC view. The CG manual provides:

11 Section 10A(9ZA) adds: “For this purpose ‘foreign chargeable gains’ has the meaning given by section 12(4).” If there were a TCGA-wide definition this would not be necessary.

Suppose (1) an individual has a UK foreign currency account (2) the individual disposes of the account when temporarily resident abroad. The account is non-UK situate for CGT purposes; the gain is a foreign chargeable gain and is charged under the temporary non resident rules when the individual returns to the UK, but qualifies for the remittance basis.

CG26284 Operation Of S10A For Non UK Domiciled Individuals Transitional Rules For Remittance Basis Users For Pre 2008/9 Gains

... If a gain arises in an intervening year and that intervening year is 2008/9 or later, where any part of that gain is remitted before the year of the return, that part of the gain chargeable for the year of return. The normal remittance basis rules would apply to any remaining part of the gain.

However on reflection that does not appear to be the case because these are not subsection 2(a) gains.

8.6.2 Treaty users

Section 10A(9B) TCGA provides:

Where this section applies in the case of any individual in circumstances in which one or more intervening years would, but for his being Treaty non-resident during some or all of that year or those years, not be an intervening year, ...

That is a case of an individual who is domestic-law UK resident but treaty non-resident.¹² It is useful to have a label for individuals in this position and I refer to them as **“treaty-users”**. The position of treaty users is different from individuals who are not domestic-law UK resident, since treaty-users are subject to CGT unless treaty relief applies.

Where no CGT treaty relief applies, there is no need for the TNR provisions, and the TNR rules should simply have been disapplied. Instead the rules are disapplied in part, in a complex manner, and the problems have not been fully thought through.

Section 10A(9B) makes four modifications to s.10A:

this section shall have effect in the taxpayer’s case—
(a) as if subsection (2)(a) above did not apply in the case of any amount treated by virtue of section 87 or 89(2) as an amount of chargeable gains accruing to the taxpayer in any such intervening year,

12 See row 2 of the table in 8.4 (“Residence requirements”).

Section 10A(9B)(a) disapplies the TNR rules for s.87 gains: such gains accrue in the year that the s.87 code provides (under the s.87 matching rules and s.87 remittance basis) and not in the year of return. This is sensible on the view (taken in this book) that such gains do not qualify for DT exemption.

Secondly:

this section shall have effect in the taxpayer's case ...

(b) as if any such intervening year were not an intervening year for the purposes of subsections (2)(b) and (c) and (6) above.

There are three amendments here. They are best considered separately. To follow the first we need to refer back to s.10A(2)(b):

Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if—

(b) all the chargeable gains which under section 13 or 86 would be treated as having accrued to him in an intervening year if he had been resident in the UK throughout that intervening year ... were gains ...accruing to the taxpayer in the year of return.

Section 10A(9B)(b) disapplies the TNR rules for s.13 gains: such gains accrue in the year that the s.13 code provides (the year of accrual, subject to the s.13 remittance basis) and not in the year of return. Similarly, the subsection disapplies the TNR rules for s.86 deemed gains: such gains accrue in the year that s.86 provides (the year of accrual) and not in the year of return. This would be sensible on the view that s.13 gains and s.86 deemed gains do not qualify for DT exemption but in some cases they do.

The other amendments made by s.10A(9B)(b) concern s.10A(2)(c) and s.10A(6): these are consequential amendments relating to losses.¹³

What about gains of an individual who is domestic-law UK resident, treaty non-resident, but which do not qualify for treaty relief (eg gains on a disposal of UK land)? They fall within the TNR rules, so the gain accrues in the year of disposal (and tax is paid) but it accrues instead in the year of return (and the former computation is revised, and tax paid or repaid accordingly).

13 See 8.10.1 (Losses of non-resident company within s.13 TCGA).

8.7 Pre-departure income

Section 832A(3) ITTOIA provides:

Relevant foreign income is within this subsection if—

- (a) it is for the year of departure or any earlier tax year,¹⁴ and
- (b) section 832 applies to it.

In the following discussion I refer to such income as “**pre-departure income**”; in other words, that means RFI which:

- (1) is taxed on a remittance basis, ie accruing to a remittance basis taxpayer while the individual was UK resident; and
- (2) which was not remitted prior to departure (so was not subject to tax before departure).

Section 832A(2) ITTOIA sets out the taxation of pre-departure income if the TNR conditions are met:

Treat any of the individual’s relevant foreign income within subsection (3) which is remitted to the UK after the year of departure and before the year of return as remitted to the UK in the year of return.

Pre-departure income which is remitted during an intervening year is treated as remitted in the year of return. This makes sense for an individual who is domestic-law non-UK resident during the intervening year. It makes no sense for someone who is domestic-law UK resident but treaty non-resident, unless one takes the view that treaty relief is available on remitted income during the intervening year, which would not seem to be the case.

Income arising after the year of departure is not caught.

The RDR manual provides a straightforward example. Omitting irrelevant detail (and rewriting slightly to enhance clarity) this provides:¹⁵

¹⁴ “Any earlier year” would include a year in which a person was non-resident, but income of such a year is not relevant foreign income: see 9.3.1 (Relevant foreign income).

¹⁵ The example including its irrelevant detail in full is as follows:

32520 Temporary Non Residents: qualifying conditions [June 2010] *Example (Travis)*

T, a long-term UK resident has been a remittance basis user since 2000-01. He leaves the UK for a work secondment in January 2009 (2008-09) and is not resident in

T is UK resident in 2007-08 and 2008-09 and a remittance basis taxpayer in both years.

T is non-resident in 2009-10 and 2010-11.

T is UK resident again in 2011-12 and the temporary non residence conditions of s.832A ITTOIA are satisfied.

He had £6,000 of unremitted relevant foreign income from 2007-08, and £8,000 of relevant foreign income from 2008-09.

In 2009-10 and 2010-11 he remits all of this relevant foreign income to the UK.

T will be taxed on £14,000 in 2011-12 (the 'year of return') in respect of his remittances of his relevant foreign income in the years of 'temporary non-residence'.

The TNR rules may work unfairly in that they bunch remitted income of up to four years into the year of return, which may put lower rate taxpayers up into the higher or additional rates of tax. However that is always a possible downside of the remittance basis and any other rule would be unduly complex.

8.7.1 *Transitional rules*

Para 83(4) Sch 7 FA 2008 provides:

Nothing in section 832A of that Act applies in relation to anything remitted to the UK in the tax year 2007-08 or any earlier tax year.

Thus pre-2008 income is caught by the new rule if remitted after 2008/09. This retrospective rule is intentional. The RDR manual provides a

2009-10 and 2010-11.

T returns to the UK in August 2011 and meets the residence requirements in s832A in 2011-12.

He has £6,000 of relevant foreign income from 2007-08, a year in which he had claimed the remittance basis under ITA07/s831. He also has £8,000 of relevant foreign income from 2008-09, a year in which he claimed the remittance basis under the new rules at ITA07/s809B.

In 2009-10 and 2010-11 he remits all of this relevant foreign income to the UK to meet certain ongoing UK financial commitments.

T will be taxed on £14,000 in 2011-12 (the 'year of return') in respect of his remittances of his relevant foreign income in the years of 'temporary non-residence'.

straightforward example of a case where transitional relief is available. Omitting irrelevant detail (and slightly rewriting for enhanced clarity) this provides:¹⁶

J is non-resident in 2007-08 but meets the temporary non-residence conditions of s.832A when he returns to the UK in 2008-09.

He has unremitted relevant foreign income from 2006-07, a year in which he was resident and had claimed the remittance basis.

In 2007-08 he remits this relevant foreign income to the UK.

This transitional provision means that J will not be taxed in 2008-09 (the “year of return”) in respect of this remittance of the RFI from 2006-07, although all of the ‘temporary non-resident’ conditions at s.832A ITTOIA are otherwise met.

8.8 Interaction with double taxation relief

8.8.1 DT exemption

Most DTAs with a capital gains article broadly adopt the OECD Model form:

Gains from the alienation of any property, other than [specified exceptions] shall be taxable only in the Contracting State of which the alienator is a resident.

Gains accruing to an individual when treaty non-resident appear in principle to qualify for this relief even if within the scope of s.10A.

¹⁶ The example including its irrelevant detail in full is as follows:

31440 Relevant foreign income and the temporary non-residents rule [July 2010]

Example (Johan)

J is not-resident in 2007-08 but meets the residence requirements in s832A when he returns to the UK in 2008-09.

He has £6,000 of relevant foreign income from 2006-07, a year in which he was resident and had claimed the remittance basis under ITA07/s831.

In 2007-08 he remits all of this relevant foreign income to the UK to meet certain ongoing UK financial commitments.

This transitional provision means that J will not be taxed in 2008-09 (the ‘year of return’) in respect of this remittance of the £6,000 relevant foreign income from 2006-07, although all of the ‘temporary non-resident’ conditions at ITTOIA05/s832A are otherwise met.

However s.10A(9C) TCGA provides:

Nothing in any double taxation relief arrangements shall be read as preventing the taxpayer from being chargeable to capital gains tax in respect of any of the chargeable gains treated by virtue of subsection (2)(a) above as accruing to the taxpayer in the year of return (or as preventing a charge to that tax from arising as a result).¹⁷

This appears to be a breach of any treaty in OECD Model form.¹⁸ However the intention of Parliament is reasonably clear and that prevails over the treaty.¹⁹

8.8.2 *Foreign tax credit relief*

EN FB 2005 provides:

The application of section 10A in relation to an individual does not prevent the individual obtaining relief for foreign tax paid in respect of chargeable gains which are treated as arising to him or her in the year of return.

8.9 **Post-departure acquisitions**

Section 10A(3) TCGA provides:

Subject to subsection (4) below, the gains and losses which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return shall not include any gain or loss accruing on the disposal by the taxpayer of any asset if—

- (a) that asset was acquired by the taxpayer at a time in the year of departure or any intervening year when—
 - (i) he was neither resident nor ordinarily resident in the UK, or
 - (ii) he was resident or ordinarily resident in the UK but was Treaty non-resident; ...

¹⁷ I would be grateful to any reader who could explain why the words in brackets are needed.

¹⁸ This is recognised in some treaties, which have an additional provision specifically to authorise a s.10A charge (and any foreign state's equivalent). See 8.13 (DTA and other short term non-residence rules).

¹⁹ *Padmore (No 2) v IRC* 73 TC 470.

The CG Manual provides:

26230. Temporary non-residence: Gains or losses excluded from scope of s. 10A [August 2010]

An individual may acquire assets after leaving the UK in a period of temporary residence abroad. If such assets are disposed of during the period of temporary non-residence, during an intervening year (see CG26155) any gains or losses on such assets are, in general, excluded from the scope of Section 10A, but see CG26240 which tells you about the exceptions to this general rule.

TCGA92/S10A(3)(a)

Section 10A(3)(a) provides that a gain or loss on an asset that was acquired after departure from the UK in either the tax year of departure or any of the intervening tax years when the taxpayer was not resident or not ordinarily resident shall not be treated as chargeable in the tax year of return.

If the asset was acquired at a time when the taxpayer was resident or ordinarily resident in the UK but was Treaty non-resident, any gain on that asset may fall within the scope of S10A. (This is only likely to apply to acquisitions after the date of departure up to the next 5 April).

You should note that the general exclusion of gains on assets acquired and disposed of during temporary non residence applies only to gains and losses which would otherwise be chargeable or allowable by virtue of TCGA92/S10A. Such gains or losses can only accrue in an intervening year.

Where assets are acquired after the date of departure and disposed of in the year of departure or year of return while the individual is not resident and not ordinarily resident the gains will be chargeable under TCGA92/S2 unless split-year treatment under ESCD2 is available to the individual, see CG26300+.

Example

Mr Smith, who has lived all his life in the UK, leaves the UK on 10 July 2008 for a four year contract of employment abroad.

He resumes tax residence in the UK on 15 August 2012.

On 8 May 2009 Mr Smith buys 20,000 shares in a UK Company. He sells all of the shares on 10 January 2011, realising a gain of £12,000.

Mr Smith fulfils all of the conditions for Section 10A to apply, see CG26156, but because the shares were acquired after his departure from the UK the gain is not treated as chargeable in the year of return.

8.9.1 *Exceptions to relief*

The CG Manual provides:

26240 Temporary non-residence: Exceptions to the exclusion from section 10A [April 2010]

Sometimes the exclusion from the scope of Section 10A TCGA 1992 afforded to gains accruing during intervening years on assets acquired after departure from the UK is not appropriate. Some assets acquired by

an individual after departure in either the tax year of departure or any of the intervening tax years when the taxpayer was not resident or not ordinarily resident have a connection with the earlier period of residence. These exceptional assets fall under three headings (see below). Where they apply, any gains or losses on the disposal of the assets during intervening years are treated as chargeable in the tax year of return, that is to say they are within the scope of section 10A.

There are three categories of exceptions. Section 10A(3)(b) TCGA requires:

- (b) that asset was so acquired otherwise than by means of a relevant disposal which by virtue of section 58, 73 or 258(4) is treated as having been a disposal on which neither a gain nor a loss accrued;

The sections referred to are:

Section 58 TCGA (transfers between husband and wife or between civil partners),

Section 73 TCGA (death of life tenant),

Section 258(4) TCGA (works of art).

Section 10A(3)(c) TCGA requires:

- (c) that asset is not an interest created by or arising under a settlement;

This prevents an avoidance scheme under which T would acquire an interest under a settlement with relevant income or trust gains, and then sell the interest tax free.

Lastly, s.10A(3)(d) requires:

- (d) the amount or value of the consideration for the acquisition of that asset by the taxpayer does not fall, by reference to any relevant disposal, to be treated as reduced under section 23(4)(b) or (5)(b), 152(1)(b), 153(1)(b), 162(3)(b) or 247(2)(b) or (3)(b).

The sections referred to are:

Section 23(4)(b) and (5)(b) TCGA (compensation and insurance)

Section 152(1)(b) and s.153(1)(b) TCGA (business assets roll-over relief),

Section 162(3)(b) TCGA (transfer of business to a company)

Section 247(2)(b) and (3)(b) TCGA (compulsory acquisition).

The asset must be acquired “by the taxpayer”. The CG Manual provides:

26231. Assets acquired by an offshore trust [April 2010]

The exclusion from charge, see CG26230, for assets acquired after the taxpayer’s departure does not apply to assets acquired within an offshore trust, TCGA 1992, s.86 or TCGA 1992, s.87 or by a non-resident closely controlled company, TCGA 1992, s.13.

26243. Example [April 2010] (Mr and Mrs Brown)

Mr and Mrs B, who have lived in the UK all of their lives, leave the UK on 15 November 2009 for Mr B to take up a three year contract of employment abroad. They resume tax residence in the UK on 1 December 2012.

Mr B had acquired a property in the UK on 4 March 2002. On 12 June 2010, he gave the property to Mrs B. Mrs B sold the property on 10 March 2011 realising a gain of £100,000.

TCGA92/S58 applies to the gift by Mr B, so that for Capital Gains Tax purposes at the time of transfer neither gain nor loss arises. On the sale by Mrs B, the gain is treated as accruing in the year of return as she fulfils all of the conditions for TCGA92/S10A to apply, and the asset is not excluded from the scope of TCGA92/S10A (subsection (3)(b)).

Section 10A(4) TCGA provides:

Where—

- (a) any chargeable gain that has accrued or would have accrued on the disposal of any asset (“the first asset”) is a gain falling (apart from this section) to be treated by virtue of section 116(10) or (11), 134 or 154(2) or (4) as accruing on the disposal of the whole or any part of another asset, and
 - (b) the other asset is an asset falling within paras (a) to (d) of subsection (3) above but the first asset is not,
- subsection (3) above shall not exclude that gain from the gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return.

The CG Manual provides:

26250 Temporary non-residence: Held-over gains [April 2010]

Sometimes a gain on disposal of an asset (the first asset) is ‘held over’ and not charged until another asset is disposed of. Where this happens under one of the provisions listed below then the gains which eventually accrue when the other asset is disposed of are not excluded from the scope of Section 10A TCGA 1992 by subsection (3) of that section, where subsection (3) would otherwise apply because the other asset was

within its scope (see CG26230 and CG26240). Note that for subsection (3) to be disapplied in this way, the first asset must not be within its scope.

Where Section 10A(4) TCGA 1992 applies, a held-over gain which accrues on a disposal in an intervening year when a taxpayer is not UK resident will be treated as accruing in the year of return to the UK, even if the asset which is disposed of was acquired after the taxpayer became non-resident, see CG26111.

The Capital Gains Tax 'hold-over' provisions to which this subsection refers are:

- Section 116(10) TCGA 1992 or Section 116(11) TCGA 1992 (where the new asset is a qualifying corporate bond), see CG53845+.
- Section 134 TCGA 1992 (compensation stock), see CG55045+.
- Section 154(2) TCGA 1992 or (4) (depreciating assets), see CG60370+.

Example

Mr Priestley goes to live in France for political reasons. As a result, he is not resident in the UK for the next three full years of assessment. During the first of those years he sells his shares in Priestley Chemicals Ltd and receives qualifying corporate bonds issued by the purchaser, Davy Plc. In the following year he redeems the qualifying corporate bonds and receives cash.

Although he has actually disposed of his shares, Section 116(10) TCGA 1992 applies and so he is treated for the purposes of TCGA 1992 as if he had not done so. Instead, a gain is computed as if he had disposed of the shares and that gain is 'held over' or 'frozen' until he disposes of the qualifying corporate bonds. Without the special provision at Section 10A(4) TCGA 1992 the gain which accrued when the qualifying corporate bonds were disposed of would not be within the scope of section 10A because they are assets both acquired and disposed of whilst Mr Priestley was not UK resident. Note that the first asset, the shares, is not within the scope of subsection (3) because it was acquired before Mr Priestley left the UK: it is appropriate to bring the gain latent in those shares within the potential scope of section 10A even though the gain did not arise until some other asset was disposed of.

8.10 Section 10A and non-resident trusts/companies

8.10.1 *Losses of non-resident company within s.13 TCGA*

Section 10A provides:

- (2) Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if— ...
- (c) any losses which by virtue of section 13(8) would have been allowable in his case in any intervening year if he had been resident in the UK throughout that intervening year, were ... losses accruing to the taxpayer in the year of return. ...
- (6) The reference in subsection (2)(c) above to losses allowable in an individual's case in an intervening year is a reference to only so much of the aggregate of the losses that would have been available in accordance with subsection (8) of section 13 for reducing gains accruing by virtue of that section to that individual in that year as does not exceed the amount of the gains that would have accrued to him in that year if it had been a year throughout which he was resident in the UK.

The CG Manual explains:

26201 Temporary non-residence: Losses attributed to participators in non-resident companies [April 2010]

Losses on the disposal of an asset by a non-resident company are only attributed to a participator under Section 13 TCGA 1992 in certain circumstances, Section 13(8) TCGA 1992. A loss is attributed only if it will be set off against a gain attributed to the same person from the same company in the same year of assessment or against a gain made by another non-resident company which has been attributed to the taxpayer in the same year of assessment, see CG57250+, in particular, CG57295-CG57299.

Section 10A TCGA 1992 can apply to losses which are attributed to a UK resident participator under section 13 just as it applies to attributed gains, so that the losses are treated as accruing in the year the individual returns to the UK. However, the restriction to the attribution contained in Section 13(8) TCGA 1992 has a parallel at Section 10A(6) TCGA 1992, which restricts the amount of losses within the scope of section 10A to the amount which would be available under section 13, subsection (8) to set against attributed gains. Losses of a year in excess of the gains attributed in that year are not within the scope of section 10A.

26203. Temporary non-residents [October 2009]

Example (Mrs Adams)²⁰

20 The example including all its irrelevant detail in full is as follows:

26203. Temporary non-residence: Losses [April 2010]

Example

The CG Manual provides an example where the facts (stripping out irrelevancies) are as follows:

A is non-UK resident in 1999/00 - 2001/02 inclusive.

A has owned all of the shares in a non-resident company. During A's period of non-residence gains and losses accrue to the company as follows:

1999/00 gain £20,000; loss £5,000

2000/01 loss £10,000

2001/02 gain £20,000

The TNR conditions apply to A. Under Section 10A(2)(b) all the gains which would have been treated as accruing to A in the intervening years if she had been resident in those years are treated as accruing to her in the year of return. Losses are allowable to be set against gains of the same year of actual accrual.

A is therefore chargeable in the year of return, 2002-2003 as follows

- net gains of £15,000 (gain £20,000 less loss £5,000) for 1999-2000
- a gain of £20,000 for 2001-2002.

The total gains chargeable are therefore £35,000.

The loss arising in 2000-2001 is not allowable.

Mrs. Adams, who has lived in the UK all of her life, leaves the UK on 1 September 2008 to take up a four year contract of employment abroad.

She resumes tax residence in the UK on 31 August 2012.

Mrs Adams has owned all of the shares in a company resident in Jersey for many years. The company owns a portfolio of shares and a number of properties. During Mrs Adams' period of non-residence the company makes a number of disposals. Gains and losses accrue as follows:

3 May 2009 gain £20,000 (year of assessment 2009-10)

23 October 2009 loss £ 5,000 (year of assessment 2009-10)

14 July 2010 loss £10,000 (year of assessment 2010-11)

4 September 2011 gain £20,000 (year of assessment 2011-12)

Mrs Adams fulfils all of the conditions for Section 10A to apply, see CG26156. Under Section 10A(2)(b) all the gains which would have been treated as accruing to Mrs Adams in the intervening years if she had been resident in those years are treated as accruing to her in the year of return. Losses are attributed to her, and section 10A applies to them, to the extent that they may be set against gains attributed in the same year.

Mrs Adams is therefore chargeable in the year of return, 2012-13 as follows

* net gains of £15,000 (gain £20,000 less loss £5,000) from 2009-10

* a gain of £20,000 for 2011-12.

The total gains chargeable are therefore £35,000.

The loss arising in 2000-2001 is not allowable because no gains from that year were attributed to her.

Careful timing of disposals is necessary to ensure that s.13 losses are not wasted.

8.10.2 *Temporarily non-resident beneficiaries: s.87 charge*

Section 10A TCGA does not mention s.87 TCGA. So at first sight it might seem that s.87 gains are not caught; but this is not the case. Section 10A(2)(a) TCGA applies to gains accruing to the individual on actual disposals. If a non-resident individual disposes of assets, chargeable gains do accrue to then (even though under s.2 TCGA they are outside the charge to CGT). Subsection (a) likewise applies if an individual receives a capital payment, as trust gains are treated as accruing to the beneficiary under s.87, even if they are non-resident. However, subsection (a) would not catch s.86 or s.13 gains, as gains under these sections do *not* accrue to a non-resident. The sections only apply to a UK resident settlor or participator. Hence the drafter correctly extends s.10A(2) by subsection (b), which applies ss.13 and 86 by deeming the taxpayer to be UK resident. It was not necessary to do this for s.87.

For the interaction with sch 4C TCGA, see 49.22.2 (Trust within s.87).

8.10.3 *Temporarily non-resident settlor: s.86 charge*

CG Manual provides:

26220 Attribution of gains to settlor [April 2010]

TCGA92/S86 provides that in certain cases a UK resident settlor of a non-resident settlement is assessed on the chargeable gains of the trustees, see CG38300. Following the enactment of TCGA92/S10A a settlor who is temporarily resident outside the UK may also be assessed under Section 86 on gains realised by the trustees during his/her period of non-residence.

However, all or part of the gains realised by the trustees during the settlor's period of temporary non-residence may already have been charged, under TCGA92/S87, to beneficiaries of the settlement who have received capital payments, see CG38270. TCGA92/S86A provides relief in this situation by excluding the gains charged to beneficiaries under Section 87 from the extended charge on the settlor under Section 86.

Any case involving Section 86 or Section 86A is to be reported to Specialist PT Trusts (Bootle) in accordance with CG38223. No attempt

to agree or dispute entries in the return should be made until guidance has been received from Specialist PT Trusts (Bootle), see CG38222.

The last sentence tacitly acknowledges that s.86A is a difficult section. The amendments in 2008 have created a fine mess. I do not attempt to consider the transitional rules.

Section 86A(1) TCGA provides:

- (1) Subsection (2) below applies in the case of a person who is a settlor in relation to any settlement (“the relevant settlement”) where—
- (a) by virtue of section 10A, amounts falling within section 86(1)(e) for any intervening year or years would (apart from this section) be treated as accruing to the settlor in the year of return; and
 - (b) there is an excess of the relevant chargeable amounts for the non-residence period over the amount of the section 87 pool at the end of the year of departure.

“Relevant chargeable amounts” is defined in s.86A(3) TCGA:

In subsection (1) above, the reference to the relevant chargeable amounts for the non-residence period is (subject to subsection (5) below) a reference to the aggregate of the amounts on which beneficiaries of the relevant settlement are charged to tax under section 87 or 89(2) for the intervening year or years in respect of any capital payments received by them.

“Section 87 pool” is defined in s.86A(4) TCGA:

In subsection (1) above, the reference to the section 87 pool at the end of the year of departure is (subject to subsection (5) below) a reference to the amount (if any) which, *in accordance with subsection (2) of that section*, fell in relation to the relevant settlement to be carried forward from the year of departure to be included in the amount of the *trust gains* for the year of assessment immediately following the year of departure.

The definition of “s.87 pool” refers back to s.87(2) TCGA. That worked by reference to the original s.87(2) TCGA. Unfortunately s.87 was redrafted in 2008 and by reference to the current s.87(2) the italicised words make no sense. This can be seen by comparing the two provisions:

Original s.87(2):

(2) There shall be computed in respect of every year of assessment for which this section applies the amount on which the trustees would have been chargeable to tax under section 2(2) if they had been resident and ordinarily resident in the UK in the year; and that amount, together with the corresponding amount in respect of any earlier such year so far as not already treated under subsection (4) below or section 89(2) as chargeable gains accruing to beneficiaries under the settlement, is in this section and sections 89 and 90 referred to as the trust gains for the year.

Current s.87(2):

(2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 2(2) amount for the relevant tax year or any earlier tax year.

The drafter in 2008 failed to spot that consequential amendments were needed here. Taken literally, therefore, the definition of “section 87 pool” is nonsense and the amount of the s.87 pool should be zero. If one could adopt a position of sufficient indifference to statutory words, one might rewrite the section to say what Parliament would presumably have said, had the point been noticed, in which case the “section 87 pool” means s.2(2) amounts; though this really amounts to legislation and not construction.

Section 86A(5) deals with settlements with more than one settlor.²¹

Section 86A(6)(7) was intended to deal with the computation of trust gains, now s.2(2) amounts:

Where any reduction falls to be made by virtue of subsection (2) above in any amount to be attributed in accordance with section 10A to any settlor for any year of assessment, the reduction to be treated as made for that year *in accordance with section 87(3)* in the case of the settlement in question shall not be made until—

21 “Where the property comprised in the relevant settlement has at any time included property not originating from the settlor, only so much (if any) of any capital payment or amount carried forward in accordance with section 87(2) as, on a just and reasonable apportionment, is properly referable to property originating from the settlor shall be taken into account for the purposes of subsections (3) and (4) above.”

- (a) the reduction (if any) falling to be made by virtue of that subsection has been made in the case of every settlor to whom any amount is so attributed; and
- (b) effect has been given to any reduction required to be made under subsection (7) below.

This provision refers to s.87(3) TCGA. That worked by reference to the original s.87(3) TCGA. Unfortunately s.87 was redrafted in 2008 and by reference to the current s.87(3) the italicised words again make no sense. The same problem affects s.86A(7)(8):

Where in the case of any settlement there is (after the making of any reduction or reductions in accordance with subsection (2) above) any amount or amounts falling in accordance with section 10A to be attributed for any year of assessment to settlors of the settlement, the amount (or aggregate amount) falling in accordance with that section to be so attributed shall be applied in reducing the amount carried forward to that year in accordance with section 87(2).

(8) Where an amount has been applied, in accordance with subsection (7) above, in reducing the amount which in the case of any settlement is carried forward to any year in accordance with section 87(2), that amount (or, as the case may be, so much of it as does not exceed the amount which it is applied in reducing) shall be deducted from the amount used for that year for making the reduction under section 87(3) in the case of that settlement.

Lastly, for completeness, s. 86A(9) provides some referential definitions.²²

For the interaction with sch 4B TCGA, see 49.22.1 (Trust within s.86 TCGA).

The introduction of the SRT offers an opportunity to rewrite s.86A so it may make sense from 2013. The draft clauses published in June 2012 are left blank at this point; the work was not yet done.²³

22 “Expressions used in this section and section 10A have the same meanings in this section as in that section; and paragraph 8 of Schedule 5 shall apply for the construction of the references in subsection (5) above to property originating from the settlor as it applies for the purposes of that Schedule.”

23 The residence response paper expressed the point more tactfully: “6.3 ... the legislation on anti-avoidance in Part 4 is at an earlier stage and the Government is aware that these parts will need refining...”

8.11 Time limit for assessment

Section 10A(7) TCGA provides:

Where this section applies in the case of any individual, nothing in any enactment imposing any limit on the time within which an assessment to capital gains tax may be made shall prevent any such assessment for the year of departure from being made in the taxpayer's case at any time before the end of two years after the 31st January next following the year of return.

The CG Manual provides:

26270. Assessment time limits [April 2010]

The normal assessment time limits apply where gains accruing in the intervening years are treated by virtue of TCGA92/S10A as assessable in the tax year of return to UK residence.

Where, however, a gain accrues in the tax year of departure from the UK after the date of the departure, this gain should be assessed by virtue of TCGA92/S2 in the year of departure. ESCD2 will not apply in cases where TCGA92/S10A would apply to any gains accruing in intervening years, see CG26300. In these circumstances, to ensure there is sufficient time in which to assess such a gain, the time limit has been specifically extended where the individual satisfies the conditions of Section 10A TCGA 1992 (whether or not gains accrue which are chargeable under that section). (TCGA92/S10A(7)).

The extended time limit permits gains accruing in the tax year of departure from the UK to be assessed at any time up to two years after 31 January next following the year of return to the UK notwithstanding any other time limit for the making of an assessment.

If the conditions of Section 10A TCGA 1992 are not satisfied then the normal assessment time limits will apply.

8.12 Offshore funds

In the absence of express provision, s.10A TCGA would not apply to offshore funds as OIGs are not chargeable gains. Regulation 23 OFTR provides:

(1) Section 10A of TCGA 1992 (temporary non-residents) applies for the purposes of this Part with the following modifications.

(2) The section applies as if, in subsection (2)—

- (a) the reference to section 86A were omitted;
 - (b) for the reference to capital gains tax there were substituted a reference to income tax;
 - (c) in paragraph (a), for the reference to chargeable gains and losses there were substituted a reference to offshore income gains;
 - (d) in paragraph (b)—
 - (i) for the reference to chargeable gains there were substituted a reference to offshore income gains;
 - (ii) for the reference to section 13 or 86 there were substituted a reference to regulation 24;
 - (e) paragraph (c) were omitted; and
 - (f) for the reference to gains or, as the case may be, losses there were substituted a reference to offshore income gains.
- (3) The section applies as if, in subsection (3)—
- (a) for the reference to gains and losses there were substituted a reference to offshore income gains; and
 - (b) for the reference to any gain or loss there were substituted a reference to any offshore income gains.
- (4) The section applies as if subsection (4) were omitted.
- (5) The section applies as if, in subsection (5)—
- (a) for the reference to gains and losses there were substituted a reference to offshore income gains;
 - (b) for the reference to any chargeable gain or allowable loss there were substituted a reference to an offshore income gain; and
 - (c) for the reference to section 10 or 16(3) there were substituted a reference to regulation 22(1)(b).
- (6) The section applies as if subsection (6) were omitted.
- (7) The section applies as if, in subsection (7), for the reference to capital gains tax there were substituted a reference to income tax.
- (8) The section applies as if, in subsection (9ZA)—
- (a) for the reference to foreign chargeable gains there were substituted a reference to offshore income gains to which regulation 19 applied; and
 - (b) the second sentence of that subsection were omitted.
- (9) The section applies as if, in subsection (9B)—
- (a) in paragraph (a)—
 - (i) for the reference to section 87 or 89(2) there were substituted a reference to regulation 20;
 - (ii) for the reference to chargeable gains there were substituted a reference to offshore income gains; and
 - (b) in paragraph (b) the references to subsections (2)(c) and (6) were omitted.
- (10) The section applies as if, in subsection (9C)—
- (a) for the reference to capital gains tax there were substituted a reference to income tax; and
 - (b) for the reference to chargeable gains there were substituted a reference to offshore income gains.

In the following discussion “**CGT s.10A**” means s.10A as it applies to CGT, ie in its original form; “**OIG s.10A**” means s.10A as it applies to OIGs, ie amended as reg.23 directs. OIG s.10A TCGA provides:

(1) This section applies in the case of any individual (“the taxpayer”) if—

[This sets out the TNR conditions which are the same as CGT s.10A.]

(2) Subject to the following provisions of this section ~~and section 86A~~, the taxpayer shall be chargeable to ~~capital gains tax~~ income tax as if—

(a) all the ~~chargeable gains and losses~~ offshore income gains which (apart from this subsection) would have accrued to him in an intervening year,

(b) all the ~~chargeable gains~~ offshore income gains which under ~~section 13 or 86~~ regulation 24²⁴ would be treated as having accrued to him in an intervening year if he had been resident in the UK throughout that intervening year, and

~~(c) any losses which by virtue of section 13(8) would have been allowable in his case in any intervening year if he had been resident in the UK throughout that intervening year,~~
were ~~gains or, as the case may be, losses~~ offshore income gains accruing to the taxpayer in the year of return.

(3) Subject to subsection (4) below, the ~~gains and losses~~ offshore income gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return shall not include any ~~gain or loss~~ offshore income gains accruing on the disposal by the taxpayer of any asset if—

(a) that asset was acquired by the taxpayer at a time in the year of departure or any intervening year when—

- (i) he was neither resident nor ordinarily resident in the UK, or
- (ii) he was resident or ordinarily resident in the UK but was Treaty non-resident;

(b) that asset was so acquired otherwise than by means of a relevant disposal which by virtue of section 58, 73 or 258(4) is treated as having been a disposal on which neither a gain nor a loss accrued;

(c) that asset is not an interest created by or arising under a settlement; and

24 See 34.14 (OIG s.13 charge).

- (d) the amount or value of the consideration for the acquisition of that asset by the taxpayer does not fall, by reference to any relevant disposal, to be treated as reduced under section 23(4)(b) or (5)(b), 152(1)(b), 153(1)(b) 162(3)(b) or 247(2)(b) or (3)(b).

~~(4) Where—~~

~~(a) any chargeable gain that has accrued or would have accrued on the disposal of any asset (“the first asset”) is a gain falling (apart from this section) to be treated by virtue of section 116(10) or (11), 134 or 154(2) or (4) as accruing on the disposal of the whole or any part of another asset, and~~

~~(b) the other asset is an asset falling within paragraphs (a) to (d) of subsection (3) above but the first asset is not;~~
~~subsection (3) above shall not exclude that gain from the gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return.~~

(5) The ~~gains and losses~~ offshore income gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return shall not include ~~any chargeable gain or allowable loss~~ an offshore income gain accruing to the taxpayer in an intervening year which, in the taxpayer’s case, has fallen to be brought into account for that year by virtue of section 10 or 16(3) regulation 22(1)(b).²⁵

~~(6) The reference in subsection (2)(c) above to losses allowable in an individual’s case in an intervening year is a reference to only so much of the aggregate of the losses that would have been available in accordance with subsection (8) of section 13 for reducing gains accruing by virtue of that section to that individual in that year as does not exceed the amount of the gains that would have accrued to him in that year if it had been a year throughout which he was resident in the UK.~~

(7) Where this section applies in the case of any individual, nothing in any enactment imposing any limit on the time within which an assessment to ~~capital gains tax~~ income tax may be made shall prevent any such assessment for the year of departure from being made in the taxpayer’s case at any time before the end of two years after the 31st January next following the year of return.

(8) *[This sets out the definitions of “intervening year” “relevant disposal” and “the year of departure” which are the same as CGT s.10A]*

(9) *[This defines the residence requirements in the same way as for CGT]*

(9ZA) If—

²⁵ See 34.9 (OIG non-residence defence).

(a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, and
 (b) the taxpayer is not domiciled in the UK in that year,
 any ~~foreign chargeable gains~~ offshore income gains to which regulation 19 applied²⁶ falling within subsection (2)(a) which were remitted in an intervening year are treated as remitted in the year of return.
 For this purpose “~~foreign chargeable gains~~” has the meaning given by ~~section 12(4)~~.

(9B) Where this section applies in the case of any individual in circumstances in which one or more intervening years would, but for his being Treaty non-resident during some or all of that year or those years, not be an intervening year, this section shall have effect in the taxpayer’s case—

(a) as if subsection (2)(a) above did not apply in the case of any amount treated by virtue of ~~section 87 or 89(2)~~ regulation 20 as an amount of ~~chargeable gains~~ offshore income gains accruing to the taxpayer in any such intervening year, and

(b) as if any such intervening year were not an intervening year for the purposes of subsections ~~(2)(b) and (c)~~ and (6) above.

(9C) Nothing in any double taxation relief arrangements shall be read as preventing the taxpayer from being chargeable to ~~capital gains tax~~ income tax in respect of any of the ~~chargeable gains~~ offshore income gains treated by virtue of subsection (2)(a) above as accruing to the taxpayer in the year of return (or as preventing a charge to that tax from arising as a result).

Regulation 23 OFTR only amends s.10A TCGA. It does not amend the definition of “DTR arrangements” which is in s.288 TCGA.²⁷ However that definition is subject to context, and it is suggested that the context requires that the reference here includes any DTA which confers relief from OIGs.

8.13 DTA and other short term non-residence rules

Some DTAs impose a short-term non-residence rule in their CGT article. This is not in the OECD model treaty, but about one third of UK treaties have a restriction of this kind.

²⁶ See 34.7 (OIG remittance basis).

²⁷ See 8.4.2 (“DTR arrangements” - IT) and 8.4.3 (“DTR arrangements” - CGT).

Treaties are easier to follow if one notes in the text which contracting state is which. A variety of wordings are used and Italy will serve as an example. We are considering a claim for UK CGT relief by a person treaty resident in Italy. Article 13 of the UK/Italy DTA provides:

(4) Gains from the alienation of any property other than that referred to in the preceding paragraphs of this Article shall be taxable only in the Contracting State of which the alienator is a resident [Italy]

This is (more or less) the OECD model form; the restriction then follows:

(5) The provisions of paragraph (4) of this Article shall not affect the right of a Contracting State [UK] to levy according to its law a tax on gains from the alienation of any property derived by an individual who:

- (a) is a resident of the other Contracting State [Italy]; and
- (b) has been a resident of the first-mentioned Contracting State [UK] at any time during the five years immediately preceding the alienation of the property; and
- (c) is not subject to tax on those gains in the other Contracting State [Italy]

This is not strictly a *temporary* non-residence rule as it applies to those who do not return to the UK, but the idea is similar.

The IHT deemed domicile rule can be considered in part a similar short term non-residence rule, since its effect is that a person who ceases to be UK resident (or domiciled) continues for a 3 or 4 year period to be regarded as UK domiciled for IHT purposes and so within the scope of IHT.

8.14 Temporary non-residence from 2013

In June 2012 HMRC published the response to the residence consultation (“**the Residence Response Paper**”)²⁸ which sets out draft clauses for revised temporary non-residence rules. This section discusses the draft clauses. They are set out in a schedule here called “**the SRT Schedule**”. The topic will need to be reviewed in the light of the Finance Act 2013.

28 HMRC, *Statutory definition of tax residence and reform of ordinary residence: a summary of responses* (June 2012)
www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf.

8.14.1 *Commencement*

Para 110(3) SRT schedule provides:

Part 4 of this Schedule has effect if the year of departure is the tax year 2013-14 or a subsequent tax year.

Para 112 SRT schedule provides:

- (1) The existing temporary non-resident provisions, as in force immediately before the day on which this Act is passed, continue to have effect on and after that day in any case where the year of departure (as defined in those provisions) is a tax year before the tax year 2013-14.
- (2) Where those provisions continue to have effect by virtue of subparagraph (1)–
 - (a) the question of whether a person is or is not resident in the UK for the tax year 2013-14 or a subsequent tax year is to be determined in accordance with Part 1 of this Schedule, but
 - (b) the effect of Part 3 [split year rules] is to be ignored.
- (3) The existing temporary non-resident provisions are–
 - (a) section 10A of TCGA 1992 (chargeable gains),
 - (b) section 576A of ITEPA 2003 (income withdrawals under certain foreign pensions),
 - (c) section 579CA of that Act (income withdrawals under registered pension schemes), and
 - (d) section 832A of ITTOIA (relevant foreign income charged on remittance basis).

8.15 Temporarily non-resident and other terms from 2013

8.15.1 *Temporarily non-resident*

Para 81 SRT schedule provides:

- (1) An individual is to be regarded as “temporarily non-resident” if–
 - (a) the individual has sole UK residence for a residence period,
 - (b) immediately following that period (referred to as “period A”), one or more residence periods occur for which the individual does not have sole UK residence,
 - (c) at least 4 out of the 7 tax years immediately preceding the year

- of departure were either–
 - (i) a tax year for which the individual had sole UK residence, or
 - (ii) a split year that included a residence period for which the individual had sole UK residence, and
 - (d) the temporary period of non-residence is shorter than 5 years.
- (2) Terms used in sub-paragraph (1) are defined below.

8.15.2 *Residence periods*

Para 82 SRT schedule provides:

In relation to an individual, a “residence period” is–

- (a) a tax year that, as respects the individual, is not a split year, or
- (b) the overseas part or the UK part of a tax year that, as respects the individual, is a split year.

8.15.3 *Sole UK residence*

Para 83 SRT schedule provides:

- (1) An individual has “sole UK residence” for a residence period consisting of an entire tax year if–
 - (a) the individual is resident in the UK for that year, and
 - (b) there is no time in that year when the individual is Treaty nonresident.
- (2) An individual has “sole UK residence” for a residence period consisting of part of a split year if–
 - (a) the residence period is the UK part of that year, and
 - (b) there is no time in that part of the year when the individual is Treaty non-resident.
- (3) An individual is “Treaty non-resident” at any time if at the time the individual falls to be regarded as resident in a country outside the UK for the purposes of double taxation arrangements having effect at the time.

8.15.4 *Temporary period of non-residence*

Para 84 SRT schedule provides:

In relation to an individual, “the temporary period of non-residence” is the period between–

- (a) the end of period A, and
- (b) the start of the next residence period after period A for which the individual has sole UK residence.

8.15.5 *Year of departure*

Para 85 SRT schedule provides:

“The year of departure” is the tax year consisting of or including period A.

8.15.6 *Period of return*

Para 86 SRT schedule provides:

“The period of return” is the first residence period after period A for which the individual has sole UK residence.

8.16 Gains and losses accruing in intervening years from 2013

Para 87 SRT schedule rewrites s.10A TCGA, which will provide:

- (1) This section applies if an individual (“the taxpayer”) is temporarily non-resident.
- (2) The taxpayer is chargeable to capital gains tax as if gains and losses within subsection (3) were chargeable gains or, as the case may be, losses accruing to the taxpayer in the period of return.
- (3) The gains and losses are—
 - (a) all the chargeable gains and losses accruing to the taxpayer in the temporary period of non-residence,
 - (b) all the chargeable gains that would, applying the assumptions in subsection (4), have been treated under section 13 or 86 as accruing to the taxpayer in that period, and
 - (c) any losses that would, applying those assumptions, have been allowable in the taxpayer’s case under section 13(8) in that period.
- (4) The assumptions are—
 - (a) the taxpayer was resident in the UK for the tax year in which the chargeable gain (or loss) accrued in the temporary period of non-residence, and
 - (b) that tax year was not a split year as respects the taxpayer.
- (5) Subsection (2) is subject to sections 10AA and 86A.

(6) The reference in subsection (3)(c) to any losses that would have been allowable in the taxpayer's case is a reference to so much of sum A as does not exceed sum B, where—

“sum A” is the aggregate of the losses that would have been available in accordance with section 13(8) for reducing gains accruing to the taxpayer by virtue of section 13 in the relevant tax year, and

“sum B” is the amount of the gains that would have accrued to the taxpayer in that tax year applying the assumptions in subsection (4).

(7) If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, any foreign chargeable gains falling within subsection (3)(a) that were remitted to the United Kingdom at any time in the temporary period of non-residence are to be treated as remitted to the United Kingdom in the period of return.

(8) This section does not apply to a gain or loss in respect of which the individual is chargeable to capital gains tax apart from this section (and could not cease to be so chargeable by the making of any claim under section 6 of TIOPA 2010).

(9) Part 4 of Schedule 1 to the Finance Act 2013 (statutory residence test: anti-avoidance) explains—

(a) when an individual is to be regarded as “temporarily nonresident”, and

(b) what “the temporary period of non-residence” and “the period of return” mean.

(10) In this section—

“foreign chargeable gains” has the meaning given by section 12(4);

“remitted to the United Kingdom” has the same meaning as in Chapter A1 of Part 14 of ITA 2007;

“the year of return” means the tax year that consists of or includes the period of return.

10AA Section 10A: supplementary

(1) Section 10A(2) does not apply to a gain or loss accruing on the disposal by the taxpayer of an asset if—

(a) the asset was acquired by the taxpayer in the temporary period of non-residence,

(b) it was so acquired otherwise than by means of a relevant disposal that by virtue of section 58, 73 or 258(4) is treated as having been a disposal on which neither a gain nor a loss accrued,

(c) the asset is not an interest created by or arising under a settlement, and

(d) the amount or value of the consideration for the acquisition of the asset by the taxpayer does not fall, by reference to any relevant disposal, to be treated as reduced under section 23(4)(b) or (5)(b),

152(1)(b), 153(1)(b), 162(3)(b) or 247(2)(b) or (3)(b).

(2) “Relevant disposal” means a disposal of an asset acquired by the person making the disposal at a time when that person was resident in the United Kingdom and was not Treaty non-resident.

(3) Subsection (1) does not apply if–

(a) the gain is one that (ignoring section 10A) would fall to be treated by virtue of section 116(10) or (11), 134 or 154(2) or (4) as accruing on the disposal of the whole or part of another asset, and

(b) that other asset meets the requirements of paragraphs (a) to (d) of subsection (1), but the asset in respect of which the gain actually accrued or would actually accrue does not.

(4) Section 10A(2) does not apply to a gain or loss that has fallen to be brought into account in the taxpayer’s case by virtue of section 10 or 16(3).

(5) Nothing in any double taxation relief arrangements is to be read as preventing the taxpayer from being chargeable to capital gains tax in respect of any chargeable gains treated by virtue of section 10A(3)(a) as accruing to the taxpayer in the period of return (or as preventing a charge to that tax from arising as a result).

(6) Nothing in any enactment imposing any limit on the time within which an assessment to capital gains tax may be made prevents any assessment for the year of departure from being made in the taxpayer’s case at any time before the end of the second anniversary of the 31 January next following the year of return.

(7) “The year of return” has the same meaning as in section 10A.

8.17 Remittance of income in intervening years from 2013

Para 93 SRT schedule rewrites s.832A ITTOIA, which will provide:

(1) This section applies if an individual is temporarily non-resident.

(2) Treat any of the individual’s relevant foreign income within subsection (3) that is remitted to the United Kingdom in the temporary period of non-residence as remitted to the United Kingdom in the period of return.

(3) Relevant foreign income is within this subsection if–

(a) it is relevant foreign income for the UK part of the year of departure or an earlier tax year, and

(b) section 832 applies to it.

(4) Any apportionment required for the purposes of subsection (3)(a) is to be done on a just and reasonable basis.

(5) Nothing in any double taxation relief arrangements is to be read as

- preventing the individual from being chargeable to income tax in respect of any relevant foreign income treated by virtue of this section as remitted to the United Kingdom in the period of return (or as preventing a charge to that tax from arising as a result).
- (6) Part 4 of Schedule 1 to FA 2013 (statutory residence test: anti-avoidance) explains—
- (a) when an individual is to be regarded as “temporarily nonresident”, and
 - (b) what “the temporary period of non-residence” and “the period of return” mean.
- (7) In this section, “double taxation relief arrangements” means arrangements that have effect under section 2(1) of TIOPA 2010.

8.18 Distributions to participators in close companies

The Residence response paper provides:

3.188 The Government confirms that the new rule will be modelled on the existing capital gains rules and will apply where:

- an individual has been resident in four or more of the seven tax years prior to the tax year in which they become non-resident; and
- becomes resident again within five years of leaving.

3.189 Where those conditions are met, certain types of income that arise during the years of non-residence will be treated as arising instead in the year in which the individual becomes resident again.

3.190 The rule will cover the following types of income:

- distributions from close companies;
- lump sum benefits from employer-financed retirement benefit schemes; and
- chargeable event gains from life assurance contracts.

3.191 This will be in addition to the types of income and gains covered by the existing rules for temporary non-residents: certain income withdrawals from pension schemes, remittances and chargeable gains. However, the Government again confirms that it will not apply to ordinary earnings from employment or self-employment or to regular types of investment income such as bank interest or dividends from non-close companies.

3.192 The new rule would apply to income arising in the whole of the period of temporary non-residence (which would have the

effect of deferring the assessment of post-departure gains arising in the year of departure) but would also ensure that gains realised in the overseas part of the year of departure or return are charged even if the individual is treaty non-resident in that part of the year. 3.193 Chapter 6 contains draft legislation on most of the temporary non-residence rules. This part of the draft legislation requires further refinement but comments on its current form would be welcomed. The draft legislation covering distributions from close companies will be published later in the summer.

8.19 Chargeable event gains in intervening years from 2013

Section 456B ITTOIA will provide:

- (1) This section applies if an individual is temporarily non-resident.
- (2) The individual is liable for tax under this Chapter for the year of return in respect of any gain that meets the conditions in subsection (3).
- (3) The conditions are--
 - (a) the gain arose in the temporary period of non-residence,
 - (b) it arose from a policy issued, or a contract made, before the start of that period,
 - (c) the chargeable event giving rise to it was neither a death nor a chargeable event treated as occurring under section 525(2),
 - (d) no-one is liable under section 466 or 467, or by virtue of section 468, in respect of the gain, and
 - (e) the individual would have been liable under section 465 in respect of it, applying the assumptions in subsection (4).
- (4) The assumptions are--
 - (a) the individual was UK resident for the tax year in which the gain arose, and
 - (b) that tax year was not a split year as respects the individual.
- (5) The amount of any gain in respect of which the individual is liable for tax by virtue of subsection (2) is the amount on which tax would have been charged under this Chapter applying the assumptions in subsection (4).
- (6) That amount is treated as income of the individual for the year of return.
- (7) This section does not apply to a gain if--
 - (a) in relation to the policy or contract from which the gain arises, a terminal event occurs in the temporary period of non-residence or in the period of return,

- (b) the chargeable event giving rise to the gain occurred before that terminal event, and
 - (c) a person (whether or not the individual) is liable for tax under this Chapter (including by virtue of this section) in respect of any gain resulting from the terminal event.
- (8) Nothing in any double taxation relief arrangements is to be read as preventing the individual from being liable for tax under this Chapter in respect of any gain in respect of which the individual is liable for tax by virtue of subsection (2) (or as preventing a charge to tax on that gain from arising under this Chapter).
- (9) Part 4 of Schedule 1 to FA 2013 (statutory residence test: anti-avoidance) explains—
- (a) when an individual is to be regarded as “temporarily nonresident”, and
 - (b) what “the temporary period of non-residence” and “the period of return” mean.
- (10) In this section—
- “terminal event” means an event mentioned in section 499(3);
 - “year of return” means the tax year that consists of or includes the period of return.”

Para 110 SRT schedule provides:

- (3) Part 4 of this Schedule has effect if the year of departure is the tax year 2013- 14 or a subsequent tax year.
- (4) Without limiting the generality of sub-paragraph (3), the amendments of Chapter 9 of Part 4 of ITTOIA 2005 (gains from contracts for life insurance etc) made by Part 4 of this Schedule do not apply unless the policy or contract in question falls within sub-paragraph (5).
- (5) A policy or contract falls within this sub-paragraph if—
 - (a) it is issued or made on or after 6 April 2013,
 - (b) it is varied on or after that date so as to increase the benefits secured (any exercise of rights conferred by the policy or contract being regarded for this purpose as a variation),
 - (c) there is an assignment (or assignation) to the individual concerned (whether or not for money or money’s worth) on or after that date of rights, or a share of rights, conferred by the policy or contract, or (d) all or part of the rights conferred by the policy or contract become held on or after that date as a security for a debt of the individual concerned.

8.20 Specific employment income

The following specialist topics are not discussed here:

s.394A ITEPA: Employer-financed retirement benefits
s.554Z4A and s.554Z11A ITEPA: Disguised remuneration
s.572A ITEPA: Pensions

8.21 Minor definitions

Para 103 SRT schedule provides:

In this Schedule—

“annual leave”, in relation to an individual who carries on a trade, means reasonable amounts of annual holiday (and “reasonable” is to be assessed having regard to the annual leave to which an employee might be entitled if doing similar work);

“corporation tax” includes any amount assessable or chargeable as if it were corporation tax;

“country” includes a state or territory;

“double taxation arrangements” means arrangements that have effect under section 2(1) of TIOPA 2010;

“employment”—

- (a) has the meaning given in section 4 of ITEPA 2003, and
- (b) includes an office within the meaning of section 5(3) of that Act;

“enactment” includes—

- (a) an Act of the Scottish Parliament,
- (b) a Measure or Act of the National Assembly for Wales,
- (c) any Northern Ireland legislation as defined by section 24(5) of the Interpretation Act 1978, and
- (d) any Orders in Council, orders, rules, regulations, schemes warrants, byelaws and other instruments made under an enactment (including anything mentioned in paragraphs (a) to (c) of this definition);

“individual” means an individual acting in any capacity (including as trustee or personal representative);

“overseas” means anywhere outside the UK;

“split year”, as respects an individual, means a tax year that is, as respects that individual, a split year within the meaning of Part 3 of this Schedule;

“trade” also includes—

- (a) a profession or vocation,
- (b) anything that is treated as a trade for income tax purposes, and
- (c) the commercial occupation of woodlands (within the meaning of section 11(2) of ITTOIA 2005);

“UK” means the United Kingdom, including the territorial sea of the United Kingdom;

“whole month” means the whole of January, the whole of February and so on, except that the period from the start of a tax year to the end of April is to count as a whole month.

CHAPTER NINE

THE REMITTANCE BASIS

9.1 Remittance basis – Introduction

Income tax and CGT employ two types or bases of assessment:

- (1) An **“arising basis”** under which tax is charged on the amount of income/gains which arise.
- (2) A **“remittance basis”** under which tax is charged on the amount of income/gains which are received in the UK.

A remittance basis applies (in short) when a foreign domiciliary receives:

- (1) Foreign income/gains
- (2) Deemed income/gains under the settlement provisions, the TAA provisions and s.87 TCGA.

I use the following self-explanatory terminology:

- (1) **“The ITA remittance basis”** (which applies from 2008/09 for all tax purposes).
- (2) **“The pre-2008 remittance basis”** (which applied until 2008/2009); there were different rules for different taxes, so, more specifically, one might refer to **“the pre-2008 RFI, employment income and CGT remittance bases”**.

9.1.1 *Cross references*

This chapter considers who qualifies for the remittance basis, and the following chapters consider what counts as a remittance.

For rates of tax see 43.1 (Rates of income tax). For the position of trustees of IP trusts where the life tenant is a remittance basis taxpayer, see 25.3.3 (Life tenant remittance basis taxpayer).

9.2 HMRC guidance

Most of the HMRC guidance is to be found in the vast RDR Manual. The

first edition was published March 2009, a second edition August 2009, and an online version including paragraph numbering was published about June 2010.

The RDR Manual frequently makes its point by examples. In some cases the examples are completely straightforward and would have been better omitted for the sake of brevity.¹ In almost all cases the examples are padded out with irrelevant facts. (No doubt in the spirit of *The Mikado*, “intended to give artistic verisimilitude to an otherwise bald narrative”.) This is about as unhelpful a method of explaining statutory provisions as could be devised. The consequence is to make it quite unnecessarily difficult to identify the important points from the examples. I try to deal with this by editing or rewriting the example so the reader can more easily see the relevant point; I set the original text of the manual in a footnote, so that the reader can see what I have done.

The RDR Manual was out of date when published, because it took no account of the changes (retrospective and prospective) of the FA 2009. The 2nd edition was not up to date because of more retrospective legislation in the F(no.1)A 2010. Of course, no guidance can ever be up to date while tax reform continues at its present frenetic pace.

Earlier guidance was in three lengthy sets of questions and answers:

“December 2008 Q&As” published 10 December 2008.

“January 2009 Q&As” published 13 January 2009.

“March 2009 Q&As” published 3 March 2009.

Most of the Q&As are now superceded by the RDR Manual but they are still sometimes relevant.²

Guidance published before then, under the name of FAQs, is now of historic interest only.

9.3 “Foreign income and gains”

Section 809Z7(1) ITA provides:

This section applies for the purposes of this Chapter.

1 But for the sake of completeness, and just in case some readers should find them helpful, I sometimes set them out in footnotes.

2 HMRC has removed the Q&As from their website but they are accessible on www.kessler.co.uk.

These are chapter-wide definitions though in accordance with the principles of Plain English drafting, the legislation contains occasional and somewhat unnecessary pointers to the definitions.³

Section 809Z7(2) ITA provides:

- An individual's "foreign income and gains" for a tax year are—
- (a) the individual's relevant foreign earnings for that year,
 - (b) the individual's foreign specific employment income for that year,
 - (c) the individual's relevant foreign income for that year, and
 - (d) if the individual is not domiciled in the UK in that year, the individual's foreign chargeable gains for that year.

9.3.1 *Relevant foreign income*

Section 830(1) ITTOIA provides the definition of "RFI":

- In this Act "relevant foreign income" means income which
- (a) arises from a source outside the UK, and
 - (b) is chargeable under any of the provisions specified in subs.(2) (or would be so chargeable if s.832 did not apply to it).

This definition only applies for ITTOIA, but s.989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts—

"relevant foreign income" has the meaning given by section 830(1) to (3) of ITTOIA 2005 but also includes, for any purpose mentioned in any provision listed in section 830(4) of that Act, income treated as relevant foreign income for that purpose by that provision,

Subsections (2)–(4) set out 24 categories of RFI:

- (2) The provisions are—
- (a) Chapter 2 of Part 2 (trade profits),
 - (b) Chapter 17 of Part 2 (adjustment income),

3 Eg s.809C(6) ITA: "See s.809Z7 for the meaning of an individual's foreign income and gains for a tax year".

- (c) Chapter 3 of Part 3 (profits of property business),
 - (e) Chapter 2 of Part 4 (interest),
 - (f) Chapter 4 of Part 4 (dividends from non-UK resident companies),
 - (g) Chapter 7 of Part 4 (purchased life annuity payments),
 - (h) Chapter 8 of Part 4 (profits from deeply discounted securities),
 - (i) Chapter 13 of Part 4 (sales of foreign dividend coupons),
 - (j) Section 579 (royalties and other income from intellectual property),
 - (k) Chapter 3 of Part 5 (films and sound recordings: non-trading businesses),
 - (l) Chapter 4 of Part 5 (certain telecommunication rights: non-trading income),
 - (m) section 649 (estate income),
 - (n) Chapter 7 of Part 5 (annual payments not otherwise charged), and
 - (o) Chapter 8 of Part 5 (income not otherwise charged).
- (3) But "relevant foreign income" does not include income chargeable as a result of section 844 (unremittable income: income charged on withdrawal of relief after source ceases).
- (4) For the treatment of other income as relevant foreign income, see—
- (a) section 857(3) (a partner's share of a firm's trading income),
 - (aa) regulation 19 of the Offshore Funds (Tax) Regulations 2009,
 - (b) paragraph 6(3) of Schedule 3 to the Commonwealth Development Corporation Act 1999 (distributions by the Commonwealth Development Corporation),
 - (c) section 575(3) of ITEPA 2003 (taxable pension income: foreign pensions),
 - (d) section 613(4) of that Act (taxable pension income: foreign annuities),
 - (e) section 631(3) of that Act (pre-1973 pensions paid under the Overseas Pensions Act 1973 (c. 21)),
 - (f) section 635(4) of that Act (taxable pension income: foreign voluntary annual payments),
 - (g) section 679(2) of that Act (taxable social security income: foreign benefits),
 - (h) section 670A of ITA 2007 (accrued income profits), and
 - (i) sections 726, 730 and 735 of that Act (transfer of assets abroad: foreign deemed income).

This list includes almost all foreign income, including trading income, property income, interest and dividends. This is income formerly taxed under Schedule D Cases IV and V. "Relevant foreign income" is not a helpful label but it is difficult to think of a better one.

Foreign source income of a non-resident is not RFI as it is not "chargeable" and does not meet the condition in s.830(1)(b).

9.3.2 *Relevant foreign earnings (“RFE”)*

Section 809Z7(3) ITA provides the definition of RFE:

An individual’s “relevant foreign earnings” for a tax year are—

- (a) if the individual is ordinarily UK resident in that year, the individual’s chargeable overseas earnings⁴ for that year, and
- (b) otherwise, the individual’s general earnings within s.26(1) of ITEPA 2003 for that year (non-UK earnings).

9.3.3 *Foreign specific employment income*

Section 809Z7(4) ITA incorporates the definition from ITEPA: An individual’s “foreign specific employment income” for a tax year is

- (1) foreign securities income for the purposes of s.41A of ITEPA 2003;
- (2) certain income under the deferred remuneration provisions.

Specific employment income raises a set of specialist topics not discussed in this book, though I hope to cover them in a future edition.

9.3.4 *Foreign chargeable gains*

Section 12(4) TCGA provides a commonsense definition:

In this section “foreign chargeable gains” means chargeable gains accruing from the disposal of an asset which is situated outside the UK.

This is only a section-wide definition, so it has to be repeated or incorporated when the expression is used elsewhere.

Section 809Z7(5) ITA incorporates this definition:

An individual’s “foreign chargeable gains” for a tax year are the individual’s foreign chargeable gains (within the meaning of s.12(4) of TCGA 1992) accruing to the individual in that year.

4 Section 809Z7(6) provides: “In subs.(3)(a) ‘chargeable overseas earnings’ has the same meaning as in s.22 of ITEPA 2003 (see s.23 of that Act).” See 13.11 (Chargeable overseas earnings).

9.3.5 *Income/capital terminology in remittance basis context*

One might start off by thinking that a remittance of income is subject to income tax and a remittance of capital is not. It is not that simple. The terminology of “capital” and “income” in the context of the remittance basis is potentially confusing.

A sum received in the UK may not be taxable under the remittance basis because it is derived not from income but from some fund easily identified as capital in the hands of the taxpayer, such as a gift or inheritance, or borrowing. In cases in this category it makes sense to say that the remittance is tax free because it is one of capital.

A sum received in the UK may not be taxable under the remittance basis because:

- (1) the donor was non-resident when the remitted sum accrued; or
- (2) the remitted sum has already been subject to income tax.

Such sums might be said to be “income” in the normal sense of the word. These examples show that a remittance of a sum which is income in nature may nevertheless be remittance free of tax under the remittance basis.

- (3) Conversely, suppose a remittance basis taxpayer accumulates income offshore for many years; the accumulated fund might be said to be their “capital” in the normal sense of the word. Yet for the purposes of the remittance basis, it is in principle taxable if remitted.⁵ Perhaps it is better described as “income”.

It is best not to use the terminology of income/capital in any of cases (1) to (3): it is unnecessary to do so.

5 See (if authority is needed) *Walsh v Randall* 23 TC 55:

“... the accumulated income which he had derived from the drawings of the firm of which he was a sleeping partner. I have no doubt that he had come to regard this sum of money as capital. It was invested savings and it was in that sense capital, unless it can be said that, for instance, a professional man’s invested savings never are and never become capital. I should have thought it was quite a harmless thing to use the word ‘capital’ in relation to a professional man, or indeed to any other private person. I think that word may very definitely have a meaning with regard to ordinary private persons and may be correctly used to describe some part of their property. That, however, is not, for Income Tax purposes, the test. To the Crown the [unremitted] income of a person residing in the UK is, as I gather, always income until it is taxed.”

9.4 History of the remittance basis

It is not necessary for a practitioner to know the history of the remittance basis but it makes an interesting story and is helpful to understand the background to the older cases.⁶

Until 1914 all foreign income was taxed on a remittance basis: s.100 Income Tax Act 1842. Since then the remittance basis has been withdrawn, in stages, except for foreign domiciliaries. In 1914 income from “securities, stocks, shares, or rents in any place out of the UK” was brought onto an arising basis: s.5 FA 1914. This did not apply to foreign domiciliaries and non-ordinarily resident British subjects. Even those who were domiciled and ordinarily resident in the UK retained the remittance basis for any foreign source income which did not consist of securities or rents. Hence the need for cases to decide whether trust income was to be regarded as income arising from securities or from the trust.⁷

In 1940 the general remittance basis was further restricted, to (a) income from offshore trades, professions or vocations, and (b) income from offshore offices, employments or pensions: s.19 FA 1940. The exception was intended, perhaps, to encourage foreign trade. However, it did enable tax planning by splitting a single mixed UK and foreign based trade into separate UK and foreign source trades, the latter qualifying for the remittance basis. An arrangement of this kind was held to be successful in *Newstead v Frost* 53 TC 525. So in 1974 this was abolished: ss.22, 23 FA 1974.

The same rules applied to companies as to individuals, until the introduction of corporation tax in 1965, which put UK resident companies onto an arising basis.

In 2008 the remittance basis was recast, and restricted by the remittance basis claim charge.

9.5 Who qualifies for the remittance basis?

After a (somewhat unnecessary) overview in accordance with the

⁶ See John Avery Jones, “Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis”, *Studies in the History of Tax Law* (Vol 1 2004), accessible www.kessler.co.uk.

⁷ See 25.1 (Taxation of life tenant).

principles of plain English drafting,⁸ s.809B, 809D and 809E ITA set out three categories of individuals to whom the remittance basis applies:

- (1) Section 809B is the main category, those who make a claim for the remittance basis. I refer to these as “**remittance basis claimants**”. The other two categories are classes of *de minimis* taxpayers, defined with complex and pernickety detail.
- (2) Section 809D applies to individuals whose unremitted foreign income and gains are less than £2,000. I refer to these as “**sub-£2k taxpayers**”.
- (3) Section 809E applies to those with no (or virtually no) taxable (UK source) income and gains who do not remit any foreign income or gains. I refer to these as “**non-taxpayers**”.

The advantages of being in one of the two *de minimis* categories are as follows:

- (1) No claim is needed and so the taxpayer may not need to make a tax return.
- (2) The remittance basis claim charge does not apply, personal allowances remain available,⁹ and the individual is not forced to make a CGT loss election.¹⁰

I refer to the three groups together as “**remittance basis taxpayers**”. HMRC use the term “remittance basis user” (Since about 2001, HMRC do not like to use the word “taxpayer”) and that usage has been adopted in the FA 2012.

9.6 Remittance basis claimants: s.809B

9.6.1 *Entitlement to claim remittance basis*

Section 809B ITA provides:

- (1) This section applies to an individual for a tax year if the individual-
 - (a) is UK resident in that year,

⁸ Section 809A ITA provides: “This Chapter provides for an alternative basis for charge in the case of individuals who are not domiciled in the UK or are not ordinarily UK resident”.

⁹ See 44.5 (Withdrawal of personal allowances & CGT annual exemption for remittance basis claimants).

¹⁰ See 51.9 (Loss accruing to remittance basis taxpayer).

- (b) is not domiciled in the UK in that year or is not ordinarily UK resident in that year, and
- (c) makes a claim under this section for that year.
- (2) The claim must contain one or both of the following statements-
 - (a) that the individual is not domiciled in the UK in that year;
 - (b) that the individual is not ordinarily UK resident in that year.

Thus two categories of individual may claim the remittance basis:

- (1) A UK resident foreign domiciliary.
- (2) A person who is:
 - (a) resident but not ordinarily resident in the UK; and
 - (b) domiciled in the UK (or they would fall within the first category anyway).

Category (2) must be a rare case. HMRC say the figure was fewer than 300 in 2008-09.¹¹

The RDR Manual 32220 provides:

32220 Counting years of UK residence (seven out of nine) - Section 809 ITA 2007 [July 2010]

...

Most long-term UK Residents will also be Ordinarily Resident in the UK, so most, although not necessarily all, individuals who pay the remittance basis charge will use the remittance basis on account of their non-dom status. Cases involving individuals who are UK-domiciled but claim to be NOR and who pay the remittance basis charge should be referred to Specialist Personal Tax, PTI Advisory for a review of their NOR status claim.

Category (2) does not qualify for the CGT remittance basis.

In the 2011/12 and earlier editions of this work I said:

It is suggested that the law could be simplified, and the anomaly fairly corrected, by abolishing this category and bringing such persons on to the arising basis. However the 2008 reforms chose not to do this, so the anomaly is likely to remain for the foreseeable future.

This reform may be achieved next year as a side effect of the abolition of

¹¹ HMRC, "Statutory definition of tax residence: a consultation" (June 2011) para 6.18, accessible www.hm-treasury.gov.uk/d/consult_condoc_statutory_residence.pdf.

the ordinary residence concept.

For simplicity I will on most occasions ignore this possibility and simply refer to “foreign domicile”.

9.6.2 *Is a claim worthwhile?*

A claim gives the advantages of the remittance basis but has the following drawbacks:

- (1) Loss of personal allowances:¹²
 - (a) CGT annual exemption.
 - (b) IT personal allowance (only a concern for those with taxable income up to about £100k as otherwise there is no personal allowance to lose¹³)
- (2) The need to make a CGT loss election
- (3) Remitted dividends are taxed at a higher rate than dividends taxed on an arising basis
- (4) Loss of 10% deduction for foreign pension¹⁴
- (5) For long-term residents: the remittance basis claim charge

The effect of the remittance basis claim charge is to withdraw the remittance basis from long-term residents except the most wealthy, since a claim is not likely to be worthwhile for individuals whose income is much less than £150,000 in the year in question, though the position varies a great deal from one case to another.

9.6.3 *Is a claim worthwhile: US taxpayers*

Bober states:

Generally, the ability to claim double tax relief will mean that an adult US citizen (or green- card holder) who is a long-term UK resident will achieve a better overall tax result (meaning that less tax will be payable overall) by being subject to UK tax on the arising basis. This is because the individual will generally be subject to US tax on a worldwide basis

12 See 44.5 (Remittance basis claim: loss of personal allowances).

13 See 44.4 (Withdrawal of allowances for high earners). For completeness: in rare cases the allowance may be saved by a DTT: see 44.7.2 (Personal allowances under DTAs: remittance basis claimants).

14 See 23.3 (Foreign pension).

anyway. For many, while UK tax rates are in excess of US tax rates, the additional UK tax that will be payable on the arising basis will not be in excess of the £30,000 RBC payable if the remittance basis claim is made. This will not always be the case, though, as:

- the individual may have specific issues meaning that some of their foreign income or gains are sheltered from the US tax net, and/or
- the individual might be sufficiently wealthy that the difference between the higher UK tax rates and the US tax rate will mean that paying the £30,000 is worthwhile.
- In addition, some US citizens (or green-card holders) may prefer to pay tax on the remittance basis in the UK rather than try to determine the UK tax treatment with respect to some of the offshore investments they have, and make the necessary disclosure. Since the US and the UK tax systems are different the fact that an individual has to submit a US tax return showing worldwide income and gains will not necessarily mean he or she is in a position to complete a UK return without incurring significant additional compliance costs. Paying the RBC will avoid the need for this work and may result in privacy gains.¹⁵

9.6.4 *How to claim and time limits*

The claim is made by ticking the relevant box in the tax return.¹⁶ Section 809B(3) ITA provides:

Sections 42 and 43 of TMA 1970 (procedure and time limit for making claims), except s.42(1A) of that Act, apply in relation to a claim under this section as they apply in relation to a claim for relief.

The RDR Manual provides:

32030 Claiming the remittance basis: Claims - Time Limits [July 2010]

The time limits for making claims are set out in s.43 TMA 1970.

The general time limit as set out in s.43(1) TMA70 for making a claim also applies to making a claim for the remittance basis.

... The present limits are changing as a result of changes introduced at Schedule 39 FA 2008. From 1 April 2010 the new time limits will be 4 years after the end of the year of assessment to which it relates. Please

15 Bober "The remittance basis charge – US issues" (2001) 9 TQR p.8

16 Box 27 form SA109 (Residence remittance basis, etc) 2011/12.

refer to the Self Assessment Claims Manual (SACM) for further details. The Taxes Acts may prescribe a longer or shorter period in respect of certain claims, and if that is the case then that time limit will override the general rule of s.43(1).

S.43(2) extends the time limit in certain circumstances. This information is held in the Self Assessment Claims Manual (SACM 9000 onwards).

The RDR Manual provides:

32020 Claiming the remittance basis: Making a claim [July 2010]

...

If the return is subsequently amended, the claim may be included then or a previously made claim may be amended or deleted (s.42(5) TMA 1970). However when the time period for making an amendment has passed, the claim may not be withdrawn even if the making of the claim turns out to have been an error. This is because error or mistake relief does not apply to claims made to use the remittance basis under s.809B ITA 2007 (s.33(2A)(c) TMA 1970).

It is possible to claim the remittance basis in one year and not in another year, thus opting in and out of the remittance basis.

9.7 Sub-£2k taxpayer: s.809D

Section 809D ITA provides:

- (1) This section applies to an individual for a tax year if—
 - (a) the individual is UK resident in that year,
 - (b) the individual is not domiciled in the UK in that year or is not ordinarily UK resident in that year, and
 - (c) the individual's unremitted¹⁷ foreign income and gains for that year are less than £2,000.
- unless condition A or condition B is met.

17 Section 809D(2) provides a commonsense definition of "unremitted":

"The amount of an individual's "unremitted" foreign income and gains for a tax year is—

- (a) the total amount of what would (if this section applied) be the individual's foreign income and gains for that year, minus
- (b) the total amount of those income and gains that are remitted to the UK in that year."

(1A) Condition A is that the individual is not domiciled in the UK in that year and conditions A to F in section 828B are met.¹⁸

(1B) Condition B is that the individual gives notice in a return under section 8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

Why should anyone wish to make a claim under s.809D(1B) and move from the remittance basis to the arising basis? The reason may be that the remittance basis (for those with modest incomes) involves too much trouble and expense: it may be more cost effective to pay tax on an arising basis. Another reason might be to facilitate double taxation relief.

9.7.1 *Interaction of £2k limit with split-year concessions*

The RDR Manual provides:

32120 Below £2,000 threshold users: Years of arrival and departure - interaction with Extra Statutory Concession (ESC) A11 [June 2010]

ESC A11 may apply to an individual for the year in which they arrive or leave the UK; it effectively splits the tax year into periods of residence and non-residence and computes liability accordingly. This generally means that foreign income from the period of “non-residence” is not subject to UK tax.

However in considering whether the “below £2,000 threshold” limit applies in respect of use of the remittance basis of taxation under ITA07/s809D, the level of unremitted foreign income and gains for the entire tax year must be taken into account.

This is straightforward but the Manual gives an example to drive the point home:¹⁹

Example (Ferdinand)

F enters the UK on 20 October 2010, and is resident for the tax year

18 This relates to lower-paid employees see 13.31 (Lower-paid employee exemption).
I do not understand the reason for condition A.

19 I have slightly altered the wording of the example for enhanced clarity.

2010-11. He claims²⁰ split-year treatment under ESC A11.

F's RFI is as follows:

6 April to 19 October 2010	£2,200
20 October 2010 to 5 April 2011	£1,300
Total	<u>£3,500</u>

F remits £1,000 to the UK in that year.

At the end of the year his total unremitted foreign income is £2,500.

The HMRC analysis is as follows:

Even though F has claimed split-year treatment for 2010-11, he still has to include any foreign income that arose before he entered the UK.

As F's unremitted foreign income is above the £2k threshold he cannot use the remittance basis under s809D. If he wishes to use the remittance basis he will need to claim under ITA07/s809B, and will lose his personal allowances and the annual exempt amount.

In practice, F (if well advised) would not make a claim for the remittance basis but could save a few pounds of tax by remitting £1,500.01 to the UK instead of £1,000.

The same applies for chargeable gains under ESC D2 and RDRM32130 sets out an example. But in practice it hardly matters.

9.7.2 *Procedure*

HMRC Brief 17/09 provides:

There is a new box on the supplementary "Residence and Remittance Basis etc." pages (SA109) for such individuals to advise HMRC of their use of the remittance basis under section 809D. This ensures they continue to get their Personal Allowances and the Annual Exempt Amount.

This is box 28 in the SA109 form (2011/12). The caption by the box reads: "If your unremitted income and capital gains for 2010-11 is less than £2,000, put 'X' in the box."

20 It would be more accurate to say F "qualifies" for split-year treatment since the concession does not need a claim. But nothing turns on that.

9.7.3 Concession for remittances by sub-£2k taxpayer

HMRC Brief 17/09 provides:

Remittance basis users whose foreign income and gains is less than £2,000

Individuals making use of section 809D are still taxable on any foreign income or gains remitted to the UK. ...

It is recognised that some individuals, in particular those on low income, may make small cash remittances to the UK, out of foreign income or gains, and as a result have to complete a Self Assessment tax return possibly to pay only a small amount of tax. This is particularly the case where foreign tax has already been paid on the income or gains. Where an individual who is making use of section 809D remits less than a total of £500 in cash, which arises from foreign income or gains, into the UK during the tax year, then HMRC will accept that such an individual does not need to make a Self Assessment Tax return simply to pay the tax on those cash remittances. However where such an individual is required to complete a Self Assessment tax return for any other reason, or HMRC serves them with a notice to make a return, then they will need to include those remittances on the return and pay the tax due. This practice will apply for 2008-09 and subsequent years.

This is a concession (the word concession is not used, perhaps because HMRC are not now supposed to issue concessions). A concession which only applies if HMRC chose not to require a SA return is a new development in tax, and setting the limit at £500 is difficult to defend, but the manner of introduction of the concession precluded any possibility of debate on it.

9.7.4 Reform?

HMRC have rejected lobbying to increase the £2k limit:

In particular, the Government will not look further at the following:

Simplification Increasing the £2,000 de minimis limit to align with the income tax personal allowance

Government response The Government considers that this would be likely to have a material Exchequer cost. It would also restore the income tax personal allowance and CGT Annual Exempt Amount (AEA) to some individuals with a significant level of income or capital gains

and the Government does not think that this can be justified.²¹

The paper does not mention that the decision not to increase the limit since 2008 amounts to a reduction in real terms.

9.8 Non-taxpayers: s.809E

Section 809E(1) ITA provides:

This section applies to an individual for a tax year if—

- (a) the individual is UK resident in that year,
- (b) the individual is not domiciled in the UK in that year or is not ordinarily UK resident in that year,
- (c) for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.
- (d) no relevant income or gains are remitted to the UK in that year, and
- (e) either—
 - (i) the individual has been UK resident in not more than 6 of the 9 tax years immediately preceding that year, or
 - (ii) the individual is under 18 throughout that year.

unless the individual gives notice in a return under s.8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

I refer to a person within s.809E as “**a non-taxpayer**”. Thus there are five requirements which must all be met. Requirements (a), (b) and (e) do not need comment.

9.8.1 (*Virtually*) no UK income/gains

The requirement in s.809E(1)(c) is:

for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.

21 HMRC & HMT, “Reform of the taxation of non-domiciled individuals: summary of responses to consultation” (December 2011) para 2.127
www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

Section 809E(2) ITA provides a commonsense definition:

For the purposes of subs.(1)(c) the individual's "UK income and gains" for the tax year are the individual's income and chargeable gains for that year other than what would (if this section applied) be the individual's foreign income and gains for that year.

There is a paltry exemption for £100 "taxed investment income". This term is defined in s.809E(2A) ITA:

For the purposes of subsection (1)(c) "taxed investment income" means UK income or gains consisting of payments within s.946 from which a sum representing income tax has been deducted.

9.8.2 *No relevant income or gains remitted*

The requirement in s.809E(1)(d) is:

(d) no relevant income or gains are remitted to the UK in that year

Section 809E(3) ITA provides the definition:

For the purposes of subs.(1)(d) "relevant" income and gains are—

- (a) what would (if this section applied) be the individual's foreign income and gains for the tax year mentioned in subs.(1), and
- (b) the individual's foreign income and gains for every other tax year for which s.809B or 809D or this section applies to the individual.

Para 85 Sch 7 FA 2008 contains transitional provisions for pre-2008 income and gains:

(1) In s.809E(3)(b) of ITA 2007, the reference to a tax year for which s.809B, 809D or 809E of that Act applies to an individual includes a tax year (not later than the tax year 2007-08) in which the individual—

(a) was UK resident, but

(b) was not domiciled in the UK or was not ordinarily UK resident.

(2) In relation to such a tax year, the reference there to the individual's foreign income and gains includes the individual's relevant foreign income if (and only if)—

- (a) the individual made a claim under s.831 of ITTOIA 2005 for the year, or
- (b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the year.

For completeness: The RDR manual comments on the interaction with ESC A11:

RDRM32140 Application Of Remittance Basis Without Claim Other Cases (ITA07/S809e) [Jun 2010]

...ESC A11 may apply to an individual for the year in which they arrive or leave the UK; it effectively splits the tax year into periods of residence and non-residence and computes liability accordingly. This generally means that foreign income from the period of the tax year where the individual is treated as 'non-resident' is not taxed, although strictly the individual is UK resident for the whole tax year. However, even if this concession is applied, income from the concessionary 'non-residence' period will be included within the definition of relevant income and gains for that year for section 809E purposes.

9.8.3 *What is the purpose of s.809E?*

EN FB 2008 provides:

Individuals entitled to claim the remittance basis who have no UK income or gains, and who don't remit any foreign income or gains, won't have to claim the remittance basis in years they are not liable to the RBC. This avoids them having to complete a self assessment return only so they can claim the remittance basis and then have no tax to pay.

There will not be many non-taxpayers within s.809E – mainly spouses accompanying their partners, children and some students, perhaps.

9.9 Time of foreign domicile

Section 809B(1) ITA requires (in short) that the foreign domiciliary is not domiciled in the UK in the year that the income arises.

It is an interesting question what is the position if a person changes domicile during a year. The 2008 reforms declined the opportunity to address the question, perhaps because that would have required a consideration of the unsatisfactory ESC A11, raising too many difficult questions.

9.10 Remittance basis claim charge

9.10.1 Outline of position from 2012

The remittance consultation paper provides:

2.8 ... the Government proposes to introduce a higher charge of £50,000 for those non-domiciles who claim the remittance basis and have been UK resident in at least 12 of the 14 tax years prior to the year of the claim. It intends that this will take effect from 6 April 2012.

2.9 The £30,000 charge will be retained for those who have been resident in at least seven of the nine years prior to the year of claiming the remittance basis, but fewer than 12 years.

2.10 The £50,000 charge will work in exactly the same way as the current £30,000 charge, namely:

- In each tax year the individual will have a choice whether to pay the charge or to be liable to UK tax on their worldwide income and capital gains. Any decision will depend on the individual's personal circumstances, such as the level of their overseas income and capital gains; 6
- Those who choose to pay the charge will make a claim to the remittance basis on an SA tax return after the end of the relevant tax year;
- Individuals will be able to opt in and out of the remittance basis from year to year. Choosing the arising basis in one year will not preclude claiming the remittance basis in a future year; and
- It will not be payable if the individual is under 18 or if they have unremitted overseas income and capital gains of less than £2,000 in the tax year.²²

22 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.

9.10.2 7 and 12-year residence tests

Section 809H ITA provides:

809H Claim for remittance basis by long-term UK resident: charge

(1) This section applies if—

- (a) s.809B (claim for remittance basis to apply) applies to an individual for a tax year (“the relevant tax year”),
- (b) the individual is aged 18 or over in the relevant tax year, and
- (c) the individual meets the 12-year residence test or the 7-year residence test for the relevant tax year.

(1A) See section 809C(1A) and (1B) for when an individual meets the 12- year residence test or the 7-year residence test for a tax year.

That takes us to s.809C ITA which provides:

(1A) An individual meets the 12-year residence test for a tax year if the individual has been UK resident in at least 12 of the 14 tax years immediately preceding that year.

(1B) An individual meets the 7-year residence test for a tax year if the individual.

(a) does not meet the 12-year residence test for that year, but

(b) has been UK resident in at least 7 of the 9 tax years immediately preceding that year.

I adopt the statutory terminology and refer to individuals who meet the 7 or 12-year residence tests as “**long-term residents**”.

The period of residence might be continuous or broken.

While an individual is under 18:

(1) they are not subject to the remittance basis charge; but

(2) any UK resident years do count for the 7 and 12-year residence tests..

In the year a long-term resident attains 18, the charge is payable in full. The RDR Manual 32230 provides a straightforward example of a case involving a minor.²³

23 32230 Counting years of UK residence - Minors

...

Example (Pranav)

“P was born on 23 October 1991. He came to the UK as a school boarder in August 2001 (tax year 01-02). He is domiciled outside the UK. He has stayed in education

The RDR Manual provides:

32240 Interaction with Extra Statutory Concession (ESC) A11 [June 2010]

... Even if this “split-year” treatment is given, these years [of arrival and departure] count as a full year of residence in determining whether an individual meets the long-term residents rule, that is, whether he has been in the UK for at least 7 out of the 9 tax years immediately preceding the current tax year.

The RDR Manual 32220 offers a straightforward example of a case involving a split year.²⁴

in the UK for every tax year since.

99-00 Not Resident	05-06 Resident
00-01 Not Resident	06-07 Resident
01-02 Resident	07-08 Resident
02-03 Resident	08-09 Resident
03-04 Resident	09-10 Resident
04-05 Resident	

In 08-09 P has foreign income of £300,000 and he claims to use the remittance basis in that year. He is a long-term resident in the UK as he has been UK resident for eight years, but as he is under 18 he may use the remittance basis in 08-09 without paying the remittance basis charge.

In October 2009 (tax year 2009-10) P turns 18. He has foreign income of £400,000. If he wishes to claim the remittance basis for that tax year he will be liable to the remittance basis charge.”

Of course the (implausibly large) income specified is strictly irrelevant to the application of the remittance basis charge: the position is the same whatever is P’s income.

24 32220 Counting years of UK residence (seven out of nine) - Section 809 ITA 2007 [July 2010]

...

“Example (Dominic)

D, a non-dom, is resident in the UK for the tax year 2008-2009.

- *D* came to the UK in May 1999 (99-00 tax year)
- He left to live in Spain in January 2001 (00-01 tax year)
- He returned to the UK on 12 October 2002 (02-03 tax year)
- He left to work in the Republic of Ireland on 29 April 2004 (04-05 tax year)
- He then returned to the UK on 16 May 2006 (06-07 tax year) and has been resident here since.

D is resident in the UK for the current tax year (08-09). He has chargeable overseas earnings of £150,000 in that year, paid into his Spanish bank account and he does not remit anything. For the last nine tax years he has been resident/not resident as follows:

9.10.3 *Nomination of income and gains*

Section 809C ITA provides:

809C Claim for remittance basis by long-term UK resident: nomination of foreign income and gains to which s.809H(2) is to apply

- (1) This section applies to an individual for a tax year if the individual-
 - (a) is aged 18 or over in that year, and
 - (b) meets the 12-year residence test or the 7-year residence test for that year.
- (2) A claim under s.809B by the individual for that year must contain a nomination of the income or chargeable gains of the individual for that year to which s.809H(2) is to apply.

Following the statutory terminology,²⁵ I refer to the income or gains so nominated as “**nominated income/gains**”. Section 809C continues:

- (3) The income or chargeable gains nominated must be part (or all) of the individual’s foreign income and gains for that year.
- (4) The income and chargeable gains nominated must be such that the relevant tax increase does not exceed
 - (a) for an individual who meets the 12-year residence test for that year, £50,000;
 - (b) for an individual who meets the 7-year residence test for that year, £30,000.

Section 809C(5) ITA provides a commonsense definition of “the relevant tax increase”:

-
- | | | | |
|---|--|---|--|
| 1 | 99-00 Resident | 6 | 04-05 Resident (year he went to Ireland) |
| 2 | 00-01 Resident (year he went to Spain) | 7 | 05-06 Non Resident |
| 3 | 01-02 Non Resident | 8 | 06-07 Resident |
| 4 | 02-03 Resident | 9 | 07-08 Resident |
| 5 | 03-04 Resident | | |

D is a long term resident; if he claims the remittance basis in 2008-2009 he will be liable for the remittance basis charge.”

- 25 Section 809H(3) ITA provides: “‘Nominated’ income or chargeable gains means income or chargeable gains nominated under s.809C in the individual’s claim under s.809C for the relevant tax year.” The definition is repeated in s.809I(3) and s.809J(3) ITA. (If a chapter-wide definition had been used the repetition would have been unnecessary.)

“The relevant tax increase” is-

- (a) the total amount of income tax and capital gains tax payable by the individual for that year, minus
- (b) the total amount of income tax and capital gains tax that would be payable by the individual for that year apart from s.809H(2).

EN Amendments to the Remittance Basis Charge explains the reason for the cap in s.809C(4):

This stops an individual from nominating too much income and gains and as a result paying a remittance basis charge of more than £30,000 [now the applicable amount].

The legislation does not say what happens if an individual fails to nominate any income/gains or if they nominate income/gains but the relevant tax increase exceeds the applicable amount. The RDR Manual provides:

32310 Nomination of foreign income and gains - overview [June 2010]

... Any claim that does not include a nominated amount is not valid. ...

32330 Relevant tax increase

The remittance basis charge cannot exceed £30,000 [now the applicable amount]. Any nominations which produce an excessive relevant tax increase may invalidate the claim under section 809B to be taxed on the remittance basis.

If this occurs you should try to contact the taxpayer, or their agent to advise them of their excessive nomination and to assist them to amend their claim to ensure it is valid. To do that the amount of nominated income or gains must be adjusted so that the relevant tax increase equals [the applicable amount].

The following example from the RDR Manual shows how complicated this will be:

32350 Relevant tax increase - Example 2 [July 2010]

...

Relevant tax increase: Example 2 (Lorna)

L, a non domiciled long-term UK resident makes a claim to use the remittance basis in 201X and must pay the £30,000 remittance basis charge (RBC). She is a higher rate taxpayer paying tax at 40%, with UK source employment income of £80,000.

She also has £150,000 of interest (relevant foreign income) from an overseas investment in Country X paid to her.

Because nominated income is taxed on the “arising basis”, a remittance basis user is in the same position as any other UK resident person and is, subject to the ordinary rules that apply in such cases (s.793 ICTA 1988+), entitled to credit against UK tax for certain amounts of overseas tax that is payable on that same income.

Under the domestic law of Country X in which the investment was made, the interest was paid after deduction of 15% withholding tax. The Double Taxation Agreement between the UK and Country X provides that tax on this interest may be retained in the “source” country at the rate of 15%.

L is therefore entitled to a credit, which she takes in the form of foreign tax credit relief (FTCR), against UK tax for the tax withheld in the other country. ...

Foreign tax credit relief calculation – general principles

Ignoring the remittance basis issue for the moment:

L has received foreign interest of £150,000, on which Country X’s tax of £22,500 (15% as provided for in the DT treaty) has been deducted.

L’s income is chargeable to tax at 40%. The UK tax charge is respect of this £150,000 would be £60,000 (40%×£150,000).

If she claims foreign tax credit relief her net liability to UK tax after the foreign tax credit relief will be:

£60,000 minus £22,500 = £37,500

Relevant tax increase including FTCR

Foreign tax credit relief is only due to the extent that the foreign income on which it is given is brought into the UK tax charge. So for remittance basis users, relief for foreign tax paid on foreign income chargeable on the remittance basis is given when that income is remitted.

However for remittance basis charge payers like L, any foreign income which she nominates is chargeable on the arising basis so foreign tax credit relief can be given in relation to that nominated income.

Because the “relevant tax increase” must be £30,000, L will need to nominate £120,000 of her foreign interest if she wishes to create an overall remittance basis charge of £30,000.

• FTCR calculation

Foreign tax that relates to the £120,000 nominated (at 15%)	£18,000
UK tax on £120,000 (at 40%)	£48,000
Net liability to UK tax after the FTCR (£48,000 minus £18,000)	£30,000
	(refer to note 2 below)

• Relevant tax increase calculation

To determine the relevant tax increase we must complete two calculations. The first calculation (a) is of the total amount of L’s income tax and capital gains tax actually payable in the year, as a remittance basis user and RBC payer. The second calculation (b) is the total amount of L’s income tax and capital gains tax that would be payable by L in the year as a remittance basis user, as if no nomination was required and the RBC was not due that is, as if there was no income tax or capital gains tax payable on her nominated foreign income or gains.

The relevant tax increase is the total of calculation (a) minus calculation (b)

	<u>Calculation (a)</u>		<u>Calculation (b)</u>	
Non-savings income				
20% ¹ on	£34,800	= £6,960	£34,800	= £6,960
40% on	£45,200	= £18,080	£45,200	= £18,080
	<u>£80,000</u>	<u>£25,040</u>	<u>£80,000</u>	<u>£25,040</u>
Savings				
40% on	£120,000 ²	= £30,000	Note 4	
Total Income Tax Due	<u>£55,040</u> ³		<u>£25,040</u> ⁴	

- 1 Rates and thresholds used here for the purposes of this example only; use the rates applying in the relevant tax year.
- 2 This is the foreign income that is nominated, and charged to tax on the arising basis in the year. FTCD is given, which has reduced the tax to £30,000.
- 3 As a remittance basis user, L has no personal allowances due.
- 4 L is a remittance basis user so would not be subject to tax on her unremitted foreign income, nor would any FTCD be due.

Relevant Tax Increase is	Total (a)	£55,040
less	Total (b)	<u>£25,040</u>
	Total	<u>£30,000</u>

March 2009 Q&As provides:

Q3: HM Revenue & Customs (HMRC) have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of “tainting” every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?

A: It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the “nominated” account. That

might be the entire account number, or the account “name”, or some other unique identifying feature of the account.

The RDR Manual 32380 provides:

Completing the SA Return - How is this done in practice?

SA109 “Residence, remittance basis etc” is the supplementary page to the SA100 main tax return for remittance basis users to complete under Self Assessment.

There is a box to claim the remittance basis on the SA109 and two boxes where the “amount of nominated income” and the “amount of nominated capital gains” must be entered. The amount nominated can be either income or gains or a combination of the two. The source(s) of the amount nominated is the individual’s personal choice.

When either or both of these boxes are completed the SA109 notes say that details of the nominations are to be shown in the “Any other information” box.

The required information is:

- the precise amounts of income and gains that have been nominated, (this should include the country of origin and the type and source of the income)
- the computation of the gain (if applicable)
- the exchange rates used²⁶
- the calculation of the tax due in relation to the nominated income and gains.

Also if there have been deductions for expenses or losses from either foreign income or foreign gains in arriving at the final taxable amount, full details of the amounts and nature of those expenses or losses must also be provided.

All of this information is required to validate the nomination or nominations that have been made.

9.10.4 *Nominated income/gains charge*

Section 809H(2) ITA provides:

Income tax is charged on nominated income, and capital gains tax is charged on nominated chargeable gains, as if s.809B did not apply to the individual for the relevant tax year (and neither did s.809D).

26 See 52.8 (Nominated income and gains: currency conversion date).

This disappplies the remittance basis, so nominated income and gains are taxed on the arising basis. I refer to this as the “**nominated income/gains charge**”.

EN FB 2008 provides:

14. This charge is in addition to the tax liability for the year in question on any income and gains remitted to the UK, and any UK income or gains taxed on the arising basis. The £30,000 [now the applicable amount] will be paid on nominated income and gains not remitted to the UK in the year. (These income and gains are called “nominated” income and gains because the taxpayer is free to nominate the income and gains not remitted to the UK in the year on which tax of £30,000 is payable. For example, this could be £75,000 of unremitted foreign deposit interest on which UK tax was due at 40 per cent, so leading to an income tax charge of £30,000.)

9.10.5 *Remittance basis deficit charge*

The removal of the remittance basis for nominated income/gains might not yield the desired additional tax for various reasons. The individual might under-nominate, ie, they might not nominate enough income/gains. There is no requirement to nominate enough to give rise to a IT or CGT charge of the applicable amount. Indeed, it is not always possible to know how much that would be. One could nominate just £1, as long as what is nominated is foreign income or gains. HMRC agree. The RDR Manual 32320 provides:

32320 Making a Nomination [June 2010]

Insufficient nomination

Although an individual may choose to make an insufficient nomination (RDRM32360) they must have foreign income and/or foreign chargeable gains from the tax year such that, they can nominate something, even if only £1. This fulfils the mandatory requirement that a nomination **must** be made when making the claim.

Completing the self-assessment return

All claims and nominations are made on the individual’s self assessment tax return. The minimum amount that can be nominated **must** be at least £1 of foreign income or gains for the claim to be valid. Where a claim to the remittance basis is made under s809B but no nomination of either

foreign income or capital gains is made the claim is invalid.²⁷

According to EN Amendments to the Remittance Basis Charge this was done to enhance confidentiality:

7. The legislation provides the option for those who can claim the remittance basis not to disclose anything about their unremitted income or gains as they can make a claim with a nominal £1 amount and do not have to specify what further foreign income or gains remain unremitted.

But it may not be in the interests of the taxpayer to under-nominate, and the confidentiality is illusory because HMRC are likely to make further enquiries.

The removal of the remittance basis for nominated income/gains might not yield the desired additional tax where the individual has some tax reliefs (eg loss relief, interest relief, DTRs, etc).

Section 809H(4) ITA goes on to ensure that HMRC will receive their desired amount of tax:

If the relevant tax increase would otherwise be less than the applicable amount,²⁸ subsection (2) has effect as if—

- (a) in addition to the income and gains actually nominated under s.809C in the individual's claim under s.809B for the relevant tax year, an amount of income had been nominated so as to make the

27 Similarly March 2009 Q&As provides:

“Q7: The question has arisen whether less than £1 (ie pence) can be nominated income. Given current interest rates there is concern that accounts specifically set up to generate nominated income may not generate £1 before 6 April 2009. The concern expressed is that because pence are rounded down on tax returns, it might be your view that there is no nominated income?

A: The minimum nomination of income or gains required to calculate the relevant tax increase is £1. This is the minimum figure to be declared on the relevant supplementary page of the Tax Return.”

But where is the statutory authority for HMRC to disregard figures under £1?

28 Section 809H(5B) provides:

“The applicable amount” is—

- (a) if the individual meets the 12-year residence test for the relevant tax year, £50,000;
- (b) if the individual meets the 7-year residence test for the relevant tax year, £30,000.”

- relevant tax increase²⁹ equal to the applicable amount, and
(b) the individual's income for that year were such that such a nomination could have been made (if that is not the case).

I refer to s.809H(4) as the “**deficit charge**”. The deficit charge is a tax on deemed income (deemed nominated income) and not on any actual income of the taxpayer (if indeed the taxpayer has other income). Section 809H(6) ITA makes this clear (if necessary):

Nothing in subs.(4) affects what is regarded, for the purposes of s.809I or 809J, as nominated under s.809C.

I use the term “**remittance basis claim charge**” to mean the two distinct (albeit related) charges:

- (1) the nominated income/gains charge, under s.809H(2); and
- (2) the deficit charge, under s.809H(4).

It might be more accurate to refer to remittance basis claim *charges* (in the plural). However for many purposes it does not matter that there may be two charges rather than one, (especially since in practice the second will not often arise) and it is convenient to have one label for them both.

9.10.6 *Interaction with Gift Aid*

Section 809H(5A) ITA provides:

The references to income tax in subsection (5) do not include income tax under s.424 (gift aid).

The RDR Manual provides:

29 Section 809H(5)(5B) ITA repeats the definition of “the relevant tax increase” from s.809C(5) (5A):

“‘The relevant tax increase’ is—

(a) the total amount of income tax and capital gains tax payable by the individual for the relevant tax year, minus

(b) the total amount of income tax and capital gains tax that would be payable by the individual for the relevant tax year apart from subsection (2).

(5A) The references to income tax in subsection (5) do not include income tax under s.424 (gift aid).”

If there had been a chapter-wide definition the repetition would have been unnecessary.

32450. Charitable Donations and Gift Aid [June 2010]

Chapter 2 of Part 8 ITA 2007 provides relief for gifts of money to charities by individuals, known as Gift Aid. Section 414(2)(a) treats the Gift Aid donation as if it had been made after deduction of basic rate income tax. Basically, the rules require that the donor must pay at least as much UK income tax and capital gains tax in the tax year as the amount that is repayable to the charity.

Section 424 ITA 2007 ensures that, if the donor has not paid enough UK income tax and capital gains tax to 'frank' the gift aid donations in a tax year, a further amount of income tax is charged to make up the shortfall.

The Remittance Basis Charge

Tax paid as part of the Remittance Basis Charge can be used to frank Gift Aid donations, thereby reducing or extinguishing any tax 'shortfall' chargeable under section 424. The £30,000 remittance basis charge is 'income tax charged' or 'capital gains tax charged' on nominated income/gains.

Section 809C(5A) ITA 2007 and Section 809H(5A) ITA 2007 provide that for the purpose of computing the relevant tax increase any amount of income tax must be disregarded in calculating and income tax charged to make up any 'shortfall' in relation to gift aid donations under Section 424 ITA 2007.

The effect of this is that the appropriate amount of income is always nominated to produce exactly the required £30,000 Remittance Basis Charge. The £30,000 is an amount of tax charged on the nominated income/gains and as such counts as part of the income tax/capital gains tax taken into account in Section 424(2) ITA 2007 - Amount C.

Thus it is available to frank Gift Aid donations.

For this topic, see Kessler and Brown, *Taxation of Charities and Non-profit Organisations* (10th edition, 2011), para 16.41 (Donor pays insufficient tax) (online version www.taxationofcharities.co.uk).

9.10.7 How much to nominate?

It is important not to remit nominated funds to the UK. From that point of view it is convenient to under-nominate, ie nominate a nominal £1 only.

On the other hand, taxpayers who want to offset the remittance basis charge against foreign tax will want to nominate income or gains on which the foreign tax is at least equal to the applicable amount, or as close to the figure as possible; that requires a full nomination and some care in the choice of income/gains which are nominated.

9.10.8 *Remittance basis claim charge in cases of doubt over residence*

A person may be unsure whether or not they are UK resident in a year (residence is often unknowable) but know that they would be a long-term resident if actually UK resident in that year. That person may if appropriate make a remittance basis claim in that year, for the avoidance of doubt, and argue the residence position at leisure; if they are eventually held to be UK resident the remittance basis claim charge is due, but if non-resident the sum is not due. Nothing is lost by making the claim.³⁰ Section 809B does not apply unless the individual meets the conditions of s.809B(1)(a) and (b) in the year.

Alternatively a person may know that they are UK resident in a year but not know if they are a long-term UK resident in that year (because they are unsure whether or not they were resident in one or more earlier years). That person should make a remittance basis claim but not nominate any income or gains. The claim is valid if they are not long-term UK resident. The claim is invalid if they are long-term UK resident, so the remittance basis claim charge is not due (unless they proceed to make a new election and nomination).

On the other hand a remittance basis claim is effective (and the remittance basis charge payable) even if the individual has less than £2k unremitted income and gains, and so would qualify as a sub-£2k taxpayer. That would be an expensive box to tick in error!

9.10.9 *Minimising the remittance basis claim charge*

Basic tax planning for spouses will be to arrange that income and gains accrue only to one of them, so that only one has to pay the remittance basis claim charge.

Basic planning for individuals who do not wish to pay the remittance basis claim charge every year is to time disposals and accruals so far as possible that foreign income and gains accrue before the 8th year of residence, and only once every few years subsequently (so a claim is only needed once every few years).

³⁰ Similar points arise if a person is unsure about their domicile in a year, but in practice that would be less common because domicile (unlike residence) is generally ascertainable.

9.10.10 *Remittance basis claim charge: credit against foreign tax*

EN FB 2008 provides:

17. As the RBC consists of income tax or CGT paid on the arising basis ... the tax should be recognised as tax (on income or capital gains, as the case may be) for the purposes of our double taxation agreements.

The proposal in the Draft Clauses published January 2008 was for a simple charge of a fixed amount. This would not have qualified as a credit against foreign tax because it was not a tax on income or gains. HMRC presumably agreed, as the provisions were then recast in order that:

- (1) The provisions took the form (so far as possible) of a charge on income or gains but
- (2) the provisions had the effect (so far as possible) of a fixed charge.³¹

Article 24(1) of the UK/US DTA provides:

In accordance with the provisions and subject to the limitations of the law of the United States (as it may be amended from time to time without changing the general principle hereof), the United States shall allow to a resident or citizen of the United States as a credit against the United States tax on income

- (a) the income tax paid or accrued to the UK by or on behalf of such citizen or resident ...

It is suggested that the *nominated income/gains charge* can in principle be set against foreign tax since it is an income tax or CGT. However the remittance basis *deficit* charge is not a charge on actual income, and cannot be set against foreign tax. HMRC agree. EN Amendments to the Remittance Basis Charge provides:

16. The individual claiming the remittance basis might decide to nominate only £50,000 of bank interest under s.[809C(2)] and pay £20,000 of the £30,000 under s.[809H(2)] (assuming higher rate tax is due on all the £50,000). Section [809H(4)] would then apply with the effect that further income of £25,000 is treated as nominated to bring a further £10,000 of income tax into charge. However if the individual intended claiming credit for all or part of the £30,000 under a DTA then

31 See too 9.10.12 (Remittance basis claim charge in year of arrival and departure).

DTA relief will only be due on the income or gains actually nominated under s.[809C(2)] – £50,000 of income and £20,000 of income tax in this example. The income tax paid on income treated as nominated under s.[809H(4)] = £25,000 of income and £10,000 of income tax in this example, will not qualify for relief under DTAs as it is not tax on specific nominated income.

It follows that a careful choice of what income or gains to nominate is important, because (if foreign tax allows credit for the UK tax) that can make up to £30k or £50k difference to the foreign tax liability.

The RBC might have been regarded as a fixed levy, merely disguised as an income tax by sleight of hand, but in America, the IRS have after some delay³² accepted the HMRC view. The question is of course one for foreign law, not UK law. The US ruling made August 2011 provides:

Rev. Rul. 2011-19

ISSUE

Whether a credit is allowable under section 901 of the Internal Revenue Code for the Remittance Basis Charge (RBC) of £30,000.³³

[The ruling outlined the UK tax rules and continues]

LAW AND ANALYSIS

Section 901 generally allows a credit for the amount of any income, war profits and excess profits tax (collectively, an income tax) paid or accrued during the taxable year to any foreign country or to any possession of the United States. A foreign levy is an income tax if and only if (i) it is a tax and (ii) the predominant character of that tax is that of an income tax in the US sense. §1.901-2(a)(1).

A. Single Levy or Separate Levies

Each levy must be analysed separately to determine if it is an income tax under section 901. §1.901-2(d)(1). For purposes of section 901, whether a single levy or separate levies are imposed by a foreign country depends on US principles and not on whether foreign law imposes the levy or levies in a single or separate statutes. Where the base of a levy is different in kind, and not merely in degree, for different classes of persons subject to the levy, the levy is considered for purposes of section 901 to impose separate levies for such classes of persons. For

32 One would like to know what discussions took place behind the publication of this statement. Perhaps in 2041 the relevant files will be made public.

For HMRC's opening shot in this debate see BN 107 accessible www.hmrc.gov.uk/budget2008/bn107.pdf.

33 Author's note: The increase in the remittance basis charge in 2012 will not affect the reasoning.

example, regardless of whether they are contained in a single or separate foreign statutes, a foreign levy identical to the tax imposed under section 871(b) on a US nonresident alien individual's income that is effectively connected with the conduct of a US trade or business is a separate levy from a foreign levy identical to the tax imposed by section 1 on the income of a US citizen or resident, as the tax on nonresidents has a more limited scope and therefore is different in kind from the tax on the worldwide income of US citizens and residents.

Where foreign law imposes a levy that is the sum of two or more separately computed amounts, and each such amount is computed by reference to a separate base, separate levies are considered, for purposes of section 901, to be imposed. Amounts are not separately computed if they are computed separately merely for purposes of a preliminary computation and are then combined as a single base. §1.901-2(d)(1). For example, where excess deductible expenses allocated to one type of income are applied to reduce other types of income, a single levy exists, since despite a separate preliminary computation the bases are combined before computing the tax due. See §1.901-2(d)(3), Examples (3), (4), and (5).

1. The Remittance Basis and the Arising Basis of Taxation Are Separate Levies

Under both the arising basis and the remittance basis of taxation, a non-domiciliary is subject to tax on UK-source and non-UK-source income and gains. However, under the arising basis, a non-domiciliary is subject to tax on worldwide income and gains that arise or accrue in a particular taxable year; while under the remittance basis, a non-domiciliary is subject to tax only on UK-source income and gains and on non-UK-source income or gains that are remitted in a particular taxable year, whether the non-UK-source income or gains arise or accrue in the year remitted or in an earlier year. Thus, the bases of these levies are different in kind, and not merely in degree; therefore, the arising basis and remittance basis of taxation are considered for purposes of section 901 to impose separate levies.

2. The RBC, in Combination with the Remittance Basis of Taxation, is a Single Levy that is a Separate Levy

All non-domiciliaries who elect the remittance basis of taxation are subject to tax on their UK-source and remitted non-UK-source income and gains. In addition, long-term non-domiciliaries must pay the RBC on nominated but unremitted non-UK-source income and gains (and, if the amount nominated generates a tax charge of less than £30,000, on income or gains realized but not nominated and on imputed income such that the tax charge equals £30,000). Losses and deductions allocated to UK-source income or gains, remitted non-UK-source income or gains, or nominated but unremitted non-UK-source income or gains may offset income or gains in another category in determining the amount of the long-term non-domiciliary's taxable income. Therefore, under §1.901-2(d)(1), despite a separate preliminary computation, the long-term non-domiciliary's UK-source income or gains, remitted non-UK-source income or gains, and

unremitted non-UK-source income or gains giving rise to the RBC are combined in determining the long-term non-domiciliary's taxable income; therefore, the tax imposed on the sum of the long-term non-domiciliary's three separately computed amounts of income constitute a single levy (the Long-Term Non-Domiciliary (LTND) Levy).

A. The LTND Levy Is a Tax in the US Sense

A foreign levy is an income tax if and only if it is a tax and the predominant character of that tax is that of an income tax in the US sense. §1.901-2(a)(1). A foreign levy is a tax if it requires a compulsory payment pursuant to the authority of a foreign country to levy taxes. §1.901-2(a)(2)(i). The LTND Levy is a tax because it is required to be paid pursuant to the authority of the government of the UK to levy taxes.

A. The Predominant Character of the LTND Levy Is that of an Income Tax in the US Sense

The predominant character of a foreign tax is that of an income tax in the US sense if the tax is likely to reach net gain in the normal circumstances in which it applies, and liability for the tax is not dependent, by its terms or otherwise, on the availability of a credit for the tax against income tax liability to another country. §1.9012(a)(3). Liability for the LTND Levy is not dependent on the availability of a credit for the LTND Levy against income tax liability to another country. Thus, whether the LTND Levy has the predominant character of an income tax depends on whether it is likely to reach net gain in the normal circumstances in which it applies. A foreign tax is likely to reach net gain in the normal circumstances in which it applies if and only if the tax, judged on the basis of its predominant character, satisfies each of the realization, gross receipts, and net income requirements set forth in §1.9012(b)(2), (b)(3), and (b)(4), respectively.

1. Realization

A foreign tax satisfies the realization requirement if, judged on the basis of its predominant character, it is imposed upon or subsequent to the occurrence of events that would result in the realization of income under the income tax provisions of the Code. §1.901-2(b)(2)(i)(A). A foreign tax that, judged on the basis of its predominant character, is imposed upon the occurrence of realization or pre-realization events described in §1.901-2(b)(2)(i) satisfies the realization requirement even if it is also imposed in some situations upon the occurrence of events not described in that paragraph. For example, a foreign tax that, judged on the basis of its predominant character, is imposed upon the occurrence of realization events satisfies the realization requirement even though the base of that tax also includes imputed rental income from a personal residence used by the owner. §1.901-2(b)(2)(i).

The UK-source and remitted non-UK-source income and gains of a long-term non-domiciliary electing the remittance basis of taxation generally are computed on the basis of amounts that satisfy the realization requirement. In addition, the

income or gains nominated for purposes of the RBC must be part (or all) of the non-UK-source income and gains arising or accruing in that taxable year. Income tax is charged on nominated income, and capital gains tax is charged on nominated gains, as if the arising basis applied for the relevant taxable year. In other words, the nominated income and gains are subject to tax, even though they have not been remitted in the taxable year. Thus, the RBC is imposed on nominated income or nominated gains that have been realized or accrued in the taxable year.

If the long-term non-domiciliary realizes or accrues, but fails to nominate, sufficient income or gains, with the result that the tax charge on nominated income would be less than £30,000, an amount of income or gains is deemed to be nominated so as to make the tax charge equal £30,000. Thus, income or gains that have been realized or accrued but not nominated will be subject to the RBC. If a long-term non-domiciliary elects the remittance basis but does not have sufficient realized or accrued income or gains to make the tax charge equal £30,000, the long-term non-domiciliary is deemed to have sufficient realized or accrued income or gains and to have nominated such imputed income or gains to make the tax charge equal £30,000.

Section 1.901-2(b)(2)(i) states that, as provided in §1.901-2(a)(1), a tax either is or is not an income tax, in its entirety, for all persons subject to the tax; therefore, a foreign tax on a base that includes imputed rental income will satisfy the realization requirement even though some persons subject to the tax will on some occasions not be subject to the tax except with respect to such imputed income. However, a foreign tax based only or predominantly on such imputed income would not satisfy the realization requirement. Although it is possible for a long-term non-domiciliary to elect the remittance basis without having sufficient non-UK-source income or gains to support a £30,000 tax charge, in which case the base of the tax would include imputed income or gains, it is highly unlikely that substantial numbers of long-term non-domiciliaries in this situation would elect to be taxed on the remittance basis. Accordingly, it is reasonable to conclude that the RBC is not based only or predominantly on such imputed income or gains. The RBC in general is imposed on realized income or gains, whether nominated by the long-term non-domiciliary or considered by the UK statute to have been nominated. Thus, judged on its predominant character, the LTND Levy meets the realization test.

1. Gross Receipts

A foreign tax satisfies the gross receipts requirement if, judged on the basis of its predominant character, it is imposed on the basis of gross receipts or gross receipts computed under a method that is likely to produce an amount that is not greater than fair market value. §1.901-2(b)(3)(i). A foreign tax that, judged on the basis of its predominant character, is imposed on the basis of amounts described in §1.9012(b)(3)(i) satisfies the gross receipts requirement even if it is also

imposed on the basis of some amounts not described in that paragraph. As is the case with income and gains that are taxed under either the arising basis or the remittance basis, nominated income and gains subject to the RBC generally are based on gross receipts. Therefore, the LTND Levy meets the gross receipts test.

1. Net Income

A foreign tax satisfies the net income requirement if, judged on the basis of its predominant character, the base of the tax is computed by reducing gross receipts to permit recovery of the significant costs and expenses (including significant capital expenditures) attributable, under reasonable principles, to such gross receipts; or recovery of such significant costs and expenses computed under a method that is likely to produce an amount that approximates, or is greater than, recovery of such significant costs and expenses. §1.901-2(b)(4)(i). Since the LTND Levy is imposed on UK-source income and gains, remitted non-UK-source income and gains, and nominated but unremitted non-UK-source income and gains, all of which consist of gross receipts less costs and expenses, the LTND Levy satisfies the net income requirement.

1. Conclusion

Because the LTND Levy is likely to reach net gain in the normal circumstances in which it applies, it has the predominant character of an income tax in the US sense.

HOLDING

Because the LTND Levy is a tax (within the meaning of §1.901-2(a)(2)), and its predominant character is that of an income tax in the US sense, the LTND Levy, including the Remittance Basis Charge (RBC) of £30,000, is an income tax for which a credit is allowable under section 901. However, a credit for the LTND Levy will be available only if the other legal requirements for obtaining a foreign tax credit are satisfied. For example, an amount paid is treated as a compulsory payment of income tax only to the extent the taxpayer applies the substantive and procedural provisions of foreign law, including elective provisions such as those available under UK law relating to the LTND Levy, in such a way as to reduce, over time, the taxpayer's reasonably expected liability under foreign law for income tax. §1.901-2(e)(5).

Taxpayers generally may rely upon revenue rulings to determine the tax treatment of their own transactions and need not request a ruling that would apply the principles of a published revenue ruling to the facts of their own particular cases. However, because each revenue ruling represents the conclusion of the Internal Revenue Service (IRS) as to the application of the law to the specific facts involved, taxpayers, IRS personnel, and others concerned are cautioned against reaching the same conclusion in other cases unless those cases present facts and circumstances that are substantially the same as those in the revenue ruling. §601.601(d)(2)(v)(e). Accordingly, because the provisions of UK law described in this revenue ruling are facts on which this revenue ruling bases its holding, a

taxpayer may not rely on the revenue ruling if the relevant provisions have been amended in any material respect, and the taxpayer is responsible for determining whether any such modification has occurred.³⁴

The US ruling concludes with a paragraph which one would not find in the UK:

DRAFTING INFORMATION

The principal author of this revenue ruling is Teresa Burrridge Hughes of the Office of Associate Chief Counsel (International). For further information regarding this revenue ruling, contact Ms. Hughes at (202) 622-3850 (not a toll-free call).

What an good thing it would be if in the UK HMRC statements and regulations similarly identified a principal author who would take responsibility - both credit for the good and blame for mistakes.³⁵

9.10.11 *Individual treaty non-resident*

The RDR Manual provides:

RDRM32250 Dual residents - treaty non-resident [July 2010]

It is possible for individuals to be resident both in the UK and in another country or countries in a tax year. In such a case we look to the provisions of existing Double Taxation Agreements (DTAs) to determine in which country the individual is resident for treaty purposes. So a person may be resident in the UK under UK law, but regarded as ‘treaty resident’ elsewhere and consequently treated for tax purposes as ‘not resident’ in the UK.

An individual who is, under the terms of a DTA, resident in the other country or territory but is also a long-term resident RDRM32200 in the UK (that is someone who is resident in the UK for more than seven out of the previous nine tax years) and claims the remittance basis is, if their un-remitted foreign income and gains is £2,000 or more, liable to the £30,000 remittance basis charge.

³⁴ www.legalbitstream.com.

³⁵ Contrast the rule in the FA 2009 that a senior accounting officer of large companies must take a personal responsibility for the company’s tax returns.

It is considered that DTA relief is in principle available against the nominated income/gains charge, but not against the remittance basis deficit charge. The effect of claiming DTA relief against nominated income or gains is to reduce the remittance basis claim charge on the nominated income or gains, but to increase the deficit charge by the same amount.

This certainly defeats the spirit of any DTA. It may also breach the DTA itself. But the intention of Parliament is clear, and the doctrine of parliamentary sovereignty allows Parliament to breach DTAs.³⁶ How our treaty partners will react to this will be interesting to see.

The RDR Manual continues:

32250 Dual residents - treaty non-resident [July 2010]

...

In determining the number of years in which an individual has been resident in the UK for the purposes of the long-term resident provisions, you count all years where the individual is resident in the UK under UK domestic law even if the individual was treaty resident in another territory in some or all of those years.

This is correct.³⁷ The RDR Manual continues with some tax planning advice:

In most cases, an individual resident both in the UK and in another country and who under the Double Taxation Agreement with the other country is treated as resident in that other country (for the purpose of applying the provisions of the DTA) will be chargeable to tax in the other country on income and gains that originate in that other country and not in the UK. The treatment of any income and gains that originate in third countries (not the UK or the country of treaty residence) will depend upon the terms of the DTA between the UK and the country of residence.

Where, exceptionally, an individual is chargeable to tax in the UK on such income or gains, they will need to consider whether a claim for the remittance basis of taxation is in their best interests or if, instead, they should pay tax on the arising basis and in the usual way, claim a credit for the tax charged in the other territory.

36 See *Padmore v IRC (No.2)* [2000] STC (SCD) 356.

37 See 5.2 (Relationship between treaty-residence and domestic-law residence; dual residence).

9.10.12 *Remittance basis claim charge in year of arrival and departure*³⁸

The RDR Manual provides:

32240 Interaction with Extra Statutory Concession (ESC) A11 [June 2010]

... Long-term residents who claim the remittance basis under ITA07/s809B are subject to the remittance basis charge of £30,000. This charge is payable in full if the remittance basis is claimed, even in years in which the individual arrives in or departs from the UK part the way through the year, and even if ESC A11 is applied.

In the absence of this guidance one would have expected ESC A11 and D2 to apply, so that if (for instance) an individual nominated gains accruing after their departure, they would be exempt under ESC D2. It is not constitutionally satisfactory that a relief formally granted by concession should be restricted by informal HMRC guidance: the correct course would have been to revise the text of the concession. But in practice nothing is likely to turn on that.

More fundamentally, what is the reason why the concessions do not apply in this case? If the remittance basis claim charge is a tax on the nominated income or gains, they logically should apply. The reason is that the charge is intended only to take the form of a tax on the nominated income or gains, and it is intended to have the effect of a fixed charge.

9.10.13 *Administration*

The RDR Manual provides:

32210 Long-term residents and the remittance basis charge - overview [June 2010]

... The remittance basis charge is both payable and collected through the SA regime, and an SA tax return must be filed. The SA109 Residence, remittance basis etc is the supplementary return which should be completed and filed for this purpose.

So a long-term resident who wishes to claim the remittance basis will need

³⁸ For the distinct issue of the interaction of the split-year concessions and the definition of “long-term UK resident” see 9.10.2 (“Long-term UK resident”).

to file an SA tax return in order to pay the remittance basis charge.

Of course the charge could not be collected through PAYE. For one thing, the charge might be a charge to CGT and even if it is income tax it need not be a charge on employment income. Also the claim on which the charge depends will be made in the tax return some time after PAYE is due.

HMRC Brief 17/09 provides:

The rules for nominating income and gains upon which the £30,000 is paid, and the rules for identifying what is taxed if those nominated income or gains are later remitted to the UK, can be complex. To help ensure individuals who pay the £30,000 get the right level of customer support [!] from HMRC, we have decided that most individuals who pay the £30,000, or have paid it in the past, will have their tax affairs dealt with in one HMRC office from 2009-10. This will be the CAR Residency office in Castle Meadow, Nottingham.

Customers who are sent a self assessment return by a different office should make the return to the office issuing that return. Once the return has been received by HMRC we will arrange for the individual's tax records to be transferred to the CAR Residency office in Nottingham and advise the individual and any agent, accordingly. Until such time as individuals or their agents receive such a notification they should continue to deal with their current tax office.

9.10.14 *Interaction with payments of IT on account*

The RDR Manual provides:

32390 Payments on account - interaction with the remittance basis charge (RBC) [June 2010]

The remittance basis charge may consist of either income tax or capital gains tax, or a mixture of the two ...

To the extent that the remittance basis charge consists of income tax, the payment on account position for those paying the charge is the same as that for any other SA taxpayer. This means their payments on account are based their income tax liability for the previous year (TMA1970/s59A(1)).

The relevant SA109 "*Residence, remittance basis etc*" supplementary pages to the SA tax return must be completed to both claim the remittance basis and nominate income or gains and pay the remittance basis charge.

Effect and treatment of income

If paying part or all of the remittance basis charge in respect of nominated income, then income tax will be due. The amount which has been nominated from income and produced income tax will need to be taken into account and included in the overall calculation of payments on account for the following year.

If an insufficient nomination is made to produce the remittance basis charge of £30,000 (ITA07/s809H(4)) the additional amount treated as nominated will always produce income tax. This also has a bearing on the payments on account position, even though the additional nominated amount is from an unidentified and unspecified amount of income. The additional amount nominated from income will automatically produce income tax that will become part of the individual's payment on account calculation for the following year.

Effect and treatment of capital gains

Capital gains tax is never included in computing payments on account, so any of the remittance basis charge that is constituted of capital gains tax will not form any part of the following year's payments on account.

Example (Ricardo)

R, a non-domiciled (ND) long-term resident has an income tax liability of £200,000 for tax year 2007-08. Subsequently he makes payments of £100,000 on 31 January 2009 and on 31 July 2009 on account of his liability for 2008-09.

His tax liability for 2008-09 is £250,000, which includes for the first time the £30,000 remittance basis charge. The remaining £220,000 is income tax on UK sources. R nominated only £21,000 of his foreign income which led to a charge of £8,400 income tax; he also nominated £120,000 foreign chargeable gains which led to a capital gains tax of charge £21,600. Together these amounts constitute his £30,000 remittance basis charge.

R's payments on account for 2009-10 will be calculated using the £220,000 income tax paid on UK income sources in 2008-09, plus the £8,400 income tax element of the remittance basis charge. This means that he will make payments on account of £114,200 on 31 January 2010 and on 31 July 2010 on account of liability for 2009-10. ...

32400 Payments on account – nominations involving chargeable gains [June 2010]

Capital gains tax is not included in computing payments on account, so any of the remittance basis charge (RBC) that is constituted of capital gains tax will not form any part of the following year's payments on account.

There is an additional box to complete on the SA109, if a nomination of capital gains is made in order to pay all or part of the RBC.

This box is called "Adjustments to payments on account" and must be completed if any nomination of capital gains is made. That is because capital gains tax is excluded from the computation of payments on account, and is simply payable as part of the balancing payment on 31 January following the tax year.

This box is not completed if a nomination of income only has been made, as any amount nominated from income will be taken into account in computing the overall payments on account liability for the following year.

The amount entered in the "Adjustment to payments on account" box on the SA109 is required in order for the payments on account to be calculated correctly for subsequent years:

- where a taxpayer is calculating their liability to tax, the amount for capital gains entered in the box to adjust payments on account, should be excluded in their calculation of payments on account
- if the tax calculation summary page is used the first payment on account for

the following year will not include any part of the amount entered for capital gains in the adjustment to payments on account box.

Example involving an amount of capital gains in the “Adjustment to payments on account” box:

R, who pays tax at a 40% rate decides to nominate both income and capital gains to pay the remittance basis charge.

He nominates as follows:

£21,000 of relevant foreign income	@40%	£8,400
£120,000 of foreign chargeable gains	@18%	<u>£21,600</u>
		<u>£30,000</u>

The amount of £21,600 for capital gains will be entered in the “Adjustment to payments on account” box as this amount will be excluded in calculating payments on account for the following year. Only the £8,400 tax that is chargeable on nominated income is taken into account when calculating the amount due as payments on account.

If the entire amount nominated to pay the RBC comes from capital gains then it will not be included in the calculation for payments of account. In this case the full amount of nominated gains will be entered in the “Adjustment to payments on account” box.

32410 Payments on account - first-year of paying RBC [June 2010]

The remittance basis charge is only payable from tax years 2008-09 onwards by long-term residents making a claim to use the remittance basis.

For example, if a remittance basis claim is made in 2008-09 and the remittance basis charge is due, then the first year that any payments on account can be considered in relation to the remittance basis charge is 2009-10 unless there is a claim to reduce ...

The fact that their tax liability for 2008-09 will be increased for those paying the remittance basis charge has no effect on the payments on account position for 2008-09 (unless there is a claim to reduce them) but, to the extent that the remittance basis charge is income tax, it will be taken into account when calculating payments on account for 2009-10.

The remittance basis charge for 2008-09 is not due for payment until 31 January 2010 when it can be paid as part of any balancing payment for the year

The same principle applies to the payment on account position in relation to the remittance basis charge for any first year that a claim to the remittance basis is made, and the remittance basis charge is due. Payments on account will not generally be affected until after the first year in which they pay the remittance basis charge (TMA70/s59A(2)).

32420 Payments on account: no remittance basis charge due in following year [June 2010]

When the remittance basis of taxation is **not** claimed in a year following one where the remittance basis has been claimed and the remittance basis charge was paid, the amount of income used to pay part or all of the remittance basis charge may be excluded from the calculations of payment on account.

To allow this to happen, a claim to reduce payments on account may be made on form SA 303. Further information on the rules and the time-limits for making a

claim to adjust payments on account can be found in the Self Assessment Manual under SAM1110.

32430 Claim to reduce Payments on Account (PoA) [June 2010]

The payment on account (PoA) position in relation to the remittance basis charge will be affected by any claims to reduce payments on account.

Where the RBC is paid in the previous year on nominated income, the amount feeds through to the individual's payments on account (PoA) for the next year, unless the individual makes a claim to reduce their PoAs on the grounds that their income tax liability for that year will be less than the sum of the two PoAs. For example this could be because they will not claim the remittance basis for the following year. If they subsequently do claim the remittance basis and pay the remittance basis charge in the following year and the income tax due for that year exceeds the sum of the PoAs made we will charge interest on the reduction in the PoA.

This is shown in the example below:

Stage 1

The return shows liability to income tax, which includes the RBC, partly or fully paid in respect of nominated income. The payments on account due on 31 January and 31 July are half of the relevant amount of income tax (TMA70/s59A).

For example, Marie-Clare's 2008-09 income tax liability is £55,000, of which £25,000 related to tax on UK source income, and the remainder is the £30,000 RBC (all in respect of nominated foreign income). Nothing is taxed at source. Her payments on account for 2009-10, payable on 31 January 2010 and 31 July 2010 will each be £27,500.

Stage 2

If the individual does not intend to use the remittance basis for the following year, and so they will not be subject to the remittance basis charge, they can claim to reduce the PoAs.

In the Marie-Clare example, if she does not think she will claim the remittance basis and so will not need to pay the remittance basis charge for 2009-10 she could reduce her payments on account for 2009-10 to £12,500 each, that is 50% of her 2008-09 income tax liability of £25,000 (if the remittance basis charge is excluded). She will of course still have to consider her other income sources and overall expected income tax liability for the year in making this decision.

Stage 3

If the individual subsequently decides to claim the remittance basis and to pay the £30,000 remittance basis charge and a claim to reduce payments on account has been made which resulted in insufficient PoAs being made, then interest will be charged from the due date for the payments on account until a claim to increase payments on account is made or payment is made for the year is paid to stop interest accruing (TMA70/s86).

In the Marie-Clare example, she has claimed to reduce her payments on account to omit the remittance basis charge, so she only makes payments on account of £25,000 (two lots of £12,500). When she files her 2009-10 self-assessment return her UK income has remained, as expected, at £25,000. However she now decides to claim the remittance basis and so she has to pay the remittance basis charge. As she has erroneously claimed to reduce her payments on account in the year, she

will be charged interest on the payments that she should have made, that is, on £15,000 from 31 January 2010 and £15,000 from 31 July 2010 until the date these amounts are paid.

See Self-Assessment Manual – Legal Framework SALF303 for further information on claims to reduce payments on account.

Example 1 (Eva)

- E claimed the remittance basis and paid the remittance basis charge in 2008-09, and her income tax liability produces two payments on account for 2009-10 of £120,000 each.
- E has decided that she will not be claiming the remittance basis in 2009-10 so will not pay the remittance basis charge. E makes a claim to reduce the amount due on account of her tax liability to £200,000 due to a drop in income and because she will not pay the remittance basis charge in 2009-10. When E files her 2009-10 return in September 2010 it shows that the tax due on income is £200,000, but these are provisional figures as E is awaiting some details from her foreign bankers in relation to some foreign transactions.
- The two £100,000 payments on account appear “correct” at this stage. In November 2010 E receives the information from her foreign bankers and decides to amend her return and to claim the remittance basis. She nominates some foreign income and has to pay the remittance basis charge of £30,000, all constituting income tax, bringing her total liability to £230,000.
- E will be charged interest on the £30,000 reduction in her payments on account on the grounds that E should not have reduced them.

Example 2 (Vali)

- V had no foreign income or gains arising in 2008-09, so he did not claim the remittance basis and so he did not need to pay a remittance basis charge in 2008-09.
- V’s income tax liability for 2008-09 produces two payments on account of £200,000 for 2009-10. No claim is made to reduce the payments on accounts.
- When V begins to prepare his 2009-10 return he has a liability of £420,000 income tax on UK sources, so his £400,000 payments on account were correct, based on Vali’s previous year’s income tax liability.
- V has foreign income arising in 2009-10 and he decides to claim the remittance basis in his 2009-10 return. As a long-term but non-domiciled resident V has to pay the remittance basis charge of £30,000 bringing his total liability to £450,000. Interest will not be charged on the additional £50,000 tax due, as long as this is paid by the proper due date.³⁹

9.10.15 Interaction with Scots rates of tax (from 2016)

HMRC say:

Long-term UK residents who are not domiciled here can pay an annual

³⁹ See too March 2009 Q&As Q18.

charge to be taxed under the remittance basis (currently £30,000). This will not be affected by the introduction of the Scottish rate of income tax. Payments of the charge due from Scottish taxpayers will continue to be paid direct to the UK Exchequer.⁴⁰

9.10.16 *Commentary*

The rules set out in this section can only be described as bizarre. Their purpose is to ensure the deduction of the RBC for foreign (in particular, US) tax. HMRC openly acknowledge this:

2.99 The Government sees no case for more fundamental simplification of the nominated income rules. The identification rules ensure that non-domiciles cannot gain a tax advantage by remitting their nominated income or capital gains to the UK before other income and capital gains on which they would be taxed. Removing the nominated income rules would call into question the creditability of the RBC for US tax purposes. Therefore, wider simplification of these rules would carry an unacceptable risk.⁴¹

9.11 Nature of charge on remitted RFI

Section 809F(1) ITA provides:

This section applies if s.809B, 809D or 809E applies to an individual for a tax year.

That is, the section applies to remittance basis taxpayers. Section 809F(3) ITA provides:

The individual's relevant foreign income for that year is charged in accordance with s.832 of ITTOIA 2005.

So we turn to s.832(1) ITTOIA which provides somewhat repetitively:

40 HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012) para 61.

41 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011)
www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

This section applies to an individual's relevant foreign income for a tax year ("the relevant foreign income") if s.809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

We find the rule at last in s.832(2) ITTOIA:

- (2) For any tax year in which—
 - (a) the individual is UK resident, and
 - (b) any of the relevant foreign income is remitted to the UK,
 income tax is charged on the full amount of the relevant foreign income so remitted in that year.

At first glance it may seem that IT is charged on remitted RFI and not on unremitted RFI. It is not that simple. The scheme of the rewritten legislation is that for every category of income there is:

- (1) a charging provision; and
 - (2) a provision specifying the amount of income on which tax is charged.
- For instance, in relation to dividends from non-resident companies, s.402 ITTOIA provides:

402 Charge to tax on dividends from non-UK resident companies

- (1) Income tax is charged on dividends of a non-UK resident company.

...

403 Income charged

- (1) Tax is charged under this Chapter on the...amount of the dividends arising in the tax year.
- (2) Subsection (1) is subject to ... Part 8 (foreign income: special rules).

The (subtle) point is that IT is *charged* on dividends under s.402 ITTOIA. Section 403 ITTOIA does not impose a charge. It merely quantifies *the amount on which income tax is charged*. Likewise s.832(2) ITTOIA does not impose a charge, it merely quantifies *the amount on which income tax is charged*.⁴² The distinction does matter. For instance, references to "income chargeable to income tax" in principle include unremitted income

⁴² Hence the legislation states that tax is charged "in accordance with" s.832 not *under* s.832. See eg ss.13, 14, 16 ITA.

taxable on the remittance basis.⁴³ However the context may show that the word “chargeable” is used in a narrower sense so as not to include unremitted income (un)taxed on the remittance basis.

9.12 Charge on remitted gains

Section 809F ITA provides:

- (1) This section applies if s.809B, 809D or 809E applies to an individual for a tax year...
- (4) If the individual is not domiciled in the UK in that year, the individual’s foreign chargeable gains for that year are charged in accordance with s.12 of TCGA 1992.

So we turn to s.12(1) TCGA which provides (somewhat repetitively):

This section applies to foreign chargeable gains accruing to an individual in a tax year (“the foreign chargeable gains”) if—

- (a) s.809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
- (b) the individual is not domiciled in the UK in that year.

We find the rule at last in s.12(2)(3) TCGA:

- (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
- (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year. ...

While non-ordinary residence is sufficient to qualify for the RFI remittance basis, foreign domicile is needed for CGT.

9.13 Remittance in year after income/gains arise

Suppose:

⁴³ The distinction explains why foreign dividend income taxable under remittance basis in 2005/06 and 2006/07 was taxable at the dividend upper rate and not at the higher rate (though this is now of historic interest only); see the 6th edition of this work para 28.4.3.

- (1) Income or gains accrue to T (a remittance basis taxpayer) on or after 2008/09 and
- (2) The sum is remitted in a subsequent year (in which T is still resident). The income or gains are taxable in the year of remittance. There is no time limit so income or gains may be taxed many decades after they accrue.

9.13.1 *Transitional rule for pre-2008 income and gains*

Suppose:

- (1) RFI accrues to T before 2008/09 and
- (2) The RFI is remitted in 2008/09 or later (when T is still resident).

In the absence of a transitional rule, the income would not be taxable under s.832 ITTOIA because the condition in s.832(1) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 83 Sch 7 FA 2008 fills that gap for RFI:

- (1) This paragraph applies to an individual's relevant foreign income for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if—
 - (a) the individual made a claim under s.831 of ITTOIA 2005 for the relevant tax year, or
 - (b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year.
- (2) Section 832 of ITTOIA 2005 (as amended by this Part of this Schedule) applies in relation to the relevant foreign income as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

Thus pre-2008 RFI is taxed under s.832(2) if remitted from 2008/09 (as one would expect).

The same applies to gains. In the absence of a transitional rule, pre-2008 gains would not be taxable from 2008/09 because the condition in s.12(1)(a) TCGA would not be met. Para 84 Sch 7 FA 2008 fills that gap:

- (1) This paragraph applies if s.12 of TCGA 1992 (or any corresponding superseded enactment) applied in relation to a gain accruing to an individual in the tax year 2007-08 or any earlier tax year ("the relevant tax year").

(2) Section 12 of TCGA 1992 (as amended by this Part of this Schedule) applies in relation to that gain as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

9.13.2 *Income arising before 2005/06 remitted before 2007/08: ITTOIA transitional rules*

Para 150 Sch 2 ITTOIA provided:

A claim may be made under s.831 (claim for relevant foreign income to be charged on the remittance basis) for relevant foreign income to be charged in accordance with s.832 for the tax year 2005–06 or any later tax year, despite that income having arisen in a tax year before the tax year 2005–06; and ss. 832 to 834 apply accordingly.

ITTOIA EN Vol 3 para 347 explains:

This paragraph ensures that Chapter 2 of Part 8 of this Act is not restricted in its operation to income that arose after the tax year 2004–05 (whenever the earlier income is remitted).

Para 150 was not aptly worded, but what it meant was this: if a s.831 claim is made in 2005/06, 2006/07 or 2007/08, pre-ITTOIA income (which was not taxed on receipt because a claim was made under the former s.65 ICTA) is taxed under s.832 ITTOIA if remitted in that year.

9.13.3 *Income arising before 2005/06 remitted from 2008/09*

FD Draft Clauses EN 2008 provided:

121. Para 47 deletes paras 150 and 151 of Schedule 2 (transitional provisions), which set out transitional arrangements for the application of the remittance basis to certain relevant foreign income arising before the tax year 2005–06. These are now considered obsolete in light of the amendments in this Schedule.⁴⁴

⁴⁴ The equivalent passage in EN FB 2008 para 380 is less informative.

9.14 Remittance after acquisition of UK domicile

Suppose:

- (1) RFI/gains accrue to T (a remittance basis taxpayer).
- (2) T acquires a UK domicile and for that reason ceases to be a remittance basis taxpayer. T remains UK resident.
- (3) T subsequently remits the sum.

This is taxable under the ITA remittance basis.

9.14.1 Transitional rules for pre-2008 RFI/gains

The rule for the pre-2008 RFI remittance basis was that there was no IT charge on a remittance after acquisition of a UK domicile. It is considered that the same applied for the pre-2008 CGT remittance basis, though HMRC did not accept that.

Suppose:

- (1) RFI/gains accrued to T before 2008/09.
- (2) T became UK domiciled before 2008/09.
- (3) The income/gains are remitted from 2008/09.

T is taxable on the remitted income under s.832(2) ITTOIA. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

What is the position if an individual acquires a UK domicile before 6/4/2008 and remitted the income or gains before then? It is suggested that there is no charge because of the cap on the amount remitted; see 10.23.5 (Cap on amount remitted).

9.15 Remittance in year when taxed on arising basis

Suppose:

- (1) RFI accrues to T from 2008/09 in a year in which T is a remittance basis taxpayer.
- (2) T subsequently remits the income in a year in which T is not a remittance basis taxpayer (because T's foreign income and gains exceed the £2k limit and T does not claim the remittance basis).

T is taxable on the remitted income under s.832(2) ITA.

9.15.1 *Transitional rules for pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance in a year in which no claim was made for the RFI remittance basis. HMRC accepted that (at least for years when ITTOIA applied). The new rule applies to pre-2008 RFI remitted from 2008/09. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

If RFI was remitted before 2008/09, it is considered that there is no charge because of the cap on the amount remitted; see 10.23.5 (Cap on amount remitted).

9.16 RFI/gains arising when resident, remitted when non-resident

Suppose:

- (1) RFI or gains accrue to T (a remittance basis taxpayer).
- (2) T remits the sum to the UK in a year when non-resident.

RFI is not taxable in the year of remittance, because the conditions in s.832(2)(a) ITTOIA are not met. Gains are not taxable in the year of remittance because although the conditions of s.12 TCGA are satisfied (remitted gains are treated as accruing when remitted) the individual (being non-resident) is not subject to tax on chargeable gains.

The temporary non-residence rules need to be considered.

9.17 Remittance after death

Suppose:

- (1) RFI or gains accrue to T (a remittance basis taxpayer).
- (2) T dies, and the sum is received in the UK after the death.

If the RFI is received in the tax year after death, no tax charge arises because the condition in s.832(2) ITTOIA is not met. If gains are received in the tax year after death, no tax charge arises because (it is considered) s.12(2) TCGA assumes that the individual is alive in the year of remittance. The same applies if there is a remittance in the year of death because the sum cannot be received in the UK by T (who is dead) or by a relevant person (there are no relevant persons in relation to a dead person) so it cannot be remitted (within the definition of that term).

A different rule applies for employment income.

9.18 Remittance after source has ceased

Section 832(3) ITTOIA provides:

Subsection (2) applies whether or not the source of the income exists when the income is remitted.

9.18.1 *Transitional rules for pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance from a source in a year after the source has ceased. Suppose:

- (1) RFI accrued to T before 2008/09.
- (2) The source of the RFI ceased before 2008/09.
- (3) The RFI is remitted from 2008/09.

Is T taxable on the remitted income under s.832(2) ITTOIA? Yes, the tax charge is retrospective in that pre-2008/09 income previously outside the scope of tax has now fallen within the scope of tax. It does not matter when the income arose or the source ceased: income arising in the 1950s could now come into charge, though all records relating to it would have been long discarded.

STEP rightly comment:

It appears that any source ceased funds, whenever the source ceased will be caught by the new rules. The effect of this is to retrospectively change the nature of these funds and this is unfair. If this is to be the case then taxpayers who have used this technique may have placed the funds in capital accounts which will, as a consequence of the changes to the rules, now be classified as mixed accounts. Not only do the mixed account rules fail to take into account the change in nature of these funds which were capital on 5 April 2008 and income on 6 April 2008, but there does not seem to be any clear way to separate out these funds now as the mixed account rules only apply to remittances to the UK. Whilst STEP does not object to the change in these rules for the future, we do feel that it is unfair to impose additional tax and reporting burdens on taxpayers who used a technique in the past which HMRC recognised and accepted when they used it.⁴⁵

45 STEP Representations on the FB 2008.

What if the source ceased and T remitted the income before 2008/09? Even if the transitional rule does not provide relief, it is considered that there is no charge because of the cap on the amount remitted; see 10.23.5 (Cap on amount remitted).

HMRC accept that there is no charge on pre-2008 deemed gains.⁴⁶ The same reasoning must apply here so it is considered that pre-2008 source-ceased income, which was remitted to the UK prior to 6 April 2008, remains non-taxable.

9.19 RFI/gains arising when non-resident, remitted when resident

Suppose:

- (1) A non-resident individual receives RFI or gains. The income or gains are not of course taxed as they arise.
- (2) The individual becomes UK resident, and subsequently remits that sum when taxable under the remittance basis.

RFI remitted is not taxed on remittance as the condition in s.832(1) ITTOIA is not met. Gains remitted are not taxed on remittance because the condition in s.12(1) TCGA is not met.

FAQ Remittances (April 2008) correctly states:

Where a non-domiciled individual not resident in the UK, has purchased assets abroad out of income that has not been taxed in the UK, then moves to the UK and becomes resident, will the importation of those assets in the first year be taxed as a remittance?

No. As the untaxed income arose while the individual was not UK resident, there is no charge unless the proposed new s.832A ITA 2007 applies (temporary foreign residence).

9.20 RFI from Ireland

In the following discussion:

“Irish income” means RFI arising in Ireland.

“Pre-2008 income” means income arising before 6 April 2008.

⁴⁶ See 10.24.5 (Transitional rules: pre-2008 gains).

The UK/Ireland DTA also needs to be considered but it is not discussed here. Similar points arise in relation to earnings: see 13.27 (Earnings from Ireland).

9.20.1 *Income from 2008/09*

The position for income from 2008/09 is straightforward. The ITA remittance basis treats Irish income in the same way as any other foreign income. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively) that Irish income was taxed on an arising basis.

9.20.2 *Pre-2008 income remitted from 2008/09*

This change raised the problem of transition. Para 83 Sch 7 FA 2008 provides:

- (1) This paragraph applies to an individual's relevant foreign income for the tax year 2007-08 or any earlier tax year ("the relevant tax year") if—
 - (a) the individual made a claim under section 831 of ITTOIA 2005 for the relevant tax year, or
 - (b) section 65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year. ...
- (3) But nothing in section 832 of ITTOIA 2005 applies in relation to any of the relevant foreign income that arose in the Republic of Ireland.

EN FB 2008 provides:

399. Sub-paragraph(3) provides that the new section 832 does not apply to relevant foreign income that arose in the Republic of Ireland. This ensures that no double charge can arise in relation to those tax years during which it was not possible to claim the remittance basis for such income. (This might be relevant for example where income arose in one of those years and was charged on an arising basis but was not remitted to the UK until on or after 6th April 2008.)

Para 83(3) disapplies the remittance basis charge for pre-2008 Irish income. In short, if:

- (1) Irish income arose before 2008/09; and
 - (2) The income is remitted on or after 2008/09
- there is no tax charge on remittance.

9.20.3 *Pre-2008 Irish income: tax position before 2008/09 and 2007/08*

As noted above, according to statute, Irish income was taxable on the arising basis: it did not qualify for the remittance basis. The discrimination against Ireland was contrary to EU law.⁴⁷ This book advised that those with pre-2008 Irish income should only agree to pay tax on the remittance basis. Where tax has been paid on an arising basis which would not have been paid on a remittance basis, a repayment claim should be made.⁴⁸ Under para 83(3) discussed above, pre-2008 Irish income which was not remitted before 2008/09 escapes UK tax altogether, since unremitted Irish income was not lawfully taxable when it arose and it is not (from 2008/09) taxable on remittance.

47 The point is more fully discussed in the 6th edition of this work para 9.51. It appears that the Irish Revenue agree. For the same point arose (in reverse) in Ireland (that is, under Irish law, UK source income was according to statute taxed on a remittance basis). But the Irish Revenue now agree that this was in breach of EU law. Irish Revenue eBrief No. 11/10 provides:

“Under the provisions of Section 73 [Irish] Taxes Consolidation Act 1997, the remittance basis of assessment did not apply in respect of UK source income. However, Section 73 ceased to have effect in respect of UK income arising on or after 1 January 2008 (see Section 18 [Irish] Finance Act 2008). ...

Under the provisions of Section 29(4) [Irish] Taxes Consolidation Act 1997, the remittance basis of assessment did not apply in respect of UK source chargeable gains. However, under the provisions of Section 42 [Irish] Finance (No.2) Act 2008, the remittance basis of assessment applies to chargeable gains arising in the UK as and from 20 November 2008.

Section 18 [Irish] Finance Act 2008 and Section 42 [Irish] Finance (No.2) Act 2008 do not have retrospective effect. *However, arising from certain matters contained in a recent tax appeal case, Revenue are prepared to examine – on a case by case basis and subject to the statutory 4-year time limit for claiming repayment of tax – claims for repayment of tax where it is claimed that a repayment of tax would be due had the remittance basis of assessment, rather than the arising basis of assessment, applied for a relevant year of assessment in respect of an individual’s UK source income and/or chargeable gains. ...*”

See <http://www.revenue.ie/en/practitioner/ebrief/archive/2010/no-112010.html>.

48 For the limitation period see s.106 FA 2007.

9.21 Remittance basis for trustees

9.21.1 *Income accruing before 2006/07*

Under the pre-2008 RFI remittance basis, a “person” who satisfies the relevant conditions could claim the remittance basis. The term “person” generally denotes individuals, trustees and companies.⁴⁹ The remittance basis therefore applied to trustees as well as to individuals.

Until 2006/07 a trustee qualified for the remittance basis (regardless of the beneficiaries or form of trust) if:

- (1) the trustee was an individual domiciled outside the UK; or
- (2) the trustee was a company incorporated outside the UK.⁵⁰

The TAA provisions may, of course, apply to the trust income if it accrues to foreign domiciled trustees. If one trustee is UK resident and domiciled, and others are UK resident and not domiciled, the trustees as a body did not qualify for the remittance basis; *Dawson v IRC* 62 TC 301.

9.21.2 *Income accruing in 2006/07*

Section 474(1) ITA provides:

For the purposes of the Income Tax Acts (except where the context otherwise requires), the trustees of a settlement are together treated as if they were a single person (distinct from the persons who are the trustees of the settlement from time to time).

Section 475 ITA goes on to ascribe to trustees a residence but not a domicile.⁵¹ One possible solution is to look to the actual domicile of the

49 Companies ceased to qualify for the remittance basis with the introduction of corporation tax in 1965: see 9.4 (History of the remittance basis).

50 Or (a rare case) if the trustee is resident but not ordinarily resident in the UK.

The domicile of a company is its place of incorporation. The charge to corporation tax does not apply to a company in its capacity as trustee: s.6 CTA 2009.

The application of the remittance basis to trust income of a UK resident foreign domiciled trustee was recognised in the former s.720(6)(b) ICTA, *Dawson v IRC* 62 TC 301 at 320 and the Trusts Consultative Document (1991) para 10.24.

51 See 4.4 (Trustee residence for income tax and CGT). One is looking at the domicile of the *trustees* and not the domicile of the “trust”. Thus it does not matter that a trust does not have a domicile in the normal sense. (The Civil Jurisdiction and Judgments

trustees in their private capacities. But the trustee is deemed to be “distinct” from the persons who are actually the trustees so it is suggested that this is not the right approach. It is tentatively suggested, by analogy to company domicile, that the domicile should be taken to be the proper law of the trust. Another possibility is to say that trustees are not domiciled anywhere, but then all trustees qualify for the remittance basis, which would be absurd. The usual rule is that everyone has a domicile, and that rule should be applied here.

9.21.3 *Income accruing before 2008/09 remitted after 2008/09*

Since s.832 ITTOIA now only applies to individuals, trustees escape tax on income accruing before 2008/09 which is remitted after 5/4/2007. This is something of a windfall for trustees who qualified for the pre-2008 RFI remittance basis.

9.22 Forward tax agreements

Details of this arrangement were made public in an article by Malcolm Gunn in *Taxation*, 17 May 2001, under the revealing name “subscription rate method of taxation”. The taxpayers involved were very wealthy UK resident non-domiciled individuals.

HMRC required full disclosure of the taxpayer’s worldwide assets. The taxpayer then offered to settle the tax liability on foreign sources for a fixed sum. A starting position was that one worked out the taxpayer’s UK living expenses; deducted from that the amount of UK income; the balance then represented funds which would be required annually from overseas, on which tax was expected. The forward tax agreement related to foreign income and gains. UK source income remained taxable in the normal way. Malcolm Gunn explained:

One may be able to negotiate the annual fixed payment downwards on the starting point figure. ... So in the final analysis, it is down to negotiating a deal which both the taxpayer and the Revenue feel they can live happily

Act 1982 attributes a “domicile” to a trust, but the concept of domicile in that Act “has little in common, save its name, with the traditional concept”: *Dicey, Morris & Collins, Conflict of Laws*, (14th ed., 2006) para 6-002.)

with.⁵²

In the first edition of this book I said:

It is likely that publication will stop the practice completely. Those who believe that tax should be governed by law will add: Quite right too.

Since then the courts have tried to stop these agreements by holding them to be *ultra vires*.⁵³ Where such agreements have been made in the past, a taxpayer may have a defence to an assessment if they can show they have suffered prejudice. It is an interesting question how these agreements will deal with the remittance basis claim charge.

52 Transition from taxation by agreement to taxation by law raises additional problems discussed in Malcolm Gunn's article.

53 *Fayed v Advocate General* 77 TC 273. *Fayed*-style bargaining is however the basis of taxation of wealthy foreigners in many countries, including, I understand, Switzerland, France and Austria. Even in the UK after *Fayed* the temptation is ever present to move from the inconvenience of taxation by law to the convenient (but ultimately corrupt) method of taxation by negotiation.

CHAPTER TEN

THE MEANING OF REMITTANCE

10.1 Meaning of remittance – Introduction

This chapter considers what constitutes a remittance for the purposes of the remittance basis. The law is in chapter A1 part 14 ITA, which sets out what I call **“the ITA remittance basis”**.

Section 809K(1) ITA provides:

Sections 809L to 809Z6¹ apply for the purposes of—

- (a) this Chapter,
- (b) sections 22 and 26 of ITEPA 2003 (relevant foreign earnings charged on remittance basis),
- (c) section 41A of that Act (specific employment income from securities etc charged on remittance basis),
- (d) section 832 of ITTOIA 2005 (relevant foreign income charged on remittance basis), and
- (e) section 12 of TCGA 1992 (foreign chargeable gains charged on remittance basis).²

1 The reference to “ss.809L to 809Z6” was always strange, as it omitted s.809Z7 (interpretation). Now it is wrong because the FA 2012 added further sections: it should be taken as a reference to “ss.809L to 809Z10”.

2 Section 809K(2) ITA provides a (somewhat unnecessary) overview in accordance with the principles of Plain English Drafting:

“Those sections—

- (a) explain what is meant by income or chargeable gains being ‘remitted to the UK’ (sections 809L to 809O),
- (b) provide for the calculation of the amount remitted (section 809P),
- (c) contain rules for attributing transfers from mixed funds to particular kinds of income and capital (sections 809Q to 809S),
- (d) contain further provision in relation to certain foreign chargeable gains (section 809T and 809U), and
- (e) treat income or chargeable gains as not remitted to the UK in certain cases

This list is not comprehensive, but in other relevant places one finds the rules are incorporated:

See Chapter A1 of Part 14 of ITA 2007 for the meaning of “remitted to the United Kingdom” etc.³

As far as I can see, the rules in chapter A1 apply everywhere that a remittance basis applies.

10.1.1 *Cross references*

For joint bank accounts, see 71.3.9 (Remittances from joint accounts).

10.1.2 *Remittance Conditions A to D*

Section 809L(1) ITA provides:

An individual’s income is, or chargeable gains are, “remitted to the UK” if—

- (a) conditions A and B are met,
- (b) condition C is met, or
- (c) condition D is met.

I refer to “**remittance conditions A to D**” to avoid confusion with the myriad other conditions in ITA.

It is considered that s.809L(1) is a comprehensive and not an inclusive definition of remittance, because of the complexity and breadth of the remittance conditions. That is, a sum is remitted if and only if one of these three sets of conditions are satisfied. In practice remittance conditions A and B are the most important.

I refer to a remittance within the meaning of s.809L(1) as “**a taxable remittance**”.

A sum which can be received in the UK without a taxable remittance is referred to as “**clean capital**”; (the expression might be misunderstood, but I adopt this terminology as it is used in the RDR manual).

(see sections 809V to 809Z6).”

3 See s.648(4) ITTOIA; s.554Z11(4) ITEPA;

10.1.3 *Why is the remittance basis difficult?*

The difficulty is inherent in the concept of a remittance basis. Although it is an exaggeration to say that “money has no earmark” it is often very difficult to trace or earmark money.⁴ The fungibility between foreign income/gains and other assets makes it hard to determine whether any assets received in the UK should be regarded as the foreign income/gains. But this is what a remittance basis requires to be done.

Before 2008 the matter was largely left to the courts to sort out. It cannot be said that the courts were entirely successful.⁵ In 2008 Parliament recast the rules in statutory form. It cannot be said that this is any more successful. The uncertainties are greater than before, complexity and record keeping are vastly increased,⁶ and no less than before, careful planning is needed to avoid unfairness.

10.1.4 *Comparison with pre-2008 remittance basis*

The wording of the ITA remittance basis is so different that pre-2008 authorities on the remittance basis need careful review to see if they are still applicable under the ITA remittance basis, though some are still useful.

HMRC agree. The RDR Manual provides:

31210. Key differences between ‘new’ (post 5 April 2008) and ‘old’ regime (pre 6 April 2008) [December 2011]

...The previous case law is now of limited relevance.

10.2 Relevant person: introduction

Before discussing the remittance conditions, it is necessary to consider the term “relevant person”. All four remittance conditions use the term.

4 *Lipkin Gorman v Karpnale* [1989] 1 WLR 1340 at p.1382 (CA). The law of tracing illustrates this in another context.

5 Thus Viscount Simonds referred to remittances as “this difficult branch of the law”: *Thomson v Moyse* 39 TC 291 at p.328. Likewise Finlay J in *Kneen v Martin* 19 TC 33 at p.41: “This subject is always troublesome...”.

6 The topic which took up 78 pages in the 2007/08 edition of this work needs four chapters and 350 pages in the current edition.

“Relevant person” is defined in s.809M ITA. Section 809M(1) ITA provides:

This section applies for the purpose of this Chapter.⁷

The term “relevant person” is also used in transitional provisions: para 86(2)(3) Sch 7 FA 2008. Here the drafter did not supply any definition but the context shows that the s.809M definition must be applied. So the definition applies throughout the remittance provisions.

A relevant person strictly means the individual to whom income/gains accrue, as well as certain persons connected to them. But in the discussion below I generally refer to the individual himself as “the individual” and use the term “relevant person” to mean the others within the statutory definition.

Strictly one should not use the term “relevant person” in the abstract. A relevant person can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a relevant person in isolation (leaving the words “in relation to an individual” and the identity of that individual to be inferred from the context).

Section 809M ITA sets out eight categories of relevant person. These can be split into three groups: close family, family companies and family trusts.

10.3 Relevant person: close family

The first four categories of relevant person are close family. Section 809M(2) ITA provides:

A “relevant person” is—

- (a) the individual,
- (b) the individual’s husband or wife,
- (c) the individual’s civil partner,
- (d) a child or grandchild of a person falling within any of paras (a) to (c), if the child or grandchild has not reached the age of 18.

⁷ This is duplicated in s.809Z(10) ITA: “In this Chapter ... “relevant person” has the meaning given by section 809M”.

10.3.1 Cohabitees

Section 809M(3) ITA provides:

For that purpose—

- (a) a man and woman living together as husband and wife are treated as if they were husband and wife;
- (b) two people of the same sex living together as if they were civil partners of each other are treated as if they were civil partners of each other.

This provision treats cohabitees as married persons and so relevant persons. In 2008 this was a relatively new development in tax, but it has now become standard in anti-avoidance provisions. See App 1.4 (“Living together as husband and wife”).

10.4 Relevant persons: companies

The provisions discussed in this section have had a complicated evolution. I omit that here – reluctantly as the story has amusing aspects – but it is now of historic interest only.⁸

Under s.809M(2)(e) ITA the next category of relevant person is:

- (e) [i] a close⁹ company in which a person falling within any other paragraph of this subsection is a participator, or
- [ii] a company which is a 51% subsidiary¹⁰ of such a close company.

Under s.809M(2)(f) ITA the next category of relevant person is:

- (f) [i] a company

⁸ The reader may turn to the 9th edition of this work for a lesson in how not to legislate.

⁹ Section 809M(3)(c) ITA provides the standard definition:

“‘close company’ is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act).”

¹⁰ Section 809M(3)(cb) ITA provides the standard definition:

“‘51% subsidiary’ has the same meaning as in the Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010).”

- [1] in which a person falling within any other paragraph of this subsection is a participator, and
- [2] which would be a close company if it were resident in the UK, or
- [ii] a company which is a 51% subsidiary of such a company

This is intended to catch family companies but it is widely drawn. An individual would not usually know whether any company is a relevant person in relation to them, because they cannot tell whether it might have a participator who is a trustee of a RP trust.

Companies may also be relevant persons as bodies connected to trusts.¹¹

10.4.1 “Participator”

The key term here is “participator”. Section 809M(3)(ca) ITA provides:

“participator”,

- [i] in relation to a close company, means a person who is a participator in relation to the company for the purposes of section 455 of CTA 2010 (see sections 454 and 455(5) of that Act), and,
- [ii] in relation to a company that would be a close company if it were resident in the UK, means a person who would be such a participator if it were a close company

This incorporates s.455(5) CTA 2010 which provides a wider than standard definition of “participator”:

If a company (C) controls¹² another company (D), a participator in C is to be treated for the purposes of this section as being also a participator in D.

For this definition, see 80.17 (Definition of participator).

10.5 Relevant persons: trusts

Under s.809M(2)(g) ITA the next category of relevant person is:

¹¹ See 10.6 (Body connected with trust).

¹² The ultra-wide definition of “control” applies: see 80.3 (Control in ultra-wide sense).

- (g) the trustees of a settlement of which a person falling within any other paragraph of this subsection is a beneficiary.

This is intended to catch family trusts but it is so widely drawn it covers many if not most trusts in existence.

In the following discussion:

“An RP beneficiary” is a beneficiary falling within any other paragraph of s.809M(2).

“An RP trust” is a trust within s.809M(2)(g), ie one with an RP beneficiary.

Strictly one should not use the term RP trust in the abstract. It can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a RP trust in isolation (leaving the words “in relation to an individual” and the identity of that individual to be inferred from the context).

Thus in my terminology, if T (or T’s spouse, etc) is a beneficiary, the trust is an RP trust in relation to T, or (for short) it is an RP trust.

Section 809M(3)(e) ITA defines “beneficiary”:

“beneficiary”, in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement;

Every trust with an unrestricted power to add beneficiaries (which is a standard form) is obviously an RP trust. But even if T and their relevant close family (spouse etc) are all excluded, if the power to add beneficiaries extends to a close company in which T is a participator, then the trust is still an RP trust. The company may be a RP beneficiary even though T has no beneficial interest in it.

If the power to add is only exercisable with the consent of an individual the position is different.

Suppose the beneficiaries are T’s children and their issue. If T’s children are adult and there are no minor grandchildren, then the trust is not an RP trust. However it becomes a RP trust if a grandchild is born.

A trust is not an RP trust in relation to T just because its terms provide that children or grandchildren of T can benefit after they have reached the

age of 18, as long as they cannot benefit before then.¹³

If T is excluded but lends interest-free to the trust, it is considered that the trust does not become an RP trust in relation to T just because of the loan. T may receive a benefit (on repayment of the loan).¹⁴ However that benefit arises under or by virtue of making the loan to the trustees, and under or by virtue of the loan agreement, but not under or by virtue of the settlement.¹⁵

For charitable trusts, see 10.31 (Gift to charity by remittance basis taxpayer).

Section 809M(3)(d) ITA provides:

“settlement” and “settlor” have the same meaning as in Chapter 2 of Part 9.

This brings in the standard IT/CGT definition of “settlement”.¹⁶ The definition of “settlement” seems unnecessary, since this definition applies except so far as the contrary intention otherwise requires; but it does no harm.¹⁷

The definition of “settlor” is otiose as the word is not used in the definition of “relevant person”.

Section 809M(3)(f) ITA provides:

“trustee” has the same meaning as in section 993 (see, in particular, section 994(3)).

13 See *Vestey v IRC* 31 TC 1 which decided that a trust with a power to benefit the widow of the settlor was not settlor-interested. At the time that the income arose:

- (1) The settlor’s wife could not benefit (as she was not a widow).
- (2) It was possible that in the future she could benefit (as she might survive the settlor and so become a widow). That did not matter because the legislation (which is comparable to s.809M) was held to apply only if *at the time that the widow received a benefit* she fell within the words “spouse of the settlor”.

14 See 26.3.2 (“Settlor-interested” for IT purposes).

15 The same point arises in relation to pre-owned assets, where HMRC accept a similar argument: see 72.8 (POA intangible property charge).

16 See 75.2.2 (Standard IT/CGT definition of settlement).

17 The definition is useful for the avoidance of doubt, since s.809M twice refers to s.993 ITA, where the settlement-arrangement definition applies. Thus the definition makes it clear that the settlement-arrangement definition of settlement is not applicable to s.809M.

So we need to turn to s.994(3) ITA:

For the purposes of section 993 “trustee”, in the case of a settlement in relation to which there would be no trustees apart from this subsection, means any person—

- (a) in whom the property comprised in the settlement is for the time being vested, or
- (b) in whom the management of that property is for the time being vested.¹⁸

Section 809M(3)(f) (incorporating the s.994(3) definition of trustee) is misconceived. The s.994(3) definition of trustee makes sense in the context of s.993 ITA where settlement means settlement-arrangement (which may not have trustees). It does not make sense in the context of s.809M ITA where settlement means classic settlement, which must have trustees. But no significant harm arises from this mistake.

10.6 Body connected with trust

Under s.809M(2)(h) ITA the last category of relevant person is:

- (h) a body connected with such a settlement.

That is, a body connected with a settlement within 809M(2)(g), a settlement of which some other relevant person is a beneficiary.

10.6.1 “Connected with a settlement”

Section 809M(3)(g) ITA defines “connected with”:

a body is “connected with” a settlement if the body falls within section 993(3)(c), (d), (e) or (f) as regards the settlement.

This must not be confused with the more common tax concept of “connected person”.

In order to follow this, one needs to set out the four paragraphs of

¹⁸ For completeness: s.994(3) concludes: “Section 466(4) does not apply for the purposes of this subsection.” That has no relevance here.

s.993(3)(c)(d)(e) and (f).

First, s.993(3)(c)(d) ITA provide:

(3) A person, in the capacity as trustee of a settlement,¹⁹ is connected with ...

- (c) any close company whose participators include the trustees of the settlement,
- (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement

Section 809M(3)(g) is not elegantly drafted. It refers to a body connected with a settlement; whereas s.993 refers to bodies connected with trustees of a settlement; but the meaning must be the same.

At first sight it seems unnecessary for s.809M(3)(g) to refer to s.993(3)(c) or (d), because any company within (c) or (d) would be a relevant person in any event under s.809M(2)(e) or (f).²⁰ But this does make a difference as can be seen from the examples below. In any case, one needs to have them in mind in order to understand s.993(3)(e).

“Participator” in s.993(3)(c)(d) is not defined; it is considered that it bears the normal close company meaning.

Section 993(3)(e) ITA provides:

- (e) any body corporate controlled (within the meaning of section 995) by a company within para (c) or (d)

For the s.995 definition of control, see 80.15 (Control in strict sense).

Lastly, s.993(3)(f) ITA provides:

- (f) if the settlement is the principal settlement in relation to one or more sub-fund settlements, a person in the capacity as trustee of such a sub-fund settlement.

It seems unnecessary for s.809M(3)(g) to refer to s.993(3)(f). Possibly the drafter only intended to refer to s.993(3)(c)(d)(e) and the reference to (f)

¹⁹ “Settlement” in s.993 means settlement-arrangement: see s.994(1) ITA. However for a body to qualify as a relevant person under s.809M(2)(h) there needs to be a settlement within the standard IT/CGT definition.

²⁰ Because the trustees are participators.

slipped in by mistake. But since sub-fund settlements are dead-letter tax law (never found in practice) the point does not matter.

10.6.2 “Body”

Section 809M(2)(h) refers to a “body” connected with a settlement. The term is wide and somewhat vague. However in order to fall within s.993(3)(c)(d) the body must be a company. In order to fall within s.993(3)(e) the body must be a body corporate. Presumably the word “body” was selected as the apt term to include the (somewhat theoretical) case of trustees of sub-funds under s.993(3)(f).

What if trustees control a partnership? A general or limited partnership is not a relevant person under s.809M(3) since although it is a body, it is not a company or body corporate. A LLP is a body corporate, but is deemed not to be one for IT and CGT purposes; s.993 clearly assumes that a partnership is not a body corporate.

10.7 Companies as connected persons: examples

It may be helpful to give some examples of how the relevant person rules apply to trust/company structures. In the following examples:

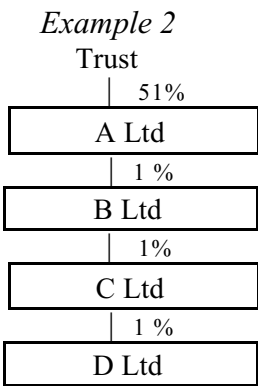

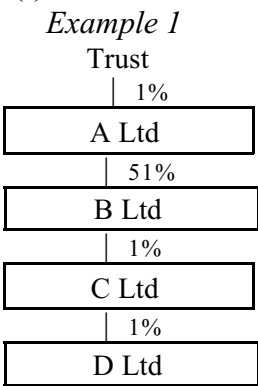

“**An (e) company**” is one which is a relevant person under s.809M(2)(e).

“**An (f) company**” is one which is a relevant person under s.809M(2)(f).

“**An (h) company**” is one which is a relevant person under s.809M(2)(h).

“**A non (e) person**” is a person who falls within any other paragraph of 809M(2) ie not a person who falls outside 809M or who is *only* within para (e).

“**A non (f) person**” is a person who falls within any other paragraph of 809M(2) ie not a person who falls outside 809M or who is *only* within para (f).

Assume the trust is a relevant person (eg the individual is a beneficiary). Assume all the companies are UK resident or non-resident close companies.

A Ltd is an (h) company. It is also an (e) company if UK resident or an (f) company if non-resident. However since it is an (h) company that does not matter; it is a non (e) person and a non (f) person (as those expressions are defined).

Example 1

Assume first that the companies are all non-resident close companies.

B Ltd is an (f) company because a non (f) person - A Ltd - is a participator.

C Ltd is not a relevant person. It is not an (f) company as it does not meet the requirement in (f) that a person “falling within any *other* paragraph” of s.809M(2) is a participator.

The end result is the same if all the companies are UK resident close companies, though the statutory references are different:

B Ltd is an (e) company because a non (e) person - A Ltd - is a participator.

C Ltd is not a relevant person. It is not an (e) company as it does not meet the requirement in (e) that a person “falling within any *other* paragraph” of s.809M(2) is a participator.

Suppose however that B Ltd is UK resident and C Ltd is non-resident. In that case C Ltd is a relevant person:

B Ltd is an (e) company because a non (e) person - A Ltd - is a participator.

C Ltd is an (f) company as a non (f) company - B Ltd - is a participator.

It follows that D Ltd is then an (e) company if UK resident, since as a non (e) company - B Ltd - is a participator.

Example 2

The difference in example 2 is that the trustees are participators in B Ltd²¹

21 See 80.17.2 (Chain of wholly owned companies).

so B Ltd is an (h) company.

10.7.1 *Commentary*

Where any of these companies are relevant persons, so are all their 51% subsidiaries. It will be apparent that the definition of relevant person in relation to companies is far too wide and it is not realistic to think that the rules are being or ever could be applied in practice to large corporate groups of close companies.

10.8 Relevant person transitional rule: pre-2008/09 income and gains

Para 86(4) Sch 7 FA 2008 provides:

Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

This transitional rule only operates for the purposes of s.809L (remittance conditions A and B), so it has to be repeated for the purposes of remittance conditions C and D, and for s.624.²² In other provisions the transitional rule does not apply: s.809Z2 (Personal use rule); para 86(2)(3) Sch 7 FA 2008. I wonder if that is deliberate or an oversight. These are provisions where it is helpful to have a wide definition of relevant person but it will not often matter.

The RDR Manual provides:

31480. Relevant persons and foreign income and gains arising before 6 April 2008 [June 2010]

Background

The introduction of Chapter A1 Part 14 ITA 2007 has extended the meaning and scope of foreign income and gains that become taxable when remitted to the UK. One change is the introduction of the concept of 'relevant person' at section 809L which, broadly, provides that a taxable remittance will occur when foreign income or gains are brought

22 For remittance condition C, see 10.21.9 (Transitional rules: pre-2008 income/gains). For remittance condition D, see 10.22.5 (Transitional rules: pre-2008 income/gains). For s.624, see 26.5.1 (Transitional rule for pre-2008 trust income).

into or otherwise used in the UK by relevant persons other than the individual himself or herself.

Transition

The transitional rule provides that in establishing whether there has been a remittance of an individual's income and gains for 2007-08 or any earlier year Conditions A and B, Condition C and Condition D at ITA07/s809L are applied as if references to 'relevant person' are to the individual.

Effect

This means that the income or gains remitted either as cash or property have to be brought to, received by or used in the UK for the benefit of the individual concerned before there can be a remittance.

The Manual then provides a straightforward (if factually implausible) example²³ and continues:

Note: The exclusion of 'relevant persons' from s809L for pre 6 April 2008 income and gains does not apply in considering the other transitional rules in relation to the remittance of relevant foreign income (refer to RDRM31140 Relevant foreign income).

10.9 Relevant and other persons: compliance

Suppose:

- (1) an individual gives income or gains to a relevant person ("R"); and
- (2) R remits sums to the UK.

The individual in principle becomes liable to a tax charge. The residence of R does not matter.

23 "Sanjay is a non-domiciled remittance basis user who transferred £10,000 of his foreign employment income from 2007-08 to his 15 year old grandchild's offshore bank account.

In 2008-09 the grandchild then remits £3,000 of this to the UK to buy himself a new computer. [How the 16 year old minor would operate the account and purchase the (overpriced) computer is not explained, but it does not matter.]

Under the rules at section 809L this would create a taxable remittance of £3,000 by Sanjay because his grandson is a relevant person. However the transitional rule means that there is no taxable remittance of this income because it is employment income from 2007-08."

However, R is under no duty to inform the individual that R has remitted sums to the UK. R is under no duty to inform HMRC, as any tax liability on the remittance is that of the individual, not of R. But the rules in theory require R to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition C. Suppose:

- (1) an individual gives income or gains to a non-relevant person (“G”, a gift recipient); and
- (2) qualifying property is enjoyed by a relevant person (or used in respect of a relevant debt).

The individual in principle becomes liable to a tax charge. The residence of G does not matter. G is under no duty to inform the individual or HMRC. But the rules in theory require G to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition D, where any property of any third person (“P”) is enjoyed by a relevant person (or used in respect of a relevant debt) and there is a connected operation (as defined). The individual in principle becomes liable to a tax charge. The residence of P does not matter. P is under no duty to inform the individual that P has remitted sums to the UK or to inform HMRC. But the rules in theory require P to keep records for the lifetime of the individual.

Of course in practice these rules will not (and indeed could not) be observed except in straightforward cases.

The individual has no indemnity against the relevant person, gift recipient or third party.

Under the pre-2008 remittance basis, if A (a remittance basis taxpayer) transferred A's foreign income to any other person (“B”) and B receives that income abroad, there was in general no remittance of that income if B subsequently remits the income to the UK. In the 6th edition of this work I said:

The law could hardly be otherwise, for A will not usually know what B does with his money after it has been transferred to B.

I was wrong about that! My comment assumed that workability was a necessary requirement of UK anti-avoidance provisions. Now it is sufficient if the law is workable in simple cases. Now if T gives income to a relevant person, who remits, T is taxable.

A relevant person who bears a grudge against an individual (eg a

separated spouse) may be able to trigger a significant tax charge out of spite, by deliberately remitting income or gains they have received from the individual. They may alternatively blackmail the individual by threatening to remit unless paid not to do so.

What about a gift recipient (such as an estranged adult child)? There is no charge if they remit income or gains they have received from the individual. What if they apply property they have been given for the benefit of a relevant person, eg a minor child or grandchild of the individual? This arguably does not constitute a taxable remittance under condition B, because the sums are not derived property, but it is caught by remittance condition C.

Also see 10.29 (Proceeds of divorce settlement).
The RDR Manual provides:

35030 Conditions A and B - remittances derived from foreign income or gains [June 2010]

... Where an individual gives untaxed foreign income or gains to another person then they should ensure the donee is aware that they must tell the donor if the property or anything subsequently derived from it is bought to the UK in circumstances such that there would be a remittance under ITA07/s809L.

There is no statutory obligation to do this but failure will make compliance difficult.

HMRC say in March 2009 Qs & As Q9:

If

[1] the record keeping requirements are felt to be too onerous and

[2] the probability of remittance to the UK is high

the donor may wish to consider making a gift of taxed income or gains.

This will not satisfy readers. If “the probability of remittance to the UK is high” then the donor may indeed prefer a gift of taxed income or gains,²⁴ quite regardless of record keeping requirements. Conversely, what advice would HMRC give if the record keeping was felt to be onerous but the probability of remittance was low? Or if the donee had insufficient taxed income or gains to make the gift?

²⁴ Or other clean capital.

10.10 Commentary: let's simplify remittance and relevant person rules

If an individual remits their own income to the UK, they are able to spend it here and there is some sense in taxing them. The same may be said for an individual's spouse and minor children.

The extension to minor grandchildren (though not to adult grandchildren) is a novel development in tax. The policy is inconsistent with other anti-avoidance provisions, and leads to some strange anomalies and nonsense.²⁵ The intention is perhaps to catch grandparents paying the school fees of their UK resident grandchildren – at least if the school is in the UK. The Blair/Brown administration was not supportive of private education. But that is only a surmise, as the Government never published any explanation.

The coalition Government may reform this point:

2.128 However, the Government does accept that there is value in giving further consideration to the following suggestions:

- Excluding minor grandchildren from the definition of a 'relevant person';...

2.129 The Government will undertake further evaluation of these areas with a view to implementing any changes from April 2013²⁶

When a family trust or a family company remits its income to the UK, the individual (as beneficiary or shareholder) is not in any way advantaged unless and until the trustees decide to transfer the income to them or to a close family member. In these respects the definition of relevant person is made extravagantly wide. What is the thought process that has led to this situation? Needless to say, there was no discussion of these policy issues when the rules were announced. I infer that it is based on a conception that the remittance basis requires funds to be taxed if and when *the funds* come to the UK. The policy ought surely to be to charge tax when funds are available *for personal spending* in the UK, not simply because they are invested here. The reader may think it unfortunate that the manner of the 2008 precluded any debate or consideration about what

25 See 10.26 (Payment of school fees).

26 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011)

www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

the remittance basis was intended to achieve.

For these reasons the definition of relevant person ought to be restricted to the individual, their spouse and minor children (and if necessary, though one could argue the matter both ways, the individual's cohabitee).

In the 2010/11 edition of this work I said:

The main effect of the present rules is to impose a prohibitive tax charge on investment in the UK by the foreign domiciliary or relevant persons.

This is now recognised to an extent by the introduction of the complex and restricted remittance investment relief in 2012.

It is considered that the way forward is to restrict the definition of relevant person to the individual, spouse, minor children and (perhaps) cohabitee. Remittance investment relief could then be abolished as it would not be needed. That would be a significant simplification, enhance UK investment, and not result in any significant loss of tax. The 2008 reform lost sight of what the remittance basis is in fact intended to catch, and overlooked that the remittance basis was, and (if it serves any purpose) still is, intended to attract wealthy foreigners to come to live *and invest* in the UK.

10.11 Remittance condition A (link to UK)

Remittance conditions A and B go together: condition A requires a link to the UK, and condition B requires a link to the foreign income or gains. Both conditions need to be satisfied to have a remittance under s.809L(1)(a).

Section 809L(2) ITA provides:

Condition A is that—

- (a) money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person, or
- (b) a service is provided in the UK to or for the benefit of a relevant person.

There are eight ways to satisfy remittance condition A. The first six are:

(1) Property is:

- (a) brought to the UK
 - (i) by a relevant person

- (ii) for the benefit of a relevant person
- (b) received in the UK
 - (i) by a relevant person
 - (ii) for the benefit of a relevant person
- (c) used in the UK
 - (i) by a relevant person
 - (ii) for the benefit of a relevant person

I refer to these as the **“brought” limb**, the **“received” limb**, and the **“used” limb** of condition A. The last two ways to satisfy condition A are:

(2) A service is:

- (a) provided in the UK to a relevant person
- (b) provided in the UK for the benefit of a relevant person

I refer to property within (1) as **“property brought/received/used in the UK”**. (One might refer to that as “condition A property” or “UK property” but on balance I think it is clearer to use the clumsy expression **“brought/received/used in the UK.”** I leave the words by/for the benefit of a relevant person to be implied.)

10.11.1 *Enactment history*

The wording of remittance condition A is loosely derived from the pre-2008 s.33(2) ITEPA, but the connection is tenuous. Section 33(2) ITEPA provided:

If general earnings are—

- (a) paid, used, or enjoyed in the UK, or*
 - (b) transmitted or brought to the UK in any manner or form,*
- they are to be treated as remitted to the UK at the time when they are so paid, used or enjoyed or dealt with as mentioned in para (b).²⁷*

In the current provision, the terminology brought/received/used has replaced paid/used/enjoyed/transmitted/brought.

27 Pre-2008 s.12(2) TCGA was in the same terms. The wording was perhaps intended to extend the concept of “remittance” beyond that which applied for the pre-2008 RFI remittance basis. Though it is just as likely that the drafter only had in mind a plain English paraphrase of the antique language of the former s.65 ICTA 1988. There is no authority discussing these words. (The question was raised but left open in *Harmel v Wright* 49 TC 149.) The question will not now be decided.

The former words “in any manner or form” have been omitted; they are unnecessary as the concept of “derived property” in remittance condition B does the same work.

The words “for the benefit of” are new. The reference to a relevant person is new.

10.11.2 “Property” and “Money”

The language of the remittance basis provisions is not entirely consistent:

“Money or other property” is used 5 times.

“Property (including money)” is used once.

“Property (other than money)” is used once.

Sometimes the word “property” is used by itself. I think it is clear that the word “property” by itself includes money, that is, it is equivalent to “money or other property”. In this chapter, I use the word “property” (by itself) to mean money or other property.

When the expression “money or other property” is used, we do not care about the meaning of the word “money” because if an asset is not “money” it will be “other property”.

When the expression “money” is used by itself, or in the expression “property other than money” we do care about the meaning of the word “money”.

Except in a few special contexts²⁸ the words “property” and “money” are not defined and carry their ordinary meaning.

10.11.3 *Property brought to the UK (“brought” limb of condition A)*

The first two ways to satisfy remittance condition A are:

(a) *Property is brought to the UK by a relevant person*

(b) *Property is brought to the UK for the benefit of a relevant person*

This limb requires one to identify who brings property to the UK. If a relevant person brings it, condition A is satisfied. If someone else brings it, para (a) is not satisfied.

²⁸ See 11.22.1 (“Property”).

For instance, suppose T wishes to lend a chattel to a non-relevant person, eg an adult child. If T instructs a courier to transport the chattel to the child, there is a taxable remittance. If the child arranges the transport, then para (a) does not apply. No other part of condition A applies, so there is no taxable remittance. It is strange that the administrative matter of who brings the asset to the UK should determine taxability but there it is.²⁹ This could be useful if a remittance basis taxpayer wished to lend to a museum, as it would not be necessary to meet the complex conditions of the public access rule.

Para (b) might apply if N holds property as nominee for T, and N brings the property to the UK.

10.11.4 *Property received in the UK (“received” limb of condition A)*

The next two ways to satisfy remittance condition A are:

(c) Property is received in the UK by a relevant person

(d) Property is received in the UK for the benefit of a relevant person

Para (d) might apply if N holds property as nominee for T, and N receives the property in the UK.

We need the “brought” limb as well as “received”. T can receive an asset in the UK without bringing it here (eg on the purchase of a UK situate chattel). Can T “bring” an asset to the UK without receiving it in the UK? Perhaps an example is if T acquires a chattel outside the UK, and packs it in T’s hand luggage; or acquires a car outside the UK and drives it to the UK. T “brings” the chattel or car to the UK, but does not “receive” it here. (It is arguable that an asset can only be received once, so if it is received outside the UK it cannot later be received in the UK, but whether or not that is right, in the case of a chattel or car, there is no identifiable moment of “receipt” in the UK.) So both these limbs of condition A are needed.

This limb requires one to ask where property is received, the answer to which is by no means obvious.

29 For gifts of cash, see 10.11.7 (Gift to non-relevant person).

10.11.5 *Banking machinery*

What if a transfer of money to a foreign bank account involves credits in UK accounting records of the foreign bank? (This is understood to be the position for Channel Island and IOM banks.) No difficulty arises. The RDR Manual provides:

33560 Banking Issues [December 2011]

Banking Transactions

Transfers between foreign centres often pass through the UK banking system, for example when a sterling payment is made abroad and the payment is cleared through London in the normal banking process.

In such circumstances HMRC do not regard the passage of funds through the UK as being a taxable remittance.

The machinery employed is irrelevant provided that, without express provision, the individual has:

- no right to payment at any intermediate point; and
- no control over the funds transferred by their foreign bank to secure payment at the agreed point.

Similarly, the EI Manual provides:

40302 Meaning of "remitted to the United Kingdom" [January 2009]

Paid in the UK

- [1] Earnings are remitted to the UK if they are paid to the employee in cash in this country or if the employee's bank account here is credited with them. Employees may arrange to have earnings paid into offshore bank accounts to avoid this rule.
- [2] Money that is transmitted from the employer's bank in the UK to the employee's offshore bank is not treated as remitted here. It has been in the banking system all of the time; the employee did not have access to it.

This is correct, though the statements that the money "passes through the UK banking system" or that the money has "been in the banking system"

is layman's language.³⁰ A lawyer would draw a sharp distinction between the account holder's money and the bank's money:

The funds received by the beneficiary's [payee's] bank through the payment system belong legally and beneficially to itself. They become part of the bank's general liquid assets. They are distinct from any corresponding credit entry that the bank makes to the customer's account on the strength of receiving those funds.³¹

10.11.6 *Property in transit*

This approach is extended in March 2009 Qs & As to physical assets transferred by a courier through the UK:

Q17: Will HMRC apply the same principle, expressed in relation to mechanistic banking transfers which pass through the UK in the banking system, in a case where a courier passes through the UK in transit carrying property not covered by the temporary importation exemption?

A: Yes. In principle, where the "passing through" is a mechanistic part of the courier service provision and, no relevant persons have any rights to use or access the property at any intermediate point; and no control

30 "The difference between *commodatum* and *mutuum* – the loan to be returned and the loan to be repaid – was hardly seen. It is hardly seen today by the vulgar. 'My money at the bank', is a phrase in common use." (Maitland, *The Forms of Action at Common Law*, lecture V, 1909).

31 Fox, *Property Rights in Money* (2008) para 7.44. See *Foley v Hill* (1848) 2 HLC 28 at p.36 explains the relationship of banker/customer (and borrower/lender generally): "Money, when paid into a bank, ceases altogether to be the money of the principal ... ; it is then the money of the banker, who is bound to return an equivalent by paying a similar sum to that deposited with him when he is asked for it. The money paid into the banker's custody is money known by the principal to be placed there for the purpose of being under the control of the banker; it is then the banker's money; he is known to deal with it as his own; he makes what profit of it he can, which profit he retains to himself, paying back only the principal, ... or the principal and a small rate of interest ... The money placed in the custody of a banker is, to all intents and purposes, the money of the banker to do with it as he pleases; he is guilty of no breach of trust in employing it; he is not answerable to the principal if he puts it into jeopardy, if he engages in a hazardous speculation; he is not bound to keep it or deal with it as the property of his principal, but he is of course answerable for the amount, because he has contracted, having received that money, to repay to the principal, when demanded, a sum equivalent to that paid into his hands."

This is the classic exposition: see *Re Spectrum Plus* [2004] Ch 337 at [88].

over how property is transported to and from the agreed points. In such circumstances the passage of property which merely “touches” the UK would not be regarded as a sum remitted to the UK.

10.11.7 *Gift to non-relevant person*

In *Timpson’s Executors v Yerbury*³² (a pre-2008 remittance case):

- (1) Mrs Timpson (“T”) gave cheques representing her foreign income to her children.
- (2) The children cashed the cheques which were credited to their bank accounts in the UK.

Thus, the foreign income was received in the UK, but it was not received by T. This was nevertheless held to be a taxable remittance by T. Romer LJ and (I think) Greene LJ decided *Timpson’s Executors* on the basis that there is a taxable remittance if:

- (1) money is received in the UK by a third party at T’s direction, and
- (2) immediately before receipt, the money (or funds representing it) belonged to T.³³

32 20 TC 155 followed at first instance in *Walsh v Randall* 23 TC 55.

33 “The Rule does not require that the sum should have been received by the person entitled to the income. In computing the tax, therefore, sums paid to third parties [in the UK] for the benefit or at the request of the party so entitled have to be taken into account...” (Romer LJ at p.181); “provided the income in respect of which the assessment is made is income to which the person assessed is entitled, it is, in my judgment, immaterial whether the sum ‘received in the UK’ is received by him or by some third party upon his instructions.” (Greene LJ at p.186).

Lord Denning adopted this reasoning in an obiter comment in *Thomson v Moyse* 39 TC 291:

“But [the taxpayer] need not receive [the foreign income] himself. It is sufficient if the sums are received in England by some third person *by his authority*. Thus, if Mr Moyse, instead of receiving the money himself, tells his New York banker to send a remittance to his butcher or baker or candlestick-maker in England, he is chargeable with tax on it for the simple reason that he was ‘entitled’ to the income which has been used to pay the debt; and he must pay tax on it *when it is received in England*, no matter by whom it is received, so long as it is received *by his authority* ...”

Lord Wright MR decided *Timpson’s Executors* the case on a different basis, that: “if the sums in question were received in the UK as the income of Mrs. Timpson she was chargeable to tax as being the person entitled to it when it came into the UK, though in fact she never received it herself.... if it comes here as her income, ... the fact that on arrival it is applied, in accordance with her directions, in payment to others does

This is no longer the law under the ITA remittance basis. Remittance condition A requires that property is brought/received/used in the UK *by or for the benefit of a relevant person*. So if a remittance basis taxpayer writes a cheque on a foreign bank account, gives it to a donee (not a relevant person) who pays the cheque into their UK bank account, remittance condition A is not satisfied. The money is received in/brought to the UK by the donee (not by a relevant person).

Suppose (instead of a cheque) T makes a gift to the donee (not a relevant person) by electronic transfer from T's offshore account to the UK account of the donee. It is arguable that remittance condition A is not satisfied. It would be strange if there were a difference between payment by cheque and a direct electronic transfer. But in this case it might be said that T "brought" the money into the UK (even though T did not receive or use it in the UK).

The practice before 2008 was to make the gift abroad (by payment into a foreign bank account of the donee) and this will no doubt continue even though it is not on this analysis strictly necessary.

10.11.8 *Arm's length payment to non-relevant person*

Similar points apply to an arm's length payment to a non-relevant person. Suppose X provides services to T outside the UK, or sells a non-UK situate asset to T. If T makes a payment to the foreign bank account of X, remittance condition A is not satisfied. If T pays by giving X a cheque for the amount due, and X pays the cheque into their UK account, there is no taxable remittance. The money is received in/brought to the UK by X, not by T. It is not used in the UK by T.

If (instead of a cheque) T makes pays by electronic transfer from T's offshore account to the UK account X, it is arguable that remittance condition A is not satisfied.

A payment into the foreign account of X is safest, but in practice X may not wish to go to the trouble of opening a foreign bank account.

not affect its chargeability to her;" 20 TC 155 at p.180. Clearly T did not receive the income, but Lord Wright said that she was entitled to it on arrival, when it came to the UK. This is not tenable, for reasons given in the 6th edition of this work; but the point does not now matter.

10.11.9 *Property used in the UK (“used” limb of condition A)*

The next way to satisfy remittance condition A is:

(e) Property is used in the UK by a relevant person

This requires one to ask whether property is used, where property is used, who is the user, and what exactly is the property which is used.

It is considered that “used” means enjoyed in specie, and property is used where it is situate. So if a sum is applied in the purchase of chattels which are brought to the UK and used by the individual, or any relevant person, the “used” limb of remittance condition A is satisfied.

It is difficult to see the role of the “used” limb of condition A. Normally if T uses property in the UK, T (or a relevant person) will have brought or received it in the UK, so the “brought” or “received” limbs will be satisfied. There could be a case where property is brought or received in the UK by a non-relevant person and used by T eg if T gives RFI to a brother who purchases a house which T occupies. In that case condition A is satisfied under the “used” limb alone. But in this case, condition B is not satisfied (the property is not property of a relevant person) so the question whether condition A is satisfied does not arise. This situation is covered instead by condition C.

If money is spent, it is “used” in the normal sense of the word. However it is not clear where spent money is used, so it is not clear how one decides whether it is used in the UK. It is suggested that the spending of money should be considered under the receipt limb, or the brought limb of condition A, or under the debt remittance rules, and so (say) paying a debt may be a remittance under the debt remittance rules but it does not satisfy condition A: the money is not used in the UK.

10.11.10 *Receipt of UK situate investment asset*

What is the position if T uses RFI to pay the purchase price of UK situate property which is not used *in specie*?³⁴ For example, if it used to purchase UK situate shares or land let as an investment?

34 There are of course other reasons for avoiding UK situate investments: the income is subject to IT, gains subject to CGT, and IHT may also be a concern. Here I am only addressing the remittance issue.

Assume that the sum itself is not received in the UK (because payment for the asset is made outside the UK).

The “brought” limb of condition A is not satisfied: the shares or land are not brought to the UK, and neither is the RFI.

HMRC must rely on the “received” limb. The shares or land are certainly “received” by the relevant person, but are they received “in the UK”?

It is arguable that they are not, so while condition A is only satisfied if the relevant individual actually uses the assets, merely acquiring UK situate assets is not enough.³⁵

Will HMRC agree? The EI Manual para 40302 [December 2008] provides:

40302 Meaning of "remitted to the United Kingdom" [January 2009]

Assets

[1] If an employee receives earnings abroad which are used to purchase assets such as a car or a painting and the employee then brings the assets into the UK the earnings used to purchase the assets are regarded as remitted to the UK.

Investments abroad

[2] The treatment of investments made abroad depends on the particular facts. In general, money invested abroad by an employee resident here should not be regarded as remitted to the UK. However, if the investment is subsequently sold in this country, or sold abroad and the proceeds brought into the UK, the amount originally invested should then be regarded as remitted here.

Para [2] does not answer the question, as the unlawyerlike expression “investments made abroad” might refer to the situs of the investment or the place where the investment is paid for. But para [1] referring expressly to chattels perhaps suggests that the position may be different for UK shares or other assets not enjoyed in specie.³⁶

³⁵ If this were wrong then words “used in” in remittance condition C (and perhaps condition A) would be otiose since chattels used in the UK must be received in or brought to the UK.

³⁶ SAI Manual provides:

“4380. **Remittance basis** [December 2009]

... In some cases... the securities themselves are treated as deriving from the accrued

If receipt of a UK situate asset is receipt of an asset in the UK, then there will usually be a remittance if a person lends to any UK resident (even if not a relevant person) since the lender receives a debt and a debt from a UK resident is usually UK situate.

A practical solution where possible is to use bearer shares and specialties and ensure that the document is kept outside the UK.

10.11.11 *Property used in the UK for the benefit of a relevant person*

The next way to satisfy remittance condition A is:

(f) Property is used in the UK for the benefit of a relevant person

Funds can be said to be *applied* for the benefit of a person and it is suggested that “used for the benefit of a relevant person” has the same meaning.

10.11.12 *Situs of property for purpose of remittance condition A*

There are no statutory situs rules for income tax, so the rules of private international law apply. Thus money received in a UK branch of a foreign bank is remitted, but money received in a foreign branch of a UK bank is not remitted.³⁷ Money is remitted if received in:

- (1) a UK account in the name of the taxpayer, and held by them beneficially; or
- (2) a UK account held in the name of a third party who holds on trust for the taxpayer.

CGT has statutory situs rules. But it is considered that the effect of s.12(5) TCGA is to incorporate the ITA rules, so the CGT situs rules do not apply for the purpose of remittance condition A. My view is confirmed by s.809W(6) ITA which applies the CGT situs rules

income profits. This means that a charge will arise on the taxpayer when they, or some other ‘relevant person’, either bring the securities to the UK (if they are held in bearer form) ”

(The same point was made in EN FB 2008). Since this comment relates to bearer securities, which are in some ways chattels or like chattels, it does not shed any light on the issue discussed here.

³⁷ See 77.17 (Bank account).

specifically for the purposes of s.809W(3) ITA. If my view were wrong, there would be a remittance under the CGT remittance basis whenever a UK resident foreign domiciliary:

- (1) places sterling in a foreign bank account, as the account is regarded as UK situate for CGT;³⁸ or
- (2) sells and leaves the purchase price outstanding, since the right to the purchase price is a UK situate asset under the CGT situs rules.

Suppose T sells and leaves the purchase price outstanding as a debt. T receives property - the right to the purchase price – but where is it situate? If the purchaser/debtor is UK resident, the debt is UK situate, unless one takes specific steps in the documentation to avoid that. If the purchaser/debtor is non-resident, the asset is not in principle UK situate. But if my view about the received limb is correct, it does not matter where the debt is situated.

10.11.13 *Non-UK company with UK asset: secondhand companies*

Suppose T acquires a non-UK company which holds a UK asset. If the UK asset is not enjoyed in specie by T or a relevant person, then Condition A is not satisfied. If the UK asset is (say) a house, which is occupied by T, then remittance condition A is satisfied. However, remittance condition B is not satisfied.

10.11.14 *Service provided in the UK*

The next way to satisfy remittance condition A is:

(e) a service is provided in the UK to a relevant person

The rule requires one to identify the place where services are provided, or at least whether they are provided in the UK. While in some cases this is straightforward, in other cases there is no obvious answer.³⁹

The connecting factors could be:

- (1) where the work is done
- (2) where the supplier is based

³⁸ See 78.12 (Bank account).

³⁹ It is of course no solution to say that the question is just one of fact: see 19.4.10 (Unsatisfactory approaches).

(3) where is the property (if any) to which the services relate

(4) where the customer is

It is considered that the connecting factor should be where the work is done, when that is physical work with a simple physical location. This is consistent with the IT trading source rules.⁴⁰ In other cases it should be where the supplier is based.

In practice physical work will generally be done where the supplier is based, so factors (1) and (2) will normally point the same way. But that is not necessarily the case. If one instructs a French firm to provide building services in the UK the service is provided in the UK: if one instructs a UK firm to provide building services in France, the service is provided out of the UK.

Factor (3) cannot be decisive as foreign services relief assumes that a service which relates to property situate outside the UK may be a service provided in the UK.⁴¹

The RDR Manual is consistent with this view. It provides:

34040.Relevant services provided in the UK [December 2011]

... A service is regarded as having been provided in the UK if the providers of that service are based in and give that service in the UK....

“Based in” the UK is my factor (2). I understand that the words “*and give that service in the UK*” is my factor (1), where the physical work is done. This is therefore an easy case where both factors point the same way.

The RDR Manual goes on to give this example:

Example 1 (Chandra)

C, a remittance basis user, engages an investment manager based in the UK to manage her portfolio of investments in foreign stocks and shares of overseas concerns. ...

The service - the management of the portfolio - is provided in the UK to C...⁴²

⁴⁰ See 15.12 (Services).

⁴¹ See 11.21 (Foreign services relief).

⁴² March 2009 Qs & As made the same point:

Q23: ... If a service provider engages with the Jersey resident trustees of a trust of which a UK resident but non-domiciled individual is a beneficiary and settlor and provides advice which is prepared and issued from the UK, but received and read in Jersey, it is not clear if this would be “a service provided in the UK.”...

This is a case where there is no physical work within factor (1), so one falls back on factor (2), where the supplier is based.

Where one travels entirely within the UK, the services are provided in the UK and where one travels entirely outside the UK, the services are provided outside the UK. What is the position if the journey begins in the UK and ends outside, or begins outside the UK and ends within? Possible solutions are:

- (1) the services are provided in the UK if any part of the journey is in the UK,
- (2) the services are not provided in the UK if any part of the journey is not in the UK,
- (3) apportion the journey into two parts.

None of these are satisfactory. (1) and (2) are unfair in favour of HMRC or the taxpayer, and not in accordance with the natural meaning of the words. (3) is wrong as there is only one service.

The best answer is that in this case factor (1) - where physical work is done - does not provide a solution, and one should rely on factor (2) - where the supplier is based.⁴³ HMRC may agree. The RDR Manual provides:

34040. Relevant services provided in the UK [December 2011]

... *Example 4 (Charlotte)*

C, a remittance basis user, purchases a return air ticket using her foreign

A: ... The general rule is that, for the purposes of this condition, a service is regarded as being provided in the jurisdiction where the providers of that service are based. Advice which is researched, prepared and issued from the UK would therefore fall within the definition of “provided in the UK” irrespective of where the client might receive it.

Q24: As part of providing advice to clients who have an international aspect to their affairs, a service provider may prepare advice in several different jurisdictions, which may then be issued from only one office, and therefore country, that being the office which has the main relationship with the client.

A: In the case where an offshore service provider provides advice which has been prepared in several different jurisdictions, the same approach will need to be taken to determine whether the test in section 809L is met, and, because the advisors in your scenario are based in the UK, their service will be provided in the UK.

- 43 Exactly the same considerations have led the OECD model to the same rule. Art 8(1) OECD model treaty provides: “Profits from the operation of ships or aircraft in international traffic shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.”

income. The ticket is to travel from the UK to Belgium and return. *The ticket was purchased from a UK company* but payment was made into the company's offshore bank account.

The HMRC analysis is as follows:

Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK [ie the service is provided in the UK].⁴⁴

It is on this analysis significant that the HMRC example specified that the purchase was from a UK company.

In order to decide where a service is provided, it is necessary to identify the service or services which are provided. The VAT distinction between single (though composite) and multiple supplies is applicable here. The RDR Manual gives an example of a multiple supply:

34040. Relevant services provided in the UK [December 2011]

... *Example 5 (Sarah)*

S, a remittance basis user, purchases an air ticket using her foreign income and gains to travel from Sweden to Holland, using a UK based booking agency. Payment is made into the agency's offshore bank account.

There is a 'service provided in the UK', which is the agent's booking services, so the part of the cost of the service that relates to the agency's booking fee is a remittance (although not the cost of the flight between Sweden and Holland as no part of this service is provided in the UK).

This is correct if there are two supplies, a booking service and a transport service; but if there is only one supply then it would not be correct.

Basic planning is to use services outside the UK wherever possible, eg

44 For completeness: there is another version of this example in RDRM 33130:

"Example 3

Charlotte, a remittance basis user, purchases an air ticket using her foreign income. The ticket is to travel from the UK to Belgium. The ticket was purchased from an overseas company and payment made into the company's offshore bank account. Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK."

This is incoherent, since the question assumes there is a ticket from the UK to Belgium, but the answer assumes the journey ends in the UK.

foreign investment advice, foreign accountancy services, foreign travel agencies, and foreign schools.

The last way to satisfy remittance condition A is:

(f) a service is provided in the UK for the benefit of a relevant person

Do the words “for the benefit of” add anything? Is there a case where a service is provided for the benefit of a person but not to that person? Perhaps an example is where a parent P contracts with a school to educate P's child C. The services are perhaps provided to P (who pays for them) but for the benefit of C.

10.12 Remittance condition B (link to foreign income/gains)

Section 809L(3) ITA provides:

Condition B is that—

- (a) the property, service or consideration for the service, is (wholly or in part) the income or chargeable gains,
- (b) the property, service or consideration—
 - (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
 - (ii) in the case of property or consideration, is property of or consideration given by a relevant person ...⁴⁵

There are eight ways to satisfy remittance condition B. The first six⁴⁶ are:

- (1) The property received/used/brought to the UK:
 - (a) is (wholly or in part) the income or gains,
 - (b) is derived property and is property of a relevant person.
- (2) The consideration for the service provided in the UK:
 - (a) is (wholly or in part) the income or gains, or
 - (b) is derived property and is property of a relevant person.
- (3) The service:
 - (a) is the income or gains or

⁴⁵ Section 809L(3) continues with paras (c) and (d) which relate to debt remittances, considered separately below.

⁴⁶ The remaining two relate to the debt remittance rules, which are considered separately below.

(b) derives from the income/gains.

10.12.1 *Property and consideration for service*

It is impossible to refer constantly both to property and to services so I refer to property and leave the reference to services to be read in, as the same points apply to both.

Remittance condition B is not satisfied unless the property brought/received/used in the UK either:

- (1) is the foreign income or gains; or
- (2) is derived from the foreign income or gains.⁴⁷

If the property *is* the foreign income or gains, it does not have to meet the requirement that it is property of a relevant person. If the property is *derived from* the income/gains (“derived property”), it does have to meet that requirement.

Why the distinction? If T transfers income/gains to R, the funds cease to be the income/gains (instead in the hands of R the funds become derived property). That is, if the property *is* the foreign income or gains, the property must necessarily be property of the individual (T) himself (not any one else who is a relevant person in relation to T), so it is not necessary to impose the requirement expressly. That might be the reason; though if so the matter could have been more simply expressed.

Suppose:

- (1) T gives foreign income to S (not a relevant person).
- (2) S uses the money to buy property used by T.

Condition B is not satisfied: the purchased property is derived property but it is not the property of T or of any relevant person.⁴⁸

The question whether the property either *is* the foreign income/gains or is *derived from* the income/gains also matters for the purposes of s.809P ITA (amount of income remitted).

We need to classify what the relevant person receives as (1) property or (2) a service or (3) neither. This is not always easy. Suppose T pays rent for use of a picture in the UK. Does T receive a service? It is thought not.⁴⁹ Does T receive property and if so what? T does not receive the

47 But where these conditions are not met, remittance condition C or D may apply.

48 But remittance condition C or D may then apply.

49 “Service” is widely defined for VAT, but that definition is not applicable here.

picture, but receives a contractual right, which is arguably property. Or it may be that T makes a payment in respect of a relevant debt. A court is likely to hold that there is a taxable remittance under one or other of these routes, though neither analysis is entirely trouble-free.

10.12.2 *Service derives from income/gains*

Next, condition B is met if:

The service

- (a) is the income or gain; or
- (b) derives from the income or gains.

I am unable to make sense of this. How can a *service* be (or derive from) income or gains? I think the reference to “service” here is misconceived. Perhaps the drafter is considering services which constitute earnings or benefits in kind, or a disposal of an asset in consideration of services. In that case only para (b) is misconceived.

10.13 Property is the income or the gains

10.13.1 *What is the income?*

The question of whether the property brought/received/used in the UK is the income is straightforward if the income is pure income, such as dividends, interest or income distributions from trusts, because the income is easy to identify.

Identifying the income is perhaps less obvious if the income consists of trading or property income. Trading (or property) income emerges as the result of a trading (or property income) computation. The gross receipts of a trade (or gross rents from a property) are not the income. For example, suppose an individual borrows to purchase land and pays interest or other deductible expenses out of the rent. The income of the individual is the net profit (rent less expenses), it is not the gross rent. So the payment of the interest out of the gross rent is not a remittance of the rental income. The income is the profit (if any) which is left after payment of the interest and other expenses.

10.13.2 *What is the gain?*

The question of whether the property is the gain is problematic. What is the jurisprudential nature of a gain? The RDR manual provides:

35320 Mixed Funds: Example 4 - remittances before 6 April 2008

Note 3 [June 2010]

... unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. See Capital Gains Manual CG25380 onwards (and CG25440 in particular).

On one view, a gain is not an item of property: it is merely a figure resulting from a mathematical computation. The quantum of a gain (generally) depends (in part) on the amount or value of the proceeds of a disposal, but that does not entail that the gain is a part of the proceeds. The income of a trade may similarly be said to be distinct from the gross trading receipts. On this view, the proceeds of a disposal are not the gain and are not even derived from the gain. The gain is not a part of the money received from the sale. But whatever the true jurisprudential nature of a gain may be, the provisions are not drafted on that view: they are drafted on the basis that the proceeds of a disposal for full consideration do constitute (1) gain and (2) non-gain (representing base cost and other exemptions) so for remittance purposes, the proceeds of disposal do include the gain.⁵⁰ So for remittance purposes, at least, this statement in the manual is correct.

10.14 **Derived property**

Remittance condition B (and C and D) refer to property which derives (wholly or in part, and directly or indirectly) from the income or gains. I refer to this as “**derived property**”.

The words “directly or indirectly” show that the drafter did not want the word “derives” to be construed narrowly.

⁵⁰ The position is more difficult for sales at an undervalue: see 10.24.4 (sale of asset).

10.14.1 *Enactment history*

Under the pre-2008 CGT and employment income remittance bases, tax was charged on sums received in the UK *in respect of* the foreign income. Under the ITA remittance basis, the sum must be *derived from* the income or gains. Is there any difference? It is impossible to answer with precision, since “in respect of” and “derived from” are both vague and context-dependent expressions. It is suggested that the meaning (given the context) is the same, but the expression “derived from” more aptly expresses the necessary connection between the foreign income and the property received in the UK.

Perhaps the change was made to give effect to the statement in the former Inspectors Manual para 1564 published 9/95:

Income is received in the UK if funds provided in the UK are derived from income arising overseas.

Perhaps there was no considered reason for the change: the drafter started with a blank sheet and chanced upon the expression “derived from” or perhaps considered it more in accordance with Plain English principles.

10.14.2 *Investment and re-investment*

Suppose T uses RFI to purchase assets. The purchased assets are derived from the RFI. If the purchased assets are sold and the proceeds re-invested in new assets, those new assets are derived from the RFI. The tracing process can continue for the lifetime of T.

10.14.3 *T gives funds to R*

Suppose T gives income to R. The funds in the hands of R are not the income, but they are derived from the income. If R uses the income to purchase assets, the purchased assets are derived from the income, and (as above) that tracing process can continue for the lifetime of T.

10.14.4 *T purchases asset for full consideration from R*

Suppose:

- (1) T purchases an asset (“the purchased asset”) from a relevant person (“R”) for full consideration.
- (2) T uses RFI to pay the purchase price.

It is considered that the proceeds of sale in the hands of R is not the income and is not derived from the income. So there is no taxable remittance if R brings the proceeds of sale to the UK: remittance condition B is not satisfied.⁵¹

Likewise if T provides services to R for full consideration, and T uses RFI to pay the fee. The fee in the hands of R is not derived from the RFI.

This must be the case, because if T uses RFI to purchase an asset from a company, at arm’s length, T will often have no way of knowing whether the company is a relevant person, and T can hardly be expected to ask the company what it has done with T’s money. Whereas if T *gives* money to R, the request is not so unreasonable.

This view was accepted in another context in *Cohen v Petch* [1999] STC (SCD) 207. Here:

- (1) T borrowed money from a building society and used it to purchase an asset from T’s mother.
- (2) The mother immediately gave or lent the proceeds of sale back to the son.
- (3) The son lent the money to a company.

The Special Commissioner said at p.211:

I cannot overlook the fact that once the money had been borrowed [by] the taxpayer from the society it was paid to his mother and became her funds. Subsequently, three days later, the sum of £46,600 was returned to the taxpayer by his mother either in the form of a loan or as a gift. The funds, whether or not they are traceable in specie, were no longer the money borrowed from the society. They were funds lent or given by Mrs Daphne Cohen to her son. There was no longer any link between the

51 Of course the purchased asset in the hands of T is derived from T’s RFI so there would be a taxable remittance if T brings the purchased asset to the UK.

If my view is wrong, there would be a double charge to tax where the purchased asset represented RFI of R, that is, where:

- (1) R receives RFI (R’s income) and uses it to purchase an asset (the purchased asset).
- (2) T receives RFI (T’s income) and uses it to purchase the asset from R.

Suppose T brings the purchased asset to the UK. There is a taxable remittance of T’s RFI. But it would be surprising if R’s income was also remitted.

money which the taxpayer eventually lent to the company and the money which he borrowed from the society.

10.14.5 *T lends to R*

Suppose T receives RFI and lends it to an individual who is a relevant person (“R”). Are the funds in R’s hands derived from T’s RFI? There are three possible solutions:

- (1) R’s borrowed money is always derived from T’s RFI.
- (2) R’s borrowed money is never derived from T’s RFI.
- (3) R’s borrowed money is sometimes derived from T’s RFI.

In principle, R’s funds are derived from R’s promise to repay the loan, which is full consideration for the money, whether the loan is on commercial terms or interest free repayable on demand (the promise to repay an interest free loan is full consideration).⁵² Solution (2) is in principle to be preferred. Since T has an asset (the benefit of the debt) which is derived from the RFI, it would be surprising if R’s borrowed money was also derived from the same RFI. Suppose R repaid the debt (not out of the borrowed money but out of other funds). On solution (1) the borrowed money would continue to be derived from the RFI, which would be very odd to say the least.

Moreover the avoidance possibilities are dealt with by remittance condition D.

There will however be some circumstances in which one should regard the borrowed money as derived from T’s RFI. The court might then describe the loan as a mere “conduit” as Lord Templeman did in *Harmel v Wright* 49 TC 149 but “conduit” is a metaphor which represents a conclusion rather than an argument for reaching that conclusion. The difficulty is to find a method of distinguishing between cases where one does and does not regard the borrowed money as derived from the RFI.

One circumstance where that could be justified is if there were no intention to repay the loan.

Another might be where the borrower has insufficient funds to repay the loan (other than the borrowed money).

52 Contrast 72.6 (“Provide”). The position would be different if the loan is a fixed-term loan at a low rate of interest as then R’s promise to repay is not full consideration, but that case would be unusual.

10.14.6 *T subscribes for shares in R Ltd*

Suppose T uses RFI to subscribe for shares in a company which is a relevant person (“R Ltd”). The shares are clearly derived from the income.

It is considered that the proceeds of the share subscription in R Ltd are also derived indirectly from the income. But (assuming an arm’s length share subscription) some obvious difficulties do arise from this view, and the contrary could be argued.

10.14.7 *T purchases shares in R Ltd (secondhand companies)*

Suppose T uses RFI to purchase the shares in R Ltd (a relevant person). R Ltd already owns assets. The assets of R Ltd are not derived property: they do not derive from the RFI.

10.14.8 *Receipt of cheque in UK*

Suppose T receives in the UK a cheque which, if cashed, the proceeds would be foreign income. For instance, a cheque representing a dividend from a non-UK resident company, or a cheque drawn on a foreign account holding unremitted income of T. A cheque has a twofold character:

- (1) It is an instruction to the payor’s bank and
- (2) It is also a chose in action which entitles the payee to sue on it.⁵³

Under neither character is the mere receipt of the cheque a taxable remittance.⁵⁴ So far as the cheque is an instruction to pay:

⁵³ Fox, *Property Rights in Money* (2008) para 5.18, 5.64.

⁵⁴ This continues the pre-2008 law. The former RDR (discussing the pre-2008 remittance basis) provides:

“36110. Cheques received

If a taxpayer receives a cheque which represents taxable foreign income, before it is treated as taxable remittance it is necessary for the taxpayer to do something with it after it came into his or her hands.

For example, the cheque might be:

- Credited to a UK bank account
- Exchanged for cash (through a bank or otherwise)
- Accepted by a third party in settlement of a debt owed by the taxpayer
- Given away to a relative

A taxable remittance is not made if a cheque is received in the UK but is then sent abroad and credited to a bank account which the taxpayer has overseas.”

It is not enough to complete the beneficiary's title to the proceeds of the transfer that the beneficiary [ie payee] or his or her bank receives the payment instruction. This is the case whether the instruction is embodied in a telex or telephone instruction given by the originator [payor] or a standing order or payment order form. The instruction only confers on the originator's bank the necessary mandate to make the payment to the beneficiary as his or her agent and to debit his or her account.⁵⁵

So far as the cheque is a chose in action, a promise to pay, it is a different asset from the funds in the account, and so not derived property. Also, the chose in action is not UK situate (regardless even if the paper itself is in the UK) unless the cheque is a bearer instrument.⁵⁶

Even if the cheque is not sent abroad, but presented to a bank in the UK, there is still no remittance provided that the credit is made to the payee's foreign account, not to a UK account.

10.14.9 *Borrowing on security of foreign income/gains*

It is helpful first to consider the position for unsecured loans. If T borrows without giving security the borrowed money is derived from the promise to repay. That is so even if T owns assets (say, RFI) and the lender would not lend had T not owned those assets. The fact that the lender only lends because of the RFI does not show that the borrowed money is derived from the RFI. No-one would doubt that.

Suppose T borrows on the security of RFI. Is the borrowed money derived from the RFI? It is considered that in this case the borrowed money is still derived from the promise to repay and not from the security. This is clearly so if T could have borrowed without giving the security.

That is still the case even if T could not have borrowed without giving that specific security. There are three reasons for this view:

- (1) The position is analogous to unsecured loans where no-one suggests that borrowed money is derived from the borrower's RFI even T could not have borrowed were it not for that RFI.

⁵⁵ Fox, *Property Rights in Money* (2008) para 5.64.

⁵⁶ Cheques drawn on UK banks have generally been non-transferable since the Cheques Act 1992.

- (2) A rule which says that borrowed money is derived from a security if and only if the borrower needed the security in order to borrow is not workable: the question whether the security is needed is often imponderable.
- (3) The debt remittance rules⁵⁷ are designed to cover this aspect of remittances and that suggests that there would not be a remittance under general principles.

For these reasons it is considered that borrowed money is derived from the promise to repay, not from assets used as security, even if T could not have borrowed without giving that security.

In *West v Trennery* 76 TC 713, trustees held shares and borrowed money on the security of the shares. One question was whether the borrowed money was derived property for the purposes of s.77 TCGA (now repealed). Section 77(8) TCGA at that time provided (somewhat tersely):⁵⁸

- In this section “derived property”, in relation to any property, means
- [a] income from that property or
 - [b] any other property directly or indirectly representing
 - [i] proceeds of, or
 - [ii] of⁵⁹ income from, that property
 - [c] or income therefrom.

So the question was whether the borrowed money directly or indirectly represented the proceeds of the shares. Lord Millett said:

16. The final question is whether the Revenue are correct in contending that the [borrowed] moneys ... constituted derived property within the meaning of s 77(8) in relation to the Einkorn shares. There can be only one answer to this: of course they do. The [borrowed] moneys ... directly

57 See 10.18.2 (Use as security for debt).

58 In 2006 the definition was amended with retrospective effect, only to be repealed in 2008.

59 At first sight the word “of” appears to be a grammatical error, but it makes sense if one understands the words to mean:

[i] proceeds of, or
[ii] [proceeds] of income from,
that property...

represented the proceeds of a mortgage of the Einkorn shares ... If the trustees ... had invested the moneys in stocks and shares, these would have indirectly represented those proceeds. It will be observed that I have equated the proceeds of a mortgage of property with the proceeds of the property itself. But the subsection does not refer to “the proceeds of a sale of that property”, but to “the proceeds of that property”; and this covers any proceeds, whether sale or mortgage or otherwise howsoever, by which value is extracted from one property and transferred to another.⁶⁰

It is considered that this case is of no relevance, since the statutory words on which the decision rests are not present in the remittance basis provisions.

In practice HMRC appear to accept this view; see 10.18.2 (Use as security for debt).

10.14.10 *Income/gains used to pay debt*

Suppose:

(1) T borrows from L and receives “the borrowed money”.

(2) T uses RFI to repay the debt to L so L receives “the repaid money”.

In the absence of a statutory provision, the borrowed money would not be derived from the RFI. It is not derived from the RFI at the time of the borrowing. It does not become derived from the RFI later when the debt is repaid.⁶¹ However, s.809R(3) ITA needs to be considered: see 12.3.5 (Income/gains used to repay debt).

It is considered that the repaid money in the hands of L is not derived from the RFI. It is derived from the debt, and (indirectly) from the money which L may have used to make the loan to T.

10.14.11 *Income from income/gains*

Suppose:

⁶⁰ Likewise Lord Walker said:

“In my opinion the £770,000 [borrowed money] started off as derived property...”

⁶¹ The position could be different if the two steps formed part of a scheme and were carried out in quick succession. Of course, under the debt remittance rules there would be a remittance of the RFI if the debt were a relevant debt.

(1) T receives £1m (“original income”).

(2) T invests the original income and receives £50k (“new income”).

It is considered that the new income is not derived from the original income. One must stop tracing the original income at that point. Otherwise various odd results will follow:

(1) If T remits the £50k new income, T would pay tax on the £1m original income.⁶²

(2) Suppose:

(a) T gives £1m original income to R (a relevant person).

(b) R receives £50k new income.

(c) R brings the £50k new income to the UK.

If the new income is derived from the original income, there will be double taxation:

(i) R will pay tax on the new income (on an arising or remittance basis, depending on whether R is a remittance basis taxpayer; that makes no difference for the purposes of this example).

(ii) T would pay tax on the remittance of the new income by R.

10.14.12 *Gift on to third person*

The position becomes more complex if a second individual is involved. Suppose:

(1) T gives income/gains to A (an individual who may or may not be a relevant person).⁶³

(2) A gives the fund to B (a relevant person).

It is suggested that the funds in the hands of B are derived property if steps (1) and (2) form an arrangement. If there is no connection of that kind between T’s gift and the transfer to B, the funds in B’s hands are not derived property. The chain of derivation stops there. In particular, if B acquires the funds on the death of A, the funds are not derived property.⁶⁴

If T gives income/gains to a trust and the trustees appoint the fund to B, the same approach should be applied, but the two steps do form an arrangement because the trustees is merely carrying out the intention of

62 See 10.23.2 (Remittance of derived property).

63 If A is not a relevant person, A will be a gift recipient, and remittance condition C needs consideration.

64 This view is supported a little by s.48(3C)(b) IHTA: see 58.17.3 (Purchased equitable interest).

the settlor and is not a wholly independent mind.⁶⁵ So the funds in the hands of B are derived property.

10.15 Debt remittance rules

I turn to the second part of remittance condition B. Section 809L(3) ITA provides:

Condition B is that ...

- (c) the income or chargeable gains are used outside the UK (directly or indirectly) in respect of a relevant debt, or
- (d) anything deriving (wholly or in part, and directly or indirectly) from the income or chargeable gains is used as mentioned in para (c).

I refer to these rules as the “**debt remittance rules**”.

In order to have a debt remittance under condition B, three conditions must be satisfied; in short:

- (1) A *relevant debt* (broadly, relating to property brought/received/used in the UK).
- (2) Foreign income/gains used *in respect of* the debt.
- (3) The income/gains are used *outside the UK*; however if the income/gains are used in the UK, there will normally be a remittance under the usual remittance rules.

There is no remittance under the debt remittance rules:

- (1) if a relevant debt is paid out of a sum which does not constitute foreign income/gains; or
- (2) if foreign income/gains are used to satisfy a debt which is not a relevant debt.

“Debt” is not defined. It is suggested that it includes any liability to pay money. If an individual holds a lease, the payment of rent is the payment of a debt. If the land is UK situate, the debt is a relevant debt. A guarantee is not a debt but if the guarantee is called on, it becomes a debt.

⁶⁵ See *Williams v Muir* [1943] AC 468 at p.483 in relation to a special power of appointment, as contrasted with a general power: “It is as though the settlor had left a blank in the settlement which B fills up for him if and when the power of appointment is exercised. The appointees' interests come to them under the settlement alone and by virtue of that document.”

10.16 Relevant debt

“Relevant debt” is a key term, which is found in remittance conditions B, C and D. Section 809L(7) ITA provides the definition.

There are six categories of relevant debt:

In this section “relevant debt” means a debt that relates (wholly or in part, and directly or indirectly) to—

- (a) property falling within subsection (2)(a) [property brought/received/used in the UK].
- (b) a service falling within subsection (2)(b) [service provided in UK]
- (c) qualifying property dealt with as mentioned in subsection (4)(a),
- (d) a service falling within subsection (4)(b),
- (e) qualifying property dealt with as mentioned in subsection (5)(a), or
- (f) a service falling within subsection (5)(b).

To understand this one must read back in the words in the six cross-references:

- (a) and (b) relate to remittance condition A
- (c) and (d) relate to remittance condition C
- (e) and (f) relate to remittance condition D.

When one reads in the words, it is clear that para (f) is otiose: it only repeats para (d).

In para (e) “*Qualifying* property dealt with as mentioned in s.809L(5)(a)”, the word “qualifying” is meaningless. The expression “qualifying property” is defined for remittance condition C but not for condition D.

The most important category is para (a). The discussion below concentrates on this category. There are two steps in deciding whether a debt is a relevant debt within para (a):

- (1) One must identify the property (if any) to which the debt relates. I refer to that as “**the asset**”.
- (2) One must ask if that property is “property falling within s.809L(2)(a)” ie the property is brought/received/used in the UK by a relevant person.

The residence of the lender is not relevant. A loan from a UK bank is not a relevant debt if the money borrowed is received and retained outside the

UK but it is a relevant debt if the money borrowed is received in the UK. However the debt remittance rules only apply if income/gains are used *outside the UK* in respect of a relevant debt, which is not likely to happen where the loan is to a UK bank: repayment to a UK bank is in principle use of the funds in the UK.

10.17 Debt “relating” to property (debt-related asset)

“Relates” requires some nexus between the debt and the property; exactly what that nexus is has been left to the courts to sort out.

The words “directly or indirectly” do not add any clarity; indeed I am not sure that it is altogether coherent to speak in the abstract of direct and indirect relationships, for “relates” requires a relationship and an indirectly relationship is a type of relationship. But the word “indirectly” shows that the drafter did not want the word “relates” to be construed very narrowly.

In the following discussion I just use the word “relate” and leave “directly or indirectly” to be understood.

10.17.1 *Some straightforward examples*

Suppose T borrows and receives money. The debt relates to the money. If T receives the borrowed money in the UK, the debt is a relevant debt.

If T borrows and receives the borrowed money outside the UK, the debt still relates to the money but the money is not “property falling within s.809L(2)(a)” so the debt is not a relevant debt. However if T later brings the money to the UK, it becomes “property falling within s.809L(2)(a)” and the debt at that time becomes a relevant debt.

Under a typical loan facility, T will borrow but may not receive money: T may draw down the borrowing to pay for an asset, the money being paid directly to the vendor. In that case the debt relates to the asset. If at any time T brings/receives/uses the asset in the UK the debt is a relevant debt. It makes no difference whether the loan is drawn down first or (which may be more usual) drawn down directly to pay for the asset.

The RDR Manual provides some examples which are consistent with the above. I here set out the relevant parts of the text, relegating the full text to footnotes.

Example 1 concerns borrowing to buy UK shares.

*Example 1 (Katrina)*⁶⁶

K borrows money to buy shares in a UK company.

The HMRC analysis is as follows:

This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person.

More analytically, the debt is in the HMRC view a relevant debt on the following grounds:

- (1) The debt relates to the shares. (This is correct).
- (2) The shares are received in the UK by K. This assumes a receipt of UK situate property is a receipt in the UK: see 10.11.10 (Receipt of UK situate investment asset)).

Example 2 concerns borrowing to buy UK residential accommodation:

*Example 2 (Gary)*⁶⁷

G borrows money to buy an apartment in the UK which he occupies.

The HMRC analysis is as follows:

The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (G).

More analytically, this is in the HMRC view a relevant debt on one or both of the following grounds:

66 The example in full (including its irrelevant detail) is as follows:

“33160 Condition B - relevant debt [May 2012]

In May 2006 Katrina, a remittance basis user, borrows money from an overseas bank to buy shares in a UK company. This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person (Katrina).

From 6 April 2008 any foreign income or gains that Katrina uses in respect of the loan, for example to service or to repay the loan, are taxable as a remittance.”

67 The example in full (including its irrelevant detail) is as follows:

“On 6 April 2015, Gary, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull.

The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (Gary).”

- (1) It relates to the flat which is used in the UK by G. (This is correct).
- (2) It relates to money which is used in the UK by G. Whether this is correct depends on the details of the purchase arrangement but it does not matter since the debt is a relevant debt under (1)).

Example 3 concerns borrowing to buy a UK chattel for a relevant person.

*Example 3 (Robina)*⁶⁸

R borrows money to buy a car for M, a relevant person.

The HMRC analysis is as follows:

The loan is a relevant debt because it is respect of⁶⁹ property (the car) which is used in the UK by a relevant person (M).

More correctly, there is a relevant debt because:

- (1) The debt relates to the car.
- (2) The car is used in the UK by a relevant person, M. (Another reason is that the car must have been brought or received in the UK by R or M.)

Example 4 concerns borrowing to pay for two services, one provided in and the other out of the UK; I discuss this at 10.17.13 (Debt relating to UK property in part).

Example 5 concerns borrowing to purchase an asset given to a relevant person; I discuss this at 10.17.6 (Debt-related asset given to another person).

Example 6 (Francine) is a straightforward example of borrowing to pay for services in the UK which adds nothing and so is not set out here.

For example 7, see 10.17.12 (Borrowing by relevant person (not the individual)).

⁶⁸ The example in full (including its irrelevant detail) is as follows:

“In October 2012 Robina, a remittance basis user, borrows money on a fixed-rate loan from an overseas bank to buy a car for Mark, a relevant person. Robina pays £x each month from 1 November 2012, making 24 monthly payments. She uses her foreign chargeable gains to make these repayments.

The loan is a relevant debt because it is respect of property (the car) which is used in the UK by a relevant person (Mark).”

⁶⁹ The author of the example probably regarded “relates to” and “in respect of” as synonymous, which no doubt they are; but it is best to use the statutory wording and not a paraphrase.

10.17.2 *Asset derived from debt-related asset*

Suppose:

- (1) T borrows and uses the borrowed money to purchase a non-UK asset (“asset 1”).
- (2) T later sells asset 1 and uses the proceeds of sale to purchase a UK asset (“asset 2”).

The debt relates to asset 1. It is considered that the debt does not necessarily relate to asset 2. The word “relates” requires more than just a historic tracing exercise. It is suggested that the debt relates to the UK asset if and only if steps (1) and (2) form part of an arrangement.

Similarly, suppose:

- (1) T borrows.
- (2) The borrowed funds (or proceeds representing them) are mixed with other funds.
- (3) Some of the mixed funds are used to acquire a UK asset.

Unless steps (1) to (3) form part of an arrangement, the debt does not relate to the UK asset. If the debt does relate to the asset, some commonsense tracing rules must be devised; the ITA mixed fund regime does not apply.

Suppose T borrows invests the borrowed funds, and receives income from the borrowed funds. It is considered that the debt does not relate to the income. So if the income is remitted, it is in principle taxable, but the debt does not thereby become a relevant debt.

10.17.3 *Debt relating to asset later removed from UK or ceasing to exist*

Suppose:

- (1) T borrowed to acquire an asset.
- (2) T brings/receives the asset in the UK so the debt is a relevant debt.
- (3) T later takes the asset outside the UK.

The debt still relates to the asset. It is suggested that the asset is still “property falling within s.809L(2)(a)” ie property brought/received/ used in the UK by T. So the debt is still a relevant debt. The contrary view gives some scope for planning/avoidance. Suppose T wanted to use property/chattels in the UK:

- (1) T borrows funds.
- (2) T uses the funds to purchase property in the UK and chattels which are in the UK or which are brought to the UK.

- (3) Interest rolls up on the debt.
- (4) Later when T no longer wants to use the property/chattels, the chattels are taken outside the UK, and the property is sold.
- (5) The debt is then repaid.

If my view is wrong, the debt has ceased to be a relevant debt by the time it is repaid so there is no remittance, even though T may have enjoyed substantial benefits in the UK.

Refinancing might solve the tax problem.⁷⁰

Suppose:

- (1) T borrowed to acquire an asset.
- (2) T brings/receives the asset in the UK so the debt is a relevant debt.
- (3) The asset ceases to exist (eg it is a short lease which expires, or money which is spent).

It is considered that the debt remains a relevant debt. That is consistent with debt remittance rules for services, for if T borrows to pay for services provided in the UK, the debt is a relevant debt even after the services have ceased to be provided.

10.17.4 *Borrowed money used to repay debt: refinancing*

Suppose:

- (1) T borrows and uses the borrowed money to acquire property brought/received/used in the UK. The debt (“debt 1”) is a relevant debt.
- (2) T borrows more (“debt 2”) and uses the borrowed funds to repay debt 1.

It is suggested that debt 2 is a relevant debt if the steps form a scheme or arrangement.

On the other hand suppose there is no UK asset at the time of step 2 (the refinancing), eg:

- (1) T borrows and
 - (a) brings the borrowed money to the UK and later takes it out again;
or
 - (b) uses the borrowed money to acquire UK property which is later sold and the proceeds taken out of the UK or
 - (c) spends the borrowed money in the UK.

⁷⁰ See 10.17.4 (Borrowed money used to repay debt: refinancing).

In each case the debt (“debt 1”) is a relevant debt.

(2) T borrows more (“debt 2”) and uses the borrowed funds to repay debt 1.

It is suggested that debt 2 is not a relevant debt (unless the steps form part of a single arrangement).

Suppose:

(1) T borrows (“the first debt”) and receives fund A.

(2) T borrows again (“the second debt”) and uses the money borrowed on the second debt to repay the first debt. Thus T retains fund A.

It is suggested that the second debt relates indirectly to fund A if the two steps form a single arrangement, but not otherwise.

10.17.5 *Borrowed money lent on to another person*

The position becomes more complex if borrowed money is lent on to another person. Suppose:

(1) T borrows money from a bank.

(2) T lends the borrowed money to A.

(3) A uses the money to acquire a UK asset (“A’s UK asset”).

In this case:

(1) T has a debt: the burden of the debt to the bank (“T’s debt”). One needs to ask if it is a relevant debt.

(2) A has a debt: the burden of the debt to T (“A’s debt”). One needs to ask if it is a relevant debt.

(3) T has an asset: the benefit of A’s debt to T: one needs to ask if it is UK situate.

(4) A has an asset: “A’s UK asset”.

A’s debt is a relevant debt: it relates to A’s UK asset.

Is T’s debt a relevant debt? T’s debt relates to the benefit of A’s debt. If the benefit of A’s debt is a UK situate asset, then T’s debt is a relevant debt. Let us assume this is not the case.

T’s debt is also a relevant debt if (1) it relates (indirectly) to A’s UK asset and (2) A is a relevant person in relation to T. It is suggested that T’s debt does not relate to A’s UK asset. This is clearly the case if steps (1) and (2) do not form an arrangement. If there is no connection of that kind between T’s debt and the UK asset, the debt does not relate to the asset. But even if there is an arrangement, T’s debt does not relate to A’s UK asset, since T has another asset which relates to the debt. There is no

scope for tax avoidance in this conclusion, since the debt remittance rules apply to A.

If my view is wrong, what would the position be if:

- (1) T borrows from a bank and lends to A.
- (2) A lends the proceeds of the borrowing to B.
- (3) B uses the money to acquire a UK asset.

How many assets would T's debt relate to, and how could T keep track of them all?

10.17.6 *Debt-related asset given to another person*

RDR Manual 33160 gives an example of borrowing to purchase an asset which is later given to a relevant person and brought to the UK:

*Example 5 (Ali)*⁷¹

A borrows to purchases a sculpture outside the UK.

71 The example in full (including its irrelevant detail) is as follows:

“33160 Condition B - relevant debt [May 2012]

Ali, a remittance basis user, purchases a sculpture in Sweden in October 2012 (see earlier example). He takes out an interest-free [*sic*] loan with his US bank to fund this purchase, repayable within 1 year. In November 2012 he gives them to his wife as an anniversary gift.

She initially keeps it at her mother's home in Stockholm, but 6 months later in March 2013 Ali's wife decides to bring the sculpture to the UK to display in her UK garden. In October 2013 Ali arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami, which he had purchased in May 2011, using his relevant foreign earnings, and some capital inherited from an uncle.

There is a debt (the loan from the US bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (Ali's wife, in March 2013).

The painting which derives, in part, from A's relevant foreign earnings, is used outside the UK in respect of this relevant debt.

There is a taxable remittance in 2013-14, the tax year in which the painting is used to pay the relevant debt.”

More analytically, remittance condition B is satisfied under s.809L(3)(d): the picture (which derives from RFE) is used in respect of the relevant debt. The example continues:

“The remittance occurs when the foreign income or gains are regarded as used in respect of the relevant debt (2013-14) not when the property is first used in the UK by a relevant person (2012-13). ...

NB – for the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank.”

A gives the sculpture to his wife W.
W brings the sculpture to the UK.

HMRC correctly analyse why the debt is a relevant debt:

There is a debt (the loan from the bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (W).

Suppose:

- (1) T borrows money from a bank.
- (2) T gives the borrowed money to R.
- (3) R uses the money to acquire a UK asset ("R's UK asset").

Is T's debt a relevant debt? T's debt is a relevant debt if (1) it relates (indirectly) to R's UK asset and (2) R is a relevant person in relation to T.

It is suggested that T's debt relates to R's UK asset if and only if steps (1) and (2) form an arrangement. If there is no connection of that kind between T's debt and the R's asset, the debt does not relate to the asset.⁷²

10.17.7 *Borrowed money used to buy secondhand company*

Suppose T borrows and buys all the shares of a company which owns a UK asset ("the Co's asset"). The debt relates to the shares. At first sight it may seem likely that the debt also relates to the Co's asset. But note that if T uses foreign income to purchase the shares, the income is not remitted. That being the case, it would be anomalous if there were a remittance if T borrows to purchase the shares and then uses foreign income to pay the debt. So the debt should not be regarded as a relevant debt: the debt does not relate to the Co's asset. One does not lightly pierce the corporate veil.

10.17.8 *Borrowed money used to buy partnership interest*

Suppose T borrows and buys an interest in a partnership which owns a UK asset. It is suggested that the debt does not relate to the UK asset.⁷³

⁷² Contrast 10.14.12 (Gift to third person).

⁷³ See 10.28 (Partnerships).

10.17.9 *Debt for unpaid interest*

Suppose one has two debts:

- (1) A debt for capital borrowed (the principal debt).
- (2) A debt for interest on the principal debt (the interest debt).

The fact that the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) does not make the interest debt a relevant debt. This follows from the repeal of the former s.809L(8) ITA in 2009. However see 10.18.1 (Payment of interest).

10.17.10 *Borrowing on security of UK asset*

Suppose T borrows and receives the borrowed money abroad but secures the debt on property brought/received/used in the UK. It is considered that the debt does not relate to the UK property (within the meaning of the section) so the debt is not a relevant debt. The context shows that the colourless word “relate” is intended to apply to the proceeds of the debt, the borrowed money. Otherwise there would be a remittance when the debt is repaid, which is absurd.⁷⁴

10.17.11 *Debt imposed by law*

Debts may be imposed by law. Court orders on divorces are not relevant debts (they do not relate to property brought received/used in the UK) and indeed the obligation may not be a “debt”. So the debt remittance rules do not apply. Similarly, fines imposed by the courts do not in principle relate to property brought/received/used in the UK.

There might, however, be a remittance under ordinary principles when the court order is satisfied.

A tax liability relating to foreign income or gains is not a relevant debt, but it might be argued that a tax liability relating to UK income or gains, or remitted RFI and foreign gains, does relate to UK property.

10.17.12 *Borrowing by relevant person (not the individual)*

Suppose:

⁷⁴ The debt would not be a relevant debt if T first took the UK security outside the UK, which would be somewhat odd.

- (1) R (a relevant person - not the individual) borrows to purchase an asset.
- (2) R receives or uses the asset in the UK (so the debt is a relevant debt). The debt is a relevant debt and if T uses their income/gains to repay it there is a taxable remittance.

It is suggested that this is the case even if R ceases to be a relevant person before T uses their income/gains to repay the debt, since even at that time the debt relates to the asset, and the asset is property falling within s.809L(2)(a); but the contrary is arguable.

The RDR Manual 33160 provides an example:

*Example 7 (Kumar)*⁷⁵

K is settlor of a non resident settlor-interested trust.

The trust borrows to buy an asset which K uses in the UK.

The HMRC analysis is as follows:

There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person).

More analytically, the debt is a relevant debt since:

- (1) It relates to the UK asset.
- (2) The asset is used in the UK by a relevant person (K).

Thus if the debt is repaid out of foreign trust income, K is chargeable under the s.624 remittance basis.

That applies even to pre-2008 debts. There is transitional relief if pre-2008 income/gains are used to repay the debt (wherever made).⁷⁶

⁷⁵ The example in full (including its irrelevant detail) is as follows:

“33160 Condition B - relevant debt [May 2012]

Example 7

Kumar sets up and is a beneficiary of a non resident trust with £1,000,000 capital which the trustees invest in overseas property which produces income that would be chargeable on Kumar if he remitted it to the UK.

The trust borrows £500,000 from an offshore lender to buy a UK asset which Kumar uses in the UK. The trust pays the interest on the loan with the income from the letting of the overseas property.

There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person). The income used to service the loan is regarded as a taxable remittance, chargeable on Kumar.”

⁷⁶ See 10.8 (Relevant person transitional rule for pre-2008/09 income and gains).

However, transitional relief for pre-2008 debts⁷⁷ does not apply in this case.

10.17.13 *Debt relating to UK property in part*

If a debt relates partly to property brought/received/used in the UK, the entire debt is a relevant debt. The unfairness is avoided by the rules in s.809P: see 10.23.3 (Debt remittances). But HMRC do not agree. In RDR Manual the facts (stripping out irrelevancies)⁷⁸ are as follows:

Example 4 (Karen)

K borrows:

- to pay UK school fees for her 14 year old daughter.
 - to pay for a summer school in France for the daughter.
- K repays the overdraft from her relevant foreign earnings.

The HMRC analysis is:

There is a debt (the overdraft) which relates in part to a service provided in the UK (the schooling) to a relevant person (the daughter) – this part is a relevant debt. However part of the overdraft facility is not a relevant debt because it does not relate to a service provided to the daughter in the UK, but to a service provided in France.

The author has overlooked the definition of relevant debt in s.809L(7) ITA:

⁷⁷ See 10.33 (Transitional loan relief).

⁷⁸ The example in full (including its irrelevant detail) is as follows:

“33160 Condition B - relevant debt [May 2012]

Example 4

In August 2011 Karen, a remittance basis user, uses an interest-free [*sic*] overdraft facility on her Jersey bank account to pay UK school fees for her 14 year old daughter Lauren. She also uses the remainder of the facility to pay for Lauren to attend a summer school in France organised by a French university. Karen repays the overdraft from her relevant foreign earnings between August and November 2011. ...

The daughter therefore has taxable remittances of the relevant foreign earnings used to service and repay the part of the overdraft that is a relevant debt.”

In this section "relevant debt" means a debt that relates (*wholly or in part*, and directly or indirectly) to—

- (a) property falling within subsection (2)(a),
- (b) a service falling within subsection (2)(b) ...

10.18 “Use in respect of” a relevant debt

Condition B is satisfied only if income/gains are used in respect of the relevant debt.

Use “in respect of” a debt requires some nexus between the use and the debt; exactly what that nexus is has been left to the courts to sort out.⁷⁹ The words “directly or indirectly” do not add any clarity. Indeed I am not sure that it is altogether coherent to speak in the abstract of use “directly or indirectly” in respect of a debt, for use indirectly in respect of a debt is use in respect of a debt. But the word “indirectly” shows that the drafter did not want the words “in respect of” to be construed narrowly.

In this section I sometimes refer simply to a debt rather than a relevant debt, ie I assume the debt is a relevant debt.

If foreign income/gains are used to pay a relevant debt, this is a taxable remittance under the debt remittance rules: money used to pay a debt is used in respect of a debt.

10.18.1 *Payment of interest*

Section 809L(9) ITA provides:

The cases in which property (including income or chargeable gains) is used in respect of a debt include cases where the property is used to pay interest on the debt.

Suppose T has two debts:

- (1) A debt for capital borrowed (the principal debt).
- (2) A debt for interest on the principal debt (the interest debt).

We note above that it is possible that:

- (1) the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) but

⁷⁹ In *Cunard's Trustees v IRC* 27 TC 122 at p.135 Lord Greene MR described the phrase “in respect of” as “colourless words”.

(2) the interest debt is not a relevant debt.⁸⁰

However if T uses foreign income/gains to pay the interest debt, the funds are regarded as used in respect of the *principal* debt, and so are regarded as remitted under s.809L(3)(c). In other words, it does not matter whether or not the interest debt is a relevant debt, all that matters is whether the principal debt is a relevant debt.

10.18.2 *Use as security for debt*

Suppose foreign income/gains are charged as security for a debt. It appears at first sight that the funds are “used” and (if used) the funds are certainly used “in respect of” the debt. On this view charging funds as security for a debt constitutes a remittance. However the word “used” might connote “used up” ie consumed; in that sense (unless and until the security is enforced) the funds are not “used”, and the charge does not constitute a remittance.

I have considered a compromise view, that the funds are “used” in circumstances where the loan would not be made without the security, and funds are not “used” if the circumstances are that the loan would be made anyway. On reflection I think that is not an attractive view. Among other objections, the question whether the loan would be made without the security is a hypothetical question which would often be imponderable.

The RDR Manual provides:

33170 Condition B - collateral⁸¹ in respect of relevant debt
[December 2011]

Foreign income and gains may be used as collateral for a loan which is brought to the UK or otherwise used for a purpose to which ITA2007/s809L(2) applies (that is, there is a relevant debt).

Such foreign income and gains used as collateral are used ‘in respect of’ the relevant debt, so there may be a taxable remittance at this point.

[1] The foreign income or gains used as collateral may be used directly, that is, the lender may receive a charge over cash assets in a bank account.

⁸⁰ See 10.17.9 (Debt for unpaid interest).

⁸¹ [Author’s footnote] A note on terminology. The author of this passage is using the word “collateral” as a synonym of “security” though that is (I think) American rather than English legal usage.

[2] However it is more likely they will be offered indirectly, often in the form of an asset such as a property or bond note that is ‘derived from’ the foreign income or gains.⁸²

[3] This situation only arises where remittance basis users offer their foreign income or gains for use as collateral for a relevant debt, whether to a UK-based or an offshore lender.

[4] In many cases UK property or non-taxable offshore property is offered as collateral in respect of a relevant debt; there is no remittance of this collateral within Condition B (ITA2007/s809L(3)(c)).

To determine the amount of remittance where foreign income or gains are used as collateral in respect of a relevant debt refer to RDRM35050 Condition B - Collateral in respect of relevant debt.

So far the Manual appears to take the view that charging as security is use in respect of a debt, but the text now goes on to qualify that with an exception so large that the rule rarely applies:

Foreign income and gains used to pay interest on the debt and to repay the borrowed capital are also ‘used in respect of’ a relevant debt, and will be taxable as a remittance. Thus there are potentially two possible sources of a taxable remittance charge in respect of the relevant debt – the foreign income or gains used as collateral and the foreign income or gains used to repay the debt.

In the majority of commercial situations, neither party to the relevant debt transaction expects or intends that the collateral offered as security will be taken by the lender. Instead it is planned that the loan will be serviced and the capital repaid without recourse to the security charge. In such cases using foreign income or gains to regularly service or make capital repayments in respect of the relevant debt effectively ‘masks’ the collateral being used. In such cases the only taxable remittance will occur as and when the foreign income or gains are used to service or repay the loan. The payments, and thus the taxable remittances, will be spread over the loan period.

*Example 1: (John)*⁸³

In 2012/13 J, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. J uses the loan to purchase UK property so the loan is a relevant debt.

82 [Author’s footnote]. I rather doubt that [2] is more likely than [1] but it does not matter.

83 I omit a few irrelevancies in setting out the text of this example.

J offers as collateral for the loan an offshore bond. He purchased this bond in 2010 (a year in which he was also UK resident remittance basis user) using £200,000 of his untaxed RFI from that year.

J repays £18,000 of the loan (principle (*sic*) plus interest) in 2012/13, using his RFE.

J is using the offshore bond as collateral for the loan; the offshore bond derives directly from his foreign income so J is using his RFI in respect of the relevant debt. However J is also using his RFE to both service and repay the debt capital; this ‘masks’ the collateral and so J will only be regarded as remitting the £18,000 RFE in 2012/13.

Note – In the example above, the relevant debt could also be serviced and repaid using non-taxable income or capital sources; in which case there would be no taxable remittances of foreign income or gains. However the servicing/repaying of the loan effectively masks the collateral offered, so there is still no remittance of the collateral in this circumstance.

In some cases, usually involving avoidance or non-commercial arrangements, the relevant debt is not serviced or repaid by the borrower, or only a token amount is offered. In these circumstances the foreign income or gains offered as collateral are being utilised in respect of the relevant debt, that is, to delay or minimise service charges or repayments. As there is only one possible tax charge in respect of the relevant debt, that is the charge HMRC will take. The charge is taken up-front when the collateral is offered. Such arrangements are expected to be rare.

This should not be mistaken with interest-only repayment terms, or commercial arrangements that offer payment breaks and so forth. Always check the terms and general availability of the loan arrangements on offer.

If you think there is a remittance of foreign income or gains offered as collateral in respect of a relevant debt you should obtain copies of all the relevant arrangements, including all loan agreements and repayment schedules.

Thus in the HMRC view, security is not “used in relation to a debt” if the debt is “serviced and repaid” on commercial terms. This distinction is difficult to defend, and it is considered that the grant of security is not use in relation to the debt, until the security is enforced.

There may be some special feature in the arrangements which do constitute “use”. Back to back loans may be an example; suppose:

- (1) T deposits foreign income/gains in a bank (“T’s deposit”).
- (2) T borrows from the bank (“the relevant debt”).

(3) No interest is paid on T's deposit and only a small rate of interest is paid on the borrowing.

It is reasonably arguable that the income/gains deposited is used in respect of the relevant debt. But even here, it is suggested that there is no use in respect of the relevant debt, as the funds are not used up or consumed. (On the other hand, if commercial interest rates are paid on the deposit and the borrowing, the deposited funds are clearly not used in respect of the debt.)

It follows that it is only rarely if ever necessary to consider the amount remitted on the grant of security, but the issue is considered at 10.23.4 (Use as security: amount remitted).

10.19 Becoming/ceasing to be a relevant person: conditions A & B

A person may be a relevant person at one time and not at another time. For instance, a child ceases to be a relevant person on becoming 18; a person becomes a relevant person on marriage or cohabitation and ceases to be a relevant person on divorce or separation. A company becomes a relevant person in relation to T if T becomes a participator in the company.

The statute gives no guidance to the application of conditions A and B in this situation. We need to find the answer as best we can in the words of the statute.

10.19.1 Condition A

Section 809L(2) ITA provides:

Condition A is that—

- (a) money or other property is brought to, or received or used in, the UK by ... a relevant person...

For present purposes there are three ways of satisfying condition A: property must be (i) brought or (ii) received or (iii) used in the UK by a relevant person. Property is *brought* or *received* in the UK at a particular moment, and it is considered that the person must be a relevant person at that moment.

Suppose:

- (1) T uses RFI to make a gift of an asset to S (not a relevant person). S brings or receives the asset in the UK. There is no charge at the time of the gift or of the receipt in the UK.
- (2) Later, S becomes a spouse or cohabitee, and so becomes a relevant person. There is no charge at that time.

Likewise if:

- (1) T uses RFI to make a gift of an asset to R (a relevant person). R does not remit the asset to the UK. There is no charge at this time.
- (2) Later, R ceases to be a relevant person, and subsequently brings or receives the asset in the UK. There is no charge at that time.

HMRC agree. In RDR Manual 33150 example 5, the facts (stripping out irrelevancies)⁸⁴ are:

In 2013 W uses foreign chargeable gains to purchase a motorcycle in Paris.

W gives the asset to her husband H. H keeps the bike at his French apartment. [So there is no remittance at this time].

Subsequently, H and W divorce, and H moves from their home [ie H ceases to be a relevant person].

In 2017 H brings his bike to the UK.

The relevant part of HMRC analysis is as follows:

H and W were married and so H was a relevant person in 2013 when W gave him the motorcycle; he could not therefore have been a gift recipient (see Condition C – Gift recipients cannot be relevant persons).

84 The example in full (including its irrelevant detail) is as follows:

“33150 Condition B - remittances derived from income or gain [June 2010]

Example 5

Caroline is a remittance basis user. In August 2013 she realises some foreign assets and so makes some foreign chargeable gains. She uses all the proceeds (and so uses all these gains) to purchase a motorcycle in Paris which she gives to her husband Joel. It is registered in his name. Joel keeps the bike at his French apartment. A few years’ [*sic*] later Caroline and Joel divorce, and Joel moves from their home in Liverpool to Manchester.

In September 2017 Joel and Caroline’s 16 year old son, Joseph wants to learn how to ride a motorcycle, so Joel imports his bike from Paris to his Manchester home for Joseph to use.”

More analytically, condition C is not satisfied.

By 2017 they have divorced so H is not a relevant person when he brings in the motorcycle [to the UK] for S to use.

More analytically, condition A is not satisfied because H is not a relevant person when H brings the asset to the UK.

10.19.2 *Condition B*

Condition B provides (in part):

Condition B is that—

(b) the property, service or consideration [received in the UK]—

- (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
- (ii) in the case of property or consideration, is property of or consideration given by a relevant person ...

It is considered that the requirement in (b)(ii) is met only if the person is a relevant person at the time that condition A is met (ie at the time that the property is brought/received/used in the UK). HMRC agree. The RDR Manual 33120 provides an example (already discussed above in connection with condition A). The facts (so far as relevant) are as set out above with one additional fact:

The motorcycle is used in the UK by C who is a minor child of W (a relevant person).

The HMRC analysis is as follows:

Here, property has been provided in the UK (the motorcycle) for the use of a relevant person (C) ...

More analytically, condition A is satisfied.

...and the property derives directly from W's foreign chargeable gains. However the motorcycle is the property of H, who is not a relevant person [at the time that the property is used by the relevant person], so there is no taxable remittance for W.

More analytically, condition B is not satisfied because H is not a relevant person when the asset is used by the relevant person, C.

To drive the point home, the RDR Manual 33150 gives another example making the same points on somewhat far-fetched facts. So far as relevant⁸⁵ the facts are:

In 2011 W uses RFI to purchase prints retained outside the UK.

W gives the prints to her daughter D who is age 16 and so a relevant person. D retains the prints outside the UK [so there is no remittance]. D ceases to be a relevant person on becoming 18 but in that year (bucking statistics) D has a child GD (who is a relevant person in relation to W).

In 2016 D enters into an (implausible) agreement under which she transfers the prints to the mother of a singing teacher outside the UK in consideration of the teacher giving singing lessons to GD (age only 3) in the UK.

The HMRC analysis is as follows:

A service has been provided in the UK (the singing lessons) for the benefit of a relevant person (GD) ...

More analytically, condition A is satisfied.

...and the consideration for the service (the print) derives from W's RFI. However the consideration is given by D, who is not a relevant person [at the time that condition A is satisfied] and so W has not made a taxable remittance of her relevant foreign income. Rachael is 21 years

85 The example in full (including its irrelevant detail) is as follows:

"33150 Condition B - remittances derived from income or gain [June 2010]

Example 6

In 2011, while visiting New York, Ros, a UK resident remittance basis user, purchases several art prints by H Marecus, an international artist. Ros uses her relevant foreign income to make the purchase. She gives them to her daughter Rachael, who is at that time living and studying in the US, as a 16th birthday present in February 2011. Rachael returns to the UK in May 2011, but leaves the prints at her uncle's New York apartment.

In June 2016 Rachael's 3 year old daughter Abigail decides to start singing lessons in Newcastle. The singing teacher's mother is a collector of Marecus prints, so the teacher agrees with Rachael to accept one of the prints in exchange for the lessons. Rachael arranges for her uncle to send the print from New York directly to the singing teacher's mother in California."

old and so is not a relevant person in June 2016 when she gives the prints in consideration for a service.

More analytically, condition B is not satisfied.

Note – D was 16 years old and so is a relevant person in February 2011 when her mother gave her the prints (see also Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.

The rule of when one applies the relevant person test may work in favour of HMRC. Suppose:

- (1) T uses RFI to make a gift of an asset to S (not a relevant person). There is no charge at this time.
- (2) S becomes a relevant person, and subsequently remits the asset to the UK. There is a taxable remittance at that time.

HMRC agree. The RDR Manual provides an example where the facts (stripping out irrelevancies)⁸⁶ are:

33240 Gift recipients cannot be relevant persons [June 2010]

Example 2

In 2010 T uses RFI to purchase a clock outside the UK.

T immediately gives the clock to S (not a relevant person) and it is kept outside the UK.

S, not being a relevant person, is a gift recipient.

In 2014, T marries S. S becomes a relevant person and ceases to be a gift recipient at this time.

86 The example in full (including its irrelevant detail) is as follows:

“In June 2010 Sam, a remittance basis user, uses £8,000 of her relevant foreign income to make an overseas purchase of an antique clock from a dealer in Denmark. Sam immediately makes a gift of an antique clock to Chris and Jo, who at that time are living in Denmark. The clock is kept at Chris’s family home in Copenhagen. Chris, not being a relevant person, is a gift recipient. Two years later Jo and Chris split up, and in July 2014, Sam and Chris marry. Chris ceases to be a gift recipient at this time. In October 2014 Chris brings the antique clock to the UK to the house that is shared with Sam.”

The example as published is defective in that it must be assumed (though this is not stated) that Chris gave his interest in the clock to Jo (or perhaps the gift was to Jo and not to Jo and Chris).

Subsequently, S brings the clock to the UK.

The HMRC analysis is as follows:

As S is no longer a gift recipient Condition C is not relevant.

However as S is now [in 2014] a relevant person there is a taxable remittance chargeable on T when S imports the clock, under Conditions A and B. This is because

- [1] property (the clock) has been brought to the UK by a relevant person (S) [ie condition A is satisfied] and
- [2] that property derives from T's RFI and the property is property of a relevant person (S) [ie condition B is satisfied]

So far we have considered property brought to or received in the UK. That can happen only at a particular moment. On the other hand, property can be *used* in the UK over a period of time. Suppose:

- (1) Year 1: T uses RFI to make a gift of an asset to S (not a relevant person). S uses and continues to use the asset in the UK eg she buys a house which she occupies. There is no charge at the time of the gift or at the time of the use.
- (2) Year 2: S becomes a spouse or cohabitee, and so becomes a relevant person. She continues to use the property.

Is there a charge in year 2 when S becomes a relevant person? It would be strange if there were a difference between this case and the case of receipt in the UK. It is tentatively suggested that the answer is, no.

10.19.3 *Third persons*

The position becomes more complicated when a third person is involved. Suppose:

- (1) T gives RFI to T's spouse W.
- (2) There is a divorce and W ceases to be a relevant person.
- (3) W transfers the RFI to a trust under which a minor child of T is a beneficiary. The trustee is a relevant person in relation to T.
- (4) The trustee transfers the funds to the minor child who receives them in the UK.

Condition B appears to be satisfied since at the time of the receipt in the UK the funds are the funds of a relevant person. But the trust funds may

not be derived income.⁸⁷

10.20 Debt becoming/ceasing to be a relevant debt

A debt which is not a relevant debt may become a relevant debt. Condition B is (in short) that income is used in respect of a relevant debt. It is considered that the debt must be a relevant debt at the time the income is used.

Suppose:

- (1) Year 1: T borrows and receives the borrowed sum offshore.
- (2) Year 1: T uses RFI to pay the interest (use in respect of the debt).
In year 1 condition B is not satisfied as the RFI is not used in respect of a relevant debt.
- (3) Year 2: T remits the borrowed sum to the UK.
In year 2 the debt becomes a relevant debt, but it is considered that the RFI used to pay interest in year 1 does not become remitted at that time. But if RFI is used to pay more interest in year 2, that RFI satisfies condition B.

10.21 Remittance condition C (gift recipients)

Section 809L(4) ITA provides:

Condition C is that qualifying property of a gift recipient—

- (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
- (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
- (c) is used outside the UK (directly or indirectly) in respect of a relevant debt.

10.21.1 *Enjoyment by a relevant person*

The requirements in (a) and (b) are similar but not the same as remittance condition A. The differences are as follows:

⁸⁷ See 10.14.12 (Gift to third person).

Condition C requirement

Property brought/received/used in the UK

Property *enjoyed* by a relevant person.

Condition A requirement

Property brought/received/used in the UK *by or for the benefit of a relevant person*.

No equivalent in condition A (though the requirement that the property is brought/received/used by or for the benefit of a relevant person is similar.)

The word “enjoyed” in condition C means more or less the same as the word “used” in condition A.⁸⁸ I do not think there is a difference though if there were, the vagueness of the words makes it impossible to say what it may be. The reason for the different word is probably that other parts of condition C are derived from the GWR wording, where the word “enjoyed” is used⁸⁹ so the word enjoyed is copied across to condition C.

10.21.2 *Enjoyment disregards*

Section 809N ITA provides definitions and other supplementary provisions for condition C. Section 809N(1) ITA provides:

This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition C in section 809L.

Section 809N(9) ITA provides three cases where enjoyment is disregarded. Since enjoyment is a requirement of remittance condition C, this disregard amounts to exemption from condition C:

Enjoyment by a relevant person of property or a service is to be disregarded in any of these cases—

- (a) if the property or service is enjoyed virtually to the entire exclusion of all relevant persons;
- (b) if full consideration in money or money’s worth is given by a relevant person for the enjoyment; or

⁸⁸ As to which, see 10.11.9 (Property used in the UK (“used” limb of condition A)).

⁸⁹ See 59.1 (GWR – Introduction).

- (c) the property or service is enjoyed by relevant persons in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

Para (a) and (b) are based on IHT GWR provisions.⁹⁰

Para (c) concerns charitable or public gifts, but it is hard to see that it is needed.

Para (b) is the most important of the three exceptions: I refer to it as “**the full consideration exemption**”.

Suppose:

- (1) T gives pre-2008 RFI to T’s spouse (not a relevant person and so a gift recipient) and the spouse uses the money to buy a house jointly with T; or
- (2) T gives RFI to T’s brother (a gift recipient) and the brother uses the money to buy a property jointly with T.
- (3) The co-owners occupy the property jointly.

It is considered T does not “enjoy” the co-owner’s half share, so condition C is not satisfied in respect of the gifted RFI.

Suppose:

- (1) T gives RFI to T’s adult son S (a gift recipient), and
- (2) S uses the money to purchase a UK residence which is occupied by S, not by T.
- (3) S has a minor child, GS, who also lives in the property.

It is considered that the property is not “enjoyed” by GS, who is merely a licensee of S. Any “enjoyment” by GS is incidental to the primary use by S, and should be ignored. It is different if S leaves the property and GS becomes the occupier (but since GS is by then likely to be 18, S ceases to be a relevant person). HMRC agree. RDR Manual provides:

33270 Remittance Basis: Identifying Remittances: Condition C - Gift Recipients: Remittances - enjoyment by a relevant person ignored [June 2010]

Each case will depend on its particular facts, but broadly, enjoyment by a relevant person is disregarded, and so there is no taxable remittance under Condition C (if there otherwise would be) where the property or service is enjoyed by the gift recipient virtually to the entire exclusion of all relevant person, that is,

90 For (a) see 59.1 (GWR – Introduction); for (b) see para 6 sch 20 FA 1986.

- [1] the gift is genuine and
- [2] any enjoyment by a relevant person is incidental (ITA2007/s809N(9)).

After this somewhat loose paraphrase of the statutory provision, the Manual gives the example we are considering:

For example a minor child may derive benefit from living in the UK with his parents in a house that was purchased using offshore funds gifted by his grandfather (a remittance basis user) to his father, for his father's own use. It is normal for a young child to live with his parents and therefore, in most cases, no advantage over minor children generally is obtained. In this type of circumstance HMRC would generally accept that the minor child's enjoyment of the house was merely incidental to that of his father.

10.21.3 *Gift recipient*

The key terms in remittance condition C are “gift recipient” and “qualifying property”.

Section 809N(2) ITA provides:

A “gift recipient” means a person, other than a relevant person, to whom the individual makes a gift of money or other property that—

- (a) is income or chargeable gains of the individual, or
- (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Strictly one should not use the term “gift recipient” in the abstract. A gift recipient can exist only *in relation to an individual (the donor)*. But where the context is clear it is permissible simply to refer to a gift recipient.

A relevant person cannot be a gift recipient. So in practice gift recipients will be individuals who are not members of the individual's close family, such as parents, adult children, friends and relatives. (Trusts and companies will generally be relevant persons and where they are not, it is unlikely they would or properly could enter into a transaction caught by condition C.)

If T makes a gift to G, and G gives the property to H, H is not a gift recipient in relation to T.

If T makes a gift to a trust, and the trust appoints the property to B, B is not a gift recipient, as T has not made a gift to B.

10.21.4 *Meaning of “gift”*

Section 809N(5) ITA extends “gift” to include disposals at an undervalue:

The individual “makes a gift of” property if the individual disposes of the property—

- (a) for no consideration, or
- (b) for consideration less than the full consideration in money or money’s worth that would be given if the disposal were by way of a bargain made at arm’s length;

but, in a case falling in para (b), the individual is to be taken to make a gift of only so much of the property as exceeds the consideration actually given.

In the phrase “full consideration in money or money’s worth *that would be given if the disposal were by way of a bargain made at arm’s length*” do the italicised words add anything? It is thought not; these words are otiose but they do no harm.

Section 809N(6) ITA is intended to widen this:

A reference to the individual making a gift of property includes a case where—

- (a) the individual retains an interest in the property, or
- (b) an interest, right or arrangement enables or entitles the individual to benefit from the property.

I am unable to make sense of this. The wording is loosely based on s.102A FA 1986 but the context there is different, and s.102A is itself obscure, so that does not shed any light on the matter. Perhaps it is meaningless.

Suppose T makes an interest-free loan to B. The transaction is for full consideration so it is not a gift within s.809N(5). A lender in principle has no interest in the money lent so s.809N(6)(a) does not apply. A loan does not entitle T to benefit from the money lent. B may use that money for himself. It is considered that the loan does not enable T to benefit from the money lent, so s.809N(6)(b) does not apply. B is not a gift recipient.

10.21.5 Meaning of “qualifying property”

Section 809N(7) ITA defines “qualifying property”. There are three categories of qualifying property:

“Qualifying property”, in relation to a gift recipient, is—

- (a) the property that the individual gave to the gift recipient,
- (b) anything that derives (wholly or in part, and directly or indirectly) from that property, or

Para (a) and (b) are what one would expect, but the definition goes on to include something much wider:

- (c) any other property, but only if it is dealt with as mentioned in section 809L(4)(a), (b) or (c) by virtue of an operation which is effected—
 - (i) with reference to the gift of the property to the gift recipient, or
 - (ii) with a view to enabling or facilitating the gift of the property to the gift recipient to be made.

Section 809N(8) ITA is intended to widen this:

In subsection (7)—

- (a) the reference in para (b) to anything deriving from property, and
 - (b) the reference in para (c) to other property,
- includes a thing,⁹¹ or property, that does not belong to the individual but which the individual is enabled or entitled to benefit from by virtue of any interest, right or arrangement.

This is misconceived. Qualifying property will not belong to the individual because it has been given to the gift recipient, so it is not necessary to say that property includes property not belonging to the recipient. Here, as in s.809N(6), the drafter’s desire to achieve the widest possible generality, and avoid any possible gaps in the legislation, has led to incoherence.

91 The reference to a “thing or property” is meaningless. What non-property “thing” could there be?

10.21.6 *Time of remittance*

Section 809L(6) ITA provides a rule which applies for conditions C and D:

In a case where subsection (4)(a) or (b) or (5)(a) or (b) applies to the importation or use of property, the income or chargeable gains are taken to be remitted at the time the property or service is first enjoyed by a relevant person by virtue of that importation or use.

10.21.7 *HMRC examples*

Remittance condition C catches remittances channelled through a gift recipient, which are not caught by conditions A and B.

The RDR Manual provides a straightforward example where the facts (stripping out irrelevancies)⁹² are:

92 The example in full (including its irrelevant detail) is as follows:

33260 Gift recipients - qualifying property

“Example 1(a)

In May 2015 Klimt, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister Helena, a gift recipient.

In October 2016 Helena transfers half of this money to the UK and gives it to Klimt’s wife.

The qualifying property here is the money that Klimt gifted to Helena. That qualifying property is used in the UK and is enjoyed by a relevant person (Klimt’s wife). The use of the gift means there is a taxable remittance on Klimt.

Example 1(b)

In May 2015 Klimt, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister Helena, a gift recipient.

In October 2016 Helena uses half of this money to buy a car in the UK which she makes available to Klimt’s wife to use.

The qualifying property here is the car, which derives from the money that Klimt gifted to Helena. That qualifying property is used in the UK and is enjoyed by a relevant person (Klimt’s wife). The use of the gift means there is a taxable remittance on Klimt.”

There is a similar example in the CG manual:

“CG25342 Meaning Of Remitted To The UK: Gifts Of Money And Assets
[April 2010]

... Torvald claims the remittance basis in 2009-10; in that year he sells a property in Norway and uses the proceeds to buy a car which he gives to his business partner Stig who lives in Oslo. Stig exports the car to the UK and gives Torvald's wife Helga the keys.

T gives money derived from chargeable gains to his sister G (a gift recipient).

(a) G gives half of the money to T's wife W (a relevant person) in the UK.

(b) G uses half of the money to buy a car which W uses in the UK.

Condition C is satisfied in case (a) and (b). Condition B would not be satisfied in case (b) because the car is not property of a relevant person. (Would Condition B be satisfied in case (a)? It depends on whether the money given to W can be said to derive from T's gains, which depends on the facts.⁹³ But since condition C is satisfied, that does not matter either way.)

The RDR Manual 35060 next provides a more challenging example. The facts (stripping out irrelevancies)⁹⁴ are:

T gives RFI to his aunt G (a gift recipient) on terms that G will allow T's wife W to use a property in the UK owned by G, without charge. Several months later G grants a licence to W accordingly.

One analysis of these facts is that T and G have entered into a contract, under which G promises to allow W to use the land in consideration of T's payment (not properly called a "gift") of the RFI to G. In that case there is a straightforward remittance under remittance conditions A and B. It is

In terms of ITA07/S809L(4), the car is qualifying property because it was given by Torvald to Stig. Stig is a gift recipient because he is not a relevant person and he has received a gift of property (the car) that derives from Torvald's chargeable gain. ... The car is brought to the UK and is enjoyed by a relevant person, Torvald's wife. Torvald's chargeable gain on the disposal of his property has therefore been remitted to the UK to the extent that it was used to buy the car. Note that it is the cost of the car, not its market value when it comes to be used in the UK, which fixes the upper limit of the remittance.)"

93 See 10.14.12 (Gift to third person).

94 The example in full (including its irrelevant detail) is as follows:

Linda's husband's family has owned a holiday house in Scotland for many years. In February 2012 Adam, a remittance basis user transfers some of his foreign income and gains to his aunt, Linda, the gift recipient, which she uses to book herself on an around-the-world cruise. Adam gives the money to Linda on the agreement that Linda will provide his wife Clare, a keen painter, with access to the Scottish property.

Several months later Linda provides Clare with an agreement saying that she can use the Scottish house, for which Clare pays nothing.

however assumed (though unstated and factually somewhat implausible) that the arrangement is an informal, non-binding, non-contractual one. In that case condition B is not satisfied.

The HMRC analysis is as follows:

The house cannot be said to “derive from” the income or gains.

More analytically, condition B is not satisfied. But condition C is satisfied:

The house is “other property” [ie within s.809N(7)(c)] used in the UK and enjoyed by a relevant person (W). As the operation which brought the house within Condition C was done with reference to the gift or to enable or facilitate the gift it is qualifying property and Condition C is met.

There is a remittance and tax is chargeable on T. The amount of the remittance is determined by s809P(11)(c).

Suppose the order of transactions was reversed:

- (1) G grants a licence to W to use a property in the UK.
- (2) Later, T gives RFI to G.

Condition C is not satisfied at stage (1) since G is not at that point a gift recipient. At stage (2) G becomes a gift recipient but condition C does not become satisfied. However condition D would need consideration.

The last HMRC example is slightly contrived, in order to illustrate the debt remittance rule in application to remittance condition C. The facts (stripping out irrelevancies)⁹⁵ are:

95 The example in full (including its irrelevant detail) is as follows:

“33270 Condition C - remittances of relevant income or chargeable gains - relevant debt

Fraser, who is a remittance basis user, purchases some non-UK shares in January 2012, using his foreign income and gains. Fraser makes a gift of these shares to his brother, Victor, a fashion designer.

In March 2012 Victor takes out a loan with an offshore bank to purchase a designer table and chairs. Victor brings these table and chairs to the London town house that he and his brother Fraser inherited jointly from their father, and where they both now live. Fraser regularly entertains clients and friends at the house.

Victor uses some of the shares and bonds to pay off the loan.

T purchases non-UK shares using RFI.
T gives the shares to his brother G, a gift recipient.
G borrows to purchase furniture.
T uses the furniture in the UK.
G uses the shares to repay the loan.

The HMRC analysis is as follows:

T has made a gift of property derived from his foreign income (the shares) to G, a gift recipient. The shares are thus qualifying property of a gift recipient.

The loan taken out by G to purchase the furniture is a relevant debt because it relates to property (the furniture) brought to the UK for the benefit of a relevant person (T). T benefits because he uses the furniture. The qualifying property (the shares) of G (a gift recipient) is used outside the UK in respect of this relevant debt. There is a remittance under Condition C.

Suppose T gives RFI to T's adult son S (not a relevant person) and S uses it to buy the house in the UK in which T lives. This is not caught by remittance condition B. (The house is derived property, it derives from the RFI but it is not property of a relevant person.) So it can be caught by remittance condition C under s.809N(7)(a)(b).⁹⁶ The drafter was also concerned that:

- (1) T makes a gift to G (say, an adult son);
 - (2) G makes a gift of other property to T.
- This can be caught by s.809N(7)(c).

10.21.8 Becoming/ceasing to be a relevant person: condition C

Section 809N ITA provides:

- (3) The question of whether or not a person is a relevant person is to be determined by reference to the time when a gift is made.
- (4) But, if a person to whom a gift is made subsequently becomes a relevant person, the person ceases to be a gift recipient.

⁹⁶ See 10.25 (Purchase of family home).

Thus if a gift is made to a relevant person, condition C cannot apply even if they cease to be a relevant person⁹⁷ and so become a gift recipient.

If a gift is made to a non-relevant person, condition C ceases to apply if they become a relevant person. That makes sense because in such a case, remittance conditions A and B may apply.

10.21.9 *Transitional rules: pre-2008 income/gains*

It will be recalled that Para 86(4) Sch 7 FA 2008 provides:

Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

I refer to this as **“the para 86(4) amendment”**. Amended as para 86(4) directs, condition C (set out in s.809L(4)) provides:

- (4) Condition C is that qualifying property of a gift recipient—
 - (a) is brought to, or received or used in, the UK and is enjoyed by a ~~relevant person~~ *the individual*,
 - (b) is consideration for a service that is enjoyed in the UK by a ~~relevant person~~ *the individual*, or
 - (c) is used outside the UK (directly or indirectly) in respect of a relevant debt.

This is consistent with the transitional rule for remittance condition A and B. Since the para 86(4) amendment applies only for s.809L, para 87 Sch 7 FA 2008 has to make further amendments to s.809N:

Section 809N of ITA 2007 (section 809L: gift recipients, qualifying property and enjoyment) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—

- (a) the reference in subsection (2) to a relevant person were to the individual,
- (b) subsections (3) and (4) were omitted, and

⁹⁷ See 10.19 (Becoming/ceasing to be a relevant person: conditions A & B); 10.22.3 (Becoming/ceasing to be a relevant person: condition D)

- (c) the references in subsection (9) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 87 requires, s.809N(2) reads:

- (2) A “gift recipient” means a person, other than ~~a relevant person~~, the individual to whom the individual makes a gift of money or other property that—
 - (a) is income or chargeable gains of the individual, or
 - (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

The words “other than the individual” are meaningless because the individual cannot make a gift to himself. So s.809N(2) means:

- (2) A “gift recipient” means a person ... to whom the individual makes a gift of money or other property that—
 - (a) is income or chargeable gains of the individual, or
 - (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Para 87 does not restrict the definition of “gift recipient”: it *widens* it.

The para 87 deletions of 809N(3)(4) are straightforward amendments consequential on the para 87 amendment to s.809N(2).

The last para 87 amendment is also a straightforward consequential amendment. Amended as para 87 requires, s.809N(9) reads

- (9) Enjoyment by ~~a relevant person~~ the individual of property or a service is to be disregarded in any of these cases—
 - (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ the individual,
 - (b) if full consideration in money or money’s worth is given by ~~a relevant person~~ the individual for the enjoyment, or
 - (c) the property or service is enjoyed by ~~relevant persons~~ the individual in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

The condition C rule for pre-2008 income/gains is not very different from that which applied under the pre-2008 law.

10.22 Remittance condition D (connected operation)

Section 809L(5) ITA provides:

[1] Condition D is that property of a person other than a relevant person (apart from qualifying property of a gift recipient)—

- (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
- (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
- (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,

[2] in circumstances where there is a connected operation.

We need some terminology to grapple with this, and in the following discussion:

“The condition D person” is the non-relevant person whose property is used as set out in (a)-(c), ie (in short) enjoyed by a relevant person.

“The condition D enjoyment requirement” is the requirement in s.809L(5)[1] (in short, that a relevant person enjoys the property of the condition D person in the UK).

The wording of the condition D enjoyment requirement is in large part the same as in remittance condition C.⁹⁸ The same enjoyment disregards apply.⁹⁹ The same timing rule applies. These aspects need not be considered again here.

The RDR Manual provides:

33430 Connected Operation - definition [June 2010]

The property that is brought to the UK, or used outside the UK as consideration for a service or in respect of a relevant debt must not be qualifying property of a gift recipient as this will fall within Condition C. However this restriction relates to the property not the individual, so the same person may be a gift recipient under Condition C and, in other transactions, “a person whose property is used” under Condition D.

10.22.1 “*Qualifying disposition*”

The key terms in remittance condition D are “connected operation” and “qualifying disposition.” Section 809O provides the definitions and other supplemental provisions for condition D.

⁹⁸ See 10.21.1 (Enjoyment by a relevant person).

⁹⁹ Section 809O(6) ITA exactly repeats s.809N(9); for a discussion, see 10.21.2 (Enjoyment disregards).

Section 809O(1) ITA provides:

This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition D in section 809L.

Section 809O(4) ITA defines “qualifying disposition”:

A “qualifying disposition” is a disposition that—

- (a) is made by a relevant person,
- (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c) [ie made to/for the benefit of the condition D person], and
- (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

Section 809O(5) provides an exception:

(5) But a disposition of property is not a qualifying disposition if the disposition is, or is part of, the giving of full consideration in money or money’s worth for the dealing that falls within section 809L(5)(a), (b) or (c).

I do not see the need for that, since if there is full consideration for “the dealing that falls within section 809L(5)(a), (b) or (c)” (in short, for the enjoyment by the relevant person) then the full consideration exemption applies.¹⁰⁰ But it does no harm.

10.22.2 *Connected operation*

Section 809O(3) ITA defines “connected operation”:

A “connected operation”, in relation to property dealt with as mentioned in section 809L(5)(a), (b) or (c), means an operation which is effected—

- (a) with reference to a qualifying disposition, or
- (b) with a view to enabling or facilitating a qualifying disposition.

¹⁰⁰ See 10.21.2 (Enjoyment disregards).

Thus in order to have a connected operation, four requirements must be met:

- (1) There must be a qualifying disposition.
- (2) There must be an operation (but that is so wide it scarcely counts as a requirement).
- (3) There must be a specified link between the operation and the qualifying disposition. (The operation must be effected with reference to/with a view to enabling/facilitating the qualifying disposition.)
- (4) There must be a specified link between the operation and the non-transferor's condition D property. The operation must be "in relation to property dealt with as mentioned in s.809L(5)(a)(b)(c)" ie it must relate to the condition D property.

The RDR Manual comments on requirement (3):

33430 Connected Operation - definition [June 2010]

It is important to note the words "with reference to" and "with a view to enabling or facilitating a qualifying disposition". The nature of the link between the connected operation and the qualifying disposition, or even which comes first, is not specified. This means that a taxpayer cannot avoid a charge to tax by setting up complex structures to disguise foreign income or gains, or to try and "break the link" between something enjoyed in the UK and that income or those gains.

An example would be if T and X enter into an informal non-binding arrangement¹⁰¹ under which:

- (1) X provides a benefit to T in the UK (so the condition D enjoyment requirement is met).
- (2) Subsequently, T gives RFI to X (the qualifying disposition).

The connected operation is the provision of the benefit by X.

10.22.3 *Becoming/ceasing to be a relevant person: condition D*

Section 809O(2) ITA provides:

For the purposes of section 809L(5), the question of whether or not the person whose property is dealt with as mentioned in para (a), (b) or (c)

101 If the arrangement is by way of binding contract (which is likely unless T and X are close relatives or friends) then remittance conditions A and B are satisfied as T's obligation to X will be a relevant debt.

of section 809L(5) is a relevant person is to be determined by reference to the time when the property is so dealt with.

10.22.4 *HMRC examples*

The RDR Manual provides a subtle example where the facts (stripping out irrelevancies)¹⁰² are:

T wishes to use UK land owned by X.

T uses RFI to purchase a yacht outside the UK.

T transfers the yacht to a company owned by X, at an undervalue.

X, with reference to the transfer of the yacht, allows T to use the land rent free.

One analysis of these facts is that T and X have entered into a contract, under which X leases or licenses the land to T in consideration of T's transfer of the yacht to the company. In that case there is a remittance under remittance conditions A and B on the basis that B receives an asset in the UK (a lease or licence) which is derived from B's RFI. It is however assumed (though unstated and factually somewhat implausible) that the arrangement is an informal, non-binding, non-contractual one. In that case condition B is not satisfied.

The HMRC analysis is as follows:

X is not a gift recipient (the yacht was given to his company, not to X).
Condition C cannot therefore apply.

However condition D will apply:

102 The example in full (including its irrelevant detail) is as follows:

“35080 Condition D - remittances of foreign income or chargeable gains [June 2010]

John personally owns a country estate in Cornwall, in an area of outstanding natural beauty. His friend Janet wishes to use the mansion for several important family functions.

Janet is a remittance basis user. She owns a foreign yacht which she bought using her foreign income and gains. On 2 March she disposes of the yacht to a nonresident company for £15,000. John has a controlling interest in that non-resident company. In October, with reference to the transfer of the yacht, John allows Janet full and exclusive use of the estate, rent-free.

[1] X is not a relevant person in relation to T.¹⁰³

[2] There is a qualifying disposition because:

[a] There is a disposal of property (the yacht) which derived from T's income (ITA07/S809O(4)(c))

[b] The disposal was made by a relevant person (T) (ITA07/S809O(4)(a))

[c] The disposal was for the benefit of X (although the disposal was not made directly to X, he benefits from it through his ownership of the company) (ITA07/S809O(4)(b))

[3] X's property [the land] is enjoyed in the UK by a relevant person (T) (ITA07/S809L(5)(a) and ITA07/S809O(4)(b)).

In this example T's advantage is due to a connected operation¹⁰⁴ (ITA07/S809O(3)) and Condition D will be met. Some or all of the foreign income used by T to acquire the yacht will be remitted.

HMRC do not identify the operation, but I think it is X's licencing the land to T; this is indeed a connected operation.

Take the same facts but assume that X was a relevant person in relation to T. Condition D would not be satisfied and there would be no remittance.

Take the same facts in another order:

(1) T uses land owned by X rent-free for a period.

(2) After the end of that period, T transfers RFI to a company owned by X.

Condition D is not satisfied at stage (1) as there is no connected operation. There is no charge at stage (2): one could not say that X's property is enjoyed "in circumstances where there *is* [present tense] a connected operation." But if (as would normally be the case) there is a contract between X and T, there would be a remittance under conditions A and B.

10.22.5 *Transitional rules: pre-2008 income/gains*

It will be recalled that Para 86(4) Sch 7 FA 2008 provides:

103 The HMRC analysis adds that "the company is not a relevant person (as T is not a participator)" but it makes no difference whether or not the company is a relevant person (unless the company brings the yacht to the UK).

104 This wording is a loose paraphrase of the statutory language, but it does not matter.

Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

I refer to this as **“the para 86(4) amendment”**. Amended as para 86(4) directs, condition D (set out in s.809L(5)) provides:

Condition D is that property of a person other than ~~a relevant person~~ *the individual* (apart from qualifying property of a gift recipient)—

- (a) is brought to, or received or used in, the UK, and is enjoyed by ~~a relevant person~~ *the individual*,
- (b) is consideration for a service that is enjoyed in the UK by ~~a relevant person~~ *the individual*, or
- (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,

in circumstances where there is a connected operation.

This is consistent with the transitional rule for remittance condition A and B. Since the para 86(4) amendment applies only for s.809L, para 88 Sch 7 FA 2008 has to make further amendments to s.809O:

Section 809O of ITA 2007 (section 809L: dealings where there is a connected operation) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—

- (a) subsection (2) were omitted, and
- (b) the references in subsections (4) and (6) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 88 requires, s.809O provides:

(4) A “qualifying disposition” is a disposition that—

- (a) is made by ~~a relevant person~~ *the individual*,
- (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c), and
- (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

The last para 88 amendment is also a straightforward consequential amendment. Amended as para 88 requires, s.809N(6) reads

- (6) Enjoyment by ~~a relevant person~~ *the individual* of property or a service is to be disregarded in any of these cases—
- (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ *the individual*,
 - (b) if full consideration in money or money's worth is given by ~~a relevant person~~ *the individual* for the enjoyment, or
 - (c) the property or service is enjoyed by ~~relevant persons~~ *the individual* in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

10.23 Amount remitted

Section 809P(1) ITA provides:

The amount of income or chargeable gains remitted to the UK is to be determined as follows.

Five rules then follow.

10.23.1 *Remittance of actual income or gains*

Section 809P(2) ITA provides:

If the property, service or consideration¹⁰⁵ is the income or chargeable gains, the amount remitted is equal to the amount of the income or chargeable gains.

That seems sensible, indeed self-evident.

10.23.2 *Remittance of derived property*

Section 809P(3) ITA provides:

If the property, service or consideration derives from the income or chargeable gains, the amount remitted is equal to the amount of income

¹⁰⁵ The words “property, service or consideration” relate back to the wording of condition B: property means property brought/received/used in the UK, service means a service provided in the UK, and consideration means consideration for a service provided in the UK.

or chargeable gains from which the property, service or consideration derives.

The RDR Manual provides:

35030 Conditions A & B - remittances derived from foreign income/gains [June 2010]

... Where, as in most cases, the property, service or consideration derives from a foreign currency, the taxable amount is the pounds sterling equivalent value of the foreign currency (see RDRM31190 Exchange rates) used to acquire or pay for the property or service etc. This means that where an item of depreciating value (such as a car) is brought to the UK the amount that is liable to tax is not the current value of the car but the amount of foreign income or gains from which the car derives (example 4). For the same reason, where an item of appreciating value (perhaps a work of art) is brought to the UK, the taxable amount is the amount of foreign income or gains from which the property derived, and not its current market value (example 5).

The same principle applies where an investment is made in shares or other such financial instruments, and those shares are in, or are otherwise brought, to the UK. The chargeable amount is the amount of foreign income or gains from which the shares derived...

The RDR Manual provides an example where the facts (stripping out irrelevancies)¹⁰⁶ are as follows:

35030 Conditions A and B - remittances derived from foreign income or gains [June 2010]

Example 4 (Marianne)

M, a remittance basis user, used £25,000 foreign chargeable gains to purchase a car.

¹⁰⁶ The example in full (including its irrelevant detail) is as follows:

In example 1 above, Marianne, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. The car is regarded as derived from foreign income and gains.

Instead of bringing it straight to the UK, Marianne kept the car at her Italian villa for use on her visits to Italy. A few years later she then decides to bring the car to the UK for her and her daughter to use. At this time the approximate market resale value of the car is £14,000.

M kept the car outside the UK.

A few years later M brings the car to the UK.

The market resale value of the car is [implausibly] £14,000.

The HMRC analysis is as follows:

The amount remitted is still £25,000, that being the amount equal to the chargeable gains from which the property – the car – derived.

The author has not addressed the interesting questions which arise if M sells the car abroad and remits the proceeds of sale or buys a new car.

Suppose:

- (1) T invests £3m foreign income in an asset,
- (2) T sells the asset at a loss and receives only £1m.
- (3) T remits the £1m.

Under the pre-2008 remittance basis the amount remitted was £1m only. Is the amount remitted now £3m? The tax exceeds the amount remitted. I doubt if anyone will observe this in practice. Perhaps a purposive approach allows one to read in a requirement that the amount remitted cannot exceed the amount of the money remitted or (because of the loss) what is received in the UK is not derived from the gain.

Conversely suppose:

- (1) T invests £3m foreign income in an asset,
- (2) T sells the asset at a gain and receives £6m.¹⁰⁷
- (3) T remits £3m.

The amount remitted is only £1.5m, one half of the foreign income.

10.23.3 *Debt remittances*

Section 809P ITA provides:

(4) If the income or chargeable gains are used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt] the amount remitted is equal to the amount of income or chargeable gains used; but this is subject to subsection (10).

¹⁰⁷ For simplicity assume the gain on this disposal is not within the charge to CGT (eg the gain is not a chargeable gain or T was non-resident when the gain accrued).

(5) If anything deriving from the income or chargeable gains is used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt] the amount remitted is equal to the amount of income or chargeable gains from which what is used derives; but this is subject to subsection (10).

This is the equivalent of s.809P(2)(3) for debt remittances, but here there is an apportionment rule. Section 809P(10) ITA provides:

If the debt is only partly in respect of¹⁰⁸ the property or service, the amount remitted is (if it would otherwise be greater) limited to the amount the debt would be if it were wholly in respect of the property or service.

Suppose:

(1) T borrows £10m.

(2) T remits £1m of the borrowed sum to the UK.

The *entire* debt is a relevant debt. Suppose then T repays the entire borrowing out of income/gains. Only £1m is treated as remitted.

Suppose T only repaid £1m or £2m of the debt. There is still a remittance of £1m. This example illustrates a planning point: one should avoid debts which relate *partly* to property brought/received/used in the UK. Instead of the above, T should borrow so as to have two separate debts, one of £1m (remitted to the UK) and one of £9m (unremitted). Then the unremitted debt is *not* a relevant debt and can be repaid out of foreign income/gains.

The apportionment rule applies where a relevant debt is partly in respect of the property received in the UK. What if property is used partly in respect of a relevant debt?

The RDRM provides:

RDRM35040 Remittance Basis: Amounts remitted: Quantification: Conditions A and B - remittances in respect of relevant debt [June 2010]

Where foreign income or gains are used outside of the UK in respect of a relevant debt RDRM33040 the chargeable amount is the amount of

108 Section 809P(10) refers to a debt *in respect of* UK property but the definition of relevant debt is one which *relates to* UK property. It is considered that the expressions are synonymous.

foreign income or gains so used (ITA07/s809P(4)) (example 1 and 2). Similarly, if anything, for example an asset, which derived from foreign income or gains is used outside the UK to service a relevant debt then the amount of the remittance is the amount of the income or gains from which the asset used to service the debt was itself derived (ITA07/s809P(5)) (example 3 and 4).

Foreign income or gains may be used outside the UK to redeem or service a debt only part of which is a 'relevant debt' within the meaning of ITA07/s809L(7). In such cases, the amount that is taxable as an 'amount remitted' is, if it would otherwise be greater, limited to the amount that is attributable to that part of the debt which is a relevant debt (ITA07/s809P(10)) (example 5).

The taxable amount of foreign income or gain that is treated as having been remitted because of these provisions, taken together with any amounts that have been previously remitted (or treated as having been remitted), cannot be greater than the amount of the original foreign income and gains (ITA07/s809P(12)).

Example 1 (Katrina)

In May 2011, K, a remittance basis user, borrows £12,000 from an overseas bank to buy shares in a UK company. This is a relevant debt. In tax year 2011-12 K uses £4,600 of her relevant foreign income to pay the interest and to repay some of the amount borrowed. The chargeable amount is £4,600.

Example 2 (Gary)

On 6 April 2015, G, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull. Payments are due on the first day of each month from May 2015 onwards. The first 12 payments are on an interest-only basis. G pays £1,000 interest each month to the overseas lender from his overseas account with the same bank, into which G ensures a sufficient amount of his relevant foreign earnings are paid directly to cover the repayments.

From 1 May 2016 the payments increase to a fixed amount of £2,500 each month as G starts to repay the capital amount of the loan as well as the interest. The payments continue to be met from the same account of relevant foreign earnings.

The loan is a relevant debt because it is respect of property (the apartment) which is used in the UK by a relevant person (G).

G has made taxable remittances in 2015-16 of £12,000, that being the relevant foreign earnings used to service the relevant debt. In 2016-17 G

has made taxable remittances of £30,000, being the amount used to both service and repay the relevant debt.

Example 3 (Ali)

A, a remittance basis user, purchases some sculptures in Sweden in October 2012 for £80,000; he takes out an interest-free loan of £80,000 with his US bank to fund this purchase, repayable within 1 year.

In November 2012 he gives them to his wife as an anniversary gift. She initially keeps them at her mother's home in Stockholm, but 6 months later in March 2013 she decides to bring these sculptures to the UK to display in her UK garden.

In October 2013 A arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami. A had purchased the painting in May 2011, using £50,000 of his relevant foreign earnings and £30,000 of capital inherited from an uncle. The relevant debt is serviced by the oil painting, which derives, in part, from A's relevant foreign earnings (refer to the earlier example). A has made a taxable remittance in 2013-14 of £50,000.

Note: For the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank.

Example 4 (Francine)

F, a remittance basis user, has a Spanish-style courtyard created at her house in Brighton. She takes out an unsecured loan of £40,000 from her French bank which she uses to pay the specialist Spanish contractor.

F has several French government bonds, which she purchased entirely from her relevant foreign income, and a German government bond which she acquired using her foreign chargeable gains. These bonds are each worth £10,000.

In September 2010 F gives the German bond to her bank as part repayment of the loan.

The relevant debt is serviced by the German bond which derives wholly from F's foreign chargeable gains, and is used outside the UK in respect of this relevant debt (refer to the earlier examples). F has made a taxable remittance in 2013-14 of £10,000.

Example 5 (Karen)

In August 2011 K, a remittance basis user, uses an interest-free £10,000 overdraft facility on her Jersey bank account to pay £8,000 of UK school fees for her 14 year old daughter Lauren. The remaining £2,000 of the facility is used to pay for Lauren to attend a summer school in France organised by a French university.

K repays the overdraft from her relevant foreign earnings between August and November 2011.

K has made a taxable remittance in 2011-12 of £8,000 relevant foreign earnings, that being the part of the debt that is in respect of a service provided in the UK (refer to the earlier example) which is thus a ‘relevant debt’.

10.23.4 *Use as security: amount remitted*

The RDR Manual provides:

35270 Remittances from mixed funds: Collateral¹⁰⁹ in respect of relevant debt [June 2010]

When foreign income and gains are used as collateral for a relevant debt they are used ‘in respect of’ the relevant debt, so there may be a taxable remittance at this point. See RDRM33170 Condition B - Collateral in respect of relevant debt.

In fact, the RDR Manual takes the view that circumstances where the grant of security is a taxable remittance will be “rare” and in the author’s view, the grant of security is not taxable remittance at all, in the absence of some very special circumstances.¹¹⁰ In the circumstances, it is not necessary to consider the amount that is remitted on a grant of security, but the passage may still be of some interest as it shows a very loose view of when a property is partly used in respect of a relevant debt:

The amount of the foreign income or gains that are used in respect of the debt will be restricted to the amount of the capital loaned, together with any accrued interest. See Chapter 5: Condition B – Collateral in respect of relevant debt.

Often the collateral offered will be an asset which is itself a mixed fund. In these circumstances the mixed fund ordering rules at section 809Q(4) apply to the asset offered as security. In such a case, the taxable amount is made up of the same amounts of capital and foreign income and gains that were used to purchase the asset in the first place.

109 The author is using the word “collateral” as a synonym of “security” though that is (I think) American rather than English legal usage.

110 See 10.18.2 (Use as security for debt).

The 'transfer' is the offering of the asset as collateral in respect of the relevant debt and any formal charge is registered to the lender (where appropriate). The analysis is carried out on the date immediately before the collateral is so offered.

*Example 1 (John)*¹¹¹

In 2014/15 J, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. J uses the loan to purchase UK assets. The loan is a relevant debt.

J offers up, as security for this loan, a charge on his Guernsey farmhouse, which he purchased for £320,000 in 2010-11.

J has used his foreign income and gains as collateral, in respect of a relevant debt. If the use of the collateral creates a taxable remittance, the amount of the remittance is 'capped' at the amount of the debt, which is £200,000.

The farmhouse is derived from:

Relevant Foreign Income	2008-09 £60,000
	2009-10 £50,000
Foreign chargeable gain	2009-10 £120,000
Clean capital	2007-08 £40,000
	2008-09 £50,000

The mixed fund rules apply to determine the order of remittances. J will be regarded as remitting £50,000 RFI and £120,000 foreign chargeable gains from 2009-10, and £30,000 RFI from 2008-09.

Example 2

As per example 1, except that the farmhouse which J offers as collateral in respect of the relevant debt was purchased for £150,000 in 2010-11. It is now worth £250,000.

J has used his foreign income and gains as collateral, in respect of a relevant debt. If the use of the collateral creates a taxable remittance, the amount of the remittance is 'capped' at the amount of the debt, which is £200,000.

The farmhouse is derived from:

Relevant Foreign Income	2008-09 £60,000
	2009-11 £50,000
Clean capital	2007-08 £40,000

The mixed fund rules apply to determine the order of remittances; J will be regarded as remitting £110,000 RFI.

Any increase in the value of the farmhouse is ignored.

111 I simplify and omit a few tiresome irrelevancies from this example.

Example 3 (Freda)

F, a remittance basis user receives an interest-free loan¹¹² of £100,000. She uses the loan to purchase a plot of land in the UK, so the loan is a relevant debt. F gives, as collateral for the loan, a general right to the bank over her many current and savings accounts and investment portfolio held with them.

Ignoring accrued interest, the ‘cap’ on the amount of collateral regarded as used in respect of the relevant debt is £100,000. The ‘transfer’ is the offering of the asset as collateral so an analysis of F’s accounts over which the charge is granted would be needed to analyse the credits into each account immediately before the date of transfer, in order to determine the constituent parts of each account for s809Q(4) purposes. In these circumstances the terms and conditions surrounding the loan and the collateral offered should be examined carefully as this may prioritise the order of the accounts against which any ‘collateral’ charge will be taken; for example it may prioritise current or savings flexible accounts over high-interest period or notice accounts. The s809Q(4) analysis should reflect this priority.

10.23.5 *Cap on amount remitted*

Section 809P(12) ITA provides:

If the amount remitted (taken together with any amount previously remitted) would otherwise exceed the amount of the income or chargeable gains, the amount remitted is limited to the amount which, when taken together with any amount previously remitted, is equal to the amount of the income or chargeable gains.

How could the amount remitted (which must derive from the income/gains) exceed the amount of the income or the gains? One case is if income is remitted (the remittance conditions are met) and then the remittance conditions are met again, in relation to the same income or gains. There are many ways that this could happen, but one case concerns re-remittances. Suppose:

112 The grant of an interest-free loan from a bank seems somewhat implausible.

- (1) Year 1: T (an individual taxable on the remittance basis) receives foreign income. The income is remitted (“the first remittance”) and so subject to tax.
- (2) Year 2: The income is transferred out of the UK and remitted again (“the re-remittance”).

The RDR Manual provides:

35030 Remittance Basis: Amounts remitted: Quantification: Conditions A & B - remittances derived from foreign income/gains [June 2010]

...When taken together with any amounts that have been previously remitted (or treated as having been remitted), the taxable amount of income or gain that is treated as having been remitted because of these provisions cannot be greater than the amount of the original foreign income and gains (ITA07/s809P(12)). Where property is brought to or used in the UK by or for the benefit of a relevant person the amount that is liable to tax is the amount of the underlying foreign income or gains from which the property derives (whether directly or indirectly). The taxable remittance will only occur once; this will usually be the time the asset is first brought to, received by or used in the UK by a relevant person.

This is obviously right. But the same would apply if the income/gains were not taxed on the first remittance, eg:

- (1) A remittance before 2008 of source-ceased income or of property enjoyed in specie.
- (2) A remittance by a non-resident of income/gains accruing during a resident period (the temporary non-residence rules would need consideration).

HMRC agree. December 2008 Qs & As provides:

Q9 If a taxpayer undertook a source ceasing exercise during the 2006-07 tax year and then remitted the proceeds before the 2008-09 tax year, if those funds were to then be taken back outside of the UK and re-imported, would this constitute a remittance. In other words, would the earlier source ceasing exercise be looked through despite its timing? It is understood that interest/profit from any new investment would be a remittance.

A If the source ceased in 2006-07 and was remitted in 2007-08, then this did not count as a remittance and it will not count as a remittance if it is exported and subsequently re-imported.

HMRC do not cite a statutory authority to justify their answer; s.809P(12) ITA would do, though there are others as well.¹¹³

10.23.6 *Condition C and D cases*

Section 809P ITA provides:

(6) In a case falling within section 809L(4)(a) or (b), the amount remitted is equal to the amount of the relevant income or chargeable gains.

(7) In a case falling within section 809L(4)(c), the amount remitted is equal to the amount of the relevant income or chargeable gains; but this is subject to subsection (10).

(8) In a case falling within section 809L(5)(a) or (b), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c).

(9) In a case falling within section 809L(5)(c), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c); but this is subject to subsection (10).

...

(11) In subsections (6) and (7) “relevant income or chargeable gains” means—

- (a) if the qualifying property falls within section 809N(7)(a), the income or gains—
 - (i) of which the qualifying property consists, or
 - (ii) from which the qualifying property derives;
- (b) if the qualifying property falls within section 809N(7)(b), the income or gains—
 - (i) of which the property given to the gift recipient consisted, or
 - (ii) from which that property derived;
- (c) if the qualifying property falls within section 809N(7)(c), the income or gains—
 - (i) of which the property given to the gift recipient consists, or
 - (ii) from which that property derives.

The RDR Manual offers seven examples but the matter does not seem important enough to be setting out here.

¹¹³ Para 86(2) Sch 7 FA 2008 would also provide relief here: see 10.32 (Transitional relief for property acquired before 2008).

10.24 CGT disposal not for market value

10.24.1 *The CGT background*

In certain circumstances the consideration for a disposal is deemed to be market value consideration, not the actual consideration (if any).¹¹⁴ In these cases a gain is deemed to accrue which is not a real gain (in the sense that the individual does not actually receive a sum which constitutes or represents the gain). This is referred to as “**a deemed gain**”.

The most common case of a deemed gain is a gift. In money terms (one might say, in economic reality, but I do not think that is a helpful concept) a gift cannot give rise to a gain and normally gives rise to a loss. However, for CGT purposes a gift is treated as made for market value.

10.24.2 *Deemed gains and the remittance basis*

In the absence of express provision the deemed gain arising on the gift could not be remitted, because it does not exist (in the sense that the individual does not and cannot receive a sum from the disposal which is the gain or is derived from the gain). Accordingly, s.809T ITA provides:

- (1) This section applies if—
 - (a) foreign chargeable gains accrue to an individual on the disposal of an asset, and
 - (b) the individual does not receive consideration¹¹⁵ for the disposal of an amount at least equal to the market value¹¹⁶ of the asset.
- (2) For the purposes of this Chapter, treat the asset as deriving from the chargeable gains.

114 Section 17(1) TCGA sets out seven sets of circumstances when a disposal is treated as made for market value. (The section also deems certain acquisitions to be for market value, but we are not concerned with that here.)

In certain circumstances a gain is deemed to accrue to an individual even though there is no disposal, but s.809T does not apply to that.

115 “Consideration” here obviously means actual consideration, as opposed to market value which is (usually) deemed to be given by s.17(1) TCGA. (Though normally in the legislation the drafter states this expressly; eg s.165(7) TCGA.)

116 Defined s.809Z(10) ITA: “In this Chapter ...“market value” has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act).”

It is not expressly stated that s.809T only applies on a disposal made by an individual, but this is implied. Eg on a disposal by non-resident close company, s.13 gains may accrue to an individual who is a participator, and the individual does not receive the consideration for the disposal, but s.809T does not apply. Otherwise provisions such as s.14A(3)(a) TCGA would be unnecessary.

10.24.3 *Gift of asset*

Suppose:

- (1) T (a remittance basis taxpayer) gives an asset (foreign situate) to a trust. A gain is deemed to accrue on the disposal as if the asset were sold for market value. (Assume the asset has risen in value and a gain accrues.)
- (2) T (or a relevant person) receives the asset in the UK.
The deemed gain is remitted. This reverses the rule for the pre-2008 CGT remittance basis. For the interaction with the s.87 charge, see 48.6.2 (“Chargeable to income tax”).

10.24.4 *Sale of asset*

Suppose T sells an asset to a trust for £100. (Assume T is connected with the trustees.)

If the market value is equal to the purchase price (£100) then s.809T does not apply. It does not matter that the sale is to a connected person. The purchase price is or (better) is derived from the gain, but the asset itself is not (and is not derived from) the gain. So it does not matter if the asset is remitted.

Suppose T sells an asset and the purchase price is left outstanding as a loan. It is considered that T “receives” the consideration, for the benefit of the loan is the consideration.

Suppose a sale at an undervalue (the market value is more than the purchase price). In this case:

- (1) the asset is deemed to be derived from the gain; *and*
- (2) the purchase price is (or is derived from) the gain.

This rule applies to all sales at less than market value, even if accidental.

This rule applies if the sale is less than market value even if it is 99% of the market value.

It is not necessary to have a disposal between connected persons, though in practice s.809T is not likely to apply to a disposal between unconnected persons.

Suppose:

- (1) the asset is worth £200 and has a base cost of £50.
- (2) the asset is sold for £100 giving rise to a deemed gain of £150.

If the £100 sale proceeds is received in the UK it is suggested that half – £75 – of the gain should be regarded as remitted. If the asset is also received in the UK by a connected person, then there is a remittance of the entire gain. However the cap on the amount remitted avoids double taxation.¹¹⁷

If the asset is sold for base cost, £50, it is suggested that the £50 is not derived from the deemed gain, so the £50 sale proceeds could be remitted tax free. But other views are possible.

10.24.5 *Transitional rules: pre-2008 gains*

Subject to immaterial exceptions, para 81 Sch 7 FA 2008 provides:

The other amendments made by this Part of this Schedule have effect for the tax year 2008-09 and subsequent tax years.

A deemed gain accrued to an individual on gifts made before 2008/9: it was just not remittable. At first sight this does not help. It is accepted that the ITA remittance basis rules govern pre-2008 income/gains. So after 2008/9 s.809T applies and the gain becomes remittable, though it qualifies for RP relief. It does not matter when (after 1965) the gain arose: gains from disposals made in the 1960s could now come into charge, though all records will have been long discarded. However HMRC do not take that view. FAQ: Residence and Domicile – NR Trusts provides:

Will a deemed chargeable gain that arose when I gifted foreign assets to the trustees of a non UK resident settlement before 6 April 2008 become taxable if the trustees remit the property to the UK on or after 6 April 2008?

¹¹⁷ See 10.23.5 (Cap on amount remitted).

No, a deemed chargeable gain accruing on the gift of property to a non resident trust before 6 April 2008 will not become chargeable if the trustees remit the property or anything derived from it to the UK on or after 6 April 2008.

However where there was no real alienation of the income or gains by the individual, as for example in the case of *Harmel v Wright*, because the settlor retained effective control over them, then the position after 5 April has not changed. In such a case the income or gains could be taxed on the settlor.¹¹⁸

It seems to me that *Harmel v Wright* 49 TC 149 has nothing to do with the case; though of course a trust could be disregarded under the sham doctrine.

The RDR Manual provides:

31180 Foreign chargeable gains accruing on disposal made otherwise than for full consideration [June 2008]

118 The point is confirmed in the Public Bill Committee Debate 19 June 2008. Hansard col 834 and 840:

“**Mr. Hoban:** the new section 809R [now s.809T] set out in schedule 7 creates some uncertainty in the minds of advisers as to meaning. The optimistic, preferred best interpretation is that new section 809R does not apply in relation to gains that arose prior to 6 April 2008, It is understood that that is also the view of HMRC. Accordingly, the old legislation states that, provided that there was a genuine gift, there would be no tax liability on the gain that arose when the gift was made. while it has been helpful for HMRC to have made its view known, doubt and concern still remain.

The potential sums will often be significant, and it is likely that inadequate records will have been kept to establish the position since, at the time, the law was clear that there could never be a tax charge as a result of the gift,. Accordingly, taxpayers who made gifts of foreign assets offshore prior to 6 April 2008 will be concerned by the split in opinion; some suggest that new section 809R could exist retrospectively. Taxpayers who made absolute unfettered gifts of foreign assets offshore prior to 6 April 2008 had a legitimate expectation that the gain deemed to have been realised on the making of the gift would never come into charge. The new legislation should be clear, which is why amendment No. 375 seeks to insert:

‘This section shall not have effect with respect to gains accruing to an individual on the disposal of an asset if the disposal took place prior to 6 April 2008.’

Jane Kennedy (Financial Secretary to the Treasury): On the very specific point about unfettered gifts of foreign assets offshore, HMRC made its view very clear in a frequently asked question some time ago. In simple terms, it is only when such gifts were made after 6 April 2008 that they would be taxed.”

The new rule at Section 809T ITA 2007 applies to disposals by remittance basis users on or after 6 April 2008.

10.25 Purchase of family home

Suppose:

- (1) T gives RFI to T's son S, not a relevant person.
- (2) S buys the freehold interest of a house and uses the RFI to pay the purchase price.

The topic raises many remittance issues, discussed throughout this chapter, so it is convenient to draw them together.

10.25.1 Rent-free occupation

Suppose S allows T to occupy the house rent-free. It is considered that S "uses" the house (the word "use" is wide enough to cover this even though it would be more normal and better legal English to say S occupies or enjoys the use of the house). Accordingly remittance condition A is satisfied. The house is derived from the RFI, but condition B is not satisfied because the property is not property of a relevant person.

Remittance condition C is satisfied, since the property is qualifying property of a gift recipient, and is used and enjoyed by a relevant person. So the purchase price RFI is remitted.

10.25.2 Lease granted for full consideration

Now suppose:

- (1) T gives RFI to T's son S, who uses it to buy the freehold interest of a house.
- (2) S grants a lease of the property to T for full consideration and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above). So remittance condition A is satisfied in relation to the lease. However the lease is not derived from the RFI. So condition B is not satisfied. Of course funds T uses to pay for the lease are regarded as remitted.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not property of a relevant person so condition B is not satisfied.

Conditions C and D are excluded (even if they could otherwise apply) since the full consideration exemption applies.

10.25.3 *Lease granted for less than full consideration*

Now suppose:

- (1) T gives RFI to T's son S, not a relevant person, who uses it to buy the freehold interest of a house.
- (2) S grants a lease of the property to T for no consideration or for less than full consideration, and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above) So remittance condition A is satisfied in relation to the lease. If the transactions are part of an arrangement, the lease is derived from the RFI. So condition B is satisfied (as the lease is property of a relevant person). What is the amount remitted? It is the amount from which the lease is derived. It is suggested that that is not the full amount used to pay for the property, but only a part reflecting the value of the lease.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not the property of a relevant person so condition B is not satisfied.

Turning to remittance condition C, does T enjoy the lease for the purposes of remittance condition C? T does. At first sight this does not matter as the lease is not qualifying property of a gift recipient (it is not property of a gift recipient). The lease may (depending on the facts) however be qualifying property within s.809N(7)(c). If so the amount remitted is all the RFI (not the value of the lease).

Next, does T use and enjoy the reversion? It is considered that T does, since the lease T enjoys is derived from the reversion, and the lease is the mechanism by which T enjoys the reversion. If that is right, then condition C is satisfied, since the reversion is qualifying property of a gift recipient.

10.25.4 Another analysis

Another analysis is that the “property” is the physical house, not the legal interests in the property, but one should not disregard the most basic principles of the law of real property in construing a taxing statute, if any other approach is possible.

10.26 Payment of school fees

Suppose T wishes to pay the school fees of minor grandchildren. Assume the grandchildren are at school in the UK (otherwise there is no problem). A direct payment out of RFI is a remittance as conditions A and B are satisfied.

Suppose T gives funds to T’s child (not a relevant person) and the child uses the funds to pay the fees. This is still a remittance as conditions A and B are still satisfied: the funds in the hands of the child are derived from the RFI.

Suppose there is an informal arrangement under which:

- (1) T gives funds to T’s child;
- (2) the child will use *other* funds to pay the school fees.

This is caught by condition C because the funds used to pay the fees are “qualifying property” within s.809N(7)(c). That is, it is used to pay the school fees by virtue of an operation which is effected “with reference to the gift of the property to the gift recipient”.

T must therefore make an unconditional gift to T’s child ie a gift such that the payment of the school fees is not with reference to that gift; in that case (assuming the fees are not paid out of the gifted property) there is no remittance.

10.27 Remittance before income or gains arise

Section 809U ITA provides:

809U Deemed income or gains not to be regarded as remitted before time when they are treated as arising or accruing

Where—

- (a) income or foreign chargeable gains are treated as arising or accruing, and

(b) by virtue of anything done in relation to anything regarded as deriving from the income or chargeable gains, the income or chargeable gains would otherwise be regarded as remitted to the UK before the time when they are treated as arising or accruing, treat the income or chargeable gains as remitted to the UK at that time.

EN Remittance Basis Amendments 482 to 493 states:

Under the original wording such payments might in certain circumstances become chargeable before the tax year in which the income or gain is treated as arising. The amendment ensures that cannot happen.

This can apply to s.87 gains¹¹⁹ and to s.731 income, where a benefit is received in a year before the income accrues. It can also apply under the accrued income scheme.

10.28 Partnerships

This section discusses two related questions:

- (1) *Remittance of funds transferred to partnership.* Suppose:
 - (a) P (a remittance basis taxpayer) receives foreign income/gains.
 - (b) P contributes the funds to a partnership of which P is a partner, as partnership capital.
 - (c) The partnership brings the funds to the UK.
- (2) *Remittance of partnership income/gains.* Suppose:
 - (a) A partnership (whose partners include P, a remittance basis taxpayer) receives foreign income/gains.
 - (b) The partnership does not distribute the funds to the partners, but brings the funds to the UK.

In these cases, is there a taxable remittance? There are two possible views:

- (1) One regards P as owning an asset (a partnership share) which is derived from the foreign income/gains. In that case:
 - (a) Funds contributed to the partnership are remitted if P receives the partnership share in the UK.

119 See 48.15 (Section 87 remittance basis).

- (b) Partnership income/gains brought by the partnership to the UK are not remitted.
- (2) One regards the individual as owning a share of the partnership assets. In that case:
 - (a) Funds contributed to the partnership are remitted if the partnership brings the funds to the UK.
 - (b) Partnership income/gains are remitted if the partnership brings the funds to the UK.

One might describe the first view as being that partnerships are not transparent for remittance basis purposes, and the second view as one that partnerships are transparent.

10.28.1 *The background partnership law*

In order to address this question one needs to understand the nature of a partner's interest in a partnership (also known as a partnership share).

Partners jointly own the partnership assets. However a partner individually is not entitled to exercise proprietary rights over partnership assets, and a partner's interest in partnership assets is described as a future interest.¹²⁰ The RDR Manual correctly states:

33530. Partnerships [December 2011]

Investment into partnerships

When a partner makes a capital contribution to a partnership they acquire an asset under partnership law, namely an 'interest' or 'share' in the partnership which gives them rights to share in future profits and distributions (of their capital and any surplus) on dissolution of the partnership.

The same applies to a LLP.

10.28.2 *Non-transparent nature of partnership for remittance basis purposes*

On this basis the RDR Manual adopts the non-transparent view:

¹²⁰ *Lindley & Banks on Partnership* (19th ed 2010) para 19-03 onwards; Law Com, *Partnership Law*, Report no 283, para 9.66 (The nature of a partner's interest).

33530. Partnerships [December 2011]

... Offshore partnerships trading or investing in the UK

A partnership is not a relevant person. Individuals who are partners together in a partnership are not relevant persons by virtue of their role as a partner (although they may, of course, be relevant persons under other provisions).

Offshore partnerships, whether trading or investment partnerships, may bring partnership funds into the UK to meet trading or investment expenses in the usual course of partnership business. As the funds are brought in by the partnership they are not brought in by a relevant person. In most cases there will be no benefit to a relevant person from the money or other property brought into the UK by the partnership, nor will a service usually be provided in the UK to or for the benefit of a relevant person, so Condition A of ITA07/s809L is not met.¹²¹ Thus there will be no taxable remittance.

In short, in the Manual's view, partnerships are not transparent for remittance basis purposes. Insofar as the tax analysis follows partnership law, this is clearly correct. At first glance, one might have thought that s.848 ITTOIA imposed transparency, regardless of what partnership law may have to say.¹²² But that view is not really workable. A partner (for instance in a large investment partnership) may not know (and may not be entitled to know) whether partnership property is brought/received in the UK; the partnership accounts will not disclose that. Serious tracing difficulties arise. So either this is not the true effect of s.848 or the context shows that the deeming of s.848 does not apply here.

This is consistent with the view that a partnership is transparent in the sense that income of the partnership is income of the partners, for the issues are different: there is no reason why the general principle of income tax transparency should require the same answer to both.

The RDR Manual adds four qualifications (which should not be controversial):

33530. Partnerships [July 2010]

121 This is a loose paraphrase of remittance condition A, but the meaning is clear.

122 See 38.3 (Transparency of partnership for IT).

... [1] In cases where there does appear to be a benefit to an individual partner (or to another relevant person) from money or other property brought into UK by the partnership, or from a service provided in the UK for which the partnership gives consideration then you should examine the transaction and the partnership documents very carefully to identify the source of the partnership funds.

[2] The provision of the property or service by the partnership may be a remittance of that individual's 'share' in partnership profit. To the extent that the individual's share in partnership profit falls to be regarded as relevant foreign income (see below) there may be a remittance.

Para [1] is considering whether a contribution to the partnership is remitted and para [2] is considering whether partnership income/gains are remitted. Clearly, if a partnership asset is used by the individual, remittance condition A is in principle satisfied.

[3] You may also need to examine whether there is a true partnership, or whether in fact it is the individual's foreign income or gains that have been remitted.

Whether there is a partnership is a question of partnership law, which should not in practice cause difficulties if documentation and implementation are correct.

[4] Alternatively there may be a connected operation to which Condition D of ITA07/s809L(5) applies.

The Manual wisely does not seek to explain how remittance condition D might be satisfied.

10.28.3 *Contribution of foreign income/gains to UK partnership*

The RDR Manual 33530 provides:

33530. Partnerships [December 2011]

... It follows [from the statement of the partnership law position] that a remittance basis user who uses his foreign income or gains to make a capital contribution to a UK partnership acquires a UK asset; namely a share in the UK partnership, in exchange for his 'equity' subscription in

the partnership. Thus the foreign income or gains that he uses to contribute to the partnership will be a taxable remittance within ITA07/s809L.

This is so even if the individual places his investment into the partnership's overseas account, and the UK partnership is only investing or trading overseas and not in the UK.

The text does not say what it means by "UK partnership" - presumably it means one an interest in which is UK situate, on common law principles: that is, an unincorporated partnership which is managed and controlled in the UK or a LLP with a UK register.¹²³

An unspoken assumption here is that receipt of a UK situate asset (applying IHT/international law situs rules) is a taxable remittance, ie is a receipt of an asset in the UK. That is arguable.¹²⁴

10.28.4 *Remittance of partnership profits*

Where partnership income is RFI¹²⁵ the same point arises. There is no remittance if the partnership receives its income in the UK. A partner who is a remittance basis taxpayer can only remit income to the UK after it is distributed to them from the partnership.

10.28.5 *Company held by partnership*

Suppose a partnership holds a company. The partners are participators in the company. The company must be a close company (or a non-resident close company), since the partners are connected persons. Accordingly the company is a relevant person in relation to each of the partners. So property brought/received/used in the UK by the company is remitted - even though there would be no remittance if the same property was brought/received/used in the UK by the partnership which holds the company! This is the case regardless of the size of the partnership. Remittance investment relief may mitigate this problem.

123 See 77.28 (Situs of partnership share).

124 See 10.11.10 (Receipt of UK situate investment asset).

125 See 38.4 (Partnership income: remittance basis).

10.29 Proceeds of divorce settlement

10.29.1 *Is a transfer on divorce made for “consideration”?*

The starting point is to understand the family law background.

A transfer in connection with divorce may be made:

- (1) Pursuant to a court order
 - (a) following a contested hearing; or
 - (b) approving a settlement agreed by the parties.
- (2) Without a court order but under an agreement between the parties (the transferee agreeing to seek no (or a reduced) court order in return for the transfer).

Assume (as will normally be the case) that the transfer is made bona fide, at arm's length and with no gratuitous intent. Are transfers of these kinds made for consideration?

One might have thought that the answer was no. One argument is:

- (1) there is only “consideration” where there is a contract¹²⁶ and
- (2) (a) a court order is not a contract; and
 - (b) an agreement between the parties is not a valid contract.¹²⁷

This line of reasoning now seems less convincing, both because the word consideration is wide enough to apply in the absence of a contract, and because nuptial agreements can in some cases constitute enforceable contracts.¹²⁸ But more fundamentally, the quid pro quo which is the essence of consideration is lacking.

Accordingly in *G v G*¹²⁹ the High Court held that a transfer pursuant to a Court Order at a contested hearing (type (1)) was not made for consideration, so that CGT hold-over relief was available.

However in *Hill v Haines* [2008] Ch 412 the Court of Appeal held that a transfer pursuant to a Court Order at a contested hearing (type (1)) *was* made for consideration, for the purposes of s.339 Insolvency Act 1986.

Where does this leave *G v G* and CGT hold-over relief? Either it is

126 *C&E Commissioners v Apple and Pear Development Council* [1985] STC 383; *IRC v Plummer* 54 TC 1 at p 57; *Unilever v Smith* [2002] STC 113.

127 See *Aspden v Hildesley* 55 TC 609.

128 See Law Commission consultation paper no. 198, *Marital Property Agreements* (Jan 2011) accessible <http://lawcommission.justice.gov.uk/>.

129 *G v G* [2002] EWHC 1339 [2003] Fam Law 14 [2002] 2 FLR 1143 at [43] accessible www.kessler.co.uk.

overruled or else there are (at least) two concepts of consideration, in which case a transfer might be for consideration in one sense but not for consideration in the CGT sense. In that case one could never ask whether a transfer is made for consideration in the general, but only whether it is made for consideration in some specified sense of the ambiguous word.

Each view has some support in *Hill v Haines* (though they cannot both be right). Morritt C said:

[30] ... the fact that a transfer ordered by the court does not give rise to a payment of consideration so as to reduce the value of hold-over relief *for capital gains tax* [does not dictate] a conclusion that a property adjustment order must be regarded as made for no consideration.

In other words, “consideration” in the CGT code has a different meaning. But Rix LJ preferred the view that *G v G* was wrong.¹³⁰ Since Rix also agreed with Morritt, it is clear that he did not give a great deal of attention to this point (which did not need to be decided and which would not have been fully argued).

It is considered that the view of Morritt is to be preferred. Rights under the Matrimonial Causes Act are not assets for CGT purposes: no gain arises when a spouse is awarded a capital sum. Accordingly, there is no “consideration” for CGT purposes. However that is a special case and a transfer on divorce is made for consideration in the general sense of the expression.

10.29.2 *The HMRC view*

The CG Manual provides:¹³¹

130 At [81] “... As for *G v G*, the view expressed by Coleridge J at para 43 regarding potential consequences for the purposes of capital gains tax can hardly be regarded as authoritative in the absence of the revenue. As Coleridge J stated, his view that the wife gave no consideration for the shares transferred to her because ‘neither party has any ‘rights’... cannot, of course, ultimately bind the Inland Revenue’: he merely proceeded “on the footing” that business hold-over relief would be available to the husband. In doing so, he appears to have drawn an unnecessary inference from the decision of this court in the *Xydhias* case.”

131 The passage has not been revised after *Hill v Haines*, but as several years have elapsed since that decision, it may be taken as a statement of the HMRC current view.

67192. Hold-over relief: Consideration [February 2006]

The disposal of an asset from one spouse or civil partner to the other in the circumstances described in CG67191 [that is, a disposal in the year after separation, which does not qualify for the CGT spouse exemption] is, where there is no recourse to the courts, usually made in exchange for a surrender by the donee of rights which they would otherwise be able to exercise to obtain alternative financial provision. In such cases we take the view that the value of the rights surrendered represents actual consideration of an amount which would reduce the gain potentially eligible for hold-over relief to nil. “Consideration” is not limited to money or money’s worth.

After considering the case where there is gratuitous intent, which is so rare that it need not be considered here, the Manual continues:

However, in cases where there is recourse to the courts and a court makes an order

- for ancillary relief under the Matrimonial Causes Act 1973 which results in a transfer of assets from one spouse to another, or
- for property adjustment under the Civil Partnership Act 2004, or
- formally ratifying an agreement reached by the divorcing parties or by the civil partners of a dissolved civil partnership dealing with the transfer of assets,

we take the view that the spouse or civil partner to whom the assets are transferred does not give actual consideration, in the form of surrendered rights, for their transfer. A Court Order, made in these circumstances, reflects the exercise by the court of its independent statutory jurisdiction and is not the consequence of any party to the proceedings agreeing to surrender alternative rights in return for assets.

This approach represents a change in the Revenue’s prevailing practice, following consideration of judicial observations made in the case of *G v G* and applies with effect from 31 July 2002. Therefore, where assets are transferred between divorcing parties or between civil partners of a dissolved civil partnership by reason of a Court Order as described above and a claim for gift hold-over relief is made, or remains unsettled, on or after that date, the relief should not be restricted in accordance with Section 165(7) TCGA 1992 on the grounds that actual consideration has been given by the donee.

Thus in the HMRC view:

- (1) A transfer made pursuant to a court order, including a consent or *Tomlin* order, is not made for consideration.
 - (2) A transfer not made pursuant to a court order is made for consideration.
- It is considered that the position is in both cases the same:
- (1) The transfer is made for consideration in the general sense of the word;
 - (2) The transfer is not made for consideration for CGT purposes.

10.29.3 *Are proceeds of divorce settlement “derived property”?*

Suppose T transfers RFI to W as part of a divorce settlement. It is suggested that the funds in the hands of W are not derived from the income. They are received for full consideration (in the general sense of that expression). If that is right, remittance condition B is not satisfied even if:

- (1) W remits while still a relevant person (before decree absolute);
- (2) W applies the funds for the benefit of relevant persons (eg children or grandchildren of T under 18).

However in case HMRC do not agree, W should not bring the funds to the UK until after decree absolute, by which time she has ceased to be a relevant person; and she should ideally not use the funds for the benefit of relevant persons (in relation to H). Then there is clearly no taxable remittance.¹³²

10.30 Debit, credit and charge cards

This section considers whether the use of debit, credit and charge cards involves a remittance. The starting point is to understand the legal nature of debit, credit and charge cards. The following analysis draws on *The Law of Bank Payments*.¹³³

132 See 10.19 (Becoming/ceasing to be a relevant person: conditions A and B). As to debt remittance rules, see 10.17.11 (Debt imposed by law).

133 Brindle and Cox, (4th ed. 2010) para 4-014. In any particular case it is strictly necessary to review the specific terms governing the card concerned, but I expect that will not usually make any difference in practice. Store-issued cards are not discussed here.

On the use of a card, three contracts come into being. For present purposes the most important terms of the contracts are as follows:

(1) Cardholder and supplier

This is the contract for goods or services between the cardholder and the person from whom the cardholder purchases goods or services (“the supplier”). This contract is the same whether the cardholder pays by card or by cash.

(2) Card-issuer and supplier

The card-issuer undertakes to honour the card by paying the supplier.

(3) Card-issuer and cardholder

(a) A *debit* card is issued only by a bank. The contract between the card-issuer bank and cardholder authorises the bank to debit the cardholder’s bank account with the amount of the card transaction.

(b) Charge and credit cards are different. Here the cardholder is required to make a payment to the card-issuer. A *charge* card requires the cardholder to repay the balance outstanding after a set period.¹³⁴

A *credit* card allows the cardholder extended credit.

It is necessary to distinguish between use of cards to obtain (1) cash, and (2) goods or services.

10.30.1 *Cards used to obtain cash*

If a debit card is used to obtain cash in the UK from a foreign bank account which is in credit,¹³⁵ and the card is used at a branch of the bank which issued the card, then there is clearly a remittance of the money. The same applies if the cash is withdrawn from a bank which is not the card-issuing bank, because the third party bank acts as the agent for the card-issuing bank.

The use of a *charge* card to obtain cash in the UK from a foreign bank account is likewise a remittance. The time of the remittance is when the sum is debited from the account, not when the card is used. The position is the same if an individual uses a *credit* card to obtain cash in the UK.

134 In the case of a bank-issued credit card, the issuer is normally authorised to debit the cardholder’s bank account to meet a debt due on the card. But in practice this facility is not used unless needed (or the card effectively becomes a debit card).

135 If the effect of use of the card is to put an account into debit, there is obviously no remittance on ordinary principles, though the debt remittance rule will in principle apply when the overdrawn account is repaid.

10.30.2 *Cards used to obtain goods or services*

Where a debit card is used to obtain goods or services in the UK, remittance condition A is satisfied. Payment of the debt to the card issuer out of income or gains satisfies remittance condition B.

10.30.3 *HMRC practice*

The RDR Manual provides:

36130 Credit Cards and Debit Cards [June 2010]

Credit card issued in the UK

If a taxpayer who is chargeable on the remittance basis uses a UK credit card to pay for goods or services, either in the UK or overseas and he or she subsequently settles their credit card bill using foreign income or gains, the payment is a taxable remittance.

The remittance does not have to be received in the UK by the taxpayer, it is sufficient that it is received by the credit card company in the UK.

This is not correct, but a remittance basis taxpayer should avoid a UK credit card in order to avoid dispute.

Credit card issued by an overseas bank or other financial institution

Where an overseas credit card is used in the UK, the cardholder is effectively authorising the credit card company to pay the bill for the goods or service in just the same way as if they had instructed the bank to make a payment directly to the person supplying the goods or services. The terms of credit card agreements may differ as to the moment of “indebtedness” between the cardholder and the credit card company. However the use of the credit card to pay for goods used or received in the UK, or services provided in the UK by, to or for the benefit of a relevant person will create a debt.

The use of the individual’s untaxed foreign income or gains to pay the credit card company in respect of the relevant debt will be a taxable remittance.

Interest and other such charges should be apportioned accordingly between UK and non-UK goods and services. In most cases a straight proportional split of the interest against each type of expenditure will be acceptable; for example if £400 of the debt relates to UK goods which are taxed as a remittance and £600 to non-UK goods and there is an interest charge in relation to that £1,000 debt of £10, then £4 of the

interest is also a taxable remittance. However some cards may apply different rates where cash is withdrawn, or depending of date of purchase, in which case the taxpayer will need to compute the interest due on the “relevant debt” part of the payment only.

Note 1: This section may apply to any credit card debt which the individual satisfies using their foreign income or gains, even if they are not the cardholder.

Note 2: If an overseas credit card is used abroad and the account is settled direct to the card company out of overseas income, no liability to UK tax will arise. But if an asset purchased using the card is brought to the UK and subsequently sold here, there will be a taxable remittance, at the date of disposal, up to the amount of any foreign income used to settle the original account.

Debit card issued by an overseas bank or other financial institution

Payments for goods or services that are made using a debit card (for example a Visa debit card or one issued under the brand name “Cirrus”) issued by an overseas financial institution are treated in exactly the same way as a cash transaction.

This means that when goods or services are purchased in the UK using a debit card a taxable remittance is made to the extent of the amount of any overseas income or gains in the bank account. Likewise any cash withdrawals from shops or ATM machines in the UK are taxable cash remittances.

Payment by cheque drawn on an overseas account or by electronic transfer of any kind are also treated in exactly the same way as cash and are potentially taxable remittances of overseas income and gains.

10.31 Gift to charity by remittance basis taxpayer

A remittance basis taxpayer (“T”) making a gift to charity¹³⁶ should give: (1) money (including foreign currency) (qualifying for gift aid relief) or (2) foreign assets (qualifying for qualifying investment donation relief). The gift may be made out of foreign income/gains, or property derived from foreign income/gains. The property should be received by the charity outside the UK; if the sum given is money the charity should open a bank

136 This includes some EU and EEA charities: see Kessler & Brown, *Taxation of Charities and Non-profit Organisations* (8th ed, 2011) chapter 2 (Definitions of “Charity”) (online version www.taxationofcharities.co.uk).

account outside the UK.¹³⁷ The charity may bring the assets to the UK without a taxable remittance, provided the charity is not a relevant person in relation to T.

A charitable company would only be a relevant person if it is a close company and T or some other relevant person is a participator.¹³⁸

A charitable trust would be a relevant person if T or some other relevant person is a beneficiary.¹³⁹ No individual has a legal or equitable (beneficial) interest in a charitable trust, so in the strict sense a charitable trust has no beneficiaries:

Individuals may benefit from the application of trust moneys but they are not, as individuals, the beneficiaries of the trust and may not enforce its terms.¹⁴⁰

There is a statutory definition but that makes no difference. 809M(3)(e) ITA provides:

“beneficiary”, in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement.

137 I understand that the CAF maintain an offshore account for this purpose (and no doubt some other charities do the same).

138 See 10.4 (Relevant persons: companies). For the general definition of close company, see 80.19 (Close company: Introduction). For a discussion in relation to charities, see Kessler & Brown, *Taxation of Charities and Non-profit Organisations* (8th ed, 2011) para 11.3 (Definition of close company) (online version www.taxationofcharities.co.uk).

139 See 10.5 (Relevant persons: trusts).

140 *Re Crown Forestry Rental Trust, Latimer v IRC* [2004] 4 All ER 588 at [29]. Likewise Law Commission, *Capital and Income in Trusts: Classification and Appointment* Consultation Paper No. 175 (2004) para 6.16: “The ‘beneficiary’ [of a charitable trust] is at all times the public (although the identity of the individuals who incidentally benefit from the carrying out of the charitable purpose may not remain constant).”

Likewise *AG v Cocke* [1988] Ch 414 at p.419: “... the nonsense of alleging that there is any beneficiary in any meaningful sense of that word under a public charitable trust of this nature. It seems probable to me that in almost all charitable trusts there are no individual beneficiaries.”

I stress this because statute does sometimes refer to “beneficiaries” of a charity, eg: s.525(1)(b) ITA, s.561 ITA; s.117 Charities Act 2011. These are examples of the word being used in a loose non-chancery law sense, where it may apply in the context of charitable companies as well as charitable trusts.

It is possible (at least theoretically) that (say) the individual becomes destitute and a charity whose objects include the relief of poverty makes them a grant. However that does not bring the individual within the definition. One must say:

- (1) The benefit is incidental (the object of the charitable trust being the relief of poverty, not to benefit the individual) and incidental benefits should be disregarded;¹⁴¹ or
- (2) This possibility is not included in the word “may”.¹⁴²

If that were wrong, then (in the absence of a settlor exclusion clause) every charitable trust is within the scope of s.624 ITTOIA as a settlor-interested trust; which cannot be correct. The definition must be read in its context. The purpose is to include discretionary beneficiaries or persons who may be added to the class of beneficiaries.

10.31.1 *Reform?*

HMRC say:

Philanthropy

2.91 A number of responses from the arts and charity sectors suggested that the business investment relief should be extended to allow non-domiciles to bring overseas income and gains to the UK tax-free for the purpose of making donations to, or investments in, UK charities.

Government response

2.92 The Government is committed to encouraging philanthropy. However, there are already tax-efficient ways for non-domiciles to make donations to UK charities and the Government has not seen any compelling evidence that extending the business investment relief in the way suggested would lead to a significant increase in the level of donations to UK charities by non-domiciles. It is also very likely that complicated legislation and anti-avoidance provisions would be required. The Government therefore does not intend to take any further action on this issue at the present time but it will consider how to increase

141 See 29.4.14 (Payment of school/university fees).

142 See Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010), para 13.12 (What does a settlor exclusion cause cover?).

awareness of ways for non-domiciles to make tax-efficient donations under the existing rules.¹⁴³

Thus there is no current prospect of reform.

10.32 Transitional relief for property acquired before 2008

Para 81 Sch 7 FA 2008 provides the starting point:

The other¹⁴⁴ amendments made by this Part of this Schedule [ie part 1 which sets out the provisions discussed in this chapter] have effect for the tax year 2008-09 and subsequent tax years.

10.32.1 *Property remitted before April 2008: para 86(2) transitional relief*

Under the pre-2008 RFI remittance basis, there was no remittance of RFI if property was remitted *in specie* (not in the form of money). This is now caught by remittance condition B.

Para 86 Sch 7 FA 2008 provides a transitional relief:

(1) Section 809L of ITA 2007 (meaning of “remitted to the UK”) has effect subject to this paragraph.

(2) If, before 6 April 2008, property (including money) consisting of or deriving from an individual’s relevant foreign income was brought to or received or used in the UK by or for the benefit of a relevant person, treat the relevant foreign income as not remitted to the UK on or after that date (if it otherwise would be regarded as so remitted).

I refer to the asset brought/received/used in the UK as “**the UK asset**”.

The UK asset may be any property, including money. At first sight, the words “including money” seem otiose: the word “property” alone would in any event include money. But assuming it was desired to apply para 86(2) transitional relief to money brought to the UK before 2008, it made

143 HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (December 2011).

www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

144 The word “other” excludes provisions concerning employment-related securities, not discussed here.

some sense for the statute refer expressly to money, if only for clarity, since para 86(3) transitional relief (discussed below) excludes money.

Why was it desired to apply para 86(2) transitional relief to money? The remittance of *money* to the UK before 2008/09 was in principle a taxable remittance under the old rules so no transitional relief was needed. The reason is that para 86(5) applies a definition of “money” which is artificial in that it includes assets which are not money in the normal sense. Such assets would not have been taxable on remittance before 2008 so the transitional provision is needed to give them exemption now.¹⁴⁵

Para 86(2) transitional relief continues to apply even if the UK asset is sold. HMRC appear to accept this in relation to para 86(3) transitional relief (see the example of Heidi, below) and the same must apply in relation to para 86(2). The result is something of a windfall, but there it is.

The RDR manual provides:

31460. Property derived from relevant foreign income not treated as a remittance (1) [June 2010]

Background

The introduction of Chapter A1 Part 14 ITA 2007 has extended the meaning and scope of foreign income and gains that become taxable when remitted to the UK. In certain situations, the operation of the previous remittance rules in respect of relevant foreign income meant that it could be brought to the UK without triggering an immediate tax charge. As an example, if an asset such as a car was purchased abroad using relevant foreign income and the car was then brought into the UK, there would be no income or capital gains¹⁴⁶ tax charge when it is brought in. Instead the charge would only occur if/when the asset was sold or otherwise realised for cash in the UK (also refer to RDRM31250 Changes to old regime - cash only).

Property consisting of, or deriving from, relevant foreign income from tax years up to and including 2007-08 may have been brought into the UK prior to 6 April 2008, and the transitional provisions deal with these situations.

Transition

145 Para 86(5) provides: “money” has the same meaning as in s.809Y of ITA; see 11.22.2 (“Money”). But since the expression here is “property (including money)”, the definition of money is not important.

146 There is no question of a CGT charge if the car is purchased out of RFI, so the words “or capital gain” are irrelevant.

The transitional position is that the new rules contained in Section 809L do not have effect and that property brought to the UK is not treated as a remittance where:

- Property, including money, was acquired either directly or indirectly using relevant foreign income RDRM31140 and was brought to, received, or used in the UK before 6 April 2008.

Effect

Relevant foreign income brought to or used in the UK by the individual or any other relevant person before 6 April 2008 is not regarded as remitted under Section 809L after 6 April 2008 even if it is still in the UK. So in the example of the car above, even though it is still used in the UK by a relevant person on or after 6 April 2008 it will not be treated as a remittance under Section 809L.

Also, the same money or property can be sent or taken outside the UK and then brought in again. It will not be regarded as a remittance when brought in a second or subsequent time.

The Manual goes on to explain why the transitional relief is restricted to RFI:

Note: This transitional provision applies only to relevant foreign income because the pre 6 April 2008 position for employment income and capital gains was different. These were always chargeable even if remitted in the form of property rather than cash.

It is debatable whether this correctly states the pre-2008 law, but it does not now matter.

Suppose:

- (1) T borrowed to purchase an asset and acquired the asset before 6 April 2008.
- (2) T receives the asset in the UK after 6 April 2008.
- (3) T repays the borrowing out of RFI after 6 April 2008.

The para 86(2) transitional relief does not apply because the purchased asset is not derived from RFI.

10.32.2 *Property acquired before 12 Mar 2008: para 86(3) transitional relief*

Para 86(3) Sch 7 FA 2008 provides:

If, before 12 March 2008, property (other than money) consisting of or deriving from an individual's relevant foreign income was acquired by a relevant person, treat the relevant foreign income as not remitted to the UK on or after 6 April 2008 (if it otherwise would be regarded as so remitted).

Para 86(2) transitional relief applies where property (including "money") was *remitted* before 6 April 2008.

Para 86(3) transitional relief where property (excluding "money") was *acquired* before 12 March 2008, regardless of the date of remittance.

The RDR Manual provides:

31470. Property derived from relevant foreign income not treated as a remittance (2) [June 2012]

Background

[The Manual repeats the text of RDR Manual 31460 and continues:]

Transition

The transitional position is that the new rules contained in Section 809L do not have effect and that property brought to the UK will not be treated as a remittance where:

- property (other than money) was acquired either directly or indirectly by a relevant person using relevant foreign income before 12 March 2008 and is brought to or received in the UK after 5 April 2008.

The exclusion of money is important as it ensures that income arising from sources that have ceased is subject to the rule changes.¹⁴⁷ See Section 809Y ITA 2007 for the definition of money in these circumstances.

Effect

This provision is similar to that described in RDRM31460. However this provision applies only to the purchase of property abroad before 12 March 2008 using relevant foreign income, where that property remained abroad and was not brought to or used in the UK before 6 April 2008.

Example 1 (Heidi)

H bought a car in Germany on 15 October 2007 using her relevant foreign income. She kept the car at her German apartment until May 2009 when she decided to bring it to the UK to use here. Under the previous rules there would have been no remittance until the car was sold in the UK. Under the new rules at Section 809L the car is regarded as derived

147 Author's note: I am unable to understand this sentence.

from the relevant foreign income and so, without this transitional rule, there would be a taxable remittance of that relevant foreign income in May 2009.

Example 1A (Heidi)

As for example 1 but this time H decides that she needs a bigger car. In August 2009 she sells her car in Germany and brings the proceeds to the UK. The proceeds from the sale of the car derive from H's relevant foreign income and would be regarded as a taxable remittance to the UK under the new rules at Section 809L. But as H's car (the property) was acquired before 12 March 2008 the transitional rule at paragraph 86(3) applies and what would be regarded as remitted is treated as not remitted. The money from the sale of the car that H brings into the UK is not therefore a taxable remittance.

There will be no foreign chargeable gain on the disposal of the car because her private motor vehicle is not a chargeable asset.¹⁴⁸

Since para 86(3) relief applies to property "other than money" the definition of "money" is important. Para 86(5) provides: "money" has the same meaning as in s.809Y ITA; this provides a wide and artificial meaning of "money"; see 11.22.2 ("Money").

If para 86(3) is taken literally, it disapplies the remittance basis for all RFI held in non-"money" form before 12 March 2008! For instance, it would apply to RFI invested in shares.

The possibilities are:

- (1) "Property (other than money)" should be taken literally, ie any form of property other than "money" (as defined).
- (2) "Property (other than money)" should be taken to refer to chattels (as the drafter of the RDR manual perhaps assumes).

148 The RDR Manual 36230 is less clear-cut on the position if there is a sale of the asset:

"36230. Cash only [2010]"

Under the transitional rules introduced in Finance Act 2008 (refer to RDRM31400 for more information about the transitional provisions), any asset purchased out of untaxed relevant foreign income which an individual owned on 11 March 2008 remains exempt from a charge under the remittance basis, for so long as that individual owns it, even if that asset is outside the UK and is imported at a later date. Any asset in the UK on 5 April 2008 is also exempt from a charge under the remittance basis for so long as the current owner owns it, even if that asset is later exported and then re-imported."

(3) Since Parliament has failed to express any intention with sufficient clarity, it should be dismissed as meaningless.

None of these solutions are easy:

- (1) Solution (1) is far reaching, and it is not likely that it represents the actual intention of the drafter. Of course, the FA 2008 was enacted in such a rush that one can safely say that no-one carefully formulated any intention at all on the extent of para 86.
- (2) One might infer from the RDR manual that HMRC intended para 86(3) to apply to RFI used to purchase chattels; but the Manual was written much later, and there was no clear statement at the time the Act was passed, so that may be an afterthought. It is also inconsistent with the words “other than money”. To read the section in that way amounts to legislation and not construction.
- (3) This is the course of desperation.

It is considered that solution (1) is to be preferred.

10.33 Transitional loan relief: pre-2008 loans

Para 90 Sch 7 FA 2008 provides a relief which I call “**transitional loan relief**”. Para 90(1) provides:

This paragraph applies if—

- (a) before 12 March 2008, money was lent to an individual outside the UK,
- (b) the loan was made for the purpose of enabling the individual to acquire an interest in residential property in the UK (and for no other purpose), and
- (c) before 6 April 2008—
 - (i) the money was received in the UK,
 - (ii) the individual used the money to acquire an interest in residential property in the UK (“the interest”), and
 - (iii) repayment of the debt for the money (“the debt”), or of payments made under a guarantee of that repayment (“the guarantee”),¹⁴⁹ was secured on the interest.

149 Para 90(6) Sch 7 FA 2008 defines “guarantee”:

“In this paragraph ‘guarantee’ includes an indemnity, and ‘guaranteed’ is to be read accordingly.”

March 2009 Qs & As provides:

Para 90(2) provides the relief:

Relevant foreign income of the individual used outside the UK before 6 April 2028 to pay interest on the debt is treated as not remitted to the UK.

Thus:

- (1) Transitional loan relief is restricted to RFI (and does not apply if employment income or gains are used to pay the interest).
- (2) The relief is restricted to loans for residential property; (it does not apply even to loans for home improvements).
- (3) The relief is restricted to secured loans.

Para 90(3) Sch 7 FA 2008 restricts the relief:

If, at any time on or after 12 March 2008—

- (a) any term upon which the loan was made, or any term of the guarantee, is varied or waived,
 - (b) repayment of the debt, or of payments made under the guarantee, ceases to be secured on the interest,
 - (c) repayment of any other debt is secured on the interest or is guaranteed by the guarantee, or
 - (d) the interest ceases to be owned by the individual,
- sub-para (2) does not apply in relation to relevant foreign income used as mentioned there after that time.

I am unable to see the point of conditions (b) and (c).

Suppose:

- (1) H borrowed before 2008 to purchase property.

Q20: We would also welcome confirmation that the provisions in paragraph 90(1)(c)(iii) apply to a non-UK loan drawn down before 12 March 2008 where there are two (or more) guarantees in place for repayment of the debt, of which only one is secured on the UK residential property.

A: We can only reply in general terms to this query. The way in which this provision will apply will be determined in practice by the details of the particular loan or guarantee transactions in question. We would generally treat repayments of a debt secured on the property itself as falling within the provisions of paragraph 90 regardless of what guarantees might also exist. Likewise, any repayments made under such a guarantee will also be covered by the paragraph. However, any repayments made under a guarantee which is not secured on the UK property will not be covered.

(2) W used her RFI to pay this interest.

Transitional loan relief does not apply as W is not the individual to whom the money is lent.

The effect of the relief in some cases will be to impose a severe tax penalty on a foreign domiciliary who wishes to move house. It also makes re-financing impossible (from 12 March 2008) as the relief ceases to apply.

Para 90(4) Sch 7 FA 2008 provides:

If—

- (a) before 12 March 2008, money was lent to the individual outside the UK (“the subsequent loan”),
- (b) the subsequent loan was made for the purpose of enabling the individual to repay—
 - (i) the loan mentioned in sub-para (1), or
 - (ii) another loan in relation to which sub-paras (2) and (3) apply (by virtue of this sub-paragraph),and for no other purpose, and
- (c) before 6 April 2008—
 - (i) the individual used the money to repay the loan referred to in para (b)(i) or (ii), and
 - (ii) repayment of the subsequent loan, or of payments made under a guarantee of that repayment, was secured on the interest,

sub-paras (2) and (3) apply in relation to the subsequent loan (and for this purpose references there to the debt or the loan are to be read as references to the subsequent loan).

10.33.1 *What is the loan for?*

March 2009 Qs & As provides:

Q19: It would be helpful to understand more fully the meaning of the requirement in paragraph 90(1) (b) that the loan was made for the purpose of acquiring an interest in residential property “and for no other purpose” and in particular to what extent any other purpose might cause the whole loan to fall outside paragraph 90.

In a situation where money is lent before 12 March 2008 from a non-UK bank to an individual (resident but not domiciled in the UK) outside the UK under a facility letter for £5 million. £4.5 million of the facility is

initially drawn down and the money used by the individual to purchase a residential property in the UK. Assume for these purposes that the loan was secured on a UK residential property.

Subsequently (and before 12 March 2008) a second tranche of £0.5 million was drawn down under the same loan facility, also outside the UK. The money from the second draw down was used to refurbish the residential property purchased by the first draw down.

A: The effect of paragraph 90(1) is to provide transitional provisions for loans made for the purpose of acquiring an interest in residential property in the UK. In this scenario, there are effectively two separate loans, even though they were made under a single facility letter: it is the drawdown of the money rather than the facility letter which constitutes the lending of the money. Therefore the first £4.5m drawn-down was money lent to the individual before 12 March and used to purchase a UK residential property and for no other purpose and was secured on that interest. That being the case, the transitional conditions will apply if, and to the extent which, relevant foreign income is used to pay interest on the debt.

However, because the second £0.5m tranche of money was used to refurbish the property rather than to acquire an interest in it, it does not meet the conditions set out paragraph 90(1)(b). Therefore, any relevant foreign income which is used to pay interest on this part of the debt will be treated as a taxable remittance in the UK.

What if a loan meets the conditions in part? It appears that HMRC accept there can be an apportionment. March 2009 Qs & As provides:

Q21: We would welcome guidance on the principles for calculating the interest on that part of the debt which can be paid from relevant foreign income of the individual outside the UK without triggering a taxable remittance (under paragraph 90(2)). We suggest a reasonable approach is to calculate the interest element based on the loan capital ratio (ie that part of the loan which meets the paragraph 90 conditions over total capital of the loan facility), and apply that ratio to the total amount of interest due.

A: The approach you suggest is, in broad terms, one which HMRC would consider acceptable, with the obvious caveat that the actual approach in any specific case would depend entirely on the terms of the loans.

10.33.2 *Varying a loan*

The relief is disappplied if:

any term upon which the loan was made, or any term of the guarantee, is varied or waived

FAQ Remittances (April 2008) states that the relief only applies so long as “no further advances are made on or after 12 March”. This is not correct, but if any further advances are made care must be taken with the documentation to ensure that there is a new loan (not a variation of an existing one) and the debt is not secured on the individual’s interest in the property.

December 2008 Qs & As confirms this:

Q21 Where a taxpayer has an existing mortgage with a non-UK institution, secured on a residential property in the UK, with interest payments made out of untaxed foreign income and that existing facility includes an open credit line, would a draw-down of funds after 12 March 2008 constitute a “further advance”? Just to clarify, no variation to the pre-12 March 2008 terms and conditions of the loan would occur, the draw-down is made under the existing facility.

If such a draw-down would constitute a “further advance”, can you clarify whether the payments of interest from that point being treated as remittances would comprise (a) only those (pro rated) interest payments which relate to the further sum advanced or (b) all payments of interest on the full loan sum (ie the pre-existing loan sum plus the further advanced sum)?

A A draw down of funds after 12 March 2008 would constitute a further advance and cannot be exempted from tax under para 90 because the monies have to have been lent before 12 March 2008. Only the interest payments in relation to the loan received before 11 March 2008 would be eligible for exemption from tax.

December 2008 Qs & As provide:

Q29 If an individual has an offshore mortgage with a two year fixed rate, will the grandfathering provision only last until the two year fixed rate period ends?

A Assuming the mortgage meets the other conditions for grandfathering whether relief would continue to apply after the fixed rate period ends would depend on the exact terms of the relevant loan agreement which was entered into before 12 March 2008. If, after the two year point was reached, the existing terms of that agreement would need to be amended, or a new agreement entered into (including a side agreement to the existing loan agreement), there would be a variation of the terms of the original agreement and the grandfathering provisions would no longer apply after that time. But if the loan agreement automatically provided for the move from a fixed rate to a variable rate, that would not on the face of it result in a variation in the agreement, and if so relief would continue.

In practice in the usual case the move to a floating rate will happen automatically, and the relief will continue to apply.

10.33.3 *When is the loan made?*

December 2008 Qs & As provides:

Q 27 Remittance basis - offshore borrowing If a mortgage was arranged and contracts for the purchase of the relevant property were exchanged in October 2007 but completion was not until March 31 2008 and the mortgage funds were not drawn down until completion, would this be considered to be an existing mortgage as at 12 March 2008?

HMRC refuse to answer the question:

A The conditions for the grandfathering relief to run would only be met if the “lending” took place before 12 March 2008, providing the funds were received in the UK and used to acquire the interest in the property in question before 6 April 2008. The answer depends on the terms and conditions of the mortgage arrangement, which determine the point at which the funds are regarded as “lent”.

The answer does not depend on the terms and conditions of the mortgage arrangement. It depends on when the money was lent which the question states was not until completion. Thus transitional loan relief is not available. This is of course extremely unfair: it may be because of the

obvious unfairness that HMRC chose not to answer the question. But the same question is asked later in the Qs & As, and receives a straight answer:

Q A UK non-domiciled came to the UK in July 2007. He made an offer to purchase a residential property in the UK in November 2007. The deal became unconditional in February 2008 and entry was agreed for 16 March 2008. He has an offshore mortgage and the loan offer was made prior to 12 March but of course not drawn until 16 March. Does para 90 of Schedule 7 of FA 2008 apply?

A The grandfathering provisions for offshore mortgages apply only where the loan was made before 12 March 2008. This means that the money had to be in the hands of the non-domiciled individual (or for example in the Solicitor's client account) before that date.

10.33.4 *Joint accounts*

March 2009 Qs & As provides:

Q22: We would welcome confirmation that the remittance protection in paragraph 90 applies where a husband and wife (or civil partners), both of whom are resident but not domiciled in the UK, have a joint non-UK bank account and a joint offshore mortgage. The offshore mortgage meets the conditions set out in paragraph 90 (1).

If only one spouse (or civil partner) has relevant foreign income and that spouse makes a payment into a joint non-UK bank account using that relevant foreign income and these funds are then used to pay the interest on the offshore mortgage, then it is our understanding that such payment of interest will not constitute a remittance of any of the relevant foreign income by virtue of paragraph 90.

A: We are not able to provide the confirmation you are seeking because whether there is a taxable remittance in this situation will depend on the composition of the joint account and the way in which the mixed fund rules section 809Q apply to it. Therefore we can again only answer in general terms.

Provided the payment of relevant foreign income by one spouse or civil partner into the joint account is the only income within that account (in other words, section 809Q is not in point) which is then used to pay the interest on the mortgage which meets the conditions within paragraph 90(1), then that payment would also fall within paragraph 90.

10.33.5 *Meaning of residential property*

Para 90(5) Sch 7 FA 2008 provides:

In this paragraph “residential property” has the same meaning as in Part 4 of FA 2003 (see section 116 of that Act).

So we turn to s.116 FA 2003 to find the complex definition:

(1) In this Part “residential property” means—

- (a) a building that is used or suitable for use as a dwelling, or is in the process of being constructed or adapted for such use, and
- (b) land that is or forms part of the garden or grounds of a building within para (a) (including any building or structure on such land), or
- (c) an interest in or right over land that subsists for the benefit of a building within para (a) or of land within para (b);

and “non-residential property” means any property that is not residential property. This is subject to the rule in subsection (7) in the case of a transaction involving six or more dwellings.

(2) For the purposes of subsection (1) a building used for any of the following purposes is used as a dwelling—

- (a) residential accommodation for school pupils;
- (b) residential accommodation for students, other than accommodation falling within subsection (3)(b);
- (c) residential accommodation for members of the armed forces;
- (d) an institution that is the sole or main residence of at least 90% of its residents and does not fall within any of paras (a) to (f) of subsection (3).

(3) For the purposes of subsection (1) a building used for any of the following purposes is not used as a dwelling—

- (a) a home or other institution providing residential accommodation for children;
- (b) a hall of residence for students in further or higher education;
- (c) a home or other institution providing residential accommodation with personal care for persons in need of personal care by reason of old age, disablement, past or present dependence on alcohol or drugs or past or present mental disorder;
- (d) a hospital or hospice;
- (e) a prison or similar establishment;
- (f) a hotel or inn or similar establishment.

(4) Where a building is used for a purpose specified in subsection (3), no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use.

(5) Where a building that is not in use is suitable for use for at least one of the purposes specified in subsection (2) and at least one of those specified in subsection (3)—

- (a) if there is one such use for which it is most suitable, or if the uses for which it is most suitable are all specified in the same sub-paragraph, no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use,
- (b) otherwise, the building shall be treated for those purposes as suitable for use as a dwelling.

(6) In this section “building” includes part of a building.

(7) Where six or more separate dwellings are the subject of a single transaction involving the transfer of a major interest in, or the grant of a lease over, them, then, for the purposes of this Part as it applies in relation to that transaction, those dwellings are treated as not being residential property.

(8) The Treasury may by order—

- (a) amend subsections (2) and (3) so as to change or clarify the cases where use of a building is, or is not to be, use of a building as a dwelling for the purposes of subsection (1);
- (b) amend or repeal subsection (7) and the reference to that subsection in subsection (1).

Any such order may contain such incidental, supplementary, consequential or transitional provision as appears to the Treasury to be necessary or expedient.

10.33.6 *Commentary*

No reasons were ever given for the strikingly restricted features of transitional loan relief, so one is left to speculate. If the purpose of the relief is to assist those who have taken out loans on the assumption that the law which existed from 1956 to 2008 would govern the taxation of the interest, and who may now be unable to pay the interest, each of these restrictions are irrational. I surmise that the object was specifically to bolster the residential property market by preventing forced sales by foreign domiciliaries who are made unable to repay their mortgages: if so only the restriction of relief to RFI is irrational.¹⁵⁰

Why the restriction to residential property? The reason may be that loans to acquire let property had a benevolent treatment under the pre-2008 remittance basis: the interest could be paid out of foreign income without a remittance, but the interest was deductible against the rent for the purpose of computing the profits of the UK property business. Similar

¹⁵⁰ It was probably based on the erroneous belief that under the pre-2008 rules, employment income or gains used to pay interest were regarded as remitted.

points apply to other cases where interest is deductible. But if that is the aim then it is achieved in a very rough and ready manner. Those who borrowed to buy a house and improve it are particularly unfairly treated.

Perhaps the matter was not thought out at all and the only thinking was to provide the smallest possible transitional relief consistent with appeasing the banking lobby. Of course in the absence of any reasons being provided by HMRC, all the above can only be speculation.

10.34 Basic remittance basis planning

10.34.1 Planning to avoid mixed funds (segregation of income)

The best way to avoid any question of a remittance basis liability is simple in concept but administratively cumbersome. It is to keep in separate accounts (or sub-accounts) funds which are charged at different rates on remittance.

The starting point is to separate clean capital and other funds. Clean capital may consist of

- (1) funds held before arrival in the UK.
- (2) gifts¹⁵¹ and inheritance.
- (3) capital distributions from trusts if not within the many IT and CGT anti-avoidance provisions (which normally requires some care).
- (2) funds subject to UK tax (UK source income and gains; for taxpayers who do not claim the remittance basis every year, this includes income and gains from a year in which a remittance basis election is not made).

If funds are large enough, may be worth separating:

- (1) Income taxable at 50% on remittance (“the 50% account”).
- (2) Income taxable at lower rates on remittance (because of DTR).
- (3) Capital including gains with DTR.
- (4) Capital including gains without DTR.
- (5) Clean capital (“the clean capital account”).

Funds can then be remitted from accounts with a lower or nil rate of tax. Income taxable at the top rate can be used abroad or reinvested.

The clean capital account should be a sterling account as foreign currency could give rise to chargeable gains (without relief for losses). Treasury

151 Unless the donor is a remittance basis taxpayer making a gift of income/gains.

gilt would be an alternative investment possibility as no chargeable gains arise. Interest would be paid to the 50% account.

What if the individual does not want to tie up their funds in this way? Borrowing charged on the clean capital account may be a solution.

10.34.2 *Planning when mixed fund exists*

Suppose T already has a large mixed fund holding income and gains. Some planning is still possible. T should begin segregating income from the fund, allowing capital gains to accrue within the fund. Subsequent remittances are regarded as taken from those gains first before the income. If the gains are sufficient to exceed the remittances, this will reduce the rate of charge on remittance to CGT rates, as gains of subsequent years are treated as remitted before income of earlier years.

10.35 Reform?

HMRC have rejected calls for simplification and reform:

The Government will not look further at the following:

Simplification Definition of a remittance and the derivation rules

Government response The Government recognises that the definition of a taxable remittance is widely defined but believes any change to narrow the rules would open up opportunities for abuse and an unacceptable risk to the Exchequer.¹⁵²

However reform is in prospect on two small points. One concerns minor grandchildren as relevant persons.¹⁵³ The other concerns inadvertent remittances:

2.128 However, the Government does accept that there is value in giving further consideration to the following suggestions ...

- Removing the charge to tax on inadvertent remittance

152 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011) para 2.127
www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

153 See 10.10 (Commentary: let's simplify relevant person rules).

2.129 The Government will undertake further evaluation of these areas with a view to implementing any changes from April 2013¹⁵⁴

The practical effect will probably be small, though it depends on how one defines “inadvertent remittance”. Only time will tell.

154 HMRC & HMT, “Reform of the taxation of non-domiciled individuals: summary of responses to consultation” (December 2011)
www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

CHAPTER ELEVEN

REMITTANCE RELIEFS

11.1 Remittance reliefs - introduction

This chapter considers the eight reliefs which allow sums to be received in the UK without a taxable remittance:

- (1) Investment relief
- (2) Relief for payment of remittance basis charge
- (3) Foreign services relief
- (4) Exempt property:
 - (a) public access
 - (b) personal use
 - (c) a de minimis exemption
 - (d) temporary importation
 - (e) the repair rule

11.2 Remittance investment relief

The 2008 reforms (more or less) prevented remittance basis taxpayers from investing in the UK, either directly or indirectly through trusts and companies, (unless, exceptionally, they could do so out of clean capital).

Sections 809VA – 809VO ITA, introduced by the coalition government in 2012, provide a relief. The statutory heading is “business investment relief”; I call it “**remittance investment relief**” or just “investment relief”.

HMRC make some general points:

2.86 The Government confirms that relief will apply to a qualifying investment using overseas income and gains that arose in any year in which the non-domiciled individual claimed the remittance basis, regardless of their basis of taxation in the year the qualifying investment

is made.

2.87 Individuals covered by the rule for temporary non-residents will be able to use the investment relief in the same way as other remittance basis taxpayers...

2.89 A claim to relief under this incentive will not affect entitlement to other UK reliefs. An individual who brings overseas income and gains to the UK to invest under this relief will still be able to claim other tax reliefs, such as EIS or VCT, if the conditions for such reliefs are met.

2.90 The Government is satisfied that the draft legislation to be published in Finance Bill 2012 is compatible with EU law and the State Aid rules.¹

11.2.1 *Commencement*

Para 17 sch 12 FA 2012 provides:

The amendments made by this Part of this Schedule have effect where the relevant event (as defined in section 809VA of ITA 2007) or the ceasing to be exempt property (as defined in section 809Y of that Act) occurs on or after 6 April 2012.

11.3 Relevant event

Statute uses the term “relevant event”. This is not a particularly helpful label but it is convenient to follow the statutory usage.

There are two types of relevant event.

11.3.1 *Relevant event: Investment*

Section 809VA(3) ITA provides:

A “relevant event” occurs if money or other property—
(a) is used by a relevant person² to make a qualifying investment

1 HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (December 2011).

www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

2 Section 809VA (8) ITA provides: “Relevant person” has the meaning given in section 809M.

Section 809VA(4) ITA deals with the interaction with exempt property:

Subsection (1)(b) includes a case where income or gains would be treated under section 809Y as remitted to the United Kingdom by virtue of the relevant event.

Could that ever happen?

11.3.2 *Relevant event: Remittance for purpose of investment*

Section 809VA(3) ITA provides:

A “relevant event” occurs if money or other property...

(b) is brought to or received in the UK in order to be used by a relevant person to make a qualifying investment.

Section 809VA ITA imposes a time limit for this type of relevant event:

(5) Subsection (2) applies by virtue of subsection (3)(b) to the extent only that the investment is made within the period of 45 days beginning with the day on which the money or other property is brought to or received in the United Kingdom.

(6) Where some but not all of the money or other property is used to make the investment within that 45-day period, the part of the income or gains to which subsection (2) applies is to be determined on a just and reasonable basis.

There is provision for an investment which fails to proceed. Section 809VB provides:

(1) This section applies to any portion of the income or gains to which section 809VA(2) does not apply because the investment was not made within the period mentioned in section 809VA(5) (“the 45-day period”).

(2) That portion is to be treated as not remitted to the United Kingdom to the extent that the remaining money or other property is taken offshore within the 45-day period.

(3) Where some but not all of the remaining money or other property is taken offshore within the 45-day period, the part of the income or gains to which subsection (2) applies is to be determined on a just and reasonable basis.

(4) If any remaining money or other property is taken offshore within

the 45-day period, nothing in subsection (2) prevents anything subsequently done in relation to it (or anything deriving from it) from counting as a remittance of the underlying income or gains to the United Kingdom at the time when the thing is subsequently done.

(5) A reference to the “remaining” money or other property is to so much of the money or other property brought to or received in the United Kingdom as is not used within the 45-day period to make the investment (which may in some cases be all of it).

11.4 The relief

Section 809VA ITA provides:

- (1) Subsection (2) applies if—
 - (a) a relevant event occurs,
 - (b) but for subsection (2), income or chargeable gains of an individual would be regarded as remitted to the UK by virtue of that event, and
 - (c) the individual makes a claim for relief under this section.
- (2) The income or gains are to be treated as not remitted to the UK.

The relief applies to income treated as arising to an individual under s.624, or s.720, or gains treated as accruing under s.13, even though the income or gains actually arise to a non-resident trust or company and are invested (and so remitted) by the trust or the company. This was deliberate. HMRC say:

2.34 It is common for non-domiciles to hold money in offshore trusts but the tax treatment of remittances currently deters some offshore trusts and companies from investing in the UK. For this reason, it is not proposed to limit the new tax incentive to investments made directly by the individual. There will be no restriction on individuals remitting overseas income or capital gains which are held in investment vehicles or trusts. This will allow non-domiciles to invest in UK businesses using funds held in offshore companies and trusts without attracting a tax charge on the remittance.³

3 HMT & HMRC, “Reform of the taxation of non-domiciled individuals: a consultation” (June 2011) accessible www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.

Suppose:

- (1) an individual receives a benefit chargeable under the s.87 remittance basis or the s.731 remittance basis and
 - (2) the individual uses the benefit to make a qualifying investment.
- Investment relief applies, as the income or gains invested are the income or gains of the individual.

Similarly, investment relief applies if:

- (1) an individual receives a benefit chargeable under the s.731 remittance basis and
- (2) the person abroad uses matched relevant income to make a qualifying investment.

It is not a requirement that the income used to make the investment is the income of the individual: just that income of the individual would be regarded as remitted by virtue of the relevant event.

However in these cases, consideration must be given as to whether the benefit is a related benefit.

11.4.1 “By virtue of” the relevant event

Suppose:

- (1) T lends to a company or subscribes for shares in a company.
- (2) The company uses the funds to purchase a property in the UK.

If step (1) is a remittance the relief applies.

At first sight, if step (1) is not a remittance, there is a taxable remittance at step (2) and the relief does not apply, since the company does not make a qualifying investment. But even in this case it is considered that there is a remittance by virtue of the investment by the individual, so the relief applies.

11.5 Anti-avoidance

Section 809VA(7) ITA provides:

Subsection (2) does not apply if the relevant event occurs, or the investment is made, as part of or as a result of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.

Section 989 ITA provides:

The following definitions apply for the purposes of the Income Tax Acts

...

“tax”, if neither income tax nor corporation tax is specified, means either of those taxes.

So it does not matter if one of the purposes of the arrangement is IHT avoidance or CGT avoidance: only IT (or CT) avoidance counts.

11.6 Claims

Section 809VA(8) ITA provides:

A claim for relief under this section must be made on or before the first anniversary of the 31 January following the tax year in which the income or gains would, but for subsection (2), be regarded as remitted to the UK by virtue of the relevant event.

11.7 Qualifying investments

Section 809Z10 ITA provides:

“qualifying investment” has the meaning given by section 809VC (and references to making a qualifying investment are to be read in accordance with that section)

11.7.1 “Investment”

“Investment” has an artificial meaning. Section 809VC ITA provides:

- (1) For the purposes of section 809VA, a person makes an investment if—
 - (a) shares in a company are issued to the person, or
 - (b) the person makes a loan (secured or unsecured) to a company.
- (2) The company is referred to as “the target company”.
- (3) The shares or the person’s rights under the loan (or both) forming the subject of the investment are referred to as “the holding”...
- (6) A reference in this section to “shares” includes any securities.
- (7) If a loan agreement authorises a company to draw down amounts of a loan over a period of time—

- (a) entry into the agreement does not count for the purposes of this section as the making of a loan, but
 - (b) a separate loan is to be treated as made each time an amount is drawn down under the agreement.
- (8) Accordingly—
- (a) a separate investment is treated as made each time an amount is drawn down under the agreement, and
 - (b) the reference in subsection (3) to the person's rights under the loan applies only to so much of the person's rights as relate to the drawdown of that particular amount.

Since this definition is only for the purposes of s.809VA, it has to be incorporated by reference in s.809VD.

11.7.2 *The future: relief for investment in partnerships*

At present, only corporate investments count as “investment”.
HMRC say:

2.43 The Government is not yet convinced of the case for including partnerships within the relief. It remains concerned that extending the relief in this way could lead to large scale avoidance unless complex anti-avoidance legislation was introduced. The legislation which will take effect from 6 April 2012 will not allow investment in partnerships.

2.44 However, in view of the strength of support for extending the relief to investments in partnerships and the increased investment that this might encourage, the Government will consider this issue further to evaluate whether there is any scope for widening the relief to include investment in partnerships in Finance Bill 2013. The Government will not consider extending the relief to sole traders.⁴

11.7.3 *“Qualifying” investment*

Section 809VC ITA provides:

- (4) The investment counts as a “qualifying investment” if conditions A

⁴ HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (December 2011).
www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

and B are met when the investment is made.

(5) Conditions A and B are defined in sections 809VD and 809VF.

I refer below to “**investment conditions A and B**”.

11.8 Investment condition A (trading company/group)

Section 809VD(1) ITA provides:

Condition A is that the target company is–

- (a) an eligible trading company,
- (b) an eligible stakeholder company, or
- (c) an eligible holding company.

11.8.1 Eligible trading company

Section 809VD(2) ITA provides:

A company is an “eligible trading company” if–

- (a) it is a private limited company,
- (b) it carries on one or more commercial trades or is preparing to do so within the next 2 years, and
- (c) carrying on commercial trades is all or substantially all of what it does (or of what it is reasonably expected to do once it begins trading).

HMRC say:

2.21 The Government will require all, or substantially all, of the company’s activities to be qualifying activities. Investments will therefore be eligible for the relief provided any non-qualifying activities do not form a substantial part of the company’s total business activities. For these purposes this will mean that the non-qualifying activities constitute no more than 20% of the company’s business activities. For companies that have yet to start trading at the time the investment is made, the relief will be available where it is reasonable to expect that non-qualifying activities will not be substantial. For most companies, determining whether non-qualifying activity breaches this condition will be based on the company’s turnover but this may not be applicable in all cases. HMRC will provide guidance on how total business activity

should be measured.⁵

11.8.2 *Eligible stakeholder company*

Section 809VD(3) ITA provides:

A company is an “eligible stakeholder company” if—

- (a) it is a private limited company,
- (b) it exists wholly for the purpose of making investments⁶ in eligible trading companies (ignoring any minor or incidental purposes), and
- (c) it holds one or more such investments or is preparing to do so within the next 2 years.

11.8.3 *Eligible holding company*

Section 809VD ITA provides:

(5) A company is an “eligible holding company” if—

- (a) it is a member of an eligible trading group or of an eligible group that is reasonably expected to become an eligible trading group within the next 2 years,
- (b) an eligible trading company in the group is a 51% subsidiary of it, and
- (c) if the ordinary share capital that it owns in the eligible trading company is owned indirectly, each intermediary in the series is also a member of the group.

(6) “Group” means a parent company and its 51% subsidiaries.

(7) “Parent company” means a company that—

- (a) has one or more 51% subsidiaries, but
- (b) is not itself a 51% subsidiary of any company.

(8) A group is an “eligible group” if the parent company and each of its 51% subsidiaries are private limited companies.

(9) A group is an “eligible trading group” if—

- (a) it is an eligible group, and

⁵ HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (December 2011).

www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

⁶ Section 809VD(4) ITA provides: “The reference in subsection (3) to making investments is to be read in accordance with section 809VC.”

- (b) carrying on commercial trades is all or substantially all of what the group does (taking the activities of its members as a whole).
- (10) The reference in subsection (5) to owning ordinary share capital indirectly is to be read in accordance with section 1155 of CTA 2010.

11.8.4 *Private limited company*

Section 809VD(11) ITA provides:

- A company is a “private limited company” if–
- (a) it is a body corporate whose liability is limited,
 - (b) it is not a limited liability partnership, and
 - (c) none of its shares are listed on a recognised stock exchange.

The company need not be UK resident. This is deliberate. HMRC say:

2.38 The Government wants to ensure that non-domiciles can invest in a range of companies, including those incorporated in other countries, and believes this will broaden the positive economic impact of this incentive. Therefore, it does not propose to restrict tax relief to investment in businesses that are resident in the UK or to businesses carrying out trades wholly or mainly in the UK. Relief will be extended to overseas income and capital gains remitted to invest in non-UK resident companies....⁷

2.52 The Government agrees that restricting investment to non-UK resident companies with a UK PE is not necessary and has decided not to include this restriction.⁸

The company may be a foreign entity. This was deliberate. HMRC say:

2.45 Investment in a foreign entity will be eligible for relief where it is a private limited company and the other conditions on qualifying activities are met.

⁷ HMT & HMRC, “Reform of the taxation of non-domiciled individuals: a consultation” (June 2011) accessible www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.

⁸ HMRC, “Reform of the taxation of non-domiciled individuals: summary of responses to consultation” (December 2011). www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

11.8.5 *Commercial trade*

Section 809VE ITA provides an extended definition of trade, to allow property investment:

- (1) Section 809VD is to be read in accordance with this section.
- (2) A reference to a “trade” also includes—
 - (a) anything that is treated for corporation tax purposes as if it were a trade, and
 - (b) a business carried on for generating income from land (as defined in section 207 of CTA 2009).
- (3) A trade is a “commercial trade” if it is conducted on a commercial basis and with a view to the realisation of profits.
- (4) The carrying on of activities of research and development from which it is intended that a commercial trade will be derived, or will benefit, is to be treated as the carrying on of a commercial trade.
- (5) But preparing to carry on activities within subsection (4) is not to be treated as the carrying on of a commercial trade.

Since this only applies for the purposes of s.809VD, the definition has to be incorporated by reference in Section 809VH ITA.

The residence consultation paper explains:

UK businesses

2.38 The Government wants to ensure that non-domiciles can invest in a range of companies, including those incorporated in other countries, and believes this will broaden the positive economic impact of this incentive. Therefore, it does not propose to restrict tax relief to investment in businesses that are resident in the UK or to businesses carrying out trades wholly or mainly in the UK. Relief will be extended to overseas income and capital gains remitted to invest in non-UK resident companies that have a permanent establishment in the UK.

2.39 While this approach would allow investments to be used for trades outside the UK, non-domiciled investors can already invest in such trades without remitting income or capital gains into the UK. It is therefore likely that in the vast majority of cases, non-domiciles will use the new incentives to invest in UK trades, which they cannot currently do without incurring a tax charge....

2.41 The Government does not propose to introduce any other restrictions on the type of holding company that can qualify or the

degree of ownership the company has over its subsidiary companies. This means that companies that hold shares in other companies and are resident outside the UK would be included. It also means that private equity companies and venture capital companies could qualify even where they do not have a majority ownership stake in the invested companies.⁹

HMRC said:

2.33 Businesses undertaking furnished holiday lettings (FHLs) will not be qualifying businesses for the purposes of the relief. Although FHLs are treated as a trade for certain purposes, they are not taxed as sch and will therefore not meet the qualifying conditions.¹⁰

This is not carried through in the legislation since FHL is a property business. Presumably there was a change of mind.

11.9 Investment condition B (no benefit)

Section 809VF(1) ITA provides:

Condition B is that no relevant person has (directly or indirectly) obtained or become entitled to obtain any related benefit, and no relevant person expects to obtain any such benefit.

There are two no-benefit rules in the legislation:

(1) Condition B applies if there is a benefit or expected benefit at the time of the investment.

(2) The extraction of value rule applies if there is a benefit later.¹¹

Condition B is severe in that any benefit disallows the entire relief.

9 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible

www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.

10 HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (December 2011).

www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

11 See 11.11.3 (Extraction of value rule).

11.9.1 *Benefit*

“Benefit” is wide but s. 809VF(2) ITA makes it wider:

A “benefit”–

- (a) includes the provision of anything that would not be provided to the relevant person in the ordinary course of business, or would be provided but on less favourable terms, but
- (b) does not include the provision of anything provided to the relevant person in the ordinary course of business and on arm’s length terms.

This applies even if the benefit is received outside the UK, which is illogical for a remittance basis.

11.9.2 *“Provision”*

Section 809VF(4) ITA provides:

For the purposes of subsection (2)–

- (a) a reference to the provision of anything is to the provision of anything in money or money’s worth, including property, capital, goods or services of any kind, and
- (b) “provision” includes any arrangement that allows a person to enjoy or benefit from the thing in question (whether temporarily or permanently).

11.9.3 *“Related”*

Section 809VF(3) ITA provides a wide meaning of “related”:

A benefit is “related” if–

- (a) it is directly or indirectly attributable to the making of the investment (whether it is obtained before or after the investment is made), or
- (b) it is reasonable to assume that the benefit would not be available in the absence of the investment.

11.10 Clawback remittance charge

Section 809VG ITA provides:

- (1) Subsection (2) applies if—
 - (a) income or chargeable gains are treated under section 809VA(2) as not remitted to the UK as a result of a qualifying investment,
 - (b) a potentially chargeable event occurs after the investment is made, and
 - (c) the appropriate mitigation steps are not taken within the grace period allowed for each step.¹²
- (2) The affected income or gains are to be treated as having been remitted to the UK immediately after the end of the relevant grace period.
- (3) Where the step required by section 809VI(2)(a) is not taken within the grace period allowed for that step, "the relevant grace period" is the grace period allowed for that step.
- (4) Otherwise, "the relevant grace period" is the grace period allowed for the step required by section 809VI(1) or (2)(b).

I refer to this as **"the clawback remittance charge"**.

11.10.1 *Affected income or gains*

Section 809VG ITA provides:

- (5) "The affected income or gains" means such portion of the income or gains mentioned in subsection (1)(a) as reflects the portion of the investment affected by the potentially chargeable event.
- (6) The portion of the investment affected is—
 - (a) if the potentially chargeable event is a disposal of a part of the holding (or a part of the remaining holding), a portion equal to the portion of the holding (or remaining holding) being disposed of, and
 - (b) otherwise, the whole of the investment.
- (7) Sections 809VN (order of disposals etc) and 809VO (investments made from mixed funds) make further provision for the purposes of this section.
- (8) If a qualifying investment is made using the money or other property mentioned in section 809VA(3) together with other funds—
 - (a) that investment is to be treated as two separate investments, one made using the money or other property mentioned in section 809VA(3) and one made using the other funds, and

¹² See 11.15 (The grace period).

(b) references in the business investment provisions¹³ to “the investment” and “the holding” relate only to the investment made using the money or other property mentioned in section 809VA(3).

(9) If the potentially chargeable event mentioned in subsection (1)(b) is not the first such event to affect the investment, the income or gains mentioned in subsection (1)(a) do not include, as respects that investment—

- (a) any part already treated under subsection (2) as remitted to the United Kingdom as a result of an earlier event,
- (b) any part contained in amounts already taken offshore or reinvested by way of appropriate mitigation steps following an earlier event, or
- (c) any part contained in amounts already used to make a tax deposit without which an amount mentioned in paragraph (b) would not have been enough to satisfy section 809VI(1) or (2)(b) (see section 809VK).

11.11 Potentially chargeable event

There are four types of potentially chargeable event.

11.11.1 *Ceasing to be an eligible company*

Section 809VH ITA provides:

(1) For the purposes of section 809VG, a “potentially chargeable event” occurs if—

- (a) the target company is for the first time neither an eligible trading company nor an eligible stakeholder company nor an eligible holding company...

An example would be if the company stops trading or becomes quoted.

11.11.2 *Disposal of holding*

Section 809VH ITA provides:

¹³ Defined s.809Z10 ITA: “In this Chapter “the business investment provisions” means sections 809VA to 809VO”.

(1) For the purposes of section 809VG, a “potentially chargeable event” occurs if ...

- (b) the relevant person who made the investment (“P”) disposes of all or part of the holding,

Section 809VH(8) ITA provides:

If consideration for a disposal of all or part of the holding is to be paid in instalments, the disposal is to be treated for the purposes of this section as if it were separate disposals, one for each instalment (and each giving rise to a separate potentially chargeable event).

11.11.3 *Extraction of value rule*

Section 809VH ITA provides:

(1) For the purposes of section 809VG, a “potentially chargeable event” occurs if ...

- (c) the extraction of value rule is breached,

Section 809VH(2) ITA provides:

The extraction of value rule is breached if—

- (a) value (in money or money’s worth) is received by or for the benefit of P or another relevant person,
- (b) the value is received—
 - (i) from an involved company, or
 - (ii) from anyone else but in circumstances that are directly or indirectly attributable to the investment or to any other investment made by a relevant person in an involved company, and
- (c) the value is received other than by virtue of a disposal that is itself a potentially chargeable event.

Section 809VG(2)(b)(ii) reaches a new level of vagueness.

Section 809VH(3) ITA provides a limited exception for taxable benefits:

But the extraction of value rule is not breached merely because a relevant person receives value that—

- (a) is treated for income tax or corporation tax purposes as the receipt of income or would be so treated if that person were

- liable to such tax, and
- (b) is paid or provided to the person in the ordinary course of business and on arm's length terms.

“Involved company” is very widely defined. Section 809VH(4) ITA provides:

Each of the following is an “involved company”–

- (a) the target company,
- (b) if the target company is an eligible stakeholder company, any eligible trading company in which it has made or intends to make an investment,
- (c) if the target company is an eligible holding company, any eligible trading company that is a 51% subsidiary of it, and (d) any company that is connected with a company within paragraph (a), (b) or (c).

HMRC give one example:

2.52 ... the Government proposes to introduce a provision to prevent the value of the investment leaking out to the individual either directly through payments or loans which are not arms-length or through transactions designed to pass value to the individual. For example, it would not be permitted for the company to use the funds invested to guarantee loans made to the individual; nor would it be possible to make payments to a third party which are linked to payments made to the individual.¹⁴

11.11.4 2-year start-up rule

Section 809VH ITA provides:

- (1) For the purposes of section 809VE, a “potentially chargeable event” occurs if ...
 - (d) the 2-year start-up rule is breached.

Section 809VH ITA provides:

¹⁴ HMT & HMRC, “Reform of the taxation of non-domiciled individuals: a consultation” (June 2011) accessible www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.

- (5) The 2-year start-up rule is breached if—
 - (a) immediately after the end of the period of 2 years beginning with the day on which the investment was made, the target company is non-operational, or
 - (b) at any time after the end of that period, the target company becomes non-operational.
- (6) The target company is “non-operational” at any time when—
 - (a) it is an eligible trading company but is not trading,
 - (b) it is an eligible stakeholder company but—
 - (i) it holds no investments in eligible trading companies, or
 - (ii) none of the eligible trading companies in which it holds investments is trading, or
 - (c) it is an eligible holding company but—
 - (i) the group of which it is a member is not an eligible trading group, or
 - (ii) none of its 51% subsidiaries in the eligible trading group of which it is a member is an eligible trading company that is trading.
- (7) In subsection (6), “trading” means carrying on one or more commercial trades (including the carrying on of any activities treated under section 809VE(4) as the carrying on of a commercial trade).

11.11.5 *Insolvency*

Section 809VH ITA provides:

- (9) An event listed in subsection (1) does not count as a potentially chargeable event if it is due to an insolvency step taken for genuine commercial reasons (but this does not prevent the extraction of any value in connection with the insolvency step from counting as a potentially chargeable event).
- (10) For the purposes of subsection (9), an insolvency step is taken if—
 - (a) the target company enters into administration or receivership or is wound up or dissolved,
 - (b) the target company is an eligible stakeholder company and any eligible trading company in which it holds an investment enters into administration or receivership or is wound up or dissolved,
 - (c) the target company is an eligible holding company and any eligible trading company in the group that is a 51% subsidiary of it enters into administration or receivership or is wound up or dissolved, or
 - (d) a similar step is taken in relation to a company mentioned in

paragraph (a), (b) or (c) under the law of a country or territory outside the United Kingdom.

11.12 The appropriate mitigation steps

There is no clawback remittance charge if “the appropriate mitigation steps” are taken “within the grace period.”

Section 809VI ITA provides:

- (1) If the potentially chargeable event is a disposal of all or part of the holding, the appropriate mitigation steps are regarded as taken if the whole of the disposal proceeds have been taken offshore or reinvested.
- (2) For any other case, the appropriate mitigation steps are regarded as taken if—
 - (a) P has disposed of the entire holding (or so much of it as P retains when the potentially chargeable event occurs), and
 - (b) the whole of the disposal proceeds have been taken offshore or re-invested.

11.13 Taking offshore

Section 809Z9 ITA provides:

- (1) This section applies to a provision of this Chapter that is satisfied if something (for example, disposal proceeds) is taken offshore or used by a relevant person to make a qualifying investment.
- (2) Things are to be regarded as “taken offshore” if (and only if) they are taken outside the United Kingdom such that, on leaving the United Kingdom, they cease to be available—
 - (a) to be used or enjoyed in the United Kingdom by or for the benefit of a relevant person, or
 - (b) to be used or enjoyed in any other way that would count as remitting income or gains to the United Kingdom.
- (3) If—
 - (a) the thing required to be taken offshore or invested is money and
 - (b) it is paid temporarily into an account pending satisfaction of the provision,the provision is satisfied only if the money actually taken offshore or invested is taken from the same account.
- (4) If the thing required to be taken offshore or invested is something in money’s worth, the provision may be satisfied—

- (a) by taking the thing offshore or investing it, or
 - (b) by taking offshore or investing money or other property of the equivalent value.
- (5) “The equivalent value” is the market value¹⁵ of the thing in money’s worth, assessed as at the date of the sale or other disposal in relation to which the provision is triggered.
- (6) If the consideration for a disposal is deemed under section 809Z8(4), the provision may be satisfied by taking offshore or investing money or other property of a value equal to—
- (a) the amount of the deemed consideration, less
 - (b) any agency fees (within the meaning of section 809Z8) that are deducted before the actual consideration is paid or otherwise made available to or for the benefit of a relevant person.
- (7) Subsections (4)(b) and (6) do not apply in the case of other property of the equivalent value if the other property is—
- (a) exempt property under section 809X,
 - (b) consideration for the disposal of any such exempt property, or
 - (c) consideration for the disposal of all or part of the holding (see section 809VC) relating to a qualifying investment.
- (8) Money or other property taken offshore or invested in accordance with subsection (4)(b) or (6) is to be treated for the purposes of this Chapter—
- (a) as deriving from the thing required to be taken offshore or invested, and
 - (b) as having the same composition of kinds of income and capital as that thing.
- (9) A provision to which this section applies may be satisfied—
- (a) by taking the whole thing offshore or investing the whole thing, or
 - (b) by taking one part offshore and investing the other part.
- (10) References in this section to something being “invested” are to something being used by a relevant person to make a qualifying investment.
- (11) The provisions to which this section applies include section 809VB(2) but in that case—
- (a) disregard references in this section to investment, and
 - (b) the assessment date for the purposes of subsection (5) is the date of the relevant event (see section 809VA(3)(b)).

15 Defined s.809Z10 ITA: “In this Chapter ...“market value” has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act).

11.13.1 *Re-invested*

Section 809VI ITA provides:

(7) Proceeds are “re-invested” if a relevant person uses them to make another qualifying investment (or the proceeds are themselves a qualifying investment) whether in the same or a different company.

11.13.2 *Gain on disposal of investment*

Section 809VI ITA provides:

(3) But if the disposal proceeds exceed X, subsections (1) and (2)(b) apply only to so much of the proceeds as is equal to X.

(4) “X” is—

(a) the sum originally invested, less

(b) so much of that sum as has, on previous occasions involving the same investment—

(i) been taken into account in determining the affected income or gains under section 809VG(2),

(ii) been taken offshore or re-invested in order to avoid the application of that section, or

(iii) been used to make a tax deposit without which the amount actually taken offshore or re-invested would not have been enough to satisfy subsection (1) or (2)(b) (see section 809VK).

(5) “The sum originally invested” means the amount of the money, or the market value of the other property, used to make the investment.

(6) Market value¹⁶ is to be assessed for these purposes as at the date of the relevant event (see section 809VA).

HMRC say:

The Government will require that the overseas income or gains used to fund the qualifying investment is identified with the first amount of value taken out of the business until the total amount invested has been matched. This means that, in general, the investor will not be required to take chargeable gains which arise on disposal out of the UK in order

16 Defined s.809Z10 ITA: “In this Chapter ...“market value” has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act).

to benefit from the relief. However, if an investor disposes of part of their investment, it may be necessary for them to take the gain arising on that part disposal out of the UK, or to reinvest it in a qualifying business, to meet this requirement.¹⁷

11.13.3 *Liquidation of target company*

Section 809VI ITA provides:

- (8) In cases where a breach of the extraction of value rule occurs in connection with the winding-up or dissolution of the target company—
- (a) subsection (2)(a) does not apply,
 - (b) the reference in subsection (2)(b) to the disposal proceeds is to the value received, and
 - (c) references in this section and in succeeding provisions of the business investment provisions¹⁸ to the disposal proceeds are to be read as references to the value received.

11.14 “The disposal proceeds”

Section 809Z8 ITA provides:

- (1) In this Chapter, in relation to a sale or other disposal, “the disposal proceeds” means—
- (a) the consideration for the disposal, less
 - (b) any agency fees that are deducted before the consideration is paid or otherwise made available to or for the benefit of the person making the disposal (“the transferor”) or any other relevant person.
- (2) The following rules apply in determining the consideration for the disposal.
- (3) If the consideration is provided in the form of anything other than money, the amount of the consideration is the market value¹⁹ of the

17 HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (December 2011).

www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

18 Defined s.809Z10 ITA: “In this Chapter “the business investment provisions” means sections 809VA to 809VO”.

19 Defined s.809Z10 ITA: “In this Chapter ...“market value” has the same meaning as in TCGA 1992 (see in particular sections 272 and 273 of that Act).

thing at the time of the disposal.

(4) If the disposal is made other than by way of a bargain made at arm's length, the disposal is deemed to be made for a consideration equal to the market value, immediately before the disposal, of the thing being disposed of.

(5) Without limiting the generality of subsection (4), a disposal made to another relevant person or to a person connected with a relevant person is treated in all cases as made other than by way of a bargain at arm's length.

(6) In subsection (1), "agency fees" means fees and other incidental costs of the disposal that are charged to the transferor by any person by or through whom the disposal is effected, but excluding any such fees or costs that—

- (a) are charged to the transferor by another relevant person, or
- (b) are to be passed on to or otherwise applied for the benefit of a relevant person.

(7) The exclusion mentioned in subsection (6) does not apply to the extent that the fees or costs—

- (a) relate to a service actually provided by the relevant person to the transferor in connection with effecting the disposal, and
- (b) do not exceed the amount that would be charged for that service if it were provided in the ordinary course of business and on arm's length terms.

Usual CGT reliefs such as spouse relief and charity relief do not apply. Section 809VJ ITA provides:

(1) Subsection (2) applies if at any time income or chargeable gains of an individual are treated under section 809VA as not remitted to the United Kingdom as a result of—

- (a) more than one qualifying investment made in the same target company,
- (b) more than one qualifying investment
- (c) qualifying investments made in an eligible trading company and in an eligible stakeholder company that holds investments in that trading company.

(2) In the application of section 809VE, disposals of all or part of the holdings are assumed to affect the investments in the order in which the investments were made (that is to say, on a first in, first out basis).

(3) It does not matter whether the investments were made by the same relevant person or different ones.

11.14.1 *Retention of funds to meet CGT liabilities*

Section 809VK ITA provides:

- (1) This section applies if—
 - (a) there is a disposal of all or part of the holding,
 - (b) the disposal counts as a potentially chargeable event or is part of the appropriate mitigation steps taken in consequence of a potentially chargeable event,
 - (c) a chargeable gain (but not a loss) accrues to P on the disposal,
 - (d) P is chargeable to capital gains tax (but not corporation tax) in respect of that gain, and
 - (e) the actual disposal proceeds are less than Y.
- (2) The difference between the actual disposal proceeds and Y is referred to in this section as “the shortfall”.
- (3) “The actual disposal proceeds” means the disposal proceeds but disregarding section 809Z8(4).
- (4) “Y” is the sum of—
 - (a) the amount (if any) that would, but for this section, be required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b), and
 - (b) the amount found by applying the highest potential CGT rate to the amount (computed in accordance with TCGA 1992) of the chargeable gain accruing to P on the disposal.
- (5) The highest potential CGT rate is—
 - (a) if the chargeable gain accrues to P as the trustees of a settlement or accrues to the personal representatives of P, the rate specified in section 4(3) of TCGA 1992, and
 - (b) otherwise, the rate specified in section 4(4) of that Act (regardless of the rate at which income tax is chargeable in respect of P’s income).
- (6) If this section applies, the amount that is required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b) is reduced by the permitted amount.
- (7) “The permitted amount” is so much of the shortfall as is used, within the grace period allowed for taking the disposal proceeds offshore or re-investing them, to make a deposit in respect of which a certificate of tax deposit is issued to P under section 12 of the National Loans Act 1968.
- (8) A reduction may not be made under subsection (6) unless—
 - (a) when details of the deposit are confirmed to Her Majesty’s Revenue and Customs, the confirmation letter states that this section is intended to apply to the deposit, and

- (b) the amount of the deposit is no greater than the shortfall.

11.15 The grace period

There is no clawback remittance charge if “the appropriate mitigation steps” are taken “within the grace period.”

Section 809VJ ITA provides:

- (1) The grace period allowed for the step mentioned in section 809VI(2)(a) is the period of 90 days beginning—
 - (a) if the potentially chargeable event is a breach of the extraction of value rule, with the day on which the value is received, and
 - (b) otherwise, with the day on which a relevant person first became aware or ought reasonably to have become aware of the potentially chargeable event.
- (2) The grace period allowed for the step mentioned in section 809VI(1) and (2)(b) is the period of 45 days beginning with the day on which the disposal proceeds first became available for use by or for the benefit of P or any other relevant person.

11.16 *Exceptional circumstances*

Section 809VJ(3) ITA provides:

- (3) An officer of Revenue and Customs may agree in a particular case to extend the grace period allowed for an appropriate mitigation step in exceptional circumstances.

HMRC give one example of exceptional circumstances:

2.24 In some cases, it may be difficult for an investor to know that a company’s activities have changed and to dispose of their investment within the 45-day period. The draft legislation therefore contains a provision to allow HMRC to extend this grace period where exceptional circumstances mean it would be unreasonable to expect the individual to dispose of an investment within 45 days.²⁰

²⁰ HMRC, *Reform of the taxation of non-domiciled individuals: summary of responses to consultation* (December 2011).

www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

11.17 *Extension of grace period*

Section 809VJ ITA provides:

- (4) An officer of Revenue and Customs may agree in a particular case to extend the grace period allowed for an appropriate mitigation step in circumstances specified in regulations made by the Commissioners.
- (5) Regulations under subsection (4) may have effect in relation to investments made before the day on which the regulations are made.
- (6) Nothing in subsection (4) or in regulations made under it limits the power conferred by subsection (3).
- (7) The powers conferred on officers of Revenue and Customs by subsections (3) and (4) include power to agree to extend a grace period for a length of time that is indefinite but is capable of becoming definite by means identified in the agreement (such as the satisfaction of conditions).

The regulations have been published in draft. It is dispiriting to see the level of micro-detail in a government which claims to be “determined to cut red tape”:

Circumstances in which grace period may be extended

2. The grace period allowed for an appropriate mitigation step by section 809VJ of the Income Tax Act 2007 may be extended by an officer of Revenue and Customs if regulation 3 or 4 applies.

Lock-up agreements

3.—(1) This regulation applies if conditions 1 and 2 are met.

(2) Condition 1 is that—

(a) the target company has ceased to be a private limited company by virtue of having some or all of its shares listed on a recognised stock exchange; or

(b) (i) the target company has become a subsidiary of another company (“the new company”); and

(ii) the new company is a body corporate some or all of whose shares are listed on a recognised stock exchange (or are to be so listed).

(3) Condition 2 is that P is unable to comply with an appropriate mitigation step without breaching the terms of a lock-up agreement.

(4) For the purposes of this regulation “lock-up agreement” means a contract—

(a) entered into by P with one or more relevant parties which is directly related to the listing of shares in the target company or, as the case may be, the new company, on a recognised stock exchange; and

(b) that imposes restrictions on the time or manner in which P may—

(i) dispose of some or all of P’s holding in the target company; or

(ii) dispose of some or all of any shares in the new company received by P in return for P’s holding in the target company.

(5) For the purposes of this regulation “relevant party” means—

- (a) the target company;
- (b) the new company;
- (c) professional advisors retained by the target company or the new company in relation to the listing of the shares of the target company (or, as the case may be, the shares of the new company) on a recognised stock exchange.

Statutory and legal bars

4. This regulation applies if—

- (a) P is prevented from taking an appropriate mitigation step by a prohibition imposed by or under any enactment; or
- (b) the taking of an appropriate mitigation step by P would constitute or would be punishable as a contempt of court.

11.18 Effect of taking mitigation steps

Section 809VL ITA provides:

- (1) This section explains the effect for the purposes of this Chapter in cases where section 809VG(2) does not apply because the appropriate mitigation steps were taken within the grace period allowed for each step.
- (2) If disposal proceeds were taken offshore as part of those steps, nothing in section 809VA(2) prevents anything subsequently done in relation to those proceeds (or anything deriving from them) from counting as a remittance of the underlying income or gains to the United Kingdom at the time when the thing is subsequently done.
- (3) If disposal proceeds were re-invested as part of those steps—
 - (a) the underlying income or gains continue to be treated under section 809VA(2) as not remitted to the United Kingdom, and
 - (b) the business investment provisions²¹ apply to the reinvestment as they apply to the original investment.
- (4) In the application of the business investment provisions to the reinvestment—
 - (a) treat the potentially chargeable event mentioned in section 809VG(1)(b) as the relevant event,
 - (b) treat the underlying income or gains as the income or gains treated under section 809VA(2) as not remitted to the United Kingdom as a result of the re-investment, and
 - (c) treat the amount used to make the re-investment as the sum originally invested.

21 Defined s.809Z10 ITA: “In this Chapter “the business investment provisions” means sections 809VA to 809VO”.

- (5) If the re-investment is made using more than the minimum amount of disposal proceeds required to satisfy section 809VI(1) or (2)(b)—
 - (a) that investment is to be treated as two separate investments, one made using the minimum amount of disposal proceeds and one made using the excess, and
 - (b) references in the business investment provisions to “the investment” and “the holding” relate only to the investment made using the minimum amount of disposal proceeds.
- (6) “The underlying income or gains” means the affected income or gains (within the meaning of section 809VG) or, if one part of the disposal proceeds is taken offshore and the other part re-invested, a corresponding proportion of the affected income or gains.
- (7) A further claim must be made in accordance with section 809VA in respect of the re-investment and, if no such claim is made on or before the first anniversary of the 31 January following the tax year in which the re-investment was made, section 809VG(2) applies, as respects the original investment, as if the appropriate mitigation steps had not been taken within the grace period allowed for each step.
- (8) Section 809VM makes further provision in cases involving a tax deposit.

11.18.1 *Tax deposits*

Section 809VM ITA provides:

- (1) This section applies in cases where—
 - (a) section 809VG(2) did not apply because the appropriate mitigation steps were taken within the grace period allowed for each step,
 - (b) the amount required to be taken offshore or re-invested in order to satisfy section 809VI(1) or (2)(b) had been reduced under section 809VK, and
 - (c) but for that reduction, the amount that was actually taken offshore or re-invested would not have been enough to satisfy section 809VI(1) or (2)(b).
- (2) The tax deposit that gave rise to the reduction is referred to in this section as “the tax deposit”.
- (3) Use of the tax deposit to pay the relevant tax liability does not count as remitting the underlying income or gains to the United Kingdom (and, accordingly, section 809VA(2) continues to apply to the income or gains).
- (4) If any of the CTD conditions is breached, the underlying income or

gains are to be treated as having been remitted to the United Kingdom immediately after the day on which the breach occurs.

(5) “The underlying income or gains” means such portion of the affected income or gains (within the meaning of section 809VG) as is—

- (a) represented by the payment, in the case of subsection (3), or
- (b) affected by the breach, in the case of subsection (4).

(6) The CTD conditions are as follows—

- (a) the tax deposit must not be used to pay a tax liability other than the relevant tax liability,
- (b) if any of the tax deposit is withdrawn by the depositor, the amount withdrawn must be taken offshore or re-invested within the period of 45 days beginning with the day on which the withdrawal was made, and
- (c) any part of the tax deposit that has been neither used to pay a tax liability nor withdrawn by the due date must be withdrawn by the depositor and taken offshore or reinvested within the period of 45 days beginning with that date.

(7) Where the CTD conditions were not breached because the requisite amount was taken offshore or re-invested within the 45-day period mentioned in subsection (6)(b) or (c)—

- (a) section 809VL applies to the amount taken offshore or reinvested as it applies to disposal proceeds, but
- (b) read the reference in section 809VL(4)(a) to the potentially chargeable event as a reference to—
 - (i) the withdrawal, in a case within subsection (6)(b), and
 - (ii) the due date, in a case within subsection (6)(c).

(8) For the purposes of this section—

- (a) “the relevant tax liability” means P’s liability to capital gains tax for the tax year in which the disposal took place,
- (b) “the due date” means the date by which the relevant tax liability is required to be paid,
- (c) “re-invested” has the meaning given in section 809VI(7), and
- (d) references to withdrawal include repayment for whatever reason.

11.19 Order of disposals

Section 809VN ITA provides:

(1) Subsection (2) applies if at any time income or chargeable gains of an individual are treated under section 809VA as not remitted to the United Kingdom as a result of—

- (a) more than one qualifying investment made in the same target

- company,
 - (b) more than one qualifying investment made in companies in the same eligible trading group, or
 - (c) qualifying investments made in an eligible trading company and in an eligible stakeholder company that holds investments in that trading company.
- (2) In the application of section 809VG at that time—
- (a) treat the investments and holdings as if they were a single qualifying investment and a single holding, and
 - (b) assume that a disposal of all or part of that deemed single holding affects the deemed single investment in the order in which the qualifying investments were made (that is to say, on a first in, first out basis).
- (3) Subsection (4) applies if at any time—
- (a) income or chargeable gains of an individual are treated under section 809VA as not remitted to the United Kingdom as a result of one or more qualifying investments,
 - (b) in addition to that investment or those investments, a relevant person holds at least one other investment in the same target company, the same eligible trading group or a related eligible company, and
 - (c) that other investment is not a qualifying investment.
- (4) In the application of section 809VG at that time—
- (a) treat the investments and holdings as if they were a single investment and a single holding, and
 - (b) assume that a disposal of all or part of that deemed single holding is a disposal of a holding from a qualifying investment until the holdings from all the qualifying investments have been disposed of.
- (5) The reference to a “related eligible company”—
- (a) in relation to an eligible trading company, is to an eligible stakeholder company that holds investments in that company, and
 - (b) in relation to an eligible stakeholder company, is to an eligible trading company in which that company holds investments.
- (6) Subsections (2) and (4) apply whether the investments in question are held by the same relevant person or different ones.

11.20 Mixed funds

Section 809VO ITA provides:

- (1) This section applies if—
 - (a) but for section 809VA(2), income or gains would have been remitted to the United Kingdom by virtue of a relevant event, and
 - (b) section 809Q (transfers from mixed funds) would have applied in determining the amount that would have been so remitted.
- (2) The relevant event counts as an offshore transfer for the purposes of section 809R(4).
- (3) The holding is to be treated as containing a proportion of each kind of income and capital contained in the invested property equal to the fixed proportion.
- (4) “The fixed proportion” is the proportion of that kind of income or capital contained in the invested property by virtue of subsection (2).
- (5) “The invested property” means the money or other property used to make the investment.
- (6) Subsection (7) applies in cases where—
 - (a) section 809VG(2) does not apply because an amount is taken offshore, re-invested or used to make a tax deposit, or
 - (b) section 809VM(4) does not apply because an amount is taken offshore or re-invested.
- (7) The amount taken offshore, re-invested or used to make a tax deposit is treated, immediately after that step, as containing the fixed proportion of each kind of income and capital contained in the holding.
- (8) In cases where section 809VG(2) applies—
 - (a) the affected income or gains are so much of the fixed amount of each kind of income or gain mentioned in subsection (1)(a) as reflects the portion of the investment affected by the potentially chargeable event (see section 809VG(6)),
 - (b) “the fixed amount” is the amount of that kind of income or gain that the holding is treated as containing by virtue of subsection (3), and
 - (c) section 809Q does not apply in determining the affected income or gains.
- (9) Section 809R(2) and (3) and section 809S apply for the purposes of this section.

11.21 Remittance investment relief: commentary

Budget 2011 announced:

3.7 Review of non-domicile taxation ... However, the rules mean that foreign income and gains are taxed if they are brought to the UK and this

is a disincentive to inward investment. The Government will introduce the following reforms:

- remove the tax charge when non-domiciles remit foreign income or capital gains to the UK for the purpose of commercial investment in UK businesses;

It is melancholy to compare the aspiration expressed in the last three lines with the achievement in the 17 dense pages of legislation. The rules are complex, restrictive, and (perhaps most seriously to potential investors) contain many uncertainties, as anyone who tries to apply them to a complex business deal will immediately discover.

In the consultation paper, HMRC said:

2.48 At the same time the Government recognises that complicated anti-avoidance provisions could deter non-domiciles from using this new incentive and believes that both these risks can be tackled by relatively straightforward provisions....

The Government recognises that complexity can deter investment. Therefore, to make the investment incentive genuinely appealing to non-domiciles, the Government is clear that it should be free of unnecessary restrictions and be simple to use.²²

I infer that the minister's intention clashed with the deeply ingrained culture of HMRC/HMT, that anti-avoidance is a consideration which out-trumps every other; and the latter prevailed. In consequence, the legislation has not lived up to the promise.

All else being equal, a remittance basis taxpayer will not wish to rely on this relief to invest in the UK, either directly or indirectly through trusts and companies, as investment elsewhere avoids the burden of the rules discussed in this chapter.

For a simple solution to this problem, see 10.10 (Commentary: let's simplify remittance and relevant person rules).

11.22 Relief for payment of remittance basis charge

Section 809V ITA provides:

22 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.

(1) Subsection (2) applies to income or chargeable gains of an individual if—

- (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK by virtue of the bringing of money to the UK,
- (b) the money is brought to the UK by way of one or more direct payments to the Commissioners [HMRC], and
- (c) the payments are made in relation to a tax year to which section 809H applies as regards the individual.

(2) The income or chargeable gains are to be treated as not remitted to the UK to the extent that the payments do not exceed the applicable amount (as defined in section 809H).²³

(3) Subsection (2) does not apply to payments if or to the extent that they are repaid by the Commissioners.

The RDR Manual provides:

34020. Remittance Basis charge - money paid directly to HMRC [July 2010]

Money brought into the UK to pay the remittance basis charge (RBC) RDRM32210 is treated as not remitted to the UK if direct payment is made to HMRC (Section 809V[2] ITA 2007).

This exemption will only apply if the money is paid:

- in respect of the tax due for the year in which the remittance basis has been claimed, and
- the remittance basis charge is due for that tax year.

Only remittances that relate to the remittance basis charge are covered by the exemption. Remittances of foreign income or gains to pay any other liability to UK tax, including for example income tax or capital gains tax on remitted amounts, are themselves chargeable to UK tax as remitted income or gains of the tax year in which the tax is paid to HMRC (although also refer to remittances of nominated income) RDRM35140.

The remittance basis charge can be paid in one or more amounts. However, the amount that benefits from the exemption provided at Section 809V is limited to the amount of the charge, that is £30,000. The £30,000 can be paid in one lump sum or in several stages, and may form part of the payments on account paid on 31 January or 31 July, or may be paid as a balancing payment. The exemption applies as long as the payment is in relation to the tax year in which the remittance basis charge is due.

The exemption only applies where the remittance basis charge is paid directly from foreign income or gains held outside the UK, the payment must be made direct to HMRC. This can be done either by:

- cheque (drawn on a foreign bank account)

²³ See 9.10.2 ("Long-term UK resident").

- electronic transfer of funds.

Taxpayers will need to keep sufficient records to show that payment of the £30,000 RBC was made directly to HMRC from an overseas account. A copy of a cheque (or cheques) drawn on the foreign bank account, or the relevant bank statement identifying the bank transfer are examples of acceptable evidence.

The £30,000 remittance basis charge may be paid directly from outside the UK to HMRC by a person other than the individual; the most common example will be a payment by an employer on behalf of an employee. In such cases the £30,000 paid to HMRC may form part of the taxpayer's income, for example if paid by his employer the £30,000 will form part of the employee's earnings. To the extent that these are regarded as foreign chargeable earnings this exemption will apply.

Example 1 (Olaf)

O uses the remittance basis in 2008/09 and 2009/10 and 2010/11; but in 2011/12 O chooses not to use the remittance basis.

In 2011/12 O makes payment of £30,000 direct to HMRC from his foreign income that arose during 2009/10. This payment is to pay the remittance basis charge of his sister Giselle, who is a long term resident of the UK and who has made a claim to the remittance basis in 2011/12.

The £30,000 remitted by O may be treated as not remitted to the UK under Section 809V ITA 2007 and so is not chargeable to tax provided that the payments made for a particular year do not exceed £30,000.

The position should be looked at critically if there is evidence of any reciprocity. In the case of doubt or difficulty submit to PTI Advisory Foreign Income and Remittance Basis Team.

Example 2 (Alex)

A is a long-term UK resident remittance basis user. He uses the remittance basis in 2008-09 and plans to use it in 2009-10 also. A therefore makes payments on account RDRM32390 of £100,000 on 31 January 2009 and on 31 July 2009 in respect of his 2009-10 liability.

In July 2009 he pays £40,000 of that payment on account from his 2008-09 foreign income. Payment is made by cheque drawn on an account at a bank in the Isle of Man that was sent direct to HMRC.

A's tax liability for 2009-10 is £200,000 including the remittance basis charge of £30,000, which has been wholly met from the payments on account that he has made. No further tax is due for this year.

Because £40,000 of the tax that A has paid on account was paid directly to HMRC from an overseas account, £30,000 of the £40,000 income remitted may be treated as not remitted to the UK and is not chargeable to tax, unless A has instructed otherwise. The remaining £10,000 will be taxed as a remittance in the normal way. As it was remitted in July 2009 it will be a taxable remittance for the tax year 2009-10, and should be declared as such.

In this example, all of the £40,000 was remitted in July. However the remittances might be split between the payment on account dates, for example £20,000 remitted on 31 January 2009 and a further £20,000 on 31 July 2009. In such cases, unless the taxpayer specifies otherwise, the £10,000 that is not subject to the exemption and so is a taxable remittance will be treated as having occurred

at the later date, as this will usually be in the taxpayer's favour.

Refer to RDRM34030 for example of where the 'remittance basis charge' is repaid to A, or otherwise no longer applies.

Note: Taxpayers may choose to specify that a payment made is in respect of the remittance basis charge at time of payment. However they are not obliged to do so and it is not necessary as long as payments received can be clearly related to a tax year for which the remittance basis charge is due.

Nominated Income or gains

If taxpayers use nominated income or gains to pay the remittance basis charge of £30,000 it is treated as not remitted to the UK under section 809V. Because none of the individual's nominated income or gains is treated as having been remitted to the UK in that tax year you do not have to apply the 'ordering rules' at ITAs809I and Section 809J. Refer to RDRM35100 Remittances of nominated income or gains.

If the £30,000 is repaid by HMRC it is treated as remitted at that point (refer to RDRM34030) and section 809I will be triggered.

34030. Remittance Basis charge - repayment by HMRC [December 2011]

There may be some exceptional circumstances where the £30,000 remittance basis charge is paid to HMRC but then is later repaid, or is otherwise no longer due.

Any foreign income or gains remitted to pay the charge and initially covered by the exemption at Section 809V ITA 2007 will be regarded as a remittance when the charge is withdrawn and/or the repayment is made and so will be treated as liable to UK tax at that point (Section 809V(2) ITA 2007).

Change of claim

The £30,000 remittance basis charge is most likely to be repaid where an individual, having made a claim for the remittance basis and paid the charge for that year, subsequently decides not to claim the remittance basis for that year and makes an amendment to their Self Assessment return (TMA1970/Section 9ZA). In such circumstances Section 809H ITA 2007 will not apply for that tax year, so the exemption cannot apply either.

Change of status

The other situation where the £30,000 is likely to be repaid or not otherwise due is where it later transpires that an individual has claimed the remittance basis for a tax year but was not entitled to do so as they were UK domiciled and UK ordinarily resident in that year.

Effect

If the exemption under section 809V was claimed then the foreign income or gains used to pay the remittance basis charge will not have been subject to tax in the year in which they arose/accrued because the individual used the remittance basis in that year. Due to the exemption the income or gains will also not have been subject to tax when brought into the UK. In such situations there are two possibilities:

- the £30,000 payment was made from foreign income or gains from an earlier year in which the individual was entitled to claim the remittance basis and did so. The £30,000 is treated as a taxable remittance and will be taxable in the in which the remittance occurred

- the £30,000 payment was made from foreign income or gains from the present year or an earlier year in which the individual was not entitled to claim the remittance basis. In which case the income or gains will be taxed on the arising basis for the year in which the foreign income or gains actually arose. If the return cannot be amended you may need to deal with such assessments under the ‘discovery provisions’ at Section 29 TMA 1970.

Example 1 (Alex)

In the earlier example above, A’s circumstances change and he decides not to claim to be taxed on the remittance basis for 2009-10. His liability for 2009-10 is £195,000.

When A made the payment on account of £40,000 in July 2009 he anticipated that £30,000 of it would be attributed to the remittance basis charge. In the event he did not claim to be taxed on the remittance basis. He does not have to pay the remittance basis charge.

None of the payments on account can therefore be attributed to the remittance basis charge and the £40,000 that A paid from his 2008-09 foreign income (remember that A did use the remittance basis in 2008-09) in July 2009 is a taxable remittance.

Any cases of difficulty should be referred to Specialist Personal Tax, PTI Advisory, Foreign Income and Remittance Basis Team.

11.23 Foreign services relief

Section 809W ITA provides a relief which I call “**foreign services relief**”. Section 809W(1) provides:

This section applies to income or chargeable gains if—

- (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK because conditions A and B in section 809L are met,
- (b) condition A in section 809L [remittance condition A] is met because a service is provided in the UK (“the relevant UK service”), and
- (c) condition B in section 809L [remittance condition B] is met because section 809L(3)(a) or (b) applies to the consideration for the relevant UK service (“the relevant consideration”).

I refer to these conditions as “**services relief conditions A and B**” to distinguish them from the myriad other conditions in ITA.

Section 809W(2) ITA provides the relief:

The income or chargeable gains are to be treated as not remitted to the

UK if the following conditions are met but this is subject to subsection (5).

There is no relief in relation to remittance conditions C or D but in practice these will not often apply. More importantly, there is no relief if s.809L(3)(c) or (d) apply, which deal with debt remittances. Thus if T borrows, uses the borrowed money to pay for foreign services and repays the borrowing, there is a remittance under the debt remittance rules even though a direct payment for the services would be exempt. This is anomalous. The reason might be the difficulty of applying services condition B to a relevant debt case; if so it is not a good reason as services condition B is itself misconceived.

11.23.1 *Services relief condition A: Relating to property situated outside UK*

Section 809W(3) ITA provides:

Condition A is that the relevant UK service relates wholly or mainly to property situated outside the UK.

One needs to identify:

- (1) the service
- (2) the property (if any) to which the service relates
- (3) the situs of the property
- (4) if the service relates to property in and outside the UK, whether the property is “mainly” outside the UK

Unless the service is provided in the UK there is no need for foreign property services relief.²⁴ In the following discussion it is assumed that the service is provided in the UK.

Situs is relatively straightforward. Section 809W(6) ITA incorporates the CGT situs rules.²⁵ The other requirements can be more difficult. EN Clause 23 Sch 7 Remittance Basis Amendment 354 provides some obvious examples:

²⁴ See 10.11.14 (Service provided in the UK).

²⁵ Section 809W(6) ITA provides: “sections 275 to 275C of TCGA 1992 (location of assets) apply for the purposes of subsection (3) as they apply for the purposes of TCGA 1992.” See 78.1 (Situs of assets for CGT).

7. Condition A would cover for example, fees paid to a UK bank for managing an individual's overseas investment portfolio. It would cover legal or brokerage fees in respect of offshore assets, such as the legal fees on the sale of a foreign house....

This is considering fees paid by the individual, but the same applies to fees paid by a relevant person, such as a settlor-interested trust:

13. Among the sort of payments that Condition A might cover would be fees paid by non-UK resident trustees to UK advisers for advice on
[1] managing the assets held in the trust or
[2] non-UK assets the trustees are considering purchasing.
Accountancy fees for preparing non-UK tax returns would also be covered providing the majority of the accountancy services relates to non UK property.

The RDR Manual provides:

34060 - Remittance Basis: Exemptions: Relevant services provided in the UK - location of overseas property [June 2010]

In applying these rules it is important to determine exactly what the service relates to, not just to whom it is provided.

For example, services may be said to be provided for non-resident trustees (a relevant person) RDRM33030 in respect of shares that the trust owns in a non-resident company (that would, if it were UK resident, be a 'close' company').²⁶ However if the service actually relates to that company's underlying UK assets then the service does not relate to property 'outside the UK'.

On the other hand, if the service is in connection with legal obligations between the trustees and the non-resident company in respect of, say the shares that are held, for example updating the share register in the local territory, then this is a service relating to property (the company/shares) wholly situated outside of the UK.

26 The author is confused, here and in the examples which follow, in that whether or not the company is a close company is not relevant; though in the kind of case under consideration the company is likely to be a trust holding company and so would be "close". (In this section I use the expression "close" company loosely, to include a non-resident close company, ie one which would be close if UK resident.)

Example 1 (Petra)

P, a remittance basis user, is a participator in a Jersey company that would, if it were in the UK, be a close company. The company is a relevant person RDRM33030.²⁷ The company owns a portfolio of UK real estate. UK-based advisors produce an investment and tax report in respect of the company's UK activities; the advisors fees are paid overseas using P's foreign income.

The example is factually far-fetched since one would normally expect the company to pay for advice supplied to the company, and (so far as the expense is deductible) there would in principle be no taxable remittance.²⁸ Assuming (as the example requires) P did pay for advice supplied to P, then the HMRC analysis is as follows:

The relevant UK service is the provision of advice in a tax report which relates to the Jersey company's UK activities. It is the UK activities which are the subject of the advice, not the overseas company so the exemption cannot apply. We look through to what the work relates to.

The analysis is wrong. The advice relates to property, not activities, but it is UK property and so HMRC are correct to conclude that the exemption does not apply. The moral for tax planning is that P should use foreign advisors (who may subcontract to the UK).

Example 1(a)

The Jersey company in example 1 above also has a French property, which makes up only 10% of its business.

UK-based advisors produce a separate marketing report in respect of this property. The advisors fees are paid overseas using P's foreign income. The service provided in the UK - in this case the preparation of the report - relates to a non-UK property. So the exemption at ITA07/s809W would apply, assuming the other conditions are also met.

This is straightforward.

RDRM34040 - Remittance Basis: Exemptions: Relevant services provided in the UK [December 2011]

²⁷ The facts that the company is close, and a relevant person, are irrelevant; see above footnote.

²⁸ See 10.13.1 (What is the income?).

...

Example 6 (Micho)

M, a remittance basis user, employs UK-based agents to prepare his US tax return. He uses his foreign income to pay for this service, paying directly into the agent's offshore bank account. This is a service provided in the UK.

Advice on the completion of a non-UK tax return would generally be within the exemption providing the majority of the advice relates to non-UK property; for example:

1. M's major source of income is UK salary and other UK employment benefits, and most of the work relates to this.

This is service work relating to non-asset related income, eg employment income, so whether UK employment or not there is no property so the exemption at s809W cannot apply.

The HMRC analysis is wrong as an employment contract is property.²⁹ However the UK contract of employment is likely to be subject to UK law, and so UK situate, and so the conclusion that the services exemption does not apply is correct. The moral, again, is that M should use foreign advisors. The Manual continues:

2. Most of the work undertaken is in respect of his UK sources of income and gains, albeit these are small compared to his world wide income and gains.

The service relates to investment income/gains from UK sources so it is outside the exemption.

The HMRC analysis is wrong as the issue is CGT situs, not source, but in practice the two are normally the same.

3. Most of the work undertaken is in respect of advice relating to investment income/gains from non-UK sources.

The service provided relates to investment income/gains from non-UK sources, so it is within the exemption if all other conditions are met.

Perhaps more importantly, fees for preparing UK tax returns will similarly be exempt if they relate mainly to non-UK assets.

²⁹ *O'Brien v Benson's Hosiery* 53 TC 254.

11.23.2 “Wholly or mainly”

The RDR Manual provides:

34040. Relevant services provided in the UK [December 2011]

... For the purposes of applying the exemption “wholly or mainly” means more than half. Wholly or mainly relates to the service provided, not the property, and is, in general, judged by reference to work done, normally time spent.

However, if advisers value the measurement of work done using a variety of factors, such as, for example a basis of both time and fee rate (eg use of a team specialising in international property), it is appropriate that this should be reflected in the considerations of “wholly or mainly”. Other factors may include the fee and time rate if specialist advice was required, split of assets between UK and foreign situs, and the place of research or administration.³⁰

The RDR Manual provides an example:

34040. Relevant services provided in the UK [December 2011]

... *Example 2 (Ritika)*

R, a remittance basis user, engages an investment manager based in the UK to manage her investment portfolio which covers assets both in and outside the UK and which changes throughout the year. ... Whether Condition A is met depends on whether the service provided relates wholly or mainly to property situated outside the UK.

If the advice relates to assets and investments held by R, and/or her obligations that ensue from these (eg completing valuation/ownership details to comply with requirements in the jurisdiction where the assets are based), and the advice relates to both UK-situs and offshore situs assets, it will depend on the split of the assets.

For example, if she holds, say, 60% foreign assets, and the advice given relates to all of the assets held in the portfolio, then the ‘wholly or mainly’ test would be met.

If the advisors are considering changes in R’s portfolio or the acquisition of UK assets and their research is UK-centric, then the ‘service’ provided in the UK is likely to relate to UK property, regardless of what is eventually acquired.

30 The same point is made in EN Clause 23 Sch 7 Remittance Basis Amendment 354.

The tax planning moral is that R should instruct the investment managers to invest in non-UK property, but in practice she will want to do that for other reasons anyway; or (better) appoint foreign managers and then R can forget about the requirements of foreign services relief.

11.23.3 *Services relief condition B (payment to foreign bank account)*

Section 809W(4) sets out services relief condition B:

Condition B is that the whole of the relevant consideration is given by way of one or more payments to one or more bank accounts held outside the UK by or on behalf of the person who provides the relevant UK service.

No relief is available if any part of the fees are paid in any other manner, for instance by way of set-off.

The service provider will generally remit the payment to the UK immediately on receipt. That does not affect the customer's tax position. The customer will not know, and will not be entitled to know, what the supplier does with its own money.

11.23.4 *Services relief condition B: commentary*

I am unable to see the purpose of services relief condition B. It continues the rule in *Timpson's Executors v Yerbury* applicable under the pre-2008 remittance basis. Perhaps the policy was that nothing which was a remittance under the pre-2008 rules should cease to be a remittance under the ITA remittance rules. If so the policy was wholly misguided. The opportunity should have been taken to create an entirely new and coherent set of rules. As it is, suppliers of services relating to foreign property will need to open foreign bank accounts and the individual must ensure that they pay all the fees into that account; a pointless and inconvenient bureaucratic requirement, but there it is.

In practice it will often be easier to appoint foreign advisors so as not to have to bother about the relief.

11.23.5 *Identifying "the service"*

It is necessary to identify what is the service before identifying what is the

property to which the service relates:

- (1) There may be one service relating to UK and non UK property, in which case one applies the “wholly or mainly” test.
- (2) There may be separate services, one (or more) relating to UK property, and one (or more) relating to foreign property, in which case the services relating to the foreign property only can qualify for exemption.

Of course either analysis may better suit the taxpayer or HMRC, depending on the result of the wholly or mainly test. The VAT distinction between single (though composite) and multiple supplies is applicable here.

The RDR Manual provides:

34040. Relevant services provided in the UK [December 2011]

... If

[1] the services (and thus the consideration due for that service) can be clearly and specifically identified as relating either to UK assets or to non-UK assets and

[2] it is possible to separately identify this from the fees structure and invoicing,

the work relating to UK assets will not be regarded as meeting the “wholly or mainly” test at Condition A in section 809W.³¹ This does not necessarily require a separate advice letter, report or invoice (“split-invoice”) to be issued, as long as the individual is clearly able to identify from the invoice to what his payments relate.

If that is right, a remittance basis taxpayer should not use a UK investment manager, say, as the commission on the purchase of UK situate securities would not be exempt, even if the securities as a whole are mainly non UK situate. A UK investment manager should be used only if no UK situate securities are purchased.

Where there are two or more separate supplies, some exempt, some not, it is necessary to identify the consideration given for each supply. The RDR Manual discusses apportionment:

34040. Relevant services provided in the UK [December 2011]

If there is a split contract for services relating to UK and non-UK assets

31 [Author’s footnote] It follows that the work relating to the foreign assets does meet the wholly or mainly test (even if the foreign assets are a minority of the whole).

you should accept the computations if the split bears a reasonable resemblance to the actuality of service provided.

Any attempt to use artificial or otherwise unrealistic cost structures, for example to increase the costs attributed to non-UK property advice work against UK-property advice work should be strongly resisted.

11.23.6 *Exceptions: s.730 and s.87 benefits*

Section 809W(5) ITA provides:

Subsection (2) does not apply if the relevant UK service relates (to any extent) to the provision in the UK of—

- (a) a benefit that is treated as deriving from the income by virtue of section 735, or
- (b) a relevant benefit within the meaning of section 87B of TCGA 1992 that is treated as deriving from the chargeable gains by virtue of that section.

I cannot see what the legislation is aiming at here. The following conditions must all be satisfied:

- (1) A service is provided in the UK.
- (2) The service relates to non-UK property.
- (3) The service relates to the provision in the UK of a benefit within s.731 or a capital payment for CGT.

Points (2) and (3) appear to be contradictory, but if one could weave a course which satisfies both, why withhold foreign services relief? I would be grateful to any reader who could explain.

11.24 **Exempt property**

Section 809X(1) ITA provides:

Exempt property which is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies is to be treated as not remitted to the UK.

There are five categories of exempt property.

The exemption does not extend to remittance condition C or D but they will not often apply.

11.24.1 “Property”

Section 809Z6 ITA provides some definitions. Section 809Z6(1) ITA provides:

This section applies for the purposes of sections 809X to 809Z5.

Section 809Z6(2) ITA provides:

“Property” does not include money.

This is an artificial definition of “property” in that the word in its natural sense does include money.

In the remittance basis provisions outside s.809X to 809Z5, the word “property” is used without a definition, and does include money.³² This breaches the somewhat elementary principle of good drafting, that the same word should not be used with different meanings. The consequence is to cause confusion and make discussion more difficult, as greater care is needed in one’s choice of terminology. In this chapter:

- the word “property” (by itself) does include money;
- where I want to refer to “property” in the artificial s.809Z6(2) sense, I use the expression “property (excluding money)”.

11.24.2 “Money”

Section 809Z6(3) ITA defines money:

In subsection (2) “money” includes—

- (a) a traveller’s cheque,
- (b) a promissory note,
- (c) a bill of exchange, and
- (d) any other—
 - (i) instrument that is evidence of a debt, or
 - (ii) voucher, stamp or similar token or document which is capable of being exchanged for money, goods or services.

This is an artificial definition of “money” in that none of these five

³² See 10.11.2 “Property” and “Money”.

categories would be “money” in the ordinary meaning of the word.

The definition is over-complex, given the limited importance of the exempt property rules, but there it is.

The definition is expressed to apply only for the purposes of s.809Z6(2), through which it applies for the purposes of s.809X to s.809Z5. It is also needed in s.809Y, where it is repeated verbatim. It also applies in para 86 Sch 7 FA 2008, where it is incorporated by reference. In the remittance basis provisions elsewhere the word *money* is used without any definition, and has its ordinary meaning. So once again, care is needed in ones choice of terminology. In this chapter:

- when the word *money* is used in the artificial s.809Z6(3) sense, I refer to it as “money” with scare quotation marks.
- when the word *money* is used in its ordinary sense, I write it without quotation marks.

11.24.3 *Property “being in the UK”*

Section 809Z6(4) ITA defines “being in the UK”:

References to property being in the UK are references to the property—

- (a) being in the UK after being brought to, or received in, the UK in circumstances in which section 809L(2)(a) applies, or
- (b) being used in the UK in circumstances in which section 809L(2)(a) applies.

Section 809L(2)(a) applies if “money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person.”

11.25 Public access rule

11.25.1 *Introduction*

Suppose an individual has purchased works of art out of foreign income or gains. It may be possible to lend these works to UK institutions without a taxable remittance³³ but s.809Z ITA provides an additional exemption for works of art brought to the UK for public display. Perhaps it is intended for the case where the institution is a relevant person. The

33 See 10.11.3 (Property brought to the UK (“brought” limb of condition A)).

drafting incorporates by reference provisions relating to VAT and import duty (temporary imports and items brought into the UK permanently by museums and galleries).

Section 809X(3) ITA provides:

Property is exempt property if it meets the public access rule (see sections 809Z and 809Z1).

Section 809Z(1) ITA provides:

Property meets the public access rule if conditions A to D are met.

I refer to “**public access conditions A to D**” to avoid confusion with the myriad other conditions in ITA.

11.25.2 Public access condition A (works of art)

Section 809Z(2) ITA provides:

Condition A is that the property is—

- (a) a work of art,
- (b) a collectors’ item, or
- (c) an antique,

within the meaning of Council Directive 2006/112/EC (see, in particular, Annex IX to that Directive).

Annex IX of the directive provides:

WORKS OF ART, COLLECTORS’ ITEMS AND ANTIQUES, AS REFERRED TO IN POINTS (2), (3) AND (4) OF ARTICLE 311(1)

PART A Works of art

(1) Pictures, collages and similar decorative plaques, paintings and drawings, executed entirely by hand by the artist, other than plans and drawings for architectural, engineering, industrial, commercial, topographical or similar purposes, hand-decorated manufactured articles, theatrical scenery, studio back cloths or the like of painted canvas (CN code 9701);

(2) original engravings, prints and lithographs, being impressions produced in limited numbers directly in black and white or in colour of one or of several plates executed entirely by hand by the artist, irrespective of the process or of the material employed, but not including any mechanical or photomechanical process (CN code 9702 00 00);

(3) original sculptures and statuary, in any material, provided that they are executed entirely by the artist; sculpture casts the production of which is limited to eight copies and

supervised by the artist or his successors in title (CN code 9703 00 00); on an exceptional basis, in cases determined by the Member States, the limit of eight copies may be exceeded for statuary casts produced before 1 January 1989;

(4) tapestries (CN code 5805 00 00) and wall textiles (CN code 6304 00 00) made by hand from original designs provided by artists, provided that there are not more than eight copies of each;

(5) individual pieces of ceramics executed entirely by the artist and signed by him;

(6) enamels on copper, executed entirely by hand, limited to eight numbered copies bearing the signature of the artist or the studio, excluding articles of jewellery and goldsmiths' and silversmiths' wares;

(7) photographs taken by the artist, printed by him or under his supervision, signed and numbered and limited to 30 copies, all sizes and mounts included.

PART B Collectors' items

(1) Postage or revenue stamps, postmarks, first-day covers, pre-stamped stationery and the like, used, or if unused not current and not intended to be current (CN code 9704 00 00);

(2) collections and collectors' pieces of zoological, botanical, mineralogical, anatomical, historical, archaeological, palaeontological, ethnographic or numismatic interest (CN code 9705 00 00).

PART C Antiques

Goods, other than works of art or collectors' items, which are more than 100 years old (CN code 9706 00 00).

11.25.3 Public access condition B (public access)

Section 809Z(3) ITA provides:

Condition B is that—

- (a) the property is available for public access at an approved establishment,
- (b) the property is to be available for public access at an approved establishment and, in connection with its being so available, is in transit to, or in storage at, public access rule premises, or
- (c) the property has been available for public access at an approved establishment and, in connection with its having been so available, is in transit from, or in storage at, public access rule premises.

The key terms here are “available for public access” and “approved establishment.” Both are defined.

11.25.4 Available for public access

Section 809Z(4) ITA provides:

Property is “available for public access” at an approved establishment if the property is—

- (a) on public display at the establishment,
- (b) held by the establishment and made available to the public on request for viewing or for educational use, or
- (c) held by the establishment for public exhibition in connection with the sale of the property.

The RDR Manual provides:

34140 - Remittance Basis: Exemptions: Public access rule - Condition B - available for public access - definition [June 2010]

... It is important to note that even though the third bullet [para (c)] allows property brought into the UK for public display in connection with its sale to satisfy the public access rule this does not negate any charge arising if the property is actually sold in the UK (refer to RDRM34080 Property ceasing to be exempt).

11.25.5 Approved establishment

Section 809Z(5) ITA defines approved establishment. There are two types:

An “approved establishment” is—

- (a) an approved museum, gallery or other institution within the meaning of Group 9 of Schedule 2 to the Value Added Tax (Imported Goods) Relief Order 1984, or

If one turns to the VAT (Imported Goods) Relief Order 1984 one might expect to find a definition of “approved museum, gallery or other institution.” There is none, but article 2 does say that “approved” means approved by the secretary of state. In practice approval is granted by the National Import Reliefs Unit and its practice is set out in HMRC Notice 361 (Importing museum and gallery exhibits free of duty and VAT).

Section 809Z(5) ITA continues:

An “approved establishment” is ...

- (b) any other person, premises or institution designated (or of a description designated) by the Commissioners.

The RDR Manual provides:

34130 - Remittance Basis: Exemptions: Public access rule - Condition B - approved establishment - definition [December 2011]

...Any questions about what constitutes an ‘approved establishment’ or requests for approval as an ‘approved establishment’ (ITA07/s809Z(5)(b)) should be made to Specialist Personal Tax, PTI Advisory - Remittance Basis Technical Team.

There is no set form which needs to be completed to request designation as an approved establishment, but all applications should be made in writing and provide sufficient detail about the relevant circumstances relating to making property available for public access, including particulars of the appropriate person, premises or institution wanting to be designated as an approved establishment and full contact details.

11.25.6 *Public access premises*

Lastly, s.809Z(6) ITA defines public access rule premises:

“Public access rule premises” are—

- (a) premises in the UK at which the property is to be, or has been, available for public access, or
- (b) other commercial premises in the UK used by the approved establishment for the storage of property in advance of its being, or after its having been, available for public access at the approved establishment.

11.25.7 *Public access condition C (time limit)*

Section 809Z ITA provides:

(7) Condition C is that, during the relevant period, the property meets condition B for no more than—

- (a) two years, or
 - (b) such longer period as the Commissioners may specify.
- (8) “The relevant period” means the period—
- (a) beginning with the importation of the property, and
 - (b) ending when it ceases to be in the UK after that importation.
- (9) “Importation” means the property being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies.

The definition of “importation” recognises that there may be an importation to the UK to which s.809L(2) does not apply, in which case

time does not begin to run. The RDR Manual provides:

34150 Public access rule - Condition C - two year period [December 2011]

...

The relevant period starts with the importation of the property and ends when the property ceases to be in the UK after that importation.

For these purposes, property is treated as brought into the UK or imported if it is brought to the UK in circumstances such that it would be treated as a remittance to the UK within Condition A of s.809L ITA2007 (refer to RDRM33120 Condition A - property) if it were not for this public access rule (or any other rule exempting it) (s.809Z(9) ITA2007).

The two year period will not necessarily start with the importation of the property as the property may not have been available for public access when it was first imported into the UK. For example it may be brought in under the temporary importation rule prior to public access.

Again the two year period will not necessarily end when the property ceases to be in the UK as the property may cease to be available for public access before the property actually leaves the UK. For example it may instead qualify under the repair rule after a period of public access.

Example 1 (Faizal)³⁴

F is a remittance basis user. He is asked by a London museum, which is an approved establishment, if he will contribute a vase that he owns to an exhibition that the museum intends to stage. The vase is derived from F's relevant foreign income.

F arranges for the vase to be shipped to the UK from Switzerland. In May the vase is received by the museum and is put into storage for one month after which exhibition begins. The exhibition lasts until the following year in October, at the end of which the vase is returned to Switzerland. The vase has been in the UK for 18 months in total. The vase is exempt property so F has not made a chargeable remittance.

Example 2

The circumstances are the same as Example 1 but this time, at the end of the exhibition, the vase is not returned to Switzerland. Instead, F asks for the vase to be sent to a restorer in Newcastle to be cleaned. The restorer keeps the vase in his business premises for a further eight months [!] and then in the following June F arranges for it to be sent back to Switzerland.

³⁴ I omit a few irrelevancies in setting out the text of this example.

The vase has been in the UK for 26 months. The vase, purchased using F's relevant foreign income is exempt property under the public access rule for the 18 months from its arrival in the UK in May to the October in the following year.

Between October and the following June it is within temporary importation rule (as it is with the repairer) and so remains exempt property. As the 2 year time 'repair' limit at Condition C has not been exceeded the vase remains exempt property throughout and F has not made a taxable remittance.

Any requests under the terms of s.809Z(7)(b) ITA 2007 to extend the period during which property may remain in the UK under the terms of the public access rule should be made to CAR: PTI Advisory, Foreign Income and Remittance Basis Team

11.25.8 *Public access condition D (VAT relief)*

Section 809Z(10) ITA provides:

Condition D is that the property attracts a relevant VAT relief (see section 809Z1).

So we turn to s.809Z1(1) ITA:

Property "attracts a relevant VAT relief" if any of conditions 1 to 4 are met.

I refer to **"VAT relief conditions 1 to 4."**

11.25.9 *VAT relief conditions 1 and 2*

Section 809Z1 ITA provides:

(2) Condition 1 is that article 5(1) of the Value Added Tax (Imported Goods) Relief Order 1984 applies in relation to the importation of the property by virtue of Group 9 of Schedule 2 to that Order (importation of works of art or collectors' pieces by museums etc).

(3) Condition 2 is that article 5(1) would so apply if the following requirements were disregarded—

- (a) the requirement that the importation be from a third country,³⁵ and
- (b) the requirement that the purpose of the importation be a purpose other than sale.

So we need to turn to article 5(1) VAT (Imported Goods) Relief Order 1984:

Subject to the provisions of this Order, no tax shall be payable on the importation of goods of a description specified in any item in Schedule 2 to this Order.

Our journey takes us on to group 9 of schedule 2:

Group 9 Works of Art and Collectors' Pieces

Item No.1: Works of art and collectors' pieces imported by approved museums, galleries or other institutions [for a purpose other than sale]³⁶.

Note

Item 1 applies only where the goods are—

- (a) of an educational, scientific or cultural character; and
- (b) imported free of charge or, if for a consideration, are not supplied to the importer in the course or furtherance of any business.

11.25.10 VAT relief conditions 3 and 4

Section 809Z1 ITA provides:

(4) Condition 3 is that article 576(3)(a) of Commission Regulation (EEC) No 2454/93 (relief from import duties for works of art etc imported for the purposes of exhibition, with a view to possible sale) applies in relation to the importation of the property.

(5) Condition 4 is that article 576(3)(a) would so apply if the requirement that the importation be from a third country were

³⁵ RDRM34160 notes that “In this context ‘third country’ means a place outside the Member States of the European Union. The second and fourth conditions are required to ensure that, where the conditions are met, the remittance basis exemption scheme applies to property imported from within the European Union, works of art already in the UK and goods imported for sale which would not otherwise be covered by the existing VAT scheme.”

³⁶ The words in brackets are effectively undone by s.809Z1(3)(b) ITA.

disregarded.

So we need to turn to article 576(3) which provides:

3. Total relief from import duties shall be granted for the following:
 - (a) works of art, collectors' items and antiques as defined in "Annex I" of Directive 77/388/EEC, imported for the purposes of exhibition, with a view to possible sale ...³⁷

This is of (virtually) no interest as it only applies to exhibition with a view to sale; a sale in the UK gives rise to a charge; and one would not normally exhibit a work of art in the UK with a view to its sale elsewhere.

11.25.11 *Date of importation*

Section 809Z1(6) ITA provides:

Where the property does not meet condition B in section 809Z at the time of its importation it is to be assumed for the purposes of this section that the property was imported on the day during the relevant period when the property first meets that condition.

The RDR Manual provides:

RDRM34160 - Remittance Basis: Exemptions: Public access rule - Condition D - relevant VAT relief [June 2010]

...Where Condition B of ITA07/s809Z - the public access condition - is not met when the property is imported into the UK it is to be assumed, in considering whether the property attracts a relevant VAT relief, that the property was imported at the point that the property is made available for public access, thereby deeming the relevant VAT relief provisions to apply.

11.25.12 *Commentary*

Readers (of whom there will not be many) who have studied this section to this point can need no commentary of mine to reach the conclusion that

³⁷ This article was inserted into the 1993 regulation by Commission Regulation (EC) No 993/2001 of 4 May 2001.

this relief should have been much more simply expressed; contrast the IHT works of art exemption - see 58.19 (works of art). I would be grateful to any reader who could explain in particular what is the reason for public access condition D, which seems quite pointless.

11.26 Personal use rule

Section 809X(4) ITA provides:

Clothing, footwear, jewellery and watches are exempt property if they meet the personal use rule (see section 809Z2).

Section 809Z2 ITA provides:

- (1) Clothing, footwear, jewellery or watches meet the personal use rule if they—
 - (a) are property of a relevant person, and
 - (b) are for the personal use of a relevant individual.
- (2) In this section—
 - (b) “relevant individual” means an individual who is a relevant person by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild).

The words “*by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild)*” are otiose because an individual who is a relevant person is necessarily a relevant person by virtue of those provisions; but no harm is done.

11.27 Repair rule

Section 809X(5)(a) ITA provides:

Property is exempt property if— ...

- (a) the property meets the repair rule (see s.809Z3).

Section 809Z3 ITA provides:

- (1) Property meets the repair rule for the whole of the relevant period if,

- during the whole of that period, the property meets the repair conditions.
- (2) Property meets the repair rule for a part of the relevant period if—
- (a) during the whole of that part of that period, the property meets the repair conditions, and
 - (b) during the whole of the other part of that period, or the whole of each other part of that period, the property meets the repair conditions or the public access rule.
- (3) Property meets the repair conditions if the property—
- (a) is under repair or restoration,
 - (b) is in transit from a place outside the UK to repair rule premises, in transit between such premises, or in storage at such premises, in advance of repair or restoration, or
 - (c) is in storage at such premises, in transit between such premises, or in transit from such premises to a place outside the UK, following repair or restoration.
- (4) “Repair rule premises” means—
- (a) premises in the UK that are to be used, or have been used, for the repair or restoration referred to in subsection (3)(b) or (c), or
 - (b) other commercial premises in the UK used by the restorer for the storage of property in advance of, or following, repair or restoration of property by the restorer.
- (5) “Restorer” means the person who is to carry out, or has carried out, the repair or restoration referred to in subsection (3)(b) or (c).
- (6) Property meets the repair conditions, or the public access rule, during the whole of a period, or the whole of part of a period, if the property meets those conditions or that rule—
- (a) on the whole of, or on part of, the first day of that period or part period,
 - (b) on the whole of, or on part of, the last day of that period or part period, and
 - (c) on the whole of each other day of that period or part period.
- (7) “The relevant period” has the same meaning as in section 809Z.

The relief applies only to the property being repaired. There is no relief for the service of repair. A remittance basis taxpayer would be mad to bring an asset to the UK in order to make use of UK repair or restoration services. Even if the importation of the asset did not give rise to a remittance the payment for the repair would give rise to a remittance. All yacht and similar restoration work, for instance, from remittance basis taxpayers is lost to the UK. But there it is.

11.28 Temporary importation rule

Section 809X(5)(b) ITA provides:

Property is exempt property if— ...

- (b) the property meets the temporary importation rule (see s.809Z4)

Section 809Z4 ITA provides:

- (1) Property meets the temporary importation rule if the total number of countable days is 275 or fewer.
- (2) A “countable day” is a day on which, or on part of which, the property is in the UK by virtue of being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies (whether the current case, or a past case, when the property was so brought, received or used).

One needs to keep a lifetime record for every asset.

- (3) A day is not a countable day if, on that day or any part of that day—
 - (a) the property meets the personal use rule,
 - (b) the property meets the repair rule,
 - (c) the notional remitted amount³⁸ in relation to the property is less than £1,000, or
 - (d) all or any part of the income or chargeable gains contained in the property (or from which the property derives) is treated, or continues to be treated, under section 809VA(2), 809Y(8)(b) or 809YC(2) as not remitted to the United Kingdom.

The interaction of the temporary importation rule and the public access rule is more complicated:

- (4) A day on which, or on part of which, the property meets the public access rule (the “relevant day”) is not a countable day if any of conditions A to C is met.
- (5) Condition A is that the property meets the public access rule during the whole of the period of importation in which the relevant day falls.
- (6) Condition B is that—
 - (a) the property does not meet the public access rule during the

38 This term is defined in s.809Z5 ITA: see 11.27 (De minimis rule).

- whole of the period of importation in which the relevant day falls, and
- (b) that period of importation—
 - (i) begins with a period of no public access, and
 - (ii) ends with a period of public access which immediately follows that period of no public access.
- (7) Condition C is that—
 - (a) the property does not meet the public access rule during the whole of the period of importation in which the relevant day falls, and
 - (b) during the parts, or each of the parts of the period of importation during which the property does not meet the public access rule it meets the repair conditions.³⁹

Section 809Z4(9) defines period of importation in terms that echo the language of s.809Z1:

- (9) “Period of importation” means a period that—
 - (a) begins when property is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies, and
 - (b) ends when the property ceases to be in the UK after having been so brought, received or used.
- (10) “Period of no public access” means a period which is not a period of public access and “period of public access” means a period during the whole of which property meets the public access rule.

The RDR Manual provides an example:

34220 Temporary importation rule - countable days [June 2010]

... Example (Jez)

On 15 January 2010 J, a remittance basis user, brings a rare oil painting into the UK to hang on the wall of his castle. J had purchased the painting two months earlier using his foreign employment income.

On 1 July 2010 he allows the painting to be put on public display at the National Gallery, London. The painting remains on display for six months, until 31 December 2010, after which it is immediately shipped to J’s office in Dubai on 1 January 2011.

The conditions for meeting the public access rule for the period 1 July

³⁹ Section 809Z4(8) ITA defines the repair conditions by reference: “Section 809Z3(6) applies for the purposes of this section.”

2010 to 31 December 2010 have been satisfied.

Bringing the painting into the UK would ordinarily be a taxable remittance under section 809L but we need to consider the exemption rules. During the period 15 January to 30 June 2009 the painting was not available for public access. This period is immediately followed by a period of public access from 1 July 31 December 2009.

The 15 January to 30 June 2009 period falls to be considered under the temporary importation rule (167 days).

For the period 1 July 2009 to 31 December 2009 the property is exempt property under the public access rule and therefore this period does not count towards the 275 day limit

11.29 De minimis rule

Section 809X(5)(c) ITA provides:

Property is exempt property if ...

(c) the notional remitted amount (see s.809Z5) is less than £1,000,

Section 809Z5(1) ITA defines “notional remitted amount”:

The “notional remitted amount”, in relation to property, is the amount that would be taken to be remitted to the UK in relation to the property (if section 809X did not apply in relation to the property).

Each item of property qualifies for the £1,000 limit. HMRC agree. The RDR Manual provides:

34180 Exempt Property - Notional remitted amount less than £1,000

[June 2010]

... Example (Jacob)

J, a remittance basis user, uses his foreign income to purchase a mobile phone for £250 a fountain pen for £485, and a new suitcase for £630. He brings all the items back to the UK.

The mobile phone, pen and suitcase all derive from J's foreign income so would be taxable as remittances when brought into the UK under ITA07/s809L. However each item's notional remitted amount (£250, £485 and £630 respectively) is under the £1,000 limit, so section 809Z5 provides that the phone, the pen and the suitcase are regarded as exempt property. J has not therefore made a chargeable remittance.

In J's case the total cost of all the property brought to the UK exceeds

£1,000. However the exemption limit applies to each item of property, [unless it forms part of a set.]

In the 7th edition of this book I noted that s.809Z5(2)(3) continued with an unnecessary rule relating to sets of property. HMRC presumably agreed, since this was repealed with effect from 22 April 2009 (though the Manual has not yet been updated).

11.30 Exempt property clawback charge

11.30.1 Sale in UK

Section 809Y ITA provides:

- (1) Property that ceases to be exempt property is to be treated as having been remitted to the UK at the time it ceases to be exempt property.
- (2) Property ceases to be exempt property in either of the following cases.
- (3) The first case is where the whole or part of the exempt property is sold or otherwise converted into money⁴⁰ whilst it is in the UK.

An exchange for a non-money asset is not a sale.

11.30.2 Relief for sales

Section 809YA - 809YD ITA provide a new relief.

Para 19 Sch 12 FA 2012 provides the commencement date:

The amendment made by this Part of this Schedule has effect in relation to exempt property that is sold on or after 6 April 2012 (including property sold pursuant to a contract entered into before that date so long as the contract only becomes unconditional on or after that date).

Section 809Y(1) ITA provides:

Section 809Y(1) does not apply to property if—

⁴⁰ Section 809Y(5) provides a definition of “money” which is the same as in s.809Z6. (If the definition had been expressed to apply to the whole ITA remittance code the repetition would have been unnecessary.) For this definition see 11.22.2 (“Money”).

- (a) it ceases to be exempt property because the whole of it is sold whilst it is in the United Kingdom, and
- (b) conditions A to F are met.

I refer to sales relief conditions A-F.

11.30.3 *Sales relief conditions A - C: unconditional sale to 3rd party*

Section 809Y ITA provides:

- (2) Condition A is that the sale is to a person other than a relevant person.
- (3) Condition B is that the sale is by way of a bargain made at arm's length.
- (4) Condition C is that, once the sale is completed, no relevant person—
 - (a) has any interest in the property,
 - (b) is able or entitled to benefit from the property by virtue of any interest, right or arrangement, or
 - (c) has any right (whether conditional or unconditional) to acquire any interest mentioned in paragraph (a) or ability or entitlement mentioned in paragraph (b).

11.30.4 *Sales relief condition D: prompt receipt of sale proceeds*

Section 809Y ITA provides:

- (5) Condition D is that the whole of the disposal proceeds are released (whether in one go or in instalments) on or before the final deadline.
- (6) “The final deadline” is the first anniversary of the 5 January following the tax year in which the property ceases to be exempt property (within the meaning of section 809Y).

11.30.5 *Sales relief condition E & F: proceeds taken outside UK or invested*

Section 809Y ITA provides:

- (7) Condition E is that—
 - (a) the whole of the disposal proceeds are taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the proceeds are released, or

- (b) if the disposal proceeds are paid in instalments, each instalment is taken offshore or used by a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which the instalment is released.
- (8) But if any of the disposal proceeds are released in the period of 45 days ending with the final deadline, Condition E is satisfied, as respects those proceeds, only if they are taken offshore or used by a relevant person to make a qualifying investment on or before the final deadline.
- (9) Condition F is that, if Condition E is satisfied wholly or in part by using disposal proceeds to make a qualifying investment, the remittance basis user makes a claim for relief under section 809YC(2) on or before the first anniversary of the 31 January following the tax year in which the property is sold.

Section 809YB ITA provides power to extend the time limit for investment:

- (1) An officer of Revenue and Customs may agree in a particular case to extend any period within which disposal proceeds (or instalments) must be taken offshore or used by a relevant person to make a qualifying investment in order to satisfy Condition E.
- (2) The power to agree to an extension is exercisable only in exceptional circumstances and only if the remittance basis user requests such an extension.

11.30.6 “Released”

Section 809Y ITA provides:

- (10) For the purposes of this section, proceeds or instalments are “released” on the day on which they first become available for use by or for the benefit of any relevant person.

11.30.7 *Anti-avoidance*

Section 809Y ITA provides:

- (11) This section does not apply if the sale is made as part of or as a result of a scheme or arrangement the main purpose or one of the main purposes of which is the avoidance of tax.

11.30.8 *The relief*

Section 809YC ITA provides:

- (1) This section has effect if section 809Y(1) does not apply to property by virtue of section 809YA.
- (2) The income and gains treated under section 809X as not remitted to the United Kingdom continue to be treated after the sale as not remitted to the United Kingdom even though the property has ceased to be exempt property.
- (3) But nothing in subsection (2) prevents anything done in relation to any part of the disposal proceeds after that part is taken offshore (or used to make a qualifying investment) from counting as a remittance of the underlying income or gains to the United Kingdom at the time when the thing is done.
- (4) Treat the disposal proceeds as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the amount of that kind of income or gain contained in the exempt property when it was brought to, or received or used in, the United Kingdom (as mentioned in section 809X).
- (5) Where Condition E was met by using the disposal proceeds to make a qualifying investment—
 - (a) the business investment provisions apply to the income and gains that continue, by virtue of subsection (2), to be treated as not remitted as they apply to income or gains that are treated under section 809VA(2) as not remitted, and
 - (b) if the investment was made using more than just the disposal proceeds, treat only the part of the investment made using the disposal proceeds as “the investment” for the purposes of those provisions.

Section 809YD ITA provides:

- (1) This section applies to an individual (“P”) if—
 - (a) a chargeable gain (but not a loss) accrues to a person on a sale of exempt property,
 - (b) but for section 809YA, section 809Y(1) would have applied to the property by virtue of the sale, and
 - (c) P is either—
 - (i) the person to whom the gain accrues, or
 - (ii) a person to whom a part of the gain is treated as accruing

under section 13 of TCGA 1992 (members of non-resident companies).

(2) The relevant UK gain is to be treated for the purposes of this Chapter as if—

- (a) it were a foreign chargeable gain of P, and
- (b) in the case of section 809E, it were not part of P's UK income and gains.

(3) Accordingly, if section 809F applies to P for the applicable tax year and P is not domiciled in the United Kingdom in that year, the relevant UK gain is charged in accordance with section 12 of TCGA 1992 as if it were a foreign chargeable gain.

(4) The relevant UK gain is—

- (a) in a case falling within subsection (1)(c)(i), the gain accruing to P,
- (b) in a case falling within subsection (1)(c)(ii), the part of the gain treated as accruing to P.

(5) The applicable tax year is —

- (a) if section 10A of TCGA 1992 (temporary non-residents) applies in P's case and the relevant UK gain is within subsection (2) of that section, the year of return as defined in that section,
- (b) otherwise, the tax year in which the relevant UK gain accrues.

(6) In applying this Chapter to the relevant UK gain—

- (a) treat the amount of any gains mentioned in section 809Q(4)(e) contained in the disposal proceeds by virtue of section 809YC(4) as increased by the amount of the relevant UK gain,
- (b) disregard section 809U, and
- (c) anything done in relation to any part of the disposal proceeds before the part is taken offshore or used to make a qualifying investment (or both) does not count as a remittance to the United Kingdom of any of the relevant UK gain.

(7) The relevant UK gain is to be treated for the purposes of the following provisions of TCGA 1992 as if it fell within the definition of foreign chargeable gains in section 12(4) of that Act—

- (a) section 10A,
- (b) section 12,
- (c) section 14A, and
- (d) sections 16ZB to 16ZD.

(8) This section has effect despite section 14A(2) of TCGA 1992.

(9) This section does not apply with respect to a chargeable gain if P gives notice to Her Majesty's Revenue and Customs under this subsection.

(10) A notice under subsection (9)—

- (a) must be in writing and must identify the gain in question,
- (b) must be given on or before the first anniversary of the 31 January following the applicable tax year, and
- (c) may not be revoked after that first anniversary.

This presumably reflects some effective lobbying by the auctioneer industry. Of course it is far too complicated.

11.30.9 *Exemption requirements cease to apply*

Section 809Y ITA provides:

- (1) Property that ceases to be exempt property is to be treated as having been remitted to the UK at the time it ceases to be exempt property.
- (2) Property ceases to be exempt property in either of the following cases....
- (4) The second case is where the property—
 - (a) is exempt property only because it meets one or more of the relevant rules,⁴¹
 - (b) ceases to meet that rule, or all of those rules, whilst it is in the UK, and
 - (c) does not meet any other relevant rule.

11.30.10 *Exempt property used to make investment*

Section 809Y ITA provides:

- (6) Subsection (1) does not apply to property that ceases to be exempt property if—
 - (a) the property, or anything into which it is converted,⁴² is used by

41 Section 809Y(5) ITA provides:

“relevant rule” means—

- (a) the public access rule,
- (b) the personal use rule,
- (c) the repair rule, and
- (d) the temporary importation rule.

42 This is given a commonsense definition in s.809Y(7): “The reference in subsection (6)(a) to anything into which property is converted is—

- (a) if the property is disposed of, the disposal proceeds, and
- (b) if the property is converted into money in some other way, the money into

- a relevant person to make a qualifying investment within the period of 45 days beginning with the day on which it ceased to be exempt property, and
- (b) the remittance basis user⁴³ makes a claim for relief under this subsection on or before the first anniversary of the 31 January following the tax year in which the property ceases to be exempt property.

Section 809Y(8) ITA incorporates the investment remittance relief rules:

- (8) If subsection (1) does not apply by virtue of subsection (6)—
- (a) the property (or thing into which it was converted) used to make the investment is to be treated as containing or deriving from an amount of each kind of income and gain mentioned in section 809Q(4)(a) to (h) equal to the fixed amount,
- (b) the income or gains treated under section 809X as not remitted to the United Kingdom continue to be treated as not remitted to the United Kingdom even though the property has ceased to be exempt property, and
- (c) the business investment provisions⁴⁴ apply to the income and gains as they apply to income or gains treated under section 809VA(2) as not remitted to the United Kingdom.
- (9) “The fixed amount” is the amount of that kind of income or gain contained in the property when it was brought to, or received or used in, the United Kingdom (as mentioned in section 809X).

Section 809Y(10) ITA provides an apportionment rule:

If the investment is made using more than just the property (or thing into which it was converted), treat only the part made using the property (or thing into which it was converted) as “the investment” for the purposes of the business investment provisions.

which it is converted, (including where the disposal or conversion occurs after the property ceases to be exempt property).”

43 Defined s.809Z10: “In this Chapter “the remittance basis user”, in relation to income or chargeable gains of an individual, means that individual.”

44 Defined s.809Z(10) ITA: “In this Chapter “the business investment provisions” means sections 809VA to 809VO”.

CHAPTER TWELVE

MIXED FUNDS

12.1 Mixed funds – Introduction

It is helpful first to outline the problems which the mixed fund rules are intended to address. Suppose a person holds a fund which includes different types of income/gains, or income/gains of different years:

- (1) If the person remits part of the fund to the UK, it is necessary to know:
 - (a) which type of income or gains have been remitted (as different rates may apply)
 - (b) which year's income or gains have been remitted (as different rates and different rules may apply to income of different years).
- (2) If the person transfers some assets out of the fund, without remitting the assets to the UK, there is no immediate tax charge. However it is necessary to know which income/gains are regarded as in the remaining fund, and which in the transferred assets, when there are later remittances of either the remaining funds or the transferred assets.

The mixed fund rules are intended to answer these questions.

I coin the following terminology:

“The ITA mixed fund rules” means the set of rules set out in s.809Q to 809S ITA.

“The pre-2008 mixed fund rules” means the case law rules applicable before 2008/09.

12.1.1 *Cross references*

For planning round the mixed fund rules, see 10.34 (Basic remittance basis planning).

12.2 Definition of “mixed fund”

Section 809Q(6) ITA provides:

In this section “mixed fund” means money or other property which, immediately before the transfer, contains or derives from—

- (a) more than one of the kinds of income and capital mentioned in subsection (4), or
- (b) income or capital for more than one tax year.

This is only a section-wide definition so the drafter has to repeat it in s.809R(7) ITA:

In this section ‘mixed fund’ means money or other property containing or deriving from—

- (a) more than one of the kinds of income and capital mentioned in section 809Q(4), or
- (b) income or capital for more than one tax year.

This is not quite a verbatim repetition, but the omission of the words “immediately before the transfer” does not seem material.

One must first identify what is the fund, and then identify the constituents which it contains (or derives from).

12.2.1 *Identifying the fund*

The typical mixed fund is a bank account with diverse entries.

Funds are distinct, ie, not mixed, if they are held in separate accounts or sub-accounts at one bank. HMRC agree. The RDR Manual provides:

35230 Remittances from mixed funds [May 2012]

No Mixed Fund

Also, a mixed fund does not exist just because the individual has several accounts with the same banking institution, if each account is separately constituted and contains only one of the relevant types of income *from only one year*. This will usually include bank accounts set up as sub-accounts under an “umbrella” agreement.

If income and capital sources from a tax year are maintained separately (sometimes referred to as “kept clean” or “clean capital”) no mixed fund

is created, and so these rules will not apply.¹

This is consistent with the banking law background:

A person's claim to money in his or her account is identifiable by an account name and/or number, and subject to the bank's right to combine accounts,² is distinct from any other claim he or she may have against the same bank.³

Accordingly one can in principle avoid mixing income with other funds by arranging that the income is paid to a separate bank account. If one does that it will be possible to remit capital and to keep income unremitted.

The RDR Manual provides:

33560. Banking Issues [December 2011]

Interest credits to a capital account

Often interest on a maturing deposit is credited to the same account comprising the principal capital investment, but under the bank's normal internal system the interest is then immediately and identifiably transferred to an income account.

Where a mixed fund such as this is created fleetingly by an operation of the banking system, HMRC will accept that the interest credit will not taint the principal and so the mixed fund rules in s809Q to s809S do not apply.

At first sight this practice may seem concessionary. However, it is a sensible commercial construction of the statute to say that a sum only "fleetingly" in an account should not to be said to become "mixed".

-
- 1 The Manual then gives a straightforward example: "For example, an individual maintains three separate accounts with the same offshore institution:
Account A into which he pays his relevant foreign earnings for the tax year
Account B into which he pays some inherited money (clean capital)
Account C into which he pays some relevant foreign income for the tax year
As long as these accounts do not become mixed funds, the individual can bring money into the UK from Account B and that will be accepted as a being a transfer of "clean" capital, and so will not be a taxable remittance."
 - 2 [Footnote original] See generally J Wadsley and GA Penn, *Penn and Shea's Law Relating to Domestic Banking* (2nd ed, 2000) para 11-083 *et seq*.
 - 3 Fox, *Property Rights in Money* (2008) para 1.108.

The position is different for capital gains. A capital gain has no separate identifiable existence so the proceeds of a disposal giving rise to a gain are always a mixed fund.⁴ For accrued income profits see 35.9 (AIP remittance basis).

A mixed fund need not necessarily be a bank account. If money representing a mixed fund is invested in an asset, the asset is the mixed fund. For instance, if a person uses foreign income and capital to purchase a foreign property, or shareholding, the foreign property or shareholding is a mixed fund.

A portfolio of securities may constitute a single fund if it is managed by one investment manager and held under one account name and number. In some cases it may be unclear whether a number of securities should be classified as distinct assets or together constitute a single fund; any reasonable analysis consistently adopted ought to be acceptable.

12.3 Ingredients of a mixed fund

We turn to s.809Q(4) ITA to see what kinds of income and capital may make up a mixed fund:

The kinds of income and capital are—

- (a) employment income (other than income within para (b), (c) or (f)),
- (b) relevant foreign earnings (other than income within para (f)),
- (c) foreign specific employment income (other than income within para (f)),
- (d) relevant foreign income (other than income within para (g)),
- (e) foreign chargeable gains (other than chargeable gains within para (h)),⁵
- (f) employment income subject to a foreign tax,
- (g) relevant foreign income subject to a foreign tax,
- (h) foreign chargeable gains subject to a foreign tax, and
- (i) income or capital not within another paragraph of this subsection.

⁴ See 10.13.2 (What is the gain?).

⁵ This applies even in the case of an individual who is resident, not ordinarily resident and UK domiciled, who qualifies for the remittance basis for income but not for gains.

I refer to these nine categories as “**the mixed fund categories**”. The order in which these categories is placed is important: I call this “**the mixed fund priority order**”.

An individual needs to classify every mixed fund into these nine categories for 2008/09 and for every subsequent year. This requires vastly more record keeping than the pre-2008 mixed fund rules.

Income which accrues to a non-resident individual is not RFI⁶ (even foreign interest, dividends, etc which would be RFI if received by a UK resident). Similarly, earnings received by a non-resident are not employment income.⁷ Such income falls into the bottom category (i). But all income of the year of arrival and departure constitutes RFI or employment income, even if ESC A11 applies.

Chargeable gains from non-UK assets which accrue to a non-resident individual *are* foreign chargeable gains.⁸ Such gains will fall within category (e) or (h) depending on whether they are subject to a foreign tax.

What if a UK resident individual receives foreign income or gains which are taxable in the year of receipt, either because they are remitted to the UK or because no remittance basis claim is made in that year? The sums do not cease to be foreign income or gains, so they remain in their relevant categories (a) to (h).

12.3.1 “Foreign tax”

I refer to income/gains which are subject to a foreign tax as “**foreign-taxed**”. This affects the mixed fund categories in the following way:

	Not foreign-taxed	Foreign-taxed
RFE	para (b)	para (f)
FSEI	para (c)	para (f)
RFI	para (d)	para (g)
Gains	para (e)	para (h)

The object is to increase UK tax by deferring the remittance of foreign-taxed items, so deferring foreign tax credits. This (surely unfair) policy

6 Because it does not meet the condition in s.830(1)(b) ITTOIA; see 9.3.1 (Relevant foreign income).
7 Unless within s.27 ITEPA (duties performed in UK or overseas Crown employment).
8 See 46.1 (Territorial scope of CGT) and 9.3.4 (Foreign chargeable gains).

comes at a considerable cost in complexity, since it roughly doubles the number of mixed fund categories and the record keeping.

Section 809Q(5) ITA defines “foreign tax”:

In subsection (4) “foreign tax” means any tax chargeable under the law of a territory outside the UK.

At first I thought that tax deducted under the EU Saving Directive is not “foreign tax”. The EU is not a territory outside the UK. But if tax is deducted in, say, Luxembourg, perhaps the better view is that the tax is chargeable under the law of *Luxembourg* so the tax is a foreign tax. The position may depend on whether or not the EU directive has direct effect in the MS concerned.

12.3.2 “*Subject to a foreign tax*”

The RDR Manual provides:

35240 Remittances from mixed funds - Identifying nature of remittance [June 2010]

...

Occasionally UK resident remittance basis users’ UK employment income may be “subject to foreign tax”, that is to say another country (usually their country of nationality or citizenship) will also tax them on this income. In these cases HMRC will accept that the individual’s UK source employment income may still be regarded as within para (a) in the mixed fund, unless the individual requests otherwise, in which case it will remain to fall within para (f) as employment income subject to a foreign tax.

This is obviously an extra-statutory concession.

This is only relevant where the other country has in fact subjected the UK employment income under consideration to their tax. In some cases no tax will, in fact, have been due in or paid to the other country due to various exemptions and provisions, (for example the US has a “foreign earned income exclusion” provision to employment income below a certain level), so the UK employment income will be within para (a) anyway.

This is not correct as it is not consistent with the approach applied elsewhere in deciding what is “subject to tax”: see 55.16 (“Subject to tax”). But it will normally suit taxpayers to treat UK earnings as category (a) so it will not be contested.

Section 809Q(8) ITA provides:

References in this section and section 809R to anything deriving from income or capital within para (i) of subsection (4) do not include—

- (a) income or gains within any of paras (a) to (h) of that subsection, or
- (b) anything deriving from such income or gains.

12.3.3 *Finding the income and capital for the year*

Step 1 in s.809Q(3) ITA provides:

For each of the categories of income and capital in paragraphs (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.

Income for a tax year is not difficult to identify, for the tax system often requires one to attribute income to a tax year. Chargeable gains for a tax year are not difficult to identify, for gains accrue on a particular date (and in particular cases there are rules to identify the date.).

What about “other capital” falling within category (i)? That would include:

- (1) gifts, inheritance;
- (2) borrowed money;
- (3) gains on disposals of UK situate assets;
- (4) chargeable event gains on a surrender of a life policy.

It is considered chargeable event gains are capital for the year in which they are received. Suppose:

- (1) Year 1: T uses RFI to purchase a foreign policy for £1m.
- (2) Year 5: T surrenders the policy for £2m and realises a chargeable event gain of £1m (taxable on the arising basis⁹). T remits £1m.

⁹ See 30.4.4 (Remittance basis taxpayer).

The £1m remitted is category (i) (other income or capital) of year 5, so there is no further charge on the remittance.¹⁰

12.3.4 *Derived property*

Section 809R ITA provides:

809R Section 809Q: composition of mixed fund

- (1) This section applies for the purposes of step 1 of section 809Q(3) (composition of mixed fund).
- (2) Treat property which derives wholly or in part (and directly or indirectly) from an individual's income or capital for a tax year as consisting of or containing that income or capital.

At first I thought that was self-evident but in fact it is useful. For instance, suppose:

- (1) Year 1: T receives £1m capital and uses it to purchase shares.
- (2) Year 2: T sells the shares for £2m.

The proceeds of sale are a mixed fund consisting of:

- (1) Gains of year 2; and
- (2) Capital of year 1 (not year 2) because that derives from the capital of year 1.

HMRC agree: see the example of Jason in 12.4.8 (Single transfer: mixed fund RFI of earlier years and gain of later year).

12.3.5 *Income/gains used to repay debt*

Section 809R(3) ITA provides:

If a debt relating (wholly or in part, and directly or indirectly) to property is at any time satisfied (wholly or in part) by—

- (a) an individual's income or capital for a tax year, or
- (b) anything deriving (directly or indirectly) from such income or capital,

from that time treat the property as consisting of or containing the income or capital if and to the extent that it is just and reasonable to do so.

¹⁰ The £1m is not regarded as derived from the RFI: see 10.14.11 (Income from income/gains).

Suppose:

- (1) T borrows from L and receives “the borrowed money”.
- (2) T uses RFI to repay the debt to L.

In the absence of a statutory deeming provision, one would not say that the borrowed money was derived from the RFI, or that the borrowed money consists of or contains the RFI.¹¹ However the borrowed money is treated as containing or consisting of the RFI so far as is just and reasonable. When is that just and reasonable? The drafter has given up here. Perhaps only so far as it practical to make that tracing exercise or in cases of avoidance.

This only applies for the purposes of the mixed fund rule.

12.4 Onshore transfer mixed fund rule

12.4.1 Scope of onshore transfer rule

Section 809Q ITA provides:

- (1) This section applies for the purposes mentioned in subsection (2) ...
- (2) The purposes referred to in subsection (1) are—
 - (a) determining whether condition B in section 809L is met, and
 - (b) if it is met, determining (under section 809P) the amount of income or chargeable gains remitted.

Accordingly, the onshore transfer mixed fund rule does not apply for the purposes of remittance basis conditions C or D. This was presumably because those conditions do not always require the use of foreign income/gains or property derived from it. Fortunately conditions C and D will not often apply. So in practice the mixed fund rule applies for most remittance purposes. When conditions C and D are in point, one applies the pre-2008 mixed fund rules.

12.4.2 Onshore transfer

Section 809Q(1) ITA provides:

¹¹ See 10.14.10 (Income/gains used to pay debt).

This section applies ... where condition A in section 809L is met¹² and—

- (a) the property or consideration for the service is (wholly or in part), or derives (wholly or in part, and directly or indirectly) from, a transfer from a mixed fund, ...

The drafter has confused a transfer and the property transferred by a transfer, but the meaning is clear enough. Expanding this, and focussing on property rather than services (which are rarer) it should be read to mean:

This section applies ... where condition A in section 809L is met and—

- (a) [i] the property ... is (wholly or in part) ... [property transferred by] a transfer from a mixed fund, or
[ii] the property ... derives (wholly or in part, and directly or indirectly) from [property transferred by] a transfer from a mixed fund...

The next part of s.809Q(1) deals with debt remittances:

This section applies ... where condition A in section 809L is met and—

- (b) a transfer from a mixed fund, or anything deriving (wholly or in part, and directly or indirectly) from such a transfer, is used as mentioned in section 809L(3)(c).

I refer to a transfer to which s.809Q applies as an **“onshore transfer”**. That term is not always apt¹³ but it will do as a short label. The RDR manual occasionally uses the expression “remittance transfer”.

In short, there is an onshore transfer in six cases:

- (1) A relevant person receives UK property which:
 - (a) is from a mixed fund or
 - (b) is derived from a mixed fund
- (2) A relevant person receives a UK service, consideration for which:
 - (a) is from a mixed fund or
 - (b) is derived from a mixed fund
- (3) A relevant debt:

12 That is, in short, property is received/used in the UK by a relevant person; see 10.11 (Remittance condition A (link to UK)).

13 For instance, the transfer of funds received in the UK by a non-relevant person counts as an offshore transfer and not as an onshore transfer.

- (a) is satisfied out of a mixed fund or
- (b) is satisfied out of a fund derived from a mixed fund.

12.4.3 “Transfer”

Transfer is not defined but the context shows that it means any payment or transfer out of the mixed fund, whether or not for consideration.

If (the usual case) the mixed fund is a bank account, it means any withdrawal from the account.

If the mixed fund is a managed account of securities, it would not include sales or purchases within the account, but any transfer out of the account.

Section 809Q(7) ITA defines the amount of a transfer:

References in this section to the amount of the transfer include the market value of it.

Strictly one must value the asset transferred, not the transfer, but the meaning is clear.

12.4.4 *Onshore transfer mixed fund rule*

We can turn at last to the rule itself. Section 809Q(3) ITA provides:

The extent to which the transfer is of the individual’s income or chargeable gains is to be determined as follows.

Section 809Q(3) ITA then sets out five steps. It is easier to follow the steps if one has an example in mind. Suppose T (a remittance basis taxpayer) receives £100 per annum of each of the mixed fund categories and pays them into one mixed fund:

Category	Type of income	Year 1	Year 2
Para (a)	UK earnings	£100	£100
Para (b)	relevant foreign earnings	£100	£100
Para (c)	FSEI	£100	£100
Para (d)	relevant foreign income	£100	£100
Para (e)	foreign chargeable gains	£100	£100
Para (f)	foreign-taxed earnings	£100	£100
Para (g)	foreign-taxed RFI	£100	£100
Para (h)	foreign-taxed gains	£100	£100
Para (i)	other income and capital	£100	£100

There is therefore a mixed fund of £1800. Suppose T remits nothing in year 1 and £1,000 to the UK in year 2. This is an onshore transfer. One follows the steps thus:

Step 1

For each of the categories of income and capital in paras (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.

“The relevant tax year” is the tax year in which the transfer occurs.

In the example, the relevant tax year is year 2. I consider this further below but for present purposes assume that “the amount of income or capital of the individual in the mixed fund immediately before the transfer” is as set out in the table above.

Step 2

Find the earliest paragraph for which the amount determined under step 1 is not nil.

The earliest paragraph is para (a) and the amount determined under step 1 is £100.

If that amount does not exceed the amount of the transfer, treat the transfer as containing the income or capital within that paragraph (and for that tax year).

T’s transfer is treated as containing £100 employment income category (a) for year 2.

Otherwise, treat the transfer as containing the relevant proportion of each kind of income or capital within that paragraph (and for that tax year).

“The relevant proportion” is the amount of the transfer divided by the amount determined under step 1 for that paragraph.

(Had the transfer been (say) £50 then the relevant proportion would have been $£50 \div £100 = 50\%$ so the transfer would have been treated as containing £50 employment income category (a) for year 2.)

Step 3

Treat the amount of the transfer as reduced by the amount taken into account under step 2.

The amount of the transfer is reduced to £900.

Step 4

If the amount of the transfer (as reduced under step 3) is not nil, start again at step 2.

In step 2, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step in relation to the transfer.

Following this iterative process a total of nine times, the transfer is treated as containing:

(a)	employment income	£100
(b)	relevant foreign earnings	£100
(c)	foreign specific employment income	£100
(d)	relevant foreign income	£100
(e)	foreign chargeable gains	£100
(f)	foreign-taxed employment income	£100
(g)	foreign-taxed RFI	£100
(h)	foreign-taxed gains	£100
(i)	other income and capital	<u>£100</u>
Total		<u>£900</u>

The amount of the original £1,000 transfer is by this stage treated as reduced to £100. We move to the next step:

Step 5

If the amount of the transfer (as reduced under step 3) is not nil once steps 2 and 3 have been undertaken in relation to all paragraphs of subsection (4) for which the amount determined under step 1 is not nil, start again at step 1.

In step 1, read the reference to the relevant tax year as a reference to the tax year immediately before the last tax year for which step 1 has been undertaken in relation to the transfer.

Thus we repeat step 2 a last and tenth time, reading “the relevant tax year” to mean year 1. So the transfer of £1,000 from the mixed fund is treated as being:

Category	Type of income	Year	Amount
Para (a)	UK earnings	2	£100
Para (b)	relevant foreign earnings	2	£100
Para (c)	FSEI	2	£100
Para (d)	relevant foreign income	2	£100
Para (e)	foreign chargeable gains	2	£100
Para (f)	foreign-taxed earnings	2	£100
Para (g)	foreign-taxed RFI	2	£100
Para (h)	foreign-taxed gains	2	£100
Para (i)	other income and capital	1	£100

In order to reach this answer for one single transfer we have had to carry out 37 steps.¹⁴ Yet it will be common for there to be hundreds or thousands of transfers from any mixed fund.

12.4.5 *Commentary: drafting style*

The effect of the onshore transfer mixed fund rule is that transfers from a mixed fund are treated as being made in the mixed fund priority order, taking more recent years before earlier years. Why didn’t the statute simply say so? For a discussion of the drafting style, see 48.10.7 (Commentary: step-based drafting). But the fundamental problem is not the drafting, but conception of the mixed fund rule.

12.4.6 **HMRC examples: onshore transfers**

The RDR Manual provides examples. I set them out more or less verbatim, but rearrange and omit some irrelevant detail for clarity.

12.4.7 *One transfer from mixed fund: RFE, RFI and UK EI of one year*

The first example involves a single onshore transfer out of a mixed fund containing RFE, RFI and UK employment income of one year.

¹⁴ Steps 1–4 were each carried out 9 times and step 5 once.

RDRM 35280 Example 1 (Amelia) [June 2010]

A, a remittance basis user, has an offshore account with mixed funds as follows:

- foreign earnings from two employers totalling £40,000 per month, half of which is subject to foreign tax [mixed fund categories (b) and (f)]
- relevant foreign income of £10,000 per quarter, which is not subject to foreign tax [mixed fund category (d)].
- some of her UK employment income (£50,000 per month) which has already been subject to tax in the UK is paid into the same offshore bank account [mixed fund category (a)]

On 15 October 2010 A purchases an aircraft for £460,000, which she brings to the UK.

Since the account was opened in the tax year, we have an account with 20 credits and one debit (an onshore transfer) thus:

2009-10		Credit (Debit)	Balance	Category
30 Apr	UK salary	£50,000	£50,000	(a)
30 Apr	Overseas salary NFT ¹⁵	£20,000	£70,000	(b)
30 Apr	Overseas salary FT ¹⁶	£20,000	£90,000	(f)
31 May	UK salary	£50,000	£140,000	(a)
31 May	Overseas salary NFT	£20,000	£160,000	(b)
31 May	Overseas salary FT	£20,000	£180,000	(f)
2 Jun	RFI	£10,000	£190,000	(d)
30 Jun	UK salary	£50,000	£240,000	(a)
30 Jun	Overseas salary NFT	£20,000	£260,000	(b)
30 Jun	Overseas salary FT	£20,000	£280,000	(f)
31 Jul	UK salary	£50,000	£330,000	(a)
31 Jul	Overseas salary NFT	£20,000	£350,000	(b)
31 Jul	Overseas salary FT	£20,000	£370,000	(f)
31 Aug	UK salary	£50,000	£420,000	(a)
31 Aug	Overseas salary NFT	£20,000	£440,000	(b)
31 Aug	Overseas salary FT	£20,000	£460,000	(f)
2 Sept	RFI	£10,000	£470,000	(d)
30 Sept	UK salary	£50,000	£520,000	(a)
30 Sept	Overseas salary FT	£20,000	£540,000	(f)
30 Sept	Overseas salary NFT	£20,000	£560,000	(b)
15 Oct	Aircraft purchase	(£460,000)	£100,000	

Step 1 Identify the “amount of transfer” in the relevant year (2010-11) £460,000

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

15 Not foreign-taxed.
16 Foreign-taxed.

Para (a) UK employment income	£300,000
Para (b) Relevant foreign earnings (not subject to a foreign tax)	£120,000
Para (d) RFI (not subject to a foreign tax)	£20,000
Para (f) Employment income subject to a foreign tax	£120,000
Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund: Para (a)	£300,000
Step 3 Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2.	£460,000 - 300,000 <u>£160,000</u>
Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.	
Step 2 repeated: Para (b)	£120,000
Step 3 repeated Amount transferred further reduced to:	£40,000
Step 4 In the order of preference listed above repeat Steps 2 and 3.	
Step 2 repeated: Para (d)	£20,000
Step 3 repeated Amount transferred further reduced to:	£20,000
Step 4 In the order of preference listed above repeat Steps 2 & 3.	
Step 2 Para (f)	£120,000
Step 3 If the amount at Step 2 is equal to or more than the remaining amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain	£nil

There has been a transfer to the UK of £460,000. Of this, £300,000 is from UK employment income which has already been taxed, so will not be taxed again. There have also been taxable remittances of A's relevant foreign earnings (£140,000 (£20,000 of which was subject to a foreign tax) and relevant foreign income (£20,000)). £100,000 of taxed foreign employment income (para f) remains in the offshore account fund.

Moral: A should have kept her taxed foreign earnings separate so that they could be remitted. The tax on that remittance would be less because the foreign tax credit would be available. If A had kept all the sources of income separately, she would also have been saved the significant administrative costs of the computation.

12.4.8 *Single transfer: mixed fund RFI of earlier years and gain of later year*

The next example is a single onshore transfer from a mixed fund with RFI of earlier years and a chargeable gain of a later year.

RDRM 35290 Example 2 (Jason) [June 2010]

In Year 1 J purchases shares in a foreign company for £8m. The £8m represents J's 'clean' capital, being perhaps an inheritance or similar such windfall.

In Year 3 J later sells the shares for £10m, which produces a £2m chargeable gain. The sale proceeds are credited in Year 3 to his overseas bank account that contains some relevant foreign income from the last two tax years, but no other monies.

There is now a mixed fund, containing:

- £8m capital from Year 1,
- £2m a foreign chargeable gain from Year 3
- relevant foreign income from Years 2 and 3.

Later in Year 3 J, a remittance basis user, brings £5m to the UK from that account. The ordering rules in ITA07/s809Q mean that all of the relevant foreign income and the £2m gain from Year 3 is treated as remitted before any of the capital can be considered as remitted.

If the mixed fund also included other amounts of income or capital gains for that tax year (Year 2 or 3), those amounts must also be taken into account before any of the 'capital' element of the proceeds, (that is the £8m that is not a gain) realised by the sale of shares can be considered.

The moral is that Jason should have kept the proceeds of the share sale in a separate account. Then the £5m remittance would have been £2m gain and £2m capital.

Even better, he should have disposed of the shares by two separate disposals of £5m each, and remitted the proceeds of the first disposal. Then remittance would have been £1m gain and £4m capital.

12.4.9 *Example: transfers from mixed fund accruing over 2 years*

The next example involves a single onshore transfer out of a mixed fund of RFE, RFI and UK earnings and chargeable gains, accruing over a two year period.

RDRM 35300, 35310 Example 3 (Jeff) [June 2010]

J has:

- UK salary of £10,000 a month paid into an overseas bank account [mixed fund category (a)]
- a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the same bank account. Both salaries are paid on the last day of each month [mixed fund category (f)]
- Dividends from a shareholding in a foreign company are also paid into the account [assumed subject to a foreign tax - mixed fund category (g)]

In Year 0, J had purchased shares in a foreign company for £8m. The £8m is accepted as representing J's "clean" capital, an inheritance. J sells the shares in Year 2 for £10m, which produces a £2m chargeable gain [mixed fund category (e) and (i)].

J’s remittances to the UK from this fund in that year are £10m.
His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are credited gross.

	Credit (Debit)	Balance	Category
Year 1		£nil	
31 Mar UK salary (net of tax)	£10,000	£10,000	(a)
31 Mar Overseas salary FT	£5,000	£15,000	(f)
Year 2			
30 Apr UK salary	£10,000	£25,000	(a)
30 Apr Overseas salary	£5,000	£30,000	(f)
15 May Dividend	£2,000	£32,000	(g)
15 May UK salary	£10,000	£42,000	(a)
31 May Overseas salary	£5,000	£47,000	(f)
18 Jun Sale of shares (£8m capital and £2m gain)	£2,000,000		(e)
(no foreign tax)	£8,000,000	£10,047,000	(i)
30 Jun UK salary	£10,000	£10,057,000	(a)
30 Jun Overseas salary	£5,000	£10,062,000	(f)
25 Jul Dividend	£2,000	£10,064,000	(g)
31 Jul UK salary	£10,000	£10,074,000	(a)
31 Jul Overseas salary	£5,000	£10,079,000	(f)
31 Jul Bank interest	£5,000	£10,084,000	(d)
14 Aug Transfer to UK account	(£10,000,000)	£84,000	
31 Aug UK salary	£10,000	£94,000	(a)
31 Aug Overseas salary	£5,000	£99,000	(f)

Applying the ordering rules in S809Q to the account immediately before the transfer:

Step 1 Identify the “amount of transfer” in the relevant tax year
(Year 2) £10,000,000

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a) Employment income (including UK employment income) not subject to a foreign tax	Year 1 – £10,000
Para (d) Relevant foreign income (not subject to a foreign tax)	Year 2 – £40,000
Para (e) Foreign chargeable gains (not subject to a foreign tax)	Bank interest
	Year 2 - £5,000
Para (f) Employment income subject to a foreign tax	Year 2 - £2,000,000
Para (g) Relevant foreign income subject to a foreign tax	Year 1 - £5,000
	Year 2 - £20,000
	Foreign dividends
	Year 2 - £4,000

Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund:

Para (a)	£40,000
-----------------	---------

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £10m less £40k = £9,950,000

Step 4 Find the next paragraph/amount for that tax year.

In the order of preference listed above repeat Steps 2 and 3.

Step 2	Para (d)	£5,000
Step 3		£9,955,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2	Para (e)	£2m
Step 3		£7,955,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2	Para (f)	£20,000
Step 3		£7,935,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2	Para (g)	£4,000
Step 3		£7,931,000

Step 4 In the order of preference listed above repeat Steps 2 and 3

Step 2 If the amount is more than the [residual] “relevant amount”, treat the whole of the remittance as coming from that item of income or gain. **Para (i)** £8m

The result of this exercise is that

- All of J’s UK salary in tax year 2 is deemed to have been brought to the UK first.
- Similarly all of his foreign income and gains of tax year 2 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax – allowing credit for foreign taxes charged on that same income as appropriate.
- £7,931,000 capital has also been brought to the UK.

Until such time as further amounts of income and gains are credited to the overseas account, the mixed fund contains £69,000 of capital (from the sale of shares) together with £15,000 income of the previous tax year (Year 1).

The next part of the example has two more transfers from the mixed fund.

Remittances from mixed funds – identifying nature of remittance – Example 3a (continuation) [June 2010]

Immediately after the £10m transfer in Year 2 (see example 3) J’s mixed fund contains £69,000 of capital (from the sale of shares) and £5,000 overseas employment income of the previous tax year (Year 1).

For the rest of Year 2, J continues to have his UK salary of £10,000 a month and his relevant foreign earnings of £5,000 a month paid into that same account. Both salaries are paid on the last day of each month. There are no further credits or debits from the account in Year 2.

J also writes two cheques to pay bills. These amounts are identified as being 15 October to buy a car and 3 February to pay for building work on his UK property. The final debit on the account (£100,000) is for the purchase of shares in a UK company. All three of these amounts are remittances from a mixed fund to which the rules in s809Q apply.

His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are also credited to the account net of overseas withholding taxes.

		Credit (Debit)	Balance	Category
Year 2	Balance b/f		£99,000	
30 Sept	UK salary (net of tax)	£10,000	£109,000	(a)
30 Sept	Overseas salary (net of tax)	£5,000	£114,000	(f)
31 Oct	UK salary	£10,000	£124,000	(a)
31 Oct	Overseas salary	£5,000	£129,000	(f)
30 Nov	UK salary	£10,000	£139,000	(a)
30 Nov	Overseas salary	£5,000	£144,000	(f)
31 Dec	UK salary	£10,000	£154,000	(a)
31 Dec	Overseas salary	£5,000	£159,000	(f)
31 Jan	UK salary	£10,000	£169,000	(a)
31 Jan	Overseas salary	£5,000	£174,000	(f)
28 Feb	UK salary	£10,000	£184,000	(a)
28 Feb	Overseas salary	£5,000	£189,000	(f)
31 Mar	UK salary	£10,000	£199,000	(a)
31 Mar	Overseas salary	£5,000	£204,000	(f)
Year 3				
30 Apr	UK salary	£10,000	£214,000	(a)
30 Apr	Overseas salary	£5,000	£219,000	(f)
15 May	Dividend	£2,000	£221,000	(g)
31 May	UK salary	£10,000	£231,000	(a)
31 May	Overseas salary	£5,000	£236,000	(f)
30 Jun	UK salary	£10,000	£246,000	(a)
30 Jun	Overseas salary	£5,000	£251,000	(f)
30 Jun	purchase UK shares	(£150,000)	£101,000	
3 Jul	Transfer to UK	(£5,000)	£96,000	

Note 1

The direct debit on 30 June (£150,000) is a remittance from a mixed fund. Applying the ordering rules in S809Q to the account immediately before the transfer:

Step 1 Identify the “amount of transfer” in the relevant tax year **£150,000**
(Year 3)

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for the relevant tax year (Year 3) immediately before the date of the transfer:

- Para (a)** Employment income (including UK employment income) not subject to a foreign tax £30,000
- Para (f)** Employment income subject to a foreign tax £15,000
- Para (g)** Relevant foreign income subject to a foreign tax £2,000

Step 2 Identify the earliest paragraph above for the relevant year (Year 3), which has an amount of income or gain in the mixed fund:

- Para (a)** £30,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the

amount identified in Step 2.	£150,000
	-£30,000
	<u>£120,000</u>

Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

Step 2 Identify the earliest paragraph: **Para (f)** £15,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£120,000
- £15,000
<u>£105,000</u>

Step 4 Repeat Steps 2 and 3.

Step 2 Identify the earliest paragraph: **Para (g)** £2,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£105,000
-£2,000
<u>£103,000</u>

At this stage all of the amounts credited to the account in Year 3 have been matched against remitted amounts. Income and capital of the next previous year (Year 2) must now be considered - so return to Step 1 for Year 2.

Step 1 Identify the separate amounts of income, capital gains and capital present for Year 2 before transfer:

Para (a) Employment income (including UK employment income) not subject to a foreign tax

Year 1 – £10,000
Year 2 – £80,000

Para (f) Employment income subject to a foreign tax

Year 1 – £5,000
Year 2 – £40,000
Year 2 – £69,000

Para (i) Capital

Step 2 Identify the earliest paragraph above for the relevant year (Year 2), which has an amount of income or gain in the mixed fund:

Para (a) £80,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2.

£103,000
-£80,000
<u>£23,000</u>

Step 4 Find the next paragraph/amount for that tax year.

In the order of preference listed above repeat Steps 2 and 3.

Step 2 Identify the earliest paragraph: **Para (f)** £40,000

Step 3 If the amount is more than the [residual] “transfer amount”, the whole of the remittance comes from that paragraph. £23,000

The £150,000 transfer is therefore regarded as a remittance of:

£110,000	UK employment income (within para a)
£38,000	relevant foreign income (within para f)
£2,000	relevant foreign earnings (within para g)

Note 2

The transfer on 3 July of £5,000 to meet daily living expenses will similarly be regarded as coming from the “earliest paragraph” in the mixed fund, which is paragraph (f) containing relevant foreign earnings from Year 2.

The result of this exercise is that:

- J’s UK salary in Year 3 is deemed to have been brought to the UK first and is not a taxable remittance.
- Similarly all of his relevant foreign income and overseas employment income of Year 3 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax – allowing credit for foreign taxes charged on that same income as appropriate.

Reconciliation

The mixed fund still contains:

£69,000 capital (from the sale of shares in Year 2) together with
£12,000 relevant foreign earnings from Year 2, and
£10,000 UK employment income from Year 1
£5,000 relevant foreign earnings from Year 1
£96,000

Moral: J should have kept his capital receipt separate and remitted from that. That would have reduced the rate of tax on the remittance and saved the costs of the computation.

12.5 Offshore transfer mixed fund rule

Section 809R(4) ITA provides:

Treat an offshore transfer from a mixed fund as containing the appropriate proportion of each kind of income or capital in the fund immediately before the transfer.

“The appropriate proportion” means the amount (or market value) of the transfer divided by the market value of the mixed fund immediately before the transfer.

I refer to this as **“the offshore transfer mixed fund rule”**.

12.5.1 “Transfer”

“Transfer” is not defined.

It should have the same meaning as in s.809Q¹⁷ so there is a transfer

¹⁷ See 12.4.3 (“Transfer”).

where the funds in the hands of the transferee are regarded as derived from the mixed fund, but not otherwise. For the meaning of derived in this context, see 10.14 (Derived property).

12.5.2 *Meaning of “offshore” transfer*

Section 809R(5) ITA defines “offshore transfer”:

A transfer from a mixed fund is an “offshore transfer” for the purposes of subsection (4) if and to the extent that section 809Q does not apply in relation to it.

So far the definition seems clear. One must ask whether s.809Q applies. Section 809Q applies (in short) if a sum is received in the UK by a relevant person.¹⁸ A transfer to a UK bank account is an onshore transfer. So a transfer to a foreign account appears to be an offshore transfer. But suppose:

Year 1: a sum is transferred to a foreign account (“the first transfer”)

Year 2: the sum (now in the foreign account) is transferred to a UK account (“the second transfer”).

It appears that in year 1 the first transfer is not an onshore transfer, but in year 2 it becomes one.¹⁹ To avoid this result, s.809R(6) ITA provides:

Treat a transfer from a mixed fund as an “offshore transfer” (and section 809Q as not applying in relation to it, if it otherwise would do) if and to the extent that, at the end of a tax year in which it is made—

- (a) section 809Q does not apply in relation to it, and
- (b) on the basis of the best estimate that can reasonably be made at that time, section 809Q will not apply in relation to it.

If condition (a) and (b) of this subsection are *both* satisfied, there are two consequences:

- (1) One must treat the transfer as an offshore transfer.
- (2) One must treat section 809Q as not applying in relation to it, if it otherwise would do.

¹⁸ See 12.4.2 (Onshore transfer).

¹⁹ Because remittance condition A is met, and the property received in the UK derives indirectly from the first transfer.

Unless condition (a) and (b) are both satisfied, this subsection does not apply.

The condition in subsection (6)(a) is clear enough. One asks whether s.809Q applies at the end of the tax year. Eg this condition is met if:

- (1) T transfers a sum from a mixed fund to a new offshore account on 6th April 2008, and
- (2) the money is still there on 5th April 2009, or the money has been used to purchase a non UK asset.

Subsection (6)(b) is a challenge. At the end of the tax year, one must ask whether one can say that s.809Q will not apply in relation to the transfer. In relation to some transfers one can say with certainty that s.809Q will not apply. If the transferor draws a sum from a mixed fund to pay for a dinner outside the UK, then s.809Q will not apply to it because nothing will be received in the UK. That is an offshore transfer.

If a person transfers a sum to an offshore account and does expect to spend it in the UK that is an onshore transfer when remitted to the UK.

12.5.3 *Recomputation problem*

I use the term “**problematic transfer**” (for reasons which will become clear) to describe a transfer made in the following circumstances (by no means unusual):

- (1) In year 1 T transfers a sum from a mixed fund to an account outside the UK.
 - (2) At the end of year 1 the transferred sum is not received in the UK.
 - (3) T cannot say at the end of the year 1 that “section 809Q will not apply in relation to” the problematic transfer. This may be because:
 - (a) At the end of year 1, T does expect to spend the sum in the UK but not until a later year, say, year 5; or
 - (b) T does not know whether T intends to remit the sum to the UK.
- At the end of year 1, the problematic transfer is not an onshore transfer. It is an offshore transfer within the definition in s.809R(5). Admittedly it is not within subsection 809R(6) but that subsection does not stop any transfer being an offshore transfer, if applicable it treats non-offshore transfers as offshore transfers.
- (4) Suppose in a later year (say year 5) T transfers the sum to the UK. I refer to this as its “**subsequent remittance.**”

On one view, the problematic transfer changes status at the time of its subsequent remittance and becomes an onshore transfer. That is workable

if in the meantime T has not made any other onshore transfers from the mixed fund. It is not workable if in the meantime T has made other transfers from the mixed fund, because:

- (1) T needed to know at the time what income or gains those other transfers included.
- (2) There cannot possibly be a recomputation of the tax effect of the other transfers in earlier years on the basis that the problematic transfer has turned out to be an onshore transfer after all. I think that is obviously impractical, but for good measure it is also inconsistent with s.809R(9) ITA which provides:

If section 809Q applies in relation to more than one transfer from a mixed fund, when undertaking step 1 in relation to the second or any subsequent transfer take into account the effect of step 2 of section 809Q(3) (composition of transfer) as it applied in relation to each earlier transfer.

It is almost impossible to make a coherent and workable tax regime out of this intractable statutory material, which is not surprising given the way in which it was enacted. I think the best solution is to say that s.809R(6)(b) is misconceived, that a problematic transfer is only an onshore transfer if s.809Q applies to it in the year of the transfer. If at the end of the year it is an offshore transfer, its status does not change later. This can be justified on the basis that IT is an annual tax.

The alternative view is that the problematic transfer does change its status and becomes an onshore transfer, on the occasion of its subsequent remittance. One carries through the implications for tax purposes so far as that is possible, so the result is that tax is charged as if the problematic transfer was made after the subsequent transfers.

If that were so, another issue arises. Suppose when asked whether the sum will be remitted, T says (as may well be said) that T will remit it if represents an offshore transfer. The question whether a sum will be remitted to the UK may depend on the tax position, ie if it represents an offshore transfer it will be remitted and if it represents an onshore transfer it will not. It is therefore impossible to answer the s.809R(6)(b) question, whether the sum will be remitted, on the view that a problematic transfer becomes an onshore transfer when remitted; for if it is an offshore transfer it will be remitted (and so is an onshore transfer) but if it is an onshore transfer it will not be remitted (and so is an offshore transfer).

12.5.4 *HMRC explanation*

EN Clause 23 Schedule 7 Remittance Basis Amendments 463 to 481 explains s.809R(4) ITA:

7. Amendment 465 introduces a new subsection [4], dealing with cases where transfers are made wholly offshore. The new rules aim to ensure that where a transfer is made offshore from fund A to fund B, and remittances to the UK are then made from fund A or fund B, the normal ordering rules for mixed funds apply, as they would have done had the transfer to Fund B not been made before the remittance.

In fact the offshore transfer mixed fund rule does nothing of the sort. The EN continues:

8. So if fund A consisted of equal amounts of untaxed income and capital, and half the fund was transferred to fund B, it cannot be argued that fund A or B consisted solely of capital, and remittances from fund A or B were not therefore taxable. Instead, where there is an offshore transfer, so that the normal mixed fund ordering rules do not apply, fund B is to be treated as containing the same proportion of the different categories of income and capital as the original fund, in relation to the amount transferred.

12.5.5 *Transfer partly offshore partly onshore*

Section 809R(8) ITA provides:

If section 809Q applies in relation to part of a transfer, apply that section in relation to that part before applying subsection (4) in relation to the rest of the transfer.

In practice this will rarely if ever occur.

12.5.6 **HMRC examples: onshore and offshore transfers**

The RDR Manual provides a straightforward example of onshore and offshore transfers from an account with different categories of income and gains:

RDRM 35430, 35440 [June 2010]**Example 1** (Ahmid)

A, a remittance basis user has an offshore bank account into which is paid both UK source (taxed) income and his foreign income and gains. A makes regular **transfers from this account to his UK account to meet his UK living expenses.**

		Credit (Debit)	Balance	Category	Note
10 Apr	XYZ (CI) Ltd – proceeds from sale of shares	£1,000,000	£1,000,000	(e)	1
15 Apr	RFI dividend	£10,000	£1,010,000	(g)	
30 Apr	UK salary	£10,000	£1,020,000	(a)	2
30 Apr	Bank interest	£5,000	£1,025,000	(d)	
30 Apr	Overseas salary (net of tax)	£5,000	£1,030,000	(f)	
3 May	Transfer to UK a/c	(£5,000)	£1,025,000		2
15 May	Offshore dividend	£2,000	£1,027,000	(g)	
31 May	UK salary	£10,000	£1,037,000	(a)	
31 May	Overseas salary (net of tax)	£5,000	£1,042,000	(f)	
31 May	ABC (IoM) Ltd – purchase of shares in foreign company	(£1,000,000)	£42,000		3
3 Jun	Transfer to UK a/c	(£5,000)	£37,000		4
30 Jun	UK salary	£10,000	£47,000	(a)	
30 Jun	Overseas salary (net of tax)	£5,000	£52,000	(f)	
3 Jul	Transfer to UK a/c	(£5,000)	£47,000		5
31 Jul	UK salary	£10,000	£57,000	(a)	
31 Jul	Overseas salary (net of tax)	£5,000	£62,000	(f)	
3 Aug	Transfer to UK a/c	(£5,000)	£57,000		6
15 Aug	Cheque – ZZZ Cars Ltd London	(£25,000)	£32,000		7

Note 1

The sale price of the shares includes a gain over the original purchase price of £150,000 that has not been taxed. The purchase was made long before 6 April 2008 and was made using accumulated foreign income and gains which were treated as clean capital.

The mixed fund provisions do not apply to foreign income or gains that arose or accrued before 6 April 2008 (Sch 7 FA 2008 para 89). This means that it is not possible to apply the “mixed fund” rules to the £850,000 used to buy the shares.

Note 2

Using the ordering rules at ITA07/s809Q(1), the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the “earliest paragraph” of income or gains within the mixed fund.

Working this through:

The £5,000 transfer to the UK on 3 May is a “transfer” from a mixed fund within

section 809Q. Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (d)	RFI	£5,000
Para (e)	Chargeable gains	£150,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (g)	RFI subject to tax	£10,000
Para (i)	Income or capital not within another para	£850,000

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed.

Note 3

The purchase of shares on 31 May is an “offshore transfer”; by the end of the tax year the shares purchase have not, nor on best estimate are they likely to be, a remittance transfer [in my terminology an onshore transfer] so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of:

Para (a)	employment income	£ 15,000
Para (d)	RFI	£5,000
Para (e)	Chargeable gains	£150,000
Para (f)	Earnings subject to a foreign tax	£10,000
Para (g)	RFI subject to tax	£12,000
Para (i)	Income or capital not within another para	<u>£850,000</u>
		<u>£1,042,000</u>

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	employment income	£14,396
Para (d)	RFI	£4,798
Para (e)	Chargeable gains	£143,953
Para (f)	Earnings subject to a foreign tax	£9,597
Para (g)	RFI subject to tax	£11,517
Para (i)	Income or capital not within another para	<u>£815,739</u>
		<u>£1,000,000</u>

Note 4

The £5,000 transfer on 3 June to the UK is a “transfer” to the UK from a mixed fund, and is within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

Para (a)	employment income	£604
Para (d)	RFI	£202
Para (e)	Chargeable gains	£6,047

Para (f)	Earnings subject to a foreign tax	£403
Para (g)	RFI subject to tax	£483
Para (i)	Income or capital not within another para	£34,261

The transfer is regarded as coming from each of the paragraphs in order; that is £604 from para (a), and a taxable remittance of £4,396, being £202 from para (d) and £4,194 from para (e).

Note 5 and 6

Both of these £5,000 transfers are to the UK. There have been credits to the fund between the last transfer (note 4) and this transfer and the fund now contains some employment income (para a) and additional amounts of foreign earning subject to foreign tax (para f) in addition to the residue following the last transfer.

The £5,000 transfers made on 3 July and 3 August are regarded as coming from the earliest paragraph of income, that is para (a) – £10,000 of UK employment income credited to the account on 30 June.

Note 7

The cheque remittance on 15 August is £25,000. This amount was used to buy a car from a UK company. This is also a remittance within s809Q. Immediately before the transfer the mixed fund consists of:

Para (a)	employment income	£10,000
Para (d)	RFI	£nil
Para (e)	Chargeable gains	£1,853
Para (f)	Earnings subject to a foreign tax	£10,403
Para (g)	RFI subject to tax	£483
Para (i)	Income or capital not within another para	£34,261

The cheque remittance is regarded as coming from each of the paragraphs in order; that is £10,000 from para (a), £1,853 from para (e) and £10,403 from para (f), £483 from para (g) and £2,261 from para (i).

The remaining £32,000 at 15 August is also within para (i)

12.5.7 Example 1(a)

Example 1(a) – Transfer to another account To continue the offshore account in example 1:

Date		Credit (Debit)	Balance	Category	Note
	Balance b/f		£32,000		
31 Aug	Overseas salary (net of tax)	£5,000		(f)	
31 Aug	UK salary	£10,000		(a)	
3 Sept	Transfer to UK a/c	(£5,000)			1
15 Sept	Cheque – XYZ Travel Services (CI) Ltd	(£10,000)			2
30 Sept	Overseas salary (net)	£50,000		(f)	
30 Sept	Overseas Dividend	£350,000		(g)	
30 Sept	UK salary	£180,000		(a)	
3 Oct	Transfer to UK a/c	(£5,000)			3
15 Oct	Transfer to Swiss a/c	(£350,000)			4

Note 1

Immediately before the transfer on 3 September the mixed fund contained:

Para (a)	employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (i)	Income or capital not within another para	£32,000

The transfer is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed,

Note 2

The next payment from the account is £10,000 for the family holiday flights to the USA. The full payment is a remittance because the service provided is in the UK – the flights begin or end in London.

The transfer is regarded as coming from each of the paragraphs in order; that is £5,000 from para (a) and a taxable remittance consisting of £5,000 from para (f).

Note 3

Immediately before the remittance on 3 October the mixed fund contained:

Para (a)	employment income	£180,000
Para (f)	Earnings subject to a foreign tax	£50,000
Para (g)	RFI	£350,000
Para (i)	Income or capital not within another para	£32,000

The transfer is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income.

Note 4

The transfer of £350,000 to a new Swiss bank account is an offshore transfer. Immediately before the offshore transfer on 15 October the offshore bank account (mixed fund) is regarded as containing:

Para (a)	employment income	£175,000
Para (f)	Earnings subject to a foreign tax	£50,000
Para (g)	RFI	£350,000
Para (i)	Income or capital not within another para	<u>£32,000</u>
		<u>£607,000</u>

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	employment income	£100,906
Para (f)	Earnings subject to a foreign tax	£28,830
Para (g)	RFI	£201,812
Para (i)	Income or capital not within another para	£18,452

The Swiss bank account is another “mixed fund”, containing the income, gains and capital of the transferred amount. Assuming nothing else is added or taken away from to the Swiss account in the interim, if in a couple of years time A decides to remit £120,000 to the UK from his Swiss bank account, the same ordering rules will apply to the Swiss fund, so the remittance is regarded as consisting of £100,906 from para (a) and £19,094 from para (f).

12.5.8 Example 2

The next example has another mix of offshore and onshore transfers.

RDRM 35450 [June 2010]**Example 2 (Lorraine)**

L, a remittance basis user, opens an offshore bank account in Bermuda into which is paid both UK source (taxed) income and her foreign income and gains. L makes a few transfers from this account to her UK account to meet UK living expenses. She also transfers money from this account to her other offshore account in Jersey, as well as using it for several offshore purchases.

Account 1 Bermuda

		Credit (Debit)	Balance	Category	Note
Year 1					
15 Jan	Capital	£1,000,000	£1,000,000	(i)	1
30 Jan	UK salary	£10,000	£1,010,000	(a)	
30 Jan	Bank interest	£5,000	£1,015,000	(d)	
30 Jan	Overseas salary (net of tax)	£5,000	£1,020,000	(f)	
3 Feb	Transfer to UK a/c	(£5,000)	£1,015,000		2
28 Feb	Dividend	£2,000	£1,017,000	(g)	
28 Feb	UK salary	£10,000	£1,027,000	(a)	
28 Feb	Overseas salary	£5,000	£1,032,000	(f)	
3 Mar	Purchase of shares in foreign company	(£800,000)	£232,000		3
10 Mar	Transfer to UK a/c	(£5,000)	£227,000		4
31 Mar	UK salary	£10,000	£237,000	(a)	
31 Mar	Overseas salary (net of tax)	£5,000	£242,000	(f)	
2 Apr	Transfer to UK a/c	(£5,000)	£237,000		5
Year 2					
30 Apr	UK salary	£10,000	£247,000	(a)	
30 Apr	Overseas salary (net of tax)	£5,000	£252,000	(f)	
3 Mar	Transfer to UK a/c	(£5,000)	£247,000		6
15 Mar	Transfer to UK a/c	(£100,000)	£147,000		7
31 May	UK salary	£10,000	£157,000	(a)	
31 May	Overseas salary (net of tax)	£5,000	£162,000	(f)	
8 Jun	Transfer – A2Z travel services	(£20,000)	£142,000		8

Year 1**Note 1**

The £1,000,000 credited to the account on 15 January was inherited under L's great aunt's will, and is "clean" capital.

Note 2

The £5,000 transfer to the UK on 3 May is a “remittance” from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (d)	RFI	£5,000
Para (f)	Earnings subject to a foreign tax	£5,000
Para (i)	Inherited capital	£1,000,000

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 3

The purchase of shares on 3 March (£800,000) is an “offshore transfer”. By the end of the tax year the shares purchased have not been sold, brought to the UK or otherwise used so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of:

Para (a)	Employment income	£15,000
Para (d)	Relevant foreign income	£5,000
Para (f)	Earnings subject to a foreign tax	£10,000
Para (g)	Relevant foreign income subject to tax	£2,000
Para (i)	Inherited capital	<u>£1,000,000</u>
		<u>£1,032,000</u>

The “offshore transfer” (the shares purchase) consists of an appropriate proportion (100/129) of each kind of income, gain or capital, within the mixed fund, that is:

Para (a)	employment income	£11,628
Para (d)	RFI	£3,876
Para (f)	Earnings subject to a foreign tax	£7,752
Para (g)	RFI subject to tax	£1,550
Para (i)	Income or capital not within another para	<u>£775,194</u>
		£800,000

Note 4

The £5,000 transfer to the UK on 10 March is a “remittance” from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer the mixed fund consists of:

Para (a)	employment income	£3,372
Para (d)	RFI	£1,124
Para (f)	Earnings subject to a foreign tax	£2,248
Para (g)	RFI subject to tax	£450

Para (i)	Income or capital not within another para	<u>£224,806</u>
		<u>£232,000</u>

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), £3,372, para (d) £1,124 and para (f) £504. Of this amount, £1,124 and £504 are taxable remittances.

Note 5

The next remittance on 2 April is again £5,000. Two further amounts have been credited to the account which now consists of

Para (a)	employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

The account now consists of:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	<u>£224,806</u>
		<u>£237,000</u>

At the end of the tax year, L has made taxable remittances of: £1,628 (para (d) £1,124 and para (f) £504). She has also made two offshore transfers:

Year 2

At the start of the next tax year, L continues to make remittances to the UK from the overseas account. The “mixed fund” rules mean that income gains and capital of a tax year are treated in priority to income gains and capital of a previous year.

Note 6

The £5,000 transfer to the UK on 3 May is a “remittance” from a mixed fund within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

Para (a)	employment income	£10,000
Para (f)	Earnings subject to a foreign tax	£5,000

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 7

On 15 May, L transfers £100,000 to her UK bank account. This is a “remittance” from a mixed fund within section 809Q(1).

Applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£5,000

So £10,000 of the transfer comes from these two paragraphs of Year 2 income.

The outstanding balance of £90,000 must be identified by applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 1 immediately before the date of the transfer:

Para (a)	employment income	£5,000
Para (f)	Earnings subject to a foreign tax	£6,744
Para (g)	RFI subject to tax	£450
Para (i)	Income or capital not within another para	£224,806

So the remaining £90,000 of the transfer will be regarded as consisting of monies from para (a) £5,000, Para (f) £6,744, Para (g) £450 and Para (i) £77,806 from Year 1.

The mixed fund now consists of:

Para (i)	Income or capital not within another para	£147,000
----------	---	----------

12.5.9 *Example 3: Repayment of loan from mixed fund*

The next HMRC example involves an offshore transfer which is repayment of a loan (not a relevant loan) from a mixed fund.

RDRM 35470 [June 2010]

Example (Frankie)

F, a remittance basis user, has a bank account in Jersey into which is paid both UK source (taxed) income and foreign income and gains. F makes transfers from the Jersey account to his UK account to meet his UK living expenses.

On 28 May, F acquires a loan from his Jersey bank that he uses to purchase an asset in Jersey for £200,000 – Note 3. He repays the [capital of the] loan from this account.

		Credit (Debit)	Balance	Category	Note
6 Apr	Clean capital	£80,000	£80,000	(i)	
15 Apr	RFI NFT	£10,000	£90,000	(d)	
30 Apr	UK salary	£10,000	£100,000	(a)	
30 Apr	RFI bank interest	£5,000	£105,000	(d)	
30 Apr	RFE NFT	£5,000	£110,000	(b)	
3 May	Transfer to UK a/c	(£5,000)	£105,000		1
15 May	RFI	£2,000	£107,000	(d)	
31 May	UK salary	£10,000	£117,000	(a)	
31 May	Overseas salary	£5,000	£122,000	(b)	
3 Jun	Transfer to UK a/c	(£5,000)	£117,000		2
28 Jun	bank loan repayment ²⁰	(£15,000)	£102,000		3 & 4
30 Jun	UK salary	£10,000	£112,000	(a)	
30 Jun	Overseas salary	£5,000	£117,000	(b)	
3 Jul	Transfer to UK a/c	(£5,000)	£112,000		5

20 In this example there are monthly repayments of the capital of the loan, but no payments of interest.

28 Jul	bank loan repayment	(£15,000)	£97,000		6
31 Jul	UK salary	£10,000	£107,000	(a)	
31 Jul	Overseas salary	£5,000	£109,000	(b)	
3 Aug	Transfer to UK a/c	(£5,000)	£102,000		7
15 Aug	Cheque – ZZZ Cars	(£25,000)	£77,000		8
28 Aug	bank loan repayment	(£15,000)	£62,000		9
31 Aug	Overseas salary	£5,000	£67,000	(b)	
31 Aug	UK salary	£10,000	£72,000	(a)	
3 Sep	Transfer to UK a/c	(£5,000)	£67,000		10

The first two transfers are straightforward:

Note 1

Using the ordering rules at ITA07/s809Q, the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the “earliest paragraph” of income or gains within the mixed fund.

Note 2

The remittance on 3 June is also matched against the UK salary from that tax year credited to the account before that date.

We now turn to the point of the example:

Note 3

The £200,000 used to pay for the assets is borrowed capital and is not in itself a remittance or an offshore transfer.

The reason that the payment of £200k is not an offshore transfer is that the sum is not mixed into the mixed fund. If it had been paid into the account (and withdrawn from there to purchase the asset) the position would have been entirely different.

However, subsequent payments of interest and capital used to repay the loan are offshore transfers.

Note 4

At the time immediately before the first repayment of the debt occurs on 28 June, the mixed fund is composed as follows:

Clean capital	£80,000	
UK salary	£10,000	see note 4(a) ²¹
Relevant foreign earnings	£10,000	

21 Note 4(a) provides: “Although £20,000 of F’s UK salary has been credited to the account, £10,000 has already been remitted prior to 28 June (see Notes 1 and 2).”

Relevant foreign income	<u>£17,000</u>
	<u>£170,000</u> ²²

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£10,256
UK salary	£1,282
Relevant foreign earnings	£1,282
Relevant foreign income	<u>£2,180</u>
	<u>£15,000</u>

The property acquired by F using the loan is now regarded as containing this income.²³

The next remittance is straightforward:

Note 5

The next remittance on 3 July is again £5,000 that is matched against the UK salary credited to the account before that date.

Now comes the second loan repayment:

Note 6

At the time immediately before the repayment on 28 July, the “mixed fund” is composed as follows:

Clean capital	£69,744
UK salary	£13,718
Relevant foreign earnings	£13,718
Relevant foreign income	<u>£14,820</u>
	<u>£112,000</u>

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£9,339
UK salary	£1,838
Relevant foreign earnings	£1,838
Relevant foreign income	<u>£1,985</u>
	<u>£15,000</u>

The property acquired by F is now regarded as containing this income.

22 *Sic*; the manual has a typographic or an arithmetical error here.

23 See 12.3.5 (Income/gains used to repay debt).

Next come two straightforward onshore transfers:

Note 7

A further £5,000 remittance on 3 August is again matched against UK salary.

Note 8

The payment of £25,000 to ZZZ Cars is to buy a car and is a taxable remittance. Immediately before the transfer the mixed fund is composed as follows:

Clean capital	£60,405
UK salary	£16,880
Relevant foreign earnings	£16,880
Relevant foreign income	<u>£12,835</u>
	<u>£107,000</u>

This £25,000 remittance is matched firstly against UK salary (£16,880), then against relevant foreign earnings (£8,120).

Next another loan repayment

Note 9

At the time immediately before the repayment on 28 August, the mixed fund is composed as follows:

Clean capital	£60,405
UK salary	£nil
Relevant foreign earnings	£8,760
Relevant foreign income	<u>£12,835</u>
	<u>£82,000</u>

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

Clean capital	£11,049
Relevant foreign earnings	£1,603
Relevant foreign income	<u>£2,348</u>
	<u>£15,000</u>

Note 10

The fifth remittance on 3 September is again £5,000 that is matched against the UK salary from that tax year credited to the account before that date.

The account now contains £77,000, being

Clean capital	£49,356
UK salary	£5,000
Relevant foreign earnings	£12,157

Relevant Foreign Income £10,487

For the purposes of this example, assume that on 8 September F wins the Jersey local lottery (“clean capital”) and uses his winnings to pay off the outstanding loan.

Three years later, F brings the property acquired with the loan to the UK. The property is a mixed fund, and it is regarded as containing the income and capital used to pay off the loan, that is:

UK salary £3,120

Relevant foreign earnings £4,723

Relevant foreign income £6,513

Clean capital. £185,644

F has remitted foreign income of £11,236

The moral which follows from these examples is the imperative of not mixing funds of different types of income or gains, so far as possible.

12.6 Mixed fund with different types of RFI

Suppose an individual holds in one mixed fund two different types of RFI, both subject to foreign tax but one suffers a higher rate of foreign tax than the other. The ITA mixed fund rules give no guidance because both fall into the same mixed fund category. It is considered that the *Duke of Roxburghe* 20 TC 711 approach applies. A remittance from this mixed fund should be regarded as made first of all out of the income which qualifies for more UK double tax relief.

However, it would be better practice to pay the two types of income into separate accounts. Then this issue does not arise and a remittance from the appropriate account can easily be identified as qualifying for the appropriate relief.

12.7 Mixed funds held by third parties

So far we have considered the ITA mixed fund rules where an individual transfers from a mixed fund containing their own income or gains. The position is more complex when a third party is involved. This may arise in (at least) five circumstances:

- (1) A gain accrues to non resident company within s.13 TCGA, so that a s.13 gain accrues to an individual participator, taxable on the s.13 remittance basis. There is a taxable remittance if the company remits its gain to the UK. What if that gain forms part of a mixed fund (ie

the gain is mixed with other funds of the company)?

- (2) Income arises to a person abroad within s.720, so that s.720 income arises to an individual transferor, taxable on the s.720 remittance basis. There is a taxable remittance if the person abroad remits its income to the UK. What if that income forms part of a mixed fund (ie the income is mixed with other funds of the person abroad)?

It is suggested that the ITA mixed fund rules can apply in these two circumstances. Step 1 of s.809Q(3) requires one to find the income or gains of the “individual” but the funds in the hands of the third person are derived (or are treated as derived) from the s.720 income or s.87 gains of the individual, so applying s.809R(2) ITA the funds in the hands of the third party are treated as consisting of that income or gains. This view may favour the taxpayer, particularly for a company which is within s.720 but not s.13, or for a company which is within s.13 but not s.720.

- (3) Income or gains accrue to an individual and the individual gives the income or gains to a relevant person (“R”). There is a taxable remittance if R brings the gifted funds to the UK. What if the income or gains form part of a mixed fund (ie the income or gains are mixed with other funds of R)?
- (4) An individual makes a gift of an asset to a relevant person (“R”), on which a deemed gain arises. The asset is treated as derived from that gain and there is a taxable remittance if R remits the asset to the UK. What if the asset forms part of a mixed fund (ie the asset is mixed with other funds of R)?

Suppose R and T are UK resident at all times. Suppose:

- (1) T gives income, say, RFI, (“T’s income”) to R.
- (2) R mixes T’s income with gains of R (accruing in the same year).
- (3) R remits part of the mixed fund.

Has R remitted T’s income or R’s gains? It is in R’s interest to argue that R has remitted T’s income and in T’s interest to argue that R has remitted R’s gains.

One must categorise R’s mixed fund into the mixed fund categories. The part derived from T’s income seems to fall into two categories: it is both RFI of T (within category (d)) but it is also capital of R. However it does not fall within the final category (i) since that refers to capital *not within another paragraph of this subsection*. So this item is treated as income within category (d). It is considered that R has remitted T’s income first.

This rule normally works in the favour of HMRC, but if T is not UK resident at the time of the remittance, it works in favour of R.

- (5) Income/gains accrue to an individual (“T”) and the individual gives the income/gains to a non-relevant person (“P”). The common example will be the gift of pre-2008 income/gains to a trust. The trustees are not a relevant person in relation to those income/gains. But there will be a taxable remittance if T receives the income/gains. What if the income/gains form part of a mixed fund held by the trustees? It is suggested that the mixed fund rules apply.

12.8 Unremitted income transferred to trust

Suppose:

- (1) A remittance basis taxpayer (“S”) receives foreign income²⁴ (“the old income”) which is not remitted to the UK and so not taxed.
- (2) S transfers the old income to a non-resident trust.
- (3) The trustees invest and realise gains (“trust gains”) in a subsequent tax year. For simplicity, assume that no income arises to the trustees, or any income which arises to them is segregated and paid out to the settlor.
- (4) The trustees make a distribution to the settlor which is received in the UK.

If the distribution is an income receipt of the settlor, it is taxed as an annual payment on ordinary principles;²⁵ that does not count as a taxable remittance of the original income as the receipt of new income should not be regarded as derived from the old income.²⁶ (It may not matter whether the distribution is taxed under either way, so long as it is not taxed on both, but it might matter eg if the original income was dividend income, as the rates of tax are different for annual payments.)

Suppose the distribution is a capital receipt of the settlor. This raises the question of the interaction of:

- (1) the ITA remittance basis charge on the original income and
 - (2) s.87 charge which arises if the settlor receives a capital payment.
- The first question is whether the distribution is derived from the old income. One applies the mixed fund tracing rules. If the payment is out of a mixed fund holding the old income and the capital gains, the capital gains are treated as distributed first, as they are gains of a later year. So

24 Some similar points would apply if T settles gains.

25 See 24.3 (Tier 3: Discretionary income payment: charge on beneficiary).

26 See 10.14.11 (Income from income/gains).

if the distribution is less than the gains in the mixed fund, the distribution is not the old income. The distribution is a capital payment, matched to the trust gain, and subject to CGT under s.87. If the distribution exceeds the gains in the mixed fund, it is partly derived from the old income and the old income comes into charge. It is considered that a distribution derived from the old income received in the UK is not a capital payment.²⁷ The application of the rules becomes very intricate. Take the following (simplified) example:

S has £1,000 of old income arising before year 1. S transfers this to a trust.

Year 1: The trustees realise trust gains of £100.

Year 2: The trustees realise trust gains of £100.

Year 4: capital distribution of £200 to a non-relevant person (eg the wife of the settlor if the income is pre-2008 income).

Year 6: capital distribution of £400 to the settlor.

Assume the distributions are received in the UK. (If received outside the UK and (un)taxed on the remittance basis then no difficulty arises.) For simplicity, I ignore the trust's CGT annual exemption.

The tax analysis is as follows:

Year 4

The tax analysis of £200 distribution to W in year 4 is (relatively) straightforward. The £200 distribution to W in year 4 does not constitute a taxable remittance of the old income, for IT purposes, because remittance condition A in s.809L is not satisfied.

The £200 distribution is a capital payment which is matched with the £100 trust gain. W is therefore treated as receiving s.87 gains of £100. The remaining £100 of the £200 distribution is unmatched in year 4, and carried forward. we need not consider the mixed fund rules at this point.

Year 5

The remaining £100 of the £200 distribution which was unmatched in year 4 is matched to the trust gain in year 5. W is treated as receiving a s.87 gain of £100 in year 5. The remaining trust gain of £150 is unmatched in year 5 and carried forward to be matched to future capital payments.

Year 6

The tax analysis of the £400 payment to the settlor in year 6 is more complicated.

27 See 48.6.2 ("Chargeable to income tax").

First, to what extent is the payment derived from the settlor's old income? For IT purposes, what are the constituents of the fund from which the payment is made, immediately before the £400 payment? Here we do need to consider the mixed fund rules. The trustees made a transfer of £200 to W out of a mixed fund of £500 (the settlor's old income but the trustees capital) and £100 gain. That is an offshore transfer (as defined) since s.809Q does not apply to it; see s.809R(5) and s.809Q(1). So it consisted of one sixth of the gain = £33. So the trustees fund before the £400 transfer consist of:

Gains: $£350 - £33 = £317$.

Trustees capital (the settlor's pre-2008 income) = $£1000 - £166 = £833$. Applying the mixed fund rule, the £400 payment to the settlor consists of the gains first (because they are gains of a later year) so £317 of the capital distribution is not derived from the old income. Of that £317, £150 is matched to the outstanding trust gains, and the balance is carried forward to be matched against future trust gains.

£83 of the payment is matched to the pre-2008 income and is taxed on the remittance basis. That is not a capital payment.²⁸

12.9 From which fund is remittance made: bank errors

The RDR Manual provides:

33560 Banking Issues [December 2011]

Bank Errors and Mistakes

Where a bank acts contrary to express instructions by an account holder, and that mistake inadvertently results in a taxable remittance to the UK by the account holder, the account holder and the bank may alter the transaction in line with the original instructions given.

If the bank does this, HMRC will treat the earlier [mistaken] transaction as not having taken place and the new transaction as being the original transaction in looking at whether there has been a taxable remittance from that account.

This is soundly based on *Duke of Roxburghe's Executors v IRC* 20 TC 711 where a taxpayer received and held offshore:

²⁸ See 48.6.2 ("Chargeable to income tax").

- (1) income subject to UK tax on an arising basis (“taxed income”);²⁹ and
- (2) foreign income which qualified for the remittance basis, and which was therefore taxed if remitted (“untaxed income”).

These were wisely held in separate accounts in one bank and so a remittance out of the taxed income account would not be taxable. The taxpayer correctly directed the bank to make a remittance to the UK out of her taxed income account. Unfortunately the bank made a remittance out of the wrong account, so the sum remitted could (largely) be traced to untaxed income!

The Court of Session identified the sum remitted as taxed income because the taxpayer had *intended* the remittance to come out of taxed income.³⁰

12.10 Mixed fund anti-avoidance rule

Section 809S ITA provides:

- (1) This section applies if, by reason of an arrangement³¹ the main purpose (or one of the main purposes) of which is to secure an income tax advantage or capital gains tax advantage, a mixed fund would otherwise be regarded as containing income or capital within any of paras (f) to (i) of section 809Q(4).

29 Being foreign source income of a class not then qualifying for the remittance basis and so subject to UK income tax on an arising basis.

30 “The Duchess was entitled to have the remittance debited against any fund belonging to her and under her control and that she did so effectually by the *instructions* to debit it against money not derived from the [untaxed] income.” Lord Normand at p.726 (emphasis added).

This was also the view of Lord Fleming at p.732: “I base my decision ... on the ground that it was the legal right of the Duchess to make the appropriation against any particular fund belonging to herself, and that in law she made that appropriation when she directed the Bank making the remittance to charge it against her funds in their hands which had already borne British Income Tax.”

A second ground of the decision was that a remittance out of a mixed fund with taxed and untaxed income is in general to be treated as out of the taxed income regardless of the intention of the taxpayer. The second ground is now reversed by the ITA mixed fund rules.

31 Section 809S(3) ITA contains the usual (unnecessary) commonsense definition of “arrangement”:

“‘Arrangement’ includes any scheme, understanding, transaction or series or transactions (whether or not enforceable).”

- (2) Treat the mixed fund as containing so much (if any) of the income or capital as is just and reasonable.

I refer to this as “**the mixed funds anti-avoidance rule**”.

IT advantage and CGT advantage have the standard (wide) definitions.³² The terms are not limited to tax avoidance in the strict sense.

Section 809S is clearly intended to override the offshore mixed fund transfer rule although this is not expressly stated.³³

Suppose:

- (1) T has a mixed fund containing £2m, 50% income and 50% capital.
- (2) T transfers £1m, half the amount, to another account (an offshore transfer). T intends to keep that amount offshore.
- (3) T then remits the funds in the first account to the UK.

Applying the offshore transfer mixed fund rule the first account, which is remitted, consists of 50% income and capital, so on remittance 50% of the sum received is tax free. In the absence of the offshore transfer, the whole of the £1m remitted would have been subject to income tax. The offshore transfer is an arrangement which secures an IT advantage. Assuming this was one of the main purposes, s.809S applies.

³² Section 809S provides:

- (4) “Income tax advantage” means—
 - (a) a relief from income tax or increased relief from income tax,
 - (b) a repayment of income tax or increased repayment of income tax,
 - (c) the avoidance or reduction of a charge to income tax or an assessment to income tax, or
 - (d) the avoidance of a possible assessment to income tax; and for this purpose “relief from income tax” includes a tax credit.
- (4A) For the purposes of subsection (4)(c) and (d) it does not matter whether the avoidance or reduction is effected—
 - (a) by receipts accruing in such a way that the recipient does not pay or bear income tax on them, or
 - (b) by a deduction in calculating profits or gains.
- (5) “Capital gains tax advantage” means—
 - (a) a relief from capital gains tax or increased relief from capital gains tax,
 - (b) a repayment of capital gains tax or increased repayment of capital gains tax,
 - (c) the avoidance or reduction of a charge to capital gains tax or an assessment to capital gains tax, or
 - (d) the avoidance of a possible assessment to capital gains tax.

³³ The mixed funds anti-avoidance rule could also override the *onshore* transfer mixed fund rule, but it is not likely ever to be just and reasonable to substitute any other set of rules.

One then has to ask what is “just and reasonable”. The drafter has given up here and left the courts to sort it out.³⁴ One might say that it is reasonable to apply the pre-2008 mixed fund rules. That can hardly be described as unjust or unreasonable. But it is considered that the expression “just and reasonable” should be construed in accordance with the policy of the onshore transfer mixed fund rule. So an arrangement of the kind discussed above would be set aside and it would be just and reasonable to raise tax as if the offshore transfer had not been made. To put it another way, it is just and reasonable that transfers whose main purpose is to obtain a tax advantage should not do so.

If that were wrong, what would happen if there were a second transfer from the first account: in this way one could reduce the income element of any mixed fund to a relatively small sum by a series of offshore transfers.

12.10.1 *Scope of mixed funds anti-avoidance rule*

The mixed fund anti-avoidance rule applies only if the mixed fund contains income or capital within mixed fund categories (f) to (i). So if a mixed fund consisted of (say) RFI within category (d) and chargeable gains within category (e), the anti-avoidance provision does not apply. This is a little surprising and it might be that s.809S(1) contains a typographical error, (f) being a slip for (a). But it is not obvious that there has been an error, as there is rather more scope for manipulation of the rules in a mixed account which contains categories (f) to (i). So a court should construe the section to mean what it says. In practice the point is not so important as a mixed fund will usually contain some item within categories (f) to (i).

12.11 ITA mixed fund rules: commentary

The ITA mixed fund rules operate on a daily, indeed minute by minute basis, as the rules must be applied at the time of every onshore and offshore transfer. They do not operate within a given tax year on a pro rata basis (contrast the s.87 or s.731 matching rules). If a client’s account

34 CIOT agree: Response to consultation paper "Reform of the taxation of non-domiciled individuals" "Section 809S is so widely drawn as to be almost meaningless."

contains thousands of entries, the computations must be done thousands of times. The reader who has studied the text to here, and who contemplates applying these rules to the actual circumstances of a client, will agree that the mixed fund rule is unworkable.

Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008 records the same view:

Delegates asked whether HMRC would be prepared to allow for apportionment on an annualised (rather than a monthly) basis. The legislation concentrates on transfers from mixed funds on the occasion of each and every transfer. HMRC did not think it was possible to override the intention of the legislation but agents considered that it would be unworkable to examine each and every debit and credit on the basis envisaged within a new legislation. ...

The overwhelming view put forward by external delegates was that without the availability of a methodology along the lines of SP 5/84 it would be impractical for any inward expatriate to claim access to the remittance basis because it would not be possible to perform the calculations required by the legislation.³⁵

In their defence, HMRC make two points:

[1] HMRC reminded delegates that use of the remittance basis is voluntary as from 6 April 2008 and [2] that HMRC had been asked to bring in rules on remittance from mixed funds and rules relating to overseas transfers.

But as to point [1], the fact that the remittance basis is voluntary is no excuse for unworkable tax law. HMRC have overlooked that the remittance basis is intended to make the UK an *attractive* place for foreign domiciliaries to reside.³⁶ There is no need to comment on point [2].

A few months later HMRC issued SP 1/09 so the step thought impossible apparently proved to be possible after all.³⁷ But while helping the employee who is resident and not ordinarily resident, that does not help the rest of the body of remittance basis taxpayers who face the same problems. Why were resident non-ordinarily resident employees singled

35 Accessible www.hmrc.gov.uk/consultations/expat-mins-180908.htm

36 An alternative inference is that a decision was made deliberately to undermine the remittance basis by making it impracticably difficult to operate.

37 See 13.26 (Remittance from earnings for mixed UK/foreign duties).

out for special relief? The reason was presumably down to effective lobbying rather than any rational policy consideration.

The mixed fund legislation needs to be rethought from beginning to end – an immensely challenging task, which could not possibly have been done in the few days available as Schedule 7 FA 2008 hurtled to the deadline for enactment. However HMRC have rejected this:

In particular, the Government will not look further at the following:

Simplification Reviewing and simplifying the mixed fund rules

Government response Although the Government appreciates that these rules can be complicated to operate, it is essential to be able to identify different types of income, gains and capital as they are remitted from a single account. The Government cannot envisage an alternative approach to achieve this purpose which would not entail similar complexity or a significant Exchequer cost.³⁸

12.12 Transitional rules for pre-2008 mixed fund

The ITA mixed fund rules raise transitional issues which the FA 2008 addresses only in general terms, leaving HMRC, taxpayers and the courts to sort the matter out as best they can.

Para 89 Sch 7 FA 2008 provides:

Sections 809Q to 809S of ITA 2007 (transfers from mixed funds) do not apply for the purposes of determining whether income or chargeable gains for the tax year 2007-08 or any earlier tax year are remitted to the UK (or the amount of any such income or chargeable gains so remitted).

12.12.1 *Pre-2008 transfer from mixed fund with pre-2008 income/gains*

Suppose:

- (1) A mixed fund contains pre-2008 income/gains.
- (2) A transfer is made from that fund to the UK before 2008.

One obviously applied the pre-2008 mixed fund rules (discussed in the next section) to determine what was remitted at the time of the transfer and the same rules determine what income/gains remain in the fund

38 HMRC & HMT, “Reform of the taxation of non-domiciled individuals: summary of responses to consultation” (December 2011) para 2.127

www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

(which may be remitted post 2008).

12.12.2 *Post-2008 transfer from mixed fund with pre-2008 income/gains*

Suppose:

- (1) A mixed fund contains pre-2008 income/gains (no post-2008 income/gains have been added).
- (2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. Para 89 means that one disregards the ITA mixed fund rules (and instead applies the pre-2008 mixed fund rules discussed in the next section).³⁹ HMRC agree: this is the approach taken in example 4a in the RDR Manual.⁴⁰

12.12.3 *Post-2008 transfer from mixed fund with pre- and post-2008 income/gains*

Suppose:

- (1) A mixed fund contains pre-2008 and post-2008 income/gains.
- (2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. The analysis comes in two stages.

- (1) First one has to determine whether the transfer consists of pre-2008 or post-2008 income/gains.
- (2) (a) If the transfer consists of pre-2008 income/gains, one applies the pre-2008 mixed fund rules to identify what is remitted.
(b) If the transfer consists of post-2008 income/gains, one applies the ITA mixed fund rules to determine what is remitted.

Which set of rules apply at stage 1? It is suggested that one first applies the ITA mixed fund rules so far back as 2008/09 and then the pre-2008 mixed fund rules. HMRC agree. This is the approach taken in example 4a in the RDR Manual.⁴¹

39 This view is the more natural reading. Also, if it were wrong (so one had to apply the ITA mixed fund rules) it would be necessary to classify the constituents of the mixed fund held at 6/4/08 by date and by the nine mixed fund categories, going back without limit of time. Records in many cases will not exist.

40 See 12.14 (Pre-2008 mixed funds: HMRC examples).

41 See 12.14 (Pre-2008 mixed funds: HMRC examples).

12.13 Pre-2008 mixed fund rules

We can now turn to consider the pre-2008 mixed fund rules. There were no statutory provisions. There were a few old cases, supplemented by practice, and outside areas governed by clear rules, I expect HMRC would accept any reasonable view.

12.13.1 *Remittance from mixture of taxed and untaxed income*

The RDR Manual provides:

36320. Remittances from a mixed fund [June 2010]

... Where an overseas 'mixed fund' contained an amount that has already suffered UK tax, for example UK salary dealt with under PAYE, the practice (*Sterling Trust v CIR* 12 TC 868) was that a taxpayer was entitled to say that he or she has remitted income which has already suffered UK tax (to the extent that such income exists in the fund) in priority to income which is assessable on the arising basis [ie in priority to income which is assessable if remitted].⁴²

This is soundly based on *Duke of Roxburghe's Executors v IRC*.⁴³

12.13.2 *Remittance from mixture of untaxed income and income qualifying for DT relief*

Suppose an individual holds in one pre-2008 mixed fund:

- (1) income which is subject to foreign tax and qualifies for UK double tax relief; and
- (2) untaxed foreign income taxable in full on the remittance basis.

It is considered that the *Roxburghe* approach applies. A remittance from

⁴² The same point is made in RDR Manual 35320 (Mixed Funds: Example 4 - remittances before 6 April 2008, Note 2).

⁴³ 20 TC 711 discussed in another context at 12.9 (From which fund is remittance made: bank errors).

Although the taxpayer in *Roxburghe* kept the funds in two accounts at the bank, the result would have been the same if the taxed and untaxed income had been held in a single bank account. This was accepted without argument in *Walsh v Randall* 23 TC 55: see para 3 of the Special Commissioners' decision, and it is accepted in this passage from the RDR Manual.

this mixed fund should be regarded as made first of all out of the income which qualifies for UK double tax relief.

12.13.3 *Remittance from mixture of capital and income*

In *Scottish Provident Institution v Allan* 4 TC 591, the taxpayer held offshore:

- (1) capital which had been invested in secured loans in Australia; and
- (2) interest from those loans, which qualified for the remittance basis, and which was therefore untaxed unless and until remitted.

A sum was remitted to the UK and the question was whether this sum was the untaxed income or the capital. The background was this:

- (1) The income and capital had been paid into a single account (mixed).
- (2) The remittances (from the Australian agents) had been accompanied by letters stating that the sums remitted represent repayments of the loans, ie capital. The loans had in some cases been repaid only very shortly before the remittance.
- (3) The sum remitted (£200,000) was small compared to the amount of the loans and the interest received (each about £1.5m).

It was held that the remitted sum was the income, not capital. The Lord Chancellor said:

It is obvious that the mere nicknaming the sum received and ascribing to it, because it is so named, the character of capital and not of income, cannot defeat the right of the Crown to have the tax levied upon that which in substance and truth is [income] ...⁴⁴

Two points shine out:

- (1) The description of the remittance as capital does not make the remittance capital if “in truth” it is income. This is obviously right, an application of the Shakespearean principle that “a rose by any other name ...” However, this principle does not address the more fundamental question of *how* the courts determine what is income and what is capital.

44 Similarly Lord Davey: “I must say that that is a draft upon my credulity, a strain upon my powers of belief, which they will not bear. I agree that the mere calling it capital for the purpose of the Inland Revenue Department will not make into capital that which is essentially and in truth ... the interest received on the securities.”

(2) The answer to this second question is that the courts look to the substance.

However, it is one thing to look for the substance, and another to find and identify it. Why, in substance, was the remittance from the income, not from the capital? The answer may be found in the speech of Lord Robertson: “The facts of the case must furnish the inference.”

The following facts were relevant:

- [1] First of all there is the fact of remittance in two consecutive years ...
- [2] There is no suggestion that any exceptional reason required remittances of capital, in either year or in both.
- [3] On the other hand it is certain that the amount of invested capital left behind in the Colony, after these remittances, is larger than before; so that the capital is fully accounted for.
- [4] Well then, what is done with this so-called capital remitted? The answer is, exactly what would be done with profits.

This is explained by Lord Shand in argument:

If it is capital you have brought back and distributed as bonus, you have been paying back capital, which I should think you have no authority to do.

This is why Lord Robertson concluded:

The inference from these facts is that the moneys remitted were in fact profits, [ie income] ...

The former Inspectors Manual para 1566 gave the HMRC view:

Where a person maintains abroad a fund (for example, a bank account) containing income assessable on the remittance basis, a capital lodgement to the fund is normally considered to lose its identity in the fund. A subsequent remittance from such a mixed fund, therefore, represents income up to the full extent of the income content of the fund (see *Scottish Provident Institution v Allan* 4 TC 409 and 4 TC 591, and especially the Lord Chancellor’s remarks on ‘mere nicknaming’ at 4 TC 593). Only when the income content of the fund is exhausted will any balance remitted be regarded as capital. Where this is not accepted, the full facts of the case should be reported to Revenue Policy, International (Cases IV and V), Victory House.

The Inspectors Manual over-simplified the law as expounded in *SPI v Allan*. There is no rule that the remittance out of a mixed fund of income and capital is bound to be treated as income. Suppose a taxpayer remits a substantial amount, exceeding the income, and applies it to an investment in the UK, or on capital expenditure here, such as the purchase of a house. It is considered that the “substance” of the matter, applying Lord Robertson’s approach, is that the remittance is one of capital. The position is even stronger if the taxpayer first uses an amount equal to the income of a mixed account on expenditure abroad of an income nature. The RDR manual now provides:

36320. Remittances from a mixed fund [June 2010]

For tax years up to 5 April 2008, there are no statutory rules to determine what amounts remitted from ‘mixed funds’ actually consisted of.

On occasion this created difficulty in determining, for UK tax purposes what a remittance to the UK actually consisted of, for example, was it non-taxable income, employment income, interest, chargeable gains or capital.

Scottish Provident v Allan

Broadly HMRC practice was based on House of Lords decisions, in particular that of *Scottish Provident v Allan* (4 TC 409/591). In the Court of Exchequer, Lord McLaren said (page 419)

‘un-appropriated remittances must be dealt with according to the ordinary course of business, and these remittances must be presumed to be paid in the first place out of interest so far as they are income, and in the second place of principal or capital. I think that rule results from the fact that no prudent man of business will encroach upon his capital for investment when he has income un-invested lying at his disposal’.

The House of Lords considered that the question of whether any amount of income had actually been received in the UK is essentially one of fact, that is, of tracing in the first instance, or, where direct tracing proves to be impossible, of inference from the known facts.

In the absence of any evidence to the contrary, the principal is that where capital and income have been paid into a single fund overseas so that they are no longer distinguishable, remittances to the UK out of the fund will be presumed to be income to the extent that there is income existing in the fund at the time that the remittance was made.

... Only when the income content of the fund is exhausted will any

balance remitted be regarded as capital.⁴⁵

Note that *SPI v Allan* was a case where the mixed fund was capital and income. The case can have no application where the mixed fund consists of two different kinds of income or two different kinds of capital.

At first sight there is some tension between *SPI v Allan* and *Duke of Roxburghe* 20 TC 711. In the first, “mere nicknaming” was contemptuously dismissed; in the second, it was the “legal right” of the Duchess to direct whether the remittance was from one part of a mixed fund or the other. The cases agree, however, that the matter is one of “substance”. It is submitted that the cases can be reconciled in this way: in a marginal case, the description of the remittance given by the taxpayer may be decisive. Where the substance of the transaction shows that a remittance is one of income or capital, “mere nicknaming” will not alter the position.

12.13.4 *Remittances out of mixed capital funds*

Suppose an individual holds in one pre-2008 mixed fund:

- (1) capital which does not represent any chargeable gain within the scope of CGT; and
- (2) the proceeds of a disposal on which a chargeable gain accrued.

A remittance from this fund should for CGT purposes be treated as coming out of the tax free source first.

12.13.5 *Remittance of gain or remittance of base cost?*

Suppose a foreign domiciliary purchases a foreign asset for £1m; they sell it for £3m and realises a pre-2008 chargeable gain of £2m. If they remit the entire £3m proceeds, the entire £2m gain is charged to CGT. But what is the position if they remit only £1m and retain the balance abroad? The RDR Manual provides:

36320. Remittances from a mixed fund... [June 2010]

Capital Gains

For years up to 5 April 2008, where a remittance is made to the UK

⁴⁵ The same passage is found in RDRM 35320 Note 2.

from a mixed fund into which the proceeds from the sale of an asset (such as a shareholding) has been paid the remittance contains a due proportion of any capital and of any capital gain arising from the disposal.

That is because, unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. Refer to the Capital Gains manual CG25380 onwards (and CG25440 in particular).⁴⁶

The last sentence is correct to say that a capital gain has no separate existence. I do not think it even exists as “part of the money received from the sale”. It is not a separate or separable item of property existing at all. The gain is merely the result of a computation. The proceeds of a disposal represent the gain, but they do not constitute the gain, just as trading receipts do not constitute the profits of a trade. So it is considered that the HMRC view is correct.

12.14 Pre-2008 mixed funds: HMRC examples

The RDR manual gives two examples concerning pre-2008 mixed funds.

12.14.1 *Pre-2008 transfer from a pre-2008 mixed fund (example 4)*

The first example involves a pre-2008 transfer from a pre-2008 mixed fund. One therefore applies the pre-2008 mixed fund rules.⁴⁷

35320 Mixed Funds: Example 4 - remittances before 6 April 2008

Example 4 (Martyn) [June 2010]

The “mixed fund” rules in s809Q do not apply to amounts that are in an account before 6 April 2008 (FA2008/para 89).

M has lived in the UK for many years. He has paid UK tax on the remittance basis for all relevant tax years and has decided that he will do so again for 2008/2009.

M has his UK salary paid into his overseas bank account. He also has a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the account. Dividends from a shareholding in a foreign company are also paid into the account.

On 18 March M sold some of his foreign shares as he was thinking of purchasing

⁴⁶ The same point is made at para 35320 (Mixed Funds: Example 4 - remittances before 6 April 2008 Note 3).

⁴⁷ See 12.12.1 (Pre-2008 transfer from mixed fund with pre-2008 income/gains).

a new property. He deposited the proceeds of £5,000,000 from the sale into his overseas account. This amount is made up of £4m capital and £1m gain (no deduction of foreign tax).

Tax Year 2007-2008	Credit (Debit)	Balance	Note
Balance b/f		£47,000	1
31 Dec UK salary (net of tax)	£10,000	£57,000	
31 Dec Overseas salary (net of tax)	£5,000	£62,000	
3 Jan Transfer to UK account	(£5,000)	£57,000	2
31 Jan UK salary	£10,000	£67,000	
31 Jan Overseas salary	£5,000	£72,000	
3 Feb Transfer to UK account	(£12,000)	£60,000	2
15 Feb Dividend	£2,000	£62,000	
29 Feb UK salary	£10,000	£72,000	
29 Feb Overseas salary	£5,000	£77,000	
3 Mar Transfer to UK account	(£8,000)	£69,000	2
18 Mar Share Sale £4m capital, £1m gain	£5,000,000	£5,069,000	3 ⁴⁸
31 Mar UK salary	£10,000	£5,079,000	
31 Mar Overseas salary	£5,000	£5,084,000	
3 Apr Transfer to UK account	(£10,000)	£5,074,000	2

Note 1: Identity of balance brought forward

The balance brought forward of £47,000 is made up of

UK salary	£15,000
overseas salary	£25,000
overseas dividends	<u>£7,000</u>
	£47,000 ⁴⁹

The manual then considers the tax analysis of the four UK transfers. The key fact is that M never remitted more than the UK salary already received in the account (the transfers totalled £35k and salary totalled £55k). The Manual provides:

Note 2: Transfers to UK account

... So to establish the taxable amount of remittances made in the example above in 2007-2008 the account must be analysed. In this case the analysis is straightforward. M has brought £35,000 to the UK between December 2007 and March 2008 to meet his day to day UK spending

48 For this note, see 12.13.5 (Remittance of gain or remittance of base cost?).

49 The manual adds: "all items arising in, and credited during that tax year. M has paid the relevant amount of UK tax based upon his UK sources of income and the amounts of foreign income and gains that he has remitted to the UK." But that is not relevant to the example.

needs. Applying the *Sterling Trust v IRC* practice outlined above,⁵⁰ the £35,000 can be regarded as remittances consisting solely of his UK salary that has already been taxed under PAYE. Because he has claimed the remittance basis of taxation in respect of his relevant foreign income or foreign earnings for 2007-2008 he has no further amount of UK tax to pay on these amounts that stay in the Offshore account.

The example is repeated in RDR Manual 36330 (Remittances from a mixed fund - Example 1).

12.14.2 *Transfer from fund with pre- and post-2008 entries*

The next example is a post-2008 transfer from a mixed fund containing pre- and post-2008 income/gains.

35330 Remittances from mixed funds involving income/gains before 6 April 2008 - Example 4a [June 2010]

Continuing from the example 4 above, on 5 April 2008 M's Offshore account contains:

2007- 2008	UK salary	£20,000
	Overseas salary	£45,000
	Overseas dividends	£9,000
	Sale of shares: Capital	£4,000,000
	Sale of shares: Gain	<u>£1,000,000</u>
		£5,074,000

2008-2009		Credit (Debit)	Balance	Category Note
6 Apr	Balance b/f	£5,074,000		
30 Apr	UK salary (net)	£10,000	£5,084,000	Para (a)
30 Apr	Overseas salary (net)	£5,000	£5,089,000	Para (f)
3 May	Transfer to UK acc	(£5,000)	£5,084,000	1
15 May	Dividend	£2,000	£5,086,000	Para (g)
31 May	UK salary	£10,000	£5,096,000	Para (a)
30 May	Overseas salary	£5,000	£5,101,000	Para (f)
30 Jun	UK salary	£10,000	£5,111,000	Para (a)
30 Jun	Overseas salary	£5,000	£5,116,000	Para (f)
30 Jun	Direct Debit to UK	(£100,000)	£5,016,000	2

Note 1 analyses the £5k remittance made 3 May:

Applying the ordering rules in S809Q to the account **immediately before the** transfer:

⁵⁰ See 12.13.1 (Remittance from mixture of taxed and untaxed income).

Step 1 Identify the “amount of transfer” in the relevant tax year (2008-09) £5,000

Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer:

Para (a) Employment income not subject to a foreign tax £10,000

Para (f) Employment income subject to a foreign tax £5,000

Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund

Para (a) £10,000

Step 3 Where the amount of the remittance is less than the amount identified at Step 2 the amount remitted is treated coming entirely from that paragraph. There is no need to continue to step 4. £5,000

The remittance is regarded as coming from the “earliest paragraph”, that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

Note 2 analyses the £100k remittance made 30 June. At this point the example becomes more challenging:

M decided to buy a residential property. He remits £100,000 to pay some legal fees [!] for the purchase on 30 June. Although M considers that this amount has come from the sale of shares in 2007-2008 the ordering rules in s809Q require the remittance to be taken into account first against all income and gains of the year in which the remittance is made.

Step 1 Identify the “amount of transfer” in the relevant tax year (2008-2009) £100,000

Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer:

Para (a) Employment income not subject to a foreign tax £25,000

Para (f) Employment income subject to a foreign tax £15,000

Para (g) Relevant foreign income subject to a foreign tax £2,000

Step 2 Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund:

Para (a) £25,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £100,000
- £25,000
£75,000

Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

Step 2 Identify the earliest paragraph: **Para (f)** £15,000

Step 3 Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2 £75,000

	-£15,000
	<u>£60,000</u>
Step 4 In the order of preference listed above repeat Steps 2 and 3.	
Step 2 Para (g)	£2,000
Step 3	£60,000
	- £2,000
	<u>£58,000</u>

At this stage all of the amounts credited to the account in 2008-09 have been matched against £100,000 remittance transfer [in my terminology an onshore transfer] in that year. But £58,000 has been brought to the UK that has not been “matched” under the s809Q rules (and cannot be matched because of FA2008/para89).

The remaining £58,000 is regarded as coming from the 2007-08 credits to the account. The ordering rules at section 809Q cannot be used, so instead the general principles outlined in Note 2 of example 4 above will apply.

This £58,000 will usually be regarded as a remittance of M’s income and is, first and foremost (*Sterling Trust* principle) his taxed income and then (*Scottish Provident v Allan* principle) any other income - that is his foreign employment income or dividends - as he selects.

However in this case M may equally be able to demonstrate that the remaining £58,000 comes from the proceeds of the sale of shares, as he particularly sold the shares in order to fund this house purchase. If that is the case, the remaining remittance will consist of £11,600 foreign chargeable gain (1/5 due proportion – see note 3 in example 4).⁵¹

HMRC do not say whether the £58k remittance is income or capital. How is M to “demonstrate that the £58k comes from the proceeds of the sale of shares” given that the payment was out of a mixed fund? The correct approach is to say that the substance is one of a remittance of capital since the purchase is for the house, ie has the nature of capital expenditure.⁵² Thus the £58k remittance is capital.

The moral of the example is that M should not have paid the proceeds of the share sale into a mixed account. If it had been paid into a separate account, and the £100k paid from there, the position would have been simpler and better.

12.15 Remittance of nominated income or gains

12.15.1 *Outline*

EN FB 2008 provides:

51 See 12.13.3 (Remittance from mixture of capital and income).

52 See 12.13.3 (Remittance from mixture of capital and income).

14... If, in subsequent years, that “nominated” income or gains upon which the RBC has been paid is, in fact, remitted to the UK, then that income or gains will not be taxed again. However, there are ordering rules to ensure that if “nominated” income or gains is, in fact, remitted when other untaxed income and gains remain unremitted, then that unremitted income and gains is treated as being remitted before the “nominated” income and gains.

The expression “nominated income and gains” is defined in s.809I(3). The drafter thought that this was a section-wide definition only, so repeated the definition in s.809J(3). (If the definitions had been made ITA-wide definitions this repetition would not have been necessary.) The definition provides:

(3) In this section the individual’s “nominated income and gains” are the total income and chargeable gains nominated by the individual under section 809C for the relevant tax year or any earlier tax year (each such year for which the individual has made a nomination under that section being referred to as a “nomination year”).

The definition is discussed in 9.10.3 (Nomination of income and gains).

12.15.2 “*Remittance basis income and gains*”

Section 809I(4) ITA gives this term a fairly commonsense meaning:

An individual’s “remittance basis income and gains” are the foreign income and gains of the individual for all the tax years (up to and including the tax year mentioned in subsection (1)(a)) for which section 809B, 809D or 809E applies to the individual, apart from the individual’s nominated income and gains.

Nominated income/gains do not count as remittance basis income/gains because they are taxed on an arising basis. The drafter thought that this was a section-wide definition only, so repeated the definition in s.809J(4):

(4) In step (1) of subsection (1) the individual’s “remittance basis income and gains” are the foreign income and gains of the individual for all the tax years (up to and including the relevant tax year) for which section 809B, 809D or 809E applies to the individual, apart from the individual’s nominated income and gains.

12.15.3 *Nominated income/gains categories*

The taxpayer must classify all their remittance basis income and gains into 8 categories, which I will call “**the nominated income/gains categories**”. The categories are set out in s.809J(2) ITA. These are almost the same as the nine mixed fund categories but:

- (1) there are casual differences of wording which do not affect the meaning; and
- (2) there are (incredibly) small differences of substance (I do not see why – if any reader can suggest a reason I would be interested to know).

I here set out a table which compares the two (the differences are italicised):

Nominated income/gains categories	Mixed fund categories
	(a) <i>employment income (other than income within para (b), (c) or (f))</i>
(a) relevant foreign earnings (other than those subject to a foreign tax)	(b) relevant foreign earnings (Other than income within para (f))
(b) foreign specific employment income (other than income subject to a foreign tax)	(c) foreign specific employment income (other than income within para (f))
(c) relevant foreign income (other than income subject to a foreign tax)	(d) relevant foreign income (other Than income within para (g))
(d) foreign chargeable gains (other than gains subject to a foreign tax)	(e) foreign chargeable gains (other than chargeable gains within para (h))
(e) <i>relevant foreign earnings subject to a foreign tax</i>	(f) employment income subject to a foreign tax
(f) <i>foreign specific employment income subject to a foreign tax</i>	
(g) relevant foreign income subject to a foreign tax	(g) relevant foreign income subject to a foreign tax
(h) foreign chargeable gains subject to a foreign tax	(h) foreign chargeable gains subject to a foreign tax
	(i) income or capital not within another paragraph

Section 809J(6) ITA defines foreign tax for the purpose of the nominated income/gains categories:

In subsection (2) “foreign tax” means any tax chargeable under the law of a territory outside the UK.

The same definition is used for the mixed funds categories and I discuss the definition there.⁵³

12.15.4 *Condition for application of nominated income remittance rules*

Section 809I ITA provides:

- (1) This section applies if—
 - (a) any of an individual’s nominated income and gains is remitted to the UK in a tax year,
 - (b) any of the individual’s remittance basis income and gains has not been remitted to the UK in or before that year, and
 - (c) the £10 test is met for that year.

12.15.5 *The £10 test*

Section 809I ITA provides:

- (5) The £10 test is met for the tax year mentioned in subsection (1)(a) (year X) if, taking each nomination year separately, the cumulative total as respects at least one nomination year exceeds £10.
- (6) In relation to a nomination year—
 - (a) “the cumulative total” means the sum, for all the tax years in aggregate up to and including year X, of the amounts of relevant income and gains remitted to the United Kingdom in those tax years from that nomination year, and
 - (b) “relevant income and gains” means the income and chargeable gains nominated by the individual under section 809C for that nomination year.

This is therefore a de minimis rule.

⁵³ See 12.3 (Ingredients of a mixed fund).

The 2011 remittance consultation paper explains the background:

2.67 Non-domiciles who have been UK resident in at least seven of the past nine tax years are liable to an annual charge of £30,000 if they claim the remittance basis. The rules governing the payment of this charge can be very complicated and result in significant administrative burdens and inconvenience for the taxpayer.

2.68 Those who elect to pay the charge are required to nominate an amount of their overseas income and capital gains which is taxable on the arising basis and is deemed to generate an additional tax charge of £30,000.

2.69 There are complicated rules to ensure that an individual cannot subsequently remit any of the income or capital gains which they have nominated before other overseas income and capital gains which would be taxed in the UK when remitted. This must be in addition to the UK tax to which they are otherwise liable on income and capital gains arising in the UK or remitted to the UK. This nomination ensures that the £30,000 is a tax charge on overseas income and gains rather than a standalone levy.

2.70 Individuals can encounter significant administrative difficulties where they fail to keep their nominated income and capital gains segregated from other income and capital gains. In such situations, an individual might inadvertently remit some of their nominated income and capital gains to the UK. This will mean that they become subject to complicated identification rules which trace the origin of each payment and ensure that the nominated amounts are always the last to be remitted. In the absence of these rules, it would be possible for an individual to reduce significantly the amount of tax they pay on the income or capital gains which they remit to the UK.

2.71 To avoid some of these complexities, it is common for an individual to open an overseas bank account which has the sole purpose of holding funds to generate sufficient income to be nominated for the purposes of the annual charge. Whilst this should allow the individual to avoid the identification rules, the need to set up a special overseas bank account involves additional expenditure and administrative obligations. Moreover, even where an individual has a dedicated bank account for their nomination, it cannot be guaranteed that they would never inadvertently make remittances from the account.

2.72 The Government recognises that this can result in excessive and unhelpful complexity which is hard for the taxpayer to understand. It therefore proposes to amend the legislation to allow individuals to remit

the first £10 of income or capital gains which they nominate free of tax and without becoming subject to the identification rules. This will enable them to nominate up to £10 of their foreign income or capital gains for the purposes of the £30,000 charge without having to ensure they do not subsequently remit any part of that nominated amount to the UK. Many individuals only nominate a small amount of foreign income or capital gains and so this simplification would remove the risk of them inadvertently remitting the nominated income and triggering the identification rules.

2.73 This would significantly reduce the need to maintain an overseas bank account solely for the purposes of nominating income and capital gains, whilst making the nomination rules less administratively onerous.

2.74 The remaining rules applying to nominated income and capital gains will remain unaltered.⁵⁴

The EN accompanying the draft clauses provides:

130. Where [remittance basis taxpayers] remit the foreign income and gains which they have nominated under section 809C before any other unremitted foreign income and gains, the order in which income and gains are remitted is determined by sections 809I and 809J.

131. The amendments made by Part 4 of the Schedule allow such individuals to remit up to £10 each year of their income or gains which they have nominated without having to ensure they do not subsequently remit any part of that nominated amount into the UK.

132. An illustration of how the new rules work is set out below.

133. In year 1, an individual nominates £5 income and gains from that year which they remit to the UK. As the total amount of nominated income and gains remitted is less than £10, they do not meet the £10 test and section 809I does not apply.

134. In year 2, the individual nominates £20 from year 1, of which they remit £7. The amounts of nominated income and gains from year 1 exceeds £10, so section 809I will apply.

The example is somewhat far-fetched, since an individual would either nominate a nominal £1 or £10 or else nominate a substantial amount.

54 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.

12.15.6 *Nominated income remittance rules*

Assuming that the conditions for the application of the nominated income remittance rules are satisfied, we move on to s.809I(2) ITA which provides:

- (2) Income tax and capital gains tax are charged, for that year and subsequent tax years, as if
 - [a] the income and chargeable gains treated under section 809J as remitted to the UK by the individual in that tax year had been so remitted
 - [b] (and income and chargeable gains of the individual that were actually remitted in that year had not been).

So we turn to s.809J ITA, which sets out artificial or fictional remittance rules which I call “**the nominated income remittance rules**”. (It would be more accurate to call this “the nominated income/*gains* remittance rules”, but for convenience I shall where possible refer to income (rather than income/*gains*) and leave gains to be understood.)

Section 809J(1) provides:

809J Section 809I: order of remittances

(1) If section 809I applies, the following steps are to be taken for the purpose of determining the income or gains treated in a tax year (“the relevant tax year”) as remitted to the UK by the individual.

The section sets out six steps. It is easier to follow the steps if one has an example in mind.

Suppose T (a remittance basis taxpayer) has remittance basis income and gains of £10k per annum of each of the nominated income/*gains* categories thus:

Category	Type of income (in short)	Year 1	Year 2
(a)	relevant foreign earnings	£10k	£10k
(b)	foreign specific employment income	£10k	£10k
(c)	relevant foreign income	£10k	£10k
(d)	foreign chargeable gains	£10k	£10k
(e)	foreign taxed relevant foreign earnings	£10k	£10k
(f)	foreign taxed foreign specific employment income	£10k	£10k

(g)	foreign taxed RFI	£10k	£10k
(h)	foreign taxed gains	£10k	£10k

Suppose T has in addition to the above £30k nominated income and gains per annum.

T remits nothing in year 1. In year 2 T remits:

- (a) £1k from T's nominated income/gains.
- (b) £80k from T's remittance basis income/gains.

This brings the nominated income remittance rules into action. (Even if only 1p of the nominated income/gains had been remitted, that would suffice. There is no de minimis rule.⁵⁵)

Step 1

Find the total amount of—

- (a) the individual's nominated income and gains, and*

55 HMRC say they will take this point. March 2009 Qs & As provides:

“Q13: Cross-collateralisation of debts. Many banks are currently setting up dedicated accounts (with capital of say £100) which will earn just sufficient income (say £1) to be used as nominated income for the purposes of the £30,000 charge. However, under their standard terms and conditions, the bank will often have a floating charge over every account the individual has with them as support for any lending. If any of that lending is brought into the UK then there is a concern that the £1 income in the nominated account might be said to be ‘used outside the UK in respect of a relevant debt’ because it is, theoretically at least, capable of being taken in support of the borrowing under the cross-collateralisation. In practice, of course, the £1 in the nominated income account makes no difference one way or the other to the bank’s security. One answer to this, of course, is for the banks to change their standard terms and conditions to exclude the nominated account. However, this is easier said than done and is unlikely in most cases to be done before 6 April 2009. The concern, as you will realise, is that if any nominated income is - as a result of this - deemed to be remitted then this results in re-characterisation under s809I and s809J, spoiling careful account segregation for ever afterwards.

Is there any possibility that we could have some de minimis here so that, say, up to £100 of nominated income would not be treated as remitted in these circumstances?

A: No. Whether or not this is an issue will depend on the terms and conditions attached to the accounts and loans held with the bank or other financial institution. If individuals are concerned about this issue then it would make sense to simply open a separate account with a different financial institution.”

(b) *the individual's remittance basis income and gains, that have been remitted to the UK in the relevant tax year. This amount is "the relevant amount".*

In the example the relevant tax year is year 2. Applying the facts of the example, the relevant amount is £81k.

Step 2

Find the amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C) that is within each of the categories of income and gains in paras (a) to (h) of subsection (2).

If none of sections 809B, 809D and 809E apply to the individual for that year, treat those amounts as nil (and accordingly go to step 6).

"The amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C)" means the remittance basis income/gains. (It appears that the drafter has forgotten to use the term which the drafter has defined (twice) for this purpose; but it does not matter.) The amount in the example is as set out in the table above.

Step 3

Find the earliest paragraph for which the amount determined under step 2 is not nil.

The earliest paragraph is para (a).

If that amount does not exceed the relevant amount, treat the individual as having remitted the income or gains within that paragraph (and for that tax year).

The individual is treated as having remitted £10k relevant foreign earning, category (a) for year 2.

Otherwise, treat the individual as having remitted the relevant proportion of each kind of income or gains within that paragraph (and for that tax year).

"The relevant proportion" is the relevant amount divided by the amount determined under step 2 for that paragraph.

(Had the total remittance been (say) £5k then the relevant proportion would have been $\text{£}5\text{k} \div \text{£}10\text{k} = 50\%$ so the transfer would have been treated as containing £5k employment income category (a) for year (1).)

Step 4

Reduce the relevant amount by the amount taken into account under step 3.

The relevant amount is reduced to £71k.

Step 5

If the relevant amount (as reduced under step 4) is not nil, start again at step 3.

In step 3, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step.

Following this iterative procedure a total of eight times, the transfer is treated as containing:

(a)	relevant foreign earnings	£10k
(b)	foreign specific employment income	£10k
(c)	relevant foreign income	£10k
(d)	foreign chargeable gains	£10k
(e)	foreign taxed RFE	£10k
(f)	foreign taxed SEI	£10k
(g)	foreign taxed RFI	£10k
(h)	foreign taxed gains	<u>£10k</u>
	Total	£80k

The relevant amount is by this stage reduced to £1k. We move to the next step:

Step 6

If the relevant amount (as reduced) is not nil once steps 3 to 5 have been undertaken in relation to all paragraphs of subsection (2) for which the amount determined under step 2 is not nil, start again at step 2.

In step 2, read the reference to the foreign income and gains of the individual for the relevant tax year as a reference to such of the foreign

income and gains of the individual for the appropriate tax year as had not been remitted⁵⁶ by the beginning of the relevant tax year.

“The appropriate tax year” is the latest tax year which is—

- (a) before the last tax year for which step 2 has been undertaken, and*
- (b) a tax year for which section 809B, 809D or 809E applies to the individual.*

Thus we repeat step 2 a last and ninth time, reading “the relevant tax year” to mean year 1. So the remittance of £81k is treated as being:

(a)	relevant foreign earnings	£11k
(b)	foreign specific employment income	£10k
(c)	relevant foreign income	£10k
(d)	foreign chargeable gains	£10k
(e)	foreign taxed RFE	£10k
(f)	foreign taxed SEI	£10k
(g)	foreign taxed RFI	£10k
(h)	foreign taxed gains	£10k
	Total	£81k

March 2009 Qs & As provides:

Q3: HM Revenue & Customs (HMRC) have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of “tainting” every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from

56 Section 809J(5) ITA provides:

In step 6 of subsection (1) the reference to income or gains being remitted is—

- (a) as respects any tax year before section 809I applies, to income or gains being remitted to the UK, and
- (b) as respects any tax year in relation to which that section applies, to income or gains treated under this section as so remitted.

one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?

A: It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the “nominated” account. That might be the entire account number, or the account “name”, or some other unique identifying feature of the account.

March 2009 Qs & As makes an obvious point:

Q6: If I use nominated income or gains to pay the remittance basis charge of £30,000 it would appear that does not trigger the provisions in sections 809I and 809J. Is that right?

A: If £30,000 of the nominated income or gains is brought to the UK to pay the remittance basis charge, it is treated as not remitted to the UK under section 809V. Therefore section 809I does not apply because none of the individual’s nominated income or gains is regarded as having been remitted to the UK in that tax year. If the £30,000 is repaid by HMRC then it is treated as remitted at that point and so section 809I will be triggered.

12.15.7 *Accidental remittance of nominated income/gains*

The RDR Manual provides:

35140 Remittances of nominated income or gains - miscellaneous [June 2010]

If an individual accidentally remits any nominated income or gains to the UK then HMRC will allow them to undo their mistake, by reversing the transfer without unreasonable delay and in any event before the end of the tax year, for example by paying the income or gains back to the original account, so that the ordering rules at s809I and s809J will not apply.

HMRC will only use its discretion in such situations as long as there have been no relevant transactions or other benefits conferred on a relevant person in the interim. Otherwise the s809J ordering rules will apply.

For example, if £20,000 is transferred in error from an overseas bank to a UK bank account and two weeks later the account owner realises the

mistake and immediately transfers that £20,000 directly back to the overseas bank account, HMRC will accept that s809I and s809J do not apply. However if, for example, the £20,000 was spent in the UK and then £20,000 from another UK account was transferred back to the overseas account then s809I and s809J do apply.

12.15.8 *Remittance basis charge and section ITA07/s809V*

The RDR Manual provides:

35140 Remittances of nominated income or gains - miscellaneous
[June 2010]

If taxpayers use nominated income or gains to pay the remittance basis charge of £30,000 it is treated as not remitted to the UK under ITA07/s809V (see RDRM34020 Remittance basis charge – money paid directly to HMRC). Therefore the “ordering rules” at ITA07/s809I and s809J do not apply because none of the individual’s nominated income or gains is regarded as having been remitted to the UK in that tax year. If the £30,000 is repaid by HMRC then it is treated as remitted at that point and so s809I is triggered.

12.15.9 *HMRC example*

The RDR Manual provides:

35150 Remittances of nominated income or gains [July 2010]
Example 1 (Alexandria)

	Foreign gains	Jersey RFI	Jersey RFE	Nomination
	Para (d)	Para (c)	Para(a)	(from Jersey RFI)
2010-11	£250,000	£75,000	£200,000	£75,000 RFI
2011-12	£300,000	£80,000	£120,000	£75,000 RFI ⁵⁷
2012-13	Nil	£75,000	£280,000	£75,000 RFI
2013-14	£130,000	£80,000	£150,000	£75,000 RFI
Totals	<u>£680,000</u>	<u>£310,000</u>	<u>£750,000</u>	

In 2013-14 A actually and identifiably remits
£30,000 Jersey relevant foreign income that she nominated in 2010-11,
£140,000 foreign chargeable gains from 2011-12 and
£50,000 relevant foreign earnings from 2013-14.

57 The author ignores the complication that the rate of income tax has risen to 50%.

The ordering rules are triggered. The “relevant year” is 2013-14

Step 1 Identify nominated income and gains remitted in the relevant year	£30,000	Relevant Amount	£220,000
Identify the remittance basis income and gains remitted in the relevant year	£190,000		

Step 2

Find the total amount of the individual’s foreign income and gains (excluding those nominated) for the relevant tax year	Para (a) Relevant foreign earnings (not subject to a foreign tax)	£150,000
	Para (c) Relevant foreign income (not subject to a foreign tax)	£5,000
	Para (d) Foreign chargeable gains (not subject to a foreign tax)	£130,000

Step 3 Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil.	Para (a)	£150,000
--	-----------------	----------

Step 4 Where the relevant amount is greater than the amount identified above the relevant amount is reduced by the amount identified	£220k less £150k = £70,000
---	-------------------------------

Step 5 If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

Step 3 repeated	Para (c)	£5,000
Step 4 repeated	Relevant Amount reduced to:	£65,000

Step 5 In the order of preference listed above repeat Steps 3 and 4.

Step 3 repeated	Para (d)	£130,000
------------------------	-----------------	----------

Step 4 If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain.

So A will be taxed on £220,000 of remittances as if she had actually remitted the following

		2010-11	2011-12	2012-13	2013-14
Foreign chargeable gains	Accruing in year	£250,000	£300,000	Nil	£130,000
	Actually remitted	£Nil	£140,000	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£65,000
Relevant foreign income	Arising in year	£75,000	£75,000	£75,000	£75,000
	Actually remitted	£30,000	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£Nil
Nominated					

Relevant foreign income Not nominated	Arising in year	£Nil	£5,000	£Nil	£5,000
	Actually remitted	£Nil	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£5,000
Relevant foreign earnings	Accruing in year	£200,000	£120,000	£280,000	£150,000
	Actually remitted	£Nil	£Nil	£Nil	£50,000
	Treated as remitted	£Nil	£Nil	£Nil	£150,000

If in future years she actually remits any of these monies, the ordering rules will treat her as having remitted something else instead (refer to RDRM35160 - example 1 continuation).

35160 Remittance of “nominated” income or gains [July 2010]

Example 1 - Continued

Moving forward, in 2014-15 A has relevant foreign earnings of £80,000, but no other foreign income or gains. She decides not to use the remittance basis in that year.

In 2014-15 A actually brings into the UK;

£5,000 Jersey relevant foreign income that she did not nominate in 2013-14 (note 1)

£80,000 relevant foreign earnings from 2013-14 and

£80,000 relevant foreign earnings from 2014-15

Although A is not using the remittance basis in 2014-15, the ordering rules at s809J ITA 2007 are still required to determine what she is to be taxed as having remitted in that year. The relevant year is 2014-15.

Ordering rules at 2014-15

Step 1 Identify nominated income and gains remitted in the relevant year (2014-15)	£nil	Relevant Amount	£85,000
Identify the remittance basis income and gains remitted in the relevant year	£85,000	(see note 2)	

Step 2 Find the total amount of the individual’s foreign income and gains (excluding those nominated) for the relevant tax year If the remittance basis was not used in that year (that is sections 809B, 809D or 809E did not apply), treat those amounts as nil and go to step 6

Step 6

If the relevant amount is not nil, start again at step 2. Take the reference to “relevant year” to be a reference to foreign income of gains of the individual for the earliest ‘appropriate year’ previous to the lat tax year from which Step 2 was undertaken.

Step 2 Find the total amount of the individual’s foreign income and gains chargeable gains (not (excluding those nominated) for subject to a foreign tax) the appropriate tax year (2013-14) (see note 3)	Para (d) Foreign	£65,000
--	-------------------------	---------

Step 3 Identify the earliest of paragraphs (a) to (h) above for which	Para (d)	£65,000
--	-----------------	---------

the amount determined in Step 2 is not nil.

Step 4 Where the relevant amount is greater than the amount identified reduced to: above the relevant amount is reduced by the amount identified

Relevant Amount	£85k less £65k
	= £20,000

Step 5 If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

Step 6
If the relevant amount is not nil after Steps 3-5 have been completed for the year, start again at step 2. Take the reference to 'relevant year' to be a reference to foreign income of gains of the individual for the earliest 'appropriate year' previous to the lat tax year from which Step 2 was undertaken.

Step 2 Find the total amount of the individual's foreign income and gains (excluding those nominated) for the appropriate tax year (2012-13)	Para (a) Relevant foreign earnings (not subject to a foreign tax)	£280,000
---	--	----------

Step 3 Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil	Para (a)	£280,000
---	-----------------	----------

Step 4 If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain
So in 2014-15 A is treated as having remitted
£20,000 relevant foreign earnings
£65,000 foreign chargeable gains.

NB – The £80,000 relevant foreign earnings from 2014-15 that she brings in will be taxed on the arising basis in that year.

Note 1 In 2013-14 A has £80,000 of Jersey relevant foreign income, of which £75,000 were nominated; if this £80,000 were all in the one single account, and there was nothing else in the account then, under the principle of this section the first £5,000 remitted in 2014-15 is accepted as being “not-nominated” income.

In this example it is of little practical difference because the s809J ordering rules have already been “triggered” in 2013-14 by her remittance of nominated income (from 2010-11).

But if the ordering rules had not already been triggered, then because, this £5,000 Jersey relevant foreign income in 2014-15 can be accepted as being “un-nominated” income first and foremost, so A’s remittance of this £5,000 would not, of itself, have triggered the s809J ordering rules in this year.

Note 2 A’s remittance basis income and gains are her total foreign income or chargeable gains for all tax years up to the “relevant tax year (2014-15) in which she used the remittance basis under section 809B, section 809D or section 809E. It therefore excludes her relevant foreign earnings from 2014-15 because she is not using the remittance basis in that year.

Note 3 the 'foreign income and gains 'for' the appropriate year exclude any:

- 'nominated' income or gains, or

- income or gains that were actually remitted to the UK before the beginning of the appropriate tax year or
- income or gains that were treated as remitted to the UK previously under section 809J before the beginning of the appropriate tax year.

In A’s case, the £5,000 Jersey relevant foreign income from 2013-14, and the £80,000 relevant foreign earnings from 2013-14 that she actually remitted in 2014-15 were treated as having been remitted in 2013-14 by the ordering rules (refer to the earlier part of example 1 RDRM35150).

Summary

		2010-11	2011-12	2012-13	2013-14	2014-15
Foreign chargeable gains	Accruing in year	£250,000	£300,000	£Nil	£130,000	£Nil
	Actually brought to UK	£Nil	£140,000	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£130,000	£Nil
Relevant foreign income Nominated	Arising in year	£75,000	£75,000	£75,000	£75,000	£Nil
	Actually brought to UK	£30,000	£Nil	£Nil	£Nil	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£Nil	£Nil
Relevant foreign income Not nominated	Arising in year	£Nil	£5,000	£Nil	£5,000	£Nil
	Actually brought to UK	£Nil	£Nil	£Nil	£5,000	£Nil
	Treated as remitted	£Nil	£Nil	£Nil	£5,000	£Nil
Relevant foreign earnings	Arising in year	£200,000	£120,000	£280,000	£150,000	£80,000
	Actually brought to UK	£Nil	£Nil	£Nil	£130,000	£80,000
	Treated as remitted	£Nil	£Nil	£20,000	£150,000	£Nil

12.16 Nominated income: commentary

In short, the effect of the nominated income remittance rule is that remittances are treated as being made in the nominated income/gains priority order, taking more recent years before earlier years (regardless of the actual remittances). As in the case of the “steps” of the mixed fund rules, one is tempted to ask: why didn’t the statute simply say so?

But the drafting is the least of the problems of the nominated income remittance rule. The author of the EN anticipates criticism that this is administratively difficult and offers some tax planning advice:

- 14...The rules dealing with this in sections 809I and 809J will require additional records to be maintained from 6 April 2008 or the first year of residence in the UK, if later.
15. The record keeping necessary for sections 809I and 809J can be avoided if individuals ensure that “nominated” income or gains upon

which the RBC is paid are not remitted to the UK, or only remitted after the remittance of all other unremitted income and gains since the first year of residence from April 2008. If an individual is confident they will never need to remit that “nominated” income or gains, paying the RBC will not involve any extra complexity or record keeping.⁵⁸

Even if this advice were correct it would not help the majority of remittance basis taxpayers, but they should not complain about administrative complexity: they are responsible for the problem, which they brought on themselves by making a claim for the remittance basis:

16. As mentioned earlier, those eligible can choose whether or not to claim the remittance basis for each particular year, depending on whether it is to their advantage to do so.

But even the administrative inconvenience is not the serious problem of the rule. The effect of the rule is that if the individual remits a penny of their nominated income/gains, one disregards entirely the actual remittances and charges on the basis of the fictional rules. Thus an individual who actually remits gains is taxed as if they remitted income (as long as they also remits a penny of nominated income). It is therefore in principle desirable to take care not to remit any nominated income/gains.

58 The last sentence is not correct. It is not enough that an individual is “confident that they will never need to remit that nominated income or gains”. The individual must be able to demonstrate to HMRC that they have not remitted, and that requires record keeping.

CHAPTER THIRTEEN

EMPLOYMENT INCOME

13.1 Employment income – Introduction

The taxation of employment income is mainly governed by ITEPA 2003. Though now dwarfed by the CTAs 2009 and 2010, ITEPA was for its day a mammoth Act: the table of contents is 36 pages long. More than a dozen volumes would be required for a full discussion. This chapter focuses on matters closest to the themes of this work, but the subject can only be understood in the context of the UK provisions as a whole, so I begin with a general outline.

I do not discuss employment-related securities or the rules for employment income provided through third parties (disguised remuneration) though I hope to do so in a future edition.

13.1.1 *Cross references*

The following topics are considered elsewhere:

42.5 (Employment-related loans).

45.1 (National insurance contributions).

70.10 (Home owned by company: benefit in kind charge),

70.37 (Chattels held by companies)

PAYE is considered in the next chapter.

13.2 Terminology

We begin with some definitions.

13.2.1 *“Employer”, “employee” and “employment”*

Section 4 ITEPA provides relatively commonsense definitions of these

terms.

Section 5 ITEPA extends the concept of “employment” to include offices (because directors need not as a matter of employment law be employees):

- (1) The provisions of the employment income Parts that are expressed to apply to employments apply equally to offices, unless otherwise indicated.
- (2) In those provisions as they apply to an office—
 - (a) references to being employed are to being the holder of the office;
 - (b) “employee” means the office-holder;
 - (c) “employer” means the person under whom the office-holder holds office.

13.2.2 “*Employment income*” “*general earnings*” “*specific employment income*”

“Employment income” is the general category which is divided into two subcategories:

- (1) general earnings
- (2) specific employment income.

“General earnings” and “specific employment income” are opaque technical terms. Section 7 ITEPA provides referential definitions:

- (1) This section gives the meaning for the purposes of the Tax Acts of “employment income”, “general earnings” and “specific employment income”.
- (2) “Employment income” means—
 - (a) earnings within Chapter 1 of Part 3,
 - (b) any amount treated as earnings (see subsection (5))¹, or
 - (c) any amount which counts as employment income (see

1 Section 7(5) ITEPA provides:

“Subsection (2)(b) or (3)(b) refers to any amount treated as earnings under—

- (a) Chapters 7 to 9 of this Part (agency workers, workers under arrangements made by intermediaries, and workers providing services through managed service companies),
- (b) Chapters 2 to 11 of Part 3 (the benefits code),
- (c) Chapter 12 of Part 3 (payments treated as earnings), or
- (d) section 262 of CAA 2001 (balancing charges to be given effect by treating them as earnings).”

subsection (6)).²

(3) “General earnings” means—

(a) earnings within Chapter 1 of Part 3, or

(b) any amount treated as earnings (see subsection (5)),

excluding in each case any exempt income.

(4) “Specific employment income” means any amount which counts as employment income (see subsection (6)), excluding any exempt income.

Specific employment income includes payments on termination of employment and employment-related securities. These topics are not discussed in this work so it is not necessary to consider the terms in detail.

13.3 The charge to tax on employment income

One would expect ITEPA to begin with a provision saying that income tax is charged on employment income. In fact this is implied rather than expressed: s.6 ITEPA provides:

Nature of charge to tax on employment income

(1) The charge to tax on employment income under this Part is a charge to tax on—

(a) general earnings, and

(b) specific employment income.

Still, the imposition of the charge is clear enough. Section 6 continues:

(2) The amount of general earnings or specific employment income which is charged to tax in a particular tax year is set out in section 9.

Thus ITEPA draws a distinction between what is charged (employment income) and the amount which is charged. This is familiar from other types of income.

² Section 7(6) ITEPA provides:

“Subsection (2)(c) or (4) refers to any amount which counts as employment income by virtue of—

(a) Part 6 (income which is not earnings or share-related),

(b) Part 7 (income and exemptions relating to securities and securities options), or

(c) any other enactment.”

13.4 Amount charged to tax (taxable earnings)

So we turn to s.9 ITEPA which provides:

- (1) The amount of employment income which is charged to tax under this Part for a particular tax year is as follows.
- (2) In the case of general earnings, the amount charged is the net taxable earnings from an employment in the year.

“Net” taxable earnings brings in rules relating to deductions, not discussed here. “Taxable” earnings is a label which brings in a large number of rules, for in the various situations where the statute desires to bring earnings into charge in a year it provides that they are “taxable” earnings from the employment in that year.

Section 9 continues:

- (3) That amount is calculated under section 11 by reference to any taxable earnings from the employment in the year (see section 10(2)).
- ...
- (6) Accordingly, no amount of employment income is charged to tax under this Part for a particular tax year unless—
 - (a) in the case of general earnings, they are taxable earnings from an employment in that year, ...

Section 9(3) is just a signpost provision; and s.9(6) expresses what would obviously be the case.

13.5 Taxable earnings

Section 10 ITEPA provides the starting point of the definition:

- (1) This section explains what is meant by “taxable earnings” and “taxable specific income” in the employment income Parts.
- (2) “Taxable earnings” from an employment in a tax year are to be determined in accordance with Chapters 4 and 5 of this Part.

So we move on to chapters 4 and 5 part 2 ITEPA. The pace is leisurely. Bypassing two more signpost provisions (ss.14 and 20 ITEPA) we find three sections that identify amounts of taxable earnings: ss.15, 26 and 27 ITEPA.

13.5.1 Summary

The taxation of general earnings can be summarised in this table:

UK Resident	Ord Resident	UK Domicile	Taxable earnings	<i>Prev</i> ³		Part 2 Chap
				ITEPA Section	ITEPA Section	
Yes	Yes	Yes	All earnings: AB	15	15	4
Yes	Yes	No	(1) Overseas earnings: RB	22(2)	22	5
			(2) UK earnings: AB	22(7)→15	21	
Yes	No	n/r	(1) UK duties: AB	26(2)	25	5
			(2) non-UK duties: RB	26(6)→15	26	
No	n/r	n/r	(1) UK duties: AB	27	27	5
			(2) non-UK duties: tax free	—	—	

Key

AB: Arising basis

RB: Remittance basis

13.6 Earnings “for” a year, “from the employment in a year” and “received in a year”

ITEPA uses three distinct expressions:

- (1) it refers to *earnings “for” a tax year*.
- (2) it refers to *earnings from the employment in a tax year*.
- (3) it refers to *earnings received in a tax year*.

13.7 Earnings “for” a tax year

It is clumsy to refer to the year which earnings are “for” so the statute resorts to quotation marks to help the reader grasp the meaning. I adopt that usage here as any paraphrase is even more confusing, but sometimes expressions such as earnings “attributed to a year” or “relating to a year” or “earned in a year” are used.

The concept (however expressed) is fundamental as the taxability of earnings depends on the employee’s residence and domicile in the year which the earnings are “for”.

The concept is (slightly) elucidated in s.16 ITEPA:

- (1) This section applies for determining whether general earnings are

3 For reasons which were never made clear, the numbers were reshuffled in 2008.

general earnings “for” a particular tax year for the purposes of this Chapter.

(2) General earnings that are earned in, or otherwise in respect of, a particular period are to be regarded as general earnings for that period.

(3) If that period consists of the whole or part of a single tax year, the earnings are to be regarded as general earnings “for” that tax year.

(4) If that period consists of the whole or parts of two or more tax years, the part of the earnings that is to be regarded as general earnings “for” each of those tax years is to be determined on a just and reasonable apportionment.

(5) This section does not apply to any amount which is required by a provision of Part 3 to be treated as earnings for a particular tax year.⁴

Since this section only applies for the purposes of chapter 4, it has to be repeated verbatim in s.29 ITEPA for chapter 5. (If there had been an ITEPA-wide definition the duplication would not have been necessary.)

This is only intended to set out the general meaning that would have applied in the absence of a definition. EN ITEPA Note 6 provides:

Sections 16 and 29 of the Act therefore spell out that general earnings are “for” a particular period consisting of the whole or part of a tax year if they are general earnings earned in or otherwise in respect of that period. It is thought that this reflects the meaning that a court would give to “for” if the point ever arose.

The EI Manual provides:

40008. The year that earnings are “for” [January 2010]

...

This question has no relevance when deciding the tax year in which the tax charge arises. Earnings are assessed to tax in the tax year in which they are “received”. The definition of “received” is set out in Section 18 (see EIM42200).

Why is it important to know the tax year that earnings are “for”?

Section 16 establishes the year that earnings are “for”. Once this has been done, the next step is to decide which of the rules in Part 2 Chapters 4 and 5 apply to calculate taxable earnings.

For the majority of UK Resident and Ordinarily Resident (R/OR) and domiciled employees, the question of the year earnings are “for” has little consequence. This is because all of their earnings are chargeable to UK income tax in consequence of their

4 This is a reference to s.72(2) ITEPA; see too s.222(2) ITEPA and 223(4) ITEPA for definitions in specialist circumstances.

residence and domicile status. In addition, most earn and receive their earnings in the same tax year. However, for those employees who are other than R/OR and UK domiciled and who receive earnings in different years from those in which they earn them, the question continues to be relevant.

Principles from case law

The absence of statutory provision in ICTA 1988 and earlier enactments resulted in various cases being litigated through the 20th century.

- *Edwards v Roberts* (19 TC 618)
- *Hunter v Dewhurst*, (*Henry v Foster*) (16 TC 605)
- *Draycup v Radcliffe* (27 TC 188)
- *Heasman v Jordan* (35 TC 518)
- *Board of Inland Revenue v Suite* (Privy Council) ([1986] 2 All ER 577)
- *Griffin v Standish* (67 TC 317)
- *Bray v Best* (61 TC 705)

Before 1989, the year that earnings were "for" also dictated the year in which income tax was assessed. "Receipts basis" replaced "earnings basis" in 1989.

The case of *Bray v Best* (61 TC 705), was heard by the House of Lords in 1988. Lord Oliver set out the preferred approach at page 752:

"The period to which any given payment is attributed is a question to be determined as one of fact in each case, depending upon all of the circumstances, including its source and the intention of the payer so far as it can be gathered either from direct evidence or from the surrounding circumstances."

Lord Oliver's approach to determining the year that earnings are "for" continues to apply. Section 16 simply confirms the recommended approach.

40009. The year that earnings are "for" - arrangement of guidance [March 2009]

In 2007 and 2008, HMRC consulted with professional advisers with particular expertise regarding the treatment of foreign nationals coming to work in the UK and UK residents leaving the UK to work abroad. Many of the advisers' clients have complex remuneration packages. Some are members of Long Term Incentive Plans or participants in other deferred remuneration schemes. The aim of the exercise was to establish principles for determining the tax year that earnings, delivered by these arrangements, are "for".

The guidelines set out on the following pages were adopted by HMRC with effect from 28 February 2008. They are intended to be comprehensive but do not claim to cover every plan and set of circumstances that will arise.

... The guidance sets out general principles and indicates the views HMRC is likely to take in specified circumstances. It is intended to aid and inform fact finding and decision making. It is not a substitute for obtaining all of the relevant information and exercising good judgment by applying the principles to the facts. This is not an easy task as you may be required to balance one set of conditions against others. (This text has been withheld because of exemptions in the Freedom of Information Act 2000)

Transitional arrangements

HMRC published the following statement on 18 September 2008:

"For the avoidance of doubt HMRC was able to confirm that where Tax Returns were submitted prior to 18 October 2007 on the basis of the established HMRC position (which regarded conditionality as the determinant factor over any specific performance period) they will not seek to challenge the Returns on that point. Furthermore, if after 18 October 2007 any individual submitted a Tax Return for

2006/7 (or earlier) in accordance with the HMRC guidance given on 18 October 2007 HMRC will not seek to challenge the Return on this point, but if the individual wishes to change the basis and adopt the position clarified on 28 February 2008 HMRC would not object to a taxpayer amendment provided that this is made within the available window."

40011. The year that earnings are "for" - the approach to take [March 2009]

Lord Oliver's approach set out in *Bray v Best* (61 TC 705) at page 752 should be observed when determining the year that earnings are "for":

"The period to which any given payment is attributed is a question to be determined as one of fact in each case, depending upon all of the circumstances, including its source and the intention of the payer so far as it can be gathered either from direct evidence or from the surrounding circumstances".

Finding out the facts

An essential starting point is to obtain contemporaneous evidence. This may include all or any of the following:

- An understanding of the intention of the employer in developing the incentive programmes
- Bonus plans
- Award letters
- Notes of meetings
- Correspondence between the parties
- Obtain an analysis of amounts paid out
- An explanation of how awards are treated in the employer-company accounts

These documents may indicate the understanding of the parties regarding the performance period that awards are intended to be "for". The intention of the employer as disclosed to the employee and the understanding of the employee are particularly significant.

Unsubstantiated recollections of the employee regarding intention should be considered but given less weight than contemporaneous documented statements.

If Plan documents and contemporaneous information do not provide clarity, it is reasonable to make inferences from available evidence.

You may ask the Large Business Team or CRM dealing with the Corporation Tax affairs of the employer company how the bonus awards have been treated in the employer company accounts. The company may claim a deduction for a single year or may create provisions to spread the deduction over a longer period. This may indicate the period the employer considers the award to be "for". The accounting treatment is not conclusive, but it is significant. In the absence of clear statements in the Plan documents the accounting treatment may be evidence of the employer's understanding of what the scheme was intended to achieve.

Lump sums may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

40012. The year that earnings are "for" - annual bonuses awarded for meeting corporate, team or personal targets [December 2011]

Many employers operate annual bonus schemes for their employees. There are usually performance criteria. These may require employees to meet corporate, team or individual targets.

Bonuses may be paid out by the employer or through a trust - usually an employee benefit trust (EBT). The identity of the payer is not relevant when determining the year that the award is "for". However, see the guidance below on "discretion".

In some schemes, particularly those referenced to company performance, employees may accrue entitlement to receive bonuses as the performance period passes. In others, entitlement is conditional on remaining in employment until a specified date (see below). The performance period and therefore the period that the bonus is "for" may be set out in the scheme documents.

If the performance period spans more than one tax year, Section 16(4) ITEPA 2003 applies. The bonus should be apportioned to the relevant tax years on the basis of a just and reasonable apportionment.

Section 16 attributes general earnings to one or more tax years. You should not accept that awards can be "for" a shorter period, even a day, to which the rules in Part 2 Chapters 4 and 5 can be applied. Employers may spontaneously award "spot-bonuses" to all employees in post on a particular date, or entitlement to a performance bonus may crystallise when a particular performance factor is satisfied. Even though these events make take place on a particular day, the resultant awards should be treated as general earnings "for" the tax year in which the event occurred.

Unless there is evidence to the contrary, HMRC takes the view that performance bonuses are "for" the performance period. This may be a calendar year or the company accounting period. In the case of specific projects, it may be the period beginning on the date when work started and ending when the specified outcomes were achieved.

Impact of Extra Statutory Concession A11 (ESC A11)

ESC A11 is a non-statutory concession that permits tax years to be split. It is usually relevant to years in which individuals arrive in or depart from the UK. In consequence of arrival or departure, there are discrete periods of non-residence (NR) and ordinary residence (OR) for tax purposes. If the conditions are satisfied, the tax year is split and each part treated as a separate tax year.

Where entitlement to spot bonuses or conditional bonuses arises on a single day the advice set out above indicates that the award is to be treated as earnings "for" the year in which that day falls. In ESC A11 cases this will be that part of the split year in which the relevant day falls.

Evidence suggests spot bonuses and similar payments are relatively unusual and will be seen infrequently. If you suspect that the timing of entitlement has been manipulated to gain a tax advantage from the use of ESC A11, HMRC may decide to set aside the Concession and treat the individual as resident in the UK for the whole tax year.

40013. The year that earnings are "for" - bonuses and deferred remuneration plans - the effect of conditionality and employer's discretion [March 2009]

Conditionality

Many bonus schemes are referenced to performance periods, but awards will not be paid unless employees are in employment on the date of payment. For example, a bonus is referenced to company profits for year ended 31 December but is not paid until the following 30 June. Employees who worked for the employer during the performance year forfeit their entitlement if they leave employment before 30 June.

Up to 28 February 2008, HMRC took the view that the bonus award could only be "for" the year in which unfettered entitlement to receive it arose. The year that the bonus was "for" was the year in which the employment condition was satisfied. Since 28 February

2008, HMRC has adopted the principles set out in EIM40008 and subsequent pages.

Good and bad leavers

Many of the plans with employment conditions identify "good" and "bad" leavers and prescribe different treatments for the two categories. "Good leavers" are employees who cease employment before the bonus payment date through retirement, redundancy or ill-health. "Bad leavers" are those who are dismissed for cause or resign to join a competitor.

It is possible to take various views on the year that such bonus awards are "for" where there is an employment condition:

- The performance period
- The performance period plus the period from the end of the performance period to the date of payment, sometimes referred to as the "vesting period"
- The year in which the date of payment falls

Your decision should take account of what the bonus scheme is intended to achieve. If this is not clear from the documents, you may base judgments on how the employer treats good and bad leavers.

Plans that:

- are designed to provide incentives to employees for performance periods, but,
- do not pay out unless the participants are still in employment at the specified date, but,
- do not specify any additional performance conditions in the period beginning after the original performance period and ending on the payment date,

are likely to pay out awards that are "for" the original performance period. However, if the Plan introduces additional performance conditions for the second period the period that the award is "for" is likely to be the aggregate of both periods.

If "good leavers" are entitled to receive awards; that may indicate that the awards are "for" the original performance period. Entitlement to pro-rated awards may indicate that entitlement is "for" the performance and the vesting periods.

Some schemes provide for deferred bonuses to be paid out when ownership of the company changes hands. This may be an indicator that the bonus is earned by that date and is "for" the relevant performance period.

Even though these contingencies may not occur for all or any of the plan participants, their existence may shed light on the period the bonus is intended to be "for".

It is sometimes argued that the employment condition is never just about being in employment on the specified date; that the intention of the employer in introducing this condition is to obtain satisfactory performance in the period ending on the date of payment. This may well be the case. If evidence can be found to support the contention you should accept that the period the awards from the Plan are "for" is the combined performance and vesting periods.

Employers' discretion

Some bonus schemes give the employer absolute discretion to award or refuse to award bonuses. The discretion may lie with the trustees if an Employee Benefit Trust (EBT) pays out the awards. The Courts have held that, whatever the Plan says, an employer's discretion in awarding or withholding a bonus is not unfettered. However wide the discretion appears to be, the employer is required to exercise his discretion rationally and in good faith, and not irrationally or perversely.

There may be a pattern of awards that may indicate the year the awards are "for". Employees may also have an understanding of how the bonus scheme works, and the

period awards are referenced to, while accepting the employer's discretion.

A discretionary bonus may therefore be "for" the performance period, the combined performance and "vesting" period or the year in which discretion is exercised and payment is made. It is important to consider all of the relevant information.

40014. The year that earnings are "for" - Long Term Incentive Plans and Deferred Remuneration [March 2009]

Various schemes exist to reward and provide incentives to employees. Not all intended outcomes will be the same. The intention of the employer and the intended behavioural effect will influence the design of the scheme. For example, plans may be intended to:

- Tie-in valued employees and create a disincentive for leaving and moving to a competitor, or,
- Motivate and reward outstanding performance by aligning the interests of employees with those of the shareholders

Schemes intended to aid retention may include the following features:

- Bonuses are paid after 3 – 5 years of satisfactory employment
- The employer has discretion to award or deny bonuses for good or bad leavers
- Part bonuses are paid year on year with other entitlement remaining in the Plan
- Part entitlement to bonuses "vests" each year, but is not paid until a later year

Schemes intended to motivate and reward outstanding performance may include:

- Employment targets linked to growth in the company's:
 - share price
 - turnover
 - net profits
 - expansion of certain markets
 - market share
- Granting employees real stocks and shares or "phantom" shares in the company. (In the phantom schemes, no stocks or shares are assigned to the employees. Bonus entitlement is calculated by reference to a notional share portfolio.)

Payments may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

Awards from both types of schemes are likely to be "for" the whole performance or reference period. If this is greater than one tax year then the final award should be apportioned over the tax years falling into the performance period on a reasonable basis.

40015. The year that awards from Long Term Incentive Plans and other deferred remuneration arrangements are "for" [March 2009]

Entry to Long Term Incentive Plans (LTIPs)

If employees perform exceptionally well, they may be invited to participate in an LTIP. LTIPs run for pre-determined period that can be as long as 10 years. This process may repeat year after year so that employees are simultaneously members of several Plans. In any particular year they may receive part awards from some and entire awards from others.

The initial investment is often funded by part of the participant's bonus for the previous year. The employee may be obliged to defer all or part of the previous year's bonus or may do so voluntarily. Plans may require a mixture of the two. The initial contribution may be guaranteed, in the sense that it cannot be lost, and/or it may have the potential to

increase and decrease dependant on what the Plan tracks, for example, share price or company turn-over.

Other plans, particularly phantom share schemes, may simply award notional stock without any requirement for deferral from an earlier bonus.

In addition to the anticipated growth in the share price that adds value to the participants' awards, employers may make additional awards of stock to increase the value of the notional portfolio. These "matching awards" may be granted throughout the life of the scheme at times specified in the plan document.

Deferred bonuses and matching awards

Employers may defer the payment of bonuses and make eventual payment subject to conditions. For example, the employer awards a bonus of £100,000 referenced to a performance period. £75,000 is paid in cash immediately following the bonus year; £25,000 is to be paid three years later in cash or shares, if the employee has not resigned or been dismissed before the vesting date. Such a deferral may be imposed by the employer, or it may be entered into voluntarily by the employee. To develop the example, the £25,000 deferral may be required by the employer but the employee has the choice of voluntarily deferring a further £25,000. In both scenarios, the employer may offer an enhancement or matching award. The matching award may be delivered in the form of shares or cash. The matching award may be added to the LTIP at the beginning of the period. Additional matching awards may be added at specified dates during the deferral or vesting period.

What year are LTIP awards "for"?

It is important to consider all of the relevant facts. The deferred bonus may be "for" the original bonus year, or for the whole deferral period. If there is particular emphasis on the employee remaining in service at a future date, it may be for the tax year in which that condition is met. However, this feature is unlikely to exist in isolation as the employer wants to motivate the employee to perform well while remaining in employment. In order to determine the period that the deferred bonus is "for", it is necessary to consider all of the relevant information and weigh the emphasis given to each factor.

In general terms, simple deferred bonuses will remain earnings for the original bonus period, and growth or matching awards will be "for" the deferral period. In more sophisticated schemes where the deferred bonus is "awarded" and "vests" after the bonus year, and especially where there are further performance conditions relating to this period, the deferred bonus may be earnings for the period between award and vest.

There may also be circumstances where "growth" in the value of the fund is treated as being "for" the performance period of the original deferred bonus. This view is likely where no additional performance criteria are imposed during the deferral period or, if there are, the conditions are the same as for the deferred bonus.

If the conditions are significantly different, e.g. the matching awards are conditional upon new performance criteria, the "growth" or matching awards are likely to be "for" the deferral or vesting period itself.

If the conditions of the matching award are referenced solely to the employee remaining in employment on the vesting or payment date in order to receive payment, the matching award is likely to be earnings for the tax year in which entitlement to receive the award matures.

Enhancements or matching awards may be paid out of LTIPs at the same time as deferred bonuses. Awards may be aggregated amounts that are "for" different periods. It is

important to understand how sums are calculated and whether different performance periods should be considered.

40016. The year that earnings are "for" - Long Term Incentive Plans and Deferred Remuneration – staged vesting [March 2009]

Some Long Term Incentive Plans (LTIPs) pay out awards in tranches. The details of different schemes will vary. For example, an LTIP fund containing deferred bonuses and matching awards may pay out 20% per annum over five years or nothing in Years 1 and 2 and 33% per annum in Years 3 to 5. Entitlement may be conditional upon participants meeting performance conditions and remaining in employment.

The period that each tranche is "for" has to be determined. If the evidence shows that the Plan is intended to reward performance over the period from award to vest, each part of the final payment is "for" the period from the original award date until it vests, calculated as per Section 16(4) on a just and reasonable apportionment. In the first example, 20% is "for" Year 1; 20% is "for" Years 1 and 2, and so on. Alternatively, if there are no performance conditions and the Plan emphasises being in employment at each vesting date, each payment may be treated as earnings "for" the tax year of receipt.

13.7.1 *"Earnings from the employment in a year"*

This expression is defined in s.15(2), 22(2) and 26(2) ITEPA, which are discussed below. It is important to note that earnings which are "for" one year may be taxable earnings from the employment in a different year.

13.8 Pre-commencement and post-cessation earnings

There are special rules to deal with pre-commencement and post-cessation receipts. These apply where:

- (1) earnings are received after an employment has ended or before it began and
- (2) the earnings are not attributable to any year in which the employment was held.

Section 17 ITEPA provides:

- (1) This section applies for the purposes of this Chapter in a case where general earnings from an employment would otherwise fall to be regarded as general earnings for a tax year in which the employee does not hold the employment.
- (2) If that year falls before the first tax year in which the employment is held, the earnings are to be treated as general earnings for that first tax year.
- (3) If that year falls after the last tax year in which the employment was held, the earnings are to be treated as general earnings for that last tax year.

year.

(4) This section does not apply in connection with determining the year for which amounts are to be treated as earnings under Chapters 2 to 11 of Part 3 (the benefits code).

Since this section only applies for the purposes of chapter 4, it has to be repeated verbatim in s.30 ITEPA for chapter 5.

The EI Manual provides:

40005. Special rules for determining the year that general earnings are "for": Pre-commencement and post-cessation earnings

... [February 2006]

It is unlikely the rules will often apply in practice because general earnings can normally be attributed to periods in which the job is held.

40006. Effect of non-residence on pre-commencement and post-cessation earnings [January 2009]

Where the special rules in EIM40005 apply general earnings will be taxable when received if the charging provisions in Sections 15 or 27 apply (or Sections 21 and 25 before 6 April 2008) in the last or first year the taxpayer held the job. The same is true if the taxpayer left the job at the time of going abroad.

Extra-Statutory Concession A11 (ESC A11) (see EIM42850), which provides split year treatment, cannot be used to take out of charge earnings which in substance relate to service in the UK. The same principle applies where the taxpayer takes up a new job on becoming resident in the UK.

In some cases however the taxpayer may leave the job after ceasing to be resident in the UK. Equally the job might start before the taxpayer arrives in this country. In these circumstances it may be reasonable to split the post-cessation or pre-commencement payment between the part of the year when the taxpayer falls within the relevant charging provision and the rest of the year. But this split should not necessarily be made on a time basis. For example, the post-cessation receipt may be primarily attributable to the taxpayer's service in the UK. If it is, a split that reflects the facts should be agreed.

If the taxpayer is unable to agree, the alternative is that the earnings are taxable on the strict statutory basis, that is, without the benefit of ESC A11. The entire sum will be taxable under Section 15 or 21 because the taxpayer is resident and ordinarily resident for the whole tax year.

40007. Effect of non-residence on pre-commencement and post-cessation earnings: Examples [January 2010]

This page provides examples of how the above sections apply. ...

The first example concerns pre-commencement earnings of an employee who is resident, ordinarily resident and domiciled throughout:

Example 1

An employee is approached by another employer. She is offered a job by the new organisation. As an inducement to change jobs she is paid £50,000 on 1 April 2009. She commenced work for the new employer on 1 May 2009. The employee is resident, ordinarily resident and domiciled in the UK so the relevant charging provision is Section 15 in Part 2 Chapter 4.

Section 17 operates to make the payment earnings of the year in which the employment commences. Even though paid in tax year 2008/2009 they are earnings "for" the year 2009/10.

The Manual then considers whether domicile makes any difference:

The result will be the same if the employee is resident, ordinarily resident but not domiciled in the UK.

It is assumed that the earnings are not chargeable overseas earnings.⁵ The Manual now considers someone becoming UK resident:⁶

Example 2

An employee worked in Singapore for many years for a UK resident company. The employment ceased on 31 December 2008. For 10 years prior to that date the individual was not resident and not ordinarily resident although domiciled in the UK. On 6 April 2009 the employee returned to the UK. From the date of arrival he became resident and ordinarily resident.

6 months after the job ended the employer made a payment of £50,000 to the former employee in recognition of the contribution he had made to the expansion of business in the Far East.

Section 17 makes the payment earnings of the year in which the employment was last held, 2008-2009. In that year the employee was not resident in the UK and performed all of the duties in Singapore. In consequence, the payment does not fall into any of the charging provisions in Part 2 Chapters 4 and 5 and is therefore not chargeable to tax as general earnings.

5 See 13.10 (Resident, ordinarily resident and foreign domiciled employee).

6 For the position on becoming ordinarily resident, see 6.14.2 (Employment income).

13.9 Resident ordinarily resident and UK domiciled employee

Section 15 ITEPA provides:

- (1) This section applies to general earnings for a tax year in which the employee is UK resident.
- (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of “taxable earnings” from the employment in that year.
- (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

Section 15 sets out the general rule: in short, all earnings are “taxable earnings” and taxed on receipt, on an arising basis. This might be called “the receipts” basis of taxation. “Receipt” is defined in ss.18, 19 ITEPA (not discussed here).

The s.15 rule has two exceptions, for remittance basis taxpayers (s.22) and for non-ordinarily residents (s.26). That is not stated expressly⁷ but clearly has to be implied.

13.10 Resident, ordinarily resident and foreign domiciled employee

13.10.1 *Chargeable overseas earnings of ordinarily resident non-domiciled employee*

Section 809F ITA provides:

- (1) This section applies if section 809B, 809D or 809E applies to an individual for a tax year.
- (2) The individual’s relevant foreign earnings for that year are charged in accordance with section 22 or 26 of ITEPA 2003.

So we turn to s.22 ITEPA which (somewhat repetitively) provides:

- (1) This section applies to general earnings for a tax year, to the extent

⁷ It was stated clearly in s.14 ITEPA before the FA 2008 reshuffled the statutory provisions.

that they are chargeable overseas earnings for that year, if—

- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
- (b) the employee is ordinarily UK resident in that year.

(2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of “taxable earnings” from the employment in that year. ...

In short, the remittance basis applies to chargeable overseas earnings.⁸

13.10.2 *UK earnings of ordinarily resident non-domiciled employee*

I use the term “**UK earnings**” to mean earnings which are not “chargeable overseas earnings”. Section 22(7) ITEPA provides:

General earnings for the employee for the tax year fall within section 15(1) to the extent that they do not fall within subsection (1).

This is not strictly necessary, but it does no harm. The drafter put it in as a signpost, because the scheme of the pre-2008 provisions was different, and the charge on UK earnings of an employee who was ordinarily resident and non-domiciled used to fall under s.22, not s.15.

13.10.3 *Transitional rules for pre-2008 earnings*

Suppose:

- (1) Chargeable overseas earnings accrue to T before 2008/9 and
 - (2) The earnings are remitted in 2008/9 or later (when T is still resident).
- In the absence of a transitional rule, the earnings would not be taxable under s.22 ITEPA because the condition in s.22(1)(a) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 82(2)(a) Sch 7 FA 2008 fills that gap:

- (1) This paragraph applies in relation to an individual’s general earnings for the tax year 2007–08 or any earlier tax year (“the relevant tax year”) if the individual—

⁸ Section 22(6) ITEPA provides: “See Chapter A1 of Part 14 of ITA 2007 for the meaning of ‘remitted to the UK’ etc.”

- (a) was UK resident in that year, but
- (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year.
- (2) Section 22 or 26 of ITEPA 2003 (as amended by this Part of this Schedule) applies in relation to the general earnings as if—
 - (a) section 809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year and
 - (b) section 22(7) or 26(6) of ITEPA 2003 were omitted.

I think para 82(2)(b) is misconceived, though it does no harm. In practice the Courts will hold that UK earnings of an ordinarily resident foreign domiciled employee come into charge under s.15, notwithstanding the lack of the signpost in s.22(7).

13.11 Chargeable overseas earnings

The expression “chargeable overseas earnings” is a label which brings in two sets of requirements: the earnings must be “overseas” earnings and they must be “chargeable”. The key part of the definition is “overseas earnings”. Section 23(2) ITEPA provides the definition:

- General earnings for a tax year are “overseas earnings” for that year if—
- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year,
 - (aa) the employee is ordinarily UK resident in that year,
 - (b) the employment is with a foreign employer, and
 - (c) the duties of the employment are performed wholly outside the UK.

The concept of “chargeable” overseas earnings brings in rules for deductible expenses (not discussed here) and associated employments.

13.11.1 Transitional rule for pre-2008 earnings

Suppose earnings accrue before 2008/09. At first sight the earnings cannot be “chargeable overseas earnings” within the definition of s.23(2) ITEPA since they do not meet the condition in s.23(2)(a): section 809B, 809D, or 809E did not apply before 2008/09. Moreover, para 82 which fills that gap in s.22 does not fill the gap in s.23. Construed strictly, therefore, pre-2008 earnings which were not remitted before 6 April 2008

have fallen out of charge!

However, I expect that the courts will strive to construe the section avoid that result. After all, it is obvious (and para 82 confirms) that this result was not intended. One way to do that is to say that if income arises before 2008, the question of whether it constitutes chargeable overseas earnings is to be decided by reference to the legislation in the year that it arises and not the legislation in the year that it is remitted. It has to be said that para 82 (3) sch 7 FA 2008 would not then be necessary. The alternative is to read para 82(2) as if it applied to s.23 as well as to s.22 and 26. Neither of these solutions is comfortable reading, but the conclusion that all pre-2008 earnings fall out of charge seems even worse. This is only one of many infelicities in the 2008 legislation: but a modern court will strive to make it work.

13.12 Foreign employer

One requirement of “overseas earnings” is that the employment is with a “foreign employer”. The definition is in s.721(1) ITEPA:

“foreign employer” means an individual, partnership or body of persons resident outside the UK and not resident in the UK.

13.12.1 *Foreign employer: HMRC practice*

EI Manual provides:

40102 Taxable earnings: Employee resident and ordinarily resident in the UK: “chargeable overseas earnings” [January 2009]

An employee may maintain that general earnings are chargeable overseas earnings taxable on remittance under section 22 rather than on receipt ... This is likely to lead to a significant reduction in the amount of taxable earnings. You should examine the facts closely before accepting that earnings are chargeable overseas earnings within section 22. In particular you should find out whether the employer has any place of business in the UK. If you can trace an accounts file for the employer, ask the accounts Inspector for instructions on the employer’s residence status.

13.13 Incidental duties in UK

The next requirement of “overseas earnings” is that “the duties of the

employment are performed wholly outside the UK”. Section 39 ITEPA elucidates this concept:

- (1) This section applies if in a tax year an employment is in substance one whose duties fall to be performed outside the UK.
- (2) Duties of the employment performed in the UK whose performance is merely incidental to the performance of duties outside the UK are to be treated for the purposes of this Chapter as performed outside the UK.

In other words, UK duties may be ignored if they are “merely incidental” to the performance of the other duties outside the UK. What are incidental duties? HMRC interpret this strictly. The EI Manual provides:

40203 Employee resident, ordinarily resident or domiciled outside the UK: location of duties: "merely incidental" duties [May 2012]

The case of *Robson v Dixon* (48 TC 527) involved a pilot, resident and ordinarily resident in the UK, who was employed by a Dutch airline. He flew aircraft from Amsterdam to various parts of the world. There were relatively few take-offs and landings in the UK [on average, seven per annum]. He claimed that the small number of take-offs and landings meant that his duties in this country were “merely incidental” to those performed abroad. The Courts rejected his claim on the grounds that the test is one of quality, not quantity. The Judge commented that the core duties of a pilot include landing and taking off in aircraft. So when the aeroplane landed in the UK the pilot was performing substantive duties of his employment.

Quality not quantity of duties

The case of *Robson v Dixon* established that it is the quality not the quantity of duties performed in the UK that determines whether or not they are “merely incidental”. However, where the employee works in the UK for more than three months in a year, you should not accept that work can be “merely incidental”.

Statement of Practice A10: airline pilots

Despite the decision in *Robson v Dixon* a single take off and landing in the UK in any year is disregarded on de minimis grounds in considering whether any duties are performed in this country.⁹

Dealing with cases

It is not possible to list “merely incidental” duties. Substantive and “merely incidental” duties are relative and specific to employments. It is important to obtain as much information about the employment and employee as possible. The

9 [Author’s Note] SP A10 is officially withdrawn; see 3.15.3 (The end of IR20 from 6 April 2009); but there has been no announcement that HMRC now adopt a different practice.

following list of documents is not intended to be comprehensive:

- employment contract
- job description
- summary of main duties and responsibilities
- business diaries and travel details.

These may help but if at all possible arrange a meeting with the employee to obtain information first hand. Once you have a clear idea of the main duties you are in a position to take a view as to what are “merely incidental”...

40204. Employee resident, ordinarily resident or domiciled outside the UK:

Location of duties: “merely incidental” duties: Examples [May 2012]

The following examples illustrate how particular situations should be treated.

Example 1

An overseas marketing executive of a UK employer spends the majority of each year working overseas. Visits to the UK total less than three months in a year. While in the UK the representative carries out the following duties:

- reports on trade conditions and results in the territory
- establishes questions of policy
- receives instructions
- collects samples in preparation for the next tour.

The duties performed in the UK should be regarded as “merely incidental”. If the employee is not ordinarily resident the duties may be disregarded and the general earnings arising from them not charged under Section 15 [ITEPA]. A charge may arise under Section 26 if the earnings are remitted here (see EIM40301).

Example 2

An overseas employee visits the UK and whilst here arranges a meeting with a client overseas and the associated travel. As long as the employee does no more than arrange the meeting and travel, the duties performed are regarded as “merely incidental”.

Example 3

The director of a limited company usually works abroad, but attends directors’ meetings in the UK.

Attendance at board/directors’ meetings is a fundamental and joint duty of a board of directors to manage the company. Therefore performance of these duties in the UK can never be “merely incidental” to work done overseas, even if the board member participates from the UK in a board meeting held overseas, for example via a telephone or video conference. Preparation in advance of board meetings (e.g. for a presentation) is also unlikely to be merely incidental to other duties, as preparation is essential to the contribution in the subsequent meeting.

Example 4

A courier for a tour operator visits many countries in the course of the employment. Visits to the UK, however few and however short, are of the same importance to the job as visits to other countries and therefore cannot be “merely incidental”.

This is consistent with the 1955 Royal Commission which gave two

examples of incidental duties: “returning for report” and “to collect samples, etc”.¹⁰

HMRC say:

Background to the exception for merely incidental duties

15. The Royal Commission Report [on the Taxation of Profits and Income] published in 1955 stated (paragraph 300)

*“We recommend that work is not the less to be treated as performed wholly in one country because certain **merely incidental duties**, such as returning for report, to acquire samples, etc., are carried out in another.”*

16. Subsequently section 11(3) Finance Act 1956 addressed the circumstances where an employee would otherwise be chargeable to tax—

*(3) Where an office or employment is in substance one of which the duties fall in the year of assessment to be performed outside the UK there shall be treated for the purposes of this section as so performed any duties performed in the UK the performance of which is **merely incidental** to the performance of the other duties outside the UK.”*

17. However, the term “merely incidental” duties was not defined in FA1956 or in subsequent legislation. Following a common dictionary definition of “incidental”, as something that is minor, casual or subordinate in nature, the Inland Revenue (as it was at the time) considered that a duty that formed part of the essential or fundamental requirements of the employment could not be incidental.

Robson v Dixon (48 TC 527)

18. This is the only case where the courts have considered the meaning of “merely incidental” duties. It was decided in the High Court in 1972 and concerned section 10 and 11 of the Finance Act 1956. Mr Robson was an airline pilot who lived in the UK but commuted to work in Amsterdam, where he was employed by a Dutch airline.

19. Robson flew aircraft on scheduled flights from Amsterdam to various parts of the world, mainly North and South America. None of the flights in the years under appeal commenced in the UK but of 811 take-offs and landings, 38 were made in the UK of which 16 were charter flights, which were outside his normal duties (he made in total only 22 charter flight landings and take-offs).

20. Robson contended that as his duties were performed substantially outside the UK, any duties in the UK were therefore merely incidental to his substantive duties abroad. Pennycuik VC disagreed —

“The expression “merely incidental” is a striking one, and effect must be given to the natural meaning of the words. The words “merely incidental to” are upon their ordinary use apt to denote an activity (here the performance of duties) which does not serve any independent purpose but is carried out in order to further some other purpose.

The judge set out the duties performed by Robson and went on:

In the present case, the duties performed by the taxpayer, apart from his duties

10 Cmd 9474 para 300.

on the ground at Schiphol, mainly consisted (putting it shortly) of taking a plane up at Schiphol, flying it to whatever its destination was and then bringing it down. In the case of the flights from Schiphol to some destination (normally in America) on which there was a stop at England, his duties consisted of taking the plane up at Schiphol, flying it to England, bringing it down at Heathrow or elsewhere, and then taking it up again and flying it again to the next destination, in America. With the best will in the world, I find it impossible to say that the activities carried on in or over England are merely incidental to the performance of the comparable activities carried on in or over Holland or in or over the ultimate destination, in America. The activities are precisely co-ordinate, and I cannot see how it can properly be said that the activities in England are in some way incidental to the other activities. Going back to the words of the section, when one asks, 'What exactly are the other duties outside the UK to which the performance of the duties are incidental?', no satisfactory answer can be given. The other duties are simply co-ordinate duties.

21. Pennycuick was clear as well that the test of “merely incidental duties” is one of quality not quantity –

“Again, I think it is impossible to construe s 11(3) in the way in which it was sought to construe it in the taxpayer's contentions in the case stated, as indicating merely relatively short periods of employment in the UK in relation to the period of employment outside the UK. It would have been quite simple for the section so to provide; and it may well be that if the condition were imported only by the expression 'in substance', that would be the result. But the second requirement is expressed in quite different terms and cannot, I think, be treated as referring merely to what has been described as a quantitative, in contra-distinction to a qualitative, basis. ...

It would be tempting to say that all the duties performed by a pilot are incidental to the purpose of transporting passengers from one place to another, but that approach clearly would not help here. What has to be shown is that the particular duties in the UK are incidental to the performance of other particular duties outside the UK.”

22. Consequently duties performed in the UK that are the same or similar in nature to those performed overseas are not merely incidental to the overseas duties, even if performed for only a very short time. They are, in Pennycuick's words, “precisely co-ordinate” and therefore of equal importance to the duties performed overseas.

Tax Bulletin 76

23. Inland Revenue published a Tax Bulletin article in April 2005 titled “Non-domiciled employees: dual contract arrangements” which referred to a range of issues relating to dual contract arrangements, including “merely incidental” duties and to the decision in *Robson v Dixon*.

24. TB76 explained that given the ease and speed of twenty first century communications, an employee who performs duties of one employment overseas and another in the UK, is liable to find it increasingly difficult whilst working in the UK to avoid performing substantive duties of their overseas employment. For example, HMRC take the view that an employee working in the UK under a UK contract to service the needs of UK clients, but also responsible under their

overseas contract for servicing the business needs of overseas clients, who responds to a telephone call or e-mail from an overseas client performs a substantive duty of the overseas employment. A response sent from the UK to an overseas client, is no different from a response sent from abroad to the same client. It represents a “precisely co-ordinate” duty.

Statement of Practice A10 – de minimis

25. In *Robson v Dixon*, Inland Revenue accepted that a landing in the UK caused by an emergency (e.g. due to weather conditions or mechanical trouble) might be regarded as incidental to duties performed outside the UK.

26. After the decision was handed down, counsel for Robson asked if the de minimis principle could apply to one of the years under appeal in which Robson completed only one take-off and landing in the UK. Despite his decision that the test of “merely incidental” duties was one of quality and not quantity, Pennycuik agreed that this would be “proper” for a single event in a year. SP A10 was published in 1975 as a response to Pennycuik’s comments.

“Where only a single take-off and landing in this country occurred in a year, the Inland Revenue will normally disregard this on de minimis grounds in considering whether any duties were performed in this country.”

27. However, in another year, in which Robson performed four take-offs and landings in the UK (two for emergencies, plus two others for unspecified reasons) the Judge declined to accept the request for a de minimis exclusion.

Director - duties never merely incidental

28. The general principle in relation to a company director is that the management of a company is vested collectively in the board of directors. Therefore when a director attends a meeting of the board, HMRC takes the view that he or she performs a fundamental duty which is not “merely incidental” to other duties.

29. Consequently a director who in substance performs his duties overseas, except for visits to the UK to attend a meeting (whether as part of a formal board meeting or otherwise) cannot, in the view of HMRC, be within the exception in s39. Attendance at board meetings is part and parcel of a director’s core duties and therefore if performed in the UK cannot be incidental to duties performed abroad. A director’s attendance at other meetings (e.g. finance, strategy, personnel) is also likely to represent a substantive duty, because the director would not attend these meetings unless participation was deemed necessary.

[Para 30-32 discuss s.830 ITA; this concerns residence, not employment income; see 3.19 (Full-time work abroad).]

Examples of duties that are “merely incidental”

33. To determine whether duties performed in the UK are “merely incidental” to duties performed overseas, it is necessary to consider both the nature of the duties performed in the UK and their relationship to the duties performed abroad.

34. Ultimately each case will depend on its particular facts but the types of activities, if performed in the UK in relation to the duties of an overseas employment, which can be regarded as “merely incidental” duties include –

- arranging meetings and business travel;
- feedback on employee performance and/or business results, if this does not involve the employee concerned in preparation or analysis whilst in the UK and as long as responsibility for these matters is not part of the employee’s core duties

of employment;

- input to team restructuring and staff matters, provided that the employee does not have a management role; and
- reading generic business e-mails that do not relate directly to the employee's role/responsibilities.

35. The examples below illustrate some situations where duties are regarded by HMRC as "merely incidental" -

A. A junior employee who works for an overseas subsidiary of a UK company who, on occasional visits to the UK headquarters, presents a report prepared by the overseas business to report on trade conditions or results overseas, and/or receive instructions for the next tour of duty overseas. The employee performs no other duties in the UK and has no control over the overseas activities on which he reports and is required only to pass on the report from his overseas employer and to take instructions from the UK company to take back to the overseas employer. These duties are regarded as "merely incidental" to his overseas duties.

B. An overseas employee visits the UK and whilst here arranges a meeting with a client overseas and the associated travel. As long as the employee does no more than arrange the meeting and travel, the duties performed are regarded as "merely incidental".

C. Whilst in the UK, an employee of an overseas subsidiary receives an e-mail documenting the employer's global business results for the year. The employee is provided with the results for his information and is not required to take any further action or feedback to the sender of the e-mail. The reading of such an e-mail is "merely incidental" to those duties performed overseas. However, if the employee had any role or responsibility in producing the global results, and/or was involved in feedback or in confirming the results, reading the e-mail is not a "merely incidental" duty.

Examples of duties that are not "merely incidental"

36. Types of activities performed by an employee that are not regarded as "merely incidental" duties include -

- instructions and/or guidance to colleagues and/or team members;
- work carried out on issues or projects that do not come to fruition;
- reporting on performance/business results where these matters are part of the employee's core duties;
- analysis of reports/information with the intention to produce results/recommendations that can be reported upwards in the organisation;
- preparation work carried out prior to discussions, meetings or presentations with customers/clients, colleagues, board members or shareholders and follow-up work after such discussions, meetings or presentations;
- discussions and meetings (including by telephone, tele-conference or video conference) with customers/clients, colleagues, board members or shareholders; and
- applying generally expertise in any role or function which the employee is contracted to perform in his or her duties for the employer.

37. The examples below illustrate some situations where duties are not "merely incidental" -

A. A courier for a tour operator visits many countries in the course of the

employment. Visits to the UK, however few and however short, are of the same nature to the job as visits to other countries and therefore cannot be "merely incidental".

B. Preparation in advance of a presentation to, and/or a meeting/discussion with, customers or potential customers, or actions subsequently which result from decisions taken in the presentation or meeting/discussion are not merely incidental to other duties, as preparation in advance and follow-up work afterwards are essential to an employee's effective participation in a presentation and/or meeting/discussion.

C. A company director, who works overseas for a UK based multinational company, usually participates by video conference in board meetings held each month in the UK. However, sometimes the director visits the company headquarters in the UK and attends in person at monthly board meetings. As attendance at board meetings is a core function and fundamental joint duty of a board of directors to manage the company, attendance at a board meeting cannot represent "merely incidental" duties, regardless of the fact that the director does not normally attend the meeting in person.

D. A company director who is resident in the UK has two directorships within the same overseas based group. One role is as CEO of the UK subsidiary and the other as a board member of the overseas parent company. The parent company's board meetings are held monthly in the overseas location and the director usually attends in person. However, sometimes he participates in the board meetings by telephone or video conference from the UK. As attendance at board/directors' meetings is a fundamental and joint duty of a board of directors to manage the company, participation from the UK in the parent's board meetings can not be "merely incidental" to duties performed overseas.

E. An employee of an international bank based in Frankfurt, visits a UK branch of the bank. Whilst in the UK branch, the employee responds to an investment enquiry sent by email from a customer of the bank in Germany. This represents a duty of his employment in Germany and by answering the email from the UK he performs a duty that is "precisely co-ordinate" with his duties in Germany. Consequently this cannot be a "merely incidental" duty.

Merely incidental duties: HMRC policy

38. Over more than half a century since the Royal Commission Report was published in 1955 and the introduction of the term "merely incidental" duties in FA1956, working arrangements have changed considerably.

39. At that time it was unusual for one employee to perform duties of two or more employments in different countries. Where such arrangements existed, there was likely to be a physical separation of duties between the two roles because of the restricted availability of effective international communications.

40. Clearly that is no longer the case but should the enormous advances in communications which allow an employee now to perform duties of an overseas employment and an UK employment consecutively, if not concurrently, be sufficient reason for HMRC to change its interpretation of, and policy for, "merely incidental" duties? The Royal Commission provided the example of a junior employee working in one country, returning to another country to report or to collect samples, as the type of duties that it considered should be "merely

incidental". These duties would be still regarded as such today – see Example A in paragraph 35 above.

41. On the other hand, where duties performed in the UK are the same as, or similar to, duties performed overseas, they cannot be "merely incidental" because they are "precisely co-ordinate" duties.

42. HMRC accepts that it may be difficult in some circumstances for an employee to avoid performing co-ordinate duties unless, for example, the employee declines whilst in the UK to answer a mobile telephone, or respond to an e-mail, from an overseas client.

43. However, to apply a broader interpretation of "merely incidental" to duties performed in the UK, than would apply otherwise to similar duties performed overseas, in HMRC's view would be not consistent with the Royal Commission in 1955, the case law in *Robson v Dixon* or the legislation.

44. Consequently HMRC does not believe there is good reason to revise its interpretation of "merely incidental" duties set out in the Tax Bulletin in 2005 and reiterated in this paper.¹¹

It is in practice just about impossible for a UK resident to satisfy the "incidental duties" requirement if it is understood in this way. HMRC have (more or less) got an arising basis for employment income which, in everyday language, is income of an overseas employment and so foreign income, through the rigorous statutory interpretation of *Robson v Dixon*.¹² So unless the matter comes to be reviewed by the courts, the only solution is dual contract arrangements.

13.14 Dual contract arrangements

EI Manual discusses dual contract arrangements. The manual first explains the planning:¹³

77030 Appendix 3: Non domiciled employees: Dual contract arrangements [February 2006]

... The legislative scheme ... is advantageous to employees or office

11 "Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of "merely incidental" duties" published 19/3/2012.

www.hmrc.gov.uk/menus/dual-contracts.pdf

12 A similar process applied to bring foreign trading income on to an arising basis: see 15.3 (Trading income of UK resident).

13 An earlier version of the text was in Tax Bulletin 76 (also classified as RI 273). See Ladkin, "Domicile: Working at Home and Abroad" *Taxation*, 27 March 2003, p.632.

holders who can show that they are:

- resident and ordinarily resident but not domiciled in the UK and
- perform duties of an office or employment under a foreign employer wholly outside the UK.

As chargeable overseas earnings are taxed on remittance, there is a clear incentive to ensure that such earnings are paid overseas and to minimise the amount of earnings remitted to the UK. However, the requirement that the duties of the employment are performed wholly outside the UK presents problems to foreign domiciled employees whose jobs require them to work partly in the UK and partly abroad. Earnings from an employment with duties performed in and outside the UK would be taxable under section [15 ITEPA] wherever received. An employee may therefore be offered two employment contracts, for example:

Contract 1 covering the performance of duties in the UK and

Contract 2 with an associated employer resident overseas covering duties performed in the rest of the world excluding the UK.

The intention is that earnings from employment contract 2 will be chargeable overseas earnings and therefore taxable under section 22 only when remitted to the UK. For this reason, dual or multiple employment arrangements are popular with foreign domiciled employees whose duties are performed partly in the UK and partly outside the UK. The arrangement is generally that the individual enters into two separate written contracts, frequently referred to as the UK employment contract and the overseas employment contract.

Assuming the non-resident status of the employer and the non-domiciled status of the employee, HMRC can attack the planning in the following ways:

- (1) Allege there is only one contract of employment (see below).
- (2) Allege some duties of the “overseas” employment are performed in the UK; see 13.13 (Where are duties performed: incidental duties).
- (3) Apportionment arguments (see below).

13.14.1 *One contract of employment or two?*

The EI Manual continues:

77030 Appendix 3: Non domiciled employees: Dual contract arrangements [February 2006]...

Enquiries into dual contract arrangements

HMRC offices may make enquiries in order to check whether the earnings

under the overseas contract are chargeable overseas earnings. They may also consider whether there is in fact a single employment contract notwithstanding the production of two written contracts. This approach has generally been deployed where there is concern that there has been an attempt to split a single employment to exploit the legislation that provides for chargeable overseas earnings to be taxed on remittance.

Employers, employees and their advisers maintain that there are separate and distinct employments. They invariably argue that the employee performs a different role with different responsibilities under each contract of employment and that the duties under each do not overlap and are not dependent on each other. In many cases written contracts have been drafted that fairly represent the true employment relationships and include a proper job description along with details of the remuneration package and other entitlements (annual leave etc) relating to each employment. Care has been taken to ensure that the roles described in each contract are capable of independent existence with proper regard given to what would happen on termination of one of the employments. Best practice has recognised the importance of maintaining separate payroll and expenses regimes and different line management and reporting arrangements.

Where there are two employment contracts and the written contracts reflect this, dual contract arrangements provide a legitimate way to structure an individual's employment relationships. Where the arrangements reflect the true employment relationships, enquiries focus on:

- whether the employee has in fact performed substantive duties under the overseas contract in the UK
- whether a section 24 adjustment is needed to address an imbalance between the earnings from the UK and overseas contracts.

13.14.2 *Are some duties performed in the UK?*

The EI Manual goes on to consider this line of attack:

Given the way in which modern business operates and the ease and speed of communication, some employees may find it increasingly difficult to avoid performing substantive UK duties under their overseas contracts. For example, an employee who is responsible under their overseas contract for servicing the business of overseas clients may have to respond to a telephone call or e-mail from a worried overseas client with an urgent problem when the employee is in the UK. Formulating and communicating a response to such a problem would be regarded as a fundamental duty under the overseas contract. It follows that the performance of such duties

in the UK will not be merely incidental to the performance of duties outside the UK as they will be of equal importance to the overseas duties. It is the quality of the UK duties and not the time devoted to their performance that determines whether they are merely incidental.

The EI Manual then considers and dismisses a possible defence:

Recent developments

In a number of cases, the duties required under each purported employment contract are defined according to where those duties are performed. For example, the UK contract states that the duties of the employment are all those duties performed in the UK whereas the overseas contract states that the duties of the employment are all those duties performed wholly overseas. Employees and their advisers may contend that all overseas duties are duties of the overseas employment and all UK duties are duties of the UK employment. On that analysis, duties performed in the UK in connection with the business of the overseas employer are performed under the terms of the UK contract and are not duties of the overseas employment.

HMRC does not consider that the existence of separate and distinct employments is determined by the terms of written contracts where the main distinction between the duties required under each contract is geographical. There are concerns that arrangements of this nature artificially divide a single job so earnings attributable to overseas duties can be treated as chargeable overseas earnings. HMRC has received legal advice that supports a robust challenge to such arrangements.

The commercial context

As a result of the legal advice referred to above, HMRC considers that a dual contract arrangement based solely or mainly on a geographical split of employment duties without commercial underpinning is vulnerable to challenge on the grounds that there is in reality a single employment with duties in and outside the UK. In such cases, HMRC offices should fully investigate the facts and circumstances including the commercial rationale and context and assess an employee to tax where the evidence shows that there is in fact a single employment.

HMRC takes the view that a dual contract arrangement is unlikely to work unless there are two distinguishable jobs. For example, a French resident employer 'A' sends employee 'B' who is domiciled outside the UK to establish an office in London for its UK subsidiary 'C'. A requires B to work in its Paris office servicing their existing portfolio of French clients two days per week. On the other three days, C requires B to work in London. This is likely to constitute a proper basis for B holding separate

employment contracts with A and C.

In order to decide whether the arrangements create two employments, rather than artificially divide a single employment for tax purposes, it is appropriate to look at the economic advantage that an employer gains from the employee's activity. If the contractual arrangements are to have any meaning, they must be seen in the context of the underlying commerciality of the arrangements. Regardless of there being two written contracts, HMRC would not accept that there were two employments if the risks and rewards relating to work done in the UK and overseas were in fact substantially borne and received by a single employer. Moreover, an arrangement requiring a written contract between an employee and a UK employer which provides only for the performance of duties in the UK would appear artificial if the employer's business extends outside the UK. An employer's interest does not lie in having the employee work in a defined geographical area but in an economic activity that benefits the employer. An employee may perform duties overseas that directly benefit the business of the UK employer. When performing those duties, the employee is not working for the overseas employer but for the UK employer overseas. If the arrangement were genuine, the employee would not be paid by the overseas employer to work for the UK employer overseas. If that is what the contract requires, it would indicate a lack of commerciality. Conversely, an employee who performs duties in the UK that directly benefit the business of the overseas employer is working for the overseas employer in the UK. It is difficult to imagine circumstances in which contracts that can require an employee to work for the benefit of a UK employer whilst being paid by an overseas employer or vice versa would be offered by employers that were not associated.

Various mechanisms exist for allocating costs to another entity that benefits from an employee's services. These include transfer pricing adjustments. It has been suggested that such adjustments restore the commercial equilibrium and thus support the existence of separate employments. However, the fact that such adjustments are necessary indicates that the employer has misjudged the commercial reality of the arrangements. Separate employers do not for sensible commercial reasons pay employees to work for someone else, with or without transfer pricing. Dual contract arrangements are sometimes used when a UK resident employee holding one employment with worldwide duties first becomes ordinarily resident. Some individuals who are self employed before they arrive in the UK become employees with dual contract arrangements on attaining UK resident and ordinarily resident status without any significant change in the way in which they carry out their professional activities. In other cases, recruitment material suggests that the employer has a single

vacancy to fill and a dual contract arrangement is only implemented following the appointment of a non-domiciled individual. In such scenarios, HMRC offices will test whether the facts reflect commercial reality.

This is very doubtful. Whether two contracts of employment exist is a matter of contract law, not of commercial reality. Whether or not it is described as artificial is not the test. It would be interesting to review the HMRC advice to see on what it is founded. No doubt in the event of a dispute HMRC would be pleased to disclose it, in the interests of the open, frank and transparent enhanced relationship which HMRC say they want to have with their customers.¹⁴

The EI Manual continues:

77030 Appendix 3: Non domiciled employees: Dual contract arrangements [February 2006]...

Overseas contracts and UK duties

Where the commercial reality shows the existence of separate employment contracts, it is sometimes argued that contractual terms that prohibit the performance in the UK of duties connected with the business of the overseas employer, preclude HMRC offices from arguing that the employee has performed duties of the overseas employment in the UK. These arguments are based on the UK duties being "ultra vires".

HMRC does not consider that the presence of such clauses allows the performance of duties in the UK that clearly benefit the overseas employer to be ignored. To that end, both employers ought to be closely monitoring the employee's UK activities. For example, where the employee has performed substantive duties in the UK that directly benefit the overseas employer, HMRC would expect the UK employer to mark the fact that the employee is effectively abusing its time and take appropriate disciplinary action. And if the UK work in question was valuable, the overseas employer should take it into account when calculating bonus entitlement. It is possible that clauses like this are frequently waived or ignored and

14 "The minimum amount of openness on the part of revenue bodies that will be necessary for the enhanced relationship to function will include ... a willingness to disclose such information without invoking (except in the very rare case where the public interest requires otherwise) executive and other governmental privileges and immunities to suppress documents and other information reasonably sought by the taxpayer." OECD Tax Intermediaries Study Working Paper 6 - The Enhanced Relationship, July 2007, para 43; see www.oecd.org/dataoecd/59/61/39003880.pdf.

may be inserted to create a misleading impression.

This may be correct but it depends on the facts of the case.

Tax impact where dual contract arrangements fail

Where the facts indicate that there is, in commercial reality, only one employment contract whereby the employee performs duties for the benefit of one employer both in and outside the UK, all of the employee's general earnings will be taxable under section 21 ITEPA. As earnings attributable to overseas duties will not be chargeable overseas earnings, tax will be charged on receipt rather than on remittance to the UK. The identity of the "employer" will depend on all the facts and circumstances of the individual case.

As a matter of contract law, I think this is wrong. If the drafting is correct, there will be two separate contracts. The fact that on HMRC analysis it is unclear who is the employer suggests there must be something wrong with it.

The HMRC view might conceivably be defended on the basis of *IRC v Scottish Provident Institution* 76 TC 538: the two contracts being regarded as one composite contract for tax purposes, even though they are (if the drafting is right) separate contracts as a matter of contract law. But that assumes that dual contracts are contrary to the intention of parliament which is far from clear. The 1955 Royal Commission did not consider that there was anything objectionable in dual contract arrangements and assumed that they would work.¹⁵

15 Report Cmd 9474 para 305 proposed:

“(3) Let the resident be taxed— ...

(c) on the apportioned basis, if he is domiciled outside the UK, in respect of income from an employment which is performed partly inside and partly outside the UK, the part of his income attributed to the work performed outside the UK being itself taxed on the remittance basis;

(d) on the whole income, if he is domiciled in the UK, in respect of income from an employment which is performed partly inside and partly outside the UK.

306. The reason for the special treatment of the non-domiciled resident is that the person most likely to be affected is the employee of a foreign concern who makes his home and headquarters in the UK, while his duties include a good deal of work in Europe. It seems fair to treat his ‘European’ earnings as if they were truly foreign income, and it is probably to the advantage of this country to recognise the special case. *Even if it did not, most of such employees could get into an equivalent position by having two separate contracts of service, one providing for UK duties*

The EI Manual then turns to PAYE:

However, the UK entity that receives the benefit of an individual's services will be obliged to apply PAYE to all payments of PAYE income made to the employee during the period that the employee works for that entity. This is because the UK entity will either be the employer or (for the purposes of section 689 ITEPA) the relevant person.

If there are genuine separate employments but the employee has performed substantive duties in the UK for the overseas employer, then all earnings from the overseas contract will be taxable under section 21 in the relevant year. They will not qualify as chargeable overseas earnings under section 22 because the duties of employment with a foreign employer will not have been performed wholly outside the UK in the year in question. There is unlikely to be an obligation to operate PAYE on earnings from the foreign employer, as that employer will not have the necessary presence in the UK for PAYE purposes, and the UK employer will not be the relevant person in relation to duties performed by the employee under the separate overseas employment.

The EI Manual concludes with a comment on NIC:

National Insurance

Where for tax purposes the facts indicate that despite the existence of two written employment contracts, there is a single employment covering UK and overseas duties, there could also be National Insurance consequences. If it is found that the earnings relating to overseas duties are attributable to employment with the UK employer, there will be liability to pay further National Insurance.

The first sentence is tentatively expressed; the Manual wisely does not try to grapple with the complexities of NIC.¹⁶

13.14.3 *Apportionment*

Section 24 ITEPA prevents an over-generous attribution of income to the foreign contract:

and remuneration and the other for European duties and remuneration, in which event the latter income would be taxed on the remittance basis as at present.”

(Emphasis added)

¹⁶ See 45.1 (National insurance contributions).

Limit on chargeable overseas earnings where duties of associated employment performed in UK

(1) This section imposes a limit on how much of an employee's general earnings are chargeable overseas earnings for a tax year under section 23 if—

- (a) in that year the employee holds associated employments as well as the employment to which subsection (2) of that section applies (“the relevant employment”), and
- (b) the duties of the associated employments are not performed wholly outside the UK.

(2) The limit is the proportion of the aggregate earnings for that year from all the employments concerned that is reasonable having regard to—

- (a) the nature of and time devoted to each of the following—
 - (i) the duties performed outside the UK, and
 - (ii) those performed in the UK, and
- (b) all other relevant circumstances.

(3) For the purposes of subsection (2) “the aggregate earnings for a year from all the employments concerned” means the amount produced by aggregating the full amount of earnings from each of those employments for the year mentioned in subsection (1) so far as remaining after subtracting any amounts of the kind mentioned in step 2 in section 23(3).

(4) In this section—

- (a) “the employments concerned” means the relevant employment and the associated employments;
- (b) “associated employments” means employments with the same employer or with associated employers.

(5) The following rules apply to determine whether employers are associated—

Rule A An individual is associated with a partnership or company if that individual has control of the partnership or company.

Rule B A partnership is associated with another partnership or with a company if one has control of the other or both are under the control of the same person or persons.

Rule C A company is associated with another company if one has control of the other or both are under the control of the same person or persons.

(6) In subsection (5)—

- (a) in rules A and B “control” has the meaning given by section 995 of ITA (in accordance with section 719 of this Act), and
- (b) in rule C “control” means control within the meaning given by sections 450 and 451 of CTA 2010 (meaning of expressions relating to close companies).

(7) If an amount of chargeable overseas earnings is reduced under step 3 in section 23(3) as a result of applying any limit imposed by this section, the amount of general earnings corresponding to the reduction remains an amount of general earnings within section 15(1).

13.14.4 *Implications for employer*

The former Inspectors Manual para 5348 provided:

Apart from the Schedule E implications there are other questions to consider:-

[1] Is the cost of remunerating the individual under his contract for overseas duties effectively borne by a UK company and claimed as a deduction in computing profits which are chargeable to Corporation Tax? If so, there is a mismatch which will need to be considered with some care.

[2] Do the individual's activities under the contract for overseas duties generate income, and if so to whom does it accrue? Is income which would otherwise accrue to a company which is liable to Corporation Tax being routed to an overseas company?

[3] If the profits of a company which is liable to Corporation Tax are computed on a cost plus basis are the costs being depressed by reason of the split employment?

Point [1] raises deductibility issues; point [2] raises Controlled Foreign Company issues; point [3] raises transfer pricing issues. All these should be considered before entering into dual contract arrangements.

13.15 **Record Keeping and Disclosure**

13.15.1 *Record keeping*

HMRC say:

4. For the purpose of enquiries into dual contract arrangements, HMRC considers it is reasonable to require access to the following documents, for some or all of the period under review:

- diaries
- e-mails
- expenses claims and supporting receipts
- telephone records
- client files.

5. A document means anything in which information of any description is recorded. This includes records held on a computer, on magnetic tape, optical disk (CD-ROM/DVD), hard disk, memory stick, flash drive, floppy disk or other recording media.

6. Where such records are in the possession of the employee, HMRC would expect the individual to comply with Section 12B TMA 1970 and retain any documents or information that would have enabled him or her to deliver a complete and correct return, until the later of either the closure of the enquiry window or, if applicable, the date an enquiry into the return is closed.

Section 12B TMA provides:

(1) Any person who may be required by a notice under section 8, 8A ...11 or 12AA of this Act ...17 to make and deliver a return for a year of assessment or other period shall—

(a) keep all such records as may be requisite for the purpose of enabling him to make and deliver a correct and complete return for the year or period; and

(b) preserve those records until the end of the relevant day ...

HMRC continue:

7. However where the employee does not have power or possession of the documents, HMRC will consider approaching the employer for the records they hold.

8. HMRC has sometimes experienced difficulty in obtaining documents which have not been retained by the employer. In a spirit of collaborative engagement HMRC asks all employers who utilise dual contract arrangements to implement a retention policy that will retain relevant documents for at least two years from the end of the tax year to which the document relates.

9. HMRC has also sometimes experienced difficulties in obtaining documents which have been retained by the employer or the employee. HMRC will not hesitate to use the powers in Schedule 36 Finance Act 2008 to require production of documents. Where the individual is employed by an overseas employer and the information is not available to the individual, HMRC will make full use of Exchange of Information powers with the relevant overseas authorities.

Multiple risks

10. HMRC will address all avenues of enquiry into dual contract arrangements (e.g. those relevant to both employee and employer) as equal risks from the outset of the enquiry; no risks will be deferred pending the outcome of enquiries into others. This should serve to mitigate some of the delays and other problems sometimes faced in

obtaining the relevant records.¹⁷

13.15.2 *Disclosure requirements*

HMRC say:

Self Assessment

11. An employee who has dual (or multiple) contracts of employment is required to complete a separate Employment page of the Self Assessment Tax Return for each employment, as specified at page EN1 of the Tax Return Guide.¹⁸

HMRC say:

We can confirm again that we do not intend promoters or employers to have to disclose everyday advice and arrangements. In the context of employment products this would include ... standard dual contract arrangements (although we will require disclosure of innovative arrangements).¹⁹

This statement was made before the Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regs 2006, but it is still valid under the current law. It is interesting that the statement describes dual contract arrangements as “everyday” and “standard”.

13.16 **Resident but not ordinarily resident employee**

Section 26 ITEPA provides:

(1) This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the

17 “Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of “merely incidental” duties” published 19/3/2012.

18 “Dual contracts: record keeping, enquiries, completion of Self Assessment Returns and interpretation of “merely incidental” duties” published 19/3/2012.

The reference is to the form SA102 notes (Employment Notes).

www.hmrc.gov.uk/menus/dual-contracts.pdf

19 Statement to CIOT 23/08/04 accessible <http://old.tax.org.uk/showarticle.pl?id=2704>

employee for that year and the employee is not ordinarily UK resident in that year, if the general earnings are neither—

- (a) general earnings in respect of duties performed in the UK, nor
- (b) general earnings from overseas Crown employment subject to UK tax.²⁰

(2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of “taxable earnings” from the employment in that year.

(3) Subsection (2) applies whether or not the employment is held when the earnings are remitted...

(5) See Chapter A1 of Part 14 of ITA 2007 for the meaning of “remitted to the UK” etc.

(6) General earnings for the employee for the tax year fall within section 15(1) if they do not fall within subsection (1).

In short, a resident non ordinarily resident remittance basis taxpayer pays tax:

- (1) on an arising basis on general earnings in respect of duties performed in the UK; and
- (2) on a remittance basis on other earnings.

This is better than the remittance basis for UK resident and ordinarily resident foreign domiciliary:

- (1) It is not necessary to have a foreign employer.
- (2) It is not necessary that duties are performed *wholly* outside the UK.
(So it is not necessary to consider dual contract arrangements.)

Much of the wording of s.26 is the same as s.22 ITEPA, and so the reader is referred back to 13.10 (Resident, ordinarily resident and foreign domiciled employee).

13.17 Non-resident employee

Section 27 ITEPA provides:

(1) This section applies to general earnings for a tax year in which the employee is not resident in the UK if they are—

- (a) general earnings in respect of duties performed in the UK, or
- (b) general earnings from overseas Crown employment subject to UK tax.

²⁰ See 13.29 (Overseas Crown employment).

(2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of “taxable earnings” from the employment in that year.

(3) Subsection (2) applies whether or not the employment is held when the earnings are received.

This applies regardless of domicile. DTAs often override the charge to UK tax.²¹

There are two requirements here:

- (1) Duties performed in the UK; and
- (2) Earnings in respect of those duties.

These concepts are both relevant for:

- (1) A resident but non-ordinarily resident employee, where it makes the difference between an arising and a remittance basis.
- (2) A non-resident employee, where it makes the difference between taxable earnings and tax-free earnings.

It is best to consider these separately.

13.18 Duties “performed in the UK”

Section 38 ITEPA elucidates the concept of where duties are performed:

(1) This section applies if a person ordinarily performs the whole or part of the duties of an employment in the UK.

(2) General earnings for a period of absence from the employment are to be treated for the purposes of this Chapter as general earnings for²² duties performed in the UK except in so far as they would, but for that absence, have been general earnings for duties performed outside the UK.²³

EI Manual provides:

²¹ See 13.34 (Double Taxation Relief).

²² S.38 refers to earnings “for” duties performed in the UK, whereas ss.26, 27 ITEPA refer to earnings “in respect of” duties performed in the UK, but the meaning must be the same.

²³ Special rules apply for:

- (1) duties on board vessels or aircraft: s.40 ITEPA;
- (2) duties performed in the UK sector of the Continental Shelf: s.41 ITEPA.

40202 Employee resident, ordinarily resident or domiciled outside the UK: Location of duties: Absence from duties [January 2009]

If an employee who ordinarily works in the UK is absent from work, the general earnings for the period of absence must be treated as being for duties performed in the UK, even if the employee is in fact abroad at that time. If, exceptionally, the employee can show that if he had been working, the earnings would have been for working abroad then this rule is not applied.

Example

An employee who is not ordinarily resident in the UK performs the duties of the employment in Manchester. Illness meant that a holiday in Florida was unexpectedly extended so the days normally spent in the UK were lost. The Inspector received a calculation of earnings chargeable under s.15 [ITEPA]²⁴ that excluded salary attributable to the days of absence.

The Inspector successfully contended that s.38 [ITEPA] applied on the basis that the duties of the employment were normally performed in the UK. The earnings that had been excluded were therefore UK-based earnings within s.15 [ITEPA]

13.19 Earnings “in respect of” duties performed in the UK

The question whether earnings are “in respect of” duties performed in the UK is relevant for non-ordinarily resident employees as earnings in respect of duties performed in the UK are taxed on an arising basis and other earnings are taxed on a remittance basis. SP 1/09 explains how this is applied where duties of a single employment are performed both in and outside the UK:

13. Where the duties of a single office or employment are performed both in and outside the UK, an apportionment is required to determine how much of the general earnings are attributable to the UK duties. Apportionment of general earnings is essentially a question of fact, but for many years HMRC has accepted time apportionment, based on the number of days worked abroad and in the UK, except where this would clearly be inappropriate. For example, in the case of an employee with 200 working days in the UK and 50 working days outside the UK, the proportion of general earnings attributable to UK duties would be

²⁴ The reference from 2008/2009 is now s.26 ITEPA.

200/250. This practice does not, of course, apply where the charge arises under Section 15 ITEPA and relief is due under Part 5 Chapter 6 ITEPA (Deductions from seafarers' earnings).

See too *Coxon v Williams* 60 TC 659. EI M77020 provides:

77020. Appendix 2: General earnings in respect of duties performed in the UK
[August 2008]

(Adapted from an article in Tax Bulletin 63 – February 2003. The section headed "Practical issues - international business travel" sets out a methodology that first appeared as Appendix 2 to the Minutes of the meeting of the Joint Forum on Expatriate Tax and NICs held on 18 April 2007.)

... Whether general earnings (emoluments) are in respect of UK duties is essentially a question of fact. In *Taylor v Provan* (49 TC 579), the courts agreed that the touchstone must be the wording of the statute. In that case, travel expenses paid to a director to come to the UK in order to perform duties here were considered to be "emoluments in respect of duties performed in the UK". In *Perro v Mansworth* [2001] STC (SCD) 179, a Special Commissioner found that the payment by an employer of an employee's liability to tax on UK-based earnings (Case II Schedule E) was itself "an emolument in respect of duties performed in the UK".

Where an attribution is required, Statement of Practice 5/84 (SP5/84) approves time apportionment according to the number of days worked abroad and in the UK except where this would clearly be inappropriate. The *Perro* case is an example of where time apportionment is not appropriate. The starting point for the SP5/84 approach to time apportionment is that the employee's contractual right to earnings for the work performed usually accrues from day to day. Authority for this view comes from *Varnam v Deeble* (58 TC 501), although that case was not directly concerned with attributing earnings to UK duties for the purposes of the charge to UK tax. In *Platten v Brown* (59 TC 408), it was held that correct attribution on a time apportionment basis should employ units of days rather than hours.

The courts have consistently taken the view that time apportionment should not be applied to earnings that can be specifically allocated either to duties performed in the UK or to duties performed elsewhere. So time apportionment would be inappropriate in a case where the contract of employment specifically allocated earnings to periods spent working in the UK or overseas. Provisions in a contract of employment that regulate the amount of time to be devoted to the employment, dealing with matters such as the number of days to be worked, the length of holidays or how to calculate compensation do not amount to an allocation of particular parts of remuneration to particular days of work.

This appendix gives examples of how the time apportionment approach envisaged by SP5/84 applies in practice. Self-Assessment Helpsheet IR211 approaches apportionment by calculating the earnings from the employment that are not taxable in the UK. The total earnings are multiplied by a fraction where the numerator is the number of days worked outside the UK and the denominator is the number of days worked in pursuit of the employment during the tax year. Where there are no UK-based earnings taxable under either section 25 or section 27 ITEPA, the resultant figure will be entered at Box 1.31 on the employment page as foreign earnings not taxable in the UK. Although the amount that

is not taxable is sometimes referred to as "overseas workday relief", it is not a statutory relief from tax subject to the claims machinery in Section 42 TMA 1970.

Note 4 to IR211 clarifies what is meant by days worked overseas. They are defined as those days that have been spent outside the UK substantially performing the duties of the employment. "Substantially" should be taken as meaning "for the most part". In *Platten v Brown* there is the example of an employee who spends a whole day working in the UK but then leaves the country that evening on an overseas business trip. It would be difficult to say as a matter of contract that the employee's earnings for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the earnings for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

There are two questions of fact to be addressed in order to attribute the earnings for a particular day. These are:

- whether the day has been spent substantially performing the duties of the employment
- where those duties have been performed.

Employees should retain evidence such as travel documents and business diaries to demonstrate how they have calculated the earnings from overseas workdays. The following comprehensive example illustrates some practical issues.

Example (Monica)

M is resident but not ordinarily resident in the UK. Her salary of £100,000 is paid directly into an offshore bank account. Her contract of employment provides for a five-day 40-hour working week with 22 days holiday plus public holidays - a total of 230 workdays.

During 2005-06, her employer sent her to work at its branch in India for the whole of October and November, a period of 45 weekdays. She also attended the branch office in India on the first Saturday and Sunday in October and spent three other Saturdays working on her employer's Indian premises. She received a special bonus of £15,000 awarded solely in recognition of her work in India.

In addition, she attended her employer's Munich office on five separate occasions during the year. On four of these occasions, she left the UK after work and stayed overnight before returning to the UK on the following evening. On the final occasion, she left the UK on a Friday evening and spent the weekend in Munich. She spent three hours of the Sunday reading papers relevant to a meeting on the following day. She returned to the UK on Monday evening.

M was substantially performing the duties of her employment on the five non-weekdays spent working in India, giving a total 50 workdays in India. The Sunday in Munich was not an overseas workday so her duties in Germany encompassed five workdays. The special bonus was on the facts solely attributable to the performance of duties in India.

Time apportionment produces the following result –

UK duties - Salary $100,000 \times 180/235 = 76,595$ (Section 25 ITEPA)

Overseas duties - Salary $100,000 \times 55/235 = 23,405$ plus 15,000 = 38,405

Example - variation A

Following her return to the UK, M's employer gave her time off in lieu of the weekends spent working in India. The denominator in the fraction would become 230 and not 235.

UK duties - Salary $100,000 \times 175/230 = 76,086$ (Section 25 ITEPA)

Overseas duties - Salary $100,000 \times 55/230 = 23,914$ plus 15,000 = 38,914

Example - variation B

Facts are as variation A plus M spent the whole of Sunday 30 September travelling to India and was granted a further day off in lieu when she returned to the UK. That day should also be counted as an overseas workday increasing the numerator by one to 56.

UK duties - Salary $100,000 * 174/230 = 75,652$ (Section 25 ITEPA)

Overseas duties - Salary $100,000 * 56/230 = 24,348$ plus 15,000 = 39,348

Practical issues – international business travel

The time of departure or arrival and the duration of international business travel can make it extremely difficult to decide whether a particular day should be regarded as a UK or an overseas workday. In these specific circumstances, HMRC is prepared to accept that the following treatment provides a reasonable basis for determining the status of such a day: International flight or journey lasting no more than seven hours

- Morning arrival – UK workday
- Morning departure – overseas workday
- Afternoon arrival – overseas workday
- Afternoon departure – UK workday

International flight or journey lasting more than seven hours

- Morning arrival – half UK workday and half overseas workday
- Morning departure – overseas workday
- Afternoon arrival – overseas workday
- Afternoon departure – half UK workday and half overseas workday

A morning or afternoon arrival or departure is judged according to the time that the aircraft, vessel or train actually arrives or departs, not the scheduled times.

Where a journey involves more than one international flight, a one hour transfer addition may be added to the actual flight times to determine whether the total flight time lasts more than seven hours. International business travel that takes place on a Saturday, Sunday or Bank Holiday is subject to the same treatment as any other day. Note: HMRC may accept alternative approaches to quantifying overseas workdays if the available evidence indicates that such an approach better reflects the facts.

13.20 Relocation expenses

Section 271(1) ITEPA provides a somewhat limited relief for relocation expenses.

- (1) No liability to income tax in respect of earnings arises by virtue of—
- (a) the provision of removal benefits to which this section applies, or
 - (b) the payment or reimbursement of removal expenses to which this section applies.

A full discussion of this relief requires a chapter to itself, but one point is relevant here. Section 271(2) ITEPA disapplies the relief for employees taxed on the remittance basis:

Subsection (1) does not apply if (disregarding this section) the earnings

are general earnings to which either of the following sections applies—

- (a) section 22 (chargeable overseas earnings for year when remittance basis applies and employee ordinarily UK resident), or
- (b) section 26 (foreign earnings for year when remittance basis applies and employee not ordinarily UK resident).

However in the case of non-ordinarily resident employees this is relaxed by informal concession:

HMRC were asked to clarify whether or not the exemption for relocation expenses within Section 271 ITEPA 2003 was available against earnings taxed on the remittance basis. HMRC confirmed that the current legislation does not provide for relocation exemption to be available where the remittance basis is claimed. However HMRC were aware of existing practice whereby the relocation exemption was applied before apportionment in respect of non-UK workdays. Although this methodology was not consistent with the existing legislation HMRC were content to allow the practice to continue.²⁵

13.21 Remittance after year which earnings are “for”

Suppose:

- (1) T receives earnings for year (1); the earnings are taxed on the remittance basis and are not remitted in that year.
- (2) the earnings are remitted in year (2).

For a resident and ordinarily resident employee, s.22 ITEPA provides:

(1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—

- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
- (b) the employee is ordinarily UK resident in that year.

(2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of “taxable earnings” from the employment in that year. ...

Similarly, for a resident but not ordinarily resident employee, s.26 ITEPA

²⁵ Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008
www.hmrc.gov.uk/consultations/expat-mins-180908.htm.

provides:

- (1) This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee is not ordinarily UK resident in that year, if the general earnings are neither—
 - (a) general earnings in respect of duties performed in the UK, nor
 - (b) general earnings from overseas Crown employment subject to UK tax.
- (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of “taxable earnings” from the employment in that year.

The earnings are “taxable earnings from the employment in that year” ie year (2). In year (1) the earnings are not “taxable earnings” (as defined).

13.22 Remittance after employment ceases

The charge on the remittance basis applies “whether or not the employment is held at the time when the earnings are remitted”: ss.22(3) and 26(3) ITEPA.

13.23 Remittance of earnings “for” year that employee is not UK resident

To be “overseas earnings” the earnings must be “for” a year of assessment in which the employee was resident and ordinarily resident in the UK. Accordingly, any earnings “for” a year during which the employee was not UK resident can be remitted at any time without a charge to tax.

13.24 Remittance when non-resident

Suppose earnings taxable on the remittance basis are remitted in a year when the employee is non-resident. In the HMRC view the earnings are taxable. EI Manual provides:

42371. Foreign earnings taxed at time of receipt in UK: *Example* [February 2006]

An employee is resident but not ordinarily resident in the UK in 2004/05. She has earnings for that year of £10,000 in respect of duties performed

outside the UK. She is paid the £10,000 in New York in 2005/06. In 2006/07 she remits £5,000 of those earnings to the UK. The result is that this employee is chargeable under Section 26(2) ITEPA 2003 on £5,000 in 2006/07.

This employee is likely to be resident in the UK in the year of remittance but she is assessable on the remittance even if she is not. What matters is her residence status in the year when the money was earned (see EIM42201). She will also be assessable on any further remittances out of the £5,000 balance that remains.

Note that the employee is chargeable on any remittances to the UK even if her employment ceases in 2005/06 (see EIM42370).

Is this correct? It is a surprising anomaly compared to the position for RFI, enforcement may be difficult, but this is the most natural reading of the legislation.

13.25 Receipt or remittance after death of employee

Section 13(4) ITEPA provides:

If the tax is on general earnings received, or remitted to the UK, after the death of the person to whose employment the earnings relate, the person's personal representatives are liable for the tax.

EI Manual provides:

42380. Basis of assessment for general earnings: Earnings received after the death of an employee or office holder [February 2006]

When an employee or office holder dies, earnings received (or, if the employee was subject to the special rule for certain foreign earnings, received in the UK) after the date of death are treated as income of the personal representatives and not the income of the deceased. They are assessable on the personal representatives in the same way as if they had been received by the employee or office holder (see generally EIM42201). The earnings will, of course, all have been earned in periods before the date of death even though they are assessable only on receipt.

If it is contended that earnings cannot be attributed to any particular period during the lifetime of the deceased employee or office holder, see EIM40005.

So it is the place where duties were performed and the residence and ordinary residence status of the employee when the remuneration was earned that counts. The residence position of the personal representatives at the time the earnings are received (or, where the special rules for certain foreign earnings apply, received in the UK) is irrelevant.

In cases where an employee or office holder has died the employer will follow the instructions at page 16 of the Employer's Further Guide to PAYE. By following those instructions the employer will account for tax in the following way:

- where payments are made in the tax year in which the employee died, and before a P45 is issued, the employer will calculate the tax due using the tax code in use before the employee died
- where payments are made in the tax year in which the employee died, but after the P45 has been issued, the employer will use code BR
- when payments are made in a tax year following that in which the employee died the employer will prepare a new deductions working sheet and will use code BR.

The statutory assessing position for earnings received by personal representatives after the death of an employee or office holder is set out in EIM42390. In many cases, adopting the statutory position would place an additional burden upon the personal representatives and family of the deceased but would not result in materially different overall tax liability. Sensible administrative procedures should be used in this type of case.

Normally, you can take the pay and tax shown on the deceased's P45 as received in the period before the date of death, and follow EIM42410. However you should use the strict basis of assessment, and follow EIM42390, in cases:

- where it is requested, or
 - where you know that a substantial amount has been paid after the date of death.
- For these purposes a substantial amount means a sum in excess of £1,500.

The tax chargeable on the personal representatives is a debt due from and payable out of the deceased's estate.

As regards:

- the strict basis of assessment for the personal representatives of a deceased employee or office holder, see EIM42390
- the time limit for assessments on the personal representatives, see EIM42400
- the treatment of earnings received up to the date of death, see EIM42410.

42390. Earnings received after the death of an employee or office holder: The charge on personal representatives [February 2006]

If an employee or office holder dies and earnings are received after the date of death, the personal representatives are charged to tax on them (see EIM42380). They are charged:

- at the basic rate only
- in the year the earnings are received (or, where the special rules for certain foreign earnings apply, received in the UK)
- without any allowances, deductions or reliefs except for the deductions, reliefs and exemptions that would have been due to the employee had they lived.

The personal representatives cannot claim deductions for expenses that they incur separately themselves. The main deductions due are therefore:

- expenses within Sections 336 to 338 ITEPA 2003 incurred by the employee or office holder (see EIM31620 onwards)
- balancing allowances due to the employee or office holder; balancing charges will also fall on the personal representatives (see EIM36500 onwards)
- foreign travel and accommodation expenses within Sections 341, 342 and 370 to

376 ITEPA 2003 incurred by the employee or office holder (see EIM34000 onwards)

- professional fees and subscriptions within Sections 343 and 344 ITEPA 2003 (see EIM32880 onwards)
- where a lump sum is assessable under the "golden handshake" provisions the various exemptions that are available under Sections 404 to 414 ITEPA 2003 (see EIM13500 onwards).

A deduction that is due is not limited to expenses actually paid by the deceased. The personal representatives can have a deduction for an expense that the deceased was due to pay but that the representatives actually settle.

As regards:

- the time limit for assessing personal representatives, see EIM42400
- the treatment of earnings received up to the date of death, see EIM42410.

42400. Earnings received after the death of an employee or office holder: Time limits for assessments on personal representatives [May 2010]

The normal 5 year 10 month time limit for making assessments applies where earnings are received after the death of an employee.²⁶

This is because the earnings are deemed to be the income of the personal representatives (see EIM42380). So the 3 year 10 month assessing time limit in Section 40 TMA 1970 relating to income arising or accruing up to the date of death does not apply.

The SA manual sets out the procedures relating to personal representatives.

As regards earnings received before the date of death see EIM42410.

42410. Death of employee or office holder: Earnings received up to the date of death [May 2010]

When an employee or office holder dies, any earnings received before the date of death are chargeable on the employee in the normal way. But if the employee has died before filing a return for the period in which the earnings were received, the executors or personal representatives will be asked to complete returns to the date of death. In these circumstances the special rules at EIM42380 to EIM42400 do not apply and any assessment on the personal representatives must be made within 3 years and 10 months from the end of the year of assessment in which the employee died.

With effect from 1 April 2010 the time limit is 4 years from the end of the tax year in which the employee dies.

The SA manual sets out the procedures relating to personal representatives.

Where the arising basis applies, there is clearly a tax charge for earnings received after death by the PRs.

Where the remittance basis applies, it is difficult to see how there could be a charge on earnings received in the UK after the death of the employee, since the tax charge only arises on receipt by a relevant person, and there

26 [Author's note: This is out of date from 2010/11].

are no relevant persons after the death of an employee.

13.26 Remittance from earnings for mixed UK/foreign duties

13.26.1 The statutory position from 2008/09

This section considers the position where:

- (1) an employee who is a remittance basis taxpayer, and who is resident but not ordinarily resident, receives earnings for duties which are performed partly in and partly out of the UK.
- (2) The earnings are received abroad.

The earnings are taxed partly on an arising basis and partly on the remittance basis, and the earnings received constitute a mixed fund consisting of what I will call (1) taxed UK earnings and (2) untaxed foreign earnings.

The statutory position is (in short) taxed UK earnings (mixed fund category (a)) are remitted before untaxed foreign earnings (mixed fund category (b)), but later years' earnings are taxed before earlier years'. So employees would need to keep each year's earnings in separate accounts and never remit more than the taxed income in the account.

13.26.2 HMRC practice in 2008/09

SP 5/84 paras 1 & 2 summarised the taxation of earnings for a resident non-ordinarily resident individual. The SP then explained the practice before 1983²⁷ and continued:

27 "3 Where an employee resident but not ordinarily resident in the UK performs the duties of a single office or employment both in and outside the UK and is remunerated wholly abroad, he is permitted, by a broad interpretation of the decision in the case of *Sterling Trust v IRC* 12 TC 868, to say that any remittances made to the UK are made primarily out of general earnings for that year in respect of duties performed in the UK assessable under [s.15 ITEPA], and only any balance out of general earnings chargeable under s.26 on remittance. [Author's Note: This is arguably correct in law and not a concession: see 12.13.1 (Remittance from mixture of taxed and untaxed income).]

4 However, where part of the general earnings are remitted to the UK, it has been the practice of the Revenue to regard the proportion of the earnings remitted to the UK, as in respect of duties performed both in and outside the UK, and to treat that proportion of such earnings as is attributable to duties performed outside the UK as

5 The practice changed with effect from 6 April 1983 when the Revenue introduced a simplified procedure for employees who—

- (a) are resident but not ordinarily resident in the UK;
- (b) perform duties of a single employment both in and outside the UK, so that they are potentially chargeable under both ITEPA ss.[15] and 26, in respect of general earnings from that employment; and
- (c) receive part of their general earnings in the UK and part abroad.

In such cases, provided the general earnings chargeable under s.[15] are arrived at in a reasonable manner (ie in the absence of special facts, the proportion of the general earnings, including benefits in kind, relating to UK duties is arrived at on a time basis by reference to working days), the Revenue are prepared to accept that a charge under s.26 will arise only where the aggregate of general earnings remitted to the UK exceeds the amount chargeable under s.[15] for that year; and to restrict the charge under s.26 to the excess of the aggregate over the charge under s.[15].

This continued to apply in 2008/09, by concession. The 2nd ed of the RDR Manual provided:

35240 Remittances from mixed funds - Identifying nature of remittance [June 2010]

For 2008-09 tax year only HMRC will continue to operate Statement of Practice 5/84 on the same basis as in 2007-08. The statement of practice will operate on a concessionary basis until the end of the tax year 2008-09 and where appropriate apply instead of provisions in Schedule 7 Finance Act 2008 (for example instead of the mixed fund rule). This temporary measure is intended [to] help ensure a smooth transition to the new legislation in 2008-09 for employers and employees who use the statement of practice.

(This was omitted from the online version as it applied only to 2008/09.)

13.26.3 *Position from 2009/10*

SP 1/09 provides:

remitted to the UK for the purposes of s.26.”

I find this difficult to follow (paras 3 and 4 do not seem consistent) but it does not now matter.

Transfers made from an offshore account holding only the income or gains relating to a single employment

4. Sections 809Q ITA onwards set out rules to determine the kinds and amount of income or chargeable gains remitted to the UK from a fund containing more than one kind of income and capital, or income, or capital of more than one tax year. Such a fund is defined in sections 809Q and 809R as a “mixed fund”. Where amounts are transferred to the UK out of a mixed fund, Section 809Q(3) requires that the individual’s tax liability is calculated by reference to each individual transfer. This transfer by transfer approach is referred to below as the “mixed fund rule”. This is a change to HMRC’s previous practice, with respect to employees to whom SP 5/84 applied, which was to allow the tax liability to be calculated by reference to the total amount transferred to the UK during the tax year as a whole.

5. In the circumstances outlined in this statement of practice, HMRC will accept that certain individuals who are resident but not ordinarily resident in the UK do not have to apply the mixed fund rule and can continue to calculate their tax liability by reference to the total amount transferred out of a mixed fund during the tax year as a whole, rather than by reference to individual transfers.

13.26.4 *Accounts qualifying for the concessions*

Only certain accounts qualify for the concessionary treatment in the SP:

6. Employees who are resident but not ordinarily resident in the UK and who perform duties of an office or employment both inside and outside the UK, do not have to apply the mixed fund rule in respect of transfers from a particular account where:

[1] The mixed fund is an account held solely by the employee;²⁸ and

28 This requirement is slightly relaxed in Notes of the Joint Expatriate Forum 19 January 2010 accessible www.hmrc.gov.uk/consultations/expat-mins-190110.pdf.

“Joint accounts. These fall outside the SP1/09 procedures. The current view is that when the joint account is with a trailing spouse who has no income or gains in her own right whatsoever then these can now be included within the SP1/09 arrangements. HMRC made it clear however that there were no de minimis levels agreed and that other than a share of any interest credited to the joint account by the bank a trailing spouse could not introduce any other income or gains to the account.” Various other relaxations of SP 1/09 are also mooted in this document. HMRC subsequently said:

Where an account is held in the joint names with a spouse or civil partner who has no

[2] The account only contains employment income from a single employment plus:

- [a] Any interest arising only on that account, and
- [b] Any gains arising from foreign exchange transactions in respect of the funds in that account
- [c] Any gains arising on employee share scheme related transactions
- [d] Any proceeds from employee share scheme related transactions, not otherwise covered at paragraph 7, in respect of amounts paid by the employee in acquiring the shares.

7. The employment income from that employment may include:

- [1] Employment income (subsection 809Q(4)(a));
- [2] Relevant foreign earnings (subsection 809Q(4)(b));
- [3] Foreign specific employment income (including termination payments and the proceeds from employee share schemes) (subsection 809Q(4)(c)), and
- [4] Employment income subject to a foreign tax (subsection 809Q(4)(f)).

Take care not to pay any dividend income into the account!

13.26.5 *The concessions*

SP 1/09 contains two concessions. First:

8. Employees who are resident but not ordinarily resident in the UK may also choose not to apply the mixed fund rule if the account contains only income or gains of a kind listed at paragraphs 6 and 7 above, but for more than one tax year. Where this is the case, the ordering rules at section 809Q(3) shall be applied—ie on a last in first out basis.

9. Where the employee applies this statement of practice, amounts transferred out of the account to the UK will be treated as comprising the kinds of income and gains in the order set out in section 809Q(4) for the tax year as a whole.

The SP then repeats a point made in para 6:

10. Accounts containing income or gains of more than one employment

income or gains of their own, except a share in any interest that arises on the account, HMRC has agreed that SP1/09 can apply. This responds to concerns expressed by stakeholders and will apply to all accounts that qualify for SP1/09 on or after 6 April 2009: HMRC Notice 4 March 2010 [2010] STI 612.

are not covered by this statement of practice.

11. Accounts containing income or gains of more than one individual are not covered by this statement of practice.

After a comment on apportionment (set out above) the SP then provides:

14. Where an employee resident but not ordinarily resident in the UK performs the duties of a single office or employment both in and outside the UK and is remunerated wholly abroad, he is permitted, by a broad interpretation of the decision in the case of *Sterling Trust v IRC* (12 TC 868), to say that any remittances made to the UK are made primarily out of general earnings for that year in respect of duties performed in the UK assessable under Section 15, and only any balance out of general earnings chargeable under Section 26 on remittance.

This text is copied from SP 5/84 though *Sterling Trust* cannot have any relevance to the ITA remittance basis.

15. However, where part of the general earnings are remitted to the UK, it was the practice of HMRC to regard the proportion of the earnings remitted to the UK, as being in respect of duties performed both in and outside the UK, and to treat that proportion of such earnings as were attributable to duties performed outside the UK as remitted to the UK for the purposes of Section 26.

16. The practice changed with effect from 6 April 1983 when HMRC introduced a simplified procedure for employees who:

- are resident but not ordinarily resident in the UK;
- perform duties of a single employment both in and outside the UK, so that they are potentially chargeable under both Sections 15 and 26 ITEPA 2003 in respect of general earnings from that employment; and
- receive part of their general earnings in the UK and part abroad.

17. In such cases, provided the general earnings chargeable under Section 15 are arrived at in a reasonable manner (ie in the absence of special facts, the proportion of the general earnings, including benefits in kind, relating to UK duties is arrived at on a time basis by reference to working days), HMRC is prepared to accept that a charge under Section 26 will arise only where the aggregate of general earnings remitted to the UK exceeds the amount chargeable under Section 15 for that year; and to restrict the charge under Section 26 to the excess of the aggregate over the charge under Section 15.

This text is also repeated from SP 5/84 (the comment on the pre-1983

position is of no relevance now).

SP 1/09 is classified as a statement of practice (though it is clearly a concession). This is presumably because HMRC are not now supposed to grant concessions (except for minor and transitional matters). It appears that the Government have realised that the SP is an unsatisfactory stop-gap measure:

When SP1/09 was introduced, the intention was that it would apply for one year, before being legislated in Finance Bill 2010. Since April 2009 HMRC has worked towards this aim, including consultation and meeting with external stakeholders. However, it has not been possible to resolve all the outstanding issues in time to legislate the practice this year.

In these circumstances, the Financial Secretary to the Treasury has agreed that SP1/09 will apply for a further year until 5 April 2011.

HMRC will continue working with stakeholders on the issues which remain unresolved, with the aim being that SP1/09 will be brought into legislation as part of Finance Bill 2011.²⁹

That deadline was missed. The remittance consultation paper proposed action in the FA 2012:

2.96 SP 1/09 is very widely used by expatriate employers and employees, and is important to business. The Government is seeking to put this non-statutory practice on a statutory footing to provide expatriate employees and their employers with greater clarity and certainty. This will preserve the features and details of the current practice.

2.97 There are some specific issues for SP 1/09 on which the consultation process will seek to clarify whether the simplified legislative treatment should apply. These are listed below.

Employee becomes not UK resident part way through a tax year and continues to deposit money into a bank account

2.98 The Government expects that this situation would usually only arise in a year in which an employee was leaving the UK permanently. If this is the case, the provisions which allow the tax year to be split into periods of residence and non-residence in certain circumstances (currently contained in Extra Statutory Concession A11), should apply and there would be no need for separate provision in the legislation that will replace SP 1/09.

2.99 However, the Government would welcome views on whether there

29 HMRC Notice 4 March 2010 [2010] STI 612.

are any other circumstances in which this situation would arise and, therefore, whether specific legislative provision might be necessary.

Employee holds bank accounts containing employee share scheme transactions in respect of non UK situs assets

2.100 The Government considers that such accounts should only fall within the simplified treatment if the employee has little or no control over how the transactions are paid. For example, it is common that, when shares or share options which are acquired by virtue of the employment vest to the employee, the amount treated as earnings at that date will be paid through the payroll into the same account as salary payments. The simplified treatment should apply to such transactions.

2.101 However, the Government does not propose that accounts containing capital gains from share scheme transactions should qualify for simplified treatment because the employee can control when and into which account the transactions are paid after the shares have vested.³⁰

That deadline was also missed, and the government now promise action in 2013:

The legislation of Statement of Practice 1/09, which is one of the simplifications to the existing non-domicile rules, will be taken forward in Finance Bill 2013 to take effect from April 2013.³¹

The response to the Residence Consultation paper provides:

1.15 In December 2011 the Government announced that legislating SP1/09 would be deferred by a year and would be effective from 6 April 2013. It will publish a separate consultation document outlining its proposals for SP1/09 and draft legislation later this year. As announced at Budget 2012, the existing SP1/09 will remain in force for the 2012-13

30 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.

31 Ministerial Statement 6 December 2011 [2011] STI 3355. The enactment of SP1/09 is not correctly described as a simplification, but it is easier to talk about simplification than to do it. For lobbying on extension of the scope of SP 1/09, see HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011) para 2.120-2.126. www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf

tax year.³²

13.27 Earnings from Ireland

In the following discussion:

“Irish earnings” means earnings from an Irish resident employer; it is assumed that the conditions for the remittance basis are in principle all met (duties performed outside the UK, etc).

“Pre-2008 earnings” means earnings arising before 6 April 2008.

The UK/Ireland DTA also needs to be considered but it is not discussed here. Similar points arise in relation to RFI; see 9.20 (RFI from Ireland).

13.27.1 *Earnings from 2008/09*

The position for earnings from 2008/09 is straightforward. The ITA remittance basis treats Irish earnings in the same way as any other foreign earnings. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively) that Irish earnings were taxed on an arising basis.

13.27.2 *Pre-2008 earnings remitted from 2008/09*

This change raised the problem of transition. Para 82 Sch 7 FA 2008 provides:

- (1) This paragraph applies in relation to an individual’s general earnings for the tax year 2007–08 or any earlier tax year (“the relevant tax year”) if the individual—
 - (a) was UK resident in that year, but
 - (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year...
- (3) In relation to the general earnings, the definition of “foreign

32 HMRC, *Statutory definition of tax residence and reform of ordinary residence: a summary of responses* (June 2012)
www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf.

employer” in section 721(1) of ITEPA 2003 has effect as if at the end there were inserted “and not resident in the Republic of Ireland”.

Amended as para 82(3) directs, s.721(1) ITEPA provides:

“foreign employer” means an individual, partnership or body of persons resident outside the UK and not resident in the UK *and not resident in the Republic of Ireland*.

Thus (although this might surprise the residents of Eire) an Irish resident employer is not (for this purpose) a “foreign employer” so pre-2008 Irish earnings are not “chargeable overseas earnings” so the remittance basis does not apply to them. Para 82(3) is simply a roundabout way of disapplying the remittance basis charge for pre-2008 Irish earnings. EN FB 2008 provides:

395. Subsection (3) ensures that the existing restriction on the application of the remittance basis in the case of employment income from employers resident in the Republic of Ireland continues to apply in relation to the remittance on or after 6 April 2008 of general earnings arising before that date. This will prevent double taxation as the general earnings have already been taxed when they arose.

In short, if:

- (1) Irish earnings arose before 2008/09; and
 - (2) The earnings are remitted on or after 2008/09
- there is no tax charge on remittance.

13.27.3 *Why is para 82(3) needed?*

Before 2008, s.721 ITEPA provided:

“foreign employer” means

(a) in the case of an employee resident in the UK, an individual, partnership or body of persons resident outside the UK and not resident in the UK or the Republic of Ireland,

Under this definition, earnings from an Irish resident employer could not have been chargeable overseas earnings so at first it seems that para 82(3) is not needed. It may be that para 82(3) is otiose; it is inserted by mistaken

analogy with para 83(3) (which is needed). However para 82(3) is needed on the assumption that where

- (1) earnings arose before 2008/09 and
- (2) the earnings are remitted from or after 2008/09

the question of whether the earnings qualify as chargeable overseas earnings is to be determined by the legislation as it stands in the year of remittance, and not by the legislation as it stood at the time that the earnings arose.

13.27.4 *Pre-2008 Irish earnings: tax position before 2008/09*

As noted above, according to statute, the remittance basis did not apply if the employer was resident in the Republic of Ireland: pre-2008 Irish earnings were taxable on the arising basis and not the remittance basis. The discrimination against Ireland was contrary to EU law.³³ This work advised that those with pre-2008 Irish earnings should only agree to pay tax on the remittance basis. Where tax has been paid on an arising basis which would not have been paid on a remittance basis, a repayment claim should be made.³⁴ Under para 82(3) discussed above, pre-2008 Irish source income which was not remitted before 2008/09 escapes UK tax altogether, since unremitted Irish source income was not lawfully taxable when it arose and it is not (from 2008/09) taxable on remittance. I expect that this will not often arise in practice, but occasionally it may be important.

13.28 Termination payments

A termination payment is charged under part 6 ITEPA. A full discussion would need a long chapter. The income is categorised as specific employment income rather than general earnings. The consequence is to disapply the usual territorial rules. Instead, s.413(1) ITEPA provides a different territorial exemption:

This Chapter does not apply if the service of the employee or former employee in the employment in respect of which the payment or other

³³ The point was discussed in some detail in the 6th edition of this book para 9.51 and 10.4.2.

³⁴ For the limitation period see s.106 FA 2007.

benefit is received included foreign service comprising-

- (a) three-quarters or more of the whole period of service ending with the date of the termination or change in question, or
- (b) if the period of service ending with that date exceeded 10 years, the whole of the last 10 years, or
- (c) if the period of service ending with that date exceeded 20 years, one-half or more of that period, including any 10 of the last 20 years.

The key term is “foreign service”. The definition covers the entire history of the taxation of employment income. Section 413(2) ITEPA provides:

(2) In subsection (1) "foreign service" means service to which subsection (3), (4) or (6) applies.

(3) This subsection applies to service in or after the tax year 2003-04 such that-

- (a) any earnings from the employment would not be relevant earnings, or
- (b) a deduction equal to the whole amount of the earnings from the employment was or would have been allowable under Chapter 6 of Part 5 (deductions from seafarers' earnings).

(3A) In subsection (3)(a) "relevant earnings" means-

- (a) for service in or after the tax year 2008-09, earnings-
 - (i) which are for a tax year in which the employee is ordinarily UK resident,
 - (ii) to which section 15 applies, and
 - (iii) to which that section would apply, even if the employee made a claim under section 809B of ITA 2007 (claim for remittance basis) for that year, and
- (b) for service before the tax year 2008-09, general earnings to which section 15 or 21 as originally enacted applies.

(4) This subsection applies to service before the tax year 2003-04 and after the tax year 1973-74 such that-

- (a) the emoluments from the employment were not chargeable under Case I of Schedule E, or would not have been so chargeable had there been any, or
- (b) a deduction equal to the whole amount of the emoluments from the employment was or would have been allowable under a foreign earnings deduction provision.

(5) In subsection (4) "foreign earnings deduction provision" means-

- (a) paragraph 1 of Schedule 2 to FA 1974,
- (b) paragraph 1 of Schedule 7 to FA 1977, or

- (c) section 192A or 193(1) of ICTA.
- (6) This subsection applies to service before the tax year 1974-75 such that tax was not chargeable in respect of the emoluments of the employment-
 - (a) in the tax year 1956-57 or later, under Case I of Schedule E, or
 - (b) in earlier tax years, under Schedule E,or it would not have been so chargeable had there been any such emoluments.

The EI manual provides:

13690. Exceptions: "Foreign service": Definition [January 2010]

Section 413 ITEPA 2003 (as amended by Section 30 Schedule 7 FA 2008)

EIM13680 explained that a payment or benefit may be fully excepted from the charge under Section 401 ITEPA 2003 if sufficient of the employee's service counts as "foreign service". Foreign service has a special meaning for this purpose.

All periods when an employee is a seafarer eligible for 100% deduction from earnings under Part 5 Chapter 6 ITEPA 2003 (see EIM33000) count as "foreign service".

Otherwise, this guidance deals only with the legislation relating to periods of service after 5 April 2003. For earlier periods after 5 April 1974 the rules are effectively the same but they are expressed in different statutory language (see SE13690 for details if necessary). If service before 6 April 1974 is involved, see EIM13705.

A period of service counts as "foreign service" where the earnings from the employment are not "relevant earnings". Note that this is a negative test so that if the earnings are found to be "relevant earnings", that period will not count towards the exception.

If there is a period of service when there are no earnings from the employment, apply the guidance as if there were.

Up to 5 April 2008 "relevant earnings" means earnings within Section 15 or Section 21 ITEPA 2003 as then enacted (see EIM40002). So if the earnings fall within any other provision, the period counts as "foreign service". From 6 April 2008, "relevant earnings" means that the employee is ordinarily resident in the UK and the earnings are within Section 15 ITEPA 2003 (see EIM40002). So if any other situation applies to the earnings, the period counts as "foreign service". Combine the periods that count as "foreign service" by applying the rules above and then give the full exception if any one of the requirements from the table below are met (see example EIM13970):

Total period of service down to the relevant date Requirement for full exception to be given

All cases of whatever duration: 3/4 of the whole period of service is foreign service.

More than 10 years: The last 10 years are foreign service.

More than 20 years: ½ of the whole period of service (including 10 of the last 20 years) is foreign service.

For this purpose treat successive employments with different members of the same group of companies as if they were a single continuing employment where the payment takes account of that service, see example EIM13975.

Note: a taxpayer with some foreign service who does not meet the requirements in the table above may be able to claim a foreign service reduction instead, see EIM13700.

13700. Foreign service: Reduction of charge [May 2010]

EIM13690 explained that if an employee whose service includes foreign service fails to satisfy the conditions for full exception, the employee might still qualify for a reduction in the Section 401 ITEPA 2003 charge.

If service before 6 April 1974 is involved, see EIM13705.

The £30,000 threshold must be deducted before calculating the reduction (see example EIM13980). The result, for this purpose, is called the amount charged to tax (in Section 414(2) ITEPA 2003 it is called the amount that would otherwise count as employment income). It is this amount charged to tax that is reduced if the qualifying conditions are met.

The amount of the reduction is the amount charged to tax multiplied by the length of foreign service and divided by the length of total service before the relevant date (the meaning of relevant date is the same as in EIM13680). See example EIM13985.

Note that:

- the taxpayer can claim the foreign service reduction by notice in writing to the Inspector at any time up to four years from the end of the year of assessment to which the claim relates (for claims made before 2 April 2010 the limit is five years after 31 January following the end of the relevant year of assessment)

13705. Exceptions: Foreign service: Service before 6 April 1974

This guidance applies only if you have a case involving foreign service (see EIM13680) and it includes service before 6 April 1974.

The rules were different before 6 April 1974. This may affect the calculation of full exemption (see EIM13690) and will affect the calculation of a reduction (see EIM13700).

In testing whether full exemption is due under EIM13690 this difference is now likely to matter only for the first and last tests of exemption bulleted there (namely, where 3/4 of the whole period of service is needed to be foreign service, or where ½ of the whole period including 10 of the last 20 years is needed). So:

- consider the other test in EIM13690 first. If the last 10 years are foreign service give the exemption without considering the pre-6 April 1974 period. If not

- assume that all the pre-6 April 1974 service is not foreign service and see whether either of the other two tests in EIM13690 is satisfied. If either of them is met, give the exemption without considering the pre-6 April 1974 period. Otherwise

- if none of the three tests in EIM13690 are satisfied without considering some of the pre-6 April 1974 period, see SE13710 (last paragraph) to find out whether the service of that period counts as foreign service. Then apply the first (and if necessary the third) bulleted test in EIM13690.

In testing whether reduction of charge is due under EIM13700, any service before 6 April 1974 will affect the calculation. See SE13710 (last paragraph) to find out whether the service of that period counts as foreign service. Then finish the calculation required by EIM13700.

A payment satisfying the above conditions can be remitted free of income tax to the UK. It is a moot point why the payment does not give rise to CGT, but in practice HMRC do not take that point.

13.29 Overseas Crown employment

General earnings from overseas Crown employment subject to UK tax³⁵ are taxed on an arising basis, regardless of residence, domicile and place of work. In the case of UK resident and ordinarily resident employees, such earnings are charged in the normal way under s.15 ITEPA and excluded from the remittance basis because the Crown is not a foreign employer. In the case of a UK resident and non-ordinarily resident individual, the earnings are charged in the normal way under s.15 and excluded from the remittance basis by s.26(1)(b) ITEPA.³⁶ In the case of a non-resident employee, the charge is under s.27 ITEPA.³⁷ The 1955 Royal Commission Report explains the reason:

International comity does not permit the salary of the servant of one State to be taxed by another State: consequently a Crown servant, even if spending his whole time on work abroad, is not amenable to the local taxing jurisdiction and, if he is to be taxed at all, must be taxed by the UK taxing authority. No doubt the scale of remuneration for Crown

35 The expression “general earnings from overseas Crown employment subject to UK tax” is defined in s.28 ITEPA.

36 See 13.16 (Resident but not ordinarily resident employee).

37 See 13.17 (Non-resident employee).

servants abroad is fixed with these considerations in mind.³⁸

13.29.1 *Exception for low paid overseas crown employees*

EIM40209 records that HMRC have made the following orders under s.28(5) ITEPA:

General earnings from overseas Crown employment in respect of an employee who:

1. is not resident in the UK;
2. was engaged outside the UK; and
3. is employed in a grade the maximum rate of pay of which is less than the maximum rate of pay of an executive officer employed in the same department of the UK Civil Service and working in inner London, is excepted from the operation of Section 27(2) of the Act.

With effect from 13 June 2006, the order does not apply to Queen's Gurkha Officers or any other members of the Brigade of Gurkhas who were recruited for that Brigade in Nepal.

This replaces the former concession A25. EN ITEPA provides:

The concession reflects long-standing practice and is in keeping with international treaty obligations.

The use of a salary level and grade in the concession is an attempt to focus its benefits on genuinely temporary or unestablished staff. However, enshrining these existing limits in primary legislation is not thought to be desirable. Instead it is intended to preserve the existing flexibility of the Inland Revenue to adapt the concession to new circumstances by enabling the Board of Inland Revenue to make an order which sets out the limits of the new statutory exception: see section 28(5) and (6) of the Act. Section 28(7) and (8) of the Act, which deal with the factors by reference to which the statutory exception may be expressed, are intended to reflect the scope of this existing flexibility. Section 717(2) of the Act means that an order does not need to be made by statutory instrument.

The new statutory exception will operate on the charges to tax arising by virtue of section 25(2) of the Act (UK-based earnings for year when employee resident, but not ordinarily resident, in UK) or section 27(2) (UK-based earnings for year when employee not resident in UK). It is

³⁸ Cmd 9474 para 307.

intended that it should operate at least as widely as the present exception conferred by ESC A25.

13.30 Seafarers

The rules relating to seafarers and duties performed on vessels and aircraft are too specialist to be considered here, but reference should be made to s.39(3) and ss.40, 372 and Chapter 6 Part 5 ITEPA. On residence of seafarers, see 3.20 (Seafarers).

13.31 Lower-paid employee exemption

BN55 (22 April 2009) provides:

Individuals with small amounts of foreign employment income

5. Individuals employed in the UK are currently required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. This is the case even where there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.

6. This obligation to file a return will be removed with effect from 6 April 2008 where such individuals have overseas employment income of less than £10,000 and overseas bank interest of less than £100 in any tax year, all of which is subject to a foreign tax.

EN FB 2009 provides:

11. This clause introduces a new income tax exemption for low-income employees working in the UK who meet certain conditions. Such individuals will typically be migrant workers employed in seasonal work in the agricultural or service sectors in UK and in other countries in the same tax year and whose overseas income is subject to tax where it is earned. Previously they were required to file a Self Assessment tax return, even in situations where there was no, or very little, tax to pay. This exemption removes that requirement in most cases.

According, s.828A ITA provides:

Chapter 1A

Exemption for Persons Not Domiciled in UK

828A Introduction

This Chapter provides for an exemption from liability to income tax for an individual for a tax year if-

- (a) the individual is UK resident in the tax year but not domiciled in the UK in the tax year,
- (b) section 809B does not apply to the individual for the tax year, and
- (c) conditions A to F in section 828B are met.

I refer to these conditions as “**LPE conditions A to F**” to avoid confusion with the myriad other conditions in ITA.

Section 809B will only apply if the individual makes a claim under s.809B, which where the LPE conditions are satisfied will never happen, so the important requirements are the LPE conditions.

13.31.1 *LPE condition A: UK employment*

Section 828B(1) ITA provides:

Condition A is that in the tax year the individual has income from an employment the duties of which are performed wholly or partly in the UK.

Section 828D ITA defines “employment”:

- (1) This section applies for the purposes of this Chapter.
- (2) “Employed” and “employment” have the same meaning as in the employment income Parts of ITEPA 2003: see Chapter 1 of Part 2 of that Act.

If these were income-tax wide definitions it would not be necessary to say this here.

13.31.2 *LPE condition B: cap on RFE*

Section 828B(2) ITA provides:

Condition B is that, if the individual’s income for the tax year consists of or includes relevant foreign earnings—

- (a) the amount of the relevant foreign earnings does not exceed

- £10,000, and
(b) all of that amount is subject to a foreign tax.

Section 828D(5) defines “relevant foreign earnings”:

“Relevant foreign earnings”, in relation to an individual, means what would be the individual’s relevant foreign earnings for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(3)).

Section 828D(4) ITA defines “foreign tax”:

“Foreign tax” means any tax chargeable under the law of a territory outside the UK.

See 55.16 (“Subject to tax”).

HMRC say:

HMRC also confirmed that the £10,000 limit for relevant foreign earnings applied for the full year and was not affected by ESC A11 split year treatment. Therefore, an individual who had already earned more than £10,000 abroad in the UK tax year before he or she arrived would not be eligible.³⁹

13.31.3 *LPE condition C: cap on RFI*

Section 828B(3) ITA provides:

Condition C is that, if the individual’s income for the tax year consists of or includes income that is relevant foreign income by virtue of section 830(2)(e) of ITTOIA 2005—

- (a) the amount of that income does not exceed £100, and
- (b) all of that amount is subject to a foreign tax.

In order to understand the reference to s.830(2)(e) ITTOIA one needs to read it together with s.830(1):

39 Joint Expatriate Forum on Tax and Nics: 29 July 2010 Meeting Note
www.hmrc.gov.uk/consultations/expat-mins-290710.pdf

- (1) In this Act “relevant foreign income” means income which—
 - (a) arises from a source outside the UK, and
 - (b) is chargeable under any of the provisions specified in subsection (2) (or would be so chargeable if section 832 did not apply to it).
- (2) The provisions are ...
 - (e) Chapter 2 of Part 4 (interest),

13.31.4 *LPE condition D: no other income/gains*

Section 828B(4) ITA provides:

Condition D is that the individual has no other foreign income and gains⁴⁰ for the tax year.

This condition will in practice rarely be satisfied if (as is likely) the individual has a foreign currency foreign bank account because any withdrawal from the account is more likely than not sooner or later to give rise to some trivial gain.⁴¹

13.31.5 *LPE condition E: exclusion of higher rate taxpayers*

Section 828B(5) ITA provides:

Condition E is that the individual would not for the tax year be liable to income tax at a rate other than the basic rate or the starting rate for savings if this Chapter did not apply to the individual for the tax year.

13.31.6 *LPE condition F: no tax return*

Section 828B(6) ITA provides:

Condition F is that the individual does not make a return under section 8 of TMA 1970 for the tax year.

40 Section 828D(3) ITA incorporates the standard commonsense definition of “foreign income and gains”:

““Foreign income and gains”, in relation to an individual, means what would be the individual's foreign income and gains for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(2)).”

41 See 52.10 (Foreign currency bank accounts: CGT).

Since a return is due if HMRC choose to require it, the position is that HMRC have a power to withdraw the exemption (by requiring a return). The rule is thus: no tax is due unless HMRC happen to ask for it. This is a new development in tax policy; one hopes it does not become standard. HMRC say:

HMRC sought to clarify the intention behind the new legislation which was to remove the obligation on overseas migrant workers on low incomes to file an SA return in cases where there was little or no tax to pay in the UK. It was true that such individuals would no longer qualify for the tax exemption if they filed a return to claim a tax repayment, but the tax exemption was merely the vehicle for delivering the administrative saving. External delegates failed to understand why the exemption should also be lost if the individual filed not a tax return but an R40 to claim repayment of PAYE on UK income.⁴²

In fact, the R40 form is not a tax return under s.8 TMA: *Osborne v Dickinson* [2004] STC (SCD) 104.

The RDR Manual provides:

32070 - Remittance Basis: Accessing the remittance basis: Claiming the remittance basis: Calculation of income tax liability - exemption for non-domiciles with small amounts of foreign employment income
[June 2010]

Individuals employed in the UK are usually required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. However in many cases there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.

From 6 April 2008 there is no obligation for individuals who are resident but not domiciled in the UK for a tax year to file a return as long as the individual is not claiming the remittance basis under ITA07/s809B and meets all of the following conditions (ITA07/s828A).

[The Manual summarises conditions A - F and continues:] If all of these conditions apply, the individual receives an exemption from liability to income tax, in so far as that liability is attributable to the individual's foreign income or gains for the tax year (termed the 'relevant amount').

42 Joint Forum on Expatriates Tax and NICs 16 July 2009, accessible www.hmrc.gov.uk/consultations/expat-mins-160709.htm.

Broadly, the relevant amount is deducted from what would otherwise be the amount of the individual's liability to income tax for the tax year under ITA07/s23.

This means that the individual is automatically taxed on the Arising Basis for that tax year, and does not have to complete a return.

Most individuals who fulfil Conditions A to F are expected to use the Arising Basis and not complete a return. However there may be a small number of non-domiciled individuals who fulfil these conditions but who wish to use the remittance basis in respect of their foreign income and gains and are within the 'below £2,000 threshold' user group (ITA07/s809D). Such individuals will have to complete a return in order to claim the remittance basis under s809D; this will of course mean that Condition F of ITA07/s828A is no longer met, refer to RDRM32110 Unremitted foreign income and gains below £2,000 threshold.

13.31.7 *The exemption*

Section 828C ITA provides:

- (1) The exemption is given by deducting the relevant amount from what would otherwise be the amount of the individual's liability to income tax for the tax year under section 23.
- (2) "The relevant amount" is so much of the amount of the individual's liability to income tax as is attributable to the individual's foreign income or gains for the tax year.

I refer to this as the **"Lower-paid employee exemption."**

13.31.8 *Restriction on exemption*

Section 828C ITA provides:

- (3) But if for the tax year the individual's total income is reduced by any deductions which fall to be made at Step 3 of the calculation in section 23 from the individual's foreign income or gains for the tax year, subsection (2) has effect as if the individual's foreign income or gains for the tax year were reduced by the amount of the deductions.
- (4) And if the individual is entitled under.
 - (a) sections 2 and 6 of TIOPA 2010(double taxation arrangements: relief by agreement), or

(b) section 18(1)(b) and (2) of that Act (relief for foreign tax where no double taxation arrangements), to a tax reduction in respect of the individual's foreign income or gains for the tax year, what would otherwise be the relevant amount is reduced by the amount of that reduction.

13.31.9 *Administration: avoiding issue of SA return*

HMRC say:

HMRC stressed that, whilst the exemption was not designed for employees on inter-company transfers, it had become clear that the exemption could be applied to certain assignees, in particular those from India and China.

3 The main issue was the difficulty in identifying the relevant individuals. Unless informed that they qualify for filing exemption, HMRC would issue SA returns, thereby preventing them from taking advantage of s828A. HMRC had designed an election letter for Expats to meet this need: agents should submit this letter at the same time as the 64-8, and after the P46 (Expat) had been filed, which would ensure that no SA return is issued.

This is essential as if a SA return is issued, the relief is lost. For the form of the letter, see Fisher, "Expat Exemption", *Taxation* 3 March 2011 p.18.

HMRC continue:

There was a separate issue with employers using EPM App 6 with a month 12 adjustment to eliminate any residual liability whose employees are required to submit a SA return. However, as some had very simple tax affairs, there was a case for allowing them to use s828A whilst remaining within EPM6. HMRC will seek to engage with such employers to reach a suitable agreement for their employee base. In such cases, the election letter will need to be completed but retained by the employer. If there are individuals who do not qualify, the employer or agent will need to submit an SA1 to request a return.

A similar case existed for NR individuals who submit SA returns to get personal allowances under DTAs.⁴³

43 Joint Expatriate Forum on Tax and Nics: 29 July 2010 Meeting Note
www.hmrc.gov.uk/consultations/expat-mins-290710.pdf

13.31.10 *Commentary*

Almost every requirement of the lower-paid employee exemption is anomalous. If the aim is to remove obligations to file a return where there is little or no UK tax at stake, why is it so limited? The provision presumably reflects effective lobbying by special interest groups concerned with lower-paid employees rather than a serious attempt to address compliance cost issues.

13.32 Tax equalisation

The EIM provides:

77040. Appendix 4: Not ordinarily resident employees: Tax equalisation [February 2006]⁴⁴

... In addition to salaries and benefits, employers may also provide their employees with the benefit of tax equalisation. This usually means that the employer undertakes to meet on the employee's behalf any additional tax payable above the tax that the employee would have paid in his home country. It is well established that such payments made on behalf of employees form part of their earnings. But before 2002, there was a difference of view between the then Inland Revenue and a number of accountancy firms about the extent to which such tax equalisation payments represent earnings in respect of duties performed in the UK.

The issue matters for NOR and NR employees: see 13.17 (Non-resident employee).

The view taken by the Inland Revenue and subsequently by HMRC is that tax equalisation payments represent earnings wholly referable to duties performed in the UK where the underlying tax liability is similarly wholly referable to duties performed in the UK. Therefore, where an employer pays a tax liability arising under section 25 on an employee's behalf, that payment will itself represent earnings wholly chargeable under section 25.

This view was approved by a Special Commissioner in 2001 in the case of *Perro v Mansworth* [2001] STC (SCD) 179. The Special Commissioner stated that it was an inescapable fact that the payment of tax by the appellant's employer was an emolument (earnings) in respect of UK duties since that tax was only payable because of the performance of duties in the UK.

Ms Perro's net earnings were time apportioned in accordance with SP5/84 in order to find

44 The text is derived from Tax Bulletin 59.

the net attributable to UK duties as there was no specific attribution of salary or other benefits between UK and overseas duties. Following *Perro*, it has been accepted practice to gross up this net figure on the basis that the payment of tax on UK-based earnings represents additional earnings wholly referable to duties performed in the UK.

The Special Commissioner did not consider the treatment of reimbursement of tax on income other than employment income chargeable under what is now section 25. The employer of a tax-equalised employee may reimburse UK tax on investment income or capital gains. Employers may also pay foreign tax liabilities on the employee's behalf. Following the decision in *Perro*, the Inland Revenue was asked to give its view on the treatment of such reimbursements.

When apportioning earnings between sections 25 and 26, it is necessary first to consider whether those earnings are wholly referable to UK or non-UK duties on the facts. Clearly if this is so, there is no need to consider time apportionment. If the earnings are not wholly referable either to UK or non-UK duties, then time apportionment will be necessary in accordance with SP5/84.

If an employer reimburses personal tax liability arising on non employment income⁴⁵ such as bank interest, dividends or capital gains, then the first question is whether that reimbursement is a payment of earnings that relates wholly to either UK or non-UK duties. We do not consider that the physical presence of the employee in the UK in order to perform employment duties is sufficient justification for treating such reimbursements as wholly in respect of duties performed in the UK. In the absence of unusual facts, we believe that such earnings should be time apportioned. This will produce net section 25 earnings that will then need to be grossed up. The gross up will be on the basis that the payment of UK tax on earnings within section 25 is itself a payment of earnings wholly chargeable under section 25.

With regard to foreign tax payments, the attribution between sections 25 and 26 will depend upon the facts and circumstances. If the foreign tax relates solely to overseas duties, then the payment of that tax by the employer will comprise earnings wholly referable to duties performed outside the UK that cannot be charged to tax under section 25. Alternatively, the foreign tax may be charged on worldwide income so that time apportionment is likely to provide the only practical mechanism for determining the attribution between sections 25 and 26.

With regard to the treatment of employer payment / reimbursement of tax chargeable under section 26, SP5/84 states that provided the earnings chargeable under section 25 are arrived at in a reasonable manner; HMRC is prepared to accept that a charge under section 26 will arise only where the aggregate of earnings received in the UK exceeds the amount chargeable under section 25 for that year. The amount chargeable under section 26 is therefore restricted to the excess of the aggregate over the amount chargeable under section 25.

Where the employer meets UK tax liability under section 26, the payment of that tax to HMRC will clearly be remitted to the UK. It is logical that the payment of the section 26

45 [Author's note]. Employees are likely to claim the remittance basis so the tax charge is only on remitted income and remitted foreign gains. It is not clear that the employee ought to pay the charge on remitted income or gains as remittance is a decision of the employee. However it may be appropriate to do so.

liability will itself be a payment of earnings chargeable under section 26 and as the tax payment will be remitted to the UK, the related gross up will also be wholly chargeable under section 26.

There can be significant practical difficulties in identifying whether earnings relate solely to non-UK duties and therefore fall within section 26. In such cases, HMRC would not generally dispute time apportionment between sections 25 and 26 on the basis of working days. If any earnings were allocated solely to section 26 as attributable wholly to non-UK duties, evidence should be available to justify the attribution, in the event of an HMRC enquiry.

Non resident employees

Some tax-equalised employees are not resident in the UK. They may perform substantive duties of their employment in this country. Unless the specific terms of a Double Taxation Agreement confer an exemption from UK tax on UK source employment income, such employees will be liable under section 27 ITEPA on earnings in respect of duties performed in the UK. Earnings for duties performed outside the UK will fall outside of the charge to UK tax on employment income. HMRC adopts the same approach to tax equalisation for non-resident employees as for those resident but not ordinarily resident employees whose earnings are apportioned between sections 25 and 26.

The following simple examples are intended to illustrate the basic approach to tax equalisation earnings described in this appendix. It is recognised that many cases will have much more complex facts and that the ensuing calculations will be similarly complex.

Example (Tanya)

T has been sent to the UK to work at her employer's UK branch for two years from 1 January 2005. She is resident but not ordinarily resident in the UK from the day of her arrival. In addition to her UK duties, her employer requires her to make regular and extensive visits to an overseas branch of its business in order to monitor an important project. Whilst assigned to the UK, T is subject to her employer's policy on tax equalisation which provides for her to receive the same net salary and benefits as if she had remained in her home state.

During 2005-06, T performed the duties of her employment on 225 days. She spent 158 days working in the UK and 67 days working overseas. Net salary and benefits from her employment were £100,000 of which £60,000 was received in the UK. Her employer was obliged to pay her tax liabilities in accordance with its tax equalisation policy. For simplicity, all calculations assume that T's income is chargeable to UK tax at 40%.

Scenario 1

T's only tax liability was incurred in the UK on the earnings from her employment.

Calculation of UK tax for 2005-06

Net salary and benefits	100,000
Less amount attributable to overseas workdays – 67/225 (30%)	(30,000)
Attributable to the performance of UK duties	70,000
Gross up for UK tax at 4/6	46,666
UK-based earnings taxable under section 25 ITEPA	116,666
Tax at 40%	46,666
Remitted to the UK - 60,000 plus section 25 tax of 46,666	106,666
Section 26 ITEPA - SP5/84	Nil

Scenario 2

Facts as above but T's employer also paid UK tax liability of £5,000 on her investment

income. As the £5,000 is not directly referable to the performance of duties inside or outside the UK, it falls to be time apportioned in accordance with SP5/84. Therefore, the £5,000 has been added to net salary and benefits before calculating and deducting the amount attributable to overseas workdays.

Calculation of UK tax for 2005-06

Net salary and benefits	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40% 49,000	
Remitted to the UK - 60,000 plus section 25 tax 49,000 and other	114,000
UK tax 5,000	
Section 26 ITEPA - SP5/84	Nil

Scenario 3

Additionally, T's employer pays overseas tax liability of £5,000 direct to an overseas tax authority. The overseas tax is referable solely to the performance of duties outside the UK and is therefore excluded from the section 25 calculation.

Calculation of UK tax for 2005-06

Net salary and benefits	110,000
Less overseas tax payment	(5,000)
Salary and benefits to be time apportioned	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40%	49,000
Remitted to the UK - 60,000 plus section 25 tax 49,000 and other	114,000
UK tax 5,000	
Section 26 ITEPA - SP5/84	Nil

Scenario 4

Facts are the same as in Scenario 2 except that £70,000 out of the £100,000 net salary and benefits has been remitted to the UK.

Calculation of UK tax for 2005-06

Net salary and benefits	105,000
Less amount attributable to overseas workdays – 67/225 (30%)	(31,500)
Attributable to the performance of UK duties	73,500
Gross up for UK tax at 4/6	49,000
UK-based earnings taxable under section 25 ITEPA	122,500
Tax at 40% 49,000	
Remitted to the UK - 70,000 plus section 25 tax 49,000 and other	124,000
UK tax 5,000	
Net section 26 ITEPA - SP5/84	1,500
Gross up for UK tax at 4/6	1,000
Foreign earnings taxable under section 26	2,500
Total taxable earnings (sections 25 and 26)	125,000
Tax at 40%	50,000

13.33 Accountancy services benefit

Joint Forum on Expatriates Tax and NICs records a discussion on tax return preparation fee benefits:

It was made it clear that these discussions and any proposals or guidance based on them will relate only to circumstances where:

- due to tax equalisation arrangements, the employer pays for accountancy services relating to the preparation and submission of the individual assignees' Tax Returns
- tax return preparation is part of a wider bundle of services provided by the adviser as negotiated with the employer
- S9A enquiry services are not included as part of the bundle

In such circumstances HMRC accept that the level of benefit in kind should be arrived at by apportionment based on the facts. The mechanics of how the apportionment should be calculated are an operational issue and CPTT had already shared with delegates (within the meeting notes of 30 August 2007) an exchange with Ernst & Young LLP on this topic. CPTT did not have authority to agree fixed round sum figures applicable in all cases. Indeed, it was clear from the evidence submitted that there is no 'one size fits all'. However, CPTT were prepared, in due course, to provide some clarity of the level at which they perceive there to be a risk worthy of enquiry.

The intention therefore would be to:

- establish a level of tax return preparation benefit which if returned or exceeded will not prompt any enquiry
- continue to allow for different figures to be reported based on the available facts
- highlight that where levels of tax return preparation benefits are reported below this level it remains open to HMRC/CPTT to enquire into the precise figures and apportionment methodology to check the accuracy of Returns submitted

CPTT is still analysing the information provided but Martin Dwyer was able to say that the available evidence suggested that a level of around £600 per head would be reflective of a situation where a home and host country Return was completed.

HMRC remain of the view that any accountancy fees paid in respect of S9A enquiry work should be reported as benefits in kind. HMRC will continue to look for evidence of the payment of such fees and their position will be as clarified within the meeting notes of the Forum held on 30 August 2007, as follows:

'Where we find evidence to indicate that the costs of accountancy

services related entirely to resolving the S9A enquiry, we will regard these costs as giving rise to a taxable benefit in kind. If your clients are unable to accept this treatment, we will need to refer an appropriate case to the Commissioners.'

Subsequent to the meeting HMRC has now completed its analysis of the information provided. From this we conclude that the levels of benefits which appear both realistic and reasonable are £650 per head where a home and host country Return is completed and £250 per head where only the host country (UK) Return is completed. Under existing circumstances these figures will represent levels which if returned or exceeded will not prompt an enquiry from CPTT. However, it has been recently highlighted by external representatives that the proposed levels of analysis necessary to support access to the remittance basis from 6 April 2008 is likely to lead to increases in the costs charged for UK Tax Return preparation where the remittance basis is claimed. If this proves to be the case there would be a need to recognise this and revise the figures for 2008-09 onwards accordingly.

HMRC reiterate that the sums quoted above are not intended to represent an agreed level of benefits which must be reported across the board. We recognise that there is unlikely to be consistency in the precise make up of the bundle of accountancy services provided across different cases and by the variety of advisers involved. Rather, the aim is to indicate a level at which CPTT perceive the level of risk to be worthy of enquiry.⁴⁶

A subsequent meeting of the forum records:

Q10:Accountancy fees in regard to partially tax-equalised employees

It is not clear which partially tax-equalised cases are covered by the agreement announced in the 18 September 2008 forum notes. By 'partially tax-equalised' we mean when the employer agrees to tax-equalise part of the employee's income/gains but not the whole. This is very common, often employers will tax equalise only employment income and even then might exclude elements such as share options.

The notes mention 'due to tax equalisation arrangements, the employer pays for accountancy services' which perhaps suggests the precise nature of the equalisation arrangements is not in point. However, Appendix 6 of HMRC's Employment Procedures Manual – 'Modified PAYE' arrangements – says that those arrangements may be applied only to

46 Note of Meeting 18 September 2008, accessible
www.hmrc.gov.uk/consultations/expat-mins-180908.htm

tax-equalised employees and, for that purpose, 'tax-equalised' means that: '..... the employer must equalise liability to UK Income Tax on all general earnings (see note) subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, ordinarily resident or domiciled outside the UK.

Note: Where the employee is tax-equalised on all general earnings but not, for example, on taxable awards of securities options or the award of securities at undervalue (which is specific employment income) the employee may still be included within the arrangement as long as all the other conditions are satisfied'.

It would seem rather restrictive to take the same approach in relation to accountancy fees as an employee's tax equalisation computations can be just as (possibly more) complex if only part of the earnings are equalised.

HMRC Answer: It is the case that the guidance contained within the Forum meeting notes of 18 September 2008 was intended to relate to 'fully' tax equalised cases including those capable of inclusion within an EP Appendix 6 agreement.

Where partial tax equalisation applies it seems to me that the extent to which the accountancy advice directly benefits the individual rather than the employer must increase and I would expect this to be reflected within the level of benefits reported.

As in the case of tax equalised individuals, where HMRC wishes to check the amounts reported we will look at the amounts paid for the basket of services provided and seek to establish those parts of this basket which directly benefit the employer. It should then be possible to calculate a benefit in kind figure by reference to the balance on a per head basis.

...

HMRC were asked to give clarification regarding whether or not the levels of accountancy fees, clarified at the meeting held on 18 September 2008, could be applied in respect of the 2008-09 SA Tax Returns. Martin Dwyer confirmed that these amounts were intended to reflect levels below which HMRC perceive there to be a risk and above which it was unlikely that HMRC would make an enquiry into the matter of accountancy fees relating to Tax Return preparation. They were not intended to represent mandatory levels of benefits which should be included on Tax Returns as HMRC accept that there will be cases where the true level of benefit varies from the figures provided for guidance. Against this background, however, HMRC confirmed that the same guidance could be extended to apply to 2008-09 SA Returns. As was confirmed in the answer to Q10, however, that guidance was intended to relate to fully tax equalised cases, including those capable of inclusion within an EP Appendix 6 agreement. Whilst it was accepted that this

would include cases where tax equalisation applied to all employment income other than share based remuneration, the guidance was not intended to apply to circumstances where partial tax equalisation arrangements are in place which can often apply to a small proportion of the overall compensation package.⁴⁷

The figures have not been increased:

2.6 HMRC thanked the forum for supplying details of the current level of accountancy fees. Based on this information, HMRC would continue not to enquire into benefits in kind reported for fees for preparing tax returns of £650 for UK and home country returns and £250 per head for UK only returns. This would only apply for fully tax equalised employees and does not cover the cost of section 9A enquires which should be reported in full.

2.7 The level of fees would be reviewed again in 2013/14 and HMRC would be seeking views from the forum at the end of 2012.⁴⁸

13.34 DT Relief: employment exercised outside UK

Article 15(1) OECD Model provides:

1. Subject to the provisions of Articles 16,[directors]⁴⁹ 18 [pensions]⁵⁰ and 19 [government service]⁵¹, salaries, wages and other similar remuneration derived by a resident of a Contracting State in respect of an employment shall be taxable only in that State unless the employment is exercised in the other Contracting State. If the employment is so exercised, such remuneration as is derived therefrom may be taxed in that other State.

To follow this one must bear in mind which Contracting State is which. It is easier to follow if rewritten with the UK in mind, thus:

1. salaries, wages and other similar remuneration derived by a resident

47 Note of meeting 16 July 2009, accessible
www.hmrc.gov.uk/consultations/expat-mins-160709.htm

48 Joint Expatriate Forum on Tax and NICs: 10 February 2011.

49 See 13.37 (DTAs: Directors Fees).

50 See 23.7 (Double Taxation relief).

51 See 13.38 (DT relief: government service).

of a *foreign* Contracting State in respect of an employment shall be taxable only in that *foreign* State unless the employment is exercised in *the UK* [the other Contracting State]. If the employment is so exercised *in the UK*, such remuneration as is derived therefrom may be taxed in *the UK* [that other State].

The OECD commentary provides:

1. Paragraph 1 establishes the general rule as to the taxation of income from employment (other than pensions), namely, that such income is taxable in the State where the employment is actually exercised. ... One consequence of this would be that a resident of a Contracting State who derived remuneration, in respect of an employment, from sources in the other State could not be taxed in that other State in respect of that remuneration merely because the results of this work were exploited in that other State.

2. The general rule is subject to exception only in the case of pensions (Article 18) and of remuneration and pensions in respect of government service (Article 19). Non-employment remuneration of members of boards of directors of companies is the subject of Article 16....

2.2 The condition provided by the Article for taxation by the State of source is that the salaries, wages or other similar remuneration be derived from the exercise of employment in that State. This applies regardless of when that income may be paid to, credited to or otherwise definitively acquired by the employee.

The DTR Manual provides:

1920 Employment [April 2007]

The employment Article in our double taxation agreements is normally called the Dependent Personal Services Article. In most of the UK's agreements the Article is based on Article 15 (Dependent Personal Services) of the OECD Model Convention (see DT153) and the terms of this Model Article are summarised below. It must, however, always be checked that the Article in the particular agreement with which you are concerned follows the OECD Model Article before reliance is placed upon the guidance below.

13.34.1 “*Salaries, wages and other similar remuneration*”

The OECD commentary provides:

2.1 Member countries have generally understood the term "salaries, wages and other similar remuneration" to include benefits in kind received in respect of an employment (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

The DTR Manual provides:

1920 Employment [April 2007]

... The words 'salaries, wages and other similar remuneration' should be understood in the broadest sense as covering all income from an employment, including benefits and share option gains chargeable under Section 135 ICTA 1988 (see DT1925).

13.34.2 *Where is employment exercised?*

The OECD commentary provides:

1. ... Employment is exercised in the place where the employee is physically present when performing the activities for which the employment income is paid.

In *Kljun v HMRC* [2011] UKFTT 371 (TC) the Judge said:

[18] What does exercised mean? The English is clear and it is where the employee is physically present when performing the activities for which the employee is being paid.

13.35 DT relief: employment exercised within UK

This takes us to Art. 15(2) OECD Model:

2. Notwithstanding the provisions of paragraph 1, remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:

- a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
- b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and

c) the remuneration is not borne by a permanent establishment which the employer has in the other State.⁵²

For convenience I set this out as it applies to the UK:

2. ... remuneration derived by a resident of a *foreign* Contracting State in respect of an employment exercised in *the UK* [the other Contracting State] shall be taxable only in the *foreign* [first-mentioned] State if:

- a) the recipient is present in *the UK* [the other State] for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
- b) the remuneration is paid by, or on behalf of, an employer who is not a resident of *the UK* [the other State], and
- c) the remuneration is not borne by a permanent establishment which the employer has in *the UK* [the other State].

The OECD commentary provides:

3. Paragraph 2 contains, however, a general exception to the rule in paragraph 1. This exception covers all individuals rendering services in the course of an employment (sales representatives, construction workers, engineers, etc.), to the extent that their remuneration does not fall under the provisions of other Articles, such as those applying to government services or artistes and sportsmen.

13.35.1 *Article 15(2)(a): limited days of presence*

Article 15(2)(a) provides:

a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned

⁵² For completeness, article 15(3) continues: “3. Notwithstanding the preceding provisions of this Article, remuneration derived in respect of an employment exercised aboard a ship or aircraft operated in international traffic, or aboard a boat engaged in inland waterways transport, may be taxed in the Contracting State in which the place of effective management of the enterprise is situated.” This is not discussed here; see OECD commentary para 9.

The OECD commentary provides:

4. The three conditions prescribed in this paragraph must be satisfied for the remuneration to qualify for the exemption. The first condition is that the exemption is limited to the 183 day period. It is further stipulated that this time period may not be exceeded “in any twelve month period commencing or ending in the fiscal year concerned”. This contrasts with the 1963 Draft Convention and the 1977 Model Convention which provided that the 183 day period should not be exceeded “in the fiscal year concerned”, a formulation that created difficulties where the fiscal years of the Contracting States did not coincide and which opened up opportunities in the sense that operations were sometimes organised in such a way that, for example, workers stayed in the State concerned for the last 5 ½ months of one year and the first 5 ½ months of the following year. The present wording of subparagraph 2 a) does away with such opportunities for tax avoidance. In applying that wording, all possible periods of twelve consecutive months must be considered, even periods which overlap others to a certain extent. For instance, if an employee is present in a State during 150 days between 1 April 01 and 31 March 02 but is present there during 210 days between 1 August 01 and 31 July 02, the employee will have been present for a period exceeding 183 days during the second 12 month period identified above even though he did not meet the minimum presence test during the first period considered and that first period partly overlaps the second.

5. Although various formulas have been used by Member countries to calculate the 183 day period, there is only one way which is consistent with the wording of this paragraph: the “days of physical presence” method. The application of this method is straightforward as the individual is either present in a country or he is not. The presence could also relatively easily be documented by the taxpayer when evidence is required by the tax authorities. Under this method the following days are included in the calculation: part of a day, day of arrival, day of departure and all other days spent inside the State of activity such as Saturdays and Sundays, national holidays, holidays before, during and after the activity, short breaks (training, strikes, lock-out, delays in supplies), days of sickness (unless they prevent the individual from leaving and he would have otherwise qualified for the exemption) and death or sickness in the family. However, days spent in the State of activity in transit in the course of a trip between two points outside the State of activity should be excluded from the computation. It follows from these principles that any entire day spent outside the State of activity, whether for holidays, business trips, or any other reason, should not be taken into account. A

day during any part of which, however brief, the taxpayer is present in a State counts as a day of presence in that State for purposes of computing the 183 day period.

5.1 Days during which the taxpayer is a resident of the source State should not, however, be taken into account in the calculation. Subparagraph a) has to be read in the context of the first part of paragraph 2, which refers to “remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State”, which does not apply to a person who resides and works in the same State. The words “the recipient is present”, found in subparagraph a), refer to the recipient of such remuneration and, during a period of residence in the source State, a person cannot be said to be the recipient of remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State. The following examples illustrate this conclusion:

— Example 1: From January 01 to December 01, X lives in, and is a resident of, State S. On 1 January 02, X is hired by an employer who is a resident of State R and moves to State R where he becomes a resident. X is subsequently sent to State S by his employer from 15 to 31 March 02. In that case, X is present in State S for 292 days between 1 April 01 and 31 March 02 but since he is a resident of State S between 1 April 01 and 31 December 01, this first period is not taken into account for purposes of the calculation of the periods referred to in subparagraph a).

— Example 2: From 15 to 31 October 01, Y, a resident of State R, is present in State S to prepare the expansion in that country of the business of ACO, also a resident of State R. On 1 May 02, Y moves to State S where she becomes a resident and works as the manager of a newly created subsidiary of ACO resident of State S. In that case, Y is present in State S for 184 days between 15 October 01 and 14 October 02 but since she is a resident of State S between 1 May and 14 October 02, this last period is not taken into account for purposes of the calculation of the periods referred to in subparagraph a).

The DTR Manual provides:

1921 Short term visitor exemption 183 day rule [June 2009]

The first condition for exemption under Article 15(2) is that the employee must not be present in the UK for more than 183 days either ‘in the tax year concerned’ (as in Article 15(2)(a) of the 1980 UK/USA agreement) or ‘in any period of 12 months’ (found in Article 15(2)(a) of the 1985 UK/Norway agreement). It is important to distinguish between these formulae. The latter formula is a much tighter test than that used in

the agreement with the USA.

For example, a US resident seconded to work in the UK for a two year assignment arrives here on 15 October 1990 and leaves the UK on 1 October 1992. Depending on all the circumstances, he could be taxable in the UK only for the year 1991-92. For the years 1990-91 and 1992-93 he could meet the condition in Article 15(2)(a) because in both periods he was not present in the UK for 183 days 'in the tax year concerned'. By contrast, a Norwegian resident working in the UK would be taxable here throughout the period 15 October 1990 to 1 October 1992 under the test in the agreement with Norway.

Our agreements with Azerbaijan, Belgium, Bolivia, Denmark, Estonia, France, Ghana, Guyana, Iceland, Indonesia, Ivory Coast, Kazakhstan, Korea, Latvia, Malta, Mexico, Mongolia, Pakistan, Papua New Guinea, Sweden, Uganda, Ukraine, Uzbekistan, Venezuela and Vietnam also use the wording of the Norwegian agreement; and the agreement with New Zealand is similar. Most of the UK's agreements, however, use the tax/fiscal year formula.

Up until 5th April 2009, when counting to 183 days under Article 15(2)(a), a part day counts as a part day and days of arrival and departure and all other days spent inside the country of activity should be included in the calculation.

From 6th April 2009 onwards, when counting to 183 days under Article 15(2)(a), any part of a day, day of arrival, day of departure, and all other days spent in the UK such as Saturdays, Sundays, national holidays, holidays before during and after the period of work, short breaks (training, strikes, lock-out, delay in supplies), days of sickness (unless they prevent the individual from leaving and he would otherwise have qualified for the exemption) and death and sickness in the family should be included in the calculation as a day the person is present in the country of activity.

Days spent in the UK in transit in the course of a trip between two non-UK points should be excluded from the computation.

From 2008/09 onwards (this overlaps for a year with the previous day counting method), days during which the tax payer is a resident of the UK should not be included in the calculation. The conditions in the treaty are for remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State and does not apply to a person who is resident and works in the same State. For example if a person is a resident of the UK but is hired by an employer in another State, moves to that State where he becomes resident and is subsequently sent to work for a short period in the UK by his employer, we would only include days in the UK after the taxpayer

became a resident of the other State for the purposes of computing whether they had exceeded 183 days in the UK. Days in the UK when the taxpayer was a resident of the UK should not be included.

Similarly if a non-resident taxpayer is seconded to the UK for a short period by their employer and subsequently moves to and becomes a resident of the UK, days in the UK after they became a resident here should not be taken into account for the purposes of the calculation of the 183 days.

13.35.2 *Article 15(2)(b): payment by non-resident employer*

Article 15(2)(b) provides:

b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and

13.35.3 *Employer a partnership*

The OECD commentary provides:

6.1 The application of the second condition in the case of fiscally transparent partnerships presents difficulties since such partnerships cannot qualify as a resident of a Contracting State under Article 4 (cf. paragraph 8.2 of the Commentary on Article 4). While it is clear that such a partnership could qualify as an “employer” (especially under the domestic law definitions of the term in some countries, e.g. where an employer is defined as a person liable for a wage tax), the application of the condition at the level of the partnership regardless of the situation of the partners would therefore render the condition totally meaningless.

6.2 The object and purpose of subparagraphs b) and c) of paragraph 2 are to avoid the source taxation of short-term employments to the extent that the employment income is not allowed as a deductible expense in the State of source because the employer is not taxable in that State as he neither is a resident nor has a permanent establishment therein. These subparagraphs can also be justified by the fact that imposing source deduction requirements with respect to short-term employments in a given State may be considered to constitute an excessive administrative burden where the employer neither resides nor has a permanent establishment in that State. In order to achieve a meaningful interpretation of subparagraph b) that would accord with its context and its object, it should therefore be considered that, in the case

of fiscally transparent partnerships, that subparagraph applies at the level of the partners. Thus, the concepts of “employer” and “resident”, as found in subparagraph b), are applied at the level of the partners rather than at the level of a fiscally transparent partnership. This approach is consistent with that under which other provisions of tax Conventions must be applied at the partners' rather than at the partnership's level. While this interpretation could create difficulties where the partners reside in different States, such difficulties could be addressed through the mutual agreement procedure by determining, for example, the State in which the partners who own the majority of the interests in the partnership reside (i.e. the State in which the greatest part of the deduction will be claimed).

The DTR Manual provides:

1922 Employment [June 2011]

The second condition for exemption under Article 15(2) is that the remuneration which is the subject of the claim must be paid by, or on behalf of, an employer who is not UK resident.

What follows is guidance regarding when a claim can be accepted and when an enquiry into the claim may be required. It is not intended to replace or expand the commentary on the application of Article 15 in the OECD Model Tax Convention on Income and Capital.

The fact that an individual formally remains an employee of an overseas company does not on its own satisfy the test in Article 15(2)(b). Not only must the claimant remain an employee of the overseas company but the remuneration in respect of which the exemption is claimed must be paid by the overseas employer and not, for example, by a UK subsidiary company to whom the employee may have been seconded. Any statement on this aspect of a claim should be checked to ensure that it is consistent with

- i) other information in the papers (for example what does the return show?) and
 - ii) the position in other similar cases involving the same UK employer.
- If there is any doubt you should ask the agents to provide a statement from the UK company or the overseas employer, to confirm the extent to which, if at all, the overseas employer has continued to pay the claimant's remuneration either directly or by reimbursing the UK company.

Cases where remuneration continues to be ‘paid by’ the overseas employer, but there is a recharge of the cost of that remuneration to the UK company to whom the employee has been seconded, are frequently

a cause of difficulty. Claims should not be admitted where

- the employee remains formally employed by a company which is not resident in the UK and
- he is seconded to work for a UK resident company and
- the UK company for practical purposes functions as his employer during the UK assignment and
- the UK company bears the cost of the employee's remuneration, either by a direct recharge or as part of a management charge made by the non-resident employer.

When does a UK company function as an employer?

Guidance on the criteria for identifying the employer for the purposes of the Article is to be found in paragraphs 8 to 8.28 of the Commentary on Article 15 of the OECD Model Double Taxation Convention which should be considered in cases of difficulty and CAR PTI advisory will also be able to provide assistance. The starting point is whether under the domestic laws of the State of Source the services rendered in that State are provided in an employment relationship and that will determine how that State applies the Convention, i.e. whether the services are provided under a contract of service or under a contract for services. Where an employee works in the business of a UK company and that company obtains the benefits and bears any risks in relation to the work undertaken by the employee then that company is likely to be treated as his employer.

The mere fact that the UK company has borne the cost of the employee's remuneration is not on its own sufficient for that company to be treated as the employer. A UK company would not be regarded as the employer where the employee continued to work in the business of a non-resident company even though working at the premises of the UK company - for instance, an employee sent to the UK company to service equipment supplied by a non-resident company.

In this situation the services are being provided under a contract for services between the two companies and not under a contract of service with the United Kingdom company.

Paragraphs 8.16 to 8.27 of the Commentary provide other examples of cases where services are rendered under a contract of employment and where, alternatively, they are provided under a contract for services between two enterprises.

The following guidance may also be of assistance in practice. In the case of very short term secondees it is unlikely that an employee would be sufficiently integrated within the business of the UK company for that company to be regarded as his employer. For that reason it may be accepted that a UK company with whom an employee does not have a

formal contract of employment should not be treated as the employer for the purposes of Article 15 where that employee is in the UK for less than 60 days in a tax year and that period does not form part of a more substantial period when the taxpayer is present in the UK. The 60 days are to be counted using the “days of physical presence method” set out in paragraph 5 of the Commentary. Basically, if a person is physically present in the United Kingdom during any part of a day then that counts as a day in the United Kingdom for the purposes of this rule.

Further details about how this 60 day rule is applied can be found in Tax Bulletin issue 68.

Avoidance cases

Claims should not be admitted where payment by an overseas company forms part of an arrangement to avoid UK tax. PAYE Technical will advise in cases where, for example, the overseas employer is based in a tax haven or the employee is nominally employed by a company which exists to provide his services to the UK user of those services. Cases where an employment which existed prior to the employee’s assignment to the UK continues during that assignment usually do not cause difficulty. Cases where the employee has taken up a new formal employment with an overseas company at the time of assignment should be reviewed critically.

‘On behalf of’

Payments may be made ‘on behalf of’ a non-resident employer in cases where the payment is physically made by a UK company. It may be accepted that remuneration has been paid or benefits provided ‘on behalf of’ a non-resident employer if that non-resident ultimately bears the cost of such remuneration and benefits. Claims should not be admitted where a UK company pays remuneration or incurs the cost of benefits and does not receive reimbursement from the overseas employer. Such payments and costs are incurred in the interest of the UK company and not on behalf of the overseas employer.

Unless the claimant offers evidence that the UK company was reimbursed the cost of the taxpayer’s remuneration and benefits by the non-resident employer (and this can be checked with the relevant HMRC corporation tax specialist or Customer Relationship Manager dealing with the UK company’s Corporation Tax affairs) a claim under Article 15(2) should be resisted.

Where it is argued that remuneration has been paid ‘on behalf of’ an overseas employer, even though a UK company has paid the individual’s remuneration and the overseas employer has not reimbursed the cost, it should be pointed out that it is unlikely that, in these circumstances, the cost of the remuneration could be regarded as wholly and exclusively

incurred for the purposes of the UK company's trade and that, therefore, no deduction should be claimed for the cost of the remuneration in computing the UK company's taxable profit. Reference should be made to the tax case of *Robinson v Scott Bader and Co* (54TC757) which considers the inadmissibility of remuneration paid on behalf of another employer.

The decision in the Scott Bader case makes clear that the object of the person making the payment is decisive in determining whether or not a deduction is permissible in accordance with Section 74 ICTA 1988.

In relation to seconded employees there are three possible situations

- the payment to the employee is made solely in the interests of the overseas company;
- the payment is made partly in the interests of the UK company and partly in the interest of the overseas company or
- the payment is made solely in the interests of the UK company.

Only in the third case is a deduction available to the UK company in computing its profits.

Benefits

Even where basic remuneration continues to be paid by the overseas employer it is common for benefits (for example, the use of a flat) to be provided at the cost of the UK employer to whom the employee has been seconded. Subject to the other conditions in the Article, the basic remuneration may be exempt from UK tax but the condition in Article 15(2)(b) is not satisfied in relation to benefits in these circumstances because they are not 'remuneration paid by, or on behalf of,' the overseas employer (unless the cost of the benefits is borne by the overseas employer through a recharge).

Kljun v HMRC [2011] UKFTT 371 (TC) offers an illustration of a case within art 15(2)(b).

13.35.4 *Article 15(2)(c): PE in other state*

Article 15(2)(c) provides:

- c) the remuneration is not borne by a permanent establishment which the employer has in the other State.

The OECD commentary provides:

7. Under the third condition, if the employer has a permanent

establishment in the State in which the employment is exercised, the exemption is given on condition that the remuneration is not borne by that permanent establishment. The phrase "borne by" must be interpreted in the light of the underlying purpose of subparagraph c) of the Article, which is to ensure that the exception provided for in paragraph 2 does not apply to remuneration that could give rise to a deduction, having regard to the principles of Article 7 and the nature of the remuneration, in computing the profits of a permanent establishment situated in the State in which the employment is exercised. In this regard, it must be noted that the fact that the employer has, or has not, actually claimed a deduction for the remuneration in computing the profits attributable to the permanent establishment is not necessarily conclusive since the proper test is whether any deduction otherwise available for that remuneration would be allocated to the permanent establishment. That test would be met, for instance, even if no amount were actually deducted as a result of the permanent establishment being exempt from tax in the source country or of the employer simply deciding not to claim a deduction to which he was entitled. The test would also be met where the remuneration is not deductible merely because of its nature (e.g. where the State takes the view that the issuing of shares pursuant to an employee stock-option does not give rise to a deduction) rather than because it should not be allocated to the permanent establishment.

Kljun v HMRC [2011] UKFTT 371 (TC) offers an illustration of a case within art 15(2)(c).

13.35.5 *Who is the employer?*

The identity of the employer matters for condition (b) and (c).

The OECD commentary provides:

8. Paragraph 2 has given rise to numerous cases of abuse through adoption of the practice known as "international hiring-out of labour". In this system, a local employer wishing to employ foreign labour for one or more periods of less than 183 days recruits through an intermediary established abroad who purports to be the employer and hires the labour out to the employer. The worker thus fulfils *prima facie* the three conditions laid down by paragraph 2 and may claim exemption from taxation in the country where he is temporarily working. To prevent such abuse, in situations of this type, the term "employer" should be interpreted in the context of paragraph 2. In this respect, it should be

noted that the term “employer” is not defined in the Convention but it is understood that the employer is the person having rights on the work produced and bearing the relative responsibility and risks. In cases of international hiring-out of labour, these functions are to a large extent exercised by the user. In this context, substance should prevail over form, i.e. each case should be examined to see whether the functions of employer were exercised mainly by the intermediary or by the user. It is therefore up to the Contracting States to agree on the situations in which the intermediary does not fulfil the conditions required for him to be considered as the employer within the meaning of paragraph 2. In settling this question, the competent authorities may refer not only to the above-mentioned indications but to a number of circumstances enabling them to establish that the real employer is the user of the labour (and not the foreign intermediary):

- the hirer does not bear the responsibility or risk for the results produced by the employee's work;
- the authority to instruct the worker lies with the user;
- the work is performed at a place which is under the control and responsibility of the user;
- the remuneration to the hirer is calculated on the basis of the time utilised, or there is in other ways a connection between this remuneration and wages received by the employee;
- tools and materials are essentially put at the employee's disposal by the user;
- the number and qualifications of the employees are not solely determined by the hirer.

The DTR Manual provides:

1923 Employment [February 2006]

The third condition for exemption under Article 15(2) is that the remuneration of the employee must not be borne by a permanent establishment or fixed base which the employer has in the UK –see DT1710 onwards and DT219 for general guidance concerning the meaning of these terms.

This condition should be considered carefully in all cases where the employee has not apparently been assigned to work in the UK for a UK-resident company. If an employee has simply been seconded by his overseas employer to work here for a UK-resident company it will not usually be necessary to consider this condition.

A subsidiary company in the UK is not generally a permanent establishment of its overseas parent company (see DT1714). The

subsidiary is not in law part of its parent company but is a distinct legal person. A permanent establishment is simply a part of an overseas company which is transplanted in the UK. Customers and employees all contract with the overseas company rather than with a separate legal person in the UK. Company letter-paper often indicates how the UK operations are organised; the registered number and place of registration of a UK company are often given at the head or foot of the paper.

If operations in the UK are carried out through a permanent establishment, it should be assumed in the absence of evidence to the contrary that the cost of remuneration of an employee seconded to the permanent establishment is a deduction in computing the profits of the permanent establishment. This will be the normal basis of allocating costs in accordance with international tax principles. The permanent establishment should therefore be regarded as bearing the cost of that individual's remuneration unless there is evidence that the overseas Head Office continues to pay the employee and the cost is not allocated to the UK permanent establishment for UK tax purposes. A permanent establishment cannot be said to 'bear the remuneration' unless it is charged against its profits without a corresponding credit, for example by way of a management charge. In doubtful cases advice may be sought from the Inspector dealing with the accounts of the permanent establishment.

Sometimes dealing with the PAYE District may be the first contact which an overseas company has with the UK Revenue and it may not yet have been established whether or not the company has a permanent establishment in the UK. If the company has had no prior contact with the Revenue the Corporation Tax District which would have responsibility for the company (the District dealing with the area where the business premises of the company are located) should be asked to advise whether or not a permanent establishment exists in the UK (see DT1715 in cases of difficulty).

1924 Employment [April 2007]

Refer to Employment Income Technical all claims to the exemption of employment income from UK tax (DT1920 onwards) where

- the tax at stake in that case exceeds £50,000, or
- the company claimed to be the employer is apparently based in a tax haven, or
- difficulty is experienced in applying the guidance at DT1920 onwards in a particular case.

As the instructions in DT410 explain, a claim to exemption under an agreement is a claim to the Board by virtue of Section 788(6) ICTA 1988 and a notice of decision on a claim may not be given by an Inspector. If

you reach the point where you are unable to reach agreement with the taxpayer please send the case to Employment Income Technical.

The commentary was changed in 1992. In the absence of the commentary, one might have thought that “employer”, being an undefined term, would have its UK law meaning in accordance with article 3(2). For criticisms of this in relation to treaties before the amendments to the commentary, see “Employees and Double Taxation Agreements” [1995] BTR 529; “Debates on Treaties” [1997] BTR 1.

13.35.6 *The 60-day rule*

Tax Bulletin 68 provides:

Non-Residents Working In The UK For Short Periods: The "60-Day" Rule

Most of the UK's double taxation agreements contain a provision which may enable an employee who comes to work here on a short-term basis to be taxed only in his or her home country. An employee must show that he or she fulfils a series of conditions specified in the agreement to make a valid claim to exemption from UK tax. One of those conditions will be that the employee's remuneration must be ‘paid by or on behalf of an employer’ who is not resident in the UK. In many cases, it is clear that the employer is the non-resident company for whom the taxpayer was working before he or she came to the UK. In other cases, the employee may have been seconded by his or her overseas employer to work for a UK company, or the overseas employer may carry on a business of hiring out staff to other companies. A formal contract of employment remains with the overseas employer, but the employee works in the business of the UK company, which obtains the benefits and bears any risks in relation to the work undertaken by the employee. In economic terms, this state of affairs is recognised by the overseas employer recharging the cost of the employee's earnings to the UK and the UK company might be described as the ‘economic employer’. In such a case, the exemption from UK tax for short-term visitors will not be available. This was explained in Tax Bulletin 17, published in June 1995. However, the position of very short-term visitors caused concern, and Tax Bulletin 25 dealt with this in October 1996. This reproduced a statement by the Financial Secretary to the Treasury (FST) that the Inland Revenue would not consider that a short term business visitor was sufficiently integrated into the business of a UK company for it to be regarded as the employer where:

- the employee concerned is in the UK for less than 60 days in a tax year; and
- that period does not form part of a more substantial period when the taxpayer is present in the UK.

This has become known as the "60-day rule". This article gives further guidance on common situations where it may be an issue.

Does the worker have to be from a country with which we have a full double tax agreement for the 60-day rule to apply?

The 60-day rule is framed in terms of accepting without enquiry that the conditions in a DTA for short-term business visitors to be solely taxed in their country of residence have been satisfied. That exemption, and consequently the 60 day rule, is therefore only relevant if the person is resident in a country with which we have signed a comprehensive double tax agreement. If not, domestic legislation will apply in full.

Is the 60-day exemption available if the employee is on the UK payroll?

No. The FST's statement was made in the context of workers who were paid via a non-resident employer's payroll but whose economic employer might be in the UK.

How do you count the days for the 60-day rule?

It is based on physical presence in the UK in the same way as the 183 days are counted for the purposes of Article 15(2) of the OECD model Tax Convention.

Is the 60 days a fixed limit? For example, an employer has a succession of people who work for him and he bears their wages, but they may be in the UK up to 90 days.

The 60-day rule represents a balance between a loss of tax revenue which may be due to the UK and the compliance costs to both employers and the Revenue of ascertaining and collecting such tax for very short-term visitors. There are no plans for it to be altered. However individuals working in the UK may be exempt under the relevant DTA anyway, for example if their earnings are paid by an overseas company, not recharged in any form to a UK company or permanent establishment and no UK company acts as their employer.

Is the 60-day rule available where the earnings have been recharged to a UK permanent establishment rather than a UK-resident company?

Although not covered in the actual wording of the 1996 statement, the Revenue accepts the 60-day rule should apply in these circumstances also.

How should the phrase "part of a more substantial period" be interpreted?

The aim is to provide consistency:

- Between very short-term workers, regardless of the particular dates involved; and
- Between short-term workers seconded from overseas and the normal workforce of the UK employer.

The most obvious example met is where less than 60 days are worked up to 5th April and less than 60 days after, but the overall period is more than 60 days. In these circumstances, the 60-day exemption will not be available, to be consistent with periods of more than 60 days worked over, say, November to January.

What if there is a gap between two shorter periods of employment?

To consider whether the 60-day period has been exceeded, the following factors may be relevant:

- Is there an expectation that the employee will return to the UK when they depart initially?
- How long is the gap between visits in comparison to the length of those visits?
- How frequently does the employee return to the UK?

- How integral to the business are the duties performed?

It is impossible to give an exact formula that will cover all circumstances. However, the following examples should assist in seeing how the Revenue will approach this question.

Example 1: Alain visits the UK for 35 days in Feb/March 2003, then returns to Austria for a fortnight's holiday, and returns again to the same contract for 40 days in April/May.

The 75 days would be regarded as one period. The gap here is insignificant compared to the two periods either side and liability to UK tax would be consistent with a person who works for 75 days here continuously. As the periods are part of the same contract, the employer would be expected to operate PAYE from day one. If there had been no expectation of returning during the first 35 days we would expect PAYE to be operated only for the second period even though liability to UK tax would exist for both for Alain. This is because the 60 days is an objective test whilst PAYE is based on "reasonable expectation" that payments are liable to UK tax.

Example 2: Beatrice visits the UK for 35 days in Year 1. She returns to Belgium but unexpectedly is asked to return in Year 2, after a 7 month gap, and does so for 40 days.

Each episode in the UK would be regarded as separate periods of less than 60 days. Beatrice's return was unexpected, and after a relatively long gap. So there is no UK liability for either and no PAYE is due.

Example 3: Cedric is the financial controller for a Canadian group. Each year he visits the UK subsidiary for 55-59 days.

Once there is an expectation that this will be the work pattern, the Revenue would consider that the episodes of work here were part of a more substantial period. A financial controller will be significantly integrated into the business, whether this is of the UK subsidiary or possibly a permanent establishment of the parent company. PAYE will apply from when it is clear that visits will recur as part of a regular and integrated pattern, although Cedric may have to consider whether he is also liable under self assessment to UK tax for an earlier period of work, as for Alain in Example 1. Cedric and the group will then be able to decide the duration and timing of visits to the UK on business grounds rather than for individual tax considerations.

Example 4: Danielle spends 50 days working in UK between 10 April and 15 January, with visits averaging 3 days each. Then from 1 June to 6 October a further 15 days are spent visiting UK for business meetings on the same piece of work.

Although Danielle is taxable from the very start, we would not expect either her or the company to be able to recognise this. However, the Revenue would expect PAYE to be operated in Year 2.

HMRC say:

HMRC were asked to clarify the way in which the economic employer test applies in a number of scenarios in which employment costs are

recharged to a UK employer. In each scenario, an individual has a formal employment contract with a person resident outside the UK and is seconded to work in the UK.

The economic employer test is set out in the commentary to Article 15 of the OECD Model Tax Convention on Income and Capital which, subject to certain conditions, enables an overseas employee who comes to the UK to work on a short-term basis to be taxed only in his or her home country. HMRC confirmed that it is not practice to restrict this test for UK resident employers.

This means that, where an employee is present in the UK for less than 60 days and is not on the payroll of a UK resident employer, the 60-day rule set out in Tax Bulletin 68 will normally apply: the individual will not be considered to have an economic employer without any further consideration of the facts being necessary. In other situations, it will be necessary to examine the facts to determine who has the rights on the work produced and bearing the relative responsibility and risks. Where the employee is a resident in another contracting State and is seconded to the UK for a short period, the economic employer will not depend on whether the UK employer is entitled to a Corporation Tax deduction for the remuneration costs: the UK employer might be entitled to a deduction even where they are not the economic employer.

HMRC referred to the recent publication on 21 May 2010 by the OECD of proposed revisions to the Model Treaty Commentary on employment relationships for the purposes of Article 15.⁵³

13.36 DTA defence to BiK charge

This section considers whether DTAs may provide a defence to the BiK charge.

It is assumed in this section that although the individual is UK resident,⁵⁴ they are treaty-resident in another state (“the foreign state”) under the DTA tie-breaker rules. A DTA may well be of assistance in these circumstances.

It is assumed that the foreign state has a DTA with an article in the form of Art. 15 of the OECD Model Treaty; of course the individual treaty will need to be reviewed.

To qualify for relief under Art. 15(1) the following conditions must be

53 Joint Expatriate Forum on Tax and NICS: 26 May 2010 Meeting note www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf.

54 Otherwise there is no BiK problem.

met.

There must be an employment. A shadow directorship is an employment for UK tax purposes, and it is considered that it counts as an employment for treaty purposes.

The BiK charge must be a tax on “salaries, wages and other similar remuneration.” This is the case.

The BiK must be in respect of the employment: it is considered that this condition is satisfied.

Lastly, the employment must be exercised wholly in the foreign state (in which case full relief is applicable) or at least partly in the foreign state (in which partial relief applies). This is more problematic and in typical cases assuming the employment is exercised at all, it will be exercised at least partly in the UK. If that is the case only partial relief is available under article 15(1).

If relief is not available under Art.15(1) we turn to Art.15(2).

In principle this can offer exemption from the charge on benefits in kind, even if the employment is exercised wholly or partly in the UK. The three conditions in (a) to (c) must be met.

(a) the recipient is present in the UK for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned

Whether this condition is met depends on the facts.

(b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the UK

The employer is of course the company owning the property. The employer will not in principle be UK resident. In fact the BiK is not in the strict sense “paid” but it is suggested that the word should not be strictly construed and this requirement is satisfied.

(c) the remuneration is not borne by a permanent establishment which the employer has in the UK.

This condition will be met, since the company will not have a permanent establishment (the UK home is not a permanent establishment as defined).

Accordingly individuals who are treaty-resident in a contracting state and present in the UK for less than 183 days can qualify for DTA relief under Art. 15(2).

13.37 DTAs: Directors Fees

Article 16 OECD Model provides:

Directors' fees and other similar payments derived by a resident of a Contracting State in his capacity as a member of the board of directors of a company which is a resident of the other Contracting State may be taxed in that other State.

The OECD commentary provides:

1. This Article relates to remuneration received by a resident of a Contracting State, whether an individual or a legal person, in the capacity of a member of a board of directors of a company which is a resident of the other Contracting State. Since it might sometimes be difficult to ascertain where the services are performed, the provision treats the services as performed in the State of residence of the company.

1.1 Member countries have generally understood the term “fees and other similar payments” to include benefits in kind received by a person in that person's capacity as a member of the board of directors of a company (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

2. A member of the board of directors of a company often also has other functions with the company, e.g. as ordinary employee, adviser, consultant, etc. It is clear that the Article does not apply to remuneration paid to such a person on account of such other functions.

3. In some countries organs of companies exist which are similar in function to the board of directors. Contracting States are free to include in bilateral conventions such organs of companies under a provision corresponding to Article 16.

13.38 DT relief: government service

Article 19 OECD model provides:

1. a) Salaries, wages and other similar remuneration paid by a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.
b) However, such salaries, wages and other similar remuneration shall be taxable only in the other Contracting State if the services are rendered in that State and the individual is a resident of that State who:
 - (i) is a national of that State; or
 - (ii) did not become a resident of that State solely for the purpose of rendering the services.
2. a) Notwithstanding the provisions of paragraph 1, pensions and other similar remuneration paid by, or out of funds created by, a Contracting State or a political subdivision or a local authority thereof to an individual in respect of services rendered to that State or subdivision or authority shall be taxable only in that State.
b) However, such pensions and other similar remuneration shall be taxable only in the other Contracting State if the individual is a resident of, and a national of, that State.
3. The provisions of Articles 15, 16, 17, and 18 shall apply to salaries, wages, pensions, and other similar remuneration in respect of services rendered in connection with a business carried on by a Contracting State or a political subdivision or a local authority thereof.

13.39 DT relief: claims

The DTR Manual provides:

... For years of assessment 1996-97 onwards, claims to exemption from UK tax in respect of employment income are made as part of the taxpayer's self assessment on the claim form attached, depending on the circumstances, to either Help Sheet IR302 (Dual-Residents) or Help Sheet IR304 (Non-Residents - Relief under Double Taxation Agreements). Both forms require the taxpayer to establish the fact of his residence in the other country for the purpose of the agreement (see DT310) and to declare that the relevant provisions of the particular agreement are considered to have been fulfilled. All claims under Article 15(2) should be checked carefully by reference to terms of the agreement and, where appropriate, to the guidance at DT1921 - DT1923, and enquiries raised in suitable cases. See also DT1924 about certain types of cases which must always be referred to Employment Income Technical, before a claim is accepted.

...

13.40 Workday relief from 2013/14

A new relief is proposed from 2013/14 to replace the current relief for resident but non-ordinarily resident employees. HMRC call this 'Overseas workday relief'. Details can be found in the response to the residence consultation ("**the Residence Response Paper**")⁵⁵. This sets out draft clauses in a schedule here called "**the SRT schedule**". The topic will need to be reviewed in the light of the Finance Act 2013.

For remittance basis taxpayers, the relevant sections of ITEPA will be amended to read:

22 Chargeable overseas earnings for year when remittance basis applies and employee ~~ordinarily UK resident~~ outside section 26

(1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—

- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
- (b) ~~the employee is ordinarily UK resident in that year~~ the employee does not meet the requirements of section 26A for that year.

(2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year.

23 Calculation of "chargeable overseas earnings"

(1) This section applies for calculating how much of an employee's general earnings for a tax year are "chargeable overseas earnings" for the purposes of section 22.

(2) General earnings for a tax year are "overseas earnings" for that year if—

- (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year,
- (aa) ~~the employee is ordinarily UK resident in that year,~~ the employee does not meet the requirements of section 26A for that year,
- (b) the employment is with a foreign employer, and
- (c) the duties of the employment are performed wholly outside the

⁵⁵ HMRC, *Statutory definition of tax residence and reform of ordinary residence: a summary of responses* (June 2012)
www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf.

UK.

Section 26 ITEPA will be amended to read:

26 Foreign earnings for year when remittance basis applies and employee ~~not ordinarily UK resident~~ meets section 26A requirements

(1) This section applies to general earnings for a tax year [where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee ~~is not ordinarily UK resident in~~ meets the requirements of section 26A for that year, if the general earnings are neither—

- (a) general earnings in respect of duties performed in the UK, nor
- (b) general earnings from overseas Crown employment subject to UK tax.

(2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year.

13.40.1 Section 26A requirements

A new section 26A ITEPA will provide:

- (1) An employee meets the requirements of this section for a tax year ("year X") if—
 - (a) it is a qualifying tax year, and
 - (b) during the affected residence period, the employee's situation does not fall within subsection (4) at any point.
- (2) Year X is a "qualifying tax year" if—
 - (a) the employee was non-UK resident for each of the previous 3 tax years, or
 - (b) the employee was UK resident for the previous tax year but non-UK resident for each of the 3 tax years before that, or
 - (c) the employee was UK resident for the previous 2 tax years but non-UK resident for each of the 3 tax years before that.
- (3) "The affected residence period" is as follows—
 - (a) for a case within subsection (2)(a), it is year X,
 - (b) for a case within subsection (2)(b), it is year X and the previous tax year, and
 - (c) for a case within subsection (2)(c), it is year X and the previous 2 tax years.

- (4) An employee's situation falls within this subsection if–
 - (a) the employee is based in the UK for the time being, and
 - (b) it is reasonable to assume that he or she will continue to be based there up to and beyond the 3-year cut-off point.
- (5) "The 3-year cut-off point" is the end of the period of 3 years that began when the affected residence period began.

13.41 *Meaning of "based" in the UK*

Section 26B ITEPA will provide:

- (1) For the purposes of section 26A, an employee is based in the UK for the time being if the employee is–
 - (a) living there for all or a substantial part of his or her time,
 - (b) working or studying there full-time or for a substantial part of his or her time (despite living elsewhere), or
 - (c) otherwise spending so much time there that it is reasonable to regard him or her as being based there.
- (2) Accordingly, an employee may be based in the UK and in another country at the same time (for example, if the employee is living in France but working full-time in the UK).
- (3) An employee may be considered to be based in the UK even if his or her family is living elsewhere.
- (4) Subsection (5) lists steps that, if taken by or for the benefit of an employee whether before or during the affected residence period, are likely to indicate that the employee will continue to be based in the UK up to and beyond the 3-year cut-off point.
- (5) The steps are–
 - (a) purchasing a home in the UK,
 - (b) reaching an understanding that the employee is to perform duties of employment in the UK for a period that would go beyond the 3-year cut-off point (whether those duties would be performed under one contract or a succession of contracts), or
 - (c) entering into other commitments (whether personal, professional, educational, financial or otherwise) that indicate an intention to be based in the UK up to and beyond the 3-year cut-off point.
- (6) But–
 - (a) the absence of any such steps does not of itself indicate that the employee will not continue to be based in the UK up to and beyond the 3-year cut-off point, and
 - (b) nothing in subsection (5) limits the factors that may be taken

into account in deciding whether it is reasonable to assume that the employee will continue to be based in the UK up to and beyond that point.

The rules approximate to the former ordinary residence test.

CHAPTERFOURTEEN

PAYE

14.1 PAYE – Introduction

A full discussion of PAYE needs a book to itself. This chapter focuses on matters closest to the themes of this book.

The law is mostly contained in the Income Tax (PAYE) Regulations 2003 (which I call “**the PAYE Regulations 2003**”).

In outline, the obligation to deduct PAYE is in reg. 21(1) PAYE regulations:

On making a relevant payment to an employee during a tax year, an employer must deduct or repay tax in accordance with these Regulations by reference to the employee's code, if the employer has one for the employee.

The key term is “relevant payment”. “Relevant payment” is a label for a number of rules.

There is the usual cascade of definitions. Subject to some exceptions, not discussed here, reg. 4(1) PAYE regulations provides:

In these Regulations, any reference (however expressed) to relevant payments means payments of, or on account of, net PAYE income...

“Net” PAYE income is a label to introduce certain deductions not discussed here.¹

¹ Regulation 3(1) PAYE regulations provides:

“Net PAYE income means PAYE income less any—

- (a) allowable pension contributions, and
- (b) allowable donations to charity.

“PAYE income” is defined in s.683 ITEPA:

- (1) For the purposes of this Act and any other enactment (whenever passed) “PAYE income” for a tax year consists of—
 - (a) any PAYE employment income for the year,
 - (b) any PAYE pension income for the year, and
 - (c) any PAYE social security income for the year.
- (2) “PAYE employment income” for a tax year means income which consists of—
 - (a) any taxable earnings from an employment in the year (determined in accordance with section 10(2)),² and
 - (b) any taxable specific income from an employment for the year (determined in accordance with section 10(3)).

14.2 Non resident and NOR employees

In the case of:

- (1) non-resident employees and
- (2) NOR employees on the remittance basis

it may be unclear how much income is taxable and so PAYE income.

Section 690 ITEPA provides a clearance mechanism:

- (1) This section applies in relation to an employee in a tax year only if the employee—
 - (a) is not resident or, if resident, not ordinarily resident in the UK, and
 - (b) works or will work in the UK and also works or is likely to work outside the UK.
- (2) If in relation to an employee to whom this section applies and any tax year it appears to an officer of Revenue and Customs that—
 - (a) some of the income paid to the employee by the employer³ is PAYE income, but
 - (b) some of that income may not be PAYE income,an officer of Revenue and Customs may, on an application made by the

² See 13.5 (Taxable earnings).

³ Section 690(3)(b) ITEPA provides:

“any reference to a payment made by the employer includes a reference to a payment made by a person acting on behalf of the employer and at the expense of the employer or a person connected with the employer.”

appropriate person,⁴ give a direction for determining a proportion of any payment made in that year of, or on account of, income of the employee which is to be treated as PAYE income.

I refer to this as “**a s.690 direction.**”

(2A) For the purposes of subsection (2) as it applies in relation to an employee who is UK resident but not ordinarily UK resident in a tax year, the officer may treat section 809B of ITA 2007 (remittance basis) as applying to the employee for that year, even if no claim under that section has been made.

HMRC Brief 17/09 explains s.690(2A) ITEPA is to correct an oversight in 2008:

Section 690 ITEPA directions

Prior to April 2008 non-domiciled individuals and not ordinarily resident individuals were automatically taxed on the remittance basis on their foreign employment income. However since April 2008 individuals have to make an annual claim to the remittance basis. Section 690 ITEPA was amended in Finance Act 2008 to reflect this change for not ordinarily resident employees. Prior to April 2008 employers were able to ask for a section 690 direction which permitted them not to apply PAYE to certain employment income paid to not ordinarily resident employees entitled to be taxed on the remittance basis. These rules have been amended to allow this procedure to continue.

14.2.1 Application for s.690 direction

Section 690 ITEPA continues:

(4) An application under subsection (2) must provide such information as is available and is relevant to the application.

(5) A direction under subsection (2)—

- (a) must specify the employee to whom and the tax year to which it relates,

⁴ Section 690(3)(a) defines “appropriate person”:

“In this section—

(a) “the appropriate person” means the person designated by the employer for the purposes of this section and, if no person is so designated, the employer...”

- (b) must be given by notice to the appropriate person, and
 - (c) may be withdrawn by notice to the appropriate person from a date specified in the notice.
- (6) The date so specified may not be earlier than 30 days from the date on which the notice of withdrawal is given.

14.2.2 *Effect of s.690 direction*

Section 690 ITEPA continues:

- (7) If—
- (a) a direction under subsection (2) has effect in relation to an employee to whom this section applies, and
 - (b) a payment of, or on account of, the income of the employee is made by the employer in the tax year to which the direction relates,
- the proportion of the payment determined in accordance with the direction is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.

14.2.3 *Position in absence of s.690 direction*

- (8) If in any tax year—
- (a) no direction under subsection (2) has effect in relation to an employee to whom this section applies, and
 - (b) any payment of, or on account of, the income of the employee is made by the employer,
- the entire payment is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.
- (9) Subsections (7) and (8) are without prejudice to—
- (a) any assessment in respect of the income of the employee in question, and
 - (b) any right to repayment of income tax overpaid and any obligation to pay income tax underpaid.

14.2.4 *HMRC practice*

The PAYE Manual provides:

81545. UK employer's duties [November 2011]

...

The employee is resident/not ordinarily resident or not resident in the UK and works both in and outside the UK

The employer can apply under Section 690 ITEPA 2003 for a direction from HMRC to operate PAYE only on the percentage of the employee's total earnings that are for work in the UK. This applies to all payments made by the employer including termination payments and share based remuneration.

The Section 690 application is only an estimate of the work done in and outside the UK and the employee should complete an SA return to report the actual position. See PAYE81555 - PAYE81565 on how to handle applications under Section 690 ITEPA 2003.

If an employer does not make an application under Section 690 ITEPA 2003, then unless the employee is within an EP Appendix 6 arrangement (see PAYE81740), they must operate PAYE on all payments made to the employee for work done both in and outside the UK. The employee can claim a repayment of the tax deducted on earnings for work done outside the UK on their SA Return.

You must set up an SA record for an employee who works both in and outside the UK, whether or not a Section 690 application is made.

If the employer provides Tax Equalisation arrangements for the employee, you should refer to PAYE81740.

Cases of doubt or difficulty should be referred to Personal Tax Product & Process, PAYE Technical, Shipley for advice.

...

81555. Applications under Section 690 ITEPA 2003 - Who deals with the application? [September 2010]

Arrivals in the UK

On receipt of an application for a direction under Section 690 ITEPA 2003 you must decide which office is responsible for reviewing the application. Use the following table to determine the office and pass the application to them immediately.

Situation	Responsible Office
The employee is an Expat	CAR PTI Manchester Expat Unit
All other employees	The Processing Office for the employee

81560. Applications under Section 690 ITEPA 2003 - reviewing the application [March 2011]

Arrivals in the UK

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

Use the flowchart [not published] to review an application under Section 690. It contains links to a number of draft letters you should use depending on the circumstances of the case. These letters are available

on SEES Forms and Letters, in the general subdirectory 'Regulation/Payment letters'.

When an application is accepted, you must take the following action

- Set up an SA record for the employee if there is not one already
- Arrange for an SA return with the non-residence and employment pages to be issued for the year(s) the application covers
- Make an SA note as follows 'Sec690 approval given for [year] for earnings from [employer's name]. PAYE to be operated on [%].'
- If the employee is resident/not ordinarily resident
 - Amend their tax code to remove the basic personal allowance (and blind person's allowance if claimed)
- Place all the Section 690 papers in a PN pad

81565. Applications under Section 690 ITEPA 2003 - At the end of the tax year [January 2012]

The employer must complete the employee's form P14, End of Year Summary, to show only

- The pay on which the employer has operated PAYE (this will include the amount representing the UK duties agreed by HMRC under Section 690 ITEPA and any other taxable pay) and the tax deducted from that pay
The employee should, when completing their SA return enter
- The earnings from their P60 / P45 in box 1 on the Employment page including any cash earnings from that employment that have not been included on the P60 / P45
- The tax deducted from their P60 / P45 in box 2 on the Employment page
- The remainder of their earnings in box 3 on the Employment page including paid earnings overseas from an earlier year which were not liable to UK income tax unless they were remitted to the UK during the Tax Return year
- The amount of their total earnings which relates to work done abroad in box 12 under the section 'Share Scheme and Employment Lump Sum, Compensation and Deduction' on the 'Additional Information Page' (SA101)

No equivalent rule is needed for UK ordinarily resident non-domiciled employees, as their income is either taxable entirely on the remittance basis or on the arising basis.

14.3 PAYE adjustment to recapture lost personal allowance

HMRC6 provides:

6.4 What should you do if you have UK Tax Allowances and use the Remittance Basis?

From 6 April 2008 onwards, if you have claimed the remittance basis (see part 5) and your unremitted income and/or gains is £2,000 or more you will not be entitled to the allowances listed in paragraph 6.2.

If you decide during a tax year that you are going to use the remittance basis and you are still receiving personal allowances through the PAYE system, you may not be paying enough UK tax. If you let us know, we can arrange to adjust your PAYE code so that you are not left with a tax bill at the end of the year because you have received personal allowances which were not due because you were using the remittance basis. Otherwise we will ask you to pay the additional tax through the Self Assessment system.

If you want us to adjust your PAYE code you should contact the office which deals with your PAYE and ask for a tax code to be sent which does not give relief for personal allowances. This will reduce the amount of tax you may have underpaid at the end of the tax year. Your employer can't do this for you as your tax affairs are confidential between you and HMRC. Until they receive a new tax code from us, your employer will continue to deduct tax from you based on the code we sent before you told us you were claiming the remittance basis.

It is hard to imagine anyone wishing to do this. But HMRC say:

Employers have expressed concern that the P46 (Expat) does not allow them to operate a 0T code (no personal allowance) even where they are aware that the employee will claim the remittance basis or has income in excess of £100K.

HMRC said that it was not the responsibility of employers to withdraw personal allowances and, if they did so, the New PAYE System (NPS) might reinstate the allowances when the P14 is filed and make a repayment to the individual.

HMRC said that, if employers agree with their employee that they will claim the remittance basis or if the individual's earnings will exceed £100K, they should request a formal change of code number from the Expat Team. This would ensure that HMRC records mirror those of the employer when the P14 is submitted.

HMRC confirmed that the Modified PAYE rules in EPM6 allows PAs to be withdrawn from remittance basis users but it would be sensible for Employers to notify the Expat Team of situations where that applies. They agreed to make the necessary changes to the EPM6 agreement to

make this clear.⁵

14.4 Repayment of overpaid PAYE

The minutes of the Joint Expatriate Forum record:

5.13 A subgroup held on 18 May to consider HMRC guidance which states that NOR employees who overpay PAYE will not be treated as having made a remittance of foreign earnings where the repayment is mandated to a UK-based employer. This is long standing guidance but is not consistent with the wider definition of a remittance introduced in 2008, and therefore would need to be withdrawn from a future date.

5.14 Withdrawal would have no effect on tax equalised employees, as overpaid PAYE is not an employee's earnings, but it would have a real effect on employees paid gross. The subgroup explored the feasibility of using section 690 directions to solve the problem, but it was felt that the process for seeking such directions is insufficiently flexible, but cannot be changed without amending the legislation.

5.15 HMRC suggested that it might be possible to amend section 690, or seek an alternative solution, as part of the consultation on non dom taxation. This could be explored more fully during consultation.⁶

14.5 Short-term business visitors: PAYE exemption

The PAYE manual provides:

82000 EP appendix 4: criteria for short term business visitors [March 2011]

The CWG2 Employer Further Guide to PAYE and NICs advises employers that it may be possible to relax strict PAYE requirements for employees on short-term business visits to the UK, and tells employers to contact their HMRC Office.

You must consider such applications as set out under PAYE81630 and PAYE81635, and if appropriate PAYE requirements can be relaxed as set out in this appendix.

5 Joint Expatriate Forum on Tax and NICS: 26 May 2010 Meeting Note www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf.

6 Joint Expatriate Forum on Tax and NICS: 23 June 2011 Meeting Note; see www.hmrc.gov.uk/consultations/expat-mins-23june2011.pdf.

Short Term Business Visitors

This arrangement provides that PAYE can be disregarded in certain circumstances. If an employer has only one or two employees potentially affected they may like to consider applying for an NT code (see PAYE81625) on an individual basis instead.

Conditions

This arrangement must only be applied where individuals are

- Resident in a country with which the UK has a Double Taxation Agreement under which the Dependent Personal Services / Income from Employment Article (Article 15 or the equivalent) is likely to be competent
 - Coming to work in the UK for a UK company or the UK branch of an overseas company
 - Expected to stay in the UK for 183 days or less in any twelve month period
- Provided that it can be shown that for specifically named employees, the UK company or branch will not in fact ultimately bear the remuneration specified. Where agreement is reached and in all other aspects the employee falls within the guidelines, then that part of the remuneration not ultimately borne by the UK company or branch can fall within this arrangement. See also the three 'Notes: Definitions' below regarding employees receiving some remuneration that is ultimately borne by the company or branch and some which is not.

These arrangements will not apply where the expense of the remuneration is passed on to another UK company or branch and not recharged overseas.

Notes: Definitions

- Where used in this arrangement the term remuneration has its widest possible meaning and includes for example, salary, wages, benefits, allowances and expenses
- Where an employee otherwise falling within this arrangement receives remuneration borne by companies in different countries then
 - a. Remuneration not ultimately borne in the UK - falls within this agreement
 - b. Remuneration ultimately borne in the UK - does not fall within this agreement unless the HMRC Office has agreed a dispensation for it. It is therefore possible for an employee falling within this arrangement to also have a PAYE liability. If otherwise appropriate this PAYE liability can be met using modified PAYE procedures as described in EP Appendix 6, PAYE82002.
- 'Ultimately borne' means the company finally bearing the cost after all recharging of any nature

Notes: Double Taxation Treaties

- Some Double Taxation Treaties (for example that with The Netherlands) specify 183 days in a tax year. When looking at residents of those countries therefore this is the test to apply and not the 183 days in any twelve month period now more commonly used
- The Double Taxation Manual (DT1920 to DT1924 inclusive) is relevant to this arrangement and should be consulted initially in cases of doubt
- Forms P46(Expat) and P85 do not need to be completed for EP Appendix 4 employees

Notes: Method of counting days spent in the UK

...

From 6 April 2009 (2009-10 onwards) the method of counting days should follow the OECD commentary 'days of physical presence' method. Under this method, the general principle is that any day during any part of which, however brief, the person is present in the UK counts as a day of presence for the purposes of computing the 183 day period. As such

- Any part of a day, day of arrival, day of departure, and all other days spent in the UK such as Saturdays, Sundays, national holidays, holidays before during and after the period of work, short breaks (training, strikes, lock-out, delay in supplies), days of sickness (unless they prevent the individual from leaving and that individual would otherwise have qualified for the exemption) and death and sickness in the family should be included in the calculation
- Days spent in the UK in transit in the course of a trip between two non-UK points should be excluded from the computation

From 2008-09 onwards (this overlaps for a year with the former day counting method), days during which the taxpayer is a resident of the UK should not be included in the calculation. The conditions in the treaty are for remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State and does not apply to a person who is resident and works in the same State.

For example, if a person is a resident of the UK but is hired by an employer in another State, moves to that State where they become resident and is subsequently sent to work for a short period in the UK by his employer, we would only include days in the UK after the taxpayer became a resident of the other State for the purposes of computing whether they had exceeded 183 days in the UK. Days in the UK when the taxpayer was a resident of the UK should not be included.

Similarly if a non-resident taxpayer is seconded to the UK for a short period by their employer and subsequently moves to and becomes a resident of the UK, days in the UK after they became a resident here should not be taken into account for the purposes of the calculation of the 183 days.

...

General principles of an EP Appendix 4 arrangement

1. It only applies to employees who have not become UK resident for tax purposes. If the employee becomes UK resident then they are taxable on duties carried out in the UK regardless of how many days they have been in the UK. If they become both resident and ordinarily resident then the UK may tax their world wide income and gains
2. In all cases involving short-term assignment of employees to the UK, the employer will put in place some form of internal reporting system to keep as accurate as possible a record of employees visiting the UK on business. It is expected that this system will have the following minimum requirement
 - Employees will periodically report days spent in the UK on business to the central point controlling this arrangement
 - Employees should not spend more than 30 days intermittently in the UK

in any 12 month period without reporting to that central point

3. All records to be kept under this arrangement are within Regulation 97 IT (Pay As You Earn) Regulations 2003 and so must be retained and produced for inspection
4. Where liability is subsequently found to arise on payments of PAYE income made to an employee the employer will be expected to pay the tax that ought to have been deducted from or otherwise paid in respect of each payment. Late payment of PAYE tax will attract interest in the usual way
5. Should it become apparent that PAYE is not being applied in the case of employees who do not satisfy the relevant criteria, HMRC reserves the right to insist that PAYE be operated strictly for all employees from day 1
6. Any employee who cannot fulfil the conditions set out below should have PAYE operated from day 1
7. The treatment for NICs purposes of employees coming to the UK is covered in the CWG2 Employer Further Guide to PAYE and NICs

The time limits given in EP Appendix 4 are administrative only and are over-ridden by any legislative time limits. For example if a taxpayer needs to complete a Self Assessment return then the normal rules relating to Self Assessment apply.

Visitors to the UK 1 - 30 days

No requirements for either employer or employee to fulfil.

Visitors to the UK 31 - 60 days

For an employee who spends no more than 60 days in the UK during the tax year, PAYE can be disregarded provided it is confirmed that

- a. there is no formal contract of employment with the UK employer
- b. the 60 days do not form part of a more substantial period. (See DT1922.)

Visitors to the UK 61 - 90 days

For an employee in the UK for not more than 90 days in the tax year, PAYE can be disregarded provided that the employer supplies the information below by 31 May following the end of the tax year

- Full name of employee
- Last known UK and overseas addresses of employee
- Nature of duties undertaken
- Date commenced
- Date ceased
- To which country a tax return covering worldwide income is submitted

And confirms that

- a. The UK company does not
 - Ultimately bear the cost of the employee's remuneration
 - Function as the employee's employer during the UK assignment. (See DT1922 for further information)
- b. In the last four tax years visits to the UK were less than
 - 364 days in total, and
 - 183 days in any tax year

(See Residence, Domicile and Remittance Basis Manual (RDRM) at RDRM10230 for further information.)

Visitors to the UK 91 to 183 days

For an employee in the UK for a period of 91 days but not exceeding 183 days in the tax year PAYE can be disregarded provided that

- a. All of the information requested for visitors up to 90 days is provided and in addition
- b. In the case of non-US citizens and Green Card holders, the employee provides a statement from the overseas Revenue authority confirming residence in the other state for tax purposes during the period in the UK. This statement should be passed to the HMRC Office by 31 May following the end of the relevant overseas tax year. This arrangement is only provisional until the relevant certificate is received

In the case of US citizens it will only be necessary for the employee to provide evidence of continuing residence in the US.

- c. A statement giving the following information is received from the employee by 31 May following the end of the UK tax year
 - i) What is your Nationality?
 - a. On what grounds do you claim this Nationality?
 - b. Where were you born?
 - ii) In which country do you usually live?
 - iii) When did you arrive in the United Kingdom?
 - iv) Have you visited the UK during the five years before the date entered at (iii)?

If so, in that time did you spend

 - c. More than 183 days in the UK in any UK tax year?
 - d. More than 364 days in the UK in total?

14.6 Foreign tax credit relief: PAYE exemption

The PAYE Manual provides:

82001 EP appendix 5: net of foreign tax credit relief [April 2012]**Relaxation on payments of PAYE**

This arrangement only applies where an employer is required to deduct foreign tax in addition to UK PAYE from payments being made to employees sent to work abroad. Its aim is to give provisional relief for double taxation to employees who must pay both UK tax and foreign tax from the same payments of earnings.

The CWG2 Employer Further Guide to PAYE and NICs, advises employers to contact their HM Revenue & Customs (HMRC) office if they have to deduct foreign tax, as well as UK PAYE, from the earnings of employees sent to work abroad. Where they do, HMRC considers the position, as set out in PAYE81715, and may authorise the employer to operate the arrangement set out in this appendix.

Where an employee has to pay foreign tax direct to an overseas Revenue authority on payments taxed through PAYE, advance DTR can be given through the PAYE code (see PAYE81715).

In many overseas contract situations, where an employee is abroad for less than 6 months no overseas tax is ultimately found to be due - usually because such individuals have personal protection under the terms of many Double Taxation Agreements.

However, it cannot be assumed that DTA protection is available on the basis that the employee works in an overseas country for less than 183 days. The relevant DTA and the other authority should be consulted. In particular, the 183 day protection may not be available where

- The employee works for a resident of the overseas country who functions as their employer; Or
- Their contractual employer has an identifiable 'permanent establishment' in the overseas country; Or
- The DTA says so

If these circumstances apply or in cases where no DTA exists, overseas tax is due from day 1. The overseas country may also impose withholding at source obligations on the employer so that the employer is faced with continuing UK PAYE / NIC responsibilities as well as those arising in the overseas country. It is in these specific circumstances or where the 183 days period is exceeded but the taxpayer remains UK resident, that we can sanction the relaxation of some PAYE requirements.

The relaxation only applies to UK PAYE that should be deducted from an employee's pay under his or her UK code using UK tax tables. Other PAYE requirements and all of those relating to National Insurance must still be fulfilled by the employer. There can be no question of abandoning PAYE / NIC altogether for the duration of the overseas contract.

You should make it clear to the employer that the relaxation is only being made available here because of the taxing rights of the country concerned and otherwise two amounts of tax would be deducted from an employees gross pay. It should not be used for any other contract or situation where the employer or the agent thinks it should be without prior consultation with you. It is not available if an overseas deduction is borne by the employer.

Employers responsibilities under this arrangement

Where you agree the use of this arrangement you must write to the employer and

- Request the name and NINO of each employee included in the arrangement
- Ask the employer to provide a regular update of any changes in the employees included. The frequency of these updates must be agreed between you and the employer

Advise the employer that

- For those employees on overseas work in (country name) PAYE/NIC due should be calculated in the normal way
- They must only give credit by this method for foreign tax actually payable on and deducted from the employee's wages and paid to the overseas authority
- Credit is given by reducing the amount of UK PAYE deducted from wages by the amount of foreign tax deducted from gross wages in the same UK tax year
- Foreign tax will normally be set off against UK PAYE due in the same pay

period before the employer pays the PAYE to the Accounts Office. However, credit can be given retrospectively in the same year where pay was double taxed

- The credit available under this agreement is restricted to the amount of UK PAYE deductible from the employees wages (NICs deductions and contributions are not affected in any way)
- Any net UK PAYE tax remaining due is to be entered at column 7 of the Deductions Working Sheet. This money should be paid to the Accounts Office in the normal way with all the NICs contributions due
- Any UK PAYE refunds due during the year because of a change of code number must be restricted to the net UK PAYE deducted from the employee during the year
- The employer and the employee must undertake to provide details of foreign tax that has been refunded

Employee redeployed, no longer overseas

For employees who cease to operate overseas but continue in the same employment in the UK or another location, the employer must

- Submit details of pay and UK tax deducted up to the date of redeployment together with a report of foreign tax credited
- Operate the employees existing code on the Week 1 or Month 1 basis

Employee leaves employment or dies

If an employee who has been given credit under this system leaves the employment, or dies, the employer must submit

- A form P45 completed as if the code has been operated on the Week 1 or Month 1 basis, showing the net UK tax deducted
- A report of the overseas tax deducted for which credit has been given against UK PAYE due

At the end of the PAYE year

The action an employer operating this arrangement takes at the end of the PAYE year will depend on the method used to submit their Employers Annual Return. Employers submitting their return on **paper** must

- Complete forms P35 and P14 to show net UK PAYE deducted for the year
- Make an additional entry in red ink on the bottom of the employees P14 to record the amount of foreign tax deducted and remitted to the overseas authority which was set off against UK PAYE deductions
- Provide evidence of payment of the foreign tax

Employers submitting their return **electronically** must

- Show the net UK tax deducted for the year on forms P35 and P14 and at the same time
- Send to their HMRC office a statement showing
 - The name and NINO of each employee included in the arrangement
And
 - The amount of foreign tax deducted and remitted to the overseas authority which was set off against that employees UK PAYE deductions due
- Provide evidence of payment of foreign tax

Action to be taken in offices

Arrangement agreed

Following an agreement to the relaxation of PAYE in accordance with Appendix 5, you must take the following action

- On the employers record, use EBS Function AMENDEMPLOYER NOTES to record that an arrangement under Appendix 5 has been agreed
- File the papers relating to the arrangement in the employers file

Notification of employees included in the arrangement

The employer must send details of their employees included in this arrangement and keep you up to date with changes to those details on a regular basis (at intervals agreed between you and the employer).

On receipt of these details, you must take the following action to ensure that the taxpayer's liability is reviewed at the end of the year.

In all cases on each employee's record

- Enter a note on Contact History that the employee is included in an arrangement under Appendix 5
- Set the inhibit automatic reconciliation signal on the PAYE Service record for CY and CY+1 (this should be set on the record for every year until the employment ceases)

For redeployments, leavers and deceased cases, on receipt of the form P45(1) or equivalent, on each employee record

- Enter the following note on Contact History 'Total tax to date (enter date of leaving or redeployment) is net of Foreign Tax Credit Relief'
- Update the current year's record coding to add a week 1 / month 1 basis to the latest code on the record

Note: A cumulative code for these cases cannot normally be restored in that tax year. If you receive a request for a cumulative code or an in-year repayment, you should contact Personal Tax Product & Process, PAYE Technical, Shipley for advice.

End of Year

Employers Section action

Action at the end of the tax year will depend on the method used to submit the Employer's Annual Return.

Where the employer submits a paper return you must deal with the 'paper' forms P35 / P14 in the normal way.

Where the employer submits a return online and sends details of the foreign tax credit given with the evidence of foreign tax paid for each employee included in the arrangement

- Photocopy the details provided by the employer
- File away the copies in the employers file
- Send the originals to Edinburgh Group, Grayfield House, 5 Bankhead Avenue, Edinburgh, EH11 4AE

Customer Operations

On receipt of details provided by the employer, for each employee

- Make a note on Contact History to record the foreign tax credit given by that employer in that year
- Proceed in accordance with the guidance at PAYE93038

Foreign tax refunded

It can happen that overseas authorities subsequently refund the foreign tax paid. If this happens

- The employee or employer should tell you but you should also receive third party information
- The employee's liability for that tax year must be reviewed to remove the foreign tax credit relief given

14.7 Tax equalisation

The PAYE Manual provides:

**82002 EP appendix 6: modified PAYE in tax equalisation cases [July 2010]
Application for Modified PAYE for Tax Equalised Expatriate Employees
from 6 April 20**

Tax equalisation generally describes an arrangement between an employer (see Note 1) and a foreign national employee who comes to the United Kingdom (UK) to work. Under the terms of an agreement, the employee (see Note 2) is entitled to specified net cash earnings and non-cash benefits. The employer undertakes to meet the UK Income Tax liability arising from the earnings and to ensure that the employee's UK tax affairs will be handled by a professional adviser or by an in-house specialist experienced in tax equalisation issues.

For an employee to be included in an arrangement established under this application, the employer must equalise liability to UK Income Tax on all general earnings (see Note 3) subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, ordinarily resident or domiciled outside the UK.

An application indicates that the employer wishes to operate PAYE on a gross-up of cash earnings and non-cash benefits for all employees eligible to be included in this arrangement and has undertaken with the employees to pay any residual UK liability on earnings based on each employee's self assessment. Employers should ensure that employees complete their self-assessment returns in accordance with the guidance in Help Sheet IR212.

Note 1: For the purposes of this application, 'employer' includes a 'relevant person' for whom an employee works in terms of section 689 Income Tax (Earnings and Pensions) Act 2003 (ITEPA).

Note 2: For the purposes of this application, 'employee' includes an 'office holder'.

Note 3: Where the employee is tax equalised on all general earnings but not, for example, on taxable awards of securities options or the award of securities at undervalue (which is specific employment income) the employee may still be included within the arrangement as long as all the other conditions are satisfied.

Employer Name:

Employer Address:

Employer PAYE reference:

Calculation of estimated PAYE on tax equalised earnings

1. We will prepare a best estimate of all earnings including cash allowances and non-cash benefits for the year at the beginning of each year, grossed-up for tax purposes and calculate PAYE tax without restriction for the 50 per cent 'overriding limit'. The best estimate will include, where relevant, the annual salary, any cash bonus awards made to 5th April and non-cash benefits provided by a home country employer.
2. We will undertake an in-year review during the period December to April to take account of any material changes, and in particular, to ensure that
 1. Calendar or tax year end bonuses are accounted for
 2. Taxable awards of securities options or the award of securities at undervalue are accounted for
3. Where we do not equalise liability in respect of awards under 2(b) above
 1. PAYE must be applied in accordance with all relevant statutory provisions and regulations and
 2. In the case of notional payments, where an employee does not make good the due amount within the period of 90 days specified by section 222(1)(c) ITEPA 2003, we will include additional earnings in this arrangement equivalent to the due amount. These additional earnings will be grossed-up for tax purposes.
4. We will update the estimated PAYE calculation during the year to reflect arrivals and departures of employees subject to this application.
5. We will exclude from the estimated PAYE tax calculation contributions we make (employer contributions) to a qualifying overseas pension scheme in respect of an employee who is a relevant migrant member of that scheme. Subject to the conditions specified in paragraph 51 of Schedule 36 to the Finance Act 2004, we will exclude employer contributions to an overseas pension scheme in relation to which the employee received corresponding relief in 2005-06. We will also exclude employer contributions to overseas schemes where the employee is entitled to relief from UK tax under the terms of a Double Taxation Agreement.
6. We will take into account employee contributions to the overseas pension schemes referred to in paragraph 5 where we know the amounts involved and are satisfied that each employee is entitled to relief for contributions as a relevant migrant member or with pre-commencement entitlement to corresponding relief or under the terms of a Double Taxation Agreement.
7. Where we give provisional relief for overseas workdays (apportionment of earnings between UK and non-UK duties for the purposes of sections 15 and 26 ITEPA 2003), based on each employee's workday history or as anticipated by the employees where they join during the tax year, we will withdraw personal allowances, apply code 0T and notify HMRC accordingly. Any tax gross-up will be applied after the earnings have been apportioned between UK and non-UK duties. We will enter code 0T on each employee's P11 Deductions Working Sheet or equivalent record.
8. Where paragraph 7 does not apply, we will give personal allowances by applying the emergency code on a cumulative basis when calculating PAYE tax. We will enter that code on each employee's P11 Deductions Working Sheet or equivalent record.

9. We will take relief for foreign tax into account in respect of UK residents working abroad where an agreement has been reached with HMRC in accordance with the PAYE Manual EP Appendix 5. We note in particular the requirement that an overseas country imposes a withholding at source obligation on earnings that are subject to PAYE.

10. We will not apply PAYE to the earnings of a tax-equalised employee covered under separate arrangements in EP Appendix 4 of the PAYE Manual. Where it later appears that such earnings are not exempt from UK tax under the terms of the relevant Double Taxation Agreement, we will include the employee in this arrangement and notify HMRC accordingly.

Payment of estimated PAYE

11. We undertake to pay 1/12th of the estimated PAYE for the tax year each month by the 19th or 22nd of the following month (depending upon the payment method). Where the number of employees covered by this arrangement at any one time is five or fewer, we undertake to pay 3/12th s of the estimated PAYE tax on or before the 19th or 22nd (depending upon the payment method) of July, October, January and April ('the quarterly basis'). If the number of employees covered by this arrangement increases to more than 5 at any one time in the course of a year and is likely to remain at that higher level, we will make payments of estimated PAYE by the 19th or 22nd of each month from the start of the following tax year. If the number of employees covered by this arrangement at any one time reduces to five or fewer in the course of a year and is likely to remain at that lower level, we will make payments of estimated PAYE on the quarterly basis from the start of the following tax year. Late payment penalties under schedule 56 FA 2009 will not apply to payments covered under this arrangement.

Arrivals and departures

12. We shall submit a Form P46 (Expat) for each employee to PT International within 30 days of each employee's arrival in the UK. For departures, we shall submit a Form P45 Part 1, and retain Parts 1A, 2 and 3 of the Form P45. The Form P45 Part 1 will be submitted before the end of the tax year and will show the actual date of leaving and the total pay and tax paid in the year.

Employer Annual Return

13. We will submit a completed Employer Annual Return (Form P35 and Forms P14) in accordance with the P11 Deductions Working Sheets or equivalent record and send it in time to reach HMRC by 19th May following the end of the tax year. Forms P60 will be given to the employees by 31st May after the end of each tax year. The figure of pay for each employee will comprise all cash payments and non-cash benefits in respect of which PAYE tax has been calculated before grossing-up. The figure of tax will be the total amount of PAYE tax paid under this arrangement in respect of the employee concerned.

14. We accept that due to the inherent nature of these modified arrangements, over- and underpayments of tax may arise compared with the amount of tax that would otherwise have been due if normal PAYE procedures had been applied. Provided that the procedures as outlined in these arrangements are followed, interest will not be charged in accordance with the PAYE regulations in respect of any residual income tax liabilities as shown by the employees' tax returns.

However, it is accepted that interest will run on any part of the estimated PAYE for a tax year due to have been paid under this agreement which (depending upon the payment method) reaches HMRC after 19th or 22nd April, as appropriate, following the end of the tax year.

15. We shall submit in respect of each employee covered by these arrangements a form P11D, or an approved substitute, and associated form P11D(b) by 31st January following the end of the tax year. Where a dispensation has already been agreed for certain expense items for “local hire” employees, the relevant P11D / substitute will be prepared on the same basis provided the nature of the expense items are the same as those covered by the existing dispensation.

We acknowledge that where all statements are not submitted by 31st January following the end of the tax year, penalties under Section 98 TMA 1970 may arise. This is on the basis that the earnings in question ought to have been provided on forms P11D or approved substitutes before 7th July following the end of the tax year.

Submission of employee’s self assessment tax return and calculation of tax liability

16. We will have systems and procedures in place to ensure that each employee’s self assessment will include actual cash remuneration, all benefits and reimbursed expenses payments not covered by a dispensation and other amounts chargeable to tax as employment income, grossed up on a current year basis. Each employee’s tax return will include a note in the notes section of the relevant Employment Page to the effect that the employee is tax equalised and Modified PAYE has been applied.

Payment of residual Income Tax liability

17. We will pay any additional tax found to be due under these arrangements following the submission of the employee’s tax return by 31st January following the end of the tax year. Alternatively, if a refund is due, the appropriate repayment claim mandated to us or (if different) to the employee’s contractual employer will be submitted.

We understand that as a consequence of these arrangements there will be no requirement to make payments on account of tax liabilities. We acknowledge that a tax return for an employee covered by these arrangements should incorporate a claim to cancel payments on account. We further understand that HMRC should not issue Statements of Payments on Account to employees included under these arrangements.

18. We understand that for employees who are not ordinarily resident in the UK, any overpayments of PAYE will not be treated as a remittance of foreign earnings where repayment is mandated to an employer in the UK.

National Insurance Contributions

19. These arrangements do not apply to National Insurance Contributions (NICs). In cases where the employee is liable for Class 1 NICs and taxable benefits are provided that attract Class 1A NICs, NICs must be accounted for in the normal way unless separate arrangements are agreed with HMRC as set out in EP Appendix 7A of the HMRC PAYE Manual.

Statement

20. We acknowledge that HMRC reserve the right to review / cancel these

arrangements as a result of changes in the law or should operational difficulties arise or the arrangements are seen to be deficient, for example

- Where significant and / or regular underpayments of income tax on employment income have arisen in respect of employees' self assessment returns and in the opinion of HMRC that tax ought to have been accounted for in the calculation of estimated PAYE provided for under these arrangements
- Where an employer fails to pay tax on time and / or to ensure that returns and P11Ds are filed on time such that a liability arises to pay interest and / or penalties.

We accept that as a result of a decision to cancel these arrangements, HMRC may require the strict operation of PAYE. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of PAYE. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April or an earlier date, as agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the previously stated 6 April or 3 months from the date when the written notice was given.

82003 EP appendix 7a: modified class 1 and class 1a national insurance contributions (NICs) for expatriate employees subject to an EP appendix 6 agreement [April 20100]

Application for Modified NICs for Expatriate Employees from 6 April 20

—
Employer Name:
Employer Address:
Employer PAYE reference:

Part 1 - Scope of Agreement

1. This application applies only to those employees who
 - Are subject to an EP Appendix 6 agreement, and
 - Are assigned to work in the United Kingdom (UK) from abroad and have an employer or host employer in the UK liable for secondary UK NICs liabilities, and
 - Pay NICs on earnings above the annual upper earnings limit for the year, or on earnings at or above the upper earnings limit in each earnings period throughout the year. If an employee joins, commences liability part way through an earnings period, or leaves the employment part way through an

earnings period, that shall not invalidate the agreement, provided that

- For employees with monthly earnings periods, contributions are calculated and paid on earnings at or above the upper earnings limit in all months other than the month in which the employee joined or left
- For employees with an annual earnings period, National Insurance is calculated and paid on earnings to the person's pro-rata upper earnings limit.

Part 2 - Operation of Agreement

2. We will calculate and pay Class 1 NICs on a best estimate of those elements of the payroll that attract Class 1 NICs. At the beginning of the year, or if liability commences after the beginning of the year, in the month when NICs liability first occurs, we will prepare the best estimate. The best estimate will include all world wide earnings paid from whatever source, including where relevant, the annual salary, any cash bonus awards made to 5 April, and any non-cash benefits that attract Class 1 NICs liability.

3. In accordance with Part 3 of this agreement, we will calculate and pay Class 1 NICs on all the estimated earnings which are subject to NICs.

4. We will undertake an in-year review during the period December to 5 April to take account of any material changes and, in particular, to ensure that:

- Any relevant bonuses are accounted for, and
- NICs due on awards from share or security options, or awards at undervalue of securities or shares, are accounted for.

5. During the year, we will update the estimated Class 1 NICs to be paid to reflect arrivals and departures of employees who are subject to this application, and changes in the scope of these arrangements as they apply to one or more employee.

6. We understand that where we have employees who are not ordinarily resident in the UK and who meet the conditions set out in Tax Bulletin 79 as workers for whom salary can be apportioned between UK and non-UK days, we can initially compute earnings for Class 1 NICs on the basis of an estimate of UK and non-UK workdays that we have used for income tax purposes. When we complete our NIC Settlement Return, this initial estimate must be corrected using the statutory NICs rules for non-UK days set out in Tax Bulletin 79 and the correct NICs must be paid before 31st March following the end of the tax year.

Part 3 - Payment of Estimated NICs to HMRC

7. We undertake to pay to HMRC each month, the Class 1 NICs due on 1/12th of the estimated earnings. These payments will be made each month, by the 19th or 22nd of the following month (depending upon our payment method).

8. Where the number of employees covered by this arrangement at any one time is 5 or fewer, we undertake to pay the Class 1 NICs due on 3/12ths of the total estimated earnings for the tax year, on or before the 19th or 22nd (depending upon the payment method) of July, October, January and April (the quarterly basis).

9. If the number of employees covered by this agreement increases to more than 5 at any one time in the course of the year, and is likely to remain at the higher level, we will make the payments of Class 1 NICs by the 19th or 22nd of each month, from the start of the following year. If the number of employees covered

by this agreement at any one time reduces to five or fewer in the course of the year and is likely to remain at the lower level, we will make payments of Class 1 NICs on the quarterly basis, from the start of the following year.

Part 4 - Arrivals and Departures

10. We will notify HMRC of our intention to include new arrivals to the UK covered by this agreement. Similarly, we will notify HMRC of our intention to exclude an employee from the agreement or in the event of the employee no longer being subject to PAYE under EP Appendix 6. We will make these notifications to HMRC in writing before the end of the relevant tax year.

Part 5 - Employer Annual Return

11. We will submit a completed Employer Annual Return, in accordance with the EP Appendix 6 agreement. The Return will include Class 1 NICs calculated as referred to in paragraphs 2 to 6.

12. We accept that due to the inherent nature of these modified arrangements, over- and underpayments of Class 1 NICs may arise, compared with the amount of Class 1 NICs that would otherwise have been due if normal NICs procedures had been applied. Provided that the procedures outlined in these arrangements are followed, interest will not be charged in accordance with the NICs regulations in respect of any residual Class 1 NICs liabilities as shown by the employer's 'NIC Settlement Return'. However, it is accepted that interest will run on any part of the estimated NICs for a tax year due to have been paid under this agreement, which (depending upon the method of payment) reaches HMRC after 19 or 22 April following the end of the tax year.

13. It is accepted that if the payment of estimated Class 1 NICs due on 19 or 22 April is paid late, HMRC may charge interest and penalties on that amount.

Part 6 - Class 1A NICs

14. We understand that for individuals within the agreement we will have until 31st January following the end of the tax year in which to submit our P11D(b). By the normal statutory time of 19 July following the end of the tax year we will make a payment of Class 1A NICs based on a best estimate of Class 1A NICs due. We will calculate and pay to HMRC the correct amount of Class 1A by 31 March following the end of the tax year. However, we understand that when we make our best estimate of earnings for Class 1 NICs, it is permissible to include non-cash benefits that would statutorily attract a Class 1A charge. Where our best estimate for Class 1 NICs includes payments and benefits that attract Class 1A under the normal statutory provisions, and we have paid Class 1 NICs on using that estimate, we are not then required to pay Class 1A by the normal statutory time of 19 July. Where our best estimate of earnings for Class 1 purposes includes non-cash benefits that would normally be subject to Class 1A, we must correct this after the tax year end and pay the right amount of Class 1 and Class 1A using our NIC Settlement Return. The right amount of Class 1A must be paid by 31st March following the end of the tax year.

15. We will submit form P11D(b) at the latest by 31st January following the end of the tax year. The P11D(b) will show the correct benefits for the tax year computed using the statutory rules. We will annotate the P11D(b) 'Appendix 7A' applies.

16. We understand that where all statements are not submitted by 31 March

following the year end, penalties under Regulation 81(1) Social Security (Contributions) Regulations 2001 might arise and that interest under Regulation 76(1) Social Security (Contributions) Regulation 2001, will accrue from the original 19th July statutory date.

Part 7 - Payment of Residual Class 1 and Class 1A NICs Liability - NIC Settlement Return

17. We accept that where additional Class 1 or Class 1A NICs are found to be due and are paid after 31 March following the end of the tax year, or errors in the NIC Settlement Return are discovered, interest and penalties will be charged in accordance with the legislation.

18. We will set out in the NIC Settlement Return the additional earnings and benefits, and identify those chargeable to Class 1 and Class 1A NICs.

19. Before 31 March following the end of the tax year we will carry out an exercise to establish the correct amount of Class 1 and Class 1A due on all the employee's earnings and benefits both from the UK and abroad. We will calculate and pay any additional Class 1 NICs and /or Class 1A NICs found to be due under these arrangements by the 31 March following the end of the tax year concerned. Any additional Class 1 or Class 1A NICs will be paid over to HMRC via a 'NIC Settlement Return'. A NIC Settlement Return should also account for any NICs due on any primary NICs paid on the employees' behalf under these arrangements, unless already accounted for.

20. We understand that where the employee is social security equalised, the payment of the primary NICs on the 'best estimate' of gross earnings will represent a payment of earnings. Therefore, earnings should be grossed up to take account of these NICs met on the employee's behalf. Where primary NICs are met on behalf of the employee in respect of earnings included in the Settlement Return, the earnings on the return should be grossed up to take account of the primary NICs met on the employee's behalf.

Part 8 - Overpaid Class 1 NICs

21. We understand that if we discover that NICs have been overpaid in relation to the 'best estimate' we can complete the NIC Settlement Return to reflect any secondary (employers) Class 1 or Class 1A NICs overpaid. We can also claim a refund of any primary (employees) Class 1 NICs overpaid on the 'best estimate', but only where:

- The Class 1 NICs paid by the employer are paid as part of the equalisation process and have not been recovered from the employee's earnings, or
- The Class 1 NICs have been paid by the employer and recovered from the employee and the employee mandates the repayment to the employer in writing.

22. We understand that, in all other cases, the NIC Settlement Return must be submitted together with a covering letter asking for a refund. This will be passed to HMRC Refunds Group for processing. We understand that under this agreement, we cannot recover overpayments by deducting the amounts from future payments to HMRC or by offsetting overpayments of primary contributions in respect of one employee against contributions due in respect of another. We will not submit minus or negative P14 returns.

Part 9 - Statement

23. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law, or should operational difficulties arise, or the arrangements are seen to be deficient, for example

- Where significant and/or regular underpayments of Class 1 and Class 1A NICs have arisen in respect of one or more employees and, in the opinion of HMRC, the Class 1 and Class 1A NICs ought to have been accounted for in the calculation of the estimated Class 1 and Class 1A NICs provided for under these arrangements
- Where an employer fails to pay the Class 1 or Class 1A NICs on time and/or to ensure that returns are filed on time, such that a liability arises to pay interest and/or penalties.

24. We accept that as a result of a decision to cancel these arrangements, HMRC will require the strict operation of the payment of Class 1 and Class 1A NICs. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of Class 1 NICs.

25. We agree that a separate employer record will be opened with HMRC for this scheme in the name '[Company Name] (Appendix 7A)' under which we will submit the NIC Settlement Return.

26. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April or an earlier date, as agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the aforementioned 6 April or 3 months from the date when the written notice was given.

Date:

82004 EP appendix 7b: modified class 1 national insurance contributions (NICs) for employees assigned from the United Kingdom (UK) to work overseas [April 2010]

Application for Modified NICs for Expatriate Employees from 6 April 20__

Employer Name:
Employer Address:
Employer PAYE reference:

Part 1 - Scope of Agreement

1. This application applies only to those employees who
- Are employed by a UK employer and are assigned to work abroad for a period of limited duration, but for more than a complete tax year
 - Have an ongoing liability to UK National Insurance contributions (NICs) whilst abroad

- Earn above the upper earnings limit in every earnings period throughout the tax year (I understand that it shall not invalidate this agreement if an employee earns less than the upper earnings limit in the pay period they join the company, or in the pay period in which they leave, if in all other pay periods during the year, the upper earnings limit is exceeded. However, in the case of employees with annual pay periods, to be within the agreement, their earnings must exceed the annual upper earnings limit)
- Are not resident and ordinarily resident for tax purposes and not liable to UK tax on their earnings from employment
- Receive some earnings and benefits derived from the employment from sources other than the UK employer.

Part 2 - Operation of Agreement

2. We will calculate and pay Class 1 NICs on a best estimate of those elements of the remuneration package that attract Class 1 NICs. At the beginning of each year (or at the beginning of the assignment, if that is later) we will prepare the best estimate. The best estimate will include all world-wide earnings paid from whatever source, including where relevant, annual salary, any cash bonus awards made to 5 April, and any non-cash benefits that attract Class 1 NICs liability.

3. We will undertake an in-year review during the period December to 5 April to take account of any material changes in respect of the remuneration package that attract Class 1 NICs, and in particular, to ensure that:

- Relevant bonuses are accounted for; and
- NICs due on gains from share or securities options, and awards of securities or shares at undervalue, are accounted for.

We will update the estimated Class 1 NICs payable immediately following the review.

Part 3 - Payment of Estimated NICs

4. We undertake to pay to HMRC each month, the Class 1 NICs due on 1/12th of the total estimated earnings for the tax year. These payments will be made each month by the 19th or 22nd of the following month (depending upon our payment method).

5. Where the number of employees covered by this arrangement at any one time is 5 or fewer, we undertake to pay the Class 1 NICs due on 3/12ths of the total estimated earnings for the tax year, on or before the 19th or 22nd (depending upon the payment method) of July, October, January and April (the quarterly basis).

6. If the number of employees covered by this agreement increases to more than 5 at any one time in the course of the year, and is likely to remain at the higher level, we will make payments of estimated Class 1 NICs by the 19th or 22nd of each month from the start of the following year. If the number of employees covered by this agreement at any one time reduces to five or fewer in the course of the year, and is likely to remain at the lower level, we will make payments of estimated Class 1 NICs on the quarterly basis from the start of the following year.

Part 4 - Arrivals and Departures

7. We will notify HMRC of our intention to include any new employees entering the agreement by providing details of the employees' departures from the UK.

Similarly we will notify HMRC of our intention to exclude an employee from the agreement by providing details of the employee's return to the UK. We will make these notifications to HMRC in writing by the end of the relevant tax year.

8. We accept that in cases where an employee is repatriated to the UK before he/she has been overseas for a complete tax year and, as a result, his/her general earnings from the employment become chargeable to UK Income Tax, this agreement will no longer apply to that employee. In such cases, we will cease to use estimates in respect of all earnings paid and benefits received after the employee has returned to the UK, and use the statutory basis of calculating and returning both Class 1 and Class 1A NICs. We will carry out an exercise before the end of the tax year, to establish the correct amount of the earnings in the period covered by our earlier estimate and record these on the P11 Deductions Working Sheets or equivalent. We will submit a completed Employer Annual Return showing the correct earnings in accordance with the P11 Deductions Working Sheets or equivalent and send it in time to reach our HMRC office by 19 May following the end of the tax year. Forms P60 will be given to the employees by 31 May after the end of each tax year. The Employer Annual Return in accordance with the P11 Deductions Working Sheets will show the correct Class 1 for the tax year. If the correct figures for Class 1 NICs exceed our earlier estimates, we will pay the balance to HMRC with our final payment for the year. Where Class 1A becomes payable, we will make a return P11D(b) and pay Class 1A by 19th July following the end of the tax year.

Part 5 - Employer Annual Return

9. For employees within this agreement, we will submit a completed Employer Annual Return in accordance with the P11 Deductions Working Sheets or equivalent and send it in time to reach our HMRC office by 19 May following the end of the tax year. Forms P60 will be given to the employees by 31 May after the end of each tax year. Where an employee leaves the UK part way through a tax year, we will calculate Class 1A NICs payable to the date the employee left the UK, make a return P11D(b) and pay Class 1A by 19th July following the end of the tax year.

10. We accept that, due to the inherent nature of the modified arrangements, over- and underpayments of Class 1 NICs may arise compared with the amount of Class 1 NICs that would otherwise have been due if normal NICs procedures had been applied. Provided that the procedures outlined in these arrangements are followed, interest will not be charged in accordance with the NICs regulations in respect of any residual Class 1 NICs liabilities as shown by the employer's 'NIC Settlement Return' - See Part 8. However, it is accepted that interest will run on any part of the estimated NICs due to have been paid under this agreement which (depending upon the method of payment) reaches HMRC after the 19th or 22nd of April following the end of the tax year.

Part 6 - Impact of Inland Revenue Dispensation

11. We accept that the terms of a dispensation will not apply to employees who do not have a 'taxable employment' as defined in Part 2 ITEPA 2003. Therefore the 'best estimate' will reflect the total amount of earnings liable to Class 1 NICs taking into account any payments that can be disregarded from Class 1 earnings under the provisions of Regulation 25 and Schedule 3 of the Social Security

(Contributions) Regulations 2001.

Part 7 - Class 1A NICs

12. We understand that any benefits provided to employees within this agreement should not fall to be chargeable to income tax under ITEPA as 'general earnings'; therefore, liability for Class 1A NICs will not arise.

Part 8 - Payment of Residual Class 1 NICs Liability - NIC Settlement Return

13. Before 31 March following the end of the tax year we will carry out an exercise to establish the correct amount of Class 1 NICs due on all the employee's earnings, both from the UK and from abroad. We will calculate and pay Class 1 NICs on the difference between the correct figures for the year and those figures that we submitted to HMRC on our Employer Annual Return. Payment of the Class 1 will be made by 31 March following the end of the tax year. Any additional Class 1 NICs payable will be shown on our 'NIC Settlement Return'. The NIC Settlement Return will be returned to HMRC by 31 March following the end of the tax year.

14. We accept that where the additional Class 1 NICs found to be due is paid after 31 March following the end of the tax year, or errors in the NIC Settlement Return are discovered, interest and penalties will be charged in accordance with legislation.

15. We will set out in the NIC Settlement Return the additional earnings and benefits and identify those chargeable to Class 1 NICs.

Part 9 - Overpaid Class 1 NICs

16. We understand that, if we discover that Class 1 NICs have been overpaid in relation to the 'best estimate', we can complete the NIC Settlement Return to reflect any secondary (employers) Class 1 NICs overpaid. We can also claim a refund of any primary (employees) Class 1 NICs overpaid on the best estimate but only where

- The Class 1 NICs were paid by the employer and have not been recovered from the employee, or
- The Class 1 NICs are paid by the employer and recovered from the employee, and then only if the employee mandates the repayment to the employer in writing.

17. We understand that, to claim the overpayment, the NIC Settlement Return must be submitted together with an application for a refund. This will be passed to HMRC Refunds Group for processing. We understand that under this agreement, we cannot recover overpayments by deducting the amounts from future payments to HMRC or offsetting overpayments in respect of one employee against underpayments in respect of another employee. We will not submit minus or negative P14 returns.

Part 10 - Statement

18. We acknowledge that HMRC reserve the right to review / cancel these arrangements as a result of changes in the law, or should operational difficulties arise, or the arrangements are seen to be deficient, for example

- Where significant and/or regular underpayments of Class 1 NICs have arisen in respect of one or more employees and, in the opinion of HMRC, the Class 1 NICs ought to have been accounted for in the calculation of the estimated

Class 1 NICs provided for under these arrangements

- Where an employer fails to pay the Class 1 NICs on time and/or to ensure that returns are filed on time such that a liability arises to pay interest and/or penalties.

19. We accept that, if a decision is made by HMRC to cancel these arrangements, HMRC will require the strict operation of the payment of Class 1 NICs. Similarly, we reserve the right to cancel these arrangements and adopt the strict operation of Class 1 NICs.

20. We agree that a separate employer record will be opened with HMRC for this scheme in the name '[Company Name] (Appendix 7B)' under which we shall submit the NIC Settlement return.

21. Cancellation by either party will be confirmed by written notice and will be effective from the following 6 April, or such earlier date as is agreed by the parties. If a date cannot be agreed, cancellation will be effective on the earlier of the aforementioned 6 April or 3 months from the date when the written notice was given.

CHAPTER FIFTEEN

TRADING INCOME

15.1 Trading income – Introduction

A full discussion of the taxation of trading income would require many volumes. In this chapter I focus on matters closest to the themes of this book.

15.1.1 *Cross references*

The following matters are discussed elsewhere.

16.7 (Border between trading income and property income)

22.6 (Trade royalties)

41.11 (When is there a trade in financial assets?)

15.2 Charge on trading income

Section 5 ITTOIA provides:

Income tax is charged on the profits of a trade, profession or vocation.

Section 5 applies to all trading¹ income, but s.6 ITTOIA distinguishes between trading income of residents and of non-residents; these need to be considered separately.

15.3 Trading income of UK resident

Section 6(1) ITTOIA provides:

¹ In this chapter, reference to a “trade” includes a profession or vocation as there is no relevant distinction between them. Section 6(3) ITTOIA provides:

“This section applies to professions and vocations as it applies to trades.”

Profits of a trade arising to a UK resident are chargeable to tax under this Chapter wherever the trade is carried on.

Section 7 ITTOIA provides:

- (1) Tax is charged under this Chapter on the full amount of the profits of the tax year. ...
- (4) This section is subject to Part 8 (foreign income: special rules).

This brings in the remittance basis rules if the trading income arises from a source outside the UK. It is therefore necessary to identify the source. Section 7(5) ITTOIA states the test of source of trading income:

And, for the purposes of section 830 (meaning of “relevant foreign income”), the profits of a trade, profession or vocation arise from a source outside the UK only if the trade, profession or vocation is carried on *wholly* outside the UK.

This is a statutory statement of the pre-ITTOIA case law.² It is a wide and strange test of source. Applying this test, if a trade is carried on partly in country A and partly in country B, the source of the income is in country A *and* country B. For the same income to have a source in two different countries is contrary to the natural meaning of “source” and contrary to the purpose of the concept which is to locate a source in one jurisdiction in order to identify one state with jurisdiction to tax. (Similarly an individual can have only one domicile.)

The explanation is that s.7(5) ITTOIA does not provide the natural meaning of “source”; it is an artificial or deeming definition. It is fortunate (but not surprising) that commonwealth countries which adopted a UK style income tax did not adopt this rule. Thus Commonwealth cases on the source of trading income are not relevant here.

If any part of the trade is carried on in the UK then the entire trade has a UK source and does not qualify for the remittance basis. There is not even a *de minimis* rule; contrast the incidental duties disregard which

2 See John Avery Jones, “Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis”, *Studies in the History of Tax Law* (Vol 1 2004) p.26 accessible www.kessler.co.uk.

applies to employment income.³

The former ITH discussed the old case law, which still holds good under ITTOIA:

209. San Paulo case

[The San Paulo Railway Company (*San Paulo (Brazilian) Railway Company v Carter* 3 TC 407)] ... was a UK incorporated company with its board meetings in London. The whole of its physical undertaking was in South America and while it accepted that it was resident here it argued that its business was carried on wholly abroad where its railway was. The Courts held that the head and brain of the trading venture was here and that the profits were those of a trade partly carried on here and that, accordingly, Case I applied. ...

210. Trade partly in UK

The principle underlying the San Paulo decision is that a trade carried on partly in the UK is within Case I. The factors which decide whether a company is resident in the UK by reason of central management and control are, as will be seen, similar to those which decide whether its trade should be within Case I or Case V and the result is that for many years in the corporate sector the only examples seen of Case V trades were those in which a company is a partner in an overseas trade. ...

211. *Ogilvie v Kitton*

But other cases were to show how difficult it was going to be, except on very exceptional facts, to establish that any trade of a resident person was carried on wholly abroad. There was, for example, Mr Ogilvie in *Ogilvie v Kitton* (5 TC 338). He lived in Aberdeen and ran a shop in Canada. To say that he ran the shop really begs the question because he simply received reports from his manager in Canada and did not in fact intervene actively in the business at all, merely taking a tacit interest in things from the information in the reports. It was held that the head and brain of the trading venture was in Aberdeen and that the profits were assessable under Case I.

In short, if a sole trader is UK resident it is in practice impossible to arrange that their trading income has a foreign source. Section 7(4)(5) ITTOIA is dead letter law. The former ITH recognised this at para 209:

That decision [*San Paulo*] suited the Revenue very well. We no longer had to worry about remittances which after all, though very sensible for an extractive activity which had to send its produce home, did not apply well at all to the more modern industries which did not need to remit their profit and which indeed probably wanted to keep as much profit abroad as possible for the expansion of their business. And so we

³ See 13.13 (Where are duties performed: incidental duties).

effectively got on to a statutory arising basis for trades which, in everyday language, were wholly overseas and we reached that position purely through the interpretation of the statute by the Courts. ...

For completeness: s.95 ITA restricts loss relief for trades carried on wholly outside the UK, but since it is almost impossible to arrange that, the section is dead letter law.

15.3.1 *Planning for UK resident sole trader*

If a remittance basis taxpayer carries on a trade partly in and partly out of the UK, the individual will be taxed on the arising basis and not under the remittance basis. In these circumstances the individual may be able to divide up their activities into two spheres – those in and those out of the UK. The individual will then be carrying on two separate activities, of which at least one will yield foreign source income and qualify for remittance basis treatment.

How is this division to be achieved? Overseas activities could be carried on by a partnership controlled abroad. The offshore partner may be a company. This was the route successfully adopted by Sir David Frost: see *Newstead v Frost* 53 TC 525. Alternatively the activities could be carried on by a company or trust. In this way foreign trading income may be converted into foreign employment or dividend income which would enjoy a more beneficial tax treatment

15.4 To whom does trading income arise?

Since different rules apply depending on whether trading income arises to a UK or non-UK resident, it is necessary to identify the person to whom the income arises.

Suppose a non-resident trust is carrying on a trade. If the trading income accrues to the trustees, they are taxed in accordance with the rules relating to *non-residents*, discussed below, so the trustees would only be subject to UK income tax if the trade was carried on partly in the UK, and then only on the profits (if any) attributable to that part.

However if the life tenant of a transparent (*Baker*-style) trust was resident in the UK, then the profits of the trade arise to a UK resident, and the life tenant is taxed in accordance with the rules relating to UK residents: ie on an arising basis unless the strict condition is satisfied that

the trade is carried on wholly outside the UK.⁴

Suppose a non-resident settlor-interested trust with a settlor who is a remittance basis taxpayer. One might think that the settlor would be taxable on an arising basis only on the part (if any) of the trading income attributable to carrying on the trade in the UK. The balance of the profits one might think taxable only (if at all) under the s.624 remittance basis. But this is not the case. Since the trust income is deemed to be that of the UK resident settlor, the settlor is taxed in accordance with the rules relating to UK residents: ie theirs are taxed on an arising basis unless the strict condition is satisfied that the trade is carried on wholly outside the UK.

What if the trade is carried on by a non-resident company within s.720 ITA? The transferor is treated as receiving income which in the HMRC view is not trading income. However, the s.720 remittance basis applies only to income which would be RFI if it were the individual's.⁵ So for the purpose of the s.720 remittance basis one must apply the rules relating to UK residents: ie the transferor is taxed on an arising basis unless the strict condition is satisfied that the trade is carried on wholly outside the UK.

In practice there will often be some UK element which would be sufficient to make the entire trade taxable.

15.5 Trading income of non-resident

An entirely different rule applies to trading income arising to a *non-resident* person. Section 6(2) ITTOIA provides:

Profits of a trade arising to a non-UK resident are chargeable to tax under this Chapter only if they arise—

- (a) from a trade carried on wholly in the UK, or
- (b) in the case of a trade carried on partly in the UK and partly elsewhere, from the part of the trade carried on in the UK.

The pre-ITTOIA wording imposed a charge on non-residents on income arising:

⁴ This may need to be reviewed when *R oao Huitson v HMRC* [2010] EWHC 97 (Admin) is final, because of the somewhat novel dicta of that case, but I do not anticipate any changes are likely.

⁵ See 28.14 (Section 720 remittance basis).

from any trade, profession or vocation exercised within the UK.⁶

The meaning was the same so pre-ITTOIA case law is still relevant.

Section 6(2) raises two issues: (1) When is a trade carried on wholly or partly in the UK? and (2) If a trade is carried on partly in the UK, how does one identify the profits from that part?

This is sometimes paraphrased by asking the question whether (or to what extent) the source of the trading income is in the UK. There seems nothing wrong with that; it is the correct and natural meaning of the word “source”. Since s.7(5) ITTOIA uses the word “source” in an artificial sense in the rules relating to trading income UK residents, I have wondered whether it would aid clarity to avoid the word “source” in the context of the rules for non-residents. But in practice it is not possible to avoid the use of the word “source” here⁷ so one simply needs to remember that source has two distinct meanings.

The UK case law is mostly antique, because in practice double taxation treaties often apply and then the issues may not arise. But of course that is not always the case. The former ITH is erudite and still helpful.⁸ There are two other sources of guidance: cases on foreign tax credit and non UK tax cases. I should comment briefly on these.

15.5.1 *Foreign tax credit cases*

Section 9 TIOPA provides foreign tax credit relief where the foreign tax is:

calculated by reference to income arising ... in the territory.⁹

Thus for the purposes of foreign tax credit it is similarly necessary to identify the locality of the source. The issue arose in *Yates v GCA International*¹⁰ where *Smidh* principles (ie the rules for trading income of

6 Section 18 ICTA 1988 (repealed). It was accepted (though not stated in statute) that where a trade was exercised partly in the UK, income was apportioned and only the UK part was taxable.

7 Since relevant case law and foreign statutes regularly use the word “source”.

8 Tax Bulletin 18 provides a brief summary, not set out here.

9 See 54.1 (Foreign tax credit relief).

10 64 TC 37.

non-residents) were applied. The former ITH para 827 provided:

The Gaffney Cline case [Yates v GCA International 64 TC 37], ... The point there was what part, if any, of the income from services arose in Venezuela when the contract was made in Venezuela but the services were performed partly in Venezuela but mainly in the UK. That is not necessarily the same as asking whether the trade was exercised in only one or in both of the countries – that was made clear in the judgement. But the judge looked for guidance to the criterion of Atkin LJ in the Smidth case ‘where do the operations take place from which the profits in substance arise’ when deciding that the income arose partly in Venezuela and partly in the UK.

15.5.2 *Non-UK tax cases*

There are many Commonwealth cases, including some modern cases, which ought to be helpful. However, the Commonwealth legislation is differently worded. It is necessary to consider whether the test is the same, ie whether the Commonwealth cases have any relevance in the UK (and vice versa).

The Southern Rhodesia statute imposes a charge on the amount:

received by ... any person ... *from any source within the Territory* ...

In *Rhodesia Metals v CT*, the Privy Council said of this provision:

... numerous cases founded on the various Income Tax Acts, English, Australian, New Zealand and South African, were cited ...

Their Lordships have no criticisms to make of any of those decisions, but they desire to point out that

- [1] decisions on the words of one statute are seldom of value in deciding on different words in another statute, and that
- [2] different business operations may give rise to different taxing results.

Point [2] is obviously correct but we are here concerned with point [1]. The Privy Council continue:

- [3] If the charging words of the English statute are looked at,
“annual profits or gains arising to any person ... (ii.) residing in the UK from any trade wherever carried on, and (iii.) whether

resident in the UK from any trade exercised within the UK”;¹¹ they are obviously different from the Southern Rhodesian charging words,

total amount [other than capital] received by ... any person ... from any source within the Territory.

- [4] It is desirable, also, to point out that, at any rate for different taxing systems, income can quite plainly be derived from more than one source even where the source is business. For instance, in the case of the business of a railway company whose railway is situate abroad, as in *San Paulo (Brazilian) Railway v Carter*,¹² while the English company may be assessed in England on the whole of its profits because it carries on part of its business there, yet it could not be doubted that so much of the profits of the business as were in fact earned from running the railway in Brazil were derived from exercising a business in Brazil; and still less could it be doubted that the sums received by the company in Brazil were received from a source in Brazil.¹³

Lord Atkin correctly states at [4] that the Commonwealth legislation and case law has no relevance to the (artificially wide) test of location of source of trading income for UK residents.¹⁴ It is considered that the Commonwealth legislation does apply the same test as s.6(2) ITTOIA (trading income of non-resident). For this purpose the Commonwealth cases *are* persuasive authorities in the UK. For the object of the rules for non-residents is to avoid double taxation and ensure that income is taxed in one and only one jurisdiction. That object can only be achieved if there is an international “common law” on the subject. In practice this is the view taken. For instance, the former ITH referred to *Kirk*.

The same applies to Hong Kong, where the charge is on profits “arising in or derived from Hong Kong”.¹⁵ *Smidth* is the basis of the Hong Kong case law.¹⁶ The Hong Kong Revenue have issued useful guidance “**the Hong Kong guidance note**”. It is suggested that its status in an English court should be the same as that of a respected textbook. The Hong Kong

11 I have corrected a slight misprint in the law report. This is only a rough summary of the statutory wording, later s.18 ICTA, now rewritten in ITTOIA.

12 3 TC 407.

13 [1940] AC 774 at p.788–9.

14 See 15.3 (Trading income of UK resident).

15 Section 14 Hong Kong Inland Revenue Ordinance.

16 *IRC v HK-TVB* [1992] STC 723 at p.728.

guidance note provides:

4. Though the word “source” is not used in section 14, it has always been accepted by the courts that the words “arising in or derived from” raised the concept of source. Cases from other common law jurisdictions with legislation using the specific word “source” are therefore relevant and have been used in assisting the interpretation of the words used in section 14. In *IRC v Philips Gloeilampenfabrieken* [1955] NZLR 868, Barrowclough CJ at 874 said that the concept of derivation seems necessarily to imply the concept of a source.¹⁷

In an Indian statute, the charge was on profits “accruing or arising in British India”. This was held to be substantially the same as in Hong Kong.¹⁸

Unfortunately the Commonwealth cases are remarkably inconsistent.¹⁹

15.6 Place where contract made

The former ITH provided:

813. *Erichsen v Last*

Another very early case was *Erichsen v Last* [4 TC 422] which was heard in the Court of Appeal in 1881. It is a highly important case and, curiously, was not published in Tax Cases until some twenty years after the decision. It is perhaps a pity that *Erichsen v Last* was concerned with a very special sort of trade – the relaying of telegraph messages. The application of the ideas which emerge from *Erichsen v Last* to other trades is, because of its special facts, rather difficult. The facts are simple enough. Erichsen was the UK representative of the Great Northern Telegraph Company of Copenhagen. The company was not resident here but it had three cables running across the North Sea to bases in Scotland and it had a staff of operators here. Messages were collected through an arrangement with the Postmaster General. The Post Office collected the money and deducted its agreed remuneration before handing over the messages to the company’s operators here. The company’s own staff then transmitted the messages across

17 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No. 21 (Revised) Locality of Profits December 2009, accessible www.ird.gov.hk/eng/pdf/e_dipn21.pdf. See 18.4 (Location of source of income).

18 *IRC v Hang Seng Bank* [1990] STC at p.739 though “it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases”.

19 See Michael Littlewood’s scholarly article “The Privy Council, the Source of Income and *Stare Decisis*” [2004] BTR 121 and Robert Venables QC, “The Territorial Source of Income” OTPR, Vol 7, p.177.

the North Sea. Thereafter, depending on their destination, they passed through cables owned by the Danish and Russian governments to their destinations which might have been as far off as Japan. The company made a weak sort of claim that it was not trading here but it went on to say that if it was, it ought to be taxed only on the profit arising from the relaying of the messages along the main cable to Denmark. It was making the point that some of the profit arose from the transmission along other cables which had absolutely nothing to do with the UK. The first thing the judgments in the Court of Appeal make clear is that the matter is wholly one of fact. The judgments then separate two questions for decision. First, is there trading in the UK? Brett LJ says this on page 425. His words are important because it is here that the significance of contract – place of contract – begins.

“Now, I think it would be first of all nearly impossible and second wholly unwise to attempt to give an exhaustive definition of when a trade can be said to be exercised in this country. The only thing that we have to decide is whether upon the facts of this case it can be said that this company is carrying on a profit earning trade in this country. Now I should say that wherever profitable contracts are habitually made in England by or for a foreigner with persons in England, because those persons are in England, to do something for or supply something to those persons, such foreigners are exercising a profitable trade in England, although everything done by or supplied by them in order to fulfil their part of the contract is done abroad. The profit arises to them from the contract which they make. The profit which they derive can only be derived from the payment which is to be made to them by the person with whom they contract. In the given case they would not have any such contract as they are in the habit of making unless it was a contract made in England with a person who is in England because he is in England. Observe, if the person or someone acting for him were not in England he would not be wanting to send a telegraph message from England”.

The language is now over 100 years old and while it may perhaps look a little old fashioned today its meaning seems plain. The Court was saying: “You, the customer, are in England and because you are here you want goods here (or in the case in point, you want a message sent from here). The profit comes from the contract, the contract is here and there is trading in England and it is nonetheless trading in England even though the goods come from abroad or the service is provided through electric cables which are partly abroad”. ...

815. First champagne cases

Erichsen v Last was followed by the so-called champagne cases. There were three leading champagne cases. In the first two, the Revenue succeeded in a claim that the French champagne houses concerned were trading in the UK through agents in London. In the Pommery case [*Pommery and Greno v Apthorpe* 2 TC 182] there was no express finding as to where contracts were made but most orders were met from stock held in the UK. In the Werle case [*Werle v Colquhoun* 2 TC 402] the Court of Appeal made it clear that they considered the contracts to be made by the agents here on behalf of their principal.

These two houses were producers of champagne as well as sellers of champagne and it is reasonably clear that the Revenue did not claim to tax the producer's profit. In the Pommery case at page 189, the Judge specifically referred to the difficulty of calculating the profit; he said that there might be some difficulty as to the manner of calculation in deciding what amount of expenditure to put against the profits and wondered whether it would be proper to look at the goods sent over to England and to put a fair valuation upon them as they arrived. That he said was a matter of quantum, a matter for the consideration of persons skilled in such things.

In the Werle case on page 413 Fry LJ had a similar approach, he said

"A small shopkeeper... is plainly carrying on a trade in the place where the shop is ... The question, however, becomes more difficult when the trade is carried on, as in the present case, in a far more complicated manner ... when the contract may be in one place, the goods in another, the principal in another and the goods may be delivered in some other place. We have, however, simply to do this, to take all the relevant facts and the mode in which the business is carried on, and to ask ourselves whether that business be or be not carried on within the UK. It appears to me that the same business may in some sense be carried on in many places. The Head Office of a firm, the place where the goods are manufactured, the place where the contracts are made, may all of them be places in which the business or parts of the business is or are carried on. Now, in the present case what we find is this, that the appellants reside in France, carrying on there the business of vineyard proprietors, champagne makers and champagne merchants, no doubt a large portion of that business is carried on within France, but a portion of that business is that of champagne merchants. Now, that means, as I understand, the selling of champagne and that business they carry into effect in England through the intervention of a firm of agents in this country."

816. Contracts abroad

The last of the champagne cases is *Grainger v Gough* [3 TC 311 and 462] and it is a very significant case. The Court of Appeal made no distinction between this and the earlier cases and found that the champagne house was liable on its trading here. ...

But Lord Esher and his fellow judges were overruled by the House of Lords on the question of whether there was liability at all. That was on the basis that in this particular case, contracts were not made in the UK. Although to the customer there may have been little difference between buying through the agents in the first two cases and buying through the agents in the third, there was a difference in the arrangements which the House of Lords saw as vital in determining the non-resident's liability to UK tax. In finding that the contracts were not made in the UK the House of Lords drew the now classic distinction between trading in the UK which involves liability and trading with the UK which does not. Non-residents with customers here commonly rely on this distinction.

The House of Lords may well have had it in mind that if we sought too strenuously to tax foreigners who sold goods here, we might be faced with hostility by countries to which we were exporters and which might seek to tax

those exporters in parallel circumstances. The thought is not directly expressed but there is a hint of it at the end of Lord Herschell's judgment on page 468.

15.7 Rejection of place of contract test

The former ITH provided:

817. Place of contract not decisive

There are later judgments and very important judgments which tend to water down a little the great emphasis on place of contract. Lord Atkin speaking in the *Smidth* case [*Smidth & Co v Greenwood* 8 TC 193] in 1921 said this

“It (the place of contract) is obviously a very important element in the enquiry and if it is the only element the assessments are clearly bad. The contracts in this case were made abroad. But I am not prepared to hold that this test is decisive. I can imagine cases where a contract of resale is made abroad, and yet the manufacture of the goods, some negotiation of the terms, and complete execution of the contract take place here under such circumstances that the trade was in truth exercised here. I think that the question is, where do the operations take place from which the profits in substance arise?”

This is sometimes called “the operations test”. It is not in fact a “test” as such, because further guidance is needed to identify where the profits in substance arise. It is however a rejection of the place of contract test. The former ITH gave one further quote to drive the point home:

In one of the few fairly modern²⁰ cases on this subject, the *Firestone* case [*Firestone Tyre & Rubber v Lewellin* 37 TC 111 at p.142] in 1957, Lord Radcliffe said this

“But he (Counsel for the Appellants) rightly reminded us that more than once the place where the contract is made has been spoken of as the ‘crucial’ test or, again, as the ‘most vital’ element. Speaking for myself, I do not find great assistance in the use of a descriptive adjective such as ‘crucial’ in this connection. It cannot be intended to mean that the place of contract is itself conclusive. That would be to re-write the words of the Taxing Act, and could only be justified if there was nothing more in trading than the act of sale itself. There is of course much more. But if ‘crucial’ does not mean as much as

20 I guess that this passage in the former ITH was written in the 1980s.

this, it cannot mean more than that the law requires that great importance should be attached to the circumstance of the place of sale. It follows, then, that the place of sale will not be the determining factor if there are other circumstances present that outweigh its importance or unless there are no other circumstances that can.”

This approach is adopted in the Privy Council. The Hong Kong guidance note provides:

7. Lord Bridge explained the “broad guiding principle” in *Hang Seng Bank* at 322H to 323A in the following terms: “But the question whether the gross profit resulting from a particular transaction arose in or derived from one place or another is always in the last analysis a question of fact depending on the nature of the transaction. It is impossible to lay down precise rules of law by which the answer to that question is to be determined. The broad guiding principle, attested by many authorities, is that one looks to see what the taxpayer has done to earn the profit in question.”

8. The “operations test” was further elaborated by Lord Jauncey in *HKT VBI* at 407C-D:

“*F. L. Smidth & v Greenwood* [1921] 3 K.B. 583 was cited in *Hang Seng Bank* case and their Lordships do not doubt that Lord Bridge has in mind the judgment of Atkin L. J. in that case and in particular the passage when he said, at p. 593: ‘I think that the question is, where do the operations take place from which the profits in substance arise?’ Thus Lord Bridge’s guiding principle could properly be expanded to read ‘one looks to see what the taxpayer has done to earn the profit in question and where he has done it.’”²¹ ...

21. When Lord Bridge said in *Hang Seng Bank* that profits from buying and reselling of commodities were derived from the place where “the contracts of purchase and sale were effected”, he could not merely mean legally executed (as this would depend on formal legal rules of offer and acceptance). The Department agrees with the approach in *Magna* and will contemplate all the relevant operations carried out to earn the profits, including the solicitation of orders, negotiation, conclusion, trade financing, shipment and performance of the contracts.

22. The Department does not merely look at the place of contract to

21 Similarly Lord Jauncey in *HK-TVBI* at 409D-E:

“The proper approach is to ascertain what were the operations which produced the relevant profits and where those operations took place.”

determine the geographical source of profits. Where the contract is made by exchange of letters, by fax, or by e-mail, the application of contract law and of private international law as to where the contract is made may result in conclusions that are entirely fortuitous. In *Firestone Tyre and Rubber Co v Lewellin* [1957] 1 WLR 464 (HL) at 471, Lord Radcliffe said such an approach under the conditions of international business and modern facilities of communication was capable of proving a somewhat ingenuous one. Hunter J shared the same view in *Sinolink Overseas v IRC* 2 HKTC 126 at 131.²²

15.8 Where profits in substance arise

So we turn to the question of where profits in substance arise. The short answer is that there is no short answer. The former ITH provided:

820. NRs: profits in substance

It is consistent with the words of Brett LJ at the start of the quotation in ITH813 to say that no neat formula to decide what is, and what is not, trading in the UK can be devised. ...

Circumstances vary so widely that it is not possible to devise a single test that fits all cases.²³ The Hong Kong guidance note provides:

11. The broad guiding principle has been followed in subsequent cases before the Court of Final Appeal. In *Kwong Mile*, Bokhary PJ summarised the broad guiding principle at 174I to 175E:

“The ascertainment of the source of a profit is not hindered by technical rules, but is helped by the broad guiding principle that one looks to see what the taxpayer has done to earn the profit and where he has done it. ... In *IRC v Orion Caribbean* [1997] HKLRD 5 924, Lord Nolan emphasised (at p.931F) that ‘[n]o simple, single, legal test can be employed’ when ascertaining the source of a profit. ... The situations in which the source of a profit has to be ascertained are too many and varied for a universal judge-made test. Apart from the words of the statute themselves, the only constant is the need to grasp the reality of each case, focusing on effective causes without

22 *IRC v Hang Seng Bank* [1990] STC at p.739 though “it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases”.

23 “No simple legal test can be employed”; see *IRC v Orion Caribbean*.

being distracted by antecedent or incidental matters.”²⁴

It is not, of course, an answer to say that the question is just a question of fact. The comments made at 19.4.10 (Unsatisfactory approaches) apply here too.

15.9 Trading in UK: preparatory and auxiliary activities

The former ITH Manual para 849 provided that activities within OECD Model Convention para 5(4) do not amount to trading in the UK. Para 5(4) provides:

Notwithstanding the preceding provisions of this Article, the term “permanent establishment” shall be deemed not to include:

- a) the use of facilities solely for the purpose of storage, display or delivery of goods or merchandise belonging to the enterprise;
- b) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;
- c) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;
- d) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;²⁵
- e) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character;
- f) the maintenance of a fixed place of business solely for any combination of activities mentioned in subparagraphs a) to e), provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.²⁶

The Hong Kong guidance note provides:

ANTECEDENT OR INCIDENTAL ACTIVITIES

14. In *ING Baring* at 428, Ribeiro PJ when discussing the legal principle also emphasised the need to grasp the reality of each case, focusing on

24 *IRC v Hang Seng Bank* [1990] STC at p.739 though “it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases”.

25 See 15.10 (Buying from UK sellers).

26 For similar discussion, see 81.7 (PE: preparatory and auxiliary activities).

effective causes without being distracted by antecedent or incidental matters. The focus is on establishing the geographical location of the taxpayer's profit-producing transactions as distinct from activities antecedent or incidental to those transactions.

15. Whether an act is an antecedent or incidental activity is a question of fact and would depend on the nature of the transaction. In *IRC v The Hong Kong & Whampoa Dock Co* [1960] 1 HKTC 85, the initial business contact in Hong Kong which set in motion a chain of operations that ultimately led to the salvaging of the vessel was rejected as the relevant operation.

16. Comments in a similar vein can be found in *Hang Seng Bank* at 320F-G:

“The activities of the bank from which the income arose was the buying and selling of this property in overseas market places and not the decision making process in Hong Kong or any other activities in Hong Kong. Likewise the income arose from the trading in property situate outside of Hong Kong and not the moneys of customers situate in Hong Kong.”²⁷

15.10 Buying from UK sellers

The former ITH provided:

812. Purchasing is not trading in

The mere buying of goods here does not amount to trading here. That was decided in the very first case in these matters, *Sulley v AG* [2 TC 149], in 1860. A New York firm purchased goods in England for sale in America. It had an office here where the English resident partner saw to the purchasing and shipping of the goods. The Court of Exchequer (a Court of Appeal) found that “The profits of the firm in America do not accrue in respect of any trade carried on in this country, but in respect of the trade carried on in New York, where the main business is conducted”.

Maintaining a purchasing office is also included in the list of auxiliary activities which do not amount to trading in the UK.²⁸

27 *IRC v Hang Seng Bank* [1990] STC at p.739 though “it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases”.

28 Model convention para 5(4)(d); see 15.9 (Trading in UK: preparatory and auxiliary activities).

The Hong Kong guidance note provides:

BUYING OFFICE

29. A trading company, carrying on business outside Hong Kong, may set up a branch in Hong Kong to act as a buying office for the purpose of purchasing goods or merchandise or of collecting information. The activities of the branch are confined to the purchase of goods or merchandise or of collecting information in Hong Kong and it is not involved in their sale, either in Hong Kong or elsewhere. In such a situation, a liability to Hong Kong profits tax would not arise. The functions of a buying office may also be carried out by a subsidiary company or by an agent (either related or unrelated). However, as for a branch, the subsidiary company or agent must not be involved in the sale of the goods. On the other hand, any commission or other remuneration earned by the subsidiary company or agent for performing its services in Hong Kong will be fully taxable.

15.11 Buying and selling to UK purchasers

The former ITH para 820 provided:

But we do attach much importance to Lord Atkin's approach to the question of "trading in" in the *Smidth v Greenwood* case quoted in ITH817 above – "where do the operations take place from which the profits in substance arise".

We have come to adopt this test as the principal criterion for determining whether there is "trading in". But it should be borne in mind that the *Smidth* company was found not to be trading in the UK. Although it had an agent in the UK to advise prospective purchasers and assist with the installation of machinery, the profits in substance arose from the sale of that machinery under contracts made abroad. ...

821. Merchanting: Place of sale

The decision in the *Smidth* case supports the conclusion that in the case of merchanting business (buying and selling goods for profit), the trade is normally exercised at the place where the contracts for sale are made – that is where the operations take place from which the profits in substance arise.

It may help, in considering why that should be the relevant place, to put the decided cases aside and to ask what sort of facts could possibly be significant in leading to an answer to the question of whether there is trading in the UK. Where merchanting is concerned – buying and selling – there will often be a central office where questions of policy are considered and finance is arranged. There is the buying of the goods and perhaps the holding of a stock of goods. Then there is the search for customers and there is the actual contract for sale. That contract may be at a price laid down in a distant Head Office or it may be for a price negotiated with some skill on the spot. Finally there is delivery involving

the question where does the lawful property in the goods pass from seller to buyer.

Few if any of the elements described above necessarily call for a presence in this country and the functions involved can be located where the trader wishes. Most countries take the same view as we do about buying. The Court in *Sulley's* case simply said "It would be most impolitic thus to tax those who come here as customers." The place of sale, as identified by the place of contract for sale, is a reasonable means of determining the location of trading; trading profit becomes measurable only when there is a sale and without a sale there can be no profit.

822. Place of sale unreliable

But the place of sale, like other elements, can be moved. Even where the trade is that of buying and selling some qualification is needed to the assertion that there is trading in the UK if the contracts for sale are made here. It is generally taken for granted that it must be so if the sales are to people who are here. But, as is apparent from ITH830–ITH834 below which look at the place of contract, just when and where a contract is concluded can depend on fine distinctions and may even be a matter of chance. If, for example, a non-resident advertises goods for sale in a newspaper here and the customer responds by a telephone call to the non-resident during which agreement is reached or there is an exchange of telexes, the contract may technically be made in the UK even though the non-resident does very little here at all. We do not know what view the Courts would take of that though they have certainly not ruled out the possibility that while there may be contracts here there may nevertheless be no trading here [See *Belfour v Mace* 13 TC 558].

There may be similar doubt when sales are to people who are not resident here. The problem can be illustrated by a simple example. A New York art dealer has a picture which a Frenchman is interested in. The American and the Frenchman happen to meet in London which both are visiting for a few days holiday. In their hotel they agree on a price for the picture and conclude the deal. The contract is made here. Is the American trading in the UK? The matter is considered further on in chapter 9 (ITH947).

One may devise improbable examples of this kind without doing more than to highlight the difficulties which absolute reliance on the place of contract as a test would involve. Other cases of difficulty are those where there is reason to believe that, although contracts are formally made abroad, everything is really done here short of signing a piece of paper. In such cases we would say that there is trading here. The problem in such a case is largely one of proof. See, for example, the comments in chapters 9 (ITH914) and 10 (ITH1017).

The Hong Kong guidance note provides:

18. In *IRC v Magna Industrial Co* [1997] HKLRD 171 at 178, Litton VP recognised that in case of a trading profit the purchase and the sale were the important factors. He further included in his deliberation all of the relevant operations and not just the purchase and sale of the products. When applying the

operations test, Litton VP said at 176G:

“In other words, one looks to see what the taxpayer has done to earn the profits and where he has done it. Obviously the question where the goods were bought and sold is important. But there are other questions: For example: How were the goods procured and stored? How were the sales solicited? How were the orders processed? How were the goods shipped? How was the financing arranged? How was payment effected?”

19. The obtaining of the buyer’s order in Hong Kong and the placing of the order with the seller from Hong Kong are the foundations of a trading transaction since the differential between the selling price and the buying price (i.e. the mark-up) generates the profit. In *Exxon Chemical International Supply SA v IRC* 3 HKTC 57, having decided that the obtaining of the order from the buyer and the placing of the order with the seller, took place respectively in and from Hong Kong, Godfrey J concluded that the profit arose in or was derived from Hong Kong.

20. In *IRC v Euro Tech (Far East) Limited* 4 HKTC 30, Barnett J doubted that there should be some particular level or threshold of activity on the part of the taxpayer in Hong Kong, such as by bringing the products into Hong Kong and re-exporting them. He observed that in many trading companies the taxpayer was doing no more than bringing together the complementary needs of sellers and buyers. He said if the bringing together was done in Hong Kong the trading profit was sourced in Hong Kong....

23. On the basis of the various court judgments discussed in paragraphs 18 to 22 above, the Department’s views which are reflected in its assessing practice on the locality of profits derived from trading in commodities or goods by a business carried on in Hong Kong can be summarised as follows:

(a) Where both the contract of purchase and contract of sale are effected in Hong Kong, the profits are fully taxable.

(b) Where both the contract of purchase and contract of sale are effected outside Hong Kong, no part of the profits are taxable.

(c) Where either the contract of purchase or contract of sale is effected in Hong Kong, the initial presumption will be that the profits are fully taxable. Matters, such as those mentioned in paragraph 18 above, will be examined to determine the issue.

(d) Where the sale is made to a Hong Kong customer (including the Hong Kong buying office of an overseas customer), the sale contract will usually be taken as having been effected in Hong Kong.

(e) Where the commodities or goods are purchased from either a Hong Kong supplier or manufacturer, the purchase contract will usually be taken as having been effected in Hong Kong.

(f) Where the effecting of the purchase and sale contracts does not require travel outside Hong Kong but is carried out in Hong Kong by telephone, fax, etc., the contracts will be considered as having been effected in Hong Kong.

(g) The purchase and sale contracts are important factors but all the relevant operations that produce the trading profits must be looked at to determine the locality of the profits. Persons who are merely trading with Hong Kong by either selling goods to customers in Hong Kong or buying goods from suppliers in Hong Kong will not fall within the ambit of this paragraph. Nor will this

paragraph applies to a buying office referred to in paragraph 29 below.

24. Having regard to the points expressed above, it will be apparent that, in the Department's view, the question of apportionment does not arise in relation to trading profits. Trading profits will be either wholly taxable or wholly non-taxable. There is no room to substitute a mixed source for a Hong Kong source even though there might be some overseas activities.

15.11.1 *Situs of assets sold*

In *IRC v HK-TVB* the Privy Council said:

profits accruing to a resident taxpayer from the sale of foreign immovable property are likely to arise in the country where that property is situated although both the contracts of purchase and sale thereof are made in the country of residence of the taxpayer: *Liquidator, Rhodesia Metals. v Commissioner of Taxes* [1940] AC 774.²⁹

The Hong Kong guidance note provides:

45. Subject to specific provisions, the Department regards the locality of the following types of profits to be as follows:

- (a) Rental income from real property. *Locality*: Location of the property.
- (b) Profits derived by an owner from the sale of real estate. *Locality*: Location of the property.
- (c) Profits from the purchase and sale of listed shares and other listed securities. *Locality*: Location of the stock exchange where the shares or securities in question are traded. Where the purchase and sale took place over-the-counter, the place where the contracts of purchase and sale are effected.
- (d) Profits from the purchase and sale of unlisted shares and other unlisted securities. *Locality*: Place where the contracts of purchase and sale are effected, except financial institutions in instances where section 15(1)(l) applies.

15.11.2 *Buying and selling through an agent*

SP 1/01 provides:

²⁹ [1992] STC 723 at p.729.

22. If a non-resident carries on a financial trade outside the UK, any transactions carried out through a UK investment manager are likely to amount to trading in the UK. That is so whether there is a discretionary agreement or whether the manager acts on the instructions of the non-resident.

Whether or not this is right does not much matter as in most cases the investment manager exemptions apply, but (even allowing for the qualification in the use of the word “likely”) it is too widely expressed. The Hong Kong guidance note provides:

25. Cases may arise where it is claimed that contracts of purchase and of sale have been effected wholly outside Hong Kong by employees of the Hong Kong business travelling abroad or by overseas agents. In this context, no operations are carried out in Hong Kong to give effect to the trading transaction; and the employee or overseas agent habitually exercises a general authority to negotiate and conclude contracts on behalf of his principal.

26. Normally the activities of an agent and an employee are accorded the same weight if it can be shown that the employee has full authority to conclude contracts without reference to the business in Hong Kong. In considering claims that contracts have been wholly effected outside Hong Kong by employees, Assessors will, in addition to facts in paragraph 18 above, require details of travelling, hotel and subsistence expenses in respect of each individual transaction. Where it is claimed that contracts are effected by overseas agents, it will be necessary to provide agency agreements or other evidence to support the claim.

15.12 Services

The former ITH continued:

826. Where work is done

Many trades are not limited to merchanting. Where services are concerned, we tend to give greater weight to the place where the service is provided.³⁰

30 The former ITH para 826 continued:

There are particular difficulties with transmission services with which the approach is to say that the service is given where the act of transmission begins, following the case of *Erichsen v Last* already quoted in ITH813.

The Hong Kong Guidance Note adopts the same approach:

20. The Department regards the locality of the following types of profits to be as follows -

(e) Service fee income. *Locality*: place where the services are performed³¹ which give rise to the fees.

This is consistent with the statutory rule for foreign tax credit relief. Section 9(1) TIOPA provides relief where foreign tax is

(b) calculated by reference to income arising ... in the territory, and

Section 9(3) TIOPA provides:

For the purposes of subsection (1), profits from, or remuneration for, personal or professional services performed in the territory are to be treated as income arising in the territory.

This raises the question of where the services are provided or performed. Where the services involve physical work, the answer is obvious. In *Brackett v Chater*³² a surveyor contracted himself to a Jersey company (owned by a Jersey trust that he had made although this was not material). He became its employee. Clients contracted with the Jersey company but the surveyor did all the work in the UK using facilities available to them at the offices of the firm in which they were previously partners. The Jersey company was held to be trading in the UK.

The Hong Kong guidance note provides:

It should be noted that in the case of an investment adviser whose organisation and operations are located only in Hong Kong, profits derived in respect of the management of the clients' funds are considered to have a Hong Kong source. Included in chargeable sums are not only management fees and performance fees but also rebates, commissions and discounts received by the adviser from brokers located in Hong Kong or elsewhere in respect of securities transactions executed on behalf of clients.

31 The ITH refers to the place where services are *provided* and the HK guidance refers to the place where services are *performed* but in the context the meaning is the same.

32 60 TC 134 & 639.

In *Yates v GCA International*³³ a UK resident company provided services (an investigation into oil fields in Venezuela). Some of the work was done in Venezuela and some in the UK. The company (being UK resident) was in principle taxable on all trading income, but subject to foreign tax credit relief for Venezuela tax on income arising in Venezuela.³⁴ The *Smidth* principles were applied and so (unsurprisingly) part of the profits were held to arise in Venezuela.

15.12.1 *Commissions*

The Hong Kong Revenue guidance provides:

RE-INVOICING CENTRE

27. The Department's view is that if a profit is derived from services rendered in Hong Kong, the profit is clearly taxable. Commission income or profit that accrues to a "re-invoicing centre" for services rendered is chargeable to profits tax. Profits derived from the buying and selling of goods are not service income. The transaction involves the taking of commercial risks (e.g. product risks, inventory risks, credit risks, exchange risks, capital risks, etc.) different from those attached to a service. Confirmation of sales and issue of purchase orders are indications that it is a trading transaction. The source of trading profits depends on the locality of the trading operations. Paragraphs 18 to 26 are relevant.

28. It is not possible to categorise the circumstances under which income or profit derived by a "re-invoicing centre" would be regarded as a service income and not as a trading profit. In each case, the Department would examine the nature of the operations and the type of risks in question to determine whether they constitute the provision of services or trading. The label "re-invoicing centre" clearly does not in itself provide the answer as it can mean different business structures.

Example 1

Company A, incorporated in Hong Kong, is a re-invoicing centre of a group of companies with a holding company incorporated in the United States, as more particularly described below. It manages in Hong Kong all foreign currency exposures from intra-company trade, guarantees the exchange rates for future orders and manages intra-affiliate cash flows, including lead and lags of payments. Manufacturing affiliates in Mainland China sell goods to Company A, which in turns resells to the distribution affiliates in North America and Europe. Company A resells at cost plus a mark-up for its services. The mark-up covers the cost of the re-invoicing centre and a reasonable return on the services

33 64 TC 37.

34 See 15.5.1 (Foreign tax credit cases).

provided. The profits accrue to Company A are service income derived from Hong Kong. The mark-up earned by Company A, which acts as a re-invoicing centre, is chargeable to profits tax.

15.13 Construction and engineering works

The former ITH para 826 continued:

Where construction and engineering works are concerned we say that the construction works are the essential operations and it is normally immaterial where the contract is signed – there is support for this in the Muller case [*WH Muller & Co (London) v Lethem* 13 TC 151].

15.14 Manufacturing

The former ITH para 826 continued:

There may be more than one part of the trade which can be identified as the profit producing part. There can be the case where there is manufacture abroad and selling here or manufacture here, and selling abroad. To look at the first situation, manufacture abroad and selling here, it is reasonably clear from the champagne cases that the Revenue only claimed to tax the selling profit and there is nothing in the judgments to suggest that it was entitled to more. The question is considered more fully in chapter 9 (ITH920). As to the second situation, manufacture on its own is certainly trading, even though there may be no sales here, and the old judgments tend to support the view that we should in such circumstances seek, on some sensible basis, to tax only the manufacturing profit. There was a Privy Council [*Commissioners of Taxation v Kirk* [1900] AC 588] case in the early part of the century, an Australian case, which supports that idea and it is what we have in fact always done.

See too *IRC v Hang Seng Bank*:

If he has ... engaged in an activity such as the manufacture of goods, the profit will have arisen or derived from the place where ... the profit making activity carried on. There may, of course, be cases where the gross profits deriving from an individual transaction will have arisen in or derived from different places. Thus, for example, goods sold outside Hong Kong may have been subject to manufacturing and finishing

processes which took place partly in Hong Kong and partly overseas. In such a case the absence of a specific provision for apportionment in the Ordinance would not obviate the necessity to apportion the gross profit on sale as having arisen partly in Hong Kong and partly outside Hong Kong.³⁵

The Hong Kong Revenue guidance note provides:

MANUFACTURING PROFITS

30. Lord Jauncey in *HK-TVBI* at 410F has commented on the source of manufacturing profits. He explained:

“If a manufacturer in Hong Kong sells his goods to a merchant in Manila the payment which he receives is no doubt sourced in Manila but his profit on the transaction arises in and is derived from his manufacturing operation in Hong Kong.”

Where goods are manufactured in Hong Kong, the profits arising from the sale of such goods will be fully taxable because the profit making activities are considered to be the manufacturing operations carried out in Hong Kong, which should include the procurement of raw materials, the employment of labour, the design of products and the use of machinery and plant, etc.. The following examples illustrate the Department’s views on this subject:

Example 2

Company B manufactures goods in Hong Kong and sells them to overseas customers. The fact that Company B has sales staff based overseas does not give a part of the profits an overseas source. This is not a case for apportionment. The whole of the profits are liable to profits tax.

Example 3

Company C manufactures in Mainland China and sells the finished goods through a retailing branch in Hong Kong. The retailing branch has sales staff and a fixed place of business, and has registered for business in Hong Kong. Company C is both a manufacturer and a retailer. Profits are derived from the manufacturing operations in Mainland China and the retailing operations in Hong Kong. It is necessary to apportion the profits derived by Company C. Profits attributable to the Hong Kong retailing branch are chargeable to profits tax.

32. In Mainland China, two types of processing trade normally involve Hong Kong companies: contract processing and import processing. They are two different forms of transaction and require an accurate legal analysis.

CONTRACT PROCESSING

33. In contract processing, the document that governs the contractual relationship among the parties is the processing agreement. It sets out the rights and responsibilities of the Hong Kong company and the Mainland processing

35 [1990] STC 733 at p.740. The *dictum* to the contrary in *IRC v HK-TVBI* [1992] STC 723 at p.730h can be disregarded.

enterprise. The Hong Kong company is responsible for the supply of raw materials and machinery without consideration and to provide technical and managerial know-how while the Mainland processing enterprise is responsible for the provision of factory premises, utilities and labour force. 34. In return for the processing service, the Hong Kong company pays a subcontracting charge to the Mainland enterprise. The legal title to the raw materials and finished goods remains with the Hong Kong company. In the Department's view, the Hong Kong company's operations in Mainland China complement its operations in Hong Kong. Recognising the operations of the Hong Kong company in the Mainland, an apportionment of profits on a 50:50 basis is usually accepted.

35. In *D132/99* 15 IRBRD 25, the taxpayer contended that all of its profits were offshore in nature. The Board of Review held that its operations in Mainland China were not dominant operations that overshadowed the activities in Hong Kong and the operations in Hong Kong could not be disregarded.

36. In *D145/99* 15 IRBRD 91, the Board found that the taxpayer was not privy to the processing agreements, which had been entered into by its fellow subsidiaries and the taxpayer should be assessed for profits tax on 100% of its profits for the years of assessment after the processing agreement lapsed. The Board found that the taxpayer's business was the procurement of toys to satisfy sale and purchase contracts and that important operations took place inside Hong Kong: the reaching of purchase agreements; the determination of price; the issue of invoices; the procurement of raw materials and the shipment of finished products.

37. If the Hong Kong company has restricted involvement in the processing arrangement with the Mainland enterprise, the apportionment of profits could not be appropriate. For example, a Hong Kong company has contracted out the assembly work to various contractors in Hong Kong and the Mainland. The jobs are numerous, small in value and of short duration and the Hong Kong company has minimal involvement in the assembly work. Given that the Hong Kong company does not carry out any manufacturing operations outside Hong Kong, its profits should be fully chargeable to profits tax without any apportionment.

38. The apportionment contemplated in paragraph 34 above will also apply to cases where manufacturing activities are undertaken under a similar arrangement in other places.

IMPORT PROCESSING

39. In import processing, the manufacturing operations are carried out by a foreign investment enterprise (FIE) related to the Hong Kong company. An FIE is often a separate legal entity incorporated in the Mainland. The Hong Kong company sells raw materials to the FIE and buys back the finished goods from the FIE. The Hong Kong company engages in the trading of raw materials and finished goods whilst the FIE manufactures the finished goods. The legal title to the raw materials and the finished goods passes to/from the FIE.

40. In import processing, the gross profits arise from trading transactions whereby the Hong Kong company purchases finished goods from an FIE and sells them for a profit. The manufacturing operations of the FIE in the Mainland are not performed on behalf of, or for the account of, the Hong Kong company even though the Hong Kong company and the Mainland enterprise might be

within the same group of companies.

41. In *ING Baring*, Lord Millet NPJ said that the source of profits had to be attributed to the operations of the taxpayer which produced them and not to the operations of other members of the group. In D36/06 21 IRBRD 694 which was a typical import processing case, the Board held that the taxpayer's profits were fully chargeable to profits tax. It was ruled that the FIE was not part of the taxpayer and was not an agent of the taxpayer. Hence the FIE's operations were not relevant in determining the source of profits of the taxpayer. The Board of Review rejected the contention of "substance over form" and disagreed with the suggestion that a leasing agreement of production facilities was similar to a contract processing agreement.

42. The Department holds the view that profits which accrued to the Hong Kong company from "trading transactions" carried out in Hong Kong cannot be attributed to the manufacturing operations of the FIE carrying on business in Mainland China. The source of the trading profits must be attributed to the operations of the Hong Kong company which produced them. In *Consco Trading v IRC* [2004] 2 HKLRD 818, To Deputy J said that it was correct to consider factors such as the finance arrangements, the payment of raw materials and processing fees, the arrangement for receipt of payment from purchasers for the finished product and pre-contract negotiations and the Board was entitled to conclude that, on the evidence, the preponderance of the activities which earned the profits were performed in Hong Kong. The Court of First Instance said the Board correctly excluded the processing activity of the Mainland Chinese entity as not being relevant to the determining of the taxpayer's source of profits which were derived through the sale of processed goods.

43. In *IRC v Datatronic Limited* [2009] 4 HKLRD 675, where the arrangement between Datatronic and the FIE was an import processing arrangement, the Court of Appeal held that the profit-producing transactions were the purchase of goods from the FIE by Datatronic and subsequent sale and that these activities took place in Hong Kong. Thus, the profits were derived from Hong Kong. The Court of Appeal further held that the fact that the FIE, although a wholly-owned subsidiary of Datatronic, is a separate legal entity and that its dealings with Datatronic were not at arm's length would not detract from the reality of the legal effect of the transactions. It is also worth to note the Court of Appeal's concurrence with the Board's findings that the manufacturing was done by the FIE in the Mainland is substance and not form and that Datatronic's activities (i.e. assisting the FIE in preparing the goods and supplying them to Datatronic) in the Mainland were merely antecedent or incidental to the profit-generating activities.

44. The Department has noticed that a Hong Kong company is sometimes interposed between an overseas company and a Mainland manufacturing enterprise in order to comply with or circumvent the trade barriers imposed by the overseas jurisdiction. In D7/08 23 IRBRD 102, the Board of Review recognised that making the Hong Kong company a customer of the overseas company and of the Mainland enterprise freed the overseas company from the trade barriers. Applying what the Court of Final Appeal held in the Kim Eng case on the effective cause of the production of the profits in question, it was

held that the Hong Kong company's relevant activity in Hong Kong however limited was what was done to earn the profits in question and the Hong Kong company did it in Hong Kong.

15.15 Use of UK commodity markets

The former ITH provided:

929. Is use of the markets "trading in"?

It is a good thing for this country that these markets exist. There are all sorts of spin-off advantages. Big business has to be financed and insured and there are shipping services and all sorts of peripheral activities which are good both for the people who are involved in them and for the country's balance of payments. Looking at the physical markets the produce concerned may or may not come to this country. A Brazilian plantation owner may sell his cocoa in London although the buyer may be in France. A broker here will sell to another broker acting on behalf of the buyer and the contract will be made here. So the question arises – is the Brazilian producer trading in London and until the end of the last century it never occurred to anybody that this might be so.

Then came clarification by the Courts on the meaning of trading in the UK and the possibility that the fact of a contract being made by an agent in London could involve the principal in UK tax. It appeared open to the Revenue to contend that the principal was carrying on the selling part of his trade in London or even carrying on the whole trade in London. The Revenue had contended neither of those things; to have done so would have frightened off the foreign users of our markets. In any event, in those early days, the non-resident principal could have arranged that his London brokers did not receive the profits or gains.

But in 1915 everything changed because it was then provided that the receipt of the profits or gains would no longer count and the business world was worried. The Revenue said that it had always regarded business done on our markets through brokers as trading with the UK rather than trading in the UK. But the business world was not satisfied. The difficulty was clear enough. If, as some of the early cases might suggest, the bare making of a contract here is such a vital matter, there is a risk that anybody using our markets might be held to be trading here. The Revenue's former view that in normal circumstances that constituted trading with rather than in the UK is not easily defensible.

930. Pt VIII TMA 1970: Trading in: Can there be any profit?

But accepting that a primary producer, a Brazilian plantation owner selling cocoa in London, is trading in the UK, where is the profit? Such commodities have a world market price at any time; it is an essential function of the market to decide exactly what that price is. If it is decided that the Brazilian producer is trading in the UK he must be charged either as a seller of cocoa or as a cocoa grower. If he is not charged as a grower and, to put it no higher it would be stretching things rather to do so, it is hard to see how any profit can be said to arise in London as a seller of cocoa. The position is entirely different from that of the French champagne grower of the type referred to in ITH815 of chapter 8, who

may at least be regarded as making a merchanting profit here. In that situation one would look at the market value of the champagne in bulk and then at the price (wholesale or retail) actually realised in this country. But where commodities like bulk tin or rubber or cocoa are concerned, the position is otherwise. These things are traded in our markets precisely to determine what their market value is and to dispose of them at that price.

931. Dealer

In some cases the primary producer may not sell directly in London but sell to an intermediary in the producing country who in turn sells on the London market. The trade here is then clearly that of selling and if the intermediary does not purchase at world prices – there may, for example, be a reserve price – it may be possible to identify a profit or a loss. But if the intermediary sells through a broker within the exemption described in the following paragraphs then the exemption runs just the same. But it sometimes happens that, although the contracts are made through a broker, the seller has a presence here – a branch or an agent – which plays some part in the selling process. It may, for example, instruct the brokers. The question then is whether what is done is sufficient to enable us to say that the non-resident is trading also through that branch or agent. The terminal markets may be used by a non-resident dealer in commodities simply to hedge purchases or sales of raw materials which take place outside the UK. The hedging transactions may amount to trading here but, again, the broker exemption may apply unless the non-resident has a presence here, other than the broker, which is involved with the hedging transactions. If the exemption does not apply, there is then the question of the extent, if any, to which the results of the related transactions outside the UK should be taken into account in measuring the taxable profits. This is an area of difficulty and International Division should be consulted in such a case.

In practice the point is not important because the broker exemption applies.³⁶

15.16 Leasing and licensing tangible property

The position for property income from land is governed by statute and trading case law is irrelevant for UK tax.³⁷

What about leasing³⁸ chattels (eg pictures)? It is helpful to consider trading and non-trading cases separately.

36 See 41.1 (Investment Manager exemptions).

37 See 16.1 (Property income).

38 References to leasing in this paragraph include licensing: there is no material distinction for our purposes.

15.16.1 *Leasing chattels without trading*

If there is a simple lease (without a trade) the source of the income is the chattel (not the contract) and one would expect the source to be where the chattel is situate.

In *IRC v Hang Seng Bank*, the Privy Council said:

If the profit was earned by the exploitation of property assets as by letting property ... the profit will have arisen in or derived from the place where the property was let ...³⁹

But this was tactfully “explained” in *IRC v HK-TVB*:

When Lord Bridge used the words “place where the property was let” he must have been referring to the place where the property was situated and not to the place or places where the lease happened to have been signed.⁴⁰

Although the comment was made in the context of immoveable property, it is considered that the same applies to chattels.

It is true that the chattel may be moved, but most chattels do not move often. If a picture was moved permanently, it is unclear whether the source changes. It is tentatively suggested that the source changes.

If the chattel were a mobile asset (a plane or yacht) then it is suggested that one should not adopt the rule that the source is where the asset is situated. It is rational to have a separate rule for ships and aircraft. The IHT/CGT situs rules are also different for such assets.

15.16.2 *Leasing as part of trade*

If the leasing is a trade, then the income is trading income and the source is the trade not the assets of the trade. The question whether the trade is partly carried on inside the UK can be addressed looking at wider factors than just where the asset is situate. But in practice it is suggested that the situs of the assets will often be determinative (unless the trade involves

39 [1990] STC 733 at p.740b.

40 [1992] STC 723 at p.729e.

assets situate in more than one country).⁴¹

15.16.3 *When is chattel leasing a trade?*

Business Leasing Manual provides:

315. Whether lessor trading [March 2008]

In general, where chattels are leased, you should accept that the leasing is by way of trade.

In exceptional cases, however, where the evidence of trading is extremely slight, for example if only one asset has been acquired for leasing and there is no personal involvement by the taxpayer or any semblance of a trading organisation, the taxpayer's activities may be special leasing within Section 19 CAA 2001.

You should not seek to deny trading treatment where, although there is no personal involvement by the taxpayer, there is trading activity by a manager as agent for the taxpayer.

The same principle applies to special purpose vehicle lessor companies set up by groups that carry out leasing activities. In such cases it is not unusual for the company to own only one (or a few) assets and be managed by a group member.⁴²

This is an oversimplification. For instance, when the chattel is acquired by way of gift (not purchase), and when the taxpayer is an individual or trust rather than a commercial company, then trading is much less likely.

A conclusion of trading will usually suit a non-corporate taxpayer and so not be challenged. A conclusion of trading would be a concern to a corporate taxpayer only if it were carrying on that trade in the UK through a permanent establishment, which would move it from income tax to the more onerous corporation tax regime.

15.17 Research division and shop windows

The former ITH provided:

827. Profit producing activities

Early in this chapter (ITH811) an illustration was given of the

⁴¹ See 15.11.1 (Situs of assets sold).

⁴² Very similar wording is found in BI Manual 61190.

hypothetical maker of refrigerators making them in various places in the world and selling them in those places. One way of describing the split of that trade is as a vertical split with a vertical slice here and other similar vertical slices in other countries. We would wish to tax only the vertical slice of the trade carried on here. The other way in which a trade may be split may be thought of as horizontal, the sort of situation we have just discussed, one horizontal slice of the trade, manufacturing say, being here and another slice, the selling, abroad.

The horizontal/vertical terminology seems strange. The metaphor is also used in competition law but the other way round.⁴³ The former ITH continued:

The above cases are straightforward enough but difficulty starts to emerge when what is done here is not clearly identifiable as part of the whole trade in that way. An example is the non-resident stock-broker with a branch in London which merely puts the goods in the shop window.

“Shop window” is another unhelpful metaphor. What does it mean? The former ITH explained:

There may be a research section here with computers and the other paraphernalia of a modern trade of that sort. The branch gives advice to would be customers and when they decide to buy a particular American stock, it tells its head office in New York and there the actual deal is done. If the London branch really is only a shop window and really does take no part in the contracting process then the conclusion is that that is not trading within the UK; there is only one trade which is providing the service of buying or selling stocks and that is done in New York. It is quite possible for a non-resident trader to have an office here employing a substantial number of people and yet not to be exercising the trade here.

Another example might be the manufacturer on a very large scale in America, which has a research division in this country. The work of the research division may be absolutely vital to the trade but if that trade consisted for example in the making and sale of television sets, one could not say that research on, let us say, conductivity constituted a distinct profit producing part of that trade. That is

43 “Vertical agreements” are those made between two or more undertakings each of which operates at a different level of the production or distribution chain. Horizontal agreements are those made between undertakings operating at the same level of the production or distribution chain, covering for example research and development, production, purchasing or commercialisation. See Regulation (EC) no. 2790/1999.

reasonably clear.

This is right because it is difficult to allocate the profits, so they should be regarded as merely auxiliary.⁴⁴

More difficult is the position of non-resident banks or insurance companies which use the UK for their investment activities but do not carry on the business of banking or insurance here. The questions in this whole area of “trading in” are mainly those of fact and degree and absolute guidelines are simply not possible. International Division will be glad to help in cases of doubt.

15.18 Where is contract made?

If or to the extent that the place where is the contract made is an important factor, that place has to be identified. The place where a contract is made is, fundamentally, a question of contract law. But the identity of the place where the contract is made is not relevant for the purposes of contract law, so there are no contract law cases discussing the issue. In the reported tax cases the place where the contract was made was fairly obvious, and so the cases do not help us here. We are thrown back to first principles.

Going back to first principles, a contract in English law⁴⁵ is made by acceptance of an offer. The contract takes effect on acceptance and the place where the contract is made is where the acceptance takes place. As a general rule, acceptance takes place when the acceptance is received by the person who makes the offer. There are, however, exceptions to this:

- (1) Acceptance by post—acceptance takes place when and where the letter of acceptance is posted, not where received (unless the offer otherwise provides).
- (2) When an offer is made, one can specify in the terms of the offer how and when it can be accepted, and this can therefore alter the place where the contract is made.

Offer and acceptance can be difficult to identify. The court will try to impose an offer and acceptance analysis on circumstances which may not lend themselves to that analysis.⁴⁶

44 See 15.9 (Trading in UK: preparatory and auxiliary activities).

45 Further consideration is needed if the applicable law is not English law.

46 Some academic writers have suggested abandoning the “offer and acceptance” analysis and replacing it by a contract theory based on reliance. (There is more than a hint of this in Lord Denning’s judgment in *Gibson v Manchester City Council*. This

There is no case law on email acceptance.⁴⁷ The person making the offer can decide how that offer is accepted so if the documentation is correctly drafted a contract can be made abroad by the click of a mouse outside the UK.

The former ITH discussed this issue:

The making of a contract

830. General

There have been many references in this chapter to the making of a contract and to the place where a contract is made. If two people agree specifically on a sale by word of mouth that is the making of a contract and the place of their agreement is the place where the contract is made. A great deal of business is done in that way daily and the place of contract is not changed by the signing of a piece of paper in a tax haven sometime afterwards. The difficulty is one of proof as we have already seen in ITH822. But putting difficulties of that sort on one side, if the question where a contract is made becomes of central importance it is one on which we should rely on legal advice – it is pre-eminently a question for the Solicitor and what follows is very general guidance.

831. Acceptance of offer

Offer and acceptance constitute contract. The place of contract is governed by the place of acceptance of the offer and acceptance takes place where it is received. Where acceptance is communicated by letter it is regarded as received at the place of posting rather than at the place of actual receipt. This is because, once a letter has been posted, the Post Office holds it on behalf of the addressee. Where telephone communication is used the place of acceptance is the place where the recipient of the acceptance is. That is the general rule for so-called instantaneous communication. It would apply also to an acceptance sent by telex or fax directly from the acceptor's office to the offeror's office. The general rule may need qualifying when a cable company's services are used. A telegram like a letter is regarded as received when put into the hands of the Post Office.

832. Price lists

The mere sending out of price lists and advertisements does not constitute an offer, it is rather an open invitation for offers to be made. An offer must be quite specific and a price list is not an offer to supply an unlimited amount of goods at the price named. It follows that when a customer buys goods from a supplier the customer makes the offer and the supplier notifies acceptance. That is

decision was reversed by the House of Lords but even Lord Diplock accepted that there would be times when offer and acceptance would be difficult to identify and the "normal analysis of a contract as being constituted by offer and acceptance" might not be appropriate. However that would be exceptional. See [1979] 1 WLR 294 at p.297).

⁴⁷ The Law Commission paper (Electronic Commerce: Formal requirements in commercial transactions, December 2001) does not deal with the issue of where a contract made by email is made.

generally the assumption in cases where place of contract has been decisive in determining a non-resident's liability. But it is not impossible for a price list to amount to an offer, as long as the list details the price, the quantity and gives a definite description of the goods concerned. If in such circumstances the buyer were to put in some amendment not contained in the original offer, then what the buyer does becomes a fresh offer and one which has to be unconditionally accepted before there can be said to be a binding contract. And there may be a series of communications between customer and supplier so that it is a matter of chance as to who makes and who accepts the final offer.

833. Delivery

It is quite common to find that there is no formal acceptance of the offer by the person supplying the goods and, in that situation, delivery itself will normally constitute acceptance; and then it would be important to look at the place of delivery, the place where the lawful property in the goods passes from seller to buyer.

834. Acceptance by agent

There can be widely different circumstances in which contracts are made here. There is the case where the agent or branch in this country really does the job of negotiating the contract. That person settles the deal and terms and makes the contract here and there is no doubt whatever about it. On the other hand, there can be the case where the agent makes the contract in the legal sense, but does so only with the specific authority of the principal. That is to say the agent gets an offer, writes to or rings the principal, obtains approval and then, and only then, accepts the offer. In that case, acceptance would be here and there are at least two cases [For example, *Wilcock v Pinto & Co* 9 TC 111] on that point.⁴⁸

15.19 Trade partly in UK: apportionment

I turn to the question of how to apportion where part of the trade is in the UK. Of course this overlaps with the question of whether there is a trade partly in the UK. If there are activities in the UK which do not involve trading in the UK there is nothing to apportion.

Tax Bulletin 18 provides:

It is perhaps less obvious how the profits from the part of the trade carried on in the UK should be measured. They are required to be measured on the arm's length principle set out in the [OECD model tax convention] where a DTA applies which includes the relevant provisions. It is considered that it also follows from the main rule in Schedule D that the same principle applies even if there is no treaty. There is support for this principle in the early tax cases on non-residents

48 There is also a brief comment (not worth setting out here) in NI Manual 29013.

trading in the UK. For example, in *Pommery & Greno v Apthorpe* at 2 TC 189, Denman J said, with regard to the profits chargeable in the UK from merchanting champagne produced in France, that:

It may be that there may be some difficulty in some respects as to the manner of calculating the amount of expenditure to be put against the profits, whether it would be a proper course to look at the goods sent over to England and then to consider what profit they make, putting a fair valuation on them as they arrive, and as the money is transmitted, or whether it would be necessary in such a case to look more minutely into the profits and losses upon the whole trade carried on partly in France and partly in England. I do not think it is necessary at all at this stage of the case to decide that. That is a matter of quantum, a matter for the consideration of persons skilled in dealing with such matters as assessing profits of trade.

This can be seen as an early description of the arm's length principle and as a recognition of the need to develop methods to apply that principle in practice. Such methods were developed in the OECD 1979 Report on "Transfer Pricing and Multinational Enterprises" and have been reaffirmed and clarified in the recently published 1995 revision of that report by OECD "Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations".⁴⁹

The former ITH also touched on this issue:

814. Measure of profit in *Erichsen v Last*⁵⁰

The second point the case deals with is – what is the chargeable profit? That is a rather special point where the transmission of messages is concerned. What the company claimed was that a great deal of the profit arose from the transmission over cables which were not here at all. The Master of the Rolls gave a simple parallel example of a foreign company running a steam packet between Dover and Calais. He said that as far as carrying passengers from Dover to Calais was concerned that was trading in Dover. There was no need to look at the three mile limit or anything of that sort. One simply had to take the receipts and deduct the

49 [Author's Note] For a more up-to-date discussion, see Russo, ed, "The Attribution of Profit to Permanent Establishments" 2005 and OECD Report on the Attribution of Profits to Permanent Establishments (July 2008) accessible www.oecd.org/dataoecd/20/36/41031455.pdf.

50 [Author's Note] For facts of *Erichsen v Last* 4 TC 422 see 15.6 (Place where contract made).

expenses. The journey started here and the service was here. That is an idea limited in its application to trades involving the transmission of passengers, goods and information.

15.20 DT relief for trading income

15.20.1 *Treaty relief for trading income*

Article 7 OECD model treaty provides:

1. The profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business⁵¹ in the other Contracting State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.

A full discussion of this topic requires several volumes, and (apart from a chapter on the definition of PE) that is not attempted here. See Kobetsky, *International Taxation of Permanent Establishments* (2011).

15.20.2 *Enterprise*

“Enterprise of a Contracting State” is defined in article 1:

1. For the purposes of this Convention, unless the context otherwise requires...
 - c) the term “enterprise” applies to the carrying on of any business;
 - d) the terms “enterprise of a Contracting State” and “enterprise of the other Contracting State” mean respectively an enterprise carried on by a resident of a Contracting State and an enterprise carried on by a resident of the other Contracting State;

The OECD commentary provides:

4. The question whether an activity is performed within an enterprise or is deemed to constitute in itself an enterprise has always been

51 OECD model article 3(1)(h) provides: “the term “business” includes the performance of professional services and of other activities of an independent character.”

interpreted according to the provisions of the domestic laws of the Contracting States. No exhaustive definition of the term “enterprise” has therefore been attempted in this Article. However, it is provided that the term “enterprise” applies to the carrying on of any business. Since the term “business” is expressly defined to include the performance of professional services and of other activities of an independent character, this clarifies that the performance of professional services or other activities of an independent character must be considered to constitute an enterprise, regardless of the meaning of that term under domestic law.

The term “enterprise” is used in two ways:

- (1) to refer to the business activity,
- (2) to refer to the person who carries on that activity.

Usage (2) seems erroneous, but it does not matter as the meaning is clear enough.

15.20.3 *Treaty override for trading income*

Section 130 TIOPA provides:

- (1) Subsection (4) applies if double taxation arrangements make the provision, however expressed, mentioned in subsection (2).
- (2) The provision is that the profits of an enterprise within subsection (3) are not to be subject to UK tax except so far as they are attributable to a permanent establishment of the enterprise in the UK.
- (3) An enterprise is within this subsection if the enterprise—
 - (a) is resident outside the UK, or
 - (b) carries on a trade, or profession or business, the control or management of which is situated outside the UK.

The reference to “enterprise” here means the person who carries on the enterprise, which seems an erroneous usage, but it is one which is found in the OECD model and the meaning is clear enough.

Assuming we have such an enterprise we move on to s.130(4) which disallows treaty relief:

The provision does not prevent income of a person resident in the UK being chargeable to income tax or corporation tax.

Treaty relief is only allowed for a person resident outside the UK. Section 130(6) TIOPA defines residence:

A person is resident in the UK for the purposes of this section if the person is resident in⁵² the UK for the purposes of the double taxation arrangements.

Section 130 is headed: *Interpreting provision about UK taxation of profits of foreign enterprises*. This rule is however not interpretation or even misinterpretation: it is a treaty override. This section simply disapplies treaty relief for business profits. Breach of treaty agreements has ceased to concern HMRC when on the tax avoidance warpath.

Section 130 applies where an enterprise is carried on by a trust or company which is a resident in a treaty state with a standard business income article; and a UK resident is taxable on the income as life tenant of the trust, or under s.624, or under s.720. The UK resident person does not qualify for DT relief.

For completeness: s.130(5) TIOPA provides an exception:

Subsection (4)—

(a) does not apply in relation to income of a person resident in the UK if section 858 of ITTOIA 2005 (UK resident partner is taxable on share of firm's income despite any double taxation arrangements) applies to the income, and

(b) does not apply in relation to income of a company resident in the UK if section 1266(2) of CTA 2009 (UK resident company that is partner in a firm is taxable on share of firm's income despite any double taxation arrangements) applies to the income.

Section 130 is not needed here as s.858 ITTOIA does the same job; see 38.9 (DTA relief for partnership).

52 The wording in the definition of treaty-residence is: "a resident *of* the UK", but the preposition does not matter; see 5.1 (Three concepts of residence).

CHAPTER SIXTEEN

PROPERTY INCOME

16.1 Property income – Introduction

ITTOIA uses the term “**property income**” to mean income from land.¹ The taxation of property income is governed by Part 3 ITTOIA. A full discussion requires a book to itself. This chapter focuses on matters closest to the themes of this book.

I do not consider the position of UK resident companies (subject to CT rather than to IT).

I do not consider deduction of tax at source, the Taxation of Income from Land (Non-residents) Regulations 1995 (on which HMRC have written 88 pages of guidance notes) though I hope to cover this in a future edition.

1 A note on terminology. The commentary to TLR Exposure Draft No. 13 provides: “*Finding a suitable name*

223. Letting income has long been referred to as ‘Schedule A income’ by tax professionals. But that is not an informative label for the non-specialist and we are removing references to the Schedules.

224. We considered several possible new names for this type of income including ‘land income’, ‘letting income’, ‘rental income’, ‘property business income’ and ‘property income’. We concluded that ‘property income’ offered the best compromise because:

- it matches the names that are proposed for the other types of income: ‘trading income’, ‘employment income’ and ‘savings and investment income’;
- for most people, it is likely to appear the most appropriate name; and
- it links directly with what we think is the most appropriate name for the business activity (‘property business’): ‘land business’ and ‘rental business’ might be particularly misleading.

225. The disadvantage is that it might appear to go wider than income just from land; that is, strictly, ‘property’ means more than just land and buildings. But we do not think that most people will find this confusing as the proposed use corresponds broadly to the popular use.”

16.1.1 *Cross references*

See 54.2 (Foreign tax credit relief: property income).

16.2 **Property income terminology**

16.2.1 *“UK property business”*

Section 264 ITTOIA provides:

A person’s UK property business consists of—

- (a) every business which the person carries on for generating income from land² in the UK, and
- (b) every transaction which the person enters into for that purpose³ otherwise than in the course of such a business.

At first sight para (b) is puzzling. ITTOIA EN explains:

1049. ... the concept of the “property business” is, to a certain extent, an artificial one. Unlike the term “trade” it may not always correspond to an activity organised in a way that the proprietor would necessarily describe as a business. As such, the term has to cover:

- “real” businesses where the lettings are organised in a professional way;
- lettings which are not so organised; and
- casual and one-off transactions which may have very little of the qualities normally associated with a business.

Then all of these lettings of different types must be treated as part of the same, single business.

16.2.2 *“Overseas property business”*

Section 265 ITTOIA provides:

A person’s overseas property business consists of—

- (a) every business which the person carries on for generating

2 The expression “generating income from land in the UK” is defined in ss.266, 267 ITTOIA.

3 ie for the purpose of generating income from land.

- income from land outside the UK, and
- (b) every transaction which the person enters into for that purpose otherwise than in the course of such a business.

ITTOIA EN explains:

1056. The definition is identical to that of “UK property business” except that the land from which the income arises is outside the UK. That is the only difference between a UK and an overseas property business: income from land outside the UK can arise only in an overseas property business; income from land in the UK can arise only in a UK property business.

1057. For the purpose of deciding whether there is an overseas property business, overseas land law is interpreted in accordance with section 363.

See 16.4 (Losses of overseas property business) for a refinement to this definition.

16.2.3 “Property business”

Section 263(6) provides a commonsense definition:

In this Act “property business” means a UK property business or an overseas property business.

16.3 Taxation of income from property business

The charging provisions are in Chapter 3 Part 3 ITTOIA. Sections 268–270 provide:

268 Charge to tax on profits of a property business

Income tax is charged on the profits of a property business.

269 Territorial scope of charge to tax

(1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a non-UK resident.

(2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.

270 Income charged

(1) Tax is charged under this Chapter on the full amount of the profits

arising in the tax year.

(2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Section 270(2) ITTOIA feeds into s.832 which incorporates the remittance basis rules.

16.4 Losses of overseas property business

16.4.1 Losses from 2008/09

Chapter 4 Part 4 ITA provides loss relief for a property business. There are three classes of loss relief:

- (1) Carry forward against subsequent property business profits: ss.118–119 ITA.
- (2) (a) Capital allowance losses and
(b) agricultural estate losses.
Sections 120–124 ITA.
- (3) Post-cessation property relief: ss.125–126 ITA.

In this chapter I consider only the first of these reliefs. Section 118 ITA provides:

Carry forward against subsequent property business profits

- (1) Relief is given to a person under this section if the person—
 - (a) carries on a UK property business or overseas property business (alone or in partnership) in a tax year, and
 - (b) makes a loss in the business in the tax year.
- (2) The relief is given by deducting the loss in calculating the person's net income for subsequent tax years (see Step 2 of the calculation in section 23).
- (3) But a deduction for that purpose is to be made only from profits of the business.⁴

4 For completeness, the ITA continues:

“(4) In calculating a person's net income for a tax year, deductions under this section from the profits of a business are to be made before deductions of any other reliefs from those profits.

(5) No relief is to be given under this section so far as relief for the loss is given under section 120.

(6) This section needs to be read with section 119 (how relief works).

119 How relief works

This section explains how the deductions are to be made.

The Property Income Manual correctly summarises:

4705 CT [February 2006]

Losses

As part of the changes made by FA 1995, the taxable profits and losses of overseas let property were ring fenced for IT purposes. The effect was that:

- losses of an overseas property business cannot, for IT purposes, be set against profits of a UK property business carried on by the same individual,
- similarly, losses of UK property business cannot for IT purposes be set against profits of an overseas property business carried on by the same individual.

The definitions of UK property business and overseas property business in ITTOIA were only ITTOIA-wide definitions (they do not apply for all the income tax Acts) so the drafter of the ITA had to repeat them. Section 989 ITA extends them to the income tax acts:

The following definitions apply for the purposes of the Income Tax Acts—
“overseas property business” has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005,

“UK property business” has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005

At this point we need to consider s.263(4)(5) ITTOIA which restricts the meaning of “overseas property business”:

(4) References in this Act to an overseas property business are to an overseas property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, section 269).

(5) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of an overseas property business if the profits

The amount of the loss to be deducted at any step is limited in accordance with section 25(4) and (5).

Step 1 Deduct the loss from the profits of the business for the next tax year.

Step 2 Deduct from the profits of the business for the following tax year the amount of the loss not previously deducted.

Step 3 Continue to apply Step 2 in relation to the profits of the business for subsequent tax years until all the loss is deducted.”

concerned would not be chargeable to tax under Chapter 3.

I refer to this provision as “**the non-chargeable overseas property business rule**”. This rule applies for the purposes of “this Act” (ITTOIA). However it is suggested that this applies for the purposes of loss relief in the ITA, s.989 ITA incorporates the s.263 rule, because it incorporates the definition of Chapter 2 Part 3 ITTOIA, and s.263 is in Chapter 2.

Suppose T carries on an overseas property business and:

- (1) Year 1: T is non-resident and realises losses;
- (2) Year 2: T is UK resident and realises profits.

The losses of Year 1 are disallowed since the profits of that year are not chargeable under Chapter 3 (or at all) so there is no overseas property business. In short, losses of non-residents are not relievable. *Quaere* whether this would apply if T were resident in an EU member state.

What about an overseas property business carried on by a remittance basis taxpayer? An overseas property business which is taxed under the remittance basis is (from 2008/09) taxed under Chapter 3 (even though the amount of income taxed is determined by s.832 ITTOIA which is not in chapter 3.) So the non-chargeable overseas property business rule does not disallow loss relief. Presumably this change was intentional as it was not desired to introduce an equivalent of the incomprehensible CGT loss rules into this context.⁵

16.4.2 *Losses before 2008/09*

The position was different before 2008/09. This is still relevant in relation to the question of whether pre-2008 losses can be carried forward and set against post 2008 profits. The relevant legislation in ITTOIA provided:

268 Charge to tax on profits of a property business

Income tax is charged on the profits of a property business.

269 Territorial scope of charge to tax

- (1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a non-UK resident.
- (2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.

⁵ See 51.9 (Loss accruing to remittance basis taxpayer).

(3) But, in the case of an overseas property business carried on by a UK resident to whom the remittance basis applies, the only profits of the business chargeable to tax under this Chapter are those in respect of land in the Republic of Ireland.

(4) For a UK resident to whom the remittance basis applies, see also Chapter 11 (charge to tax on overseas property income other than income arising in Republic of Ireland).

(Words in italics repealed by the FA 2008.) Thus for a remittance basis taxpayer, and ignoring the special case of land in Ireland,⁶ the charge was not under Chapter 3. Instead it was in Chapter 11 (also repealed in the FA 2008). This provided:

357 Charge to tax on overseas property income

Income tax is charged on the overseas property income of a person to whom the remittance basis applies.

358 Meaning of “overseas property income”

In this Chapter “overseas property income”, in relation to a person to whom the remittance basis applies, means amounts which

(a) are not brought into account in calculating the profits of any overseas property business of the person, but

(b) would be if section 269(3) (charge to tax on profits of an overseas property business of a person to whom the remittance basis applies only in respect of land in the Republic of Ireland) were omitted.

359 Income charged

Tax is charged under this Chapter on the amount specified by section 832 (relevant foreign income charged on the remittance basis).

So before 2008, the remittance basis taxpayer did not have an “overseas property business” so there could not be loss relief. In the 2007/08 edition of this book I commented:

This is consistent with the CGT treatment of losses. It may be desirable for a foreign domiciliary not to claim remittance basis treatment in the year that a loss accrues in order to obtain that loss relief. Though the cost of that claim must be set against the benefit of the remittance basis in that year. Suppose the loss is allowable in the year it accrues but in a subsequent year the owner claims remittance basis treatment. The loss is not allowable in

⁶ I do not discuss Irish property income here, but note that the pre-2008 legislation was in breach of EU law; see 9.20 (RFI from Ireland).

that year. However, it is suggested that the loss can be carried forward and set against profits of other years if the arising basis applies to those years.

It is suggested that a loss which did not qualify for relief in the year that it accrued cannot be carried forward to 2008/09 or subsequently. HMRC may well agree. The Property Income Manual provides:

4702. IT cases up to 2004-05 [April 2007]

No loss can ever arise on income taxed on the remittance basis.

Offshore property business losses from before 1998/99 are allowable under ESC B25, but it seems unlikely that any such losses will still be available to be carried forward to the present time.

16.5 Border between trading income and property income

A receipt may in some cases be both a trading receipt and a receipt of a property business. Sections 4 and 261 ITTOIA deal with the overlap.

Section 4(1) ITTOIA provides:

Any receipt or other credit item, so far as it falls within—

- (a) Chapter 2 of this Part (receipts of trade, profession or vocation),
and
- (b) Chapter 3 of Part 3 so far as it relates to a UK property business,
is dealt with under Part 3.

Section 261 ITTOIA provides:

Any receipt or other credit item, so far as it falls within—

- (a) [i] Chapter 3 of this Part so far as it relates to an overseas property business or
[ii] Chapter 8 or 9 of this Part (rent receivable in connection with a UK section 12(4) concern or for UK electric-line wayleaves),
and
- (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation),
is dealt with under Part 2.

ITTOIA EN explains:

1058. The priority rules in the trading income Part of this Act (section 4) make it clear that a charge under Part 3 of this Act as UK property income has priority over a charge under Part 2 as trading income. This reflects the rule in Schedule D Case I (section 18(3) of ICTA). The sort of receipt to which this rule might apply is rent received by a property developer from the temporary letting of land awaiting development. The rent is taxed as property income, even if it could properly be regarded as a trade receipt.

1059. In the case of a foreign trade and foreign property, the rule in section 65A(1)(b) of ICTA is the reverse of that in section 18(3) of ICTA. An overseas property business does not include “income to which section 65(3) of ICTA applies (income immediately derived from carrying on a trade ..)”. So the priority rule in section 261 preserves this position.

Perhaps the reason for this apparent anomaly is to maximise income classified as UK source. Under these rules, if UK property income is a receipt of a foreign trade, it is classified as UK property income (and so taxable even in circumstances where foreign trading income may not be); whereas if foreign property income is part of a UK trade it is treated as UK trading income (and similarly taxable).

16.6 Double Taxation Relief

Article 6(1) OECD Model Convention provides:

Income derived by a resident of a Contracting State from immovable property (including income from agriculture or forestry) situated in the other Contracting State may be taxed in that other State.

The significance of this is that income from immovable property within article 6 does not fall within the other income article (under which it would be taxed only in the state of residence). Instead, it is taxed in the source state with credit given in the state of residence.

The OECD Model Commentary provides:

1. Paragraph 1 gives the right to tax income from immovable property to the State of source, that is, the State in which the property producing such income is situated. This is due to the fact that there is always a very close economic connection between the source of this income and the State of source. ... Article 6 deals only with income which a resident of

a Contracting State derives from immovable property situated in the other Contracting State. It does not, therefore, apply to income from immovable property situated in the Contracting State of which the recipient is a resident within the meaning of Article 4 or situated in a third State; the provisions of paragraph 1 of Article 21 shall apply to such income.

The definition of immovable property is therefore important. Article 6(2) OECD Model Convention provides:

The term “immovable property” shall have the meaning which it has under the law of the Contracting State in which the property in question is situated. The term shall in any case include

- [1] property accessory to immovable property,
 - [2] livestock and equipment used in agriculture and forestry,
 - [3] rights to which the provisions of general law respecting landed property apply,
 - [4] usufruct of immovable property and
 - [5] rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources;
- ships, boats and aircraft shall not be regarded as immovable property.

The OECD Model Commentary provides:

2. Defining the concept of immovable property by reference to the law of the State in which the property is situated, as is provided in paragraph 2, will help to avoid difficulties of interpretation over the question whether an asset or a right is to be regarded as immovable property or not. The paragraph, however, specifically mentions the assets and rights which must always be regarded as immovable property. In fact such assets and rights are already treated as immovable property according to the laws or the taxation rules of most OECD member countries. ... No special provision has been included as regards income from indebtedness secured by immovable property, as this question is settled by Article 11.

Article 6(3) elucidates “derived from” immovable property:

- 3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property.

The OECD Model Commentary provides:

3. Paragraph 3 indicates that the general rule applies irrespective of the form of exploitation of the immovable property....

The OECD Model Commentary comments on the border between property income and distribution income:

3. ... Income in the form of distributions from Real Estate Investment Trusts (REITs), however, raises particular issues which are discussed in paragraphs 67.1 to 67.7 of the Commentary on Article 10.

Article 6(4) deals with the border between business income and property income:

4. The provisions of paragraphs 1 and 3 shall also apply to the income from immovable property of an enterprise.

The OECD Model Commentary provides:

3. ... Paragraph 4 makes it clear that the provisions of paragraphs 1 and 3 apply also to income from immovable property of industrial, commercial and other enterprises. ...
4. It should be noted in this connection that the right to tax of the State of source has priority over the right to tax of the other State and applies also where, in the case of an enterprise, income is only indirectly derived from immovable property. This does not prevent income from immovable property, when derived through a permanent establishment, from being treated as income of an enterprise, but secures that income from immovable property will be taxed in the State in which the property is situated also in the case where such property is not part of a permanent establishment situated in that State. It should further be noted that the provisions of the Article do not prejudice the application of domestic law as regards the manner in which income from immovable property is to be taxed.

CHAPTER SEVENTEEN

DEDUCTION OF INTEREST IN COMPUTING PROPERTY INCOME

17.1 Deduction of interest – Introduction

This chapter considers the deduction of interest for the purposes of income taxation of property income and trading income.

A great deal of tax and a great deal of tax planning depends on obtaining that deduction. See *Langsam v Beachcroft LLP* [2011] EWHC 1451 (Ch) for an interesting negligence action where a dissatisfied remittance basis taxpayer obtained damages against his advisors who failed to advise on the tax avoidance possibilities, dignified with the label of an “equity release arrangement”.

The position of UK resident companies (subject to corporation tax and governed by the loan relationship rules) is not discussed.

17.1.1 *Cross references*

For questions of the location of the source of interest, and deduction at source, see 19.1 (interest income).

17.2 Basis for deduction

Section 272(1) ITTOIA is the starting point for property income:

The profits of a property business are calculated in the same way as the profits of a trade.

Section 272(2) provides a long list of statutory provisions which apply to a property business.

Thus I can deal with property income and trading income in the same

chapter, though my focus here is on property income.

17.3 Capital or revenue expenditure

It is a long-established principle that capital items are ignored in calculating the profits of a trade. The rule is now in s.33 ITTOIA:

In calculating the profits of a trade, no deduction is allowed for items of a capital nature.

In the early days of income tax, the Courts ruled that where a loan was used as capital in a trade, interest on the loan was a capital expense and so disallowed.¹ That seems a strange result, but the Courts wished to avoid the anomaly, which holds today, and is a contributing factor to the current debt crisis, that debt finance gives rise to deductible interest but equity finance does not, as there is no deduction for dividends or the cost of share capital.

The old rule was however reversed by statute and s.29 ITTOIA now provides:

For the purpose of calculating the profits of a trade, interest is an item of a revenue nature, whatever the nature of the loan.

Interest is in principle a deductible expense if incurred wholly and exclusively for the purpose of the property business.

A premium (if not interest) is not deductible for IT purposes. That rule is preserved by s.58 ITTOIA, which allows relief for incidental costs of loan finance, but s.58(4) ITTOIA provides:

But the following are not incidental costs of obtaining finance ...
