- (c) the cost of repaying a loan or loan stock so far as attributable to its being repayable at a premium or having been obtained or issued at a discount...

17.4 Wholly and exclusively

The Property Income Manual provides:

¹ See for instance *European Investment Trust v Jackson* 18 TC 1.

2105. Introduction [April 2011]

Overview

... For IT, interest payable on loans used to buy land or property which is used in the rental business, or on loans to fund repairs, improvements or alterations, is deductible in computing the profits or losses of the rental business in the same way as other expenses.

Similarly, interest payable under hire purchase agreements or on an overdraft is deductible where the asset is used for business purposes.

The normal rental business rules apply, see PIM2000 onwards, including the “wholly and exclusively” rule and the rules governing the timing of relief (see PIM1100 onwards). A taxpayer cannot, for example, deduct interest on a private loan, such as a loan used to buy their private residence. Where part of the taxpayer’s own residence is let see PIM2120.

Similarly, the interest on a loan or overdraft may not be allowable, or only part may be allowable, where the taxpayer, for example, uses the borrowing:

- to buy non-rental business investments (which may be shown in the balance sheet as assets),
- to buy private assets or assets for their family,
- for the provision of private funds to be taken out from the rental business.

Deciding what interest, if any, can be deducted may be difficult, particularly where the taxpayer’s account with the business is overdrawn. That is, where the taxpayer has drawn out more money than the profits of the rental business. The loan may have, for example, partly financed the rental business and partly met private living expenses. Interest on a borrowing that is used to fund private living expenses or other non-business expenditure isn’t allowable.

For advice regarding the incidental costs of loan finance see PIM2050.

Interest on a partner’s capital account with the business isn’t deductible. It is merely an allocation of the rental business profit and is taxed as property income.

For more detailed guidance about the deduction of interest see BIM45650 onwards.²

Interest payable on property only partly used for rental business

A property may be let for short periods in a tax year or only part of it may be let throughout a tax year (or both); the rest of the time the property is used for private or non-business purposes. Here the interest charged on a qualifying loan on that property has to be split between the rental business use and the private or non-business use. The split is done in whatever way produces a fair and reasonable business deduction, taking account of both the proportion of business

2 This material is not set out here for reasons of space, but it is well worth reading, particularly where the interest is deducted from trading income rather than property income.

use and the length of business use.

You don't have to split the interest if the taxpayer is genuinely trying to let the property but it is empty because they have not been able to find a tenant. In this case the interest will meet the "wholly and exclusively" test. It won't meet this test if they have not been trying to let the property or they have been using it for private or non-business purposes .

[Interest and rent-a-room relief - passage not printed here]

Legislation

The profits of a rental business are calculated in the same way as the profits of a trade. Therefore interest may be deducted in computing the profits of a rental business provided that it meets the following criteria.

- It must be payable wholly and exclusively for the purposes of the rental business.

[• If it is paid to a person not resident in the UK, the deductible element must not be at more than a reasonable commercial rate - see PIM2110.]³

- It must not be within MIRAS - see PIM2120.

Remember that under the rental business rules, relief is given for interest payable on the accruals basis (not interest paid unless, exceptionally, the cash basis is used - see PIM1101).

The guidance on interest as a trade expense at BIM45650 onwards applies equally to interest as a rental business expense.

Interest rate hedging instruments

Where an interest rate hedging contract such as a swap or cap is taken out to hedge interest payments which are deductible in computing the profits or losses of a rental business, then profits or losses on that contract will normally be taxed or relieved as receipts or deductions of that rental business. This is because trading principles are imported into the property income computation rules. Profits and losses on such instruments should normally be computed on an accruals basis so that payments and receipts are allocated to the periods to which they relate, without regard to the periods in which they are made or received or become due and payable, in accordance with normal accounting practice.

For more on the tax treatment of swaps held by IT payers see PIM2140.

2110. Paid abroad [April 2011]

Business deduction and deduction of tax

The residence status of the lender does not affect the taxpayer's right to an interest deduction in computing the profits or losses of their rental business. But where they pay interest to a lender whose usual place of abode is outside the UK, they should normally deduct IT at the basic rate from the payments they make and account for it to HMRC, ...

3 This passage is out of date: see 17.4.1 (Interest paid at uncommercial rate).

17.4.1 *Interest paid at uncommercial rate*

The Property Income Manual provides:

2110. Paid abroad [April 2011]

...

Interest paid at uncommercial rates

Interest paid to a lender not resident in the UK over and above a commercial rate isn't allowable as a deduction even if it would otherwise qualify (perhaps because the loan was used to buy a rental business property). Generally, HMRC will accept the interest charged by the lender as an allowable deduction where it is paid on an arm's length loan made on a normal commercial basis.

... Take a broad view of what is a reasonable commercial rate. You should not normally seek an adjustment where the payer and recipient are at arm's length. If interest is payable in the UK on an advance from a foreign bank carrying on a bona fide banking business in the UK through a branch, treat it as if it were interest payable to a UK bank...

This is referring to what was s.74(n) ICTA 1988, which disallowed interest paid to a non-resident so far as it was at more than a reasonable commercial rate. The provision was repealed in 2004, so the manual is almost a decade out of date. However if interest is paid at more than a commercial rate, whether or not to a non-resident, the deduction would in principle be disallowable on transfer pricing or on "wholly and exclusively" principles.

17.4.2 *Non-resident company paying interest*

Lastly, for completeness, the manual refers to (what is now) 1301A CTA 2009:

In calculating a company's income from any source for corporation tax purposes, no deduction is allowed for interest otherwise than under Part 5 (loan relationships).

That only applies for CT and does not disallow a deduction for interest for IT. HMRC agree. The PI Manual states:

2110. Paid abroad [April 2011]

...

Non-resident companies

... Section [1301A] does not preclude a deduction for interest for companies chargeable to IT such as non-resident companies with income from UK property.

17.5 Tax relief schemes and arrangements

Section 809ZG(1) ITA provides the general rule:

Relief is not to be given under any provision of the Income Tax Acts to a person in respect of a payment of interest if

- [a] a tax relief scheme has been effected, or
- [b] tax relief arrangements have been made,

in relation to the transaction under which the interest is paid.

Section 809ZG(2) ITA is a small point:

Subsection (1) applies whether the tax relief scheme is effected, or the tax relief arrangements are made, before or after the transaction.

I do not see how a transaction could take place before the scheme is effected, but it does not matter.

Section 809ZG(3) ITA defines tax relief scheme:

A scheme is a tax relief scheme in relation to a transaction for the purposes of subsection (1) if it is such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(4) ITA defines tax relief arrangements in the same way:

Arrangements are tax relief arrangements in relation to a transaction for the purposes of subsection (1) if they are such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(5) ITA provides a commonsense definition of relief:

In this section “relief” means relief by way of—

- (a) deduction in calculating profits or gains, or
- (b) deduction or set off against income.

Corporate Finance Manual provides:

39030. Artificial payments of interest: Sole or main benefit [October 2009]

[The manual summarises the legislation and continues:] The sole or main benefit test is an objective, rather than a subjective test: the subsection focuses on the result to be expected from the transaction rather than its purpose. (See *The Crown Bedding Co v IRC* 34 TC 107 at pp 115, 118-120, followed in *Ackland & Pratten v IRC* 39 TC 649 at p662, and approved in *IRC v Brebner* 43 TC 705 at p718).

Ordinary borrowings involving funds, which are genuinely invested or re-lent, are not affected because the tax relief on the interest paid is incidental to the transaction.

International Manual provides:

509120. Section 787 ICTA 1988 [March 2007]

Part XVII ICTA 1988 includes various anti-avoidance provisions including Section 787. This restricts relief for interest paid under a scheme from which the sole or main benefit which might be expected to accrue is the reduction of tax resulting from the relief, including group relief. Although this appears to be a far reaching section which could be used against many avoidance schemes, its usefulness is somewhat restricted.

The provision was introduced to counteract a specific domestic avoidance scheme to get relief on ‘manufactured’ interest by paying interest in advance on a borrowing which was effectively immediately repaid. It is necessary to distinguish between an out-and-out avoidance scheme and a judiciously arranged borrowing scheme. The section is not, therefore, easily invoked but it may still be legitimate to use it in some cases involving intra-group funding transactions.

HMRC’s reluctance to use the section goes back to an assurance given in Parliament:

Mr. Robert Sheldon (financial secretary to the Treasury): The hon. Member for Guildford (Mr. Howell) rightly asked for some assurance that there would be no problems for innocent parties seeking

arrangements whereby they undertook to pay interest for genuine business purposes. I can give the hon. Gentleman the assurance that those paying true interest for genuine business purposes will not be caught by this scheme. To give him the definition, which I think also deals with the question put by the hon. Member for Cirencester and Tewkesbury (Mr. Ridley), in a genuine commercial scheme the main benefit is to secure finance. If that is applicable, those people will not be caught by the main benefit test and they will be perfectly free to go about seeking and undertaking any transactions which fall within that definition.

The natural anxiety of the hon. Member for Guildford is that these matters are closely watched. I can give him that assurance. That is to the advantage of the kind of people mentioned in this debate so that we do not entrap those perfectly legitimate and proper cases where people are prepared to pay the interest and get it allowable against tax. We are concerned about people who resort to some of those very peculiar devices of the kind which show an immense amount of ingenuity and, as the hon. Member for Guildford said, with such unfortunate results.⁴

17.6 Transfer pricing and thin capitalisation

The transfer pricing rules are in part 4 TIOPA, supplemented by the OECD transfer pricing guidelines which are nearly 400 pages long. This is a vast topic, and a full discussion would need many volumes. I focus on matters closest to the themes of this book.

Assuming interest is paid at market rates, one would not expect any transfer pricing issues to arise. However the effect of some debt deeming provisions is that transfer pricing rules also serve as thin capitalisation rules, ie rules which restrict the deduction of interest by companies funded primarily by borrowing, having limited share capital or net value. It is therefore necessary to consider these rules in some detail.

The International Manual explains the background as it appears to HMRC:

542005. Definition of thin capitalisation [March 2011]

In the commercial world, a company is said to be thinly capitalised when it has more debt than equity, and many thin cap cases boil down to a company with more debt than it could and would have borrowed on its

4 Hansard, 13 July 1976.

own resources, because it is borrowing either from or with the support of connected persons.

However, the amount of interest payable may be excessive for one or more reasons - interest rate, excessive duration of lending, restrictions on repayment, etc - so all terms and conditions should be considered in a thin capitalisation review. Other less obvious issues of possible interest are the appropriateness of the currency of the loan (e.g. forex risk) and the presence of guarantees. For HMRC, thin cap means looking at every aspect of lending and borrowing from a transfer pricing angle.

Other legislation on finance

There is other legislation - and this is not an exhaustive list - which may result in a restriction of the interest deduction, including:

- Arbitrage provisions - see INTM590000
- Unallowable purpose legislation - Section 441–442 CTA 2009 - see CFM38010
- Remaining provisions of Section 209 ICTA 1988 - now around Section 1000 CTA 2010 - such as interest in excess of a commercial rate of return - see below and CTM15502
- World-wide debt cap - Part 7 TIOPA 2010 - see CFM90100

The first two represent anti-avoidance legislation, so the choice depends on the facts and circumstances of the particular case. Section 155(6) TIOPA 2010 says that the Section 1000 CTA 2010 list and the world-wide debt cap legislation shall be disregarded when calculating the transfer pricing tax advantage. The debt cap applies after any transfer pricing adjustment has been made.

These provisions concern corporation tax only and are not discussed here. The Manual continues:

S. 1000 CTA 2009 onwards - distributions in the form of interest

While the main provision previously used to deal with thin cap, ICTA88/S209(2)(da), was repealed in 2004, much of S209 remains, dealing with payments which are interest in form but distributions in substance. These provisions are useful: they require no connection between borrower and lender, and are matters of substance and form rather than pricing. The legislation is now summarised in a list at CTA09/S1000, under the heading of “Meaning of Distribution”, followed by a schedule at S1001 which lists subsequent sections that explain or supplement these summaries. Included are:

- interest in excess of a commercial return - previously at ICTA88/S209(2)(d)
- securities that are convertible into shares - previously at

ICTA88/S209(2)(e)(ii)

- interest that is dependent on the results of the borrower's business - previously at ICTA88/S209(2)(e)(iii)
- securities that are connected with shares - previously at ICTA88/S209(2)(e)(vi)
- interest payable on an equity note issued to an associated company - previously at ICTA88/S209(e)(vii)

These are covered in the Company Tax Manual (CTM). Links within INTM to other manuals may not be “live” links, but will work as search terms on the HMRC website, and possibly on internet search engines.

How thin capitalisation arises

When a company operates at arm's length from its sources of funding, commercial considerations drive the decision to raise funds either through debt, equity, or a mixture of the two. There is a marked difference in tax treatment between debt finance and equity, in that interest on debt is deductible from profits, whereas dividends on shares are not. This is explored in more detail in the Practical Thin Cap Guidance from INTM570000 onwards.

When a company borrows from or with the support of other group companies, funding decisions may not be driven by commercial considerations alone. The connection between the parties involved might allow them to change the way in which the funding is obtained in ways unavailable or unattractive to the borrower at arm's length, or to take on funding risks which an independent borrower would avoid. Factors such as group policy, strategy, and tax planning will sit alongside commercial considerations.

As a result of the differences in tax treatment between interest and dividends, a company which increases its indebtedness, and thereby increases its interest payments, reduces the tax it has to pay.

Thin capitalisation is just a form of transfer pricing, and is not limited to companies, except where the legislation says so, but this guidance concentrates largely on corporate relationships.

Thin capitalisation and tax planning

As with transfer pricing more generally, thin capitalisation does not require a tax avoidance motive. The aim of applying transfer pricing legislation is to ensure that arm's length prices are recognised for goods, services, etc, for tax purposes. However, company finance is an easy and attractive way for groups to change the jurisdiction within which profits arise, and tax planning will be an aspect of the financing plans for any major corporate acquisition.

Corporate thin capitalisation is usually seen in a group context, since it

would be counter-productive (though not unheard of) for a company to increase its interest costs payable to a third party, just to reduce its tax liability. Besides, a borrower cannot borrow more (or pay more interest) than an arm's length lender is willing to lend, unless that money is guaranteed, usually by group members. Where the borrowing is intra-group, the interest remains within the group; the group as a whole is no less profitable, but the borrower has paid less tax, and, where the lender is in a country with a lower corporation tax rate than the borrower or has losses to absorb interest received, the group can end up far better off overall. At the same time, there may be arbitrage (INTM590000) or other opportunities to further reduce tax.

With third party borrowing supported by a group guarantee, interest is paid to a third party and value leaves the group, but in that case the issue may be a matter of where it is most tax efficient for the group's interest costs to arise. The inference is that the world-wide group has capacity to borrow but not necessarily within the UK entity, which is where it wishes to place the debt. However, guarantees, including less formal support such as a letter of comfort, can enable a company to borrow more cheaply than would be possible on a standalone basis.

17.6.1 *"The basic pre-condition"*

Section 147(1) TIOPA provides:

For the purposes of this section "the basic pre-condition" is that—

- (a) provision ("the actual provision") has been made or imposed as between any two persons ("the affected persons") by means of a transaction or series of transactions,
- (b) the participation condition is met (see section 148),
- (c) the actual provision is not within subsection (7) (oil transactions), and
- (d) the actual provision differs from the provision ("the arm's length provision") which would have been made as between independent enterprises.

Thus the "basic pre-condition" actually consists of four conditions or sets of conditions.

Section 151(1) TIOPA defines "**arm's length provision**" in line with the commonsense usage above:

In this Part "the arm's length provision" has the meaning given by section 147(1).

Section 150 TIOPA defines transaction:

- (1) In this Part “transaction” includes arrangements,⁵ understandings and mutual practices (whether or not they are, or are intended to be, legally enforceable).
- (2) References in this Part to a series of transactions include references to a number of transactions each entered into (whether or not one after the other) in pursuance of, or in relation to, the same arrangement.
- (3) A series of transactions is not prevented by reason only of one or more of the matters mentioned in subsection (4) from being regarded for the purposes of this Part as a series of transactions by means of which provision has been made or imposed as between any two persons.
- (4) Those matters are—
 - (a) that there is no transaction in the series to which both those persons are parties,
 - (b) that the parties to any arrangement in pursuance of which the transactions in the series are entered into do not include one or both of those persons, and
 - (c) that there is one or more transactions in the series to which neither of those persons is a party.

The International Manual provides:

542040. Transaction or series of transactions [March 2012]

Transactions within a series do not have to occur in a recognisable sequence. They may be simultaneous or removed in time from one another, but they have to be part of an overall arrangement or scheme. The meaning of series of transactions is further widened by Section 150(4) TIOPA 2010, which sets out a number of situations that do not prevent a series of transactions being recognised as such. There may be a series of transactions, even if, in relation to the “affected persons” (INTM542020):

- there is no transaction in the series to which both those persons are parties,
- the parties to any arrangement in pursuance of which the transactions in the series are entered into do not include one or both of those persons, and

⁵ Section 150(5) TIOPA provides the standard, unnecessary definition of “arrangements”: “In this section “arrangement” means any scheme or arrangement of any kind (whether or not it is, or is intended to be, legally enforceable).”

- there is one or more transactions in the series to which neither of those persons is a party

By recognising a series of transactions, the transfer pricing legislation can apply to more complex and indirect financial structures in the same way that it does to the most straightforward borrower/lender situation. However, irrespective of the complexity or number of transactions which make up the “series”, it should always be borne in mind that this legislation is still about a provision within Section 147 TIOPA 2010 between two persons that results in a tax advantage. (INTM542020 and INTM542030)

A simple example of indirect finance which would fall within the definition of a series of transactions is a UK borrower being lent money by an entirely unconnected third party bank, with a party connected to the borrower guaranteeing the loan.

A more complex example is where a company in the same group as the UK borrower has provided a guarantee to one bank, which then provides a guarantee to a second bank, and the second bank then lends money to the UK borrower. Here there is a step - between the first and second banks - which does not involve either the parent or the borrower. This is still a series of transactions, and one which, though difficult to detect, would fall within the scope of the thin capitalisation legislation. Apart from the provision of a guarantee, the most likely situations where the provision might consist of a series of transactions would be where an intermediary is acting in a nominee or agency capacity in providing finance cross border between group companies.

In cases such as these, the questions to ask in considering the provision are:

- Without the guarantee(s) would the borrower have been able and willing to borrow on these terms?
- Had the borrower and the guarantor been at arm’s length from one another, would they have entered into the guarantee?

17.7 The participation condition

Section 148 TIOPA provides:

(1) For the purposes of section 147(1)(b), the participation condition is met if—

- (a) condition A is met in relation to the actual provision so far as the actual provision is provision relating to financing arrangements, and
- (b) condition B is met in relation to the actual provision so far as

the actual provision is not provision relating to financing arrangements.

(2) Condition A is that, at the time of the making or imposition of the actual provision or within the period of six months beginning with the day on which the actual provision was made or imposed—

(a) one of the affected persons was directly or indirectly participating in the management, control or capital of the other, or

(b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

(3) Condition B is that, at the time of the making or imposition of the actual provision—

(a) one of the affected persons was directly or indirectly participating in the management, control or capital of the other, or

(b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

(4) In this section “financing arrangements” means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

17.8 The general rule

If the “basic pre-condition” is met, we move on. Section 147 TIOPA provides:

(2) Subsection (3) applies if—

(a) the basic pre-condition is met, and

(b) the actual provision confers a potential advantage in relation to UK taxation on one of the affected persons.

If that is the case we come to the general rule:

(3) The profits and losses of the potentially advantaged person are to be calculated for tax purposes as if the arm's length provision had been made or imposed instead of the actual provision.

Similarly if there are several affected persons:

(4) Subsection (5) applies if—

- (a) the basic pre-condition is met, and
 - (b) the actual provision confers a potential advantage in relation to UK taxation (whether or not the same advantage) on each of the affected persons.
- (5) The profits and losses of each of the affected persons are to be calculated for tax purposes as if the arm's length provision had been made or imposed instead of the actual provision.

The International Manual provides:

542010. Introduction [March 2012]

...Paragraph 1.65 of the OECD Transfer Pricing Guidelines is particularly helpful in finding the appropriate approach towards the arm's length provision in thin capitalisation cases. This says that the basic transfer pricing approach considers economic substance versus form in thin capitalisation cases:

“[In cases] where the economic substance of a transaction differs from its form... the tax administration may disregard the parties' characterisation of the transaction and re-characterise it in accordance with its substance. An example of this circumstance would be an investment in an associated enterprise in the form of interest-bearing debt when, at arm's length, having regard to the economic circumstances of the borrowing company, the investment would not be expected to be structured in this way. In this case it might be appropriate for a tax administration to characterise the investment in accordance with its economic substance with the result that the loan may be treated as a subscription of capital.”

This means that where a borrower obtains an actual loan of £100m from a non-arm's length source, but would only be able to borrow £60m at arm's length, the tax deduction for the interest costs should be restricted to those accruing on £60m of the £100m actually borrowed. The balance would have had to be provided in some other form, most likely as equity. This is not recharacterisation in the way that excessive interest was once reclassified as a distribution for tax purposes (see INTM542230). Debt which is found to be excessive may be treated as equity for the purposes of a thin cap analysis, but the interest on the £40m excess remains interest for tax purposes; it is simply disallowed in the computation.

There will be variations in the way debt is treated as equity. There may be negotiations which result in an amount of debt being recognised as serving an equity function, as if that debt had actually been permanently converted into equity, but there will be other instances, for example the application of a debt: equity ratio in an advance agreement, where equity will in effect vary from year to year.

This sort of “recharacterisation” should be uncontroversial, assuming the level of disallowance is agreed. It is a case of finding an explanation, should one be needed, for the presence and treatment of funds that have been deemed “excessive” in thin cap terms. However, if the argument goes further, for example towards saying that the transaction would not have taken place at all and something different would have happened at arm’s length, it is recommended that the matter be discussed with Business International before the case is developed,

It is important to remember that thin capitalisation considerations are not limited to determining the amount which would have been borrowed at arm’s length, but also extend to the other terms attached to the actual provision, such as the interest rate, duration and repayment terms. Any of these is capable of creating or extending a tax advantage for the UK borrower.

17.8.1 *Separate entity basis*

The International Manual provides:

542050. Separate entity basis for determining borrowing capacity
[March 2012]

The separate entity principle is part of the basic precondition in TIOPA10/S147(1)(d). This defines the arm’s length provision as that “which would have been made as between independent enterprises”. The arm’s length borrowing capacity of the borrower is therefore the debt which it could and would, as a stand-alone entity, have taken on from an independent lender. To establish this, it is necessary to consider the borrower separately from other members of the same group of companies. This is the “separate entity” or stand-alone basis for determining borrowing capacity.

This approach is derived from OECD Transfer Pricing Guidelines, as expressed in paragraph 1.6 of the Guidelines:

By seeking to adjust profits by reference to the conditions which would have obtained between independent enterprises in comparable transactions and comparable circumstances, the arm’s length principle follows the approach of treating the members of an MNE group as operating as separate entities rather than as inseparable parts of a single unified business. Because the separate entity approach treats the members of an MNE group as if they were independent entities, attention is focussed on the nature of the dealings between those members.

The main impact of the “separate entity” basis for determining borrowing capacity is that no account is taken of any guarantees, explicit or implicit, from connected companies (INTM542020). However, that is not the end of the story, as it is recognised that, even on a standalone basis, negotiations with a third party lender would include an assessment of the financial strength of the borrower, to inform the thinking of both parties. This would take into account the income, assets and liabilities within the borrower’s subsidiaries. In broad terms, this will be based on the strength (or otherwise) of the borrower’s consolidated balance sheet and profit and loss account, subject to some analysis of what underlies the figures on the face of the accounts. How this might be achieved would depend on the complexity of the situation.

HMRC follows a practical approach and, if consolidated accounts are not drawn up as a matter of course, will request consolidated figures. There is no obligation on the borrower to produce audited consolidated accounts purely for HMRC, so properly drawn up schedules reflecting the consolidated position will be acceptable. This may not be a straightforward task if the exercise embraces companies resident in a number of countries and using a variety of accounting conventions. In such cases it may be helpful to discuss how HMRC may be satisfied without creating major expense and difficulty.

There may be companies that need to be excluded from the homogenised group and dealt with according to their own characteristics e.g. finance companies which are likely to have higher proportions of debt than ordinary trading companies. Some subsidiaries may need to be excluded altogether e.g. companies with a dividend block which a lender might not recognise as assets against which they would wish to lend. This whole question must be viewed pragmatically

...The separate entity principle for measuring borrowing capacity is illustrated by the following example.

To determine the borrowing capacity of B Ltd, its results are consolidated with those of UK sub Ltd and the two overseas Subs. (INTM578050).

A, C and D Ltd are not taken into account when measuring the borrowing capacity of B Ltd. However, as a separate matter, in the event that interest on the loan is found to be excessive and is disallowed because the borrowing capacity of B Ltd (including its subsidiaries) would not support the full amount of the loan from Overseas Lender, it may be possible for A, C or D Ltd to make a claim as guarantors under Section 192 TIOPA 2010, if they have assets not already pledged elsewhere....

17.9 “Differ from the provision that would have been made”

Section 151(2) TIOPA provides:

For the purposes of this Part, the cases in which provision made or imposed as between any two persons is to be taken to differ from the provision that would have been made as between independent enterprises include the case in which

[a] provision is made or imposed as between two persons but

[b] no provision would have been made as between independent enterprises;

and references in this Part to the arm's length provision are to be read accordingly.

The International Manual provides:

542012. The “would” and “could” arguments [March 2012]

The test of thin capitalisation is to test the actual borrowing position against the arm's length borrowing position.

The arm's length principle recognises that connected parties may enter into transactions with each other on terms which differ from those which would be found in the open market between entirely unconnected persons. Where profits arise and the extent to which those profits are taxed may also differ from the arm's length position.

The application of the arm's length principle requires a judgement on the merit of each individual case to establish what would have happened at arm's length; the terms on which the company in question:

- could have borrowed and would have borrowed (if anything), as a separate entity
- from a third party lender unconnected with the borrower, and
- without guarantees or other forms of comfort from any party connected with the borrower.

There are two main ways of looking at the borrowing: what the lender would do and what the borrower would do if the circumstances were as outlined above, and these are expressed as:

- the “could” argument - what a lender would have lent and therefore what a borrower could have borrowed - and
- the “would” argument - what a borrower acting in the best interests of their own business would have borrowed.

The “could” argument

This is generally the less subjective issue. The could argument focuses on what a lender would be prepared to lend to the company and on what

terms, taking into account the borrower's capacity to borrow, the risk of default, assets (as security) and liabilities (additional drains on the borrower's resources), and its ability to service the debt: in short, how much and on what terms a lender would lend.

Risk elements will include amount, duration of lending, purpose, security, currency and the economic climate at a sector, national and international level.

The “would” argument

This issue is more subjective, since it can involve the whole basis on which the business is run. The “would” argument considers the borrower's perspective: whether the borrower would have entered into the actual transaction in the absence of a special relationship (INTM542020) with the lender. Therefore, when trying to establish the amount and terms of arm's length debt, the “would” argument relates to how much, and on what terms, the borrower would have borrowed at arm's length bearing in mind the sort of issues mentioned below.

So, the “would” argument requires analysis of the terms which a borrower would have agreed at arm's length, such as

- the amount of debt, and whether that leaves headroom to allow the borrower to absorb cyclical or seasonal variations, an unforeseen event or a fluctuation in interest rates or profits, and ultimately repay the principal;
- the costs of borrowing, and whether forecasts indicate that the borrower is likely to be able to service the debt fully and still have sufficient cash to operate as a profitable going concern;
- whether the other terms, such as the interest rate or provision for early repayment are ones to which the borrower would have agreed in the absence of a special relationship;
- whether the borrower would have taken out the loan at all.

Consideration of the “could” and “would” arguments should highlight situations such as where

- an arm's length interest rate is being applied, but the amount of debt is more than the borrower could have borrowed from an independent lender, or
- an arm's length interest rate is applied to an arm's length amount of debt, but the borrower appears to have no purpose of its own for borrowing the money (and therefore no reason to borrow other than the group relationship).

Debt is not necessarily paid down to nil. A certain level of debt is acceptable, even desirable in most companies, and while higher levels of acquisition debt tend to be reduced in the years following the transaction, there is likely to be a level of debt appropriate to the needs of the business, year on year, appropriate to achieving the right balance

between debt, equity and profitability.

17.10 Securities (loans)

Section 152 TIOPA provides:

- (1) This section applies where—
 - (a) both of the affected persons are companies, and
 - (b) the actual provision is provision in relation to a security issued by one of those companies (“the issuing company”).
- (2) Section 147(1)(d) [the actual provision differs from the arm’s length provision] is to be read as requiring account to be taken of all factors, including—
 - (a) the question whether the loan would have been made at all in the absence of the special relationship,
 - (b) the amount which the loan would have been in the absence of the special relationship, and
 - (c) the rate of interest and other terms which would have been agreed in the absence of the special relationship.

The International Manual provides:

542015. Summary of sections specific to thin capitalisation [March 2012]

There are specific sections within Part 4 TIOPA 2010 that apply only to loans between two companies:

- Section 152 TIOPA 2010 requires certain factors to be considered when comparing the arm’s length provision with the actual provisions in Section 147(1)(d) TIOPA 2010. INTM542080
- Section 181 TIOPA 2010 to Section 184 TIOPA 2010 sets out the conditions required for a lender to make a valid compensating adjustment claim where a disallowance has been made in the borrower’s computations. INTM542110
- Section 153 TIOPA 2010 deals with the factors that are taken into account when a loan is supported by a guarantee, and the borrower and the guarantor have a special relationship. INTM542130
- Section 191 TIOPA 2010 to Section 194 TIOPA 2010 sets out the conditions required for a guarantor to make a valid compensating adjustment claim. INTM542120

Non-corporates

Part 4 TIOPA 2010 applies to loans made to companies by non-corporates where the participation condition in Section 148 TIOPA

2010 is met. However, the explicit instructions regarding factors to be considered as part of evaluating the arm's length provision in Section 152 TIOPA 2010 and Section 153 TIOPA 2010 do not apply as legislation to loans by non-corporates. Even so, the factors that are set out in Section 152 TIOPA 2010 and Section 153 TIOPA 2010 are generally those which are taken into account by lenders and borrowers acting at arm's length, so in practice the nature of the lender, corporate or non-corporate will have little if any impact on how the arm's length provision is determined.

Claims for compensating adjustments by non-corporates can be made under the conditions in Section 174 TIOPA 2010 to Section 178 TIOPA 2010.

17.10.1 *Disregard: Non-business loans*

Section 152(3) TIOPA introduces two disregards:

Subsection (2) has effect subject to subsections (4) and (5).

Section 152(4) TIOPA provides:

If—

- (a) a company ("L") makes a loan to another company with which it has a special relationship, and
 - (b) it is not part of L's business to make loans generally,
- the fact that it is not part of L's business to make loans generally is to be disregarded in applying subsection (2).

Why is this needed? The International Manual explains:

542080. Special rules for lending between companies [March 2011]

Section 152(4) TIOPA 2010 ensures that the fact that the lender is not generally in the business of making loans cannot be taken into account when evaluating the terms.

17.10.2 *Disregard: guarantee*

Section 152 TIOPA provides:

- (5) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring that, in the determination of any of

the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.

(6) The matters are—

- (a) the appropriate level or extent of the issuing company's overall indebtedness,
- (b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—
 - (i) the issue of a security by the issuing company, or
 - (ii) the making of a loan, or a loan of a particular amount, to the issuing company, and
- (c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

Section 153 TIOPA repeats the same material:

(1) This section applies where the actual provision is made or imposed by means of a series of transactions which include—

- (a) the issuing of a security by a company which is one of the affected persons (“the issuing company”), and
- (b) the provision of a guarantee by a company which is the other affected person.

(2) Section 147(1)(d) [the actual provision differs from the arm’s length provision] is to be read as requiring account to be taken of all factors, including—

- (a) the question whether the guarantee would have been provided at all in the absence of the special relationship,
- (b) the amount that would have been guaranteed in the absence of the special relationship, and
- (c) the consideration for the guarantee and other terms which would have been agreed in the absence of the special relationship.

(3) Subsection (2) has effect subject to subsections (4) and (5).

(4) If—

- (a) a company (“G”) provides a guarantee in respect of another company with which it has a special relationship, and

(b) it is not part of G's business to provide guarantees generally, the fact that it is not part of G's business to provide guarantees generally is to be disregarded in applying subsection (2).

(5) Section 147(1)(d) [the actual provision differs from the arm’s length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or

of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.

(6) The matters are—

- (a) the appropriate level or extent of the issuing company's overall indebtedness,
- (b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—
 - (i) the issue of a security by the issuing company, or
 - (ii) the making of a loan, or a loan of a particular amount, to the issuing company, and
- (c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

The International Manual provides:

542090. Guarantees - what they do and what they are [March 2012]

As explained in INTM542040, a provision may arise from a series of transactions rather than just a single transaction between two connected companies. A loan from a third party which is guaranteed by a connected person constitutes a provision consisting of a series of transactions. The same would apply to a loan from a connected party which is guaranteed by another connected party. The most common instance will be a single loan supported by a single guarantee but the provision could consist of any number and combinations of loans and cross guarantees.

The effect of a guarantee

Guarantees most commonly support third party borrowing, but can be used to support loans between group companies: for example, a European group treasury company might provide finance to a fellow group company resident in the UK, but under guarantee from the UK borrower's parent company.

With the additional comfort offered to the lender by a guarantor, the lender might provide a loan on more advantageous terms than the borrower could have obtained otherwise, because the guarantee will reduce the risk to the lender. In the event of a failing borrower and no guarantee, a third party lender's prospects of recovering its outlay would be at risk. However, with a guarantee in place, the lender should have greater and more immediate success in recovering debt and interest, simply by exercising its rights under the guarantee and seeking payment from the guarantors, than it would by waiting for a distribution of assets in a liquidation, or having to write off all or part of the loan. The guarantor would of course have to demonstrate that it could make good

its pledge, and probably provide security in relation to its commitment. The effect of a guarantee on loan terms is varied. Guarantees may help secure:

- A larger loan
- A lower rate of interest
- An increase in duration
- Less demanding covenants on the borrower

Any of these may have implications for the transfer pricing of the transaction e.g. a larger loan may be obtainable, but it may be more than the borrower would be able or willing to take on at arm's length. Also, the guarantee may secure preferable terms as compared to what would be otherwise on offer. A lower interest rate on a larger amount of debt might be regarded as a more attractive and not a more expensive deal. See INTM542100.

The presence of a guarantee does not necessarily signify a change in lending terms, and in any case larger, longer, etc, do not mean "better" for the borrower; a larger loan may be more than the borrower would or could borrow without this help, and therefore more than the borrower could or would borrow at arm's length. Lenders may seek guarantees as part of a belt and braces approach, a typical example being the cross guarantees required by lenders when they lend to a group of companies.

542100. Evaluating guarantees: starting with the arm's length cost of debt [March 2012]

Section 153 TIOPA 2010 (Paragraph 1B Schedule 28AA) is about considering the effect of, and consequently the issue of allowing the costs of pricing guarantees between connected companies. It adopts a similar approach to the way transfer pricing of securities between companies operates - see Section 152 TIOPA 2010 (INTM542080). However to understand how the section works it is better to start by looking at the factors that have to be disregarded before looking at the factors that are specifically to be taken into account.

Section 153(4) TIOPA 2010 has the same effect for guarantees as Section 152(4) TIOPA 2010 has for loans. It ensures that where the guarantor is not generally in the business of making guarantees, that circumstance cannot be taken into account when evaluating what the guarantee fee would be at arm's length.

Section 153(5) and (6) TIOPA 2010 ensure that guarantees from connected companies are ignored, so that the borrower's borrowing capacity is evaluated on a separate entity basis (INTM542050). These subsections repeat what was said at Section 152(5) and (6) TIOPA 2010, except with different intent. Section 152 is about how the arm's length provision is calculated for the borrower, for the purposes of testing whether a security is on arm's length terms. Section 153 repeats the same

test, but as a precursor to working out whether a guarantee has an arm's length value to the borrower. The exercise should isolate and exclude the effect of the guarantee to identify what would have been achieved without it.

Looking at the loan whilst ignoring the effect of any guarantees establishes the amount the borrower would have been able to borrow in its own right, and the terms on which it would have done so. The legislation specifically states that guarantees should be disregarded in considering the following specific issues:

- the level or extent of overall debt
- whether a loan would have been entered into
- the rate of interest or other terms

Once this is established, the legislation considers the transfer pricing of the guarantee fee itself - see INTM542105.

542105. Establishing the arm's length value of a guarantee [March 2012]

Establishing the arm's length value of a guarantee

This is about guarantee fees and their worth to the borrower: where the borrower is actually charged for the provision of a guarantee. This is therefore about:

- what value the guarantee brings to the borrower
- whether that guarantee gives the borrower improved terms over and above what it could obtain on a separate entity basis i.e. without the support of any but its own subsidiaries.
- What is the appropriate level for the guarantee fee

Section 153 (Paragraph 1B) first establishes the arm's length price of the loan without guarantees. This does not necessarily mean that guarantees will be ignored in pricing the debt. In considering what guarantee, if any, would have been provided at arm's length. Section 153(2) TIOPA 2010 (formerly Paragraph 1B(2) Schedule 28AA ICTA 1988) asks that "all factors" be taken into account in working this out, and particularly asks what would have happened in the absence of the special relationship between the borrower and the provider of the guarantee (i.e. at arm's length):

- would the guarantee have been provided at all
- what amount would have been guaranteed
- what consideration (fee, etc) and other terms would have been agreed

This is simply a matter of applying a transfer pricing test to guarantee costs.

At arm's length, a company will not take on the extra cost of a guarantee unless that guarantee makes the overall cost of finance cheaper than it would be on a stand-alone basis. If the cost of the guarantee itself is greater than the saving it brings, it will be disallowed to the extent that

it causes the total finance costs relating to the guaranteed debt to exceed the stand-alone arm's length price.

The scenarios below set out how Section 153 TIOPA 2010 operates for the borrowing company. The "cost of loan" in the headings below refers to actual costs of borrowing excluding guarantee fees and not adjusted by transfer pricing provisions. These scenarios do not demonstrate the arm's length price of a guarantee, but will show whether the guarantee has brought a benefit when the borrowing is considered on an arm's length basis.

1. Guarantee fee charged and cost of loan exceeds arm's length

The borrower is already paying more than it would if borrowing on a separate entity basis. Considered at arm's length, the value of the guarantee is nil and it simply represents an additional cost. The terms of the loan are adjusted for transfer pricing purposes to the arm's length amount, the non-arm's length element of the loan costs is disallowed, and the guarantee fee is disallowed.

There is no apparent benefit from this guarantee, so any claim that there is value meriting a guarantee fee should be subject to a thorough analysis to identify whether the guarantee provides any other, less obvious commercial benefit that would justify the payment of a fee. A guarantee might enable a borrower to spread its finance costs over a longer period, which might be advantageous in certain circumstances.

2. Guarantee fee charged and cost of loan is equal to the arm's length

The cost of the loan is arm's length so no adjustment is required with respect to the loan itself, but as in 1 above, it would be difficult to justify a guarantee fee. It appears to provide no benefit by way of cheaper financing and is likely to be disallowed unless some less obvious benefit can be demonstrated.

3. Guarantee fee charged and cost of loan is less than arm's length

This situation may arise where the guarantee is taken into account in setting the terms of the loan. For example, the presence of the guarantee may have the effect of improving the credit rating of the borrower and achieve a lower interest rate. As the guarantee has reduced the cost of the loan to below the stand-alone cost, there is a clear benefit to the borrower in entering into the guarantee. It is therefore likely that at arm's length a fee would be paid, as there is a genuine benefit to the borrower. However, the borrower would only agree to pay a fee at arm's length if there was an overall saving, and the level of the fee should reflect this.

4. No guarantee fee charged and cost of loan is less than arm's length

Where there is a guarantee in place but no fees have been charged, the guarantee may still provide the borrower with beneficial terms, such as a reduced interest rate. The arm's length cost of the loan will exceed the actual cost of the loan, because the guarantee reduces finance costs

without itself costing anything. It might be argued that, at arm's length, a fee would be charged for such an effective guarantee, but one cannot be imputed in the computations of the borrower, because transfer pricing legislation operates as a one way street. This scenario creates no tax advantage, so the basic transfer pricing conditions are absent. Of course if the guarantor negotiated a fee, that would be considered on its merits. Evaluating the arm's length value of a guarantee fee should be more than a simple mathematical comparison of actual and arm's length costs. It is worth emphasising that all relevant factors should be considered:

- the obligations of the guarantor
- its ability to fulfil them
- an analysis of the improvement to the borrower's credit worthiness
 - consideration as to whether the guarantee brings the borrower something beyond the implicit parental or group support provided by passive association with fellow group members.

It may be that the benefits provided by a guarantee, particularly informal understandings, are such that a guarantee fee would not normally be justified. Furthermore, where the guarantor is unable to honour its commitments under the guarantee because of the state of its own finances, the guarantee will in practice have no value.

17.11 Definitions

17.11.1 Special relationship

Section 154 TIOPA provides some definitions introduced by s.154(1)

Subsections (3) to (7) apply for the purposes of sections 152 and 153....

Section 154(3) TIOPA provides:

“Special relationship” means any relationship by virtue of which the participation condition is met (see section 148) in the case of the affected persons concerned.

The term “special relationship” is used in the OECD model treaty without definition (though discussed in the commentary) but the definition here is narrower.

17.11.2 Guarantee

Section 154(4) TIOPA provides:

Any reference to a guarantee includes—

- (a) a reference to a surety, and
- (b) a reference to any other relationship, arrangements, connection or understanding (whether formal or informal) such that the person making the loan to the issuing company has a reasonable expectation that in the event of a default by the issuing company the person will be paid by, or out of the assets of, one or more companies.

The International Manual has an interesting passage on implicit guarantees which is not set out here as it is not relevant to the themes of this book.

17.11.3 *Participatory relationship*

Section 154(5) TIOPA provides:

One company (“A”) has a “participatory relationship” with another (“B”) if—

- (a) one of A and B is directly or indirectly participating in the management, control or capital of the other, or
- (b) the same person or persons is or are directly or indirectly participating in the management, control or capital of each of A and B.

17.11.4 *Security*

Section 154 TIOPA provides:

(6) “Security” includes securities not creating or evidencing a charge on assets.

(7) Any—

- (a) interest payable by a company on money advanced without the issue of a security for the advance, or
- (b) other consideration given by a company for the use of money so advanced,

is to be treated as if payable or given in respect of a security issued for the advance by the company, and references to a security are to be read accordingly.

Subsection (6) is standard form. However subsection (7) means that all loans are “securities.” It would have been clearer to use the word “loan”

rather than to (mis)use the word “securities”, but there it is.

17.12 Potential advantage in relation to UK taxation

Section 155 TIOPA provides:

- (1) Subsection (2) applies for the purposes of this Part.
- (2) The actual provision confers a potential advantage on a person in relation to UK taxation wherever, disregarding this Part, the effect of making or imposing the actual provision, instead of the arm's length provision, would be one or both of Effects A and B.
- (3) Effect A is that a smaller amount (which may be nil) would be taken for tax purposes to be the amount of the person's profits for any chargeable period.
- (4) Effect B is that a larger amount (or, if there would not otherwise have been losses, any amount of more than nil) would be taken for tax purposes to be the amount for any chargeable period of any losses of the person.

17.12.1 Disregarded income

Section 155(5) provides a disregard for disregarded income:

In determining for the purposes of subsection (3) or (4) the amount that would be taken for tax purposes to be the amount of the profits or losses for a year of assessment in the case of a non-UK resident, there is to be left out of account any income of that person which is—

- (a) disregarded income within the meaning given by section 813 of ITA 2007 (limits on liability to income tax of non-UK residents), or
- (b) disregarded company income within the meaning given by section 816 of that Act.

Subsection (6) provides two more disregards:

For the purposes of subsections (2) to (4)—

- (a) Part 7 (tax treatment of financing costs and income), and
- (b) paragraph E of the list in section 1000(1) of CTA 2010 (excessive interest etc treated as a distribution),

are to be disregarded.

17.13 Exemption for small companies

Section 166(1) TIOPA provides what appears to be a general exemption, which is then restricted by significant exceptions.

Section 147(3) and (5) do not apply in calculating for any chargeable period the profits and losses of a potentially advantaged person if that person is a small or medium-sized enterprise for that chargeable period (see section 172).

Section 166(2) provides the signposts in accordance with the dictates of plain English drafting:

Exceptions to subsection (1) are provided—

- (a) in the case of a small enterprise, by section 167, and
- (b) in the case of a medium-sized enterprise, by sections 167 and 168.

17.14 Election into transfer pricing regime

I mention the first exception only for completeness. Section 167 TIOPA provides:

- (1) Subsections (2) and (3) set out exceptions to section 166(1).
- (2) The first exception is if the small or medium-sized enterprise elects for section 166(1) not to apply in relation to the chargeable period. Any such election is irrevocable.

Why would anyone would want to elect into the regime?

17.15 Resident of non-qualifying territory

The next exception is more important. Section 167(3) TIOPA provides:

The second exception is if—

- (a) the other affected person, or
 - (b) a party to a relevant transaction,
- is, at the time when the actual provision is or was made or imposed, a resident of a non-qualifying territory (whether or not that person is also a resident of a qualifying territory).

Section 167(4) TIOPA provides some general definitions:

For the purposes of subsection (3)—

- (a) a “party to a relevant transaction” is a person who, if the actual provision is or was imposed by means of a series of transactions, is or was a party to one or more of those transactions, and
- (b) “qualifying territory” and “non-qualifying territory” are defined in section 173.

Resident is based on the OECD model definition. Section 167(5) TIOPA provides:

In subsection (3) “resident”, in relation to a territory—

- (a) means a person who, under the law of that territory, is liable to tax there by reason of the person's domicile, residence or place of management, but
- (b) does not include a person who is liable to tax in that territory in respect only of income from sources in that territory or capital situated there.

17.16 Qualifying Territory

Section 173(1) TIOPA provides:

In section 167(3)—

“non-qualifying territory” means any territory which is not a qualifying territory, and

“qualifying territory” means—

- (a) the UK, or
- (b) any territory in relation to which condition A or condition B is met.

I refer to **“qualifying territory conditions A and B”** to avoid confusion with the myriad conditions in TIOPA.

17.16.1 *Qualifying territory conditions A and B*

Section 173 TIOPA provides:

(2) Condition A is that—

- (a) double taxation arrangements have been made in relation to the

- territory,
- (b) the arrangements include a non-discrimination provision, and
- (c) the territory is not designated as a non-qualifying territory for the purposes of this subsection in regulations made by the Treasury.
- (3) Condition B is that—
 - (a) double taxation arrangements have been made in relation to the territory, and
 - (b) the territory is designated as a qualifying territory for the purposes of this subsection in regulations made by the Treasury.

Non-discrimination provision has a commonsense definition:

- (4) For the purposes of subsection (2)(b) a “non-discrimination provision”, in relation to any double taxation arrangements, is a provision to the effect that nationals of a state which is a party to those arrangements (a “contracting state”) are not to be subject in any other contracting state to—
 - (a) any taxation, or
 - (b) any requirement connected with taxation,
 which is other or more burdensome than the taxation and connected requirements to which nationals of that other state in the same circumstances (in particular with respect to residence) are or may be subjected.
- (5) In subsection (4) “national”, in relation to a state, includes—
 - (a) any individual possessing the nationality or citizenship of the state, and
 - (b) any legal person, partnership or association deriving its status as such from the law in force in that state.
- (6) In this section “double taxation arrangements” means arrangements that have effect under section 2(1) (double taxation relief by agreement with territories outside the UK).

CHAPTER EIGHTEEN

SAVINGS AND INVESTMENT INCOME

18.1 Savings and investment income – Introduction

Savings and investment income is charged under Part 4 ITTOIA (occasionally supplemented other provisions). Interest, dividends and royalties each need a chapter to themselves. This chapter contains some general comments and deals with some remaining categories of savings income.

It is necessary to identify the charging provision for each type of income in this category and consider:

- (1) When is a receipt “income” in nature and when is it capital?
- (2) What is the source of the income?
- (3) Where is the source?

These are distinct (though sometimes related) questions. They are generally governed by case law, though occasionally statute chips in.

18.2 Why does “capital v. income” matter?

“Income tax is a tax on income.” This slogan is less true now than when it was formulated in 1900; but the question whether a receipt is “income” in the hands of the recipient remains important. References to “income” in tax legislation do not include capital receipts unless statute expressly so provides (which it often does).

This issue often arises in the context of distributions from trusts and non-resident companies, where the income/capital distinction is fraught.

18.3 Source of income

The classification of the source of income is important because different rules apply to income with different types of source. In particular, it may

be necessary or helpful to identify the source of income before one goes on to identify the location of the source.

There is no statutory definition of “source”. The word is too basic to be usefully defined. The word has been paraphrased as “origin”¹ and “chief” or “originating” cause² but these paraphrases are of no practical assistance.

18.4 Location of source of income

The question of the geographical location of a source of income is fundamental to the territorial scope of income tax.

Section 368 ITTOIA provides:

- (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
- (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK.

This is a statutory statement of a principle which was formerly in part in the statute and (where absent) was inferred by the courts.³ It rests ultimately on a principle of international tax law.⁴

1 *Hart v Sangster* 37 TC 231 at p.235.

2 *IRC v Philips' Gloeilampenfabrieken* [1955] NZLR 868.

3 ITTOIA EN Vol II explains:

“29. ...Since *Colquhoun v Brooks* 2 TC 490 the courts have followed Lord Herschell’s judgment that (page 499):

The Income Tax Acts, however, themselves impose a territorial limit, either that from which the taxable income is derived must be situate in the UK or the person whose income is to be taxed must be resident there.

30. Whether Lord Herschell’s words referred to the statutory rules of the time or to a general statement of the law, it is as the latter that they have been subsequently applied by the courts. For example in *Perry v Aston* 19 TC 255 Lord Russell of Killowen states (page 280):

There must, of course, be the necessary limitation which is inherent in all our Income Tax legislation, namely, that what is taxed under or by virtue of this provision can only be either (1) income which is here, or (2) income of a person resident here.

31. Additionally there is the general principle of UK law that, unless the contrary intention appears, an enactment is taken as not applying to matters outside the UK.”

4 “The jurisdiction to impose income tax is based either on the relationship of the income (tax object) to the taxing state (commonly known as the source or situs principle) or the relationship of the taxpayer (tax subject) to the taxing state based on

Secondly, income must have a source outside the UK to qualify as RFI and so to qualify for the remittance basis.

Statute formerly used a variety of expressions⁵ but now the standard terms to refer to location of a source are: “source in/outside the UK” or “income arising in/outside the UK”; these expressions are synonymous.⁶

Different considerations naturally apply to locating the source of different kinds of income.

The concept of the location of income is sometimes said to be misconceived:

Income itself does not have a geographical location.⁷

It seems to me that this is an overstatement.⁸ In most cases it is proper to say that income has a location, and easy to identify it, as the same passage goes on to state:

By long standing convention, however, income is assigned a geographical location by reference to the location of the assets and activities that are used to generate the income. When all of those assets and activities are located in one State, that State may be considered to be the unambiguous source of the income.

residence or nationality. Under the source principle, a State’s claim to tax income is based on the State’s relationship to that income. For example, a State would invoke the source principle to tax income derived from the extraction of mineral deposits located within its territorial boundaries. Source taxation is generally justified on the ground that the State has contributed to the creation of the economic opportunities that allow the taxpayer to derive income generated within the territorial borders of the State. Of course, jurisdiction to tax is also about power, and a State generally has the power to tax income if the assets and activities that generated it are located within its borders....” (United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries) 2003.

- 5 e.g. in section 65 ICTA 1988 (repealed) the test was whether a possession or security was “out of the UK”, but that meant “having a source out of the UK”; see ITTOIA EN Vol II para 1642.
- 6 An argument that there was a distinction between the source of income and the place where the income arose was rightly rejected in *Bayfine v HMRC* (CA) at [63]. This is also the view in Hong Kong: see 15.5.2 (Non-UK tax cases).
- 7 Para 2, United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries) 2003.
- 8 Contrast the view that the situs of a chose in action is fictional, which is rejected in 77.1 (Concepts of situs).

The problem is how to identify the location in harder cases. The passage continues:

... When some of the assets or activities generating income are located in more than one State, the source of the income is less clear. For example, business profits derived from the manufacture of goods in State A and their sale in State B have a significant relationship to State A and to State B. In these circumstances, some rules for determining source are needed.

An American scholar makes the same point:

... the source of income is difficult to define. In fact, many public finance economists would claim that the concept lacks meaning in the majority of cases... the problem has been partially solved by arbitrary rules. ... Economists argue that defining the true economic source is almost impossible, because income has contributions from many countries.⁹

In more complex matters, where several states are involved, it is clearly correct that there is no (economically) “true” source of income. However tax law must somehow choose connecting factor(s) to link a source to a state. In principle, it does not matter what the rule is, as long as there is some rule and its application is clear. There are many possible connecting factors, and the selection of the determining factor(s) must to some extent be arbitrary.

The IT rules for the location of an income source are different from the situs of asset rules for IHT/private international law.¹⁰ It would aid clarity of thinking not to use the same word, situs, in both contexts, so in this book I prefer to use the term “**location**” of a source of income (abbreviated to location of income) and keep *situs* for IHT/international law concepts and CGT. But the usage of “situs” in an income tax context is too well established to alter easily, and no real difficulty ought to arise as long as one bears in mind that IHT/international law situs of assets, and IT location of source of income, are different concepts (though the rules often overlap.) “Locality of income” is sometimes used as a synonym of location of a source of income.

9 Reuven Avi-Yonah, *International Tax as International Law*, (2007), p.27, 38.

10 See 77.1 (Concepts of situs).

The location of a source is also important for double tax treaties.¹¹ However DTAs sometimes lay down their own rules for locating a source (for treaty purposes) so it may be necessary to distinguish between domestic law source location and treaty-source location.

18.4.1 *Formal v. substantive source rules: the policy background*

An American scholar draws an interesting distinction between formal and substantive rules for determining the location of a source of income. This is helpful in identifying the policy issues behind the framing of location of source rules:

Source rules fall into two basic categories. The first category comprises formal rules. These rules do not attempt to trace the economic source of the income, but rather seek to achieve administrative ease and certainty. For example, the source rule for dividends is residence of the payor. Consider the following example demonstrating the formal rule: Suppose a foreign corporation exists and all of its income is earned in the United States - it has no other business activity.¹² From an economic perspective, it is clear that a dividend paid by this foreign corporation to its shareholders is U.S.-source. But it is foreign-source under the dividend rule, because the payor is a foreign corporation. Notice also that this means that the source of dividend income is under the control of the taxpayer ... The main reason behind this rule is that it is administratively hard to tax a dividend from a foreign corporation to foreign shareholders, but easy to tax a dividend from a U.S. corporation. The rule for interest is also a formal rule, and it is the same as the rule for dividends - the residence of the payor. This is fortunate because of the difficulty of distinguishing debt from equity in many cases; at least the source rule is the same. ...

The other kind of source rule is the substantive rule, which attempts to trace the economic source of the income. The first one of these is the rule for royalties, ... No universal consensus exists about what the source rule for royalties should be. Many countries have a source rule for royalties that focuses on the residence country; the place of ownership of the underlying copyright or the place of production (research and development). The American rule is a place of use rule, meaning that it

11 See "Treaty Problems Relating to Source" [1998] BTR 222.

12 Author's note: In the USA a foreign corporation is non-resident: there is no central management and control test for corporate residence.

focuses on where the copyright or patent is utilised. ...

There are other categories in which a substantive rule applies. In services, for example, the place of delivery of service controls. In many cases, it is not so easy to determine the place of delivery of service, either, because many high value-added services can now be delivered over long distances. In the past, when these rules were formulated, most services were delivered at the same place they were consumed, because physical proximity between the service provider and service consumer was necessary. Although that continues to be true for certain services - you cannot have long-distance haircuts - most services today (including teaching and legal and medical services) do not require such physical proximity. A disjunction may therefore exist between the place of delivery of the service and the place of receipt of the service that did not exist at the time the rules were formulated. Nevertheless, the rule continues to state that the place of delivery controls; in other words, the place where the service provider is located prevails. ...

The basic difference between formal rules and substantive rules is that the formal rules require one single determination (residence of the payor, residence of the seller, or passage of title), whereas substantive rules attempt to trace the economics of the transaction. Formal rules are generally relatively easy to administer, from both the IRS perspective and the taxpayer's perspective, whereas substantive rules may involve much more difficult determinations. For example, in the case of patents and copyrights, the rule requires determination of the location of use, which may be difficult to determine if it is used in many countries: it may be difficult to break up the income into where the service was actually delivered. Not all substantive rules are difficult to administer: real estate is relatively easy because the location of real estate governs residency, and location is simply to determine in real estate. Most of the important applications of substantive rules, however, are difficult to administer and are more difficult for the taxpayer to avoid because the formal rules are much more under the taxpayer's control.¹³

18.4.2 *Location of source of income when there is no source*

It was once the case that income tax was charged only on income from sources specified in the schedules, so in the absence of a source of income there could be no income tax. This is no longer so:

13 Reuven Avi-Yonah, *International Tax as International Law*, (2007), p.42.

Income tax is traditionally a source-based annual tax, liability depending upon the existence of a source of income falling under one of the Schedules during the year of assessment (see *Brown v National Provident Institution* 8 TC 57). ...

It is, however, no longer true to say that liability to income tax depends upon the existence during the year of assessment of a source within the charge. There are cases (such as post-cessation receipts) when liability depends upon the existence of income defined by reference to a source which does not exist within the year of assessment. Or liability may depend upon an event, such as a balancing charge on the sale of an asset which has attracted a capital allowance, or the receipt of a capital sum from a particular kind of transaction, which is deemed to be taxable income received in that year of assessment or sometimes spread over several years of assessment.¹⁴

ITTOIA EN Vol II para 1639 notes that:

Such chargeable amounts [capital receipts subject to income tax] could not therefore be said to derive from a “source” in the traditional sense.

ITTOIA EN was concerned that this might cause difficulty in finding the location of the source:

1640. Although the definition [of RFI] uses “income which arises from a source” in respect of all income within the definition, specific rules have been added, in view of Lord Hoffmann’s remarks [set out above], in sections 428(3) (deeply discounted securities) and 658(2) (beneficiaries’ income from estates in administration), to attribute a foreign source to the income in question to ensure that there is no doubt that the definition applies to these provisions.

Accordingly, s.368(3) ITTOIA provides:

References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.

ITTOIA EN Vol II expands on this:

¹⁴ *Walker v Centaur Clothes Group* 72 TC 379 at p.416.

34. However, while the term “source” may apply to the majority of receipts chargeable to income tax it does not apply to all such receipts. “Source” is something from which income arises and not all sums charged to income tax are by nature income. “Source” may not be the appropriate term where the amount charged to tax represents a profit on a transaction which is not by nature income and would not be charged to income tax without a specific charge. Indeed, the chargeable profit may arise on the disposal of an income source. This restricted meaning of “source” is supported by Lord Hoffmann’s judgment in *Walker v Centaur Clothes Group*, 72 TC 379 ... [set out above].

35. It has therefore been necessary to consider how to express the territorial scope in cases where there is no natural source of income.

36. [Section 368(3)] is broadly worded to catch such income. Where the connection such income has to the UK is comparable to the connection that income with a source in the UK has to the UK, then it is treated for the purposes of this section as income from a source in the UK.

It is hard to see that this concern was justified, but s.368(3) does no harm.

18.5 Building societies

In practice, income from a building society will have a UK source. ITTOIA EN Vol II explains:

48. Under section 66 FA 1988 a society incorporated under the Building Societies Act 1986 will be resident in the UK through incorporation. As long as dividends are paid by a UK resident company they have a UK source under the principle in *Bradbury v The English Sewing Cotton Company* 8 TC 481.

49. But a society may be non-resident where it satisfies a residence test in the territory of a treaty partner and the treaty awards residence to that other territory. Section 249 FA 1994 will then apply to treat the society as non-resident. Theoretically dividends paid by a building society may therefore arise from a source outside the UK. This would be most unlikely, however, since a building society may only be incorporated under the Building Societies Act 1986 if its principal office is in the UK. With the place of incorporation and the principal office in the UK a residence test is unlikely to be satisfied in another territory.

18.6 Open-ended investment companies and AUTs

ITTOIA EN Vol II discusses the location of the source of OEIC income:

50. The definition of an open-ended investment company in section 468(10) ICTA carries a limitation that the company should be incorporated in the UK under the OEIC regulations of 1996. Section 468(10) ICTA is inserted in section 468 of ICTA by para 10(4) (Open-ended Investment Companies (Tax) Regulations 1997 SI 1997/1154). All open-ended investment companies within the definition in section 468(10) ICTA are therefore subject to the company residence rule in section 66 FA 1988 (“regarded for the purposes of the Taxes Acts as resident”). Open-ended investment company interest distributions treated as made by a UK resident company will be UK source income. Section 249 FA 1994 could in theory also apply to make such companies non-resident (as explained in connection with industrial and provident societies). In that case interest distributions made will be treated as dividends from non-resident companies.

For AUTs see 37.2 (Income accruing to unit trust).

18.7 Industrial and provident societies

ITTOIA EN Vol 2 explains the source of income from an industrial and provident society:

52. Under section 66 of FA 1988 a society registered under the Industrial and Provident Societies Acts will be resident in the UK through incorporation. A society may, however, be non-resident where it also satisfies a residence test in the territory of a treaty partner of the UK and the treaty awards residence to that other territory. Section 249 of FA 1994 will then apply to treat the society as non-resident.

53. Section 486(4) of ICTA provides that share or loan interest is chargeable under Schedule D Case III. Theoretically therefore payments by a registered society may arise outside the UK but be charged under Schedule D Case III and not able to benefit from treatment specific to Schedule D Cases IV and V. For the sake of consistency this section¹⁵ treats such income arising outside the UK as relevant foreign income and therefore able to benefit from the special rules in Part 8 of this Act.

15 [Author’s Note] See ss.379 and 83D(2) ITTOIA.

18.8 Alimony and maintenance income

The source of alimony income is the country whose court ordered the payment.¹⁶ HMRC agree. ESC A12 provides:

Where alimony or maintenance payments are paid under a UK court order or agreement, the income arises from a UK source regardless of the country of residence of the payer.

However, alimony and maintenance is not usually taxable, because relief under s.727 and s.730 ITTOIA usually applies, so the question of source does not usually arise for UK tax purposes.

Foreign tax may of course be payable if the payments have a foreign source under the foreign law. However if

(1) there is a DTA with an “other income” article in OECD model form, and

(2) the recipient is treaty-resident in the UK,

DTA relief will usually give relief against the foreign tax (even though the income is not taxable here). This is strictly a matter for the foreign law, but the INT Manual notes the point:

161130. The source rule - concessions [September 2011]

... Note, however, that a UK resident payee, may, if foreign tax has been deducted from alimony etc. payments, be entitled to exemption from foreign tax if the relevant double taxation agreement so provides (for example in a specific Article or in the other income Article – see INTM153200 and INTM153240). If this happens or is likely to happen, then invite the payee to make a claim to the foreign Revenue authority for repayment of any tax deducted and for exemption from tax on future payments. Guidance on how to make such claims are given in the entries relating to the respective individual countries.

ESC A12 by concession allowed a foreign tax credit where alimony was UK source under UK principles and foreign source under foreign law principles and so suffered UK and foreign tax. However this has little role to play since 1988 since UK tax is no longer payable and foreign tax credit

16 See *Bingham v IRC* 36 TC 254 where a UK resident made maintenance payments to his ex-wife who was resident in the Netherlands. The payments had been ordered by a Dutch court and so were not UK source income.

is not needed and the INT manual discussion on this issue seems to be 2 decades out of date. This point has now been acknowledged and the concession is to be formally withdrawn from 2013/14.¹⁷

18.9 Income from contracts (casual income)

The BI Manual provides:

**BIM80130 - Miscellaneous income: Scope of the provisions:
Sweep-up - judicial comment [March 2012]**

...Income from “property”

The case of *Alloway v Phillips* [1980] 53 TC 372 involved the wife of one of the Great Train Robbers. Whilst living in Canada, she received £39,000 from a newspaper. It was not in dispute that she had provided information to the newspaper which led to the newspaper publishing a series of articles. It was found that she had entered into an agreement, governed by English law, to assist the newspaper.

The Court of Appeal held that the £39,000 was taxable in the UK under the Miscellaneous Income provisions as it arose from “property” in the UK. Lord Denning MR said at page 387D:

“The truth is that she had a chose in action in England. It was property in England: but she had no property at all in Canada. She had no copyright there. She only had the information in her head which she told to the newspaper reporter. That is not a species of property known to the law of England”

In *Alloway v Phillips* the location of the source of income was held to be the place that the benefit of the contract (the chose in action) was situate, and the contract being enforceable in the UK the income was taxable. This is not a suitable test, as taxpayers can in principle choose the place where the contractual right is situate. *Alloway v Phillips* is one of those cases where the Court decided the result first and the reasoning second.¹⁸ It is considered that the place where the work is done is the correct test for income in this category. But until such time as the Courts say so, a

17 HMRC, “Withdrawal of extra statutory concessions” (December 2011) accessible www.hmrc.gov.uk/budget-updates/06dec11/withdraw-tech-note.pdf.

18 “If the criminals or their wives get money by relating their stories to newspapers, they ought to pay tax on their profits and gains. That is this very case. The wife is now in England. She is outside the jurisdiction of the Canadian courts. She received the money here and ought to pay tax here ...”; 53 TC 372 at p.387.

taxpayer is entitled, indeed strictly required, to proceed on the basis that the reasoning of the Court of Appeal is correct in law.

Bayfine v HMRC concerned the profit from a forward contract between a US and a UK company. The contract was executed in the US, partly negotiated in the US, related to assets situated in the US, and was governed by New York law. Thus all the factors were all weighed in favour of a foreign source except that the residence of the recipient. This was held to be foreign source income.¹⁹ That must be right, for if residence was the decisive test of source in this case, then the profit would be UK source if the market moved one way and the UK company took the profit, and US source if the market moved the other way and the US company took the profit; which would be an odd result.

CHAPTER NINETEEN

INTEREST INCOME

19.1 Interest – Introduction

This chapter considers:

- (1) The taxation of interest income
- (2) Withholding tax on payment of interest to non-residents
- (3) Withholding tax on payment of interest by deposit-takers (banks)
- (4) The EU Interest and Savings Directive

Each topic requires a book to itself, except for the EU directive which requires several volumes. I focus on matters closest to the themes of this book. I do not consider corporation taxation of interest (the loan relationship rules) or the EU interest and royalties directive 2003/49/EC of 3rd June 2003 which applies to interest and royalty payments made between associated companies of different member states. Each of those would also require long books to themselves.

On 27 March 2012 HMRC published a very shallow consultation paper here called **“the interest consultation paper”**¹ which proposes the following changes:

- (1) Rules relating to interest from compensation payments (not discussed here)
- (2) The extension of deduction at source to short interest
- (3) A change to the definition of source of interest
- (4) Rules relating to Eurobonds, funding bonds and interest in kind (not discussed here)

Lastly, the paper proposes a disguised interest rule modelled on chapter

¹ HMRC, “Possible changes to income tax rules on interest”
http://customs.hmrc.gov.uk/channelsPortalWebApp/downloadFile?contentID=HMCE_PROD1_031986

2A part 6 CTA 2009. There is not much point in discussing this yet, except to note that (1) this would considerably increase uncertainty and (2) HMRC clearly do not have confidence that the forthcoming GAAR would address their problems in this area.

19.1.1 *Cross references*

For interest on FOTRA securities and foreign currency securities see 20.1 (Exempt interest of non-residents).

For relief for payment of interest, see 17.1 (Deduction of interest in computing property income).

19.2 Definition of interest

The corporate finance manual provides:

CFM33030 - Loan relationships: computational rules: what is interest? Interest is the most common example of the credits and debits that arise on a loan relationship.

There is no statutory definition of interest for tax purposes. It you need to decide whether a sum of money is interest, for example when establishing whether the loan relationships rules apply, consider the following principles that are derived from case law.

- Interest is the return or compensation for the use or retention by one person of a sum of money belonging to or owed to another.
- For interest to exist there must be a principal sum; that is, a sum of money advanced or a debt incurred.
- Interest can only arise by virtue of a legal right.
- A voluntary or gratuitous payment cannot be interest.

What is interest: case law

The question of what constitutes interest has been the subject of much case law over the years. Perhaps the best known quotation on what interest is comes from Rowlatt J in *Bennett v Ogston* (15TC374). He described interest as ‘payment by time for the use of money’.

This theme was developed in *Westminster Bank v Riches* (28TC153) where it was said ‘... the essence of interest is that it is a payment that becomes due because the creditor has not had his money at the due date. It may be regarded either as representing the profit he might have if he had had the use of the money, or conversely the loss he suffered because he had not had that use.’ The general idea is that he is entitled to compensation for the deprivation.

The requirement that for interest to exist there must be a principal sum from which the interest originates was considered in *Re Euro Hotel (Belgravia) Ltd* (51 TC 293). In his judgement Mr Justice Megarry said ‘there must be a sum of money by reference to which the payment which is said to be interest is ascertained.’

The concept that interest is something that accrues over time is supported by the cases of *Wigmore v Thomas Summerson* (9 TC 577) and *Willingale v International Commercial Bank* (52 TC 242). These cases indicated that true interest accrues from day to day or at periodic intervals.

What constitutes interest is a question of legal substance rather than terminology. In his judgement in the *Re Euro Hotel* case, Mr Justice Megarry said ‘It has, quite rightly, not been suggested that the language used by the parties to an instrument in describing the payment to be made under it can bind the Inland Revenue, or affect the operation of the statute. The question must always be one of the true nature of the payment.’

The case of *Seaham Harbour Company v Crook* (16 TC 333) demonstrates that a voluntary or gratuitous payment cannot be interest. This is so even if the payment is paid in lieu of or is equivalent to interest.

The SAI Manual provides:

SAIM2030 - Interest: meaning of interest [June 2007]

The legal concept of interest

Interest is not defined in the Taxes Acts. It is a concept of common and contract law. Halsbury’s Laws of England defines it as follows.

“Interest is the return or compensation for the use or retention by one person of a sum of money belonging to or owed to another. Interest accrues from day to day even if payable only at intervals, and is, therefore, apportionable in respect of time between persons entitled in succession to the principal.”

While there can be no such thing as interest without the requisite principal (a sum of money advanced or a debt incurred) there is no requirement that such principal has to carry interest. In common law the general rule is that interest is not payable on a debt or a loan; except where

- there is an express agreement to pay interest,
- an agreement to pay interest can be implied from a course of dealing between the parties, or from the nature of the transaction, or custom or usage of the trade or the profession concerned, or

- in certain cases by way of damages for breach of a contract (other than a contract merely to pay money) where the contract, if performed, would to the knowledge of the parties have entitled the parties to receive interest.

SAIM2040 - Interest: when does interest run? [July 2007]**Interest cannot be back-dated**

Since interest on a loan or debt can normally only run where there is an agreement to pay interest (SAIM2030), it follows that interest cannot be back-dated.

Example

Deborah is a controlling shareholder in Deb's Fashions Ltd. When the company started in 2001, she made a loan of £10,000 to the company. There was no agreement in 2001 that the loan should pay interest. In preparing the company accounts for year ended 31 December 2005, the company's accountant advises that the company can now afford to pay interest, and accordingly it is agreed on 4 February 2006 that the loan will carry interest at 3% per annum.

The agreement will have effect only from 4 February 2006. The company may make a payment to Deborah to compensate her for the period when she received no interest on the £10,000. Such a payment is not interest, even if it calculated on a time basis, or if it is described in the company accounts as 'interest'. The tax treatment of such a payment will depend on the exact nature of the arrangements between Deborah and the company.

SAIM2050 - Interest: voluntary payments [July 2007]**Voluntary payments are not interest**

Since interest can only accrue by virtue of some right, a voluntary or gratuitous payment cannot be interest, even if it is expressed as in lieu of or 'equivalent to half the interest', as in the case of *Seaham Harbour Company v. Crook* (16 TC 333). J Rowlatt's comment that

"interest or an annual sum which is paid really benevolently each time is merely an allowance, and not taxable at all"

is a reflection of that common-law principle.

Truly voluntary payments are likely to be rare. For instance where compensation is paid, labels such as 'ex gratia' may only mean that the payer settled out of court, or 'without admitting liability'. Such a payment is not voluntary or gratuitous if made in consideration of the claimant giving up the right to take proceedings for the damage suffered. See SAIM2330 for more on compensation or damages generally.

SAIM2060 - Interest: case law [May 2012]**Case law on the meaning of interest**

The definition of interest has been the subject of much judicial interpretation over the years. In *Westminster Bank Ltd v. Riches* (28 TC 159), Lord Wright observed

“...the essence of interest is that it is a payment which becomes due because the creditor has not had his money at the due date. It may be regarded either as representing the profit he might have made if he had had the use of the money, or, conversely the loss he suffered because he had not had that use. The general idea is that he is entitled to compensation for the deprivation.”

The leading case on the meaning of ‘interest of money’ is now *Re Euro Ltd Hotel (Belgravia) Ltd* (51TC293). In that case, Megarry J considered that in general the case-law showed there were two requirements which had to be satisfied for a payment to amount to interest

- there must be a sum of money by reference to which the payment which is said to be interest is to be ascertained - a payment cannot be ‘interest of money’ unless there is the requisite ‘money’ for the payment to be said to be ‘interest of’;
- those sums of money must be due to the person entitled to the alleged interest.

He did not suggest that the two requirements are exhaustive or inescapable but that in the ordinary case they sufficed.

What is interest is a question of substance

What constitutes interest is a question of legal substance, not terminology. In the *Westminster Bank* case Lord Wright said its ‘essential quality...depends on substance not on the mere name’. Lord Simonds, with Lord Porter concurring, said that what needed to be considered was ‘what is its intrinsic character’.

That substantive test was reaffirmed in *Re Euro Hotel (Belgravia) Ltd*, in which by Megarry J said

“It has, quite rightly, not been suggested that the language used by the parties to an instrument in describing payments to be made under it can bind the Inland Revenue, or affect the operation of a statute. The question must always be one of the true nature of the payment.”

The contract in that case was one in which it was provided that one party would ‘pay to the Bank interest’. It was held that what was paid was not ‘interest of money’ despite the wording of the contract quoted above, because the Bank in question had not advanced money as a loan, but instead as out and out non-returnable payments for building works. The ‘interest’ was not ‘interest of money’.

‘Single indivisible sums’

Another important case on the nature of interest is *Chevron Petroleum (UK) v BP Petroleum Development* (57 TC 137). Payments between the companies included ‘an interest factor’ and were calculated in accordance with a complex formula. BP made the payments to Chevron after deducting income tax from the interest factors. The point at issue was whether the payments were true interest. Lord Justice Megarry’s view was that the ‘interest factor’ was, in law, ‘interest of money’ and that because of the substantive nature of the test the Court would, if necessary, dissect lump-sum payments into interest of money and other sums. He said

“If in its nature a sum is ‘interest of money’, I think it retains that nature even if the parties to a contract provide for it to be wrapped up with some other sum and the whole paid in the form of a single indivisible sum. The wrappings may conceal the nature of the contents but they do not alter them. Were the law otherwise, strong contractual wrappings might become remarkably popular.”

19.3 Interest: charge

Section 369(1) ITTOIA imposes the charge on interest:

Income tax is charged on interest.

Section 370 ITTOIA provides:

- (1) Tax is charged under this Chapter on the full amount of the interest arising in the tax year.
- (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

This incorporates the remittance basis for foreign source interest.

19.4 Interest: location of source

I refer to the person paying interest as “**the debtor**” and the recipient as “**the creditor**”.

Foreign source interest is outside the scope of withholding tax and qualifies for the remittance basis, so the question of source matters to both creditor and debtor.

The statute gives virtually no guidance on the location of a source of interest, so one falls back on principle, case law and HMRC guidance.

Principle cannot identify the “right” connecting factor(s) but it can

identify some approaches to the issue as unsatisfactory.

The location needs to be known by the debtor (who may have to deduct tax at source) and creditor (who may be taxable on the interest). This suggests no weight should be given to factors not likely to be known by both parties.

Factors which the parties can manipulate without commercial cost or inconvenience are not suitable (at least from HMRC's viewpoint and one can expect the courts to sympathise).

Debts are frequently assigned, and it is suggested that:

- (1) assignment should not alter the location of the source; and
- (2) facts not likely to be known by an assignee should not affect the location.

Many of the connecting factors may change, and it is possible that the source of interest can change its location. However, it would not be convenient for location of a source to change very often. There are two ways to deal with this:

- (1) to place little or no weight on features which may easily change; or
- (2) to look at the situation at the time the debt arises, and to ignore later changes.

Solution (1) seems preferable.

There are many possible connecting factors. It would not be possible to compile a complete list but the main factors are as follows:

- (1) the debtor:
 - (a) residence of debtor;
 - (b) place of business of debtor;²
- (2) payment of the interest:
 - (a) place where interest is paid;
 - (b) situs of funds out of which interest is paid;³
- (3) contract under which interest is paid:
 - (a) proper law;
 - (b) place where contract would be enforced;
 - (c) place where contract is made;
- (4) situs of debt on which interest is due under IHT/international law principles (ie location of deed if debt is a specialty);

2 Place of incorporation is another conceivable connecting factor but no-one has ever suggested it should be relevant.

3 This is often called the "source" of the payment but it is hopelessly confusing to use the word "source" in that way.

- (5) place where debtor uses the money borrowed (eg to purchase UK/non-UK situate asset);
 - (6) place where money is lent or where credit is provided;
 - (7) situs of security for debt (if any);
 - (8) residence of guarantor (if any);
 - (9) residence of creditor.
- I shall evaluate these factors in order.

19.4.1 *Residence and place of business of debtor*

Residence of the debtor is in principle a satisfactory connecting factor. In the case of dual resident debtors, the place of business connected with the loan would usually act as a suitable tie-breaker.⁴

A difficulty arises if debtors change their residences, which if not common is by no means impossible. This was pointed out in *Philips*.⁵ But a solution might be to ignore subsequent changes of residence. Similarly, if a debtor dies and the liability is that of PRs, the place of residence of the PRs should not affect the source of the interest.

19.4.2 *Payment of the interest (place where interest is paid or situs of funds out of which interest is paid)*

This is not a suitable connecting factor as it can and often will change from year to year. This view is supported by *IRC v Philips' Gloeilampenfabrieken*:

It is not sufficient to ascertain the fund out of which the income was in fact paid, which is no more than the reservoir from which it was drawn. It is not whence it was paid, but why it was paid, that is the determining factor. The emphasis is not upon the receipt, but upon the derivation of the income. Consequently, it does not constitute the source within the

4 See 77.12.1 (Meaning of “residence” and dual resident debtor).

5 See 19.5.3 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR at p.898: “In my opinion, the fallacy in the able argument presented by [counsel for the Commissioner] was exposed when he felt obliged to submit (as indeed he was if he was to be consistent) that if a New Zealand citizen, while in London, found himself in financial difficulties and had to obtain from a London money-lender a loan, which he was able to repay over a period of years only after he had returned to his own country, the London money-lender could be assessed with [New Zealand] income tax ...”

meaning of the section that the money [used to pay the interest] was drawn from or provided by the trading profits in New Zealand. The New Zealand company [the debtor] was free to obtain the funds with which to perform its obligation anywhere it chose, from deposits in England, if it had any, or from borrowing in England, or from the profits of its trading in New Zealand. That was a domestic matter. The money could “come from” any of these “sources”, but none of them would be the source from which the [creditor] derived what it received as income.⁶

In other words, one should not equate the location of the source of the interest with the situs of the *resources* that the debtor uses to pay the interest.⁷

19.4.3 *Contract under which interest is paid: (a) proper law, (b) place where contract would be enforced, (c) place where contract is made*

These are not suitable connecting factors as they are within the control of

⁶ See 19.5.3 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR at p.898.

⁷ For completeness, I should mention *IRC v Broome* 19 TC 667, where the features of the loan were as follows:

- (1) (a) The debtor was (primarily) resident in Kenya (also UK resident, but that does not matter).
- (b) However, the original debtor died. His executors were UK resident.
- (2) The executors [debtors] paid the interest in the UK out of funds in the UK.
- (3) The loan was enforceable in Kenya.
- (4) The creditor was resident in Kenya.

Finley J held:

“There is no doubt at all that if a payment is made by a person here out of a source which is here, then that payment attracts tax. ... I think it was payment out of a source here. The first two payments are perhaps a little more clear, because there the payment was actually made to Earl Kitchener [the creditor] personally in this country. He happened to be here; he was resident abroad, but he happened to be here, and he was actually paid by the executors in London; and equally [the other payments] were made in London, were sent to a bank in London, and were remitted by the bank in London to Kenya to be paid there. In these circumstances I am of opinion that this was a payment made by persons resident in London out of sources in London.”

This passage adopts uncritically the view criticised here that the funds used to pay interest determine the source of interest. It is suggested that no guidance should be taken from *Broome* and it has (rightly) been ignored in all later cases.

the parties.⁸

19.4.4 *Situs of debt: location of deed if debt is a specialty*

For IHT/international law the situs of a specialty debt is the location of the deed.⁹ This is obviously an unsuitable connecting factor. The debtor will not have possession of the deed and may not know its location. The location is easily changeable, and the rule would allow easy tax planning. This view is supported by *Philips*:

If the location of the debt were to be selected as the test, the source would be located differently according as whether the contract was a simple contract or a specialty; and, in the latter case, its location would arbitrarily change with the actual situation of the deed itself. Such a test would, indeed, be far from the practical commonsense test prescribed by the authorities; and I cannot think it proper to apply it here if some other is available.¹⁰

The High Court of Australia rejected the same argument for similar reasons in *Studebaker Corporation of Australasia v Commissioner of Taxation for New South Wales*.¹¹

My view could also obtain support from *Bank of Greece*¹² where although the court did not seriously address the question of the location of a source of interest, its approach was certainly not consistent with the IHT/international law approach.

For a simple debt, the IHT/international law approach takes us back to residence as a connecting factor, which is discussed above.

It is not illogical or inconsistent to say that the situs of a debt for IHT/international law purposes is in one country but the location of the source of interest on that debt for income tax purposes is in another. This is the case for shares, which may be non UK situate for IHT/international

8 Place of enforceability is also unsuitable as a contract may be enforceable in more than one place, or the place of enforceability may be unclear.

The place the contract is made is also unsuitable because the place the contract is made is itself often difficult to identify. See 15.18 (Where is contract made).

9 See 77.13 (Specialty obligation).

10 See 19.5.3 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR at p.898.

11 See 19.5.3 (*IRC v Philips' Gloeilampenfabrieken*).

12 See 19.5.1 (*Bank of Greece*).

law but whose dividends may be UK source (if the company is UK resident.) One might simply say that the two taxes apply different rules. Alternatively, and more subtly, one might say that the source of interest (for IT purposes) is not the debt but the transaction which gives rise to the debt (which may be located in a different place from the location of the debt).¹³ Either way, the IHT/international law situs rule is not the test.

I stress this as the view that the location of the source of interest for IT should be equated with IHT/international law situs of the debt has from time to time found support.¹⁴

For the interest consultation paper proposals, see 19.7.1 (Commentary).

19.4.5 *Purpose for which the loan is made*

This is not such a suitable connecting factor, for it will often not be possible to identify a purpose with any particular location. Also money borrowed for one purpose may later be used for another.

19.4.6 *Place where money is lent (where money is received)*

This is a sensible connecting factor. It may be objected that it allows tax planning where money is lent in one jurisdiction and then immediately transferred to another. But the courts could easily look through transient arrangements of that kind to identify the place where the money is substantially received.

19.4.7 *Situs of security for debt*

A rule that source of interest on a secured debt depends on the location of the property on which the debt is secured is not sensible or workable, for the following reasons:

- (1) A debt may be charged on property in two different countries.
- (2) The rule becomes absurd if a large debt is secured on an asset of a small value. Would one say that a £100 million debt is situated in Jersey if it is secured on property there worth £100,000? Also, one cannot have a rule where the location of interest depends on the relative value of the debt or the security, which may fluctuate from

¹³ *Philips* takes this approach:

¹⁴ See 19.5.2 (*Hafton Properties*); 19.6.1 (HMRC view before 1979).

time to time (though that might be resolved by looking only at the position at the time the debt arises.)

- (3) If land determines the location of interest from of a debt secured on land, then a debt charged on (say) shares should be situate where the shares are situate.

This rule would sometimes allow scope for tax planning.

19.4.8 *Residence of guarantor (if any)*

No weight should be given to the residence of a guarantor, since in the normal course of events a guarantor would not be called on to make any payment.

19.4.9 *Residence of creditor*

No weight should be given to the residence of the creditor, since one is looking for the source and not the destination of the interest; also this may change easily as debts are usually assignable and frequently assigned. A single debt may be owed to two creditors resident in different places, but the interest on that debt cannot have two different sources.

19.4.10 *Unsatisfactory approaches*

The most unsatisfactory approach of all is to say that it is a question of fact.¹⁵ The meaning of “source” is a question of law and so is the question of whether known facts (which will usually be simple) fall within that meaning. It is the task of the courts to provide an answer to that question.

Equally unsatisfactory is to say that the answer is whatever a “practical man would regard as the real source”. The only way in which a man, practical or otherwise, can locate a source of interest (other than tossing a coin) is to apply a theory as to the priority of rival connecting factors.¹⁶

15 Sometimes a “practical hard” matter of fact, the phrase derives from *Nathan v Federal Commissioner of Taxation* [1918] HCA 45; (1918) 25 CLR 183 and is also mentioned in *Rhodesia Metals v CT* [1940] AC 774 at p.789, but the adjectives are meaningless. The point is made discreetly by Lockhart J at first instance in *Spotless* (“... a little opaque...”)

16 See 19.5.3 (*IRC v Philips’ Gloeilampenfabrieken*) [1955] NZLR 868 at p.895–6: “What sort of thing is to be looked for when it is sought to discover a *source of income*? This is a question less simple than it seems at first sight, and its difficulty

The exhortation to adopt a “practical approach” is harmless but not particularly helpful. No-one advocates that the court should adopt an impractical approach. But those who stress this approach should bear in mind that the one thing that a practical man will demand of the law is that it will provide a clear *answer* to the question of where is a source. There is nothing more impractical than uncertainty. What Kurt Lewin said of psychology is also true of tax: there is nothing so practical as a good theory.

It is not satisfactory to say that all the features listed are relevant, and if different features point in different ways, it is a matter of carrying out a balancing exercise. We need guidance on which factor has priority or there is no law on the subject at all. The formulation derives from Commonwealth cases on the source of *trading* income.¹⁷ There it seems more apt as the circumstances in which trading income arises differ very widely indeed. But even in that context experience has shown that it has not worked well, because no consistent pattern has developed as to which factors have the greatest weight.¹⁸ However that may be, the questions of the source of *interest* and the source of *trading* income are entirely different. There is no reason why the test should be the same. The point is made correctly in *Philips*:

The location of the source of profits of a business, for instance furnishes a kind of investigation quite different from that of the source of interest on moneys lent, and decisions on sources of one kind of income may be of little assistance when considering sources of a different kind of income.¹⁹

does not seem to me to be greatly lessened by taking the ‘practical’ approach to it first put forward in *Nathan v Federal Commissioner of Taxation* (1918) 25 CLR 183. ... I am attracted by an approach by which an attempt is made to state lucidly what must be meant by the word ‘source’ in the phrase ‘source of income’ in given circumstances.”

Similarly, though in a different context, *IRC v Pratt* 57 TC 1 at p.52:

“It is very simple to say that something is a question of fact, or mixed fact and law, and leave it at that, but this does not solve anything at all.”

Contrast Keynes’ *dictum* that “practical men who believe themselves exempt from intellectual influence are the slaves of some defunct economist”.

17 *Rhodesia Metals v CT* [1940] AC 774.

18 See 15.5 (Trading income of non-resident).

19 See 19.5.3 (*IRC v Philips’ Gloeilampenfabrieken*) [1955] NZLR 868 at p.896.

19.5 Case law on source of interest

The case law is not easy reading.

19.5.1 *Bank of Greece*

The facts of *Bank of Greece*²⁰ are a little complicated and unusual, and one needs to understand them in order to see clearly what the case is about. The facts are not very fully stated by the House of Lords but further details can be teased out from the various reported cases concerning these much litigated bonds.

The case concerned bearer bonds issued by a Greek bank in 1927. The bonds suffered various changes in the turbulent years which followed. The bonds had the following features (using the numbering of the list in the above paragraph):

- (1) The debtor was non-resident (a Greek bank).
- (2) (a) Payment was to be made in sterling.²¹ Payment was to be made in London or (at the option of the creditor) in Athens, by cheque in London.
(b) Payment would in the ordinary course have ultimately derived from funds situate in Greece.²²
- (3) The bonds were governed by English law and were enforceable in England.²³ (Enforceability was originally recognised in Greece, but that ceased to be the case following a moratorium under Greek law, raising conflict of law issues which twice went to the House of Lords.)
- (7) The debt was originally secured by lands in Greece but these properties were taken over or disappeared following the German occupation of Greece in 1941.²⁴

20 *Westminster Bank Executor and Trustee Company (Channel Islands) v National Bank of Greece* 46 TC 472.

21 For completeness, in 1935 this changed so that Greek residents could only be paid in drachmae: see [1958] AC 509 at p.510 but nothing turned on that.

22 I think this is what Lord Hailsham means in the somewhat convoluted sentence at p.494A.

23 [1958] AC 509.

24 46TC 472 at p.483H.

At p.493H Lord Hailsham says that the debt was secured by lands *and public revenues* in Greece, As far as I can tell from the case reports this seems to be a slip,

(8) The guarantor was non-resident.

It is fairly clear (and all sides accepted) that the interest on the bonds originally had a Greek source. Almost²⁵ all the features of the debt pointed the same way, to Greece. The House of Lords held that the interest had a foreign source in these words:

- [1] the bond itself is a foreign document, and
- [2] the obligations to pay principal and interest to which the bond gives rise were obligations whose source is to be found in this document.

This was adequate for the decision as it related to a point not in dispute. However, the *dictum* is inadequate as a basis for ascertaining the location of a source of interest in other cases. The court did not say how it reached its conclusion: it just described the loan and stated the conclusion.

The conclusion that some have drawn from this case is that all the features listed in the list above were relevant, and if different features point in different ways, it is a matter of carrying out a balancing exercise (how one goes about that is never explained). This is a complete misreading. *Bank of Greece* provides no support for that approach whatsoever. The speech in the case had no need to say anything about the location of source of interest paid by the principal debtor, because that location was not in dispute. The court heard no argument about the principles of identifying the location of the source of interest. The relevant cases were not cited. In my view *Bank of Greece* gives no guidance at all on what is the test for the location of the source of interest. The fragment of the sentence (“the bond is a foreign document”) was merely descriptive of the facts of the case and not intended to lay down a general test for location of a source of interest. If it lays down a test at all, it is imponderable. In a marginal case, how does one decide if a bond is

or perhaps Lord Hailsham was referring to the income of the bank as “public revenues” as the National Bank of Greece was publically owned. Nothing turns on that point but it is important to note that the bonds were bank bonds and not government bonds.

25 The following features in *Bank of Greece* did not cause it to have a UK source:

- (1) payment made in sterling
- (2) English proper law
- (3) interest paid in England.
- (4) Karminski LJ adds that “the loan was raised in London”: 46 TC at p.489.

a foreign document? The test can only be applicable to interest on securities.

The actual dispute in *Bank of Greece* concerned the location of the source of income consisting of guarantee payments. The original borrower, the principal debtor, (the National Mortgage Bank of Greece) had defaulted on the bond and the payments were made by the guarantor.²⁶

It was not completely clear that income in the form of guarantee payments was to be classified as “interest”.²⁷ However if it was not interest it is sensible that location of the source of such income should be determined on principles similar to those which apply to interest, so that makes no difference.

Why was it argued the income had a UK source?

The only circumstances relied on by the Appellants as supporting their contention that the obligation was located inside the UK were as follows.

- [1] Although the original guarantor had no branch in the UK, the present Appellants had acquired one on their universal succession in London.²⁸
- [2] Moreover, it was argued that, since discharge of the obligations under the bond in Greece had been caught by the moratorium enacted by the Greek Government, it followed that the only place at which the obligation of the guarantor could have been discharged or enforced was in London.²⁹

There is some strength in this argument but it did not win the day. These changes did not affect the location of the source of income:

Speaking for myself, I do not see how an obligation originally situated in Greece for the purposes of British income tax could change its location either by reason of the fact that

- [1] one guarantor had been substituted for another, or ...

26 To be precise, the payments were made by a company which had succeeded to the guarantor following an amalgamation, and which was subject to the same obligations as the original guarantor, but that made no difference.

27 Two of the three judges in the CA held that the payments were interest, and in the House of Lords this was said to be “attractive”. But nothing turned on this point.

28 Lord Hailsham means that the guarantors who succeeded to the original guarantor acquired a branch in London on their succession to the original guarantor.

29 46 TC at p.494.

- [2] the second guarantor so substituted subsequently acquired a London place of business, or ...
- [3] the Government of Greece had by retrospective legislation altered by moratorium and substitution of a new guarantor for the purposes of Greek law the obligations imposed upon the principal debtor and the guarantor.

The Appellants acquired no obligation different from that of the original guarantors, and that was the obligation imposed on the original guarantors by the terms of the bonds.³⁰

Bank of Greece is authority for the (sensible) proposition that sources of interest are fixed and do not move with changes of circumstances of the debt.³¹ It is not relevant to any other aspect of the location of a source of interest.

19.5.2 *Hafton Properties*

In *Hafton Properties v McHugh* 59 TC 420 (a decision at Special Commissioner level) the facts were weighted as strongly as possible in favour of a foreign source, except there was a UK resident debtor. Under the original loan agreement, a US company borrowed from a US bank, the loan being secured on US property. Hafton (UK resident) acquired the property subject to the mortgage. It paid interest. This was not UK source:

- [1] In one respect the Greek Bank case is different from this one, in that in that case the debtors (both original and substituted) were at all times essentially Greek in character. Nevertheless I collect from Lord Hailsham's speech a clear disinclination to regard sources of income as being peripatetic. He looked to the nationality (if I may so put it) of the document creating the obligation, and, applying the sentence which I have already read from that speech to the present case, there can be no doubt that the obligation here was American in character.

³⁰ 46 TC at p.494.

³¹ More accurately, the case is authority for the proposition that the changes which occurred in the *Bank of Greece* case did not change the location of the source. It is open to a court to distinguish that from other types of changes. However the changes which occurred there were so fundamental that it is considered that there will be few if any cases where the location of a source of interest will move.

- [2] That is fortified, of course, by the fact that the debt was a mortgage debt. Such a debt is regarded for private international law purposes (at any rate) as a speciality debt, the situs of which is to be found where the mortgage deed is to be found. The mortgage deed is, and so far as I know always has been, in the United States.³²

Point [1] is right. If a change of guarantor does not affect location of a source of interest, neither should a change to the identity of the principal debtor. This point will not often arise because the facts of *Hafton Properties* (purchase of property subject to mortgage) are unusual. A mortgage is usually paid off at the time of the purchase.

A more common situation is that an individual who has borrowed funds later comes to the UK and continues to pay interest. *Hafton* supports the view that (whatever the test for location) the interest does not become UK source merely because the debtor becomes UK resident. Conversely interest does not cease to be UK source just because a debtor becomes non-resident.

Point [2] is therefore *obiter*; it is considered that situs of the debt on IHT/international law principles should not carry much if any weight, for the reasons given above.

19.5.3 *IRC v Philips' Gloeilampenfabrieken*

I have already mentioned *IRC v Philips' Gloeilampenfabrieken* ("*Philips*").³³ This decision of the Court of Appeal of New Zealand considers and cogently rejects various alternative tests of source, including the location of funds used to pay the interest and IHT/international law situs rules. It concludes:

the actual source of this income was the credit made available by way of loan under the agreement made in the Netherlands in the course of the respondent's business in that country. ...the source of the income was the business transaction carried out in the Netherlands...³⁴

... the source is located where the transaction from which the debt took its origin took place...³⁵

32 59 TC 420 at p.426.

33 10 ATD 435 [1955] NZLR 868 accessible www.kessler.co.uk.

34 [1955] NZLR at p. 809, 891.

35 p.898.

This is the place of credit test. It was said to be equivalent to the test of asking where the loan was made.³⁶ A particular attraction of this test is that it is fixed at the time the loan is made and does not change.

Unfortunately this test does not resolve all the issues as one then has to ask where the credit was provided. The answer may not be obvious.

The facts of *Philips* were also slightly complicated and unusual. The debtor (a New Zealand company) owed a trading debt of £80k to the creditor (a Dutch company). The debtor was unable to pay. Rather than leave that debt outstanding:

- (1) the creditor lent £80k to the debtor
- (2) the debtor used the £80k to pay the trading debt
(ie the old debt was paid and a new one came into existence).

The loan agreement was made in Holland and governed by Dutch law. The money was not received in New Zealand though payment of the borrowed money was made in a convoluted way:

- (1) the Dutch company creditor drew a cheque and sent it to the New Zealand company
- (2) the New Zealand company endorsed it and returned it to the Dutch company.

On these facts the credit was not provided in New Zealand, so the source of the interest was not in New Zealand.

The High Court of Australia applied the same test in *Studebaker Corporation of Australasia v Commissioner of Taxation for New South Wales* where the facts were more straightforward: an Australian debtor paid interest on a trade debt arising on the purchase of cars from America. The interest did not have source in Australia.³⁷

The Appeal Division of South Africa applied the same test in *IRC v Lever Bros* where a South African debtor paid interest on a debt arising on the purchase of UK shares from a UK vendor under a UK contract. The

³⁶ p.899.

³⁷ (1921) 29 CLR 225 accessible www.austlii.org at p.233: "The attribution of locality to the obligation to pay interest [the situs of the debt] is not decisive. The facts must be examined, and when we find that the interest arises from business transacted and wholly carried out in America the conclusion must be that it was not derived from any source within new South Wales." Similarly *Commissioner of Taxes v. Dunn and Co* [1918] AD 607, in which interest earned by an English company on advances on open account for the purchase of goods in the UK for despatch to a South African business firm was held to be derived from a source in the UK, where the capital was employed in making the purchases.

interest did not have a source in South Africa.³⁸

The High Court of Singapore has adopted the same test.³⁹

19.5.4 *Hong Kong cases and practice*

In *IRC v Hang Seng Bank* [1990] STC 733 at p.740 the Privy Council state the position quite clearly:

If the profit was earned by ... lending money ... the profit will have arisen in or derived from the place where ... the money was lent ...

In *IRC v Orion Caribbean* [1997] STC 923 at p.930 the same court made (I think) the same point, but more cautiously:

If [a company] lent its own money to a borrower in, say, New York,⁴⁰ then other things being equal there might be little difficulty in saying that the location of the source of the interest on the loan was New York.

Both these cases were trading cases, ie the issue was the source of trading income. Since different principles apply to trades⁴¹ the comments are *obiter*. However, there is much to be said for the *Hang Seng* approach and it represents the generally held view in Hong Kong. The Hong Kong Revenue explain:⁴²

2. Only interest arising in or derived from Hong Kong is liable to profits tax. For many years, the Department has taken the view that for the purpose of determining the place where interest arises or is derived from, it is the location of the originating cause that almost invariably determines the source. In essence, the place of derivation of interest is

38 [1946] AD 441, 14 SATC 1 accessible www.kessler.co.uk.

39 *CH Pte v Comptroller of Income Tax* (1988) 1 MSTC 7022 accessible www.kessler.co.uk. In this case an agreement was made in Malaysia, but (which is considered to be the key fact) the money lent was received in Singapore. (A cheque received outside Singapore but paid into a Singapore account constitutes a receipt in Singapore.)

40 I assume this means that the money was lent (received) in New York.

41 See 19.4.10 (Unsatisfactory approaches).

42 Departmental Interpretation and Practice Notes No. 13 (Revised) Profits Tax: Taxation of Interest Received, December 2004, accessible www.ird.gov.hk/eng/pdf/e_dipn13.pdf.

the place where the credit was provided to the borrower, i.e. *the place where the funds from which the interest is derived were provided to the borrower*, commonly known as the “provision of credit” test. This view is based on the decisions in *IRC v Philips Gloeilampenfabrieken*, and *IRC v Lever Brothers & Unilever*.⁴³

3. If the originating cause is situated in Hong Kong, the source of the interest is in Hong Kong, irrespective of the currency in which the loan is denominated, the place of residence of the debtor or the place where the debtor employs the capital.⁴⁴

19.5.5 *Spotless*

The source of interest was also an issue in *Commissioner of Taxation of*

43 For these two decisions see 19.5.3 (*IRC v Philips' Gloeilampenfabrieken*).

44 Emphasis added. The statement continues with three exceptional cases:

- “[1] Whilst the emphasis is generally placed on the provision of the credit, in some situations, such as mortgages, the originating cause may well be the mortgage itself.
- [2] In addition, interest has a Hong Kong source where it forms an integral part of a trading transaction carried out in Hong Kong, e.g. where a Hong Kong manufacturer sells his goods to an overseas buyer on extended credit terms. In such situations, the interest is just as much a part of the profit as the trading profit itself and also arises in Hong Kong, e.g. BR 20/75, IRBRD, vol. 1, 184 and *Studebaker Corporation of Australasia v C of T*, 29 CLR 225.
- [3] It should also be noted that the ‘provision of credit test’ is not applicable where the loans are not simple loans of money. The Privy Council held in the case of *IRC v Orion Caribbean* 4 HKTC 432 [1997] STC 923 that where the taxpayer earned its profits by borrowing and lending of money, the proper test to determine the source of the profits was the operation test, i.e. “one looks to see what the taxpayer has done to earn the profit in question and where he has done it”. In the case of a money lending business, the taxpayer’s business would normally encompass a broader range of activity, including the borrowing and/or lending of money. For this type of business, the Department will apply the operation test instead of the provision of credit test in determining the source of the interest income.”

Cases [2] and [3] are both trading cases and not governed by the location test for interest.

Whether case [1] should be an exception is more doubtful, though it has a little support from *obiter* in *Philips* at p.898: “Where the debt is a secured one, it is possible that the application of the practical test may, in some cases, make it arguable that the source is where the security is; or where the registry is wherein the mortgage deed is registered...”

the Commonwealth of Australia v Spotless Services.⁴⁵ Here the court took a balancing exercise approach:

52. Where, as in the present case, the transaction is complex in terms of its background, its nature and its execution, and where, as here, important aspects of the transaction have their origin in locations in several different countries, it will usually be difficult to identify the real source of income so generated. To attribute “source” is a matter of judgment, and of assessment, of the relative weight of all of the relevant surrounding circumstances.

However, the place where the money was lent was a major factor in the balancing exercise:

11. In weighing the factors to be taken into account when reaching a conclusion as to the source of the income, his Honour gave considerable weight to the place where the contract was made and where the money was lent. These events, his Honour found, occurred in the Cook Islands. His Honour continued (25 ATR at 361; 93 ATC at 4,411):-

“There are other facts and circumstances that in my view point strongly in the direction of the conclusions that the interest was derived by the taxpayers in the Cook Islands.

[1] The borrower, EPBCL, was incorporated in the Cook Islands and carried on business there. It did not carry on business in Australia.

[2] The deposit was repaid, together with interest, less withholding tax, from the Cook Islands.

[3] It is impossible to ignore the legal effect of the arrangements entered into by the parties with respect to the lending of the money. Until the cheque for \$40m was handed over on 11 December in the Cook Islands (10 December CI time) and the certificate of deposit received in return there was no contract between the lender (the taxpayer) and the borrower (EPBCL). If EPBCL failed to honour the certificate of deposit on the due date the taxpayers could have sued on the certificate and there would have been no answer in law to their right to judgment.”

12. Once the contention that the contract was in reality made in

⁴⁵ I could not find the case on www.austlii.org so have put it on www.kessler.co.uk. The case went on to the High Court of Australia but the source point was discussed only at first instance and in the Court of Appeal.

Australia and that what occurred in the Cook Islands was a mere “formal step designed to screen the reality” is rejected and the banker’s letter of credit issued by Midland is seen for what it was, a security to secure performance by EPBCL of repayment of the loan with interest, and not as an investment in itself, the matters contended for by the Commissioner as matters of practical substance sourcing the interest in Australia are either not factually correct or not sufficient to outweigh the Cook Islands elements.

19.6 HMRC view(s)

19.6.1 *HMRC view before 1979: IHT/international law situs rules*

The IR consultative document *Tax Treatment of Interest paid by Companies to Non-residents*⁴⁶ provides:

In the case of a simple contract debt it is settled law that the source is where the debtor is resident. Before the ending of exchange control, the Revenue was normally able to accept that interest paid abroad in a foreign currency under a specialty contract (ie a contract under seal governed by foreign law) to a non-resident could have a foreign source, even though the payer was a UK resident company.

This (more or less) adopts the IHT/international law situs approach to location of a source, which is wrong on principle⁴⁷ and rejected in every reported case.⁴⁸

This view survives in the Double Taxation Relief Manual:

1730. Interest [February 2006]

There is sometimes some difficulty in deciding whether interest is treated as having a UK source where the borrowing is made by a UK branch. ...

The leading case on this subject is a Privy Council decision on a Hong Kong estate duty matter (*Kwok Chi Leung Karl* [1988] STC 728). The Privy Council decided that where a debtor company has two places of residence where a debt may be enforced, the locality of the debt (and its

46 January 1983 accessible www.kessler.co.uk.

47 See 19.4.4 (Situs of debt: location of deed if debt is a specialty).

48 Apart perhaps from the stray comment of the Special Commissioner in *Hafton* and even there situs is of subsidiary importance: see 19.5.2 (*Hafton Properties*).

source for tax purposes in the absence of statutory provision to the contrary) falls to be determined by reference to the place of residence where under the contract creating the debt the primary obligation is expressed to be performed (that is where the creditor would apply first for his money).

Kwok concerned situs for estate duty, applying IHT/international law rules and is not relevant to the source of interest for IT purposes.

A different practice is recorded in Revenue/Treasury correspondence in 1969. According to the Revenue, interest has a foreign source if:

- (a) the loan contract is made abroad
- (b) the loan contract is governed by foreign law
- (c) the interest is payable abroad, and there is no UK paying agent and
- (d) the loan is not secured on any specific assets or revenue in the UK.⁴⁹

Note that this practice envisages interest paid by a UK resident debtor having a foreign source.

19.6.2 *HMRC view 1979–1993: residence of debtor*

The consultative document continues:

The abolition of exchange control has meant that a transaction in the form of a foreign specialty contract can now take place entirely between UK residents. The Revenue therefore now generally has to regard interest paid by a UK borrower as having a UK source, whatever the nature of the contract ...

This (more or less) equates source with residence of the debtor. The Revenue forthrightly admit that their change of view was made for pragmatic reasons and not by reference to the law. In the circumstances it is not altogether surprising that their view could not be maintained. The consultation paper gives the impression that this practice lasted for 15 years but I doubt if the view was strictly enforced.

There is no support for this view in any of the case law, though in

49 Note by the Inland Revenue to the Working Party on Balance of Payments Aspects of Tax Questions 20 November 1968; Letter DA Walker (HM Treasury) to JE Redman (Inland Revenue) 10 January 1969; both accessible www.kessler.co.uk.

practice a residence test will often lead to the same result as other better established tests.

19.6.3 HMRC view 1993–2008: *balance all factors*

HMRC next changed their position in RI 58 (November 1993):

Schedule D Case III—meaning of “source”

...The current [HMRC] view on the location of the source for interest is based on ... the Greek Bank case. The factors considered relevant in that case (leading to the conclusion that the income involved did not have a UK source) were—

- [1] there was an obligation undertaken by a principal debtor which was a foreign corporation;
- [2] the obligation was guaranteed by another foreign corporation with no place of business in the UK;
- [3] the obligation was secured on lands and public revenues outside the UK;
- [4] funds for payments by the principal debtor of principal or interest to residents outside Greece would have been provided
 - [i] either by a remittance from Greece or
 - [ii] funds remitted by debtors from abroad⁵⁰
 (even though a cheque might be drawn in London).

Although the Greek Bank case was concerned with income which turned out not to have a UK source, inferences can be drawn from that case about the factors which would support the existence of a UK source and [HMRC] regard the most important as—

- [a] the residence of the debtor, that is the place in which the debt will be enforced;
- [b] the source⁵¹ from which interest is paid;
- [c] where the interest is paid; and
- [d] the nature and location of the security for the debt.

If all of these are located in the UK then it is *likely* that the interest will have a UK source.

(Emphasis added)

⁵⁰ I am not sure what is meant by this.

⁵¹ [Author’s Note] I think this means the situs (on IHT/international law principles) of the funds from which the interest is paid. It does not mean the location on IT principles of the source of income out of which the interest is paid (which could of course be different).

This adopted a balance all the factors approach. This is not supported by *Bank of Greece*. *Spotless* does support this approach, but it does not support the selection of these four factors as the most important.

Assuming one does adopt that approach, “likely” was a timid word to use when all four of what HMRC identified as the “most important” connecting factors point the same way. The problem is when different connecting factors point different ways as they frequently do. Here the RI copped out:

It is not possible for [HMRC] to comment individually in advance on the many cases in which the location of the source of interest may be relevant since the precise tax treatment depends on all the factors and on exactly how the transactions are in fact carried out.⁵²

19.6.4 *HMRC view from 2009: balance all factors*

HMRC did not announce a change of view, but from 2008 the SAI Manual takes a slightly different line, and RI 58 is now described as “superseded by SAIM 9090 onwards”.⁵³ I take that to be notice that HMRC have withdrawn from it.⁵⁴

The SAI Manual also adopts a balance all the factors approach but it offers us an expanded selection of eight relevant factors, and an inkling of priority:

52 RI 58 ended with wishful thinking:

“[HMRC] hope that this summary of [their] views will assist practitioners and their clients in determining for themselves where the source of interest with which they may be concerned is located.”

53 See the HMRC online version of Tax Bulletin 9, webarchive.nationalarchives.gov.uk/20101006151632/http://www.hmrc.gov.uk/bulletins/tb9.htm also recorded in Tolley’s Yellow Tax Handbook.

54 However INT Manual still supports RI 58:

342030 UK source [January 2010]

The onus is on the payer to decide whether tax is properly to be deducted having regard to settled case law principles [!] and all the facts surrounding the loan. In particular, the payer should refer to the approach and criteria endorsed by the House of Lords in the *National Bank of Greece* case (46 TC 472). HMRC’s position in that case is outlined in Tax Bulletin 9 of November 1993 [RI 58].

9090. Yearly⁵⁵ interest: UK source: The general rule [July 2011]

Whether or not interest has a UK source depends on all the facts and on exactly how the transactions are carried out. HMRC consider the most important of factor in deciding whether or not interest has a UK source to be

[1] the residence of the debtor and

[2] the location of his/her assets.

Other factors to take into account are

[3] the place of performance of the contract and

[4] the method of payment;

[5] the competent jurisdiction for legal action and

[6] the proper law of contract;

[7] the residence of the guarantor and

[8] the location of the security for the debt.

This list of factors is derived from the leading case on the source of interest, *Westminster Bank Executor and Trustee Company (Channel Islands) v National Bank of Greece SA* (46 TC 472).

In fact *Bank of Greece* provides no support for a balance the factors approach or for this particular selection of eight factors.

HMRC consider the residence of the debtor to be most important because this, along with the location of the debtor's assets, will influence where the creditor will sue for payment of the interest and repayment of the loan.

The SAI Manual then defines "residence":

'Residence' in these circumstances is not the same as tax residence. Residence of the debtor is residence for the purposes of jurisdiction.

It would greatly assist clarity of thinking not to use the word "residence" (which has a specific meaning in tax) to mean something else. I shall reluctantly refer to the concept as "**jurisdiction-residence**" to distinguish it from tax-residence.

What is the test of jurisdiction-residence? In the case of an individual it means tax-residence, and in the case of a company, place of business. The International Tax Handbook provides at para 1103:

55 [Author's note] Although the Manual heading refers to yearly interest, the same rules should apply to short interest.

An important factor in determining the source of interest is the residence of the debtor. ‘Residence’ does not, however, necessarily mean tax residence, rather it means where the [debtor] company has a business presence and can be sued for the debt. If it has more than one such presence then the source will normally be where, under the contract, the company is primarily required to pay the interest and repay the principal. It is, therefore, possible for a UK resident to pay interest which has an overseas source if a borrowing is made and interest is paid by an overseas branch. Likewise it is possible for a UK branch of a non-resident company to pay UK source interest.⁵⁶

The SAI Manual makes the same point for interest paid by companies:

9095. Yearly⁵⁷ interest: UK source: Companies [July 2007]

Interest paid by companies

In deciding whether or not interest has a UK source, in addition to the factors described in SAIM9090, there are other matters to be taken into account for companies.

Companies and branches

Where the debtor is a company it may of course have more than one residence – for example it may be registered in a US state but managed and controlled from the UK.⁵⁸ Jurisdiction in relation to a corporation will in general depend on where the corporation does business (except where the EU Regulation or the 1968 Convention apply – see SAIM9090). So for these purposes it will be resident where it carries on business. If a debtor company has a number of places of residence/business then to decide the location of the debt you have to look at the terms of the loan agreement. The loan agreement should say where the interest and loan are payable, which (if the company is also resident in that place) will determine whether or not the interest has a UK source.

When it comes to considering loans made to a branch of a UK company the source of the interest is overseas if all the following factors apply:

- [1] an overseas branch of a UK resident company has entered into a loan agreement overseas;
- [2] the loan is for the business of the overseas branch;

⁵⁶ This is based on IHT/international law situs principles: see 77.12.1 (Meaning of “residence” and dual resident debtor).

⁵⁷ [Author’s note] Although the Manual heading refers to yearly interest, the same rules should apply to short interest.

⁵⁸ “Residence” is being used here in a non-standard way, but it does not matter.

- [3] the overseas branch pays the interest from its income;
- [4] the loan agreement obligations are enforceable in the jurisdiction in which the branch is situated.

The paragraph does indicate a “safe haven” situation where one can be confident that the interest paid by a UK resident payer does not have a UK source.

The SAI Manual continues:

Conversely, where a branch of a non-UK resident company enters into a loan agreement in the UK for the business of its UK branch and the UK branch pays the interest then the interest is regarded as having a UK source.

19.6.5 *Impact of modern private international law*

The background law (that is, private international law) has moved on considerably since the date of the situs cases which underlie the HMRC view, such as *New York Life Insurance* decided in 1924. Jurisdiction is now largely governed by international conventions, under which it is only very approximately correct to say that residence of the debtor is the test of jurisdiction, (even though in many cases the end result be the same). In short, it is not the case that the residence or place of business of the debtor is the place the debt will be enforced.⁵⁹ Do we continue to apply the historic residence tests? Or do we say interest arises where the debt is enforceable, ignoring the place that the debtor resides?

The author of the SAI Manual is aware of the problem, but does not know the answer:

9090. Yearly interest: UK source: The general rule [July 2011]

Duty to deduct tax from interest with a UK source

EU rules

If the debtor is resident within the EU, the Council Regulation (EC) 44/2001 on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial matters, [“the Judgments

⁵⁹ See 77.12 (Simple contract debt). In *Bank of Greece* the debt was enforceable in the UK but the interest was not UK source.

Regulation”] and the 1968 ‘Brussels Convention’,⁶⁰ may have an impact on the general rule described above.

Different rules apply for individuals, corporations, and trusts.

The usual rule is that where an individual is domiciled in a contracting state, then they should be sued in the courts of that state (Article 2 of the Regulation/Convention).⁶¹ Domicile is defined according to the rules of that contracting state but for these purposes only, it is, in the UK, linked to the individual’s residence. Under these rules an individual is domiciled in England for example if he is resident there and the nature and circumstances of his residence indicate that he has a substantial connection with England.⁶² So an individual resident in England would in general terms only be sued in the courts in that country. However this is a complex area and there are exceptions. For example it may be argued that:

- [1] the case does not fall within the Regulation;
- [2] another convention or international agreement gives jurisdiction to another state’s courts
- [3] proceedings have already begun in another state’s courts; or
- [4] it has been agreed under Article 22 of the Brussels Convention⁶³ that

60 [Author’s footnote] The Judgments Regulation applies in EU Member States. It supersedes the 1968 Brussels Convention except for some territories which fall within the scope of the Convention and which are excluded from the Regulation pursuant to Article 299 of the Treaty (now Article 349 TFEU).

61 [Author’s footnote] Article 2 of the Judgments Regulation 44/2001 provides: “Subject to this Regulation, persons domiciled in a Member State shall, whatever their nationality, be sued in the courts of that Member State.”

62 [Author’s footnote] Article 59 of the Judgments Regulation provides:
“1. In order to determine whether a party is domiciled in the Member State whose courts are seised of a matter, the court shall apply its internal law.

2. If a party is not domiciled in the Member State whose courts are seised of the matter, then, in order to determine whether the party is domiciled in another Member State, the court shall apply the law of that Member State.

In England, s.41(3) Civil Jurisdiction and Judgments Act 1982 provides:

“... an individual is domiciled in a particular part of the UK if and only if—

(a) he is resident in that part; and

(b) the nature and circumstances of his residence indicate that he has a substantial connection with that part.”

63 [Author’s footnote] I think the reference should be Article 23 Council Regulation (EC) No 44/2001 on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial Matters, which provides:

“1. If the parties, one or more of whom is domiciled in a Member State, have

the courts of a particular state have exclusive jurisdiction.

Point [4] is common, as the parties may agree any jurisdiction which suits them. What happens then? HMRC will not say (I expect they do not know):

In any case in which it is argued that a UK resident debtor can be sued in a Member State in precedence to the UK courts please refer the case to CT&VAT (Financial and Insurance Team).

The SAI Manual then turns to consider the impact of the modern law on debts owed by companies:

9095. Yearly interest: UK source: Companies [July 2007]

Interest paid by companies

Companies within the EU

Under both the EU Regulation and 1968 Convention, domicile is the main ground of jurisdiction and will, at first sight, determine the rules for the recoverability of debts. EU regulation 44/2001 provides for a definition of domicile for corporations so that the company is domiciled where it has its statutory seat (in the UK its registered office), central administration or its principal place of business.⁶⁴ However it is important to note that a corporation is not domiciled in a country for these purposes merely because it does business there. If an EU based company carries on business in a country in which it is not domiciled you have to consider the terms of the loan agreement to determine the

agreed that a court or the courts of a Member State are to have jurisdiction to settle any disputes which have arisen or which may arise in connection with a particular legal relationship, that court or those courts shall have jurisdiction..."

64 [Author's footnote] Article 60 Judgments Regulation provides:

"1. For the purposes of this Regulation, a company or other legal person or association of natural or legal persons is domiciled at the place where it has its:

- (a) statutory seat, or
- (b) central administration, or
- (c) principal place of business.

2. For the purposes of the UK and Ireland 'statutory seat' means the registered office or, where there is no such office anywhere, the place of incorporation or, where there is no such place anywhere, the place under the law of which the formation took place."

Thus the Judgments Regulation provides *three* places where a company is domiciled and may be sued. There is no single place where the debt can be enforced which would serve as a test for the location of a source.

situation of the debt. For example, if a company which has its principal place of business in the UK also carries on business in another Member state, where the interest and loan are payable in that other Member state and that member state's courts have jurisdiction then the interest will be non-UK source.

For branches of EU companies the position is as described above for branches generally.⁶⁵

For the reasons given in 77.12.2 (Place-of-debtor rule v. jurisdiction where debt enforced) it is suggested that the better approach is to pay no regard to modern conflicts law in determining the source of interest, even if the place where the debt is enforceable is not the place where the debtor resides.

19.6.6 *Interest from securities*

The RDR Manual provides:

33550 - Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme [July 2010]

... Securities are "foreign" where income (in practice, interest) from them would be relevant foreign income. This will include, for example, a security issued in registered form by a non UK company, which maintains the register of note-holders outside the UK.⁶⁶

The rule that the source of interest on registered bonds of a foreign company is the location of the register seems a sensible rule and is consistent with *Bank of Greece*.

19.7 Source of interest: conclusion

There are two rival solutions to the question of where is the source of

65 [Author's footnote] Article 5(5) Judgments Regulation provides:

"A person domiciled in a Member State may, in another Member State, be sued: ... 5. as regards a dispute arising out of the operations of a branch, agency or other establishment, in the courts for the place in which the branch, agency or other establishment is situated;"

66 The comment is made in relation to the AIS remittance basis, but the point made here relating to the source of interest has a more general application. The text is also found in EN FB 2008.

interest: the place of credit test and the balance all the factors approach.

It is submitted that the courts ought to adopt the place of credit test, ie the source of interest is where the credit is provided, or where money is lent, ie where the money lent is received (the two phrases being understood to come to the same thing). This is consistent with case law, principle, international practice (at least in Hong Kong)⁶⁷ and provides a reasonable element of certainty. The English courts are not bound to follow it, however.

The rival balance of all the factors approach is supported by *Spotless* and (after some dithering) HMRC practice, though it would need at least half a dozen reported cases before one could have much idea of the relevant factors and their relative priority, and in practice it is unlikely that the law would ever be clear. If (contrary to my view) such an approach were adopted, it is suggested that the position should be as follows:

(1) Suppose a debt were wholly non-UK connected but secured on UK land; that is, the UK situate security is the only UK aspect of the debt. For instance, a debt from one non-resident to another non-resident, which arises under a contract governed by a foreign proper law. It is suggested that interest on such a debt has a foreign source. It would be wiser to avoid the issue.

By contrast, suppose a debt was made unsecured (or secured on non-UK assets) and later became secured on UK land. It is considered that this would not turn a non-UK source into a UK source.

(2) Suppose a debt were wholly non-UK connected but paid out of funds derived from UK source income (eg rents of UK land). This cannot be enough to make the interest UK source. The origin of funds used to pay interest is a weak connecting factor. (I would submit it should not be a connecting factor at all.)

(3) Suppose a debt were wholly non-UK connected but had a UK resident debtor. It is suggested that this alone does not give the source of interest a UK location.⁶⁸

67 I would be grateful to readers who could direct me to statements of practice from other common law jurisdictions.

68 *Norfolk and Montagu on the Taxation of Interest and Debt Finance* (looseleaf) para 3.172, points out that s.338(4)(d) ICTA (now repealed) assumed it was possible for a UK resident to pay interest with a non-UK source.

19.7.1 *Commentary*

HMRC rightly say:

The current tests in UK law of whether, for the purposes of deduction of tax, payment of interest is made from a UK source are unclear and cause confusion.⁶⁹

It is surprising that the question of the source of interest has not given rise to more litigation or to clearer principles. The reason may be that HMRC have in practice taken a relaxed view on source (which no doubt encourages taxpayers to take a relaxed view on disclosure). Of course, there is no guarantee that will continue. Also, DTAs sometimes render the point irrelevant.⁷⁰

The test in the OECD Model Treaty is superior to both the place of credit test and the balance all the factors approach.⁷¹ However legislation (with appropriate transitional provisions) would be needed to make this reform. The gap between the existing case law and this solution is too great to be bridged by the courts, except by the Supreme Court. A HMRC consultation document in 2003 proposed this sensible reform but the proposal was quietly dropped. The reason why was never announced. Tax reforms generally have winners and losers. The losers cry louder than the winners, and that is an obstacle for many tax reforms. But it is not clear that this was the case here since it is hard to identify significant classes of “losers”, ie persons who could say with any confidence that they were not taxable under the present law.

The interest consultation paper provides:

4.11 For ‘debts under seal’ or ‘specialty debt’ it is sometimes argued

69 “Income tax: Meaning of UK Source for Payments of Interest and Royalties” Consultation document 10 December 2003, para 1.1. The courts have made the same point in the passage in *Spotless* cited above: “Where ... the transaction is complex in terms of its background, its nature and its execution, and where ... important aspects of the transaction have their origin in locations in several different countries, it will usually be difficult to identify the real source of income so generated.”

70 See 19.12 (Double tax treaty relief).

71 See 19.12.1 (OECD Model). If we adopted the OECD model treaty test one modification might be desirable: that where a debtor changes residence, the source of interest does not change (ie the source is determined and fixed at the time the debt arises.) But that point could be argued both ways.

that case law supports the view that interest paid on such debts does not have a UK source where the loan agreement is physically held outside the UK, and hence that income tax is not required to be deducted at source.

4.12 HMRC does not accept this argument. However, to put the matter beyond doubt, the Government proposes to amend the relevant provisions of Chapter 3 of Part 15 of ITA so that the question of whether or not interest arises in the UK is established without reference to the location of the agreement or deed evidencing the debt.⁷²

The consultation paper omits to point out that HMRC formerly adopted the view which they now reject, as did at least one Special Commissioner's decision. It contains no discussion of the relevant law (beyond a cursory reference to *Bank of Greece*) and does not mention the 2003 consultation. The paper does not consider transitional issues.

The proposal is objectionable because it is unnecessary. The need is for a statutory definition of source, not a statutory non-definition.

19.8 Non-resident's withholding tax

Section 874 ITA provides:

(1) This section applies if a payment of yearly interest arising in the UK is made—

- (a) by a company,
- (b) by a local authority,
- (c) by or on behalf of a partnership of which a company is a member, or
- (d) by any person to another person whose usual place of abode is outside the UK.

(2) The person by or through whom the payment is made must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which it is made.

For interest paid by individuals, trustees and PRs the obligation to withhold arises under s.874(1)(d) when the following conditions are satisfied:

⁷² HMRC, "Possible changes to income tax rules on interest"

http://customs.hmrc.gov.uk/channelsPortalWebApp/downloadFile?contentID=HMCE_PROD1_031986

- (1) A payment of yearly interest.
- (2) The interest arises in the UK.
- (3) The payment is made to a person whose “usual place of abode” is outside the UK. In the following discussion a person whose usual place of abode is outside the UK is described (for brevity) as “**outside the UK**”.

Deduction of interest at source is particularly important as if interest is not deducted, it will often be tax free, because of non-residents IT relief.⁷³

19.8.1 *Collection of tax deducted and interest on late payment of tax*

The rules for the collection of tax deducted are in chapters 15-17 ITA 2007, s.945-964 ITA. I do not address them here, though I hope to do so in a future edition.

INT Manual provides:

542190. Consequences of failing to deduct withholding tax [March 2012]

...

Assessing the unpaid income tax

Chapter 15, Part 15 of Income Tax Act 2007 (formerly Schedule 16 ICTA 1988) provides for returns and collection of income tax in respect of payments falling within Section 946 ITA 2007, which specifically includes payments of yearly interest where a deduction is required under Section 874.

The rules, under Section 951 ITA 2007 are that:

- the income tax on the interest is due on the same date as the return reporting the payment, at the basic rate
- both the return and tax are due within 14 days of the end of the quarter within which the payment of interest was made
- no assessment is required for collection of this tax.

This means that withholding tax, and where applicable, late payment interest, are due and payable even if HMRC does not raise an assessment.

Section 957 ITA 2007 sets out what should happen if it appears that a section 946 payment (which this is) has not been included in a return, and the tax arising on the payment has not been paid:

- (1) This section applies if an officer of Revenue and Customs thinks—
 - (a) that there is a section 946 payment which should have been included

73 See 39.1 (Non-residents IT relief – Introduction).

in a return under this Chapter and which has not been so included, or
(b) that a return under this Chapter is otherwise incorrect.

(2) An officer of Revenue and Customs may make an assessment, to the best of the officer's judgement, on the person who made the return, or who should have made one.

Note that the onus is on the payer to fulfil their obligation, and to rectify the position if they do not.

19.9 To whom is interest paid?

Since the duty to withhold arises on a payment to a person who is not in the UK, it is necessary for non-residents' withholding tax to identify the person to whom the payment is made.⁷⁴

Suppose interest is paid to a transparent (*Baker*-style) interest in possession trust which is not a settlor-interested trust. It is suggested that the interest is paid "to" the trustees (who have a lien). So if the trustees are in the UK but the life tenant is outside the UK the person paying the interest to the trustees need not deduct; but the trustees must do so when they pay the interest to the life tenant. But if the trustees mandate the income to the life tenant, the payer has an obligation to deduct.

Suppose:

- (1) interest is paid to a settlor-interested trust; and
- (2) the trustees are outside the UK and the settlor is in the UK.

At first sight there is no obligation to deduct as the interest is treated as income of the settlor "and of the settlor alone". Following the deeming, the payment should be treated as paid to the settlor. Conversely, if the settlor is outside the UK, there is an obligation to deduct even if the trustees are in the UK. It is suggested that that is the correct view. This is consistent with the position for deposit-takers. HMRC agree. TDSI guidance notes⁷⁵ para 2.3 provide:

[2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to

⁷⁴ Similar issues arise elsewhere: see 15.4 (To whom does trading income arise?). Somewhat different issues arise for deposit-takers withholding tax: see 19.13 (Withholding tax on interest from deposit-takers)

⁷⁵ www.hmrc.gov.uk/tdsi/guidance-notes.pdf. For TDSI (tax deduction scheme for interest) see 19.13 (Withholding tax on interest from deposit-takers).

belong to the settlor⁷⁶ and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.

[3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

But this result is surprising: the payer is expected to know whether the payee is outside the UK, but they cannot be expected to know if the recipient is a settlor-interested trust, and if so, who is the settlor and is the settlor outside the UK.

Section 646(8) ITTOIA provides:

Nothing in sections 624 to 632 is to be read as excluding a charge to tax on the trustees as persons by whom any income is received.

This is not entirely to the point but it illustrates the view that the deeming of s.624 does not apply in all cases.

Suppose:

- (1) interest is paid to a non-resident company within s.720; and
- (2) the transferor is in the UK.

The transferor is taxable under s.720 on income treated as arising to them, but the interest is still the income of the company. So there is an obligation to deduct.

19.10 Usual place of abode

19.10.1 Introduction

The expression “usual place of abode” occurs in the context of withholding tax on rent and copyright royalties, as well as in the context of withholding tax on interest. The meaning in all cases is the same.⁷⁷

The expression is discussed in a variety of HMRC manuals. I set out all relevant passages whether or not the manual has interest specifically in

76 [Author’s footnote] It is assumed that the Stiftung is a settlor-interested trust.

77 This view is adopted by ITA EN para 2648: “The term ‘usual place of abode’ is consciously retained, *because it is a technical term*, distinct from residence” (emphasis added).

mind.

The phrase “settled or usual abode” is often used as an explanation or paraphrase of the concept of residence⁷⁸ so one might think that there is no difference between residence and “usual place of abode”. However in the HMRC view there is a difference, though the concepts overlap. The PI Manual provides:

4800 Overseas landlords [October 2011]

Meaning of “usual place of abode”

“Usual place of abode” is not identical in meaning to residence, or ordinary residence, but a person who is not resident in the UK should normally be treated as having their usual place of abode outside the UK.

Likewise the SAI Manual para 9080:

9080. Yearly interest: ‘place of abode’ of recipient [July 2007]

Meaning of ‘place of abode’

Section 874(1)(d) ITA 2007 requires deduction of tax from a payment to a person “whose usual place of abode is outside the UK”. This phrase is distinguishable from the concept of “residence”...

19.10.2 *Individuals*

The PI Manual provides:

4800 Overseas landlords [October 2011]

a. Individuals have a usual place of abode outside the UK if they usually live outside the UK. You should still regard the term as applying to them even if in a particular year they are resident in the UK for tax purposes, as long as the usual place of abode is outside the UK. (For example the individual may count as resident in the UK in a particular year because of a six months’ visit, [or a visit of a shorter time when he has a place of abode available in the UK].)⁷⁹ Do not treat someone as having their usual place of abode outside the UK if they are only temporarily living outside the UK, say for six months or less.

⁷⁸ See 3.8 (Case law on residence).

⁷⁹ Author’s note: This refers to the supposed “available accommodation rule” which was abolished in 1993. The passage was no doubt written before 1993 and has not been updated since.

The SAI Manual makes the same point more tersely:

9080. Yearly interest: ‘place of abode’ of recipient [July 2007]

An individual’s usual place of abode is outside the UK if he or she usually lives abroad, unless that arrangement is temporary.

This roughly equates “usual place of abode” with ordinary residence.

The former Inspectors Manual made some comments which are not in the current manuals.

19.10.3 *Companies*

The PI Manual continues:

4800 Overseas landlords [October 2011]

b. Companies that have their main office or other place of business outside the UK, and companies incorporated outside the UK, will normally have a usual place of abode outside the UK. However if the company is treated as resident in the UK for tax purposes, do not treat it as having a usual place of abode outside the UK.

The SAI Manual addresses the question of UK branches of non-resident companies:

9080 Yearly interest: ‘place of abode’ of recipient [October 2011]

Companies

A non-UK resident company that has a UK permanent establishment that is within the charge to corporation tax does not have a usual place of abode abroad.⁸⁰

This practice seems surprising, but it favours the taxpayer so it will not be challenged.

80 Accessible www.hmrc.gov.uk/cnr/nrl_guide_notes.pdf. The HMRC guidance notes on the Non-resident Landlords Scheme likewise provides:

“2.5 The UK branch of a non-resident company, where that branch is within the charge to Corporation Tax, does not have a usual place of abode outside the UK for the purposes of the NRL Scheme.”

19.10.4 *Trustees and PRs*

The SAI Manual 9080 provides:

9080 Yearly interest: ‘place of abode’ of recipient [July 2007]
Trustees

Trustees, including personal representatives, have a usual place of abode abroad if each trustee, considered as an individual or a company as the case may be, has a usual place of abode there. So if one trustee does not have a usual place of abode abroad, neither does the trust.⁸¹

This text was probably composed before the statutory residence rules for trustees and PRs. One might have thought that the usual place of abode for trustees and PRs is where they are resident under those rules. But the HMRC practice favours the taxpayer so it will not be challenged. It is also satisfactory for HMRC; as long as one trustee is here, HMRC can collect tax from that trustee and do not need the assistance of a withholding tax.

19.10.5 *Miscellaneous*

The HMRC guidance notes on the Non-resident Landlords Scheme makes further comments which are also relevant to deduction of interest:

Jointly owned property

2.7 Where a property is jointly owned and one or more of the joint owners has a usual place of abode outside the UK, the share of rental income applicable to those joint owners falls within the NRL Scheme. The share applicable to joint owners who do not have a usual place of abode outside the UK does not fall within the Scheme. For husband and wife joint-ownership cases, see para 2.8 below.

Husband and wife joint-ownership cases

2.8 Where a husband and wife jointly own a UK property and both have their usual place of abode outside the UK, the NRL Scheme applies to both spouses and each is treated as a separate landlord in their own right.

81 The PI Manual similarly provides:

“c. Trustees have a usual place of abode outside the UK if all the trustees have a usual place of abode outside the UK.”

If the husband and wife both wish to receive the rental income with no tax deducted they must each complete a separate application form and send it to the Inland Revenue (see Chapter 11 below). In such cases, letting agents and tenants should pay rental income with no tax deducted only to the spouse(s) named on Inland Revenue authorities they hold. Under no circumstances should they pay with no tax deducted to a husband and wife where they hold an authority to do so for only one spouse. But if only one of the spouses has a usual place of abode outside the UK, the NRL Scheme applies only to that spouse's share of the rental income. The rental income belonging to the UK resident spouse is not within the Scheme and no Inland Revenue approval is required to pay the income with no tax deducted.

Members of HM Armed Forces and other Crown Servants

2.9 Members of HM Armed Forces and other Crown Servants, including diplomats, are treated no differently from any other non-resident landlords. So if they receive UK rental income and have a usual place of abode outside the UK (see para 2.3 above) the NRL Scheme applies to them.

2.10 If members of HM Armed Forces and other Crown Servants whose usual place of abode is outside the UK wish to receive rental income with no tax deducted, they should apply to HMIT Public Department 1 or South Wales Area tax office, as appropriate, for approval (see Chapter 11.1 below).

How do letting agents and tenants know whether a landlord has a “usual place of abode” outside the UK?

2.11 A landlord's usual place of abode (see paras 2.3 to 2.6 above) will usually be evident without the need for special enquiries. If it is outside the UK, letting agents or tenants should operate the NRL Scheme. If the usual place of abode is in doubt, letting agents and tenants should get more information from the landlord to satisfy themselves on the point. In particular, PO Box numbers and “care of” addresses alone should *not* be relied on as evidence that the Scheme does not apply. In cases of difficulty letting agents can get advice from the Centre for Non-Residents (see para 1.15 above).

2.12 Where letting agents and tenants have no reason to believe that a landlord has a usual place of abode outside the UK they are not required to make any special enquiries. In these circumstances they do not have to operate the Scheme.⁸²

82 Accessible www.hmrc.gov.uk/cnr/nrl_guide_notes.pdf.

19.10.6 *Commentary*

Do we need a concept of “usual place of abode” in addition to concepts of residence (and until the SRT abolishes it, ordinary residence)? At first sight it seems that the law could be simplified by replacing the reference to usual place of abode with a reference to residence. At present perhaps we need a separate concept: a rule requiring deduction of interest at source on payment to a non-resident or non-ordinarily resident would be difficult to apply because residence and ordinary residence are too vague. For a payer to ascertain the residence of the lender would require searching enquiries and even then the payer would often not know the position. The lender himself may not know. To ascertain the “usual place of abode” may perhaps be a little more practical (though I am not altogether sure about that).

However the SRT will produce a proper definition of “residence” which could and should be adopted here and “place of abode” should be abolished.

19.11 **Exceptions to obligation to deduct**

Sections 875–888 ITA set out 14 exceptions to the duty to deduct. In outline:

Section	Exemption
875	Interest paid by building societies
876	Interest paid by deposit-takers
877	UK public revenue dividends
878	Interest paid by banks
879	Interest paid on advances from banks*
880	Interest paid on advances from building societies
881	National Savings Bank interest
882	Quoted Eurobond interest
883	Interest on loan to buy life annuity
884	Relevant foreign income*
885	Authorised persons dealing in financial instruments
886	Interest paid by recognised clearing houses etc
887	Industrial and provident society payments
888	Statutory interest

The exceptions relevant to the themes of this book are marked * and

considered in more detail below.

19.11.1 *Foreign source interest*

Section 884(1) ITA provides:

The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest which is chargeable to income tax as relevant foreign income.

This is otiose, as the obligation applies only to interest arising in the UK. The SAI Manual correctly states:

9090 Yearly interest: UK source: The general rule [July 2011]

The obligation to deduct tax from interest that has a UK source is imposed by Chapter 3 of Part 15 ITA 2007 ... Section 874 ITA 2007 specifies that the interest must be “yearly interest arising in the UK”. Section 884 ITA 2007 makes it clear that this excludes “relevant foreign income”, that is, income arising outside the UK (see SAIM1130).

So whether or not tax should be deducted from interest paid on an overseas loan depends on the source of the interest. If the interest has a UK source tax must be deducted, if it does not then tax should not be deducted.

19.11.2 *Interest paid to UK bank*

Section 879(1) ITA provides:

The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on an advance from a bank if, at the time when the payment is made, the person beneficially entitled to the interest is within the charge to corporation tax as respects the interest [or is a bank that would be within the charge to corporation tax as respects the interest apart from section 18A of CTA 2009].⁸³

83 For completeness, s.879 continues:

“(2) Section 991 (meaning of ‘bank’) applies for the purposes of this section.

(3) Subsection (1) applies to the European Investment Bank as if the words from ‘if’ to the end were omitted.

(4) An order under subsection (2)(e) of section 991 designating an international organisation as a bank may provide that subsection (1) applies to the organisation

This would apply on payment of interest to a UK branch of a non-resident bank, though it may be that such companies do not have their usual place of abode abroad.

19.11.3 *Short interest*

Tax law distinguishes between:

- (1) “yearly” or “annual” interest (the terms are synonymous); and
- (2) other interest (known as “short” interest).

The duty to deduct tax does not apply to short interest. The SAI Manual explains the distinction:

9075. Yearly interest: Case law on short and yearly interest [January 2009]
When is interest “short” or “yearly”?

Although tax law has made a distinction between yearly and short interest since 1806, there is no statutory definition of yearly interest. The distinction rests wholly on case law.

The classic example of short interest is interest payable on a bank loan for less than a year. In the early case of *Goslings and Sharpe v Blake* (2 TC 450), the Court of Appeal confirmed that interest on such a loan, where there was no provision to extend the borrowing for more than a year, could not be yearly interest, notwithstanding the use of an annual percentage rate.

It is therefore a useful starting point to say that where a loan or debt is for less than a year, there is a presumption that it gives rise to short interest. Conversely, interest on a loan or debt that exists for more than a year is likely to be yearly interest.

But you cannot just apply this as a mechanical rule, with the benefit of hindsight. Particular difficulties may occur where, at the time when a loan or debt comes into existence, it is not clear how long it is going to last.

For example, the case of *Bebb v Bunny* (1854) 1 K&J 216 concerned the payment into court of the purchase price of a property, with interest on the delayed payment. It would have been possible for the interest to have run for more than a year if the purchaser had been particularly late in paying. The judge held that the interest was yearly. On the other hand, the Court of Appeal held, in *Gateshead Corporation v Lumsden* [1914] 2 KB 883, that certain interest which had run for more than a year was nevertheless short interest. The interest in question was statutory interest due to Gateshead Corporation on late-paid contributions towards the cost of making up roads. The court took the view that the mere failure by the Corporation to enforce the debt within a year did not make the interest “yearly interest”.

To distinguish interest arising on long-term loans from that arising on apparently short-term debts, the courts began to lay stress on the debt having “a measure of

permanence” or being “in the nature of an investment” as opposed to being merely “temporary accommodation”. Thus in *Corinthian Securities v Cato* (46 TC 93) the Court of Appeal decided that interest on a bank loan, repayable on demand, was yearly interest because the loan had the quality of investment – even though, in the event, the loan was called in after 6 months.

However, the leading case on yearly interest is now considered to be *Cairns v MacDiarmid* (56 TC 556). In this case, the Court of Appeal saw the intention of the parties as the determining factor. If the debtor and creditor intend that the debt should subsist for more than a year, or where there is mutual acceptance that the interest may have to be paid from year to year, the interest will be yearly. This principle was applied in *Minsham Properties v Price* (63 TC 570), where a loan from a parent company, repayable on demand, gave rise to yearly interest because it was regarded by both parties as permanent finance.

It was felt in *Cairns v MacDiarmid* that merely asking whether a loan had the character of an investment was a less useful test – even an overnight deposit of money might be regarded as an “investment”.

9076. Practical application [January 2009]

Applying case law principles

It is always a question of fact whether, in any particular case, interest is yearly or short. The intention of the parties will be the most important factor in deciding the question (see SAIM9075).

The question of whether interest is short interest, from which the payer has no obligation to deduct tax, is most likely to arise in the context of payments made by a UK resident to a person whose usual place of abode is outside the UK. If the interest is short, there is no need for the recipient to apply under a relevant Double Taxation Agreement to receive the interest gross (or with tax withheld at a reduced rate). There is guidance at INTM505010 onwards.

A UK resident may make a series of loans, each of less than a year, to a non-resident, and claim that the interest is short. HMRC staff should refer to the guidance at INTM542010 in such cases.

Uncertainty may also arise as to whether there is a duty to deduct tax from interest in circumstances comparable to that in *Bebb v Bunny* (SAIM9075) – where a sum of money remains outstanding for a period that may, or may not, be longer than a year. For example, a manufacturer might guarantee to refund the purchase price, with interest from the date of claim, if a product proves faulty: such claims may normally be processed speedily but, in disputed cases, may drag on for over a year.

Where the parties intend at the outset that monies due will not be left outstanding longer than 12 months, the interest will be short – even if, in a few cases, there are delays which prolong the period over which interest accrues. If however the parties anticipate at the beginning that the debt will exist for more than a year, or appear to be indifferent as to whether it will or not, the interest is likely to be yearly.

Where the payer of the interest is uncertain about whether it is short or yearly, they may in practice “play safe” by deducting tax. If the recipient of such interest objects to the tax deduction, HMRC staff should advise him or her to take up the matter with the payer, see SAIM9180.

If, conversely, the payer decides that interest is short and pays it gross, HMRC staff should not challenge that view unless

- the decision appears to be completely unjustified on the facts and in the light of relevant case law, or there is reason to suspect a definite intention of avoiding the payment of withholding tax; and
- material sums of tax are at risk.

Overdraft interest is usually short interest.

The INT Manual formerly provided:

542010. Provisions of Section [s.874 ITA] [March 2007]

In some circumstances, an overseas lender may seek to circumvent the provisions of [what is now s.874 ITA] by advancing a series of short-term consecutive loans, each for a period of less than one year. It may then be argued that the interest is not annual interest but short interest, to which the provisions of [s.874 ITA] do not apply. This argument is open to challenge unless the UK borrower can show that there was no need for long term funding or that alternative sources of funding were readily available to replace that which was argued to be short term.

Where Inspectors meet a situation in which a long-term funding requirement is being met via a series of short-term loans, they should refer for advice to CT & VAT, Business Profits & Relief.

This was deleted when the manual was rewritten in March 2011. Perhaps HMRC now accept these arrangements. Challenge would be harder if the short-term loans are each from separate lenders.

The interest consultation paper proposes to extend the deduction at source rules to short interest (and so to abolish the yearly/short interest distinction):

4.4 The distinction between yearly (or ‘annual’) interest, and interest that is not yearly (usually referred to as ‘short’ interest), goes back to the origins of the income tax system. There is a substantial body of case law on what constitutes yearly interest. HMRC’s Savings and Investment Manual has more details on this.

4.5 This case law is not always straightforward in its application to the facts of a particular case. Whether or not interest is ‘yearly interest’ is not simply determined by the duration of the loan. More recent cases emphasise the importance of the intentions of the parties when making the arrangement under which the interest is paid. However, these intentions are not always easy to determine, for example in cases where

interest is paid under a statutory obligation.

4.6 It is often observed that the concept of yearly interest is now somewhat archaic⁸⁴ and of relevance only to the question of whether tax should be deducted at source. There is no distinction between yearly and short interest for the purposes of the TDSI scheme under which most bank and building society interest is paid.

4.7 In view of this, views are invited on the removal of references to 'yearly' interest throughout Chapter 3 of Part 15 ITA so that deduction of income tax would be required in all cases where interest is not otherwise covered by the rules in Part 15 of ITA. Such a changes would eliminate the need for payers of interest to consider whether it amounts to 'yearly interest' and would remove the cliff edge that may lead to contractual terms being inserted into a loan agreement merely in order avoid it being treated as 'yearly'.⁸⁵

The paper did not consider the need for the rule, or whether any modification of the rule would be better suited for its purpose. It is in fact a form of *de minimis* rule and as such serves an important purpose. The paper also did not consider international practice. Do other countries require deduction at source for interest on transient or short term loans?

19.11.4 *Discounts and premiums*

The duty to deduct tax does not apply to:

- (1) profits on discounts (which are normally treated as interest but which are expressly taken out of the duty to deduct);
- (2) premiums even though premiums may be charged to income tax.

SAI Manual rightly provides:

3070 Taxation: Profit on disposal

Deduction of tax

Discounts or premiums payable on the redemption of relevant

84 The author does not give any reference to support this; I have not been able to trace any instance where the distinction has been described as archaic, nor can I see any reason why it should be.

85 HMRC, "Possible changes to income tax rules on interest"
http://customs.hmrc.gov.uk/channelsPortalWebApp/downloadFile?contentID=HMCE_PROD1_031986

discounted securities⁸⁶ are not payments of interest. Consequently the payments are made without deduction of tax.

However, the distinction between interest and premiums can be fraught.

19.12 Double tax treaty relief

19.12.1 OECD Model

Article 11 OECD Model provides:

1. Interest⁸⁷ arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in that other State.
2. However, such interest may also be taxed in the Contracting State in which it arises and according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest. The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this limitation.

Article 11(4) and (6) provides the usual exceptions for where the interest arises through a permanent establishment and for special relationships.

Article 11(5) defines source:

Interest shall be deemed to arise in a Contracting State when the payer is a resident of that State. Where, however, the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent

86 Discounts and premiums on securities which are not “relevant discounted securities” are also not “interest”.

87 Defined article 11(3): “The term “interest” as used in this Article means income from debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in the debtor’s profits, and in particular, income from government securities and income from bonds or debentures, including premiums and prizes attaching to such securities, bonds or debentures. Penalty charges for late payment shall not be regarded as interest for the purpose of this Article.”

establishment is situated.

19.12.2 *Which treaties provide full relief?*

The OECD Model Convention does not provide exemption but only a partial relief. However about one third of UK DTAs provide full relief, including France, Ireland, Luxembourg, Switzerland and USA.⁸⁸ HMRC publish a convenient digest of DTAs.⁸⁹

The Jersey, Guernsey and Isle of Man DTAs do not provide exemption for interest. They do however provide an exemption for industrial or commercial profits. The treaties are in similar form based on the colonial model, so I take the Jersey DTA as an example. Art 3(2) Jersey DTA provides:

The industrial or commercial profits of a Jersey enterprise shall not be subject to UK tax unless the enterprise is engaged in trade or business in the UK through a permanent establishment situated therein. If it is so engaged, tax may be imposed on those profits by the UK, but only on so much of them as is attributable to that permanent establishment.

This confers relief on interest, provided:

- (1) The recipient is a Jersey enterprise, defined as “an industrial or commercial enterprise or undertaking carried on by a resident of Jersey”⁹⁰ (eg a Jersey bank).
- (2) The recipient is not engaged in trade or business in the UK through a PE in the UK (or if it is so engaged, the interest is not profits attributable to that PE).
- (3) The interest is or is part of the “industrial or commercial profits”.

A person who makes a simple loan by way of investment does not carry on an industrial or commercial enterprise, and interest on such a loan does not constitute industrial or commercial profits. However a business (such as a bank) which includes lending does constitute an industrial or commercial enterprise and the interest is part of its profits.⁹¹ HMRC

⁸⁸ UK/France Art.11; UK/Ireland DTA Art.12; UK/Luxembourg DTA Art.11; UK/Switzerland DTA Art.11; UK/USA DTA Art. 11.

⁸⁹ www.hmrc.gov.uk/cnr/dtdigest.pdf.

⁹⁰ Jersey/UK DTA art.2(1)(h).

⁹¹ The issue was discussed in more detail in the 6th edition of this work, but the Manual passages cited makes this academic.

agree. The International Manual provides:

355225. Industrial or commercial profits paragraph [June 2011]

Para 3 provides for the relief from UK tax of “the industrial or commercial profits of a Jersey enterprise”.

In practical terms, this means that we can allow relief on UK interest paid to a bona fide bank in Jersey, since it can be held that interest represents part of the bank’s profits as defined by para 3.

So if you get a claim from a bank in Jersey you will need to;

- be certain that it is a recognised bank – the Banker’s Almanac will help you here⁹²
- consider if you should have the loan agreement reviewed by the inspector of taxes who deals with the accounts of the UK borrower – the guidance at INTM342010 will help you here

If these checks are satisfactory, you can allow **full** relief.

But if you receive a claim from a Jersey enterprise in respect of any other category of income, please refer to Technical Advice Group before taking any action.

The International Manual provides:

337310. Background to claims by foreign financial concerns [December 2011]

Under a long-standing practice approved by the Board a claim by an overseas financial concern for interest which bears the character of income arising from their trading activities or forms part of their trading income may be relieved under the Business Profits Article (provided the Business Profits Article doesn’t clearly exclude interest for example Kenya) in either of the following circumstances

- there is no interest article, or
- the conditions of the interest article are not satisfied.

337320. Claims by Channel Islands and Isle of Man Banks [March 2007]

HMRC is authorised to consider claims and applications for relief at source by banks in the Channel Islands and the Isle of Man in respect of interest under paragraph 3(2) of the Double Taxation Arrangements with those countries. The basis for this is that the interest forms part of the ‘industrial and commercial profits’ of the banks.

Relief in respect of interest is available only to a bona fide bank. If you

92 [Author’s footnote]: see www.bankersalmanac.com.

receive a claim or correspondence about relief under paragraph 3(2) from any other concern in the Channel Islands or Isle of Man you should refer the case to Specialist Personal Tax, PT International Advisory.

337330. How to deal with claims from foreign financial concerns [December 2011]

If you receive a claim or correspondence for income which can be considered under the Business Profits Article as outlined in INTM337310 you should deal with it as follows:

Where there is no interest article in the relevant Double Taxation Agreement (DTA) and the claimant is not trading in the UK through a permanent establishment, exemption may be authorised under the business profits article on form 241(Int-Roys).

Where in such circumstances the claimant is trading in the UK through a permanent establishment, necessitating restriction of relief under that article, and in cases where there is an interest article but claims under it are automatically restricted because the claimant is trading in the UK through a permanent establishment, you will need to consult the Inspector dealing with the permanent establishment and arrange for any interest attributable to the permanent establishment to be included in his computation of liability. Form 502 should be used for this purpose. Provided the Inspector has no objections the interest can then be exempted under the business profits article using form 241(Int-Roys). You should issue form 501 (amended as necessary) with the Inspector's copy of the exemption notice where relief is authorised under the business profits article and there is trading in the UK through a permanent establishment. Where there is no trading through a permanent establishment you need to send a memo with the exemption notice explaining the circumstances in which relief has been authorised.

Note: These provisions do not apply where the rate of relief under the business profits article is more favourable than under the interest article and relief is available under the latter.

337340. Requests to extend the provisions to other income [December 2011]

If the claimant asks you to extend the concession to dividends or other distributions you should ask the HMRC office for the permanent establishment (PE) to confirm that

- the payments represent trading income; and
- they are not attributable to the PE.

The reason for doing this is because dividends/distributions, unlike interest and royalties, cannot be brought into the charge to corporation tax on the PE (Section 19 CTA 2009).

19.12.3 *Relief from withholding tax when DTA relief applies*

Regulation 2(1) Double Taxation Relief (Taxes on Income) (General) Regulations 1970 provides:

The following provisions of these Regulations shall have effect where, under arrangements having effect under section 497 ICTA 1970 [now s.2 TIOPA], persons resident in the territory with the government of which the arrangements are made are entitled to exemption or partial relief from UK income tax in respect of any income from which deduction of tax is authorised or required by the Income Tax Acts.

This applies where interest qualifies for relief under a DTA. Regulation 2(2) provides the exemption from withholding tax:

Any person who pays any such income (referred to in these Regulations as “the UK payer”) to a person in the said territory who is beneficially entitled to the income (such person being referred to in these Regulations as “the non-resident”) may be directed by a notice in writing given by or on behalf of the Board that in paying any such income specified in the notice to the non-resident he shall—

- (a) not deduct tax, or
- (b) not deduct tax at a higher rate than is specified in the notice, or
- (c) deduct tax at a rate specified in the notice instead of at the lower⁹³ or basic rate otherwise appropriate;

and where such notice is given, any income to which the notice refers, being income for a year for which the arrangements have effect, which the UK payer pays after the date of the notice to the non-resident named therein shall, subject to the following provisions of these regulations, be paid as directed in the notice...

19.12.4 *Procedure for claiming relief*

For the procedure see RI 79, Tax Bulletin 41, and the HMRC booklet “Double Taxation Relief Provisional Treaty Relief Scheme”.

The application forms are available online.⁹⁴

⁹³ The rate “otherwise appropriate” is always the basic rate, never the lower rate; the drafter has failed to amend the wording of the regulation to keep up with the changes to the rates of tax in 2008. But no harm arises from this error.

⁹⁴ Accessible www.hmrc.gov.uk/cnr/app_dtt.htm#5.

The International Manual provides:

542200. The interaction between UK taxing rights and double taxation agreements [March 2012]

Where UK-source interest is paid to a person taxable in another state, the same income might be taxable both in the source state (the UK) and in the recipient's country. If the person being subjected to double taxation (the recipient of the interest) makes a certified application to HMRC's treaty team, fulfilling the relevant requirements, the double taxation can be reduced or eliminated so far as the relevant double taxation agreement (DTA) and domestic legislation allows. This is effected by the source state yielding some or all of its taxing rights.

Chapter 1 of Part 2 of TIOPA 2010 (formerly Section 788 ICTA 1988) gives effect to the arrangements contained in DTAs, since domestic legislation is necessary to either remove or reduce the requirement to deduct tax in Section 874 ITA 2007, or to give entitlement to repayment of tax previously deducted.

To obtain treaty benefits, the lender must demonstrate eligibility, in which case HMRC will give up its prospective taxing rights and issue a notice under SI 1970/488 directing the borrower to begin paying the interest on the loan in question in accordance with the DTA.

19.12.5 *Relief when borrower is a partnership*

HMRC say:

In deciding whether or not HMRC Residency should exercise its discretion in meeting an application for relief at source [ie an application to pay interest without deduction], it must primarily have regard to the risk that the underlying conditions for relief might change over the lifetime of a Direction (which will normally last no longer than five years). Such changes might remove the basis for relief altogether, or in some other way prejudice the amount of tax that the UK is otherwise properly entitled to receive in that period.

Given its duty of care to the UK Exchequer and taxpayer, HMRC Residency have to give particular consideration to the desirability of giving DT treaty relief where transparent concerns such as partnerships and LLCs are concerned. This is because, more often than not, there is a much higher risk that the beneficial owners of such concerns will change. Or that there will be fluctuations in income or profit apportionment that might erode the amount of UK-source income that is attributable to the DT treaty-resident beneficial owners who were identified at the time the application for relief at source was made.

Attention is drawn to the undertaking sought from claimants in the Declaration (Part F of the US/Company 2002) that they will notify HMRC Residency of any changes in the information given on the form. (A similar warning to notify any

material changes is given to a UK payer when a Direction is issued to it.) Without calling into question the good faith of partnership or LLC claimants who give these undertakings, HMRC Residency considers that the problem of monitoring this aspect is particularly acute where there are a very large number of investors, or there is an unfeasible number of layers of participation - partners who are themselves partnerships, which contain yet more transparent partners. For these reasons, although HMRC Residency is willing to entertain any application for relief at source from partnerships or LLCs, it should be understood that it is likely to give relief in this way chiefly where:

- * HMRC Residency are able to accept satisfactory assurances about the monitoring and notification of membership from the claimant concern.
- * The number and type of the concern's membership is not a problem in the first place - for example, a small and fixed number of participators, such as US corporations engaged in a joint venture. Or where the concern is the business arm of a small number of joint intellectual property owners such as a band or similar collaborative venture.
- * In response to a successful representation of special considerations or factors that would allow us to decide that relief may safely be given in this form.

Each case will be considered on its merits.

Otherwise, HMRC Residency will consider giving relief only by meeting discrete repayment claims.⁹⁵

Although this comment is made in relation to the USA DTA, it should apply to partnerships generally. On the other hand, it applies only to American LLCs (which are treated as transparent under the US DTA).

If interest is paid before a notice of non-deduction is obtained, tax deducted at source can be reclaimed by the creditor. If the loan agreement provided for grossing up where tax is deducted at source, the creditor may compensate the debtor for over-payment).

19.12.6 *Relief when borrower is outside the UK*

HMRC Residency Double Taxation Guidance Note 1 deals with applications for relief at source on interest payments where the borrower is outside the UK:

This Guidance Note explains how HM Revenue & Customs (HMRC) Residency Nottingham handles applications for relief at source from UK income tax under a double taxation treaty in respect of interest payments where both lender and borrower are outside the UK.

⁹⁵ "HMRC Residency Double Taxation Guidance Note 3 partnerships and LLCs claiming relief under the 2002 UK/USA DTC."

[After some general comments on the law the note continues]

In its consideration of an application for relief at source in such circumstances, HMRC Residency must be satisfied that all the elements necessary to give relief are present. In the circumstance where the payer of the interest is not situated in the UK, HMRC Residency will need satisfactory evidence that the payer has concluded that the payments are to be considered as UK-source and has formed the intention of deducting and accounting for tax accordingly.

HMRC Residency's claim forms ask claimants to attach copies of relevant loan documentation as part of the normal process. In cases such as those discussed in the previous paragraph, HMRC Residency would also ask claimants to enclose supporting evidence confirming the payers' intentions. This could, for example, be copies of pertinent correspondence with the borrower or other relevant documentation.

Without the comfort afforded by such supporting documentation, HMRC Residency may well take the view that it should not exercise its discretion under SI 1970/488 to authorise relief at source.

However, it would then be open to the non-resident payee to make a repayment claim to HMRC Residency once the interest payments have commenced and tax has been deducted. HMRC Residency will be prepared to keep the application for relief at source open and on file pending this eventuality. If the non-resident payee is then able to forward a certificate of tax deducted completed by the payer, HMRC Residency may then be able to accept that the UK source categorisation of the payments has been established. Assuming that all the other conditions for Double Taxation treaty relief are present, HMRC Residency should then be in a better position both to repay the tax deducted and consider in a more positive light the appropriateness of issuing a Direction under SI 1970/488 for future payments.

This is quite the most absurd procedure which could possibly be imagined, for in many cases the payor will want to argue that the interest is not UK source but (since one can rarely⁹⁶ be sure) will want a direction to pay gross as a safeguard. Perhaps no-one takes any notice of it in practice.

96 The guidance note states complacently that "The meaning of UK-source in this context will not normally give rise to difficulties." The author has not read the HMRC consultation paper on interest:

"The current tests in UK law of whether ... payment of interest is made from a UK source are unclear and cause confusion."

See 19.7.1 (Commentary)

19.12.7 Interest paid before HMRC notice to pay gross

The INT Manual provides:

542190. Consequences of failing to deduct withholding tax [March 2012]

...

An application by the overseas lender under a DTA or under the EU Interest & Royalties Directive (INTM400000), is likely to be made up of two elements, depending largely on how promptly the claim follows the making of the loan. These are:

- A clearance application - for Section 874 no longer to apply (or only to apply to a lower rate of withholding specified in the relevant tax treaty) to a specific loan. If the application is successful, the payer will receive a notice issued under SI488/1970 advising them that they may henceforth, for a specified period, pay interest gross or at the lower rate on the income named in the notice;
- A repayment claim - for the lender to have paid to them tax which the payer of the interest has accounted for to HMRC in compliance with their Section 874 obligation, prior to the notice being issued.

Forms available on the HMRC website cater for both aspects on a single form.

It is vital to understand that until the payer receives a clearance notice directing them to do otherwise, the payer must continue to withhold and account for the income tax on interest payments made to an overseas lender. The UK payer is not entitled to anticipate either the lender making an application or the outcome of them doing so. It is immaterial whether the lender is a fellow group company to the borrower, or a vast European lending institution for which the borrower is just another customer.

If the payer fails to observe the obligation to withhold and pay, or only does so late, HMRC can assess and recover the tax, and charge late payment interest under Section 87 TMA 1970 on the outstanding income tax, running from the tax due date to the date of payment. See INTM542200 for what may happen in circumstances where a valid clearance/repayment claim is received.

Grossing up clauses

“Grossing up clauses” appear in loan agreements, requiring borrowers to pay over interest without withholding income tax, irrespective of the clearance position, so that domestic withholding obligations are at the expense of the borrower and the lender gets 100% of their interest. From a loan relationships point of view HMRC accepts that any additional

amount paid under a grossing up clause is a loan relationship expense, but it is not interest. If the borrower received the grossing up amount back from the lender, possible after the lender had made a successful treaty claim, the repayment would be treated as a loan relationship credit..

If £100 of interest is paid over, representing the full amount of interest due, the withholding tax is £20, assuming the rate to be 20%. The payment itself should not “grossed up” to £125 and the tax is not £25. The existence of a grossing-up clause is not an excuse not to withhold income tax.

The International Manual provides:

542200. The interaction between UK taxing rights and double taxation agreements [March 2012]

... If clearance is obtained early in the term of the loan, before any interest payments have been made, then all the interest accruing on the loan (up to the expiry of the treaty clearance if applicable) can be paid without deduction, or subject to a lower rate of income tax, depending on the DTA. However, a problem arises when the benefits set out in the DTA have not yet been obtained and the company paying the yearly interest does so - for whatever reason - without withholding and accounting for the income tax.

Although it is recognised that once treaty clearance has been granted (following a successful certified DTA application), income tax will either no longer be withheld or may be withheld at a lower rate, it must also be recognised that clearance applies only to arm’s length interest payments made after the clearance is granted. The obligation to deduct income tax from yearly interest paid prior to clearance will not have been removed, and therefore remains enforceable. For payments of interest made before clearance is notified, double taxation is relieved by the lender making a claim for repayment of the income tax withheld. Forms available on the HMRC website allow repayment claims to be made at the same time as the certified application for treaty benefits, although the repayment relief can only go back 5 years after the 31st January next following the year of assessment to which it relates (Section 43(1) TMA 1970).

Section 87 TMA 1970 - late payment interest

In addition to the unpaid income tax remaining due and payable on payments of yearly interest not covered by a treaty clearance notice, late payment interest will accrue under Section 87 TMA 1970 on any unpaid tax, from the due date (normally 14 days after the quarter in which the

yearly interest was paid) until payment. It will accrue whether or not the income tax has been assessed, and while any income tax paid can be repaid if it is subject to a valid repayment claim from the lender, there is no relief or discharge from the Section 87 TMA 1970 interest charge on the payer.

The Section 87 TMA 1970 late payment interest charge is both mechanical and neutral, and accrues at the same rate irrespective of the reason for late payment. While it is not a penalty (though penalties are available for failure to make a return under Part X of TMA70), it stands to reason that if the loan is large, and the tax is outstanding for a long time, the interest charge will be correspondingly greater than in other circumstances.

This is the position for pre-clearance interest payments made gross, even after a DTA clearance application has been made, and clearance granted. While the UK may give up its taxing rights, HMRC does not give up its right to recompense for the late payment of the income tax from the time when it was due. UK taxing rights do not simply disappear following a DTA clearance application, taking with them all associated obligations. HMRC surrenders primary taxing rights to the tax authority of the claimant's country of residence, but retains the power to assess income tax which has not been accounted for and which has not been paid under a notice giving permission to pay gross. Interest payments made before the date on which clearance takes effect are not subject to the clearance. This is the statutory position, unaffected by the fact that assessment and collection of the tax might take place after a certified DTA clearance application has been lodged, in circumstances where it would be immediately repayable to the applicant (assuming a successful claim). However, in circumstances where there is an established entitlement to repayment, HMRC will by concession, circumvent the assessment and repayment process, and if assessments are raised, they will be "interest only" assessments to collect the Section 87 TMA 1970 interest.

Assessing only the Section 87 TMA 1970 late payment interest - concession

Despite the existence of the powers mentioned above to recover tax which is owing, HMRC considers that in circumstances where it is clear that

- the overseas recipient of the interest has applied for, and has been granted, clearance to receive future interest payments from the source in question without deduction of income tax under SI 1970/488; and
- the lender would be entitled to repayment of the tax for the period for which income tax should have been withheld, so that it is clear that if tax had been accounted for each period concerned, ultimately HMRC would not have retained it

the right to assess and collect the tax will be set aside and only the Section 87 TMA 1970 interest will be sought. This will of course be limited to tax which is at the time of the concession both collectible and repayable. For more detail, see the Thin Cap Practical guidance from INTM574000 onwards.

The notion that tax collected from the payer will inevitably be repayable to the overseas recipient is not one that may be assumed. It must be established as a fact and a legal right.

19.12.8 *Commentary*

The EU has issued a recommendation to encourage relief from withholding tax where treaty relief applies. Where “in exceptional cases” tax relief at source is not feasible, member states are invited to set up standardised and quick refund procedures.⁹⁷ The recommendation is not binding but hopefully it will lead to a review of the UK law and practice.

The deduction scheme for royalties allows self-certification. It is suggested that a similar system should be introduced here.

19.13 **Withholding tax on interest from deposit-takers**

The legislation is in chapter 2 part 15 ITA. HMRC refer to this as the tax deduction scheme for interest (“TDSI”) but I prefer not to use that label as this is only one of the three tax deduction schemes for interest discussed in this chapter. HMRC have issued 139 pages of guidance notes.⁹⁸ This contains much interesting material which is not set out here for reasons of space.

Section 851 ITA provides:

- (1) This section applies if—
 - (a) a deposit-taker or building society makes a payment of interest on an investment (see section 855(1)), and
 - (b) when the payment is made, the investment is a relevant investment (see section 856).
- (2) The deposit-taker or building society must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in

97 EU recommendation 19 Oct 2009 on withholding tax relief procedures C(2009)7924 final.

98 February 2009, accessible www.hmrc.gov.uk/tdsi/guidance-notes.pdf.

force for the tax year in which it is made.

Section 852 ITA authorises exceptions to be made by statutory instrument. Sections 853 and 854 ITA provide an elaborate definition of “deposit-taker” but for present purposes it is sufficient to note that the expression includes banks.

19.13.1 *Investment and deposit*

Section 855 ITA provides commonsense definitions of these terms:

- (1) In this Chapter “investment” means—
 - (a) a deposit with a deposit-taker,
 - (b) a deposit with a building society,
 - (c) shares in a building society, or
 - (d) a loan to a building society.
- (2) In this Chapter “deposit” means a sum of money paid on terms which mean that it will be repaid (with or without interest)—
 - (a) on demand, or
 - (b) at a time or in circumstances agreed by or on behalf of the person who pays it and the person who receives it.

19.14 Relevant investment

The expression “relevant investment” is a label which brings in a number of rules. Section 856 ITA provides:

- (1) An investment is a relevant investment for the purposes of this Chapter if it meets—
 - (a) the individual interest condition (see subsection (3)),
 - (b) the Scottish partnership condition (see subsection (4)),
 - (c) the personal representative condition (see subsection (5)), or
 - (d) the settlement condition (see subsection (6)).
- (2) But an investment is not a relevant investment if any of sections 858 to 870 prevent it from being a relevant investment.

19.14.1 *Individual interest condition*

Section 856(3) ITA provides:

An investment meets the individual interest condition if the only persons

beneficially entitled to interest on the investment are individuals.

An investment held by a Baker IP trust meets this condition as the life tenant (assume, an individual) is beneficially entitled to the interest.

In the case of a settlor-interested trust within s.624, the income is deemed to accrue to the settlor and the settlor alone. If the settlor is an individual, the individual interest condition is satisfied.⁹⁹ HMRC appear to agree. TDSI guidance notes¹⁰⁰ para 2.3 provide:

Anstalts & Stiftungs

[1] Anstalts and Stiftungs are Liechtenstein business entities which are fiscally opaque. ...

[2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit¹⁰¹ should be considered to belong to the settlor¹⁰² and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.

[3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust (see paragraph 2.9) and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

19.14.2 *Scottish partnership condition*

Section 856(4) ITA provides:

An investment meets the Scottish partnership condition if—

- (a) a Scottish partnership is beneficially entitled to all interest on the investment, and
- (b) that partnership consists only of individuals.

It is difficult to see the need for this since a Scottish partnership is

99 If the settlor is NOR, the NOR exemption applies.

100 Accessible www.hmrc.gov.uk/tdsi/guidance-notes.pdf. For TDSI (tax deduction scheme for interest) see 19.13 (Withholding tax on interest from deposit-takers).

101 [Author's footnote] More accurately, the interest on the deposit should be considered to belong to the settlor.

102 [Author's footnote] It is assumed that the Stiftung is a settlor-interested trust and that the settlor is UK resident.

transparent for IT purposes. However, it does no harm.

19.14.3 *PR condition*

Section 856(5) ITA provides:

- An investment meets the personal representative condition if
- [a] personal representatives are entitled to any interest on the investment and
 - [b] they receive it in that capacity.

Section 856(5)[b] seems to me otiose, though it does no harm.

19.14.4 *Settlement condition*

Section 856(6) ITA provides:

- An investment meets the settlement condition if
- [a] all interest on the investment is income arising to the trustees of a discretionary or accumulation settlement and
 - [b] they receive it in that capacity.

Section 856(6)[b] seems to me otiose, though it does no harm.

The key term here is “discretionary or accumulation settlement”. Section 873(1) ITA provides a referential definition:

A settlement is a discretionary or accumulation settlement for the purposes of this Chapter if any income arising to the trustees would (unless treated as income of the settlor) be to any extent income within subsection (2) for the tax year in which it arises.

So we need to turn to s.873(2):

Income is within this subsection so far as it is—

- (a) accumulated or discretionary income as defined in section 480 (other than income arising under a charitable trust or an unauthorised unit trust in relation to which section 504 applies), or ...¹⁰³

103 I consider s.873(2)(b) separately below.

So to follow s.873(2)(a) we need to turn to s.480 ITA. This is discussed elsewhere; see 24.2.1 (Accumulated or discretionary income).

Having dealt with s.873(2)(a), we turn to s.873(2)(b). This is somewhat more confusing:

(2) Income is within this subsection so far as it is—

- (b) an amount of a type set out in section 482 (unless the trust is a unit trust scheme or the amount is income arising under a charitable trust or is excluded by section 481(5)).

So to follow s.873(2)(b) we need to turn to s.482 ITA. This is discussed elsewhere; see 24.2.3 (Other income taxed at top rates). If one reviews the 11 types set out in s.482 one emerges somewhat confused as these types are not interest. This does not make sense, and I would be grateful to any reader who could explain.

19.15 Exceptions for non-residents

19.15.1 *Non-resident individual*

Section 858 provides:

858 Declarations of non-UK residence: individuals

(1) This section applies to an investment with a deposit-taker or building society which meets the individual interest condition in section 856(3).

(2) The investment is not a relevant investment if—

- (a) an appropriate person¹⁰⁴ has made the declaration set out in subsection (3) to the deposit-taker or building society,
- (b) the declaration contains the undertaking set out in subsection (4),¹⁰⁵
- (c) the declaration contains the name and principal residential address of the individual or (as the case may be) each of the

104 Section 857(5) provides:

“In this section ‘appropriate person’ means—

- (a) a person who is beneficially entitled to interest on the investment, or
- (b) a person to whom any such interest is payable.”

105 Section 858(4) provides:

“The undertaking is an undertaking by the person making it to notify the person to whom it is made if any individual in respect of whom it is made becomes ordinarily UK resident.”

- individuals entitled to the interest,
- (d) the declaration contains such other information as the Commissioners for HMRC may reasonably require, and
 - (e) the declaration is in such form as the Commissioners may prescribe or authorise.

Section 858(3) then sets out the terms of the declaration:

The declaration is that, at the time when the declaration is made—

- (a) the person who is beneficially entitled to the interest is not ordinarily UK resident, or
- (b) (as the case may be) all the persons who are so entitled are not ordinarily UK resident.

The form is R105. I refer to this (adopting the terminology of the TDSI guidance note) as “**NOR declaration**”.

In short, the requirement for exemption from deposit takers withholding is non-ordinary residence. Curiously, “usual place of abode” (which is more or less the same) is the requirement for the *imposition* of non-resident’s withholding.¹⁰⁶ Some irreconcilable policy choices are at play here, on one hand to facilitate collection of UK tax from non-residents and on the other to facilitate investment in the UK by non-residents. For the year during which a person becomes ordinary resident, see 6.13 (Withholding tax on interest).

19.15.2 *Interest in possession trusts*

The person beneficially entitled to the interest is the life tenant and if that person is NOR, the NOR exemption applies.

19.15.3 *Non-resident discretionary trust*

Section 861 ITA provides:

861 Declarations of non-UK residence: settlements

- (1) This section applies to an investment with a deposit-taker or building society which meets the settlement condition in section 856(6).
- (2) The investment is not a relevant investment if—

106 See 19.8 (Non-resident’s withholding tax).

- (a) an appropriate person¹⁰⁷ has made the declaration set out in subsection (3) to the deposit-taker or building society,
 - (b) the declaration contains the undertaking set out in subsection (4),¹⁰⁸
 - (c) the declaration contains such information as the Commissioners for Her Majesty's Revenue and Customs may reasonably require, and
 - (d) the declaration is in such form as the Commissioners may prescribe or authorise.
- (3) The declaration is that, at the time when the declaration is made—
- (a) the trustees who are entitled to the interest are non-UK resident (see section 475), and
 - (b) no person who is a trustee has reasonable grounds for believing that any beneficiary under the settlement is—
 - (i) an individual who is ordinarily UK resident,
 - (ii) a company which is UK resident, or
 - (iii) a Scottish partnership any of the partners of which is an individual who is ordinarily UK resident or a company which is UK resident.

The term “beneficiary” is defined in s.873 ITA:

- (3) A person is a beneficiary under a discretionary or accumulation settlement for the purposes of this Chapter if—
- (a) the person is an actual or potential beneficiary under the settlement, and
 - (b) condition A or B is met in relation to the person.
- (4) Condition A is that the person is, or will or may become, entitled under the settlement to receive some or all of any income under the

107 Defined s.861(5): “In this section ‘appropriate person’ means—

- (a) any person who is a trustee entitled to receive interest on the investment, or
- (b) a person to whom any such interest is payable.”

108 S.861(4) provides:

“The undertaking is an undertaking by the person making it to notify the person to whom it is made if—

- (a) the trustees become UK resident,
- (b) an individual in respect of whom it is made becomes ordinarily UK resident,
- (c) a company in respect of which it is made becomes UK resident,
- (d) an individual partner in any Scottish partnership in respect of which it is made becomes ordinarily UK resident,
- (e) a company partner in any Scottish partnership in respect of which it is made becomes UK resident,
- (f) a partner who is an ordinarily UK resident individual or a UK resident company joins any Scottish partnership in respect of which it is made, or
- (g) a person within any of sub-paras (i) to (iii) of subsection (3)(b) becomes or is found to be a beneficiary under the settlement to which the declaration relates.”

settlement.

(5) Condition B is that some or all of any income under the settlement may be paid to or used for the benefit of the person in the exercise of a discretion conferred under the settlement.

(6) The references in subsections (4) and (5) to any income under the settlement include a reference to any capital under the settlement so far as it represents amounts originally received by the trustees as income.

The definition is the same as in 39.5.1 (“Beneficiary”).

The form is Form R105 (DAT).

The TDSI guidance notes provide:

R105 (DAT) – change of trustees or beneficiaries

4.33 Where the Financial Institution becomes aware that there has been a change of trustee or beneficiary, it may continue to pay interest without deduction of BRT if it has no reason to believe

- that the trustees are or may be resident, or
- a beneficiary is or may be ordinarily resident/resident in the UK, or
- a new beneficiary is or may be ordinarily resident/resident in the UK.

19.15.4 *Non-resident Scottish partnership*

Section 859 ITA contains an exception for non-resident Scottish partnerships, which is not discussed here.

19.15.5 *Non-resident PRs*

Section 860 ITA provides:

860 Declarations of non-UK residence: personal representatives

(1) This section applies to an investment with a deposit-taker or building society which meets the personal representative condition in section 856(5).

(2) The investment is not a relevant investment if—

- (a) an appropriate person¹⁰⁹ has made the declaration set out in

109 Defined in s.860(4): “In this section ‘appropriate person’ means—

- (a) any of the personal representatives who are entitled to receive interest on the investment, or
- (b) a person to whom any such interest is payable.”

- subsection (3) to the deposit-taker or building society,
 - (b) the declaration contains such information as the Commissioners for Her Majesty's Revenue and Customs may reasonably require, and
 - (c) the declaration is in such form as the Commissioners may prescribe or authorise.
- (3) The declaration is that the deceased was not ordinarily UK resident immediately before the deceased's death.

One would expect the rule to require withholding where the PRs were subject to tax and not where they were not subject to tax. But the actual residence of the PRs for IT purposes is not relevant. I suspect the reason may lie deep in the history of the provisions, and would be grateful to any reader who could elucidate the puzzle.

The TDSI guidance notes provide:

R105(PR) – personal representatives

4.21 Form R105 completed by an investor before his or her death will remain in force after the date of death during the winding up of the estate. But if the personal representatives open an account in their own names, or transfer funds into an account in their own names, that account will not be an NOR account, unless and until the personal representatives make a NOR declaration. Personal representatives must make their declaration on

- a photocopy of the R105(PR) (see Appendix 5), or
- a downloaded copy of the R105(PR) from the HMRC website
- a substitute form which has been approved by the HMRC.

R105(PR) – who can sign?

4.22 In the case of an investment forming part of a deceased person's estate the form can be signed by either

- the personal representative of the deceased (or legal equivalent in the country where they live), or
- the person to whom the interest is paid.

The person signing the declaration should tick the relevant box above the signature to show whether or not he or she is the personal representative (or legal equivalent in that country).

It is the NOR status of the deceased which is important, and not that of the personal representative. Therefore, it is acceptable for a personal representative who is ordinarily resident in the UK to complete the declaration in respect of a deceased NOR investor.

19.15.6 *Policy and practical use of non-resident exceptions*

The former ITH para 876 explained the policy reason behind the exemption:

There were moreover compelling policy considerations. An attempt to tax the interest could have harmed the balance of payments by discouraging foreigners from putting their money into the UK. For the same reason no attempt has been made to require banks to deduct tax from interest paid to non-residents and interest belonging to persons not ordinarily resident is now excluded from the arrangements for deduction of tax from bank interest.

Since the conditions of all these non-resident exceptions could be onerous, I would have thought that the easier course would be to deposit funds with a non resident deposit-taker and not to use a UK bank. IHT may also be a reason for avoiding UK bank deposits. The remittance basis (and the temporary non-residents rules) may be another reason.

19.15.7 *Other exceptions*

The following exceptions to deposit takers withholding are mentioned for completeness and not discussed here:

- Client accounts: s.863 ITA
- Qualifying uncertificated eligible debt security units: s.864 ITA
- Qualifying certificates of deposit: s.865 ITA
- Qualifying time deposits: s.866 ITA
- Lloyds premium trust funds: s.867 ITA
- Sale and repurchase of securities: s.869 ITA
- Loans made by deposit takers: s.870(1)(a) ITA
- Debt on a security listed on a recognised stock exchange: s.870(1)(b) ITA
- Debt on a debenture issued by the deposit-taker: s.870(1)(c) ITA

19.16 **Duty on deposit-taker**

Section 857 ITA provides:

857 Investments to be treated as being or as not being relevant investments

- (1) A deposit-taker or building society must treat every investment with it as a relevant investment unless satisfied that the investment is not a relevant investment.
- (2) If a deposit-taker or building society is satisfied that an investment is not a relevant investment, it may continue to treat the investment as not being a relevant investment until subsection (3) applies.
- (3) This subsection applies when the deposit-taker or building society has information which can reasonably be taken to indicate that the investment is or may be a relevant investment.

The TDSI guidance notes provide:

UK address

4.9 Where the declaration shows a residential address in the UK it should not be regarded as acceptable unless it is known that the investor is temporarily in the UK (for example, as a student) and the address given is for the time being his or her principal residential address.

Incompatible evidence

4.10 If there is information which appears incompatible with the investor's status as indicated in his or her NOR declaration (for example, he or she appears to have a business in the UK), the Financial Institution cannot be satisfied that the deposit is a relevant investment and is obliged to seek further clarification from the investor of his status before the NOR declaration can be acted upon. The Financial Institution should contact the investor seeking an explanation of why he or she considers themselves to be not ordinarily resident. See also paragraph 4.37. If the investor is able to satisfy the Financial Institution that the declaration is valid, the Financial Institution can accept the declaration and need take no further action. Financial Institutions are recommended to retain some note of the enquiry. If the investor is unable to satisfy the Financial Institution that his or her NOR declaration is valid the Financial Institution should deduct BRT from any interest paid on the deposit.

Joint accounts

4.11 Any investor in a joint account may sign the form R105 on behalf of all the other investors. But if that investor ceases to be a party to the account, for example, if he or she dies, a new NOR declaration will be required. Financial Institutions can only pay interest on a joint account without deduction of tax if the investors are eligible to receive interest without deduction of tax for the same reason. For example, where one investor is entitled to register using form R85 and another investor is entitled to sign an NOR declaration on form R105 interest must be paid net. In other words, a mixture of a registration on form R85 [income within personal allowances] and form R105 is not allowed on the same joint account.

Death of an investor

4.12 If one party to a joint account dies or otherwise leaves the account, a new declaration is not required unless that person was the only signatory of the NOR declaration.

Giving effect to the NOR declaration

4.37 When Financial Institutions receive a NOR declaration which is fully completed in the form currently prescribed (or approved) by HMRC, they must satisfy themselves that there are no grounds for believing that the investor is or may be ordinarily resident in the UK or that the trustees are or may be resident in the UK, or that any of the beneficiaries are or may be ordinarily resident/resident, as appropriate. If they are so satisfied they must pay interest without deducting BRT.

If Financial Institutions have any information suggesting that the investor is or may be ordinarily resident in the UK, or that the trustees are or may be resident, or that any of the beneficiaries are or may be ordinarily resident/resident, they must not pay interest without deduction of BRT unless and until they have satisfied themselves that the investor is NOR or that the trustees are not resident and the beneficiaries are NOR/not resident, as appropriate.

The NOR supervisor normally carries out these checks on behalf of the Financial Institution. Financial Institutions must therefore put in place systems (clerical or computer-based) for ensuring that all relevant information is made available to the NOR supervisor. In particular all accounts in the branch to which the investor or trustees/beneficiaries is/are party, whether deposit or loan accounts (including mortgage accounts), and any such other accounts which are known to the branch should be reviewed. Examples of relevant information which could cast doubt on the validity of the declaration are

- a UK business in which the investor/trustees/beneficiaries appear to participate actively,
- a UK address or postal directions,
- an overseas PO Box or “c/o” address,
- a BFPO address, and
- a notification that the account is the subject of a third party mandate in favour of a UK resident or used as security for borrowing by UK residents or for borrowing in respect of the purchase of the UK property.

In making his or her decisions the NOR supervisor must not ignore information which comes to his or her attention by personal knowledge or otherwise. An example of this might be frequent or regular personal visits to the bank, cash transactions etc. The Financial Institution should put procedures in place so that information of a similar nature which comes to the knowledge of an employee who is responsible for handling any NOR accounts should similarly be drawn to the NOR supervisor’s attention.

It will be unusual for such information to provide conclusive proof that the NOR declaration is invalid. However, where the information could reasonably be taken to indicate that the investor may be ordinarily resident in the UK, the trustees may be resident or that any of the beneficiaries may be ordinarily resident/resident, the Financial Institution is obliged to satisfy itself that the evidence does not render the NOR declaration invalid. One way of doing this would be by obtaining written confirmation from the investor. A note of any enquiries made should be kept in the investor’s records or the trust records.

It may be possible to resolve doubts which arise without reference to the investor or trustees. For example if the investor is known to be a student in the UK it

would be reasonable for him or her to make frequent personal visits to the bank. In such circumstances, no further action need be taken by the NOR supervisor and the NOR declaration may be accepted. NOR supervisors are recommended to retain some record of the decisions.

The continuing obligation

4.38 Once an NOR declaration has taken effect, Financial Institutions must continue to pay interest without deducting BRT unless and until they receive information suggesting that the investor is or may be ordinarily resident in the UK, or the trustees are or may be resident, or any of the beneficiaries are or may be ordinarily resident/resident. This is called the “continuing obligation”. They must put in place systems so that as far as possible all relevant information which can be readily linked to a NOR account is brought to the attention of the NOR supervisor. Relevant information is that which points to a UK connection, for example

- notification of a UK address,
- change of account title,
- applications for credit cards, loans or mortgages suggesting UK residence,
- use of the deposit as security for borrowing by UK residents or for borrowing in respect of the purchase of UK property,
- the grant of third party mandates in favour of a UK resident,
- the grant of a “lien” on the account,
- information which comes to the NOR supervisor’s attention by personal knowledge,
- the existence of a UK business in which the investor has an active interest, and
- frequent or regular personal visits to the Financial Institution, cash transactions in the UK etc.

Where information indicates that the investor is or may be ordinarily resident in the UK or the trustees are or may be resident in the UK, or any of the beneficiaries are or may be ordinarily resident/resident in the UK, as appropriate, strictly the Financial Institution should treat the deposit as a relevant investment immediately and begin to deduct BRT. However, provided the Financial Institution has taken steps to satisfy itself that the investor has remained NOR, and, if necessary, has asked the investor to confirm that he or she has remained NOR (or in the case of trustees or beneficiaries that they are NOR/not resident, as appropriate), the Financial Institution may continue to pay interest without deducting BRT for up to 180 days to enable enquiries to be concluded. In exceptional cases HMRC may allow up to a further 180 days. Any Financial Institutions needing more than 180 days should apply to ...

HMRC recommends that where the matter is resolved without correspondence the NOR Supervisor records why he or she considers that the declaration remains valid.

Where the investor or the trustees is/are unable to satisfy the Financial Institution that a NOR declaration remains valid the Financial Institution should treat the deposit as a relevant investment and deduct BRT. Where the investor has not given all the necessary information within 180 days (or any further period HMRC may allow) the Financial Institution must deduct BRT from any future

payments of interest.

Overseas Students

4.39 Students entering the UK for a period of study lasting less than four years are normally treated as not ordinarily resident in the UK. HMRC recommend that institutions make a diary note to review these accounts at the end of 4 years. If, at the end of 4 years, there is still a UK address on the account then you have 180 days to check the position with the investor.

If there is a reply and the investor is now ordinarily resident in the UK the Financial Institution should cancel the form R105 and deduct BRT from future payments of interest. The investor may be eligible to complete a form R85.

If there is no reply and there is still movement on the account. The Financial Institution should cancel the form R105 at the end of 180 days and deduct BRT from future payments of interest.

If there is no reply, no movement on the account and no evidence suggesting the investor is ordinarily resident in the UK interest can continue to be paid gross.

Change of name of investor

4.40 Where the investor changes his or her name, for example by marriage, it is not necessary to replace the NOR declaration but the Financial Institution should ensure there is a clear audit trail. An example of a clear audit trail would be annotating the form with the revised details and endorsing the amendment with date stamp.

Transfer of account between branches

4.41 A new NOR declaration is not required when an account is transferred between branches. But Financial Institutions should ensure that there is a clear audit trail back to the original NOR declaration.

19.17 EU Interest and Savings Directive

The relevant law and practice is found in:

- (1) European Directive 2003/48/EC on taxation of savings income in the form of interest payments (“EUSD”) which applies to EU states.
- (2) International agreements made by non-EU states.¹¹⁰
- (3) Domestic legislation in each state (where the state has chosen to enact domestic legislation to impose the rules agreed in the Directive or

¹¹⁰ These are:

- (1) UK Crown Dependencies: the Channel Islands and the Isle of Man.
- (2) UK Overseas Territories: Anguilla, British Virgin Islands, Cayman Islands, Gibraltar, Montserrat, Turks and Caicos Islands,.
- (3) Dependent Territories of the Netherlands: Netherlands Antilles and Aruba.
- (4) Other countries: Switzerland, Andorra, Liechtenstein, Monaco and San Marino.

http://ec.europa.eu/taxation_customs/taxation/personal_tax/savings_tax/legal_bases/index_en.htm

agreement).¹¹¹

(4) Guidance notes issued by each state.¹¹²

A full discussion requires many volumes. Proposals are underway to amend and extend the law.¹¹³

In the following discussion, “**an ISD state**” is a state where Directive rules apply.

In short, the rules apply when a “paying agent”¹¹⁴ established in one ISD state pays “interest”¹¹⁵ to an individual who is “resident”¹¹⁶ in another ISD state. The duties of the paying agent depend on the state in which the paying agent is established: they are not identical in every state.

A UK resident will most often be affected where:

- (1) they receive interest from a paying agent in Belgium, Luxembourg, Austria, or a tax haven in a jurisdiction which has agreed to apply Directive rules; or
- (2) trustees of a transparent *Baker*-type IP trust¹¹⁷ in such a jurisdiction pay interest to a life tenant resident in the UK.

The paying agent has two choices:

- (1) If the individual gives authority, the trustees may report the interest payments to HMRC in the UK.
- (2) Alternatively the trustees must impose a withholding tax (also called a retention tax) on the payment of interest.¹¹⁸ Statute uses the label

111 In the UK this has been done by the Reporting of Savings Income Information Regs 2003 (SI 3297).

112 In the UK see www.hmrc.gov.uk/esd-guidance/guidance.htm which is 71 pages long. But UK residents would not be concerned about UK law.

113 See Proposal for a council directive amending directive 2003/48/EC, COM(2008) 727 final 2008/0215 (CNS), accessible [ec.europa.eu/taxation_customs/resources/documents/taxation/personal_tax/savings_tax/savings_directive_review/COM\(2008\)727_en.pdf](http://ec.europa.eu/taxation_customs/resources/documents/taxation/personal_tax/savings_tax/savings_directive_review/COM(2008)727_en.pdf)

114 This term is elaborately defined: Art.4 EUSD. It includes trustees but not (in short) individual borrowers not carrying on business.

115 This term is also elaborately defined: Art.6 EUSD.

116 This term is defined in Art.3(3) EUSD.

117 Payment from a discretionary trust or non-transparent IP trust is not “interest” and so it does not require withholding or disclosure. The EUSD will eventually be extended to cover this.

118 The states that operate this tax are: Austria, Belgium, Luxembourg, Jersey, British Virgin Islands, Netherland Antilles, Turks & Caicos, Switzerland, Andorra, San Marino, Liechtenstein and Monaco.

The EU withholding tax is in addition to any foreign tax that is withheld.

“special withholding tax”¹¹⁹ and I adopt that terminology for lack of better.

Several jurisdictions have taken the view before 2008/09 that the withholding/disclosure requirement does not apply when a payment of interest is made to a remittance basis taxpayer, if the interest is not remitted (and so not subject to UK tax).¹²⁰ This is a purposive construction, as the point is not made in the text of the agreements and whether it is correct seems very doubtful. HMRC do not agree, but the point is not within their jurisdiction, and they actually benefit from this practice as they do not have to allow a tax credit. This point ultimately raises questions of EU or international law, but not questions of UK law.

However the EU has action on this point. An EU press release IP/09/1013, 25 June 2009, provides:

119 Section 136(6) TIOPA.

120 The Channel Islands and the Isle of Man take this view. See eg para 32 of the Isle of Man Treasury guidance notes accessible www.gov.im/lib/docs/treasury/incometax/guidance.pdf.

“32. In deciding to whom the retention tax will need to be applied the focus should be on the ultimate aim of the Directive which is to enable savings income in the form of interest payments made in one Member State to beneficial owners who are individuals resident in another Member State to be made subject to effective taxation in accordance with the laws of the latter Member State. The emphasis should be on individuals, and also on those individuals who are not only resident in a Member State but are persons subject to effective taxation in accordance with the laws of the Member State. It is therefore consistent with the aims of the Directive, and therefore of the Agreements into which the Crown Dependencies have entered, that the retention tax will not apply to interest payments made to ...

- a trust (unless, as in the case of an interest in possession trust, a relevant beneficiary has the immediate and absolute entitlement to an interest payment);
- ...
- an individual where it is known to the paying agent that they benefit in their Member State of residence from an exemption from income tax; or where because no interest is remitted to the individual no liability to income tax arises in their Member State of residence.”

Switzerland agrees: see *Eidgenössische Steuerverwaltung: Wegleitung zur EU-Zinsbesteuerung* (Swiss Federal Tax Authority Guidelines) § 37.

The operation of this practice from 2008/09 is a little more difficult, because the remittance basis depends on making a claim and at the time the interest is paid the claim will not yet have been made. But the practice will probably continue to be applied in cases where the individual confirms that they intend to make a remittance basis claim.

The European Commission has decided to refer Luxembourg¹²¹ to the European Court of Justice over its incorrect application of certain provisions of the Savings Tax Directive as regards interest payments made to beneficial owners who benefit from so-called “non-domiciled resident” status in their country of residence.

Luxembourg refuses to apply the Directive to beneficial owners who benefit from the so-called “non-domiciled resident” status in their country of residence. Consequently, Luxembourg paying agents do not levy withholding tax on interest payments to such beneficial owners.

According to Luxembourg legislation, beneficial owners are considered to benefit from the “non-domiciled” status, if they are generally exempt from income tax in their State of residence for tax purposes or if the interest payments, as long as they are not transferred to the State of residence (“remittance”), are not subject to tax in that State.

According to the Commission, Luxembourg cannot provide for an exemption from withholding tax in situations other than those expressly provided by article 13 of the Directive (the so-called “voluntary disclosure” procedure which allows the beneficial owner expressly to authorise the paying agent to report information to the tax authorities of his State of residence and the “certificate procedure” which ensures that withholding tax is not levied when the beneficial owner presents to his paying agent a certificate drawn up by his Member State of residence for tax purposes).

The Commission is of the opinion that the paying agent has the obligation to establish the residence of the beneficial owner on the basis of minimum standards, as provided by article 3(3) of the Directive. If the beneficial owner is a resident of another Member State in accordance with these standards, the Member State of the paying agent must ensure that the latter applies the Directive and, in the case of Luxembourg, that the paying agent levies a withholding tax on interest payments to such a beneficial owner.

Consequently, the Commission considers that Luxembourg’s legislation, in its current state, is not compatible with articles 2, 3, 10 and 11 of the Directive.

Given that the above Luxembourg tax rules were not amended following the reasoned opinion sent by the Commission in November 2008 (IP/08/1815), the Commission has decided to refer the case to the European Court of Justice.

The Commission’s reference number for the case at issue is 2007/2178.

The current renegotiation of the EUSD may resolve the issue, but that will take years to come to fruition.

In practice, if the paying agent, guided no doubt by the local authorities, takes the view that the duty of withholding/disclosure does apply to

121 Belgium had previously taken the same view, see the 7th edition of this work, but it backed down so the proceedings are now against Luxembourg alone. I do not know if there are also proceedings against the tax havens which take the same view, but maybe Luxembourg will be a test case which will determine the point.

unremitted interest, the individual will usually consent to the disclosure. Then there will be no withholding tax. No difficulty will normally arise out of that disclosure. The Directive and supplemental agreements are designed to prevent criminal tax evasion, not lawful tax planning of the kind considered in this book.

19.17.1 *Credit for special withholding tax*

If tax is withheld, 75% of it is paid to the Member State where the beneficiary is resident.¹²² But the beneficiary is entitled to a tax credit for 100% of the tax withheld.¹²³

HMRC now accept that the credit is applicable even if it relates to unremitted income (un)taxed on the remittance basis.¹²⁴ Helpsheet 264 (Remittance basis) for 2010/11 provides:

Where SWT is deducted you are treated as having paid an equivalent amount of Income Tax in the UK which can be set against your UK liability or repaid to you if the amount exceeds that liability.

If the remittance basis applies to you and you set an amount of SWT against your Income Tax liability, or claim a repayment if the SWT exceeds your liability, the amount set off or repaid is treated as a remittance of the income at the time it is set off or repaid.

Example 4

Grace received £8,000 of interest from a Liechtenstein account after deduction of SWT of £2,000. Grace is non-domiciled in the UK and claims for her foreign income to be taxed on the remittance basis. Grace did not remit any of the money from her Liechtenstein account but includes an equivalent amount of Income Tax in her return for the SWT to set against other UK tax liability.

Enter on page F 2/F 3 of the Foreign pages:

Country or territory code (page F 2 column A)	LIE
Amount of income received (page F 2 column B)	£0
SWT (page F 3 column D)	£2,000

Setting off the SWT against Income Tax liability will mean that part of the interest income is remitted to the UK and will be a taxable amount at that time. Normally the 'set-off' will be regarded as having been at 31

¹²² Art.12.

¹²³ Art.14.

¹²⁴ HMRC changed their mind in Tax Bulletin 84 (discussed in the 6th edition of this book).

January following the tax year. In this example that would be 31 January 2012. Grace will therefore have to enter taxable income of £2,500 on her next return (remittance £2,000 increased by the rate of SWT (20%) £500 total £2,500), she will not be entitled to any relief for SWT for that year as the full amount has been relieved in this tax year).

If you claim for your foreign income to be taxed on the remittance basis and you remit part of the amount after SWT deducted then the amount of your income remitted is calculated by including the appropriate proportion of the SWT.

You are still able to claim the whole amount of SWT deducted in the year at column D.

Example 5

Adam received interest of £800 from Jersey after deduction of SWT of £200. Adam is non-domiciled in the UK and claims for his foreign income to be taxed on the remittance basis. £400 of the interest was remitted to the UK.

Interest received in UK	£400
SWT	£100
	<u>£500</u>

Enter on page F 2/F 3 of the Foreign pages:

Country or territory code (page F 2 column A)	JEY
Amount of income received (page F 2 column B)	£500
SWT (page F 3 column D)	£200

As in Example 4, the £200 set-off will be a further remittance at the date it is set off and subject to the same calculation until the total of the income £1,000 is taxed. In this example £250 of income should be included on the tax return of the year when the SWT £200 is set off – normally that would be the 2011–12 tax year for this example.

However, if a credit is given against tax, it is considered that the amount credited is not received in the UK and so not remitted.

If the credit takes the form of a refund, received in the UK, it is considered that the amount received is derived from the foreign interest, and so is regarded as remitted.

CHAPTER TWENTY

EXEMPT INTEREST OF NON-RESIDENTS

20.1 Exempt interest – Introduction

This chapter considers exemptions for interest on:

- (1) FOTRA securities;
- (2) foreign currency securities;
- (3) international securities

20.2 Meaning of “FOTRA Securities”

Section 713(2) ITTOIA provides:

In this Chapter “FOTRA security” means—

- (a) a security issued with a condition about exemption from taxation authorised by section 22 of F(No.2)A 1931,
- (b) a gilt-edged security which was issued before 6th April 1998 and without any such condition (other than 3½% War Loan 1952 Or After), or
- (c) 3½% War Loan 1952 Or After.

FOTRA stands for ‘Free of Tax to Residents Abroad’.

20.2.1 *The exemption condition*

Section 713 ITTOIA provides:

- (3) In this Chapter “the exemption condition” has the meaning given by subsections (4) to (6), according to the kind of FOTRA security involved.
- (4) In relation to a security within subsection (2)(a), it means the condition authorised by section 22 of F(No 2)A 1931.

(5) In relation to a security within subsection (2)(b), it means a condition with which 7.25% Treasury Stock 2007 was first issued, being a condition treated by section 161(1) of FA 1998 (non-FOTRA securities)—

- (a) as a condition with which the security within subsection (2)(b) was issued, and
- (b) as a condition authorised in relation to its issue by section 22 of F(No 2)A 1931.

(6) In relation to 31/2% War Loan 1952 Or After, it means a condition of its issue authorised by section 47 of F(No 2)A 1915.

For these provisions see 58.5 (Conditions for exemption).

20.3 Deduction at source

Section 893(1) ITA 2007 provides:

A payment of a UK public revenue dividend is payable gross if—

- (a) it is a payment of interest on gross-paying government securities, and
- (b) no deduction at source application has effect in respect of the securities at the time the payment is made (see section 895).

Thus there are three conditions for gross payment. First the security must be a UK public revenue dividend, defined s.891 ITA:

In this Chapter “UK public revenue dividend” means any income from securities which—

- (a) is paid out of the public revenue of the UK or Northern Ireland, but
- (b) is not interest on local authority stock.

Secondly the security must be a gross-paying government security, defined s.893(2) ITA:

In this Chapter “gross-paying government securities” means—

- (a) gilt-edged securities (see section 1024), or
- (b) securities which are the subject of a Treasury direction under section 894(1) or (3).

Thirdly, holders may ask for tax to be deducted at source. It must be rare

to want to apply for tax to be deducted, though it might perhaps be convenient for a basic rate taxpayer who does not otherwise have to put in a return.

20.4 FOTRA exemption

Section 714 ITTOIA provides:

- (1) No liability to income tax arises in respect of profits from a FOTRA security if conditions A and B are met. ...
- (3) Condition A is that the profits are stated in the exemption condition to be exempt from income tax.
- (4) Condition B is that any requirements for obtaining the exemption imposed by the security's conditions of issue are met.

A non-resident individual or company would qualify for non-residents IT relief on the interest, so the FOTRA exemption only matters in unusual cases, such as:

- (1) Individuals who are UK resident but not ordinarily resident.
- (2) Year of arrival or departure (split year concessionary relief applies for FOTRA securities¹ but not for non-residents IT relief).
- (3) Non-ordinarily resident beneficiaries of UK discretionary trusts and estates.

20.4.1 Sections 624 and 720

Section 714 ITTOIA provides:

- (5) Whatever the exemption condition provides, amounts charged under the provisions specified in subsection (6) are not exempted by subsection (1).
- (6) The provisions are—
Chapter 5 of Part 5 (settlements: amounts treated as income of settlor) so far as it applies to income within section 619(1)(a) or (b), and
Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

¹ See 6.7 (Interest from FOTRA securities).

These anti-avoidance provisions override FOTRA exemption.

20.4.2 *Restriction on deductions*

For completeness, s.716 ITTOIA provides:

- (1) A person who meets conditions A and B may not bring into account for income tax purposes—
 - (a) any amount relating to changes in the value of a FOTRA security, or
 - (b) expenses related to holding it or to any transaction concerning it.
- (2) Condition A is that the person is the beneficial owner of the security.
- (3) Condition B is that the person is a person who would be exempt from tax on the security under this Chapter.

This can only apply to traders and is not of general importance.

20.5 Beneficial ownership

For a general discussion of the beneficial ownership requirement, see 58.6 (Beneficial ownership of FOTRA securities). The International Manual provides:

368040. The FOTRA condition [April 2007]

...

Beneficial ownership of the security

To demonstrate beneficial ownership of the security, the claimant must hold the security on the interest date. In strictness a person who has sold a FOTRA security but receives the next interest payment due (an ex-dividend sale) ceases to be the beneficial owner of the security when he sells it.

It would be very strange if an ex-dividend sale caused the interest received post sale to become taxable, and I doubt if that can really be correct. In practice perhaps it does not often happen.²

² For completeness, The INT Manual continues:

“There is a column on the A1 claim form with the heading ‘If sold, date of sale or write still held’. Entries in this column will alert you to a sale before the interest date.

20.6 FORTA securities held on trust

20.6.1 *Interest in possession trust*

The TSE Manual provides:

3185. FOTRA securities - resident trustees [September 2011]

... From 6 April 1998 all interest on such securities is paid gross. Trustees need to know whether or not to Self-Assess liability. This depends upon the type of trust involved and the Residence status of the beneficiary.

Interest in possession trust (TSEM1105)

For any beneficiary who is not ordinarily resident (NOR) in the UK the interest is not taxable. Trustees should not include it on the returns. The authority for this is *Williams v Singer* 7 TC 387 (TSEM7070).

Thus (although not clear from the statute) all that matters is the ordinary residence of the life tenant. That is sensible.

20.6.2 *Discretionary trust*

Section 715 ITTOIA provides:

- (1) This section applies if—
 - (a) a FOTRA security is held on trust, and
 - (b) apart from this section, interest payable on the security would not be exempt from income tax under section 714 because of the security not being in the beneficial ownership of a person not ordinarily UK resident.
- (2) For the purposes of determining whether the interest is exempt under section 714 it is to be assumed that the security is in the beneficial ownership of a person not ordinarily UK resident if none of the beneficiaries of the trust is ordinarily UK resident at the time when the

You should obtain guidance from Technical Advice Group before you take any action if

- a FOTRA security was sold before the interest date
- that column is left blank”

This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed.

interest arises.

(3) In subsection (2) “beneficiaries of the trust” includes any person known to the trustees as a person—

- (a) who is, or will or may become, entitled under the terms of the trust to receive income under the trust, or
- (b) to whom or for whose benefit such income may be paid or applied.

(4) In subsection (3) “income under the trust” includes any property held on the terms of the trust and falling to be treated as capital so far as it is or represents amounts received by the trustees as income.

ITTOIA EN change 116 provides:

Change 116: Interest from FOTRA securities held on trust: s.715

This change gives statutory effect to a practice relating to interest arising from FOTRA securities held on trust.

FOTRA exemptions apply where gilt-edged securities are in the beneficial ownership of persons who are not ordinarily resident in the UK. The source legislation, principally section 154 of FA 1996, is rewritten in Chapter 6 of Part 6 of this Act. The beneficial ownership test lies within the definition of “FOTRA security” as it is part of the exemption condition of the securities. (See, in particular, section 22 of F(No 2)A 1931).

Although in the case of bare trusts and trusts with an interest in possession, it is fairly clear where the beneficial ownership lies, in the case of discretionary or accumulation trusts it can be difficult to apply the beneficial ownership test. In some types of trust the beneficial ownership of an asset is, in effect, in suspense. In others, while it may be clear where the beneficial ownership lies, it may belong to a different person from the person entitled to the income.

The author does not have a sound grasp of the English law concept of beneficial ownership, but it does not matter, as the passage continues:

In practice, where interest from FOTRA securities held in trust arises to trustees and none of the beneficiaries of the trust is ordinarily resident in the UK, the beneficial ownership test is regarded as met whatever kind of trust is involved and no account is taken of whether the trustees themselves are resident or ordinarily resident. So if all the potential beneficiaries of a discretionary or accumulation trust (that is, those who have the right, at the discretion of the trustees, to benefit from the trust income or accumulated income) are not ordinarily resident in the UK,

the FOTRA beneficial ownership test is treated as having been met. Section 715 of this Act gives effect to this practice. So, for the purposes of determining whether interest arising from a FOTRA security held in trust is exempt from income tax under section 714 of this Act, it is to be assumed that the security is in the beneficial ownership of a person who is not ordinarily resident if none of the beneficiaries of the trust is resident when the interest arises. (See section 715(1) and (2)). Section 715(3) defines “beneficiaries of the trust” widely so as to cover all potential income beneficiaries of discretionary and accumulation trusts. Section 715(4) brings in beneficiaries receiving accumulated income. This change is in taxpayers’ favour in principle. But it is expected to have no practical effect as it is in line with current practice.

This applies even to a UK resident trust.

In a case where

- (1) some beneficiaries are UK resident (so the requirements of this relief are not met) but
- (2) the trustees distribute income to a non-ordinarily resident beneficiary relief is available under ESC B18.

20.7 Interaction of FOTRA exemption and DT relief

DT relief is obviously not needed where FOTRA exemption applies or where non-residents IT relief applies. There are a few gaps where DT relief could be useful, for instance, an individual who is domestic law UK resident and ordinarily resident, but is treaty-resident outside the UK. The International Manual provides:

368110. FOTRA and DT claims [April 2007]

A person entitled to exemption from UK income tax on interest payments from a FOTRA security may claim repayment of some or all of the tax deducted under the terms of an interest article in a DTA. You should treat any such claim as a claim under the interest article. It follows that the claimant must satisfy the conditions of the DTA rather than the conditions for FOTRA exemption. In effect the payment loses the label of FOTRA and is treated in the same way as any other interest payment.

In practical terms it makes no difference if the claimant is entitled to full relief under the DTA. However the person who received the FOTRA interest may be able to claim repayment of the tax deducted by meeting the requirements of the DTA without meeting the beneficial ownership

condition for FOTRA exemption.

If the claimant is only entitled to partial repayment of the tax deducted under the DTA he will probably receive credit for the UK tax retained against his liability to tax on the interest in his country of residence. You should therefore make the payment as claimed because to increase the payment may cause the claimant inconvenience when settling his liability to tax in the country of residence. You could explain to the claimant that full repayment would be available if he made a claim on form A1.

This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed. But the underlying points are still correct.

20.8 Exempt foreign currency securities

20.8.1 *Securities qualifying for relief*

Section 755 ITTOIA provides:

- (1) This section applies to interest on—
 - (a) such foreign currency securities issued by a local authority or a statutory corporation as the Treasury direct, and
 - (b) such foreign currency loans made to a statutory corporation³ as the Treasury direct.

I refer to securities within s.755 as **“exempt foreign currency securities”**.

3 Terms are defined in s.755(4) ITTOIA:

In this section—

“company” means a company, as defined in section 1(1) of the Companies Act 2006 (c 46),

‘foreign currency’, in relation to loans and securities, has the meaning given by section 756, and

‘statutory corporation’ means—

- (a) a corporation incorporated by an Act (other than a company), or
- (b) any other corporation on which functions connected with carrying on an undertaking are conferred by an Act or by an order made under or confirmed by an Act.

Section 756 ITTOIA defines “foreign currency” security:

- (1) For the purposes of section 755, a security or loan is a foreign currency one if under its terms the currency to be used for repayment is not sterling.
- (2) Subsection (1) is subject to the following qualifications.
[Subsections (3) and (4) are transitional rules for securities issued before 6 April 1982.]
- (5) If in the case of a security there is an option as to the currency to be used for repayment, the security is only to be treated as a foreign currency one if the option is exercisable only by its holder.
- (6) If in the case of a loan there is an option as to the currency to be used for repayment, the loan is only to be treated as a foreign currency one if the option is exercisable only by the person for the time being entitled to repayment or eventual repayment.

20.8.2 *Exemption from deduction at source*

Section 981 ITA provides:

Despite the provisions of this Part there is no duty to deduct a sum representing income tax from a payment of interest within section 755(1) of ITTOIA 2005 (interest on foreign currency securities etc owned by non-UK residents).

20.8.3 *Tax exemption*

Section 755(2) ITTOIA provides:

No liability to income tax arises in respect of interest to which this section applies if—

- (a) in the case of interest on a security, its beneficial owner is a non-UK resident, and
- (b) in the case of interest on a loan, the person for the time being entitled to repayment or eventual repayment is a non-UK resident.

A non-resident individual or company would qualify for non-residents IT relief on the interest, so the exemption does not matter in practice.

20.8.4 *Section 624 and 720*

Section 755(3) ITTOIA provides:

But interest is not exempt under subsection (2) because a person is a non-UK resident if it is treated as another person's income under—

Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), or

Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

This is the same as the rule for FOTRA securities.⁴

ITTOIA EN provides:

Subsection (3) of the section is an anti-avoidance provision. Section 581(3) of ICTA is very widely drafted: “where any income of any person is by virtue of any provision of the Income Tax Acts to be deemed to be income of any other person, that income shall not be exempt ..”. In fact, there are only two sets of provisions under which this type of income could be deemed to be income of another person. The relevant provisions are listed in subsection (3) of the section.

20.8.5 *Commentary*

If the aim is to encourage investment in local authority and similar securities, why should the exemption be limited to foreign currency securities? It seems the object when the rules were introduced in 1969 was to encourage loans from foreign lenders who would not wish to lend in sterling; borrowers fared badly because of the devaluation in the subsequent sterling crisis.

Alignment of the foreign currency security with the FOTRA rules would be a small but worthwhile simplification. However the Treasury when asked for a list of exempt foreign currency securities stated that they did not hold the information and could locate no record of a direction having been given under s.755 ITTOIA! It may well be that no exempt foreign currency securities exist, and the entire legislation is dead letter law. I would be grateful for readers comments on that.

⁴ See 20.4.1 (Sections 624 and 720).

20.9 Securities of international organisations

20.9.1 *Inter-American Development Bank*

Section 773 ITTOIA provides:

- (1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by the Inter-American Development Bank if the liability only arises because one or more of circumstances A to C apply.
- (2) Circumstance A is that the security is issued in the UK or in sterling.
- (3) Circumstance B is that the income is made payable or paid in the UK or in sterling.
- (4) Circumstance C is that the Bank maintains an office or other place of business in the UK.

This reflects Section 9 of the Agreement Establishing the IDB:

- (c) No tax of any kind shall be levied on any obligation or security issued by the Bank, including any dividend or interest thereon, by whomsoever held:
 - (i) which discriminates against such obligation or security solely because it is issued by the Bank; or
 - (ii) if the sole jurisdictional basis for such taxation is the place or currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by the Bank.
- (d) No tax of any kind shall be levied on any obligation or security guaranteed by the Bank, including any dividend or interest thereon, by whomsoever held:
 - (i) which discriminates against such obligation or security solely because it is guaranteed by the Bank; or
 - (ii) if the sole jurisdictional basis for such taxation is the location of any office or place of business maintained by the Bank.⁵

20.9.2 *Designated international organisations*

Section 774 ITTOIA provides:

⁵ <http://idbdocs.iadb.org/wsdocs/getdocument.aspx?docnum=781584>

- (1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by an organisation if—
 - (a) the organisation has been designated by the Treasury for the purposes of this section, and
 - (b) the liability only arises because one or more of circumstances A to C apply.
- (2) Circumstance A is that the security is issued in the UK or in sterling.
- (3) Circumstance B is that the income is made payable or paid in the UK or in sterling.
- (4) Circumstance C is that the organisation maintains an office or other place of business in the UK.
- (5) The Treasury may by order designate for the purposes of this section—
 - (a) any of the Communities,
 - (b) the European Investment Bank,
 - (c) any international organisation that meets conditions A and B.
- (6) Condition A is that one of its members is the UK or any of the Communities.
- (7) Condition B is that the agreement under which that member became a member provides for the same kind of exemption from tax for income from securities issued by the organisation as this section provides.

See the Bretton Woods Agreement Order in Council, 1946 (SR&O 1946 No 36); International Finance Corporation Order 1955; International Development Association Order 1960; International Monetary Fund (Immunities and Privileges) Order 1977/825; International Organisations (Tax Exempt Securities) Order 1984; European Communities (Tax Exempt Securities) Order 1985; International Organisations (Tax Exempt Securities) Order 1991.

CHAPTER TWENTY ONE

DIVIDENDS AND DISTRIBUTIONS

21.1 Dividends and distributions – Introduction

A full discussion of the taxation of dividends and distributions needs a book to itself. This chapter focuses on matters closest to the themes of this book.

This chapter considers three sets of provisions:

- (1) UK companies: Chapter 3 Part 4 ITTOIA (Dividends/distributions)
- (2) Non-UK companies:
 - (a) Chapter 4 part 4 ITTOIA (Dividends)
 - (b) Chapter 8 part 5 ITTOIA (Other income - ie distributions)
- (3) Double taxation relief

Unfortunately the terminology is something of a mess, as each set of provisions has different definitions of dividend/distributions. I have considered devising distinct terminology, but it is clearest to follow the statutory terminology - as long as one bears in mind that dividend/distribution has distinct meanings in each context.

I do not discuss the corporation tax treatment of dividends and distributions received by UK companies.

21.2 Income from UK resident company

Section 383 ITTOIA imposes a charge on dividends and distributions from a UK resident company:

- (1) Income tax is charged on dividends and other distributions of a UK resident company.
- (2) For income tax purposes such dividends and other distributions are to be treated as income.

- (3) For the purposes of subsection (2), it does not matter that those dividends and other distributions are capital apart from that subsection.

Section 989 ITA defines “distribution” by reference to the wide and elaborate definition in CTA 2010:

The following definitions apply for the purposes of the Income Tax Acts—

“distribution” has the meaning given by Chapters 2 to 5 of Part 23 of CTA 2010, disregarding section 1027A of that Act.

Section 384 ITTOIA provides:

- (1) Tax is charged under this Chapter on the amount or value of the dividends paid and other distributions made in the tax year. ...

There is no reference to the remittance basis rules in part 8 ITTOIA, so dividends and distributions from UK resident companies are taxed on the arising basis (even for remittance basis taxpayers). This adopts or enacts the decision in *Bradbury v English Sewing Cotton* 8 TC 481 that the source of income from shares is located where the company is resident.

When the income consists of the transfer of a non-cash asset, there has been some debate whether the amount of the income is computed by reference to the market value or the book value of the asset. For UK company law purposes, one takes the book value: s.845 Companies Act 2006. But for tax purposes, one should take the market value.

21.2.1 *Tax credit*

Section 397 ITTOIA provides:

- (1) A UK resident or eligible non-UK resident receiving a qualifying distribution made by a UK resident company is entitled to a tax credit equal to one-ninth of the amount or value of the distribution (but see subsections (3) and (6)).
- (2) Such a person may claim to deduct the tax credit from—
 - (a) the income tax charged on the person's total income for the tax year in which the distribution is made.
- (3) Subsection (1) only applies so far as the distribution is brought into charge to tax, and accordingly if the person's total income is reduced by

any deductions which fall to be made from the distribution, the tax credit for the distribution is reduced in the same proportion as the distribution.

The SAIM explains subsection (3):

5100. Tax credits on qualifying distributions [November 2011]

[The manual paraphrases s.397(3) ITTOIA and continues:] So, for example, if an individual's total income is reduced by deductions (for example, personal allowances) such that the qualifying distributions are not, or are not wholly, brought into charge to tax, the value of the tax credits attaching to those distributions are correspondingly reduced. So a person may be entitled to a tax credit whose value is nil.

21.2.2 *Eligible non-UK resident*

Section 397(4) ITTOIA provides:

For the purposes of this section "eligible non-UK resident", in relation to a qualifying distribution, means an individual who at any time in the tax year in which it is received is a non-UK resident within
[a] section 278(2) of ICTA or
[b] section 56(3) of ITA 2007 (Commonwealth citizens, EEA nationals etc.).

Subsection (4)[a] has no effect as s.278 ICTA was repealed in 2009 (the drafter forgot to repeal the cross reference here). There are seven categories of individuals within s.56(3) ITA, of which the only important one is EEA nationals.¹

The individual has only to fall into the relevant category 'at any time' in the tax year, not necessarily throughout the tax year.

For completeness, s.397(5) ITTOIA provides:

If a distribution is, or is treated under any provision of the Tax Acts as, the income of a person ("P") other than the recipient ("R"), P (not R) is treated as receiving it for the purposes of this section (and so P (not R) is entitled to a tax credit if P falls within subsection (1)).

¹ See 44.6.1 (Entitlement to personal allowances: UK residents).

21.2.3 *Grossing up*

Section 398(1) ITTOIA² provides for grossing up a dividend by the amount of the tax credit:

If a person is entitled to a tax credit under section 397 or 397A in respect of a dividend or other distribution, the amount or value of the dividend or other distribution is treated as increased by the amount of the tax credit for all income tax purposes (except sections 397(1) and 397A(1)).

For instance:

Dividend: £1,000 (**“net amount”**)

Tax credit (one ninth): £111.11

Dividend plus tax credit: £1,111.11 (**“gross amount”**)

21.2.4 *Recipient non-eligible person: effective tax credit*

Section 399 ITTOIA provides:

(1) This section applies if a person is not entitled to a tax credit under section 397 or 397A for a qualifying distribution included in the person's income for a tax year.

(2) The person is treated as having paid income tax at the dividend ordinary rate on the amount or value of the distribution (but see subsection (7))...

(6) The income tax treated as paid under subsection (2) is not repayable.

I call this **“an effective tax credit”** as the legislation uses the expression “tax credit” in the strict sense of a tax credit under s.397 or 397A.

Subsection (7) contains four exceptions concerning specialist topics not discussed here.

21.2.5 *Grossing up income of non-residents*

Section 399 ITTOIA provides:

² Flagged by s.384(3) ITTOIA.

(3) For the purposes of subsection (2), if the person is non-UK resident the amount or value of the distribution is treated as the grossed up amount, unless the person is a company which is beneficially entitled to the income.

(4) If the person is non-UK resident, the amount or value of the distribution is treated for the purposes of Chapters 3, 4 and 6 of Part 9 of ITA 2007 (special rates for trustees' income) as the grossed up amount.

(5) In this section "the grossed up amount" means the actual amount or value of the distribution, grossed up by reference to the dividend ordinary rate for the tax year.

This is relevant to a non-resident trust because (in the absence of treaty relief) it affects how much tax is paid at the dividend rates. A non-resident individual does not usually care about grossing up since no tax is due beyond the effective tax credit³ but grossing up might be relevant to an individual treaty-resident in a state where the treaty allows repayment of the tax credit.

21.3 Income from non-resident company

21.3.1 Income dividends

Section 402(1) ITTOIA imposes a charge to tax on dividends from non-resident companies:

Income tax is charged on dividends of a non-UK resident company. ...

I refer to this as a charge on **"income dividends"** because s.402(4) ITTOIA provides:

In this Chapter "dividends" does not include dividends of a capital nature.

Section 403 ITTOIA provides:

(1) Tax is charged under this Chapter on the amount of the dividends arising in the tax year.

³ See 39.1 (Non-residents IT relief – Introduction).

(2) Subsection (1) is subject to ...⁴ Part 8 (foreign income: special rules).

Section 403(2) ITTOIA incorporates the remittance basis for foreign source income dividends.

“Dividend” is (sensibly) undefined so it has its ordinary meaning, whatever that is. ITTOIA EN provides::

187. The term “dividend” is not defined in this Act. “Dividend” is a widely used and understood term and is defined only in very specific circumstances not applicable in this context It is not thought appropriate to attempt to define “dividend” here. It will usually be a matter of referring to the relevant company law to determine whether or not a payment made by a company is a dividend.

21.3.2 *Non-dividend company income*

Non-dividend income from a non-resident company is taxed under s.687 ITTOIA:

(1) Income tax is charged under this Chapter on income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act. ...

(4) The definition of “income” in s.878(1) does not apply for the purposes of this section.⁵

Section 688 ITTOIA provides:

(1) Tax is charged under this Chapter on the amount of the income arising in the tax year.

(2) Subsection (1) is subject to ...⁶

(c) Part 8 (foreign income: special rules).

Section 688(2)(c) ITTOIA incorporates the remittance basis for foreign source non-dividend company income.

4 Omitted words relate to SIPs (outside the scope of this book).

5 The disappplied definition states:

“‘Income’ includes amounts treated as income (whether expressly or by implication).”

6 The exceptions in (a)(b) are outside the scope of this book.

Thus we have two separate charging provisions:

- (1) Section 402 imposes the charge on income dividends.
- (2) Section 688 imposes the charge on income from companies other than dividends (which I call “**non-dividend company income**”).

ITTOIA EN Vol. II explains why:

184. Income which, under the source legislation, is charged to tax under Schedule D Cases IV or V, has, where appropriate, been fully integrated with the equivalent income arising from a UK source. In the case of dividends from non-UK resident companies there is no exact equivalent in terms of UK source income. The closest equivalent is the charge to tax on dividends and other distributions from UK resident companies (section 20 of ICTA, Schedule F in the source legislation). But there is no precise overlap. The UK charge, by the adoption of the definition of “distribution” from Part 6 of ICTA ... can include dividends or distributions of a capital nature and can also operate to convert payments that would otherwise be treated as interest into distributions. Any charge on distributions from non-UK resident companies must be confined to income only. For this reason ... it is not thought appropriate to integrate the charges. So a separate charge is needed to cover dividends from non-UK resident companies. ...

186. ... It is possible that a non-UK resident company may make a distribution of income which would not fall within Chapter 4 of Part 4 of this Act because it is not a “dividend”. But if the distribution comprises income it will fall to be dealt with either under alternative specific charges (eg interest) or within “income not otherwise charged”, the charge on which appears in Chapter 8 of Part 5 of this Act.

In practice it does not usually matter whether a receipt from a non-resident company is classified as an income dividend (chargeable under s.402) or as non-dividend company income (chargeable under s.687). In either case the receipt is only taxable if it is income and not capital in nature.

21.3.3 *Tax credit and grossing up*

The topic of grossing up and tax credits on foreign dividends, in s.397A ITTOIA, needs a chapter to itself. It is not discussed here; but I hope to cover it in a future edition.

21.4 Receipt from a non-resident company: income or capital?

What receipts from non-resident companies are income and so within the charge under s.403 or s.687? For receipts from UK resident companies the question does not arise. The charge is on “distributions” and the term is defined to include a capital distribution. For receipts from non-resident companies, the charge is restricted to “income” and there is no guidance in the statute. So the income/capital distinction is one of the general law (eg it applies for trust law purposes) which is adopted by UK tax law. Hence many of the cases are trust cases and not tax cases.⁷

21.4.1 *General principles*

Courtaulds Investments v Fleming summarises the law as follows:

The rights and interests of shareholders in the assets and the profits of companies in which they hold shares vary widely in detail, but I think they can all be said to fall under three heads:

- (1) rights to participate in the distributable profits of the company while it is a going concern;
- (2) rights to participate in the division of the assets of the company in a liquidation, and
- (3) rights to participate in any distribution to shareholders on an actual or notional reduction of capital.

Anything received under the first head is treated by English law as income of the recipients for both tax purposes and trust purposes (but subject as to the latter to any special provision of the trust) notwithstanding that the source of the distribution may be a profit not of the company’s business but on capital account: see *In re Doughty* [1947] Ch 263 and *IRC v Reid’s Trustees* 30 TC 431.

Anything received under the second head is treated by English law as capital both for tax purposes and, subject as aforesaid, for trust purposes. So also is anything received under the third head. That this is so for trust purposes is clear from *In re Duff’s Settlements* [1951] Ch 923, where moneys received by trustees on a distribution of part of a share premium account under the Companies Act 1948, s.56, were held to be capital for the purposes of their trust. My attention was not drawn to any case

⁷ See Law Commission Consultation Paper 175 (Capital and Income in Trusts, 2004) accessible <http://lawcommission.justice.gov.uk/>.

where the same has been held to be so for tax purposes on a distribution of a share premium account under s.56, but in my judgment that must follow.⁸

The distribution of a share premium account of a Cayman company is income and not capital.⁹

The HMRC view was set out in the former Inspectors Manual. The material was deleted from the current SAI Manual, which deals with the issue only cursorily at 5210. I set out the old Inspectors Manual passages, as they no doubt continue to reflect HMRC practice:

1610. Distributions/foreign cos: In cash

Published: 9/95

... a cash distribution to its shareholders by a foreign company will normally be assessable under Case V, whether it is attributable to the undivided¹⁰ profits or to the capital resources of the company (*IRC v Reid* 30 TC 431). Where, however, cash —

- a) is distributed on the liquidation of the company (*IRC v Burrell* 9 TC 27) or
 - b) comprises a return of part of the shareholder's capital interest in the company (*Rae v Lazard Investment* 41 TC 1; *Courtaulds Investments v Fleming* 46 TC 111),
- the cash constitutes a capital sum not assessable as income under Case V. ...

This is correct, though (b) is a slightly abbreviated summary of the position as more fully set out in *Courtaulds Investments*.

1613. Distributions/foreign cos: Not in cash: Release of assets

Published: 9/95

Where a foreign company releases¹¹ some of its assets (for example, shares it holds in another company) to its shareholders, the distribution will normally be assessable under Case V by reference to the UK currency value of such assets at the date of distribution (*Pool v*

8 46 TC 111, at p.124.

9 *HMRC v First Nationwide* [2012] EWCA Civ 278.

10 [Author's Note] "Undivided" in this context is an old-fashioned term for "undistributed".

11 [Author's Note] "Releases" here means "distributes". The word "release" was used in *Pool v Guardian* (1922), but is not normally used nowadays in this sense.

Guardian Investment Trust 8 TC 167; *Wilkinson v IRC* 16 TC 52; *Briggs v IRC* 17 TC 11). Where, however, the assets are released on liquidation or are otherwise claimed to be a return of capital to the shareholder, the claim should be referred to Revenue Policy, International (Cases IV and V), Victory House in accordance with IM1610, last sub-para.

The Manual dealt separately with distributions of cash and distributions of non-cash assets but the principle is exactly the same.

21.4.2 *Stock option*

The Inspectors Manual continued:

1611. Distributions/foreign cos: Not in cash: Option cases

Published: 9/95

Where a foreign company declares a cash dividend but offers its shareholders, on their own initiative, the option of taking up further shares in lieu of the cash dividend, a shareholder who exercises the option to take up the shares is not assessable under Case V of Schedule D in respect of that dividend. If, however, a shareholder does not exercise the option but takes the dividend in cash, he is assessable under Case V of Schedule D on the amount of the cash dividend. See CG51823 regarding the capital gains position.

21.4.3 *Issue of shares or debentures*

The Inspectors Manual continued:

1612. Distributions/foreign cos: Not in cash

Published: 9/95

Where a foreign company capitalises undivided [ie undistributed] profits and —

- a) issues to its shareholders the additional capital so created, in the form of its own shares or debentures, in proportion to the number of shares already held by them or
- b) satisfies a dividend out of such profits by the issue of its own stocks or shares (for example, a “stock dividend” by a United States company),

such a distribution does not constitute income for Case V purposes in the hands of the shareholder. This principle applies when the

distribution is actually made in shares, whether or not an effective option was given to the shareholder to receive cash in place of shares (*IRC v Blott*, 8 TC 101; *Whitmore v IRC* 10 TC 645; *IRC v Fisher's Executors*, 10 TC 302; *IRC v Wright* 11 TC 181). ...

In cases where the distribution is not actually made in shares and the shareholder accepts cash from the company under an option given to him to receive cash in place of shares, the cash is assessable as income in accordance with IM1610.

1614. Distributions/foreign cos: Certificates of indebtedness

Published: 9/95

As regards liability in respect of dividends received in the form of certificates of indebtedness redeemable at a future date, see *Associated Insulation Products v Golder* 26 TC 231.

See also IM4580 as regards liability on the sale or transfer of such certificates.

21.4.4 Dividend reinvestment plans

The former Inspectors Manual continued:

1615. Dividend reinvestment plans

Published: 9/95

Some foreign companies, particularly in North America and Australia, establish dividend reinvestment plans for their shareholders. Such plans can be structured in a number of different ways, some of which result in liability under Case V when a dividend is declared, and others which do not. At one extreme is the pure bonus issue, when a dividend is declared payable in shares with no option for the shareholder to take cash. Alternatively a company may arrange for cash dividends to be paid to a third party, typically a bank, which then applies the dividends in the purchase of additional company shares in the market on behalf of the shareholder. The first situation falls within the principle of *IRC v Blott* (8 TC 107) – see IM1612. The second gives rise to a Case V charge because the reinvestment in the company is regarded as a voluntary application of income which has already arisen to the shareholder.

Between these two extremes lies a variety of situations, each of which must be considered by reference to their own facts to determine whether a Case V charge arises...

21.5 Income distribution from non-resident company: location of source

If a distribution from a non-resident company is income in nature, the question arises as to where is its source. There are many possible connecting factors, but the House of Lords held in *Bradbury v English Sewing Cotton* 8 TC 481 that the source of income from shares is situated in the place where the company is resident – not where it is incorporated or where the share register is kept. (This is a good illustration of how the income tax source rules may differ from the IHT/private international law situs rules.) This rule is clearly assumed in the way that the current legislation is drafted.

21.6 Distribution to non-shareholder

In *Aveling Barford v Perion* [1989] BCLC 626, a company (Aveling Barford) sold an asset at an undervalue to another company (Perion). The sale was made at the direction of the shareholder of Aveling Barford, and Perion was held on trusts for the benefit of the shareholder and their family. This was held to be a distribution (and so unlawful as the company had no distributable profits):

The fact that the distribution was to Perion rather than to Dr. Lee or his other entities which actually held the shares in Aveling Barford is in my judgment irrelevant.

The rule that a sale at an undervalue is a distribution has been changed by s.845 CA 2006 but that does not affect the separate point that a payment from a company to a non-shareholder may be classified as a distribution.

How does one reconcile this with s.829 CA 2006 which defines “distribution” to mean:

Every description of distribution of a company’s assets *to its members...*

There are two answers. The better view is that the word “to” may be read as “to or at the direction of”. Alternatively it might be said that there are two sets of rules relating to distributions from companies, the statutory rules and common law rules, and a distribution to a non-shareholder is a “distribution” for the purposes of the latter. It would not matter for company law which of these is correct.

What is the tax position on a distribution to a non-shareholder? If the company is owned by A, an individual, and the company makes a distribution to B, then B cannot be subject to income tax as B has no source of income. A (if UK resident) will be chargeable to tax on the distribution if A is a person receiving or entitled to the income: see s.689 ITTOIA. But there is no reason why A should be such a person.

What if the company is owned by a discretionary trust, and the company makes a distribution to B, a beneficiary? There are several possible solutions:

- (1) The distribution is income of B in the form of a company distribution.
- (2) The distribution is income of B in the form of a trust distribution.
- (3) The distribution is:
 - (a) income of the trustees in the form of a company distribution; and
 - (b) income of B in the form of a trust distribution.
- (4) The payment is a capital receipt of B.

Solution (1) seems sensible but is inconsistent with the source doctrine which states that one cannot receive income (for tax purposes) unless one has a source of income: B has no interest in the company. (B's interest in the discretionary trust is not an interest in the company.) A radical Supreme Court could perhaps reform the source doctrine to reach this result, but subject to that, solution (1) is not available.

Appropriate documentation would of course bring the matter into class (3) but in the absence of a payment to the trustees, it is artificial to regard them as in receipt of or entitled to income.

The choice is therefore between solution (2) and (4). It is clear that a payment from the company to a beneficiary is capable of being a capital payment, as that is assumed in IHT and CGT provisions (which will need separate consideration).¹² It is arguable that such payments are always a capital receipt. However it is considered that the payment may be income (solution (2)) or capital (solution (4)) depending on the circumstances of the distribution: the same principles apply as a distribution from the trustees: what power are the trustees using when they authorise the company to make the distribution. See 24.8 (Payment from discretionary trust: income or capital receipt?).

12 See 48.8 (Capital payment from close company); 58.16 (Transfer of value by close company). The transactions in securities code may also need to be considered.

21.7 DT relief

Article 10 OECD Model provides:

1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
 2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
 - a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;
 - b) 15 per cent of the gross amount of the dividends in all other cases.
- ...

Actual treaties vary considerably, particularly in the terms of art 10(2).

Persons within (a) are sometimes described as “**direct investors**” and those within (b) as “**portfolio investors**”, though the effective meaning of those terms depends on the wording of the treaty concerned.

In practice, non-resident individuals and non-resident companies do not need usually treaty relief.¹³ They qualify for non-residents IT relief which restricts the tax on dividends to an amount which is covered by the effective tax credit. The relief is relevant to:

- (1) Non-resident trusts (if they do not qualify for non-residents income tax relief, because of having UK resident beneficiaries).¹⁴
- (2) Individuals who are UK domestic-law resident, but treaty non-resident.
- (3) Tax year of arrival and departure.

Some older treaties give the treaty non-resident a right to be repaid surplus tax credit. However:

- (1) The number of treaties with a provision of this kind is small, and is diminishing as new treaties replace the older ones.
- (2) The reduction in the amount of the tax credit to one ninth usually means that there is nothing to be repaid.

¹³ See 39.1 (Non-residents IT relief).

¹⁴ See 39.5 (Trusts: UK beneficiary rule).

The International Manual provides:

343510. Background [April 2012]

...Dividends do not have income tax deducted but have an amount attached to them (not paid to the shareholder at the time of the dividend) called a tax credit. See CTA10/S1109. Some DTAs provide for payment of tax credit. You need to check the details of each DTA. There are two types of investor

- portfolio investors (someone who owns less than 10% of the total number of issued shares in a UK company) - the dividend article usually provides that the investor is entitled to a tax credit equal to that to which a UK resident individual would be entitled had he received the dividend. Any excess of the tax credit above a deduction of 15% of the aggregate of the dividend and the tax credit is payable.

- direct investors (where a company controls 10% or more of the voting power of the UK company paying the dividend) - the dividend articles of a small number of DTAs provide that the investor is entitled to a tax credit equal to one-half of that to which a UK resident individual would be entitled had he received the dividend. The relief allowable is a payment of that half tax credit minus 5% or 10% of the aggregate of the dividend plus the half tax credit.

343520. Portfolio Investors [April 2012]

The expression "portfolio investors" describes the great majority of shareholders. They include individual persons, pension funds, companies and others who have invested money in shares issued by the UK company. The number of shares owned by each investor may range from single figures to several million shares. If a shareholder owns 10% or more of the total number of voting shares that have been issued by a UK company they are called a "direct investor". See INTM343540.

Some Double Taxation Agreements (DTAs) contain provisions that allow a portfolio shareholder to claim payment of part of the tax credit. In these treaties the dividend article usually provides that the amount payable is equal to the tax credit minus 15% of the aggregate of the dividend and the tax credit.

Where the DTA does not provide for payment of tax credits and the shareholder is an individual (a person) see INTM343530.

The rate of tax credit that is attached to a UK dividend is one ninth of the dividend. The effect of this rate of tax credit is that there is no amount for a portfolio investor to claim (see Section 30(10) F(No2)A 1997).

Example

Dividend £1,000

Tax credit (one ninth) £111.11

Dividend plus tax credit £1,111.11

15% retained in the UK £166.66

Because the amount to be retained in the UK is greater than the original tax credit there is nothing to pay. £111.11 less £166.66 equals nothing.

343540. Direct investors [March 2007]

A "direct investor" may be defined as a company that controls 10% or more of the voting shares of the UK company that is paying the dividend. Many Double Taxation Agreements (DTAs) that provide for payment of tax credits specifically

exclude companies that either alone or together with associated companies control 10% or more of the voting power in the company that is paying the dividend. The claim forms contain a question that will allow you to identify these cases.

However, some DTAs contain provisions that specifically allow for payment of part of the tax credit to direct investors. The amount of relief that may be claimed by the non-resident shareholder is one half of the tax credit a UK resident would be entitled to minus 5% or 10% of the aggregate of the dividend plus half the tax credit.

The treaties that contain these special provisions that allow a direct investor to claim payment of part of the tax credit are

- Belgium, see example 1.
- Italy, see example 1.
- Luxembourg, see example 1.
- Netherlands, see example 1, but no amount is payable for dividends paid on or after 6 April 2011.
- Sweden, see example 1.
- Switzerland, see example 1 but no amount is payable for dividends paid on or after 6 April 2009.

Example 1

Rate of tax credit is one ninth of the dividend.

Dividend £1,000,000

Tax credit £111,111.11

Dividend plus half tax credit £1,055,555.55

5% of dividend plus half tax credit £52,777.77

Payment is calculated as half tax credit (£55,555.55) less 5% of dividend plus half tax credit (£52,777.77) equals £2,777.78.

Example 2

(Direct investor company resident in Canada.) Dividend paid on or after 6 April 1999 rate of tax credit is one ninth of the dividend.

Dividend £1,000,000

Tax credit £111,111.11

Dividend plus half tax credit £1,055,555.55

10% of dividend plus half tax credit £105,555.55

Because the amount to be retained in the UK is greater than the original tax credit there is nothing to pay. £55,555.55 less £105,555.55 equals nothing (see F(No2)Section 30(10) A 1997.

21.7.1 “Dividends”

Article 10(3) defines dividends:

The term "dividends" as used in this Article means income from shares, "jouissance" shares or "jouissance" rights, mining shares, founders' shares or other rights, not being debt-claims, participating in profits, as

well as income from other corporate rights which is subjected to the same taxation treatment as income from shares by the laws of the State of which the company making the distribution is a resident.

See Avery-Jones et al “The Definitions of Dividends & Interest in the OECD Model: Something Lost in Translation?” [2009] BTR 406.

21.7.2 *Dividends paid through PE*

Article 10(4) provides:

4. The provisions of paragraphs 1 and 2 shall not apply if the beneficial owner of the dividends, being a resident of a Contracting State, carries on business in the other Contracting State of which the company paying the dividends is a resident through a permanent establishment situated therein and the holding in respect of which the dividends are paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

21.7.3 *Dividends to treaty non-resident company*

Article 10(4) provides:

Where a company which is a resident of a Contracting State derives profits or income from the other Contracting State, that other State may not impose any tax on the dividends paid by the company, except insofar as such dividends are paid to a resident of that other State or insofar as the holding in respect of which the dividends are paid is effectively connected with a permanent establishment situated in that other State, nor subject the company's undistributed profits to a tax on the company's undistributed profits, even if the dividends paid or the undistributed profits consist wholly or partly of profits or income arising in such other State.

CHAPTER TWENTY TWO

ROYALTY INCOME

22.1 Royalties – Introduction

This chapter considers the income taxation of royalties. I use the term “**royalty income**” to mean royalties and other receipts from intellectual property. The topic requires a book to itself, and I focus on matters closest to the themes of this book.

I do not consider corporation taxation of royalties, or the EU interest and royalties directive 2003/49/EC of 3rd June 2003 which concerns interest and royalty payments made between associated companies of different member states. These topics would require long books to themselves.

22.2 Classification of royalty income for tax

Royalty income is classified for income tax purposes in one of three ways. Statute does not provide much terminology, so I coin the following terms:

(1) **Trade royalties**: royalties which constitute a receipt of a trade or profession.

(2) **Non-trade royalties**: royalties which are not trade royalties. These may be:

(a) **Annual payment royalties**: royalties which are annual payments

(b) **Non-annual payment royalties**.

The three categories are recognised in *Noddy Subsidiary Rights v IRC* 43 TC 458 at p.474:

It seems to me that, where you have this position, that a person owns an asset of any kind, whether physical or not, and grants licences under it, the activities which he carries on in connection with the grant of those licences may amount to a trade and then Case I of Schedule D applies. On the other hand, at the other end of the scale, the activities may

amount to the mere holding of an investment, so that the receipt of income is in the nature of pure income profit and then Case III of Schedule D applies. There may be intermediate cases in which Case VI of Schedule D might apply.

ITTOIA has changed the terminology but not the underlying categorisation.

22.3 Non-trade royalties

After the (somewhat unnecessary) introduction in accordance with the principles of plain English drafting, s.579(1) ITTOIA provides the charge to tax:

Income tax is charged on royalties and other income from intellectual property.¹

Section 580 ITTOIA provides:

- (1) Tax is charged under section 579 on the full amount of the income arising in the tax year.
- (2) Subsection (1) is subject to Part 8 (foreign income: special rules). ...

This incorporates the remittance basis for foreign source royalty income.

Non-trade royalties are taxable under chapter 2 part 5 ITTOIA. This is so whether or not the royalties are annual payments or non-annual payments. The distinction between (non-trade) royalties which are annual payments and those which are not (former DVI income) is important, because:

1 Section 579(2) ITTOIA defines intellectual property:

“In this section “intellectual property” means—

- (a) any patent, trade mark, registered design, copyright, design right, performer’s right or plant breeder’s right,
- (b) any rights under the law of any part of the UK which are similar to rights within paragraph (a),
- (c) any rights under the law of any territory outside the UK which correspond or are similar to rights within paragraph (a), and
- (d) any idea, information or technique not protected by a right within paragraph (a), (b) or (c).”

- (a) If the royalties are annual payments no expenses are deductible.
- (b) If royalties are “other than annual payments” then expenses are deductible. Section 582 ITTOIA provides:

- (1) This section applies for calculating the amount of income charged under section 579 other than annual payments.
- (2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible...

“Annual payment” is an opaque and unhelpful label for a technical term whose meaning is discussed in a large and rather difficult body of case law,² which cannot be discussed here.

22.4 Where is the source of non-trade royalties?

Foreign source royalties are outside the scope of withholding tax and (unless trade royalties) only taxed (if at all) as RFI, so the question of source matters to both payor and recipient.

What is the test to determine the source of non-trade royalties? The INT manual provides:

342520. Copyright royalties [April 2007]

If the copyright is exploited in the UK the royalty payment will be regarded as having a UK source and therefore within the provisions of [what is now s.906 ITA]. This is irrespective of the law governing the contract.

The same view is expressed in Hughes & Payne, “Payments for the use of computer software and the deduction of income tax therefrom” [2000] BTR 5 at p.10. It is considered that this is correct.

Another passage in the INT Manual offers a different test:

161130. The source rule – concessions [September 2011]

... If the owner of a right such as a patent, trademark or copyright is not

2 Section 582(7) ITTOIA specifies one rule: “The frequency with which payments are made is ignored in determining whether they are annual payments for the purposes of subsection (1).”

engaged in any trade to which the right relates but derives income by exploiting that right, the source of the income may be regarded for the purpose of credit as located in the country where the right is enforceable.

But as a result of developments in private international law, the place of enforcement is no longer a useful connecting factor for tax³ (even though in most cases it will be the same as the place of exploitation).

22.5 Withholding tax

Section 906 ITA provides:

- (1) This section applies to any payment made in a tax year if—
 - (a) it is a payment⁴ of
 - [i] any royalties, or
 - [ii] sums payable periodically, in respect of a relevant intellectual property right (see section 907),⁵
 - (b) it is one that is charged to income tax or corporation tax, and
 - (c) condition A or B is met.

3 See 19.6.5 (Impact of modern private international law).

4 Section 909(3) ITA extends withholding to payments on account:

(3) Section 906—

- (a) applies to payments on account of royalties as it applies to payments of royalties, and
- (b) applies to payments on account of sums payable periodically as it applies to payments of sums payable periodically.

5 Section 907 ITA defines “relevant intellectual property right”:

(1) In section 906 “a relevant intellectual property right” means—

- (a) a copyright,
- (b) a right in a design, or
- (c) the public lending right in respect of a book.

(2) In this section—

“copyright” does not include copyright in—

- (a) a cinematographic film or video recording, or
- (b) the sound-track of a cinematographic film or video recording, except so far as it is separately exploited,

“a right in a design” means the design right in a design, or the right in a registered design.

This definition takes film royalties outside the deduction of tax at source regime.

22.5.1 *Withholding tax conditions A and B*

Section 906(2) provides:

Condition A is that the usual place of abode of the owner of the right is outside the UK.

See 19.10 (Usual place of abode). Note the test is the place of abode of the owner of the right.

Condition B is an anti-avoidance rule. Section 906(3) ITA provides:

Condition B is that—

- (a) a person (“the seller”) has assigned the right to another person,
- (b) the usual place of abode of the seller is outside the UK,
- (c) the seller is entitled to periodical payments in respect of the right, and
- (d) the payments are in respect of that entitlement.

Section 906(4) ITA provides one exception:

But this section does not apply if the payment is made in respect of copies of works, or articles, which have been exported from the UK for distribution outside the UK.

Section 906(5) ITA imposes the obligation to withhold tax:

The person by or through whom the payment is made must, on making it, deduct from it a sum representing income tax on it at the basic rate in force for the tax year. ...

22.5.2 *Miscellaneous*

Section 908 ITA provides a deduction for commissions:

(1) If—

- (a) a payment to which section 906 applies is made through an agent who is UK resident, and
 - (b) the agent is entitled as against the owner of the right to deduct a sum as commission for services provided,
- section 906(5) and Chapters 8 (deduction at special rates), 15 and 16

(collection) apply as if the amount of the payment were the amount net of the sum deductible as commission.

(2) But if the person by or through whom the payment is made does not know the commission is payable, or does not know its amount—

- (a) the sum representing income tax required to be deducted under section 906 must be calculated in the first instance on the total amount of the payment, and
- (b) the return to be made under Chapter 15 or the account of the payment under Chapter 16, must be based on that total amount.

Section 909(1) ITA is a timing provision:

A payment to which section 906 applies is treated for all income and corporation tax purposes as made when it is made by the first person who makes it, not when it is made by or through any other person.

Section 909(2) ITA prevents contracting out:

If, under section 906, a sum representing income tax must be deducted from a payment, any agreement to make the payment without deduction of that sum is void.

22.6 Trade royalties

22.6.1 *Trading rules apply*

The recipient of trade royalties has income of a dual character. The recipient has trading profits but in general the receipt is also classified as “royalties” within the usual sense of the word.

Although the income has a dual character, there is only one charge to tax. The charge on trading profits under part 2 ITTOIA has priority over the charge on royalty income in part 5 ITTOIA; see s.575 ITTOIA.

22.6.2 *Source of trade royalty income*

The question whether the trading income has a UK source is naturally to be decided according to the rules which apply to trades/professions. Thus a UK resident trader has UK source trading profits even if the royalties come from abroad, since the trade is at least in part carried on in the UK.

What about trading income arising to a non-resident? There is commonwealth authority. In *Millin v IRC* a South African author received royalties from publishers in respect of works which were written by her in South Africa, but printed and published in England and the USA. The Appellate Division held that the income arose wholly from a source within South Africa:

... the source of the whole amount received for royalties was in the Union.⁶ It is true that in this case no capital in the ordinary sense of that term was employed by Mrs. Millin. It was the exercise of her wits and labour that produced the royalties. They were employed in the Union, and it matters not, on the analogy of the *Overseas Trust* case,⁷ that the grant to her publishers of the right to publish her book was contained in a contract made in England. Her faculties were employed in the Union both in writing the book and in dealing with her publishers, and, therefore, on the test applied in the cases cited, the source of the whole of her income would be in the Union.⁸

22.6.3 *Position of payor of trade royalties*

If the royalties have a UK source, and the owner of the royalties is not in the UK, the deduction at source rules in principle apply. This is so even if the royalties are trade royalties, ie are taxable as trading receipt of the recipient. The fact that the recipient of the royalties is trading, in the UK or not, does not prevent the payment from being “royalties”.

Similar principles apply to interest, which can also have the dual character of being interest and a trading receipt.

22.6.4 *Professional author exemption*

The International Manual provides:

342590. Professional authors [April 2007]

Copyright royalties that are payable to an author/originator of a literary, dramatic, musical or artistic work that has been created in the ordinary

6 The Union of South Africa (1910-1961) was the predecessor to the present Republic of South Africa.

7 *Overseas Trust Corporation v IRC* [1926] AI 444, 2 SATC 71.

8 [1928] AD 207 at p.216.

course of his profession (an “author by profession”) fall into the same category as fees for professional services and do not come under [deduction at source rules]. Payments that are made to an author by profession who usually lives overseas are therefore not subject to deduction of UK income tax at source. This follows the decisions in *Carson v Cheyney’s Executor* (38 TC 240) and *Hume v Asquith* (45 TC 251) ...

A Professional Author can be classed as such if he is clearly the originator of the work(s) concerned. If the claimant is not the originator of the work but has acquired the rights from that person they may not be treated as a professional author.

This practice goes back to a Parliamentary statement:

Mr Ashton asked the Chancellor of the Exchequer what steps he takes to recover tax on fees paid to British Nationals living abroad by publishers in this country.

Mr Roy Jenkins. [The deduction at source rule for royalties] requires any person making such payments to deduct tax at the [basic] rate and to pay it over to the Inland Revenue. I am advised that this does not apply to payments made to those who are authors by profession...⁹

Payments to a professional author are said to be fees for services and not “royalties”. This is odd, though the oddity is long-established and based on decisions of high authority. In practice it only matters where the author is resident in a jurisdiction without a DTA conferring relief. That would be fairly unusual, which may why the rule has survived.

The same rule must apply to post-cessation receipts. Payments to the executors of an author which are exempt from deduction at source (because they are not payment of “royalties”) continue to be exempt after the death of the author.

22.7 DT relief for royalties

Art 10.1 OECD model treaty provides:

⁹ Hansard HC debates 10 November 1969 vol 781 col 39.

Royalties¹⁰ arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

Art 10.3 and 10.4 contain two standard exceptions not discussed here.¹¹

22.7.1 *Credit for foreign tax on royalties*

Foreign tax may be deducted at source from foreign trade royalties received by a person subject to UK tax on the trading profits. ESC B8 provides:

B8 Double taxation relief: income consisting of royalties and “know-how” payments

Payments made by a person resident in an overseas country to a person carrying on a trade in the UK as consideration for the use of, or for the privilege of using, in the overseas country any copyright, patent, design, secret process or formula, trademark or other like property

[1] may in law be payments the source of which is in the UK,

[2] but are nevertheless treated for the purpose of credit (whether under double taxation agreements or by way of unilateral relief) as income arising outside the UK except to the extent that they represent

10 Article 10.2 defines royalties:

The term “royalties” as used in this Article means payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films, any patent, trade mark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience.

11 “3. The provisions of paragraph 1 shall not apply if the beneficial owner of the royalties, being a resident of a Contracting State, carries on business in the other Contracting State in which the royalties arise through a permanent establishment situated therein and the right or property in respect of which the royalties are paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

4. Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the royalties, having regard to the use, right or information for which they are paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.”

consideration for services (other than merely incidental services) rendered in this country by the recipient to the payer.

[1] is wrong or poorly expressed. The payments are not “payments the source of which is in the UK”. They are receipts of a trade, and the *trading profits* (which are distinct from the payments) is income whose source is in the UK.

[2] is law and not concession, but it does not matter.

INT Manual expands on this:

161130. The source rule – concessions [September 2011]

(B) Extra-Statutory concession ESC/B8 - DTR: royalties and 'know how' payments]

[The Manual sets out ESC B8 and continues:]

b) Traders resident in the UK are not entitled to claim credit for any tax which is levied in the foreign country in respect of payments for services which are rendered in the UK and are not merely incidental services. In any such case the net amount of the payment (after deduction of any foreign tax borne by them on the payments) is included in the computation of profits for UK tax purposes.

The prohibition on credit for foreign tax charged on payments for services rendered in the UK may be overruled by the terms of those double taxation agreements which have a royalties Article which includes technical services in the definition of royalties (see INTM153130) or a separate technical fees Article (see INTM153140) and those agreements deem the source of such payments to be in the country of which the payer is a resident. In such cases, even though the services are rendered in the UK, credit is due for the foreign tax charged on these payments.

22.7.2 *Withholding tax when DT relief applies*

The UK operates a self-certification system. Section 911 ITA provides:

(1) This section applies if—

- (a) a company pays a royalty from which it is required to deduct a sum representing income tax under Chapter 6 or 7,
- (b) the income tax in respect of the payment is collectible under Chapter 15 or 16, and
- (c) the company reasonably believes that, at the time the payment is made, the payee is entitled to relief in respect of the payment

under double taxation arrangements.

(2) The company may calculate the sum to be deducted from the payment under Chapter 6 or 7 by reference to the treaty rate.¹²

(3) But, if the payee is not at the time entitled to such relief, this Part has effect as if subsection (2) had never applied in relation to the payment.

This only applies to company payors. In other cases, advance clearance is needed under the procedure discussed in the context of interest; see 19.12.3 (Relief from withholding tax when DTA relief applies).

Section 912 ITA allows HMRC to require withholding:

(1) This section applies if an officer of Revenue and Customs is not satisfied that the payee will be entitled to relief under double taxation arrangements in respect of one or more payments of royalties that a company is to make.

(2) The officer may direct the company that section 911 is not to apply to the payment or payments.

(3) A direction under subsection (2) may be varied or revoked by a later direction.

Section 913 provides supplementary definitions:

(1) In sections 911 and 912 “royalty” includes—

(a) a payment received as consideration for the use of, or the right to use, a copyright, patent, trade mark, design, process or information, and

(b) the proceeds of the sale of the whole or part of any patent rights.

(2) In sections 911 and 912 “payee” means the person beneficially entitled to the income in respect of which the payment is made.

22.8 Films and sound recordings

Special rules apply to the exploitation of films and sound recordings. Section 609 ITTOIA provides:

(1) Income tax is charged on income from a business involving the

¹² Section 911(4) ITA defines “treaty rate”: “In this section “the treaty rate” means the rate of income tax appropriate to the payee under the arrangements.”

exploitation of films or sound recordings where the activities carried on do not amount to a trade.

Such a business is referred to in this Chapter as a “non-trade business”.

(2) Expressions which are used in this Chapter and in Chapter 9 of Part 2 (trade profits: films and sound recordings) have the same meaning in this Chapter as they do in that Chapter.

Section 610 ITTOIA provides:

(1) Tax is charged under this Chapter on the full amount of the income arising in the tax year. ...

(3) This section is subject to Part 8 (foreign income: special rules).

The charge applies to UK and foreign source income, but this incorporates the remittance basis for foreign source income.

Section 612 ITTOIA provides:

(1) This section applies for calculating the amount of income charged under this Chapter.

(2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible. ...

613 Application of trading income rules to non-trade businesses

The provisions of Chapter 9 of Part 2 apply in relation to non-trade businesses as they apply in relation to trades but as if—

(a) references to a basis period were to a tax year, and

(b) references to anything not constituting trading stock of a trade were omitted.

CHAPTER TWENTY THREE

PENSION INCOME

23.1 Pension Income – Introduction

The taxation of pensions requires a book to itself.¹ In this chapter I focus the matters closest to the themes of this book.

The legislation is in part 9 ITEPA. After the usual outline in accordance with the principles of plain English drafting, which does not need to be considered here, there follows a cascade of definitions which need to be considered briefly.

23.1.1 “*Pension income*”

This term is defined in s.566(2) ITEPA:

“Pension income” means the pensions, annuities and income of other types to which the provisions listed in subsection (4) apply.
This definition applies for the purposes of the Tax Acts.

Section 566(4) sets out 13 categories of income of which three are discussed here, those in chapters 3, 4, and 11, which I describe as UK pension, foreign pensions, and commonwealth government pensions:

These are the provisions referred to in subsection (2)—

Provision	Income	Chapter (of this Part)
Section 569	UK pensions	Chapter 3
Section 573	Foreign pensions	Chapter 4
Section 577	UK social security pensions	Chapter 5
Section 579A	Pensions under registered pension schemes	Chapter 5A
Section 609	Annuities for the benefit of dependants	Chapter 10

1 And indeed such a book as been written: Hardy, *Pensions Taxation* (2012).

Section 610	Annuities under sponsored superannuation schemes	Chapter 10
Section 611	Annuities in recognition of another's services	Chapter 10
Section 615	Certain overseas government pensions paid in the UK	Chapter 11
Section 619	The House of Commons Members' Fund	Chapter 12
Section 629	Pre-1973 pensions paid under OPA 1973	Chapter 14
Section 633	Voluntary annual payments	Chapter 15
Section 636B	Pensions treated as arising from payment of trivial commutation lump sums and winding-up lump sums under registered pension schemes:	Chapter 15A
Section 636C	Pensions treated as arising from payment of trivial commutation lump sum death benefits and winding-up lump sum death benefits under registered pension schemes:	Chapter 15A

23.1.2 “Taxable pension income” and “Net taxable pension income”

These terms are defined in s.567 ITEPA. “Net” taxable pension income brings in rules for deductions, not discussed here. “Taxable” pension income is a label which brings in a number of rules, for in the various situations where the statute desires to bring pension income into charge it provides that it is “taxable”.

23.2 UK pension

Section 569 ITEPA provides:

- (1) This section applies to any pension² paid by or on behalf of a person who is in the United Kingdom.
- (2) But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.

I refer to this as “**a UK pension**”. Section 571 ITEPA provides:

If section 569 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

2 “Pension” for the taxation of UK pensions is defined in 570 ITEPA. The definition (perhaps for historic reasons) is different from the definition which applies for foreign pensions.

Thus a UK pension is taxed on an arising basis.

23.3 Foreign pension

Section 573 ITEPA provides:

- (1) This section applies to any pension³ paid by or on behalf of a person who is outside the UK to a person who is resident in the UK.
- (2) But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.

I refer to this as **“a foreign pension”**.

Section 575(1) ITEPA provides:

If section 573 applies, the taxable pension income for a tax year is the full amount of the pension income arising in the tax year, but subject to subsections (2) and (3).

An arising basis taxpayer is allowed a 10% deduction from foreign pensions: s.575(2) ITEPA provides:

The full amount of the pension income arising in the tax year is to be calculated on the basis that the pension is 90% of its actual amount, unless as a result of subsection (3) the pension income is charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

The wording is somewhat unmathematical but the meaning is clear. The 10% deduction was introduced when the remittance basis on foreign pensions was abolished (except for foreign domiciliaries) in 1974. It is difficult to see a good reason for it but presumably this was a political *douceur* to ease the restriction to the remittance basis, and which has survived ever since. The deduction does not apply to a remittance basis taxpayer whose pension is taxed on the remittance basis. One relief was thought to suffice; fair enough. The individual may always choose to be

3 “Pension” for the taxation of foreign pensions is defined in 574 ITEPA. The definition (perhaps for historic reasons) is different from the definition which applies for UK pensions.

taxed under an arising basis.

Section 575(3) ITEPA provides:

That pension income is treated as relevant foreign income for the purposes of Chapters 2 and 3 of Part 8 of [ITTOIA] (relevant foreign income: remittance basis and deductions and reliefs).

The significance of treating the income as RFI is that the income can qualify for the remittance basis.

23.4 Commonwealth government pensions

23.4.1 “Commonwealth government pension”

Section 615 ITEPA provides:

- (1) This section applies to a pension if conditions A, B and C are met.
- (2) Condition A is that the pension—
 - (a) is payable—
 - (i) to a person who has been employed in overseas government service, or
 - (ii) to the widow, widower, surviving civil partner, child, relative or dependant of a person who has been employed in overseas government service, and
 - (b) is payable in respect of that service.
- (3) Condition B is that the pension—
 - (a) is payable in the United Kingdom, and
 - (b) is payable to a person who is resident in the United Kingdom.
- (4) Condition C is that the pension is payable by or on behalf of the government of—
 - (a) a country which forms part of Her Majesty’s dominions,
 - (b) any other country which is for the time being mentioned in Schedule 3 to the British Nationality Act 1981, or
 - (c) any territory under Her Majesty’s protection.
- (5) But condition C is not met if the pension is payable out of the public revenue of the United Kingdom or Northern Ireland.
- (6) In condition A the references to a person being employed in overseas government service are to the person being employed outside the United Kingdom—
 - (a) in the service of the Crown, or
 - (b) in service under the government of a country or territory which

falls within subsection (4).

(7) In this Chapter “pension” includes a pension which is paid voluntarily or is capable of being discontinued.

The EI manual provides:

74006. Certain overseas government pensions paid in the United Kingdom [February 2007] ...

Her Majesty’s dominions

The Dependant Territories are:

Anguilla, Bermuda, British Antarctic Territory, British Indian Ocean Territory, British Virgin Islands, Cayman Islands, Falkland Islands, Gibraltar, Montserrat, Pitcairn, Henderson, Ducie and Oeno Islands, St Helena, St Helena Dependencies (Ascension Island, Tristan da Cunha), South Georgia and South Sandwich Islands, Turks and Caicos Islands

Countries listed in Schedule 3 BNA 1981

Antigua and Barbuda, Australia, The Bahamas, Bangladesh, Barbados, Belize, Botswana, Brunei, Canada, Republic of Cyprus, Dominica, Fiji, The Gambia, Ghana, Grenada, Guyana, India, Jamaica, Kenya, Kiribati, Lesotho, Malawi, Malaysia, Maldives, Malta, Mauritius, Namibia, Nauru, New Zealand, Nigeria, Pakistan, Papua New Guinea, Saint Christopher and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Seychelles, Sierra Leone, Singapore, Solomon Islands, South Africa, Sri Lanka, Swaziland, Tanzania, Tonga, Trinidad and Tobago, Tuvalu, Uganda, Vanuatu, Western Samoa, Zambia, Zimbabwe.

Territories under Her Majesty’s protection

There are no longer any protectorates or protected states. ...

I refer to pensions within this definition as “commonwealth government pensions” (though that is not a wholly accurate label).

23.4.2 *Taxation of commonwealth government pensions*

Section 616 ITEPA provides:

If section 615 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

Section 617 ITEPA provides for the 10% deduction:

A deduction of 10% is allowed from an amount of taxable pension income determined under section 616 (see section 567).

The remittance basis is not applicable, perhaps because the pensions are “payable within the UK” and so regarded as received here.

23.5 Canadian RRSP and RRIF

The HMRC view was set out in the former Inspectors Manual:

1622. Canadian RRSPs Published: 9/95

Canadian Registered Retirement Savings Plans (RRSPs) are tax-deferral vehicles commonly used by taxpayers working in Canada to provide an income or lump sum on retirement. The plan holder is permitted to set aside a certain proportion of his income (on which relief from Canadian tax is received) for investment either directly by the individual or, more usually, through a financial institution such as a bank or insurance company. On retirement or earlier, the taxpayer may withdraw a lump sum from the Plan or roll-over the proceeds into the purchase of an annuity. A lump sum withdrawal is subject to Canadian income tax, but if the proceeds are reinvested in an annuity, only the annuity is taxed.

The tax consequences for a UK-resident holder of an RRSP are as follows:

- 1) income invested in the Plan is not eligible for UK tax relief;
- 2) the Plan is treated as ‘fiscally transparent’, that is income arising within the Plan is taxable in the UK as if the Plan did not exist, notwithstanding the tax-free accrual of income in Canada.
- 3) a lump sum withdrawal from the Plan is not taxable as such but the disposal of assets held within the Plan to effect the withdrawal may produce a UK tax charge. For example, a disposal of chargeable assets held within the Plan might produce a capital gains tax charge.
- 4) if an annuity is purchased the non-capital element will be taxable under Case V of Schedule D (see AP896 onwards). A purchased life annuity should be submitted to Financial Institutions Division 1 for determination of the proportion of the annuity which should be regarded as capital.
- 5) Canadian withholding tax at a rate of 25% is deducted from withdrawals made by Plan holders who are not-resident in Canada. No tax credit relief is available in the UK for this tax where a tax charge arises in the UK (see (3) above), because the Canadian tax is imposed on a lump sum withdrawal from the Plan, whereas UK tax is imposed on gains resulting from the disposal of assets held within the Plan.
- 6) under Canadian domestic law, tax at 10% may be withheld from payments of annuities derived from RRSPs, but it is understood that the Canadian tax authorities take the view that where such annuities are paid to UK-residents they will be exempt from Canadian tax under Article 17(1) of the Canada/UK Double Taxation Convention. If a taxpayer claims credit for

Canadian tax paid on an annuity he should be advised to seek repayment from Revenue Canada and credit relief will not be allowable in the UK.

1623. Canadian RRIFs Published: 9/95

When an RRSP (see IM1622) matures, the Plan holder may, as an alternative to withdrawing the funds or buying an annuity, use the property held within the Plan to establish a Registered Retirement Income Fund (RRIF).

An essential feature of an RRIF is that a minimum amount, arrived at by dividing the fair market value of the property held within the Fund at the beginning of the year by the difference between 90 and the age of the Fund holder at the beginning of the year, must be paid out to the investor each year. In this way, cash benefits are provided each year up to age 90. If, in any particular year, additional funds are required, these may be withdrawn, so long as the total does not exceed the value of the property held in connection with the Fund immediately before the withdrawal.

Income arising within an RRIF is tax-free in Canada, but there is a Canadian tax charge on withdrawals from the Fund.

For UK tax purposes, the treatment of RRIFs follows that for RRSPs indicated at IM1622(2), (3) and (5). It is understood that Revenue Canada regards the payments made each year as pension income and treats them as exempt from Canadian tax where paid to a UK-resident, under Article 17(1) of the UK/Canada Double Taxation Convention. The Canadian concept of 'periodic pension income' has no relevance, however, in the UK, where it is the income earned by the Fund's investments which is taxable, while withdrawals do not themselves attract a UK tax charge.

23.6 US IRAN

The Inspectors Manual also dealt with US IRANs:

1625. United States Individual Retirement Annuities Published: 9/95

Under Individual Retirement Annuities (IRANs), contributions are used to purchase an annuity from a life assurance company. No UK tax liability arises until the annuity becomes payable, when the annuity payments become chargeable under Case V of Schedule D.

If an IRAN life annuity was paid for partly or wholly by an employer, the whole of each annuity payment will be taxed as income, but if there was no employer's contribution the provisions of ICTA, s 656 apply so as to exclude the capital element. Any annuity within ICTA, s 656 should be submitted to Business Tax (Technical) for determination of the capital element.

23.7 Double Taxation relief

Article 18 OECD Model Convention provides:

Subject to the provisions of paragraph 2 of Article 19 [government service], pensions and other similar remuneration paid to a resident of a Contracting State in consideration of past employment shall be taxable only in that State.

23.7.1 *Rationale for residence based taxation*

Why does the treaty opt for residence based taxation rather than source based taxation? The OECD commentary provides:

1. According to this Article, pensions paid in respect of private employment are taxable only in the State of residence of the recipient. Various policy and administrative considerations support the principle that the taxing right with respect to this type of pension, and other similar remuneration, should be left to the State of residence. For instance, the State of residence of the recipient of a pension is in a better position than any other State to take into account the recipient's overall ability to pay tax, which mostly depends on worldwide income and personal circumstances such as family responsibilities. This solution also avoids imposing on the recipient of this type of pension the administrative burden of having to comply with tax obligations in States other than that recipient's State of residence.

This argument is not very strong. The commentary later gives a better reason, the old difficulty of identifying a source:

19. ... alternative provisions under which there is either exclusive or limited source taxation rights with respect to pensions require a determination of the State of source of pensions. Since a mere reference to a pension "arising in" a Contracting State could be construed as meaning either a pension paid by a fund established in that State or a pension derived from work performed in a State, States using such wording should clarify how it should be interpreted and applied.

19.1 Conceptually, the State of source might be considered to be the State in which the fund is established, the State where the relevant work has been performed or the State where deductions have been claimed. Each of these approaches would raise difficulties in the case of individuals who work in more than one State, change residence during their career or derive pensions from funds established in a State other than that in which they have worked. For example, many individuals now spend significant parts of their careers outside the State in which

their pension funds are established and from which their pension benefits are ultimately paid. In such a case, treating the State in which the fund is established as the State of source would seem difficult to justify. The alternative of considering as the State of source the State where the work has been performed or deductions claimed would address that issue but would raise administrative difficulties for both taxpayers and tax authorities, particularly in the case of individuals who have worked in many States during their career, since it would create the possibility of different parts of the same pension having different States of source.

It is not surprising that there is a wide variety of provision. Some possibilities are discussed in the OECD commentary, but that is not set out here.

23.7.2 *“Pensions and other similar remuneration”*

The OECD commentary provides:

3. The types of payment that are covered by the Article include not only pensions directly paid to former employees but also to other beneficiaries (e.g. surviving spouses, companions or children of the employees) and other similar payments, such as annuities, paid in respect of past employment. The Article also applies to pensions in respect of services rendered to a State or a political subdivision or local authority thereof which are not covered by the provisions of paragraph 2 of Article 19. The Article only applies, however, to payments that are in consideration of past employment; it would therefore not apply, for example, to an annuity acquired directly by the annuitant from capital that has not been funded from an employment pension scheme. The Article applies regardless of the tax treatment of the scheme under which the relevant payments are made; thus, a payment made under a pension plan that is not eligible for tax relief could nevertheless constitute a “pension or other similar remuneration” (the tax mismatch that could arise in such a situation is discussed below).

4. Various payments may be made to an employee following cessation of employment. Whether or not such payments fall under the Article will be determined by the nature of the payments, having regard to the facts and circumstances in which they are made, as explained in the following two paragraphs.

5. While the word “pension”, under the ordinary meaning of the word,

covers only periodic payments, the words “other similar remuneration” are broad enough to cover non-periodic payments. For instance, a lump-sum payment in lieu of periodic pension payments that is made on or after cessation of employment may fall within the Article.

6. Whether a particular payment is to be considered as other remuneration similar to a pension or as final remuneration for work performed falling under Article 15 is a question of fact. For example, if it is shown that the consideration for the payment is the commutation of the pension or the compensation for a reduced pension then the payment may be characterised as “other similar remuneration” falling under the Article. This would be the case where a person was entitled to elect upon retirement between the payment of a pension or a lump-sum computed either by reference to the total amount of the contributions or to the amount of pension to which that person would otherwise be entitled under the rules in force for the pension scheme. The source of the payment is an important factor; payments made from a pension scheme would normally be covered by the Article. Other factors which could assist in determining whether a payment or series of payments fall under the Article include: whether a payment is made on or after the cessation of the employment giving rise to the payment, whether the recipient continues working, whether the recipient has reached the normal age of retirement with respect to that particular type of employment, the status of other recipients who qualify for the same type of lump-sum payment and whether the recipient is simultaneously eligible for other pension benefits. Reimbursement of pension contributions (e.g. after temporary employment) does not constitute “other similar remuneration” under Article 18. Where cases of difficulty arise in the taxation of such payments, the Contracting States should solve the matter by recourse to the provisions of Article 25.

7. Since the Article applies only to pensions and other similar remuneration that are paid in consideration for past employment, it does not cover other pensions such as those that are paid with respect to previous independent personal services. Some States, however, extend the scope of the Article to cover all types of pensions, including Government pensions; States wishing to do so are free to agree bilaterally to include provisions to that effect.

23.7.3 Social security income

The OECD commentary provides:

24. Depending on the circumstances, social security payments can fall

under this Article as “pensions and other similar remuneration in consideration of past employment”, under Article 19 as “pension[s] paid by, or out of funds created by, a Contracting State [...] in respect of services rendered to that State...” or under Article 21 as “items of income [...] not dealt with in the foregoing Articles”. Social security pensions fall under this Article when they are paid in consideration of past employment, unless paragraph 2 of Article 19 applies (see below). A social security pension may be said to be “in consideration of past employment” if employment is a condition for that pension. For instance, this will be the case where, under the relevant social security scheme:

- the amount of the pension is determined on the basis of either or both the period of employment and the employment income so that years when the individual was not employed do not give rise to pension benefits,
- the amount of the pension is determined on the basis of contributions to the scheme that are made under the condition of employment and in relation to the period of employment, or
- the amount of the pension is determined on the basis of the period of employment and either or both the contributions to the scheme and the investment income of the scheme.

25. Paragraph 2 of Article 19 will apply to a social security pension that would fall within Article 18 except for the fact that the past employment in consideration of which it is paid constituted services rendered to a State or a political subdivision or a local authority thereof, other than services referred to in paragraph 3 of Article 19.

26. Social security payments that do not fall within Articles 18 or 19 fall within Article 21. This would be the case, for instance, for payments made to self-employed persons as well as a pension purely based on resources, on age or disability which would be paid regardless of past employment or factors related to past employment (such as years of employment or contributions made during employment).

23.8 US Pensions and IRAs

The DTR Manual discusses the USA/UK DTT:

19876. Pensions: US Social Security Act [September 2011]

...Article 17(3) now specifically provides for exclusive residence-country taxation of social security benefits. Like the old Agreement it provides that payments made by one of the Contracting States under the provisions of its social security or similar legislation to a resident of the other Contracting State

will be taxable only in the other Contracting State. The result is precisely the same as in the old Agreement.

Pensions paid by the United States government to former members of the US armed forces (or to their surviving spouses or dependent children) in respect of their period of service continue to be regarded as paid for services rendered to the United States. Such pensions therefore come within Article 19 (Government Service) of the agreement and are exempt from United Kingdom tax unless, exceptionally, the recipient is both a national and a resident of the United Kingdom in which case the pension is taxable only in the United Kingdom.

19876A. Pensions from 2003 [September 2011]

Article 17 in the new Agreement is a fairly standard pensions article, which provides for the taxation of pensions and other similar remuneration only in the state of residence of the beneficial owner. But there are two provisions that have generated particular interest. The new Agreement applies from 1st January 2004 for US taxes and 6th April 2003 for UK Income Tax.

Paragraph 1(a) sets out the general rule above. For this purpose, a payment is treated as a pension or other similar remuneration if it is a payment under a pension scheme, as defined at Article 3(1)(o).

IRAs

However, the residence state, under paragraph 1(b), must exempt from tax any amount of such pensions or other similar remuneration that would be exempt from tax in the State in which the pension scheme is established if the recipient were a resident of that State. Thus, for example, a distribution from a US “IRA” to a UK resident will be exempt from tax in the UK to the same extent the distribution would be exempt from tax in the US.

An IRA is a trust (or similar arrangement known as a custodial account) set up for the exclusive benefit of the taxpayer and, on his death, nominated beneficiaries, which satisfies certain conditions imposed by United States tax law. Contributions to an IRA are tax deductible in the United States and the funds can be invested in a wide range of investments. IRA funds can be withdrawn at any time, but if withdrawals are made before the taxpayer reaches the age of 59½ he must pay an additional penalty tax of 10% unless he is disabled.

...

IRAs: Year 2003/04 et seq.

... The new Agreement takes precedence and this will mean that no liability will arise until it would have done so under US tax law. Under US law, this will be when distributions are made. As indicated above, this will generally not be before age 59½ but must be before age 70½. The important point to note is that income will no longer be assessable in the UK on the basis of income arising within the IRA.. Any case of doubt or difficulty should be referred to HMRC, Customs & International, Tax Treaty Team.

Lump Sums

Under the old Agreement, a lump-sum payment from a pension scheme was taxable only in the country of residence. So if an individual moved from the US to the UK before receiving a lump sum from a US pension scheme, they would be taxable on the lump sum neither in the US (because of the treaty) nor in the

UK (which does not tax lump sums anyway).

The new provision prevents this occurring by providing that a lump-sum payment derived by a resident of one State from a pension scheme established in the other State shall be taxable only in that other State.

The provision preserves the exemption from income tax of a lump sum relevant benefit where it is paid by a UK approved pension scheme to a beneficial owner who is a US resident. However, Article 1(4) will apply in respect of US citizens as the provisions of Article 17(2) are not amongst those listed at Article 1(5). So the US are able to tax lump sums received by US citizens from UK schemes.

19876B. Pension Contribution [September 2011]

The new Agreement which applies from 1st January 2004 for US taxes and 6th April 2003 for UK Income Tax contains an Article dealing with pension contributions. It also touches on the taxation of the income, profits and gains accruing to pension schemes.

The term “pension scheme” is defined for the purposes of the treaty at Article 3(1)(o). This means that Treaty benefits are for approved schemes only. As section 615 ICTA 1988 schemes, which are UK established trusts for non-residents, are not approved they do not come within the definition of “pension scheme” in Article 3(1)(o) because they are not “generally exempt from income taxation in that State”. They are therefore not included in the list in the Exchange of Notes.

So called US section 401(k) plans are included within the definition of a pension scheme as they are within the definition of a pension scheme in Article 3(1)(o) because they are a type of section 401(a) plan.

23.8.1 *Contributions*

The DT Manual continues:

It is a feature of several UK treaties from 2003 onwards that pension contributions made in one country are recognised for tax purposes in the other. The general premise of these is that if a member of a pension scheme established in one country goes to work (as an employee or in a self-employed capacity) in the other country, the state of residence will not tax the scheme member on income earned by the scheme unless it is paid to him (or for his benefit). Nor will tax be payable if income is transferred to another pension scheme until the benefits are actually received.

Under the new Agreement, contributions to the scheme by that member (or those paid on his behalf) will be tax-deductible in the state of residence. In the same way, benefits accrued under the scheme, or employer contributions to the scheme, will not be treated as part of his taxable income and those contributions will be tax-deductible for the employer. The reliefs available cannot exceed those allowed by the state of residence for contributions of the same amount to a scheme established in the state of residence.

The conditions for getting the relief are as follows

- contributions were made by or on behalf of the individual or (in the case of an

employee) his employer to the pension scheme (or to a similar scheme for which it was substituted) before the individual began to exercise an employment or self-employment in the other contracting state, and

- the competent authority of the other State agrees that the pension scheme generally corresponds to a pension scheme established in that other State.

Where someone comes to work in the UK we will regard the first condition as having been met if the individual was a member of the US scheme before beginning to exercise an employment or self-employment in the UK.

The types of scheme that would be accepted as “generally corresponding” are those listed in the Exchange of Notes.

Relief will be restricted where contributions to a pension scheme are deductible or excludable in computing a person’s taxable income in the host country if he is subject to tax there not on his total income but only on amounts remitted to that country. Relief is available only on a corresponding proportion of the pension contributions.

An example

Individual’s total income, profits and gains	£100,000
Income, profits and gains remitted to the UK	£90,000
Individual’s contributions to US pension scheme	£5,000

Contributions deductible in computing individual’s UK taxable income - £4,500 (i.e. 90% of individual’s total contributions).

CHAPTER TWENTY FOUR

DISCRETIONARY TRUSTS: INCOME TAX

24.1 Discretionary trusts – introduction

This chapter is concerned with the income taxation of discretionary trusts. The topic requires a book to itself. This chapter focuses on the matters closest to the theme of this work but it is necessary to review the general rules to understand these matters in their context.

The starting point is to appreciate that a receipt from a discretionary trust may be income (“an income distribution” or “an income receipt”) or capital (“a capital distribution”) in the hands of the recipient. I use the term “**discretionary income payment**” to refer to a payment made from a trust to a beneficiary at the discretion of trustees, which is income (not capital) in the hands of the beneficiary. The statutory term is “discretionary payment” (it is assumed, though not expressly stated, that the payment is an income distribution).

In outline, there are three tiers of IT charges.

Tier (1): Charge on trustees on the receipt of income

At this tier it is necessary to distinguish resident and non-resident trustees:

- (a) UK resident trustees are charged on all their income
- (b) Non-resident trustees are charged on UK source income only.

Tier (2): Charge on trustees on making a discretionary income payment

At this tier it is also necessary to distinguish resident and non-resident trustees:

- (a) UK resident trustees pay this charge.
- (b) Non-resident trustees do not pay this charge.

Tier (3): Charge on beneficiaries on receiving a discretionary income payment

At this tier it is necessary to distinguish resident and non-resident beneficiaries:

- (a) UK resident beneficiaries: charge on all trust income
- (b) Non-resident beneficiaries: charge on UK source trust income (ie UK resident trusts) only.

Two sets of tax credits (more or less) eliminate the triple taxation which would otherwise result.

- (1) Tax paid at tier (1) enters a “tax pool” and is allowed as a credit for the tax at tier (2) so that no additional tax may be paid at tier (2). I refer to this as **“the trustees tax pool credit”**.
- (2) The tax at tier (2) is a credit for the tax at tier (3), and beneficiaries who are not top rate taxpayers or who are entitled to some reliefs may reclaim this tax. I refer to this as **“the beneficiary’s tax credit”**.

Where the trustees tax pool credit fails to provide relief, there are further statutory and concessionary reliefs.

Section 462 ITA provides an overview of the layout of the legislation:

- (1) This Part [part 9 ITA] sets out special rules about settlements and trustees.
- (2) Chapter 2 contains general provision about settlements and trustees, for example, definitions of expressions relating to settlements.
- (3) Chapter 3 provides for income tax to be charged at the dividend trust rate or at the trust rate on certain amounts included in the net income of the trustees of a settlement.
- (4) Chapter 4 provides—
 - (a) for expenses of the trustees of a settlement to be set against the trustees' trust rate income (see section 463(2)), and
 - (b) consequentially, for the amount of the trust rate income to be reduced.
- (5) Chapter 5 qualifies section 479 (which is in Chapter 3) in the case of the trustees of an approved share incentive plan.
- (6) Chapter 6 provides that the first slice of the trust rate income of the trustees of a settlement is not to be charged at the dividend trust rate or at the trust rate.
- (7) Chapter 7 deals with the treatment of payments made by the trustees of a settlement in the exercise of a discretion ...

I do not consider the vexed topic of trustees expenses (chapters 4 and 8), share incentive plans (chapter 5) or the relief for the first (small) slice of income (chapter 6). I do not consider the position of corporate beneficiaries.

In this chapter when I refer to a trust, I am referring to a discretionary

trust, and assume that the trust is not settlor-interested (or if it is, that s.624 does not apply).

24.2 Tier 1: charge on trustees on receipt of income

There are special rules, primarily dealing with the rates of tax on trusts. However the charge on receipt of income arises under the usual charging provisions: there is no special charging provision for trusts. Accordingly:

- (1) UK trustees are subject to tax on all their income
- (2) Non-resident trustees are subject to tax on UK source income (except so far as non-residents income tax relief is available).

The trustees can qualify for the usual reliefs. Insofar as non-resident trustees qualify for reliefs, the position is straightforward, but tax relief for UK trustees (for instance DT relief¹) affects the tax pool credit system, which therefore has to be supplemented with further reliefs.

24.2.1 *Accumulated or discretionary income*

The TSE Manual provides a rough summary:

3011 Amount of trust income chargeable [September 2011]

Trustees are chargeable at the basic rate on trust income without any deduction for trust management expenses.

Accumulation or discretionary trust

If the trust is within ITA/S479, the trustees are liable to tax at the special trust rates. These are the dividend trust rate in respect of dividend type income and the trust rate in respect of other income. TSEM3019 explains which trusts are within ITA/S479.

The amount of trust income chargeable at the special trust rates is the gross trust income, minus the total of:

- income which before distribution ranks as the income, for tax purposes, of a person other than the trustees
- for years to and including 2005-06 only income which is treated, for any purposes of the Taxes Act, as that of the settlor (from 6 April 2006 the exemption for settlor-interested settlements to the special trust rates no longer applies) and
- allowable trust management expenses (TSEM8300+).

¹ See 24.12 (Are discretionary trusts "beneficial owners" for DTA purposes?).

Section 479 ITA provides:

- (1) This section applies if—
 - (a) accumulated or discretionary income arises to the trustees of a settlement, and
 - (b) the income does not arise under a trust established for charitable purposes only.
- (2) Income tax is charged on the income at the rates referred to in this section instead of at the rates which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)).
- (3) Income tax is charged on the income at the dividend trust rate so far as the income is dividend income.
- (4) Otherwise, income tax is charged on the income at the trust rate.

The rates are the top income tax rates (the Blair/Brown administration disapproved of trusts). For 2011/12, s.9 ITA provides:

- (1) The trust rate is 50%.
- (2) The dividend trust rate is 42.5%.

The key term is “accumulated or discretionary income”. Section 480 ITA provides:

- (1) Income is accumulated or discretionary income so far as—
 - (a) it must be accumulated, or
 - (b) it is payable at the discretion of the trustees or any other person,and it is not excluded by subsection (3).
- (2) The cases covered by subsection (1)(b) include cases where the trustees have, or any other person has, any discretion over one or more of the following matters—
 - (a) whether, or the extent to which, the income is to be accumulated,
 - (b) the persons to whom the income is to be paid, and
 - (c) how much of the income is to be paid to any person.

This covers common form discretionary trusts.

24.2.2 *Exception for settlor-interested trusts*

Section 480 continues with 3 exceptions of which only the first is relevant

here. Section 480(3) ITA provides:

Income is excluded for the purposes of subsection (1) so far as—

- (a) before being distributed, it is the income of any person other than the trustees...

I would have thought that this applies to the income of settlor-interested trusts, so far as s.624 ITTOIA applies, but HMRC do not agree: see TSE Manual quoted above at [b].

24.2.3 *Other trust income taxed at top rates*

Section 481 ITA provides:

- (1) This section applies if—
 - (a) the trustees of a settlement are liable for income tax on an amount of a type set out in section 482,
 - (b) the trustees are not trustees of a unit trust scheme, and
 - (c) the amount is not income arising under a trust established for charitable purposes only.
- (2) Income tax is charged on the amount at one of the rates referred to in this section instead of at the rate which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)). This is subject to subsection (5).
- (3) If the amount is within Type 1 as set out in section 482, income tax is charged on the amount at the dividend trust rate.
- (4) Otherwise, income tax is charged on the amount at the trust rate.

This applies to all trusts, IP as well as discretionary, but it is convenient to deal with it here. Section 481 continues with 4 exceptions:

- (5) Income tax is not to be charged as mentioned in subsection (2) so far as the amount—
 - (a) is accumulated or discretionary income,
 - (b) would be accumulated or discretionary income apart from section 480(3)(a) or (c), or
 - (c) is income from property within subsection (6).
- (6) Property is within this subsection if it is held for the purposes of a superannuation fund to which section 615(3) of ICTA (superannuation funds relating to undertakings outside the UK) applies.

Section 482 specifies 11 types of income, mostly fairly exotic categories, which constitute capital for trust purposes but income for tax purposes:

The types of amount referred to in section 481 are as follows.

Type 1 A payment—

- (a) which is made to the trustees or to which the trustees are entitled, and
- (b) which is made by way of qualifying distribution by a company on the redemption, repayment or purchase of shares in the company or on the purchase of rights to acquire such shares.

Type 2 Accrued income profits treated as made by the trustees under section 628(5) or 630(2).

Type 3 Income treated as arising to the trustees under regulation 17 of the Offshore Funds (Tax) Regulations 2009.

Type 4 Income which the trustees are treated as receiving under section 68(2) or 71(4) of FA 1989 (which relate to employee share ownership trusts).

Type 5 A sum to which Chapter 4 of Part 3 of ITTOIA 2005 (which provides for certain amounts to be treated as receipts of a property business) applies.

Type 6 A profit in relation to which the trustees are liable for income tax under section 429 of ITTOIA 2005 (profits from deeply discounted securities).

Type 7 A gain in relation to which the trustees are liable for income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc), other than a gain to which subsection (7) of that section applies.

Type 8 A profit or gain in relation to which the trustees are liable for income tax under section 554 of ITTOIA 2005 (transactions in deposits).

Type 9 A profit or gain—

- (a) in relation to which the trustees are liable for income tax under section 557 of ITTOIA 2005 (disposals of futures and options), and
- (b) which does not meet any of conditions A to C in section 568 of ITTOIA 2005.

Type 10 Proceeds in relation to which the trustees are liable for income tax under section 573 of ITTOIA 2005 (sales of foreign dividend coupons).

Type 11 Income treated as arising to the trustees under Chapter 3 of Part 13 of this Act (tax avoidance: transactions in land).

24.3 Tier 3: Discretionary income payment: charge on beneficiary

Section 683(1) ITTOIA imposes the tax charge on discretionary income payments:

Income tax is charged under this Chapter on annual payments that are not charged to income tax under or as a result of any other provision of this Act or any other Act. ...

“Annual payment” is an opaque technical term whose meaning is discussed in a large and in parts difficult body of case law.² It is not necessary to discuss that here, as it is well established that income payments from discretionary trusts are annual payments and so are charged under this section.

24.3.1 Beneficiary a remittance basis taxpayer

Section 684 ITTOIA provides:

- (1) Tax is charged under this Chapter on the full amount of the annual payments arising in the tax year.
- (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis if the discretionary income payments have a foreign source.

24.3.2 Non-resident beneficiary

Section 577 ITTOIA provides the necessary exemption for non-residents:

- (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
- (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK...

2 Section 683(3) ITTOIA provides one statutory rule: “The frequency with which payments are made is ignored in determining whether they are annual payments for the purposes of this Chapter.”
ITTOIA EN explains: Subsection (3) rewrites “or whether the same is received and payable half-yearly or at any shorter or more distant periods”.

The wording is the same as the equivalent exemption for savings and investment income; for a discussion see 18.4 (Why does location of source matter?).

24.3.3 *Discretionary trust payment: what is the source?*

Where the trust is a common form discretionary trust, and a beneficiary receives trust income in the exercise of the trustees' discretion, the trust is the source (not the underlying trust assets). See *Memec v IRC* 71 TC 77 at p.95:

A discretionary trust ... is not transparent. No beneficiary is entitled unless and until the trustees exercise their discretion in his or her favour, and the trustees' exercise of discretion is regarded as ... creating a new source of income...³

The beneficiary's income is categorised as annual payments (regardless of the type of income received by the trustees). HMRC agree. The TSE Manual provides:

3756. Individual beneficiary receives discretionary income payment from a resident trust: trust not settlor-interested [February

3 The same point was made in *IRC v Berrill* 55 TC 429 at p.444.

For a dissenting view, see Venables, "*Memec v IRC* and the Source of Discretionary Income Payments from Trusts" PTPR (1999) Vol. 7 p.87; *Non-Resident Trusts*, (8th ed 2000), 16.3 (Taxation of Beneficiary):

"Where there are discretionary trusts of income ...and the trustees distribute income in the exercise of their discretion, the taxability of the recipient beneficiary is a matter of some controversy. My own opinion is that in exercising their discretion the trustees simply perfect the settlor's gift so that the position at the end of the day is the same as if the trust instrument had expressly provided that the beneficiary should receive the income. Thus, the income which the beneficiary receives is the same income as that which the trustees received, the beneficiary's source is the same as the trustees' source and any tax paid by the trustees is to be treated as having been paid on account of the beneficiary."

Before 1973 this view was (I think) generally held though the point was not formally decided. This was assumed to be correct in *Drummond v Collins* 6 TC 525 though the point was not directly considered. However the FA 1973, imposing the additional rate of tax (now chapter 7 part 9 ITA), clearly assumes that a discretionary trust is a separate source, and so provides a statutory basis (if needed) to support the view that discretionary trusts are not transparent.

2011]

In the case of trusts or settlements that are not settlor-interested a discretionary income payment is treated as an amount that is net of tax at the trust rate. The beneficiary's income is the net amount grossed at the trust rate applicable. It carries tax credit at that rate. It is available for relief or repayment.

The gross amount is an annual payment. It is a new source of income, usually not identified with the underlying trust income. *Cunard's Trustees v IRC* (27 TC 122) supported the view that when the trustees exercised their discretion, a new source of income came into existence.

...

If a discretionary trust becomes interest in possession in form, the trustees' discretion over income in principle comes to an end and the source has ceased: *IRC v Berrill* at p.444. But the cessation of a source is not now significant for tax purposes.

Memec also considers annuities:

Similarly, the rights of an annuitant under a trust are regarded as a source of income distinct from that of the underlying trust investments.⁴

However annuities are not now found, so this is of academic interest only.

24.3.4 *Discretionary trust payment: location of source*

Where the trust is the source, how does one decide its location? There are (as usual) a variety of possible connecting factors, including: the residence of the trustees, the country in whose courts the trust will be enforced, the place where the discretion is exercised. It is suggested that trustee residence is the deciding factor, and this is consistent with s.493(1)(b) ITA. HMRC agree. Normally all these factors will point the same way so the issue will not arise.

24.3.5 *Time income arises*

The TSE Manual provides:

⁴ See too *R v Special Comrs ex p. Shaftesbury Homes & Arethusa Training Ship* 8 TC 367; *Inchyra v Jennings* 42 TC 388.

3759. Beneficiary receives discretionary payment from a resident trust: when payment made [January 2009]

For tax purposes the beneficiary receives a payment on

- The date the trustees made the payment or
- The date the beneficiary became legally entitled to require the trustees to pay over the income. This could be when the payment indefeasibly vested, following the trustees' resolution.

Tax cases: *Cunard's Trustees v IRC* 27 TC 122

24.3.6 *Entering discretionary trust income in beneficiary's tax return*

Income from non-resident trusts is entered in box 41 of the Foreign pages of the tax return, SA106, 2011/12: the side note to this box refers to "discretionary income from non-resident trusts".

HMRC Helpsheet 262 (2011/12) provides:

If you have received a discretionary payment from the non-UK resident trust, enter all of the income in box 41 ... ⁵

For UK resident trusts, the income is entered in box 1 of the Trusts etc pages, SA 107 (2010/11).

24.4 Beneficiaries tax credit

24.4.1 *UK resident trusts*

The tax credit is in s.494 ITA, which is introduced by s.493 ITA:

- (1) Sections 494 and 495 apply for income tax purposes if—
- (a) in a tax year the trustees of a settlement make an annual payment to a person ('the beneficiary') in the exercise of a discretion (whether exercisable by the trustees or any other person),
 - (b) the trustees are UK resident for the tax year, and
 - (c) condition A or condition B is met.

⁵ The helpsheet continues: "... unless the situation mentioned in the next paragraph applies" The next paragraph refers to the special rules for settlor-interested trusts; see 26.4.2 (Entries in tax return for non-settlor beneficiary).

The usual case is condition A. Section 493(2) ITA provides:

Condition A is that what is paid to the beneficiary is, only because of the payment, income of the beneficiary for income tax or corporation tax purposes. 'Income' does not include employment income.

Condition B relates to payments to minor children of the settlor,⁶ a topic not considered here.

Section 494 ITA provides the beneficiaries tax credit and grossing up. Grossing up comes first:

- (1) The discretionary payment is treated as if it were made after the deduction of a sum representing income tax at the trust rate on the grossed up amount of the discretionary payment.
- (2) The grossed up amount of the discretionary payment is the actual amount of the discretionary payment grossed up by reference to the trust rate.

Then the beneficiaries tax credit:

- (3) The person mentioned in subsection (4) is treated as having paid income tax of an amount equal to the sum deducted as mentioned in subsection (1).
- (4) That person is—
 - (a) if condition A in section 493 is met, the beneficiary, and
 - (b) if condition B in section 493 is met, the settlor.

Condition B (payments to minor children of the settlor) is not considered here.

24.4.2 *Non-resident trusts*

The beneficiary's tax credit (along with the tier 2 charge on trustees) only apply if the trustees are UK resident: s.493(1)(b) ITA.

EN ITA Change 89 provides:

⁶ Section 494(3) ITA provides: "Condition B is that the payment is treated for income tax purposes as the income of a settlor under section 629 of ITTOIA 2005 (income paid to relevant children of settlor)."

This change makes it explicit that the Chapter dealing with the taxation of discretionary payments by trustees applies only to payments made and tax suffered while the trustees are UK resident.

... section 493 contains the condition that it only applies to UK resident trustees. It follows that where a payment is made by non-UK resident trustees:

- the payment does not carry any tax credit in the hands of the beneficiary; and
- the trustees are not liable for any tax in respect of the payment.

As a corollary to the provisions of section 687 of ICTA not applying to non-UK resident trustees, tax only enters the trustees' tax pool if it is tax suffered on income arising while the trustees are UK resident - see section 497.

This change does not affect the operation of ESC B18, which enables UK resident beneficiaries who receive discretionary payments to have a credit for the tax paid by non-UK resident trustees on UK source income.

24.5 Tier 2: Charge on trustees making discretionary income payment

Section 496 ITA provides the charge on trustees:

- (1) Income tax is charged for a tax year if—
 - (a) in the tax year the trustees of a settlement make payments as a result of which income tax is treated as having been paid under section 494, and
 - (b) amount A is greater than amount B.
- (2) Amount A is the total amount of the income tax treated under section 494 as having been paid.
- (3) Amount B is the amount of the trustees' tax pool available for the tax year (see section 497).
- (4) The amount of the tax charged under this section is equal to the difference between amounts A and B.
- (5) The trustees are liable for the tax.

24.6 Trustees tax pool credit

Section 497(1) ITA deals with the trustees' tax pool:

Take the following steps to calculate the amount of the trustees' tax pool available for a tax year ('the current tax year').

This is subject to subsections (2) and (3).

Step 1 Take the amount of the trustees' tax pool available for the previous tax year and deduct from that amount (but not so that it goes below nil)—

- (a) the total amount of income tax treated under section 494 as having been paid as a result of payments made by the trustees in the previous tax year, and
- (b) the amount to which the trustees are entitled under section 496B in respect of the previous tax year.

Step 2 Add together all amounts of income tax for which the trustees are liable for the current tax year and which are of a type set out in section 498.

Step 3 Add the sum calculated at Step 2 to the amount resulting from Step 1.

Section 497(2)(3) ITA deal with the special cases of immigrant trusts and new trusts:

(2) If the trustees were non-UK resident for the previous tax year, references in subsection (1) to the previous tax year are to be read as references to the last tax year prior to the current tax year for which the trustees were UK resident.

(3) If—

- (a) the current tax year is the tax year during which the settlement is established, or
- (b) the trustees have been UK resident for no tax year prior to the current tax year,

ignore Steps 1 and 3 and, accordingly, the trustees' tax pool available for the current tax year is the sum calculated at Step 2.

Section 498 ITA provides the list of types of income which qualify fall within the tax pool. It is in short all the tax paid by the trustees. In full detail:

(1) The types of amount referred to at Step 2 in section 497 are as follows.

Type 1 The amount of any tax on income (other than income of a kind mentioned below in relation to Type 2, 3 or 3A) charged at the dividend trust rate or at the trust rate.

Type 2 The amount of tax at the nominal rate on any income which is—

- (a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),

- (b) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies), or
 - (c) chargeable under Chapter 6 of that Part (release of loan to participator in close company),
- and on which tax is charged at the dividend trust rate as a result of section 479.

Type 3 The amount of tax at the nominal rate on any income on which tax is charged at the dividend trust rate as a result of section 481.

Type 3A The amount of tax at the nominal rate on any amount in respect of which—

- (a) the trustees are liable to income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc),
- (b) the trustees are liable to income tax at the trust rate by virtue of section 482 above, and
- (c) tax at the basic rate is treated as having been paid by virtue of section 530 of ITTOIA 2005 (life insurance).

Type 4 The amount of any tax on income on which tax is charged at the basic rate ...2 as a result of section 491.

Type 5 The amount of tax on any income determined in accordance with section 26 of FA 2005 (special tax treatment for trusts for the benefit of vulnerable persons).

(2) In relation to Types 2 and 3, references to the nominal rate are references to a rate equal to the difference between the dividend trust rate and the dividend ordinary rate.

(2A) In relation to Type 3A, the reference to the nominal rate is a reference to a rate equal to the difference between the trust rate and the basic rate.

(3) In relation to Types 1 to 4, references to income do not include income the tax on which is reduced in accordance with section 26 of FA 2005.

24.6.1 *Effect of trustees DTA relief on tax pool*

The TSE manual provides:

3670 Discretionary trust [June 2009]

These instructions apply to taxed overseas income received by a discretionary or accumulation trust. The trustees can claim double taxation relief in respect of overseas tax that qualifies for relief. The trustee's marginal rate is the rate applicable to trusts, or where it applies, the dividend trust rate. INTM367780+ onwards has instructions about

calculating relief.

A paying agent may have allowed provisional tax credit relief on overseas income. The computation of double taxation relief must reflect this.

Tax pool

The Section 687 ICTA 1988 tax pool must contain only UK tax paid or suffered by deduction. It must not include UK tax covered by credit for overseas tax.

Section 687(3)(a) ICTA 1988 effectively withdraws the double taxation relief when the trustees make a discretionary payment to a beneficiary.

24.6.2 *Transitional rule for pre-2008 income*

ITA 2007 Sch 2 para 104 provides:

(1) Section 497 applies with the following modifications in relation to the trustees of a settlement established prior to the tax year 2007–08 if the current tax year is the tax year 2007–08.

(2) It also so applies if—

- (a) the current tax year is a tax year subsequent to the tax year 2007–08, and
- (b) the trustees have been UK resident for no tax year prior to the current tax year or the last tax year prior to the current tax year for which they were UK resident is a tax year prior to the tax year 2007–08.

(3) It applies as if in subsection (1) for Step 1 there were substituted—
‘Step 1

Take the amount of the trustees’ final section 687(3) tax pool and deduct from that amount (but not so that it goes below nil) the total of all tax (if any) treated under section 687(2)(a) of ICTA as being paid as a result of payments made by the trustees in the tax year 2006–07.

‘The amount of the trustees’ final section 687(3) tax pool’ is the total amount—

- (a) available to the trustees under section 687(3) of ICTA for setting against tax assessable on them under section 687(2)(b) of that Act for the tax year 2006–07, or
- (b) which would have been so available had tax been so assessable.’

(4) It applies as if subsections (2) and (3) were omitted.

24.7 HMRC example

The TSE Manual provides an example:

3024B. The tax pool - trustees calculate maximum discretionary payment [September 2011]

In this example, in the tax year 2010-2011 a trustee of a discretionary trust receives a net dividend of £1,350 (tax credit £150). The trustee is chargeable at 42.5%, which is partly covered by the 10% non-payable tax credit.

Description

Dividend received	£1,350	
Plus non-payable tax credit	<u>£150</u>	
Gross income	<u>£1,500</u>	
Tax at 10% on first £1,000 (standard rate band)	£100	
Tax at 42.5% on the remainder $£500 \times 42.5\%$	<u>£212.50</u>	
Total tax	<u>£312.50</u>	
Less non-payable tax credit	- £150	
Tax payable by trustee - goes into tax pool	<u>£162.50</u>	
Net income after tax	<u><u>£1187.50</u></u>	

The trustee now has net income of £1,187.50 (net dividend of £1,350 less tax paid of £162.50). Only £162.50 of the total tax goes into the tax pool because the £150 dividend tax credit is not payable.

If the trustee pays the net income of £1,187.50 to the beneficiary, the tax credit of 50% on that net payment is £1,187.50 (gross amount of £2,375 at 50%). But if the tax pool has nothing brought forward from the previous year and there is no other income on which tax has been paid, the tax pool of £162.50 will not cover the tax credit of £1,187.50 on the payment made. Under Section 496 the trustee would have to pay £1,187.50 less £162.50 = £1,025, but there are no funds available.

Instead, the trustees can calculate the maximum amount of discretionary payment as follows:-

Description

Net income after tax	£1,187.50	
Add tax in tax pool	£162.50	
Total amount to cover payment to beneficiary & tax credit at 50%	<u>£1,350.00</u>	
Tax credit at 50%	£ 675.00	£675.00
Less tax paid in tax pool		£162.50
Additional tax to be paid by trustee		£512.50

Net payment to beneficiary	£ 675.00
----------------------------	----------

The beneficiary is paid net income of £675 with a tax credit of £675, which is equivalent to gross income of £1,350 with tax credit at 50%. The trustee pays a total of £675 tax to HMRC, £162.50 tax on the dividend received and the additional £512.50 under Section 496. So if the trustee is relying on the dividend income to fund both the payment to the beneficiary and the additional tax there are sufficient funds to release only 50% of the actual dividend, that is $£1,350 \times 50\% = £675$.

HMRC offer an online tax pool calculator to do the computations, in simple cases: www.hmrc.gov.uk/tools/trusts/calculator.htm.

24.8 Payment from discretionary trust: income or capital receipt?

The question whether a trust distribution is an “annual payment” (ie, income) or not (ie, capital) matters for many purposes. In particular:

- (1) The IT charge on a beneficiary receiving the distribution (tier 3) only applies if the distribution is income.
- (2) The IT charge on trustees making the distribution (tier 2) only applies if the distribution is income.
- (3) Section 87 and s.731 only apply if the distribution is capital.⁷

The position depends on the terms of the power under which the payment is made.

24.8.1 Power over income

A common form discretionary trust⁸ provides this type of power over trust income:

The Trustees may pay or apply the trust income to or for the benefit of any Beneficiaries, as the Trustees think fit.

If trustees receive income and make a payment under such a power, the receipt is income and not capital. This has never been doubted.

⁷ See 29.10 (S.731 capital condition); 48.6.2 (“Chargeable to income tax”).

⁸ For a discussion of the drafting, see Kessler & Sartin, *Drafting Trusts & Will Trusts* (10th ed., 2010), Chap 15 (Discretionary Trusts).

24.8.2 *Power over capital*

A common form discretionary trust also provides this type of power over trust capital:

The Trustees may pay or apply the capital of the Trust Fund to or for the advancement or benefit of any Beneficiary.

If trustees make a payment under such a power the receipt is capital and not income. This is still the case even if:

- (1) the payments are made to satisfy an “income purpose”, eg maintenance of a beneficiary; and
- (2) the payments are recurrent (eg annual or even monthly).

This follows from *Stevenson v Wishart*.⁹

24.8.3 *Accumulated income paid out as income*

A common form discretionary trust allows trustees to accumulate income, and add it to trust capital. However, trustees usually have power “to apply the accumulations as if they were income arising in the then current year”. If trustees make a payment out of trust capital under such a power the receipt is an income receipt of the beneficiary. The important point is that the terms of the relevant provision of the settlement link the payment with an income interest of a beneficiary. See the comment of Knox J in *Stevenson v Wishart* 59 TC 740 at 757D.

It might perhaps be clearer if the trust accounts recorded an “Accumulated Income Fund” (instead of recording accumulated income as increasing the capital fund). However, this is not necessary.

24.8.4 *Accumulated income paid out as capital*

Suppose, lastly:

- (1) trustees accumulate income and add it to capital; and

⁹ 59 TC 740. The judgment of Knox J is clearer on this point than the Court of Appeal; this view is adopted in *Pierce v Wood* [2010] WTLR 253 at [29] “An appointment or advance of trust capital, in exercise of a power over capital, even if it were to meet an income need of the beneficiary, is normally a capital receipt in the beneficiary’s hands.”

- (2) the trustees pay that capital to a beneficiary in exercise of a power like that in para 24.8.2 (Power over capital).

The receipt is still capital and not income. This follows from *Stevenson v Wishart*. In that case the distributions which HMRC sought to tax as income represented original trust capital and not accumulated income. It is considered that this makes no difference. *Stevenson v Wishart* is authority for the proposition that the income/capital question is governed by the terms of the power concerned.¹⁰

It might be different in an extreme case, where for tax planning reasons there was an arrangement under which:

- (1) income was accumulated;
- (2) the trustees pay that capital to a beneficiary (by exercise of a common form power of advancement or appointment) shortly afterwards.

HMRC would have an attractive argument that the receipt should be regarded as income under general principles (or under the rule in *Furniss v Dawson* but it would not be necessary to fall back on that).

In practice it should be possible to avoid this by ensuring that advances of capital are not neatly identifiable with accumulated income.

24.8.5 HMRC view

HMRC agree with the views set out above. The TSE Manual provides:

3758. Discretionary payment from trust capital [January 2008]

A discretionary payment made out of trust capital, including a payment out of accumulated income or out of a capital receipt that is deemed to be income for tax purposes, is usually not regarded as the income of the beneficiary. This view was supported in the case of *Stevenson v Wishart* (59 TC 740).¹¹

10 Provisions such as ss.631(1)(2) and 633 ITTOIA assume this is correct (deeming payments out of accumulated income to be treated as income).

11 For completeness: the Manual continues:

“Exceptionally, payments out of capital are treated as the income of the beneficiary where, by the terms of the trust instrument, payments out of capital are required to be made, or may be made, in order to supplement income. For example, the trustees may or have to make income up to a fixed amount or a certain defined level as in *Cunard's Trustees v IRC* (27 TC 122)”

This is correct, but academic, since trusts are not nowadays drafted in those terms.

The same point is made in the HMRC Trust & Estate Tax Return Guide (form SA950) for the year ended 5 April 2012:

boxes 14.1 to 14.14

Payments out of trust capital including out of accumulated income or deemed income are not usually regarded as the income of a beneficiary irrespective of the purpose for which they are made and should not normally be included. Exceptionally, payments out of capital are treated as the income of the beneficiary where, by the terms of the trust instrument, payments out of capital must be made, or may be made, in order to supplement income. For example, the trustees may use or have to use capital to make income up to a fixed amount or a certain defined level.

24.9 Discretionary trusts treated as transparent to allow beneficiary reliefs

In some cases discretionary trusts are treated as transparent in order to confer some relief.

24.9.1 DT relief for UK resident discretionary trust

Section 111 TIOPA provides:

When payment to beneficiary treated as arising from foreign source

- (1) Subsection (6) applies if each of conditions A to D is met.
- (2) Condition A is that a payment is made by trustees of a settlement.
- (3) Condition B is that income tax is treated under section 494 of ITA 2007 (treatment of discretionary payments by trustees) as having been paid in relation to the payment.

This restricts the relief to UK resident trusts.¹²

- (4) Condition C is that the income arising under the settlement includes taxed overseas income.¹³
- (5) Condition D is that the trustees certify—

¹² See 24.4 (Beneficiaries tax credit).

¹³ This term is defined in s.111(7) TIOPA: "In this section "taxed overseas income", in relation to a settlement, means income in respect of which the trustees are entitled to credit under this Part for tax under the law of a territory outside the UK."

- (a) that the payment is one made out of income consisting of, or including, taxed overseas income of an amount, and from a source, stated in the certificate, and
- (b) that that amount of taxed overseas income arose to the trustees not earlier than 6 years before the end of the tax year in which the payment is made.

Where these conditions are satisfied, s.111(6) TIOPA provides the relief:

The person to whom the payment is made may claim that the payment, up to the certified amount, is to be treated for the purposes of this Part [Part 2 TIOPA headed Double Taxation Relief] as income received by the person—

- (a) from the certified source, and
- (b) in the tax year in which the payment is made.

The TSE Manual provides:

3675. Relief for overseas tax: expenses of discretionary trust [February 2006]

If trustees are claiming relief for overseas tax they will usually regard expenses as paid out of UK income. This means they can certify the overseas income to the beneficiaries under s.809 ICTA (TSEM3680). They may sometimes regard expenses as paid from overseas income. This could be because there is not sufficient UK income to cover the expenses. Or maybe certification is not advantageous to the beneficiary. Trustees cannot certify, under s.809, the overseas income they set against the expenses.

3680. Trustee's certificate of overseas taxed income [February 2006]

The income of a discretionary or accumulation trust may include overseas taxed income. The trustees can certify that discretionary payments they made to beneficiaries included income from the taxed overseas sources. The certificate must state how much of the payment refers to the overseas income. Trustees issue the certificates under the provisions of s.809(1)(b) ICTA. There is no prescribed wording for the certificate.

Limits of the amounts certified

The trustees must ensure that:

- the amounts they certify do not exceed the gross equivalent of the payments they made
- the gross amounts they certify do not exceed, in the aggregate, the gross income they received.

Trustees can accumulate, for future certification, overseas income that they have not paid out. Income ceases to be available for certification six years after the start of the tax year in which it arose.

3685. Relief for overseas tax: mixed trust [February 2006]

A mixed trust has both a discretionary interest and an interest in possession.

The trustees may claim double taxation relief in respect of overseas tax that qualifies for relief. The instructions at TSEM3655 apply to income that the beneficiary is entitled to receive. The instructions at TSEM3670 apply to the balance of the income.

24.9.2 *Concessionary relief for UK resident trust*

ESC B18 provides:

UK resident trusts

A beneficiary may receive from trustees a payment to which [what is now s.494(1) ITA] applies.¹⁴ Where that payment is made out of the income of the trustees in respect of which, had it been received directly, the beneficiary would—

[1] have been entitled to exemption in respect of FOTRA securities issued in accordance with [what is now s.714 ITTOIA]; or

[2] have been entitled to relief under the terms of a double taxation agreement; or

[3] not have been chargeable to UK tax because of their not resident and/or not ordinarily resident status

the beneficiary may claim that exemption or relief or, where the beneficiary would not have been chargeable, repayment of the tax treated as deducted from the payment (or an appropriate proportion of it).

For this purpose, the payment will be treated as having been made rateably out of all sources of income arising to the trustees on a last in first out basis.

There are three distinct classes of reliefs here:

- (1) Relief for interest on FOTRA securities (beneficiary not ordinarily resident)

¹⁴ This reference restricts the relief to UK resident trusts. See 24.4 (Beneficiaries tax credit).

(2) DTA relief (beneficiary treaty-resident outside the UK)¹⁵

(3) Exemptions for non-resident beneficiary

ESC B18 goes on to specify the conditions for the relief:

Relief or exemption, as appropriate, will be granted to the extent that the payment is out of income which arose to the trustees not earlier than six years before the end of the year of assessment in which the payment was made, provided the trustees—

[1] have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required, and

[2] have paid all tax due, and any interest, surcharges and penalties arising; and

[3] keep available for inspection any relevant tax certificates.

Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.

The INT Manual expands on B18 and provides a worked example. The Manual is not up to date, and in example tax rates are those before the increase to the 50% rate in 2010/11; I omit text referring to the position before 2004.

367790. What methods of relief are available on discretionary payments from UK resident trustees [April 2007]

The way in which relief is calculated will depend on the terms of the treaty under which relief is claimed.

- Under an “other income” article which does not exclude payments from trusts, relief is given in full....
- Where there is no other income article or the article excludes trust income, relief is given by “looking through” to the underlying sources of the income. The way in which we “look through” is determined by Extra Statutory Concession (ESC) B18
- Because payments are made at the discretion of trustees, it is not possible to allow relief at source to a beneficiary of a discretionary trust.

...

367820. Extra Statutory Concession B18 [April 2007]

Under ESC/B18, income underlying a discretionary payment is treated as arising from the sources of income received by the trustees in the tax year that the

¹⁵ But s.111 TIOPA covers this.

payment is made. Income is considered as arising rateably from the sources of income. By rateably we mean the beneficiary's payment contains the same proportion of each strand of income as the total received by the trustees.

If there is not enough income arising in the year the payment is made to fund all of the payments made by the trustees (that is, if the trustees are drawing on accumulations – that is, income received by trustees in excess of payments out of trust income – made in previous years) we need to apply the proportions of trustees' income from the year(s) in which the accumulations were made. This is known as "spreading back" (see INTM367910).

367830. ESC/B18 and dividends taxed at the dividend trust rate [April 2007]

When the Schedule F trust rate (now the dividend trust rate) was introduced in 1999/2000 at 25%, the wording of ESC/B18 was revised to exclude the element of tax credit included in that tax. For example, where trustees receive a dividend of £90, with a tax credit of £10, their liability is £15 (that is, £25 less £10 tax credit). However, when applying a beneficiary's share of dividends to a dividend article of a treaty, the tax credit is excluded from the calculation. Therefore for the purposes of ESC/B18, the 'gross' to which the restriction in the dividend article is applied is £90, the tax £15, and the net £75.

A dividend article with a 15% restriction would apply to the dividend element underlying a beneficiary's distribution as follows:

- Restriction: $£90 \times 15\% = £13.50$
- Tax £15 less restriction $£13.50 = £1.50$

367840. ESC/B18 and trustees' tax returns [April 2007]

It is a condition of ESC/B18 that in order to allow a beneficiary's claim to repayment, the trustees must have made their tax return for the year of the distribution, and paid over any tax due to HMRC.

It is therefore possible that a beneficiary's claim form can be received before the conditions of ESC/B18 are satisfied.

367850. ESC/B18 and Self Assessment [April 2004]

As the conditions for relief under ESC/B18 include actions by trustees, we do not consider a claim as being valid until these actions have been carried out. We cannot accept that the beneficiary has made a valid claim until the trustees have met the conditions set out in ESC/B18.

In practical terms this means that a beneficiary's claim is not valid until the trustees have sent in their tax return for the year in which the distribution was made and paid any tax due.

367860. Dealing with claims by non-resident beneficiaries of UK discretionary trusts under ESC/B18 [April 2007]

How to identify a repayment claim

The claim will usually be supported by a tax certificate on form R185, or an equivalent certificate prepared by the payer, showing tax deducted from the payment at 40%...

If the tax certificate is missing, the schedule will show that tax on the income is at 40% ...

Exceptionally, you may receive a claim on a payment from a UK discretionary trust where tax is not shown as having been paid at the Rate Applicable to Trusts (see INTM367950).

Procedure

You will need to request the trust file (the UTR for this should be quoted on the tax certificate) together with the trustees' tax return for the year of the distribution and all earlier years in date for time limit purposes during the year of distribution (you will need these if a 'spreadback' calculation is necessary). You will need to advise the claimant or their agent that you have requested information from the trust's tax office to enable you to deal with the claim.

367870. Calculating relief due under ESC/B18 [April 2007]

When the trust file is received the information concerning trust income and distributions provided by the trustees in their returns is extracted and used to calculate the relief due to the beneficiary.

Due to the complexity of the calculations, a computer program is used to apportion the trust income to the beneficiary's share.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

If necessary a calculation can be made manually (INTM367890).

367880. How to manually calculate relief due under ESC/B18 [April 2007]

Although the apportionment of the income will normally be performed using a computer program, if necessary the calculation can be performed manually, as follows:

1. Deduct any expenses and other obligations, for example Trust Management Expenses (see INTM367920) and annuities (see INTM367770), from the income received by the trustees.
2. For each income source (after deductions at 1 above) calculate the net amount available for distribution, that is the amount after deduction of tax at the rate applicable to trusts or the dividend trust rate as appropriate.
3. Calculate the total net distribution made to the discretionary beneficiaries.
4. Check that the total net distribution made to the discretionary beneficiaries is less than (or equal to) the total net available for distribution. If it is greater than the total net available for distribution, you will need to apply a 'spreadback' calculation (see INTM367910).
5. Allocate the net amount of each source of income arising to the trustees to the beneficiary's net distribution, by the following formula (each source of income must be treated separately because of the different tax rates to which the trust income is subjected):

$(a \div b) \times c = \text{beneficiary's share of income source, where}$

- a = net income from source
 - b = total income available to distribute
 - c = beneficiary's net distribution
6. Calculate the beneficiary's gross share of each income source by reference to ESC/B18. For UK dividends the calculation for 2004–05 onwards is
 $(a \div 67.5) \times 90 = \text{beneficiary's gross share of dividends for the purposes of ESC/B18, where}$
 - a = beneficiary's share of dividends

...

For other income (including foreign dividends) the calculation for 2004–05 onwards is

$(a \div 60) \times 100 =$ beneficiary's gross share of dividends for the purposes of ESC/B18, where

- $a =$ beneficiary's share of income

...

7. Calculate the tax applying to each income source under ESC/B18 by deducting the net (calculated at 4) from the gross (calculated at 5).

8. Calculate the repayment due by reference to the relevant treaty articles, and/or UK legislation allowing relief to non-residents. Where repayment is restricted under a double taxation agreement, calculate the amount to restrict as a percentage of the ESC/B18 gross (calculated at 5) and deduct it from the tax (calculated at 6).

367890. T applications and claims: Non-resident beneficiaries of UK trusts
[April 2007]

Example of a manual calculation under ESC/B18

In the tax year 2004–2005 a trust had income from the sources shown below (gross except for dividends paid). The trustees made net distributions of £1000 each to one beneficiary in Canada (who has made a claim to us) and to one beneficiary in the UK. [Trust income is:]

- UK dividends paid £1292
- UK interest £1000
- Rents £500
- Foreign dividends £880
- Foreign interest £1000

Trustees net management expenses were £500

First, deduct trust management expenses from dividends: 1292 less 500 = 792

Then calculate income available for distribution:

Dividends	792
plus (tax credit at one ninth of the dividend)	88
less (dividend trust rate 25%)	(220)
	<u>660</u>
 Interest	 1000
less (tax at rate applicable to trusts 34%)	(340)
	<u>660</u>
 Rents	 500
less (tax at rate applicable to trusts 34%)	(170)
	<u>330</u>
<hr/>	
Foreign dividends	880
less (tax at dividend trust rate 25%)	(220)
	<u>660</u>
 Foreign interest	 1000
less (tax at rate applicable to trusts 34%)	(340)
	<u>660</u>
Total available for distribution:	2970

Distribution: $(2 \times 1000) = 2000$; this is less than the total available for distribution, so no spreadback required

Allocation to beneficiary:

Dividends: $(660 \div 2970) \times 1000 = 222.22$

Interest: $(660 \div 2970) \times 1000 = 222.22$

Rents: $(330 \div 2970) \times 1000 = 111.11$

Foreign dividends: $(660 \div 2970) \times 1000 = 222.22$

Foreign interest: $(660 \div 2970) \times 1000 = 222.22$

Grossing up and deducting net to find tax attributable under ESC/B18:

Dividends: $(222.22 \div 75) \times 90 = 266.66 - 222.22 = \text{tax } 44.44$

Interest: $(222.22 \div 66) \times 100 = 336.70 - 222.22 = \text{tax } 114.48$

Rents: (there is actually no need to calculate this, as there is no relief, but the calculation would be as follows)

$(111.11 \div 66) \times 100 = 168.35 - 111.11 = \text{tax } 57.24$

Foreign dividends: $(222.22 \div 66) \times 100 = 336.70 - 222.22 = \text{tax } 114.48$

Foreign interest: $(222.22 \div 66) \times 100 = 336.70 - 222.22 = \text{tax } 114.48$

Calculating the repayment due

In this example the claimant is claiming under the Double Taxation Convention with Canada on dividends and interest, and under UK legislation applying to non-residents on foreign income. Under the treaty there is a 15% restriction on dividends and a 10% restriction on interest.

Dividends: Gross $266.64 \times 15\% = 40$ restriction Tax 44.44 less $40 = 4.44$

Interest: Gross $336.70 \times 10\% = 33.67$ restriction Tax 114.48 less $33.67 = 81.21$

Foreign dividends: Gross 336.70	Tax	114.48
-----------------------------------	-----	----------

Foreign interest: Gross 336.70	Tax	<u>114.48</u>
----------------------------------	-----	----------------------------

Total repayment		<u><u>314.61</u></u>
-----------------	--	-----------------------------------

This text has been withheld because of exemptions in the Freedom of Information Act 2000.

367900. Notes on types of underlying income in a discretionary trust [April 2007]

UK dividends: includes stock dividends.

UK interest

Dividends and interest are the most common types of income that you will see in discretionary trusts. With the exception of UK dividends, all of the tax associated with a particular source is considered for the purposes of ESC/B18 to be tax on that source. You may also see:

- Foreign income: relief is given under domestic legislation. Although foreign dividends are taxed in the hands of the trustees at the dividend trust rate of 32.5% ... the beneficiary is treated as having been taxed at 40%
- Rental income: there are no double taxation agreements that allow relief to individuals on rental income. No repayment is due on any part of the tax applicable to rental income.
- Accrued income: income returned under the 'accrued income' scheme cannot be relieved under double taxation agreements.
- Royalties: these are unusual in discretionary trusts. Relief is given at the appropriate agreement rate.
- FOTRA securities: you may be considering relief under an agreement which

has an interest article that restricts relief. However, income shown on the trust return as interest may be derived from FOTRA securities on which full relief is available to non-residents. As there is no indication in the trust return that income is derived from FOTRA securities, you will not usually be able to consider repayment on this as a separate source from interest. However, if there is any indication of the amount of FOTRA securities in the papers submitted with the return, or in figures originating from the trustees and provided by the claimant or their agent, you should use these to allow relief on the FOTRA securities.

367910. What happens if the total net distributed in a year exceeds the total net available for distribution ('overdistribution') [April 2007]

If the trustees have distributed more money in one year than is available to distribute from the income received in that year, you will need to analyse the balance from undistributed income arising in earlier years.

This is known as a 'spreadback' calculation. The income arising in earlier years can be analysed using the trust report program.

When spreading back we start with the most recent year in which income has been accumulated. If the trustees have over-distributed in earlier years we may have already made a spreadback calculation and used income accumulated in an earlier year. It is important that we do not use that accumulation again in the current spreadback. You cannot go back more than six years before the year in which the distribution was made. So if the trustees have made an excess distribution in 2003/04 you can only go back to 1998/99. But you only go back to accumulations made in that year if you have used up all the income accumulated in 2002/03, then 2001/02 and so on. The residence position of the beneficiary in the year(s) that the income was accumulated is not relevant.

24.9.3 *Confidentiality*

The INT Manual provides:

367630. Claims by non-resident beneficiaries of non-resident discretionary trusts [April 2007]

...

Confidentiality when advising a beneficiary or agent about a payment

A beneficiary of a discretionary trust has no rights against the income of the trust. Trustees may favour one potential beneficiary rather than another. Therefore, to provide information to a beneficiary about the income of a trust that you have used to calculate relief due under ESC/B18 will infringe the confidentiality of the trustees.

Because of this we cannot provide a breakdown of the underlying income comprising the repayment. The claimant (and their agent) only has a right to the final figure of the repayment we have calculated.

However, if the beneficiary obtains the written permission of a trustee we can release information concerning the underlying trust income. Sometimes a trustee will act as the nominated agent of the beneficiary. In that case you can release details of the computation to the trustee without seeking further written permission. If you are providing this information, you will need to show a full calculation. If the original apportionment of income was calculated using the computer program, you will need to make a full manual calculation (see INTM367890).

It is a strange state of affairs where a taxpayer is not entitled to know how his tax is computed, or whether it is correctly computed. No doubt a tribunal would order disclosure in an appropriate case.

24.9.4 Disclosure of ESC B18 claim on tax return

HMRC Helpsheet 262 (2011/12) provides:

If you wish to make a claim under ESC B18, you should phone HMRC CAR Trusts & Estates Nottingham on 0845 604 6455. In addition, you should advise your tax office that you are making a claim under ESC B18 and, in the ‘Any other information’ box of your tax return, enter details of the name of the trust from which the income payment was received and the tax reference of the trust

It is not clear why more than a note in the tax return “other information” box is needed.

HMRC say:

It is a stand-alone claim and does not affect how the beneficiary completes his or her Self Assessment tax return.¹⁶

I think the point is that there is no box in the tax return for the figures to be entered.

24.10 ESC B18 relief for non-resident trust

ESC B18 provides:

¹⁶ “HMRC Residency: Non-resident trusts” www.hmrc.gov.uk/cnr/nr_trusts.htm.

Non-resident trusts

A similar concession will operate where a beneficiary receives a payment from discretionary trustees which is not within [what is now s.494(1) ITA] (ie where non-resident trustees exercise their discretion outside the UK).

[1] Where a non-resident beneficiary receives such a payment out of income of the trustees in respect of which, had it been received directly, it would have been chargeable to UK tax, then the beneficiary—

[a] may claim relief under s.278 ICTA (personal reliefs for certain non-residents); and

[b] may be treated as receiving that payment from a UK resident trust but claim credit only for UK tax actually paid by the trustees on income out of which the payment is made.

[c] The beneficiary may also claim exemption from tax in respect of FOTRA securities issued in accordance with [what is now s.714 ITTOIA] to the extent that the payment is regarded as including interest from such securities.

[2] A UK beneficiary of a non-resident trust may claim appropriate credit for tax actually paid by the trustees on the income out of which the payment is made as if the payments out of UK income were from a UK resident trust and within s.687(1) ICTA.

There are three distinct sets of reliefs here:

- (1) Personal reliefs for non-resident beneficiaries.
- (2) Credit for tax paid by the trust as if the trust were UK resident; this only applies if the trust chooses to comply with UK tax requirements ie it pays trust rate tax on UK source income.
- (3) Relief for interest on FOTRA securities: I suspect that this is in practice academic, though strictly it applies if:
 - (a) the trust receives income from FOTRA securities;
 - (b) the trustees are outside the FOTRA exemption for trustees;¹⁷
 - (c) the income is paid to a beneficiary who is not ordinarily UK resident and so is within the FOTRA exemption; and
 - (d) the trust complies with UK tax requirements.

ESC B18 goes on to specify the conditions for the relief, which are similar to the conditions for UK resident trusts:

This treatment will only be available where the trustees—

17 Because there are UK beneficiaries: see 20.6.2 (Discretionary trust).

- have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required; and
- have paid all tax due and any interest, surcharges and penalties arising; and
- keep available for inspection any relevant tax certificates.

Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.

No credit will be given for UK tax treated as paid on income received by the trustees which would not be available for set off under s 687(2) if that section applied, and that tax is not repayable (for example on dividends). However, such tax is not taken into account in calculating the gross income treated as taxable on the beneficiary under this concession.

24.10.1 *Who makes the claim?*

After considering the case of a settlor-interested trust¹⁸ the International Manual continues:

339550. Claims by non-resident trustees of discretionary trusts [March 2007]

You may receive a claim or application from non-resident trustees of a discretionary trust. ...

What to do if one or more beneficiaries of the trust has a residential address in the UK

If the completed form 4467(trustee)/FD shows any beneficiaries with UK residential addresses, Specialist Personal Tax, PT International Advisory will refer the papers to Specialist PT, Trusts & Estates, who will consider whether the trustees will need to make UK tax returns.

What to do if all of the beneficiaries are resident in the same country as the trustees and the settlor of the trust is excluded from benefit

If all of the beneficiaries of the trust are resident in the same country as the trustees and the settlor of the trust is excluded from benefit, you can allow relief to the trustees.

18 See 55.4.3 (Settlor treaty-resident outside the UK).

24.11 UK trust - non resident beneficiary: DTA relief

24.11.1 DTAs with OECD model “other income” article

SP 3/86 provides:

Payments to a non-resident from UK discretionary trusts or UK estates during the administration period: double taxation relief

Introduction

1 This statement explains how relief from UK tax under double taxation agreements will be given in respect of payments made to a non-resident [from] a UK discretionary trust or a UK estate.

Background

Discretionary trusts

2 Generally speaking, a non-resident beneficiary receiving payments from a UK discretionary trust is not entitled to repayment of the tax paid by the trustees on the trust income. However, under concession B18 (which embodies a longstanding practice) HMRC ‘looks through’ the trust income to the underlying component parts of that income. The purpose of this ‘looking through’ is to allow the recipient of the income any relief that would have been available to him under the Taxes Acts had the income come to him direct instead of through the trustees.

3 Where the beneficiary is resident in a country with which the UK has a double taxation agreement, further relief under the ‘looking through’ principle may be due. Thus, for example, if the agreement provides for a withholding rate on interest of 15 per cent and interest liable to UK tax formed part of the trust income which had suffered tax at 40 per cent (ie the rate applicable to trusts) then, under the ‘looking through’ principle, the beneficiary would be repaid the amount of tax suffered in excess of the withholding rate, in this case 25 per cent.

4 Some of the UK’s double taxation agreements include an ‘other income’ Article. The purpose of this Article is to determine in which country income not expressly dealt with elsewhere in the agreement should be taxed. In the UK’s agreement the article sometimes gives sole taxing rights in respect of such income to the recipient’s country of residence.

It is in fact standard OECD model form to give sole taxing rights in respect of such income to the recipient's country of residence. OECD Model Article 21(1) provides:

Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

This wording would apply to income from a discretionary trust.

5 It has been the practice of HMRC to apply the ‘looking through’ principle to all cases where relief in respect of the discretionary payment was sought and to refuse claims where full repayment of UK tax was claimed under the provision of [the] ‘other income’ Article in the agreement.

[Para 6 deals with estates: see 74.17 (Non-resident beneficiary of UK estate: DTA relief).]

Change of practice

7 Following a review of their practice in these two areas, HMRC have accepted that if a payment made by trustees out of a UK discretionary trust falls to be treated as a net amount in accordance with TA 1988 s 687(2) [now s.494 ITA], the ‘looking through’ principle is not appropriate where the beneficiary is resident in a country with which the UK has a double taxation agreement and the ‘other income’ Article gives sole taxing rights in respect of such income to that country. (This will usually be the case where income from trusts is not specifically excluded from the Article.) This means that tax paid by the trustees in respect of the discretionary payment will be repayable to the beneficiary, provided that any conditions set out in the ‘other income’ Article are met. For example, the recipient may be required to show that he is subject to tax on the income in his country of residence.

8 [this deals with estates]

9 Where the ‘other income’ Article does not give sole taxing rights to the country of residence in respect of the trust or estate income or there is no double taxation agreement with the country concerned, the existing ‘looking through’ practice will continue to be applied where it is to the advantage of the beneficiary.

The DTAs which confer relief under the “other income” article on discretionary payments made by UK resident trustees are mostly the older generation of treaties. I think the reason is that before 1973, discretionary trusts were regarded as transparent, so distributed income of discretionary trust was not regarded as falling under the “other income” article.¹⁹ DTAs

19 See 24.3.3 (Discretionary trust payment: what is the source?).

made from the 1980's onwards usually exclude trust and estate income from the "other income" article.

The International Manual sets out a list of the countries whose DTAs provide relief for discretionary payments made by UK resident trustees. It is not however up to date and for convenience I divide it into two parts:

INTM367800 - DT applications and claims: Non-resident beneficiaries of UK trusts

DTAs where relief is available under the 'other income' article on discretionary payments made by UK resident trustees [April 2007]

The DTTs which currently confer relief under the "other income" article on discretionary payments made by UK resident trustees are:

Austria	Kenya
Barbados	Montenegro*
Bosnia Herzegovina*	Morocco
Portugal	Namibia
Romania	Serbia*
Croatia*	Spain
Egypt	Sudan
Ivory Coast	Swaziland
Israel	Tunisia
Jamaica	Zambia

* Bosnia-Herzegovina, Croatia, Montenegro, Serbia: relief is given under the terms of the old UK/Yugoslavia DTT: see SP 3/07.

In the following former USSR states, DTT relief ceased in 2002: Armenia, Belarus, Georgia, Kyrgyzstan, Lithuania, Moldova, Tajikistan, Turkmenistan; see SP 4/01 [2002] STI 32.

The following countries are still mentioned in the INT Manual list but should be deleted following new treaties (date of treaty in brackets):

Hungary (2011, date of coming into force not yet known).

France (2008, in force, 2010)

Germany (2010, in force 2011)

Macedonia (2007)

Poland (2006)

Slovenia (2007)

South Africa (2002)

24.11.2 *DTAs with restrictions on “other income” article*

UK DTAs from the 1980's onwards mostly exclude trust and estate income from the “other income” article. Art 23(1) of the France/UK DTA is typical:

Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention, *other than income paid out of trusts or the estates of deceased persons in the course of administration*, shall be taxable only in that State.

This leaves relief to be claimed under ESC B18.²⁰

Interestingly, the new UK/Germany treaty (2010) deals with the point expressly. Article 21 provides:

1) Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

2) Notwithstanding the provisions of paragraph 1, the following provisions shall apply with respect to income paid out of trusts or the estates of deceased persons in the course of administration:

Where such income is paid to a beneficiary who is a resident of Germany by trustees or personal representatives who are residents of the UK out of income received by those trustees or personal representatives which would, if those trustees or personal representatives had been residents of Germany, have fallen within other Articles of this Convention, the beneficiary shall be treated as having received an amount of the income received by the trustees or personal representatives corresponding to the income received by him and any tax paid by the trustees or personal representatives on that amount shall be treated as having been paid by

20 The US/UK DTA has this exclusion and the Exchange of Notes on that DTA comments: “With reference to paragraph 1 of Article 22 (Other income) - it is understood that the purpose of the exclusion from the paragraph for income paid out of trusts or the estates of deceased persons in the course of administration is to allow a recipient of such income the relief that would have been available to him under the provisions of the Convention had they received the income direct instead of through the trust or estate.” More accurately, the purpose is to prevent the recipient of such income from receiving *more than* the relief that would have been available to a person under the provisions of the Convention and ESC B18 had they received the income direct instead of through the trust or estate. But it comes to the same thing.

the beneficiary.

Why? Presumably the German authorities do not like German residents to be taxed by law and untaxed by HMRC extra-statutory concessions such as ESC B18 and A14. Those who believe that tax law should be statutory and not concessionary will say: quite right too.

It is curious that the present campaign to legislate ESCs, which has legislated many trivial ESCs, has not covered the important ESC B18. No explanation has been given, so it is tempting to speculate. Perhaps it has been filed as too difficult; perhaps HMRC are planning changes to the law; perhaps legislation will come eventually.

24.12 Are discretionary trusts “beneficial owners” for DTA purposes?

24.12.1 *Meaning(s) of “beneficial ownership”*

The expression “beneficial ownership” has (at least) three possible meanings:

- (1) The English property law/trust law meaning, where it may be contrasted with bare legal ownership and is (more or less) synonymous with equitable ownership.²¹
- (2) An international tax law meaning, in the context of DTAs.
- (3) A meaning (or set of meanings) in the context of money laundering.²²

21 For this meaning, see 58.6 (Beneficial ownership of FOTRA securities). This is not of course to say that the expression always has this meaning in English statutes, as the context governs the sense. The CG Manual offers an example:

“69055 Exemption for second hand policies: Disposals before 9 April 2003
[February 2010]

... Where trustees took out a life insurance policy, in particular where they were seeking to protect themselves from a possible charge to Inheritance Tax, it could be accepted that they were the beneficial owners of the policy within the old s.210(2) TCGA.” Section 210(2) provided: “No chargeable gain shall accrue on the disposal of [a life policy] except where the person making the disposal is not the original beneficial owner and acquired the rights or interest for a consideration in money or money’s worth..”

22 See (1) reg.6 Money Laundering Regulations 2007 (Meaning of beneficial owner). This is too long to set out in full, but it includes “the class of persons in whose main interest the trust is set up or operates.”

(2) The Glossary to the Financial Action Task Force’s 40 Recommendations defines beneficial owner as: “the natural person(s) who ultimately owns or controls a

These are all quite distinct and discussion of the meaning in one context has almost no relevance to the meaning in other contexts. It would have been better to have three distinct expressions, but the usages are now far too well established to alter that, and the context will generally show which meaning is intended.

A full discussion would require three long chapters.

24.12.2 *Discretionary trusts: beneficial owners for DTA purposes*

Relief under DTAs is frequently limited to the beneficial owner.

It is clear that the trustees are the “beneficial owner” of income of a discretionary trust in the DTA sense and so can qualify for DT relief.

The OECD are at present consulting on a revised commentary which will make this clearer. The proposed commentary is as follows (the point is made in the footnote but the entire passage is important):

Commentary on Article 10 (Dividends)

12. The requirement of beneficial owner was introduced in paragraph 1 of Article 10 to clarify the meaning of the words “paid ... to a resident” as they are used in paragraph 1 of the Article. It makes plain that the State of source is not obliged to give up taxing rights over dividend income merely because that income was paid direct to a resident of a State with which the State of source had concluded a convention.

12.1 Since the term “beneficial owner” was added to address potential difficulties arising from the use of the words “paid to ... a resident” in paragraph 1, it was intended to be interpreted in this context and not to refer to any technical meaning that it could have had under the domestic law of a specific country (in fact, when it was added to the paragraph, the term did not have a

customer and/or the person on whose behalf a transaction is being conducted. It also incorporates those persons who exercise ultimate effective control over a legal person or arrangement.” See

www.fatf-gafi.org/glossary/0,3414,en_32250379_32236930_35433764_1_1_1_1,00.html#34276864.

(3) OECD “Behind the Corporate Veil: Using Corporate Entities for Illicit Purposes”, (2001) www.oecd.org/dataoecd/0/3/43703185.pdf, p.14 has a related definition: In this Report, “beneficial ownership” refers to ultimate beneficial ownership or interest by a natural person. In some situations, uncovering the beneficial owner may involve piercing through various intermediary entities and/or individuals until the true owner who is a natural person is found. With respect to corporations, ownership is held by shareholders or members. In partnerships, interests are held by general and limited partners. In trusts and foundations, beneficial ownership refers to beneficiaries, which may also include the settlor or founder.”

precise meaning in the law of many countries). The term “beneficial owner” is therefore not used in a narrow technical sense (such as the meaning that it has under the trust law of many common law countries²³), rather, it should be understood in its context, in particular in relation to the words “paid ... to a resident”, and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance. This does not mean, however, that the domestic law meaning of “beneficial owner” is automatically irrelevant for the interpretation of that term in the context of the Article: that domestic law meaning is applicable to the extent that it is consistent with the general guidance included in this Commentary.

12.12 Where an item of income is paid to a resident of a Contracting State acting in the capacity of agent or nominee it would be inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption merely on account of the status of the direct recipient of the income as a resident of the other Contracting State. The direct recipient of the income in this situation qualifies as a resident but no potential double taxation arises as a consequence of that status since the recipient is not treated as the owner of the income for tax purposes in the State of residence.

12.3 It would be equally inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption where a resident of a Contracting State, otherwise than through an agency or nominee relationship, simply acts as a conduit for another person who in fact receives the benefit of the income concerned. For these reasons, the report from the Committee on Fiscal Affairs entitled “Double Taxation Conventions and the Use of Conduit Companies” concludes that a conduit company cannot normally be regarded as the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties.

12.4 In these various examples (agent, nominee, conduit company acting as a fiduciary or administrator), the recipient of the dividend is not the “beneficial owner” because that recipient does not have the full right to use and enjoy the dividend that it receives and this dividend is not its own; the powers of that recipient over that dividend are indeed constrained in that the recipient is obliged (because of a contractual, fiduciary or other duty) to pass the payment received to another person. The recipient of a dividend is the “beneficial owner” of that dividend where he has the full right to use and enjoy the dividend unconstrained by a contractual or legal obligation to pass the payment received to another person. Such an obligation will normally derive from relevant legal documents but may also be found to exist on the basis of facts and circumstances showing

23 [Footnote original] For example, where the trustees of a discretionary trust do not distribute dividends earned during a given period, these trustees, acting in their capacity as such (or the trust, if recognised as a separate taxpayer), could constitute the beneficial owners of such income for the purposes of Article 10 notwithstanding that the relevant trust law might distinguish between legal and beneficial ownership.

that, in substance, the recipient clearly does not have the full right to use and enjoy the dividend; also, the use and enjoyment of a dividend must be distinguished from the legal ownership, as well as the use and enjoyment, of the shares on which the dividend is paid...²⁴

24.13 Scots trusts and Scots beneficiaries (from 2016)

HMRC say:

45. Income from discretionary and accumulation trusts is distributed to beneficiaries at the discretion of the trustees. The trustees of UK resident trusts are currently charged on their income at the trusts tax rate (50 per cent - this will fall to 45 per cent in 2013-14) or dividend trust rate (42.5 per cent - this will fall to 37.5 per cent in 2013-14). The beneficiaries' income is treated as being received net of tax at the trust rate, so they currently receive a tax credit of 50 per cent.

46. Income flowing through these trusts loses its character - in other words, irrespective of whether the income arising to the trust was savings or non-savings income all the income would be treated as non-savings income in the hands of the beneficiaries. Income payments from discretionary trusts will therefore be liable at the Scottish rate when paid to Scottish beneficiaries.

47. In broad terms the trustees of non-resident discretionary trusts are only liable to income tax at the trust rate on the UK source income that they receive. They are not liable to UK income tax on foreign source income although they may be liable to tax on this income in the overseas jurisdiction. Discretionary income distributions from non-UK resident

24 OECD, “Clarification of the Meaning of “Beneficial Owner” in the OECD Model Tax Convention Discussion Draft”, 29 April 2011, accessible www.oecd.org/dataoecd/49/35/47643872.pdf.

trusts are treated as untaxed income of the beneficiary irrespective of whether the trustees have suffered tax on the trust income. The beneficiary may if certain conditions are met claim credit for some of the tax paid by the trustees. Such income should be included by Scottish taxpayer beneficiaries as part of their total income in the normal way, and this would be liable at the Scottish rate of income tax. This would be consistent with the current tax treatment and simple to administer(!).²⁵

25 HMRC, “Clarifying the Scope of the Scottish Rate of Income Tax Technical Note” (May 2012).

CHAPTER TWENTY FIVE

IP TRUSTS: INCOME TAX

25.1 Taxation of life tenant

25.1.1 *What is source of income of beneficiary?*

The life tenant is of course subject to tax on income received from the trust if it is UK source income or if the life tenant is UK resident. For this purpose it is necessary to identify the source. The choice is between:

- (1) regarding the trust as the source of trust income; or
- (2) regarding the trust assets as the source, in which case one “looks through” the trust and it is described as “transparent”.¹

The answer depends on the terms of the trust, construed in accordance with the proper law of the trust.

Similar issues arise for unit trust income, see 37.1 (Unit Trusts).

For the position where the life tenant pays the income (eg pays interest or rent to the trustees) see 29.4.7 (Interest-bearing loan to life tenant).

25.1.2 *England and other “Baker” jurisdictions*

The source of the life tenant’s income is the underlying trust assets (not the trust) if, under the terms of the trust, construed in accordance with the proper law of the trust, the beneficiary is entitled to the income of each trust asset as it arises. This is the case for a standard form interest in possession trust governed by English law.² In other words, an IP trust is

¹ See 79.1.1 (“Transparent” and “opaque”).

² *Baker v Archer-Shee* 11 TC 749. This issue has given rise to considerable academic debate ever since the House of Lords reached its 3:2 decision in *Baker*. See Waters, “The Nature of the Trust Beneficiary’s Interest” (1967) 45 Can Bar Rev 219; Schabe, “The Trust Conduit Principle: A Foundationless Theory?” [1999] Journal of

transparent for IT purposes.

Rather surprisingly, this applies even if the life interest is subject to an annuity: *Nelson v Adamson* 24 TC 36. But in practice annuities are not used so the point is only of academic interest.

For completeness: it has been suggested, tentatively and *obiter*, that this does not apply to trading income, at least for the purposes of DTAs;³ however there is no sound basis for that distinction and the correct view is that the transparency principle applies generally.

It is possible to draft an English law trust so that under the terms of the trust the beneficiary is not entitled to a proprietary interest in the income as it arises, but merely has the right to call on the trustees to transfer to them “a balance” of net income.⁴ Then the trust (not the underlying assets) will be the source. In practice this is not normally done.⁵

25.1.3 *New York and other “Garland” jurisdictions*

Common form interest in possession type trusts governed by some foreign trust laws do not give the beneficiary the right to income as it arises, but only the right to recover a sum from the trustees. The right is *in personam* not *in rem*. In this case the trust is not transparent and the beneficiary’s income is classified as an annual payment (regardless of the type of income arising to the trustee).

This is so even if the beneficiary is described as “life tenant” and is, in economic reality, in the same position as a life tenant under an English law trust. In this respect, a *Garland* trust is more like an English law estate than an English law trust.

25.1.4 *Scots trusts*

It is generally accepted that a liferent (a Scottish equivalent of a life

Australian Taxation 17, accessible
www.austlii.edu.au/au/journals/JATax/1999/17.html.

3 *R oao Huitson v HMRC* [2010] STC 715 at [54]. The point was not considered on appeal, see [2011] EWCA Civ 893.

4 *R v Special Comrs ex p Shaftesbury House & Arethusa Training Ship* 8 TC 367 appears to be an example. But that case was decided before *Baker*, and it should be decided differently now.

5 Except perhaps unit trusts: see 37.3 (Unauthorised unit trust: foreign trustees).

interest) under a Scots trust in common form is not transparent.⁶

This has been reversed for UK resident Scots trusts; s.464 ITA provides:

- (1) This section applies if—
 - (a) income arises to trustees under a trust having effect under the law of Scotland,
 - (b) the trustees are UK resident, and
 - (c) a beneficiary under the trust (“B”) would have an equitable right in possession to the income if the trust had effect under the law of England and Wales.
- (2) B is treated for income tax purposes as having an equitable right in possession to the income (even though B has no such right under the law of Scotland).

It is difficult to see why the statutory rule only applies to UK resident trusts. It is difficult to see why it applies to Scotland and no other *Garland* jurisdictions. The reason is that it is not part of a coherent regime for the taxation of trusts but a late Finance Bill amendment to deal with a narrow domestic anomaly.⁷ In practice it will not often matter.

One can create a transparent Scots law trust with appropriate wording.⁸

25.1.5 Commentary

The UK rules strictly require one to ask whether every trust jurisdiction is:

- (1) a *Baker* jurisdiction (where the life tenant of a standard form IP trust

6 “There is no difference between the law of Scotland as regards the beneficiary’s rights and the law which is admitted in the record to be the law of the State of New York.” *Inland Revenue v Clark’s Trustees* [1939] SC 11 at p.24 accessible www.kessler.co.uk approved *Leedale v Lewis* 56 TC at p.538. See too Scottish Law Commission, *Discussion Paper on the Nature and the Constitution of Trusts* para 2.5:

“The beneficiary has a ... right to compel the trustee to administer the trust funds in accordance with the provisions of the declaration of trust. This is a personal right. It is axiomatic that in Scots law the beneficiaries do not have a real right or a quasi-real right in the trust property. They have no proprietary interest in the trust fund.” Scottish Law Commission 2006 accessible www.scotlawcom.gov.uk.

7 See Discussion Paper on Apportionment of Receipts and Outgoings para 4.5, Scottish Law Commission, 2003, accessible www.scotlawcom.gov.uk/download_file/view/49/.

8 “Scottish Trust beneficiaries are not entitled to specific items of trust property *unless that is expressly provided for in the Trust Deed*.” Discussion Paper on Apportionment of Receipts and Outgoings para 4.5.

- has a right to income as it arises); or
(2) a *Garland* jurisdiction (where the life tenant only has a right against the trustee).

That is a somewhat metaphysical question as it is difficult to pin down any practical consequence (other than tax) which arises from the answer.

The distinction between *Baker* and *Garland* trusts should be abolished. It has no economic substance and precious little legal basis. It is to a large extent undone by concession. This could easily be done by extending s.464 ITA to apply to all *Garland* trusts.

25.1.6 *Credit for tax paid by trustees*

The TSE Manual provides:

3763. Beneficiary entitled to trust income - mandated income [December 2011]

Sometimes the trustees mandate trust income to a beneficiary. If the trustees mandate income to a beneficiary, it means that the beneficiary receives it and the trustees do not. So in such a case there is no statutory basis (see TSEM3761) for taxing the trustees as being in receipt of the income. The beneficiary both receives the income and is entitled to it. The trustees exclude the income from the Trust and Estate Tax Return, even if it is untaxed. The beneficiary's trust income is

- a share of the net taxed income as calculated on normal basis, and
 - the gross amount of untaxed income directly chargeable on him.
- The beneficiary (or, where the settlor has retained an interest, the settlor) includes the income on his personal return.

3764. Beneficiary entitled to trust income - grossing up [December 2011]

If the trustees receive income that is taxed at source, or if they pay tax on it under self assessment, the beneficiary will receive a net amount. But he or she is entitled to the gross amount. Consequently he or she is taxable on the gross amount.

For example, the trustees have gross bank interest of £1,000 on which tax is deducted at source £200. They pay £800 to the beneficiary. The beneficiary is entitled to the gross amount £1,000, and is taxable on that amount.

3765. Beneficiary entitled to trust income - credit for trustees' tax [December 2011]

If the trustees have paid tax or have received income with tax taken off, the beneficiary is given credit for that tax.

For example, in 2009-10 the trustees have gross rental income of £2,000 on which they pay tax £400. They pay £1,600 to the beneficiary. The beneficiary is entitled to the gross amount £2,000, and is taxable on that amount. He or she is given credit for the £400 tax paid by the trustees. If the beneficiary is a higher rate taxpayer, he or she will have further tax to pay see example in TSEM3765. If the beneficiary is a non-taxpayer, he or she may claim a repayment.

The beneficiary is given credit for trustees' tax only if the beneficiary is taxable on the same item. If the IIP trustees receive an amount that is capital in trust law and deemed to be income for tax purposes (see TSEM3201 and TSEM3767), the beneficiary is not given credit for the trustees' tax. The IIP beneficiary would not be entitled to such a receipt, as it would not be trust income, and would not be taxable on the receipt...

3766. Beneficiary entitled to trust income - grossing up and credit for trustees' tax example [December 2011]⁹

An IIP trust where the Settlements legislation does not apply (see TSEM3764) receives income in 2009-2010:

rental income £2,000

bank interest £800 (basic rate tax of £200 deducted at source).

Trustee's position

	Rent	interest
gross income	2,000	1,000
tax due	400	200
net income	<u>1,600</u>	<u>800</u>

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £220 tax.¹⁰

Beneficiary's position (Beneficiary is a higher rate taxpayer)¹¹

	Rent	interest
net income (as above)	1,600	800
grossed up (@ 20%)	<u>2,000</u>	<u>1,000</u>
tax at 40%	800	400
less credit	<u>-400</u>	<u>-200</u>
further tax to pay	<u>400</u>	<u>200</u>

9 [Author's footnote] I have slightly altered the wording of the examples to enhance clarity.

10 [Author's footnote] The correct figure is £200.

11 [Author's footnote] If the beneficiary is a basic rate taxpayer, there is no further tax due.

For an example involving TMEs, see TSEM8485.

3766. Beneficiary entitled to trust income - form R185 (Trust Income) [December 2011]

In the example in TSEM3765 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

<i>Box</i>	<i>Net amount</i>	<i>Box</i>	<i>tax credit</i>	<i>Box</i>	<i>taxable amount</i>
7.4	1600	7.5	400	7.6	2,000
7.7	800	7.8	200	7.9	1,000

The beneficiary uses the information on form R185 (Trust Income) to make his or her tax return or to claim repayment. The beneficiary is taxable on the gross amounts at boxes 7.6 and 7.9 at his or her marginal rate, and given credit for the amounts at 7.5 and 7.8.

25.2 Trustees expenses

25.2.1 *Deduction for trustees*

The TSE Manual provides:

8310. IIP trustees: basic rate, etc tax [April 2011]

In taxing the trustees of an IIP trust at rates up to basic rate, the usual deductions against various sources of income (e.g. deductions to arrive at net trading profit or rental income) are allowed. But the trustees do not get relief at those rates of tax for any ‘trustees’ expenses’ whatsoever. The tax case of *Aikin v Macdonald’s Trustees* (3 TC 306 -1894), concerned with income remitted to the UK from abroad, confirmed the general principle that trust management expenses are not to be taken into account in arriving at the measure of taxable income of the trustees. The case found that the full amount of income received in the UK was taxable without any deduction in respect of expenses incurred in this country in managing the trust. As Lord McLaren said, ‘the only kind of deductions allowed is expenditure incurred in earning the profit there is no deduction under any circumstances allowable for expenditure incurred in managing profits which have already been earned and reduced into money’ (p309).

8315. IIP trustees: deemed income [April 2011]

Unlike the trustees of accumulation/discretionary trusts, the trustees of IIP trusts are not normally chargeable to the special trust rates. Consequently there is generally no equivalent question of allowing TMEs against the special trust rates - but see ‘Practical considerations’ below.

For IIP trusts, there are certain items that are capital in trust law but deemed to be income for tax purposes, and are also taxable at the special trust rates. (See TSEM3201.)

...

From 6 April 2007 Section 484 ITA provides for all the deemed income items in ITA/482, now including accrued income, to be given relief for allowable TMEs

Practical considerations

In practice, if an IIP trust incurs allowable TMEs, they will reduce the beneficiary's entitlement to trust income and will not normally be taken into account for the trustees' deemed income purposes. A capital receipt would normally not find its way into the hands of an IIP beneficiary, as it would not be trust income. So, the fact that the trustees were liable to the special trust rates on certain receipts would have no direct effect on the income beneficiary, and Section 484 ITA TMEs would not come into question. But if there is a high enough level of allowable income expenses such that they reduce the IIP beneficiary's entitlement to nil, and at the same time there is deemed income taxable on the trustees at the special trust rates, excess income expenses could be used against the trust rate income.

25.2.2 Deduction against life tenant's income

The TSE manual provides:

8320. IIP beneficiaries: case law [April 2011]

There is case law in *Murray v CIR* (11 TC 133), *MacFarlane v CIR* (14 TC 540), and *CIR v Dewar* (16 TC 93-94). A beneficiary with an absolute interest in income (for example a life tenant) is entitled to the amount arising to the trustees that is available after any management and administration expenses etc. of the trustees have been provided for. Consequently the beneficiary is taxable on the net amount - *CIR v Hamilton of Dalzell (Lord)* (10 TC 406).

8325. IIP beneficiaries: TMEs not a tax deduction [December 2011]

In an IIP trust, the income beneficiary is entitled to the income as it arises out of trust assets, with the exception of any part of that income that is properly paid away on trust expenses and some other items (see TSEM3761A). TMEs are considered as part of establishing what net income the beneficiary is entitled to in law. That entitlement then provides the measure on which to tax the beneficiary. So, 'allowable' TMEs for an IIP beneficiary do not constitute a tax deduction or a tax relief, because they represent sums of money that the beneficiary was not entitled to in the first place.

8330. IIP beneficiaries: tax law [April 2011]

ITA Sections 499 to 503 provide generally for the IIP beneficiary's income to be reduced by allowable TMEs for tax purposes.

ITA Sections 501 and 502 provide for relief for allowable TMEs for non-resident IIP beneficiaries.

Section 500 ITA provides:

- (1) Expenses of the trustees can be used to reduce the beneficiary's income for income tax purposes only so far as—
 - (a) the expenses are incurred by the trustees in the current tax year or in an earlier tax year, and
 - (b) as a result of the expenses being chargeable to income as mentioned in subsection (2) or (3), the beneficiary's entitlement to the beneficiary's income is reduced by reference to the expenses.

“Chargeable to income tax” is defined in s.500 ITA:

- (2) Expenses are chargeable to income for the purposes of subsection (1)(b) if they are chargeable to income by the trustees under a term of the settlement (subject to any overriding law which prevents the expenses from being so chargeable).
- (3) Expenses are also chargeable to income for the purposes of subsection (1)(b) if they—
 - (a) are not chargeable to income by the trustees under a term of the settlement, but
 - (b) are chargeable to income by the trustees in accordance with any law (subject to any overriding term of the settlement which prevents the expenses from being so chargeable).

Section 500(4) ITA prevents double counting (for the avoidance of doubt):

- (4) Expenses cannot be used to reduce the beneficiary's income for income tax purposes so far as they are expenses which have fallen, or may fall, to be taken into account for the purpose of calculating the trustees' liability to income tax for any tax year.

25.2.3 *Non-resident beneficiaries*

Section 501 ITA provides:

- (1) This section applies if—

- (a) expenses of the trustees are to be used to reduce the beneficiary's income for income tax purposes, and
 - (b) a proportion of the beneficiary's income is untaxed income (see section 502).
- (2) A proportion of those expenses is not to be so used.
- (3) That proportion is the same as the proportion of the beneficiary's income which is untaxed income.
- (4) In subsection (3) the references to the beneficiary's income and untaxed income do not, in either case, include so much (if any) of that income as is equal to the amount of income tax, or of any foreign tax, for which the trustees are liable on that income.
- (5) "Foreign tax" means any tax which—
- (a) is of a similar character to income tax, and
 - (b) is imposed by the laws of a territory outside the UK.

Section 502 ITA provides a commonsense definition of “untaxed income”:

- (1) For the purposes of section 501 the beneficiary's income is untaxed income so far as the beneficiary is not liable to income tax on it wholly or partly because the beneficiary—
- (a) has been non-UK resident, or
 - (b) has been treated as resident in a territory outside the United Kingdom under double taxation arrangements.
- (2) If the income tax charged on the beneficiary for the beneficiary's income is limited under Chapter 1 of Part 14 (limits on liability to income tax of non-UK residents), the untaxed income includes so much of the beneficiary's income which is disregarded income (within the meaning of that Chapter) except so far as the disregarded income is within subsection (3).
- (3) The disregarded income is within this subsection so far as—
- (a) sums representing income tax have been deducted from the income,
 - (b) sums representing income tax have been treated as deducted from or paid in respect of the income, or
 - (c) there are tax credits in respect of the income.

Against which income does one set expenses? This question did not arise when all types of income were taxed at the same rates. Now we need s.503 ITA which provides the answer:

- (1) This section applies if the beneficiary's income is to be reduced for income tax purposes by expenses of the trustees.

(2) The beneficiary's income is to be reduced in the following order—first, reduce dividend income within subsection (3) (if any), second, reduce dividend income not within that subsection (if any), third, reduce savings income (if any), and fourth, reduce other income (if any).

(3) Income is within this subsection so far as it is—

- (a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),
- (b) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies), or
- (c) chargeable under Chapter 6 of that Part (release of loan to participator in close company).

(4) If the trustees are liable for income tax charged on a component of the beneficiary's income at a particular rate, then any reduction of that component is to be made in accordance with the steps set out in subsection (5).

(5) Here are the steps.

Step 1 Deduct from the component the amount of income tax charged on it at the particular rate for which the trustees are liable.

Step 2 Take the result from Step 1 and reduce it (but not below nil) by the amount of the trustees' expenses so far as they have not already been used to reduce other components of the beneficiary's income.

Step 3 Take the result from Step 2 and gross it up by reference to the particular rate. The result is the reduced amount of the component of the beneficiary's income.

ITA change 91 provides:

Change 91: Settlements: trustees' expenses reducing beneficiary's income: sections 500, 503 and Schedule 1 (section 646A of ITTOIA)

This change makes explicit some of the rules about the way expenses incurred by trustees in connection with income to which a beneficiary is entitled reduce the amount of the beneficiary's income for tax purposes.

There are only two provisions in ICTA that concern the tax treatment of expenses in relation to income to which a beneficiary is entitled before it is distributed (where the beneficiary is regarded as having an interest in possession). These are:

- section 689A, which deals with the disregard of some expenses in the case of a non-resident beneficiary; and
- section 689B, which concerns the order in which expenses reduce the beneficiary's income.

While there are additional provisions in section 686(2AA) of ICTA that give

some rules on the treatment of trustees' expenses in relation to accumulation or discretionary income, there is no corresponding provision for interest in possession trusts. The practices that have become established and which are reflected in these sections are based on the principle that the income of a beneficiary is the income arising to the trustees so far as the beneficiary is entitled to it.

There are two ways in which this principle operates.

First, if the trustees' expenses are chargeable to income under a provision of the settlement, then irrespective of whether they would be so chargeable in the absence of that provision, the expenses are to be taken into account. This is subject to the existence of any law that in a particular case (for example by way of a court order) overrides the provision in the trust deed.

This is different from the rule that operates in relation to accumulated or discretionary income where the terms of the settlement are to be ignored, and from what it appears that section 689A of ICTA provides for in this context.

If the deed is silent on whether a particular expense is chargeable to income then the expense is taken into account if it would be chargeable to income under general trust law.

These rules are reflected in section 500. They mean that an expense is allowable if it is chargeable to income under the trust deed, even if it would be chargeable to capital under general trust law. Conversely, in cases where general trust law would require an expense to be charged to income, but the trust deed charges it to capital, then the change means that the expense is not allowable.

The second area concerns how trustees' expenses are taken into account in such cases.

The expenses do not affect the amount of income on which the trustees are chargeable to tax, but operate to reduce the amount of the beneficiary's income. It is not that the beneficiary gets relief for the expenses as such; it is simply that the beneficiary is not entitled to the income used to pay the expenses. So, the beneficiary's income (as reduced by allowable expenses) is grossed up at the normal rate appropriate to that income to arrive at the gross amount which is to be treated as part of the beneficiary's total income.

This is not set out in the source legislation but, based on the decision in *CIR v Lord Hamilton of Dalzell* (1926), 10 TC 406 CS, it is the accepted way that expenses are taken into account. Section 503 reflects this.

This change also provides rules about cases where the trustees' expenses exceed a beneficiary's income. Section 500(1) applies in relation to the tax year in which the beneficiary's entitlement to income is reduced, whether the expense was incurred in that tax year or an earlier tax year. The reference to an earlier tax year means that the section covers cases where the trustees' expenses in an earlier tax year exceed the income in that earlier year and so the trustees are carrying forward the excess.

This change is in principle adverse to some taxpayers and favourable to others. But it is expected to have no practical effect as it is in line with current practice.

The TSE Manual continues:

8335. IIP beneficiaries: tax law: Section 500 ITA [April 2011]

Section 500 provides that if, as a result of the expense being chargeable to income it reduces the beneficiary's entitlement to income, it reduces the measure of the beneficiary's income for tax purposes.

An expense can reduce the beneficiary's entitlement in two ways:

If it is chargeable to income under general trust law and there is no specific provision about the expense in the trust deed.

If it is chargeable to income under the trust deed, whether it is chargeable to income or capital in general trust law.

In cases where general trust law would require an expense to be charged to income, but the trust deed charges it to capital, the expense is not allowable, as it does not reduce the beneficiary's entitlement to income

In sum:

- if an expense is properly chargeable to capital in general trust law, but charged to income under the trust deed, the expense is allowed;
- if an expense is properly chargeable to income in general trust law, but charged to capital under the trust deed, the expense is not allowed.

The legislation for interest in possession trusts specifies that one must give priority to the provisions of the trust deed over general trust law when establishing whether the expense is an allowable trust management expense for tax purposes. In practical terms the provisions result in the IIP beneficiary being taxed on his or her entitlement to income.

8340. IIP beneficiaries: trust deed [April 2011]

The IIP beneficiary is taxed on the income of the trust net expenses properly chargeable to income.

'Properly chargeable to income' in the IIP trust context means properly chargeable to income under all four sources of trust law referred to in TSEM8020. By contrast with discretionary trusts, where Section 484 ITA specifically excludes provisions in the trust deed, this term for IIP beneficiaries includes expenses whose final incidence falls on income by virtue of the terms of the trust deed - Section 500(2) ITA.

So if an IIP trust deed allows the trustees to pay what are normally capital expenses out of income, those expenses reduce the measure of the beneficiary's income. If an IIP trust deed allows trustees to pay what are in general trust law income expenses out of capital, again the trust deed has priority over general trust law, and consequently the IIP beneficiary's income is not reduced by such expenses.

In the absence of a specific provision in the trust deed, general trust law applies. If the trustees pay expenses out of income that are properly chargeable to capital in general trust law, then the IIP beneficiary is taxable on the amount of income used to pay the expenses, even though he or she does not receive it.

8345. IIP beneficiaries: measure of income: net and gross amounts [April 2011]

Tax is charged on the beneficiary's entitlement. The beneficiary receives

- income net of tax and income expenses including TMEs (that receipt referred to below as 'the net amount'),

but is actually entitled to

- the untaxed amount of the income, net of income expenses including TMEs (that entitlement referred to below as 'the gross amount').

So the net amount is grossed up at the appropriate tax rates to arrive at the amount included in the beneficiary's income for income tax purposes.

Example

Trustees income is £1,000; allowable TMEs are £250, income tax due is £200 (£1,000 at 20%).

The 'net amount' is £550

The 'gross amount' is £687.50 (£550 grossed up $\times 100 \div 80$).

8350. IIP beneficiaries: measure of income: tax paid by trustees [March 2011]

The income tax paid by the trustees on that part of the income used for TMEs and other items excluded from the IIP beneficiary's entitlement is not part of the beneficiary's entitlement, because the income out of which the tax is paid is not part of the beneficiary's entitlement. But the rest of the tax paid by trustees represents income to which the IIP beneficiary is entitled.

The beneficiary is given credit for the tax already paid by the trustees (or deducted at source) on the amount included in the beneficiary's income for income tax purposes. That credit, i.e. tax already paid on the income to which the beneficiary is entitled, will necessarily be represented by the difference between the gross amount and the net amount as described in TSEM8345.

8355. IIP beneficiaries: Section 500 ITA: basis of allowance [April 2011]

Section 500(1)(a) ITA provides that allowable TMEs are allowed on the 'incurred' basis. So the beneficiary's entitlement in any tax year is income arising less allowable TMEs incurred.

Section 500 provides for unused allowable TMEs incurred in an earlier year to be used against the current tax year. In a year where allowable TMEs incurred exceed income arising the beneficiary's income entitlement will be nil. The excess allowable TMEs will be taken into account in later year/s.

For an expense to be properly chargeable to income in trust law the trustees must have authority to put the final burden of that expense on the income fund. Which fund they use to pay it out of temporarily is not relevant.

In a year where there is not enough income, trustees may borrow from capital to pay income expenses, and in the next year reimburse capital from income.

If an expense is properly chargeable to income, but the trustees pay all or part of it from trust capital in year 1 because there is no income or not enough income that year, the beneficiary's net income in year 1 will be reduced to nil. If in year 2 the trustees reimburse capital from income, that amount will be allowable against the beneficiary's income for tax purposes in year 2.

Example

Year 1, trust income £1,000, allowable TMEs £2,000.

Trustees pay £1,000 TMEs out of income, and £1,000 out of capital. Beneficiary's taxable income £1,000 less TMEs £1,000 = nil.

Year 2, trust income £3,000, allowable TMEs £1,000.

Trustees pay £1,000 TMEs of current year out of income, and reimburse capital £1,000 for income expenses of previous year.

Beneficiary's taxable income £3,000 less £2,000 = £1,000.

8360. IIP beneficiaries: tax law: order of set-off [April 2011]

Section 503(2) ITA provides the order of set-off for TMEs to reduce the income of an IIP beneficiary. The order of set-off of TMEs in an IIP beneficiary's tax calculation is the same as for accumulation/discretionary trustees (TSEM8250). But there is no grossing up of expenses as there is for accumulation/discretionary trustees.

8365. IIP beneficiaries: tax law: order of set-off [June 2011]

Example

An IIP trust receives income in 2010-11:

rental income £1,000

bank interest £800 (basic rate tax of £200 has been deducted at source).

Trustee pays TMEs properly chargeable to income of £250.

Trustee's position

	Rent	Interest
Gross income	£1,000	£1,000
Tax due	£200	£200
Net income	£800	£800

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £200 tax on the rent. TMEs do not affect the trustee's position.

Beneficiary's position

	Rent	interest
Net income (as above)	£800	£800
Minus TMEs (set first against savings income)		(£250)
	<u>£800</u>	<u>£550</u>
grossed up (@ 20%)	<u>£1,000</u>	<u>£687.50</u>

8370. IIP beneficiaries: tax law: form R185 (Trust Income) [April 2011]

In the example in TSEM8365 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

	Net amount	Tax paid
Box 3 non-savings income	£800.00	£200.00
Box 4 savings income	£550.00	£137.50

The beneficiary uses the information on form R185(Trust Income) to make his or her tax return or to claim repayment.

8375. IIP beneficiaries: mandated income [April 2011]

Where trustees mandate income (see TSEM3762) and the beneficiary pays TMEs that are properly chargeable to income, such a beneficiary may set the TMEs against income chargeable at higher rate only. This practice of charging such income at no higher than the basic rate necessarily follows from the case law propositions that

- there is no income tax relief at basic rate for income used to meet TMEs (see TSEM8310)
- although an IIP beneficiary receives income mandated to him, to the extent that it is used to meet expenses properly borne by income it is not a part of his entitlement (see TSEM8325).

25.3 Taxation of IP trustees

Trustees are in principle subject to tax on income arising to them if it is UK source income or if they are UK resident. This applies even to trustees of transparent IP trusts. There are however a number of exceptions for trustees of IP trusts (which I call “**IP trustees**”) as exemptions for life tenants enure for the benefit of the trustees.

25.3.1 *Income mandated to life tenant*

The TSE Manual provides:

3040. Trust income mandated to a beneficiary [February 2011]

Trustees of interest in possession trusts (IIPs) (TSEM1105) exclude from the Trust and Estate Tax Returns income mandated to beneficiaries. The beneficiaries include this on their personal returns.

This practice has been extended to trustees of settlor interested trusts (TSEM4000+) where the settlor (or the settlor’s spouse or civil partner)

is also an IIP beneficiary and the trust income is mandated to them.¹²

The TSE Manual later expands on this:

3763. Trust income and gains: beneficiary entitled to trust income - mandated income [December 2011]

Sometimes the trustees mandate trust income to a beneficiary. If the trustees mandate income to a beneficiary, it means that the beneficiary receives it and the trustees do not. So in such a case there is no statutory basis (see TSEM3761) for taxing the trustees as being in receipt of the income. The beneficiary both receives the income and is entitled to it. The trustees exclude the income from the Trust and Estate Tax Return, even if it is untaxed. The beneficiary's trust income is

- a share of the net taxed income as calculated on normal basis, and
 - the gross amount of untaxed income directly chargeable on him.
- The beneficiary (or, where the settlor has retained an interest, the settlor) includes the income on his personal return.

9310. Ownership and income tax: income tax principles - receiving or entitled to [July 2011]

There is specific tax legislation in ITTOIA 2005 saying who is liable for tax on income:

S271 for rental income

S371 for interest

S385 for dividends and other distributions

S581 for income from intellectual property, for example royalties.

For rent, interest and income from intellectual property the legislation says that the person liable for income tax is the person receiving or entitled to the income. For dividends and other distributions the legislation says the person liable for income tax is the person to whom the distribution is made or is treated as made, or the person receiving or entitled to the distribution. Further detail about particular types of income from property is given in TSEM9900.

The 'receiving' basis enables you to tax the person in receipt of the income, even if you cannot trace the person entitled to it. But ultimately you want to tax the person who is entitled. For example, in an interest in possession trust (TSEM1105), the trustees are initially taxable on the trust income because they receive it. But the IIP beneficiary is ultimately taxable on the trust income because he or she is entitled to it. So you tax the beneficiary on the income on the 'entitled' basis, and give credit for

12 On this point see 26.9 (Taxation of trustees of settlement within s.624).

any tax paid by the trustees who received it.

In sum, for the purpose of taxation of income, you want to establish who is 'entitled to' the income.

25.3.2 *Life tenant non-resident*

The taxation of UK trustees of an IP trust (assuming they have not mandated the income to a life tenant) is affected by the residence of the life tenant. TSE Manual provides:

3160. Resident trustees with trust income from abroad: beneficiary is not resident [February 2011]

These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.

The trustees' income tax liability is based on the beneficiary's residence position. Trustees are not chargeable in respect of the share of income from abroad payable to the non-resident beneficiary. They exclude it from the Trust and Estate Tax Return. [See] *Williams v Singer* 7 TC 387

25.3.3 *Life tenant remittance basis taxpayer*

The taxation of UK trustees of an IP trust (assuming they have not mandated the income to the life tenant) similarly depends on whether the life tenant is a remittance basis taxpayer. TSE Manual provides:

3165. Resident trustees with trust income from abroad: beneficiary is resident but not domiciled [April 2010]

These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.

The trustee's income tax liability is based on the beneficiary's domicile. The beneficiary must make a claim for any year that the remittance basis is to apply.

If in any year the beneficiary claims the remittance basis the trustees' liability on the share of income from abroad payable to the beneficiary is limited to the amount remitted to the UK. Trustees exclude from the Trust and Estate Tax Return any such overseas income that is not remitted to the UK.

If in any year the beneficiary does not claim the remittance basis the trustees are assessable on the amount arising.

[See] *Williams v Singer & others* 7 TC 387

3170. Resident trustees with trust income from abroad - beneficiary is resident but not ordinarily resident [April 2011]

These instructions apply only if the beneficiary:

- has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant;
- is a citizen of the Commonwealth or the Republic of Ireland.¹³

The trustees' income tax liability is based on the beneficiary's not ordinarily resident status.

The beneficiary must make a claim for any year that the remittance basis is to apply.

If in any year the beneficiary claims the remittance basis the trustees' liability on the share of other income from abroad payable to the beneficiary is limited to the amount remitted to the UK. Trustees exclude from the Trust and Estate Tax Return any such overseas income that is not remitted to the UK.

If in any year the beneficiary does not claim the remittance basis the trustees are assessable on the amount arising.

[See] *Williams v Singer & others* 7 TC 387

Form SA904(Notes) Notes on Trusts & Estate Foreign for the year ended 5 April 2012 directs:

If the beneficiary(ies) of the trust has an absolute interest in the trust (including a life tenant) and it is known that he/she will make a claim for the tax year to be taxed only on the amount of their foreign income and gains that is remitted to the UK, include foreign savings income on Page TF2 (not Page TF1).

Add up all the dividends and distributions from overseas sources included in column E on Page TF2. Use the 'Additional information' box 4.39 on Page TF5 to make the following declaration.

The amount in box 4.4 on Page TF2 includes a total of £ (x) in dividends and distributions from overseas sources.

The reason for this is that where dividend income is taxed on a remittance basis the rate of tax on trustees is the basic rate and not the dividend ordinary rate. Section 14 ITA provides:

¹³ The manual is out of date here: the requirement to be a citizen of the Commonwealth or the Republic of Ireland does not apply from 2005/06.

- (1) Income tax is charged at the dividend ordinary rate on the income of persons other than individuals which—
- (a) is dividend income,
 - (b) would otherwise be charged at the basic rate, and
 - (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

This is consistent with the statutory rules for the taxation of individuals: see 43.4 (Rates of tax on dividend income). It is somewhat impractical for trustees to know whether income has been remitted.

It is an interesting question whether trustees are liable where income is remitted in a year after receipt. In practice I expect tax is paid by the life tenant and such income is not entered on the trust tax return.

25.3.4 *Life tenant entitled to tax credit relief*

The TSE manual provides:

3655. Relief for overseas tax: Beneficiary entitled to trust income
[June 2009]

These instructions apply to taxed overseas trust income that is treated as a beneficiary's income as it arises.

The trustees can claim, and receive, tax credit relief on behalf of the beneficiary. The amount is based on the beneficiary's marginal rate and residence status. INTM367730+ onwards has instructions about tax credit relief.

If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.

A paying agent may have allowed provisional tax credit relief on overseas income. If that provisional relief is excessive, the beneficiary accounts for the excessive relief.

The Manual continues with a comment on annuities, but that is so rare in practice it is not set out here.

25.3.5 *Scots trusts (from 2016)*

HMRC say:

40. Trustees and personal representatives of estates of deceased persons have a residence status for tax purposes. There are different rules for each. There is also existing tax legislation which ensures that beneficiaries of a trust that is subject to Scots law are treated as if they had the same rights to income arising to trustees as have beneficiaries of a trust that is subject to the law of England and Wales (section 464 of ITA).

41. This is already a complex area and the Government wishes to avoid additional complexity. The introduction of "Scottish resident" trusts and estates would add another layer of complications for trustees and personal representatives. The Government therefore proposes that trusts should retain their current (UK or non-UK) residence status and be taxed at UK rates where appropriate.

42. Trusts and deceased estates are not generally affected by the Scottish rate of income tax. Income arising to trusts will not be chargeable to the Scottish rate, which applies only to individuals. A body of trustees (on whom liability for tax due on trust income falls), is treated as a single 'person' for tax purposes, and is not an individual. Neither is the personal representative of the deceased acting in an individual capacity.

43. However, trust or estate income arising to or received by an individual Scottish beneficiary would be chargeable to the Scottish rate. There are a number of different types of trust though and there are implications in relation to the Scottish rate when income is paid out to beneficiaries. These would be treated in the following ways.

...

Deceased Estates and Interest in Possession Trusts

48. A UK-resident Interest in Possession (IIP) trust is one where the beneficiary has a legal right to the trust income as it arises. Under Scots law the beneficiaries have no such right to the income as it arises, but they do have rights which they can enforce against the trustees to ensure that the trust purposes are carried out, and trustees have an obligation to account to the beneficiaries. Despite these differences in trust law, section 464 of ITA ensures consistency of treatment across the UK for tax purposes. Prior to making a payment to the beneficiary, the trustee is required to pay tax at the UK basic rate of tax.

49. Personal representatives dealing with estates of deceased persons will not be liable at the Scottish rate of income tax on income arising during or at the end of the administration of the estate. When paying income from the residue of a deceased estate to the beneficiary they will similarly have paid basic rate tax on that income.

50. In either case, the beneficiary could be receiving non-savings income which has borne tax at the basic rate. Currently beneficiaries

liable at the basic rate of tax may have no need to do anything further - they would not need to submit a tax return merely to report the IIP or residuary estate income because there would be no additional tax to pay (although some basic rate IIP beneficiaries may feel it worthwhile to reclaim tax in cases where the trustees have borne expenses out of the income to which the beneficiary is entitled). Beneficiaries liable to tax at the higher or additional rates will have further tax to pay and will be required to complete tax returns.

51. If the Scottish and UK rates were to diverge, this would cause a potential difficulty for Scottish taxpayer beneficiaries whose marginal rate of tax is the Scottish basic rate of income tax and who receive some income under the deduction of tax at the UK basic rate. If, for example, the Scottish main rates of income tax were higher than the main UK rates then, strictly, they will have a further small liability. This would need to be collected via PAYE coding adjustments or through Self Assessment. Few of these beneficiaries will currently complete a tax return so it would be a significant exercise to identify them and adjust tax codes to collect the income. The costs of collecting these small amounts would often outweigh the amount collected. If the divergence in tax rate were reversed there would be similar issues for beneficiaries wanting to reclaim overpayments.

52. Since savings income will still be charged at the UK rates of income tax this would only be a problem at the moment for non-savings income, such as income from rented properties. Income paid through an IIP trust or deceased estate will therefore be excluded from a charge under the Scottish rate of income tax - in other words the UK rates should always apply to such income. Beneficiaries whose marginal rate of tax is derived from the Scottish basic rate of income tax would have no further liability in relation to the income received in respect of which the trustees or personal representatives had paid basic rate tax.

53. With non-UK resident interest in possession trusts the issues are different as the trustees will only be liable to UK income tax on UK source income and that income will not be subject to the trust rate. The trustees will not be liable to UK income tax on any foreign income that they receive. It should also be noted that the beneficiary's right to income under foreign law in respect of interest in possession trusts can differ from that described above for UK trusts and consequently the treatment of the income in the hands of the beneficiary can differ. In some foreign law jurisdictions the beneficiaries are entitled to their appropriate share of each item of trust income when it arises to the trustees. These are known as Baker type trusts. In such circumstances the beneficiaries are chargeable on their share of trust income. If the

trust income has borne UK tax it is treated as taxed income of the beneficiaries and each beneficiary's share is income that has been taxed at whatever rate of tax it has borne. Once the Scottish rate is introduced, this income will be taxed at the beneficiary's appropriate tax rate - if they are a Scottish taxpayer, they will therefore pay tax at the Scottish rate on non-savings income from the trust.

54. Under some other foreign law jurisdictions beneficiaries of interest in possession trusts are entitled only to their appropriate share of the net trust income that remains after the trustees have paid trust expenses; these are referred to as *Garland type trusts*. The beneficiaries are chargeable on the arising basis by reference to the income receivable by them from the trust. This applies whether or not it was paid out by the trustees. The income is treated as a new source of income and will be returned by the beneficiary as untaxed foreign income. If the beneficiary is a Scottish taxpayer, they will therefore pay tax at the appropriate Scottish main rate on this income.

55. If trustees have already paid UK or foreign tax on the trust income, the beneficiary can claim relief for this tax, subject to certain conditions being met. This must be outside of their Self Assessment return though.

56. Once the Scottish rate is introduced, such claims would be able to be set against tax charged at the Scottish main rates, in the same way as is currently allowed. *Settlor interested trusts*

57. *Settlor interested trusts* are trusts where the settlor (the person who put funds into the trust), or certain family members, can benefit from the trust. The trustees are required to pay tax at the appropriate rate. The settlor will be liable at their marginal rate, although they will receive a tax credit for the tax paid by the trustees.

58. Income in the hands of the settlor will continue to be charged at their marginal rate - therefore, if the settlor is a Scottish taxpayer, this income will be chargeable at the Scottish main rates. This will also be the case if there is an offshore structure and the transferor or beneficiary are assessable to tax under the Transfer of Assets legislation at sections 720 and 731 of ITA.¹⁴

25.4 DT reliefs

In relation to trusts, three states may be concerned:

(1) The state where the income arises

14 HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012).

- (2) The state where the trustees are resident
- (3) The state where the beneficiary is resident

In this book I only consider the matter from a UK perspective: it will be necessary to consider foreign law viewpoints but that is outside the scope of this book.

In this chapter “beneficial ownership” is used in the treaty sense.¹⁵

25.4.1 *Reliefs where beneficial ownership of income is required*

Article 10 OECD model convention provides:

1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
 - a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;
 - b) 15 per cent of the gross amount of the dividends in all other cases.

Thus relief for UK dividends requires that the beneficial owner of the dividends is treaty-resident in the foreign jurisdiction.

Article 11 OECD model convention provides:

1. Interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in that other State.
2. However, such interest may also be taxed in the Contracting State in which it arises and according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest.

Thus relief for UK interest similarly requires that the beneficial owner of

¹⁵ See 24.12.1 (Meaning(s) of "beneficial ownership").

the interest is treaty-resident in the foreign jurisdiction.

Article 12(1) OECD model convention provides:

Royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

Thus relief for UK royalties similarly requires that the beneficial owner of the royalties is treaty-resident in the foreign jurisdiction.

In some treaties beneficial ownership is added as a requirement even where it is not in the OECD model.

25.4.2 *Baker trusts*

In the case of Baker trusts, for the purposes of DT reliefs:

- (1) The trust is transparent ie the underlying trust income is regarded as the income of the beneficiary.
- (2) The life tenant is the beneficial owner of the trust income payable to the life tenant. So if the trust receives (say) interest income, the income of the beneficiary is classified as interest, and if the beneficiary is treaty-resident in a treaty jurisdiction with an article providing exemption from UK source interest, the income qualifies for this DT relief.
- (3) The trustees (if otherwise taxable) qualify for DT relief to the extent that the beneficiary qualifies for the relief. This is another case of the trustees enjoying reliefs applicable to life tenants.
- (4) The position is different for a receipt which is income for tax purposes and capital for trust law purposes: in that case the trustees are the beneficial owner of the income.

HMRC agree. International Manual provides:

339540. Baker and Garland Trusts [December 2011]

...

Baker trusts

Where 'Baker' applies, you cannot treat the trustees as being beneficial owners of a trust's income as it arises. Instead it is the beneficiaries who are the beneficial owners.

That is correct. The manual continues:

Strictly, each beneficiary should claim in his or her own right.

This is not strictly correct. A trustee could claim indirect DT relief in a case where a beneficiary failed to do so. But nothing turns on that since HMRC do not apply what they identify as the strict law:

In practice it is acceptable to allow relief to the trustees, provided that you can be satisfied that the beneficiaries are entitled to relief under the same double taxation agreement as that under which the trustees have claimed. If this is not the case you may allow partial relief to the trustees by reference to the percentage of the interests that are relievable under the same DTA as the trustees. The beneficiaries who are not resident in the same country as the trustees will need to make their own claims against the income distributed to them.

25.4.3 *Garland trusts*

In the case of Garland trusts, for the purposes of DT reliefs:

- (1) The trustee is the beneficial owner of the trust income.
- (2) The income of the beneficiary will qualify for DT relief under the “other income” article in the OECD model form (but not under the UK preferred form): see 24.11 (UK trust – non-resident beneficiary: DTA relief).
- (3) Point (2) would cause great difficulties. However by concession HMRC will regard a Garland trust as transparent Baker trust for DT purposes. I refer to this as “**the Garland concession**”.

International Manual provides:

339540. Baker and Garland Trusts [December 2011]

...

Garland trusts

Where ‘Garland’ applies, you can, for the purposes of the double taxation agreement, treat the trustees as the beneficial owners of trust income as it arises and allow relief. This treatment is given because we consider that the beneficiary’s right to income from the trust is against the trustees, rather than in the underlying assets held in trust. However, you should still establish the identity and residence of the beneficiaries. If any beneficiary is in the UK you should notify their tax office.

International Manual provides:

166030. Garland trusts [December 2006]

In the case of income of a non-discretionary foreign trust of the type considered in the case of *Garland v Archer Shee* 15 TC 693, the beneficiaries are not concerned with the source of the trust income and whether or not it has borne UK tax. It is the practice to allow relief to beneficiaries, other than annuitants, in respect of the proportion of the income assessable as foreign income which is regarded as being derived from trust income which has borne United Kingdom tax. It is a condition of the relief that the amount of the income for higher rate purposes is to be treated as the sum of the amount assessable and the amount of tax on a grossed up basis which is applicable to the part of the assessment on which relief has been given.

Submit the first claim from a beneficiary for this relief to the Offshore Personal Tax Team (part of Charity, Assets & Residence), before admitting the claim.

166040. Foreign tax

Where foreign tax has been paid on trust income (including, in the case of dividends, any underlying tax where, exceptionally credit for such tax is due under the terms of an agreement – see INTM164410), it is the practice, in the case of a trust of a type referred to in INTM166030, to allow credit relief to beneficiaries, other than annuitants, for that foreign tax. Credit relief is given in the same way and to the same extent as if each beneficiary were entitled to his proportionate share of the underlying investments of the trust.

25.5 Baker or Garland trust jurisdiction?

The English courts assume that foreign trust jurisdictions apply English law principles in the absence of evidence to the contrary. But the Scottish courts will, I expect, assume Scots law principles, in the absence of evidence, with the opposite result. In practice HMRC have helpfully published a list which would constitute evidence on which (in the absence of other evidence) a tribunal should be expected to rely.¹ This list only represents the HMRC view and could be challenged on the basis of expert evidence. The list assumes the trust has standard form wording. It is in principle possible to draft a non-transparent trust in a *Baker* jurisdiction. It may be possible to draft a transparent trust in a *Garland* jurisdiction by using non-standard wording.

The HMRC list is as follows. The endnotes are my own.

Argentina	No Trust Law	Liechtenstein	Garland ¹⁰
Australia ²		Lithuania	Baker
New South Wales	Baker	Luxembourg	Baker
Queensland	Baker	Malaysia	Baker
South Australia	Baker	Malawi	Baker
Victoria	Baker	Malta ¹¹	No Trust Law
Western Australia	Baker	Monaco	No Trust Law
Bahamas	Baker	Montserrat	Baker
Barbados	Baker	Namibia	Garland
Belgium	No Trust Law	Netherlands	No Trust Law ¹²
Belize	Baker	New Hebrides	Baker
Canada ³		New Zealand	Baker
British Columbia	Baker	Nigeria	Baker
Nova Scotia	Baker	Norway	Garland
Ontario	Baker	St Helena	Baker
Saskatchewan	Baker	St Vincent	Baker
Quebec ⁴	Garland	Singapore	Baker
Cayman Islands	Baker	South Africa ¹³	Garland
Denmark	Garland	South Yemen	Baker
Egypt	Baker	Spain	No Trust Law
Estonia	Baker	Sri Lanka	Baker
Fiji	Baker	Sweden	Garland
France ⁵	No Trust Law	Trinidad & Tobago	Baker
Ghana	Baker	Uganda	Baker
Gibraltar	Baker	USA ¹⁴	
Guernsey	Baker	New York	Garland
Guyana	Baker	Minnesota	Garland
Hong Kong	Baker	Montana	Garland
Hungary	Baker	North Dakota	Garland
India ⁶	Garland	South Dakota	Garland
Ireland, Republic of ⁷	Baker	Wisconsin	Garland
Isle of Man	Baker	All other states ¹⁵	Baker
Italy ⁸	No Trust Law	Zambia	Baker
Japan	No Trust Law	Zimbabwe	Garland
Jersey ⁹	Baker		
Kenya	Baker		
Latvia	Baker		

1 Accessible www.hmrc.gov.uk/cnr/nr_trusts.htm#lctable.

2 The list omits Tasmania, Northern Territory and Australian Capital Territory. It is considered that these are *Baker* jurisdictions.

3 This seems correct: see *Minister of National Revenue* [1956] SCR 49 especially [1953] Ex CR 292 at p.297, accessible www.kessler.co.uk. The list of Canadian jurisdictions omits Alberta, Manitoba, New Brunswick, Newfoundland and Labrador, Northwest Territories, Nunavut, Prince Edward Island and Yukon. It is suggested that these are the same as the other Canadian common law jurisdictions, i.e. *Baker* jurisdictions.

- 4 This seems well founded in Art. 1261 Code Civil Québec: “The trust patrimony, consisting of the property transferred to the trust, constitutes a patrimony by appropriation, autonomous and distinct from that of the settlor, trustee or beneficiary *and in which none of them has any real right*”. See also Gretton, “Trusts without Equity” ICLQ 49, No.3 (July 2000).
- 5 France was omitted (accidentally?) from the version of the list published 1 April 2008, but the comment in the earlier version of the list is printed here as it is correct.
- 6 *Duncan’s Executors v Adamson* (1935) 14 ATC 22 so held. This seems soundly based on s.3 [India] Trusts Act 1882: “The ‘beneficial interest’ or ‘interest’ of the beneficiary is his right against the trustee as owner of the trust-property.”
- 7 The list omits Northern Ireland: this is a *Baker* jurisdiction.
- 8 This is wrong: Italy does have a trust law.
- 9 Paul Matthews agrees: *Jersey Law of Trusts*, (3rd ed., 1994) para 1.21.
- 10 It is not clear whether HMRC are referring to a Stiftung or a Treuhandschaften; see 79.6 (Liechtenstein Foundation: Stiftung); 79.8 (Liechtenstein Treuunternehmen).
- 11 This is wrong: Malta does have a trust law.
- 12 This is wrong: The Netherlands does have a trust law.
- 13 Honoré agrees: *South African Law of Trusts*, (4th ed. 1991), para 349.
- 14 New York was (rather implausibly) found to be a *Garland* jurisdiction in *Garland v Archer-Shee* 15 TC 693. The finding of fact in *Garland* was also made in *Timpson’s Executors v Yerbury* 20 TC 155 at p.157, and was accepted as common ground in *Astor v Perry* 19 TC 255. See “Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis”, John Avery Jones in *Studies in the History of Tax Law*, 2004 p.46 accessible on www.kessler.co.uk for contrary views as to US law. Since foreign law is a question of fact, a court would not be bound by those decisions, but in practice they are not likely to be challenged.
- 15 This may not be correct for all the other states. In particular, Ohio and New Jersey have been found to be *Garland* jurisdictions. See *The Marchioness of Ormond v Brown* 17 TC 333 at p.341, *Kelly v Rogers* 19 TC 692 at p.696. But see the above footnote. In *Lawson v Rolfe* 46 TC 199 it was common ground that California was a *Baker* jurisdiction.

CHAPTER TWENTY SIX

SETTLOR-INTERESTED TRUSTS

26.1 Settlor-interested trusts – Introduction

Chapter 5 Part 5 ITTOIA contains a code of anti-avoidance provisions known as the Settlement Provisions. A full discussion would need a book to itself. This chapter focusses on the matters closest to the theme of this book.

The most important of the settlement provisions is s.624(1) ITTOIA which provides:

Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone if it arises—

- (a) during the life of the settlor, and
- (b) from property in which the settlor has an interest.

I refer to income which is treated as the settlor's income under this section as **“s.624 income”**.

26.1.1 *Cross-references*

On the definition of “settlor”, see 75.1 (Who is the settlor?).

“Settlement” for this purpose means settlement-arrangement; see 75.2 (Definitions of settlement).

Where a trust has two settlors, see 76.2 (Two or more settlors of settlor-interested trust: IT).

For following types of income/gains accruing to settlor-interested trusts, see these references:

- Chargeable event gain: see 32.7 (Section 624 & chargeable event gains).

- Offshore income gain: see 34.8.2 (UK resident settlor-interested trust) and 34.10.1 (Non-resident settlor-interested trust).
- Accrued income profits: see 35.14 (Settlor-interested trusts).
- Deeply discounted security income: see 35.14.1 (UK resident settlor-interested trust) and 36.11 (Non-resident trust).

See too 43.5 (Settlor-interested trust: rates of tax on settlor).

This chapter considers the IT rules. For CGT see 47.1 (Gains of trusts - introduction).

26.2 Meaning of “income arising under a settlement”

Section 648(1) ITTOIA provides:

References in this Chapter to income arising under a settlement include—¹

- (a) any income chargeable to income tax by deduction or otherwise, and
- (b) any income which would have been so chargeable if it had been received in the UK by a person domiciled, resident and ordinarily resident there.

The points made in 27.14 (The amount of income of person abroad) and 27.13 (Capital receipts deemed to be income) apply also for the purposes of ascertaining what is the “income arising under a settlement”.

The income may be deemed to be the income of the settlor under s.624 even if the settlor is paying the income (eg if the settlor pays rent or interest to a settlor interested discretionary trust).²

26.2.1 *Income of company, unit trust or partnership held by trustees*

Suppose a settlor-interested trust holds an underlying company, thus:

¹ The context suggests this is an exhaustive definition, ie the word “include” really means “mean”.
² See *Ang v Parrish* 53 TC 304. But it is different if the settlor is also life tenant; see 29.4.7 (Interest-bearing loan to life tenant).

The trustees' income is "income arising under a settlement" and taxed under s.624.

The company's income is not "income arising under the settlement" and not within the scope of s.624. This follows from the repeal by Sch 17 FA 1989 of s.681(2)(b) ICTA (which formerly brought company income into the scope of that expression).³ This view is also supported by reference in the definition to "income chargeable to *income* tax"; company income would normally be chargeable to corporation tax. This was assumed to be correct without argument in the film star case *Mills v IRC*.⁴

Where (as a matter of fact) the trust and the company constitute one arrangement, one might have thought at first sight that both the company income and the trustees income (dividends) could be described as income arising under the settlement-arrangement. But the context shows that only the trustees' income should be regarded as "income arising under the settlement" for the purposes of the IT settlement provisions. The background is explained in the first film star case, *Crossland v Hawkins*:

The heavy incidence of Surtax [now higher rate income tax] on large incomes has for some time led artistes and others in the world of entertainment to adopt the device of forming a limited company which they control, and giving the company, by means of a service agreement, the right to their services. In return the company pays the artiste some modest salary. The company then hires the artiste out to whomsoever requires his services and itself obtains the consideration for them. ... In this way Surtax on the whole of the artiste's earnings is reduced to Surtax on the salary he gets from the company plus such dividend as is distributed to him; and when eventually the company is wound up the

³ This was part of the repeal of the close company apportionment provisions.

⁴ For the film star cases, see 75.15 (Provision of services).

accumulated reserves of past years will come to him as capital.⁵

All this is perfectly legitimate and indeed, in the case of persons whose high earnings may be short-lived, understandable. ... The present appeal is not concerned with that scheme, but it may be useful to bear its existence in mind.⁶

It is considered that income of a unit trust held by trustees is similarly not “income arising under a settlement” (unless the unit trust is transparent in which case the income arises to the trustees).

It is suggested that the position is different where trustees have an interest in a partnership. Insofar as income is distributed by the partnership to the trust it obviously constitutes income arising under the settlement. But even if income is retained by the partnership, it is still income of the trustees since a partnership is transparent for IT.

Income of a company or unit trust which is not “income arising under a settlement” may fall within s.720 ITA.

26.2.2 *Income of life tenant (not the settlor)*

Income payable under the trust to a life tenant is “income arising under a settlement”. Admittedly, such income is usually regarded for tax purposes as the income of the life tenant, not of the trustees.⁷ But that is not relevant, because:

- (1) the expression is “income arising under a settlement”, not “income accruing to trustees”; and
- (2) “settlement” is very widely defined: see 75.2.3 (Settlement-arrangement definition of settlement).

This can be seen to be the case by considering a trust made by S, revocable

5 If winding up the company now, one would need to consider chapter 4 part 13 TIA (sale of occupation income).

At the time of *Crossland v Hawkins* there were close company apportionment rules, but they were not so harsh. The Court explained: “From its profits the company must distribute a reasonable dividend if it is to avoid Surtax on the whole of its profits - see Section 245 of the Income Tax Act, 1952 - but it is allowed to make such reserves as are required for the maintenance and development of the business; and where the business depends on the fortunes of a particular artiste these reserves may be considerable.”

6 39 TC 493 at p.502.

7 See 25.1 (Taxation of life tenant).

by S, under which income is payable to B for life. It could hardly be argued that such income falls outside the scope of s.624 ITTOIA.

26.2.3 *Income of life tenant settlor*

Where the settlor has an interest in possession, trust income actually received by the settlor is not within s.624 ITTOIA. It is subject to income tax under general principles. But from 2006/07 the rates of tax are the same in either case,⁸ so the issue does not now arise.⁹

26.2.4 *Property business income*

Property Income Manual 1045 discusses how one calculates property income for the purposes of the Settlement Provisions:

1045. Life interest trusts [October 2011]

Trusts and the settlor - losses

... Various special provisions may apply to trusts and to those who set them up (the 'settlor'). In particular, there is a rule to prevent tax avoidance which can treat trust income as being, for tax purposes, the income of the settlor. Such income is taxed on the settlor under s.619(1) ITTOIA. Where the income is property income, the normal property income rules apply in calculating the income. (S.623 ITTOIA).

This is correct. It follows that interest paid by the trustees is in principle deductible in computing the quantum of property income for s.624 purposes.

26.2.5 *Property business losses*

The Property Income Manual then considers the treatment of losses:

1045. Life interest trusts [October 2011]

Trusts and the settlor - losses

⁸ See 43.5 (Settlor-interested trust: rates of tax on settlor).

⁹ The point was discussed in the 4th ed. of this book at 11.4.3. Trust income not received by the life tenant settlor is within s.624 ITTOIA. That applies to income used for trust expenses and income for tax purposes which is capital for trust law purposes.

The more common case is where the trustees carry on the rental business but the settlor is caught by Section 619(1). Under these circumstances the settlor can't set any trust rental business losses against personal rental business income.

Similarly the settlor can't merge personal rental business losses and the trust rental business profits which are deemed to be the settlor's income and charged under Section 619(1). Thus:

- Where the trustees have a rental business loss and the settlor has a personal rental business profit, the trust loss is carried forward and the settlor is taxed on their personal rental business profit; the amount of the trustees' rental business profit charged on the settlor in the following year under Section 619(1) will be reduced by the trust loss carried forward.
- Where the trustees have a rental business profit and the settlor has a personal rental business loss, the settlor is taxed on the trust rental business profit under Section 619(1); the settlor's personal rental business loss can't be merged with the trust profit; but, as a separate matter, the settlor may in some cases be able to set a personal rental business loss sideways against other income, including any Section 619(1) income deemed to arise from the trustees' rental business; see PIM 4205.

The position is different where the taxpayer is:

- the settlor; and
- the life tenant; and
- carries on the rental business.

Under these circumstances the settlor can merge their personal property losses with the deemed income from the trust and vice versa.

This is thought to be correct. See too 16.4 (Losses of overseas property business).

26.2.6 *Trustee expenses*

Section 624(1A) ITTOIA provides:

If the settlement is a trust, expenses of the trustees are not to be used to reduce the income of the settlor.

ITA EN provides:

3323.New subsection (1A) makes it explicit that trustees' expenses are

not taken into account in measuring the income of a settlor under section 624 of ITTOIA. This follows from the fact that it is the income arising that is deemed to be the settlor's and the income arising is the gross amount out of which the trustees may pay expenses.

This is important because if s.624 does not apply, expenses do reduce the income of the life tenant.¹⁰

26.2.7 *Settlor's deductions and reliefs*

Section 623 ITTOIA provides:

For the purpose of calculating liability to tax under this Chapter (but for no other purpose), a settlor shall be allowed the same deductions and reliefs as if any amount treated under this Chapter as income of the settlor had actually been received by the settlor.

As far as I can see, this is not needed (except perhaps for the avoidance of doubt). Deductions and reliefs should be available in any event under general principles. There are no deductions or reliefs which would otherwise be disallowed on the basis that the settlor did not actually receive the income arising under the settlement. Perhaps that may not have been the case in 1938 when the provision was first introduced. If so, the provision survives mainly for historical reasons, and, perhaps, for the avoidance of doubt. The same point applies to the equivalently worded provision in s.746 ITA 2007, which originated in 1936.¹¹

26.2.8 *Income arising under the settlement must be identifiable*

Section 624 assumes that one can *identify* the amount of income which arises under the settlement. If that identification is not possible then it is considered that s.624 does not operate.¹² In straightforward cases this is not a problem. The issue tends to arise where there are two settlors; see 76.4.2 (Beneficial loans, guarantees, payments of trust expenses).

¹⁰ See 25.2 (Trustees expenses).

¹¹ See 28.10.4 (Transferor's deductions and reliefs).

¹² The same point applies to the TAA provisions; see 27.7.2 (Income arising must be identifiable).

26.3 Meaning(s) of “settlor-interested”

26.3.1 *The concepts of “settlor-interested”*

The term “settlor-interested”, first coined in the FA 2000, is used in connection with various provisions of which the most important are:

- (1) The IT settlement provisions (discussed in this chapter).
- (2) Section 86 TCGA.¹³

Consistent with the patchwork nature of UK tax, these provisions have significant differences, though they share a common framework. “Settlor-interested” is a convenient label, but not a wholly accurate one.

26.3.2 *“Settlor-interested” for IT purposes*

Section 625(1) ITTOIA provides:

A settlor is treated for the purposes of section 624 as having an interest in property if there are any circumstances in which the property or any related¹⁴ property—

- (a) is payable to the settlor or the settlor’s spouse or civil partner,
- (b) is applicable for the benefit of the settlor or the settlor’s spouse or civil partner, or
- (c) will, or may, become so payable or applicable.

Sections 625 - 628 ITTOIA contain about a dozen complex exceptions which are not discussed here as they are not relevant to the themes of this book. In practice the settlor and spouse are usually expressly included as beneficiaries or expressly excluded.¹⁵

13 See 47.4 (Settlor-interested condition). Other examples, not discussed in this book, are s.169F TCGA (restriction of holdover relief for settlor-interested trusts); Sch 4A TCGA (disposal of interest in settlor-interested trusts). In addition, “power to enjoy” for s.720 ITA is a similar concept, with a different label. GWR is a comparable but not identical concept.

14 “Related property” is defined in s.625(5) ITTOIA:

In this section “related property”, in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of, or of income from, that property or income from it.

15 For further discussion see Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010) Chapter 13 (Settlor exclusion and default clauses).

26.3.3 *Beneficial loan or guarantee*

Beneficial loans and guarantees to trustees potentially raise three distinct questions, so far as the settlement provisions are concerned:¹⁶

- (1) Is the lender/guarantor a settlor by virtue of the loan/guarantee? (This question generally arises only if the lender/guarantor is not the original settlor, though it could also arise if one had to consider whether the settlor has provided additional property and so tainted the settlement).
- (2) If so, what property has the lender/guarantor provided?
- (3) Does the lender/guarantor have an interest in the trust property by virtue of the loan/guarantee? (This question does not arise if the lender/guarantor already has an interest in the trust property.)

It is necessary to distinguish between loans which are (1) interest-free (2) beneficial but not interest-free, eg, at low interest; and (3) commercial loans. Guarantees are not the same as loans, but the issues overlap, so I also consider them in this section.

There are many possible permutations, which makes an exposition rather more difficult.

To start with the simplest case: suppose the settlor lends interest-free to a trust from which he or she is otherwise excluded. The HMRC view is that the trust is settlor-interested as the settlor may benefit by repayment of the loan:

In *Jenkins v IRC* (26 TC 265) the Court of Appeal found that the making of an interest-free loan brought the settlement into what is now [s.624]. In the *Jenkins* case, the dispute was about whether certain income received by the trustees of the settlement could be assessed on the settlor under the provisions of FA 1938 s38(4). That provision contained an extended definition of retaining an interest in income that is in similar terms to the definition [in s.624].

The effect of the decision in *Jenkins* was that a settlor who has made an interest-free loan to his/her trust has brought himself or herself within the scope of s38(4), and by implication [s.624] (albeit that there would be no charge unless income actually arose to the trustees).¹⁷

¹⁶ For other issues raised by loans to trustees, see 49.1.1 (Cross references).

¹⁷ Letter from HMRC to the Association of British Insurers, September 2004, accessible www.kessler.co.uk. For other issues arising on settlor loans to trusts, see 26.13 (Settlor receives capital sum) and 28.11 (Transferor receives capital sum).

The contrary is faintly arguable¹⁸ but for practical purposes this should be accepted as correct.

The same applies if the settlor lends on terms which are beneficial but not interest-free, eg at a low rate of interest. However a settlor (if otherwise excluded) has no interest if the loan is on commercial terms, as repayment of such a loan is not a benefit.

If someone other than the original settlor lends interest-free to a trust, the loan makes the lender a settlor.¹⁹ There is then a trust with two settlors, the original settlor and the lender. The lender will be within the scope of s.624 on the income originating from the lender, if one can identify it.²⁰

If someone other than the original settlor lends on terms which are beneficial but not interest-free, eg at a low rate of interest, the loan still makes the lender a settlor. However the lender will not be within the scope of s.624 unless one can identify the income originating from the lender, which is not usually the case.²¹

If the settlor (“the guarantor”) guarantees a loan or other obligation of the trustees, the trust is not settlor-interested (assuming the settlor is otherwise excluded). A guarantor’s claim against a solvent trust would only arise if the trustees failed to meet their primary contractual obligations and the words “in any circumstance whatsoever” do not extend to a breach of contract of that kind.

If someone other than the settlor gives a guarantee, the guarantor would not fall within s.624, unless:

- (1) one could identify the income originating from the guarantor (which is not usually the case) and
- (2) the guarantor had an interest in that income under the trust (the existence of the guarantee alone does not constitute an interest).

26.3.4 *Meaning of “spouse/civil partner”*

Section 625(4) ITTOIA gives the word “spouse” an artificial and slightly narrow meaning:

18 The point was conceded in *Jenkins v IRC* 26 TC 295 but the concession was held to be correct in *Wachtel v IRC* 46 TC 543. So the issue remains (just) arguable in the Court of Appeal.

19 A person who is not otherwise a settlor in principle becomes a settlor by virtue of making an interest-free loan: see 75.16 (Interest-free or back-to-back loan).

20 See 76.4.2 (Beneficial loans, guarantees, payments of trust expenses).

21 See 76.4 (Multiple settlors: cases where apportionment not possible).

In subsection (1) “the settlor’s spouse or civil partner” does not include—

- (a) a spouse or civil partner from whom the settlor is separated under an order of a court or a separation agreement,
- (b) a spouse or civil partner from whom the settlor is separated where the separation is likely to be permanent,
- (c) the widow or widower or surviving civil partner of the settlor, or
- (d) a person to whom the settlor is not married but may later marry or a person of whom the settlor is not a civil partner but of whom the settlor may later be a civil partner.

The TAA provisions and the s.86 provisions do not contain the same provision, which is anomalous, but that is the patchwork nature of UK tax. Fortunately it does not often matter.

For the general meaning of spouse, see App. 1.2 (Meaning of “spouse”).

26.3.5 *Settlor interested in part of trust fund*

The IT settlement provisions only apply to income from property in which the settlor has an interest. So if the settlor is excluded from part of the trust fund, the IT provisions do not apply to that part. HMRC agree. The TSE Manual provides:

TSEM4200 settlor retains an interest [21 Jan 2011]

...Settlement only partially settlor-interested

Where the settlor has retained a clearly defined interest in a distinct part of the settlement, for example in one fund forming part of a trust, only a corresponding part of the income is caught. In other cases of a settlor retaining a partial interest in a trust, you should submit the case to HMRC Trusts & Estates Technical Edinburgh for advice.

26.3.6 *Settlement ceasing to be settlor-interested*

If the settlor originally had an interest in trust property but is later excluded (together with the settlor’s spouse) then s.624 ITTOIA ceases to apply to income arising after the date of the exclusion.²²

²² Contrast 28.6 (Power to enjoy: Section 721 Condition A); 47.4 (Settlor-interested condition).

If the settlor is excluded from part of the trust fund, then they are within the scope of s.624 only on the income arising from the part in which they still have an interest.

The TSE Manual provides:

TSEM4513 - Tax paid by trustees where trust is not wholly settlor interested [December 2011]

Trust is partially settlor interested

The income tax paid by trustees for a tax year may be paid partly on income attributable to a settlor and partly on income from property from which a settlor is excluded from benefit. The tax paid on income attributable to the settlor does not enter the tax pool - see TSEM4512. Tax paid on other income enters the tax pool in the normal way - see TSEM3756 onwards,

Example

A settles property into the A discretionary settlement. The settlement consists of two funds.

Fund A contains a house which is let and a block of shares in A plc.

Fund B contains a block of shares in B plc.

Under the terms of the settlement the settlor and any spouse or civil partner of the settlor are excluded from benefiting from Fund B.

In 2009-2010 the income of the trustees (and tax paid on that income) is as follows:

Tax due from trustees			
Fund A			
Rental Income	£10,000	£1,000 @ 20%	£200
		£9,000 @40%	£3,600
Dividend Income	£ 5,000	£5,000 @ 32.5% (of which	
		10% satisfied by tax credit)	£1,625
Tax paid			£5,425

The settlor is given credit for the tax paid on the income attributable to the settlor - £5,425. Where the tax paid by the trustees exceeds the settlor's own income tax liability the tax (excluding the £500 non payable tax credit attached to the dividends) may be repaid to the settlor.

Fund B

Dividend Income	£15,000	£15,000 @ 32.5% (of which	
		10% satisfied by tax credit)	£4,875
Tax paid			£4,875

As the settlor is excluded from benefiting from Fund B, this tax is not available to the settlor. The normal rules apply and £3375 of the tax paid (4875 less 1500 non payable tax credit attached to the dividends) enters the tax pool.

Trust ceases to be, or becomes, settlor interested

A trust may cease to be settlor interested part way through a tax year, for example when the settlor dies. Similarly, a trust may become settlor interested part way through a tax year, for example the settlor may marry or enter into a civil partnership with an existing beneficiary of the trust. Where this happens the tax paid by the trustees should be apportioned on a time basis so the part is available to cover the settlor's liability and the other part dealt with in the normal way.

Example

In 2009-2010 the income of the trustees (and tax paid on that income) is as follows:

		Tax due from trustees	
Savings Income	£10,000	1,000 @ 20%	£200
		9,000 @ 40%	£3,600
Tax paid			£3,800

The settlor of the trust dies on 5 January 2010. The trust ceases to be settlor interested on that date because Section 624 ITTOIA applies only to income arising under a settlement during the life on the settlor.

The settlor is taxed on £7,500 and is given credit for £2,850 (75% of £3,800).

The balance of the tax, £950 goes into the tax pool.

26.3.7 Transfer to new settlement

If the trust fund is transferred to a new settlement from which the settlor is not excluded, then s.624(1) ITTOIA continues to apply. The original settlor is the settlor of the new trust.²³

If the entire trust fund is transferred to a new trust from which the settlor (and spouse) are entirely excluded then s.624 ceases to apply, and if they are excluded from part, it ceases to apply in part.

26.4 Section 624 beneficiary relief

Section 685A ITTOIA avoids a double charge when income of a settlor-interested trust is paid to a beneficiary. I refer to this as “**s.624 beneficiary relief**”.

For completion of tax returns when this relief applies, see 24.3.6 (Entering discretionary trust income in beneficiary's tax return).

²³ See 75.7 (Transfer from trust A to trust B by exercise of trustees' power).

26.4.1 *Conditions for relief*

Section 685A(1) ITTOIA provides:

This section applies if—

- (a) a person receives an annual payment in respect of income from the trustees of a settlement,
- (b) the payment is made in the exercise of a discretion (whether of the trustees of the settlement or any other person), and
- (c) a settlor is charged to tax under section 619(1) on the income arising to the trustees of the settlement (whether in the current year of assessment or in a previous year of assessment) out of which the annual payment is made.

The relief only applies to discretionary trusts. But if a trust confers an interest in possession (not on the settlor) then no relief is needed: the life tenant is not taxable as the trust income is the income of the settlor and of the settlor alone.

It is considered that a settlor is not charged to tax (within the meaning of (c)) if the s.624 remittance basis applies and the income is (un)taxed under the remittance basis. Where that relief applies, s.624 beneficiary relief is disapplied; but the contrary is arguable.

Section 685A(2) ITTOIA provides:

This section applies only in respect of that proportion of the annual payment which corresponds to the proportion of the total income arising to the trustees of the settlement in respect of which a settlor is chargeable to tax under section 619(1).

Section 685A(2) may apply where:

- (1) A settlement is partly settlor-interested (because there are two settlors or the only settlor is partly excluded).
- (2) A non-resident settlor is charged on part of the trust income (UK source income only).
- (3) A remittance basis taxpayer settlor is charged on part of the trust income (UK source and remitted income only).

26.4.2 *Relief for non-settlor-beneficiary*

Section 685A(3)–(6) ITTOIA confers the relief:

(3) If and in so far as this section applies, the recipient of the annual payment shall be treated for the purposes of this Chapter as having paid income tax at the additional rate in respect of the annual payment.

(4) But—

(a) tax which the recipient is treated by virtue of this section as having paid is not repayable,

(b) tax which the recipient is treated by virtue of this section as having paid may not be taken into account in relation to a tax liability of the recipient in respect of any other income of his...

(5A) If the recipient of the annual payment is treated by subsection (3) as having paid income tax in respect of the annual payment, the amount of the payment is treated as the highest part of the recipient's total income for all income tax purposes except the purposes of sections 535 to 537 (gains from contracts for life insurance etc: top slicing relief).

(5B) See section 1012 of ITA 2007 (relationship between highest part rules) for the relationship between—

(a) the rule in subsection (5A), and

(b) other rules requiring particular income to be treated as the highest part of a person's income.

(6) Sections 494 and 495 of ITA shall not apply in relation to an annual payment if and in so far as this section applies.

EN FB 2008 explains subsections (5A)(5B):

7. The income of a 'settlor-interested' trust is deemed, for the purposes of income tax, to be the settlor's income as it arises.

8. In non settlor-interested discretionary trusts, where income payments are made to beneficiaries, the income constitutes a new source, and is taxed on the beneficiary. The tax paid by trustees is available to the beneficiaries in the form of a tax credit.

9. In a settlor-interested trust, an income payment to a beneficiary is still a new source of income taxable in the beneficiary's hands. However the tax paid by the trustees of such trusts is treated as paid on behalf of the settlor. Because the settlor has already been taxed on the whole amount, charging the beneficiary to additional tax would result in a form of double taxation.

10. Section 685A ITTOIA 2005 provides that income paid by trustees of a settlor-interested trust to (non-settlor) beneficiaries comes with a non-repayable 'notional' tax credit equal to the higher rate of tax (currently 40 per cent) which covers all the tax liability on that income.

11. However, under current statutory ordering rules income from a trust is charged before savings and/or dividend income. The result is that a beneficiary of such a trust who also has savings and/or dividend income

may find that the non-trust income is pushed into higher rates so that more tax is due overall.

12. The measure amends this ordering rule, so that income from a settlor-interested trust is treated within section 1012 ITA 2007 as one of the highest slices of income instead of being treated as part of the lowest slice.

13. The amending legislation backdates the correct position to 6 April 2006 to ensure that those affected are not disadvantaged by the omission.

Two policy points arise from this which ought to raise serious questions about the rule of law in relation to the UK tax system. First the tax system is so complex that it took two years for the error in the FA 2006 to be noticed and corrected. (I confess I did not notice it myself.) Secondly, the error was corrected by casual retrospective legislation.

The TSE Manual provides:

4570 Payments to beneficiary other than the settlor [December 2011]

... For 2006-07 onwards the law provides that discretionary payments to the beneficiary are treated as though the beneficiary had paid tax at the higher rate (see TSEM3755). The amount of the actual payment (it is not grossed up) should be shown in the beneficiary's return and it is included in the calculation of that person's total income. The tax credit ensures the beneficiary has no further liability in respect of the payment but it is ring-fenced so that no part of it can be repaid or set against liability arising from any other income of the beneficiary.

26.4.3 *Relief for settlor-beneficiary*

Section 685A(5) ITTOIA provides:

If the recipient of the annual payment is a settlor in relation to the settlement, if and in so far as this section applies the annual payment shall not be treated as his income for the purposes of the Income Tax Acts (and subsection (3) does not apply).

The TSE Manual provides:

4570 Payments to the settlor [December 2011]

Where you tax the settlor on the income arising to the trust, discretionary payments out of the trust to the settlor are not further taxable. For years up to and including 2005-06 the phrase in Section

687(1) ‘but would not be his income if it were not made to him’ means Section 687 does not apply to payments that fall to be treated as the income of the settlor under Section 624 ITTOIA. For 2006/07 onwards discretionary payments made by the trustees to the settlor are taken out of charge by Section 685A(5) ITTOIA.

The legislation distinguishes between non-settlor beneficiaries and the settlor. In the one case the beneficiaries are given a credit, and in the latter case the income is tax free. At first sight this seems strange, but a reason will emerge.

The payment is not a capital payment for s.87 purposes: see 48.6.2 “Chargeable to income tax”).

26.5 Section 624 remittance basis

Section 648 ITTOIA provides a relief which I call “**the s.624 remittance basis**”.

The legislation uses the clumsy but effective drafting technique of restricting the definition of “income arising under a settlement”. That term is defined in a commonsense way in s.648(1)²⁴ and s.648(3) then provides:

And if, for a tax year, section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor, references in this Chapter to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax.

(4) See Chapter A1 of Part 14 of ITA 2007 for the meaning of “remitted to the UK” etc.

This applies to “relevant foreign income” arising under the settlement. The drafter has overlooked the definition of RFI, which means foreign income chargeable under specified provisions. Foreign source income of non-resident trustees is not RFI.²⁵ Taken literally, s.648(3) would never apply to income of non-resident trustees. But the context shows that

24 See 26.2 (Meaning of “income arising under a settlement”).

25 See 9.3.1 (Relevant foreign income).

“relevant foreign income” is a slip for “foreign source income”.

Section 648(5) provides a timing provision:

Where subsection (3) applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

In short, foreign income qualifies in principle for the s.624 remittance basis if it is not remitted to the UK.

The charge under s.648(5) arises if two conditions are satisfied:

- (1) The income “is remitted to the UK”.
- (2) The circumstances are “such that, if the settlor remitted it, the settlor would be chargeable to income tax”.

In practice this mainly concerns settlor-interested discretionary trusts. Income of a trust where the settlor has an interest in possession is in principle outside the scope of s.624,²⁶ though s.624 could apply to a receipt which was income for tax purposes but capital for trust purposes.

26.5.1 *Transitional rule for pre-2008 trust income*

Para 86(4) Sch 7 FA 2008 provides (so far as relevant):

... in relation to an individual’s income ... for the tax year 2007–08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

The point is that there is a taxable remittance of pre-2008 trust income only if it is received/used/enjoyed by the settlor in the UK. Receipt (etc) by a relevant person does not count.²⁷

For this purpose it is necessary to decide whether s.624 income is income of the individual for the tax year 2007/08 or before. The timing rule in s.624(5) might treat pre-2008 income as post-2008 income and so disapply the transitional relief. Para 86(4A), inserted with retrospective effect by the FA 2009, deals with this:

For the purposes of sub-paragraph (4), section 648(2) to (5) of ITTOIA

26 See 26.2.3 (Income of life tenant settlor).

27 See 10.8 (Relevant person transitional rule for pre-2008 income and gains).

2005 (and corresponding earlier enactments) do not apply (so that relevant foreign income which arose under a settlement in the tax year 2007-08 or any earlier tax year is to be treated as income for the tax year in which it arose).

The RDR Manual provides:

31490 Relevant persons and foreign income and gains arising to a settlement before 6 April 2008 [March 2011]

Background

As explained in RDRM31480 s.809L ITA has introduced the concept of ‘relevant person’ RDRM33030 which, broadly, provides that a taxable remittance will occur when foreign income or gains are brought into or otherwise used in the UK by relevant persons.

Where a settlor creates a settlement and retains an interest in the property in that settlement the income arising to the trust is treated, for income tax purposes, as the income of the settlor alone under s624 ITTOIA. This is the case even where the trust income is paid to someone other than the settlor. Refer to RDRM33590 Settlements: Chapter 5 Part 5 ITTOIA.

Where a settlor claims to use the remittance basis, section 648 provides for the trust income to be treated as arising in the year in which it is remitted. Because of the narrower definition of remittance which applied before 6 April 2008 this would produce an inequitable result where relevant foreign income that arose to a settlement before 6 April 2008 is remitted and becomes chargeable on the settlor after 6 April 2008.

Transition

The transitional rule provides that in establishing whether there has been a remittance of an individual’s income and gains for 2007-08 or any earlier year Conditions A and B, Condition C and Condition D at s.809L ITA (refer to RDRM33020 Meaning of Remittance) are applied as if references to ‘relevant person’ are to the individual.

For the purpose of applying this transitional rule only, that is, for the purpose of determining whether there is any benefit under the provisions of paragraph 86(4) only the income is treated as arising in the year that it arose to the settlement.

Effect

This means that income arising under a settlement in tax years prior to 5 April 2008 but which is remitted after 6 April 2008 is not treated as remitted by the settlor unless it has been brought to, received by or used in the UK for his benefit.

26.5.2 *Post-2008 trust income*

For post-2008 trust income, the usual ITA remittance basis applies, so the s.624 income is treated as remitted if it is brought/received/used in the UK by any relevant person.

I had thought that under the pre-2008 there was taxable remittance if the trustees brought trust income into the UK, but HMRC presumably did not agree, as that is not the position now for pre-2008 income.

26.6 S.624 remittance basis planning

Practical ways of avoiding the s.624 remittance basis charge are as follows:

- (1) Give the settlor an interest in possession, so trust income is taxed on the RFI remittance basis, and is outside s.624.²⁸
- (2) The trustees do not remit any trust funds to the UK and if the trustees pay the income in any form to the settlor, the settlor does not remit that income.
- (3) The trustees segregate trust income and trust capital and remit trust capital, not trust income. There is no charge under the s.624 remittance basis if trustees remit to the UK a sum which is not income arising under the settlement.

26.7 Non-resident settlor

The legislation again uses the clumsy but effective drafting technique of restricting the definition of “income arising under a settlement”. That term is defined in a commonsense way in s.648(1)²⁹ and s.648(2) then continues:

But if, in a tax year, the settlor is not UK resident, references in this Chapter to income arising under a settlement do not include income arising under the settlement in that tax year in respect of which the settlor, if actually entitled to it, would not be chargeable to income tax by deduction or otherwise because of not being UK resident.

28 See 26.2.3 (Income of life tenant settlor).

29 See 26.2 (Meaning of “income arising under a settlement”).

Where the settlor is non-resident, UK source trust income is within the scope of s.624, but foreign income is not.³⁰ Contrast s.720 ITA which does not apply at all unless the transferor is ordinarily resident.

26.7.1 *UK resident trust, non-resident settlor*

The trustees are taxed in full on foreign source income. This prevents s.624 applying where it might benefit the taxpayer.

However the settlor is taxed on UK source income. This is beneficial if the settlor's marginal rate is less than the top rate of income tax, or if non-residents income tax relief applies.³¹

26.7.2 *Non-resident trust, non-resident settlor*

Neither the trustees nor the settlor are taxed on foreign source income.

The settlor is taxed on UK source income. This is beneficial if the settlor's marginal rate is less than the top rate of income tax, or if the circumstances are that non-residents income tax relief is available to the settlor and not to the trustees, which could happen because of the UK beneficiary rule.³²

26.7.3 *Remittance of trust income*

It does not matter for the non-resident settlor if trust income is remitted.

Suppose:-

- (1) Income arises to the trustees of a settlor-interested trust while the settlor is non-resident ("**non-resident period income**").
- (2) The income is remitted by the trustees when the settlor is resident and a remittance basis taxpayer.

Section 648 ITTOIA provides:

- (3) And if, for a tax year, section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor, references in this Chapter to income arising under a settlement include in relation to any relevant

³⁰ This is clear on the words of the section, but if authority is needed, see *IRC v Countess of Kenmare* 37 TC 383.

³¹ See 39.1 (Non-residents IT relief).

³² See 39.1 (Non-residents IT relief).

foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax...

(5) Where subsection (3) applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

It may seem at first sight that the non-resident period income is caught as it is treated under s.648(5) as arising in the year of remittance. That is however, not the case, for two reasons:

(1) The circumstances are not “such that, if the settlor remitted the non-resident period income, the settlor would be chargeable to IT”. Unless the settlor is UK resident when the income arises, the settlor would not be taxed on it when remitted later, even if it had been the settlor’s income all along.

(2) Non-resident period income is not “income arising under the settlement” by virtue of s.648(2).

The result is sensible and consistent with rule that income of an individual arising during a non-resident period is not taxable if remitted during a resident period.³³

26.8 Tax return: disclosure of s.624 income

Income is entered in boxes 7-14 of form SA 107 (Trusts etc) 2011/12. SA107 Notes (2011/12) provides:

Income arising to trustees of a trust or settlement

Boxes 7 to 12

Copy the figures from form R185(Settlor). If you have not been provided with one you may need to ask the trustees of the trust or settlement for the information to go in boxes 7 to 12. Use the appropriate box according to the rate of tax taken off by the trustees. You get credit for tax paid by the trustees.

Do not enter foreign income in these boxes – use the Foreign pages instead.

If you are both the settlor and the beneficiary of a non-discretionary

33 See 9.19 (RFI/gains arising when non-resident, remitted when resident).

settlor-interested trust, the amount of your entitlement as beneficiary may be less than the total trust income because the trustees have used some of the income to pay the trust management expenses. But as a settlor you are taxable on all the income so you must enter the total trust income in boxes 7 to 12.

Income arising from a non-trust settlement

Boxes 9, 13 and 14

If you are taxable as settlor on income arising to another person in a non-trust settlement or arrangement, enter dividend type income in box 9, non-savings income in box 13 and savings income in box 14. Helpsheet 270 Trusts and settlements – income treated as the settlor’s explains more about this and will help you to work out these amounts. If, exceptionally, tax has been deducted from the income, enter it in box 7 or box 8. If the income is foreign, use the Foreign pages.

26.9 Taxation of trustees of settlement within s.624

This frustrating topic is not considered in this book. For an introduction see “Tax Charge Doubled!” Malcolm Gunn, *Taxation* 22 February 2007. HMRC Trusts and Estates Newsletter (December 2010) provides:

Trusts and Estates - mandated income of settlor-interested trusts

Step 1 of the Trust and Estate Tax Return (SA900)

Sometimes the trustees of an interest in possession (IIP) trust mandate trust income to a beneficiary. If the trustees mandate income to a beneficiary, it means that the beneficiary receives it and the trustees do not. The guidance on this is at Trusts Settlements and Estates Manual (TSEM) 3761 to 3762.³⁴

Step 1 of the Trust and Estate Tax Return (SA900 page 2) does not require a full return to be made, nor income tax to be paid, where all income is mandated to an IIP beneficiary. However, that practice does not currently apply where the trust is settlor interested. Following a review of that practice, HMRC has concluded that where income is mandated to an IIP beneficiary of a settlor-interested trust there is no statutory basis for taxing the trustees as being in receipt of the income. The settlor is taxed on any income (or income from property) in which he or she has a retained interest.

34 See 25.3.1 (Income mandated to life tenant).

The SA900 for 2010-11 has been amended to reflect the change of view. HMRC will no longer require a fully completed return from trustees of settlor interested trusts in respect of income that is mandated to an IIP beneficiary. Where trustees have already received either a paper return or a notice to file a return for 2009-10 and all income is mandated, they should complete Step 1 accordingly.³⁵

26.10 Taxation of life tenant (not settlor) of settlor-interested trust

Suppose a settlor-interested settlement under which a beneficiary (“B”, not the settlor) has an interest in possession. Income within s.624 ITTOIA is treated as the income of the settlor and of the settlor alone, so that B cannot be taxable on it. B is in principle taxable on income not within s.624, that is, income within the s.624 non-residence defence or s.624 remittance basis.

26.11 Settlor indemnity

Section 646 ITTOIA provides:

- (1) A settlor is entitled to recover from—
 - (a) any trustee, or
 - (b) any other person to whom the income is payable in connection with the settlement,the amount of any tax paid by the settlor which became chargeable on the settlor under section 624 or 629.

For the tax implications see 29.4.10 (Reimbursement of tax under statutory indemnity); 29.21 (Relevant income used to pay expenses) and 75.21 (Failure to exercise right of reimbursement).

26.12 Section 624 v. s.720: comparison and priority

Sections 624 ITTOIA and 720 ITA cover some similar ground. For a full comparison one would need to read all the relevant chapters in this book. It may be helpful to summarise the major differences:

³⁵ <http://www.hmrc.gov.uk/cto/newsletter-april11.pdf>.

Section 624

Applies to trusts
 No motive defence
 Settlor indemnity
 Applies generally

Section 720

Applies to non-resident trusts *and companies*
 Motive defence
 No indemnity for transferor
 Applies to *ordinarily* resident transferor

The rates of tax are slightly different, a (probably accidental) result of the FA 2006.³⁶

Where both s.720 ITA and s.624 ITTOIA apply (or appear to apply), which has priority? It must be one or the other: the settlor/transferor cannot be taxed twice on (effectively) the same income. Section 720 originated in 1936, s.624 originated in 1938. But there is no reason why that distant historical priority should determine the issue. Income within s.624 is treated as income of the settlor “*and of the settlor alone*”. Section 720 lacks those additional words. So it is considered that s.624 has priority over s.720. Where s.624 applies, the transfer of asset conditions are not satisfied, because if the income is that of the settlor alone, it is not the income of the person abroad.

26.13 Settlor receives capital sum

Section 633 ITTOIA provides:

- (1) Any capital sum paid directly or indirectly in any tax year by the trustees of a settlement to the settlor is treated for income tax purposes as follows.
- (2) The sum is treated as the income of the settlor for the tax year so far as the amount of the sum falls within the amount of income available up to the end of the year.

Section 634 ITTOIA defines “capital sum” and “sums paid to the settlor”, but is not sufficiently important to discuss in full here.³⁷

The key term is “available income.” Section 635 ITTOIA provides the definition:

³⁶ See 43.5 (Settlor-interested trust: rates of tax on settlor).

³⁷ The definition of capital sum is the same as for the transfer of asset rules; see 28.12.2 (“Capital sum”). The definition of paid to the settlor is discussed in the context of s.87: see 48.7 (Receipt from the trustees).

- (1) For the purposes of section 633 the amount of income available up to the end of any tax year is, in relation to any capital sum paid as mentioned in subsection (1) of that section by the trustees of a settlement, calculated as follows.
- (2) Add together the amount of income arising under the settlement in that year and any previous year which has not been distributed.
- (3) Deduct from that figure—
 - (a) the amount of that income taken into account under section 633 in relation to that sum in any previous year or years,
 - (b) the amount of that income taken into account under section 633 in relation to any other capital sums paid to the settlor in any year before that sum was paid,
 - (c) any income arising under the settlement in that year or any previous year which has been treated as income of the settlor under section 624 or 629 ...

Section 633 is generally irrelevant to settlor-interested trusts. The trust income will fall into one of two categories:

- (1) It will be treated as accruing to the settlor under s.624, or
- (2) (if the s.624 remittance basis applies or the settlor is non-resident) it will not be “income arising under the settlement”.

In either case there is no “available income”.

Section 633 is (in short) intended to catch capital sums paid to the settlor from a trust which is not settlor-interested. Accordingly I shall not discuss the section further here. Where such payments are in point, see too 28.11 (Transferor receives a capital sum).

26.14 Interaction of s.624 and s.37 TCGA

Section 37(1) TCGA deals with the relationship between IT and CGT:

There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money's worth

- [a] charged to income tax as income of, or
 - [b] taken into account as a receipt in computing income or profits or gains or losses of,
- the person making the disposal for the purposes of the Income Tax Acts...

Thus IT has priority over CGT.

The section does not work when s.624 applies as the income is treated for IT purposes as income of the settlor and not the trustees! HMRC suggest a creative application of s.32 TMA may solve the problem. CG Manual para 14304 provides:

14304. Sums chargeable as income [June 2010]

This exclusion does not apply to ... situations where the income in question is not treated as the income of the person making the disposal. Typically this is a case of a settlor interested trust where the income is taxed on the settlor. If in this situation the settlor is assessable to both income tax and capital gains tax then relief may be available under s.32 TMA 1970.

Suppose a settlor-interested discretionary trust. Income accrues to the trustees. The settlor pays income tax. What stops the trustees realising a chargeable gain, on which the trustees may be chargeable if UK resident, or which may be s.2(2) amounts if the trust is not UK resident? This solution does not lie in s.32 TMA as it is not the case that the settlor is assessable to both IT and CGT. There is nothing obvious to stop the trustees realising a chargeable gain. But no-one suggests that there is a charge. The solution must be in a general implied rule that receipts of an income nature are not within the scope of CGT.

26.15 Corporate settlor

Section 627(4) ITTOIA provides:

The rule in section 624(1) does not apply in relation to income which—

- (a) arises under a settlement, and
- (b) originates from any settlor who was not an individual.

This provisions was introduced in 2012. The background note to this clause explains:

The purpose of the amendments to the settlements legislation is to confirm that income arising under a settlement is treated as that of the settlor only where the settlor is an individual. The proposed changes would close avoidance schemes that seek to exploit the settlements legislation by using corporate settlors of ‘interest in possession’ settlor-interested trusts to try to avoid income tax at higher or additional

rates which would otherwise be due on dividends paid by a subsidiary of the corporate settlor. The amendments would ensure that the relevant provisions do not apply to settlors who are not individuals and hence that the income would not be treated as that of the settlor in those situations.

Even before 2012, the correct view was that s.624 did not apply to a corporate settlor.³⁸ It is helpful to have clarified the law, even if the reason for the change was to stop a tax avoidance scheme which did not work.

38 The point is now of historic interest only; but see the 10th edition of this work para 24.16 (Corporate Settlor); Kessler & Brown, *Taxation of Charities and Non-profit Organisations* 8th ed para 20.2.2 (Loans by company) (online version www.taxationofcharities.co.uk).

CHAPTER TWENTY SEVEN

TRANSFER OF ASSETS ABROAD: INTRODUCTION

27.1 TAA – Introduction

Non-resident trusts and companies pay no UK tax on foreign income. A non-resident company may pay less tax on UK income. These rules present an obvious means of income tax avoidance. HMRC's first answer to this is Chapter 2 Part 13 ITA, entitled "Transfer of assets abroad".

There are strictly three charging provisions – ss.720, 727 and 731 – but for practical purposes there are two, as s.727 is only a minor supplement to s.720. This chapter considers the requirements they have in common. The next two chapters consider them individually.

The discussion of the provisions in International Manual 600000 contains almost nothing significant, but *thirty eight* paragraphs are withheld "because of exemptions in the Freedom of Information Act 2000". Information may be withheld if disclosure would be likely to prejudice the assessment or collection of tax.¹ No doubt parts of the withheld text identify tax avoidance possibilities or procedures to detect evasion and are correctly withheld. I expect that the bulk of the withheld text is simply a discussion of the law. Disclosure only prejudices tax collection if one takes the view that uncertainty in the scope of anti-avoidance law is desirable. This is constitutionally wrong. The principle of legal certainty is an important aspect of the rule of law. (That is the reason why the Manuals are published.) It is also pragmatically wrong. Legal certainty is in the interest of HMRC as well as private citizens. If HMRC are not prepared to state their view then private

¹ s.31(i)(v) Freedom of Information Act 2000. It is interesting to speculate whether some text might actually be withheld because it acknowledges that parts of RI 201 cannot seriously be defended as correct.

citizens must do as best they can. They can hardly be guilty of neglect if they form wrong views in this difficult area in which HMRC are themselves not prepared to comment, and this is likely to lead to loss of tax. But there it is.

In 2009 HMRC published some guidance on the ITA remittance basis rules as they apply to the TAA provisions, a rather narrow area. This is headed TAH (= Transfer of Assets Handbook).

The TAA provisions are expressed in mandatory terms, and do not only apply at the option of HMRC. This view was rightly accepted by HMRC (despite the irritation of the judge) in *Anson v HMRC*.² What is source for the goose is source for the gander.

27.1.1 *Forthcoming reforms*

On 6 December 2011 HMRC said:

The Government will propose amendments in Finance Bill 2013 to ... sections 714 to 751 of the Income Tax Act 2007 (transfer of assets abroad) ... A further announcement will be made around Budget 2012 and the Government intends to publish a consultation including draft legislation at that time.

This is no doubt a response to the EC infringement proceedings.³ A consultation on anti-avoidance provisions of this kind is a new and encouraging development.

As usual, the timetable fell behind. Budget 2012 provides:

2.78 As announced in December 2011 the Government will amend ... sections 714 to 751 of the Income Tax Act 2007 (transfer of assets abroad) ... The Government will consult on draft legislation after Budget 2012 and will implement changes in Finance Bill 2013. The changes, which are unlikely to be to a taxpayer's disadvantage, will have retrospective effect to 6 April 2012 but, exceptionally, a taxpayer may elect for the new rules to apply from 6 April 2013.

At the time of finalising this chapter in July, no-one knew what the rules

2 [2012] UKUT 59 (TCC). For the difficulties which would arise on any other view, see 31.48 (Can an individual disclaim the motive defence?).

3 See 56.3 (EC infringement proceedings).

are, even though the rules will take effect retrospectively from 6 April 2012. That is (fortunately) unusual in UK taxation, though not entirely unprecedented.

27.2 “Relevant transfer”

The key concept is “relevant transfer”. The charges only apply if a relevant transfer occurs. Section 716(1) ITA provides:

A transfer is a relevant transfer for the purposes of this Chapter if—

- (a) it is a transfer of assets, and
- (b) as a result of—
 - (i) the transfer,
 - (ii) one or more associated operations, or
 - (iii) the transfer and one or more associated operations,income becomes payable to a person abroad.

This sets out the following basic conditions:

- (1) *A transfer of assets.*
- (2) *Income becomes payable to person abroad.*
- (3) *Causation:* Condition (2) is caused by (i) the transfer, or (ii) associated operations, or (iii) both. I refer to this as “**the relevant transfer causation conditions (i), (ii) and (iii)**”, or together “**the relevant transfer causation conditions**”.

These basic conditions are the subject of this chapter. However the fact that there is a relevant transfer is not sufficient in itself to cause a tax charge. The further conditions in the various charging sections must be satisfied. These are considered in the next two chapters.

27.3 A “transfer” of “assets”

Section 717(a) ITA provides:

In this Chapter—

- (a) “assets” includes property or rights of any kind

Section 716(2) ITA provides:

In this Chapter “transfer”, in relation to rights, includes the creation of the rights.

If two parties enter into a contract there are *two* transfers of assets as both parties acquire rights.

In *IRC v Brackett* 60 TC 134, T entered into a contract of employment with a person abroad, an offshore company in which he was interested. Rights under a contract of employment are an “asset”. Entering into a contract of employment is a “transfer”. So T was taxed on all income accruing to the company as a result of the transfer.

If B borrows from L there are two transfers of assets, for B acquires the money borrowed and L acquires the benefit of the debt. If L is non-resident, then the interest is income accruing to a person abroad.

Note that there may be a “transfer of assets” in circumstances where there is no individual who is the “transferor”.

27.4 Person abroad

Section 718(1) ITA provides:

In this Chapter “person abroad” means a person who is resident or domiciled outside the UK.

27.4.1 *Foreign incorporated company*

Section 718(2) ITA provides:

For the purposes of this Chapter, the following persons are treated as resident outside the UK—

- (a) a UK resident body corporate that is incorporated outside the UK.

This is otiose because a foreign incorporated company is domiciled outside the UK⁴ and so even in the absence of this provision it is within the definition of a “person abroad”.

The rule that a UK resident foreign incorporated company should fall within the definition of “person abroad” made sense before the

⁴ See 2.16 (Domicile of company).

introduction of corporation tax in 1965; until then, a UK resident foreign incorporated company was only taxed on the remittance basis. Since 1965 the rule is not appropriate because a UK resident company pays tax on its profits on an arising basis, even if foreign incorporated, so there is no need for the TAA provisions to apply. However s.3(1) CTA 2009 provides:

- (1) The provisions of the Income Tax Acts relating to the charge to income tax do not apply to income of a company if—
 - (a) the company is UK resident, or
 - (b) the company is not UK resident and the income is within its chargeable profits as defined by section 19.

It is considered that s.720 is a “provision of the income tax acts relating to the charge of income tax” so it does not apply to income of a UK resident company. It is considered that the same applies to s.731.

This makes good sense, because if the profits are subject to corporation tax, HMRC do not need the TAA provisions. This view is also supported by CTA 2009 EN:

Clause 3: Exclusion of charge to income tax

46. This clause ensures that income of a company within the charge to corporation tax is not chargeable to income tax as well as corporation tax. It is based on section 6(2) of ICTA.

This argument was put in *IRC v Levy* but the judge expressed no view.⁵ HMRC do not officially agree,⁶ but they may not have considered this point.

One situation in which this issue arises is where a foreign incorporated company is accidentally UK resident, because of a failure to ensure that it is managed and controlled outside the UK. A second situation is where one deliberately uses a UK resident but foreign incorporated company. This may be done in order to obtain the IHT or CGT advantages of foreign situate property.⁷ There may be commercial reasons why it is desired that a foreign incorporated company should be managed and controlled in the

5 56 TC 58 at [87]. HMRC’s answer was to rely on s.9 ICTA 1988, but I cannot see how that helps. (Unfortunately the argument was not put in *R v Dimsey & Allen* 74 TC 263, but that should not preclude its being taken now.)

6 See 30.2.1 (Transferor’s credit).

7 See 30.2 (Undistributed UK taxable income of offshore company).

UK, and the tax system should hardly aim to discourage that. If it were desired to restrict the tax advantages (such as they are) of UK resident foreign incorporated companies, the TAA provisions are not the way to go about it.

It is considered that s.718(2) should be repealed and replaced by a rule that a UK resident company is not a “person abroad”. If my analysis is right, the subsection is otiose, but if my analysis is wrong, it is undesirable if not pernicious.

27.4.2 *Trustees and PRs*

Section 718(2) ITA provides:

For the purposes of this Chapter, the following persons are treated as resident outside the UK—

...

- (b) the person treated as neither UK resident nor ordinarily UK resident under section 475(3) (trustees of settlements), and
- (c) persons treated as non-UK resident under section 834(4) (personal representatives).

This is otiose because the statutory residence rules for trustees and PRs clearly state when they are regarded as resident outside the UK for IT purposes.

27.5 Income “becomes payable” to person abroad

The condition here is that income becomes payable to a non-resident or foreign domiciled person (the person abroad).

This condition is satisfied where the transfer is to a UK resident and domiciled person who later becomes non-resident or foreign domiciled.⁸

In *Latilla v IRC*⁹ a partnership share was transferred to a company abroad which received its share of the partnership profits. It was argued that trading profits could not be described as income *payable* to the company.

⁸ *Congreve v IRC* 30 TC 163 (a gift to a company which became non-resident), approved on this point in *IRC v Willoughby* 70 TC 57.

⁹ 25 TC 107. I mention for completeness only that this was followed in *Brackett v Chater* 60 TC 143.

Trading “income” is the result of a computation in trading accounts. The gross receipts of the trade or gross rents are not the income. The House of Lords rejected this argument and held that there was no difference between trading income and other types of income. It seems surprising today that this technicality was thought arguable, so far has the pendulum swung from literal to purposive construction.

Suppose T transfers money to a person abroad, and the person abroad uses the funds to repay a debt. In principle, no income arises to the person abroad as a result of the transfer, so the transfer does not satisfy the transfer of asset provisions.¹⁰

27.5.1 *Transfer from one person abroad to another*

Suppose assets are transferred from one person abroad to another, eg from offshore trustees to an offshore company. Can one argue that there is no relevant transfer because one cannot say that income *becomes* payable to a person abroad? It was payable to a person abroad even before the transfer! The argument is linguistically possible, but the context shows that it is wrong. If the argument was right then a transfer by a non-resident or foreign domiciled transferor would never be a relevant transfer, which is certainly not the case.

27.6 **Situs of transferred assets**

The heading “transfer of assets abroad” might suggest a requirement that UK situate assets must become non-UK situate, but that is obviously not the case.

It has been suggested that the assets must be UK situate at the time of the transfer. This was rightly rejected by the Special Commissioner in *IRC v Willoughby* 70 TC 57 at p.79. The taxpayer wisely abandoned this point on appeal. After all the creation of rights may be at transfer of assets and such assets are not situate anywhere before the transfer.

¹⁰ The example is based on the facts of *Fynn v IRC* 37 TC 629 where this s.720 point was not argued, presumably, because the Revenue accepted this view was correct. For other issues raised by this case, see 28.12.3 (“Connected with any relevant transaction”).

27.7 Transfer for full consideration

A relevant transfer may be made for full consideration and need have no element of “bounty” or gratuitous intent. (Contrast the settlement provisions.)¹¹

27.7.1 *Purchase of asset from person abroad*

Suppose T buys an asset from a person abroad for cash (“the purchase price”). At first glance, the payment of the cash purchase price is a relevant transfer. The payment is a transfer of assets; as a result of the payment, income (from the cash) will normally accrue to the person abroad. However, it is suggested that this is not the case if:

- (1) the asset would otherwise have yielded income to the person abroad;¹²
- (2) the purchase price does not exceed the value of the asset.

In these circumstances, the person abroad acquires the income of the cash purchase price T transfers to them, but T loses the income from the asset which they sell to T. If the two (broadly) cancel each other out, it cannot be said that any “income becomes payable” to the person abroad. If that is right, the transfer of asset conditions are not satisfied every time someone sells an asset to (or buys an asset from) a non-resident person. That would be a sensible result. If T sells assets to an offshore trust, say, or to an offshore company, it would be surprising if T’s only defence to TAA was the motive defence.¹³

27.7.2 *Income arising must be identifiable*

The provisions assume that one can *identify* the amount of income which arises to the person abroad as a result of the transfer. If that identification is not possible then the transfer of asset provisions do not - indeed cannot -

11 See 75.2.3 (Settlement-arrangement definition of settlement).

12 The position would of course be different if T transfers assets to an offshore company in consideration of an issue of shares or debentures, or a life policy.

13 In such cases T would often have “power to enjoy”. Unless this is right, there is double taxation. T may be liable under s.720 for income tax on the income arising from the asset sold to the person abroad. T is also liable to income tax on income arising from the proceeds which T receives on the sale of the same asset.

If my view is wrong, then the motive defence should be generously applied in cases of a sale for full consideration.

operate.

John Avery Jones raises this question:

What about buying a ticket from a foreign airline, buying a meal or paying for a hotel room when abroad? There is a transfer of assets and it is clear that “income becoming payable” includes the receipt of sums which form part of the recipient’s trading profits. Oh, and there is my IFA subscription, my subscription to *European Taxation*, my purchase of that overpriced new edition of *OECD Model Tax Convention*, and the new edition of *Klaus Vogel on Double Taxation Conventions* direct from the publisher. Foreign entities all of them. I expect if I think for a moment I shall think of lots more. What about my (foreign) car? Did I buy it from an agent for the manufacturer or from a UK subsidiary, and does it make any difference anyway?¹⁴

These are all transfers of assets, as a result of which (additional) trading income is payable to the person abroad. But none of these transfers are relevant transfers because one cannot identify the amount of income which becomes payable as a result of them.¹⁵

The question whether one can identify the income which arises to the person abroad as a result of a transfer sometimes overlaps with the question whether one can identify a transferor. In *IRC v Pratt* 57 TC 1 the taxpayers were held not to be transferors because one could not identify income arising to the person abroad from what each individual taxpayer had contributed or done.¹⁶ But the two questions are in principle distinct. A person who subscribes for shares in (say) Microsoft Inc is clearly a transferor, but one cannot identify what income accrues to Microsoft as a result of that transfer, so the transfer of asset provisions do not apply.

27.7.3 Deposit in offshore bank account

If T deposits money with a bank, the trading receipts of the bank are increased, though that may be reduced or almost cancelled by the interest

14 [1998] BTR 392.

15 Of course in practice considerations of materiality might also arise. An independent reason why the transfers of assets are not relevant transfers is that (maybe) that no income becomes payable as a result of them: see 27.5 (Income “becomes payable” to person abroad).

16 See 28.3.2 (Transfer procured by individual).

the bank pays to T. There is still a profit overall, if the bank is profitable, but that element of profit cannot be identified. The deposit is a transfer of assets but it is not a relevant transfer because one cannot identify the income which becomes payable as a result of it.

27.7.4 Transfer for issue of shares or debentures

Suppose T transfers an asset to a foreign company in exchange for the issue of shares or debentures in that company (set up for the purpose and wholly owned by a trust or structure set up by T). This may well be transfer for full consideration. It is nevertheless a relevant transfer. Indeed it is the archetypal TAA situation. Tax avoidance arrangements set up in the 1920s and 1930s typically involved the transfer of assets to a Canadian company in consideration of debentures issued by that company.

Contrast the position if T subscribes for shares or debentures in (say) a large quoted foreign company or collective investment scheme. This is not a relevant transfer as one cannot identify the income which arises as a result of the transfer.

27.7.5 Transfer for issue of bond or life insurance policy

The same applies if T subscribes for a bond or life insurance policy from a large foreign institution. One cannot normally identify the income arising to the institution as a result of the transfer so this is not a relevant transfer. However, if the transfer is linked to particular investments actually made by the institution (as is usually the case for a personal portfolio bond), it would in principle be possible to identify the income, and there would be a relevant transfer.

27.7.6 HMRC view

EN FB 2006 states:

[1] The [transfer of asset] provisions do not affect an individual's personal direct offshore investments. They only apply where an individual is able to enjoy income in a form that would otherwise be non-taxable (or subject to a lower rate of taxation), and there is a purpose to avoid UK tax.

[2] So the legislation would not apply where, for example,

[a] a UK resident invests directly in an offshore bank account or
[b] buys shares in a company quoted on an overseas stock exchange,
because the income arising from such investments remains liable to UK
tax in the usual way.¹⁷

Example [a] is the person who invests¹⁸ in an offshore bank account. That person makes a transfer of assets to a person abroad (the bank). It is broadly¹⁹ true that the income from such investments (ie bank interest) “remains liable to tax in the usual way”. But while this explains why HMRC do not wish to apply s.720 ITA, it does not actually offer any defence to the provisions.²⁰ (This fact is relevant to the motive defence, but it would be surprising if the only defence to s.720 was the motive defence.)²¹ The true reason is that one cannot identify any income of the bank which becomes payable as a result of the transfer, so the transfer is not a relevant transfer.

Example [b] is the person who buys shares on an overseas stock exchange. The example is misconceived. A person who buys shares does not make a relevant transfer of assets, unless the vendor is abroad; and the fact that the shares are “quoted on an overseas stock exchange”, like the flowers that bloom in the spring, has nothing to do with the case. If the vendor is abroad (perhaps the EN assumes this) the transfer is not a relevant transfer for the reason set out above.

Whatever one thinks of the reasoning of the EN, it does appear that the conclusions reached in this section would generally be acceptable to HMRC.

27.8 Income accruing to person abroad: causation conditions

There is not a relevant transfer merely because there has been a transfer of assets and income has become payable to a person abroad. The income

17 EN to s.79, para 63.

18 A loan or deposit in a bank account may not be an “investment” in the strict sense of the term, but the EN is not using the term “invest” in its strict sense.

19 It is not strictly true that income from offshore investments remains liable to UK tax “in the usual way”. A remittance basis taxpayer may invest in a foreign account to qualify for the remittance basis. An arising basis taxpayer obtains the tax advantage that tax is not deducted at source, and DTA relief may apply.

20 See 28.4 (Must the transferor avoid or intend to avoid IT?).

21 No-one expects the depositor to claim the motive defence in their tax return.

must become so payable as a result of the transfer (or associated operations). The test is one of causation.

27.8.1 *Purchase of secondhand company by individual*

Suppose T (UK resident) buys the shares of an already existing non-resident company (“**a secondhand company**”). Assume the company owns assets. That purchase involves a transfer of assets by T – payment of the purchase price²² – is described in the following discussion as “**the purchase price transfer**”.

It is the case that income accrues to a person abroad (the company). However, it cannot be said that the income became payable to the company as a result of the purchase price transfer. The company merely continues to receive the income from its own assets, as it did before, and is not in any way affected by the change in ownership of its shares. Thus if the vendor is UK resident and domiciled, the purchase price transfer is not a relevant transfer.

Now suppose T purchases the shares from a person abroad. In that case the purchase price transfer may be a relevant transfer because the vendor may invest the proceeds of sale and receive income as a result of that transfer. However, the income arising as a result of the purchase price transfer would be the income accruing to the vendor, not the company’s income.

In these cases there will have been (at least) one other transfer of assets, the transfer of assets to the secondhand company (eg on a subscription for the company’s shares). I call this “**the company funds transfer**”. The company funds transfer is a relevant transfer. If T is the transferor of that transfer then T will in principle be within s.720 and taxed on the secondhand company’s income.²³ If T is not the transferor, T may be subject to tax under s.731 if T receives benefits (unless the company funds transfer qualifies for the motive defence).

The secondhand company may later make a relevant transfer.²⁴ If T

22 The sale in fact involves two transfers of assets: payment of the purchase price to the vendor and transfer of the shares to T.

23 As to whether T is the transferor, see 28.3 (Who is the transferor?).

24 For instance, a transfer to a non-resident subsidiary. A straightforward sale of assets by the company may not be a relevant transfer because no income becomes payable. See 27.7.1 (Purchase of asset from person abroad).

procures that transfer, T is its transferor.

27.8.2 *Purchase of secondhand company by holding company*

Now Suppose:

- (1) T transfers assets to H Ltd, an offshore company (“**the H transfer**”).
- (2) H uses its funds to purchase a secondhand company (“**the purchase price transfer**”).

Thus the position is:

A similar analysis applies:

- (1) The H transfer is in principle a relevant transfer. However, no income arises to a person abroad as a result of that transfer.²⁵
- (2) The purchase price transfer is not a relevant transfer. No income accrues to a person abroad as a result of that transfer. Income does arise to the secondhand company, but not as a result of the H transfer or the purchase price transfer.

Suppose H Ltd then provides additional funds for the secondhand company, directly or indirectly. It appears then that the secondhand company will receive income as a result of the H transfer²⁶ and T will be subject to tax under s.720 on the income accruing to the secondhand company from the additional funds, if that income can be identified.

27.9 Associated operation: definition

Section 719(1) ITA provides just about the widest definition the drafter could devise:

In this Chapter “associated operation”, in relation to a transfer of assets, means an operation of any kind effected by any person in relation to—

²⁵ Assume no income accrues to H (the secondhand company does not pay a dividend).

²⁶ Together with an associated operation (the provision of funds by H).

- (a) any of the assets transferred,
- (b) any assets directly or indirectly representing²⁷ any of the assets transferred,
- (c) the income arising from any assets within para (a) or (b), or
- (d) any assets directly or indirectly representing the accumulations of income arising from any assets within para (a) or (b).

An associated operation does not exist in isolation, it exists in relation to a transfer. There are two requirements:

- (1) It must be an “operation”.
- (2) It must be “effected in relation to” items (a) to (d); I describe this as being “associated” with a transfer.

The term “associated operations” is also used in the IHTA. However, the definition is different so only limited assistance can be drawn from IHT cases.

27.9.1 “Operation”

“Operation” is (rightly) not defined but is clearly a word of wide import. It includes a company becoming non-resident.²⁸ It does not include death, but that does not matter because it does include the act of making a will.²⁹

In *Herdman v IRC* 45 TC 394 there was a sale (ie transfer) of assets to an Irish company. The company then “accumulated” income and “managed” its assets so as to be able to repay a loan to the transferor. These were held to be “operations” by most of the judges but this is obiter

27 “Representing” is defined in s.717(b) ITA:

“references to assets representing any assets, income or accumulations of income include references to—

- (i) shares in or obligations of any company to which the assets, income or accumulations are or have been transferred, or
- (ii) obligations of any other person to whom the assets, income or accumulations are or have been transferred.”

Thus if (1) T transfers assets to a company and (2) T transfers the shares in the company to another person, the second transfer is an associated operation in relation to the first. This would not have been clear without the definition.

28 *Congreve v IRC* 30 TC 163.

29 *Bambridge v IRC* 36 TC 313. This case contains Harman’s aphorism: “Death, as we know, is an awfully big adventure, but even the Crown admits that it is not an associated operation.” More technically, this is because death is not “effected by a person in relation to assets”.

and difficult to accept. Unlike IHT, “operation” does not include an omission. A company does not “accumulate” income (in the legal sense). If “management” is an operation then everything is an operation (all assets must be “managed”) and the expression makes no sense. Lords Pearce and Reid (more judiciously) left open the question of whether these were “operations”.

27.9.2 “Associated”

In *Fynn v IRC* 37 TC 627:

- (1) in 1948 T transferred assets to an Irish company (“the original transfer”);
- (2) in 1952 T lent money to the company (“the 1952 loan”).

The 1952 loan was not an associated operation in relation to the original transfer, because it was not effected “in relation to” the assets transferred by the original transfer.

In *Carvill v IRC*:³⁰

- (1) T transferred assets to a Bermudian company (B Ltd) in exchange for shares, and so became a majority shareholder in B Ltd (“the original transfer”).
- (2) T became a 100% shareholder in B Ltd by (a) purchasing shares and (b) B Ltd purchasing its own shares.
- (3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were not operations associated with the original transfer: they were not effected in relation to the assets transferred by the original transfer.

27.9.3 *Associated operation preceding the transfer*

Section 719(2) ITA provides:

It does not matter whether the operation is effected before, after, or at the same time as the transfer.

This provision (introduced in 2006) gives statutory effect to the view

³⁰ [2000] STC (SCD) 143 at [80]-[85], 75 TC 477 (Special Commissioners).

formerly expressed in RI 201.³¹ I cannot think of a practical case where it would matter and would be grateful to any reader who could explain why HMRC thought this point was worth legislating for.

27.9.4 *Is mere historical association enough?*

On a simply reading of the definition, an operation can be “associated” with an earlier transfer even if the two were not part of any plan and many years apart. Suppose:

- (1) A transfers an asset to B (who is UK resident) in 1970; and
- (2) B transfers the asset in the year 2010 to an offshore trust under which A may benefit.

On a simple reading, B’s disposition is an associated operation in relation to A’s transfer even though:

- (1) they are not part of a single arrangement;
- (2) A is unaware of B’s disposition;
- (3) B’s disposition is itself a relevant transfer;
- (4) one or both transfers is a sale on arm’s length terms.

The same would apply if A’s transfer was made in 1870 or 1670. Indeed, anyone who purchases or disposes of an estate in English land is only effecting the most recent “operation” of a series of associated operations (dispositions of the land) which may perhaps be traced back to the Norman Conquest if not before, and only a lack of records prevents one tracing the sequence of associated operations to the dawn of civilisation. In fact this simple reading cannot be right, for reasons given below.

27.10 **Significance of associated operations**

It is never enough to establish that there is an associated operation in relation to a transfer. This is just the first step. One must then go on to ask what (if anything) follows. The term “associated operations” is used in the definition of “relevant transfer”³² and it is used in the definition of

31 “... an associated operation does not necessarily have to take place after a transfer of assets. A transaction undertaken ‘in relation to’ a transfer of assets can precede the transfer.”

That seemed right. The FA 2006 gave no thought to transitional provisions but in the circumstances it does not matter.

32 See 27.2 (“Relevant transfer”).

“relevant transaction”; s.715(1) ITA provides:

A transaction is a relevant transaction for the purposes of this Chapter if it is—

- (a) a relevant transfer, or
- (b) an associated operation.

The existence of associated operations is therefore relevant to the following:

- (1) *Section 716 ITA*: Income becomes payable to person abroad as a result of transfer and/or associated operations.³³
- (2) *Section 721 ITA*: Individual has “power to enjoy” as a result of transfer and/or associated operations.
- (3) *Section 729 ITA*: Individual receives capital sum connected with any relevant transaction.
- (4) *Section 732 ITA*: Individual receives a benefit as a result of the transfer or associated operations.³⁴
- (5) *Section 733 ITA*: “Relevant income” is income which can as a result of the transfer or associated operations be used for providing a benefit.³⁵
- (6) *Motive defence*: All relevant transactions must satisfy the conditions of the motive defence.³⁶

27.11 Person abroad receives income as indirect consequence of transfer

27.11.1 Transfer from A to B followed by transfer from B to person abroad

Suppose:

- (1) In 1970 A transfers an asset to B (who is a UK resident individual) (“A’s transfer”).
- (2) In 2000 B transfers the asset to an offshore trust (“B’s trust”) under which A may benefit (“B’s transfer”).
- (3) A’s transfer and B’s transfer are not part of a single arrangement and

³³ See 27.11 (Person abroad receives income as indirect consequence of transfer).

³⁴ See 29.7 (Benefit causation condition).

³⁵ See 29.30 (Is income of company relevant income?).

³⁶ See 31.39 (Associated operations and motive defence before 5 December 2005) and 31.40 (Transfer and associated operations both after 4 December 2005).

A is unaware of B's transfer.

B's transfer is obviously a relevant transfer. The question is whether A's transfer is a relevant transfer.

It may be helpful to recap the definition. Section 716(1) ITA provides:

A transfer is a relevant transfer for the purposes of this Chapter if—

- (a) it is a transfer of assets, and
 - (b) as a result of—
 - (i) the transfer,
 - (ii) one or more associated operations, or
 - (iii) the transfer and one or more associated operations,
- income becomes payable to a person abroad.

I refer to (i) to (iii) as “causation conditions (i) to (iii)”.

A's transfer meets condition (a): it is a transfer of assets. Income becomes payable to a person abroad. Causation condition (i) is not satisfied, that is, it is not as a result of A's transfer alone that income has become payable to the offshore trustees. However, B's transfer is at first sight an “associated operation” in relation to A's transfer. It seems at first sight that causation condition (ii) is satisfied: income becomes payable to the trustees as a result of the associated operation (B's transfer); so A's transfer is a “relevant transfer” and A is taxable under s.720 on the income of B's trust! This clearly cannot be right; but why not? The motive defence is not a satisfactory solution to this problem:³⁷ one must conclude that A's transfer is not a relevant transfer, that is, it does not satisfy causation condition (ii) or (iii). How do we reach this result?

27.11.2 *Position before 2007/08*

Before 2007/08 the TAA provisions applied a more limited causation test. They only applied to:

transfer of assets *by virtue or in consequence* of which, either alone or in conjunction with associated operations, income becomes payable to persons resident or domiciled outside the UK.

37 The motive defence could not help if either A's transfer or B's transfer was made for tax avoidance reasons; or even if B's transfer was innocent but A was unable to prove this: see 31.39 (Associated operations and motive defence before 5 December 2005).

This applied causation condition (i) and (iii) but not causation condition (ii).

In the 5th edition of this book I said:³⁸

... the key to making sense of “associated operations” everywhere in the transfer of asset provisions rests on the concept of causation. In the example above, although income accrues to the offshore trustees, it does not do so “in consequence” of A’s transfer *in conjunction* with B’s transfer. The only cause is B’s transfer.

But for A’s transfer, B’s transfer would not have happened, and so income would not become payable to the person abroad. However, causation in law (and indeed in ordinary English usage) does not apply a simple “but for” test. B’s transfer as an independent act will “break the chain of causation”. That is, the reference to words of causation requires one to identify the real or effective or operative cause of the fact that income accrues to a person abroad (which in this case is B’s transfer). There must be “sufficient causal connection.”

So I concluded:

Although the statutory words are different, it is suggested that the appropriate test is the “clean break” test, i.e. is A a settlor of B’s trust, did A provide the property indirectly?

27.11.3 *Position from 2007/08*

Unfortunately the key which allowed the reader to make sense of the provisions was discarded in the tax law rewrite.³⁹ I infer that HMRC found causation an inconvenience, so they quietly⁴⁰ but substantially relaxed it, by adding causation condition (ii). But no consideration was given to the consequences. The removal of foundations, however inconvenient, has an effect on the structure as a whole. The result is a gap which the courts will have to fill up as best they can. It continues to be the

38 5th edition, para 14.11. Footnotes omitted.

39 The rewrite team might say that s.742(1A) ICTA (introduced in 2006) made this change. That was arguably not the correct view of that provision, but it does not now matter.

40 The EN did not mention this important change.

case, in the example above, that A *cannot* be the transferor and within s.720. But on what grounds can one reach that result? Something must be read into the statutory wording.

One solution is to say that there can only be one transferor; since B is clearly a transferor, A is not to be regarded as transferor. This has some support in *Vestey* 54 TC 503.

The best solution, now the key to understanding associated operation rules throughout the TAA provisions, is to say that operations cannot be “associated” unless they are “put in train” by one person. Mere historic association is not enough to constitute “associated operations” for the purposes of the Act. There must be something more.⁴¹ In an ideal world, Parliament should have identified that “something more” and not leave the job of constructing workable legislation to the courts. But there it is. It is suggested that the test for associated operations is the “clean break” test, ie is A a settlor of B’s trust, did A provide the property indirectly?⁴² If not, the operations are not associated.

This view is supported in *Corbett*:

The interval during which the beneficiaries were thinking out their "associated operations" could not make any difference to the legal conclusion, *unless the Special Commissioners had found as a fact that it negated the "conjunction" or association between the two operations* - the transfer to and the transfer by Woodgate.⁴³

27.11.4 *Transfer to UK trust followed by migration of trust before 6 April 2006*

Suppose:

- (1) In 1970, A transfers assets to a discretionary trust with UK trustees (“A’s transfer”);
- (2) In 2000, the UK trustees appoint foreign trustees in their place and transfer the trust assets to them (“the appointment of foreign trustees”).

41 Contrast the approach to “disposition by associated operations” in *IRC v Brandenburg* [1982] STC 555, where Special Commissioners added a gloss that a disposition made by associated operations (for IHT purposes) must be “put in train” by one person: see Venables, “Gifts by Associated Operations” 5 PTPR 11.

42 See 75.4 (Gift from A to B followed by gift to trust by B).

43 25 TC 305 at p.394.

The appointment of foreign trustees is a relevant transfer. (The appointment of foreign trustees involves a transfer of assets, as a result of which income accrues to the non-resident trustees.) The question is whether A's transfer does likewise. That is, is it a relevant transfer?

A's transfer alone does not satisfy causation condition (i). Income becomes payable to a person abroad. But causation condition (i) is not satisfied because it is not as a result of A's transfer alone that income has become payable to the offshore trustees. However, the appointment of foreign trustees is an "associated operation" in relation to A's transfer. Before the ITA 2007, the question was whether A's transfer in conjunction with the associated operation together satisfied the causation condition. It is considered that it was as a result of the transfer in conjunction with the associated operation that the income accrued to the foreign trustees. This was so even if the appointment was not envisaged at the time of the transfer to the original settlement. With the current wording, the literal reading is that A's transfer is a "relevant transfer". This is simply because the appointment of foreign trustees is an associated operation, and income becomes payable to a person abroad as a result of that operation; causation condition (ii) is satisfied. Although some gloss is required to make the section work, in other cases, as discussed above, that gloss is not likely to alter the result in this case.⁴⁴

27.11.5 *Transfer to trust followed by transfer from trust to offshore company*

This is in principle the same as 27.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006). This applies whether the transfer by the trustees is gratuitous or in exchange for shares, debentures or an offshore life policy. But if the investment is for wholly commercial

44 The position in 27.11.1 (Transfer from A to B followed by transfer from B to person abroad) is different. There B's transfer is independent in a way that trustees are not, because trustees are constrained by the fiduciary nature of their powers. This view is also supported by obiter dicta in *Congreve v IRC* 30 TC. This concerned a gift to a UK company which became non-resident. This was a relevant transfer without the association operations rule. See 27.5 (Income "becomes payable" to person abroad). But the House of Lords also held (at p.206) that the company becoming non-resident was an associated operation; and (by inference) income arose to the company abroad as a result of the transfer and associated operation. HMRC would have further arguments, if necessary, based on *Muir v Muir* [1943] AC 468.

reasons, it may be argued that is not the case and so the income of the underlying company is not within the TAA provisions, but this requires the Courts to read words into the statute, and the case for doing so here is not strong enough.

27.11.6 *Transfer to company followed by migration of company*

This is a relevant transfer even without the associated operations rules.⁴⁵

27.11.7 *Transfer to UK trust followed by migration of trust from 6 April 2006*

Suppose the facts of 27.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006), but assume the migration occurred after 6 April 2006. The trust is deemed to be a single person. The analysis is therefore different. The appointment of foreign trustees does not involve any transfer. Instead the analysis is the same as 27.11.6 (Transfer to company followed by migration of company). The end result is the same, though the route to that destination is different.

27.12 **Income of person abroad**

The concept of “income of the person abroad” is relevant for several purposes of the transfer of asset provisions:

- (1) There is a relevant transfer only if “income becomes payable” to a person abroad. If *no* such income becomes payable then there is no relevant transfer and the TAA provisions cannot come into effect.
- (2) The *identity* of the income payable to the person abroad as a result of the transfer is relevant:
 - (a) for s.720 ITA, as one must ask whether the transferor has power to enjoy that income;
 - (b) for s.731 ITA, as one must ask whether that income can be used to benefit an individual.
- (3) The *amount* of income payable to the person abroad as a result of the transfer is relevant as ascertaining that amount is the first step in computing the amount on which tax is charged under s.720 or relevant income for s.731.

⁴⁵ See above footnote.

27.13 Capital receipts deemed to be income

The transfer of asset rules refer to “income”. This means “income for income tax purposes” which is a different concept from “income for trust law purposes” or “income for accountancy law purposes”.⁴⁶

Section 383 ITTOIA provides:

- (1) Income tax is charged on dividends and other distributions of a UK resident company.
- (2) For income tax purposes such dividends and other distributions are to be treated as income.
- (3) For the purposes of subsection (2), it does not matter that those dividends and other distributions are capital apart from that subsection.

This applies for the purposes of the TAA provisions and s.624 ITTOIA, so the distribution on a purchase of own shares, for instance, is income for those purposes⁴⁷ even though it is a capital receipt for trust law purposes. Likewise income deemed to accrue on a stock dividend under s.410 ITTOIA and a gain deemed to be income under s.688 ITA (transactions in land). On gains from offshore funds: see 34.10 (OIG arising to non-resident trust). On gains from life policies see 32.6 (Non-resident trusts) and 32.6.2 (Non-resident company or institution).

27.14 The amount of income of person abroad

This section considers the amount of the income arising to the person abroad as a result of the transfer and associated operations.

27.14.1 Dividend income of person abroad: net or grossed up?

In order to follow the discussion one needs to bear in mind the usual rules for taxing a UK dividend.⁴⁸ In short, a UK resident or EEA national receives a tax credit and the dividend is grossed up. For instance:

46 See 18.2 (Why does “capital v. income” matter?)

47 This is assumed to be the case in the drafting of s.482 ITA.

48 See 21.2 (Income from UK resident company). References in this section to dividends also include other company distributions.

Dividend £1,000 (“**net amount**”)

Tax credit (one ninth) £111.11

Dividend plus tax credit £1,111.11 (“**gross amount**”)

A person abroad who is not resident in the EU is not normally entitled to a tax credit and the income is not grossed up.

In *Carvill v IRC* the person abroad received dividends and was not entitled to a tax credit. The transferor argued that the measure of income for s.720 ITA was the net amount. The argument was rejected:

100. [HMRC] contended that the income which the section [s.720] deems to be income of the taxpayer is the dividends [received by the person abroad]. ...

It follows [from what is now s.746 ITA] that the position is the same as if the taxpayer had actually received those dividends. They would be grossed-up by the amount of the tax credit and he would be entitled to the benefit of the tax credit. The position is just as if International Holdings [the person abroad] had never existed.

101. [The taxpayer] contended that the income which was deemed to be the taxpayer’s was the net income of the company from all sources after deduction of any reliefs which would have been available to an individual in a comparable position. The income lost its original characteristics and became charged under Case VI of Sch D. ...The effect of this approach is that because [the person abroad who received the dividend] is not entitled to the tax credit, the income is not grossed up but is not charged to income tax at the lower rate [now the dividend ordinary rate].

102. It is not necessary for me to decide this point but I find [HMRC’s] approach more attractive particularly as it precisely gives effect to counteracting the advantage of the transfer.⁴⁹

For s.731 purposes:

- (1) If the person abroad was not entitled to a tax credit, the amount of a dividend would be the net amount.
- (2) If the person abroad was entitled to a tax credit the amount of a dividend would be the gross amount. However, the relevant income is only the amount which can be applied for the benefit of any person so the amount of relevant income is the net amount.

⁴⁹ *Carvill v IRC* [2000] STC (SCD) 143, 75 TC 477.

27.14.2 Deduction of administration costs against investment income

In *Chetwode v IRC* 51 TC 647 an offshore company received dividends and interest of about £3,000 per annum. The transferor was taxed on the gross amount of that income, without deduction for (i) investment advisory fees, (ii) management fees, (iii) safekeeping charges, (iv) security handling fees and bank charges, (v) registered office and executive office fees, totalling about £1,000 per annum. The approach of *Chetwode* was that s.720 should be construed so as to put the transferor in the same position as if he had retained the assets himself. Had he done so he could not have deducted these investment costs for the purposes of calculating his income. So there was no deduction for s.720 purposes. This is consistent with s.624.⁵⁰

HMRC allowed deductions in respect of estimates of such costs of collecting the investment income as would have been incurred had the investment income been instead received by the transferor in person. This was calculated (how?) at about £20 per year. There is no statement on whether this concessionary practice still obtains but it is (perhaps) worth claiming it to see.

For s.731 purposes expenses will be deducted in computing relevant income.

27.14.3 Trading income and trading losses of person abroad

It was accepted in *Chetwode* that trading income of the person abroad is calculated by setting trading receipts against trading expenses.⁵¹ The case does not discuss whether trading income is calculated:

- (1) by accountancy principles, under which statutory non-deduction provisions such as s.34 or s.45 ITTOIA would not apply, and depreciation would in principle be allowed; or
- (2) by tax principles applicable to calculating trading profits.

The approach of *Chetwode* suggests that the second is the correct view.

Profits are computed on a current year basis.⁵²

For losses, RI 201 provides:

⁵⁰ See 26.2.6 (Trustee expenses).

⁵¹ See at p.687 “In the case of a trade, it is necessary to strike a balance, in respect of a period, before any taxable “income” arises.”

⁵² *Vestey v IRC* 54 TC at p.528.

The Revenue's practice is only to allow trading losses to be carried forward and set against future trading profits. They cannot be offset against investment income of the same, previous or future years.⁵³

For s.731, losses will be deducted in computing relevant income if paid out of relevant income. There is no group relief.

27.14.4 *Property income of person abroad*

The rules for measuring property income are the same as for the settlement provisions; see 26.2.4 (Property Business Income). Transfer pricing may also need consideration here.

27.14.5 *Loan relationship and Forex income*

Since income is computed on IT principles, "income" does not include profits computed under loan relationship or Forex rules which apply for the purposes of corporation tax and not for IT purposes. This is so even if the person abroad is a company.

⁵³ This is consistent with the position for property income losses. See 26.2.5 (Property business losses).

CHAPTER TWENTY EIGHT

TRANSFER OF ASSETS ABROAD: TRANSFERORS

28.1 TAA charges on transferor

This chapter considers the TAA charges on the transferor. There are strictly two charges: s.720 and s.727 ITA, but s.720 is by far the most important.

Section 720 ITA imposes the charge to tax:

- (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are ordinarily UK resident by means of relevant transfers.
- (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).
- (3) Tax is charged under this section on the amount of income treated as arising in the tax year.

I refer to income which is treated as arising to the individual under s.721 as “**s.720 income**”. (It might be called “s.721 income” but the charge is under s.720.)

28.1.1 *Cross references*

For the rates of tax, see 43.6 (Rates of tax on transferor within s.720 ITA).

For a comparison with s.624 ITTOIA see 26.12 (Section 624 v s.720: comparison and priority).

For EU law aspects, see 51.2 (EC infringement proceedings) and 51.9 (transfer of assets abroad).

28.2 Who is liable?

Section 720(5) ITA provides:

The person liable for any tax charged under this section is the individual to whom the income is treated as arising.

ITA EN provides:

2141. Subsection (5) provides that the individual to whom income is treated as arising is the person liable. This person is defined in section 721.

So we turn to s.721 ITA but we find a referential definition:

(1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A and B are met.

The charge is imposed on “such an individual as is mentioned in s.720(1)”. There are different views possible of how much of s.720(1) is incorporated by the requirement that the individual to be taxed must be “such an individual as is mentioned in s.720(1)”. The wise words of Garner are worth quoting here:

Such is a deictic (pointing) term that must refer to a clear antecedent.¹

The failure to observe this point – obvious though it may seem – has given rise to a good deal of case law. The intention of the ITA rewrite was to preserve the case law and (so far as the law was unclear) to preserve the

1 Garner’s *Dictionary of Legal Usage* (3rd ed., 2011), entry under “Such”. Harold Pinter exploits the ambiguity in *No Man’s Land* (2001):

“... there are some people who appear to be strong, whose idea of what strength consists of is persuasive, but who inhabit the idea and not the fact. What they possess is not strength but expertise. They have nurtured and maintain what is in fact a calculated posture. Half the time it works. It takes a man of intelligence and perception to stick a needle through that posture and discern the essential flabbiness of the stance. I am *such a man*.”

ambiguities. ITA EN provides:

2144. Sections 739(2) and (3) of ICTA indicate the person liable by using the expression “such an individual” – but do not make it clear how much of section 739(1) is implied by that expression. [Sections 721] and 728 ITA, which are based on section 739(2) and (3) ICTA, reproduce the expression “such an individual”, which has been the subject of case law: see, in particular, *Vestey v IRC* 54 TC 503.

What, then, are the requirements to be “such an individual” as is mentioned in s.720(1)? There are two:

- (1) The individual must be ordinarily resident in the UK; that seems clear.
- (2) The individual must be “the transferor”; that was decided in *Vestey*.

28.3 Who is the transferor?

The next question is to identify the transferor (if there is one). Clearly, anyone who actually makes a transfer is a transferor, but the expression is a little wider than that.

28.3.1 *Transfer made by individuals jointly*

If A and B together own an asset, as tenants in common or as joint tenants, and together transfer their interest to a person abroad, each is transferor of their share. RI 201 states:

Where the same assets are transferred by several individuals, the Revenue’s practice is to assess the transferors in proportion to their share of the assets transferred. Thus, where, for example, shares of a UK company are held by three shareholders in the proportion 40%, 40% and 20% and there is [s.720 ITA] liability in respect of the income of an overseas person to which the shares are transferred, the liability is assessed on each of the three shareholders in proportion to their respective holdings.

That seems obvious.

28.3.2 *Transfer procured by individual*

In *Congreve v IRC* the Court of Appeal said in an obiter comment:

But even if we were prepared to accede to the argument that the preamble [now s.720(1) ITA] connoted activity by the individual concerned, we think this condition would be fulfilled if the execution of the transfer were procured by the individual concerned, even though it was not actually executed by him or his agent.²

In *Vestey v IRC*, the question of who is a transferor did not arise, because the taxpayers (beneficiaries of a discretionary trust) were clearly not transferors. The House of Lords discussed the question in passing, and the answer was expressed in a variety of different ways. Lord Wilberforce said s.720 applies:

only where the person sought to be charged made or, maybe, was associated with, the transfer.³

These doubts were resolved in *IRC v Pratt* which decided that an individual who did not make the transfer may be within s.720 if and only if they “procured” the transfer.⁴ The term used in *Pratt* is “quasi transferor” but I suggest it is better to use the term “transferor” and to define that term to mean anyone to whom s.720 applies, that is, both those who make a transfer and those who procure it.

The classic example of procuring a transfer is if T owns all the shares in a company and uses power of control to procure the company to make a transfer to a person abroad.

Something of the sort might even be possible in the case of quasi transferors, where two or three of them own the company which makes the transfer, but where it is not possible to do just that, s [720] does not bite at all. ... Where an identifiable portion of the asset transferred can be attributed to a particular transferor then, of course – at any rate in any normal case – that part actually transferred will produce a similar part of the income, and in no case is there any difficulty in applying the section, since one will apply it separately to each of the individual transfers, or each identifiable portion.⁵

2 30 TC 163 at p.197.

3 54 TC 503 at p.587A. Lord Salmon agreed. Lord Keith said he agreed with Lord Wilberforce but in his concurring speech he actually put the matter differently.

4 57 TC 1 at p.51 B –D and p.55 E–F.

5 *IRC v Pratt* 57 TC 1 at p.50.

This is tentatively expressed, and might perhaps be challenged.

The position would in any event be different if shareholders had different classes of shares with different interests. In that case it may not be possible to separate out their interests in which case the shareholders would not be transferors.

The facts of *Pratt* were that the taxpayers alleged to be transferors (i) were three directors out of eight; and (ii) held 30% of the company. They had influence but no control at director or shareholder level. They could not “procure” the transfer of assets made by the company, and so they were not “quasi transferors” in relation to that transfer. So they were outside the scope of s.720.

In *Carvill v IRC*, T transferred the majority shareholding to a person abroad, and the minority shareholders transferred their shares. HMRC argued (implausibly) that T was the “transferor” of the minority shareholding. But this was (rightly) rejected:

For an individual to be the transferor in relation to a transfer by another individual would be a considerable extension of this principle. However, there might be cases where, as a matter of fact, one individual’s influence over another was so strong that he was the transferor of the other’s share but this would clearly be an exceptional case. ...

72. [Counsel] contends that the taxpayer was the transferor of the old minority shares. In order to find that this was an exceptional case where the taxpayer did in effect force his will on the other shareholders so as to become the transferor of their shares, one would need strong evidence that this was so. Of course, the taxpayer as majority shareholder and one of the founders of a company bearing his name was in a position of some influence. However, the influence did not go as far as telling other shareholders what to do with their shares. Here the decision by the old minority to transfer their shares was one which they came to after discussion, having started with different points of view as to the merits of the transfer. There is no evidence that the taxpayer leaned on any of them heavily, for example, by threatening to sack them if they did not. ... Accordingly, there is no evidence that the taxpayer did anything in relation to the old minority shares which would make him the transferor of them, and I find that he was not the transferor of the old minority

shares.⁶

What about a gratuitous transfer from A to B and from B to the person abroad? The question whether A has procured B's transfer does not arise, for A is a transferor by virtue of the transfer to B. The true question is whether B's transfer is caught under the associated operations rules.

What if A (perhaps a principal beneficiary but not settlor) encourages trustees to make a transfer? It is considered that A (not being in control of the trust) cannot be said to procure the transfer made by the trustees. Likewise a trustee or other person exercising fiduciary powers is not a transferor, eg a person with power of appointing new trustees does not become a transferor if they exercise the power because the power is fiduciary. So the concept of "procuring" a transfer in practice applies to individuals controlling companies; other cases, while theoretically possible, will be rare.

Contrast the position where:

- (1) T transfers assets to A, in consideration for which A transfers assets to a person abroad.
- (2) T transfers assets to a company, in consideration for which the company issues shares to a person abroad.
- (3) T (an employee entitled to a bonus) waives the right to the bonus, in consideration for which the employer transfers assets to a pension scheme abroad.

In the first two cases, T is not just a quasi transferor, T is an *actual* transferor for T has made a transfer of assets. In the third case, T has procured the transfer so is within the scope of s.720.

A person who is not a transferor (such as the successful appellants in *Pratt*) might instead fall within s.731 if they received benefits.

28.3.3 *HMRC practice*

RI 201 provides:

- [1] Section [720 and 727 ITA] can potentially apply not only to an individual who transfers assets but to someone who is "associated with" a transaction (according to the decision of the Courts in

⁶ *Carvill v IRC* [2000] STC (SCD) 1543 at [71]-[72], 75 TC 477 (Special Commissioners).

Vestey v IRC).

- [2] The Revenue regard this as including anyone who procured the transfer of assets.

There is not much to say in favour of proposition [1]. It can hardly be said to be “according to the decision of the Courts in *Vestey v IRC*” as it relies on one of the views expressed in *Vestey*⁷ where it was qualified by the word “maybe”. In fact, if “associated” here has its normal, rather wide sense, point [1] is clearly wrong in the light of *Pratt* and *Carvill*. It is considered that a person is a transferor only if they have made or procured the transfer, and being associated with a transfer (without procuring it) does not make a person a transferor. In a loose sense of “associated” point [1] cannot possibly be correct, for many individuals may be “associated” with a transfer who cannot possibly all be transferors.

It appears that HMRC would now agree, for HMRC Brief 18/11 provides:

5.1.1 ... For the income charge provisions [s.720] to apply the individual on whom the charge arises must be the person who transfers the assets or procures the transfer.

In practice HMRC have not generally taken TAA points when UK companies make transfers abroad, even if there is a 100% shareholder who could be regarded as procuring the transfer. There is no significant reference to the TAA provisions in *Bramwell on Corporation Tax* and none in the Company Taxation Manual. In the case of a transfer to a non-resident company in the same group as the transferor, the CFC legislation is designed to address the avoidance possibilities. It is not the case that the TAA rules could not apply; just in practice no-one takes any notice of them.⁸ But if a UK company makes a transfer to an entity outside the group, the CFC rules will not apply, and HMRC may fall back on TAA. An example where HMRC say they might raise the point relates to employee benefit trusts. HMRC Brief 18/11 provides:

⁷ The comment of Lord Wilberforce is set out at 28.3.2 (Transfer procured by individual).

⁸ It is noteworthy that the CFC legislation followed shortly after *Pratt*. Though s.725 ITA (reduction in amount charged when CFC involved) acknowledges possible overlap between the CFC rules and s.720.

5.1.1 ... [1] If the offshore Employee Benefit Trust is a normal commercial arrangement by a company to reward its employees, the transferor is the employer company;
[2] and in such circumstances the income charge [s.720] is unlikely to be applicable as the transferor and beneficiaries are different people.
[3] However, it may be that the employee has transferred a right to receive a bonus into the offshore Employee Benefit Trust and is therefore the transferor. If this is the case the ToA legislation may apply and the employee will be liable to tax on any income arising in the trust.
[4] If the employer company is controlled by its shareholder/directors and the offshore Employee Benefit Trust was formed solely for their benefit, the director/shareholders may have procured the transfer into the offshore Employee Benefit Trust and could be considered transferors for the purposes of the income charge. Whether or not the ToA income charge is then applied will depend on the facts of each case.

There is a good deal of confusion here:

- [1] The fact that the trust is a normal commercial arrangement may be a reason for allowing the motive defence, but does not affect the identity of the transferor. It appears that HMRC are not interested in applying s.720 to “normal commercial arrangements” so they do not care who is the transferor (even in the case of non-resident EBTs).
- [2] It is correct that the s.720 charge is unlikely to be applicable. The reason is not exactly that “the transferor and beneficiaries are different people” but that the transferor is a company (not within s.720) and the beneficiaries are non-transferors. Probably that is what the author meant to say.
- [3] This is approximately correct; though s.624 may also be in point, and the individual’s liability is not on “any income arising in the trust” but income arising from the transferred asset.
- [4] This is correct as far as it goes but it is rightly tentative (“may have procured...”) and does not explain very much.

28.4 Must the transferor avoid or intend to avoid IT?

28.4.1 The statutory provisions

Section 720 ITA provides:

- (1) The charge under this section applies for the purpose of preventing

the avoiding of liability to income tax by individuals who are ordinarily UK resident by means of relevant transfers.

(2) Income tax is charged on income treated as arising to *such an individual* under section 721. ...

The Special Commissioners say:

185. It is clear that the meaning of the phrase “such an individual” must be found in the preamble [now s.720(1)] and that it is not confined to an individual “ordinarily resident in the United Kingdom”. Once you go beyond that restricted meaning in order to ascertain what individuals are comprised in the phrase “such an individual” it seems to us difficult to find any logical stopping place short of importing the whole of [s.720(1)].

186. In our view it therefore follows that “such an individual” is an individual ordinarily resident in the United Kingdom who, *by means of a transfer* of assets in consequence of which income becomes payable to a non-resident, *avoids liability to income tax apart from the operation of these provisions*.⁹

This is, with respect, clearly right. The question which arises is whether a person who “by means of transfers of assets avoids liability to income tax” means:

- (1) a person who in fact avoids income tax (in the absence of the TAA provisions); or
- (2) a person who in fact avoids and intends to avoid IT; or
- (3) a person who intends to avoid IT (whether or not they in fact do so).

I am inclined to think that solution (1) is the most natural reading, as the word “avoids” suggests avoidance in fact. However the words “by means of” might be thought of as involving some element of intention, so there is also much to be said for solution (2), ie s.720 only applies to a person who in fact avoids and intends to avoid income tax, (though this does overlap with the motive defence).

In Vestey, Lord Keith said the section only applied to an individual:

who has sought to avoid liability to income tax by means of such transfers of assets as are mentioned in [s.720(1)].¹⁰

⁹ *IRC v Botnar* 72 TC 205.

¹⁰ p.602G.

Lord Dilhorne said the section applied to an individual:

who has sought to avoid income tax¹¹

though in the same paragraph he also approved the Court of Appeal's comment in *Congreve* (which one might have thought a somewhat different approach).

Likewise Lord Edmund-Davis:

individuals whose purpose is the avoidance of liability to tax ...¹²

28.4.2 *Position before 1996*

In order to understand the present law, it is necessary first to consider the position before the law was changed in 1996. Case law and statutory reform have complicated what ought to be a simple question with a simple answer.

The starting point is the decision of the House of Lords in *McGuckian v IRC*.¹³ This was (in short) a case where a transaction was made which was intended to avoid income tax but did not actually do so (because another anti-avoidance provision was overlooked).¹⁴ The Revenue raised an assessment under s.720. The taxpayer argued that s.720 did not apply since income tax was not actually avoided. The argument failed. Lord Steyn said:

¹¹ p.591E.

¹² p.601B.

¹³ 69 TC 1.

¹⁴ The actual facts were not so simple. An interest in possession trust owned a company, and a dividend would have been taxable income of the life tenant. Instead the trustees sold the right to the dividend for a lump sum. This sum was trust capital as a matter of trust law (though it was regarded as income for tax purposes under the *Ramsay* principle). This sale was intended to avoid income tax on the dividend. It was assumed that the transaction did not actually avoid IT, since the sale of a dividend was caught by anti avoidance provisions (s.730 ICTA 1988) now repealed. Is this right? One might have argued that income tax *was* in fact avoided since even though it was assessable under s.730, no assessment was actually made, but the Revenue did not argue that point. The taxpayer was however assessed under (what is now) s.720 ITA rather than s.730. The simple answer to this should have been to raise the assessment under s.730, as the Court of Appeal decided, but HL did not pursue that approach.

I would reject the argument that it is a condition precedent to [s.720] applying that there must be proof of an actual avoidance of tax liability. Such a construction treats [s.720] as a power of last resort and it substantially emasculates the effectiveness of the power under [s.720]. Nothing in the language or purpose of [s.720] compels such a construction. Properly construed the opening words of [s.720] merely provide that *there must be an intention to avoid liability for tax*. The sensible construction is that [s.720] can be applied even if there are other provisions which could be invoked to prevent the avoidance of tax. That the revenue authorities should have overlapping taxation powers is an unremarkable consequence. And such a construction cannot cause any unfairness to the taxpayer since he cannot be taxed twice in respect of the same income.¹⁵

Lord Browne-Wilkinson said:

[Counsel for the taxpayer] submitted that since the dividend would in any event have been taxable under s 470, [s.720] does not apply. He based this submission on the words in [s.720(1)],

“For the purpose of preventing the avoiding by individuals ordinarily resident in the United Kingdom of liability to income tax ...”.

He submitted that [s.720] does not apply unless tax has *in fact* been avoided. In my judgment, there is no warrant for this submission. ... the words of subs (1) make it clear that the actual avoidance of tax is not a precondition to the application of the section. The income is deemed to be the income of the United Kingdom resident

“whether it would or would not have been chargeable to income tax apart from the provisions of this section”.

It is therefore clear [!] that [s.720] can still apply even though the effect of the transfer of assets abroad would not have been successful in avoiding United Kingdom income tax.¹⁶

It is an understatement to say that the reasoning is not compelling,¹⁷ but

¹⁵ 69 TC 1 at p.82E.

¹⁶ 69 TC 1 at p.76.

¹⁷ The reason given by Lord Steyn is not compelling since s.720 is not a “power”. The reason given by Lord Browne-Wilkinson is not compelling, since the words he cites (now s.721(5)(a) ITA) are needed for where a transfer reduces the rate of income tax (without avoiding it completely). It is significant that neither judge cites the reason given by the other.

the decision is still binding. The position before 1996 was settled. The majority of the House of Lords¹⁸ decided that it was not a requirement of s.720 that income tax had to be avoided, though Lord Steyn said that there did have to be an *intention* to avoid income tax.¹⁹

Thus the law until 1996 was that:

- (1) section 720 only applied to a person who intended to avoid income tax; but
- (2) actual avoidance of income tax was not necessary.

28.4.3 *Position from 1996*

Section 721(5) ITA provides:

It does not matter for the purposes of this section ...

- (c) whether the avoiding of liability to income tax is a purpose for which the transfer is effected.

This applies to income arising on or after 26 November 1996 regardless of the date of the transfer. This does not affect the operation of the motive defence but it reverses point (1): s.720 applies even if there is no purpose of avoiding income tax.

The provision does not expressly deal with point (2) - actual avoidance. It is suggested that the consequence of this amendment is that the question

Unfortunately, it was impossible to have any sympathy with the taxpayer or his advisors, whose actions (“disingenuous in the extreme”) were held to be the reason why no assessment was made under the correct section in the first place and whose appeal had “no ethical merit”. One suspects that this was a case where the decision was made first and the reasons were found later. The issue was first raised in the House of Lords (it is not mentioned in the lower judgments) and so the Lords did not have the benefit of the consideration of the lower courts on the issue.

18 Lord Lloyd agreed with the other judgments; the other two judges did not consider the point.

19 This area was considered in a thorough Special Commissioners decision just before *McGuckian: Botnar v IRC* [1998] STC 38 at pp.63–67. Here the *Revenue* submitted (and the SCs accepted) that s.720 only applies if there is avoidance of IT *in fact*. See para 180. But this has now been overtaken by *McGuckian*. The Special Commissioners also inclined to the view that s.720 only applied if the transferor intended to avoid Income Tax. Had *McGuckian* been decided first, they would no doubt have cited and followed the comment of Lord Steyn set out above. But this has now been overtaken by the statutory reform.

of whether there must *in fact* be an avoidance of income tax needs to be revisited. For Parliament retained the statutory words set out in 28.4.1 (The statutory provisions) which refer to avoiding income tax. The words should be taken to mean something. If they no longer refer (as Lord Steyn thought they did) to the intention to avoid income tax, they should be taken to require that income tax is *in fact* avoided.²⁰ Thus it is tentatively suggested that the effect of s.721(5) is to reverse the decision of *McGuckian* on this issue.

The position for income arising from 1996 is therefore that:

- (1) an intention to avoid income tax is not a requirement for s.720 to apply.
- (2) income tax must in fact be avoided for the section to apply.

This raises the question of what amounts to the avoidance of income tax in fact. If the taxpayer avoids an assessment (especially by dubious means) then it is suggested that income tax is avoided. Thus the assessment in *McGuckian* would still be upheld under s.720, though for slightly different reasons.

28.5 Transferor not ordinarily resident

Section 720 refers to an individual who is ordinarily resident in the UK, but it does not say exactly when the individual must be ordinarily resident for the section to apply.

20 This is consistent with the view that HMRC take of s.752(1) ITA (transactions in land) which provides: "This Chapter has effect for the purpose of preventing the avoidance of income tax by persons concerned with land or the development of land."

BIM provides:

60315. Conditions: Avoidance

Section 776 ICTA 1988 is anti-avoidance legislation (Section 776(1) ICTA 1988). The test for avoidance is an objective one, i.e. has tax been avoided, and not a subjective one relating to the intentions of the participants.

The avoidance need not, therefore, be deliberate, it can be accidental or unwitting ...

60320. Conditions: Avoidance: Straightforward transactions of purchase and sale

Section 776 ICTA 1988 cannot be used to catch straightforward transactions of purchase and sale of land that do not amount to a trade, or adventure in the nature of trade. ...

Section 776 ICTA 1988 is not applicable because the necessary avoidance of tax is not present.

28.5.1 *Transferor not ordinarily resident when income arises*

Section 720 does not apply to income which arises while the transferor is not ordinarily resident in the UK.²¹

A non-resident individual is subject to tax at their personal rates on their UK rental income. That individual can transfer UK land to an offshore company in order to avoid higher rate income tax.²² (It is not usually necessary for a non-resident individual to transfer other assets to a company in order to avoid higher rate tax as income of a non-resident from most other sources is not subject to tax at the higher rates.)²³

If the individual later becomes UK resident they do not retrospectively become liable under s.720 for income accruing while non-resident. This is consistent with the usual IT position.²⁴

A UK resident but not ordinarily resident individual is subject to tax at their personal rates on all UK source income. That individual can transfer land and other UK sources of income to a company to avoid higher rate income tax. They can also transfer foreign sources of income to a company in order to avoid tax on the remittance basis. A sale to an offshore company in return for debentures may be suitable. This was common planning for all UK residents before the introduction of the TAA provisions in 1936. But now it is only short term planning as one does not remain UK resident but not OR for long.

28.5.2 *Transferor not ordinarily resident when transfer made*

The intention of those responsible for the legislation was that s.720 should only apply if the transferor was ordinarily resident in the UK at the time of the transfer.²⁵ After some vacillation, this was upheld in *IRC v*

21 This is clear from the words of the section; if authority is needed, the point was assumed in *Herdman v IRC* 45 TC 394 at p.412: “Some time after making this transfer of shares the Respondent became ordinarily resident in Northern Ireland and ... [s.720] then applied”.

22 Of course, CGT, VAT, IHT and SDLT all need consideration.

23 See 39.1 (Non-residents income tax relief).

24 See 9.19 (RFI/gains arising when non-resident, remitted when resident).

25 “There has to be a transfer of assets abroad by an individual resident in this country.” (W.S. Morrison, then Financial Secretary) 313 HL Official Reports 5th series col 685, cited *IRC v Willoughby* 70 TC 57 at p.113.

Willoughby.²⁶ But that is only of historical interest, as the position now is governed by s.721(5) ITA:

It does not matter for the purposes of this section ...

- (b) whether the individual is ordinarily UK resident at the time when the relevant transfer is made ...

Thus non-residence at the time of the transfer is not a defence: s.720 may apply to any person after they become ordinarily resident, regardless of residence at the time of the transfer. This applies to income arising from 1996 regardless of the date of the transfer.²⁷

28.6 Section 721 Condition A (power to enjoy)

Section 721(1) ITA provides:

Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A and B are met.

I refer below to “**s.721 conditions A and B**”, to avoid confusion with the myriad other conditions in the ITA. Section 721(2) sets out condition A:

Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—

- (a) a relevant transfer,
- (b) one or more associated operations, or
- (c) a relevant transfer and one or more associated operations.

Once one has identified the transferor one asks whether they have “power to enjoy” income of the person abroad.

If the transferor has power to enjoy, but is then excluded and ceases to have power to enjoy, condition A continues to be satisfied for the rest of the tax year. This is an accidental change from the pre-ITA position.²⁸

²⁶ 70 TC 57 reversing *Herdman v IRC* 45 TC 394.

²⁷ Also see 29.9.1 (Transferor not ordinarily resident when transfer made; pre-1996 income).

²⁸ Contrast 26.3.6 (Settlement ceasing to be settlor-interested); 42.6 (Settlor-interested condition).

Statutory tax indemnities do not confer a power to enjoy, see 29.4.10 (Reimbursement of tax under statutory indemnity).

On a transfer from a UK domiciled person to their foreign domiciled spouse, see 69.12 (Income tax planning for mixed marriage).

28.7 “Power to enjoy”

Section 722 ITA provides:

- (1) For the purposes of section 721, an individual is treated as having power to enjoy income of a person abroad if any of the enjoyment conditions are met.
- (2) In subsection (1) “the enjoyment conditions” means conditions A to E as specified in section 723.

I adopt the statutory terminology and refer to “**enjoyment conditions A to E**”.

Section 722(1) states that an individual is *treated* as having power to enjoy if any of the enjoyment conditions is satisfied. It is considered that this is a comprehensive definition of “power to enjoy” but it is impossible to think of any power to enjoy (in the general sense) which does not also fall within one of the enjoyment conditions, so the point is academic.

“Power to enjoy” is elaborately defined and has given rise to a large case law. But in practice there is not often an issue here. In outline, the transferor has “power to enjoy” if they may possibly enjoy any of the income of the person abroad. A transferor has no power to enjoy if they (and their spouses) are excluded from benefit and have no power of control. A widow or widower of the transferor may be included as a beneficiary.

The test is slightly wider than that of a “settlor-interested” trust for the purposes of s.624 ITTOIA²⁹ though for most practical purposes they are the same. It is hard to see the reason for the distinction, but that is the patchwork nature of income tax.

The enjoyment conditions frequently use the word “benefit”. For the meaning of “benefit” in the context of s.731 and s.87 see 29.4 (Benefit). Most of that discussion is relevant here, but there is one difference. In those sections one had to ascertain the value of the benefit. In the case of

29 See 26.3 (Meaning(s) of “settlor-interested”).

power to enjoy, all that matters is that there is a benefit, regardless of its value: the value of the benefit does not usually matter.

28.7.1 *Substance*

Section 722(3) ITA provides:

In determining whether an individual has power to enjoy income for the purposes of section 721, regard must be had to the substantial result and effect of all the relevant transactions.

Section 722(4) provides:

In making that determination all benefits which may at any time accrue to the individual as a result of the transfer and any associated operations must be taken into account, irrespective of—

- (a) the nature or form of the benefits, or
- (b) whether the individual has legal or equitable rights in respect of the benefits.

I cannot think of any case where s.722(3) has made or could make any difference, though it has occasionally been referred to. Section 722(4)(a) is likewise otiose. In these cases the drafter is only stressing (which need hardly be stressed) that the provisions should not be narrowly construed.

In *Vestey* the House of Lords say:

the direction that regard shall be had "to the substantial result and effect of the transfer and any associated operations" does not in my view authorise any laxity in construing any of the documents by which the transfer or the associated operations are effected. The Court must first determine the meaning and effect of the documents before this provision is applied and it must then consider whether their effect, though in form not beneficial to the settlor, is so in substance. The contrast is between substance and form, so if it can be shown in the present case that the effect of the transfer and the associated operations is to vest a benefit in (for example) a company over which the settlor has complete control, the Court may then say that, though in form the company benefits, in substance the company and the settlor are one and the settlor therefore benefits. But the Court cannot take this last step unless it is shown that the settlor has himself the legal control and no reliance must be placed on his influence over others who are not in law bound to follow his

directions.³⁰

The example is not a case where s.722(3) is in point as a benefit to the company held by the beneficiary would constitute power to enjoy under usual principles. An unsympathetic commentator would say that the drafter is simply striving for effect, or expressing exasperation.

Could s.722(4)(b) ever make any difference? Perhaps an example is a Cayman Island STAR trust under which it might be said that a beneficiary has no rights.³¹

28.7.2 *Enjoyment condition A: income dealt with to benefit T*

Section 723(1) provides:

Condition A is that the income is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of the individual, whether in the form of income or not.

The nuance of this un-lawyer-like language was discussed by the Special Commissioners in *Botnar v IRC*:

222. [Enjoyment condition A] is concerned with how particular income is dealt with when it arises. [Counsel for the taxpayer] however conceded that this is not confined to its immediate handling on receipt or even to what happens in the year of assessment, if for example it is received late in the year, but that we should look at how it is dealt with within a reasonable time of receipt. ...

224. It seems to us that, when the word “calculated” is considered in the context that it refers to income which is “in fact so dealt with”, the meaning “likely” is to be preferred to “thought out” in the sense of “intended”; however we are not sure that either “likely” or “intended” gives exactly the same flavour as “calculated”. “Calculated” here combines an element of objectivity with an element of forethought.

225. It may not however make much difference because if any income was intended to enure for the benefit of [the transferor] it is obviously more probable that it was likely to so enure and that it would be seen

³⁰ *Vestey v IRC* 31 TC 1 at p.89.

³¹ It has been argued that a beneficiary of a foundation has no rights, but a sceptical Court refused to accept that; see 79.6.3 (Foreign law views on Foundations).

objectively as likely to so enure.³²

28.7.3 *Enjoyment condition B: income increases value of T's asset*

Section 723(2) ITA provides:

Condition B is that the receipt or accrual³³ of the income operates to increase the value to the individual—

- (a) of any assets the individual holds, or
- (b) of any assets held for the individual's benefit.

First one must identify an asset held by T or for T's benefit. Having identified the asset, one asks whether the receipt of the income increases the value of that asset.

The concept of "assets held by T" is straightforward but what about assets held "for T's benefit"? In *Howard de Walden v IRC* 25 TC 121 a promissory note held by trustees on trust for T for life was considered to be held for T's benefit. One could reach the same result by a different route since T's life interest in the note was itself an "asset" held by T. If the asset is held on a discretionary trust under which T is merely a beneficiary, it is probably not held "for T's benefit". What if the asset is held on interest in possession trusts for T subject to an overriding power of appointment?

The second requirement is that the receipt of income must increase the value of the asset. This was also considered in *Howard de Walden v IRC*. Here T transferred assets to offshore companies and held (1) a life interest in promissory notes issued by the companies and (2) the benefit of debt due from the companies (T had lent money to the companies).³⁴ The Court of Appeal held:

The receipt of the income by each company operates to increase the value of the notes and of the deposit debt...

32 72 TC 205. The wording is also discussed *obiter* in *Vestey v IRC* 54 TC 503 at p.555G.

33 The words "or accrual" appear to be otiose, but it does not matter.

34 In some but not all cases T also held a few shares in the companies. The Court of Appeal did not rely on this because if it had held that T was caught only by virtue of these shares, T would not have been assessable on the income of all the companies.

However it is a question of fact in each case.³⁵ The question is whether there was a risk of default which is reduced by the receipt of further income. If a debt is sufficiently covered by existing assets of a company, the receipt of further income by the company does not increase the value of the debt and enjoyment condition B is not satisfied. It will not usually matter, as s.727 is likely to apply in cases of this kind.³⁶

28.7.4 *Enjoyment condition C: individual receives benefit*

Section 723 ITA provides:

- (3) Condition C is that the individual receives or is entitled to receive at any time any benefit provided or to be provided out of the income or related money.
- (4) In subsection (3) “related money” means money which is or will be available for the purpose of providing the benefit as a result of the effect or successive effects—
 - (a) on the income, and
 - (b) on any assets which directly or indirectly represent the income, of the associated operations referred to in section 721(2).

For completeness, this question also arose in *Howard de Walden*. The Court of Appeal said:

... the payments made and to be made in respect of the notes and deposits are “benefits” within the meaning of (c) since “benefit” as defined ... includes a payment of any kind.

There are two issues here. First, is the payment of a debt to T (or payment of the promissory note) a “benefit” in the general sense? The Court of Appeal rightly thought it was not, since they relied on the former definition clause.³⁷ Secondly, did the former statutory definition of benefit extend the meaning of benefit to include a payment that is not a benefit in the normal sense? The Court of Appeal held that it did. However, the ITA does not contain the definition of benefit on which the court relied, so this argument no longer arises. However the repayment of an interest-

³⁵ *IRC v Brackett* is another example.

³⁶ See 28.11 (Transferor receives capital sum).

³⁷ For the meaning of “benefit” see 29.4 (Benefit).

free loan is in principle a benefit.³⁸

See 26.9.3 (Amount of charge when enjoyment condition C applies (benefits)).

28.7.5 *Enjoyment condition D: possibility of benefit*

Section 723(5) ITA provides:

Condition D is that the individual may become entitled to the beneficial enjoyment of the income if one or more powers are exercised or successively exercised.

(6) For the purposes of subsection (5) it does not matter—

- (a) who may exercise the powers, or
- (b) whether they are exercisable with or without the consent of another person.

This would apply to a discretionary trust where T was a beneficiary (or could be added to the class of beneficiaries).

“Income” here includes any asset representing the income, even if that asset does not constitute the actual income (in the strict sense) of the person abroad. In *Vestey v IRC*:

- (1) The individual could receive accumulated trust income. Walton J held that the individual had no power to enjoy the trust income within enjoyment condition D because what the individual could receive was trust capital and so no longer “income”.³⁹
- (2) The trust held a company. Walton J held that the individual had no power to enjoy the company’s income within enjoyment condition D because what they could receive was dividends from the company and that was not the same as the income of the company.⁴⁰

This is bizarre and in the House of Lords Viscount Dilhorne rejected it.⁴¹ It is considered that Dilhorne’s reasoning is to be preferred.

³⁸ See 26.3.3 (Loan on favourable terms).

³⁹ *Vestey v IRC* 54 TC 503 at p.555.

⁴⁰ *Vestey v IRC* 54 TC 503 at pp.562-3.

⁴¹ p.595. Strictly, Dilhorne only rejected point (1). He did not address point (2). But the reason is the same in both cases so it logically follows he rejected Walton’s view on both points. No other judge considered this aspect.

28.7.6 *Enjoyment condition E: control*

Section 723(7) ITA provides:

Condition E is that the individual is able in any manner to control directly or indirectly the application of the income.

A power to appoint the capital or income of a fund among a defined class (not including the appointor) does not satisfy enjoyment condition E, even if the power is not a fiduciary power.⁴²

“Control” means non-fiduciary control and so does not include the powers of control of a trustee or a protector with fiduciary powers. It also does not include the power to appoint new trustees:

The question is whether he was able to control the application of the income, and to answer that question affirmatively it must in my judgment be possible to say at least that he was in a position to ensure that the trustees would act in accordance with his wishes without themselves giving any independent consideration and accordingly to act in disregard of their fiduciary duty.⁴³

This is discussed by the Special Commissioners in *Botnar v IRC*:

260. It seems to us that due importance must be given to the words “able... to control” in [enjoyment condition E] bearing in mind the words “in any manner whatsoever, and whether directly or indirectly”. An example of indirect control is to be found in *Lee v IRC* 24 TC 207, where the taxpayer as majority shareholder could appoint and remove the directors of the company in question.

261. In our judgment the ability to control must go beyond an assumption that those controlling the companies will comply with the transferor’s wishes and the fact that they do comply is immaterial. We accept the question posed by [Counsel], viz whether [the transferor] was in a position to ensure that the companies would act in accordance with his wishes.

262. There was in fact no material before us to indicate that [the

⁴² *IRC v Schroder* 57 TC 94 at p.116.

⁴³ *IRC v Schroder* 57 TC 94 at p.125, followed in the non-tax case *R v Radio Authority ex p. Guardian Media Group* [1995] 1 WLR 334 at p.345.

transferor] could have done anything if Dr. Lenz had declined to do what he wanted. The position might have been different if Dr. Lenz was for example an employee who might have been dismissed in the event of failing to cooperate. There was however no evidence to suggest this. We are satisfied that the directors of the companies would have carried out his instructions. We have no doubt that [the transferor] was justified in assuming that Dr. Lenz would do what he wanted. However we do not consider that the mere fact that Dr. Lenz was in the saddle of the settlement meant that [the transferor] was able to ensure that the income would be applied for his benefit. On the authority of *Schroder* even decisive influence is not enough.

263. We readily accept [Counsel's] submission that [the transferor] wished to ensure that the shares would remain in friendly hands. In a sense it could be said that he did in fact control the settlement and the Companies because in fact Dr. Lenz did comply with his wishes: there was no evidence of any action by Dr. Lenz which was contrary to [the transferor]'s wishes. That is not however the same as [the transferor] having the ability, even indirectly, to ensure that the income would be applied in accordance with his wishes.

Lee v IRC 24 TC 207 (shareholder's power to appoint and dismiss directors) offers an example: management shares conferring votes but no dividends or capital satisfy enjoyment condition E. At first sight it may seem illogical that a power to appoint or remove directors should confer power to enjoy, when power to appoint or remove trustees does not. Directors and trustees are both fiduciaries. *IRC v Schroder* explains the difference:

Mr. Lee had power to appoint and remove directors. That power was not a fiduciary power. He could have appointed himself. ... directors do not owe any fiduciary duty to the shareholders. They are trustees of their powers for the company. Mr. Lee was for all practical purposes the company. ... Thus Mr. Lee was in practice securely in the saddle.⁴⁴

In such a case, enjoyment condition B is also satisfied, as company income would tend to increase the value of the voting shares (voting shares do have some value). In practice it is difficult to think of a case where enjoyment condition E is satisfied and none of the other enjoyment

⁴⁴ *IRC v Schroder* 57 TC 94 at p.123.

conditions would be satisfied. Possibly, condition E had more role to play before 1969, when (what is now) s.720 only applied when the individual had *rights* which conferred power to enjoy; and being an object of a discretionary trust was not enough as the discretionary beneficiary had no rights within the meaning of that section.

IRC v Schroder raised a further question on the scope of enjoyment condition E which remains open:

[Counsel for the taxpayer] submitted that ... para (e) was not intended to apply unless the taxpayer is able to secure that income is applied in a way which produces at least an indirect benefit or in the words of Lord Morton in the first *Vestey* case that his control over the application of income is a power which he is entitled to use to serve his own ends ...

The judge found the Revenue's response "less than compelling" but did not decide the issue:

... the question whether para (e) applies to a case where a settlor has a power to direct the application of income for the benefit of others and to the exclusion of any benefit direct or indirect to himself does not arise for decision, and I express no concluded opinion upon it.⁴⁵

The fact that this point remains undecided only goes to show the very limited importance of enjoyment condition E.

28.7.7 *Minority shareholding in offshore company*

If T holds a majority shareholding in an offshore company, T has power to enjoy all the income of the company since enjoyment condition E is satisfied. The same applies if T and T's spouse together have a majority shareholding. What is the position if T has a minority shareholding, say, 10% of the ordinary shares? At first sight one might think that T has power to enjoy all the income of the company, since the income of the company increases the value of T's minority shareholding. But it is suggested that the better view is that T has only power to enjoy one tenth of the company's income. This was assumed in *Bambridge v IRC*.⁴⁶

⁴⁵ *IRC v Schroder* 57 TC 94 at p.125-126.

⁴⁶ 36 TC 313. See Boyd, "Requiem for a Man of Straw" [1980] BTR 442 at p.457.

28.8 Power to enjoy: causation condition

It is not sufficient that the transferor has power to enjoy the income of the person abroad. A causation condition must also be satisfied. Section 721(2) ITA provides:

Condition A is that the individual has power in the tax year to enjoy income of a person abroad *as a result of*—

- (a) a relevant transfer,
- (b) one or more associated operations, or
- (c) a relevant transfer and one or more associated operations.

Suppose:

- (1) In 1970 A transfers an asset to a non-resident company wholly owned by B, who is not UK resident (“A’s transfer”).
- (2) in 2010 B transfers the company to an offshore trust under which A may benefit (“B’s transfer”).

A has made a relevant transfer. However, before 2010, A is not within s.720 since A does not have “power to enjoy” the income of the company.

From 2010 onwards, A does have “power to enjoy”. A does not have that power as a result of A’s transfer alone. However, B’s transfer appears at first sight to be an associated operation in relation to A’s transfer.⁴⁷ It seems at first sight that s.721 condition A is satisfied and A is taxable under s.720 on the income of B’s trust! This clearly cannot be right, but why not? This raises questions similar to those discussed in para 27.11.1 (Transfer from A to B followed by transfer from B to person abroad). Before the ITA, the legislation dealt with this by applying a more limited causation test. If B’s transfer was an independent act, it “broke the chain of causation” and A’s transfer was not the real or effective or operative cause.

From 2007/08, the foundation of that argument has been knocked away. But the courts will have to fill in the hole with a gloss, or the legislation simply does not work. It is suggested that B’s transfer is not an associated operation, so A is not within s.720 if there is a “clean break” between A’s transfer and B’s transfer (the same test as applies elsewhere).

Suppose:

- (1) In year 1, T transferred assets to an offshore company (“the original

47 See 27.9 (Associated operation: definition).

transfer of assets”).

(2) In year 2, T lent money to the company interest-free (“the loan”). Suppose in year 1 T has no interest in the shares of the company and so has no power to enjoy its income and is outside s.720.

In year 2, T probably does have power to enjoy the income of the company by virtue of the interest-free loan.⁴⁸ However T is not taxed on the income arising from the original transfer of assets in year 1, since that power to enjoy does not arise *as a result* of the transfer or any associated operation. The loan is not an associated operation.⁴⁹

However, T is in principle subject to tax under s.720 on the income arising to the offshore company as a result of the loan in year 2 (if there is any) as the loan is itself a transfer of assets.⁵⁰

On the same facts, if income is used to repay the loan, then enjoyment condition A is satisfied. (So is enjoyment condition C, but that does not matter.)

28.9 Income chargeable: Section 721 Condition B

Section 721(3) ITA provides:

Condition B is that the income would be chargeable to income tax if it were the individual’s and received by the individual in the UK.

It is not easy to think of income which would not be chargeable if received by a UK ordinarily resident individual in the UK.

One possible case is a transferor who is ordinarily resident but not resident. If such a person can exist⁵¹ they will benefit from condition B as (being non-resident) they are not chargeable on foreign income.

Perhaps the rule had some historical purpose when enacted in 1936 which has since been lost; but that is speculation.

48 Inter alia, enjoyment condition D is satisfied as income may be used to repay the loan, and (depending on the facts) enjoyment condition B may also be satisfied.

49 See 27.9.2 (“Associated”). The example is based on the facts of *Fynn v IRC* 37 TC 629 where the s.720 point was not argued, presumably, because the Revenue accepted this view was correct. For the s.727 issues raised by a loan, see 28.12.3 (“Connected with any relevant transaction”).

50 This point did not arise on the facts of *Fynn* as the loan was used to repay a debt, so no income arose to the offshore company as a result of the loan.

51 Which is doubtful: see 3.14 (Ordinary resident but not resident).

In practice condition B will always be satisfied. So it does not matter that s.727 has no equivalent condition.

28.10 Amount of s.720 charge

Section 720 ITA provides:

- (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).
- (3) Tax is charged under this section on the amount of income treated as arising in the tax year.

Unfortunately s.720 does not tell us *what* is the amount of income treated as arising. Section 721 does not answer the question either.⁵² So construction and common sense must fill the gap.⁵³

28.10.1 *Power to enjoy part of income of person abroad*

A person may have “power to enjoy” (as defined) over all the income of an offshore person even though their power to enjoy (in the natural sense of that expression) is limited to part⁵⁴ or even none⁵⁵ of the income. In such a case T is taxed on all the income. The s.720 income is not limited to the income that T is actually entitled or able to receive: *Howard de Walden v IRC* 25 TC 121.

52 Section 721 ITA provides:

- “(1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A and B are met.
- (2) Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—
 - (a) a relevant transfer,
 - (b) one or more associated operations, or
 - (c) a relevant transfer and one or more associated operations.”

53 See R.S. Boyd “Requiem for a Man of Straw” [1980] BTR 442. See also 27.13 (Capital receipts deemed to be income) and 27.14 (The amount of income of person abroad).

54 eg if T transfers assets to a company in which T holds debentures. If all the income of the company increases the value of the debentures just a little, T has “power to enjoy” all the income within enjoyment Condition B.

55 eg if T has control within enjoyment Condition E.

However, if T has power to enjoy (as defined) over only part of the income, T is only taxed on the income which T has power to enjoy:

The only question is: What income of the non-resident does the resident individual have power to enjoy by reason of the transfer either alone or in conjunction with associated operations? It is that income which is deemed to be income of that individual for all purposes of the Income Tax Acts.⁵⁶

28.10.2 *Person abroad with independent source of income*

Suppose:

- (1) T transfers assets to an offshore company.
- (2) The offshore company has two sources of income:
 - (a) income from the assets transferred by T;
 - (b) income from other sources which have nothing to do with T.
- (3) T has power to enjoy all the income of the offshore company.

The section does not say *what* income is treated as arising to the individual. Is it any income of the person abroad? Or is it only the income which arises as a result of the transfer of assets or associated operations?

RI 201 states:

It has not been determined by the Courts whether all the income of the overseas person should be assessed, or only the income of that person to the extent that it arose by virtue or in consequence of the relevant transfer of assets and any associated operation(s). It has been the Revenue's practice (since the decision in *Vestey v IRC* 54 TC 503) to assess on the second of these two possible bases.

This must be so. The view that all the income of the person abroad is taxed is "quite ridiculous".⁵⁷ This view is now supported by s.714(2) ITA which provides:

The charges apply only if a relevant transfer occurs, and they operate by

⁵⁶ *Congreve v IRC* 30 TC 163 at p.199.

⁵⁷ Walton J in vehement form in *Vestey v IRC* 54 TC 503 at p.562, followed in *Carvill v IRC* [2000] STC (SCD) 143 at [97] - [98]. The point had been left open in *Howard de Walden v IRC* 25 TC 119.

reference to income of a person abroad that is connected with the transfer or another relevant transaction.

This clearly rejects the view that all income of the person abroad is caught. It suggests however that the measure of income caught is not that which arises as a *result* of the relevant transfer or associated operation, it is income which arises that is *connected* with the transfer or associated operation. “Connected” is not defined. However, while the wording was perhaps designed to give HMRC scope to take one step back from the position stated in RI 201, I cannot think of a case where it would arise in practice.

28.10.3 *Amount of charge when enjoyment condition C applies (benefits)*

A special rule applies for a transfer who has power to enjoy under enjoyment condition C.⁵⁸ Section 724 ITA provides:

- (1) This section applies if an individual has power to enjoy income of a person abroad for the purposes of section 721 because of receiving any such benefit as is referred to in section 723(3) (benefit provided out of income of person abroad).
- (2) Despite anything in section 720, the individual is liable to income tax under that section for the tax year in which the benefit is received on the whole of the amount or value of that benefit.
- (3) But subsection (2) does not apply so far as it is shown that the benefit derives directly or indirectly from income on which the individual has already been charged to income tax for that tax year or a previous tax year.

This was introduced in 1969 and upsets the reasoning of *de Walden* where repayment of a loan was held to fall within enjoyment condition C. Since the charge is now on the value of the benefit, and the value of a payment for full consideration (such as the repayment of a loan) is nil, there would be no charge under s.720 by reference to enjoyment condition C.

In *Botnar* the Special Commissioners said:

245. ... Where the power to enjoy arises the tax is charged not on the

⁵⁸ See 28.7.4 (Enjoyment Condition C: individual receives benefit).

income which the taxpayer has power to enjoy but on the value of the benefit. This may bear no relationship whatsoever to the income of the non-resident as long as it originated from it even indirectly. We do not accept that [s.724 ITA] only operates where the benefit received in a year exceeds the relevant income.

It is considered that the charge is on the lower of the value of the benefit and the amount of income of the person abroad. The value of a benefit in excess of the income does not come into charge, and if the transferor has power to enjoy the income apart from enjoyment condition C, then this provision does not apply.⁵⁹

28.10.4 *Transferor's deductions and reliefs*

Section 746 ITA provides:

- (1) This section applies for the purpose of calculating the liability to income tax of an individual charged under section 720 or 727.
- (2) The same deductions and reliefs are allowed as would have been allowed if the income treated as arising to the individual under section 721 or 728 had actually been received by the individual.

As far as I can see, this is not needed (except perhaps for the avoidance of doubt). The wording is the same as for the provisions for settlor-interested trusts; so see 26.2.7 (Settlor's deductions and reliefs) for further discussion.

28.11 **Transferor receives capital sum**

Sections 727 and 728 ITA must be read together:

727 Charge to tax on income treated as arising under section 728

- (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are ordinarily UK resident by means of relevant transfers.
- (2) Income tax is charged on income treated as arising to such an individual under section 728 (individuals receiving capital sums as a result of relevant transactions).

⁵⁹ See Venables, "Section 739 and benefits in kind", OTPR Vol 11 Issue 3 p.1.

(3) Tax is charged under this section on the amount of income treated as arising in the tax year. ...

(4) The person liable for any tax charged under this section is the individual to whom the income is treated as arising. ...

728 Individuals receiving capital sums as a result of relevant transactions

(1) Income is treated as arising to such an individual as is referred to in section 727(1) in a tax year for income tax purposes if—

- (a) income has become the income of a person abroad as a result of—
 - (i) a relevant transfer,
 - (ii) one or more associated operations, or
 - (iii) a relevant transfer and one or more associated operations, and
- (b) the capital receipt conditions are met in respect of the individual in the tax year (see section 729).

Section 727 ITA is an independent charging section. Lord Greene explains its purpose in *Howard de Walden v IRC* 25 TC at p.135:

The provision was made ... to meet devices by which a transferor took care to give himself no “power to enjoy” any income of a non-resident transferee company within the meaning of [s.723 ITA], but obtained the money he required, for example, by borrowing from the company, all the shares being vested (for example) in his children.

Another example would be a non-resident trust or underlying company making an (arm’s length) loan to a transferor who was excluded from benefit.

Many of the rules applying to s.720 also apply to s.727. In ITA they are set out twice, but I do not discuss them again here. In particular, the words “such an individual” in s.727(2) restrict the charge to the transferor (just as s.720).

Where the settlor receives a capital sum, it is also necessary to consider the settlor-interested trust rules: see 26.13 (Settlor receives capital sum).

28.11.1 *Nature of s.727 charge*

ITA EN Change 111 provides:

Section 739(3) ICTA [now s.727] does not deem the capital sum to be income; instead, it takes income which has become payable to persons abroad as a result of the transfer and deems that income to be the transferor's.

In *Vestey v IRC* 54 TC 503, Lord Wilberforce said:

It is “any income” of the foreign transferees which is deemed to be the income of the recipient of a capital sum, [*indeed of each and every recipient of any capital sum,*]⁶⁰ small or large, whenever received. From these words there is no escape.

28.11.2 *Relationship of s.720 and s.727*

In *Vestey v IRC*, Walton J said:

[Sections 720 and 727 ITA] are ... concurrent and not cumulative. A person cannot be taxed in any one year on the same sum under both [s.720 and also s.727]. Like Warren Hastings, the Crown, in making this concession, doubtless stood amazed at its own moderation ... but make it it did.⁶¹

In practice it is rare for s.727 to apply in a case where s.720 does not, that is, the transferor receives a capital sum without having power to enjoy. So it is rare to have to look at s.727.

28.12 The capital receipt conditions

Section 729(1) ITA provides:

For the purposes of section 728(1), the capital receipt conditions are met in respect of the individual in a tax year (“the relevant year”) if—

- (a) either—
 - (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or

⁶⁰ The words in italics are wrong since s.727 is limited to the transferor.

⁶¹ 54 TC 503 at p.556.

- (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer, and
- (b) the payment of that sum is (or, in the case of an entitlement, would be) in any way connected with any relevant transaction.

28.12.1 “Receives”

“Receives or is entitled to receive” is glossed in s.729(4) ITA:

For the purposes of subsection (1), a sum is treated as a capital sum which the individual (“A”) receives or is entitled to receive if another person receives or is entitled to receive it—

- (a) at A’s direction, or
- (b) as a result of the assignment by A of A’s right to receive it.

28.12.2 “Capital sum”

“Capital sum” is artificially defined. Section s.729(3) ITA provides:

In subsection (1) “capital sum” means—

- (a) any sum paid or payable by way of loan or repayment of a loan, and
- (b) any other sum paid or payable—
 - (i) otherwise than as income, and
 - (ii) not for full consideration in money or money’s worth.

If T lends, repayment of the loan to T is a capital sum. If T sells an asset at market value, payment of the purchase price to T is not a capital sum. The distinction between a loan and a sale is therefore important. “Loan” is a fairly narrow term and does not include the right to an unpaid purchase price even if the purchase price is left outstanding: *Ramsden v IRC* 37 TC 619.

In *Botnar v IRC* 72 TC 205 at p.266 the Special Commissioners say:

In our judgment the entitlement to use the flat is not a capital sum within the definition in [s.729(3)]; in particular we hold that the entitlement to use was not a “sum” within any normal use of English.

28.12.3 “Connected with any relevant transaction”

In *Fynn v IRC* 37 TC 629:

- (1) In 1948, T transferred assets (“the original assets”) to an Irish company (“the original transfer”).
- (2) The company charged the assets for a debt (“the charge”).
- (3) In Jan 1952, T lent the company £12,000 (“T’s loan”).

The Revenue assessed T on the income accruing to the company in 1951/2 and 1952/3 under (what is now) s.727.⁶²

During those years T was entitled to receive a capital sum (repayment of T’s loan). However, the (hypothetical) payment of that sum would not be “in any way connected” with the original transfer or the charge (an operation associated with the original transfer). So the condition in s.729(1)(b) was not satisfied, ie, the capital receipt conditions were not satisfied.

Suppose the same facts but the loan were repaid out of the original assets. In that case T actually receives a capital sum, and the actual receipt is connected with the original transfer; so it is considered that the capital receipt condition would be satisfied. (This did not happen in *Fynn*: T wisely released the loan, two years after it was made.)

This is the only use of the expression “connected with” in the TAA provisions (though the definition of associated operations uses the comparable expression “in relation to” and it is suggested that the meaning is the same). “Connected with” is of course an expression used in other anti-avoidance provisions⁶³ but it is such a vague and context-sensitive expression that no useful guidance can be expected from cases on other provisions.

28.12.4 Relief where transferor repays loan

Section 729(2) ITA provides relief where the capital sum takes the form of a loan to the transferor which is repaid:

But subsection (1)(a)(ii) does not apply merely because of the receipt of a sum by way of loan if the loan is wholly repaid before the relevant

⁶² These facts raise interesting s.720 issues, which were not discussed in the case; see 28.8 (Power to enjoy: causation condition).

⁶³ For instance, the transactions in securities provisions.

year begins.

28.13 Time extent of s.727 charge

28.13.1 *Historic income*

A transferor who receives a capital sum is not taxed on income arising to the person abroad before the year of receipt. Section 727 is not in that sense retrospective:

While the income of the non-resident trustees would be deemed to be the income of [the taxpayer] on her receipt of the £100,000 [capital sum] on 2 May 1966, *in that and subsequent financial years*, I see nothing in [s.727] which gives it retrospective effect. It does not provide that the income of the non-resident in any year before the person receives or is entitled to receive is to be deemed to be that person's income.⁶⁴

This passage (though obiter) is well founded.

The view that s.727 could apply so that income of the person abroad which arose in years before receipt of the capital sum should retrospectively be deemed to be income of the transferor in the year that the income actually arose seems unworkable: it would require an unlimited number of past years to be reopened.

The view that s.727 could apply so that income of the person abroad which arose in years before the receipt of the capital sum should be deemed to be the income of the transferor in the year of the receipt of the capital sum would still require the past years of the transferor to be reviewed. There is also the conundrum of how to treat income arising to the person abroad if the transferor was not ordinarily UK resident during some of those years.

This explains why the capital receipt conditions are satisfied if a transferor has an entitlement to receive a capital sum, even though they have not actually received it. The application of s.727 makes sense here because on the subsequent receipt of the capital sum the historic income would not otherwise be caught.

⁶⁴ *Vestey v IRC* 54 TC 503 at p.594.

28.13.2 *Present and future income*

The s.727 charge applies to income arising in the year in which the capital receipt condition is met. However once that condition is met in one year, it is generally met in all future years, so s.727 in principle applies to the income of the person abroad in the year that the capital receipt condition is first met and all future years.

There are two narrow exceptions to this rule. The first relates to loans which are repaid.⁶⁵ The second is this: The capital receipt condition in s.729(1) (so far as relevant) requires that:

either—

- (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
- (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer

The condition in (a) is satisfied in a year if the individual receives *or is entitled to receive* a capital sum in that year. The condition is satisfied in a year if the individual received a capital sum in an earlier year.

The condition is not satisfied if the individual was entitled to receive a capital sum in an earlier year (if entitlement has ceased and the individual did not actually receive anything). This was deliberate. ITA EN Change 111 provides:

But the wording of section 739(3) of ICTA [now s.727] leaves the timing of the charge rather unclear. It reads:

Where, whether before or after any such transfer, such an individual receives or is entitled to receive any capital sum ...

Section 739(6) ICTA [now s.729(2) ITA] provides that income is not deemed to be the individual's under section [727] for any tax year "by reason only of his having received a sum by way of loan if that sum has been wholly repaid before the beginning of that year".⁶⁶ Therefore income may be deemed to be the individual's in other cases where there has been an actual receipt of a capital sum in a previous tax year. But [the source legislation] makes no provision about whether section [727] imposes a charge if the individual was merely entitled to receive a

65 See 28.12.4 (Relief where transferor repays loan).

66 See 28.12.4 (Relief where transferor repays loan).

capital sum in a previous tax year. In practice, where entitlement to a capital sum has ceased HMRC do not pursue further liability under section [727]. Section 729 ITA gives effect to this practice by providing that the individual must either receive or be entitled to receive a capital sum in the tax year or have received a capital sum in an earlier tax year.

However it must be rare that a transferor is entitled to receive a capital sum without ever receiving a capital sum. An example would be if a transferor lent money to the person abroad and later waived the right to repayment.

In general, therefore, the capital receipt conditions are met in a year if the transferor has received a capital sum in an earlier year. This raises the spectre of a transferor being taxed for all time because they have received a small capital sum. Suppose:

- (1) A company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
- (2) The transferor receives a capital sum. This does not give rise to any (or any additional) charge under s.727 since all the income is taxed as the transferor's anyway.
- (3) The transferor is then excluded from benefit and ceases to have power to enjoy.

It has been suggested in these circumstances that all future income arising in the company will be deemed to be that of the unfortunate transferor. The same point would apply to a non-resident trust if a capital sum was paid to the settlor, even though the settlor was subsequently excluded from benefit and ceased to be liable under the settlement provisions. That would be absurd. For good measure, the overlap with s.633 ITTOIA would also lead to a double charge. In practice HMRC do not take that point.⁶⁷ It is suggested that s.727 does not normally apply in a situation where s.720 applies, so a capital sum received at that time should be disregarded. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the income of future years.

67 But there is no official statement to this effect. The EN set out above does state:

“In practice, where entitlement to a capital sum has ceased HMRC do not pursue further liability under s.739(3) ICTA [now s.727]”

but it is assumed there that if the individual *actually* receives a capital sum, liability never ceases.

The same problem arises if:

- (1) Trustees hold a company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
- (2) The transferor receives a capital sum.
- (3) The trustees then sell the company to a third party.

It has been suggested that all future income arising in the company will be deemed to be that of the unfortunate transferor (though they may not have any right to know from the purchaser what that income will be). That would be absurd. In practice HMRC do not take that point. It is suggested that s.727 does not normally apply in this situation. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the company's future income.

Walton J offered a sensible solution to this conundrum. He said in *Vestey* that the charge under s.727 was limited to the amount of the capital sum. Unfortunately his view was rejected by two judges in the House of Lords who commented on the point.⁶⁸ However it remains arguable, as the comments in *Vestey* were strictly obiter, the approach to statutory construction is now looser than before, and the problems which arise were not explored.

28.14 Section 720 remittance basis

Section 726 ITA provides a relief which I call “**the s.720 remittance basis**”. Section 726(1) provides:

This section applies in relation to income treated under section 721 as arising to an individual in a tax year (“the deemed income”) if—

- (a) section 809B, 809D or 809E (remittance basis) applies to the individual for the year, and
- (b) the individual is not domiciled in the UK in the year.

In short, the relief applies to remittance basis taxpayers. Section 726(2) ITA defines the term “foreign” deemed income:

For the purposes of this section the deemed income is “foreign” if (and to the extent that) the income mentioned in section 721(2) would be relevant foreign income if it were the individual's.

68 See the comment of Lord Wilberforce set out in 28.11.1 (Nature of s.727 charge).

“The income mentioned in s.721(2)” is the income of the person abroad (or that part over which the individual has power of enjoyment). Section 726(3) ITA provides the relief:

Treat the foreign deemed income as relevant foreign income of the individual.

In the HMRC view s.720 income is fictional income distinct from the actual income of the person abroad. Since fictional income cannot be remitted, the remittance basis would not work. So s.726(4) ITA provides:

For the purposes of chapter A1 of part 14 (remittance basis), treat so much of the income within section 721(2) as would be relevant foreign income if it were the individual’s as deriving from the foreign deemed income.

In short, the remittance basis applies as if the income accruing to the person abroad were the income of the transferor. There is a tax charge if the income of the person abroad is received/brought/used in the UK by the transferor or by a relevant person (in relation to the transferor).

It is desirable for trusts and companies within s.720 to segregate (1) foreign income and (2) capital. They can then remit capital (IT-free) rather than income (chargeable at IT rates). If they fail to do so then the mixed fund rules will apply.

28.14.1 Payment of s.720 income to transferor while non-resident

Suppose:

- (1) Year 1: Income accrues to a company within s.720. The transferor (“T”) receives s.720 income but that income is (un)taxed under the s.720 remittance basis.
- (2) Year 2:
 - (a) T becomes non-resident.
 - (b) The company distributes its income by way of dividend. T receives actual income (a dividend) but because this dividend is received in a non-resident year, it is not taxed either on receipt or when remitted to the UK.
- (3) Year 3:

- (a) T becomes UK resident.
- (b) T remits that dividend to the UK.

The question is whether the dividend received in the UK in year 3 constitutes a remittance of the s.720 income of year 1. Is the dividend which the individual received derived from the s.720 income. The answer is that the dividend received is derived from the income of the person abroad, and so is taxable on receipt in the UK in year 3.⁶⁹

The position is no better if T remits the dividend in year 2, as this is in principle caught by the temporary non-residence rules.

In short, one cannot “wash” income taxable on the s.720 remittance basis by a distribution to T in a year of T’s temporary non-residence. That view fits the object of s.720 which is to put the transferor in the same position as if they had not made the transfer: see *Chetwode v IRC* 51 TC 647.

28.14.2 *Pre-2008 s.720 income and transitional rules*

In the following discussion I use the term “**pre-2008 s.720 income**” to mean foreign income arising before 6 April 2008, which

- (1) fell within s.720 ITA or its predecessor, s.739 ICTA, but
- (2) qualified for relief under s.726 (in its 2007/08 form), or its predecessor, s.743(3) ICTA, a kind of remittance basis which in earlier editions of this work I called “the foreign domicile defence.”

There was no tax charge when the income arose if it was not received in the UK.

Before 2008/09 it is considered that there was no charge under these sections if such income was received outside the UK but later brought to the UK. This was so whether the income was brought to the UK by:

- (1) the person abroad who received it; or
- (2) the transferor (if they received the income outside the UK from the person abroad).⁷⁰

Para 170 Schedule 7 FA 2008 provides:

69 See s.726(4). This seems even clearer if one remembers that distribution relief would be available, had the dividend in fact been taxable; see 30.4 (Distribution relief).

70 See *Taxation of Foreign Domiciliaries* 6th edn para 16.14 (s.720 foreign domicile defence). There were good reasons for this: see *Taxation of Foreign Domiciliaries* 6th edn para 14.12 (Critique of s.648 clawback). Needless to say, no reason was given for changing the position.

The amendments made by paras 161 to 179 have effect for the tax year 2008-09 and subsequent tax years.

Pre-2008 s.720 income remitted after 2008/09 is not caught by s.726 in its current form, as the condition in s.726(1)(a) is not met.⁷¹ So there is still no charge on the remittance of pre-2008 s.720 income. This is right and fair, since there was no charge on remittance before 2008. However (given the retrospective operation of other the 2008 reforms) this may have been an oversight. A passage in the TAH suggests that its author thought that pre 2008 s.720 income is taxable on remittance after 6 April 2008.⁷² But it seems to me that this is clearly wrong.

28.14.3 *s.720 income of years 2005/06 to 2007/08: HMRC view*

In the following discussion I use the term “**2005-2008 s.720 income**” to mean foreign income arising in the years 2005/6 to 2007/8 (inclusive), which fell within (what was then) s.739 ICTA.

TAH para 1222 records the bizarre view that ITTOIA absent-mindedly abolished the foreign domicile defence, formerly in s.743(3) ICTA, so that 2005-2008 s.720 income was always charged on an arising basis:

Following the tax law rewrite [ITTOIA] new and separate charging provisions were introduced for all types of foreign income replacing the general charge under what was Case IV/V of Schedule D. The new provisions, included in ITTOIA, also provided, on a claim, an alternative

71 Contrast the usual RFI remittance basis, where para 83 Sch 7 FA 2008 fills that gap: see 9.14.1 (Transitional rule for pre-2008 income/gains).

72 TAH para 1224 provides:

“The provisions described in TAH 1223 [including the current s.720 remittance basis] have effect for the tax year 2008-09 and subsequent years. There are no specific transitional arrangements for introduction of the new provisions. As the [s.720] income charge only looks at income arising to the person abroad in the tax year it should not be necessary to have regard to income of earlier years in determining whether there is an amount that is to be regarded as foreign deemed income. However if there is foreign deemed income then in considering any possible charge under Part 8 ITTOIA it will be appropriate to consider all sums remitted to the United Kingdom in the tax year even if they arise, for example, from income of periods prior to the introduction of these provisions. Those remittances will fall to be tested against the rules in Chapter A1 Part 14 ITA 2007 as to whether they are taxable remittances.”

basis for calculating certain income categorised as 'relevant foreign income' and the amount on which an individual would be taxed.

From the introduction of ITTOIA non-UK domicile status could impact this relevant foreign income and resulted broadly speaking in the income subject to the claim being taxed only when received in the United Kingdom.

Apart from minor adjustments consequential upon the introduction of ITTOIA the transfer of assets provisions giving exclusion from charge for certain income of non-UK domiciled individuals remained largely unchanged. However the exclusion [s.743(3) ICTA] was only for income that would not be chargeable to tax on the basis of domicile status alone. It could be argued that following the new charging provisions brought into effect by ITTOIA, which carried no distinction on the basis of domicile, that from 6 April 2005 there was no such income that fell to be excluded on the basis of domicile under the transfer of assets provisions.

I have not come across any reference to this argument before the publication of the TAH in 2009, nor do HMRC say expressly whether they regard it as correct. I find it hard to imagine that anyone could take the argument seriously. But in practice the point is academic as HMRC will not usually take any notice of it:

However the introduction of ITTOIA was not intended to change the law under transfer of assets in this way and as a result HMRC continues to operate the income charge provisions in this interim period in the same way that they were operated prior to April 2005, subject to cases where there appears to be manipulation of the interaction of the new provisions. Where you identify a case that appears to involve manipulation refer it to the Transfer of Assets Technical Adviser in CAR (Residency) Offshore Personal Tax Team.

If the argument were actually right, so 2005-2008 s.720 income was by law taxed on an arising basis, without any foreign domicile defence, then HMRC could not of course assess the income in a subsequent year when it was remitted. They could only assess it in the year that it arose. One could envisage circumstances when taxpayers would want to raise the argument. Similar issues would arise in relation to the s.624 remittance basis. However I doubt if these wider ramifications of the argument will ever need to be considered.

28.15 No indemnity for transferor

The transferor has no express statutory indemnity against the person abroad for tax paid under s.720. It is considered that no indemnity can be implied.

28.16 Tax return: disclosure of s.720 income

S.720 income is returned in Boxes 10-13 in the Foreign pages (form SA106) 2011/12. SA106 Notes 2011/12 provides:

Dividends and all other income received by a person abroad

Boxes 10 to 13

If you have transferred, or taken any part in the transfer of assets, as a result of which income has become payable to a person abroad, you may need to complete these boxes. All items chargeable as income under the transfer of assets provisions should be entered in this section only. Helpsheet 262 Income and benefits from transfers of assets abroad and income from non-resident trusts has more details on how you complete these boxes.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from non-resident trusts - 2011/12) provides:

How do you report the income?

Unless you are completing box 46 on page F 6 of the Foreign pages – see ‘How do you qualify for an exemption from charge on income or benefits?’ on page 6 – report the amount of income as follows:

- enter in box 11 on page F 3 of the Foreign pages details of all dividends received on which you are chargeable including any allowable UK or foreign tax credit
- enter in box 13 on page F 3 of the Foreign pages all other income including any tax paid on that income.

You should enter details of the relevant transactions that have given rise to the income, and the offshore structures involved, in the ‘Any other information’ box, box 19 on page TR 6 of your tax return.

All income that is chargeable to tax under the transfer of assets provisions should be entered at boxes 11 and 13 of the Foreign pages not in the corresponding boxes elsewhere in the return for the type of income involved. For example, if interest income arose to a foreign company and that income is treated as yours under the transfer of assets provisions,

then the income should be entered at box 13 not in the relevant boxes for interest. If you are non-UK domiciled then you may not have to enter all of the income if some of the income arising to the person abroad is from a source outside the UK and not remitted to the UK. See 'How do you report income or benefits if you are non-UK domiciled?' on page 6.

This reflects the HMRC's official view that s.720 income is distinct from the income of the person abroad.

I do not see what box 10 is for. Perhaps it is a mistake from amending the 2009/10 version of the form.

CHAPTER TWENTY NINE

TRANSFER OF ASSETS ABROAD: NON-TRANSFERORS

29.1 Non-transferors – Introduction and terminology

The provisions can be divided into four parts. In the order in which they appear in ITA they are: the charge, the fundamental s.732 conditions, computation and defences. This is perhaps not the most logical way in which the legislation could have been set out but it is convenient to follow the statutory order.

First, s.731 ITA imposes the charge:

- (1) Income tax is charged on income treated as arising to an individual under section 732 (non-transferors receiving a benefit as a result of relevant transactions).
- (2) Tax is charged under this section on the amount of income treated as arising for the tax year. ...
- (3) The person liable for any tax charged under this section is the individual to whom the income is treated as arising. ...

I refer to the income treated as arising to an individual under s.732 as “**s.731 income**”. (It might be called “s.732 deemed income” but the charge is under s.731.)

The charge applies if income is treated as arising under s.732, to which we must turn as the second stage of our journey. Section 732(1) ITA sets out five sets of conditions. I refer to them as “**the fundamental s.732 conditions**”. They are as follows:

- (a) *a relevant transfer occurs.*

I refer to this as “**the relevant transfer condition**”.

(b) an individual who is ordinarily UK resident receives a benefit.

This contains two aspects, the receipt of a benefit and residence. So far as the residence aspects are concerned, I refer to this as “**the ordinary residence condition**”.

(c) the benefit is provided out of assets which are available for the purpose as a result of—

(i) the transfer, or

(ii) one or more associated operations.

I refer to this as “**the benefit causation condition**”.

(d) the individual is not liable to income tax under section 720 or 727 by reference to the transfer and would not be so liable if the effect of sections 726 and 730 were ignored.

I refer to this as “**the transferor’s s.731 defence**”.

(e) the individual is not liable to income tax on the amount or value of the benefit (apart from section 731).

I refer to this as “**the s.731 capital condition**”.

Where there is a relevant transfer to a trust or company, and the motive defence and ss.720 and 727 do not apply, I describe this trust or company as being “**within section 731**”.

If all five fundamental conditions are satisfied one moves on to s.732(2) ITA:

Income is treated as arising to the individual for income tax purposes for any tax year for which section 733 provides that income arises.

The third stage is to compute the amount of income treated as arising: this is dealt with in s.733 ITA (and s.734).

Lastly, there are some defences to the charge: in particular the s.731 remittance basis and the motive defence.

29.2 Relevant transfer condition

The first fundamental s.732 condition is the relevant transfer condition.

Section 732(1) ITA provides:

This section applies if—
(a) a relevant transfer¹ occurs,

Despite the present tense (“occurs”) this condition is met in a year if a relevant transfer occurred in an earlier year. Grammarians call this “the historic present”.

29.3 Ordinary residence condition

The second fundamental s.732 condition requires ordinary residence. Section 732(1) ITA provides:

This section applies if ...
(b) an individual who is ordinarily UK resident receives a benefit,

If an individual receives a benefit in a year but is not ordinarily resident in the year there is no charge under s.731 in relation to that benefit in that year.

What if B later becomes UK resident? Suppose:

- (1) Year 1: B is not ordinarily resident in the UK, but receives a benefit.
- (3) Year 2: B becomes ordinarily resident in the UK but receives no benefit in that year.

It is considered that the fundamental condition in s.732(1)(b) is still not met in year 2: the words “an individual who is ordinarily UK resident receives a benefit” mean that the individual must be ordinarily resident at the time that they receive a benefit.

Residence at the time that relevant income arises is not in principle necessary. Suppose:

- (1) Year 1: B is non resident and relevant income arises.
- (2) Year 2: B is UK resident and receives a benefit.

The ordinary residence condition is satisfied so there is in principle a charge under s.731 by reference to the income of year 1.

Now suppose:

- (1) Year 1: B is ordinarily resident in the UK and receives a benefit.

¹ See 27.2 (“Relevant transfer”).

However, there is no relevant income (no income arises at all or it has all been distributed) so there is no charge under s.731.

- (2) Year 2: B is not UK resident or ordinarily resident but relevant income arises.

It is suggested that the ordinary residence condition is not met: the words “an individual who is ordinarily UK resident receives a benefit” mean that the individual must be ordinarily resident at the time that the section applies, as well as being ordinarily resident at the time they receive a benefit. This view is supported by the implied territorial limitation of UK taxation; see 18.4 (Why does location of source matter?). But if B returns to the UK in year 3 B may be subject to tax.

29.4 Benefit

The second fundamental s.732 condition requires (in short) that the individual receives a benefit. Section 732(1) ITA provides:

This section applies if ...

- (b) an individual who is ordinarily resident in the UK *receives a benefit*.

The word benefit is very common in tax statutes and in other areas of law.² So there is plenty of material for discussion, though it is always necessary to consider the word in its context. In this section I discuss the meaning of “benefit” for the purposes of s.731 and for the purposes of s.87 TCGA as the issues are (more or less) the same. Similar issues arise in other contexts. It would be impossible to write a full list, but they include:

- (1) Cases where there is a tax charge on a benefit:
 - (a) s.394 ITEPA (charge on benefit from retirement benefit scheme)
 - (b) s.201 ITEPA (employment-related benefits)
- (2) Cases where there is a tax charge if there is a possibility of “benefit” in any circumstances (regardless of its amount):
 - (a) s.624 (settlor-interested trusts)
 - (b) s.86 (settlor-interested trusts)

2 For discussion of “benefit” in a trust law context see Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010), para 13.12 (What does a settlor exclusion clause cover?).

There is (sensibly) no statutory definition of benefit for our purposes.³ It is well established that “benefit” is a word of wide import.

For the benefit of funding a beneficiary’s tax appeal, see 31.47 (Appeals).

29.4.1 *Arm’s length transaction*

A transaction for which the individual gives full consideration is not a benefit.⁴ It does not matter if the other party is a connected person (eg a sale to or from a family trust or company).

What if the parties act at arm’s length and have no gratuitous intent but owing to some mistake the individual gives less than full consideration? This is not a benefit.⁵

29.4.2 *Receipt or sale of equitable interest*

RI 201 states:

- For the purposes of [s.731 ITA] a benefit is treated as not including
- [1] either the giving⁶ of a life interest to a beneficiary or
 - [2] the receipt by a beneficiary of the proceeds of selling a life interest.

Point [1] (conferring a life interest) is not a benefit if the interest is revocable (or else the value of the benefit is nil). If the interest is not revocable, then its receipt is in the widest sense a benefit, but for tax purposes it should be regarded as a right to a future benefit, rather than a

-
- 3 For completeness: The pre-ITA legislation stated that “benefit” included a payment of any kind: s.742(9)(c) ICTA. This had (more or less) no practical effect, and was sensibly omitted in the ITA rewrite.
 - 4 This is self-evident; but if authority is needed, see *IRC v Lactagol* 35 TC 230 and *Wilson v Clayton* 77 TC 1. For CGT the position is dealt with by statute, but only for the avoidance of doubt: see 48.6.4 (Arm’s length transaction).
 - 5 *Wilson v Clayton* 77 TC 1 decided that this is the case in the context of employment-related benefits. Note the reference to arm’s length transactions in the passage from *Cooper* cited at 29.4.8 (Benefit to which a beneficiary becomes entitled under terms of trust); the same should apply for s.731.
 - 6 “Giving” a life interest is layman’s language. The term must include the conferring of a life interest by exercise of a power of appointment. Presumably it also includes the conferring of a life interest by exercise of a power of advancement or re-settlement.

immediate benefit. Otherwise there would be a double charge, eg, when trustees appointed assets to a beneficiary contingently on attaining the age of 21 and again when the beneficiary reached 21 and became absolutely entitled.⁷ and to tax a “benefit” of this kind is clearly outside the scheme of the Act.

Point [2] (receipt of proceeds of sale of a life interest) is outside the scope of s.731 because a sale at market value is not a “benefit” to the vendor, or because the value of the “benefit” (if there was one) is zero.⁸ If the sale was for more than market value there is a benefit but the benefit is not provided out of trust assets so it is not within s.731.

Although RI 201 refers to a life interest, the same reasoning must apply to any equitable interest.⁹

29.4.3 *Sale of company within s.731*

The same reasoning applies on the sale of shares or securities in a company within s.731. This leads to an interesting anomaly:

- (1) B holds shares in a company which has accumulated relevant income within s.731. B sells the shares. No charge arises under s.731 as B does not receive a benefit (even when B spends the proceeds of sale).
- (2) Trustees hold shares in a company which has accumulated relevant income. They sell the company. The sale proceeds represent the relevant income¹⁰ and so if the trustees appoint the proceeds to B, B receives a benefit taxable under s.731.

7 The Special Commissioners reached this conclusion in the context of employment-related benefits: *Dextra Accessories v Macdonald* 77 TC 146 at [9]-[12]. The point was (rightly) not appealed. In the context of s.731, one could also reach the same conclusion by saying that the “benefit” (if there was one) was not “provided out” of trust assets. In the context of s.87 TCGA, one could reach the same conclusion by saying that the “benefit” (if there was on) is not “from the trustees”. But the better analysis is simply that there is no “benefit” within the meaning of the charging provision.

8 The drafter of FA 1984 Sch 14 para 5(4) reached the same conclusion for the purpose of (what is now) s.87 TCGA.

9 On a sale of an equitable interest, watch:

- (1) CGT on the disposal of the interest; and
- (2) Schedule 4A TCGA.

10 See 29.27 (Relevant income reinvested: tracing).

29.4.4 *Interest-free loan and enjoyment of asset in kind*

RI 201 continues:

But it ["benefit"] is otherwise treated as including all benefits taken into account in determining whether an individual has power to enjoy income for the purposes of [s.720 ITA]. It therefore includes for example receipt of a loan at less than a commercial rate of interest, and the use of trust property at less than an open market rental.

Interest-free loans and use of property at less than full rent are benefits: *Cooper v Billingham* 74 TC 139. On valuation of that benefit, see 29.6 (Valuation of benefits).

29.4.5 *Loan (not to life tenant): interest paid at commercial rate*

A loan on commercial terms is not a benefit. That is clear on first principles, but if authority is needed, see *Vestey v IRC*:

... a loan may well benefit a person even if it is made at a commercial rate of interest, as it may tide him over a difficult period, but I do not think that if money is so lent it is applied "for the benefit" of the debtor within [the forerunner of s 624].¹¹

I find it impossible to hold that a sum of money lent at a commercial rate of interest is "payable to or applicable for the benefit of" the borrower in the sense of this Section.¹²

A relatively simple way of avoiding a benefit (and hence avoiding s.731 and s.87) is:

- (1) a trust makes a loan at a market rate of interest;
- (2) if appropriate, provide the beneficiary with funds to pay the interest; and
- (3) the beneficiary pays the interest.

Take care that the interest does not have a UK source.¹³ The same may be done for the use of property in kind provided the property is not in the UK.

¹¹ *Vestey's Executors v IRC* 31 TC 1 at p.114.

¹² 31 TC 1 at p.121.

¹³ See 19.4 (Interest: charge and location of source).

29.4.6 *Loan (not to life tenant): interest rolled up*

What if interest at a commercial rate is rolled up unpaid? There is no income tax charge on unpaid interest.¹⁴ In principle there is still no benefit. However, if the intention is that the interest will never be paid, the provision for payment of interest is a sham and ineffective for tax purposes. There are many trust law issues: do the trustees have power to make the loan? Unwinding the arrangement after the death of the beneficiary needs careful thought.

29.4.7 *Interest-bearing loan to life tenant*

It is in general not possible to have an interest-bearing loan to a life tenant, under a transparent *Baker*-type¹⁵ trust, because a person cannot pay interest to himself. Accordingly one cannot avoid a charge on a benefit in kind by purporting to charge interest, whether the “interest” is purportedly paid¹⁶ or purportedly rolled up.¹⁷ It would be different if:

- (1) interest was payable after the death of the life tenant;
- (2) the loan was issued at a discount instead of at interest;
- (3) the trustees had expenses which were met by the interest (so the interest was not paid to the life tenants).

There is a school of thought that maintains (to my mind over-optimistically) that interest-bearing loans to life tenants offer a solution to the problem of extracting trust funds free from s.731 and s.87. HMRC do not take that view.

14 *Girvan v Orange Personal Communications Services* 70 TC 602.

15 It would be different if the trust was a non-transparent *Garland*-type trust. See 25.1 (Taxation of life tenant).

16 Even if the parties go through a ceremony under which:

- (1) the life tenant pays “interest” to the trustees; and
- (2) the trustees return it to the life tenant.

Even if the parties do this there is no IT charge on the “interest”: *Styles v New York Assurance* 2 TC 460. This point was overlooked in *Rogge v HMRC* [2012] UKFTT 49 (TC) (where the taxpayer was not represented by counsel).

17 However, if interest accrues unpaid and the life tenant dies, the position alters and outstanding interest becomes payable to the trust (unless Apportionment Act 1870 principles apply, which will be rare).

29.4.8 *Benefit to which a beneficiary becomes entitled under terms of trust*

Suppose:

- (1) A beneficiary is entitled to trust property absolutely subject to satisfying some contingency (eg attaining the age of 25).
- (2) The contingency is satisfied (the beneficiary reaches 25 and becomes entitled to the trust property).

There is a “capital payment” for the purposes of s.87 TCGA: see s.97(2) TCGA.¹⁸ There is no equivalent provision in the transfer of asset rules. However, it is considered that the beneficiary does receive a “benefit” and the value of the “benefit” is equal to the value of the trust property. The concepts of “value” and “benefit” can (just) be stretched to support this conclusion¹⁹ and any other view would be inconsistent with the scheme of the provisions. This view is supported by *Cooper v Billingham* 74 TC 139 CA at [39]:

The whole scheme of the legislation requires the Court to see what benefit a beneficiary actually receives, in cash or in kind, otherwise than as income or under an arm’s-length transaction. Any pre-existing beneficial interest belonging to the beneficiary is irrelevant. The Judge dealt with this point shortly²⁰ but there was no need for him to say more.

Likewise, if L is entitled to a life interest, and a trust asset is transferred to L, the value of the benefit received is the value of the asset, not the value of the reversionary interest in the asset.²¹

29.4.9 *Benefit on liquidation or redemption of shares or securities*

A similar point arises where:

- (1) A shareholder holds shares in a company within s.731.

¹⁸ See 48.6.5 (Termination of settlement).

¹⁹ Contrast *R v Allen* [2000] 2 All ER 142 [2000] 1 Cr App R(s) 497 accessible www.kessler.co.uk, where the Court of Appeal stretched the word in a comparable way in order to uphold a confiscation order.

²⁰ The judge said: “... The recipient’s existing interest under the trust has to be left out of the calculation for the purpose of valuing the benefit ...”, 74 TC 139 at p.155.

²¹ This was stated (*obiter*) by the judge in *Cooper v Billingham* 74 TC 139 at p.155. It is the converse of the rule that the receipt of a life interest is not a benefit: see 29.4.2 (Receipt or sale of equitable interest).

- (2) The shareholder receives assets of the company on the liquidation of the company or on the redemption of its shares.

It is arguable that the shareholder does not receive a “benefit” since they merely receive the property to which they are entitled in the liquidation or redemption; or (which comes to the same thing) that the value of the “benefit” is nil. After all, a sale of the shares would not be a benefit, and is commercially similar. And no-one would say that there is a benefit for the purposes of employment income benefit in kind rules. On the other hand, the liquidation is analogous to becoming entitled under a trust. The better view, consistent with the scheme of the Act, is that the receipt of funds from the company is a “benefit” for the purposes of s.731. Similar points apply on the redemption of debt securities.

29.4.10 *Reimbursement of tax under statutory indemnity*

SP 5/92 provides:

8 The settlor’s right, under Para 6 Sch 5 TCGA, to reimbursement (or any payment in reimbursement) of tax paid under that Schedule is not regarded as creating an interest in a trust for the settlor under the provisions of [Chapter 5 part 5 ITTOIA] where the settlor, the settlor’s spouse, and any companies in which they are participators cannot otherwise benefit from the trust, eg where the only beneficiaries are the settlor’s children. Similarly, this statutory right to, or payment in, reimbursement is not regarded as bringing the settlor within the provisions of [s.633 ITTOIA, and the TAA provisions], nor as a capital payment for the purposes of s.97 TCGA.

9 Further, this statutory right is not regarded as a reservation of benefit for inheritance tax purposes; nor is a provision in the trust deed either requiring the trustees to recognise the settlor’s right to reimbursement under Para 6 Sch 5 TCGA or to reimburse the settlor. But where a settlor does not pursue the statutory right to reimbursement, the failure to exercise this right may give rise to an inheritance tax claim under s.3(3) IHTA, in which case the usual rules for lifetime transfers would apply.

10 A provision written into a settlement deed requiring the trustees to recognise the settlor’s right to reimbursement under Para 6 Sch 5 TCGA, or to reimburse the settlor, is not, of itself, regarded as giving the settlor an interest in the settlement for the purposes of Sch 5, nor as bringing into play the provisions of [s.624 ITTOIA, and the TAA Provisions].

HMRC have suggested that this does not apply if reimbursement is made before the settlor has paid the tax for which they need reimbursement. But it is submitted that there is never a benefit (or the value of the benefit is nil) when trustees pay a sum to a settlor in a *bona fide* settlement of a claim or prospective claim for reimbursement.²²

29.4.11 *Benefit from trust/company under court order in divorce proceedings*

A court sometimes orders a trust or company within s.731 to transfer property to the spouse (“W”) of the settlor/principal beneficiary (“H”). Assume that the parties are acting at arm’s length, which will normally be the case. Is this a benefit?

It is important to understand the family law background, as to which see 10.29.1 (Is a transfer on divorce made for “consideration”?).

If there were a tripartite agreement whereby the trust transfers assets to W in consideration for W giving up a claim against H, then the transfer from a trust to W would not be a benefit to W (who gives consideration) but it would be a benefit to H.

If the transfer is under a court order, including a consent order or Tomlin order, HMRC accept there is no consideration for it. Nevertheless it is suggested there is no benefit to W (or the value of the benefit is nil). Even though there is no consideration (a contract law concept) W does not gain anything. She merely receives what the court finds she is entitled to. For similar reasons H does not receive any benefit from the transfer either. The scheme of the legislation does not require “benefit” to be given an extended meaning. If (contrary to my view) there is a benefit, the benefit is not received as a result of the transfer and associated operations. There is a third argument if needed. The court only has power to make an order against H. It has no power to make an order against the trust.²³ In making the order, the court is effectively deciding that the trust or company within s.731 does not exist. On that basis it is impossible for there to be a charge under s.731 (or under s.87 TCGA).

22 In practice this is an issue for s.87 but not for s.731 (because the settlor will be the transferor and qualify for the transferor’s s.731 defence in any event). For other issues relating to reimbursement, see 29.21 (Relevant income used to pay expenses); 75.21 (Failure to exercise right of reimbursement).

23 There is a power to vary nuptial settlements, but I assume that power is not exercised.

If this were wrong the benefit is as much a benefit to H as a benefit to W; the fact that it is unclear which of H or W receives the benefit strongly suggests there is no benefit to either H or W.

29.4.12 *Payment of IHT*

No individual receives a benefit when trustees pay IHT charges on the trust. This is the case for the IHT 10-year charges and the IHT charges on the death of a life tenant with an estate, but it is necessary to consider them separately:

- (1) The IHT 10-year charges are payable by the trustees of the settlement concerned: s.201(1)(a) IHTA.

Beneficiaries²⁴ who receive capital payments are also liable for the IHT, but:

- (a) They have a right to recover from the trust fund: s.212 IHTA.
- (b) Also they are only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

Accordingly the payment of IHT 10-year charges by the trustees (or by anyone else) is not a benefit to any individual beneficiary.

This is so even if that beneficiary was (secondarily) liable for the tax under s.201(1).

- (2) The IHT charge on the termination of an estate (during the life of the life tenant or on the death of a life tenant) is likewise payable by the trustees of the settlement concerned: s.201(1)(a) IHTA.²⁵ But the same points apply:

- (a) The life tenant has a right to recover from the trust fund: s.212 IHTA.
- (b) The life tenant is only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

Accordingly the payment of IHT by the trustees (or by anyone else) is not a benefit to the life tenant. It cannot be a benefit to be relieved of a secondary liability of this kind, where one has an effective right of indemnity. Further, in the case of a wide common form trust, even if the class of beneficiaries as a whole may be said to receive a benefit, no individual receives a quantifiable benefit.

24 For non resident trusts, settlors are also liable.

25 In this case the life tenant is also liable for the IHT, under s.201(1)(b) IHTA.

29.4.13 Moral, sentimental and other benefits difficult to quantify

The word “benefit” is used with two distinct meanings, a narrow meaning and a wide meaning:

- (1) *Financial advantage only* In the narrow sense, “benefit” means a benefit which is financial and quantifiable. In this sense it is not a “benefit”, say, to a parent to pay their children's school fees.
- (2) *Non-financial benefit also* In the wide sense, “benefit” includes not only financial advantage, but also non-financial advantages, ie something which confers some mental satisfaction, which meet some perceived moral obligation, or which may be described as indirect or intangible. In this sense (only):
 - (a) it is for the benefit of a person to make a contribution to a charity which that person wishes to support; and
 - (b) it is for the benefit of a parent to pay their children's school fees (assuming the parent wants the children to be privately educated); and it is for the benefit of a parent to provide a fund for the benefit of their children (assuming the parent wishes to see their children financially secure).

The context must decide which meaning is applicable.

In tax legislation the narrow meaning is normal and the wide meaning is exceptional. For instance, the word “benefit” in the context of s.624 ITTOIA or s.86 TCGA (settlor-interested trusts), or the IHT gift with reservation provision, refers to financial benefits only. No-one has ever suggested that a payment for a person's minor children is a “benefit” to the parent, so as to bring those sections into application, though one would normally expect the parent to be pleased by the payment.²⁶

In the trust law context of common form powers of advancement or appointment, such as a power to apply for the advancement or “benefit” of a beneficiary, the word “benefit” has the wide meaning. Thus it is in principle for the benefit of a beneficiary to make a payment to a charity which he wishes to support.²⁷ Such a payment is not a benefit to the beneficiary for the purposes of s.731 or s.87. There is no contradiction in

26 If it were a benefit to one parent, it would similarly be a benefit to the other parent, and indeed grandparents godparents and family friends; that can hardly be right.

27 The leading case is *Re Clore* [1966] 1 WLR 955; see Kessler & Sartin, *Drafting Trusts & Will Trusts* (10th ed, 2010) para 11.11 (Power of advancement used to create new trusts).

those two propositions since the word benefit is used in two different senses.

This is clear on principle, and does not need authority, but for completeness, the Tribunal took this view in *Burton v HMRC*:

[60] ‘Benefit’ in s 97(5)(b) [TCGA] must be construed in the context of these taxing provisions rather than for the purpose of deciding the validity of an advancement or appointment under powers contained in a settlement. The legislation forms a detailed self-contained code to impose a tax charge on capital payments received by a beneficiary. This requires the benefit received or treated as received to be identifiable and quantifiable if there is to be sufficient certainty to impose a tax charge for any particular year of assessment....

[62] The wider concept of benefit is difficult to apply in the context of s 87 in a way that the concept of a benefit which is identifiable and quantifiable is not. For example, a gift to charity by the trustees of a settlement may not give rise to a charge to tax on the trustees so as to create trust gains, but has been held to be for the benefit of a beneficiary as regards validity as it discharges a moral obligation (*Re Clore ...* [1966] 1 WLR 955). The beneficiary is surely not chargeable in those circumstances under s 87... What has been received or treated as received in those circumstances by the beneficiary for tax purposes notwithstanding its validity as being for the benefit of the beneficiary? Nothing in the sense of a capital payment received other than possibly a moral satisfaction has materially benefited the beneficiary such that a tax charge can be imposed in respect of it....²⁸

Burton concerned a s86 flip-flop scheme.²⁹ HMRC argued that the beneficiary received a benefit of a very subtle nature: the avoidance of a CGT liability under s.86 on a disposal anticipated in the following tax year. So this was not a case of mental satisfaction benefit, though it was a case of a benefit whose value was difficult or impossible to quantify. The two-judge Tribunal disagreed on whether that was a “benefit” at all, but both judges agreed that if it were, the value of the benefit *in the tax year* was nil, so there was no s.87 charge.³⁰ But nothing like these facts is ever likely to recur; so it is not necessary to consider this aspect further.

28 *Burton v HMRC* [2009] SFTD 682; Judge Wallace took a similar view at [44].

29 See 49.1 (Flip-flop schemes).

30 HMRC’s argument that the benefit was an outright payment was rightly rejected.

29.4.14 *Payment of school/university fees*

Suppose trustees pay school fees for an individual's children in circumstances where the parent has no obligation to pay the fees. The children receive a benefit from the trust. The parent merely receives an intangible, non-financial advantage (if they regard the education with approval). We have already noted that this is not a "benefit" for tax purposes.

Suppose trustees pay school fees in circumstances where the parent has a family law obligation to meet the fees (such as may arise on a divorce or in other family law proceedings). It might be said that the parent receives a benefit (being relieved of legal obligation). However it is considered that the benefit is outside the scope of s.731 because it is merely incidental.³¹

Suppose trustees pay school fees in circumstances where a parent (or both parents) are under a contractual obligation to pay the school fees (ie the parent has entered into the contract with the school). The position here depends on the facts:

- (1) It may be that the parent is entitled to reimbursement from the trustees (eg if the parent entered into the contract at the request of the trustees and on terms that the trustees will meet the fees, or as agent for the trustees). In that case the trustees provide the benefit to the children and the parent does not receive a benefit from the reimbursement.³² It does not matter that the school are not party to the arrangement (eg the parent may be acting as agent for an undisclosed principal).
- (2) On the other hand, the position may be that the trustees are voluntarily meeting a liability of the parent; in that case, the parent is providing the benefit to the child, and the trustees are providing a benefit to the parent.

In practice (assuming it is desired to arrange that the benefit is received by the child, not the parent) it is recommended that the contract should be between the trustees and the school, or (if that is not desired) there should be an agency agreement between the trustees and the parent,

31 Similar issues arise in relation to a settlor exclusion clause which prevents trustees from applying property for the "benefit" of the settlor, and the authorities are reviewed in Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010), para 13.12 (What does a settlor exclusion clause cover?).

32 Contrast 29.4.10 (Reimbursement of tax under statutory indemnity).

Then the position should be clear.

If a parent is the settlor, s.629 ITTOIA needs consideration.

See too App 5.1 (Students).

29.4.15 *Use of house or chattels*

Suppose a house (or chattels) is provided to a life tenant who then allows their spouse (or partner or children) to live there (and to enjoy the chattels). The same analysis applies. The indirect benefit which the spouse (or partner or children) receive is not a “benefit” for tax purposes, or, alternatively, the benefit is disregarded as merely incidental.

29.4.16 *“Benefit” provided in breach of trust*

Suppose trustees transfer an asset to a person in breach of trust. In principle the recipient holds the asset on constructive trust for the trustees, so the transfer is not a benefit, or (even if it were a benefit) the value of the benefit is nil.

While the context may show that the word benefit is (mis)used to include a transfer of an asset which the transferee is required to return to the transferor,³³ that is not the case here.

It is possible for an act which is a breach of trust to confer a benefit on the recipient, eg if trustees allow their claim against the recipient to become statute barred.

Trustees may confer a benefit in breach of trust (without transferring an asset) eg allowing an individual who is not a beneficiary to occupy trust property. Whether that confers a benefit on the individual depends on whether the trustees have a claim against the individual to recover the value of the benefit.

Thus whether an act in breach of trust constitutes a benefit requires an examination of the rights of the parties; it cannot be answered yes or no as a general proposition.

33 An example is *Venables v Hornby* 75 TC 553 CA at [26]. The point was not considered on appeal.

29.5 Who is the recipient of a benefit?

It is important to identify the recipient of a benefit because the individual who receives the benefit is the one who is taxable. It is especially important where some beneficiaries are and others are not UK resident or domiciled, because then the identity of the recipient may affect not only who pays the tax but whether any tax is payable at all. In particular, where a married or unmarried couple of mixed domicile are both beneficiaries under a trust, there is in principle scope for tax saving by arranging that the benefit is received by the non-domiciled beneficiary (and so can qualify for the remittance basis). The documentation in these circumstances is very important.

For the purposes of s.87 TCGA charge, the concept of “receipt” is explained by s.97(5) TCGA.³⁴ There is no statutory equivalent for s.731 but it is suggested that the same rules apply: s.97(5) merely states the natural meaning of “receipt”.

As the discussion of school fees above illustrates, the question of who receives a benefit may overlap with the question of whether there is a benefit at all.

29.6 Valuation of benefits

The amount of s.731 income depends on the “amount or value” of the benefit: see step 1 of s.733 discussed 29.12.2 (Step 1: Total Benefits.) “Amount” refers to cash benefits and value refers to non-cash benefits.

The amount of s.87 gains depends on the amount of the capital payment and s.97(4) TCGA provides:

For the purposes of sections 86A to 96 and Schedule 4C the amount of
[a] a capital payment made by way of loan, and
[b] of any other capital payment which is not an outright payment of money,
shall be taken to be equal to the value of the benefit conferred by it.

In this section I discuss the valuation of benefits for the purposes of s.731 and for the purposes of s.87 TCGA as the issues are (more or less) the same.

³⁴ See 48.7 (Receipt from the trustees).

Arguments that the value of the benefit is nil tend to overlap with arguments that there is no benefit at all, though the points are conceptually distinguishable.

There are no statutory valuation rules for s.731 or for s.87.³⁵ Lord Reid rightly says:

“Value” is an elusive word: it may mean market value, it may mean value in money to the owner, or it may have other meanings like the value of the work necessary to produce it, or even sentimental value.³⁶

In *IRC v Botnar* (Supplementary Special Commissioners Decision at p.262) the Special Commissioners discuss the valuation of living accommodation provided by a trust. This is for the purposes of what is now s.724(2) ITA (enjoyment condition C) but the same applies for the purposes of s.731 and s.87. They say:

28. It seems to us that the whole of the value of a non-convertible benefit should, in the absence of any other objective means of valuation, be measured by reference to what it would have cost the individual receiving it. ... When measuring what benefit an individual receives it is not in our view relevant to ask whether he would have purchased the benefit himself. If that were the test a penurious individual receiving a non-money benefit under s.742(2)(c) would escape tax however substantial the benefit since he could not have paid for it.

29. The measurement of the benefit by reference to what it would have cost the individual will take account of the terms on which it was provided. In this case although nothing was recording in writing, there is a clear inference that the use of the property was provided on the footing that Mr and Mrs Botnar bore the recurrent outgoings.

30. It may be that it will not be easy for a valuer to assess what the cost of a benefit such as this would have been since it is wholly hypothetical there being no market for such benefits. However, it seems to us that one approach may be to take the open market rental and to adjust this by reference to the lack of security of tenure, non-assignability and outgoings born by Mr and Mrs Botnar and any other special factors.

35 Contrast the elaborate valuation rules for employment-related benefits; this is another manifestation of the patchwork nature of IT.

36 *Heaton v Bell* 46 TC 211 at p.246.

Cooper v Billingham touches on the valuation of interest free loans:

[Counsel for the taxpayer] argued that the value of the benefit conferred as required for the purposes of s.97(4) would vary according to the circumstances of the borrower, for example how creditworthy he might be and therefore his ability to borrow at better or worse rates on the market, and that those circumstances might differ from time to time. That may be true and could in theory cause difficulties of qualification in a particular case.³⁷

However the status of the borrower as life tenant is disregarded in determining the existence or valuation of the benefit. This is not stated expressly but follows from the scheme of the act.³⁸ There is not much point in having a charge on benefits if interest-free loans are untaxed.

29.7 Benefit causation condition

The third fundamental s.732 condition is the benefit causation condition. Section 732(1) ITA provides:

This section applies if ...

- (c) the benefit is provided out of assets which are available for the purpose as a result of—
 - (i) the transfer, or
 - (ii) one or more associated operations ...

There are two alternative conditions here:

- (i) the benefit is provided out of assets which are available for the purpose as a result of the transfer; or
- (ii) benefit is provided out of assets which are available for the purpose as a result of associated operations.

I refer to these as benefit causation conditions (i) and (ii). They are comparable to the relevant transfer causation conditions. Thus, not every benefit that an individual receives falls within s.731.

Contrast the s.87 charge which applies where a beneficiary receives a benefit directly or indirectly from the trustees. The wording is different

³⁷ 74 TC at p.155.

³⁸ 74 TC at p.154F. The reasoning was upheld by the Court of Appeal.

but the concept is similar.³⁹

29.7.1 *Benefit to B1 used by B1 to benefit B2*

Suppose:

- (1) A discretionary trust within s.731 has accumulated relevant income.
- (2) In 1970, a beneficiary ("B1") receives a trust asset ("B1's asset"). Although B1 receives a benefit assume B1 does not pay tax under s.731 because he is non-resident, or qualifies for the s.731 remittance basis.⁴⁰ This seems on a simple reading to be an associated operation (in relation to the transfer of assets to the trust).
- (3) In 2000 B1 (independently and not as part of a prior arrangement) gives the asset to another beneficiary⁴¹ ("B2") who is UK resident. B2 has received a benefit. Benefit causation condition (i) is not satisfied. However, it seems at first sight that benefit causation condition (ii) is satisfied, so B2 is at first sight subject to tax under s.731. This clearly cannot be right; but why not? It is necessarily part of the scheme of s.731 that when one beneficiary ("B1") receives a benefit, and uses the benefit to benefit another ("B2") only the first benefit counts. Otherwise what should be regarded in economic reality as a single benefit may give rise to a series of tax charges as it passes from one beneficiary to another and to another.⁴² But why is this the case? The best answer is that the operations are not associated. Mere historic association is not enough. These must be something more.⁴³ It is suggested that the principles to apply are those of a "clean break" test.⁴⁴

Consider a trust where the settlor ("S") is a beneficiary and the settlor

39 See 48.7.1 (Indirect receipt from trustees).

40 Although strictly the position of B2 is the same even if B1 is taxed on B1's benefit, either as a capital benefit under s.731 or as an income benefit under ITTOIA.

41 If B1 transfers the asset to a person ("C") who is not a beneficiary of the trust (in the sense that trust income cannot be used to benefit C) then C cannot be subject to tax under s.731 as there is no relevant income in relation to C. But in a standard form discretionary trust there is a wide power to add beneficiaries; so trust income is relevant income in relation to every person in the world (whether or not they are specifically identified as "Beneficiaries" in the trust deed).

42 Assume there is sufficient relevant income.

43 The argument would be the same as in 27.11 (Person abroad receives income as indirect consequence of transfer).

44 See 75.4 (Gift from A to B followed by gift to trust by B).

wishes to make a payment to another beneficiary (“B”). A direct payment from the trustees to B may be within the scope of s.731. In that case the solution may be to make regular payments to S who may subsequently make a gift to B, but this can only succeed if the gift by S is genuinely independent, which may not be easy to arrange.

29.7.2 *Transfer between trusts*

Suppose:

- (1) A trust (“trust 1”) within s.731 has accumulated relevant income.
- (2) Trust 1 transfers funds (“the transferred funds”) to a new UK trust on similar terms (“trust 2”).
- (3) A beneficiary (“B”) receives a benefit from trust 2 out of the transferred funds.

The transfer from trust 1 to trust 2 is an operation associated with the earlier transfer to trust A.⁴⁵ B has received a benefit and the benefit is provided out of assets which are available as a result of the transfer and the associated operation. So B is taxed under s.731. The benefit causation condition is satisfied.

Suppose trust 2 was an established trust with a trust fund (“fund 2”). If B receives a benefit from fund 2 B is not taxable under s.731 because that fund is not available as a result of the transfer of assets to trust 1.

It follows that a transfer between settlements will not in principle avoid s.731 charge. There is no reason why it should (except a misconceived analogy with s.90 TCGA).

29.8 **Benefit causation condition: two transfers of assets**

- (1) A settlor by a single disposition transfers assets to a trust within s.731.
- (2) Part of the trust fund is invested in assets which yield relevant income.
- (3) Another part of the trust fund consists of a house occupied rent-free by B.

B pays tax on the benefit by reference to the relevant income. By contrast, suppose:

- (1) A settlor by *two* separate transfers creates *two* trusts within s.731:

⁴⁵ The transfer between trusts is not a clean break. After all, trustees are expected to pay close attention to the wishes of the settlor, and in doing so they are merely filling in the blanks left by the settlor: see *Muir v Muir* [1943] AC 468.

- (a) a trust which holds income-producing assets and accumulates relevant income; and
- (b) a trust which holds the family home.

(2) B enjoys the benefit of free occupation in the home.

B is not subject to tax under s.731 as there is no relevant income in relation to this benefit. Thus the use of two trusts may avoid a tax charge under s.731 which would have arisen if there were one.

Indeed, it is not necessary to use two trusts. The same applies if there are two separate transfers of assets to one trust.

29.9 Transferor's s.731 defence

The fourth fundamental s.732 condition is the transferor's s.731 defence. Section 732(1) ITA provides:

This section applies if—...

- (d) [i] the individual is not liable to income tax under section 720 or 727 by reference to the transfer
- [ii] and would not be so liable if the effect of sections 726 and 730 were ignored ...

This is sensible. There is no need to apply s.731 to a transferor to whom s.720 applies. The application of s.720 gives HMRC all they should need.

Section 732(1)(d)[ii] makes clear that this defence applies to a transferor who is a remittance basis taxpayer even though the s.720 income is (un)taxed under the s.720 remittance basis.⁴⁶ Section 732(1)(d)[ii] is only for avoidance of doubt, and the position would be the same if those words were omitted.

29.9.1 *Transferor not ordinarily resident when transfer made; pre-1996 income*

It has never been a requirement of s.731 that the transferor was ordinarily resident at the time of the transfer, but this was a requirement of s.720 until 1996.⁴⁷

RI 201 provides:

⁴⁶ See 28.14 (Section 720 remittance basis).

⁴⁷ See 28.5.2 (Transferor not ordinarily resident when transfer made).

Similarly, a transferor of assets who is outside the charge to tax under Section 739 ICTA [now s.720 ITA] in respect of income arising before 26 November 1996 through being not ordinarily resident in the UK at the time of the transfer, is not assessed under [what is now s.731 ITA].

This is looking at a transferor “T” (wherever domiciled) who:

- (1) makes a transfer of assets before 26 November 1996;
- (2) is not UK ordinarily resident when T made the transfer;
- (3) later becomes UK ordinarily resident.

T was not taxable under s.720 until 26 November 1996. I refer to income arising before that date as “pre-1996 income”. If T receives a benefit after 26 November 1996⁴⁸ T is not taxable under s.731. This is right because the transferor’s s.731 defence does not apply to *income* liable to tax under s.720. It applies to an *individual* liable to tax under s.720. In the example, T (once ordinarily resident and after 26 November 1996) becomes an individual who is “liable to tax under s.720”. This is something of a windfall for T, but of course non-transferors may be taxed as the pre-1996 income is relevant income.

29.9.2 *Transferor not ordinarily resident at other times*

RI 201 does not address the situation where T is outside the scope of s.720 only because T is not ordinarily resident for a period. Suppose:

- (1) T is ordinarily resident when T makes the transfer;
- (2) T is non-resident for a period (“the non-resident period”);
- (3) T returns to the UK.

The reasoning above shows that on these facts T is also outside s.731; T qualifies for the transferor’s s.731 defence in relation to income of the non-resident period as well as the income arising while resident.

29.9.3 *Spouse of transferor*

Section 714(4) ITA provides:

In this Chapter references to individuals include their spouses or civil partners.

⁴⁸ I need not now consider the position if the benefit was received before 26 November 1996 but the result was probably the same.

Accordingly the spouse/civil partner of the transferor also qualifies for the transferor's s.731 defence. This only applies during the life of the transferor as a former spouse/civil partner is not a "spouse" or a "civil partner".⁴⁹

29.10 S.731 capital condition

The fifth fundamental s.732 condition is (in my terminology) the s.731 capital condition. Section 732(1) ITA provides:

This section applies if ...

- (e) the individual is not liable⁵⁰ to income tax on the amount or value of the benefit (apart from section 731).

This is sensible. There is no need to apply s.731 to a benefit liable to IT. The IT liability is all that HMRC should need.

29.10.1 *Benefit (un)taxed under remittance basis*

For this purpose a remittance basis taxpayer is "liable" to income tax on unremitted foreign income.⁵¹ In particular, an income receipt from a trust is taxed (if at all) under general principles⁵² and not under s.731.

This question arises because the s.731 remittance basis is more limited than the ordinary ITA remittance basis. For instance, suppose:

- (1) A discretionary trust within s.731 receives UK source income (or both UK and foreign source income).

49 See App 1.2 (Meaning of "spouse") and App 1.3 (Meaning of "civil partner").

50 The word in the pre-ITA legislation was "chargeable" not "liable" but the change has not altered (and has perhaps clarified) the position.

51 This might not seem to accord with the natural meaning of "liable"; but it is consistent with the well established rule that pension schemes and charities are "liable" to tax for the purposes of DTAs even though they qualify for pension scheme or charity exemptions; see Kessler & Brown *Taxation of Charities and Non-Profit Organisations*, (8th ed., 2011), para 15.2.2 (Liable to tax) (online version www.taxationofcharities.co.uk). *Stonor v IRC* [2001] STC (SCD) 199 might be cited against this view but a Special Commissioners decision on other provisions, arguably obiter, and not fully argued, does not count for much. This view is also consistent with the rule that unremitted foreign income is "chargeable" to IT; see 48.6.1 (Definition of capital payment).

52 See 24.3 (Tier 3: Discretionary income payment: charge on beneficiary).

(2) A remittance basis taxpayer (“B”) receives income (“unremitted foreign trust income”) from the trust.

B is taxable on the unremitted foreign trust income on the ITA remittance basis but assume the income is not remitted, so no tax is due. Can HMRC argue that B is subject to tax on the unremitted foreign trust income under s.731?⁵³ The answer is, no, because B is “liable” to IT on the benefit. By contrast, if B had received capital instead of income from the same trust, B would have been subject to tax on the benefit under s.731!

Of course, the word “liable” (like all words) takes its meaning from the context. So perhaps here HMRC may argue that unremitted foreign income is not “liable” to income tax, for the purposes of the s.731 capital condition? There is no good reason to construe the word in that wider way. This result is consistent with the rule that the transferor’s s.731 defence applies even to income (un)taxed on the remittance basis.⁵⁴ Anti-avoidance provisions, like hypotheses, should not be multiplied unnecessarily.

29.11 Is a benefit within s.731 a capital payment?

The definition of “capital payment” for s.87 purposes is discussed in 48.6 (Capital payment). For present purposes the relevant part of the definition is that a capital payment is any payment “which is not chargeable to income tax on the recipient”.

In the following discussion “**a non-capital payment**” is a payment which is not a capital payment.

29.11.1 *Benefit giving rise to s.731 charge in year of receipt*

The pre-ITA position was straightforward. Section 740 ICTA was, I think,

53 The s.731 remittance basis is not in point if the benefit relates to UK source relevant income: see 29.34 (Section 731 remittance basis).

54 See 29.9 (Transferor’s s.731 defence). A further objection to this HMRC argument is that there may be a double charge to tax:

(1) Tax under s.731 on receipt of the unremitted foreign trust income.

(2) Tax under general principles when the foreign trust income is later remitted to the UK.

Arguably, double counting relief applies: see 30.6 (Double-counting relief). But there is no provision allowing tax paid under s.731 to be reclaimed.

a tax on the benefit.⁵⁵ If a person received a benefit which was subject to tax in the year of receipt, under s.740 (ie assume there was relevant income) then the benefit was a non-capital payment for CGT purposes.

It is not immediately obvious that the position is the same from 2007/08. For s.731 is not expressed as a charge on the benefit. It appears at first sight to be a charge on fictional, deemed income: the amount or value of the benefit is merely an element in the computation of the amount of the s.731 income. However it cannot be the case that the same benefit gives rise to CGT on the benefit and deemed income on an amount equal to the benefit. A strained construction is needed to avoid absurdity. There are two possible solutions:

- (1) Either (contrary to first appearances) s.731 is in fact a charge on benefits; or
- (2) The reference (in the definition of capital payment) to a payment which is “chargeable to IT” should be read as including a benefit giving rise to deemed income.

Section 97(3) TCGA (see below) adopts the first view and so does s.734(1)(c) ITA.⁵⁶ Ultimately it makes no difference for present purposes which solution one adopts, but the better view is that s.731 is a tax on the benefit.

29.11.2 *Benefit matched to relevant income after year of receipt*

The pre-ITA position was straightforward. In the absence of express provision, a benefit which is not taxable under s.740 ICTA only for lack of relevant income might arguably have been a non-capital payment. But this argument was ruled out by s.97(3) TCGA. For convenience I set out the text of s.97(3) indicating the ITA amendments in track-change format:

The fact that the whole or part of a benefit is by virtue of ~~section 740(2)(b) of the Taxes Act~~ section 733 of ITA 2007 treated as the

⁵⁵ Section 740(2) ICTA provided:

“(2) ... the amount or value of any such benefit as is mentioned in subsection (1) above, if not otherwise chargeable to income tax in the hands of the recipient, shall -
(a) to the extent to which it falls within the amount of relevant income of years of assessment up to and including the year of assessment in which the benefit is received, be treated for all the purposes of the Income Tax Acts as the income of the individual for that year...”

⁵⁶ See 29.13 (Section 733 computation when benefit subject to CGT).

recipient's income for a year of assessment after that in which it is received—

- (a) shall not prevent the benefit or that part of it being treated for the purposes of sections 86A to 96 and Schedule 4C as a capital payment in relation to any year of assessment earlier than that in which it is treated as his income; but
- (b) shall preclude its being treated for those purposes as a capital payment in relation to that or any later year of assessment.

Post ITA this wording is not apt because under s.731 (on a first reading) a benefit is not “treated as the recipient’s income”. Section 731 is a charge on deemed income. But a strained construction is required to give effect to the obvious intention, that a benefit outside s.731 (for lack of relevant income) is a capital payment for CGT and it is considered that s.731 should be regarded as a tax on the benefit.

Thus if:

- (1) a benefit is conferred,
 - (2) the benefit is not subject to s.731 in year of receipt for lack of relevant income
- the benefit can be taxed as a capital payment in year of receipt. If:
- (3) the benefit is not subject to s.87 in year of receipt (for lack of s.2(2) gains) the s.731 charge in the following year has priority over the s.87 charge in that year; and so on.

29.11.3 *Benefit where s.731 remittance basis applies*

A benefit which falls within s.731 but qualifies for the s.731 remittance basis is taxed on the remittance basis, but is nevertheless “chargeable” to tax, so it is a non-capital payment. HMRC agree. Residence and Domicile: FAQ provides:

Interrelation between s727 or s731 ITA and s87

Q Could it be clarified that where a payment has been made - such as one under s731 which has attracted relevant income but has been protected from tax by non remittance - such a payment will not be regarded as a capital payment for s87 purposes?

A Where a payment (benefit) results in an amount becoming taxable by virtue of s731 ITA 2007, but the charge is deferred by a remittance basis claim because no relevant amount has at that time been remitted to the UK, the benefit will not also be taken into account for the purpose of s87

TCGA. Where the ‘capital receipt’ condition is met for the purpose of a charge under s727 ITA, even though the charge may be deferred by a remittance basis claim, nothing in that section alters the nature of any payment that triggered the charge.⁵⁷

By contrast, s.731 does not apply to a benefit which does not meet any of the five fundamental s.732 conditions (for instance a benefit to a transferor) and such a benefit is a capital payment.

29.11.4 *Benefit where motive defence applies*

The pre-2006 wording was that “Sections 739 and 740 *shall not apply*” where the motive defence applied, so it was clear that a benefit where the motive defence applied could be a capital payment.

Under the current legislation, where the motive defence applies, the individual who receives a benefit “is not *liable to income tax*” under the TAA provisions. It might be argued that the benefit is chargeable (even if the individual is not liable) but is considered that a benefit where the motive defence applies is a capital payment: it is not chargeable to IT within the meaning of the capital payment definition.

29.11.5 *Interaction with IHT exit charge income exemption*

Section 65(5) IHTA provides an exemption from the exit charge otherwise payable under s.65:

- (5) Tax shall not be charged under this section in respect of—
 - (b) a payment⁵⁸ which
 - [i] is (or will be) income of any person for any of the purposes of income tax or
 - [ii] would for any of those purposes be income of a person not resident in the UK if he were so resident ...

⁵⁷ www.hmrc.gov.uk/cnr/res-dom-faqs.htm The rubric to the FAQ explains: “Most of the FAQs have now been incorporated into the new guidance. Those that have not are reproduced below.”

⁵⁸ Section 63 IHTA provides:

“In this Chapter, unless the context otherwise requires ... “payment” includes a transfer of assets other than money”.

I refer to this as “**the exit charge income exemption**”.

If a UK ordinarily resident beneficiary receives a benefit which is taxable in the year of receipt under s.731, it is considered that this exemption applies. The benefit is income of the recipient.

Suppose:

- (1) at the time the benefit is received there is no relevant income; but
- (2) the person abroad receives relevant income later in the tax year.

It is considered that the exemption still applies: the benefit is still taxable. This explains why s.65(5) refers to a payment which is *or will be* income.

Similarly, if a UK resident beneficiary receives a capital payment which is subject to income tax under OIG s.87, the capital payment is subject to income tax and the exit charge income exemption applies.

This is consistent with the object of the relief, which is to prevent a double charge to IT and IHT.

What if the beneficiary is non-resident? If the trust has “OIG amounts” then the relief applies under s.65(5)(b)[ii] because the payment “would for IT purposes be income of a person not resident in the UK if he were so resident.” On the other hand if there is relevant income, but no OIG amounts, the relief does not apply. The payment would only be income of the person if they were *ordinarily* resident and it is not the case that the payment would be income if the person were merely “resident”.

29.12 Computation of charge

29.12.1 Introduction

In outline, where an individual receives a benefit, s.731 imposes a charge on the lesser of:

- (1) the value of the benefit; and
- (2) the amount of relevant income in relation to that individual.⁵⁹

However, the details are more complicated than this outline suggests.

The computation is governed by s.733 ITA. This is only a computation provision. It does not apply unless the five fundamental conditions of s.732 are met. I refer to the computation made under s.733 as “**the s.733 computation**”. There are six steps in the computation.

⁵⁹ Contrast s.720, which in general imposes a charge on the whole of the income accruing to the person abroad.

The rewrite legislation is defectively drafted (it reproduces some defects from the source legislation and adds some new ones). The task here is to find a construction which (if loose) will yield a workable scheme of taxation. It could serve as a case study as to how much obscurity can be found in step-based drafting, an innovation of the tax law rewrite in their search for clarity.⁶⁰

29.12.2 *Step 1: Total Benefits*

In order to follow Step 1, we need to read it in the context of s.732 and the opening words of s.733

732(1) This section applies if—

- (a) a relevant transfer occurs,
- (b) an individual who is ordinarily UK resident receives a *benefit*,
- (c) the *benefit* is provided out of assets which are available for the purpose as a result of—
 - (i) the transfer, or
 - (ii) one or more associated operations,
- (d) [in short - the individual is not the transferor]
- (e) the individual is not liable to income tax on the amount or value of the *benefit* (apart from section 731).

...

733(1) To find the amount (if any) of the income treated as arising under section 732(2) for any tax year in respect of *benefits provided as mentioned in section 732(1)(c)* take the following steps.

Step 1

Identify the amount or value of *such benefits* received by the individual [1] in the tax year and

[2] in any earlier tax years *in which section 732 has applied*.

The sum of those amounts and values is “the total benefits”.

I (slightly reluctantly) adopt the statutory terminology and refer to benefits within step 1 as “**Total Benefits**”. I refer to benefits within Step 1[1] as “**present year Total Benefits**” and benefits within [2] as “**earlier year Total Benefits**”.

There are two obscure references in Step 1:

60 See 48.10.7 (Commentary: step-based drafting).

- (1) Which benefits are counted as Total Benefits? One does not identify *all* benefits received by the individual, but only “such benefits”. The drafter has overlooked the basic rule that “such” ought only to be used when it refers to a clear antecedent.
- (a) On one view, “such benefits” refers back to the words in the first sentence of s.733(1): “benefits provided as mentioned in s.732(1)(c)”. So “such benefits” refers to all benefits which meet the benefit causation condition.
 - (b) On another view, “such benefits” refers back to s.732(1) which uses the word benefit three times. “Such benefits” means benefits in respect of which all five fundamental s.732 conditions are satisfied (not just the benefit causation condition).

The difference between the two views is, for instance, that on the first view an income-taxable benefit can count as “such benefits” and on the second view an income-taxable benefit cannot (because of the s.731 capital condition). Likewise, on the first view a benefit received by a non-resident can count as “such benefits” but on the second view it cannot (because of the ordinary residence condition).

The second view is to be preferred as it yields more sensible results.⁶¹

- (2) Which benefits from earlier years are Total Benefits? One does not identify *all such benefits* received by the individual, but only such benefits in tax years “in which s.732 has applied”. It is not of course enough that *section 732 applies*, for the section no doubt applies every year to some taxpayer or other. Section 732 must apply having regard to the circumstances of the transfer or the individual in the earlier year.

If this is right, the definition of “Total Benefits” can be expanded to mean the following:

[1] *Present year total benefits* must meet the following conditions (in order to be “such benefits”):

- (a) a relevant transfer has occurred
- (b) an individual who is ordinarily UK resident (“B”) receives a

61 If one adopted the first view one could avoid the problems which arise by a generous application of s.743 ITA (no duplication of charges) but it is better to avoid that solution since the relief depends on HMRC discretion.

- benefit in the present year
 - (c) the benefit is provided out of assets which are available for the purpose as a result of—
 - (i) the transfer, or
 - (ii) one or more associated operations,
 - (d) B is not the transferor; and
 - (e) B is not liable to income tax on the benefit (apart from section 731).
- [2] *earlier year benefits* must meet the following conditions (in order to be “such benefits” and to meet the requirement that s.732 applies in the year):
- (a) The relevant transfer has occurred
 - (b) B was ordinarily UK resident in the earlier year and received a benefit in the earlier year (“the earlier year benefit”).
 - (c) the earlier year benefit is provided out of assets which are available for the purpose as a result of -
 - (i) the same transfer as [1] (a) above, or
 - (ii) the same associated operations as [1] (c) above
 - (d) B is not the transferor, and
 - (e) B is not liable to income tax on the earlier year benefit (apart from section 731).

29.12.3 *Step 2: Total Untaxed Benefits*

“Total Untaxed Benefits” has a relatively commonsense definition. Step 2 provides:

Deduct from the total benefits the total amount of income treated as arising to the individual under section 732(2) for earlier tax years as a result of the relevant transfer or associated operations.
The result is “the total untaxed benefits”.

We need a label to describe the deduction as it is impossible to follow a discussion which refers more than once to “the total amount of income treated as arising to the individual under section 732(2) for earlier tax years as a result of the relevant transfer or associated operations”. I refer to the deduction as “**prior year s.731 income**”.

A straightforward example is if:

- (1) Year 1: B receives benefit £100.
- (2) Year 2: B receives benefit £100.

The Totals Benefit is $\pounds 100 + \pounds 100 = \pounds 200$. But assuming in year 1 B was treated as receiving $\pounds 100$ s.731 income, then the prior year s.731 income is deducted, so Total Untaxed Benefits are computed thus:

Total Benefits	£200
Prior year s.731 income	-£100
Total Untaxed Benefits	<u>£100</u>

Section 734 ITA provides for another deduction from Total Untaxed Benefit: since this only arises infrequently I deal with it separately below; see 29.13 (Section 733 computation when benefit subject to CGT).

29.12.4 *Steps 3 and 4: Relevant Income and Total Relevant Income*

Steps 3 and 4 concern relevant income and total relevant income, and are discussed as a separate topic below.

29.12.5 *Step 5: Available Relevant Income*

Step 5 provides:

Deduct from total relevant income—

- (a) the amount deducted at Step 2 [ie prior year s.731 income], and
- (b) any other amount which may not be taken into account because of section 743(1) and (2) (no duplication of charges).

The result is “the available relevant income”.

The deduction in Step 5(b) is discussed in 30.6 (Double-counting relief).

What is the reason for the deduction in Step 5(a)? ITA EN explains a double taxation problem in the pre-ITA law:

Section 740 of ICTA [now s.731 ITA] leaves several questions unanswered.

It provides that

- [a] if the relevant income exceeds the benefit, the amount or value of the benefit is chargeable to income tax in the individual’s hands,
- [b] but does not make provision about the treatment of the excess of the relevant income over that amount.
- [c] Taken literally and in isolation, section 740(2)(a) suggests that whenever a benefit is received the amount or value of the benefit

must be compared with *all* the relevant income that has arisen on or after 10 March 1981, regardless of whether the receipt of previous benefits has involved charges by reference to that income before.⁶²

For instance, if the relevant income is only £100, and T receives benefits of £100 annually, T would appear to be taxed each year on £100, so the relevant income in effect comes into charge again and again. I refer to this as “**the RI multiple counting problem**”. I confess I had not noticed the problem, but point [c] seems correct if one takes the words “literally and in isolation” (which is of course never the right approach to a statute).

The EN then give two independent reasons why no problem arose, that is, it identifies two pre-ITA solutions to the RI multiple counting problem:

But

[1] relevant income is defined as income that can directly or indirectly be used to provide a benefit in the tax year [ie in the year that the tax charge arises], and

[2] section 744(1) and (2)(c)⁶³ of ICTA [now s.743 ITA] prevent the same relevant income being taken into account more than once.

It is therefore considered that the *surplus* relevant income (*if it continues to be available*) has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits. Section 733 of this Act gives effect to this view by providing [only] for *surplus* relevant income to be carried forward.⁶⁴

Note that it is assumed in solution [1] that in order to identify the amount of relevant income, one asks whether income can be used to provide a benefit at the time the tax charge arises, (“if it continues to be available”) not at the time that the relevant income accrues.

Example 1: one beneficiary

Suppose a trust with Total Relevant Income of £200 and:

62 Section 740(2) ICTA provided so far as relevant:

“... the amount or value of any such benefit as is mentioned in subsection (1) above, ... shall— (a) to the extent to which it falls within the amount of relevant income of years of assessment up to and including the year of assessment in which the benefit is received, be treated for all the purposes of the Income Tax Acts as the income of the individual for that year”.

63 The original erroneously reads: (2)(b).

64 Change 1113, p.472; emphasis added.

(1) Year 1: B receives a benefit (£100) and £100 s.731 income. Assume the benefit is not paid out of relevant income.

(2) Year 2: B receives another benefit (£200).

The computation in year 2 goes as follows:

Step 1: The Total Benefits of B are £300.

Step 2: The Total Untaxed Benefits of B are computed thus:

Total Benefits	£300
Prior year s.731 income	- £100
<i>Total Untaxed Benefits:</i>	<u>£200</u>

Steps 3 and 4: The Total Relevant Income is £200.

Step 5: The Available Relevant Income is computed thus:

Total Relevant Income	£200
prior year s.731 income	- £100
<i>Available Relevant Income:</i>	<u>£100</u>

Step 6: the amount of s.731 income in year 2 is the lower of Total Untaxed Benefits and Available Relevant Income = £100.

That is fair and reasonable and tax law rewrite's solution to the RI multiple counting problem has worked.

Example 2: two beneficiaries

Now suppose a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731.

(2) Year 2: C (not B) receives a benefit (£200).

The computation for C in year 2 goes as follows:

Step 1: The Total Benefits of C are £200.

Step 2: The Total Untaxed Benefits of C are £200 (nothing is deducted).

Step 5: Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

Here the Step 5(a) deduction does not prevent double taxation. The tax law rewrite team have only partly solved the RI multiple counting problem which (on a literal reading and taken in isolation) they identified. They have solved the problem where the *same* beneficiary receives benefits in different years. They have not solved it where *different* beneficiaries receive benefits in different years. Why is C not taxed on £200?

C must fall back on one of the two pre-ITA solutions identified by the tax

law rewrite team:

- (1) that distributed income ceases to be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):
- (2) Step 5(b): double counting relief.

Solution (2) applies if the distribution to B did not consist of relevant income. It depends on HMRC discretion, but that was the position before the ITA rewrite, so nothing has changed.

Example 3: one beneficiary receives a distribution of relevant income

The second difficulty is that the rewrite team solution – a deduction for prior year s.731 income – does not link in with the first of the pre-ITA solutions to the RI multiple counting problem. Suppose a slight variant to example 1: a trust with Total Relevant Income of £200 and:

- (1) Year 1: B receives a benefit (£100) and £100 s.731 income. Assume the benefit is paid out of relevant income.⁶⁵
- (2) Year 2: B receives another benefit (£200).

The computation in year 2 goes as follows:

Step 1: The Total Benefits of B are £300.

Step 2: The Total Untaxed Benefits of B is computed thus:

Total Benefits	£300
Prior year s.731 income	- £100
<i>Total Untaxed Benefits:</i>	<u>£200</u>

Steps 3 and 4: The Total Relevant Income is £100 (because £100 has already been distributed and is not available to provide a benefit.)

Step 5: The Available Relevant Income appears to be:

Total Relevant Income	£100
prior year s.731 income	- £100
<i>Available Relevant Income:</i>	<u>£0??</u>

B should have £100 s.731 income in year 2, not £0! I think that the best solution is to say that where relevant income is distributed, no further deduction is allowed at Step 5, so there is no double deduction. Though this is reading a good deal into the provision.

⁶⁵ For instance, trust income is accumulated and then paid to the beneficiary as capital.

29.12.6 *Section 733 computation where s.731 remittance basis applies*

Where the s.731 remittance basis⁶⁶ applies, s.731 income is still treated as accruing to the foreign domiciled individual under s.731, even though not remitted. So the s.731 remittance basis does not prevent a deduction under Step 2 (and Step 5(a)) if applicable.

Suppose the facts of example 1 or 3 above, but the benefit which B received in year 1 was an unremitted foreign benefit which qualified for the s.731 remittance basis. The computations are exactly the same. Thus benefits to B within the s.731 remittance basis reduce available relevant income in relation to B (whether or not made out of relevant income) just as where the arising basis applies.

Suppose the facts are as in example 2 above, but the benefit which B received in year 1 was a foreign benefit which qualified for the s.731 remittance basis. There is as before no deduction under Step 2 or Step 5, but C must fall back on the two pre-ITA solutions to the RI multiple counting problem:

- (1) that distributed income ceases to be relevant income (because it ceases to be available); or (if relevant income is not distributed):
- (2) Step 5(b): double counting relief.

Solution (2) depends on HMRC discretion, but it is considered that the relief ought to apply to relieve C. Of course, B may not agree. Suppose a variant of example 2:

Example 4: two beneficiaries (one taxed on remittance basis)

Suppose a trust with Total Relevant Income of £200 and:

- (1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731. B is a remittance basis taxpayer and does not remit the benefit so no tax is due.
- (2) Year 2: C receives a benefit (£200).
- (3) Year 3: B receives the benefit in the UK.

The computation for C in year 2 is the same as example 2:

Step 1: The Total Benefits of C are £200.

Step 2: The Total Untaxed Benefits of C are £200 (nothing is deducted).

Step 5: Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

⁶⁶ See 29.34 (Section 731 remittance basis).

Is C taxed on £200? C must fall back on one of the two pre-ITA solutions identified by the tax law rewrite team:

- (1) that distributed income ceases to be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):
- (2) Step 5(b): double counting relief.

If the distribution to B did not consist of relevant income solution (2) is the only one available. It depends on HMRC discretion but it is considered that it ought to be allowed. It follows that C will be taxed in year 3. C may argue that B ought to be taxed and B's may be subject to tax remittance should be tax free, but that seems less "just and reasonable". That is consistent with the s.87 rules where a s.2(2) amount (trust gain) may be matched to a capital payment to a remittance basis taxpayer.

29.12.7 *Step 6: computation of charge*

We have at last reached the final step of the s.733 computation. Step 6 is as follows:

Compare the total untaxed benefits and the available relevant income. The amount of the income treated as arising under section 732(2) for any tax year is the total untaxed benefits unless the available relevant income is lower.

If the available relevant income is lower, it is the amount of income treated as so arising.

That is, the s.731 income is the lesser of:

- (1) Total Untaxed Benefits; and
- (2) Available Relevant Income.

29.12.8 *Section 733 computation: commentary*

The reader who has laboriously followed the text to this point will agree that s.733 needs to be rethought and rewritten.

29.13 **Section 733 computation when benefit subject to CGT**

Section 734 ITA provides:

Reduction in amount charged: previous capital gains tax charge

(1) This section applies if—

- (a) benefits provided as mentioned in section 732(1)(c) are received in a tax year,

That is, the benefit is in principle taxable under s.731.

- (b) for that tax year the whole or part of any benefits so provided is a capital payment to which section 87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 applies (chargeable gains: gains attributed to beneficiaries),

That is, the benefit is in principle taxable under s.87.

- (c) it is such a payment because the total untaxed benefits⁶⁷ exceed the available relevant income (see Step 6 in section 733(1)) and so it is not treated as income arising to the individual under section 732(2), and

That is, the benefit was not subject to income tax for lack of relevant income.

- (d) because of that capital payment chargeable gains are treated as accruing to the individual in that or a subsequent tax year under any of the provisions referred to in para (b).

The CGT charge applies under the rules set out in 29.11 (Is a benefit within s.731 a capital payment?).

(2) For any tax year after one in which such chargeable gains are so treated, the amount of income treated as arising to the individual under section 732(2) in respect of benefits provided as mentioned in section 732(1)(c) as a result of the transfer or operations in question is calculated as follows.

(3) The amount is calculated under section 733(1) as if the total untaxed benefits were reduced by the amount of those gains.

⁶⁷ Section 743(4) provides:

“In this section ‘the total untaxed benefits’ and ‘the available relevant income’ have the same meaning as in section 733(1) (see Steps 2 and 5).”

This ensures that a benefit charged under s.87 is not later also charged to IT.

29.14 “Relevant income”: definition

“Relevant income” is a central but perplexing concept. The absence of litigation on the subject is because HMRC have in practice generally applied the legislation in a way which leads to a sensible result.

Section 733(1) Step 3 provides the definition:

Step 3

Identify the amount of any income which—

- (a) arises in the tax year to a person abroad, and
- (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.

That amount is “the relevant income of the tax year” in relation to the individual and the tax year.

The condition in Step 3(a), income arising to a person abroad, is the same as in the transfer of asset conditions.⁶⁸

Strictly one should not use the term “relevant income” in the abstract. Relevant income can exist only *in relation to an individual*. There may be relevant income in relation to A which is not relevant income in relation to B (eg income of a discretionary trust under which A can benefit and B cannot). There may be relevant income in relation to anyone in the world (eg income of a discretionary trust with a power to benefit anyone in the world). But where the context is clear, one may refer to “relevant income” in isolation (leaving the words “in relation to the individual” and the identity of that individual to be inferred from the context).

The s.731 concept “relevant income” must not be confused with “relevant foreign income.”

29.15 Deemed income of person abroad

29.15.1 *Capital deemed to be income*

Although the statute refers to “income”, capital receipts of the person abroad are sometimes treated for tax purposes as income of the person

⁶⁸ See 27.5 (Income “becomes payable” to person abroad).

abroad, and such receipts can therefore be relevant income.⁶⁹

29.15.2 *Stock dividends and accrued income profits*

Suppose non-resident trustees receive a stock dividend from a UK company. In that case “income is *treated* as arising to the trustees”: see s.410(3) ITTOIA. The amount is deemed “income” for TAA purposes, but it is considered that it is not relevant income. The amount is fictional so one cannot say that it “can” be used for the benefit of any beneficiaries. The shares issued in the stock dividend can be used for that purpose, but they are not the same income. The distinction between a gain and an amount equal to the gain is one on which HMRC insist in a DTA context;⁷⁰ here the distinction between the actual stock dividend and the fictional income is similar but clearer.

The same point arises if a person abroad is treated as receiving AIP income. The amount is treated as income becoming payable to the person abroad for TAA purposes⁷¹ but it is considered that it is not relevant income. The amount is fictional so one cannot say that it “can” be used for the benefit of any beneficiaries. The proceeds of the AIP securities can be used for that purpose, but that is not the same income.

HMRC may argue that one should carry through the deeming:⁷² if the person abroad is treated as receiving income, the (deemed) income must be treated as if it can be used to benefit beneficiaries (even though it does not exist). If that were right, however, two difficulties would arise:

- (1) How would the rule that distributed income is not relevant income⁷³ operate in this context? In order to distribute the AIP income would it be necessary to distribute the entire proceeds of the transfer (sale) of the security? Perhaps the matter would be analogous to the DDS

69 See:

- (1) 27.13 (Capital receipts deemed to be income).
- (2) 32.6.2 (Non-resident company or institution).
- (3) 34.10 (OIG arising to non-resident trust).

70 See 55.2 (The characterisation issue).

71 See 35.15 (Transfer of assets abroad).

72 For the general approach to deeming provisions, see App 2.1 (Construction of deeming provisions).

73 See 29.22 (Relevant income of trust distributed as income in year it arises) to 29.26 (Distributed income: HMRC view).

scheme.⁷⁴ Then the only way to avoid relevant income by distribution would be to distribute the entire proceeds of the securities. Perhaps a division would be possible as it is under the mixed fund rules.⁷⁵

- (2) How does one deal with AIP loss relief? This tends to support the view that AIP income is not relevant income.

29.16 Is income of life tenant relevant income?

Consider an interest in possession trust: one where the trust income is payable to a beneficiary (“L”).

If L is UK domiciled and resident, the trust income is not relevant income because it does not meet the condition in Step 3(a). It does not arise to a person abroad.

If L is not UK domiciled then the condition in Step 3(a) is satisfied. Nevertheless, the trust income is not relevant income because it is distributed.⁷⁶

There is nothing surprising in this conclusion: there is no need for s.731 in these circumstances, and one would not expect it to apply. If it did apply there could be double taxation – L being taxed on the income L receives, and on other benefits (if L receives any) to the value of the relevant income.

29.17 Is trust income within s.624 relevant income?

One must consider UK resident and domiciled settlors separately from those who are non-resident or domiciled.

⁷⁴ See 36.12.1 (Section 731 ITA).

⁷⁵ See 35.9.2 (Mixed funds and separating income/capital: sale with accrued interest).

⁷⁶ See 29.22 (Relevant income of trust distributed as income in year it arises). Even if that were wrong:

- (1) The trust income is not relevant income in relation to L. One would not say in ordinary language that the trust income *can* be used for providing a benefit for L. The income *is* the property of L.
- (2) The trust income is not relevant income in relation to any other person. Since the income belongs to L, one cannot say that the income “can” be used to benefit anyone else. See 29.19 (Income which “can” be used to benefit another person).

29.17.1 *UK resident and domiciled settlor*

Suppose:

- (1) a non-resident discretionary trust within s.731;
 - (2) a UK resident and domiciled settlor (“S”) has an interest in the trust.
- All the trust income is within the scope of s.624 ITTOIA. Section 624 ITTOIA provides in such a case:

Income which arises under a settlement is treated for income tax purposes as the income of the settlor *and of the settlor alone ...*
(Emphasis added)

The trust income is not relevant income as it does not meet the condition in Step 3(a): the income is treated by s.624 as accruing to S, so it cannot be regarded as arising to a person abroad. This is so even if S (wrongly) fails to pay the tax due on the income.

29.17.2 *UK resident foreign domiciled settlor*

Now suppose:

- (1) a non-resident discretionary trust within s.731;
- (2) a UK resident but not UK domiciled settlor (“S”) has an interest in the trust; and
- (3) the trust income is actually subject to tax under s.624 ITTOIA (the s.624 remittance basis does not apply).⁷⁷

In this case the condition in Step 3(a) is satisfied since even applying s.624 the income is treated as accruing to S. However, it is considered that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which “can be used for providing a benefit” for anybody else. So the income is not relevant income.

The position is different if and to the extent that the income is within the s.624 remittance basis. Section 624 does not apply to income which qualifies for the s.624 remittance basis.⁷⁸ Accordingly the trust income can, in principle, be relevant income for s.731. What happens then if the

⁷⁷ This may be because there is UK source income, or foreign income is received in the UK, or S does not claim the remittance basis. See 26.5 (Section 624 remittance basis).

⁷⁸ See 26.5 (Section 624 remittance basis).

income is later remitted, so it becomes taxable on S under s.624? It is tentatively suggested that the income retrospectively ceases to be relevant income, so that tax paid under s.731 can be recovered by a beneficiary. In practice this could arise only in fairly unusual circumstances, eg where:

(1) Year 1

- (a) a beneficiary (“B”) receives a benefit;
- (b) foreign source income arises on which the settlor (“S”) is not subject to tax as the s.624 remittance basis applies. This is relevant income in relation to B, so B pays tax under s.731.

(2) Year 2: that income is remitted to the UK, so S pays tax under s.624. Where s.720 applies (as well as s.624) see 29.18 (Is income within s.720 relevant income?).

29.17.3 *Non-resident settlor*

Suppose now:

- (1) a non-resident discretionary trust within s.731; and
- (2) a non-resident settlor (“S”) has an interest in the trust.

Section 624 does not apply to foreign source trust income.⁷⁹ Accordingly foreign source income may in principle be relevant income.

Section 624 does apply to UK source income. Here too it is submitted that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which “can be used for providing a benefit” for anybody else. So UK source income is not relevant income.

29.18 Is income within s.720 relevant income?

The analysis is different if income falls within s.720 and not s.624 because the wording of the provisions is different.

29.18.1 *HMRC view*

ITA EN provides:

Where a non-UK domiciled individual transfers assets but is not

⁷⁹ See 26.7 (Non-resident settlor).

chargeable to tax under section 739 ICTA [now s.720 ITA] owing to section 743(3) ICTA [the s.720 remittance basis, now replaced by the somewhat different s.735 ITA], there is no bar in HMRC's view oao section 740 ICTA [now s.731] to others who did not themselves make the transfer but were beneficiaries of it. HMRC interpret section 732 ITA in the same way.⁸⁰

In HMRC's view the position (as in the s.624 case) depends on whether the s.720 remittance basis applies:

- (1) where the s.720 remittance basis applies, so the transferor is not taxed, the income of the person abroad is relevant income; but
- (2) where the s.720 remittance basis does not apply (so the transferor is taxed under s.720 on an arising basis) the income of the person abroad is not relevant income.

29.18.2 *Where the s.720 remittance basis applies*

At first sight, the application of the s.720 remittance basis does not disapply s.720: the transferor receives s.720 income even though not taxed on it, so it cannot be relevant income.

HMRC might respond that the s.720 income is different income from the income of the person abroad, but that view is to be rejected; see 55.5 (DT reliefs: section 720 ITA). It is suggested however that even though the income of the person abroad is deemed to accrue to the transferor, it also accrues to the person abroad. See *R v Dimsey & Allen* 74 TC 263.

What happens where the s.720 remittance applies and there is a subsequent remittance is an interesting question.

29.18.3 *Where the s.720 remittance basis does not apply*

If that is right, the only defence is s.743 ITA (double counting relief).⁸¹ This is surprising, because it is not clear who qualifies for the relief: the transferor or a beneficiary who receives a benefit. But it is difficult to construe the legislation any other way.

⁸⁰ See Change 105 in ITA EN Vol III, annex 1. The same point was made in the same words in RI 201.

⁸¹ See 30.6 (Double-counting relief).

29.19 Income which “can” be used to benefit another person

An essential feature of the definition of relevant income in relation to an individual is the condition in Step 3(b) that the income “can be used for providing a benefit” for the individual.

“Can”, like most common words, has a variety of meanings, but the meaning here must be:

Expressing a possible contingency; = May possibly.⁸²

29.19.1 *Income of individual*

Of course, any income “can” be used for the benefit of any individual in the world if it is received by a beneficial owner who so directs. That contingency must plainly be ignored or the definition does not work.⁸³

82 *Oxford English Dictionary*, 2nd ed. Another meaning of “can” is “to be able; to have the power, ability or capacity”. This meaning applies where one says that a *person* “can” do something. This meaning is not applicable here where the subject of “can” is the income. *Income* does not have any power, ability or capacity: only a *person* does. There is a fine discussion of *can* in Williams, *Tradition & Change in Legal English* (2005), at 2.8.

83 The issue is not so much the meaning of the word “can”: if income is paid to A it is obvious that it “can” (in the sense of “may possibly”) be paid to B if A so directs. The better way to put the issue is: which hypothetical contingencies should be taken into account in order to ask the question whether or not income “can” be used for providing a benefit?

The question is similar to the issue which arises for the purposes of the settlement provisions, whether income “may” be used to benefit the settlor “in any circumstances whatsoever”. These words do not include the possible circumstance that there may be “a mere voluntary application of income by a beneficiary to the settlor”: see *Glyn v IRC* 30 TC 321 at 329. A similar question arose in reverse in *Inglewood v IRC* [1983] STC 133. The question was whether one could say that a beneficiary “will” become entitled to an interest in possession: held that one should ignore the contingency that the beneficiary may not become entitled by virtue of the beneficiary voluntarily assigning the interest to another person.

Another way to reach this conclusion is to say that the income “can” be used to benefit the individual, but not “as a result of the relevant transfer or associated operations” (the application of the income by the beneficial owner not counting as an associated operation).

29.19.2 *Income received by company owned by individual*

Suppose an individual, T, transfers assets to a non-resident company all the shares of which T owns absolutely. Assume the transfer does not qualify for the motive defence. So long as T remains owner of the company, the income of the company is not relevant income in relation to any person (other than T⁸⁴).

For the position if T later gives the company to a trust, see 29.30 (Is income of company held by a trust relevant income?).

29.19.3 *Income of trust only payable to B on remote contingency*

Now consider this type of trust,⁸⁵ divided into two sub-funds:

- (1) A's sub-fund: income to be applied for the benefit of A or accumulated; capital to be paid to A at the age of 25; if A dies under 25, the share accrues to B's share.
- (2) B's sub-fund is held on similar terms: income to be applied for the benefit of B or accumulated; capital to B at 25 with accrual to A if B dies under 25.

Suppose income is accumulated on A's sub-fund. It is relevant income in relation to A. Is it relevant income in relation to B? It is payable to B only on the contingency that A dies under 25. It is suggested that this income is not relevant income in relation to B. One would not, in normal language, say that the income "can" be used to benefit B just because A may die under 25. The contingency is too remote.

If A dies under 25:

- (1) income of A's sub-fund arising after the death of A is (of course) relevant income in relation to B;
- (2) income of A's sub-fund arising before the death of A subsequently becomes relevant income in relation to B if the "timing" issue discussed below is correctly answered.

If this is correct, the concept here is not the same as in s.624 ITTOIA, where the issue is whether income "may become payable" to the settlor *in*

⁸⁴ Strictly the income of the company may be relevant income in relation to T, but T is not concerned with s.731 as T will qualify for the transferor's s.731 defence.

⁸⁵ This was quite a common form before the abolition of relief for Accumulation and Maintenance trusts in 2006.

any circumstances whatsoever.⁸⁶ Applying (as one should) a purposive approach, this is the fair and just result and consistent with the general scheme of s.731. A settlor or transferor has the opportunity to exclude themselves completely in a straightforward manner, and is taxed if they fail to do so. A beneficiary (not the settlor/transferor) does not have the same opportunity. To tax B on income of A's fund (on the facts of the above example) would not be just or fair.⁸⁷

29.19.4 *Income of discretionary trust*

Conversely, consider a common form discretionary trust. In principle, all trust income “can” (in the sense of “may possibly”) be used to benefit any beneficiary, if the trustees exercise their discretion, and that is a contingency which naturally should be taken into account. Trust income is relevant income in relation to all beneficiaries.

Suppose, however, the trustees (perhaps guided by a letter of wishes) regard the fund as divided into (say) two shares for separate families. If there is no practical possibility that more than one half of the income will be used for one particular beneficiary, there is a reasonable argument that only one half of the income is relevant income in relation to that beneficiary.

Trustees of a common form discretionary trust have power to benefit anyone in the world. However, in practice the trustees will wish to identify a more limited class, and it is arguable that trust income is not relevant income in relation to other (theoretically) potential beneficiaries.

29.20 **When does one ask?: the timing issue**

One must ask whether income “can” be applied for the benefit of an individual. *At what moment in time does one ask this question?*

86 See Williams, *op. cit.* p.139; *may* (compared with *can*) “tends to convey a more hypothetical degree of possibility”. It is reasonable to assume that the drafter of the transfer of assets provisions did not copy the language of the settlement provisions because a different result was intended.

87 Some support can be found in the discussion of “can” (albeit in a different context) in *Mandla v Dowell Lee* [1983] 2 AC 548 at p.565. A similar unfairness does arise for CGT under s.87 TCGA. However, it is possible to avoid that by transfers to another settlement.

- (1) It often happens that, at the moment it arises, income can be used to provide a benefit for a person, B, but at a later point in time it cannot be so used; for instance if income of a discretionary trust is:
 - (a) distributed to another individual (not B);
 - (b) transferred to another trust (under which B cannot benefit); or
 - (c) retained by the trustees, but on terms under which B cannot benefit; or
 - (d) used to pay trust expenses.
- (2) The converse also sometimes happens: at the moment it arises income cannot be used to provide a benefit for B, but at a later time it can be so used; for instance:
 - (a) if B is born after the income arises;
 - (b) if one share of a trust fund later accrues to another share (eg on the death of a beneficiary);⁸⁸ or
 - (c) (arguably) where a company within s.731, wholly owned by A, which has accumulated income during A's ownership, is later given to B or to a trust under which B can benefit.⁸⁹

So it is often important to ask at what moment in time one puts the question. I refer to this as **“the timing issue”**. There are in principle several possible answers:

- (1) the moment that the income arises;
- (2) the moment that the benefit is provided, if later than (1);
- (3) after a “reasonable” period (whatever that might be);
- (4) the end of the tax year in which either (1) or (2) or (3) occurs;
- (5) the earlier or later of some combination of the above.

An important consequence of all solutions except (1) is that trustees of a discretionary trust or company within s.731 would usually have some period of time after income has accrued, during which they may:

- (1) distribute income; or
- (2) apply the income in the payment of expenses.

Then the income will not be relevant income in relation to the beneficiaries because *at the moment when one asks the question* it is no longer income which “can” be applied for the benefit of the beneficiaries.

To answer the timing question we must return to the legislation. Section 733 ITA Steps (3) and (4) provide:

88 See 29.19.3 (Income of trust only payable to B on remote contingency).

89 See 29.30 (Is income of company held by a trust relevant income?).

Step 3

Identify the amount of any income which—

- (a) arises in the tax year to a person abroad, and
 - (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.
- That amount is “the relevant income of the tax year” in relation to the individual and the tax year.

Step 4

Add together the relevant income of the tax year and the relevant income of earlier tax years in relation to the individual (identified as mentioned in Step 3).

The sum of those amounts is “total relevant income”.

Steps 3 (taken with step 4) can be read in various ways:

Step 4

Add together

[1] the relevant income of the tax year *being the amount of any income which—*

- (a) *arises in the tax year to a person abroad, and*
 - (b) *as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.*
- and

[2] the relevant income of earlier tax years in relation to the individual *being the amount of any income which—*

- (a) *arises in the [earlier] tax year to a person abroad, and*
- (b) *as a result of the relevant transfer or associated operations can*
 - [i] [at any time in that earlier year] or
 - [ii] [at the end of the earlier year] or
 - [iii] [at the time that the benefit is conferred, or the time that the income arises if later]

be used directly or indirectly for providing a benefit for the individual.

(In this quote the words in normal font are the words of Step 4; the words in italics are the words of Step 3; the words underlined are added; note that some words must be added in any event.)

In clause [2][b] readings [i] [ii] [iii] are alternatives.

It is considered that one looks to the position at the later of:

- (1) the end of the tax year in which the relevant income has accrued, or
- (2) the end of the tax year in which the benefit accrues.

One asks whether *at that time* the income:

can ... be used for providing a benefit for the individual.

Another way to put it is that one asks the question with the benefit of hindsight, taking into account facts known at the time that the question matters.

The main reason for this view is that it is more sensible to ask the question at the time it matters.

The moment the income arises is not a suitable moment to ask the question. In some cases it is impossible to ascertain the moment at which income arises and all that the tax system attempts is to attribute income to an accounting period or year of assessment.⁹⁰ In other cases it is only possible to ascertain a moment at which income arises by rules of a somewhat arbitrary kind.⁹¹ Similarly, the moment that the benefit arises is not a suitable moment. Some benefits (such as interest free loans) also arise over a period. Moreover it is not practical to have to constantly compute relevant income every time that a benefit is provided during the year.

The legislation does not provide an express answer, but it does offer at least a hint in support of this view. Step 3 does not refer to “relevant income” in isolation. It refers to relevant income *of the tax year in relation to ... the tax year*. It is obviously necessary to attribute relevant income to a tax year, eg to deal with the situation where:

- (1) an individual receives a benefit in year 1;
- (2) the benefit is not taxed because there is no relevant income in year 1;
- (3) relevant income arises in year 2.

There is only relevant income *of year 2* and so the s.731 charge arises in year 2 and not in year 1. However, the reference in Step 3 is to income of the tax year *in relation to the tax year*. These extra words suggest that the relevant income of tax year 2 in tax year 2 may be different from the relevant income of tax year 2 in tax year 3. In year 3 one must ask again what is the relevant income of year 2.⁹²

The Tax Law Rewrite agree. ITA EN provides:

⁹⁰ eg trading or property income.

⁹¹ eg the rules in ss.18–19 ITEPA (When general earnings are received).

⁹² I have considered whether any guidance is to be found in the principle that income tax is an annual tax. However, that does not shed much light on the problem.

It is therefore considered that surplus relevant income (*if it continues to be available*) has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits.⁹³

29.21 Relevant income used to pay expenses

HMRC practice is that income used to pay trust or company administration expenses will reduce relevant income. This is consistent with the approach taken above. This applies even to income used for capital (rather than income) expenditure.

This is confirmed by (or at least consistent with) two HMRC statements. First, income used to meet a statutory indemnity ceases to be relevant income (even a CGT indemnity, ie a capital liability):

CIOT Letter (extract)

It would also be helpful if the Revenue could confirm that if the trustees do in fact make a payment to the settlor in response to a request for reimbursement, either under [s.646 ITTOIA] or under para 6 of Schedule 5 to TCGA, such a payment would not be regarded as: ...

(b) Taken into account for [s.731 ITA] purposes...

The Revenue reply

...

(b) *it will reduce the relevant income if paid out of income* but will not be a payment [ie not a benefit.]⁹⁴

Secondly, income used to pay a sum in lieu of interest ceased to be relevant income (even though the payment is of a capital nature). Tax Bulletin 8 provides:

ESC D41 allowed, inter alia, demand loans made to offshore trustees on better than commercial terms before 19 March 1991 to be put on commercial terms after that date. This enabled a trust to remain outside the condition in para 9(3), Schedule 5, TCGA 1992. In order to meet the terms of this concession, it may have been necessary to pay a sum in lieu

93 The EN passage is discussed in 29.12.5 (Step 5: Available Relevant Income).

94 *Taxation Practitioner*, April 1996 p.25 accessible www.kessler.co.uk, emphasis added. For other issues relating to reimbursement see 75.21 (Failure to exercise right of reimbursement). See too 29.4.10 (Reimbursement of tax under statutory indemnity).

of interest in respect of periods ended 5 April 1992. Where this was the case, such a payment would ... qualify as a deduction ... *for the purposes of [s.731 ITA] provided it was paid out of trust income.*

Where the amount in lieu of interest was paid to a person who is not a beneficiary under the terms of the trust, it would nevertheless be treated as a capital payment to that individual under TCGA 1992, Section 97. If the amount in lieu of interest was paid by a company underlying the trust, that payment would not qualify for a deduction from the profits of that company [because it is capital and not income].

Thus income used to pay interest ceases to be relevant income. Income used to repay borrowed capital also ceases to be relevant income; though if this principle was pushed to extremes in a tax avoidance scheme, the sum borrowed might be regarded as representing the relevant income: see 29.27 (Relevant income reinvested: tracing).

29.22 Relevant income of trust distributed as income in year it arises

Suppose income (“the trust income”) accrues to trustees of a discretionary trust within s.731, and is distributed (as income) to a beneficiary, “B1”, in the same tax year.

29.22.1 Position of other beneficiaries

The trust income is not relevant income in relation to any other beneficiary, since the income was distributed to B1. One cannot say that the income “can” be applied for the benefit of anyone else – if my answer to the timing issue is correct. This is significant for the other beneficiaries who receive a benefit within s.731 (whether before or after the year in which the income arises and is distributed). They will not pay tax on the benefit by reference to the distributed income, because it is not relevant income. (They may pay tax on the benefit by reference to other relevant income if there is any.)

That must be correct, because otherwise there could be double taxation (B1 taxed on trust income and another beneficiary taxed under s.731).⁹⁵

⁹⁵ Arguably s.743 ITA would provide relief: see 30.6 (Double-counting relief). But this is not a satisfactory solution as it is not clear who pays the tax.

29.22.2 *Position of recipient beneficiary*

It is suggested that the income is not relevant income in relation to B1: it is not income which *can* be used for B1's benefit; it is income which *is* used for B1's benefit.⁹⁶ This is significant for B1 if:

- (1) B1 is a remittance basis taxpayer, and
- (2) B1 received a benefit in the UK, and
- (3) the trust income is paid to B1 and not remitted to the UK.

B1 is taxed on the RFI remittance basis on the income B1 receives from the trust. B1 is not taxed on the benefit by reference to the distributed income, because it is not relevant income. (B1 may pay tax on the benefit by reference to other relevant income if there is any.)

29.23 **Relevant income of trust distributed as income after year it arises**

Suppose income accrues to trustees of a discretionary trust, within s.731, and is retained (without being accumulated) in that tax year, but is distributed (as income) to beneficiary B1 in a subsequent year. If:

- (1) a UK resident beneficiary ("B2") had received benefits in a past year, and
- (2) had not paid tax under s.731 in the past year, for lack of relevant income,

B2 will pay tax under s.731 in the year in which the income arises.

Suppose, however, that there have been no earlier benefits so this is not in point. The position is then the same as in the above paragraph, if my answer to the timing issue is correct:

- (1) The income is not relevant income of B1.
- (2) The income is not relevant income of any other beneficiary.

29.24 **Relevant income of trust accumulated**

29.24.1 *Income accumulated and retained on wide discretionary trusts*

If trustees of a common form discretionary trust accumulate income, it remains relevant income in relation to all beneficiaries as long as it is

⁹⁶ The same argument as 29.16 (Is income of life tenant relevant income?) but not so strong.

retained by the trustees, because the trust capital (which represents the accumulated income) can be used to benefit any beneficiaries.

29.24.2 *Income accumulated and retained on narrower trusts*

The position would be different if under the terms of the trust:

- (1) B was in the class of beneficiaries to whom income could be paid; but
- (2) B could not benefit in any way from income after it had been accumulated.

Accumulated income would cease to be relevant income in relation to B. This may happen automatically, eg a formerly common form of accumulation and maintenance trust provided:

- (1) Income as it arises may be used for the benefit of any beneficiary under 25 ("B1", "B2" or "B3").
- (2) If not so used, it is accumulated and added to the share of one particular beneficiary (B1) and can only be used for the benefit of B1 (not B2 or B3).

On receipt the income is relevant income in relation to B1, B2 and B3. After accumulation it is relevant income only in relation to B1.

A similar point arises in relation to a common form discretionary trust. Accumulated income is relevant income in relation to all the beneficiaries. Suppose the trustees exercise their overriding power to exclude B from the accumulated income, not from other trust capital. The income ceases to be relevant income in relation to B. It makes no difference whether this is done in the year of receipt or later.

Similar points arise if the income is transferred to a new trust, or if the income of a company within s.731 is capitalised by the issue of bonus shares.

29.24.3 *Income accumulated but later distributed as income*

It has been suggested that once income is accumulated, it is forever relevant income in relation to all the beneficiaries to whom it could have been paid. Subsequent distribution is irrelevant (unless it gives rise to a s.731 charge). This view gives rise to anomalies:

- (1) Some receipts which are capital for trust law purposes are treated as

income for s.731,⁹⁷ and these cannot be “accumulated” in the normal trust sense. It would be odd if they were treated differently from ordinary income for s.731 purposes.

- (2) Income of a company within s.731 cannot be “accumulated” in the trust sense. It would be odd if companies were treated differently from trusts.

It is considered that the process of accumulation does not by itself make any difference to the s.731 position. If income of a common form discretionary trust is accumulated, and later distributed as income to B1, it ceases to be relevant income in relation to other beneficiaries. This only applies if the sum distributed is (or represents) the accumulated relevant income. This raises tracing issues discussed below.

29.24.4 *Income accumulated and distributed as capital*

Suppose income of a common form discretionary trust is accumulated and distributed as capital to a beneficiary, B. It is considered that the income ceases to be relevant income in relation to any beneficiary except B. (It is relevant income in relation to B so that B is in principle subject to tax under s.731 if B is ordinarily resident in the UK. Any other conclusion would be absurd.)

A capital distribution out of accumulated relevant income to a UK resident individual is taxable under s.731. It is not a capital payment and so does not reduce s.2(2) amounts. However the same payment to a charity or a non-resident individual will reduce s.2(2) amounts and relevant income.

29.25 **Corporate income distributed to trust**

Suppose a company within s.731 is held by a common form discretionary trust within s.731:

- (1) the company receives income (“**corporate income**”);
- (2) the corporate income is distributed by way of dividend and retained by the trustees.

Thus:

⁹⁷ See 27.13 (Capital receipts deemed to be income).

The corporate income ceases to be relevant income so it is not counted twice. For one cannot say that the corporate income and the dividend income are *both* available to provide a benefit.⁹⁸

Suppose:

- (1) a company within s.731 is held by a common form discretionary trust;
- (2) the company's income is distributed by way of liquidation and retained by the trustees.

Double counting relief does not apply. It is suggested that the trustees receipt represents the relevant income, so the liquidation does not affect the s.731 position. (Any other view would allow tax avoidance and not be attractive to a court.)

29.26 Distributed income: HMRC view

RI 201 states:

For the purposes of Section 740(3) ICTA [now s.733 ITA] the measure of "relevant income" is treated as not including such part of the income as has already been genuinely paid away to a beneficiary or to a bona fide charity.

Once relevant income has arisen *and continues to be available to provide a benefit*, it must in the Revenue's view be carried forward year by year until extinguished by such a benefit, even if it is capitalised in the accounts of the overseas person.

(Emphasis added)

This does not address all the permutations discussed above, but it seems to be more consistent with the above than with any other interpretation.

⁹⁸ Even if that were wrong, it is suggested that double counting relief prevents the corporate income and the dividend income from counting as relevant income; see 30.10 (Section 731 trust/company structure).

29.27 Relevant income reinvested: tracing

The requirement is that “income” can be used to provide a benefit. However, “income” here includes any asset representing income, even if that asset does not constitute “income” (in any sense) of the person abroad.⁹⁹ Thus it makes no difference if the relevant income is invested in another asset.

Suppose:

- (1) A non-resident company held by a trust has received relevant income (“**the corporate income**”).
- (2) The trustees sell the company to a purchaser.

It has been suggested that the corporate income ceases to be relevant income in relation to the beneficiaries, because (after the sale) that income can no longer be used to benefit them. That would be absurd, but there is no difficulty in construing the legislation to avoid that absurdity. The proceeds of sale represent the corporate income, so the sale has not affected the relevant income position at all: as long as those proceeds can still be used for the benefit of the beneficiaries there is still relevant income in relation to the beneficiaries.

29.28 Tracing: are distributions out of relevant income?

The principle that distributed income ceases to be relevant income applies only if the asset distributed constitutes the relevant income. Whether or not this is the case raises questions of tracing. The safest approach is for a trust or company within s.731 to keep trust income in a separate account so funds distributed can easily be identified as relevant income. But if we must enter this uncharted territory, it is suggested that the case law on pre-2008 remittance basis tracing principles provides helpful guidance.

29.28.1 *Cash distribution from trust within s.731*

Suppose:

⁹⁹ Similar principles apply for the RFI remittance basis; see 9.3.5 (Capital/income terminology in remittance basis context) example 4. A similar principle applies in ascertaining what is income for the definition of power to enjoy; see 28.7.5 (Enjoyment Condition D: possibility of benefit).

- (1) Trustees of a discretionary trust within s.731 receive relevant income and pay it to a mixed account (ie holding income and trust capital together).
- (2) They pay a sum out of that account in exercise of a power over trust income.

It is considered that the sum distributed would be (or represent) the relevant income.

Suppose:

- (1) The trustees receive relevant income, accumulate it and pay it into a mixed account (ie holding accumulated income and trust capital together).
- (2) They pay a sum out of that account in exercise of a power to apply accumulated income as income.

It is suggested that the sum distributed would be (or represent) the relevant income.

Suppose:

- (1) The trustees receive relevant income, accumulate it and pay it into a mixed account (ie holding accumulated income and trust capital together).
- (2) They pay a sum out of that account in exercise of a power to distribute capital.

It is suggested that the trustees could by appropriate documentation identify the sum distributed as the relevant income.¹⁰⁰ Otherwise there must be an apportionment.

29.28.2 *Cash distribution from company within s.731*

Suppose:

- (1) A company within s.731 receives relevant income and pays it to a mixed account (ie holding relevant income, capital profits and other company funds together).
- (2) The company declares a dividend.

In the absence of documentation, it is arguable that income comes first out of a mixed fund: the alternative view is that the dividend represents the company's distributable profits *pro rata*. If the company has only received income (ie has not realised capital gains), the dividend represents that

100 See 12.13.1 (Remittance from mixture of taxed and untaxed income).

income.

Suppose:

- (1) A company within s.731 receives relevant income and pays it to a mixed account (ie holding relevant income and other company funds together).
- (2) The company repays a loan out of that account.

It is tentatively suggested that the company could by appropriate documentation earmark the sum repaid as the relevant income. In that case the trustees could distribute it and it ceases to be relevant income.

29.28.3 *Distribution of company*

Suppose a non-resident company held by a trust has received relevant income (“**the corporate income**”). If the trust transfers the company to an individual, the corporate income ceases to be relevant to beneficiaries (except the individual). If the trust transfers the company to a new trust, the corporate income is relevant income in relation to the beneficiaries of the new trust but not in relation to beneficiaries of the old trust who cannot benefit under the new trust. This is a sensible rule as it allows different branches of a family to separate their interests fairly.

29.29 **Distributing income: tax planning**

A common strategy is:

- (1) distribute all income (from a discretionary trust or underlying company within s.731) to a foreign domiciled settlor;
- (2) the settlor may re-settle the income on the same trusts.

This avoids relevant income in the trust or company.¹⁰¹ It would be better to have an interest in possession trust so income at the trust level will be distributed automatically. Watch *Furniss v Dawson*: it is best to avoid provocative circularity.

A variant of this idea is to distribute income to a beneficiary who is not the settlor/transferor, but who is non-resident (or domiciled) and so outside s.731. Watch *Furniss v Dawson* here.

¹⁰¹ Also this ensures that the settlor receives the benefit of distribution relief (if applicable); see 30.4 (Distribution relief).

29.30 Is income of company held by a trust relevant income?

29.30.1 Income accruing while company held by trust

Suppose a trust with a common form power of appointment holds an underlying company to which s.731 applies.¹⁰² Income of the company is in principle relevant income in relation to all beneficiaries. It remains so as long as the company retains the income.

29.30.2 Income accruing before company is acquired by trust

Suppose:

- (1) An individual (“T”) owns all the shares of a company within s.731.
- (2) T gives the shares to a trust with a common form power of appointment.

Income of the company arising after the gift of T is in principle relevant income in relation to the beneficiaries of the trust.

What is the status of income arising before the gift (“old income”)? HMRC say that old income is also relevant income in relation to all the beneficiaries. HMRC’s argument is simple: at the relevant time (when benefits are received) the old income “can” be used for the benefit of beneficiaries. The tax consequences of this are so severe that one feels it cannot be right, but what is the flaw in the argument?

At the time when the old income accrued to the company, that income “can” only be used to benefit T, the sole shareholder, so it is not relevant income in relation to anyone else. After the company has been given to the trust the same income “can” be used to benefit others. That is sufficient to meet the “can” condition, if my answer on the timing issue is correct.

However, it is not enough that income “can” be used to benefit a person. The definition of “relevant income” requires that the income can be used to benefit an individual:

as a result of

- (i) the relevant transfer or

¹⁰² In practice the motive defence may apply to the transfer to the company; see 31.31 (Transfer of UK assets from non-resident trustees to non-resident underlying company).

- (ii) associated operations.¹⁰³

I refer to this as “**relevant income causation conditions (i) and (ii)**”.

Now, in this case there are two transfers:

- (1) The transfer of assets to the company (“transfer 1”).
- (2) The transfer of the shares in the company to the trust (an associated operation) (“transfer 2”).

It is suggested that where the two transfers are not part of a single arrangement, but entirely independent, transfer 2 is not an associated operation in relation to transfer 1. So relevant income causation condition (ii) is not satisfied. Relevant income causation condition (i) is not satisfied since transfer 1 is not the cause of the fact that the income can be used to benefit the beneficiaries. The reasoning is the same as 27.11.1 (Transfer from A to B followed by transfer from B to person abroad).

29.31 Individual not a beneficiary when income arises

29.31.1 Beneficiary unborn when income arises

Suppose:

- (1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income.
- (2) In Year 2 a beneficiary is born.

Is the income accumulated in year 1 before the birth relevant income in relation to that beneficiary? The answer depends on the timing issue. If my view is right, undistributed income accumulated before birth can be relevant income in relation to the newborn beneficiary, and that view does make more sense, having regard to the general scheme of the legislation.

29.31.2 Individual in existence but not a beneficiary when income arises

Suppose:

- (1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income. The class of beneficiaries consists of the issue of the settlor and their spouses.

103 The reference here is to the reference to associated operations in s.732(1)(c).

- (2) In Year 2 an individual (“W”) marries a beneficiary and so joins the class of beneficiaries.¹⁰⁴

Is the income accumulated in year 1 before the marriage relevant income in relation to W? The answer depends again on the timing issue. If my view is right, undistributed income accumulated before the marriage can be relevant income in relation to W. Those who take the view that pre-birth income is not relevant income might consistently take the view that this pre-marriage income is not relevant income. This is not quite a *reductio ad absurdum*, but it is surely a bold view. If necessary, a court would hold that W “can” benefit in year 1 because of the possibility that W may marry a beneficiary in year 2. See *IRC v Tennant* 24 TC 215. But this contingency may be very remote, so my preferred analysis is less artificial.

29.31.3 *Beneficiary dead when income arises*

Now suppose the opposite situation:

- (1) Year 1: a beneficiary receives a benefit from a trust (which is not taxable for lack of relevant income).
- (2) Year 2: the beneficiary dies.
- (3) Year 3: relevant income accrues.

Here it is plain that there is no tax charge on the beneficiary. Income cannot be deemed to have accrued to them once they are dead.

The same applies in relation to income which accrues in the tax year of death, but after the death. One cannot say that income accruing after the death of a person “can” be applied for their benefit.

29.31.4 *Individual excluded from benefit*

Income arising after a former beneficiary is excluded from benefit cannot (on any view) be relevant income in relation to that beneficiary. It is not necessary that the beneficiary should be excluded from benefit altogether: just that they are excluded from benefit from the income.

¹⁰⁴ It is assumed there is no power to add beneficiaries so the income could not be applied for the benefit of the individual before the marriage.

29.32 Transfer between trusts

Section 90 TCGA provides a code dealing with transfers between settlements for the purposes of s.87 TCGA.¹⁰⁵ This is needed because a s.2(2) amount is computed in relation to settlements. Each settlement has a s.2(2) amount attributed to it.

Section 731 by contrast has no such need. Relevant income is *not* computed in relation to settlements. It is computed in relation to individuals. Thus a transfer of relevant income from trust 1 to trust 2 does not reduce the relevant income if the beneficiaries of trust 1 and trust 2 are the same.

29.33 Tax and tax credits of person abroad

This topic is not difficult to understand – at least it does not seem difficult once one has understood it. But it is impossible to summarise briefly. In order to understand the law one must carefully distinguish three concepts:

- (1) The actual income of the person abroad.
- (2) Relevant income for s.731.
- (3) The income which is deemed under s.731 to accrue to the UK resident individual who receives a benefit (“s.731 income”).

These must not be confused!

The *actual income* of the person abroad is taxed (if at all) under general principles.

Relevant income is not taxed as such: it is merely something computed as a part of the process of ascertaining the amount of s.731 income.

Section 731 deemed income is taxed at the beneficiaries marginal rate. This section considers the complications which arise if the actual income of the person abroad is subject to UK tax or foreign tax. How does this affect the s.731 income? What (if anything) is there to prevent double taxation: (1) tax on the person abroad and (2) tax on the beneficiary.

It is necessary to consider separately the position where the person abroad is:

- (1) A discretionary trust.
- (2) Any trust, on the purchase of own shares.
- (3) A company owned by an individual.

¹⁰⁵ See 48.18 (Transfers between trusts).

(4) A company owned by a non-resident trust.

29.33.1 *Tax and tax credits of non-resident discretionary trust within s.731*

A non-resident discretionary trust will normally pay tax on its actual UK source income at the rate applicable to trusts. The amount of tax paid reduces the relevant income so that if the gross income is £100 and tax is 50%, the relevant income is reduced to £50. However, s.731 makes no further allowance for a beneficiary. So if a beneficiary receives a benefit of £50, taxable under s.731, they pay tax at their marginal rate on the £50. The effective rate of tax on the actual income of the person abroad can therefore reach 75%. Section 743 ITA probably does not help. It would be much better if the beneficiary received an income receipt from the trust.¹⁰⁶ Then s.731 would not apply¹⁰⁷ and instead the beneficiary will effectively obtain some credit for the UK tax paid by the offshore trust under the regime of Chapter 7 Part 9 ITA.¹⁰⁸

The same point applies where the income accruing to the offshore trustees is subject to foreign tax which can qualify for double taxation relief in the UK under ESC B18. It is best to arrange that the income is received by a UK resident beneficiary in the form of income, avoiding s.731 income where the possibility of any double taxation relief is lost.

An IP trust is better still for dividend income.

29.33.2 *Purchase of own shares*

The receipt on a purchase of own shares by a UK company is income.

Any trust, discretionary or IP, is subject to additional rate tax on a purchase of own shares. This raises the same tax problems as income of a discretionary trust under ss.481, 482 ITA. One solution is to alter the terms of the trust before the purchase, so the proceeds of sale belong to the life tenant. Another solution may be to make the trust UK resident for income tax purposes.

106 As to how to achieve this, see 24.8 (Payment from discretionary trust: income or capital?).

107 See 29.10 (S.731 capital condition).

108 Unfortunately the credit is less than full credit in the case of dividend income. The regime is too complex to set out here.

29.33.3 *Tax and tax credits of non-resident company within s.731*

A non-resident company will normally pay tax on its actual UK source income at the basic rate. The amount of tax paid reduces the relevant income so that if the gross UK source income is £100 and tax is 20%, the relevant income is reduced to £80. Once again, s.731 makes no further allowance. So if an individual receives a benefit of £80, on which they are taxed under s.731, they pay tax at the appropriate rate on the £80. The effective rate of tax on the actual income of the person abroad is therefore nearly 52% for a higher rate taxpayer and 60% for an additional rate taxpayer.

A similar point arises in relation to dividend income, which is not taxable in the hands of the company.

It would be slightly more efficient if the beneficiary received a dividend from the company. Then s.731 would not apply. The individual may still not receive any credit for the tax paid by the offshore company but their dividend income would at least be taxed at the slightly lower dividend rates.

29.33.4 *Tax planning by means of UK resident company*

Further tax planning is to make the company UK resident (or to acquire a UK resident company). Then the actual income of the company is paid out by way of dividend (assuming this is possible as a matter of company law) and taxed at the dividend upper rate with the benefit of the UK tax credit. Watch s.1071 CTA 2010. The benefit of this kind of planning varies with the applicable rates of tax which depend on the circumstances of the beneficiaries and whether it is s.731 or s.87 which would apply on a capital payment.

29.33.5 *Commentary*

In the 6th edition of this book I said:

These are harsh rules, but the unfairness of s.731 is generally avoidable in practice and any other rule would certainly be extremely complicated to draft and to administer.

The complexity arises in matching s.731 income with the taxable income of the person abroad. But now the FA 2008 has introduced matching rules. (Complexity was not a serious concern to the architects of the 2008 reforms.) What is sauce for the goose is sauce for the gander. If the matching rules must be retained, fairness requires that there should also be a system of credit for tax on the relevant income.

The better solution would be the rough and ready but simpler rules which took effect from 1981 to 2008, but at present we have the worst of both worlds: complexity and unfairness.

29.34 Section 731 remittance basis

Section 735 ITA¹⁰⁹ provides a relief which I call “**the s.731 remittance basis**”. Section 735(1) provides:

This section applies if—

- (a) income is treated under section 732 as arising to an individual in a tax year (“the deemed income”),
- (b) section 809B, 809D or 809E (remittance basis) applies to the individual for the year, and
- (c) the individual is not domiciled in the UK in the year.

In short, the relief applies to remittance basis taxpayers.

29.34.1 “*Foreign*” income

In order to understand the law one must carefully distinguish:

- (1) relevant income (in short, income arising to the person abroad); and
- (2) income treated under section 732 as arising to an individual. Statute calls this “the deemed income” but I use the term “**s.731 income**” to distinguish it from the myriad types of deemed income in the taxes acts.

Further, the legislation distinguishes between two types of relevant income and two types of s.731 income.

- (1) Relevant income may be:

109 Flagged (somewhat unnecessarily) by s.731(2A) ITA:

“(2A) But see section 735 (non-UK domiciled individuals to whom remittance basis applies).”

- (a) foreign relevant income or
 - (b) not foreign (which one might call UK relevant income).
- (2) S.731 income may similarly be:
- (a) foreign: the statutory term is “foreign deemed income” but I will use the term “**foreign s.731 income**”.
 - (b) not foreign.

The crucial term is “foreign s.731 income”. Section 735(2) ITA provides:

For the purposes of this section the deemed income is “foreign” if (and to the extent that) the relevant income to which it relates would be relevant foreign income if it were the individual’s.

I deal with the concept of “relates” in the next section.

29.34.2 *Operation of the s.731 remittance basis*

Assuming we have identified foreign s.731 income, we can turn to s.735(3) ITA which provides the relief:

Treat the foreign deemed income as relevant foreign income of the individual.

This incorporates the RFI remittance basis. It would not work by itself as the s.731 income (being fictional) does not exist and cannot be remitted. So s.735(4) ITA provides:

For the purposes of chapter A1 of Part 14 (remittance basis) treat relevant income, or a benefit, that relates to any part of the foreign deemed income as deriving from that part of the foreign deemed income.

This means:

- For the purposes of the remittance basis provisions treat *both*
- [a] relevant income *that relates to any part of the foreign deemed income*¹¹⁰ and
 - [b] a benefit that relates to any part of the foreign deemed income

¹¹⁰ If relevant income relates to s.731 income then the s.731 income relates to the relevant income: that is, “relates” is a transitive concept and if A relates to B then B relates to A.

as deriving from that part of the foreign deemed income.¹¹¹

Thus we have three fictions. First we pretend that the individual receives s.731 income. Secondly, we pretend that that s.731 income is RFI. Thirdly, we pretend that certain relevant income *and* certain benefits derive from that RFI.¹¹² The third fiction feeds into remittance condition B. If anything derived from that benefit (or from that relevant income) is received in the UK by the individual or by a relevant person (in relation to the individual), there is a charge under the remittance basis.

29.34.3 *Transitional rules*

Para 170 Sch 7 FA 2008 provides:

The amendments made by paras 161 to 179 have effect for the tax year 2008-09 and subsequent tax years.

Section 735 does not apply to benefits accruing to a person abroad before 2008/09 because the condition in s.735(1)(b) is not met.

29.35 **Section 731 matching rules**

In order to decide whether the remittance basis applies, we need to identify the foreign s.731 income, so we need to identify the relevant income to which the s.731 income “relates” to see if it is foreign relevant income.

In order to operate the remittance basis if it applies, we need to identify the benefits that relate to s.731 income in order to see if it has been remitted.

Although statute uses the word “relate” the rules are better described as matching rules.

These rules are set out in s.735A ITA. This works in four stages.

111 That is, the phrase “that relates to any part of the foreign deemed income” qualifies “relevant income” as well as “benefit”.

112 Contrast the solution adopted for the s.87 remittance basis, where the capital payment (corresponding to the remittable benefit) is deemed to derive from the s.87 gains, but the s.2(2) amount (corresponding to remittable relevant income) is not. So there is no charge on the remittance of the trust’s gain, only on remittance of the capital payment.

29.35.1 *Place benefits in date order*

Section 735A(1) ITA provides:

For the purposes of section 735—

- (a) place the benefits mentioned in Step 1 [benefits within s.731]¹¹³ in the order in which they were received by the individual (starting with the earliest benefit received)

Some benefits are not received at any particular moment in time, eg the benefit of rent-free accommodation, and it is not possible to place them in the order in which they are received. Perhaps there should be a time apportionment.

One then makes certain deductions from the benefits:

- (b) deduct from those benefits so much of any benefit within section 734(1)(b) as gives rise as mentioned in section 734(1)(d) to chargeable gains or offshore income gains.

See 29.13 (Section 733 computation when benefit subject to CGT).

29.35.2 *Place UK/foreign relevant income in due order*

Section 735A(1) ITA continues:

- (c) place the income mentioned in Step 3 for the tax years mentioned in Step 4 (“the relevant income”) in the order determined under subsection (3)

Note that Steps 3 and 4 here refer to the steps in s.733; confusingly the reference is not to the steps in s.735A(3) which immediately follow.

This takes us to s.735A(3) ITA:

The order referred to in subsection (1)(c) is arrived at by taking the following steps.

Step 1

¹¹³ Section 735A(2) ITA provides:

“In subsection (1) references to a step are to a step in section 733(1).”

Find the relevant income for the earliest tax year (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]

Step 2

Place so much of that income [relevant income] as is not foreign¹¹⁴ in the order in which it arose (starting with the earliest income to arise).

Step 3

After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

In order to carry out Steps 2 and 3 it is necessary to distinguish between:

- (1) foreign relevant income; and
- (2) other relevant income (“**UK relevant income**”).

It is then necessary to ascertain the date that the relevant income arises. Some income is not received at any particular moment in time, eg trading and property income, where the income is computed as a net figure after allowing deductions. Section 735A(5) ITA deals with this:

For those purposes [for purpose of putting relevant income into date order] treat income for a period as arising immediately before the end of the period.

TAH para 1234 provides:

... For example, business profits accrue over an accounting period to say 31 December so for the purpose of this provision the income would be treated as arising on 31 December. Therefore if in a tax year there was say interest income arising on 30 September and business profits accruing over an accounting period to 31 December, for the purpose of this provision they would be placed in the order interest first and profits second.

The author probably assumed that interest is not “income for a period” and so the interest is not affected by s.735A(5). In fact, interest is income for a period to which it relates, even though it is only charged when it arises. But normally interest is paid in arrears, ie interest arising on (say) 30

114 Section 735A(4) ITA gives a commonsense definition to “foreign” relevant income: “For the purposes of subsection (3) relevant income is ‘foreign’ where it would be relevant foreign income if it were the individual’s.”

September is for a period ending 30 September, so the end result is the same.

Then one carries out Steps 1–3 for subsequent years, year by year:

Step 4

Repeat Steps 1 to 3.

For this purpose, read references to the relevant income for the earliest tax year as references to the relevant income for the first tax year after the last tax year in relation to which those Steps have been undertaken.

Amended as step 4 requires, steps 1-3 provide:

Step 1

Find ~~the relevant income for the earliest tax year~~ *the relevant income for the first tax year after the last tax year in relation to which those Steps [Steps 1-3] have been undertaken* (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]

Step 2

Place so much of that income [relevant income] as is not foreign in the order in which it arose (starting with the earliest income to arise).

Step 3

After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

29.35.3 *Deduction from relevant income*

Section 735A(1)(d) ITA provides:

(d) deduct from that income any income that may not be taken into account because of section 743(1) or (2) (no duplication of charges),

Section 735A(6) ITA provides:

Subsection (1)(d) does not apply if the income may not be taken into account because the individual has been charged to income tax under section 731 by reason of the income.

29.35.4 *Place s.731 income in date order*

Section 735A(1)(e) provides:

place the income treated under section 732(2) as arising to the individual in respect of the benefits in the order in which it is treated as arising (starting with the earliest income treated as having arisen),

29.35.5 *The matching rule*

Having identified all these matters, and placed them in date order, we can at last turn to the matching rule itself. Section 735A(1)(f) ITA provides:

treat the income mentioned in para (e) [s.731 income] as related to—
(i) the benefits, and
(ii) the relevant income,
by matching that income with the benefits and the relevant income (in the orders mentioned in paras (a), (c) and (e)).

29.35.6 *Summary*

- In short, the matching rules are:
- (1) Match to relevant income of earlier years before later years.
 - (2) Within the years, match to UK relevant income before foreign relevant income.

Why does the legislation not simply say that? For a discussion of the drafting issues see 48.10.7 (Commentary: step-based drafting).
The rule is arbitrary (but any matching rule is arbitrary).

29.35.7 *HMRC examples*

TAH gives a number of examples, most of which are self-evident, but two are worth setting out here. Para 1234 Example 10 involves UK and foreign relevant income (7 items of income altogether) and non-UK benefits (2 benefits altogether):

Item	Date	Relevant income		Benefits (non-UK)
		UK	Foreign	
1	Year 1	30 Sept	500	
2		31 Dec	500	
3	Year 2	31 Dec	1,000	750
4	Year 3	30 Sept	500	
5		31 Dec	500	
6	Year 4	30 Sept	500	
7		31 Dec	500	750 [or 1,500]

The HMRC analysis is:

There are potential transfer of assets benefits charges in Yr 2 of 750 and Yr 4 of 750.

More analytically, the individual receives s.731 income of £750 in years 2 and 4.

In Yr 2, 250 will be foreign deemed income and ring fenced to be charged under Part 8 ITTOIA as and when there is an amount remitted to the UK. 500 is charged under transfer of assets.

More analytically, the £750 s.731 income of year 2 is matched as follows: £500 is matched to income item 1: that £500 is not deemed RFI and so is charged on an arising basis.

£250 is matched to income item 2: that £250 is deemed RFI and taxed on the s.731 remittance basis, ie on a future remittance of the benefit or the foreign relevant income. I would not use the term “ring-fenced” to describe this, but it might serve as a loose metaphor.

In Yr 4 the whole 750 will be deemed foreign income [*recte* foreign deemed income].

More analytically, the £750 s.731 income of year 4 is matched to the remaining unmatched £250 of item 2 and to the first £500 of item 3. The £750 is deemed RFI and taxed on the s.731 remittance basis.

If however the benefit in Yr 4 was 1500, then only 1250 would be ring fenced as foreign deemed income and 250 would be charged under transfer of assets.

More analytically if the benefit in Yr 4 was 1500, the individual receives s.731 income of £1,500 in year 4. That is matched as follows:

£250 is matched to the remaining unmatched part of income item 2.

£1,000 is matched to income item 3.

The total of £1,250 is deemed RFI and taxed on the s.731 remittance basis.

£250 is matched to income item 4 and is taxed on the arising basis.

TAH para 1236 Example 11 is a slightly more complex example with:

(1) UK and foreign relevant income - 12 items altogether.

(2) UK and foreign benefits - 4 benefits altogether.

An individual who is ordinarily resident, but not domiciled, in the UK has received cash benefits from an offshore structure in circumstances where the conditions for the transfer of assets provisions to apply are met. The ‘remittance basis’ of taxation applies for each year.

Item	Date		Relevant income		Benefits	
			UK	Foreign	UK	Foreign
1	Year 1	30 Sept	500			
2		31 Mar		800		1,000
3	Year 2	31 Mar	100			1,400
4		31 Mar		1,000		
5	Year 3	31 Mar		500		
6		31 Mar	500			
7		31 Mar	500			
8	Year 4	30 Sept	200		1,000	
9		31 Mar		500		
10	Year 5	30 Sept	500			600
11		30 Sept		100		
12		31 Mar		400		

The HMRC analysis is (to say the least) informal in its use of terminology and it should be recast along the lines of example 10. This is done here by adding only brief comments in italics as the text is long and the reader will have the idea.

Year 1

The potential benefits charge [*s.731 income*] is 1000 (being the lesser of 1300 relevant income and 1000 benefits received).

As all of the conditions for Section 735 to apply are met, consider whether any of the potential charge [*s.731 income*] is foreign deemed income. The principles in Section 735A are used for this purpose.

- First match the 1000 with the UK [*relevant*] income of 500. As this income cannot be relevant foreign income then 500 cannot be foreign deemed income and thus is charged under the transfer of assets benefits charge [*on an arising basis*].

- The remaining benefit [*£500 s.731 relevant income*] is then matched with the foreign [*relevant*] income of 800. This [*relevant*] income would be relevant foreign income if it was the individuals and thus 500 of the deemed amount [*s.731 income*] is foreign deemed income. This is treated as relevant foreign income and becomes potentially chargeable under Part 8 ITTOIA 2005 [*ie is taxed on the s.731 remittance basis*].

- There is a balance of 300 relevant income that remains unmatched.

Where any amount is remitted to the UK during that or any subsequent year

which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

The total taxable amount for the year under transfer of assets benefits charge is therefore 500.

Year 2

The potential benefits charge [*s.731 income*] is 1400 (being the lesser of the total relevant income 2400 and the total benefits 2400 less 1000 already charged).

Calculate how much of the total potential charge [*s.731 income*] can be regarded as foreign deemed income applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with-

(a) 300 of foreign [*relevant*] income from year 1. This gives foreign deemed income of 300 chargeable [*on the s.731 remittance basis*] under Part 8.

(b) 100 UK income of year 2. As this income cannot be relevant foreign income this amount of 100 remains chargeable [*on an arising basis*] under the transfer of assets benefits charge.

(c) The foreign [*relevant*] income of year 2 of 1000. As this would be relevant foreign income if it were the individual's this amount can [*must*] be regarded as foreign deemed income and so chargeable [*on the s.731 remittance basis*] under Part 8.

The result is that of the potential charge [*s.731 income*] of 1400, 100 is charged under transfer of assets benefits charge [*on the arising basis*] and 1300 is ring fenced and treated as relevant foreign income chargeable [*on the s.731 remittance basis*] under Part 8 ITTOIA.

The total charge under the transfer of assets benefits charge is therefore 100.

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

Year 3

Although there is further relevant income in this year there are no unmatched benefits so there can be no potential charge [*s.731 income*] under transfer of assets benefits charge so a consideration of S735 is not applicable.

Year 4

The potential charge [*s.731 income*] is 1000 (being the lesser of the total relevant income 4100 and the total benefits 3400 less 2400 already charged).

Work out the deemed foreign income [*foreign s.731 income*] applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with

(a) The UK relevant income 500 from year 3.

(b) The foreign [*relevant*] income of 500 from year 3.

The total amount charged under the transfer of assets benefits charge is therefore 500.

500 is ring fenced as foreign deemed income and treated as relevant foreign income *charged on the s.731 remittance basis*].

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

There is 700 of unmatched relevant income to take forward.

Year 5

The potential charge [*s.731 income*] is 600 (being the lesser of the total relevant income 5100 and the total benefits 4000 less 3400 already charged).

Work out the deemed foreign income [*foreign s.731 income*] applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with

(a) The UK relevant income 200 from year 4.

(b) 400 of the foreign relevant income from year 4.

The total amount charged under the transfer of assets benefits charge is therefore 200.

400 is ring fenced as foreign deemed income and treated as relevant foreign income.

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

As the benefit was received in the UK a minimum of the ring fenced amount of this year will be charged under Part 8 ITTOIA and consideration would need to be given to whether there are further untaxed amounts of ring fenced income that would be charged for this year applying the relevant remittance basis rules.

There is 1100 of unmatched relevant income to take forward.

29.35.8 Planning implications

Where the s.731 remittance basis applies the best planning by far is to arrange that the person abroad (the foreign trust or company):

(1) does not have any UK source income and

(2) does not remit its foreign income.

Then there is no need to worry about the complex s.735A matching rules.

The relatively simple position is that there is a remittance if the benefit is

received in the UK.

This also avoids the double charge to UK tax which arises when benefits are matched to UK source relevant income.

The next best planning is to arrange that:

- (1) UK source income arises in years where no s.731 benefit is provided; and
- (2) In a year where a s.731 benefit is provided, the person abroad has no UK source relevant income *and* has foreign source relevant income of an amount sufficient to match the value of the benefit (ie the foreign source relevant income will frank the benefit). If the trust property is held through an underlying company, a dividend from the company may conveniently achieve that.

29.35.9 *Commentary*

The reader who has followed the text to this point will agree that the s.731 remittance basis is unworkably complicated. The rule should simply be that there is a tax charge if the benefit is remitted, and the matching rules completely abandoned. That would be fairer, consistent with the principle of the remittance basis, consistent with the s.87 remittance basis, and a simplification.

29.36 **Where is a benefit received?**

The s.731 remittance basis requires one to identify:

- (1) where a benefit is received (or at least, whether it is received in the UK); and
- (2) where anything derived from that benefit is received.

To identify the place of receipt of a benefit is at least as hard (and arbitrary) as to identify the situs of property or the location of a source of income, problems to which wholly satisfactory answers do not exist.

It may be that some benefits are not received in any particular identifiable place but it is suggested that just as every asset has a situs (and only one situs), the better view is that every benefit should have one (and only one) place of receipt. However to identify that place will sometimes require an arbitrary selection of connecting factors.

The benefit of the transfer of money paid to a beneficiary's bank account is received where the account is kept.

The benefit of the transfer of a debt or shares might be received where the debt or shares are situated under private international law principles. Or it might be received in the jurisdiction whose law governs the transfer of the asset.

29.36.1 *Interest-free (or low-interest) loan*

Where is the benefit of an interest-free (or low-interest) loan received? The possible solutions are:

- (1) where the money lent is received;
- (2) where the debt is situated under private international law principles.¹¹⁵

The objection to solution (1) is that the benefit is not the money lent, it is the interest forgone. It is suggested that the best solution is that the benefit is received where the debt is situated.¹¹⁶ It is arguable that the money lent is derived from the benefit.¹¹⁷

The same solution would apply if the benefit was leaving outstanding a debt which was not a debt for money lent, for instance, if the offshore person sold an asset for full value to the individual and left the purchase price outstanding.

29.36.2 *Rent-free (or low-rent) use of chattel or land*

The position is different if the benefit is rent-free (or low-rent) use of a chattel or land. The chattel or land (unlike money in an interest-free loan) does not belong to the bailee, and the benefit is received where the land is situated or chattel is for the time being.

29.36.3 *Release of debt*

Suppose:

¹¹⁵ See 77.12 (Simple contract debt) and 77.13 (Specialty obligation).

¹¹⁶ Another possible solution is to ask where the situs of the source of the interest would be for IT purposes, if interest were payable on the loan. But this should be rejected since (1) the rules for identifying the source of interest are hopelessly unclear and (2) when interest is not payable this would be a difficult hypothetical question to answer.

¹¹⁷ See 10.14.5 (T lends to R).

- (1) money is lent to a beneficiary;¹¹⁸
- (2) the loan is later released (a benefit).

Where is this benefit received? Again the choice is:

- (1) where the money lent (or the proceeds representing it) was received or is situate;
- (2) where the debt is situate.

The argument is similar to the discussion above on interest-free loans. The better view is that the place of receipt is where the debt is situate. The same applies on the waiver of interest, but there it is even clearer that solution (1) is not correct. The money lent is not, strictly, derived from the benefit.

29.36.4 *Receipt of benefit outside UK and subsequent remittance*

Suppose:

- (1) a UK resident foreign domiciled individual receives a benefit in the form of the transfer of money (or a chattel) outside the UK, and
- (2) later remits that money (or chattel) to the UK.

The benefit becomes taxable under the s.731 foreign domicile remittance basis. Before 2008 the contrary was arguable.

For this reason, the tax consequence of a benefit received by one beneficiary may depend on whether *other* beneficiaries have remitted their benefits (and so used up relevant income). One might expect one beneficiary (with access to trust documents) to be able to find out what benefits other beneficiaries have received and where. But a beneficiary is not entitled to find out and often will be unable to find out what benefits received by other beneficiaries have been remitted. The legislation is in many cases unworkable. But in 2008 workability was not regarded as a requirement of anti-avoidance legislation.

If the beneficiary is not ordinarily resident when they receive the benefit but ordinarily resident when it is received in the UK, there is no tax charge.

29.36.5 *Distribution of UK source income*

Suppose an offshore company (“OC”) within s.731 is owned by a trust

¹¹⁸ It makes no difference whether the loan is at a commercial rate (not a benefit), or an interest-free loan (which confers the separate benefit of interest foregone until the date of release).

within s.731:

If OC receives and retains UK source income, that is not foreign relevant income. However, if OC distributes the income to the trust, OC's income ceases to be relevant income. Instead the income of the trust is relevant income (unless distributed), but this income is foreign source income and so in principle excluded relevant income. So where UK source income is received by an underlying company, the s.731 remittance basis can be made available by distribution of that income from the company. This seems anomalous. However, s.731 provides a rough justice in other areas where that favours HMRC, so it is not altogether surprising if on this occasion an anomaly may favour the taxpayer.

29.37 Section 720 and 731 remittance basis compared

Sections 720 and 731 both offer a form of remittance basis. The s.720 remittance basis is more generous. So a transferor (chargeable under s.720 but not s.731) will often be in a better position than other beneficiaries (chargeable under s.731)! For example:

- (1) Suppose T (UK resident, foreign domiciled) creates a trust within s.720. T occupies a property owned by the trust. The trust also receives and accumulates foreign income. There is no tax charge. T is not subject to tax under s.720.
- (2) Now suppose T dies and B occupies the same property. B is taxed on the benefit of the rent-free accommodation under s.731. The s.731 remittance basis does not help B because the benefit is received in the UK.

29.38 Summary of responses to s.731

- (1) Avoid relevant income by
 - (a) distributing income:

- (i) as it arises; or
 - (ii) in a year before a beneficiary receives a benefit; or
- (b) using interest in possession settlements in preference to discretionary; or
- (c) not using trusts and companies where inappropriate.
- (2) Motive defence.
- (3) Remittance basis.
- (4) Arrange that foreign domiciled beneficiaries receive benefits of an income nature (outside s.731).

29.39 Tax return: disclosure of s.731 income

S.731 income is returned in Box 42 in the Foreign pages (form SA106) 2011/12. The note by this box reads:

If you have received a benefit from a person abroad, enter the value or payment received.

The reference to a benefit is a reference to an income taxable benefit, so if a foreign domiciled individual received a benefit which is not subject to IT (because of the remittance basis or for lack of relevant income) then the figure here should be nil. HMRC agree.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from non-resident trusts - 2011/12) provides:

How do you report benefits?

Unless you are completing box 46 of the Foreign pages – see ‘How do you qualify for an exemption from charge on income or benefits?’ on page 6 – you should enter the amount computed at Step 6, in box 42 on page F 6 of the Foreign pages.

Please enter in the ‘Any other information’ box, box 19 on page TR 6 of your tax return:

- the full name and address of the person abroad receiving the available relevant income
- the details of the relevant transactions that have given rise to the income
- how you have calculated the benefits included on the return.

Where the benefit has come from a UK resident trust in the circumstances described in the previous section, also give details of those circumstances including the full name of any other trust involved.

CHAPTER THIRTY

TRANSFER OF ASSETS ABROAD: DOUBLE TAXATION ISSUES

30.1 TAA reliefs – Terminology

The transfer of asset rules could often give rise to double UK taxation, and there are four reliefs to prevent this. Statute does not provide names for the reliefs, so I coin the following terminology:

Name of Relief	ITA Section	Outline of Relief
Transferor's credit	745(1)	Credit for tax paid by transferee
Transferee's credit	unclear	Credit for tax paid by transferor
Distribution relief	743(4)	Relief on distribution to transferor
Double-counting relief	743(1)	Vaguely worded DT relief

This chapter considers rules which prevent double UK taxation; for the separate issues of DTAs and foreign tax credit relief, see 55.5 (DT reliefs: s.720 ITA) and 55.6 (DT reliefs: s.731 ITA).

30.2 Undistributed UK taxable income of offshore company

Suppose an offshore company (“OC”) receives and retains UK taxable income.¹ If s.720 ITA did not apply, there would be one charge to tax: income tax borne by OC. However, if s.720 applies, it appears at first sight that there are two charges to tax:

(1) OC pays income tax at the basic rate under ordinary principles.

¹ OC’s income may be UK taxable because:

- (1) the income has a UK source and so is subject to income tax, eg UK rental income; or
- (2) OC is a UK resident foreign incorporated company and so is subject to corporation tax.

(2) The transferor (“T”) pays income tax on the same income under s.720. What is there to prevent double taxation?

30.2.1 *Transferor’s credit*

Section 745(1) ITA provides relief for T:

Income tax at the basic rate, the starting rate for savings or the dividend ordinary rate shall not be charged by virtue of section 720 or 727 in respect of any income to the extent that it has borne tax at that rate by deduction or otherwise.²

I refer to this as “**transferor’s credit**”.

The credit is available where OC is a UK resident foreign incorporated company even though such a company is subject to corporation tax at CT rates (not income tax at the basic/savings/dividend ordinary rates). HMRC say:

What if tax has been paid on the income?

If the amounts included in boxes 11 and 13 include tax credits or other tax paid on the income of the person abroad, then you may be able to claim a deduction against your liability for that tax. You will only be entitled to relief for the tax paid by the person abroad if it is in effect tax on ‘the same’ income, and only to the extent that the tax has actually been paid by, and not refunded to, the person abroad. The amount of tax for which you can claim relief should be included in Column C and also included in box 2. You should note Column E of your claim. In addition, you should send a schedule with the Foreign pages, showing the amount of each item of income, and tax credit/tax paid on that income, which has been included in boxes 11 and/or 13, and Column C. If the tax for which you are claiming relief is foreign tax, for which you wish to claim Foreign Tax Credit Relief (see page FN 3 of the Foreign notes) the details to be entered on the schedule should include:

Column A – Country or territory code

Column B – Amount of income arising or received before any tax taken

2 This was considered in *R v Dimsey & Allen* 74 TC 263 at [53]:

“This provision would have dealt with the case where the transferee’s income included income sourced in the UK and from which tax had already been deducted at source. But the words ‘or otherwise’ show that the provision would have covered also any case in which the transferee had paid tax on its income.”

off

Column C – Amount of eligible foreign tax

Column E – That you wish to claim Foreign Tax Credit Relief and rate of tax allowed (see page FN 3 of the Foreign notes)

Column F – Amount included in box 11 and/or box 13 which should be the amount arising before any tax taken off.

In the event that you do not wish to claim Foreign Tax Credit Relief for foreign tax, no entry should be made in Column E and the amount to be included in box 11 and/or box 13 should be the income after foreign tax. If the tax for which you are claiming a deduction is UK Corporation Tax then, in addition to entering the above details on the schedule, full details of how you have calculated the amount of credit claimed, and particulars (name, address and, where appropriate, tax reference number) of the person or company which paid the tax should be given in the ‘Any other information’ box of your tax return. If you do not yet know the final amount of tax paid by the person abroad, you should estimate the amount of credit available and amend your tax return when the final details are known. You must draw attention to the estimate and explain the circumstances in the ‘Any other information’ box of your tax return. If any additional tax becomes payable as a result of using an estimate the usual provisions for charging interest on tax paid late will apply.

If the income on which you are liable to tax under these provisions is a ‘foreign dividend’, then you may be entitled to a non-payable UK tax credit (see page FN 6 of the Foreign notes).³

The guidance note for 2006/07 added:

We will consider providing details of Corporation Tax paid upon receipt of written authority from the company concerned.⁴

Presumably the sentence was deleted from the guidance note as HMRC (rightly) felt embarrassed to say that an individual was not entitled to know the facts on which their tax was assessed.

³ Helpsheet 262 (income and benefits from transfers of assets abroad) 2010/11. In *R v Dimsey & Allen* 74 TC 263 at [55] Lord Scott suggested (without deciding) that transferor’s credit would apply in this case. But see 27.4.1 (UK resident foreign incorporated company) for an argument that s.720 does not apply here.

⁴ “Notes on Foreign” (the Notes on the Foreign pages of the tax return for the year ended 5 April 2007, under the heading “box 6.4A”, page FN11).

30.2.2 *Transferee's credit*

The limitation of the transferor's credit was explained in *R v Dimsey & Allen* 74 TC 263 at [56]:

Section [745(1)] ... is looking at the double taxation problem from the point of view of the transferor on whom the liability to pay tax on deemed income is being imposed. There is no comparable provision protecting the transferee in a case where, under s [720], the transferor has paid tax on his deemed income.

In the course of argument in *R v Dimsey & Allen*, HMRC announced a practice to solve this problem:

The Inland Revenue's Practice on section [720]

- [1] If in any case tax is paid by the transferee, the Inland Revenue will give credit for that tax against any charge to tax on the transferor under section [720 ITA] on the same income;
- [2] and conversely, if in any case tax is paid on any income by the transferor under section [720], the Inland Revenue will not tax the transferee on that income.

So that in every case, the Treasury received in all the full amount of tax chargeable on the transferor as if he were the only person liable.

Point [1] is the transferor's credit. I refer to point [2] as "**the transferee's credit**". The consequence is that either:

- (1) T pays all the tax on the income (and OC pays none); or
- (2) (a) OC pays tax (usually basic or dividend ordinary rate); and
(b) T has the credit for OC's tax (so T usually pays higher rate tax only).

This statement does not say whether (1) or (2) is to be the case. As far as HMRC are concerned it does not matter because the amount of tax collected will generally be the same. If T is the beneficial owner of OC, it may likewise not make much economic difference to T whether T or OC pay the tax. But T may have "power to enjoy" the income of OC while only having a remote and not particularly valuable interest in it.⁵ One can imagine a situation where T and OC each ask HMRC to assess the other!

⁵ For instance, if OC owes T a small debt.

There is no mechanism for tax paid by T to be recovered from OC or vice versa. HMRC have a broad discretion, subject to judicial review if they act unreasonably. How in practice should HMRC collect tax? It is suggested that HMRC's starting point should be that tax is to be borne by OC where tax is reasonably collectible from OC, ie if:

- (1) the income is dividend income with a tax credit (in this case, of course, no one has any choice about the matter);
- (2) tax is collectible under the non-resident landlord regulations, ie if OC complies with those regulations; or
- (3) OC is prepared to complete UK tax returns and pay the tax on its income.

It is fair that OC, which receives the income, should pay the tax on it. Then only higher rate tax is normally collected from T. Only in cases where OC refuses to pay should all the tax be collected from T. This seems consistent with the extract from "Notes on Foreign" cited above.

It is arguable that double-counting relief⁶ is the statutory basis for the transferee's credit. If that is correct, the transferee's credit is law and not a concession.

30.3 Distribution to T of income of company within s.720

So far we have been considering undistributed income of OC. I now turn to consider the position where the income is distributed to T by way of dividend. Suppose:

- (1) An offshore company ("OC") within s.720 receives income ("OC's income").
- (2) T owns all the shares in OC.⁷
- (3) The income of OC is distributed by way of dividend to T ("T's dividend income"):

⁶ See 30.6 (Double-counting relief).

⁷ The position is not materially different if the shares in OC are held in a trust under which T has an interest in possession.

Possible charges to tax here are:

- (1) IT on OC's income paid by T under s.720.⁸
- (2) IT on the dividend (paid by T) on normal principles.

Is there any relief from economic double taxation?

30.4 Distribution relief

Section 743(4) ITA provides:

If

[a] income treated as arising to an individual is charged to income tax under section 720 or 727 and

[b] the individual subsequently receives *that income*, it is treated as not being the individual's income again for income tax purposes.

(Emphasis added)

I refer to this as “**distribution relief**”. There are three conditions for this relief to apply:

- (1) Income treated as arising to the individual is charged to income tax under s.720.
- (2) The individual receives the income.
- (3) The dividend income which the individual receives is “that income”, ie the same as the income treated as arising to the individual.

Condition (1) would normally be satisfied.⁹ Condition (2) is *ex hypothesi* satisfied.

30.4.1 *When is income “the same” for purposes of distribution relief?*

At first sight condition (3) is more doubtful. The income which the individual actually receives is the dividend income. The income which the

8 Or IT on OC's income paid by OC and T, but with credit to avoid double taxation: see above. That makes no difference for the purpose of this example. It is assumed here that T does not qualify for the remittance basis.

9 See 30.2 (Undistributed UK taxable income of offshore company); 30.7.2 (When is an individual “charged to tax” under s.720?).

individual is treated as receiving under s.720 is the income of OC.¹⁰ The two are not the same. But if that is correct, then s.743(4) can never apply at all, which cannot be correct.

OC's income and the dividend income are in substance or economic reality the same income. It is true that they are usually regarded for tax as separate sources of income, not the same income. "The income of the company and the income derived from the company by the shareholders are two quite different incomes."¹¹ However for this purpose one looks to the substance and does not apply a formalistic view. This would be reasonably clear even in the absence of authority, because (on the formalistic view of income identity) it is impossible for T to receive the "same" income as OC. The source must change when T receives it.

This view is confirmed by *Aykroyd v IRC*.¹² The facts were relatively simple. T (UK domiciled) held an offshore holding company (within s.720) which held an offshore subsidiary (within s.720):¹³

10 Or on an alternative view, the income which the individual is treated as receiving is fictional, notional income, but for the purposes of distribution relief it does not matter if that view is correct.

11 *Vestey v IRC* 54 TC 503 at p.562. This is obvious but if further authority is needed, see *Canadian Eagle Oil v The King* 27 TC 205 at p.257: "for the purposes of Income Tax, the income of a foreign company and the income received from it in dividends by its British shareholders are not to any extent or effect one and the same income, but are two distinct incomes".

12 24 TC 515. The substance (as opposed to a formalistic) view of income identity is also applied in other contexts in the transfer of assets code. In *Vestey v IRC* Walton J held that a shareholder had no "power to enjoy" the income of the company in which he held shares because (applying the formalistic view of income identity) the shareholders had power to enjoy *different* income! However, this view was rejected in the House of Lords. See 28.7.5 (Enjoyment condition D: possibility of benefit). Similarly the court looked at the economic substance in order to determine whether two assets were "the same" (for the purposes of stamp duty subsale relief) see *Fitch Lovell v IRC* [1962] 1 WLR 1325.

13 More accurately, there were several holding and subsidiary companies, but nothing turns on that.

- (1) In 1936/7 the offshore subsidiary received income within s.720 (“the offshore subsidiary income”).
- (2) In 1937/8 the offshore subsidiary paid that income by way of dividend to the offshore holding company (“the offshore holding co income”). This income was also within s.720.
- (3) The transferor (“T”) was assessed on the offshore holding co income in 1937/8. T was not assessed on the offshore subsidiary income in 1936/7.

This was not an individual/company structure but a company/subsidiary structure, but in the context of distribution relief the issue is the same.

T argued that T could be assessed at stage (1) and so could not be assessed at stage (2). T relied on distribution relief. Macnaghten J accepted (rightly) that the relief could apply to the sequence of two dividends:

If the Appellant had in fact been charged in the year 1936–37, he could not have been charged again in the year 1937–38.

That is, the offshore holding co income was (for the purposes of distribution relief) the same income as the offshore subsidiary income.

30.4.2 *Distribution relief: conclusion*

Thus, even though OC’s income is distributed to T:

- (1) there is only one tier of income tax, the charge under s.720;
- (2) T has the benefit of tax credits or DT Relief relating to OC’s income. At first sight this seems anomalous. If s.720 did not apply (eg because the individual owning OC was not the transferor or because the motive defence applied) then the position is quite different:
 - (1) there will be two charges to tax if OC’s income is UK source:
 - (a) income tax on OC’s income paid by OC under ordinary principles; and
 - (b) income tax on the dividend paid to T.
 - (2) T does not have the benefit of tax credits or DT Relief relating to OC’s income.

On reflection, this is not an anomaly. The object of s.720 is to put the transferor in the same position as if they had not made the transfer: see *Chetwode v IRC* 51 TC 647. This view was rightly accepted by HMRC (despite the irritation of the judge in *Anson v HMRC* but the issue may not

have been fully explained to him).¹⁴

30.4.3 *Identifying income qualifying for distribution relief*

It may happen that the income of OC for company law purposes is greater than the income of OC for tax purposes (eg because of capital allowances). Distribution relief applies only so far as the income of the company has been charged to tax under s.720. For example, OC may have taxable income of 10, but accounting profits of 100. If OC declares a dividend of 100, then the charges to tax are:

- (1) IT on OC's income of 10 on T under s.720.
- (2) IT on the dividend on the amount of 90 (ie 100–10).

In these circumstances, the use of an offshore company does give rise to tax on the distribution which would not have arisen if there were no company.

Suppose OC receives £100 and spends £20 on expenses, but, the company having spare assets available for distribution, £100 is nevertheless distributed. It is suggested that the dividend of £100 should be identified with OC's income of £100 and so qualifies for distribution relief in its entirety. The £20 spent on expenses is attributed to other assets, even though as a matter of tracing it was paid for out of the s.720 income. The position is analogous to the *Duke of Roxburghe* case.¹⁵

30.4.4 *Planning: distribution and re-settlement*

Where distribution relief applies it is generally worthwhile distributing income to T; T may re-settle the income if desired. If this is not done during T's life, the benefit of the relief is lost later; see below.¹⁶

30.5 **Distribution (*not* to T) of income of company within section 720**

Suppose:

- (1) An offshore company ("OC") within s.720 receives income ("OC's

¹⁴ [2012] UKUT 59 (TCC). For the motive defence aspects, see 31.48 (Can an individual disclaim the motive defence?).

¹⁵ 20 TC 711. See 12.13.1 (Remittance from mixture of taxed and untaxed income).

¹⁶ This may also be done to avoid relevant income accumulating in a company held by a trust; see 29.30 (Is income of company held by a trust relevant income?).

income”);

- (2) T is not a shareholder in OC but has “power to enjoy” the income;¹⁷
- (3) P (a UK resident third party) owns all the shares;¹⁸
- (4) The income of OC is distributed by way of dividend to P.

In these circumstances it appears that there is economic double taxation:

- (1) OC’s income is subject to tax in the hands of T (or T and OC) under s.720.
- (2) P is subject to tax on the dividend.

Distribution relief does not apply because that relief only applies where OC’s income is subsequently received by the transferor, T. The transferor credit and the transferee credit do not cover this situation. However, double-counting relief applies.

30.6 Double-counting relief

Section 743 ITA provides:

- (1) No amount of income may be taken into account more than once in charging income tax under this Chapter.
- (2) If there is a choice about the persons in relation to whom any amount of income may be taken into account in charging income tax¹⁹ under this

17 T may have power to enjoy by holding a debenture or through being a beneficiary of the trust which holds OC.

18 The position is not materially different if the shares in OC are held in a trust under which P is life tenant, and to which s.624 ITTOIA does not apply.

19 Section 744 ITA provides:

“744 Meaning of taking income into account in charging income tax for section 743

(1) References in section 743(1) and (2) (no duplication of charges) to an amount of income taken into account in charging income tax are to be read as follows.

(2) In the case of tax charged on income under section 720 (charge where income enjoyed as a result of relevant transactions)—

- (a) if section 724(1) (benefit provided out of income of person abroad) applies, they are references to an amount of the income out of which the benefit is provided equal to the amount or value of the benefit charged, and
- (b) otherwise they are references to the amount of income charged.

(3) In the case of tax charged on income under section 727 (charge where capital sums received as a result of relevant transactions), they are references to the amount of that income.

(4) In the case of tax charged under section 731 (charge to tax on income treated as arising to non-transferors where benefit received as a result of relevant

Chapter, it is to be taken into account—

- (a) in relation to such one or more of them as appears to an officer of Revenue and Customs to be just and reasonable, and
- (b) if more than one, in such respective proportions as appears to the officer to be just and reasonable.

I refer to this as “**double-counting relief**”. This provision is vaguely worded, but I suggest it prevents double taxation:

- (1) Where T1 is charged under s.720 and T2 is charged under s.720; ie there are two transferors (but *Vestey* decided that there can only be one transferor).
- (2) Where T1 is charged under s.731 and T2 is charged under s.731; eg where two different individuals receive benefits, the s.733 computation often prevents a double charge (but not always).²⁰
- (3) Where T1 is charged under s.720 and T2 is charged under s.731.²¹
- (4) Where T1 is charged under general principles and T2 is charged under s.720 or s.731.

This therefore applies in the circumstances of the example of 30.5 (Distribution (*not* to T) of income of company within s.720). Before the enactment of double-counting relief in 1981, there was economic double taxation in these circumstances. Lord Greene did not regard this as double taxation. In an obiter comment in *Howard de Walden v IRC* 25 TC at 131, decided in 1940, he said:

[Counsel] pointed out that in so far as the right to enjoy income of the four companies is vested in the Appellant’s son, who holds the majority of the shares, income received by the son will be taxed in his hands in the ordinary way and at the same time the Appellant will be liable to tax on the whole income of the companies which is deemed to be his. This,

transfers), they are references to the amount of relevant income taken into account under section 733 (income charged under section 731) in calculating the amount to be charged in respect of the benefit for the tax year in question.”

20 See 29.12.5 (Step 5: Available Relevant income).

21 Although the words in s.743(1) could be construed to apply to situation (3) only, that would be absurd. Indeed, it is unusual that income could be taxed under s.720 and s.731. An example might be if income accrues which is not within s.720 because it is not remitted to the UK, then there is a charge under s.731, and then there is a remittance. Another example might possibly be if s.720 does not apply (because the transferor has no “power to enjoy”) but subsequently there is a capital payment within s.727. Another possible case is in 29.18 (Is income within s.720 relevant income?).

said [Counsel], involves double taxation since no relief is afforded by [distribution relief, now s.743(4) ITA]. There is a short answer to this argument. There is no double taxation since the subject-matter of tax is different, the income of the son being one thing and the income of the companies being another.

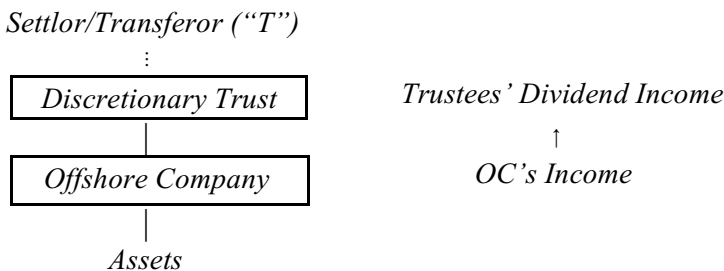

Several passages of *Howard de Walden* exhibit an anti-taxpayer ethos which may be attributed to the war-time background; “as we are at war”, as Darling J said in another context, “the ordinary mode of construing legislation has been suspended”.²²

Formalistically Lord Greene is right, the situation is one of economic rather than juristic double taxation. However, since the purpose of distribution relief is to avoid economic double taxation, both fairness and the scheme of the Act suggest that double-counting relief should do the same work in this context. It is considered that Lord Greene’s comment does not support the contrary view.

In practice this situation is rare as T either has no “power to enjoy” and so is outside s.720, or else T is life tenant/shareholder and receives the dividends personally and distribution relief applies.

30.7 Section 720 trust/company and company/subsidiary structure

So far we have been considering the (relatively) simple situation of an offshore company (OC) held by an individual (or an IP trust). We now turn to consider the position where OC is held by a non-resident settlor-interested discretionary trust. That is, trustees of a discretionary trust within s.720 ITA and s.624 ITTOIA hold a non-resident company within s.720:

²² Cited in Foxton, “*R v Halliday in Retrospect*” [2003] LQR 455.

Suppose:

- (1) Income is received by the OC (“OC’s income” at “stage (1)”).
- (2) OC’s income is paid to the trustees as dividend income (“the trustees’ dividend income” at “stage (2)”).

In principle this might give rise to two tax charges on T:

- (1) OC’s income charged under s.720 at stage (1);
- (2) The trustees’ dividend income charged under s.720 or s.624 at stage (2).

What is there to prevent double taxation?

30.7.1 *Distribution relief*

It will be recalled that distribution relief applies if:²³

- (1) OC’s income is within s.720;
 - (2) the trustees’ dividend income is received by T;
 - (3) the trustees’ dividend income is “that income” (ie the same income as OC’s income);
 - (4) the individual is charged to income tax on OC’s income under s.720.
- Condition (1) is satisfied. Condition (2) is satisfied because income is treated as received by T. Condition (3) is also satisfied: see 30.4.1 (When is income “the same” for purposes of distribution relief?).

30.7.2 *When is an individual “charged to tax” under section 720?*

The next requirement of distribution relief is that the income treated as arising to the individual must be “charged to income tax under section 720”. In *Aykroyd*²⁴ T failed because T had not been so “charged”:

It was suggested that, if the [offshore subsidiary’s income] were liable to assessment for the year 1936–37, that provision [s.743(4)] prevented them being chargeable in the following year. But that argument depended on the substitution of the word “chargeable” for the word “charged”. There is no ground that I can see for making any such substitution. ... as he had not been charged in the previous year, there was nothing to prevent him being charged in the year in question.

²³ See 30.4 (Distribution relief).

²⁴ See 30.4.1 (When is income “the same” for purposes of distribution relief?).

This is not obiter, but it is at first sight surprising and it certainly does not appear from the Judge's terse comment that the Court had the benefit of a full argument on the point.

Is it right? The word "charged" (like most words) takes its meaning from context. It may mean:

- (1) declaration of liability by statute;
- (2) assessment (including self-assessment);
- (3) payment.²⁵

It may or may not include unremitted income (un)taxed on the remittance basis, depending on the context.

The most common and primary sense of the word "charged" is that it refers to the declaration of liability. Every year, for instance, the FA provides that income tax shall be charged for that year: see eg s.31 FA 2000. This is the statutory declaration of liability. It is not referring to the making of assessments or collection of tax.

However, this meaning poses difficulties for HMRC who may not know that a s.720 liability arises or may be unable to make an assessment. So the *Aykroyd* interpretation that "charged" means "assessed" is probably correct. But in the case of unremitted foreign income where the remittance basis applies, it is suggested that the income should be regarded as "charged"

This does not mean that HMRC have an unfettered discretion:

- (1) to assess T on the subsidiary company's income; or
- (2) to assess T on the holding company's income.

Under self-assessment, T will normally self-assess T's income and should in principle return the income of the offshore subsidiary as T's income and distribution relief applies. However, where T does not pay tax due on the offshore subsidiary's income HMRC can collect tax on the offshore holding company's income and distribution relief does not apply.

Often it may not matter whether tax is charged on the offshore subsidiary's income or the offshore holding company's income. However, it may matter:

25 These correspond to the three stages in the imposition of a tax:

"there is the declaration of liability, that is the part of the statute which determines what persons in respect of what property are liable. Next, there is the assessment. ... assessment particularises the exact sum which a person liable has to pay. Lastly, come the methods of recovery, if the person taxed does not voluntarily pay."

Whitney v IRC 10 TC 87 at p.109.

- (1) For identifying the source of the income to which s.720 applies. Is the transferor taxed under s.720 in respect of the subsidiary's income or the holding company's income? This may affect:
 - (a) rates of tax, eg if the underlying company receives interest or rental income it may make a difference of 7.5% (the difference between the higher or additional rates and the dividend upper or dividend additional rates).
 - (b) availability of transferor's credit for UK tax paid by the company and double tax relief.
 - (c) source of income.
- (2) It may also affect the year in which the income is subject to tax.

30.7.3 *Double-counting relief*

This provision is discussed in 30.6 (Double-counting relief). It will apply in a s.720 trust/company or company/subsidiary structure but where distribution relief covers the same ground it should not be needed.

30.7.4 *Trust/company structure: HMRC practice*

RI 201 provides:

where income arises in an offshore company underlying a settlement and the income is not paid up immediately to that settlement the provisions of section [720 ITA] will be invoked where necessary to assess the income of the underlying company.

The position therefore depends on whether income is paid up "immediately".

- (1) *If the income is not paid up immediately.* The provisions of s.720 will be invoked. This is straightforward. RI 201 does not address the question (discussed above) of relief for a subsequent dividend by the underlying company.
- (2) *If the income is paid up immediately.* RI 201 implies that:
 - (a) s.720 will not be applied so the settlor/transferor will not be taxed on OC's income; and
 - (b) the settlor will be taxed on the trust income (as life tenant or under s.624) in the normal way.

An important question is exactly the moment when one moves from (1)

to (2). What is the meaning of “immediately”? Does it mean within a day? Or a week? Or at any time within the same tax year? Or at any time before the relevant returns are due or submitted? Do HMRC have a discretion? Does the answer depend on the type of income? One must bear in mind that some forms of income cannot be quantified until the end of an accounting period (eg trading and rental income).

If income is distributed immediately, RI 201 does not expressly address the question whether the settlor is taxed on OC’s income or on the dividend. It makes a difference because OC’s income may have a tax credit and the rates of tax may be different. But by implication if s.720 is not “invoked” then the tax must be charged on the dividend.

This is a sorry muddle. In practice, the author suspects that HMRC apply the “immediately” concept with latitude and are not concerned as long as they can see that income comes into tax in one year or another, in one form or another.

30.7.5 *Trust/company structure: further example*

Suppose in the trust/company structure illustrated at 30.7 (Section 720 trust/company and company/subsidiary structure) the company:

- (1) receives £100 income;
- (2) spends £20 of the £100 it received on expenses (not deductible for the purposes of s.720); and
- (3) distributes £80.

It is suggested that £100 is taxable at stage (1) and the £80 is tax free at stages (2) and (3). Close examination of RI 201 (see above) suggests HMRC might assess £20 at stage (1) and £80 at stage (2). It is doubtful whether the statement is meant to bear close examination, but it makes little difference in practice.

30.8 Life policies

In *IRC v Willoughby* 70 TC 57 Professor Willoughby (“T”) transferred assets to a non-resident life insurance company as a premium for a life policy. T was not taxed on the income accruing to the insurance company as the motive defence applied. Had the defence failed, there would in principle have been double taxation:

- (1) T would pay income tax on income arising to the life insurance company (to the extent that it arose as a result of T’s premium); and

(2) T would pay income tax on the gain arising from the policy under the chargeable event provisions.

HMRC argued that relief was available under two provisions, s.547(2) ICTA and distribution relief.

The Special Commissioner rightly rejected the argument that distribution relief applied:

... s.743(4)²⁶ only relieves from tax income which is subsequently received by an individual whose income it has been deemed to be in earlier years under s.739(2).

The s.720 income is not the same as the chargeable event income.

Section 547(2) ICTA then provided:

Nothing in subsection (1) above [deeming chargeable event gains to be taxable income] shall apply to any amount which is chargeable to tax apart from that subsection.

The Commissioner rightly dismissed the argument that this conferred relief:

So far as double taxation is concerned, in my view s.547(2) [ICTA] and s.743(4) [ICTA] do not provide relief. The former gives relief if the amount of the gain arising in connection with a policy on the happening of a chargeable event, which is deemed to form part of the individual's total income for the year in which the event happens, is chargeable to tax apart from subs (1) of s 547. This does not provide relief for the taxation of income under s.739 [ICTA] in the years before the chargeable event occurs.

That is not the end of the story, as the tax law rewrite have expanded the scope of the relief. Section 527 ITTOIA provides:

- (1) This section applies if the whole or part of any receipt or other credit item is taken into account in calculating both—
 - (a) the amount of a gain treated as arising under this Chapter, and
 - (b) an amount on which income tax is charged otherwise than under this

26 The reference is to ICTA but remarkably, perhaps uniquely, the reference is still the same: s.743(4) ITA.

Chapter or on which corporation tax is charged.

(2) The amount of the gain on which tax is charged under this Chapter is reduced by so much of the amount of that receipt or other credit item as is taken into account in both those calculations.

It appears from EN ITTOIA change 95 that this change was intended to benefit traders in policies²⁷ but it could arguably apply here. There is a also hint in *Willoughby* at p.84 that relief may be available by concession, but that would obviously not bind HMRC. In practice, fortunately, it will be rare for the TAA rules apply to income arising as a result of policy premiums or other payments to life companies.²⁸

30.9 Section 731 charge followed by income distribution

I now turn to consider double taxation issues relating to s.731. The transferor's credit, the transferee's credit and distribution relief only apply to s.720, so they have no relevance here.

Suppose:

(1) trustees of a trust receive income and do not distribute it;

27 "Change 95: Gains from contracts for life insurance etc: reductions for sums chargeable to tax apart from section 547(1) of ICTA: section 527

This clarifies the meaning of the exception from the charge to tax under section 547(1) of ICTA given by section 547(2) of ICTA for any amount chargeable to tax apart from section 547(1) of ICTA.

Section 547 of ICTA deals with the method of charging chargeable event gains to tax. This differs according to the person who is interested in the policy. For example, under section 547(1) of ICTA where the rights in a policy or contract are held by an individual as beneficial owner the gain forms part of the individual's total income. However, section 547(2) of ICTA states "Nothing in subsection (1) shall apply to any amount which is chargeable to tax apart from that subsection."

In practice, the words "amount which is chargeable to tax" in section 547(2) of ICTA are taken to mean the amount of the receipts and credits taken into account for the purposes of ascertaining the overall taxable profit under another provision, rather than the actual amount that is charged to tax under another provision, which in the case of a trader, for instance, will be the net profits of the trade.

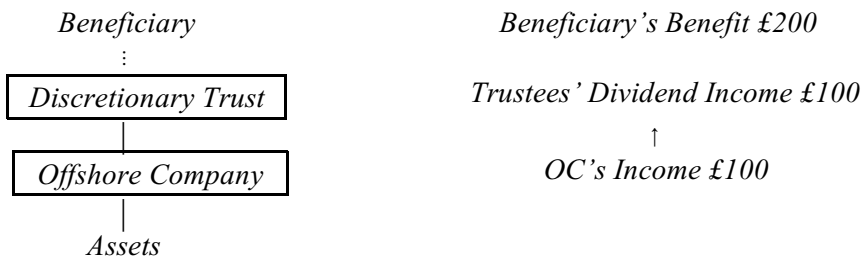

Section 527 which rewrites section 547(2) of ICTA makes it clear that the amount chargeable to tax under Chapter 9 of Part 4 of this Act is reduced by the amount of the receipt or other credit item that is taken into account in calculating the amount on which income tax is charged otherwise than under Chapter 9 of Part 4 or the amount on which corporation tax is charged."

28 See 32.6.5 (Income accruing to life company).

- (2) a beneficiary receives a benefit taxable under s.731;
 - (3) the income is later distributed to the beneficiary as income.
- It is understood that the distributed income is not taxed. This might be regarded as informal concession but the better view is that double-counting relief applies here.

30.10 Section 731 trust/company structure²⁹

The problem is best illustrated by example:

Trustees of a discretionary trust within s.731 hold a non-resident company within s.731.

- (1) £100 income is received by the company (“the company’s income” at “stage (1)”).
- (2) The £100 is paid to the trustees as dividend income (“the trustees’ dividend income” at “stage (2)”).
- (3) A beneficiary (“B”) receives a benefit of £200.

Is the relevant income £100 or £200? That is, does the interposition of the company double the relevant income? If so, then the s.731 charge on B is in principle on £200.

It is suggested that double-counting relief applies; see 30.6 (Double-counting relief).³⁰

²⁹ Contrast 30.7 (Section 720 trust/company and company/subsidiary structure).

³⁰ If that is wrong, then a second argument is that after the company’s income is distributed it ceases to be relevant income. See 29.25 (Corporate income distributed to trust). This argument will not avail if the facts are a variant of the above example:

- (1) £100 income is received by the company;
- (2) a beneficiary receives a benefit of £200;
- (3) the £100 is subsequently paid to the trustees as dividend income.

For then even if the company’s income ceases to be relevant income after being distributed, it does so too late.

CHAPTER THIRTY ONE

TRANSFER OF ASSETS ABROAD: MOTIVE DEFENCE

31.1 Motive defence – Introduction

Sections 736 to 742 ITA provide a defence to the TAA provisions which I call “**the motive defence**” (or where comparing it to other purpose tests, “the TAA motive defence”).¹

The TAA motive defence is one of a very large number² of unallowable purpose tests in UK tax legislation. Although there is a wide variation in matters of detail, they share a common framework, and cases on these other provisions can shed light on the TAA motive defence. The most litigated is the purpose test for the transactions in securities rules.

31.1.1 *Terminology*

Section 736(3) ITA provides two self-explanatory terms:

In this section and sections 737 to 742—

“**post-4 December 2005 transaction**” means a relevant transaction effected on or after 5 December 2005, and

“**pre-5 December 2005 transaction**” means a relevant transaction

-
- 1 A note on terminology. The word “motive” is not used in the legislation, and is perhaps not ideal because a distinction is sometimes drawn between purpose and motive. However the label is convenient, reasonably accurate, and sufficiently well established that it is not worth looking for any alternative. It originates from the Inland Revenue’s Notes on clause 18 Finance Bill 1936, accessible www.kessler.co.uk.
 - 2 HMRC Discussion Document “Simplifying Unallowable Purpose Tests” (July 2009) p.7 gave the number as “over 200” but many have been added since then, and no-one could compile a full list.

effected before 5 December 2005.

In this chapter:

- (1) “**Old Conditions A and B**” are conditions A and B in s.739 ITA (applying to pre-5 December 2005 transactions).
- (2) “**New Conditions A and B**” are conditions A and B in s.737 ITA (applying to post-4 December 2005 transactions).

References to Condition A or B (without more) means either the old or the new version of the Conditions.

There have been two explanations of the 2006 clauses: Explanatory Notes on the Draft Clauses, published 5 December 2005, and Explanatory Notes on the Finance Bill 2006. I refer to these as “**EN Draft Clauses (2005)**” and “**EN FB 2006**”.

I distinguish between:

- (1) An “**innocent**” transaction, one which satisfies Condition A or B (in short, no tax avoidance purpose); and
 - (2) a “**tainted**” transaction, one which does not satisfy Condition A or B.
- For the definition of “**relevant transactions**” see 27.10 (Significance of associated operations).

31.2 Motive defence condition A

Section 737 ITA sets out New Condition A:

- (1) This section applies if all the relevant transactions are post-4 December 2005 transactions.
- (2) An individual is not liable to income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs—
 - (a) that Condition A is met, or
 - (b) in a case where Condition A is not met, that Condition B is met.
- (3) Condition A is that it would not be reasonable to draw the conclusion, from all the circumstances of the case, that the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

Section 739 ITA sets out Old Condition A:

- (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.

(2) An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.

(3) Condition A is that the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

31.3 Motive defence condition B

Section 737(4) ITA sets out New Condition B:

Condition B is that—

- (a) all the relevant transactions were genuine commercial transactions (see section 738), and
- (b) it would not be reasonable to draw the conclusion, from all the circumstances of the case, that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.

Section 739(4) ITA sets out Old Condition B:

Condition B is that the transfer and any associated operations—

- (a) were genuine commercial transactions, and
- (b) were not designed for the purpose of avoiding liability to taxation.

31.4 Enactment history

The original wording was much simpler. It provided exemption if:

the transfer and any associated operations were effected mainly for some purpose other than the purpose of avoiding liability to taxation.³

The Solicitor-General explained why the text was changed to (what is now) Old Conditions A & B:

³ Section 18 FA 1936. Section 28 FA 1938 substituted the text which is now Old Conditions A and B.

A taxpayer⁴ transferred a large amount – he was not one of the small people for whom my hon. and learned Friend was pleading – of foreign securities to a trust company abroad on certain trusts under which the income was to be accumulated until the death of the taxpayer. There was a discretion to the trustees to pay certain portions of the income to the taxpayer or to his son. The deed gives to the taxpayer and his son power, with the consent of the trustees, to revoke the trust, or, alternatively, they can withdraw all or any part of the trust property for their own benefit. The trust income has been accumulated, and none of it has been distributed. The vigilant Revenue authorities pursued this taxpayer, and he contended, successfully, as it transpired, on appeal, that the foreign trust was born because of his fears as to the financial position of this country and the dangers of the situation on the Continent ... in 1936. He stated that he wanted to find a stable country where he could make safe provision for his family. The Special Commissioners decided that the main purpose of the transaction was occasioned by A's pessimistic view of the European situation at the time; that, arising out of that, his main intention was to make provision for his family in a safer country; and that, if there was any intention of avoidance of taxation, it was incidental to the main purpose. They therefore decided that there was no liability under Section 18 FA 1936. That instance has only to be cited to the Committee for the Committee to realise that on this particular matter the hon. Member for Chesterfield (Mr. Benson) was a true prophet in 1936, when he said that the word "mainly" would be too wide.⁵

A case on similar facts might still succeed today, but the test is stiffer. The taxpayer would need (in short) to show that tax avoidance was not even one of the purposes of the transfer.

31.5 "Commercial" in Old Condition B

Commercial is a requirement for Condition B but not Condition A. In Old

4 Presumably a UK resident and domiciled transferor. (HMRC did not contend at that time that (what is now) s.720 applied to a transferor unless UK resident at the time of the transfer, and a foreign domiciled transferor would have qualified for the remittance basis.) So one can see why HMRC found the case troubling.

5 Hansard 27 June 1938, col 1610. It is impressive that an income tax dispute relating to 1936/7 was resolved by a Special Commissioners' decision early in 1938.

Condition B the term is not defined. “Commercial” is an imprecise word.⁶ The epithet “genuine” does not make it any clearer. In New Condition B there is a complex definition which is considered in the next section.

It is submitted that there is no single factor which determines what is “commercial” but a number of factors may indicate one way or the other.

31.5.1 *Transfer with element of bounty*

A transaction made with bounty (gratuitous intent) is not commercial.⁷ The concept of bounty (unlike “commercial”) is relatively clear. For instance, a gift to a trust for the benefit of the settlor’s family is not commercial. The same applies even if the class of beneficiaries includes the settlor and the trust is revocable. By contrast, a transfer of assets to a company wholly owned by oneself may be a “commercial transaction” even if the transfer is for less than full (or nil) consideration, and a transfer to an employee trust may be commercial.⁸

6 *IRC v Plummer* 54 TC 1 at p.48: “What exactly is comprehended in the phrase ... ‘a bona fide commercial transaction’, I do not know” (Viscount Dilhorne). Cf *IRC v Goodwin* 50 TC 583 at p.598.

7 *Bulmer v IRC* [1967] Ch 145, citing *IRC v Goodwin* 50 TC 583 at p.607. HMRC adopt this approach in *Venture Capital Schemes Manual*:

12140. Subscriptions for shares: Commerciality [November 2010]

For the EIS and CVS, an investor in a company is not eligible for relief unless the subscription is made for bona fide commercial purposes. This rules out any subscription which is motivated by considerations of benevolence. This could be the case if, for example, the company were the proprietor of an unsuccessful professional football club and a supporter of the club paid a large premium for shares in the company; that may well [interestingly, the text formerly said *would clearly*] not be a commercial subscription. Similarly, if the company is owned by a person whom the investor wishes to benefit, and the investor pays a large premium for the shares with the object of increasing the value of the other person’s shares, that too would not be a commercial subscription.”

Ambrose Bierce makes the same point in *The Devil’s Dictionary* (1911) defining “Merchant”: “A commercial pursuit is one in which the thing pursued is the dollar.”

8 This is supported by *Wannell v Rothwell* 68 TC 719 at p.733B, a case on loss relief which uses the word “commercial”. See too *IRC v Levy* 56 TC 68 at p.87. The issue arose in a case on the meaning of settlement-arrangement. The definition of settlement-arrangement does not include the word “commercial” but the case law “bounty” requirement overlaps with the concept of “commercial”.

31.5.2 *Non-business transaction*

In *Carvill v IRC* the Special Commissioner ventured this explanation:

There was not much difference between the parties about what constituted a bona fide commercial transaction. [Counsel for the taxpayer] contended that this was any genuine transaction which implements or facilitates a business end; [Counsel for HMRC] contended that the transaction must be in furtherance of commerce, ie a trade or business. I shall follow these two meanings.⁹

This seems a fair paraphrase though one should always beware of a paraphrase. At first sight it does not seem to take us very far because the word “business” is notoriously wide and slippery. Nevertheless, one can suggest examples of transactions which should not be classified as commercial because they are not in furtherance of a business. One is the transfer to a trust to avoid the hazards of war, discussed in 31.4 (Enactment history). Another example is a transfer to avoid claims by non-business creditors, eg a claim on divorce or forced heirship. These transfers may involve an element of bounty (and may be classified as non-commercial for that reason) but in any event they should be classified as non-commercial transactions because they are not in furtherance of a business purpose.

The HMRC draft guidance for unallowable purpose tests correctly states at para 10110:

Often, a business will take the view that tax is a commercial cost and minimising it is a commercial aim. ... However, in deciding whether a “purpose test” is triggered, minimising tax is not regarded as a business or commercial purpose.

31.5.3 *Making or managing investments*

In HMRC’s view:

The expression “bona fide commercial” in [Old Condition B] is taken to apply [1] only to the furtherance of trade or business, and [2] not to

⁹ [2000] STC (SCD) 143 at p.166.

the making or managing of investments.¹⁰

Proposition [2] (that “commercial” does *not* apply to making or managing investments) is untenable:

- (1) The statement does not say what the position is if the making or management of investments constitutes a business. A transfer may be both in the furtherance of a business *and* in the course of making or managing investments.¹¹ I guess that the intended meaning is, that investment transactions in the course of a business are commercial, but investment transactions which are not in the course of a business are not commercial. This (difficult) concept of business is entirely distinct from the concept of what is commercial.
- (2) More fundamentally, making or managing investments *is* generally regarded as “commercial” even if it does not constitute a business. What can be more “commercial” than the management to maximise investment return? This point is recognised in *Lewis v IRC* [1999] STC (SCD) 349 at p.362:

It is trite law that in exercising their duties trustees must use as much diligence as a prudent man of business ... Faced with the self-investment problem their duty was to act in a business-like manner: this they did. Put another way, they acted commercially as was their duty. In our view it would be construing the statute too narrowly to hold that they did not carry out the transactions for bona fide commercial reasons, unless an investment decision cannot be for commercial reasons.

- (3) Section 738(4) ITA assumes that making/managing investments may be “commercial” (in the ordinary sense of the word).

10 RI 201. This was perhaps the view of the drafter of s.724 CTA 2010 which refers to transactions:

“(a) for genuine commercial reasons *or* (b) in the ordinary course of making or managing investments.”

(Emphasis added). But para (b) might have been added for the avoidance of doubt, or for some exceptional case, and it is not clear that the drafter really thought that making or managing investments would not usually be commercial.

11 Making or managing investments often constitutes a business. For instance, s.105(3) IHTA refers to the business of making or holding investments; s.1218 CTA 2009 refers to “a company whose business consists wholly or partly of making investments”.

Proposition [1] (that the expression “commercial” applies *only* to the furtherance of trade or business) was put to the Commissioners in *Carvill*, where it obtained some support, see above. Nevertheless, it is too narrow. In practice, commercial transactions will normally further trades or businesses so the issue will not often arise. But there are counter examples, as discussed above: making or managing investments is in principle a commercial transaction even if it is not in the course of a business.

The most that can be said is that a transaction which is not in furtherance of a trade/business is less likely to be commercial, but this factor is not decisive.

31.5.4 *Commercial from whose viewpoint?*

From whose viewpoint does one assess commerciality? The answer is that it should be looked at from the viewpoint of the transferor, but it would be a rare arrangement under which one party is and the other party is not acting commercially. In *IRC v Willoughby* HMRC accepted that bonds were commercial transactions for Royal Life who issued them but argued that they were not for Professor Willoughby who acquired them. The Special Commissioner did not agree:

If a contract is entered into by two people and it is a bona fide commercial transaction for one of them, it cannot be not a bona fide commercial transaction for the other party to the contract in the absence of any reason for impeaching the latter’s good faith.¹²

The point was not discussed on appeal.

31.6 “Commercial” in New Condition B

Section 738 ITA contains a definition of “commercial” for the purposes of New Condition B. The definition is artificial in that it excludes some transactions that are “commercial” in the normal sense of the word. New Condition B is therefore rather narrower than Old Condition B.

Section 738(1) ITA provides:

For the purposes of section 737, a relevant transaction is a commercial

¹² 70 TC at p.86H.

transaction only if it meets the conditions in subsections (2) and (3).

Is s.738 an *exhaustive* definition of “commercial” or is it merely a partial, exclusory definition? That is, if a transaction meets the requirements set out in the section, is it necessarily “commercial” or must the transaction also be “commercial” in the ordinary sense of the word? The wording in s.738(1) (“a ... transaction is a commercial transaction only if ...”) could be read as an exhaustive or a partial exclusory definition. It is suggested that s.738 is an exhaustive definition because the legislation is intended to make the law clearer, and a partial definition does not do that. In practice it is difficult to think of a transaction which meets the definition which is not commercial in the ordinary sense of the word, so the issue may not arise.

31.6.1 *Course of business*

Section 738(2) ITA sets out the first requirement of “commercial”:

It [the relevant transaction] must be effected—

- (a) in the course of a trade or business and for its purposes, or
- (b) with a view to setting up and commencing a trade or business and for its purposes.

In the following discussion I use the word “business” to mean “trade or business”.¹³

At first sight this more or less encapsulates the natural meaning of “commercial”. But in fact it is restrictive. An individual may make an investment which is not in the course of a business, eg a purchase of a company. This is commercial in the general sense of the word, but it is not “commercial” within the new definition. Section 738(2) thus gives effect to HMRC’s proposition [1] of the meaning of “commercial” in Old Condition B.¹⁴

If a transaction is made between X and Y, it may be in the course of a business of X but not in the course of a business of Y. For example, if Y (an individual) subscribes for shares in X Ltd, an investment company, the issue of shares is in the course of the business of X Ltd. That is sufficient

13 For HMRC views on what constitutes a business, see CG Manual para 65715 and Shares and Assets Valuation Manual para 111110.

14 See 31.5.3 (Making or managing investments).

to meet the requirement of s.738(2).

31.6.2 *Arm's length requirement*

Section 738(3) ITA sets out the second requirement of “commercial”:

It [the relevant transaction] must not—

- (a) be on terms other than those that would have been made between persons not connected with each other dealing at arm's length, or
- (b) be a transaction that would not have been entered into between such persons so dealing.

Taken literally, this would exclude an interest free loan to a wholly owned company (even if it is a trading company). Such loans are commercial in the normal sense of the word. One wonders whether that was foreseen by the drafter. EN Draft Clauses (2005) claims that the change merely “clarifies and confirms” the correct interpretation of the existing statute. It is suggested that the provisions should be construed purposively, not literally, so that an interest free loan to a wholly owned company *is* a commercial transaction. Otherwise even dividends are apparently non-commercial transactions, which is absurd.

31.6.3 *Investments restriction*

Section 738(4) ITA restricts the definition of commercial by providing an artificial definition of “trade or business”:

For the purposes of subsection (2), making investments, managing them or making and managing them is a trade or business only so far as—

- (a) the person by whom it is done, and
 - (b) the person for whom it is done,
- are persons not connected with each other and are dealing at arm's length.

First one must identify: (a) “the person *by* whom it is done”. “It” must refer to the making or managing of investments. Thus we must identify the person carrying on the business.

Next one must identify: (b) “the person *for* whom it (the business) is done”. This is gibberish. A business is not in normal English “done for”

anyone. Presumably the reference is to the customers of the business. For example, if the business is a property business perhaps it is done for the tenants? Is the business of buying and selling shares done for the vendors and purchasers?

If one can identify a person within (b), the making/managing of investments is only business “so far as” it is done for unconnected persons. Normally an activity is or is not a business: it cannot be a business to a limited extent? If it is, what follows: what if most but not all of the customers are unconnected?

While one might, charitably, rewrite the subsection so that it meant that the business must be substantially carried on between unconnected persons, the proper course would be for a court to dismiss it as meaningless.

The subsection does not apply to a company trading in financial assets since these are not “investments”.

Suppose T subscribes for shares or debentures in (or makes a loan to) an investment company. The transaction satisfies s.738(2) since the company is carrying on a trade or business. The transaction satisfies s.738(3) if it is on arm’s length terms. The business satisfies s.738(4) provided the business is conducted with third parties: it does not matter that T and the company are connected.

31.6.4 *Commentary*

When one contemplates the difficulties raised by the statutory definition, one appreciates the wisdom of the 1936 drafter in leaving “commercial” undefined. The word “commercial” is often used motive defence tests¹⁵ and nowhere else is it defined. It is suggested that the statutory definition of commercial in s.738 ITA should be repealed.

31.7 “Avoidance”, “mitigation”, “tax reduction”, “evasion”: introduction¹⁶

I turn to discuss the complicated, emotionally charged, and in practice constantly abused term “tax avoidance.” It is helpful to begin with a

¹⁵ There are too many to give a full list but among the most important are s.138 TCGA; s.734 CTA 2010.

¹⁶ For further reading, see Nabil Orow, *General Anti-Avoidance Rules* (Jordans, 2000). This has an extensive bibliography.

fourfold categorisation:

- (1) *Tax evasion*: Conduct which constitutes a criminal offence (fraud on HMRC or similar offences). This normally involves dishonest submission of an incorrect tax return. Dishonesty is essential to the offence.
- (2) *Honest misdeclaration*: The submission of an incorrect tax return without dishonesty. Those involved may be culpable (guilty of neglect or wilful default) but not dishonest.
- (3) *Tax avoidance*: Arrangements that reduce tax liability in a manner contrary to the intention of Parliament (I come later to consider this concept in more detail).
- (4) *Tax mitigation*: Conduct which reduces tax liabilities without “tax avoidance” (not contrary to the intention of Parliament).

The distinctions between these concepts (especially avoidance/evasion and avoidance/mitigation distinctions) are now commonplace. They may appear obvious. They are taught to every student. No policy debate would be possible without them. However, these concepts and their associated terminology have only emerged after a gradual process of development and even now the terminology is not always adopted. It is essential to bear this in mind on reading sources on this subject.¹⁷

For an assessment of subjectivity, morality and judicial criticism of the avoidance/evasion distinction see Kessler “Tax Avoidance Purpose and s.741 ICTA” [2004] BTR 375 at p.407.

31.7.1 *Avoidance/evasion distinction*

An avoidance/evasion distinction very similar to the present was recognised very early (and was surely self-evident at any time) but at first there was no terminology to express it. In 1860 Turner LJ suggested

¹⁷ eg the 1920 Royal Commission on the Income Tax Cmd. 615 discussed evasion, honest mis-declaration and avoidance in one chapter headed “The Prevention of Evasion”. In this discussion the words “avoidance” and “evasion” were used quite indiscriminately, see para 625. It is an interesting question whether the absence of terminology hampered discussion of the issues or whether the lack of discussion or interest led to the absence of suitable terminology. I suggest the latter: in the 1920s, criminal prosecution for tax evasion was rare, and only in blatant cases. Thus the avoidance/evasion distinction was not relevant. Likewise, tax avoidance (in the modern sense) was then still in its infancy so the avoidance/mitigation distinction also had little relevance.

evasion/contravention (where evasion stood for the lawful side of the divide).¹⁸ In 1900 the distinction was noted as two meanings of the word “evade”.¹⁹ The technical use of the words avoidance/evasion in the modern sense originated in the USA where it was well established by the 1920s.²⁰ It was slow to be accepted in the UK. By the 1950s, knowledgeable and careful writers in the UK had come to distinguish the term “tax evasion” from “avoidance/mitigation”.²¹ A discussion of

18 *Fisher v Brierly* (1860) 1 de G F&J 643 at p.663. It is a pity this terminology did not catch on because it is more transparent than avoidance/evasion.

19 *Bullivant v AG* [1901] AC 196 at p. 207:

“The word ‘evade’ is ambiguous. ... there are two ways of construing the word ‘evade’: one is, that a person may go to a solicitor and ask him how to keep out of an Act of Parliament – how to do something which does not bring him within the scope of it. That is evading in one sense, but there is nothing illegal in it. The other is, when he goes to his solicitor and says, ‘Tell me how to escape from the consequences of the Act of Parliament, although I am brought within it’. That is an act of quite a different character.”

20 It is found in the scholarly Sears, *Minimising Taxes*, 1922, Vernon Law Book Co and can be traced to Oliver Wendell Holmes in *Bullen v Wisconsin* (1916) 240 US 625 at p.630. It is regarded as basic in Dennis Hartman, *Tax Avoidance*, Legal Publishing Soc, Washington (1930) which cites two textbook definitions in similar terms. The practice of tax avoidance was more advanced in the USA; the first published work on the subject in England was Moore, *The Saving of Income Tax Surtax and Death Duties*, (1935) (the publication of which lead to the enactment of the TAA provisions).

21 The 1955 Royal Commission Cmd. 9474 para 1016:

“It is usual to draw a distinction between tax avoidance and tax evasion. The latter denotes all those activities which are responsible for a person not paying the tax that the existing law charges upon his income. *Ex hypothesi* he is in the wrong, though his wrongdoing may range from the making of a deliberately fraudulent return to a mere failure to make his return or to pay his tax at the proper time. By tax avoidance, on the other hand, is understood some act by which a person so arranges his affairs that he is liable to pay less tax than he would have paid but for the arrangement. Thus the situation which he brings about is one in which he is legally in the right, except so far as some special rule may be introduced that puts him in the wrong.”

Note that “evasion” is used here (unlike present usage) to describe dishonest criminal evasion and honest mis-declaration. Lord Templeman used this (by then old-fashioned) terminology in *IRC v Challenge Corporation* [1986] STC 548: “Tax evasion occurs when the commissioner is not informed of all the facts relevant to an assessment of tax. Innocent evasion may lead to a re-assessment. Fraudulent evasion may lead to a criminal prosecution as well as re-assessment.” It does aid clarity if the term “evasion” is restricted to what Lord Templeman terms “fraudulent

evasion in the criminal sense is outside the scope of this chapter. It is important for our purposes to note that the term “evasion” was regularly used (by modern standards, misused) in the sense of avoidance, in law reports and elsewhere, at least up to the 1970s.²² Now that the terminology has received official approval in the UK²³ this usage can be condemned as erroneous (but it still happens).²⁴ It is sometimes helpful to use the expressions “legal avoidance”²⁵ and “illegal evasion”, to make the meaning clearer.

The distinction is now accepted internationally:

72. The terms “tax evasion” and “tax avoidance” have not always been

evasion”.

22 Examples include: *Coutts v IRC* [1964] 1 AC 1393 at p.1420; *Jamieson v IRC* (1963) 41 TC 43 at p.70; *Cory v IRC* [1965] AC 1088 at p.1107; *Greenberg v IRC* (1971) 47 TC 240 at p.271: “Parliament attempted to prevent this and other methods of tax evasion by provisions in the Finance Act 1960”. This usage seems to have stopped in the 1970s; at this time UK economists were giving increasing attention to the subject of tax avoidance and evasion (*Tax Avoidance*, p.1, IEA 1979) and perhaps their work had an effect on legal usage. Note that this is purely a semantic and not a substantive point that is being made here. The old usage certainly does not reflect the view that the evasion/avoidance distinction is unreal or unclear or that one can shade into the other. The legal distinction between the two is tolerably clear since evasion involves dishonesty, a tolerably well defined and understood concept. The term “avoidance” used in the IEA publication referred to was coined as a convenient term to mean avoidance/evasion. The book noted the lack of *economic* distinction between the two concepts; the economic similarity was the justification for the new coinage. (The book also noted the blurring of a moral distinction between the two concepts either because avoidance was seen by some as immoral or because evasion was seen by some as not immoral; the book did not suggest a lack of a legal distinction which was unquestioned then and still should be now.)

23 *Craven v White* 62 TC 1 at p.197; OED 2nd edition (1989) entry under “Taxation.”

24 For example, see *R v Charlton* [1996] STC 1418 at p.1421.

This is particularly common in EU case law, which regularly uses “evasion” where avoidance is meant; eg *Cadbury Schweppes v IRC* [2006] STC 1908 at [50]; *Thin Cap Claimants v HMRC* [2007] STC 326 at [37] discussed 56.8.4 (Need to prevent tax avoidance). Either EU translators do not know the UK distinction or they do not know the UK terminology, perhaps being misled by the French word *évasion* which means (in UK terminology) avoidance.

Similarly, s.482 United States Internal Revenue Code refers to allocation of income that “is necessary to prevent evasion of taxes” but the intended concept is one of avoidance.

25 “Legal avoidance” is a standard term in recent double tax conventions.

used precisely or with a uniform meaning.²⁶ Strictly speaking, tax evasion is considered to consist of wilful and conscious non-compliance with the laws of a taxing jurisdiction. Tax evasion is an action by which a taxpayer tries to escape legal obligations by fraudulent or other illegal means. The illegal conduct might involve simply failing to report income or fabricating deductions, or it may involve highly sophisticated tax planning that is premised on false or intentionally deceptive representations to the tax authorities. Tax evasion may arise as a result of a failure to properly report income that is legally earned. It may also result from the evasion of tax on income that arises from illegal activities, such as smuggling, drug trafficking, and money-laundering. In a broader sense, tax evasion may encompass a reckless or negligent failure to pay taxes legally due, even if there is no deliberate concealment of income or relevant information.

73. Tax avoidance, in contrast, involves the attempt to reduce the amount of taxes otherwise owed by employing legal means.²⁷ However, the borderline between evasion and avoidance in specific cases may be difficult to define. For one thing, the criminal laws of countries differ, so that behaviour that is criminal under the laws of one country may not be criminal under the laws of another.²⁸ In addition, the definitions of civil and criminal tax fraud may overlap, so that it is within administrative discretion whether or not to pursue a criminal fraud case in a specific instance. In reality, there is a continuum of behaviour, ranging from criminal fraud on one extreme, to civil fraud, to tax avoidance that is not fraudulent but which runs afoul of judicial or statutory anti-avoidance rules and therefore does not succeed in minimizing tax according to law, and finally to tax-planning behaviour which is successful in legal tax reduction. ...²⁹

26 [Footnote original] Part of the problem is a linguistic one. In English, “tax evasion” is synonymous with tax fraud, and means criminal activity. In French, “evasion” means avoidance. Tax evasion should therefore be translated into French as “fraude fiscal”. ...

27 [Footnote original] Black’s Law Dictionary (Fifth Edition) has defined “tax avoidance” as: “The minimization of one’s tax liability by taking advantage of legally available tax planning opportunities. Tax avoidance may be contrasted with tax evasion, which entails the reduction of tax liability by using illegal means”.

28 [Footnote original] While most countries define criminal tax fraud fairly broadly, there are some exceptions. For example, Switzerland has a narrow concept of “tax fraud”, which is an offence subject to imprisonment, defining it as the use of “forged, falsified or substantially incorrect documents”. See Direct Federal Tax Law, art. 186.

29 United Nations Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries) 2003.

31.7.2 *Avoidance/mitigation distinction*

The clear³⁰ articulation of the *concept* of an avoidance/mitigation distinction goes back only to the 1970s³¹ and the concept originated from economists, not lawyers. In 1973 C.T. Sandford wrote:

A government may have one of three attitudes to a particular ‘avoidance’ measure – using the wide definition of avoidance. It may welcome it; the government may have deliberately offered a tax concession to promote some objective, e.g. tax concessions on mortgage interest, combined with the abolition of Schedule A income tax, in order to encourage owner-occupation; or investment and initial allowances to stimulate new investment in development areas. Second, without having sought positively to encourage a particular ‘avoiding’ action the government may find it entirely acceptable as when an income tax payer reduces his tax liability by taking a wife or having children; or when a person on retirement transfers savings from a building society to some other form of investment in order to reclaim income tax. Third, the government may deplore certain actions as contrary to its intentions; the action is in accord with the letter of the law but not its spirit. *Only actions in this third category should rank as ‘avoidance’.*³²

30 One can find some earlier examples: *Mangin v IRC* [1971] AC 739 is a moderately clear example; the concept is embryonically present in *Newton v Commissioner of Taxation of Australia* [1958] AC 450. But these cases do not draw the line as clearly or quite on the same basis as Sandford and modern cases following him.

31 In 1946, Wrottesley J was unaware of it. Discussing the motive defence, he said: “There cannot, I think, be two opinions as to what ‘avoiding’ means. Where what is to be avoided is a liability, it must mean to evade, or to keep out of the way of, whether it be as in Richard III, ‘The censures of the carping world’, or anything else unpleasant that might befall a man, such as a tax”: *Congreve v IRC* 30 TC 163. This is describing avoidance in the loose or etymological sense (including mitigation).

32 *Hidden Costs of Taxation*, IFS, 1973, p.113 (emphasis added). Sandford proposed a second requirement of “avoidance” which he related to the taxpayer rather than to the legislature:

“It is reasonable to confine ‘avoidance’ to action which results in the would-be avoiders substantially achieving the objective to which the tax had become an obstacle. Let us give some examples. If a man ceases to buy cigarettes because of tobacco tax he has not achieved his pre-tax objective, i.e. to smoke. Buying sweets instead of cigarettes therefore, is not avoidance. Again, if a taxpayer decides to use most of his wealth for a consumption spree because estate duty makes it not worth while saving for heirs, he is not ‘avoiding’ for he has

The use of the terminology avoidance/mitigation to *express* this distinction is an innovation of Lord Templeman in 1986.³³ The expression “tax avoidance” has very often been used in the loose sense, meaning or including mitigation.³⁴ The reason may be either that the author does not have any avoidance/mitigation distinction in their mind or (if they do) that they are not using the modern terminology to express it. Even now, the term “tax avoidance” is sometimes still used in a loose or etymological sense to include mitigation but nowadays this usage is sometimes jocular, which suggests that the technical meaning is seeping into public consciousness.³⁵ Likewise “mitigation” was and sometimes still is used in the sense of “avoidance”.³⁶

In this book I use the words “avoidance” and “mitigation” in the strict sense. It would be convenient to have a neutral term to describe both avoidance and mitigation (what is described above as the loose etymological sense of “tax avoidance”). There is no agreed term, but “tax

abandoned his objective of passing property to heirs. On the other hand, if he reacts to estate duty by making *inter vivos* gifts (assuming he survives for seven years), this is avoidance; it has achieved, though by a more circuitous route, the objective of passing to heirs an intact property.”

This is problematic, because there is no obvious way to identify the “objective to which the tax has become an obstacle”, and it has not been adopted into the law.

33 *IRC v Challenge* [1986] STC 548. Lord Templeman was describing a concept relatively new to tax jurisprudence and framing terminology altogether new to describe it. But in accordance with the (according to Austin, “childish”) declaratory theory of law, he did not say so.

34 C.T. Sanford:

“Amongst tax practitioners the generally accepted definition of avoidance ... is any legal method by which a person can reduce his tax bill... this definition can cover almost anything... I can legally reduce my income tax bill by buying a more expensive house (on which I get additional mortgage interest relief), getting married, having more children, taking out more insurance or simply stopping work.”

(*Hidden Costs of Taxation*, IFS, 1973).

35 The author once saw an advertisement for PEPs: “Be a tax avoider!” PEPs were a tax free investment now replaced by ISAs. For another example, see *Board of Inland Revenue v Hoe*, A.P. Herbert’s *More Uncommon Law*: “Evidently those who do not smoke or drink are ... avoiding taxation.”

36 eg C.T. Sanford wrote in 1973 that tax avoidance (in the strict sense) “is often referred to by expressions such as tax planning or tax mitigation”: *Hidden Costs of Taxation*, IFS, 1973, p.104. *Craven v White* 62 TC at p.203 (a requirement of *Furniss v Dawson* is that a transaction “had no other purpose than tax mitigation”).

reduction”,³⁷ “tax saving”, “tax planning” and “tax advantage” might all be used in this sense. It may be less confusing if less elegant to refer to “avoidance/mitigation” where one wishes to refer to the two.

31.8 Meaning of “avoidance” in motive defence

The House of Lords in *IRC Willoughby* decided that “avoidance” in motive defence meant tax avoidance in the strict sense and not mitigation:

... it was essential to understand what was meant by “tax avoidance” for the purposes of s 741 ICTA [now Conditions A and B]. Tax avoidance was to be distinguished from tax mitigation. ... My Lords, I am content for my part to adopt these propositions.³⁸

This would have surprised those who framed the legislation in 1936/8; they were unaware of any avoidance/mitigation distinction. But the enormously increased complexity of the tax system since 1936 makes the distinction sensible, perhaps necessary. HMRC accepted that the purchase of an ordinary offshore bond should be taxed under the chargeable event provisions and not under the TAA provisions. One way³⁹ to reach that result is to give a narrow meaning to tax avoidance and so to widen the motive defence.

31.8.1 *Purpose of tax evasion*

Suppose an individual transfers assets abroad with the dishonest purpose of *evading* UK taxation. Can one apply the avoidance/evasion distinction

37 See part IV Sch.25 ICTA (Controlled Foreign Companies). INT Manual provides: **208010 Introduction to the motive test** [April 2011]

... Despite numerous valiant attempts there has never been a consensus about what is meant by ‘tax avoidance’ ...

The [CFC] motive test attempts to solve the first problem by avoiding any mention of the term ‘tax avoidance’, settling instead for the rather more neutral concept of a ‘reduction in tax’ ...

38 [1997] STC 995 at p.1003.

39 An alternative, less satisfactory, would be to refuse to recognise the tax purpose of the acquisition, by saying that it is merely incidental, or by applying a *Brebner* or choice principle: see 31.14.1 (A choice principle?). Another solution is to say there is no relevant transfer.

and say that the individual did not intend to *avoid* taxation, so that – while they may be liable to criminal sanctions – the motive defence applies and excludes the transfer of assets rules? The answer is plainly no. The argument is anachronistic, since in 1936 and for 40 years afterwards, the word “evasion” was used in English jurisprudence to describe avoidance. More fundamentally, the context shows that the expression “tax avoidance” includes (criminal) tax evasion. This was assumed without argument in *R v Dimsey & Allen* 74 TC 263.

31.9 Meaning of “taxation” in the motive defence

“Taxation” in Old Conditions A and B means any form of UK taxation, and not only income tax: *Sassoon v IRC* 25 TC 154. HMRC agree. The International Manual provides:

600040 - Transfer of assets abroad [October 2010]

Overview of ITA 2007/S736 - 742 - exemption from liability

..In the context of this test “taxation” includes any UK tax liability, for example, Inheritance Tax, Capital Gains Tax, Corporation Tax as well as Income Tax.

Sassoon, though criticised,⁴⁰ is a decision of the Court of Appeal and

40 For the following reasons:

- (1) The rule that an intention to avoid (say) stamp duty should have *income* tax consequences gives rise to obvious anomalies. The usual principle is that each tax must be considered separately. This is the approach usually adopted by anti-avoidance provisions: eg s.682 ITA (transactions in securities), or s.137 TCGA. But see s.75(5)(a) FA 1986 for an exception.
- (2) Since *Sassoon* was decided, the word “tax” has been given a limited definition. Section 989 ITA provides:
“‘tax’, if neither income tax nor corporation tax is specified, means either of those taxes”.
There are two reasons why this statutory change does not affect the position:
 - (a) A definition of *tax* does not in principle determine the meaning of the cognate word *taxation*. (Would a definition of “engine” determine the meaning of the cognate word “engineer”?)
 - (b) The decision in *Sassoon* was given the implied approval of Parliament in the 1952 consolidation and it is not likely that the 1970 consolidation was intended to alter that.
- (3) Section 720(1) ITA refers only to the avoidance of income tax; but see s.721(5)(c) ITA.

should be taken to represent the law.

For the purposes of New Conditions A and B this rule is now statutory. Section 737(7) ITA provides:

In this section—

“revenue” includes taxes, duties and national insurance contributions,
 “taxation” includes⁴¹ any revenue for whose collection and management
 the Commissioners for HMRC are responsible.

Foreign tax is not “taxation” for this purpose. The House of Lords assumed that this was so without argument in *Herdman v IRC* 45 TC 394. This must be right since (1) it is illogical that the purpose of avoiding foreign taxes should have UK tax consequences and (2) it would be almost impossible to apply an avoidance/mitigation distinction to foreign taxes (where the distinction would depend on the foreign tax culture and attitudes).

31.10 Identifying and classifying purpose: the old conditions

It is considered that the identification of a tax avoidance purpose requires a two-stage approach: identifying and classifying purpose.

31.10.1 *Identify purpose of transferor: stage 1*

One must look into the mind of the transferor to ascertain whether their purpose was (to use the neutral term) to reduce tax. If they had no purpose to reduce tax then the motive defence applies.

In *IRC v Pratt* [1982] STC at p 795, Walton J observed:

(4) Dicta in *Vestey v IRC* 54 TC 503 are said to be inconsistent with *Sassoon*; but this point was not an issue in *Vestey*.

(5) A reversal of *Sassoon* would cut down considerably the multitude of issues that the motive defence currently raises: see 31.21 (Practical examples: introduction). While of course “context is king”, it is clear that the word “taxation” is sometimes used in an IT context to mean any tax; see for instance s.22 F(No 2)A 1931.

41 This is not an exhaustive definition. At present it is difficult to see what other tax may be caught, but this could be relevant if there was a change in the responsibilities of HMRC (eg a new tax was introduced which was managed by a different Government department).

It is not ‘the transferor’s purpose in effecting the transfer’ but ‘the purpose for which the transfer was effected’.

But surely one cannot say:

(1) “the purpose for which the transfer was effected”

could be different from

(2) “the transferor’s purpose in effecting the transfer”?

(1) is equivalent in meaning to (2). A transfer itself cannot have a purpose: only a human being (or at least, a sentient mind) can have a purpose. “Purpose”, if it means anything, is an attribute of a mind.⁴² If one says that an inanimate but man-made object such as a tool has a purpose, one is only attributing to the tool the purpose in the mind of the maker or user of the tool. I do not think that Walton J’s statement (read in context) contradicts this view.

HMRC agree:

10200 Whose purpose?

A purpose test will define the person whose purpose is being considered. Some purpose tests refer to the purpose of a scheme or transaction: in this case, the purpose of the parties to the transaction needs to be considered.⁴³

31.10.2 *How to ascertain the purpose of the transferor?*

The issue is subjective in that it depends on what is in the mind of the transferor.

How does one ascertain the transferor’s subjective purpose? All facts which may shed light on their purpose must be taken into account. Exemption is not due solely on the basis of an assertion by individuals that tax avoidance was not their subjective intention, because that (self serving) assertion may not be credible in the light of other relevant facts.

It is highly relevant to consider the objective questions:

⁴² The issue here overlaps with the objective/subjective issue discussed below.

⁴³ HMRC Discussion Document “Simplifying Unallowable Purpose Tests”(July 2009). Similarly at p.14: “One particular difficulty with testing the purpose of arrangements rather than the purpose of a person is that arrangements are self-evidently inanimate. Any purpose inherent in such arrangements must usually be derived from the purposes of a person or persons who are party to the arrangements.” Similarly the draft guidance for unallowable purpose tests at para 10110.

(1) whether the transfer did reduce tax significantly; and
(2) whether the tax reduction was foreseeable at the time of the transfer. If the tax reduction was not foreseeable, it is not likely to have been the purpose to achieve it. Conversely the fact that a tax advantage is objectively foreseeable as a consequence of the transfer may be cogent evidence of subjective purpose. We normally have the purpose of achieving the foreseeable consequences of our acts. However, this is not necessarily so. First the transferor may not have foreseen the advantage even though a “reasonable person” might have done so: no-one at all times acts with the foresight of the “reasonable man”.⁴⁴ Secondly, the transferor may have been aware of (or even have wanted) the advantage but it may nevertheless not properly be classified as their “purpose”.⁴⁵

Before *Willoughby* identifying a purpose of reducing tax was the beginning and end of the matter because an avoidance/mitigation distinction had not been recognised in this context. Now there is a second stage.

31.10.3 *Classifying purpose: stage 2*

If the transferor did have the purpose of reducing tax, one must (applying *Willoughby*) categorise that purpose as “avoidance” or “mitigation”. This is determined objectively (in the sense that the issue is independent of the mind of the transferor).

It would be wrong at stage (2) to ask whether the transferor subjectively thought their purpose was “tax avoidance” (as opposed to mitigation) because avoidance/mitigation is a question of law, a decision for the Court and not for them. Indeed, it would generally be pointless, since (unless the individual is a tax lawyer) they will not know the correct meaning of the terms.

The motive defence therefore involves a mixture of objective and subjective elements, as often happens.

Stage (1) – the mind of the transferor – is a question of fact, decided by the Tax Tribunal, which conveniently allows the appellate courts to say very little about it:

44 Contrast s.8 Criminal Justice Act 1967, the principle of which is also part of the common law: *Franklin v The Queen* [1987] AC 576.

45 See 31.13 (Foresight and purpose) and 31.14 (Consequence and purpose).

The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners to decide on a consideration of all the relevant evidence before them and the proper inferences to be drawn from that evidence....

... the Special Commissioners came to a reasonable conclusion on the evidence before them. They could have reached a contrary conclusion, which would have been equally unassailable, had they taken a different view of the evidence;. ..⁴⁶

Anything said on the subject of tax avoidance in motive defence cases before *Willoughby* needs to be reviewed because it will not have considered stage (2).

31.10.4 HMRC view(s): objective purpose

RI 201 states:

[1] If a transaction involves tax avoidance, that is considered by the Revenue to be at least one of its purposes

[2] even if the transferor did not form the subjective intention⁴⁷ of avoiding tax.⁴⁸

This is a rejection of the stage (1) test set out above. In the HMRC view a transfer may have been effected for a tax avoidance purpose even though the transferor did not have the subjective purpose of obtaining a tax reduction. That must be wrong for several reasons. First, the natural meaning of “purpose” is to connote a subjective concept. This meaning

⁴⁶ *IRC v Brebner* 43 TC 705.

⁴⁷ RI 201 is (I think) using “intention” as a synonym for the statutory word “purpose”, but the difficulty of RI 201 becomes more apparent if one disallows that move. It is surely nonsense to say:

“If a transaction involves tax avoidance, that is considered by the Revenue to be at least one of its purposes even if the transferor did not form the subjective purpose of avoiding tax.”

⁴⁸ This is loosely based on a dictum of Lord Nolan in *IRC v Willoughby* [1997] STC 995 at p.1003:

“Where the taxpayer’s chosen course is seen upon examination to involve tax avoidance (as opposed to tax mitigation), it follows that tax avoidance must be at least one of the taxpayer’s purposes in adopting that course, whether or not the taxpayer has formed the subjective motive of avoiding tax.”

is supported by high authority.⁴⁹ Of course context may show the word is used in an unusual sense, but that is not the case here. Secondly, this is the way that the motive defence has always been applied and understood.⁵⁰

While the HMRC statement clearly rejects a subjective purpose test, it is not clear what test HMRC wish to apply instead. What is meant by a transaction “involving” tax avoidance? Sometimes HMRC have argued that the statute requires one to identify the “objective purpose” of the transfer. The attraction of putting the matter this way is that it is close to the wording of the statute. The difficulty is that the expression “objective purpose” is an oxymoron. If that means anything, it means, I think, the purpose which an ordinary reasonable person would have if they had made the same transfer in the circumstances of the transferor. It is difficult to identify purpose in this way because different people may do the same act with different purposes. And which circumstances are relevant? For instance, take the example of the transferor concerned as to the situation in Europe in 1936.⁵¹ Their subjective purpose was not tax avoidance. Was their objective purpose tax avoidance? I do not know how to begin to answer the question.

The test that HMRC ultimately wanted to apply is that a transfer has a tax avoidance purpose if it has a tax saving *result*, if its *effect* has been to save tax, or at least if it was reasonably foreseeable that it would do so.

49 “I shall begin by considering the word ‘purpose’, for both sides have relied on this word in different senses. Broadly, the appellants contend that it is to be given a subjective meaning and the Crown an objective one.

I have no doubt that it is subjective. A purpose must exist in the mind. It cannot exist anywhere else.”

Chandler v DPP [1964] AC 763 at p.804. *Dicta* apparently to the contrary in *Newton v Commissioner of Taxation* [1958] AC 450 at pp.465–466 are rightly criticised and distinguished in John Avery Jones [1983] BTR 22–24. Twenty years later, Avery Jones had the opportunity to make the same point judicially in *Carvill v IRC* [2000] STC (SCD) 143, 75 TC 477. A subjective test also applies for the escape clause in the transactions in securities rules; see *Addy v IRC* 51 TC 71 at p.81E.

50 The drafter of s.33(3) FA 1944 and s.32(3) FA 1951 plainly agreed. This provided (in short) that where “the main benefit which might have been expected to accrue” from a transaction was tax avoidance, then tax avoidance “was *deemed* to have been the purpose of the transaction”. This imposed an objective standard and only makes sense on the assumption that the word “purpose” (in text based on what is now Condition A) was otherwise determined subjectively. The point is made expressly in *Crown Bedding v IRC* 34 TC 107 at p.115.

51 See 31.4 (Enactment history).

This test does make sense (unlike “objective purpose”) and it is practical to apply. The difficulty with this test is that it is not consistent with the wording of the statute. Purpose and result/effect are two entirely different concepts, and there is no getting away from that.

The ink had hardly dried on the HMRC statement when the Special Commissioners rejected it: *Beneficiary v IRC*,⁵² *Carvill v IRC*.⁵³ Until 2008 HMRC contended that these cases were wrongly decided. However, HMRC sensibly abandoned that position before the Tribunal in *Burns v HMRC*,⁵⁴ where the Commissioner said:

It seems to me to be settled law that what I must address is “purpose”, rather than objectively ascertained effect, or presumed effect.

In practice the “objective purpose” argument is now (I think) resolved. This is confirmed in the HMRC draft guidance for unallowable purpose tests para 10030:

Thus, where there is a purpose test, the consequences of a transaction will be dependent on the subjective purpose of the taxpayer. It is entirely possible that two taxpayers entering into similar transactions, but with different purposes, will be taxed differently....

The draft guidance cites with approval a comment in a VAT case where a manufacturing company purchased a horse for promotional purposes:

The Tribunal must not substitute the test of what the average businessman would do for the test of what was in the mind of the witness at the time of the expenditure. Once the Tribunal accepted Mr Flockton’s evidence that the company’s only purpose in purchasing the racecourse was to further its business, the question whether Mr Flockton and the

52 “We reject counsel’s submission that we should look at effect. Purpose is not effect and in our view it is essential to look into the minds of the actors to discover their purpose”. But: “The question of whether there was tax avoidance must be looked at objectively”. *Beneficiary v IRC* [1999] STC (SCD) 134 at [143].

53 [2000] STC (SCD) 143 at [9]–[13], 75 TC 477 (Special Commissioners). The dictum of Lord Nolan in *IRC v Willoughby* mentioned above which appears to favour an objective approach is, as *Carvill* demonstrates, inconsistent with a long line of authority and has to be ignored (as in *Carvill*) or explained (as in *Beneficiary*).

54 [2009] STC (SCD) 165.

other directors ought to have believed that the purchase and running of the horse would be for the company's benefit became irrelevant.⁵⁵

Para 10050 of the draft guidance is worth setting out in full:

10050 Avoidance - what is purpose?: effects do not determine purpose

There is a clear difference between the purpose of a transaction and its effects. The effects are the advantages or benefits actually obtained (whether intended or not); these benefits can often be computed mathematically and can usually be measured objectively.

In *IRC v Brebner* 43 TC 705, Lord Clyde states:

The material question is not what was the effect of each or all of the inter-related transactions, the question is what was the main object or objects for which any of them was adopted. Section 28(1) of the Finance Act, 1960 [now s.734 CTA 2010], draws a clear distinction between effect and object.

In the Special Commissioners' decision of *Snell v HMRC* [2008 SpC 699], it was observed that the implications of the case were that:

"That case is also authority for the proposition that there is a clear distinction between the effect and the object of a transaction. I take that to mean that however directly a transaction leads to a tax advantage the question whether that was one of its objects is not answered by that clarity of effect"

In *Mallalieu v Drummond* [1983 BTC 380] (see BIM 37910) Lord Brightman said:

"The object of the taxpayer in making the expenditure must be distinguished from the effect of the expenditure."

Thus, merely reviewing the effects of a transaction will not usually enable a conclusion to be drawn as to the taxpayer's purpose.

This is subject to one qualification:

However, in the *Vodafone* case (see BIM 38220) Millett LJ said that: "Some consequences are so inevitably and inextricably involved in the payment that unless merely incidental they must be taken to be a purpose for which the payment was made."⁵⁶

So, in some circumstances, the "inevitable consequences" of a payment

⁵⁵ *Ian Flockton Developments v C&E Commrs* [1987] STC 394.

⁵⁶ *Vodafone Cellular v Shaw* 69 TC 376

do allow the inference to be drawn that a particular purpose existed, even if that was only an unconscious motive of the taxpayer.

31.11 Identifying and classifying purpose: the New Conditions

Old Conditions A and B refer simply (?) to the purpose for which the transactions were effected or designed. New Condition A is that:

it would not be reasonable to draw the conclusion, from all the circumstances of the case, that the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

New Condition B is that:

it would not be reasonable to draw the conclusion, from all the circumstances of the case, that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.

The new words are italicised. What difference do they make? Perhaps we should look first to see what HMRC said they intended to achieve:

59. The new section 741A ICTA [New Conditions A and B] aims to ensure that all relevant factors are taken into account in deciding whether exemption is due. That is the normal way of applying any purpose test, but in relation to section 741 [Old Conditions A and B] the view is sometimes expressed by tax practitioners that the present test should be interpreted more narrowly. They contend that

[1] it is only necessary to look at the subjective intentions of the individual, and

[2] that no account need be taken of any other circumstances, even if they included for example the fact that a particular transaction might have been structured in such a way that it directly resulted in a significant tax reduction that was not on the face of it intended by Parliament.

There are two distinct “contentions” here. The first is correct. The second cannot be taken seriously: see 31.10.1 (Identify purpose: stage 1).

60. HMRC has consistently taken the view that such a narrow

interpretation of section 741 is not a correct reading of the law. If such an interpretation is accepted, the purpose of the transfer of assets abroad legislation to prevent individuals avoiding income tax in the way defined [*sic*] in sections 739 and 740 could not be properly achieved. The new test makes it the condition for exemption that the individual must broadly show that it would not be reasonable to conclude from all the circumstances of the case that any of the transactions had a tax avoidance purpose. The wording of the test is intended to put it beyond doubt that exemption will not be due solely on the basis of an assertion by individuals that tax avoidance was not their subjective intention. Evidence of individuals' subjective intention will be one factor to take into account. However, all other relevant circumstances of the particular case must also be considered, including the actual objective outcome of the transactions.⁵⁷

These paragraphs are somewhat muddled. I think it is making the point made at 31.10.1 (Identify purpose: stage 1). All relevant circumstances must be taken into account in order to identify an individual's purpose. A particularly significant fact is whether the transaction resulted in a significant tax reduction, that is, the actual objective outcome of the transactions.

I have wondered whether the drafter's aim here is something different: to replace the subjective purpose test (which clearly applies to the Old Conditions) with an objective results test. However this is inconsistent with what the EN actually said. First, the current (subjective) test is not the view "sometimes expressed by tax practitioners": it is the view of the two most distinguished Special Commissioners of the day and firmly grounded in the law. Moreover, if it were the intention to substitute a subjective purpose test with an objective results test, then "evidence of individuals' subjective intention" should cease to be "one factor to take into account". It will be completely irrelevant. However, the one thing that is clear is that the passage is unclear. It is wrong to try to construe a muddled explanatory note in order to understand a statutory provision. We do not wish to move to the position, sometimes said to apply in the USA, that "if the legislative history is unclear, you read the words of the statute".

Turning, as we must, to the legislation itself, we find that the test still

57 EN Draft Clauses (2005). The point is made more briefly in EN FB 2006 para 66.

depends on the purpose of the transactions. It is reasonably clear that:

- (1) this means the purpose of those who carried out the transactions, and
- (2) purpose means subjective purpose.

What the new legislation stresses (if only for the avoidance of doubt) is that all the circumstances of the case must be taken into account in order to ascertain the subjective purpose.

Had the drafter sought to replace a purpose test with an objective results test, then they would have used quite different wording, and, indeed, a precedent existed in s.33(3) FA 1944 and s.32(3) FA 1951.

This view is confirmed in the HMRC discussion paper “Simplifying Unallowable Purpose Tests” (2009) p.18:

An alternative test to a “main purpose” test would be to assess whether “it is reasonable to assume that the main, or one of the main purposes is unallowable”. In this way, purpose can be assessed objectively and the test can potentially penetrate purported subjective purposes which do not stand up to objective scrutiny. The potential impact of such drafting is currently being examined. In the future, such an approach may be recommended if the outcome of internal consideration and external comment is positive.

The outcome was not positive, and the response document provided:

There was widespread opposition to any use of a ‘reasonable to believe’ test in respect of any purpose threshold.

The proposed framework will therefore recommend that policy owners do not use a ‘reasonable to believe’ test.⁵⁸

31.12 Transfer made for tax and non-tax purposes

31.12.1 Condition A

Condition A depends on whether the purpose of avoiding liability to taxation was the purpose *or one of the purposes* for which the transfer or associated operations were effected.

If one of these purposes is tax avoidance, the transfer fails condition A.

⁵⁸ HMRC Discussion Response Document “Simplifying Unallowable Purpose Tests” (December 2009), p.7.

It does not matter what the other purposes are.⁵⁹

31.12.2 *Old Condition B*

Old Condition B contains two requirements; both must be satisfied. The first is that the transfer and any associated operations were commercial transactions. Secondly that the transfer and associated operations were not designed for the purpose of avoiding liability to taxation.

What happens if a commercial transaction has two or more purposes? HMRC say in RI 201:

The Revenue's view is that one of the essential conditions of s 741(b) ICTA would not be satisfied where there was a significant element of tax avoidance purpose in the design of the transfer and any associated operations.

This paraphrase is rather⁶⁰ too generous to HMRC. The Special Commissioner stated:

One must ask in para (b) whether the transfer was designed for the purpose of avoiding tax or not. This seems to me to require that the main purpose was not tax avoidance because if one has to categorise a transaction as being either designed for the purpose of tax avoidance or not, when it is clearly accepted that a transaction may be designed for more than one purpose, the only way to categorise the design into one purpose is to look at the main purpose of the design. I think, therefore, that the taxpayer's contention of sole purpose is too loose a test and the Revenue's contention of significant purpose is too stringent a test although it will in practice be difficult to determine the difference between a significant and a main purpose.⁶¹

The point of Condition B is that (if one passes the "commercial" requirement) the "no tax avoidance" requirement is easier to satisfy.

⁵⁹ This is plain from the terms of the statute but if authority is needed, see *Philippi v IRC* 47 TC 75 at p.110.

⁶⁰ Depending to an extent what nuance one gives to the malleable word "significant".

⁶¹ *Carvill v IRC* [2000] STC (SCD) 143 at [89], 75 TC 477. The same Special Commissioner cited and followed this passage in *4Cast v Mitchell* [2005] STC (SCD) 280 at [12].

Otherwise there is no reason to have two Conditions.

31.12.3 *New Condition B*

The wording has changed in New Condition B. The test is now whether:

any one or more of those transactions was *more than incidentally* designed for the purpose of avoiding liability to taxation.

This brings the law into line with RI 201.⁶² At first I thought (like the Special Commissioner) the difference is relatively slight. But (depending what nuance is given to the malleable word “incidentally”) the change does make a difference. Since a merely incidental motive is not likely to amount to a “purpose” at all, a claim which fails Condition A will rarely (if ever) qualify under Condition B. For this reason (and because the “commercial” requirement in New Condition B is so narrow) New Condition B is dead letter law.

31.12.4 *Commentary*

Why did Parliament not simply repeal Condition B, rather than amend it out of existence in a way which needs pages to analyse and discuss? Perhaps the full extent of what was done was not realised. Perhaps it was, but it was thought that repeal would raise fiercer objections. However that may be, the rational course would either be to repeal Condition B completely and gain the benefit of simplicity or to return to old Condition B, which had a role to play in aiding commercial life and the economy.

31.13 **Foresight and purpose**

31.13.1 *Terminology*

In ordinary English usage, and in general legal usage, the words “object”, “purpose” and “intention” are used synonymously and interchangeably. (The word “motive” is used differently but there it no need to pursue that here.)

⁶² I take “more than incidental” in New Condition B to have the same meaning as “significant” in RI 201.

Sometimes an attempt is made to desynonymise the terms, in order to find labels for some distinction. However none of these attempts have found general acceptance. So although at least one underlying distinction in meaning is generally agreed, there is no agreed terminology to express it. Nothing much has changed since Lord Simon commented in 1975:

A principal difficulty in this branch of the law is the chaotic terminology, whether in judgments, academic writings or statutes. Will, volition, motive, purpose, object, view, intention, intent, specific intent or intention, wish, desire; necessity, coercion, compulsion, duress – such terms, which do indeed overlap in certain contexts, seem frequently to be used interchangeably, without definition⁶³

It seems to me that this should not cause too much difficulty - indeed in the absence of substantial law reform we have no choice but to cope with it - provided that one remembers that these terms are occasionally given narrower and more precise definitions, but those definitions should not be regarded as generally applicable.

For instance, clause 14(1) of the draft Offences Against the Person Bill (a Home Office consultation paper, 1998) defines intention in a way which illustrates one possible meaning of the word “purpose”:

A person acts *intentionally* with respect to a result if—

- (a) it is his *purpose* to cause it, or
- (b) although it is not his purpose to cause it, he knows that it would occur in the ordinary course of events if he were to succeed in his purpose of causing some other result.

This draws out an important distinction, but it is unfortunate that the terminology used to express is “intention” and “purpose”.⁶⁴ In this sense, purpose is narrower. If a person has the purpose of causing another result, but knows the tax saving would occur if they succeed in their purpose of causing the other result, they have the *intention* to obtain the tax saving

63 *DPP v Lynch* [1975] AC 653 at p.688.

64 Bentham’s terminology was direct and oblique intention: *The Principles of Morals & Legislation*, Chapter VIII (Of Intentionality). See Kaveny’s excellent “Inferring Intention from Foresight” 120 LQR 81 and Bratman, “Intention, Plans & Practical Reason”, (1987), Chapter 10 (Intention and expected side effects). See Avery Jones “The mental element in anti-avoidance legislation” [1983] BTR 22.

but not the *purpose*.

However the word “purpose” is not usually understood this way:

The word [purpose] can be used to designate either

[1] the main object which a man wants or hopes to achieve by the contemplated act, or ...

[2] those objects which he knows will probably be achieved by the act, whether he wants them or not.

I am satisfied that in the criminal law ... its ordinary sense is the *latter* one.⁶⁵

Here the same distinction is drawn, but the words “purpose” and “object” are used to express it.

Generally, however, “object” and “purpose” are regarded as the same. HMRC rightly say:

For example, Romer LJ in the *Bentleys Stokes*⁶⁶ case uses the words 'object', 'motive' and 'purpose' quite indiscriminately... there is no difference between purpose and object.⁶⁷

The significance of this is that cases on the transactions in securities purpose test (referring to the main object) can be and often are cited as relevant to the TAA motive defence. It is true that the TAA motive defence refers to purpose and not to *main* purpose. But although there is perhaps a difference in nuance, I do not think that makes a great deal of difference. In the HMRC view it makes no difference at all:

Whether a purpose is more than incidental, and if so whether it is a main purpose, will be a question of fact for the Tribunal to decide. In HMRC’s view, any purpose which is more than incidental is *prima facie* a main purpose.⁶⁸

31.13.2 “Purpose” in the motive defence

In RI 201 HMRC say:

⁶⁵ *Chandler v DPP* [1964] AC 763 at p.804, emphasis added.

⁶⁶ *Bentleys, Stokes and Lowless v Beeson* 33 TC 491.

⁶⁷ HMRC draft guidance for unallowable purpose tests para 10040.

⁶⁸ Draft guidance for unallowable purpose tests, para 10140.

“Purpose” is taken to be the end it is sought to achieve by the transaction.⁶⁹

This adopts (I think) the narrower concept of purpose and it is suggested that this is correct. Purpose in the motive defence is what a person wants or hopes to achieve (not merely foresight). In practice, the issue arises in Condition A cases.⁷⁰

31.14 Consequence and purpose

A consequence of a transaction is not necessarily its purpose. This was stated judicially in the “celebrated”⁷¹ passage in *IRC v Brebner*:

- [1] My Lords, I would only conclude my speech⁷² by saying, when the question of carrying out a genuine commercial transaction, as this was, is considered, the fact that there are two ways of carrying it out – one by paying the maximum amount of tax, the other by paying no, or much less, tax – it would be quite wrong, as a *necessary* consequence, to draw the inference that, in adopting the latter course, one of the main objects is, for the purposes of the section, avoidance of tax.
- [2] No commercial man in his senses is going to carry out commercial transactions except upon the footing of paying the smallest amount of tax involved.
- [3] The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners to decide upon a consideration of all the relevant evidence before them and the proper

69 This is based on *Newton v Commissioner of Taxation of the Commonwealth of Australia* [1958] AC 450 at p.465. Note by the way how use of the passive voice (“it is sought to achieve”) ducks the issue of whose purpose one is looking for. See George Orwell’s essay, “Politics and the English Language” accessible http://orwell.ru/library/essays/politics/english/e_polit.

70 The issue should not arise in a Condition B case (commercial transactions). In a situation where one wanted the commercial transaction, and merely had foresight that a tax saving would follow, even if the tax saving was regarded as a purpose (as in the wide *Chandler* sense of purpose) it would not be the main (or significant) purpose.

71 *IRC v Willoughby* [1995] STC at [167], 74 TC at [89].

72 For completeness, the TC report reads “judgment” and the AC reads “speech”. “Speech” is strictly the correct term.

inferences to be drawn from that evidence.⁷³

The point being made here is not (or not just) that mere foresight of a tax advantage is not a tax avoidance purpose.⁷⁴ Lord Upjohn goes further in point [3]: he states that where there is a “commercial transaction” knowledge and *choice* of the tax advantageous course over an alternative does not “necessarily” constitute the main purpose or even one of the purposes⁷⁵ of the transaction.

At what point does a conscious choice of a tax advantageous course become a tax avoidance purpose in its own right in addition to the commercial purpose? Lord Upjohn does not give an answer to this: to say at [3] that it is a question of fact for the Commissioners, if true, is not exactly helpful.

It is suggested that a useful test may be to ask: does the tax advantage

73 *IRC v Brebner* 43 TC 705 at p.718; emphasis original but paragraph numbers added. Another way to read this passage in *Brebner* is to see it as an early recognition of an avoidance/mitigation distinction but that would be anachronistic because the distinction was not then made. It would also be wrong because that distinction is irrelevant in the transactions in securities code. This is stated in *Marwood Homes v IRC* [1999] STC (SCD) 44 at [20]:

“Taking steps to obtain relief under s 242 following payment of a dividend outside a group election is clearly within the spirit of the ACT code in the tax legislation. But the fact that a transaction has been carried out to achieve a benefit conferred by a statutory provision will not of itself exclude the application of s 703 [transactions in securities rules]. This follows from the definition of tax advantage in [what is now s.732 CTA 2010] which covers both everyday tax planning and transactions, such as traditional dividend stripping, which fall more obviously within the mischief that s 703 was introduced to counteract. The only safeguards available to the taxpayer are the clearance procedures and the escape clause. It cannot therefore avail Marwood to rest its case on the simple proposition that the dividends ... were directly within the spirit of s 242.”

This does follow from a natural reading of the definition of “tax advantage” now in s.732 CTA 2010 (the income tax equivalent has changed). This term includes a relief from or repayment of tax, as well as the avoidance or reduction of a charge to tax. The concept thus includes both tax avoidance and mitigation.

74 The point made at 31.13 (Foresight and purpose).

75 *Brebner* is a case on the transactions in securities motive defence. The wording is not quite the same as motive defence condition A: s.734(3) CTA 2010 refers to the “main objects” and Condition A refers to “purposes”. However, it is considered there is no significant distinction between them. This was presumably the view adopted in *Willoughby* in the Court of Appeal where *Brebner* was cited in a Condition A context.

form an incidental or subsidiary aspect of achieving the commercial transaction (as opposed to being an end in its own right)? If so, there is no tax avoidance purpose. This is an evaluative test which is perhaps easier to state than to apply, but it may sometimes be helpful. It overlaps with an avoidance/mitigation distinction, since an advantage which is judged to be incidental or ancillary to a commercial or family transaction is less likely to be contrary to the intention of Parliament: it is more likely to constitute mitigation than avoidance.

I suggest the point made in *Brebner* is really this: where one of the reasons for a transaction is a commercial (non-tax) reason, one should be slower to conclude that another purpose is tax avoidance than in the case of a purely tax motivated transaction. This reflects the reasonable assumption that a purely tax motivated transaction is more likely to be contrary to the intention of Parliament and a commercial transaction is less likely to be. I refer to this as the *Brebner* principle.

The *Brebner* principle applies not only to commercial transactions, but also to any transaction carried out for primarily non-tax reasons including “ordinary family dealing”, which would include most trust transfers, at least those where the settlor is excluded.⁷⁶ In practice, this issue arises in Condition A cases.⁷⁷ It is considered that the *Brebner* principle continues to apply to New Conditions A and B. It is true that the terms of New Condition B (that incidental purposes are to be disregarded) suggest that incidental purposes in New Condition A are *not* to be disregarded. But the *Brebner* principle is identifying matters that are not “purposes” at all.

31.14.1 *A choice principle?*

The *Brebner* dictum is sometimes regarded as supporting a “choice principle”:

Choosing between two alternatives – if one is carrying out a commercial or a family or an investment transaction, choosing the most tax-efficient – is not avoidance.⁷⁸

76 *Mangin v IRC* [1971] AC 739 at p.751 and p.756, restating the *Brebner* principle in the context of an extremely free reading of a New Zealand provision.

77 Because in a commercial transaction, incidental tax avoidance purposes are in any event disregarded.

78 Baker “Tax avoidance, tax mitigation and tax evasion”, accessible www.taxbar.com.

But this formulation goes too far: if a UK settlor creates a trust for their family – a family transaction – they have to choose between UK and foreign trustees; but the choice of foreign trustees by the UK settlor is avoidance.⁷⁹

One can accept a choice principle if it is combined with the concept of the intention of Parliament, ie if the settlor makes choices within the intention of Parliament, there is no tax avoidance; this is equivalent or very similar to the concept of “special tax regime”.⁸⁰

In an earlier edition I suggested a distinction between:

- (1) a tax saving which arises because the transfer *is made* (ie it would not arise if the transfer had not been made)⁸¹; and
- (2) a tax saving which arises because the transfer is made *in one particular way* (ie it would not arise if the transfer were made in some other way).⁸²

This does not work, because classifying a transfer in category (1) or (2) is an arbitrary or evaluative exercise.

31.15 Purpose: advisors and agents of transferor

In a case where a transferor is acting by attorney, the purpose of the attorney should, on normal agency principles, be attributed to the transferor.

In the case where:

- (1) a company makes a transfer, and
- (2) there is no quasi transferor,⁸³

usual company law principles must be applied to attribute to the company

79 It seems that the choice principle has been abandoned in Australia, as a “false dichotomy”: see Myers “Tax avoidance and the High Court since Sir Garfield Barwick” accessible <http://tax.law.unimelb.edu.au/files/AllanMyerslecture.pdf>.

80 See 31.16.2 (Special tax regime).

81 Such as the saving of the settlor’s own tax liabilities arising from the transfer; see 31.22.1 (No avoidance of settlor’s tax liabilities).

82 Such as the saving of the beneficiaries’ tax liabilities on a transfer to foreign trustees (which would not arise on a transfer to UK trustees).

83 In such a case of course there would be no *individual* “transferor” who is within s.720: see 28.3.2 (Transfer procured by individual). The purpose of the company which makes the transfer is still relevant for the application of the motive defence to s.731 ITA.

the purpose of the individuals acting on its behalf.

If a person relies wholly on advisors (eg parents, professionals) and executes documents without more than a vague idea of approving proposals put to them and not properly understood, they have adopted the purpose of their advisors or (which comes to the same thing) the purpose of their advisors is to be attributed to them. In *IRC v Pratt*, the transferor “did not understand the scheme: it was masterminded by his own professional advisors”. Nevertheless, “he, *through his advisors*, was fully acquainted with the fact that what was to follow was a tax avoidance scheme, he must fall fairly within the section”.⁸⁴

For the purposes of New Conditions A and B, s.737 ITA provides:

- (5) In determining the purposes for which the relevant transactions or any of them were effected, the intentions and purposes of any person within subsection (6) are to be taken into account.
- (6) A person is within this subsection if, whether or not for consideration, the person—
 - (a) designs or effects, or
 - (b) provides advice in relation to,

84 57 TC 1 at pp.47, 49. The same point is made in *Burns v HMRC* [2009] STC (SCD)165 at [20] and [39]: “The purpose for which the two girls effected the transactions was simply to do what their parents suggested, and it seems appropriate to me to proceed on the basis that the two girls effectively sought to achieve those purposes that influenced their parents.”

The same principle applies for the transactions in securities rules; see *Addy v IRC* 51 TC 71 at p.81g. Likewise for the settlement provisions: see 75.25 (Purpose of advisors and agents of settlor). In *Federal Commissioner of Taxation v Consolidated Press Holdings* (2001) 207 CLR 235 the High Court of Australia said it was “both possible and appropriate to attribute the purpose of a professional advisor to the taxpayer”. I stress this because the opposite view was taken in *Philippi v IRC* 47 TC 75 where the Court of Appeal said at p.114:

“Young Mr. Philippi ... said that he never had any idea of tax in his mind when he made that transfer. It was true that it was saving him a great deal in UK tax ... but that had not occurred to him; the only reason why he had made the transfer was because his father and other members of the family had told him that he ought to do so. He appears to have had no idea why they gave him that advice. The Commissioners accepted ... his evidence that what he had done he did on his father’s advice.”

Assuming that this implausible story is true (though “young Mr Philippi” was aged 23 at the time of the transfer) the Court should have held that he had adopted the (tax avoidance) purpose of his father. The point was not argued and *Philippi* should not be followed on this issue.

the relevant transactions or any of them.

This only restates the law applicable to the Old Conditions A and B; it makes no difference to the position.

The significance of taking tax advice is discussed in *Ebsworth v HMRC* [2009] UKFTT 199 (TC):

13. Much was made, particularly in cross-examination, of certain of the notes made by Mr. Ebsworth's tax advisers. For the reasons discussed below I did not find them particularly illuminating in reaching my decision as they were what one would expect from a tax adviser engaged to advise on tax rather than as a commercial or other adviser. Taking tax advice does not of itself make tax avoidance one of the main objects of the transactions concerned....

62. The fact that Mr. Ebsworth sought tax advice (with Mrs. Ebsworth) does not of itself mean that tax avoidance was a main object of the transactions. [The paragraph then cites Lord Upjohn in *Brebner*].

31.16 Avoidance/mitigation distinction

This section sets out the most important judicial and other statements on the avoidance/mitigation distinction.

31.16.1 *Intention of Parliament*

IRC v Willoughby is now the authoritative general statement on the subject:

Tax avoidance within the meaning of section 741 ICTA is a course of action designed to conflict with or defeat the evident intention of Parliament.⁸⁵

The Tax Law Review Committee used a similar definition of “avoidance”:

We have regarded tax avoidance as action taken to reduce or defer tax liabilities in ways that Parliament plainly did not intend or could not

⁸⁵ 70 TC 57 at p.117.

possibly have intended had the matter been put to it.⁸⁶

HMRC have also adopted this approach:

Tax avoidance is any action taken to obtain a tax advantage in a way that Parliament did not intend or would not have intended had the matter been put before it. This definition is based upon the report on tax avoidance produced by the Tax Law Review Committee in 1997.⁸⁷

There have been some attempts to be more specific.

31.16.2 *Special tax regime*

Morritt LJ said:

The genuine application of the taxpayer's money in the acquisition of a species of property for which Parliament has *determined a special tax regime* does not amount to tax avoidance merely on the ground that the taxpayer might have chosen a different application which would have subjected him to less favourable tax treatment.

(*IRC v Willoughby* [1995] STC at 183, emphasis added)

This repeats the test of the intention of Parliament (what Parliament has “determined” is, I think, the same as what Parliament has intended). It brings the added refinement of identifying the “special tax regime” which Parliament intended to apply. Professor Willoughby's offshore bonds seem a reasonably clear⁸⁸ example of a “species of property for which Parliament had determined a special tax regime”.

This category can be generalised into all occasions where Parliament has determined a “special tax regime” (regardless of whether there is any particular “species of property” involved):

86 Tax avoidance: A Report by the Tax Law Review Committee (1997) para 1.13, citing *IRC v Willoughby*.

87 IR152 Trusts: An Introduction (withdrawn on 30/09/04) accessible webarchive.nationalarchives.gov.uk/20070402085841/hmrc.gov.uk/pdfs/ir152.htm. HMRC have altered the nuance by deleting the words “plainly” and “possibly” from the TLRC formulation, but that does not alter its essential nature.

88 Though it might be argued that Parliament had intended the chargeable events regime for normal bonds but not for personal portfolio bonds.

The adoption of a course of action which avoids⁸⁹ tax should not fall within section 99 if the legislation, upon its true construction, was intended to give the taxpayer the choice of avoiding it in that way.⁹⁰

The existence of a special relieving regime is neither a necessary nor a sufficient condition of tax mitigation. It is only a factor to consider. There is no relieving provision for bed and breakfast transactions, which are accepted as mitigation.⁹¹ Conversely, as the Special Commissioner rightly said in *Carvill v IRC*:

It is not enough to say that if you find a relieving provision then it is the evident intention of Parliament that the taxpayer should be entitled to use it whatever the circumstances. As *Furniss v Dawson* [1984] AC 474 shows it is quite possible to mis-use a relieving provision. To give an example in the same area as this case, suppose the Appellant had formed [the non-resident company] solely to give him a non-resident employer in order to obtain the foreign emoluments deduction. If that company had been funded entirely by the UK companies and had done nothing other than employ the Appellant, it might be the case that the Appellant would have been avoiding tax because he was misusing a relieving provision. That example of course is deliberately different from the facts of this case where [the non-resident company] was funded from non-UK profits with no corporation tax deduction for services which benefited the UK companies. [Counsel for HMRC] went as far as claiming that Parliament's purpose in enacting the foreign emoluments deduction was to encourage, or at least not discourage, people from abroad to work in the UK so that someone in the Appellant's position who had spent all his working life in the UK, could never qualify. While this may have been in Parliament's mind, I cannot accept that the relief was not available to a non-domiciled person working for a non-UK resident employer whose remuneration is borne by a non-resident, however long the non-domiciled person has been resident (I note that the amount of relief was reduced after nine years' residence). ... the taxpayer must do more than point to the existence of a relieving provision; he must be using, rather than misusing, the relieving provision in a way consistent

89 Lord Hoffmann has here used "avoid" in the loose etymological sense (to include mitigation). Section 99 provided that an arrangement was void as against the Commissioner for Income Tax if its purpose or effect was "tax avoidance".

90 *O'Neil v IRC* [2001] STC 742.

91 See 31.16.4 (Other indicia of tax avoidance).

with Parliament's evident intention.⁹²

31.16.3 *Economic consequences*

Lord Nolan said in *Willoughby*:

The hallmark of tax avoidance is that the taxpayer reduces his liability to tax without incurring the *economic consequences* that Parliament *intended* to be suffered by any taxpayer qualifying for such reduction in his tax liability. The hallmark of tax mitigation, on the other hand, is that the taxpayer takes advantage of a fiscally attractive option afforded to him by the tax legislation, and genuinely suffers the *economic consequences* that Parliament *intended* to be suffered by those taking advantage of the option.⁹³

This repeats the test of the intention of Parliament with the added refinement of identifying “economic consequences”. This is based on two Templeman judgments:

The material distinction in the present case is between tax mitigation and tax avoidance ... Income tax is mitigated by a taxpayer who reduces his income or incurs expenditure in circumstances which reduce his assessable income ... Income tax is avoided ... when the taxpayer reduces his liability to tax without involving him in the loss or expenditure which entitles him to that reduction. The taxpayer engaged in tax avoidance does not reduce his income or suffer a loss or incur expenditure but nevertheless obtains a reduction in his liability to tax as if he had.⁹⁴

The non-recourse loan in *Ensign Tankers* is an example of a transaction without economic consequences and in *Challenge* Lord Templeman gave another example which will be particularly relevant to the practical examples considered below:

⁹² [2000] STC (SCD) 1543 at [91]

⁹³ 70 TC 57 at p.116 (emphasis added).

⁹⁴ *IRC v Challenge* [1986] STC 548 cited in *Ensign Tankers v Stokes* [1992] STC at p.240. (Lord Millett (whose decision in the High Court was reversed in *Ensign Tankers*) took the opportunity in *Collector of Stamp Revenue v Arrowtown Assets* [2003] HKCFA 46 accessible www.ird.gov.hk/eng/pdf/facv4_2003.pdf to cast doubt on the correctness of *Ensign Tankers*, but that does not affect the point here.)

When a taxpayer makes a settlement, he deprives himself of the capital which is a source of income and thereby reduces his income. If the settlement is irrevocable and satisfies certain other conditions the reduction in income reduces the assessable income of the taxpayer. The tax advantage results from the reduction of income.⁹⁵

These are transactions with obvious economic consequences.

Professor Willoughby's investment in his bond had some "economic consequences" as compared to a direct investment in the underlying assets though one might have thought they were not very substantial.⁹⁶

Incidentally, one wonders what economists would think of the term "economic consequences". One suspects it is what John Kay derides as "DIY economics".⁹⁷

31.16.4 *Other indicia of tax avoidance*

It is suggested that "economic consequences" and "special tax regime" are categories of tax saving steps which do accord with the intention of Parliament but are not an exhaustive categorisation of mitigation. They should be regarded as indicia or "badges" of mitigation (like the badges of trade). One can think of others. The Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regs (2004, 2006 and amended again in 2009) are interesting series of attempts to identify indicia of tax avoidance for the purposes of disclosure obligations. The

95 *IRC v Challenge* [1986] STC at 554–555.

96 Lord Nolan identified the following economic consequences:

"The reality in truth is that the bond holder has a contractual right to the benefits promised by the policy, no more and no less. It is therefore quite wrong to describe the bond holder as having, in the words of the Appellants' printed case 'in substance all the advantages of direct personal ownership without the tax disadvantages'. The significance of this misdescription would become all too apparent if—perish the thought—Royal Life were to become insolvent and unable to meet its obligations to the bond holders."

Before 2008 I described this as unconvincing, as the insolvency of Royal Life seemed so remote a possibility as to be discounted. But the 2008 recession showed that Lord Nolan was right.

97 See Kay, *The Truth About Markets*, (2003). "Economic consequences" is, I suggest, a form *v* substance distinction under a more appealing name. This is a classification and not a criticism. There is nothing necessarily wrong with a form *v* substance distinction if it is recognised for what it is.

indicia include:

- (1) confidentiality from other promoters; and
- (2) premium fees (typically linked to tax savings).

The OECD also identified secrecy⁹⁸ as a common characteristic of avoidance:

Secrecy may also be a feature of modern avoidance. In some cases tax advisers sell ready-made avoidance devices, one term of the contract of sale being that the taxpayer keeps the facts secret for as long as possible. It is in the interest of the avoiders to keep the administration from learning about new schemes because official and public knowledge may be followed by legislation to counter that kind of avoidance.⁹⁹

Neither secrecy nor premium fees are normally associated with the commonplace transactions discussed below. But if, exceptionally, that was the case then it would be a factor suggesting that the transaction should be characterised as tax avoidance.

An important indicia is familiarity and use. Once a tax avoidance arrangement becomes common, it is almost always stopped by new legislation within a few years. If something commonly done is contrary to the intention of Parliament, it is only to be expected that Parliament will stop it. So that which is commonly done and not stopped is not likely to be contrary to the intention of Parliament. It follows that tax reduction

98 There are different types of secrecy:

- (1) Secrecy (perhaps better described as confidentiality) against other tax advisers (the scheme vendor wishing to keep the profits of a scheme to himself).
- (2) Secrecy against HMRC (as the OECD envisage) in order to postpone the time when HMRC are informed for as long as lawfully possible.
- (3) Secrecy against HMRC in order to avoid or frustrate any investigation. Of course dishonest breach of a duty of disclosure marks a point where avoidance becomes evasion.

Concealment in category (3) is not primarily characteristic of tax avoidance schemes. It is a problem which may affect all aspects of tax collection (whether or not involving avoidance). The Keith Committee recognised this: *Enforcement Powers of Revenue Departments* (1983) Cmnd 8822 para 7.3.5. By contrast, lawful concealment in category (1) and (especially) category (2) is an indicia of tax avoidance.

99 OECD Report by Committee of Fiscal Affairs (1980) cited in *OECD International Tax Avoidance and Evasion* (1987), p.17.

arrangements which have been carried on for a long time are unlikely to constitute tax avoidance.

There are arguments against this view. It also seems strange that the same act might be stigmatised as tax avoidance if challenged by HMRC or Parliament shortly after it is first done; but if such acts become the general practice over a long period of time then the intention of Parliament is decided differently. Nevertheless, it is submitted that the better view is to have close regard to this factor. Judges have a strong intuitive sense that that which everyone does, and has long done, should not be stigmatised with the pejorative term of “avoidance”. This, I suggest, is the true reason why the courts classify bed-and-breakfast transactions and back-to-back loans as mitigation and not tax avoidance.¹⁰⁰ An example in this category is a transfer to an offshore company to avoid IHT, a standard practice since the inception of CTT.

Professor Sandford drew another categorisation of tax savings which offers another indicia of avoidance. He refers to:

- (1) Tax savings offered by government to induce a certain kind of behaviour or to fulfill what it feels to be an obligation.
- (2) Methods of saving that a government dislikes, but allows to remain for administrative reasons.
- (3) Tax savings deriving from technical loopholes unforeseen at the time of drafting.¹⁰¹

Category (1) is obviously mitigation and category (3) is obviously avoidance. It is suggested that category (2) should be classified as mitigation rather than avoidance. An example is a transfer of a land-owning company (instead of its land) to reduce the rate of stamp duty from land rates (in short, 4%) to share rates (0.5%). The Government considered imposing stamp duty at land rates on shares in land-owning companies to prevent this, but decided not to proceed with the idea.¹⁰² Such transfers should be considered mitigation rather than avoidance. This category is particularly important to the practical examples considered below. An example is the use of offshore companies to hold

100 *Ensign Tankers (Leasing) v Stokes* 64 TC 617 at 739. Back-to-back loans have been accepted by HMRC for decades: International Tax Handbook, para 1201.

101 *Tax Avoidance* (1979, IEA) p.81.

102 Modernising Stamp Duty (HMRC, Consultative Document 2002) para 2.34. Contrast Australia where the transfer of shares in “land-rich” companies is subject to stamp duty at the rates applicable to land.

UK assets to save IHT (even though the suggestion to impose IHT on such companies did not reach the level of formal discussion).

31.17 Failed indicia of tax avoidance

31.17.1 *Spirit of the statute*

Other approaches in distinguishing tax avoidance and tax mitigation are to seek to identify “the spirit of the statute” or “misusing” a provision. I take this to mean exactly the same as the “evident intention of Parliament” properly understood. If that is right, the expression adds nothing but rhetoric and confusion. If it means anything vaguer or more intuitive than that, then the concept deserves the ridicule expressed in *Norglen v Reeds Rains Prudential*.¹⁰³ Either way, the expression is best avoided in this context (and indeed in any context).

31.17.2 “Artificial” transactions and devices

Another approach is to seek to identify “artificial” transactions. This raises a number of difficulties.

First, while tax avoidance frequently involves transactions that can be described as “artificial”, this is not always the case. You can have tax avoidance without much (if any) artificiality¹⁰⁴ and, of course, artificiality without tax avoidance. That in itself would not be a fatal objection if we are merely seeking badges of avoidance and not a test which will work every time.

However, the unlawyerlike term “artificial” is too vague to be useful even as a badge of tax avoidance. The 1955 Royal Commission on the Taxation of Profits and Income commented on s.44 F(No. 2)A 1915 (“A person shall not, for the purpose of avoiding payment of excess profits duty, enter into any fictitious or artificial transaction ...”):

A transaction is not well described as “artificial” if it has valid legal consequences, unless some standard can be set up to establish what is

¹⁰³ “It is not that the statute has a penumbral spirit which strikes down devices or strategies designed to avoid its terms or exploit its loopholes. There is no need for such spooky jurisprudence.” [1999] 2 AC 1 at p.14.

¹⁰⁴ eg an appointment of non-resident trustees or a transfer to a non-resident company.

“natural” for the same purpose. Such standards are not readily discernible.¹⁰⁵

The Royal Commission is right. The problem is not that the word “artificial” is meaningless. But it can only be used where there are standards of what is non-artificial (or “natural” or “normal”).

For a striking illustration, see the comment of a MP opposing the proposal in the Married Women’s Property Bill 1868, that a married woman should own property, as creating:

an *artificial* and an unnatural equality between men and women.¹⁰⁶

The Courts have recognised this:

'Artificial' is an adjective which is in general use in the English language. It is not a term of legal art; it is capable of bearing a variety of meanings according to the context in which it is used. In common with all three members of the Court of Appeal their Lordships reject the trustees' first contention that its use by the draftsmen of the subsection is pleonastic, that is, a mere synonym for 'fictitious'. A fictitious transaction is one which those who are ostensibly the parties to it never intended should be carried out. 'Artificial' as descriptive of a transaction is, in their Lordships' view a word of wider import.

No further definition was attempted:

Where in a provision of a statute an ordinary English word is used, it is neither necessary nor wise for a court of construction to attempt to lay down in substitution for it, some paraphrase which would be of general application to all cases arising under the provision to be construed. Judicial exegesis should be confined to what is necessary for the decision of the particular case. Their Lordships will accordingly limit themselves to an examination of the shares agreement and the circumstances in which it was made and carried out, in order to see whether that particular transaction is properly described as 'artificial'

105 Cmd. 9474 para 1024.

106 Cited in Holford, “Victorian Wives and Property” in Vicinus, *A Widening Sphere* (1980). The proposal did not become law until 1882.

within the ordinary meaning of that word.¹⁰⁷

In *Commissioner of Taxpayer Audit and Assessment v Cigarette Company of Jamaica* the Privy Council cited this and continued:

22. ... a transaction is an abstract construct. Every transaction is in a sense artificial in that it is put together by two or more parties in order to create or alter legal rights and obligations as between them. While mindful of Lord Diplock's warning against too much judicial exegesis the Board consider that in this context a transaction is "artificial" if it has, as compared with normal transactions of an ostensibly similar type, features that are abnormal and appear to be part of a plan. They are the sort of features of which a well-informed bystander might say, "This simply would not happen in the real world." Recognising a transaction as artificial in this sense is an evaluative exercise calling for legal experience and judgment. It is certainly not an ordinary question of primary fact....

23. A transaction is not artificial merely because it is not commercial, or not fully commercial. Income tax affects transactions by way of bounty as well as commercial transactions. But if a transaction effected in a commercial context is attacked as uncommercial that may be a reason for looking at it closely. To repeat what Lord Diplock said in the passage quoted above, it is necessary to examine the particular transaction and the circumstances in which it was made and carried out.

A distribution of profits to a shareholder by interest-free loan (rather than dividend) was held not to be artificial. I think one could have written an equally convincing judgment in favour of the opposite view (which had been upheld by the court at first instance.) The word "artificial" is of no use in marginal cases because there are no clear standards. It is of no use in determining whether any of the practical examples considered below are tax avoidance.

In fact the word "artificial" is often used to describe a transaction carried out for tax avoidance purposes. A transaction is not categorised as tax avoidance because it is artificial: it is described as artificial because it is tax avoidance. For instance:

such elaborate arrangements would not have been entered into other than

107 *Seramco Ltd Superannuation Fund Trustees v IT Commissioner* [1977] AC 287.

for the purpose of tax avoidance. The arrangements had no genuine commercial purpose. ... The arrangements can, therefore, correctly be described as artificial.¹⁰⁸

The same objection applies to that particular obstacle to clear thinking, the term “device”.¹⁰⁹

31.17.3 “Genuine”

The word “genuine” is often used to describe the antithesis to a tax avoidance transaction.¹¹⁰

31.18 Intention of Parliament v intention of Government

I suggest two broad approaches to “tax avoidance” can usefully be distinguished:

- (1) “Tax avoidance” as politicians, civil servants (and perhaps most non-tax lawyers) use the term. This means a tax reduction arrangement which is contrary to the intention or wish of the *Government of the day* (ministers or civil servants, primarily HMRC). For a revealing example of this usage see the National Audit Office Report (Countering VAT Avoidance, 1992):

Avoidance involves complex issues and the position is constantly changing. A policy change in the UK, or a ruling from the European Commission or European Court of Justice, can easily result in today’s unacceptable avoidance becoming tomorrow’s acceptable tax mitigation, and vice versa.

This is “tax avoidance” for the purposes of politics and administration.¹¹¹ Likewise the use of A&M trusts, which between 1974 and 2006 was a

108 *R oao Huitson v HMRC* [2010] STC 715 at [11].

109 *Norglen v Reeds Rains Prudential* [1999] 2 AC 1 at 13: “I do not think that it promotes clarity of thought to use terms like stratagem or device.”

110 For example see 31.25 (UK settlor and UK beneficiaries).

111 A purist may say this usage is incorrect or debased; that takes us to the debate as to whether or not there is such a thing as “correct” English usage (where different groups use English differently) and how one determines it if there is. But the purist cannot stop the word being used in this political sense.

paradigm example of mitigation, suddenly became tax avoidance in the political vocabulary of the Government of the day.

- (2) “Tax avoidance” in the sense used by tax lawyers. This means a tax reduction arrangement which is contrary to the intention of *Parliament*. The view of the Government or HMRC should not come into it.

This lawyer’s concept of “tax avoidance” is better in law because it is consistent with the rule of law: the rule of law requires that tax liabilities are to be determined by settled rules derived from statute and other sources of law, and not by the opinion or decision of a civil servant or politician. This concept is also less volatile. It is right, indeed necessary, for it to be so. If the meaning of “tax avoidance” were “constantly changing” as a result of a mere “policy change in the UK or ruling from the European Commission” then the concept is unworkable for tax.

My distinction was openly accepted in the former ITH:

103. Avoidance in international context

Within the Revenue we do not categorise avoidance in quite the narrow way that the Courts have done. Of course we make a distinction between mitigation and avoidance. However, if a taxpayer takes advantage of the law to get a tax advantage which is not, *in our understanding*, within the spirit of the legislation, we tend to look on that as avoidance.

(Emphasis added)

The avoidance/mitigation distinction is not self-explanatory, it is not a given. It is a construct defined and determined by reference to values and attitudes of the tax culture in which we live. The difference between the approaches (1) and (2) is partly: *whose* values and tax culture does one apply, and: *to what materials* does one refer to ascertain these values? The taxation of PETs offers an example. In 1973, C.T. Sandford wrote:

At present gifts made more than seven years prior to death pay no tax (with the possible exception of capital gains tax). ... Is there evidence that such gifts are contrary to the intention of Parliament? Both circumstantial evidence and logic point to this conclusion. Thus if Parliament were indifferent to the making of gifts prior to death, would there have been successive increases in the gifts *inter vivos* period, which, since 1894, has risen in four successive stages from one to the present seven years?

Sandford considered and dismissed some policy arguments in favour of an estate duty and concluded:

A reasonable interpretation would be that the gifts *inter vivos* provision was intended to prevent as many gifts as possible from circumventing estate duty.¹¹²

The repeal of CTT and return to an estate duty under the name of Inheritance Tax shows that lifetime giving since 1986 cannot now be regarded as “tax avoidance”. I suggest that lifetime giving was not “avoidance” (in the strict sense) of estate duty even in 1973. If Parliament intended to tax all lifetime gifts it would *not* have increased the lifetime gift period to seven years. It is obvious that such an increase would not stop tax-free lifetime giving. Parliament would certainly not have enacted a taper relief under which gifts made more than four years before death pay a reduced rate! How then did Professor Sandford reach the wrong conclusion? Perhaps because he wished to advocate the imposition of a capital transfer tax. When one wishes to support a tax reform, the temptation to describe the old law as permitting “avoidance” is irresistible (as a tool of advocacy) and also has a certain underlying logic. There is tax avoidance in a political if not a lawyer’s sense. If some future Government abolishes PETs, and returns to some form of CTT, it seems safe to predict that those supporting the reform will castigate lifetime giving as tax avoidance. One point to note is that a comment from the Government (or any proponent of a tax reform) that existing law permits “avoidance” needs especial scrutiny because it is easy to confuse the intention of Parliament with the intention of Government (or of the proponent).

Understood in this way the term “tax avoidance” is vague but not, I think, hopelessly so, as, for instance, the currently popular phrase “the right amount of tax”.

31.19 How to ascertain “the evident intention of Parliament”?

This is the problem at the heart of the concept of “tax avoidance”. If this term means an action contrary to the intention of Parliament, one must

112 IFS, *Hidden Costs of Taxation*, 1973, p. 113.

identify that intention. C.T. Sanford addressed the problem:

But here we meet the major difficulty. ... As individuals we may feel certain that a particular action is contrary to the intention of the law; but the *objective* interpretation of that intention can only be found in the words the law uses.¹¹³

Sanford was right. The issue is statutory interpretation and the principles of statutory interpretation should be applied. The intention of Parliament should be decided primarily from the words of the statutes. Other material may be relevant on the usual principles of statutory interpretation: White and Green Papers, Royal Commission Reports, Hansard on *Pepper v Hart* principles, textbooks and the occasional learned article.

Lord Nolan refers to the *evident* intention of Parliament. Unless there is an “evident” intention, there is no tax avoidance. This qualification does not remove a penumbra of uncertainty, but perhaps it helps to reduce it.

31.19.1 *Two levels of intention*

Now, it may be objected that a concept of “tax avoidance” based on what is contrary to “the intention of Parliament” is not coherent. The object of statutory construction is always said to be to find “the intention of Parliament”.¹¹⁴ A successful tax avoidance scheme, even as blatant a scheme as *Fitzwilliam*,¹¹⁵ is a scheme where a Court has concluded that the intention of Parliament was not to impose a tax charge in the circumstances which the tax avoiders had placed themselves. A.A. Shenfield made this point:

What is meant by the intentions of the law and in what sense does avoidance circumvent them? Courts of law in our system seek to find the intention of a law in the words it uses. In this sense the avoider does not circumvent its intentions but abides by them.¹¹⁶

113 IFS, *Hidden Costs of Taxation*, 1973, p.114 (emphasis in original).

114 See *Cross on Statutory Interpretation*, Oxford University Press (3rd. ed, 1995), chapter 2.

115 67 TC 614.

116 A.A. Shenfield, *The Political Economy of Tax Avoidance*, Institute of Economic Affairs, Occasional Paper 24, 1968, pp.20–21. Lord Hoffmann made the same point in “Tax Avoidance” [2005] BTR 197 at p.206: “tax avoidance in the sense of

The answer is that the expression “intention of Parliament” is being used in two senses. It is perfectly consistent to say that the *Fitzwilliam* scheme: (1) escapes IHT (there being no provision to impose an IHT charge); and yet (2) constitutes the avoidance of IHT.

One is seeking the intention of Parliament at a higher, more generalised level. A statute may fail to impose a tax charge, leaving a gap that even a court cannot fill even by purposive construction, but nevertheless one can conclude that there would have been a tax charge had the point been considered. An example is the notorious case of *Ayrshire Employers Mutual Insurance Association v IRC* 27 TC 331 where the House of Lords held that Parliament had “missed fire”.¹¹⁷ A.A. Shenfield recognised this (perhaps grudgingly):

What the complainant against avoidance means by the intentions of a law is not what may be deduced from what it says, but what parliament intended it to say, or what parliament ought in the complainant’s opinion to have intended it to say, or what in his opinion it would have been equitable for it to say. Now I do not say that this can never have substance. We all know that, quite apart from outright errors of draftsmanship, there is a distinction between the letter and the spirit of a law. But the spirit of a law is elusive. It is tempting to believe that one has grasped the spirit of a law when in truth one is moved by prejudice or preconception. We ought to be extremely careful ...¹¹⁸

transactions successfully structured to avoid a tax which Parliament intended to impose should be a contradiction in terms. The only way in which Parliament can express an intention to impose a tax is by a statute which means that such a tax is to be imposed.”

117 It might be objected that this case is wrongly decided by modern standards of statutory interpretation: “I venture respectfully to suggest that if, as in this case, the Courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed”; “The Courts as Legislators”, Presidential Address of Sir Kenneth Diplock, The Holdsworth Club, 1965 accessible www.kessler.co.uk. However, in *Cooper v Billingham* 74 TC 139 para 35 the Court of Appeal was prepared to say that the same result could happen today (albeit rarely).

118 *Ibid*, note 94.

31.20 Reduction, deferral and unsuccessful avoidance

31.20.1 *Reduction*

The motive defence provisions refer to “avoidance” alone but comparable statutory provisions refer to “avoidance *or reduction*” of tax.¹¹⁹ In this expression it could be that avoidance is used in the strict sense and reduction is referring to mitigation, but that is anachronistic (since the distinction was not known at the time). The word “reduction” was probably added to forestall an argument that the mere reduction of tax was not avoidance as long as some tax remained payable.¹²⁰ But nowadays a court would not be so literal and there is no doubt that (for the purposes of the motive defence) a reduction of tax from £10 to £6 amounts to the avoidance of £4.

31.20.2 *Deferral*

Arrangements to defer tax may constitute “avoidance”.¹²¹ Indeed the classic avoidance case *Furniss v Dawson* might be characterised as involving mere “deferral” of tax. However, the fact that tax is merely deferred, and will or may later be paid, may be a factor which supports the conclusion that the arrangement is to be characterised as mitigation and not avoidance.

31.20.3 *Unsuccessful avoidance*

A purpose may exist independently of its success. HMRC correctly say:

... even if the transaction does not achieve its expected result, there may still be a tax avoidance purpose.¹²²

119 The earliest of these was s.35 FA 1941 (Excess Profits Tax); the formula is found in modern provisions: s.773(2)(b) ITA and as part of the more lengthy formula in s.732 CTA 2010.

120 Contrast the statutory expression “mitigate or remit” a penalty.

121 The Special Commissioner so held in *IRC v Willoughby* 70 TC at p.84. There was wisely no appeal on this point.

122 Draft guidance to unallowable purpose tests para 10050.

The OECD agree:

Successful tax reduction is neither a sufficient nor a necessary test of tax avoidance. It is not sufficient because this would cover acceptable tax planning [ie mitigation] and it is not necessary because an avoidance scheme designed to reduce tax may not succeed.¹²³

31.21 Practical examples: introduction

We can test these general principles by trying to apply them in some practical cases. There is no test like the test of practice. I first consider transfers to six types of non-resident trust (here called “trust transfers”):

(1) Trusts where settlor is excluded.¹²⁴

- (a) Foreign settlor: UK and foreign beneficiaries;
- (b) Foreign settlor: only UK beneficiaries;
- (c) UK settlor: UK beneficiaries;
- (d) UK settlor: foreign beneficiaries.

(“Foreign” here refers to someone not resident or domiciled in the UK and not expecting to become resident or domiciled.)

(2) Trusts where the settlor is a beneficiary:

- (a) Settlor foreign domiciled but UK resident;
- (b) Settlor foreign domiciled and non-UK resident.

This by no means covers all the possible circumstances of trust transfers, but one can extrapolate from these to others which may arise.

It may be helpful to summarise the questions that arise on a trust transfer. One must ask: Is the purpose to avoid (1) income tax? (2) CGT? (3) inheritance tax? It is obviously necessary to consider each tax separately; I will consider CGT and IT first, and then IHT. Thus what seemed like a single issue (is there tax avoidance?) raises 3 sub-issues; that is an inevitable consequence of the rule that taxation includes any tax.¹²⁵

However, a tax charge does not arise in isolation, but is charged in different ways on the settlor, trustees¹²⁶ or beneficiaries. It is best to

123 OECD Report by Committee of Fiscal Affairs (1980) cited in OECD’s *International Tax Avoidance and Evasion* (1987), p.17.

124 It is assumed that the spouse of the settlor is also excluded.

125 See 31.9 (Meaning of “taxation” in the motive defence).

126 Although trustees are in economic reality paying tax on behalf of beneficiaries, the rules for taxation of trustees are distinct from the rules for taxation of beneficiaries so it is best to consider trustees separately.

consider these three classes of taxpayer separately, though the issues partly overlap. So in the case of a trust transfer one must ask whether the purpose is avoidance of IT/CGT/IHT liabilities of (1) the settlor; (2) the trustees; (3) the beneficiaries. Thus what seemed like three issues raises nine sub-issues. Further, post-*Willoughby* one must consider whether there is a factual subjective purpose to reduce any of these tax liabilities and then whether the purpose (if present) is to be classified as avoidance or mitigation. So what seemed like a single issue (is the purpose of a trust transfer to avoid taxation?) actually turns out to raise 18 sub-issues (is the purpose to save IT/CGT/IHT by settlor/trustees/beneficiaries and, if so, is it mitigation or avoidance?).

31.22 Trust transfers where settlor excluded

Transfers to a trust from which the settlor is excluded have two common features which are relevant for the motive defence:

31.22.1 No avoidance of settlor's tax liabilities

The trust transfer will usually bring a tax advantage to the settlor (compared to the position if there is no transfer). As far as the settlor's tax liabilities are concerned, since she is excluded from the trust, any tax advantage she might obtain in this way is mitigation not avoidance. It is not in principle the intention of Parliament that she should pay tax in respect of income/gains/capital from which she is excluded.¹²⁷ However, HMRC rightly say that the purpose of a trust transfer may be to avoid tax liabilities of the trustees and beneficiaries and here closer investigation is needed.

31.22.2 Non-tax reason for creating trust

There will usually be non-tax reasons for the settlor to make a trust, rather than making absolute gifts. The advantages are asset protection in the broadest sense: protecting the trust fund from profligate beneficiaries, divorcing spouses, and sometimes forced heirship or foreign exchange

¹²⁷ See Lord Templeman's dictum in 31.16.3 (Economic consequences). The exceptional case of s.86 TCGA is discussed below.

control. These are good reasons but not commercial ones. So a trust transfer must pass Condition A, not Condition B, but it does so in the context of a transaction which is not usually wholly tax driven. In the absence of tax considerations the usual form would normally be (and in practice generally is) a discretionary trust.

31.23 Foreign settlor; UK and non-UK beneficiaries

This section considers a transfer to a trust whose beneficiaries include (but are not primarily) UK resident and domiciled beneficiaries, and exclude the settlor.

31.23.1 Avoidance of trustees' tax

In deciding whether the trust transfer yields a tax advantage for the trustees, one obviously cannot compare the actual position (appointment of foreign trustees) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done (which in this context must be the appointment of UK trustees). That seems a reasonable comparable; the settlor has a choice: to transfer to trustees in the UK or elsewhere and they must do one or the other. In the absence of UK tax, there will often be no reason to prefer the one to the other.

The choice of UK trustees (rather than foreign trustees) would not in principle yield any greater CGT before 2007/08.¹²⁸ There is no question of CGT avoidance for dispositions before the FA 2006.

The position is slightly more complicated for dispositions after 2006. The choice of exclusively UK trustees of a discretionary trust will yield CGT (and income tax on foreign source income) not due from non-resident or mixed resident trustees.¹²⁹ However, if one trustee (even a minority trustee) is resident outside the UK, the trustees are not (in short) subject to CGT or income tax on foreign income. Does that mean that the choice of non-resident trustees is income tax avoidance? It is submitted

128 As long as the UK trustees were professionals: see the 4th edition of this book at 5.8 (Professional trustees treated as non-resident).

129 See 4.4 (Trustee residence for income tax and CGT). The IT position for trustees before 1989 was thought by HMRC to be the same, and was held in *Dawson v IRC* 62 TC 301 to be only slightly (and for present purposes not materially) different.

that the answer is plainly no. Section 475 ITA assists in the appointment of non-resident trustees, suggesting that this cannot be contrary to the intention of Parliament. To hold otherwise would be to suggest that the settlor has a duty to maximise UK income tax and CGT liability. Any tax saving here must be mitigation. It is relevant to note that the reason for the abolition of the rule that professional trustees should be regarded as non-resident was not to prevent avoidance: it was to satisfy a requirement of EU law.¹³⁰

31.23.2 *Avoidance of beneficiaries' income tax liabilities*

In deciding whether the trust transfer yields an income tax advantage for the beneficiaries, one obviously cannot compare the actual position (transfer to trust) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done.

The actual position of UK resident and domiciled beneficiaries is that they will pay tax on income distributions from the trust, but no tax on accumulated income and (in the absence of s.731 ITA) no income tax on capital payments. This is a clear income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of the tax advantage may not constitute purpose, but it depends on the facts.¹³¹

The actual position of UK resident foreign domiciled beneficiaries is that they will pay tax on remitted income distributions from the trust, and (in the absence of s.731 ITA) no income tax on capital payments even if remitted. This could be an income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust, but the advantage may be small or nil.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of this somewhat attenuated tax advantage will not constitute purpose.

130 HMRC announcement 23 March 2006.

131 See 31.13 (Foresight and purpose).

31.23.3 *If there is a tax saving purpose is it avoidance or mitigation?*

Returning to the practical example of a transfer to a trust by a foreign settlor, with both UK and foreign beneficiaries. Is the purpose (if it exists) of saving income tax by the beneficiaries to be classified as avoidance? The difference between being a beneficiary of a discretionary trust and owning capital outright is normally¹³² a difference with “economic consequences”. On an economic consequences test this should be mitigation.

There is another indication that the intention of Parliament is not infringed. If s.731 ITA applies, in this class of case, the result is unfair and sometimes extremely unfair. The UK beneficiaries will pay income tax on capital payments on an amount by reference to relevant income which may greatly exceed their “share” of the income of the trust computed on any just and reasonable basis.

If there is avoidance of UK tax there is likely to be avoidance of tax in every other jurisdiction where beneficiaries are resident;¹³³ it is impossible for the settlor to make a discretionary trust anywhere without tax avoidance elsewhere – which, if not absurd, is somewhat startling.

31.23.4 *Avoidance of beneficiaries’ CGT liabilities*

The CGT position is complicated by tax reforms. Before 1998, capital payments from the trust would be free of tax to the beneficiaries (because the usual charge did not apply to a trust with a foreign domiciled settlor). This was expressly set out in s.87 TCGA.¹³⁴ One must take that as a special tax regime intended by Parliament. Pre-1998 transfers cannot be regarded as involving CGT avoidance by the beneficiaries.

After 1998, capital payments to UK domiciled beneficiaries give rise to CGT by reference to trust gains regardless of the domicile of the settlor and in 2008 the charge was extended further. This could be taken to suggest that post-1998 transfers constitute CGT avoidance by the beneficiaries. But the points made in relation to IT avoidance/mitigation apply here too. For dispositions before 2006, s.69(2) TCGA is even

132 It would be different if the trustees (perhaps guided by a strongly worded letter of wishes) closely follow the wishes of a beneficiary.

133 Assuming they are in a jurisdiction with a tax system comparable to the UK.

134 And in the predecessor legislation: s.17 Capital Gains Tax Act 1979.

stronger than it is now. So the better view is that any CGT saving is mitigation.

31.24 Foreign settlor; only UK beneficiaries

The next case to consider is a transfer to a trust whose beneficiaries are all UK resident and domiciled. A trust transfer primarily motivated by non-tax advantages (asset protection) should not normally be regarded as having the purpose of tax reduction.

In an unusual case, however, that might be one of the settlor's purposes. Indeed, it could be their primary purpose. It can happen be that the settlor creates a trust primarily for a UK beneficiary, and the only reason they do this is tax considerations. Asset protection does not concern every settlor. They would make an absolute gift to a UK beneficiary but for UK tax reasons only they make a transfer to a trust for their benefit. The transfer is solely UK tax driven.¹³⁵

In these (factually unusual) circumstances the question arises whether the tax saving purpose is avoidance or mitigation. Section 69(2) TCGA and s.475 ITA show the intention of Parliament to be that the choice of foreign trustees by a non-resident and non-domiciled settlor should not be regarded as avoidance of trustees' IT or CGT. These sections apply regardless of the residence and domicile of the beneficiaries. The inference should probably be carried across that there is likewise mitigation not avoidance of beneficiaries' IT and CGT liabilities; but the point is arguable.

31.25 UK settlor and UK beneficiaries

Contrast now a settlor who is UK resident and domiciled, making provision for UK beneficiaries. Assume the settlor is not to be a beneficiary. Again, they will often prefer a trust to outright gifts, for non-tax reasons, and the choice is UK or non-resident trustees. If they choose the latter, their purpose (or one of their purposes) is likely to be to reduce CGT or Income Tax and this purpose will be tax avoidance rather than

¹³⁵ This might be made evidentially clear by contemporary correspondence, or if, perhaps, the settlor's gift to a UK child is settled and their gift to other children outside the UK is absolute; but such details only go to identify the settlor's purpose, and are not otherwise significant for tax.

mitigation. This is not an invitation to partake in a statutory regime; we all know that this income tax saving is what s.731 is intended to stop.

The distinction is therefore between:

- (1) foreign settlors (whose offshore trusts are not in principle regarded as tax avoidance), and
- (2) UK settlors (whose offshore trusts are in principle regarded as tax avoidance).

This distinction is clearly drawn in the 1974 Green Paper on Wealth Tax:

Overseas trusts

22. Trusts where the trustees are not resident in the UK and the administration of the trust is ordinarily carried on outside this country fall into two broad categories.

“Genuine” overseas trusts

23. The first category includes all those trusts set up with non-resident trustees by settlors who have little or no connection with this country. *In such a case even if there are one or more beneficiaries or discretionary objects resident in this country there are no grounds on which it would be right to bring the trustees or the whole of the trust assets within the charge to the tax.* But a UK resident individual with an interest in such a trust, whether in possession or reversion, has a realisable asset which should be included in his personal wealth at its actuarial value. If such a trust is discretionary however its objects generally have no interests in the trust assets on which they should be assessed.

“Artificial” overseas trusts

24. The second category includes those trusts where a *UK settlor* arranges for the trustees to be non-resident or where the administration of an existing resident trust passes overseas. The legal ownership of the settled property is thus vested in persons outside UK jurisdiction and *the arrangement is very frequently prompted by tax avoidance considerations.* Accordingly, where settled funds are provided directly or indirectly by a person who at the time the funds were provided was domiciled or ordinarily resident in the UK, the trustees will be liable to the same extent as if the trust had been resident.¹³⁶

While the Paper was addressing the issue of what the Wealth Tax should

136 Wealth Tax, Cmnd 5704, 1974 paras 22–4 (emphasis added). The fact that the Wealth Tax proposal was abandoned does not affect the relevance of the passage.

cover, this passage illustrates very well the general understanding of the concept of tax avoidance in the context of offshore trusts.

Note the terminology of genuine *v.* artificial to describe tax avoidance. The author of the Green Paper had sufficient intellectual rigour to recognise the difficulties in these words and put them in quotation marks accordingly.¹³⁷ If only this were done more often!

31.26 UK settlor; foreign beneficiaries

Now consider a UK settlor making a trust (from which they are excluded) for foreign beneficiaries.

What about liabilities of the beneficiaries? Since they are not UK resident, they are largely outside the scope of IT and CGT, so there is no avoidance.

In deciding whether the trust transfer yields a tax advantage for the trustees, one can again compare the actual position (appointment of foreign trustees) with the appointment of UK trustees. UK trustees would pay IT if the trust were discretionary but not (for all practical purposes) if it were interest in possession. Any IT saving must be mitigation. CGT is different: UK trustees will pay the tax, and foreign trustees will not. However, trustees are in economic reality paying tax on behalf of the beneficiaries. Where the beneficiaries are not within the scope of the tax then any tax saving by the trustees must be mitigation. This is consistent with the rule that the anti-avoidance provisions of s.87 TCGA and s.731 ITA will not in principle apply on payments to beneficiaries outside the scope of CGT and IT.

31.27 UK settlor; UK and foreign beneficiaries

Where there is a mixture of UK and non-UK beneficiaries I suggest the starting point is that one would expect the settlor to make their trust here, so a transfer to foreign trustees would be regarded as avoidance. (In such a case there is something to be said in income tax terms for the creation of two separate trusts for two separate classes of beneficiaries, the residents and the non-residents, so one at least qualifies for the motive defence. But CGT considerations point the other way.)

137 See 31.17 (Failed indicia of tax avoidance).

31.28 Transfer to trust; settlor a beneficiary

31.28.1 *Remittance basis taxpayer settlor-beneficiary*

The next case concerns remittance basis taxpayer settlor who transfers assets to a non-resident trust under which they are the principal beneficiary.

Income tax is not avoided since trust income continues to be taxed on a remittance basis under s.624 ITTOIA. There may be an IT reduction after the death or exclusion of the settlor but it will not (normally) be the purpose (or even one of the purposes) of the settlor to obtain that (normally very long term) advantage, quite apart from the question of whether the advantage is avoidance or mitigation.

There is in principle a CGT advantage that the settlor moves from the remittance basis to the s.87 capital payment remittance basis. To obtain that advantage may well one of the purposes of the trust. If so, is it CGT “avoidance”? It must have been a decision of Parliament *not* to apply s.86 TCGA to a foreign domiciled settlor and the decision was confirmed in 2008 (where a proposal to extend s.86 to foreign domiciled settlors was contained in FD Draft Clauses (January 2008) and dropped in the Finance Bill). It is suggested that there is no CGT “avoidance”. This is a “statutory invitation” in plain terms.

31.28.2 *Non-resident non-domiciled settlor-beneficiary*

Where the settlor is the principal beneficiary and neither domiciled nor resident then UK tax saving is not likely to be a purpose during the life of the settlor, because no saving in fact arises. After the death of the settlor there may be a saving if there are UK beneficiaries. The position then becomes like that of a trust where the settlor is excluded, and the discussion above is relevant.

31.29 Appointing non-UK trustees of UK trust: avoiding IT or CGT?

Similar principles apply. One case is where the settlor and beneficiaries are wholly UK based, the settlor has created a UK trust, and foreign trustees are later appointed. The inference that the appointment has the purpose of saving UK income tax or CGT is very strong and this purpose is avoidance not mitigation.

At the other end of the scale is the case where the settlor and the principal beneficiaries have gone to live abroad permanently and local trustees are appointed. One reason for the export of the trust is that the settlor may (or may continue to be) a trustee. If so, the appointment may have no tax saving purpose at all. But if (as is likely) it has a tax saving purpose, that is mitigation and not avoidance.

What if all the beneficiaries are abroad but the settlor remains in the UK? The same tax savings could in principle be had by winding up the trust with outright appointment to beneficiaries, and that transfer is not likely to constitute avoidance. So the appointment of foreign trustees should not be avoidance.

What if the settlor goes abroad and the beneficiaries remain in the UK? It is tentatively suggested that a tax saving purpose (if it exists) is likely to be avoidance.

A more borderline case is where the settlor and beneficiaries go to live abroad for a medium term period (say five years¹³⁸). Non-UK resident trustees are appointed with the intention that the trust will continue to be non-resident even after the settlor returns to the UK. This is probably to be classified as tax avoidance, albeit long-term tax avoidance, but views may differ, especially if the time spent abroad is longer than five years.

31.30 When is a trust transfer made for the purpose of avoiding IHT?¹³⁹

31.30.1 *Change of situs without alteration of ownership*

The transfer of money by a foreign domiciled person from a UK bank to a foreign bank in order to make the money excluded property, is an act of tax mitigation, not avoidance. See *Beneficiary v IRC* [1999] STC (SCD) 134 at p.145. The same would apply if the transfer is made by trustees of a trust with a non-domiciled settlor. The same would apply to a sale of UK situate property and re-investment in non-UK situate property.

138 There is no particular significance in selecting five years as illustrative of a medium term period, but it is consistent with the CGT temporary non-residence rules; see 8.1 (Temporary non-residence).

139 For transfers before 27 March 1974 it would be necessary to consider Estate Duty.

31.30.2 *Transfer to trustees*

The residence of trustees is almost wholly irrelevant for IHT.

A gift by a settlor to a trust from which they are excluded is mitigation of their own IHT¹⁴⁰ but it is also necessary to consider the IHT savings of trustees and beneficiaries.

If a foreign domiciled settlor gives, and the trustees retain, non-UK property, any IHT saving purpose which may exist is mitigation. This is so even if the beneficiaries are UK domiciled (so an absolute gift to them would have brought the trust property into the scope of IHT). Section 48 IHTA provides that foreign property in a trust made by a foreign domiciliary is excluded property. Any IHT advantage conferred by the trust, so far from being contrary to the evident intention of Parliament, would appear to be in accordance with Parliament's evident intention. The argument to the contrary amounts to an argument that the settlor has a duty to maximise IHT liabilities.¹⁴¹

A gift by a settlor to a trust from which they are not excluded, in circumstances where the settlor is anticipating becoming UK domiciled, is borderline. Section 48 IHTA makes it plain that such a gift carries substantial IHT advantages. But is it "contrary to the evident intention of Parliament" to enjoy these advantages? The author tentatively suggests that such a gift should be regarded as IHT mitigation not avoidance. This is consistent with the rule that the GWR provision does not apply here.¹⁴²

31.31 **Transfer from non-resident trust to underlying company**

I use the term "**underlying company**" to mean a company wholly owned by trustees, which holds beneficially what might in substance be regarded as trust assets. The company would not be UK resident.

¹⁴⁰ See 31.22.1 (No avoidance of settlor's tax liabilities).

¹⁴¹ The avoidance/mitigation issue did not arise in connection with the gift to a trust in *Beneficiary v IRC*, because reducing tax was not a purpose in the mind of the transferor/settlor, even though it was a consideration for his advisers, and even though the principal beneficiary was UK resident at the time; see [1999] STC (SCD) 134 at [145h] - [146].

¹⁴² See 59.13 (GWR death charge: excluded property rules for settled property).

31.31.1 *Is the transfer a commercial transaction?*

Transfers to underlying companies arise in a wide variety of circumstances and may be made for the purpose of obtaining non-tax advantages:

- (1) Advantages of trust administration:
 - (a) Segregation of trust funds of trustee (or occasionally combining trust funds) for ease of management.
 - (b) Avoiding conflict of law and other problems of trustees holding assets (especially land) in foreign jurisdictions. (The problem is most serious in civil law jurisdictions which may not understand or even recognise trusts, but problems could also arise in common law jurisdictions.)
- (2) In the case of land (or other onerous property), avoiding personal liabilities of trustees arising from direct ownership.
- (3) In the case of interest in possession trusts, to allow retention of income (to avoid distributing income to life tenant).

It is a question of fact in each case whether the purpose of a transfer to a company is to obtain these non-tax advantages and a question of law whether they should be regarded as commercial.

Purpose (1) is commercial: it arises in the ordinary course of managing investments. A transfer from trustees to a company is more often than not a commercial transaction, and for the motive defence one applies Condition B and not Condition A. Purpose (2) is rarer but certainly commercial when it occurs. Purpose (3) is not commercial. Where it is the policy of trustees that all its trust funds should be held in separate underlying companies,¹⁴³ the conclusion that the transfer has a commercial purpose seems factually likely. But if one is looking at New Condition B, the additional statutory requirements must be met, in particular, the trustees must carry on a business.

143 The Edwards report suggests that 80–90% of Jersey trusts hold their assets through underlying companies: *Review of Financial Regulation in the Crown Dependencies* Cm 4109 (1998) para 12.5.2 accessible www.archive.official-documents.co.uk/document/cm41/4109/4109-i.htm. Trusts managed in Switzerland generally use underlying companies for Swiss law reasons.

31.31.2 *Is the transfer for tax avoidance?*

Transfer of UK assets¹⁴⁴ from trustees to an underlying company may offer significant tax advantages. It is a question of fact whether any of these advantages are purposes of the transfer and a question of law whether the purpose is avoidance or mitigation.

I begin with a case where s.624 ITTOIA does not apply. There are three possible tax advantages

(1) *Obtaining IHT excluded property status (where the settlor was not domiciled in the UK).*

This should normally¹⁴⁵ be regarded as mitigation. There is of course no economic difference between owning a UK asset directly (non-excluded property) and holding it via a company (effectively converting it into excluded property). But the principle that companies are not transparent for tax purposes is very deep in the tax system. Planning of this kind has been possible since the repeal of the Mortmain Acts (which were enacted to prevent tax avoidance by vesting land in companies) and cannot be regarded as contrary to the intention of Parliament.

The transfer to a company also has a likely CGT disadvantage,¹⁴⁶ and a possible income tax disadvantage,¹⁴⁷ so any tax reduction may be regarded as part of a “package deal”, with advantages and disadvantages. This does not savour of tax “avoidance”.

The contrary view is taken in *Burns v HMRC* [2009] STC (SCD) 165 at [59]:

I would certainly accept that if a non-domiciled person arranged to hold foreign situs, rather than UK situs, assets, and then died, no tax advantage would have been sought. Thus if a UK house was sold, and a French house purchased, that would simply be a case of genuinely changing the assets held, and were some [TAA] point to hinge on whether the change was effected for the purpose of avoiding UK tax,

144 Similar considerations apply to a transfer of foreign assets with a view to realisation and re-investment in UK assets.

145 An exceptional case would be if the property was put in the company shortly before a ten year anniversary and taken out shortly thereafter.

146 See 48.33.4 (Should trustees hold assets through an underlying company?)

147 Loss of tax credits and double taxation relief; sometimes, possible charge under income tax benefit in kind rules.

the answer would be that it was not. And if UK bank deposits were withdrawn and deposits placed elsewhere, then again, that would be a pure investment switch, and not a step the purpose of which would involve the purpose of achieving a UK tax advantage. Indirectly retaining a UK real property, and simply achieving the technical change in status by putting the property into a non-UK resident company in a case where one of the purposes is to achieve the potential Inheritance Tax advantage, implicit by effecting those steps, does seem to me to cross the border between mitigation and tax avoidance. This is because it has involved no real change of investment, as in the two previous examples, but the retention of the UK property, accompanied by a step to change the normal tax consequences of that. Thus where it is shown that the CTT or IHT considerations were one of the purposes of the transfer, or other where the appellants have not displaced the reasonable presumption that UK advantages were one of the purposes, I conclude that those purposes involve tax avoidance and not merely mitigation.

This is obiter (for on the facts of the case there was clearly income tax avoidance). The relevant cases and materials are not discussed. The Commissioner has confused tax avoidance with tax advantage. At some time the point will need to be judicially considered in more depth.

(2) Escaping additional rate income tax (on UK source income of discretionary trust)

The striking thing about this tax is that there is generally¹⁴⁸ no effective method for HMRC to collect it and in practice no one expects it to be paid in cases where all the beneficiaries are outside the UK.¹⁴⁹ Perhaps this supports a conclusion of mitigation.

(3) Escaping higher rate income tax (on income of interest in possession trust).

I suggest that a distinction should be drawn between UK resident life tenants (tax advantage is avoidance) and non-residents (tax advantage is mitigation). In many circumstances, however, non-residents do not pay income tax at the higher rate.

In *Burns v HMRC* [2009] STC (SCD) 165 at [58] the Special Commissioner said:

148 Except in the case of UK land.

149 It is considered that non-payment is not in principle dishonest, and so not a fraud on HMRC, though this conclusion depends to some extent on the facts of the case.

I deal first with the feature of trying to cap the level of charge to income tax at the basic rate. This advantage seems to me to be in the category of tax avoidance. ... it seems to me to be difficult to argue that a transaction designed to reduce income tax by the mechanism of the transfer of UK property to a non-resident person (virtually a paraphrase of the opening wording of section 739) is mere mitigation.

31.31.3 *Transfer by trust to which s.624 applies*

If the purpose of the transfer to an underlying company is to avoid a charge under s.624 ITTOIA, this is considered to be avoidance and not mitigation.

31.31.4 *Transfer of non-UK assets to underlying company*

When non-UK assets are transferred to an underlying company, the UK tax advantage may be less or nil or there may only be tax disadvantages in the loss of double taxation reliefs. In the absence of an intention to re-invest in the UK the purpose cannot as a matter of fact be a tax reduction purpose.

31.32 Non-resident foreign domiciled individual transfers UK property to offshore company

A foreign domiciled non-UK resident individual who transfers UK assets to a non-resident foreign incorporated company may also enjoy comparable tax advantages:

- (1) Obtaining IHT excluded property status.
- (2) Avoiding higher rate income tax.

Such transfers also give significant advantages which have nothing to do with tax. In particular, in the case of UK land, avoiding personal liabilities arising from direct ownership. In such cases, the motive defence may well apply. But if a purpose of the transfer is to reduce IHT or IT, it is considered that this is mitigation not avoidance; the arguments are the same as above.

31.33 Transfer by UK resident foreign domiciled individual to offshore company

Suppose a foreign domiciled UK resident individual transfers UK assets to a non-resident foreign incorporated company.

If a purpose was to reduce IHT, the transfer is considered to be IHT mitigation. A transfer to reduce income tax (because the company pays only basic rate income tax) is considered to be IT avoidance.

31.34 Transfer to UK resident foreign incorporated company

There are many reasons why assets may be transferred to UK resident foreign incorporated companies.

A foreign domiciliary starting a new UK resident company for trade or investment would prefer a non-UK incorporated company so as to own non-UK situate property. This is a commercial transaction and clearly satisfies Old Condition B. New Condition B is (almost) a dead letter,¹⁵⁰ but in an appropriate case there is a reasonable case that New Condition A (or A and B) is satisfied.

A foreign domiciliary (F) wishing to sell a UK unincorporated business may enter into an arrangement under which:

- (1) F gives the business to a UK resident foreign incorporated company.
- (2) F sells the company (not UK situate property).

If the purpose is to avoid CGT (by utilising s.162 TCGA relief) then the claim for the motive defence is weak.

31.35 Transfer from one trust to another trust

There are many reasons why funds may be transferred between trusts. It is impossible to generalise as to whether such transfers are made for tax avoidance: one must look at the reason for the transfer.

One reason such transfers are made is where a single trust holds several sub-funds for different branches of a family. The transfer avoids the unfairness which arises under a single trust, that gains accruing to one share are taxable on a beneficiary of another share who receives a capital payment. It is considered that a transfer for this reason does not have the

¹⁵⁰ See 31.12.3 (New Condition B).

motive of CGT “avoidance”.

31.36 Time to ascertain purpose of transferor

What matters is the purpose of the transferor at the time of the transfer.¹⁵¹

It is quite common that a transfer is made by a foreign settlor for foreign beneficiaries, unimpeachably for non-UK tax reasons, and later some of the beneficiaries move to the UK. Then they will find the trust qualifies for the motive defence and is a useful vehicle for income tax purposes.

There are three possibilities:

- (1) The change of purpose may be accompanied by a new transfer of assets carried out for a tax avoidance purpose. In that case the transfer of asset provisions may apply in relation to the new transfer.
- (2) There may be no further transfer of assets but there may be associated operations carried out for a tax avoidance purpose. The question whether this brings the transfer of asset rules into operation is discussed in para 31.38 (Associated operations: introduction).
- (3) There may be a change of purpose without any new transfer or associated operation. In that case the motive defence remains available and the transfer of assets provisions do not bite at all.

31.37 Time to ascertain intention of Parliament and changes in law

The concept of tax avoidance as an act contrary to the intention of Parliament raises the question of *at what time* Parliament’s intention is to be ascertained. The intention of Parliament may change and the same act could be tax avoidance at one time but not at another. Of course, it needs an Act of Parliament to make this change. For the purpose of the motive defence, tax avoidance must mean an act contrary to the intention of Parliament at the time the transfer took place. This is consistent with the rule that one examines the purpose of the transferor at the time of the transfer.¹⁵² Otherwise changes in the intention of Parliament would often have considerable retrospective effect: a transfer which was not tax avoidance when it was made would retrospectively be treated as made for a tax avoidance motive (or indeed vice versa).

¹⁵¹ The point was made in *Herdman v IRC* 45 TC 394; but it is plain from the terms of the statute.

¹⁵² See 31.36 (Time to ascertain purpose of transferor).

Of course this rule may also favour HMRC. A transfer to avoid (say) Selective Employment Tax would fail the motive defence and that would continue to be the case even after the abolition of that tax.

A distribution or disposal made in 2007/08 to avoid the new rules in the FA 2008 from 2008/09 is not tax avoidance because (1) it is not contrary to the intention of parliament to avoid *future* tax laws: the intention of Parliament is to be determined at the date of the transfer;¹⁵³ (2) Parliament clearly anticipated and accepted that such disposals and appointments would be made and took no steps to counteract them.

31.37.1 *Transfer by non-resident before 1996*

Parliament decided in 1936 not to apply s.720 ITA to transfers made by non-resident transferors, and that was (after some vacillation) held to be the law.¹⁵⁴ In principle, a transfer of assets by a non-resident between 1936 and 1996 could not be said to be contrary to the intention of Parliament, and so it could not constitute income tax avoidance.¹⁵⁵ However, the legislation which reversed *Willoughby* and brought transfers by non-residents into the scope of the transfer of asset provisions applies to pre-1996 transfers.¹⁵⁶ The explanation is that a transfer by a non-resident before 1996 does not normally involve income tax avoidance. However, there are special circumstances where a transfer by a non-resident may be for income tax avoidance¹⁵⁷ and, of course, a pre-1996

153 See 31.37 (Time to ascertain intention of Parliament and changes in law).

154 See 28.5.2 (Transferor not ordinarily resident when transfer made). For convenience, non-resident is used to mean non-ordinarily resident.

155 Contrast pre-1936 transfers by UK resident individuals; these were caught by the new 1936 legislation, but Parliament had never made a decision that such transfers should not be taxed so it would be correct to regard such transfers as made for tax avoidance purposes.

156 s.81 FA 1997. There is an exemption only for income arising before 1996.

157 Examples of special cases are:

- (1) a transfer in anticipation of becoming UK resident or
- (2) a transfer made just before the enactment of the new legislation (when the change of the law was predictable).

Another view could be that such transfers constitute tax avoidance from after the 1952 and 1970 consolidations, which Parliament enacted on the basis of the *Congreve* and *Herdman* decisions (later reversed) that transfers by non-residents were caught. But that offends common sense and the principle that a consolidation does not alter the law.

transfer made for CGT or IHT avoidance would also be caught.

31.37.2 *Transfer before 1981; transferor having no power to enjoy*

Similar considerations apply to a transfer before 1981 to which s.720 ITA did not apply (because the transferor had no power to enjoy the income of the asset transferred). Parliament decided in 1936 not to apply the transfer of asset provisions to transfers unless the transferor had power to enjoy, and that was (again after some vacillation) held to be the law.¹⁵⁸ So such a transfer should not constitute income tax avoidance. In 1981 Parliament brought in s.731 ITA which applied to pre-1981 transfers.¹⁵⁹

The better view is that a transfer outside s.720 made before the 1981 reforms is not to be regarded as income tax avoidance in the absence of special circumstances. A pre-1981 transfer may be within s.731 where it was made for IT avoidance (one example would be where the settlor did have power to enjoy but later died) or where it was made for CGT or IHT avoidance purposes.

31.38 Associated operations: introduction

The motive defence is relatively straightforward when there is a single transfer. It becomes more complicated if there are also associated operations to consider. It is necessary to consider separately the cases where:

- (1) The transfer and associated operations are all made before 5 December 2005 (see the next section).
- (2) The transfer and the associated operations are all after 4 December 2005.¹⁶⁰
- (3) The transfer is before 5 December 2005 and the operation is on or after that date.¹⁶¹

31.39 Associated operations and motive defence before 5 December 2005

Section 739 ITA provides:

¹⁵⁸ See 26.3 (Meaning(s) of “settlor-interested”).

¹⁵⁹ s.45 FA 1981; there is an exception for income arising before 1981.

¹⁶⁰ See 31.40 (Transfer and associated operations all after 4 December 2005)

¹⁶¹ See 31.44 (Transfer before and operation after 5 December 2005).

- (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.
- (2) An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.
- (3) Condition A is that the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.
- (4) Condition B is that the transfer and any associated operations—
 - (a) were genuine commercial transactions, and
 - (b) were not designed for the purpose of avoiding liability to taxation.

Old Condition A refers to any “relevant transactions” and Old Condition B refers to “the transfer and any associated operations” (which comes to the same thing).¹⁶² I will use the expression “any associated operations”.

The transfer and associated operations in issue must each separately satisfy the motive test if the motive defence is to apply. One does not group the transfer and the associated operations together, and look for a single main purpose of the group.

31.39.1 *Associated operations subject to motive test: Critical operations*

The first task to identify the associated operations to which the motive test must be applied. For pre-2005 transactions (which are not affected by the 2006 reforms) the statute refers to “any associated operations” but this is a reference only to associated operations as a result of which a charge arises under s.720 or s.731 ITA. That is, in other words, the associated operations which must be relied on in order to satisfy the conditions set out in those sections. That is, the transfer and operations as a result of which:

- (1) (in any case) income accrues to the person abroad; and
- (2) (a) (in a s.720 case) the transferor has power to enjoy; or
(b) (in a s.731 case) the individual receives a benefit, or income can

¹⁶² Because the term “relevant transactions” is defined to mean the transfer and associated operations; see 27.10 (Significance of associated operations). The difference in the wording of old condition A and B is just a quirk of the drafting, there is no difference in meaning.

be used to benefit them.

I refer to an associated operation which meets these criteria as a “**critical operation**”.

There may and generally will be many operations associated with the transfer, but unless they are critical operations they are irrelevant and should be ignored.

In *Herdman v IRC* 45 TC 394:

- (1) T transferred shares to an Irish company (the person abroad) in consideration of an issue of new shares and a loan. This was an innocent transfer (the purpose was to avoid Irish tax).
- (2) The company accumulated income. This was (arguably) an operation associated with the transfer, and the purpose was (then) regarded as UK tax avoidance.¹⁶³

The motive defence was upheld. Lord Reid said:

[1] It was admitted by Counsel that [what is now s. 720] can only apply if [T] has “by means of” these operations “acquired any rights by virtue of which” he had “power to enjoy” this income during the relevant period. I think that Counsel was clearly right in making this admission.¹⁶⁴

[2] I cannot see how it can be said that [T] acquired any rights at all by means of these associated operations. By means of the transfer of the shares to the new company he acquired two rights. He acquired shares in the new company in the Republic and he became an unsecured creditor of that company for over £76,000. Neither right gave him any right in or to particular assets of the new company. The way in which that company dealt with its assets did not alter either of these rights. It may have made them more valuable and it may have made it easier for the company to pay its debts, but it did

163 After *Willoughby* the purpose should be regarded as mitigation and not avoidance.

164 Section 412 ITA 1952 then provided (so far as relevant):

“For the purpose of preventing the avoiding by individuals ordinarily resident in the UK of liability to income tax by means of transfers of assets by virtue or in consequence whereof, either alone or in conjunction with associated operations, income becomes payable to persons resident or domiciled out of the UK, it is hereby enacted as follows:- (1) Where *such an individual has by means of any such transfer, either alone or in conjunction with associated operations, acquired any rights by virtue of which he has ... power to enjoy ...* any income of a person resident or domiciled out of the UK ... that income shall, ... be deemed to be income of that individual”

not change [T's] rights.¹⁶⁵

Point [1] states the law (only critical operations need pass the motive test) and point [2] applies it to the facts of the case (the operations in that case were not critical).

The statement of law at [1] needs to be translated to reflect the revised statutory wording, which was recast in 1969, and rewritten in 2007, but the principle (that only critical operations need pass the motive test) survived the 1969 reforms.¹⁶⁶ In fact, perhaps the principle was (slightly) more clearly stated under ITA than it was under ICTA, because of the words in s.739(2): An individual is not liable for income tax under this Chapter ... *by reference to the relevant transactions* if condition A or B is met. It is only the transactions *by reference to which the TAA provisions apply* which need to meet old condition A and B.

In *Carvill v IRC*:¹⁶⁷

- (1) T transferred T's majority shareholding in a company to a Bermudian company (B Ltd) in exchange for shares, so T was a majority shareholder in B Ltd ("the original transfer").
- (2) T became a 100% shareholder in B Ltd by (a) purchasing shares and (b) B Ltd purchasing its own shares.
- (3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were held not to be associated operations, but if they had been associated operations it would not have mattered as they were not critical operations. No income arose to B Ltd because of the operations and T did not acquire a power to enjoy because of them.¹⁶⁸

HMRC accept this. RI 201 provides:

The law was amended in 1969 following a decision of the Courts (in *IRC v Herdman* 45 TC 394) that only the transfer and any associated operations giving a power to enjoy at the outset were relevant for determining whether the terms of [the motive defence] were satisfied. The amendment to the legislation sought to bring all associated operations into consideration when [the motive defence] was invoked.

¹⁶⁵ 45 TC 394 at p.413.

¹⁶⁶ See 31.40.1 (The 1969 reforms).

¹⁶⁷ [2000] STC (SCD) 143 at [80]–[85], 75 TC 477 (Special Commissioners).

¹⁶⁸ See [81]–[83].

Because of doubts¹⁶⁹ expressed as to the effectiveness of this amendment, it has been the Revenue's practice in considering whether a defence under [the motive defence] is available to *consider only the transfer and any associated operations which directly establish a power to enjoy the income of the overseas person under any particular sub-head in [s 723 ITA]*.

The last sentence goes too far and is not to be taken literally. Suppose:

- (1) T transfers assets to a UK trust by an innocent transfer, and
- (2) Foreign trustees are appointed (an associated operation)¹⁷⁰ for tax avoidance purposes.

It may be said that the associated operation does not establish a power to enjoy the income of the trust. But the associated operation is a critical one (since it causes income to accrue to the person abroad) so the motive defence does not apply.

Suppose:

- (1) T transfers assets to a non-resident company in return for shares in that company ("the first transfer"). Suppose the first transfer is innocent (no tax avoidance purpose). Income accruing to the company is not caught by the TAA provisions as the motive defence applies.
- (2) T transfers the shares in that non-resident company to a non-resident trust ("the second transfer"). The second transfer has a tax avoidance purpose.

The second transfer is an operation associated with the first. But that associated operation is not a critical operation. Income accrues to the non-resident company as a result of the first transfer. It does not accrue as a result of the first transfer in conjunction with associated operations.¹⁷¹

Take the same transactions, but assume that the first transfer (to the company) had a tax avoidance motive, and the second transfer (to the

169 The "doubts" were in fact a decision of the Special Commissioners on the point; see 31.40.1 (The 1969 reforms).

170 See 27.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006) and 27.11.6 (Transfer to company followed by migration of company).

171 Of course income arising to the trustees as a result of the second transfer is caught by the TAA provisions. The fact that the first transfer was innocent does not help. This is self-evident but if authority is needed see the decision of the Special Commissioners in *IRC v McGuckian* [1994] STC 900. There was (wisely) no appeal on that point.

trust) was innocent. Income of the company is within the TAA provisions. The motive defence does not apply. It is not enough to find an innocent associated operation. Dividends from the company to its shareholders are caught since the income arises by virtue of the tainted transfer to the company and an associated operation (the dividends).

31.40 Transfer and associated operations all after 4 December 2005

31.40.1 *The 1969 reforms*

To understand the post-2005 regime, it is helpful to go back to 1969, when the first attempt at reform was made. Harold Lever (then Financial Secretary to the Treasury) argued:

If we are to have a section [720 ITA], it has to bite on all settlements abroad which at any time are used for avoidance of tax even though originally started for innocent purpose. Supposing a man has transferred money to set-up a Bible society in Bulawayo and his heir being more sophisticated and perhaps more materialistic, finds himself with a settlement set up for unimpeachable purposes and decides that it would make a useful vehicle for the avoidance of all income tax and surtax. The *Herdman* decision meant that section [720] would not prevent this. Clause 27 [FB 1969] therefore knocks out the *Herdman* decision and I think that the hon. and learned Gentleman would be fair enough to say that that is reasonable.¹⁷²

The example is facetious (Lever was known for his wit). The common (if less exotic) example is that:

- (1) a settlement is set up by a foreign settlor for foreign beneficiaries; and
- (2) subsequently beneficiaries come to the UK.

If this was not envisaged at the time of the settlement, even HMRC must concede that condition A was satisfied by the original transfer. Nothing that happened later would alter that defence. So, as Morritt LJ commented (obiter) in *IRC v Willoughby* 70 TC at p.97:

In the FA 1969, legislation was enacted, s.33, to nullify the [*Herdman*] decision ... on the point.

¹⁷² Hansard, 17 July 1969, cols 955–6.

However, the Special Commissioners rejected this in an unreported decision.¹⁷³ Thus the 1969 Act failed to achieve its intention.

31.40.2 *The 2006 reforms*

HMRC tried again in what I call “**the 2006 reforms**” (because they were introduced in the FA 2006, though with effect from December 2005).

Section 737(8) ITA provides:

If—

- (a) apart from this subsection, an associated operation would not be taken into account for the purposes of this section, and
- (b) the conditions in subsections (2) to (4) [New Conditions A and B] are not met if it is taken into account, because of—
 - (i) the associated operation, or
 - (ii) the associated operation taken together with any other relevant transactions,

it must be taken into account for those purposes.

EN Draft Clauses (2005) explained:

certain associated operations that might potentially be disregarded when applying the [pre-2005 motive defence] have to be taken into account for the purposes of the new test. These are associated operations that have an avoidance purpose, but might not directly affect the application of the charging provisions.¹⁷⁴

A post-4 December 2005 transfer which qualifies for the motive defence loses that defence if:

- (1) there is an associated operation;
- (2) that operation does not satisfy New Condition A or B.

¹⁷³ I have been unable to obtain a copy of this decision, though no doubt HMRC have it in their files. If any reader could supply a copy, it would be most helpful to see it.

¹⁷⁴ Para 62. The explanation in EN FB 2006 is more curtailed. The provision alters the former law. EN Draft Clauses (2005) claimed (outrageously) that this change was “clarifying and confirming the correct interpretation of the existing statute” but that was inconsistent with RI 201 and EN FB 2006 more or less abandoned that position.

Trusts and companies which qualify for the motive defence must ensure that from 5 December 2005 any acts by them meet Condition A (or Condition B if relevant). In short, they should do no act which might be regarded as having a tax avoidance purpose. It is important that new associated operations do meet the New Conditions. The transitional rules are harsh.

These conditions are extremely difficult to apply; this may be why almost 40 years passed before the second attempt to alter law established in 1969. The Blair/Brown administrations, it seems fair to say, were unaware or unconcerned about uncertainty and complexity in tax legislation, particularly anti-avoidance legislation.

31.40.3 *Associated operations subject to motive test: Significant operations*

The first task to identify the associated operations to which the motive test must be applied. For post-2005 transactions the statute refers to “*an associated operation*” and it is clear that some operations which are not critical operations (under the old law) are now made subject to the motive test.

The task is to identify what counts as “an associated operation” for the purposes of s.737(8) ITA. The statutory definition of associated operation does not answer this as if it is read literally it is far too wide to be workable. Suppose in 1096 a Crusader transferred land to trustees to avoid feudal duties, and in 2000 the land is again transferred to trustees. At first sight the 1096 transfer is an operation associated with the 2000 transfer.¹⁷⁵ It cannot be that the Crusader’s (arguable)¹⁷⁶ tax avoidance purpose would prevent the transfer in 2000 from qualifying for relief!

There must obviously be some connection between the associated operation and the transfer: the mere fact that they relate to the same property cannot be enough. The position is reminiscent of the Settlement Provisions which define “settlement” as including any disposition, leaving the Courts to devise their own test for what is caught (in that case, the Courts eventually settling on a “bounty” test).

175 See 27.9 (Associated operation: definition).

176 Feudal duties would be “taxation”; see 31.9 (Meaning of “taxation” in the motive defence). I forbear to consider the question whether the 1096 transfer should be regarded as avoidance or mitigation of feudal duties (and would that depend on attitudes to taxation in the Middle Ages or contemporary attitudes?).

Here, it is suggested, the test that the Courts ought to impose should be that the transfer and associated operations form part of one arrangement, or are “put in train” by the transferor.¹⁷⁷ I refer to associated operations which meet that requirement as “**significant operations**”. Thus all significant operations must satisfy new conditions A and B, in order to qualify for the motive defence.

In short, in my terminology the effect of the 2006 reforms is to extend the motive test from critical operations to significant operations.

31.41 When do associated operations have a tax avoidance purpose?

Note the extreme consequences of an associated operation motivated by tax avoidance. Even if the associated operation concerns only a small amount, the *entire* trust may lose the benefit of the motive defence. This unfairness ought to colour the approach of the courts to construing the section.

31.41.1 Investment strategy

Buying and selling investments in the ordinary course of managing investments is not tax avoidance.

Suppose trustees wish to invest in UK equities, but do so via a UK unit trust or OEIC in order to hold property which is excluded property for IHT. The acquisition of a unit trust or OEIC is not tax avoidance. It is considered that the position is the same if the trustees acquire a non-UK unit trust or OEIC to avoid UK source income.

Suppose a trust, all of whose beneficiaries are abroad, wishes to invest in UK land. The trustees invest via an underlying company in order to avoid inheritance tax and the trust rate of income tax on the rent. It is suggested that this is mitigation rather than avoidance. If this is not the case, then the effect on the UK economy could be quite remarkable. It would often be the case that well advised trustees would avoid investing in UK land in order to retain the motive defence. On the other hand, if the land was purchased using an artificial SDLT avoidance scheme, that would be caught.

¹⁷⁷ See 27.11.1 (Transfer from A to B followed by transfer from B to person abroad).

31.41.2 *Distribution strategy*

It is considered that retention of income within a company is not an “operation” but even if it is, it would not be tax avoidance. It is considered that accumulation of income in a common form discretionary trust¹⁷⁸ is not an “operation” but even if it is, it would not be tax avoidance.

Suppose a discretionary trust is within the motive defence. A foreign domiciled beneficiary (not the settlor) is UK resident. If the trustees pay capital to that beneficiary instead of distributing income, in order to avoid an IT charge, this is not tax avoidance. If the trustees lend to the beneficiary interest free in order to avoid an income receipt or reduce the amount of a capital payment, this is not tax avoidance. If the loan is at interest, to avoid a capital payment, this is not tax avoidance. An arrangement might be avoidance if trustees lend unsecured to a beneficiary in circumstances where the beneficiary is either insolvent or so lacking in assets that the beneficiary is not in practice ever likely to be able to repay the sum lent.¹⁷⁹

An arrangement may be avoidance where the trustees accumulate income and then immediately distribute it as capital, in circumstances where the straightforward course would be to distribute as income.¹⁸⁰

Suppose a discretionary settlor-interested trust is within the motive defence, and the settlor comes to the UK. The trustees retain trust income abroad (if it was remitted to the UK there would be a tax charge under the s.624 remittance basis). This is not tax avoidance.

Suppose a non-resident company owned by a non-resident individual pays a large dividend the year before the individual becomes UK resident. That is not tax avoidance.¹⁸¹ But if the individual lends the proceeds back to the company, that is a circular and artificial transaction, and the loan may be regarded as for a tax avoidance purpose.

178 A trust to accumulate income with power to distribute. If there were a trust to distribute with power to accumulate, then accumulation would be an “operation”.

179 Alternatively the loan in such a case may in fact be categorised as an outright distribution.

180 Alternatively the distribution may in fact be categorised as income.

181 That will be clearer from 2012/13 when the temporary non-resident rules govern this area.

31.41.3 *Inter-group transactions*

For company group transactions, it is useful to refer to the “white list” of transactions which HMRC accept as outside para 2(4A) Sch 7 FA 2003¹⁸² (so they qualify for SDLT group relief). Para 23040 SDLT Manual provides:

23040. Restrictions on availability Paragraph 2(4A) Schedule 7 FA 2003 [February 2006]

... This guidance gives some examples of transactions where it is accepted that group relief is not denied by Para 2(4A) Schedule 7 FA 2003.

It should be noted that the examples are intended only to give general guidance and do not use technical or statutory language, nor should they be interpreted as if they were a statute.

They also assume that the transactions described do not form part of any larger scheme or arrangement which might have tax consequences....

Examples of transactions where group relief is not denied by Para 2(4A) Schedule 7 FA 2003

- (1) The transfer of a property to a group company having in mind the possibility that shares in that company might be sold more than three years after the date of transfer
- (2) The transfer of a property to a group company having in mind the possibility that shares in that company might be sold within three years of the date of transfer, with a consequent claw-back of group relief, in order that any increase in value of the property after the intra-group transfer might be sheltered from SDLT
- (3) The transfer of property to a group company having in mind the possibility that either (1) or (2) might occur
- (4) The transfer of a property to a group company prior to the sale of shares in the transferor company, in order that the property should not pass to the purchaser of the shares
- (5) The transfer of property to a group company in order that

182 This provides:

Group relief is not available if the transaction—

- (a) is not effected for bona fide commercial reasons, or
- (b) forms part of arrangements of which the main purpose, or one of the main purposes, is the avoidance of liability to tax.

“Tax” here means stamp duty, income tax, corporation tax, capital gains tax or [SDLT].

- commercially generated* rental income may be matched with commercially generated losses from a Schedule A business
- (6) The transfer of property to a group company in order that commercially generated* chargeable gains may be matched with commercially generated allowable losses
 - (7) The transfer of property to a non-resident group company in the knowledge that future appreciation or depreciation in value will be outside the scope of corporation tax on chargeable gains
 - (8) Transactions undertaken as part of a normal commercial securitisation
 - (9) The transfer of the freehold reversion in a property to a group lessee in order to merge the freehold and the lease, and thus prevent the lease being subject to the wasting assets rules as respects corporation tax on chargeable gains
 - (10) The transfer of property to a group company in order that interest payable on borrowings from a commercial lender on ordinary commercial terms may be set against commercially generated* rental income
 - (11) Borrowings on ordinary commercial terms
 - (a) from a commercial lender, or
 - (b) intra-group in circumstances which would have been commercial had they arisen between unconnected third parties

*Including income, gains and losses which are generated intra-group on transactions which would have been commercial had they been entered into by unconnected third parties

“Transfer” means the transfer of a freehold, in Scotland ownership of land, or the assignment, in Scotland assignation, of a lease.

Cases involving the grant of a lease will need to be considered on their facts.

It is difficult to take point (7) seriously, but even apart from that, it is clear that HMRC do not strain to classify ordinary tax planning as avoidance.

31.42 Consequences of tainted operation

Where there is a tainted operation associated with a transfer, all the income arising as a result of the transfer in principle comes within the scope of ss.720 and 731. If there is an innocent transfer of £10m, and a tainted operation of £10,000, all the income of the £10m comes into charge.

Section 741 ITA provides a very limited relief:

(1) Section 742 (partial exemption where later associated operations fail conditions) applies if—

- (a) an individual is liable to tax¹⁸³ because of section 720 or 727 for a tax year (the “taxable year”) because condition B in section 737(4) (genuine commercial transaction: post-4 December 2005 transactions) is not met, and
- (b) subsections (2) and (3) apply.

The relief only applies for s.720 (and 727) and not for s.731 ITA. Section 741 continues:

(2) This subsection applies if—

- (a) since the relevant transfer there has been at least one tax year for which the individual was not so liable by reference to the relevant transactions effected before the end of the year, and
- (b) the individual was not so liable for that year because—
 - (i) condition B in section 737(4) was met, or
 - (ii) condition B in section 739(4) (genuine commercial transaction: pre-5 December 2005 transactions) was met.

The relief only applies if Condition B is satisfied; not if Condition A is satisfied. In practice New Condition B is hardly ever satisfied. Section 741 continues:

(3) This subsection applies if the income by reference to which the individual is liable to tax for the taxable year is attributable—

- (a) partly to relevant transactions by reference to which one of those conditions was met for the last exempt tax year,¹⁸⁴ and

183 “Liable to tax” is defined in s.741(5) ITA:

“References in this section to a person being liable to tax for a tax year because of section 720 or 727 include references to the individual being so liable had any income been treated as arising to the individual for that year under section 721 or 728.”

184 Defined in s.741(4) ITA:

(4) For the purposes of this section a tax year is exempt if—
(a) it is one of the tax years mentioned in subsection (2), and
(b) there is no earlier tax year for which the individual was liable to tax because of section 720 or 727 by reference to the relevant transactions or any of them. ...

- (b) partly to associated operations not falling within para (a).

Assuming the conditions of s.741 are satisfied one moves on to the relief in s.742:

- (1) If this section applies, the individual is liable to tax under this Chapter only in respect of part of the income for which the individual would otherwise be liable.
- (2) That part is so much of the income as appears to an officer of Revenue and Customs to be justly and reasonably attributable to the operations mentioned in section 741(3)(b) in all the circumstances of the case.
- (3) Those circumstances include how far those operations or any of them directly or indirectly affect—
 - (a) the nature or amount of any person's income, or
 - (b) any person's power to enjoy any income.

The drafter has given up here.

31.43 Income arising before tainted operation

This section considers how the TAA provisions apply where an innocent post 4-December 2005 transfer is followed by a tainted operation subsequently.

The position where a pre-5 December 2005 transfer is followed by a tainted operation on or after 5 December 2005 raises additional issues discussed at 31.44 (Transfer before and operation after 5 December 2005).

31.43.1 *Income before tainted operation: s.720*

Suppose:

- (1) an innocent transfer is made on or after 5 December 2005, and
- (2) an associated operation made today fails the New Conditions (“the tainted operation”).

At first sight *all* income back to the date of the transfer comes into charge under s.720 ITA.¹⁸⁵ HMRC say in a letter dated 7 April 2006 to the representative bodies that only income of the year in the year of the

¹⁸⁵ In practice HMRC would be limited to a four year period.

tainted operation and subsequent years is charged:

Transitional arrangements, whether income charged retrospectively

Representation: It is suggested that the transitional arrangements of [s.740 ITA] have the effect that income could be brought into charge retrospectively. [Section 740(4) ITA] could be interpreted as meaning that if an associated operation after 5 December 2005 fails the exemption test in [s.737 ITA], all of the income arising from 5 December 2005 could be charged (even where the subsequent associated operation takes place many years later).

Response: The legislation does not apply retrospectively in the manner suggested. [Section 741C ICTA]¹⁸⁶ provides the general rule that section [720] applies in this type of case as it would apply apart from section [736 to 742 ITA]. In those circumstances section [720] would take the income arising in the relevant year of assessment.

This is far from clear in the legislation, but it is a sensible result.

31.43.2 *Income before tainted operation: s.731*

Suppose:

- (1) An innocent transfer was made on or after 5 December 2005.
- (2) A tainted associated operation is made subsequently.
- (3) An individual (not the transferor) receives a benefit in the same year as the associated operation or subsequently.

The individual is taxable under s.731 ITA by reference to all the income which has arisen backdated to the date of the transfer.

Suppose the order of transactions were reversed:

- (1) An innocent transfer was made on or after 5 December 2005.
- (2) An individual (not the transferor) receives a benefit on or after 5 December 2005.
- (3) A tainted associated operation is made in a tax year after the benefit is received.

That is, the benefit was received in the year before the tax motivated associated operation. Is the benefit retrospectively subject to tax? There is no indication either way but it is suggested that the answer is, no. This

186 Now s.740(3) ITA. The wording is not quite the same, but that has not altered the position.

is consistent with how HMRC understand s.720 to work.

31.44 Transfer before and operation after 5 December 2005

Section 740 ITA provides:

- (1) This section applies if the relevant transactions include both pre-5 December transactions and post-4 December transactions.
- (2) An individual is not liable to tax under this Chapter for the tax year by reference to the relevant transactions if—
 - (a) the condition in section 737(2) (exemption where all relevant transactions are post-4 December 2005 transactions) is met by reference to the post-4 December 2005 transactions, and
 - (b) the condition in section 739(2) (exemption where all relevant transactions are pre-5 December 2005 transactions) is met by reference to the pre-5 December transactions.

Thus in principle one applies the New Conditions to post-4 December 2005 transactions and the Old Conditions to pre-5 December 2005 transactions.

An important question is whether the motive defence test must be met:

- (1) by all significant associated operations; or
- (2) only by critical operations (my terminology).

At first s.737(8) ITA appears to answer the question,¹⁸⁷ but it does not, because s.737(1) provides:

This section applies if all the relevant transactions are post-4 December transactions.

It is suggested that the *Herdman* principle still applies to pre-5 December 2005 transfers even if the operation takes place subsequently. That is, only critical associated operations have to pass the motive test and other associated operations are ignored. This does not deprive s.740 ITA of meaning, for it now governs the position where there are post-4 December 2005 critical operations. For instance, suppose:

- (1) there was a transfer to a UK trust (an innocent transfer) before 5 December 2005;

¹⁸⁷ See 31.40.2 (The 2006 reforms).

- (2) non-resident trustees are appointed (a critical association operation) post-4 December 2005.

In deciding whether the motive defence applies one asks whether the associated operation satisfies New Conditions A and B.

The position is not clear cut and HMRC could make the following points:

- (1) Section 740(2)(b) incorporates s.737(2) the New Conditions A and B, but by doing so it necessarily incorporates s.737(3) to (7) which supplement s.737(2). So it is possible to say that s.740(2)(b) also incorporates s.737(8).
- (2) The transitional rules in s.740, see below, arguably make better sense if s.727(8) is applied. But the rules are so harsh that it is suggested that the taxpayer-favourable construction is to be preferred.

31.44.1 *Transitional rules*

Section 740(3) ITA provides:

If subsection (2)(b) applies but subsection (2)(a) does not, this Chapter applies with the modifications in subsections (4) to (6).

This brings in three transitional rules where:

- (1) the pre-5 December 2005 transactions met the Old Conditions; but
 - (2) post-4 December 2005 transactions do not meet the New Conditions.
- The provision in s.740(4) ITA is not discussed because it was spent even before the ITA took effect; see the 9th edition of this work para 28.44.2.

31.44.2 *Transitional rule: s.731*

Section 740(5) ITA provides a transitional rule for s.731 ITA:

In determining the relevant income of an earlier tax year for the purposes of section 733(1) (see Step 4),¹⁸⁸ it does not matter whether that year was a year for which the individual was not liable under section 731 because of section 739 or this section.

Suppose:

¹⁸⁸ See 29.12 (Computation of charge).

- (1) An innocent transfer was made before 5 December 2005.
- (2) A tainted associated operation is made on or after 5 December 2005.
- (3) An individual (not the transferor) receives a benefit in the same year as the associated operation or subsequently.¹⁸⁹

The beneficiary is taxable under s.731 ITA by reference to all the relevant income from the date of the transfer (or from 1981, if later). This harshly retrospective rule was actually intended. EN FB 2006 para 33 provides:

[The effect of s.740(5) ITA is:] for the purposes of [s.731 ITA] where the individual receives a benefit in a year of assessment ending after 5 December 2005, the process of determining relevant income under the general rule for years up to and including that year must take account of relevant income that arose in years of assessment ending before that date, as well as later years.

It will often be impossible for the quantum of relevant income to be ascertained exactly, as the records will not exist. But the issue may in practice be fudged by agreement with HMRC.

Section 740(6)(7) ITA which deal with this were also spent before ITA took effect; see the 6th edition of this work para 19.48.3.

31.45 Tax return: disclosure of motive defence claim¹⁹⁰

The motive defence does not require a formal claim. If there has been an innocent transfer, a taxpayer was formerly entitled (indeed required) to complete any tax return on the basis that the motive defence applied; one was not required to prove the motive defence applied to the satisfaction of the Board before completing the tax return on that basis. However, if an individual completes a self assessment return, it has been necessary since 1998/99 to indicate on that return that they have taken advantage of the motive defence.¹⁹¹

189 There is no charge if the benefit is received in a tax year before the operation: see 31.43.2 (Income before tainted operation: s.731).

190 See also 28.16 (Tax return – disclosure of s.720 income) and 29.39 (Tax return – disclosure of s.731 income).

191 RI 201 notes this point:

“Taxpayers are required to disclose clearly in their self-assessment return if there is any income or benefit assessable under [the TAA provisions], and whether reliance is being placed on [the motive defence] to exclude income or benefit from

In the 2011/12 tax return, notification that the motive defence is in point is given by completing box 46 in the Foreign pages (form SA106). The words next to box 46 state:

If you have omitted income from boxes 11, 13 and 42 because you are claiming an exemption in relation to a transfer of assets, enter the total amount omitted (and give full details in the ‘Any other information’ box on your tax return)

It is only correct to complete box 46 if the motive defence is needed. It is not correct to complete the box if the TAA provisions do not apply to impose a charge for some other reason, such as the remittance basis, because that is not an “exemption”.¹⁹²

The International Manual provides:

600040 - Transfer of assets abroad [October 2010]

Overview of ITA2007/S736 - 742 - exemption from liability

...There is no provision for a “clearance” or other advance ruling oao the exemption provisions. Details of the amount considered to be exempt from charge should be entered on the Foreign Pages of the Self Assessment tax return. In the “white spaces” of the return, the individual should enter particulars of transfers and associated operations that would result in a charge absent an exemption, and provide factual details about the transaction explaining the basis for considering a condition for exemption to be met.

assessment.”

192 HMRC take this view. HMRC Foreign Notes (SA106 notes 2011/12) provide:

“Box 46 If you have omitted income from boxes 11, 13 and 42 because you are claiming an exemption in relation to a transfer of assets, enter the total amount omitted The provisions described at boxes 10 to 13 and 42 do not apply if you can show from all the circumstances that none of the purposes of the transfer and any associated operations was to avoid tax. But an exemption is only due if actual income would otherwise be chargeable. If you omit income for this reason from boxes 11, 13 and 42, you must enter the total amount of income you have omitted in box 46. You must also provide relevant details and an explanation in the ‘Any other information’ box of your tax return, or on a separate schedule, including details of the assets transferred and any associated operations, the person abroad concerned, the circumstances of the relevant transactions and the basis for your claim to exclusion. Helpsheet 262 Income and benefits from transfers of assets abroad and income from non-resident trusts provides more information.”

There is strictly no legal obligation to give precise figures or indeed any figures for the income which (assuming the claim is valid) will not be taxable. However, a failure to give figures will no doubt lead to further enquiries. If estimated figures are given, this should be stated. On the occasion when the claim is first made, sufficient details should be given for HMRC to review the case. Once a claim is agreed, I see no reason to give any details at all in subsequent tax returns. I suggest the words “n/r” be put in box 46 and a note in the additional information section states that since the claim was agreed, no information need be provided as it is irrelevant.

It often happens that the box is left blank when it should be completed, as the need to do so in this very complicated area is overlooked. There is no penalty, provided the claim is valid, as no additional tax is thereby due. It is suggested that the box should be completed on the next tax return, with a note in the “additional information” box to explain the position.

31.45.1 *HMRC action when motive defence box is completed*

RI 201 provides:

Where such a disclosure has been made and exemption under s 741 ICTA claimed, the Revenue will make any necessary enquiries about that exemption in the statutory period allowed, and will not seek to reopen that year’s return on discovery grounds if the s 741 exemption has to be reconsidered in later years.

International Manual explains HMRC’s administrative arrangements for dealing with a claim:

600050 - Transfer of assets abroad [September 2011]

Mandatory referral to CAR Trusts & Estates Bootle

CAR Trusts & Estates (Technical) Bootle is responsible for the operation of the legislation contained in Chapter 2 Part 13 ITA 2007, the provision of Technical Advice thereon and any litigation involving transfer of assets legislation.

All enquiry work involving possible application of the transfer of assets legislation is undertaken by or in conjunction with the specialist team in CAR Trusts & Estates (Compliance) Bootle. Special Investigations offices and CAR High Net Worth Units also undertake review work in this area in relation to cases handled by them.

The individual Self Assessment tax return will often be the first point of identification of cases where the legislation may apply, and as such those handling receipt of returns have a vital role to play in identifying potential application of this legislation. Offices should not however attempt to determine liability to the Income Charge or the Benefits Charge or discuss the application of the provisions with agents without first contacting CAR Trusts & Estates Bootle.

Any case in which it is identified that transfer of assets does or may apply must be referred to CAR Trusts & Estates (Technical) Bootle who will arrange any necessary risk assessment of the case and advise on whether and how this aspect is to be taken forward.

CAR HNWU and Special Investigations offices do not have to make a referral of their own cases in accordance with the previous paragraph but should consult with CAR Trusts & Estates (Technical) Bootle for advice as necessary, and in every case where litigation may be a possibility....

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

You must also submit your papers if you receive an application to exemption from liability under ‘Income Charge’ or ‘Benefits Charge’. You should not enter into correspondence with the taxpayer or his agent oao the exemption provisions. Any enquiry from a taxpayer or professional adviser about the scope and effect of the legislation, or its application to a particular taxpayer, should be referred directly to CAR Trusts & Estates (Technical) Bootle.

On this basis, one should expect an enquiry to be opened, unless the issue has been resolved in earlier years, but in practice that does not always happen.

31.46 Dealing with HMRC enquiries

The individual must “satisfy an officer of the Revenue and Customs” that Condition A or B is met.¹⁹³ This imposes the burden of proof on the taxpayer. That makes no difference as the burden of proof generally rests on the taxpayer, and in any event, disputes are rarely decided by the burden of proof.¹⁹⁴

193 ss. 737(2), 739(2) ITA.

194 See 2.4.3 (Proof of intention).

Contemporary correspondence and background documentation may be relevant to the factual issue of whether the transferor had the purpose of reducing tax. It will not shed much light on the issue of whether the purpose should be classified as avoidance or mitigation. Some factors such as confidentiality or tax related agreements may shed light on this, or at least, on whether the parties regarded the matter as tax avoidance.¹⁹⁵ In *IRC v Willoughby* 70 TC 57 for instance, the Special Commissioner reviewed sales literature relating to the offshore bonds. In practice, expect HMRC to ask for contemporary documentation. The advisors should review it before making a claim. In the case of a transfer to a trust, this includes:

- (1) Trust documentation and letters of wishes.
- (2) If not evident from the above, details of intended beneficiaries.
- (3) Details of assets transferred.
- (4) Contemporary correspondence between trustees, accountants and settlor. (Legal advice may be privileged.)

Often the issue arises many years after the transfer of assets, and the contemporary records have been lost. That should not matter, as secondary material and inferences from common sense should suffice, but efforts should be made to recover original documentation, if only to avoid the suspicion that damaging documents may have been suppressed.

31.47 Appeals

Section 751 ITA provides:

On any appeal that is notified to the tribunal, the jurisdiction of the tribunal includes jurisdiction to affirm or replace any decision taken by an officer of Revenue and Customs in exercise of the officer's functions under—

- (a) section 737 (exemption: all relevant transactions post-4 December 2005 transactions),
- (b) section 738 (meaning of “commercial transaction”),
- (c) section 739 (exemption: all relevant transactions pre-5 December 2005 transactions),
- (d) section 742 (partial exemption where later associated operations fail conditions),

195 See 31.16.4 (Other indicia of tax avoidance).

- (e) section 743(2) (no duplication of charges: choice of persons in relation to whom income is taken into account).

The wording makes clear that jurisdiction of the tribunal is appellate and not supervisory. The wording of New Conditions A and B (“not be reasonable to draw the conclusion ...”) does not impose a *Wednesbury* unreasonableness test.

A decision of the tax tribunal is, on ordinary principles, binding on the parties (subject to an appeal) only in relation to the assessments under appeal. It does not bind the parties in other respects, and in *Carvill v IRC* [2000] STC (SCD) 143, a Special Commissioner allowed a motive defence appeal even though a previous appeal relating to earlier years had been decided against the taxpayers. The taxpayers then sought to recover from HMRC the tax paid under the earlier assessments, but this rightly failed. There must be some finality in tax, even when wrong decisions are reached by the courts. See *Carvill v IRC (No. 2)* [2002] STC 1167 and *R (oao Carvill) v IRC* [2003] STC 1539. That issue will rarely, if ever, arise again in practice.

A more common problem is where tax has been paid under the TAA provisions for a number of years without consideration being given to the motive defence, and then it occurs to a taxpayer that a motive defence is applicable. It is considered that the principle in *Carvill (No. 2)* only applied where a motive defence had been litigated and decided by the tribunal, and in the absence of litigation on the point it should be possible to put in an error or mistake claim under usual principles.

An appeal will be made by the individual subject to tax (not the trustees or company within s.731 ITA who have no *locus standi*). If the trustees fund an appeal by the individual against assessment under s.731, will that funding constitute a benefit? If so that benefit would be subject to income tax under s.731, if the appeal is unsuccessful. The position depends on the facts. If the reason the trustees fund the appeal is in order to sort out their tax planning for the future, or in order to benefit the entire class of UK resident beneficiaries, then no taxable benefit is received by the appellant: any benefit is received by all UK beneficiaries and there is no rational means of apportionment. At the other extreme, if the trust fund is (more or less) wound up by a capital payment, and the appeal procedure is specifically to benefit one beneficiary, then the trustees financing the

appeal would constitute a benefit.¹⁹⁶

31.48 Can an individual disclaim the motive defence?

There are at least two circumstances where the application of the TAA provisions may reduce a tax charge:

- (1) A UK resident transferor who receives a distribution from a non-resident company may be more lightly taxed under s.720: they are taxed on the company's income but has the benefit of tax and tax credits paid by the company, and the distribution is tax free.¹⁹⁷
- (2) A UK domiciled and resident beneficiary who received a capital payment from an offshore trust would until 2008/09 prefer to be taxed under s.731 than under s.87 TCGA, which may apply if s.731 does not, because the IT rates (40%) were lower than the effective CGT rates (64%).

Is it possible for an individual to disclaim the motive defence? It seems arguable that the words “the individual satisfies an officer of HMRC” etc., suggest that the benefit of the motive defence can be disclaimed. The individual may choose not to satisfy an officer even though there was no tax avoidance purpose. If the motive defence is compulsory, we would have the surprising result that a transfer for tax avoidance may be less harshly taxed than one which was not.

However, this view would cause considerable difficulties. Suppose a non-resident trust has relevant income of £1m and trust gains of £1m, and capital payments of £1m are made in Year 1 to beneficiary A and in Year 2 to beneficiary B. A and B are both resident and domiciled in the UK. Suppose the trust is in principle within the motive defence because the transfer to it was not for tax avoidance purposes. Before 2008/09 A would probably wish to disclaim the motive defence, if A could, so the capital payment to A was subject to income tax, and they avoided the s.87 interest surcharge. However, it would be in the interest of B to argue that the motive defence did apply, so that the payment to A “washed” the capital gain and the payment to B was tax free. It is evident that the offshore trust rules simply do not work if the motive defence can be disclaimed by one beneficiary and claimed by another. Nor do they work

196 Or else it may be subject to CGT as a capital payment.

197 See 30.4 (Distribution relief).

fairly if it can be disclaimed by one beneficiary in a manner which binds all the others. So the better view is that the motive defence (if applicable on the facts) is compulsory and binds all parties.

The same applies where it suits HMRC to argue that the motive defence is satisfied, and the taxpayer argues that it is not. This in fact happened in *Swift v HMRC*¹⁹⁸ and *Anson v HMRC*¹⁹⁹ where HMRC successfully argued that the motive defence applied. In neither case did the taxpayer seek to argue that the motive defence could be disclaimed, so the point may now be regarded as settled law.

31.49 Motive defence: commentary

This topic was never easy, but the FA 2006 made it twice as complicated: it introduced wider and more obscure rule which apply to transactions from 2005, while retaining the old rules for earlier transactions.²⁰⁰

The reader who studies this long and difficult chapter will almost certainly agree with the author that the 2006 reforms were wrong headed in policy though (as so often) clumsy drafting adds its mite to the confusion.

What should be done? One step forward would be to return to the (relatively) simple pre-2006 position, though it would be helpful to have a statutory statement of what I take to be the pre-2006 rule, that the motive test must be satisfied by all critical associated operations.

198 [2010] SFTD 553 at [22] - [28]. The case is not yet final.

199 [2012] UKUT 59 (TCC).

200 EN FB 2006 stated:

“The new provisions recast the test for exemption in cases not involving a tax avoidance purpose to make its meaning clearer.”

But no-one was intended to take that seriously.

CHAPTER THIRTY TWO

LIFE POLICIES AND CONTRACTS

32.1 Policies – Introduction

This chapter considers:

- (1) life insurance policies
- (2) life annuity contracts, and
- (3) capital redemption policies.

ITTOIA refers to these as “policies and contracts”. I abbreviate the expression to “**policies**”. The asset is often described in the insurance industry as a bond; statute has adopted that term in the expressions “personal portfolio bond” and “guaranteed income bond”. I prefer not to use the word “bond” since it is also used to describe debentures and indeed strictly includes any obligation undertaken by deed.

Policies fall within Chapter 9 Part 4 ITTOIA, sometimes called the “chargeable event” regime. This contains almost 100 sections and is, I think, the longest chapter in ITTOIA. The reader will not be surprised if I say that a full discussion needs a very long book to itself. This chapter focuses on the matters closest to the theme of this work.

The provisions are sometimes very crude. Partial surrender is a particular trap.¹ This is the only place I have seen in the HMRC Manuals where districts are warned “not to attempt any discussion or explanation as to the equity of the treatment for tax”.²

It is common to structure an investment in the form of a life insurance policy (with only a nominal element of life insurance). So one can effectively opt into the chargeable event regime by choosing to invest in a policy rather than in some other form.

1 In practice this is avoided by life companies issuing a cluster of separate policies, instead of one single policy.

2 In the former Assessment Procedures Manual para 3147a (withdrawn in 2009).

Where the value of the policy is linked to specific assets or funds, this is sometimes called a life insurance wrapper, though wrapper is not a legal or technical term with any fixed or precise meaning. As far as I am aware, the Swiss Tax Agreement 2011 represents the first use of the word in tax legislation.³

32.1.1 *Cross references*

On situs for IHT see 77.19 (Insurance policy); on situs for CGT see 78.15 (Insurance policy).

For double taxation relief issues, see 55.13 (DT reliefs: policies).

The taxation of policies held by UK resident companies is not discussed.

32.2 Policies: definitions

32.2.1 *Meaning of “policy”*

The IPT Manual provides:

1115 Fundamental Concepts: what is a life policy [August 2008]

The word policy in connection with insurance has a long history. It is the formal document in which an insurer (that is, insurance company or friendly society) sets out the terms of its obligations in consideration of the stipulated premiums. For an insurance contract to be made, or varied, between an insurer and policyholder requires the completion of the standard contract law offer and acceptance. There is no practical distinction between contract and policy; the latter simply evidences the former. Lord Donaldson confirmed this in the judgment referred to at IPTM1110. [*Scher v Policyholders Protection Bond* [1994] 2 AC 57.]

32.2.2 *Meaning of “life insurance”*

The definition of life insurance needs a long chapter to itself.

A note on terminology. The General Insurance Manual provides:

3 Article 2(f) STA refers to: “... assets held by an insurance company in an account separate from the insurance company’s main accounts combined with a minimal risk protection and where the pay-out or redemption is not restricted to death, disability or illness (hereinafter referred to as “insurance wrappers”).”

1060. Legal basis of insurance: Indemnity [January 2009]

It used to be said that there was a distinction between

[1] insurance, meaning insurance against a financial loss, and

[2] assurance, meaning the assurance of a fixed or minimum sum upon the occurrence of a specified event that is bound to occur.

The text of the [Policies of Assurance] Act 1601, however, shows that the term "assurance" was applied to what is manifestly indemnity insurance. More recently the distinction has faded further under the influence of the EU, where the official English texts of the relevant Directives consistently use the term "life insurance". For most practical purposes therefore insurance and assurance can be treated as interchangeable terms. In the Taxes Acts, however, the term "assurance" is usually confined to life business.

IPT Manual provides:

1115. Fundamental concepts: what is a life policy? [August 2008]

According to the 1774 Life Assurance Act, a policy of life insurance is an insurance policy on life. There is no further definition in the Taxes Acts. If a policy pays benefits on the death of an individual, either whenever it happens, or within a specified term, then it is potentially within the scope of the chargeable event legislation.

It is not relevant for tax purposes that such a policy may also provide insurance against other risks, such as disability and critical illness, although that might affect its regulatory or accounting treatment.

Funeral plan contracts where a customer pays a sum to a funeral provider to provide a funeral in due course are not contracts of insurance, although similar arrangements if made with an insurer as a whole of life policy are, according to the regulatory rules of the Financial Services Authority (FSA).⁴

32.2.3 *Meaning of "capital redemption policy"*

A full discussion of the term "capital redemption policy" (defined in s.473(2) ITTOIA) is not attempted here. IPT Manual provides:

1120. Fundamental concepts: what is a capital redemption policy? [March 2011]

Capital redemption policies, though issued by insurance companies, are not strictly speaking insurance products. They were once known as investment bond

4 There is also an interesting discussion in the General Insurance Manual para 1010, not set out here for reasons of space, and in part 7 of the Law Commission paper "Insurable Interest" (14 January 2008).

contracts, which is more descriptive but needs to be distinguished from the type of life policy investment bond described at IPTM1100. Under capital redemption policies, one or more fixed sums is paid to an insurer under a contract pursuant to which one or more specified amounts is paid out at some later time or times, on the basis of an actuarial calculation. Typically the contracts take the form of

- an annuity certain, where a capital sum is used to buy an annuity for a fixed term not contingent on life, see IPTM4200, or
- a sinking fund where regular sums are paid in to secure a capital sum at some later date, for example against the need to find a premium payment to renew a lease.

The statutory definition of capital redemption business is at Section 458(3) ICTA 1988. Contracts within such business are long term insurance business but not life business. A capital redemption policy that creates a debtor/creditor relationship, with an agreement to return the sum advanced, is known as a capital redemption bond and is similar in nature to a relevant or deeply discounted security, see SAIM3000. However, such bonds, which may only be sold by an insurer, are removed from the scope of the deeply discounted securities income tax charge of Section 427 ITTOIA onwards.⁵

32.2.4 *Meaning of “annuity”*

A full discussion of the term “life annuity” (defined in s.473(2) ITTOIA) is not attempted here. IPT Manual discusses the meaning of “annuity”, a word used in many tax contexts:

1130. Fundamental concepts: what is an annuity? [July 2006]

There is no single definition in the taxes acts. There is an ancient definition in Stroud’s Judicial Dictionary, quoting Coke on Littleton:

⁵ See too the explanatory notes to the draft legislation published in the Pre-Budget Report, 5 December 2005:

15. A capital redemption policy is a contract, issued by an insurer, which is made in the course of capital redemption business. Under a capital redemption policy, for consideration of a sum or sums of money, the issuer of the policy guarantees to pay out a larger sum on a specified future date or to make a series of payments. Payment is independent of any contingency linked to human life.

Examples of such contracts include—

- an annuity certain - an annuity payable for a set period not contingent upon the survival of a life,
- a leasehold redemption policy - which builds up a fund to be used in some way on the expiry of a lease, and
- a sinking fund policy - this accumulates a fund for the eventual replacement of a wasting asset.

An annuity is a yearly payment of a certain sum of money granted to another in fee, for life, or years, charging the person of the grantor only. From an early case called *Foley v Fletcher*⁶ the judgment of Watson B at 784-5 is often quoted:

But an annuity means where an income is purchased with a sum of money, and the capital has gone and has ceased to exist, the principal having been converted into an annuity.

From this and other cases, notably *Southern-Smith v Clancy*, 24 TC 1, the following factors emerge as needing to be present

- the payments must be made under a legal obligation
- those payments must be ‘pure income profit’
- they must be capable of being characterised as ‘annual’, so being capable of recurrence on a periodic basis by reference to an annual time frame
- the purchase sum must pass absolutely to the provider
- no debtor/creditor relationship is created in relation to that sum; it is replaced by the annuity
- the annuitant’s only right is to demand payments when due
- the payments must not be instalments of pre-existing debt.

32.2.5 *Rights, parts and shares*

Section 464(3) ITTOIA provides:

If there has been a surrender or assignment of only a part of or share in rights under the policy or contract, the references in this section and those sections to the rights are references to that part or share.⁷

ITTOIA EN comments:

417. *Subsection (3)* provides that references in sections 464 to 467 to a surrender or assignment of rights refer, where appropriate, to a surrender or assignment of a part of, or share of, the rights. A *part* of the rights means one or more discrete rights provided by the policy or contract. A *share* in the rights means part of the ownership, where there are multiple owners, of such a discrete right or rights or of all the rights in the policy or contract.

⁶ (1858) 157 ER 678; 28 LJ Ex 100; 3 H & N 769 accessible www.commonlii.org/uk/cases/EngR/1858/1107.pdf

⁷ This is repeated in s.468(6) ITTOIA. (If s.464(3) had ITTOIA-wide application this would have been unnecessary.)

32.3 Outline of provisions

ITTOIA EN summarises the layout of the provisions:

409. The Chapter is laid out as follows-

- charge to tax under Chapter 9 (sections 461 to 463)
- person liable etc. (sections 464 to 472)
- policies and contracts to which Chapter 9 applies (sections 473 to 483)
- when chargeable events occur: general (sections 484 to 490)
- calculating gains: general (sections 491 to 497)
- part surrenders and assignments: periodic calculations and excess events (sections 498 to 509)
- transaction-related calculations and part surrender or assignment events (sections 510 to 514)
- personal portfolio bonds (sections 515 to 526)
- reductions from gains (sections 527 to 529)
- income tax treated as paid and reliefs (sections 530 to 538)
- deficiencies (sections 539 to 541)
- supplementary (sections 542 to 546)

32.3.1 *The charge*

The charge is in s.461(1) ITTOIA:

Income tax is charged on gains treated as arising⁸ from policies and contracts to which this Chapter applies.

Section 463(1) ITTOIA provides:

Tax is charged under this Chapter on the amount of the gains arising in the tax year.

8 The general usage of the tax legislation is that chargeable gains “accrue” but income “arises”. In the chargeable events legislation, gains are regarded as income and so the word used is “arise”. There is no difference in meaning.
Under the chargeable events legislation gains are sometimes said to “arise” and sometimes described as “treated as arising”. Again, there is no difference in meaning.

32.3.2 *Policies and contracts to which chargeable event provisions apply*

This takes us to s.473(1) ITTOIA:

This Chapter applies to—

- (a) policies of life insurance,
- (b) contracts for life annuities, and
- (c) capital redemption policies.

Sections 478–483 ITTOIA (not discussed here) specify various types of policies to which the provisions do not apply.

32.3.3 *When gains arise*

Section 462(1) ITTOIA provides:

For the purposes of this Chapter, a gain from a policy or contract arises when a chargeable event occurs in relation to the policy or contract (see section 484).

For full surrenders the gain arises in the tax year of the surrender. For partial surrenders the gain arises in the tax year of the policy anniversary.

32.3.4 *Chargeable event*

“Chargeable event” is a label which brings in a complex set of rules. Section 484(1) ITTOIA sets out the starting point:

The following are chargeable events—

- (a) in the case of any kind of policy or contract—
 - (i) the surrender of all rights under the policy or contract,
 - (ii) the assignment of all those rights for money or money’s worth,
 - (iii) the falling due of a sum payable as a result of a right under a policy or contract to participate in profits, if there are no remaining rights under it,
 - (iv) a chargeable event treated as occurring under section 509(1) (chargeable events in certain cases where periodic calculations show gains),
 - (v) a surrender or assignment treated as a chargeable event

- under section 514(1) (chargeable events where transaction-related calculations show gains), and
- (vi) a chargeable event treated as occurring under section 525(2) (chargeable events where annual personal portfolio bond calculations show gains),
- (b) in the case of a policy of life insurance, a death giving rise to benefits under it,
- (c) in the case of a policy of life insurance or a capital redemption policy, its maturity,
- (d) in the case of a contract for a life annuity which provides for the payment of a capital sum on death, the death, and
- (e) in the case of a contract for a life annuity which provides for a capital sum to be taken as a complete alternative to the annuity payments (or any further annuity payments), taking the capital sum.

Thus there are ten types of chargeable event. They fall into two categories:

- (1) **Calculation events.** Section 491(4) ITTOIA provides the terminology:

In this Chapter—

“calculation event” means an excess event, a part surrender or assignment event or a personal portfolio bond event,

Thus there are three types of calculation event: Section 491(4) then defines these three types:

- [a] “excess event” means a chargeable event within section 509(1),
- [b] “part surrender or assignment event” means a chargeable event within section 514(1), and
- [c] “personal portfolio bond event” means a chargeable event within section 525(2).

The terminology of [a] and [b] is unhelpful, but it is hard to think of better labels for the tortuous rules in ss.509 and 514. Calculation events are therefore within s.484(1)(a)(iv), (v) or (vi).

- (2) Other events: that is, chargeable events other than calculation events. It is useful to have a label for these, but no short label fits the bill. I call them “**the seven disposal-events**”, because these events are

disposals (in the natural sense or at least in the CGT sense of the word).

Sections 484-489 ITTOIA contain exemptions. These are not discussed here, but s.487 is important because it contains an exemption for inter-spouse transfers (based on the CGT spouse exemption).

Logically there should be two stages, first to ascertain whether there is a chargeable event and secondly to compute the gain. But the two stages overlap, because in the three calculation event cases the question of whether there is a chargeable event depends on whether there is a gain.

It should be noted that an assignment for no consideration is not a chargeable event. This is the opposite of the CGT position.

32.3.5 *Computation of gains*

The computation of gains is complex and artificial and often bears no relation to the commercial gain. It is not the same as the computation of gains for CGT purposes, so one must take care not to confuse chargeable gains (the CGT term) and gains under the chargeable events legislation. It is confusing that the legislation calls them both “gains”. The term “**chargeable event gains**” is useful when one needs to distinguish the two types of gains.

There are five different methods of computation for different types of chargeable events. The computation rules are not discussed here.

SA904(Notes) (headed Notes on Trusts & Estate Foreign for the year ended 5 April 2010) comments on how to deal with foreign currency gains:

Gains on foreign life insurance policies, life annuities and capital redemption policies should be calculated in the currency in which the policy or life annuity is denominated and the gain converted into sterling at the rate of exchange applicable at the time of the chargeable event (which may not be at the time the transaction occurred).⁹

9 Similarly, the IPT Manual provides:

9220 Calculation of gains and other amounts for policies in foreign currencies
[July 2006]

Where a tax representative or insurer reports a gain in sterling, it should compute the gain by calculating the amount of the chargeable event gain in the currency in

This is different from method of computation of chargeable gains.

Once one has identified a chargeable event, and computed the chargeable event gain, the next stage is to ascertain the person liable for the charge.

32.4 Liability of individuals and individual “creators”

Section 465(1) ITTOIA provides:

An individual is liable for tax under this Chapter if the individual is UK resident in the tax year in which the gain arises and condition A, B or C is met.

I call these “**individual bond conditions A to C**” to distinguish them from the myriad other conditions in ITTOIA.

32.4.1 *Individual bond condition A: individual beneficial owner*

Section 465(2) ITTOIA provides:

Condition A is that the individual beneficially owns the rights under the policy or contract in question.

Individual bond condition A – gain charged on individual if they are

which the policy is denominated and then convert it into sterling at the conversion rate on the date of the event. This method ensures that currency fluctuations during the life of the policy are disregarded.

Where a tax representative or insurer reports other amounts in sterling, for instance the premiums paid where there has been an assignment, they should be translated at the rate applying on the date of the chargeable event.

Similarly, IPT Manual:

3700 Foreign policies: differences in treatment [March 2011]

Some policies are denominated in a foreign currency. In such cases, any chargeable event gain should be computed in the foreign currency and then converted to sterling at the rate that applies at the date of the chargeable event. This method should be adopted rather than any other method such as converting each transaction to sterling at the rate applying on the date the transaction occurred.

For instance, if premium of €10,000 was paid into a policy on 10 May 2002 and the policy was surrendered for €12,500 on 3 January 2005, the chargeable event gain on the surrender is €2,500. This should then be converted to sterling at the conversion rate applying on 3 January 2005 to arrive at the amount of taxable gain.

beneficial owner – is natural and sensible.

Sections 469–471 ITTOIA deal with joint ownership.

32.4.2 *Individual bond condition B: trust ownership*

Section 465(3) ITTOIA provides:

Condition B is that those rights are held on non-charitable trusts which the individual created.

There are two strange features about individual bond condition B, where a policy or contract is held in a trust. First, it does not refer to the “settlor”, which is the normal tax terminology, but to trusts “created” by a person. In practice, the settlor will usually be the creator.¹⁰

Secondly, surprisingly, the creator is charged on the gain accruing to their trust regardless of the identity of the beneficiaries. The individual has a right of recovery against the trustees¹¹ so ultimately it is the beneficiaries who bear the burden of the charge, but they do so at the creator’s marginal rates. This is contrary to principle, which elsewhere only charges the settlor in the case of settlor-interested trusts, ie if the settlor or closely connected persons are beneficiaries. But this rule can only favour the taxpayer in relation to UK resident trusts, because chargeable event gains would otherwise be taxed at the trust tax rate of 50%, and in a very rough and ready way it can mitigate the unfairness of taxing lower rate beneficiaries at the top trust rate.

Section 672 ITTOIA deals with trusts with two or more settlors.

32.4.3 *Individual bond condition C: debt charged on security*

Section 465(4) ITTOIA provides:

¹⁰ The reason for the non-standard term was, possibly, (1) to avoid the rule that a “settlor” must have provided an element of bounty or (2) a concern that a company may not be a “settlor”; see 75.32 (Trust made by company: are shareholders settlors?), or (most likely) (3) a rough and ready way to deal with the two-settlor situation. That is, if A created a trust and B added property, A alone was the creator and was formerly subject to tax on the whole of the gain. But s.472 ITTOIA now provides a more sensible rule in this case.

¹¹ Section 538 ITTOIA.

Condition C is that those rights are held as security for the individual's debt.

Individual bond condition C – gain charged on individual if held as security for the individual's debt – is a rough and ready solution to the problem of imposing the tax charge where the economic ownership lies. CGT has the opposite rule: s.26 TCGA.

32.4.4 *Remittance basis taxpayer*

Section 465(5) ITTOIA provides:

For the purposes of calculating the total income of an individual liable for tax under this Chapter, the amount charged is treated as income.

The drafting technique is that the gain is added to the individual's "total income". The gain is taxed on an arising basis. The remittance basis does not apply even if the individual is a remittance basis taxpayer and the gain arises from an offshore policy.

It follows that a policy or contract which will give rise to a gain under the chargeable event provisions is not a suitable form of investment for:

- (1) an individual who is a remittance basis taxpayer or
- (2) a trust whose creator is a remittance basis taxpayer¹²

unless the individual expects to be non-resident in the year of the chargeable event. If the individual has no short or medium term intention of realising a gain (ie the policy is a long term investment) then the tax disadvantage can be set against the practical convenience of the policy.

The RDR Manual correctly provides:

33540 - Remittance Basis: Identifying Remittances: Specific Topics: Chargeable Event gains [June 2010]

Gains arising on a chargeable event, for example, the surrender of all rights under a policy of life insurance are chargeable to tax on the arising basis regardless of whether the policyholder is domiciled in the UK or not. The remittance basis does not apply.

Under a special rule (ITTOIA05/s507) policyholders are able to make partial surrenders or assignments of broadly up to 5% of accumulated

12 But it may be suitable if held by a non-resident company held by the trust: see below.

premiums with any tax charge postponed until maturity or other later realisation. This is known as the ‘5% deferral rule’ or the ‘excess rule’. When the policy comes to an end any earlier withdrawals are taken into account in calculating the end gain.

However when considering the position of a remittance basis user you will need to consider what income or gains they used to pay the premium due under the contract or policy. Where an individual purchases an overseas life insurance, or other income-generating, policy and subsequently part of that policy is surrendered for a cash payment and that money is brought to the UK, such payments will be treated as taxable remittances to the extent that the purchase of the original premium was made with the individual’s untaxed foreign income and gains that would have been taxed on the remittance basis if remitted to the UK.

So if the premium was paid using the individual’s foreign income or foreign gains that were untaxed when they arose, because the individual was a remittance basis user in that year, then any of the 5% withdrawal will be a taxable remittance if the money is brought to, or received or used in, the UK. The amount attributable to the ‘5% withdrawal’ indirectly derives from the original premium paid, so Conditions A and B of s809L apply.

Withdrawals in excess of 5% or full surrenders

If the individual withdraws more than 5% of accumulated premiums then, the amount in excess of 5% or the actual gain if a full surrender, will be chargeable to income tax under the chargeable event legislation. It is charged on the arising basis whether it is remitted or not.

This is at first sight a surprising inconsistency with the general scheme of taxation for foreign domiciliaries.

For completeness: some might suggest the following justification for taxing chargeable event gains on an arising basis. A remittance basis taxpayer may take out a foreign policy, whose value is linked to a UK asset held by the life insurance company.¹³ If the chargeable event gain was taxed on the remittance basis, then use of a policy “wrapper” would allow what is in economic terms UK source income or gains to be taxed on a remittance basis. I doubt if that is the historic reason for the rule, which is probably due to oversight. However that may be, this possibility does not justify the rule. It is suggested that gains on foreign policies

13 For an example, see *Foulser v MacDougall* [2007] STC 973.

should be taxed on the remittance basis. The problem does not even call for a targeted anti-avoidance, for the planning turns capital gains into income, and only amounts to deferral which should be regarded as unobjectionable; deferral is in any case available in a number of different ways.

As with most anomalies, the current rule does not affect the well advised, and there is no likelihood of change. Nevertheless, long term residents who pay the remittance basis charge and who have acquired foreign policies may well feel short-changed, though if the figures are large enough, there may be some scope for planning.

For mixed fund issues where the policy is bought out of foreign income/gains, see 12.3.3 (Finding the income and capital for the year).

32.4.5 *Individual non-resident in year of chargeable event*

The charge only applies “if the individual is UK resident in the tax year in which the gain arises”: s.465(1) ITTOIA.

Before ITTOIA, it was clear from ESC B53 that the split year concession did not apply. Now ESC B53 is obsolete, in relation to individuals, and this point is not expressly stated in ESC A11 which at face value applies a split year treatment in all cases including this one. However, it is likely that HMRC will not change their practice, and their decision to do that could not be challenged.

The temporary non-residence rule¹⁴ does not apply. This is not an anomaly: it mitigates the unfairness of the lack of a remittance basis.

32.4.6 *Non-resident period relief*

There is a relief for the individual who is UK resident in the year that the gain arises (so they are within the charge) but who has formerly been non-resident. I refer to this as “**non-resident period relief**”. The relief is set out in s.528 ITTOIA:

(1) The gain from a foreign policy of life insurance or foreign capital redemption policy¹⁵ is reduced for the purposes of this Chapter if the policy holder was not UK resident throughout the policy period.

¹⁴ See 8.1 (Temporary non-residence).

¹⁵ These terms are defined in s.476(3) ITTOIA.

(2) The amount of the reduction is the appropriate fraction of the gain.

(3) The appropriate fraction is $(A \div B)$ where—

A is the number of days on which the policy holder was not UK resident in the policy period, and

B is the number of days in that period.

The relief applies where individuals are charged on the gain as beneficial owners or security owners (bond conditions A or C). It does not help individuals who have had non-resident periods but who are charged as creators of a trust (bond condition B). Section 529(1) ITTOIA provides:

Section 528 does not apply if, when the chargeable event occurs or at any time during the policy period, the policy is or was held—

(a) by a non-UK resident trustee,

(b) by non-UK resident trustees,¹⁶ or

(c) by a foreign institution.¹⁷

32.5 Liability of UK trust

If the creator of the trust is alive and UK resident, they will be taxed on the gain.¹⁸ Section 467 ITTOIA provides for the situations where the creator is not taxable:

(1) Trustees are liable for tax under this Chapter if immediately before the chargeable event in question occurs they are UK resident and condition A, B, C or D is met.

I refer to “**trust policy conditions A, B, C or D**” to avoid confusion with the myriad other conditions in ITTOIA. It is considered that these conditions must be satisfied immediately before the event, ie “immediately before” governs the phrase “they are UK resident” and “condition A, B, C or D is met”

(1A) If trustees are liable for tax under this Chapter, the gain is treated

16 It is clumsy and of course unnecessary to refer to trustee(s) both in the singular and the plural; but it does not matter.

17 For completeness, there is transitional relief for policies held on 19 March 1985: see para 106 Sch 2 ITTOIA.

18 See 32.4 (Liability of individuals and individual “creators”).

for income tax purposes as income of the trustees.

The rate of tax is in principle 50%.¹⁹

An appointment to UK resident beneficiaries before the chargeable event may reduce the rate of tax and an appointment to non-resident beneficiaries may avoid tax altogether.

A trust migration may be effective if done before the chargeable event; it is not necessary to wait until the following tax year.

32.5.1 *Trust policy condition A (charitable trust)*

Section 467 ITTOIA provides

(2) Condition A is that the rights under the policy or contract are held by the trustees on charitable trusts.

32.5.2 *Trust policy condition B (absent settlor)*

Section 467 ITTOIA provides

(3) Condition B is that—

(a) those rights are held by the trustees on non-charitable trusts, and

(b) one or more of the absent settlor conditions is met.

(4) The absent settlor conditions are that the person who created the trusts—

(a) is non-UK resident,

(b) has died, or

(c) in the case of a company or foreign institution (see section 468(5)), has been dissolved or wound up or has otherwise come to an end.

32.5.3 *Trust policy conditions C and D*

Section 467 ITTOIA provides:

(5) Condition C is that—

(a) the rights under the policy or contract are held by the trustees

¹⁹ Section 482 ITA type 7: see 24.2.3 (Other income taxed at top rates).

- on non-charitable trusts,
 - (b) condition B does not apply, and
 - (c) neither section 465 nor section 466 applies.
- (6) Condition D is that the rights under the policy or contract are held as security for a debt owed by the trustees.

32.6 Non-resident trusts and companies

Non-resident trustees are outside the scope of the charge on a chargeable event because s.467 (which imposes the charge on trustees) applies only to UK resident trustees.

A non-resident company is outside the scope of the charge under ITTOIA (which does not apply to companies). It is outside the scope of the charges in CTA 2009 (which only apply to corporation tax).²⁰

²⁰ For completeness, ESC C33 provides:

“Non-UK resident companies and chargeable event gains on life insurance policies, life annuity contracts and capital redemption policies

1 A “gain” may be treated as arising in connection with a policy of life insurance, a life annuity contract or a capital redemption policy when a “chargeable event” occurs or is treated as occurring. Chapter 2 of Part 13 of ICTA defines “chargeable events” and sets out how a “gain” is calculated where the chargeable person is a company. It also contains the other provisions relating to chargeable events referred to below. A gain may also be treated as arising on a company in connection with a personal portfolio bond under the Personal Portfolio Bond (Tax) Regulations, SI 1999/1029 reg 5.

2 This concession is about the circumstances in which a gain may be treated as part of the total income of a company.

These are when—

- a company is the beneficial owner of the rights conferred by a policy or contract;
- the rights are held on trusts created by an individual or a company; or
- the rights are held as security for a debt owed by a company.

3 The provisions that deem a gain to be part of the income of an individual or a company are not restricted to UK residents. Except as set out in para 4, however, HMRC will not pursue liability to tax on a gain that is treated as income of a company that is not resident in the UK at any time during the period for which the gain would otherwise have been charged.

4 A tax liability may arise if a policy or contract is held as property used by, or held by, a UK branch or agency of a company that is not resident in the UK.

5 Nothing in this concession affects—

- a gain that is treated as constituting income payable to non-resident trustees or to a company or other institution resident or domiciled outside the UK; and
- the tax treatment of a benefit that an individual ordinarily resident in the UK

In the absence of express provision, the chargeable event gain would not fall within the TAA provisions because the receipt by the person abroad (assuming they are non-resident) is capital and not income or (more fundamentally) the chargeable event gain is not income.²¹ However, s.468 ITTOIA deals with this. It is helpful to consider trusts and companies separately.

32.6.1 *Non-resident trust*

Section 468 ITTOIA provides:

- (1) This section applies if a gain is treated as arising under this Chapter and ...
 - (a) trustees who are non-UK resident would be liable for tax in respect of the gain as a result of section 467 if the trustees were UK resident immediately before the chargeable event in question occurs, ...
- (2) Chapter 2 of Part 13 of ITA 2007 (which prevents avoidance of tax where an individual who is ordinarily UK resident benefits from a transfer of assets) applies with the modifications specified in subsection (3) or (4).
- (3) In a case within subsection (1)(a), Chapter 2 of Part 13 of ITA 2007 applies as if—
 - (a) the gain were income becoming payable to the trustees, and
 - (b) that income arose to the trustees in the tax year in which the gain arises. ...

This incorporates ss.720²² and 731 ITA.

32.6.2 *Non-resident company or institution*

Section 468 ITTOIA provides (so far as relevant):

receives from the trustees, the company or other institution.”

The concession is now redundant following the rewrite of the ICTA provisions and the rule is statutory rather than concessionary.

21 See 27.13 (Capital receipts deemed to be income).

22 Section 720 ITA is not needed here because a transferor within s.720 would normally be taxed as the creator of the settlement, but the overlap does not matter. It is similar to the overlap of s.624 ITTOIA and s.720 ITA.

- (1) This section applies if a gain is treated as arising under this Chapter and ...
- (b) immediately before that event occurs—
 - (i) a foreign institution²³ beneficially owns *a share* in the rights,
 - (ii) the rights are held for the purposes of a foreign institution, or
 - (iii) *a share* in them is held as security for a foreign institution's debt.
- (Emphasis added)

It is curious that (i) and (iii) refer to *shares* in rights. Contrast ss.465(2) and 467(2) ITTOIA.²⁴ On a traditional approach to statutory construction the (i) and (iii) do not apply if the foreign institution beneficially owns the *entire* policy. The gap is more or less filled by s.468(1)(b)(ii) as if a foreign company owns a policy, the rights are held for its purposes. If necessary a court might decide there was a slip in the drafting, which on a modern approach to construction could be corrected. Perhaps the drafting will be corrected some time.

Assuming s.468(1)(b) ITTOIA is satisfied, we read on:

- (2) Chapter 2 of Part 13 of ITA 2007 (which prevents avoidance of tax where an individual who is ordinarily UK resident benefits from a transfer of assets) applies with the modifications specified in subsection (3) or (4). ...
- (4) In a case within subsection (1)(b), Chapter 2 of Part 13 of ITA 2007 applies as if—
 - (a) the gain were income becoming payable to the institution, and
 - (b) that income arose to the institution in the tax year in which the gain arises.

Section 720 ITA is needed here, as the transferor would not otherwise be taxed on the gain. The extension of the scope of s.720 in 2005 caught those described in the 4th edition of this work as “bold enough to plan on

23 “Foreign” is defined in s.468(5) ITTOIA: “In this Chapter ‘foreign institution’ means a company or other institution resident or domiciled outside the UK.” The word institution is not defined.

24 See 32.4 (Liability of individuals and individual “creators”) and 32.5 (Liability of UK trust).

the assumption that the current law will still apply when a policy is surrendered at some time in the future”.

32.6.3 *Transferor's s.731 defence: gains arising before 5 December 2005*

Suppose:

- (1) gains arose before 5 December 2005 to a foreign company or trust within s.731; the transferor was not subject to tax on those gains as they arose;²⁵ and
- (2) the *transferor* receives a benefit.

A transferor is outside the scope of s.731: see 29.9 (Transferor's s.731 defence). Under the pre-5 December 2005 law, I suggested that the transferor's s.731 defence would not apply when s.720 did not apply. Now that s.720 does apply, the transferor's defence should apply even to pre-5 December 2005 gains. This could be something of a windfall for transferors; but since unrealised gains were brought within the s.720 charge from 5 December 2005, HMRC can hardly complain that realised gains now fall within the transferor's defence.

32.6.4 *Section 720 and s.731 remittance bases*

The s.720 remittance basis does not apply to a chargeable event gain within s.720, because the gain does not meet the requirement that the income of the person abroad “would be relevant foreign income if it were the individual's”.²⁶

For the same reason, a benefit which relates to the gain does not qualify for the s.731 remittance basis.²⁷

32.6.5 *Income accruing to life company*

So far we have considered the taxation of chargeable event gains accruing to non-resident trusts or companies which hold policies.

The payment to a non-resident life company (or a subsidiary of such a company) is in principle a transfer of assets within the TAA provisions. The TAA provisions would in principle apply if:

25 See the 4th edition of this book, para 20.5.

26 See 28.14 (Section 720 remittance basis).

27 See 29.34 (Section 731 remittance).

- (1) income arising as a result of the payment can be identified (ie if the sum paid is segregated); and
- (2) the motive defence does not apply.

In a straightforward case of the payment of a premium, the application of the motive defence is well established. However *IRC v Willoughby* decided only that Professor Willoughby's bond was not taken out for tax avoidance purposes in the straightforward circumstances of his case. If there were tax avoidance in the true sense the TAA provisions will apply: the fact that a policy is taken out does not preclude the possibility of tax avoidance.

See 30.8 (Life policies).

32.7 Section 624 and chargeable event gains

Section 624 ITTOIA never applies to a chargeable event gain. To see why, it is helpful to distinguish:

- (1) UK resident settlor;
- (2) non-UK resident settlor:
 - (a) non-resident trustees;
 - (b) UK resident trustees.

here the settlor is UK resident they are taxed on the gain under basic principles as a creator. Section 624 does not apply because the gain is not income of the trustees.

Where the settlor is non-resident and the trustees are non-resident, section 624 does not apply because the gain is not "income" and so it is not "income arising under a settlement".

Where the trustees are UK resident, but the settlor is not resident, the gain is deemed to be income of the trustees. In these circumstances the s.624 non-resident settlor defence will apply.²⁸

32.8 Liability of personal representatives

Section 466 ITTOIA provides:

- (1) Personal representatives are liable for tax under this Chapter if

²⁸ That is, the gain is such that if the settlor were actually entitled thereto, they would not be chargeable to income tax by reason of being non-resident: see 26.7 (Non-resident settlor).

- [a] the rights under the policy or contract are held by them and
 - [b] the condition in subsection (2) is met
- (and accordingly the gain is treated for income tax purposes as income of the personal representatives in that capacity).
- (2) The condition is that if an individual were liable for tax on a gain in respect of the policy or contract, section 530(1) (individual treated as having paid tax at the basic rate) would be disappplied as a result of—
- (a) section 531(1) (exceptions from section 530 for policies and contracts specified in section 531(3)), or
 - (b) para 109(2) of Schedule 2 (contracts in accounting periods beginning before 1st January 1992).
- (3) For cases where the condition in subsection (2) is not met, see section 664 of this Act and [section 947 of CTA 2009] (under which the gain is treated as part of the aggregate income of the estate for the purposes of Chapter 6 of Part 5 of this Act and [Chapter 3 of Part 10 of CTA 2009] respectively).

The condition in subsection (2)(b) is a transitional rule now of limited scope.

In order to understand the condition in subsection (2)(a) one needs to follow a trail of statutory provisions. First, ss.530 and 531 ITTOIA:

530 Income tax treated as paid etc.

(1) An individual or trustees who are liable for tax on an amount under this Chapter are treated as having paid income tax at the basic rate on that amount.

...

I refer to this as a “**s.530 tax credit**”.

531 Exceptions to section 530

(1) Section 530 does not apply to gains from the kinds of policies and contracts specified in subsection (3), except for the purposes of calculating relief under section 535 (top slicing relief).

(2) Subsection (1) is subject to—

section 532 (relief for policies and contracts with European Economic Area insurers), and

section 534 (regulations providing for relief in other cases where foreign tax chargeable).

(3) The policies and contracts are—

- (a) a policy of life insurance issued or a contract for a life annuity

- made by a friendly society in the course of tax exempt life or endowment business²⁹,
- (b) a foreign policy of life insurance that does not meet conditions A and B,
- (c) a contract for a life annuity (other than one within para (a)) which has at any time not formed part of any insurance company's or friendly society's basic life assurance and general annuity business the income and gains of which are subject to corporation tax, and
- (d) a foreign capital redemption policy.

If we focus on foreign life policies, the relevant provision is (3)(b). The question is whether the foreign policy does not meet conditions A and B (which I will call “**foreign policy conditions A and B**”). Section 531(5) provides:

Condition A is that the policy falls within para (a) of the definition of “foreign policy of life insurance” in section 476(3) (policy issued by a non-UK resident company).

So we turn to s.476(3) ITTOIA:

In this Chapter—

“foreign policy of life insurance” means—

- (a) a policy of life insurance issued by a non-UK resident company, and
 - (b) a policy of life insurance which forms part of the overseas life assurance business of an insurance company or friendly society
- ...

A foreign policy will typically fall within that definition, so it will meet the condition in s.476(3)(a). The meaning of “overseas life assurance business” can be found in s.431D(1) ICTA:

431D Meaning of “overseas life assurance business”

(1) In this Chapter “overseas life assurance business” means so much of a company's relevant life assurance business as is with a policy holder or annuitant not residing in the UK (but not including the reinsurance

29 Terms defined in subsection (4); the definitions need not be considered here.

of such business).

I think we conclude that most foreign policies will satisfy foreign policy condition A. That takes us to foreign policy condition B:

(6) Condition B is that the conditions in para 24(3) of Schedule 15 to ICTA (conditions that are required to be met for certain policies issued by non-UK resident companies to be qualifying policies) are met throughout the period between—

- (a) the date on which the policy was issued, and
- (b) the date on which the gain arises.

It is easy to become tangled in the double double negatives, but I think the chain of reasoning goes as follows:

- (1) Foreign policies will not (usually) satisfy condition B.
- (2) So they fall within s.531(3)(b) (“a foreign policy of life insurance that does not meet conditions A and B”).
- (3) So they do not qualify for a s.530 tax credit.
- (4) So they do meet the condition in s. 466(2).
- (5) So that PRs are liable for the chargeable event gain.

This could be avoided by an assent to a beneficiary.

Section 466 ITTOIA is not expressed to be limited to UK resident PRs. However s.368 ITTOIA provides:

- (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
- (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK.
- (3) References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.
- (4) This section is subject to any express or implied provision to the contrary in this Part (or elsewhere in the Income Tax Acts).

Thus non-resident PRs are not chargeable. ITTOIA EN confirms that this is intended:

421. Chapter 1 of Part 4 of this Act provides a general territorial limitation on the scope of the Part. As regards income arising outside the UK, it limits the charge to such income arising to a UK resident. See

section 368 (territorial scope of Part 4 charges) and the related commentary on that Chapter. [Section 465 ITTOIA] overlaps and supplements that Chapter to ensure that a non-UK resident individual is not liable to tax under this Chapter on any gains, whether arising in the UK or elsewhere.

32.9 Planning for immigrant to UK

32.9.1 Immigrant policyholder who has become resident in the UK

The advisers of a foreign domiciled person who has recently come to the UK should check whether they or any trust they have created has a policy or contract. If so, the position needs to be reviewed.

An assignment of the policy or contract from an individual to a trust (resident or not) does not help, since the individual remains liable as creator.

One simple form of planning is to arrange there is no chargeable event in a year when the individual is UK resident. The partial surrender of up to 5% of the premium paid for the policy or contract per year is not a chargeable event. The surrender, assignment for money or money's worth and maturity of the policy or contract is normally a chargeable event but this can be anticipated and perhaps postponed to a year when the individual is non-resident. A death giving rise to benefits under the policy is also a chargeable event unless the policy is a qualifying policy. In such a case one would be at risk that the individual may die while UK resident, giving rise to the tax charge on their estate.

Another course is for the individual to surrender their policy shortly after becoming UK resident; most of the gain will qualify for non-resident period relief.³⁰

If a chargeable event is anticipated, the policy or contract could be assigned to a non-resident company, perhaps held by a trust. An assignment for no consideration is not a chargeable event. But the transfer of asset rules will need consideration.

32.9.2 Planning before becoming UK resident

There are further possibilities if the individual acts before the tax year in

³⁰ See 32.4.6 (Non-resident period relief).

which they become UK resident. One possibility is to surrender the policy. A part surrender may also be a possible option.

32.10 Personal portfolio bonds

Urgent action needs to be taken if the individual (or trust created by them) holds a “personal portfolio bond” as defined in s.516 ITTOIA. This topic cannot be pursued here.

32.11 CGT exemption for policies

Sections 204 and 210 TCGA provide exemptions for policies and contracts. In outline, policies are exempt unless assigned for consideration (known as secondhand policies).

32.12 IHT on policy held by foreign domiciliary

The IHT Manual provides:

30039 - Policies effected by a person who dies domiciled outside the UK [January 2008]

Under the proviso to the [Revenue Act]³¹ 1884 s.11 as amended by the [Revenue Act] 1889 s.19 a grant of representation (IHTM05001) in the UK is not necessary in order to recover money payable under a policy of life assurance effected with any insurance company by a person who dies domiciled³² outside the UK. For the purposes of this section, any policy under which a sum of money becomes payable on a death may be treated as a policy of life assurance, and any association of persons which issued policies in the ordinary course of its business, whether incorporated or not, may be treated as an insurance company.

These provisions do **not** confer any exemption from IHT. Where policy moneys are situate in the UK, tax is nonetheless payable though the moneys may be receivable without the production of a UK grant of representation.

The insurance company can however be liable for the tax where [1] it retains policy moneys for the benefit of the beneficiary for investment purposes, outside the terms of the life assurance contract,

31 The Manual wrongly refers to the Customs & Inland Revenue Acts.

32 The deemed domicile rule does not apply for this purpose.

in which case IHTA s.200(1)(c) may apply to the company as a vestee, or

[2] it received prior notice that the policy in question is subject to a statutory charge for tax under s.237 IHTA.³³

Where there is other estate in the UK in respect of which a UK grant is necessary, but the UK representatives are only administrators acting under a power of attorney and in point of fact have not intermeddled with the policy moneys and, without knowledge of the claim for tax in respect of such moneys, have parted with the assets collected by them to their principal (the foreign executor), the claim in respect of the policy moneys should not be pursued against the UK administrators. Similar conditions apply in Scotland to a Factor or Attorney authorised by executors abroad to give up an Inventory (in such cases it is the executors who are confirmed, not the Factor or Attorney).

Refer to TG [Technical Group] for consideration

- all enquiries on this topic
- any case where it is apparent that policy moneys have been paid out without a grant being produced.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

The withheld text may well state that IHT in many cases is uncollectable and set out the circumstances in which no attempt should be made to collect it. In practice a well advised foreign domiciliary (not deemed domiciled) will not acquire or retain a UK situate policy. However a person who is deemed UK domiciled may find this useful, as the executors can fund IHT more easily if they can first recover the money due under the policy and then pay the IHT and obtain a grant.

³³ In practice it is unlikely that either [1] or [2] will be the case.

CHAPTER THIRTY THREE

OFFSHORE FUNDS: DEFINITIONS

33.1 Offshore funds – Introduction

Before December 2009 I wrote that this subject needed a long book to itself. That is no longer the case: several volumes would now be needed to cover the subject properly.

I formerly added that it would be an unrewarding work because the rules are not well observed in practice. However this is true of many of the areas touched on by the FA 2008, so offshore funds are not now so different.

This chapter considers the definition of offshore fund and associated expressions. The following chapter considers the taxation of offshore funds.

The definitions discussed in this chapter were introduced in the FA 2008,¹ where they survived for two years before being rewritten into TIOPA.

The tax legislation is in the Offshore Funds (Tax) Regulations (“OFTR”). The OFTR naturally referred to the then current provisions of the FA 2008. Rewrite Acts did not update statutory references in secondary legislation so those references will remain indefinitely in the regulations. The obsolete references take effect as references to the corresponding new provisions² but readers need to work out for themselves what those are (I

1 The FA 2008 sensibly jettisoned the reform in the FA 2007, which was thoroughly botched. The 2007 definition (discussed at 23.3 of the 7th edition of this work) is still relevant for transitional relief.

2 Para 5(1) Sch 9 TIOPA provides:

“Any reference (express or implied) in any enactment, instrument or document to a superseded enactment in its application for relevant tax purposes is to be read, so far as is required for those relevant tax purposes, as including, in relation to times, circumstances or purposes in relation to which any corresponding rewritten provision has effect, a reference to the rewritten provision.”

will insert them in brackets). The Offshore Funds Manual is similarly out of date though eventually its references might be updated.

While the drafting in the FA 2008 was not beyond criticism, the reader may well question whether this rewrite was worthwhile, and be grateful that the rewrite project has at last come to an end; but there it is.

33.2 Meaning of “participant”

Section 362 TIOPA provides a commonsense definition:

(1) In this Part references to “participant”, in relation to arrangements (or a fund), are to a person taking part in the arrangements (or the arrangements constituting the fund), whether by becoming the owner of, or of any part of, the property that is the subject of the arrangements or otherwise.

(2) In this Part references (however expressed) to participation, in relation to arrangements (or a fund), are to be read in accordance with subsection (1).

This definition only applies for the purposes of Part 8 TIOPA so it needs to be incorporated by reference when the same term is used elsewhere.³

33.3 Meaning of “offshore fund”

33.3.1 *Basic definition*

Section 355(1) TIOPA provides:

Para 9(1) Sch 9 TIOPA provides: “In this Part—

“enactment” includes subordinate legislation (within the meaning of the Interpretation Act 1978),

“relevant tax purposes” means, in relation to a superseded enactment, tax purposes for which the enactment has been rewritten by this Act, and

“superseded enactment” means an earlier enactment which has been rewritten by this Act for certain tax purposes (whether it applied only for those purposes or for those and other tax purposes).”

3 So reg.3(1) OFTR incorporates this definition by reference:

“In these Regulations “offshore fund” has the meaning given by section 40A(2) of FA 2008 (read with the provisions of the relevant group of sections).”

In section 354 “offshore fund” means—

- (a) a mutual fund constituted by a body corporate resident outside the UK,
- (b) a mutual fund under which property is held on trust for the participants where the trustees of the property are not resident in the UK, or
- (c) a mutual fund constituted by other arrangements that create rights in the nature of co-ownership⁴ where the arrangements take effect by virtue of the law of a territory outside the UK.

This definition only applies for the purposes of s.354, so it needs to be incorporated when the expression “offshore fund” is used elsewhere.⁵

In this work:

- (1) **“a corporate fund”** means an offshore fund within (a) - a company.
- (2) **“a non-corporate fund”** means an offshore fund within (b) or (c) - a unit trust or co-ownership arrangement.

33.3.2 *Residence of EU funds*

For completeness: Section 363A TIOPA provides a special residence rule for the benefit of EU offshore funds (in short, deeming such funds to be non-UK resident and thus disapplying the usual residence tests.) EN FB 2011 provides:

The UCITS IV directive provides that an investment fund authorised under the provisions of Article 5 of that directive may have a manager which is not resident in the same State as that in which the fund is established and regulated.

6. [Section 363A] ensures that the affected offshore funds and their investors will not be subject to any tax consequences in the UK as a result of having a UK resident management company.

For the residence of trustees of a unit trust, see 37.3.2 (Residence of

4 Section 355(3) TIOPA provides:

“In this section ... “co-ownership” is not restricted to the meaning of that term in the law of any part of the UK.”

5 So reg.3(1) OFTR provides:

“In these Regulations “offshore fund” has the meaning given by section 40A(2) of FA 2008 (read with the provisions of the relevant group of sections).”

The definition is similarly incorporated in s.378A(7) ITTOIA.

trustees of unit trust).

33.3.3 *Partnerships*

A general or limited partnership might fall within limb (c) of the definition but s.355(2) TIOPA takes it out:

Subsection (1)(c) does not include a mutual fund constituted by two or more persons carrying on a trade or business in partnership.

It is assumed that a general or limited partnership does not fall within limb (b) of the definition.

A LLP might fall within limb (a) of the definition but s.355(3) TIOPA takes it out:

In this section—

“body corporate” does not include a limited liability partnership.⁶

Partnerships are excluded because partnership income and gains accrue to the partners: there is no scope or need for offshore fund rules.

33.3.4 *Luxembourg Fonds Commun de Placement*

Offshore Funds Manual 02400 provides:

Types of mutual funds that come within the definition of an offshore fund at FA2008/S40A(2)(c) would include, for example, contractual arrangements such as Luxembourg Fonds Commun de Placement ...

On this topic see 37.7 (Luxembourg Fonds Commun de Placement).

33.3.5 *Power to vary definition*

The drafter (perhaps as a result of the lack of success of the earlier statutory definitions) did not have much confidence in the present statutory definition, and conferred wide powers to vary the rules by statutory instrument. These powers have not yet been exercised.

⁶ This is otiose but it does not matter.

33.4 “Mutual fund”

The key term is “mutual fund”. Section 356(1) TIOPA provides:

- (1) In section 355 “mutual fund” means arrangements with respect to property of any description (including money) that meet conditions A, B and C.
- (2) Subsection (1) is subject—
 - (a) to the exceptions made by or under sections 357 and 359, and
 - (b) to sections 360 and 361.

I refer to “**mutual fund conditions A to C**” to avoid confusion with any other conditions.

33.4.1 *Mutual fund condition A: mutuality*

Section 356(3) TIOPA provides:

Condition A is that the purpose or effect of the arrangements is to enable the participants—

- (a) to participate in the acquisition, holding, management or disposal of the property, or
- (b) to receive profits or income arising from the acquisition, holding, management or disposal of the property or sums paid out of such profits or income.

The intention, broadly, is that mutual funds should have the characteristics of pooled investments.

33.4.2 *Mutual fund condition B: day-to-day management*

Section 356 TIOPA provides:

- (4) Condition B is that the participants do not have day-to-day control of the management of the property.
- (5) For the purposes of condition B a participant does not have day-to-day control of the management of property by virtue of having a right to be consulted or to give directions.

33.4.3 *Mutual fund condition C: realisation at NAV*

Section 356(6) TIOPA provides:

Condition C is that, under the terms of the arrangements, a reasonable investor participating in the arrangements would expect to be able to realise all or part of an investment in the arrangements on a basis calculated entirely, or almost entirely, by reference to—

- (a) the net asset value of the property that is the subject of the arrangements, or
- (b) an index of any description.

Offshore Funds Manual provides:

OFM05600 - Meaning of mutual fund: conditions: condition 'C': meaning of realisation of investment by reference to NAV or an index - S356(6) TIOPA 2010 [January 2012]

There is no definition within the legislation of ‘almost entirely’ as any sort of percentage limit of variation from NAV could be susceptible to arrangements seeking to avoid the intention of the offshore funds rules. It depends on what the arrangements are intended to provide. For example, buy-back arrangements normally take effect when there is a large discount to NAV, but may also be used in very exceptional circumstances to buy back at a very small discount or at NAV which, on its own, may not mean that the arrangements constitute a mutual fund. OFM10500 provides further guidance on share buy-backs and share issuance.

Realisation of investment on a basis calculated at or close to NAV

It is not necessary that the investor obtains NAV directly from the fund. Where a reasonable investor could expect to receive NAV on selling their interest on a secondary market the fund will be an offshore fund if all other conditions are satisfied. For example, Exchange Traded Funds (ETFs) are usually operated in such a way that the quoted prices are at NAV or very close to NAV because market makers are able to create or redeem units (and in that sense such funds are open-ended), and so ETFs would be expected to qualify as mutual funds. On the other hand, arrangements where a fund offered to buy back shares to keep a discount on the share price within a reasonable limit would not make the fund a mutual fund unless it was clear to a reasonable investor at the time that they invested (or on alteration of the terms of an investment) that there were such arrangements and that they were intended to ensure that such purchases were at NAV or almost or very close to NAV.

Where an investment is designed to produce a return for investors that equates in substance to a return on capital invested at interest none of the possible exceptions will apply (S357 (4)(c) TIOPA 2010) - see OFM06300.

Shares trading close to NAV

The mere fact that shares in a closed-ended arrangement sometimes trade at or close to NAV does not mean that Condition C is satisfied unless that is as a result

of arrangements being in place such that a reasonable investor could expect to receive NAV or close to NAV on selling their interest.

Warrants and options

Warrants or options that give an investor the right to sell shares back to an issuer for a particular price will not cause Condition C to be satisfied unless the price is determined by reference to NAV so that the investment can be realised at or close to NAV. Similarly, rights that carry the option to convert to other classes of interest would only satisfy Condition C if the new rights themselves permitted an investor to realise their investment at or close to NAV.

Realisation of investment by reference an index

In some cases an investor may have a right to redeem an investment at an amount not representing the assets directly invested in, but which is expressed in terms of an index. The fund manager may then invest the assets so as to produce a return as nearly as possible matching the index which is offered. In such a case Condition C will also be met. Again, this is subject to exceptions where conditions 'E' or 'F' apply.

Offshore Funds Manual provides:

OFM04200 - Meaning of an offshore fund: Corporate entities - S355(1)(a) TIOPA 2010 [January 2012]

It is expected that relatively few fixed share capital companies will fall within the new definition. So, for example, an investment in a trading or investment company or group with fixed share capital and that was not limited life (even if local law provides for continuation votes) would not come within the definition. But under the characteristics based approach, entities that have fixed share capital and that are structured in such a way that they share characteristics of open-ended share capital arrangements will be within the definition. So, fixed share capital companies that are predicated on the basis that investors will get a net asset value return or a return which is very close to net asset value may fall within the new definition. That will also be the case where there are no redemption rights but the arrangements have a limited life and a reasonable investor could expect to get a net asset value return on winding up (unless one of the exceptions in S357 TIOPA 2010 applies).

33.5 Winding-up exemption

There are some exceptions to mutual fund condition C.

Section 357(1) TIOPA provides:

Arrangements are not a mutual fund for the purposes of section 355 if—

- (a) condition D is met, and
- (b) condition E or F is met.

I refer to “**winding-up conditions D to F**” to avoid confusion with the other conditions.

Offshore Funds Manual provides:

OFM05600 - Meaning of mutual fund: conditions: condition 'C': meaning of realisation of investment by reference to NAV or an index - S356(6) TIOPA 2010 [January 2012]

... Open-ended and closed-ended arrangements

Condition C, when read in conjunction with section S357(2) TIOPA 2010 provides a clear distinction between a mutual fund and a company organised in the way that, for example, an investment trust company in the UK is organised. Such a company is a closed-ended company, in the sense that it does not allow investors to redeem their shares on request, nor does it issue new shares on request (but see OFM10600 onwards where such closed-ended companies have a limited life). This contrasts with an open-ended investment company which is designed to enable investors to realise NAV and does so through its ability to issue or redeem shares.

A reasonable investor in what may generally be regarded as a closed-ended company that meets Conditions A or B would normally only expect to be able to realise NAV on the liquidation of the company. So section S357(2) excludes from section S356 (‘meaning of ‘mutual fund’ etc’) any case where a reasonable investor would only be able to realise the investment in the arrangements in the event of a winding-up, dissolution or termination of the arrangements, and where certain other conditions (condition ‘E’ or ‘F’) apply (section S357(1)(b) - see OFM06000 onwards).

Offshore Fund Manual provides:

OFM06100 - Exceptions to meaning of mutual fund: introduction - Section 357(3) TIOPA 2010 [January 2012]

...Section 357(2) has the effect that ‘open-ended’ arrangements (i.e. those that enable investors to realise NAV by disposing of their interest) cannot come within the exceptions provided by S357.

The conditions E or F do, however, except certain types of closed-ended arrangements from the meaning of a ‘mutual fund’.

The exceptions can also apply to arrangements where a reasonable investor could expect to realise their investment at or close to NAV as a result of the intention of a fund to dispose of its assets in tranches followed by a final distribution of any remaining assets, as opposed to a liquidation of all of the fund’s assets on a winding-up (see OFM05700).

33.5.1 *Winding-up condition D (no liquidation date)*

Section 357 TIOPA provides:

(2) Condition D is that, under the terms of the arrangements, a reasonable investor participating in the arrangements would expect to be able to realise all or part of an investment in the arrangements on a basis mentioned in section 356(6) only in the event of the winding up, dissolution or termination of the arrangements.....

(8) For the purposes of this section the fact that arrangements provide for a vote or other action that may lead to the winding up, dissolution or termination of the arrangements does not, by itself, mean that the arrangements are designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements.

Offshore Funds Manual provides:

OFM06200 - Exceptions to meaning of mutual fund: condition E - Section 357(3) TIOPA 2010 [January 2012]

The most important exception, provided by condition E (section 357(3)), is that a reasonable investor cannot expect the arrangements to terminate on or by a date fixed in advance.

This condition means, for example, that ordinary shares in any company with defined share capital (that is, not an open-ended company with variable share capital) and which does not have a limited life, will not be an offshore fund.

Condition E requires that the arrangements are not such that they are designed to terminate on a date that is stated or determinable under the arrangements. As elsewhere “arrangements” has a wide meaning and is not limited to the documents establishing the fund, so can include all agreements and understandings. Similarly, “determinable” has a wide meaning. So for example, if a fund prospectus stated that the fund was intended to wind-up after it had realised all of its assets, but those assets consisted of debt instruments none of which was longer dated than 5 years then the termination date would be determinable (unless, of course, it was clear that the fund would reinvest the proceeds of asset realisations and was not ‘limited life’ in any other regard).

Asset realisations

It will not be sufficient to satisfy condition E for a fund to state that an intention to dispose of its assets on or by a certain date is subject to market conditions or some similar caveat where it is clear that a long-stop date exists, or there is no specific and realistic possibility that would lead a reasonable investor to conclude that the fund would not necessarily be able to dispose of its assets by the date stated. For example, if a fund’s assets consist of short-dated debt instruments, or commercial leases with a life of 20 years then, unless the fund was reasonably likely to re-invest funds from disposals, condition E could not be satisfied. Where there is no such long-stop date implicit from the nature of the assets themselves then condition E may still not be satisfied if a fund stated an intention to dispose of its assets in, say, four years’ time ‘subject to market conditions’ or some other broad statement.

HMRC will consider particular cases where a fund manager or its advisers

believe that there are tangible and specific reasons why such a statement should lead to condition X being satisfied but this is expected to apply in exceptional circumstances only. An example of the circumstances when a broad statement relating to whether assets could be realised on or by a given date may be sufficient to satisfy condition X would be if a fund held significant assets in a country about which there were real and significant concerns regarding any future government's policy in respect of the assets in question (such as public declarations of an intention to nationalise particular industries or companies in which the fund holds significant investments).

Continuation votes

Where arrangements provide for a continuation vote or similar action to determine whether they will persist beyond a given date that will not, in itself, mean that condition E is not met. So, if a reasonable investor, considering all of the facts, could not have any expectation that a continuation vote would fail then, provided the continuation vote was not for a determinable period and absent any other factors, the arrangements could not be said to have a determinable life and condition E could then be satisfied. HMRC accept that it could usually be expected that condition E would be satisfied where continuation votes are provided for because continuation resolutions may well be passed if a fund is performing well, and a reasonable investor would be expected to invest on the basis that a fund would be successful. However, if arrangements or understandings are in place so that it could be expected that a continuation vote would not be passed then there would be a determinable date. Even if a date of termination is stated or determinable, so that condition E could not be satisfied, it is still necessary to consider Condition F to determine if the arrangements amount to a 'mutual fund' - see OFM06300 to OFM06600.

33.5.2 *Winding-up condition E (no fixed termination date)*

Section 357(3) TIOPA provides:

Condition E is that the arrangements are not designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements.

33.5.3 *Winding-up condition F (no income)*

Section 357(4) TIOPA provides:

Condition F is that—

- (a) the arrangements are designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements,
- (b) subsection (5), (6) or (7) applies, and
- (c) the arrangements are not designed to produce a return for

participants that equates, in substance, to the return on an investment of money at interest.

33.5.4 Subsection (5): no income-producing assets

Section 357(5) TIOPA provides:

This subsection applies if none of the assets that are the subject of the arrangements is a relevant income-producing asset (see section 358).

Section 358 TIOPA provides the definition:

- (1) This section has effect for the purposes of section 357.
- (2) An asset is a relevant income-producing asset if it produces income on which, if it were held directly by an individual resident in the UK, the individual would be charged to income tax (but see subsections (3) and (4)).
- (3) An asset is not a relevant income-producing asset if the asset is hedged, provided that no income is expected to arise from—
 - (a) the asset (taking account of the hedging), or
 - (b) any product of the hedging arrangements.
- (4) Cash awaiting investment is not a relevant income-producing asset, provided that the cash, and any income that it produces while awaiting investment, is invested as soon as reasonably practicable in assets that are not relevant income-producing assets (as defined by this section).

This is designed to exclude funds which invest in assets intended to give a purely capital growth based return.

Offshore Funds Manual provides:

OFM05600 - Meaning of mutual fund: conditions: condition 'C': meaning of realisation of investment by reference to NAV or an index - S356(6) TIOPA 2010 [January 2012]

Realisation of investment by reference an index

...In many cases investments designed to produce an indexed return are likely to be non-income producing (that is, they reflect capital growth only) in which case the exception provided by S357(5) - condition F - will apply (see OFM06200 onwards).

Where an investment is by reference to an index that reflects both capital growth and income returns then S357(5) would not apply, but condition F may still apply due to S357(7) - see OFM06600.

33.5.5 *Subsection (6): no entitlement to income*

Section 357(6) TIOPA provides:

This subsection applies if, under the terms of the arrangements, the participants in the arrangements are not entitled to the income from the assets that are the subject of the arrangements or any benefit arising from such income.

Offshore Funds Manual provides:

OFM06500 - Exceptions to meaning of mutual fund: condition F: no entitlement to income or any benefit arising from income - Section 357(6) TIOPA 2010 [January 2012]

An example of an arrangement satisfying this condition might be the capital shares or units in an arrangement which splits the rights to capital and income between the holders of different classes of interest, where the holders of capital shares or units are not entitled to any of the income or any benefit arising from the income.

33.5.6 *Subsection (7): income distributed*

Section 357(7) TIOPA provides:

This subsection applies if—

- (a) under the terms of the arrangements, after deductions for reasonable expenses, any income produced by the assets that are the subject of the arrangements is required to be paid or credited to the participants, and
- (b) a participant who is an individual resident in the UK would be charged to income tax on the amounts paid or credited.

33.6 Share buy-backs and share issuance

Offshore Funds Manual provides:

OFM10500 - Particular arrangements: share buy-backs and share issuance [January 2012]

The price or value of shares in fixed share capital companies may reflect either a discount or a premium to the net asset value of the underlying assets. It may also be the case in some circumstances that there is either directors' or investors' discretion to allow or require the buy-back of shares if there is a discount of a

certain level between the net asset value of the arrangements and the share price. Provided the share buy-back arrangements are made to prevent the discount becoming too large by reference to net asset value, and provided a reasonable investor cannot expect to realise their investment either entirely or almost entirely by reference to net asset value (or by reference to an index), and there is no determinable termination date, then such arrangements will be outside the definition of an offshore fund for UK tax purposes (as Condition C at TIOPA2010/S356 will not be satisfied). Similar considerations apply where the shares trade at a premium.

For example, if a foreign equivalent of an investment trust was trading at a discount of 15% to NAV and bought its own shares on the open market to reduce the discount then, absent any factors that could lead to an investor being able to expect to redeem their investment at or close to NAV, this would not cause Condition C at TIOPA2010/S356(6) to be satisfied: it is clear that before the company commenced to buy its own shares that some investors would not have been able to redeem their interest at NAV and that any subsequent reduction in the discount would be due to normal operation of the market. Without any factors indicating that the company would act to reduce the discount either having been in place prior to this market activity or at some point in the future, a reasonable investor could not expect to realise their investment at or close to NAV.

However, share buy-back arrangements that are specifically designed to provide tracking to net asset value will cause the company or share class to come within the definition of offshore fund. This would include any arrangements introduced as a result of changes to the constitution of a scheme. If a change in the terms of a scheme result in it coming within the definition of an offshore fund then UK investors are treated as if they had always held an interest in an offshore fund. If the fund becomes a reporting fund then investors may be able to make an election under regulation 48(2) to crystallise any offshore income gain at that point, with any subsequent gain being subject to chargeable gains treatment (provided the fund remains a reporting fund). See OFM15200 and OFM19000 for further guidance.

When considering an investor's rights, account should be taken of all scheme documents, promotional documentation or communications to determine what guarantees or undertakings may have been given to the investor.

An undertaking or guarantee, etc, to buy back or redeem only a part of an investor's holding entirely or almost entirely by reference to the net asset value of the property or an index of any description can still constitute an expectation, so for example if the fund manager undertook to redeem or buy back an investor's shares in tranches the arrangements could still be within the definition. Warrants or options that give an investor the right to sell shares back to an issuer for a particular price will not cause Condition C to be satisfied unless the price is determined by reference to NAV so that the investment can be realised at or close to NAV. Similarly, rights that carry the option to convert to other classes of interest would only satisfy Condition C if the new rights themselves permitted an investor to realise their investment at or close to NAV.

33.7 Companies in course of liquidation

Offshore Funds Manual provides:

OFM10630 Particular arrangements: limited life companies: company liquidations [January 2012]

An investor may have invested in a company or other arrangement which subsequently goes into liquidation, at which point the investor might reasonably expect to realise their investment at net asset value. However, if a company or other arrangement is outside the definition of an offshore fund before it goes into liquidation, then being in liquidation will not by itself bring that company or arrangement into the definition of an offshore fund. This also applies in the case of self-managed wind downs with the subsequent appointment of a liquidator to complete the liquidation.

This treatment would also extend to the purchase of shares in a company after it has entered a self-managed wind down or liquidation. This may not be the case, though, for wind downs and liquidations that are intentionally extended or contrived.

Some overseas companies can be liquidated or reconstructed at any time. If there is a decision to do so, at the point of the approval of the reconstruction or liquidation the investors may obtain net asset value. However, the relevant point is whether a reasonable investor can expect the company to be liquidated or reconstructed in order to deliver net asset value. It is necessary to consider the reasonable investor's expectation to realise their investment either entirely or almost entirely by reference to net asset value (or by reference to an index) when the company was established (or when there was a change in the investor's rights).

33.8 Umbrella arrangements

33.8.1 *Meaning of "umbrella arrangements"*

Section 363 TIOPA provides:

(1) In this Part "umbrella arrangements" means arrangements which provide for separate pooling of the contributions of the participants and the profits or income out of which payments are made to them.

(2) In this Part references to a part of umbrella arrangements are to the arrangements relating to a separate pool.

33.8.2 *Treatment of "umbrella arrangements"*

Section 360 TIOPA provides:

- (1) This section has effect for the purposes of this Part.
- (2) In the case of umbrella arrangements (see section 363)—
 - (a) each part of the umbrella arrangements is to be treated as separate arrangements, and
 - (b) the umbrella arrangements are to be disregarded.
- (3) Subsection (2)(a) is subject to section 361.

Regulation 5 OFTR provides:

In these Regulations, in relation to an offshore fund constituted by a part of umbrella arrangements (within the meaning of section 40C of FA 2008)—

- (a) a reference to the assets of an offshore fund is to such of the assets of the umbrella arrangements as under the arrangements form part of the separate pool to which that part of the umbrella arrangements relates;
- (b) a reference to the income of an offshore fund is to the income arising from those assets; and
- (c) a reference to a participant in an offshore fund is to a person for the time being owning an interest in that separate pool.

Offshore Funds Manual provides:

OFM08000 - Definition of an offshore fund: umbrella funds & protected cell companies - Section 363 TIOPA 2010 [January 2012]

‘Umbrella arrangements’ means arrangements which provide for separate pooling of the contributions of investors and the profits or income out of which payments are made to them (S363(1) TIOPA2010). References to part of an umbrella arrangement are to the arrangements relating to a separate pool (or ‘sub-fund’). Umbrella arrangements will not themselves be treated as an offshore fund. Instead -

- Each sub-fund and each class of interest is treated as an offshore fund in its own right,
- The umbrella fund is not treated as an offshore fund,
- The overall arrangements are disregarded.

The same approach applies to an individual cell of a protected cell company. For umbrella arrangements and protected cell companies, it would usually follow that each sub-fund has the same residence status as the overall arrangement. In the case of a non-resident company it would be expected that each sub-fund would also be non-resident if it was under the “central management and control” of the directors of the company which constitutes the overall arrangement. In the case of a unit trust scheme, the trustees of the overall trust arrangements will usually also be the trustees of each separate arrangement, and so their residence status determines the residence of the fund, but where there are different trustees

for each sub-fund then each must be considered separately. The “central management and control” test is also applicable to unit trusts.

33.9 Arrangements comprising more than one class of interest

Section 361 TIOPA provides:

- (1) This section has effect for the purposes of this Part.
- (2) Where there is more than one class of interest in arrangements (the “main arrangements”)—
 - (a) the arrangements relating to each class of interest are to be treated as separate arrangements, and
 - (b) the main arrangements are to be disregarded.
- (3) In relation to umbrella arrangements, “class of interest” does not include a part of the umbrella arrangements (but there may be more than one class of interest in a part of umbrella arrangements).

Regulation 6 OFTR provides:

In these Regulations, in relation to an offshore fund constituted by a class of interest in the main arrangements (within the meaning of section 40D of FA 2008)—

- (a) a reference to the assets of an offshore fund is to the assets of the main arrangements;
- (b) a reference to the income of an offshore fund is to such of the income of the main fund as is attributable to interests of that class under the arrangements constituting the main arrangements; and
- (c) a reference to a participant in an offshore fund is to a person for the time being owning an interest of that class.

Offshore Funds Manual provides

OFM09000 - Definition of an offshore fund: classes of interest - Section 361 TIOPA 2010 [January 2012]

“Class of interest” is not limited to share classes. There may be other forms of interest which entitle an investor to realise their investment on a basis calculated entirely or almost entirely by reference to the net asset value of the scheme property or an index. For example, certain types of loan may give a return which tracks NAV or is based on an index. A class of interest may also be created as a result of new issues or conversions of existing rights.

It is possible for an entity, particularly a company, to have a class of interest such

as ordinary shares which does not constitute a mutual fund and another class of interest which does constitute such a mutual fund.

However, a particular class of shares can only constitute a single class of interest even if different types of holders of those shares enjoy different rights. For example, in the case of an exchange traded fund, the creation unit holders who act as market makers might have the right to redeem or issue shares directly but if that same class of shares were acquired by another investor on the secondary market then they would still form part of the same class of interest and satisfy Condition C (s356 TIOPA 2010) because, as a consequence of the market makers' ability to redeem or create units, all other investors would expect to be able to dispose of their interest at or close to NAV. (See also OFM10200 regarding exchange traded funds).

33.10 “Reporting” and “non-reporting” funds

Regulation 4 OFTR provides:

- (1) Offshore funds consist of—
 - (a) non-reporting funds (see Part 2 of these Regulations), and
 - (b) reporting funds (see Part 3 of these Regulations).
- (2) In a period of account, an offshore fund is a non-reporting fund unless it is a fund to which Part 3 of these Regulations applies...

Regulation 50 OFTR provides:

In these Regulations a “reporting fund” means an offshore fund to which this Part applies for a period of account.

The requirements to qualify as a reporting fund are not discussed here. HMRC provide a list of reporting funds.⁷ This list is quite short. Presumably fund managers do not generally think it is worth the trouble.

⁷ www.hmrc.gov.uk/collective/reportingfundlist.pdf.

CHAPTER THIRTY FOUR

OFFSHORE FUNDS: TAXATION

34.1 Taxation of offshore funds – Introduction

This chapter considers the taxation of offshore funds.

The tax legislation is mainly in the Offshore Funds (Tax) Regulations 2009 (“OFTR”). It is unfortunate that this important matter was left to regulations, since the drafting and opportunity for consideration are of lower quality, but there it is. The ink of the regulations had hardly dried before they were amended, first in 2009, with a more substantial round of amendments in 2011.

The OFTR’s obsolete references to the FA 2008 take effect as references to the legislation now in TIOPA.¹

I do not consider in full the position of offshore funds held by UK resident companies.

See 33.2 (Meaning of “participant”); 33.3 (Meaning of “offshore fund”); 33.4 (“Mutual fund”).

¹ See 33.1 (Offshore funds – Introduction).

34.2.1 *Meaning of “interest in an offshore fund”*

Regulation 8(1) OFTR provides a commonsense definition:

For the purposes of these Regulations the interest of a participant in an offshore fund is the investment held by a participant taking part in arrangements (or arrangements constituting a fund) to which the relevant group of sections applies.

34.3 Charge to tax on OIGs

The legislation distinguishes:

- (1) Offshore income gains (“**OIGs**”), which arise on a disposal of a non-reporting offshore fund and fall within the offshore funds rules.
- (2) Chargeable gains, within the scope of CGT. I refer to this for clarity as “**CGT chargeable gains**” though strictly the term “chargeable gains” is only applicable to CGT. The HMRC Manuals sometimes use the term “capital gains” which is slightly less accurate, but no less clear.

Regulation 17(1) OFTR provides the charge to tax:

There is a charge to tax if—

- (a) a person disposes of an asset,
- (b) either condition A or condition B is met, and
- (c) as a result of the disposal, an offshore income gain arises to the person making the disposal.

This provision refers to a “person” so it applies to individuals, trustees, companies and PRs.

Regulation 17(2) provides:

Condition A is that the asset is an interest in a non-reporting fund at the time of the disposal.

Condition B concerns funds changing from non-reporting fund to reporting fund status:

(3) Condition B is that—

- (a) the asset is an interest in a reporting fund at the time of the disposal,

- (b) the reporting fund was previously a non-reporting fund (becoming a reporting fund as the result of an application under regulation 52),
- (c) the interest was an interest in a non-reporting fund during some or all of the material period,²
- (d) an election under regulation 48 was not prevented by paragraph (5) of that regulation, and
- (e) no election has been made under regulation 48(2).

Regulation 18(1) OFTR provides:

The offshore income gain arising is treated for all the purposes of the Tax Acts as income which arises at the time of the disposal to the person making the disposal (or treated as making the disposal).³

An OIG is not income for trust law purposes, for instance proceeds of sale of an offshore fund represent an OIG but are not payable to a life tenant.

- (2) The tax is charged on the person making the disposal (or treated as making the disposal).
- (3) In the case of a person chargeable to income tax, tax is charged under Chapter 8 of Part 5 of ITTOIA 2005 (miscellaneous income: income not otherwise charged) for the year of assessment in which the disposal is made ...

This incorporates s.687(1) ITTOIA:

Income tax is charged under this Chapter on income from any source that

2 Defined regulation 17(4):

“For the purposes of paragraph (3)(c) the “material period” means a period beginning with the day on which consideration was given for the acquisition of the asset or on 1st January 1984 (whichever is the later) and ending with the day on which the fund became a reporting fund.”

3 In accordance with the principles of plain English drafting, reg.18(5) (somewhat unnecessarily) flags up some cross references:

“Paragraph (1) is subject to—

- (a) regulation 19 (income treated as arising under regulation 17: remittance basis);
- (b) regulation 20(1) (offshore income gain arising to non-resident trustees not treated as income of settlor);
- (c) regulation 20(5) (application to gains of non-resident settlements);
- (d) regulation 24(6) (application of section 13 of TCGA 1992).”

is not charged to income tax under or as a result of any other provision of this Act or any other Act.⁴

This is the charge on miscellaneous income (formerly D VI income). Regulation 18(3) continues:

but sections 688(1) and 689 of ITTOIA 2005 (income charged and person liable) do not apply.

The disapplied sections provide (so far as relevant here):

688 Income charged

(1) Tax is charged under this Chapter on the amount of the income arising in the tax year.

(2) Subsection (1) is subject to ...

(c) Part 8 (foreign income: special rules).

689 Person liable

The person liable for any tax charged under this Chapter is the person receiving or entitled to the income.

At first sight this is worrying since the disapplied sections (among other things) incorporate the remittance basis for miscellaneous income. However these sections are only disapplied because regulations 18(2) and 19 OFTR cover the same area.

34.4 Meaning of “disposal”

It will be recalled that there is a charge to tax if a person disposes of an offshore fund. “Disposal” is defined in chapter 4 part 2 OFTR. Regulation 32 provides:

This Chapter applies if a participant disposes of an asset and at the time of the disposal—

- (a) the asset is an interest in a non-reporting fund, or
- (b) the asset is an interest in a reporting fund and the requirements

4 Similarly for CT, reg.18(4) OFTR provides:

“In the case of a person chargeable to corporation tax, tax is charged under Chapter 8 of Part 10 of CTA 2009 (miscellaneous income: income not otherwise charged) for the accounting period in which the disposal is made.”

specified in paragraph (3) of regulation 17 (read, as appropriate, with paragraphs (4) and (5) of that regulation) are met.

I cannot see the point of this, as if a participant disposes of an asset which is not within (a) or (b) then there is no charge under the OFTR and the question of whether there is a disposal for the purposes of the OFTR does not arise. I would be grateful to any reader who could explain. However that may be, reg.32 does no harm.

We can move on to reg.33 which defines disposal:

- (1) There is a disposal of an asset for the purposes of these Regulations if there would be a disposal of an asset for the purposes of TCGA 1992.
- (2) Paragraph (1) is subject to the following provisions of this Chapter.

Four special rules follow. Regulations 35-37 relate to reorganisations and are not discussed here. Regulation 34 concerns the position on death.

34.5 Death of individual

For CGT purposes, there is no disposal on death. Section 62(1) TCGA provides:

For the purposes of this Act the assets of which a deceased person was competent to dispose—

- (a) shall be deemed to be acquired on his death by the personal representatives or other person on whom they devolve for a consideration equal to their market value at the date of the death, but
- (b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).

Regulation 34(1) OFTR undoes this and provides for a deemed disposal on death:

Notwithstanding anything in paragraph (b) of subsection (1) of section 62 of TCGA 1992 (general provisions applicable on death: no deemed disposal by the deceased), where a person dies and the assets of which

the deceased was competent to dispose⁵ at the time of death include an interest in a non-reporting fund, then, for the purposes of these Regulations—

- (a) immediately before the acquisition referred to in paragraph (a) of that subsection, that interest shall be deemed to be disposed of by the deceased for such a consideration as is mentioned in that subsection; ...

For completeness, reg.34(1) concludes:

but (b) nothing in this regulation affects the determination, in accordance with regulation 32, of the question whether that deemed disposal is one to which this Chapter applies.

I cannot see the point of that, just as I cannot see the point of regulation 32, but it does no harm.

Regulation 34(2) incorporates other rules of s.62 TCGA:

- (2) Subject to paragraph (1), section 62 of TCGA 1992 applies for the purposes of these Regulations as it applies for the purposes of that Act...,

The following provisions of s.62 therefore apply for OIGs; I set out the section highlighting the amendments that the context requires when applying the section to OIGs:

- [(2) and (2A) deal with losses and are not relevant to OIGs.]
- (3) In relation to property forming part of the estate of a deceased person the personal representatives shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the personal representatives), and that body shall be treated as having the deceased's residence, ordinary residence, and domicile at the date of death.
- (4) On a person acquiring any asset as legatee (as defined in section 64)—

⁵ Regulation 34(2) defines this expression by reference:

“... the reference in that paragraph to the assets of which a deceased person was competent to dispose are to be construed in accordance with [s.62(10) TCGA]. Section 62(10) provides a commonsense definition; see 73.4 (Acquisition by PRs).

- (a) no ~~chargeable~~ offshore income gain shall accrue to the personal representatives, and
 - (b) the legatee shall be treated as if the personal representatives' acquisition of the asset had been his acquisition of it.
- (5) Notwithstanding section 17(1) no ~~chargeable~~ offshore income gain shall accrue to any person on his making a disposal by way of donatio mortis causa.
- [Subsections (6) to (9) deal with IoVs and need not be set out here.]

The OFM correctly provides:

OFM14200 Investors in non-reporting funds: disposals of interests: death of participant – regulation 34 [January 2012]

...An offshore income gain arises and resulting tax becomes payable before the estate of the deceased person is valued for inheritance tax purposes.

There is scope for deathbed planning: a lifetime gift to charity or to a spouse avoids the OIG charge on death, because no OIG arises on the disposal (applying CGT rules which brings into effect the CGT spouse exemption and the CGT charity exemption). By contrast if there is a gift by will to charity or to a spouse the OIG comes into charge on the death.

34.6 OIG accruing to partnership

SAI Manual provides:

6370 Offshore income gains: The tax charge [June 2011]

Where an offshore income gain is realised by a partnership, each partner should be separately assessed in respect of his share of the ... income.

34.7 OIG remittance basis

Regulation 19 OFTR provides:

- (1) This regulation applies to income treated as arising under regulation 17 to an individual in a tax year if—
 - (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
 - (b) the individual is not domiciled in the UK in that year.

- (2) The income is treated as relevant foreign income of the individual.

The significance of treating the income as RFI is that the income can qualify for the remittance basis. I refer to this as “**the OIG remittance basis**”.

The remittance basis applies even if the offshore fund is a UK situate asset (the CGT situs rules are not relevant) but in practice that is not likely to happen.

So long as the gain is not remitted, the foreign domiciled individual will not care if the gain is a chargeable gain or an OIG, ie they will not care whether or not the asset disposed of is an offshore fund.

Regulation 19(3) contains two rules:

For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)—

- (a) any consideration obtained on the disposal of the asset⁶ is treated as deriving from the income

At first sight it is not clear why reg.19(3)(a) is needed. It seems self-evident. There is no equivalent in the CGT charge on gains accruing to individuals. But a reason will emerge.⁷

Regulation 19(3) continues:

For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis) ...

- (b) unless the consideration so obtained is of an amount equal to or exceeding the market value of the asset, the asset is treated as deriving from the income.

Regulation 19(3)(b) is the equivalent of the CGT rule for deemed gains.⁸

6 Reg 19(4) provides two somewhat unnecessary definitions:

“In paragraph (3)—

(a) “the asset” means the asset the disposal of which causes the income to be treated as arising, and

(b) “the disposal” means the disposal mentioned in sub-paragraph (a) of that paragraph.”

7 See 34.13.6 (OIG s.87 TCGA remittance basis).

8 See 10.24 (CGT disposal not for market value).

34.8 OIG arising to UK trust

34.8.1 *UK resident trust (not settlor-interested)*

A UK resident trust is in principle subject to income tax on its OIGs.⁹ Tax is charged at the trust rate, 50%: it falls within s.482 type 3, see 24.2.3 (Other income taxed at top rates).

34.8.2 *UK resident settlor-interested trust*

An OIG arising to UK trustees is not “income” in the general sense and in the absence of express provision it would not fall within s.624 ITTOIA which only applies to income. However reg.18 OFTR directs that the OIG is “treated for all the purposes of the Tax Acts as income” so it does fall within s.624 ITTOIA.

If the settlor is a remittance basis taxpayer the s.624 remittance basis applies, ie an unremitted OIG is not taxed on the settlor but on the trustees.¹⁰

The rate of tax in the absence of s.624 is 50%, so s.624 can only reduce the tax rate (or make no difference).

34.9 OIG non-residence defence

Regulation 22(1) OFTR provides a territorial limitation for non-residents:

The following enactments have effect in relation to income tax or corporation tax in respect of offshore income gains as they have effect in relation to capital gains tax or corporation tax in respect of chargeable gains—

- (a) section 2(1) of TCGA 1992 (persons chargeable to capital gains tax) ...

Amended as reg. 22(1) directs, s.2(1) TCGA provides (so far as relevant):

... a person shall be chargeable to *income tax* in respect of *offshore income gains* accruing to him in a year of assessment during any part of

⁹ See 34.3 (Charge to tax on OIGs).

¹⁰ See 26.5 (Section 624 remittance basis).

which he is resident in the UK, or during which he is ordinarily resident in the UK.

This incorporates the CGT territorial limitations by reference.¹¹ By implication, a person not resident (and not ordinarily resident) is not chargeable to IT on offshore income gains. I refer to this rule as “**the OIG non-residence defence**”.

34.10 OIG arising to non-resident trust

Where an OIG arises to a non-resident trust, the trustees are not subject to tax on the gain because of the OIG non-residence defence.

34.10.1 *Non-resident settlor-interested trust*

An OIG arising to a non-resident settlor-interested trust is not within s.624 ITTOIA, unlike a UK resident trust. Regulation 20(1) OFTR provides:

11 For completeness: Regulation 22 OFTR also incorporates s.10 TCGA which would apply if a non-resident carried on a trade through a branch or agency and used the offshore funds for the purposes of the trade. This gives a neat symmetry with the CGT rules but it is hard to imagine that this will ever apply in practice. The regulation provides:

“(1) The following enactments have effect in relation to income tax or corporation tax in respect of offshore income gains as they have effect in relation to capital gains tax or corporation tax in respect of chargeable gains—

(a) section 2(1) of TCGA 1992 (persons chargeable to capital gains tax) ...

(b) section 10 of TCGA 1992 (non-resident with a UK branch or agency);

(c) section 10B of TCGA 1992 (non-resident company with UK permanent establishment).

(2) Paragraph (1) is subject to paragraphs (3) and (4).

(3) In the application of section 10 of TCGA 1992 in accordance with paragraph (1), paragraphs (a) and (b) of subsection (1) (assets on the disposal of which chargeable gains are taxable) have effect with the omission of the words “situated in the UK and”.

(4) In the application of section 10B of TCGA 1992 in accordance with paragraph (1), paragraphs (a) and (b) of subsection (1) (assets on the disposal of which chargeable profits arise for the purposes of corporation tax) have effect with the omission of the words “situated in the UK and”.

Section 1015 ITA could also restrict the territorial scope of the OIG charge, but the rules discussed here leave it no room to operate.”

If an offshore income gain arises to a settlement in a tax year and the trustees of the settlement are neither resident nor ordinarily resident in the UK in the tax year, the gain is not regarded as income for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

The consequence is that a settlor who is liable under s.720 does not have an indemnity against the trust for the tax. One wonders if this has been thought through.

The whole of chapter 5 is disapplied, so where a capital payment is made to a minor child of the settlor, the settlor is not taxable under s.629 ITTOIA (instead the child would be taxable at the appropriate rate. This may lead to a significant saving).

34.11 Outline of OIG anti-avoidance provisions

The rule that non-resident trusts and companies are not subject to tax on OIGs presents an obvious means of tax avoidance. HMRC might have applied either the income tax TAA provisions or the CGT anti-avoidance provisions to deal with this. In fact they have applied both:

- (1) The TAA provisions apply: reg.21
- (2) The CGT anti-avoidance provisions apply (with some amendments):
 - (a) Regulation 20 applies s.87 TCGA.
 - (b) Regulation 24 applies s.13 TCGA.

Further rules are needed to deal with the many possible ways in which the anti-avoidance provisions may interact:

- (1) Interactions between these IT and CGT anti-avoidance provisions potentially applying to the same OIG; and
- (2) Interactions between:
 - (a) the applicable anti-avoidance provision relating to an OIG and
 - (b) s.731 or CGT s.87 TCGA (where a beneficiary receives a benefit and there is also relevant income or a CGT s.2(2) amount).

34.11.1 *Commentary*

The result of applying two sets of overlapping anti-avoidance provisions is so complicated that no-one could expect the rules which I seek to explain below to be applied in practice, except by the largest trusts with a large budget for UK professional advice. It also introduces a full set of

anomalies and scope for tax planning.

Although it was the case before 2008 that both the TAA and the CGT anti-avoidance provisions applied, the 2008 reforms made both sets of provisions very much more complicated, so that the dual application presents much more complexity than before 2008.

The drafting of the OIG provisions was even more rushed than the rest of the 2008 legislation, leaving no time even for HMRC to properly consider the issues, let alone for consultation. There was an opportunity to rethink in the 2009 regulations, but HMRC had no desire to take it up. It seems to me that there can be no more devastating criticism of the rules than an attempt to explain them. The reader who labours through the next part of this chapter is likely to agree that the law ought to be simplified by applying either the income tax or the CGT anti-avoidance rules – CGT would be the better of the two, as OIGs are more like capital gains – but not both.

34.12 OIG TAA provisions

An OIG arising to a non-resident is not “income” so in the absence of express provision it would not fall within the TAA provisions even if it arose to a person abroad within s.720 or s.731. Regulation 21(1) OFTR deals with this and thus applies the TAA provisions to OIGs:

Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.

It is helpful to distinguish the ordinary transfer of asset rules and the rules as they apply to OIGs. I use the following terminology:

- (1) **“OIG s.720”**, the provisions of s.720 ITA which apply when:
 - (a) a person abroad receives OIGs, treated as income within the scope of s.720, and
 - (b) the transferor is deemed to receive income (**“OIG s.720 income”**).
- (2) **“OIG s.731”**, the provisions of s.731 ITA which apply when:
 - (a) a person abroad receives OIGs, treated as relevant income within the scope of s.731, and
 - (b) a non-transferor is deemed to receive income (**“OIG s.731**

income”).

Regulation 21(2) OFTR provides:

Income treated as arising under that Chapter by virtue of paragraph (1) is regarded as “foreign” for the purposes of section 726, 730 or 735 of that Act.

This feeds into s.726 and 735 ITA which impose a remittance basis for OIG s.720 income and OIG s.731 income. The motive defence may also apply.

There are only limited differences between the way that sections 720 and 731 work for OIGs and for ordinary income.

34.13 OIG s.87 TCGA charge

An OIG is not a chargeable gain, and so not a s.2(2) amount (trust gain), so in the absence of express provision it would not give rise to a charge under s.87 TCGA. Regulation 20(3) OFTR deals with this and applies the s.87 rules with modifications. Because there are modifications, there are significant differences between OIG s.87 TCGA and CGT s.87 TCGA.

34.13.1 OIG s.87 TCGA charge

Regulation 20(3) OFTR incorporates the s.87 TCGA rules in this manner:

Sections 12, 87 to 90A and 96 to 98 of, and Schedule 4C to, TCGA 1992 apply in relation to OIG amounts as if—

- (a) references to section 2(2) amounts (except those in paragraph 7B(2)(b) and (4) of Schedule 4C) were to OIG amounts,
- (b) references to chargeable gains (except the one in paragraph 1(5) of Schedule 4C) were to offshore income gains,
- (c) references to anything accruing were to it arising¹² (and similar references, except the one in paragraph 1(5) of Schedule 4C, were read accordingly),
- (d) sections 87(4), 88(2) to (5) and 97(6) and paragraphs 1(3A), 3 to

¹² The terminology of the Taxes Acts is that CGT chargeable gains *accrue*; but OIGs *arise*. There is no difference in meaning so it seems somewhat pedantic to make the change of terminology when incorporating the CGT s.87 TCGA provisions for OIGs; but it does no harm.

7 and 12 of Schedule 4C were omitted, and
(e) regulation 21 did not apply.

In this section I consider the application of s.87-98 TCGA to OIGs.

The reference to s.12 TCGA in regulation 20(3) makes no sense, and must be a drafting error. However no great harm is done by the error. What matters is the incorporation of s.87-98 TCGA.

I do not set out all of s.87-98 TCGA, as amended, because the text would be too long for the exercise to be useful. The key provision is s.87(2)(3) TCGA which (amended as reg.20(3) directs) provides:

- [2][a] *Offshore income gains* are treated as *arising* in the relevant tax year to a beneficiary of the settlement
 - [b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year
 - [c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the *OIG amount* for the relevant tax year or any earlier tax year.
- (3) The amount of *offshore income gains* treated as accruing is equal to—
- (a) the amount of the capital payment, or
 - (b) if only part of the capital payment is matched, the amount of that part.

It is necessary to distinguish CGT s.87 TCGA and OIG s.87 TCGA because the rules are not identical. I use the following terminology:

- (1) “**CGT s.87 TCGA**”, the provisions of s.87 TCGA which apply when:
 - (a) a trust has a “**CGT s.2(2) amount**” (trust gains) and
 - (b) a beneficiary is deemed to receive a gain (“**the s.87 CGT gain**”).
- (2) “**OIG s.87 TCGA**”, the provisions of s.87 as amended, which apply when:
 - (a) a trust has “**OIG amounts**”; and
 - (b) a beneficiary is deemed to receive an OIG (“**the s.87 OIG**”).

For a discussion of CGT s.87 TCGA, see 48.1 (Gains of Non-resident Trusts: section 87). I concentrate here on points where OIG s.87 TCGA is different from CGT s.87 TCGA. But note one area where the two rules are the same. If a trust with OIG amounts makes a capital payment to a non-resident beneficiary, a s.87 OIG is treated as accruing to the beneficiary under OIG s.87 TCGA(2). But no income tax charge arises

since the beneficiary qualifies for the OIG non-residence defence.¹³ Thus capital payments to non-resident beneficiaries reduce (or “wash”) OIG amounts, as they do for CGT s.2(2) amounts.

I deal with the 2008 transitional rules elsewhere because they are best considered together with the CGT s.87 TCGA transitional rules.¹⁴

For sch 4C, see 49.26 (OIG sch 4C).

34.13.2 “OIG amount”

Regulation 20(2) OFTR defines the term “OIG amount”:

If—

- (a) offshore income gains arise to the trustees of a settlement in a tax year, and
 - (b) section 87 of TCGA 1992 (gains of non-resident settlements) applies to the settlement for that year,
- the OIG amount for the settlement for that year is the amount of the offshore income gains.

“OIG amount” is the OIG equivalent of the CGT concept “s.2(2) amount” (formerly called trust gains) though the definition is not identically worded.¹⁵

It is necessary to have a different definition, since the definition of s.2(2) amounts (trust gains) caters for losses, and for CGT chargeable gains within s.86 TCGA; the definition of OIG amounts does not do this because there is no relief for OIG losses and s.86 does not apply to OIGs.

13 See 34.9 (OIG non-residence defence).

14 See 48.21.1 (Pre-2008 OIG amounts); 48.24 (Pre-2008 inter-trust transfer); 48.31 (Rebasing - OIG amounts).

15 Section 87 TCGA provides:

“(4) The section 2(2) amount for a settlement for a tax year for which this section applies to the settlement is—

(a) the amount upon which the trustees of the settlement would be chargeable to tax under section 2(2) for that year if they were resident and ordinarily resident in the UK in that year, or

(b) if section 86 applies to the settlement for that year, the amount mentioned in para (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

(5) The section 2(2) amount for a settlement for a tax year for which this section does not apply to the settlement is nil.”

One (I expect, unintended) consequence of the difference in drafting is that there is no double taxation relief where the OIGs are subject to a foreign capital gains tax.¹⁶

The drafter has correctly provided in reg. 20(3)(d) OFTR that s.87(4) TCGA does not apply for OIG s.87 TCGA, because it has no role in that context.

34.13.3 “Capital payment”

“Capital payment” is defined in s.97(1) TCGA. The OFTR does not amend this. It provides:

In sections 86A to 96 and Schedule 4C and this section “capital payment”—

(a) means

- [i] any payment which is not chargeable to income tax on the recipient
- [ii] or, in the case of a recipient who is neither resident nor ordinarily resident in the UK, any payment received otherwise than as income...

Suppose a trust within OIG s.87 TCGA makes a capital payment (or what appears to be a capital payment) to a UK resident beneficiary. The definition does not actually work for OIG s.87 TCGA, since what would otherwise be a capital payment falling within OIG s.87 TCGA *is* chargeable to IT under OIG s.87 TCGA! But for the purposes of OIG s.87 TCGA the definition must be taken to read that “capital payment” means:

- [i] any payment which is not chargeable to income tax on the recipient [*apart from OIG s.87 TCGA*]
- [ii] or, in the case of a recipient who is neither resident nor ordinarily resident in the UK, any payment received otherwise than as income...

I refer to such a capital payment which is subject to income tax under OIG s.87 TCGA as an **“OIG capital payment”**.

16 See 55.11 (DT reliefs: s.87 TCGA).

34.13.4 *Deemed disposal*

If OIG s.87 TCGA applies, a beneficiary receives a s.87 OIG. OIG s.87 TCGA does not directly impose a charge on the s.87 OIG: the deeming feeds into reg.17 which imposes the charge when an OIG accrues to the person making the disposal of an offshore fund. A further deeming is needed, because the beneficiary to whom the s.87 OIG accrues does not make a disposal. Therefore reg.20(5) OFTR provides for a deemed disposal, to bring the s.87 OIG into charge under reg.17:

If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

(The same rule applies for OIG s.13.)

34.13.5 *OIG s.87 TCGA: miscellaneous points*

The deemed disposal rules of Schedule 4B TCGA do not apply to OIGs,¹⁷ but the harsh provisions of Schedule 4C TCGA may apply.

The interest supplement rule in s.91 TCGA applies only to CGT s.87 TCGA and not to OIG s.87 TCGA.

A capital payment from a trust with OIG amounts does not give rise to an IHT exit charge as the exit charge income exemption applies.¹⁸

34.13.6 *OIG s.87 TCGA remittance basis*

If a remittance basis taxpayer receives a s.87 OIG, s.87B TCGA applies to bring in a remittance basis just like the CGT s.87 TCGA remittance basis.

Reg.19(5) OFTR provides:

This regulation does not apply for the purposes of regulation 20.

That disapplies the ordinary OIG remittance basis. That is needed because the OIG s.87B remittance basis applies instead.

¹⁷ See 49.12.1 (Chargeable asset).

¹⁸ See 33.3.1 (Interaction with IHT exit charge income exemption).

34.13.7 HMRC views

HMRC agree with the above. The OFM provides:

OFM09315 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: section 87 (and 87A) TCGA attribution rules: effect of residence and domicile status of beneficiary [January 2012]

... Beneficiary is UK resident but non-UK domiciled

Where attributions are made to a beneficiary who is UK resident or ordinarily resident but non-UK domiciled then, under section 87 (and 87A) TCGA rules, the full amount attributed may not be chargeable to income tax for the following reasons

- Such an individual will not be chargeable to income tax on offshore income gains attributed to them to the extent that in the matching process - a capital payment received before 6 April 2008 is matched, or
- an OIG amount for the tax year 2007-08, or earlier, is matched (paragraph 100 Schedule 7 FA 2008).
- If the trustees have made a “rebasing” election under paragraph 126 Schedule 7 FA 2008 then such an individual will not be chargeable on the pre-6 April 2008 element of the offshore income gain attributed to them (paragraph 101 Schedule 7 FA 2008).
- If such an individual is a remittance basis user they can have the benefit of the remittance basis via the rules in section 87B TCGA.

The full amount of the offshore income gain attributed to the individual reduces the OIG amount of the non-resident settlement structure that is available to match with future capital payments. That is so even though less than the full amount may be chargeable to income tax on the individual.

Beneficiary is non-UK resident

Offshore income gains can still be attributed to a beneficiary who is not resident or ordinarily resident in the UK using the section 87 TCGA attribution rules. This applies even though they may not be chargeable to tax on such an individual. Any such attribution reduces the OIG amount of the non-resident settlement structure that is available to match with future capital payments.

34.14 OIG s.13 charge

An OIG is not a chargeable gain, so in the absence of express provision it would not fall within s.13 TCGA. Regulation 24(1) OFTR deals with this

and applies s.13 TCGA to OIGs with modifications:

- (1) Section 13 of TCGA 1992 (chargeable gains accruing to certain non-resident companies) applies for the purposes of this Part with the following modifications.
- (2) The section applies as if—
 - (a) for any reference to a chargeable gain there were substituted a reference to an offshore income gain; and
 - (b) for any reference to anything accruing there were substituted a reference to it arising¹⁹ (with similar references being read accordingly).
- (3) The section applies as if, in subsection (5), paragraphs (b) and (c) were omitted.
- (4) The section applies as if, in subsection (7), for the reference to capital gains tax there were substituted a reference to income tax or corporation tax.
- (5) The section applies as if subsection (8) were omitted. ...

I refer to this as **“the OIG s.13 charge”**. It is necessary to distinguish the CGT s.13 rules and the OIG s.13 rules because the rules (though similar) are not identical. I refer below to:

- (1) **“CGT s.13”**, the provisions of s.13 TCGA which apply when:
 - (a) a non-resident close company receives CGT chargeable gains, and
 - (b) a participator is deemed to receive the gain (**“the s.13 CGT gain”**).
- (2) **“OIG s.13”**, the provisions of s.13 as amended, which apply when:
 - (a) a non-resident close company receives OIGs, and
 - (b) a participator is deemed to receive the OIGs (**“the s.13 OIG”**).

Amended as reg.24 directs, s.13 TCGA provides:

Attribution of [OIGs] to members of non-resident companies

- (1) This section applies as respects *offshore income gains arising* to a company—
 - (a) which is not resident in the UK, and

¹⁹ The terminology of the Taxes Acts is that CGT chargeable gains *accrue*; but OIGs *arise*. There is no difference in meaning so it seems somewhat pedantic to make the change of terminology when incorporating the CGT s.13 provisions for OIGs; but it does no harm.

- (b) which would be a close company if it were resident in the UK.
- (2) Subject to this section, every person who at the time when the *offshore income gain arises* to the company is resident or ordinarily resident in the UK, and who is a participator in the company, shall be treated for the purposes of this Act as if a part of the *offshore income gain* had *arisen* to him.
- (3) That part shall be equal to the proportion of the gain that corresponds to the extent of the participator's interest as a participator in the company.
- (4) Subsection (2) above shall not apply in the case of any participator in the company to which the *offshore income gain arises* where the aggregate amount falling under that subsection to be apportioned to him and to persons connected with him does not exceed one tenth of the gain.
- (5) This section shall not apply in relation to—
- ~~(b) an offshore income gain accruing on the disposal of an asset used, and used only—~~
- ~~(i) for the purposes of a trade carried on by the company wholly outside the UK, or~~
- ~~(ii) for the purposes of the part carried on outside the UK of a trade carried on by the company partly within and partly outside the UK, or~~
- ~~(c) an offshore income gain accruing on the disposal of currency or of a debt within section 252(1), where the currency or debt is or represents money in use for the purposes of a trade carried on by the company wholly outside the UK, or~~
- (d) to an *offshore income gain* in respect of which the company is chargeable to tax by virtue of section 10B.
- [Subsections 5A to 7A relate to company distribution relief and company disposal relief and need not be printed here.]
- ~~(8) So far as it would go to reduce or extinguish chargeable gains accruing by virtue of this section to a person in a year of assessment this section shall apply in relation to a loss accruing to the company on the disposal of an asset in that year of assessment as it would apply if a gain instead of a loss had accrued to the company on the disposal, but shall only so apply in relation to that person; and subject to the preceding provisions of this subsection this section shall not apply in relation to a loss accruing to the company.~~
- (9) If a person who is a participator in the company at the time when the *offshore income gain arises* to the company is itself a company which is not resident in the UK but which would be a close company if it were resident in the UK, an amount equal to the amount apportioned under subsection (3) above out of the *offshore income gain* to the participating

company's interest as a participator in the company to which the gain *arises* shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned, and so on through any number of companies.

(10) The persons treated by this section as if a part of an *offshore income gain arising* to a company had *arisen* to them shall include the trustees of a settlement who are participators in the company, or in any company amongst the participators in which the gain is apportioned under subsection (9) above, if when the gain *arises* to the company the trustees are neither resident nor ordinarily resident in the UK.

(10B) [*This relates to pension schemes and need not be set out here*]

(11) [*This confers relief where tax is paid by the non-resident close company and need not be set out here*]

(11A) For the purposes of this section the amount of the gain or loss²⁰ *arising* at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on *offshore income gains*.

[*Section 13(12) to (15) contain definition and administrative provisions which need not be set out here*]

For a full discussion of CGT s.13, see 50.1 (Gains of Non-resident companies). I concentrate here on areas where OIG s.13 is different from CGT s.13.

The most important difference is that a s.13 CGT gain is subject to CGT at CGT rates; a s.13 OIG is subject to IT at IT rates.

The deletions in s.13(5)(8) make sense as those CGT rules would not be appropriate for OIG s.13.

DTA relief may apply where a UK resident trustee holds a treaty non-resident company to which an OIG applies: s.79B TCGA disapplies the relief for CGT²¹ but not for OIG.

Offshore group relief does not apply to OIG s.13 because reg.24 does not incorporate s.14 TCGA.

20 The words "or loss" are otiose here. Presumably the drafter overlooked the need to delete them as the legislation takes the trouble to delete them elsewhere. But nothing turns on that.

21 See 55.7.5 (Disallowance of DT relief for trust participator).

34.14.1 *Deemed disposal*

If OIG s.13 applies, a participator receives a s.13 OIG. OIG s.13 does not directly impose a charge on the s.13 OIG: the deeming feeds into reg.19 which imposes the charge when an OIG arises to the person making the disposal of an offshore fund. A further deeming is needed, because the participator to whom the s.13 OIG accrues does not make a disposal. Therefore reg.24(6) OFTR provides for a deemed disposal, to bring the s.13 OIG into charge under reg.17:

If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

(The same rule applies for OIG s.87 TCGA.)

34.14.2 *OIG s.13 remittance basis*

Section 14A TCGA provides the CGT s.13 remittance basis, but this section does not apply for the purposes of OIG s.13. Instead reg.19 applies, but the end result is the same. This explains reg.19(3)(a) which provides:

- (3) For the purposes of Chapter A1 of Part 14 of ITA 2007(10) (remittance basis)—
 - (a) any consideration obtained on the disposal of the asset is treated as deriving from the income. ...

This is the equivalent of s.14A(3)(a) TCGA which similarly provides:

- (3) For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)—
 - (a) treat any consideration obtained by the company on the disposal of the asset as deriving from the deemed chargeable gain. ...

34.15 **OIGs and s.86 TCGA**

A settlor of a non-resident trust is not subject to tax on OIGs under s.86 TCGA; s.720 may apply in this case.

Suppose a non-resident trust where:

- (1) the settlor and spouse are excluded, but

- (2) s.86 applies (because the settlor is UK domiciled and the settlor's children are beneficiaries)

It may be attractive for a trust to invest in offshore funds (which give rise to OIGs outside s.86) rather than other assets (which give rise to CGT chargeable gains within s.86). Similarly, the trustees may invest for income and not capital growth. It may however be a balancing exercise, as to do so does increase the rate of tax on capital payments.

34.16 Interaction of anti-avoidance provisions

34.16.1 Priority between OIG s.87 TCGA and CGT s.87 TCGA

Suppose a capital payment is made to a beneficiary from a trust with OIG amounts and CGT s.2(2) amounts. This would in principle give rise to a charge under OIG s.87 TCGA and CGT s.87 TCGA, or at least it might not be clear which of the two applied.

It matters which applies because in one case the OIG is taxed at income tax rates and in the other the CGT chargeable gain is taxed at CGT rates.

Regulation 20(4) OFTR deals with this:

Section 87A of TCGA 1992 applies for a tax year by virtue of paragraph (3) before it applies for that year otherwise than by virtue of that paragraph.

In short, OIG s.87 TCGA has priority to CGT s.87 TCGA. Where OIG s.87 TCGA applies to a capital payment, there is no “capital payment” for the purposes of CGT s.87 TCGA as the payment is subject to income tax.

The OFM offers the following example:

OFM15640 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: section 87 (and 87A) TCGA attribution rules: example regulation 20 [January 2012]

Allocating capital payments between offshore income gains and chargeable gains arising in non-resident settlements – regulation 20(4)

Example where both offshore income gains and capital gains received

A settlement with non-UK resident trustees has never been settlor interested and has never received any income. The following OIG amounts and capital gains have been received by the settlement:

	OIG amount	Chargeable gains
2008-09	£30,000	
2009-10		£40,000
2010-11	£50,000	£60,000

The first capital payment out of the settlement is made in 2010-11. That is a capital payment of £70,000 to a UK resident and domiciled beneficiary.

The HMRC analysis for 2010/11 is as follows:

Regulation 20(4) tells you that you match any capital payments with OIG amounts arising in the non-resident settlement before matching with chargeable gains. This applies even if the OIG amount arose in an earlier year than the capital gain.

Using the section 87A TCGA attribution rules the capital payment is matched first with the entire £50,000 OIG amount arising in 2010-11. Then the remaining £20,000 (£70,000 - £50,000) is matched with £20,000 of the £30,000 OIG amount arising in 2008-09.

The beneficiary is treated as receiving £70,000 offshore income gains chargeable to income tax in 2010-11.

There are two errors here:

- (1) HMRC have overlooked OIG s.731. In principle, the £30k OIG in 2008/09 is relevant income. The HMRC analysis is only correct if there are special circumstances which disapply OIG s.731, such as (1) the motive defence applies, or (2) if the beneficiary was resident but not ordinarily resident in the UK.
- (2) HMRC emphasise that the capital payment is matched with (1) the £50k OIG in 2010/11 and (2) £20k of the OIG in 2008/09. But it does not matter, as on the facts of the example, it makes no difference to which OIG the capital payment is matched. It matters for CGT chargeable gains, because of the interest surcharge, but that does not apply for OIG.

HMRC then turn to consider the position going forward:

There are unmatched OIG amounts and chargeable gains in the settlement to carry forward at 5 April 2011 of:

2008-09 OIG amount £10,000 (£30,000 less £20,000 matched with capital payment)

2009-10 Capital gains £40,000

2010-11 Capital gains £60,000.

The HMRC example is an easier case as there was one capital payment which was less than the total OIGs. Suppose there was more than one, and the total amount exceeded the OIGs. For instance, on the facts of the above example, and assuming (as do HMRC) that s.731 is not applicable, suppose in the same year but on different days:

Capital payment (1): £80k

Capital payment (2): £20k.

Does one say:

- (a) Capital payment (1) is matched with the OIG and capital payment (2) is matched with the CGT chargeable gains? or
- (b) Each capital payment is matched with 80% of the OIG and 20% of the CGT chargeable gains?

It is considered that solution (b) is correct. That is consistent with the rule for s.2(2) amounts (trust gains).

34.16.2 *Priority between OIG s.13 & TAA provisions: company not held by trust*

Suppose an OIG accrues to a non-resident company (the company not being held by a trust). This could give rise to a charge under OIG s.720 (on the transferor) and under OIG s.13 (on the participators), or at least it might not be clear which of the two charges applies.

It may not matter which applies, as the OIG is taxed at income tax rates in either event, but it could matter eg if the transferor is not the sole participator or if some exemption to s.13 is in point.

Regulation 21(3) OFTR deals with this but it needs to be read with reg.21(1) to follow the sense:

(1) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person...

(3) Paragraph (1) does not apply in relation to an offshore income gain if (and to the extent that) it is treated, by virtue of regulation 24 [OIG s.13], as arising to a person resident or ordinarily resident in the UK.

In short, a s.13 OIG charge has priority over the OIG TAA provisions.

Regulation 24(7) OFTR provides:

To the extent that an offshore income gain is treated, by virtue of this regulation, as having accrued to any person resident or ordinarily resident in the UK, that gain shall not be deemed to be the income of any individual for the purposes of Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad).

34.16.3 *Priority between OIG s.13 and TAA provisions: company held by trust*

Suppose an OIG accrues to a company held by a settlor-interested trust. Suppose the company is within s.720. The trustees make a capital payment to a UK resident beneficiary. This could give rise to:

- (1) a charge under OIG s.720 on the transferor and
- (2) under OIG s.87 TCGA on the beneficiary, on the basis that the OIGs accrue to the trustees under s.13 and constitute OIG amounts which are matched to the capital payments.

Is relief available under reg. 24(7) OFTR? That provides:

To the extent that an offshore income gain is treated, by virtue of this regulation, as having accrued to any person resident or ordinarily resident in the UK, that gain shall not be deemed to be the income of any individual for the purposes of Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad).

One would have to argue that the gain accruing to the individual is the same gain as that accruing to the company. It is suggested that this is the case, since otherwise there would be a strange anomaly between this case and the simple case where the OIG accrues to the trust directly (without a company). The purpose of s.13 is to put the taxpayer in the same position as if there were no company.

34.17 Priority between OIG s.87 TCGA and OIG TAA provisions

Suppose an OIG accrues to a non-resident trust which makes a capital payment to a beneficiary. This could give rise to a charge under OIG s.87 TCGA and the TAA provisions, or at least it might not be clear which of the two applies.

It matters which applies because:

- (1) OIG s.87 TCGA qualifies for
 - (a) rebasing relief
 - (b) 2008 transitional relief.
- (2) Different remittance basis rules apply.

Regulation 21(5) deals with this but one first needs to read reg.21(4) OFTR which provides:

The following provisions apply if regulation 20 applies in relation to an offshore income gain (the “relevant offshore income gain”).

In short, the two provisions which follow – reg.21(5)(6) – apply where an OIG accrues to a non-resident trust.

Regulation 21(5) needs to be read with reg.21(1) to follow the sense:

(1) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person...

(5) If—

(a) by virtue of regulation 20 [OIG s.87 TCGA] an offshore income gain is treated as arising in a tax year to a person resident or ordinarily resident in the UK, and

(b) it is so treated by reason of the relevant offshore income gain (or part of it),

for that and subsequent tax years paragraph (1) does not apply in relation to the relevant offshore income gain (or that part).

In short, the OIG s.87 TCGA charge has priority over the TAA provisions if the OIG amount is matched to a capital payment to a *UK resident*. I refer to this provision as “**The OIG s.87 priority rule**”. This applies even if the s.87 OIG is matched to a remittance basis taxpayer and (un)taxed on the s.87 OIG remittance basis, because an OIG is nevertheless treated as arising to a UK resident.

The OIG s.87 priority rule applies for Chapter 2 of Part 13 of ITA 2007 but it is necessary to consider s.720 and s.731 separately.

34.18 Priority between OIG s.720 and OIG s.87

The following examples are based on this situation:

- (1) A non-resident settlor-interested trust is within s.720. The transferor/settlor (for the purposes of these examples the terms are interchangeable) is UK resident. The motive defence does not apply.
- (2) The trust has realised an OIG in year 1 of £1m.
- (3) The trust has no relevant income.

Example 1

The trustees make no capital payment to any beneficiary in the year that the OIG accrues.

The settlor as transferor is taxed on the OIG under OIG s.720 (subject to the s.720 remittance basis if applicable).

Regulation 21(6) OFTR prevents a double charge to tax under OIG s.87 TCGA, if there is a capital payment in a subsequent tax year. It provides:

If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year, the OIG amount in question must be reduced (with effect from the following tax year) by the amount of the income.

Example 2

The trustees make a capital payment of £1m to the settlor in year 1.

The settlor is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis).

The TAA provisions are disapplied for OIG because the OIG s.87 priority rule applies.

It may make no difference whether it is OIG s.720 or OIGs.87 which is used to tax the settlor but it may matter for the following reasons:

- (1) rebasing relief
- (2) 2008 transitional relief
- (3) mixed fund rules.

Example 3

The trustees make a capital payment of £1m to a UK resident beneficiary (not the settlor) in year 1.

The beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis).

The TAA provisions are disapplied because the OIG s.87 priority rule applies.

So the result of the capital payment is to shift the tax charge from the settlor to the beneficiary. This would be particularly important if the beneficiary was a remittance basis taxpayer and the settlor was not. In such a case a capital payment to the beneficiary would save tax. The capital payment also affects the quantum of the charge if rebasing relief applies or 2008 transitional relief.

Planning for trust within s.720 which realises an OIG

In short, where an OIG arises to a trust within s.720, it is advantageous for the trustees to make a capital payment equal to the OIG amount if:

- (1) the settlor is not a remittance basis taxpayer and the a beneficiary is a remittance basis taxpayer; or
- (2) if rebasing relief or 2008 transitional relief applies.

This planning point will often require a distribution to be made in the year that the OIG arises. The sum distributed need not be the proceeds representing the OIG. Other capital payments (eg the use of living accommodation) may suffice as that capital payment may be matched with the OIG.

If there is no time to make a payment in the form of a bank transfer, a resolution of the trustees to exercise their power to make a distribution will suffice. If the figures are not available, a resolution to distribute an amount equal to the offshore income gains will suffice. In order to make a distribution, it may be necessary to make a deed of appointment, or obtain consent of a protector: that depends of course on the terms of the trust.

34.18.1 *Priority between OIG s.731 and OIG s.87 TCGA over same OIG*

I turn to consider whether OIG s.87 TCGA takes precedence over OIG s.731.

The effect of the OIG s.87 priority rule is that if the OIG amount is matched to a capital payment to a UK resident then:

- (1) an OIG is treated as arising in the year to that beneficiary and
- (2) this disapplies OIG s.731.

In this situation, the OIG s.87 TCGA charge has priority over OIG s.731. This applies even if the OIG s.87 TCGA charge is (un)taxed on the s.87 OIG remittance basis because the s.87 OIG is nevertheless treated as arising.

Examples

The following examples are based on this situation:

- (1) A non-resident trust is within s.731 (UK resident beneficiaries) but not within s.720 (transferor has no power to enjoy or is not UK resident.) The motive defence does not apply.
- (2) The trust has realised an OIG in year 1 of £1m.
- (3) The trust has no relevant income (leaving aside the OIG).

Example 1

The trustees make a capital payment of £1m to a UK resident beneficiary in year 1.

The beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis).

The TAA provisions are disapplied, ie, the OIG does not become relevant income for s.731.

Example 2

(1) The trustees make no capital payment in year 1.

No-one is subject to tax in year 1 as:

- (a) OIG s.87 TCGA only applies if there is a capital payment.
- (b) OIG s.731 only applies if there is a benefit (which means (more or less) the same as a capital payment).

(2) The trustees make a capital payment of £1m to a UK resident beneficiary in year 2.

The beneficiary is taxed on the capital payment under OIG s.87 TCGA (subject to the s.87 OIG remittance basis). The beneficiary is not taxed under OIG s.731 as the OIG s.87 priority rule applies.

I have considered whether reg. 21(6) OFTR overrides this rule. Reg 21(6) OFTR provides:

If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year, the OIG amount in question must be reduced (with effect from the following tax year) by the amount of the income.

Does this apply in year 1? Only if *income is treated under Chapter 2 of Part 13 of ITA as arising in year 1*. Chapter 2 part 13 uses the expression

income is treated as arising in s.731 (income treated as arising to a non-transferor) and in s.720 (income treated as arising to a transferor). However these sections do not apply in year 1. So reg.21(6) does not apply.

I have considered the argument that income is treated as arising in year 1 to the *person abroad* (the OIG) because of reg.21(1). But this is not correct, for such income is not treated as arising under Chapter 2 Part 13. This is confirmed, I think, by reg. 21(2) OFTR which uses the expression “treated as arising” where the reference is clearly to income treated as arising to the transferor under s.720 or to a beneficiary under s.731.

It follows that if capital payments are made only to UK resident beneficiaries, they are all taxed under OIG s.87 TCGA and not OIG s.731.

Example 3

(1) Year 1: The trustees make a capital payment of £1m (ie an amount equal to the OIG) to a non-resident beneficiary

No-one is subject to tax in year 1 as OIG s.87 TCGA and OIG s.731 only apply if there is a capital payment or benefit to a UK resident beneficiary.

(2) Year 2: The trustees make a capital payment of £1m to a UK resident beneficiary.

- (a) The beneficiary is not taxed on the capital payment under OIG s.87 TCGA because the trust’s OIG amount is matched to the capital payment in year 1.
- (b) If there is relevant income, the beneficiary is taxed under OIG s.731 as the OIG s.87 priority rule does not apply. However the payment to the non-resident may have distributed the relevant income, in which case there is no OIG s.731 charge.

34.18.2 OFM example: OIG s.87 TCGA: 2008 transitional relief

The OFM provides:

OFM15650 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of non-UK domiciled beneficiary not chargeable on offshore income gain arising prior to 6 April 2008 [January 2012]

Example showing how a UK resident but non-UK domiciled beneficiary may not be chargeable to tax on an offshore income gain arising in a non-resident settlement prior to 6 April 2008 –

paragraph 100 Schedule 7 FA 2008**Example of effect of paragraph 100 Schedule 7 FA 2008**

A settlement with non-UK resident trustees has never been settlor interested. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any chargeable gains.

The non-resident company held a material interest in an offshore fund. When that was disposed of in 2005-06 an OIG amount of £60,000 arose. The first capital payments to beneficiaries were made in 2010-11 which were:

£40,000 to a UK resident and domiciled beneficiary

£40,000 to a UK resident but non-UK domiciled beneficiary

£40,000 to a non-UK resident beneficiary.

The HMRC analysis is as follows:

There is a matching of £20,000 of each of these capital payments with the 2005-06 OIG amount. Each beneficiary has £20,000 of offshore income gain attributed to them via section 87 TCGA rules. There are no unmatched OIG amounts to carry forward within the non-resident settlement structure.

The UK resident and domiciled beneficiary is chargeable to income tax in 2010-11 on the £20,000 offshore income gain attributed to them.

The UK resident but non-UK domiciled beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them. This is because the OIG amount used in the section 87 matching process arose before 6 April 2008 - paragraph 100(2)(b) Schedule 7 FA 2008.

The non-UK resident beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them.

There are unmatched capital payments of £20,000 to each beneficiary to carry forward at 5 April 2011.

What is the position for OIG s.731? Para 21(5) OFTR (The OIG s.87 priority rule) provides:

If—

- (a) by virtue of regulation 20 [OIG s.87 TCGA] an offshore income gain is treated as arising in a tax year to a person *resident or ordinarily resident in the UK*, and
- (b) it is so treated by reason of the relevant offshore income gain (or part of it),

for that and subsequent tax years paragraph (1) does not apply in relation to the relevant offshore income gain (or that part).

Of the £60k OIG, only £40k is treated as arising to persons resident in the UK, so one might think that £20k remained as relevant income, taxable on the UK resident beneficiaries. That is a surprising result, for contrast the situation where the same payments are made to the UK beneficiaries and no payment to the non resident. The UK domiciled resident is taxed on £30k and the foreign domiciled resident is not taxed. It seems strange if the tax should be more because of the payment to the non-resident. The author of the OFM presumably thought so. Presumably the reason is that the payment to the non-resident is regarded as distributing the relevant income.

The same point applies to the next example.

34.18.3 *OFM example: non-settlor interested trust; OIG s.87 rebasing relief*

The OFM provides:

OFM15660 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of effect of ‘rebasings’ election [January 2012]

Example showing how a UK resident but non-UK domiciled beneficiary may benefit from a ‘rebasings’ election – paragraph 101 Schedule 7 FA 2008

Example of effect of ‘rebasings’ election - paragraph 101 Schedule 7 FA 2008

A settlement with non-UK resident trustees is settlor interested because the settlor can benefit. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any chargeable gains. The trustees have made a ‘rebasings’ election under paragraph 126 Schedule 7 FA 2008.

The non-resident company purchased a material interest in an offshore fund in 2000-01. This is disposed of in 2010-11 resulting in an OIG amount of £60,000. The post 5 April 2008 element of that OIG amount is £15,000.

The first capital payments made to beneficiaries were made in 2010-11. They were:

£40,000 to a UK resident and domiciled beneficiary

£40,000 to a UK resident but non-UK domiciled beneficiary

£40,000 to a non-UK resident beneficiary.

The HMRC analysis is as follows:

There is a matching of £20,000 of each of these capital payments with the 2010-11 OIG amount. Each beneficiary has £20,000 of offshore income gain attributed to them via section 87 TCGA rules. There are no unmatched OIG amounts to carry forward within the non-resident settlement structure.

The UK resident and domiciled beneficiary is chargeable to income tax in 2010-11 on the £20,000 offshore income gain attributed to them.

The UK resident but non-UK domiciled beneficiary (where the remittance basis is used) is only chargeable to income tax on £5,000 (£20,000 × £15,000/£60,000) of the £20,000 offshore income gain attributed to them. That is the post 5 April 2008 element of the £20,000 offshore income gain attributed to them. This is by virtue of paragraph 101 Schedule 7 FA 2008.²²

The non-UK resident beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them.

There are unmatched capital payments of £20,000 to each beneficiary to carry forward at 5 April 2011.

34.18.4 *OFM example: OIG s.720: loss of rebasing relief*

The OFM provides:

OFM15670 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of ‘rebasing’ election having no effect [January 2012]

Example showing how a UK resident but non-UK domiciled beneficiary may not benefit from a ‘rebasing’ election – paragraph 101 Schedule 7 FA 2008

Example of ‘rebasing’ election having no effect - paragraph 101 Schedule 7 FA 2008

This example has similar facts as that in OFM15650 with the exception that capital payments are not made to beneficiaries until a year after that in which the OIG amount arises in the offshore trust structure. In such a case there may be no benefits of a ‘rebasing’ election to a non-UK domiciled beneficiary in respect of any offshore income gain attributed to them.

22 [Author’s note:] it is assumed that the remittance basis does not apply.

A settlement with non-UK resident trustees is settlor interested because the UK resident and ordinarily resident, but non-domiciled, settlor can benefit. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any capital gains. The trustees have made a 'rebasing' election under paragraph 126 Schedule 7 FA 2008.

The non-resident company purchased a material interest in an offshore fund in 2000-01. This is disposed of in 2010-11 resulting in an OIG amount of £60,000. The post 5 April 2008 element of that OIG amount is £15,000.

The first capital payments made to beneficiaries were made in 2011-12. They were:

- £40,000 to a UK resident and domiciled beneficiary
- £40,000 to a UK resident but non-UK domiciled beneficiary (who was also the settlor)
- £40,000 to a non-UK resident beneficiary.

In 2010-11 there have been no capital payments in that year, or earlier years, to beneficiaries. So there can be no attribution of the OIG amount to beneficiaries under the section 87 attribution rules in regulation 20. We then have to consider if there can be an attribution under the transfer of assets rules in regulation 21 for 2010-11. The entire £60,000 OIG amount can be attributed to the settlor as an offshore income gain for that year. The non-UK domiciled settlor is chargeable to income tax in 2010-11 on the £60,000 offshore income gains attributed to them, subject to any remittance basis considerations. The 'rebasing' election has no effect on the amount chargeable to income tax as the attribution has not been made via the section 87 attribution rules.

The OG amount is reduced to Nil (regulation 21(6)). There are no unmatched OIG amounts to carry forward to 2011-12. There is nothing to match with the capital payments made in 2011-12 so the full amount of those payments are unmatched capital payments to carry forward at 5 April 2012.

Was this result intended in 2008? Since HMRC gave no indication of their thinking, it is hard to tell.

34.19 Interaction of OIG s.87 TCGA and OIG TAA provisions where motive defence applies

EN FB 2008 provides:

46. Offshore income gains that are not matched in that year [the year

they arise] will be chargeable to tax by reason of the provisions relating to the transfer of assets abroad legislation in Chapter 2 of Part 13 of the Income Tax Act 2007. *There is an exception to this rule where the motive or purpose defence in sections 736 to 742 applies to the gain.*

The legislation has not however achieved this result. Regulation 21(6) disapplies OIG s.87 TCGA:

If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year,...

We must ask whether “income is treated under Chapter 2 of Part 13 of ITA 2007 as arising” if the motive defence applies. In fact even where the motive defence does apply, income is treated as arising *to the person abroad*. Regulation 21(1) OFTR provides:

Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.

But reg.21(6) is perhaps intending us to ask if income is treated as arising *to the transferor or to a non-transferor* under s.720 or s.731. Section 739(2) ITA provides the relief where the motive defence applies to pre-2006 transactions:

An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.

Section 737(2) ITA is identically worded for post-2006 transactions. Now, even though the individual is not liable for IT, the terms of reg.21(6) are still satisfied: “income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year” even if the individual is not liable for income tax on that income. The result is not absurd, especially since the motive defence may be retrospectively lost by a tainted associated operation.

A court may find this too literal an approach. But as the legislation becomes more and more complex (and the OFTR is as complex as tax can get), it is less and less appropriate to apply anything but a literal

interpretation to find what it means.

34.20 Computation of OIGs

Regulation 38 OFTR provides:

- (1) An offshore income gain arises to a person on the disposal of an asset if a basic gain arises on the disposal.
- (2) The disposal gives rise to an offshore income gain of an amount equal to the basic gain on the disposal.
- (3) The following provisions of this Chapter explain how the basic gain is computed.

34.20.1 “Basic gain”

So we move on to reg.39(1) OFTR:

In the case of a participant chargeable to income tax,²³ the basic gain is a gain of the amount which would be the gain on that disposal for the purposes of TCGA 1992 if the gain were computed without regard to any charge to income tax arising under this Part.

The amount of the “basic gain” is the same as the amount of a CGT chargeable gain would be had the asset not been an offshore fund.

There is no relief for tax credits or foreign tax paid by the offshore fund (except that such tax reduces the value of the fund and so reduces the OIG). But this is also the case for CGT.

Regulation 39(3) flags up eight special cases:

The computation of the basic gain is subject to—

- (a) regulation 34 (provisions applicable on death);²⁴
- (b) regulation 35 (application of section 135 of TCGA 1992);
- (c) regulation 36 (application of section 136 of TCGA 1992);
- (d) regulation 37 (exchange of interests of different classes);
- (e) regulation 40 (earlier disposal to which the no gain/no loss basis applies);
- (f) regulation 41 (modifications of TCGA 1992);

²³ Also see 34.20.2 (Computation of OIGs for company within corporation tax).

²⁴ See 34.5 (Death of individual).

- (g) regulation 42 (losses);
- (h) regulation 43 (special rules for certain existing holdings).

In these cases the amount of the OIG may exceed the basic gain.

I do not discuss regulations 35-37.

Regulation 41(1) disappplies rollover relief:

If the disposal forms part of a transfer to which section 162 of TCGA 1992 (roll-over relief on transfer of business) applies, the basic gain arising on the disposal is computed without regard to any deduction which falls to be made under that section in computing a chargeable gain.

It would be a rare case where rollover relief would be in point.

Regulation 41(2) OFTR disappplies holdover relief:

If the disposal is made otherwise than under a bargain at arm's length and a claim for relief is made in respect of that disposal under section 165 or 260 of TCGA 1992 (relief for gifts), the claim does not affect the computation of the basic gain arising on the disposal.

34.20.2 *Computation of OIGs for company within corporation tax*

For completeness: reg.39(2) OFTR provides:

In the case of a participant chargeable to corporation tax, the basic gain is a gain of the amount which would be the gain on that disposal for the purposes of TCGA 1992 if the gain were computed—

- (a) without regard to any charge to corporation tax arising under this Part, and
- (b) without regard to any indexation allowance on the disposal under TCGA 1992.

Separate provision is needed to disapply the indexation allowance (which is available to companies but not to individuals).

Regulation 40 OFTR prevents indexation relief creeping in by the back door:

- (1) This regulation applies if—
 - (a) a participant is chargeable to corporation tax, and
 - (b) the amount of any chargeable gain or allowable loss which

would arise on the disposal would fall to be computed in a way which, in whole or in part, would take account of the indexation allowance on an earlier disposal to which section 56(2) of TCGA 1992 (disposals on a no gain/no loss basis) applies.

- (2) The basic gain on the disposal is computed as if—
 - (a) no indexation allowance had been available on any such earlier disposal, and
 - (b) subject to that, neither a gain nor a loss had arisen to the person making such an earlier disposal.

34.21 Computation of CGT chargeable gain on disposal of offshore fund

A disposal for the purposes of the offshore funds rules is generally also a disposal for CGT.²⁵ The OFTR provides relief against a double charge. Regulation 44 sets the scene and provides terminology:

- (1) This Chapter applies if—
 - (a) a material disposal²⁶ gives rise to an offshore income gain, and
 - (b) that disposal also constitutes the disposal of the interest concerned for the purposes of TCGA 1992.
- (2) In this Chapter the disposal specified in paragraph (1)(b) is called the “TCGA disposal”.

Regulation 45 OFTR provides:

- (1) This regulation applies for the purposes of the computation of the chargeable gain arising on the TCGA disposal.
- (2) The provisions of this regulation have effect in relation to the TCGA disposal in substitution for section 37(1) of TCGA 1992 (deduction of consideration chargeable to tax on income).
- (3) In the computation of the gain arising on the TCGA disposal, a sum equal to the offshore income gain shall be deducted from the sum which would otherwise constitute the amount or value of the consideration for the disposal.

Regulation 45(2) disapplies s.37(1) TCGA which normally avoids a

²⁵ See 34.4 (Meaning of “disposal”).

²⁶ Defined in reg. 15 OFTR: “In these Regulations a ‘material disposal’ means a disposal to which this Part applies.” Since the expression “material disposal” is only used once in reg. 44, it could have been more concisely expressed, but the meaning is clear.

double charge of IT and CGT. In its place, reg45(3) introduces its own rules. I am not sure why, because s.37 would seem to have had the same effect.²⁷ I would be grateful to any reader who could explain.

34.21.1 *Part disposals*

Regulation 45(5)(6) OFTR deals with part disposals:

(5) Paragraph (6) applies if the TCGA disposal is of such a nature that, by virtue of section 42 of TCGA 1992 (part disposals), an apportionment falls to be made of certain expenditure.

(6) No deduction is to be made by virtue of paragraph (3) in determining the amount or value of the consideration for the purposes of the fraction in section 42(2) of TCGA 1992.

The OFM provides:

OFM18200 Investors in non-reporting funds: deduction of offshore income gains in computing capital gains: treatment of the disposal - general – Regulation 45 [January 2012]

Where there is a part-disposal so that section 42 of TCGA applies to determine the apportionment of acquisition costs to the disposal then the full amount of disposal consideration is taken into account for the purposes of the calculation required by that section – that is, the offshore income gain is not deducted from the disposal consideration for the purposes of calculating the part disposal fraction at section 42(2).

Why is that?

34.22 Losses

Regulation 42 OFTR provides:

(1) If the effect of any computation under regulations 39 to 41 would be to produce a loss, the basic gain on the disposal is nil.

²⁷ Section 37(1) TCGA provides: “There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money’s worth charged to income tax as income of, or taken into account as a receipt in computing income or profits or gains or losses of, the person making the disposal for the purposes of the Income Tax Acts.”

- (2) Paragraph (1) applies notwithstanding section 16 of TCGA 1992 (losses determined in like manner as gains).
- (3) Accordingly, for the purposes of these Regulations, no loss is to be treated as arising on the disposal.

An offshore income gain is charged to IT but where a loss arises on the disposal, there is no income tax relief.²⁸ The loss will be allowable for CGT if ordinary CGT principles permit. HMRC agree. The OFM provides:

OFM 09050 Investors in non-reporting funds: charge to tax on disposal of an interest: overview [January 2012]

...Losses

Where there is a loss on disposal then the gain for the purposes of tax on an offshore income gain is nil, that is there is no recognition of losses for the purposes of the regulations (regulation 42). Accordingly, in a case where there is also a disposal for the purposes of TCGA, any loss made (calculated in accordance with that Act) may be treated as a capital loss for the purposes of TCGA.

This means that remittance basis taxpayers and non-residents will generally have no loss relief.²⁹

The allowable loss (if there is one) is computed on CGT principles (not the OIG computation rules) but the amount is the same.

34.23 Exemptions

Chapter 3 part 2 OFTR set out 11 exemptions from the charge to tax on OIGs. The following are only mentioned here:

- (1) UK companies owning offshore funds which are:
 - (a) loan relationships (the loan relationship rules prevail)
 - (b) derivative contracts (the derivative rules prevail)
 - (c) intangible fixed assets (the intangible rules prevail)
- (2) Excluded indexed securities
- (3) Policies of insurance: the chargeable events regime prevails.
- (4) Trading stock
- (5) Exemption for insurance companies

28 Section 152(8) ITA prevents miscellaneous losses being set against OIGs.

29 See 51.1 (Capital losses).

- (6) Loan other than a participating loan
- (7) Transparent funds: see 34.24 (Exemption for transparent fund)
- (8) Transitional relief; see 34.31 (2009 Transitional rules)
- (9) Charities: see Kessler and Brown, *Taxation of Charities and Non-Profit Organisations*, (8th ed, 2011), para 3.12 (online version www.taxationofcharities.co.uk).

34.24 Exemption for transparent fund

Regulation 29 OFTR provides an exemption:

- (1) No liability to tax arises under regulation 17 if—
 - (a) the disposal is the disposal of an interest in an offshore fund falling within paragraph (b) or (c) of section 40A(2) of FA 2008 [now s.355 TIOPA]³⁰, and
 - (b) the fund is a transparent fund.This is subject to paragraphs (2) and (3).

The regulation continues with two exceptions:

- (2) But there is a charge to tax under regulation 17 if—
 - (a) there is a disposal of an interest in a transparent fund, and
 - (b) during a period beginning with the date the interest (or any part of it) was acquired and ending with the date of the disposal, the offshore fund has at any time held interests in other non-reporting funds which amounted in total to more than 5% by value of the offshore fund's assets.
- (3) And there is a charge to tax under regulation 17 if—
 - (a) there is a disposal of an interest in a transparent fund,
 - (b) the fund is a non-reporting fund, and
 - (c) the fund fails to make sufficient information available to participants in the fund to enable those participants to meet their tax obligations in the UK with respect to their shares of the income of the fund.
- (4) If, on the disposal by an offshore fund of an interest in another non-reporting fund, no liability would arise under regulation 17 by virtue of this regulation, that interest is not taken into account for the purposes of paragraph (2)(b).

30 See 33.3.1 (Basic definition). The wording makes sense, as a fund within para (a) of the section cannot be a transparent fund, but it could have been more simply drafted.

The OFM provides:

OFM16500 Investors in non-reporting funds: exceptions to the charge to tax: interests in certain transparent funds - Regulation 29
[January 2012]

... Other types of arrangements that are transparent for income purposes but not transparent for capital gains purposes (Section 99 and 103A TCGA - see OFM07000 onwards) such as, for example, certain unit trusts (following the case of *Archer-Shee v Baker*) or certain foreign contractual arrangements (such as Fonds Commun de Placement (“FCPs”)) fall within the definition of an offshore fund. They are therefore subject to the Offshore Funds (Tax) Regulations 2009 (SI2009/3001) generally, with certain modifications as described below. The purpose of the offshore fund regime is to ensure that income cannot be rolled up free of tax, with any subsequent gain on disposal being charged only as a capital gain. If a fund is transparent for income, such as would be the case for certain unit trusts and contractual funds, then any income arising to the fund is treated as arising to an investor in proportion to his rights. This means that income is charged to tax as it arises.

However, it might be the case that an income transparent fund that came within paragraph (b) or (c) of section 355(1) of TIOPA 2010 itself invested in a non-reporting fund, and if that were the case then income could be rolled up in the underlying fund, because income would only be credited to the top fund if it was distributed.

In order to prevent unnecessary administrative burdens for transparent arrangements coming within the definition of an offshore fund and for their investors, any gain on disposal of an interest in an income transparent offshore fund will not be taxed as an offshore income gain unless -

- during a period beginning on the date the interest (or any part of it) was acquired and ending on the date of the disposal, the offshore fund at any time held interests in other non-reporting funds (except for certain other transparent funds (see below) which amounted in total to more than 5% by value of the offshore fund’s assets (Regulation 29(2)), or
- the transparent fund is a non-reporting fund, and the fund fails to make sufficient information available to participants in the fund to enable those participants to meet their tax obligations in the United Kingdom with respect to their shares of the income of the fund (Regulation 29(3)).

Whilst this does mean that such ‘special category’ funds will have to

monitor their underlying investments, it allows such funds to avoid the need to apply for reporting fund status. UK investors will be charged capital gains tax or corporation tax on a capital gain arising, rather than incurring an offshore income gain, provided the fund has complied with Regulation 29(2)).

It follows that if a transparent offshore fund is invested by more than 5% by value of its total investments in non-reporting non-transparent funds it may apply for reporting fund status in order to allow UK investors to be charged to tax on capital gains on disposal rather than to an offshore income gain. If reporting fund status is granted then the fund will be subject to the requirements of the regulations, including those relating to the calculation of income from non-reporting funds (see regulations 69 to 71).

Provision of 'sufficient information' to participants - Regulation 29(3)

If a fund is unable to provide sufficient information to its UK investors to enable them to meet their UK tax obligations then an offshore income gain will be charged on any gains realised on subsequent disposals of relevant interests. The provision of 'sufficient information' would include details of an investor's proportionate share of both income arising to the fund and reported income or offshore income gains arising to it, as well as confirmation as to whether or not the fund has invested more than 5% by value of its assets in non-reporting funds.

In practice, many existing income transparent funds with UK investors already provide vouchers to those clients detailing income arising to the fund, for example interest income, and foreign or UK dividends.

HMRC consider that, for the purposes of regulations 29 and 92D only, sufficient information will have been provided by the fund to a UK investor if the information provided would enable the UK investor to compute their final UK tax liability (arising from their interest in the offshore fund) correctly.

UK investors will still be required to complete their tax returns in the required format under self-assessment. For example a unit holder would need to know whether the source of their income is land and property income, trading income, interest, UK dividends, foreign dividends etc. Where transparent funds have complex structures and a number of sources of income, this can lead to complex tax issues arising for an individual completing their tax return.

Some UK investors may be able to sidestep the requirement to disclose details of whether dividends are UK or foreign sourced. This may be the case if the unit holder is entitled to total dividends of less than £300 and ticks the appropriate box on their self assessment return.

If in the course of an enquiry into a UK investor, it is asserted that

‘sufficient information’ had not been provided by the fund to a UK investor, the caseworker should contact the CISC team (See OFM01000) as this could have an impact on other UK investors in the same fund.

Investments by transparent non-reporting funds in other transparent non-reporting funds - Regulation 29(4)

There is one important relaxation to the requirements of regulation 29(2). That is, if a transparent non-reporting fund (“TNRF1”) invests in another TNRF (TNRF2) then, where a disposal of an interest in TNRF2 would not itself give rise to an offshore income gain (under regulation 17) for a UK investor, the interest held by TNRF1 in TNRF2 is ignored in determining whether TNRF1 is invested in non-reporting funds by more than 5% of the value of its assets in total. This is because in such circumstances there can be no significant roll-up of income in the underlying fund(s).

This means that a TNRF’s investments could, for example, consist wholly of interests in other underlying TNRFs that themselves held only, say, UK property. Or, a TNRF could be the top layer fund in a fund of funds structure with multiple layers of other TNRFs below the top fund, provided that each of those underlying TNRFs themselves did not hold more than 5% by value of their assets in total in other non-transparent, non-reporting funds.

In deciding whether the investee fund qualifies under this regulation this rule may be applied to the investee fund and to any funds in which it, in turn, holds investments.

34.25 Distributed income of offshore fund

In the absence of express provision, the taxation of distributed income of reported funds would depend on the nature of the fund:

- (1) Distributions from corporate funds would be taxed as dividends.
- (2) Distributions from transparent funds would be taxed as the income of the underlying assets.
- (3) Distributions from non-transparent non-corporate funds (ie non-transparent unit trusts) would be taxed as annual payments.

In each case the income will be RFI and so can qualify for the remittance basis.

34.25.1 Bond Funds

The first dent in this position is s.378A ITTOIA which reclassifies some distributions as interest:

- (1) This section applies where—
 - (a) a dividend³¹ is paid by an offshore fund, and
 - (b) the offshore fund fails to meet the qualifying investments test at any time in the relevant period.³²
- (2) The dividend is treated as interest for income tax purposes.

Section 378A(3) defines the qualifying investments test:

(3) For the purposes of this section, an offshore fund fails to meet the qualifying investments test if the market value of the fund's qualifying investments exceeds 60% of the market value of all of the assets of the fund (excluding cash awaiting investment)...

"qualifying investments" has the meaning given in section 494 of CTA 2009.

I refer to offshore funds within s.378A as "**bond funds**". EN FA 2009 explains:

Certain distributions from offshore funds are economically similar to payments of yearly interest. Clause 39, from 22 April 2009, charges distributions of this type to tax as if they were yearly interest.

... The test in subsection (3) is similar to that which applies to corporate investors for the purposes of the loan relationships legislation. (See sections 490 and 493 CTA 2009). A distribution is treated as interest if the offshore fund, at any time during the 'relevant period', holds more than 60 per cent of its assets in the form of qualifying investments. The definition of a qualifying investment is set out in section 494 CTA 2009

31 Defined in s378A(7):

"In this section—

"dividend" includes any distribution that (but for this section) would be treated as a dividend for income tax purposes".

32 Defined in s.378A(4)(5):

(4) "The relevant period" means—

- (a) the relevant period of account of the offshore fund, or
- (b) if longer, the period of 12 months ending on the last day of that period.

(5) "The relevant period of account" means—

- (a) the last period of account ending before the dividend is paid, in a case in which the profits available for distribution at the end of that period (and not used since then by distribution or otherwise) equal or exceed the amount of the dividend (aggregated with any other distribution made by the offshore fund at the same time), and
- (b) the period of account in which the dividend is paid, in any other case.

and, in summary, refers to interest bearing and economically similar investments.

... The purpose of the clause is to prevent a tax advantage being gained by holding interest bearing assets within an offshore fund structure....

From 22 April 2009, where a distribution from an offshore fund takes the form of a dividend the rate will be the dividend tax rate after taking into account the dividend tax credit. However, where the offshore fund is substantially invested in interest bearing, or economically similar, assets as described in paragraph 4 above then any distribution will be treated as interest for income tax purposes.

34.26 Undistributed income of reporting funds (deemed RF income)

In the absence of express provision, undistributed income of offshore funds would not be subject to tax. However the OFTR alters that. The legislation distinguishes between three types of funds:

- (1) Non-transparent funds:
 - (a) corporate funds (corporate funds cannot be transparent)
 - (b) non-corporate non-transparent funds
- (2) Transparent funds.

34.26.1 Meaning of “transparent”

Regulation 11 OFTR provides:

For the purposes of these Regulations a fund is a “transparent fund” if, in the case of holders of interests in the fund who are individuals resident in the UK, any sums which form part of the income of the fund are of such a nature that those holders—

- (a) are chargeable to tax under a provision specified in section 830(2) of ITTOIA 2005 in respect of such of those sums as are referable to their interests, or
- (b) if any of that income is derived from assets within the UK, would be so chargeable had the assets been outside the UK.

What is the purpose of (b)?

34.26.2 Undistributed income of non-transparent funds

Regulation 94(1) OFTR provides:

In the case of a reporting fund which is not a transparent fund, the Tax Acts have effect as if the excess (if any) of the reported income of the fund in respect of a reporting period over the distributions made by the fund in respect of the reporting period were additional distributions made to the participants in the fund in proportion to their rights.

I refer to this as “**deemed RF income**”. Reg.94(3) identifies the date and recipient of deemed RF income:

The excess specified in paragraphs (1) and (2) is treated as made, on the fund distribution date,³³ to participants holding an interest in the fund at the end of the reporting period.

The OFM provides:

OFM27200 Reporting funds: tax treatment of participants in reporting funds: general provisions - Regulation 94 [January 2012]
...Where an investor holds some interests that are grandfathered (as a result of regulation 30) and some that are not, the excess specified in regulation 94 is reduced proportionately.

34.26.3 *Corporate funds*

Regulation 95 OFTR provides:

- (1) This regulation applies if—
 - (a) a reporting fund makes a distribution to a participant chargeable to income tax in respect of a reporting period, and
 - (b) the fund falls within section 40A(2)(a) of FA 2008.

That is, the regulation applies to corporate reporting funds.

- (2) This regulation also applies if some or all of the excess specified in regulation 94(1) is treated as made by such a fund to such a participant.
- (3) If section 378A of ITTOIA 2005 (offshore fund distributions) applies to any amount falling within paragraph (1) or (2), the amount is

33 This term is defined in reg.94(4) OFTR:

In these Regulations the “fund distribution date” for a reporting period of a reporting fund means the date six months following the last day of the reporting period.

charged to income tax in accordance with that section.

This does not seem to need saying for distributed income, but it is necessary to classify deemed RF income as interest. So deemed RF income of bond funds is “treated as interest for income tax purposes.” If the recipient is a remittance basis taxpayer, this type of income qualifies for the remittance basis, just like ordinary interest.

What about deemed RF income of corporate non-bond funds? This is treated as “distributions” so it is treated as a dividend. Reg.54, 95(4) assumes this and confers the right to tax credits as other dividends:

(4) If paragraph (3) does not apply to any amount falling within paragraph (1) or (2), but the participant is entitled to a tax credit on receiving a distribution falling within paragraph (1), section 397A of ITTOIA 2005 (savings and investment income: dividends from non-UK resident companies) also applies to the excess falling within paragraph (2).

This income qualifies for the remittance basis just as ordinary dividends. HMRC agree. The OFM provides:

OFM13400 Investors in non-reporting funds: income & distributions: the charge to tax: remittance basis [January 2012]

Where an investor in a (non-transparent) non-reporting offshore fund is taxed on the remittance basis then the remittance basis rules apply to income arising from the holding in that fund as they apply to other income from non-UK sources.

Where the fund is transparent for tax-purposes, then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.

34.26.4 *Non-corporate non-transparent funds*

Regulation 96 OFTR provides:

- (1) This regulation applies if—
 - (a) a reporting fund makes a distribution to a participant chargeable to income tax in respect of a reporting period,

- (b) the fund falls within paragraph (b) or (c) of section 40A(2) of FA 2008, and
- (c) the fund is not a transparent fund.
- (2) This regulation also applies if some or all of the excess specified in regulation 94(1) is treated as made by such a fund to such a participant.
- (3) Any amount to which paragraph (1) or (2) applies is charged to income tax—
 - (a) under section 378A of ITTOIA 2005 (offshore fund distributions), or
 - (b) (if that section does not apply) under Chapter 8 of Part 5 of ITTOIA 2005 (miscellaneous income: income not otherwise charged) for the year of assessment in which the distribution is made ...

This does not apply to a non-resident participant as such a person is not chargeable to income tax.

Regulation 96(3) continues:

but sections 688(1) and 689 of ITTOIA 2005 (income charged and person liable) do not apply.

The disapplied sections would have provided:

688 (1) *Tax is charged under this Chapter on the amount of the income arising in the tax year.*

(2) *Subsection (1) is subject to—*

- (a) *Chapter 1 of Part 7 (which provides relief on income from the use of furnished accommodation in an individual's only or main residence: see, in particular, sections 794 and 798),*
- (b) *Chapter 2 of that Part (which provides relief on income from the provision by an individual of foster care: see, in particular, sections 814 and 817), and*
- (c) *Part 8 (foreign income: special rules).*

689 *The person liable for any tax charged under this Chapter is the person receiving or entitled to the income.*

34.26.5 HMRC views

HMRC agree. The OFM provides:

OFM27310 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: corporate

funds - Regulation 95 [January 2012]

Where a reporting fund takes corporate form, any sums distributed together with any excess of reported income will be treated as foreign dividends (unless the fund is a ‘bond fund’ – see below). Until 22 April 2009, dividends received from offshore funds did not carry any entitlement to a dividend tax credit but from that date they will do so unless the distribution is from a bond fund (section 378A ITTOIA 2005). Any sums treated as an excess of reported income also carry an entitlement to a foreign tax credit, unless the fund is a bond fund (regulation 95(4)).

Bond funds

From 22 April 2009 there is a change to the way dividends from offshore funds which are substantially invested in interest-bearing assets (commonly known as ‘bond funds’) are treated for tax purposes. Where an offshore fund holds more than 60% of assets in interest-bearing (or economically similar) form, any distribution or excess of reported income is treated as a payment of yearly interest (section 378A ITTOIA 2005 / regulation 95(3)). Such sums do not qualify for a dividend tax credit and the tax rates that apply are those applying to interest. Fund managers should be able to tell UK investors if a fund is a bond fund.

Remittance basis users

Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.

In the case of income that is reported but is not distributed then that income has not been remitted to the UK.

OFM15670 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: other non-transparent funds - Regulation 96 [January 2012]

Arrangements that are non-transparent for income purposes and that come within the definition of an offshore fund under section 355(1) TIOPA 2010 (that is, funds that do not take corporate form) will be foreign unit trusts. Foreign unit trusts that are not transparent for income purposes are sometimes referred to as ‘Garland’ unit trusts (following the case of *Garland v Archer-Shee* (15TC693)).

Non-transparent unit trusts

UK investors in foreign unit trusts that are non-transparent for income purposes are taxable on their proportionate share of income (as ascertained after the trustees have met the expenses of administering the trust) when it is indefeasibly allocated to them, regardless of whether the income is paid to them or accumulated. Unlike the position for transparent unit trusts, that income is taxable as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005) and the tax rates

applying will be those applying to such income.

If there is an excess of reported income over the amount allocated (for example if the unit trust has invested in another reporting fund and has itself received reports of income which was not actually distributed to it) then the excess must be treated by the participant in the same way as the allocated income (that is as miscellaneous foreign income (under Chapter 8 of Pat 5 of ITTOIA 2005)).

Remittance basis users

Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.

In the case of income that is reported but is not distributed then that income has not been remitted to the UK.

OFM27330 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: transparent funds [January 2012]

...Income: UK tax treatment of investors

No matter what the legal form of a transparent reporting fund, for UK tax purposes the income of an income transparent fund is treated as arising directly to its investors (UK investors are charged to tax on income arising net of a deduction for proper expenses of the management of the fund in question, and this is the case for both unit trusts and contractual arrangements). So, for example, if a fund receives interest income then UK investors are charged to tax on their proportionate share of that income as it arises, irrespective of whether or not it is actually distributed to them. Investors should receive a “voucher” or other report from the fund to tell them what proportion of the fund’s income they are entitled to, and the split between interest, dividends, property income, etc. Investors should ask their fund manager for such a voucher or report if they do not receive one.

If a transparent reporting fund holds investments in other reporting funds then investors are also taxable on their proportionate share of any income reported but not actually distributed by the underlying fund (regulation 94(2)). This will become part of the excess to be reported by the transparent reporting fund. Such excess reported income is charged to tax as miscellaneous foreign income under Chapter 8 of Part 5 ITTOIA 2005 (regulation 97(2)), and it is chargeable at investors’ highest tax rate.

Remittance basis users

In a case where the reporting fund is transparent for UK tax purposes then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises

in the UK the remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.

OFM27400 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to corporation tax - Regulation 98 [January 2012]

Corporate investors in offshore funds will be chargeable to corporation tax on any distributions received from reporting funds under general principles, and on any excess of reported income of the fund invested in under regulation 94(1) and (2). Where such investors are taxable under regulation 94(1) on excess reported income, that amount will be treated as exempt if it would be exempt had it been an actual distribution.

The bond fund rules in Chapter 3 of Part 6 CTA 2009 (relationships treated as loan relationships) may apply if a reporting fund held more than 60% by value of its investments in debt type assets at any time during an investing company's accounting period – see the Corporate Finance Manual ('CFM').

34.26.6 *Can deemed RF income be remitted?*

Legislation frequently deems an individual to receive income or gains (eg deemed s.13 gains, deemed s.624 income, deemed s.720 income). In these cases the legislation always has a provision which deems some actual funds to be derived from the individual's deemed income. So if those actual income or gains are received by the individual (or a relevant person) there is a taxable remittance. In this case however there is no such provision. So it appears at first sight that the deemed RF income cannot be remitted. While the actual income in the hands of the offshore fund could be received in the UK, those funds do not derive from the deemed RF income. The deemed RF income perhaps derives from those funds.

This does lead to a result that might be thought too good to be true. So it is more than possible that a court might read in an implied provision that the actual income of the offshore fund is derived from the deemed RF income, though that verges on legislation rather than construction.

HMRC may not agree. The OFM provides:

OFM27950 Reporting funds: tax treatment of participants in reporting funds: remittance basis [January 2012]

Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.

In the case of income that is reported but is not distributed then that income has not been remitted to the UK.

Transparent Funds

In a case where the reporting fund is transparent for UK tax purposes then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.

Disposals

The proceeds of a disposal of a reporting fund will normally constitute a 'mixed fund' for the purposes of the remittance basis rules. This is because the proceeds may have been funded by undistributed reported income as well as by the original investment and any capital growth.

34.27 Transparent funds

Regulation 97 OFTR provides:

- (1) This regulation applies if—
 - (a) a reporting fund is a transparent fund, and
 - (b) some or all of the excess specified in regulation 94(2) is treated as income of a participant by virtue of that provision.
- (2) Any amount to which paragraph (1) applies is charged to income tax under Chapter 8 of Part 5 of ITTOIA 2005 as relevant foreign income within the meaning given by section 830 of ITTOIA 2005 for the year of assessment in which the distribution is made, but sections 688(1) and 689 of ITTOIA 2005 do not apply.

34.28 Non-reporting fund with interest in reporting fund

Regulation 16 OFTR provides:

- (1) This regulation applies if a non-reporting fund which is a transparent fund has an interest in a reporting fund.
- (2) In the case of any excess specified in regulation 94(1) or (2) which is treated, under that regulation, as made to the non-reporting fund, the Tax Acts have effect as if the excess were additional income of the participants in the non-reporting fund in proportion to their rights.
- (3) The additional income is treated as arising on the same date as the excess is treated as made to the non-reporting fund.
- (4) If a participant in the non-reporting fund is chargeable to income tax,

the additional income is charged as relevant foreign income within the meaning given by section 830 of ITTOIA 2005.

The OFM provides:

OFM13200 Investors in non-reporting funds: distributions: the charge to tax: 'transparent' funds [January 2012]

... Transparent non-reporting funds with interests in reporting funds (regulation 16)

There is a further point to consider with regard to transparent non-reporting funds that hold interests in reporting funds. That is, where the underlying reporting fund does not distribute all of its 'reportable income' (see OFM24000 and OFM27000 onwards) then the excess would, if a UK investor held a direct interest in the fund, be treated as income (regulation 94). To ensure that principle is maintained, regulation 16 provides that where the interest is held by a non-reporting fund which is transparent for income purposes then the reportable excess will be similarly treated as additional income in proportion to each investor's rights.

34.29 Fund transactions treated as non-trading

This topic is dealt with in chapter 6 part 3 OFTR. A full discussion needs a long chapter to itself. In short, reg.80 OFTR provides:

- (1) This regulation applies if a diversely owned fund carries out an investment transaction in an accounting period.
- (2) The investment transaction is treated as a non-trading transaction.

The consequence of non-trading status is that the profit of the transaction is not income and need not be distributed by reporting funds.

The definitions of diversely owned and investment transaction are not considered here. HMRC argue that reg.80 is not to be taken to mean what it says:

HMRC is aware that there has been recent industry speculation as to whether regulations contained within Chapter 6 of Part 3 of The Offshore Funds (Tax) Regulations 2009 (the 'regulations'), setting out when transactions by certain offshore 'reporting' funds are not treated as trading transactions for the purposes of computing 'reportable income', has any relevance to matters relating to the taxation of such funds potentially trading in the UK through a permanent establishment or agent. HMRC is therefore confirming that there is no such

relevance.

Regulation 80(2) of the regulations, which confirms that certain transactions are treated as non-trading transactions, applies only for the purposes of Chapter 5 of the regulations; that is for the purposes of computing an offshore fund's reportable income in order to establish the UK tax position of participants in the fund.

The regulations are made under powers enabling provision to be made about the tax treatment of participants in an offshore fund (section 41 FA 2008) and they should be read in that context. Specifically, the regulations do not make or purport to make rules that affect the taxation of any of the funds referred to therein as 'offshore funds'; only to regulate the taxation of the returns from those funds to persons taxable under UK legislation. Funds that are taxable in the UK are dealt with by other legislation.

It is a question of fact whether or not, for the purposes of that other legislation, a non-resident fund is carrying on a trade in the UK. Where such a fund is carrying on a trade in the UK through an investment manager operating here, the protection of the Investment Manager Exemption may be available in relation to any 'investment transaction' specified in the Investment Manager (Specified Transaction) Regulations 2009.³⁴

34.30 Conversion from non-reporting fund to reporting fund

Regulation 48 OFTR provides:

- (1) This regulation applies if an offshore fund ceases to be a non-reporting fund and becomes a reporting fund.
- (2) A participant in the fund may make an election to be treated—
 - (a) as disposing of the interest owned by the participant in the non-reporting fund at its market value on the disposal date, and
 - (b) as acquiring a holding in the reporting fund at the beginning of the reporting fund's first period of account.

This is subject to paragraph (5).

- (3) Chapter 5 of this Part applies to determine the offshore income gain arising on the deemed disposal referred to in paragraph (2)(a).
- (4) The deemed acquisition referred to in paragraph (2)(b) is treated as made for the same amount as the deemed disposal referred to in paragraph (2)(a).
- (5) An election may not be made under paragraph (2) unless the offshore income gain arising on the deemed disposal referred to in paragraph (2)(a) (determined in accordance with paragraph (3)) is greater than zero.

34 Accessible www.hmrc.gov.uk/ctsa/invest-man-exempt.htm published 2 Feb 2010.

(6) If the participant is chargeable to income tax, the election mentioned in paragraph (2) must be made by being included in a return made for the tax year which includes the disposal date.

(7) If the participant is chargeable to corporation tax, the election mentioned in paragraph (2) must be made by being included in the participant's company tax return for the accounting period which includes the disposal date.

(8) In this regulation—

“company tax return” has the same meaning as in Schedule 18 to the Finance Act 1998(a);

the “disposal date” means the final day of the last period of account before the fund becomes a reporting fund.

34.31 2009 transitional rules

I do not attempt to discuss transitional rules in detail.³⁵

Reg.30 OFTR provides:

(1) No liability to tax arises under regulation 17 in respect of any rights in an offshore fund to which this regulation applies if the rights are acquired by a person—

- (a) before 1st December 2009, or
- (b) in accordance with paragraph (2).

(2) Rights are acquired in accordance with this paragraph if—

- (a) the rights are acquired by the participant in accordance with a legally enforceable agreement in writing that was entered into by the participant before 30th April 2009,
- (b) in the case of an agreement which was conditional, the conditions are met before that date, and

³⁵ Note also the following HMRC statement: “HMRC regrets that ... the Statutory Instrument (SI 2009/3139) ... contained an error with respect to long periods of account.

The intention was that the transitional rules, which provide for an existing fund to apply for distributing status for periods ended on or after 1 December 2009, would not apply to any period ending after 31 May 2012 (not 2011 as provided for in the instrument).

The government intends to amend the cut-off date given in sub-paragraph 3(3B) of Schedule 1 to The Offshore Funds (Tax) Regulations (SI 2009/3001 as amended by SI 2009/3139) to read 31 May 2012.

This announcement therefore gives notice of the intended amendment, which will be made at the first convenient opportunity.”

- (c) the agreement is not varied on or after that date.
- (3) Rights of a person in a fund are rights in an offshore fund to which this regulation applies if, on the date on which the person acquired the rights, those rights did not constitute a material interest in an offshore fund within the meaning of that expression given by section 759 of ICTA.

Reg.43 OFTR provides for the case where a person holds an offshore fund before 2009 and purchases more of the same fund:

- (1) This regulation applies if—
 - (a) a person acquired rights (the “protected rights”) in an offshore fund—
 - (i) before 1st December 2009, or
 - (ii) in accordance with paragraph (2),
 - (b) immediately before 1st December 2009 those rights did not constitute a material interest in an offshore fund within the meaning of that expression given by section 759 of ICTA, and
 - (c) on or after 1st December 2009 the person acquires additional rights in the offshore fund (the “non-protected rights”).
- (2) Rights are acquired in accordance with this paragraph if—
 - (a) the rights are acquired by the participant in accordance with a legally enforceable agreement in writing that was entered into by the participant before 30th April 2009,
 - (b) in the case of an agreement which was conditional, the conditions are met before that date, and
 - (c) the agreement is not varied on or after that date.
- (3) For the purposes of tax in respect of chargeable gains—
 - (a) section 104 of TCGA 1992 (share pooling: general interpretative provisions) applies as if the protected rights were assets of a different class from the non-protected rights, and
 - (b) all the protected rights must be treated as disposed of before any of the non-protected rights may be so treated.

CHAPTER THIRTY FIVE

ACCRUED INCOME PROFITS

35.1 Accrued income profits – Introduction

This subject needs a book to itself. It would be an unrewarding labour since the rules are “widely ignored by both taxpayers, their advisors and within HMRC”.¹ This chapter focuses on the questions closest to the themes of this book, but one can only approach those questions after understanding how the provisions operate, at least in the standard case (I do not consider specialist topics such as variable rate securities or conversions of securities).

The provisions apply on a transfer of securities. The AIP provisions do not apply for corporation tax.

35.2 AIP securities

Section 619(1) ITA defines “securities”:

In this Chapter “securities” includes—

- (a) any loan stock or similar security other than an excluded security, and
- (b) shares in a building society which are qualifying shares for the purposes of section 117(4) of TCGA 1992 (qualifying corporate bonds),

¹ Responses to Consultation Exercise on Reform of the AIP, Inland Revenue, December 2004; consistent with that, several of the worked examples in the SAI manual are difficult to justify. Reform was promised in 2006 but radical change was rejected and the matter was dropped.

but (subject to para (b)) it does not include any shares in a company.²

I refer to securities within this definition as “**AIP securities**”. Section 619(3) ITA sets out seven categories of “Excluded securities”:

- (3) In this section “excluded securities” means—
- (a) national savings certificates (including Ulster Savings Certificates as defined in section 693(7) of ITTOIA 2005),
 - (b) war savings certificates,
 - (c) uncertificated eligible debt security units as defined in section 986,
 - (d) certificates of deposit (see section 1019),
 - (e) a security which is a right falling within section 552(1)(c) of ITTOIA 2005 at the time of the transfer in question,
 - (f) a security that meets the redemption conditions (see subsection (5))³, and
 - (g) a security that is a deeply discounted security within the meaning of Chapter 8 of Part 4 of ITTOIA 2005.⁴

Thus deeply discounted securities are not AIP securities: (subject to the 2003 transitional rule) the DDS rules take priority over the AIP rules.

2 Section 619(2) ITA adds:

“(2) For the purposes of subsection (1)(a), it does not matter—

- (a) whether the security is of the government of the UK, any other government, any public or local authority in the UK or elsewhere, or any company or other body,
- (b) whether or not the security is secured,
- (c) whether or not the security carries a right to interest of a fixed amount or at a fixed rate percentage of the nominal value of the security, or
- (d) whether or not the security is in bearer form.”

This can only be for the avoidance of doubt, because it only expresses the usual meaning of “security”.

3 Defined s.619(5) ITA:

“The redemption conditions are that—

- (a) the security is redeemable,
- (b) the amount payable on its redemption exceeds its issue price, and
- (c) no return other than the amount of that excess is payable on it.”

4 Section 619(4) ITA contains a transitional exception: “But subsection (3)(g) does not include a security if, on its transfer, Chapter 8 of Part 4 of ITTOIA 2005 would apply subject to the rules in sections 454 to 456 of that Act (listed securities held since 26 March 2003).”

35.2.1 Securities “of the same kind”

This expression is strictly understood. Section 619(6) ITA provides:

Securities are treated as being of the same kind for the purposes of this Chapter if they—

- (a) are treated as being of the same kind by the practice of a recognised stock exchange, or
- (b) would be so treated if dealt in on such an exchange.

SAI Manual provides:

4040 Accrued Income Scheme: what are “securities” [October 2008]
... For example, Treasury 5% 2004 is not the same kind as Treasury 5% 2012. This is similar to the capital gains tax concept of securities of a particular class.

35.3 “Transfer”

In outline, the definition is in s.620(1) ITA:

References in this Chapter to the transfer of securities are—

- (a) to the transfer of securities by way of sale, exchange, gift or otherwise,
- (b) to the conversion of securities in any case where there is no transfer of the securities within para (a),
- (c) to the redemption of variable rate securities in any case where there has been a transfer of the securities at any time before redemption, or
- (d) to a transaction or event treated as a transfer under—
 - (i) section 648(1) or (3) (strips of gilt-edged securities),
 - (ii) section 649(4) (new securities issued with extra return),
 - (iii) section 650(2), (4) or (6) (trading stock appropriations etc),
 - (iv) section 651(2) (owner becoming entitled to securities as trustee), or
 - (v) section 652(2) (securities ceasing to be held on charitable trusts).

Thus there are altogether eight types of transfer. In this book I consider only the first type, which are transfers in the normal sense of the word.

Section 620(2) provides one exception:

But subsection (1)(a) does not include—

(a) the vesting of securities in personal representatives on death...⁵

35.4 Transfer “with accrued interest”

35.4.1 *The commercial background*

The Debt Management Office explains the terminology “**clean**” and “**dirty**” price:

The following example is taken from the DMO website for 30 November 2004 and shows close of business data for 5% Treasury Stock 2014:

5TY145 | Treasury 2014 | GB0031829509 | 103.17 | 104.344033 | 4.592604

The first three fields are all means of identifying the gilt. The first is the DMO’s internal identifier code and the second a shortened form of the gilt’s name. The third field is the ISIN number (the International Security Identification Number – an identifier number used by the London Stock Exchange).

The next three fields give price and yield information. The two prices shown of £103.17 and £104.344033 are known as the ‘clean’ and ‘dirty’ price respectively. Clean prices do not include accrued interest whereas dirty prices do (see the section on accrued interest on page 15). The clean price is typically the price, which is quoted when agreeing a purchasing or selling price. However, the actual amount of money which will change hands is based on the dirty price and will reflect settlement on the business day after the transaction.

So, on the basis of the reference price on 30 November 2004, every £1,000 nominal of 5% Treasury Stock 2014 was worth £1,043.44.⁶

Note that for tax purposes the consideration for a gilt is “the actual amount of money which will change hands” - the dirty price.

SAI Manual explains the terminology ex-dividend and cum-dividend:

⁵ Paragraph (b) is a transitional rule for pre-2003 DDS (not discussed here).

⁶ A Private Investor's Guide to Gilts, Dec 2004, accessible www.dmo.gov.uk.

4020. Transfers “with accrued interest” and “without accrued interest” [July 2007]**... Sales with accrued interest (“cum div”)**

Most sales of marketable securities are “cum div”. That is, the buyer is entitled to the next interest due. As an interest payment date on a security approaches, its market price increases to reflect the increase in value of the buyer’s right to the interest. In other words, the price reflects accrued interest.

For example, £100,000 8% Treasury Stock 2002–06 is transferred cum div on 19 April. 14 days’ interest has accrued since interest was last paid on 6 April. Accrued interest is £307 ($14/365 \times 8\% \times 100,000$)...

Sales without accrued interest (“ex div”)

Not all sales of securities are “cum div”. This is because gilt-edged securities, and some corporate bonds, have an “ex div” or “ex coupon” date. The next interest coupon is paid to the person who is registered as the holder of the security at that date. So if the security is sold in the “ex div” period, the seller collects and keeps the next interest due after the sale. For gilts, the “ex div” period is 7 business days before the coupon date (except for 3 ½% War Loan stock, for which it is 10 business days). Other securities may have a similar, or shorter, “ex div” period.

Consequently the market price of a security sold “ex div” reflects the fact that the purchaser will own the security for a short period from the date of purchase to the next interest payment date. This is a period over which interest accrues but for which the interest is received not by him but by the seller. The interest accrued over such a period is known as rebate interest. It is treated in the opposite way to the more normal accrued interest associated with a “cum div” sale.

For example, £100,000 8% Treasury Stock 2002–06 is transferred ex div on 29 March. 7 days’ interest has accrued from the day after the transfer to the next interest date, 6 April. Accrued interest is £153 ($7/365 \times 8\% \times 100,000$). ...

35.4.2 Definition of with/without accrued interest

Section 623(1) ITA provides a commonsense definition:

The general rule is that securities are transferred with accrued interest for the purposes of this Chapter if they are transferred with the right to receive interest payable—

- (a) in a case where the settlement day is an interest payment day, on the settlement day, and
- (b) in any other case, on the first interest payment day after the

settlement day.

Section 624(1) ITA provides the corresponding definition of a transfer “without accrued interest”:

The general rule is that securities are transferred without accrued interest for the purposes of this Chapter if they are transferred without the right to receive interest payable as mentioned in section 623(1)(a) or (b).

The definitions are comprehensive so every transfer must be either with or without accrued interest, and they are simply English paraphrases of the technical expressions *cum dividend* and *ex dividend* (or cum-div and ex-div).

The terms “interest” “settlement day” and “interest period” are defined but the definitions are not considered here.

Thus whether a market sale is with or without accrued interest depends only on the date of the sale, whether it is before or after the ex div date. Vendors and purchasers have no choice in the matter except by timing the sale. Whether an off-market sale is with or without accrued interest is a matter for the parties to agree.

35.5 Deemed interest payment, credit and debit

Section 632(1) ITA provides:

In the case of a transfer of securities with accrued interest, for the purposes of this Chapter a payment is treated as made by the transferee to the transferor in the interest period in which the settlement day falls.

It is useful to have some terminology to describe this. I refer to this payment as “**a deemed interest payment**”. The transferor (deemed to receive the payment) has “**a deemed interest credit**”. The transferee (deemed to make the payment) has “**a deemed interest debit**”.

Section 632 then defines the amount of the deemed payment. In outline:

- (2) The amount of that payment depends on whether the transfer is under an arrangement by which the transferee accounts to the transferor separately—
 - (a) for the consideration for the securities, and
 - (b) for gross interest accruing to the settlement day.

(3) If the transfer is under such an arrangement, the amount of the payment is the amount of gross interest which the transferee accounts for.

(4) If—

(a) the transfer is not under such an arrangement, and

(b) the settlement day is itself an interest payment day for the securities, the amount of the payment is the amount of interest payable on the securities on that day.

(5) If—

(a) the transfer is not under such an arrangement, and

(b) the settlement day is not an interest payment day for the securities, the amount of the payment is an amount equal to—

$$I \times (A \div B)$$

where—

I is the interest payable on the securities on the first interest payment day after the settlement day (“the payment day”),

A is the number of days in the period beginning with the first day on which that interest accrues and ending with the settlement day, and

B is the number of days in the period beginning with the first day on which that interest accrues and ending with the payment day.

Why are there two alternative methods of ascertaining the amount of the deemed interest payment, in subsections (3) and (4)(5)? SAI Manual provides:

4140. Payments on transfers with accrued interest [July 2007]

... The [deemed interest] payment is the amount of the gross interest accruing to the settlement day, which in most cases is shown separately from the consideration for the securities, under the arrangement (that is, the contract note) by which the transferee accounts to the transferor. This is commonly known as the “clean price” basis.

In exceptional cases – for example, sales off market, gifts, settlements, and deemed transfers – there will be no contract note and it will be necessary to compute the amount of the [deemed interest] payment. Where this is done, the formula $I \times A/B$ is used...

The Manual offers a straightforward example of the two methods of computation on a single sale with accrued interest:

Example

Harriet sells corporate bonds to Howard on 15 March 2005. Interest is paid on the bonds on 31 March, 30 June, 30 September and 31 December. Howard will receive the interest coupon due on 31 March 2005, that is, the sale is cum div. The interest Howard receives is £200.

If Harriet agrees to sell the bond to Howard for a “clean price” of £10,000 plus an additional £165 for accrued interest, she is taxable on accrued income profits of £165 in 2004–05. Howard will reduce his accrued income profits by £165.

Suppose that, instead, Harriet simply agrees to sell the bond to Howard for £10,165. The relevant interest period is 1 January to 31 March 2005, so B is 90 days. The number of days up to and including 15 March (A) is 74. So the “accrued amount” is $£200 \times 74/90 = £164.44$. Again, Harriet’s taxable accrued income will be £164, and Howard’s reduced by £165 (following the principle of rounding in the taxpayer’s favour).

In practice the two methods normally give the same result (as is the case in the HMRC example) though there could be cases where the parties account for accrued interest in some manner which is not the same as the formula $I \times A/B$.

It is possible for the amount of the deemed interest payment to be nil, eg in the case of a transfer on the interest payment day.

Section 633 ITA contains corresponding rules on a transfer without accrued interest.

The SAI manual gives a straightforward example of a sale with accrued interest:

4160. Examples of transfers with and without accrued interest [July 2007]

Example 1

Anthony has a holding of £100,000 Treasury Stock 8¼% 2007, a British Government security which pays interest on 16 January and 16 July each year. He arranges for his holding to be sold on the Stock Exchange on 19 March 2006. The contract note from his stockbroker, dated 19 March 2006 contains the following information:

£100,000 Treasury Stock 8¼% 2007 sold @ 114	£114,000
Plus 56 days’ accrued interest	<u>£1,315</u>
Payable to you on 20 March 2006	<u>£115,315</u>

The contract note contains all the information that is needed for the purposes of the AIS.

- Treasury Stock 8¼% 2007 falls within the definition of “securities” – Section 619 ITA 2007
- the securities have been transferred, and the transfer is treated as taking place on 19 March because there was a contract for their sale made on that date – Section 620 ITA 2007
- the settlement day for the transfer is 20 March because under Stock Exchange rules bargains in gilt-edged securities are settled on the next business day – Section 674 ITA 2007
- the transfer is with accrued interest because the purchaser gets the right to

the interest payable on 16 July 2006, the next interest payment day to fall after 20 March 2006 – Section 623 ITA 2007

- under Stock Exchange rules, accrued interest on gilts is accounted for separately from the bargain price, so the accrued amount is £1,315 – Section 632 ITA 2007
- the interest period in which the settlement day falls is the period 17 January 2006–16 July 2006 – Section 673 ITA 2007.

Accordingly in this interest period Anthony (the transferor) is treated as having received a payment £1,315 and the transferee as having made a payment of £1,315 (Section 632 ITA 2007).

The manual then gives a straightforward example of a sale without accrued interest (ex-div):

Example 2

Facts as in Example 1, except that the sale takes place on 1 July 2006 which falls within the “ex-dividend” period for the stock.⁷ The contract note from the stockbroker shows:

£100,000 Treasury Stock 8¼% 2007 sold @ 114	£114,000
Minus 15 days’ rebate interest	<u>- £352</u>
Payable to you on 2 July 2006	<u>£113,648</u>

The transfer of securities is treated as made on 1 July 2006. The settlement day is 2 July 2006. The transfer is without accrued interest because this is an “ex-div” sale where the seller retains the right to the interest payable on 16 July 2006 (Section 633 ITA 2007). The rebate amount is £352 and the relevant interest period is that from 17 January–16 July 2006

Accordingly in this interest period Anthony (the transferor) is treated as having made a payment of securities of £352 and the transferee as having received a payment of £352.

The manual then gives a straightforward example of an off-market sale with accrued interest (cum-div):

Example 3

Stuffed Dodos Ltd is a UK company which has issued unquoted unsecured loan stock paying interest each year on the Tuesday following Easter Day. Thus in 2005 interest is payable on 5 April and in 2006 interest is payable on 18 April. Joe Smith owns £10,000 nominal of this stock and agrees to sell £4,000 to his aunt Matilda. Under the agreement, which was made on 8 July 2005, Matilda is to pay £5,000 for the stock on 19 August. The interest payable on 18 April 2006

⁷ This is not factually correct: a sale 15 days before the interest payment date would not be ex dividend. That does not spoil the illustrative force of the example but using correct figures would emphasise the triviality of the amounts involved, even in substantial transactions.

is at the rate of £5.50 per £100 nominal (5.5%).

Even though the loan stock is unsecured, it constitutes “securities” for the purpose of the scheme. The securities are treated as transferred on 8 July 2005 – Section 620(3) ITA 2007.

The settlement day is 19 August because that is the day Matilda has agreed to pay for the securities and it falls before the next interest payment day following the agreement – Section 674(3) ITA 2007. The transfer is with accrued interest (Section 623 ITA 2007).

Because the accrued interest is not accounted for separately, in calculating the accrued amount, the formula in Section 632(5) ITA 2007 is used. A is the period from 5 April 2005 to 19 August 2005. B is the period from 5 April 2005 to 18 April 2006. I is the interest applicable to the securities for the period ($5.5\% \times £4,000 = £220$). The accrued amount is thus $137/379 \times £220 = 79$.

The interest period in which the settlement day falls is that from 5 April 2005 to 4 April 2006. Accordingly in that interest period Joe is treated as receiving as payment of £79 and Matilda as having made a payment of £79.

35.6 Accrued income profits and losses

Tax is *not* charged on deemed interest credits. But armed with the concept of deemed interest payments, we can turn to the terms “accrued income profits” (and “accrued income losses”) which are defined in ss.628 and 629 ITA:

628 Making accrued income profits and losses: general rule

(1) This section sets out the general rule for determining whether a person is treated as making accrued income profits or accrued income losses where securities are transferred by or to the person. ...

(3) A separate calculation is to be made for each kind of security that is transferred by or to the person and for each interest period of each such kind of security.

(4) Each such calculation is to find—

- (a) the total amount (“A”) of the payments treated under this Chapter as made to the person in the interest period in question in respect of transfers of securities of the particular kind, and
- (b) the total amount (“B”) of the payments treated under this Chapter as made by the person in that period in respect of such transfers.

(5) A person is treated as making accrued income profits in an interest period as a result of transfers of securities of a particular kind if A exceeds B.

(6) A person is treated as making accrued income losses in an interest period as a result of transfers of securities of a particular kind if B

exceeds A. ...

629 Calculating accrued income profits and losses where section 628 applies

- (1) If section 628(5) applies, the amount of the accrued income profits treated as made is equal to the excess mentioned in section 628(5).
- (2) If section 628(6) applies, the amount of the accrued income losses treated as made is equal to the excess mentioned in section 628(6).

Thus deemed interest debits are first set against deemed interest credits of the interest period for securities of the same kind. If or so far as they cannot be set against those interest credits, they constitute accrued income losses.

35.7 Charge on AIP income

I refer to the accrued income profits treated as made under s.628 ITA as “**AIP income**”.

Section 616 ITA imposes the charge on AIP income:

Income tax is charged on accrued income profits.

35.8 Relief for accrued income losses

Section 679 ITA allows accrued income losses to be set against interest from securities of the same kind:

- (1) This section applies if—
 - (a) a person is liable for income tax on interest on securities of any kind which is due at the end of an interest period of the securities,
 - (b) in that period accrued income losses are made as a result of transfers of those securities, and
 - (c) the period ends with an interest payment day.
- (2) No liability to income tax arises in respect of the interest to the extent that it does not exceed the losses.

SAI Manual provides:

4120. Calculating accrued income profits and losses: relief for losses
[July 2007]

... In other words, the losses always reduce the interest subsequently received on those securities, and cannot be used to offset accrued income profits for earlier interest periods or arising on securities which have different interest periods. Where the interest period spans the tax year, losses are therefore not allowed until the interest on the securities is taxed in the following tax year.

For the interaction of loss relief and DTR, see 35.16 (Double taxation relief).

35.8.1 *HMRC examples*

SAI Manual provides 3 examples. The first example is a straightforward sale and purchase of one kind of security with accrued interest, looking at the position of the seller:

4130 Calculating accrued income profits and losses: examples [July 2007]

Antoinette has £100,000 Treasury Stock 7¼ % 2006, which has interest dates of 8 March and 8 September. She makes the following transactions in the stock.

Transaction	Profit/loss ⁸
19 March 2006 sells £100,000	£2,107
21 March 2006 buys £50,000	(£1,361)
12 May 2006 sells £50,000	(£131)
	£615

The aggregate [accrued income] profit is £615, taxable for 2006–07, the tax year in which the interest period ended, even though two of the transactions occur in 2005–06.

The second example includes purchases and sales, with and without accrued interest, and involving two different kinds of security, looking at the position of the seller:

Jean made the following transactions in securities between 28 February 2005 and 5 April 2006:

19 Mar 2005	bought £100,000 Treasury Stock 7½% 2006 (interest payment dates 7 June and 7 December)
26 May 2005	bought £50,000 Treasury Stock 7½% 2006 ex div

8 This refers to deemed interest credits/debits, not the commercial profit/loss but I am unable to see how the figures of 2107, 1361 and 131 are derived: can any reader explain?

15 Sept 2005	sold £20,000 Treasury Stock 7½% 2006
22 Sept 2005	bought £50,000 Treasury Stock 4½ % 2007 (interest payment dates 7 March and 7 September)

The [accrued income] profits and losses arising on these transactions are:

Transaction date	Interest period	Profit/loss
19 March 2005	08/12/04–07/06/05	(£1,395)
26 May 2005	08/12/04–07/06/05	£82
15 Sept 2005	08/06/04–07/12/05	£271
22 Sept 2005	08/09/04–07/03/05	(£778)

The profits and losses for 2005–06 are:

- Loss of £1,313 (1,395 minus 82) against interest of £3,750 ($£100,000 \times 7\frac{1}{2}\% \times \frac{1}{2}$) received on Treasury Stock 7½% 2006 on 7 June 2005.
- Profit of £271 (Treasury Stock 7½% 2006, interest period 8 June 2005–7 December 2005)
- Loss of £778 against interest of £2,250 received on Treasury Stock 4½ % 2007 on 7 March 2006.

The third example is a straightforward sale of a security with accrued interest, looking at the position of the purchaser:

Example 3

See Example 3 in SAIM4160 [set out below]. Joe Smith sells £4,000 unsecured loan stock in Stuffed Dodos Ltd to his Aunt Matilda on 19 August 2005. Interest is payable on 5 April 2005 and 18 April 2006. Neither Joe nor Matilda had any other transactions in securities.

The settlement day falls within the interest period 5 April 2005 to 4 April 2006. Joe is taxable on £79 for 2005–06 in respect of this interest period.

Matilda's loss of £79 is carried forward to 2006–07 to be set against the interest receivable for the period 5 April 2005 to 18 April 2006 (Section 637 ITA 2007 – see SAIM4120).

35.9 AIP remittance basis

Section 670A ITA provides:

- (1) This section applies if—
 - (a) accrued income profits are made by an individual as a result of a transfer of foreign securities, and
 - (b) section 809B, 809D or 809E (remittance basis) applies to the individual for the tax year in which the profits are made.
- (2) Treat the accrued income profits as relevant foreign income of the individual. ...

- (4) For the purposes of this section securities are “foreign” if income from them would be relevant foreign income.

This brings in the remittance basis. AIP income is fictional, deemed income, which could not be remitted. This is dealt with by s.670A(3) ITA which provides different rules depending on whether the individual receiving the AIP income is the transferor (the usual case of a sale with accrued interest) or the transferee. It is helpful to consider these two cases separately.

For the transferor, s.670A(3) ITA provides:

For the purposes of Chapter A1 of Part 14 (remittance basis)—

- (a) if the individual⁹ is the transferor—
 - (i) treat any consideration for the transfer as deriving from the accrued income profits...

Thus the proceeds of sale of the securities are treated as containing the AIP income.

- (ii) if on the transfer the individual does not receive consideration of an amount equal to or exceeding the market value of the securities, treat the securities as deriving from the accrued income profits

Section 670A(3)(a)(ii) is the equivalent of the CGT rule for deemed gains on non-market value disposals.¹⁰

For the transferee, s.670A(3) ITA provides:

- (b) if the individual¹¹ is the transferee, treat the securities as deriving from the accrued income profits.

If the taxpayer is the transferee, the AIP securities in the hands of the transferee are deemed to contain the AIP income. It makes no difference whether or not the sale is for market value.

The SAI Manual provides:

9 That is, the individual who makes the accrued income profits.

10 See 10.24 (CGT disposal not for market value).

11 That is, the individual who makes the accrued income profits.

4380 - Accrued Income Scheme: remittance basis [January 2010]

... In some cases, a remittance basis taxpayer will make an accrued income profit on a transfer of securities, but will not receive consideration equal to the market value of the securities.

[1] This may happen when the securities are transferred 'ex-div' and the taxpayer is the transferee.

[2] It may also happen where the taxpayer is the transferor, and makes a gift of the securities, or where the AIS rules treat an event as a transfer (for example, an appropriation of securities to trading stock).

In such cases s.670A(3) ITA 2007 provides that the securities themselves are treated as deriving from the accrued income profits. This means that a charge will arise on the taxpayer when they, or some other 'relevant person', either bring the securities to the UK (if they are held in bearer form) or remit money or property deriving from the securities.

35.9.1 *Relief for losses*

What about accrued income losses accruing to a remittance basis taxpayer? The SAI Manual provides:

4380 - Accrued Income Scheme: remittance basis [January 2010]

... Remittance basis taxpayers are able to obtain relief for accrued income losses. Losses arising on transfers of securities of a particular kind are set against interest received on securities of the same kind at the end of the relevant interest period, and will therefore reduce the amount of an individual's interest on those securities. There is an example of the interaction of the accrued income loss rules and the remittance basis rules at SAIM4390.

35.9.2 *Mixed funds and separating income/capital: sale with accrued interest*

The consideration received by the transferor (vendor) for the sale of AIP securities with accrued interest will be a mixed fund, consisting in part of AIP income, and the mixed fund rules will apply. In strict law one cannot separate the AIP income from the other proceeds of sale. There are three reasons for this.

First, assume that:

- (1) P will pay a single sum for the security to V's broker (the total price).
- (2) The broker will then divide the total price into two parts (accrued interest and clean price) and pay the two parts into two separate

accounts of the vendor.

There is already a mixed fund on receipt of the payment by the broker on behalf of the client at stage (1), and the broker's act in transferring the single payment into two accounts is an offshore transfer under the mixed fund rules. In theory one might avoid this difficulty if P could pay two separate sums, one in respect of accrued interest and one in respect of the clean price; but in practice on a market sale that would not be possible.

Secondly, the AIP income is a fictional, notional amount which is distinct from the sum paid for the accrued interest. It is like the CFC income in *Brikom*.¹²

Even if that were wrong, however, there is a third obstacle in s.670A(3) ITA, which provides:

For the purposes of Chapter A1 of Part 14 (remittance basis)

- (a) if the individual is the transferor –
 - (i) treat *any* consideration for the transfer as deriving from the accrued income profits.

Thus even if (contrary to my view) the amount that V, the transferor, received for the accrued interest could in principle be separated and did in principle constitute the AIP income, the effect of s.670A(4) is that any consideration for the securities sold by V is treated as deriving from the AIP income.

However HMRC do not take that view. The RDR Manual provides:

33550 - Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme [July 2010]

Where a security is sold with accrued income and the proceeds paid into an account, the part of the proceeds representing accrued income will be taxable as income and subject to income tax under the Accrued Income Scheme (AIS)....

Where an individual is chargeable on the remittance basis, accrued income profits arising from on transfers of a 'foreign security' are treated as relevant foreign income...

For consistency of treatment between the AIS and the remittance basis regime, HMRC will follow the tax treatment delivered by the AIS and accept that an 'income amount' can be transferred to a separate 'income account' immediately upon transfer, that is, the proceeds are 'split' into

¹² See 55.2 (The characterisation issue).

two separate accounts immediately upon receipt into the individual's account. This 'income' could then be identified and taxed as such, without creating a mixed fund....

To the extent that the remainder of the proceeds consist of capital or UK or non-taxable income (as opposed to, say, untaxed foreign income or gains) originally used in the purchase of the security ... the remainder of the proceeds could therefore be separately identified and remitted as such.¹³

35.9.3 *Mixed funds & separating income/capital: sale without accrued interest*

The manual does not expressly consider the alternative situation where a security is sold without accrued interest and the transferee makes an accrued income profit. There is no difference between the two situations, so the purchaser (transferee) could divide up the purchased securities into an AIP income fraction and a clean capital fraction and hold the two in separate security accounts. However the amounts involved will generally be trivial.

35.9.4 *Mixed funds and separating income/capital: actual interest payment*

A similar problem arises on receipt of the interest payment after the sale. I refer to this as **“the actual interest payment”**. The recipient will be the purchaser (on a sale with accrued interest) or the seller (on a sale without accrued interest). Either way, the recipient will not normally be subject to income tax on the full amount of the interest as an deemed interest debit will normally generate an accrued income loss which can be set against the interest. The actual interest payment will therefore be a mixed fund. It is suggested that one can separate the actual interest payment on receipt

13 Similarly SAI Manual:

4400. Remittance basis: Further examples [January 2010]

The disposal of a bond may be structured such that separate payment is made for the capital and the accrued income elements which may be paid into separate accounts. In this situation Section 632 ITA 2007 provides that the taxable amount shall be taken as the amount of gross interest accruing to the settlement day, which is separately identified as such.

An individual who has received separate payments into two separate accounts in this way will not be regarded as having two mixed funds. In this situation a remittance of the capital element will not be regarded as a remittance of relevant foreign income.”

into income and capital elements.

35.10 HMRC examples

The SAI Manual provides:

4390 - Accrued Income Scheme: remittance basis: examples

[January 2010]

The application of the remittance basis to the AIS is not without complication.

The problem is identifying what is or represents the AIP income where there are deemed interest debits (in the statutory terminology, amount B's) to set against deemed income credits (amount A's.) There is no statutory solution.

The following examples set out line HMRC takes in particular circumstances.

Example 1

Ann holds foreign securities 'of the same kind' X and Y which are disposed of in an interest period. They realise the following A and B amounts.

Security	Proceeds	Amount A	Amount B
X	100,000	10,000	
Y	60,000		(5,000)

There is an accrued income profit of £5,000 which will be treated as deriving from the proceeds of sale of security X. Assuming the proceeds are paid into a new bank account, there will be a mixed fund comprising capital of £95,000 and an accrued income profit of £5,000.

Example 2

Isabelle has 3 holdings of the same kind of foreign security, X, Y and Z. They are disposed of in an interest period and the proceeds are paid into separate accounts. They realise the following A and B amounts.

Security	Proceeds	Amount A	Amount B
X	100,000	7,000	
Y	200,000	-	(10,000)
Z	70,000	4,000	

In this situation there is an accrued income profit of £1,000. If the proceeds of disposal of all 3 bonds are paid into a single account there will be a mixed fund with capital of £369,000 and an accrued income profit of £1,000.

That is the easy case as there is only one possible answer.

If the proceeds were paid into separate accounts HMRC would expect the accrued income profit to be allocated pro rata in proportion to the Amount A of securities X and Z or, if this would create an unreasonable result, by any reasonable method.

Careful time of purchases and sales would avoid the problem. The last example is somewhat theoretical and I set it out for completeness only:

4400. Remittance basis: Further examples [January 2010]

It is unlikely that there are many situations where UK and foreign securities will be 'securities of the same kind' for the purposes of the AIS scheme. It may, however, happen in the case of bearer securities. The following example outlines such a situation.

Sam has both overseas and UK bonds 'of the same kind' and they are disposed of in the same interest period with the following results.

Example 3

Security	Proceeds	Amount A	Amount B
X (overseas)	100,000	7,000	
Y (overseas)	200,000	-	(10,000)
Z (UK)	70,000	4,000	

In this case the accrued income profit of £1,000 does not arise as the result of a transfer of foreign securities. There is a net Amount B of £3,000 as the result of the transferred foreign securities. There is therefore no relevant foreign income which Sam might remit to the UK. There is a UK accrued income profit of £1,000 which is taxable on an arising basis.

There are several odd things in this example. First it is assumed that if the bearer security is in the UK, the interest is UK source. That is not the test of the location of a source of interest. Perhaps it is assumed that the income is received in the UK. Secondly, one would have expected the deemed interest debit (amount B) to be set against the deemed interest credits pro rata, not set against foreign income first. But since in practice the point will never arise, it is not necessary to pursue that further.

35.10.1 *Position before 2008 and transitional rules*

Until 2008/09 a foreign domiciled individual was wholly outside the scope of the AIP rules on foreign securities.

Para 160 Sch 7 FA 2008 provides:

The amendments made by paras 156 to 159 have effect in relation to transfers of securities where the settlement day is on or after 6 April 2008.

The new rules therefore catch all AIP securities even if held before the law changed in 2008.

35.10.2 *Commentary*

When one contemplates the complications of the AIP remittance basis, one appreciates the wisdom of the rule, which applied from the inception of the accrued income scheme in 1985 until 2008, under which the accrued interest scheme did not apply to foreign securities of remittance basis taxpayers. CGT filled the gap. The problems were not discussed, and as far as is known were not even considered, when the law was changed in 2008.

Most if not all readers who have studied the text to this point will agree that the current rule does not give sufficient weight to the desiderata of simplicity and administrative workability. The pre-2008 rule ought to be restored.

35.11 Excluded persons

The AIP exemptions use the concept of excluded transferor/transferee. Section 638 ITA provides:

- (1) This section applies if there is a transfer of securities in relation to which a person ("P") is an excluded transferor or excluded transferee.
- (2) In determining whether P has made accrued income profits or accrued income losses under section 628 (making accrued income profits and losses: general rule) and the amount of any such profits or losses, no account is to be taken of any payment treated as made by or to P on the transfer.

A person is not an excluded transferor/transferee in isolation. One is excluded in relation to a transfer of securities. An excluded person is broadly outside the AIP scheme.

35.12 AIP non-residence defence

Section 643 ITA provides:

- (1) A person is—
- (a) an excluded transferor in relation to a transfer by the person, and
 - (b) an excluded transferee in relation to a transfer to the person, if the person is non-UK resident throughout the tax year in which the transfer occurs and is not ordinarily UK resident during that year.

The exemption avoids the AIP charge on UK and foreign AIP securities.¹⁴ It also withholds the AIP relief. EN ITA explains the policy behind the rule:

1897. In practice it would be very difficult to apply the scheme to such non-residents consistently. While non-residents could take the benefit of relief for accrued income losses to get repayments of tax suffered if tax is deducted at source, it would be difficult to enforce the charge to tax on accrued income profits.

A person coming to or leaving the UK might time disposals to obtain AIP relief while UK resident, while making disposals on which a charge would apply while non-resident.

The temporary non-residence rules do not apply. However CGT may fill some of the gap left by the AIP non-residence defence. The gain on the disposal of AIP securities may be subject to CGT if the CGT temporary non-residence rules apply.

35.13 Trusts

35.13.1 *Application to trustees*

The TSE Manual provides:

3325. Do AIS provisions apply to trustee or beneficiary? [December

¹⁴ Section 1015 ITA (if needed) could also restrict the territorial scope of the AIP charge, but the rules discussed here leave it no room to operate.

2011]

Accrued Income Scheme charge

If trustees (other than bare trustee – TSEM3320) transfer securities, any Accrued Income Scheme charge is that of the trustees. The trustees are chargeable at the trust rate, under Sections 481 and 482 ITA.

The transfer of securities does not form the income of any beneficiary. The trustee must not include it on the Trust and Estate Return as the income of a beneficiary.

Accrued Income Scheme allowance

The treatment of the allowance depends on who received the income against which relief is due. If the trustees received the income, they are entitled to the relief. There are instructions at AP4910.

The trustees may have mandated the income to a beneficiary. The beneficiary should claim the allowance against the income.

35.13.2 *Transfer to trust*

The TSE Manual provides:

3330. Securities go into trust: Accrued Income Scheme [December 2011]

When securities go into trust there is a transfer, for Accrued Income Scheme purposes. The transfer is from the settlor to the trustee.

This includes

- a settlor creates a new trust by transferring securities to the trustee
- a person who holds securities for his own benefit declares he will in future hold them as trustee
- at the end of an administration period, a personal representative starts to hold securities as trustee of a will trust. There are instructions at AP4928.

35.13.3 *Transfer from trustees*

The TSE Manual provides:

3335. Beneficial interest in trust changes: Accrued Income Scheme [December 2011]

Change results from the terms of the trust

The terms of a trust may often result in changes in beneficial interests. For example, on the death of a life tenant the trust assets may pass absolutely to another beneficiary. Such changes in beneficial interest have no accrued income scheme consequences. Either there is no actual

transfer, or the transfer simply produces self-cancelling deemed sums and reliefs.

SAI Manual makes the same point:

4050. What is a transfer? [October 2007]

... The AIS is based on transfers of the legal ownership of securities, not the transfer of the underlying beneficial ownership. Thus, for example, there is no transfer for the purposes of the AIS if a beneficiary under a trust becomes absolutely entitled as against the trustees to securities forming part of the trust fund.

Returning to the TSE Manual:

3335. Beneficial interest in trust changes: Accrued Income Scheme [December 2011] ...

Change follows an action by the trustees

Sometimes a change is not a direct result of the terms of the deed. Trustees can use their powers to advance interests or appoint property. The exercise of these powers can amount to a transfer.

That seems inconsistent with what was said above..

'Stranded' Accrued Income Scheme Allowance

A change in beneficial owner can result in an Accrued Income scheme allowance being 'stranded'. It is no longer available to set against the interest. For example, the trustee could have bought securities 'cum dividend' (with a right to the dividend). Shortly afterwards a beneficiary could become absolutely entitled to the trust assets following a contingency. The contingency does not involve any transfer for Accrued Income Scheme purposes. This means the trustee's Accrued Income Scheme allowance is lost. The beneficiary was never entitled to the allowance, so cannot set it against subsequent interest.

35.13.4 *Appointment of new trustees*

The TSE Manual provides:

3340. Accrued income scheme: change of trustees [December 2011]
Trustees remain resident in the UK

There are no accrued income scheme consequences when trustees

change, but remain resident in the UK. The change simply produces self-cancelling deemed sums and reliefs.

Trustees change from resident to non-resident

As the new trustees are not resident, they do not satisfy the ‘residence requirement’ of the accrued income scheme. The appointment of non-resident trustees is a transfer of the securities by the resident trustees. ...

Trustees change from non-resident to resident

As the old trustees were not resident, they do not satisfy the ‘residence requirement’ of the accrued income scheme. The change of trustees is a transfer of securities to the resident trustees.

This may have been right before 2006, but now that trustees are treated as a single person (distinct from the actual trustees) it is considered that the appointment of new trustees (wherever resident) is not a transfer for AIS purposes.

35.14 Settlor-interested trusts

35.14.1 *UK resident settlor-interested trusts*

Section 667(1) ITA provides:

If the trustees¹⁵ of a settlement are treated as making qualifying accrued income profits,¹⁶ those profits are to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

I am not sure if this is necessary, but perhaps it could have been argued that although “tax is charged on accrued income profits” (s.616) such profits are nevertheless not “income arising under a settlement”. Perhaps the provision is just for symmetry with the provision which follows for

¹⁵ Defined in s.667(4)(b) ITA.

¹⁶ Defined in s.667(4)(a) ITA:

“‘qualifying accrued income profits’ means accrued income profits which are treated as made—

(i) under section 628(5), or

(ii) under section 630(2) in respect of a transfer of variable rate securities.”

The drafting is misleading: as far as I can see, all accrued income profits are “qualifying” accrued income profits.

non-resident trusts.

The rate of tax in the absence of s.624 is 50%, so s.624 can only reduce the tax rate (or make no difference).

35.14.2 *Non-resident trusts*

In the absence of express provision, AIP income of non-resident trustees would not fall within the settlement provisions because the trustees would qualify for the AIP non-residence defence. Section 667 ITA provides:

- (2) Subsection (3) applies if the trustees of a settlement—
 - (a) are non-UK resident or domiciled outside the UK throughout a tax year in which an interest period or part of an interest period falls, and
 - (b) would have been treated as making an amount or an additional amount of qualifying accrued income profits in the interest period if the trustees had been UK resident or domiciled in the UK during a part of each such tax year.
- (3) The amount or additional amount of qualifying accrued income profits that the trustees would have been treated as making is to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005.

Thus the AIP income of a settlor-interested trust is within the scope of s.624 ITTOIA. However, the s.624 remittance basis can apply.

Non-resident trustees would not qualify for AIP loss relief,¹⁷ so s.680 ITA extends the relief:

- (1) This section applies if—
 - (a) the trustees of a settlement are non-UK resident or domiciled outside the UK throughout a tax year in which an interest period or part of an interest period of securities falls,
 - (b) the trustees' income is or includes interest from those securities,
 - (c) the interest falls due at the end of that interest period, and
 - (d) had the trustees been UK resident, or domiciled in the UK, during a part of each such tax year the interest would have been wholly or partly exempt from income tax under section 679.
- (2) No liability to income tax arises as a result of Chapter 5 of Part 5 of

17 See 35.8 (Relief for accrued income losses).

ITTOIA 2005 (settlements: amounts treated as income of settlor) in respect of so much of the interest as would have been exempt from income tax under section 679.

The references to domicile in ss.667 and 680 ITA is otiose because after the 2008 reforms domicile of trustees is irrelevant. The reference to “an additional amount” is also otiose. But no harm is done by these infelicities.

35.15 Transfer of assets abroad

In the absence of express provision, AIP income would not fall within the TAA provisions because the person abroad would qualify for the AIP non-residence defence (assuming the person abroad is non-resident). However, s.747 ITA deals with this:

- (1) This subsection applies if a person—
 - (a) would have been treated as—
 - (i) making qualifying accrued income profits, or
 - (ii) making qualifying accrued income profits of a greater amount,
in an interest period, but
 - (b) is not so treated because of being resident or domiciled outside the UK throughout any tax year in which the interest period (or part of it) falls.
- (2) If subsection (1) applies, this Chapter applies as if the amount which the person would be treated as making or, as the case may be, the additional amount were income becoming payable to the person.
- (3) Accordingly, any reference in this Chapter to income of (or payable or arising to) a person abroad must be read as including a reference to such an amount.

It has been suggested that this leaves a gap where AIP securities are held by a non-resident company. Section 747(1) ITA applies only if the company would have fallen within the AIP rules but did not do so “because of being resident outside the UK”. But if the company had been UK resident, it would be within the charge to corporation tax and outside the scope of AIP. That is correct on a literal construction. However, the context shows that the deeming is not intended to be applied that way, and a comparable argument in a CGT context was resoundingly dismissed in

de Rothschild v Lawrenson 67 TC 300 (“I do not believe that our processes of statutory construction are so wanting in technique and imagination ...”).

The reference to domicile is otiose from 2008 but it does no harm.

The person abroad (if non-resident) would not qualify for AIP loss relief, so s.747(4)(5) ITA extends the relief:

(4) This subsection applies if income consisting of interest which falls due at the end of an interest period—

- (a) would have been income as respects which a person is entitled to an exemption, or an exemption of a greater amount, from liability to income tax under section 679 (interest on securities involving accrued income losses: general), but
- (b) is not such income because it is income of a person who is resident or domiciled outside the UK throughout any tax year in which the interest period (or part of it) falls.

(5) If subsection (4) applies, for the purposes of this Chapter the interest is treated as reduced by the amount of the exemption or, as the case may be, the additional exemption.

35.15.1 Definitions

Section 747 ITA provides definitions for s.747:

(6) In this section—

- (a) expressions which are also used in Chapter 2 of Part 12 (accrued income profits) have the same meaning as in that Chapter (but see subsection (7)), and
- (b) “qualifying accrued income profits” means accrued income profits which are treated as made—
 - (i) under section 628(5), or
 - (ii) under section 630(2) in respect of a transfer of variable rate securities.

(7) In the case of qualifying accrued income profits within sub-paragraph (ii) of the definition of that expression in subsection (6)(b)—

- (a) references in subsection (1)(a) to making qualifying accrued income profits in an interest period are to be read as making them in the tax year in which the settlement day falls, and
- (b) the reference in subsection (1)(b) to the interest period is to the period—
 - (i) beginning with the day after the last day of the only or last

- interest period of the securities, and
- (ii) ending with the settlement day.

The expression “qualifying” accrued income profits is misleading: as far as I can see, all accrued income profits are qualifying.

For the interaction with s.731, see 29.15.2 (Stock dividends and accrued income profits).

35.16 Double taxation relief

In the absence of express provision there would be no double taxation relief, as the AIP income is not taxable in the other state.

Section 10 TIOPA provides relief:

- (1) Subsection (2) applies if—
 - (a) a person is treated under section 628(5) of ITA 2007 as making accrued income profits in an interest period,
 - (b) the person would, were the person to become entitled in the relevant tax year¹⁸ to any interest on the securities concerned, be liable in respect of the interest to tax chargeable under ITTOIA 2005 on relevant foreign income, and
 - (c) the person is liable under the law of the territory to tax in respect of interest payable on the securities at the end of the interest period or the person would be so liable if the person were entitled to that interest.

I cannot see the need for (b) as it will be satisfied whenever (a) is satisfied. Section 10(2) provides the relief:

(2) Credit is to be allowed against income tax calculated by reference to the accrued income profits.

(3) The amount of the credit allowed under subsection (2) is given by—

$$\text{AIP} \times \text{FTR}$$

where—

AIP is the amount of the accrued income profits, and

18 Defined subsection (5): “In subsection (1)(b) ‘the relevant tax year’ means the tax year in which, under section 617(2) of ITA 2007, the accrued income profits are treated as made.”

FTR is the rate of tax to which the person is or would be liable as mentioned in subsection (1)(c)...

Section 39 TIOPA restricts DTA relief where there is relief for accrued income losses.¹⁹

The SAI Manual provides:

4370. Double taxation relief [January 2010]

Where an AIS charge arises on a foreign stock on which the interest would have suffered foreign tax eligible for credit relief if interest had been received, credit for foreign tax is allowable for the lower of

- the rate of UK tax charged on the accrued income profit, and
- the rate of foreign tax suffered on the interest payable at the end of the interest period for which the charge arises.

If there is an accrued income loss to be set against foreign interest, reduce the credit for foreign tax in the proportion which the allowance bears to the interest.

Example

Taxpayer holds foreign stock on which the interest suffers tax eligible for credit at 15%. Interest paid on 30 June and 31 December.

In the interest period to 30 June 2005, the taxpayer makes transactions resulting in an AIS loss of £200. He receives interest (gross) of £1,000 less £150 foreign tax.

In August 2006 he sells the entire holding and there is an AIS profit of £300. He is liable to UK tax at 22%. His double taxation relief is as follows

Foreign interest	£1,000
Less Accrued Income relief	<u>- £200</u>
	<u>£800</u>
Foreign tax deducted £150	
Credit restricted to $£1000 - £200 \times £150 / £1000$	= £120
Accrued income profit	£300
Allow credit for foreign tax	
on AIS charge £300 @ 15%	= £45
Total double taxation relief $£120 + £45$	= £165

The double taxation relief given can exceed the foreign tax suffered (£165 exceeds the £150 suffered).

19 See 35.8 (Relief for accrued income losses).

35.17 Interaction with CGT

Section 119(1) TCGA disapplies the normal CGT rules in ss.37 and 39 TCGA:

- (1) Where there is a transfer of securities within the meaning of Chapter 2 of Part 12 of ITA 2007 (accrued income profits)—
- (a) if a payment is treated as made to the transferor under section 632 of that Act or by the transferor under section 633 of that Act, section 37 shall be disregarded in computing the gain accruing on the disposal concerned;
 - (b) if a payment is treated as made by the transferee under section 632 of that Act or to the transferee under section 633 of that Act, section 39 shall be disregarded in computing the gain accruing to the transferee if he disposes of the securities;
- but subsections (2) and (3) below shall apply.

Section 119 TCGA goes on to set out its own rules:

- (2) Where the securities are transferred with accrued interest (within the meaning of that Chapter)—
- (a) if a payment is treated as made to the transferor under section 632 of ITA 2007, an amount equal to the amount of that payment shall be excluded from the consideration mentioned in subsection (8) below;
 - (b) if a payment is treated as made by the transferee under that section, an amount equal to the amount of that payment shall be excluded from the sums mentioned in subsection (9) below. ...
- (8) The consideration is the consideration for the disposal of the securities transferred which is taken into account in the computation of the gain accruing on the disposal.

Section 119(3)(9) contains corresponding rules for a transfer without accrued interest:

- (3) Where the securities are transferred without accrued interest (within the meaning of that Chapter)—
- (a) if a payment is treated as made by the transferor under section 633 of ITA 2007, an amount equal to the amount of that payment shall be added to the consideration mentioned in subsection (8) below;

- (b) if a payment is treated as made to the transferee under that section, an amount equal to the amount of that payment shall be added to the sums mentioned in subsection (9) below...
- (9) The sums are the sums allowable to the transferee as a deduction from the consideration in the computation of the gain accruing to him if he disposes of the securities.

35.18 Foreign currency securities

SAIM provides:

4310. Special calculations: Foreign currency securities [July 2007]

Foreign securities: Translation into sterling

Section 664 ITA 2007 provides rules for translation into sterling of the payments made on the transfer of securities where the interest on securities is payable in a currency other than sterling.

If the interest is accounted for separately between transferor and transferee, and the parties specify in their contract what the sterling equivalent of the accrued or rebate interest is, the sterling amount so specified is to be used in the AIS calculations. Otherwise, the amount is to be determined in the foreign currency according to the usual rules, and then translated into sterling at the rate of exchange prevailing on the settlement day for the transfer, calculated by reference to the London closing rate of exchange for the day concerned.

The nominal value of foreign securities is also determined (under Section 677 ITA 2007) as the sterling equivalent of that value on any day, calculated by reference to the London closing rate for that day.

Where unrealised interest is payable in a foreign currency, Section 665 ITA 2007 provides that the amount the accrued income profits under Section 631 ITA 2007 is the sterling equivalent on the settlement day, or in the case of interest in default (SAIM4290), the value on the day of receipt.

Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently.

CHAPTER THIRTY SIX

DEEPLY DISCOUNTED SECURITIES

36.1 DDS – Introduction

A full discussion of this topic would need half a book. The following is a general outline with a focus on the issues closest to the themes of this work.

In outline, the profits arising on the disposal of a deeply discounted security (“DDS”) are subject to income tax (rather than CGT). The rules only apply to a holder of a DDS who is subject to income tax. They do not apply to the issuer and they do not apply for the purposes of corporation tax.

The following specialist aspects are not discussed:

- securities issued in tranches
- earn-out rights
- strips
- exchanges and conversions

36.2 Meaning of “deeply discounted security”

36.2.1 “Security”

SAI Manual states:

3010 Introduction [November 2011]

... The term ‘security’ is not defined in the legislation. It may be taken to have a broad meaning comparable to the definition in TCGA Section 132(3)(b) (CG53420) ...

36.2.2 “Deeply discounted”

In outline, the definition is in s.430 ITTOIA:

430 Meaning of “deeply discounted security”

(1) The general rule is that a security is a “deeply discounted security” for the purposes of this Chapter if, as at the time it is issued, the amount payable on maturity or any other possible occasion of redemption (“A”) exceeds or may exceed the issue price by more than $A \times 0.5\% \times Y$, where Y is the number of years in the redemption period or 30, whichever is the lower.

(2) If the redemption period is not a number of complete years, for the purposes of subsection (1) the incomplete year is expressed as twelfths, treating each complete month and any remaining part of a month as one-twelfth.

(3) In this section “redemption period” means the period between the date of issue and the date of the occasion of redemption in question.

(4) Interest payable on an occasion of redemption is ignored in determining for the purposes of this section the amount payable on that occasion.

SAI Manual gives three examples:

3020 Meaning of deeply discounted security [July 2007]*Example 1*

Company A issues securities for £1,000 which are redeemable in 10 years time for the subscription amount increased by the percentage movement in the Retail Price Index over the same period. As the linkage to the RPI may give more than a 5% increase in value ($10 \text{ years} \times 0.5\%$) over that period, the securities are deeply discounted securities.

Example 2

Company B issues a 12-month security for £950. It is redeemable for £950 at maturity or, depending on events, for £1,000 after 6 months. The occasion of early redemption is not disregarded under Section 431 ITTOIA 2005 (SAIM3030). The difference between the issue and early redemption prices is more than £2.50 ($\text{£}1,000 \times 0.5\% \times 6/12$). The security is therefore a DDS.

Example 3

Bank C issues a 5-year security that is linked to the FTSE 100 share index. Each security has a nominal value to £100. If the index rises, the investor receives on redemption £100 multiplied by the percentage rise in the index. For example, the index has risen to 150% of its starting value, the investor receives £150. If the index falls, the investor is guaranteed to receive back his or her £100, so the security is not an excluded indexed security (SAIM3050). Since the security may give more than a 2.5% increase in value over the period ($5 \text{ years} \times 0.5\%$), it

is a DDS, even though there is no certainty as to the redemption amount.

36.2.3 *Securities dealt with under other regimes*

Section 432(1) ITTOIA provides:

The following are not deeply discounted securities—

- (a) shares in a company,
- (b) gilt-edged securities that are not strips,
- (c) life assurance policies, and
- (d) capital redemption policies.¹

36.2.4 *Securitised derivatives*

The SAI Manual provides:

3040. Securities which are not deeply discounted securities
[November 2011]

... In practice, therefore, most deeply discounted securities will be securities in the nature of debts, that is, where the issuer has an obligation to make some form of return to the investor.

The same SAI Manual entry formerly provided:

Securitised derivatives

Securitised derivatives present particular problems. These are investment products where the amount which the investor gets back at the end depends on the performance of a share index, or a particular share or shares, or (less commonly) some other asset. The capital initially subscribed by the investor may be completely or partly protected, or it may be possible for the investors to lose the whole of their money.

Some such products, properly analysed, are options, for which the investor pays a premium (these are often described as ‘warrants’). Others may be contracts for differences, or other derivatives. These will not be deeply discounted securities; disposal of an option, or

¹ Section 432(3) ITTOIA provides:

“In this section ‘capital redemption policies’ has the same meaning as in Chapter 9 of this Part (see section 473(2)).”

of a financial future within Section 143 TCGA 1992, will give rise to a capital gain or allowable loss. See also SAIM7000 on the tax treatment of derivatives that generate an interest-like return.

Other securitised derivatives, however, create a debt (in technical terms, they are structured as a debt security plus one or more options or other derivatives). These will be deeply discounted securities, unless they fulfil the stringent conditions to be ‘excluded indexed securities’ (SAIM3050). You should seek advice from CT & VAT (Financial Products and Services Team) if it is unclear whether or not a particular instrument is a deeply discounted security.

There are some deep conceptual issues here.

36.3 Securities denominated in foreign currency

In the following discussion **“a foreign currency denominated security”** is one issued for a foreign currency and redeemable in that currency.

36.3.1 *Is a foreign currency denominated security necessarily a DDS?*

Consider for instance a US Treasury Note issued for \$1,000 and redeemable on maturity at \$1,000 and carrying interest at a market rate. Is a security of that kind deeply discounted? The question (in short) is whether:

the amount payable on maturity may exceed the issue price

This raises a currency translation issue. If:

- (1) “issue price” means the sterling equivalent of the issue price at the time of issue; and
- (2) “the amount payable on maturity” means the sterling equivalent at the time of maturity

then a foreign currency denominated security is a DDS since currency fluctuations could lead to a gain measured by £sterling. If “issue price” means the dollar price and “the amount payable on maturity” means the dollar amount, then the two are equal and the security is not a DDS.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This

is for several reasons. First, the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations. The absence of relief on losses would operate very unfairly. Secondly, if that were not the case, all foreign currency denominated securities would be within the DDS regime.² That would be surprising (and indeed contrary to EU law).³

HMRC agree. SAI Manual provides:

3020 Meaning of deeply discounted security [July 2007]

The test for deep discount is carried out in the currency of issue.

36.3.2 *Foreign currency denominated DDS*

The above paragraph is considering a security whose dollar issue price equals its dollar maturity price. Of course, a foreign currency denominated security would in principle be a DDS if the redemption price may sufficiently exceed the issue price. It is understood that US treasury bills (which do not carry interest) are normally DDSs. I refer to such a security as **“a foreign currency denominated DDS”**.

How does one compute the profit on the disposal of a foreign denominated DDS? The profit is:

the amount by which the amount payable on the disposal exceeds the amount paid by the person to acquire the security.

This raises another currency translation issue. Suppose a person acquires a security on issue for dollars and redeems it for dollars. Is the amount paid to acquire the security:

- (1) The sterling equivalent of the purchase price at the time of issue? Or
- (2) The dollar amount? If so, it is deducted from the dollar amount payable on disposal, to give a dollar profit, translated into sterling at the time of disposal.

The statutory words could be understood either way, so the context must

2 Unless they contained a cap to limit the gain to a sterling amount, which would not normally be the case.

3 The arguments are more fully set out in Ghosh, “Corporate Bonds: If The Cap Does Not Fit” *Taxation*, 7 Feb 2002 p.439 but since HMRC have accepted this view since the publication of Tax Bulletin 9, it is not necessary to consider that here.

resolve the issue. The context shows that the second view is correct. This is consistent with the approach to the definition of a DDS: see above. The same point applies: the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations.

The solution to the same problem for CGT is different.⁴ The reason for this is explained in *Capcount Trading v Evans* 65 TC 545. One important factor in that decision was the provision in the CGT legislation that currency other than sterling is an asset for CGT. There is no similar provision for IT.

36.4 Excluded occasions of redemption

Section 431(1) ITTOIA provides:

An occasion of redemption of a security other than maturity is ignored for the purposes of section 430(1) if the third-party option conditions or the commercial protection conditions are met.

36.4.1 *The third-party option conditions*

Section 431(2) provides:

The third-party option conditions are that—

- (a) the security may be redeemed on the occasion at the option of a person other than its holder,
- (b) the security is issued to a person who is not connected with the issuer, and
- (c) the obtaining of a tax advantage by any person is not the main benefit, or one of the main benefits, that might have been expected to accrue from the provision in accordance with which the security may be redeemed on the occasion.

36.4.2 *The commercial protection conditions*

Section 431(3) provides:

The commercial protection conditions are that—

⁴ See 52.2 (CGT: currency conversion date).

- (a) the security may be redeemed on the occasion as the result of an exercise of an option that is exercisable only on the occurrence of—
 - (i) an event adversely affecting the holder (see subsection (8))⁵,
or
 - (ii) a default by any person, and
- (b) as at the time of the security's issue it appears unlikely that the option will be exercisable on the occasion.

36.4.3 *Restrictions on conditions*

Section 431 provides:

(4) Subsection (1) does not apply to an occasion just because the occasion coincides or may coincide with an occasion meeting the third-party option conditions or the commercial protection conditions.

(5) If—

- (a) the only reason that a security is not a deeply discounted security is that an occasion on which it may be redeemed is ignored because the third-party option conditions are met, and
- (b) at some time after its issue the security is acquired by, or its holder becomes, a person connected with the issuer,

in relation to that time and later this Chapter applies as if the security were a deeply discounted security.

(6) If a person ("P") who is not connected with the issuer acquires—

- (a) a security which is only a deeply discounted security because it was issued to a person connected with the issuer and so fails to meet the condition specified in subsection (2)(b), or
- (b) a security within subsection (5),

this Chapter applies in relation to P as if the security ceased to be a deeply discounted security on the acquisition.

(7) For the purposes of the application of this section to a security, the question whether persons are connected is determined without regard to the security or any other security issued under the same prospectus.

5 “(8) In this section "event adversely affecting the holder", in relation to a security, means an event the occurrence of which appears, as at the time of the security's issue, likely to have an adverse effect on the interests of its holder at the time of the event if there were no provision for redemption on its occurrence.”

36.5 Meaning of “disposal”

Section 437(1) ITTOIA provides:

References in this Chapter to the disposal of a deeply discounted security are—

- (a) to its redemption,
- (b) to its transfer by sale, exchange, gift or otherwise, including a transfer treated as made by subsection (3), and
- (c) so far as not covered by para (a) or (b), to its conversion under its terms into shares in a company or other securities (including other deeply discounted securities).

36.5.1 *“Person making a disposal”*

Section 437(2) ITTOIA provides:

The person treated as making a disposal is—

- (a) in the case of a disposal within subsection (1)(a), the person entitled as the security’s holder to any payment on the disposal,
- (b) in the case of a disposal within subsection (1)(b), the transferor, and
- (c) in the case of a disposal within subsection (1)(c), the person who would be entitled as the security’s holder to any payment on the disposal, if such a payment were made.

36.5.2 *Death of holder*

Section 437(3) ITTOIA provides:

A person who dies while entitled to a deeply discounted security is treated as transferring it immediately before death to the personal representatives.

36.6 Meaning of “profit”

Section 439 ITTOIA provides:

- (1) A person’s profit on a disposal is the amount by which the amount payable on the disposal exceeds the amount paid by the person to

acquire the security.

(2) No account is to be taken of any incidental expenses incurred in connection with the disposal or acquisition.

I refer to this as the DDS profit. The DDS profit is greater than a chargeable gain on a disposal because expenses are disallowed.

36.6.1 *Deemed DDS profit*

Section 440 ITTOIA provides:

(1) On the disposal of a deeply discounted security by a transfer of a kind specified in subsection (2), for the purposes of this Chapter an amount equal to the market value at the time of the disposal is treated as payable.

(2) The transfers are—

- (a) a transfer made otherwise than by a bargain at arm's length,
- (b) a transfer between connected persons,
- (c) a transfer for a consideration which is not wholly in money or money's worth,
- (d) a transfer treated as made by section 437(3) (death), and
- (e) a transfer by personal representatives to a legatee. ...

I refer to the profit on a disposal within this section as “**deemed DDS profit**”.

36.7 Charge to tax on disposal of DDS

Sections 427 and 428 ITTOIA impose the charge:

427 Charge to tax on profits from deeply discounted securities

(1) Income tax is charged on profits on the disposal of deeply discounted securities.

(2) The profits are treated as income for income tax purposes if they would not otherwise be income.

428 Income charged

(1) Tax is charged under this Chapter on the full amount of profits arising in the tax year.

(2) The profits on a disposal are to be taken to arise when the disposal occurs.

429 Person liable

(1) The person liable for any tax charged under this Chapter is the person making the disposal.

36.8 DDS remittance basis

Section 428(3) ITTOIA provides:

If the profits arise on a disposal of securities that are outside the UK—

- (a) they are treated for the purposes of section 830 (meaning of “relevant foreign income”) as arising from a source outside the UK, and
- (b) subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis for a DDS that is outside the UK.

The section uses the words “treated as” because DDS income does not have a source, at least in the traditional sense.⁶

How does one decide whether a security is “outside the UK”? In the HMRC view the test is the residence of the issuer. The former Inspectors Manual para 1541 provided:

Where the security was issued by a UK resident any profit is assessable under Case III of Schedule D. Where the security was issued by a non-UK resident, any profit is assessable under Case IV of Schedule D.

This is not obviously right, but it is as good a test as any other and (in relation to a non-resident issuer) at least we should know where we stand.⁷ This passage is omitted in the SAIM but there is no indication that HMRC practice has changed.

An alternative approach is to say that a security is in the UK if income from it has a UK source and outside the UK if income from it has a non-UK source.⁸ This will usually come to the same thing⁹ and I doubt if the

⁶ See 18.4.2 (Location of source of income when there is no source).

⁷ The position if the issuer changes residence is less clear, but perhaps this does not arise in practice.

⁸ This would be consistent with the AIP scheme, where the test is whether income from the security has a foreign source: see 35.9 (AIP remittance basis). However, the two cases are not the same, because a DDS may not yield any income, so the question

point will ever need to be decided.¹⁰

For completeness: another possible approach is that “outside the UK” means situated outside the UK applying common law situs rules. This too would usually come to the same thing, but it would allow some scope for tax planning. This view is less attractive since (1) common law situs is not generally relevant for IT; (2) one would have expected the drafter to use the word “situate” if it was intended to incorporate a situs rule.

Strictly, one cannot segregate income from capital (for no identifiable part of the proceeds represents the income). But since HMRC do not apply that rule for the accrued income scheme,¹¹ they should logically not take the point in this context either. There is however no discussion in the RDR Manual.

A deemed DDS profit (eg on a gift) cannot be remitted and so is tax free.¹²

36.9 UK resident trust

36.9.1 *UK resident trust (not settlor-interested)*

A UK resident trust is in principle subject to income tax on its DDS profits. Tax is charged at the trust rate, 50%: s.482 ITA.

36.9.2 *UK resident settlor-interested trust*

A DDS profit accruing to UK trustees is not “income” in the general sense and in the absence of express provision it would not fall within s.624 ITTOIA which only applies to income. However s.427(2) ITTOIA directs that the profits are “treated as income for income tax purposes” so it does fall within s.624 ITTOIA. For good measure, s.457 ITTOIA provides:

whether income from the DDS has a foreign source could be a hypothetical question.

9 See 19.6.6 (Interest from securities). Because the rules concerning the location of the source of interest are so unclear, it is impossible to say in what (if any) circumstances the source of the income might be different from the residence of the issuer.

10 If it mattered, the view that income source was the test should be rejected, for if the drafter intended to apply an income-source test, one would have expected the wording to match that used elsewhere for income-source tests. The wording is not very far from the former case IV in s.18 ICTA 1988 (“income arising from securities out of the UK”) but there the words “out of the UK” govern “arising” and not “securities”.

11 See 35.9 (AIP remittance basis).

12 The CGT rule does not apply here; see 10.24 (CGT disposal not for market value).

- (1) This section applies if profits are taken to arise on a disposal of a deeply discounted security by trustees.
- (2) For the purposes of Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), the profits are to be taken to be income arising under the settlement from the security. ...

Thus DDS profits do fall within the settlement provisions.

If the settlor is a remittance basis taxpayer the s.624 remittance basis is available, ie the settlor is not taxed on an unremitted foreign DDS profit.¹³

The rate of tax in the absence of s.624 is 50%, so s.624 can only reduce the tax rate (or make no difference).

36.10 Non-resident individual

Section 368 ITTOIA provides the necessary exemption for non-residents.¹⁴ In short non-resident individuals are not chargeable if the security is out of the UK. They are theoretically chargeable if the security is in the UK but non-residents IT relief is usually available.¹⁵

The temporary non-residence rules do not apply for DDS purposes because (1) these rules do not apply for IT (in particular, DDS) purposes and (2) the rules do apply for CGT purposes but no chargeable gain arises on the disposal of a DDS.¹⁶

36.11 Non resident trust

In the absence of express provision, non-resident trustees would not be charged on foreign DDS profits but could be charged on UK DDS profits. However s.458(1) ITTOIA provides:

Tax is not charged under this Chapter if the disposal is made by the trustees of a settlement¹⁷ and they are non-UK resident.

¹³ See 26.5 (Section 624 remittance basis).

¹⁴ See 18.4 (Why does location of source matter?).

¹⁵ See 39.1 (Non-residents IT relief).

¹⁶ See 36.14 (Interaction with CGT).

¹⁷ "Settlement" here means settlement-arrangement: see s.458(3) which provides:

"In this section 'settlement' has the same meaning as in Chapter 5 of Part 5 (see section 620)."

So non-resident trusts are not subject to tax on DDS, whether UK or foreign.

It is considered that s.624 applies to non-resident settlor-interested trusts as it applies to UK resident trusts. Section 458 does not provide relief since the charge on settlor-interested trusts is not a charge “under this chapter”.

36.12 Transfers of assets abroad

A DDS profit accruing to a non-resident is not “income” so in the absence of express provision it would not fall within the TAA provisions even if it accrued to a person abroad within s.720 or 731. However s.427(2) ITTOIA directs that the profits are “treated as income for income tax purposes” so it does fall within the TAA provisions. For good measure, s.459 ITTOIA provides:

- (1) This section applies if profits are taken to arise on the disposal of a deeply discounted security by a person resident or domiciled outside the UK (“A”).
- (2) For the purpose of determining whether an individual ordinarily UK resident is liable for income tax in respect of the profits, Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) has effect as if the profits, when arising, constituted income becoming payable to A.
- (3) For this purpose it does not matter if A is not liable to income tax under this Chapter because of section 458 (non-UK resident trustees).

Thus DDS profits do fall within the scope of the TAA provisions.

36.12.1 Section 731 ITA

The charge is on the actual profit, not a fictional profit. The proceeds of the disposal represent that profit.

How does the rule that distributed income is not relevant income¹⁸ operate in this context? Is it necessary merely to distribute an amount equal to the DDS profit or is it necessary to distribute the entire proceeds of the transfer (sale) of the security? The matter is analogous to the CGT

¹⁸ See 29.22 (Relevant income of trust distributed as income in year it arises) to 29.26 (Distributed income: HMRC view).

issue which arose when a UK resident foreign domiciled beneficiary sold a non-UK situate asset and realised a chargeable gain. Prior to the 2008 mixed fund rule, if the individual remitted (say) one-half of the proceeds of sale, their were regarded as remitting one-half of the gain.

Inspectors Manual para 1567 explained:

This is because, whilst the income content of any fund is a separate and distinguishable part of that fund, a capital gain is merely part of the whole proceeds of a disposal transaction that has no separate identifiable existence within those proceeds.

The same reasoning would apply here. Thus the only way to avoid relevant income by distribution would be to distribute the entire proceeds of an arm's length disposal. It is conceivable that HMRC will not apply the law on this point strictly, but do not rely on this without clearance.

If there are only fictional profits, because the market value rule applies¹⁹ then s.731 does not apply because fictional income cannot be used to benefit a beneficiary, so it cannot be relevant income.

36.13 Non-resident company

Section 368 ITTOIA provides the necessary exemption for non-residents.²⁰ In short, they are not chargeable if the security is outside the UK. They are theoretically chargeable if the security is in the UK, but see 39.1 (Limit of liability for non-residents). The company DDS income is within the scope of the TAA provisions. There is no group relief so an inter-group transfer may give rise to a charge.

36.14 Interaction with CGT

Section 117(1) TCGA provides the usual definition of corporate bond. Section 117(2AA) provides:

For the purposes of this section "corporate bond" also includes any asset
[i] which is not included in the definition in subsection (1) above and
[ii] which is a deeply discounted security for the purposes of Chapter

¹⁹ See 36.6 (Meaning of "profit").

²⁰ See 18.4 (Why does location of source matter?).

8 of Part 4 of ITTOIA 2005 (see section 430).

Section 117(7) TCGA defines qualifying corporate bond as (in short) any corporate bond issued after 13 March 1984. (The rules for pre-1984 bonds are not considered here.) Thus any DDS is in principle a qualifying corporate bond (“QCB”). Section 115(1) TCGA provides exemption for QCBs:

- A gain which accrues on the disposal by any person of—
- (a) gilt-edged securities or qualifying corporate bonds, or
 - (b) any option or contract to acquire or dispose of gilt-edged securities or qualifying corporate bonds,
- shall not be a chargeable gain.

Thus a DDS is outside the scope of CGT.

CHAPTER THIRTY SEVEN

UNIT TRUSTS

37.1 Unit Trusts – Introduction

This chapter considers unit trusts and Luxembourg Fonds Commun de Placement (which are treated in a similar way).

The taxation of unit trusts needs a book to itself. This chapter focuses on the matters closest to the themes of this book.

37.1.1 *Definition(s) of “unit trust”*

The High Court of Australia rightly say:

“unit trust” ... in the absence of an applicable statutory meaning, does not have a constant, fixed, normative meaning ... ¹

However for most tax contexts there is a statutory definition.

Section 1007(1) ITA provides:

In the Income Tax Acts “unit trust scheme” has the meaning given by section 237 of FISMA 2000.

This is subject to subsection (2).

CGT is effectively the same. Section 99(2) TCGA 1992 provides:

Subject to subsection (3) and sections 99A and 151W(a) below, in this Act—

(a) “unit trust scheme” has the meaning given by section 237(1) of

¹ *CPT Custodian Pty Ltd v State Revenue* (2005) 221 ALR 196 at [15] accessible www.austlii.org.

the Financial Services and Markets Act 2000 ...

So we turn to s.237(1) FSMA, which provides::

In this Part “unit trust scheme” means a collective investment scheme under which the property is held on trust for the participants.

That is pleasingly short, but the definition of “collective investment scheme” needs a book to itself and is not discussed here.

37.1.2 *Exemption for limited partnerships*

Section 99(3) TCGA 1992 provides:

The Treasury may by regulations provide that any scheme of a description specified in the regulations shall be treated as not being a unit trust scheme for the purposes of this Act; and regulations under this section may contain such supplementary and transitional provisions as appear to the Treasury to be necessary or expedient.

The regulations are Capital Gains Tax (Definition of Unit Trust Scheme) Regulations 1988 which provide:

2 In these Regulations unless the context otherwise requires—

"limited partnership" means a limited partnership registered under the Limited Partnerships Act 1907 and "general partner" and "limited partner" have the same meanings as in that Act;

"limited partnership scheme" means a unit trust scheme of the description specified in regulation 4;

"participant", in relation to a unit trust scheme, shall be construed in accordance with section 235 of the Financial Services and Markets Act 2000;

"the principal Act" means the Capital Gains Tax Act 1979;

"scheme property" means, in relation to a unit trust scheme, property of any description, including money, which is held on trust for the participants in the scheme;

"unit trust scheme" means a scheme which, apart from these Regulations, is a unit trust scheme for the purposes of the principal Act.

3 Exception of certain unit trust schemes from the principal Act

A unit trust scheme which is—

(a) a limited partnership scheme ...²
shall be treated as not being a unit trust scheme for the purposes of the principal Act.

4 Description of a limited partnership scheme

A unit trust scheme is a limited partnership scheme when the scheme property is held on trust for the general partners and the limited partners in a limited partnership.

There is similar provision for IT. Section 1007(2) ITA provides:

The Treasury may, in relation to a unit trust scheme within the meaning given by section 237 of FISMA 2000 whose trustees are UK resident, by regulations provide that the scheme is not to be a unit trust scheme for the purposes of the definition in section 989 of “unauthorised unit trust” if it is within a specified description. ...

The regulations are Income Tax (Definition of Unit Trust Scheme) Regulations 1988 which provide:

3 Exception of certain unit trust schemes from section 354A

Subject to the provisions of these Regulations, a unit trust scheme which is ...

(c) a limited partnership scheme ...³
shall be treated as not being a unit trust scheme for the purposes of section 354A [ICTA 1970, now s.504 ITA and s.621 CTA 2010.]

8 Description of a limited partnership scheme

A unit trust scheme is a limited partnership scheme when the scheme property is held on trust for the general partners and the limited partners in a limited partnership.

This does not apply in terms to a foreign law limited partnership, though in the case of an EU law limited partnership, the discrimination is in breach of EU law so it is considered that HMRC cannot tax an EU law limited partnership as a collective investment scheme.

-
- 2 The omitted words relate to approved profit sharing schemes and employee share ownership plans, which are not discussed here.
 - 3 The omitted words relate to enterprise zone property schemes, charitable unit trust schemes, approved profit sharing schemes and approved employee share ownership plans, which are not discussed here.

37.2 Income accruing to unit trust

37.2.1 *Authorised unit trust*

Section 617(1) CTA 2010 provides:

In respect of income arising to the trustees of an authorised unit trust, and for the purposes of the provisions relating to relief for capital expenditure, the Tax Acts shall have effect as if—

- (a) the trustees were a UK resident company; and
- (b) the rights of the unit holders were shares in the company.

So authorised unit trusts are not transparent for IT purposes.

ITTOIA EN Vol II discusses the situs of AUT income:

51. It is possible for the FSA to recognise a non-UK unit trust scheme for marketing into the UK. However, only those UK tax resident unit trusts that are “authorised” by the FSA come within section 468 of ICTA. Section 468(1) of ICTA provides that the Tax Acts apply to UK authorised unit trusts and shall have effect as if the trustees of the authorised unit trust were a company resident in the UK. Although the application of section 468(1) of ICTA is by reference to the trustees’ income (and relief for capital expenditure), the treatment of the trustees as a UK resident company carries through for the purposes of taxing interest distributions treated as made to unit holders. That is because section 468L(2) of ICTA provides that the Tax Acts shall have effect as if such interest distributions were made “by the company referred to in section 468(1)”. As these distributions are treated as made by such a company, that is a UK resident company, they can only be UK source income.

The taxation of AUTs is not discussed here.

37.2.2 *Unauthorised unit trust: UK trustees*

Section 504 ITA provides:

- (1) This section applies for income tax purposes in relation to an

unauthorised unit trust if the trustees are UK resident.⁴

(2) If income arises to the trustees, the income is treated as the income of the trustees and not of the unit holders.

...

(5) Sections 494 and 495 and 496B do not apply in relation to payments made by the trustees.

So unauthorised unit trusts with UK resident trustees are not transparent for IT purposes. The taxation of these unit trusts is not discussed here.

37.3 Unauthorised unit trust: foreign trustees

This leaves the question of unauthorised unit trusts with non-resident trustees. There is no statutory provision so we are thrown back to first principles. It is considered that ordinary interest in possession trust rules apply. Depending on the drafting and proper law, a unit trust may be a transparent, *Baker* style trust or non-transparent.⁵ HMRC agree. The Life Assurance Manual provides:

4C.312. Tax Transparency for Income but Not Gains

An offshore unit trust will not usually be an authorised unit trust (because of the requirements of section 243(5) FISMA 2000). Nor does section 469 ICTA (LAM 4C.302 above) apply to it. So ordinary trust rules apply and if it is of the transparent type (analogous to a “Baker” trust), a life company is chargeable on its share of the trust income as it arises. This transparency does not apply to capital gains because of section 99(1) TCGA 1992 (which treats all unit trust schemes as companies and hence opaque). ...⁶

The Offshore Funds Manual discusses *Baker* unit trusts::

OFM27330 - Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: transparent funds - Regulation 97 [January 2012]

⁴ The CT equivalent is s.621 CTA 2010.

⁵ See 25.1 (IP trusts: income tax). This view is supported by *Minister of National Revenue v Trans-Canada Investment Corporation* [1956] SCC 49 accessible www.kessler.co.uk, where the Canadian Supreme Court applied *Baker* to a unit trust arrangement.

⁶ The same point is made at 4C.401.

... Income: UK tax treatment of investors

No matter what the legal form of a transparent reporting fund, for UK tax purposes the income of an income transparent fund is treated as arising directly to its investors (UK investors are charged to tax on income arising net of a deduction for proper expenses of the management of the fund in question, and this is the case for both unit trusts and contractual arrangements). So, for example, if a fund receives interest income then UK investors are charged to tax on their proportionate share of that income as it arises, irrespective of whether or not it is actually distributed to them. Investors should receive a “voucher” or other report from the fund to tell them what proportion of the fund’s income they are entitled to, and the split between interest, dividends, property income, etc. Investors should ask their fund manager for such a voucher or report if they do not receive one.

The OFM also discusses *Garland* unit trusts:

OFM27320 Participants chargeable to income tax: other non-transparent funds - Regulation 96 [January 2012]

... Foreign unit trusts that are not transparent for income purposes are sometimes referred to as ‘Garland’ unit trusts (following the case of *Garland v Archer-Shee* (15TC693))...

Non-transparent unit trusts

UK investors in foreign unit trusts that are non-transparent for income purposes are taxable on their proportionate share of income (as ascertained after the trustees have met the expenses of administering the trust) when it is indefeasibly allocated to them, regardless of whether the income is paid to them or accumulated. Unlike the position for transparent unit trusts, that income is taxable as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005, or Chapter 8 of Part 10 CTA 2009) and the tax rates applying will be those applying to such income.

The former Inspectors Manual provided:

1617 Foreign investment organisations: Unit trust Published: 9/95

Many unit trusts are established outside the UK (for example, in the Channel Islands, Isle of Man, West Indies and Australia) under arrangements identical with or similar to those operating in the UK. All such foreign unit trusts are unauthorised unit trusts (see IM4176) and are, therefore, outside the scope of Section 468 ICTA (see CT3930 onwards), but are unit trust schemes for the purposes of CGT (see

TCGA, s 99(1), and CG41300 onwards).

Normally, a UK resident shareholder in a foreign unit trust is assessable under Case V by reference to his share of the income of the fund⁷ whether [1] this is paid out to him in cash or [2] used to purchase additional units.

Point [2] is correct if the income is applied voluntarily by the shareholder to purchase additional units. In other cases it is doubtful. HMRC recognise this in Offshore Funds Guide para 1070:

Reinvestment Mechanics [February 2006]

In order to meet the distribution test a fund will normally have to have “paid” a distribution which must be in a form that, to the extent that it does not form the profits of a trade, profession or vocation, would be chargeable, in the case of an individual resident in the UK, to Income Tax under a provision specified in Section 830(2) of ITTOIA 2005 or, in the case of a company resident in the UK, chargeable to Corporation Tax under Case III or Case V of Schedule D in accordance with Section 18 ICTA 1988. A fund with automatic reinvestment of “accumulation” shares may not be able to meet this criterion as there may be doubt about whether it has “paid” a distribution that is capable of being construed as income for UK tax purposes.

Where such a fund nevertheless wishes to benefit from having distributing fund status it can reach agreement with HMRC that it will apply “reinvestment mechanics”. The important point here is that the mechanics of reinvestment establish in principle the chargeability to UK tax of the distribution.

We take the view that, it would satisfy “paid” for the purposes of the test, provided the distribution

- passes out of the fund’s control and
- into the hands of a third party, who can **clearly be seen** to receive the distribution and
- to reinvest it in further shares/units or increase in capital value of the existing shares/units on behalf of the relevant participator.

This does require a physical separation of the distribution from the fund and its subsequent reinvestment, not just a paper transaction.

(Emphasis original)

⁷ This assumes the unit trust is a non-transparent *Garland*-style trust; or else that it holds only foreign investments.

Everything depends on the documentation concerned.

37.3.1 *Baker or Garland?*

This depends on the applicable law⁸ and the drafting. A standard unit trust form provides:

On each Distribution Date the Trustee shall calculate and distribute among the Holders rateably in accordance with the number of Units held or deemed to be held by them respectively on the Distribution Date such amount as shall in the opinion of the Trustee represent the amount of income available for distribution and accordingly such income shall not form part of the Trust Fund. No amount payable to the Holder in respect of any distribution or redemption shall bear interest. Upon the expiry of the period of ten years after any such amount first becomes payable the Holder and any person claiming through, under or in trust for him shall forfeit any right thereto, and such amount shall be retained as part of the Trust Fund or otherwise dealt with in accordance with the provisions of this Instrument.

It is suggested that this creates a *Garland*-style trust even in a *Baker* jurisdiction.

37.3.2 *Residence of trustees of unit trust*

The residence of the trustees of a unit trust is important for IT purposes, because the rules set out above depend on whether or not the trustees are UK resident. However, there is no definition of residence for this purpose. The common IT/CGT definition of residence of “trustees of a settlement”⁹ does not apply, because a unit trust is not a “settlement”.¹⁰ Ordinary rules of residence apply to determine the residence of the trustees in their private capacities.

The residence of the trustees of a unit trust is also important for determining whether the unit trust is an offshore fund, and (more or less)

8 See 25.5 (Baker or Garland trust jurisdiction?).

9 See 4.1 (Residence of trustees).

10 The term “settlement” in this context is not expressly defined, but property in a unit trust is not “settled property” for the purposes of IT: s.466 ITA. It is considered that “settlement”, in this context, requires settled property (as defined).

the same principles apply.¹¹

37.4 Gains accruing to unit trust

Section 99(1) TCGA provides:

This Act shall apply in relation to any unit trust scheme as if—

- (a) the scheme were a company,
- (b) the rights of the unit holders were shares in the company, and
- (c) in the case of an authorised unit trust, the company were resident and ordinarily resident in the UK,

except that nothing in this section shall be taken to bring a unit trust scheme within the charge to corporation tax on chargeable gains.

There are three categories of unit trust for CGT:

(1) Authorised unit trust: gains are exempt from CGT.¹²

(2) Unauthorised unit trusts:

- (a) UK resident unauthorised unit trust: gains are subject to CGT
- (b) Non-resident unauthorised unit trust: gains not generally¹³ subject to CGT.

So residence of a unit trust is therefore important for CGT purposes. Statute states that authorised unit trusts are UK resident but does not define the test of residence for unauthorised unit trusts. Since a unit trust is treated as a company, it is considered that the test of residence for CGT is the corporate test, ie, central management and control.

Gains accruing to a non-resident “close” unit trust fall in principle within the scope of s.13 TCGA, and may be attributed to UK resident unit holders.¹⁴

37.5 Situs of unit

37.5.1 *Situs for IHT*

The situs of a unit in an authorised unit trust is not normally relevant for

11 For completeness, see 33.3.2 (Residence of EU funds).

12 Section 100 TCGA.

13 The usual exceptions apply, for UK trades with a UK PE, and (from 2013) for residential property above £2m.

14 Ghosh agrees: “When is a company not a company?” PTPR Vol 7 p. 241.

IHT.¹⁵ The situs of a unit in an unauthorised unit trust is important for IHT.

A unit is quite unlike an equitable interest under a conventional trust. The rights of a unit holder arise from contract as well as trust, and a unit is in many ways analogous to a share in a company.¹⁶ One should not apply rules governing other kinds of equitable interests without considering this.

It is considered that share/security situs rules should normally be applied, so that the place of the register is normally the determining factor. HMRC accept this.¹⁷

Another possible view is that situs depends on the residence of the trustees. In practice a situation where the place of residence of the trustees is different from the place of the register would be rare so the priority between the two tests may never need to be decided. Trustee residence determines whether a unit trust is treated as a company or offshore fund for IT and CGT purposes.¹⁸ It might therefore be said to be consistent with the tax legislation if situs of a unit for IHT depends upon the residence of the trustees. However, situs for IHT is based on private international law, not tax law, so the relevance of the unit trust tax provisions is very marginal.

What is reasonably clear is that situs of the unit does not depend on the situs of the underlying assets of the unit trust. The idea that one looks at the underlying assets, at first sight seems sensible, as it is consistent with the traditional test for situs of a bare trust. But it is unsound for two reasons:

15 See 58.3 (Non-settled property: authorised unit trusts and OEICs).

16 Thomas & Hudson, *The Law of Trusts*, (1st ed., 2004), paras 51.26–28, says that the rights are *primarily* contractual, but to classify overlapping rights as “primary” and “secondary” seems to me somewhat arbitrary.

17 Press Release 16 October 2002 (OEICs and AUTs) para 9 stated (before the introduction of IHT relief for AUTs):

“[OEICs and units in Authorised Unit Trusts] are treated as situated in the UK in the same way as other UK registered shares. That is so even if the ‘underlying’ assets of the collective investment fund are non-UK assets.”

See too [1998] PCB 172. This conclusion is supported by *CPT Custodian Pty v Commissioners of State Revenue* (2005) 2 ALR 196 accessible www.austlii.org (unit trust holders not joint “owner” of land for purposes of Australian rating laws).

18 See 33.3 (Meaning of “offshore fund”) and 37.2.2 (Unauthorised unit trust: UK trustees).

- (1) If the underlying assets are spread across different jurisdictions it would be impossible to ascertain the situs of the unit (if a unit is regarded as a single asset). The unit should not be regarded as several separate interests in as many assets as are held by the unit trust, looking through the unit trust like a bare trust, as this is to ignore the nature of the unit.¹⁹
- (2) The proposal to look to the situs of the underlying assets is unworkable because the unit holder will not normally be able to ascertain what the underlying assets are at any particular moment. (Accounts of the unit trust may disclose the position at the end of an accounting period but that will not help as assets are normally bought and sold constantly by the trustees of the unit trust. The unit holder normally has no further right to information.)

Although the consequence is that one can alter situs by interposition of a unit trust, that is not so surprising: one can do the same with an OEIC.

37.5.2 *Situs of unit for CGT*

If the unit trust is governed by a foreign proper law, registered units are situate where they are registered, because that is the rule for shares²⁰ and the unit is deemed to be a share. This is the same as the private international law rule.

If the unit trust is governed by a UK proper law, a unit is probably UK situate under the UK law rule,²¹ or under CGT situs rules for shares in UK incorporated companies.²² However, a UK law unit trust will in practice have a register here, so the question of priority between the place-of-register rule and the UK law rule will not arise.

The situs of the underlying assets is not relevant. Section 99 clearly overrides s.60 TCGA. A unit is an asset for CGT purposes, rather than an interest in an asset, so that the co-ownership rule is not relevant.²³

19 A similar argument applies in relation to the situs of an equitable interest under a substantive trust.

20 See 78.6 (Registered securities: non-UK company).

21 See 78.13.2 (The UK law rule).

22 See 78.5 (Securities of UK incorporated company). This assumes that a unit trust with a UK proper law should be regarded for CGT as a company incorporated in the UK. That seems the better view, though the contrary is arguable.

23 See 78.3 (Co-ownership).

37.5.3 *Residence of trustees and situs*

The residence of the trustees is not relevant for situs, though non-resident trustees are required if it is desired that the units are not to be chargeable securities for SDRT purposes.²⁴

37.6 Gain accruing on disposal of unit

An offshore unit trust will be an offshore fund. It may qualify as a reporting fund. If it does not, a gain accruing on a disposal of a unit will be an offshore income gain.²⁵

37.7 Luxembourg Fonds Commun de Placement

Section 103A TCGA provides:

- (1) This Act applies in relation to a relevant offshore fund as if—
 - (a) the fund were a company, and
 - (b) the rights of the participants in the fund were shares in the company.
- (2) An offshore fund is a relevant offshore fund if—
 - (a) it is not constituted by a company or by two or more persons carrying on a trade or business in partnership, and
 - (b) it is not a unit trust scheme (see section 99).
- (3) In this section and section 103B “offshore fund” has the meaning given in section 355 of TIOPA 2010; “participant”, in relation to a fund, have the meanings given in section 362(1) of that Act.

Offshore Funds Manual provides:

OFM07100 Application of S103A TCGA 92 to interests in arrangements that create rights in the nature of co-ownership ownership - Section 103A TCGA 1992 [January 2012]

Certain contractual arrangements have historically been treated as transparent for both income and capital gains purposes (for example, Luxembourg Fonds Commun de placement (‘FCPs’)). But whilst such funds came within the previous definition of an offshore fund, the

²⁴ See s.99(5A) FA 1986.

²⁵ See 33.3 (Offshore funds).

offshore funds regime for taxing offshore income gains was not applicable as investors were treated as holding, for capital gains purposes, interests in the underlying assets rather than in the fund itself. This led to considerable difficulties for investors when they disposed of their interests, or when new investors were admitted to the fund, as capital gains computations could become very complex. This is not the case for interests in offshore unit trusts which were and are subject to section 99 TCGA 1992, so that for the purposes of tax on chargeable gains a unit trust is treated as if the fund was a company, and the rights of the participants in the fund were shares in that company.

Section 103A TCGA 1992 was introduced by Part 2 of Schedule 22 Finance Act 2009 to align the treatment of interests in arrangements that create rights in the nature of co-ownership with that of interests in unit trusts. That is, those arrangements are treated as opaque for capital gains purposes from the operative date (see below), so that Section 103A shifts the taxation of gains arising to UK residents to the time when they dispose of their interest in a fund.

Section 103A does not change the tax treatment of such arrangements for income purposes – they remain fiscally transparent. Therefore, investors are entitled to income as it arises (from whatever source or country) and UK investors are taxable on such income as it arises, regardless of whether income is actually distributed. Income arising retains its character where arrangements are fiscally transparent, so for example if a fund receives income from property situated in the UK then UK investors would be chargeable to tax as if they had received that income directly. ...

CHAPTER THIRTY EIGHT

PARTNERSHIPS

38.1 Partnerships – Introduction

A full discussion of partnership taxation would require a book to itself and in this chapter I focus on aspects relevant to the themes of this book.

I do not consider losses, or the position of corporate partners within the scope of corporation tax.

38.1.1 *Cross references*

This chapter considers aspects of partnerships which are more conveniently addressed in isolation. I have generally preferred to deal with partnership issues as they arise in the context of other topics.

IHT: see 77.28 (Situs of partnership share).

POA issues: see 72.22 (Partnerships).

Foreign partnerships: see 79.15 (Jersey general and limited partnerships) and 79.16 (Foreign limited liability partnership).

Remittance issues: see 10.28 (Partnerships).

Offshore funds: see 33.3.4 (Whether partnerships are offshore funds); 34.6 (OIG accruing to partnership).

38.2 “Partnership” “person” “trade” and “firm”

38.2.1 *Partnership*

“Partnership” is not defined¹ in tax legislation so it has its general (partnership law) meaning.

¹ Except in relation to LLPs; see 38.7 (Limited liability partnership).

38.2.2 *Is a partnership a “person”?*

The use of the word “person” always requires some care.

The starting point is that “person” has a legal sense, distinct from the ordinary meaning (if there is such a thing). This is sometimes reflected by the expression “legal person” (ie something that the law regards as a person). Garner comments:

“So far as legal theory is concerned, a person is any being whom the law regards as capable of rights and duties. any being that is so capable is a person, whether a human being or not...”² Lon Fuller, among others, has questioned whether *person* is the most desirable word for the concept. What term might be better? Fuller suggests *legal subject* or *right-and-duty bearing unit*.³ On second thought, perhaps *person* is not quite so bad.⁴

An English⁵ partnership is not a legal person, that is, it is not a legal entity distinct from the partners.

The rule that English partnerships are not legal persons could have been (more or less) undone by sch.1 Interpretation Act 1978 which provides that for the interpretation of statutes from 1889:

“Person” includes a body of persons corporate or unincorporate.

A partnership is a “body of persons” in the ordinary sense of that phrase,⁶ and is “unincorporate” and so an English partnership is a person in the Interpretation Act sense. Although the position strictly is that references to person in statutes *prima facie* include even an English partnership, the rule that English partnerships are not legal persons is very deeply ingrained and in practice no-one usually takes much notice of the

2 Garner cites Salmond, *Jurisprudence*, 12th ed (1966) p.299.

3 Garner cites Fuller, *Legal Fictions* (1967) p.12-14.

4 Garner, *Dictionary of Legal Usage* (3rd ed, 2011) entry under *Peterson*.

5 The same applies to a Northern Ireland partnership. For the purposes of this chapter, I use the expression “partnership” to include a general partnership and a limited partnership, as no difference is to be drawn between them.

6 “A partnership is, as a matter of the ordinary use of English, plainly a body of persons”; *Padmore v IRC* 62 TC 352 at p.377. However it appears that a partnership is not a body of persons within the definition in s.989 ITA: see at p.377.

Interpretation Act definition; its application is more or less optional since it does not apply “where the context otherwise requires.” I suspect that this definition is directed to unincorporated associations rather than partnerships.

A Scottish partnership is a legal person.

The difference between England and Scotland is not in practice as important as might appear at first sight:

In order that the Rule⁷ may be applicable there must first of all be “a person charged”. The word “person” is in the singular but it includes the plural and also any body of persons corporate or unincorporate (Interpretation Act, 1889 [now Interpretation Act 1978]). In considering whether a partnership or a group of persons associated in partnership constitutes “a person charged” within the meaning of the Rule, I think it right to lay aside any preconceptions derived either from the law of England or from the law of Scotland as to the technical legal nature of a partnership. In Scotland a firm is “a legal person distinct from the partners of whom it is composed” (Partnership Act, 1890, Section 4 (2)), but this is not so under English law. For the present purpose this distinction should, in my opinion, be disregarded. The Income Tax Acts are ... equally applicable on both sides of the border and the language which they employ ought to be construed so as to have, as far as possible, uniform effect in England and in Scotland alike.⁸

Fundamentally, the context governs the sense and may show that the word “person” in any particular provision is used in a way which does or does not include a partnership.

In practice the starting point for the IT and CGT status of partnerships is to be found in s.848 ITTOIA and s.59 TCGA from which the principles of transparency (and non-personality) can be deduced.

A LLP is a legal person, and a body corporate, but for tax purposes it is usually treated in the same way as an ordinary partnership: see 38.7.3 (Income tax treatment of LLP).

As to whether a partnership is a person for the purposes of the OECD

7 Rule 9 of the rules applicable to Case I and Case II of Schedule D of the Income Tax Act 1918; there is no equivalent in current legislation, but this does not affect the point being made.

8 *R v General Commissioners of Income Tax for The City of London ex p. Gibbs* 24 TC 221 at p.247; the point is also made at p.244.

model treaty, see 5.15.1 (Is a partnership a "person" for treaty purposes?).

38.2.3 “*Trade*”

Before discussing “firm” we need to consider ITTOIA’s idiosyncratic definitions of “trade”. Section 847 ITTOIA provides:

- (2) The provisions of this Part which are expressed to apply to trades also apply, unless otherwise indicated (whether expressly or by implication)—
 - (a) to professions, and
 - (b) in the case of this section and sections 849, 850, 857 and 858 to businesses that are not trades or professions.
- (3) In those sections as applied by subsection (2)(b)—
 - (a) references to a trade are references to a business, and
 - (b) references to the profits of a trade are references to the income arising from a business.

Thus the word “trade” in part 9 ITTOIA always includes profession (it would be appropriate to simplify the law by abolishing all distinctions between professions and trades). The word “trade” sometimes includes “business”. Since it is not convenient to use the same word in two different senses, when trade is used in the wider sense, I refer to it as “**trade (including business)**”.

38.2.4 “*Firm*”

We can now turn to the definition of “firm”. Section 847(1) ITTOIA provides:

In this Act persons carrying on a trade [including business] in partnership are referred to collectively as a “firm”.

This is the same as the definition of “firm” in the Partnership Act 1890.⁹

⁹ The Partnership Act 1890 provides:

“1(1) Partnership is the relation which subsists between persons carrying on a business in common with a view of profit. ...

4(1) Persons who have entered into partnership with one another are for the purposes of this Act called collectively a firm ...”

In practice “partnership” and “firm” are used interchangeably.

38.3 Transparency of partnership for IT

After a (somewhat unnecessary) overview in accordance with the principles of Plain English Drafting,¹⁰ s.848 ITTOIA provides:

848 Assessment of partnerships

Unless otherwise indicated (whether expressly or by implication), a firm is not to be regarded for income tax purposes as an entity separate and distinct from the partners.

ITTOIA EN provides:

1711. This section makes it clear that, for income tax purposes, a firm is not an entity distinct from the partners in the firm. It is based on section 111(1) of ICTA.

1712. In the case of firms established under English law this provision merely confirms their position under that law. But Scottish firms, for example, are legal entities. This provision ensures that all firms are treated in the same way.

So partnerships are transparent for IT ie partnership income is regarded as income of the partners and not of the partnership as such.

IT transparency follows from basic principles, not from this statutory provision.¹¹ In England this is clearly the case. IT transparency is a necessary consequence of the partnership law rule that the partners are joint owners of the partnership assets, and that an English law partnership does not have legal personality, ie it is itself not a person. For unless partnership income accrued to the partners, it would not accrue to anyone,

10 Section 846 ITTOIA provides: “This Part contains some special rules about partnerships.”

11 This provision only dates from the FA 1995. Yet the IT transparency of partnerships has been settled tax law since early times: *Dreyfus v IRC* 14 TC 560. The predecessor provision, s.111 ICTA 1988, perhaps assumed but did not prescribe IT transparency. (“Where a trade or profession is carried on by two or more persons jointly, income tax in respect thereof shall be computed and stated jointly, and in one sum, and shall be separate and distinct from any other tax chargeable on those persons or any of them, and a joint assessment shall be made in the partnership name.”)

and the partnership income must accrue to some person or persons if it is to be taxed.

In Scotland too, IT transparency follows from basic principles and not from the statutory provision. The Law Commission Report on Partnership Law provides:¹²

The Inland Revenue justify their approach to UK partnerships¹³ by reference to the following three characteristics:

- (1) the partners carry on the business of the partnership with a view to profit;
- (2) every partner is liable jointly or jointly and severally with the other partners for all the debts and obligations of the partnership; and
- (3) the partners own the business, each having at least an indirect share in the net assets of the partnership.¹⁴

That is, the fact that a Scots partnership does have legal personality does not necessarily require the conclusion that income accrues to the partners and not to the partnership. Underlying this issue is some vagueness or ambiguity in what the concept of legal personality means or entails. Of course, the Courts' natural inclination to minimise taxation differences between English and Scots partnerships has been an influence in reaching this legal analysis.

The practical reader might ask impatiently whether it matters that IT transparency follows from basic nature of a partnership or from the statutory provision. It does not matter so far as the settled rule is that partnership income or gains accrue to the partners, but identifying the nature of a partnership is the first step when any questions arise relating to partnerships, so the question often does matter.¹⁵

12 Law Com 283 (2003) para 4.18.

13 [Footnote original] This covers both the English law partnership and the Scots law partnership notwithstanding that the former has no separate legal personality and the latter has separate legal personality.

14 [Footnote original] See *Memec plc v IRC* 71 TC 77 and in particular Peter Gibson LJ at pp.111-113. Neither the separate personality of the Scottish partnership nor the absence of mutual agency in Scots law prevented the conclusion that in substance the position of the partners in a Scottish partnership in relation to the profits was the same as in an English partnership (p.113B-C).

15 See 10.28 (Partnerships).

38.3.1 *Allocation of profits/losses between partners*

Section 850 ITTOIA provides:

(1) For any period of account a partner's share of a profit or loss of a trade carried on by a firm is determined for income tax purposes in accordance with the firm's profit-sharing arrangements during that period.

This is subject to sections 850A and 850B.

(2) In this section and sections 850A and 850B "profit-sharing arrangements" means the rights of the partners to share in the profits of the trade and the liabilities of the partners to share in the losses of the trade.

Sections 850A and 850B concern losses and are not discussed here. Section 851 ITTOIA extends the rule to non-trading income:

(1) This section applies if—

- (a) sections 849 and 850 apply in relation to the profits or losses of a trade carried on by a firm, and
- (b) the firm has other income or losses.

(2) Those sections also apply as if references to the profits or losses of the trade were references to the other income or losses.

38.4 Partnership income: remittance basis

Section 857 ITTOIA provides:

(1) This section applies if—

- (a) a firm carries on a trade [including business] wholly or partly outside the UK,¹⁶
- (b) the control and management of the trade [including business] is outside the UK, and
- (c) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to a partner for a tax year.

(2) The partner's share of the profits of the trade [including business] arising in the UK is determined in accordance with sections 849 to 856.

16 Section 857(1)(a) appears to be otiose because if the condition in s.857(1)(b) is met the condition in s.857(1)(a) must be met. But it does not matter.

- (3) The partner's share of the profits of the trade [including business] arising outside the UK is treated as relevant foreign income.

The significance of s.857(3) – treating partnership income as RFI – is that the income can qualify for the remittance basis.

38.4.1 *Segregating partnership profits*

Suppose:

- (1) profits of a partnership trade arise partly in and partly outside the UK; and
- (2) a partner receives a share of those profits.

There is an apportionment to determine the profits arising in/outside the UK.¹⁷ The profits that the partner receives constitute a mixed fund, partly RFI (mixed fund category (d)) and partly other income (mixed fund category (i)). A remittance from such a fund follows the mixed fund rule; later years before earlier, and RFI of a year before the other income of the year.

On the other hand, suppose:

- (1) profits of a partnership trade arise partly in and partly outside the UK; and
- (2) a partner receives a share of profits arising outside the UK only.

In that case all the income that the partner receives is RFI. If a partnership includes partners who are remittance basis taxpayers, it may therefore be important for a partnership, if it can, to segregate the two parts of its trade so it can identify which parts of its profits arise in and which parts arise outside the UK.

38.4.2 *Control and management*

The test is control and management of the trade, not control and management of the partnership, but that will make not usually make any difference.

Normally a remittance basis taxpayer will want to argue that a partnership trade is controlled abroad, to qualify for the remittance basis, and HMRC will want to argue that control is here. However, if the

¹⁷ See 15.19 (Trade partly in UK: apportionment).

partnership makes losses the boot may be on the other foot: UK partners may argue for control in the UK, to obtain more generous loss relief.

The expression “control and management” is of course from the company residence test, and it is considered that it should be given the same meaning here. Thus the company residence case law gives guidance.¹⁸ The former ITH provided at para 1612:

Generally speaking we follow the thinking on companies and look at the place of the highest level of management rather than day-to-day management. Outside textbooks follow the same line.

In deciding the location of the control and management of a firm with both UK and overseas partners, we would usually regard as significant such factors as the comparative seniority of the partners in age and experience (a simple head count will not do of course), the extent of their interests in the firm, the source and control of the finance, the places of decision on policy and major transactions, the places and locations of partners’ meetings and what was done at those meetings. The place of meetings incidentally is not a conclusive factor any more than it is – or ought to be – for companies. So the nature of the business done at the meeting is important. Is it really about control and management or just part of a facade to mislead us about the place of actual control and management?

The former ITH continued with another interesting point at para 1613:

[Section 857 ITTOIA] refers simply to control and management being abroad and the view which we have, in general, adopted in determining whether the Section applies is that this means control etc must be wholly abroad. The strength of this view has never been tested in the Courts and the word ‘wholly’ does not appear in the Act. It is sometimes put to us that where control and management is partly abroad then [section 857] applies. On the other hand, we have argued that because the Section says ‘is situated abroad’ it means just that and if control is partly here then it is not abroad.

The Commissioners would normally adopt a broad approach, looking at

18 There was a discussion in the former ITH at para 1614 as to whether “control and management” are two distinct tests with distinct meanings, or a composite phrase. If my approach is right, the words are a single composite phrase.

the whole picture in order to identify one overall place of control where possible, and situations where control was located in the UK and abroad would be rare. If it did arise, the HMRC view seems sound.

In *Mark Higgins Rallying v HMRC* [2011] SFTD 936 the Tribunal said:

51. We consider the appropriate test for the location of control and management of the business of a partnership is that adopted by the courts in relation to residence of companies. We note the same conclusion was reached by HMRC and stated in their Manual; also that it was the one argued for before us by the Partnership.

52. We have found helpful the summary put forward by the Special Commissioners in *Untelrab*¹⁹ (at [74]):

“From these authorities we have identified the following principles: that the residence of a company is where the directors meet and transact their business and exercise the powers conferred upon them; that if the directors meet in two places then the company's residence is where its real business is carried on and the real business is carried on where the central management and control actually abides; that a determination as to whether a case falls within that rule is a pure question of fact to be determined by a scrutiny of the course of business and trading; that the actual place of management, and not the place where a company ought to be managed, fixes the place of residence of a company; ... and that when deciding the issue of residence one should stand back from the detail and make up one's mind from the picture which the whole of the evidence presents.”

53. Also, the views of the Tribunal in *Laerstate*²⁰ (at [27]-[29]):

“There is no assumption that [central control and management] must be found where the directors meet. It is entirely a question of fact where it is found. Where a company is managed by its directors in board meetings it will normally be where the board meetings are held. But if the management is carried out outside board meetings one needs to ask who was managing the company by making high level decisions and where, even where this is contrary to the company's constitution.

It is significant, we think, that Lord Loreburn (in *De Beers*²¹) referred to the test as being where central management and control 'abides'. This is a test that does not confine itself to a consideration

19 *Untelrab Ltd v McGregor* [1996] STC (SCD) 1.

20 *Laerstate BV v HMRC* [2009] SFTD 551.

21 *De Beers Consolidated Mines Ltd v Howe* 5 TC 198.

of particular actions of the company, such as the signing of documents or the making of certain board resolutions outside the UK if, in a given case, a more general overview of the course of business and trading demonstrates that as a matter of fact central management and control abides in the UK. As Lord Loreburn said (at 212-213), the factual question must be considered 'upon a scrutiny of the course of business and trading'.

This is consistent with the analogy with individual residence which was the basis on which Lord Loreburn propounded the central management and control test. Just as for an individual, for example, where a temporary departure from the UK would not of itself give rise to a change of residence, the residence of a company will not fluctuate merely by reason of individual acts of management and control taking place in different territories. The whole picture must be considered in each case.”...

55. The position must be considered for each tax year under appeal but, as per *Laerstate*, the place of residence of the Partnership will not fluctuate from year to year merely by reason of individual acts of management and control taking place in different territories....

62. We find that the place where certain contracts – even important ones such as the manufacturers’ works team agreements – were signed is not in itself a determining factor. It is evidence towards where decisions were being made but it is the location of the decision-making, rather than where the contracts were signed, which is important.

38.4.3 *HMRC practice*

The former ITH provided:

1622. Normal professional partnership: foreign partnership treatment

In the *Frost* case²² we tried to argue before the Commissioners that control and management was not abroad. That is our approach to any case where partnerships appear to have been set up for the purpose of avoidance and Case V is of advantage, which, as ITH1630 indicates, it may yet be though to a much lesser extent than in earlier years.

1623. Foreign partnership treatment: artificial arrangements

But a common situation in professions such as engineers and accountants is one where there is a UK partnership and a separate partnership formed abroad with one or more non-UK resident partners in which some or all of the UK partnership partners are members. Generally speaking where the non-resident

22 *Newstead v Frost* 53 TC 525.

partners are professionally qualified and the overseas partnership takes on work which is reasonably local to the place where the partnership is based, it is possible to take a fairly relaxed view and accept a claim to Section [857] treatment. That was so even when Case V was on the remittance basis. If, however, the prima facie evidence against this view were very strong, we would look much more closely.

It seems obvious that in these cases there will be some control in the UK – although proving that that is so is a different matter – but usually the UK resident partners will make visits to the overseas office and there is a case for saying that the management of the partnership is abroad. (This harks back to the Solicitor's Opinion considered in ITH1614.) It may be that some of the overseas partnership work is done in the UK by the UK partnership but this normally happens – or is said to happen – through the UK partnership acting as subcontractor for the overseas partnership.

1624. Foreign partnership treatment: income that of partnership?

If, however, one reaches the position that the ultimate control is in the UK and the bulk of the work is actually done here – albeit under subcontract – then that would be a case for a possible challenge. Cases have been seen where the arrangements were plainly offensive and amounted to no more than attempts to park UK-earned profits in a Section [857] partnership with the admitted intention of avoiding UK tax.

We would certainly want to attack these devices and argue, for example, that the work done in the UK by partners who were also members of the overseas firm was done in their capacity as members of that overseas firm. We could then establish that the profits from those activities could be assessed under Case II. Our Solicitor, on particular cases, has not been discouraging about the chances that we may succeed and in the days of the remittance basis there was some success in settling cases on Case II lines rather than Case V. However, these cases turn crucially on questions of fact and degree and there is the usual difficulty of obtaining information.

1625. Foreign partnership treatment: income that of partnership?

Sometimes we have had to consider whether there is in fact an overseas partnership and/or whether amounts claimed to be receipts of an overseas partnership are in fact receipts of the UK partnership which is seeking to avoid tax. We have had some success with the latter line under circumstances which gave grounds for quiet satisfaction. A firm of UK solicitors which had profited from its fees for advice about the setting up of a well-known tax avoidance scheme, sought to avoid tax on those fees by arranging to park them in a Channel Islands finance and brokerage partnership to which Section [857] was said to apply. This was insult added to injury with vengeance.

Our Solicitor's advice was that we could not challenge the view that control and management was abroad. However, there was considerable artificiality in the arrangements which led ultimately to the fees landing in the accounts of the Jersey partnership. We argued that the amounts were in fact receipts of the UK solicitor's practice and we were aided in this by the fact that it was probably improper for a UK solicitor to enter into a partnership with a non-solicitor to do what they claimed to do in Jersey. This line was eventually conceded and we got

tax on the Channel Island profits accruing to the UK partners.

38.5 Partnership with resident and non-resident partners

Section 849 ITTOIA provides:

- (1) If—
 - (a) a firm carries on a trade, and
 - (b) any partner in the firm is chargeable to income tax,the profits or losses of the trade are calculated on the basis set out in subsection (2) or (3), as the case may require.
- (2) For any period of account in which the partner is a UK resident individual, the profits or losses of the trade are calculated as if the firm were a UK resident individual.
- (3) For any period of account in which the partner is non-UK resident, the profits or losses of the trade are calculated as if the firm were a non-UK resident individual.
- (4) In calculating under subsection (2) or (3) the profits of a trade for any period of account no account is taken of any losses for another period of account.

ITTOIA EN explains:

1714. If some of a firm's partners are resident in the UK and some are not, the profits of the firm's trade must be calculated on different bases. For the resident partners, the calculation includes profits arising outside the UK; for the non-resident partners, the calculation is restricted to profits arising in the UK.

1715. Section 111 of ICTA is not explicit that the profits may have to be calculated on more than one basis. This section brings together the rules for resident and non-resident partners. Subsection (1) introduces the idea that more than one calculation may be needed.

1716. The source legislation refers to the computation of the profits from the actual trade "for any period". Profits are calculated for a period of account. So subsections (2) and (3) make it clear that the section applies to a period of account. It is possible for a partner to be both resident (for one tax year) and non-resident (for another) within a single period of account. In such a case, the firm's profit has to be calculated twice to arrive at the partner's share of the profits.

1717. Subsection (2) sets out the normal basis for calculating the profits, for an individual resident in the UK. The profits are calculated as if the firm were an individual resident in the UK.

1718. Subsection (3) sets out an additional basis for calculating the profits. If the partner (who may be a non-resident company liable to income tax) is not resident in the UK the profits of the firm are calculated as if the firm were an individual not resident in the UK.

The BI manual provides:

BIM72235 - Partnerships - computation and assessment: individual, company and non-resident members [July 2011]

...where one or more of the partners is a non-resident individual then the share of profits allocated to any such partner must be computed using the special rules for non-residents at ICTA88/S112. In any such case the partnership should submit an additional set of computations.

Example

Mr Armstrong, a UK resident, and Mrs Beeton, a non-resident, are in partnership. The partnership's Case I world-wide profit amounts to £10,000 and included in that sum is its UK profit of £7,500. Partnership profits are shared equally. Two tax computations are required on the following lines

Computation for resident partner

Step 1	Case I profit		£10,000
Step 2	Allocation	Mr Armstrong	£5,000
		Mrs Beeton	£5,000
Step 3	Assess	Mr Armstrong	£5,000

Computation for non-resident partner

Step 1	Case I profit		£7,500
Step 2	Allocation	Mr Armstrong	£3,750
		Mrs Beeton	£3,750
Step 3	Assess	Mrs Beeton	£3,750

38.6 Transparency of partnership for CGT

Section 59(1) TCGA provides:

Where 2 or more persons carry on a trade or business in partnership—

- (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
- (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

This is somewhat scanty foundation for the CGT treatment of partnerships.²³ It is expanded by SP D12:

Disposals of assets by a partnership

Where an asset is disposed of by a partnership to an outside party each of the partners will be treated as disposing of his fractional share of the asset.

So partnerships are transparent for CGT and gains on disposals of partnership assets accrue to the partners (not to the partnership). For reasons similar to those discussed above for IT,²⁴ it is considered that this result follows from first principles, and not from the statutory provision.

In determining whether gains are foreign chargeable gains (which may qualify for the remittance basis) one has regard to the situs of the partnership assets; the situs of the partnership share is irrelevant.

The question then is to identify the fractional share of each partner, and that can be tricky as partners do not always have easily identifiable fractional shares. SP D12 continues:

In computing gains or losses the proceeds of disposal will be allocated between the partners in the ratio of their share in asset surpluses at the time of disposal. Where this is not specifically laid down the allocation will follow the actual destination of the surplus as shown in the partnership accounts; regard will of course have to be paid to any agreement outside the accounts. If the surplus is not allocated among the partners but, for example, put to a common reserve, regard will be had to the ordinary profit sharing ratio in the absence of a specified asset-surplus-sharing ratio.

The statement then turns to base cost:

Expenditure on the acquisition of assets by a partnership will be allocated between the partners in the same way at the time of the

23 The Law Commission put the point more tactfully: "The working out of this concept in practice has not been easy, and has had to be regulated by extra-statutory guidance;" Law Com 283, *Partnership Law* (2009) para 3.51.

24 See 38.3 (Transparency of partnership for IT).

acquisition. This allocation may require adjustment, however, if there is a subsequent change in the partnership sharing ratios (see para 4).

Changes in partnership sharing ratios are an interesting topic, but it is not discussed here.

38.7 Limited liability partnership

38.7.1 Definition of LLP

Section 1 Limited Liability Partnerships Act 2000 provides the definition:

(1) There shall be a new form of legal entity to be known as a limited liability partnership.

(2) A limited liability partnership is a body corporate (with legal personality separate from that of its members) which is formed by being incorporated under this Act; and—

- (a) in the following provisions of this Act (except in the phrase “oversea limited liability partnership”), and
- (b) in any other enactment (except where provision is made to the contrary or the context otherwise requires),

references to a limited liability partnership are to such a body corporate.

Thus LLP (in tax legislation in particular) in principle means a LLP incorporated under the LLPA 2000, and does not include a foreign LLP.²⁵

38.7.2 Nature of LLP

A LLP is (as a matter of LLP law) a body corporate. A LLP (despite its name) is not a partnership in the strict sense of the word.²⁶ So a LLP is in principle classified as a company for tax purposes.²⁷ However this default position is subject to such wide exceptions that it hardly ever applies.

²⁵ See 79.16 (Foreign limited liability partnership).

²⁶ The drafter assumed this in s.863(2) ITTOIA. This view is also supported by s.1(5) Limited Liability Partnerships Act 2000 (“Accordingly, except as far as otherwise provided by this Act or any other enactment, the law relating to partnerships does not apply to a limited liability partnership.”)

²⁷ See 79.3 (Meaning of “company”).

38.7.3 *Income tax treatment of LLP*

Section 863 ITTOIA provides:

(1) For income tax purposes, if a limited liability partnership carries on a trade, profession or business with a view to profit—

- (a) all the activities of the limited liability partnership are treated as carried on in partnership by its members (and not by the limited liability partnership as such),
- (b) anything done by, to or in relation to the limited liability partnership for the purposes of, or in connection with, any of its activities is treated as done by, to or in relation to the members as partners, and
- (c) the property of the limited liability partnership is treated as held by the members as partnership property.

References in this subsection to the activities of the limited liability partnership are to anything that it does, whether or not in the course of carrying on a trade, profession or business with a view to profit.

(2) For all purposes, except as otherwise provided, in the Income Tax Acts—

- (a) references to a firm or partnership include a limited liability partnership in relation to which subsection (1) applies,
- (b) references to members or partners of a firm or partnership include members of such a limited liability partnership,
- (c) references to a company do not include such a limited liability partnership, and
- (d) references to members of a company do not include members of such a limited liability partnership.

Thus a LLP is treated like a general partnership (provided it is carrying on a business with a view to profit). Section 863 then deals with the position where the LLP ceases to do that:

(3) Subsection (1) continues to apply in relation to a limited liability partnership which no longer carries on any trade, profession or business with a view to profit—

- (a) if the cessation is only temporary, or
- (b) during a period of winding up following a permanent cessation, provided—
 - (i) the winding up is not for reasons connected in whole or in part with the avoidance of tax, and

(ii) the period of winding up is not unreasonably prolonged.

This is subject to subsection (4).

(4) Subsection (1) ceases to apply in relation to a limited liability partnership—

- (a) on the appointment of a liquidator or (if earlier) the making of a winding-up order by the court, or
- (b) on the occurrence of any event under the law of a territory outside the UK corresponding to an event specified in paragraph (a).

38.7.4 *CGT treatment of LLP*

Section 59A(1) TCGA deals with limited liability partnerships:

Where a limited liability partnership carries on a trade or business with a view to profit—

- (a) assets held by the limited liability partnership are treated for the purposes of tax in respect of chargeable gains as held by its members as partners, and
- (b) any dealings by the limited liability partnership are treated for those purposes as dealings by its members in partnership (and not by the limited liability partnership as such);

and tax in respect of chargeable gains accruing to the members of the limited liability partnership on the disposal of any of its assets shall be assessed and charged on them separately.²⁸

This puts a LLP in the same position as a general partnership. Section 59A(3)–(5) deal with the position where a limited liability partnership ceases to carry on a business with a view to profit, or is wound up; they are equivalent to s.863(3)(4) ITTOIA.

28 Section 59A(2) TCGA is the equivalent of s.863(2) ITTOIA:

“(2) For all purposes, except as otherwise provided, in the enactments relating to tax in respect of chargeable gains—

- (a) references to a partnership include a limited liability partnership in relation to which subsection (1) above applies,
- (b) references to members of a partnership include members of such a limited liability partnership,
- (c) references to a company do not include such a limited liability partnership, and
- (d) references to members of a company do not include members of such a limited liability partnership.”

38.7.5 HMRC practice

SP D12 provides:

The enactment of the Limited Liability Partnership Act 2000, has created, from April 2001, the concept of limited liability partnerships (as bodies corporate) in UK law. In conjunction with this, new capital gains tax provisions dealing with such partnerships have been introduced through s.59A TCGA. Section 59A(1) TCGA mirrors s.59 TCGA in treating any dealings in chargeable assets by a limited liability partnership as dealings by the individual members, as partners, for capital gains tax purposes. Each member of a limited liability partnership to which s.59A(1) applies has therefore to be regarded, like a partner in any other (non-corporate) partnership, as owning a fractional share of each of the partnership assets and not an interest in the partnership itself. This statement of practice has therefore been extended to limited liability partnerships which meet the requirements of s.59A(1) TCGA, such that capital gains of a partnership fall to be charged on its members as partners. Accordingly, in the text of the statement of practice, all references to a "partnership" or "firm" include reference to limited liability partnerships to which s.59A(1) TCGA applies, and all references to "partner" include reference to a member of a limited liability partnership to which s.59A(1) TCGA applies.

For the avoidance of doubt, this statement of practice does not apply to the members of a limited liability partnership which ceases to be "fiscally transparent" by reason of its not being, or its no longer being, within ss.59 and 59A(1) TCGA.

38.8 Residence of partnership

The residence of a partnership is not often important for tax, but it matters occasionally:

- (1) The provision relating to the disallowance of partnership DTR refers to a firm which resides outside the UK.²⁹
- (2) In order to be a "foreign employer" (and so have chargeable overseas earnings) a partnership must be resident outside the UK and not resident in the UK.³⁰

²⁹ See 38.9 (DTA Relief for partnership).

³⁰ See 13.12 (Foreign employer).

- (3) One needs to identify domestic-law residence of a partnership in order to determine its treaty-residence.³¹

Until 1995 the position was governed by s.112(1) ICTA 1988:

Where a trade or business is carried on by two or more persons in partnership, and the control and management of the trade or business is situated abroad, ... the partnership shall be deemed to reside outside the UK ...

This was absent-mindedly repealed, and now there is no statutory definition, but it is considered that the test of partnership residence is still control and management. This is consistent with the general scheme of UK taxation of partnerships. ITTOIA EN agrees, in the passage set out above (“For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm’s business is controlled and managed. ...”).³² HMRC agree. The former ITH provided:

1609. Residence

In English law a partnership is not a person and it has long been assumed that it cannot in fact have a residence. Although Scottish partnerships are persons we have not made any distinction. ... But there has been some nibbling away of the principle that a partnership does not have a residence. The concept of residence and partnerships appears in other Sections of the Taxes Acts. For example in [the definition of chargeable overseas earnings] there is the concept of a partnership, ‘resident outside and not resident in the UK’. The transfer pricing provisions ... apply to partnerships but their effect may depend on whether or not the buyer or seller is resident in the UK. It is probable that if residence of a partnership in these contexts ever had to be put to the test the criterion of control and management would be used.

More important is the case of *Padmore v IRC* 62 TC 352. This concerned the effect of the Double Taxation Agreement with Jersey on the liability of UK resident partners of a partnership controlled and managed in Jersey. Jersey law has a provision very similar to Section 112. Both the High Court and the Court of Appeal considered that it must be deduced from the respective Sections that both Jersey and UK

31 See 5.15 (Treaty residence: Partnerships). This is no longer relevant for UK tax because of the treaty override, but may be relevant for foreign tax.

32 See 38.9 (DTA relief for partnership).

law attach tax consequences to the residence of partnerships and that residence is determined by control and management.

38.9 DTA relief for partnership

For the question whether a partnership can be a treaty-resident for DTA purposes, see 5.15 (Partnerships).

Section 858 ITTOIA disapplies DTA relief on partnership income of UK residents. Section 858(1) provides:

This section applies if—

- (a) a UK resident (“the partner”) is a member of a firm which—
 - (i) resides outside the UK, or
 - (ii) carries on a trade [including business] the control and management of which is outside the UK, and
- (b) by virtue of any arrangements having effect under section 2(1) of TIOPA 2010 (“the arrangements”) any of the income of the firm is relieved from income tax in the UK.

ITTOIA EN explains the need for s.858(1)(a)(ii):

1777. For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm’s business is controlled and managed. But it is possible that, under foreign law, a firm may be considered to be resident elsewhere, for example, by reference to where the firm was established. So the section uses both the “control and management” test and the “resides” test.

Section 858(2) ITTOIA provides:

The partner is liable to income tax on the partner’s share of the income of the firm despite the arrangements.

This disapplies treaty relief. It survived an attack in *Padmore v IRC* (No 2) [2001] STC 280.

ITTOIA EN provides:

1774. This section ensures that a UK resident partner’s share of the income of a foreign firm remains liable to UK tax even though the income of the firm as a whole is exempt from UK tax in accordance with a double taxation agreement. It is based on section 112(4) and (5)

of ICTA.

1775. The business profits article of the UK/Jersey double taxation arrangement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352, the Court of Appeal decided that the exemption extended to the share of the profits arising to a UK resident individual. The rules in section 112(4) and (5) of ICTA were enacted in 1987 to remove the exemption.

1776. Subsection (1) sets out the type of individual and firm with which the section is concerned. It goes on to identify the sort of exemption from tax that was considered in the Padmore case. ...

1778. Subsection (2) makes it clear that the section does no more than remove any exemption under a double taxation arrangement. It does not deny other reliefs, such as tax credit relief. See Change 145 in Annex 1.³³

This provision dates back to 1987. Interestingly, in those days retrospective legislation and breach of treaty obligations were thought to require special justification.³⁴

33 Change 145 is as follows:

“This change enacts the Inland Revenue practice of giving a narrow interpretation to the word ‘affect’ in section 112(4) of ICTA.

The business profits article of the UK/Jersey double taxation agreement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352 the Court of Appeal decided that the exemption covered the share of the profits arising to a UK resident partner. The rules in section 112(4) and (5) of ICTA were enacted in 1987 to remove the exemption.

It was intended, in the case of income tax, that the 1987 legislation should do no more than remove the exemption claimed in the *Padmore* case. The words used in section 112(4) of ICTA are ‘shall not affect any liability to tax’. On the face of it, these words could deny the partner any relief, including tax credit relief, under a double taxation treaty. Section 858(2) of this Act makes it clear that it is only the partner’s chargeability to tax that is preserved, overriding any provision to the contrary in a double taxation treaty. No other effect of the treaty is overridden.

This change is in principle in taxpayers’ favour but is expected to have no practical effect as it is in line with current practice.”

34 The former ITH para 1660 provided:

“The retrospective nature of the legislation [in 1987] provoked comment in the professional press and in Parliament. The Government, and later the House, were persuaded as to the propriety of this action because the Section does no more than restore the general understanding of the law and retrospection prevents third parties suddenly deriving a substantial windfall benefit for six years. Although the Section protects from retrospection only those taxpayers who gained a Commissioners’ or

Section 858(3) ITTOIA provides:

If the partner's share of the income of the firm consists of or includes a share in a qualifying distribution—

- (a) made by a UK resident company, and
 - (b) chargeable to tax under Chapter 3 of Part 4,
- the partner (and not the firm) is, despite the arrangements, entitled to the share of the tax credit which corresponds to the partner's share of the distribution.

ITTOIA EN provides:

1779. Subsection (3) deals with UK tax credits. A double taxation arrangement may give a non-resident person an entitlement to payment of a tax credit on a distribution by a UK company. The entitlement is restricted to the share of the distribution that arises to a UK resident partner.

38.9.1 *"Members of a firm"*

Section 858(4) defines "members of a firm":

For the purposes of this section, the members of a firm include any person entitled to a share of income of the firm.

Section 58(4) FA 2008 provides:

The amendments made by subsections (1) to (3) are treated as always having had effect.

Retrospective legislation without limit of time! This is aimed at a tax avoidance scheme which involved trustees of 2 IP trusts trading in

Court decision before 17 March 1987, similar treatment was allowed to a small number of other taxpayers who were told by the Revenue that their cases would follow the Padmore decision. Criticism was also made because the legislation is intended to override the effect of the Jersey Arrangement and any other treaty which the Courts might have found to have similar effect. This 'treaty override' was defended on similar grounds – that it merely puts into effect what was generally understood to be the position. It has not met with any objection from treaty partners."

partnership.³⁵ The EN to the draft clause provided:

11. The users of the scheme claim that, under the terms of the relevant Double Taxation Treaty, the UK is not entitled to tax the partnership income of the foreign trustees. As that income is precisely the same income as that received by the UK individuals as beneficiaries of the trust, they argue that the UK is not entitled to tax the UK individuals on it.

12. Legislation was introduced in Finance (No 2) Act 1987, which provided that (as had almost universally been assumed to be the case until a High Court decision to the contrary,) a Double Taxation Treaty did not affect UK residents' liability to UK tax on their share of income or gains from a foreign partnership.

This new avoidance scheme purports to get round that legislation by claiming that the foreign trustees are the partners rather than the UK individuals.

13. The Government believes that a partner for the purposes of that legislation has always included all those persons entitled to a share of income or capital gains of the partnership. As such, the UK individuals remain liable to UK tax despite the elaborate, artificial structure designed to exempt them. This clause will put it beyond doubt that the legislation has always had that effect.

This justification of the retrospective nature of the 2008 amendment raises questions of law, fact, policy, practice and human rights.

As a matter of law, was it the case (before the retrospective legislation) that "member of a firm" for the purposes of that legislation has always included all those persons entitled to a share of income or capital gains of

35 The EN to the draft clause published 12 March 2008 provides a somewhat untechnical explanation:

"8. An avoidance scheme purports to exempt from UK tax income received by UK resident individuals by using certain provisions in the UK's bilateral Double Taxation Treaties.

9. This scheme involves the establishment of offshore trusts, (of which the UK individuals are both settlors and beneficiaries) and partnerships (of which the foreign trustees of those trusts are partners).

10. The partnerships acquire the rights to receive the UK individuals' income but the terms of the trusts are such that, as beneficiaries of the trust, the UK individuals retain beneficial entitlement to the income – with the trustees obliged to remit the income to the UK individuals as it arises."

the partnership? The answer is, no.³⁶

As a matter of fact, did the Government believe that to be the case? I think it is a safe bet that if HMRC received expert and impartial advice on the point, it would have been hedged with caveats such that the terms of EN para 13 would not represent a fair and accurate summary of the position.³⁷

The question of policy is whether the reasons given justify retrospective legislation.³⁸ One might discern two reasons from the EN. The first is that the scheme will fail (or so the Government believe). If that is true, the 2008 change is unnecessary; if false (and it is certainly debatable) it is not a good reason. The only reason worth considering is that the scheme is “elaborate and artificial”, or, HMRC might fairly have said, abusive (however that flexible term may be understood). Whether that justifies retrospective legislation is ultimately a political question on which views differ depending on how one values the rule of law. It is arbitrary and unfair in that this scheme was retrospectively stopped and others – no less elaborate, artificial and abusive – were not. Pragmatists (to whom constitutional proprieties such as the rule of law are of little interest) should bear in mind that retrospective legislation increases the “legal risk”, a measure under which the UK falls low on international surveys, and the lowering of the UK’s reputation in that regard has a significant albeit intangible cost. I suspect a major factor in picking on this arrangement, not mentioned in the EN, was the amount of money involved.

The question of practice is how often retrospective legislation will be

36 Partner is a term of partnership law, and in the partnership law sense a person who is entitled to income or gains of a partnership is not as such a partner. HMRC would have to argue that “partner” in s.858 was not used in its partnership law sense, which is a difficult line to take even in these times of purposive interpretation, though in a tax avoidance case nothing is impossible. This is confirmed in *R oao Huitson v HMRC* [2010] STC 715 at [71]; the point was not considered by the Court of Appeal.

37 In Parliament the statement was described as “disingenuous”: Public Bill Cttee debate on Finance Bill, 22 May 2008 Hansard col 371. In *Huitson* HMRC wisely claimed legal professional privilege: [2010] STC 715 at [71].

38 For an illuminating discussion of the policy issues in a US context, see Daniel Shaviro, *When Rules Change*, University of Chicago Press (2000). Taxpayers may on this point look with envy to the USA, where a norm opposing retrospective legislation is “strongly rooted in popular sentiment, legislative practice, and perhaps even the Constitution as the Courts are likely to interpret it” (p.104).

used in the future. What advice can anyone give to clients seeking to know their position? The answer of course is that one cannot give a clear answer. Much depends on the politics of the day, but I guess that retrospective legislation will continue to be a rare response; a popular scheme carried out by many taxpayers and involving larger sums is certainly more at risk than others.

Lastly, does the retrospective legislation breach the Human Rights Act and (regardless of retrospectivity) is it EU law compliant? HMRC have won these battles.³⁹

38.9.2 *DT relief for partnership gains*

Section 59 TCGA sets out the same rules for CGT:

(2) Subsection (3) applies if—

- (a) a person resident in the UK (“the resident partner”) is a member of a partnership which resides outside the UK or which carries on any trade, profession or business the control and management of which is situated outside the UK, and
- (b) by virtue of any arrangements that have effect under section 2(1) of TIOPA 2010 (“the arrangements”) any of the capital gains of the partnership are relieved from capital gains tax or corporation tax in the UK.

(3) The arrangements (so far as providing for that relief) do not affect any liability to capital gains tax or corporation tax in respect of the resident partner’s share of any capital gains of the partnership.

(4) For the purposes of subsections (2) and (3) the members of a partnership include any person entitled to a share of capital gains of the partnership.

38.10 **SD and SDLT position of partnerships**

SD and SDLT are outside the scope of this book, but the HMRC statement published 11 October 2010 is of wider importance as it discusses the nature of partnerships which is relevant for many tax purposes.

³⁹ *R oao Huitson v HMRC* [2011] EWCA Civ 893 raises the HR point and *R oao Shiner v HMRC* [2011] 2011 STC 1878 raises the EU law point which is based on free movement of capital.

38.10.1 *LLPs*

The HMRC Partnership SDLT statement provides:

Group relief for SDLT and Stamp Duty: partnerships

Stamp Duty Land Tax - a change in HMRC's view of the law

Where land transactions take place between members of a group, relief for Stamp Duty Land Tax (SDLT) is available (Part 1 Schedule 7 Finance Act 2003). Companies are members of the same group for the purposes of the relief if one body corporate is a 75% subsidiary of another or if both are 75% subsidiaries of a third body corporate. Broadly, the 75% relationship refers to the beneficial ownership of the subsidiary company's issued ordinary share capital.

A 'company' for group relief purposes is defined in Schedule 7 FA 2003 as a 'body corporate'. HMRC did not consider that a 'body corporate' for the purposes of Part 1 Schedule 7 FA 2003 included a Limited Liability Partnership incorporated under the Limited Liability Partnership Act 2000 (LLP), so that LLPs were disregarded ('looked through') when considering whether a group relationship existed, the members of the LLP being treated as the beneficial owners of the LLP assets.

This view has recently been challenged. Following legal advice, HMRC now accepts that, for the purposes of SDLT group relief, a 'body corporate' does include an LLP. An LLP can therefore be the parent in a group structure. However, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of other companies. This also means that any subsidiaries of the LLP cannot be grouped with the companies that are the corporate members of the LLP.

This revised view does not affect which party can claim group relief, but does affect which entities are regarded as forming part of a group. An LLP cannot claim group relief itself because its chargeable interests in land are treated as held by or on behalf of the individual members (Paragraph 2 Schedule 15 FA 2003), and this position is unchanged. As such, in broad terms, an LLP continues to be disregarded if it is the vendor or purchaser in a transaction. In such a transaction group relief may be, in part at least, available if some or all of its members (which are incorporated companies) are themselves grouped. It also follows that if an LLP transfers land to a company that it owns, and that is within the LLP headed group, no group relief will be available as the land is deemed to be owned by the members of the LLP, and those members are not within the same group as the company owned by the LLP.

If SDLT group relief has been incorrectly claimed solely as a result of an LLP in the group structure being disregarded or looked through for

the purposes of establishing group relationships then HMRC will not seek to revisit the claim.

Stamp Duty

Group relief for Stamp Duty is available to bodies corporate that are associated (Section 42 FA 1930). Bodies corporate are associated if one is a 75% subsidiary of another or if both are 75% subsidiaries of a third body corporate. Broadly, the 75% relationship refers to the beneficial ownership of the subsidiary company's issued ordinary share capital. In general, HMRC has taken the view that an LLP, as a body corporate, can be the ultimate parent of a group for the purposes of Section 42 FA 1930. Furthermore, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of another company.

Transfers of stock and marketable securities may be made to the parent LLP from a subsidiary body corporate in the same group and qualify for group relief and vice versa. Group relief cannot be claimed on the transfer of stock and marketable securities from a body corporate parent of an LLP to the LLP or to a body corporate subsidiary of the LLP.

38.10.2 *English partnerships*

The HMRC Partnership SDLT statement provides:

English partnerships

As English limited and general partnerships do not have legal personalities separate from the persons who are the partners they must be 'looked through' when establishing bodies corporate that form a group for Stamp Duty Land Tax and Stamp Duty purposes. As such the companies that are the partners of an English general or limited partnership can, depending upon the facts, be grouped with those companies that are below the partnership in the group structure.

38.10.3 *Scottish partnerships*

The HMRC Partnership SDLT statement provides:

Scottish partnerships

Both Scottish limited and general partnerships have legal personalities separate from the persons who are the partners. They cannot therefore be 'looked through' when establishing bodies corporate that form a group. But they are not bodies corporate and so cannot be the parent of a group of companies.

38.10.4 *Foreign partnerships*

The HMRC Partnership SDLT statement provides:

Non-UK partnerships

The principles set out in the earlier section on UK partnerships will be applied case by case to non-UK partnerships.

CHAPTER THIRTY NINE

NON-RESIDENTS INCOME TAX RELIEF

39.1 Non-residents IT relief – Introduction

This chapter considers the IT relief for UK source income of non-residents. I use the following terminology:

“Non-resident individual/trustee IT relief” is the relief in s.811 ITA, which applies to individuals and trustees.

“Non-resident company IT relief” is the relief in s.815 ITA, which applies to companies.

I refer to them together as **“non-residents IT relief”**.

In accordance with the principles of the tax law rewrite, the two reliefs are written out separately, though the rules are more or less the same.

The relief is worded in a convoluted manner. In short, the relief is that UK source interest, dividend and pension income of non-residents is not subject to UK tax beyond withholding tax (where applicable).

39.2 Non-resident individual/trustee IT relief

In the absence of relief, non-resident individuals and trustees are subject to tax on UK source income at the same rates as UK residents. Thus non-resident individuals may be subject to income tax at the higher or additional rates, and non-resident trustees are subject to tax at the trust rate. Section 811 ITA provides relief.

Section 811(1) ITA provides:

This section applies to income tax to which—

- (a) a non-UK resident, other than a company, is liable, or
- (b) a non-UK resident company is liable as a trustee.¹

¹ Section 811(1)(b) is otiose since a trustee is a separate person for income tax; see 4.3 Trustees treated as single and distinct person). But it does no harm.

Section 811(3) ITA sets out the relief:

The non-UK resident's liability to income tax for a tax year is limited to the sum of amounts A and B.

An individual must be non-resident throughout the year: the split year concession A11 does not apply.² This seems unfair and inconsistent with the scheme of the split year rule. However the draft statutory provisions in the residence consultation paper will not alter this rule in 2013. Perhaps the reason is that a tax return is needed for the split year, one object of the relief is to save the need for a tax return, so the relief is not appropriate in a split year.

There is no equivalent CGT relief but that is not needed as a non-resident is not usually subject to CGT. It is possible to envisage a case where a non-resident would be subject to CGT on gains made through an investment manager, but it would be unusual, in practice no-one would expect compliance, and HMRC would probably turn a blind eye. The former ITH stated at para 970:

it would be very rare to find a situation where a non-resident would be liable on capital gains made through an investment manager.

39.3 Amount A (tax deducted at source)

Section 811(4) ITA defines amount A:

Amount A is the sum of—

- (a) any sums representing income tax deducted from the non-UK resident's disregarded income for the tax year (see section 813),
- (b) any sums representing income tax that are treated as deducted from or paid in respect of that income, and
- (c) any tax credits in respect of that income.

The legislation distinguishes:

- (1) Disregarded income.
- (2) Other income. I refer to this as “**non-disregarded income**” which is a clumsy term but I cannot find anything better.

² See 6.10 (UK source investment income).

In short, amount A is tax deducted at source on disregarded income.

39.4 Amount B (tax on non-disregarded income and reliefs)

We turn to amount B. Section 811(5) ITA provides:

Amount B is the amount that, apart from this section, would be the non-UK resident's liability to income tax for the tax year, if the following were left out of account—

- (a) the non-UK resident's disregarded income for the tax year, and
- (b) any relief mentioned in subsection (6) to which the non-UK resident is entitled for the tax year as a result of—
 - (i) section 56(3) or 460(3) of this Act (residence etc of claimants), or
 - (ii) double taxation arrangements.

Thus one has a hypothetical tax computation which differs from the individual's normal tax computation by ignoring two sets of facts.

The effect of ignoring (a) is to decrease the tax liability but the effect of ignoring (b) is to increase it.

39.4.1 Disregarded income and non-disregarded income

Since one only ignores disregarded income in computing amount B, UK tax on non-disregarded income is included in computing amount B, ie tax on non-disregarded income remains payable in full.

Moreover although amount B is computed by ignoring disregarded income, tax deducted at source on disregarded income comes into amount A, so the effect at the end of the day is that UK tax on disregarded income is limited to withholding tax.

39.4.2 Disallowed reliefs

I refer to the reliefs within (b) as “**disregarded reliefs**”. These reliefs are not disallowed. The individual can in theory claim them. But that claim increases amount B, so reduces the benefit of non-residents IT relief. A higher rate taxpayer will often be no better off at all; sometimes there may be a small saving but insufficient to justify the accountancy costs of making the claim.

Section 811(6) ITA sets out the list of disregarded reliefs:

The reliefs referred to in subsection (5) are—

- (a) an allowance under Chapter 2 of Part 3 of this Act (personal allowance and blind person's allowance),
- (b) a tax reduction under Chapter 3 of Part 3 of this Act (tax reductions for married couples and civil partners),
- (c) relief under section 457 or 458 of this Act (payments to trade unions and police organisations),
- (d) a tax reduction under section 459 of this Act (payments for benefit of family members), and
- (e) relief under section 266 of ICTA (life assurance premiums).

Although in principle non-residents are not entitled to these reliefs in any event, some are entitled (eg EU citizens)³ and others are entitled by virtue of DTAs.⁴

In short, a non-resident must choose between claiming disregarded reliefs and non-residents IT relief: they cannot have both.

39.5 Trusts: UK beneficiary rule

Section 812(1) ITA provides:

Section 811 does not apply to income tax to which non-UK resident trustees are liable for a tax year, if there is a beneficiary of the trust who is—

- (a) an individual who is ordinarily UK resident, or
- (b) a UK resident company.

I refer to this as “**the UK beneficiary rule**”. One UK beneficiary may disqualify the entire trust from the relief.

Non-resident's IT relief is available if:

- (1) The trust is settlor-interested and the settlor is non-UK resident as the income is treated as the income of the settlor, not the trustees.⁵
- (2) The trust is an IP trust and the life tenant is non-resident.

It does not matter if the trustees do not qualify for relief in their own

3 See 44.6 (Personal allowance residence requirements).

4 See 44.7 (Personal allowances under DTAs: non-residents).

5 See 26.7.2 (Non-resident trust, non-resident settlor).

capacity, due to the UK beneficiary rule. The trustees may take the benefit of the non-resident individual's IT relief applicable to the settlor or life tenant.

39.5.1 “Beneficiary”

Section 812 ITA defines “beneficiary”:

(2) For the purposes of subsection (1) a person is a beneficiary of the trust if—

- (a) the person is an actual or potential beneficiary of the trust, and
- (b) condition A or B is met in relation to the person.

(3) Condition A is that the person is, or will or may become, entitled under the trust to receive some or all of any income⁶ under the trust.

(4) Condition B is that some or all of any income under the trust may be paid to or used for the benefit of the person in the exercise of a discretion conferred by the trust.

(5) The references in subsections (3) and (4) to any income under the trust include a reference to any capital under the trust so far as it represents amounts originally received by the trustees as income.

This definition is the same as 19.15.3 (Non-resident discretionary trust).

At first sight it appears that a trust with power to add beneficiaries would not qualify for relief, since UK residents are potential beneficiaries. But such powers are standard form in offshore trusts, so if that were right, offshore trusts would not normally qualify. In practice I understand that HMRC do not take that point.

39.6 Disregarded income

The definition of “disregarded income” is crucial since non-disregarded income does not qualify for non-residents IT relief.

In practice, the most important categories are dividends and interest.

The definition is complex. There are six categories of disregarded income. Section 813(1) ITA provides:

6 Income is in turn defined in s. 812(5) ITA:

“The references in subsections (3) and (4) to any income under the trust include a reference to any capital under the trust so far as it represents amounts originally received by the trustees as income.”

For the purposes of this Chapter income arising to a non-UK resident is “disregarded income” if it is—

- (a) disregarded savings and investment income (see section 825),
- (b) disregarded annual payments (see section 826),
- (c) disregarded pension income,
- (d) disregarded social security income,
- (e) disregarded transaction income (see section 814), or
- (f) income of such other description as the Treasury may by regulations designate for the purposes of this section. [No regulations have been made].

Thus we have to turn to another five definitions. But first, s.813(2) ITA brings in an important exception:

But income in relation to which the non-UK resident has a UK representative for the purposes of Chapter 2B is not disregarded income.

See 40.3 (UK representative).

39.7 Disregarded savings and investment income

Section 825 ITA provides the definition:

(1) For the purposes of this Chapter income is “disregarded savings and investment income” if—

- (a) it is chargeable under Chapter 3 or 5 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies and stock dividends from UK resident companies), or
 - (b) it is within subsection (2) and is not relevant foreign income.
- (2) Income is within this subsection if it is chargeable under—
- (a) Chapter 2 of Part 4 of ITTOIA 2005 (interest),
 - (b) Chapter 7 of that Part (purchased life annuity payments),
 - (c) Chapter 8 of that Part (profits from deeply discounted securities),
 - (d) Chapter 10 of that Part (distributions from unauthorised unit trusts), or
 - (e) Chapter 11 of that Part (transactions in deposits).

39.8 Disregarded annual payments

Section 826 ITA provides the definition:

For the purposes of this Chapter income is “disregarded annual payments” if it is not relevant foreign income and is chargeable under—

- (a) section 579 of ITTOIA 2005, so far as it relates to annual payments (royalties etc from intellectual property),
- (b) Chapter 4 of Part 5 of that Act, so far as it relates to annual payments (certain telecommunication rights: non-trading income), or
- (c) Chapter 7 of Part 5 of that Act (annual payments not otherwise charged).

There are two types of royalty income:

- (1) royalties which are annual payments (“AP royalties”);
 - (2) royalties which are not annual payments (“non-AP royalties”).
- AP royalties are disregarded income (but they do not qualify for deductible expenses). Non-AP royalties are not disregarded income, but they do qualify for deduction for allowable expenses: s.582 ITTOIA. In practice DTA relief will often apply in which case the distinction will not matter.

39.9 Disregarded pension/social security income

Section 813 ITA provides:

- (3) Income is “disregarded pension income” if it is chargeable under Part 9 of ITEPA 2003 (pension income) because any of the following provisions of that Act applies to it—
- section 577 (UK social security pensions),
 - section 579A (pensions under registered pension schemes) (but see subsection (4) below),
 - section 609 (annuities for the benefit of dependants),
 - section 610 (annuities under non-registered occupational pension schemes), or
 - section 611 (annuities in recognition of another’s services).⁷

⁷ Section 813(4) ITA provides:

“Income chargeable under Part 9 of ITEPA 2003 because section 579A of that Act applies to it is disregarded pension income only if the registered pension scheme in question—

- (a) falls within para 1(1)(f) of Schedule 36 to FA 2004, and
- (b) was, immediately before 6 April 2006, a retirement annuity contract to which section 605 of ITEPA 2003 applied.”

- (5) Income is “disregarded social security income” if—
- (a) it is a taxable benefit listed in Table A in section 660 of ITEPA 2003, other than income support or jobseeker’s allowance, and
 - (b) it is chargeable under Part 10 of that Act (social security income).

39.10 Non-resident company IT relief

39.10.1 *Income tax limit*

Non-resident companies are in principle subject to income tax on UK source income at the basic rate. Section 815 ITA provides relief:

- (1) This section applies to income tax to which a non-UK resident company is liable, otherwise than as a trustee.
- (2) The non-UK resident company’s liability to income tax for a tax year is limited to the sum of amounts A and B.

So far this is the same as non-resident individual/trustee IT relief. There are slightly different definitions of amounts A and B.

Section 815(3) ITA provides:

Amount A is the sum of—

- (a) any amounts representing income tax deducted from the non-UK resident company’s disregarded company income for the tax year,
- (b) any amounts representing income tax that are treated as deducted from or paid in respect of that income, and
- (c) any tax credits in respect of that income.

This is the same as non-resident individual/trustee IT relief except that the reference is to disregarded company income, (and for some reason the word *sums* has become *amounts*).

Section 815(4) ITA provides:

Amount B is the amount that, apart from this section, would be the non-UK resident company’s liability to income tax for the tax year if the non-UK resident company’s disregarded company income for the tax year were left out of account.

This is the same as non-resident individual/trustee IT relief except that there is no reference to the disregarded reliefs (which makes sense as those reliefs only apply to individuals).

39.10.2 *Disregarded company income*

There are five categories of disregarded company income. Section 816 ITA provides:

- (1) For the purposes of this Chapter income arising to a non-UK resident company is “disregarded company income” if it is—
 - (a) disregarded savings and investment income (see section 825),
 - (b) disregarded annual payments (see section 826),
 - [(c) and (d) relate to the IME, see 41.1 (Investment manager exemptions - Introduction).]
 - (e) income of such other description as the Treasury may by regulations designate for the purposes of this section.

This is effectively the same as the definition of “disregarded income” which applies for non-resident individual/trustee IT relief. There are two apparent differences:

- (1) It omits references to pension or social security income (which do not apply to companies).
- (2) There are differences in the wording of s.816(1)(c)(d) which are the equivalent of the individual’s exemption for “transaction income” but I cannot see they are of any significance.

39.11 **Commentary**

Non-residents IT relief originated in a long standing concession, put on a statutory basis in 1995. As far as I know, no thorough consideration of the reasons for non-residents IT relief has ever been published. Several different policy aspects can be identified.

There are two fundamental points:

- (1) There is the tax competition consideration that non-residents would not invest in UK securities if they had to pay progressive IT rates and even the imposition of the basic rate would be a major deterrent.
- (2) There is the practical difficulty in seeking to collect tax in excess of tax deducted at source. Tax collection may be practical in the EU

(under the mutual assistance directive) and in some other countries (under the relevant DTAs) but it would be odd to have one rule for the those countries and another for the rest of the world.

Thirdly, various policy considerations tend to suggest that higher and additional rates of UK tax (“progressive rates”) are not appropriate for non-resident individuals:

- (a) Progressive rates of UK tax would not be applied to all non-residents income (most of their income may be foreign source income and not subject to UK tax).
- (b) Non-resident individuals are likely to be taxed in their country of residence, with credit for UK tax.
- (c) If every country applied its own progressive rates, wealthy taxpayers would have to fill in tax returns in as many countries as they held investments, which would be an enormously difficult exercise for a worldwide portfolio.
- (d) Insofar as the right to tax is justified by the benefit principle,⁸ the benefit provided to a non-resident individual is less than that provided by a UK resident.

These considerations form the basis for a general international acceptance that progressive rates are mainly a matter for the country of residence.⁹

Two important categories of UK income are not disregarded income and so do not qualify for non-residents IT relief: employment income and property income.

The treatment of employment income is understandable since (1) tax competition may be less of a concern; (2) PAYE makes collection of tax a practicality; and (3) disparity compared to other employees might be regarded as unacceptable.

The treatment of property income is strange. Deduction at source on rent is limited to the basic rate, though enforcement of progressive rates would theoretically be possible because of the situation of assets in the UK (not to mention international tax collection treaties). In the past, the Inland Revenue did not attempt to collect progressive rates on UK property

⁸ That is, the principle that in an equitable tax system, taxpayers should contribute in proportion to the benefits they receive from government expenditure.

⁹ This view is expressed in “A Platform for Consultation” (Australia) para 30.61 (2010) accessible www.rbt.treasury.gov.au/publications/paper3/index.htm.

income of non-residents.¹⁰ This is not the current practice, at least officially. However one wonders how much tax notionally due is actually collected. Of course well advised non-residents will normally invest via non-resident companies so there will not often be much progressive rate tax even notionally due.

Logically:

- (1) the collection of tax at source rules on UK property ought to be extended to progressive rates, where land is vested in an individual or a trust; or (if this is thought to be too onerous to administer)
- (2) property income ought to be disregarded income and so qualify for non-residents IT relief.

This aspect of non-residents IT relief reflects a lack of consistent thinking or a somewhat unhappy compromise between different policy considerations.

The rule that non-residents IT relief effectively disallows personal allowances ensures that what can be deducted at source is retained in full, and simplifies administration for HMRC and for taxpayers.

¹⁰ The point arose in *Burns v HMRC* [2009] STC (SCD) 165 where HMRC argued that transfers of land from (supposedly) non-resident individuals to non-resident companies in 1980 and 1982 were made to avoid higher rate income tax on UK property income. The taxpayers responded that that could not be correct since the Inland Revenue did not collect higher rate tax. The Special Commissioner stated that in the 1980's there was "a certain level of expectation" that HMRC did not seek to collect higher rate tax on UK source rental income of non-residents. The practice was perhaps one of HMRC routinely turning a blind eye, rather than anything more formal; though a thorough review of Inland Revenue files would be needed to know the answer.

CHAPTER FORTY

COLLECTION OF TAX FROM UK REPRESENTATIVES

40.1 Collection of tax directly from non-residents

The former ITH provided:

903. Machinery of assessment: direct charge on non-residents

It always was and still is possible to assess a non-resident directly if, in the words of the Courts, he can be reached. A simple example of such a situation arose in the case of *Tischler v Apthorpe* [2 TC 89]. Mr Tischler was not resident. He was a partner in a French wine firm who spent four months or so a year in England. He lived then in a London hotel and sold wine to English customers. His firm also employed London agents and the question was whether the English profits could be assessed directly on Mr Tischler or whether such assessments should, Mr Tischler being non-resident, be made only on the English agents. The High Court held that an assessment made directly on the firm was good and that Mr Tischler was obliged to make a return served on him. In the words of Mathew J 'If the principal can be got at there is no need to have recourse to Section 41 (of the 1842 Act which was consolidated in Section 78 TMA 1970).

An individual, clearly, can be physically present in this country without being resident here and we used to have to rely on the principle established by the *Tischler* case in reaching the profits made by overseas sportsmen and women and artistes who come to this country for quite brief engagements. The modern view certainly, is that a non-resident company which trades here equally is here and that it may similarly be reached. If the company has a branch presence here with all the physical trappings of its trade it is visibly here and will have a registered place of business, an address at which it may be found and at which legal notices may be served.

The principle of direct assessment is not confined to non-residents who actually come here. There is no bar on direct assessment of non-residents who are not here whether or not they have agents in the UK. This was made clear in the case of *Werle v Colquhoun* [2 TC 412]. The difficulty with direct assessment on a person who is not here lies in recovering the tax, although now that the Supreme Court rules allow service of writs abroad this may be a little easier provided there are assets in the UK. But it is still true to say that if a non-resident company

acting through an agent has no such physical presence here and has nothing here the Revenue cannot, in practice, impose its charge effectively without more adequate machinery including that for the service of notices and returns as well as for the actual gathering of the tax. It was in such situations – where the non-resident had only an agent here – that the original form of Part VIII was intended to come to the Revenue’s aid. In practice Part VIII is normally used today even in those cases where the taxpayer can be reached directly ...

This was written before the 1995 changes and before the mutual collection of tax agreements but the point is still valid.

40.2 Collection of tax from UK representative

The rules are set out three times:

(1) For IT the rules are in chapters 2B and 2C part 14 ITA. This does not apply to companies,¹ so effectively this applies to non-resident individuals and trusts.

(2) For CGT the rules are in part 7A TCGA.

(3) For CT the rules are in chapter 6 part 22 CTA 2010.

This does make a coherent discussion somewhat harder. In this chapter I set out the IT rules in full, and (in the absence of material differences) give the CGT and CT references in a footnote only.

Section 835U(1) ITA provides the basic rule:

The obligations and liabilities of a non-UK resident are to be treated, for the purposes of the enactments to which this Chapter applies,² as if they were also the obligations and liabilities of the UK representative of the non-UK resident.

This is a collection provision (the metaphor often used is “machinery

1 Section 835D ITA provides:

“This Chapter does not apply in relation to income tax chargeable on income of a company otherwise than as a trustee.”

2 This relates back to s.835T ITA which provides:

(1) This Chapter applies to the enactments relating to income tax so far as they make provision for or in connection with the assessment, collection and recovery of tax, or of interest on tax.

(2) Those enactments have effect in accordance with section 835U in relation to amounts in respect of which a branch or agency is to be treated as the UK representative of a non-UK resident under Chapter 2B.

provision”) and not a charging provision: the UK representative is only subject to tax if there is a charge to tax on usual principles on the non-resident principal. The INT Manual provides:

268010 Introduction - What are the machinery provisions for assessment and collection? [September 2011]

The machinery provisions alone cannot create or extend a tax liability on the non-resident. There has to be a charge to tax in respect of the non-resident under the domestic provisions in the first place. The provisions work by treating the tax obligations and liabilities of the non-resident as though they were additionally the obligations and liabilities of the UK representative. This provides a practical assessment and collection mechanism for non-residents. Once either the non-resident or the UK representative has paid the liabilities both parties are treated as having met their liabilities.

Section 835U goes on to deal with the discharge of obligations:

- (2) Subsection (3) applies if—
 - (a) the UK representative of a non-UK resident discharges an obligation or liability imposed by this section that corresponds to one to which the non-UK resident is subject, or
 - (b) a non-UK resident discharges an obligation or liability that corresponds to one to which the non-UK resident’s UK representative is subject by virtue of this section.
- (3) The corresponding obligation or liability—
 - (a) of the non-UK resident (in a case within subsection (2)(a)), or
 - (b) of the UK representative (in a case within subsection (2)(b)),is discharged.
- (4) A non-UK resident is bound, as if they were the non-UK resident’s own, by acts or omissions of the non-UK resident’s UK representative in the discharge of the obligations and liabilities imposed on the representative by this section. ...

40.3 UK representative

40.3.1 *Why does it matter who is a UK representative?*

A UK representative is important for the two reasons:

- (1) A UK representative is liable for tax due from the non-resident principal, the topic of this chapter.

- (2) Income in relation to which a non-UK resident has a UK representative falls outside non-residents IT relief: see 39.6 (Disregarded income).

40.3.2 *Definition of “UK representative”*

Section 835E ITA gives the basic definition for IT:

- (1) This section applies if a non-UK resident carries on (alone or in partnership) any trade, profession or vocation through a branch or agency in the United Kingdom.
- (2) The branch or agency is the UK representative of the non-UK resident in relation to—
- (a) the amount of any income from the trade, profession or vocation that arises (directly or indirectly) through or from the branch or agency, and
 - (b) the amount of any income from property or rights which are used by, or held by or for, the branch or agency.

Thus for IT and CGT a UK representative is in short a branch or agency.

For CT, the term PE is used instead of branch/agency. Section 969(3) CTA 2010 provides:

- (3) For the purposes of this Chapter, the following rules apply to a permanent establishment in the United Kingdom through which a non-UK resident company carries on a trade.

Rule 1

The permanent establishment is the UK representative of the non-UK resident company in relation to chargeable profits of the company attributable to that establishment.

In the following discussion “**the non-resident principal**” is the person for whom the UK representative is a representative (who the statute calls “the non-UK resident”).

The question whether the non-resident principal is trading is crucial for the UK representative rules because these rules only apply if the non-resident principal is carrying on a trade, profession or vocation.³

³ See 41.11 (When is there a trade in financial assets?).

The INT Manual provides:

268030 Extent of UK representative's liability [September 2011]

A person can only be the UK representative in respect of the permanent establishment/branch or agency with which they are linked. Where a non-resident has more than one UK permanent establishment/branch or agency, then it is possible that each will have a different UK representative. In those circumstances, each UK representative would only be responsible in respect of the part of their non-resident's liabilities and obligations arising from their own permanent establishment/branch or agency [*Neilsen Andersen v Collins*, and *Tarn v Scanlan* 13 TC 91].

The former ITH explained “directly or indirectly” in s.835E(2)(a):

914. General

Section 79 [TMA 1970] is another 1915 amendment. It provides that a non-resident shall be chargeable on profits or gains arising directly or indirectly through any branch, agency etc here. The sort of thing that was happening, before this provision was introduced, was that an agent for a non-resident would negotiate a contract here and at the end of the oral negotiations the agent and the third party would agree to sign the formal documents abroad. The view the Revenue took, and defensibly so, was that in substance all had been done here apart from signing a piece of paper and that it was wrong for liability so to be avoided.

Problems of that sort are really problems of fact and proof as was mentioned in chapter 8 (ITH822). If the Revenue could have proved that there was an unwritten agreement made in London, it would have succeeded in a claim that the non-resident was trading here, and that is what we would argue today. Millions of pounds worth of business are done in the City of London every day on the basis of spoken agreements which are later confirmed in writing and nobody wishes to deny that the word is the contract. But, when the parties to the contract do not wish to act openly, proof is difficult to come by. What these words were meant to do was to enable the Revenue to say – “we must accept that this contract was made abroad because we cannot prove otherwise but a lot of negotiation took place in London and we want to look at the substance of the matter and the words ‘directly or indirectly’ will enable us to do that”.

40.3.3 *Representative ceasing to act*

Rule 1 s.835E(3) ITA provides for the UK representative ceasing to act:

Rule 1

The UK representative continues to be the UK representative of the non-UK resident in relation to the amount even after ceasing to be a branch or agency through which the non-UK resident carries on the trade, profession or vocation concerned.

The INT Manual provides:

268040 What assessments should be raised and how is that done? [September 2011]

Where the trading activities in the UK have ceased, the UK permanent establishment / branch or agency retains the obligations and liabilities as the UK representative even after the cessation. This provision is at ITA07/S835E Rule1 and ITTOIA05/Sch6 Para 3 (old FA95/S126 (3)) for income tax and at CTA10/S969(3) Rule 3 (old FA03/S150(2)(c)) for corporation tax. So assessments can still be raised on the UK representative subject to the usual assessing time limits. Where however the trading was conducted through a branch or fixed place of business and that presence has discontinued there may be difficulties identifying any person as the UK representative or any assets within the UK upon which recovery may rely. It is therefore recommended that assessments for such UK branches are raised and tax brought into charge at as early a stage as possible.

Additionally, by EU Directive member states of the European Union are able to seek the assistance of another member state in the recovery of direct and indirect taxes (see the guidance at DMBM560010).

40.3.4 *Separate personality*

Rule 2 s.835E(3) ITA provides for deemed separate personality:

Rule 2

The UK representative is treated in relation to the amount as a distinct and separate person from the non-UK resident (if the representative would not otherwise be so treated).

The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]

UK representative is treated as a separate person

The UK representative and the non-resident are treated as separate persons. This allows, for example, service of notices and collection to take place at the branch or agency/permanent establishment.

40.4 Partnerships

Rule 3 s.835E(3) ITA provides:

Rule 3

If the branch or agency is carried on by persons in partnership, the partnership, as such, is treated in relation to the amount as the UK representative of the non-UK resident.

Section 835F ITA provides:

(1) Subsection (2) applies if a trade or profession carried on by a non-UK resident through a branch or agency in the United Kingdom is carried on by the non-UK resident in partnership.

(2) The trade or profession carried on through the branch or agency is, for the purposes of section 835E and Chapter 2C, to be treated as including the notional trade or profession.

(3) Subsection (4) applies (in addition to subsection (2) if that subsection also applies) if—

(a) a trade or profession carried on by a non-UK resident in the United Kingdom is carried on by the non-UK resident in partnership, and

(b) any member of the partnership is resident in the United Kingdom.

(4) The notional trade or profession is, for the purposes of section 835E and Chapter 2C, to be treated as being a trade carried on in the United Kingdom through the partnership as such.

(5) In this section “the notional trade or profession” means the notional trade from which the non-UK resident’s share in the partnership’s profits or losses is treated for the purposes of section 852 of ITTOIA 2005 as deriving.

The INT Manual provides:

268020 Who can be the non-resident's UK representative?

[September 2011]

Partnerships can be the UK representative of a non-resident

A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK through the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident. This provision is at ITA07/S835E and TIOPA10/S835E for income tax and is implicit in CTA10/S969 for corporation tax.

Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a permanent establishment / branch or agency, the permanent establishment / branch or agency is the UK representative of each non-resident partner. This provision is at ITA07/S835F and TIOPA10/S835F for income tax and is implicit in CTA10/S969 for corporation tax.

Where a business is carried on in the UK by a partnership that includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit. This provision is at ITA07/S835F and TIOPA10/S835F for income tax and is implicit in CTA10/S969 for corporation tax.

The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]

A partnership can be the UK representative of a non-resident

A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK through the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident.

Partnership, which includes non-resident partners, trading in the UK through a branch or agency/permanent establishment: the branch or agency/permanent establishment is treated as the UK representative of non-resident partners

Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a branch or

agency/permanent establishment, the branch or agency/permanent establishment is treated as the UK representative of each non-resident partner.

Partnership trading in the UK which includes resident and non-resident members is treated as UK representative of non-resident partners

Where a business is carried on in the UK by a partnership which includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit.

40.5 Agents not treated as UK representatives

Section 127(1) FA 1995 provides three exceptions which I call:

- (1) “**the casual agent exemption**”;
- (2) “**the broker exemption**”;
- (3) “**the investment manager exemption**”.

I consider the first of these here; for the IME and broker exemptions, see 41.1 (Investment manager exemptions).

40.6 Casual agent exemption

Section 835G ITA provides:

(1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an agent in the United Kingdom.

(2) The agent is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) arising to the non-UK resident from—

- (a) so much of the non-UK resident’s business as relates to disregarded transactions, or
 - (b) property or rights which, as a result of disregarded transactions, are used by, or held by or for, the agent on behalf of the non-UK resident.
- (3) “Disregarded transactions” are transactions—
- (a) carried out through the agent in the United Kingdom, and
 - (b) in respect of which the agent does not act in the course of carrying on a regular agency for the non-UK resident.

The INT Manual provides:

268020 Who can be the non-resident's UK representative?

[September 2011]

Schedule 6 paragraphs 5-9 TIOPA 2010 and Subsections 835G-835K ITA 2007 (old section 127(1) FA 1995) lists the persons who cannot be the UK representative for income tax and capital gains tax:

- 1) Agents who are not regular agents. In general if a non-resident is trading in the UK through an agent that agent should be regarded as a regular agent. This was considered in the cases of *Neilsen Andersen v Collins* and *Tarn v Scanlan* (13 TC 121-2) when Scrutton LJ considered “the contrast intended to be drawn is between casual employment, temporary employment, for a transaction or few transactions, and regular appointment of a permanent agent who is there as representing the foreigner”. ...

The former ITH provided:

942. NRs: accepting TMA 70 s.82 exemption: regular agency

... casual agents are protected from assessment. As a general rule if there is UK source income and there is an agent we would want to assess the agent. A non-resident trading here through an agent will usually clearly do so through a regular agency.

It may be less clear whether an agent is a regular agent when he acts for his principal in only one transaction. This was the issue in the case of *Willson v Hooker* 67 TC 585. Acting for an Isle of Man company, Mr Willson instructed a firm of surveyors to bid for some land in the UK and instructed solicitors concerning the purchase and sale of the land. The Court said that a regular agency is any agency that is not a casual or occasional agency and that it was impossible to regard Mr Willson as a casual or occasional agent. He was the person through whom all the transactions of the company in the UK were carried out in the relevant period and so did not enjoy protection.

CT does not need the same exemption, as a casual agent is not within the concept of PE.

40.7 Subsidiary points

40.7.1 HMRC procedures

The INT Manual para provides:

268040 What assessments should be raised and how is that done?
[September 2011]

As already explained above (INTM268030)) both the non-resident and their UK representative have a personal responsibility for the tax obligations and liabilities arising from the UK permanent establishment/branch or agency. Either party is able to discharge those obligations and liabilities. So we can assess either or both parties if necessary. Once one party has paid the personal responsibility on the other party lapses for that self assessment period. Obviously in cases where self assessments are returned by or for a non-resident taxpayer and tax payments are made at the appropriate times no further action would be needed. This guidance concerns the practicalities of how to handle cases where obligations and liabilities are not met.

Because the UK representative is personally responsible for the non-residents tax obligations and liabilities, a unique tax reference should be allocated to the UK representative in that capacity. Where the UK representative is an agent (rather than a branch or fixed place of business permanent establishment) that unique tax reference should be a distinct and different reference to the one allocated to the agent for their own business. Non-resident companies intending to set up places of business in the UK are obliged to notify Companies House (see **Self assessment** at INTM261000). The consequential process in place automatically generates tax references and allocates them to the office responsible for the UK registered office address. Where that process has not happened, or for non-corporates, a taxpayer record with unique tax reference will need to be created on notification or discovery of liability.

The High Court held in the case of *Tischler v Apthorpe* [2 TC 89] that a non-resident could be assessed directly “wherever he could be reached” including the UK branch address. The decision in that case was that an assessment raised directly on the non-resident at the UK branch address was valid, even though there was also a UK representative who could have been assessed under the machinery provisions (the TMA 1970 version see INTM268010). It is probably unusual for a non-resident to have both a physical UK branch and an appointed UK agent but the reasoning in that case supports the equal validity of assessments made on the non-resident either directly at their UK branch or at the overseas address. In that case, of course, the UK agent could not be responsible for the tax assessed as he had not been notified.

So, on a practical level, assessments should be addressed in the manner most suited to the facts of the case and with the object of informing the relevant persons of the liability and securing the necessary payment of tax. Depending upon how near to expiry the assessing time limits are this could include any but possibly all of the following:

- Assessment for a branch or fixed place of business in the UK
- Assessment for UK trade carried out through an agent
- Partners and partnerships
- Recovery action

Assessment for a branch or fixed place of business in the UK

- Assess in the name of the non-resident individual or company at the UK business address.

- Send a copy also, for information, to the non-resident's address abroad if known.
- Assess any person who clearly has the capacity of "UK representative" e.g. the manager of the UK operations, as "Mr X as UK representative of XYZ".

Assessment for UK trade carried out through an agent

- Assess in the form "Mr X as agent for XYZ" sent to the agent's address.
- Send a copy of the assessment on the agent, for information, to the non-resident at their address abroad if known.
- Assess the non-resident individual or company at their address abroad if known.

Partners and partnerships

Where the UK representative is a UK partnership the partnership itself is the UK representative. In such circumstances the partners in the UK partnership will be jointly liable for the tax payable by the non-resident. It follows that any assessment that is required should be made on the partnership as agent for the non-resident. Where a non-resident is a partner in a partnership which trades in the UK directly, typically through a UK branch or fixed place of business, the form of assessment depends on whether there is a partner resident in the UK. If there is a UK resident partner the assessment should be made on the partnership as a whole but the UK resident partner will be jointly liable for the tax payable by the entire partnership. Where there is no UK resident partner then assessments on the branch profits of the non-resident partners should be made on the UK branch of the partnership.

The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]

General rule for the obligations and liabilities of UK representatives

The general rule is that UK representatives are jointly responsible with the non-resident for all the tax obligations and liabilities in relation to the trade, profession or vocation carried on through the branch or agency/permanent establishment.

This joint responsibility extends to all matters relating to the assessment of tax and to the collection and recovery of tax. For example, it extends to all the mechanisms of self assessment, including notification of chargeability, the obligation to make a tax return and self assessment, liability to make interim and final payments of tax, and liability to surcharges, interest and penalties in connection with those obligations and liabilities.

Either party is able to discharge the obligations and liabilities arising, but equally any acts or omissions of the non-resident are treated as acts or omissions of the UK representative (but see also the first two paragraphs under Offences below in relation to tax offences).

Where the trigger for an obligation or liability is the receipt of formal notification, then the obligation or liability only falls on the UK representative once they have received the relevant notification (or a copy).

40.7.2 *Notices and information*

Section 835V ITA provides:

- (1) An obligation or liability attaching to a non-UK resident (“X”) by reason of a notice or other document having been given or served on X does not also attach to the UK representative of X by virtue of section 835U unless the notice or other document (or a copy of it) has been given to or served on the representative.
- (2) An obligation or liability attaching to X by reason of a request or demand having been received by X does not also attach to the UK representative of X by virtue of section 835U unless the representative has been notified of the request or demand.
- (3) Subsection (4) applies to obligations relating to the provision of information that are imposed on the UK representative of X by section 835U in a case where the representative is X’s independent agent.
- (4) The obligations do not require the UK representative to do anything except so far as it is practicable for the representative to do so.
- (5) For this purpose, the representative must act to the best of the representative’s knowledge and belief after taking all reasonable steps to obtain the necessary information.
- (6) An obligation of X to provide information is not discharged by virtue of section 835U in a case where the UK representative of X has discharged the obligation only so far as required by subsection (4) of this section.
- (7) X is not bound by virtue of section 835U by mistakes in information provided by the UK representative of X in discharging, so far as required under subsection (4) of this section, an obligation imposed on the representative by section 835U unless—
 - (a) the mistake is the result of an act or omission of X, or
 - (b) the mistake is one to which X consented or in which X connived.
- (8) In this section “information” includes anything contained in a return, self-assessment, account, statement or report required to be provided to the Commissioners for Her Majesty’s Revenue and Customs or to any officer of Revenue and Customs.

The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]

Obligations and liabilities are limited where the UK representative is independent of the non-resident

Paragraphs 4 and 7 Schedule 23 FA 1995 & Section 148(3) and Section 150(5) FA 2003

Where the UK representative is an independent agent of the non-resident acting in the ordinary course of business, its obligations to provide information are limited to ones within its competence to act for the non-resident.

‘Independent agent’ is defined at Paragraph 7 Schedule 23 FA 1995. The definition is based on that used in the OECD Model Tax Convention and UK double taxation agreements. Broadly, to be an ‘independent agent’, the agent must be both legally and economically independent of the non-resident. As an independent agent is not within the definition of permanent establishment for corporation tax purposes such an agent could not become the UK representative of a non-resident company.

The rules recognise that, where the UK representative is an independent agent, the agent may not be able to provide complete information about the affairs of the non-resident. The agent is therefore required to provide any information requested, for example a return, to the best of its knowledge and belief after taking all reasonable steps to obtain the information. The non-resident remains responsible for completing or correcting the information where necessary.

However, the non-resident can correct any error or omission made by the UK representative provided the non-resident did not know about it or participate in it.

40.7.3 *Criminal offences and penalties*

Section 835W ITA provides:

- (1) A person is not by virtue of section 835U liable to be proceeded against for a criminal offence unless the person— (a) committed the offence, or (b) consented to or connived in its commission.
- (2) An independent agent of a non-UK resident is not by virtue of section 835U liable to any civil penalty or surcharge in respect of an act or omission if conditions A and B are met.
- (3) Condition A is that the act or omission is not—
 - (a) an act or omission of the independent agent, or
 - (b) an act or omission to which the agent consented or in which the

agent connived.

(4) Condition B is that the independent agent is able to show that the amount of the penalty or surcharge will not be recoverable out of the sums mentioned in section 835X(3) (after being indemnified for any other liabilities under section 835X).

The SALF Manual provides:

704 UK representatives of non-residents chargeable under Case I and II Schedule D [February 2011]

Offences

Paragraph 5 Schedule 23 FA 1995 & Section 150(6) FA 2003

The criminal and civil liabilities of a UK representative in respect of the non-resident's tax affairs are limited in certain circumstances.

UK representatives cannot be guilty of a criminal offence under these rules as a result of something done by the non-resident unless:

- they committed the offence
- consented to its commission, or
- connived in its commission.

The same applies for the non-resident in relation to the acts of the UK representative.

UK representatives who are independent agents are not liable to civil penalties and surcharges unless:

- they committed an act or omission or consented to, or connived in, its commission, or
- they will be able to recover the penalty out of monies of the non-resident.

40.7.4 *Indemnities*

Section 835X ITA provides:

(1) An independent agent of a non-UK resident is entitled to be indemnified for the amount of any liability of the non-UK resident which the agent has discharged by virtue of section 835U.

(2) An independent agent of a non-UK resident is entitled to retain, from the sums mentioned in subsection (3), amounts sufficient to meet any liabilities which by virtue of section 835U the agent has discharged or to which the agent is subject.

(3) The sums are those which—

- (a) (ignoring subsection (2)) are due from the independent agent to the non-UK resident, or

- (b) are received by the independent agent on behalf of the non- UK resident.

40.8 Significance and meaning of “independent agent”

An “independent agent” has three advantages:

- (1) Lower information requirements; see 40.7.2 (Notices and information)
- (2) Lower liabilities for penalties: see 40.7.3 (Criminal offences and penalties)
- (3) A right to an indemnity: see 40.7.4 (Indemnities)

Section 835Y ITA provides the definition:

- (1) In this Chapter “independent agent”, in relation to a non-UK resident (“X”), means a person who is the UK representative of X in respect of any agency in which the person is acting on behalf of X in an independent capacity.
- (2) For this purpose a person does not act in an independent capacity on behalf of X unless the relationship between them, having regard to its characteristics, is a relationship between persons carrying on independent businesses dealing with each other at arm’s length.

This is based on the definition in the IME rules; see 41.6.2 (Investment manager condition C: independent relationship) and 81.5 (Independent agent).

INVESTMENT MANAGER EXEMPTIONS

41.1 Investment manager exemptions – Introduction

This chapter considers three related exemptions where investment managers or brokers act for non-resident clients.

In order to understand the exemptions, it is helpful first to note the tax issues which a non-resident person would face (in the absence of relief) if it carried on a trade in the UK through a UK investment manager. It is necessary to consider separately (1) a non-resident company and (2) a non-resident individual or trust.

In the absence of these exemptions, if a non-resident *company* carried on a trade in the UK through a UK investment manager, the non-resident company would face a UK tax charge arising from the fact that it might be trading in the UK through a PE (ie the investment manager might be an agency PE). If so:

- (1) The non-resident company would be subject to corporation tax on its profits.
- (2) The investment manager would be a “UK representative” and that tax would be collected from it.

Similarly, in the absence of these exemptions, if a non-resident *individual or trust* carried on a trade in the UK through a UK investment manager, the non-resident would face a UK tax charge arising from the fact that it might be trading in the UK through a branch or agency (ie the investment manager might be a branch or agency). If so:

- (1) The non-resident individual or trust would be subject to income tax and CGT on its profits.
- (2) The investment manager would be a “UK representative” and that tax would be collected from it.

Alternatively the position might be that the investment manager was not a branch or agency or PE of the non-resident, but nevertheless the non-

resident was trading in the UK. In that case (whether a company or an individual or trust) the non-resident person would in principle¹ be subject to income tax on its trading profits.

Clearly, if there were no relief, non-residents would not use UK investment managers (at least if there were any risk that their activities might be characterised as trading). The investment management exemptions override these tax charges. Assuming the various requirements are met the exemptions are as follows:

- (1) An investment manager is not a permanent establishment of a non-resident company. The main significance of this is:
 - (a) to disapply the corporation tax charge which applies when a non-resident company trades through a UK PE.²
 - (a) to disapply the provisions allowing collection of tax from a PE (as its “UK representative”).³

This exemption is in ss.1145-1151 CTA 2010. I refer to it as “**IME PE relief**”.

- (2) An investment manager is not a UK representative for IT and CGT. The main significance of this is to disapply the rules allowing the collection of IT/CGT from UK representatives of non-residents.⁴ This exemption is in chapter 2B part 14 ITA and chapter 7A TCGA. I refer to it as “**IME UK representative relief**”.

- (3) UK source income generated through investment managers is one of the classes of income which qualifies for non-residents IT relief. This exemption is part of the code of non-residents IT relief set out in Chapter 1 Part 14 ITA.⁵ I refer to it as “**IME non-residents IT relief**”.

I refer to the exemptions together as “**the investment manager exemptions**” abbreviated to “**IME**”. (References to investment managers in this label include brokers.) The term used in the HMRC manuals is “investment management exemption”, in the singular. There are however best regarded as three separate (though linked) exemptions.

The rules are written out *four* times in four different places. The rules for brokers are similar to investment managers, but are set out separately

1 In practice a DTA would often provide relief.

2 See 81.1 (Why does permanent establishment matter?)

3 See 40.2 (Collection of tax from UK representatives).

4 See 40.2 (Collection of tax from UK representatives).

5 See 39.1 (Non-residents IT relief).

each time, so there are eight sets of rules. This does make a coherent exposition rather difficult. Where the rules repeat or overlap, I set out the text of IME non-residents IT relief, giving the equivalents of the other rules in the footnotes only, unless there are material differences.

SP 1/01 explains the policy considerations behind the investment management exemptions:

1. There are two policy objectives underlying the tax treatment of UK resident investment managers and their overseas clients. These objectives are that overseas investors should not be charged to UK tax in relation to investment transactions conducted on their behalf and that any fees earned by a UK resident investment manager for services performed for the non-resident should be fully chargeable to UK tax.
2. The UK tax system seeks to achieve these objectives by granting what is termed the Investment Manager Exemption. The exemption enables non-residents to appoint UK-based investment managers without the risk of UK taxation and is one of the key components of the UK's continuing attraction for investment managers. HMRC is committed to maintaining this environment by improving the exemption to meet developments in the investment management industry through providing greater flexibility and better explanations for investment managers and expanding the scope of exempt activities.

Other countries take the same view:

The highly mobile nature of the funds management business suggests that income from portfolio foreign investments flowing to non resident investors should not be taxed in Australia. Even modest amounts of Australian tax on these investors is likely to impede the growth of this business. Only the income of the Australian funds manager should be subject to Australian tax.⁶

41.2 IME PE relief

I discuss IME PE relief in this chapter, though to see the topic in the round one needs to be familiar with the definition of PE, for which see 81.2 (Meaning(s) of “permanent establishment”).

⁶ This view is expressed in “A Platform for Consultation” (Australia) para 30.61 December 2010 accessible www.rbt.treasury.gov.au/publications/paper3/index.htm.

SP 1/01 explains:

10. The Investment Manager Exemption legislation now only has relevance for corporation tax by providing greater clarity about what constitutes independence of investment managers in relation to the non-residents for which they act.

Section 1142 CTA 2010 provides:

- (1) A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent's business.
- (2) Sections 1145 to 1151 apply for the purpose of supplementing subsection (1) in relation to transactions carried out on behalf of a non-UK resident company by a person in the United Kingdom acting as—
 - (a) a broker (section 1145),
 - (b) an investment manager (sections 1146 to 1150)...

Section 1145 CTA 2010 provides the relief for a broker:

- (1) This section applies if a transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the United Kingdom acting as a broker.
- (2) In relation to the transaction, the broker is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the broker's business if (and only if) each of conditions A to D is met. ...

Section 1146 CTA 2010 provides the relief for an investment manager:

- (1) This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the United Kingdom acting as an investment manager.
- (2) In relation to the investment transaction, the investment manager is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the investment manager's business if (and only if) each of conditions A to E is met ("the independent investment manager conditions"). ...

If a broker/IM does not qualify for the broker/IM exemption then it is deemed to be not an agent of independent status, so it is deemed to be a domestic law PE. The broker might however still be an agent of independent status in which case it is not an OECD PE, so treaty relief might apply.

41.3 IME non-residents IT relief

I discuss the IME aspects of non-residents IT relief in this chapter, though to follow it one needs to be familiar with the background rules of non-residents IT relief, for which see 39.1 (Non-residents income tax relief).

SP 1/01 explains:

10. ... For income tax [the investment manager exemption] raises the threshold for chargeability so that the same criteria apply when there is no treaty protection in the form of a permanent establishment article.⁷

For individuals and trustees, non-residents IT relief applies to “disregarded income”.⁸ This term includes “disregarded transaction income”. This is where the IME non-residents IT relief comes into play. For individuals and trusts, s.814(1)(2) ITA provides relief for a broker:

- (1) Subsection (2) applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the UK.
- (2) Income is “disregarded transaction income”, subject to subsection (6), if—
 - (a) it is transaction income, and
 - (b) the independent broker conditions are met in relation to the transaction in question.

For individuals and trusts, s.814(3)(4) ITA provides relief for an investment manager:

⁷ That is, the IME provides the same relief as article 7 OECD Model Treaty: “The profits of an enterprise carried on by a resident of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein.”

⁸ See 39.6 (Disregarded income).

- (3) Subsection (4) applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the UK.
- (4) Income is “disregarded transaction income”, subject to subsection (6), if—
 - (a) it is transaction income, and
 - (b) the independent investment manager conditions are met in relation to the transaction in question.

For non-resident companies the drafting is similar and the result is the same. Non-residents IT relief applies to “disregarded company income”. Section 816 ITA provides:

- (1) For the purposes of this Chapter income arising to a non-UK resident company is “disregarded company income” if it is ...
 - (c) income arising from a transaction carried out through a broker in the United Kingdom acting as an agent of independent status in the ordinary course of the broker's business,
 - (d) income arising from a transaction carried out through an investment manager in the United Kingdom acting as an agent of independent status in the ordinary course of the investment manager's business, ...

41.4 IME UK representative relief

I discuss IME UK representative relief in this chapter, though to see it in the round one needs to be familiar with the UK representative rules, for which see 40.2 (Collection of tax from UK representative) .

Section 835H ITA provides relief for brokers:

- (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the United Kingdom.
- (2) The broker is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
 - (a) the amount is transaction income in relation to a transaction carried out through the broker in the United Kingdom on behalf of the non-UK resident, and
 - (b) the independent broker conditions are met in relation to the transaction (see section 835L).

Section 835I ITA provides relief for investment managers:

- (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the United Kingdom.
- (2) The investment manager is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
 - (a) the amount is transaction income in relation to an investment transaction carried out through the investment manager in the United Kingdom on behalf of the non-UK resident, and
 - (b) the independent investment manager conditions are met in relation to the investment transaction (see section 835M).

41.5 Defined terms in IME legislation

41.5.1 “Investment manager”

Section 827(1) ITA provides a commonsense definition:

In this Chapter “investment manager” means a person who provides investment management services.

41.5.2 “Broker”

There is no statutory definition. The former ITH provided:

926. NRs: Machinery of assessment: commodity markets: broker

A few words are called for about an important market operator, the broker. London has been a great market for centuries. Until a few decades ago vast amounts of produce were landed in, or trans-shipped in London docks and it was here and in other ports that the markets grew. They are run by Trade Associations which lay down rules designed to secure a fair, orderly and open market; to provide for membership, and to consider things like rates of brokerage. The actual constitution of the different markets varies but one would normally find as members some big producers, some major users, both of whom may have a seat in the market ring, the place of business. But the central character is the broker. A broker is a negotiator for commission, who will sell or buy for clients. Brokers have a long history, but, in modern usage, Bowstead, the writer of the standard work on agency, describes the broker in this way—

“A broker is an agent whose ordinary course of business is to negotiate and make contracts for the sale and purchase of goods and other property of which he is not entrusted with the possession or control.”

Payne, a writer on British Commercial Institutions, says this of an import broker—

“The function of a broker is to bring two parties together for the purpose of

concluding a contract. Brokers are generally produce brokers with whose aid very large transactions take place at the chief importing ports. They are often specialists who, through long experience of markets ... are able to buy and sell to better advantage than could the general import merchant ... he (the broker) is not associated with the physical movement of the goods, nor with clearing them through Customs. After selling a consignment by auction, or by private treaty, the broker is paid a commission or fee (brokerage) which, with the other expenses of sale is deducted from the gross selling price.”

Brokers are thus associated with the great commodity markets and exchanges, professional negotiators who will act for buyers and sellers and have nothing to do with the work-a-day business of handling or insuring the goods. They constitute an essential link in the market mechanism, in making the function of the market-place in determining price, available to their clients. Another odd quality of brokers is that the same broker can, by the custom of certain markets, act both for buyer and seller.

This means in practice that if A has asked a broker to sell something and B has asked the same broker to buy the same thing, the broker can match the two. The market rules would require that the broker does this business in the open (so that any other broker can step in if he wishes) and that preserves the idea of open market dealing and the natural protection which it gives to buyer and seller. Although the broker has acted for both parties the open nature of the market mechanism ensures that the price is a fair market price. ...

939 NRs: when to accept the TMA 70 s.82 broker exemption - General

Brokers and general commission agents take a very limited part in the marketing process. They are there to make the advantages of the market-place available to their clients. Whatever the terms mean, we do not accept as a broker or as a general commission agent a man who does everything the client himself would do in running the business were he himself here to do it, even if the agent acts for more than one client. Both expressions are primarily to do with commodity markets and that is what they were really intended for.

But over the years the application of the broker and general commission agent exemption has been extended. Stockbrokers, for example, will generally fall within Section 82(1) [TMA].⁹ We have certainly accepted that there can be general commission agents and brokers in the field of shipping and that the exemption is sometimes appropriate. In insurance, on the other hand, we resist the suggestion that an underwriting agent can be a general commission agent. Insurance brokers will not normally be carrying on a non-resident's trade. If it seems that they do then they will arguably be acting in the capacity of underwriting agents and we would deny the exemption. If, in Districts, there are cases outside the usual commodity markets, where exemption under Section 82(1) appears to have been given but this treatment has not definitely and fairly recently, say within the last twenty years, been approved or condoned by

9 Section 82 (now repealed) provided: “Nothing in this Part of this Act shall render a non-resident person chargeable in the name of a broker ...In this subsection, ‘broker’ includes a general commission agent.”

International Division, it would be sensible to consider asking for advice on the next convenient occasion.

41.5.3 “*Transaction income*”

Section 814(5) ITA provides the definition:

In this Chapter “transaction income”, in relation to a transaction carried out through a broker or investment manager in the UK on behalf of a non-UK resident, means income which arises to the non-UK resident from—

- (a) so much of the non-UK resident’s business carried on (alone or in partnership) through the broker or investment manager as relates to the transaction, or
- (b) property or rights which, as a result of the transaction, are used by, or held by or for, the broker or investment manager on behalf of the non-UK resident.

41.5.4 “*Investment transaction*”

Section 827 ITA provides the definition:

(2) In this section “investment transaction” means any transaction of a description specified for the purposes of this section in regulations made by HMRC.

(3) Provision made in regulations under subsection (2) may, in particular, have effect in relation to the tax year current on the day on which the regulations are made.

The regulations are the Investment Manager (Specified Transactions) Regulations 2009. This is six pages long, so a full discussion would be a lengthy affair.

The label “investment transaction” is not strictly appropriate because the transaction will be a *trading* transaction and the so-called investment will be trading stock.

41.6 Investment manager conditions

Section 818(1) ITA provides:

The independent investment manager conditions are met in relation to an investment transaction carried out on behalf of a non-UK resident by an investment manager in the UK if conditions A to E are met.

I refer to these as “**investment manager conditions A to E**”.

41.6.1 *Investment manager conditions A and B: investment manager*

Section 818 ITA provides:

(2) Condition A is that at the time of the transaction the investment manager is carrying on a business of providing investment management services.

(3) Condition B is that the transaction is carried out in the ordinary course of that business.

These are the equivalent of broker conditions A and B.

41.6.2 *Investment manager condition C: independent relationship*

Section 818(4) ITA provides:

Condition C is that, when the investment manager acts on behalf of the non-UK resident in relation to the transaction, the relationship between them, having regard to its legal, financial and commercial characteristics, is a relationship between persons carrying on independent businesses dealing with each other at arm’s length.

The requirement is equivalent to the rule that an independent agent is not a PE. The reference to “legal financial and commercial characteristics” is drawn from the INTM’s explanation of the PE rule and SP 1/01. So guidance on what is an independent agent for PE is relevant here.¹⁰

SP 1/01 provides:

35. The manager must act for the non-resident in an independent capacity. This means ascertaining whether, having regard to its legal, financial and commercial characteristics, the relationship between the manager and the non-resident is a relationship between persons carrying

¹⁰ See 81.5 (Independent agent).

on independent businesses that deal with each other on arm's length terms.

This is imprecise, so the SP offers a bright line test which may offer a safe harbour for collective funds.¹¹ If this test is satisfied one is back to the

11 36. The relationship will be considered to be independent if the non-resident has the following characteristics:

- (a) the non-resident is a widely held collective fund or, if not,
- (b) the non-resident is not a widely held collective fund but is either being actively marketed with the intention that it become one or is being wound up or dissolved.

37. A fund will be regarded as widely held if either no majority interest in the fund is ultimately held by five or fewer persons and persons connected with them, or no interest of more than 20% is held by a single person and persons connected with that person. The fund may need to establish a track record before new investors are obtained and will therefore have 18 months from the commencement of trading in the UK to meet the widely held test. Where investment management services are provided to a collective investment scheme constituted as a partnership, participants in the scheme will not be regarded as connected persons for this purpose if their only connection is membership of the partnership. This means that if the investment manager is a partner in the fund it will not be treated as connected with the other partners in the fund for the purpose only of the Independent Capacity Test, although there may still otherwise be connection under s 839 TA 1988/s 993 ITA 2007 between the participants, for example as partners in another capacity.

38. Actively marketed means there must be evidence of ongoing genuine attempts to obtain third party investment into the fund in order to meet the widely held test and that the terms on which interests in the fund are offered are not prohibitive or discriminatory for that class of business.

39. If the fund has one of the above two characteristics the independent capacity test will be met without the need to refer to any other factors.

40. In other cases the independent capacity test will be met:

- (a) where the provision of services to the non-resident and persons connected with the non-resident is not a substantial part of the investment management business. Where that part does not exceed 70% of the investment manager's business, either by reference to fees or to some other measure (where that would be more appropriate), it will not be regarded as substantial. Further, if in the first 18 months from the start of a new investment management business the services provided to the non-resident exceed 70% of the business, they will not be treated as a substantial part of the business provided that they are consistently below 70% in subsequent periods.

- (b) where the provision of services to the non-resident represents more than 70% of the investment manager's business 18 months after the start of a new investment management business but that was for reasons outside the manager's control and the manager had taken all reasonable steps to bring it below 70%. The investment manager will be expected to provide all relevant information to support a contention that the services are a substantial part of the manager's business for reasons beyond

vagueness of the law:

41. If none of the above tests are satisfied HMRC will have regard to the overall circumstances of the relationship between the non-resident and the investment manager in determining whether they are carrying on independent businesses that deal with each other on arm's length terms. It is not possible to describe every scenario in which the relationship may still meet this test but the guidance in this Statement of Practice should provide certainty to the vast majority of non-residents trading in the UK through an investment manager and HMRC will also continue to provide advice for any other circumstances.

42. Some funds adopt a master/feeder structure. Where the investment manager manages an opaque master fund, eg a company, which has feeder funds then the independence test will be applied as if the master fund were transparent by looking at the beneficial ownership of each feeder fund to determine whether the master fund is independent.

43. Similarly, if the investment manager acts for one or more sub-funds owned by an umbrella fund it is the beneficial ownership of the latter that will determine whether the independence test is met.

44. It should be noted that a subsidiary may be considered independent of its parent company for the purposes of the test, notwithstanding the parent's ownership of the share capital.

41.6.3 *Investment manager condition D: 20% rule*

Section 818(5) ITA provides:

Condition D is that the requirements of the 20% rule are met (see s.819).¹²

41.6.4 *Investment manager condition E: customary remuneration*

Section 818 ITA(6) provides:

Condition E is that the remuneration which the investment manager receives in respect of the transaction for the provision of investment management services to the non-UK resident is not less than is customary for that class of business.

the manager's control and to demonstrate what steps have been taken to rectify that position.

¹² See 41.7 (The 20% rule).

This is the equivalent of broker condition C. It overlaps with investment manager condition C since an arm's length relationship would normally involve customary remuneration.

SP 1/01 explains the meaning of "customary remuneration":

60. The UK investment manager must receive remuneration at a rate that is not less than customary for the services. The legislation does not define what is "customary" nor does it specify from whom remuneration must be received although, as already explained, HMRC will not regard a UK investment manager as acting in an independent capacity on behalf of the non-resident unless the relationship between them is that of persons carrying on independent businesses and dealing with each other at arm's length.

61. HMRC will be guided by the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations when determining whether a pricing structure applies the customary rate and will look at whether the net effect of any provision made or imposed by means of a transaction or series of transactions provides the UK investment manager with a level of remuneration which would have been achieved at arm's length. All circumstances will be taken into consideration, including whether that remuneration has been reduced below the arm's length rate in any way either before or after payment to the UK investment manager.

62. HMRC recognises that remuneration structures through which the non-resident pays fees in a particular class of investment management take numerous forms, with variations including, for example, investment terms intended to attract certain investors or to "lock in" an investment. The arm's length definition of customary rate for the independent investment manager means that such arrangements between unconnected parties would not jeopardise this test. Transactions made at arm's length may include directly or indirectly reduced or rebated fees for unconnected investors in the non-resident[.] Similarly, rebated, reduced or zero fee arrangements which are made between the manager and the unconnected non-resident for genuine commercial reasons, such as where the manager is receiving a separate fee in respect of the assets in which the non-resident is investing, would be regarded as transactions made at arm's length.

63. In determining whether remuneration has been reduced below the arm's length rate in any way HMRC will consider both the remuneration received by the UK investment manager and any amounts payable to any person:

- for services provided to the non-resident, or
- in connection with the non-resident, or
- that relate to the performance of the non-resident.

These amounts, which may be payable by either the non-resident or the UK investment manager, will be treated as reducing the remuneration received in the UK below the customary rate unless they can be shown to be at an arm's length rate.

64. HMRC consider that in order to meet the customary rate test fees payable to a UK investment manager should be recognised for UK tax purposes when earned. A cash payment may be deferred or reinvested in the fund but this should not affect the recognition of the fee income. As a result, the UK manager would pay tax on the fee for the period when earned and no difficulty with the customary rate test is envisaged in these circumstances. If cash settlement of management fees is deferred the manager may have effectively made a loan to, or investment in, the non-resident, as a result of which the return on that loan or investment would be attributable to the manager and may need to be taken into account for the 20% test.

Paras 64 onwards do not stand up to much examination.

65. Where a UK investment manager, a partner, director or employee of that manager, or a person connected with any of these, acquires a security or an interest of some other kind, in the non-resident or in another entity, for services provided by the manager:

- to the non-resident, or
- in connection with the non-resident,

the customary rate test will only be met if it can be shown that the manager or partner brings the security or other interest into charge to UK tax at its market value or, in the case of a director or employee, that the security or other interest is taxed as employment income in accordance with Part 7 ITEPA 2003. The definition of “security” here will be that found in s420 ITEPA 2003. An interest is intended to apply to an interest in a security or securities and any other interest not within the s420 ITEPA definition.

66. Where an option is brought into UK tax charge at full market value at the time it is exercised HMRC will not regard this remuneration as less than the arm’s length rate for the purposes of the customary rate test.

67. Preferential investment terms involving reduced or rebated fees for directors or staff of the investment manager may be a benefit provided by reason of employment and thus may give rise to an employee income tax charge under ITEPA 2003. Similarly, where the investment manager is a partnership, preferential fee terms may be offered to partners who acquire interests in the non-resident, in which case the ensuing personal tax consequences will apply. HMRC will not ordinarily regard these terms as reducing the investment manager’s fees for services below the arm’s length amount unless significant UK tax avoidance or evasion is suspected, in which case all the facts and circumstances will be considered to determine whether the rate of remuneration is below the arm’s length amount.

68. The vast majority of non-residents easily meet the customary rate test. However, HMRC has occasionally encountered structures in which offshore arrangements have been used to evade or avoid UK tax. Commonly, such structures involve arrangements whereby fees charged to the non-resident are diverted to an offshore vehicle at a non-arm’s length rate. Such arrangements

represent an abuse of the exemption, place compliant¹³ UK managers at a competitive disadvantage and may result in a non-resident failing to meet the terms of the exemption unless remedial action is taken.

The SP then turns to consider what evidence may be required:

69. HMRC has published guidance in its International Manual on what documentation and evidence is required to demonstrate an “arm’s length” reward. At the time of publication of this Statement that guidance appears at INTM433030 of the Manual which can be found at <http://www.hmrc.gov.uk/manuals/intmanual/index.htm> and it is advisable to check that the most up to date advice is being followed.

70. The legislation considers the obligations and liabilities of the non-resident and whether the non-resident is exempt from UK tax on its UK trading profits. A non-resident may be a taxable person and in considering whether that is the case, and whether the UK agent has been rewarded with an arm’s length rate, it may be appropriate in some circumstances for HMRC to ask for information such as statutory financial statements of the non-resident and its agents and a full and factual functional analysis of all services provided to the non-resident.

71. In circumstances where such information is requested to ascertain whether the remuneration has been at the customary rate HMRC would normally ask the UK investment manager, but in some circumstances may ask the non-resident, to provide such information as may reasonably be considered necessary. The information powers available to HMRC would include those relevant to the tax liabilities of the non-resident but where reasonable cooperation is provided by the UK investment manager and/or, where appropriate, the non-resident it is intended that a reasonable opportunity will be given to supply the information voluntarily before the use of information powers is considered.

72. Where appropriate documentation, including a factual functional analysis and an acceptable transfer pricing methodology, is in place to support a tax return, the investment manager will have an opportunity to agree an adjustment to the return to meet the customary rate test or for any other reason, or to have adjustments determined through litigation where such an agreement has not been reached, without the non-resident having thereby failed the customary rate test.

73. However, where the investment manager does not have the appropriate

13 A note on terminology. The word “compliant” has now become an essentially contested concept, that is, it admits of two distinct conceptions that are a battleground for profound substantive disagreements. HMRC use the term to mean those who comply with the legal rules of taxation *and* a more insubstantial spirit of the legislation (of which one suspects HMRC consider themselves the final arbiter). This was a novel linguistic turn in 2001 and most practitioners would regard “compliant” as apt to describe everyone who comply with the legal requirements of taxation. Contrast the two views of the taxpayer/HMRC relationship discussed in 82.9 (Above-minimum disclosure for sake of good relations with HMRC).

documentation and methodology in place at the time of making a return and the remuneration for that period is less than the arm's length rate, it is possible that the customary rate test has not been met. HMRC would expect the non-resident and the investment manager to ensure that adequate measures are taken to prevent the fund or its investors being exposed to UK tax and will give reasonable notice of possible action, and the reasons for it, to both the non-resident and its agents if it discovers any circumstances in which the non-resident may not have met the Investment Manager Exemption tests.

74. Each case will be considered on its own facts and it is possible that appropriate corrective action through adjustment to the customary rate will still enable the test to be met. It is not possible to describe every scenario but this general approach is intended to provide certainty on what the legislation requires and to reassure non-residents that a disproportionate outcome will not arise from a corrected failure to meet the test.

41.7 The 20% rule

Section 819(1) ITA provides:

The requirements of the 20% rule are met if conditions A and B are met.

I refer to these as “**20% rule conditions A and B**”.

(2) Condition A is that in relation to a qualifying period¹⁴ it has been or is the intention of the investment manager and the persons connected with the investment manager that at least 80% of the non-UK resident's relevant disregarded income¹⁵ should consist of amounts to which none

14 Section 820 ITA provides:

“(1) This section applies for the purposes of this Chapter.

(2) If section 819 applies for the purposes of section 813, a “qualifying period” means—

- (a) the tax year in which the transaction income is chargeable to income tax, or
- (b) a period of not more than 5 years comprising two or more tax years including that one.

(3) If section 819 applies for the purposes of section 816, a “qualifying period” means—

- (a) the accounting period of the non-UK resident company in which the transaction in question is carried out, or
- (b) a period of not more than 5 years comprising two or more complete accounting periods including that one.”

15 Section 821 ITA provides:

“(1) This section applies for the purposes of this Chapter.

(2) If section 819 applies for the purposes of section 813, the “relevant disregarded

of them has a beneficial entitlement.

(3) Condition B is that, so far as there is a failure to fulfil that intention, that failure—

- (a) is attributable (directly or indirectly) to matters outside the control of the investment manager and persons connected with the investment manager, and
- (b) does not result from a failure by any of them to take such steps as may be reasonable for mitigating the effect of those matters in relation to the fulfilment of that intention.

41.7.1 *Beneficial entitlement*

Section 822(1) ITA provides:

This section applies for the purposes of this Chapter.

In fact the expression “beneficial entitlement” only appears in the 20% rule condition A, s.819(2) ITA, so the definition is only needed for that purpose.

(2) A person has a “beneficial entitlement” to relevant disregarded income if the person has or may acquire a beneficial entitlement that is, or would be, attributable to the relevant disregarded income as a result

income” of the non-UK resident for the qualifying period is the total of the non-UK resident’s income for the tax years comprised in the qualifying period which derives from the transactions mentioned in subsection (4).

(3) If section 819 applies for the purposes of section 816, the “relevant disregarded income” of the non-UK resident company for the qualifying period is the total of the non-UK resident company’s income for the accounting periods comprised in the qualifying period which derives from the transactions mentioned in subsection (5).

(4) The transactions referred to in subsection (2) are investment transactions—

- (a) carried out by the investment manager on the non-UK resident’s behalf, and
- (b) in relation to which the independent investment manager conditions are met, ignoring the requirements of the 20% rule.

(5) The transactions referred to in subsection (3) are transactions—

- (a) carried out by the investment manager on the non-UK resident company’s behalf, and
- (b) in relation to which the investment manager does not fall to be treated as a permanent establishment of the non-UK resident company, ignoring the requirements of the 20% rule.”

of having an interest or other rights mentioned in subsection (3).

(3) The interests and rights referred to in subsection (2) are—

- (a) an interest (whether or not an interest giving a right to an immediate payment of a share in the profits or gains) in property in which the whole or any part of the relevant disregarded income is represented, or
- (b) an interest in, or other rights in relation to, the non-UK resident.

41.7.2 *Position where 20% rule not met*

Section 823 ITA provides:

(1) This section applies in the case of an investment transaction in relation to which the independent investment manager conditions are met, except for the requirements of the 20% rule.

(2) This Chapter has effect as if the requirements of that rule were met in relation to the transaction but only in relation to—

- (a) so much of the transaction income of the non-UK resident as falls within subsection (3), if this section applies for the purposes of section 813, or
 - (b) so much of the income of the non-UK resident company deriving from the transaction as falls within subsection (3), if this section applies for the purposes of section 816.
- (3) Income falls within this subsection if it does not represent income—
- (a) which is relevant disregarded income of the non-UK resident, and
 - (b) to which the investment manager or a person connected with the investment manager has or has had any beneficial entitlement.

Section 824 ITA (non-resident collective investment scheme) is not discussed here.

41.7.3 *HMRC practice*

SP 1/01 provides:

45. In essence the requirement is that the investment manager and persons connected with it, including connected charities, must not have a beneficial entitlement to more than 20% of the non-resident's chargeable profit arising

from transactions carried out through the investment manager. The definition of connected persons is that in s 839 TA 1988/s 993 ITA 2007.

46. Management fees paid to the investment manager and persons connected with it are not included in the chargeable profit provided they would be allowable in computing the profit of the non-resident were it chargeable to UK tax. This applies equally to incentive fees, performance fees or incentive allocations which are calculated by reference to any increase in the net asset value or profits of the relevant non-resident. This treatment of incentive allocations is explained further below.

47. Where the 20% threshold is exceeded, the part of the income of the non-resident to which the investment manager and connected persons are beneficially entitled is excluded from the limitation of charge. The limitation of charge will apply to the part to which they are not beneficially entitled provided the other tests in the investment manager provisions are met.

48. The 20% test is treated as satisfied throughout any period, not exceeding five years, for which it is met in respect of the total taxable income of the period arising from transactions carried out through the investment manager. It is also treated as satisfied if the manager intended to meet that test but failed to do so, wholly or partly, for reasons outside the manager's control, having taken any reasonable steps to fulfil that intention. This means that the manager must fulfil the intention to keep its beneficial entitlement within 20% of the total taxable income for the period insofar as it is reasonable to do so, but is not required to get within that figure at any cost, for instance where there are good commercial reasons for not achieving that.

49. This is an example of how the test may be met throughout a period of five years:

Years	1	2	3	4	5
Taxable income of non-resident	£100	£200	£200	£250	£250
Entitlement of manager to above	£32	£58	£40	£35	£5
Expressed as percentage for each year	32%	29%	20%	14%	2%
Average % over qualifying period	32%	30%	26%	22%	17%

It may be assumed that the test is satisfied for year one because (a) in this example it was the manager's intention to have a beneficial entitlement to an average of 20% or less in aggregate over a five year period and (b) that intention was fulfilled. Had the 20% beneficial entitlement been achieved before the five years were up, then that shorter period would have been the qualifying period. A second qualifying period of up to five years could include years two, three, four, five and six and so on.

50. As with any other tests for the exemption, unless specified otherwise, the UK tax rules regard companies, including LLCs, as opaque and the FA 2003 rules apply, while partnerships are transparent and FA 1995 applies. In addition, the rule for non-resident companies at Schedule 26(5) FA 2003 treats partnership collective investment schemes in which they invest as assumed companies for the purposes of the 20% test.

51. In relation to a tax-transparent fund having overseas investors, the non-residents will be participants in the fund. In such circumstances the 20% test would be automatically broken where a non-resident participant is connected to

the investment manager since this would mean that all the non-resident participants were connected under s 839(4) TA 1988/s 993(4) ITA 2007 by virtue of their being partners in the same partnership. The investment manager and connected persons would then be entitled to all the income of that non-resident. Accordingly, where the investment management services are provided to a collective investment scheme (as defined in the Financial Services and Markets Act 2000) the 20% test is applied by looking at the scheme as a whole rather than at the individual participants. It is not then relevant that the investment manager may be connected to the non-resident as partner (s 127(10) and paragraph 5 Schedule 26 FA 2003) or that the non-resident participants themselves carry on a financial trade as the availability of the exemption is instead tested solely by reference to the nature of the activities of the notional company represented by the scheme.

52. In certain circumstances the investment manager may be connected with the participants because both are partners in one or more partnerships which have an interest in the fund in question. Where the 20% test is failed as a consequence of aggregating the manager's income with that of certain partners who are not connected persons otherwise than as a result of s 839(4) TA 1988/s 993(4) ITA 2007, ie by being partners in a partnership, the failure will be regarded as a failure under s 127(4)(b) FA 1995 and paragraph 4(b) Schedule 26 FA 2003 to fulfil an intention to satisfy the test. But in certain situations that failure will be considered as—

- (a) attributable to matters outside the control of the manager and persons connected with it; and
- (b) as not being the result of a failure to take reasonable steps to mitigate the effect of those matters in relation to the fulfilment of that intention.

In those situations the 20% test will be met. The legislation will be applied in this way where:

- the connected persons are partners other than solely in a fund under consideration; and
- partnership is the only reason that the manager is connected with them.

A remarkable fudge.

53. Where overseas pension funds are set up under trust the trustees do not have beneficial ownership of the pension fund income although they may be the legal owners. The 20% test will not therefore apply where the trustee is connected to the UK investment manager. In practice it would be unusual for an overseas pension fund to be carrying on a financial trade. ...¹⁶

55. Some non-residents remunerate investment managers with profit or incentive allocations and in consultations HMRC, investment managers and advisors reached a consensus that these are performance fees in substance. As such, these are income in nature and where they are recognised by the UK manager as fee

16 The paragraph omitted here discusses “control”; see 80.3.2 (Control over a company's affairs).

income the allocations may be treated as fees payable by the non-resident when computing the chargeable profit. Furthermore, where HMRC is satisfied that some of the allocations are due to an overseas service provider as remuneration for those services at the arm's length rate those allocations will have the same treatment in computing relevant excluded income.

56. Deferred fees, or securities or interests provided as reward, may in turn generate some form of return. The legislation draws no distinction between the forms in which the profits of the fund are attributed to deferred fees or other investments as the test is based on beneficial entitlement to the chargeable profits of the non-resident and if the manager's beneficial entitlement to those profits, including the return on the securities, interests or deferred fees, exceeds 20% the test will not have been met.

57. Options to acquire any securities or interests in the non-resident, within the meanings at s 420 ITEPA 2003, need only be considered in the context of the 20% test when the options are exercised.

58. Some investments in a non-resident may be linked to structured products issued to customers which provide a return based on the performance of the non-resident, an example of which would be a bank investing in a non-resident fund and selling a product to a customer on which the return is linked to the performance of the fund. In such circumstances the beneficial entitlement to the income of the non-resident remains with the investor in the non-resident, in this example the bank, and not the holder of the structured product, ie the customer.

Interaction of the 20% test and the independence test.

59. The independence test and the 20% test apply quite separately. For example, a UK investment manager acts for an overseas trading fund constituted as a company. If the investment manager is not acting in an independent capacity in relation to the fund company then the whole of the income of the fund is liable to assessment. If the independence test is satisfied, then the 20% test must be separately addressed. If the investment manager's interest in the fund company is 25% then that share of the fund's trading income is liable to assessment.

41.8 Independent broker conditions

Section 817 ITA provides:

- (1) The independent broker conditions are met in relation to a transaction carried out on behalf of a non-UK resident by a broker in the UK if—
 - (a) conditions A to D are met, if this section applies for the purposes of section 813 [individuals/trustees], or
 - (b) conditions A to C and E are met, if this section applies for the purposes of section 816 [companies].

I refer to these as “**broker conditions A to E**”, to avoid confusion with

the myriad other conditions ITA.

41.8.1 *Broker conditions A and B: broker's business*

Section 817 ITA provides:

- (2) Condition A is that at the time of the transaction the broker is carrying on the business of a broker.
- (3) Condition B is that the transaction is carried out in the ordinary course of that business.

The former ITH provided:

940. NRs: accepting TMA 70 s82 broker exemption: in course of business

The exemption in Section 82(1) applies only to transactions which the broker carries out (on behalf of the non-resident) “in the ordinary course of his business as such”. In modern times it has become common for brokers to extend their business beyond mere “broking” but it does not follow that, just because what they do is now customarily done by brokers, they do it in the ordinary course of their business as brokers. Thus stockbrokers and commodity brokers often provide investment management schemes for clients. But investment management does not thereby become an ordinary function of a broker. However, there are special provisions for investment managers which are considered in ITH951.

41.8.2 *Broker condition C: customary remuneration*

Section 817(4) ITA provides:

Condition C is that the remuneration which the broker receives in respect of the transaction for the provision of the services of a broker to the non-UK resident is not less than is customary for that class of business.

41.8.3 *Broker condition D: UK representative*

Section 817(5) ITA provides:

Condition D is that the broker does not fall for the purposes of Chapter 2B of this Part, or of Chapter 1 of Part 7A of TCGA, to be treated as a UK representative of the non-UK resident in relation to

- [1] any other income which is chargeable to income tax, or
- [2] amounts which are chargeable to capital gains tax,

for the same tax year as the transaction income.

This condition applies to individuals/trustees and not to companies.

41.8.4 *Broker condition E: permanent establishment*

Section 817(6) ITA provides:

Condition E is that the broker does not fall to be treated as a permanent establishment of the non-UK resident company in relation to any other transaction of any kind carried out in the same accounting period of the non-UK resident company as the transaction in question.

The wording is the equivalent of broker condition D for companies (using the company tax concept of PE rather than the individual/trustee concept of branch/agency). Of course it would be simpler if the two were aligned.

41.9 Transactions through brokers

Section 828 ITA provides:

- (1) For the purposes of this Chapter a person is regarded as carrying out a transaction on behalf of another if the person—
 - (a) undertakes the transaction, whether on behalf of or to the account of the other, or
 - (b) gives instructions for it to be so carried out by another.
- (2) In the case of a person who acts as a broker or investment manager as part only of a business, this Chapter has effect as if that part were a separate business.

41.10 Relevance of financial trading to IME

The question whether the non-resident client is trading is crucial for the IME. Unless the non-resident client is trading, the three IME exemptions are not needed:

- (1) In the absence of a trade, a non-resident company is not subject to CT even if it has a permanent establishment and so the company does not have to rely on IME PE relief.
 - (2) In the absence of a trade, there can be no UK representative and the non-resident does not need to rely on IME UK representative relief.
 - (3) In the absence of a trade, non-residents may qualify for non-residents IT relief and do not have to rely on IME non-residents IT relief.
- SP 1/01 acknowledges this:

14. The Investment Manager Exemption legislation has no relevance unless the non-resident is trading in the UK.

15. If the transactions carried out through the investment manager are part of the trade carried on by the non-resident then, unless the [IME] tests ... are satisfied the income from that trade, including any profit from the realisation of securities, etc, is taxable. ...

41.11 When is there a trade in financial assets?

“Trade” has no short definition and the general question of what a trade is needs a book to itself. The question discussed in this section is when there is a trade of dealing in securities, options and futures (which I shall abbreviate to securities or “financial assets” or “financial transactions”). The trading/non-trading distinction here is important but elusive.

41.11.1 *Terminology*

“Investment” or “investing” is a word with several meanings.¹⁷

In one sense all securities are “investments”. We have investment managers, investment brokers, investment companies or trusts. This is a convenient and common usage. However various distinctions are sometimes drawn which narrow the meaning of “investment”.

In a tax context, one ought to distinguish between:

- (1) investing in securities and

¹⁷ For a helpful discussion of this terminology in a commercial context see Graham & Dodd, *Security Analysis* (6th ed., 2009) chap 4 (distinctions between investment and speculation). For a discussion in a UK tax context, see Kessler and Brown, *Taxation of Charities and Non-Profit Organisations* (8th ed, 2011), para 5.9 (Investment) (online version www.taxationofcharities.co.uk).

(2) *trading* in securities. (In tax terminology “dealing” is an informal synonym of trading, but I think it is clearer to use the statutory term.) In correct tax terminology a trader is not “investing” and holds securities as trading stock and not as “investments”. I stress this because one sometimes finds the word “investment” used in a trading context.¹⁸ This is not surprising because in the finance industry, the terms “investing”, “trading” and “dealing” are all used as synonyms, because for brokers and investment managers this distinction is irrelevant.

A distinction is sometimes drawn between:

- (1) investing in securities and
- (2) gambling or speculating.

I discuss the meaning of “gambling” and “speculating” below. The important point here is that gambling or speculating (whatever that means) is not (in this sense) investing.

In the absence of trade, the matter is usually investment, and the trading/non-trading tax distinction can be described as a trading/investment distinction. This is doubted in *Wannell v Rothwell* 68 TC 719 at p.730:

[Counsel for HMRC] mildly criticised para 11 for having posed the question ‘trade or no trade?’ but then, having treated that as equivalent to ‘trade or investment?’ I think there is some force in that criticism, since the word ‘investment’ has many shades of meaning, both in taxing statutes and elsewhere, and it is not used in the statutory provisions now under consideration.

This is strictly correct. It is possible to acquire financial assets in a manner which is not trading but which is not necessarily described as investment. (In particular, financial transactions have sometimes been described as “gambling” and classified as neither trading nor investment.) However, for most practical purposes that can be disregarded in the present context, and ‘trade or no trade?’ can be regarded as equivalent to ‘trade or investment?’.

This discussion of terminology does not identify the dividing line between trading and investment, but it is an essential start if we are to know what we are talking about.

18 See 41.5.4 (“Investment transaction”).

41.11.2 *Principles*

The principles are summarised in *Cooper v C & J Clark*:

[1] First, marketable securities, being income-yielding assets usually capable of appreciating in value, are prima facie purchased and sold by way of investment and not by way of trade.

[2] Secondly, a series of purchases and sales may sometimes, if carried out pursuant to a deliberate and organised scheme of profit-making, amount to a trade.

[3] Thirdly, it is easier to characterise a series of purchases and sales as a trade in a case where they are made by a trading entity¹⁹ as opposed to an individual.

[4] Fourthly, in the case of a trading entity that characterisation is more easily made where the purchases and sales are substantial in relation to its other activities, all the more so where they are of frequent occurrence and extend over a long period of time.²⁰

This is uncontentious and helpful as far as it goes.

41.11.3 *“Speculative” transactions*

Cooper v C & J Clark continues:

Fifthly, it is sometimes helpful, although not decisive, to ask whether a series of sales and purchases is speculative or not. The reason why the question is sometimes helpful is that the answer may throw light *in one direction or the other*, but it is not decisive because according to the circumstances either a trade or a course of investment may be

19 By “trading entity” it is not entirely clear whether the judge had in mind:

- (1) an entity actually carrying on a trade (such as the taxpayer company in *C&J Clark*, which was a shoe manufacturer); or
- (2) any company with articles authorising it to carry on a trade, whether or not it carries on any activity apart the transactions in financial assets.

The general rule is that it is easier to characterise a series of purchases and sales as a trade in any case where they are made by any company with articles authorising it to carry on a trade. See 41.11.4 (“Gambling” and distinction between individuals and companies).

20 54 TC 670 at p.676.

speculative.²¹

What does speculative mean? Graham and Dodd canvas various possible definitions, and suggest the following “as in harmony with the popular understanding of the term and the requirements of reasonable precision”:

An investment operation is one which, upon thorough analysis, promises safety of principal and a satisfactory return. Operations not meeting these requirements are speculative.²²

In particular, a financial transaction is described as “speculative” if it is risky and especially if the purchaser stands to make or lose money depending on how the market moves in the short term.

In that sense, financial transactions are often if not mostly speculative (though it is a question of degree and some transactions are more speculative than others).

The passage from *C&J Clark*, while describing the issue of whether a transaction is speculative as “sometimes helpful” does not inform us

21 54 TC 670 at p.676; emphasis added.

22 Graham & Dodd, *Security Analysis* (6th ed., 2009) p.106.

Fred Schwed Jr gives a similar explanation of this vague word in *Where are the Customers' Yachts?* (1940) Chapter 8:

“Investment and speculation are said to be two different things, and the prudent man is advised to engage in the one and avoid the other. This is something like explaining to the troubled adolescent that Love and Passion are two different things. He perceives that they are different, but they don’t seem quite different enough to clear up his problems.

Investment and speculation have been so often defined that a couple more faulty definitions should do no harm, the science of economics having reached a point where further confusion is impossible. Thus,

- Speculation is an effort, probably unsuccessful, to turn a little money into a lot.
- Investment is an effort, which should be successful, to prevent a lot of money from becoming a little.

If you take a thousand dollars down to Wall Street and attempt to run it up to \$25,000 in the course of a year, you are speculating. If you take \$25,000 down there and attempt to earn a thousand dollars a year with it (by buying twenty-five four per cent bonds) you are investing. ...”

Sometimes the word “speculative” is used to describe a transaction made with a view to profit (as opposed to a transaction intended to hedge a financial risk). In that sense it is relevant to ask whether a transaction is speculative, since different principles apply to hedging transactions, but hedging is a rather special case.

whether a positive answer supports a conclusion of trading or non-trading, which somewhat undermines the helpfulness of the question. It is considered that to ask whether a transaction is speculative in the sense of high-risk is rarely if ever going to be helpful. See *Lewis Emanuel v White*:

The word ‘speculation’ is not, I think, as a matter of language, an accurate antithesis either to the word ‘trade’ or to the word ‘investment’: either a trade or investment may be speculative.²³

41.11.4 “*Gambling*” and distinction between individuals and companies

In order to avoid confusion in this area, it is essential to bear in mind that the word “gambling” may be used in two senses.

In the strict sense:

- (1) gambling²⁴ contracts were unenforceable; and
- (2) gambling activity is not a trade.

I refer to this as “**the gaming/wagering sense**”. The Gaming Act 2005²⁵ has abolished the former contract law rule that gaming/wagering contracts were invalid but the rule remains that the activity of gaming/wagering is not a trade and the profits (if any) are not subject to income tax, or CGT.²⁶

In a loose sense, “gambling” means more or less the same as speculative, in the sense discussed above: that is, high-risk. I refer to this as “**the loose (high-risk) sense**”. The purchase of a future or option, say, may be a gamble in the loose (high-risk) sense, but it is not gambling in the strict (gaming/wagering) sense.

In *Lewis Emanuel v White* the Judge said:

... it is certainly true, at any rate in the case of an individual, that he may carry out a whole range of financial activities which do not amount to a trade but which could equally not be described as an investment, even upon a short-term basis. These activities include betting and gambling in the narrow sense. They also include, it seems to me, all sorts of Stock

23 42 TC 369 at p.377; this passage was cited with approval in *Wannell v Rothwell* 68 TC 719 at p.730.

24 Also called gaming, wagering and betting.

25 Section 63 Financial Services Act 1986 had already substantially restricted the rule that bets on stock market movements were void.

26 Section 51 TCGA. The reason is that losses are more likely than profits, and one could not tax profits without allowing some relief for losses.

Exchange transactions. For want of a better phrase, I will describe this class of activities as gambling transactions.

It seems a little strange to describe “all sorts of stock exchange transactions” as gambling, but the terminology makes a little more sense if one bears in mind that it was written in 1965, when the cult of the equity had only just begun, and before it had received judicial notice.²⁷ Before then, the only assets recognised as investments were gilts and mortgages, and stock exchange transactions would not normally be regarded as investments: they were felt to be too risky. They would not naturally be regarded as trading, so they were put into the category of non-trading non-investments.

It is considered that to ask whether or not the transactions are gambling (in the loose high-risk sense) is the same as to ask whether or not the transactions are speculative: it can never be helpful in determining whether or not transactions are to be classified as trading.²⁸

This line of thinking is however the historic basis for the rule that the test for whether a company is trading is different from the test of whether an individual is trading, and that companies are more likely to be trading than individuals. The reason for the rule is said to be that companies (unlike individuals) are usually entitled only to trade or to invest. They cannot carry on non-trading non-investment activities of the kind that the judge categorised as “gambling” (in the loose high-risk sense). The judge continued:

It seems to me, however, that in general it is much more difficult to bring the activities of a company within this class of gambling transactions. An individual may do as he pleases: a corporation must act within the limitations of its memorandum of association. All companies have power to invest; many companies have power to deal [ie trade] in securities; few companies can have power to enter into gambling transactions - i.e., by [the judge’s] definition, transactions otherwise than by way of investment or trade. Where a transaction can be brought within the scope

27 *Sinclair v Lee* [1993] Ch 497 at p.512: “The cult of the equity, ... did not really begin until the mid or late 1950s.”

28 Of course (in the absence of trade) it does not matter for individuals whether one describes financial transactions as investment or as gambling (in the loose high-risk sense), since the tax consequence is the same: the profits are subject to CGT and not IT.

of an authorised object - e.g., investment or dealing - one would not readily treat the transaction as having been carried out ultra vires in pursuit of an unauthorised object - e.g., gambling. In other words, one expects a trading company's activities, apart from capital investment, to be by way of trade.

The reasoning is now invalid:

- (1) Nowadays one would not readily describe conventional stock exchange transactions as “gambling” even in the loose (high-risk) sense.
- (2) Companies powers have increased.

The BI Manual notes the point (2). It cites *Lewis Emanuel v White* and comments:

65701. By individuals and companies [February 2006]

... Since then Company Law has been amended. [Section 39(1) Companies Act 2006 says:

‘The validity of an act done by a company shall not be called into question on the ground of lack of capacity by reason of anything in the company’s constitution.’]²⁹

29 I have for convenience updated the text of the Manual which refers to the Companies Act 1985; there is no material difference.

The manual then quotes from *Cooper v C & J Clark* and continues with a passage which does not wholly address the problem it identified:

“Where companies undertake transactions in derivatives it is necessary to look at the context in which those transactions take place. In the case of *Morgan Grenfell v Welwyn Hatfield District Council* [1995] 1 All ER 1 the local authority entered into interest rate swaps with another local authority facilitated by Morgan Grenfell. One of the preliminary points in the case considered by the courts was whether or not the interest rate swaps were a gaming or wagering contract. The court held that in the context of interest rate swaps, for contracts entered into by parties or institutions involved in the capital market and the making or receiving of loans, the normal inference would be that such contracts were not gaming or wagering but were commercial or financial transactions.

It is therefore possible for a derivative contract entered into by a company to be part of the company's trading activities, if it is entered into to hedge exposure to risk in a commercial or financial transaction. See also CFM13580.

When all the facts have been gathered in a particular case it should be possible to conclude whether or not there is a trade. However any cases of doubt or difficulty, which cannot be resolved locally should be referred to Business Tax (Technical).”

It is considered that the rule continues to be valid that companies (assuming their articles authorise trading) are more easily held to be trading than individuals.³⁰ However the basis of that rule cannot now be the reason given in *Lewis Emanuel* (that the transactions carried out by individuals should generally be classified as non-trading non-investment transactions but companies, unlike individuals, must either trade or invest, so they are more likely to be trading). One could simply say that the rule is now established and continues to hold even if its reasons have ceased to be sound. However, if needed the rule has another, sounder basis. This is that one badge or indication of trade is “trading structure” and companies (if their articles authorise trading) have that element of “trading structure” which individuals do not.

Since different tests apply to determine whether companies and individuals are trading, I consider the cases for individuals and for companies separately.

41.11.5 *Trading by individuals*

There have been three UK cases discussing whether individuals are trading in financial assets. The first is *Salt v Chamberlain* 53 TC 143 where Oliver J said:

Where the question is whether an individual engaged in speculative dealings in securities is carrying on a trade, the prima facie presumption would be, as Pennycuik J. suggested in the *Lewis Emanuel* case 42 TC 369, that he is not. It is for the fact-finding tribunal to say whether the circumstances proved in evidence or admitted take the case out of the norm.

In *Salt v Chamberlain* the individual relied on the following matters to justify a conclusion of trading. There was a relatively large number of transactions, about 50 sale/purchase transactions per annum, over a four-year period. A substantial proportion of the transactions concerned options (rather than securities yielding income). One-third of purchases and sales were within the settlement period, and many others were within a short period thereafter. The purchases were financed in part by borrowing. On these facts the General Commissioners found that the

³⁰ See 41.11.2 (Principles) item [3].

taxpayer was not trading, and on appeal the judge held that the Commissioners were entitled to reach that conclusion.

A similar approach was applied in Hong Kong Inland Revenue Board of Review Decision *Case No. D 42/90*. The following aspects of the matter might have justified a conclusion of trading. The individual's transactions were in Hang Seng Index futures contracts which had a short lifespan and produced no income. The individual ran an "active" account (the number of transactions is not recorded). The Board held that the taxpayer was not trading.³¹

The other UK case is *Wannell v Rothwell* 68 TC 719. In this case there were about 60 sale/purchase transactions per annum. The assets traded were shares and commodities. Some of the money used was borrowed. The taxpayer was aiming at quick profits and had no intention of taking possession of the commodities or (with rare exceptions) of holding shares. The Special Commissioner did not decide whether the taxpayer was trading, but the Judge found that the Special Commissioner would have been "almost bound" to reach the conclusion that the taxpayer was trading.

In assessing the significance of the turnover of assets, one should in my view take into account that it is, I think, more common now to actively manage a portfolio than it was in the past.

Business income Manual provides:

65701. By individuals and companies [February 2006]

Share Transactions by Individuals

Transactions by individuals in shares and securities are not generally trading transactions. Such transactions normally fall within the charge to Capital Gains Tax. This is also true of transactions in futures, options or other derivative contracts.

[The Manual cites the passage from *Lewis Emanuel v White* 42 TC 369 discussed above³² and continues:] Pennycuik did not accept that an individual speculating on the price movement in shares without intending to hold the shares even as short term investments was trading. He considered that such transactions

31 Accessible www.info.gov.hk/bor/eng/pdf/dv5_second/d4290.pdf.

For completeness, I should also mention *Manzur v HMRC* [2010] UKFTT 580 where the individual carried out between 240 and 300 transactions each year; this was described as "not numerous" and held not to be trading. However no weight should be given to this brief first tier tribunal decision, in which the taxpayer was not represented by Counsel and the taxpayer's best case *Wannell v Rothwell* was not cited.

32 See 41.11.3 ("Speculative" transactions) and 41.11.4 ("Gambling" and distinction between individuals and companies).

are analogous to gambling, and so fall short of trading.

The rule that an individuals' transactions are not generally trading is sound; see 41.11.4 ("Gambling" and distinction between individuals and companies).

The question of whether an individual is trading is a question of fact. And if agreement cannot be reached, an issue for the Commissioners to decide. It is therefore important that all the salient facts are obtained, when an individual claims to be carrying on a financial trade. Once the facts are established the position usually speaks for itself.

The tax cases provide some useful pointers. But each case is dependent on its own facts. It is therefore vital to establish the facts first of all.

The decided cases make it very clear that there is no definitive checklist for determining whether an individual is trading or not. The 'badges of trade' are only a guide. The presence of one, two or more of them is not conclusive. The position is summed up by Oliver J in *Salt v Chamberlain* (1979) 53 TC 143 at page 154:

'... I doubt whether the question whether in any given case a person is or is not carrying on a trade is capable of solution by the application of a logical progression of propositions culled from decided cases. The question is, I think, one of overall impression'.

In that case Mr Salt decided to put his expertise in computer technology for forecasting share movements to personal use speculating on the stock market. He effected some 200 purchases and sales of stocks and shares, financing himself by means of bank loans and insurance policies as well as personal means. The Commissioners determined that the Appellant was not trading and Oliver J upheld their decision.

It follows that reliance on the number and frequency of transactions, and the short term nature of the holdings of shares may be misleading. It is necessary to view these badges taking account of the fact that the assets are financial assets. To determine if a speculative activity is trading (or an adventure in the nature of trade), it is important to consider whether the operations are carried out in the same way as any ordinary trader in those assets operates. Established traders in shares operate to minimise, or limit, the exposure to chance. They do this in a variety of ways.

- They have customers who sell to them and buy from them regularly, to whom they market their services, and will quote prices for buying and selling. The prices quoted will be spread, so they can achieve profits. They make profits from moving huge volumes of shares very quickly.
- They hedge large holdings of a security with derivative instruments to ensure that if they hold on to positions for any length of time, they have only a limited exposure to general market movements.
- They have very strict rules about the degree of risk to which any trader is allowed to expose the firm.

So, while share traders do buy and sell shares to profit from anticipated market movements it is not the sole way in which they make a profit. Speculation is only part, and a strictly controlled part, of a more complex trading operation. Their operations are designed to make profits whichever way market prices move, by turning over stock as a wholesaler or as a retailer. Whether an individual operates in the same way as a share trader is a question of fact. So, it is necessary first of all to establish how the individual operates and what action he or she takes to minimise risk and secure profits.

Derivatives Transactions by Individuals

Individuals sometimes contend that options and futures are different to shares, because they are not income producing assets unlike shares which produce dividends, and they are usually dealt in by way of trade. However, financial futures and options are contracts closely tied to movement in prices of shares, interest rates or share indices. They are often used in exactly the same way as shares. It is therefore important to establish the facts when an individual contends that he or she is trading in derivatives. So, as for transactions in shares and securities, the question is whether the individual has organised his or her activities in a way that amounts to trading or is simply speculating on price movements.

Derivative traders do not simply enter into contracts and await price movements, such traders operate in exactly the same way as stock market traders. They trade by turning over the assets in large volumes at a dealing margin. They buy and sell to those customers of the market who want to use the derivatives. Like share dealers, they will hedge against market movement so that their exposure to it is kept within strict limits. So, in determining whether an individual is trading in futures, options or contracts for differences, the factors which need to be considered are essentially the same as those for an individual trading in shares. Some of the derivative exchanges, including LIFFE, have now largely abandoned floor trading in favour of a screen based trading system, where prices are displayed and contracts can be made electronically. Some former LIFFE 'locals' now deal in derivatives in this way. They should still be considered to be trading given their background and involvement in the derivatives market, if there has not been a significant change in the nature of the activities. In cases where there has been a significant change in the nature of their activities, then a decision should be reached on the basis of the facts of the case.

When all the facts have been gathered in a particular case it should be possible to conclude whether or not there is a trade. However, if once you have established the facts, there are doubts or difficulty, which cannot be resolved locally, you should refer the case to Business Tax (Technical) following ADM 6.109.

41.11.6 Trading by trustees

There are no tax cases on whether trustees of a private trust are trading, but it is considered that their position is in principle similar to individuals.

In *Smith v Anderson* (a non-tax case discussing an early unit trust) James LJ said:

In my opinion, nothing that is to be done under this deed by the trustees comes within the ordinary meaning of “business”, any more than what is done by the trustees of a marriage settlement who have large properties vested in them, and who have very extensive powers of disposing of the investments, changing the investments, and selling them and reinvesting in other investments, according to their discretion and judgment, with or without the consent of their cestuis que trust. That is not a business. No doubt there is power ... to dispose of the investments and reinvest in some similar securities ... This appears to me to be no more than the power of varying investments which you would find in an ordinary trust deed ...³³

41.11.7 *Trading by companies*

There have been two cases discussing whether companies are trading in financial assets. Each concerned a trading company using spare cash to carry out stock exchange transactions.

In *Lewis Emanuel v White* 42 TC 369 the company carried out over 100 transactions per annum (described as “a very large number”). The majority were sold in the same year, often within a matter of weeks. It was held that the only possible conclusion was one of trading.

In *Cooper v C & J Clark* 54 TC 670 the company made only 13 transactions over nine months. The commissioners findings of trade were upheld, though only just (the judge would not have found there was a trade). So I think we can say that is an example of a non-trade.

It is considered the company’s own classification of its activity as trading/non trading (in the company’s constitution, board resolutions and accounts) is a matter of considerable weight which in an otherwise marginal case ought to be decisive. However an activity may constitute a trade even if the activity is ultra vires the company. *Lewis Emanuel* was such a case: 42 TC at p.377.

UK resident companies also need to consider the derivative contract rules in part 7 CTA 2009, which are not discussed here.

33 15 Ch D 247 at p.276.

41.11.8 *SP 1/01*

SP 1/01 provides some heavily guarded generalities, and anyone who tries to use this guidance will find that it does not take them very far.³⁴ For what it is worth, the material is set out here:

16. Whether or not a taxpayer is trading is a question to be determined by reference to all the facts and circumstances of the particular case. This applies as much to financial transactions as to other activities.

17. In determining the question of trading, any transactions carried out through an investment manager are to be considered in the context of the status and world-wide activities of the non-resident. It is not possible in this statement to consider every possible set of circumstances but, for example, an individual is unlikely to be regarded as trading as a result of purely speculative transactions.³⁵

18. For a company, a transaction will generally be either trading or capital in nature. (This may also be the case for non-corporate collective investment vehicles whether open-ended or closed.)

The point of para 18 is that the transaction will not give rise to non-trading income; see 41.11.9 (Transaction income (former schedule D case VI)).

If the main business of a non-resident company is a trade outside the financial area, or an investment holding business, the activities in the UK would normally amount to trading only if they constituted or were part of a separate financial trade. But if, exceptionally, activities which are an integral part of the profit earning activities of a non-financial trade are carried out through a UK investment manager (eg hedging on the London terminal markets by a non-resident dealer in physical commodities) then that might amount to trading here. The view to be taken on a particular case will depend on all the facts of that case.

19. The active management of an investment portfolio of shares, bonds and money market instruments such as bills, certificates of deposit, floating rate notes and commercial paper does not constitute a trade.

The use of the term “investment” (if it carries its normal tax meaning) makes para 19 tautologous. Presumably the word is used in the wider sense, in which case the sentence makes an important point. But the

³⁴ There is similar (qualified) guidance in SP 3/02.

³⁵ Likewise SP 3/02 para 8.

author adds a qualification to neutralise that:

But every case must be considered in the light of its own facts.

20. HMRC view short positions as conceptually the same as long positions and synthetic positions are conceptually the same as the equivalent ‘real’ positions. Neither going short nor taking synthetic positions using derivatives are in themselves indicative of trading. Furthermore, synthetic positions that give exposure to part of an asset are conceptually the same as synthetic positions that give exposure to the whole of an asset. Thus a synthetic position that gives exposure only to a bond’s credit risk is no more or less likely to be a trading transaction than a synthetic or real position that gives exposure to the bond’s coupon, liquidity, credit and currency risks. These techniques may constitute investment in themselves or may form part of an investment activity.

21. Where futures and options are used by non-residents who are collective investment vehicles (whether open-ended or closed), pension funds and other bodies which either do not trade or whose client trade is outside the financial area, SP 03/02 “Tax Treatment of Derivative Transactions” will be applied.

22. ...³⁶ The criteria for deciding whether a non-resident financial company is an investment company or a trading company are the same as those which apply to a resident company.

BI manual expands on this:

20250 - Trade: badges of trade: income producing assets [March 2012]

... Financial assets

Normally transactions by individuals and companies in financial assets, such as shares, options and futures, do not amount to trading for tax purposes. Shares are generally held for investment, either to gain from income or capital growth. Short-term transactions, which cannot be classed as investments, usually fall short of trading, being in a class of transaction analogous to gambling or speculation. If you have a case of this kind please refer to BIM20252 and BIM65701.

56910. Financial traders - instruments and shares: synthetic positions [March 2012]

Financial transactions include the acquisition, holding, dealing with, and disposal of financial assets such as shares and bonds. They also include taking synthetic

36 The omitted text discusses whether the financial trade is carried on in the UK; see 15.11.2 (Buying and selling through an agent). This is distinct from the question of whether there is a trade.

positions in relation to such assets or corresponding indices, or discrete components of them. In our view, using synthetics is not itself indicative of trading. There is no conceptual difference between a 'real' and a synthetic financial transaction (for example, buying a share or entering into a derivative contract that replicates the risks and rewards of ownership). All of these approaches may form part of an investment strategy and some of them may constitute investment in themselves.

Short positions are conceptually the same as long positions

Buying a share because you take the view that its price will rise and shorting a share because you think its price will fall are conceptually the same. In simple terms, a view is merely being taken on the direction of movement. It follows that synthetic long and short positions are conceptually the same as one another and the equivalent real transactions.

Derivatives that give exposure to part of an asset are conceptually the same as derivatives that give exposure to the whole asset

A view may be expressed on a bundle of components embedded in an instrument, for example the coupon, liquidity, credit risk and currency of a bond, or alternatively a view may be expressed on one or a combination of these components. There is no conceptual difference between taking a view on all components by buying the instrument or entering a derivative contract that replicates ownership, or taking a view on one or a combination of the components via derivatives. There is no conceptual difference between taking a view on the direction of movement (as with simply long and short positions) or taking a view on the magnitude or timing of movements, or other components. Multi-derivative or hybrid strategies should not be unbundled.

Given the wide range of situations this principle can apply to, three examples are set out below. These are intended to be illustrative and not a definitive list.

In all cases involving any such 'bundling' we would expect there to be evidence that the transactions were executed in pursuit of a clear prior strategy.

Two or more derivatives

Where, for example, the view is that the price will increase but only within a certain band, and the most efficient way to express that single view is via a series of derivative transactions, those transactions should be considered as a whole and not each in isolation.

A derivative and another financial asset (for example shares)

Where the view is that an asset would not be acquired at current value but would be at a set lower value, a put option is written at that lower value, i.e. as a cost efficient method of acquisition. The writing of the option and the potential acquisition of the asset should be considered as a whole and not each in isolation.

A sequential series of similar derivative strategies

A derivative that is close to maturity generally has greater liquidity than a derivative identical in every way, other than having a longer period to maturity. 'Rolling' short dated derivative strategies such that there is a sequential series of similar derivatives should be viewed as a whole and not each in isolation.

41.11.9 *Transaction income (former schedule D case VI)*

One welcome rule is that stock exchange transactions must either be trading or non-trading, and cannot fall within any other category of income. Section 779(1) ITTOIA provides:

No liability to income tax arises as a result of Chapter 8 of Part 5 (income not otherwise charged) in respect of a gain arising to a person in the course of dealing in—

- (a) commodity or financial futures,
- (b) traded options, or
- (c) financial options.³⁷

This makes obsolete some difficult case law under which transactions in futures were held to be non-trading but to fall within the former Schedule D case VI. There is no scope for straightforward purchase and sale transactions to fall within this category: *Jones v Leeming* 15 TC 333.

41.11.10 *Commentary*

The trading/non-trading distinction in financial assets raises three difficulties:

(1) *Uncertainty*: The case law is old and investment practice has since changed. It does not address the many varieties of transaction carried out by hedge funds and other sophisticated investors/traders, and even in the case of straightforward transactions, it is often unclear whether or not there is a trade.

(2) *Complexity*: There are some complex and narrow exemptions which recognise and address this problem and (more or less) treat stock exchange

³⁷ For completeness, this continues:

(2) The reference in subsection (1) to a gain arising in the course of dealing in commodity or financial futures includes a gain regarded as so arising under section 143(3) of TCGA 1992 (gains arising from transactions otherwise than in the course of dealing on a recognised futures exchange, involving authorised persons).

(3) In this section—

“commodity or financial futures” means commodity futures or financial futures that are for the time being dealt in on a recognised futures exchange,

“financial option” has the meaning given by section 144(8)(c) of TCGA 1992, and

“traded option” has the meaning given by section 144(8)(b) of that Act.

transactions as non-trading:

- (a) the IME discussed in this chapter;
 - (b) an exemption for authorised investment funds introduced in an attempt to stop funds relocating to Ireland or Luxembourg;³⁸
 - (c) chapter 6 part 3 OFTR.³⁹
- (3) *Irrationality*: The line drawn between trading/non trading in transactions in financial assets (insofar as it is discernible) is arbitrary.

These three problems follow from one underlying problem: there is no clear *economic* line to be drawn between trading and non-trading, in the context of stock exchange transactions. There is an economic distinction between buying for short term and buying for long term holding⁴⁰ and to the extent that this intuition underlies the trading/non-trading distinction it is not wholly irrational. However this economic line is nowhere close to the tax trading/non-trading distinction; and there is no reason why the two activities should be taxed differently. As far as I am aware, competing jurisdictions sensibly do not attempt to draw any comparable distinction.

It is suggested that all transactions in financial assets, defined along the lines of the IME, should in principle be deemed non-trading.⁴¹ The IME, AIF and OFTR exemptions can be repealed. That would be a simplification with little if any tax loss.

38 Authorised Investment Funds (Tax) (Amendment) Regulations, SI 2009/2036 (31 pages of regulations accompanied by 107 pages of draft guidance).

39 See 34.29 (Transactions treated as non-trading).

40 “We believe that according the name investors to institutions that trade actively is like calling someone who repeatedly engages in one-night stands a romantic.” (Attributed to Warren Buffet - I would be grateful to any reader who could supply the reference).

41 There could be some limited exceptions, eg if a company elects for trading treatment, and the hedging of trading risks.

CHAPTER FORTY TWO

LOANS FROM NON-RESIDENT COMPANIES

42.1 Advantages of loans from non-resident companies

A dividend (or other income distribution) from a non-resident company will often cause income tax problems. If the dividend is received by a UK resident, directly or through an IP trust, it will be taxable on the arising basis or on the remittance basis. If it is received by a non-resident discretionary trust or company, it will be income within the scope of s.624 and the TAA provisions. By contrast a loan, even if interest-free, does not constitute an income receipt and will avoid these problems. Loans therefore seem an attractive method of extracting funds from companies. However, they raise tax issues of their own.

42.1.1 *Cross references*

The following issues are discussed elsewhere. A loan may be a benefit for the purposes of s.731 and s.87.¹

Receipt of the loan in the UK may be a taxable remittance of s.624, s.720 or s.731 income;² or if the sum loaned represents foreign income/gains of the individual.³

A loan to a transferor or settlor may bring s.727 ITA⁴ and s.641 ITTOIA⁵ into effect which is important if the transferor has no power to enjoy or if

1 See 29.4.4 (Interest-free loan and enjoyment of asset in kind).

2 See 26.5 (Section 624 remittance basis); 28.14 (Section 720 remittance basis); 29.34 (Section 731 remittance basis).

3 See 10.14.5 (T lends to R). Remittance condition D might also apply.

4 See 28.11 (Transferor receives capital sum).

5 See 26.13 (Settlor receives capital sum).

the company is held by a trust which is not settlor-interested. A loan to trustees may give rise to a charge under Schedule 4B TCGA.⁶ The liability to repay the loan may not be deductible for IHT purposes.⁷

Loans to non-resident companies raise different issues, not discussed here.

42.2 Non-tax aspects

The loan should be documented by a written agreement made at the time of the loan. It should be recorded in the company's accounts.

Take care the loan does not accidentally become statute-barred.

Company law restrictions on loans to directors and connected persons may need to be considered. This will depend on the applicable law of the company.

If the company is held by a trust, the trustees need to consider whether they can properly permit the company to make the loan.

42.3 Loans to participators

Section 455 CTA 2010 imposes a charge where a close company lends money to a participator. There is no charge under this section provided the company was not UK resident (and so not "close") at the time the loan was made. It does not matter if the company later becomes UK resident.

In this chapter I assume that the company is not UK resident when the loan is made.

42.4 Benefits to participators

Section 1064 CTA 2010 imposes a charge where a "close company incurs an expense in, or in connection with, the provision for any participator of ... benefits or facilities of any kind". However a close company does not "incur expense" in making a loan or in leaving the loan outstanding, and so there will be no charge under this section. Also a non-resident company is not "close".

⁶ See 49.6 (Trustee borrowing).

⁷ See 61.1 (IHT deduction for debts).

42.5 Employment-related loan

Section 175(1) ITEPA provides:

The cash equivalent of the benefit of an employment-related loan is to be treated as earnings from the employee's employment for a tax year if the loan is a taxable cheap loan in relation to that year.

This will in principle apply on a loan from a company to an employee, director, or shadow director.⁸ A discussion of the meaning of "taxable cheap loan" and the quantum of the charge is outside the scope of this book. For DTA relief see 13.36 (DTA defence to BiK charge).

42.5.1 *Remittance basis employee*

The BiK earnings of an employment-related loan may be chargeable overseas earnings if (in short) the duties of the employment are performed wholly outside the UK. If so, it is suggested that the earnings cannot be remitted so no tax charge can arise.⁹

42.5.2 *Loan to shadow director: HMRC practice*

Where living accommodation is provided by a company, HMRC say that they are keen to take the point that the occupier of the property may be a shadow director of the company, so that a benefit in kind charge arises.¹⁰ In relation to interest-free loans from offshore companies, the same technical point arises. However in this case HMRC do not seem to argue the point. There are various possible explanations for this discrepancy.

One reason may be that borrowers (unlike occupiers) are less likely to be shadow directors. Of course a person who borrows interest-free from a company is not necessarily a shadow director. Perhaps the person occupying a property purchased by the company is more at risk of becoming a shadow director, because the company's acts to acquire the

⁸ See 70.15 (Who is a shadow director?).

⁹ See 70.28 (Benefit in kind: remittance basis taxpayer). If that is wrong, imponderable questions arise as to what happens if the money lent is remitted here and spent. Contrast 29.36.1 (Interest-free (or low-interest) loan).

¹⁰ See 70.14 (Shadow directors).

property and licence the individual to occupy are more likely to be at the direction of the individual. By contrast, the decision to extract funds from the company by way of loan (as opposed, say, to distribution) may be less likely to be at the direction of the individual. But it is of course a question of fact in each case.

The motivation for (purporting to) take the living accommodation point may be to discourage IHT planning on the family home, not the collection of income tax. That is a second possible explanation.

42.6 Meaning of “employment-related loan”

42.6.1 “Loan”

Section 173(2)(a) ITEPA provides:

“loan” includes any form of credit,

EIM para 26108 provides:

26108. Meaning of loan [December 2006]

Loan means more than just lending money. It includes any form of credit. It follows that any kind of advance by reason of the employment is covered. For example, any amount shown in the employer’s books or records as owed by an employee will count as a loan.

Grant v Watton

The case of *Grant v Watton* (71 TC 333) concerned credit extended by a company of which Grant was a director, to his sole trade and later to a partnership in which Grant was the general partner. In the High Court Pumfrey J. considered the meaning of credit –

“... credit is granted where payment is not demanded until a time later than the supply of goods to which the payment relates. Credit is the deferral of payment of a sum which, absent agreement, would be immediately payable.”

Regarding the application of Section 175 ITEPA 2003 to an overdrawn director’s loan account see EIM26505.

42.6.2 “Making” a loan

Section 173(2)(b) ITEPA provides:

references to making a loan (and related expressions) include arranging, guaranteeing or in any way facilitating a loan.

EIM 26110 summarises this and continues:

Loan made by a third party – employee benefit trust [December 2011]

It is not uncommon for a third party, such as an employee benefit trust (EBT), to make a loan to a beneficiary who is also an employee of the employer which is associated with the EBT. It is sometimes suggested that the loan is not an “employment-related loan” (EIM26113) because the definition of that term does not include a loan provided by a third party.

Whilst it is true that the definition includes no reference to a third party loan provider, HMRC does not accept that the loan is not an employment-related loan. The definition of “employment-related loan” includes a loan made by an employee’s employer. As “making” a loan includes “in any way facilitating” a loan, if the employer provides the money to fund the EBT, the employer is regarded as making the loan. Consequently for the purposes of the loan benefit rules, the EBT is ignored and the loan is treated as made directly by the employer to the employee. It follows that the loan is an employment-related loan.

Suppose:

- (1) A company is held by a trust, and lends funds to the trustees (“loan 1”).
- (2) The trustees lend funds to a beneficiary who is a shadow director (“loan 2”).

At first sight this would not be an employment-related loan because it is not made by the “employer”. But if loan 1 is made in order to allow the trustees to lend to the beneficiary, it might be said that the company has facilitated loan 2. The same applies to a back-to-back loan, ie if the company deposits funds with a bank, the trustees borrow from the same bank on the security of that deposit, and the trustees then lend to the beneficiary.

Section 174(4) ITEPA provides:

References in this section to a loan being made by a person extend to a person who—

- (a) assumes the rights and liabilities of the person who originally

- made the loan, or
- (b) arranges, guarantees or in any way facilitates the continuation of a loan already in existence.

EIM para 26111 provides:

Loans taken over from another person [February 2006]

If the rights over an existing loan are taken over by another person the loan will remain within the charge if it was within the charge when it was first made.

A loan within the scope of the charge cannot be removed from it by the original lender handing his or her rights over to another person.

But a loan that was not within the charge when it was first made can be brought within it if it is taken over by a person mentioned in EIM26113.

42.6.3 “Employment-related”

“Employment-related” loan is defined in s.174 ITEPA:

- (1) For the purposes of this Chapter an employment-related loan is a loan—
 - (a) made to an employee¹¹ or a relative of an employee, and
 - (b) of a class described in subsection (2).
- (2) For the purposes of this Chapter the classes of employment-related loan are—
 - A* A loan made by the employee’s employer.
 - B* A loan made by a company or partnership over which the employee’s employer had control.
 - C* A loan made by a company or partnership by which the employer (being a company or partnership) was controlled.
 - D* A loan made by a company or partnership which was controlled by a person by whom the employer (being a company or partnership) was controlled.
 - E* A loan made by a person having a material interest¹² in—
 - (a) a close company which was the employer, had control over the employer or was controlled by the employer, or
 - (b) a company or partnership controlling that close company.
- (3) In this section—
 - “employee” includes a prospective employee, and
 - “employer” includes a prospective employer...

11 For the definition of “employee” see 13.2.1 (“Employer”, “employee” and “employment”).

12 “Material interest” is defined in s.68 ITEPA.

“Control” has the meaning in s.995 ITA: see s.719 ITEPA.

42.6.4 *Loan to relative of employee*

Section 174(1) ITA provides:

For the purposes of this Chapter an employment-related loan is a loan—

- (a) made to an employee or a relative of an employee...

Section 174(6) ITEPA defines “relative” quite widely:

For the purposes of this section a person (‘X’) is a relative of another (‘Y’) if X is—

- (a) Y’s spouse or civil partner,
- (b) a parent, child or remoter relation in the direct line either of Y or of Y’s spouse or civil partner,
- (c) a brother or sister of Y or of Y’s spouse or civil partner, or
- (d) the spouse or civil partner of a person falling within para (b) or (c).

However s.174(5) ITEPA brings in a wide exception:

A loan is not an employment-related loan if—

- (a) it is made by an individual in the normal course of the individual’s domestic, family or personal relationships, or
- (b) it is made to a relative of the employee and the employee derives no benefit from it.

In general therefore straightforward loans to relatives of employees or shadow directors are not caught.

42.6.5 *Change in employee status*

What if a loan is made to someone who is not an employee (as defined) but later becomes a shadow director? At first sight, leaving an existing loan outstanding would not give rise to a tax charge even after the borrower becomes a shadow director. However, if the loan is repayable on demand, not calling in the loan amounts to a “form of credit”. Thus there will be an income tax charge on the benefit in kind of the interest-free loan if a borrower becomes a shadow director (and so

becomes an “employee”).

What is the position if a loan is made to a shadow director who ceases to be a shadow director? There is no charge on a loan to a former employee. This was deliberate. EN ITEPA provides:

76. Where the Schedule E legislation provides that an amount shall be treated as an emolument of an employment only if provided in a year when the employment is held, this Act reproduces that limitation. The sections in the benefits code make it clear that such amounts or benefits will only be treated as earnings if they are paid/provided in a year in which the employment is held. If they are paid/provided at any other time they will not be treated as earnings and will be outside the “general earnings” to which section 17 [ITEPA] applies.

42.6.6 *Employee coming to work in the UK*

The EI Manual provides:

26105. Loans in foreign currencies: Taxation of overseas loans [December 2006]

...

Taxation of overseas loans in foreign currencies

An employment-related loan (see EIM26102) made to an employee who comes to work in the UK is within the scope of the beneficial loans rules if:

- the loan is made at a time when the employee’s earnings are already chargeable to UK income tax as employment income (for example, if a loan is made after the employee has taken up employment in the UK and is resident and ordinarily resident in the UK for the year in which the loan is made); or
- the loan is made in contemplation of the employee working or living in the UK (for example, if the loan is made as part of a package with a view to the employee working in the UK); or
- the employee, at a time when the employee’s earnings are chargeable to UK income tax as employment income, in any way facilitates the continuation of a loan which was already in existence before the employee came to work in the UK.

As far as the final bullet is concerned, this is relevant where, for example, the loan is made not by the employer but by a third party such as a bank which is not connected with the employer and where the capital repayments and interest are deducted from the employee’s salary. In these circumstances, the question is whether the loan continues when

the employee is in the UK without any further involvement by the employer, or whether the employer does something which makes it easier for the employee to continue to have the loan.

An employer would not be facilitating the continuation of a loan merely because

- the loan is conditional on the employee continuing in the employment, or
- the employer deducts the interest and repayments of capital from the employee's salary.

If the employer pays a subsidy to the lender – for example, by paying annual interest on behalf of the employee – that would not necessarily mean that the employer was facilitating the continuation of the loan. The subsidy itself might however be taxable as an employment-related benefit under Section 201 ITEPA.

On the other hand the employer would be facilitating the continuation of the loan if

- the loan was conditional on the employer continuing to make regular payments to subsidise the interest which the employer might cease to make at any time, or
- the employer chose month by month or year by year whether to subsidise the loan.

42.7 Foreign currency loan

There is (somewhat miserly) provision for foreign currency loans. Section 181 ITEPA provides:

- (1) “The official rate of interest” for the purposes of this Chapter means the rate applicable under section 178 of FA 1989 (general power of Treasury to specify rates of interest).
- (2) Regulations under that section may make different provision in relation to a loan if—
 - (a) it was made in the currency of a country or territory outside the United Kingdom, and
 - (b) the employee normally lives in that country or territory, and has actually lived there at some time in the period of 6 years ending with the tax year in question.

The EIM provides:

26106. Official rates for certain foreign currencies [December 2006]

Currency	Period from	Period to	Official Rate
Japanese Yen	6 June 1994		3.9%
Swiss franc	6 June 1994	5 July 1994	5.7%
	6 July 1994		5.5%

There has been no change in either rate since 1994.

[The manual summarises s.181 and continues:] The intention of these rules is to give relief for employees working temporarily in the UK, where interest rates in the overseas country are lower than interest rates in the UK. The relief does not apply to employees who come to the UK and live here permanently.

The expressions “normally lives” and “lived” have their natural commonsense meaning. An employee who came to work in the UK for four years and who returned home after the four years can be said to “normally live” in the home country. It is not necessary to maintain a residence in the overseas country during the period of employment in the UK. The terms “lives” and “has lived” connote a degree of continuance if not permanence. A holiday in the home country for an employee working in the UK would not in itself be sufficient to establish that the employee had “lived” in the overseas country within the meaning of these rules. “Living” implies more than returning for a short holiday.

42.8 Transactions in securities

The “lengthy and complicated”¹³ provisions relating to transactions in securities (“**the TiS rules**”) require a book to themselves. This section considers only whether the rules might apply to an interest-free loan.

Section 684 ITA provides:

- (1) This section applies to a person where—
 - (a) the person is a party to a transaction in securities or two or more transactions in securities (see subsection (2)),
 - (b) the circumstances are covered by section 685 and not excluded by section 686,
 - (c) the main purpose, or one of the main purposes, of the person in being a party to the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage, and
 - (d) the person obtains an income tax advantage in consequence of

¹³ *IRC v Laird Group* [2003] STC 1349 at [13].

the transaction or the combined effect of the transactions.

The loan is a transaction in securities¹⁴ if it is a “security”.¹⁵ It has been suggested that every loan is a security (as defined).¹⁶ In that case the lender is party to a transaction in securities.

42.9 The TiS motive defence

Section 684(1)(c) ITA requires:

the main purpose, or one of the main purposes, of the person in being a party to the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage

42.9.1 “Income tax advantage”

“Income tax advantage” is defined in s.687 ITA:

(1) For the purposes of this Chapter the person obtains an income tax advantage if—

- (a) the amount of any income tax which would be payable by the person in respect of the relevant consideration if it constituted a qualifying distribution exceeds the amount of any capital gains tax payable in respect of it, or
- (b) income tax would be payable by the person in respect of the

14 Defined s.684(2) ITA: “In this Chapter “transaction in securities” means a transaction, of whatever description, relating to securities, and includes in particular—

- (a) the purchase, sale or exchange of securities,
- (b) issuing or securing the issue of new securities,
- (c) applying or subscribing for new securities, and
- (d) altering or securing the alteration of the rights attached to securities.”

15 Defined s.713 ITA: ““securities”—

- (a) includes shares and stock, and
- (b) in relation to a company not limited by shares (whether or not it has a share capital) also includes a reference to the interest of a member of the company as such, whatever the form of that interest.”

Section 685(9) ITA provides: “In this section—

“security” includes securities not creating or evidencing a charge on assets;

“share” includes stock and any other interest of a member in a company.”

16 *Williams v IRC* 54 TC 257/

relevant consideration if it constituted a qualifying distribution and no capital gains tax is payable in respect of it.

(2) So much of the relevant consideration as exceeds the maximum amount that could in any circumstances have been paid to the person by way of a qualifying distribution at the time when the relevant consideration is received is to be left out of account for the purposes of subsection (1)....

(4) In this section “relevant consideration” has the same meaning as in section 685.

In what follows the expression is referred to as Income Tax Advantage (initial capitals) to remind readers that it is used in a defined and artificial sense.

The amount of income tax advantage is defined in s.687(3) ITA:

The amount of the income tax advantage is the amount of the excess or (if no capital gains tax is payable) the amount of the income tax which would be payable.

HMRC say:

The proposed legislation, through the definition of tax advantage would make it clear that the TiS legislation does not apply to TiS where an advantage in relation to tax on chargeable gains is obtained. This would be more relevant for corporation tax where the position is not clear from the existing legislation.

This is differently worded from the CT motive defence. HMRC describe the IT expression as “narrower” than the CT expression. But a UK shareholder who borrows interest-free loan will obtain an income tax advantage.

42.10 The IT circumstances

Section 685(1) ITA provides:

The circumstances covered by this section are circumstances where condition A or condition B is met.

We refer to “**TiS circumstances A and B**”.

42.10.1 *TiS circumstance A*

Section 685(2) ITA provides:

Condition A is that, as a result of the transaction in securities or any one or more of the transactions in securities, the person receives relevant consideration in connection with—

- (a) the distribution, transfer or realisation of assets of a close company,
- (b) the application of assets of a close company in discharge of liabilities, or
- (c) the direct or indirect transfer of assets of one close company to another close company,

and does not pay or bear income tax on the consideration (apart from this Chapter).

42.10.2 *IT circumstance B*

Section 685(3) ITA provides:

Condition B is that—

- (a) the person receives relevant consideration in connection with the transaction in securities or any one or more of the transactions in securities,
- (b) two or more close companies are concerned in the transaction or transactions in securities concerned, and
- (c) the person does not pay or bear income tax on the consideration (apart from this Chapter).

42.10.3 “*Relevant consideration*”

Section 685 ITA provides two definitions:

(4) In a case within subsection (2)(a) or (b) “relevant consideration” means consideration which—

- (a) is or represents the value of—
 - (i) assets which are available for distribution by way of dividend by the company, or
 - (ii) assets which would have been so available apart from anything done by the company,
- (b) is received in respect of future receipts of the company, or

- (c) is or represents the value of trading stock of the company.
- (5) In a case within subsection (2)(c) or (3) “relevant consideration” means consideration which consists of any share capital or any security issued by a close company and which is or represents the value of assets which—
 - (a) are available for distribution by way of dividend by the company,
 - (b) would have been so available apart from anything done by the company, or
 - (c) are trading stock of the company.

“Consideration” has an artificial definition. Section 685(8) ITA provides:

References in this section to the receipt of consideration include references to the receipt of any money or money’s worth.

Section 685(6) ITA restricts the concept of assets:

The references in subsection (2)(a) and (b) to assets do not include assets which are shown to represent a return of sums paid by subscribers on the issue of securities, despite the fact that under the law of the country in which the company is incorporated assets of that description are available for distribution by way of dividend.

Section 685(7) ITA restricts the concept of share capital:

So far as subsection (2)(c) or (3) relates to share capital other than redeemable share capital, it applies only so far as the share capital is repaid (on a winding up or otherwise); and for this purpose any distribution made in respect of any shares on a winding up or dissolution of the company is to be treated as a repayment of share capital.

The excluded circumstances (fundamental change of ownership) is not relevant here.

42.10.4 “Close company”

Section 713 ITA provides:

In this Chapter—

“close company” includes a company that would be a close company if

it were resident in the United Kingdom,
“company” includes any body corporate

42.11 Discussion

42.11.1 Loan to individual 100% shareholder

Suppose a company is wholly owned by a UK resident individual (“B”), and the company lends interest-free to B.

B obtains an income tax advantage.

Are the TIS circumstances satisfied? B receives relevant consideration. There is a transfer of assets (the loan). However, does B receive the sum “in connection” with a transfer of assets? If the company already had the cash, then the only “transfer of assets” is the loan itself. Is the loan connected with itself? The answer must be, no. If the company had to sell assets in order to raise cash to make the loan, that sale would be a “transfer of assets” and circumstance A would be satisfied.

42.11.2 Loan to discretionary trust

Suppose the company is held by a non-resident discretionary trust, and lends interest-free to the trustees. The trustees do not obtain an income tax advantage. The trustees would not have been taxable on a dividend.

Suppose the trust is settlor-interested. If the settlor (“S”) is UK resident and domiciled S obtains an income tax advantage. (What if S was a remittance basis taxpayer? There is no IT advantage unless the proceeds are received in the UK.)

However, S does not receive distributable consideration so the TiS circumstances are not satisfied even if S does obtain an income tax advantage.¹⁷

¹⁷ *Hague v IRC* 44 TC 619.

CHAPTER FORTY THREE

RATES OF TAX

43.1 IT rates – Introduction

A full discussion of rates of income tax would need a long chapter. I concentrate on two common types of income: interest and dividends. Rates of tax on trustees and PRs are not considered here.

It may be helpful first of all to list the seven possible rates of income tax on individuals for which ITA provides terminology:

Name	Rate	Applicable to
<i>Non-dividends</i>		
Starting rate for savings	10%	Savings income up to starting rate limit
Basic rate	20%	Other income up to basic rate limit
Higher rate	40%	Income above basic rate limit
Additional Rate	50%	Income above higher rate limit
<i>Dividend income</i>		
Dividend ordinary rate	10%	Dividends up to basic rate limit
Dividend upper rate	32.5%	Dividends above basic rate limit
Dividend additional rate	42.5%	Dividends above higher rate limit

The terminology is somewhat inapt. The (so called) “higher rate” is actually an intermediate rate between the basic rate and the top rate (unhelpfully named the “additional rate”). Similarly the dividend upper rate is an intermediate rate between the dividend ordinary rate (which is not “ordinary”) and the top dividend rate (unhelpfully named the dividend additional rate). I reluctantly adopt the statutory terminology since anything else is even more confusing.

The effective rate on dividends is different from the rates set out above because one must allow for the tax credit and grossing up: the effective rates on net dividends are:

Name	Effective Rate
Dividend ordinary rate	0%
Dividend upper rate	25%
Dividend additional rate	36.11%

43.2 Basic/higher/additional rates

Section 10 ITA introduces the basic/higher/additional rates:

(2) Income tax on an individual's income up to the basic rate limit is charged at the basic rate (except to the extent that, in accordance with section 12, it is charged at the starting rate for savings).

(3) Income tax is charged at the higher rate on an individual's income above the basic rate limit and up to the higher rate limit.

(3A) Income tax is charged at the additional rate on an individual's income above the higher rate limit.

These rates apply unless disapplied by any other provisions. Section 10(4) provides:

This section is subject to—

section 13 (income charged at the dividend ordinary and dividend upper rates: individuals), and

any other provisions of the Income Tax Acts which provide for income of an individual to be charged at different rates of income tax in some circumstances.

The important provisions for our purposes are ss.12 and 13 ITA.

43.3 Starting rate for savings income

Section 12(1) ITA provides:

Income tax is charged at the starting rate for savings (rather than the basic rate) on so much of an individual's income up to the starting rate limit for savings as is savings income.

This replaces the basic rate with a different (more favourable) rate, the starting rate for savings.

43.3.1 “Savings income”

Savings income is defined in s.18 ITA:

- (1) This section applies for the purposes of the Income Tax Acts.
- (2) “Savings income” is income—
 - (a) which is within subsection (3) or (4), and
 - (b) which is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

There are five categories of savings income within s.18(3) and (4):

- (3) Income is within this subsection if it is—
 - (a) income chargeable under Chapter 2 of Part 4 of ITTOIA 2005 (interest),
 - (b) income chargeable under Chapter 7 of Part 4 of ITTOIA 2005 (purchased life annuity payments), other than income from annuities specified in section 718(2) of that Act (annuities purchased from certain life assurance premium payments or under wills etc),
 - (c) income chargeable under Chapter 8 of Part 4 of ITTOIA 2005 (profits from deeply discounted securities), or
 - (d) income chargeable under Chapter 2 of Part 12 of this Act (accrued income profits).
- (4) Income is within this subsection if—
 - (a) it is chargeable under Chapter 9 of Part 4 of ITTOIA 2005 (gains from contracts for life insurance etc), and
 - (b) an individual is, or personal representatives are, liable for income tax on it (under section 465 or 466 of that Act).

“Savings income” does not properly describe these disparate categories of income, but it serves as a short label and there is no better term.

In short, the rates of tax on:

- (1) UK interest; and
 - (2) foreign interest when the arising basis applies
- are the starting/basic/higher/additional rates, 10%/20%/40%/50%.

43.3.2 *Rates of tax on interest under remittance basis*

If the remittance basis applies, foreign interest income¹ is taxed at the **basic/higher/additional** rates, **20%/40%/50%**. This is achieved by the clumsy but effective technique of providing that such income is not “savings income”. How much is at stake? At most the difference between the starting rate and the basic rate, for income up to the starting rate limit. In 2010/11, this is 10% of £2,440 = £244.

Before the 2008 reforms I said:

There is a (perhaps good) reason for dealing with foreign interest income in this way. A UK resident foreign domiciled individual will often have different types of foreign income. If he remitted only some of his income, it would be necessary, in the absence of this rule, to investigate whether the remitted income represents interest (taxable at 10%) or some other source of income (taxable at 20%). Because of this rule it is not necessary to ask this question.

Now that the ITA mixed fund rule requires precisely that investigation, this has ceased to be a valid reason. But the amount of tax involved is trivial.

43.4 Rates of tax on dividend income

43.4.1 *“Dividend income”*

Dividend income is defined in s.19 ITA:

- (1) This section applies for the purposes of the Income Tax Acts.
- (2) “Dividend income” is income which is—
 - (a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),
 - (b) chargeable under Chapter 4 of that Part (dividends from non-UK resident companies),
 - (c) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies),
 - (d) chargeable under Chapter 6 of that Part (release of loan to participator in close company), or

¹ Including the interest-like income of the other categories specified in s.18(4) ITA.

- (e) a relevant foreign distribution chargeable under Chapter 8 of Part 5 of ITTOIA 2005 (income not otherwise charged).
- (3) In subsection (2) “relevant foreign distribution” means a distribution of a non-UK resident company which—
 - (a) is not chargeable under Chapter 4 of Part 4 of ITTOIA 2005, but
 - (b) would be chargeable under Chapter 3 of that Part if the company were UK resident.

“Dividend income” does not properly describe these categories of income, but it serves as a short label. “Dividend-type income” would be slightly more accurate but it seems best to adopt the statutory terminology.

43.4.2 *Rates of tax on dividend income*

Section 13 ITA provides:

- (1) Income tax is charged at the dividend ordinary rate on an individual’s income which—
 - (a) is dividend income,
 - (b) would otherwise be charged at the basic rate, and
 - (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).
- (2) Income tax is charged at the dividend upper rate on an individual’s income which—
 - (a) is dividend income,
 - (b) would otherwise be charged at the higher rate, and
 - (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005.
- (2A) Income tax is charged at the dividend additional rate on an individual’s income which—
 - (a) is dividend income,
 - (b) would otherwise be charged at the additional rate, and
 - (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005.

The scheme of s.13 is to replace the basic/higher/additional rates with different rates. Thus the rates of tax on UK dividend income are the dividend ordinary/upper/additional rates, 10%/32.5/42.5%. After allowing the tax credit and grossing up, the effective rates on net dividends are

0%/25%/36.11%.

Foreign dividend income is taxed at the dividend ordinary/upper rates, 10%/32.5% when the arising basis applies, and with benefit of a tax credit and grossing up if the complex conditions of s.397AA ITTOIA are met.

43.4.3 *Foreign dividend income under remittance basis*

If the remittance basis applies, foreign dividend income taxed on the remittance basis does not fall within s.13 as it does not meet the condition of s.13(1)(c) or s.13(2)(c) or s.13(2A)(c). This is consistent with the treatment of foreign interest income. However unlike foreign interest income, the amounts involved may be very substantial. The result is that for a remittance basis taxpayer who remits, foreign dividend income is taxed more heavily than UK dividend income. If the dividend income is from another MS, the discrimination is contrary to EU law.

43.5 **Settlor-interested trust: rates of tax on settlor**

Section 619 ITTOIA provides (so far as relevant):

619 Charge to tax under Chapter 5

(1) Income tax is charged on—

(a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest), ...

(2) For the purposes of Chapter 2 of Part 2 of ITA 2007 (rates at which income tax is charged), where income of another person is treated as income of the settlor and is charged to tax under subsection (1)(a) ... above, it shall be charged in accordance with whichever provisions of the Income Tax Acts would have been applied in charging it if it had arisen directly to the settlor.

This is a welcome simplification from the rules which applied before 2006. Unfortunately the old rules applied for the IT settlement provisions and for s.720. The FA 2006 simplified the settlement provisions but overlooked s.720! So the old rules still need to be considered in that context.

What about foreign dividend income which qualifies for the s.624 remittance basis, but is later remitted and becomes taxable under the s.624

remittance basis?² This is taxable at the dividend ordinary/upper/additional rates, 10%/32.5%/42.5%.

43.6 Rates of tax on transferor within s.720 ITA

Section 745 ITA provides:

- (1) Income tax at the basic rate, the starting rate for savings or the dividend ordinary rate is not charged under section 720 or 727 in respect of any income so far as it has borne tax at that rate by deduction or otherwise.
- (2) Subsection (1) does not affect the tax charged if section 724(2) applies (benefit provided out of income of person abroad charged in year of receipt).
- (3) Subsection (4) applies to any income that—
 - (a) is treated as arising to an individual under section 721 or 728, and
 - (b) apart from this Chapter is dividend income, so far as subsection (1) does not apply to the income.
- (4) The charge to income tax under section 720 or, as the case may be, section 727 operates by treating the income as if it were income within section 19(2) (meaning of “dividend income”).

So there are two rules: one rule for dividend income; and another rule for other income. Dividend income is taxed at the rates usually applied to dividends: the dividend ordinary/dividend upper rates, with the benefit of the tax credit in the case of UK dividends. This also applies to foreign dividends of a foreign domiciled transferor if the usual s.720 remittance basis does not apply (because the dividends are received in the UK).

Section 745 ITA provides a special rule for dividend income. It says nothing about interest. Accordingly, interest within s.720 is taxed at the basic/higher/additional rates of 20%/40%/50%.

43.7 Rates of CGT

Section 4 TCGA provides:

² See 26.5 (Section 624 remittance basis).

- (1) This section makes provision about the rates at which capital gains tax is charged, but is subject to section 169N (rate in case of claim for entrepreneurs' relief).
- (2) Subject to the following provisions of this section, the rate of capital gains tax in respect of gains accruing to a person in a tax year is 18%.
- (3) The rate of capital gains tax in respect of gains accruing to—
 - (a) the trustees of a settlement, or
 - (b) the personal representatives of a deceased person,in a tax year is 28%.
- (4) If income tax is chargeable at the higher rate or the dividend upper rate in respect of any part of the income of an individual for a tax year, the rate of capital gains tax in respect of gains accruing to the individual in the year is 28%.
- (5) If no income tax is chargeable at the higher rate or the dividend upper rate in respect of the income of an individual for a tax year, but the amount on which the individual is chargeable to capital gains tax exceeds the unused part of the individual's basic rate band, the rate of capital gains tax on the excess is 28%.
- (6) [This relates to entrepreneur relief not discussed here]
- (7) The reference in subsection (5) to the unused part of an individual's basic rate band is a reference to the amount by which the basic rate limit exceeds the individual's Step 3 income.
- (8) For the purposes of this section, "the Step 3 income" of an individual means the individual's net income less allowances deducted at Step 3 of the calculation in section 23 of ITA 2007 for the purpose of calculating the individual's income tax liability.
- (9) Section 989 of ITA 2007 (the definitions) applies for the purposes of this section as it applies for income tax purposes.

For CGT rates on gains remitted by a remittance basis taxpayer, see 46.2 (CGT remittance basis).

43.8 Scottish rates of income tax (from 2016)

43.8.1 *Personal rates*

HMRC say:

1. The Scottish rate of income tax, as introduced by the Scotland Act 2012, will be charged on the non-savings income of those defined as

Scottish taxpayers. The rate paid by Scottish taxpayers will be calculated by reducing the basic, higher and additional rates of income tax levied by the UK Government by 10 pence in the pound and adding a new Scottish rate set by the Scottish Parliament.

2. For instance, if the UK basic, higher and additional rates of income tax were 20 per cent, 40 per cent and 45 per cent respectively and the Scottish rate of income tax were 11 per cent, then the rates applied to those defined as Scottish taxpayers for basic, higher and additional rates of income tax would be 21 per cent, 41 per cent and 46 per cent respectively. If the Scottish rate of income tax were 9 per cent, then the rates applied to those defined as Scottish taxpayers would be 19 per cent, 39 per cent and 44 per cent. A Scottish rate of 10 per cent would mean no change from the UK rates.

3. Although the Scottish Parliament sets only one rate (the Scottish rate), this effectively gives rise to three rates: the Scottish basic rate; the Scottish higher rate; and the Scottish additional rate. Together these three rates will be referred to as the Scottish main rates.

4. As the Scottish rate of income tax is not a discrete tax it remains covered by existing UK double taxation agreements.

5. The Scottish rate of income tax replaces the Scottish Variable Rate (SVR), which was introduced by the Scotland Act 1998.

6. The non-savings income of a Scottish taxpayer (as defined by Part 3 of the Scotland Act 2012) will generally be liable to the Scottish rate of income tax.

7. Savings income and dividend income (as defined in sections 18 and 19 respectively of the Income Tax Act 2007 (ITA) and to which sections 12 and 13 of ITA apply) arising to Scottish taxpayers will still be taxed at the appropriate UK rate.³

3 HMRC, "Clarifying the Scope of the Scottish Rate of Income Tax Technical Note" (May 2012).

CHAPTER FORTY FOUR

PERSONAL ALLOWANCES

44.1 Personal allowances - Introduction

This chapter considers the IT personal allowances and the CGT annual exemption.

The complex rules reflect a good deal of history and much special lobbying. A full discussion, would need a short book. I focus on the aspects closest to the themes of this book.

44.2 CGT annual exemption

Section 3(1) TCGA provides the CGT annual exemption:¹

An individual shall not be chargeable to capital gains tax in respect of so much of his taxable amount for any year of assessment as does not exceed the exempt amount for the year.

This strictly applies to resident and non-resident individuals, but non-residents do not usually pay CGT, so they are not affected.

44.3 Entitlement to personal allowances

Section 35(1) ITA provides the allowance::

An individual who makes a claim is entitled to a personal allowance of £8,105 for a tax year if the individual—

- (a) is under the age of 65 throughout the tax year, and

¹ A note on terminology: the ITA refers to personal allowances, and the TCGA refers to annual exemptions; but the concepts are similar.

- (b) meets the requirements of section 56 (residence etc).

Before dealing with the requirements of s.56, it is convenient to discuss the two categories for whom the allowances are withdrawn: high earners and remittance basis claimants.

44.4 Withdrawal of personal allowances for high earners

Section 35(2) ITA provides:

For an individual whose adjusted net income exceeds £100,000, the allowance under subsection (1) is reduced by one-half of the excess.

“Adjusted net income” is defined in s.58 ITA, not discussed here.

This rule was a parting shot from the Blair/Brown administration. It has incurred some high level criticism from the IFS but no-one seems to have taken any notice.

44.5 Withdrawal of personal allowances & CGT annual exemption for remittance basis claimants

Section 809G ITA disapplies IT personal allowances for remittance basis claimants:

- (1) This section applies if s.809B (claim for remittance basis to apply) applies to an individual for a tax year.
- (2) For that year, the individual is not entitled to-
 - (a) any allowance under Chapter 2 of Part 3 (personal allowance and blind person’s allowance),
 - (b) any tax reduction under Chapter 3 of that Part (tax reductions for married couples and civil partners), or
 - (c) any relief under s.457, 458 or 459 (payments for life insurance etc).

This does not apply to remittance basis taxpayers in the de minimis categories (sub-£2k taxpayers and non-taxpayers): they retain their allowances.

The editor of *Taxation* comments acerbically on s.809G(2)(c):

So what are these valuable reliefs which it would be unfair to allow

those claiming the remittance basis to enjoy? They are relief from tax on half of the premiums paid to trade unions and police organisations for superannuation, life insurance or funeral benefits, or to the employer so that benefits can be paid after the employee's death to their dependants, but limited to £100 a year of relief in each case.

What on earth is the point of removing a relief like that for the non-domiciles? It is pointless complexity for the sake of a few tenners in tax which will have no impact whatsoever on the non-domiciles concerned. Unless there is some issue related to European law, or human rights (which seem to be the normal culprits in these situations) I really cannot see why the parliamentary draftsman should have been troubled with the need to include them. And, frankly, if there is some such problem, then given the minuscule levels of relief they offer even to those not on the remittance basis, wouldn't it be simpler to just abolish the sections altogether? That would at least be simplification.²

Likewise s.3(1A)TCGA³ disapplies the CGT annual exemption:

Subsection (1) does not apply to an individual for a tax year if s.809B of ITA 2007 (claim for remittance basis to apply) applies to the individual for that year.

This applies even to a person who is UK domiciled but not ordinarily resident, even though such a person pays CGT on an arising basis.

In consequence the usual relief for reporting small gains (within the annual exemption) is disapplied. Section 3A TCGA provides:

- (1) Where in the case of an individual—
- (a) the amount of chargeable gains accruing to him in any year of assessment does not exceed the exempt amount for that year, and
 - (b) the aggregate amount or value of the consideration for all chargeable disposals of assets made by him in that year does not exceed four times the exempt amount for that year,
- a statement to that effect is sufficient compliance with so much of any notice under section 8 of the Management Act as requires information for the purposes of establishing the amount in which he is chargeable to capital gains tax for that year. ...

² Mike Truman, *Taxation* 21 Feb 2008 p.161.

³ Flagged (somewhat unnecessarily) in s.809G(3) ITA.

- (5A) Subsection (1) does not apply to an individual for a tax year if—
- (a) section 809B of ITA 2007 (claim for remittance basis to apply),
or
 - (b) section 16ZB below (certain chargeable gains charged on remittance basis),
- applies to the individual for that year.

A DTA will occasionally restore the personal allowances and the CGT annual exemption, which are in general disappplied for remittance basis claimants; see 44.7 (Personal allowances under DTAs: remittance basis claimants).

Individuals with an income substantially above £100k are not concerned with the loss of income tax allowances since these are withdrawn anyway; though they do lose the benefit of CGT annual exemption..

44.6 Requirements of s.56

There are ten categories of individuals who qualify for personal allowances under chapters 2 and 3 part 3 ITA. In short:

- (1) UK residents
- (2) Non-residents:
 - (a) Seven categories listed in s.56(3) ITA
 - (b) Those entitled under DTAs
 - (c) Certain visiting forces.⁴

44.6.1 Entitlement to personal allowances: UK residents

Section 56(2) ITA 2007 sets out the first category of individuals who qualify for personal allowances, which is UK residents:

- The individual meets the requirements of this section if the individual—
- (a) is UK resident for the tax year, or
 - (b) meets the condition in subsection (3).

44.6.2 Entitlement under s.56(3)

Section 56(3) ITA 2007 sets out the next seven categories which apply to

⁴ See App. 4.3.2 (Personal allowances).

non-residents. The practical significance of this is limited, since often a claim for a personal allowance is effectively cancelled by non-resident individual's IT relief.⁵

The most significant category is EEA nationals. These are presumably included because a relief for UK residents but not for EEA nationals would be incompatible with EU freedom of establishment.⁶

The remaining categories are a strange ragbag:

An individual meets the condition in this subsection if, at any time in the tax year, the individual—

- (za) is a national of an EEA state,
- (a) is resident in the Isle of Man or the Channel Islands,⁷
- (b) has previously resided in the UK and is resident abroad for the sake of the health of—
 - (i) the individual, or
 - (ii) a member of the individual's family who is resident with the individual,
- (c) is a person who is or has been employed in the service of the Crown,
- (d) is employed in the service of any territory under Her Majesty's protection,
- (e) is employed in the service of a missionary society, or
- (f) is a person whose late spouse or late civil partner was employed in the service of the Crown.

44.6.3 *Commentary*

There is scope here for simplification: there is a very strong case for repeal of s.56(3)(a)-(f), ie the entire list apart from EEA nationals.

44.6.4 *Commonwealth citizens*

Before 2010/11 there was an additional category, namely, Commonwealth citizens. The tax law rewrite considered that this rule was contrary to the

⁵ See 39.4 (Amount B (disregarded income and reliefs)).

⁶ See 56.5 (Freedom of establishment).

⁷ This category has been included since 1910: I would be grateful for any reader who could suggest the reason.

Human Rights Act.⁸ Accordingly this category was deleted by the FA 2009. EN FA 2009 provides:

14. Previously, there was an entitlement for some individuals to claim purely by virtue of being a Commonwealth citizen but by meeting no other condition. Commonwealth citizens will no longer qualify for personal allowances, married couple's allowance, blind person's allowance and relief for life assurance premiums by reference to their Commonwealth citizenship status alone. They may, of course, continue to qualify under the other conditions or through DTA provisions if appropriate.

15. This change will mainly affect citizens of the following countries: Bahamas; Cameroon; Cook Islands; Dominica; Maldives; Mozambique; Nauru; Niue; St Lucia; St Vincent & the Grenadines; Samoa; Tanzania; Tonga; and Vanuatu.

The objection was that granting personal allowances to an individual solely on the basis that they are a Commonwealth citizen would be discriminatory on the grounds of nationality.⁹ The rewrite did not consider that there was the unlawful discrimination in providing allowances to EEA nationals, as the distinction between EEA nationals and the rest of the world is justified by the distinct legal relationship which the UK has with the EEA.¹⁰

This rule was just about the last remaining example of special treatment for commonwealth citizens in UK tax legislation, so the issue does not have immediate tax implications in other areas but it does illustrate two interesting points: a significant restriction on the UK's ability to impose tax; and the (in)significance of the commonwealth (at least in a Human Rights context); for the tax law rewrite rejected the argument that the legal relationship which the UK has with the commonwealth would justify the discrimination.

44.7 Personal allowances under DTAs

The last category of individuals entitled to personal allowances relates to

8 EN ITA para 135.

9 Art.14 ECHR (Prohibition of discrimination) in conjunction with Art.1 of 1st Protocol (Right to property).

10 Private correspondence.

DTAs.

44.7.1 *Non-residents*

The OECD model convention does not affect the rule that personal allowances are limited to UK residents (and other specific categories).¹¹

However some DTAs do confer personal allowances on individuals who are treaty-resident in the foreign state (even though they are not UK domestic law resident). For instance, art. 25(1) Austria/UK DTA provides:

Subject to the provisions of paragraph (3) of this Article, individuals who are residents of Austria shall be entitled to the same personal allowances, reliefs and reductions for the purposes of UK tax as British subjects¹² not resident in the UK. ...

Non-resident British subjects qualify for personal allowances as they are nationals of an EEA state (the UK) so individuals who are treaty-resident in Austria will likewise do so.

Sometimes there is a restriction. Article 25(3) Austria/UK DTA provides:

Nothing in this Convention shall entitle an individual who is a resident of a Contracting State [Austria] and whose income from the other Contracting State [UK] consists solely of dividends, interest or royalties (or solely of any combination thereof) to the personal allowances, reliefs and reductions of the kind referred to in this Article for the purposes of taxation in that other Contracting State.

One could avoid the restriction by procuring income other than dividends, interest and royalties (maybe annual payments) but the amounts involved are small.

As far as I can see, the treaties which confer personal allowances are:

11 OECD model convention art. 24(3) recognises this:

“This provision shall not be construed as obliging a Contracting State to grant to residents of the other Contracting State any personal allowances, reliefs and reductions for taxation purposes on account of civil status or family responsibilities which it grants to its own residents.”

12 Defined in s.51 British Nationality Act 1981.

* includes restriction where income consists solely of dividends, interest or royalties

However the RDR Manual provides:

10340 Non-resident individuals who may claim Personal Allowances under the provisions of Double Taxation Agreements [September 2011]

Non-resident individuals who satisfy one of the conditions below are entitled to United Kingdom Personal Allowances

[1] an individual who is a national of Israel or Jamaica or

[2] [EEA Nationals] or

[3] an individual who is a national and also a resident of Argentina, Australia, Azerbaijan, Bangladesh, Belarus, Bolivia, Bosnia and Herzegovina*, Botswana, Canada, China, Côte d'Ivoire (Ivory Coast), Croatia*, Egypt, Gambia, India, Indonesia, Japan, Jordan, Kazakhstan, Korea, Lesotho, Malaysia, Montenegro*, Morocco, New Zealand, Nigeria, Oman, Pakistan, Papua New Guinea, Philippines, Russian Federation, Serbia*, South Africa, Sri Lanka, Sudan, Switzerland, Taiwan, Tajikistan, Thailand, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Uganda, Ukraine, Uzbekistan, Venezuela, Vietnam, Federal Republic of Yugoslavia*, Zimbabwe

(*Note: Entitlement continues under the Double Taxation Treaty the UK had with the former Yugoslavia until such time as a new agreement takes effect.) or

[4] an individual who is a resident of Austria, Barbados, Belgium, Fiji, Germany, Greece, Ireland, Kenya, Luxembourg, Mauritius, Myanmar (Burma), Namibia, Netherlands, Portugal, Swaziland,

13 The right to personal allowances is conferred on those treaty-resident in Barbados, under article 23(5) of the 2012 Barbados/UK DTA, though it was not in the previous treaty.

Sweden, Switzerland, Zambia

(Please note: If individual is a resident, but not a citizen of Austria, Belgium, France,¹⁴* Germany*, Kenya, Luxembourg, Mauritius, Netherlands*, Portugal, Sweden, Switzerland or Zambia, they are not entitled to personal allowances if their income consists solely of dividends, interest and royalties or any combination of them).

*France - FROM 6 April 2010 personal allowances are given to a Resident but not a National of the country irrespective of their income

*Germany - FROM 6 April 2011 personal allowances are given to a Resident but not a National of the country irrespective of their income

*Netherlands - FROM 6 April 2011 personal allowances are given to a Resident but not a National of the country irrespective of their income.

Category [3] is (more or less) the same as my list set out above, except that Germany should be deleted following the new DTA (dated 2010). I do not understand why the countries in categories [1] and [2] are in this list, as most of these DTAs do not seem to provide for personal allowances. Yet this RDR passage was updated in March 2011. I would be grateful for any reader who could explain this.

The form to claim the relief is R43.

In the 2011/12 edition of this book I said that the DTAs which conferred the right to personal allowances was “a small group of older DTAs whose number one might expect to diminish.” However Barbados can now be added to the list under the new Barbados/UK treaty (2012). One wonders what the UK’s policy is on personal allowances in the negotiation of DTAs.

The practical significance of DTA’s conferring personal allowances on non-residents is limited, since often a claim for the relief is effectively cancelled by non-resident individual’s IT relief.¹⁵

44.7.2 *Personal allowances under DTAs: remittance basis claimants*

Remittance basis claimants (who would in principle qualify for personal allowances as they are by definition UK resident) lose their personal allowances (and CGT annual exemption) by making a remittance basis

14 France is listed here in error because there is no reference to personal allowances in the UK-France DTA.

15 See 37.4 (Amount B (disregarded income and reliefs)).

claim.¹⁶ This disallowance is overridden (so the right to personal allowances and CGT annual exemption is restored) by a DTA if applicable.¹⁷ The treaties which confer personal allowances are those set out in the list above, with the exception of Myanmar and Greece.¹⁸

This treaty relief only affects remittance basis taxpayers who make a remittance basis claim, ie where:

- (1) the individual is UK resident (so a remittance basis claim is made);
and
- (2) the individual is treaty-resident in the jurisdiction concerned (so that DTA relief applies).

So this point will not be a common one, though it will arise from time to time.

16 See 44.5 (Effect of remittance basis claim on personal allowances).

17 Jane Kennedy (Financial Secretary to the Treasury) accepted this in the public Bill committee debate on the Finance Bill, Hansard 19 June 2008 col 818, accessible www.publications.parliament.uk/pa/cm200708/cmpublic/finance/080619/am/80619s05.htm.

18 The antique treaties of Myanmar and Greece only grant personal allowances to residents of Myanmar/Greece who are not domestic-law UK resident; they do not help domestic-law UK residents even if also residents of Myanmar/Greece.

CHAPTER FORTY FIVE

NATIONAL INSURANCE CONTRIBUTIONS

45.1 NICs – Introduction

NICs should be regarded as a collection of seven more or less distinct taxes. Section 1(2) SSCBA classifies them semi-numerically:

Contributions under this Part of this Act shall be of the following six classes—

- (a) Class 1, earnings-related, payable under section 6 below, being—
 - (i) primary Class 1 contributions from employed earners; and
 - (ii) secondary Class 1 contributions from employers and other persons paying earnings;
- (b) Class 1A, payable under section 10 below by persons liable to pay secondary Class 1 contributions and certain other persons;
- (bb) Class 1B, payable under section 10A below by persons who are accountable to the Inland Revenue in respect of income tax on general earnings in accordance with a PAYE settlement agreement;
- (c) Class 2, flat-rate, payable weekly under section 11 below by self-employed earners;
- (d) Class 3, payable under section 13 or 13A below by earners and others voluntarily with a view to providing entitlement to benefit, or making up entitlement; and
- (e) Class 4, payable under section 15 below in respect of the profits or gains of a trade, profession or vocation, or under section 18 below in respect of equivalent earnings.

Each class of NIC requires a book to itself, except for class 1 which requires many volumes. I focus on matters closest to the themes of this book. I do not consider the special rules for mariners, aircrew, diplomats

and service personnel.

SSCBA does not apply in Northern Ireland¹ so it refers to “Great Britain”. (Northern Ireland has its own equivalent legislation not discussed here.) SSCR applies in both jurisdictions, so it usually refers to the UK, or to “GB and Northern Ireland”.

45.2 Meaning of “employed” and “self-employed”

Section 2(1) SSCBA provides:

(1) In this Part of this Act and Parts II to V below—

- (a) “employed earner” means a person who is gainfully employed in Great Britain either under a contract of service, or in an office (including elective office)² with general earnings; and
- (b) “self-employed earner” means a person who is gainfully employed in Great Britain otherwise than in employed earner’s employment (whether or not he is also employed in such employment).

The SSCBA, confusingly, (mis)defines the word “employment” to include trades and professions.³ But in the definition the terms “employed” and “self-employed” are used in more or less their ordinary meanings. (To add to the confusion, the SSCER deems some persons actually self-employed to be employees for NIC purposes and vice versa.)

In this chapter I use the word “**employee**” to mean an “employed earner” and “**self-employed**” means a “self-employed earner”.

45.3 Meaning of “secondary contributor”

Section 6(4) SSCBA provides:

The primary and secondary Class 1 contributions referred to in

1 Section 177 SSCBA provides:

“(5) The following provisions extend to Northern Ireland—
section 16 and Schedule 2; section 116(2); and this section.

(6) Except as provided by this section, this Act does not extend to Northern Ireland.”

2 The odd expression “elective office” is not defined and the words in brackets are otiose.

3 Section 122(1) SSCBA.

subsection (1) above are payable as follows—

- (a) the primary contribution shall be the liability of the earner; and
- (b) the secondary contribution shall be the liability of the secondary contributor; ...

The identity of the secondary contributor is clearly crucial.

Section 7(1) SSCBA provides:

For the purposes of this Act, the “secondary contributor” in relation to any payment of earnings to or for the benefit of an employed earner, is—

- (a) in the case of an earner employed under a contract of service, his employer;
- (b) in the case of an earner employed in an office with general earnings, either—
 - (i) such person as may be prescribed in relation to that office; or
 - (ii) if no person is prescribed, the government department, public authority or body of persons responsible for paying the general earnings of the office.

SSCER reg. 5(1) prevents avoidance by foreign employers seconding to the UK:

For the purposes of section 4 of the Act⁴ (Class 1 contributions), in relation to any payment of earnings to or for the benefit of an employed earner in any employment described in any paragraph in column (A) of Schedule 3 to these regulations, the person specified in the corresponding paragraph in column (B) of that Schedule shall be treated as the secondary Class 1 contributor in relation to that employed earner.

...

Column (A)

9. Employment by a foreign employer where—
(a) in pursuance of that employment the personal service of the person employed is made available to a host employer; and
(b) the personal service is rendered for the purposes of the business of that host employer; and
(c) that personal service for the host employer begins on or after 6th April 1994.

Column (B)

9. The host employer to whom the personal service of the person employed is made available.

⁴ Section 4 Social Security Act 1975 is now s.7 SSCBA.

The identity of the employer is a question of contract/employment law.⁵

45.4 Territorial Limitation

Tax Bulletin 79 explains:

For NIC purposes the world can be usefully divided into:

European Economic Area (EEA)

EC Treaty and EC Regulation [formerly 1408/71 and now 883/2004] applies to employees moving between EEA Member States to work. It modifies SSCBA 1992 and regulations.⁶

RA/DCC Countries⁷

Bi-lateral Social Security agreements modify SSCBA 1992 and regulations.

Rest of The World (“ROW”)

SSCBA 1992 and contributions regulations are unmodified.

Reciprocal agreements are not considered in this book. I first consider what the NI Manual calls “ROW” [rest of the world] rules, and then the EU rules.

45.5 ROW: Employed in GB

Unless the individual is employed *in* GB, they are not an employed or self-

5 Tax Bulletin 49 provides:

“We would not seek to claim in isolation that there is a place of business [in the UK] where the overseas provider legally, and in exchange for a payment commensurate with the service, sub-contracts services to a UK business. And similarly we would also not normally attempt to claim in isolation that the unconnected UK business is the employer if it is genuinely not paying the mariners directly.” (This has been flagged as no longer current, however the author is not currently aware of this passage being moved elsewhere.)

This is only relevant to mariners as others are caught by the SSCER.

6 From 1 June 2012 883/2004 will apply to Norway, Iceland and Liechtenstein.

7 These countries are: Barbados, Bermuda, Bosnia-Herzegovina, Canada, Croatia, Guernsey, Israel, Jamaica, Japan, Jersey, Macedonia, Mauritius, Montenegro, New Zealand (Social Security Benefits only), Philippines, Republic of Korea, Serbia, Turkey, USA.

employed earner, and so in principle no NIC liability arises.⁸ I refer to this as the “**employed in GB rule**”.

Tax Bulletin 79 explains:

This requires that employment duties take place here. However, this is wide enough to allow for some temporary or incidental duties of the employment to be performed outside the UK, if the UK is the place where the employment duties are usually performed.

45.5.1 *First year abroad*

Reg. 146 SSCR provides an extension to the employed in GB rule:

(1) Where an earner is gainfully employed outside the United Kingdom, and that employment, if it had been in Great Britain or Northern Ireland, would have been employed earner’s employment, that employment outside the United Kingdom shall be treated as employed earner’s employment for the period for which under para (2)(a) contributions are payable in respect of the earnings paid to the earner in respect of that employment provided that—

- (a) the employer has a place of business in Great Britain or Northern Ireland (as the case may be);
- (b) the earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be); and
- (c) immediately before the commencement of the employment the earner was resident in Great Britain or Northern Ireland (as the case may be).

(2) Where, under para (1), the employment outside the United Kingdom is treated as an employed earner’s employment, the following provisions shall apply in respect of the payment of contributions—

- (a) primary and secondary Class 1 contributions shall be payable in respect of any payment of earnings for the employment outside the United Kingdom during the period of 52 contribution weeks from the beginning of the contribution week in which that employment begins to the same extent as that to which such contributions would have been payable if the employment had been in Great Britain or Northern Ireland (as the case may be);
- (b) subject to regulations 148 and 148A, any earner by or in

⁸ See 45.2 (Meaning of “employed” and “self-employed”).

respect of whom contributions are or have been payable under sub-para (a) shall be entitled to pay Class 3 contributions in respect of any year during which the earner is outside the United Kingdom from and including that in which the employment outside the United Kingdom begins until that in which he next returns to Great Britain or Northern Ireland (as the case may be);

- (c) Class 1A contributions and Class 1B contributions shall be payable in respect of the period specified in sub-para (a).

Thus employment outside the UK is treated as employment in the UK (and so subject to NIC) for 52 weeks, provided the following conditions are satisfied:

- (1) The employer has a place of business in the UK.
- (2) The employee is ordinarily resident in UK.
- (3) The employee was UK resident immediately before the employment commenced.

NI Manual provides:

33027Class 1: Workers Going to and Coming from Abroad – ROW – Change of employment [February 2006]

Change of employment overseas with the same employer

The 52 week period of continuing liability may cease when an employee changes employment. Whether or not an employee has entered into a new employment will be a question of fact. The contracts of employment will indicate if this were so.

Example

- Ralph was posted by the UK company to work in Australia for a period of 2 years as a General Manager of the Sydney office
- After 6 months he applied for promotion as a Overseas Sales Executive with a separate department of the UK company
- He was successful and immediately took up his new position in Malaysia

The subsequent posting from Australia to Malaysia would be considered to arise in connection with the new employment with the UK company. The 52 week period would cease.

Had the UK employer simply posted him to Malaysia in connection with the original occupation/employment as a General Manager then the 52 week period would have continued in full.

Whether or not this is actually right depends on the documentation relating

to the contract of employment.

45.6 ROW: Residence requirements

Section 1(6) SSCBA provides:

No person shall—

- (a) be liable to pay Class 1, Class 1A, Class 1B or Class 2 contributions unless he fulfils prescribed conditions as to residence or presence in Great Britain;
- (b) be entitled to pay Class 3 contributions unless he fulfils such conditions; or
- (c) be entitled to pay Class 1, Class 1A, Class 1B or Class 2 contributions other than those which he is liable to pay, except so far as he is permitted by regulations to pay them.

Reg. 145 SSCR provides five different sets of residence requirements. These apply in addition to the employed in GB rule.

45.6.1 *Primary Class 1 NIC*

Reg. 145(1)(a) SSCR provides that the requirement is:

as respects liability of an employed earner to pay primary Class 1 contributions in respect of earnings for an employed earner's employment, that the employed earner is resident or present in Great Britain or Northern Ireland (or but for any temporary absence would be present in Great Britain or Northern Ireland) at the time of that employment or is then ordinarily resident in Great Britain or Northern Ireland (as the case may be).

There are four possible territorial connections, and if any one of them is satisfied Primary Class 1 NIC is in principle payable:

- (1) Residence in UK.
- (2) Presence in UK.
- (3) Temporary absence from UK.
- (4) Ordinary residence in UK.

Tax Bulletin 79 explains:

The effect of Regulation 145 (1) SSCR 2001 is to provide for a kind of

constructive presence for periods outside the UK which are merely a “temporary absence”. This concept of temporary absence requires that:

- i. the person’s absence be temporary,
- ii. that if he were not absent he would be present in the UK.

This means that an employee who has employment based in the UK who goes abroad for a time on a short business trip or holiday abroad, and who departs from or returns to the UK, can continue to be within the UK scheme.

An example of this would be the person who flies to a board meeting outside the UK and then returns to their UK based employment.

That seems obvious. The Bulletin continues:

Taken together, Section 2(1)(a) SSCBA 1992 and Regulation 145 (1)(a) SSCR 2001 is enough to keep a person within Class 1 NIC if their employment is based here and their absence abroad is of a temporary or incidental nature. However, crucially, an employee who is not ordinarily resident in the UK and who normally works overseas cannot be said to be merely “temporarily absent” from employed earners employment in the UK if they are departing overseas for a time, to work for their foreign employer. In such a situation, the person is not performing duties which is merely incidental to the employed earner’s employment in the UK but is returning to an employment based outside the UK. In the absence of an express contractual provision as to the attribution of the earnings, the earnings must be apportioned between the employed earner employment in the UK and the overseas duties for the foreign employer.

45.6.2 *First year in UK exemption*

Reg. 145(2) SSCR provides an exception:

Where a person is ordinarily neither resident nor employed in the UK and, in pursuance of employment which is mainly employment outside the UK by an employer whose place of business is outside the UK (whether or not he also has a place of business in the UK) that person is employed for a time in Great Britain or Northern Ireland (as the case may be) as an employed earner and, but for the provisions of this paragraph, the provisions of sub-para (a) of para (1) would apply, the conditions prescribed in that sub-paragraph and in sub-para (b) of that paragraph shall apply subject to the proviso that—

- (a) no primary or secondary Class 1 contribution shall be payable in respect of the earnings of the employed earner for such employment;
- (b) no Class 1A contribution shall be payable in respect of something which is made available to the employed earner or to a member of his family or household by reason of such employment; and
- (c) no Class 1B contribution shall be payable in respect of any PAYE settlement agreement in connection with such employment,⁹

after the date of the earner's last entry into Great Britain or Northern Ireland (as the case may be) and before he has been resident in Great Britain or Northern Ireland (as the case may be) for a continuous period of 52 contribution weeks from the beginning of the contribution week following that in which that date falls.

Thus employment in the UK is not subject to NIC for 52 weeks provided the following conditions are satisfied:

- (1) employee not ordinarily resident in UK;
- (2) employee not ordinarily employed in UK;
- (3) employment mainly outside the UK;
- (4) employer has a place of business outside the UK.¹⁰

NI Manual provides:

33023 ROW – Exemption [February 2006]

The exemption lasts until the employee has been resident in GB for a continuous period of 52 weeks starting from the beginning of the contribution week following the week in which the worker arrives in GB to take up employment.

A further 52 week period may commence where an employee returns to the overseas employment and then commences a new secondment in GB.

9 I have corrected a disastrous typographical error in the SSCR by inserting a paragraph break here. The last paragraph (beginning “after the date”) governs paras (a), (b) and (c). This can be seen to be correct from context and by comparing the predecessor, reg.119(2) SSCR 1979.

10 It might be inferred that the relief only applies if the employer's principal place of business is outside the UK, but the better view is that any place of business outside the UK is sufficient, and this is consistent with reg.146(2).

The exemption does not apply to:

- EEA nationals as this would contravene the principle behind 1408/71 see NIM33005
- RA countries where a person is treated as being ordinarily resident in the UK if they fall within UK domestic legislation see NIM33015
- Employees who intend to work in GB for 3 years or more at the outset. Such employees will be treated as being ordinarily resident.¹¹
- To decide whether a person coming to the UK is ordinarily resident in the UK for NIC purposes, apply the tests suggested in NIM33031 and NIM33032.

33024 ROW - Exemption example [February 2006]

A doctor works for a hospital in Egypt as a surgeon and sees an advert in a medical journal for surgeons position in Newcastle for a 2 year period. The position will enable him to obtain further advanced surgical qualifications.

He applies and is successful. The Egyptian employer agrees to keep his employment position open until he returns. The doctor signs a contract of employment with the hospital in Newcastle for two years.

In this case the 52 week exemption tests are satisfied. He is not ordinarily resident or employed in GB. He is employed for a time in GB as an employed earner. A major indicator in this example is the continuing employment in Egypt and the employee being able to return after the period of employment in GB.

In order to satisfy the “in pursuance of employment” test the employment in GB must be related to the particular employment that the employee has outside of GB. The fact that the employee may be pursuing their own goals is not relevant. It is characteristic of much skilled work that the employer’s interests in a person’s improved skills will coincide with the employee’s interest in advancing their career and marketability. Provided that the facts support that the employment in GB and obtaining of advanced qualifications (in this case advanced surgical qualifications) are required for the employment abroad then the test may apply

A different conclusion may have been reached if the employment and qualifications obtained in GB were diverse from the employment in Egypt.

11 [Author’s Note] I have retained this sub-paragraph which was deleted (I think accidentally) in early 2006.

45.6.3 *Student exemption*

Reg. 145(3) SSCR provides an exception for students and apprentices:

Where a person to whom para (1)(a) would otherwise apply is not ordinarily resident in the UK and is not a person to whom the provisions of para (2) apply, the proviso in para (2) shall nevertheless apply if either—

- (a) during a vacation occurring in a course of full-time studies which that person is pursuing [*sic*] outside the UK, that person is gainfully employed under a contract of service in Great Britain or Northern Ireland (as the case may be) in temporary employment of a nature similar or related to that course of studies; or
- (b) there exists between him and some other person outside the UK a relationship comparable with the relationship between an apprentice and his master in Great Britain or Northern Ireland (as the case may be) and that person is gainfully employed under a contract of service in Great Britain or Northern Ireland (as the case may be) in employment which began before he attained the age of 25 and which is of a nature similar or related to the employment under the said relationship outside the UK.

45.6.4 *Secondary Class 1, Class 1A and 1B NICs*

Reg. 145(1)(b) SSCR provides that the requirement is:

as respect¹² liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions that the person who, but for any conditions as to residence or presence in Great Britain or Northern Ireland (as the case may be and including the having of a place of business in Great Britain or Northern Ireland),¹³ would be the secondary

12 This is a slip for “*as respects*” ... but nothing turns on that.

13 The long phrase beginning “but for” (and continuing to the close of brackets which follows) appears to be otiose. The paragraph means:

“as respects liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions that the person who is the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as ‘the employer’) is resident or present in Great Britain or

contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as “the employer”) is resident or present in Great Britain or Northern Ireland when such contributions become payable or then has a place of business in Great Britain or Northern Ireland (as the case may be), so however that nothing in this paragraph shall prevent the employer paying the said contributions if he so wishes.

Thus there are three possible connecting factors and if any of them is satisfied, secondary Class 1 NIC is due:

- (1) employer is resident in UK;
- (2) employer is present in UK;
- (3) employer has a place of business in UK.

The first year in UK and student exemptions may apply.

45.7 Primary and Secondary Class 1 NIC: HMRC examples

Tax Bulletin 79 provides:

Example 1 (Angus)

Resident/Not Ordinarily Resident UK - Sent from ROW country to work in the UK - contractual employer in ROW country but seconded to the UK “host” employer.

An Australian employer assigns A, who normally works in Australia to the UK for 2 years. Residence status is resident in the UK but not ordinarily resident in years 1 and 2.

A meets the criteria for a 52 weeks exemption from NIC because he is not ordinarily resident in the UK and he is not ordinarily employed in the UK and is working for his overseas employer and is in the UK in continuance of that employment. His Australian employer has no place of business in the UK.

Once the first 52 weeks period in Regulation 145(2) SSCR 2001 has expired, A will become liable for contributions in the UK. As his contractual employer has no place of business in the UK, the UK “host” employer to whom personal service is made available is the secondary contributor - liable for the employer part of the National Insurance. [Para 9 to Regulation 3, Social Security Categorisation of Earners Regulations 1978].

When he is in the UK, A is in employed earner’s employment and meets the residence criteria in Regulation 145 (1) SSCR 2001 because he is present in the UK at the time of his employment.

Northern Ireland when such contributions become payable or then has a place of business in Great Britain or Northern Ireland ...”

A makes a short trip back to Australia in year 2 to brief the Australian company.

After 14 months in the UK, A returns to Australia for the month of June - 20 days holiday and 5 days working for the Australian company. He then returns to the UK to complete the rest of his assignment. A remains under contract to the Australian company and the costs of his employment in the UK is met by the Australian employer. There is no apportionment of salary specified in the contract. There can be apportionment of his salary for the days working outside the UK.

When A is in earners employment in the UK he is liable for NICs on his salary because he meets the criteria of residence and presence in Regulation 145 (1) SSCR 2001.

When in Australia, A is not in employed earners employment in the UK - his employment is one which is normally based outside the UK - so that the days working in Australia are not an incidental part of employed earners employment in the UK.

What if the employment had been funded by the UK company?

We would consider this a strong indicator that A was performing his duties in Australia for the purposes of the business of the UK "host" employer and his time in Australia was merely a "temporary absence" from employed earner's employment for the purposes of Regulation 145(1) SSCR 2001.

What if there is a letter of secondment - attaching A to his UK employer?

We consider that this would be a strong indicator that A's normal base is the UK and he can be considered to be merely "temporarily absent" for the purposes of Regulation 145(1) SSCR 2001 - the duties in Australia are incidental to the employment in the UK for which he is paid his salary.

What if A had travelled to China for 3 days to act on behalf of the UK company?

A's normal base is the UK and he can be considered to be merely "temporarily absent" for the purposes of Regulation 145(1) SSCR 2001 - the duties in China are incidental to the employment in the UK. No apportionment is required.

What if A had travelled to China for 3 days to act on behalf of the Australian company?

The duties are not further to the employment in the UK and cannot be regarded as merely a temporary absence. An apportionment is required.

What if A has been sent to the UK and become ordinarily resident here?

If A's normal base is the UK he will be in employed earner's employment in Great Britain. As he is ordinarily resident he meets the residence criteria in Regulation 145(1) SSCR 2001 - the duties in Australia are merely incidental to the employment in the employed earner's employment in the UK for which he is paid his salary. No apportionment is required.

Exactly how many days amounts to a "temporary absence"?

Whether an absence is a temporary absence is a question of fact and degree, which depends upon the nature of the circumstances. Examples of what we would consider to be temporary absence would include short business trips or holidays.

Method of Time Apportionment

In the absence of contractual provision, there is to be an apportionment between UK and non-UK workdays under Section 2 of the Apportionment Act 1870. Under the Apportionment Act, salary accrues on a daily basis. The earnings are to be multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer's business and the denominator is the total number of days in employment – in a full year this will be 365 days.

Where the employee is monthly or weekly paid, the computation has to take account of the “pay period” basis for computing NIC.

Example 2 (Patel)

Mrs P is ordinarily resident in India and is sent to the UK by her employer to work in the UK at the offices of a UK company which is part of the group. She remains under contract to the Indian employer and the Indian employer bears the cost of the employment. Her salary is £100,000. Her employer recalls her to India to advise on a hostile take-over for a period of 5 days - From 1 June until 5 June. The substantial part of 2 of those days is spent flying to India and back. The earnings are multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer's business and the denominator is the total number of days in employment.

If Mrs P has an annual pay period, then the appropriate fraction can simply be applied to her annual salary.

Gross Pay $£100,000 \times 5/365$

Amount attributable to overseas workdays less £1369.87

NIC is operated on the gross pay attributable to the UK £98,630.13

However, if Mrs P is monthly paid, the employer has to account for NIC each month as a payment is made, and is unable to “look back” over a year and know what percentage needs to be applied. So the apportionment has to be done in the monthly pay period.

In June, no NICs are due on the salary paid in respect of the work in India.

The earnings on which NICs are to be calculated are those for the month of June – after an apportionment to take account of the 5 days which were not in respect of the employed earners employment.

Monthly salary $£8333.33 \times 5/365 \times 100,000$ less £1369.87

Amount attributable to non-UK workdays £1369.87

NIC is operated on the monthly gross pay attributable to the UK **£6963.46**

Holidays

If Mrs P were to take a holiday in India, the holiday may need to be brought into the calculation of non-UK workdays in the apportionment – depending on the contractual provisions and whether the holiday is attributable to the UK or overseas employment.

In Example 2, if in June Mrs P took 10 days holiday in India – in the absence of contractual provisions setting out how holiday accrues, these would be added to the 5 days working in India:

Salary $£8333.33 \times 15/365 \times £100,000$

amount attributable to non-UK workdays = £4109.59

Earnings in the Month on which NIC must be operated = £4223.74

What about part of a day worked in the UK and part overseas?

We operate the practice in SP 5/84 with regard to days spent working partly in the UK and partly outside the UK. That is to say, if a day is substantially worked overseas for the overseas business then it will count as a non-UK work day in the apportionment computation. Where an employee spends a whole day working in the UK but then leaves the country that evening on an overseas business trip, it would be difficult to say as a matter of contract that the employee's emoluments for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the emoluments for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

Records

Employees are required to retain evidence such as travel documents and business diaries to demonstrate how they have calculated non-UK workdays for tax. Where records of "non-UK workdays" for tax have been kept, these may be used as the basis for identifying non-UK days for National Insurance.

45.8 ROW: Class 2 NIC

Reg. 145(1)(c) (d) SSCR provide that the requirements are:

- (c) as respects entitlement of a self-employed earner to pay Class 2 contributions, that that earner is present in Great Britain or Northern Ireland (as the case may be) in the contribution week for which the contribution is to be paid;
- (d) as respects liability of a self-employed earner to pay Class 2 contributions, that the self-employed earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be), or, if he is not so ordinarily resident, that before the period in respect of which any such contributions are to be paid he has been resident in Great Britain [or Northern Ireland]¹⁴ (as the case may be) for a period of at least 26 out of the immediately preceding 52 contribution weeks under the Act, the Social Security Act 1975 or the National Insurance Act 1965 or under some or all of those Acts.

Thus there are two possible connecting factors and if either is present, Class 2 NIC is due:

- (1) ordinary residence in UK;
- (2) residence for 26 out of 52 contribution weeks.

¹⁴ These words are omitted (presumably accidentally) from the SSCR but the context requires them.

45.9 ROW: Class 3 NIC

Reg. 145(1)(e) SSCR provides that the requirement is:

as respects entitlement of a person to pay Class 3 contributions in respect of any year, either that—

- (i) that person is resident in Great Britain or Northern Ireland (as the case may be) throughout the year,
- (ii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and has been or is liable to pay Class 1 or Class 2 contributions in respect of an earlier period during that year,
- (iii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and was either ordinarily resident in Great Britain or Northern Ireland (as the case may be) throughout the whole of that year or became ordinarily resident during the course of it, or
- (iv) that person not being ordinarily resident in Great Britain or Northern Ireland (as the case may be), has arrived in that year or the previous year and has been continuously present in Great Britain or Northern Ireland (as the case may be) for 26 complete contribution weeks, entitlement where the arrival has been in the previous year arising in respect only of the next year.

45.10 Place of business in UK

Tax Bulletin 49 provides:

Place of business in UK

We would normally accept as a strong indication that there is a place of business in the UK if a company is registered under the Companies Act 1985.¹⁵ But whether there is a place of business in the UK is a question of fact based on the individual case. Case law has shown that a company establishes a place of business in the UK if it carries on part of its business here. Such business activity need not be either a substantial part of, or more than incidental to, its main objects (*South India Shipping Corporation v Export-Import Bank of Korea* [1985] 2 AER

15 [Author's Note] Regulations made under s.1043 Companies Act 2006 impose a registration duty on a foreign incorporated company which establishes a place of business in GB; Northern Ireland has equivalent legislation.

219). However there must be a more or less permanent location, not necessarily owned or leased by the company but associated with the company, from which its business is conducted habitually or with some degree of regularity (*Re Oriel* [1985] 3 AER 216). In Canadian law the premises of a group company are not sufficient in themselves to be a place of business for another group member (*Imperial Oil v Oil Workers International* 69 WWR 702).

We would not seek to claim in isolation that there is a place of business where the overseas provider legally, and in exchange for a payment commensurate with the service, sub-contracts services to a UK business.¹⁶

45.11 Residence and ordinary residence

The NIC legislation does not define residence or ordinary residence. For residence, the NI Manual states:

29009 DL Conditions of domicile or residence [February 2006]

You should operate Residence Manual¹⁷ guidance in deciding whether a person is domiciled or resident. Any difficulties on residence should be submitted to CNR [Centre for Non-Residents].

So the IT rules are applied.

For ordinary residence, the NI Manual states:

33032 Special Cases: ROW – Meaning of "ordinarily resident" – Factors to consider [February 2006]

... In considering whether a person is "ordinarily resident", you should:

- take into account the following factors
- in order to build up an overall picture of the person's position.

Factor

1. Will the person be returning to Great Britain or Northern Ireland during the period of employment abroad?

Indication

Yes – indicates ordinary residence continues during the period(s) abroad, especially the more frequent or longer the return visits.

No – indicates the person ceasing to be ordinarily resident.

¹⁶ This has been flagged as no longer current, however the author is not currently aware of this passage being moved elsewhere.

¹⁷ This is presumably a reference to the former Residence Guide now replaced by the RDR Manual.

2. What will be the purpose(s) of the return visit(s)?

Visit(s):

to see family who have remained at the person's home in Great Britain or Northern Ireland; and/or as holidays spent at the home, indicate ordinary residence.

If the visit(s) is in connection with the employment abroad, for instance, training, this is not such a strong indication of ordinary residence.

3. Will the person's family – spouse/partner and/or children – be going abroad as well?

Yes – indicates that the person is no longer ordinarily resident, especially if they do not maintain a home in Great Britain or Northern Ireland (see factor 4).

No – indicates ordinary residence continuing during period(s) abroad.

4. Will the person retain a home in Great Britain or Northern Ireland during their period abroad?

Yes – indicates ordinary residence continuing during period(s) abroad.

No – indicates that the person is less likely to remain ordinarily resident.

5. If the person retains a home, will it be available for their use when they return?

Yes – indicates ordinary residence continuing during period(s) abroad.

No – because, for instance, it is let on a long lease, then it is less likely that the person will remain ordinarily resident.

6. Will the person be returning to Great Britain or Northern Ireland at the end of the period abroad?

Yes – indicates ordinary residence continuing during period(s) abroad.

No – indicates that the person is no longer ordinarily resident, especially if they do not retain a home in Great Britain or Northern Ireland during their absence abroad (see factor 4 above).

7. How long has the person lived in Great Britain or Northern Ireland?

The longer the period, the stronger the indication that the person is ordinarily resident.

For guidance on the definition of “ordinarily resident” for tax purposes, see the Residence Manual.

The seven factors are unhelpful, first as no guidance is given how to deal

with the practical problems when different factors point in different directions, and secondly because the reader who turns (as directed) to the Residence Manual or its successor, HMRC 6, will find completely different guidance. Ordinary IT principles should be applied.

45.12 The EU Regulation

The position within the EU is governed by Regulation 883/2004 of 29 April 2004 on the coordination of social security systems. EU regulations do not have short titles (which were introduced in the UK in 1845) so this is here called “Regulation 883/04”.

This chapter considers the position from 1 May 2010. Before then the position was governed by regulation 1408/71. I do not discuss the transitional rules.

HMRC have published guidance (“**NIC guidance**”).¹⁸

The regulation covers social security benefits but this chapter only considers the NIC aspects. The NIC guidance provides:

Where under the EU Regulations the UK’s social security legislation applies, the employee and employer (or person treated as the employer) must pay UK Class 1 National Insurance contributions (and the employer pays Class 1A National Insurance on certain UK taxable benefits and Class 1B National Insurance where there is a PAYE Settlement Agreement.) All the earnings are treated as arising from activity in the UK.

Where, under the EU rules, the social security legislation of another Member State applies then no UK National Insurance is due.

45.13 Persons covered by Regulation 883/04

Article 2 Regulation 883/04 provides:

1. This Regulation shall apply to
 - [1] nationals of a Member State,
 - [2] stateless persons and refugees residing in a Member State who are or have been subject to the legislation of one or more Member States,

¹⁸ www.hmrc.gov.uk/nic/work/new-rules.htm

[3] as well as to the members of their families and to their survivors.¹⁹

NIC guidance provides:

The new EU Regulations apply to nationals of the EU Member States. They also apply to stateless persons and refugees residing in a Member State, members of their families and survivors if those people have previously been subject to the legislation of a Member State.

From 1 June 2012 883/2004 will apply to Norway, Iceland and Liechtenstein.

The UK has also opted out of applying the new EU rules to third country nationals legally resident in a Member State and will continue to apply the old rules.

45.13.1 Persons within Regulation 1408/71

The NIC guidance provides:

In the UK, the old EU rules in 1408/71 are being kept for third country nationals legally resident in a Member State. This is because the UK has chosen to opt out of laws extending the new regulations to third country nationals.

Example (Hank)

H is a US national who has lived and worked in the UK for ten years and pays Class 1 National Insurance. The UK Border Agency has agreed he can live and work legally in the UK. His UK employer Big Bank posts H to the Frankfurt office for six months. Because he is a US national legally resident in the UK, the new rules do not apply to H. H continues to be subject to the old rules. Big Bank should apply to HMRC Residency for a Form E101 for H and he remains subject to UK National Insurance in Frankfurt. He is exempt from German contributions.

This has made the position much more complicated. The old rules are not discussed here but I hope to cover them in a future edition.

¹⁹ In the UK, NICs (other than the voluntary Class 3 NIC) are only paid by employed or self-employed, so the reference to “members of their families and their survivors” is irrelevant for NIC, though it may be relevant for other purposes governed by the regulation.

45.13.2 *Forms*

The NIC guidance provides:

The EU Regulations provide for a system of forms so that employers and employees can demonstrate that they are entitled to operate the legislation of one Member State and be exempt contributions under the legislation of another. Under the old EU Regulations this was the E101 Form. Under the new EU Regulations the E101 will be replaced by Form A1.

For employees coming to the UK from the other Member States, you should operate National Insurance contributions from the start of the employment unless you hold a valid E101 (or from 1 May 2010 Form A1 or an E101) showing that they are exempt National Insurance in the UK and subject to the legislation of another Member State.

For employees going to work in another Member State, you should apply to HM Revenue & Customs (HMRC) NIC&EO to find out whether the employee should remain in UK National Insurance and you can be issued Form E101 (or Form A1 after 1 May 2010). As long as the UK's legislation continues to apply, you should continue to operate employer and employee National Insurance rather than the contributions of the other Member State.

45.14 **EEA: Tie-breaker rules**

Article 11.1 sets out the principle of a tie-breaker rule:

1. Persons to whom this Regulation applies shall be subject to the legislation of a single Member State only. Such legislation shall be determined in accordance with this Title.

45.14.1 *Place of employment rule*

Article 11.3 Regulation 883/04 provides a place of employment rule for employees and self-employed:

3. Subject to Articles 12 to 16:
 - (a) a person pursuing an activity as an employed or self-employed person in a Member State shall be subject to the legislation of that Member State;

The key phrase “pursuing an activity” is defined in article 11.2:

2. For the purposes of this Title, persons receiving cash benefits because or as a consequence of their activity as an employed or self-employed person shall be considered to be pursuing the said activity. This shall not apply to invalidity, old-age or survivors’ pensions or to pensions in respect of accidents at work or occupational diseases or to sickness benefits in cash covering treatment for an unlimited period.

Article 11.3 continues with some more specialist rules:

- (b) a civil servant shall be subject to the legislation of the Member State to which the administration employing him/her is subject;...
- (d) a person called up or recalled for service in the armed forces or for civilian service in a Member State shall be subject to the legislation of that Member State;
- (e) any other person to whom subparagraphs (a) to (d) do not apply shall be subject to the legislation of the Member State of residence,²⁰ without prejudice to other provisions of this Regulation guaranteeing him/her benefits under the legislation of one or more other Member States.

45.14.2 *Year abroad rule for employees*

Article 12 Regulation 883/04 provides a rough equivalent of the year abroad rule for employees:

1. A person who pursues an activity as an employed person in a Member State on behalf of an employer which normally carries out its activities there and who is posted by that employer to another Member State to perform work on that employer’s behalf shall continue to be subject to the legislation of the first Member State, provided that the anticipated duration of such work does not exceed 24 months and that he/she is not sent to replace another person.
2. A person who normally pursues an activity as a self-employed person in a Member State who goes to pursue a similar activity in another Member State shall continue to be subject to the legislation of the first

²⁰ Art.1(j) provides: “‘residence’ means the place where a person habitually resides.”

Member State, provided that the anticipated duration of such activity does not exceed 24 months.

45.14.3 *Two places of employment*

The place of employment rule cannot act as a tie-breaker if there are two places of employment. In this case Art.13 Regulation 883/04 provides:

1. A person who normally pursues an activity as an employed person in two or more Member States shall be subject to:
 - (a) the legislation of the Member State of residence if he/she pursues a substantial part of his/her activity in that Member State or if he/she is employed by various undertakings or various employers whose registered office or place of business is in different Member States, or
 - (b) the legislation of the Member State in which the registered office or place of business of the undertaking or employer employing him/her is situated, if he/she does not pursue a substantial part of his/her activities in the Member State of residence....

What is “substantial”? NIC guidance provides:

When determining whether a substantial part of the activity of an employed person is pursued in a Member State HMRC will take into account:

- the working time and/or
- the remuneration

If less than 25 per cent of the person’s working time is carried out in the UK and/or less than 25 per cent of the person’s remuneration is earned in the UK this will be an indicator that a substantial part of all the activities of the worker is not pursued in the UK. Other criteria may also be taken into account. HMRC may look at the past but must also look at the position in the next 12 months. This will allow HMRC to take account of changing circumstances.

Regulation 883/04 continues with further tie-breakers:

3. A person who normally pursues an activity as an employed person and an activity as a self-employed person in different Member States shall be subject to the legislation of the Member State in which he/she

pursues an activity as an employed person or, if he/she pursues such an activity in two or more Member States, to the legislation determined in accordance with paragraph 1.

4. A person who is employed as a civil servant by one Member State and who pursues an activity as an employed person and/or as a self-employed person in one or more other Member States shall be subject to the legislation of the Member State to which the administration employing him/her is subject.

5. Persons referred to in paragraphs 1 to 4 shall be treated, for the purposes of the legislation determined in accordance with these provisions, as though they were pursuing all their activities as employed or self-employed persons and were receiving all their income in the Member State concerned.

45.15 EEA: Self-employed rules

45.15.1 Year abroad rule for self-employed

Article 13.2 Regulation 883/04 provides a year abroad rule for the self-employed:

2. A person who normally pursues an activity as a self-employed person in two or more Member States shall be subject to:

- (a) the legislation of the Member State of residence if he/she pursues a substantial part of his/her activity in that Member State; or
- (b) the legislation of the Member State in which the centre of interest of his/her activities is situated, if he/she does not reside in one of the Member States in which he/she pursues a substantial part of his/her activity.

45.16 Special cases by agreement

Article 16.1 provides:

1. Two or more Member States, the competent authorities of these Member States or the bodies designated by these authorities may by common agreement provide for exceptions to Articles 11 to 15 in the interest of certain persons or categories of persons.

45.17 Class 4 contributions

Section 15 SSCBA provides:

- (1) Class 4 contributions shall be payable for any tax year in respect of all profits which—
 - (a) are immediately derived from the carrying on or exercise of one or more trades, professions or vocations,
 - (b) are profits chargeable to income tax under Chapter 2 of Part 2 of the Income Tax (Trading and Other Income) Act 2005 for the year of assessment corresponding to that tax year and
 - (c) are not profits of a trade, profession or vocation carried on wholly outside the UK.
- (2) Class 4 contributions in respect of profits shall be payable—
 - (a) in the same manner as any income tax which is, or would be, chargeable in respect of those profits (whether or not income tax in fact falls to be paid), and
 - (b) by the person on whom the income tax is (or would be) charged, in accordance with assessments made from time to time under the Income Tax Acts.
- (3A) Where income tax is (or would be) charged on a member of a limited liability partnership in respect of profits arising from the carrying on of a trade or profession by the limited liability partnership, Class 4 contributions shall be payable by him if they would be payable were the trade or profession carried on in partnership by the members. ...
- (5) For the purposes of this section the year of assessment which corresponds to a tax year is the year of assessment (within the meaning of the Tax Acts) which consists of the same period as that tax year.

A trade carried on wholly outside the UK is exempt from class 4 NIC. This is almost impossible for a sole trader, though it may be possible for a partnership.²¹ But in such a case the self-employed earner would not be employed in the UK, and so would be exempt anyway.

What about unremitted trading profits of a remittance basis taxpayer? The word “chargeable” is ambiguous in that although all trading profits are strictly chargeable under part 2 ITTOIA, the context may show that unremitted profits of a remittance basis taxpayer, (un)taxed on the

²¹ See 15.3 (Trading income of UK resident).

remittance basis, do not count as “chargeable”.²² It is considered that that is the case here, so a remittance basis taxpayer pays class 4 NIC on taxable (remitted) profits only. That is consistent with the general scheme of the remittance basis.

45.18 Partnerships

Para 4 Sch 2 SSCBA provides:

(1) Where a trade or profession is carried on by two or more persons jointly, the liability of any one of them in respect of Class 4 contributions shall arise in respect of his share of the profits of that trade or profession (so far as immediately derived by him from carrying it on); and for this purpose his share shall be aggregated with his share of the profits of any other trade, profession or vocation (so far as immediately derived by him from carrying it on or exercising it).

(2) Where sub-paragraph (1) above applies, the Class 4 contributions for which a person is liable in respect of the profits of the trade or profession carried on jointly (aggregated, where appropriate, as mentioned in that sub-paragraph) shall be charged on him separately.

²² See 9.11 (Nature of charge on remitted RFI).

CHAPTER FORTY SIX

CAPITAL GAINS OF UK RESIDENTS

46.1 Territorial scope of CGT

46.1.1 “Chargeable” gains

Section 15(2) TCGA provides:

Every gain shall, except as otherwise expressly provided, be a chargeable gain.

The expression “chargeable” gain is a label which brings in an uncountable number of rules, for the usual drafting technique to provide an exemption is to provide that gains of the specified nature are not chargeable. However, the term “chargeable” gain does not bring in a territorial limitation. Gains are in principle “chargeable” gains regardless of residence or domicile of the person to whom the gains accrue.

46.1.2 Territorial scope of CGT

Section 2(1) TCGA provides:

[1] Subject to any exceptions provided by this Act, and without prejudice to sections 10 and 276,

[2] a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment

[a] during any part of which he is resident in the UK, or

[b] during which he is ordinarily resident in the UK.

This provision refers to a “person” and so applies to individuals and trustees, PRs and companies (but companies are taken out of the scope of CGT by s.4 CTA 2009).

In principle, therefore, a person who is neither resident nor ordinarily

resident in the UK during a tax year is not chargeable to CGT. The expression “neither resident nor ordinarily resident” is clumsy and the case of someone who is ordinarily resident but not resident is very rare, maybe wholly theoretical. I generally abbreviate the expression to “non-resident” and leave “and not ordinarily resident” to be understood.

A non-resident person is in principle outside the scope of CGT regardless of domicile and regardless of the situs of the asset disposed of. (By contrast income tax is charged on UK source income, and IHT is charged on UK situate property, regardless of the residence or domicile of the individual.)

Section 2[1] TCGA refers to two exceptions to the general rule:

- (1) A non-resident trader with a UK branch or agency.¹
- (2) Exploration and exploitation assets on the continental shelf (not discussed in this book).

A third, important, exception concerns temporary non-residents.²

A fourth exception concerns the proposed CGT charge on residential property held by non-resident non-natural persons.³

It follows that an individual (wherever domiciled) can in principle avoid CGT if they dispose of an asset in the tax year before they acquire the status of UK resident or ordinarily resident – or if they postpone the disposal until the tax year after they have lost that status. A simple form of CGT planning for an individual whose stay in the UK is a short-term one is not to dispose of assets giving rise to chargeable gains while UK resident.⁴

On years of arrival and departure see 6.16 (CGT statutory split year principle).

46.2 CGT remittance basis

Section 12 TCGA provides:

-
- 1 See 46.8 (Non-resident trader with UK branch).
 - 2 See 8.1 (Temporary non-residence). This is not technically an exception to the general rule, as the legislation does not impose CGT on gains accruing to a non-resident. It deems the gains to accrue later when the individual is resident. But it comes to the same thing.
 - 3 See 70.4 (Home held by non-resident non-natural person: proposed CGT).
 - 4 See 6.20 (CGT planning – postponing disposals until non-resident).

- (1) This section applies to foreign chargeable gains accruing to an individual in a tax year (“the foreign chargeable gains”) if—
 - (a) s. 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
 - (b) the individual is not domiciled in the UK in that year.
- (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
- (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year.
- (4) In this section “foreign chargeable gains” means chargeable gains accruing from the disposal of an asset which is situated outside the UK.
- (5) See Chapter A1 of Part 14 of ITA 2007 for the meaning of “remitted to the UK” etc.

The use of the word “individual” means that trustees and personal representatives do not qualify for the remittance basis.

The CGT remittance basis applies only to foreign domiciled individuals. (By contrast, the IT remittance basis also applies to individuals who are resident but not ordinarily resident.)

The CGT remittance basis applies to foreign situate assets.⁵ By contrast, the RFI remittance basis applies to foreign source income, which is a different concept.)⁶

What is the position if an individual changes domicile during a tax year? It might be logical if gains accruing during the non-domiciled part of the year qualify for the remittance basis but it is not possible to read s.12(1)(b) to give that result. It is considered that the remittance basis is not available.⁷ But in practice perhaps this rarely happens.⁸

See too 10.24 (CGT disposal not for market value).

46.2.1 *Date of disposal under remittance basis*

The gain is treated as accruing in the tax year of remittance. By

⁵ See 78.1 (Situs of assets for CGT).

⁶ In international tax law, gains are often said to have a source, which may be taken to be the state where the assets are situate. The UK taxes acts do not use the word source in connection with gains.

⁷ See 6.2.1 (“Residing in the UK in a tax year” and “for a tax year”).

⁸ See 6.24 (Year of acquisition of UK domicile).

implication the gain is to be treated as not accruing on the date of the actual disposal, when it actually accrues. This is relevant to EIS reinvestment relief. The time limits for EIS relief depend on the time that the gain accrued (not the time that the disposal takes place).⁹

The time limits for rollover relief depend on the time of disposal.¹⁰ The drafter of the former para 16(4) Schedule A1 TCGA clearly considered that the pre-2008 s.12(1)[e] TCGA altered the time of disposal so that the asset is regarded as disposed of at the time of remittance (not at the time of the actual disposal).¹¹

46.2.2 *2010 CGT rate increase: transitional rules*

The F(No.2) A 2010 increased the CGT rate from 18% to 28% for gains accruing on or after 23 June 2010. Para 20(1) Sch 1 F(no.2)A 2010 provided a transitional rule for gains remitted in 2010/11. There is no express transitional rule where a disposal took place before 23 June 2010 and the gains are remitted after 2010/11, eg in 2011/12. The gains are deemed to accrue in the year of remittance so the new rate applies. (The transitional rule was only needed because it would not have been clear when within the tax year 2010/11 remitted gains were deemed to accrue.)

46.3 Interaction of remittance basis and abolition of taper

Para 56 Sch 2 FA 2008 provides:

- (1) The amendments made by para 31(2) and (3) have effect where the intervening year is the tax year 2008-09 or any subsequent tax year.
- (2) The amendments made by paras 41 and 43 have effect where the eligible year is the tax year 2008-09 or any subsequent tax year.
- (3) The other amendments made by paras 23 to 55 have effect in relation to chargeable gains accruing or treated as accruing in the tax year 2008-09 or any subsequent tax year.

The important provision here is para 56(3).¹² This removes taper and

⁹ Para 1 Sch 5B TCGA 1992.

¹⁰ Section 152(3) TCGA 1992.

¹¹ See the 6th edition of this work, para 29.4.

¹² Sub-paras (1) (2) relate to specialist topics, s.56A, 279A and 279B TCGA.

indexation relief on gains on disposals before 2008/09 which are remitted after 2008/09. All computations of unremitted gains made before 2008 will need to be recomputed.

CGT Draft Clauses FAQ provides:

Q. How will the gain be calculated for a non-domiciled individual with overseas assets if the gain arises in this tax year but is remitted next tax year?

A. A gain arising to a non-domiciled individual in the current tax year, 2007-08, will be calculated under the usual rules, and [indexation allowance]¹³ will be available where appropriate. But that gain is chargeable in the next tax year, 2008-09, because the individual remits the gain in that year. No taper relief will be available and the single 18% CGT rate will apply.¹⁴

46.3.1 *Disposals before 2008/09: transitional rules*

Suppose an asset was disposed of before 2008/09 for £300 with an indexed and tapered gain of £100 and an unindexed and untapered gain of £200.

If all the £300 is remitted before 2008/09 then £100 is subject to CGT (at an effective 40% rate).

If all £300 is remitted after 2008/09 then £200 is subject to CGT (at the 18% rate).

What happens if (say) £150 is remitted before 2008/09 then £50 is subject to CGT at the then rate. If the remaining £150 is remitted after 2008/09 what happens? The one thing that is pretty certain is that the drafter did not ask himself this question.

46.4 Liquidation of offshore company

Suppose:

- (1) F (a remittance basis taxpayer) owns non-UK situate shares in a company, and

13 *Sic.* Perhaps the author meant to say “taper relief” but confused that with indexation allowance.

14 Accessible www.hmrc.gov.uk/cgt/faqs-cgt-reform.htm 24 January 2008 [2008] STI 171.

(2) the company is put into liquidation and F receives a distribution from the liquidator of the company.

F is treated as if F had disposed of the shares in consideration of the distribution: s.122 TCGA. The gain is taxable if the liquidator transfers to the shareholder money in the UK. The same applies if the liquidator transfers assets (land or chattels) enjoyed *in specie* here. It should normally be possible to avoid this.

46.5 CGT planning: making UK situate property non-UK situate

46.5.1 *Moveable assets in UK*

Moveable assets could in principle be moved offshore prior to a disposal. Consider whether an export licence is needed.

46.5.2 *Unincorporated UK business carried on by foreign domiciliary*

A business could be transferred to a foreign incorporated company under s.162 TCGA and shares later sold. Watch stamp duty. Even if the company were subsequently to become non-resident on emigration of shareholder/directors, no tax would arise except on growth in value since transfer to the company.

46.5.3 *Debts*

There are two ways to deal with a UK situate debt on a security. It may be possible to make the asset non-UK situate. It might be possible to make the asset a simple debt (not a debt on a security) so it falls within the relief given by s.251 TCGA. It is important to do this by varying the existing debt, and not by ending the existing debt and creating a new one.¹⁵

46.6 Structure for holding UK company

It is not ideal for a foreign domiciled individual to hold a UK incorporated company directly, as a disposal of that asset would give rise to CGT. If

¹⁵ See *Chitty on Contracts*, (29th ed, 2008) para 22-028 (Substituted contract).

the foreign domiciliary does not want to go to the trouble and expense of using an offshore trust, what is the alternative? One possibility is to use a foreign incorporated UK resident company. The shares in the company will not be UK situate for CGT.¹⁶ A possible drawback is that s.720 ITA may apply unless the motive defence can be used.¹⁷ This may in fact be an advantage, because it allows distributions from the company to be made tax free. Thus the shareholder may be taxed as a sole trader but without NICs. However, if profits are to be retained in the company it is a disadvantage.

A possibility is to hold the UK incorporated and resident trading company in a UK resident but foreign incorporated holding company:

The income of the UK incorporated company will not be within the scope of s.720. The use of a holding company will not restrict small companies relief provided that it does not carry on a business. With a little care it can be arranged that a holding company does not carry on a business.¹⁸

16 See 78.6 (Registered shares/debentures: non-UK company)

17 See 27.4.1 (Foreign incorporated company) and 31.34 (Transfer to UK resident foreign incorporated company).

18 SP 5/94 provides:

(20 July 1994) Associated companies for small profits relief and corporation tax starting rate: holding companies

Under TA 1988 s 13(4), a company which does not carry on any trade or business in an accounting period is disregarded in calculating the profits limits for the small profits relief of any other company with which it is associated.

A holding company which does not carry on a trade, but which holds the shares in one or more companies which are its 51 per cent subsidiaries, may or may not be carrying on a business in respect of that holding. The Revenue's view is that a company is not carrying on such a business in an accounting period if, throughout that period, all of the following apply—

- it has no assets other than shares in companies which are its 51 per cent

46.7 UK resident trust

A UK resident trust is in principle subject to CGT even if the settlor is a foreign domiciliary. One might avoid this problem for the future by exporting the trust (appointing non-resident trustees) but there may in principle be a migration charge.¹⁹ This applies even if the assets are not situated in the UK. The remittance basis does not apply as that only applies to “individuals”; trustees are not individuals.

One solution may be to transfer assets from the trust to foreign domiciled beneficiaries absolutely. Although this involves a disposal by the trustees, it may be possible to claim CGT hold-over relief. The relief applies on a disposition to a UK resident foreign domiciled beneficiary, even though that beneficiary may later be able to dispose of the asset without a CGT charge.

46.8 Non-resident trade with UK branch

Section 10 TCGA provides:

(1) Subject to any exceptions provided by this Act, a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment in which he is not resident and not ordinarily resident in the UK but is carrying on a trade in the UK through a branch or agency, and shall be so chargeable on chargeable gains accruing on the disposal—

- (a) of assets situated in the UK and used in or for the purposes of the trade at or before the time when the capital gain accrued, or
- (b) of assets situated in the UK and used or held for the purposes of the branch or agency at or before that time, or assets acquired for use by or for the purposes of the branch or agency.

(2) Subsection (1) above does not apply unless the disposal is made at

subsidiaries; and

- it is not entitled to a deduction, as charges or management expenses, in respect of any outgoings; and
- it has no income or gains other than dividends which it has distributed in full to its shareholders and which are, or could be, franked investment income received by that company (TA 1988 s 832(1), (4A)); and
- the 51 per cent subsidiaries are 51 per cent subsidiaries under TA 1988 s 247(8), (8A) and (9A), 13ZA(1)–(4).

¹⁹ See 7.5 (Liability of trustees for exit charge)

a time when the person is carrying on the trade in the UK through a branch or agency.

...

(5) This section shall apply as if references in subsections (1) and (2) above to a trade included references to a profession or vocation, but subsection (1) shall not apply in respect of chargeable gains accruing on the disposal of assets only used in or for the purposes of the profession or vocation before 14th March 1989 or only used or held for the purposes of the branch or agency before that date.

46.9 CGT treaty relief

Article 13(5) OECD Model provides the general rule that tax on gains depends on treaty-residence:

Gains from the alienation of any property, other than that referred to in paragraphs 1, 2, 3 and 4, shall be taxable only in the Contracting State of which the alienator is a resident.

The four exceptions are fairly narrow:

1. Gains derived by a resident of a Contracting State from the alienation of immovable property referred to in Article 6 and situated in the other Contracting State may be taxed in that other State.
2. Gains from the alienation of movable property forming part of the business property of a permanent establishment which an enterprise of a Contracting State has in the other Contracting State, including such gains from the alienation of such a permanent establishment (alone or with the whole enterprise), may be taxed in that other State.
3. Gains from the alienation of ships or aircraft operated in international traffic, boats engaged in inland waterways transport or movable property pertaining to the operation of such ships, aircraft or boats, shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.
4. Gains derived by a resident of a Contracting State from the alienation of shares deriving more than 50 per cent of their value directly or indirectly from immovable property situated in the other Contracting State may be taxed in that other State.

The Supreme Court of Appeal of South Africa has held that “alienation” includes a deemed disposal:

[24] Article 13 is widely cast. It includes within its ambit capital gains derived from the alienation of all property. It is reasonable to suppose that the parties to the DTA were aware of the provisions of the Eighth Schedule and must have intended Art 13 to apply to capital gains of the kind provided in the Schedule. It is of significance that no distinction is drawn in Art 13(4) between capital gains that arise from actual or deemed alienations of property. There is moreover no reason in principle why the parties to the DTA would have intended that Art 13 should apply only to taxes on actual capital gains resulting from actual alienations of property.

[25] Having regard to the factors mentioned, I am of the view that the term ‘alienation’ as it is used in the DTA is not restricted to actual alienation. It is a neutral term having a broader meaning, comprehending both actual and deemed disposals of assets giving rise to taxable capital gains.²⁰

The same point should apply in the UK.

46.9.1 *Taxes covered*

The OECD Commentary provides:

3. ... The Article does not specify to what kind of tax it applies. It is understood that the Article must apply to all kinds of taxes levied by a Contracting State on capital gains. The wording of Article 2 is large enough to achieve this aim and to include also special taxes on capital gains.

4. It is normal to give the right to tax capital gains on a property of a given kind to the State which under the Convention is entitled to tax both the property and the income derived therefrom. The right to tax a gain from the alienation of a business asset must be given to the same State without regard to the question whether such gain is a capital gain or a business profit. Accordingly, no distinction between capital gains and commercial profits is made nor is it necessary to have special provisions as to whether the Article on capital gains or Article 7 on the taxation of business profits should apply. It is however left to the domestic law of the taxing State to decide whether a tax on capital gains or on ordinary income must be levied. The Convention does not

²⁰ *Commissioner for the South African Revenue Service v Tradehold Ltd* [2012] ZASCA 61, 14 ITEL 967

prejudge this question.

46.9.2 “Gain” and “alienation”

The OECD Commentary provides:

5. The Article does not give a detailed definition of capital gains. This is not necessary for the reasons mentioned above. The words “alienation of property” are used to cover in particular capital gains resulting from the sale or exchange of property and also from a partial alienation, the expropriation, the transfer to a company in exchange for stock, the sale of a right, the gift and even the passing of property on death.

6. Most States taxing capital gains do so when an alienation of capital assets takes place. Some of them, however, tax only so-called realised capital gains. Under certain circumstances, though there is an alienation no realised capital gain is recognised for tax purposes (e.g. when the alienation proceeds are used for acquiring new assets). Whether or not there is a realisation has to be determined according to the applicable domestic tax law. No particular problems arise when the State which has the right to tax does not exercise it at the time the alienation takes place.

7. As a rule, appreciation in value not associated with the alienation of a capital asset is not taxed, since, as long as the owner still holds the asset in question, the capital gain exists only on paper. There are, however, tax laws under which capital appreciation and revaluation of business assets are taxed even if there is no alienation.

8. Special circumstances may lead to the taxation of the capital appreciation of an asset that has not been alienated. This may be the case if the value of a capital asset has increased in such a manner that the owner proceeds to the revaluation of this asset in his books. Such revaluation of assets in the books may also occur in the case of a depreciation of the national currency. A number of States levy special taxes on such book profits, amounts put into reserve, an increase in the paid-up capital and other revaluations resulting from the adjustment of the book-value to the intrinsic value of a capital asset. These taxes on capital appreciation (increment taxes) are covered by the Convention according to Article 2.

9. Where capital appreciation and revaluation of business assets are taxed, the same principle should, as a rule, apply as in the case of the alienation of such assets. It has not been found necessary to mention such cases expressly in the Article or to lay down special rules. The provisions of the Article as well as those of Articles 6, 7 and 21, seem to be sufficient. As a rule, the right to tax is conferred by the above-mentioned provisions on the State of which the alienator is a resident, except that in the cases of immovable property or of movable property forming part of the business property of a permanent establishment, the prior right to tax belongs to the State where such property is situated. Special attention must be drawn, however, to the cases dealt with in paragraphs 13 to 17 below.

10. In some States the transfer of an asset from a permanent establishment situated in the territory of such State to a permanent establishment or the head office of the same enterprise situated in another State is assimilated to an alienation of property. The Article does not prevent these States from taxing profits or gains deemed to arise in connection with such a transfer, provided, however, that such taxation is in accordance with Article 7.

11. The Article does not distinguish as to the origin of the capital gain. Therefore all capital gains, those accruing over a long term, parallel to a steady improvement in economic conditions, as well as those accruing in a very short period (speculative gains) are covered. Also capital gains which are due to depreciation of the national currency are covered. It is, of course, left to each State to decide whether or not such gains should be taxed.

12. The Article does not specify how to compute a capital gain, this being left to the domestic law applicable. As a rule, capital gains are calculated by deducting the cost from the selling price. To arrive at cost all expenses incidental to the purchase and all expenditure for improvements are added to the purchase price. In some cases the cost after deduction of the depreciation allowances already given is taken into account. Some tax laws prescribe another base instead of cost, e.g. the value previously reported by the alienator of the asset for capital tax purposes.

13. Special problems may arise when the basis for the taxation of capital gains is not uniform in the two Contracting States. The capital gain from the alienation of an asset computed in one State according to the rules mentioned in paragraph 12 above, may not necessarily coincide with the capital gain computed in the other State under the accounting rules used there. This may occur when one State has the right to tax capital gains because it is the State of situs while the other State has the right to tax because the enterprise is a resident of that other State.

14. The following example may illustrate this problem: an enterprise of State A bought immovable property situated in State B. The enterprise may have entered depreciation allowances in the books kept in State A. If such immovable property is sold at a price which is above cost, a capital gain may be realised and, in addition, the depreciation allowances granted earlier may be recovered. State B, in which the immovable property is situated and where no books are kept, does not have to take into account, when taxing the income from the immovable property, the depreciation allowances booked in State A. Neither can State B substitute the value of the immovable property shown in the books kept in State A for the cost at the time of the alienation. State B cannot, therefore, tax the depreciation allowances realised in addition to the capital gain as mentioned in paragraph 12 above.

15. On the other hand, State A of which the alienator is a resident, cannot be obliged in all cases to exempt such book profits fully from its taxes under paragraph 1 of the Article and Article 23 A (there will be hardly any problems for States applying the tax credit method). To the extent that such book profits are due to the realisation of the depreciation allowances previously claimed in State A and which had reduced the income or profits taxable in such State A, that State cannot be prevented from taxing such book profits. The situation corresponds to that dealt with in paragraph 44 of the Commentary on Article

23A.

16. Further problems may arise in connection with profits due to changes of the rate of exchange between the currencies of State A and State B. After the devaluation of the currency of State A, enterprises of such State A may, or may have to, increase the book value of the assets situated outside the territory of State A. Apart from any devaluation of the currency of a State, the usual fluctuations of the rate of exchange may give rise to so-called currency gains or losses. Take for example an enterprise of State A having bought and sold immovable property situated in State B. If the cost and the selling price, both expressed in the currency of State B, are equal, there will be no capital gain in State B. When the value of the currency of State B has risen between the purchase and the sale of the asset in relation to the currency of State A, in the currency of that State a profit will accrue to such enterprise. If the value of the currency of State B has fallen in the meantime, the alienator will sustain a loss which will not be recognised in State B. Such currency gains or losses may also arise in connection with claims and debts contracted in a foreign currency. If the balance sheet of a permanent establishment situated in State B of an enterprise of State A shows claims and debts expressed in the currency of State B, the books of the permanent establishment do not show any gain or loss when repayments are made. Changes of the rate of exchange may be reflected, however, in the accounts of the head office. If the value of the currency of State B has risen (fallen) between the time the claim has originated and its repayment, the enterprise, as a whole, will realise a gain (sustain a loss). This is true also with respect to debts if between the time they have originated and their repayment, the currency of State B has fallen (risen) in value.

17. The provisions of the Article do not settle all questions regarding the taxation of such currency gains. Such gains are in most cases not connected with an alienation of the asset; they may often not even be determined in the State on which the right to tax capital gains is conferred by the Article. Accordingly, the question, as a rule, is not whether the State in which a permanent establishment is situated has a right to tax, but whether the State of which the taxpayer is a resident must, if applying the exemption method, refrain from taxing such currency gains which, in many cases, cannot be shown but in the books kept in the head office. The answer to that latter question depends not only on the Article but also on Article 7 and on Article 23 A. If in a given case differing opinions of two States should result in an actual double taxation, the case should be settled under the mutual agreement procedure provided for by Article 25.

18. Moreover the question arises which Article should apply when there is paid for property sold an annuity during the lifetime of the alienator and not a fixed price. Are such annuity payments, as far as they exceed costs, to be dealt with as a gain from the alienation of the property or as "income not dealt with" according to Article 21? Both opinions may be supported by arguments of equivalent weight, and it seems difficult to give one rule on the matter. In addition such problems are rare in practice, so it therefore seems unnecessary to establish a rule for insertion in the Convention. It may be left to Contracting States who may be involved in such a question to adopt a solution in the mutual agreement procedure provided for by Article 25.

19. The Article is not intended to apply to prizes in a lottery or to premiums and prizes attaching to bonds or debentures.

31. If shares are sold by a shareholder to the issuing company in connection with the liquidation of such company or the reduction of its paid-up capital, the difference between the selling price and the par value of the shares may be treated in the State of which the company is a resident as a distribution of accumulated profits and not as a capital gain. The Article does not prevent the State of residence of the company from taxing such distributions at the rates provided for in Article 10: such taxation is permitted because such difference is covered by the definition of the term “dividends” contained in paragraph 3 of Article 10 and interpreted in paragraph 28 of the Commentary relating thereto. The same interpretation may apply if bonds or debentures are redeemed by the debtor at a price which is higher than the par value or the value at which the bonds or debentures have been issued; in such a case, the difference may represent interest and, therefore, be subjected to a limited tax in the State of source of the interest in accordance with Article 11 (cf. also paragraphs 20 and 21 of the Commentary on Article 11).

32. There is a need to distinguish the capital gain that may be derived from the alienation of shares acquired upon the exercise of a stock-option granted to an employee or member of a board of directors from the benefit derived from the stock-option that is covered by Articles 15 or 16. The principles on which that distinction is based are discussed in paragraphs 12.2 to 12.5 of the Commentary on Article 15 and paragraph 3.1 of the Commentary on Article 16.

GAINS OF NON-RESIDENT SETTLOR-INTERESTED TRUSTS: S.86

47.1 CGT on non-resident trusts – Introduction

A trust is in principle treated as a taxable unit.¹ If the trustees are UK resident, they are subject to CGT, even if the beneficiaries have no connection with the UK. Non-resident trustees are not in principle subject to CGT, even if the beneficiaries are resident in the UK.² This rule presents an obvious means of CGT avoidance. HMRC's first answer to this is the anti-avoidance rules in ss.86, 87 TCGA.

In outline:

- (1) A settlor is subject to CGT on gains accruing to a non-resident trust if:
 - (a) The settlor is UK resident and UK domiciled.
 - (b) The settlor has an "interest" in the settlement. (This is widely and artificially defined.)

I refer to this as the **"s.86 charge"** and I refer to the gains treated as accruing to the settlor under this section as **"s.86 gains"**.

- (2) A beneficiary is subject to CGT if:
 - (a) The beneficiary is UK resident.
 - (b) The beneficiary receives a capital payment from the trust.
 - (c) The trust realises gains.

I refer to this as the **"s.87 charge"** or the **"s.87 capital payments basis"** and I refer to the gains treated as accruing to a beneficiary under this section as **"s.87 gains"**. This topic is discussed in the next chapter.

The s.86 charge is the subject of this chapter. Amendments in 1991 and

¹ See 46.1 (Trustees treated as single and distinct person).

² See 46.1 (Territorial scope of CGT).

1998 have created a tangle, with transitional relief for:

- (1) trusts made before 19 March 1991 (“**pre-1991 trusts**”)
- (2) trusts made before 17th March 1998 (“**pre-1998 trusts**”)

I refer to trusts which qualify for these reliefs as “**pre-1991 protected trusts**” and “**pre-1998 protected trusts**”.

Sloppy and repetitive drafting adds to the difficulties.

47.1.1 *Cross references*

The following matters are considered elsewhere:

Para 48.33 (CGT planning aspects of non-resident trusts) draws together some aspects of CGT planning with non-resident trusts in the light of s.86 and 87.

Para 55.9 (DT reliefs: s.86 TCGA).

For losses, see 51.6 (Loss accruing to non-resident trustees) and 51.8 (Personal losses of settlor and s.86 gains).

Where a trust has two settlors, see 76.3 (Two or more settlors of settlor-interested trust: CGT).

47.2 **Fundamental s.86 conditions**

Section 86(1) TCGA sets out eight sets of conditions for s.86 to apply. I refer to these as “**the fundamental s.86 conditions**”. In their statutory order they are:

- (1) Qualifying settlement
- (2) Trustee residence condition
- (3) Settlor residence and domicile condition
- (4) Settlor-interested condition
- (5)-(8) Death/divorce of settlor or certain beneficiaries

It is convenient to consider the settlor-interested condition before the others.

47.3 **Minor definitions**

It is helpful first of all to clear out of the way some (relatively) minor and unsurprising definitions. They are repeated up to five times, in identical words: the repetition is because on each occasion the definitions are expressed to be for the purposes of the paragraph and not for the purposes of the schedule or the Act. I set out the para 9 version and give the

references for the others.

47.3.1 “Settlement” and “settlor”

“Settlement” is not expressly defined so the standard IT/CGT definition applies. Contrast the IT settlor-interested trust rules, and the s.87 rules, where the settlement-arrangement definition applies. It would be bold to plan on the assumption that this will not change.

For “settlor” see 75.3.5 (CGT s.86 definition of settlor).

47.3.2 “Control” and “participator”

Para 9(9) Sch 5 TCGA provides a slightly cut down form of the ultra-wide sense of control:³

For the purposes of sub-paragraph (7) above the question whether a company is controlled by a person or persons shall be construed in accordance with sections 450 and 451 of CTA 2010; but in deciding that question for those purposes no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator in the company.

Paras 2(8), 2A(8) and 8(8) Sch 5 TCGA and s 96(10) TCGA each repeat this definition verbatim.

Participator is relevant to this definition of control. Para 9(10C) sch 5 TCGA provides the standard definition:

In this paragraph ... “participator” has the meaning given by section 454 of CTA 2010.

This is repeated five times: para 2(10), 2A(10), 8(9) and 9(11) sch 5 TCGA and s.96(10) TCGA.

ESC D40 provides:

TCGA 1992 s 86, Sch 5 provide for a charge to capital gains tax on

³ For discussion of the ultra-wide sense of control, see 80.2.2 (Meaning(s) of (“control”).

settlers of certain non- or dual resident trusts arising on trust property which originated from the settlor. Schedule 5 para 8 defines what property originates from the settlor and provides that property put into trust by certain companies is treated as originating from those who control the company in question. Schedule 5 para 9 sets out conditions under which trusts created before 19 March 1991 may fall within the scope of the charge on the settlor, some of which may apply to companies controlled by defined persons.

TCGA 1992 ss 87, 88 charge UK resident beneficiaries to capital gains tax on certain capital payments received from non- or dual resident settlements. Section 96 is concerned with the application of these provisions to capital payments made by companies which are controlled by the trustees and capital payments received by certain non-resident companies.

For the purpose of determining who controls such companies “participator” is defined in TA 1988 s 417(1). In applying the provisions of Sch 5 paras 2A(10), 8, 9(11) and s 96 a beneficiary of the trust, by concession, is not regarded as a participator in the company solely because of his status as beneficiary.

It may be in the interest of a taxpayer to rely on the law rather than this concession. A concession cannot be used to increase the tax burden.

47.3.3 “Associated company”

Para 9(10) Sch 5 TCGA provides a slightly cut down form of the usual wide definition:

For the purposes of sub-paragraph (7) above the question whether one company is associated with another shall be construed in accordance with section 449 of CTA 2010; but where in deciding that question for those purposes it falls to be decided whether a company is controlled by a person or persons, no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator in the company.

Paras 2(9) and 2A(9) Sch 5 TCGA repeat the definition.

47.3.4 “Child” and “grandchild”

Para 9(11) sch 5 TCGA provides:

In this paragraph—
“child” includes a step-child;
“grandchild” means a child of a child;

This is repeated verbatim in para 2A(10).

47.3.5 “Relevant property” and “relevant income”

Para 2(2) Sch 5 TCGA provides:

- (a) relevant property is property originating from the settlor,
- (b) relevant income is income originating from the settlor.

This is repeated (more or less) verbatim in para 9(10D) Sch 5 TCGA.

47.4 Settlor-interested condition

This s.86 condition is in s.86(1)(d):

at any time during the year the settlor has an interest in the settlement;

If a settlement becomes (or ceases to be) settlor-interested during a tax year, s.86 TCGA applies for the whole tax year. This is unlike the IT rules (where if a settlor is excluded s.624 ITTOIA ceases to apply from the date of the exclusion).⁴ There is reason for the distinction, because the s.86 charge is on gains less losses for the entire year, and splitting the year would involve some trouble. The rule does however mean that CGT planning by excluding the settlor must be carried out some time in advance.

47.4.1 “Settlor-interested”

The term “settlor-interested” in a s.86 context⁵ is a label for a complex set of rules.

Para 2 Sch 5 TCGA provides:

⁴ See 26.3.6 (Settlement ceasing to be settlor-interested).

⁵ The same term is used in an IT context with a different meaning: see 26.3.1 (The concepts of “settlor-interested”).

(1) For the purposes of section 86(1)(d) a settlor has an interest in a settlement if—

- (a) any relevant property⁶ which is or may at any time be comprised in the settlement is, or will or may become, applicable for the benefit of or payable to a defined person in any circumstances whatever,
- (b) any relevant income which arises or may arise under the settlement is, or will or may become, applicable for the benefit of or payable to a defined person in any circumstances whatever, or
- (c) any defined person enjoys a benefit directly or indirectly from any relevant property which is comprised in the settlement or any relevant income arising under the settlement;

but this sub-paragraph is subject to sub-paragraphs (4) to (6) and paragraph 2A below.

The key term is “defined person”. Para 2(3) Sch 5 TCGA provides:

For the purposes of sub-paragraph (1) above each of the following is a defined person—

- (a) the settlor,
- (b) the settlor's spouse or civil partner;
- (c) any child of the settlor or of the settlor's spouse or civil partner;
- (d) the spouse or civil partner of any such child;
- (da) any grandchild of the settlor or of the settlor's spouse or civil partner;
- (db) the spouse or civil partner of any such grandchild;
- (e) a company controlled by a person or persons falling within paragraphs (a) to (db) above;
- (f) a company associated with a company falling within paragraph (e) above.

The history has been one of gradual expansion, with the reference to children added in 1991 and paras (da) and (db) - dealing with grandchildren - added in 1998. Thus the definition of settlor-interested is wider than the IT equivalent in s.624, eg the settlor is chargeable on gains accruing to a trust from which their children or grandchildren could benefit even though there is no actual benefit to the settlor.

Para 2(4) Sch 5 TCGA provide exceptions copied from the precedent of

⁶ See 47.3.5 ("Relevant property" and "relevant income").

the IT settlor-interested trust rules; they have no significant application in practice.

The IT settlor-interested rules have a provision that references to spouses do not include separated or potential future spouses.⁷ The CGT settlor-interested rules do not have that rule. The omission raises a number of difficulties.

47.4.2 *Civil partners*

The Civil Partnership Act took effect on 5 December 2005. Before then, civil partners were not expressly excluded in trust drafting, so a trust which merely excluded spouses might become settlor-interested in 2005! HMRC will tactfully overlook that:

For settlements made before 5 December 2005, the settlor may not have been considered to have retained an interest in the settlement for Income Tax purposes, as both the settlor and his spouse were specifically excluded from benefit under the particular terms of the settlement deed. Although such an 'exclusion clause' would not have included a 'civil partner', HMRC will not regard the settlor as retaining an interest unless and until a beneficiary becomes the civil partner of the settlor.⁸

With regards to the provisions of Section 86 TCGA 1992, whereby the gains of a non-resident trust or dual resident trust are chargeable on the settlor. If such provisions did not apply in relation to a settlement made prior to 5 December 2005, and the deed was drafted in such an obvious way as to exclude spouses or future spouses without particular definition of those terms, that exclusion might reasonably be regarded in the context as covering civil partners and those treated as such under CPA who stand in the same position as spouses under the law from 5 December 2005. In such circumstances it will not be HMRC's intention to apply those provisions to a settlement only as a result of the coming into effect of the CPA. For settlements made on or after 5 December 2005, it is expected that the drafting of the settlement deed excludes the full list of 'defined persons' (Schedule 5, Para 2(3) TCGA 1992), including 'civil partners', from benefiting in any circumstances under the settlement, if it is intended for the settlement not to be caught by the

7 See 26.3.4 (Meaning of "spouse/civil partner").

8 For IT, this rule is statutory; see 26.3.4 (Meaning of "spouse/civil partner").

provisions.⁹

This is just a concession and it may be in the interest of beneficiaries to argue that a pre-2005 settlement under which civil partner may benefit should be treated as settlor-interested for CGT purposes.

This problem might be resolved if civil partnerships were abolished and replaced by same-sex marriages, a development which seems likely to happen though, not for tax reasons.

47.4.3 *Potential defined persons*

ICAEW Guidance note on non-resident settlements (TAX 20/92) 14 December 1992 provides:

24 There are a number of further important issues on TCGA 1992 s 86, Sch 5, where it would be helpful for the statement of practice to contain clarification. TCGA 1992 Sch 5 specifies the test as to whether the settlor has an interest. Each of sub-paragraphs 2(1)(a) and (b) uses the words “may...in any circumstances whatever”. Interpreted literally, it appears virtually impossible to define a trust where the settlor does not have an interest, because any beneficiary may become a relative of the settlor as a result of subsequent marriages (or indeed subsequent births if necessary to imagine all conceivable possibilities). ...

Revenue response: If the terms of a settlement are so framed that a clearly defined person can benefit, eg the class of beneficiaries includes “any spouse of the settlor” or “spouses of the settlor’s children”, or such persons could be added to the class of beneficiaries, then the settlor will be treated as having an “interest” in the trust. However, where there is no prima facie possibility of a defined person benefiting, the Revenue will not treat the settlor as having an “interest”, unless the terms of the settlement and the circumstances of the case indicate an intention to benefit a person who is likely to become a defined person in the future, eg a settlement in favour of the fiancé of the settlor or of the settlor’s child.

47.4.4 *Separated spouse*

ICAEW Guidance note on non-resident settlements (TAX 20/92) 14

9 “HMRC Residency: Non-resident trusts” www.hmrc.gov.uk/cnr/nr_trusts.htm.

December 1992 provides:

25 Also on the question of whether a settlor has an interest in a trust, it would be helpful if the statement of practice could confirm that a separated spouse would not be regarded as the settlor's spouse for this purpose.

Revenue response: A separated spouse would be regarded as a spouse for the purposes of these provisions unless, in accordance with existing practice (see para 13(a) Appendix B of the Resident trusts consultative document 19 March 1991)¹⁰ on other provisions having a bearing on “settlor interest” trusts, the separation is permanent.

47.5 Pre-1998 protected trusts

Para 2A(1) TCGA provides:

In determining for the purposes of section 86(1)(d) whether the settlor has an interest at any time during any year of assessment in a settlement created before 17th March 1998, paragraphs (da) and (db) of paragraph 2(3) above, and the reference to those paragraphs in paragraph 2(3)(e), shall be disregarded ...

In short, the relief is that a protected pre-1998 trust (one where the trigger conditions do not apply) is allowed to benefit the settlor's grandchildren without becoming “settlor-interested”.

Para 2A continues:

10 The reference is to the former SP A30 which provided:

“The settlement legislation [now s.624 ITTOIA] includes provisions which may be applied to any settlement where the spouse or any possible future spouse of a settlor may be able to benefit from the income or capital of the settlement in any circumstances whatsoever. In relation to the concept of “possible future spouse” the Board of Inland Revenue have considered the scope of the decision reached in the case of *IRC v Tennant* (24 TC 215) and they take the view that that decision applies -

- (a) where, although a settlor is not at the material time a party to a subsisting marriage, the terms of the settlement are such that a benefit may be conferred on substantially any person who may become the wife or husband of the settlor in future, or
- (b) where, whether or not the settlor is married, the terms of the settlement are such as to indicate a specific intention that a future wife or husband of the settlor may be enabled to benefit.”

... unless—

- (a) that year is a year in which one of the four conditions set out in the following provisions of this paragraph becomes fulfilled as regards the settlement; or
- (b) one of those conditions became fulfilled as regards that settlement in any previous year of assessment ending on or after 5th April 1998.

I refer to these conditions as “**s.86 trigger conditions**”. Technically their effect is that the trust becomes settlor-interested, but the real consequence is that s.86 begins to apply.

47.5.1 First s.86 trigger condition: provision of property

Para 2A(2) Sch 5 TCGA provides:

The first condition is (subject to sub-paragraph (3) below) that on or after 17th March 1998 property or income is provided directly or indirectly for the purposes of the settlement—

- (a) otherwise than under a transaction entered into at arm's length, and
- (b) otherwise than in pursuance of a liability incurred by any person before that date.

This is discussed in the chapter “who is a settlor”: see 75.3.5 (CGT s.86 definition of settlor).

Para 2A(3) Sch 5 TCGA provides:

For the purposes of the first condition, where the settlement's expenses relating to administration and taxation for a year of assessment exceed its income for the year, property or income provided towards meeting those expenses shall be ignored if the value of the property or income so provided does not exceed the difference between the amount of those expenses and the amount of the settlement's income for the year.

SP 5/92 provides:

26 The following items are not regarded as “expenses relating to administration” within the terms of the proviso to TCGA 1992 Sch 5

para 9(3)—

- loan interest (other than interest on a loan taken out to meet expenses of administration within the terms of the proviso);
- the costs of acquiring, enhancing or disposing of an asset;
- expenses incurred in connection with a particular trust asset to the extent that such expenditure can be set against income arising from that asset. For the purpose of the proviso to para 9(3), the measure of the gross income from such a source is net of expenses.

27 The term “expenses relating to... taxation” in TCGA 1992 Sch 5 para 9(3) is regarded as encompassing UK or foreign taxes to which the trustees are liable, along with any interest and penalties due on that tax. It could also include certain costs incurred by the trustees under the terms of the trust in obtaining information regarding the beneficiaries' tax liabilities. One example might be where the trustees, in order to ensure they were acting in a beneficiary's best interests, had to ascertain the tax implications for the beneficiary in adopting a particular course of action.

28 It is only the settlement's expenses relating to administration or taxation which are within the terms of the proviso to TCGA 1992 Sch 5 para 9(3). Expenses of, for example, a company wholly owned by the trustees fall outside its scope....

30 Normally the specific date on which the liability to an expense relating to administration or taxation was incurred determines the year into which it falls for the purpose of applying the proviso to TCGA 1992 Sch 5 para 9(3). Where, however, the expense is incurred for a period rather than on a specific date, the basis of allocating expenses adopted by the trustees in preparing trust accounts or returns is, generally, regarded as acceptable provided that this basis is consistently adopted and is in accordance with conventional trust accounting practice.

31 Additions to meet the difference between expenses relating to administration and taxation and any income arising to the trust do not have to be made by 5 April in the relevant year of assessment. There must, however, be a clear connection between the amount added and the computed shortfall. Additions should, therefore, be made as soon as the relevant figures are available.

32 Income, for the purposes of the proviso to TCGA 1992 Sch 5 para 9(3), is the total income which arises to the trustees in the relevant year, rather than the income which is (or would be if the trust were resident in the UK) subject to UK tax. Usually, items of income will need to be allocated to the year in which they arise for the purposes of the proviso, but, in practice, income arising from a trade carried on by the trustees may be apportioned on a time basis, provided that this basis is

consistently followed.

47.5.2 Second s.86 trigger condition: emigrating trust

Para 2A(4) Sch 5 TCGA provides:

The second condition is that—

- (a) the trustees become on or after 17th March 1998 neither resident nor ordinarily resident in the United Kingdom, or
- (b) the trustees, while continuing to be resident and ordinarily resident in the United Kingdom, become on or after 17th March 1998 trustees who fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the United Kingdom.

If the emigration is to an EU member state, this rule would breach EU law: see 7.9 (EU restriction on exit taxes).

47.5.3 Third s.86 trigger condition: variation of trust

Para 2A(5) Sch 5 TCGA provides:

The third condition is that on or after 17th March 1998 the terms of the settlement are varied so that any person falling within sub-paragraph (7) below becomes for the first time a person who will or might benefit from the settlement.

SP 5/92 provides:

36 This provision is concerned with situations where the terms of the settlement are varied by the beneficiaries or a court to admit new beneficiaries within the class of persons defined at TCGA 1992 Sch 5 para 9(7) without thereby bringing the settlement to an end and creating a new one. For example, where the terms of the trust include a power to appoint anyone within a specified range to be a beneficiary, exercise of that power after 19 March 1991 will not be regarded as a variation of the settlement...

47.5.4 Fourth s.86 trigger condition: unexpected beneficiary

Para 2A(6) Sch 5 TCGA provides:

- (6) The fourth condition is that—
 - (a) on or after 17th March 1998 a person falling within sub-paragraph (7) below enjoys a benefit from the settlement for the first time, and
 - (b) the person concerned is not one who (looking only at the terms of the settlement immediately before 17th March 1998) would be capable of enjoying a benefit from the settlement on or after that date.
- (7) Each of the following persons falls within this sub-paragraph—
 - (a) any grandchild of the settlor or of the settlor's spouse or civil partner;
 - (b) the spouse of or civil partner any such grandchild;
 - (c) a company controlled by a person or persons falling within paragraph (a) or (b) above;
 - (d) a company controlled by any such person or persons together with any person or persons (not so falling) each of whom is for the purposes of paragraph 2(1) above a defined person in relation to the settlement;
 - (e) a company associated with a company falling within paragraph (c) or (d) above.

SP 5/92 provides:

37 For the purposes of clarification, this condition deals with “ultra vires” payments, ie cases where one of the persons defined at TCGA 1992 Sch 5 para 9(7) receives a benefit from the trust for the first time and that person is not a beneficiary under the terms of the trust deed. It may also apply where such a person benefits from a transaction with the settlement carried out, for example, under the trustees' investment powers.

This trigger condition may apply in the case of an ultra vires payment (ie a payment in breach of trust), but only if the payment is in fact a benefit.¹¹ A transaction under the trustees investment powers is not in principle a benefit, unless perhaps the transaction is a breach of trust, in which case it is not really “under the trustees investment powers”.

¹¹ See 47.3.5 (“Benefit” provided in breach of trust).

47.6 Qualifying settlement

Section 86(1) provides:

This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment—

- (a) the settlement is a qualifying settlement in the year;

“Qualifying” settlement is a label for a set of transitional rules.

47.6.1 *Post-1991 trust*

This is straightforward. Para 9(1) Sch 5 TCGA provides:

A settlement created on or after 19th March 1991 is a qualifying settlement for the purposes of section 86 and this Schedule in—

- (a) the year of assessment in which it is created, and
- (b) subsequent years of assessment.

47.7 Pre-1991 protected trusts

Para 9 continues with a complex grandfathering relief for what statute calls “protected settlements”; although it is generally better to adopt statutory terminology, I refer to these as **“pre-1991 protected trusts”**. That terminology avoids confusion with pre-1998 protected trusts.

Para 9 (1A) Sch 5 TCGA provides:

Subject to sub-paragraph (1B) below, a settlement created before 19th March 1991 is a qualifying settlement for the purposes of section 86 and this Schedule in—

- (a) the year 1999–00, and
- (b) subsequent years of assessment.

The relief is in para 1B. Para 9(1B) sch 5 TCGA provides:

Where a settlement created before 19th March 1991 is a protected settlement immediately after the beginning of 6th April 1999, that settlement shall be treated as a qualifying settlement for the purposes of section 86 and this Schedule in a year of assessment mentioned in sub-paragraph (1A)(a) or (b) above only if—

- (a) any of the five conditions set out in subsections (3) to (6A) below becomes fulfilled as regards the settlement in that year; or
- (b) any of those five conditions became so fulfilled in any previous year of assessment ending after 19th March 1991.

I refer to these conditions as “**s.86 trigger conditions**”. Technically their effect is that the trust becomes a qualifying settlement, but the real consequence is that s.86 begins to apply. The drafting technique is different from that used for pre-1998 settlements but the end result is essentially the same.

The relief for pre-1991 trusts was important in its day, and HMRC issued extensive guidance. The guidance has ceased to be directly important (because there are now few if any pre-1991 protected trusts left) but it is still relevant where similar wording is used elsewhere.

47.7.1 “*Protected settlements*”

Para 9 sch 5 TCGA provides:

(10A) Subject to sub-paragraph (10B) below, a settlement is a protected settlement at any time in a year of assessment if at that time the beneficiaries¹² of that settlement are confined to persons falling within some or all of the following descriptions, that is to say—

- (a) children of a settlor or of a spouse or civil partner of a settlor who are under the age of eighteen at that time or who were under that age at the end of the immediately preceding year of assessment;
- (b) unborn children of a settlor, of a spouse or civil partner of a settlor, or of a future spouse or civil partner of a settlor;
- (c) future spouses or civil partners of any children or future children

12 Para 9(10C) defines beneficiary: “For the purposes of sub-paragraph (10A) above a person is a beneficiary of a settlement if—

- (a) there are any circumstances whatever in which relevant property which is or may become comprised in the settlement is or will or may become applicable for his benefit or payable to him;
- (b) there are any circumstances whatever in which relevant income which arises or may arise under the settlement is or will or may become applicable for his benefit or payable to him;
- (c) he enjoys a benefit directly or indirectly from any relevant property comprised in the settlement or any relevant income arising under the settlement.”

- of a settlor, a spouse or civil partner of a settlor or any future spouse or civil partner of a settlor;
 - (d) a future spouse or civil partner of a settlor;
 - (e) persons outside the defined categories.
- (10B) For the purposes of sub-paragraph (10A) above a person is outside the defined categories at any time if, and only if, there is no settlor by reference to whom he is at that time a defined person in relation to the settlement for the purposes of paragraph 2(1) above.

The point is that a pre-1991 protected trust may have minor children of the settlor as beneficiaries, but if it is to remain protected, it must exclude them before they become 18.

The trigger conditions are set out at length in para 9, but the first two are the same as the s.86 trigger conditions which apply to pre-1998 protected trusts; they need not be separately set out here.¹³

47.7.2 *Third and fourth conditions*

The third and fourth conditions are based on the s.86 trigger conditions which apply to pre-1998 protected trusts with corresponding amendments in the wording. Para 9 Sch 5 TCGA provides:

- (5) The third condition is that on or after 19th March 1991 the terms of the settlement are varied so that any person falling within sub-paragraph (7) below becomes for the first time a person who will or might benefit from the settlement.
- (6) The fourth condition is that—
 - (a) on or after 19th March 1991 a person falling within sub-paragraph (7) below enjoys a benefit from the settlement for the first time, and
 - (b) the person concerned is not one who (looking only at the terms of the settlement immediately before 19th March 1991) would be capable of enjoying a benefit from the settlement on or after that date.

Para 9(7) Sch 5 TCGA provides:

¹³ Para 9(3) = para 2A(2); see 47.5.1 (First s.86 trigger condition: provision of property). Para 9(4) = para 2A(4); see 47.5.2 (Second s.86 trigger condition: emigrating trust).

Each of the following persons falls within this sub-paragraph—

- (a) a settlor;
- (b) the spouse or civil partner of a settlor;
- (c) any child of a settlor or of a settlor's spouse or civil partner;
- (d) the spouse or civil partner of any such child;
- (da) any grandchild of a settlor or of a settlor's spouse or civil partner;
- (db) the spouse or civil partner of any such grandchild;
- (e) a company controlled by a person or persons falling within paragraphs (a) to (db) above;
- (f) a company associated with a company falling within paragraph (e) above.

See 47.5.3 (Third s.86 trigger condition: variation of trust); 47.5.4 (Fourth s.86 trigger condition: unexpected beneficiary).

47.7.3 Fifth s.86 trigger condition: ceasing to be protected

Para 9(6A) Sch 5 TCGA provides:

The fifth condition is that the settlement ceases to be a protected settlement at any time on or after 6th April 1999.

47.7.4 Commentary: let's abolish relief for pre-1991 protected trusts

These rules have been in place since 1991. Children then living (or indeed born in the following few years) have now reached 18. It is possible to envisage circumstances in which pre-1991 protected trusts could still exist but I suspect that there are no pre-1991 protected trusts now in existence. It is suggested in the interests of simplification that the transitional relief for pre-1991 protected trusts should now be withdrawn.

47.8 Trustee residence condition

This s.86 condition is in s.86(1)(b) TCGA:

the trustees of the settlement fulfil the condition as to residence specified in subsection (2) below;

This takes us to s.86(2) TCGA which provides:

The condition as to residence is that—

- (a) the trustees are neither resident nor ordinarily resident in the UK during any part of the year, or
- (b) the trustees are resident and ordinarily resident in the UK during any part of the year, but at any time of such residence and ordinary residence they fall to be regarded for the purposes of any double taxation relief arrangements¹⁴ as resident in a territory outside the UK.

Condition (a) is that the trustees are non-resident; condition (b) is that the trustees are domestic-law UK resident but treaty-resident in a foreign state with a capital gains article.¹⁵

47.9 Settlor residence and domicile condition

This s.86 condition is in s.86(1)(c):

a person who is a settlor in relation to the settlement (“the settlor”):

- [i] is domiciled in the UK at some time in the year and
- [ii] is either resident in the UK during any part of the year or ordinarily resident in the UK during the year;

Section 86 does not apply to a foreign domiciled settlor, whether or not they claim the remittance basis. At first sight this seems a surprising inconsistency with the general scheme of taxation of foreign domiciliaries, introduced in 2008. It was however a deliberate decision.¹⁶ No reason was given for it so it is tempting to speculate. Probably it reflects an understanding, which most readers would accept, that it is not appropriate to apply the rules to settlors and trustees from outside the UK because:

- (1) the definition of “settlor-interested” for s.86 purposes is too wide, and
- (2) the trigger conditions are too harsh and too complicated,

One must bear in mind that foreign settlors and trustees may not have had the same opportunities to consider UK legislation when making or administering their settlements.

14 For the meaning of this term, see 8.4.3 (“DTR arrangements” – CGT).

15 For treaty aspects, see 55.9 (DT reliefs: s.86 TCGA).

16 The draft clauses which would have amended s.86 were withdrawn.

That is actually quite a good reason, though one should not assume that rules of tax law, even important rules, are necessarily enacted with good reasons in mind. Perhaps it was just a concession thrown without much rationalisation, to placate the lobby opposing the 2008 reforms, that is, the true explanation may be located in tax politics rather than tax policy.

47.10 Section 86 trust gains condition

This condition is in s.86(1)(e):

by virtue of disposals of any of the settled property originating from the settlor, there is an amount on which the trustees would be chargeable to tax for the year under section 2(2) if the assumption as to residence specified in subsection (3) below were made.

I refer to this as the “**s.86 trust gains condition**”.

47.10.1 Assumption as to residence

The assumption as to residence is set out in s.86(3) TCGA but in order to follow it one must read it with s.86(2):

- (2) The condition as to residence is that—
 - (a) the trustees are neither resident nor ordinarily resident in the UK during any part of the year, or
 - (b) the trustees are resident and ordinarily resident in the UK during any part of the year, but at any time of such residence and ordinary residence they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.
- (3) [a] Where subsection (2)(a) above applies, the assumption as to residence is that the trustees are resident and ordinarily resident in the UK throughout the year; and
[b] where subsection (2)(b) above applies, the assumption as to residence is that the double taxation relief arrangements do not apply.

In para [b] the assumption is not in fact an assumption “as to residence”: the assumption is a disapplication of treaty relief, but the meaning is clear.

47.10.2 *Ascertaining the s.86 trust gains*

The condition in s.86(1)(e) is that there is an amount, which I call “**the s.86 trust gains**”. The quantum of the s.86 trust gains matters because the amount of the charge depends on that.

All the usual CGT reliefs are in principle applicable in computing the s.86 trust gains. For instance, hold-over relief is available on a transfer to a UK resident beneficiary, if the usual conditions are satisfied.¹⁷

Para 1(1) Sch 5 TCGA provides:

In construing section 86(1)(e) as regards a particular year of assessment, the effect of section 3 shall be ignored.

This disapplies the trustee annual exemption (which is fair because the settlor has their own annual exemption).

47.11 **Year of death of settlor**

This s.86 condition is in s.86(1)(f):

Para 3, 4 or 5 does not prevent this section applying.

This sets out three conditions which are best considered separately.

Para 3 Sch 5 TCGA provides:

Section 86 does not apply if the settlor dies in the year.

What is the reason for this rule? Presumably it was thought unfair to tax the settlor’s estate on post-death gains, and too much trouble to split the year into disposals before/after the death.

47.12 **Death or divorce of certain beneficiaries**

The last two s.86 conditions are set out in paras 4 and 5 Sch 5 TCGA:

4(1) This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for one of the

¹⁷ See the HMRC helpsheet quoted at 48.5.1 (Ascertaining the s.2(2) amount).

following reasons, namely, that—

- (a) property is, or will or may become, applicable for the benefit of or payable to one of the persons falling within para 2(3)(b) to (db) above,
 - (b) income is, or will or may become, applicable for the benefit of or payable to one of those persons, or
 - (c) one of those persons enjoys a benefit from property or income.
- (2) This paragraph also applies where sub-para (1) above is fulfilled by virtue of 2 or all of paras (a) to (c) being satisfied by reference to the same person.
- (3) Where this paragraph applies, section 86 does not apply if the person concerned dies in the year.
- (4) In a case where—
- (a) this paragraph applies, and
 - (b) the person concerned falls within para 2(3)(b), (d) or (db) above,
- section 86 does not apply if during the year the person concerned ceases to be married to, or a civil partner of, the settlor, child or grandchild concerned (as the case may be).
- 5 (1) This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for the reason that there are 2 or more persons, each of whom—
- (a) falls within para 2(3)(b) to (db) above, and
 - (b) stands to gain for the reason stated in sub-para (2) below.
- (2) The reason is that—
- (a) property is, or will or may become, applicable for his benefit or payable to him,
 - (b) income is, or will or may become, applicable for his benefit or payable to him,
 - (c) he enjoys a benefit from property or income, or
 - (d) 2 or all of paras (a) to (c) above apply in his case.
- (3) Where this paragraph applies, section 86 does not apply if each of the persons concerned dies in the year.

I cannot see the point of this, though it does offer a kind of symmetry with para 3. I doubt if it ever has or ever will apply.

47.13 Attribution of s.86 gains to settlor

Assuming all eight fundamental s.86 conditions are satisfied, we proceed to s.86(4) TCGA which provides:

Where this section applies—

- (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in the year, ...

47.14 Interaction of s.86 and s.13 TCGA

Suppose a settlor-interested trust within s.86 TCGA owns a non-resident company within s.13 TCGA, and a gain accrues to the company. The gain is treated as accruing to the trustees. In the absence of express provision, this gain would not fall within s.86 because the s.86 trust gains condition would not be satisfied: the gain does not accrue “by virtue of disposals of any of the settled property”.¹⁸ The company property is not settled property. Para 1(3) Sch 5 TCGA deals with this:

In a case where—

- (a) the trustees are participators in a company in respect of property which originates from the settlor, and
- (b) under section 13 gains or losses would be treated as accruing to the trustees in a particular year of assessment by virtue of so much of their interest as participators as arises from that property if the assumption as to residence specified in section 86(3) were made,

the gains or losses shall be taken into account in construing section 86(1)(e) as regards that year as if they had accrued by virtue of disposals of settled property originating from the settlor.

47.15 Interaction of ss.86 and 87 TCGA

In the absence of relief, a gain accruing to a trust may be attributed to the settlor under s.86(4) and a s.2(2) amount (trust gain) under s.87(2). Section 87(4)(b) TCGA provides relief for s.87 and so prevents double taxation:

- (4) The section 2(2) amount for a settlement for a tax year for which this section applies to the settlement is—
 - (a) the amount upon which the trustees of the settlement would be chargeable to tax under section 2(2) for that year if they were resident and ordinarily resident in the UK in that year, or
 - (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

In short, s.86 in principle has priority over s.87.

¹⁸ See 47.10 (Section 86 trust gains condition).

47.16 Corporate settlor

It is considered that s.86 TCGA does not apply to a company even if it does create a settlor-interested settlement and is the settlor. The context suggests that only individuals are intended to be caught. It appears that HMRC may not accept this view.¹⁹ The issue rarely arises in practice.

Where a company with one or few shareholders is a settlor, HMRC may instead look to see if the shareholders are settlors.²⁰

47.17 UK resident trust

A UK resident trust is in principle subject to CGT even if:

- (1) the settlor is a remittance basis taxpayer; and
- (2) the trust assets are not situated in the UK.

The remittance basis does not apply as that only applies to “individuals”; trustees are not individuals.

One might avoid this problem for the future by exporting the trust (appointing non-resident trustees) but there may in principle be a migration charge.²¹

One solution may be to transfer assets from the trust to UK resident foreign domiciled beneficiaries absolutely. Although this involves a disposal by the trustees, it may be possible to claim CGT hold-over relief. The relief applies on a disposal to a foreign domiciled beneficiary, even though that beneficiary may later be able to dispose of the asset without a CGT charge.

19 The CG Manual provides:

“35020. Trusts for employees [February 2006]

There is nothing in Section 77 [TCGA] itself to prevent it being applied to a company. In particular, where a company has set up a settlement for its employees, the deed may provide that if all the trusts fail, the property may revert to the company. The most common cases are share option schemes and unapproved pension schemes.”

Section 77 TCGA was repealed in 2008, the issue for s.86 is similar. For a further discussion, see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations*, (8th ed, 2011) para 20.2.2 (Loan by company) (online version www.taxationofcharities.co.uk).

20 See 75.32 (Trust made by company: are shareholders settlors?).

21 See 7.5 (Liability of trustees for exit charge).

CHAPTER FORTY EIGHT

CAPITAL PAYMENTS FROM NON-RESIDENT TRUSTS: S.87

48.1 The s.87 charge – Introduction

This chapter considers the CGT charge on beneficiaries of non-resident trusts, under s.87 TCGA. I call this “**the s.87 charge**”. The charge is supplemented by a further charge in s.89 TCGA but I use the expression “s.87 charge” loosely to refer to both charges.

There are *four* versions of the s.87 charge:

- (1) The standard version is discussed in this chapter.
- (2) A second version applies where there has been a Sch4B-transfer.¹
- (3)(4) The third and fourth versions are modified versions of (1) and (2) which apply for offshore income gains.²

The result is so intricate that no written description could ever do full justice to the complexities.

The rules were introduced in 1981, amended in 1998, and rewritten in 2008.

In the following discussion “**the pre-2008 s.87**” means the section as it was before the 2008 amendments. “**The HMRC s.87 guidance note**” means the 54 page guidance note, first published May 2009, 2nd version October 2009, entitled “FA 2008 changes to the CGT charge on beneficiaries of non-resident settlements”.

48.1.1 *Cross references*

The following matters are considered elsewhere:

¹ See 49.14 (Schedule 4C).

² See 34.13 (OIG s.87 charge) and 46.25 (OIG sch 4C).

51.6: Loss accruing to non-resident trustees

51.7: Disallowance of personal losses against s.87 gains

55.11: DT reliefs: s.87 TCGA

For s.87 gains accruing to charity, see Kessler & Brown, *Taxation of Charities and Non-profit Organisations* (8th ed, 2011), Chap. 30 (Payments to charity from non-resident trusts) (online version www.taxationofcharities.co.uk).

48.2 “Settlement” and “trustee”

48.2.1 “Settlement”

Section 97(7) TCGA provides:

In sections 86A to 96 and Schedule 4C and in this section—
“settlement” has the meaning given by section 620 of ITTOIA 2005,
and
“settled property” and references (however expressed) to property
comprised in a settlement shall be construed accordingly.

“Settlement” here means settlement-arrangement.

The estate of a deceased person is not a settlement-arrangement.³

In practice one is normally concerned with trusts in the classic sense. That is just as well, as the problems raised by other types of settlement (which I call “**non-trust settlement-arrangements**”) such as a foundation, have not been fully thought through.

48.2.2 “Trustee” of non-trust settlement-arrangement

A problem arises for an entity which is a settlement-arrangement (and so a settlement for s.87 purposes) but which (not being a classic settlement) has no trustees in the normal (trust law) sense of the word. For s.87 purposes one needs to identify trustees because:

- (1) one needs to ascertain trustee residence;⁴
- (2) one needs to identify s.2(2) amounts (trust gains), which are the amounts on which “the trustees of the settlement” would be

3 See 73.6.1 (Is an estate a “settlement” within s.87 TCGA?).

4 See 48.3 (Non-resident settlement condition).

chargeable to tax under s.2(2) if they were resident in the UK. Accordingly s.97(7A) TCGA provides:

[a] In this section, sections 86A to 96 and Schedule 4C “trustee”, in relation to a settlement in relation to which there would be no trustees apart from this subsection, means any person in whom the settled property or its management is for the time being vested ...⁵

When this extended sense applies, I use the word “trustees” (using scare quotation marks).

An example is a Liechtenstein stiftung (foundation). The “trustees” are (a) the foundation itself (a body corporate in which the “settled property” is vested) or (b) the members of the board of management (in whom its management is vested).

What about a civil law usufruct? There is no need for the s.87 rules: under ordinary principles the gain can come into charge on a disposal by the usufructuary or by the encumbered owner but since a usufruct is in principle a settlement-arrangement, what reason can one find that s.87 does not apply? The answer is that there is nothing which one can identify as “settled property”. There are two items of property, one belonging to the usufructuary and the other belonging to the bare owner. So it is considered that there are no “trustees” and a usufruct is not within the scope of s.87.

48.2.3 2006 transitional rules?

Section 97(7A) was introduced by para 15 Sch 12 FA 2006. Para 15(3) provides:

This paragraph shall come into force on 6th April 2006 (in relation to settlements whenever created).

This raises the interesting possibility that s.87 did not apply to a

⁵ There is a similar definition for IHT. Section 45 IHTA provides:

“In this Act “trustee”, in relation to a settlement in relation to which there would be no trustees apart from this section, means any person in whom the settled property or its management is for the time being vested.”

foundation⁶ before 2006 as a foundation has no “trustees” in the normal (trust law) sense. But it is suggested that the context shows that the word “trustee” should be construed widely enough to include a foundation (bear in mind that the word “settlement” is given the wide and artificial meaning of settlement-arrangement). Section 97(7A) is only for the avoidance of doubt and the law before 2006 was the same as now.

48.3 Non-resident settlement condition

Section 87(1) TCGA sets out the fundamental condition for the application of s.87:

This section applies to a settlement for a tax year (“the relevant tax year”) if the trustees are neither resident nor ordinarily resident in the UK in that year.

Statute often refers to a settlement “to which s.87 applies”; from 1998/99 this means (in short) a non-resident settlement. In full, it means:

- (1) a non-resident settlement; or
- (2) a dual resident (more accurately, domestic-law UK resident treaty non-resident) settlement.⁷

48.3.1 Residence of “trustee” of non-trust settlement-arrangement

Section 97(7A) TCGA provides:

- [a] ... “trustee”, in relation to a settlement in relation to which there would be no trustees apart from this subsection, means any person in whom the settled property or its management is for the time being vested
- [b] (and a person who is treated as a trustee of the settlement by virtue of this subsection shall be treated as a trustee of the settlement for the purposes of section 69).

The effect of s.97(7A)[b] is that the s.69 trustee test of residence applies.

6 Or any other settlement-arrangement which was not a classic settlement and so had no trustees in the strict sense.

7 See 48.17 (Dual resident trust – s.88 TCGA).

In the case of a foundation, the “trustees” are (a) the foundation itself or (b) the members of the board of management. The residence of (a) and (b) will normally be the same so there is no need to consider the analysis if they were resident in different places but one would presumably look to the foundation itself, as that is the person (a body corporate) to which gains accrue on a disposal of foundation property.

48.4 The s.87 charge

Section 87(2) TCGA provides:

- [a] Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement
- [b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year
- [c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.2(2) amount for the relevant tax year or any earlier tax year.

The key terms here are “capital payment” “s.2(2) amount” and “matching”.

I refer to gains treated as accruing as “**s.87 gains**”. The term “deemed gains” is sometimes used but I think my term is clearer.

A s.87 gain accrues in the year that a capital payment is matched with a s.2(2) amount. That may be later than the year that the capital payment is made.

Section 87 is not strictly a charging section, it feeds into s.2 TCGA which imposes the charge. It is nevertheless convenient to use the expression “s.87 charge” as a shorthand.

48.5 Section 2(2) amount

Section 87(4) TCGA provides:

The s.2(2) amount for a settlement for a tax year for which this section applies to the settlement is—

- (a) the amount upon which the trustees of the settlement would be chargeable to tax under s.2(2) for that year if they were resident and ordinarily resident in the UK in that year, or
- (b) if s.86 applies to the settlement for that year, the amount

mentioned in para (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

The term “s.2(2) amount” has more or less the same meaning as the term “trust gains” in the pre-2008 s.87. The old terminology was clearer, and EN FB 2008 itself uses the term “trust gains”. It is usually better to adopt statutory terminology, rather than using a different term with the same meaning as a statutory defined term, and I do so here but somewhat reluctantly. The term “s.2(2) amount” is so opaque that I sometimes clarify it by using the phrase “*s.2(2) amounts (trust gains)*.”

There is something to be said for the expression “s.87 trust gains” (to distinguish from s.86 trust gains). Some practitioners use the term “stockpiled gains” or describe a trust as having a pool of s.2(2) amounts.

There is a s.2(2) amount *for a tax year* ie each s.2(2) amount must be linked to a specific tax year. The expression “s.2(2) amounts” (in the plural) is used to refer to the case where there are s.2(2) amounts for more than one tax year.

Section 87(4)(b) TCGA deals with the interaction of ss.86 and 87. Gains treated as accruing to the settlor under s.86 at December 21, 2011 deducted in computing the s.2(2) amount. This avoids double taxation.

Section 87(5) TCGA provides:

The s.2(2) amount for a settlement for a tax year for which this section does not apply to the settlement is nil.

This makes sense, of course, since if s.87 does not apply the trustees must be UK resident and within the scope of CGT.

48.5.1 *Ascertaining the s.2(2) amount*

All the usual CGT reliefs are in principle available for computing the s.2(2) amount. For instance, hold-over relief is available on a transfer to a UK resident beneficiary, if the usual conditions are satisfied. HMRC accept this. Helpsheet 295 (Relief for gifts and similar transactions 2010/11) provides:

There is no requirement for the transferor to be resident or ordinarily resident in the UK. Therefore the relief is available for trustees of nonresident settlements where the chargeable gain would, or might

otherwise be, charged on UK residents.⁸

HMRC say:

The trustees compute gains as if they were resident in the UK. Any exemptions and reliefs due to resident trustees are included in this computation. But no annual exempt amount is available...⁹

The last sentence is wrong, as s.3 TCGA (extended to trustees by sch 1 TCGA) provides that trustees “shall not be chargeable to CGT” on the exempt amount. So “the amount upon which the trustees would be chargeable to tax under s.2(2) for that year if they were resident” is reduced by the exempt amount. The Courts might disapply the plain words if the result were absurd, but it is not absurd. There may be an element of double relief as beneficiaries may have their own annual exemption. This rule is nevertheless sensible because it saves trustees from having to keep track of small gains (or it avoids non-compliance so far as one could not reasonably expect trustees to actually do so.). Of course, there is not much tax at stake here.

48.5.2 *s.2(2) amount of foundation or other non-trust settlement-arrangement*

A foundation is in principle a settlement-arrangement and so a settlement for s.87 purposes. What is the s.2(2) amount, ie the amount on which the “trustees” of the settlement would be chargeable under s.2(2) if they were UK resident? If the “trustees” are the members of the board of the foundation, the amount is nil as no gains accrue to them. Assuming (which is a better analysis) the “trustees” are the foundation itself, the position would be that the foundation would be subject to CT and so at first sight, the amount chargeable under s.2(2) would be nil! The answer is that s.97(7A)[b]¹⁰ applies s.69 TCGA, which deems the “trustees” to be a separate person which is not a company; though one could reach the

⁸ ie the gain might be charged if the UK resident transferee disposed of the asset.

⁹ “HMRC Residency: Non-resident trusts” published online at www.hmrc.gov.uk/cnr/nr_trusts.htm on 1 April 2008. (I wonder if the author has confused the position for s.86, where the trustee annual exemption is disappplied: see 47.10 (Section 86 trust gains).)

¹⁰ See 48.3.1 (Residence of “trustee” of non-trust settlement-arrangement).

same result by construction even without reference to that provision.¹¹

48.6 Capital payment

48.6.1 *Definition of capital payment*

“Capital payment” is defined in s.97(1) TCGA:

In sections 86A to 96 and Schedule 4C and this section “capital payment” —

(a) means

[i] any payment which is not chargeable to income tax on the recipient

[ii] or, in the case of a recipient who is neither resident nor ordinarily resident in the UK, any payment received otherwise than as income...¹²

48.6.2 “Chargeable to income tax”

What is the position if a trust makes an income distribution¹³ to a remittance basis taxpayer which is not remitted? It is considered that this is not a capital payment. The payment is “chargeable to income tax” even if no tax is paid because of the remittance basis.¹⁴ If that were wrong:

11 *de Rothschild v Lawrenson* 67 TC 300.

12 As to when a payment is received as income, see 24.8 (Payment from discretionary trust: income or capital?).

13 For what is an income distribution, see 24.8 (Payment from discretionary trust: income or capital?).

14 Before 2005, the former s.65 ICTA drew a distinction between a “charge” and a “computation;” unremitted income was described as “chargeable” even though ignored in the computation of the charge. This is still the case: ITTOIA imposes a charge on all RFI and the remittance basis only affects the amount on which the charge is made. See 9.11 (Nature of charge on remitted RFI).

It was assumed by the drafter of s.37 TCGA (consideration chargeable to tax on income) that unremitted foreign income is “charged” to income tax. Otherwise there would be a charge to CGT on unremitted income of an asset to which the RFI remittance basis applies but the CGT remittance basis does not apply. That would apply to a UK domiciled and resident but not ordinarily resident individual. Another example would be income accruing to a foreign domiciliary from an asset which was UK situate for CGT purposes, but a foreign income source for income tax purposes. It is true that the word “chargeable” takes its meaning from the context, and in some

- (1) There would be double taxation, a s.87 gain and an IT charge, if the payment were remitted.
- (2) The payment would be matched to s.2(2) amounts which would reduce tax on subsequent capital payments with odd results and some scope for tax planning.

Similarly a benefit which is within s.731, or within s.731 subject to the s.731 remittance basis, is not a capital payment.¹⁵

The same applies if a settlor-interested discretionary trust within s.624 makes a distribution out of its income to the settlor: that is not a capital payment. In this case there does seem at first sight to be a problem, as there is no income tax charge on receipt of the payment.¹⁶ However the sum is treated for all purposes of income tax to be the income of the settlor and that deeming should be applied in order to determine whether the payment is chargeable to income tax for the purposes of the definition of capital payment.

The same applies if the settlor is within the s.624 remittance basis.

The same applies if a person abroad makes a distribution out of its income to a transferor within s.720, or a transferor within the s.720 remittance basis: that is not a capital payment. (This issue arises in the exceptional case of a trust within s.720 and not within s.624, and in the more common case of a payment from a company held by a trust.)

Suppose:

- (1) A remittance basis taxpayer (“S”) receives foreign income (“the old income”) which is not remitted to the UK and so not taxed.
- (2) S transfers the old income to a non-resident trust.
- (3) The trustees invest and realise gains (“trust gains”) in a subsequent tax year. For simplicity, assume that no income accrues to the trustees, or any income which arises to them is segregated and paid out to the settlor.
- (4) The trustees make a distribution to the settlor which is received in the UK and which is derived from the old income.¹⁷

It is considered that the distribution is not a capital payment as it is

contexts unremitted income is not regarded as chargeable to IT. But the context shows that is not the case here.

15 See 29.11 (Is a benefit within s.731 a capital payment?).

16 See 26.4.3 (Relief for settlor-beneficiary).

17 On the mixed fund rules which apply in this case, see 12.8 (Unremitted income transferred to trust).

chargeable to income tax. Otherwise there would be double taxation on the distribution, an income tax charge and a s.87 charge.

Suppose:

- (1) A remittance basis taxpayer (“S”) receives foreign gains (“the old gains”) which are not remitted to the UK and so not taxed.
- (2) S transfers the old gains to a non-resident trust.
- (3) The trustees invest and realise gains (“trust gains”) in a subsequent tax year.
- (4) The trustees make a distribution to the settlor which is received in the UK and which is derived from the old gains.¹⁸

At first sight there is a double charge, CGT on the old gains on the remittance basis, and a s.87 charge. That can hardly be right.

The RDR Manual gives this example:

31180. Foreign chargeable gains accruing on disposal made otherwise than for full consideration

Example 2 (Ahmeda)

A transfers his property in Dubai to a trust receiving no consideration in return. The deemed gain computed using the market value of the property at date of transfer is £400,000.

The trustees subsequently sell the property for £550,000.

The trustees then make a capital payment of £300,000 to a UK close company in which A’s spouse is a participator.

The HMRC analysis is as follows:

[1] £300,000 of A’s foreign chargeable gain has been remitted to the UK. This is because the property is treated as deriving from his gain (Section 809T ITA 2007) and the proceeds from the sale of the property therefore also derive from the gain.

This overlooks the mixed fund rules. I would say that £150,000 of A’s foreign chargeable gain has been remitted to the UK. The trustees receipt of £550,000 is a mixed fund consisting of

A’s foreign chargeable gain £400,000

The trustees’ gain: £150,000

The payment out of the mixed fund is treated as coming from the trustees

18 On the mixed fund rules which apply in this case, see 12.8 (Unremitted income transferred to trust).

gain (assume it accrues in a later year).

[2] The company is a relevant person (Section 809M(2)(f) ITA 2007) and property (that is, money) which derives from A's gain has therefore been received in the UK by or for the benefit of a relevant person (Section 809L ITA 2007).

This is correct.

[3] The gain which accrues to the trust on the actual sale of the property will be subject to normal rules.

But what are the normal rules? Possibly HMRC assume that there is a s.87 charge on the £300,000 leading to double taxation but tactfully refrain from saying so. But it is suggested that to the extent that gains actually accrue to S on the remittance, there is no second charge under s.87. There are various ways one could reach that conclusion, either if there are actual gains, there is no room for the deeming under s.87; or the reference to income tax in the definition of capital payment could be read purposively as extending to CGT; or s.32 TMA might be called upon. That would be consistent with the position where income is settled. This is perhaps a free construction, but legislation enacted in the manner of the 2008 legislation is bound to leave some rough edges, and the courts should find a construction which produces a workable result.¹⁹

48.6.3 “Payment”

Section 97(2) TCGA provides:

In subsection (1) above references to a payment include references to

- [a] the transfer of an asset and
- [b] the conferring of any other benefit, and to
- [c] any occasion on which settled property becomes property to which s.60 applies.

The issues overlap with s.731 ITA so for the meaning of “benefit” see

¹⁹ Contrast the TAA rules where a reference to income tax is construed to include corporation tax in order to avoid double taxation: see 30.2.1 (Transferor's credit).

29.4 (Benefit) and for valuation see 29.6 (Valuation of benefits).

48.6.4 *Arm's length transaction*

Section 97(1) TCGA provides:

In sections 86A to 96 and Schedule 4C and this section “capital payment”—

- (b) does not include a payment under a transaction entered into at arm's length if it is received on or after 19th March 1991.

It is considered that a transaction at arm's length could not be a capital payment at all, and this provision was inserted only for the avoidance of doubt; and even if (contrary to that view) the transaction were a capital payment, the amount of the capital payment would normally be nil.

The issue is not theoretical, as a transaction between connected persons is (in short) treated as not at arm's length.²⁰

It would be simpler if s.97(1)(b) were repealed, as unnecessary, though it does no harm.

48.6.5 *Termination of settlement*

The termination of a settlement constitutes a capital payment, so any s.2(2) amounts at that time will be attributed to the beneficiaries who become entitled to the trust property: s.97(2)[c] TCGA.

This rule should not, in practice, affect well drafted settlements, whose life may extend for a century or more. If action is taken in time it will generally be possible to extend the life of poorly drafted settlements by appropriate exercise of trustees' powers. Trustees should if appropriate diarise the date when the settlement may come to an end so as to take action beforehand.

48.7 **Receipt from the trustees**

The s.87 charge applies where a beneficiary has received a capital payment from the trustees. There are two requirements here: a *receipt*, and a receipt *from the trustees*.

²⁰ Section 18 TCGA.

Section 97(5) TCGA expands on these concepts:

For the purposes of sections 86A to 90 and Schedule 4C a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—

- (a) he receives it from them directly or indirectly, or
- (b) it is directly or indirectly applied by them in payment of any debt of his or is otherwise paid or applied for his benefit, or
- (c) it is received by a third person at the beneficiary's direction.

On the general meaning of “receipt” see 29.5 (Who is the recipient of a benefit?).

The explanation for s.97(5) is to be found in *Potts' Executors v IRC* 32 TC 211. This concerned (what is now) s.641 ITTOIA which applies to:

Any capital sum paid directly or indirectly ... by any body corporate connected with a settlement to the settlor.

In *Potts*, at the request of the settlor, a company which connected with a settlement paid tax liabilities of the settlor.²¹ The settlor did not actually receive the funds. The House of Lords (in the era of literal interpretation) held that this was not a payment to the settlor directly or indirectly, so s.633 did not apply.

Lord Simonds said:

It is sufficient to say that [the word 'indirectly'] cannot so enlarge the meaning of the words 'paid to the settlor' as to include payment to some other person than the settlor for his own use and benefit. I do not feel called upon to determine positively what transactions it might be apt to cover. It may be that it is not apt to cover any that are not already covered by the normal meaning of the words 'paid to the settlor'.

Lords Normand and Oaksey said:

...it was obviously necessary to provide for the case when persons accountable to the settlor are interposed between the payer and the settlor for the purpose of disguising the transaction. That is a satisfactory

²¹ The trust also made other payments, such as payments to charities at the request of the settlor.

explanation of the use of the words “directly or indirectly”.

I think the words “paid directly or indirectly to the settlor” should be held to mean paid into the settlor's hands or into the hands of someone accountable to him.

Lord MacDermott said:

[The payments] made to Mr. Potts' agents or in some circuitous way designed to put the money under his control eventually. Had they been, the word "indirectly" might have had a part to play, for in that case the issue would be whether, as a matter of fact, payment had been made one way or another to the settlor. In short, as it appears to me, the words “directly or indirectly” bear only on the mechanics of payment in fact.

It seems to me that there are three distinct views here:

- (1) The word “indirectly” adds nothing or nothing much (Lord Simonds suggestion).
- (2) The word “indirectly” applies to payments to X via someone accountable to X (Lords Normand and Oaksey).
- (3) The word “indirectly” applies to payments “in some circuitous way designed to put the money under his control eventually” (Lord MacDermott).

The second of these views was adopted in *Piratin v IRC* 54 TC 730. Here a payment was made from A to B on terms which obliged B to pay an equivalent sum to C. This was held not to amount to an indirect payment to C, because B was not “accountable” for the sum received. The Judge considered the comments of Lords Simonds, Normand and Oaksey set out above and continued:

One thus finds both Lord Normand and Lord Oaksey expressing the opinion in the *Potts* case that a sum cannot be said to be "paid indirectly" to the settlor within the section, unless it is paid into the hands of someone accountable to him.

“Accountable” was understood strictly (I would have thought, unnecessarily so):

It is common ground that the word "accountable" in an English law sense is not apt to describe the position of a person who is under a mere contractual obligation, such as that owed by [B] to the two settlors.

[Counsel for the Revenue] suggested that Lord Normand may have intended to use the word according to a broader meaning attributed to it by Scottish lawyers, but I can see no sufficient justification for that inference. I think that Lord Normand referred to strict accountability in English law, and Goff J. took the same view in *IRC v Wachtel* 46 TC 543 at page 555F....

He rejected the view that the word "indirectly" adds nothing but also rejected Lord MacDermott's wide approach:

The phrase "or indirectly" in the context of s 451(1) undeniably gives rise to problems of interpretation. If, however, a broader meaning is attributed to it than that attributed to it by Lord Normand and Lord Oaksey, so that it is capable of including payments to persons who are not accountable to the settlor, it is difficult to see where the line should be drawn.

In 1981 Parliament reversed these decisions by adding a new subsection to what was then s.451 ICTA 1970:

- (9) For the purposes of this section there shall be treated as a capital sum paid to the settlor by the trustees of the settlement any sum which—
- (a) is paid by them to a third party at the settlor's direction or by virtue of the assignment by him of his right to receive it; or
 - (b) is otherwise paid or applied by them for the benefit of the settlor...

The 1981 Act also introduced s.87 regime including the provision which is now s.97(5) TCGA:²²

... a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—

- (a) he receives it from them directly or indirectly, or
- (b) [i] it is directly or indirectly applied by them in payment of any debt of his or
- [ii] is otherwise paid or applied for his benefit, or
- (c) it is received by a third person at the beneficiary's direction.

The wording of (b) and (c) has its equivalents in s.451(9)(a)(b). In practice these paragraphs are not so important. However, the *Potts* and

²² Then s.83(5) FA 1981.

Piratin cases set out above are relevant to discussion of the meaning of “directly or indirectly” in paragraph (a), which is important, and to which I can now turn.

48.7.1 *Indirect receipt from trustees*

Section 97(5) TCGA provides:

... a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
(a) he receives it from them directly or indirectly...

This raises two problems. Firstly, the meaning of “indirectly”. There are two possible views:

- (1) The word “indirectly” applies to payments to X via someone accountable to X (following the approach of Lords Normand and Oaksey in *Potts*). I refer to this as **“the narrow view”**.
- (2) The word “indirectly” applies to payments “in some circuitous way designed to put the money under his control eventually” (following the approach of Lord MacDermott in *Potts*). I refer to this as **“the wide view”**.

There are two difficulties with the wide view. The first is that raised in *Piratin*:

If, however, a broader meaning is attributed to [indirectly] than that attributed to it by Lord Normand and Lord Oaksey, so that it is capable of including payments to persons who are not accountable to the settlor, it is difficult to see where the line should be drawn.

Secondly, if it is possible for one person to receive a payment directly, and another to receive the same payment indirectly, there is the problem of double taxation, as each may be taxed on the payment. The double taxation problem arises if there is held to be an indirect payment to C where:

- (1) (a) Trust 1 makes a payment to B; and
(b) B makes a payment to C;

Or where:

- (2) (a) Trust 1 makes a payment to trust 2; and
(b) Trust 2 makes a payment to C.

In case (1) there is in principle double taxation in the form of tax on both B and C.²³ In case (2) there is in principle double taxation on C.²⁴ There is no double taxation in some cases²⁵ but one cannot say that the question of whether there is an indirect payment depends on whether there is double taxation.²⁶

These considerations support the narrow view. The wider view was however adopted in *Herman v HMRC* [2007] STC (SCD) 571. This was an arrangement of type (2). The Special Commissioner held that B had received funds directly from trust 2²⁷ and indirectly from trust 1. This is an unsatisfactory decision. No attempt was made to explain where to draw the line, ie where a capital payment is or is not received indirectly from trustees, thus leaving taxpayers (and indeed HMRC) none the wiser in other cases:

21 The right approach, I think, is to make an enquiry, using whatever signposts appropriate to the circumstances are available, and to determine whether the receipts of [B] can properly be linked to the disposition from [trust 1] as their indirect source.

“Properly linked” to trust 1 as their “indirect source” is, I think, intended as a paraphrase of the statutory words “received indirectly from” trust 1; but it does not take matters any further as it is even less clear than the statutory words.

An obvious *signpost* will be the existence of a plan, if there is one. In the present circumstances the appointment by the trustees of [trust 1] was in pursuance of a scheme ...; it will be relevant to the enquiry to determine whether the plan as a whole envisaged that [B] should receive the amounts that they did. If the relevant receipt resulted by accident or on account of circumstances not envisaged by the scheme, then the linkage *may* not be there.

23 Assuming the payments to B and to C can be matched to a s.2(2) amounts (trust gains). It is assumed in these examples that B and C are both beneficiaries. For the position if B or C are not, see 48.12.1 (Receipt by beneficiary and non-beneficiary).

24 Assuming the payment can be matched to a s.2(2) amounts in trust 1 and trust 2.

25 Eg if B is non-resident; or if trust 1 has no trust gains.

26 If the temporary non-resident rules are in point, ie if B is temporarily non resident, it may not be determined for some years whether there is double taxation.

27 [2007] STC (SCD) 571 at [17].

This is too tentative. Unless one takes the narrow view, which *Herman* rejected, a plan of the kind found in *Herman* is not the signpost but the end of the matter; conversely if the receipt resulted by accident (assuming trusts have accidents) then the linkage cannot be there.

The second signpost is to analyse the trust law and determine whether [trust 2] “served as a vehicle to receive and continue the act of bounty effected by” the trustees²⁸ of [trust 1] (see the words of Lord Walker in para 41 of *West v Trennery*)...

This is misconceived, for *all* transferee trusts “serve as a vehicle to receive and continue the act of bounty” effected by the settlor of the transferor trust.²⁹

While the taxpayer in *Herman* had the better argument, the jurisprudence of legal realism suggests the temptation to knock down the tax avoidance scheme involved may prove irresistible. There is no point in looking to the decision to find the test of when a payment from trust 2 should also be regarded as an indirect payment from trust 1. The guidance is not there.

We are therefore thrown back to first principles. On that basis it is considered that the concept of indirect receipt should be limited to cases where there is a tightly drawn up scheme (as in *Herman*) under which (in the absence of the most unlikely changes of circumstances) payments are inevitably to be made from trust 1 to trust 2, and from trust 2 to the beneficiary. The scheme of s.90 TCGA (and the double taxation consequences from any other view) show that this is the case. This view has support in *Burton v HMRC*:

This is not a ‘conduit’ case like *Herman v HMRC* where the assets went in and the money came out in a very short time.³⁰

In such cases the double tax problem can be resolved by saying that if there is an indirect payment to B, one ignore the direct payment. There cannot be both.

28 “Trustees” is a slip for settlor, for the trustees do not confer any bounty.

29 Lord Walker said this in the passage to which the judge refers: *West v Trennery* 76 TC 713, HL, at [41].

30 *Burton v HMRC* [2009] SFTD 682 at [14].

48.8 Capital payment from close company

Section 96(1) TCGA provides:

Where a capital payment is received from a qualifying company which is controlled by the trustees of a settlement at the time it is received, for the purposes of sections 87 to 90 and Schedule 4C it shall be treated as received from the trustees.

48.8.1 “Qualifying company”

Section 96(6) TCGA provides:

For the purposes of subsection (1) above a qualifying company is a close company or a company which would be a close company if it were resident in the UK.

For a note on this terminology, see 80.22.1 (Non-resident close company).

48.8.2 “Control by the trustees”

Section 96 TCGA provides:

(7) For the purposes of subsection (1) above a company is controlled by the trustees of a settlement if it is controlled by the trustees alone or by the trustees together with a person who (or persons each of whom) falls within subsection (8) below.

(8) A person falls within this subsection if—

- (a) he is a settlor in relation to the settlement, or
- (b) he is connected with a person falling within paragraph (a) above.

“Control” is defined in s.96(10) TCGA. This provides a slightly cut down form of the ultra-wide sense of control. The same definition is found in the context of s.86, for a discussion see 47.3.2 (“Control” and “participator”).

In the following discussion it is important to distinguish between:

- (1) Control in the s.96(10) sense (which I call **“control” in the defined sense**).
- (2) Control in the natural sense of the word.

48.8.3 *Consequence of capital payment from company*

This rule is needed because s.87 only applies if a beneficiary receives a capital payment from the trustees. A capital payment from a company which was not (directly or indirectly) from the trustees would not be caught.

It might perhaps have been argued that receipt from a company is not receipt indirectly from the trustees even in a case where the trustees control the company in the natural sense of control, though the argument seems implausible.

The rule is applicable in a case where the trustees “control” a company (in the defined sense) even though they do not control the company in the natural sense of control. For instance, if a company is held in equal shares by three separate trusts. No one trust has control in the natural sense of control, and it could reasonably be argued (in the absence of s.96(1)) that a capital payment from the company is not received from the trustees of any of the trusts.

Where a capital payment is received from a company “controlled” (in the defined sense) by several persons, there is no apportionment provision (unlike the rules for a capital payment *to* a company). It is suggested that s.96(1) is a deeming provision which deems the payment to be received from the trustees, but the amount of the capital payment is not affected by the deeming. The amount of the capital payment is not the amount received from the company but the amount actually attributable to the trust. If each trust holds a third of the company, and they act together to procure the payment, each makes a third of the capital payment. But if one trust has control (in the natural sense), and is in a position to make the capital payment, the capital payment is from that trust alone, and not from any trust with some minority holding.

48.9 **Capital payment to non-resident close company**

Section 96(2) TCGA provides:

Where a capital payment is received from the trustees of a settlement (or treated as so received by virtue of subsection (1) above) and it is received by a non-resident qualifying company, the rules in subsections (3) to (6) below shall apply for the purposes of sections 87 to 90 and Schedule 4C.

48.9.1 *Capital payment*

SP 5/92 para 18 provides:

In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are ... not treated as capital payments within TCGA 1992 s 97.

The paragraph sets out a commonsense definition of “wholly owned” and concludes with a qualification:

This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage.

SP 5/92 provides:

40 The payment must, however, be a capital payment within TCGA 1992 s 97(1)—ie it must not be chargeable to income tax on the recipient nor be made under a transaction entered into at arm's length. Intragroup payments which are not capital payments, for example a capital distribution on winding up which represents merely a repayment of capital on shares, or a distribution chargeable to corporation tax, do not fall within the ambit of TCGA 1992 s 96.

48.9.2 *Non-resident qualifying company*

Section 96(9) TCGA provides:

For the purposes of subsection (2) above a non-resident qualifying company is a company which is not resident in the UK and would be a close company if it were so resident.

For a note on this terminology, see 80.22.1 (Non-resident close company).

48.9.3 *Consequence of capital payment to company*

The rules depend on whether:

- (1) the company is controlled by one person alone.
- (2) the company is controlled by 2 or more persons (taking each one

separately).

- (3) the company is controlled by 2 or more persons (taking them together).

Section 96 TCGA provides:

(3) If the company is controlled by one person alone at the time the payment is received, and that person is then resident or ordinarily resident in the UK, it shall be treated as a capital payment received by that person.

(4) If the company is controlled by 2 or more persons (taking each one separately) at the time the payment is received, then—

- (a) if one of them is then resident or ordinarily resident in the UK, it shall be treated as a capital payment received by that person;
- (b) if 2 or more of them are then resident or ordinarily resident in the UK (“the residents”) it shall be treated as being as many equal capital payments as there are residents and each of them shall be treated as receiving one of the payments.

(5) If the company is controlled by 2 or more persons (taking them together) at the time the payment is received—

- (a) it shall be treated as being as many capital payments as there are participators in the company at the time it is received, and
- (b) each such participator (whatever his residence or ordinary residence) shall be treated as receiving one of the payments, quantified on the basis of a just and reasonable apportionment, but where (by virtue of the preceding provisions of this subsection and apart from this provision) a participator would be treated as receiving less than one-twentieth of the payment actually received by the company, he shall not be treated as receiving anything by virtue of this subsection.

48.9.4 *Interaction with temporary non-residence rules*

Section 96 TCGA provides:

(9A) For the purposes of this section an individual shall be deemed to have been resident in the United Kingdom at any time in any year of assessment which in his case is an intervening year for the purposes of section 10A.

(9B) If—

- (a) it appears after the end of any year of assessment that any individual is to be treated by virtue of subsection (9A) above as

having been resident in the United Kingdom at any time in that year, and

- (b) as a consequence, any adjustments fall to be made to the amounts of tax taken to have been chargeable by virtue of this section on any person,

nothing in any enactment limiting the time for the making of any claim or assessment shall prevent the making of those adjustments (whether by means of an assessment, an amendment of an assessment, a repayment of tax or otherwise).

This is to be amended in the FA 2013. The draft clauses in the SRT response paper published in June 2012 are left blank at this point; the work was not yet done.³¹

48.9.5 *Disregard of capital payments to companies*

These are odd rules, to say the least. As often happens, the anomalies may favour the taxpayer. Section 87C TCGA was brought in to counteract this. It provides:

(1) For the purposes of sections 87 and 87A as they apply in relation to a settlement, no account is to be taken of a capital payment (or a part of a capital payment) within subsection (2).

(2) A capital payment is within this subsection if (and to the extent that) it is received (or treated as received) in a tax year from the trustees of the settlement by a company that—

- (a) is not resident in the UK in that year, and
- (b) would be a close company if it were resident in the UK, (and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

48.10 Matching

48.10.1 *Why does matching matter?*

The matching of capital payments with s.2(2) amounts is important for

³¹ The residence response paper expressed the point more tactfully: “6.3 ... the legislation on anti-avoidance in Part 4 is at an earlier stage and the Government is aware that these parts will need refining...”

many reasons:

- (1) *Time of charge*: The s.87 gains accrue in the year that a capital payment is matched with a s.2(2) amount.
- (2) *Amount of charge*: The amount of the s.87 gain is the amount of the capital payment or the amount matched, if less.
- (3) *Which beneficiaries come into charge*: if
 - (a) more than one beneficiary receives capital payments, and
 - (b) there are not enough s.2(2) amounts to match all the capital payments
 the question which capital payment is matched with a s.2(2) amount makes all the difference as to which beneficiary receives s.87 gains.
- (4) *Which capital payments come into charge*: if
 - (a) one beneficiary receives more than one capital payment, some in and some outside the UK; and
 - (b) there are not enough s.2(2) amounts to match all the capital payments
 the question which capital payment is matched with a s.2(2) amount matters for the remittance basis. If a UK benefit is matched, there is a charge; if a non-UK benefit is matched, the s.87 remittance basis offers a defence to the charge.
- (5) *The interest surcharge*, which depends on the time gap between a capital payment and the s.2(2) amount with which it is matched.
- (6) *2008 transitional relief*, which applies where post-2008 capital payments are matched to pre-2008 s.2(2) amounts.

Matching is carried out on a LIFO (last in first out) basis. EN FB 2008 provides a summary:

452. Where the s.2(2) amount is equal to or greater than the capital payments then all the capital payments are matched:

- [1] any surplus s.2(2) amount is carried back to the year preceding the current tax year and any unmatched capital payments of that earlier year are matched to the surplus s.2(2) amount;
- [2] any surplus s.2(2) amount is carried back to the preceding year and matched with unmatched capital payments of that year, and so on, until the s.2(2) amount has been reduced to nil or there are no unmatched capital payments left in any earlier year; and
- [3] any surplus s.2(2) amount left after matching to previous years is available to match against future capital payments.

453. Where the amount of capital payments for the latest relevant tax year is greater than the s.2(2) amount for that year, then the surplus

capital payments are carried back in the same way as surplus s.2(2) amounts, matching the surplus capital payments against the unmatched trust gains of each earlier year, starting with the latest year first and only moving back to an earlier year where there are no unmatched trust gains left in the later year. Any capital payments that remain unmatched are carried forward from the current tax year to be matched against the s.2(2) amounts of future years. ...

455. Note that:

- [1] the matching rules are modified by new subs.(4) of s.762 ICTA in relation to offshore income gains; and
- [2] capital payments are matched to trust gains within a given tax year on a pro rata basis, not on a daily basis.

The rules changed from a FIFO to a LIFO basis in 2008. HMRC did not state why they made this change. I surmise that it was done to minimise the benefit of 2008 transitional relief, which applies if post-2008 capital payments are matched with pre-2008 s.2(2) amounts. The old rule would have maximised the benefit of the relief, so that very large trusts with substantial s.2(2) amounts may have been free of CGT for a substantial period of time. Had the reason been given, there might have been some debate about whether the benefit justified the change, but as it was, there was none. But there it is.

48.10.2 *The statute*

Section 87A TCGA provides:

- (1) This section supplements s.87.
- (2) The following steps are to be taken for the purposes of matching capital payments with s.2(2) amounts.

Step 1

Find the s.2(2) amount for the relevant tax year.

Step 2

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

Armed with these figures we proceed to the matching rule:

Step 3

The s.2(2) amount for the relevant tax year is matched with—

- (a) if the total amount of capital payments received in the

- relevant tax year does not exceed the s.2(2) amount for the relevant tax year, each capital payment so received, and
- (b) otherwise, the relevant proportion of each of those capital payments.

“The relevant proportion” is the s.2(2) amount for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.

I refer to a case within (a) as a “**surplus s.2(2) amount**” and a case within (b) as a “**surplus capital payment**”.

The next step is a recomputation of the s.2(2) amount and of the amount of capital payments

Step 4

[1] If para (a) of Step 3 applies—

That is, if there is a surplus s.2(2) amount—

- (a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and
- (b) reduce the amount of those capital payments to nil.

I refer to the s.2(2) amount after this reduction as “**the unmatched s.2(2) amount**”.

[2] If para (b) of that Step applies—

That is the case of a surplus capital payment—

- (a) reduce the s.2(2) amount for the relevant tax year to nil, and
- (b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

I refer to the amount of the capital payments after this deduction as “**the unmatched capital payments**”.

Then one starts again at the beginning, but with modifications:

Step 5

[1] Start again at Step 1 (unless subs.(3) applies).

[2] If the s.2(2) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—

- (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
- (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

I again refer to a case within step 5[2] (where there is an unmatched s.2(2) amount) as a “**surplus s.2(2) amount**”.

Amended as step 5[2] directs, Steps 1-4 become:

Step 1

Find the s.2(2) amount for the relevant tax year [ie the unmatched s.2(2) amount].

Step 2

Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year in the latest tax year which—~~

- (a) *is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) *is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

Step 3

The s.2(2) amount for the relevant tax year is matched with—

- (a) if the total amount of capital payments received ~~in the relevant tax year in the latest tax year which—~~
 - (a) *is before the last tax year for which Steps 1 to 4 have been undertaken, and*
 - (b) *is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

does not exceed the [unmatched] s.2(2) amount for the relevant tax year, each capital payment so received, and

- (b) otherwise, the relevant proportion of each of those capital payments.

“The relevant proportion” is the [remaining] s.2(2) amount for the relevant tax year divided by the total amount of capital payments received ~~in the relevant tax year in the latest tax year which—~~

- (a) *is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) *is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

Step 4

If para (a) of Step 3 applies—

- (a) reduce the [unmatched] s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and

- (b) reduce the amount of those capital payments to nil.
- If para (b) of that Step applies—
- (a) reduce the [unmatched] s.2(2) amount for the relevant tax year to nil, and
 - (b) reduce the [unmatched] amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

Eventually the unmatched s.2(2) amount is reduced to nil (ie all the s.2(2) amount is matched). Then step 5[2] ceases to apply. The journey then takes us to step 5[3]:

Step 5

[3] If the s.2(2) amount for the relevant tax year (as so reduced) is nil, read references to the s.2(2) amount for the relevant tax year as the s.2(2) amount for the latest tax year—

- (a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and
- (b) for which the s.2(2) amount is not nil.

I refer to a case within step 5[3] as a “**surplus capital payment**”. This is a case where:

- (1) there is no unmatched s.2(2) amount for the relevant year;
- (2) there is a s.2(2) amount for an earlier year.

Amended as step 5[3] directs, steps 1-4 become:

Step 1

Find the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year* —

- (a) *which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) *for which the s.2(2) amount is not nil.*

Step 2

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

Step 3

The s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year*—

- (a) *which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) *for which the s.2(2) amount is not nil*

is matched with—

- (a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year*—

- (a) *which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) *for which the s.2(2) amount is not nil.*

each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

“The relevant proportion” is the s.2(2) amount ~~for the relevant tax year for the latest tax year—~~

(a) *which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

(b) *for which the s.2(2) amount is not nil.*

divided by the total amount of capital payments received in the relevant tax year.

Step 4

If para (a) of Step 3 applies—

(a) reduce the s.2(2) amount ~~for the relevant tax year for the latest tax year—~~

(a) *which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

(b) *for which the s.2(2) amount is not nil.*

by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

If para (b) of that Step applies—

(a) reduce the s.2(2) amount ~~for the relevant tax year for the latest tax year—~~

(a) *which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

(b) *for which the s.2(2) amount is not nil.*

to nil, and

(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

48.10.3 *When to stop*

Section 87A(3) TCGA (incorporated at step 5[1]) states when one can stop repeating these steps:

This subsection applies if—

(a) all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil, or

(b) the s.2(2) amounts for the relevant tax year and all earlier tax years have been reduced to nil.

That is, one stops when there are no unmatched capital payments or s.2(2) amounts.

Section 87A(4) TCGA provides:

The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

That seems self-evident.

48.10.4 *HMRC example: surplus s.2(2) amount*

EN FB 2008 provide two examples. *Text in italics represents HMRC comments:*

56. Section 87A: Example 1: section 2(2) amount is greater than the total amount of capital payments for latest tax year:

The facts assumed in the example are as follows:

2008-09: *no surplus trust gains or surplus capital payments*

<i>Year</i>	<i>Capital payment</i>	<i>s.2(2) amount</i>
2009-10:	£100k	nil
2010-11:	£200k	nil
2011-12:	£500k	nil
2012-13:	£500k	£2m

I set out the text of the relevant steps in the analysis.

Step 1

Find the s.2(2) amount for the relevant tax year.

Step 2

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus s.2(2) amount, because “the total amount of capital payments received in the relevant tax year” (£500k) does not exceed “the s.2(2) amount for the relevant year” (£2m). Accordingly:

Step 3

The s.2(2) amount for the relevant tax year is matched with—

(a) ... each capital payment so received,

Thus step 3 states that £2m (the s.2(2) amount for 2012/13) is matched with the £500k capital payment. There are two difficulties with this. First, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.2(2) amount, and step 3 tells us that the s.2(2)

amount is matched with the capital payment. The answer is that matching is by implication a reflexive operation, ie if A is matched with B, then B is matched with A.

Secondly, applying step 3 literally, the capital payment (£500k) is matched with the *entire* s.2(2) amount (£2m). This does not matter because s.87(3) TCGA restricts the charge to the amount of the capital payment. In order to follow s.87(3) one needs to read it together with s.87(2):

(2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.2(2) amount for the relevant tax year or any earlier tax year.

(3) The amount of chargeable gains treated as accruing is equal to—

- (a) the amount of the capital payment, or
- (b) if only part of the capital payment is matched, the amount of that part.

But the HMRC analysis is as follows:

Match as follows:

a. 2012-13 capital payments £500,000 match to £500,000 gains.

The HMRC analysis (wisely) does not try to refer to the statutory steps which authorise this conclusion. (Indeed, there is no reason to think that the author of the HMRC example read the legislation.) But the end result is the same.

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

Step 4

If para (a) of Step 3 applies—

- (a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and
- (b) reduce the amount of those capital payments to nil.

So our revised table becomes:

<i>Year</i>	<i>Capital payment</i>	<i>s.2(2) amount</i>
2009-10:	£100k	nil
2010-11:	£200k	nil
2011-12:	£500k	nil
2012-13:	£0 £500k	£1.5 £2m

The HMRC analysis is as follows:

- [1] 2012-13 capital payments reduced to nil.*
- [2] Unmatched 2012-13 trust gains reduced to £1.5 million.*
- [3] Refer unmatched trust gains to preceding year.*

Point [1] is correct. Points [2] and [3] are a fair paraphrase.

Our journey takes us to step 5:

Step 5

- [1] Start again at Step 1 (unless subsection (3) applies).
- [2] If the s.2(2) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
 - (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
 - (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

There is still a surplus s.2(2) amount (the s.2(2) amount for the relevant tax year is not nil, it is now £1.5m).

We revert to step 2 which now reads:

Step 2

Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*

- (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries*

The “latest tax year” is now 2011-12 and we can take the figures from the revised table.

We move on to step 3. This is a surplus s.2(2) amount case, because “the

total amount of capital payments received in the latest tax year” (£500k) does not exceed “the s.2(2) amount for the relevant year” (£1.5m). Accordingly:

Step 3

The s.2(2) amount for the relevant tax year is matched with—

(a) ... each capital payment so received,

Thus step 3 states that £1.5m (the unmatched s.2(2) amount) is matched with the £500k capital payment. But the HMRC analysis is as follows:

b. 2011-12 unmatched capital payments £500,000 match to £500,000 gains.

As noted, this is a loose paraphrase of step 3, but it does not matter.

We move on to step 4. Ours is a step 3(a) case, so step 4 provides:

Step 4

If para (a) of Step 3 applies—

(a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

So:

(a): reduce the s.2(2) amount for the relevant year thus: £1.5m-£500k = £1m.

(b): reduce the capital payment for the latest year [2011-12] to nil.

The HMRC analysis is as follows:

2011-12 capital payments reduced to nil.

Unmatched 2012-13 trust gains reduced to £1 million.

Refer unmatched trust gains to preceding year.

The process repeats once again, but “the latest tax year” now becomes 2009-10. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

2010-11 unmatched capital payments £200,000 match to £200,000 gains.

2010-11 capital payments reduced to nil.

*Unmatched 2012-13 trust gains reduced to £800,000.
Refer unmatched trust gains to preceding year.*

The process repeats once again, but “the latest tax year” now becomes 2009-10. It is not necessary to set out the steps. The HMRC analysis (or paraphrase) is as follows:

*d. 2009-10 unmatched capital payments £100,000 match to £100,000 gains.
2010-11 capital payments reduced to nil.
Unmatched 2012-13 trust gains reduced to £700,000.
Refer unmatched trust gains to preceding year.*

At this point s.87A(3) TCGA applies because “all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil”. Accordingly the steps come to an end. The HMRC analysis is:

e. No unmatched capital payments in 2008-09 or earlier years.

Lastly, the HMRC analysis provides:

Carry forward unmatched trust gains of 2012-13 of £700,000 to be matched against capital payments of 2013-14 and subsequent years.

This is a reference to step 1 as amended by step 5[3] but the point does not actually arise under the facts of the HMRC example.

It is noteworthy that in order to deal with the facts of the HMRC example (which is a simplification of the facts of a typical case in real life because there is only one s.2(2) amount) one has to carry out 15 steps.

48.10.5 *HMRC example: surplus capital payment*

HMRC’s second example is as follows

57. Section 87A: Example 2: capital payments are greater than section 2(2) amount for latest tax year: The facts assumed in the example are as follows:
2008-09: no surplus trust gains or surplus capital payments

Year	Capital payment	s.2(2) amount
2009-10:	<i>nil</i>	£100k
2010-11:	<i>nil</i>	£200k
2011-12:	<i>nil</i>	£500k
2012-13:	£2m	£500k

I set out the text of the relevant steps in the analysis.

Step 1

Find the s.2(2) amount for the relevant tax year.

Step 2

Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus capital payment because “the total amount of capital payments received in the relevant tax year” (£2m) does exceed “the s.2(2) amount for the relevant year” (£500k). Accordingly:

Step 3

The s.2(2) amount for the relevant tax year is matched with—
(b) ... the relevant proportion of each of those capital payments.

“The relevant proportion” is the s.2(2) amount for the relevant tax year (£500k) divided by the total amount of capital payments received in the relevant tax year (£2m) = 0.25.

Thus step 3 states that £500k (the s.2(2) amount) is matched with one quarter of the capital payment = £500k. As noted, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.2(2) amount, and step 3 tells us that the *s.2(2) amount* is matched with the capital payment. The solution is that matching is a reflexive operation, ie if A is matched with B, then B is matched with A.

The HMRC analysis is as follows:

Match as follows:

a. 2012-13 capital payments £500,000 match to £500,000 gains.

We move on to step 4. Ours is a surplus capital payment case, so step 4

provides:

Step 4

[2] If para (b) of that Step [step 3] applies—

- (a) reduce the s.2(2) amount for the relevant tax year to nil, and
- (b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

So our revised table becomes:

Year	Capital payment	s.2(2) amount
2009-10:	nil	£100k
2010-11:	nil	£200k
2011-12:	nil	£500k
2012-13:	£1.5 £2m	£0 £500k

The HMRC analysis is as follows:

Unmatched 2012-13 capital payments reduced to £1.5 million.

Refer unmatched capital payments to preceding year.

Our journey takes us to step 5.

Step 5

[1] Start again at Step 1 (unless subs.(3) applies)....

[3] If the s.2(2) amount for the relevant tax year (as so reduced) is nil, read references to the s.2(2) amount for the relevant tax year as the s.2(2) amount for the latest tax year—

- (a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and
- (b) for which the s.2(2) amount is not nil.

This is a surplus capital payment case, (the s.2(2) amount for 2012–13 is now nil).

We revert to step 3 which now reads:

Step 3

The s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*

- (a) *which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
- (b) *for which the s.2(2) amount is not nil*

is matched with—

(a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount ~~for the relevant tax year, for the latest tax year—~~

(a) *which is before the last tax year for which Steps 1 to 4 have been undertaken,*

(b) *for which the s.2(2) amount is not nil.*

each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

“The relevant proportion” is the s.2(2) amount ~~for the relevant tax year for the latest tax year~~

(a) *which is before the last tax year for which Steps 1 to 4 have been undertaken,*

(b) *for which the s.2(2) amount is not nil*

divided by the total amount of capital payments received in the relevant tax year.

The “latest tax year” is now 2011-12. This is a surplus capital payment case because “the total amount of capital payments received in the relevant tax year” (now £1.5m) does exceed “the s.2(2) amount for the latest year” (£500k). Accordingly:

Step 3

The s.2(2) amount for the latest tax year is matched with—

(b) ... the relevant proportion of each of those capital payments.

The relevant proportion is one third.

The process repeats again and again. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

2012-13 trust gains reduced to nil.

b. 2011-12: match 2012-13 capital payments £1.5 million to £500,000 gains.

2011-12 trust gains reduced to nil.

Unmatched 2012-13 capital payments reduced to £1 million.

Refer unmatched capital payments to preceding year.

c. 2010-11: match 2012-13 capital payments £200,000 to £200,000 gains.

2010-11 trust gains reduced to nil.

Unmatched 2012-13 capital payments reduced to £800,000.

Refer unmatched capital payments to preceding year.

d. 2009-10: match 2012-13 capital payments £100,000 to £100,000 gains. 2010-11 trust gains reduced to nil.

Unmatched 2012-13 capital payments reduced to £700,000.

*Refer unmatched capital payments to preceding year.
e. No unmatched trust gains in 2008-09 or earlier years.
Carry forward unmatched capital payments of 2012- 13 of £700,000 to
be matched against trust gains of 2013-14 and subsequent years.*

It is noteworthy that in order to deal with the facts of the HMRC example (which is a simplification of the facts of a typical case in real life for there is only one capital payment in five years) one has to carry out 15 steps.

48.10.6 *Year of death of beneficiary*

If a beneficiary dies in a tax year, all gains accruing to the trustees in that year are s.2(2) amounts, which can be matched to capital payments made to the beneficiary, even post-death gains. However gains of a subsequent tax year cannot be matched. Section 87 does not say so expressly but the beneficiary could not be subject to CGT on s.87 gains, as the charge is limited to UK residents (s.2 TCGA) and a deceased person is not resident in the UK. That has to be the rule: otherwise it could happen that an estate of a beneficiary who received capital payments could not be completely administered, as there might be a possibility of gains accruing at any time in the future.

Contrast the rule for s.86 which does not apply to gains accruing to the trustees in the year that the settlor dies, even pre-death gains.³² Perhaps the reason for the s.87 rule is that it works (slightly) more fairly when two beneficiaries receive capital payments in a tax year and one of them dies during that year.

48.10.7 *Commentary: step-based drafting*

The pre-2008 s.87 provided:

(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.

³² See 47.11 (Year of death of settlor).

(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.

(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.

No reader who labouriously works through the almost endless iterative steps of s.87A will consider the new style of wording is an improvement on the old. I first speculated whether the legislation was drafted by someone who trained to write computer programs rather than legislation. The correct explanation seems to be that “step-based drafting” was an innovation of the tax law rewrite project in the search for new and clearer methods of drafting; the drafter of the FA 2008 sought to adopt the same technique, but in more clumsy hands the technique delivered obscurity rather than clarity.

This does not necessarily mean that step-based drafting is a bad technique, but it certainly demonstrates how it can be used to bad effect. Finance Bills are generally drafted in a hurry (the FA 2008 was a mad panic) and clarity was a victim of the process.

The fundamental problem however is not the drafting, but the need to match capital payments with trust gains for a year.

48.11 Planning by matching

Matching is a rough and ready rule and trustees need to plan carefully to avoid unfairness.

48.11.1 Planning to obtain remittance basis

Suppose:

- (1) Years 1–10: A beneficiary (“B”) occupies a UK house held by a trust. This is a capital payment.
- (2) Year 11: The house is sold for £1m gain and a s.2(2) amount arises. In principle the s.2(2) amount in year 11 is matched with the capital payments in years 1–10. The s.87 gain is taxed on an arising basis of the benefit received in the UK. If B is UK resident in year 11, this is an expensive matter. Suppose:

(3) Year 11: The trustees make a capital payment of £1m to B outside the UK.

The s.2(2) amount is matched with the £1m capital payment and the s.87 gain is taxed on the remittance basis.

48.11.2 *Planning to avoid interest surcharge*

Since the surcharge matches on a LIFO basis, the charge can be avoided by realising gains in the year that any capital payment is made, so as to frank any capital payment with current year gains. If gains are not actually realised, the rules in schedule 4B TCGA make it fairly easy to realise deemed gains which may do just as well.³³

48.12 Capital payment received by non-beneficiary

Chargeable gains are treated as accruing in the relevant tax year to *a beneficiary of the settlement* who has received a capital payment from the trustees.

At first sight, the charge only applies to beneficiaries so if a capital payment is received by a non-beneficiary there is no charge. However, s.97(8) TCGA provides:

In a case where—

- (a) at any time on or after 19th March 1991 a capital payment is received from the trustees of a settlement or is treated as so received by virtue of section 96(1),
- (b) it is received by a person, or treated as received by a person by virtue of section 96(2) to (5),
- (c) at the time it is received or treated as received, the person is not (apart from this subsection) a beneficiary of the settlement, and
- (d) subsection (9) or (10) below does not prevent this subsection applying,

for the purposes of sections 86A to 90 and Schedule 4C the person shall be treated as a beneficiary of the settlement as regards events occurring at or after that time.

³³ See 49.1 (Borrowing by non-resident trust: Sch 4B TCGA).

The drafting is clumsy: the s.87 charge applies to a “beneficiary” who receives a capital payment, but any person who receives a capital payment is treated as a beneficiary: it would have been easier to say that the charge applies to a “person” who receives a capital payment and drop the (now only nominal) requirement that recipient has to be a beneficiary! But it comes down to the same thing.

The reader may wonder how a capital payment could be received by a non-beneficiary. In general, trustees may only confer benefits on beneficiaries. However, there are cases where it could happen:

- (1) A capital payment to a non-resident close company, which is treated as received by the persons who control it;³⁴ those persons might not be beneficiaries.
- (2) An exercise of the power of advancement for the benefit of B (a beneficiary) may take the form of a payment to a third person, X (not a beneficiary). This is not a capital payment received by B³⁵ but it is a capital payment received by X.
- (3) Beneficiaries may authorise trustees to make a payment to a non-beneficiary.

On the other hand if B (a beneficiary) *directs* trustees to make a payment to a third person, X, the benefit is treated as received by B (not X).³⁶ If the payment is made in breach of trust, there is no capital payment (or the value of the benefit is nil).³⁷

It is possible that a person may be a beneficiary at the time of a capital payment but not when the s.87 gain accrues (if the trust gain is matched in a later year and the person has then ceased to be a beneficiary). Section 97(8) TCGA does not apply in such a case, because the condition in s.97(8)(a) does not apply. It is considered that s.87(2) can and should be construed so as to apply in this case; otherwise there would be a strange anomaly in the legislation. That is, when it states that s.87 gains accrue to “a beneficiary of the settlement who has received a capital payment” it is sufficient that the recipient is a beneficiary at the time they receive the capital payment, it is not required that the recipient is also a beneficiary at the time that the s.87 gains accrue.

34 See 48.9 (Capital payment received by non-resident close company).

35 See 29.4.13 (Moral, sentimental and other benefits difficult to quantify).

36 See 48.7 (Receipt from the trustees).

37 See 29.4.16 (Breach of trust).

48.12.1 *Receipt by beneficiary and non-beneficiary*

There are two exceptions to the rule in s.97(8). One concerns transfers between trusts and is discussed elsewhere.³⁸

The other is s.97(9) TCGA which provides:

Subsection (8) above shall not apply where a payment mentioned in para (a) is made in circumstances where it is treated (otherwise than by subsection (8) above) as received by a beneficiary.

I do not understand the purpose of this. It concerns a case where:

(1) s.97(8) would otherwise apply, that is, in short:

- (a) a capital payment is received from the trustees of a settlement (or is treated as so received)
- (b) it is received by a person, (or treated as received by a person),
- (c) at the time it is received (or treated as received) the person is not a beneficiary of the settlement

but

(2) the capital payment is treated as received by a beneficiary.

The exception seems to be considering a case where a capital payment is received by two persons, one a beneficiary and the other a non-beneficiary. Suppose an arrangement where X receives property directly and Y later receives it indirectly.

(1) Assume one of X or Y is a beneficiary but not both. Perhaps in this case the non-beneficiary is not charged, because the capital payment is “treated as received by a beneficiary”. However, this is a case where the payment is *actually* received by the beneficiary (directly or indirectly), not a case where it is *treated* as received; but perhaps the words “treated as” here include an actual receipt.

(2) Assume neither X nor Y are a beneficiary. In that case, X is treated as a beneficiary, but not Y. But this scenario is very far fetched.

Perhaps the subsection has no application.

48.13 **Interest surcharge**

Section 91(1) TCGA provides:

³⁸ See 48.18.1 (No s.87 charge on transfer between trusts).

This section applies if—

- (a) chargeable gains are treated under s.87 or 89(2) as accruing to a beneficiary by virtue of the matching (under s.87A) of all or part of a capital payment with the s.2(2) amount for a tax year (“the relevant tax year”),
- (b) the beneficiary is charged to tax by virtue of that matching, and
- (c) the capital payment was made more than one year after the end of the relevant tax year.

It is not enough that chargeable gains to accrue to a beneficiary, and that the beneficiary is charged to tax; this must be “by virtue of the matching”. But since gains never accrue unless there is matching, and the beneficiary is never charged unless there is matching, the words appear to be otiose. Section 91 goes on to deal with part matching:

(1A) Where part of a capital payment is matched, references in subsections (2) and (3) to the capital payment are to the part matched.

We then turn to the tax increase:

- (2) [a] The tax payable by the beneficiary in respect of the payment shall be increased by the amount found under subsection (3) below,
- [b] except that it shall not be increased beyond the amount of the payment;
- [c] and an assessment may charge tax accordingly.

Para 2[b] stops the Treasury increasing the rate of tax beyond 100%. One would hope it is not necessary.

Para 2[c] is otiose.

Section 91 goes on to set out the amount of the increase:

- (3) The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this section) carried interest for the chargeable period at the rate of 10 per cent per annum.

Thus we have a notional 10% interest – the rate bears no relation to actual interest rates – for a period called a chargeable period.

- (4) The chargeable period is the period which—
 - (a) begins with the later of the 2 days specified in subsection (5) below, and
 - (b) ends with 30th November in the year of assessment following that in which the capital payment is made.
- (5) The 2 days are—
 - (a) 1st December in the tax year immediately after the relevant tax year, and
 - (b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

I call this the “**interest surcharge.**” It is not in fact interest but the wording is designed to give it the some of the appearance of interest.

As the chargeable period cannot exceed 6 years and the maximum surcharge is 60% of the tax. As the top CGT rate is 28% the maximum rate of tax on a capital payment is therefore 44.8%. Where the full surcharge applies, there is not a very great difference between IT and CGT rates.

For completeness, the Treasury may alter the rules;³⁹ but they have never done so.

What is the position if the s.87 remittance basis applies? Section 12(2) TCGA (applied by s.87B TCGA, discussed below) provides:

Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign [deemed, s.87] chargeable gains are remitted to the UK.

One might argue that there is no interest surcharge, because the gains are not charged to tax by virtue of matching; they are charged by virtue of the remittance. But the better view is the surcharge applies (by reference to the year of capital payment, not by reference to the year of remittance),

39 Section 91 TCGA provides:

“(6) The Treasury may by order substitute for the percentage specified in subsection (3) above (whether as originally enacted or as amended at any time under this subsection) such other percentage as they think fit.

(7) An order under subsection (6) above may provide that an alteration of the percentage is to have effect for periods beginning on or after a day specified in the order in relation to interest running for chargeable periods beginning before that day (as well as interest running for chargeable periods beginning on or after that day).”

and this is the HMRC view: see 48.15.1 (HMRC examples).

48.13.1 *Commentary*

What is the reason for the interest surcharge? It is to counter the perceived advantage that UK trusts pay CGT on an arising basis, but non-resident trusts (outside s.86) pay CGT on a capital payments basis, which is more favourable. But it works very oddly and unfairly, particularly after the extension of s.87 to foreign domiciled settlors and beneficiaries in 2008. For instance, consider a trust set up some years ago by an Australian for Australian beneficiaries; one beneficiary comes to the UK and receives a capital payment here. Why should there be a surcharge?

The surcharge is not likely to bring in sufficient tax to justify the complications and unfairness that arises. The case for repeal of the rule is very strong.

48.14 **Non-resident beneficiary**

It does not matter that s.87 gains accrue to a beneficiary who is non-resident (unless the temporary non-residence rules apply) since the gains are not subject to CGT. But the time which matters is when the gains accrue, so the matching rules need to be considered and pose something of a trap.

Suppose:

(1) Year 1: A capital payment is made to a beneficiary (“B”) when B is non-resident. There are no s.2(2) amounts so that the capital payment is not matched.

(2) Year 2: A s.2(2) amount accrues when B is UK resident.

The capital payment is matched in year 2, so the s.87 gain is chargeable (subject to the s.87 remittance basis).

48.14.1 *Planning for beneficiary coming to UK*

This problem arises if a beneficiary has an unmatched capital payment before coming to the UK. In this situation the trustees should trigger gains in year 1. The capital payment will then be matched in year 1, and will not come into charge in year 2.

48.14.2 *Commentary*

It is suggested that (subject to the temporary non-residence rules) a capital payment accruing to a non-resident should not come into charge. The present charge only affects those who fail to take the necessary planning, and in many of those cases it is likely that it will be overlooked or tacitly ignored by non-compliant taxpayers.

48.15 **Section 87 remittance basis**

Section 87B TCGA provides a relief which I call the “**s.87 remittance basis**”. Section 87B(1) provides:

This section applies if—

- (a) chargeable gains are treated under s.87 as accruing to an individual in a tax year,
- (b) s.809B, 809D or 809E (remittance basis) applies to the individual for that year, and
- (c) the individual is not domiciled in the UK in that year.

In short, the relief applies to remittance basis taxpayers. Section 87B(2) provides the relief:

The chargeable gains are foreign chargeable gains within the meaning of s.12 (non-UK domiciled beneficiaries to whom remittance basis applies).

The effect of s.87B(2) is to incorporate the ITA remittance basis. Section 87B continues:

(3) For the purposes of Chapter A1 of part 14 of ITA 2007 (remittance basis) treat relevant property or benefits as deriving from the chargeable gains.

(4) For the purposes of subsection (3) property or a benefit is “relevant” if the capital payment by reason of which the chargeable gains are treated as accruing consists of—

- (a) the payment or transfer of the property or its becoming property to which s.60 applies, or
- (b) the conferring of the benefit.

A rule of this kind is needed because s.87 gains (being fictional) could not be remitted. The drafting of s.87B(4) is somewhat clumsy because a capital payment will always fall within (a) or (b) so every capital payment gives rise to relevant property or benefits. But it does not matter.

As to where benefits are received, see 29.36 (Where is a benefit received?).

A capital payment still reduces the s.2(2) amount even though the payment is (un)taxed under the s.87 remittance basis. This is sensible because other beneficiaries (and the trustees) could not know what the position was.

It does not matter whether the s.2(2) amounts (trust gains) accrue on disposals of UK or foreign assets. All that matters is whether the capital payment is remitted to the UK. HMRC agree. FAQ Residence & Domicile – NR trusts provides:

Does it make any difference if the assets in the non-resident trust or underlying non-resident company owned by the trust are UK situated?

There is no difference in the Capital Gains Tax treatment of UK situated vs foreign situated assets when these are owned by a non-resident trust or underlying non-resident company. However, as under current law, any UK source income produced by the trust or company will be taxed on the UK resident settlor or transferor on an arising basis irrespective of whether he has received any benefit if he has power to enjoy such income at the date it arises.

HMRC s.87 guidance provides:

43. The remittance basis applies to the section 87 gain not the gain that created the section 2(2) amount. For example, trustees dispose of an asset held outside the UK creating a section 2(2) amount. In the same year they make a capital payment outside the UK to a non-domiciled beneficiary. The capital payment is matched against the section 2(2) amount. A section 87 gain accrues to the beneficiary who has claimed the remittance basis for that year. The trustees apply the proceeds of the disposal in buying investments in the UK. This remittance of the gain which created the section 2(2) amount is not treated as a remittance of the section 87 gain by the beneficiary.

A capital payment may be remitted to the UK in a year before the s.87

gains accrue, due to the quirky matching rules. Suppose:

- (1) Year 1: a beneficiary receives a benefit; there are no s.2(2) amounts so the benefit is not matched and no s.87 gain accrues.
- (2) Year 2: the beneficiary remits the benefit to the UK. There is still no s.87 gain.
- (3) Year 3: s.2(2) amounts accrue to the trustees and a s.87 gain accrues to the beneficiary.

The s.87 gain is deemed to be remitted in the year it arises (year 3) and not before.⁴⁰

48.15.1 *HMRC examples*

HMRC s.87 guidance note provides:

Example 8 – New section 87B - remittance of capital payment: payment

A is a UK resident and domiciled beneficiary of a non-UK resident settlement. B is a UK resident but non-UK domiciled beneficiary of the same settlement. The settlement owns shares in X Inc. X Inc is an American company registered on the New York Stock Exchange.⁴¹

In 2008-09 the trustees sell shares in X Inc for \$120,000 when the spot rate is £1 = \$1.50. The acquisition cost of the shares was \$20,000 when spot was also £1 = \$1.50. This creates a section 2(2) amount of £66,666 for 2008-09, ie \$100,000 @ 1.50.

In 2010-11 the trustees make capital payments of \$40,000 into the US bank accounts of each beneficiary. The spot rate of the US dollar at the date of the payment is £1 = \$1.75. Chargeable gains of £22,857 accrue to each beneficiary under section 87 in 2010-11 in respect of these capital payments. \$40,000 @ \$1.75 = £22,857.

At the time of writing the annual exempt amount and rate of Capital Gains Tax are not known for 2010-11 and 2012-13. This example assumes the rate of Capital Gains Tax is 18% for both years and the annual exempt amount was £10,000 in 2010-11 and £11,000 in 2012-13.

Beneficiary A has other gains in 2010-11. The overall position is as follows.

- Section 87 gains £22,857
- Other personal gains £40,000
- Other personal losses £20,000
- Annual exempt amount £10,000

The amount on which Capital Gains Tax is chargeable is £32,857. The personal losses can be set only against the other personal gains but the annual exempt

40 See 10.27 (Remittance before income or gains arise).

41 This sentence is irrelevant, as the situs of the trust asset does not matter for s.87 purposes.

amount is allocated first to the section 87 gain leaving £12,857 of that part of the gain chargeable at 18%. The tax due on £12,857 is £2,314 (£12,857 @ 18%). This is increased by £462 (£2,314 @ 20%) because there is a delay of over one year in making the capital payment.

Beneficiary B claims the remittance basis for 2010-11 and leaves the \$40,000 in the US bank account. B also has other gains in 2010-11. These gains and losses arise on the disposal of assets situated in the UK. The overall position is as follows.

- Section 87 gains £22,857
- Other personal gains on UK assets £40,000
- Other personal losses on UK assets £20,000

B does not have an annual exempt amount in 2010-11 because they have claimed the remittance basis. B is not liable to Capital Gains Tax on the section 87 gain of £22,857 because of section 87B. B is liable to CGT at 18% on the full amount of the other net personal gains £20,000.

Because B has claimed the remittance basis they also have to decide whether or not to make an election under section 16ZA TCGA. The effect of that election is allow losses on the disposal of assets situated outside the UK to be set-off against gains, either foreign chargeable gains or gains on the disposal of assets situated in the UK. Unless the election is made the foreign losses will be lost. An effect of the election is that the annual exempt amount cannot be set foreign chargeable gains remitted to the UK, section 16ZB(4). B makes a valid election within the time limit, 31 January 2017.

In 2012-13 B remits \$30,000 of the \$40,000 from the US bank to their UK bank where it is converted to sterling at a rate of £1 = \$2.00 ie £15,000. B is not a remittance basis user in 2012-13. The rate of Capital Gains Tax is 18%. The annual exempt amount is £11,000. The remittance is a disposal of foreign currency in the US bank account giving a loss of £2,142 [$\$30,000 @ \$2.00 = £15,000 - \$30,000 @ 1.75 = £17,142$].

B is liable to Capital Gains Tax in 2012-13 on the following elements.

The section 87 gain is a foreign chargeable gain. Section 12(2) and (3) TCGA provides this chargeable gain is treated as accruing in 2012-13 equal to the full amount of the gains remitted in 2012-13. B has remitted 75% of the £22,857 chargeable gain ($30,000/40,000 \times £22,857 = £17,142$). Section 2(4) TCGA prevents the personal losses, £2,142, being set against this gain. Because of the election under s16ZA neither can the annual exempt amount be set against this part of the gain. Tax is due at 18% on £17,142 = £3,085. This tax is subject to the increase in section 91 TCGA. This is calculated by reference to the year the gain was matched ie 2010-11 not the year the gain was remitted. The rate charged, 20%, will be the same that applied to beneficiary A. The total tax charged on this part of the gain is £3,085 + £617 = £3,702.

If B had not made the election under s16ZA the annual exempt amount could be set against the remitted gains reducing the amount liable to the increase under s91. But they would lose the benefit of losses on any assets situated the UK.

Additionally for 2012-13 B has other personal gains on UK assets of £18,000. Because of the election under s16ZA the personal losses £2,142 can be set against these gains as can the annual exempt amount £11,000. With a tax rate of

18% the total tax charged on the net gains of £4,858 is £971. The total Capital Gains Tax payable for 2012-13 is £4,673 (£3,702 + £971).

The next example concerns capital payments which take the form of benefits (use of accommodation) rather than transfer of cash. Omitting irrelevant detail, the example is as follows:⁴²

Example 9 - New section 87B - Remittance of capital payment: benefit
C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement has s.2(2) amounts.

The trustees (or underlying companies) allow C to use rent-free:

- (1) a property outside the UK and
- (2) a property in the UK.

The HMRC analysis is as follows:

The use of both properties by C gives rise to a capital payment equal to the value of the benefit. These capital payments are matched against the section 2(2) amount and a section 87 chargeable gain accrues to C. Section 87B(2) TCGA provides this is a foreign chargeable gain.

The use of the UK property meets condition A in section 809L. Because section 87B(3) TCGA provides the benefits derive from the chargeable gains the use of that property also meets condition B in section 809L(3)(b) ITA 2007. C is treated as remitting the capital payment created [by] the use of the Devon property to the UK and C is liable to CGT on that payment.

The use of the property outside the UK is not treated as a remittance to the UK and C is not liable to CGT on that payment.

42 The example in full, including its irrelevant detail, is as follows:

“C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement owns 100% of the issued share capital of a Gibraltar holding company which in turn owns 100% of the issued share capital of a Gibraltar company. That company owns a property in Spain. Both companies are non-UK resident.

The company sells the property in Spain creating a section 2(2) amount of £120,000 through section 13 TCGA. The company invests some of the proceeds in the purchase of a smaller property in Spain. C is allowed to use the property rent-free. C is also allowed rent-free use of a cottage in Devon owned by the settlement.”

48.16 Migrant settlements

48.16.1 *UK resident trust becomes non-resident*

Section 89(1) TCGA provides:

Where a period of one or more years of assessment for which s.87 applies to a settlement (“a non-resident period”) succeeds a period of one or more years of assessment for each of which s.87 does not apply to the settlement (“a resident period”), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of sections 87 and 87A if it was not made in anticipation of a disposal made by the trustees in the non-resident period.

48.16.2 *Non-resident trust becomes UK resident*

Section 89 TCGA provides:

- (1A) Subsection (2) applies to a settlement if—
 - (a) a non-resident period is succeeded by a resident period, and
 - (b) in relation to the last tax year in the non-resident period (“the last non-resident tax year”), s.87A(3) applied by virtue of para (a) of that provision (exhaustion of capital payments).⁴³
- (2) Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under s.87A as it applies for that year) with the s.2(2) amount for the last non-resident tax year or any earlier tax year.
- (3) Section 87(3) and (4) and ss.87A to 87C apply for the purposes of subsection (2) as if the relevant tax year were the tax year mentioned in subsection (2).
- (4) Section 87B (remittance basis) applies in relation to chargeable gains treated under subsection (2) as accruing as it applies in relation to chargeable gains treated under s.87 as accruing.

48.17 Dual resident trust – s.88 TCGA

In the context of s.88 TCGA, “**dual resident**” is used as a shorthand to

⁴³ See 48.10.3 (When to stop).

describe a trust which is:

- (1) domestic-law UK resident; and
- (2) treaty-resident in a foreign state with a DTA which has an article conferring CGT relief.

This is a slightly artificial use for the term “dual resident”, which would naturally be used with a slightly wider meaning⁴⁴ but it is difficult to think of a better term and no difficulty arises as long as one bears that meaning in mind.

A dual resident trust would not be within s.87.⁴⁵ This gap is filled by s.88 TCGA:

88 Gains of dual resident settlements

- (1) Section 87 also applies to a settlement for any year of assessment beginning on or after 6th April 1991 if—
 - (a) the trustees are resident and ordinarily resident in the UK during any part of the year, and
 - (b) at any time of such residence and ordinary residence they fall to be regarded for the purposes of any double taxation relief arrangements⁴⁶ as resident in a territory outside the UK.

48.17.1 Revised definition of s.2(2) amount

The usual definition of s.2(2) amount (trust gains) would not work for a dual resident trust, so s.88(2) TCGA amends it:

The section 2(2) amount for a tax year for which section 87 applies by virtue of this section is what it would be if the amount mentioned in section 87(4)(a) were the assumed chargeable amount.

Amended as s.88(2) directs, s.87(4) provides:

The section 2(2) amount for a settlement for a tax year for which this section applies to the settlement is—

- (a) ~~the amount upon which the trustees of the settlement would be chargeable to tax under section 2(2) for that year if they were~~

44 On the terminology see 53.4 (Types of residence).

45 See 48.3 (Non-resident settlement condition). For trusts which are not domestic law UK resident but which are treaty non-resident, see 50.19 (DT reliefs: s.87 TCGA).

46 For the meaning of this term, see 8.4.3 (“DTR arrangements” – CGT).

~~resident and ordinarily resident in the United Kingdom in that year~~ the assumed chargeable amount, or

- (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

The term “assumed chargeable amount” is defined in s.88(3):

For the purposes of subsection (2) above the assumed chargeable amount in respect of a year of assessment is the lesser of the following 2 amounts—

- (a) the amount on which the trustees would be chargeable to tax for the year under section 2(2) on the assumption that the double taxation relief arrangements did not apply;
- (b) the amount on which, by virtue of disposals of protected assets, the trustees would be chargeable to tax for the year under section 2(2) on the assumption that those arrangements did not apply.

48.17.2 *Protected assets*

Section 88 TCGA provides:

(4) For the purposes of subsection (3)(b) above assets are protected assets if—

- (a) they are of a description specified in the double taxation relief arrangements, and
- (b) were the trustees to dispose of them at any relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

(5) For the purposes of subsection (4) above—

- (a) the assumption specified in subsection (3)(b) above shall be ignored;
- (b) a relevant time is any time, in the year of assessment concerned, when the trustees fall to be regarded for the purposes of the arrangements as resident in a territory outside the UK;
- (c) if different assets are identified by reference to different relevant times, all of them are protected assets.

Most trust assets are “protected assets;” the most common exception

would be UK land.⁴⁷

48.17.3 *Planning: avoid dual resident trusts*

It is best to avoid dual resident (ie, UK domestic law resident, treaty non-resident) trusts because they involve tax in the UK (so far as the treaty does not provide relief), tax in the treaty jurisdiction, and tax liabilities under s.87. In practice such trusts only arise by accident.

48.18 **Transfer between trusts**

48.18.1 *No s.87 charge on transfer between trusts*

Suppose a trust (trust 1) transfers funds to another trust (trust 2). Section 87(2) TCGA does not apply, because:

- (1) the transfer is not a capital payment, or
- (2) the trustees of trust 2 are not regarded as a beneficiary of trust 1.

It does not much matter which is correct (or both) as no-one has ever suggested the contrary. But for completeness, the drafter of s.97(8)(10) TCGA may have considered the second point to be the correct one, as they took special care to preserve it. Section 97(8) TCGA provides that a non-beneficiary is treated as a beneficiary. It provides (in short):

(8) In a case where—

- (a) ... a capital payment is received from the trustees of a settlement...
- (b) it is received by a person ...
- (c) at the time it is received ... the person is not ... a beneficiary of the settlement...

for the purposes of sections 86A to 90 ... the person shall be treated as a beneficiary of the settlement as regards events occurring at or after that time.

This might apply s.87 to an inter-trust transfer, but it is excluded by s.97(10):

Subsection (8) above shall not apply so as to treat—

⁴⁷ See 46.9 (CGT treaty relief).

- (a) the trustees of the settlement referred to in that subsection, or
 - (b) the trustees of any other settlement,
- as beneficiaries of the settlement referred to in that subsection.

48.18.2 *Section 90 TCGA*

Section 90(1) TCGA provides:

This section applies if the trustees of a settlement (“the transferor settlement”) transfer all or part of the settled property to the trustees of another settlement (“the transferee settlement”).

In short, s.90 applies on a transfer between trusts.

The section only applies on a transfer of trust capital: if trustees of a discretionary trust distribute trust income to another trust, it is suggested that s.90 does not apply, because the income is not “settled property”.

Section 90 TCGA provides:

- (3) Treat the s.2(2) amount for the transferee settlement for any tax year (not later than the year of transfer)⁴⁸ as increased by—
 - (a) the s.2(2) amount for the transferor settlement for that year (as reduced under s.87A as it applies in relation to that settlement for the year of transfer and all earlier tax years), or
 - (b) if part only of the settled property is transferred, the relevant proportion of the amount mentioned in para (a).
- (4) “The relevant proportion” is—
 - (a) the market value of the property transferred, divided by
 - (b) the market value of the property comprised in the transferor settlement immediately before the transfer.

Section 90(5) TCGA provides corresponding relief for the transferor settlement:

Treat the s.2(2) amount for the transferor settlement for any tax year as reduced by the amount by which the s.2(2) amount for the transferee settlement for that year is increased under subs.(3).

...

⁴⁸ Section 90(2) TCGA gives this term a commonsense definition: “In this section ‘the year of transfer’ means the tax year in which the transfer occurs.”

(7) The increase under subs.(3) has effect for the year of transfer and subsequent tax years.

(8) The reduction under subs.(5) has effect for tax years after the year of transfer.

It is interesting to compare the technique of s.81 IHTA (deeming transferred property to remain in the original trust).⁴⁹ While that is not without its problems, it is a more effective anti-avoidance rule. The reason may be that s.90 is not (or not just) an anti-avoidance provision. It is intended to facilitate inter-trust transfers. Such transfers may be desirable for family reasons or to avoid unfairness which otherwise follows from the operation of s.87. Suppose trustees hold a trust fund worth £2m with s.2(2) amounts of £1m and they wish to make a capital payment of £1m to beneficiary B1. If they do so then a subsequent distribution to beneficiary B2 would be tax free. That would not be fair as between B1 and B2. A transfer of one half of the trust fund to a separate trust, followed by a capital payment to B1, in principle solves this unfairness: B1 pays tax on one half of the s.2(2) amounts and B2 in due course will in principle pay tax on the other half, when that fund is transferred to B2.

Section 90(6) TCGA deals with a transfer to a UK resident settlement:

If neither s.87 nor s.89(2) would otherwise apply to the transferee settlement for the year of transfer—

- (a) s.89(2) to (4) apply to the settlement for that year (and subsequent tax years), and
- (b) for this purpose, references there to the last non-resident tax year are to be read as the year of transfer.

Amended as s.90(6) directs, s.89(2) to (4) provides:

(2) Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under section 87A as it applies for that year) with the section 2(2) amount for the ~~last non-resident tax year~~ *year of transfer* or any earlier tax year.

49 See 60.9 (The same settlement fiction: section 81).

(3) Section 87(3) and (4) and sections 87A to 87C apply for the purposes of subsection (2) as if the relevant tax year were the tax year mentioned in subsection (2).

(4) Section 87B (remittance basis) applies in relation to chargeable gains treated under subsection (2) as accruing as it applies in relation to chargeable gains treated under section 87 as accruing.

Section 90(9) TCGA deals with trust debts:

When calculating the market value of property for the purposes of this section or s.90A in a case where the property is subject to a debt, reduce the market value by the amount of the debt.

A transfer between trusts triggers the deadline for a rebasing election.⁵⁰

48.18.3 *Transfer for consideration*

Section 90A TCGA provides:

(1) Section 90 does not apply to a transfer of settled property made for consideration in money or money's worth if the amount (or value) of that consideration is equal to or exceeds the market value of the property transferred.

(2) The following provisions apply if—

(a) s.90 applies to a transfer of settled property made for consideration in money or money's worth, and

(b) the amount (or value) of that consideration is less than the market value of the property transferred.

(3) If the transfer is of all of the settled property, for the purposes of s.90 treat the transfer as being of part only of the settled property.

(4) Deduct the amount (or value) of the consideration from the amount of the market value referred to in s.90(4)(a).

Section 90 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest free loan repayable on demand, because the promise to repay is full consideration.

⁵⁰ See 48.27 (Rebasing: the election).

48.18.4 *Interaction with schedule 4B*

Section 90(10) TCGA provides:

This section does not apply to—

- (a) a transfer to which Schedule 4B applies, or
- (b) any s.2(2) amount that is in a Schedule 4C pool (see para 1 of Schedule 4C).

See 49.14 (Schedule 4C: the key condition).

48.19 1981 transitional relief

Para 116 Sch 7 FA 2008 provides:

For the purposes of sections 87 and 87A of TCGA 1992, no account is to be taken of—

- (a) any capital payment received before 10 March 1981, or
- (b) any capital payment received on or after that date but before 6 April 1984, so far as it represents a chargeable gain which accrued to the trustees before 6 April 1981.

All capital payments before 10 March 1981 are disregarded.

Capital payments before 6 April 1984 are disregarded if they represent a chargeable gain which accrued to the trustees before 6 April 1981. How does one decide whether a capital payment represents a pre-1981 gain? Fortunately this problem will not often arise now.

48.20 1998 transitional relief

Para 118 Sch 7 FA 2008 provides:

(1) This paragraph applies if—

- (a) s.87 of TCGA 1992 applies to a settlement for the tax year 2008-09 or any subsequent tax year (“the tax year”),
- (b) the settlement was made before 17 March 1998,
- (c) none of the settlors fulfilled the residence requirements when the settlement was made, and
- (d) none of the settlors fulfils the residence requirements in the tax year.

- (2) For the purposes of that section as it applies to the settlement for the tax year, no account is to be taken of—
- (a) any gains or losses accruing to the trustees of the settlement before 17 March 1998, or
 - (b) any capital payments received before that date.
- (3) A settlor “fulfils the residence requirements” when the settlor is—
- (a) resident or ordinarily resident in the UK, and
 - (b) domiciled in any part of the UK.

I refer to this as “**1998 transitional relief**”. In principle, (inter alia) for foreign domiciled settlor settlements, one disregards gains and capital payments before 17 March 1998. But if in any year there is a UK resident and domiciled settlor, even only one of several, the relief is lost in that year. Thus, a “tainting” principle applies. A small, even nominal contribution from a UK resident and domiciled settlor will forfeit the transitional relief for all years that that settlor is UK resident and domiciled.

One can envisage a case where it is better that this relief does not apply, in which case it would be possible to arrange to forfeit the relief, but this will not be common.

48.21 Ascertaining s.2(2) amounts as at end 2007/8

The concept of s.2(2) amount was introduced in the FA 2008 with effect from 2008/9, but it is necessary to compute the s.2(2) amount for earlier years in order to know what s.2(2) amount is carried forward to 2008/09 and subsequently.

Para 120 Sch 7 FA 2008 provides:

- (1) This paragraph applies to a settlement if s.87 or s.89(2) of TCGA 1992 applied to it for the tax year 2007–08 or any earlier tax year.
- (2) The following steps are to be taken for the purposes of calculating the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.

Step 1

Calculate (in accordance with s.87 and, where appropriate, s.88) the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.

For this purpose, references in s.87(4) and (5) of TCGA 1992 (as substituted) to s.87 of that Act applying to a settlement for a tax year are

to be read as references to s.87 of that Act (as it had effect before that substitution) applying to a settlement for a tax year.

Step 2

Find the total amount of chargeable gains treated under s.87 or 89(2) as accruing to beneficiaries of the settlement in the tax year 2007-08 or any earlier tax year ("the total deemed gains").

Step 3

Find the earliest tax year for which the s.2(2) amount is not nil.

If the s.2(2) amount for that year is less than or equal to the total deemed gains, reduce that s.2(2) amount to nil.

Otherwise, reduce that s.2(2) amount by the amount of the total deemed gains.

Step 4

Reduce the total deemed gains by the amount by which the s.2(2) amount was reduced under Step 3.

Step 5

If the total deemed gains is not nil, start again at Step 3.

For this purpose, read references to the earliest tax year for which the s.2(2) amount is not nil as references to the earliest tax year—

- (a) which is after the last tax year for which Steps 3 and 4 have been undertaken, and
- (b) for which the s.2(2) amount is not nil.

EN FB 2008 provides an example:

60. Example: determining the s.2(2) amount for years preceding 2008-09:

The s.2(2) amounts of a settlement were:

2004-05: £100,000

2005-06: £50,000

2006-07: £200,000

2007-08: £200,000

Total deemed gains were £450,000.

a. Subtract the s.2(2) (£100,000) amount for the earliest year from the total deemed gains. Section 2(2) amount for 2004-05 reduces to nil. Total deemed gains reduced to £350,000.

b. Subtract the s.2(2) (£50,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2005-06 reduces to nil. Total deemed gains reduced to £300,000.

c. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2006-07 reduces to nil. Total deemed gains reduced to £100,000.

d. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2007-08 reduces to £100,000. Total deemed gains reduced to nil.

The s.2(2) amount for the settlement for 2007-08 is therefore £100,000.

In short, pre-2008 s.87 gains are deducted from pre-2008 s.2(2) amounts on a FIFO basis (first in first out). It is expressed in just about the most obscure way possible.⁵¹

Para 120(3) provides for Schedule 4B cases, though the drafter does not try very hard:

If, before 6 April 2008, the trustees of the settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, sub-para (2) has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

48.21.1 *Pre-2008 OIG amounts*

Para 99 Sch 7 FA 2008 applies the same rule to OIG amounts:

Paragraphs 120 and 121 apply in relation to offshore income gains as if—

- (a) references to section 2(2) amounts were to OIG amounts,
- (b) references to chargeable gains were to offshore income gains, and
- (c) Step 1 of paragraph 120(2) provided that OIG amounts are to be calculated in accordance with—
 - (i) section 762(2) of ICTA (the reference in the second sentence of that Step to section 87(4) of TCGA 1992 being read as a reference to section 762(2) of ICTA), or
 - (ii) section 87(5) of TCGA 1992 as applied by section 762(3) of ICTA.

Section 762 ICTA is now repealed. The OFTR should have updated the references but (somewhat negligently) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new

⁵¹ For a discussion of the drafting technique, see 48.10.7 (Commentary: Step-based drafting).

provisions should be implied.

48.22 Pre-2008 capital payments

In order to follow the present legislation, one needs to have in mind the original terms of s.87(6) TCGA and in order to follow that, one needs to read all of the pre-2008 s.87(4)-(6) TCGA:

(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.

(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.

(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.

Para 122 Sch 7 FA 2008 provides:

(1) If all of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced to nil.

(2) If part of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced by the amount of that part.

The point of this (I think) is to prevent double counting of a capital payment: it is set against s.2(2) amounts under para 120 and not a second time.

(3) If—

- (a) chargeable gains were treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing in the tax year 2007-08 or any earlier tax year to a beneficiary,
- (b) more than one capital payment that the beneficiary had received was taken into account for the purposes of

determining the amount of chargeable gains treated as accruing to the beneficiary, and

- (c) the amount of those chargeable gains was less than the total amount of capital payments taken into account,
- for the purposes of this paragraph treat s.87(6) of TCGA 1992 as originally enacted as having effect in relation to earlier capital payments before later ones.

Para 122 then imposes the same rules for OIGs:

- (4) References in this paragraph to s.87(6) of TCGA 1992 include that provision as it would (but for the amendments made by this Schedule) have applied by virtue of s.762(3) of ICTA (offshore income gains).
- (5) References in this paragraph to chargeable gains include offshore income gains.

Section 762 ICTA is now repealed. The OFTR should have updated the reference but (somewhat negligently) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new provisions should be implied.

48.23 Pre-2008 capital payment matched after 2008; Pre-2008 s.2(2) amounts matched after 2008

Para 124 Sch 7 FA 2008 provides:

- (1) This paragraph applies if—
 - (a) chargeable gains are treated under s.87 or 89(2) of TCGA 1992 as accruing to an individual in the tax year 2008-09 or any subsequent tax year, and
 - (b) the individual is not domiciled in the UK in that year.
- (2) The individual is not charged to capital gains tax on the chargeable gains if and to the extent that they are treated as accruing by reason of—
 - (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
 - (b) the matching of any capital payment with the s.2(2) amount for the tax year 2007-08 or any earlier tax year.

Para (2)(a) provides relief for pre-2008 capital payments to foreign domiciliaries which are matched to post-2008 s.2(2) amounts. Para (2)(b) provides relief for post 2008 capital payments which are matched with

pre-2008 s.2(2) amounts.

EN FB 2008 summarises the matter this way:

440. The overall effect of these new rules is that: ...

[1] there will be no charge to tax in respect of capital payments made to non-UK domiciled beneficiaries who:

[a] receive capital payments before 6 April 2008 that are matched to trust gains accruing on or after 6 April 2008; or

[b] receive capital payments on or after 6 April 2008 that are matched to trust gains accruing before 6 April 2008.

This will be so irrespective of whether the non-UK domiciled beneficiary is a remittance basis user;

48.23.1 *Pre-2008 capital payments and pre-2008 OIG amounts*

Para 100 Sch 7 FA 2008 provides the same rules for OIG amounts:

(1) This paragraph applies if—

(a) by virtue of section 87 or 89(2) of, or Schedule 4C to, TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001), income is treated under such regulations (regulation 17 of those Regulations[]) as arising to an individual in the tax year 2008–09 or any subsequent tax year, and

(b) the individual is not domiciled in the UK in that year.

(2) The individual is not charged to income tax on the income if and to the extent that it is treated as arising by reason of—

(a) a capital payment received (or treated as received) by the individual before 6 April 2008, or

(b) the matching of any capital payment with the OIG amount for the tax year 2007–08 or any earlier tax year.

48.23.2 *Capital payments between 12 March and 5 April 2008*

Para 125 Sch 7 FA 2008 provides a special rule for these capital payments:

(1) This paragraph applies in relation to a settlement for the tax year 2008–09 or any subsequent tax year (“the relevant tax year”) if—

(a) an individual who was resident or ordinarily resident, but not domiciled, in the UK in the tax year 2007–08 received a capital

payment from the trustees of the settlement on or after 12 March 2008 but before 6 April 2008, and

- (b) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.

(2) For the purposes of sections 87 to 89 of TCGA 1992 as they apply in relation to the settlement for the relevant tax year, no account is to be taken of the capital payment.

One might refer to capital payments made between 12 March and 5 April 2008 as post-budget 2008 capital payments. There is no matching for post-budget 2008 capital payments, so such payments do not reduce s.2(2) amounts.

January 2009 Qs & As provides some background explanation:

Q4: Paragraph 125(2) appears to disregard payments between 12 March and 5 April altogether, which is different to the treatment proposed in the Budget documentation published on 12 March.

A: The original intention set out in the Budget documentation of 12 March and legislation was to allow the matching of capital payments between 12 March 2008 and 5 April 2008 with any gains relating to the period up to 5 April 2008 arising to the trustees after 5 April 2008. However, this proposal was dropped because it would have introduced additional and unnecessary complexity to the legislation.

This rule is not extended to offshore income gains. It is not clear if that was deliberate or an oversight.

48.24 Pre-2008 inter-trust transfer

Para 120(4) Sch 7 FA 2008 disapplies the rules in para 120 where there was an inter-trust transfer before 2008/09⁵² and para 121 Sch 7 FA 2008 sets out its own set of rules:

- (1) If s.90 of TCGA 1992 (as originally enacted) applied to a transfer of settled property made before 6 April 2008, this paragraph applies in relation to the

⁵² Para 120(4) provides:

This paragraph does not apply if s.90 of TCGA 1992 applied to a transfer of settled property by or to the trustees of the settlement that was made before 6 April 2008 (see para 121).

transferor settlement and the transferee settlement.

(2) In this paragraph “the year of transfer” means the tax year in which the transfer occurred.

(3) The following steps are to be taken for the purpose of calculating the s.2(2) amount for the transferor and transferee settlements for the tax year 2007-08 and earlier tax years.

Step 1

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (at the end of the year of transfer) for the transferor settlement for the year of transfer and earlier tax years.

For this purpose, read references there to the tax year 2007-08 as references to the year of transfer.

Step 2

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (before the year of transfer) for the transferee settlement for the tax year before the year of transfer and earlier tax years.

For this purpose, read references there to the tax year 2007-08 as references to the tax year before the year of transfer.

Step 3

Calculate the s.2(2) amount for the transferee settlement for the year of transfer.

Step 4

Treat the s.2(2) amount for the transferee settlement for the year of transfer or any earlier tax year (as calculated under Step 2 or 3) as increased by—

- (a) the s.2(2) amount for the transferor settlement for that year (as calculated under Step 1), or
- (b) if part only of the settled property was transferred, the relevant proportion of the amount mentioned in para (a).

“The relevant proportion” here has the same meaning as in s.90(4) of TCGA 1992 (as substituted by this Schedule).

Step 5

Treat the s.2(2) amount for the transferor settlement for any tax year as reduced by the amount by which the s.2(2) amount for the transferee settlement for that year is increased under Step 4.

Step 6

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferor settlement for the tax year 2007-08 and earlier tax years.

For this purpose—

- (a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 1 and 5 above, and
- (b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 1 above.

Step 7

Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferee settlement for the tax year 2007-08 and earlier tax years.

For this purpose—

- (a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 2 to 4 above, and

- (b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 2 above.

The drafter felt something should be done about multiple transfers, and Sch 4B, but did not know what:

- (4) This paragraph applies with any necessary modifications in relation to a settlement as respects which more than one relevant transfer was made.
- (5) In sub-para (4) “relevant transfer” means a transfer—
 - (a) made before 6 April 2008, and
 - (b) to which s.90 of TCGA 1992 applied.
- (6) If, before 6 April 2008, the trustees of the transferor or transferee settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, this paragraph has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

Para 99 Sch 7 FA 2008⁵³ applies the same rules for OIG amounts.

48.25 Pre-2008 trust immigration

In order to follow the present legislation, one needs to have in mind the original terms of s.89(2) TCGA, and in order to follow that it needs to be read with s.89(1):

(1) Where a period of one or more years of assessment for which section 87 applies to a settlement (“a non-resident period”) succeeds a period of one or more years of assessment for each of which section 87 does not apply to the settlement (“a resident period”), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of section 87 if it was not made in anticipation of a disposal made by the trustees in the non-resident period.

(2) Where

- (a) a non-resident period is succeeded by a resident period, and*
- (b) the trust gains for the last year of the non-resident period are not (or not wholly) treated as chargeable gains accruing in that year to beneficiaries,*

then, subject to subsection (3) below, those trust gains (or the outstanding part of them) shall be treated as chargeable gains accruing in the first year of the resident period to beneficiaries of the settlement who receive capital payments from the trustees in that year; and so on

53 Set out at 48.21.1 (Pre-2008 OIG amounts).

for the second and subsequent years until the amount treated as accruing to beneficiaries is equal to the amount of the trust gains for the last year of the non-resident period.

Para 123 Sch 7 FA 2008 provides:

Section 89(2) of TCGA 1992 as substituted applies to a settlement for the tax year 2008-09 (and subsequent tax years) if s.89(2) of that Act as originally enacted would (but for the amendments made by this Schedule) have applied to the settlement for the tax year 2008-09.

48.26 Rebasing: introduction

Paragraph 126 Sch 7 FA 2008 provides a relief which I call “**rebasing**”. HMRC s.87 guidance note provides:

80. The election is commonly known as a “rebasing” election ... But it is not rebasing as that term applies to section 35 TCGA and assets held at 31 March 1982. There is no across the board revaluation of the assets in the trust fund as at 6 April 2008.

48.27 Rebasing: the election

48.27.1 Need for rebasing election

Para 126 Sch 7 FA 2008 provides:

- (1) The following provisions apply to a settlement if—
 - (a) s.87 applies to the settlement for the tax year 2008-09, and
 - (b) the trustees of the settlement have made an election under this subparagraph. ...
- (5) An election under sub-para (1) is irrevocable.

EN FB 2008 provides:

63. The provisions of para [126] are subject to an election rather than being mandatory because:

- [1] depending on the assets comprised in the settlement as at 6 April 2008 it may not be advantageous for the paragraph to apply; and
- [2] the trustees will be required to provide additional information to

HMRC about trust assets. Trustees of non-resident settlements have been assured in a letter from the Acting Chairman of HMRC, Dave Hartnett, dated 12 February 2008 that in applying the provisions set out in this Schedule, HMRC will not require any additional disclosure.

As far as [1] is concerned, it can never be disadvantageous for para 126 to apply (the election cannot in any circumstances increase the tax liability). HMRC s.87 guidance note provides:

79. The election ... cannot increase the tax payable by a beneficiary. Whether it improves the position of the beneficiary depends on the history of the assets disposed of.

Subject to point [2] (confidentiality) an election should be made in every case where it might be useful, which is generally the case where there are or might be UK resident foreign domiciled beneficiaries. I understand however that an election in relation to a trust unknown to HMRC will generally lead to enquiries.

48.27.2 Requirements for valid rebasing election

HMRC s.87 guidance note provides:

82. The election can be made only if the settlement was non-UK resident throughout 2008-09.

This follows from para 126(1)(a). The guidance note continues:

Paragraph 126(1) requires that the election be made by the trustees of the settlement. It must be made by all the trustees or by a majority of them if they are permitted to act through a majority. It cannot be made by a beneficiary. If the beneficiary's Self Assessment tax return is taken up for enquiry an election may require additional disclosure to HMRC about assets held by the trustees in order to agree the valuation.

Para 126(6) sch 7 FA 2008 provides:

An election under that sub-paragraph must be made in the way and form specified by the Commissioners for HMRC.

The HMRC s.87 guidance note provides:

89. The election must be made in the way and form specified by HMRC, paragraph 126(6). HMRC have provided a form RBE1 to satisfy this requirement and all elections must be made on that form. The form asks for the name of the settlement and the date it was created. The date is used to distinguish between settlements with similar names in particular those created by settlors with a prevalent surname. The form also asks the trustees to identify if and when a trigger event has occurred. The RBE1 can be downloaded from the HMRC website⁵⁴....

90. Some trustees may have made the election by writing to CAR Residency before the form was available. That election remains valid and there is no need to make a further election on the form.

48.27.3 *Time limit for election*

Para 126(2) sch 7 FA 2008 provides:

An election under sub-para (1) may only be made on or before the first 31 January to occur after the end of the first tax year (beginning with the tax year 2008-09) in which an event within either of the following paragraphs occurs—

- (a) a capital payment is received (or treated as received) by a beneficiary of the settlement,⁵⁵ and the beneficiary is resident in the UK in the tax year in which it is received, and
- (b) the trustees transfer all or part of the settled property to the trustees of another settlement, and s.90 of TCGA 1992 applies in relation to the transfer.

The time limit is crucial. HMRC s.87 guidance note provides:

54 Accessible www.hmrc.gov.uk/cnr/rbe1.pdf.

55 Para 126 expands on this in Sch 4C cases:

“(3) For a tax year as respects which the settlement has a Schedule 4C pool, the reference in sub-para (2)(a) above to a capital payment received (or treated as received) by a beneficiary of the settlement is to be read as a capital payment received (or treated as received) by a beneficiary of a relevant settlement from the trustees of a relevant settlement.

(4) Para 8A of that Schedule (relevant settlements) applies for the purposes of sub-para (3) above.”

83. The relief is given only to individuals, paragraph 126(7), but the time limit is triggered if a capital payment is received by any UK resident beneficiary.

“Capital payment” is not defined in sch 7. The term is of course defined in s.97 TCGA but only “for the purposes of s.86A to 97 (and sch 4C)”. Strictly that definition does not apply for the purposes of sch 7. It is considered however that the context shows that the usual definition is intended to be incorporated, notwithstanding the absent-minded omission of a provision to that effect. If that is right, a benefit within s.731 is not a capital payment so does not trigger the deadline for an election. It is well arguable that a benefit within the scope of OIG s.87 (which is chargeable to income tax) is not a “capital payment” for the purposes of para 126,⁵⁶ but it would be best not to rely on that point and to make the election in good time.

The HMRC s.87 guidance note provides:

87. An election may be made before a triggering event happens.

This is important as it is convenient and (in offshore fund cases, may be necessary) to make the election before there is any capital payment. The HMRC s.87 guidance note continues:

There is no requirement that the beneficiary receiving the payment was a beneficiary of the settlement as at 6 April 2008. The recipient may become a beneficiary at some later time. The time limit in paragraph 126(2) of Schedule 7 runs from the time the trustees first make a capital payment to a UK resident beneficiary. If the trustees make such a payment and do not make the election they may be out of time for making the election if they make a payment to a UK-resident but non-domiciled beneficiary at a later time. The election can be made even if there are no non-UK domiciled beneficiaries when the payment is made.

88. Any election made late will be considered in accordance with the guidance in paragraph 13801 onwards in HMRC’s Capital Gains Tax manual [*recte* Capital Gains Manual].

⁵⁶ See 34.13.3 (“Capital payment”).

48.28 **Rebasing: the relief**

Assuming an election has been made, we can move on to consider the relief. Para 126 Sch 7 FA 2008 provides:

(7) Sub-para (8) applies if—

- (a) by virtue of the matching of a capital payment with the s.2(2) amount for the settlement for the tax year 2008-09 or any subsequent tax year (“the relevant tax year”), chargeable gains are treated under s.87 or 89(2) of, or para 8 Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and
- (b) the individual is resident, but not domiciled, in the UK in that year.

(8) The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

EN FB 2008 provides:

64. It should be noted that para [126] does not affect the computation of the s.2(2) amount under s.87 for a year. It simply provides a mechanism for identifying an amount of the chargeable gain treated as accruing to a non-UK domiciled beneficiary that is not chargeable to tax because an element of the underlying s.2(2) amounts are attributable to the period before 6 April 2008, when non-UK domiciled beneficiaries were not chargeable to tax in respect of chargeable gains attributed to them under s.87.

65. Para [126] applies to all non-UK domiciled beneficiaries of a settlement, the trustees of which have made a valid election. The non-UK domiciled beneficiary does not need to be a remittance basis user. Only once the provisions of para [126] have been applied is it necessary to see whether the amount of tax that is left in charge is chargeable on the arising basis, in the year in which the gains are treated as having accrued to the beneficiary, or on the remittance basis where one of s.809B, [809D or 809E] applies.

66. ... Although there is only one s.87 pool for each tax year, where an election has been made under para [126](1) trustees will need to keep track of the separate elements of gains attributed to the period before and after 6 April 2008 within the pool.

67. There are no special rules to deal with assets where the market value as at 6 April 2008 was either higher or lower than both the cost of acquisition of the asset and the disposal proceeds....

81. The election has no effect on the matching of capital payments to

section 2(2) amounts or the reduction of capital payments and section 2(2) amounts. It has no effect on gains accruing to UK domiciled beneficiaries.

48.28.1 *Relevant proportion*

Para 126(9) Sch 7 FA 2008 provides:

The relevant proportion is $A \div B$ where—

A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and

B is the s.2(2) amount for the settlement for the relevant tax year.

In short, rebasing relief applies to relevant assets; A = gains after rebasing and B = the historical gain.

48.28.2 *Relevant asset*

Para 126(10) provides:

For the purposes of sub-para (9) an asset is a “relevant asset” if—

- (a) by reason of the asset, a chargeable gain or allowable loss accrues to the trustees in the relevant tax year, and
- (b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

HMRC s.87 guidance provides:

79. ... It is not possible to make the election only in respect of assets which have increased in value since 6 April 2008...

97. You consider only the assets whose disposal gave rise to the section 2(2) amount. Any assets held at 6 April 2008 which are not disposed of are not included in the comparison. This means that assets held at 6 April 2008 need be valued only when they are disposed of.

Para 126(11) extends rebasing relief to assets held by companies held by trusts:

For those purposes, an asset is also a “relevant asset” if—

- (a) by reason of the asset, chargeable gains are treated under s.13 of TCGA 1992 as accruing to the trustees in the relevant tax year,
- (b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains, and
- (c) had the company disposed of the asset at any time in the relevant period,⁵⁷ part⁵⁸ of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to the trustees.

A company’s asset is not a relevant asset if a loss accrues on the disposal. But a trust asset can be a relevant asset even if a loss accrues on the disposal. It follows that one can envisage cases where the fraction A/B is greater than 1 (because an asset which gives rise to a loss on an actual disposal may be such that a gain would arise if the asset had been disposed of on 6/4/2008). However it does not matter if this is so. The relief is that:

The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

So if the relevant proportion is greater than one, no relief applies but the tax charge is not increased.

48.29 Rebasing - HMRC examples

EN FB 2008 provides some examples. Example 1 is relatively straightforward.

68. Example 1: basic mechanism of para [126(8)(9)]:

The trustees of a settlement make an election under para [126](1).

In 2009-10 the trustees dispose of a property for £10 million. The chargeable gain accruing to the trustees is £8 million.

The chargeable gain that would have accrued to the trustees if the gain

57 Para 126(12) provides: “In sub-para (11)(c) “the relevant period” means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains.”

58 The context shows that this must mean: *all or part*...

had been computed using the market value of the property as at 6 April 2008 as the cost of acquisition is £1 million.

The trustees make a capital payment to beneficiaries X and Y of £4 million each. X and Y are both resident in the UK but X is also domiciled in the UK whereas Y is not.

There are no unmatched capital payments or trust gains relating to earlier years.

The HMRC analysis is as follows:

a. Match the capital payments to the s.2(2) amount for the year. Capital payments total £8 million and match to the s.2(2) amount of £8 million.

Chargeable gains of £4 million are treated as accruing to X and Y for 2009-10.

X is chargeable to CGT in 2009-10 under s.87 on the gains of £4 million.

Y is non-UK domiciled so para [126](1) applies to determine how much of the chargeable gains of £4 million is chargeable to tax.

b. The s.2(2) amount for 2009-10 is £8 million ("B" in para [126(9)]).

c. The s.2(2) amount that would have applied if the trustees had sold the property and reacquired it immediately before 6 April 2008 is £1 million ("A" in para [126(9)]).

d. A/B is 1/8.

e. Apply A/B to the chargeable gains of £4 million accruing to Y: the amount of the gains that is chargeable to tax under para [126(8)] is £4 million/8, i.e. Y is chargeable to capital gains tax on £500,000. If Y is a remittance basis user there will be no charge to tax until Y remits gain to the UK.

There are no surplus capital payments or trust gains for 2009-10.

Example 2 is more challenging.

69. Example 2: matching capital payments across years and s.13 gains

The trustees of a settlement make an election under para [126](1)]. The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK.

There are no unmatched trust gains or capital payments relating to earlier years.

In 2010-11 the trustees dispose of two assets:

a. the chargeable gains are £8 million: the pre 6 April 2008 gains are £7 million and the post 5 April 2008 gains are £1 million;

b. the overall loss is £5 million: the pre 6 April 2008 gain is £1 million
