[109] Section 643A(1)[a] appears to apply to any individual. But the effect of the definition of Untaxed Benefits Total is that it only applies to an individual who is the settlor or close-family; so I gloss it as "individual [settlor/close-family beneficiary]".

[110] The statutory term is "deemed income".

(1) The amount of s.643A income is the lower of:
(a) Untaxed Benefits Total and
(b) Available Protected Income

(2) If the UBT is nil, there is no s.643A income, because the condition in s.643A(1)[b] is not met.

Section 643B(1) ITTOIA provides:

> For the purposes of section 643A, whether an individual has an untaxed benefits total for a settlement for a tax year ("the current year"), and (if so) its amount, are determined as follows-

The subsection sets out four steps:
1: Identify benefit to settlor/close-family beneficiary
2: Value the benefit
3: Deductions where benefit otherwise taxed
4: Conclusion

The drafting and terminology is loosely based on the computation of s.731 income, in s.733 ITA.[111]

47.21.1 *"Provided by trustees"*

UBT Step 1 refers to benefits "provided by the trustees". Benefits provided by other persons do not count. Before considering the steps, it is helpful first to set out the definition of this phrase. As one would expect, it is widely defined.

Section 643B ITTOIA provides two definitions: (4) defines "provided by the trustees" and (5) defines "provided by trustees to an individual". It is easier to follow if the provisions are read side by side with differences highlighted:

Provided by trustees: s.643B(4)	**Provided by trustees to individual: ss(5)**
In this section and sections 643C to 643M, a reference to	[same]
a benefit provided by trustees of a settlement is to-	a benefit provided by trustees of a settlement to an individual is to-
(a) a benefit treated by	(a) a benefit treated by subsection (6)

[111] See 50.18 (Computation of s.731 income).

subsection (6) as provided by the trustees, or	as provided by the trustees to the individual, or
(b) any other benefit if it is provided by the trustees directly, or indirectly, out of-	(b) any other benefit if it is provided by the trustees to the individual directly, or indirectly, out of-
(i) property comprised in the settlement,[112] or	(i) [same]
(ii) income arising under the settlement.	(ii) [same]

Subsections (4) and (5) say (more or less) the same thing. It could have been more neatly expressed, but it works.

47.21.2 *Provided by trustees: IIP trust*

Section 643B(6) ITTOIA provides:

> Where-
> (a) income arises under a settlement, and
> (b) the income, before being distributed, is the income of a person other than the trustees,
> a benefit
> [i] is for the purposes of subsection (4)(a) treated as provided by the trustees and
> [ii] is for the purposes of subsection (5)(a) treated as provided by the trustees to the person.

The wording at (b) is drawn from s.480 ITA.[113] It seems a clumsy way to refer to an interest in possession trust.

Income within s.643B(6) will normally be taxable, so it will not be added to the untaxed benefits total.[114] But this subsection may be needed for the case where the life tenant is non-resident and the income is foreign source income, so it is not taxable.

Section 643B(7) ITTOIA provides:

> A benefit treated as provided by subsection (6) is treated-
> (a) as consisting of the income mentioned in that subsection, but

[112] See 47.3.1 (Property comprised in settlement).

[113] See 41.2.2 (Settlor-interested trust).

[114] See 47.21.5 (Step 3: Benefit liable to IT).

after any reduction in accordance with Chapter 8 of Part 9 of ITA 2007 for trustees' expenses, and

(b) as provided at the time that income arises.

47.21.3 *Step 1: Identify benefits*

Armed with the definitions of "provided by trustees", we can turn to UBT Step 1 in s.643B(1) ITTOIA. The rule depends on whether the benefit is provided to the settlor or to a close-family beneficiary. It is easier to follow if the two provisions are read side by side:

Benefit to settlor	**Benefit to close-family of settlor**
If the individual [settlor/close-family beneficiary] is the settlor,	If the individual [settlor/close-family beneficiary] is not the settlor
identify each benefit provided by the trustees to the individual at a time-	[identical]
(a) when the individual is not relevantly [-taxable] domiciled,[115] and	(a) when the individual is a close member of the settlor's family (see section 643H),[116] and
(b) in a tax year that is the current year or an earlier tax year[117].	[identical to (b)]

If the settlor is relevantly-taxable domiciled, the s.624 charge would usually apply. It is possible to envisage cases where the settlor will be better off if UK domiciled, but that will be rare.

It does not matter where the close-family beneficiary is domiciled.

Benefits to persons other than the settlor or close-family do not count.

[115] Section 643B(2) ITTOIA provides the definition:

> "For the purposes of Step 1 in subsection (1), an individual is "relevantly domiciled" at any time if at that time-
> (a) the individual is [actually] domiciled in the UK, or
> (b) the individual is regarded for the purposes of section 809(1)(b) of ITA 2007 as domiciled in the UK as a result of section 835BA of ITA 2007 having effect because of Condition A in that section being met [formerly domiciled resident]."

The wording also used in the equivalent ToA rule; for discussion, see 50.15.1 ("Relevantly domiciled"). I refer to this as **"relevantly-taxable domiciled"**.

[116] See 61.27 ("Close Family").

[117] Pre-2018/19 years are ignored: see 47.27 (s.643A commencement).

47.21.4 *Step 2: Value benefits*

Section 643B(1) ITTOIA provides:

> *Step 2*
> Identify the amount or value[118] of each benefit identified in the individual's [settlor/close-family beneficiary's] case at Step 1, and calculate the total of those amounts and values.

This is (relatively) straightforward.

47.21.5 *Step 3: Benefit liable to IT*

Section 643B(1) ITTOIA provides four deductions to avoid double taxation:

> *Step 3*
> Take the total calculated at Step 2 and deduct from it the following-
> (a) any part of it on which the individual [settlor/close-family beneficiary] is liable to income tax[119] otherwise than under section 643A,
> (b) any income treated by
> [i] section 643A or
> [ii] [section] 643J[120] or
> [iii] [section] 643L[121]
> as arising, to a person for a tax year earlier than the current year, by reference to any of the benefits identified in the individual's [settlor/close-family beneficiary's] case at Step 1,
> (c) where the whole or part of a benefit identified in the individual's [settlor/close-family beneficiary's] case at Step 1 is taken into account in charging income tax under Chapter 2 of Part 13 of ITA 2007 [ToA s.731], the amount or value of so much of the benefit as is taken into account in doing that

Section 731, if applicable, has priority over s.643A.

[118] Section 643B(3) ITTOIA incorporates the ToA statutory valuation rules:
"Sections 742C to 742E of ITA 2007 (value of certain benefits) apply for the purpose of calculating the value of a benefit for the purposes of this section as they apply for the purpose of calculating an income tax charge under Chapter 2 of Part 13 of ITA 2007."
See 50.9 (Statutory valuation rules).

[119] See App 2.3 (Chargeable/liable to tax),

[120] See 47.34 (s.643A onward-gift donee charge).

[121] See 47.36 (S.643A onward-gift settlor-attribution rule).

(d) any amount required to be deducted by section 643D(2) (gains treated as accruing in a year before the current year).

47.21.6 *Benefit taxed under s.87*

UBT Step 3(d) takes us on to s.643D ITTOIA, which provides:

> (1) Subsection (2) applies if-
> (a) in the case of a settlement, benefits provided to an individual [settlor/close-family beneficiary] as mentioned at Step 1 in section 643B(1) are received in a tax year, and
> (b) chargeable gains[122] are treated by
> [i] section 87,
> [ii] 87K, [Onward-gift CGT rule]
> [iii] 87L [Onward-gift to close-family] or
> [iv] 89(2) [s.87 charge for immigrating trusts] of,
> [v] or paragraph 8 of Schedule 4C [sch 4C charge] to,
> TCGA 1992 as accruing to a person in that or a subsequent tax year by reference (direct or indirect) to the whole or part of any benefits so provided.
>
> (2) In the calculation under section 643B of the individual's [settlor/close-family beneficiary's] untaxed benefits total for the settlement for any tax year after the one in which such chargeable gains are so treated, the amounts to be deducted at Step 3(d) of that calculation include the amount of those gains.

This arises if:

(1) A close-family beneficiary receive a benefit which:
  (a) is not taxed under s.643A because there is no Available Protected Income
  (b) is taxed under s.87, as it is matched with trust gains
(2) Available Protected Income arises later

[122] Section 643D(3) ITTOIA extends the deduction to offshore income gains:

> "References in this section to chargeable gains treated as accruing to an individual include offshore gains treated as arising to the individual (see regulations 20 and 22 to 24 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001))."

For completeness, para 22 sch 10 FA 2018 provides: "The new section 643D(3) of ITTOIA 2005 is to be treated as inserted by the Treasury under the powers to make regulations conferred by section 354 of TIOPA 2010." I think the point of that is that the provision could be repealed or amended by regulations, without an Act of Parliament.

In these circumstances, sensibly, the s.87 charge has priority over s.643A. This is an approximate equivalent of s.734 ITA.[123]

47.21.7 *Result: Untaxed Benefits Total*

Section 643B(1) ITTOIA provides:

> *Step 4:*
> If the result of the calculation at Step 3 is an amount greater than nil, that amount is the individual [settlor/close-family beneficiary]'s untaxed benefits total for the settlement for the current year.

47.22 Available Protected Income

Available Protected Income matters because the amount of s.643A income is the lower of (1) Untaxed Benefits Total and (2) Available Protected Income. If there is no API, there is no s.643A income.

Section 643C(1) ITTOIA provides:

> [a] For the purposes of the application of section 643A(1) in the case of an individual [settlor/close-family beneficiary] and a settlement,
> [b] the settlement has available protected income up to the end of a tax year if-
> PFSI − TOAA > TI
> [c] and, if the settlement has available protected income up to the end of a tax year, its amount is given by-
> PFSI − TOAA − TI

That is clumsy drafting, but it works.

In short:

Term	*Stands for*
PFSI	**P**rotected **F**oreign-**S**ource **I**ncome
TOAA	**T**ransfer **O**f **A**ssets **A**broad **A**mount
TI	**T**axable **I**ncome

47.22.1 *PFSI*

Note that the term PFSI does not have the same meaning as the term "protected foreign-source income" (which itself has 3 distinct definitions).[124] This is bad drafting; but it is best to adopt the statutory terminology as anything else is even more confusing.

[123] See 50.19 (Deduction for s.87 charge).

[124] See 92.8 ("Protected income: Terminology").

There are two types of PFSI, which I call **"s.624 PFSI"** and **"s.629 PFSI"**. They are easier to follow if set out side by side. PFSI is the total of-

s.624 PFSI: s.643C(2)(a)	**s.629 PFSI: s.643C(2)(b)**
(a) any protected foreign-source income[125] -	(b) [identical]
(i) arising under the settlement in the year or in any earlier tax year,[126]	(i) [identical]
(ii) that would be treated under section 624 as income of the settlor but for section 628A [s.624 protected-trust relief],[127]	(ii) that would be treated under section 629 as income of the settlor but for section 630A, [s.629 protected-trust relief][128] and
(iii) that can be used directly or indirectly to provide benefits for the individual,[129] and	[no equivalent]
(iv) on which the individual is not liable to income tax (ignoring for this purpose any liability under section 643A)	(iii) on which the relevant child concerned (see section 629) is not liable to income tax (ignoring for this purpose any liability under section 643A)

Section 643C(3) ITTOIA disapplies the artificial remittance basis timing rule.[130]

[125] In my terminology, this is protected s.624 income; s.643C(3) ITTOIA provides the definition by reference: "protected foreign-source income" has the meaning given by sections 628A(2) to (13) and 628B. See 92.9 (Protected s.624 income).

[126] Pre-2018/19 years are ignored: see 47.27 (s.643A commencement).

[127] See 92.10 (s.624 protected-trust relief).

[128] See 92.11 (s.629 protected-trust relief (child of settlor)).

[129] The wording is derived from the definition of relevant income; see 50.20 ("Relevant income": Definition).

[130] Section 643C(3) provides: "As regards the definition of PFSI in subsection (2)-

(a) section 648(3) to (5) (relevant foreign income treated as arising under settlement only if and when remitted) do not apply for the purposes of that definition,

(b) that definition has effect as if section 648(3) to (5) do not apply for the purposes of sections 624 and 629."

See 47.8.4 (Remittance basis timing rule).

If the settlor is non-resident, there is no PFSI.

It may be possible to avoid API by distributing trust income. That may be advantageous if the beneficiary receives benefits in the UK, but the trust income is (un)taxed under the remittance basis.

47.22.2 *TOAA*

TOAA (ToA amount) is deducted in computing Available Protected Income.

Section 643C(2) ITTOIA provides:

> In this section ...
>
> TOAA is so much of PFSI as is, in respect of benefits provided by the trustees in the year or in an earlier tax year[131], taken into account in charging income tax under Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) for the year or any earlier tax year

47.22.3 *TI*

TI (taxable income) is deducted in computing Available Protected Income.

Section 643C(2) ITTOIA provides:

> In this section ...
>
> TI is the total of-
>
> (a) so much of PFSI as is, by reference to benefits provided by the trustees to the individual [settlor/close-family beneficiary], are treated by
> [i] section 643A or
> [ii] [section] 643J[132] or
> [iii] [section] 643L[133]
> as income for any earlier tax year[134], and
>
> (b) so much of PFSI as is, by reference to benefits provided by the trustees to other individuals [settlor/close-family beneficiary], are treated by
> [i] section 643A or
> [ii] [section] 643J[135]
> [iii] [section] 643L[136]

[131] Pre-2018/19 years are taken into account: see 47.27 (s.643A commencement).

[132] See 47.34 (s.643A onward-gift donee charge).

[133] See 47.36 (S.643A onward-gift settlor-attribution rule).

[134] Pre-2018/19 years are ignored: see 47.27 (s.643A commencement).

[135] See 47.34 (s.643A onward-gift donee charge).

[136] See 47.36 (S.643A onward-gift settlor-attribution rule).

> as income for the year or any earlier tax year[137].

47.23 s.643A income charge

Assuming the s.643A application conditions are met,[138] we can move on to consider the charge on s.643A income.

Section 643A(1) ITTOIA provides:

> ...[139]
>
> [s.643A income] is
>
> (a) where the individual is UK resident for the year, treated for income tax purposes as income of the individual [settlor/close-family beneficiary] for the year, subject to subsections (2) to (5).
>
> (b) where the individual is non-UK resident for the year, treated for the purposes of
>
> [i] subsection (2) and
>
> [ii] sections 643I to 643L
>
> [iii] (but no other purpose)
>
> as income of the individual for the year,
>
> [c] subject to subsection (5).

Thus there are two types of s.643A income. I coin the following terminology:

(1) **UK resident's s.643A income**: s.643A income accruing to a UK resident. This is **chargeable s.643A income** under para (a)

(2) Non resident's s.643A income: s.643A income accruing to a non-UK resident. This is **non-chargeable s.643A income**

Section 643A(7) ITTOIA provides:

> If-
>
> (a) an enactment other than this section contains a reference (however expressed) to-
>
> (i) income treated as arising by this section, or
>
> (ii) an amount treated as income by this section, and
>
> (b) the reference mentions this section without mentioning any particular provision of this section,
>
> the reference is (in accordance with subsection (1)(b)) to be read as

[137] Pre-2018/19 years are ignored: see 47.27 (s.643A commencement).

[138] See 47.20 (s.643A application conditions).

[139] The omitted words contain the s.643A application conditions: see 47.20 (s.643A application conditions).

> not including amounts treated as income by subsection (1)(b) [non-chargeable s.643A income] except so far as they are treated as income of the settlor of a settlement by subsection (3) or (4).

47.23.1 *No double charge*

Section 643A(5) ITTOIA provides:

> If there is a choice about the individuals in whose case income is to be treated as arising by subsection (1) (before the application of subsections (3) and (4))-
> (a) income is to be treated as arising to such one or more of them as appears to an officer of Revenue and Customs to be just and reasonable, and
> (b) if more than one, in such respective proportions as appears to the officer to be just and reasonable.

The wording is based on ToA double-counting relief.[140]

47.24 s.643A remittance basis

Section 643F ITTOIA applies the remittance basis for:
(1) Close-family beneficiaries taxed under s.643A(1); and
(2) the settlor taxed under the s.643A settlor-attribution rule[141]

Section 643F(1) ITTOIA provides:

> This section applies where-
> (a) in the case of a settlement, income ("the deemed [s.643A] income") is treated by section 643A as arising to an individual for a tax year, and
> (b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

Assuming these conditions are satisfied, we read on. Section 643F(2) ITTOIA provides:

> The deemed [s.643A] income is treated as relevant foreign income of the individual.

The significance is that this incorporates the remittance basis.
Section 643F(3) ITTOIA provides:

[140] See 51.9 (Double-counting relief).

[141] See 47.28 (s.643A settlor-attribution rule: Outline).

> In the application of section 832 to the deemed [s.643A] income, subsection (2) of that section has effect with the omission of paragraph (b).

The significance is that (contrary to the usual rule) s.643A income is taxable if it is remitted during the overseas part of a split year.[142] There is no good reason for this, but it is consistent with the s.731 rule.[143]

Section 643F(4) ITTOIA provides:

> For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis) treat
> [a] a benefit, or
> [b] any protected income,[144]
> that relates[145] to any part of the deemed [s.643A] income as deriving from that part of the deemed income.

This wording is drawn from s.735 ITA: for a discussion, see 50.39 (s.731 remittance basis).

47.25 s.643A income matching rule

Section 643F(5) ITTOIA provides:

> In subsection (4) "relates" has the meaning given by section 643G.

So we move on to s.643G(2) ITTOIA. This begins:

> For the purposes of section 643F(4) ...

But s.643G(2) is applied by reference in all circumstances where it is necessary to match (relate) s.643A income and benefits. This is achieved by a clumsy formula, referring to s.643A income which:

[142] See 17.13.1 (Remittance in split year).

[143] See 50.51 (s.731 settlor-attribution remittance-basis).

[144] Section 643F(6) ITTOIA provides: "In this section and section 643G-
"protected income" means the income that forms PFSI in the calculation of the settlement's available protected income in the case of the relevant individual for the year, and
"the relevant individual"-
(a) where the deemed income is treated as income of an individual by section 643A(1)(a) both before and after the application of section 643A(3) and (4) [settlor-attribution], means that individual, and
(b) where the deemed income is treated as income of the settlor by section 643A(3) or (4) [settlor-attribution] after having been treated as income of another individual by section 643A(1), means that other individual."

[145] See 47.25 (s.643A income matching rule).

> would, if section 643G applied also for this purpose, be matched under that section with the benefit

The wording of the s.643A matching rule is based on s.735A ITA, the s.731 matching rule. I abbreviate the discussion here, for a more detailed discussion, see 50.42 (s.731 matching rules).

Section 643G(2) ITTOIA provides:

> For the purposes of section 643F(4)–

Place benefits in date order

> (a) place the benefits identified at Step[146] 1 in the order in which they were received by the individual (starting with the earliest benefit received),

Deductions from benefits

> (b) where a deduction is allowed by any of paragraphs (a), (c) and (d) of Step 3[147] by reference to the whole or part of any of those benefits, reduce the benefit by the amount of the deduction,

Place protected income in order

> (c) place the protected income in the order in which it arose (starting with the earliest income to arise),

Deduction from protected income

> (d) where the whole or part of an item of the protected income is, in respect of benefits provided by the trustees in the year or in any earlier tax year, taken into account in charging income tax under Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) for the year or any earlier tax year, reduce the item by so much of itself as is so taken into account,
>
> (e) where the whole or part of an item of the protected income is, by reference to benefits provided by the trustees to individuals other

[146] Section 643G(1) ITTOIA provides: "In this section - (a) references to a step are to a step under section 643B(1) as it applies in the case of a year and the relevant individual...". See 47.21.3 (Step 1: Identify benefits).
(b) "protected income" and "the relevant individual" have the meaning given by section 643F(6), and
(c) "the settlement" and "the year" mean, respectively, the settlement and tax year mentioned in section 643F.

[147] See 47.21.5 (Step 3: Benefit liable to IT).

than the relevant individual, treated by section 643A or 643J[148] or 643L[149] as income for the year or any earlier tax year, reduce the item by so much of itself as is so treated,

s.643A income in date order

(f) place the income treated by section 643A(1) (before the application of section 643A(3) and (4)) as arising to the relevant individual in respect of the benefits referred to in paragraph (a) in the order in which it is treated as arising (starting with the earliest income treated as having arisen), and

The matching rule

(g) treat the income mentioned in paragraph (f) as related to-
(i) the benefits referred to in paragraph (a), and
(ii) the protected income,
by matching the income mentioned in paragraph (f) with those benefits and the protected income (in the orders mentioned in paragraphs (a), (c) and (f)).

47.25.1 *s.643A/s.731 matching compared*

It may be helpful to set the two rules side by side:

s.643G(2) ITTOIA	**735A(1) ITA**
For the purposes of section 643F(4)—	For the purposes of section 735—
(a) place the benefits identified at Step 1 [of s.643B(1), ie benefits within s.643A] in the order in which they were received by the relevant individual (starting with the earliest benefit received),	(a) place the benefits mentioned in Step 1 [of s.733(1), ie benefits within s.731] in the order in which they were received by the individual (starting with the earliest benefit received),
(b) where a deduction is allowed by any of paragraphs (a), (c) and (d) of Step 3 [of s.643B(1)], by reference to the whole or part of any of those benefits, reduce the benefit by the amount of the deduction,	(b) deduct from those benefits so much of any benefit within section 734(1)(b) as gives rise as mentioned in section 734(1)(d) to chargeable gains or offshore income gains,
(c) place the protected income in the order in which it arose (starting with the	(c) place the income mentioned in Step 3 [of s.733(1)] for the tax years

[148] See 47.34 (s.643A onward-gift donee charge).
[149] See 47.36 (S.643A onward-gift settlor-attribution rule).

earliest income to arise),	mentioned in Step 4 [of s.733(1)] (“the relevant income”) in the order determined under subsection (3),
(d) where the whole or part of an item of the protected income is, in respect of benefits provided by the trustees in the year or in any earlier tax year, taken into account in charging income tax under Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) for the year or any earlier tax year, reduce the item by so much of itself as is so taken into account,	
(e) where the whole or part of an item of the protected income is, by reference to benefits provided by the trustees to individuals other than the relevant individual, treated by section 643A or 643J or 643L as income for the year or any earlier tax year, reduce the item by so much of itself as is so treated,	(d) deduct from that income any income that may not be taken into account because of section 743(1) or (2) (no duplication of charges),
(f) place the income treated by section 643A(1) (before the application of section 643A(3) and (4)) as arising to the relevant individual in respect of the benefits referred to in paragraph (a) in the order in which it is treated as arising (starting with the earliest income treated as having arisen), and	(e) place the income treated under section 732(2) as arising to the individual in respect of the benefits in the order in which it is treated as arising (starting with the earliest income treated as having arisen), and
(g) treat the income mentioned in paragraph (f) as related to— (i) the benefits referred to in paragraph (a), and (ii) the protected income,	(f) treat the income mentioned in paragraph (e) as related to— (i) the benefits, and (ii) the relevant income,
by matching the income mentioned in paragraph (f) with those benefits and the protected income (in the orders mentioned in paragraphs (a), (c) and (f)).	by matching that income with the benefits and the relevant income (in the orders mentioned in paragraphs (a), (c) and (e)).

The matching rules are similar but not identical. For s.643A, protected income is set out in date order, which amounts to matching on a FIFO basis. For s.731, relevant income is set out in the order specified in s.735A(3), which is a modified FIFO basis. It would have been better if the rules had been aligned; but there it is.

Section 643G(3) ITTOIA provides:

> For the purposes of subsection (2)(d), the whole or part of an item of the protected income is to be treated as taken into account in respect of a benefit so far as the item or part-
>
> (a) is matched under section 735A of ITA 2007[150] with notional income with which the benefit is matched under that section, or
>
> (b) would be matched under that section (if it applied also for this purpose) with notional income with which the benefit would be matched under that section (if it applied also for this purpose),
>
> and here "notional income" means income which is treated as arising under section 732 of ITA 2007

47.26 s.643A charge on non-resident?

47.26.1 *Settlor benefits when non-resident*

Suppose:

(1) A benefit is received by non-resident settlor.[151]

(2) The benefit is matched to Protected Income.[152]

Is this chargeable? That would be surprising. It is suggested that the territorial limitation must be applied.[153]

If (contrary to the view taken here) there were a charge on a non-resident, DT relief can apply on the basis that s.643A income falls within the Other Income article.[154]

47.26.2 *Settlor becomes UK resident*

Suppose:

[150] Section 735A is the s.731 matching rule: see 50.42 (s.731 matching rules).

[151] Similar issues might arise where (1) the income is received by non-resident close family, and (2) the settlor is not UK resident.

[152] If the settlor has never been UK resident, there is no Protected Income, and this question does not arise; see 92.13 (Protected s.720 trust income). The situation in which this question arises is if:
(1) The settlor is UK resident for a period of time and Protected Income arises.
(2) The settlor ceases to be UK resident.
(3) The settlor then receives a benefit.

[153] See 16.11 (General territorial principle).

[154] See 50.61.2 (Individual treaty-resident outside UK).

(1) Year 1:
 (a) A benefit is received by non-resident settlor
 (b) There is no Available Protected Income to which the benefit can be matched
(2) Year 2:
 (a) The settlor becomes UK resident
 (b) Available Protected Income arises

Taking s.731(1A) literally, this would appear to be chargeable. The benefit is matched to the Protected Income. But context suggests not.

47.27 s.643A commencement

Para 21 sch 10 FA 2018 provides:

> (1) Subject as follows, the amendments made by paragraphs 3 to 19 have effect for the tax year 2018-19 and subsequent tax years.
> (2) [a] None of the references to an earlier tax year
> [i] in Step 1 of the new section 643B(1) of ITTOIA 2005, or
> [ii] in new section 643C(2) of ITTOIA 2005,
> includes any tax year earlier than the tax year 2018-19
> [b] except that, in the phrase "benefits provided by the trustees in the year or in an earlier tax year" in the definition of "TOAA" in new section 643C(2) of ITTOIA 2005, the reference to an earlier tax year does include tax years earlier than the tax year 2018-19.

The cross references here are:

ITTOIA	**See para**
s.643B(1) Step 1	47.21.3
s.643C(2)	47.22

47.28 s.643A settlor-attribution rule: Outline

Section 643A(2)(3) ITTOIA introduces what I call the **"s.643A settlor-attribution rule"**. This is one of a set of three rules which I call s.731/s.643A/s.87 settlor-attribution rules; see 50.4.11 (Settlor-attribution rules: Introduction).

In outline, this rule applies where:

(1) A close-family beneficiary receives a benefit
(2) The close-family beneficiary is outside the s.643A charge (non-resident or remittance-basis exempt)
(3) The settlor is UK resident (and so potentially chargeable)

The charge is on the lower of the value of the benefit and the amount of protected income.

It will be rare (though not unknown) for the s.643A settlor-attribution rule to apply, as it requires:

(1) Benefit to a close-family beneficiary who is non-resident or a remittance basis taxpayer (and so not directly charged)

(2) A settlor of a protected trust who is UK resident and not remittance basis exempt

A benefit to the settlor is not caught by the s.643A settlor-attribution rule, but it will usually be within s.643A under general principles.[155]

47.29 s.643A attribution conditions

Section 643A(2) ITTOIA provides:

> Subsections (3) and (4) apply if-

A set of 6 conditions then follow, which I call "**s.643A attribution conditions**".

47.29.1 *Cond. (a): s.643A income*

Section 643A(2) ITTOIA provides:

> Subsections (3) and (4) apply if-
> (a) [i] an amount ("the [s.643A] deemed income") is treated by subsection (1),
> [ii] before the application of subsections (3) and (4) [s.643A settlor-attribution rule],
> [iii] as income of an [close-family][156] individual for a tax year

47.29.2 *Cond. (b): not settlor*

Section 643A(2) ITTOIA provides:

> Subsections (3) and (4) apply if...
> (b) the [close-family] individual is not the settlor

47.29.3 *Cond. (c): close-family non-resident/rem. basis user*

Section 643A(2) ITTOIA provides:

[155] See 50.15 (Taxable-transferor defence).

[156] Section 643A(2)(a)[iii] appears to apply to any individual. But the individual must be close-family of the settlor, in order to receive s.643A income; see 47.20 (s.643A application conditions). So I gloss it as "[close-family] individual".

> Subsections (3) and (4) apply if ...
>
> (c) either-
>
> (i) the [close-family] individual is non-UK resident for the year, or
>
> (ii) the [close-family] individual is UK resident for the year and one of sections 809B, 809D and 809E of ITA 2007 (remittance basis) applies to the [close-family] individual for the year

47.29.4 *Cond. (d): Settlor UK resident*

Section 643A(2) ITTOIA provides:

> Subsections (3) and (4) apply if ...
>
> (d) the settlor is UK resident for the year

47.29.5 *Cond. (e)(f): Non-dom Settlor*

Section 643A(2) ITTOIA provides:

> Subsections (3) and (4) apply if ...
>
> (e) there is no time in the year when the settlor is domiciled in the UK, and
>
> (f) there is no time in the year when the settlor is regarded for the purposes of section 809B(1)(b) of ITA 2007 as domiciled in the UK as a result of section 835BA of ITA 2007 having effect because of Condition A in that section being met [formerly domiciled resident[157]].

47.29.6 *Settlor-attribution: Commencement*

Para 21(1) sch 10 FA 2018 provides:

> Subject as follows, the amendments made by paragraphs 3 to 19 have effect for the tax year 2018-19 and subsequent tax years.

47.29.7 *IT attribution rules compared*

643A(1)	**733A(1)**	**s.643A condition**	**s.731 condition**
a	a	s.643A income	s.731 income
	b		match with protected income
b		not settlor	
	c		Non-resident trust
c		Close-family recipient is non-resident/rem. basis user	-

[157] See 5.4.2 (IT/CGT formerly-dom resident rule).

d	d	Settlor UK resident	*same*
e+f	e+f	Settlor domicile	*same*

47.30 s.643A settlor-attribution rule

Assuming the s.643A application conditions are satisfied, we move on to the rule.

Section 643A(3)(4) ITTOIA deal with 2 situations:

(1) The close-family beneficiary may be fully exempt because they are non-resident, or because they are a remittance basis taxpayer and none of the income is remitted.

(2) The close-family beneficiary may be partly exempt because they are a remittance basis taxpayer and only part of the income is remitted.

It is easier to follow if the provisions are read side by side:

Beneficiary wholly exempt	**Beneficiary partly exempt**
(3) If the case is one- (a) where the condition in subsection (2)(c)(i) is met [beneficiary non-resident], or	(4) If the case is one-
(b) where [i] the condition in subsection (2)(c)(ii) is met [beneficiary remittance basis taxpayer] and	(a) [identical]
[ii] none of the deemed [s.643A] income is remitted to the UK in the year,	(b) part only of the deemed [s.643A] income is remitted to the UK in the year,
the deemed income is to be treated for income tax as income of the settlor for the year and, in a case within paragraph (b), not as income of the individual for the year	the remainder of the deemed income is to be treated for income tax purposes not as income of the individual for the year but as income of the settlor for the year.

This is the equivalent of s.733A(3)(4) ITA.[158]

The remittance basis can apply: see 47.24 (s.643A remittance basis).

Statute frequently refers to an amount:

> treated by section 643A(1), before/after the application of section 643A(3) and (4), as income of an individual

[158] See 50.48 (s.731 settlor-attribution rule).

For clarity, I gloss that as [attribution to settlor].

47.31 s.643A onward-gift rule

Section 643I(1)(a) ITTOIA introduces what I call the **“s.643A onward-gift rule”**.

This is one of a set of three rules which I call s.643A/s.731/s.87 onward-gift rules; see 61.30 (Onward-gifts: Introduction).

It is helpful to review some (relatively commonsense) definitions. Three of these are (more or less) the same as the s.87 onward-gift definitions:

	s.643A	**s.87**
Term	**see para**	**see para**
Gift year	47.31.1 (s.643A “gift year)	61.32.3 (“Gift year”)
Matching year	47.31.2 (s.643A “matching year”)	61.32.2 (“Matching year”)
Charging year	47.31.3 (s.643A “charging year”)	-

47.31.1 *s.643A “gift year*”

Section 643I(7) ITTOIA defines gift year:

> In this section (and sections 643J to 643L)—
> “the gift year” means the tax year in which the onward payment is made (but see subsection (4))

47.31.2 *s.643A “matching year*”

Section 643I(1)(a) ITTOIA defines matching year:

> If ... an amount is treated by section 643A(1),
> before the application of section 643A(3) and (4) [settlor-attribution rule], as income of an individual ... for a tax year (“the matching year”),

47.31.3 *s.643A “charging year*”

Section 643I(7) ITTOIA defines charging year:

> In this section (and sections 643J to 643L)—
> “the charging year” means the gift year or, if later, the matching year,

47.32 s.643A onward-gift conditions

Section 643I(1) ITTOIA provides:

> Sections 643J to 643L apply if-

A set of 8 conditions then follow, which I call “**s.643A onward-gift conditions**”.

47.32.1 *Cond. (a): s.643A income*

Section 643I(1) ITTOIA provides condition (a):

> Sections 643J to 643L apply if-
> (a) in the case of a settlement, an amount—
> (i) [a] is treated by section 643A(1)(a)[s.643A charge[159]],
> [b] both before and after the application of section 643A(3) and (4)[160] [settlor-attribution rule],
> [c] as income of an individual ("the original beneficiary") for a tax year ("the matching year"), or
> (ii) [a] having been treated by section 643A(1) [s.643A charge] before the application of section 643A(3) and (4) [settlor-attribution rule] as income of an individual ("the original beneficiary") for a tax year ("the matching year"),
> [b] is treated by section 643A(3) or (4) [settlor-attribution rule] as income of the settlor for the matching year, or
> (iii)[a] is treated by section 643A(1)(b) [non-chargeable s.643A income of non-resident][161], before the application of section 643A(3) and (4) [settlor-attribution rule], as income of an individual ("the original beneficiary") for a tax year ("the matching year")
> [b] but is not treated by section 643A(3), and is not treated by section 643A(4), as income of the settlor for the matching year

This is a model of how to create obscurity by excessive statutory cross referencing. Some readers may use stronger language. It is easier to follow if set out in a table:

Sections 643J to 643L apply if-
(a) in the case of a settlement, an amount—

Para (i)	***Para (ii)***	***Para (iii)***
is treated by section 643A(1)(a)[s.643A charge[162]],	having been treated by section 643A(1) [s.643A charge]	is treated by section 643A(1)(b) [non-chargeable s.643A income of non-resident][163],

[159] See 47.23 (s.643A income charge).
[160] See 47.36 (S.643A onward-gift settlor-attribution rule).
[161] See 47.23 (s.643A income charge).
[162] See 47.23 (s.643A income charge).
[163] See 47.23 (s.643A income charge).

both before and after the application of section 643A(3) and (4)[164] [settlor-attribution rule],	before the application of section 643A(3) and (4) [settlor-attribution rule]	before the application of section 643A(3) and (4) [settlor-attribution rule],
as income of an individual ("the original beneficiary") for a tax year ("the matching year"), or	as income of an individual ("the original beneficiary") for a tax year ("the matching year"),	as income of an individual ("the original beneficiary") for a tax year ("the matching year")
	is treated by section 643A(3) or (4) [settlor-attribution rule] as income of the settlor for the matching year, or	but is not treated by section 643A(3), and is not treated by section 643A(4), as income of the settlor for the matching year

This limits the scope of the s.643A onward-gift rule. There must be a gift from close family to close-family. I wonder if the drafter really intended that.

The s.643A onward-gift rules refer to this section extensively. For clarity, I gloss the cross references thus:

Statutory expression	***Term in this book***
the amount mentioned in subsection (1)(a)	s.643A income
a case within ss.(1)(a)(i)	directly-received s.643A income
a case within ss.(1)(a)(ii)	settlor-attributed s.643A income

47.32.2 *Cond. (b): Match with benefit*

Section 643I(1) ITTOIA provides condition (b):

> Sections 643J to 643L apply if ...
> (b) [i] under section 643G (if it applied also for this purpose)[165]
> [ii] the amount [s.643A income] would be matched with
> [iii] a benefit provided in the matching year, or an earlier tax year, to the original beneficiary [donor]

s.643A onward-gift conditions (a)(b) are the rough equivalent of s.87 onward-gift condition (a)[166] but with the important difference that:

[164] See 47.36 (S.643A onward-gift settlor-attribution rule).

[165] Section 643G is the s.643A income matching rule: see 47.25 (s.643A income matching rule).

[166] See 61.31.1 (Cond. (a): Payment to donor).

(1) CGT condition (a) applies to all payments from non-resident trusts
(2) s.643A condition (a)(b) requires:
    (a) Close-family s.643A income (which requires a benefit to settlor/close-family beneficiary) and
    (b) the close-family s.643A income is matched with a benefit received by the donor

Section 643I(3) ITTOIA provides:

> The amount mentioned in subsection (1)(a) [s.643A income] need not be—
> (a) the whole amount that in the case of the settlement is treated by section 643A(1), before the application of section 643A(3) and (4)[167] [settlor-attribution rule], as income of the original beneficiary [donor] for the matching year;
> (b) the whole amount that would be matched with the benefit mentioned in subsection (1)(b).

47.32.3 *Cond. (c): Intention to give*

Section 643I(1) ITTOIA provides:

> Sections 643J to 643L apply if ...
> (c) at the time the benefit is provided to the original beneficiary [donor]-
> (i) there are arrangements[168], or there is an intention, as regards the (direct or indirect) passing-on of the whole, or part, of the benefit to another person, and
> (ii) it is reasonable to expect that, in the event of the whole or part of the benefit being passed on to another person as envisaged by the arrangements or intention, that other person will be UK resident when they receive at least part of what is passed on to them,

This is effectively identical to s.87 onward-gift condition (c).[169]

47.32.4 *Cond. (d): Gift & time limit*

Section 643I(1) ITTOIA provides:

[167] See 47.30 (s.643A settlor-attribution rule).

[168] Section 643I(7) ITTOIA provides the standard (unnecessary) definition; see App 2.2.3 (Definitions of “arrangement”).

[169] See 50.53.4 (Cond (c): Intention to give).

> Sections 643J to 643L apply if ...
>
> (d) the original beneficiary [donor] makes, directly or indirectly, a gift ("the onward payment") to a person ("the subsequent recipient") [donee]-
>
> (i) [A] at the time the benefit is provided to the original beneficiary [donor],
>
> [B] or at any later time in the 3 years beginning with the day containing the start time, or
>
> (ii) at any time before the benefit is provided to the original beneficiary [donor] and, it is reasonable to assume, in anticipation of the benefit being provided,

Statute frequently refers to an onward payment (gift) "made as mentioned in subsection (1)(d)(ii)". I refer to such a gift as a **"pre-benefit gift"**. This is effectively identical to s.87 onward-gift condition (c).[170]

47.32.5 *Cond. (d): "Start time"*

In outline, there are 3 possible start times:

Para	***Circumstances***	***Start time***
(5)(a)(i)	Normal	When benefit provided to donor
(5)(a)(ii)	Indirect gift to settlor/close family	When original benefit provided
(5)(b)	s.643A onward-gift rule	First occasion

The start times are best read side by side; s.643I(5) ITTOIA provides:

> For the purposes of subsection (1)(d)(i)—

(a) if the amount mentioned in subsection (1)(a) [s.643A income] is not one that is treated as arising by section 643K, [For s.643K, see 47.34 (s.643A onward-gift donee charge).	(b) if the amount mentioned in subsection (1)(a) [s.643A income] is one that is treated as arising by section 643K in connection with the operation of this section and section 643K on a previous occasion,
"the start time"— (i) is the time the benefit mentioned in subsection (1)(b) is provided to the original beneficiary [donor], or	"the start time" is the time given by this subsection as the start time on that occasion.

[170] 61.31.3 (Condition (c): Gift & time limit). Section 733B(13) provides the standard wide definition of making a gift, the same as s.87G(15) TCGA.

(ii) where that benefit is one that section 643M(3) treats as provided, is the time the original benefit in that case (see section 643M(1)(a)) is provided
[For s.643M, see 47.37 (Indirect gift to settlor/close family).

47.32.6 *Cond. (e): Gift from benefit*

Section 643I(1) ITTOIA provides:

> Sections 643J to 643L apply if ...
> (e) the gift is of or includes-
> (i) the whole or part of the benefit,
> (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of the benefit, or
> (iii) any other property, but only if the benefit is provided with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient [donee],

This is effectively identical to s.87 onward-gift condition (d).[171]

The s.643A onward-gift rules frequently refer to this provision with the formula:

> so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e)

For clarity, I gloss that as [gifted benefit].

47.32.7 *"Relevantly remitted"*

Conditions (f)(g) use the term "relevantly remitted". Section 643I(7) ITTOIA provides:

> In this section (and sections 643J to 643L)—
> [a] "relevantly remitted" means remitted to the UK in a tax year for which the original beneficiary [donor] is UK resident
> [b] but, in a case within subsection (1)(a)(ii) [settlor-attributed s.643A income], means remitted to the UK in a tax year for

[171] See 47.32.6 (Cond. (e): Gift from benefit).

> which the settlor is UK resident.

The point is that income which is relevantly remitted is taxable on the remittance. (A remittance by a non-resident is not taxable.[172]) "Taxably remitted" would be a more transparent term. I refer to it as **"relevantly/taxably remitted"**.

47.32.8 *Cond. (f)/(g): Non-chargeable s.643A income*

Section 643I(1) ITTOIA provides:

> Sections 643J to 643L apply if ...

It is easier to follow if conditions (f) and (g) are read side by side:

(f): Directly received s.643A income	**(g) Settlor-attributed s.643A income**
in a case within paragraph (a)(i) [directly-received s.643A income], either—	in a case within paragraph (a)(ii) [settlor-attributed s.643A income],
(i) the original beneficiary [donor] is non-UK resident for the matching year, or	
(ii)[A] section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the original beneficiary [donor] for the matching year and	[A] section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor for the matching year and
[B] none of the amount [s.643A income] is relevantly [taxably] remitted in the matching year or in any tax year later than the matching year but not later than the tax year in which the onward payment [gift] is made	[B] [identical]

47.32.9 *(h): Donee settlor/close family*

Section 643I(1) ITTOIA provides:

> Sections 643J to 643L apply if ...
> (h) the subsequent recipient [donee]-

[172] See 17.18 (Remittance when non-resident).

(i) is the settlor, or
(ii) is a close member of the settlor's family (see section 643H)
[A] at the time the onward payment [gift] is made or,
[B] where that time is given by subsection (4),[173] at either or both of the time so given and the actual time the onward payment [gift] is made.

There is no CGT equivalent.

47.32.10 *Onward gifts commencement*

Para 21(3) sch 10 FA 2018 provides:

> New sections 643I to 643L and 643N of ITTOIA 2005 have effect only in relation to onward payments [gifts] made on or after 6 April 2018.

47.33 s.643A misc rules

47.33.1 *Relief for donor/settlor*

Section 643I(2) ITTOIA provides:

> [a] Where, in a case within subsection (1)(a)(i) [directly-received s.643A income] and by reference to the amount mentioned in subsection (1)(a), income is treated by section 643J or 643L as arising to a person for a tax year, the original beneficiary is not liable to tax for any later tax year on so much of the amount mentioned in subsection (1)(a) as is equal to that income;
> [b] and where, in a case within subsection (1)(a)(ii) [settlor-attributed s.643A income] and by reference to the amount mentioned in subsection (1)(a), income is treated by section 643J as arising to a person for a tax year, the settlor is not liable to tax for any later tax year on so much of the amount mentioned in subsection (1)(a) as is equal to that income.

47.33.2 *Pre-benefit gift: date of onward payment*

Section 643I(4) ITTOIA provides:

> Where the onward payment is made as mentioned in subsection (1)(d)(ii), [pre-benefit gift] the onward payment is to be treated—
> (a) for the purposes of the provisions of this section following subsection (1)(d), and
> (b) for the purposes of sections 643J to 643L,

[173] See 47.33.2 (Pre-benefit gift: date of onward payment).

> as made immediately after, and in the tax year in which, the benefit is provided to the original beneficiary [donor].

47.33.3 *Valuation of benefits*

Section 643I(8) ITTOIA provides:

> Sections 742C to 742E of ITA 2007 (value of certain benefits)—
> (a) apply for the purpose of calculating the value of the onward payment for the purposes of sections 643J to 643L as they apply for the purpose of calculating an income tax charge under Chapter 2 of Part 13 of ITA 2007, and
> (b) apply for that purpose as if their references to a benefit provided were references to a gift made.

47.33.4 *Meaning of remittance*

Section 643I(9) ITTOIA provides:

> Sections 809L to 809Z6 of ITA 2007 (remittance basis: rules about when income is remitted)—
> (a) apply for the purposes of this section and sections 643J to 643L, and
> (b) apply for those purposes in relation to references to remittance of the onward payment as if the onward payment were relevant foreign income of the subsequent recipient.

47.34 s.643A onward-gift donee charge

Assuming the s.643A onward-gift conditions are satisfied, we move on to the onward-gift rule in s.643J.

The layout is: s.643J (1)(2) set out application conditions; s.643J(3) sets out the rule where those conditions are satisfied. It is easier to follow if the 643J application conditions are read side by side:

Donee arising basis taxpayer	**Donee remittance basis taxpayer and benefit remitted**
(1) Subsection (3) applies if—	(2) Subsection (3) also applies if—
(a) this section applies [s.643A onward-gift conditions are met] (see section 643I(1)), and	(a) [identical] and
(b) the subsequent recipient [donee] is UK resident for the gift year, and	(b) [identical] and

(c) the subsequent recipient [donee] is UK resident for the matching year if that is later than the gift year, and	(c) [identical] and
(d) none of sections 809B, 809D and 809E of ITA 2007 (remittance basis) applies to the subsequent recipient [donee] for the charging year.	(d) section 809B, 809D or 809E of ITA 2007 [remittance basis] applies to the subsequent recipient [donee] for the charging year, and
	(e) the whole, or part only, of the onward payment [gift] is remitted to the UK in the charging year.

Assuming the 643J application conditions are satisfied, we move on to the rule. Section 643J(3) ITTOIA provides the s.643A onward-gift charge:

> For income tax purposes, an amount of income—
> (a) equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e) [gifted benefit], or
> (b) where
> [i] this subsection applies because of subsection (2) [donee remittance basis user] and
> [ii] part only of that much of the onward payment [gift] is remitted to the UK in the charging year,
> equal to the amount or value of that part,
> is treated as income of the subsequent recipient [donee] for the charging year, subject to subsection (4).

47.34.1 *Donee otherwise taxable*

Section 643J(4) ITA provides:

> The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows—
> (a) deduct any part of the amount on which the subsequent recipient [donee] is liable to income tax otherwise than under this section

47.34.2 *Gift exceeds donor's benefit*

Section 643J(4) ITA provides:

> The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows ...
>
> (b) if following any adjustment under paragraph (a) the amount exceeds the amount mentioned in section 643I(1)(a) [s.643A close-family income], deduct the excess.

47.35 Donee not taxable: s.643A onward-giftable amount

The layout is: s.643K(1)(2) ITTOIA set out application conditions; s.643K(3) sets out the rules where one of those conditions is satisfied. It is easier to follow if the 643K application conditions are read side by side:

Donee non-resident	**Donee on remittance basis, gift remitted**
(1) Subsection (3) applies if	(2) Subsection (3) also applies if—
[x] this section applies (see section 643I(1)) [s.643A onward-gift conditions are met] and—	(a) [identical to [x] opposite]
(a) the subsequent recipient [donee] is non-UK resident for the gift year, or	(b) the subsequent recipient [donee] is UK resident for the gift year, and
(b) the matching year is later than the gift year and the subsequent recipient [donee] is UK resident for the gift year but non-UK resident for the matching year.	
	(c) the subsequent recipient [donee] is UK resident for the matching year if that is later than the gift year, and
	(d) section 809B, 809D or 809E of ITA 2007 [remittance basis] applies to the subsequent recipient [donee] for the charging year, and
	(e) none, or part only, of the onward payment [gift] is remitted to the UK in the charging year.

Assuming the 643K application conditions are satisfied, we move on to the rule. Section 643K(3) ITTOIA provides:

Section 643I(1)(a) has effect—

(a) as if the subsequent recipient [donee] were an individual to whom, in the case of the settlement, income is treated by section 643A(1)(a), both before and after the application of section 643A(3) and (4) [settlor-attribution rule[174]], as arising for the charging year, and

(b) as if, subject to subsection (4), the amount of that income—

(i) [A] were equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e) [gifted benefit] and

[B] is not treated as arising to the settlor as a result of the operation of section 643L,[175] or

(ii) were, where

[A] this subsection applies because of subsection (2) [donee remittance basis user] and

[B] part only of that much of the onward payment [gift] is remitted to the UK in the charging year,

equal to the amount or value of the remainder of that much of the onward payment [gift].

The difference between 643J and 643K is:

643J: chargeable s.643A income arises to donee/settlor

643K: non-chargeable s.643A income arises to donee/settlor which is taken into account for a future onward-gift charge.

It may be helpful to look at the s.643J/K rules side by side, with the key differences underlined:

Section 643J(3)	**Section 643K(3)**
For income tax purposes, an amount of income—	Section 643I(1)(a) has effect— (a) as if the subsequent recipient [donee] were an individual to whom, in the case of the settlement, income is treated by section 643A(1) as arising for the charging year, and
	(b) as if, subject to subsection (4), the amount of that income—

[174] See 47.30 (s.643A settlor-attribution rule).

[175] See 47.36 (S.643A onward-gift settlor-attribution rule).

(a) equal to the amount or value of	(i) were equal to the amount or value of
so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e) [gifted benefit], or	[A] so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e) [gifted benefit] and [B] is not treated as arising to the settlor as a result of the operation of section 643L, or
(b) where [i] this subsection applies because of subsection (2) [donee remittance basis user] and	(ii) were, where [A] [identical to [i] opposite] and
[ii] part only of that much of the onward payment [gift] is remitted to the UK in the charging year,	[B] [identical to [ii] opposite]
equal to the amount or value of that part,	equal to the amount or value of the remainder of that much of the onward payment [gift].
is treated as income of the subsequent recipient [donee] for the charging year, subject to subsection (4).	

47.35.1 *Gift exceeds s.643A income*

Section 643K(4) ITTOIA provides:

> The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows: if that amount exceeds the amount mentioned in section 643I(1)(a) [s.643A income] in the case of the original beneficiary [donor], deduct the excess.

47.35.2 *Prior year s.643A charge*

Section 643K(5) ITTOIA provides:

> Where the amount mentioned in section 643I(1)(a) is treated as arising

by this section in connection with the operation of section 643I and this section on a previous occasion, section 643I(1) has effect—

(a) with the omission of its paragraphs (b) and (c),

(b) as if the references in its paragraph (d) to the benefit mentioned in its paragraph (b) were, instead, to what was the onward payment [gift] on that previous occasion,

(c) as if the references in its paragraph (d) to when that benefit is provided were, instead, to when that onward payment [gift] was made, and

(d) as if the references in its paragraph (e) to that benefit were, instead, to so much of that onward payment [gift] as was on that previous occasion within any of sub-paragraphs (i) to (iii) of that paragraph [gifted benefit].

47.36 s.643A Onward-gift settlor-attribution rule

For a general introduction to onward-gift settlor-attribution rules, see 61.26 (Settlor-attribution: Introduction).

Suppose an onward gift is made to a donee (not close-family). A direct benefit to close-family may be treated as made to the settlor, under the s.643A settlor-attribution rule.[176] Section 643L ITTOIA ensures that the same applies in the case of an onward gift to close-family. I refer to this as the **"s.643A OG settlor-attribution rule"**.

The layout is: s.643L(1)(2) set out application conditions; s.643L(3) sets out the rules where one of those conditions is satisfied. It is easier to follow if the 643L application conditions are read side by side:

Donee remittance basis user: s.643L(1)	**Donee non-resident: s.643L(2)**
(1) Subsection (3) applies if—	(2) Subsection (3) also applies if—
(a) this section applies (see section 643I(1)) [s.643A onward-gift conditions are met],	(a)[identical]
(b) the subsequent recipient [donee] is a close member of the settlor's family (see section 643H) when the onward payment [gift] is made,	(b) [identical]
(c) the subsequent recipient [donee] is UK resident for the charging year,	(c) the subsequent recipient [donee] is non-UK resident for

[176] See 61.26 (Settlor-attribution: Introduction).

	the charging year,
(d) section 809B, 809D or 809E of ITA 2007 [remittance basis] applies to the subsequent recipient [donee] for the charging year,	
(e) none, or part only, of the onward payment [gift] is remitted to the UK in the charging year,	
(f) there is a time in the charging year when the settlor is UK resident,	(d) [identical to (f)]
(g) there is no time in the charging year when the settlor is domiciled in the UK, and	(e) [identical to (g)]
(h) there is no time in the charging year when the settlor is regarded for the purposes of section 809B(1)(b) of ITA 2007 as domiciled in the UK as a result of section 835BA of ITA 2007 having effect because of Condition A in that section being met [formerly domiciled resident].	(f) [identical to (h)]

Assuming the 643L application conditions are satisfied, we move on to the rule. Section 643L(3) ITTOIA provides:

> For income tax purposes, an amount of income—
>
> (a) equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 643I(1)(e) [gifted benefit], or
>
> (b) where this subsection applies because of subsection (1) in a case where part only of that much of the onward payment [gift] is remitted to the UK in the charging year, equal to the amount or value of the remainder of that much of the onward payment [gift],
>
> is treated as arising to the settlor for the charging year, subject to subsection (4).

Section 643L(5)(6) ITTOIA provides the settlor with the standard settlor-attribution indemnity.[177]

47.36.1 *Settlor otherwise taxable/gift exceeds benefit*

Section 643L(4) ITTOIA provides:

> The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows—
> (a) deduct any part of the amount on which the settlor is liable to income tax otherwise than under this section, and
> (b) if following any adjustment under paragraph (a) the amount exceeds the amount mentioned in section 643I(1)(a), deduct the excess.

47.37 Indirect gift to settlor/close family

47.37.1 *Trust to A to settlor/close-family*

Section 643M(1) ITTOIA provides:

> Subsection (3) applies if—

A set of 8 conditions then follow which I call **"indirect-gift conditions"**

47.37.2 *Benefit to non settlor/close family*

Section 643M(1) ITTOIA provides:

> Subsection (3) applies if—
> (a) the trustees of a settlement provide a benefit ("the original benefit") to an individual ("the original recipient"),
> (b) the original recipient is not the settlor,
> (c) at the time the original benefit is provided, the original recipient is not a close member of the settlor's family (see section 643H),

47.37.3 *Beneficiary not taxable*

Section 643M(1) ITTOIA provides:

> Subsection (3) applies if ...
> (d) the original recipient is not taxed on the original benefit (see subsection (7))

[177] Section 643L(5) ITA provides: "Where any tax for which the settlor is liable as a result of subsections (3) and (4) is paid, the settlor is entitled to recover the amount of the tax from the subsequent recipient [donee]." See 61.28 (Settlor-attribution indemnity).

That takes us to s.643M(7) ITTOIA which provides:

> [a] For the purposes of subsection (1)(d), the original recipient is taxed on the original benefit if the original recipient is liable to income tax, or capital gains tax, by reference to the amount or value of the original benefit;
> [b] and where the original recipient is so liable by reference to the amount or value of part only of the original benefit, this section applies as if the two parts of the original benefit were separate benefits.

47.37.4 *Onward-gift conditions satisfied*

Section 643M(1) ITTOIA provides:

> Subsection (3) applies if ...
> (e) at the time the original benefit is provided—
> (i) there are arrangements, or there is an intention, as regards the (direct or indirect) passing-on of the whole, or part, of the original benefit to another person, and
> (ii) it is reasonable to expect that, in the event of the whole or part of the original benefit being passed on to another person as envisaged by the arrangements or intention, that other person will be UK resident when they receive at least part of what is passed on to them,
> (f) the original recipient makes, directly or indirectly, a gift ("the onward payment") to a person ("the subsequent recipient")—
> (i) [A] at the time the original benefit is provided to the original recipient,
> [B] or at any later time in the 3 years beginning with the day containing that time, or
> (ii) at any time before the original benefit is provided to the original recipient and, it is reasonable to assume, in anticipation of the original benefit being provided,
> (g) the gift is of or includes—
> (i) the whole or part of the original benefit,
> (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of the original benefit, or
> (iii) any other property, but only if the original benefit is provided with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient [donee], and

This repeats s.643A onward-gift conditions (c), (d), (e).[178]

47.37.5 *Subsequent recipient is settlor/close family*

Section 643M(1) ITTOIA provides:

> Subsection (3) applies if ...
> (h) the subsequent recipient [donee]—
> (i) is the settlor, or
> (ii) is a close member of the settlor's family
> [A] at the time the onward payment [gift] is made or,
> [B] where that time is given by subsection (4), at either or both of the time so given and the actual time the onward payment [gift] is made.

47.37.6 *Indirect-gift rule*

Assuming the indirect-gift conditions are satisfied, we move on to the rule. Section 643M(3) ITTOIA provides:

> So much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of subsection (1)(g) [gifted benefit] is treated for the purposes of Step 1 in section 643B(1) as a benefit provided by the trustees to the subsequent recipient [donee] at the time the onward payment [gift] is made.

This brings s.643A into play and imposes s.643A income on the donee.

47.37.7 *Series of gifts ending with settlor/close-family*

Section 643M(2) ITTOIA provides:

> Where—
> (a) there is a series of two or more gifts,
> (b) the first gift in the series is made, directly or indirectly, by the original recipient—
> (i) [A] at the time the original benefit is provided,
> [B] or at any later time in the 3 years beginning with the day containing that time, or
> (ii) at any time before the original benefit is provided and, it is reasonable to assume, in anticipation of the original benefit being provided,

[178] See 47.32.3 (Cond. (b): Match with benefit); 47.32.4 (Cond. (d): Gift & time limit); 47.32.6 (Cond. (e): Gift from benefit).

> (c) the recipient of a gift in the series is the person who makes, directly or indirectly, the next gift in the series,
>
> (d) the recipient of the last gift in the series is the settlor or, at the time that last gift is made, is a close member of the settlor's family,
>
> (e) as regards any earlier gift in the series, its recipient—
>
> (i) is not the settlor, and
>
> (ii) is not, at the time that earlier gift is made, a close member of the settlor's family, and
>
> (f) the condition in subsection (1)(g) is met in relation to each gift in the series,
>
> the last gift in the series is to be treated for the purposes of subsection (1)(f) as if its maker were the original recipient (and not its actual maker).

47.37.8 *Misc*

Section 643M ITTOIA provides:

> (4) Where the onward payment [gift] is made as mentioned in subsection (1)(f)(ii) [pre-benefit gift], the onward payment [gift] is to be treated, for the purposes of subsections (1)(h) and (3), as made immediately after, and in the tax year in which, the original benefit is provided to the original recipient.
>
> (5) Where subsection (1)(f) to (h) are met in any case, it is to be presumed (unless the contrary is shown) that subsection (1)(e) is also met in that case.[179]
>
> (6) Where the benefit mentioned in section 643I(1)(b) is one that subsection (3) of this section treats as provided, section 643I(1) has effect with the omission of its paragraph (c).

47.38 s.643A onward-gift remit. basis

Section 643N ITTOIA provides:

> (1) This section applies in relation to income if—
>
> (a) the income is treated as arising to an individual for a tax year—
>
> (i) by section 643J(3) and (4) where section 643J(3) applies because of section 643J(2), or
>
> (ii) by section 643L,[180] and
>
> (b) section 809B, 809D or 809E of ITA 2007 (remittance basis)

[179] For this presumption, see 61.31.2 (Cond. (b): Intention to give).

[180] See 47.36 (S.643A onward-gift settlor-attribution rule).

> applies to the individual for that year.
>
> (2) The income is treated as relevant foreign income of the individual.
>
> (3) For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis) treat the onward payment [gift], or (as the case may be) the part of it whose amount or value is equal to the amount of the income, as deriving from the income.
>
> (4) In the application of section 832 in relation to the income, subsection (2) of that section has effect with the omission of its paragraph (b).

This follows the drafting of the s.643A remittance basis, in s.643F.[181] It should not have been necessary to set out the s.643A remittance basis twice over; but there it is.

[181] See 47.24 (s.643A remittance basis). This in turn follows the drafting of the s.731 remittance basis: see 50.39 (s.731 remittance basis).

CHAPTER FORTY EIGHT

TRANSFER OF ASSETS ABROAD: INTRODUCTION

48.1 ToA: Introduction
48.1.1 ToA guidance
48.2 Construction of ToA provisions
48.2.1 ToA code: Broad
48.2.2 ToA code: Penal
48.2.3 Priority and discretionary application
48.2.4 Target: Pre-1936 schemes
48.3 "Relevant transfer"
48.4 "Transfer" of "assets"
48.4.1 Assets
48.4.2 Transfer
48.4.3 Contract of employment
48.5 "Person abroad"
48.6 "Resident outside the UK"
48.6.1 Trustees resident outside UK
48.6.2 PRs resident outside UK
48.7 Income "payable" to person abroad
48.7.1 Trading/partnership income
48.7.2 Transferred asset used to pay debt
48.7.3 Person abroad transfers to another
48.8 Situs of asset transferred
48.9 Transfer for full consideration
48.9.1 Income "becomes payable"
48.9.2 Income is identifiable
48.9.3 Deposit in offshore bank
48.9.4 Transfer for issue of securities
48.9.5 Transfer for issue of life policy
48.10 Income of person abroad: Causation
48.10.1 Individual buys secondhand co
48.10.2 Company buys secondhand co
48.11 Associated operation: Definition
48.11.1 "Operation"
48.11.2 Effected "by any person"
48.11.3 "In relation to" assets
48.11.4 Operation precedes transfer
48.11.5 Mere historical association
48.12 Why associated operations matter
48.13 Income received as indirect consequence of transfer
48.13.1 A to B + B to C: Clean-break test
48.13.2 Transfer to trust + trust migration pre-2006
48.13.3 Transfer to trust + transfer to co
48.13.4 Transfer to co + co migration
48.13.5 Transfer to trust + trust migration post-2006
48.14 Income of person abroad
48.15 Capital receipts deemed income
48.15.1 Dividends, etc
48.16 Income of person: Quantum
48.16.1 Administration costs
48.16.2 Trade income/loss of person
48.16.3 Property income
48.16.4 Loan relationship and Forex income
48.16.5 Exchange rate profits/losses
48.17 Genuine transaction defence
48.18 Spouse of transferor
48.19 ToA information notices
48.19.1 Lawyers
48.19.2 Banks

48.1 ToA: Introduction

Non-resident trusts and companies pay no UK tax on foreign income. A non-resident company may pay less tax on UK income. These rules present an obvious means of income tax avoidance. HMRC's first answer to this is Chapter 2 Part 13 ITA, entitled "Transfer of assets abroad" (the **"ToA provisions"**).

There are two main[1] charging provisions:

(1) The **"s.720 charge"** on the transferor; the INT Manual calls this "the income charge".

(2) The **"s.731 charge"** on individuals who receive benefits; the INT Manual calls this "the benefits charge".

This chapter considers requirements these charges have in common. The next two chapters consider them individually.

The provisions are "highly complex".[2] In 1955, the Royal Commission picked out ToA as an example of anti-avoidance legislation obscurely worded and more widely drawn than its purpose requires.[3] But no-one took any notice of that.

In *Fisher v HMRC,* CA held the ToA rules were EU-law compliant.[4] SC did not discuss the issue as it decided the case on other grounds. But post-Brexit, the issue should not arise.

48.1.1 *ToA guidance*

Earlier editions of this work grumbled about a dearth of HMRC guidance.[5] Be careful what to wish for! In 2009 HMRC published guidance on the ToA remittance basis. This is headed TAH, presumably for **T**ransfer of **A**ssets **H**andbook, which appeared to have been a project never completed. In 2013 HMRC published 150 pages of draft guidance[6] and,

[1] There is a third charging provision in s.727 ITA but that is is only a minor supplement to s.720. Some commentators regard the charge under enjoyment condition C as a separate charge, in which case there are said to be four charging provisions; but I would classify that as a sub-rule of the s.720 charge.

[2] *Hoey v HMRC* [2022] EWCA Civ 656 at [201].

[3] See 2.7 (Avoidance legislation 1955 critique).

[4] [2021] EWCA Civ 1438, reversing the UT on this point.

[5] Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (2013/14 edition), para 28.1.

[6] *https://www.gov.uk/government/consultations/reform-of-an-anti-avoidance-provision-transfer-of-assets-abroad*

a decade later, a lightly revised version of this guidance was published in the INTM. But the most difficult issues are hardly addressed and almost every important statement is qualified by words such as *normally, generally, likely, usually, broadly, depending on,* etc. Overall, I do not think public knowledge of the provisions is much improved. Perhaps it was naive to expect otherwise.

48.2 Construction of ToA provisions

48.2.1 *ToA code: Broad*

The provisions are broad and the courts construe them broadly. In *IRC v Brackett*:[7]

> [What is now Chapter 2 Part 13 ITA] is a broad spectrum anti-avoidance provision which should not be narrowly or technically construed.

That is self-evident; no-one would argue otherwise.

48.2.2 *ToA code: Penal*

In *Howard de Walden v IRC* (1941) the CoA went further:[8]

> The Section is a penal one and its consequences whatever they may be, are intended to be an effective deterrent which will put a stop to practices which the Legislature considers to be against the public interest. For years a battle of manoeuvre has been waged between the Legislature and those who are minded to throw the burden of taxation off their own shoulders on to those of their fellow subjects.[9] In that battle the Legislature has often been worsted by the skill, determination and resourcefulness of its opponents, of whom the present Appellant has not been the least successful.[10] It would not shock us in the least to find that the Legislature has determined to put an end to the struggle by imposing the severest of penalties. It scarcely lies in the mouth of the taxpayer who plays with fire to complain of burnt fingers.

[7] 60 TC 134 at p.136.

[8] 25 TC 121 at p.134.

[9] As this sentence illustrates, the fundamental issue of attitudes to avoidance lies behind the construction of the ToA provisions; as to which, see 2.5.2 (Judicial view in the past).

[10] The reader may wonder what this success was. The Court wisely did not explain. The point may be that the transfer of assets abroad was made in 1923, so the income of the person abroad remained untaxed until the enactment of the ToA code in 1936.

Broad is one thing and penal is another. In peacetime, *Vestey v IRC* stepped back from the unfairness. In the High Court:[11]

> I conceive it to be in the national interest, in the interest not only of all individual taxpayers - which includes most of the nation - but also in the interests of the Revenue authorities themselves, that the tax system should be fair. Absolute equity is, of course, impossible to achieve, and nobody would cry for the moon. But rank, blatant injustice, of the kind and on the scale exemplified in
> [1] s 408 ITA 1952
> [2] s 412(1) ITA 1952 in some circumstances, and
> [3] s 412(2) on the Crown's construction of it,[12]
> is another matter.
> Like Lord Upjohn in *IRC v Bates,*[13] I am quite unable to understand upon what principle of the law the Crown, as he said, "realising the monstrous result of giving effect to the true construction", or what it assumes to be the true construction, of these sections, feels itself entitled to mitigate their monstrosity by such concessions as it chooses to make. One should be taxed by law, and not be untaxed by concession. ...
> I am afraid they must have failed to realise the deep, brooding resentment felt by every taxpayer who is not charged simply upon his own income (including, of course, what he himself could have had by way of his own income had he so chosen). A tax system which enshrines obvious injustices is brought into disrepute with all taxpayers accordingly, whereas one in which injustices, when discovered, are put right (and with retrospective effect when necessary) will command respect and support.

And in HL:[14]

> One [argument] much used by the Revenue is that the section is a penal section. But this cuts both ways. In a case such as *Howard de Walden v IRC* this argument has much force. The transferor in that case, who derived a comparatively small benefit from the transferred assets, was taxed in respect of the whole income. It was an entirely valid argument ... in support of so severe a liability, to say that the section was penal and

[11] 54 TC 503 at p.544.

[12] The references are now s.633 ITTOIA, s.720 and 727 ITA; but the unfairness relating to the ToA provisions was removed by the HL decision on appeal.

[13] 44 TC 225, at p.268.

[14] 54 TC 503 at p.583-584.

> meant to deter transfers abroad. In such a context his metaphor of burnt fingers is completely apposite.
> But the argument turns the other way when so draconian a tax ("astonishingly severe" were [Counsel for the Crown's] words) is sought to be imposed upon persons who had no hand in the transfer, who may never benefit from it, who cannot escape from it, who remain under liability so long as they live or the settlement lasts. In relation to such persons equity and principle suggests that Parliament intended no such thing - or at least cannot be assumed from the veiled language used to have intended any such thing. To penalise is one thing, to visit the sins of the transferor on future generations is quite another. Given the choice between a fair and an unfair outcome, the correct construction is to prefer the former where possible.

The provisions are only penal in certain contexts or in certain ways.

It also depends on what one means by "penal". The outcome in *Howard de Waldon* is in line with other anti-avoidance provisions. A settlor who retains a small benefit under a trust is taxed on the whole of the trust income and gains. That is not normally described as penal. It might be that we are inured to unfairness by familiarity. But one might say that the policy of requiring complete exclusion is rigorous but not, in fact, unfair.

The pendulum swung back, or appeared to, in *Hoey v HMRC*:[15]

> Lord Wilberforce, delivering the leading speech [in *Vestey*], explicitly upheld the approach adopted by Lord Greene MR in *Lord Howard de Walden* ...

Not at all: Lord Wilberforce was much more nuanced. But having paid verbal tribute to Lord Greene in *Howard de Waldon*, the CoA in *Hoey* was, the reader may think, inconsistently, concerned to avoid unfairness in the form of double taxation; and it ultimately held that the ToA provisions did not apply.[16]

What is "penal" is a matter of degree, and it would help clarity of analysis to avoid the word, and to focus on the issue in point. While the provisions are broad, it continues to be the case that "given the choice between a fair and an unfair outcome, the correct construction is to prefer the former where possible." But who can resist the rhetoric and metaphor

[15] [2022] EWCA Civ 656 at [145], citing another sentence of Lord Wilberforce out of context.

[16] See 51.9 (Double-counting relief)..

of "burnt fingers"?

This discussion of principles of interpretation operates at a high level of generality. Would the more refined analysis proposed here affect outcomes? Probably not. But it is good to know what we are talking about.

48.2.3 *Priority and discretionary application*

The ToA provisions are expressed in mandatory terms, and do not only apply at the option of HMRC. This view was rightly accepted by HMRC (despite the irritation of the judge) in *Anson v HMRC*.[17] What is sauce for the goose is sauce for the gander.

48.2.4 *Target: Pre-1936 schemes*

It is relevant to note the pre-1936 schemes against which the ToA provisions were originally targeted:

> The device at which [s.18 FA 1936, now s.720] is aimed ... In its simplest form it consists of a transfer of assets, for a consideration payable in debentures, to a foreign company in which all but a nominal proportion of the share capital is held by the transferor. ... the company is controlled abroad ... so as to be for tax purposes not resident in the UK.[18] The assets transferred either are, or are exchanged into, investments of which the income is not liable to British tax in the hands of a non-resident.
>
> The income of the investments provides cash from which debentures can from time to time be redeemed to the extent required to satisfy the transferor's current requirements. The sums so received by the transferor do not attract tax in his hands, since they are of the nature of a capital repayment.
>
> The company declares no dividends... Surplus income is accumulated by the company and is available for distribution as capital whenever the time may be thought opportune for a winding up.
>
> So long as the company is kept in being the transferor, as debenture holder, is merely getting back his capital, but tax-free income is, in effect, being accumulated for his benefit as shareholder whenever he chooses to appropriate it by means of a winding up...

[17] [2012] UKUT 59 (TCC) at [18]. For the difficulties which would arise on any other view, see 52.36 (Motive/EU defence: Disclaimer).

[18] Author's footnote: Canada was the usual jurisdiction of choice.

There are many possible variations of such schemes.[19]

48.3 "Relevant transfer"

The key concept is "relevant transfer". The ToA charges only apply if a relevant transfer occurs.

Section 716(1) ITA provides:

> A transfer is a relevant transfer for the purposes of this Chapter if—
> (a) it is a transfer of assets, and
> (b) as a result of—
> (i) the transfer,
> (ii) one or more associated operations, or
> (iii) the transfer and one or more associated operations,
> income becomes payable to a person abroad.

This sets out the following basic conditions:

(1) *A transfer of assets*

(2) *Income becomes payable to person abroad*

(3) *Causation*: Condition (2) is caused by (i) the transfer, or (ii) associated operations, or (iii) both. I refer to this as "**relevant transfer causation conditions (i), (ii) or (iii)**", or together, the "**relevant transfer causation conditions**".

These conditions are the subject of this chapter. However the fact that there is a relevant transfer is not sufficient in itself to cause a tax charge. The further conditions in one of the charging sections must be satisfied. These are considered in the next two chapters.

48.4 "Transfer" of "assets"

48.4.1 *Assets*

Section 717(a) ITA provides a commonsense definition of "assets":

> In this Chapter [Chapter 2 Part 13 ITA] —
> (a) "assets" includes property or rights of any kind

48.4.2 *Transfer*

Section 716(2) ITA provides an extended definition of "transfer":

[19] Stein & Marks, *Tax avoidance: An interpretation of the provisions of the Finance Act, 1936, relating to transfers of assets, companies' sur-tax, children's settlements* (1936) p.2.

> In this Chapter "transfer", in relation to rights, includes the creation of the rights.

Where the word is used in this sense, it may be appropriate to use scare quotation marks. Thus:

- The issue of shares is a "transfer" of assets.[20]
- If two parties enter into a contract there are *two* "transfers" of assets, as both parties acquire rights.

Note that there may be a "transfer of assets" in circumstances where there is no individual who is the "transferor".

48.4.3 *Contract of employment*

In *Brackett v Chater*[21] T entered into a contract of employment with an offshore company. This was held to be a transfer of assets:

> The Revenue submit that by entering into the contract of employment the taxpayer created rights vested in Drishane which were valuable and capable of being turned to account, and that by virtue of those rights, together with the associated operation of carrying on a trade as business consultant, income became payable to Drishane.
> The Special Commissioners ... said that the taxpayer's earning capacity was not an asset in respect of which rights could be transferred to or created in favour of Drishane.

This is a non-sequitur, because although the earning capacity is not an asset, it does not follow that the contract of employment is not an asset. Or as the Judge put it:

> This suggests that the "rights of any kind" which can constitute assets under [what is now s.717(a) ITA] must be rights in rem subsisting over some other assets. I can see no basis for this restrictive interpretation.
>
> Second, the Special Commissioners said that the rights acquired by Drishane were not created by the taxpayer because they came into existence under a contract to which he was only one party.

This was at least a tenable argument. But it did not succeed:

> This, too, is in my view an unduly restrictive construction. The contract

[20] This is self-evident, but if authority is needed, see *Dunsby v HMRC* [2020] UKFTT 271 (TC) at [159].

[21] 60 TC 134 at 147.

> of employment is no doubt a bilateral transaction by which each party undertakes obligations and thereby confers rights on the other. In the context of [the ToA code], and in particular the extended meaning of "assets" contained in [s.717(a) ITA], it seems to me appropriate to describe the rights of one party under the contract as having been created by the other.

Hoey v HMRC wrongly doubted this:[22]

> ... we have some misgivings about treating the entry into a contract of employment as involving the creation by the employee of rights vested in the employer ... However, we will not pursue these doubts any further, because there is no issue between the parties on the point, and we have not heard full argument on it.

This would have been a solution to the problem of double taxation raised in *Hoey*; but that problem was solved in a better way.[23] It is considered that it continues to be the law that entering into a contract is a "transfer" of assets.

If B borrows from L there are two transfers of assets, for B acquires the money borrowed and L acquires the benefit of the debt. If L is non-resident, then the interest is income arising to a person abroad.

48.5 "Person abroad"

Section 718(1) ITA provides:

> In this Chapter "person abroad" means—
> (a) a person who is resident outside the UK, or
> (b) an individual who is domiciled[24] outside the UK.

A UK resident foreign incorporated company is not a person abroad.[25]

In practice persons abroad take the form of trusts or companies. An individual could be a person abroad if, say, they entered into contractual arrangements with a UK transferor, without constituting a trust; but that is not likely to happen in practice.

See too 51.3.1 (CT on person abroad's income).

[22] [2022] EWCA Civ 656 at [148].

[23] See 51.9 (Double-counting relief).

[24] Section 718(3) ITA provides: "Section 835BA (deemed domicile) applies for the purposes of subsection (1)(b)." This is the standard wording to apply the deemed domicile rules.

[25] For the law before 2012/13, see the 2013/14 edition of this work para 28.4.1.

48.6 "Resident outside the UK"

Tax legislation usually refers to a person as being "resident in the UK" or "not resident in the UK" and those are well understood expressions. "Resident outside the UK" is unusual, though not unknown.[26] It is not the same as "not resident in the UK".

For when a company is resident outside the UK, see 8.20 (Residence outside UK). ToA has statutory rules for where the person abroad is a trustee or a personal representative.

48.6.1 *Trustees resident outside UK*

Section 718(2) ITA provides:

> For the purposes of this Chapter, the following persons are treated as resident outside the UK–
>
> (b)[27] the person treated as non-UK resident under section 475(3) (trustees of settlements)[28]

This is needed because the statutory provision tells us that trustees are UK resident, or non-UK resident, but it does not (or at least not expressly) tell us when trustees are "resident outside the UK." It might perhaps have been argued that trustees who are not resident in the UK are not resident anywhere else, so they are not "resident outside the UK."

What if the trustees are UK resident but also resident in another state, ie dual resident?

48.6.2 *PRs resident outside UK*

Section 718(2) ITA provides:

> For the purposes of this Chapter, the following persons are treated as resident outside the UK...
>
> (c) persons treated as non-UK resident under section 834(4)

[26] Other examples are:

(1) Section 721(1) ITEPA: "foreign employer" defined as an individual, partnership or body of persons "resident outside the UK and not resident in the UK."

(2) Section 355(1) TIOPA: "Offshore fund" defined as a mutual fund constituted by a body corporate "resident out of the UK".

(3) Section 162(5) IHTA: IHT deduction for liability to person resident outside the UK.

[27] There is no para (a).

[28] See 7.4 (Trust residence for IT/CGT).

(personal representatives).[29]

In practice persons abroad take the form of companies or trusts, not PRs, so this is somewhat theoretical. It is, perhaps, needed to avoid leaving a gap but it is not necessary to discuss the topic further.

48.7 Income "payable" to person abroad

The condition here is that income becomes payable to a non-resident or foreign domiciled person (the person abroad).

48.7.1 *Trading/partnership income*

In *Latilla v IRC*:[30]

(1) A partnership of individuals carried on a trade (mining in Rhodesia).
(2) Three of the 5 partners (who were UK resident) transferred their partnership shares to a company abroad.
(3) The company received its share of the partnership's trading profits.[31]

The taxpayer raised two arguments:

(1) An argument based on the nature of trading income: Trading income is not income *payable* to the persons carrying on a trade. Trading income is the result of a computation made in trading accounts. The receipts of the trade are not the trading income. The income may be said to income *arising* to or *received* by the company, but not *payable* to it.
(2) Arguments based on the nature of partnership income:
    (a) Trading income (if it is *not* payable to the trader) does not become payable because it is received from a partnership.
    (b) If trading income *is* payable to the partnership, it is still not payable to the partners.

These seem to me distinct issues, though they all depend on giving a narrow meaning to the word payable.

The court curtly dismissed both arguments in a single sentence. The word "payable" was wide enough to apply to trading income received by

[29] See 89.3 (Residence of PRs for IT).

[30] 25 TC 107. For another aspect of this case see 48.11.3 ("In relation to" assets).

[31] If the same arrangement was made today it would be necessary to consider the mixed partnership code; see 86.4 (Mixed partnership code); 86.13 (A (transferor) not partner: s.850D).

partners of a trading partnership:

> If this is not income "payable" to the company, we do not know what it is.[32]

It seems surprising today that the point was thought arguable, but the 1936 textbook on the ToA provisions had supported the taxpayer's side of the argument.[33] It is easy to forget how far the pendulum has swung from literal to purposive construction.

The court did not stop to analyse the nature of trading income, or partnership income, but it is clear that both arguments are wrong:

(1) Trading income is "payable" to the persons or person[34] carrying on the trade.[35]

(2) Partnership income is "payable" to the partners. In modern terminology, one would say that a partnership is transparent for ToA purposes (consistent with the general IT treatment of partnerships).[36]

In short, "payable" is equivalent to "arising" or "receiving or entitled".[37]

48.7.2 *Transferred asset used to pay debt*

Suppose T transfers money to a person abroad, and the person abroad uses the funds to repay a debt. In principle, no income arises to the person abroad as a result of the transfer, so the transfer does not satisfy the

[32] The same conclusion was reached for the word "receipt" in *IRC v Thompson* 20 TC 422 at p.429: "[The taxpayer's argument] was that "income" in that Rule meant the balance of profits and gains, and that the Receiver in receiving the money of the Company as it came in from time to time was not receiving the balance of profits and gains, and that therefore he was not the person who received within the meaning of that Rule. But there appears to me to be nothing in that contention. The Receiver in fact receives the proceeds of all the assets of the Company, whether they are capital or whether they are income, and in receiving the proceeds of assets which are income assets he receives the income within the meaning of that Rule."

[33] Stein & Marks, *Tax avoidance: An interpretation of the provisions of the Finance Act, 1936, relating to transfers of assets, companies' sur-tax, children's settlements* (1936) p.6.

[34] In *Latilla* the person abroad was trading in partnership; but trading income is also "payable" to a sole trader: *Brackett v Chater* 60 TC 134 and 639, at p.147.

[35] See 18.17.1 (What is trading income).

[36] See 85.16 (Partnership transparency: IT/CT).

[37] Thus the definition of relevant income is income which *arises* to a person abroad, see 50.20 ("Relevant income": Definition), but the meaning is obviously the same. See too 15.3 (Recognition/attribution: Analysis).

transfer of asset provisions.[38]

48.7.3 *Person abroad transfers to another*

Suppose assets are transferred from one person abroad to another, eg from offshore trustees to an offshore company. Can one argue that there is no relevant transfer because one cannot say that income *becomes* payable to a person abroad? It was payable to *a* person abroad even before the transfer! The argument is linguistically possible, but the context shows that it is wrong. If the argument was right then a transfer by a non-resident or foreign domiciled transferor would never be a relevant transfer, which is certainly not the case.

The condition is also satisfied where the transfer is to a UK resident and domiciled person who later becomes non-resident or foreign domiciled.[39]

48.8 Situs of asset transferred

The Chapter heading "transfer of assets abroad" might suggest a requirement that a UK situate asset must become non-UK situate; but that is obviously not the case. After all, the creation of rights may be a transfer of assets, and newly created assets are not situate anywhere before the transfer.

HMRC agree. The INT Manual provides:

> **INTM600280: Location of assets** [Jul 2023]
> The location of assets either before or after a transfer does not affect the application of the provisions if one of the required outcomes of a transfer is present. Those outcomes are discussed in more detail elsewhere in this guide (for example, see INTM600340).
> The heading of Chapter 2, Part 13 Income Tax Act 2007 is 'Transfer of Assets Abroad' but in fact there is nothing within the legislation itself requiring that assets must be located outside the UK or moved abroad from the UK.
> In his decision in the case of CIR v Willoughby (70 TC 57) at page 81, the Special Commissioner appears to share this view, saying
>
> > In my opinion, and so I hold, this language may be satisfied whether

[38] The example is based on the facts of *Fynn v IRC* 37 TC 629 where the Revenue did not argue that s.720 applied, presumably because they accepted this view. Instead the Revenue argued s.727 applied: see 49.24.3 ("Connected with transfer").

[39] This is self-evident, but if authority is needed, see *Congreve v IRC* 30 TC 163 (a gift to a company which became non-resident), approved on this point in *IRC v Willoughby* 70 TC 57.

> the assets are transferred from the UK to outside the UK, or being outside the UK they are transferred to a person outside the UK.

The taxpayer in *Willoughby* wisely abandoned this argument on appeal.

48.9 Transfer for full consideration

A relevant transfer may be made for full consideration[40] and need have no element of bounty (gratuitous intent). (Contrast the settlor-interested trust code).[41]

HMRC agree. The INT Manual provides:

> **INTM600240 What is a transfer?** [Jul 2023]
> ... The fact that an individual may receive a payment or consideration in full for a movement of some form of property from one person to another does not prevent that action from being a transfer for the purposes of the transfer of assets rules.

Two principles[42] restrict what would otherwise be the unworkably wide extent of this rule:

(1) Income must *become payable* to the person abroad as a result of the transfer

(2) Income of the person abroad arising as a result of the transfer must be *identifiable*

48.9.1 *Income "becomes payable"*

A requirement of a relevant transfer is that income "becomes payable" to the person abroad as a result of the transfer.

Suppose T buys an asset from a person abroad for cash ("the purchase price"). At first glance, the payment of the purchase price is a relevant transfer. The payment is a transfer of assets. As a result of the payment, income (from the cash) will normally arise to the person abroad. However, it is considered that the transfer is not a relevant transfer if:

(1) the asset would otherwise have yielded income to the person abroad;[43]

(2) the purchase price does not exceed the value of the asset.

[40] See 48.9.4 (Transfer for issue of securities).

[41] See 87.4 (Settlement-arrangement definition).

[42] Double-counting relief might also apply, see 51.9 (Double-counting relief). But if the analysis in this section is correct, it is not necessary to rely on that.

[43] The position would be different if T transfers assets to an offshore company in consideration of an issue of shares or debentures, or a life policy.

In these circumstances, the person abroad:

(1) acquires the income arising from the purchase price which T transfers to them, but

(2) loses the income arising from the asset which they sell to T.

If the two income streams are broadly equivalent, they cancel each other out, so it cannot be said that income "becomes payable" to the person abroad.

The same applies if T sells an asset to a person abroad for cash.

If that is right, the transfer of asset conditions are not satisfied every time someone sells an asset to (or buys an asset from) a non-resident person. That would be a sensible result, for two reasons:

(1) If T sells assets to an offshore trust, say, or to an offshore company, it would be surprising if T's only defence to ToA was the motive defence.[44]

(2) Suppose a straightforward series of acquisitions and disposals:
    (a) A transfers the trust fund to a non-resident trust with standard form power to add beneficiaries.
    (b) The trustees purchases an asset from B.
    (c) The trustees sell the asset to C.
    (d) The trustees use the purchase price to purchase an asset from D
    (e) The trustees sell the asset to E ... *etc*

It would be surprising if A, B, C, D and E were *all* transferors, *any* of whom could in principle be taxable on *all* the trust income under s.720 (and two more transferors may come into charge on every further transaction of sale and purchase).

48.9.2 *Income is identifiable*

Sections 720/731 require that one must *identify* the amount of income which arises to the person abroad as a result of the transfer. If that identification is not possible then s.720/731 do not - indeed cannot - operate.[45] One might go further and say that transactions are only relevant

[44] In such cases T would often have "power to enjoy". Unless this is right, there is double taxation. T may be liable under s.720 for income tax on the income arising from the asset sold to the person abroad. T is also liable to income tax on income arising from the proceeds which T receives on the sale of the same asset.
If my view is wrong, then the motive defence should be generously applied in cases of a sale for full consideration.

[45] Likewise for s.624; see 47.2.4 (Income must be identifiable).

transactions if the amount of income arising as a result of them is identifiable, but it is sufficient to say that "income payable" means ascertainable income.

Avery Jones raises this question:

> What about buying a ticket from a foreign airline, buying a meal or paying for a hotel room when abroad? There is a transfer of assets and it is clear that "income becoming payable" includes the receipt of sums which form part of the recipient's trading profits. Oh, and there is my IFA subscription, my subscription to *European Taxation*, my purchase of that overpriced new edition of *OECD Model Tax Convention*, and the new edition of *Klaus Vogel on Double Taxation Conventions* direct from the publisher. Foreign entities all of them. I expect if I think for a moment I shall think of lots more. What about my (foreign) car? Did I buy it from an agent for the manufacturer or from a UK subsidiary, and does it make any difference anyway?[46]

These payments are all transfers of assets, as a result of which (additional) trading[47] income in principle becomes payable to the person abroad. But neither s.720 nor s.731 apply, because one cannot identify the amount of income which becomes payable as a result of them.[48]

An individual who enters into a contract of employment with a non-resident employer makes a transfer of assets, but (except for a one-man company) one cannot usually identify what income becomes payable to the employer as a result of that transfer, so s.720/731 do not apply.

The question whether one can identify the income which arises to the person abroad as a result of a transfer sometimes overlaps with the question whether one can identify a transferor. In *IRC v Pratt*[49] where a company made a transfer, the taxpayers were held not to be transferors because one could not identify income arising to the person abroad from what each individual taxpayer had contributed or done.[50] But the two questions are in principle distinct.

[46] [1998] BTR 392.

[47] Except in the case of a purchase of the foreign car from a UK subsidiary, where the income arising to the person abroad would be the dividend (if any) from the subsidiary.

[48] Of course in practice considerations of materiality might also arise.

[49] 57 TC 1.

[50] See 49.5 (A procurement test).

48.9.3 *Deposit in offshore bank*

Suppose T deposits money with a non-resident bank. The deposit (in legal terms, a loan) is a transfer of assets but s.720/731 do not apply, because one cannot identify the amount of income which becomes payable to a person abroad as a result of it:

(1) The trading income of the bank is increased. The increase may be reduced or almost cancelled by the interest the bank pays to T, but the bank's income is still increased, assuming the bank is profitable. However the amount of that increased income cannot be identified.

(2) T receives interest, but T is not a person abroad.

Contrast the position if T lends money to a trust or underlying offshore company: that would be caught.

48.9.4 *Transfer for issue of securities*

Suppose T transfers an asset to a foreign company in exchange for the issue of loan notes (debentures) in that company (set up for the purpose and wholly owned by a trust or structure set up by T). This may well be transfer for full consideration. It is nevertheless a relevant transfer. Indeed it is the paradigm ToA case.[51]

The same applies to a transfer in exchange for an issue of shares.

Contrast the position if T subscribes for shares or debentures in (say) a quoted foreign company or collective investment scheme. This is not a relevant transfer as one cannot identify the income which arises as a result of the transfer. So an individual who subscribes for shares in (say) Microsoft Corp makes a transfer of assets, but one cannot identify what income becomes payable to Microsoft as a result of that transfer, so the ToA provisions do not apply. Likewise an individual who subscribes for a small interest in a collective investment scheme.

48.9.5 *Transfer for issue of life policy*

The same applies if T pays a premium for a life policy issued by a large foreign institution (or subscribes for a contract or bond of a similar nature) . One cannot normally identify the income arising to the institution as a result of the transfer so this is not a relevant transfer. However, if the policy is linked to particular investments actually made by the institution

[51] See 48.2.4 (Target: Pre-1936 schemes).

(as is typically the case for a personal portfolio bond), it would in principle be possible to identify the income, and there would be a relevant transfer.

48.10 Income of person abroad: Causation

It is not sufficient for a relevant transfer that (1) there is a transfer of assets and (2) income becomes payable to a person abroad. The income must become so payable as a result of the transfer (or associated operations). The test is one of causation.

In *Rialas v HMRC*[52] the facts were:

(1) The taxpayer ("R") transferred £10 to constitute an offshore trust ("the nominal cash transfer").
(2) Then:
    (a) The trust acquired an underlying company ("F").
    (b) A third party sold shares in a company ("A") to F. F borrowed the $15m purchase price.
    (c) F received dividends from the shares.[53]

No income arose as a result of the nominal cash transfer. The UT referred to the causation requirement and continued:[54]

> ... the establishment of [the Trust] and that trust's acquisition of the subscriber shares in F were necessary preconditions to the transfer of [the third party's] shares as those steps were important to the acquisition structure that R put in place. However, that is not the same thing as saying that A paid dividends to F in "by virtue or in consequence of" the establishment of [the Trust] or that trust's acquisition of the subscriber shares, or a combination of both. Put another way, the establishment of [the Trust], and the acquisition of the subscriber shares in F, did not themselves enable F to receive dividends on the Argo shares. The receipt of such dividends could only be guaranteed once [the third party] had, additionally, agreed to sell those shares and F had funds to pay the purchase price due.

48.10.1 *Individual buys secondhand co*

Suppose T (UK resident) buys the shares of an already existing non-

[52] [2020] UKUT 367 (TCC). The case is not yet final.

[53] The steps at (2) were not associated operations in relation to the nominal cash transfer, as they were not "effected in relation to the assets transferred" by the nominal cash transfer; see at [53].

[54] at [52].

resident company ("**a secondhand company**"). Assume the company owns assets. That purchase involves a transfer of assets by T – payment of the purchase price[55] – which is described in the following discussion as the "**purchase-price transfer**".

It is the case that income arises to a person abroad (the company). However, it cannot be said that the income became payable to the company as a result of the purchase-price transfer. The company merely continues to receive the income from its own assets, as it did before, and that is not in any way affected by the change in ownership of its shares. Thus if the seller is UK resident and domiciled, the purchase-price transfer is not a relevant transfer.

Now suppose T purchases the shares from a person abroad. In that case the purchase-price transfer may be a relevant transfer because the seller may invest the proceeds of sale and receive income as a result of that transfer. However, the income arising as a result of the purchase-price transfer would be the income arising to the seller, not the company's income. If the seller is not connected to T, it is not likely that T will have power to enjoy the income.

In these cases there will have been (at least) one other transfer of assets, the transfer of assets to the secondhand company (eg on a subscription for the company's shares). I call this the "**company-funds transfer**". The company-funds transfer is a relevant transfer. If T is the transferor of that transfer then T will in principle be within s.720 and taxed on the secondhand company's income.[56] T may alternatively be subject to tax under s.731 if T receives benefits (unless the company-funds transfer qualifies for the motive defence).

The secondhand company may later make a relevant transfer.[57] If T procures that transfer, T is the transferor in relation to that transfer.

48.10.2 *Company buys secondhand co*

Now suppose:

(1) T transfers assets to H Ltd, a non-resident company ("**T's transfer to**

[55] The sale in fact involves two transfers of assets: payment of the purchase price to the seller and transfer of the shares to T.

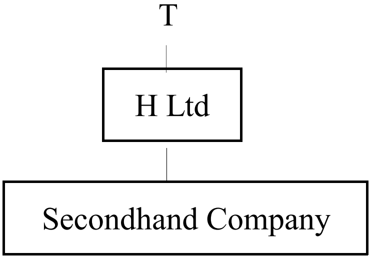
[56] As to whether T is the transferor, see 49.4 (Who is the transferor).

[57] For instance, a transfer to a non-resident subsidiary. A straightforward sale of assets by the company may not be a relevant transfer because no income becomes payable; see 48.9.1 (Purchase from person abroad).

H”).

(2) H uses its funds to purchase a secondhand company (the “**purchase-price transfer**”).

Thus the position is:



A similar analysis applies:

(1) T’s transfer to H is in principle a relevant transfer. However, no income arises to a person abroad as a result of that transfer.[58]

(2) The purchase-price transfer is not a relevant transfer. No income arises to the secondhand company as a result of that transfer. Income does arise to the secondhand company, but not as a result of T’s transfer to H or the purchase-price transfer.

Suppose H Ltd then lends[59] funds to the secondhand company (**“the inter-group transfer”**). T will then be subject to tax under s.720 on the income arising to the secondhand company from the additional funds, if that income can be identified, on the basis that:

(1) The inter-group transfer is an operation associated with T’s transfer to H, and income arises to the secondhand company as a result of T’s transfer to H and that operation; or

(2) T may also be a transferor of the inter-group transfer on the basis that T procured that transfer. (But if the associated operations rule applies, it is not necessary for HMRC to rely on that point.)

48.11 Associated operation: Definition

Section 719(1) ITA provides just about the widest definition the drafter could devise:

> In this Chapter [Chapter 2 Part 13 ITA] “associated operation”, in relation to a transfer of assets, means an operation of any kind effected

[58] Assume no income arises to H (the secondhand company does not pay a dividend).

[59] The same analysis applies if H Ltd subscribes for shares in the secondhand company.

by any person in relation to—

(a) any of the assets transferred,
(b) any assets directly or indirectly representing[60] any of the assets transferred,
(c) the income arising from any assets within para (a) or (b), or
(d) any assets directly or indirectly representing the accumulations of income arising from any assets within para (a) or (b).

I refer to items (a) to (d) as the **"assets transferred"**.

An associated operation does not exist in isolation: it exists in relation to a transfer of assets ("the principal transfer"). I refer to that as being **"associated with"** the transfer. There are two requirements. The associated operation must be:

(1) an "operation".
(2) "effected in relation to" the assets transferred by the principal transfer.

The term "associated operation" is also used in IHT. The IHT definition is similar in some respects, and IHT cases will sometimes provide assistance.[61]

48.11.1 *"Operation"*

"Operation" is (rightly) not defined but is clearly a word of wide import.

A transfer of assets is an operation, but an operation need not be a transfer of assets.

A company becoming non-resident is an operation.[62] Death is not an operation, but that does not matter because the act of making a will is an

[60] "Representing" is defined in s.717(b) ITA:

> "references to assets representing any assets, income or accumulations of income include references to—
> (i) shares in or obligations of any company to which the assets, income or accumulations are or have been transferred, or
> (ii) obligations of any other person to whom the assets, income or accumulations are or have been transferred."

Suppose:
(1) T transfers assets to a company and
(2) T transfers the shares in the company to another person.

The second transfer is an associated operation in relation to the first. This would not have been clear without the definition at (i).

I would be grateful to any reader who could find a cogent example of the application of the definition at (ii).

[61] See 74.11.2 (ToA/IHT assoc ops compared).

[62] *Congreve v IRC* 30 TC 163.

operation.[63]

In *Herdman v IRC* 45 TC 394:

(1) An individual transferred (sold) assets to an Irish company.
(2) The company then "accumulated" income and "managed" its assets so as to be able to repay a loan to the transferor.

The steps at (2) were held to be "operations" by most of the judges but this is *obiter* (non-binding) and difficult to accept. Unlike IHT, operation does not include an omission. A company does not "accumulate" income (in the legal sense). If "management" is an operation then everything is an operation (all assets must be "managed") and the expression makes no sense. Lords Pearce and Reid (more judiciously) left open the question of whether these were "operations".

48.11.2 *Effected "by any person"*

The INT Manual provides:

> **INTM600300 Associated operations** [Jul 2023]
> ... An operation effected by someone other than the transferor can be an associated operation as the legislation states it can be effected by any person...

This is self-evident. The guidance gives a couple of examples:
Corbett's Executrices v IRC where the associated operations were:

(1) An individual transferred assets to a UK resident company
(2) The company subsequently sold some of the assets to a non-resident company[64]

Herdman v IRC where the associated operations were:

(1) An individual transferred assets to a company
(2) The company accumulated/managed the assets[65]

48.11.3 *"In relation to" assets*

In *Fynn v IRC*:[66]

[63] *Bambridge v IRC* 36 TC 313. This case contains the aphorism: "Death, as we know, is an awfully big adventure, but even the Crown admits that it is not an associated operation." More prosaically, death is not an associated operation as it is not "effected by a person in relation to assets".

[64] See 48.13.1 (A to B + B to C: Clean-break test).

[65] See 48.11.1 ("Operation").

[66] 37 TC 629. *HMRC v Rialas* [2020] UKUT 367 (TCC) at [53] offers a further, similar example; see 48.10 (Income of person abroad: Causation).

(1) In 1948 T transferred assets to an Irish company (the principal transfer).
(2) In 1952 T lent money to the company ("the 1952 loan").

The 1952 loan was not an operation associated with the principal transfer, because it was not effected "in relation to" the assets transferred by the principal transfer.

In *Carvill v IRC*:[67]

(1) T transferred assets to a Bermudian company (B Ltd) in exchange for shares, and so became a majority shareholder in B Ltd ("the principal transfer").
(2) T became a 100% shareholder in B Ltd by
    (a) T purchasing shares and
    (b) B Ltd purchasing its own shares.
(3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were not operations associated with the principal transfer, as they were not effected in relation to the assets transferred by the principal transfer.

On the other hand, in *Latilla v IRC*:[68]

(1) Partners transferred a share in a trading partnership to a company abroad (the principal transfer)
(2) The company received its share of the partnership's trading profits.

The taxpayer argued that income became payable to the company not as a result of the transfer, but as a result of the subsequent activities of the partnership. One might have doubted that, as a matter of causation; but the court curtly held that the partnership activities were operations associated with the principal transfer, which is another route to the same destination.

48.11.4 *Operation precedes transfer*

Section 719(2) ITA provides:

> It does not matter whether the operation is effected before, after, or at the same time as the transfer.

[67] [2000] STC (SCD) 143 at [80]-[85], 75 TC 477 (Special Commissioners).
[68] 25 TC 107. For another aspect of this case see 48.7.1 (Trading/partnership income).

This provision (introduced 2006) gives statutory effect to the view previously expressed in RI 201.[69]

One can envisage an operation effected before the transfer. For instance, suppose an arrangement under which:

(1) An individual transported a chattel from the UK to outside the UK (an operation but not a transfer).
(2) The individual then transferred the chattel to a person abroad.

But I cannot think of a case where s.719(2) would actually matter in practice, for the purposes of the ToA rules.

48.11.5 *Mere historical association*

On a simple reading of the definition, an operation can be associated with an earlier transfer even if the two were not part of a single plan or arrangement, and many years apart. Suppose:

(1) A transfers an asset to B (who is UK resident) in 1970 ("A's transfer")
(2) B transfers the asset in the year 2020 to an offshore trust under which A may benefit.

On a simple reading, B's disposition is an operation associated with A's transfer even though:

(1) They are not part of a single arrangement.
(2) A is unaware of B's disposition.
(3) B's disposition is itself a relevant transfer
(4) One or both transfers is a disposal at arm's length.

The same would apply if A's transfer was made in 1870 or 1670. Indeed, anyone who purchases or disposes of an estate in English land is only effecting the most recent operation of a series of associated operations (dispositions of land) which may perhaps be traced back to the Norman Conquest, if not before; and only a lack of records prevents one tracing the sequence of associated operations to the dawn of civilisation. This simple reading obviously cannot be right, and a clean-break test should be implied.[70]

[69] "... an associated operation does not necessarily have to take place after a transfer of assets. A transaction undertaken 'in relation to' a transfer of assets can precede the transfer."
That seemed right. The FA 2006 gave no thought to transitional provisions but in the circumstances it does not matter.

[70] See 48.13.1 (A transfers to B + B to C: Clean-break test).

48.12 Why associated operations matter

It is not enough to establish that there is an operation associated with a transfer. This is just a first step. One must then go on to ask what (if anything) follows.

The term "associated operations" is used in two key definitions:

(1) *Relevant transfer:* s.716(1) ITA provides:

> A transfer is a relevant transfer for the purposes of this Chapter if—
> (a) it is a transfer of assets, and
> (b) as a result of—
> (i) the transfer,
> (ii) one or more associated operations, or
> (iii) the transfer and one or more associated operations,
> income becomes payable to a person abroad.[71]

(2) *Relevant transaction:* s.715(1) ITA provides:

> A transaction is a relevant transaction for the purposes of this Chapter if it is—
> (a) a relevant transfer, or
> (b) an associated operation.

The existence of associated operations is therefore relevant to:

(1) Provisions referring to relevant transfers:
   (a) *Section 720(1) ITA*: referring to avoiding of IT by individuals by means of relevant transfers[72]
   (b) *Section 721(2) ITA*: Individual has "power to enjoy" as a result of a relevant transfer and/or associated operations
   (c) *Section 732 ITA*: Individual receives benefit as a result of the relevant transfer or associated operations[73]
   (d) *Section 733 ITA*: "Relevant income" is income which can as a result of the relevant transfer or associated operations be used for providing a benefit[74]

(2) Provisions referring to relevant transactions:
   (a) *Section 729 ITA*: Individual receives capital sum connected with a relevant transaction

[71] See 48.3 ("Relevant transfer").

[72] See 48.13 (Income received as indirect consequence of transfer).

[73] See 50.13 (Benefit causation condition).

[74] See 50.35 (Income of co held by trust).

(b) *Section 729A*: Definition of protected s.727 company income
(c) *Motive defence*: All relevant transactions must satisfy the motive test[75]

Statute often refers to a relevant transfer and/or associated operations; but since the definition of relevant transfer includes associated operations, the second reference to associated operations may be otiose.

The INT Manual provides:

> **INTM600300 Associated operations** [Jul 2023]
> ... The same associated operations do not have to be taken into account in every context where it is necessary to consider 'associated operations'. For example, a transfer together with an associated operation may result in income becoming payable to a person abroad, but it may be an entirely different associated operation in relation to a transfer that results in an individual having the power to enjoy that income.

This is self-evident, though it is hard to find a practical example.

48.13 Income received as indirect consequence of transfer

48.13.1 *A to B + B to C: Clean-break test*

Suppose:

(1) In 1970 A transfers an asset to B (who is a UK resident individual) ("A's transfer").
(2) In 2000 B transfers the asset to an offshore trust ("B's trust") under which A may benefit ("B's transfer").
(3) A's transfer and B's transfer are not part of a single arrangement, and A is unaware of B's transfer.

B's transfer is clearly a relevant transfer. The question is whether A's transfer is a relevant transfer.

It may be helpful to recap the definition. Section 716(1) ITA provides:

> A transfer is a relevant transfer for the purposes of this Chapter if—
> (a) it is a transfer of assets, and
> (b) as a result of—
> (i) the transfer,

[75] See 52.27 (Pre-2005 associated operations) and 52.28 (Post-2005 transfer + associated operations).

(ii) one or more associated operations, or
(iii) the transfer and one or more associated operations,
income becomes payable to a person abroad.

I refer to part (b) of the definition, paras (i) to (iii), as **"transfer causation conditions (i) to (iii)"**.

A's transfer meets part (a) of the definition: it is a transfer of assets.

Income becomes payable to a person abroad. Transfer causation condition (i) is not satisfied, that is, it is not as a result of A's transfer alone that income has become payable to the offshore trustees. However, B's transfer is at first sight an operation associated with A's transfer. It seems at first sight that transfer causation condition (ii) is satisfied: income becomes payable to the trustees as a result of the associated operation (B's transfer); so A's transfer is a "relevant transfer" and A is taxable under s.720 on the income of B's trust! This clearly cannot be right; but why not? The motive defence is not a satisfactory solution to this problem:[76] one must conclude that A's transfer is not a relevant transfer, that is, it does not satisfy transfer causation condition (ii) or (iii). How do we reach this result?

The best solution, now[77] the key to understanding associated operation rules, is to say that mere historical association is not enough to constitute "associated operations" for ToA purposes. There must be something more.[78] Parliament has not identified that "something more" and has left the job to the courts. The position is reminiscent of the definition of "settlement" (the settlement-arrangement definition) which includes any disposition, leaving the courts to devise their own test for what is caught (in that case, the courts eventually settling on a "bounty" test).

It is suggested that the test for associated operations is the "clean-break"

[76] The motive defence could not help if either A's transfer or B's transfer was made for tax avoidance reasons; or even if B's transfer was innocent but A was unable to prove it: see 52.27 (Pre-2005 associated operations).

[77] The provisions have a complex history: see the 2014/15 edition of this work para 28.11.2 (Position before 2007/08). But the obscurities of the pre-2007 law do not shed much light on the obscurities of the current law.

[78] Contrast the approach to "disposition by associated operations" in *IRC v Brandenburg* [1982] STC 555, where Special Commissioners added a gloss that a disposition made by associated operations (for IHT purposes) must be "put in train" by one person: see Venables, "Gifts by Associated Operations" 5 PTPR 11 *http://www.khpplc.co.uk/reviews*

test, ie is A a settlor of B's trust, did A provide the property indirectly?[79] If not, the operations are not associated.

This view is supported in *Corbett's Executrices v IRC*,[80] where:

(1) Individuals transferred assets to a UK company (Woodgate) in exchange for shares and debentures (the principal transfer)

(2) The UK company sold the assets to a person abroad (the sale)

The time gap between these steps was about 1½ years.

> The interval during which the beneficiaries were thinking out their "associated operations" could not make any difference to the legal conclusion, *unless the Special Commissioners had found as a fact that it negatived the "conjunction" or association between the two operations* - the transfer to and the transfer by Woodgate.[81]

Thus although the sale was associated with the principal transfer, the position would have been different if some (more substantial) break had broken the "association" between the two steps. What amounts to a sufficient break is a question of fact.

HMRC v Fisher said that

> a taxpayer could not avoid the operation of section [720] by simply transferring his income-producing assets to a UK company prior to the transfer of the same assets by the company to a foreign company....

Two reasons are offered for this proposition:

(1) The interposition of the UK company would be regarded as a device, and the substance of the transaction would still be a transfer of those assets by the individual to the foreign entity.

(2) If a UK company was deliberately set up to circumvent a liability to income tax, that scenario might be treated as falling within one of the recognised exceptions to the distinct legal personality of the company.[82]

These are shots from the hip; the point cannot have been fully argued. The proposition is correct, but the correct reason for it is the associated operations rule. There is no need to rely on substance over form or

[79] See 99.7 (A gives to B, B gives to trust).

[80] 25 TC 305.

[81] 25 TC 305 at p.314.

[82] [2023] UKSC 44 at [87].

exceptions (recognised or novel) to the principle of corporate personality; perhaps the less said, the better.

48.13.2 *Transfer to trust + trust migration pre-2006*

Suppose:

(1) In 1990, A transfers assets to a discretionary trust with UK trustees ("A's transfer");

(2) In 2020, the UK trustees appoint foreign trustees and transfer the trust assets to them ("the appointment of foreign trustees").

The appointment of foreign trustees is a relevant transfer. (The appointment of foreign trustees involves a transfer of assets, as a result of which income arises to the non-resident trustees.) The question is whether A's transfer does likewise. That is, is it a relevant transfer?

A's transfer meets part (a) of the definition: it is a transfer of assets.

A's transfer alone does not satisfy transfer causation condition (i). Income becomes payable to a person abroad. But transfer causation condition (i) is not satisfied because it is not as a result of A's transfer alone that income has become payable to the offshore trustees.

However, the appointment of foreign trustees is an operation associated with A's transfer. Although a clean-break test is implied (to make the section work, as discussed above), in this example there is no clean break.[83]

48.13.3 *Transfer to trust + transfer to co*

This is in principle the same as 48.13.2 (Transfer to trust + trust migration pre-2006). This applies whether the transfer by the trustees is gratuitous or in exchange for shares, debentures or an offshore life policy. If the

[83] A fiduciary thread binds the transfer and the operation: see 87.5.7 (Trust appointment: Filling blanks)
The position in 48.13.1 (A transfers to B + B to C: Clean-break test) is different. There, B's transfer is independent in a way that trustees are not, because trustees are constrained by the fiduciary nature of their powers.
This view is supported by a comment in *Congreve v IRC* 30 TC 163. This concerned a gift to a UK company which became non-resident. This was a relevant transfer without the association operations rule. See 48.7 (Income "payable" to person abroad). But the House of Lords also held (at p.206) that the company becoming non-resident was an associated operation; and (by inference) income arose to the company abroad as a result of the transfer and associated operation.

investment is for wholly commercial reasons, it might be argued that is not the case and so the income of the underlying company is not within the ToA provisions; but the better view is that there is no clean break here.

48.13.4 *Transfer to co + co migration*

This is a relevant transfer even without the associated operations rules.[84]

48.13.5 *Transfer to trust + trust migration post-2006*

Suppose the facts of 48.13.2 (Transfer to trust + trust migration pre-2006), but assume the migration occurred after 6 April 2006. The trustees are deemed to be a single continuing person.[85] The analysis is therefore different. The appointment of foreign trustees does not involve any transfer. Instead the analysis is the same as 48.13.4 (Transfer to co + co migration). The end result is the same, though the route to that destination is different.

48.14 Income of person abroad

The concept of "income of the person abroad" is relevant for several purposes of the ToA provisions:

(1) There is a relevant transfer only if "income becomes payable" to a person abroad. If *no* income becomes payable then there is no relevant transfer and the ToA provisions do not come into effect.

(2) The *identity* of the income payable to the person abroad as a result of the transfer is relevant:
   (a) for s.720 ITA, as one must ask whether the transferor has power to enjoy that income;
   (b) for s.731 ITA, as one must ask whether that income can be used to benefit an individual.

(3) The *amount* of income payable to the person abroad as a result of the transfer is relevant as ascertaining that amount is the first step in computing the amount of s.720 income, and the amount of relevant income for s.731.

There are different concepts of income, or, to put it another way, different codes of rules for computing income:

- income for income tax purposes

[84] See above footnote.

[85] 7.3 (Trustees a distinct person).

- income for corporation tax purposes
- income for trust law purposes
- income for accountancy purposes

The transfer of asset rules refer to “income”. This means income for income tax purposes, because the transfer of asset rules are part of the Income Tax Acts.[86]

48.15 Capital receipts deemed income

The INT Manual provides:

> **INTM600400 Income** [Jul 2023]
> ... As well as items that are specifically treated as income there are also items treated as income for some income tax purposes but which may not be income of a person abroad for the purpose of transfer of assets. In considering whether any item is income it is relevant to consider its character in the hands of the person who actually receives it. In the absence of a specific provision that identifies a particular item as income for all UK tax purposes or specifically for the purpose of the transfer of assets legislation, if it is not income in the hands of the person abroad who actually receives it then it is unlikely to be income for the purpose of transfer of assets....

48.15.1 *Dividends, etc*

Section 383(1) ITTOIA provides the charge on dividends and other distributions of a UK resident company and s.383 continues:

> (2) For income tax purposes such dividends and other distributions are to be treated as income.
> (3) For the purposes of subsection (2), it does not matter that those

[86] That is self-evident, but if authority is needed, see *Chetwode v IRC* [1977] 1 WLR 248 at p.251:

> It is first to be noticed that this section forms part of the UK tax code – it was part of the Income Tax Act 1952 which dealt comprehensively with all aspects of income tax in the UK. Moreover, it is concerned with individuals ordinarily resident in the UK and aims at taxing them: it would be a misconception to regard it as concerned with the taxation of companies resident abroad. This means that one should start with a disposition to interpret "income" as that word is used in our tax legislation.

Unfortunately that does not take us very far. The passage continues:

> It is notorious that there is not and never has been any definition of income in the UK tax code. What, as income, is chargeable with income tax is left to be determined according to particular heads of charge under the Schedules.

> dividends and other distributions are capital apart from that subsection.

This applies for ToA purposes and for s.624 ITTOIA, so the distribution on a purchase of own shares, for instance, is income for those purposes[87] even though it is a capital receipt for trust law purposes. Likewise a gain deemed to be income under the transactions in land rules.

The same applies to income deemed to arise under s.410 ITTOIA on a stock dividend of a UK company to a trust. HMRC point out that this provision does not however apply on a stock dividend to a company. The INT Manual provides:

> **INTM601160 Measure of income: stock or scrip dividends** [Jul 2023]
> Where an individual owns shares in a UK resident company that makes a stock or scrip dividend payment (see CTM17005) in respect of those shares, that individual is treated for UK income tax purposes as having received an amount of income equal to the appropriate amount in cash. The amount is however only regarded as the income of the individual and is not regarded as income for all purposes of the Taxes Acts. Thus if the person abroad is, for example, a company, that stock dividend from a UK company would not on the face of it be income in the company's hands. As such it would not be taken into account as income that becomes payable to a person abroad for the purposes of transfer of assets.
> The position for a stock dividend from a foreign company may however be different. The provisions relating to stock dividends in Chapter 5 Part 4 ITTOIA only apply in respect of stock dividends from UK companies. In considering such an item received from a foreign company regard would need to be taken of the relevant foreign law as well as the character in the hands of the receiver. If it is not income in the hands of the person abroad or otherwise specifically treated as income it will fall outside the transfer of assets provisions.

On gains from offshore funds: see 67.10 (OIG arising to non-resident trust). On gains from life policies see 70.10 (ToA: chargeable-event gains).

Suppose the person abroad enters into a transaction which might otherwise be caught by the Transactions in Securities rules in Chapter 1 Part 13 ITA. The rules authorise an officer of Revenue and Customs to

[87] This is assumed to be the case in the drafting of s.482 ITA.

counteract the income tax advantage by making adjustments. They do not deem income to arise to the person abroad. In principle, HMRC would issue the counteraction notice to the UK transferor or beneficiary chargeable under the ToA provisions. But, as seen in 57.17.3(Non-chargeable person: Head (c), there can be no counteraction against the transferor/beneficiary if they are not a party to the transaction.

48.16 Income of person: Quantum

This section considers the amount of the income arising to the person abroad as a result of the transfer and associated operations.

48.16.1 *Administration costs*

In *Chetwode v IRC* 51 TC 647 an offshore company received dividends and interest of about £3,000 per annum. The transferor was taxed on the gross amount of that income, without deduction for (i) investment advice fees, (ii) management fees, (iii) safekeeping charges, (iv) security handling fees and bank charges, (v) registered office and executive office fees, totalling about £1,000 per annum. The approach of *Chetwode* was that s.720 should be construed so as to put the transferor in the same position as if they had retained the assets. Had he done so he could not have deducted these investment costs for the purposes of calculating his income. So there was no deduction for s.720 purposes. This is consistent with s.624.[88]

A deduction is allowed for the cost of collecting foreign income which would have been incurred had the investment income been instead received by the transferor in person.[89] But that does not come to much.

For s.731 purposes, expenses will be deducted in computing relevant income.

48.16.2 *Trade income/loss of person*

Trading income can be calculated:

(1) by accountancy principles, under which statutory non-deduction provisions such as s.34 or s.45 ITTOIA would not apply, and depreciation would in principle be allowed; or

(2) by income tax principles applicable to calculating trading profits.

[88] See 47.2.3 (Trust expenses).

[89] See 16.10 (RFI collection costs).

ToA is an income tax code, in the Income Tax Acts, and so IT principles apply.[90]

HMRC agree. The INT Manual provides:

> **INTM601120 Measure of income: trading companies** [Jul 2023]
> The income of a trading company which is to be taken into account for the purposes of the income charge is generally the balance of profits that would be chargeable to tax in the UK. Therefore in arriving at this amount regard should be had to the provisions in Part 2 ITTOIA 2005 [which govern trading income].
> It may be that deductions are claimed in respect of emoluments paid by a company to the individual who is subject to the income charge. If a deduction is allowable under 'normal principles' as above then, although the amount within the income charge is effectively reduced, emoluments are within the direct income tax charging rules.

Hoey v HMRC [2022] EWCA Civ 656 offers a straightforward example, if one is needed:

> The measure of the income of a trading company featured prominently in *Hoey v HMRC* ([2022] EWCA Civ 656). Mr Hoey worked in the UK as an IT contractor for UK clients under arrangements with two offshore entities that employed him. Via intermediaries, these offshore employers received trading receipts for providing Mr Hoey's services to UK clients and paid most of Mr Hoey's remuneration into offshore employee benefit trusts (EBTs).[91] The trustees of the EBTs then made regular interest-free loans - which were not expected to be repaid - to Mr Hoey.
> In this case, the question arose whether the payments made by the offshore employers into the EBTs in respect of Mr Hoey's remuneration should properly be deducted in computing the employers' trading profits. HMRC argued that the payments into the EBTs were not deductible because they could not have been made wholly and exclusively for the purposes of the employers' trades and were

[90] If authority is needed, see *Chetwode* at p.687 "In the case of a trade, it is necessary to strike a balance, in respect of a period, before any taxable "income" arises;" *Vestey v IRC* 54 TC at p.528 (Special Commissioners).
Trading income arises at the end of an accounting period; see 18.17.1 (What is trading income). Thus income for an accounting year ending (say) 30 June 2015 will be treated as arising in 2015/16.

[91] See 52.25 (Employee benefit trusts).

> ultimately tainted by an additional purpose: that of assisting Mr Hoey to avoid UK income tax.
>
> The Court of Appeal disagreed, concluding, at paragraph [198] of their judgment, that HMRC had not displaced the
>
> > strong prima facie inference that the whole amount of the payments into the EBTs in respect of Mr Hoey's services was properly deductible as expenditure wholly and exclusively incurred for the purposes of the Employers' trade.
>
> The result of this conclusion was that the quantum of the trading income of the offshore employers was nil.

Profits are computed on a current year basis[92] but that does not much matter after the abolition of the preceding year basis (which formerly applied to trading income).

For losses, RI 201 provides:

> The Revenue's practice is only to allow trading losses to be carried forward and set against future trading profits. They cannot be offset against investment income of the same, previous or future years.[93]

The INT Manual makes the same point:

> **INTM601120 Measure of income: trading companies** [Jul 2023]
>
> ...In circumstances where an offshore company's trading expenses exceed its income the result will be a loss. The transfer of assets provisions are charging provisions only and, specifically, charge income treated as being that of the individual. There is no provision for treating such a loss as that of the individual.
>
> However, it is HMRC's practice to allow an offshore company's trading losses to be carried forward and to be set off against the future profits of the company. They cannot be offset against the company's investment income of the same, previous or future years. ...

For s.731, losses will be deducted in computing relevant income if paid out of relevant income.

There is no group relief.

48.16.3 *Property income*

The rules for measuring property income of the person abroad are the

[92] *Vestey v IRC* 54 TC at p.528 (Special Commissioners).

[93] This is consistent with the position for property income losses. See 47.2.2 (Property business losses).

same as for the settlor-interested trust code; see 47.2.1 (Property business income). Transfer pricing may also need consideration here.

The INT Manual provides:

> **INTM601280 Measure of income: income from property** [Jul 2023]
> Where there is rental income, any profits should be arrived at in accordance with the rules in Part 3 ITTOIA 2005.

48.16.4 *Loan relationship and Forex income*

Since income is computed on IT principles, "income" does not include profits computed under loan relationships and Forex rules, which apply for CT and not for IT purposes. This is so even if the person abroad is a company.

HMRC agree. The INT Manual provides:

> **INTM601120 Measure of Income: trading companies** [Jul 2023]
> It should be noted that forex and loan relationship rules apply for Corporation Tax purposes only.

The same would apply for the CT intangible fixed assets code.

48.16.5 *Exchange rate profits/losses*

The INT Manual provides:

> **INTM601260 Measure of income: profit on exchange** [Jul 2023]
> If the accounts of a person abroad show a profit on exchange, this should not be treated as income of the person abroad for the purposes of the income charge. The profit usually derives from a difference between the exchange rates in force:
>
> - when the income is credited in the accounts of the person abroad, and
> - when that income is actually remitted to the person abroad, or if not remitted, at the date to which the accounts are made up.
>
> The income as it arises to the person abroad is to be deemed to be that of the individual (*Chetwode v IRC*, 51 TC 647), and we are therefore concerned only with the exchange rates in force at the time when the income is receivable by the person abroad. A profit on exchange is merely a book-keeping entry necessary to ensure that the cash position of the person abroad tallies with the income actually remitted, or which could be remitted at the date at which the accounts are made up.
> On the same basis, any loss on exchange should not reduce the income of person abroad in arriving at the income charge.

48.17 Genuine transaction defence

Section 724A ITA contains what I call the **"genuine transaction defence"**. This was introduced for EU-law compliance reasons.[94]

Section 742A(1) ITA provides:

> Subsection (2) applies for the purpose of determining the liability of an individual to tax under this Chapter by reference to a relevant transaction if—
> (a) the transaction is effected on or after 6 April 2012, and
> (b) conditions A and B are met.

If these conditions were satisfied, s.742A(2) ITA provides the relief:

> Income is to be left out of account so far as the individual satisfies an officer of revenue and customs that it is attributable to the transaction.

Section 742A(3) ITA provides:

> Condition A is that—
> (a) were, viewed objectively, the transaction to be considered to be a genuine transaction having regard to any arrangements under which it is effected and any other relevant circumstances, and
> (b) were the individual to be liable to tax under this Chapter by reference to the transaction,
>
> the individual's liability to tax would, in contravention of a relevant treaty provision, constitute an unjustified and disproportionate restriction on a freedom protected under that relevant treaty provision.

The hypotheses in 742A(3)(a)(b) add nothing:

(a) Para (a) repeats Genuine transaction condition B.
(b) If there is no liability (para (b)) then the genuine transaction defence is not needed.

So condition A amounts to the condition that:

> the individual's liability to tax [under the ToA provisions] would, in contravention of a relevant treaty provision, constitute an unjustified and disproportionate restriction on a freedom protected under that relevant treaty provision.

The relevant treaty is TFEU or the EEA agreement.[95] Post-Brexit, there

[94] Related changes were made to s.3 TCGA; see 64.1.2 (2013 changes).

[95] Section 742A(4) ITA provides: "In subsection (3) "relevant treaty provision" means—

is no freedom protected under these treaties, so condition A will never be satisfied. If that is right, though, then s.742A ought obviously to be repealed as it can never have effect. The provision is discussed in the 2023/24 edition of this work para 48.18 but I omit that here as it is of historical interest only.

48.18 Spouse of transferor

Section 714(4) ITA provides:

> In this Chapter [Chapter 2 Part 13, ToA provisions] references to individuals include their spouses or civil partners.

There are many references to individuals in the ToA provisions.

Definitions take effect subject to context. This extended definition cannot be intended to apply where statute provides that income is treated as accruing to an individual, whether to the transferor under s.721 or to a beneficiary under s.732: income should not be treated as accruing to the individual *and* the spouse.

The main purpose of the extended definition is no doubt to ensure that if the spouse has power to enjoy, then the transferor is regarded as having power to enjoy and so can fall within s.720.[96] But in other places where the word individual is used, the extended definition should similarly apply, unless the context otherwise requires. For instance, the transferor's spouse may qualify for the taxable-transferor defence to s.731.[97]

See too 93.16 (Gift to spouse: s.720).

48.19 ToA information notices

Section 748 ITA provides:

> (1) An officer of Revenue and Customs may by notice require any person to provide the officer with such particulars as the officer may reasonably require for the purposes of this Chapter.
> (2) The officer may direct the time within which the particulars must be provided and that time must be at least 30 days.
> (3) The particulars which a person must provide under this section, if

(a) Title II or IV of Part Three of the TFEU,
(b) Part II or III of the EEA agreement, or
(c) the provision of any subsequent treaty replacing a provision mentioned in paragraph (a) or (b)."

[96] See 49.18.3 (Spouse has power to enjoy).

[97] See 50.15.7 (Spouse of taxable-transferor).

> required to do so by a notice under subsection (1), include particulars about—
>
> (a) transactions with respect to which the person is or was acting on behalf of others,
>
> (b) transactions which in the opinion of the officer should properly be investigated for the purposes of this Chapter even though in the person's opinion no liability to income tax arises under this Chapter, and
>
> (c) whether the person has taken or is taking any part and, if so, what part in transactions of a description specified in the notice.
>
> (4) A relevant lawyer is not treated as having taken part in a transaction for the purposes of subsection (3)(c) merely because of giving professional advice to a client about it.
>
> (4A) In this section "relevant lawyer" means a barrister, advocate, solicitor or other legal representative communications with whom may be the subject of a claim to professional privilege or, in Scotland, protected from disclosure in legal proceedings on grounds of confidentiality of communication.
>
> (5) [This flags the exceptions for lawyers and banks, see below]

This provision dates back to 1936 and exists for historical reasons. HMRC now have the general power to obtain information under sch 36 FA 2008 and that is the starting point for HMRC investigations. Section 748 is rarely used, but a s.748 notice was issued in *Hitchins v HMRC* because the officer of HMRC:

> had become frustrated with the Schedule 36 process: the fact that the taxpayer had rights of appeal, and that he had had to withdraw notices that he had previously given. In contrast, notices given under s748 cannot be appealed.[98]

It is unsatisfactory (the reader may use a stronger word) that the checks and balances of the sch 36 notice procedure can be bypassed in this way. The s.748 notice procedure ought to be repealed.

48.19.1 *Lawyers*

For completeness: s.749 ITA provides:

> (1) In relation to anything done by a relevant lawyer on behalf of a client who does not consent to the information otherwise required from the relevant lawyer

[98] [2023] UKFTT 00127 (TC) at 15. The taxpayer still has the remedy of judicial review.

> under section 748 being provided, the relevant lawyer may not be compelled under that section to do more than—
>
> (a) state that the relevant lawyer is or was acting on behalf of a client, and
>
> (b) give the name and address of the client and any relevant person.
>
> (2) In the case of anything done by the relevant lawyer in connection with the transfer of any asset by or to an individual who is UK resident to or by a closely-held company whose business does not consist wholly or mainly of the carrying on of a trade or trades, the transferor and the transferee are relevant persons.
>
> (3) In the case of anything done by the relevant lawyer in connection with any associated operation in relation to any such transfer, the persons concerned in the associated operations are relevant persons.
>
> (4) In the case of anything done by the relevant lawyer in connection with the formation or management of a closely-held company whose business does not consist wholly or mainly of the carrying on of a trade or trades, the body corporate is a relevant person.
>
> (5) In the case of anything done by the relevant lawyer in connection with—
>
> (a) the creation of any settlement as a result of which income becomes payable to a person abroad, or
>
> (b) the execution of the trusts of any such settlement,
>
> the settlor and that person are relevant persons.
>
> (7) In this section—
>
> "relevant lawyer" means a barrister, advocate, solicitor or other legal representative communications with whom may be the subject of a claim to professional privilege or, in Scotland, protected from disclosure in legal proceedings on grounds of confidentiality of communication;
>
> "settlement" and "settlor" have the meanings given by section 620 of ITTOIA 2005.
>
> (8) In the application of this section to Scotland, any reference to the trusts of a settlement is a reference to the purposes of the settlement.

48.19.2 *Banks*

For completeness: s.750 ITA provides:

> (1) Section 748 does not oblige a bank to provide any particulars of any ordinary banking transactions between the bank and a customer carried out in the ordinary course of banking business, unless subsection (2) or (3) applies.
>
> (2) This subsection applies if the bank has acted or is acting on behalf of the customer in connection with—
>
> (a) the creation of any settlement as a result of which income becomes payable to a person abroad, or
>
> (b) the execution of the trusts of any such settlement.
>
> (3) This subsection applies if the bank has acted or is acting on behalf of the customer in connection with the formation or management of a closely-held company whose business does not consist wholly or mainly of the carrying on of a trade or trades.
>
> (4) In this section—

“bank” has the meaning given by section 991, and

“settlement” has the meaning given by section 620 of ITTOIA 2005.

(5) In the application of this section to Scotland, any reference to the trusts of a settlement is a reference to the purposes of the settlement.

CHAPTER FORTY NINE

TRANSFER OF ASSETS ABROAD: TRANSFERORS

49.1 Transferor charge: Introduction
49.2 Purpose of transferor charge
49.3 Charge on transferor
49.4 Who is the transferor
49.5 Transferor: Procurement test
49.6 Shareholder transferors
49.6.1 Pre-2024 income
49.6.2 Shareholder transferor: Post-2024 income
49.6.3 "Closely-held company"
49.6.4 Charge on participator
49.6.5 Qualifying interest
49.6.6 Involvement condition
49.6.7 Avoidance condition
49.6.8 "Relevant participator"
49.6.9 Involvement/avoidance condition TAARs
49.6.10 Rule applies to post-2024 income
49.7 Quasi-transferor: Other cases
49.7.1 Transferor: Reality test?
49.8 X pays Y to make transfer
49.9 Quasi-transferor when individual is direct transferor
49.9.1 Direct/quasi-transferor individuals
49.10 Trustees/fiduciaries: Transferors
49.11 Co-owner transferors
49.11.1 Tenancy in common
49.11.2 Joint tenancy
49.11.3 Gift to T + transfer by T
49.12 Transferor/settlor compared
49.13 Must transferor (intend to) avoid IT

49.14 Condition A: Power to enjoy
49.15 "Power to enjoy"
49.15.1 Substance
49.15.2 Time of enjoyment
49.16 Enjoyment conditions A-D
49.16.1 Condition A: Income benefits T
49.16.2 Condition B: Asset value increases
49.16.3 Condition C: T receives benefit
49.16.4 Condition D: Possible benefit
49.17 Enjoyment condition E: Control
49.17.1 Control over trust income
49.17.2 Control over company income
49.17.3 Non-fiduciary power
49.17.4 Limited role of condition E
49.17.5 Must control confer benefit
49.18 Power to enjoy: Topics
49.18.1 Power to enjoy: Loans
49.18.2 Minority shareholding
49.18.3 Spouse has power to enjoy
49.19 Power to enjoy: Causation
49.20 s.721 income chargeable to IT
49.21 s.721 Cond. C: Transferor UK resident
49.21.1 Income arises when transferor non-resident
49.21.2 Income arises in split year
49.21.3 Transferor non-resident when transfer made
49.22 Amount of s.720 charge
49.22.1 Power to enjoy part of income
49.22.2 Person abroad has other source of income

49.22.3 Quantum: Enjoyment cond. C
49.22.4 Transferor deductions/reliefs
49.23 Transferor receives capital sum
49.23.1 Nature of s.727 income
49.23.2 s.727/settlor-interested trust overlap
49.23.3 s.720/s.727 overlap
49.24 Capital receipt conditions
49.24.1 Receipt by third party
49.24.2 "Capital sum"
49.24.3 Connected with transfer
49.24.4 Loan to transferor
49.24.5 Loan to person abroad
49.25 Time extent of s.727 charge
49.25.1 Historic income
49.25.2 Present and future income
49.26 s.720 remittance basis
49.26.1 The relief
49.26.2 When is s.726 needed?
49.26.3 Remittance in split year
49.26.4 Payment of s.720 income to transferor when non-resident
49.26.5 Pre-2008 s.720 income
49.26.6 s.720 income 2005-08
49.27 s.720/s.624 interaction
49.28 No indemnity for transferor
49.29 Tax return: s.720 income
49.30 DT relief: s.720 income
49.30.1 Foreign tax credit relief
49.30.2 Person abroad treaty non-resident
49.30.3 Transferor treaty non-resident

Cross references

The following topics are considered elsewhere:
43.12 (s.720: Transferor tax rate)
47.13 (s.624/s.720 compared)
92.15 (s.720: Protected-trust relief)

49.1 Transferor charge: Introduction

This chapter considers two IT charges on transferors:

ITA	**Applies if:**	**My term**
s.720	Transferor has power to enjoy income of person abroad	s.720 charge
s.727	Transferor receives/entitled to receive capital sum	s.727 charge

I refer to them together as the transferor charge, though one might refer to "charges" (in the plural), or to "s.720/727 transferor charges". The INT Manual uses the term "income charge"[1] but I think my terminology is clearer.

I also coin a term for the income charged under these sections:

[1] The INTM provides:
"INTM600540 The income charge: Introduction [Jan 2023]
There are two separate transfer of assets income charges, and for the purpose of this guide we will describe them as:
- income charge - power to enjoy, and
- income charge - receipt of/entitlement to capital sums
or, collectively, as 'the income charge' as both broadly lead to the same result."

Charge	**Income**
s.720 charge	s.720 income
s.727 charge	s.727 income

49.2 Purpose of transferor charge

Section 720(1)/727(1) ITA are identical:

> The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.

In *Chetwode v HMRC*, Lord Wilberforce said:[2]

> The purpose of [s.720] is to prevent tax being avoided through the transfer of assets abroad, so that income is received by a person resident or domiciled abroad, and to charge the transferor with tax as if the income has been received by him in the United Kingdom.

Lord Dilhorne said:

> I do not myself find [s.720(1)] of any assistance in arriving at the answer to the question in dispute. It states the purpose of the section. That is readily discernible from the subsections it contains.

It is true that one hardly needs s.720(1) to work out the purpose of the provision. But the approach of Lord Wilberforce, which suggests that the purpose of s.720 is to put the transferor in the position as if no transfer had been made, often offers a helpful way to approach s.720 issues.

49.3 Charge on transferor

Section 720 ITA provides:

> (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.
> (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions)...

So far we have a charge, and (unusually) a reason is given for it. Who is liable? We read on to s.720(5):

> The person liable for any tax charged under this section is the individual

[2] (Lord Wilberforce, with whom 3 other judges agreed).

> to whom the income is treated as arising.

Thus s.720 does not tell us directly who is liable. We need to read on to s.721(1). But we find a further referential provision:

> Income is treated as arising to such an individual as is mentioned in section 720(1) or 720A(1) ...

The charge is imposed on "such an individual as is mentioned in s.720(1) or 720A(1)"[3]. So we turn back to s.720(1) to see who is the individual there mentioned.

The wise words of Garner are worth quoting here:

> *Such* is a deictic (pointing) term that must refer to a clear antecedent.[4]

Failure to observe this point – obvious though it may seem – has given rise to a good deal of litigation.

There are broadly two possible views of what is required to be "such an individual" as is mentioned in s.720(1):

(1) Individuals who are UK resident, and no more: ("the widest *(Congreve)* view"), or
(2) Individuals who:
    (a) are UK resident; and in addition:
    (b) avoid liability to IT "by means of relevant transfers"
    ("the limited view")

The intention of the ITA rewrite was to rewrite the law, and so far as the law was unclear, to retain its ambiguity. It is because the rewrite had such limited remit that it achieved so little. Or perhaps if its remit had been wider, its work could not have been achieved at all?

However that may be, EN ITA provides:

> 2144. Sections 739(2) and (3) of ICTA indicate the person liable by using the expression "such an individual" – but do not make it clear how

[3] For s.720A, see 49.6.4 (Charge on participator).

[4] Garner, *Dictionary of Legal Usage* (3rd ed., 2011), entry under *Such*.
Pinter exploits the ambiguity in *No Man's Land*:
"... there are some people who appear to be strong, whose idea of what strength consists of is persuasive, but who inhabit the idea and not the fact. What they possess is not strength but expertise. They have nurtured and maintain what is in fact a calculated posture. Half the time it works. It takes a man of intelligence and perception to stick a needle through that posture and discern the essential flabbiness of the stance. I am *such a man*."

> much of section 739(1) is implied by that expression. [Sections 721] and 728 ITA, which are based on section 739(2) and (3) ICTA, reproduce the expression "such an individual", which has been the subject of case law: see, in particular, *Vestey v IRC* 54 TC 503.

After some vacillation, the question of what is meant by the expression "such an individual" has this answer: the widest (*Congreve*) view is not correct. In *Vestey v IRC*:[5]

> There are undoubtedly two possible interpretations of [s.720], particularly having regard to the preamble [s.720(1)].
> The first is to regard it as having a limited effect: to be directed against persons
> [1] who transfer assets abroad;
> [2] who by means of such transfers avoid tax,
> [3] and who yet manage when resident in the UK to obtain or to be in a position to obtain benefits from those assets [ie have power to enjoy].
> For myself I regard this as being the natural meaning of the section...
> The second is to give the whole section an extended meaning, so as to embrace all persons, born or unborn, who in any way may benefit from assets transferred abroad by others [ie have power to enjoy]. ... This I regard as a possible but less natural meaning of the section.
> ... the better interpretation of the section is ... one limiting its operation and charging effect to the transferors of assets.

There are two distinct points here.

(1) The court rejected the widest (*Congreve*) view.
(2) The court understood the words in s.720(1), which under the limited view are incorporated by s.720(5)/s.721(1), require the individual to be charged to be "the transferor of assets", in short, the transferor.

I thought that point (1) was settled law. But in *HMRC v Fisher*[6] HMRC re-argued the point. *Vestey* was a case on the ITA 1952 and the law had since been consolidated by ICTA 1988, and so, HMRC argued, *Vestey* had no application to the current law. That is the boldest submission in a tax

[5] 54 TC 503 at p.583- 584. This passage is from the speech of Lord Wilberforce with which 2 others agreed.
HMRC v Rialas [2020] UKUT 367 (TCC) at [30] - [49] considered that other speeches in *Vestey* offered a different reason for their decision; but they accepted that the passage cited here should be taken as the reasoning binding on them.

[6] [2023] UKSC 44.

dispute since the eccentric Mr Trull contended he was exempt from tax by virtue of letters patent issued by Henry VII in 1508.[7] Unsurprisingly, the SC did not agree to discard a century and half of case law.[8]

Next, HMRC contended the position was changed in 1981 by (what is now) s.744 ITTOIA; but this too did not succeed:

> ... section [721/727 ITA] construed as part of the overall TOAA code is limited to charging individuals who are ordinarily resident in the United Kingdom and who transfer the assets which generate the income which is then deemed to be their income under section [720] or which generates the capital triggering the charge under section [727].
>
> It is true that their Lordships in Vestey regarded the absence of an apportionment mechanism as a strong pointer in favour of such an interpretation. But Lord Wilberforce's primary reason for deciding that Congreve was wrong was that he regarded the narrower interpretation as the natural meaning of the words...
>
> I respectfully agree with Lord Wilberforce that the most natural meaning of the words is the meaning he gave to the earlier provision in Vestey. The reference in section [720(2)] to "such an individual", being the individual who has power to enjoy the income of the overseas person, requires one to consider what characteristics of the individuals referred to in section [720(1]) are thereby brought into subsection (2). There is no reason to pick out one of those characteristics (the fact that the individual is ordinarily resident in the UK) and ignore the others (that they are trying to avoid liability to income tax by means of transfers of assets).
>
> The presence of section [743 ITA] does not mitigate the features of the charge that led to it being described as penal and harsh. It is still the case, following Lord Howard de Walden, that a single individual caught by section [720] can be charged tax on the whole of the income of the overseas transferee if they have power to enjoy that income, even if they have received little or no actual income from which to defray that tax. The Court of Appeal in *Lord Howard de Walden* posited a case where the assets were transferred to an existing overseas corporation with very large assets and income of its own. The income attributable to the assets transferred might be a very small proportion of the overseas company's total income. Lord Greene MR recognised that the effect of the provision was that it would be the total income that was deemed to be the income of the individual and subject to tax. This is why he described

[7] See 122.4 (Properly-arguable standard).

[8] at [30].

> the provision as "the severest of penalties" imposed on those who were minded to throw the burden of taxation off their own shoulders on to those of their fellow citizens. That burden is certainly thrown by the transferor of the assets but that is not an apt description of someone who was not the transferor.

There was an opportunity to restate the law with greater clarity in the 2024 reforms, but it was missed. The reader may think that a pity, but there it is.

49.4 Who is the transferor

What is required to be a transferor? Or in other words: what is the required link between the individual and the transfer? Before considering the case law I make some general observations.

A person cannot be a transferor in the abstract. A person is a transferor in relation to some particular transfer. But where the context is clear it is permissible to refer to a transferor in isolation, leaving the transfer concerned to be understood.

If an arrangement involves several transfers, it is necessary to consider them separately.

It is difficult to imagine a transfer of assets without a transferor. But a company may be the transferor, so the transferor need not be an individual. If there is no individual who is a transferor, the s.720 charge does not apply. An individual who is not a transferor (such as the successful appellants in *Pratt* and in *Fisher*) may instead fall within s.731, if they receive benefits.

There is next to no guidance in the statute. That refers to individuals who achieve a certain result "by means of relevant transfers". The matter is left for the Courts to sort out.

The rule that s.720 requires a transferor is a judicial gloss, because the statute does not use the word "transferor".[9] So the word, or concept, of transferor should not be (or at least, need not be) interpreted rigidly.[10]

49.5 Transferor: Procurement test

In *Congreve v IRC* the question of who is a transferor did not arise, because the court adopted the widest view, that s.720 applied to non-

[9] This is self-evident, but if authority is needed, see *HMRC v Fisher* [2021] EWCA Civ 1438 at [65]: "the limitation of liability to "transferors" might ... be termed a "gloss"."

[10] See 87.5.2 (A judicial gloss).

transferors (this point was reversed in *Vestey*). But the court commented:[11]

> But even if we were prepared to accede to the argument that the preamble [now s.720(1) ITA] connoted activity by the individual concerned, we think this condition would be fulfilled if the execution of the transfer were procured by the individual concerned, even though it was not actually executed by him or his agent.

Pratt adopted the procurement test.[12]

The term used in *Pratt* for someone who procures a transfer is "quasi-transferor". In general I use the term "transferor" to mean anyone to whom s.720 applies, that is, both those who make a transfer and those who procure it. But sometimes it is helpful to distinguish between:

(1) the **"direct transferor"** (who *makes* a transfer of assets) and

(2) a **"quasi-transferor"** (who *procures* a transfer made by a direct transferor)

When there is a quasi-transferor, there must necessarily also be a direct transferor.

Another way to put it would be to say that:

(1) The transfer made by the direct transferor is *attributed* to another person (the quasi-transferor)

(2) A person is regarded as a transferor if they make a transfer directly or indirectly

The second is the best formulation. It is consistent with the concept of a settlor, who is a person who directly or indirectly provides property. It seems to me to be rather a forced or unnatural understanding of the word transferor to make it include a quasi-transferor. But the use of the term "quasi-transferor", first coined in *Pratt*, seems well established.

While it is, I think, settled law that a person who procures a transfer is a quasi-transferor, and so within s.720, the question is then what is meant by "procure"? This is entirely judge-made law; there is nothing to help in the statute.

49.6 Shareholder transferors

Where a company makes a transfer, the question arises whether a

[11] 30 TC 163 at p.197. The House of Lords agreed: see at p.204.

[12] See quote in 49.7.1 (Transferor: Reality test?).

shareholder ("T") is a quasi-transfer, if:

(1) T owns all the shares in a company (a 100% shareholder)
(2) T has control of a company (a controlling shareholder)
(3) T does not have control (a minority shareholder)

49.6.1 *Pre-2024 income*

In *Fisher*, there were four minority shareholders: no shareholder had control. But *Fisher* also considered the position of a controlling shareholder:[13]

> I would reject the idea that even a "controlling" shareholder in the company is to be treated as procuring the transfer of assets by the company.

The reasons do not matter for ToA purposes, particularly since we now have a statutory rule overriding *Fisher*, but they are relevant for more general questions such as who is the settlor. They are are as follows:

Reason 1: No apportionment provision:

It is not clear how one would apportion the income of the person abroad to the controlling shareholder (or other shareholders, if caught):

> The points that their Lordships made in *Vestey* about the absence of an apportionment mechanism apply here too. Lord Wilberforce (p 1173G) contrasted the absence of such a mechanism with other areas of the tax code where Parliament had expressly conferred the power to apportion and laid down the principles according to which apportionment is to be made...
> HMRC say again that the existence now of section [743 ITA, double counting relief] allowing apportionment can overcome the problem of multiple transferors and hence in large part overcomes the problem of each shareholder of the company being treated as a quasi-transferor. ...
> I do not agree that section [743 ITA] is the answer for the same reasons as I do not regard it as undermining the construction of these provisions supported by *Vestey.*[14]

Reason 2: No definition of "control"

If we have a rule for controlling shareholders, we need to know what is

[13] at [77].

[14] See 49.3 (Charge on transferor). But this does not explain why the reason applies in this context.

meant by control, but we statute does not explain this.

> ... there are many places in the tax code where Parliament has carefully defined the circumstances where an individual is treated as controlling a company. [SC gives examples and continues:] Those sections also contain many subsections and draw in words and phrases which are in turn given complex definitions in other sections.

Reason 3: Difficult to divide active/knowledgeable shareholders from passive ones

A rule which distinguishes active/knowledgeable shareholders from passive ones is a difficult line to draw, and statute does not provide explain what test to apply:

> it was not clear ... exactly what it was that Stephen and Peter had done which amounted to "procuring" the transaction. It appeared to entail no more than that they each supported the making of the transfer qua minority shareholder, whether by formal vote or otherwise. ... Minority shareholders have no power themselves to procure any outcome, having to abide by the majority decision. Most (if not all) decisions of companies will, by definition, be taken by or with the underlying support of shareholders who, collectively, hold a controlling interest in the relevant company. If being part of a group of minority shareholders who vote in favour of a transaction is sufficient to render them all quasi-transferors, that must apply to thousands of shareholders in a PLC. ... [Counsel for HMRC] struggled to express what was needed in order for a shareholder to become a transferor.

Shareholders may be partly or wholly disengaged from the process.

Reason 4: Motive defence difficulties

> One might have thought that the existence of the motive defence in section [s.737 ITA] would serve to distinguish between active, knowledgeable shareholders who should be treated as quasi-transferors procuring the company to transfer its assets and passive shareholders who do not know anything about the transfer or do not agree with it. The latter would not have a tax avoidance purpose. That is not the case since it was accepted by both parties that the motive defence ... focuses on the purpose for which the *transfer* was effected not the purpose of each individual whom HMRC seek to charge to tax. If a minority shareholder is treated as a quasi-transferor then he or she can be taxed even if they did not have any tax avoidance purpose, provided that the transfer was

> carried out with a tax avoidance purpose by the other transferors.[15] ... this point [throws] "another spanner into the works" of the operation of the provisions if there were multiple transferors ...
> ...On HMRC's case, the motive defence is the sole escape route for a minority shareholder from a potential substantial tax charge but that escape route is not available for such a person even if they did not themselves have a tax avoidance purpose at all and regarded the transfer as an entirely bona fide commercial transaction.

The SC concludes:[16]

> What is ... clear (!) is that the shareholders of a company, even if they are also the directors, are not quasi-transferors and do not procure the transfers made by the company.

Fisher did not have to consider the position of a 100% shareholder. Reasons 1, 3 and 4 do not apply here, and reason 3 does not seem so convincing. But the SC said that even a 100% shareholder is not a transferor:[17]

> Any attempt to draw a bright line by saying, for example, that someone who owns 100% of the shares, or 51% of the shares is caught does not avoid the problem. If the owner of 100% of the shares is itself a corporate body, is the owner of that parent, or of the parent of that parent caught?

In favour of the SC's view one might add that:
(1) It would be anomalous if a 100% shareholder was a transferor and a 99.9% shareholder was not.
(2) Since the problem is being left for Parliament to deal with, it makes sense not to try to deal with a 100% shareholder by case law.

While these are not an overwhelming set of reasons, the law is clear: that a 100% shareholder is not a transferor in relation to a transfer made by the company (for pre-2024 income).

Avoidance schemes based on the rule would not work.[18] But in any case, the rule is changed from 2024.

[15] See 3.7.2 (Multiple minds: ToA transfer),
[16] at [86].
[17] at [78].
[18] See 48.13.1 (A to B + B to C: clean-break test).

49.6.2 *Shareholder transferor: Post-2024 income*

As was to be expected, the law was changed in 2024. The law is set out twice, s.720A ITA governs s.720; and 727A ITA governs s.727. These are in the same terms so it is sufficient to consider s.720A.

49.6.3 *"Closely-held company"*

The post-2024 law applies to closely-held companies. This term is defined in s.719A ITA:

> In this Chapter [chapter 2 Part 13] –
> "closely-held company" means-
> (a) a close company for the purposes of the Corporation Tax Acts (see Part 10 of CTA 2010), or
> (b) a company that would be a close company if section 442(a) of CTA 2010 were ignored (non-UK resident company not to be treated as close);

Thus "closely-held company" means a UK resident or a non-resident close company. This is clumsy, non-standard drafting,[19] but it works.

49.6.4 *Charge on participator*

Section 720A(1) ITA provides:

> The charge under section 720 also applies for the purpose of preventing the avoiding of a liability to taxation by means of a relevant transfer carried out by a closely-held company in which an individual has a qualifying interest.

This adopts the style and wording of s.720(1). Effectively, the participator is treated as a transferor and so within the s.720 charge.[20] In practice the participators will normally be shareholders.

Section 720A(2) ITA imposes two conditions:

> But the charge only applies in those circumstances if-
> (a) the individual is involved in the company, and
> (b) the avoidance condition is met.

I refer to the condition in (2)(a) as "the involvement condition".

[19] See 104.29.1 (Non-resident close company).

[20] See 49.3 (Charge on transferor).

49.6.5 *Qualifying interest*

Section 720A(3) ITA provides a very wide definition:

> An individual has a qualifying interest in a closely-held company if the individual, or a nominee of the individual, is a participator in-
> (a) the closely-held company, or
> (b) the first closely-held company in a chain of two or more closely-held companies where each company in the chain is a participator in the next company in the chain, of which one such company is the closely-held company that carried out the relevant transfer.

49.6.6 *Involvement condition*

Section 720A(4) ITA provides

> For the purposes of this section, an individual with a qualifying interest in a company is to be treated as being involved in the company unless the individual satisfies an officer[21] of Revenue and Customs that
> [i] neither the individual
> [ii] nor (in a case where the individual is not the relevant participator) the relevant participator
> has any direct or indirect involvement in the decision making of the company.

49.6.7 *Avoidance condition*

Section 720A(5) ITA provides:

> The avoidance condition is met if-
> (a) the relevant participator did not object to the making of the relevant transfer, and
> (b) it is reasonable to draw the conclusion, from all the circumstances of the case, that the relevant participator was aware, or ought reasonably to have been aware-
> (i) of the transfer, and
> (ii) that one of the direct or indirect consequences of the transfer is the avoidance of a liability to taxation[22].

Where this condition is not met, it is still possible to argue that *the*

[21] See 52.34.1 ("Satisfies an officer").

[22] Section 720A(9) provides:
"In this section... "taxation" has the meaning it has in section 737."
See 52.9.2 (Taxation in New Conditions A/B).

transfer qualifies for the motive defence.

49.6.8 *"Relevant participator"*

Section 720A(6) ITA provides:

> For the purposes of subsections (4) and (5) the "relevant participator" means-
>
> (a) in a case where the individual's qualifying interest arises as a result of a nominee of the individual being a participator[23] in a company, the nominee, or
>
> (b) otherwise, the individual.

Section 719A ITA gives "nominee" a wide definition:

> In this Chapter [Chapter 2 Part 13] ...
>
> "nominee", in relation to an individual, means a person-
>
> (a) who possesses any rights or powers on behalf of the individual, or
>
> (b) who may be required to exercise any rights or powers on the individual's direction or behalf

The drafting is based on the close-company rules.[24]

49.6.9 *Involvement/avoidance condition TAARs*

Section 720A ITA provides two further TAARs. They may conveniently be read side by side:

s.720(7): involvement condition TAAR	**s.720A(8): avoidance condition TAAR**
Any arrangements to secure that a person has no direct or indirect involvement in the decision making of a company are to be disregarded if the main purpose, or one of the main purposes, of the arrangements is to secure that the condition in subsection (2)(a) [the involvement condition] is not met.	Any arrangements that would result in the avoidance condition not being met are to be disregarded if the main purpose, or one of the main purposes, of the arrangements is to secure that the avoidance condition is not met.

[23] Section 719A incorporates the standard definition: "In this Chapter ... "participator" is to be construed in accordance with section 454 of CTA 2010"; see 104.22 (Definitions of participator).

[24] See 104.5.1 (Nominee-attribution rule).

In my terminology these are arrangement-disregard TAARs.[25]

Section 720A(8), taken literally, is too wide, but it remains to be seen how it is applied.

49.6.10 *Rule applies to post-2024 income*

Section 22(10) F(no2)A 2024 provides:

> The amendments made by this section [which introduced s.720A] have effect in relation to income arising on or after 6 April 2024.

The new rules apply to pre-2024 transfers but only in relation to post-2024 income. It will be necessary to apply the involvement and the avoidance test to arrangements which took place in the distant past.

49.7 Quasi-transferor: Other cases

In *Vestey v IRC*, the question of who is a transferor did not arise, because the taxpayers (beneficiaries of a discretionary trust)had not been involved in any way with the transfers. They were clearly not quasi-transferors.

The House of Lords discussed the question in passing, and the answer was expressed in a variety of different ways. Lord Wilberforce said s.720 applies:

> only where the person sought to be charged
> [1] made [the transfer]
> [2] or, may be, was associated with, the transfer.[26]

The context shows that the meaning at [2] is that Lord Wilberforce was floating a possible view that a person could be charged if they were associated with the transferor, but did not commit himself to that view: "may be" means "possibly".[27] Nor did he elaborate on what is meant by "associated".

Lord Wilberforce was not saying:

(1) that there *would* be a s.720 charge if the taxpayer was associated with the transfer. He expressed a doubt on the point.

[25] See 3.2 (Types of TAAR). Section 720A(8) ITA provides the standard (unnecessary) IT definition of arrangement; see App 2.2.3 (Definitions of "arrangement").

[26] 54 TC 503 at p.587A. Lord Salmon agreed. Lord Keith said he agreed with Lord Wilberforce but in his speech he actually put the matter differently.

[27] The STC and All ER versions of the report change this (slightly literary) use of the words "may be" into the more usual form "maybe".

(2) that there would be a s.720 charge if the taxpayer may be associated (= was possibly associated) with the transfer.

In *Fisher:*

> As to what Lord Wilberforce meant when he referred to an individual being "associated with" the transfer as contrasted with someone "who had no hand in" the transfer, that must, in my judgment, be left to be explored in another case. A set of facts may arise in future where HMRC can properly argue that someone who is not the owner or the legal transferor of the assets has nonetheless procured the transfer or used an agent to transfer the assets. I agree with Walton J's approach in Pratt to the wiggle room apparently left by their Lordships in the speeches in Vestey. Those words, Walton J said, are not to be treated as if they were in a statute.

49.7.1 *Transferor: Reality test?*

Perhaps inevitably, we have references to a "real" transferor. This goes back to *Pratt v IRC*:[28]

> notwithstanding that the transfer was a transfer made by [the company] itself, was the reality of the matter that somebody else was the real transferor?

But references to reality do not help much, if at all.[29] Reality needs to be identified. *Pratt* continues:

> To answer that question, nobody has so far produced a better suggestion than that of 'procurement'. It may not be completely apt, but it is far nearer an apt definition than anything else which has so far been suggested.

Pratt was *not* proposing a reality test of who is a transferor. Reality was a stepping stone towards the test actually adopted in *Pratt* which was a procurement test. This was a mistake taken by the UT in *Fisher* which actually favoured a reality test:[30]

[28] [1982] STC 756 at p.792.

[29] See App.7.1 (What do we mean by "Real"?); App 7.9.2 (Cardinal principle reaffirmed).

[30] *Fisher v HMRC* [2020] UKUT 62 (TCC) at [72], [78]. This view of the UT decision in *Fisher* is supported by *HMRC v Rialas* [2020] UKUT 367 (TCC) at [42]: "the Upper Tribunal [in *Fisher*] held that the relevant question in such a case was 'who was the real transferor?'."

> ... a director who is not a shareholder cannot be treated as being, in substance, the 'real' Transferor of the company's assets, and a director who is a shareholder but who does not have a controlling interest cannot be treated as the 'real' Transferor instead of the company, merely because he or she participated in the decision of the Board to agree to the sale, voted in favour, or took steps on behalf of the company to implement it...
>
> None of the Fishers, individually or collectively, did anything which would justify treating each of them as being the 'real' Transferor of SJA's assets.
>
> ... The transfer in this case was made by [the company] and not by any of its individual shareholders or directors; there is no basis for treating any of them as the 'real' Transferor and [the company] as merely an instrument by which they effected the transfer of the assets.

The scare quotation marks (which are in the original judgment) indicate that the UT felt some unease with the word real; CoA did not adopt a reality test and nor did the SC. I think the less said about reality the better.

49.8 X pays Y to make transfer

One arrangement may involve two transfers, eg:

Case 1

(1) X transfers asset 1 to Y (transfer 1), in consideration for which:

(2) Y transfers asset 2 to a person abroad (transfer 2)

Case 2

(1) X transfers assets to a company (transfer 1), in consideration for which:

(2) The company issues shares to a person abroad (transfer 2)[31]

In case 1, X is a direct transferor in relation to transfer 1. In relation to transfer 2, Y is the direct transferor, and X is a quasi-transferor.

In case 2, X is again a direct transferor in relation to transfer 1. In relation to transfer 2, X is a quasi-transferor and the company is a direct transferor.

Case 3:

(1) X (an employee entitled to a bonus) waives the right to the bonus, in consideration for which:

[31] The issue of shares is a "transfer" of assets as defined.

(2) The employer transfers assets to a pension scheme abroad.

In this case X has not directly made a transfer (waiver is not a transfer) but X has procured the transfer made by the employer, so X is a quasi-transferor. The employer is the direct transferor.

In each of cases 1-3:

(1) X is within the scope of s.720.
(2) So are Y (in case 1) and the employer (in case 3) if they are individuals.
(3) The two steps are also associated operations. It is not necessary to rely on the associated operations rules to assess X, though that would be another route to the same destination.

49.9 Quasi-transferor when individual is direct transferor

In *Carvill v IRC*:

(1) T transferred a majority shareholding to a person abroad, and
(2) Minority shareholders transferred their shares.

The minority shareholders were direct transferors (but perhaps outside s.720 as they had no power to enjoy). HMRC argued that T was a quasi-transferor because he had procured that transfer. But this was rejected:

> For an individual to be the transferor in relation to a transfer by another individual would be a considerable extension of this principle. However, there might be cases where, as a matter of fact, one individual's influence over another was so strong that he was the transferor of the other's share but this would clearly be an exceptional case. ...
> 72. [HMRC] contends that the taxpayer was the transferor of the old minority shares. In order to find that this was an exceptional case where the taxpayer did in effect force his will on the other shareholders so as to become the transferor of their shares, one would need strong evidence that this was so. Of course, the taxpayer as majority shareholder and one of the founders of a company bearing his name was in a position of some influence. However, the influence did not go as far as telling other shareholders what to do with their shares. Here the decision by the old minority to transfer their shares was one which they came to after discussion, having started with different points of view as to the merits of the transfer. There is no evidence that the taxpayer leaned on any of them heavily, for example, by threatening to sack them if they did not.

> ... there is no evidence that the taxpayer did anything in relation to the old minority shares which would make him the transferor of them, and I find that he was not the transferor of the old minority shares.[32]

In *Rialas v HMRC*[33] the taxpayer ("R") provided an opportunity to the person abroad. The facts were:

(1) R contributed £10 to constitute an offshore trust.
(2) The trust acquired an underlying company (F).
(3) An unconnected individual ("the vendor") sold 50% of Argo Capital Management ("Argo") for $15m to F ("the share transfer").
(4) F borrowed the purchase price.[34]
(5) Argo paid dividends (used to repay the loan in part).
(6) 18 months later, F sold its Argo shares for $25m.

The vendor was the direct transferor of the share transfer. HMRC argued that R was a quasi-transferor, ie, that he procured the transfer of the Argo shares to F, because:

(1) R established the trust/corporate structure to acquire the Argo shares, by providing funds (£10) for the creation of the Trust and its acquisition of its underlying company.
(2) R recommended that the trust acquired the Argo shares.
(3) R approached the lender to lend the necessary funds for the share purchase, agreed the terms of the loan, and introduced the lender to F.
(4) R guaranteed an income stream to F in the form of dividends, where possible.[35]

The FTT rejected HMRC's argument:[36]

> ... Mr Rialas orchestrated the purchase side of the transaction... his was the controlling mind. It is however stretching the meaning of the word "procure" beyond breaking point to suggest that the fact that he organised the purchasing structure means that he dictated to whom [the vendor] should sell his shares.

[32] *Carvill v IRC* [2000] STC (SCD) 143 at [71]-[72].

[33] [2020] UKUT 367 (TCC). The case is not yet final.

[34] It seems incautious, to say the least, for a lender to lend 100% of the purchase price. But in this case the decision turned out to be justified, as the lender was repaid and perhaps the interest rate reflected the risk.

[35] If this guarantee had been a legal obligation it would have been a transfer of assets; it must have been an informal arrangement.

[36] [2019] UKFTT 520 (TC) at [65], upheld on appeal [2020] UKUT 367 (TCC).

49.9.1 *Direct/quasi-transferor individuals*

In a case where there is a quasi-transferor *and* a direct transferor what is the position of the direct transferor under s.720?

The question does not arise if the direct transferor is a company because

(1) Following *Fisher* a shareholder is not a transferor, and

(2) In any event, the company is not within s.720, which only applies to individuals.

So the question only arises when the direct transferor:

(1) is an individual; and

(2) has power to enjoy (but a transfer to a trust, or a company held by a trust, is likely to meet this requirement as offshore trusts generally have a wide power to add beneficiaries)

In practice there has not yet been a reported case where there has been a direct transferor and a quasi-transferor who are both individuals, so the question has not arisen. It would have arisen if HMRC had succeeded in *Rialas* or in *Carvill.* The solution must be that only the quasi-transferor counts, and the direct transferor is ignored; or else they are both transferors, but double-counting relief[37] protects the direct transferor and imposes the charge on the quasi-transferor. These are two routes to the same destination.

49.10 Trustees/fiduciaries: Transferors

A trustee may make a direct transfer of assets (eg transferring trust property to a foreign company) and it may perhaps procure a transfer of assets (eg paying X to make a transfer abroad). Section 720 cannot apply to the trustee because (among other reasons) a trustee is not an individual, so not within s.720. That follows (among other reasons) from the distinct-person rule.[38]

Suppose an individual ("an appointor") has power of appointing new trustees. The appointor may procure a transfer of assets, eg by appointing foreign trustees the individual procures the transfer of assets from the old trustees to the new trustees. In this case the distinct-person rule does not apply (assume the appointor is not a trustee). That "get out of jail" card is not available. But no-one suggests that s.720 could apply to the appointor. It is considered that the reason is that a person who exercises

[37] See 51.9 (Double-counting relief).

[38] See 7.3 (Trustees a distinct person).

a fiduciary power is not a quasi-transferor.[39] Since the appointor obviously does "procure" a transfer, in the normal sense of the word, this illustrates how the concept of "transferor", or of procurement, must be used in a flexible manner.

What if an individual (perhaps a principal beneficiary but not the settlor) requests and encourages trustees to make a transfer? The individual (not being in control of the trust) cannot be said to procure the transfer made by the trustees, so the individual is not a quasi-transferor.

49.11 Co-owner transferors

There are two main types of co-ownership in English law[40] and it is necessary to consider them separately.

49.11.1 *Tenancy in common*

Under a *tenancy in common*, each co-owner effectively has a separate share.[41] So if they together transfer their interest to a person abroad, each is transferor of their share. The point is made in *IRC v Pratt*:

> Suppose, for example, A and B hold land as joint legal tenants upon trust for themselves beneficially in equal shares,[42] and they then make a transfer of that land abroad. I see no difficulty in regarding, for the purposes of [s.720], A as the transferor of his beneficial half share therein, and B as the similar transferor of his beneficial half share.[43]

[39] Another explanation is that a person is not a transferor unless they have made or procured a transfer of a *beneficial* interest. *IRC v Pratt* 57 TC 1 at p.49:

> "I think that for the purposes of s [720], it must be the beneficial transfer - the transfer of the beneficial interest - which is in question, and not the bare transfer of the legal title. A trustee, for example, who was directed by his beneficiaries to effect a transfer would not, even if he knew full well what was on foot, become himself liable to fall foul of the section merely on that account."

It is of course right that the trustee in this example would not fall within s.720. But I think it is more helpful to focus on the capacity (fiduciary or not) of the individual concerned, rather than the nature (beneficial or not) of the asset transferred.

[40] In Scots law the terminology is different, but I am not aware of any differences relevant for present purposes.

[41] The terminology of co-ownership is technical and opaque. The shares of tenants in common are traditionally described as "undivided shares".

[42] The words "in equal shares" mean that the co-owners hold as tenants in common. It is beneficial ownership rather than legal ownership which matters here.

[43] 57 TC 1 at p.49. That is straightforward, and HMRC agree. The INT Manual provides a similar example where the asset is company shares rather than land:

49.11.2 *Joint tenancy*

Under a *joint tenancy*, each co-owner is (at least in legal theory, and at least for some purposes) regarded as the owner of the whole. *Pratt* goes on to consider this case without deciding it:

> The difficulties are increased, however, if in the example given A and B hold the land upon trust for themselves as beneficial joint tenants. In substance, there is no difference between that and the example given, yet here we have two transferors of one subject matter.

The only sensible conclusion is that A and B should be regarded as each transferring half the land, and later in the judgment, the judge was inclined to accept that view:

> I can well see that if A and B own an asset jointly, and transfer it abroad, then one might for this purpose be able to separate out their beneficial interests as being equal...[44]

It is true that in legal theory (which to a non-property lawyer seems very strange) *each* joint owner is regarded as owner of the whole. But that does not prevent this conclusion, as there are other cases where the same theory is not (and indeed could not be) carried to its logical extent.

The reason that co-ownership examples were discussed in *Pratt* is not because anyone has any doubt of the answers; it was hoped that the answers might shed light on the problems which arises where co-

> **INTM600800 The individual: Multiple Income charges** [Jul 2023]
> ... HMRC's practice where the same assets are transferred by several individuals is to assess the transferors in proportion to their shares of the assets transferred. For example, where shares of a UK company are held by three individuals in the proportions of 40%, 40% and 20%, and there is a liability under ITA07/S720 in respect of an overseas person to which the shares are transferred, the liability is assessed on each of the three individuals in proportion to their respective holdings.

More analytically: the facts of the example are not quite clear. It may be implied that all the shares are registered in the names of the 3 individuals jointly; but they hold beneficially as tenants in common (they cannot hold beneficially as joint tenants, as a joint tenancy requires co-owners to have equal shares.) If so, this is a case of co-ownership but not a case where "the *same* assets are transferred by several individuals" as each individual transfers their (separate) beneficial interest. Alternatively it may be that each shareholder is registered as sole owner of their own shares. That is not a case of co-ownership at all, strictly speaking. But whatever the analysis, the answer is the same.

[44] 57 TC 1 at p.51.

shareholders procure a company transfer. However I do not think the answers take us anywhere. There is no analogy. Joint owners are direct transferors, not quasi-transferors.

49.11.3 *Gift to T + transfer by T*

Suppose:
(1) X transfers assets to Y for no consideration (transfer 1)
(2) Y (an individual) transfers assets to a person abroad (transfer 2)

X is a transferor in relation to transfer 1. Y is a transferor in relation to transfer 2. X is not a quasi-transferor in relation to transfer 2 (unless, exceptionally, X has some way of forcing Y to make the transfer). The important question for X is whether transfer 2 is an associated operation in relation to X's transfer, transfer 1.[45]

49.12 Transferor/settlor compared

In practice it is generally the case that a settlor is a transferor and vice versa. That makes sense so far as possible to apply the same test for settlor and for transferor, as the objects of the ToA and the settlor-interested trust code are the same, or at least closely comparable. However there are differences.

In the case of a transfer for full consideration, a person may be a transferor but not a settlor, because settlor/settlement requires bounty (gratuitous intent).

In the case of a transfer by a company, the company is a settlor and a shareholder may be an indirect settlor, but, following *Fisher*, not a transferor.

49.13 Must transferor (intend to) avoid IT

49.13.1 *The statutory provisions*

Section 720 ITA provides:

> (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.
> (2) Income tax is charged on income treated as arising to *such an individual* under section 721. ...

[45] See 48.13.1 (A to B + B to C: clean-break test).

The Special Commissioners say:

> 186. In our view ... such an individual" is an individual ordinarily resident in the UK who, *by means of a transfer* of assets in consequence of which income becomes payable to a non-resident, *avoids liability to income tax apart from the operation of these provisions*.[46]

If that is right,[47] the question arises whether the requirement that the transferor is a person who "avoids liability to income tax" means:

(1) the transferor in fact avoids income tax (in the absence of the ToA provisions); or
(2) the transferor intends to avoid IT (whether or not they in fact do so); or
(3) the transferor both intends to avoid and in fact avoids IT.

Section 721(5) ITA provides:

> It does not matter for the purposes of this section ...
> (c) whether the avoiding of liability to income tax is a purpose for which the transfer is effected.

There are four permutations: In outline:

Case no	**Purpose to avoid IT**	**IT avoided in fact**	**Can s.720 apply?**
1	Yes	Yes	Yes, clearly
2	No	No	Yes, according to CoA in *Fisher* but ...
3	Yes	No	Yes: *McGuckian*
4	No	Yes	Yes: s.721(5) ITA

Cases 3 and 4 may seem rare: normally the purpose and the avoidance in fact would both be present or absent. But it does happen.

In *Fisher* the CoA held that s.720 can apply in case 3. The reader may think that the argument to the contrary (which was also supported by HMRC guidance) was the better; but the point is now academic. Subject to a further appeal, the law is now settled, and I omit the discussion here as it is not of general interest. Parliament retained the statutory words set

[46] *IRC v Botnar* 72 TC 205. Although the case was finally decided in 1999, it concerned tax years before the 1996 reforms.

[47] Sometimes statutory provisions are used to give gravitas to political or moral commitments and it would be a mistake to give them legal effect: see Feldman, "Legislation Which Bears No Law" (2016) 37 (3) SLR 212. However no-one suggests that is the case here.

out in 49.13.1 (The statutory provisions), which refer to avoiding income tax, but the words do not mean anything.

49.14 Condition A: Power to enjoy

Section 721(1) ITA provides:

> Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met.

I refer to "**s.721 conditions A to C**".

Section 721(2) sets out condition A:

> Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—
> (a) a relevant transfer,
> (b) one or more associated operations, or
> (c) a relevant transfer and one or more associated operations.

The s.720 charge only applies if the transferor has "power to enjoy" the income of the person abroad. The charge may however apply even though the individual does not actually enjoy the income, and might never do so.

If the transferor has power to enjoy during part of the tax year, condition A is satisfied for the whole of the tax year.[48] This means that IT planning by excluding the transferor needs to be carried out some time in advance.

The drafter frequently uses a clumsy formula which refers to:

> the income mentioned in section 721(2); *or*
> the income mentioned in section 721(2) or 728(1)(a)

This means the income of the person abroad, or that part over which the individual has power of enjoyment. But power to enjoy over part will be rare, and for clarity, I gloss that formula as [the income of the person abroad].

[48] The usual case will be if the settlor has power to enjoy and is then excluded and so ceases to have power to enjoy; but it could also happen that the settlor acquires power to enjoy during the tax year.
A similar rule applies for CGT but not for settlor-interested trusts: If a settlor is excluded s.624 ITTOIA ceases to apply from the date of the exclusion, but s.720 continues to apply for the rest of the tax year. see 47.6.6 (Settlor-interest ceases); 60.5 (Settlor-interested condition). The reason might be that s.720 is intended to be stricter, perhaps penal; or maybe no-one thought about it.

On a transfer from a UK domiciled person to their foreign domiciled spouse, see 93.14 (Marriage of dom/non-dom or resident/non-resident: IT planning).

49.15 "Power to enjoy"

Section 722 ITA provides:

> (1) For the purposes of section 721, an individual is treated as having power to enjoy income of a person abroad if any of the enjoyment conditions are met.
> (2) In subsection (1) "the enjoyment conditions" means conditions A to E as specified in section 723.

I adopt the statutory terminology and refer to "**enjoyment conditions A to E**".

Section 722(1) states that an individual is *treated* as having power to enjoy if any of the enjoyment conditions are met. It is considered that this is a comprehensive definition of "power to enjoy";[49] but it is impossible to think of any power to enjoy (in the general sense) which does not also fall within one of the enjoyment conditions, so the point is academic.

"Power to enjoy" is elaborately defined and has given rise to a large case law. But in practice it is not often an issue. In outline, the transferor has "power to enjoy" if they may possibly enjoy any of the income of the person abroad. A transferor has no power to enjoy if they (and their spouse) are excluded from benefit and have no power of control.

The test is slightly wider than that of a "settlor-interested" trust for the purposes of s.624[50] though for most practical purposes they are the same. It is hard to see the reason for the distinction, but that is the patchwork nature of income tax.

With an economy of drafting, similar "power to enjoy" wording is used in other contexts:

Context	**See para**
Profit fragmentation	53.8
Mixed membership partnerships	86.10
Disguised investment management fees	73.17.1
Disguised trading	s.23F ITTOIA

[49] See App 8.4 (Deemed/treated misused).
[50] See 47.6 (Meanings of "settlor-interested").

The enjoyment conditions frequently use the word "benefit". For the meaning of "benefit" in the context of s.731 and s.87 see 50.4 (Benefit). Most of that discussion is relevant here, but there is one difference. In those sections one had to ascertain the value of the benefit. In the case of power to enjoy, all that matters is that there is a benefit, regardless of its value: the value of the benefit does not usually matter.

Statutory tax indemnities do not confer power to enjoy.[51]

49.15.1 *Substance*

Section 722(3) ITA provides:

> In determining whether an individual has power to enjoy income for the purposes of section 721, regard must be had to the substantial result and effect of all the relevant transactions.

Section 722(4) ITA provides:

> In making that determination all benefits which may at any time accrue to the individual as a result of the transfer and any associated operations must be taken into account, irrespective of—
> (a) the nature or form of the benefits, or
> (b) whether the individual has legal or equitable rights in respect of the benefits.

In the first *Vestey* case:[52]

> the direction that regard shall be had "to the substantial result and effect of the transfer and any associated operations" does not in my view authorise any laxity in construing any of the documents by which the transfer or the associated operations are effected. The Court must first determine the meaning and effect of the documents before this provision is applied and it must then consider whether their effect, though in form not beneficial to the settlor, is so in substance. The contrast is between substance and form, so if it can be shown in the present case that the effect of the transfer and the associated operations is to vest a benefit in (for example) a company over which the settlor has complete control, the Court may then say that, though in form the company benefits, in substance the company and the settlor are one and the settlor therefore

[51] See 101.4 (Statutory tax indemnity).

[52] *Vestey v IRC* 31 TC 1 at p.89. See too App.7.6 (Real nature of transaction); App.7.11 (Essence/substance in tax statutes).

> benefits. But the Court cannot take this last step unless it is shown that the settlor has himself the legal control and no reliance must be placed on his influence over others who are not in law bound to follow his directions.

The example of a benefit to a company is not a case where s.722(3) is in point. A benefit to the company held by the beneficiary would constitute power to enjoy under usual principles. The reader may think that the drafter is simply striving for effect, or expressing exasperation. But I think the drafter is stressing that the provisions should not be narrowly construed. Nowadays that would go without saying, but that was not the case when the provision was enacted.

Could s.722(4)(b) ITA ever make any difference? An example is a Cayman Island exempted trust, under which it is said that a beneficiary has no rights,[53] or perhaps a Cayman Island STAR trust.[54]

Perhaps there could be cases where the form over substance approach may assist the taxpayer, where the formal legal analysis might be said to confer some benefit on the settlor, but that is not so in substance. But the point is not likely to arise.

49.15.2 *Time of enjoyment*

Section 721(4) ITA provides:

> For the purposes of subsection (2), it does not matter whether the income of the person abroad may be enjoyed immediately or only later.

49.16 Enjoyment conditions A-D

49.16.1 *Condition A: Income benefits T*

Section 723(1) provides:

> Condition A is that the income is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of the individual, whether in the form of income or not.

[53] See s.83 [Cayman] Trusts Law (2009 Revision); exempted trusts were introduced in the [Cayman] Trust Law 1967 specifically in the hope of avoiding the ToA rules which then applied if the transferor had “rights”. The UK responded in 1969 removing the requirement of”rights” from the ToA provisions and adding (what is now) s.722(4)(b).

[54] It has been suggested that a beneficiary of a Foundation has no rights, but that is doubtful; see 90.13 (Beneficiary rights).

"Calculated..."

The Special Commissioners discussed the nuance of this un-lawyer-like expression in *Botnar v IRC*:[55]

> 222. [Enjoyment condition A] is concerned with how particular income is dealt with when it arises. [Counsel for the taxpayer] however conceded that this is not confined to its immediate handling on receipt or even to what happens in the year of assessment, if for example it is received late in the year, but that we should look at how it is dealt with within a reasonable time of receipt. ...
> 224. It seems to us that, when the word "calculated" is considered in the context that it refers to income which is "in fact so dealt with", the meaning "likely" is to be preferred to "thought out" in the sense of "intended"; however we are not sure that either "likely" or "intended" gives exactly the same flavour as "calculated". "Calculated" here combines an element of objectivity with an element of forethought.
> 225. It may not however make much difference because if any income was intended to enure for the benefit of [the transferor] it is obviously more probable that it was likely to so enure and that it would be seen objectively as likely to so enure.

The INT Manual provides:

> **INTM600880 Power to enjoy - condition A** [Jul 2023]
> ... The meaning of the word 'calculated' in this test was considered briefly by Mr Justice Walton in *Vestey v CIR* (54 TC 503 at p.555) where he observes
>
> > that it was submitted to me that "calculated" … meant "likely". This is, of course, one of its possible meanings, although a glance at the Shorter Oxford English Dictionary makes it quite clear that this is not a precise translation of the word "calculated". On the other hand, its primary meaning is "reckoned, estimated, or thought out", and I would think that this is the meaning which is intended here.
>
> Walton J went on to say that he thought a stricter interpretation than "likely" is called for; that is the approach which HMRC have continued to follow in relation to this test.

"...to enure for the benefit"

The INT Manual provides:

[55] 72 TC 205. The wording is also discussed in *Vestey v IRC* 54 TC 503 at p.555G.

> **INTM600880 Power to enjoy - condition A** [Jul 2023]
> ... The benefit may be present or future. It may be in the form of income or not and may include a payment of any kind. Prior to April 2007 the transfer of assets code included a meaning of 'benefit' for the purposes of the legislation saying: "benefit" includes a payment of any kind. Therefore, provided some benefit enures to the individual it need not be a money payment at all. In this context 'enure' means to take or have effect or serve to the use, benefit, or advantage of a person.
> Some examples taken from case law illustrate this point.
> In *Latilla v CIR* (25 TC 107), a non-UK company paid over income to the individual by repaying debentures held by her. Such a capital payment, if it results from dealing with the income of the person abroad, may come within this test. A capital payment may also trigger the [s.727] income charge - receipt of/entitlement to capital sums; this is further dealt with at INTM601020 onwards.

That is no doubt correct, though *Latilla* is not authority for these propositions, as it was common ground that the transferor had power to enjoy the income of the person abroad, and the points were not discussed.

> In *Lord Chetwode v CIR* (51 TC 647), the whole share capital of a Bahamas company was held by the Bahamas trustee of a settlement for the benefit of Lord Chetwode and his family. Lord Chetwode had a life interest in the trust fund and had very wide powers, including power to remove or appoint trustees, and to re-vest in himself the title to the trust fund. The House of Lords said in their judgement that, in view of the terms of the settlement, in addition to power to enjoy under other conditions, the income of the underlying company was so dealt with as to be calculated to enure for Lord Chetwode's benefit, and thus he had power to enjoy under this condition.

49.16.2 *Condition B: Asset value increases*

Section 723(2) ITA provides:

> Condition B is that the receipt or accrual[56] of the income operates to increase the value to the individual—
> (a) of any assets the individual holds, or
> (b) of any assets held for the individual's benefit.

First one must identify an asset held by T or for T's benefit. Having

[56] The words "or accrual" appeal to be otiose, but it does not matter.

identified the asset, one asks whether the receipt of the income increases the value of that asset.

The concept of an asset "held by T" is straightforward but what about an asset held "for T's benefit"? In *Howard de Walden v IRC*[57] a promissory note held by trustees on trust for T for life was considered to be held for T's benefit. One could reach the same result by a different route since T's life interest in the note was itself an "asset" held by T. The same would apply if T's interest was subject to an overriding power of appointment.

If the asset is held on a discretionary trust under which T is merely a beneficiary, it is probably not held "for T's benefit".

The second requirement is that the receipt of the income must increase the value of the asset. This was also considered in *Howard de Walden*. Here T held:

(1) a life interest in promissory notes issued by offshore companies and
(2) the benefit of debt due from the companies (T had lent money to the companies)[58]

The CoA held:

> The receipt of the income by each company operates to increase the value of the notes and of the deposit debt...[59]

However it is a question of fact in each case. The question is whether there was a risk of default which is reduced by the receipt of further income. If a debt is sufficiently covered by existing assets of a company, the receipt of further income by the company does not increase the value of the debt and enjoyment condition B is not satisfied. It will not usually matter, as s.727 is likely to apply in cases of this kind.[60]

The INT Manual provides:

> **INTM600900 Power to enjoy - condition B** [Jul 2023]
> ... This heading covers, for example, situations where:

[57] 25 TC 121.

[58] In some but not all cases T also held a few shares in the companies. The CoA did not rely on this because if it had held that T was caught only by virtue of these shares, T would not have been assessable on the income of all the companies.

[59] 25 TC 121 at p.133. *Brackett v Chater* 60 TC 134 & p.639 is another example: see at p.148. The receipt of income of the person abroad increased the value of (1) rights to payment by instalments for a property sold to the person abroad, and (2) a right to a salary.

[60] See 49.23 (Transferor receives capital sum).

- the individual holds shares in a foreign company and the accrued income or profits of the company increase the value of its shares;
- the individual receives debentures in exchange for transferred assets - see Howard de Walden v CIR (25 TC 121);
- the consideration for the transferred assets is left as a debt owing to the individual by the company - see Ramsden v CIR (37 TC 627).

In these examples, the receipt of income by the foreign company increases the value of the shares, debentures or debt, so income need not be remitted, nor even accumulated, for the benefit of the individual. If in fact the income is received by or accrues to the person abroad and operates to increase the value of any assets held by or for the benefit of the individual, then the test may be considered met for the purpose of applying the income charge.

... In the *Ramsden* case (37 TC 619), an individual transferred assets to a foreign company and left the cost of the assets credited to his account. Although it was held that the income charge - receipt of/entitlement to capital sums did not apply as the unpaid purchase money was not a loan, nevertheless the power to enjoy condition was met under this heading, and so an income charge arose. The individual's right to recover his debt was an asset held by him, and the value of that right was increased by anything tending to increase the value of the company's assets (that is, by the company's receipt of income). Under this heading therefore the individual would have "power to enjoy" income of the company while the debt remained unpaid.

In the *Lord Chetwode* case (51 TC 647), a trust for the benefit of *Lord Chetwode* held shares in a non-UK resident company which received dividends. The House of Lords found that in the circumstances of that case the receipt of dividends by the underlying company operated to increase the value to Lord Chetwode of the assets held by the trustees for his benefit. He therefore had power to enjoy within this heading as well as within other heads of the test.

49.16.3 *Condition C: T receives benefit*

Section 723 ITA provides:

> (3) Condition C is that the individual receives or is entitled to receive at any time any benefit provided or to be provided out of the income or related money.
>
> (4) In subsection (3) "related money" means money which is or will be available for the purpose of providing the benefit as a result of the effect or successive effects—
>
> (a) on the income, and

> (b) on any assets which directly or indirectly represent the income, of the associated operations referred to in section 721(2).

For completeness, this question also arose in *Howard de Walden*. The CoA said:

> ... the payments made and to be made in respect of the notes and deposits are "benefits" within the meaning of (c) since "benefit" as defined ... includes a payment of any kind.

There are two issues here. First, is the payment of a debt to T (or payment of the promissory note) a "benefit" in the general sense? The CoA rightly thought it was not, since they relied on the former definition clause.[61]

Secondly, did the former statutory definition of benefit extend the meaning of benefit to include a payment that is not a benefit in the normal sense? The CoA held that it did. On this point the law has changed: the ITA does not contain the definition of benefit on which the court relied, so this argument no longer arises. However the repayment of an interest-free loan is in principle a benefit.[62]

See 49.22.3 (Quantum: Enjoyment cond. C).

The INT Manual provides:

> **INTM600920: Power to enjoy - condition C** [Jan 2023]
> [The Manual sets out condition C and continues:] This test is designed to cover, for example, the individual who holds redeemable debentures, or who is entitled to other capital payments, where these are satisfied out of income or out of assets representing income, and also cases where a chain of companies is involved or a shareholder is entitled to receive dividends.
> One example is the case of *Earl Beatty's Executors v CIR* (23 TC 574). The Special Commissioners took the view that a capital sum payable to an individual by annual instalments in consideration for the transfer of assets to a foreign company met this condition and gave a power to enjoy income, as the test was not confined to payments which left the company as income. The test includes a sum received as capital as well as any income received. In such a case the [s.727 charge] may also apply.
> The case of *Earl Beatty's Executors v CIR* also dealt with the situation where assets were transferred by a series of transactions to a non-

[61] For the meaning of "benefit" see 50.4 (Benefit).

[62] See 47.6.4 (Beneficial loan or guarantee).

> resident company in consideration for the issue of debentures repayable in successive years without interest. It was argued that, since these debentures were to be repayable only to the extent of the value of the assets transferred to the company, the individual was getting back nothing but his capital; that is, he was receiving no benefit from the income derived from the assets transferred. It was held that since the debentures were charged on both the income and capital of the issuing company, the individual must be deemed to be entitled to a benefit provided out of income within the meaning of this condition.
>
> This decision was approved in *Howard de Walden v CIR* (25 TC 121). In that case the individual had a life interest in certain promissory notes issued by a non-resident company, and also had an interest in certain sums of cash on deposit with the company and repayable on demand. It was held that the payments made, and to be made, in respect of the notes and deposits were benefits provided out of the income of the company, the whole of which income could be traced to the assets originally transferred.
>
> A final example of where this condition applies is that of an individual who is a shareholder of a non-UK resident company.
>
> In *Lee v CIR* (24 TC 207), the individual, as a result of a transfer of assets, held shares in a non-resident company which because of the rights attached to them entitled him to receive a dividend out of the income of the company. This was held to be a benefit provided, or to be provided, out of the income of company within this condition. Similarly, in the *Lord Chetwode* case (51 TC 647), the House of Lords found that the terms of the deed of settlement entitled Lord Chetwode to receive a benefit out of the income received by the underlying company. Thus, he had power to enjoy within this condition as well as within other heads of the power to enjoy provisions...

49.16.4 *Condition D: Possible benefit*

Section 723(5) ITA provides:

> Condition D is that the individual may become entitled to the beneficial enjoyment of the income if one or more powers are exercised or successively exercised.

Section 723(6) ITA extends this:

> For the purposes of subsection (5) it does not matter—
>
> (a) who may exercise the powers, or
>
> (b) whether they are exercisable with or without the consent of another person.

The paradigm case is a discretionary trust where T is a beneficiary or could be added to the class of beneficiaries.

"Income" here includes any asset representing the income, even if that asset does not constitute the actual income (in the strict sense) of the person abroad. In *Vestey v IRC*:

(1) The individual could receive accumulated trust income. Walton J held that the individual had no power to enjoy the trust income within enjoyment condition D because what the individual could receive was trust capital and so no longer "income".[63]

(2) The trust held a company. Walton J held that the individual had no power to enjoy the company's income within enjoyment condition D because what they could receive was dividends from the company and that was not the same as the income of the company.[64]

This is bizarre and in the House of Lords Viscount Dilhorne rejected it.[65] It is considered that Dilhorne's reasoning is to be preferred.

The INT Manual provides:

> **INTM600940: Power to enjoy - condition D** [Jan 2023]
> [The Manual states Condition D and continues:]
> This definition of the power to enjoy was amended by the Finance Act 1981 and these notes cover only the position after that amendment.
> This test includes the case in which the power to enjoy depends on the exercise of some joint power.
> Perhaps the most common example of where this test may apply is to the income of a company underlying a settlement whose shares are acquired by the settlement trustees. The individual who made the settlement remains a beneficiary and as such has power to enjoy the income of such a company, by becoming entitled to its beneficial enjoyment through the successive exercise of powers. For example, the declaration of a dividend by the company of which the trustees are shareholders, followed by an exercise of discretion as to the application of the dividend by the trustees.
> In another example, *CIR v Botnar* (72 TC 205), the individual's counsel argued that even if the individual did become entitled to the beneficial

[63] *Vestey v IRC* 54 TC 503 at p.555.

[64] *Vestey v IRC* 54 TC 503 at pp.562-3.

[65] p.595. Strictly, Dilhorne only rejected point (1). He did not address point (2). But the reason is the same in both cases so it logically follows he rejected Walton's view on both points. No other judge considered this aspect.

> enjoyment of income which could be traced to the companies underlying the settlement involved, it had not been the income of those companies when it was beneficially enjoyed. The HMRC argument, which was accepted by the Court of Appeal, was that the income which the individual beneficially enjoyed had simply to have been the income of the companies at some earlier stage. It was not necessary that it still possessed the characteristics of being income of the underlying companies when it was beneficially enjoyed. What this condition is concerned with is the beneficial enjoyment in the future of what in the past was the income of the companies.

49.17 Enjoyment condition E: Control

Section 723(7) ITA provides:

> Condition E is that the individual is able in any manner to control directly or indirectly the application of the income.

Some of the discussion on corporate control is also relevant here: see 104.2.3 (Control: Strict sense).

49.17.1 *Control over trust income*

Control is not defined. It means non-fiduciary control.

Trustees are treated as a separate notional person.[66] So an individual who is a trustee, even sole trustee, does not have control of the trust income in their personal capacity. But even ignoring that point, a trustee does not have control as their powers are fiduciary.

A protector does not have control, as the powers of a protector are (in general) fiduciary powers.

The power to appoint trustees does not confer control of trust income, both because the power itself is fiduciary, and because the trustees (once appointed) are subject to fiduciary obligations:

> But the question in the instant case is not whether the settlor was likely to be able to influence or even to exercise a decisive influence over the exercise by the trustees of their fiduciary powers. The question is whether he was able to control the application of the income, and to answer that question affirmatively it must in my judgment be possible to say at least that he was in a position to ensure that the trustees would act in accordance with his wishes without themselves giving any

[66] See 7.3 (Trustees a distinct person).

> independent consideration and accordingly to act in disregard of their fiduciary duty.[67]

That state of affairs would nowadays suggest a sham or an illusory trust.[68] The INT Manual provides:

> **INTM600960 Power to enjoy - condition E** [Jul 2023]
> ... However, the Special Commissioners decided in the case of *CIR v Schroder* (57 TC 94) that on the particular facts in that case the test was not met. They found that
>
> > Mr Schroder was able to appoint trustees who…could be expected to deal with the trust income in accordance with his wishes: but he could not compel them to do so and there is no suggestion that any of them would have acted in breach of their fiduciary duties under the settlements.
>
> In dismissing HMRC's appeal against the Commissioners' decision The High Court appears in effect to have distinguished a position of influence from a position of control.

The Special Commissioners discussed this topic in *Botnar v IRC*:

> 261. In our judgment the ability to control must go beyond an assumption that those controlling the companies will comply with the transferor's wishes and the fact that they do comply is immaterial. We accept the question posed by [counsel], viz whether [the transferor] was in a position to ensure that the companies would act in accordance with his wishes.

The Special Commissioners then applied this principle to the facts of the case:

> 262. There was in fact no material before us to indicate that [the transferor] could have done anything if Dr. Lenz had declined to do what he wanted. The position might have been different if Dr. Lenz was for example an employee who might have been dismissed in the event of failing to cooperate. There was however no evidence to suggest this. We are satisfied that the directors of the companies would have carried

[67] *IRC v Schroder* 57 TC 94 at p.125.

[68] See 87.11 (Illusory trust); 87.14 (Sham). *Schroder* did not use these terms, but it was decided before the modern concepts of sham/illusory trust began to receive attention. In the case of a sham or illusory trust, enjoyment condition E would no doubt be satisfied, as would other enjoyment conditions, but the income may not be payable to a person abroad.

> out his instructions. We have no doubt that [the transferor] was justified in assuming that Dr. Lenz would do what he wanted. However we do not consider that the mere fact that Dr. Lenz was in the saddle of the settlement meant that [the transferor] was able to ensure that the income would be applied for his benefit. On the authority of *Schroder* even decisive influence is not enough.
> 263. We readily accept [counsel's] submission that [the transferor] wished to ensure that the shares would remain in friendly hands. In a sense it could be said that he did in fact control the settlement and the Companies because in fact Dr. Lenz did comply with his wishes: there was no evidence of any action by Dr. Lenz which was contrary to [the transferor]'s wishes. That is not however the same as [the transferor] having the ability, even indirectly, to ensure that the income would be applied in accordance with his wishes.[69]

49.17.2 *Control over company income*

In *Lee v IRC* 24 TC 207, the transferor held management shares conferring votes (and so power to appoint and dismiss directors) even though the shares conferred no right to dividends or capital. Condition E was satisfied. At first sight it seems illogical that a power to appoint/remove directors of a company should constitute a power to enjoy the company income, when power to appoint/remove trustees does not constitute a power to enjoy trust income. Directors and trustees are both fiduciaries. But the management shares in *Lee* conferred more than just a power to appoint/remove directors: *IRC v Schroder* explains:

> Mr. Lee had power to appoint and remove directors. That power was not a fiduciary power. He could have appointed himself. ... directors do not owe any fiduciary duty to the shareholders. They are trustees of their powers for the company. Mr. Lee was for all practical purposes the company. He controlled the majority of votes in general meeting. No dividend could be declared save by resolution of the "A" shareholders, and the "B" shareholders had no other prospect of receiving any income or capital save in a winding-up of the company, which again would require a resolution of the "A" shareholders. Thus the "B" shareholders had no measure of control over the company except their right to bring a minority shareholders' action to prevent misuse by the directors of

[69] 72 TC 205 (Special Commissioners) at p.250. A similar approach applies to the test of corporate residence (central management & control); see 8.10.7 (Influence v control).

> their powers or ... oppression by the "A" shareholders. Thus Mr. Lee was in practice securely in the saddle. Not only could the "B" shareholders obtain nothing save at his direction; he could within the broad limits of what a director could honestly believe to be proper in the interests of the company ensure that ... the income of the company was used for his own ends. He could, for instance, have appointed himself and his wife directors and have procured [the company] to enter into a service agreement with him.[70]

49.17.3 *Non-fiduciary power*

A power to appoint the capital or income of a fund among a class (not including the appointor) does not satisfy enjoyment condition E, even if the power is not a fiduciary power.[71]

[70] *IRC v Schroder* 57 TC 94 at p.123. If further authority is needed, see *Holt v Holt ,* [1990] 1 WLR 1250 at p.1253, a valuation case concerning farming company shares with (more or less) all the votes but no right to distributions:

> "He can appoint himself sole director ... He can occupy the farmhouse as a family home, he can run the estate as he thinks fit. Unlike a farming manager he cannot be dismissed and is not obliged to consult or take instructions from anyone.... He cannot sell capital assets and put the money in his pocket, he cannot commit waste and he cannot artificially increase the profits of the farm for his own benefit by allowing the condition and state of repair of the estate to deteriorate. But if he would like to farm the estate and enjoy the advantages of being a farmer in the Wairau Valley as long as he likes, drawing reasonable remuneration, he cannot be interfered with.
>
> ... the B shareholder can obtain nothing without the co-operation of the A shareholder. If the farming business became so prosperous that the profits exceeded all that was necessary for repairs and for reasonable remuneration for the A shareholder then any surplus would be devoted by the control of the A shareholder towards the improvement of the farm property or could be distributed in the form of a dividend. Such a surplus would have to be unforeseeably large before the B shareholders could successfully urge that a dividend ought to be paid."

[71] *IRC v Schroder* 57 TC 94 at p.116 cites the first *Vestey* case: *Vestey v IRC* 31 TC 1:

> "I do not think, however, that this limited power of appointment gave [the transferor] power 'to control the application' of any income, within the meaning of [enjoyment condition E]. He could only make an appointment 'in the shape of a capital payment' in favour of one or more of his issue or their spouses and if such a power were intended to be caught ... 1 think that it would have been included in [enjoyment condition D], which deals expressly with powers of appointment. That Sub-clause is, however, limited in its operation to powers which enable the individual to obtain the beneficial enjoyment of income."

Schroder concludes: "the first *Vestey* case is conclusive authority for the proposition that the donee of a special power to appoint an interest in the capital or income of a

49.17.4 *Limited role of condition E*

In *Lee*, enjoyment condition B was also satisfied, as company income would tend to increase the value of the management shares (voting shares do have some value). Enjoyment condition D was also satisfied.[72] In practice it is difficult to think of a case where enjoyment condition E is satisfied and none of the other enjoyment conditions would be satisfied. The INT Manual makes the same point:

> **INTM600960 Power to enjoy - condition E** [Jul 2023]
> ... In most cases it is unlikely that satisfaction of the power to enjoy test will rest on the basis of this condition alone.

49.17.5 *Must control confer benefit*

Schroder raised a further question on the scope of enjoyment condition E which remains open:

> [Counsel for the taxpayer] submitted that ... para (e) was not intended to apply unless the taxpayer is able to secure that income is applied in a way which produces at least an indirect benefit or in the words of Lord Morton in the first *Vestey* case that his control over the application of income is a power which he is entitled to use to serve his own ends ...

The judge found the Revenue's response "less than compelling" but did not decide the issue:

> ... the question whether para (e) applies to a case where a settlor has a power to direct the application of income for the benefit of others and to the exclusion of any benefit direct or indirect to himself does not arise for decision, and I express no concluded opinion upon it.[73]

The INT Manual shows that HMRC continue to take that point:

> **INTM600960 Power to enjoy - condition E** [Jul 2023]
> ... However, the test does not require that the individual is able to derive personal benefit from the power of control. Therefore, if in fact a settlor of a settlement, for example, does continue to have power to direct the application of income for the benefit of others, even though he himself

fund amongst a defined and ascertainable class is not by virtue of that power able to control the application of that income within the meaning of [enjoyment condition E]."

[72] See 49.16.3 (Individual receives benefit).

[73] *IRC v Schroder* 57 TC 94 at p.125-126.

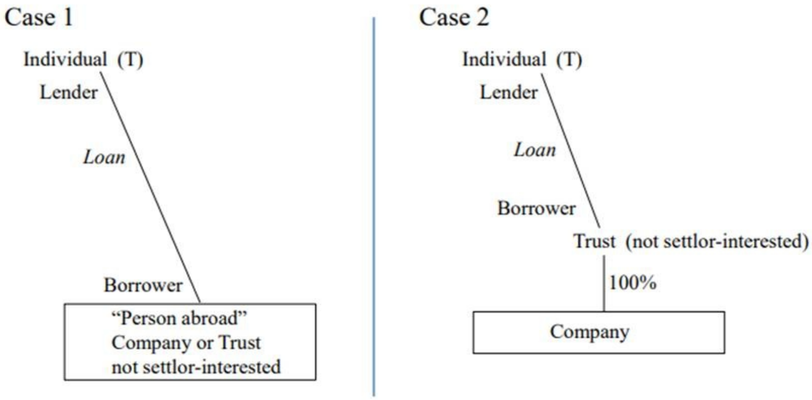
may be specifically excluded from benefit, this power to enjoy condition may well be met.

The fact that this point remains undecided only goes to show the limited importance of enjoyment condition E. But if the point did arise, the HMRC view seems right, as if a benefit was required there would be no need for enjoyment condition E.

49.18 Power to enjoy: Topics

Some structures can involve more than one of the enjoyment conditions, and it may be helpful to draw the threads together

49.18.1 *Power to enjoy: Loans*



Case 1
Individual (T)
Lender
Loan
Borrower
"Person abroad"
Company or Trust
not settlor-interested
Case 2
Individual (T)
Lender
Loan
Borrower
Trust (not settlor-interested)
100%
Company

INTM600960 In case 1 the person abroad (trust or company) owes a debt to T. Assume T has no interest in the person abroad other than the loan.

(1) T has power to enjoy the income of the person abroad (trust or company):
  - (a) If the loan is on beneficial terms (under enjoyment condition C and D[74]; or
  - (b) If receipt of income by the person abroad (trust or company) increases the value of the loan (under condition B)

(3) T does not have power to enjoy if:
  - (a) the loan is on arm's length terms *and*
  - (b) receipt of income does not increase the value of the loan

[74] And potentially, condition A and B, but HMRC do not need to rely on those.

In short, a loan to a trust will generally (but not necessarily) confer power to enjoy the income of the trust, and likewise a loan to a company.

In case 2 the *trust* owes a debt to T. Assume T has no interest in the company, and no interest in the trust other than the loan.

(1) T has power to enjoy the income of the *company*:
  (a) If the loan is on beneficial terms (the income of the company may be paid to the trust as dividends, and then used to repay the loan, so Condition D applies)
  (b) If receipt of income by the *company* increases the value of the loan, (condition B applies)

(2) T does not have power to enjoy the income of the *company* if:
  (a) the loan is on arm's length terms *and*
  (b) receipt of income by the company does not increase the value of the loan

In short, a loan to a trust which holds a company will generally (but not necessarily) confer power to enjoy the income of the company. But if the trust disposes of the company, the transferor will in principle cease to have power to enjoy income of the company.

49.18.2 *Minority shareholding*

If T holds a majority shareholding in an offshore company, T has power to enjoy all the income of the company since enjoyment condition E is satisfied. The same applies if T and T's spouse together have a majority shareholding.

What is the position if T has a minority shareholding, say, 10% of the ordinary shares? At first sight one might think that T has power to enjoy all the income of the company, under enjoyment condition B, since the income of the company increases the value of T's minority shareholding. But it is suggested that T has only power to enjoy one tenth of the company's income. This was assumed in *Bambridge v IRC*.[75]

49.18.3 *Spouse has power to enjoy*

Section 714(4) ITA provides:

> In this Chapter [Chapter 2 Part 13, ToA provisions] references to individuals include their spouses or civil partners.

[75] 36 TC 313. See Boyd, "Requiem for a Man of Straw" [1980] BTR 442 at p.457.

Thus if the transferor is married, excluded from benefit, but the transferor's spouse has power to enjoy, the transferor is treated as having power to enjoy. A widow or widower of the transferor may be included as a beneficiary because a widow is not a spouse.[76]

What if the settlor is unmarried but there is no provision excluding a future spouse? In *Tennant v IRC*, the settlor had power to appoint to any person excluding the settlor. The settlor was divorced, but if she remarried, she could have appointed in favour of her husband. Section 38(4) FA 1938 provided (for present purposes) identical words to the current s.624. The settlor had an interest in the trust property if:

> any ... property which may at any time arise under or be comprised in that settlement is, or will or may become, payable to or applicable for the benefit of the settlor or the wife or husband of the settlor in any circumstances whatsoever:

The judge dealt with the point briefly:[77]

> It is contended ... for the Crown that the property in question may become payable to the husband in certain circumstances within the meaning of the Subsection, namely, if the Respondent marries again and revokes the settlement in her husband's favour. I am of opinion that the contention of the Crown is correct. Such marriage and revocation are circumstances which might occur and which would, it seems to me, achieve the purpose which the Section is designed to prevent.

For s.624 purposes, this was reversed by statute in 1995: references to a spouse no longer include a future spouse.[78] The question for s.720 is whether the individual "may become entitled" to the income "if one or more powers are exercised." The words of emphasis and extension, "in any circumstances whatsoever" are not included. It is suggested that power to enjoy condition D is not met. For the transferor (or rather, his spouse) to become entitled, it is not sufficient that one or more powers are exercised. There is a further requirement, which is not the exercise of a power: It is necessary that the transferor marries. This view leaves the law in a (slightly) more coherent state, and explains why the 1995 reform did not amend s.720.

[76] See App 3.2 (Spouse).

[77] 24 TC 215 at p.220.

[78] See 47.6.3 ("Spouse" in settlor-interested trust code).

49.19 Power to enjoy: Causation

It is not sufficient that the transferor has power to enjoy the income of the person abroad. A causation condition must also be satisfied. Section 721(2) ITA provides:

> Condition A is that the individual has power in the tax year to enjoy income of a person abroad *as a result of*—
> (a) a relevant transfer,
> (b) one or more associated operations, or
> (c) a relevant transfer and one or more associated operations.

Suppose:

(1) In 1970 A transfers an asset to a non-resident company wholly owned by B, who is not UK resident ("A's transfer").
(2) In 2010 B transfers the company to an offshore trust under which A may benefit[79] ("B's transfer").

A has made a relevant transfer. However, before 2010, A is not within s.720 since A does not have power to enjoy the income of the company.

From the date of B's transfer in 2010, A does have "power to enjoy". A does not have that power as a result of A's transfer alone. B's transfer appears at first sight to be an associated operation in relation to A's transfer.[80] It seems at first sight that s.721 condition A is satisfied and A is in principle taxable under s.720 on the income of B's trust! This clearly cannot be right, but why not? This raises questions similar to those discussed in para 48.13.1 (A transfers to B + B to C: clean break test). Assuming there is a "clean break" between A's transfer and B's transfer (the same test as applies elsewhere), it is suggested that there are two reasons for this (either one would suffice):

(1) B's transfer is not an operation associated with A's transfer; and
(2) A does not have power to enjoy as a result of A's transfer, but only as a result of B's transfer.

Suppose:

(1) In year 1, T transferred assets to an offshore company ("the original transfer of assets"). T has no interest in the shares of the company,

[79] If B's trust is in standard form there will be a common form power to add beneficiaries, so A will have power of to enjoy.

[80] See 48.11 (Associated operation: definition).

and no power to enjoy its income; and so is outside s.720.

(2) In year 2, T lent money to the company interest-free (“ the loan”).

In year 2, T probably does have power to enjoy the income of the company by virtue of the interest-free loan.[81] However T is not taxed on the income arising from the original transfer of assets in year 1, since that power to enjoy does not arise *as a result* of the transfer or any associated operation. The loan is not an associated operation.[82]

However, T is in principle subject to tax under s.720 on the income arising to the offshore company as a result of the loan in year 2 (if there is any) as the loan is itself a transfer of assets.[83]

On the same facts, if income is used to repay the loan, then enjoyment condition A is satisfied. (So is enjoyment condition C, but that does not matter.)

49.20 s.721 income chargeable to IT

I turn to s.721 condition B. Section 721 ITA provides:

> (1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met...
> (3) Condition B is that the income of the person abroad would be chargeable to income tax if it were the individual’s and received by the individual in the UK.

This condition would matter if:

(1) Income of the person abroad would not be chargeable to income tax, if received by a UK resident individual in the UK; and yet

(2) In the absence of condition B, the transferor would otherwise be chargeable under s.720.

It is (just) possible to find a situation where point (1) is met. A UK resident diplomat, for instance, would not be chargeable on foreign

[81] Inter alia, enjoyment condition D is satisfied as income may be used to repay the loan, and (depending on the facts) enjoyment condition B may also be satisfied.

[82] See 48.11.3 (“Effected in relation to” the assets transferred). The example is based on the facts of *Fynn v IRC* 37 TC 629 where the s.720 point was not argued, presumably, because the Revenue accepted this view was correct. For the s.727 issues raised by a loan, see 49.24.3 (Connected with transfer).

[83] This point did not arise on the facts of *Fynn* as the loan was used to repay a debt, so no income arose to the offshore company as a result of the loan.

income.[84] But it is difficult to find a situation both points are met.

Diplomatic immunity, for instance, would also extend to s.720 income, so diplomats do not need to rely on condition B.[85]

Interest on National Savings Certificates is exempt from income tax by virtue of s.692 ITTOIA which provides: "No liability to income tax arises in respect of income from authorised savings certificates." But in the unlikely event that a person abroad within s.720 held National Savings Certificates, the wording is wide enough to cover a s.720 charge.[86]

What about a case where interest is due but unpaid; which (1) would be recognised as income in the accounts of an offshore company, but (2) would not be recognised as income (until paid/received) for IT purposes[87]? The answer is that what is income of the person abroad is determined by IT principles,[88] so s.720 is not applicable to unpaid interest, and condition B is not in point.

I have wondered whether condition B had some historical purpose when enacted in 1936 which has since been lost; but the authors of a 1936 textbook were equally puzzled.[89]

In practice condition B will always be satisfied. So it does not matter that s.727 has no equivalent condition. It would be a minor simplification to repeal the condition, but that would probably be more trouble than it is worth, except in the context of a wider review of ToA.

49.21 s.721 Cond. C: Transferor UK resident

Turning to s.721 condition C, s.721(3A) ITA provides:

> Condition C is that the individual is UK resident for the tax year.

[84] Section 2 Diplomatic Privileges Act 1964 provides: "the Articles set out in Schedule 1 to this Act … shall have the force of law in the UK". Article 34 provides: "[a] diplomatic agent shall be exempt from all dues and taxes, personal or real, national, regional or municipal".

[85] One possible case (prior to the abolition of ordinary residence in 2013) was a transferor who was ordinarily resident but not resident in the UK. If that was possible (which was doubtful) the individual could have benefited from condition B as (being non-resident) they would not have been chargeable on foreign income.

[86] See 2.4.1 (In respect of).

[87] See 15.5 (When is interest recognised).

[88] See 48.16 (Income of person: Quantum).

[89] Stein & Marks, *Tax avoidance: An interpretation of the provisions of the Finance Act, 1936, relating to transfers of assets, companies' sur-tax, children's settlements* (1936) p.13.

49.21.1 *Income arises when transferor non-resident*

Section 720 does not apply to income which arises in a year for which the transferor is not resident in the UK.

A non-resident individual is subject to tax at their personal rates on their UK rental income. That individual may transfer UK land to an offshore company in order to avoid higher rate income tax.[90] (It is not usually necessary for a non-resident individual to transfer other assets to a company in order to avoid higher rate tax as income of a non-resident from most other sources is not subject to tax at the higher rates.)[91]

If the individual later becomes UK resident they do not retrospectively become liable under s.720 for income accruing in non-resident years. This is consistent with the usual IT position.[92]

49.21.2 *Income arises in split year*

There is no express split-year rule, so the default rule applies: s.720 income is taxable even if it arises during the overseas part of a split year of the transferor.[93] There is no good reason for that. Section 720 income ought to be taxed in the same way as ordinary foreign income. But DT relief should be available if the transferor is treaty-resident in a foreign state during part of a tax year.[94]

49.21.3 *Transferor non-resident when transfer made*

The intention of those responsible for the legislation was that s.720 should only apply if the transferor was (ordinarily) resident in the UK at the time of the transfer.[95] After some vacillation, this was upheld in *IRC v Willoughby*.[96] But that is only of historical interest, as the position is now governed by s.721(5)(b) ITA:

> It does not matter for the purposes of this section ...
>
> (b) whether the individual is UK resident for the tax year in which

[90] Of course, CGT, VAT, IHT and SDLT all need consideration.

[91] See 45.1 (Non-residents income tax relief: Introduction).

[92] See 17.21 (RFI/gains of non-resident, remitted when resident).

[93] See 10.1 (Residence throughout tax year).

[94] See 49.30.3 (Transferor treaty non-resident).

[95] "There has to be a transfer of assets abroad by an individual resident in this country." (W.S. Morrison, then Financial Secretary) 313 HL Official Reports 5th series col 685, cited *IRC v Willoughby* 70 TC 57 at p.113.

[96] 70 TC 57 reversing *Herdman v IRC* 45 TC 394.

> the relevant transfer is made (if different from the tax year mentioned in subsection (1))...

Thus non-residence at the time of the transfer is not a defence: s.720 may apply to a person after they become resident, regardless of residence at the time of the transfer. This applies to income from 1996 regardless of the date of the transfer.[97]

49.22 Amount of s.720 charge

49.22.1 *Power to enjoy part of income*

Section 720 ITA provides:

> (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions)...
> (3) Tax is charged under this section on the amount of income treated as arising in the tax year.

Section 721(3B) ITA provides:

> The amount of the income treated as arising under subsection (1) [the amount of s.720 income] is (subject to sections 724 and 725[98]) given by the following rules-
> *Rule 1*
> The amount is equal to the amount of the income of the person abroad if the individual [the transferor]-
> (a) is domiciled in the UK at any time in the tax year, or
> (b) is at any time in the tax year regarded for the purposes of section 718(1)(b)[99] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly domiciled resident[100]].

Rule 2 is a relief for protected s.720 income.[101]

Prior to 2013, s.720 did not tell us *what* is the amount of income treated

[97] Also see 50.15.5 (Transferor non-resident when transfer made; pre-1996 income).

[98] The exceptions referred to in brackets are rarely if ever invoked. They are:

Section	**Topic**	**See**
s.724	Enjoyment condition C	49.22.3
s.725	CFC rules	51.19

[99] See 48.5 (“Person abroad”).

[100] See 5.4.2 (IT/CGT formerly-dom resident rule).

[101] See 92.15 (s.720 protected-trust relief).

as arising. Construction and common sense had to fill the gap.[102] Now we have s.721(3B) but it does not clearly address the problems which arise.

A person may have "power to enjoy" (as defined) over all the income of an offshore person even though their power to enjoy (in the natural sense of that expression) is limited to an unidentifiable part[103] or even none[104] of the income. In such a case T is taxed on all the income. The s.720 income is not limited to the income that T is actually entitled, or able, to receive. Section 721(3B) ITA confirms the pre-2013 law.[105]

However, if T has power to enjoy (as defined) over only part of the income, T is only taxed on the income which T has power to enjoy:

> The only question is: What income of the non-resident does the resident individual have power to enjoy by reason of the transfer either alone or in conjunction with associated operations? It is that income which is deemed to be income of that individual for all purposes of the Income Tax Acts.[106]

It is suggested that s.721(3B) ITA has not altered this.

49.22.2 *Person abroad has other source of income*

Suppose:

(1) T transfers assets to an offshore company.
(2) The offshore company has two sources of income:
  (a) income from the assets transferred by T;
  (b) income from other sources which have nothing to do with T.
(3) T has power to enjoy all the income of the offshore company.

What income is treated as arising to the individual. Is it any income of the person abroad? Or is it only the income which arises as a result of the transfer of assets or associated operations?

The relevant provisions are in s.721:

> (1) Income is treated as arising to such an individual as is mentioned in

[102] See Boyd "Requiem for a Man of Straw" [1980] BTR 442. See also 48.15 (What is income of person abroad?) and 48.16 (The amount of income of person abroad).

[103] eg if T transfers assets to a company in which T holds debentures. If all the income of the company increases the value of the debentures just a little, T has "power to enjoy" all the income within enjoyment condition B.

[104] eg if T has control within enjoyment condition E.

[105] *Howard de Walden v IRC* 25 TC 121.

[106] *Congreve v IRC* 30 TC 163 at p.199.

> section 720(1) in a tax year for income tax purposes if conditions A to C are met.
> (2) Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—
> (a) a relevant transfer,
> (b) one or more associated operations, or
> (c) a relevant transfer and one or more associated operations...
> (3B) The amount of the income treated as arising under subsection (1) is equal to the amount of the income of the person abroad (subject to sections 724 and 725).

RI 201 states:

> It has not been determined by the Courts whether all the income of the overseas person should be assessed, or only the income of that person to the extent that it arose by virtue or in consequence of the relevant transfer of assets and any associated operation(s). It has been the Revenue's practice (since the decision in *Vestey v IRC* 54 TC 503) to assess on the second of these two possible bases.

The Revenue practice is correct, though in fact the issue has been determined by the courts: the view that all the income of the person abroad is taxed was dismissed as "quite ridiculous".[107]

This view is supported by s.714(2) ITA which provides:

> The charges apply only if a relevant transfer occurs, and they operate by reference to income of a person abroad that is connected with the transfer or another relevant transaction.

This clearly rejects the view that all income of the person abroad is caught. It suggests however that the measure of income caught is not that which arises as a *result* of the relevant transfer or associated operation, it is income which arises that is *connected* with the transfer or associated operation. "Connected" is not defined. However, while the wording was perhaps designed to give HMRC scope to take one step back from the position stated in RI 201, I cannot think of a case where it would arise in practice.

[107] Walton J in vehement form in *Vestey v IRC* 54 TC 503 at p.562, followed in *Carvill v IRC* [2000] STC (SCD) 143 at [97] - [98]. The point had been left open in *Howard de Walden v IRC* 25 TC 119. Although the contrary view is suggested in a passing comment in *Fisher* [2023] UKSC 44 at [57] the relevant authorities and arguments were not fully considered.

It is considered that s.721(3B) has not altered this. The reference to "the income of the person abroad" must be taken as a reference to the income within s.714(2).

In *Fisher v HMRC,* following a transfer of a business, the income of the person abroad included income from new businesses developed by the person abroad, to the extent that it derived from the transferred business or associated operations. The new business ventures were associated operations as income from the transferred business was used to finance them. The position was no different than if the profits from the transferred business were invested in shares.[108]

49.22.3 *Quantum: Enjoyment cond. C*

A special rule applies for a transfer who has power to enjoy under enjoyment condition C.[109] Section 724 ITA provides:

> (1) This section applies if an individual has power to enjoy income of a person abroad for the purposes of section 721 because of receiving any such benefit as is referred to in section 723(3) (benefit provided out of income of person abroad).
> (2) Despite anything in section 720, the individual is liable to income tax under that section for the tax year in which the benefit is received on an amount equal to the whole of the amount or value of that benefit.
> (3) But subsection (2) does not apply so far as it is shown that the benefit derives directly or indirectly from income by reference to which the individual has already been charged to income tax for that tax year or a previous tax year under this Chapter [Chapter 2 Part 13, ToA].

This was introduced in 1969 and upsets the reasoning of *de Walden* where repayment of a loan was held to fall within enjoyment condition C. Since the charge is now on the value of the benefit, and the value of a payment for full consideration (such as the repayment of a loan) is nil, there would be no charge under s.720 by reference to enjoyment condition C.

In *Botnar* the Special Commissioners said:

> 245. ... Where the power to enjoy arises the tax is charged not on the income which the taxpayer has power to enjoy but on the value of the benefit. This may bear no relationship whatsoever to the income of the non-resident as long as it originated from it even indirectly. We do not

[108] [2020] UKUT 62 (TCC) at [97] to [102] and the point was not doubted on appeal.

[109] See 49.16.3 (Individual receives benefit).

> accept that [s.724 ITA] only operates where the benefit received in a year exceeds the relevant income.

It is considered that the charge is on the lower of the value of the benefit and the amount of income of the person abroad. The value of a benefit in excess of the income does not come into charge, and if the transferor has power to enjoy the income apart from enjoyment condition C, then this provision does not apply.[110]

The INT Manual provides:

> **INTM600980: Power to enjoy - special rule relating to benefits** [Jan 2023]
>
> [The Manual summarises s.724 and continues:] This provision [s.724] does not apply if it is shown that the benefit derives directly or indirectly from income on which the individual has already been charged to income tax under the transfer of assets provision for that tax year or a previous tax year.
>
> This provision was considered in the case of *CIR v Botnar* (72 TC 205). Although it did not affect the outcome in that case, there is some helpful comment on it. The views expressed there appear to confirm that in the case of actual receipt of a benefit (as opposed to mere entitlement to receive), the provision is determinative of the charge to tax which could produce a radically different result than what might otherwise be the charge under the income charge. Further, that where the power to enjoy arises on this basis, the tax is charged not on the income which the individual has power to enjoy but on the value of the benefit. This may bear no relationship whatsoever to the income of the person abroad as long as it originated from it even indirectly. The Commissioner rejected the view that the provision only operates where the benefit received in a year exceeds the income of the person abroad.
>
> From this, where the conditions are met, the provision may have the effect of increasing the charge for a particular tax year to more than the actual income of the person abroad. This could occur if, for example, the value of the benefit received exceeded the income arising to the person abroad as a result of the transfer. In these circumstances the amount charged would be the value of the benefit received.
>
> Alternatively, if the benefit received in a particular tax year was less than the income arising to the person abroad as a result of the transfer, then the charge would be lower than the income as it would be limited

[110] See Venables, "Section 739 and benefits in kind", OTPR Vol 11 Issue 3 p.1, *http://www.khpplc.co.uk/reviews*

> to the value of the benefit received.

These points only arise where enjoyment condition C is met and other conditions are not met, which in practice only happens rarely if at all. The law would be simpler and more rational if s.724 were repealed. I wonder if it ever applies in practice.

49.22.4 *Transferor deductions/reliefs*

Section 746 ITA provides:

> (1) This section applies for the purpose of calculating the liability to income tax of an individual charged under section 720 or 727.
> (2) For the purpose of determining the deductions and reliefs allowed to the individual, the individual is to be treated as if the individual had actually received the amount by reference to which the income treated as arising to the individual under section 721 or 728 is determined.

The legislation does not identify what deductions and reliefs are applicable. An example might be foreign tax credit relief, which (strictly speaking) would not have been available in the absence of s.746, on the basis that the transferor's s.720 income is not the same as the income of the person abroad.[111]

49.23 Transferor receives capital sum

Section 727 ITA is an independent charging section. It applies, in short, where a transferor receives a capital sum.

Howard de Walden v IRC explains its purpose:

> The provision was made ... to meet devices by which a transferor took care to give himself no "power to enjoy" any income of a non-resident transferee company within the meaning of [s.723 ITA], but obtained the money he required, for example, by borrowing from the company, all the shares being vested (for example) in his children.[112]

The paradigm case is a non-resident trust or underlying company making an (arm's length) loan to a transferor who is excluded from benefit.

Many of the rules applying to s.720 also apply to s.727. In ITA they are set out twice, but I do not discuss them again here.

It is helpful to set out the provisions side by side. The important

[111] See too 47.4 (Settlor deductions/reliefs).
[112] 25 TC 121 at p.135.

differences are underlined:

Power to enjoy: s.720 ITA	**Receipt of capital sum: s.727 ITA**
(1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are UK resident by means of relevant transfers.	(1) [identical]
(2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).	(2) Income tax is charged on income treated as arising to such an individual under section 728 (individuals receiving capital sums as a result of relevant transactions).
(3) Tax is charged under this section on the amount of income treated as arising in the tax year. ...	(3) [identical]
(5) The person liable for any tax charged under this section is the individual to whom the income is treated as arising.	(4) [identical to (5)]
Power to enjoy: s.721 ITA	**Receipt of capital sum: s.728 ITA**
(1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A to C are met.	(1) Income is treated as arising to such an individual as is referred to in section 727(1) in a tax year for income tax purposes if—
(2) Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—	(a) income has become the income of a person abroad as a result of—
(a) a relevant transfer, (b) one or more associated operations, or (c) a relevant transfer and one or more associated operations.	[identical]
	(b) the capital receipt conditions are met in respect of the individual in the tax year (see section 729) , and
(3) Condition B is that the income of the person abroad would be chargeable	[No equivalent but condition B is not important as it is always met.]

to income tax if it were the individual's and received by the individual in the UK.	
(3A) Condition C is that the individual is UK resident for the tax year.	(c) the individual is UK resident for the tax year.
(3B) The amount of the income treated as arising under subsection (1) is (subject to sections 724 and 725) given by the following rules—	(1A) The amount of the income treated as arising under subsection (1) is (subject to subsection (2)) given by the following rules—
Rule 1 The amount is equal to the amount of the income of the person abroad if the individual— (a) is domiciled in the UK at any time in the tax year, or (b) is at any time in the tax year regarded for the purposes of section 718(1)(b)[113] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met formerly-domiciled resident].	*Rule 1* [Identical]
Rule 2 In any other case, the amount is equal to so much of the income of the person abroad as is not protected foreign-source income (see section 721A).	*Rule 2* In any other case, the amount is equal to so much of the income of the person abroad as is not protected foreign-source income (see section 729A).
(3BA) In a case in which rule 2 of subsection (3B) applies, so much of the income of the person abroad as is protected foreign-source income for the purposes of that rule counts as "protected income" for the purposes of section 733A(1)(b)(i).	(1B) In a case in which rule 2 of subsection (1A) applies, so much of the income of the person abroad as is protected foreign-source income for the purposes of that rule counts as "protected income" for the purposes of section 733A(1)(b)(i).
(3C) Subsection (1) does not apply if— (a) the individual is liable for income tax charged on the income of the person abroad by virtue of a charge not	(2A) [identical to (3C) opposite]

[113] See 48.5 ("Person abroad").

> contained in this Chapter [Chapter 2 Part 13, ToA], and
> (b) all that income tax has been paid.

49.23.1 *Nature of s.727 income*

EN ITA Change 111 provides:

> Section 739(3) ICTA [now s.727] does not deem the capital sum to be income; instead, it takes income which has become payable to persons abroad as a result of the transfer and deems that income to be the transferor's.

The amount of the capital sum does not matter. In *Vestey v IRC*:

> It is "any income" of the foreign transferees which is deemed to be the income of the recipient of a capital sum, [*indeed of each and every recipient of any capital sum*,][114] small or large, whenever received. From these words there is no escape.[115]

49.23.2 *s.727/settlor-interested trust overlap*

There is considerable overlap between s.727 and the settlor-interested trust code. Where a settlor receives a capital sum, it is necessary to consider the settlor-interested trust code even if the settlor is excluded.[116] A settlor who is entitled to receive a capital sum may have an interest under the settlement by virtue of that entitlement. But the settlor-interested trust code only applies to income at trust level, not a company level.

49.23.3 *s.720/s.727 overlap*

A transferor who receives a capital sum, may also be within s.720 on the basis that the transferor has power to enjoy. A transferor who is entitled to receive a capital sum may have power to enjoy simply by virtue of that entitlement. So there is considerable overlap between s.720 and s.727. The INT Manual provides:

> **INTM600680 which charge applies?** [Jan 2023]
> It is possible that for the same tax year an individual could meet the

[114] The words in italics are wrong, since s.727 is limited to the transferor; there might conceivably be two transferors who each receive a capital sum.

[115] 54 TC 503 at p.580.

[116] See 47.14 (Settlor receives capital sum).

> conditions to be potentially chargeable under both of the income charge provisions. The 'no duplication of charge' provisions described at INTM602360 ensure that the same income cannot be taken into account more than once for the purpose of an income charge. The result would be that, if the conditions for both charges were in fact met, only one charge would be made.

This was the case even before double-counting relief was enacted in 1981:

> [Sections 720 and 727 ITA] are ... concurrent and not cumulative. A person cannot be taxed in any one year on the same sum under both [s.720 and also s.727]. Like Warren Hastings, the Crown, in making this concession, doubtless stood amazed at its own moderation ... but make it it did.[117]

Before 2017 it was rare for s.727 to apply in a case where s.720 does not, that is, the transferor receives a capital sum without having power to enjoy. So it was rare to have to look at s.727. But this has changed as a result of a mismatch between the s.720/727 protected income rules.[118]

49.24 Capital receipt conditions

Section 729(1) ITA provides:

> For the purposes of section 728(1), the capital receipt conditions are met in respect of the individual in a tax year ("the relevant year") if—
> (a) either—
> (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
> (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer, and
> (b) the payment of that sum is (or, in the case of an entitlement, would be) in any way connected with any relevant transaction.

It is considered that "entitled to receive" requires a present entitlement and not a contingent or future entitlement. A person is not "entitled to receive" a sum until it is due. So if a transferor lends to a person abroad, on terms that the loan is repayable on a fixed date, the capital receipt

[117] *Vestey v IRC* 54 TC 503 at p.556.

[118] See 92.16 (s.727 protected-trust relief).

condition is not met before that date.[119] But if the debt is repayable on demand, the transferor is entitled to receive it even if they have not formally demanded it: a notice of demand is a merely administrative matter.

49.24.1 *Receipt by third party*

Section 729(4) ITA provides:

> For the purposes of subsection (1), a sum is treated as a capital sum which the individual ("A") receives or is entitled to receive if another person receives or is entitled to receive it—
> (a) at A's direction, or
> (b) as a result of the assignment by A of A's right to receive it.

49.24.2 *"Capital sum"*

The term "capital sum" is used here and in the settlor-interested trusts code. The definitions are (more or less) the same so it is convenient to consider them both here.

ToA: 729(3) ITA	**Settlor-interested trust: s.634(1) ITTOIA**
In subsection (1) "capital sum" means—	In this Chapter "capital sum" means—
(a) any sum paid or payable by way of loan or repayment of a loan, and	(a) any sum paid by way of loan or repayment of a loan, and
(b) any other sum paid or payable— (i) otherwise than as income, and (ii) not for full consideration in money or money's worth.	(b) any other sum which— (i) is paid otherwise than as income, and (ii) is not paid for full consideration in money or money's worth.[120]

This is an artificial definition, and it should perhaps be written with initial capitals, to reflect the technical nature of the expression.

If a person lends to T, T receives a capital sum. If T lends to a person, repayment of the loan to T is a capital sum. But loan is not defined and

[119] So in the definition of control, express provision is needed to deal with this; see 104.3.11 ("Entitled to acquire"). But an individual with a contingent or future entitlement may have power of enjoyment; see for instance 49.16.2 (Income increases value of asset).

[120] There are further rules in s.634 ITTOIA which are not discussed here.

has been given its strict meaning here.[121]

If T sells an asset at market value, leaving the purchase price outstanding, subsequent payment of the purchase price to T is not a capital sum, as defined, as:

(a) There is no loan
(b) There is full consideration

HMRC agree. The INT Manual provides:

> **INTM601060: Examples of capital sum** [Jan 2023]
> ... **Examples of situations where there may not be a capital sum for the purpose of this charge**
> - an individual transfers assets to a person abroad for full consideration and leaves the cost of the assets credited to his account with that person; the unpaid purchase money will not normally [?] be regarded as a loan following the decision in *Ramsden v CIR* (37 TC 619); however, although the capital sum test may not be met for the purpose of this income charge, the presence of an account with a person abroad to which sums are credited may be indicative of that individual having the power to enjoy income, for example as in the *Ramsden* case through [Enjoyment] Condition B in INTM600900.
> - promissory notes or debentures payable on demand are issued to the individual as part of the consideration for the transfer of assets; the amount payable under the notes, not being payable by way of loan and being payable for full consideration, is unlikely [?] to be a capital sum for this purpose, as was found in the case of *Lee v CIR* (24 TC 207); however, as discussed at INTM600900, such an issue of promissory notes may give rise to a power to enjoy the income of the person abroad and bring the individual within that income charge.

It is considered that the context shows that the expression "sum paid" should be construed broadly and includes transfer of an asset.[122]

In *Botnar v IRC* the Special Commissioners say:[123]

> In our judgment the entitlement to use the flat is not a capital sum within the definition in [s.729(3)]; in particular we hold that the

[121] See App.2.5 (Loan). The reader may wonder if the a Court today would have reached the same conclusion. But fortunately the doctrine of precedent means that the issue is not likely to arise.

[122] See 15.2.3 (Payment: WHT, PAYE).

[123] 72 TC 205 at p.266.

> entitlement to use was not a "sum" within any normal use of English.

The INT Manual provides:

> **INTM601060: Examples of capital sum** [Jan 2023]
> **...Other examples of situations where there may be a capital sum for the purpose of this charge**
>
> - the situation where an asset is transferred to a person abroad at an inflated price; where an individual transfers an asset and receives full consideration in money or money's worth, even though by general nature that consideration may be a 'capital' receipt, it would not be a 'capital sum' for the purpose of these provisions because of the specific wording in the legislation defining the meaning of the term for this purpose; hence it is only where an inflated price is received that there could be a capital sum for this purpose.
> - a capital distribution from a foreign company; a foreign company may, under the law of the jurisdiction in which it is established, be able to make a so-called 'capital distribution'; where such a distribution received by the individual is found in fact not to be an income receipt, and so satisfies the condition to be any other sum payable otherwise than as income, it can be a capital sum for this purpose; in considering whether any such payment or entitlement from a 'foreign possession' (the shareholding that results in the payment), is a capital sum, due regard must be had to UK tax law dealing with 'income' from foreign possessions.

These are indeed examples of a capital sum, but in each case the transferor would also have power to enjoy, and so s.720 would also apply.

49.24.3 *Connected with transfer*

The capital receipt conditions are only met if (in short) the payment of the capital sum is "in any way connected" with the transfer of assets abroad (or associated operations). I refer to this as the **"connection requirement"**.

"Connected with" is of course a broad expression.[124] The words "in any way" do not strictly add anything, but they show that the words are not to be construed narrowly.

In *Fynn v IRC*:[125]

(1) In 1948, T transferred assets ("the original assets") to an Irish

[124] See App 2.4.2 (In connection with).

[125] 37 TC 629.

company ("the original transfer").
(2) The company charged the assets for a debt ("the charge").
(3) In 1952/53, T lent the company £12,000 ("T's loan").

T was assessed on the income accruing to the company in 1951/52 and 1952/53 under (what is now) s.727.[126]

During those years T was entitled to receive a capital sum (repayment of T's loan). However, the (hypothetical) payment of that sum was not "connected" with the original transfer or the charge (an operation associated with the original transfer). So the connection requirement was not satisfied, so the capital receipt conditions were not satisfied, and s.727 did not apply.

Suppose the same facts but the loan were repaid out of the original assets. In that case T actually receives a capital sum, and the actual receipt is connected with the original transfer; so it is considered that the capital receipt condition would satisfied. (This did not happen in *Fynn*: T wisely released the loan, two years after it was made.)

The definition of capital sum is the only place where the expression "connected with" is used in the ToA provisions (though the definition of associated operations uses the comparable expression "in relation to" and it is suggested that the meaning is the same).

49.24.4 *Loan to transferor*

Section 729(2) ITA provides:

> But subsection (1)(a)(ii) does not apply merely because of the receipt of a sum by way of loan if the loan is wholly repaid before the relevant year begins.

This applies, in short, where:
(1) A person abroad lends to the transferor (T)
(2) The transferor repays the loan

The INT Manual provides a straightforward example:

> **INTM601040 Meaning of capital sum** [Jul 2023]
> ... Example
> In years 1 to 4 income arises to a person abroad as a result of a relevant transfer by an individual. The individual does not have any power to

[126] These facts raise interesting s.720 issues, which were not discussed in the case; see 49.19 (Power to enjoy: Causation).

> enjoy the income or entitlement to a capital sum, but in year 2 receives a loan. In year 3 the loan is repaid in full, and there is no ongoing entitlement to further loans or other capital sums. In these circumstances there would be an income charge in years 2 and 3.
>
> There would also be an ongoing charge for year 4 but for the proviso above relating to repayment of a loan, where that is in effect the only feature that triggers the income charge - receipt of entitlement to capital sums.

49.24.5 *Loan to person abroad*

The capital receipt condition in s.729(1) (so far as relevant) requires that:

> either—
>
> (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
>
> (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer

The condition in (a) is satisfied in a year if the individual receives *or is entitled to receive* a capital sum in that year. The condition is satisfied in a year if the individual received a capital sum in an earlier year.

The condition is not satisfied if:

(1) the individual was entitled to receive a capital sum in an earlier year but

(2) the entitlement has ceased[127] and the individual did not actually receive anything.

This was deliberate. EN ITA Change 111 provides:

> But the wording of section 739(3) of ICTA [now s.727] leaves the timing of the charge rather unclear. It reads:
>
> > Where, whether before or after any such transfer, such an individual receives or is entitled to receive any capital sum …
>
> Section 739(6) ICTA [now s.729(2) ITA] provides that income is not deemed to be the individual's under section [727] for any tax year "by reason only of his having received a sum by way of loan if that sum has been wholly repaid before the beginning of that year".[128] Therefore income may be deemed to be the individual's in other cases where there

[127] An assignment by the transferor does not count: see 49.24.1 (Receives or entitled to receive).

[128] See 49.24.4 (Loan to transferor).

> has been an actual receipt of a capital sum in a previous tax year. But [the source legislation] makes no provision about whether section [727] imposes a charge if the individual was merely entitled to receive a capital sum in a previous tax year. In practice, where entitlement to a capital sum has ceased HMRC do not pursue further liability under section [727]. Section 729 ITA gives effect to this practice by providing that the individual must either receive or be entitled to receive a capital sum in the tax year or have received a capital sum in an earlier tax year.

However it must be rare that a transferor is entitled to receive a capital sum without ever receiving a capital sum. An example would be if a transferor lent money to the person abroad and later waived the right to repayment.

The INT Manual considers the position of a loan from the individual to the person abroad:

> **INTM601040 Meaning of capital sum** [Jul 2023]
> ... It is not only the receipt of a loan by an individual that is a capital sum. The making of a loan by an individual to a person abroad can also satisfy this meaning, as it carries with it the entitlement to repayment. This entitlement would be an entitlement to a capital sum, and thus the condition would be met from the time that the loan is made to the person abroad. Any repayment of such a loan would itself be the receipt of a capital sum by the individual. This capital sum is not itself a loan and consequently ITA07/S729(2) does not apply (as this only applies to loans to the transferor), and so the repayment of the loan by the person abroad will not in itself stop the income charge from running in the years following repayment.

49.25 Time extent of s.727 charge

49.25.1 *Historic income*

It can happen that at one time the capital receipt conditions are not satisfied, and later they become satisfied. A simple example would be if the person abroad makes a loan to the transferor who is otherwise excluded from benefit: until the loan is made the transferor may not have received (or been entitled to receive) a capital sum; but on making the loan, the transferor does receive a capital sum so the capital receipt conditions become satisfied at that time.

A transferor who receives a capital sum is not taxed under s.727 on income arising to the person abroad in a year before the year that the capital receipt conditions are satisfied ("historic income"). Section 727 is not in that sense retrospective. In *Vestey v IRC*:[129]

> While the income of the non-resident trustees would be deemed to be the income of [the taxpayer] on her receipt of the £100,000 [capital sum] on 2 May 1966, *in that and subsequent financial years*, I see nothing in [s.727] which gives it retrospective effect. It does not provide that the income of the non-resident in any year before the person receives or is entitled to receive is to be deemed to be that person's income.

HMRC agree. The INT Manual provides:

> **INTM600660 General conditions: entitlement to capital sum** [Jul 2023]
> ... It should be noted that no liability can arise under this charge for a tax year before receipt or entitlement to a capital sum.

The alternative views would not be workable:

(1) In theory, s.727 might apply so that the historic income should retrospectively be deemed to be income of the transferor in the year that the income actually arose. That would require an unlimited number of past years to be reopened.

(2) In theory, s.727 might apply so that the historic income should be deemed to be the income of the transferor in the year of the receipt of the capital sum. That would still require all the past years of the person abroad to be reviewed. There is also the conundrum of how to treat income arising to the person abroad if the transferor was not UK resident during some of those years.

The rule that historic income is not taxed explains why the capital receipt conditions are satisfied if a transferor wh has no power to enjoy is merely entitled to receive a capital sum, even though they have not actually received anything. The application of s.727 makes sense here because on the subsequent (actual) receipt of the capital sum, the historic income would not otherwise be caught.

Walton J proposed a sensible solution to this issue in *Vestey* at first instance. He said that the charge under s.727 should limited to the amount of the capital sum. This view was rejected by two judges in the House of Lords who commented on the point.[130] However it remains arguable, as

[129] 54 TC 503 at p.594.

[130] See the comment of Lord Wilberforce set out in 49.23.1 (Nature of s.727 income).

the comments in *Vestey* were not necessary for the decision and so were not binding, the approach to statutory construction is now more purposive, and the problems which arise were not explored.

49.25.2 *Present and future income*

The s.727 charge applies to income arising in the year in which the capital receipt condition is met. Once that condition is met in one year, it is generally met in all future years, so s.727 in principle applies to the income of the person abroad in the year that the capital receipt condition is first met and all future years.

There are two narrow exceptions to this rule:

(1) a loan to the transferor which the transferor has repaid.[131]
(2) a loan to the person abroad which the transferor later waives.[132]

In general, therefore, the capital receipt conditions are met in a year if the transferor has received a capital sum in an earlier year.

HMRC agree. The INT Manual provides:

> **INTM600660 General conditions: entitlement to capital sum** [Jul 2023]
> ... But where there is such a receipt or entitlement, liability continues for any subsequent year for which there is income (there need be no further receipt of a capital sum). However, if entitlement to a capital sum completely ends and there are no other grounds for an income charge, liability under this charge will not normally be extended beyond the tax year in which that entitlement ceases.
> Where this charge applies for the first time, it is the whole of any income of the tax year that is potentially chargeable, not merely income arising from the date of receipt or entitlement to the capital sum. The same is the case for any tax year where entitlement to ends; the whole of any income of the tax year is potentially chargeable.

This seems harsh, but it makes sense, because once a transferor who has no power to enjoy has received one capital sum, it is reasonable to assume that they may receive more. Without this rule, income of the person abroad arising after the first capital sum, but before the second, would not otherwise be caught.

The position is different if a transferor who *does* have power to enjoy

[131] See 49.24.4 (Loan to transferor).
[132] See 49.24.5 (Loan to person abroad).

receives a capital sum. The receipt of the capital sum does not give rise to any charge under s.727 since all the income is taxed as the transferor's anyway. Suppose the transferor is subsequently excluded from benefit and ceases to have power to enjoy.

It has been suggested in these circumstances that all future income arising in the company will be deemed to be that of the unfortunate transferor. That would be absurd. In editions up to 2023 I said: "In practice HMRC do not take that point." But HMRC now float the possibility in a paragraph added when the former draft guidance was published in 2023. The INT Manual provides:

> **INTM600680 which charge applies?** [Jan 2023]
> ... It makes little practical difference which one of the two charges is assessed. For example, in a year when both provisions applied, the income may be assessed on the basis that the individual had power to enjoy. But in a future year, perhaps the power to enjoy conditions no longer applied, such that the income charge under ITA07/S720 was not applicable. If the income could continue to be assessed for later years under the capital sum conditions, the income would continue to be assessed but under ITA07/S727.

It is suggested that s.727 does not normally apply in a situation where s.720 applies, so a capital sum received at that time should be disregarded. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the income of future years.

The same problem arises if:

(1) Trustees hold a company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
(2) The transferor receives a capital sum.
(3) The trustees then sell the company to a third party.

It has been suggested that all future income arising in the company will be deemed to be that of the unfortunate transferor (though they may not have a right to know what that income will be). That would be absurd. In practice HMRC do not take that point."

It is suggested that s.727 does not normally apply in this situation. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the company's future income.

49.26 s.720 remittance basis

Section 726(1) ITA provides:

> This section applies in relation to income treated under section 721 as arising to an individual in a tax year ("the deemed income") if section 809B, 809D or 809E (remittance basis) applies to the individual for that year.

I call this the "**s.720 remittance basis**".

For clarity I gloss the expression "deemed income" as "deemed [s.720] income".

Section 726(2) ITA defines the term "foreign" deemed income:

> For the purposes of this section the deemed [s.720] income is "foreign" if (and to the corresponding extent that) the income mentioned in section 721(2) [the income of the person abroad[133]] would be relevant foreign income if it were the individual's.[134]

49.26.1 *The relief*

Assuming the condition in s.726(1) is met, and armed with these definitions, we move on to the relief. Section 726(3) ITA provides:

> Treat the foreign deemed [s.720] income as relevant foreign income of the individual.

Section 720 income is fictional income distinct from the actual income of the person abroad. Since fictional income cannot be remitted, the remittance basis would not work. So s.726(4) ITA provides:

> For the purposes of chapter A1 of part 14 (remittance basis), treat so much of the income within section 721(2) as would be relevant foreign income if it were the individual's as deriving from the foreign deemed [s.720] income.

In short, the remittance basis applies as if the income accruing to the person abroad were the income of the transferor. There is a tax charge if the income of the person abroad is received/brought/used in the UK by the transferor or by a relevant person (in relation to the transferor).

It is desirable for trusts and companies within s.720 to segregate (1)

[133] See 49.14 (Condition A: Power to enjoy).

[134] For the reason for the wording ("would be RFI if it were the individual's"), see 16.9.3 (Relevant foreign income).

foreign income and (2) capital. They can then remit capital (IT-free) rather than income (chargeable at IT rates). If they fail to do so then the mixed fund rules will apply.

49.26.2 *When is s.726 needed?*

It will be unusual to need the s.720 remittance basis, from 2017/18, because in most cases where the conditions for the s.720 remittance basis are met, s.720 protected-trust relief will be or at least could be available.[135] The s.720 remittance basis is still needed where protected-trust relief is not available. The most common case is where income arises to a company abroad in which T has a direct interest (in short, the company is not held in a trust).

49.26.3 *Remittance in split year*

Section 726(5) ITA provides:

> In the application of section 832 of ITTOIA 2005 to the foreign deemed [s.720] income, subsection (2) of that section has effect with the omission of paragraph (b).

The significance is that (contrary to the usual rule) s.720 income is taxable if it is remitted during the overseas part of a split year.[136]

There is no good reason for that.[137] The s.720 remittance basis ought to operate in the same way as for ordinary foreign income. But the point will not often arise.

49.26.4 *Payment of s.720 income to transferor when non-resident*

Suppose:

(1) Year 1: Income ("company income") accrues to a company within s.720.

Tax analysis: In practice the company income will often be protected s.720 income, so s.720 does not apply and no issue arises. But assume for the purposes of the example that the company income is not protected s.720 income (eg the company is not held in a trust, or, perhaps, the trust is tainted). So the transferor ("T") receives s.720 income ("T's s.720 income). Assume that T's s.720 income is (un)taxed under the s.720

[135] See 92.15 (s.720: Protected-trust relief).

[136] See 17.13.1 (Remittance in split-year).

[137] The same (unfair) rules applies for s.731: see 50.39.3 (Remittance in split year).

remittance basis.

(2) Year 2:
   (a) T becomes non-resident.
   (b) The company distributes its income by way of dividend ("the company dividend"; similar points arise if the distribution is by way of liquidation).

Tax analysis: Because the company dividend is received in a non-resident year, it is not taxed on receipt.

(3) Year 3:
   (a) T becomes UK resident.
   (b) T remits the company dividend to the UK.

Tax analysis: In practice the company dividend will often be taxed at this point as TNR income. But assume for the purposes of the example that T is not caught by the TNR rules (eg T is not a temporary non-resident, not having been in the UK for four of the previous seven years).

The question then is whether the dividend received in the UK in year 3 constitutes a remittance of the s.720 income of year 1. Is the dividend which the individual received derived from the s.720 income? The answer is that the dividend received is derived from the income of the person abroad, and so is taxable on receipt in the UK in year 3.[138]

In short, one cannot "wash" income taxable on the s.720 remittance basis by a distribution to T in a year of T's non-residence. That view fits the object of s.720 which is to put the transferor in the same position as if they had not made the transfer: see 49.2 (Purpose of transferor charge).

49.26.5 *Pre-2008 s.720 income*

In the following discussion I use the term **"pre-2008 s.720 income"** to mean foreign income arising before 6 April 2008, which

(1) fell within s.720 ITA or its predecessor, s.739 ICTA, but
(2) qualified for relief under s.726 (in its 2007/08 form), or its predecessor, s.743(3) ICTA, a kind of remittance basis which in earlier editions of this work I called "the foreign domicile defence."

There was no tax charge when the income arose if it was not received in the UK.

[138] See s.726(4) discussed at 49.26 (s.720 remittance basis). This seems even clearer if one remembers that distribution relief would be available, had the dividend in fact been taxable; see 51.5 (Distribution relief).

Before 2008/09 it is considered that there was no charge under these sections if such income was received outside the UK but later brought to the UK. This was so whether the income was brought to the UK by:

(1) the person abroad who received it; or
(2) the transferor (if they received the income outside the UK from the person abroad).[139]

Para 170 schedule 7 FA 2008 provides:

> The amendments made by paras 161 to 179 have effect for the tax year 2008-09 and subsequent tax years.

Pre-2008 s.720 income remitted after 2008/09 is not caught by s.726 in its current form, as the condition in s.726(1)(a) is not met.[140] So there is still no charge on the remittance of pre-2008 s.720 income. This is right and fair, since there was no charge on remittance before 2008. However (given the retrospective operation of some other 2008 reforms) this may have been an oversight. A passage in the TAH suggests its author thought that pre-2008 s.720 income is taxable on remittance after 6 April 2008.[141] But it seems to me that this is clearly wrong.

Pre-2008 s.720 income may also qualify for relief as "transitionally protected income".[142]

[139] See *Taxation of Foreign Domiciliaries* 6th ed para 16.14 (s.720 foreign domicile defence). There were good reasons for this: see *Taxation of Foreign Domiciliaries* 6th ed para 14.12 (Critique of s.648 clawback). Needless to say, no reason was given for changing the position.

[140] Contrast the usual RFI remittance basis, where para 83 sch 7 FA 2008 fills that gap: see 17.16.1 (Pre-2008 RFI/gains).

[141] TAH para 1224 provides:

> "The provisions described in TAH 1223 [including the current s.720 remittance basis] have effect for the tax year 2008-09 and subsequent years. There are no specific transitional arrangements for introduction of the new provisions. As the [s.720] income charge only looks at income arising to the person abroad in the tax year it should not be necessary to have regard to income of earlier years in determining whether there is an amount that is to be regarded as foreign deemed income. However if there is foreign deemed income then in considering any possible charge under Part 8 ITTOIA it will be appropriate to consider all sums remitted to the UK in the tax year even if they arise, for example, from income of periods prior to the introduction of these provisions. Those remittances will fall to be tested against the rules in Chapter A1 Part 14 ITA 2007 as to whether they are taxable remittances."

[142] See 92.15.3 (Pre-2017 s.720 income).

49.26.6 *s.720 income 2005-08*

In the following discussion I use the term "**2005-2008 s.720 income**" to mean foreign income arising in the years 2005/06 to 2007/08 (inclusive), which fell within (what was then) s.739 ICTA.

TAH para 1222 records the bizarre view that ITTOIA absent-mindedly abolished the foreign domicile defence, formerly in s.743(3) ICTA, so that in the years 2005-2008, s.720 income was always charged on an arising basis:

> Following the Tax Law Rewrite [ITTOIA] new and separate charging provisions were introduced for all types of foreign income replacing the general charge under what was Case IV/V of Schedule D. The new provisions, included in ITTOIA, also provided, on a claim, an alternative basis for calculating certain income categorised as 'relevant foreign income' and the amount on which an individual would be taxed.
> From the introduction of ITTOIA non-UK domicile status could impact this relevant foreign income and resulted broadly speaking in the income subject to the claim being taxed only when received in the UK.
> Apart from minor adjustments consequential upon the introduction of ITTOIA the transfer of assets provisions giving exclusion from charge for certain income of non-UK domiciled individuals remained largely unchanged. However the exclusion [s.743(3) ICTA] was only for income that would not be chargeable to tax on the basis of domicile status alone.
> It could be argued that following the new charging provisions brought into effect by ITTOIA, which carried no distinction on the basis of domicile, that from 6 April 2005 there was no such income that fell to be excluded on the basis of domicile under the transfer of assets provisions.

I have not come across any reference to this argument before the publication of the TAH in 2009, nor do HMRC say expressly whether they regard it as correct. I find it hard to imagine that anyone could take the argument seriously. But in practice the point is academic as HMRC will not usually take any notice of it:

> However the introduction of ITTOIA was not intended to change the law under transfer of assets in this way and as a result HMRC continues to operate the income charge provisions in this interim period in the same way that they were operated prior to April 2005, subject to cases where there appears to be manipulation of the interaction of the new provisions.
> Where you identify a case that appears to involve manipulation refer it to the Transfer of Assets Technical Adviser in CAR (Residency)

Offshore Personal Tax Team.

The years 2005-2008 are (in short) out of time to assess. But the point is not entirely academic, as there will be UK resident individuals who were remittance basis taxpayers in those years, and whose 2005-2008 s.720 income is still held offshore. If the argument were actually right, so that income was by law taxed on an arising basis, without any foreign domicile defence, then HMRC could not assess the income in a subsequent year when it was remitted. One could envisage circumstances when taxpayers would want to raise the argument. Similar issues would arise in relation to the s.624 remittance basis. However I doubt if these wider ramifications of the argument will ever need to be considered.

49.27 s.720/s.624 interaction

Section 721(3C) ITA provides:

> Subsection (1) does not apply if—
> (a) the individual [the transferor] is liable for income tax charged on the income of the person abroad by virtue of a charge not contained in this Chapter [Chapter 2 Part 13, ToA], and
> (b) all that income tax has been paid.

If a settlor/transferor creates a non-resident settlor-interested trust, the charge on trust income is under s.624 ITTOIA, which has priority over s.720 which might otherwise apply.[143] That matters as s.624 confers a statutory tax indemnity,[144] which s.720 does not.[145]

[143] Section 721(3C) is not strictly needed, because under s.624 the income arising under the settlement is the income of the settlor and of the settlor alone. Thus the person abroad (the non-resident trust) does not have any income. So the position was the same even before the enactment of s.721(3C) ITA. The point is now of historical interest only, but if authority is needed for years prior to 2013, the point is confirmed in *Dunsby v HMRC* [2020] UKFTT 271 (TC) at [173].
HMRC do not seem to agree. The INT Manual provides:

> **INTM600940: Power to enjoy - condition D** [Jan 2023]
> This power to enjoy and with it the income charge can apply notwithstanding that income arising to the trustees of a settlement may be deemed to be that of the settlor under the Settlements Legislation, (Chapter 5, Part 5 ITTOIA 2005). See INTM602360 where more than one set of charging provisions may appear to apply in relation to the same income.

[144] See 101.2 (Settlor trust-tax indemnities).

[145] The 2018/19 edition considered the position previous to s.721(3C) but I omit that here as it is now of historical interest only.

Dunsby v HMRC[146] considered the position if the settlor and the transferor were different persons:

(1) G (settlor), a non-resident, created a settlor-interested trust and (UK source) income was treated as arising to her under s.624; and
(2) T (the transferor) had power to enjoy the income.

In these circumstances s.720 could apply. It seems straightforward: T has power to enjoy income of a person abroad (namely G). T would enjoy the usual transferor's credit for tax paid by G.

49.28 No indemnity for transferor

The transferor has no indemnity against the person abroad for tax paid under s.720:

(1) There is no statutory indemnity.[147]
(2) There is no indemnity under English (common law) principles of restitution (even assuming, in the transferor's favour, that the English court has jurisdiction, or that the relevant jurisdiction applies similar principles).

49.29 Tax return: s.720 income

S.720 income is returned in boxes 10-13 in the Foreign pages (form SA106) 2022/23. The rubric to these boxes is "Dividend income received by a person abroad" and "All other income received by a person abroad and any remitted 'ring fenced' foreign income".

SA106 Notes 2022/23 provides:

> ***Dividends and all other income received by a person abroad***
> **Boxes 10 to 13**
> You may need to fill in boxes 10 to 13 if you transferred or have taken part in the transfer of assets so that a person abroad received income. Put all items chargeable as income under the transfer of assets provisions in this section.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from Non-Resident Trusts - 2021) provides:

[146] For the facts of this case, see App.2.2.7 (Pre-arrangement steps).

[147] The absence of a statutory indemnity is sensible, as an indemnity would not be appropriate in all the circumstances where s.720 might apply.

> **Reporting income**
>
> Unless you're completing box 46 [the motive defence box[148]] on page F6 of the 'Foreign' pages' report the amount of income as follows:
>
> - enter in box 11 on page F3 of the 'Foreign' pages details of all dividends received on which you are chargeable including any allowable foreign tax credit
> - enter in box 13 on page F3 of the 'Foreign' pages all other income including any tax paid on that income
>
> You should enter details of the relevant transactions that have given rise to the income, and the offshore structures involved, in the 'Any other information' box, box 19 on page TR 7 of your tax return.
>
> You should enter all income that's chargeable to tax under the transfer of assets provisions at boxes 11 and 13 of the 'Foreign' pages, not in the corresponding boxes elsewhere in the return for the type of income involved. For example, if interest income arose to a foreign company and that income is treated as yours under the transfer of assets provisions, then you should enter the income at box 13, not in the relevant boxes for interest.
>
> If you are non-UK domiciled and the income arising to the person abroad is not 'protected foreign income' (see the section on Trust Protections and Protected Foreign Income) you have to report the income arising to the person abroad exactly as described above. There is, however, an exception for this if the remittance basis applies or has applied to you.

This reflects the rule that s.720 income is distinct from the income of the person abroad. Boxes 11 and 13 make sense, but I am not sure what boxes 10 and 12 are for.

49.30 DT relief: s.720 income

49.30.1 *Foreign tax credit relief*

Where income of the person abroad is subject to foreign tax, foreign tax credit relief in principle applies for the benefit of the transferor.

HMRC Helpsheet HS262[149] provides:

[148] See 52.33.1 (When disclosure required).

[149] Income and benefits from transfers of assets abroad and income from Non-Resident Trusts (2024) updated 6 April 2024 *https://www.gov.uk/government/publications/income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-hs262-self-assessment-helpsheet/hs262-income-and-benefits-from-transfers-of-assets-abroad-and-incom*

> **Tax paid on the income**
> If you are claiming relief for foreign tax, and you want to claim Foreign Tax Credit Relief (FTCR)(read page FN3 of the 'Foreign' notes), enter the following on the schedule:
> Column A — Country or territory code
> Column B — Amount of income arising or received before any tax is taken off
> Column C — Foreign tax taken off or paid
> Column E — That you wish to claim FTCR and the rate of tax allowed (read page FN3 of the 'Foreign' notes)
> Column F — Amount included in boxes 11 and 13, which should be the amount arising before any tax is taken off
> If you do not want to claim FCTR for foreign tax, do not make an entry in Column E. The amount you include in boxes 11 and 13 should be the income after foreign tax.

49.30.2 *Person abroad treaty non-resident*

This section considers whether third-party DT relief is available where:

(1) Income accrues to a person abroad who is treaty-resident in a foreign state.
(2) The transferor is UK tax-resident and not treaty-resident in a foreign state.
(3) The transferor is in principle subject to tax under s.720.[150]

Under the pre-ITA wording, I think the generally held view among practitioners was that s.739 ICTA deemed income of the transferor was the same as the income of the person abroad. It followed that the transferor could in principle claim DT exemptions provided that the income qualified for the relief. The same applied under ITA in its pre-2013 form. However HMRC took the opposite view, which was upheld, rightly or wrongly, in *Davies v HMRC,*[151] so the pre-2013 law is now

e-from-non-resident-trusts-2024

[150] Similar points apply to s.727; see 49.23.1 (Nature of s.727 income).

[151] [2020] UKUT 67 (TCC) at [78]:

> "The transfer of assets abroad provisions deem the profits of ABP to be the income of the Appellants and then charge the deemed income of the Appellants to tax. However, those provisions charge the income to tax as income of a miscellaneous character and not as trading profits arising 15 to the Appellants. The Appellants are not relieved against that tax under Article 7 of the Treaty because the UK is not taxing the profits of ABP but is taxing something different,

settled.[152]

The 2013 changes were intended to ensure that the s.720 income of the transferor was not the same as the income of the person abroad. So it is now clear that the transferor does not qualify for third-party treaty relief.[153]

EN FB 2013 provides:

> 25.New subsection 721(3A) clarifies that the income that is treated as arising to the individual in subsection 721(1) is not the income that the individual abroad receives, but an amount that is equal to it...
> 57. ... a change that clarifies[154] how the transfer of assets rules operate in relation to reliefs under double taxation agreements. This will make it clear that neither a treaty provision nor the transfer of assets legislation can allow a relief that would not otherwise be due.

In addition, the Savings Clause would now disapply treaty relief, by a more direct and satisfactory route.[155] But that solution, implemented by the BEPS MLI, was not available in 2013.

49.30.3 *Transferor treaty non-resident*

This section considers whether DT reliefs are available where:

(1) Income accrues to a person abroad who is not treaty-resident in a foreign state

(2) The transferor is UK-law UK resident but treaty-resident in a foreign state

namely, the deemed income of the Appellants. It is nothing to the point that the deemed income of the Appellants is computed by reference to the profits of ABP. It remains the case that the deemed income of the Appellants is not the profits of ABP; 20 and it remains the case that the trading profits of ABP are taxed by Mauritius and not by the UK."

[152] See 109.4.2 (Characterisation: Courts view). See too 91.7.8 (s.624/720 income; s.3/86 gain).

[153] See 109.1 (Third-party DT relief).

[154] The "clarification" constituted a change in the law, at least as most practitioners understood it to be at the time. But there is a long tradition of misdescribing substantial tax changes as clarification; see App.1.2 (Clarify/modernise/reform). The rewriting of the ToA rules required to achieve the "clarification" has left the statutory wording more complicated, and difficult to follow. Since the object was simply to deny DT relief where the person abroad was treaty non-resident, why did the drafter not just say so? The reasons were, perhaps, to support the HMRC view that that was the position before 2013, and, perhaps, to disguise a treaty breach. But all this is now of historical interest only.

[155] See 109.5 (Savings Clause).

(3) The individual is in principle subject to tax under s.720.

Can the transferor claim DT exemptions? On the basis that s.720 income is distinct from the income of the person abroad, the transferor may do so under the "Other Income" article, regardless of the type of income which accrued to the person abroad; even if, say, the income of the person abroad is of a type which would not normally qualify for DT exemption, such as UK source property income.[156]

In some treaties, the "Other Income" exemption only applies if the income is "beneficially owned" by the transferor. The point is the same as for s.624.[157] Section 720 income is not "beneficially owned" by the transferor as a matter of property law. But since for tax purposes it is deemed to be the income of the transferor, this requirement is deemed to be satisfied.

In the US/UK DTA, this is expressly dealt with: see 91.7.8 (s.624/720 income; s.3/86 gain).

[156] See 50.61.2 (Individual treaty-resident outside UK); 33.20 (DT relief: "Other Income").

[157] See 47.18.3 (Settlor treaty-resident outside UK).

CHAPTER FIFTY

TRANSFER OF ASSETS ABROAD: BENEFITS

50.1 s.731 charge/s.731 income
50.2 s.731 application conditions
50.3 Relevant transfer condition
50.4 Benefit
50.4.1 Full consideration/arm's length
50.4.2 Conferring equitable interest
50.4.3 Sale of equitable interest
50.4.4 Sale of company within s.731
50.4.5 Benefit on termination of trust

50.1 s.731 charge/s.731 income

This chapter considers the IT charge under s.731 ITA.

Section 731(1) ITA imposes the charge to tax:

> Income tax is charged on income treated as arising to an individual under section 732 (individuals receiving a benefit as a result of relevant transactions).

In this book "**s.731 charge**" is the charge under this section. The INT Manual calls it "the benefits charge".[1]

Statute frequently refers to:

> income treated as arising under s.732[2]

I refer to this as "**s.731 income**"**.** (It might be called "s.732 income" but the charge is under s.731.) Statute sometimes uses the term "deemed income" which I gloss as "deemed [s.731] income".

50.2 s.731 application conditions

The s.731 charge applies if income is treated as arising under s.732, to which we turn as the second stage of our journey. Section 732(1) ITA begins:

> This section applies if—

Five conditions then follow, which I call "**s.731 application conditions**". The conditions are as follows:

> *(a) a relevant transfer occurs*

I call this the "**relevant transfer condition**".

> *(b) an individual receives a benefit in a tax year*

I refer to the individual as the **"individual [beneficiary]"**.

[1] A note on terminology: The s.731 charge is not the only ToA charge on benefits, but it is the principal one. So the accurate label would be **"s.731 benefits charge"**. I abbreviate that to "s.731 charge". This is not a transparent label, but there is no short descriptive label which does justice to the complexities of this charge.
I formerly described the s.731 charge as the "non-transferors charge", because it applied to individuals other than the transferor. From 2017 the charge may also apply to the transferor, so this label ceased to be apt.

[2] Occasionally the wording is: *Income treated under section 732 as arising...*

> *(c) the benefit is provided out of assets which are available for the purpose as a result of—*
> *(i) the transfer, or*
> *(ii) one or more associated operations*

I call this the **"benefit causation condition"**.

> *(d) where there is a time in the year when the individual [beneficiary] is relevantly domiciled, the individual is not liable to income tax under section 720 or 727 by reference to the transfer*

I call this the **"taxable-transferor defence"**.

> *(e) the individual [beneficiary] is not liable to income tax, under any provision that is none of*
> *[i] section 731 of this Act and*
> *[ii] sections 643A, 643J and 643L of ITTOIA 2005,*
> *on the amount or value of the benefit.*

I call this the **"capital-benefit condition"**.

Where these conditions are met, and the motive defence does not apply, I describe the individual/person abroad as being **"within section 731"**.

In summary:

Para	**s.731 application condition**	**See para**
(a)	relevant transfer	50.3
(b)	benefit	50.4
(c)	benefit caused by transfer	50.13
(d)	taxable-transferor defence	50.15
(e)	capital benefit	50.16

50.3 Relevant transfer condition

The first s.731 application condition is the relevant transfer condition. Section 732(1) ITA provides:

> This section applies if—
> (a) a relevant transfer[3] occurs

Despite the present tense ("occurs") this condition is met in a year if a relevant transfer occurred in an earlier year. Grammarians call this "the historic present".[4]

[3] See 48.3 ("Relevant transfer") .

[4] *https://en.wikipedia.org/wiki/Historical_present*

50.4 Benefit

The second s.731 application condition requires that the individual receives a benefit. Section 732(1) ITA provides:

> This section applies if ...
> (b) an individual *receives a benefit* in that tax year.

The word benefit is common in tax statutes and in other areas of law.[5] So there is plenty of material for discussion. But the meaning, particularly at the boundaries, varies according to the context. In this section I focus on the meaning of "benefit" in the context of s.731 and s.87 TCGA; in these provisions the issues are (more or less) the same.

Similar issues arise in other contexts. It is not practical to write a full list, but they include:

Topic	**See**
Tax charges on value of a benefit:	
Benefit from retirement benefit scheme	s.394 ITEPA
Employment-related benefits in kind	39.35
Payment on termination of employment	34.38
Tax charges if possibility of benefit (regardless of value):	
s.624 (settlor-interested trusts)	
s.86 (settlor-interested trusts)	
s.720 (power to enjoy)	49.16.4 [6]

There is (sensibly) no statutory definition of benefit for ToA purposes.[7]

The starting point is that "benefit" is a word of wide import.

For the benefit of funding a beneficiary's tax appeal, see 52.35 (Appeals).

50.4.1 *Full consideration/arm's length*

In its natural sense, the word benefit does not include a transaction for

[5] For discussion of "benefit" in a trust law context see Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 13.13 (What does a settlor exclusion clause cover?).

[6] It is self-evident that the meaning of benefit is the same in s.720/731; but for completeness, RI 201 confirms this:

> "Benefit" for the purposes of [s.731] is treated as including all benefits taken into account in determining whether an individual has power to enjoy income for the purposes of [s.720 ITA].

[7] For completeness: The pre-ITA legislation stated that "benefit" included a payment of any kind: s.742(9)(c) ICTA. This had (more or less) no effect, and was sensibly omitted in the ITA rewrite.

which a person gives full consideration.[8] This is so even if the transaction is between connected persons.

Likewise the term benefit in its natural sense does not include an arm's length transaction. Of course an arm's length transaction will normally be made for full consideration; but it is suggested that an arm's length transaction is not a benefit even if, owing to some mistake, the individual gives less than full consideration.[9] It is sufficient that there is no gratuitous intent.

However, context may show that "benefit" may include a transaction for full consideration. The boundaries of the word "benefit" can reach that far. One example is the employment-related loan rules:

> In *Williams v Todd*,[10] Peter Gibson J was concerned to construe the word 'benefit' in the expression 'a loan … of which the benefit is obtained by reason of his employment' [and] in the expression 'an amount equal to whatever is the cash equivalent of the benefit of the loan for that year'. It is a perfectly ordinary use of language to speak of a borrower receiving the benefit of a loan, even if it is at a full commercial rate ...[11]

50.4.2 *Conferring equitable interest*

RI 201 provides:

> For the purposes of [s.731 ITA] a benefit is treated as not including ... the giving of a life interest to a beneficiary...

Without wishing to be pedantic, I think a trust lawyer would prefer to say "confer" a life interest rather than "give" a life interest. Trustees do not make "gifts": they are fiduciaries. But nothing turns on which term is used.

Conferring a life interest is not a benefit if the interest is revocable (or else the value of the benefit is nil). If the interest is not revocable, then its

[8] This is self-evident; but if authority is needed, see *IRC v Lactagol* 35 TC 230 and the employment-related benefit in kind cases discussed at 39.35.3 (Benefit).
For CGT the position is dealt with by statute, but only for the avoidance of doubt: see 61.7.8 (Arm's length relief). Note the reference to arm's length transactions in the passage from *Cooper* cited at 50.4.5 (Benefit on termination of trust).

[9] See *Wilson v Clayton* 77 TC 1 discussed at 39.35.3 (Benefit).

[10] [1988] STC 676. The case concerned the predecessor to the employment-related loan rules.

[11] *HMRC v Apollo Fuels* [2016] EWCA Civ 157 at [67].

receipt is in the widest sense a benefit, but for ToA purposes it should be regarded as a right to a future benefit, rather than an immediate benefit. To tax a "benefit" of this kind is clearly outside the scheme of the ToA code. Otherwise there would be a double charge, eg,

(1) when trustees appoint assets to a beneficiary contingently on attaining the age of 21 and again
(2) when the beneficiary reaches 21 and becomes absolutely entitled.[12]

Although RI 201 refers to a *life* interest, the same reasoning must apply to any interest under a settlement.

The usual way to confer a life interest is by the trustees exercising a power of appointment. Other possible ways are by exercise of a power of advancement or re-settlement. It makes no difference for tax purposes how the interest is conferred.

50.4.3 *Sale of equitable interest*

RI 201 states:

> For the purposes of [s.731 ITA] a benefit is treated as not including ... the receipt by a beneficiary of the proceeds of selling a life interest.

A sale of a life interest is outside the scope of s.731 because a sale at market value is not a "benefit" to the vendor, or because the value of the "benefit" (if there was one) is zero.[13]

If the purchase price is knowingly more than market value the purchaser provides a benefit to the vendor, but the benefit is not provided out of trust assets so it is not within s.731.

Although RI 201 refers to a *life* interest, the same reasoning must apply

[12] The Special Commissioners reached this conclusion in the context of employment-related benefits: *Dextra Accessories v Macdonald* [2002] UKSC SPC00331 at [9]-[12]. The point was not appealed. But that is no longer the law: *RFC 2012 Plc (formerly Rangers Football Club) v AG* [2017] UKSC 45 at [57].
In the context of s.731, one could also reach the same conclusion by saying that the "benefit" (if there was one) was not "provided out" of trust assets. In the context of s.87 TCGA, one might reach the same conclusion by saying that the "benefit" (if there was one) is not "from the trustees". But the better analysis is simply that conferring an interest under the settlement is simply not a "benefit" within the meaning of the statutory provisions.

[13] The drafter of FA 1984 sch 14 para 5(4) reached the same conclusion for the purpose of (what is now) s.87 TCGA.

to any interest under a settlement.[14]

What about an avoidance scheme where:

(1) The trustees appoint an interest to a beneficiary contingent on the beneficiary surviving a short period.

(2) The beneficiary sells the interest to a non-resident purchaser.

The object is to reduce tax rates from IT to CGT. This would fail on the GAAR, or *Ramsay,* and indeed technically, on the basis that the general principle that conferring an equitable interest is not a benefit would not apply to a benefit conferred with a view to selling it rather than retaining it.[15]

50.4.4 *Sale of company within s.731*

The same reasoning applies on the sale of shares or securities in a company within s.731. This leads to an interesting anomaly:

(1) An individual ("B") holds shares in a company which has accumulated relevant income within s.731. B sells the shares.
No charge arises under s.731 as B does not receive a benefit (either on the sale, or on receipt of the proceeds of sale, or on spending them).

(2) Trustees hold shares in a company which has accumulated relevant income. They sell the company.
The sale proceeds represent the relevant income[16] and so if the trustees appoint the proceeds to B, B receives a benefit taxable under s.731.

50.4.5 *Benefit on termination of trust*

Suppose:

(1) A beneficiary is entitled to trust property absolutely subject to satisfying some contingency (eg attaining the age of 25).

(2) The contingency is satisfied (the beneficiary reaches 25 and becomes entitled to the trust property).

There is a "capital payment" for the purposes of s.87 TCGA: see s.97(2)

[14] On a sale of an equitable interest, watch:
(1) CGT on the disposal of the interest; and
(2) schedule 4A TCGA.

[15] The idea is not a new one, and (in a different context) a variant of it failed in *Chinn v Collins*; see 87.5.7 (Trust appointment: Filling blanks).

[16] See 50.33 (Income reinvested: Tracing).

TCGA.[17] There is no equivalent provision in the ToA rules. However, it is considered that the beneficiary does receive a "benefit" and the value of the "benefit" is equal to the value of the trust property. The boundaries of the concepts of "value" and "benefit" can reach that far (perhaps only just);[18] and any other view would be inconsistent with the scheme of the ToA provisions.

This view is supported by *Cooper v Billingham*:[19]

> The whole scheme of the legislation requires the Court to see what benefit a beneficiary actually receives, in cash or in kind, otherwise than as income or under an arm's-length transaction. Any pre-existing beneficial interest belonging to the beneficiary is irrelevant. The Judge dealt with this point shortly[20] but there was no need for him to say more.

Similarly, if L is entitled to a life interest, and a trust asset is transferred to L absolutely, the value of the benefit received is the value of the asset, not the value of the reversionary interest in the asset.[21]

50.4.6 *Benefit: liquidation/redemption*

A similar point arises where:

(1) A shareholder holds shares in a company within s.731.

(2) The shareholder receives assets of the company on the liquidation of the company or on the redemption of its shares.

It is arguable that the shareholder does not receive a "benefit" since they merely receive the property to which they are entitled in the liquidation or redemption; or (which comes to the same thing) that the value of the "benefit" is nil. After all, a sale of the shares would not be a benefit, and is commercially similar. And no-one would say that there is a benefit for the purposes of employment income benefit in kind rules. On the other

[17] See 61.7.3 (Termination of settlement).

[18] Contrast *R v Allen* [2000] 2 All ER 142 where the CoA understood the word in a comparable way in order to uphold a confiscation order. *https://www.kessler.co.uk/wp-content/uploads/2015/02/R-v-Allen.pdf*

[19] 74 TC 139 CoA at [39].

[20] The judge said: "The recipient's existing interest under the trust has to be left out of the calculation for the purpose of valuing the benefit" *Cooper v Billingham* 74 TC 139 at p.155.

[21] This was stated by the judge in *Cooper v Billingham* 74 TC 139 at p.155. It is the converse of the rule that conferring a life interest is not a benefit: see 50.4.2 (Conferring equitable interest).

hand, the liquidation is more analogous to becoming entitled under a trust than a sale.[22] The better view, consistent with the scheme of the Act, is that the receipt of funds from the company is a "benefit" for the purposes of s.731. If that were not so, it would be possible to avoid s.731 by an arrangement under which:

(1) T transfers assets to a company.
(2) T transfers the shares in the company to another person (say, a child) absolutely.

It would be surprising if the company was a s.731 free vehicle which would allow the child to enjoy its accumulated income by liquidation or redemption of shares.

Similar points apply on the redemption of debt securities.

It may be objected that there could then be a double charge to tax. Suppose:

(1) A trust within s.731 owns a company. Relevant income has accrued to the trust and to the company.
(2) The trust transfers the company to a beneficiary, B.
(3) B liquidates the company and receives its assets.

There should not be a benefit on both the transfer and the liquidation, leading to a double charge. I suggest the solution is to say that one does not have a double benefit. If the value of the company has not changed since the date of the transfer to B, B receives no further benefit on the liquidation and distribution of the assets. The first benefit franks the second. But if the value of the company has increased (assume there is a delay between the transfer and the liquidation and income accrues to the company in the meantime) the benefit, or the value of the benefit, is the difference between the acquisition value and the actual receipt from the company. The concepts of benefit and value are sufficiently flexible to produce the right result.

If the shares are held by the transferor, however, s.720/727 would in principle apply.

50.4.7 *Payment of IHT*

No individual receives a benefit when trustees pay IHT charges on the trust. This is the case for IHT 10-year charges and the IHT charges on the

[22] See 98.24.4 ("Chargeable consideration").

termination of an estate IIP, but it is necessary to consider them separately:

(1) *IHT 10-year charges* are payable by the trustees of the settlement concerned.[23]

Beneficiaries[24] who receive capital payments are also liable for the IHT, but:

(a) They have a right to recover from the trust fund: s.212 IHTA.

(b) They are only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

Accordingly the payment of IHT 10-year charges by the trustees (or by anyone else) is not a benefit to any individual beneficiary.

This is so even if that beneficiary was (secondarily) liable for the tax under.

(2) *IHT on termination of an estate IIP (during the life of the life tenant[25] or on the death of a life tenant)*[26] This is likewise payable by the trustees of the settlement concerned: s.201(1)(a) IHTA.[27] But the same points apply:

(a) The life tenant has a right to recover from the trust fund: s.212 IHTA.

(b) The life tenant is only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

Accordingly the payment of IHT by the trustees (or by anyone else) is not a benefit to the life tenant. It cannot be a benefit to be relieved of a secondary liability of this kind, where one has an effective right of indemnity. Further, in the case of a wide common form trust, even if the class of beneficiaries as a whole may be said to receive a benefit, no individual receives a quantifiable benefit.

50.4.8 *Moral/sentimental/hard to value benefit*

The word "benefit" is used with two distinct meanings, a strict or narrow meaning, and a wide meaning:

(1) *Financial advantage only* In the narrow sense, "benefit" means a benefit which can be valued, that is, it can quantified in financial terms. The usual case will be the provision to a person of an asset, or

[23] See 125.3.4 (Liability for trust IHT).

[24] For non-resident trusts, settlors are also liable.

[25] See 125.3.4 (Liability for trust IHT).

[26] See 125.3 (Who is liable for IHT).

[27] In this case the life tenant is also liable for the IHT, under s.201(1)(b) IHTA.

services, where the benefit to the person is quantifiable as the value of the asset, or the value of the services.

(2) *Non-financial benefit also* In the wide sense, "benefit" also includes non-financial advantages, ie something which confers some mental satisfaction, such as meeting a moral obligation, or which may be described as indirect or intangible.

An example is a contribution of (say) £5,000 to charity. The charity receives a financial advantage of £5k, a straightforward benefit in the narrow sense. Someone who wishes to support that charity, or feels a moral obligation to do so, may receive a benefit in the wide sense. The payment may satisfy their wish or moral obligation; but one cannot value their benefit as £5k. It is a non-financial benefit.

A similar example is the provision of a fund for the benefit of a person's children.

Another example is the payment of (say) £5,000 school fees. The child receives a service (education). This is a straightforward benefit in the narrow sense; it can be valued at £5k.[28] The parent (assuming the parent wants the children to be privately educated) receives a benefit in the wide sense. They have a wish or moral obligation satisfied; but one cannot value their benefit as worth £5k. It is a non-financial benefit.

The context must decide which meaning of "benefit" is applicable.

In the *trust* law context of common form powers of advancement or appointment, such as a power to apply for the advancement or benefit of a beneficiary, the word "benefit" has the wide meaning. Thus a power to apply funds for the benefit of a beneficiary can in principle be exercised by making a payment to a charity which the beneficiary wishes to support.[29]

In a *tax* law context, the narrow meaning is normal and the wide meaning is exceptional. For instance, the word "benefit" in the context of s.624 ITTOIA or s.86 TCGA (settlor-interested trusts), or the IHT gift with reservation provision, refers to financial benefits only. No-one has ever suggested that a payment for a person's minor children could be a "benefit" to the parent, so as to bring those sections into application,

[28] But the detail of the basis of valuation of the benefit does not alter the point being made here, that the benefit is one of a financial nature, which can be valued.

[29] The leading case is *Re Clore* [1966] 1 WLR 955; see Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 11.10 (Power of advancement used to create new trusts).

though it normally would be a benefit in the wide (non-financial) sense: one would normally expect the parent to be gratified by the payment.[30] (It may alternatively be said that if the parent receives a benefit, its value is nil. I would prefer the view that a "benefit" of nil value should not be called a "benefit" at all. But the end result would be the same, at least in a s.731 or s.87 context, where the charge is on the value of the benefit.)

If a power to apply funds for the benefit of a beneficiary is exercised by making a payment to a charity which the beneficiary wishes to support, the payment is a benefit (in the narrow sense) to the charity so s.87 gains may accrue to the charity (though the charity should qualify for CGT charity relief).

These wide/narrow meanings of benefit are neatly illustrated in *Children's Investment Fund Foundation v AG*. The Foundation was a family charity. Following a divorce W resigned as director. The Foundation proposed to transfer funds to a new charity (controlled by W). The question whether this transfer would constitute a benefit for W arose for two distinct purposes:

(1) *Benefit for charity law/company article*: The Foundation's articles provided:

> A Trustee must not receive any payment of money or other material benefit[31] (whether directly or indirectly) from [the Foundation] except ... in exceptional cases, other payments or benefits (but only with the written approval of the Commission in advance).

The question was whether there was a benefit for W, within the meaning of this article. The value of this benefit would not matter.

(2) *Benefit for tax:* The question was whether there was a benefit for the charge on a termination payment, which is on the amount of the benefit.[32]

The judge stressed the importance of context to the meaning of benefit. For the company article issue:

> ... one has to consider first the purpose of clause 5.2, which is ... to

[30] If it were a benefit to one parent, it would similarly be a benefit to the other parent, and indeed grandparents, godparents and family friends; that can hardly be right.

[31] Defined in the articles: "a benefit which may not be financial but has a monetary value". This is a standard form: the current Charity Commission model articles are very similar.

[32] See 34.38 (Termination payments).

> prevent trustees from receiving benefits except ... with the approval of the Commission. ... This is not an absolute bar, but only a procedural pre-condition. In these circumstances, it would be wrong to construe the clause too narrowly. An appropriate benefit will only have to surmount the hurdle of Commission approval, which would allow proper independent scrutiny and transparency to protect the charity's assets. The situation is very different from the cases relied upon by the trustees that concerned incidental benefits to trustees that risked jeopardising charitable status.[33]

W reduced her financial claim against H in consideration of this transfer: it was something she strongly wanted. With that in mind, the judge held that W received a benefit, within the meaning of the relevant company article. I find that analysis a little surprising. I would have said:

(1) W did *not* receive a benefit within the meaning of the article (ie a benefit with monetary value)
(2) H *did* receive a benefit (a reduction in W's claim for financial relief)

But that analysis would not affect the outcome of the case.

For the tax issue there was no benefit, or its value was nil. Discussion was curtailed as HMRC had accepted that view, so the only issue was whether they might change their mind:

> ... [HMRC] would be highly unlikely ultimately to determine that the Grant would be taxable. This is because ... HMRC would not regard any intangible benefits that [W] might achieve by being the member or trustee of a charity with assets augmented by the Grant as being taxable benefits caught by [s.401 ITEPA]. There would be no value in [W's] membership of [the charity], which has exclusively charitable objects.
>
> I can say expressly that I have not determined that [W] will achieve any personal financial benefit from the making of the Grant, notwithstanding that I have accepted that she would have been prepared to forfeit other financial benefits to allow the Grant to be made.[34]

If further authority is needed, see *Burton v HMRC*:

> [60] 'Benefit' in s 97(5)(b) [TCGA] must be construed in the context of these taxing provisions rather than for the purpose of deciding the validity of an advancement or appointment under powers contained in

[33] [2017] EWHC 1379 (Ch) at [72].

[34] [2017] EWHC 1379 (Ch) at [124]. Neither point was considered on appeal.

> a settlement. The legislation forms a detailed self-contained code to impose a tax charge on capital payments received by a beneficiary. This requires the benefit received or treated as received to be identifiable and quantifiable if there is to be sufficient certainty to impose a tax charge for any particular year of assessment....
> [62] The wider concept of benefit is difficult to apply in the context of s 87 in a way that the concept of a benefit which is identifiable and quantifiable is not. For example, a gift to charity by the trustees of a settlement may not give rise to a charge to tax on the trustees so as to create trust gains, but has been held to be for the benefit of a beneficiary as regards validity as it discharges a moral obligation (*Re Clore ...* [1966] 1 WLR 955). The beneficiary is surely not chargeable in those circumstances under s 87... What has been received or treated as received in those circumstances by the beneficiary for tax purposes notwithstanding its validity as being for the benefit of the beneficiary? Nothing in the sense of a capital payment received other than possibly a moral satisfaction has materially benefited the beneficiary such that a tax charge can be imposed in respect of it.... [35]

Burton concerned a s.86 flip-flop scheme.[36] HMRC argued that the beneficiary received a benefit in a year ("year 1") of a very subtle nature: the avoidance of a CGT liability under s.86 on a disposal anticipated in the following tax year ("year 2"). So this was not a case of mental satisfaction benefit, though it was a case of a benefit whose value was difficult or impossible to quantify. The two-judge Tribunal disagreed on whether that was a "benefit" at all, but both judges agreed that if it were, the value of the benefit *in year 1* (the year assessed) was nil, so there was no s.87 charge.[37] But these facts are not likely to recur; so it is not necessary to consider this aspect further.

50.4.9 *School/university fees*

Suppose trustees pay school fees for a child in circumstances where the parents have no obligation to pay the fees. The child receives a benefit from the trust. The parents merely receive an intangible, non-financial advantage (if they regard the education with approval). I have already noted that this is not a "benefit" to the parents for tax purposes.

Suppose trustees pay school fees in circumstances where a parent has a

[35] *Burton v HMRC* [2009] SFTD 682; Judge Wallace took a similar view at [44].

[36] See 62.2 (Flip-flop schemes).

[37] HMRC's argument that the benefit was an outright payment was rightly rejected.

family law obligation to meet the fees (such as may arise on a divorce or in other family law proceedings). It might be said that the parent receives a benefit (being relieved of legal obligation). However it is considered that the benefit to the parent is outside the scope of s.731 because it is merely incidental.[38]

Suppose trustees pay school fees in circumstances where a parent (or both parents) are under a contractual obligation to pay the school fees (ie the parent has entered into the contract with the school). The position here depends on the facts:

(1) It may be that the parent is entitled to reimbursement from the trustees (eg if the parent entered into the contract at the request of the trustees and on terms that the trustees will meet the fees, or as agent for the trustees). In that case the trustees provide the benefit to the children and the parent does not receive a benefit from the reimbursement.[39] It does not matter that the school are not party to the arrangement (eg the parent may be acting as agent for an undisclosed principal).

(2) It may be that the trustees are voluntarily meeting a liability of the parent; in that case, the parent is providing the benefit to the child, and the trustees are providing a benefit to the parent.

In practice (assuming it is desired to arrange that the benefit is received by the child, not the parent) it is recommended that the contract should be between the trustees and the school, or (if that is not desired) there should be an agency agreement between the trustees and the parent. Then the position should be clear.[40]

If a parent is the settlor, also consider the settlor-interested trust code,[41] and the close-family attribution rules.[42]

See too App.12.2 (Student grants: DT relief).

50.4.10 *Asset used by connected person*

Suppose a house (or chattels) is provided to a life tenant (or other

[38] See 50.6.2 (Divorce payment: H not a beneficiary).

[39] Contrast 101.4 (Statutory tax indemnity).

[40] For cases where the Court had to determine whether liability for school fees rested on the parent or on his employer, see *Ableway v IRC* [2002] STC (SCD) 1; *Frost Skip Hire v Wood* [2004] STC (SCD) 387. But if the matter had properly documented, this litigation would not have been necessary.

[41] See 47.15 (Payment to settlor's child).

[42] See 61.26 (Settlor-attribution rules: Introduction).

beneficiary) who then allows their spouse (or partner or children) to live there (and to enjoy the chattels). The same analysis applies. The indirect benefit which the spouse (or partner or children) receive is not a "benefit" for tax purposes, or, alternatively, the benefit is disregarded as merely incidental.

50.4.11 *"Benefit" in breach of trust*

Suppose trustees transfer[43] an asset to a person in breach of trust. In principle the recipient holds the asset on constructive trust for the trustees, so the transfer is not a benefit, or (if it were a benefit) the value of the benefit is nil. Likewise if a company transfers an asset to a person in breach of company law.[44]

It is possible for an act which is a breach of trust to confer a benefit on the recipient, eg if trustees allow their claim against the recipient to become time barred.

Trustees may confer a benefit in breach of trust without transferring an asset, eg allowing an individual who is not a beneficiary to occupy trust property. Whether that confers a benefit on the individual depends on whether the trustees have a claim against the individual to recover the value of the benefit.

Thus whether an act in breach of trust constitutes a benefit requires an examination of the rights of the parties; it cannot be answered yes or no as a general proposition.

The context may show that the word benefit is (mis)used to include a transfer of an asset which the transferee is required to return to the transferor. An example is *Clark v HMRC*[45] which concerned a transfer of money from a pension scheme. Legal title to the money was transferred, but the beneficial interest was held on resulting trust for the transferor, because the recipient scheme was void for uncertainty.[46] This was held to

[43] I use the word "transfer" loosely. Although there may be a transfer of the bare legal title, it would be more accurate to refer to a purported transfer, or to use scare quotation marks.

[44] See too 15.9 (Income recognition: Breach of trust).

[45] [2020] EWCA Civ 204. *Clark* concerned the word "payment" not benefit; but that is not in itself so significant, particularly as "payment" was defined to include a transfer of assets and any other transfer of money's worth.

[46] The scheme promoters did not understand what they were doing. This is not unusual in avoidance schemes, notwithstanding high fees, and it is an argument in favour of the GAAR.

constitute an "unauthorised member payment" giving rise to an unauthorised payment charge. In reaching that conclusion it was important that:

(1) An unauthorised transfer will often be made in breach of trust.
(2) The unauthorised payment charge was intended to have a deterrent effect. It would deprive the charge of effect in cases where it is needed, if the taxpayer could subsequently escape liability by restoring assets to the fund.[47]

These considerations do not apply here, so it is considered that *Clark* has no relevance in the context of ToA and s.87 benefits.

50.4.12 *Waiver of liability*

The INT Manual provides:

> **INTM601640 Examples of amount or value of a loan** [Jul 2023]
> If repayment of interest (or capital) is waived, then this will be regarded as a benefit received by the individual for the year in which waiver takes place.

That is correct.

The value of the benefit is not the face value of the debt waived, but the market value. If the beneficiary is insolvent and wholly unable to pay the debt, its value is nil.

50.4.13 *Brackett v Chater*

For completeness: In *Brackett v Chater*[48] the benefits provided on the transferor ("T") were said to be:

(1) the provision of liquidity, in the form of
    (a) cash payment for properties which could not be sold on acceptable terms on the open market
    (b) repair of the property (once purchased), which the T could not otherwise have afforded
(2) salary
(3) discharge of moral obligations to provide for T's close family

These benefits were said to give T power to enjoy under condition C. Point (1) goes too far if it said that market value payments count as

[47] See [2020] EWCA Civ 204 at [45]; [79]-82].

[48] 60 TC 134 at p.148.

benefits; but the explanation is that the payments were not in fact at market value. Point (2) is equally doubtful, assuming that the salary was at market value. Point (3) on moral benefits is, with respect, clearly wrong, or every family trust is within s.720 even if the settlor/spouse is excluded. It is relevant to note that the taxpayer appeared in person, and the issues were not thoroughly discussed, and T also had was power to enjoy under condition B.[49]

50.4.14 *Benefit not from relevant income*

The benefit does not have to be made out of the relevant income or traceable to the relevant income. The INT Manual provides:

> **INTM601700 Relevant income** [Jul 2023]
> *Example 3*
> A foreign trust has no income of its own but owns a foreign company which has rental income of £100,000. The trustees make a payment of £30,000 out of trust capital to a beneficiary.
> In considering what is relevant income for the purposes of the benefits charge, the income of both the company and the trustees is taken into account. The relevant income will thus be £100,000 as it is income that can indirectly be used for providing a benefit. The payment out of the trust does not impact that.[50]

But see 50.13 (Benefit causation condition).

50.5 Who receives the benefit?

It is important to identify the recipient of a benefit because the individual who receives the benefit is in principle the one who is taxable. It is especially important where some beneficiaries are and others are not UK resident, or remittance basis taxpayers, because the identity of the recipient may affect not only who pays the tax but whether any tax is payable at all.

There may be scope for tax saving by arranging that the benefit is received by the beneficiary who is non-resident or a remittance basis taxpayer. But settlor-attribution and onward-gift rules would need consideration here.

[49] See 49.16.2 (Condition B: Asset value increases).

[50] The example does not explain how the trustees (who we are told had no income) obtained the £30k to pay to the beneficiary. Presumably we are to assume they held the shares and this additional sum of cash.

There are s.87 rules for benefits received by close companies, but these have no s.731 equivalent.

There are many possible permutations of circumstances and the documentation is very important.

50.5.1 *Who receives use of asset*

Suppose trust property is held by a common form discretionary trust:

(1) *The property is occupied by H and W (who are living together).*

  (a) If the trustees grant a H licence to occupy, W occupying jointly, but as licencee of H, then the benefit from the trust is received by H.

  (b) If the trustees grant a licence to H and W, each receives the benefit of joint occupation. How does one value that? In normal cases, the value of each benefit is half the value of sole occupation.

(2) *The property is occupied by H (or H and W) together with C (a child of H).* If the trustees grant a H licence to occupy, the benefit is enjoyed by H alone, not by C.

(3) The property is occupied by C (an adult) alone. If the trustees grant a licence to H, who permits C to occupy, the correct analysis should be that C has received the benefit indirectly (for s.87 purposes) or as a result of an associated operation (for s.731 purposes);[51] also the onward-gift rules need consideration.

The same applies if the property is held by a company held by the discretionary trust (except the licence would be granted by the company at the direction of the trustees).

Suppose property is held on trusts under which H has an interest in possession. If H occupies, he receives the benefit. If H and W occupy, H alone receives the benefit. What if H chooses not to occupy? In such a case H may not be entitled to occupy in which case there will be no benefit. If H permits C to occupy alone, C has received the benefit indirectly.

Suppose property is held on trusts under which H and W have joint interests in possession. If they both occupy they receive the joint benefit equally. Suppose H and W have interests in possession in unequal shares.

[51] See 50.13 (Benefit causation condition).

It is suggested that they receive the benefit of occupation equally, notwithstanding the inequality in their interests in possession.

In all these cases the position is of course different if the person in occupation is required to pay some form of compensation to the trustees or to the life tenant or joint life tenant.

50.5.2 *Who receives money payment*

Likewise with money. If the trustees pay a capital sum to H, and H uses it for family expenditure, the benefit is received by H; but if paid by H under an arrangement whereby it is transferred on to W, or to a child, the benefit may be received indirectly by the child (for s.87 purposes) or as a result of an associated operation (for s.731 purposes); and onward-gift rules need consideration.

For the purposes of s.87 TCGA charge, the concept of "receipt" is explained by s.97(5) TCGA.[52] There is no statutory equivalent for s.731 but it is suggested that the same rules apply: s.97(5) merely states the natural meaning of "receipt".

As the discussion of school fees above illustrates, the question of who receives a benefit may overlap with the question of whether there is a benefit at all.

50.6 Benefit in course of divorce

50.6.1 *Divorce payment: H a beneficiary*

Suppose a trust where H is a beneficiary and W is not.

(1) A court orders H to make a payment to W.
(2) A trust makes a payment to H to allow him to meet the obligation.[53]

That is a straightforward benefit to H. W does not receive a benefit; she gives full consideration.[54]

Suppose a slightly different step (2): The trust makes the payment to W directly in satisfaction of H's obligation. The result is the same. A payment made to satisfy H's liability is a benefit to H.

Suppose a slightly different step (1): the court order requires that H shall *pay or cause to be paid* to W a specified sum. That is the standard form

[52] See 61.8 (Receipt from trustees).

[53] As a matter of trust law, this is permitted even though H is not a beneficiary.

[54] It is important to understand the family law background, as to which see App.4.6 (Transfer on divorce).

of order. But the result is the same.[55]

The same applies if H and W are both beneficiaries.

50.6.2 *Divorce payment: H not a beneficiary*

Suppose:

(1) W is a beneficiary of the trust and H is not.
(2) A court orders H to make a payment to W.
(3) The trust makes the payment to W.

I find it difficult to see how this could arise. The trustees could make a payment to W but not in satisfaction of the court order, as H cannot *cause* the payment to be made.[56] There is also a benefit to H, which would be a breach of trust.

The trust law case of *Fuller v Evans*[57] seems at first sight to contradict this analysis. In this case the court had ordered:

> [H] do pay or cause to be paid to [W] … periodical payments
> (a) for [the children's] general maintenance £9,000 per annum
> (b) such amount as is sufficient to defray their school fees...

There was a common form accumulation and maintenance trust for the children. H was the settlor, and so excluded. The judge said:

> 4. The issue before me is whether the trustees may in their discretion exercise their power to provide moneys out of the trust to pay for the children's maintenance and education, though the effect of such payment may be in whole or in part to relieve the settlor from the burden of his obligations under the consent order to pay for his children's maintenance and education.

The judge concluded:

> 9 [The settlor exclusion clause under which H was excluded from benefit] does not preclude the trustees from exercising the power conferred upon them by reason of any incidental (and unintended)

[55] See the Family Order Project House Rule 16: "An obligation to do an act as provided for in an order shall be taken to include causing the act to take place. Thus the phrase "or cause to be paid", shall not be included in an order."
http://www.judiciary.gov.uk/wp-content/uploads/JCO/Documents/Reports/annex-c-family-orders-project-house-rules.pdf

[56] If H is a trustee it may be said that he causes the payment to be made, but the conflict of interest would in principle make the payment void.

[57] [2000] 1 All ER 636.

> conferment of relief on the settlor. This conclusion of course does no more than leave it open to the trustees to exercise a discretionary power to make provision for the education and maintenance of the two children out of the settlement funds. The trustees can only exercise that power if they consider that to do so is in the best interests of the beneficiaries despite the existence of the consent order and the obligations of the settlor thereunder. The trustees must have regard to the obligation of the settlor to provide for the beneficiaries' maintenance and education when undertaking the decision-making process but the existence of that obligation is no more than a consideration to which due weight must be given .... If the trustees reach the conclusion that it is in the best interests of the beneficiaries to make such provision out of trust funds, they are free to do so.

No doubt trust income applied for school fees or maintenance of the children would in principle[58] be the income of the children. This decision gives a sensible result. It would be surprising if the effect of the common form court order was to sterilise trust funds which prior to the divorce had been intended for the maintenance and education of the children. Moreover if the trust bore the cost then H had to be discharged from the court order: the children did not need two sets of school fees. But that case represents a high water mark: payments from H to W are different from payments for the maintenance of children. If the trust makes the payment to W, it is considered that H would not be discharged. If H were discharged, the benefit to H from the trust if it makes a payment to W is not "incidental".

50.6.3 *Court order against company*

The 2012/13 edition of this work considered the position where a court orders a company within s.731 to transfer property to the spouse of the shareholder. But it seems that the court does not have jurisdiction to make an order of that kind, except in the case where the company is a nominee,[59] so this issue should not arise.

50.7 Valuation of benefits: Principles

50.7.1 *Why valuation matters*

The amount of s.731 income depends on the "amount or value" of the

[58] In practice s.629 ITTOIA would need consideration.

[59] *Prest v Petrodel Resources* [2013] 2 AC 415.

benefit.[60] "Amount" refers to cash benefits (outright payment of money) and "value" refers to non-cash benefits.[61]

The amount of s.87 gains depends on the amount of the capital payment and s.97(4) TCGA provides:

> For the purposes of sections 86A to 96 and Schedule 4C the amount of
> [a] a capital payment made by way of loan, and
> [b] of any other capital payment which is not an outright payment of money,
> shall be taken to be equal to the value of the benefit conferred by it.

In this section I discuss valuation of benefits for the purposes of s.731 and s.87 TCGA, as the issues are (more or less) the same.[62]

50.7.2 *Market value: Principles*

In *Heaton v Bell*:

> "Value" is an elusive word: it may mean market value, it may mean value in money to the owner, or it may have other meanings like the value of the work necessary to produce it, or even sentimental value.[63]

In *IRC v Botnar*:

> 28. It seems to us that the whole of the value of a non-convertible benefit should, in the absence of any other objective means of valuation, be measured by reference to what it would have cost the individual receiving it. ... When measuring what benefit an individual receives it is not in our view relevant to ask whether he would have purchased the benefit himself. If that were the test a penurious individual receiving a non-money benefit under [enjoyment condition C] would escape tax however substantial the benefit since he could not have paid for it.

Arguments that the value of the benefit is nil tend to overlap with arguments that there is no benefit at all.

50.7.3 *Payment for benefit*

The INT Manual provides:

> **INTM601620 Examples of amount or value of benefit** [Jul 2023]
> ... If the individual receiving a benefit makes any contribution towards

[60] See 50.18.2 (Step 1: Total Benefits).

[61] See App.4.2.4 ("Amount or value").

[62] See App.4.9 (Market value/full consideration).

[63] *Heaton v Bell* 46 TC 211 at p.246.

> that benefit, the contribution will normally be taken into account in determining the amount or value of the benefit.

The INT Manual provides a straightforward example:

> For example, an individual is provided with accommodation that is a benefit for the purpose of the benefits charge. It is agreed that the value of the use of the accommodation based on rental is £10,000 for the tax year. In that year the individual pays a rental of £5,000. It will be appropriate to take account of the contribution such that the amount or value of the benefit is regarded as £5,000.

This should apply to a payment in advance or in arrears.
If authority is needed, see *IRC v Botnar*:[64]

> The measurement of the benefit by reference to what it would have cost the individual will take account of the terms on which it was provided. In this case ... the use of the property was provided on the footing that Mr and Mrs Botnar bore the recurrent outgoings.

This principle is subject to exceptions if the 2017 statutory valuation rules apply.

50.8 Benefit not loan/use of property

It is usually straightforward to ascertain the market value of benefits other than loans/use of property.

50.8.1 *Receipt of money*

The INT Manual provides:

> **INTM601620 Examples of amount or value of benefit** [Jul 2023]
> ... Where the benefit received is money, generally speaking the amount or value of the benefit is likely to be the amount received. As INTM601580 explains, where the payment is received in foreign currency, the amount or value will generally be determined by applying the appropriate sterling exchange rate at the date of receipt.

That is self-evident.

50.8.2 *Transfer of asset*

The INT Manual provides:

[64] 72 TC 205 p.256 (Special Commissioners decision, at para [29].

> **INTM601620 Examples of amount or value of benefit** [Jul 2023]
> ... Where the benefit received is in the form of an asset, other than cash, and the ownership of that asset actually passes to the individual as opposed to an asset being made available for use which remains in the ownership of the provider. The amount or value of the benefit is likely to be determined by reference to the value of the asset at the point in time when it is received by the individual. In most cases this is likely to be similar to the approach that may be adopted for capital gains purposes where it may be appropriate to determine the open market acquisition value of the asset to the individual.

That is self-evident.

50.8.3 *Satisfying a debt*

The INT Manual provides:

> **INTM601620 Examples of amount or value of benefit** [Jul 2023]
> ... Where the benefit received takes the form of a personal debt or liability of the individual being settled on the individual's behalf, the amount or value of the benefit is likely to be determined as if the individual had received an equivalent amount of money. There are a variety of circumstances that may come under this heading, from the provision of credit or debit cards, making direct payments to a third-party service provider (such as for children's school fees), or the settling of an outstanding personal liability (such as a utility bill or personal tax liability for example).

50.8.4 *Repayment of loan*

Repaying a loan on commercial terms is not a benefit (or the value of the benefit is nil). The statutory valuation rule does not apply to a repayment.

50.9 Statutory valuation rules

There are statutory valuation rules for three types of benefit:

Benefit	**s.731 valuation rule**	**s.87 valuation rule**	**See para**
Loan	s.742C	s.97A	50.10
Use of chattel	s.742D	s.97B	50.11
Use of land	s.742E	s.97C	50.12

I refer to these as the "2017 statutory valuation rules".

The s.643A code incorporates the s.731 rules by reference.[65] The s.87

[65] See 47.21.4 (Step 2: Value benefits).

code sets out the rules in full, using (more or less) the same words as the s.731 rules; the differences are to ensure that the s.87 code follows wording used elsewhere in the s.87 code, but there is no difference in meaning.

The statutory valuation rules are introduced as follows:

s.742B ITA	**s.97(4) TCGA**
Sections 742C to 742E apply where it is necessary, for the purpose of calculating a charge to income tax under the preceding provisions of this Chapter [chapter 2 part 13, ToA provisions], to determine the value of a benefit provided to a person by way of— (a) a payment by way of loan (see section 742C), (b) making available movable property without any transfer of the property in it (see section 742D), or (c) making available land for use without transferring the whole interest in it (see section 742E).	For the purposes of sections 86A to 96 and Schedule 4C the amount of a capital payment made by way of loan, and of any other capital payment which is not an outright payment of money, shall be taken to be equal to the value of the benefit conferred by it (see sections 97A to 97C for the value of benefits conferred by a capital payment made by way of loan or by way of making movable property or land available).

It is necessary to distinguish:

(1) **"Statutory value"** (under the statutory valuation rules) and

(2) **"Market value"**

Market value is relevant so far as the 2017 statutory valuation rules do not apply, which includes:

(1) Benefits other than loans and use of property

(2) Pre-2017 benefits (even if matched with post-2017 relevant income/ trust gains)[66]

(3) Valuation issues outside s.731/s.87/s.643A, such as what constitutes "full consideration"[67]

Types of loan/lease/licence

I use the following terminology:

[66] See 50.10.7 (Pre-2017 loan).

[67] See App.4.9 (Market value/full consideration).

Term	**Meaning**
Beneficial loan	Interest-free or beneficial terms
Commercial loan	A loan for full consideration (not a beneficial loan)
On-demand loan	Repayable on demand of the lender
Fixed-term loan	Not repayable for a fixed term (not an on-demand loan)

Similar terms can be used for a lease/licence of chattels/land.

50.9.1 *"Benefit" for full consideration*

The statutory valuation rules apply to determine the value of a *benefit* by way of loan/use of property. If there is no benefit the statutory valuation rules do not apply.

A beneficial loan is of course a benefit.[68] However it has been suggested that a commercial loan is not a benefit, so the statutory valuation rules do not apply.

> ... sections 742B and 742C [ITA] only apply where the loan in question actually constitutes a "benefit" to the borrower. If the loan does not confer a "benefit" on the borrower then the new provisions should not apply. There must be an actual "benefit" before one is required to value anything. That, on any fair reading, is what sections 742B and 742C say. Accordingly, if the terms of the loan made to X ... were such that there was no "benefit" to him, he should not in my view be caught by the new provisions.
>
> I am fortified in this view by the absence of a provision corresponding to the recently inserted s.173(1A)(a) ITEPA. Section 173(1A)(a) is intended to, and does, tax the so-called "benefit" of employer-related 'rolled up interest' loans which do not actually confer any benefit. The draftsman recognised the 'no benefit' problem and circumvented it by providing that where you have an employer-related loan:
>
> > the loan is a benefit for the purposes of this Chapter (and accordingly it is immaterial whether the terms of the loan constitute a fair bargain)[69]
>
> Job done! But, as I say, there is no corresponding provision in the context of the new sections 742B and 742C.[70]

In one sense of the word, a commercial loan is not a benefit. That is self-

[68] This is self-evident, but if authority is needed, see *Cooper v Billingham* 74 TC 139.

[69] See 40.2 (Employment-related loan).

[70] Flesch, "No Benefit. No Tax – True Or False?" GITC Review Vol.xiv No.2 March 2018 *http://taxbar.com/wp-content/uploads/2018/04/MF-No-benefit-No-tax.pdf*

evident, but if authority is needed, see the first *Vestey* case:[71]

> … a loan may well benefit a person even if it is made at a commercial rate of interest, as it may tide him over a difficult period, but I do not think that if money is so lent it is applied "for the benefit" of the debtor within [the forerunner of s.624].
> ...I find it impossible to hold that a sum of money lent at a commercial rate of interest is "payable to or applicable for the benefit of" the borrower in the sense of this Section.

However, the word "benefit" can also be used to refer to a loan on commercial terms.[72] It is considered the better view is that this is the case in the statutory valuation rules. So a loan (or use of property) on commercial terms is within the statutory valuation rules.

The INT Manual also takes the view that a commercial loan *is* a benefit, though the market value of the benefit is nil:

> **INTM601640 Examples of amount or value of loan** [Jul 2023]
> A loan made to an individual for full commercial consideration is a 'benefit', but such a loan would in practice normally be regarded as a nil benefit, and therefore have no taxable value.

Before the 2017 statutory valuation rules, this was simply a different route to the same destination. But the difference matters for after 2017, because if a loan is a benefit (even of nil value) the statutory valuation rule applies; if a loan is not a benefit, the rule does not apply.

The position is slightly different for s.87, because it has a relief for arm's length transactions.[73] That relief does not apply for s.731. This might be described as an anomaly, but it is an anomaly which arises from the fact that the relief which applies for s.87 does not apply for s.731.

50.9.2 *Statutory/market value compared*

Statutory value is in general more than market value, but not in every case; for instance:

(1) The statutory value of use of a car may be less than market value, because a car (unlike, say, a work of art) is a depreciating asset.

(2) The statutory value of use of a chattel may be less than market value where the asset was purchased and first used a long time ago.

[71] *Vestey's Executors v IRC* 31 TC 1 at p.114, 121.

[72] See 50.4.1 (Full consideration/arm's length).

[73] See 61.7.8 (Arm's length relief).

50.9.3 *Enactment history*

The casual chutzpah (some readers may use a stronger word) of EN FB 2017 deserves to be recorded:

> During the consultation process it became clear that the rules for valuing certain benefits was unclear. Schedule 14 [Finance Bill] sets out the procedures to be followed when valuing these benefits for both capital gains and income tax purposes.

But perhaps no-one is expected to take that seriously.

50.10 Benefit of loan

For general law loan issues, which can of course matter greatly for tax, see App 2.5 (Loan).

50.10.1 *Statutory value: Loan*

Section 742C(1) ITA/s.97A(1) TCGA provide:

s.742C(1) ITA	**s.97A(1) TCGA**
The value of the benefit provided to a person (P) by a payment by way of loan to P is,	For the purposes of section 97(4), the value of the benefit conferred on a person (P) by a capital payment made by way of loan to P is,
for each tax year in which the loan is outstanding, the amount (if any) by which— (a) the amount of interest that would have been payable in that year on the loan if interest had been payable on the loan at the official rate,[74] exceeds	[identical]

[74] Defined by reference (and see 40.5 (Official rate of interest)):

s.742C(2) ITA	**s.97A(2) TCGA**
In this section and section 742D	In this section and section 97B
the "official rate", in relation to interest, means the rate applicable from time to time under section 178 of the Finance Act 1989 for the purposes of Chapter 7 of Part 3 of ITEPA 2003.	[Identical]

(b) the amount of interest (if any) actually paid by P in that year on the loan.

Payment of interest by a person other than P does not reduce the statutory value.

Payment of interest before or after the year does not reduce the statutory value. That is a harsh rule, but it does prevent planning for those coming to/leaving the UK, who might otherwise arrange to pay the interest in a year of non-residence.

The statutory valuation rule applies to a fixed-term loan. Eg, if in 2020/21 trustees grant a 3 year fixed term loan at no interest to a beneficiary, the value of the benefit is taxed under the statutory valuation rule in each of the years 2020/21, 2021/22 and 2022/23.

"Loan" is not defined, so in the statutory valuation rule it bears its strict meaning: loan of money.[75]

50.10.2 *Market value: Loan*

After 2017, the market value of a loan may not matter, for s.731/s.87 purposes, but the market value of leaving a debt (other than a loan) outstanding still matters, so the point is important.

The INT Manual provides:

> **INTM601640 Examples of amount or value of loan** [Jul 2023]
> One of the most common examples of a benefit involves loans of one form or another. These loans can take the following forms:
> - interest free loans
> - loans made charging interest at a rate below commercial rates
> - loans made charging interest at a commercial rate
> - loans made charging interest which remains unpaid
> - back-to-back arrangements
>
> Interest free loans are considered to be within the provisions, the charge being calculated by reference to the amount of interest forgone by the lender. This position was challenged in the courts where it was argued that in effect where a loan was repayable on demand there was no benefit. The judges disagreed with this and said that the focus needed to be not on the making of the loan but on the Trustees successive acts in not calling the loan in (*Cooper v Billingham* 74 TC 139). Similarly,

[75] See App 2.5 (Loan).

> where there are loans at interest rates lower than those that would be charged by banks or other commercial lenders a benefit may arise.

The INT Manual provides:

> **INTM601640 Examples of amount or value of loan [**Jul 2023]
> ... In the case of an interest free loan made to the individual, the amount of the benefit would normally be considered to be equivalent to the interest payable at a commercial rate on a similar loan from an unconnected third party. For this purpose, we treat the 'official rate' of interest as being the appropriate rate to use.[76] Where interest is paid but at less than commercial rates, the amount of the benefit will be that interest payable at a commercial rate less the interest paid.

The use of the official rate is a pragmatic solution, but strictly, the benefit is valued by reference to market rate for a loan on the same terms to the borrower, which will depend on:

- the security (if any) for the loan
- the financial strength of the debtor (the strength of the covenant)
- in the case of a foreign currency loan, the foreign currency market rate

It is sometimes in the interest of the taxpayer to argue that the value of the benefit is greater than the official rate. But where the statutory valuation rule applies, this does not arise.

50.10.3 *Impaired loan*

An "impaired loan" is one where the borrower is unable to repay the loan. Under the statutory valuation rule, the value of an impaired loan is the same as any other loan - as long as it is in fact a loan.

Cooper v Billingham discusses the market value of the benefit of an interest-free loan:

> [Counsel] argued that the value of the benefit conferred as required for the purposes of s.97(4) [TCGA] would vary according to the circumstances of the borrower, for example how creditworthy he might be and therefore his ability to borrow at better or worse rates on the market, and that those circumstances might differ from time to time.
> That may be true and could in theory cause difficulties of qualification in a particular case.[77]

[76] See 40.5 (Official rate of interest).

[77] 74 TC at p.155.

The beneficiary may be insolvent, ie unable to repay the loan immediately after it is made. This would typically arise if there are a series of loans to the beneficiary which are used to meet current expenditure. At the time of later loans in the series, at least, the beneficiary would be insolvent.

There are two possible analyses:

(1) The purported loan might take effect as an absolute transfer and not a loan; in other words, the documentation may be a sham so far as it suggests that there is a loan.[78]

(2) The transaction may take effect as a loan, but the market value of the benefit in the year the loan is made would be equal to the sum loaned, because an arm's length lender would not agree to lend (if "lend" is the word) for any less. No benefit arises in subsequent years if the "loan" is left outstanding (as an arm's length lender should not require a greater consideration than that).

I prefer the first analysis[79] but it depends on the facts.

It is theoretically possible that the trust which makes the loan could put the borrower in funds to make the repayment, which would make a difference - if that were the intention.

The borrower may be solvent (ie able to repay) when the loan is made but become insolvent. This would typically arise if there are a series of loans to the beneficiary which are used to meet current expenditure. At the time of first loan at least, or at the time of earlier loans in the series, the borrower may still be solvent. A similar analysis applies. If the transaction is a loan, the market value of the benefit in the year of the loan is what an arm's length lender would require for making the loan (which is likely to be the amount lent); or else the market value of the benefit in subsequent years is what an arm's length lender would require for leaving the loan outstanding.

50.10.4 *Interest unpaid*

What if interest at a commercial rate is rolled up unpaid? There is no income tax charge on unpaid interest.[80]

Under the statutory valuation rule the unpaid interest is disregarded and

[78] See App 2.5.2 (Loan or outright payment?).

[79] Assuming that the loan is governed by a law with a doctrine of sham similar to English law.

[80] See 26.26.4 (Waiver of interest).

does not reduce the value of the benefit. But the market value of the benefit is nil.

The INT Manual considers unpaid interest:

> **INTM601640 Examples of amount or value of loan** [Jul 2023]
> If the interest payable on [a loan for full commercial consideration] is not paid, consideration should be given as to whether the 'unpaid' interest in each year should be the amount of benefit in each year. Regard should be had to the circumstances under which the interest is unpaid. For example, has the payment of interest been waived?[81]

50.10.5 *Back-to-back loan*

The expression "back-to-back loan" is imprecise: it covers a variety of arrangements, with different tax consequences. The INT Manual is sketchy:

> **INTM601640 Examples of amount or value of loan** [Jul 2023]
> ...There may be instances of so called 'back-to-back' arrangements which should be carefully considered. For example, an individual who is a beneficiary of a trust may borrow money from a bank at commercial rates of interest. The trustees may deposit substantial funds with the bank (lender) as collateral for the loan. The arrangements may mean that repayments of capital and interest on the bank loan are rolled up and, on maturity, the loans are either renegotiated or replaced by larger loans from other banks.
> The result is that the individual, although legally responsible for the repayments of capital and interest payments, has had, perhaps for many years, the benefit of substantial loans without a cost.[82] In such circumstances, the value of the benefit may be considered on the basis that the loans were interest free and the benefit arrived at as referred to above.

On these facts, the benefit provided by the trustees is the deposit with the bank. Valuation may not be straightforward, but will be possible.

50.10.6 *Loan to life tenant*

As a matter of property/trust law a life tenant is entitled to trust income. It follows that it is in general not possible to have an interest-bearing loan

[81] See 50.4.12 (Waiver of liability).

[82] Author's footnote: That is not necessarily the end result of the arrangements described.

to a life tenant, under a transparent *Baker*-type[83] trust, because a person cannot pay interest to themself.[84]

Accordingly one cannot argue that a loan to a life tenant has a nil statutory value, by purporting to pay interest;[85] or that a loan to a life tenant has a nil market value, by purporting to pay or to roll up interest.

It would be different if:

(1) interest was payable after the death of the life tenant;
(2) the loan was issued at a discount instead of at interest;
(3) the trustees had expenses which were met by the interest (so the interest was not paid to the life tenant).

The fact that the borrower is life tenant (and so entitled to interest on the loan) is disregarded in determining the market value of the loan benefit. This is not stated expressly but follows from the scheme of the Act.[86]

50.10.7 *Pre-2017 loan*

Para 3 sch 9 F(no.2)A 2017 provides:

> The amendments made by this Schedule [statutory valuation rules] have effect in relation to capital payments or benefits received in the tax year 2017-18 and subsequent tax years.

Flesch considers a case where:

(1) Trustees made a fixed-term loan for no consideration before the statutory valuation rules were made (say a five year term loan made in 2016/17)
(2) The loan is still outstanding after the statutory valuation rules take effect (from 2017/18)

[83] It would be different if the trust was a non-transparent *Garland*-type trust. See 42.9 (Life tenant: Source of Income).

[84] For completeness: if interest rolls up unpaid and the life tenant dies, the position alters and outstanding interest becomes payable to the trust (unless Apportionment Act 1870 principles apply, which will be rare).

[85] Even if the parties go through a ceremony under which:
(1) the life tenant pays, or purports to pay, "interest" to the trustees; and
(2) the trustees return it to the life tenant.
Even if the parties do this there is no IT charge on the "interest": *Styles v New York Assurance* 2 TC 460. This point was overlooked in *Rogge v HMRC* [2012] UKFTT 49 (TC) (where the taxpayer was not represented by counsel).

[86] *Cooper v Billingham* 74 TC at p.154F. The reasoning was upheld by the CoA.

> Clearly X would have received a "benefit" when the loan was made, and the benefit would have been taxed under section 731 et seq in 2016-17.[87] I hope that no one – not even HMRC – would seriously suggest that X received further taxable benefits in the five succeeding years, by virtue of sections 742B and 742C.[88]

Flesch uses this to support his argument that a commercial loan is not a benefit within the scope of the statutory valuation rule.[89] But it is suggested that the reason that the 5 year term loan is not taxed in later years is the principle against double taxation, so the example does not support the argument that a commercial loan is not a benefit, and so is outside the statutory valuation rules.[90]

50.10.8 *Loan to estate/deceased borrower*

Suppose:

(1) A trust (within s.731) makes a loan to an individual

(2) The individual dies. The PRs of the estate become liable for the loan.

(3) The trust leaves the loan outstanding.

The PRs receive a benefit, but it is not within s.731 because the PRs are not individuals. There would be a capital payment for the purposes of s.87, giving rise to a CGT charge on the PRs if they are UK resident.

[87] Author's footnote: It is assumed that X is UK resident and there is sufficient relevant income to match to the benefit.

[88] Flesch, "No Benefit. No Tax – True Or False?" GITC Review Vol.xiv No.2 March 2018, citing *Billingham v Cooper* [2000] STC 122, at p.129h and p.134a.

[89] See 50.9.1 ("Benefit" for full consideration). Flesch says: "Now let us suppose that it transpires that the loan actually made to X in June 2016 contained a small element of benefit, because the agreed rate of rolled up interest was marginally too low to constitute a 'fair bargain'. Again, any such benefit should have been taxed in 2016/17 and should not be taxed again in subsequent years. That being so, it surely cannot be right in X's actual case – where his loan was a 'fair bargain' and did not confer any 'Day 1 benefit' – that he should be taxed by virtue of the new provisions. X's 'benefit' – or nonbenefit – must equally have been received before 2017-18." *http://taxbar.com/wp-content/uploads/2018/04/MF-No-benefit-No-tax.pdf*

[90] Even if that is wrong, the argument from unfairness is not a strong one, because:
(1) There is unfairness built into the statutory valuation rule, in that it only allows a deduction for interest paid in the year, not for interest paid before or after the year.
(2) The unfairness is somewhat theoretical, as in practice fixed term loans to beneficiaries are not made, except where there is thought to be some tax advantage.

50.11 Use of chattel

RI 201 provides:

> ["Benefit"] includes for example ... the use of trust property at less than an open market rental.

That is self-evident.

50.11.1 *Statutory value: use of chattel*

Section 742D ITA/s.97B TCGA provide:

s.742D(1) ITA	**s.97B(1) TCGA**
The value of the benefit provided by making movable property[91] available, without any transfer of the property in it, to a person (P) is, for each tax year in which the benefit is provided to P—	For the purposes of section 97(4), the value of the benefit conferred by a capital payment consisting of making movable property available, without any transfer of the property in it, to a person (P) is, for each tax year in which the benefit is conferred on P—
$\frac{(CC \times R \times D)}{Y} - T$	[Identical]

In short:
CC is the **C**apital **C**ost
D is the number of **D**ays the property is available
R is the official **R**ate of interest
T is the **T**otal paid by P
Y is the number of days in the tax **Y**ear

In full detail, s.742D(1) ITA/s.97B(1) TCGA provide:[92]

> CC is the capital cost of the movable property on the date when the property is first made available to P in the tax year,
> D is the number of days in the tax year on which the property is made available to P (the relevant period),
> R is the official rate of interest for the relevant period (but see subsection (3)),

[91] Defined s.7442D(4) ITA/s.97B(4) TCGA: "In subsections (1) and (2), "movable property" means any tangible movable property other than money."

[92] I here set out the ITA wording. The TCGA wording is identical except where indicated in footnotes.

> T is the total of the amounts (if any) paid in the tax year by P—
>
> (a) to the person providing[93] the benefit, in respect of the availability of the movable property, or
>
> (b) so far as not within paragraph (a), in respect of the repair, insurance, maintenance or storage of the movable property, and
>
> Y is the number of days in the tax year.

Section 742D(2) ITA/s.97B(2) TCGA define "capital cost":

> In subsection (1), in the meaning of CC, the "capital cost" of the[94] movable property means an amount equal to the total of—
>
> (a) the amount which is the greater of—
>
> (i) the amount or value of the consideration given for the acquisition of the movable property by, or on behalf of, the person (A) providing the benefit, and
>
> (ii) its market value at the time of that acquisition, and
>
> (b) the amount of any expenditure wholly and exclusively incurred by, or on behalf of, A for the purpose of enhancing the value of the movable property.

Section 742D(3) ITA/s.97B(3) TCGA concern changes in the official rate:

> If the official rate of interest changes during the relevant period, then in subsection (1) R is the average official rate of interest for the period calculated as follows.
>
> *Step 1*
>
> Multiply each official rate of interest in force during the relevant period by the number of days when it is in force.
>
> *Step 2*
>
> Add together the products found in Step 1.
>
> *Step 3*
>
> Divide the total found in Step 2 by the number of days in the relevant period.

Many of the comments above on the statutory value of loans also apply here. In particular: Payment of a licence fee/rent by a person other than P does not reduce the statutory value. Payment of a licence fee/rent before or after the year does not reduce the statutory value. The statutory

[93] For completeness: on the occasions where the ITA valuation rule reads: "providing the benefit", the TCGA valuation rule reads: "conferring the benefit". This is because s.732 ITA refers to providing a benefit whereas s.97(2) TCGA refers to conferring a benefit. But the words provide/confer are synonymous.

[94] For completeness: TCGA omits the word "the" here; but nothing turns on that.

valuation rule applies to a fixed-term licence agreement. Eg, if in 2020/21 trustees enter into a 3 year fixed term licence agreement at no interest to a beneficiary, the value of the benefit is taxed under the statutory valuation rule in each of the years 2020/21, 2021/22 and 2022/23.

50.11.2 *Market value: use of chattel*

After 2017 the market value of use of chattels may not matter, for s.731/ s.87 purposes, but I set out the the INT Manual for completeness:

> **INTM601620 Examples of amount or value of benefit** [Jul 2023]
> ... The principles to be applied where an asset is made available for use by an individual are likely to be similar to those described above for rent free accommodation.[95] Where the benefit provided is on an ongoing and continuous basis it will generally be appropriate to look at the tax year as a whole and consider the "annual value" of the use of the asset in relation to that tax year (or part thereof), together with any ongoing costs to the person providing the benefit of its provision for use by the individual. It may also be appropriate to reduce the value of the benefit where the individual meets costs associated with the asset that would normally be incurred by the owner of the asset. Subject to obtaining any necessary professional valuation advice, as a rule of thumb it may be appropriate to adopt a methodology for the benefits charge regarding the use of assets similar to that applied in the employment-related benefits field where an asset is made available for the use of an employee (see for example ITEPA05/S205[96]).

The statutory valuation rules in the employment-related benefits code are not the correct way to ascertain market value; and this was tacitly acknowledged by the enactment of the 2017 statutory valuation rules.

See too 4.9.5 (Market value: use of chattel).

50.12 Use of land

50.12.1 *Statutory value: use of land*

Section 742E(1) ITA/s.97C(1) TCGA provide:

s.742E(1) ITA	**s.97C(1) TCGA**
The value of the benefit provided by making land available for the use	For the purposes of section 97(4), the value of the benefit conferred

[95] See 50.12.2 (Market value: use of land).

[96] See 39.36 ("Cash equivalent").

of a person (P) is, for each tax year in which the benefit is provided to P, the amount by which—	by a capital payment consisting of making land available for the use of a person (P) is, for each tax year in which the benefit is conferred on P, the amount by which—
(a) the rental value of the land for the period of the tax year during which the land is made available to P, exceeds (b) the total of the amounts (if any) paid in the tax year by P—	[identical]
(i) to the person providing the benefit, in respect of the availability of the land, or	(i) to the person conferring the benefit, in respect of the availability of the land, or

"Making land available" is equivalent to the benefit in kind wording, "providing" living accommodation; for discussion, see 39.15 (Available but not used).

Section 742E(2) ITA/s.97C(2) TCGA provide:

s.742E(2) ITA	**s.97C(2) TCGA**
Subsection (1) does not apply in the case where the person providing the benefit transfers the whole of the person's interest in the land to P.	Subsection (1) does not apply in the case where the person conferring the benefit transfers the whole of the person's interest in the land to P.

Section 742E ITA/s.97C TCGA define rental value:

> (3) In subsection (1) "the rental value" of the land for a period means the rent which would have been payable for the period if the land had been let to P at an annual rent equal to the annual value.
> (4) For the purposes of subsection (3) "the annual value" of land is the rent that might reasonably be expected to be obtained on a letting from year to year if—
>
> (a) the tenant undertook to pay all taxes, rates and charges usually paid by a tenant, and

> (b) the landlord undertook to bear the costs of the repairs and insurance and the other expenses (if any) necessary for maintaining the property in a state to command that rent.
>
> (5) For the purposes of subsection (4) that rent—
>
> (a) is to be taken to be the amount that might reasonably be expected to be so obtained in respect of a letting of the land, and
>
> (b) is to be calculated on the basis that the only amounts that may be deducted in respect of services provided by the landlord are amounts in respect of the costs to the landlord of providing any relevant services.
>
> (6) In subsection (5) "relevant service" means a service other than the repair, insurance or maintenance of the property.

The wording is taken from the employment income benefit in kind rules.[97]

This may not differ much from the market value.

Many of the comments above on the statutory value of loans also apply here.

50.12.2 *Market value: use of land*

After 2017 the market value of the use of land may not matter, for s.731/s.87 purposes, but I deal with the point for completeness.

In *IRC v Botnar* the Special Commissioners discuss the market value of living accommodation:

> 30. It may be that it will not be easy for a valuer to assess what the cost of a benefit such as this would have been since it is wholly hypothetical there being no market for such benefits. However, it seems to us that one approach may be to take the open market rental and to adjust this by reference to the lack of security of tenure, non-assignability and outgoings born by Mr and Mrs Botnar and any other special factors.[98]

The INT Manual provides:

> **INTM601620 Examples of amount or value of benefit** [Jul 2023]
> ... Where the benefit received is the provision of accommodation without charge to the individual, the amount or value of the benefit is likely to be determined from a consideration of the market rental that the property

[97] See 39.18.1 ("Rental value").

[98] 72 TC 205 at p.262 (Supplementary Special Commissioners Decision). The question arose in the context of (what is now) ToA enjoyment condition C, where the charge is on the value of the benefit; see 49.22.3 (Amount of charge under enjoyment condition C). But the same applies for s.731 and s.87.

may have fetched at the time the benefit is received.

It must be kept in mind that the language of the provision is of an individual who 'receives' a benefit. Therefore where, as in the case of rent free accommodation, the individual goes on receiving the benefit by continuous occupation of the property there is in effect an ongoing and continuous benefit. As taxation of a benefits charge is for a tax year, it will generally be appropriate to consider the amount or value of the benefit for that entire period, where there is a continuous provision of a benefit for the whole or part of that period. It will therefore be appropriate in such instances to consider the 'annual value', or appropriate proportion thereof, of the benefit received, not merely any value at the point of first receipt. Thus, in the case of rent free accommodation, it will not only be appropriate to consider the amount or value of the benefit during the particular tax year, but if that benefit continues to be provided, to consider its value for each subsequent period during which there is continuing provision, and to have regard to any changes that may occur in the value of the benefit (for example because of changes in marketplace for rental values). These principles of continuous provision are likely to apply to most situations where an asset is made available for use over a period of time.

50.13 Benefit causation condition

The third s.731 application condition is the benefit causation condition. Section 732(1) ITA provides:

> This section applies if ...
> (c) the benefit is provided out of assets which are available for the purpose as a result of—
> (i) the transfer, or
> (ii) one or more associated operations ...

There are two alternative conditions here:

(i) the benefit is provided out of assets which are available for the purpose as a result of the transfer; or

(ii) benefit is provided out of assets which are available for the purpose as a result of associated operations.

I refer to these as benefit causation conditions (i) and (ii). They are comparable to the relevant transfer causation conditions.

Thus, not every benefit that an individual receives falls within s.731: there must be a causal nexus between the benefit and the transfer.

Contrast the s.87 charge which applies where a beneficiary receives a benefit directly or indirectly from the trustees. The wording is different but the concept is similar.[99]

50.13.1 *B1 gives benefit to B2*

Suppose:

(1) A discretionary trust within s.731 has accumulated relevant income.

(2) In 1980, a beneficiary ("B1") receives a trust asset ("B1's asset"). Although B1 receives a benefit assume B1 does not pay tax under s.731 because he is non-resident, or qualifies for the s.731 remittance basis.[100]

(3) In 2010 B1 (independently and not as part of a prior arrangement) gives the asset to another beneficiary[101] ("B2") who is UK resident. This seems on a simple reading to be an operation associated with the transfer of assets to the trust.

B2 has received a benefit. Benefit causation condition (i) is not satisfied. However, it seems at first sight that benefit causation condition (ii) is satisfied, so B2 is at first sight subject to tax under s.731. This clearly cannot be right; but why not? It is necessarily part of the scheme of s.731 that when one beneficiary ("B1") receives a benefit, and uses the benefit to benefit another ("B2") only the first benefit counts. Otherwise what should be regarded in economic reality as a single benefit may give rise to a series of tax charges as it passes from one beneficiary to another and to another.[102] But why is this the case? The best answer is that the gift from B1 to B2 is not an operation associated with the original transfer. Mere historic association is not enough. These must be something more.[103] It is suggested that the principles to apply are those of a "clean break"

[99] See 61.8.1 (Indirect receipt from trust).

[100] Although strictly the position of B2 is the same even if B1 *is* taxed on B1's benefit, whether as a capital benefit under s.731 or as an income benefit under ITTOIA.

[101] If B1 transfers the asset to a person ("C") who is not a beneficiary of the trust (in the sense that trust income cannot be used to benefit C) then C cannot be subject to tax under s.731 as there is no relevant income in relation to C. But in a standard form discretionary trust there is a wide power to add beneficiaries; so trust income is relevant income in relation to every person in the world (whether or not they are specifically identified as "Beneficiaries" in the trust deed).

[102] Assume there is sufficient relevant income.

[103] The argument would be the same as in 48.13 (Income received as indirect consequence of transfer).

test.[104]

In *Denny v HMRC*:

(1) S (son of the taxpayer T) created a trust in the 1990's.
(2) The trust property was appointed to S (then non-resident); the date of this is not recorded.
(3) In 2000 S used the funds to lend £0.5m to his father, T. (T repaid over the following year but nothing turns on that.)

HMRC argued that T was subject to tax under s.731. The Tribunal dealt with this in a single sentence:

> We find that section [731] does not have effect because even if the loan to [T] could be considered a "benefit" within [s.732] it was not provided out of "assets which were available for the purpose", but rather from funds owned by [S] available for his own purposes. No charge arises under its provisions.[105]

The onward-gift rules also need to be considered.[106]

50.13.2 *Transfer between trusts*

Section 90 TCGA provides a code dealing with transfers between settlements for the purposes of s.87.[107] This is needed because a s.1(3) amount (trust gain) is computed in relation to settlements. Each settlement has a s.1(3) amount attributed to it.

Section 731 by contrast has no such need. Relevant income is *not* computed in relation to settlements. It is computed in relation to individuals and to transfers.[108] Thus a transfer of relevant income from trust 1 to trust 2 does not reduce the relevant income of beneficiaries of trust 1 who are also beneficiaries of trust 2.

Suppose:

(1) A trust ("trust 1") within s.731 has accumulated relevant income.
(2) Trust 1 transfers funds ("the transferred funds") to a new UK trust on similar terms ("trust 2").
(3) A beneficiary ("B") receives a benefit from trust 2 out of the

[104] See 99.7 (A gives to B, B gives to trust).

[105] [2013] UKFTT 309 (TC) at [96]. There is no detailed analysis, but this was a case where the taxpayer appeared in person, and HMRC did not instruct counsel.

[106] See 50.52 (s.731 onward-gifts).

[107] See 61.39 Transfer between trusts).

[108] See 50.20 ("Relevant income": Definition).

transferred funds.

The transfer from trust 1 to trust 2 is an operation associated with the earlier transfer to trust 1.[109] B has received a benefit and the benefit is provided out of assets which are available as a result of the transfer and the associated operation. So B is taxed under s.731. The benefit causation condition is satisfied.[110]

Suppose trust 2 was an established trust with a trust fund ("fund 2"). If B receives a benefit from fund 2, B is not taxable under s.731 because that fund is not available as a result of the transfer of assets to trust 1.

It follows that a transfer between settlements will not in principle avoid s.731 charge. There is no reason why it should (except a misconceived analogy with the s.87 rules which have no equivalent in the ToA code).

50.14 Benefit causation: 2 transfers

Suppose:

(1) A settlor by a single disposition transfers assets to a trust within s.731.
(2) Part of the trust fund is invested in assets which yield relevant income.
(3) Another part of the trust fund consists of a house occupied rent-free by B.

B pays tax on the benefit by reference to the relevant income.

By contrast, suppose:

(1) A settlor by *two* separate transfers creates *two* trusts within s.731:
    (a) a trust which holds income-producing assets and accumulates relevant income; and
    (b) a trust which holds the family home.
(2) B enjoys the benefit of free occupation in the home.

B is not subject to tax under s.731 as there is no relevant income in relation to this benefit. Thus the use of two trusts may avoid a tax charge under s.731 which would have arisen if there were one.

Indeed, it is not necessary to use two trusts. The same applies if there are two separate transfers of assets to one trust.

[109] A transfer between trusts is not a "clean break". After all, trustees are expected to pay close attention to the wishes of the settlor, and in doing so they are merely filling in the blanks left by the settlor: see 87.5.7 (Trust appointment: Filling blanks).

[110] If authority is needed, which I doubt, see *HMRC v Parry*, discussed at 74.5 (Omission: Deemed disposition).

50.15 Taxable-transferor defence

50.15.1 *"Relevantly domiciled"*

The fourth s.731 application condition is the taxable-transferor defence. Statute uses the term "relevantly domiciled" and it is convenient to consider this first. Section 732(4) ITA provides:

> For the purposes of subsection (1)(d), the individual [beneficiary] is "relevantly domiciled" at any time if at that time—
> (a) the individual is [actually] domiciled in the UK, or
> (b) the individual is regarded for the purposes of section 718(1)(b)[111] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly-domiciled resident[112]].

"Relevantly domiciled" is a opaque term; I refer to it as **"relevantly-taxable domiciled"** as a transferor who is relevantly domiciled does not qualify for s.720 protected-trust relief.

An individual is not relevantly-taxable domiciled if they are:

(1) not actually UK domiciled; and
(2) not a formerly-domiciled resident

It may be easier to follow in a table:

Actual dom	**Formerly-dom resident**[113]	**Relevantly-taxable domiciled**
yes	n/r	yes
no	yes	yes
no	no	no

The reader may think of several ways that the legislation could have been more simply drafted; in particular, the reader may wish that the drafter had not coined this opaque terminology. But there it is.

50.15.2 *Taxable transferor*

Section 732(1) ITA provides:

> (1) This section applies if ...
> (d) [i] where there is a time in the year when the individual [the beneficiary] is relevantly [taxably] domiciled,

[111] See 48.5 ("Person Abroad").

[112] See 5.4.2 (IT/CGT formerly-dom resident rule).

[113] The 15-year rule is irrelevant here.

[ii] the individual is not liable to income tax under section 720 or 727 by reference to the transfer[114]

Thus there are two classes of transferor; and in principle:

Relevantly-taxable domiciled	***s.720***	***s.731***
Yes	yes	no (taxable-transferor defence applies)
No	no	yes (defence does not apply)

The taxable-transferor defence is sensible. A transferor who is relevantly-taxable domiciled is within s.720. There is no need to apply s.731 to a transferor to whom s.720 applies. The application of s.720 gives HMRC all they should need.

50.15.3 *Transferor not relevantly-taxable domiciled*

For most transferors - those not relevantly-taxable domiciled - the protected-trust regime has:

(1) restricted s.720 (by introducing s.720 protected-trust relief); and
(2) widened s.731 (by removing the former transferor defence and replacing it by the narrower taxable-transferor defence).

A transferor who is not relevantly-taxable domiciled may be taxed under s.731 by reference to relevant income which arose before 2017/18, even though in earlier years the transferor qualified for the taxable-transferor defence. So there is an element of retrospectivity in the 2017 extension of the scope of s.731.

A transferor who is deemed UK domiciled under the 15-year rule is not relevantly-taxable domiciled and so is within s.731. The transferor is *likely* to be outside s.720. But the two sets of rules are not completely aligned. If the trust has been tainted, for instance, the transferor is within s.720 and *also* within s.731. I wonder if that is intended.

50.15.4 *Pre-2017 benefit*

Suppose a transferor receives benefits before 6 April 2017 which were not

[114] Prior to 2017, s.732(1) ITA provided:

> "This section applies if ...
>
> (d) [i] the individual [the beneficiary] is not liable to income tax under section 720 or 727 by reference to the transfer
>
> [ii] and would not be so liable if the effect of sections 726 and 730 [remittance basis] were ignored ..."

It is possible to envisage cases where the deletion of para (1)(d)[ii] (underlined) could make a difference, but it will not happen much if at all.

taxable under s.731 under the former transferor's defence. The benefits are not subsequently matched with relevant income under s.731. That is, the post-2017 s.731 charge on the transferor only applies to post-2017 benefits. Section 733(1) ITA provides:

> To find the amount (if any) of the income treated as arising under section 732(2) for any tax year in respect of benefits provided as mentioned in section 732(1)(c) take the following steps.
> Step 1 Identify the amount or value of such benefits received by the individual in the tax year and in any earlier tax years in which section 732 has applied.

In the earlier years, section 732 did not apply to the settlors: the condition in s.732(1)(d) was not met.

HMRC agree. HS262 provides:

> benefits provided to a transferor before 6 April 2017 will not be included in the calculating the transferors benefits for earlier years.[115]

50.15.5 *Transferor non-resident: pre-1996 transfer*

It has never been a requirement of s.731 that the transferor was (ordinarily) resident, at the time of the transfer, but this was a requirement of s.720 until 1996.[116]

RI 201 provides:

> ... a transferor of assets who is outside the charge to tax under Section 739 ICTA [now s.720 ITA] in respect of income arising before 26 November 1996 through being not ordinarily resident in the UK at the time of the transfer, is not assessed under [what is now s.731 ITA].

This is looking at a transferor "T" (wherever domiciled) who:
(1) makes a transfer of assets before 26 November 1996;
(2) is not UK (ordinarily) resident when T made the transfer;
(3) later becomes UK (ordinarily) resident.

T was not taxable under s.720 until 26 November 1996. I refer to income

[115] HS262, "Income and benefits from transfers of assets abroad and income from Non-Resident Trusts" (2023), updated 6 April 2023
The contrary view would lead to retrospective taxation, as a benefit received before 2017 could easily be taxed in 2017/18 wholly by reference to relevant income received before 2017.

[116] See 49.21.3 (Transferor non-resident when transfer made).

arising before that date as "pre-1996 income". If T receives a benefit after 26 November 1996[117] T is not taxable under s.731. This is right because the taxable-transferor defence does not apply to *income* liable to tax under s.720. It applies to an *individual* liable to tax under s.720. In the example, T (once resident and after 26 November 1996) becomes an individual who is "liable to tax under s.720". This is something of a windfall for T, but of course others may be taxed as the pre-1996 income is relevant income.

50.15.6 *Transferor non-resident at other times*

RI 201 does not address the situation where T is outside the scope of s.720 only because T is not resident for a period. Suppose:
(1) T is resident when T makes the transfer;
(2) T is non-resident for a period ("the non-resident period")
(3) T returns to the UK and is relevantly-taxable domiciled

The reasoning above shows that on these facts T is also outside s.731; T qualifies for the taxable-transferor defence in relation to income of the non-resident period as well as the income arising while resident.

The same applies if T becomes relevantly-taxable domiciled.

50.15.7 *Spouse of taxable-transferor*

The spouse of a relevantly-taxable domiciled transferor qualifies for the taxable-transferor defence, because references to the transferor include the spouse.[118] That only applies during the life of the transferor as after the death of the transferor, the widow/er is not a "spouse" (and the survivor of two civil partners is not a "civil partner").[119]

What is the position where:
(1) The transferor is non-resident
(2) The spouse is UK resident

The spouse may be liable under s.731. The taxable-transferor defence does not apply, because "the individual is not liable to income tax under s.720". Although the word "individual" includes the spouse:
(1) The spouse is not liable under s.720 (because s.720 liability rests only on the individual who is transferor)

[117] I need not now consider the position if the benefit was received before 26 November 1996 but the result was probably the same.

[118] See 48.18 (Spouse of transferor).

[119] See App 3.2 ("Spouse") and App 3.3 ("Civil partner").

(2) The transferor is not liable under s.720 being non-resident.

This is a somewhat selective application of the rule that of "individual" includes a spouse; but it gives the result which accords with the purpose of the taxable-transferor defence.

50.16 Capital-benefit condition

The fifth s.731 application condition is (in my terminology) the capital-benefit condition. Section 732(1) ITA provides:

> This section applies if ...
> (e) the individual [beneficiary] is not liable to income tax, under any provision that is none of
> [i] section 731 of this Act and
> [ii] sections 643A, 643J and 643L of ITTOIA 2005,
> on the amount or value of the benefit.

The drafting is ungainly, but it does not matter.

If the individual (beneficiary) *is* liable to IT, there is in general no need to apply s.731 to the benefit. The IT liability is all that HMRC should need.

The effect of para [ii] is that s.731 has priority over s.643A/J/L.[120]

If a non-resident receives income, that is not a capital payment for s.87 purposes.[121] There is no express equivalent for s.731. Before 2017 this was not needed, because benefits received by non-residents were outside s.731. Now there ought to be such a rule and it is arguably implied by a purposive construction.

50.16.1 *Benefit remittance-basis exempt*

What is the position if a trust makes an income distribution[122] to a remittance basis taxpayer, which is not remitted? The capital-benefit condition is not met. The payment is "liable" to income tax even if no tax is paid because of the remittance basis.[123] In short, an income receipt from a trust is taxed (if at all) under general principles[124] and not under s.731.

[120] See App.2.3 (Chargeable/liable to tax); 47.21.5 (Step 3: Benefit liable to IT).

[121] See 61.7 (Capital payment).

[122] For what is an income distribution, see 41.8 (Trust payment: Income/capital).

[123] See 2.3.1 (Unremitted RFI "chargeable").

[124] See 41.3 (Tier 3: Discretionary payment charge).

This question arises because the s.731 remittance basis is more limited than the ordinary ITA remittance basis. For instance, suppose:

(1) A discretionary trust within s.731 receives UK source income (or both UK and foreign source income).

(2) A remittance basis taxpayer ("B") receives income ("unremitted foreign trust income") from the trust.

B is taxable on the unremitted foreign trust income on the ITA remittance basis but assume the income is not remitted, so no tax is due. Can HMRC argue that B is subject to tax on the unremitted foreign trust income under s.731?[125] The answer is, no, because B is "liable" to IT on the benefit. By contrast, if B had received capital instead of income from the same trust, B would have been subject to tax on the benefit under s.731!

Of course, the word "liable" (like all words) takes its meaning from the context. So perhaps here HMRC may argue that unremitted foreign income is not "liable" to income tax, for the purposes of the capital-benefit condition? There is no good reason to construe the word in that wide way. This result is consistent with the rule that the taxable-transferor defence applies even to income which is remittance-basis exempt.[126] Anti-avoidance provisions, like hypotheses, should not be multiplied unnecessarily.

50.17 s.731/s.87 interaction

ToA wording: s.732(1)(e) ITA	**s.87 wording: s.97(1) TCGA**
This section applies if ...	"capital payment" —
(e) the individual [beneficiary] is not liable to income tax...	(a) means any payment which is neither—
	(i) chargeable to income tax on the recipient ...

The wording of these two provisions is effectively the same: *liable* (s.732)

[125] The s.731 remittance basis is not in point if the benefit relates to UK source relevant income: see 50.39 (s.731 remittance basis).

[126] See 50.15 (Taxable-transferor defence). A further objection to this HMRC argument is that there may be a double charge to tax:
(1) Tax under s.731 on receipt of the unremitted foreign trust income.
(2) Tax under general principles when the foreign trust income is later remitted to the UK.
Arguably, double-counting relief applies: see 51.9 (Double-counting relief). But there is no provision allowing tax paid under s.731 to be reclaimed.

and *chargeable* (s.87) are used interchangeably.[127] Before the tax law rewrite, s.740 ICTA (the predecessor to s.731) used the word "chargeable" and the rewrite change to "liable" has not altered the meaning.

The definition of "capital payment" for s.87 purposes is discussed in 61.7 (Capital payment).

In the following discussion "**a non-capital payment**" is a payment which is not a capital payment.

50.17.1 *Benefit matched on receipt*

The pre-ITA position was straightforward. Section 740 ICTA was, I think, a tax on the benefit.[128] If a person received a benefit which was subject to tax in the year of receipt, under s.740 (ie assume there was relevant income) then the benefit was a non-capital payment for CGT purposes.

It is not immediately obvious that the position is the same from 2007/08. For s.731 is not expressed as a charge on the benefit. It appears at first sight to be a charge on fictional, deemed income: the amount or value of the benefit is merely an element in the computation of the amount of the s.731 income. However it cannot be the case that the same benefit gives rise to CGT on the benefit and deemed income on an amount equal to the benefit. HMRC agree. The CG Manual provides:

> **CG38625: Capital payments** [Jul 2019]
> The exclusion for amounts chargeable to Income Tax includes both actual income receipts and amounts deemed to be income for tax purposes. For example:...
> [3] Capital distributions taxed as income under ITA07/S733 [in my terminology, s.731 income]. If section 733 applies after the year in which the benefit is received that benefit may be treated as a capital payment in the earlier years, TCGA92/S97(3).

A strained construction is needed to reach that result. There are two possible solutions:

(1) Either (contrary to first appearances) s.731 is in fact a charge on

[127] See App 2.3 (Chargeable/liable to tax).

[128] Section 740(2) ICTA provided (in short)

> "(2) ... the amount or value of any such benefit as is mentioned in subsection (1) above ... shall -
> (a) ... be treated for all the purposes of the Income Tax Acts as the income of the individual for that year..."

benefits; or

(2) The reference (in the definition of capital payment) to a payment which is "chargeable to IT" should be read as including a benefit giving rise to deemed income.

Section 97(3) TCGA (see below) adopts the first view and so does s.734(1)(c) ITA.[129] Ultimately it makes no difference for present purposes which solution one adopts, but the better view is that s.731 is a tax on the benefit.

50.17.2 *Benefit matched after receipt*

The pre-ITA position was straightforward. In the absence of express provision, a benefit which is not taxable under s.740 ICTA only for lack of relevant income might arguably have been a non-capital payment. But this argument was ruled out by s.97(3) TCGA. I set out the text of s.97(3) indicating the ITA amendments in track-change format:

> The fact that the whole or part of a benefit is by virtue of ~~section 740(2)(b) of the Taxes Act~~ section 733 of ITA 2007 treated as the recipient's income for a year of assessment after that in which it is received—
>
> (a) shall not prevent the benefit or that part of it being treated for the purposes of sections 86A to 96 and Schedule 4C as a capital payment in relation to any year of assessment earlier than that in which it is treated as his income; but
>
> (b) shall preclude its being treated for those purposes as a capital payment in relation to that or any later year of assessment.

Post ITA this wording is not apt because under s.731 (on a first reading) a benefit is not "treated as the recipient's income". Section 731 is a charge on deemed income. But it is obviously intended that a benefit outside s.731 (for lack of relevant income) is a capital payment for CGT; and it is considered that s.731 should be regarded as a tax on the benefit.

Thus suppose a benefit is conferred, but is not subject to s.731 in year of receipt for lack of relevant income :

(1) The benefit can be taxed as a capital payment in year of receipt.

(2) If the benefit is not subject to s.87 in year of receipt, for lack of s.1(3) amounts (trust gains) the s.731 charge in the following year has priority over the s.87 charge in that year; and so on.

[129] See 50.19 (Deduction for s.87 charge).

50.17.3 *Benefit remittance-basis exempt*

A benefit which falls within s.731 but qualifies for the s.731 remittance basis is taxed on the remittance basis, but is nevertheless "chargeable" to tax, so it is a non-capital payment.[130] HMRC agree. Residence and Domicile: FAQ provides:

> **Q** Could it be clarified that where a payment has been made - such as one under s731 which has attracted relevant income but has been protected from tax by non remittance - such a payment will not be regarded as a capital payment for s87 purposes?
> **A** Where a payment (benefit) results in an amount becoming taxable by virtue of s731 ITA 2007, but the charge is deferred by a remittance basis claim because no relevant amount has at that time been remitted to the UK, the benefit will not also be taken into account for the purpose of s87 TCGA.[131]

By contrast, s.731 does not apply to a benefit which does not meet any one of the five s.731 application conditions and such a benefit is a capital payment.

50.17.4 *Benefit: Motive defence applies*

Where the motive defence applies, the individual who receives a benefit is not *liable* to income tax under the ToA provisions. It might be argued that the benefit is chargeable (even if the individual is not liable). But the context shows that liable and chargeable here have the same meanings. So a benefit where the motive defence applies is a capital payment: it is not chargeable to IT within the meaning of the capital payment definition.[132]

50.18 Computation of s.731 income

50.18.1 *Introduction*

Section 733 ITA does two things:

[130] See 2.3.1 (Unremitted RFI "chargeable").

[131] *https://www.gov.uk/tax-foreign-income/non-domiciled-residents* The rubric to the FAQ provides: "Most of the FAQs have now been incorporated into the new guidance. Those that have not are reproduced below."

[132] This is consistent with the pre-2006 wording that "Sections 739 and 740 shall not apply" where the motive defence applied, so it was clear that a benefit where the motive defence applied could be a capital payment.

(1) it tells us the amount of s.731 income. I refer to the computation made under s.733 as the "**s.733 computation**".
(2) It tells us the year that s.731 income arises.

Section 733 is only a computation/timing provision. It does not apply unless the five s.731 application conditions are met.

In outline, where an individual receives a benefit, s.731 income is the lesser of:
(1) the value of the benefit; and
(2) the amount of relevant income[133]

The rewrite legislation was defectively drafted (it reproduced defects from the source legislation and added some new ones). It could serve as a case study as to how much obscurity can be found in method-statement drafting, an innovation of the Tax Law Rewrite in their search for clarity.[134] The 2017 reforms made matters even more obscure.

The task here is to find a construction which (if loose) will yield a workable scheme of taxation.

There are six steps in the computation:

Step	**Topic**
1	Total Benefits
2	Total Untaxed Benefits
3	Relevant income
4	Total Relevant Income
5	Available Relevant Income
6	Conclusion: amount of s.731 income

I write most of these terms with initial capitals, to reflect the technical nature of the expression.

50.18.2 *Step 1: Total Benefits*

In order to follow Step 1, we need to read it together with s.732 and the opening words of s.733. So far as relevant this provides:

> **732(1)** This section applies if—
> (a) a relevant transfer occurs,
> (b) an individual receives a *benefit* in a tax year.

[133] Contrast s.720, which (in principle) imposes a charge on the whole of the income accruing to the person abroad.

[134] See 61.15.7 (Method statements: Critique).

> (c) the *benefit* is provided out of assets which are available for the purpose as a result of—
> (i) the transfer, or
> (ii) one or more associated operations,
> (d) [taxable-transferor defence]
> (e) the individual is not liable to income tax on the amount or value of the *benefit*...

Assuming these conditions (which I call "the s.731 application conditions") are satisfied, we read on to s.732(2):

> Income is treated as arising to the individual [beneficiary] for income tax purposes for any tax year for which section 733 provides that income arises.

With that in mind, we can turn to the s.733 computation:

> **733(1)** To find the amount (if any) of the income treated as arising under section 732(2) [s.731 income] for any tax year in respect of *benefits provided as mentioned in section 732(1)(c)* take the following steps.
>
> *Step 1 [Total Benefits]*
> Identify the amount or value of *such benefits* received by the individual
> [1] in the tax year and
> [2] in any earlier tax years *in which section 732 has applied.*
> The sum of those amounts and values is "the total benefits".

I adopt the following terminology:
Total Benefits: benefits within Step 1 (this is the statutory term)
Present year Total Benefits: benefits within Step 1[1]
Earlier year Total Benefits: benefits within Step 1[2]

There are two obscure references in Step 1:

(1) Which benefits of the current year are counted as Total Benefits? One does not identify *all* benefits received by the individual, but only "such benefits". The drafter has overlooked the rule that "such" ought only to be used when it refers to a clear antecedent.
   (a) The narrow view: "such benefits" refers back to the words in the first sentence of s.733(1): "benefits provided as mentioned in s.732(1)(c)". So "such benefits" means all benefits which meet the benefit causation condition.
   (b) The wider view: "such benefits" refers back to s.732(1) which uses the word benefit three times. "Such benefits" means

benefits in respect of which all five s.731 application conditions are satisfied (not just the benefit causation condition).

On the narrow view an income-taxable benefit can count as "such benefits"; on the wider view an income-taxable benefit does not count (because of the capital-benefit condition)

The wider view is to be preferred as it yields more sensible results.[135]

(2) Which benefits from earlier years are Total Benefits? One does not count *all such benefits* received by the individual, but only such benefits in tax years "in which s.732 has applied". It is not of course enough that *section 732 applies*, for the section no doubt applies every year to some taxpayer or other. Section 732 must apply having regard to the circumstances of the transfer or the individual in the earlier year.

HMRC paraphrase Step 1 as:

> Add together the benefits received in the tax year and in any earlier year in which benefits charge could or has applied.[136]

If this is right, the definition of "Total Benefits" can be expanded to mean the following:

[1] *Present year Total Benefits* must meet the following conditions (in order to be "such benefits"):

(a) a relevant transfer has occurred
(b) an individual("B") receives a benefit in the present tax year
(c) the benefit is provided out of assets which are available for the purpose as a result of—
(i) the transfer, or
(ii) one or more associated operations,
(d) B is not a relevantly/taxable domiciled transferor; and
(e) B is not liable to income tax on the benefit (apart from section 731).

[2] *earlier year benefits* must meet the following conditions (in order to be "such benefits" and to meet the requirement that s.732 applies in the year):

[135] If one adopted the first view one could avoid the problems which arise by a generous application of s.743 ITA (no duplication of charges); but it is better to avoid that solution since the relief depends on HMRC discretion.

[136] See 50.18.8 (s.733 computation example).

(a) The relevant transfer has occurred

(b) B received a benefit in the earlier year ("the earlier year benefit").

(c) the earlier year benefit is provided out of assets which are available for the purpose as a result of -
(i) the same transfer as [1] (a) above, or
(ii) the same associated operations as [1] (c) above

(d) Pre 2017 benefits: B is not the transferor; post 2017 benefits: B is not a relevantly-taxable domiciled transferor

(e) B is not liable to income tax on the earlier year benefit (apart from section 731).

50.18.3 *Step 2: Total Untaxed Benefits*

Step 2 provides:

[1] Deduct from the total benefits the total amount of income treated as arising to the individual under section 732(2) [s.731 income] for earlier tax years as a result of the relevant transfer or associated operations

[2] except that,
[a] where any of that income [s.731 income] is matched deemed income for the purposes of section 731(1A),[137]
[b] that matched deemed income is to be deducted only so far as it is matched deemed income on which tax has been charged under section 731 for an earlier tax year.

The result is "the total untaxed benefits".

We need a label to describe the deduction, as it is impossible to follow a discussion which refers more than once to "the total amount of income treated as arising to the individual under section 732(2) for earlier tax years as a result of the relevant transfer or associated operations". I refer to the deduction as "**prior-year s.731 income**".

A straightforward example is:

Year 1: B receives benefit	£100
Year 2: B receives benefit	£100
Total Benefits	£200

But assuming in year 1 B was treated as receiving £100 s.731 income, then the prior-year s.731 income is deducted, so Total Untaxed Benefits is computed thus:

[137] See 50.45.1 (Matched s.731 Income).

Total Benefits	£200
Prior-year s.731 income	-£100
Total Untaxed Benefits	£100

Section 734 ITA provides for another deduction from Total Untaxed Benefit: since this only arises infrequently I deal with it separately below; see 50.19 (Deduction for s.87 charge).

50.18.4 *Steps 3/4: Total Relevant Income*

Steps 3 and 4 concern relevant income and Total Relevant Income, and are discussed as a separate topic.

50.18.5 *Step 5: Available Relevant Income*

Step 5 provides:

> Deduct from total relevant income—
> (a) the amount deducted at Step 2 [ie prior-year s.731 income], and
> (b) any other amount which may not be taken into account because of section 743(1) and (2) (no duplication of charges).
> The result is "the available relevant income".

The deduction in Step 5(b) is discussed in 51.9 (Double-counting relief).

What is the reason for the deduction in Step 5(a)? EN ITA explains a double taxation problem in the pre-ITA law:

> Section 740 of ICTA [now s.731 ITA] leaves several questions unanswered.
> It provides that
> [a] if the relevant income exceeds the benefit, the amount or value of the benefit is chargeable to income tax in the individual's hands,
> [b] but does not make provision about the treatment of the excess of the relevant income over that amount.
> [c] Taken literally and in isolation, section 740(2)(a) suggests that whenever a benefit is received the amount or value of the benefit must be compared with *all* the relevant income that has arisen on or after 10 March 1981, regardless of whether the receipt of previous benefits has involved charges by reference to that income before.[138]

[138] Section 740(2) ICTA provided so far as relevant:
" ... the amount or value of any such benefit as is mentioned in subsection (1)

For instance, if the relevant income is only £100, and T receives benefits of £100 annually, T would appear to be taxed each year on £100, so the relevant income in effect comes into charge again and again. I refer to this as the **"RI multiple-counting problem"**. I confess I had not noticed the problem, but point [c] seems correct if one takes the words "literally and in isolation" (which is of course never the right approach).

The EN then give two independent reasons why no problem arose, that is, it identifies two pre-ITA solutions to the RI multiple-counting problem:

> But
> [1] relevant income is defined as income that can directly or indirectly be used to provide a benefit in the tax year [ie in the year that the tax charge arises], and
> [2] section 744(1) and (2)(c)[139] of ICTA [now s.743 ITA] prevent the same relevant income being taken into account more than once.
> It is therefore considered that the *surplus* relevant income *(if it continues to be available)* has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits. Section 733 of this Act gives effect to this view by providing [only] for *surplus* relevant income to be carried forward.[140]

Note that it is assumed in solution [1] that in order to identify the amount of relevant income, one asks whether income can be used to provide a benefit at the time the tax charge arises, ("if it continues to be available") not at the time that the relevant income accrues.

Example 1: one beneficiary

Suppose a trust with Total Relevant Income of £200 and:
(1) Year 1: B receives a benefit (£100) and £100 s.731 income. Assume the benefit is not paid out of relevant income.
(2) Year 2: B receives another benefit (£200).
The computation in year 2 is:

Step 1: The Total Benefits of B are £300.
Step 2: The Total Untaxed Benefits of B are computed thus:

above, ... shall— (a) to the extent to which it falls within the amount of relevant income of years of assessment up to and including the year of assessment in which the benefit is received, be treated for all the purposes of the Income Tax Acts as the income of the individual for that year".

[139] The original erroneously reads: (2)(b).

[140] Change 1113, p.472; emphasis added.

Total Benefits	£300
Prior-year s.731 income	- £100
Total Untaxed Benefits:	£200

Steps 3 and 4: The Total Relevant Income is £200.
Step 5: The Available Relevant Income is computed thus:

Total Relevant Income	£200
Prior-year s.731 income	- £100
Available Relevant Income:	£100

Step 6: the amount of s.731 income in year 2 is the lower of Total Untaxed Benefits and Available Relevant Income = £100.

That is fair and reasonable and Tax Law Rewrite's solution to the RI multiple-counting problem has worked.

Example 2: two beneficiaries

Now suppose a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731
(2) Year 2: C (not B) receives a benefit (£200)

The computation for C in year 2 is:
Step 1: The Total Benefits of C are £200.
Step 2: The Total Untaxed Benefits of C are £200 (nothing is deducted).
Step 5: Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

Here the Step 5(a) deduction does not prevent double taxation. The Tax Law Rewrite team have only partly solved the RI multiple-counting problem which (on a literal reading and taken in isolation) they identified. They have solved the problem where the *same* beneficiary receives benefits in different years. They have not solved it where *different* beneficiaries receive benefits in different years. Why is C not taxed on £200?

C must fall back on one of the two pre-ITA solutions identified by the Tax Law Rewrite team:

(1) that distributed income ceases be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):

(2) Step 5(b): double-counting relief.

Solution (2) applies if the distribution to B did not consist of relevant income. It depends on HMRC discretion, but that was the position before the ITA rewrite, so nothing has changed.

Example 3: one beneficiary receives a distribution of relevant income

The second difficulty is that the rewrite team solution – a deduction for prior-year s.731 income – does not link in with the first of the pre-ITA solutions to the RI multiple-counting problem. Suppose a slight variant to example 1: a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 s.731 income. Assume the benefit *is* paid out of relevant income.[141]

(2) Year 2: B receives another benefit (£200).

The computation in year 2 is:

Step 1: The Total Benefits of B are £300.

Step 2: The Total Untaxed Benefits of B is computed thus:

Total Benefits	£300
Prior-year s.731 income	- £100
Total Untaxed Benefits:	£200

Steps 3 and 4: The Total Relevant Income is £100 (because £100 has already been distributed and is not available to provide a benefit.)

Step 5: The Available Relevant Income appears to be:

Total Relevant Income	£100
Prior-year s.731 income	−£100
Available Relevant Income:	£0??

B should have £100 s.731 income in year 2, not £0! I think that the best solution is to say that where relevant income is distributed, no further deduction is allowed at Step 5, so there is no double deduction. Though this is reading a good deal into the provision.

50.18.6 *Computation under s.731 remittance basis*

Where the s.731 remittance basis[142] applies, s.731 income is still treated as accruing to the foreign domiciled individual under s.731, even though not remitted. So the s.731 remittance basis does not prevent a deduction

[141] For instance, trust income is accumulated and then paid to the beneficiary as capital.

[142] See 50.39 (s.731 remittance basis).

under Step 2 (and Step 5(a)) if applicable.

Suppose the facts of example 1 or 3 above, but the benefit which B received in year 1 was a foreign benefit which qualified for the s.731 remittance basis. The computations are exactly the same. Thus benefits to B within the s.731 remittance basis reduce Available Relevant Income in relation to B (whether or not made out of relevant income) just as where the arising basis applies.

Suppose the facts are as in example 2 above, but the benefit which B received in year 1 was a foreign benefit which qualified for the s.731 remittance basis. There is as before no deduction under Step 2 or Step 5, but C must fall back on the two pre-ITA solutions to the RI multiple-counting problem:

(1) that distributed income ceases be relevant income (because it ceases to be available); or (if relevant income is not distributed):
(2) Step 5(b): double-counting relief.

Solution (2) depends on HMRC discretion, but it is considered that the relief ought to apply to relieve C. Of course, B may not agree. Suppose a variant of example 2:

Example 4: two beneficiaries, one remittance basis user

Suppose a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731. B is a remittance basis taxpayer and does not remit the benefit so no tax is due.
(2) Year 2: C receives a benefit (£200).
(3) Year 3: B receives the benefit in the UK.

The computation for C in year 2 is the same as example 2:
Step 1: The Total Benefits of C are £200.
Step 2: The Total Untaxed Benefits of C are £200 (nothing is deducted).
Step 5: Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

Is C taxed on £200? C must fall back on one of the two pre-ITA solutions identified by the Tax Law Rewrite team:

(1) that distributed income ceases be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if

relevant income is not distributed):

(2) Step 5(b): double-counting relief.

If the distribution to B did not consist of relevant income solution (2) is the only one available. It depends on HMRC discretion but it is considered that it ought to be allowed. It follows that C will be taxed in year 3. C may argue that B ought to be taxed and B's may be subject to tax remittance should be tax free, but that seems less "just and reasonable". That is consistent with the s.87 rules where a s.1(3) amount (trust gain) may be matched with a capital payment to a remittance basis taxpayer.

50.18.7 *Step 6: Computation of charge*

We have at last reached the final step of the s.733 computation. Step 6 is as follows:

> Compare the total untaxed benefits and the available relevant income.
> The amount of the income treated as arising under section 732(2) [s.731 income] for any tax year is the total untaxed benefits unless the available relevant income is lower.
> If the available relevant income is lower, it is the amount of income treated as so arising.

That is, the s.731 income is the lesser of:

(1) Total Untaxed Benefits; and

(2) Available Relevant Income

See too 51.15 (Benefits exceed relevant income).

50.18.8 *s.733 computation example*

ToA guidance provides:

> **INTM601760 The benefits charge: Example**[143]
> This example assumes all years are after April 2007 but before April 2013 and that all of the conditions necessary for a benefits charge to apply are met.
> A transfer of assets is made in Year 1 as a result of which income arises to a person abroad. An individual who is resident in the UK and who did not make the transfer receives cash benefits, as set out below, out of assets which are available for the purpose as a result of the transfer and associated operations. The benefits are not otherwise liable to income tax and the individual is not liable to an income charge [the s.720 charge].

[143] I have slightly tweaked the layout for clarity:

Year	Relevant income	Benefits received	s.731 income[144]
1	£10,000	£5,000	£5,000
2	£20,000	£10,000	£10,000
3	£10,000	£10,000	£10,000
4	£10,000	£5,000	£5,000
5	£50,000	£100,000	

Step 1 – 'the total benefits'

Add together the benefits received in the tax year (Year 5) and in any earlier year in which benefits charge could or has applied. The earlier years to take into account are Years 1 – 4.

Year 5	Benefit	£100,000
Years 1 – 4	Benefits	£30,000
The total benefits		£130,000

Step 2 – 'the total untaxed benefits'

Deduct from the total benefits, the amount of income treated as arising to the individual in any earlier tax years:

The total benefits		£130,000
Income for benefits charge	Years 1 - 4	- £30,000
The total untaxed benefits		£100,000

Step 3 – 'the relevant income of the tax year'

The income of year 5 which can be used for providing a benefit for the individual is £50,000, which is 'the relevant income of the tax year'.

Step 4 –'total relevant income'

Add together the relevant income of year 5 and the relevant income of years 1-4.

Relevant income of year 5	£50,000
Relevant income of yr 1-4	£50,000
Total relevant income	£100,000

Step 5 – 'the available relevant income'

Deduct from the total relevant income, the amount deducted at Step 2. In this example there are no other deductions to be taken into account.

Total relevant income	£100,000
Deducted at Step 2	- £30,000
The available relevant income	£70,000

Step 6 – the amount of income treated as arising for the tax year

Compare the result of Step 2 with the result of Step 5:

Total untaxed benefits	£100,000
Available relevant income	£70,000
The lower of the two is	£70,000

The amount treated as income arising to the individual in year 5 is therefore £70,000. This is neither the relevant income of that year nor the benefits received in that year.

[144] [From original text] To determine whether there is income treated as arising to the individual in Year 5 and if so what amount apply the Steps formula. Assume for this that the formula was also applied in Years 1 – 4 and resulted in income being treated as arising as set out here.

It may be noted that there are still £30,000 of benefits unmatched in this example therefore if for example there was further relevant income in a subsequent year a further Steps calculation would be made for that year.

50.18.9 *Computation: Motive defence lost*

The second example concerns a case where the motive defence formerly applied but was lost following an associated operation with an avoidance purpose.[145]

ToA guidance provides:

> **INTM601780 Example - where modifications apply**[146]
> The income and benefits set out in the table below result from a transfer of assets in 2000-01. It is agreed that an exemption applies to the transfer such that there is no income or benefits charge.
> Following the death of the transferor a transaction is undertaken in 2007-08 in relation to the assets of the fund, designed for the purpose of tax avoidance. It is agreed no exemption applies to prevent a potential benefits charge for 2007-08.
> What is the benefits charge for that year?
>
> | **Year** | **Relevant income** | **Benefits received** |
> |---|---|---|
> | 2000-01 | £50,000 | £10,000 |
> | 2001-02 | £50,000 | £10,000 |
> | 2002-03 | £50,000 | £10,000 |
> | 2003-04 | £50,000 | £10,000 |
> | 2004-05 | £50,000 | £10,000 |
> | 2005-06 | £50,000 | £10,000 |
> | 2006-07 | £50,000 | £10,000 |
> | 2007-08 | £5,000 | £10,000 |
>
> First there is no charge under either the income or benefits charge for 2000-01 to 2006-07 as an exemption [motive defence] applies in relation to the original transfer
> For 2007-08 there would be no benefits charge if an exemption applies.
> As there are both pre-5 December 2005 and post-4 December 2005 transactions, the relevant exemption is in section 740 ITA 2007. (see INTM602840).
> As the transaction after 4 December 2005 does not meet the conditions for exemption section 740(3) requires the modifications described at INTM601740 to apply for the purpose of the benefits charge.
> To determine the amount of income (if any) to be treated as arising to the individual for 2007-08 the Steps approach has to be applied and with the specified modifications (INTM601720).
> **Step 1 – 'the total benefits'**
> Add together the benefits received in the tax year (2007-08) and in any earlier

[145] See 52.32 (Pre-2005 transfer; post-2005 operation).

[146] I have slightly tweaked the layout for clarity:

year in which benefits charge could or has applied.

In this example there are two possible approaches to 'earlier years'. Either that there are no earlier years to be taken into account under this Step as there was an exemption and thus the provisions did not apply (all earlier years were pre-ITA 2007). Or that the benefits of all earlier years have to be taken into account and that the modifications provided by section 740(6)-(7) ITA 2007 apply to this Step. The modification if applied in this way would seem to require 2000-01 – 2004-5 benefits to be left out and that for 2005-06 to be time apportioned. If applied in this way the benefit received in 2006-07 would also be taken into account so that "the total benefits" would then become £10,000 + £10,000 plus £3,333 (4/12 × £10,000). Such an approach would not seem to be consistent with an exemption applying for 2006-07, as it would in effect bring those benefits back into the calculation in 2007-08 and result in an equivalent amount of income being charged. HMRC take the view that the apportionment required by section 740(7) will only be relevant where there are transactions in 2005-06 post-4 December, with a pre-5 December transaction in that or an earlier year. In this example therefore there are no earlier years to take into account in this Step as there are no earlier years to which a benefits charge applied, or to which a benefits charge would have applied but for an insufficiency of relevant income to match against benefits.

2007-08	Benefit	£10,000
2000-01 to 2006-07	Exemption for all yrs	£0
The total benefits		£10,000

Step 2 – 'the total untaxed benefits'

Deduct from the total benefits, the amount of income treated as arising to the individual in any earlier tax years:

The total benefits		£10,000
Income for benefits charge	2000-01 – 2006-07	£0
The total untaxed benefits		£10,000

Step 3 – 'the relevant income of the tax year'

The income of 2007-08 which can be used for providing a benefit for the individual is £5,000, which is 'the relevant income of the tax year'.

Step 4 –'total relevant income'

Add together the relevant income of 2007-08 and the relevant income of years 2000-01 – 2006-07. The modification provided by section 740(5) requires the earlier years' income be taken into account even though there was an exemption.

Relevant income of 2007-08	£5,000
Relevant income of 2000-1 to 2006-07	£350,000
Total relevant income	£355,000

Step 5 – 'the available relevant income'

Deduct from the total relevant income, the amount deducted at Step 2. In this example there are no other deductions to be taken into account.

Total relevant income	£355,000
Deducted at Step 2	£0
The available relevant income	£355,000

Step 6 – the amount of income treated as arising for the tax year

Compare the result of Step 2 with the result of Step 5:

Total untaxed benefits	£10,000
Available relevant income	£355,000
The lower of the two is	£10,000

The amount treated as income arising to the individual in 2007-08 is therefore £10,000.

If in this example the 'tainting' transaction had taken place after 4 December 2005 and before 5 April 2006, then even though the ITA 2007 Steps approach did not apply for that year (see INTM601800) the effect would have been the same and applying the 'modifications' would have resulted in a comparison of time apportioned benefits of 2005-06 with relevant income of that and all earlier years. If the facts above for 2007-08 had been those of 2005-06 the result would have been a benefits charge of £3,333 for 2005-06 regardless of when after 4 December 2005 (and before 5 April 2006) the tainting transaction took place.

50.18.10 *s.733 computation: Critique*

The reader who has laboriously followed the text to this point will agree that s.733 needs to be rethought and rewritten.

50.19 Deduction for s.87 charge

Section 734 ITA provides:

> (1) This section applies if—
>
> (a) benefits provided as mentioned in section 732(1)(c) are received in a tax year,

That is, the benefit is in principle taxable under s.731.

> (b) for that tax year the whole or part of any benefits so provided is a capital payment to which section 87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 applies (chargeable gains: gains attributed to beneficiaries),

That is, the benefit is in principle taxable under s.87.

> (c) it is such a payment because the total untaxed benefits[147] exceed the available relevant income (see Step 6 in section 733(1)) and so it is not treated as income arising to the individual under section 732(2), and

That is, the benefit was not subject to income tax for lack of relevant income.

[147] Section 734(4) provides:

"In this section 'the total untaxed benefits' and 'the available relevant income' have the same meaning as in section 733(1) (see Steps 2 and 5)."

> (d) because of that capital payment chargeable gains are treated as accruing to the individual in that or a subsequent tax year under any of the provisions referred to in para (b) [s.87, 89(2), para 8 sch 4C].

The CGT charge applies under the rules set out in 50.17 (s.731/s.87 interaction).

> (2) For any tax year after one in which such chargeable gains are so treated, the amount of income treated as arising to the individual under section 732(2) [s.731 income] in respect of benefits provided as mentioned in section 732(1)(c) as a result of the transfer or operations in question is calculated as follows.
> (3) The amount is calculated under section 733(1) as if the total untaxed benefits were reduced by the amount of those gains.

This ensures that a benefit charged under s.87 is not later also charged to IT.

50.20 "Relevant income": Definition

"Relevant income" is a central but perplexing concept. The absence of litigation on the subject is because HMRC have in practice generally applied the legislation in a way which leads to a sensible result.

Section 733(1) Step 3 provides the definition:

> *Step 3*
> Identify the amount of any income which—
> (a) arises in the tax year to a person abroad, and
> (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.
>
> That amount is "the relevant income of the tax year" in relation to the individual and the tax year.

The condition in Step 3(a), that income arises to a person abroad, is the same as in the transfer of asset conditions.[148]

Strictly one should not use the term "relevant income" in the abstract. Relevant income can exist only *in relation to an individual.* There may be relevant income in relation to A which is not relevant income in relation to B (eg income of a discretionary trust under which A can benefit and B cannot). There may be relevant income in relation to anyone in the world (eg income of a discretionary trust with a power to benefit anyone

[148] See 48.7 (Income "payable" to person abroad).

in the world). But where the context is clear, one may refer to "relevant income" in isolation (leaving the words "in relation to the individual" and the identity of that individual to be inferred).

The s.731 concept "relevant income" must not be confused with "relevant foreign income."

50.20.1 *Pre-1981 income*

Para 133 sch 2 ITA provides:

> (1) Section 732 (non-transferors[149] receiving a benefit as a result of relevant transactions) applies whenever the relevant transfer referred to in that section took place.
> (2) But the relevant income referred to in section 733(1) (by reference to which the amount of income treated as arising under section 732 [s.731 income] is determined) does not include income that arose before 10 March 1981.

50.21 Deemed income of person abroad

50.21.1 *Capital treated as income*

Although the statute refers to "income", capital receipts of the person abroad are sometimes treated for tax purposes as income of the person abroad, and such receipts can therefore be relevant income.[150]

50.21.2 *Stock dividend/accrued income*

Suppose non-resident trustees receive a stock dividend from a UK company. In that case "income is *treated* as arising to the trustees": see s.410(3) ITTOIA. The amount is deemed "income" for ToA purposes, but it is considered that it is not relevant income. The amount is fictional so one cannot say that it "can" be used for the benefit of any beneficiaries. The shares issued in the stock dividend can be used for that purpose, but they are not the same income.[151] The distinction between a gain and an amount equal to the gain is one on which HMRC insist in a DTA context;[152] here the distinction between the actual stock dividend and the fictional income is similar but clearer.

[149] The reference to non-transferors is inaccurate after 2017, but it does not matter.

[150] See: 48.15 (Capital receipts deemed income); 70.10.2 (Non-resident co/institution); 67.10 (OIG arising to non-resident trust).

[151] See to 48.15 (Capital receipts deemed income).

[152] See 107.22 (Characterisation).

The same point arises if a person abroad is treated as receiving AIP income. The amount is treated as income becoming payable to the person abroad for ToA purposes[153] but it is considered that it is not relevant income. The amount is fictional so one cannot say that it "can" be used for the benefit of any beneficiaries. The proceeds of the AIP securities can be used for that purpose, but that is not the same income.

HMRC may argue that one should carry through the deeming:[154] if the person abroad is treated as receiving income, the (deemed) income must be treated as if it can be used to benefit beneficiaries (even though it does not exist). If that were right, however, two difficulties would arise:

(1) How would the rule that distributed income is not relevant income[155] operate in this context? In order to distribute the AIP income would it be necessary to distribute the entire proceeds of the transfer (sale) of the security? Perhaps the matter would be analogous to the DDS scheme.[156] Then the only way to avoid relevant income by distribution would be to distribute the entire proceeds of the securities. Perhaps a division would be possible as it is under the mixed fund rules.[157]
(2) How does one deal with AIP loss relief? This tends to support the view that AIP income is not relevant income.

50.22 Life tenant: Relevant income

Consider an interest in possession trust: one where the trust income is payable to a beneficiary ("L").

If L is UK domiciled and resident, the trust income is not relevant income because it does not meet the condition in Step 3(a). It does not arise to a person abroad.

If L is not UK domiciled then the condition in Step 3(a) is satisfied. Nevertheless, the trust income is not relevant income because it is distributed.[158]

[153] See 28.14 (ToA rules /AIP income).

[154] For the general approach to deeming provisions, see App 8.2 (Deeming provisions: Construction).

[155] See 50.29 (Income distributed as it arises) to 50.27 (Distributed income: HMRC view).

[156] See 29.15.1 (s.731 ITA).

[157] See 28.9.2 (Mixed funds: Sale with accrued interest).

[158] See 50.29 (Income distributed as it arises). Even if that were wrong:
(1) The trust income is not relevant income in relation to L. One would not say in

There is nothing surprising in this conclusion: there is no need for s.731 in these circumstances, and one would not expect it to apply. If it did apply there could be double taxation – L being taxed on the income L receives, and on other benefits (if L receives any) to the value of the relevant income.

50.23 Settlor-interested trust: Relevant income

One must consider UK resident and domiciled settlors separately from those who are non-resident or domiciled.

50.23.1 *UK resident and dom settlor*

Suppose:

(1) a non-resident discretionary trust within s.731;

(2) a UK resident and domiciled settlor ("S") has an interest in the trust.

All the trust income is within the scope of s.624 ITTOIA. Section 624 ITTOIA provides in such a case:

> Income which arises under a settlement is treated for income tax purposes as the income of the settlor *and of the settlor alone ...*
> (Emphasis added)

The trust income is not relevant income as it does not meet the condition in Step 3(a): the income is treated by s.624 as accruing to S, so it cannot be regarded as arising to a person abroad. This is so even if S (wrongly) fails to pay the tax due on the income.

50.23.2 *UK resident non-dom settlor*

Now suppose:

(1) a non-resident discretionary trust within s.731;

(2) a UK resident but not UK domiciled settlor ("S") has an interest in the trust; and

(3) the trust income is actually subject to tax under s.624 ITTOIA (the s.624 remittance basis does not apply).[159]

ordinary language that the trust income *can* be used for providing a benefit for L. The income *is* the property of L.

(2) The trust income is not relevant income in relation to any other person. Since the income belongs to L, one cannot say that the income "can" be used to benefit anyone else. See 50.25 (Income which "can" be used to benefit another).

[159] This may be because there is UK source income, or foreign income is received in the UK, or S does not claim the remittance basis. See 47.8 (Section 624 remittance

In this case the condition in Step 3(a) is satisfied since even applying s.624 the income is treated as accruing to S. However, it is considered that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which "can be used for providing a benefit" for anybody else. So the income is not relevant income.

The position is different if and to the extent that the income is within the s.624 remittance basis. Section 624 does not apply to income which qualifies for the s.624 remittance basis.[160] Accordingly the trust income can, in principle, be relevant income for s.731. What happens then if the income is later remitted, so it becomes taxable on S under s.624? It is tentatively suggested that the income retrospectively ceases to be relevant income, so that tax paid under s.731 can be recovered by a beneficiary. In practice this could arise only in fairly unusual circumstances, eg where:

(1) Year 1
  (a) a beneficiary ("B") receives a benefit;
  (b) foreign source income arises on which the settlor ("S") is not subject to tax as the s.624 remittance basis applies. This is relevant income in relation to B, so B pays tax under s.731.
(2) Year 2: that income is remitted to the UK, so S pays tax under s.624.

Where s.720 applies (as well as s.624) see 50.24 (s.720 income: Relevant income).

50.23.3 *Non-resident settlor*

Suppose now:
(1) a non-resident discretionary trust within s.731; and
(2) a non-resident settlor ("S") has an interest in the trust.

Section 624 does not apply to foreign source trust income.[161] Accordingly foreign source income may in principle be relevant income.

Section 624 does apply to UK source income. Here too it is submitted that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which "can be used for providing a benefit" for anybody else. So UK source income is not relevant income.

basis).

[160] See 47.8 (s.624 remittance basis).

[161] See 47.9 (Non-resident settlor).

50.23.4 *HMRC practice*

RI 201 provides:

> ... income will not in practice be charged on both the beneficiary under s 740 and the settlor under the settlements legislation, where an assessment could in strictness be made on each of them in a case involving income that is accumulated within a discretionary offshore trust in which the settlor retains an interest, and then paid to a beneficiary as capital.[162]

This does not grapple with the technicalities of the legislation, but one can collect a sensible intention to avoid double taxation.

50.24 s.720 income: Relevant income

The analysis is different if income falls within s.720 and not s.624 because the wording of the provision is different.

The application of s.720 does not prevent income from being relevant income, as the s.720 income is different income from the income of the person abroad.[163]

Double-counting relief prevents a double charge.[164] This is surprising, because it is not clear who qualifies for the relief: the transferor or a beneficiary who receives a benefit. But it is difficult to construe the legislation any other way.

50.25 Income "can" be used to benefit

An essential feature of the definition of relevant income in relation to an individual is the condition in Step 3(b) that the income "can be used for providing a benefit" for the individual.

"Can", like most common words, has a variety of meanings, but the meaning here must be:

[162] RI 201 continues: "However, in both cases this is subject to the proviso that the Revenue may sometimes raise alternative assessments, for example where a taxpayer has not provided full information." But there can be no objection to that.

[163] See 49.30 (DT relief: s.720 income). For pre-2013 income, the analysis was different but the end result was the same: the income of the person abroad was deemed to accrue to the transferor, but it also accrued to the person abroad. See the 2012/13 edition of this work para 29.18.

[164] See 51.14 (s.720/s.731 overlap).

> Expressing a possible contingency; = May possibly.[165]

The INT Manual provides:

> **INTM601700 Relevant income** [Jul 2023]
> It is likely to be largely a question of fact whether income can be used for providing a benefit, and regard should be had, where necessary, to relevant documentation of the person abroad, as well as any applicable foreign law that may have a bearing on the way the person abroad acts and operates.

50.25.1 *Income of individual*

Of course, any income "can" be used for the benefit of any individual in the world if it is received by a beneficial owner who so directs. That contingency must plainly be ignored or the definition does not work.[166]

50.25.2 *Income of co held by individual*

Suppose an individual, T, transfers assets to a non-resident company wholly owned by T. Assume the transfer does not qualify for the motive

[165] *Oxford English Dictionary* (2nd ed., 1989). Another meaning of "can" is "to be able; to have the power, ability or capacity". This meaning applies where one says that a *person* "can" do something. This meaning is not applicable here where the subject of "can" is the income. *Income* does not have any power, ability or capacity: only a *person* does. There is a fine discussion of *can* in Williams, *Tradition & Change in Legal English* (2005), at 2.8.

[166] The issue is not so much the meaning of the word "can": if income is paid to A it is obvious that it "can" (in the sense of "may possibly") be paid to B if A so directs. The better way to put the issue is: which hypothetical contingencies should be taken into account in order to ask the question whether or not income "can" be used for providing a benefit?
The question is similar to the issue which arises for the purposes of s.624 (settlor-interested trusts), whether income "may" be used to benefit the settlor "in any circumstances whatsoever". These words do not include the possible circumstance that there may be "a mere voluntary application of income by a beneficiary to the settlor": see *Glyn v IRC* 30 TC 321 at p.329. A similar question arose in reverse in *Inglewood v IRC* [1983] STC 133. The question was whether one could say that a beneficiary "will" become entitled to an interest in possession: held that one should ignore the contingency that the beneficiary may not become entitled by virtue of the beneficiary voluntarily assigning the interest to another person.
Another way to reach this conclusion is to say that the income "can" be used to benefit the individual, but not "as a result of the relevant transfer or associated operations" (the application of the income by the beneficial owner not counting as an associated operation).

defence. So long as T remains owner of the company, the income of the company is not relevant income in relation to any person (other than T).

For the position if T later gives the company to a trust, see 50.35 (Income of co held by trust).

50.25.3 *Income payable on contingency*

Now consider this type of trust,[167] divided into two sub-funds:

(1) A's sub-fund: income to be applied for the benefit of A or accumulated; capital to be paid to A at the age of 25; if A dies under 25, the share accrues to B's share.

(2) B's sub-fund is held on similar terms: income to be applied for the benefit of B or accumulated; capital to B at 25 with accrual to A if B dies under 25.

Suppose income is accumulated on A's sub-fund. It is relevant income in relation to A. Is it relevant income in relation to B? It is payable to B only on the contingency that A dies under 25. It is suggested that this income is not relevant income in relation to B. One would not, in normal language, say that the income "can" be used to benefit B just because A may die under 25. The contingency is too remote.

If A dies under 25:

(1) income of A's sub-fund arising after the death of A is (of course) relevant income in relation to B;

(2) income of A's sub-fund arising before the death of A subsequently becomes relevant income in relation to B if the "timing" issue discussed below is correctly answered.

If this is correct, the concept here is not the same as in s.624 ITTOIA, where the issue is whether income "may become payable" to the settlor *in any circumstances whatsoever*.[168] Applying (as one should) a purposive approach, this is the fair and just result and consistent with the general scheme of s.731. A settlor or transferor has the opportunity to exclude themselves completely in a straightforward manner, and is taxed if they

[167] This was a common form before the abolition of relief for Accumulation and Maintenance trusts in 2006.

[168] See Williams, *op. cit.* p.139; *may* (compared with *can*) "tends to convey a more hypothetical degree of possibility". Arguably, the drafter of the ToA provisions did not copy the language of the settlor-interested trust code because a different result was intended.

fail to do so. A beneficiary (not the settlor/transferor) does not have the same opportunity. To tax B on income of A's fund (on the facts of the above example) would not be just or fair.[169]

50.25.4 *Income of discretionary trust*

Conversely, consider a common form discretionary trust. In principle, all trust income "can" (in the sense of "may possibly") be used to benefit any beneficiary, if the trustees exercise their discretion, and that is a contingency which should be taken into account. Trust income is relevant income in relation to all beneficiaries.

Suppose, however, the trustees (perhaps guided by a letter of wishes) regard the fund as divided into (say) two shares for separate families. If there is no practical possibility that more than one half of the income will be used for one particular beneficiary, there is a reasonable argument that only one half of the income is relevant income in relation to that beneficiary.

Trustees of a common form discretionary trust have power to benefit anyone in the world. However, in practice the trustees will wish to identify a more limited class, and it is arguable that trust income is not relevant income in relation to other (theoretically) potential beneficiaries.

50.26 When does one ask: Timing issue

One must ask whether income "can" be applied for the benefit of an individual. *At what moment in time does one ask this question?*

(1) It often happens that, at the moment it arises, income can be used to provide a benefit for a person, ("B"), but at a later point in time it cannot be so used; for instance if income of a discretionary trust or company is:
   (a) distributed
   (b) transferred to another trust (under which B cannot benefit) or
   (c) retained by the trustees, but on terms under which B cannot benefit or
   (d) used to pay trust expenses

[169] Some support can be found in the discussion of "can" (albeit in a different context) in *Mandla v Dowell Lee* [1983] 2 AC 548 at p.565. A similar unfairness does arise for CGT under s.87 TCGA. However, it is possible to avoid that by transfers to another settlement.

(2) The converse also sometimes happens: at the moment it arises income cannot be used to provide a benefit for B, but at a later time it can be so used; for instance, if:
  (a) B is born after the income arises
  (b) One share of a trust fund later accrues to another share (eg on the death of a beneficiary)[170]
  (c) (Arguably) if a company within s.731, wholly owned by A, which has accumulated income during A's ownership, is later given to B or to a trust under which B can benefit[171]

So it is often important to ask at what moment in time one puts the question. I refer to this as the **"timing issue"**. There are in principle several possible answers:
(1) The moment that the income arises
(2) The moment that the benefit is provided, if later than (1)
(3) After a "reasonable" period (whatever that might be)
(4) The end of the tax year in which either (1) or (2) or (3) occurs
(5) Some combination of the above

An important consequence of all solutions except (1) is that trustees of a discretionary trust or company within s.731 would usually have some period of time after income has accrued, during which they may:

(1) distribute income; or
(2) apply the income in the payment of expenses.

Then the income will not be relevant income in relation to the beneficiaries because *at the moment when one asks the question* it is no longer income which "can" be applied for the benefit of the beneficiaries.

To answer the timing question we must return to the legislation. Section 733 ITA Steps (3) and (4) provide:

> *Step 3*
> Identify the amount of any income which—
> (a) arises in the tax year to a person abroad, and
> (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.

[170] See 50.25.3 (Trust income payable to B on remote contingency).
[171] But see 50.35 (Income of co held by trust).

> That amount is "the relevant income of the tax year" in relation to the individual and the tax year.
> *Step 4*
> Add together the relevant income of the tax year and the relevant income of earlier tax years in relation to the individual (identified as mentioned in Step 3).
> The sum of those amounts is "total relevant income".

The key phrase is "identified as mentioned in Step 3". What is the rule which those words bring in? Step 4 can be read in various ways:

> *Step 4*
> Add together
> [1] the relevant income of the tax year *being the amount of any income which—*
> *(a) arises in the tax year to a person abroad, and*
> *(b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.*
> and
> [2] the relevant income of earlier tax years in relation to the individual *being the amount of any income which—*
> *(a) arises in the [earlier] tax year to a person abroad, and*
> *(b) as a result of the relevant transfer or associated operations can*
> *[i] [at any time in that earlier year]* **or**
> *[ii] [at the end of the earlier year]* **or**
> *[iii] [at the time that the benefit is conferred, or the time that the income arises if later]*[172]
> *be used directly or indirectly for providing a benefit for the individual.*

(In this quote the words in normal font are the words of Step 4; the words in italics are the words of Step 3; the words underlined are added; note that some words must be imported by the words "identified as mentioned in step 3".

It is considered that one looks to the position at the later of:
(1) the end of the tax year in which the relevant income has accrued, or
(2) the end of the tax year in which the benefit is received.
One asks whether *at that time* the income:

> can ... be used for providing a benefit for the individual.

[172] In clause [2][b] readings [i] [ii] [iii] are alternatives.

Another way to put it is that one asks the question with the benefit of hindsight, taking into account facts known at the time that the question matters.

The main reason for this view is that it is more sensible to ask the question at the time it matters.

The moment the income arises is not a suitable moment to ask the question. In some cases it is impossible to ascertain the moment at which income arises and all that the tax system attempts is to attribute income to an accounting period or year of assessment.[173] In other cases it is only possible to ascertain a moment at which income arises by rules of a somewhat arbitrary kind.[174] Similarly, the moment that the benefit arises is not a suitable moment. Some benefits (such as beneficial loans) arise over a period. Moreover it is not practical to compute relevant income on every separate occasion that a benefit is provided during the year.

The legislation does not provide an express answer, but it does offer a hint in support of this view. Step 3 does not refer to "relevant income" in isolation. It refers to relevant income *of the tax year in relation to ... the tax year*. It is obviously necessary to attribute relevant income to a tax year, eg to deal with the situation where:

(1) an individual receives a benefit in year 1;
(2) the benefit is not taxed because there is no relevant income in year 1;
(3) relevant income arises in year 2.

There is only relevant income *of year 2* and so the s.731 charge arises in year 2 and not in year 1. However, the reference in Step 3 is to income of the tax year *in relation to the tax year*. These extra words suggest that the relevant income of tax year 2 in tax year 2 may be different from the relevant income of tax year 2 in tax year 3. In year 3 one must ask again what is the relevant income of year 2.[175]

The Tax Law Rewrite agree. EN ITA provides:

> It is therefore considered that surplus relevant income (*if it continues to be available*) has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits.[176]

[173] eg trading or property income.

[174] eg the rules in ss.18–19 ITEPA (When general earnings are received).

[175] I have considered whether any guidance is to be found in the principle that income tax is an annual tax. However, that does not shed much light on the problem. See 14.3.4 (IT is an annual tax).

[176] The EN passage is discussed in 50.18.5 (Step 5: Available Relevant Income).

50.27 Distributed income: HMRC view

RI 201 provides:

> For the purposes of Section 740(3) ICTA [now s.733 ITA] the measure of "relevant income" is treated as not including such part of the income as has already been genuinely paid away to a beneficiary or to a bona fide charity.
>
> Once relevant income has arisen *and continues to be available to provide a benefit*, it must in the Revenue's view be carried forward year by year until extinguished by such a benefit, even if it is capitalised in the accounts of the overseas person.
>
> (Emphasis added)

The INT Manual provides:

> **INTM601700 Relevant income** [Jul 2023]
>
> ... As it is only income that can be used which is taken into account, in most cases, it will be appropriate to look at any factors that may prevent income being so used. For example, any part of the income that has been genuinely paid away may not be capable of being termed as income that can be used for providing a benefit.
>
> It should be kept in mind that relevant income has to be considered on a tax year by tax year basis, so that once an amount has been determined as being relevant income of a tax year it will fall to be taken into account as relevant income in any subsequent year's benefits charge calculation. It cannot be amended by, for example, a subsequent disbursement, neither will it cease to be relevant income if, for example, it ceases to be regarded as income within the structure perhaps because it has been capitalised.
>
> In considering whether any part of the income has been genuinely paid away in a manner such as it could not be regarded as income that can be used for providing a benefit, there are three broad categories of disbursements that will generally be taken into account:
>
> - income genuinely paid away in meeting legitimate expenses
> - income distributions paid out of income
> - taxes paid by the person abroad in respect of the income
>
> ...

50.28 Relevant income spent

HMRC practice is that using income to pay trust or company administration expenses will reduce relevant income.

The INT Manual provides:

> **INTM601700 Relevant income** [Jul 2023]
> *Example 1* [income used to pay expenses]
> A foreign company with investment business has interest income of £100,000 for a tax year. It pays costs for the management of the company of £25,000 out of its income.
> As management costs for the company are deductible expenditure and assuming that all other conditions for a benefits charge are met, the relevant income of this company for that purpose would be considered to be £75,000 - the amount that can be used for providing a benefit.

This applies even to income used for capital (rather than income) expenditure. Income used to meet a statutory indemnity ceases to be relevant income (even a CGT indemnity, ie a capital liability):

> **CIOT Letter (extract)**
> It would also be helpful if the Revenue could confirm that if the trustees do in fact make a payment to the settlor in response to a request for reimbursement, either under [s.646 ITTOIA] or under para 6 of Schedule 5 to TCGA, such a payment would not be regarded as: ...
> (b) Taken into account for [s.731 ITA] purposes...
> **Revenue reply** ...
> (b) *it will reduce the relevant income if paid out of income* but will not be a payment [ie not a benefit].[177]

Income used to pay a sum in lieu of interest ceases to be relevant income (even though the payment is of a capital nature). Tax Bulletin 8 provides:

> ESC D41 allowed, inter alia, demand loans made to offshore trustees on better than commercial terms before 19 March 1991 to be put on commercial terms after that date. This enabled a trust to remain outside the condition in para 9(3), Schedule 5, TCGA 1992. In order to meet the terms of this concession, it may have been necessary to pay a sum in lieu of interest in respect of periods ended 5 April 1992. Where this was the case, such a payment would ... qualify as a deduction *...for the purposes of [s.731 ITA] provided it was paid out of trust income.*
> Where the amount in lieu of interest was paid to a person who is not a beneficiary under the terms of the trust, it would nevertheless be treated as a capital payment to that individual under TCGA 1992, Section 97.

[177] *Taxation Practitioner*, April 1996 p.25 *https://www.kessler.co.uk/wp-content/uploads/2012/05/TaxationPractitioner-199604.pdf* emphasis added. For other issues relating to reimbursement, see 100.5 (Failure to claim indemnity).

> If the amount in lieu of interest was paid by a company underlying the trust, that payment would not qualify for a deduction from the profits of that company [because it is capital and not income].

Thus income used to pay interest ceases to be relevant income. Income used to repay borrowed capital also ceases in principle to be relevant income. However if there were an arrangement under which:
(1) The person abroad borrowed a sum equal to relevant income
(2) The person abroad used the relevant income to repay the loan
then the sum borrowed might be regarded as representing the relevant income.[178]

Note that the s.731 position is different from s.720: expenses of the person abroad are not in principle deductible for s.720 purposes.

50.29 Income distributed as it arises

Suppose income ("the trust income") accrues to trustees of a discretionary trust within s.731, and is distributed (as income) to a beneficiary, "B1", in the same tax year.

50.29.1 *Position of other beneficiaries*

The trust income is not relevant income in relation to any other beneficiary, since the income was distributed to B1. One cannot say that the income "can" be applied for the benefit of anyone else – if my answer to the timing issue is correct. This is significant for the other beneficiaries who receive a benefit within s.731 (whether before or after the year in which the income arises and is distributed). They will not pay tax on the benefit by reference to the distributed income, because it is not relevant income. (They may pay tax on the benefit by reference to other relevant income if there is any.)

That must be correct, because otherwise there could be double taxation (B1 taxed on trust income and another beneficiary taxed under s.731).[179]

50.29.2 *Position of recipient*

It is suggested that the income is not relevant income in relation to B1: it is not income which *can* be used for B1's benefit; it is income which *is*

[178] See 50.33 (Income reinvested: Tracing).

[179] Arguably s.743 ITA would provide relief: see 51.9 (Double-counting relief). This seems a less satisfactorily solution.

used for B1's benefit.[180] This may be significant for B1. Suppose:
(1) B1 is a remittance basis taxpayer, and
(2) B1 received a benefit in the UK, and
(3) the trust income is paid to B1 and not remitted to the UK.

B1 is taxed on the ITA remittance basis on the income B1 receives from the trust. B1 is not taxed on the benefit by reference to the distributed income, because it is not relevant income. (B1 may pay tax on the benefit by reference to other relevant income if there is any.)

50.30 Income distributed after it arises

Suppose income accrues to trustees of a discretionary trust, within s.731, and is retained (without being accumulated) in that tax year, but is distributed (as income) to beneficiary B1 in a subsequent year. If:
(1) a UK resident beneficiary ("B2") had received benefits in a past year, and
(2) had not paid tax under s.731 in the past year, for lack of relevant income,
B2 will pay tax under s.731 in the year in which the income arises.

Suppose, however, that there have been no earlier benefits so this is not in point. The position is then the same as above, if my answer to the timing issue is correct:
(1) The income is not relevant income of B1.
(2) The income is not relevant income of any other beneficiary.

It seems that this is the generally held view. STEP say:

> In our experience, most advisers take the view that, where actual income
> [1] has been segregated[181] and
> [2] in a future year is used to pay a disbursement or to make an income distribution to an individual,
> it will cease to be relevant income in relation to other individuals because it is no longer available to provide a benefit to them. HMRC have been known to accept this view.
> In practice, trustees often do not pay all relevant disbursements or make decisions regarding the use of income during the tax year in which the

[180] The same argument as 50.22 (Income of life tenant: Relevant income) but not so strong.

[181] Author's footnote: it is doubtful whether segregation of income is necessary; see 50.34 (Relevant income in mixed fund).

> income arises, preferring to wait until the trusts accounts have been finalised. This may not be until some time after the tax year end and it seems inequitable to treat beneficiaries differently on the basis that the trustees have taken this view.[182]

In the INT Manual, HMRC express a slightly more restricted view.

> **INTM601700 Relevant income** [Jul 2023]
> As mentioned above, relevant income should be calculated for each tax year, and is usually only reduced once calculated when matched with benefits received, as set out in the six steps referred to in INTM601740. However, it is recognised that such an approach may lead to the same amount of income of the person abroad being taken into account for tax more than once. This may occur, for example, if
> [1] an income distribution is made to a beneficiary in a later year, and
> [2] the relevant income is not reduced to take into account such a distribution that has been subject to tax in the beneficiary's hands.
> In order to prevent this, the relevant income should be reduced by income distributions made out of an earlier year's relevant income, to the extent that it can be demonstrated that the income distributions have been subject to tax, either in the UK or some other jurisdiction. In order to reduce the amount of relevant income by such income distributions, the individual who is subject to a potential benefits charge should reasonably believe that any income distribution made out of the relevant income of an earlier year has been subject to tax either in the UK or another jurisdiction.
> The individual subject to the benefits charge may be reliant on information from trustees or other third parties. While it is accepted that such trustees may not have a detailed knowledge of beneficiaries' tax affairs, they will be in a position to make a reasonable assumption as to whether an income distribution should be subject to tax and should compute relevant income accordingly. Provided relevant income is calculated on such a reasonable assumption HMRC will not seek to challenge it.
> The only other circumstance where relevant income is reduced once calculated for a tax year is where income is paid to a charity recognised as such for tax purposes by HMRC. The amount of relevant income is reduced by the amount of income paid to the charity...
> The following examples may help to illustrate how relevant income will generally be determined.

HMRC give an example of a trust distribution

[182] Response to HMRC Consultation "Reform of an anti-avoidance provision: Transfer of Assets Abroad" (2013).

> *Example 4*
> A foreign trust has accumulated income from year one of £100,000 and retains this in a segregated account. A beneficiary of the trust approaches the trustee for funds in year two and the trustees make an income distribution to the beneficiary in year two of £20,000. The trustees have no income in year two from which to make the distribution so use the income held on account from year one. The trustees are aware that the beneficiary is resident and domiciled in the UK. It is therefore reasonable for them to assume that UK income tax will be paid on the income distribution, and thus the relevant income for year one will be reduced to £80,000 when calculating any future benefits charge.

In example 4, the same result would follow if the beneficiary was not UK-domiciled and taxed on the remittance basis. It is considered that the same result would follow if the beneficiary was non-resident, even if not subject to foreign income tax on the distribution, though the author of the Manual does not seem to agree.

50.31 Accumulated income

50.31.1 *Accumulate on wide discretionary trusts*

If a common form discretionary trust accumulates income, it remains relevant income in relation to all beneficiaries as long as it is retained by the trustees, because the trust capital (which represents the accumulated income) can be used to benefit any beneficiaries.

50.31.2 *Accumulate on narrower trusts*

The position would be different if under the terms of the trust:

(1) B was in the class of beneficiaries to whom income could be paid; but
(2) B could not benefit in any way from income after it had been accumulated.

Accumulated income would cease to be relevant income in relation to B.

This may happen automatically under the terms of the trust; for instance, a formerly common form of accumulation and maintenance trust provided:

(1) Income as it arises may be used for the benefit of any beneficiary under 25 (“B1”, “B2” or “B3”).
(2) If not so used, it is accumulated and added to the share of one particular beneficiary (B1) and can only be used for the benefit of B1 (not B2 or B3).

On receipt the income is relevant income in relation to B1, B2 and B3. After accumulation it is relevant income only in relation to B1.

A similar point arises in relation to a common form discretionary trust. Accumulated income is relevant income in relation to all the beneficiaries. Suppose the trustees exercise their overriding power to exclude B from the accumulated income, not from other trust capital. The income ceases to be relevant income in relation to B. It makes no difference whether this is done in the year of receipt or later.

Similar points may arise if the income is transferred to a new trust, or if the income of a company within s.731 is capitalised by the issue of bonus shares.

50.31.3 *Accumulate, distribute as income*

It has been suggested that once income is accumulated, it is forever relevant income in relation to all the beneficiaries to whom it could have been paid. Subsequent distribution is irrelevant (unless it gives rise to a s.731 charge). This view gives rise to anomalies:

(1) Some receipts which are capital for trust law purposes are treated as income for s.731,[183] and these cannot be "accumulated" in the normal trust sense. It would be odd if they were treated differently from ordinary income for s.731 purposes.
(2) Income of a company within s.731 cannot be "accumulated" in the trust sense. It would be odd if companies were treated differently from trusts.

It is considered that the act of accumulation does not by itself make any difference to the s.731 position. If income of a common form discretionary trust is accumulated, and later distributed as income to B1, it ceases to be relevant income in relation to other beneficiaries. This only applies if the sum distributed is (or represents) the accumulated relevant income. This raises tracing issues discussed below.

50.31.4 *Accumulate, distribute as capital*

Suppose income of a common form discretionary trust is accumulated and distributed as capital to a beneficiary, B. It is considered that the income ceases to be relevant income in relation to any beneficiary except B. (It is relevant income in relation to B so that B is in principle subject to tax

[183] See 48.15 (Capital receipts deemed income).

under s.731 if B is resident in the UK. Any other conclusion would have absurd consequences.)

A capital distribution out of accumulated relevant income to a UK resident individual is taxable under s.731. It is not a capital payment and so does not reduce s.1(3) amounts (trust gains). However the same payment to a charity or a non-resident individual will reduce s.1(3) amounts and relevant income.

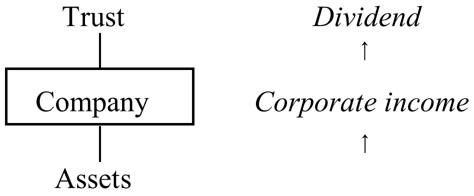
50.32 Company income distributed

Suppose a company within s.731 is held by a common form discretionary trust within s.731:

(1) the company receives income ("**corporate income**");

(2) the corporate income is distributed by way of dividend and retained by the trustees.

Thus:



The corporate income ceases to be relevant income but the dividend income is relevant income; so it is not counted twice. One cannot say that the corporate income and the dividend income are *both* available to provide a benefit.[184]

Suppose:

(1) A company within s.731 is held by a common form discretionary trust.

(2) The company's income is distributed by way of liquidation and retained by the trustees.

Double-counting relief does not apply. It is suggested that the trustees receipt may be said to represent the relevant income, so the liquidation does not affect the s.731 position. (Any other view would allow tax avoidance and not be attractive to a court.)

[184] Even if that were wrong, it is suggested that double-counting relief means that the corporate income and the dividend income do not both count as relevant income; see 51.9 (Double-counting relief).

> **INTM601700 Relevant income** [Jul 2023]
> *Example 2*
> [A company with profit after expenses of £75k] decides at the end of the tax year to add its 'net profit' of £75,000 to its reserves.[185] Two years later it makes a payment of £50,000 and contends this reduces relevant income.
> As relevant income has to be considered on a tax year by tax year basis HMRC would take the view that relevant income of the tax year remained £75,000 ...

In example 2, it is presumably assumed that the payment is not distributed as income, otherwise the outcome would to be different.

50.33 Income reinvested: Tracing

The requirement is that "income" can be used to provide a benefit. "Income" here includes any asset representing income, even if that asset does not constitute "income" (in any sense) of the person abroad.[186] Thus it makes no difference if the relevant income is invested in another asset. Suppose:

(1) A non-resident company held by a trust has received relevant income (the "**corporate relevant income**").
(2) The trustees sell the company to a purchaser.

It has been suggested that the corporate relevant income ceases to be relevant income in relation to the beneficiaries, because (after the sale) that income can no longer be used to benefit them. That would be absurd, but there is no difficulty in construing the legislation to avoid that absurdity. The proceeds of sale represent the corporate income, so the sale has not affected the relevant income position at all: as long as those proceeds can still be used for the benefit of the beneficiaries there is still relevant income in relation to the beneficiaries.

50.34 Relevant income in mixed fund

The principle that distributed income ceases to be relevant income applies only if the asset distributed constitutes or includes the relevant income.

[185] I wonder if the author is acting under a misconception here. A company does not "decide" to add its profit to its reserves: that happens automatically unless the profit is distributed. But perhaps that does not affect the example.

[186] Similar principles apply for the ITA remittance basis; see 17.5 (Income/capital in remittance basis). A similar principle applies in ascertaining what is income for the definition of power to enjoy; see 49.16.4 (Condition D: Possible benefit).

Whether or not this is the case raises questions of tracing.

The ideal approach is for a trust or company within s.731 to keep relevant income in a separate account. Then funds distributed from that account must be identified as the relevant income.

This section considers what happens if relevant income is mixed with other funds, and there is a distribution from the mixed fund. This is unchartered territory, but it is suggested that the law should follow the case law and practice on pre-2008 remittance basis mixed fund rules.

50.34.1 *Distribution from trust within s.731*

Suppose:

(1) Trustees of a discretionary trust within s.731 receive relevant income and pay it to a mixed fund (ie holding income and trust capital together).

(2) They pay a sum out of that fund in exercise of a power over trust income.

It is considered that the sum distributed would be (or represent) the relevant income. Income comes out first.

Suppose:

(1) The trustees receive relevant income, accumulate it and pay it into a mixed fund (ie holding accumulated income and trust capital together).

(2) They pay a sum out of that fund in exercise of a power to apply accumulated income as income.

It is suggested that the sum distributed would be (or represent) the relevant income.

Suppose:

(1) The trustees receive relevant income, accumulate it and pay it into a mixed fund (ie holding accumulated income and trust capital together).

(2) They pay a sum out of that fund in exercise of a power to distribute capital.

It is suggested that the trustees could by appropriate documentation identify the sum distributed as the relevant income.[187] Otherwise there must be an apportionment. Segregating income would avoid the tracing

[187] See 20.17.1 (Fund: taxed/untaxed income).

issue.

50.34.2 *Distribution from co within s.731*

Suppose:

(1) A company within s.731 receives relevant income and pays it into a mixed fund (ie holding relevant income and other company funds together).

(2) The company declares a dividend.

In the absence of documentation, it is suggested, on analogy with a trust, that income comes first out of the mixed fund. If the company has only received income (ie has not realised capital gains), the dividend clearly represents the relevant income rather than share capital.

Suppose:

(1) A company within s.731 receives relevant income and pays it into a mixed fund (ie holding relevant income and other company funds together).

(2) The company repays a loan or buys in redeemable shares out of that fund.

In principle the repayment of a loan or a share buy back comes out of capital. It is tentatively suggested that the company could by appropriate documentation earmark the sum repaid as the relevant income. In that case relevant income could be distributed by repayment of a loan and so cease to be relevant income.

50.34.3 *Distribution of company shares*

Suppose a non-resident company held by a trust has received relevant income (the "**corporate income**"). If the trust transfers the company to an individual, the corporate income ceases to be relevant to beneficiaries (except the individual). If the trust transfers the company to a new trust, the corporate income is relevant income in relation to the beneficiaries of the new trust but not in relation to beneficiaries of the old trust who cannot benefit under the new trust. This is a sensible rule as it allows different branches of a family to separate their interests fairly.

50.35 Income of co held by trust

50.35.1 *Income after trust holds co*

Suppose a trust with a common form power of appointment holds an underlying company to which s.731 applies.[188] Income of the company is in principle relevant income in relation to all beneficiaries. It remains so as long as the company retains the income.

50.35.2 *Income before trust holds co*

Suppose:

(1) An individual ("T") owns all the shares of a company within s.731.
(2) T gives the shares to a trust with a common form power of appointment.

Income of the company arising after T's gift is in principle relevant income in relation to the beneficiaries of the trust.

What is the status of income arising before the gift ("old income")? HMRC say that old income is also relevant income in relation to all the beneficiaries. HMRC's argument is: at the relevant time (when benefits are received) the old income "can" be used for the benefit of beneficiaries. The tax consequences of this are so severe that one feels it cannot be right, but what is the flaw in the argument?

At the time when the old income accrued to the company, that income "can" only be used to benefit T, the sole shareholder, so it is not relevant income in relation to anyone else. After the company has been given to the trust the same income "can" be used to benefit others. That is sufficient to meet the "can" condition, if my answer on the timing issue is correct.

However, it is not enough that income "can" be used to benefit a person. The definition of "relevant income" requires that the income can be used to benefit an individual:

> *as a result of*
> (i) the relevant transfer or
> (ii) associated operations.[189]

I refer to this as "**relevant income causation conditions (i) and (ii)**".

Now, in this case there are two transfers:

(1) The transfer of assets to the company ("transfer 1").
(2) The transfer of the shares in the company to the trust (an associated operation) ("transfer 2").

[188] For the possible application of the motive defence on a transfer to the company, see 52.21 (Transfer: Trust to underlying co).

[189] The reference here is to the reference to associated operations in s.732(1)(c).

It is suggested that where the two transfers are not part of a single arrangement, but independent, transfer 2 is not an associated operation in relation to transfer 1. So relevant income causation condition (ii) is not satisfied. Relevant income causation condition (i) is not satisfied since transfer 1 is not the cause of the fact that the income can be used to benefit the beneficiaries. The reasoning is the same as 48.13.1 (A transfers to B + B to C: clean-break test).

50.36 Non-beneficiary when income arises

50.36.1 *Unborn beneficiary*

Suppose:

(1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income.

(2) In Year 2 a beneficiary is born.

Is the income accumulated in year 1 before the birth relevant income in relation to that beneficiary? The answer depends on the timing issue. If my view is right, undistributed income accumulated before birth can be relevant income in relation to the newborn beneficiary, and that view does make more sense, having regard to the general scheme of the legislation.

50.36.2 *Non-beneficiary when income arises*

Suppose:

(1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income. The class of beneficiaries consists of the issue of the settlor and their spouses.

(2) In Year 2 an individual ("W") marries a beneficiary and so joins the class of beneficiaries.[190]

Is the income accumulated in year 1 before the marriage relevant income in relation to W? The answer depends again on the timing issue. If my view is right, undistributed income accumulated before the marriage can be relevant income in relation to W. Those who take the view that pre-birth income is not relevant income might consistently take the view that this pre-marriage income is not relevant income. This is not quite a *reductio ad absurdum*, but it is a bold view. If necessary, a court would

[190] It is assumed there is no power to add beneficiaries so the income could not be applied for the benefit of the individual before the marriage.

hold that W "can" benefit in year 1 because of the possibility that W might marry a beneficiary in year 2. See *IRC v Tennant* 24 TC 215. But this contingency may be very remote, so my preferred analysis is less artificial.

50.36.3 *Deceased beneficiary*

Now suppose the opposite situation:

(1) Year 1: a beneficiary receives a benefit from a trust (which is not taxable for lack of relevant income).
(2) Year 2: the beneficiary dies.
(3) Year 3: relevant income accrues.

Here it is plain that there is no tax charge on the beneficiary. Income cannot be deemed to have accrued to them once they are dead.

The same applies in relation to income which accrues in the tax year of death, but after the death. Income accruing after the death of a person cannot be applied for their benefit.

50.36.4 *Person excluded from benefit*

Income arising after a former beneficiary is excluded from benefit cannot (on any view) be relevant income in relation to that (former) beneficiary. It is not necessary that the beneficiary should be excluded from benefit altogether: just that they are excluded from benefit from the income.

50.37 Avoid relevant income: Planning

One possible approach is:

(1) distribute all income (from a discretionary trust or underlying company within s.731) to a foreign domiciled settlor immediately it arises;
(2) the settlor may re-settle the income on the same trusts.

This avoids relevant income in the trust or company.[191] It would be better to have an interest in possession trust so income at the trust level will be distributed automatically. Watch the GAAR, and avoid provocative circularity.

A variant of this idea is to distribute income to a beneficiary who is not the settlor/transferor, but who is non-resident (or domiciled) and so outside s.731. Watch the GAAR here, and the onward-gift rules.

[191] Also this ensures that the settlor receives the benefit of distribution relief (if applicable); see 51.5 (Distribution relief).

50.38 Tax of person abroad

This topic is not difficult to understand – at least it does not seem difficult once one has understood it. But it is impossible to summarise briefly.

In order to understand the law one must carefully distinguish three concepts:

(1) The actual income of the person abroad
(2) Relevant income for s.731
(3) The income which is deemed under s.731 to accrue to the UK resident individual who receives a benefit ("s.731 income")

These must not be confused!

The *actual income* of the person abroad is taxed (if at all) under general principles.

Relevant income is not taxed as such: it is merely something computed as a part of the process of ascertaining the amount of s.731 income.

Section 731 deemed income (for short, s.731 income) is taxed at the beneficiaries marginal rate.

This section considers the complications which arise if the actual income of the person abroad is subject to UK tax or foreign tax. How does this affect the s.731 income? What (if anything) is there to prevent double taxation: (1) tax on the person abroad and (2) tax on the beneficiary.

It is necessary to consider separately the position where the person abroad is:

(1) A discretionary trust.
(2) Any trust, on the purchase of own shares.
(3) A company owned by an individual.
(4) A company owned by a non-resident trust.

50.38.1 *Tax of trust within s.731*

A non-resident discretionary trust will normally pay tax on its actual UK source income at the rate applicable to trusts. The amount of tax paid reduces the relevant income so that if the gross income is £100 and tax is 45%, the relevant income is reduced to £45. However, s.731 makes no further allowance for a beneficiary. So if a beneficiary receives a benefit of £55, taxable under s.731, they pay tax at their marginal rate on the £55. The effective rate of tax on the actual income of the person abroad can therefore reach 69.75%. Section 743 ITA probably does not help. It would be much better if the beneficiary received an income receipt from the trust.[192] Then s.731 would not apply[193] and instead the beneficiary will effectively obtain some credit for the UK tax paid by the offshore trust under the regime of Chapter 7 Part 9 ITA.[194]

The same point applies where the income accruing to the offshore trustees is subject to foreign tax which can qualify for double taxation relief in the UK under ESC B18. It is best to arrange that the income is received by a UK resident beneficiary in the form of income, avoiding s.731 income where the possibility of any double taxation relief is lost.

An IIP trust is better still for dividend income.

50.38.2 *Purchase of own shares*

The receipt on a purchase of own shares by a UK company is income.

Any trust, discretionary or IIP, is subject to additional rate tax on a purchase of own shares. This raises the same tax problems as income of a discretionary trust under ss.481, 482 ITA. One solution is to alter the terms of the trust before the purchase, so the proceeds of sale belong to the life tenant. Another solution may be to make the trust UK resident for income tax purposes.

50.38.3 *Tax of company within s.731*

A non-resident company will normally pay tax on its actual UK source income at the basic rate. The amount of tax paid reduces the relevant income so that if the gross UK source income is £100 and tax is 20%, the relevant income is reduced to £80. Once again, s.731 makes no further allowance. So if an individual receives a benefit of £80, on which they are taxed under s.731, they pay tax at the appropriate rate on the £80. The effective rate of tax on the actual income of the person abroad is therefore nearly 52% for a higher rate taxpayer and 60% for an additional rate taxpayer.

A similar point arises in relation to dividend income, which is not taxable in the hands of the company.

It would be slightly more efficient if the beneficiary received a dividend from the company. Then s.731 would not apply. The individual may still not receive any credit for the tax paid by the offshore company but their

[192] As to how to achieve this, see 41.8 (Trust payment: Income/capital).

[193] See 50.16 (Capital-benefit condition).

[194] Unfortunately the credit is less than full credit in the case of dividend income. The regime is too complex to set out here.

dividend income would at least be taxed at the slightly lower dividend rates.

50.38.4 *Planning by UK resident co*

Further tax planning is to make the company UK resident (or to acquire a UK resident company). Then the actual income of the company is paid out by way of dividend (assuming this is possible as a matter of company law) and taxed at the dividend upper rate with the benefit of the UK tax credit. Watch s.1071 CTA 2010. The benefit of this kind of planning varies with the applicable rates of tax which depend on the circumstances of the beneficiaries and whether it is s.731 or s.87 which would apply on a capital payment.

50.38.5 *s.731 foreign tax credit: Critique*

In the 2006/07 edition of this book I said:

> These are harsh rules, but the unfairness of s.731 is generally avoidable in practice and any other rule would certainly be extremely complicated to draft and to administer.

The complexity arises in matching s.731 income with the taxable income of the person abroad. But now the FA 2008 has introduced matching rules. (Complexity was not a serious concern to the architects of the 2008 reforms.) What is sauce for the goose is sauce for the gander. If the matching rules must be retained, fairness requires that there should also be a system of credit for tax on the relevant income.

The better solution would be the rough and ready but simpler rules which took effect from 1981 to 2008, but at present we have the worst of both worlds: complexity and unfairness.

50.39 s.731 remittance basis

50.39.1 *Terminology*

Section 735 ITA provides what I call the "**s.731 remittance basis**". Section 735(1) ITA provides:

> This section applies in relation to income treated under section 732 as arising to an individual in a tax year ("the deemed income") if section 809B, 809D or 809E (remittance basis) applies to the individual for that year.

In short, the relief applies to remittance basis taxpayers.

In order to understand the law, one must carefully distinguish:
(1) relevant income (income arising to the person abroad)
(2) s.731 income; statute calls this "income treated under section 732 as arising to an individual" or "deemed income"

The legislation distinguishes between two types of relevant income and two types of s.731 income. I coin the following terminology.

Relevant income may be:
(1) **"foreign relevant-income"** or
(2) "**UK relevant-income**"

Foreign relevant-income means, in short, RFI.[195]

s.731 income may similarly be:
(1) foreign: the statutory term is "foreign deemed income" but I use the term "**foreign s.731 income**"
(2) not foreign (which I call **"UK s.731 income"**)

Section 735(2) ITA provides:

> For the purposes of this section the deemed [s.731] income is "foreign" if (and to the extent that) the relevant income to which it relates would be relevant foreign income if it were the individual's.[196]

In short, in my terminology, s.731 income is foreign s.731 income (qualifying for the remittance basis) if the relevant income to which it relates is RFI.

The word "relates" brings in matching rules; see 50.42 (s.731 matching rules).

Assuming we have identified foreign s.731 income, we can turn to s.735(3) ITA which provides:

> Treat the foreign deemed [s.731] income as relevant foreign income of the individual.

This incorporates the ITA remittance basis.

[195] I use the label "foreign relevant-income" with slight hesitation, as it is not the same as "relevant foreign income" (RFI); but I cannot think of better.

[196] For the reason for the wording ("would be RFI if it were the individual's"), see 16.9.2 (Relevant foreign income).

50.39.2 *When is s.731 income remitted*

Section 731 income (being fictional) does not exist, and cannot be remitted. So s.735(4) ITA provides:

> For the purposes of chapter A1 of Part 14 (remittance basis) treat
> [a] relevant income, or
> [b] a benefit,
> that relates to any part of the foreign deemed income as deriving from that part of the foreign deemed income.

This means (in short):

(1) Treat relevant income that relates to foreign s.731 income as deriving from that s.731 income; *and*

(2) Treat benefits that relate to foreign s.731 income as deriving from that s.731 income.[197]

I refer to this as the "**derivation fiction**".

Thus we have three fictions:

(1) We pretend the individual receives s.731 income: this is the basic s.731 fiction.

(2) We pretend the s.731 income is RFI: s.735(3).

(3) We pretend certain benefits, and certain relevant income,[198] derive from that s.731 income (the derivation fiction).

I discuss the remittance of benefits in the next section, and the remittance of relevant income in the one after that.

50.39.3 *Remittance in split year*

Section 735(5) ITA provides:

> In the application of section 832 of ITTOIA 2005 to the foreign deemed

[197] That is, in s.735(4), the phrase "that relates to any part of the foreign deemed income" qualifies "relevant income" as well as "benefit"; and the word "or" means "and".
Thus the s.731 remittance basis is an example of what I call double representation, see 18.18.9 (Double representation).

[198] Contrast the solution adopted for the s.87 remittance basis, where the capital payment (corresponding to the remittable benefit) is deemed to derive from the s.87 gains, but the trust gains (corresponding to relevant income) is not. So there is no charge on the remittance of trust gains, only on remittance of property derived from the capital payment.

> income, subsection (2) of that section has effect with the omission of paragraph (b).

The significance is that (contrary to the usual rule) s.731 income is taxable if it is remitted during the overseas part of a split year.[199]

There is no good reason for that.[200] But the point will not often arise.

50.39.4 *2008 transitional rules*

Para 170 sch 7 FA 2008 provides:

> The amendments made by paras 161 to 169 have effect for the tax year 2008-09 and subsequent tax years.

Section 735 does not apply to s.731 income arising before 2008/09 because the condition in s.735(1) is not met.

50.40 When is benefit remitted to UK

50.40.1 *Where benefit received not the test*

Section 731 income is deemed to be derived (inter alia) from the benefit (the derivation fiction).

One might think that the s.731 remittance basis imposes a tax charge if a s.731 benefit is received in the UK; that is, remittance depends on the place of receipt of the benefit. But that is not quite the way that the remittance basis works. There is a taxable remittance if (in short):

(1) *Property*[201] is brought/received/used in the UK (remittance condition A); and
(2) That property is derived (indirectly) from foreign income (remittance condition B).

The derivation fiction in s.735(4) does not affect remittance condition A. It relates to condition B. It is necessary to identify:

(1) The s.731 benefit (which may or may not be "property")
(2) Property derived from the s.731 benefit

If property received in the UK is:

(1) the s.731 benefit or
(2) derived from the s.731 benefit

[199] See 17.13.1 (Remittance in split year).

[200] The same (unfair) rule applies for s.720: see 49.26.3 (Remittance in split year).

[201] Or services, but for clarity I refer only to property. I also assume that the property is brought/received/used by a relevant person.

then the property is deemed to be derived (indirectly) from the s.731 income, so remittance condition B can be satisfied. That is just a matter of following through the logic of the deeming.[202]

On this analysis, it is not necessary to identify the place of receipt of a benefit.[203]

See too 18.48 (Remittance before income/gains arise).

50.40.2 *Beneficial loan*

Suppose the s.731 benefit is an interest-free loan or a loan on beneficial terms. It is considered that there is a taxable remittance of the s.731 income if the money lent is received in the UK, on the grounds that:

(1) the money lent (although not the benefit itself) is derived from the benefit;[204] or

(2) the benefit is used in respect of a relevant debt.

What would happen if the money was expended, but the loan remained outstanding in subsequent years? The s.731 benefit remains taxable, if property received from it was received in the UK in the earlier year.[205]

50.40.3 *Use of property*

Suppose the s.731 benefit is rent-free (or low-rent) use of a chattel or UK land. The chattel or land does not derive from the s.731 benefit: the s.731 benefit may be said to derive from the chattel or land, but that is another matter. But the right to use the chattel or land is a licence or lease which is itself property. So there is a taxable remittance of s.731 income if the land is in the UK, or if the chattel is used in the UK.[206]

50.40.4 *Waiver of debt*

Suppose:

(1) money is lent to a beneficiary;[207]

[202] See App 8.2 (Deeming provisions: Construction).

[203] That raised questions discussed in the 14th edition of this work, but which have no clear answer: where (if anywhere) is the benefit of a loan, guarantee, or waiver of a debt received?

[204] Contrast 18.18.7 (T lends income/gains to B).

[205] See 18.48 (Remittance before income/gains arise).

[206] See too 61.19.2 (Example: Use of property).

[207] It makes no difference whether the loan is at a commercial rate (not a benefit), or an interest-free loan (which confers the separate benefit of interest foregone while the

(2) the trustees waive the debt (a benefit).

What is derived from the waiver?

If the debt is charged on an asset, it is suggested that the asset (or an interest in it) is derived from the waiver.

If there is an arrangement under which:

(1) trustees make a loan and
(2) they waive the loan,

then the two steps (the loan and the waiver) may be considered as one item, in which case the money lent under the loan is derived from the waiver.

But in other circumstances, it is arguable that no property is derived from the waiver.[208]

50.40.5 *Payment of debt*

Suppose:

(1) A beneficiary owes money to a third party.
(2) The debt is paid by the person abroad (a s.731 benefit).

If the debt is a relevant debt, then there is a taxable remittance of the s.731 income under the debt remittance rules.

50.40.6 *Benefit later remitted*

Suppose:

(1) a remittance basis taxpayer receives a benefit in the form of the transfer of money (or a chattel) outside the UK, and
(2) later brings that money (or chattel) to the UK.

There is a taxable remittance of s.731 income.

For this reason, the tax consequence of a benefit received by one beneficiary may depend on whether *other* beneficiaries have remitted their benefits (and so used up relevant income). One might expect one beneficiary (with access to trust documents) to be able to find out what benefits other beneficiaries have received and where. But a beneficiary is not entitled to find out, and often will be unable to find out, whether benefits received by other beneficiaries have been remitted. The legislation is in many cases unworkable. But in 2008 workability was not

loan is outstanding).

[208] See too 20.7 (Income/gains used to pay debt).

regarded as a requirement of anti-avoidance legislation.

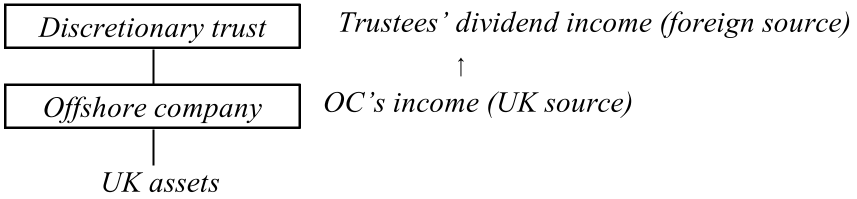
If the beneficiary is not resident when they receive the benefit but resident when it is received in the UK, there is in principle no tax charge.

50.41 When is relevant income remitted

Section 731 income is deemed to be derived (inter alia) from the matched relevant income (the derivation fiction).

50.41.1 *Distribution of UK source income*

Suppose an offshore company ("OC") within s.731 is owned by a trust within s.731:



If OC receives and retains UK source income, that is not foreign relevant-income. If a benefit is matched to that income the s.731 income does not qualify for the remittance basis: in my terminology, it is not foreign s.731 income.

Suppose before the matching, OC distributes its income to the trust, OC's income ceases to be relevant income. Instead the income of the trust is relevant income (unless itself distributed). But this income is foreign source income and so in principle foreign relevant-income. So where UK source income is received by an underlying company, the s.731 remittance basis can be made available by distribution of that income from the company. This seems generous. However, s.731 provides a rough justice in other areas where that favours HMRC, so it is not altogether surprising if on occasion an anomaly may favour the taxpayer.

Similar points arise if OC receives foreign income which is remitted to the UK.

50.41.2 *Relevant income remitted when beneficiary non-resident*

Suppose:

(1) Year 1: B is non-resident when foreign relevant-income is remitted.
(2) Year 2: B becomes UK resident and receives a benefit which is matched to that foreign relevant-income.

B receives s.731 income in year 2. The income is foreign s.731 income, but is treated as remitted.[209]

50.42 s.731 matching rules

50.42.1 *Why matching matters*

Section 731 income is the lower of (1) benefits and (2) relevant income, so one can say that benefits have to be matched to relevant income, or vice versa. But more precise matching (matching particular benefits to particular items of income) is not generally required.

Matching is needed for the following:

(1) The s.731 remittance basis:
   (a) To identify foreign s.731 income, which qualifies for the remittance basis, we need to identify the items of relevant income to which the s.731 income "relates", to see if it is foreign relevant-income.
   (b) If we have identified foreign s.731 income, taxable under the remittance basis, we need to know if it has been remitted, and for this purposes we need to identify:
      (i) the benefit to which the s.731 income relates, and
      (ii) the items of relevant income to which the s.731 income relates[210]

(2) for other purposes:
   (a) s.731(1A); see 50.45.1 (Matched s.731 Income)
   (b) s.733A (onward gift rules); see 50.54.3 (Cond (b): Match benefit)

50.42.2 *The matching rules*

The matching rules are set out in s.735A ITA. This begins:

> For the purposes of section 735—

So the matching rules apply for the purposes of s.735 (s.731 remittance basis). Where matching is wanted in other circumstances, the s.735A rules are incorporated thus:

[209] See 18.48 (Remittance before income/gains arise).

[210] Although statute uses the word "relate" the applicable rules are best described as matching rules.

s.731(1A)(a) ITA	**s.731(1B)(a) ITA**	**s.733A ITA**
[s.731 income] would under section 735A (if it applied also for this purpose) be matched with an amount of relevant income	[s.731 income] would, if section 735A applied also for this purpose, be matched under that section with the benefit	under section 735A (if it applied also for this purpose) [s.731 income] would be matched- (i) with an amount of relevant income and (ii) with a benefit...

This is exceptionally clumsy wording, but it works.

50.42.3 *Put benefits in date order*

Section 735A works in four stages. Section 735A(1) ITA provides:

> For the purposes of section 735—
> (a) place the benefits mentioned in Step 1 [of s.733(1)[211], ie Total Benefits within s.731] in the order in which they were received by the individual (starting with the earliest benefit received)

Some benefits are not received at any particular point in time, eg the benefit of rent-free accommodation, and it is not possible to place them in the order in which they are received. Perhaps there should be a time apportionment.

One then makes certain deductions from the benefits:

> (b) deduct from those benefits so much of any benefit within section 734(1)(b) as gives rise as mentioned in section 734(1)(d) to chargeable gains or offshore income gains.

See 50.19 (Deduction for s.87 charge).

50.42.4 *Put relevant income in date order*

Section 735A(1) ITA continues:

> (c) place the income mentioned in Step 3 [of s.733(1)] for the tax years mentioned in Step 4 [of s.733(1)] ("the relevant income") in the order determined under subsection (3)

Note that Steps 3 and 4 in para (c) refer to the steps in s.733; confusingly

[211] Section 735A(2) ITA provides:
"In subsection (1) references to a step are to a step in section 733(1)."

the reference is not to the steps in s.735A(3) which immediately follow.

This takes us to s.735A(3) ITA:

> The order referred to in subsection (1)(c) is arrived at by taking the following steps.
> *Step 1 [Relevant income of earliest year]*
> Find the relevant income for the earliest tax year (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]
> *Step 2 [UK relevant-income in date order]*
> Place so much of that income [relevant income] as is not foreign[212] in the order in which it arose (starting with the earliest income to arise).
> *Step 3 [Foreign relevant-income in date order]*
> After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

In order to carry out Steps 2 and 3 it is necessary to distinguish between:
(1) foreign relevant-income; and
(2) other relevant income (“**UK relevant-income**”).

It is then necessary to ascertain the date that the relevant income arises. Some income is not received at any particular moment in time, eg trading and property income, where the income is computed as a net figure after allowing deductions. Section 735A(5) ITA deals with this:

> For those purposes [for purpose of putting relevant income into date order] treat income for a period as arising immediately before the end of the period.

This is in fact the general rule used when it is necessary to identify the date when trading or property income arises.[213]

TAH para 1234 provides:

> ... For example, business profits accrue over an accounting period to say 31 December so for the purpose of this provision the income would be treated as arising on 31 December. Therefore if in a tax year there was say interest income arising on 30 September and business profits accruing over an accounting period to 31 December, for the purpose of this provision they would be placed in the order interest first and profits second.

[212] Section 735A(4) ITA gives a commonsense definition to “foreign” relevant income: “For the purposes of subsection (3) relevant income is ‘foreign’ where it would be relevant foreign income if it were the individual’s.”

[213] See 18.17.1 (What is trading income).

The author probably assumed that interest is not "income for a period" and so the interest is not affected by s.735A(5). In fact, interest is income for a period to which it relates, even though tax is only charged when interest arises. But interest is normally paid in arrears, ie interest arising on (say) 30 September is for a period ending 30 September, so the end result is the same.

Then one carries out Steps 1–3 for subsequent years, year by year:

> *Step 4*
> Repeat Steps 1 to 3.
> For this purpose, read references to the relevant income for the earliest tax year as references to the relevant income for the first tax year after the last tax year in relation to which those Steps have been undertaken.

Amended as step 4 requires, steps 1-3 provide:

> *Step 1*
> Find ~~the relevant income for the earliest tax year~~ the relevant income for the first tax year after the last tax year in relation to which those Steps [Steps 1-3] have been undertaken (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]
> *Step 2*
> Place so much of that income [relevant income] as is not foreign in the order in which it arose (starting with the earliest income to arise).
> *Step 3*
> After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

50.42.5 *Deduction from rel. income*

Section 735A(1)(d) ITA provides:

> (d) deduct from that income any income that may not be taken into account because of section 743(1) or (2) (no duplication of charges),

Section 735A(6) ITA provides:

> Subsection (1)(d) does not apply if the income may not be taken into account because the individual has been charged to income tax under section 731 by reason of the income.

50.42.6 *Put s.731 income in date order*

Section 735A(1)(e) provides:

> place the income treated under section 732(2) as arising to the individual in respect of the benefits [s.731 income] in the order in which it is treated as arising (starting with the earliest income treated as having arisen),

50.42.7 *The matching rule*

Having identified the benefits, the relevant income, and the s.731 income, and placed them all in date order, we can at last turn to the matching rule itself. Section 735A(1)(f) ITA provides:

> treat the income mentioned in para (e) [s.731 income] as related to—
> (i) the benefits, and
> (ii) the relevant income,
> by matching that income with the benefits and the relevant income (in the orders mentioned in paras (a), (c) and (e)).

The orders mentioned in these paragraphs are:

Para	**Concerns**	**Order**	**See**
(a)	Benefits	Date order (earliest first)	50.42.3
(c)	Relevant income	Date order by year, UK before foreign	50.42.4
(e)	s.731 income	Date order	50.42.6

50.42.8 *Matching: a type of FIFO*

In short, the matching rules are:

(1) Match with relevant income of earlier years before later years. This might be called a FIFO basis: first in, first out.

(2) Within the years, match with UK relevant-income before foreign relevant-income. This modifies what would otherwise be a more straightforward FIFO basis.

Why does the legislation not simply say that? See 61.15.7 (Method statements: Critique).

The rule is arbitrary, but any matching rule is to some extent arbitrary.

50.42.9 *Matching example 10*

TAH gives a number of examples, most of which are self-evident, but two are worth setting out here. Para 1234 Example 10 involves

- UK and foreign relevant-income (7 items of income altogether) and
- Non-UK benefits (2 benefits altogether):

			Relevant income		**Benefits**[214]	**s.731 income**
Item	**Date**		UK	Foreign	eg 10a *(eg 10b)*	eg 10a *(eg 10b)*
1	*Year 1*	30 Sept	500			
2		31 Dec		500		
3	*Year 2*	31 Dec		1,000	750	750
4	*Year 3*	30 Sept		500		
5		31 Dec	500			
6	*Year 4*	30 Sept		500		
7		31 Dec	500		750 *(1,500)*	750 *(1,500)*

The HMRC analysis of example 10a is:

> There are potential transfer of assets benefits charges in Yr 2 of 750 and Yr 4 of 750.

More analytically, the individual receives s.731 income of £750 in years 2 and 4.

> In Yr 2, 250 will be foreign deemed income and ring fenced to be charged under Part 8 ITTOIA as and when there is an amount remitted to the UK. 500 is charged under transfer of assets.

I am not sure that "ring fenced" is entirely apt to describe income taxed on the remittance basis, but it does not matter.

More analytically, the £750 s.731 income of year 2 is matched as follows:

- £500 is matched with income item 1: that £500 is not deemed RFI and so is charged on an arising basis.
- £250 is matched with income item 2: that £250 is deemed RFI and taxed on the s.731 remittance basis, ie on a future remittance of the benefit or the foreign relevant-income. I would not use the term "ring-fenced" to describe this, but it might serve as a loose metaphor.

> In Yr 4 the whole 750 will be deemed foreign income [*recte* foreign deemed income].

More analytically, the £750 s.731 income of year 4 is matched with the remaining unmatched £250 of item 2 and to the first £500 of item 3. The £750 is deemed RFI and taxed on the s.731 remittance basis.

Turning to example 10b:

> If however the benefit in Yr 4 was 1500, then only 1250 would be ring

[214] All benefits are foreign benefits.

fenced as foreign deemed income and 250 would be charged under transfer of assets.

More analytically, if the benefit in Yr 4 was 1500, the individual receives s.731 income of £1,500 in year 4. That is matched as follows:

- £250 is matched with the remaining unmatched part of income item 2
- £1,000 is matched with income item 3

The total of £1,250 is foreign s.731 income and taxed on the s.731 remittance basis.
£250 is matched with income item 5 and is taxed on the arising basis.

50.42.10 *Matching example 11*

TAH para 1236 Example 11 is a slightly more complex example with:

- UK and foreign relevant-income (12 items altogether)
- UK and foreign benefits (4 benefits altogether)

An individual who is ordinarily resident, but not domiciled, in the UK has received cash benefits from an offshore structure in circumstances where the conditions for the transfer of assets provisions to apply are met. The 'remittance basis' of taxation applies for each year.

			Relevant income		**Benefits**		**s.731 income**
Item	**Date**		*UK*	*Foreign*	*UK*	*Foreign*	
1	*Year 1*	30 Sept	500				
2		31 Mar		800		1,000	1,000
3	Year 2	31 Mar	100			1,400	1,400
4		31 Mar		1,000			
5	Year 3	31 Mar		500			
6		31 Mar	500				
7		31 Mar	500				
8	Year 4	30 Sept	200		1,000		1,000
9		31 Mar		500			
10	Year 5	30 Sept	500			600	600
11		30 Sept		100			
12		31 Mar		400			

The HMRC analysis is, one might say, informal in its terminology and it should be recast along the lines of example 10. This is done here by adding only brief comments in italics as the text is long and the reader will have the idea.

Year 1
The potential benefits charge [*s.731 income*] is 1000 (being the lesser of 1300

relevant income and 1000 benefits received).

As all of the conditions for Section 735 to apply are met, consider whether any of the potential charge [*s.731 income*] is foreign deemed income *[foreign s.731 income]*. The principles in Section 735A are used for this purpose.

- First match the 1000 with the UK [*relevant*] income of 500. As this income cannot be relevant foreign income then 500 cannot be foreign deemed income *[foreign s.731 income]* and thus is charged under the transfer of assets benefits charge [*on an arising basis*].
- The remaining benefit [*£500 s.731 relevant income*] is then matched with the foreign [*relevant*] income of 800. This [*relevant*] income would be relevant foreign income if it was the individual's and thus 500 of the deemed amount [*s.731 income*] is foreign deemed income *[foreign s.731 income]*. This is treated as relevant foreign income and becomes potentially chargeable under Part 8 ITTOIA 2005 [*ie is taxed on the s.731 remittance basis*].
- There is a balance of 300 relevant income that remains unmatched.

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

The total taxable amount for the year under transfer of assets benefits charge is therefore 500.

Year 2

The potential benefits charge [*s.731 income*] is 1400 (being the lesser of the total relevant income 2400 and the total benefits 2400 less 1000 already charged).

Calculate how much of the total potential charge [*s.731 income*] can be regarded as foreign deemed income *[foreign s.731 income]* applying Section 735A-

The potential chargeable amount [*s.731 income*] is in effect matched with-

(a) 300 of foreign [*relevant*] income from year 1. This gives foreign deemed income *[foreign s.731 income]* of 300 chargeable [*on the s.731 remittance basis*] under Part 8.

(b) 100 UK income of year 2. As this income cannot be relevant foreign income this amount of 100 remains chargeable [*on an arising basis*] under the transfer of assets benefits charge.

(c) The foreign [*relevant*] income of year 2 of 1000. As this would be relevant foreign income if it were the individual's this amount can [*must*] be regarded as foreign deemed income *[foreign s.731 income]* and so chargeable [*on the s.731 remittance basis*] under Part 8.

The result is that of the potential charge [*s.731 income*] of 1400, 100 is charged under transfer of assets benefits charge [*on the arising basis*] and 1300 is ring fenced and treated as relevant foreign income *[foreign s.731 income]* chargeable [*on the s.731 remittance basis*] under Part 8 ITTOIA.

The total charge under the transfer of assets benefits charge is therefore 100. Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

Year 3

Although there is further relevant income in this year there are no unmatched benefits so there can be no potential charge [*s.731 income*] under transfer of assets benefits charge so a consideration of S735 is not applicable.

Year 4

The potential charge [*s.731 income*] is 1000 (being the lesser of the total relevant income 4100 and the total benefits 3400 less 2400 already charged).
Work out the deemed foreign income [*foreign s.731 income*] applying Section 735A-
The potential chargeable amount [*s.731 income*] is in effect matched with
(a) The UK relevant income 500 from year 3.
(b) The foreign [*relevant*] income of 500 from year 3.
The total amount charged under the transfer of assets benefits charge is therefore 500.
500 is ring fenced as foreign deemed income and treated as relevant foreign income *[foreign s.731 income charged on the s.731 remittance basis*].
Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.
There is 700 of unmatched relevant income to take forward.

Year 5

The potential charge [*s.731 income*] is 600 (being the lesser of the total relevant income 5100 and the total benefits 4000 less 3400 already charged).
Work out the deemed foreign income [*foreign s.731 income*] applying Section 735A-
The potential chargeable amount [*s.731 income*] is in effect matched with
(a) The UK relevant income 200 from year 4.
(b) 400 of the foreign relevant income from year 4.
The total amount charged under the transfer of assets benefits charge is therefore 200.
400 is ring fenced as foreign deemed income *[foreign s.731 income]* and treated as relevant foreign income [*charged on the remittance basis*].

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.
As the benefit was received in the UK a minimum of the ring fenced amount of this year will be charged under Part 8 ITTOIA and consideration would need to be given to whether there are further untaxed amounts of ring fenced income that would be charged for this year applying the relevant remittance basis rules.
There is 1100 of unmatched relevant income to take forward.

50.42.11 *Planning implications*

Where the s.731 remittance basis applies the best planning is to arrange that the person abroad (the foreign trust or company):
(1) does not have any UK source income and
(2) does not remit its foreign income.

Then there is no need to worry about the complex s.735A matching rules. The relatively simple position is reached, that there is a remittance if property derived from the benefit is received in the UK.

This also avoids the double charge to UK tax which arises if benefits are matched with UK source relevant income which is itself taxable.

50.43 s.731 remittance basis: Critique

The reader who has followed the text to this point will agree that the s.731 remittance basis is unworkably complicated. The rule should simply be that there is a tax charge if the benefit is remitted, and the matching rules abandoned. That would be fairer, consistent with the principle of the remittance basis, consistent with the s.87 remittance basis, and a simplification. It would also facilitate UK investment by the person abroad.

The 2013 ToA consultation raised a proposal to amend the matching rules, but this was not adopted.[215]

[215] HMRC, "Reform of an anti-avoidance provision: Transfer of Assets Abroad Outcome of Consultation" (2013): "Having carefully considered the views put forward in the consultation and through the working group, the Government has decided not to pursue legislative change to the matching rules at present."
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/267976/Transfer_of_assets_outcome_of_consultation.pdf

50.44 "Protected Income"

50.44.1 *Why Protected Income matters*

"Protected Income" matters in two s.731 contexts:

ITA	**Context**	**See para**
731(1A), 733A(1)(b)	settlor-attribution rule: benefit received by non-resident	50.45.2
s.733B(1)(b)	onward gifts	50.53.2

In short, the rules are:

(1) s.731 settlor-attribution applies only so far as s.731 income of a non-resident is matched to relevant income which is Protected Income[216]

(2) s.731 onward-gifts rule applies only so far as s.731 income is matched to relevant income which is Protected Income[217]

Section 721(3BA) ITA defines "Protected Income":

> In a case in which rule 2 of subsection (3B) applies [non-dom transferor[218]], so much of the income of the person abroad as is protected foreign-source income for the purposes of that rule counts as "protected income" for the purposes of section 733A(1)(b)(i).

This definition is expressed to apply "for the purposes of section 733A(1)(b)(i)", ie, for the purposes of the s.731 settlor-attribution rule.[219] But the same definition is incorporated by reference in other places where the term "Protected Income" is used:

s.733A(1)(b)(i)/s.733B(1)(b)(i) refer to	**s.731(1A)(a) ITA refers to:**
an amount of relevant income that is protected income for the purposes of this sub-paragraph (see sections 721(3BA) and 728(1B))	an amount of relevant income that is protected income for the purposes of section733A(1)(b)(i) (see sections 721(3BA) and 728(1B))

This is clumsy drafting (the reader may use a stronger word), but it works.

Why does the statute have separate definitions of:

(1) protected foreign-source income: s.721A and 729A ITA

(2) Protected Income: s733A(1)(b)(i) and s733B(1)(b)(i)) ITA

[216] See 50.53.2 (Cond (b): match Protected Income).

[217] See 50.53.2 (Cond (b): match Protected Income).

[218] See 92.15.2 (Transferor not UK domiciled).

[219] See 50.50 (s.731 settlor-attribution: Outline).

as the definition of Protected Income seems simply to incorporate the definition of protected-foreign source income?

John Barnett explains:

> I think that the difference is that "Protected Income" is any income which has benefitted from rule 2 (of either 721(3B) or 728(1A)). Or, putting it another way, income which has benefitted from the switching off of the settlor-charge by the protected trust regime.
>
> I think that the distinction can be seen if you have a UK resident, non-domiciled settlor, where the settlor and spouse are completely excluded (and therefore don't have power to enjoy). I think in that case that any income arising to the trust would, technically, be protected foreign-source income. But it would not be benefitting from rule 2 as rule 2 only applies to determine the amount of income arising under s721(1)/s728(1) and those sub-sections only apply if inter alia condition A (power to enjoy) is met. So you would not have "Protected Income" even though you have protected foreign-source income.
>
> The policy rationale for this (which certainly chimes with many consultation meetings which I attended) seems to be that HMRC, in switching-off s721 for protected trusts, didn't want to open a back door to avoidance. So any income which has benefitted from this switching-off, might be caught by one of the package of anti-avoidance measures (closely-related family member s733A; onward gift s733C). But if s721 didn't need switching-off (because, due to no power to enjoy, it was never switched on in the first place) then the anti-avoidance rules aren't needed.

On this analysis, the s.731 rules are consistent with the s.643A charge, which is (slightly) better worded. The s.643A equivalent of Protected Income is PFSI, which is defined as income:

> that would be treated under section 624 as income of the settlor but for section 628A [s.624 protected-trust relief][220]

On this analysis, the statutory terminology is highly confusing:

(1) The label "protected foreign-source income" seems apt for a settlor-interested trust where the settlor is UK resident and in principle within s.624/720. In this case, s.624/720 protected-trust reliefs disapply the s.624/720 charge. But it also applies where those charges are not in point.

[220] See 47.22.1 (PFSI).

(2) The label "Protected Income" means income which has been protected once, by s.720 protected-trust relief specifically, but by that reason falls within the scope of other anti-avoidance provisions. "Untaxed income" would have been clearer.

It is probably best to adopt the statutory terminology, as anything else is even more confusing, but these points must be kept in mind in order to understand the provisions.

Although not the statutory usage, I write the term Protected Income with initial capitals, to reflect the technical nature of the term.

Income is not Protected Income if:

- it arises before 6 April 2017[221]
- it arises when the transferor/settlor is non-resident[222]
- it arises when the transferor/settlor and spouse are excluded from benefit

50.45 Non-resident receives benefit

Section 732(1) formerly provided:

> This section applies if ... (b) an individual *who is UK resident for a tax year* receives a benefit in that tax year

FA 2017 made two changes:

(1) It deleted the words in italics, so it now reads:

> This section applies if ... (b) an individual receives a benefit in that tax year

(2) It added s.731(1A) ITA. This is where the relief for non-residents who receive benefits is now to be found.

Section 731(1A) is hard to follow, even by the refined standards of contemporary anti-avoidance legislation. We begin our journey with s.731(1):

> Income tax is charged on income treated as arising to an individual under section 732 [s.731 income].

Section 731(1A) then qualifies this rule with a relief for non-residents ("s.731 non-residents relief"):

[221] See 92.18 (Protected-trusts: Commencement).

[222] See 92.13.1 (Condition (a): RFI).

> But where the individual [the beneficiary] is non-UK resident for the tax year in which a benefit is received, there is a charge to tax under this section on any matched deemed [s.731] income...

The wording which follows is easier to understand if one approaches it in three stages:

(1) Identify "matched deemed income" (which I call **"Matched s.731 Income"**)

(2) Two conditions (**"s.731(1A) conditions"**) must be met for a charge:
  (a) Matched s.731 Income matches to Protected Income
  (b) Benefit is received by settlor/close-family

If these conditions are both met, then there may be a s.731 charge on a benefit received by a non-resident.

If either of these conditions are not met, there is no s.731 charge on a benefit received by a non-resident. That would be the case even if:

(1) The non-resident later became UK resident; and

(2) The benefit is then matched to relevant income (eg if there was no relevant income at an earlier stage).

50.45.1 *Matched s.731 Income*

The legislation uses the term "matched deemed income" (which I call **"Matched s.731 Income"**).

Section 731(1B) ITA provides the definition:

> For the purposes of subsection (1A)—
> (a) "matched deemed [s.731] income" means income which—
> (i) is treated by section 732 as arising to the individual [beneficiary] [s.731 income]
> (ii) would, if section 735A [matching rules] applied also for this purpose,[223] be matched under that section with the benefit [ie the benefit received by the non-resident beneficiary]

If the benefit received by the non-resident is the only benefit conferred, then all their s.731 income is Matched s.731 Income. That is, Matched s.731 Income is the same as s.731 income. So this definition only really matters if there are (at least) two benefits, and

(1) One benefit is received by the individual when resident and another when non-resident; or

[223] See 50.42 (s.731 matching rules).

(2) Benefits are received by different individuals

Otherwise we can ignore the definition and for "matched deemed income" (in my terminology, Matched s.731 Income) we can simply read "s.731 income". The two would come to the same thing.

50.45.2 *s.731 income matched to Protected Income*

Armed with the definition of Matched s.731 Income, we turn to the condition in s.731(1A)(a). Section 731(1A) ITA provides:

> But where the individual [the beneficiary] is non-UK resident for the tax year in which a benefit is received, there is a charge to tax under this section on any matched deemed [s.731] income
> (a) only so far as
> [i] that matched deemed [s.731] income would under section 735A [s.731 matching rules] (if it applied also for this purpose)[224] be matched with
> [ii] an amount of relevant income that is protected income for the purposes of section733A(1)(b)(i) (see sections 721(3BA) and 728(1B))[225] ...

Thus there are two matching exercises:

(1) We match s.731 income to the benefit, to ascertain Matched s.731 Income.
(2) Then we match Matched s.731 Income to relevant income, and ask if that relevant income is Protected Income.

If so the condition in s.731(1A)(a) is met. The condition is not met if the Matched s.731 Income is matched to non-Protected Income.

50.45.3 *Benefit to settlor/close family*

We turn to the second of the two conditions. Section 731(1A) ITA provides:

> But where the individual [the beneficiary] is non-UK resident for the tax year in which a benefit is received, there is a charge to tax under this section on any matched deemed [s.731] income...
> (b) only if—
> (i) the individual [beneficiary] is the settlor of the settlement concerned, or

[224] For s.735A see 50.42 (s.731 matching rules).

[225] See 50.44 ("Protected Income").

> (ii) the benefit is received by the individual [beneficiary] at a time when the individual is a close member[226] of the family of the settlor of that settlement.

If the individual receiving the benefit is not the settlor/close-family, the condition in s.731(1A)(b) is not met, so the individual qualifies for s.731 non-residents benefit relief.

50.45.4 *Interaction with onward-gift rules*

Section 731(1C) ITA provides two exceptions to s.731 non-residents relief:

> Subsection (1A) does not restrict the charge to tax under this section on income treated as arising to the individual by section 733C or 733E (onward gifts: recipient or settlor treated as individual to whom income is treated as arising).

The statutory references here relate to the onward-gift rules:

Section	**Topic**	**See**
733C	s.731 onward-gift donee charge	50.55
733E	onward-gift settlor-attribution	50.57

50.45.5 *Purpose of s.731(1A)*

HMRC protected-trust guidance provides:[227]

> 3.25... An additional subsection S731(1A) ITA 07 has also been introduced which states that if an individual is not resident in the UK in a particular tax year then that individual will not be chargeable to tax in respect of any income arising under this section. The subsection has been introduced to prevent a charge arising on a non-resident individual which was previously covered by S732(1)(b) ITA 07 ...
> However, S731(1A) ITA 07 does allow for the possibility of another individual being liable to tax on this income if S733A ITA 07 (settlor liable for section 731 charge on closely-related beneficiary) provides for such a charge...
> 3.27 In [s.732(1)(b)] the reference to
>
> the individual being resident in the tax year in[228] which they receive a

[226] Section 731(1B) ITA provides the standard definition (in short, spouse/cohabitee and minor children); see 61.27.2 ("Close-family").

[227] For this document, see 92.1.1 (Protected-trust guidance).

[228] For completeness: I have corrected a typo here. The original reads:
the individual being resident in the tax *in* year which they receive a benefit

benefit

is removed and is replaced by

an individual who receives a benefit in a tax year.

This amendment has been referred to in paragraph 3.25 above and the change has been made in order to enable a charge to arise on a settlor if a person who is a close family member of the settlor receives a benefit in a tax year in which they are non-resident.

50.46 s.731 income arising to non-resident

50.46.1 *Benefit to UK resident, matched when non-resident*

Suppose:

(1) Year 1: An individual (B) receives a benefit when UK resident, but there is no s.731 charge as there is no relevant income.

(2) Year 2: Relevant income arises which is matched to the benefit.

If B is UK resident in year 2, there is obviously a s.731 charge in year 2. What if B is non resident in year 2? There is no express relief in this situation. The only express territorial limitation is when a benefit is received by a non-resident. However no-one suggests that s.731 imposes a charge on the non-resident. The general territorial limitation must be implied.[229]

50.46.2 *Benefit to non-resident, matched when non-resident*

Suppose:

(1) A benefit is received by non-resident settlor[230]

(2) The Matched s.731 Income is matched to Protected Income when the settlor is non-resident.[231]

This meets the conditions of s.731(1A). Is the settlor therefore chargeable? That would be surprising. It is considered that the same

[229] See 16.11 (General territorial principle).

[230] Similar issues might arise where (1) the income is received by non-resident close family, and (2) the settlor is not UK resident.

[231] If the benefit is matched to non-Protected income, it is not taxed:
If the settlor has never been UK resident, there is no Protected Income, and this question does not arise; see 92.13 (Protected s.720 trust income). The situation in which this question arises is if:
(1) The settlor is UK resident for a period of time and Protected Income arises.
(2) The settlor ceases to be UK resident.
(3) The settlor then receives a benefit.

territorial limitation must be applied.[232]

Para 24 Protected-trust Note agrees:[233]

> Section 731(1A) prevents a charge where the recipient is non-resident when he receives the benefit. On a literal reading this does not apply where
> [1] the person abroad is a settlement or underlying company[234] and
> [2] the recipient of the benefit is the settlor.
> It is considered that section 731(1A) is intended to be read with section 733A [s.731 settlor-attribution rule] and ensure the settlor can be charged on a benefit received by the settlor's non-resident spouse or minor child but not if the non-resident is the settlor.
> It follows that section 731(1A) should only be applied to tax the settlor if payments are made to the settlor's non-resident close family member and the settlor is UK resident, not where the settlor himself is non-resident and payments are made to him (or a close family member).[235]
> This appears to be the approach adopted by HMRC.[236]

This view is supported by s.733(1) step 2[2][237] which assumes that Matched s.731 Income is not necessarily taxed.

If (contrary to the view taken here) there were a charge on s.731 income arising to a non-resident, DT relief can apply, on the basis that s.731 income falls within the Other Income article.[238] But this point should not arise.

50.46.3 *Benefit to non-resident matched when resident*

Suppose:

(1) Year 1:

   (a) A benefit is received by non-resident settlor ("a pre-residence benefit")

[232] See 16.11 (General territorial principle).

[233] For this document, see 92.1.1 (Protected-trust guidance).

[234] The example posits that the persona abroad is a trust or underlying company, because if the person abroad is a company which is not held in a trust, the company's income would not be Protected Income.

[235] The text adds at this point "An alternative reading would put the settlor in a worse position than a UK domiciliary becoming non-UK resident particularly as the remittance basis could not apply." But I am not sure about that.

[236] See 50.45.5 (Purpose of s.731(1A)).

[237] See 50.18.3 (Step 2: Total Untaxed Benefits).

[238] See 50.61.2 (Individual treaty-resident outside UK).

   (b) There is no relevant income to which the benefit can be matched
(2) Year 2:
   (a) The settlor becomes UK resident
   (b) Protected Income arises which is matched to the benefit

Taking s.731(1A) literally, this would appear to be chargeable. The pre-residence benefit is matched to the Protected Income. But context suggests that, as the professional bodies argue:

> section 731(1A) is intended to be read with section 733A [s.731 settlor-attribution rule] and ensure the settlor can be charged on a benefit received by the settlor's non-resident spouse or minor child but not if the non-resident is the settlor.

On this somewhat purposive construction there would be no charge.

If that is wrong, then whether or not the benefit is matched to Protected Income is somewhat arbitrary so there may be some scope for planning.

50.47 s.731 income of split year

There is no express split-year rule. So the usual s.731 rules apply[239] even if:

(1) a benefit is received during the overseas part of a split year of a beneficiary; or
(2) the relevant income matched to the benefit arises during the overseas part of a split year

The rule ought to be that benefits conferred on a beneficiary during the overseas part of their split year are treated like benefits of a year of non-residence, ie (generally) disregarded.[240]

However DT relief should be available if the individual is treaty-resident in a foreign state during part of a year, on the basis that s.731 income falls within the Other Income article.[241]

50.48 s.731 settlor-attribution: Outline

Section 733A introduces what I call the **"s.731 settlor-attribution rule"**.

This is one of a set of three rules which I call s.731/s.643A/s.87 settlor-

[239] See 10.1 (Residence throughout tax year).
[240] The same point arises for s.87, see 61.18.1 (s.87 split year: Critique).
[241] See 50.61.2 (Individual treaty-resident outside UK).

attribution rules; see 50.4.11 (Settlor-attribution rules: Introduction).

In outline, this rule applies where:

(1) A beneficiary receives a benefit
(2) The beneficiary is:
    (a) close-family
    (b) outside the s.731 charge (non-resident or remittance-basis exempt)
(3) The settlor is UK resident (and so potentially chargeable).

The charge is on the lower of the value of the benefit and the amount of Protected Income.

It will be quite rare for the s.731 settlor-attribution rule to apply, as it requires:

(1) Benefit to close-family who are non-resident or remittance-basis exempt (and so not themselves charged)
(2) A settlor of a protected trust who is UK resident and not remittance-basis exempt

A benefit to the settlor/transferor is not caught by the s.731 settlor-attribution rule, but it should fall within s.731 under general principles.[242]

50.49 s.731 attribution conditions

Section 733A(1) ITA provides:

> Subsections (2) and (3) apply if-

A set of six conditions then follow, which I call **"s.731 settlor-attribution conditions"**.

50.49.1 *Cond (a): s.731 income*

Section 733A(1) ITA provides:

> Subsections (2) and (3) apply if-
> (a) an amount of income [s.731 income] is treated as arising to an individual under section 732 for a tax year.[243]

The usual s.731 application conditions must be met.

[242] See 50.15 (Taxable-transferor defence).

[243] Section 733A(4) ITA provides: "The amount mentioned in subsection (1)(a) may be the whole, or part only, of the amount treated as arising to the individual under section 732 for the year in the case of the relevant transfer and its associated operations."

I refer to this individual as the [close-family] individual as the conditions require that the individual is close-family of the settlor, or as the **"beneficiary"**, as this individual must receive a benefit (in order to receive s.731 income).

50.49.2 *Cond (b): Match Protected Income*

Section 733A(1) ITA provides:

> Subsections (2) and (3) apply if...
> (b) under section 735A[244] (if it applied also for this purpose) that amount [of s.731 income] would be matched—
> (i) with an amount of relevant income that is protected income for the purposes of this sub-paragraph (see sections 721(3BA) and 728(1B)),[245] and

If relevant income accrues to a company not held in a trust, the income is not Protected Income, and the s.731 settlor-attribution rule does not apply.

50.49.3 *Cond (b): Match with benefit*

Section 733A(1) ITA provides:

> Subsections (2) and (3) apply if...
> (b) under section 735A[246] (if it applied also for this purpose) that amount [of s.731 income] would be matched ...
> (ii) with a benefit received by the individual [the beneficiary] at a time when the individual [the beneficiary] was a close member (see subsection (7))[247] of the family of the settlor of the settlement concerned.

50.49.4 *Cond (c): Non-resident trust*

Section 733A ITA(1) provides:

> Subsections (2) and (3) apply if...
> (c) there is no time in the year when the trustees of the settlement are resident in the UK.

50.49.5 *Cond (d): Settlor UK resident*

Section 733A(1) ITA provides:

[244] Section 735A is the s.731 matching rule: see 50.42 (s.731 matching rules).

[245] See 50.44 ("Protected Income").

[246] Section 735A is the s.731 matching rule: see 50.42 (s.731 matching rules).

[247] See 61.27 ("Close-family").

> Subsections (2) and (3) apply if...
>
> (d) there is a time in the year when the settlor is resident in[248] the UK.

50.49.6 *Cond (e)(f): Settlor non-dom*

Section 733A(1) ITA provides:

> Subsections (2) and (3) apply if...
>
> (e) there is no time in the year when the settlor is [actually] domiciled in the UK, and
>
> (f) there is no time in the year when the settlor is regarded for the purposes of section 718(1)(b)[249] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly domiciled resident[250]].

50.50 s.731 settlor-attribution rule

Assuming the s.731 settlor-attribution conditions are met, we move on to the attribution rule.

Section 733A(2)(3) ITA deal with 2 situations:

(1) The beneficiary may be wholly exempt, because
  (a) they are non-resident, or
  (b) they are a remittance basis taxpayer and none of the income is remitted.

(2) The beneficiary may be partly exempt, because they are a remittance basis taxpayer and only part of the income is remitted.

It is easier to follow if the provisions are read side by side:

Beneficiary wholly exempt: s.733A(2)	**Beneficiary partly exempt: 733A(3)**
If – (a) the [close-family] individual is not resident in the UK at any time in the year, or	If –
(b) [i] section 809B, 809D or 809E (remittance basis) applies to the [close-family] individual for the	(a) [identical to (b)[i] opposite]

[248] The correct expression for residence of individuals is resident *for* the year; but it does not matter.

[249] See 48.5 ("Person Abroad").

[250] See 5.4.2 (IT/CGT formerly-dom resident rule).

year and	
[ii] none of the amount mentioned in subsection (1)(a) of this section [s.731 income] is remitted to the UK in the year,	(b) part only of the amount mentioned in subsection (1)(a) of this section [s.731 income] is remitted to the UK in the year,
[A] the settlor is liable for the tax charged under section 731 on that amount as if that amount were income arising to the settlor in the year	[A] the settlor is liable for the tax charged under section 731 on the remainder of that amount as if that remainder were income arising to the settlor in the year
[B] (and the [close-family] individual] is not liable in any later year for income tax on that amount).	[B] (and the [close-family] individual is not liable in any later year for income tax on that remainder).

Para [B] is not relevant if the (close-family) individual is non-resident, but it is relevant if the individual is remittance-basis exempt: its effect is that the close-family individual is not taxed if they later bring the benefit to the UK. That may be advantageous where:

(1) a benefit is provided to a minor child of the settlor
(2) the remittance basis applies to the child and to the settlor
(3) Once the child reaches the age of 18, they bring the property to the UK

The child is not taxed; and neither is the settlor, since on the child becoming 18, it ceases to be a relevant person in relation to the settlor.

Statute frequently refers to a case:

> where an individual is liable as a result of section 733A(2) or (3) for the tax charged under section 731 on the amount mentioned in s.733B(1)(a) [s.731 income]

For clarity, I gloss that as [attribution to settlor].

50.51 s.731 settlor-attribution remittance-basis

Section 735B(1) ITA provides:

> This section applies in relation to income if—
> (a) the [s.731] income is treated by section 732 as arising to an individual ("the beneficiary") for a tax year,

> (b) another individual ("the settlor") is under section 733A(2) or (3) [attribution to settlor[251]] liable for tax on the income, and
> (c) section 809B, 809D or 809E (remittance basis) applies to the settlor for that year.

Assuming these conditions are met, we move on to s.735B(2) ITA:

> The income ("the transferred-liability deemed income") is treated as relevant foreign income of the settlor.

This applies the remittance basis to the s.731 income attributed to the settlor.

Section 735B(3) ITA provides:

> If, for the purposes of section 735 as it applies in relation to the beneficiary, any benefit or relevant income relates to any part of the transferred-liability deemed income then, for the purposes of Chapter A1 of Part 14 as it applies in relation to the settlor, that benefit or relevant income is to be treated as deriving from that part of the transferred-liability deemed income.

This adopts the usual rule for the s.731 remittance basis.[252]

Section 735B(4) ITA provides:

> In the application of section 832 of ITTOIA 2005 in relation to the income, subsection (2) of that section has effect with the omission of its paragraph (b).

The significance is that (contrary to the usual rule) the s.731 income attributed to the settlor is taxable if it is remitted during the overseas part of a split year.[253] This is consistent with the rule which applies generally for ToA[254] though there is no good reason for the rule.

50.52 s.731 onward-gifts

Sections 733B - 733D set out what I call the **"s.731 onward-gift rule"**. This is one of a set of three rules which I call s.731/s.643A/s.87 onward-gift rules; see 61.30 (Onward-gifts: Introduction).

It is helpful first to review some definitions.

[251] See 50.50 (s.731 settlor-attribution rule).
[252] See 50.39 (s.731 remittance basis).
[253] See 17.13.1 (Remittance in split-year).
[254] See 50.47 (Split year: s.731 income).

50.52.1 *Charging, matching, gift year*

The first two definitions are the same as in the s.643A onward-gift rules, so it is not necessary to repeat them here:

Term	**Definition**	**s.643A equivalent, see:**
Gift year	s.733B(7)	47.31.1
Charging year	s.733B(7)	47.31.3

The definition of matching year is differently worded but effectively the same. Section 733B(7) ITA provides:

> In this section ...
> "the matching year" means the first tax year in which the matching mentioned in subsection (1)(b)[255] would occur,

50.52.2 *Settlor*

Section 733B(7) ITA provides:

> In this section ...
> "the settlor" means the settlor of the settlement, mentioned in
> [a] section 721A(3) or (4)[256] or
> [b] [section] 729A(3) or (4),
> which because of subsection (1)(b)(i) is the settlement concerned.

This definition applies for s.733B, so it is repeated in s.733E(7) ITA. What is the point of the last phrase?

50.53 s.731 onward-gift conditions

Section 733B(1) ITA provides:

> Sections 733C to 733E apply if-

A set of 7 conditions then follow, which I call **"s.731 onward-gift conditions"**.

50.53.1 *Cond (a): s.731 income*

Section 733B(1) ITA provides:

> Sections 733C to 733E apply if-
> (a) [i] an amount of income is treated as arising under section 732

[255] See 50.53.2 (Cond (b): match Protected Income).

[256] See 92.12 (Protected s.720 income).

[s.731 income] to an individual ("the original beneficiary" [donor]) in a tax year ("the arising year")

[ii] but neither by section 733C nor by section 733E

The statutory references in para [ii] are:

Section	**Topic**	**See**
733C	s.731 onward-gift donee charge	50.55
733E	onward-gift settlor-attribution	50.57

The s.731 onward-gift rules frequently refer to "the amount mentioned in s.733B(1)(a)". For clarity, I gloss that as [s.731 income].

50.53.2 *Cond (b): Match Protected Income*

Section 733B(1) ITA provides:

> Sections 733C to 733E apply if...
> (b) under section 735A [matching rules] (if it applied also for this purpose)[257] that amount [the s.731 income] would be matched-
> (i) with an amount of relevant income that is protected income for the purposes of section 733A(1)(b)(i) (see sections 721(3BA) and 728(1B))[258]

The s.731 onward-gift rule can only apply if the s.731 income is matched with relevant income which is Protected Income.

S.731 income is (in short) matched with the oldest relevant income, under a type of FIFO basis. For trusts which were in existence before 2017, the s.731 onward gift rules may not apply for the foreseeable future, as s.731 income will be matched with pre-2017 income (which is not Protected Income).

50.53.3 *Cond (b): Match benefit*

Section 733B(1) ITA provides:

> Sections 733C to 733E apply if...
> (b) under section 735A [matching rules] (if it applied also for this purpose)[259] that amount [the s.731 income] would be matched
> ...

[257] See 50.42 (s.731 matching rules).

[258] For these sections and the definition of Protected Income, see 50.44 ("Protected Income").

[259] See 50.42 (s.731 matching rules).

> (ii) with the whole or part of a benefit received by the original beneficiary [donor]

50.53.4 *Cond (c): Intention to give*

Section 733B(1) ITA provides:

> (1) Sections 733C to 733E apply if...
> (c) at the time that benefit is received by the original beneficiary [donor] ("the distribution time")-
> (i) there are arrangements, or there is an intention, as regards the (direct or indirect) passing-on of the whole or part of that benefit to another person, and
> (ii) it is reasonable to expect that, in the event of the whole or part of that benefit being passed on to another person as envisaged by the arrangements or intention, that other person will be UK resident when they receive at least part of what is passed on to them

This is effectively equivalent to s.87 onward-gift condition (c).[260]

50.53.5 *Cond (d): Gift & time limit*

Section 733B(1) ITA provides:

> Sections 733C to 733E apply if...
> (d) the original beneficiary [donor] makes, directly or indirectly, a gift ("the onward payment") to a person ("the subsequent recipient" [donee])-
> (i) [A] at the distribution time,
> [B] or at any later time in the 3 years beginning with the start time, or
> (ii) at any time before the distribution time and, it is reasonable to assume, in anticipation of receipt of the benefit mentioned in paragraph (b)(ii)

Statute frequently refers to an onward payment (gift) "made as mentioned in subsection (1)(d)(ii)". I refer to that as a **"pre-distribution gift"**.

Onward-gift condition (d) is effectively equivalent to s.87 onward-gift condition (c).[261]

[260] See 50.53.4 (Cond (c): Intention to give).

[261] See 61.31.3 (Condition (c): Gift & time limit). Section 733B(7) provides the standard wide definition of making a gift, the same as s.87G(15) TCGA

50.53.6 *Cond (d) "start time"*

"Start time" matters as the 3 year gift time limit runs from the start time. In outline, there are 2 possible start times:

Para	***Circumstances***	***Start time***
733B(4)(a)	Direct gift	When benefit provided to donor
733B(4)(b)	Chain of gifts	Time of first gift

The start times are best read side by side. Section 733B(4) ITA provides:

> For the purposes of subsection (1)(d)(i)—

(a) if the amount mentioned in subsection (1)(a) [s.731 income] is not one that is treated as arising by section 733D, [for s.733D, see 50.56 (Donee not taxed)]	(b) if the amount mentioned in subsection (1)(a) [s.731 income] is one that is treated as arising by section 733D in connection with the operation of this section on a previous occasion,
"the start time" is the time the benefit mentioned in subsection (1)(b) is provided to the original beneficiary [donor],	"the start time" is the time given by this subsection as the start time on that occasion.

50.53.7 *Cond (e): Gift from benefit*

Section 733B(1) ITA provides:

> Sections 733C to 733E apply if...
> (e) the gift is of or includes-
> (i) the whole or part of the benefit mentioned in paragraph (b)(ii),
> (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of that benefit, or
> (iii) any other property, but only if the benefit mentioned in paragraph (b)(ii) is provided with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient [donee]

This is substantially equivalent to s.87 onward-gift condition (d).[262] The s.731 onward-gift rule frequently refers to this provision with the formula:

[262] See 61.31.6 (Condition (d): Gift from capital payment).

> so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e)

For clarity, I gloss that as [gifted benefit].

50.53.8 *"Relevantly remitted"*

Onward-gift conditions (f)(g) use the term "relevantly remitted". Section 733B(7) ITA provides:

> "relevantly remitted"
> [a] means remitted to the UK in a tax year for which the original beneficiary [donor] is UK resident
> [b] but, where
> [i] an individual is liable as a result of section 733A(2) or (3)[263] [settlor-attribution rule]
> [ii] for the tax charged under section 731
> [iii] on the amount mentioned in subsection (1)(a) [s.731 income],
> means remitted to the UK in a tax year for which that individual [the settlor] is UK resident

I refer to this as **"relevantly/taxably remitted"**. The definition is equivalent to the s.643A definition.[264]

50.53.9 *Cond (f)(g): Donor outside s.731*

Section 733B(1) ITA provides:

> Sections 733C to 733E apply if...

It is easier to follow if conditions (f) and (g) are read side by side:

(f): Directly received s.731 income	**(g) Settlor-attributed s.731 income**
except where an individual is liable as a result of section 733A(2) or (3) [settlor-attribution rule] for the tax charged under section 731 on the amount mentioned in paragraph (a) [s.731 income], either- (i) the original beneficiary [donor] is non-UK resident for the arising year, or	where an individual [the settlor] is liable as a result of section 733A(2) or (3) [settlor-attribution rule] for the tax charged under section 731 on the amount mentioned in paragraph (a) [s.731 income],

[263] See 50.50 (s.731 settlor-attribution rule).

[264] See 47.32.7 (s.643A "relevantly remitted").

(ii)[A] section 809B, 809D or 809E (remittance basis) applies to the original beneficiary [donor] for the arising year and	[A] section 809B or 809D or 809E [remittance basis] applies to that individual for the arising year and
[B] none of the amount mentioned in paragraph (a) is relevantly [taxably] remitted before the end of the charging year.	[B] [identical]

This is approximately equivalent to s.643A onward-gift condition (f)(g).[265]

50.54 s.731 misc rules

50.54.1 *Donee on remittance basis, remits part of income*

Section 733B(2) ITA provides:

> If—
>
> (a) the amount mentioned in subsection (1)(a) [s.731 income] is not treated as arising by section 733D (and neither by section 733C nor by section 733E),

The statutory references here are:

Section	**Topic**	**See**
733C	s.731 onward-gift donee charge	50.55
733D	Donee not taxed	50.56
733E	onward-gift settlor-attribution	50.57

> (b) except where an individual is liable as a result of section 733A(2) or (3)[266] [settlor-attribution rule] for the tax charged under section 731 on that amount, section 809B or 809D or 809E [remittance basis] applies to the original beneficiary [donor] for the arising year,
>
> (c) where an individual is liable as a result of section 733A(2) or (3)[267] [settlor-attribution rule] for the tax charged under section 731 on that amount, section 809B or 809D or 809E [remittance basis] applies to that individual for the arising year, and
>
> (d) part only of that amount is relevantly remitted before the end of the charging year,

[265] See 47.32.8 (Cond. (f)/(g): No s.643A charge).

[266] See 50.50 (s.731 settlor-attribution rule).

[267] See 50.50 (s.731 settlor-attribution rule).

> subsection (1)(a) is to be treated as referring instead only to the remainder of that amount.

50.54.2 *Pre-distribution gift: date of charge*

Section 733B(5) ITA provides:

> Where the onward payment [gift] is made as mentioned in subsection (1)(d)(ii), [pre-distribution gift] the onward payment [gift] is to be treated—
>
> (a) for the purposes of the provisions of this section following subsection (1)(d), and
>
> (b) for the purposes of sections 733C to 733E,
>
> as made immediately after, and in the tax year containing, the distribution time.

50.54.3 *Relief for donor/settlor*

Section 733B(3) ITA provides:

> [A] The original beneficiary [donor] is not liable to tax for any year after the charging year on so much of the amount mentioned in subsection (1)(a) [s.731 income] as is—
>
> (a) treated as arising to the subsequent recipient [donee] by section 733C, or
>
> (b) treated as arising to the settlor by section 733E;
>
> [B] and the settlor is not is liable under section 733A(2) or (3)[268] [settlor-attribution rule] to tax for any year after the charging year on so much of the amount mentioned in subsection (1)(a) [s.731 income] as is treated as arising to the subsequent recipient [donee] by section 733C.

50.54.4 *Start time adjustment*

Section 733B(4) ITA provides:

> For the purposes of subsection (1)(d)(i)—
>
> (a) if the amount mentioned in subsection (1)(a) [s.731 income] is not one that is treated as arising by section 733D,[269] "the start time" is the time the benefit mentioned in subsection (1)(b) is provided to the original beneficiary [donor], and
>
> (b) if the amount mentioned in subsection (1)(a) [s.731 income] is

[268] See 50.50 (s.731 settlor-attribution rule).

[269] See 50.56 (Donee not taxed).

> one that is treated as arising by section 733D[270] in connection with the operation of this section on a previous occasion, "the start time" is the time given by this subsection as the start time on that occasion.

s.733B(8)(9) are identical to the s.643A rules, and need not be set out again here: see 47.33.3 (Valuation of benefits) and 47.33.4 (Meaning of remittance).

50.55 s.731 onward-gift donee charge

Assuming the s.731 onward-gift conditions in s.733B are satisfied, we move on to the onward-gift rules in s.733C.

The layout is: s.733C(1)(2) set out application conditions; s.733C(3) sets out the rule where those conditions are satisfied.

The s.733C application conditions are substantially identical to the s.643A onward-gift rule, but I set them out again here for convenience. It is easier to follow if the two conditions are read side by side:

Donee on arising basis: 733C(1)	**Donee on remittance basis + some income remitted: s.733C(2)**
Subsection (3) applies if—	Subsection (3) also applies if—
(a) this section applies (see section 733B(1)), [s.731 onward-gift conditions are met] and	(a) [identical]
(b) the subsequent recipient [donee] is UK resident for the gift year, and	(b) [identical]
(c) the subsequent recipient [donee] is UK resident for the matching year if that is later than the gift year, and	(c) [identical]
(d) none of sections 809B, 809D and 809E [remittance basis] applies to the subsequent recipient [donee] for the charging year.	(d) section 809B, 809D or 809E [remittance basis] applies to the subsequent recipient [donee] for the charging year, and
	(e) the whole, or part only, of the onward payment [gift] is remitted to the UK in the charging year.

[270] See 50.56 (Donee not taxed).

Assuming the s.733C application conditions are satisfied, we move on to the rule. Section 733C(3) ITA provides the s.731 onward-gift charge:

> Section 731 has effect—
> (a) as if the subsequent recipient [donee] were an individual to whom [s.731] income is treated as arising under section 732 for the charging year, and
> (b) as if, subject to subsection (4), the amount of that income—
> (i) were equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit], or
> (ii) were, where
> [A] this subsection applies because of subsection (2) [donee on remittance basis] and
> [B] part only of that much of the onward payment [gift] is remitted to the UK in the charging year,
> equal to the amount or value of that part.

50.55.1 *Donee otherwise taxable*

Section 733C(4) ITA provides:

> The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows—
> (a) deduct any part of the amount on which the subsequent recipient is liable to income tax otherwise than under this section

50.55.2 *Gift exceeds donor's benefit*

Section 733C(4) ITA provides:

> The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows ...
> (b) if following any adjustment under paragraph (a) the amount exceeds the amount mentioned in section 733B(1)(a), deduct the excess.

50.56 Donee not taxed

The layout is: s.733D(1)(2) set out application conditions; s.733D(3) sets out the rules where one of those conditions is satisfied. The s.733D application conditions are substantially identical to the s.643A rule, but I set them out again here for convenience. It is easier to follow if the s.733D application conditions are read side by side:

Donee non-resident	**Donee on remittance basis**
(1) Subsection (3) applies if	(2) Subsection (3) also applies if—
[x] this section applies (see section 733B(1)) [s.731 onward-gift conditions are met] and—	(a) [identical to [x] opposite]
(a) the subsequent recipient [donee] is non-UK resident for the gift year, or (b) the matching year is later than the gift year and the subsequent recipient [donee] is UK resident for the gift year but non-UK resident for the matching year.	(b) the subsequent recipient [donee] is UK resident for the gift year, and
	(c) the subsequent recipient [donee] is UK resident for the matching year if that is later than the gift year, and (d) section 809B, 809D or 809E [remittance basis] applies to the subsequent recipient [donee] for the charging year, and (e) none, or part only, of the onward payment [gift] is remitted to the UK in the charging year.

Assuming the s.733D application conditions are satisfied, we move on to the rule. Section 733D(3) ITTOIA provides:

> Section 733B(1)(a) has effect—
> (a) as if the subsequent recipient [donee] were an individual to whom income is treated as arising under section 732 for the charging year, and
> (b) as if, subject to subsection (4), the amount of that income—
> (i) were equal to the amount or value of so much of the onward payment [gift] as
> [A] is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit] and
> [B] is not treated as arising to someone other than the subsequent recipient [donee] as a result of the

operation of section 733E, or

(ii) were, where

[A] this subsection applies because of subsection (2) and

[B] part only of that much of the onward payment [gift] is remitted to the UK in the charging year,

equal to the amount or value of the remainder of that much of the onward payment [gift].

The difference between 733C(3) and 733D(3) is:

733C: chargeable s.731 income arises to donee/settlor

733D: non-chargeable s.731 income arises to donee/settlor, which is taken into account for a future onward-gift charge

It may be helpful to look at the s.733C/D rules side by side, with the key differences underlined:

Section 733C(3)	**Section 733D(3)**
Section 731 has effect— (a) as if the subsequent recipient [donee] were an individual to whom income is treated as arising under section 732 for the charging year, and	Section 733B(1)(a) has effect— (a) [identical]
(b) as if, subject to subsection (4), the amount of that income— (i) were equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit], or	(b) as if, subject to subsection (4), the amount of that income— (i) were equal to the amount or value of so much of the onward payment [gift] as [a] is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit] and [B] is not treated as arising to someone other than the subsequent recipient [donee] as a result of the operation of section 733E, or
(ii) were, where [A] this subsection applies because of subsection (2) [donee on remittance basis] and	(ii) were, where [A] [identical]
[B] part only of that much of the onward payment [gift] is remitted	[B] [identical],

to the UK in the charging year,	
equal to the amount or value of that part.	equal to the amount or value of the remainder of that much of the onward payment [gift].

50.56.1 *Gift value exceeds s.731 income*

Section 733D(4) ITA provides:

> The amount given by subsection (3) (before adjustment under this subsection) is to be adjusted as follows: if that amount exceeds the amount mentioned in section 733B(1)(a) [s.731 income] in the case of the original beneficiary [donor], deduct the excess.

50.56.2 *Prior year s.731 charge*

Section 733D(5) ITA provides:

> Where the amount mentioned in section 733B(1)(a) is one treated as arising by this section in connection with the operation of section 733B and this section on a previous occasion, section 733B(1) has effect—
> (a) with the omission of its paragraphs (b) and (c),
> (b) as if the reference in its paragraph (d) to the benefit mentioned in its paragraph (b)(ii) were, instead, to what was the onward payment [gift] on that previous occasion,
> (c) as if the references in its paragraph (d) to the distribution time were, instead, to the time when that onward payment [gift] was made, and
> (d) as if the references in its paragraph (e) to the benefit mentioned in its paragraph (b)(ii) were, instead, to so much of that onward payment [gift] as was on that previous occasion within any of sub-paragraphs (i) to (iii) of its paragraph (e) [gifted benefit].

Amended as s.733D(5) directs, s.733B(1) provides:

> (1) Sections 733C to 733E apply if—
> (a) an amount of income is treated as arising under section 732 to an individual ("the original beneficiary") in a tax year ("the arising year") but neither by section 733C nor by section 733E,
> ~~(b) under section 735A (if it applied also for this purpose) that amount would be matched—~~
> ~~(i) with an amount of relevant income that is protected income for the purposes of section 733A(1)(b)(i) (see sections 721(3BA) and 728(1B)), and~~
> ~~(ii) with the whole or part of a benefit received by the original beneficiary,~~

~~(c) at the time that benefit is received by the original beneficiary ("the distribution time")—~~

~~(i) there are arrangements, or there is an intention, as regards the (direct or indirect) passing-on of the whole or part of that benefit to another person, and~~

~~(ii) it is reasonable to expect that, in the event of the whole or part of that benefit being passed on to another person as envisaged by the arrangements or intention, that other person will be UK resident when they receive at least part of what is passed on to them,~~

(d) the original beneficiary makes, directly or indirectly, a gift ("the onward payment") to a person ("the subsequent recipient")—

(i) at the distribution time, or at any later time in the 3 years beginning with the start time, or

(ii) at any time before ~~the distribution time~~ the time when that onward payment [gift] was made and, it is reasonable to assume, in anticipation of receipt of ~~the benefit mentioned in paragraph (b)(ii)~~ what was the onward payment [gift] on that previous occasion,

(e) the gift is of or includes—

(i) the whole or part of ~~the benefit mentioned in paragraph (b)(ii)~~ so much of that onward payment [gift] as was on that previous occasion within any of sub-paragraphs (i) to (iii) of its paragraph (e) [gifted benefit],

(ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of that benefit, or

(iii) any other property, but only if ~~the benefit mentioned in paragraph (b)(ii)~~ so much of that onward payment [gift] as was on that previous occasion within any of sub-paragraphs (i) to (iii) of its paragraph (e) [gifted benefit] is provided with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient,

(f) except where an individual is liable as a result of section 733A(2) or (3) for the tax charged under section 731 on the amount mentioned in paragraph (a), either—

(i) the original beneficiary is non-UK resident for the arising year, or

(ii) section 809B or 809D or 809E (remittance basis) applies to the original beneficiary for the arising year and none of the amount mentioned in paragraph (a) is relevantly remitted before the end of the charging year, and

(g) where an individual is liable as a result of section 733A(2) or (3) for the tax charged under section 731 on the amount mentioned in paragraph (a), section 809B or 809D or 809E applies to that individual for the arising year and none of the amount mentioned in paragraph (a) is relevantly remitted before the end of the charging year.

50.57 s.731 onward-gift settlor-attribution rule

The s.731 onward-gift settlor-attribution rule is one of a set of three rules which

I call settlor-attribution rules. For a general introduction see 61.26 (Settlor-attribution: Introduction).

Suppose an onward gift is made to a donee (not close-family). A direct benefit to close-family may be treated as made to the settlor, under the s.731 settlor-attribution rule.[271] Section 733E ITA ensures that the same applies in the case of an onward gift to close-family. I refer to this as the **"s.731 OG settlor-attribution rule"**.

The layout is: s.733E(1)(2) set out application conditions; s.733E(3) sets out the rules where one of those conditions is satisfied. It is easier to follow if the 733E application conditions are read side by side:

Donee on remittance basis: s.733E(1)	**Donee non-resident: s.733E(2)**
Subsection (3) applies if— (a) this section applies (see section 733B(1)) [s.731 onward-gift conditions are met],	Subsection (3) also applies if— (a) [identical]
(b) the subsequent recipient [donee] is a close member of the settlor's family when the onward payment [gift] is made,	(b) [identical]
(c) the subsequent recipient [donee] is UK resident for the charging year,	(c) the subsequent recipient [donee] is non-UK resident for the charging year,
(d) section 809B, 809D or 809E [remittance basis] applies to the subsequent recipient [donee] for the charging year,	
(e) none, or part only, of the onward payment [gift] is remitted to the UK in the charging year,	
(f) there is a time in the charging year when the settlor is UK resident,	(d) [identical to (f)]
(g) there is no time in the charging year when the settlor is domiciled in the UK, and	(e) [identical to (g)]
(h) there is no time in the charging year	(f) [identical to (h)]

[271] See 61.26 (Settlor-attribution: Introduction).

> when the settlor is regarded for the purposes of section 718(1)(b) [definition of person abroad] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met.

Assuming the 733E application conditions are satisfied, we move on to the rule. Section 733E(3) ITA provides:

> Section 731 applies—
> (a) as if the settlor were an individual to whom income is treated as arising under section 732 for the charging year, and
> (b) as if, subject to subsection (4), the amount of that income—
> (i) were equal to the amount or value of so much of the onward payment [gift] as is within any of sub-paragraphs (i) to (iii) of section 733B(1)(e) [gifted benefit], or
> (ii) were, where this subsection applies because of subsection (1) in a case where part only of that much of the onward payment [gift] is remitted to the UK in the charging year, equal to the amount or value of the remainder of that much of the onward payment [gift].

50.57.1 *Settlor otherwise taxable*

Section 733E(4) ITA provides:

> The amount given by subsection (3)(b) (before adjustment under this subsection) is to be adjusted as follows—
> (a) deduct any part of the amount on which the settlor is liable to income tax otherwise than under this section, and
> (b) if following any adjustment under paragraph (a) the amount exceeds the amount mentioned in section 733B(1)(a), deduct the excess.

Section 733E(5)(6) ITA provides the standard settlor-attribution indemnity.[272]

> (7) In this section—
> (b) "close member", in relation to the family of the settlor, is to be read in accordance with section 733A(7) and (8).

[272] See 61.28 (Settlor-attribution indemnity).

This is the s.731 equivalent of s.87L: see 61.34 (Onward-gift to close-family: s.87 settlor-attribution rule).

50.58 Responses to s.731: Summary

(1) Avoid relevant income by
- (a) distributing income:
  - (i) as it arises; or
  - (ii) in a year before a beneficiary receives a benefit; or
- (b) using interest in possession settlements in preference to discretionary; or
- (c) not using trusts and companies where inappropriate

(2) Motive defence

(3) Remittance basis

(4) Arrange that foreign domiciled beneficiaries receive benefits of an income nature (outside s.731)

50.59 Record keeping

On this topic, see 61.58 (Record keeping for s.87/s.731).

50.60 Tax return: s.731 income

Section 731 income is returned in Box 42 in the Foreign pages (form SA106) 2022/23 The note by this box reads:

> If you've received a benefit from a person abroad, or you're chargeable on a benefit received by you, a close family member, or you're the recipient of an onward gift that is matched to protected foreign source income, enter the value of the payment. If you're omitting income from this section because you're claiming an exemption, see box 46. If you're the settlor or close family member of the settlor and you've received, or are treated as having received, a benefit from a trustee of the settlement, or you're the recipient of an onward gift, and the benefit or onward gift does not exceed the settlement's available protected income, enter the amount treated as your income. Include full details in the 'Any other information' box on your tax return- read the notes.

The reference to a benefit is a reference to an income taxable benefit, so if a foreign domiciled individual received a benefit which is not subject to IT (because of the remittance basis or for lack of relevant income) then the figure here should be nil. HMRC agree.

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from Non-Resident Trusts - 2021) provides:

> **Reporting benefits as a result of a relevant transaction made by another individual**
> Unless you're completing box 46 of the 'Foreign' pages [motive defence[273]] you should enter the amount from Step 6, in box 42 of the 'Foreign' pages.
> Enter in the 'Any other information' box, box 19 on page TR 7 of your tax return:
> - the full name and address of the person abroad receiving the available relevant income
> - the details of the relevant transactions that have given rise to the income
> - how you've calculated the benefits included on the return
>
> Where the benefit has come from a UK resident trust in the circumstances described in the previous section, also give details of those circumstances including the full name of any other trust involved.

50.61 DT relief: s.731 income

50.61.1 *Person abroad treaty-resident outside UK*

This section considers whether DT reliefs are available where:

(1) income accrues to a person abroad who is treaty-resident in a foreign state
(2) an individual is UK-law UK resident and not treaty-resident in a foreign state
(3) the individual is in principle subject to tax under s.731.

DT exemption is not applicable for s.731 ITA. EN ITA provides:

> 2170. The method statement [s.733 ITA 2007] makes it clear that "relevant income" in relation to an individual is not actually taxable income of the individual, but is an element in the calculation of taxable income. "Relevant income" is actual income arising to a person abroad; the income charged under section 731 is income treated as arising to the individual in question. This deemed income may be more or less than "the relevant income of the tax year" in relation to the individual and the tax year identified at Step 3.

The INT Manual makes the same point:

[273] See 52.33 (Tax return: Motive defence).

> **INTM601720 Measure of benefits charge** [Jul 2023]
> The benefits charge is a charge on 'income treated as arising' to the individual and it is a charge by reference to the amount treated as arising.
> Whether income is treated as arising, and if so the amount of it, is determined by the application of a formulaic approach which, in effect, compares benefits received by the individual with the income of a person abroad that can be used for providing a benefit (the relevant income of the tax year).
> This is neither a charge on the actual income of the person abroad, nor on the benefits received: rather, it is an amount determined by comparison of both elements over time.

Section 731 may be regarded as a charge on a benefit, or a charge on fictional income, but it is not a charge on the income arising to the person abroad.[274]

There is no foreign tax credit relief. However, income used to pay foreign tax is not relevant income as it cannot be used to benefit a beneficiary.

50.61.2 *Individual treaty-resident outside UK*

This section considers whether DT reliefs are available where:

(1) an individual is UK-law UK resident and treaty-resident in a foreign state
(2) the individual is in principle subject to tax under s.731.

Can the individual claim treaty relief directly?[275]

Most UK treaties restrict this relief by adding: *other than income paid out of trusts or the estates of deceased persons in the course of administration*. That exclusion does not prevent relief for s.731 income. It has an entirely different purpose.[276] Section 731 income is fictional income and not "paid out of trusts" even if relevant income accrues to a trust and the benefit is received from a trust.

Some DTAs restrict this relief to income *beneficially owned* by a resident of a Contracting State.[277] That restriction does not prevent relief

[274] See 109.1 (Third-party DT relief).

[275] See Wattel & Marres, "Characterization of Fictitious Income under OECD-Patterned Tax Treaties", 43 European Taxation 3 (2003), p.66: see 33.20 (DT relief: "Other Income").

[276] See 41.12.2 (Other Income article restricted).

[277] Eg art.22 USA/UK DTA.

for s.731 income for one of two reasons:

(1) As a matter of property law, s.731 income is not "beneficially owned" by the individual or anyone else: it is fictional income which does not exist. But since for tax purposes it is deemed to be the income of the individual, this requirement is deemed to be satisfied.[278]

(2) Section 731 income is "beneficially owned" by the individual because s.731 is a tax by reference to a benefit which is beneficially owned by the individual.[279]

Suppose s.731 income arises where a beneficiary enjoys the benefit of occupying land in the UK. Article 6 OECD Model provides (so far as relevant):

> 1. Income derived by a resident of a Contracting State from immovable property ... situated in the other Contracting State may be taxed in that other State...
> 3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property

It is considered that s.731 income is not "income derived from immovable property" even if the charge is by reference to the occupation of UK land.

[278] This point is the same as for s.624. See 47.18.3 (Settlor treaty-resident outside UK).

[279] See 50.17.1 (Benefit matched on receipt).

CHAPTER FIFTY ONE

TRANSFER OF ASSETS ABROAD: RELIEF FROM OVERLAPPING CHARGES

51.1 Overlapping ToA charges: Relief
 51.1.1 When reliefs are needed
51.2 IT on person abroad's income
 51.2.1 Transferor's IT credit
51.3 CT on person abroad's income
 51.3.1 Corporation Tax Override
 51.3.2 Winners/losers and history
 51.3.3 HMRC counterarguments
 51.3.4 Some indecisive arguments
 51.3.5 CT Override: Conclusion
 51.3.6 Transferor's CT credit
51.4 Person-abroad's credit
51.5 Distribution relief
51.6 Direct company ownership
 51.6.1 Company subject to IT
 51.6.2 Identity of income condition
 51.6.3 Direct company ownership: Conclusion
 51.6.4 Company subject to CT
 51.6.5 Chain of companies
51.7 Distribution to non-transferor
51.8 Identifying relievable income
 51.8.1 Mixed fund of person abroad
 51.8.2 Planning: Distribute if tax free
51.9 Double-counting relief
51.10 Charge on two individuals
51.11 "Taken into account for IT"
 51.11.1 "Charging" IT
51.12 Trust/co structure
 51.12.1 Trust/co structure: HMRC practice
 51.12.2 Trust/co structure: Expenses
51.13 s.731 charge & income distribution
51.14 s.720/s.731 overlap
 51.14.1 T and B arising-basis taxpayers
 51.14.2 T on remittance basis, B on arising basis
 51.14.3 T/B remittance basis users
51.15 Benefits exceed relevant income
51.16 Co-transferors within s.720
51.17 Other s.720 overlaps
 51.17.1 Employment income/s.720 overlap
 51.17.2 s.720/s.730 ICTA overlap
51.18 Life policy/s.720 overlap
51.19 CFC/s.720 overlap
51.20 Taxpayer confidentiality

Cross references

This chapter considers rules which prevent double UK taxation; for the separate issue of DTAs and foreign tax credit relief, see:
 49.30 (DT relief: s.720 income)
 50.61 (DT relief: s.731 income)

51.1 Overlapping ToA charges: Relief

The transfer of asset rules could often give rise to double UK taxation, and there are a number of reliefs to prevent this. Statute does not provide names for the reliefs, so I coin the following terminology:

Name of relief	**ITA**	**Outline of relief**
Transferor's tax credit:	*s.745(1)*	*Credit:*
Transferor's IT credit		- for income tax paid by person abroad
Transferor's CT credit		- for corporation tax paid by person abroad
Person-abroad's credit	*unclear*	Credit for income tax paid by transferor
Distribution relief	s.743(2A/B)	Relief on distribution to transferor
Double-counting relief	s.743(1)	Broad relief against double charges

The courts have a strong inclination, which one might elevate to the status of a rule of construction, that double taxation should be avoided.[1] This underlies and perhaps supplements the statutory reliefs.

51.1.1 *When reliefs are needed*

Protected-trust relief reduced the scope of the s.720 charge, and so reduced the overlapping charges and the need for these reliefs. But there are of course circumstances where s.720 still applies eg, protected-trust relief does not apply to:

- UK source income
- Offshore income gains
- a transferor actually domiciled in the UK
- a company not held in a trust

51.2 IT on person abroad's income

Suppose an offshore company ("OC") receives and retains income subject to income tax.[2] If s.720 ITA did not apply, there would be one charge to tax: income tax borne by OC. However, if s.720 applies, there are possible charges to income tax at two levels:

(1) OC may pay income tax at the basic rate under ordinary principles.
(2) The transferor ("T") may pay IT under s.720 on (effectively) the same income.

What is there to prevent double taxation?

51.2.1 *Transferor's IT credit*

Section 745 ITA provides relief for T:

[1] For examples, see 51.17 (Other s.720 overlaps).

[2] For instance, a non-resident company pays income tax on UK source interest.

s.745(1) ITA *English/NI transferor*	**s.745(1A) ITA** *Scots transferor*	**s.745(1B) ITA** *Welsh transferor*
Income tax at [a] the basic rate, or [b] the starting rate for savings when that rate is more than 0%,	Income tax at a Scottish rate[3] [a] above 0% and [b] below, or equal to, the basic rate	Income tax at the Welsh basic rate[4] when that rate is [a] above 0% and [b] below, or equal to, the basic rate
is not charged under section 720 or 727 in respect of any income	[identical]	[identical]
if (and to the corresponding extent that) the income mentioned in section 721(2) or 728(1)(a) [the income of the person abroad[5]] has borne tax at that rate by deduction or otherwise.[6]	if (and to the corresponding extent that) the income mentioned in section 721(2) or 728(1)(a) has borne tax at the basic rate.	[identical to Scots provision]

I refer to this as "**transferor's IT credit**".

Double-counting relief[7] may also apply, where the transferor's credit covers the same ground, double-counting relief would not be needed.

HMRC Helpsheet HS262[8] explains how the relief is claimed in form SA106 (Foreign pages):

> **Tax paid on the income**
> You may be able to claim a deduction against your liability for tax credits or other tax paid on the income of the person abroad. You can do this if the amounts you enter in boxes 11 and 13 of the 'Foreign'

[3] See 43.5.2 (Scottish rates).

[4] See 43.5.4 (Welsh rates).

[5] See 49.14 (Condition A: Power to enjoy).

[6] See App. 2.3.2 (Bear tax by deduction or otherwise).

[7] See 51.9 (Double-counting relief).

[8] Income and benefits from transfers of assets abroad and income from Non-Resident Trusts (2024) updated 6 April 2024 *https://www.gov.uk/government/publications/income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-hs262-self-assessment-helpsheet/hs262-income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-2024*

> pages include any such taxes. You can only claim relief for tax paid by the person abroad:
> - if it is tax on 'the same' income
> - to the extent that the tax was paid by, and not refunded to, the person abroad
>
> You should include the amount of tax for which you can claim relief:
> - in column C
> - in box 2 of the 'Foreign' pages
>
> You should note Column E of your claim.
>
> You should also send a schedule with the 'Foreign' pages. The schedule should show:
> - the amount of each item of income you included in boxes 11 and 13, and column C
> - tax credit and tax paid on the income you included in boxes 11 and 13, and column C
>
> ...[9]

The helpsheet addresses the issue that the tax paid by the person abroad may not be known:

> You can use an estimate of the amount of credit available if you do not know the final amount of tax paid by the person abroad. If you do this, you must:
> - explain in box 19 of your tax return why you used an estimate
> - amend your tax return when you know the final details
>
> You may be liable for interest on tax paid late if any additional tax becomes payable after you amend your return.

For completeness: s.745(2) ITA provides:

> Subsections (1) and (1A) do not affect the tax charged if section 724(2) applies (benefit provided out of income of person abroad charged in year of receipt).[10]

51.3 CT on person abroad's income

Suppose an offshore company ("OC") receives and retains income subject to corporation tax.[11] If s.720 ITA did not apply, there would be one charge to tax: corporation tax borne by OC. However, if s.720 applies, there are two possible charges to tax:

[9] The passage omitted here concerns FTCR; see 49.30.1 (Foreign tax credit relief).

[10] This is rare; see 49.22.3 (Amount of charge: enjoyment condition C).

[11] For instance, a non-resident company pays corporation tax on UK source rent.

(1) OC may pay corporation tax at CT rates under ordinary principles.
(2) The transferor ("T") may pay IT under s.720 on (effectively) the same income.

What is there to prevent double taxation?

51.3.1 *Corporation Tax Override*

Section 3(1) CTA 2009 provides:

> The provisions of the Income Tax Acts relating to the charge to income tax do not apply to income of a company if—
> (a) the company is UK resident, or
> (b) the company is not UK resident and it is chargeable to corporation tax in respect of the income, or would be so chargeable but for an exemption.

Assume a non-resident company chargeable to corporation tax on its income. Sections 720 (and s.731) ITA are provisions of the Income Tax Acts and relate to the charge of income tax. So they "do not apply" to the income of the company. The plain meaning is, as the sections "do not apply" to that income, an individual cannot be charged by reference to it. In short, the CT charge overrides and excludes the ToA charge. I refer to this view as the **"Corporation Tax Override"**.

The Corporation Tax Override makes sense, because if the company profits are chargeable to corporation tax, HMRC do not need the ToA provisions. Tax saving when a *UK resident* company is used to reduce the tax on the income from individual to corporation tax rates is regarded as unobjectionable;[12] though it must be admitted that the analogy is imperfect, because non-resident companies do enjoy certain advantages over UK companies. For instance, there is a charge on a loan to a participator from a UK resident close company.

The CT Override is consistent with the CFC position where CT under the CFC rules overrides the ToA charge.[13]

51.3.2 *Winners/losers and history*

Section 3 CTA 2009 dates back to the origin of corporation tax[14] so the issue of the Corporation Tax Override has existed since 1965.

[12] See 47.3.3 (Use of co: Tax policy).
[13] See 51.19 (CFC rules/s.720 interaction).
[14] Section 46 FA 1965.

However until 2020 it did not usually matter. The Corporation Tax Override arises where a company is:

(1) subject to corporation tax; and
(2) is a "person abroad" within ToA.

There are 4 types of income which meet these requirements:

Type of income	**See**	**ToA issue**
Trading income of UK PE	21.6	Rarely arises intentionally
UK resident foreign incorporated co,1965-2012	48.5	Rarely arose intentionally
Trading income: deal/develop UK land	22.3	May arise, from 2016
UK property income	24.3.3	Common, from 2020

At first glance the taxpayer benefits substantially from the Corporation Tax Override because CT rates are much lower than IT rates. But while that is true now, it was not the case in 1965 when CT was introduced.[15]

While there may be tax savings under the Corporation Tax Override, it is not all one way. Suppose the company (the person abroad) is subject to CT, and distributes its profits to the transferor. The taxpayer does *better* under the HMRC view than if the Corporation Tax Override view is correct:[16]

(1) On the CT Override view:
    (a) The company pays CT on its income
    (b) The transferor pays IT (at dividend rates) on the distribution
    (c) Section 720 does not apply and the transferor does not qualify for the transferor's CT credit

    There are therefore two charges to tax.

(2) On the HMRC view:
    (a) The company pays CT on its income

[15] *CT rate:* Corporation Tax was introduced by s. 46(1) FA 1965 "at such rate as Parliament may hereafter determine". Subsequently, s.26 FA 1966 set the rate at 40% for the financial years 1964 and 1965.
Surtax rate: s.18 FA 1966 set the rate for 1965-66 to be the same as the previous year's rate, which in turn refers to the rate in the year before that and so on. back to s.16 FA 1951, which specified the top Surtax rate as 10 shillings in the pound (i.e. 50%).
So the difference between CT and IT was originally only a modest 10 percentage points (Subsequently, s.15 FA 1967 retrospectively amended s.18 FA 1966 and increased the rate by 10%, making the highest rate of surtax 55%., so the difference increased to 15 percentage points.)

[16] See 51.6.3 (Direct company ownership: Conclusion).

(b) The transferor pays IT on the company income, but with a credit for the CT paid by the company
(c) The transferor does not pay tax on the distribution because distribution relief applies

There is therefore only one charge to tax.

51.3.3 *HMRC counterarguments*

HMRC do not accept that corporation tax overrides the ToA charge. I here set out HMRC's best points.

HMRC cannot (or should not) say that when CT was extended to rental income of non-resident companies they did not intend, or envisage, that the consequence will be to override ToA. That is no doubt the case; but tax depends on what Parliament says, not on what HMRC intend, and unanticipated consequences happen all the time in tax. Still, unarticulated considerations of this kind may resonate.

In favour of the HMRC view is *R v Dimsey*.[17] This concerned a UK resident foreign incorporated company where:

(1) The company was chargeable to corporation tax
(2) It was also within s.720[18]

HMRC argued that the company was chargeable to corporation tax (in order to uphold the defendant's conviction for failing to declare and pay the CT). The defendant argued, ingeniously but unmeritoriously, that the application of s.720 entailed that the company was not subject to corporation tax. They argued, in short, not for a *CT* Override, but for a *s.720* override: that s.720 income tax charge overrode and excluded the CT charge. This argument failed.

In the course of the judgment Lord Scott (with whom the rest of the court agreed) addressed the double taxation issue (CT and IT on the same income). He cited what is now s.745(1) ITA (transferor's credit)[19] and continued:

> 53. ... It is worth repeating that in 1936 income tax was payable by individuals and by companies. This provision [s.745(1)], too, did not

[17] [2001] UKHL 46.

[18] At the time a foreign incorporated UK resident company counted as person abroad. If the same facts arose today, the company would not be a person abroad, and s.720 would not apply.

[19] See 51.2.1 (Transferor's IT credit).

> distinguish between individual transferees and company transferees. It did not need to.

That is correct. The passage continues:

> 54. In 1965, when companies became liable to corporation tax, the provision [s.745(1)] should, I think, have been amended so as to prevent a transferor being charged tax on deemed [s.720] income where the transferee had paid corporation tax on the actual income...
> 55. The provision... does not cover, expressly at any rate, the case of a company transferee that has paid corporation tax on the income. It seems to me clear (!) that this must be the result of an inadvertent oversight.

The point was not argued, and may seem less clear to the reader. Lord Scott continued:

> If the point ever arose for decision I would be attracted by the view that [s.745(1) ITA] should be construed so as to cover income which had been included in the computation of profits on which a company had paid tax. That construction would, in my opinion, accord with the Parliamentary intention. But it is not necessary to decide the point now...

In short, s.745 ITA (the transferor's IT credit) was extended beyond IT to give the transferor credit for CT paid by the person abroad.[20] The important point here is that HL assumed that the CT charge did not override ToA.

Importantly (the reader may think, unfortunately) the CT Override argument was not put to the Court. It was against the interest of the defendant (the taxpayer) to put the point, as if accepted it would *defeat* their argument (that s.720 overrode the CT charge). It would have been in the interest of the prosecution (HMRC) to argue the point. But HMRC did not do so. It is a matter of speculation whether this was because they did not think of it, or because the outcome would not suit them in other cases.

How does the taxpayer respond? Strictly speaking, a case is not

[20] An argument that a reference to income tax at the basic rate includes corporation tax at the CT rate seems an extremely loose construction. And there are other references to IT in s.743 which must all presumably be read as including corporation tax. But Scott took similar liberties in other tax cases, eg, *O'Rourke v Binks* 65 TC 165.

authority against an argument which was not put. But it is true to say that if the Corporation Tax Override was right, the discussion in *Dimsey* about extending the transferor's tax credit to CT was misconceived, and HMRC's practice since 1999 has been wrong. That would be a bold submission.

HMRC's next point is based on the original definition of person abroad. Section 718 ITA formerly provided:[21]

> *(1) In this Chapter [Chapter 2 Part 13] "person abroad" means a person who is resident or domiciled outside the UK.*
> *(2) For the purposes of this Chapter, the following persons are treated as resident outside the UK—*
> *(a) a UK resident body corporate that is incorporated outside the UK...*

This assumes that a company subject to CT is also within ToA. What is the taxpayer's answer? Strictly speaking, a provision introduced in 1965 is not to be construed by reference to a provision introduced in 2007, and repealed five years later. The Tax Law Rewrite were not infallible. Still, HMRC can say that the Rewrite supported their view.

51.3.4 *Some indecisive arguments*

The Corporation Tax Override was raised in *IRC v Levy.*[22] In this case:
(1) Income arising to a UK company was subject to corporation tax, and
(2) HMRC sought to assess an individual on the income of the company, as settlor, under the settlor-interested trust code.

The taxpayer argued that the CT charge overrode and excluded the IT settlor-interested trust charge. The issue was (more or less) the same.[23] HMRC's response relied on s.9(5) ICTA 1988, which is still in force:

> Where any enactment applies both to income tax and to corporation tax—
> (a) [i] it shall not be affected in its operation by the fact that they are distinct taxes
> [ii] but, so far as is consistent with the Corporation Tax Acts, shall apply in relation to income tax and corporation tax as if they were one tax,

[21] For the current text, see 48.5 ("Person abroad").

[22] 56 TC 68.

[23] See 47.3.2 (Underlying company income).

> [iii] so that, in particular, a matter which in a case involving two individuals is relevant for both of them in relation to income tax shall in a like case involving an individual and a company be relevant for him in relation to that tax and for it in relation to corporation tax;[24]

But it is not obvious how this helps. Section 720 is not "an enactment which applies both to IT and to CT".

In *Levy,* HMRC failed for another reason: there was no settlement-arrangement, and the taxpayer was not a settlor.[25] So it was not necessary to address the CT Override point and the court chose not to do so.[26] The Court in *Levy* must have thought it was an arguable point.

HMRC correctly point out that:

(1) Under the ToA code, the charge to income tax is on an individual and the amount of that charge is computed by reference to the income of a person abroad.

(2) Section 720 does not tax the income of the company, but a different, notional amount.[27]

But this does not help. Section 3 CTA 2009 does not say (in the manner of a DTA) that profits of a company subject to CT are exempt from IT. It says that the provisions of the IT Acts relating to the charge to income tax, including s.720, *do not apply* to income of a company. That is wider. Read in its normal sense, s.3 does disapply s.720; otherwise one *is* applying a provision of the IT Acts to the income of the company.

Does a purposive construction help? EN CTA 2009 identifies the purpose of s.3(1):

> 46. [Clause 3] ensures that income of a company within the charge to corporation tax is not chargeable to income tax as well as corporation tax.

The taxpayer might rely on that because if s.720 applies, the income is

[24] For completeness: s.9(5) continues:

> "(b) for that purpose references in any such enactment to a relief from or charge to income tax, or to a specified provision of the Income Tax Acts shall, in the absence of or subject to any express adaptation, be construed as being or including a reference to any corresponding relief from or charge to corporation tax, or to any corresponding provision of the Corporation Tax Acts"

[25] See 85.6.3 (Bounty: Meaning).

[26] 56 TC 68 at p.87.

[27] See 49.30.2 (Person abroad treaty non-resident).

effectively taxed twice. HMRC may rely on it as the s.720 charge is not on *technically* same income. But this only illustrates the weakness of purposive construction, for one can reach the result one wants by framing the purpose one way or another.[28]

The original form of s.3 CTA provided:

> ... the provisions of the Income Tax Acts relating to the charge of income tax other than surtax shall not apply to income of[29] a company (not arising to it in a fiduciary or representative capacity) if—
>
> (a) the company is resident in the United Kingdom; or
>
> (b) the income is, in the case of a company not so resident, within the chargeable profits of the company as defined for purposes of corporation tax.

The reference to surtax was deleted in 1971, when higher rate tax replaced surtax. I do not expect this sheds any light on the issue of the Corporation Tax Override, though one would to review the surtax system to consider this fully, which would be a labourious exercise.

51.3.5 *CT Override: Conclusion*

The CT Override view is the better technical argument. But in a case where there is much to be said on both sides, I think that success would be a "good win" for the taxpayer. Taxpayers have won more surprising cases, of course, and *Vestey* and *Fisher* come to mind.

In practice, the solution may be to make the companuy UK resident, so it is not a "person abroad".

51.3.6 *Transferor's CT credit*

Although HMRC do not accept that the CT Override view is correct, they do accept that the transferor can claim credit for CT paid by the offshore company. This can be justified under s.745 ITA (the transferor's IT credit) on the basis of Lord Scott's comment that the reference to IT may include CT.[30]

HMRC Helpsheet HS262[31] deals with the mechanics of claiming the CT

[28] See App 9.4 (Difficulty of ascertaining tax policy).

[29] The unidiomatic (or perhaps, erroneous) proposition "of" was changed to "to" in ICTA 1988, but nothing turns on that.

[30] See 51.3.3 (HMRC counterarguments).

[31] Income and benefits from transfers of assets abroad and income from Non-Resident Trusts (2024) updated 6 April 2024

credit. After noting the boxes in form SA106 which need to be filled,[32] the Helpsheet refers specifically to CT:

> If you are claiming a deduction for UK Corporation Tax, you should also enter the following in box 19 ('Any other information') of your tax return:
> - the full details of how you calculated the amount of credit claimed
> - the name, address and, where appropriate, the tax reference number of the person or company which paid the tax

51.4 Person-abroad's credit

R v Dimsey identifies a limitation of transferor's credit:[33]

> Section [745(1)] ... is looking at the double taxation problem from the point of view of the transferor on whom the liability to pay tax on deemed income is being imposed. There is no comparable provision protecting the transferee [the person abroad] in a case where, under [s.720], the transferor has paid tax on his deemed [s.720] income.

In the course of argument in *R v Dimsey*, HMRC announced a practice to address this problem:

> **The Inland Revenue's Practice on section [720]**
> [1] If in any case tax is paid by the transferee, the Inland Revenue will give credit for that tax against any charge to tax on the transferor under section [720 ITA] on the same income;
> [2] and conversely, if in any case tax is paid on any income by the transferor under section [720], the Inland Revenue will not tax the transferee on that income.
> So that in every case, the Treasury received in all the full amount of tax chargeable on the transferor as if he were the only person liable.

Point [1] is the transferor's credit. I refer to point [2] as the "**person-abroad's credit**". The consequence is that *either*:
(1) T pays all the tax on the income (and OC pays none); *or*
(2) (a) OC pays tax (at the basic or dividend ordinary or CT rate); and

https://www.gov.uk/government/publications/income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-hs262-self-assessment-helpsheet/hs262-income-and-benefits-from-transfers-of-assets-abroad-and-income-from-non-resident-trusts-2024

[32] See 51.2.1 (Transferor's IT credit).

[33] [2001] UKHL 46 at [56].

(b) T has the credit for tax paid by OC (so in short, T pays higher/additional rate tax only).

This statement does not say *which* of (1) or (2) is to be the case. As far as HMRC are concerned it does not generally matter because the amount of tax collected will in practice be the same. If T is the beneficial owner of OC, it may likewise not make much economic difference to T whether T or OC pay the tax. But T may have "power to enjoy" the income of OC while only having a remote and not particularly valuable interest in it.[34] One can imagine a situation where T and OC each ask HMRC to assess the other! There is no mechanism for tax paid by T to be recovered from OC or vice versa. HMRC have a broad discretion, subject to judicial review if they act unreasonably. How in practice should HMRC collect tax? It is suggested that HMRC's starting point should be that tax is to be borne by OC, where tax is reasonably collectible from OC, ie if:

(1) tax is deducted at source; or
(2) OC is tax compliant (completing returns and paying tax due).

It is fair that OC, which receives the income, should pay the tax on it. Then T receives the credit for that tax. Only in cases where OC refuses to pay should all the tax be collected from T. This seems consistent with the extract from "Notes on Foreign" set out above.

It is suggested that double-counting relief[35] is the statutory basis for the person-abroad's credit. If that is correct, the person-abroad's credit is law and not a concession.

The person-abroad's credit applies whether the person abroad pays income tax or corporation tax on its income.

51.5 Distribution relief

Section 743 ITA provides:

> (2A) Subsection (2B) applies if—
> (a) in the case of an individual, an amount of income is taken into account in charging income tax under section 720 or 727, and
> (b) the individual subsequently receives that income.
> (2B) The income received is treated as not being the individual's income for income tax purposes.[36]

[34] For instance, if OC owes T a small debt.

[35] See 51.9 Double-counting relief).

[36] A historical note. FA 2013 rewrote distribution relief, which was formerly in s.743(4) ITA. This was part of the project to ensure that s.720 income was distinct from the

I refer to this as "**distribution relief**".

There are three conditions for this relief to apply ("**distribution relief conditions**"):

(1) *s.720 charge:* Income (the income of the person abroad) is taken into account in charging income tax under s.720.
(2) *Transferor receives income:* The transferor receives income.
(3) *Identity of income:* The income which the individual subsequently receives is "that income", ie the same as the income taken into account in charging IT under s.720, ie the same as the income of the person abroad.

Double-counting relief[37] may also apply, but where distribution relief covers the same ground, double-counting relief would not be needed.

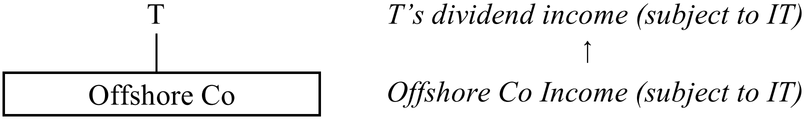
51.6 Direct company ownership

51.6.1 *Company subject to IT*

Suppose:

(1) An offshore company (the person abroad, "OC") within s.720 receives income ("OC's income") subject to income tax
(2) T owns all the shares in OC[38]
(3) The income of OC is distributed by way of dividend to T ("T's dividend income")

I refer to this as **"direct company ownership"**. Diagrammatically:



T
Offshore Co
T's dividend income (subject to IT)
↑
Offshore Co Income (subject to IT)

There are possible charges to tax here at two levels:

(1) IT on OC's income, paid by T under s.720[39]

income of the person abroad, in order to override DT relief, see 49.30.2 (Person abroad treaty non-resident). As far as concerns the double UK tax issues discussed in this chapter, it is considered that the changes have made no difference.

[37] See 51.9 (Double-counting relief).

[38] The position is similar if:
(1) the shares in OC are held in a trust under which T has an interest in possession; and
(2) OC is within s.720 (but in practice protected-trust relief is likely to apply.

[39] Alternatively:
(1) (a) IT on OC's income is paid by OC

(2) IT on the dividend, paid by T on normal principles

Does distribution relief apply? Of the 3 distribution relief conditions:

Condition (1) (income taken into account for s.720) is in principle satisfied.[40]

Condition (2) (receipt of income) is satisfied as the individual receives s.720 income.

That leaves condition (3): identity of income.

51.6.2 *Identity of income condition*

At first sight, distribution relief condition (3) is more doubtful. The income which the individual actually receives is the s.720 income. The income which is taken into account in charging IT under s.720 is the income of the person abroad, OC's income. Are the two the same income?

In order to answer the question, it is necessary to understand that there are two possible analyses of the nature of dividend income:

(1) *Formalistic view*: On this analysis:
  (a) income accruing to a company, and
  (b) the shareholders (dividend) income
  are regarded as distinct, not the same income.
  This is the usual analysis for tax purposes.[41]

(2) *Broad economic view:* On this analysis, a shareholder's (dividend) income is the same as the company income out of which it is paid. They are the same in substance or economic reality.

Thus there is *economic* double taxation but not *juridical* double taxation where:[42]

(1) a company pays tax (typically corporation tax) on its profits, and
(2) a shareholder pays income tax on the dividend.[43]

For the purpose of distribution relief, one applies the broad economic

(b) IT on OC's income is also paid by T
(c) Transferor's credit avoids double taxation.

That makes no difference for the purpose of this example. It is assumed here that T is not a remittance-basis taxpayer.

[40] See 51.11.1 ("Charging" IT).

[41] See 30.2 (Dividends a separate source).

[42] See 107.3 (Types of double taxation).

[43] Of course there have over the years been a variety of arrangements to avoid or mitigate the economic double taxation.

view, not the formalistic view. This would be reasonably clear even in the absence of authority, because (on the formalistic view) it is (more or less) impossible for T to receive the same income as OC.[44] But if authority is needed, see *Aykroyd*, discussed below.

HMRC agree. The INT Manual provides:

> **INTM602440 Subsequent receipt of income** [Jul 2023]
> ... Issues can arise when
> [1] an individual has been taxed under ITA07/S720 or S727 in relation to the income of a non-resident trust or company, and
> [2] the entity concerned makes a subsequent distribution of income to the individual.
> HMRC accept that generally the reference to income in ITA07/S743(4), S743(2A) and S743(2B) can be construed to cover such situations. However, where distributions are paid out of accumulated income, it will be appropriate to consider to what extent the accumulated income has been charged to tax on the individual under the income charge in the preceding years.
> If issues regarding double charging on the subsequent receipt of income arise within specific cases, you should refer the case to Personal Tax International, Liverpool in accordance with the instructions at INTM604440.

51.6.3 *Direct company ownership: Conclusion*

Thus, even though OC's income is distributed to T:

(1) There is only one charge to income tax, the charge under s.720.
(2) T has the benefit of tax credits or DT Relief relating to OC's income.

At first sight this seems anomalous. If s.720 did not apply (eg because the individual owning OC was not the transferor or because the motive defence applied) then the position is different:

(1) If OC's income is UK source, there will be two charges to tax:

[44] The broad economic (as opposed to formalistic) view of income identity is also applied in other contexts. In *Vestey v IRC* Walton J held that a shareholder had no "power to enjoy" the income of the company in which he held shares because (applying the formalistic view of income identity) the shareholders had power to enjoy *different* income! However, this view was rejected in the House of Lords. See 49.16.4 (Condition D: Possible benefit).
Similarly, the court looked at the economic substance in order to determine whether two assets were "the same" for the purposes of stamp duty subsale relief; see *Fitch Lovell v IRC* [1962] 1 WLR 1325. See too 111.5.1 (The same: pragmatic approach).

   (a) income tax on OC’s income paid by OC under ordinary principles; and
   (b) income tax on the dividend paid to T.

(2) If OC’s income is foreign source, T does not have the benefit of foreign tax credit relief relating to OC’s income.

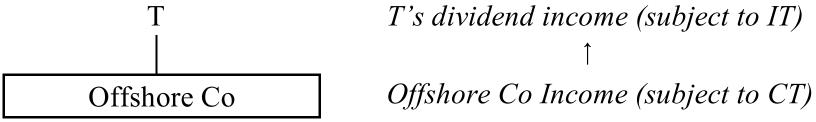
On reflection, this is not an anomaly. The object of s.720 is to put the transferor in the same position as if they had not made the transfer.[45] This view is rightly accepted by HMRC (despite the irritation of the judge in *Anson v HMRC*[46] but the issue may not have been fully explained to him).

51.6.4 *Company subject to CT*

Take the same facts as above, but assume the company is subject to corporation tax and not to IT. That is:

(1) An offshore company (the person abroad, “OC”) within s.720 receives income (“OC’s income”) subject to corporation tax
(2) T owns all the shares in OC
(3) The income of OC is distributed by way of dividend to T (“T’s dividend income”)

Diagrammatically:



T
Offshore Co
T’s dividend income (subject to IT)
↑
Offshore Co Income (subject to CT)

There are possible charges to tax here at 2 levels:

(1) IT on OC’s income, paid by T under s.720[47]
(2) IT on the dividend, paid by T on normal principles

Distribution relief applies, just as when the company is subject to income tax.

51.6.5 *Chain of companies*

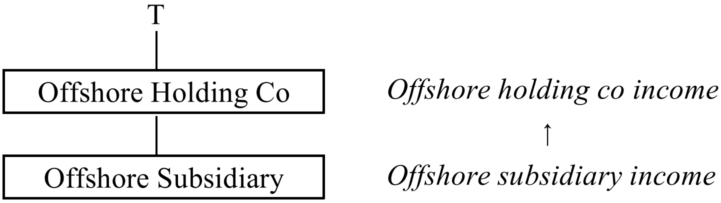
Suppose an offshore holding company (within s.720) which holds an

[45] See 49.2 (Purpose of transferor charge).

[46] [2012] UKUT 59 (TCC). For motive defence aspects of this case, see 52.36 (Motive/EU defence: Disclaimer).

[47] Alternatively:
(1) (a) Corporation tax on OC’s income is paid by OC
   (b) IT on OC’s income is also paid by T
   (c) Transferor’s CT credit avoids double taxation.

offshore subsidiary (within s.720). Diagrammatically:[48]



These are the facts of *Aykroyd v IRC*[49] where:

(1) In 1936/7 the offshore subsidiary received income within s.720 ("the offshore subsidiary income").
(2) In 1937/8 the offshore subsidiary paid that income by way of dividend to the offshore holding company ("the offshore holding co income"). This income was also within s.720.
(3) The transferor ("T") was assessed on the offshore holding co income in 1937/8. T was not assessed on the offshore subsidiary income in 1936/7.

The distribution relief identity issue is (more or less) the same as for direct company ownership.

T argued that:

(1) T could be assessed at stage (1) (which was correct)
(2) So T could not be assessed at stage (2), because of distribution relief.

Aykroyd accepted that distribution relief could apply to the sequence of two dividends:

> If the Appellant had in fact been charged in the year 1936–37, he could not have been charged again in the year 1937–38.

More analytically, the 3 distribution relief conditions are satisfied:

(1) Income is taken into account in charging income tax under s.720. This is the offshore subsidiary income.
(2) The individual receives income. In this case (unlike direct company ownership) the individual does not in fact receive anything. However the individual is deemed to receive s.720 income.
(3) The income which the individual receives (or more accurately, is deemed to receive) is "that income", ie

[48] More accurately, there were several holding and subsidiary companies, but nothing turns on that.

[49] 24 TC 515.

> (a) the offshore subsidiary income; and
> (b) the s.720 income which the individual is deemed to receive
>
> are the same income. They are not the same income on the formalistic view, but they are the same income on the broad economic view, and that is the approach which is applied here.

HMRC agree. The INT Manual provides:

> **INTM602380 Income to be taken into account once** [Jul 2023]
> ... Income that arises to a person abroad may be distributed to another person who is also a person abroad – for example, a group company may make a distribution to its parent company. HMRC generally accept that in such situations the legislation should not be construed to effectively duplicate the amount of income that may be taken into account for the transfer of assets provisions. In such situations it will be appropriate to consider to what extent the distribution and the underlying income from which it is paid are the same income. A similar situation may occur if a non-resident company makes a distribution to a non-resident trust. Again, HMRC will generally accept that legislation should not be construed to effectively duplicate the amount of income to be taken into account for the purposes of the legislation.
> Specific cases of difficulty concerning the amount of income to be taken into account should be referred to Personal Tax International, Liverpool in accordance with the instructions at INTM604440.

Akroyd concerned distribution relief, because at that time double-counting relief did not exist. But double-counting relief would now be another, perhaps easier, route to the same destination.

51.7 Distribution to non-transferor

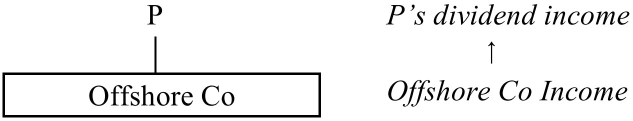
Suppose:

(1) An offshore company ("OC") within s.720 receives income ("OC's income")
(2) The transferor ("T") is not a shareholder in OC but has power to enjoy the income[50]
(3) P (a UK resident third party) owns all the shares[51]
(4) The income of OC is distributed by way of dividend to P

[50] T may have power to enjoy by holding a debenture or through being a beneficiary of the trust which holds OC. Similar points arise if T receives a capital sum.

[51] The position is not materially different if the shares in OC are held in a trust under which P is life tenant, and to which s.624 ITTOIA does not apply.

Diagrammatically:



There are tax charges here at two levels:

(1) OC's income is subject to tax in the hands of T (or T and OC) under s.720.

(2) P is subject to tax on the dividend.

Distribution relief does not apply because that relief only applies where OC's income is subsequently received by the transferor, T. The transferor's credit and the person-abroad's credit do not cover this situation. However, double-counting relief applies.

Before the enactment of double-counting relief in 1981, there was economic double taxation in these circumstances. In *Howard de Walden v IRC*:[52]

> [Counsel] pointed out that in so far as the right to enjoy income of the four companies is vested in the Appellant's son, who holds the majority of the shares,
> [1] income received by the son will be taxed in his hands in the ordinary way and
> [2] at the same time the Appellant will be liable to tax on the whole income of the companies which is deemed to be his.
> This, said [counsel], involves double taxation since no relief is afforded by [distribution relief, now s.743(2B) ITA]. There is a short answer to this argument. There is no double taxation since the subject-matter of tax is different, the income of the son being one thing and the income of the companies being another.

Counsel and judge were both right, but the answer depended on what was meant by double taxation. The situation is one of economic but not juridical double taxation. However, since the purpose of distribution relief is to avoid economic double taxation, fairness and the scheme of the Act suggest that double-counting relief should do the same work in this situation. It is considered that Lord Greene's comment does not support the contrary view.[53]

[52] 25 TC 121 at p.131.

[53] *Howard de Walden* is of limited authority; see 48.2 (Construction of ToA provisions). And if it were right that there were "no double taxation" it is difficult to see the

In practice this situation is rare. Normally, either T has no "power to enjoy" and so is outside s.720, or else T is life tenant/shareholder, and receives the dividends personally, so distribution relief applies.

51.8 Identifying relievable income

In the following discussion, "relievable income" means income which qualifies for distribution relief, in short, income within s.720. Distribution relief applies only so far as the transferor receives the income of the company has been taken into account in charging IT under s.720.

Distribution relief does not apply where a dividend is paid out of pre-2008 income which qualified for the s.720 remittance basis, as that income was not taken into account in charging income tax.

It may happen that:

(1) the income of OC for company law purposes is greater than:
(2) the income of OC for tax purposes
(eg because of capital allowances).

For example, OC may have taxable income of 10, but accounting profits of 100. Only 10 is relievable income. If OC declares a dividend of 100, then the charges to tax are:

(1) IT on OC's income of 10 on T under s.720.
(2) IT on the dividend on the amount of 90 (ie 100–10).

51.8.1 *Mixed fund of person abroad*

OC may have a mixed fund of:

(1) income charged under s.720 (relievable income) and
(2) funds not charged under s.720.

It is considered that the company can by an appropriate resolution determine whether a distribution is from relievable income or not.[54]

Suppose OC receives £100 and spends £20 on expenses, but, the company having other assets available for distribution, £100 is nevertheless distributed. It is suggested that the dividend of £100 should be identified with OC's income of £100 and so qualifies for distribution relief in its entirety. The £20 spent on expenses is attributed to other assets, even though as a matter of tracing it was paid for out of the s.720 income.

rationale for the statutory distribution relief.

[54] See App 2.10 (Withdrawal from mixed fund).

If an offshore company pays a dividend out of a mixed fund which qualifies for distribution relief, it counts as an offshore transfer for the purposes of the remittance basis mixed fund rules.

51.8.2 *Planning: Distribute if tax free*

Where distribution relief is available, it is generally worthwhile distributing income to the transferor ("T").[55] This may (in particular) apply where:

(1) The person abroad has UK income (which is not protected income); or
(2) The person abroad has foreign income within s720, eg if T is actually UK domiciled, so neither s.720 protected-trust relief nor the remittance basis apply.

Following the distribution, T (if not UK domiciled) may in principle re-settle the income, if desired.

If the income of the person abroad is not distributed to T during T's life, the benefit of distribution relief is lost, as distribution relief will not apply later.

51.9 Double-counting relief

Section 743(1) ITA provides:

> No amount of income may be taken into account more than once in charging income tax under this Chapter [Chapter 2 Part 13].

I refer to this as "**double-counting relief**". It was introduced in 1981; pre-1981 cases need to be reviewed with this in mind, as they would not have considered this relief.

This applies where two tax charges both come under the ToA rules:

(1) Two individuals may be chargeable under s.731; ie where two different individuals receive benefits. The s.733 computation usually prevents a double charge[56] but if it fails to do so, then double-counting relief fills the gap.
(2) The transferor may be charged under s.720 and a non-transferor charged under s.731.[57]

[55] This may also be done to avoid relevant income accumulating in a company held by a trust; see 50.35 (Income of co held by trust).

[56] See 50.18.5 (Step 5: Available Relevant Income).

[57] Before 2017, it was unusual that income could be taken into account under s.720 and s.731. Examples might be:

(3) Where two individuals are charged under s.720; ie there are two transferors in relation to the same income of the person abroad. This could happen if:
   (a) There are two transferors in relation to the same transfer, eg co-shareholder transferors
   (b) Income arises to an individual as a result of two transfers by two individuals, eg if:
      (i) T1 transfers money to a person abroad, and
      (ii) T2 sells an asset to the person abroad (the purchase price being paid out of the money which T1 transferred).

It is considered that double-counting relief also applies where one charge is under the ToA rules and another charge is under other rules. I refer to this as the **"Wide View"** of double-counting relief. Examples are:

(4) Two individuals may be charged, one under general principles and the other under s.720 or s.731.

(5) One individual may be charged twice, once under s.720 and again under general principles.

51.10 Charge on two individuals

In many cases the double tax charge concerns two different individuals. Section 743(2) ITA provides:

> [A] If there is a choice about the persons in relation to whom any amount of income may be taken into account in charging income tax under this Chapter [Chapter 2 Part 13],
> [B] it is to be taken into account—
> (a) in relation to such one or more of them as appears to an officer of Revenue and Customs to be just and reasonable, and
> (b) if more than one, in such respective proportions as appears to the officer to be just and reasonable.

In *HMRC v Fisher*:[58]

(1) If income accrues which is not within s.720 because it is not remitted to the UK, then there is a charge under s.731, and then there is a remittance.
(2) If s.720 does not apply (because the transferor has no "power to enjoy") but subsequently there is a capital payment within s.727.
(3) Another possible case is in 50.24 (s.720 income: Relevant income).
After 2017 there are more circumstances where this could happen.

[58] [2023] UKSC 44 at [54].

> [Section 743] achieves three important things. It prevents the sum to which the tax charge is applied under [s.720 and 731] adding up to more than the total of the income of the overseas person. In fact, as is shown by this case, HMRC do not have to apply the tax charge to all the income of the overseas person. In the Fishers' case, only 76% of the profits of [the person abroad] were subject to the charge because they disregard the shares held by the non-resident, Dianne Fisher. Secondly, it confers on HMRC a discretion to apportion the tax charge in such a manner as appears to HMRC to be just and reasonable. Thirdly, it provides for an appeal against that apportionment.

For the appeal procedure, see 52.35 (Appeals).

51.11 "Taken into account for IT"

Distribution relief applies to income *taken into account in charging IT under s.720/727*; and double-counting relief applies to income *taken into account in charging IT under Chapter 2 Part 13 (ToA).* Section 744 ITA defines the expression(s):

> (1) References in section 743 (no duplication of charges) to an amount of income taken into account in charging income tax are to be read as follows.

It is convenient to read the three definitions side by side:

s.720 charge: s.744(2)	**s.727 charge: s.744(3)**	**s.731 charge: s.744(4)**
In the case of tax charged on income under section 720 (charge where income enjoyed as a result of relevant transactions)—	In the case of tax charged on income under section 727 (charge where capital sums received as a result of relevant transactions),	In the case of tax charged under section 731 (charge to tax on income treated as arising to non-transferors[59] where benefit received as a result of relevant transfers[60]),
(a) if section 724(1) (benefit provided out of income of person abroad) applies, they are references to an amount	they are references to the amount of the income mentioned in section 728(1)(a) [the income of the person abroad].	they are references to the amount of relevant income taken into account under section 733 (income charged

[59] The reference to non-transferors is inaccurate after 2017, but it does not matter.

[60] The words in brackets are not an accurate description of the s.731 benefits charge, following the extension of s.731 to transferors in 2017; but it does not matter.

of the income out of which the benefit is provided equal to the amount charged,[61] and (b) otherwise they are references to the amount of the income mentioned in section 721(2) [the income of the person abroad[62]].	under section 731) in calculating the amount to be charged in respect of the benefit for the tax year in question.

51.11.1 *"Charging" IT*

Distribution relief condition (1) requires that the income of the person abroad must be "taken into account in charging IT under section 720". In *Aykroyd*[63] T failed because T had not been "charged":

> It was suggested that, if the [offshore subsidiary's income] were liable to assessment for the year 1936–37, that provision [s.743(2B)] prevented them being chargeable in the following year. But that argument depended on the substitution of the word "chargeable" for the word "charged". There is no ground that I can see for making any such substitution. ... as he had not been charged in the previous year, there was nothing to prevent him being charged in the year in question.

"Charged" here means "paid". This is not the normal meaning, but it fits the context.

This does not mean that HMRC have an unfettered discretion:

(1) to assess T on the subsidiary company's income; or
(2) to assess T on the holding company's income.

Under self-assessment, T will normally self-assess T's income and should in principle return the income of the offshore subsidiary as T's income and distribution relief applies. However, where T does not pay tax due on the offshore subsidiary's income HMRC can collect tax on the offshore holding company's income and distribution relief does not apply.

Often it may not matter whether tax is charged on the offshore subsidiary's income or the offshore holding company's income.

[61] This is rare; see 49.22.3 (Amount of charge: enjoyment condition C).

[62] See 49.14 (Condition A: Power to enjoy).

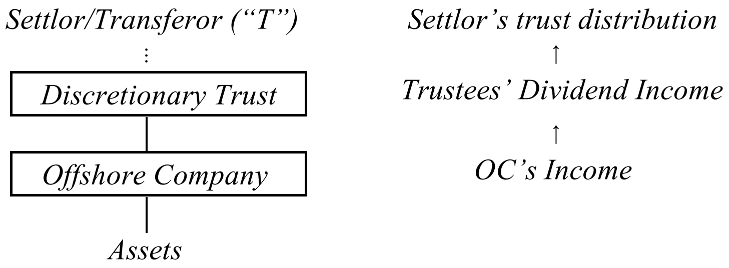
[63] See 51.6.2 (Identity of income condition).

However, it may matter:

(1) For identifying the source of the income to which s.720 applies. Is the transferor taxed under s.720 in respect of the subsidiary's income or the holding company's income? This may affect:
    (a) Rates of tax, eg if the underlying company receives interest or rental income it may makes the difference between the higher/additional rates and the dividend upper/additional rates)
    (b) Availability of transferor's credit for UK tax paid by the company and double tax relief
    (c) Source of income
(2) It may also affect the year in which the income is subject to tax.

51.12 Trust/co structure

So far we have been considering the situation of an offshore company (or chain of companies) held directly by an individual (or an IIP trust). We now turn to consider the common position, where a non-resident settlor-interested discretionary trust holds an offshore company. That is, trustees of a discretionary trust within s.624 ITTOIA hold a non-resident company within s.720. Diagrammatically:



I refer to this as a **"trust/co structure"**.

Suppose:

(1) OC receives income ("OC's income")
(2) The trustees receive a dividend from OC ("the trustees' dividend income")
(3) The settlor receives an income distribution from the trustees (settlor's trust distribution)

Possible charges to tax here are at 3 levels:[64]

[64] If protected-trust relief does not apply there is only one charge, but assume it does not; see 51.1.1 (When reliefs are needed).

(1) OC's income, charged under s.720
(2) The trustees' dividend income charged under:
  (a) s.624 or
  (b) s.720, if s.624 does not apply, but that would be very rare
(3) The settlor's trust distribution, charged under basic principles

Distribution relief prevents double taxation at stage (2) (if necessary, but that would be rare). It will be recalled that distribution relief applies if:[65]
(1) OC's income is within s.720
(2) The trustees' dividend income is received by T
(3) The trustees' dividend income is the same income as OC's income

Condition (1) is satisfied. Condition (2) is satisfied because income is treated as received by T. Condition (3) is also satisfied: see 51.6.2 ("The same" income).

If s.624 applies at stage (2)(a), there is relief from the further round of tax at stage (3).[66] Or if, exceptionally, s.624 does not apply but s.720 does, at stage (2)(b) then distribution relief applies again.

51.12.1 *Trust/co structure: HMRC practice*

RI 201 provides:

> where income arises in an offshore company underlying a settlement and the income is not paid up immediately to that settlement the provisions of section [720 ITA] will be invoked[67] where necessary to assess the income of the underlying company.

Under this practice, the position depends on whether income is paid up "immediately".

(1) *If the income is **not** paid up immediately*: The provisions of s.720 will be invoked. This is relatively straightforward.
(2) *If the income **is** paid up immediately*: RI 201 implies that:
  (a) s.720 will not be applied so the settlor/transferor will not be taxed on OC's income; and

[65] See 51.5 (Distribution relief).

[66] See 47.10 (s.624 double-charge relief). If, exceptionally, s.720 applies at stage (2)(b) then distribution relief again prevents double taxation at stage (3). The trust income is received by T, and it is, for the purposes of distribution relief, the same income as OC's income.

[67] The reference to "invoking" s.720 draws on *McGuckian,* decided 1997, two years before the publication of RI 201 in 1999; see 51.17.2 (s.720/s.730 ICTA overlap).

(b) the settlor will be taxed on the trust income (generally, under s.624) instead.

If so, an number of questions arise. When exactly is the moment when one moves from (1) to (2): what is the meaning of "immediately"? Does it mean within a day? Or a week? Or the same tax year? Or any time before the relevant returns are due, or submitted? Do HMRC have a discretion? Does the answer depend on the type of income? One must bear in mind that some forms of income cannot be quantified until the end of an accounting period (eg trading and rental income).

If income is distributed immediately, is the settlor taxed on OC's income or on the dividend? By implication if s.720 is not "invoked" then the tax should be charged on the dividend. It makes a difference because OC's income may have a tax credit and the rates of tax may be different.

Perhaps HMRC are not concerned what the answers are, as long as they can see that the income comes into tax, promptly, in one form or another.

51.12.2 *Trust/co structure: Expenses*

Suppose in the trust/company structure illustrated above, the company:
(1) receives £100 income;
(2) spends £20 on expenses (not deductible for s.720 purposes); and
(3) distributes £80 which the trustees distribute to the settlor.

RI 201 suggests states HMRC assess £20 at stage (1) under s.720 and £80 at stage (3). One might otherwise have thought that £100 is taxable at stage (1) and the £80 is tax free at stages (2) and (3). But it makes little difference in practice.

51.13 s.731 charge & income distribution

I turn to consider double UK taxation issues relating to s.731. The transferor's credit, the person-abroad's credit and distribution relief only apply to s.720, so they have no relevance here. But double-counting relief may apply.

Suppose:
(1) Trustees of a trust receive income and do not distribute it (so it is relevant income).
(2) A beneficiary receives a benefit taxable under s.731.
(3) The trustees later distribute the relevant income to the beneficiary as income.

It is understood that the distributed income is not taxed. This might be regarded as informal concession but the better view is that double-counting relief applies here. That follows from the Wide View of the relief.[68] The untaxed distribution of income will however be a benefit received by the beneficiary, available to be matched with future relevant income.

51.14 s.720/s.731 overlap

Suppose:

(1) A transferor ("T") is taxed on income of a person abroad under s.720
(2) A beneficiary ("B") within s.731 receives a benefit.

The starting point is that the income of the person abroad (although within s.720) is also relevant income;[69] but double-counting relief applies.

There are four permutations:

(1) T and B are both arising-basis taxpayers
(2) T is a remittance-basis taxpayer and B is an arising-basis taxpayer
(3) T is an arising-basis taxpayer and B is a remittance-basis taxpayer
(4) T and B are both remittance-basis taxpayers

51.14.1 *T and B arising-basis taxpayers*

EN ITA provides:

> Where a non-UK domiciled individual transfers assets but is not chargeable to tax under section 739 ICTA [now s.720 ITA] owing to section 743(3) ICTA [the s.720 remittance basis, now replaced by the somewhat different s.735 ITA], there is no bar in HMRC's view on the application of section 740 ICTA [now s.731] to others who did not themselves make the transfer but were beneficiaries of it. HMRC interpret section 732 ITA in the same way.[70]

It appears from this that where the s.720 remittance basis does not apply (so the transferor is taxed under s.720 on an arising basis) there is a bar on taxing the beneficiaries under s.731. The reason is not given, but could have been:

(1) The income of the person abroad was not relevant income; (but this was doubtful and is not the case from 2013)
(2) Double-counting relief

[68] See 51.9 (Double-counting relief).
[69] See 50.24 (s.720 income: Relevant income).
[70] See Change 105 in EN ITA Vol III, annex 1. The same point was made in RI 201.

For completeness: In the INT Manual the rule to charge the transferor in priority to the beneficiary is said to be the normal rule but not an absolute one:

> **INTM602480 Just and reasonable basis** [Jul 2023]
> Where there is a choice of individuals in relation to whom any amount of income of a person abroad may be taken into account in arriving at the amount of an income charge or benefits charge, it can sometimes be difficult to determine the amount of income taxable on each individual. To alleviate such difficulties, the legislation provides for the income to be apportioned on a 'just and reasonable' basis.

This is a sloppy summary of the issue, but what matters is the text which follows:

> How this is done will depend on the circumstances. For example,
> [1] individual A [the transferor] may be chargeable on the whole of the income of an overseas company under the income charge.
> [2] Individual B may receive a benefit from the same company that falls to be charged under the benefits charge.
> In this situation the income of the company should only be taken into account once (INTM602380).
> This aspect of the legislation was considered in the case of Fisher & Others v HMRC ([2021] EWCA Civ 1438) wherein apportionment of a transfer of assets charge due to the existence of multiple transferors featured. The Court of Appeal held that two individuals were quasi-transferors to whom the transfer of assets provisions applied. At paragraph [69] of the judgment, Newey LJ commented:
>
> > 'Machinery now exists, therefore, under which no more than a proportion of income need be attributed to either a transferor or a quasi-transferor. The [Upper Tribunal] noted that [the apportionment provision] could apply where the same income could be the subject of charges under both [the income charge] and [the benefits charge], but, whether or not the proponents of what has become [the apportionment provision] had that sort of overlap in mind, it is reasonable to assume that the provision was (also) intended to address the position of multiple transferors (and quasi-transferors)'
>
> It will normally be just and reasonable to include the whole of the income arising as an income charge, as the individual who has sought to avoid tax in setting up the structure in the first place will be charged to income tax and will therefore suffer no inequity in bearing the full brunt of the legislation. In this example, individual B may not have a benefit charge for the particular tax year, although the benefit may be subject to a charge in a subsequent year (INTM601720).

> However, there may be exceptional circumstances where the benefit charge is seen as being just and reasonable, for example where the income charge arises due to an individual receiving a loan from the person abroad which is repaid after a very short period so that there is no continuing liability on that individual.[71]
> ... Each case must be dealt with on its merits and the 'just and reasonable' basis is that which appears to be so to an officer of HM Revenue and Customs. Appeals against such decisions are the jurisdiction of the Tribunal ...

In practice there will be few if any cases where the beneficiary is taxed instead of the transferor.

51.14.2 *T on remittance basis, B on arising basis*

The EN ITA passage cited above shows that HMRC have historically regarded B as taxable. Before the 2008 reforms T was wholly exempt on income not received in the UK, so that was sensible and probably correct. Since 2008 the position has changed, as T is now taxable on the income on a remittance basis. It is probably just and reasonable to tax B on an arising basis, in accordance with standard practice.

From 2017 this will not usually arise, as s.720 protected-trust relief will usually prevent a s.720 charge.

51.14.3 *T/B remittance basis users*

There is no guidance on the position where T is taxed on the s.720 remittance basis and B is taxed on the s.731 remittance basis. It is suggested that it is just and reasonable to tax whoever is first taxable, ie to tax T if the income is remitted but to tax B if the benefit is remitted without a remittance of the income. The contrary is arguable.

From 2017 this will not usually arise, as s.720 protected-trust relief will usually prevent a s.720 charge.

51.15 Benefits exceed relevant income

The INT Manual provides:

> **INTM602480 Transfer of assets: General provisions: Just and reasonable basis** [Jul 2023]
> ...
> Where more than one individual is subject to the benefits charge in

[71] Author's footnote: This does seem factually unlikely.

> respect of benefits which they receive in the same year, it will be necessary to apportion the relevant income (INTM601700) among the individuals. Only by considering the facts of the particular case will it be possible to decide fairly the amount of income to be treated as arising to each individual and subject to the benefits charge.
>
> In cases where the total benefits are fully covered by the relevant income, each individual will be potentially subject to charge on the amount or value of the benefits received.
>
> Where the relevant income is less than the total amount or value of the benefits, the most appropriate apportionment of the relevant income is by reference to the ratio of the benefits received by each individual in the year, to the total of the benefits provided in the year.
>
> If more than one individual subject to the benefits charge receive benefits in different tax years, but relevant income arises only in later years, it will be necessary to apportion the relevant income between the individuals. It will only be by considering the facts that a reasonable apportionment can be achieved in such a situation. Where there is sufficient relevant income arising in the later year to cover all of the benefits arising in the years concerned, a benefits charge will arise on each of the individuals. If the relevant income in the later year is less than the total benefit overall arising in that year, in earlier years the most appropriate apportionment of the relevant income will be by reference to the ratio of the benefits each individual has received to the total benefits.
>
> When considering benefits provided to beneficiaries in different years, you should not lose sight of the fact that benefits arising in earlier years may have been subject to capital gains tax under TCGA92/S87 (see INTM601520) and as such will need to be deducted from total untaxed benefits in line with the steps set out in ITA07/S733(1).

The Manual struggles to give an example where that is not the right solution:

> However, in a case where it was clearly intended that A's benefit be provided out of the relevant income of the year, and B's benefit out of that of a subsequent year, e.g.,
>
> [1] A's benefit was paid three quarters through the year and represented the whole income of the year,[72] while
>
> [2] B's benefit was paid nearly at the end of the year to deal with some unexpected contingency)
>
> then A might justifiably be taxed on the whole of the benefit in the year

[72] If "A's benefit represented the whole income of the year", it may well constitute income of A, in which case it is taxable under ordinary principles and not under s.731.

of receipt, and B taxed in the subsequent year.

In practice that will rarely if ever arise.

51.16 Co-transferors within s.720

The INT Manual provides:

> **INTM602480 General provisions: Just and reasonable basis** [Jul 2023]
> ...
> When looking at the just and reasonable basis for apportionment, where there is more than one individual with power to enjoy the income of the person abroad, account should be taken as to who actually made, procured or was associated with the transfer, as these parameters may affect the quantum and the nature of the charge. In addition, it is necessary to have regard to the intended outcome of the arrangements and to the assets transferred which have resulted in income becoming payable to a person abroad.
> For example, if
> [1] individual X subscribes for shares in a Jersey company for £1000 and
> [2] individual Y enters into a service agreement with that company,
> then each individual may be subject to the income charge.[73] However, it may well be that the asset of real value is the service agreement and that should be reflected in any apportionment of the income between the individuals.

I would have said that:

(1) The £1k was nominal and no income arose as a result of that transfer.

(2) The service agreement is (one can assume) substantial and all the income of the person abroad arose from that transfer and is assessable on Y.[74]

There is no double charge, and double-counting relief is not needed. The more interesting question is if X's subscription is not nominal, but the Manual does not address that.

The Manual continues:

> Where the same assets are transferred by several individuals acting together in concert, the transferors would normally be assessed in

[73] Author's footnote: It is assumed X and Y have power to enjoy.

[74] See 48.10 (Income of person abroad: Causation).

> proportion to their share of the assets transferred.
>
> For example, where shares of a UK company are held by three individuals in the proportions 40%, 40% and 20% and there is liability under ITA07/S720 in respect of the income of an overseas person to which the shares are transferred, the liability is assessed on each of the three shareholders in proportion to their respective holdings. This example demonstrates both the requirement to avoid duplication of charge (INTM602380) and the 'just and reasonable' basis.

This example is not a case where "the same assets are transferred by several individuals". Again, double-counting relief is not needed as there no overlap here: each transferor is only charged on income arising as a result their own transfer. The end result is the same.

51.17 Other s.720 overlaps

51.17.1 *Employment income/s.720 overlap*

In *Hoey v HMRC* a misguided taxpayer ("T") entered into an EBT scheme, under which, in short:

(1) T worked as an IT contractor for UK entities ("end users").

(2) The end users paid fees to an offshore company that employed T ("the employer").

(3) The employer paid most of these fees to an employee benefit trust ("EBT") for the benefit of T.

(4) The trustees of the EBT made interest free loans to T. It was not of course expected that the loans would be repaid.[75]

HMRC argued for two heads of charge:

(1) Employment income: the contributions paid by the employer to the EBT constituted employment income of T (this was correct).

(2) s.720: T was taxed on the income of the employer under s.720, on the grounds that:

   (a) T was the transferor (which he was) and had power to enjoy (which he did); and

   (b) The income of the employer was equal to the end user's payments.

HMRC's s.720 argument failed at step (2)(b) as the employer's income was (1) payments received from end users less (2) payments made to the

[75] In more detail: there were two employers and EBTs, but nothing turns on that. The PAYE aspects of *Hoey* (not discussed here) are going on to the Supreme Court.

EBT. That is, the payments to the EBT were deductible trading expenses, so the quantum of trading income was nil. But ignoring that, if one can, there would have been (1) tax on T's employment income and (2) tax on the employer's income (the end user's payments).

The CoA said that this argument:[76]

> lead to the conclusion that the employee may be chargeable under the TOAA provisions in respect of income of the employer which he has power to enjoy, for example by receipt of a salary, even though the salary will also be chargeable to income tax in his hands as employment income. We were not referred to any provisions which would be effective to prevent economic double taxation of the employee in circumstances...

The solution to this problem is that double-counting relief does apply, adopting the Wide View. This is much more satisfactory than the suggestion of the CoA that entering into a contract of employment is not a transfer of assets.[77] But however that may be, the Court was not prepared to contemplate double taxation:

> it was part of HMRC's case before the UT that any charge to tax on Mr Hoey under the TOAA legislation would take priority over any liability to tax under the employment income provisions of ITEPA. The UT accepted this submission, and held that the FTT had erred in holding that it was not obliged to go on to consider the alternative assessments to tax under the TOAA provisions once it had held that Mr Hoey was liable under the income tax provisions. It was not at all clear to us on what basis HMRC contended that the TOAA charge to tax would take priority, and it would in our view be an extraordinary position to reach if it were indeed the case that the highly complex and potentially penal provisions of the TOAA code had logically to be considered first in any case involving employment income where they might potentially be engaged. Furthermore, such an approach would in all probability raise the unwelcome spectre of economic double taxation, potentially giving rise to concurrent liabilities arising out of the same transactions.
> ... we respectfully suggest that it would generally be in accordance with the intentions of Parliament that the TOAA provisions should be kept in reserve for deployment in cases of tax avoidance which cannot effectively be countered in any other way. If, as in the present case, the

[76] [2022] EWCA Civ 656 at [201].

[77] See 48.1.1 (Contract of employment).

> transactions in question give rise to a straightforward liability to tax on employment income, that should normally be the end of the matter. It is fortunately unnecessary for us to say any more on the subject, however, because HMRC wisely conceded, at the beginning of the fourth day of the hearing, that the TOAA provisions do not have priority over the charge to tax on employment income under ITEPA, although they do have a role to play as a fallback head of charge. [Counsel] also explicitly undertook on behalf of HMRC that they would seek not to impose a double charge to tax, in the event that both sets of provisions applied. She informed us that the precise mechanism to avoid the possibility of a double charge in such circumstances was a question of some complexity, which required the input of numerous stakeholders, but as we understood it the undertaking which she offered on behalf of her clients was in substance unqualified. The only question was precisely how it should be given effect.
> ... we welcome this clarification and commend the willingness of HMRC to take appropriate steps to avoid the possibility of economic double taxation in cases of the present type...

51.17.2 *s.720/s.730 ICTA overlap*

In *McGuckian v IRC* concerned an overlap between (1) s.720 and (2) s.470 ICTA 1970, an anti-avoidance provision now replaced by the transfer of income stream code.[78] There should not have been an overlap for two reasons, either of which would have been sufficient: (1) it was held that s.470 did not in fact apply; and (2) had it applied, it had priority by statute. But Lord Steyn considered the position in general:[79]

> The sensible construction is that [s.720] can be applied even if there are other provisions which could be invoked to prevent the avoidance of tax. That the revenue authorities should have overlapping taxation powers is an unremarkable consequence. And such a construction cannot cause any unfairness to the taxpayer since he cannot be taxed twice in respect of the same income.

51.18 Life policy/s.720 overlap

In *IRC v Willoughby* 70 TC 57 Professor Willoughby ("T") transferred assets to a non-resident life insurance company as a premium for a life policy, a personal portfolio bond. T was not taxed on the income accruing

[78] See 54.1 (Transfer of income streams).
[79] 69 TC 1 at p.82.

to the insurance company as the motive defense applied. Had the defense failed, there would in principle have been charges to tax at two levels:

(1) T would pay income tax on income arising to the life insurance company under s.720 (to the extent that it arose as a result of T's premium); and
(2) T would pay income tax on the gain arising from the policy under the chargeable event provisions.

HMRC argued that relief was available under two provisions: s.547(2) ICTA and distribution relief.

The Special Commissioner rightly rejected the argument that distribution relief applied:

> ... [s.743(2B) ITA] only relieves from tax income which is subsequently received by an individual whose income it has been deemed to be in earlier years under [s.720 ITA].[80]

The s.720 income is not the same as the chargeable event income.

Section 547(2) ICTA then provided:

> Nothing in subsection (1) above [deeming chargeable-event gains to be taxable income] shall apply to any amount which is chargeable to tax apart from that subsection.

The Commissioner rightly dismissed the argument that this conferred relief:

> So far as double taxation is concerned, in my view s.547(2) [ICTA does] not provide relief. [It] gives relief if the amount of the gain arising in connection with a policy on the happening of a chargeable event, which is deemed to form part of the individual's total income for the year in which the event happens, is chargeable to tax apart from subs (1) of s 547. This does not provide relief for the taxation of income under [s.720] in the years before the chargeable event occurs.

That is not the end of the story, as the Tax Law Rewrite expanded the scope of the relief. Section 527 ITTOIA now provides:

> (1) This section applies if the whole or part of any receipt or other credit item is taken into account in calculating both—
> (a) the amount of a gain treated as arising under this Chapter, and
> (b) an amount on which income tax is charged otherwise than under

[80] *IRC v Willoughby* 70 TC 57 at p.84.

> this Chapter or on which corporation tax is charged.
> (2) The amount of the gain on which tax is charged under this Chapter is reduced by so much of the amount of that receipt or other credit item as is taken into account in both those calculations.

It appears from EN ITTOIA change 95 that this change was intended to benefit traders in policies[81] but it could arguably apply here. There is also a hint in *Willoughby* at p.84 that relief may be available by concession, but that would not bind HMRC. In practice, fortunately, it will be rare for the ToA rules apply to income arising as a result of policy premiums or other payments to life companies.[82]

51.19 CFC/s.720 overlap

Section 725 ITA provides:

> (1) This section applies if—
> (a) under Part 9A of TIOPA 2010 (controlled foreign companies), the CFC charge is charged in relation to a CFC's accounting period,
> (b) an amount of income is treated as arising to an individual under section 721 for a tax year, and

[81] "**Change 95: Gains from contracts for life insurance etc: reductions for sums chargeable to tax apart from section 547(1) of ICTA: section 527**
This clarifies the meaning of the exception from the charge to tax under section 547(1) of ICTA given by section 547(2) of ICTA for any amount chargeable to tax apart from section 547(1) of ICTA.
Section 547 of ICTA deals with the method of charging chargeable event gains to tax. This differs according to the person who is interested in the policy. For example, under section 547(1) of ICTA where the rights in a policy or contract are held by an individual as beneficial owner the gain forms part of the individual's total income. However, section 547(2) of ICTA states "Nothing in subsection (1) shall apply to any amount which is chargeable to tax apart from that subsection.".
In practice, the words "amount which is chargeable to tax" in section 547(2) of ICTA are taken to mean the amount of the receipts and credits taken into account for the purposes of ascertaining the overall taxable profit under another provision, rather than the actual amount that is charged to tax under another provision, which in the case of a trader, for instance, will be the net profits of the trade.
Section 527 which rewrites section 547(2) of ICTA makes it clear that the amount chargeable to tax under Chapter 9 of Part 4 of this Act is reduced by the amount of the receipt or other credit item that is taken into account in calculating the amount on which income tax is charged otherwise than under Chapter 9 of Part 4 or the amount on which corporation tax is charged."

[82] See 70.10.5 (Income of life company).

(c) the income mentioned in section 721(2) is or includes a sum forming part of the CFC's chargeable profits for that accounting period.

(2) The amount of income so treated is reduced by—

S × (CA÷CP)

where—

S is the sum forming part of the CFC's chargeable profits for that accounting period,

CA is the CFC's chargeable profits for that accounting period so far as apportioned to chargeable companies at step 3 in section 371BC(1) of TIOPA 2010, and

CP is the CFC's chargeable profits for that accounting period.

(2A) In a case in which section 724 applies, the reference to S in the formula in subsection (2) is to be read as a reference to X% of S.

(2B) "X%" is determined as follows—

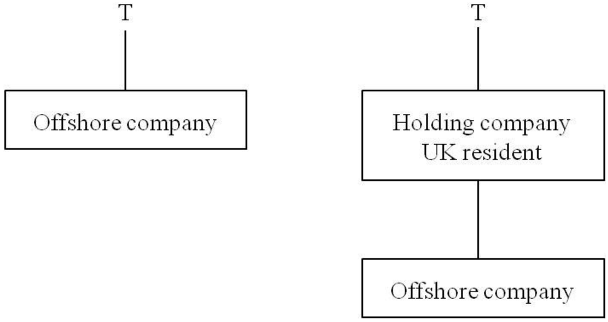
100% × (A / I)

where—

A is the amount on which the individual is liable as determined under section 724(2), and

I is the amount of the income mentioned in section 721(2).

(3) Terms used in this section which are defined in Part 9A of TIOPA 2010 have the same meaning as in that Part.



In case 1, T is subject to income tax on the income of the offshore company under s.720.

In case 2, Holdco is subject to corporation tax on the income of the offshore subsidiary and T is not subject to income tax.

51.20 Taxpayer confidentiality

Use of the reliefs for overlapping charges require that the transferor/ person abroad knows details of tax paid by some other person. Section 18 CRCA 2005 authorises HMRC to disclose this information:

(1) Revenue and Customs officials may not disclose information which is held by the Revenue and Customs in connection with a function of the Revenue and Customs.

(2) But subsection (1) does not apply to a disclosure—

(a) which—

(i) is made for the purposes of a function of HMRC, and

(ii) does not contravene any restriction imposed by the Commissioners...

Cross references

The following topics are considered elsewhere:

Topic	**See para**
s.3/ToA motive defence compared	64.16.6
TiS/ToA motive defence compared	55.11.3

52.1 Motive defence: Introduction

Sections 736 - 742 ITA provide a defence to the ToA provisions which I call the "**motive defence**" (or where comparing it to other unallowable purpose tests, "the ToA motive defence"). The INT Manual calls it "the avoidance purpose exemption". It is an early example, perhaps the first, of what would now be called a TAAR.[1]

52.1.1 *Motive defence terminology*

Section 736(3) ITA provides two self-explanatory terms:

> In this section and sections 737 to 742—
>
> "**post-4 December 2005 transaction**" means a relevant transaction effected on or after 5 December 2005, and
>
> "**pre-5 December 2005 transaction**" means a relevant transaction effected before 5 December 2005.

In this chapter:

(1) "**Old Conditions A and B**" are conditions A and B in s.739 ITA (applying to pre-5 December 2005 transactions).

(2) "**New Conditions A and B**" are conditions A and B in s.737 ITA (applying to post-4 December 2005 transactions).

[1] See 3.2.1 (Types of unallowable purpose).

References to Condition A or B (without more) means either the old or the new version of the Conditions.

There have been two explanations of the 2006 clauses:

EN Draft Clauses (2005): Explanatory Notes on Draft Clauses, 5/12/05
EN FB 2006: Explanatory Notes on the Finance Bill 2006

I distinguish between:

(1) An "**innocent**" transaction, which satisfies the motive defence (in short, no tax avoidance purpose)
(2) A "**tainted**" transaction, which does not satisfy the motive defence

For the definition of "**relevant transactions**" see 48.12 (Why associated operations matter).

52.2 Motive defence conditions

The position depends on the date of the relevant transactions:

s.737 ITA: New conditions	**s.739 ITA: Old conditions**
(1) This section applies if all the relevant transactions are post-4 December 2005 transactions.	(1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.
(2) An individual is not liable to income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs—	(2) [Identical]
(a) that Condition A is met, or (b) in a case where Condition A is not met, that Condition B is met.[2]	that condition A or B is met.

52.3 Motive defence condition A

Section 737(3)/739(3) ITA set out Condition A:

[2] The reader may think this is rather a clumsy way to say "A or B". No doubt "or" can have an inclusive and an exclusive sense: so "A or B" can mean "A or B or both" or "A or B but not both". But the context will normally clarify the meaning, as it does in Old Condition A. But there it is.

s.737(3): New condition A	**s.739(3): Old condition A**
Condition A is that it would not be reasonable to draw the conclusion, from all the circumstances of the case,[3] that	Condition A is that
the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.	the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

52.4 Motive defence condition B

Section 737(4)/739(4) ITA set out Condition B:

s.737(4): New Condition B	**s.739(4): Old Condition B**
Condition B is that—	Condition B is that the transfer and any associated operations—
(a) all the relevant transactions were genuine commercial transactions (see section 738), and	(a) were genuine commercial transactions, and
(b) it would not be reasonable to draw the conclusion, from all the circumstances of the case,[4] that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.	(b) were not designed for the purpose of avoiding liability to taxation.

52.5 Enactment history

The original wording was much simpler. It provided exemption if:

> the transfer and any associated operations were effected mainly for some purpose other than the purpose of avoiding liability to taxation.[5]

[3] See App.2.24 (Reasonable-to-assume).

[4] See App.2.24 (Reasonable-to-assume).

[5] Section 18 FA 1936. Section 28 FA 1938 substituted the text which is now Old Conditions A and B.

Sir Terence O'Connor (then Solicitor-General) explained why the text was changed in 1938 to (what is now) Old Conditions A & B:

> A taxpayer[6] transferred a large amount – he was not one of the small people for whom my hon. and learned Friend was pleading – of foreign securities to a trust company abroad on certain trusts under which the income was to be accumulated until the death of the taxpayer. There was a discretion to the trustees to pay certain portions of the income to the taxpayer or to his son. The deed gives to the taxpayer and his son power, with the consent of the trustees, to revoke the trust, or, alternatively, they can withdraw all or any part of the trust property for their own benefit. The trust income has been accumulated, and none of it has been distributed.
>
> The vigilant Revenue authorities pursued this taxpayer, and he contended, successfully, as it transpired, on appeal, that the foreign trust was born because of his fears as to the financial position of this country and the dangers of the situation on the Continent ... in 1936. ... The Special Commissioners decided that the main purpose of the transaction was occasioned by A's pessimistic view of the European situation at the time; that, arising out of that, his main intention was to make provision for his family in a safer country; and that, if there was any intention of avoidance of taxation, it was incidental to the main purpose. They therefore decided that there was no liability under Section 18 FA 1936. That instance has only to be cited to the Committee for the Committee to realise that on this particular matter the hon. Member for Chesterfield (Mr. Benson) was a true prophet in 1936, when he said that the word "mainly" would be too wide.[7]

[6] The Inland Revenue accepted at that time that (what is now) s.720 only applied if the transferor was UK resident at the time of the transfer. If the transferor was UK resident, one can see why the Revenue found the successful motive defence claim troubling.

The remittance basis position in the case is unclear. It is reasonable to guess that the taxpayer (had he not made the transfer of assets) would have been taxed under the remittance basis, but accepted that the remittance basis did not apply under the then transfer of asset rules; the current s.720 remittance basis was only introduced in 1981. That unfairness would have made the taxpayer's claim for the motive defence more attractive.

Conceivably, the taxpayer (had he not made the transfer of assets) would have been taxed on the arising basis (eg if the income in point was UK source income) in which case the successful motive defence claim would have been even more troubling.

[7] Hansard 27 June 1938, col 1610. It is noteworthy that an income tax dispute on the FA 1936 provision was resolved by a Special Commissioners' decision by early 1938

If a case on similar facts could be imagined today, it might still succeed, but the test is stiffer. The taxpayer would need (in short) to show that tax avoidance was not even one of the purposes of the transfer.

52.6 Mixed tax/non-tax purposes

A transfer may have more than one purpose.

52.6.1 *Condition A*

Condition A depends on whether the purpose of avoiding liability to taxation was the purpose *or one of the purposes* for which the transfer or associated operations were effected. If *one* of these purposes is tax avoidance, the transfer fails condition A. It does not matter what the other purposes are.[8] The tax avoidance purpose does not have to be a main purpose (unlike standard TAAR wording).[9]

52.6.2 *Old Condition B*

Old Condition B contains two requirements; both must be satisfied. The first is that the transfer (and associated operations) are commercial transactions. Secondly that the transfer (and associated operations) are not designed for the purpose of avoiding liability to taxation.

What happens if a commercial transaction has two or more purposes? HMRC say in RI 201:

> The Revenue's view is that one of the essential conditions of s [old condition B] would not be satisfied where there was a significant element of tax avoidance purpose in the design of the transfer and any associated operations.

This paraphrase is rather[10] too generous to HMRC. In *Carvill v IRC*:[11]

> One must ask in para (b) whether the transfer was designed for the purpose of avoiding tax or not. This seems to me to require that the

(even allowing for the fact that the 1936 Act operated retrospectively to 1935/36). If the same facts arose today, one would also need to consider s.624 (but protected-trust relief is likely to apply) and s.643A.

[8] This is self-evident, but if authority is needed, see *Philippi v IRC* 47 TC 75 at p.110.

[9] See 3.14 ("Main" purpose).

[10] Depending to an extent what nuance one gives to the malleable word "significant".

[11] [2000] STC (SCD) 143 at [89]. The passage was approved in *HMRC v Fisher* [2021] EWCA Civ 1438 at [83].

> main purpose was not tax avoidance because if one has to categorise a transaction as being either designed for the purpose of tax avoidance or not, when it is clearly accepted that a transaction may be designed for more than one purpose, the only way to categorise the design into one purpose is to look at the main purpose of the design. I think, therefore, that the taxpayer's contention of sole purpose is too loose a test and the Revenue's contention of significant purpose is too stringent a test although it will in practice be difficult to determine the difference between a significant and a main purpose.

The point of Condition B is that (if one passes the "commercial" requirement) the "no tax avoidance" requirement is easier to satisfy. Otherwise there is no reason to have two Conditions.

52.6.3 *New Condition B*

The wording has changed in New Condition B. The test is now whether:

> any one or more of those transactions was *more than incidentally* designed for the purpose of avoiding liability to taxation.

This brings the law into line with RI 201.[12] At first I thought (like the Special Commissioner) the difference is relatively slight. But (depending what nuance is given to the malleable word "incidentally") the change does make a difference. Since a merely incidental motive is not likely to amount to a "purpose" at all, a claim which fails Condition A will rarely (if ever) qualify under Condition B. For this reason (and because the "commercial" requirement in New Condition B is so narrow) New Condition B is dead letter law.

52.6.4 *Condition B: Critique*

Why did parliament not simply repeal Condition B, rather than amend it out of existence in a way which needs pages to analyse and discuss? Perhaps the full extent of what was done was not realised. Perhaps it was, but it was thought that repeal would raise objections. However that may be, the rational course would either be to repeal Condition B completely and gain the benefit of simplicity or to return to old Condition B, which had a role to play in aiding commercial life and the economy.

[12] I take "more than incidental" in New Condition B to have the same meaning as "significant" in RI 201.

52.7 "Commercial": Undefined sense

Commercial is a requirement for Condition B but not Condition A.

In Old Condition B the term is not defined. For a general discussion see App.5.2 (Commercial). In New Condition B there is a complex definition which is considered in the next section.

52.7.1 *Making/managing investments*

RI 201 provides:

> The expression "bona fide commercial" in [Old Condition B] is taken to apply
> [1] only to the furtherance of trade or business, and
> [2] not to the making or managing of investments.[13]

The INT Manual confirms this is still the HMRC view:

> **INTM603020 Commercial transactions** [Jan 2023]
> In this context, HMRC have treated 'commercial' as applying only to the furtherance of trade or business, and not to the passive holding of investments.

Proposition [2] (that "commercial" does *not* apply to making or managing investments) is untenable:

(1) The statement does not say what the position is if the making or management of investments constitutes a business. A transfer may be both in the furtherance of a business *and* in the course of making or managing investments.[14] The intended meaning seems to be that investment transactions in the course of a business are commercial, but investment transactions which are not in the course of a business are not commercial. The (elusive) concept of business is distinct from the concept of what is commercial.

[13] RI 201. This was perhaps the view of the drafter of s.724 CTA 2010 which refers to transactions:

"(a) for genuine commercial reasons *or* (b) in the ordinary course of making or managing investments."

But para (b) might have been added for the avoidance of doubt, or for some exceptional case, and it is not clear that the drafter really thought that making or managing investments would not usually be commercial.

[14] The proposition that making or managing investments may constitute a business is self-evident; but if authority is needed, see s.105(3) IHTA which refers to the business of making or holding investments; and s.1218 CTA 2009 which refers to "a company whose business consists wholly or partly of making investments".

(2) More fundamentally, making or managing investments *is* generally regarded as "commercial" even if it does not constitute a business. What can be more "commercial" than the management to maximise investment return? This point is recognised in *Lewis v IRC*:

> It is trite law that in exercising their duties trustees must use as much diligence as a prudent man of business ... Faced with the self-investment problem their duty was to act in a business-like manner: this they did. Put another way, they acted commercially as was their duty. In our view it would be construing the statute too narrowly to hold that they did not carry out the transactions for bona fide commercial reasons, unless an investment decision cannot be for commercial reasons.[15]

(3) Section 738(4) ITA assumes that making/managing investments may be "commercial" (in the ordinary sense of the word).[16]

Proposition [1] (that the expression "commercial" applies *only* to the furtherance of trade or business) was put to the Commissioners in *Carvill*, where it obtained some support.[17] Nevertheless, it is too narrow. In practice, commercial transactions will normally further trades or businesses so the issue will not often arise. But there are counter examples, as discussed above: making or managing investments is in principle a commercial transaction even if it is not in the course of a business.

The most that can be said is that a transaction which is not in furtherance of a trade/business is less likely to be commercial than one which is in furtherance of a trade/business, but this factor is not decisive.

52.7.2 *Commercial: Whose viewpoint?*

From whose viewpoint does one assess commerciality? The answer is that it should be looked at from the viewpoint of the transferor, but it would be an unusual transaction under which one party is and another party is not acting commercially. In *IRC v Willoughby* HMRC accepted that bonds were commercial transactions for Royal Life who issued them, but argued that they were not for Professor Willoughby who acquired them. The

[15] [1999] STC (SCD) 349 at p.362.

[16] See 52.8.3 (Investments restriction).

[17] See App 5.2.3 (Business transaction).

Special Commissioner did not agree:

> If a contract is entered into by two people and it is a bona fide commercial transaction for one of them, it cannot be not a bona fide commercial transaction for the other party to the contract in the absence of any reason for impeaching the latter's good faith.[18]

The point was not discussed on appeal. But the reference to "good faith" gives sufficient wiggle-room, if a Court wishes to avoid the reasoning.

52.8 "Commercial" in New Condition B

Section 738 ITA contains a definition of "commercial" for the purposes of New Condition B. The definition is artificial in that it excludes some transactions that are "commercial" in the normal sense of the word. So New Condition B is narrower than Old Condition B.

Section 738(1) ITA provides:

> For the purposes of section 737, a relevant transaction is a commercial transaction only if it meets the conditions in subsections (2) and (3).

Is s.738 an *exhaustive* definition of "commercial" or is it merely a partial, exclusory definition? That is, if a transaction meets the requirements set out in the section, is it necessarily "commercial" or must the transaction also be "commercial" in the ordinary sense of the word? The wording in s.738(1) ("a ... transaction is a commercial transaction only if ...") could be read as an exhaustive or a partial exclusory definition. It is suggested that s.738 is an exhaustive definition. The legislation is intended to make the law clearer, and a partial definition does not do that. In practice it is difficult to think of a transaction which meets the definition which is not commercial in the ordinary sense of the word, so the issue may not arise.

52.8.1 *Course of business*

Section 738(2) ITA sets out the first requirement of "commercial":

> It [the relevant transaction] must be effected—
> (a) in the course of a trade or business and for its purposes, or
> (b) with a view to setting up and commencing a trade or business and for its purposes.

In the following discussion I use the word "business" to mean "trade or

[18] 70 TC 57 at p.86H.

business".[19]

At first sight this more or less encapsulates the natural meaning of "commercial". But in fact it is restrictive. An individual may make an investment which is not in the course of a business, eg a purchase of a company. This is commercial in the general sense of the word, but it is not "commercial" within the new definition. Section 738(2) thus gives effect to HMRC's view of the meaning of "commercial" in Old Condition B.[20]

If a transaction is made between X and Y, it may be in the course of a business of X but not in the course of a business of Y. For example, if Y (an individual) subscribes for shares in X Ltd, an investment company, the issue of shares may be in the course of the business of X Ltd. That is sufficient to meet the requirement of s.738(2).

52.8.2 *Arm's length requirement*

Section 738(3) ITA sets out the second requirement of "commercial":

> It [the relevant transaction] must not—
> (a) be on terms other than those that would have been made between persons not connected with each other dealing at arm's length, or
> (b) be a transaction that would not have been entered into between such persons so dealing.

The drafting is based on IHT arm's length transaction relief[21] but that does not shed much light on the issues here.

Taken literally, this would seem to exclude an interest free loan to a wholly-owned company (even if it is a trading company). Such loans are commercial in the normal sense of the word. One wonders whether that was foreseen by the drafter. EN Draft Clauses (2005) claims that the change merely "clarifies and confirms" the correct interpretation of the existing statute. But I don't think anyone should take any notice of that.[22] It is suggested that the provisions should be construed purposively, so that an interest free loan to a wholly-owned company *is* a commercial transaction.

[19] For HMRC views on what constitutes a business, see CG Manual para 65715 [April 2011] and Shares and Assets Valuation Manual para 111110 [July 2013].

[20] See 52.7.1 (Making/managing investments).

[21] See 74.13 (Arm's length disposal relief).

[22] See App.1.2 (Clarify/modernise/reform).

A dividend is a commercial transaction, as such transactions are often entered into between companies and minority shareholders (who are in principle not connected to the company).

In *Hoey v HMRC* an interest-free loan from an offshore EBT to a beneficiary was held to meet this requirement; but on appeal the decision (described in this book as "surprising") was held to be flawed.[23]

The INT Manual provides:

> **INTM603020 Commercial transactions** [Jan 2023]
> ... The above provisions [s.738(2)(3)] ensure that transactions taking place other than at arm's length will not satisfy the terms of Condition B. This will prevent individuals claiming exemption on contrived grounds of 'commerciality'.
> [1] An example of this might be where an offshore company is established as a conduit or 'money box' for personal fee income.

The metaphors of conduit and moneybox are imprecise, but I take this example as a reference to the arrangement in *Brackett v Chater*,[24] where the transfer of assets was that T entered into a service contract, at an undervalue, with a non-resident company which was held by a settlor-interested discretionary trust made by T. This is an example of a transfer which fails the commerciality test of s.738(3)(a). On the other hand, that contract was not a commercial transaction in the ordinary sense, and the commissioners rejected the taxpayer's argument that the motive defence applied, so this is not a case where the new definition was needed, or would have made any difference.

> [2] It will also prevent claims that the establishment of a non-resident family trust was for 'commercial' reasons.

The statutory definition is not needed here: no-one suggests that the establishment of a family trust is "commercial" in any sense.[25]

> [3] HMRC accept that the creation of some trusts will satisfy the 'commerciality' tests, for example an employee benefit trust established for the benefit of a group of employees and funded on arm's length terms...[26]

[23] [2019] UKFTT 489 (TC) at [159]; [2021] UKUT 82 (TCC) at [243]-[246]. For other aspects of this case, see 52.25 (Employee benefit trusts).

[26] See 52.25 (Employee benefit trusts).

52.8.3 *Investment managers*

Section 738(4) ITA restricts the definition of commercial by restricting the definition of "trade or business":

> For the purposes of subsection (2),
> [1] making investments,
> [2] managing them or
> [3] making and managing them
> is a trade or business only so far as—
> (a) the person by whom it is done, and
> (b) the person for whom it is done,
> are persons not connected with each other and are dealing at arm's length.

The INTM provides:

> **INTM603020 Commercial transactions** [Jan 2023]
> ...The aim of this is to distinguish between asset management activity (which is a business chargeable for reward) and merely holding assets for possible increase in value.

Section 738(4) uses layman's language, but I think the references to making/managing investments by one person for another are references to the activities of an investment manager[27], because an investment manager makes/manages investments for another person. So:

(1) If the person abroad is a company carrying on the business of making investments through an investment manager:
   (a) the person by whom it (the investment business) is done is the investment manager
   (b) the person(s) for whom it (the business) is done is the company,

(2) If (less likely) the person abroad is a company carrying on the business of an investment manager:
   (a) the person by whom it (the investment management business) is done is the company
   (b) the person(s) for whom it (the business) is done is the customers (principals) of the company

In each case, a transfer to the company is only commercial if the two are

[27] or broker; in this section I use the term "investment manager" to include a broker.

unconnected and at arm's length.

In the person abroad carries on business without an investment manager, it is suggested that this paragraph does not apply and can be ignored.[28]

If s.738(4) applies, the making/managing of investments is only business "so far as" it is done for unconnected persons. Normally an activity is or is not a business: it cannot be a business to a limited extent. Perhaps the activity is to be split and regarded as part business and part non-business.

What if a business is initially carried on through connected persons and later becomes carried on through unconnected persons, (or vice versa)? It is suggested that the question whether a transfer is commercial is decided by the circumstances at the time of the transfer, though one might look at the position in the round including considering how later matters were then intended and actually took place.

The subsection does not apply to a company *trading* in financial assets since these are not "investments".[29] But a company carrying on an financial trade with a UK investment manager needs to consider the IME, which imposes requirements comparable to being unconnected.

Suppose T subscribes for shares or debentures in (or makes a loan to) an investment company. The transaction satisfies s.738(2) since the company is carrying on a trade or business. The transaction satisfies s.738(3) if it is on arm's length terms. The business satisfies s.738(4) unless the company's business is conducted through connected agents. It does not matter that T and the company are connected.

52.8.4 *"Commercial": Critique*

When one contemplates the difficulties raised by the statutory definition, one appreciates the wisdom of the 1938 drafter in leaving "commercial" undefined. The word "commercial" is often used motive defence tests[30] and nowhere else is it defined. It is suggested that the definition of commercial in s.738 ITA serves no useful purpose, and unless some purpose can be identified, it should be repealed.

[28] Except in the case of a business carried on by an agent, a business is not in normal English "done for" anyone. For example, a property business it is not done for the tenants; the business of buying and selling shares is not done for counterparty vendors and purchasers.

[29] See 72.15.1 ("Investment": Terminology).

[30] See 3.1 (TAAR/unallowable purpose test).

52.9 Meaning of "taxation"

52.9.1 *Taxation in Old Conditions A/B*

"Taxation" in Old Conditions A and B means any form of UK taxation, and not only income tax.

In *Sassoon* v *IRC*:[31]

> Death duties, National Defence Contribution, perhaps other taxes or duties would all be within the Revenue's mind in deliberately choosing the wide word 'taxation', in order to make sure that their concession of transfers for other purposes should not be used to deprive the Revenue of other taxes than Income Tax or Sur-tax.

The International Manual provides:

> **INTM600040 Transfer of assets abroad** [Feb 2020]
> **Overview of ITA 2007/S736 - 742 - exemption from liability**
> ..In the context of this test "taxation" includes any UK tax liability, for example, Inheritance Tax, Capital Gains Tax, Corporation Tax as well as Income Tax.

Sassoon, though criticised,[32] is a decision of the CoA. While it could be

[31] 25 TC 154 at p.158 cited in the INT Manual para INTM603000. *Sassoon* was a 2nd world war decision (1943), which may possibly explain why the court referred to the *Revenue's* mind, when nowadays one would refer to the mind, or intention, of parliament.
For completeness: *Sassoon* was followed in *Fisher v HMRC,* holding that betting duty constituted "taxation" and "the fact that betting duty would at the time have been under the care and management of the Commissioners for Customs and Excise and not the Commissioners for Inland Revenue does not affect this view": [2020] UKUT 62 (TCC) at [136]. This was common ground in the subsequent appeal: [2021] EWCA Civ 1438 at [84].

[32] For the following reasons:
(1) The rule that an intention to avoid (say) stamp duty should have *income* tax consequences gives rise to obvious anomalies. The usual principle is that each tax must be considered separately. This is the approach usually adopted by anti-avoidance provisions: eg s.682 ITA (transactions in securities), or s.137 TCGA. But see s.75(5)(a) FA 1986 for an exception.
(2) Since *Sassoon* was decided, the word "tax" has been given a limited definition. Section 989 ITA provides:
"'tax', if neither income tax nor corporation tax is specified, means either of those taxes".
There are two reasons why this statutory change does not affect the position:
(a) A definition of *tax* does not in principle determine the meaning of the

reversed by the Supreme Court, that should not be expected, because:
(1) The Court should be slow to reverse a long standing decision.
(2) *Sassoon* has had statutory endorsement in the context of new conditions A and B.

Foreign tax is not "taxation" for this purpose. The House of Lords assumed that this was so without argument in *Herdman v IRC*.[33] This must be right since (1) it is illogical that the purpose of avoiding foreign taxes should have UK tax consequences and (2) it would be impractical to apply an avoidance/mitigation distinction to foreign taxes (where the distinction would depend on the foreign tax culture and attitudes).

HMRC agree. The INT Manual provides:

> **INTM603000 Avoidance purpose exemption: Taxation** [Jul 2023]
> The *Sassoon* case also established that 'taxation' meant UK taxation. If it is intended to avoid foreign tax and only foreign tax is avoided, the transfer of assets provisions will not apply.

52.9.2 *Taxation in New Conditions A/B*

For the purposes of New Conditions A and B these rules are set out in s. 737(7) ITA:

> In this section—
> "revenue" includes taxes, duties and national insurance contributions,
> "taxation" include any revenue for whose collection and management the Commissioners for HMRC are responsible.

This is an inclusive, not an exhaustive definition. This is relevant if there

cognate word *taxation*. (Would a definition of "engine" determine the meaning of the cognate word "engineer"?)

(b) The decision in *Sassoon* was given the implied approval of parliament in the 1952 consolidation and it is not likely that the 1970 consolidation was intended to alter that.

(3) Section 720(1) ITA refers only to the avoidance of income tax; but see s.721(5)(c) ITA.

(4) Dicta in *Vestey v IRC* 54 TC 503 are said to be inconsistent with *Sassoon*; but this point was not an issue in *Vestey*.

(5) A reversal of *Sassoon* would cut down considerably the multitude of issues that the motive defence currently raises: see 52.10 (Practical examples: introduction).

While of course "context is king", the word "taxation" is used elsewhere to mean any UK tax; see for instance s.22 F(No 2)A 1931.

[33] 45 TC 394.

is a change in the responsibilities of HMRC. For instance, LBTT is managed by Revenue Scotland,[34] and LTT by the Welsh Revenue Authority,[35] but these still constitutes "taxation".

It continues to be the case that the word "taxation" does not include foreign taxes.

52.10 Practical examples: Introduction

For the general principles which apply to the motive defence and other TAARs, see 3.1 (TAAR/unallowable purpose test). I here seek to apply them in some practical cases involving the ToA motive defence. There is no test like the test of practice.

I first consider transfers to non-resident trusts (**"trust transfers"**) in six sets of circumstances:

(1) Trusts where settlor is excluded:[36]
  (a) Foreign settlor: UK and foreign beneficiaries;
  (b) Foreign settlor: only UK beneficiaries;
  (c) UK settlor: UK beneficiaries;
  (d) UK settlor: foreign beneficiaries.

("Foreign" here refers to someone not resident or domiciled in the UK and not expecting to become resident or domiciled.)

(2) Trusts where the settlor is a beneficiary:
  (a) Settlor foreign domiciled but UK resident;
  (b) Settlor foreign domiciled and non-UK resident.

This by no means covers all the possible circumstances of trust transfers, but one can extrapolate from these to others which may arise.

It may be helpful to summarise the questions that arise on a trust transfer. One must ask: Is the purpose to avoid (1) income tax? (2) CGT? (3) inheritance tax? It is obviously necessary to consider each tax separately; I will consider CGT and IT, and then IHT. Thus what seemed like a single issue (is there tax avoidance?) raises 3 sub-issues; that is an inevitable consequence of the rule that taxation includes any tax.[37]

However, a tax charge does not arise in isolation, but is charged in

[34] Section 54 Land and Buildings Transaction Tax (Scotland) Act 2013.

[35] Section 2 Land Transaction Tax and Anti-avoidance of Devolved Taxes (Wales) Act 2017.

[36] It is assumed that the spouse of the settlor is also excluded.

[37] See 52.9 (Meaning of "taxation").

different ways on the settlor, trustees[38] or beneficiaries. It is best to consider these three classes of taxpayer separately, though the issues partly overlap. So in the case of a trust transfer one must ask whether the purpose is avoidance of IT/CGT/IHT liabilities of (1) the settlor; (2) the trustees; (3) the beneficiaries. Thus what seemed like a single issue raises nine sub-issues. Further, post-*Willoughby* one must consider whether there is a factual subjective purpose to reduce any of these tax liabilities and then whether the purpose (if present) is to be classified as avoidance or mitigation. So what seemed like a single issue (is the purpose of a trust transfer to avoid taxation?) actually turns out to raise 18 sub-issues (is the purpose to save IT/CGT/IHT by settlor/trustees/beneficiaries and, if so, is it mitigation or avoidance?).

52.11 Trust: Settlor excluded

Transfers to a trust from which the settlor is excluded have two common features which are relevant for the motive defence:

52.11.1 *No avoidance of settlor's tax*

The trust transfer will usually bring a tax advantage to the settlor (compared to the position if there is no transfer). If a settlor is excluded from the trust, any tax advantage they might obtain is mitigation not avoidance. It is not in principle the intention of parliament that a settlor should pay tax in respect of income/gains/capital from which they are excluded.[39] However, HMRC rightly say that the purpose of a trust transfer may be to avoid tax liabilities of the trustees and beneficiaries and here closer investigation is needed.

52.11.2 *Non-tax reason for trust*

There will usually be non-tax reasons for the settlor to make a trust, rather than making absolute gifts. The advantages are asset protection in the broadest sense: protecting the trust fund from profligate beneficiaries, divorcing spouses, and sometimes forced heirship or foreign exchange

[38] It may be said that in economic reality trustees pay tax on behalf of beneficiaries. But the rules for taxation of trustees are distinct from the rules for taxation of beneficiaries so it is best to consider trustees separately.

[39] This is self-evident, but if authority is needed, see Lord Templeman's comment in 3.20.7 (Economic consequences). The exceptional case of s.86 TCGA is discussed below.

control. These are good reasons but not commercial ones. So a trust transfer must pass Condition A, not Condition B, but it does so in the context of a transaction which is not usually wholly tax driven. In the absence of tax considerations the usual form would normally be (and in practice generally is) a discretionary trust.

52.12 Foreign settlor; UK/non-UK beneficiaries

This section considers a transfer to a trust whose beneficiaries include (but are not primarily) UK resident and domiciled beneficiaries, and exclude the settlor.

52.12.1 *Avoidance of trustees' tax*

In deciding whether the trust transfer yields a tax advantage for the trustees, one obviously cannot compare the actual position (appointment of foreign trustees) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done (which in this context must be the appointment of UK trustees). That seems a reasonable comparable; the settlor has a choice: to transfer to trustees in the UK or elsewhere and they must do one or the other. In the absence of UK tax, there will often be no reason to prefer the one to the other.

The choice of UK trustees (rather than foreign trustees) would not in principle yield any greater CGT before 2007/08.[40] There is no question of CGT avoidance for dispositions before the FA 2006.

The position is slightly more complicated for dispositions after 2006. The choice of exclusively UK trustees of a discretionary trust will yield CGT (and income tax on foreign source income) not due from non-resident or mixed resident trustees.[41] However, assuming a settlor who is non-UK domiciled and non-resident, if one trustee (even a minority trustee) is not UK resident, the trustees are not (in short) subject to CGT or income tax on foreign income.[42] In this way, Parliament assists in the appointment of non-resident trustees, suggesting that this cannot be

[40] As long as the UK trustees were professionals: see the 4th edition of this book at 5.8 (Professional trustees treated as non-resident).

[41] See 7.4 (Trust residence for IT/CGT). The IT position for trustees before 1989 was thought by HMRC to be the same, and was held in *Dawson v IRC* 62 TC 301 to be only slightly (and for present purposes not materially) different.

[42] See 7.6 (Mixed-resident trustees).

contrary to the intention of parliament. To hold otherwise would be to suggest that the settlor has a duty to maximise UK income tax and CGT liability. Any tax saving here must be mitigation. It is relevant to note that the reason for the abolition of the former rule that professional trustees should be regarded as non-resident was not to prevent avoidance: it was to avoid a breach of EU State Aid law.[43]

52.12.2 *Avoidance of beneficiary IT*

In deciding whether the trust transfer yields an income tax advantage for the beneficiaries, one obviously cannot compare the actual position (transfer to trust) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done.

The actual position of UK resident and domiciled beneficiaries is that they will pay tax on income distributions from the trust, but no tax on accumulated income and (in the absence of s.731 ITA) no income tax on capital payments. This is a clear income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of the tax advantage may not constitute purpose, but it depends on the facts.[44]

The actual position of UK resident foreign domiciled beneficiaries is that they will pay tax on remitted income distributions from the trust, and (in the absence of s.731 ITA) no income tax on capital payments even if remitted. This could be an income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust, but the advantage may be small or nil.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of this somewhat attenuated tax advantage will not constitute purpose.

52.12.3 *Avoidance or mitigation*

Returning to the practical example of a transfer to a trust by a foreign settlor, with both UK and foreign beneficiaries. Is the purpose (if it exists) of saving income tax by the beneficiaries to be classified as avoidance?

[43] HMRC announcement 23 March 2006.

[44] See 3.11 (Foresight/purpose distinction).

The difference between being a beneficiary of a discretionary trust and owning capital outright is normally[45] a difference with "economic consequences". On an economic consequences test this should be mitigation.

There is another indication that the intention of parliament is not infringed. If s.731 ITA applies, in this class of case, the result is unfair and sometimes extremely unfair. The UK beneficiaries will pay income tax on capital payments on an amount by reference to relevant income which may greatly exceed their "share" of the income of the trust computed on any just and reasonable basis.

If there is avoidance of UK tax there is likely to be avoidance of tax in every other jurisdiction where beneficiaries are resident;[46] it is impossible for the settlor to make a discretionary trust anywhere without tax avoidance elsewhere – which, if not absurd, is somewhat startling.

52.12.4 *Avoidance of beneficiary CGT*

The CGT position is complicated by tax reforms. Before 1998, capital payments from the trust would be free of tax to the beneficiaries (because the usual charge did not apply to a trust with a foreign domiciled settlor). This was expressly set out in s.87 TCGA.[47] One must take that as a special tax regime intended by parliament. Pre-1998 transfers cannot be regarded as involving CGT avoidance by the beneficiaries.

After 1998, capital payments to UK domiciled beneficiaries give rise to CGT by reference to trust gains regardless of the domicile of the settlor and in 2008 the charge was extended further. This could be taken to suggest that post-1998 transfers constitute CGT avoidance by the beneficiaries. But the points made in relation to IT avoidance/mitigation apply here too. For dispositions before 2006, s.69(2) TCGA is even stronger than it is now. So the better view is that any CGT saving is mitigation.

52.13 Foreign settlor; UK beneficiaries

The next case to consider is a transfer to a trust whose beneficiaries are all UK resident and domiciled. A trust transfer primarily motivated by non-

[45] It would be different if the trustees (perhaps guided by a strongly worded letter of wishes) closely follow the wishes of a beneficiary.

[46] Assuming they are in a jurisdiction with a tax system comparable to the UK.

[47] And in the predecessor legislation: s.17 Capital Gains Tax Act 1979.

tax advantages (asset protection) should not normally be regarded as having the purpose of tax reduction.

In an unusual case, however, that might be one of the settlor's purposes. Indeed, it could be their primary purpose. It can happen that the settlor creates a trust primarily for a UK beneficiary, and the only reason they do this is tax considerations. Asset protection does not concern every settlor. They would make an absolute gift to a UK beneficiary but for UK tax reasons only they make a transfer to a trust for their benefit. The transfer is solely UK tax driven.[48]

In these (factually unusual) circumstances the question arises whether the tax saving purpose is avoidance or mitigation. The rule for mixed-resident trustees shows the intention of parliament to be that the choice of foreign trustees by a non-resident and non-domiciled settlor should not be regarded as avoidance of trustees' IT or CGT. These sections apply regardless of the residence and domicile of the beneficiaries. The inference should probably be carried across that there is likewise mitigation not avoidance of beneficiaries' IT and CGT liabilities; but the point is arguable.

52.14 UK settlor and UK beneficiaries

Contrast now a settlor who is UK resident and domiciled, making provision for UK beneficiaries. Assume the settlor is not to be a beneficiary. Again, they will often prefer a trust to outright gifts, for non-tax reasons, and the choice is UK or non-resident trustees. If they choose the latter, their purpose (or one of their purposes) is likely to be to reduce CGT or Income Tax and this purpose will be tax avoidance rather than mitigation. This is not an invitation to partake in a statutory regime; we all know that this income tax saving is what s.731 is intended to stop.

The distinction is therefore between:

(1) foreign settlors (whose offshore trusts are not in principle regarded as tax avoidance), and

(2) UK settlors (whose offshore trusts are in principle regarded as tax avoidance).

This distinction is clearly drawn in the 1974 Green Paper on Wealth Tax:

[48] This might be made evidentially clear by contemporary correspondence, or if, perhaps, the settlor's gift to a UK child is settled and their gift to other children outside the UK is absolute; but such details only go to identify the settlor's purpose, and are not otherwise significant for tax.

> **Overseas trusts**
> 22. Trusts where the trustees are not resident in the UK and the administration of the trust is ordinarily carried on outside this country fall into two broad categories.
>
> **"Genuine" overseas trusts**
> 23. The first category includes all those trusts set up with non-resident trustees by settlors who have little or no connection with this country. *In such a case even if there are one or more beneficiaries or discretionary objects resident in this country there are no grounds on which it would be right to bring the trustees or the whole of the trust assets within the charge to the tax.* But a UK resident individual with an interest in such a trust, whether in possession or reversion, has a realisable asset which should be included in his personal wealth at its actuarial value. If such a trust is discretionary however its objects generally have no interests in the trust assets on which they should be assessed.
>
> **"Artificial" overseas trusts**
> 24. The second category includes those trusts where a *UK settlor* arranges for the trustees to be non-resident or where the administration of an existing resident trust passes overseas. The legal ownership of the settled property is thus vested in persons outside UK jurisdiction and *the arrangement is very frequently prompted by tax avoidance considerations*. Accordingly, where settled funds are provided directly or indirectly by a person who at the time the funds were provided was domiciled or ordinarily resident in the UK, the trustees will be liable to the same extent as if the trust had been resident.[49]

While the Paper was addressing the issue of what the Wealth Tax should cover, this passage illustrates very well the general understanding of the concept of tax avoidance in the context of offshore trusts.

Note the terminology of genuine *v.* artificial to describe tax avoidance. The author of the Green Paper had sufficient intellectual rigour to recognise the difficulties in these words and put them in quotation marks accordingly.[50] If only this were done more often!

52.15 UK settlor; foreign beneficiaries

Now consider a UK settlor making a trust (from which they are excluded) for foreign beneficiaries.

[49] Wealth Tax, Cmnd 5704, 1974 paras 22–4 (emphasis added). The fact that the Wealth Tax proposal was abandoned does not affect the relevance of the passage.

[50] See 3.21.2 ("Artificial"/"devices"); 3.21.3 ("Genuine").

What about liabilities of the beneficiaries? Since they are not UK resident, they are largely outside the scope of IT and CGT, so there is no avoidance.

In deciding whether the trust transfer yields a tax advantage for the trustees, one can again compare the actual position (appointment of foreign trustees) with the appointment of UK trustees. UK trustees would pay IT if the trust were discretionary but not (for all practical purposes) if it were an interest in possession. Any IT saving must be mitigation. CGT is different: UK trustees will pay the tax, and foreign trustees will not. However, trustees are in economic reality paying tax on behalf of the beneficiaries. Where the beneficiaries are not within the scope of the tax then any tax saving by the trustees must be mitigation. This is consistent with the rule that the anti-avoidance provisions of s.87 TCGA and s.731 ITA will not in principle apply on payments to beneficiaries outside the scope of CGT and IT.

52.16 UK settlor; UK/foreign beneficiaries

Where there is a mixture of UK and non-UK beneficiaries I suggest the starting point is that one would expect the settlor to make their trust here, so a transfer to foreign trustees would be regarded as avoidance. (In such a case there is something to be said in income tax terms for the creation of two separate trusts for two separate classes of beneficiaries, the residents and the non-residents, so one at least qualifies for the motive defence. But CGT considerations point the other way.)

52.17 Trust transfer; settlor beneficiary

52.17.1 *Remittance basis settlor-beneficiary*

The next case concerns a remittance basis taxpayer settlor who transfers assets to a non-resident trust under which they are the principal beneficiary.

Income tax is not avoided since trust income continues to be taxed on a remittance basis under s.624 ITTOIA. There may be an IT reduction after the death or exclusion of the settlor but it will not (normally) be the purpose (or even one of the purposes) of the settlor to obtain that (normally very long term) advantage, quite apart from the question of whether the advantage is avoidance or mitigation.

There is in principle a CGT advantage in that the settlor moves from the remittance basis to the s.87 capital payment remittance basis. To obtain that advantage may well one of the purposes of the trust. If so, is it CGT "avoidance"? It must have been a decision of parliament *not* to apply s.86 TCGA to a foreign domiciled settlor and the decision was confirmed in 2008 (where a proposal to extend s.86 to foreign domiciled settlors was contained in FD Draft Clauses (January 2008) and dropped in the Finance Bill). It is suggested that there is no CGT "avoidance". This is a "statutory invitation" in plain terms.

52.17.2 *Non-resident non-dom settlor-beneficiary*

Where the settlor is the principal beneficiary and neither domiciled nor resident then UK tax saving is not likely to be a purpose during the life of the settlor, because no saving in fact arises. After the death of the settlor there may be a saving if there are UK beneficiaries. The position then becomes like that of a trust where the settlor is excluded, and the discussion above is relevant.

52.18 Appointing non-UK trustees

Similar principles apply. One case is where the settlor and beneficiaries are wholly UK based, the settlor has created a UK trust, and foreign trustees are later appointed. The inference that the appointment has the purpose of saving UK income tax or CGT is very strong and this purpose is avoidance, not mitigation.

At the other end of the scale is the case where the settlor and the principal beneficiaries have gone to live abroad permanently and local trustees are appointed. One reason for the export of the trust is that the settlor may (or may continue to be) a trustee. If so, the appointment may have no tax saving purpose at all. But if (as is likely) it has a tax saving purpose, that is mitigation and not avoidance.

What if all the beneficiaries are abroad but the settlor remains in the UK? The same tax savings could in principle be had by winding up the trust with outright appointment to beneficiaries, and that transfer is not likely to constitute avoidance. So the appointment of foreign trustees should not be avoidance.

What if the settlor goes abroad and the beneficiaries remain in the UK? It is tentatively suggested that a tax saving purpose (if it exists) is likely to be avoidance.

A more borderline case is where the settlor and beneficiaries go to live abroad for a medium term period (say five years[51]). Non-UK resident trustees are appointed with the intention that the trust will continue to be non-resident even after the settlor returns to the UK. This is probably to be classified as tax avoidance, albeit long-term tax avoidance, but views may differ, especially if the time spent abroad is longer than five years.

52.19 Trust transfer: IHT avoidance

52.19.1 *Situs change*

The transfer of money by a foreign domiciled individual from a UK bank to a foreign bank, in order to make the money excluded property, is an act of tax mitigation, not avoidance.[52] The same would apply if the transfer is made by trustees of a trust with a non-domiciled settlor. The same would apply to a sale of UK situate property and re-investment in non-UK situate property.

52.19.2 *Transfer to trustees*

The residence of trustees is almost wholly irrelevant for IHT.

A gift by a settlor to a trust from which they are excluded is mitigation of their own IHT[53] but it is also necessary to consider the IHT savings of trustees and beneficiaries.

If a foreign domiciled settlor gives, and the trustees retain, non-UK property, any IHT saving purpose which may exist is mitigation. This is so even if the beneficiaries are UK domiciled (so an absolute gift to them would have brought the trust property into the scope of IHT). Section 48 IHTA provides that foreign property in a trust made by a foreign domiciliary is excluded property. Any IHT advantage conferred by the trust, so far from being contrary to the evident intention of parliament, would appear to be in accordance with parliament's evident intention. The argument to the contrary amounts to an argument that the settlor has a duty to maximise IHT liabilities.[54]

[51] There is no particular significance in selecting five years as illustrative of a medium term period, but it is consistent with the CGT temporary non-residence rules; see 11.1 (Temporary non-residence).

[52] See *Beneficiary v IRC* [1999] STC (SCD) 134 at p.145.

[53] See 52.11.1 (No avoidance of settlor's tax).

[54] The avoidance/mitigation issue did not arise in connection with the gift to a trust in *Beneficiary v IRC*, because it was said that reducing tax was not a purpose in the mind of the transferor/settlor; though that seems implausible as it was a consideration for

A gift by a settlor to a trust from which they are not excluded, in circumstances where the settlor is anticipating becoming UK domiciled, is borderline. Section 48 IHTA makes it plain that such a gift carries substantial IHT advantages. But is it "contrary to the evident intention of parliament" to enjoy these advantages? The author tentatively suggests that such a gift should be regarded as IHT mitigation not avoidance. This is consistent with the rule that the GWR provision does not apply here.[55]

For transfers before 27 March 1974 it would be necessary to consider estate duty.

52.20 Transfer: Non res/dom Individual to offshore co

Suppose a non-resident non-dom individual transfers UK assets to a non-resident foreign incorporated company. In principle the individual enjoys two tax advantages:

(1) Obtaining IHT excluded property status
(2) Avoiding higher rates of income tax

Such transfers also give significant advantages which have nothing to do with tax. In particular, in the case of UK land, avoiding personal liabilities arising from direct ownership. In that case the transfer may be a commercial transaction, taking us to motive defence condition B.

Burns v HMRC held that this type of planning was avoidance. The judge started with examples of non-avoidance:[56]

> I would certainly accept that if a non-domiciled person arranged to hold foreign situs, rather than UK situs, assets, and then died, no tax advantage would have been sought.

The judge gives two examples:

> [1] Thus if a UK house was sold, and a French house purchased, that would simply be a case of genuinely changing the assets held, and were some [ToA] point to hinge on whether the change was effected for the purpose of avoiding UK tax, the answer would be that it was not.
> [2] And if UK bank deposits were withdrawn and deposits placed elsewhere, then again, that would be a pure investment switch, and not a step the purpose of which would involve the purpose of achieving a

his advisers, and the principal beneficiary was UK resident at the time; see [1999] STC (SCD) 134 at [145h] - [146].

[55] See 78.15 (Death: settled excluded property).

[56] [2009] UKSPC SPC00728 at [59].

> UK tax advantage.[57]

Example [1] is an easy one. Example [2] is less obvious, to say the least. However that may be, the judge considered that a transfer of UK land (here, farmland) to a UK company is different:

> Indirectly
> [1] retaining a UK real property, and
> [2] simply achieving the technical change in status by putting the property into a non-UK resident company
> in a case where one of the purposes is to achieve the potential Inheritance Tax advantage, implicit by effecting those steps, does seem to me to cross the border between mitigation and tax avoidance. This is because it has involved no real change of investment, as in the two previous examples, but the retention of the UK property, accompanied by a step to change the normal tax consequences of that. Thus where it is shown that the CTT or IHT considerations were one of the purposes of the transfer, or other where the appellants have not displaced the reasonable presumption that UK advantages were one of the purposes, I conclude that those purposes involve tax avoidance and not merely mitigation.[58]

Burns was a case of transferring a property already held to a company. Would the position be the same if the company was set up at the outset, the individual transferring cash to the company in order that the company purchases UK land from a third party? Discuss.

52.21 Transfer: Trust to underlying co

I use the term **"underlying company"** to mean a company wholly-owned by trustees, which holds beneficially what would in substance be regarded as trust assets, if one was allowed to pierce the corporate veil.

I assume that company is not UK resident.

[57] [Author's footnote] The purpose may well be to achieve a UK tax *advantage*; the correct point, and what the judge presumably meant to say, is that the purpose is mitigation not avoidance. The Commissioner has confused tax avoidance and tax advantage.

[58] [2009] UKSPC SPC00728 at [59]. See too *Estera Trust (Jersey) v Singh* [2019] EWHC 2039 (Ch), discussed at 2.5.5 (Practitioner/judicial views today), where a transfer to a Jersey holding company "could be regarded as aggressive tax avoidance, even though relatively unsophisticated in comparison with other notified avoidance schemes".

52.21.1 *Transfer: Commercial reasons*

Transfers to underlying companies arise in a wide variety of circumstances and may be made for the purpose of obtaining non-tax advantages:

(1) Advantages of trust administration:
   (a) Segregation of trust funds of trustee (or occasionally combining trust funds) for ease of management.
   (b) Avoiding conflict of law and other problems of trustees holding assets (especially land) in foreign jurisdictions. (The problem is most serious in civil law jurisdictions which may not understand or even recognise trusts, but problems could also arise in common law jurisdictions.)

(2) In the case of land (or other onerous property), avoiding personal liabilities of trustees arising from direct ownership.

(3) In the case of interest in possession trusts, to allow retention of income (to avoid distributing income to life tenant).

Purpose (1) is commercial: it arises in the ordinary course of managing investments. A transfer from trustees to a company is more often than not a commercial transaction, and for the motive defence one applies Condition B and not Condition A. Purpose (2) is rarer but certainly commercial when it occurs. Purpose (3) is not commercial. Where it is the policy of trustees that all its trust funds should be held in separate underlying companies,[59] the conclusion that the transfer has a commercial purpose seems factually likely. But if one is looking at New Condition B, the additional statutory requirements must be met, in particular, the trustees must carry on a business.

52.21.2 *Transfer for avoidance*

Transfer of UK assets[60] from trustees to an underlying company may offer significant tax advantages. It is a question of fact whether any of these advantages are purposes of the transfer and a question of law whether the

[59] The Edwards report suggests that 80–90% of Jersey trusts hold their assets through underlying companies: *Review of Financial Regulation in the Crown Dependencies* Cm 4109 (1998) para 12.5.2
http://www.archive.official-documents.co.uk/document/cm41/4109/4109-i.htm
Trusts managed in Switzerland generally use underlying companies for Swiss law reasons.

[60] Similar considerations apply to a transfer of foreign assets with a view to realisation and re-investment in UK assets.

purpose is avoidance or mitigation.

I begin with cases where s.624 ITTOIA does not apply. There are three possible tax advantages.

(1) Obtaining IHT excluded property status (non-dom settlor)

In *Rialas v HMRC*[61] a non-UK domiciled individual arranged a trust/underlying company structure, in 2005, to hold a company. This was said to be IHT avoidance:[62]

> 85. [The taxpayer] argued that even though Mr Rialas had sought to protect his estate from Inheritance Tax what Mr Rialas had done was not tax avoidance because he had merely taken advantage of an opportunity which had been intended by Parliament by inserting a non-resident trust[63] between himself and his UK assets.
> [The taxpayer] attempted to reinforce this argument by referring us to [the IHT residence-property code, inserted in 2017] ...
> 86. By this provision, he argued, Parliament had, by implication, intended that excluded property relief was available as long as the UK property in question was not UK residential property. In this way, what Mr Rialas had done was within an exemption intended by Parliament and was not therefore tax avoidance.
> 87. This was an interesting argument, but it does of course refer to a legislative change made in 2017, when the position regarding non-domiciled individuals had been changed dramatically as well as a number of other related changes.[64] We cannot therefore regard it as showing anything other than the fact that, in 2017, in the context of a very different tax environment for non-domiciled individuals, Parliament decided not to deny excluded property relief for UK property held via a non-resident trust other than where the property was UK residential property.
> 88. We therefore agree with [HMRC] that the interposition of a non-resident trust between Mr Rialas and UK property, did have a tax avoidance motive.

[61] [2019] UKFTT 520 (TC). The motive defence point was (rightly) not raised in the subsequent appeal.

[62] IT/CGT avoidance was more likely, as the company qualified for BPR; but the case does not mention that.

[63] Author's footnote: Slightly disconcertingly, the passage twice refers to a non-resident trust, though what gave the IHT advantage was the underlying trust company; but nothing turns on that.

[64] The "other related changes" are presumably the protected-trust regime.

It is correct that the intention of parliament in 2005 should not be ascertained by reference to tax reforms in 2017.[65] But what if the same transactions were carried out post-2017? Has the intention of parliament now changed?[66] The taxpayer has some good points to make:

(1) The principle that companies are not transparent for tax purposes is very deep in the tax system.[67]

(2) The planning is long-established in practice.

(3) The transfer to a company has likely CGT disadvantages,[68] and possible income tax disadvantages,[69] so any IHT saving may be regarded as part of a "package deal", with advantages and disadvantages. This does not savour of tax "avoidance".

(4) As noted in *Rialas* in the enactment of the IHT residential-property code, restricted to residential property, parliament chose to acquiesce to similar arrangements for non-residential property.[70]

The difficulty with the third argument, it seems to me, is that it assumes a level of coherence in UK tax law which does not exist (and never has, and never will). At some time the point may come to be judicially considered at a higher level, and in more depth, but *Burns* has now been unchallenged for so long that the outcome is likely to be the same.

(2) Avoid additional rate IT on UK source income of discretionary trust

In editions of this work up to 2020/21 I said:

> The striking thing about this tax is that there is generally[71] no effective method for HMRC to collect it and in practice no one expects it to be

[65] See 31.37 (Time to ascertain intention of parliament: Change in law).

[66] See 82.22 (IHT residence code: Critique).

[67] See App. 7.12 (Pierce corporate veil/facade).

[68] See 61.55 (Trust holding company).

[69] Loss of tax credits and double taxation relief; sometimes, possible charge under income tax benefit in kind rules.

[70] In *Mehjoo v Harben Barker* CGT planning involved converting UK registered shares to bearer shares and removing them from the UK, in order to make then non-UK situate. That was described (in a passing comment) as tax mitigation, not avoidance: see [2013] EWHC 1669 (QB) at [447] (the point was not considered on appeal). The subsequent decision to legislate on bearer shares for CGT but not for IHT also supports that view. But a stray comment in a case where the issue was not argued, or relevant, does not count for much.

[71] Except in the case of UK land.

> paid in cases where all the beneficiaries are outside the UK.[72] Perhaps this supports a conclusion of mitigation.

But the wide extent of mutual enforcement treaties now brings that into question.

(3) Avoid higher rate income tax on income of interest in possession trust
I suggest that a distinction should be drawn between UK resident life tenants (tax advantage is avoidance) and non-residents (tax advantage is mitigation). In many circumstances, however, non-residents do not pay income tax at the higher rate.

In *Burns v HMRC*:[73]

> I deal first with the feature of trying to cap the level of charge to income tax at the basic rate. This advantage seems to me to be in the category of tax avoidance. ... it seems to me to be difficult to argue that a transaction designed to reduce income tax by the mechanism of the transfer of UK property to a non-resident person (virtually a paraphrase of the [wording of s.720(1)]) is mere mitigation.

52.21.3 *Transfer by settlor-interested trust*

If the purpose of the transfer to an underlying company is to avoid a charge under s.624 ITTOIA, this is considered to be avoidance and not mitigation.

52.21.4 *Transfer of non-UK assets to underlying co*

When non-UK assets are transferred to an underlying company, the UK tax advantage may be less or nil or there may only be tax disadvantages in the loss of double taxation reliefs. In the absence of an intention to re-invest in the UK the purpose cannot as a matter of fact be a tax reduction purpose.

52.22 UK resident non-dom transfers to offshore co

Suppose a foreign domiciled UK resident individual transfers UK assets to a non-resident foreign incorporated company.

If a purpose was to reduce IHT, the transfer is considered to be IHT mitigation. A transfer to reduce income tax (because the company pays

[72] It is considered that non-payment is not in principle dishonest, and so not a fraud on HMRC, though this conclusion depends to some extent on the facts of the case.

[73] [2009] UKSPC SPC00728 at [58].

only basic rate income tax) is considered to be IT avoidance.

52.23 Transfer to UK resident foreign incorporated co

There are many reasons why assets may be transferred to UK resident foreign incorporated companies.

A foreign domiciliary starting a new UK resident company for trade or investment would prefer a non-UK incorporated company so as to own non-UK situate property. This is a commercial transaction and clearly satisfies Old Condition B. New Condition B is (almost) a dead letter,[74] but in an appropriate case there is a reasonable case that New Condition A (or A and B) is satisfied.

A foreign domiciliary (F) wishing to sell a UK unincorporated business may enter into an arrangement under which:

(1) F gives the business to a UK resident foreign incorporated company.
(2) F sells the company (not UK situate property).

If the purpose is to avoid CGT (by utilising CGT incorporation relief) then the claim for the motive defence is weak.

52.24 Transfer between trusts

There are many reasons why funds may be transferred between trusts. It is impossible to generalise as to whether such transfers are made for tax avoidance: one must look at the reason for the transfer.

One reason such transfers are made is where a single trust holds several sub-funds for different branches of a family. The transfer avoids the unfairness which arises under a single trust, that gains accruing to one share are taxable on a beneficiary of another share who receives a capital payment. It is considered that a transfer for this reason does not have the motive of CGT "avoidance".

52.25 Employee benefit trusts

Hoey v HMRC concerned a common-form contractor loan scheme:

> I ... regard the basic structure, of Contractors being employed by an umbrella company which then provides their services to the End Users, as being a perfectly reasonable commercial transaction. However, I regard the insertion of additional transactions, being the setting up of an umbrella company offshore, which makes payments to a trust, which

[74] See 52.6.3 (New Condition B).

> then makes interest free loans to the Contractors, with the expectation that those loans are never repaid, as constituting tax avoidance.[75]

That seems self-evident.

An offshore EBT set up by a UK resident employer is in principle a commercial transaction.[76] However it is more than incidentally designed for the purpose of avoiding taxation, and would not satisfy new condition B. A case of the kind which HMRC call "a normal commercial arrangement" should satisfy old condition B, on the grounds that it was not, *overall,* designed for the purpose of avoiding tax.

HMRC may not agree. Business Brief 18/11 floats the possibility of a s.731 charge on EBTs, without telling us much:

> **5.1.2 Benefit charge**
> Where the company, not the employee is the transferor the benefit charge may apply. The benefit charge matches any income arising within the Employee Benefit Trust with any benefits received by the employee. ... The benefit charge could, therefore, catch any income arising in the offshore Employee Benefit Trust if it is not caught by the income charge and there are actual distributions by the trustees which are not otherwise chargeable to Income Tax.

52.26 Associated operations: Introduction

The motive defence is relatively straightforward when there is a single transfer. It becomes more complicated if there are also associated operations to consider. It is necessary to consider the following cases:

Facts	**See para**
Transfer and associated operations all pre-2005	52.27
Transfer and associated operations all post-2005	52.28
Transfer is pre-2005 and the operation is post-2005	52.32

52.27 Pre-2005 associated operations

Section 739 ITA provides:

> (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.
> (2) An individual is not liable for income tax under this Chapter for the

[75] [2019] UKFTT 489 (TC) at [153]. HMRC might have cited *HMRC v Hyrax Resourcing Ltd* [2019] UKFTT 175 (TC) at [162] - [174] where (more or less) the same scheme was held to constitute avoidance.

[76] See 52.8.2 (Arm's length requirement).

> tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.
> (3) Condition A is that the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.
> (4) Condition B is that the transfer and any associated operations—
> (a) were genuine commercial transactions, and
> (b) were not designed for the purpose of avoiding liability to taxation.

Old Condition A refers to any "relevant transactions" and Old Condition B refers to "the transfer and any associated operations" (which comes to the same thing).[77] The transfer and associated operations in issue must each separately satisfy the motive test if the motive defence is to apply. One does not group the transfer and the associated operations together, and look for a single main purpose of the group.

52.27.1 *Operations subject to motive test: Critical operations*

The first task is to identify the associated operations to which the motive test must be applied. For pre-2005 transactions (which are not affected by the 2006 reforms) the statute refers to "*any* associated operations" but this is a reference only to associated operations as a result of which a charge arises under s.720 or s.731 ITA. That is, in other words, the associated operations which must be relied on in order to satisfy the conditions set out in those sections. That is, the transfer and operations as a result of which:

(1) (in any case) income accrues to the person abroad; and
(2) (a) (in a s.720 case) the transferor has power to enjoy; or
(b) (in a s.731 case) the individual receives a benefit, or income can be used to benefit them.

The INT Manual provides:

> **INTM602800 All relevant transactions post-4 December 2005 transactions** [Jul 2023]
> ...*Herdman* ... found that associated operations are in broad terms only

[77] Because the term "relevant transactions" is defined to mean the transfer and associated operations; see 48.12 (Why associated operations matter). The difference in the wording of old condition A and B is just a drafting quirk without difference in meaning.

taken into account in applying the purpose test if they involve avoidance and create either a new source of income or a new power to enjoy income.

I refer to an associated operation which meets these criteria as a "**critical operation**".

There may and generally will be other operations associated with the transfer, but unless they are critical operations they are irrelevant and should be ignored.

In *Herdman v IRC* 45 TC 394:

(1) T transferred shares to an Irish company (the person abroad) in consideration of an issue of new shares and a loan. This was an innocent transfer (the purpose was to avoid Irish tax).

(2) The company accumulated income. This was (arguably) an operation associated with the transfer, and the purpose was (then) regarded as UK tax avoidance.[78]

The motive defence was upheld. Lord Reid said:

> [1] It was admitted by Counsel that [what is now s.720] can only apply if [T] has "by means of" these operations "acquired any rights by virtue of which" he had "power to enjoy" this income during the relevant period. I think that Counsel was clearly right in making this admission.[79]
>
> [2] I cannot see how it can be said that [T] acquired any rights at all by means of these associated operations. By means of the transfer of the shares to the new company he acquired two rights. He acquired shares in the new company in the Republic and he became an unsecured creditor of that company for over £76,000. Neither right gave him any right in or to particular assets of the new company. The way in which that company dealt with its assets did not alter

[78] After *Willoughby* the purpose should be regarded as mitigation and not avoidance.

[79] Section 412 ITA 1952 then provided (so far as relevant):

"For the purpose of preventing the avoiding by individuals ordinarily resident in the UK of liability to income tax by means of transfers of assets by virtue or in consequence whereof, either alone or in conjunction with associated operations, income becomes payable to persons resident or domiciled out of the UK, it is hereby enacted as follows:- (1) Where *such an individual has by means of any such transfer, either alone or in conjunction with associated operations, acquired any rights by virtue of which he has ... power to enjoy ...* any income of a person resident or domiciled out of the UK ... that income shall, ... be deemed to be income of that individual ...."

> either of these rights. It may have made them more valuable and it may have made it easier for the company to pay its debts, but it did not change [T's] rights.[80]

Point [1] states the law (only critical operations need pass the motive test) and point [2] applies it to the facts of the case (the operations in that case were not critical).

The statement of law at [1] needs to be translated to reflect the revised statutory wording, which was recast in 1969, and rewritten in 2007, but the principle (that only critical operations need pass the motive test) survived the 1969 reforms.[81] Indeed, perhaps the principle was (slightly) more clearly stated under ITA than it was under ICTA, because of the words in s.739(2): An individual is not liable for income tax under this Chapter ... *by reference to the relevant transactions* if condition A or B is met. It is only the transactions *by reference to which the ToA provisions apply* which need to meet old condition A and B.

In *Carvill v IRC*:[82]

(1) T transferred assets to a Bermudian company (B Ltd) in exchange for its shares, so T was a majority shareholder in B Ltd ("the original transfer").
(2) T became a 100% shareholder in B Ltd by (a) purchasing shares from other shareholders and (b) B Ltd purchasing its own shares.
(3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were held not to be associated operations, but if they had been associated operations it would not have mattered as they were not critical operations. No income arose to B Ltd because of those operations and T did not acquire a power to enjoy because of them.[83]

HMRC accept this. RI 201 provides:

> The law was amended in 1969 following a decision of the Courts (in *IRC v Herdman* 45 TC 394) that only the transfer and any associated operations giving a power to enjoy at the outset were relevant for determining whether the terms of [the motive defence] were satisfied. The amendment to the legislation sought to bring all associated

[80] 45 TC 394 at p.413.
[81] See 52.28.1 (The 1969 reform).
[82] [2000] STC (SCD) 143 at [80]–[85], 75 TC 477 (Special Commissioners).
[83] See [81]-[83].

> operations into consideration when [the motive defence] was invoked. Because of doubts[84] expressed as to the effectiveness of this amendment, it has been the Revenue's practice in considering whether a defence under [the motive defence] is available to *consider only the transfer and any associated operations which directly establish a power to enjoy the income of the overseas person under any particular sub-head in [s 723 ITA].*

The last sentence goes too far and is not to be taken literally. Suppose:
(1) T transfers assets to a UK trust by an innocent transfer, and
(2) Foreign trustees are appointed (an associated operation)[85] for tax avoidance purposes.

It may be said that the associated operation does not establish a power to enjoy the income of the trust. But the associated operation is a critical one (since it causes income to accrue to the person abroad) so the motive defence does not apply.

Suppose:
(1) T transfers assets to a non-resident company in return for shares in that company ("the first transfer"). Suppose the first transfer is innocent (no tax avoidance purpose). Income accruing to the company is not caught by the ToA provisions as the motive defence applies.
(2) T transfers the shares in that non-resident company to a non-resident trust ("the second transfer"). The second transfer has a tax avoidance purpose.

The second transfer is an operation associated with the first. But that associated operation is not a critical operation. Income accrues to the non-resident company as a result of the first transfer. It does not accrue as a result of the first transfer in conjunction with associated operations.[86]

[84] "Doubts" seems a tendentious way to refer to a view based on a decision of the Special Commissioners from which the Revenue did not appeal; see 52.28.1 (The 1969 reform). But there it is.

[85] See 48.13.2 (Transfer to trust + trust migration pre-2006) and 48.13.4 (Transfer to co + co migration).

[86] Of course income arising to the trustees as a result of the second transfer is caught by the ToA provisions. The fact that the first transfer was innocent does not help. This is self-evident but if authority is needed see the decision of the Special Commissioners in *IRC v McGuckian* 69 TC 1. There was (wisely) no appeal on that point.

Take the same transactions, but assume that the first transfer (to the company) had a tax avoidance motive, and the second transfer (to the trust) was innocent. Income of the company is within the ToA provisions. The motive defence does not apply. It is not enough to find an innocent associated operation. Dividends from the company to its shareholders are caught since the income arises by virtue of the tainted transfer to the company and an associated operation (the dividends).

The INT Manual provides:

> **INTM602700 By reference to transactions** [Jul 2023]
> ...Taking each of the potential charges this can perhaps be summarised as shown below.
>
> **Income charge – power to enjoy**
> The transactions to be taken into account are
> [1] those that result in income becoming payable to a person abroad together with
> [2] those other associated operations, if different, which result in the individual having the power to enjoy the income.
>
> Income charge – receipt of/entitlement to capital sums
> The transactions to be taken into account are
> [1] those that result in income becoming payable to a person abroad, together with
> [2] those other associated operations, if different, which result in the individual receiving or being entitled to receive a capital sum.
>
> **Benefits charge**
> The transactions to be taken into account are
> [1] those that result in income becoming payable to a person abroad together with
> [2] those other associated operations, if different, which result in the individual receiving a benefit provided out of assets available for the purpose by reason of such transactions.
>
> From this it can be seen that in some instances the same transactions may result in income becoming payable and also give the power to enjoy the income, the entitlement to a capital sum, or result in receipt of a benefit. In other instances, there may be two sets of transactions, one leading to the income that becomes payable, the other to the power to enjoy, entitlement to capital sum or receipt of benefit. Whichever circumstance applies, the individual will need to have regard to all the transactions in showing how the particular test is met.
>
> In examining the actual conditions for exemption at INTM602760 onwards, it will be seen that there may also be further associated operations, apart from those described above, that fall to be taken into account in considering whether particular conditions are met. These further associated operations will need to be considered, for all transactions after 4 December 2005 following the changes introduced in the Finance Act 2006. Where that is the case, then the individual will need to satisfy HMRC in relation to all those transactions.

Although constructed differently, the pre-Finance Act 2006 legislation also took a transactional approach to the avoidance purpose exemption test. It required the individual to show that the conditions were met in relation to the transfer of assets, or associated operations, or any of them, or in relation to the transfer of assets and any associated operations. There is more about this at INTM602760 onwards, which consider the conditions for exemption.

Under the former legislation not every transaction will necessarily fall to be taken into account. Normally it will only be those that contribute to an outcome that falls within the conditions for a charge, such as those transactions which result in income becoming payable, or those which give the power to enjoy income, entitlement to capital sum or receipt of a benefit. For those that are within the provisions, the individual will be required to show that the conditions for exemption are met.

The principle that it is only transactions that lead to the particular outcomes which fall to be considered is demonstrated by the 1969 decision of the House of Lords in *Herdman v CIR* (45 TC 394). Although that case was on legislation (ITA 1952) constructed somewhat differently from that in ITA 2007 or ICTA 1988 the broad thrust of the principles demonstrated is the same as the approach set out in the bullets above.

In that case the Special Commissioner had found that a transaction which brought about income becoming payable to a person abroad, and which gave power to enjoy it, satisfied on the evidence available the conditions for exemption. There were however further transactions whose purpose would not have satisfied the test for exemption, but those transactions neither resulted in income becoming payable to a person abroad nor gave the individual any new or additional power to enjoy income. The House of Lords accepted the reasoning of the Court of Appeal in concluding that these additional transactions did not fall to be taken into account. Lord Chief Justice MacDermott in giving his decision, which was endorsed by the House of Lords, said (at pages 406/407) in commenting on and accepting the exposition given by counsel for the appellant:

> My reasons for this view may be enumerated as follows
>
> (I) The conditions which bring subsection (1) [ITA52/S412(1)] into force and make the income of the non-resident person chargeable as that of the individual concerned depend upon a true alternative, upon the effect of either (i) the transfer of assets alone or (ii) that transfer in conjunction with associated operations. If (i) applies (ii) does not.
>
> (II) If subsection (1) is brought into force by the transfer of assets alone, subsection (3) [the motive defence] must be applied accordingly and so that the taxpayer will escape from liability under subsection (1) on proving that the purpose of the transfer was not tax avoidance. In such a case any operation which is an "associated operation", in the sense of being within the definition in subsection (4), will fall outside subsection (1) and outside subsection (3) as well.

He went on to expand his reasoning into the facts of the particular case which indicated the extent of the transactions that resulted in income becoming payable and the individual having the power to enjoy that income. No other transactions fell to be considered.

> HMRC confirmed the use of this principle in a Tax Bulletin article in 1999 in relation to the 'power to enjoy', saying that, "it has been the Revenue's practice in considering whether a defence under section 741 [ICTA 1988] is available to consider only the transfer and any associated operations which directly establish a power to enjoy the income of the overseas person under any particular sub-head in section 742(2) [ICTA 1988]".
>
> But there are some instances within the specific conditions where a wider approach is required and individuals will need to take this into account in providing the information required about transactions in their tax returns.
>
> Specifically, FA 2006 introduced a new provision ITA07/S737(8) which will be considered further in the detailed conditions. This means that the individual may now have to disclose to HMRC additional associated operations which may not result in outcomes that meet the requirements for a charge. This is because the new provision reversed the principle in Herdman - for transactions taking place on or after 4 December 2005. It is important therefore that the individual, who is seeking to show that the conditions for exemption are met, properly identifies all the transactions that must be taken into account and provides the appropriate facts about each.

52.28 Post-2005 transfer + associated operations

It is quite common that a transfer is made by a foreign settlor for foreign beneficiaries, for unimpeachably non-UK tax reasons, and later some of the beneficiaries move to the UK. Then they will find the trust qualifies for the motive defence and is a useful vehicle for income tax purposes. There are three possibilities:

(1) The change of purpose may be accompanied by a new transfer of assets carried out for a tax avoidance purpose. In that case the transfer of asset provisions may apply in relation to the new transfer.

(2) There may be no further transfer of assets but there may be associated operations carried out for a tax avoidance purpose. The question then is whether this brings the transfer of asset rules into operation

(3) There may be a change of purpose without any new transfer or associated operation. In that case the motive defence remains available and the transfer of assets provisions do not bite at all.

52.28.1 *The 1969 reform*

To understand the current law, it is necessary to know its history. We start in1969, when the first attempt at reform was made. Harold Lever (then Financial Secretary to the Treasury) argued:

> If we are to have a section [720 ITA], it has to bite on all settlements abroad which at any time are used for avoidance of tax even though

> originally started for innocent purpose. Supposing a man has transferred money to set-up a Bible society in Bulowayo and his heir being more sophisticated and perhaps more materialistic, finds himself with a settlement set up for unimpeachable purposes and decides that it would make a useful vehicle for the avoidance of all income tax and surtax. The *Herdman* decision meant that section [720] would not prevent this. Clause 27 [FB 1969] therefore knocks out the *Herdman* decision and I think that the hon. and learned Gentleman would be fair enough to say that that is reasonable.[87]

The example is facetious (Lever was known for his wit). The common (if less exotic) example is that:

(1) a settlement is set up by a foreign settlor for foreign beneficiaries; and
(2) subsequently beneficiaries or settlor come to the UK.

If this was not envisaged at the time of the settlement, HMRC must concede that the original transfer satisfies the motive defence. Nothing that happened later would alter that defence. So, as Morritt LJ commented in *IRC v Willoughby* 70 TC at p.97:

> In the FA 1969, legislation was enacted, s.33, to nullify the [Herdman] decision ... on the point.

However, the Special Commissioners rejected this in an unreported decision.[88] Thus the 1969 Act failed to achieve its intention.

52.28.2 *The 2006 reform*

HMRC tried again in what I call **"the 2006 reform"** (it was introduced by FA 2006, though with effect from December 2005). Section 737(8) ITA provides:

> If—
> (a) apart from this subsection, an associated operation would not be taken into account for the purposes of this section, and
> (b) the conditions in subsections (2) to (4) [New Conditions A and B] are not met if it is taken into account, because of—
> (i) the associated operation, or
> (ii) the associated operation taken together with any other

[87] Hansard, 17 July 1969, cols 955–6.

[88] If any reader could supply a copy, it would be interesting to see it; though unreported Special Commissioner decisions cannot be cited as precedents: *Ardmore v HMRC* [2014] UKFTT 453 at [9] - [23].

> relevant transactions,
>
> it must be taken into account for those purposes.

The INT Manual provides:

> **INTM602800 All relevant transactions post-4 December 2005 transactions** [Jul 2023]
>
> ...The provisions reverse the effect of *Herdman* (INTM602640) which found that associated operations are in broad terms only taken into account in applying the purpose test if they involve avoidance and create either a new source of income or a new power to enjoy income. The new provision requires all associated operations with an avoidance purpose to be taken into account when applying the exemption test.
>
> In the past, structures such as family trusts were sometimes transformed into avoidance vehicles, with the associated operations carefully designed so that they could not be said to create new income flows or new power to enjoy income. The tax planners contended that HMRC could not apply the legislation against these structures even though they were clearly abusive.

The language is reminiscent of Harold Lever's comments in 1969.

EN Draft Clauses (2005) explained:

> certain associated operations that might potentially be disregarded when applying the [pre-2005 motive defence] have to be taken into account for the purposes of the new test. These are associated operations that have an avoidance purpose, but might not directly affect the application of the charging provisions.[89]

A post-4 December 2005 transfer which qualifies for the motive defence loses that defence if:

(1) there is an associated operation;

(2) that operation does not satisfy New Condition A or B.

Trusts and companies which qualify for the motive defence must ensure that from 5 December 2005 any acts by them meet Condition A (or Condition B if relevant). In short, they should not make associated operations which might be regarded as having a tax avoidance purpose.

[89] Para 62.The explanation in EN FB 2006 is more curtailed. The provision alters the former law. EN Draft Clauses (2005) claimed (outrageously) that this change was "clarifying and confirming the correct interpretation of the existing statute" but that was inconsistent with RI 201, and EN FB 2006 more or less abandoned that position; see App.1.2 (Clarify/modernise/reform).

It is important that new associated operations do meet the New Conditions. The effect of the rules may be harsh.

These conditions are extremely difficult to apply; this may be why almost 40 years passed before the second attempt to alter law established in 1969. The Blair/Brown administrations, it seems fair to say, were unaware or unconcerned about uncertainty and complexity in tax legislation, particularly anti-avoidance legislation.

52.28.3 *Clean break test*

The first task is to identify the associated operations to which the motive test must be applied. For post-2005 transactions the statute refers to "*an* associated operation" and it is clear that some operations which are not critical operations (under the old law) are now made subject to the motive test.

The task is to identify what counts as "an associated operation" for the purposes of s.737(8) ITA. The statutory definition of associated operation does not answer this as if it is read literally it is far too wide to be workable. Suppose in 1096 a Crusader transferred land to trustees to avoid feudal duties, and in 2000 the land is again transferred to trustees. The 1096 transfer is an operation historically associated with the 2000 transfer.[90] It cannot be that the Crusader's (arguable)[91] tax avoidance purpose would prevent the transfer in 2000 from qualifying for relief!

There must obviously be some connection between the associated operation and the transfer: mere historical association cannot be enough.

It is suggested that the courts ought to impose a clean break test.[92] One might refer to associated operations where there is no clean break as **"truly associated"**. In this terminology, truly associated operations must satisfy new conditions A and B, in order to qualify for the motive defence, and the effect of the 2006 reform is to extend the motive test from critical operations to truly associated operations. But the expression "associated operations" is sufficient because where there is a clean break the operations should not be regarded as associated for the purposes of the

[90] See 48.11 (Associated operation: definition).

[91] Feudal duties would be "taxation"; see 52.9 (Meaning of "taxation"). I forbear to consider the question whether it would be reasonable to assume that the 1096 transfer was avoidance, or mitigation, of feudal duties (and would that depend on attitudes to taxation in the Middle Ages or contemporary attitudes?).

[92] See 48.13.1 (A transfers to B + B to C: clean break test).

ToA rules.

52.29 Associated operations: Avoidance purpose

Note the extreme consequences of an associated operation motivated by tax avoidance. Even if the associated operation concerns only a small amount, the *entire* trust[93] may lose the benefit of the motive defence. This unfairness ought to colour the approach of the courts to construing the section.

52.29.1 *Investment transactions*

Buying and selling investments in the ordinary course of managing investments is not tax avoidance.

Suppose trustees wish to invest in UK equities, but do so via a UK unit trust or OEIC in order to hold property which is excluded property for IHT. The acquisition of a unit trust or OEIC is not tax avoidance. It is considered that the position is the same if the trustees acquire a non-UK unit trust or OEIC to avoid UK source income.

Suppose a trust, all of whose beneficiaries are abroad, wishes to invest in UK (non-residential) land. The trustees invest via an underlying company in order to avoid inheritance tax and reduce tax on the property income from the trust rate to the basic rate (pre 2020) or the CT rate (post 2020). It is suggested that this is mitigation rather than avoidance. If this is not the case, then the effect on the UK economy could be quite remarkable. Well-advised trustees would avoid investing in UK land in order to retain the motive defence. On the other hand, if land was purchased using an artificial SDLT avoidance scheme, that would be caught. The transfer of existing land to a company would be caught.

52.29.2 *Methods of distribution*

It is considered that retention of income within a company is not an "operation" but even if it is, it would not constitute tax avoidance.

It is considered that accumulation of income in a common form discretionary trust[94] is not an "operation" but even if it is, it would not be tax avoidance.

[93] More accurately, the entire transfer of assets abroad; but it will normally come to the same thing.

[94] A trust to accumulate income with power to distribute. Under a trust to distribute with power to accumulate, accumulation would constitute an "operation". But that is not the usual form.

Suppose a discretionary settlor-interested trust is within the motive defence, and the settlor is UK resident. The trustees retain trust income abroad (if it was remitted to the UK there could in some cases be a tax charge under the s.624 remittance basis). This is not tax avoidance.[95]

Suppose a discretionary trust is within the motive defence. A foreign domiciled beneficiary is UK resident. Trustees may in principle transfer funds to a beneficiary in the following ways:

(1) Outright distribution:
    (a) Distribution of trust capital
    (b) Distribution of trust income (which may be generated by a distribution from an underlying company)
(2) Loan (interest-free or on favourable or arm's length terms)

These options have different tax consequences but each of them are straightforward everyday methods of transferring funds from the trust to a beneficiary. None are tax avoidance which could cause the motive defence to be lost. There is no reason to say that any of them are "contrary to the intention of parliament".[96] This is so even if, for instance:

(1) A capital distribution is chosen in order to avoid an IT charge on an income distribution
(2) A loan on arm's length terms is chosen to avoid an IT/CGT charge on a capital payment
(3) A dividend is paid and accumulated by trustees, and the shares in the company (devalued by the dividend) are distributed to a beneficiary without a gain accruing on the disposal of the shares.

This is not to say that a loan or trust/company distributions cannot constitute avoidance. But they would have to be part of some wider arrangement. Examples are:

(1) Loans:
    (a) Trustees lend unsecured to a beneficiary in circumstances where the beneficiary is insolvent or so lacking in assets that the beneficiary is not likely to repay the sum lent.[97]

[95] See 18.55 (Remittance basis planning). The point is less likely to arise under the protected-trust regime, but it still matters for the past.

[96] Contrast the GAAR guidance that "trustees are entitled to organise distributions in a way that minimises tax for the beneficiaries within the range of normal tax planning"; see 61.57 (GAAR guidance).

[97] See 3.21.2 ("Artificial/devices"). Alternatively the loan in such a case may be categorised as an outright distribution.

(b) The borrower is told that a loan repayment is not going to happen in practice.[98]

(2) Trustees exercise a power to accumulate income, and then immediately exercise a power to distribute it as capital, in circumstances where the straightforward course would be to distribute as income.[99]

(3) A shareholder sells the right to a dividend to a non-resident for a capital sum.[100]

Suppose a non-resident company owned by a non-resident individual pays a large dividend the year before the individual becomes UK resident.[101] That is not tax avoidance. But if the individual lends the proceeds back to the company, interest free, that is a circular and artificial transaction, and the arrangement may be regarded as avoidance.[102]

52.29.3 *Inter-group transactions*

It is helpful to refer to the whitelist of transactions which HMRC accept

[98] Contractor loan schemes offer an example. In *HMRC v Hyrax Resourcing* [2019] UKFTT 175 (TC) scheme documentation was frank:

> "Do I have to repay the loan? In practice, extremely unlikely. Nearly 25,000 businessmen and contractors have used this mechanism and on-one has yet had to repay it. However, there needs to be the POSSIBILITY of repayment, otherwise it would not be a loan". See [162] - [178].

But many other facts in *Hyrex* also supported the conclusion of avoidance. See too 52.25 (Employee benefit trusts).

[99] Alternatively the distribution may in fact be categorised as income.

[100] *McGuckian v IRC* 69 TC 1 at p.81: "It is now necessary to consider how the composite transaction should be categorized. The declaration of the dividend was an ordinary commercial decision. But the other steps-the assignment [of the right to a dividend to the purchaser], the payment [of the dividend to the purchaser] and the payment [of the purchase price by the purchaser to the shareholder]—were not taken for any business or commercial reason. Those steps were taken in order to avoid tax. I would respectfully differ from the conclusion of Sir Brian Hutton LCJ and Carswell LJ. that the assignment was "the whole substance and raison d'etre of the transaction". Like Kelly LJ I am satisfied that the assignment was merely a means to an end, a step taken in an attempt to achieve the payment [to the shareholder] as capital. Tax avoidance was the only conceivable explanation for the assignment."

[101] It is assumed that the temporary non-resident rules do not apply.

[102] Transactions in securities would also need consideration; see 55.1 (Transactions in securities).

as outside the SDLT group relief TAAR.[103] SDLT Manual provides:

> **SDLTM23040 Para 2(4A) Sch 7 FA 2003** [Nov 2019]
> ... This guidance gives some examples of transactions where it is accepted that group relief is not denied by Para 2(4A) Schedule 7 FA 2003.
> It should be noted that the examples are intended only to give general guidance and do not use technical or statutory language, nor should they be interpreted as if they were a statute.
> They also assume that the transactions described do not form part of any larger scheme or arrangement which might have tax consequences....
> **Examples of transactions where group relief is not denied by Para 2(4A) Schedule 7 FA 2003[104]**
> (1)-(3): The transfer of a property to a group company having in mind:
> (1) the possibility that shares in that company might be sold more than three years after the date of transfer
> (2) the possibility that shares in that company might be sold within three years of the date of transfer, with a consequent claw-back of group relief, in order that any increase in value of the property after the intra-group transfer might be sheltered from SDLT
> (3) the possibility that either of the above might occur
> (4) The transfer of a property to a group company prior to the sale of shares in the transferor company, in order that the property should not pass to the purchaser of the shares
> (5)(6)(10) The transfer of property to a group company in order that:
> (5) commercially generated[105] rental income may be matched with commercially generated losses from a property income business
> (6) commercially generated[106] chargeable gains may be matched with commercially generated allowable losses
> (10) The transfer of property to a group company in order that interest payable on borrowings from a commercial lender on ordinary commercial terms may be set against commercially generated* rental income
> (7) The historic transfer of property to a non-resident group company in the

[103] Para 2(4A) Sch 7 FA 2003 provides:

> "Group relief is not available if the transaction—
> (a) is not effected for bona fide commercial reasons, or
> (b) forms part of arrangements of which the main purpose, or one of the main purposes, is the avoidance of liability to tax.
> "Tax" here means stamp duty, income tax, corporation tax, capital gains tax or [SDLT]."

[104] I have reformatted and amended slightly for greater clarity.

[105] Footnote original: Including income, gains and losses which are generated intra-group on transactions which would have been commercial had they been entered into by unconnected third parties.

[106] See above footnote.

anticipation that future appreciation or depreciation[107] in value would be outside the scope of UK tax on chargeable gains

(8) Transactions undertaken as part of a normal commercial securitisation

(9) The transfer of the freehold reversion in a property to a group lessee in order to merge the freehold and the lease, and thus prevent the lease being subject to the wasting assets rules as respects corporation tax on chargeable gains

(11) Borrowings on ordinary commercial terms

(a) from a commercial lender, or

(b) intra-group in circumstances which would have been commercial had they arisen between unconnected third parties

"Transfer" means the transfer of a freehold, in Scotland ownership of land, or the assignment, in Scotland assignation, of a lease.

Cases involving the grant of a lease will need to be considered on their facts.

The list provides examples of where, although a tax advantage might be obtained by the purchaser's group, SDLT group relief will not be denied subject to the warning that 'the transactions do not form part of any larger scheme or arrangement which might have tax consequences'

In determining whether the transaction forms part of arrangements of which the main purpose, or one of the main purposes, is the avoidance of tax, it is necessary to consider relevant case law.

Whether or not a sequence of steps constitutes avoidance is also informed by FA 2003 sections75A to 75C. HMRC Stamp Taxes acknowledge that deciding to sell shares rather than land so as to pay less tax or SDLT (see paragraph D2.2.1 of HMRC's General Anti-Abuse Rule Guidance as approved by the Advisory Panel with effect from 15 April 2013) represents a straightforward legislative choice and is not, of itself, objectionable.

HMRC approach

The HMRC aim is to give a consistent message to all taxpayers. Where it is possible to identify fact patterns that do not fall within the scope of the TAAR and therefore do not present a risk, HMRC are happy to make this clear. The current guidance including the list of transactions where group relief would not be denied continues to reflect HMRC position. However, there are, as always, a number of events involving a transaction for which group relief may be claimed and which HMRC may wish to raise an enquiry. In any case where an avoidance scheme is disclosed or there is evidence suggesting the implementation of an avoidance scheme, HMRC will raise an enquiry.

To promote greater certainty in HMRC Stamp Taxes approach in the application of FA 2003 Schedule 7 paragraph 2(4A)(b), HMRC Stamp Taxes confirmed the following, with the warning that the presence of steps in addition to those described below may indicate, when taken together, that there are arrangements of which the main purpose or one of the main purposes is avoidance of tax:

[107] Author's footnote: At first sight the reference to depreciation seems strange. Perhaps the point is that the transfer is part of a package, with tax advantages (in the appreciation in value not taxed) and disadvantages (no relief for depreciation).

> A business may choose to acquire a property-owning company as opposed to acquiring the property from that company.
>
> The purchaser may, after acquiring the company, transfer the property out of the company acquired and into a different company in the purchasing group. HMRC do not regard that of itself, and subject to the list of transactions above, as resulting in the avoidance of tax such that FA 2003 paragraph 2(4A)(b) would be in point, even if the acquisition of the property-owning company and the subsequent intra-group transfer of the property formed part of the same arrangements.
>
> The purchaser may, after acquiring the company and transferring the property intra-group, liquidate, wind-up or strike-off the company acquired. HMRC do not regard that of itself as resulting in, or being evidence of, the avoidance of tax such that FA 2003 paragraph 2(4A)(b) would be in point, even if the liquidation, winding-up or striking-off formed part of the same arrangements that also included the acquisition and the intra-group transfer.
>
> In the events described above, the FA 2003 paragraph 2(4A)(b) analysis would be the same even if the purchaser only became a member of a group for SDLT purposes as a result of the acquisition of the property-owning company.

It is difficult to take item (7) seriously, but even apart from that, it appears that HMRC do not strain to classify a group's ordinary tax planning as avoidance.

52.30 Income after tainted operation

Where there is a tainted operation associated with a transfer, all the income arising as a result of the transfer in principle comes within the scope of ss.720 and 731. If there is an innocent transfer of £10m, and a tainted operation of £10,000, all the income of the £10m comes into charge.

HMRC may not in fact take that view. The INT Manual provides:

> **INTM602800 All relevant transactions post-4 December 2005 transactions** [Jul 2023]
>
> Where a structure meets the requirements for exemption and an associated operation involves only a minor element of avoidance, if the associated operation producing 'tainted' income is only a small proportion of the income of the total structure, it may be appropriate to charge only the income from the 'tainted' source, thus applying the legislation in a proportionate way (see INTM602860).

52.30.1 *Partial exemption relief*

Section 741 ITA provides a very limited relief:

> (1) Section 742 (partial exemption where later associated operations fail

> conditions) applies if—
> (a) an individual is liable to tax[108] because of section 720 or 727 for a tax year (the "taxable year") because condition B in section 737(4) (genuine commercial transaction: post-4 December 2005 transactions) is not met, and
> (b) subsections (2) and (3) apply.

The relief only applies for s.720 (and 727) and not for s.731 ITA.

Section 741 continues:

> (2) This subsection applies if—
> (a) since the relevant transfer there has been at least one tax year for which the individual was not so liable by reference to the relevant transactions effected before the end of the year, and
> (b) the individual was not so liable for that year because—
> (i) condition B in section 737(4) was met, or
> (ii) condition B in section 739(4) (genuine commercial transaction: pre-5 December 2005 transactions) was met.

The relief only applies if Condition B is satisfied; not if Condition A is satisfied. In practice New Condition B is hardly ever satisfied.

Section 741 continues:

> (3) This subsection applies if the income by reference to which the individual is liable to tax for the taxable year is attributable—
> (a) partly to relevant transactions by reference to which one of those conditions was met for the last exempt tax year,[109] and
> (b) partly to associated operations not falling within para (a).

Assuming the conditions of s.741 are satisfied one moves on to the relief in s.742:

> (1) If this section applies, the individual is liable to tax under this

[108] "Liable to tax" is defined in s.741(5) ITA:
"References in this section to a person being liable to tax for a tax year because of section 720 or 727 include references to the individual being so liable had any income been treated as arising to the individual for that year under section 721 or 728."

[109] Defined in s.741(4) ITA:
For the purposes of this section a tax year is exempt if—
(a) it is one of the tax years mentioned in subsection (2), and
(b) there is no earlier tax year for which the individual was liable to tax because of section 720 or 727 by reference to the relevant transactions or any of them.
...

> Chapter only in respect of part of the income for which the individual would otherwise be liable.
> (2) That part is so much of the income as appears to an officer of Revenue and Customs to be justly and reasonably attributable to the operations mentioned in section 741(3)(b) in all the circumstances of the case.
> (3) Those circumstances include how far those operations or any of them directly or indirectly affect—
> (a) the nature or amount of any person's income, or
> (b) any person's power to enjoy any income.

The drafter has given up here. Draft ToA guidance INTM602880 has an example, not set out here, as it raises more questions than answers.

52.31 Income before tainted operation

This section considers how the ToA provisions apply where an innocent post 4-December 2005 transfer is followed by a tainted operation subsequently.

The position where a pre-5 December 2005 transfer is followed by a tainted operation on or after 5 December 2005 raises additional issues discussed at 52.32 (Pre-2005 transfer; post-2005 operation).

52.31.1 *Income pre-tainted op: s.720*

Suppose:

(1) an innocent transfer is made on or after 5 December 2005, and
(2) an associated operation made today fails the New Conditions ("the tainted operation").

At first sight *all* income back to the date of the transfer comes into charge under s.720 ITA.[110] HMRC say that only income of the year in the year of the tainted operation and subsequent years is charged:

> **Transitional arrangements, whether income charged retrospectively**
> Representation: It is suggested that the transitional arrangements of [s.740 ITA] have the effect that income could be brought into charge retrospectively. [Section740(4) ITA] could be interpreted as meaning that if an associated operation after 5 December 2005 fails the exemption test in [s.737 ITA], all of the income arising from 5 December 2005 could be charged (even where the subsequent associated

[110] In practice HMRC would be limited to a four year period.

operation takes place many years later).
Response: The legislation does not apply retrospectively in the manner suggested. [Section741C ICTA][111] provides the general rule that [s.720] applies in this type of case as it would apply apart from [s.736 to 742 ITA]. In those circumstances [s.720] would take the income arising in the relevant year of assessment.[112]

This is far from clear in the legislation, but it is a sensible result.

52.31.2 *Income pre-tainted op: s.731*

Suppose:
(1) An innocent transfer was made on or after 5 December 2005.
(2) A tainted associated operation is made subsequently.
(3) An individual receives a benefit in the same year as the associated operation or subsequently.

The individual is taxable under s.731 ITA by reference to all the income which has arisen backdated to the date of the transfer.

Suppose the order of transactions were reversed:
(1) An innocent transfer was made on or after 5 December 2005.
(2) An individual receives a benefit on or after 5 December 2005.
(3) A tainted associated operation is made in a tax year after the benefit is received.

That is, the benefit was received in the year before the tax motivated associated operation. Is the benefit retrospectively subject to tax? It is suggested that the answer is, no. This is consistent with how HMRC understand s.720 to work.

52.32 Pre-2005 transfer; post-2005 operation

Section 740 ITA provides:

> (1) This section applies if the relevant transactions include both pre-5 December transactions and post-4 December transactions.
> (2) An individual is not liable to tax under this Chapter for the tax year by reference to the relevant transactions if—
> (a) the condition in section 737(2) (exemption where all relevant transactions are post-4 December 2005 transactions) is met by

[111] Now s.740(3) ITA. The wording is not quite the same, but that has not altered the position.

[112] HMRC, Letter to representative bodies (7 April 2006).

reference to the post-4 December 2005 transactions, and

(b) the condition in section 739(2) (exemption where all relevant transactions are pre-5 December 2005 transactions) is met by reference to the pre-5 December transactions.

Thus in principle the New Conditions apply to post-4 December 2005 transactions and the Old Conditions to apply pre-5 December 2005 transactions.

An important question is whether the motive defence test must be met:

(1) by all truly associated operations; or

(2) only by critical operations (my terminology).

At first s.737(8) ITA appears to answer the question,[113] but it does not, because s.737(1) provides:

> This section applies if *all* the relevant transactions are post-4 December transactions.

It is suggested that the *Herdman* principle still applies to pre-5 December 2005 transfers even if the operation takes place subsequently. That is, even after 2005, only critical associated operations have to pass the motive test and other associated operations are ignored.

This view does not deprive s.740 ITA of meaning, for it governs the position where there are post-4 December 2005 critical operations. For instance, suppose:

(1) there was a transfer to a UK trust (an innocent transfer) before 5 December 2005;

(2) non-resident trustees are appointed (a critical association operation) post-4 December 2005.

In deciding whether the motive defence applies one asks whether the associated operation satisfies New Conditions A and B.

The position is not clear cut and HMRC could make the following points:

(1) Section 740(2)(b) incorporates s.737(2) the New Conditions A and B, but by doing so it necessarily incorporates s.737(3) to (7) which supplement s.737(2). So it is possible to say that s.740(2)(b) also incorporates s.737(8).

(2) The transitional rules in s.740, see below, arguably make better sense

[113] See 52.28.2 (The 2006 reform).

if s.727(8) is applied.

But the rules are so harsh that it is suggested that the taxpayer-favourable construction is to be preferred. ICAEW agree:

> 82. ... We appreciate that HMRC would like to interpret the FA 2006 legislation as reversing the decision in *IRC v Herdman* 45 TC 39 for both pre 5 December 2005 transactions and transactions on or after that date. This appears to be the line taken in the draft guidance.
> 83. We do not believe that it is correct technically as the FA 2006 modification to the legislation was only contained in the legislation for the new motive defence which should only be applied if the associated transfer is a relevant transfer and it is submitted that case law provides that where the original transfer occurred prior to 5 December 2005 it will be the *Herdman* principle that determines whether an associated transfer is a relevant transfer (that is whether the transfer has contributed to the charging provision conditions being met). In addition we view the HMRC interpretation as disproportionate and so there are EU law issues.[114]

52.32.1 *Transitional rule: s.731*

Section 740(3) ITA provides:

> If subsection (2)(b) applies but subsection (2)(a) does not, this Chapter applies with the modifications in subsections (4) to (6).

This brings in three transitional rules where:
(1) the pre-5 December 2005 transactions met the Old Conditions; but
(2) post-4 December 2005 transactions do not meet the New Conditions.

Section 740 ITA provides:

> (5) In determining the relevant income of an earlier tax year for the purposes of section 733(1) (see Step 4), it does not matter whether that year was a year for which the individual was not liable under section 731 because of section 739 or this section.
> (6) For the purposes of Step 1 in section 733(1), a benefit received by the individual in or before the tax year 2005–06 is to be left out of account.
> (7) But, in the case of a benefit received in the tax year 2005–06, subsection (6) applies only so far as, on a time apportionment basis, the

[114] Response to HMRC consultation "Transfer of assets abroad: draft guidance" (2013).

benefit fell to be enjoyed in any part of the year that fell before 5 December 2005.

HMRC supply a worked example, see 50.18.9 (Computation: Motive defence lost).

Suppose:

(1) An innocent transfer is made before 5 December 2005.
(2) A tainted associated operation is made on or after 5 December 2005.
(3) An individual receives a benefit in the same year as the associated operation or subsequently.[115]

The beneficiary is taxable under s.731 ITA by reference to all the relevant income from the date of the transfer (or from 1981, if later). This harsh rule was actually intended. EN FB 2006 para 33 provides:

> [The effect of s.740(5) ITA is:] for the purposes of [s.731 ITA] where the individual receives a benefit in a year of assessment ending after 5 December 2005, the process of determining relevant income under the general rule for years up to and including that year must take account of relevant income that arose in years of assessment ending before that date, as well as later years.

It will often be impossible for the quantum of relevant income to be ascertained exactly, as the records will not exist. But the issue may in practice be fudged by agreement with HMRC.

52.33 Tax return: Motive defence

52.33.1 *When disclosure required*

The motive defence does not require a formal claim. If there has been an innocent transfer, a taxpayer is entitled and indeed required to complete tax returns on the basis that the defence applies.[116]

However, individuals who complete a self assessment return need to indicate on that return if they have taken advantage of the defence. This is done by completing box 46 in form SA106 (Foreign pages, 2022/23). The rubric for this box (the "motive defence box") states:

> If you've omitted income from boxes 11, 13 and 42 because you're

[115] There is no charge if the benefit is received in a tax year before the operation: see 52.31.2 (Income pre-tainted op: s.731).

[116] See 52.36 (Motive defence: Disclaimer). See also 49.29 (Tax return: s.720 income) and 50.60 (Tax return: s.731 income).

> claiming an exemption in relation to a transfer of assets, enter the total amount omitted (and give full details in the 'Any other information' box on your tax return)

This relates to the two reliefs which the ITA describes as exemptions:[117] the motive defence, and the genuine transaction defence (now lapsed after Brexit).

It is only correct to put an entry in the box if the motive defence is needed. It is not correct to put an entry in the box if the ToA provisions do not apply to impose a charge for some other reason, such as s.720 protected-trust relief, or the s.720 remittance basis, because that is not an "exemption".[118]

It often happens that the motive defence box is left blank when it should be completed, as the need to do so in this "highly complex" area is overlooked. There is no penalty, provided the motive defence applies, as no additional tax is thereby due. It is suggested that an entry should be made in the box on the next tax return, with a note in the "Any other information" box to explain the position.

52.33.2 *What information is required*

Two items of information are required by the rubric to the motive defence box: the "amount omitted" and "full details". (The word "omitted" is somewhat tendentious*;* but perhaps it does not much matter.)

The "amount omitted" for a taxpayer within s.720 is the income of the person abroad, (ignoring unremitted foreign income if the remittance basis applies). For a taxpayer within s.731, the "amount omitted" is the lower

[117] Section 736(1) ITA provides: "Sections 737 to 742A deal with exemptions from liability under this Chapter."

[118] HMRC agree. SA106 Notes (2022/23) provides:

> "**Box 46 If you've omitted income from boxes 11, 13 and 42 because you're claiming an exemption in relation to a transfer of assets, enter the total amount omitted**
>
> Boxes 10 to 13 and box 42 do not apply as long as the purpose of the transfer and any associated operations was not to avoid tax. ... any income attributable to genuine transactions is exempt, where any liability imposed would constitute a restriction on the EU Treaty freedoms (for example, freedom of establishment or freedom of movement of capital).
>
> An exemption is only due if actual income would otherwise be chargeable."

HMRC practice (understandably) is not to investigate or provide a ruling on the motive defence, unless some tax turns on the issue.

of the value of benefits and relevant income (except so far as the s.731 remittance basis applies).

If it is difficult to ascertain the exact figure of "income omitted ", it seems to me reasonable to provide an estimate of s.720 income, or in a s.731 case, an estimate of the amount of the benefit but without quantifying the relevant income. The figure in box 46 is not a figure used in any tax computation. Its purpose is so that HMRC should know the amount at stake in the claim for the defence, and for this purpose a broad indication should be sufficient. If estimated figures are given, this should however be stated. If the person abroad is subject to CT or IT or foreign tax, that might be mentioned as it reduces the amount at stake.

SA106 Notes (2022/23) identifies the "full details" which are required:

> You must give details of
> [1] the assets transferred, and any associated operations,
> [2] the person abroad concerned,
> [3] the circumstances of the relevant transactions and
> [4] the basis of your claim
> in 'Any other information' on page TR 7 of your tax return or on a separate sheet.

On the occasion when the claim is first made, sufficient details should be given for HMRC to review the case, in that and in subsequent years until the motive defence claim is agreed. If and when the claim is agreed, I see no reason to give any details in subsequent tax returns (in the absence of further transfers or relevant associated operations). I suggest the words "n/r" be put in the motive defence box (or if the tax return software does not permit that, leave it blank) and note in the "Any other information" box that since the motive defence claim has been agreed, no figure need be provided in the return as it is irrelevant.

52.33.3 *HMRC response to claim*

RI 201 provides:

> Where such a disclosure has been made and the [motive defence] exemption claimed, the Revenue will make any necessary enquiries about that exemption in the statutory period allowed, and will not seek to reopen that year's return on discovery grounds if the [motive defence] exemption has to be reconsidered in later years.

International Manual explains HMRC's administrative arrangements for dealing with a claim:

> **INTM600050 Transfer of assets abroad: Mandatory referral to SPT Trusts & Estates Nottingham** [May 2020]
> Business Assets and International Technical and Valuation, Bootle is responsible for the operation of the legislation contained in Chapter 2 Part 13 ITA 2007, the provision of Technical Advice thereon and any litigation involving transfer of assets legislation.
> All enquiry work involving possible application of the transfer of assets legislation is undertaken by or in conjunction with the specialist team in WMBC Assets Edinburgh. Fraud Investigation Services and WMBC Wealthy Units also undertake review work in this area in relation to cases handled by them.
> The individual Self Assessment tax return will often be the first point of identification of cases where the legislation may apply, and as such those handling receipt of returns have a vital role to play in identifying potential application of this legislation. Offices should not however attempt to determine liability to the Income Charge or the Benefits Charge or discuss the application of the provisions with agents without first contacting Trusts Compliance, Edinburgh... who will arrange any necessary risk assessment of the case and advise on whether and how this aspect is to be taken forward.
> WMBC (Wealthy CCM teams) and Fraud Investigation Service offices do not have to make a referral of their own cases in accordance with the previous paragraph but should consult with BAI Technical and Valuation Team, Bootle for advice as necessary, and in every case where litigation may be a possibility.....
> **(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

On this basis, one should expect an enquiry, when a claim is first made; but in practice that does not always happen.

52.34 HMRC enquiry on claim

52.34.1 *"Satisfies an officer"*

Section 739(2) ITA provides:

> An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual *satisfies an officer of Revenue and Customs* that condition A or B is met.[119]

The motive defence applies if the individual *satisfies an officer* of HMRC

[119] The same wording is found in new conditions A and B: s.737(2) ITA.

that Condition A or B is met. This wording is language of subjectivity: it suggests that it is not sufficient that condition A or B is met, what matters is that the officer is satisfied in his or her own mind.

However the words have never been understood in that sense. They only impose the burden of proof on the taxpayer. That makes no difference as the burden of proof already rests on the taxpayer.[120] Thus all the words actually mean is:

> An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if condition A or B is met.

The words "satisfy an officer that ..." add nothing.[121]

There is no advance ruling or clearance procedure on the application of the motive defence.[122]

52.34.2 *Evidence*

Contemporary correspondence and background documentation may be relevant to the factual issue of whether the transferor had the purpose of reducing tax. It will not shed much light on the issue of whether the purpose should be classified as avoidance or mitigation. Some factors such as confidentiality or tax related agreements may shed light on this, or at least, on whether the parties regarded the matter as tax avoidance.[123] In *IRC v Willoughby*[124] for instance, the Special Commissioner reviewed sales literature relating to the offshore bonds. In practice, expect HMRC to ask for contemporary documentation. The advisers should review it before making a claim. In the case of a transfer to a trust, this includes:

(1) Trust documentation and letters of wishes
(2) If not evident from the above, details of intended beneficiaries
(3) Details of assets transferred
(4) Contemporary correspondence between trustees, accountants and settlor (Legal advice should be privileged)

[120] See 6.36 (Residence: Burden of proof). And in any event, disputes are rarely decided by the burden of proof: see 4.7.4 (Who bears onus of proof).. But the burden of proof may have been a more important issue when the words were introduced in 1936.

[121] See App 2.24.5 ("It is shown that").

[122] As to the relevance of TiS clearance, see 55.11.3 (Transfer of value by 2 operations).

[123] See 3.20.8 (Other indicia of avoidance).

[124] 70 TC 57.

Often the issue arises many years after the transfer of assets, and the contemporary records have been lost. That should not matter, as secondary material and inferences from common sense should suffice, but efforts should be made to recover original documentation, if only to avoid the suspicion that damaging documents may have been suppressed.

Sometimes contemporary documents are relevant, and it should be borne in mind in their drafting that in the absence of privilege, they will be disclosed. In *Marwood Homes* a note of the meeting provided:

> [The senior tax manager] went through the draft clearance application ... The main change was to "beef up" the commercial justification for the transactions by referring to effect of the dividends being to offset the damage of the solvency of the *Marwood Homes Ltd* balance sheet due to the 1992 loss.[125]

The Tribunal inferred that it was only then that the commercial reason was seen as relevant by the parties (which from the terms of the note seems a possible inference, though not a necessary one).[126]

52.34.3 *Professional privilege*

INTM provides:

> **INTM602680 Individual satisfies an officer of HMRC** [Jan 2023]
> It is often the case that where transactions have taken place that result in a potential liability under the transfer of assets provisions, professional advice will have been taken in relation to the transactions. It is sometimes suggested that such advice cannot be disclosed to HMRC because of legal and professional privilege. More is said on this in the section on information powers from INTM603800 onwards, but there is no specific restriction on the information that an individual can provide to demonstrate that the exemption is due and they can be expected freely to provide it. Where an individual chooses to hold back particulars that may contain material evidence about transactions that would otherwise result in a charge to tax, it may well lead the officer of HMRC to conclude that the conditions for exemption are not met.

HMRC should not draw an adverse inference from a taxpayer's decision to exercise a right to privilege.[127] Privilege is a fundamental human right,

[125] [1999] STC (SCD) 44 at [42].

[126] At [75].

[127] This seems to be accepted in the HMRC Litigation & Settlement Strategy para 13: "HMRC would not normally expect legal professional privilege to be waived."

and it is HMRC's practice not to disclose their own privileged legal advice.

Care is needed before referring to legal advice or other privileged documents, in correspondence with HMRC, as this might amount to waiver of privilege.[128]

52.35 Appeals

Section 751 ITA provides:

> On any appeal that is notified to the tribunal, the jurisdiction of the tribunal includes jurisdiction to affirm or replace any decision taken by an officer of Revenue and Customs in exercise of the officer's functions under—[129]

ITA	*Topic*	*See para*
s.720A(4)/727A(4)	Shareholder-transferors	49.6.2
s.737	Motive defence: post-4 December 2005 transactions	
s.738	Meaning of "commercial transaction"	
s.739	Motive defence: pre-5 December 2005 transactions	
s.742	Later associated operations fail motive defence	
s.742A	Genuine transaction defence [lapsed after Brexit]	
s.743(2)	Double counting relief	51.10

The jurisdiction of the tribunal is appellate and not supervisory. The wording of New Conditions A and B ("... reasonable to draw the conclusion ...") does not impose a *Wednesbury* unreasonableness test on an appeal.

A decision in a tax appeal is, on ordinary principles, binding on the parties only in relation to the assessments under appeal. It does not bind the parties in other respects. In *Carvill v IRC*[130] a Special Commissioner allowed a motive defence appeal even though a previous appeal relating to earlier years had been decided against the taxpayers. The taxpayers then sought to recover from HMRC the tax paid under the earlier

That might depend on what nuance one gives to the word "normally", but the commentary provides:

> "HMRC should not interpret a decision by a customer not to waive LPP over legal advice as a sign of non-collaboration".

https://www.gov.uk/government/publications/litigation-and-settlement-strategy-lss

[128] *Conegate v HMRC* [2018] UKFTT 82 (TC).

[129] For clarity I have set this out in tabular form and with my own wording, rather than as in the statute.

[130] [2000] STC (SCD) 143.

assessments, but this rightly failed.[131] There must be some finality in tax, even when wrong decisions are reached by the courts. That issue will rarely, if ever, arise again in practice.

It may happen that tax has been paid under the ToA provisions for a number of years without consideration being given to the motive defence, and then it occurs to a taxpayer that a motive defence is applicable. It is considered that the principle in *Carvill (No. 2)* only applied where a motive defence had been litigated and decided by the tribunal, and in the absence of litigation on the point it should be possible to put in an error or mistake claim under usual principles.

An appeal will be made by the individual subject to tax (not the trustees or company within s.731 ITA who have no *locus standi*). If the trustees fund an appeal by the individual against assessment under s.731, will that funding constitute a benefit? If so that benefit would be subject to income tax under s.731, (except so far as costs are recovered by a successful appeal). The position depends on the facts. If the reason the trustees fund the appeal is in order to sort out their tax planning for the future, or in order to benefit the entire class of UK resident beneficiaries, then no taxable benefit is received by the appellant: any benefit is received by all UK beneficiaries and there is no rational means of apportionment. At the other extreme, if the trust fund is (more or less) wound up by a capital payment, and the appeal procedure is specifically to benefit one beneficiary, then the trustees financing the appeal would constitute a benefit.[132]

52.36 Motive defence: Disclaimer

There are circumstances where the application of the ToA provisions may reduce a tax charge. In particular, a UK resident transferor who receives a distribution from a non-resident company may be more lightly taxed under s.720: they are taxed on the company's income but has the benefit of tax and tax credits paid by the company, and the distribution is tax free.[133]

[131] See *Carvill v IRC (No. 2)* [2002] EWHC 1488 (Ch) and *Carvill (R, oao) v IRC* [2003] EWHC 1852 (Admin).

[132] Or else it may be subject to CGT as a capital payment.

[133] See 51.5 (Distribution relief).
Also, for completeness, a beneficiary who received a capital payment from an offshore trust before 2008/09 would prefer to be taxed under s.731 than under s.87

Is it possible for an individual to disclaim the motive defence? It seems arguable that the words "the individual satisfies an officer of HMRC" etc., suggest that the benefit of the motive defence can be disclaimed. The individual may choose not to satisfy an officer even though there was no tax avoidance purpose. If the motive defence is compulsory, we would have the surprising result that a transfer for tax avoidance may be less harshly taxed than one which was not.

However, this view would cause considerable difficulties. Suppose a non-resident trust has relevant income of £1m and trust gains of £1m, and capital payments of £1m are made in Year 1 to beneficiary A and in Year 2 to beneficiary B. A and B are both resident and domiciled in the UK. Suppose the trust is in principle within the motive defence because the transfer to it was not for tax avoidance purposes. Before 2008/09 A would probably wish to disclaim the motive defence, if A could, so the capital payment to A was subject to income tax, and they avoided the s.87 interest surcharge. However, it would be in the interest of B to argue that the motive defence did apply, so that the payment to A "washed" the capital gain and the payment to B was tax free. It is evident that the offshore trust rules simply do not work if the motive defence can be disclaimed by one beneficiary and claimed by another. Nor do they work fairly if it can be disclaimed by one beneficiary in a manner which binds all the others. So the better view is that the motive defence (if applicable on the facts) is compulsory and binds all parties.

The same applies where it suits HMRC to argue that the motive defence is satisfied, and the taxpayer argues that it is not. This in fact happened in one case[134] where HMRC successfully argued that the motive defence applied. In neither case did the taxpayer seek to argue that the motive defence could be disclaimed, so the point may now be regarded as settled law.

HMRC agree. The INT Manual provides:

> **INTM602660 Applying for exemption** [Jul 2023]
> ...The exemption applies automatically if the facts show that the conditions are met. It is not therefore the subject of a 'claim' under the

TCGA, because the IT rate under s.720 (then, 40%) was lower than the effective CGT rate under s.87 (then, 64%).

[134] *Anson v HMRC* [2012] UKUT 59 (TCC) reported at first instance under the name *Swift v HMRC* [2010] UKFTT 88 (TC) at [22] - [28]. The point was not considered in the subsequent appeals.

normal claims mechanism of the Tax Acts (TMA70/S42).

52.37 Abolish the 2006 rules

This topic was never easy, but the FA 2006 made it twice as complicated: it introduced wider and more obscurer rule which apply to transactions from 2005, while retaining the old rules for earlier transactions.[135]

The reader who studies this long and difficult chapter may well agree with the author that the 2006 reform was wrong headed in policy though (as so often) clumsy drafting adds its mite to the confusion. What should be done? One step forward would be to return to the (slightly) simpler pre-2006 position, though it would be helpful to have a statutory statement of what I take to be the pre-2006 rule, that the motive test must be satisfied by all critical associated operations. But there is no current prospect of that happening.

[135] EN FB 2006 stated:

> "The new provisions recast the test for exemption in cases not involving a tax avoidance purpose to make its meaning clearer."

But no-one was intended to take that seriously.

CHAPTER FIFTY THREE

PROFIT FRAGMENTATION

53.1 Profit fragmentation: Introduction
53.2 The target
53.2.1 Example: Alienated receipts
53.2.2 Example: Excess expenses
53.2.3 Existing legislation

53.21 NICs
53.22 Commencement
53.23 PFA impact

53.1 Profit fragmentation: Introduction

Para 1(1) sch 4 FA 2019 provides:

> This Schedule contains provision about countering the tax effects of

> certain arrangements[1] ("profit fragmentation arrangements").

I refer to this as the **"PFA code"**.

Profit Fragmentation is a technical term which has nothing much to do with fragmentation. I write it with initial capitals, to reflect the technical nature of the expression.

The development of the PFA rules can be traced through:

- HMRC, "Tax Avoidance involving Profit Fragmentation Consultation document" (**"PFA condoc"**)[2]
- HMRC, "Tax Avoidance involving Profit Fragmentation Summary of Responses"[3] (**"PFA response doc")**

53.2 The target

PFA condoc provides:

> 2.5. A UK resident individual A has skills that would enable him or her to generate significant profits - for example, as an entertainer, an asset manager or a specialist producer of high value items.
> 2.6. A carries on business activity as a sole trader, in partnership, or as an employee or director of a company (in the last case it is likely that the company will be closely held). Some or all of the profits deriving, directly or indirectly, from A's earning capacity, are moved to an offshore vehicle, V Ltd, where nil or very little tax is paid. Commonly, this is an offshore company owned by an offshore trust. Typically A is not a settlor or trustee of that trust. In some cases, A is said to be excluded from benefitting from the trust assets, but there will often be some means by which those amounts will or may accrue to persons who have links to A, including non-lineal relatives of A.
> 2.7. It is claimed that the offshore entity is entitled to payment in respect of A's services for varied reasons. For example:
>
> - A service agreement that allows V Ltd to enter into agreements to supply A's services to clients - this may be in respect of all of A's activities, or only activities performed by A outside the UK. It is

[1] Para 11 sch 4 FA 2019 provides the standard (unnecessary) IT definition of "arrangements"; see App 2.2.3 (Definitions of "arrangement").

[2] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/698175/Tax_Avoidance_involving_Profit_Fragmentation_consultation_document.pdf* (April 2018)

[3] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/722457/Tax_Avoidance_involving_Profit_Fragmentation_summary_of_responses.pdf* (July 2018)

> likely that A will be paid a modest salary for these services but most of the receipts will be paid to the trustees via V Ltd, or
>
> - The offshore entity invests in a partnership through which A trades and is said to be entitled to an entrepreneurial return on that investment in priority to any profit allocation to A.
>
> Having regard to the activities carried on by V Ltd in the offshore jurisdiction, relative to those carried out by A elsewhere, it is clear that the entity is either overrewarded or designed to facilitate the avoidance of UK tax.
>
> It is asserted that V Ltd does not carry on any trade or profession in the UK and as it is at no time UK resident then no taxable profits arise.
>
> **Examples**
>
> In each of the examples below, it is asserted that existing anti-avoidance rules do not apply. In practice, all would be vulnerable to challenge, particularly under the Transfer of Assets Abroad legislation.

"Vulnerable to challenge" is something of an understatement.

53.2.1 *Example: Alienated receipts*

PFA condoc provides:

> 2.8. A management consultant is resident in the UK and provides professional services for both UK and overseas customers. A proportion of these services is attributed to the UK business, with those receipts reported by the UK business and taxed in the UK.
>
> 2.9. However, the remaining receipts are paid by customers directly to an offshore company in a tax haven, owned by a trust based in the tax haven. These are paid in return for consultancy services allegedly[4] provided by the offshore company, which has no assets apart from access to the skills and services of the management consultant himself, neither of which is exercised to any material extent in the tax haven.
>
> 2.10. The management consultant in the UK is expressly excluded from benefiting from the trust but relatives can benefit.
>
> 2.11. The underlying reality is that all income derives from a single underlying activity (namely the skills of the consultant, who is a UK resident), that no or negligible services are performed by that person in the low tax jurisdiction itself, and consequently the full profits should be taxed in the UK as profits of the consultant.

[4] The word "allegedly" is misconceived: there is no reason why the company may not provide consultancy services. If the offshore company had been UK resident, no-one would have questioned the point.

These are the facts of *Brackett v Chater*, which decided that the company should be taxed on the basis that it is carrying on a trade in the UK through a permanent establishment; or alternatively that the transfer of asset rules apply.[5]

53.2.2 *Example: Excess expenses*

PFA condoc provides:

> 2.12. A UK individual provides architectural services for clients in the UK. Customers pay the UK individual, but little profit is taxed in the UK, as the individual pays fees to an offshore company for "consultancy" which are deducted from profits and almost entirely cover the profits. The company receiving the fees is owned by an offshore trust which was settled many years ago by a distant relation of the UK individual. The company has no substance or assets.
> 2.13. The funds held in the company are then returned to the architect in various forms which are alleged to be non-taxable, for example, loans or payment of supposed business expenses...[6]
> 2.14. The reality again is that there is a single underlying source of income, namely the skills of the architect, who is a UK resident, that no or negligible services are performed by that person in the low tax jurisdiction itself, and so the full profits should be taxed in the UK as profits of the architect.

In this case the "commission" is not deductible as not incurred wholly and exclusively for the purposes of the business; or else the transfer pricing rules apply to remove the tax advantage.

> **Common features**
> 2.15. These arrangements differ in some of their details, but what they have in common is that UK profits are moved to offshore structures in low tax jurisdictions, to entities which are supposedly performing or providing services, but have little or no substance. The reality is that the business is carried on by an individual resident in the UK, with core services such as office space, IT and support staff located in the UK, and that the profit allocated offshore is excessive having regard to the services carried out in that territory.

[5] See 48.4 ("Transfer" of "assets"); 106.27.4 (Branch/agency distinctions).

[6] The example adds here: "The individual in the UK has a lifestyle which could not be supported on the small amount of net profit received and taxed in the UK." But that is irrelevant to the example.

53.2.3 *Existing legislation*

PFA condoc provides:

> 2.16. Existing legislation, in particular the transfer of assets abroad legislation, can tackle many of these arrangements. Challenges are also possible under the rules relating to transfer pricing, disguised remuneration, and other legislation. However, this legislation can be difficult to apply as it requires the gathering of large amounts of information, and the users or promoters of the arrangements may seek to delay matters by arguing that HMRC has no right to force the production of relevant information held offshore.
> 3.2. Some of the existing legislation which can be relevant to these arrangements, such as transfer pricing and Diverted Profits Tax, has specific exclusions for SMEs [Small and medium-sized enterprises].[7] The broad aim of any new legislation will be to target arrangements used by the types of business not covered by the existing rules.

Thus both the examples given to illustrate the need for the new law are wrong in the sense that they are clearly caught by existing legislation. That has happened before,[8] but it is a new development for HMRC to (more or less) concede that is the case.

53.3 Parties to PFA

53.3.1 *Resident party*

Para 1 sch 4 FA 2019 provides:

> (2) Profit fragmentation arrangements involve the following parties—
> (a) a person resident in the UK ("the resident party") ...

53.3.2 *Overseas party*

Para 1 sch 4 FA 2019 provides:

> (2) Profit fragmentation arrangements involve the following parties...
> (b) an overseas person or entity ("the overseas party") who is not resident in the UK ...

Para 1(3) sch 4 FA 2019 provides:

> An "overseas person or entity" means—

[7] This is not accurate statement: see 25.16 (Non-qualifying territory).

[8] The charity tainted donation rules are an example.

(a) a person abroad within the meaning given by section 718 of ITA 2007,[9] or

(b) a company, partnership, trust or other entity or arrangements established or having effect under the law of a country or territory outside the UK (regardless of whether it has legal personality as a body corporate).[10]

The INT Manual provides:

> **INTM610040: Parties** [May 2019]
> **Example 3 – Defining the Parties**
> C Ltd. is a UK resident company which carries out a trade in the UK as a management consultancy firm. D is an individual who is a 20% shareholder in C Ltd. and is responsible for all of the company's overseas business, which is performed from the UK. D is also involved in another business, O BVI Ltd. through which he performs some personal consultancy services. D arranges for C Ltd.'s overseas customers to make payments to O BVI Ltd. which is a British Virgin Islands resident company.
> In the above scenario when considering whether the Profit Fragmentation legislation is applicable C Ltd is the resident party, D is the related individual and O BVI Ltd is the overseas party.
> **INTM610050: Parties (Continued)** [May 2019]
> **Example 4 – The Overseas Party**
> O BVI Ltd. ("O") is a British Virgin Islands incorporated company. O is wholly owned by its director, A, who is UK resident. A carries out all the activities in relation to the entire business of O from his offices in the UK. Since O is centrally managed and controlled in the UK, and is therefore UK-resident, it cannot be the overseas party when considering the Profit Fragmentation legislation.
> In these circumstances, if value were transferred from A's UK business to O, and O subsequently transferred this value outside of the UK then, depending on the nature of the activities carried on by A and O, O could be treated as the resident party and the Profit Fragmentation legislation may be applicable to O's subsequent transfer of value outside of the UK.

53.3.3 *Related individual*

Para 1(2) sch 4 FA 2019 provides:

> Profit fragmentation arrangements involve the following parties ...

[9] See 48.5 ("Person abroad").

[10] The words in brackets are otiose, but they do no harm.

> (c) an individual (a "related individual") who is—
> (i) the resident party,
> (ii) a member of a partnership of which the resident party is a partner, or
> (iii) a participator in a company which is the resident party.

The drafting is clumsy. The resident party is a related individual, ie is related to himself/herself. There may not be any other related individual, and if there is, that individual may not be a party to the PF arrangements. But it does not matter.

The significance of the definition is that the PFA code applies if a related individual meets the enjoyment conditions.[11]

The definitions of resident/overseas/related party would apply only for the purposes of para 1, but para 11 extends them to the whole of sch 4.

53.4 Profit Fragmentation Arrangements

Para 2(1) sch 4 FA 2019 provides:

> Arrangements are "profit fragmentation arrangements" if-

A set of 4 conditions then follow which I call **"PFA conditions (a) to (d)"**.

The definition applies only for the purposes of para 2, but para 11 extends it to the whole of sch 4.

53.5 Condition a: Material provision

Para 2 sch 4 FA 2019 provides:

> (1) Arrangements are "profit fragmentation arrangements" if-
> (a) provision has been made or imposed as between
> [i] the resident party and
> [ii] the overseas party
> by means of the arrangements ("the material provision")

This is not so much a separate condition as a definition of "material provision".

The wording is based on the transfer pricing rules: see 25.7 ("The basic pre-condition").

Para 2(3) sch 4 FA 2019 provides:

[11] See 53.8 (Enjoyment conditions).

> For the purposes of sub-paragraph (1)(a) provision made or imposed as between
> [a] a partnership of which the resident party is a member and
> [b] the overseas party
> is to be regarded as provision made or imposed as between the resident party and the overseas party.

The INT Manual provides a straightforward example:

> **INTM610060 The Material Provision** [May 2019]
> **Example 5 – Provisions for Partnerships**
> A is a UK-resident individual who is carrying on a trade in partnership with a number of other individuals as P Associates. P Associates contracts with an overseas company O Ltd. for O Ltd. to provide services to P Associates in exchange for a fee. For the purpose of the Profit Fragmentation legislation the provision made between P Associates and O Ltd is treated as a provision made between A and O Ltd.

53.6 Condition b: Transfer of value

Para 2 sch 4 FA 2019 provides:

> (1) Arrangements are "profit fragmentation arrangements" if ...
> (b) as a result of the material provision, value is transferred from the resident party to the overseas party which derives directly or indirectly from the profits of a business chargeable to income tax or corporation tax (see paragraph 3)

Unpacking this paragraph, the requirements are:
(1) a business
(2) chargeable to IT/CT
(3) value transferred from a resident to an overseas party
(4) that value is derived from the business

The INT Manual provides 2 examples: assignment of a trading receipt, and excessive expenses:

> **INTM610080 Transfer of Value** [May 2019]
> **Example 6 – Transfer of Value Income Received Offshore**
> This example shows what is meant by a transfer of value where the resident party reduces the amount of income they take into account.
> As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate

amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

F Ltd is a UK-resident company that provides consultancy services to UK and non-UK clients out of its offices in London. F Ltd arranges for its non-UK clients to make payments in return for these services to O Ltd which is an offshore company where none of the relevant business activity takes place.

F Ltd provides services with a value of £100,000 to a non-UK client. The non-UK client pays the £100,000 to O Ltd. rather than to F Ltd.

F Ltd has not made any direct payments out of the UK but there has been a transfer of value out of the UK. This is because F Ltd has provided services with a value of £100,000 but received £0 in return – this means there has been a transfer of £100,000 of value out of the UK.

Example 7 – Transfer of Value Expenses Paid from UK

This example illustrates what is meant by a transfer of value where excess expenses are paid by the resident party.

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

G Ltd is a UK-resident company that provides consultancy services out of its offices in London. G Ltd carries out all its IT support functions in-house but makes a payment of £50,000 per year, described as IT costs, to O Ltd, an offshore company which lacks the capacity to fulfil the function such that no relevant activity takes place in O Ltd.

G Ltd has made a payment of £50,000 to an overseas party but has received no services, i.e. something with nil value, in return. This means there has been a transfer of £50,000 of value out of the UK.

53.6.1 *"Business"*

There must be a business. Para 11 sch 4 FA 2019 seeks to provide a definition:

> In this Schedule ...
> "business" includes any trade, profession or vocation.

This may be in some OPC handbook, as it crops up from time to time. But it is otiose, as a trade/profession/vocation is obviously a business.

This is an inclusive definition, so the PFA code could also apply to a property business.

53.6.2 *Link to business*

The requirement in PFA condition (b) is that the value transferred "derives directly or indirectly from the profits of the business". This cannot sensibly be defined, but that does not stop the drafter from trying. Para 3 sch 4 FA 2019 provides:

> (1) In determining whether value deriving directly or indirectly from a business is transferred from the resident party to the overseas party, account is to be taken of any method, however indirect, by which—
> (a) any property or right is transferred or transmitted, or
> (b) the value of any property or right is enhanced or diminished.
> (2) Sub-paragraph (1) applies in particular to—
> (a) sales, contracts and other transactions made otherwise than for full consideration or for more than full consideration,
> (b) any method by which any property or right, or the control of any property or right, is transferred or transmitted by assigning—
> (i) share capital or other rights in a company,
> (ii) rights in a partnership, or
> (iii) an interest in settled property,
> (c) the creation of an option affecting the disposition of any property or right and the giving of consideration for granting it,
> (d) the creation of a requirement for consent affecting such a disposition and the giving of consideration for granting it,
> (e) the creation of an embargo affecting such a disposition and the giving of consideration for releasing it, and
> (f) the disposal of any property or right on the winding up, dissolution or termination of a company, partnership or trust.
> (3) Value may be traced through any number of individuals, companies, partnerships, trusts and other entities or arrangements.
> (4) The property held by a company, partnership, trust or other entity or under any arrangements must be attributed to the shareholders, partners or members, beneficiaries or other participants at each stage on a just and reasonable basis.

The wording is derived from the transactions in land code.[12]
This does show, if it were necessary, that derivation is not to be narrowly understood.

[12] See 22.11.2 (Attributing value); 22.19 (Indirect arrangements). Also see App 2.9.8 (Derive/represent value).

53.6.3 *Remittance basis taxpayer*

The INT Manual provides:

> **INTM610080 Transfer of Value** [May 2019]
> **Example 8 – Deriving From the Profits of a Business** [Judy]
> This example illustrates how the concept of deriving from the profits of a business chargeable to income tax applies where an individual who is non-domiciled claims to use the remittance basis and has foreign source income.
> As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.
> J is a UK-resident non-domiciled individual who claims the remittance basis.
> J is self-employed and carries on a trade in the UK as a pharmaceuticals consultant. J has offices in London and a small team of staff that she employs, all of who perform their duties in her London offices. J also occasionally travels to Geneva to perform pharmaceutical consulting for a Swiss company (A) in her capacity as a sole trader.
> J incorporates a 'brass plate' company (B) in Switzerland and asks A to make a contract with B when they seek to use her business's services, including the work of her UK staff. J does not change anything about her business activities except for arranging that consultancy payments from A are now paid to B instead of to her as a self-employed individual.
> We assume for the purpose of this example that no other provisions are applicable here (such as for example Central Management and Control).[13]
> J also spends every other weekend carrying out a trade in Switzerland through a further Swiss company (D) leading executive team building excursions in the Alps. This activity takes place solely in Switzerland and all the activities are carried out by J through her Swiss Company (D) in Switzerland.
> The Profit Fragmentation legislation would apply to the transfer of value arising from the diversion of income from J's UK business to the Swiss company, B. This is because these payments are properly attributable to the UK business and derive from the profits of a business chargeable to

[13] More analytically, it is assumed that the Swiss company is not UK resident.

income tax. These amounts are not eligible for the remittance basis as they are UK source income.

The Profit Fragmentation legislation will not apply to the income derived from her team building company, D, in Switzerland as this is foreign source income so is not derived from the profits of a business chargeable to income tax.

53.6.4 *Tracing example*

The INT Manual provides:

> **INTM610090 Tracing Value** [May 2019]
>
> **Example 9 – Tracing Value Through Transactions**
>
> In the following example UK1, UK2 and UK3 are UK resident companies, and OS1, OS2, and OS3 are non-UK resident companies. Each of these companies is party to arrangements whereby value is transferred for which nothing is received in return.
>
> As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.
>
> The following series of transactions is carried out:
>
> - UK1 transfers £1,000 of value to OS1.
> - OS1 transfers £1,000 of value to UK2.
> - UK2 transfers £1,000 of value to OS2.
> - OS2 transfers £500 of value to UK3.
> - UK3 transfers £500 of value to OS3.
>
> In these circumstances the resident party could be any of UK1, UK2, UK3, or indeed any combination of UK1, UK2 and UK3 each with separate arrangements, as value has been transferred out of the UK by each of them. As described above this will depend on the specific facts and circumstances surrounding the arrangements. This will include the related individual's relationship with the companies and the nature of the activities that take place in each of these companies.

This is not exactly guidance, but no doubt we will muddle through.

53.7 Condition c: Arm's length

Para 2 sch 4 FA 2019 provides:

> (1) Arrangements are "profit fragmentation arrangements" if ...
>
> (c) the value transferred is greater than it would have been if it had resulted from provision made or imposed as between

> independent parties acting at arm's length

I would have said that if there were a transaction at arm's length, there would be no value transferred. So this paragraph is otiose. But it does not matter.

The INT Manual provides straightforward examples of (1) diverted receipts and (2) excessive expenditure, on non-arm's length terms. I set them out only for completeness:

> **INTM610100 Arm's Length Transfer** [May 2019]
> **Example 10 – Arm's Length Value – Reduction of Income Received**
> This example illustrates what is meant by a transfer of value being greater than it would have been if made between parties acting at arm's length in the context where the resident party reduces the amount of income they take into account. As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.
> C Ltd. is a UK-resident company which provides consultancy services to UK and non-UK clients out of its offices in London. O Ltd. is an offshore company that provides limited ancillary services to consulting businesses. C Ltd. makes arrangements with O Ltd. whereby O Ltd. will provide limited ancillary services to C Ltd. if C Ltd. agrees to have its non-UK clients make payments in return for the services C Ltd. provides as follows:
>
> - 20% to C Ltd., and
> - 80% to O Ltd.
>
> C Ltd. provides services with a value of £1m to a non-UK client. In line with the above agreement, in return for these services the non-UK client pays £200,000 to C Ltd and £800,000 to O Ltd.
> C Ltd. has not made any direct payments out of the UK but there has been a transfer of value out of the UK. This is because C Ltd. has provided services with a value of £1m and only received £200,000 – this means there has been a transfer of £800,000 of value out of the UK. The services provided by O Ltd. do not warrant such an inflated return.
> A provision has been made between C Ltd. and O Ltd. for these arrangements to take place. Had this provision been made or imposed between independent parties acting at arm's length then O Ltd. would have received nothing. The value paid from the non-UK client to C Ltd. would have been the value of the services provided – so £1m. This means that there would be no transfer of value out of the UK as the amount paid into the UK (£1m) would be equivalent to the value of the services provided out of the UK (£1m).
> In these circumstances the value transferred out of the UK (£800,000) clearly exceeds the value that would have been transferred out of the UK had the provisions been made or imposed between independent parties acting at arm's length (£0). In these circumstances paragraph 2(1)(c) would be applicable.

Example 11 – Arm’s Length Value – Inflation of Expenses Paid
This example illustrates what is meant by a transfer of value taking place at greater than it would have been if made between parties acting at arm’s length where excess expenses are paid by the resident party.

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

C Ltd. is a UK resident company which provides consultancy services out of its offices in London. C Ltd. carries out all its IT support functions in-house but makes a payment of £50,000 per year to O Ltd., an offshore company which provides limited services, which it describes as IT costs.

C Ltd. has made a payment of £50,000 to an overseas party but has received limited services, which for the purpose of this example have a value of £5,000, in return. This means there has been a transfer of £45,000 of value out of the UK.

Had the provision been made or imposed between independent parties acting at arm’s length the value paid from C Ltd. to O Ltd. would have been the arm’s length amount which in this case would be £5,000 as O Ltd. has only performed limited services. This means that there would be no transfer of value out of the UK as the amount paid out of the UK (£5,000) would be equivalent in value to the value of the services provided in to the UK (£5,000).

In these circumstances the value transferred out of the UK clearly exceeds the value that would have been transferred out of the UK had the provisions been made or imposed between independent parties acting at arm’s length. In these circumstances paragraph 2(1)(c) would be applicable.

53.8 Condition d: Enjoyment conditions

Para 2 sch 4 FA 2019 provides:

> (1) Arrangements are “profit fragmentation arrangements” if ...
> (d) any of the enjoyment conditions are met in relation to a related individual (see paragraph 4).

Para 4 sch 4 FA 2019 provides:

> (1) The enjoyment conditions are met in relation to a related individual if-

There follow two sets of conditions, in short:
(1) Link to individual; and
(2) (a) Enjoyment test; or
(b) Procurer test

It is difficult to see how the second condition could fail to be met.

The label “Enjoyment conditions” is not apt to describe the total set of conditions.

53.8.1 *Link to individual*

Para 4 sch 4 FA 2019 provides:

> (1) The enjoyment conditions are met in relation to a related individual if-
>
> (a) it is reasonable to conclude that some or all of the value transferred as a result of the material provision relates to something done by, or any property or purported right of, the individual

Will it ever happen that this condition is not satisfied?

53.8.2 *Power to enjoy*

Para 4(4) sch 4 FA 2019 provides:

> For the purposes of sub-paragraphs (2) and (3), references to an individual include a reference to any person connected with that individual...

I gloss this as "individual [including connected persons]".

Para 4 sch 4 FA 2019 provides:

> (1) The enjoyment conditions are met in relation to a related individual [including connected persons] if ...
>
> (b) either of the conditions in sub-paragraph (2) is met.
>
> (2) The conditions are that—
>
> (a) under the arrangements—
>
> (i) the value transferred, or part of it, is so dealt with by any person as to be calculated at some time to enure for the benefit of the individual [including connected persons],
>
> (ii) the value transferred, or part of it, operates to increase the value of any assets which the individual [including connected persons] holds or are held for the benefit of the individual [including connected persons],
>
> (iii) the individual [including connected persons] receives or is entitled to receive any benefit provided or to be provided out of the value transferred or part of it,
>
> (iv) the individual [including connected persons] may become entitled to the beneficial enjoyment of the value transferred, or part of it, if one or more powers are exercised or successively exercised (and for those purposes it does not matter who may exercise the powers or whether

> they are exercisable with or without the consent of another person), or
>
> (v) the individual [including connected persons] (whether acting alone or together with any other person) is able in any manner to control directly or indirectly the application of the value transferred or part of it,

Para 4(3) sch 4 FA 219 provides:

> (3) In determining whether the conditions in sub-paragraph (2)(a) are met in relation to an individual [including connected persons] and the value transferred as a result of the material provision, all benefits which may at any time accrue to a person as a result of the value being transferred must be taken into account, irrespective of—
>
> (a) the nature or form of the benefits, or
>
> (b) whether the person has legal or equitable rights in respect of the benefits.

The wording is based on the ToA rules.[14]

53.8.3 *Procurer test*

Para 4(2) sch 4 FA 2019 provides:

> The conditions are that ...
>
> (b) it is reasonable to conclude that the individual [including connected persons] (whether acting alone or with any other person) procured the transfer of value from the resident party to the overseas party in such a way as to avoid the conditions in paragraph (a) being met.

In this case the label "enjoyment conditions" is inapt, as the transferor will not have power to enjoy.

This reflects apparent HMRC frustration with the existing s.720 charge. PFA condoc provides:

> 4.12. In exceptional cases sums may accumulate for long periods with no access by A or immediate family members. In some cases the trust deeds contain conditions which provide that the UK individual does not have the power to enjoy the assets of the trust. In practice,
>
> [a] this condition may be ignored, or
>
> [b] the deeds may also give the trustees powers to make payments to

[14] See 49.15 ("Power to enjoy").

> anyone they choose, notwithstanding any specific prohibitions set out in the deeds.

In case [b] the individual actually has power to enjoy. Case [a] involves a sham.

The INT Manual provides:

> **INTM610130: Enjoyment Conditions: Procurer Test** [May 2019]
> **Example 12 – The Procurer Test**
> A is a UK resident individual who carries on a trade in the UK. A is seeking to reduce the tax they pay in the UK while still receiving the profits they make and seeks legal advice about how they can do this. A is given advice about how to set up a structure to divert profits out of the UK.
> The advice received by A sets out a number of steps which they can take to ensure that the enjoyment conditions set out in 4(2)(a) Schedule 4 Finance Act 2019 are not satisfied. This advice could involve arrangements for A or their legal advisers to procure a 'dummy' settlor to settle a trust, or for the beneficiaries of trusts to be specific named charitable causes. HMRC are not able to demonstrate that A or parties connected to A are able to benefit from these arrangements.
> In these circumstances A will have procured the transfer of value with a view to avoiding the conditions set out in paragraph 4(2)(a) and therefore the procurer test will be met.

53.8.4 *Connected persons*

Para 4 sch 4 FA 2019 provides:

> (4) ... for the purposes of this paragraph, section 993 of ITA 2007 (meaning of "connected") has effect but as if—
> (a) subsection (4) of that section were omitted, and

The deleted rule in s.993(4) provided that partners are connected with other partners and their relatives.

Para 4 sch 4 FA 2019 provides:

> (4) ... for the purposes of this paragraph, section 993 of ITA 2007 (meaning of "connected") has effect but as if...
> (b) members of a partnership in which the individual is also a member were not "associates" of the individual for the purposes of sections 450 and 451 of CTA 2010 ("control").

The rule that partners are not associates means that partners are not connected with a company held by their partnership.

Para 4(5) extends the scope of connected person in a novel way:

> For the purposes of sub-paragraph (4), an individual is treated as connected with a person or entity if—
>
> (a) the individual or a person connected with the individual (whether acting alone or with any other person)—
>
> (i) is able to secure that the person or entity acts in accordance with the wishes of the individual or any person connected with the individual,
>
> (ii) is able to acquire rights which would enable the individual or any person connected with the individual to secure that the person or entity acts in accordance with the wishes of the individual or any person connected with the individual, or
>
> (iii) is able to exercise significant influence over the person or entity (whether or not as a result of a legal entitlement of the individual or any person connected with the individual), or
>
> (b) the person or entity can reasonably be expected to act, or typically acts, in accordance with the wishes of the individual or a person connected with the individual.

PFA condoc explains the thinking here:

> 4.16. In some arrangements, persons may not be formally connected, yet it is apparent that transactions occur which would not occur in an arm's length situation. For example, profits made by a UK individual are paid away to a company owned by a trust, and the UK individual receives no services nor any other sort of return for those payments. HMRC is informed that there is no connection between the individual and the trust or company. In these circumstances it may be reasonable to believe that there is a form of connection between the UK individual and the trust.
> 4.17. The proposed legislation will therefore aim to address situations where individuals or companies effectively follow the instructions of another person, whether or not there is a strict legal arrangement providing that this is the case. It will involve looking at all the circumstances, and in particular whether the alienation of profits that occurs would happen in a genuine commercial arrangement.

This reverses the decisions on the ToA rule.[15]

[15] See 49.17.1 (Control over trust income).

53.9 Tax mismatch

Para 2(2) sch 4 FA 2019 provides:

> But arrangements are not "profit fragmentation arrangements" if—
> (a) the material provision does not result in a tax mismatch for a tax period of the resident party (see paragraphs 5 and 6)

53.9.1 *"Tax mismatch"*

Para 5 sch 4 FA 2019 provides:

> (1) The material provision results in a tax mismatch for a tax period of the resident party if—
> (a) in that period, in relation to a relevant tax, it results in one or both of—
> (i) an increase in the expenses of the resident party for which a deduction is taken into account in calculating the amount of the relevant tax payable by the resident party, or
> (ii) a reduction in the income of the resident party which would otherwise have been taken into account in calculating the amount of the relevant tax payable by the resident party,
> (b) it is reasonable to conclude that—
> (i) [A] the resulting reduction in the amount of the relevant tax which is payable by the resident party
> exceeds
> [B] the resulting increase in relevant taxes payable by the overseas party for the period corresponding to the tax period, and
> (ii) the overseas party does not meet the 80% payment test, and
> (c) the results described in paragraphs (a) and (b)(i) are not exempted by sub-paragraph (5).
> (2) In this Schedule references to "the tax reduction" are to the amount of the excess mentioned in sub-paragraph (1)(b)(i).
> (3) It does not matter whether the tax reduction results from the application of different rates of tax, the operation of a relief, the exclusion of any amount from a charge to tax, or otherwise.

"Tax mismatch" is not particularly apt. "Tax saving" is the more appropriate term. But it does not matter.

53.9.2 *The 80% payment test*

Para 5(4) sch 4 FA 2019 provides:

> "The 80% payment test" is met by the overseas party if the resulting increase in relevant taxes paid by that party as mentioned in sub-paragraph (1)(b)(i) is at least 80% of the amount of the resulting reduction in the amount of the relevant tax payable by the resident party.

53.9.3 *Tax period*

Para 5(7) sch 4 FA 2019 provides:

> "tax period", in relation to a resident party, means—
> (a) a tax year, or
> (b) if the resident party is a company, an accounting period of that party.

Para 5(6) sch 4 FA 2019 provides:

> In this paragraph and paragraph 6, where the overseas party does not have an actual period for the purposes of relevant taxes which coincides with the tax period of the resident party—
> (a) references to the corresponding period of the overseas party in relation to that tax period are to a notional period of that party for the purposes of relevant taxes that would coincide with that tax period, and
> (b) such apportionments as are just and reasonable are to be made to determine the income or tax liability of that party for that corresponding period.

53.9.4 *"Relevant tax"*

Para 5(7) sch 4 FA 2019 provides:

> In this paragraph—
> "relevant tax" means—
> (a) income tax,
> (b) corporation tax on income,
> (c) a sum chargeable under section 269DA of CTA 2010 (surcharge on banking companies) as if it were an amount of corporation tax,
> (d) a sum chargeable under section 330(1) of CTA 2010 (supplementary charge in respect of ring fence trades as if it were an amount of corporation tax), or
> (e) any non-UK tax on income

The definition is for para 5, but it is incorporated by reference in para 6.

53.9.5 *Resulting reduction*

Para 6 sch 4 FA 2019 provides:

> (1) For the purposes of paragraph 5, the resulting reduction in the resident party's liability to a relevant tax for a tax period is—
>
> $$A \times TR$$

A stands for **A**bsolute value; TR is **T**ax **R**ate:

> where—
>
> A is the sum of—
>
> (a) if there are expenses within paragraph 5(1)(a)(i) [deductible expenses], the lower of the amount of expenses and the amount of the deduction mentioned in that provision, and
>
> (b) any reduction in income mentioned in paragraph 5(1)(a)(ii), and
>
> TR is the rate at which, assuming the resident party has profits equal to A chargeable to the relevant tax for the tax period, those profits would be chargeable to that tax.
>
> For this purpose, the rate at which those profits would be chargeable to that tax for that period is the highest rate at which that tax would be chargeable for that period if those profits were added to the resident party's total income.

This may be comparing personal tax rates to corporation tax rates, which is not likely to pass the 80% payment test.

53.9.6 *Resulting increase*

Para 6 sch 4 FA 2019 provides:

> (2) For the purposes of paragraph 5(1)(b) and (4), the resulting increase in relevant taxes payable by the overseas party for the period corresponding to the tax period is any increase in the total amount of relevant taxes that would fall to be paid by that party (and not refunded) assuming that—
>
> (a) the overseas party's income for that period, in consequence of the material provision were an amount equal to A,
>
> (b) account were taken of any deduction or relief (other than any qualifying deduction or qualifying loss relief) taken into account by the overseas party in determining that party's actual liability to any relevant taxes in consequence of the material provision, and
>
> (c) all further reasonable steps were taken—
>
> (i) under the law of any part of the UK or any country or

territory outside the UK, and

(ii) under double taxation arrangements made in relation to any country or territory,

to minimise the amount of tax which would fall to be paid by the overseas party in the country or territory in question (other than steps to secure the benefit of any qualifying deduction or qualifying loss relief).

(3) The steps mentioned in sub-paragraph (2)(c) include—

(a) claiming, or otherwise securing the benefit of, reliefs, deductions, reductions or allowances, and

(b) making elections for tax purposes.

(4) For the purposes of this paragraph, any withholding tax which falls to be paid on payments made to the overseas party is (unless it is refunded) to be treated as tax which falls to be paid by that party (and not the person making the payment).

53.9.7 *80% payment test: Examples*

The INT Manual provides straightforward examples:

INTM610160 Quantifying the Resident Party's Tax Reduction [May 2019]

Example 14 – Determining the Relevant Taxes Payable

This example should be read alongside Example 15 below.

A is self-employed and liable to income tax at the 45% rate. A has expenses of £30,000 resulting from Profit Fragmentation Arrangements that have resulted in a deduction, and income of £50,000 which as a result of the arrangements has been omitted.

The reduction in A's liability to UK income tax would be computed as:

(£30,000 + £50,000) × 45% = £80,000 × 45% = £36,000

O is the overseas party to whom the value is transferred under Profit Fragmentation Arrangements. O pays tax at a rate of 10% on the value transferred and has no expenses.

The increase in the relevant taxes to be paid by the overseas party is:

(£30,000 + £50,000) × 10% = £80,000 × 10% = £8,000

Example 15 – The 80% Payment Test

This example illustrates the application of the 80% payment test which is described at INTM610150, and should be read alongside Example 14 above.

If we assume the facts are as above such that the reduction in A's liability to UK income tax was £36,000 ("X") and the increase in relevant taxes to be paid by the overseas party is £8,000 ("Y").

A comparison now needs to be made between these two figures to determine if the 80% payment test is met. This is done by dividing Y by X – to determine the percentage. In this case:

£8,000 / £36,000 = 22.2%

This means that the increase in the overseas party's tax liability is (22.2%) of the reduction in the resident party's liability to UK tax which is less than the required 80% meaning the 80% payment test is not met.

INTM610170 Qualifying Deduction and Qualifying Loss Relief [May 2019]

Example 16 – Qualifying Deduction

This example illustrates what is meant by a qualifying deduction.

As part of a material provision, the overseas party acquires IP from the resident party and then charges royalties to the resident party for its continued use. The overseas party amortises the amount paid for the IP, which is allowable as a deduction in computing the overseas party's liability. This is not a qualifying deduction because it arises from the making of the material provision.

Example 17 – Qualifying Deductions and Qualifying Losses

The effect of the rules on qualifying deductions and qualifying loss relief is to give a consistent comparison between the tax positions of the two parties.

If the resident party pays £100 to the overseas party for something that costs the overseas party £95 to provide then the comparison would not be expected to be between the tax effect on the resident party of its paying £100 and the tax payable by the overseas party on a net £5 (calculated as the amount they received for this thing (£100) less the amount it cost them to provide it (£95)). As long as the £95 costs of the overseas party meet the criteria of a qualifying deduction the comparison is between two amounts of £100.

However, if in another situation the overseas party was only taxed on £50 of the £100 because of some particular relief for £50 given in its country of residence that does not meet the qualifying deduction criteria then the comparison will be between the resident party's reduction of tax on expenditure of £100 and what would have been the overseas party's liability to relevant tax had its taxable income been £50.

Similarly, with loss relief, a reduction below £100 in the taxation of the receipt would not be taken into account to the extent that it relates to qualifying loss relief. But a loss is a qualifying one only if it corresponds to a loss for which the resident party could have obtained relief, so a loss that could be utilised under the law applicable to the overseas party but not to the resident party would not qualify.

If, for example, the resident party is a UK company making a payment to a non-UK resident group company that has no resulting increase in relevant taxes because it can set off brought forward losses of other group companies as well as its own against the relevant profits, only the element of loss relief that corresponds to what would be eligible under the UK rules would be qualifying loss relief.

53.9.8 *Tax refund*

Para 6(5) sch 4 FA 2019 provides:

> For the purposes of this paragraph, an amount of tax payable by the overseas party is refunded if and to the extent that—
> (a) any repayment of tax, or any payment in respect of a credit for tax, is made to any person, and
> (b) that repayment or payment is directly or indirectly in respect of the whole or part of the amount of tax payable by the overseas party,
>
> but an amount refunded is to be ignored if and to the extent that it results from qualifying loss relief obtained by that party.

53.9.9 *Overseas party transparent*

Para 6(6) sch 4 FA 2019 provides:

> Where some or all of the overseas party's income is treated for the purposes of a relevant tax charged under the law of a country or territory outside the UK as the income of a person or persons other than the overseas party, in paragraph 5 and this paragraph—
> (a) references to that party's liability to any tax (however expressed) include a reference to the liabilities of that person or those persons to the relevant tax,
> (b) references to any tax being payable by that party (however expressed) include a reference to the relevant tax being payable by that person or those persons, and
> (c) references to loss relief obtained by that party include a reference to loss relief obtained by that person or those persons, and sub-paragraph (4) applies to that person or any of those persons as it applies to that party.

The INT Manual provides:

> **INTM610180: Hybrid and Transparent Entities/ Reasonable to Conclude/ UK Resident Non-Domiciled Individuals** [May 2019]
> **Example 18 – Tax Transparent Entity**
> If the overseas party was a United States (US) limited liability company (LLC) it could be charged to tax in the US as if it was fiscally

transparent. However, for the purposes of UK tax, US LLCs are regarded as taxable entities and not fiscally transparent. In these circumstances paragraph 6(6) would apply to treat the US LLC as fiscally transparent for the purposes of applying the tax mismatch test, thus ensuring that account is taken of tax paid by the members of the overseas party.

For example, A is a UK resident company with Profit Fragmentation Arrangements under which it transfers £10,000 of value to O US LLC. O US LLC is owned by US resident individuals (B and C). O US LLC is a transparent entity for US tax purposes such that B and C pay tax on the profits generated by O.

B pays tax on £5,000 of the value transferred to O US LLC at 28% (£1,400). C also pays tax on £5,000 of value transferred to O US LLC at 39.6% (£1,980). In considering O US LLC's liability to tax account should be taken of the £1,400 and £1,980 paid by B and C. O US LLC is therefore treated as having paid £3,380 on the £10,000 transferred.

Thus when considering the tax mismatch condition the increase in relevant taxes to be paid by the overseas party would be £3,380 and not zero.

53.9.10 *Qualifying deduction/loss*

Para 6(7) sch 4 FA 2019 provides:

> In this paragraph—
>
> "qualifying deduction" means a deduction which—
>
> (a) is made in respect of actual expenditure of the overseas party,
>
> (b) does not arise directly from the arrangements,
>
> (c) is of a kind for which the resident party would have obtained a deduction in calculating that party's liability to any income tax or corporation tax had that party incurred the expenditure in respect of which the deduction is given, and
>
> (d) does not exceed the amount of the deduction that the resident party would have so obtained,
>
> "qualifying loss relief" means any means by which a loss might be used for tax purposes to reduce the amount in respect of which the overseas party is liable to tax on the profits of a business

53.9.11 *Reasonable to conclude*

The INT Manual provides:

> **INTM610180 Hybrid and Transparent Entities/ Reasonable to Conclude/ UK Resident Non-Domiciled Individuals** [May 2019]
>
> **Reasonable to Conclude**
>
> It will not always be possible for the resident party to obtain sufficient information about the overseas party to discern the increase in relevant taxes payable by the overseas party when carrying out the tax mismatch test.
>
> If it is reasonable to conclude that the reduction in relevant tax payable by the resident party does not exceed the increase in relevant tax payable by the overseas party, or that the 80% payment test is met then it is reasonable to conclude there is not a tax mismatch.
>
> The expression "reasonable to conclude" shows that this is an objective test, which is to be applied by taking into account all the relevant circumstances and asking what, in the light of those circumstances, a reasonable conclusion would be.

53.9.12 *Foreign domiciled taxpayer*

The INT Manual provides:

> **INTM610180 Hybrid and Transparent Entities/ Reasonable to Conclude/ UK Resident Non-Domiciled Individuals** [May 2019]
>
> **UK Resident Non-Domiciled Individuals**
>
> If the resident party is a non-domiciled individual with foreign source income that is not connected to a UK business activity, then, if that individual is chargeable on the remittance basis for a tax year the foreign source income is not chargeable to income tax or corporation tax. In such a case, any transfer of value from the foreign source will not derive from the profits of a business chargeable to UK tax, so any arrangements will not be Profit Fragmentation Arrangements.
>
> If the resident party is an individual who has settled an offshore trust, which has as a matter of fact protected foreign source income to which the trust protections described below apply and that is not connected to a UK business activity, then the income would not be an amount taken into account by the resident party in computing the amount of UK tax payable.
>
> The 'trust protections' are the changes made by Finance Act 2017 to remove overseas trusts settled by non-UK domiciled settlors from a charge under S624 Income Tax Trading and Other Income Act 2005 ("ITTOIA 05"), S720 ITA 2007 and S727 ITA 2007 in respect of certain trust income and the income of any underlying companies and instead bring them within the scope of S731 ITA 2007 or S643A ITTOIA 05 so that they are assessed on the benefits they receive from

the trust and its underlying entities.

This means that any genuine foreign source income will not be affected by the Profit Fragmentation legislation as the Tax Mismatch exception test will apply.

For more details regarding the interaction between the Profit Fragmentation legislation and the transfer of assets abroad rules see INTM610250 and INTM610260.

Example 19 – Remittance Basis – Foreign Source Income (Judy)

J is a UK resident non-domiciled individual who claims the remittance basis.

J spends every other weekend carrying out a trade in Switzerland through a Swiss company leading executive team building excursions in the Alps. This activity takes place solely in Switzerland and all the activities are carried out by J in Switzerland.

The Profit Fragmentation legislation will not apply to the income derived from her team building company in Switzerland as this is foreign source income not derived from the profits of a business chargeable to UK income tax.

53.10 Counteraction

Para 7 sch 4 FA 2019 provides:

> (1) Adjustments must be made so as to counteract the tax advantages that would (ignoring this Schedule) arise from profit fragmentation arrangements.
>
> (2) The adjustments—
>
> (a) must relate to the expenses, income, profits or losses of the resident party for the tax period in which value is transferred as a result of the material provision,
>
> (b) must be based on what the value transferred would have been if it had resulted from a provision made or imposed as between independent parties acting at arm's length, and
>
> (c) must be just and reasonable.
>
> (3) References in this paragraph to "the resident party" are references to the resident party at the time at which the material provision is made or imposed.

Since the requirements of PFA are so vague, and so many different arrangements may be caught, there seems little alternative to a wide HMRC discretion.

In the HMRC view, the taxpayer must make their own counteraction and self-assess accordingly.

The INT Manual provides:

> **INTM610280: Making Adjustment on the Tax Return: Individuals**
> [May 2019]
>
> Customers will be required to determine whether the Profit Fragmentation legislation applies to them. If they determine that the Profit Fragmentation legislation does apply to them, they will need to make the adjustments required by paragraph 7 of the legislation. These pages set out how different types of customers to whom the Profit Fragmentation legislation could apply should make the required adjustments on their tax return. Customers to whom the Profit Fragmentation legislation applies, and who currently do not make a self-assessment return, must make a self-assessment return in order to report taxable income arising from the adjustment made under the Profit Fragmentation legislation.
>
> Individuals operating as sole traders/ receiving UK property income required to make adjustments under the Profit Fragmentation legislation
>
> Individuals who are self-employed (completing SA103F or SA103S)
>
> Individuals required to adjust their self-employment income under paragraph 7 of the Profit Fragmentation legislation must record these adjustments on their SA return as follows.
>
> Individuals who complete form SA103F must:
>
> - If the required adjustment consists of reducing an expense, disallow the relevant expense that was previously included in the return by making the appropriate entry in one of boxes 32-45.
> - If the required adjustment consists of increasing their income, increase their income by inserting the additional income figure in box 60.
>
> Individuals who complete form SA103S must:
>
> - If the required adjustment consists of reducing an expense, take the relevant expense off the expense figure included in one of boxes 11-19 (and the total at box 20). If their annual turnover was such that they are only required to complete box 20, they should just take the relevant expense off the box 20 total figure.
> - If the required adjustment consist of increasing their income, increase their income by inserting the additional income figure at box 27.
>
> Individuals who have UK property income (completing SA105)
>
> Individuals required to adjust their UK property income under paragraph 7 of the Profit Fragmentation legislation must record these adjustments on their SA return (form SA105) as follows:
>
> - If the required adjustment consists of reducing an expense, take the

relevant expense off the expense figure/s included in boxes 24-29.

- If the required adjustment consists of increasing their income, increase their income by increasing the total income figure at box 20.

INTM610290: Members of a partnership required to make adjustments under the Profit Fragmentation legislation [May 2019]

Adjustments required on the Partnership Return (SA800)

If paragraph 7 of the Profit Fragmentation legislation requires adjustments relating to the income or expenses of a member of a partnership, adjustments must be first be made on the Partnership Return (form SA800).

- If the required adjustment consists of reducing an expense, disallow the relevant expense that was previously included in the return by making the appropriate entry in one of boxes 3.30-3.45.
- If the required adjustment consist of an increase in income, increase the income figure by inserting the additional income figure in box 3.67.
- The adjustments will be carried through to that member's allocation of profits and losses shown on the partnership statements prepared by the partnership as part of the partnership return.

Adjustments required by partners

The relevant partnership members must reflect the adjustments to the profit/loss shown on the partnership statement in their own returns. Therefore for partnership members who are individuals, the figure at box 8 (on form SA104F and SA104S) must be adjusted to reflect the change to their share of the partnership profit or loss as a result of the adjustments required under paragraph 7 of the Profit Fragmentation legislation. Corporate partners must make the necessary adjustment in their CT computation.

INTM610300 Companies required to make adjustments under the Profit Fragmentation legislation [May 2019]

If a company is required to make adjustments under paragraph 7 of the Profit Fragmentation legislation, it should make the necessary adjustments to expenses and/or income in its CT computation.

INTM610200: Profit Fragmentation Adjustments [May 2019]

Example 20 – Profit Fragmentation Adjustments

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

A UK company (the resident party) makes arrangements with a

Bermudian company (the overseas party) to provide administrative services to the UK Company to support its UK business.

The UK Company pays the Bermudian company £100,000, however, the arm's length price of the services actually provided by the Bermudian company is only £10,000. The Bermudian company later makes a loan to a participator in the UK Company (the related individual) that is not taxable in the UK, meaning the enjoyment condition is met.

There is no commercial reason for the excessive payment and it is reasonable to conclude that the arrangements were entered into to obtain a tax advantage. The UK tax that would have been paid on the £90,000 diverted would have been £18,000 and the Bermudian tax paid on the £90,000 was £0, meaning the tax mismatch test was met.

These arrangements are Profit Fragmentation Arrangements so adjustments must be made to the amounts to be included in the UK Company's tax returns.

The Profit Fragmentation legislation ensures the amount of profit that should be taxable in the UK is fully taxed in the UK. In this case the amount relating to the arrangements that should be taxed in the UK but wasn't is £90,000. This is the difference between the value transferred and the arm's length price.

The UK Company should disallow £90,000 worth of their administrative services costs in their tax computation – increasing their taxable profits by £90,000.

The £10,000 that is still deducted represents the value that should have been transferred for tax purposes between independent parties acting at arm's length.

53.11 Exemptions

Para 5 sch 4 FA 2019 provides:

> (5) The results described in sub-paragraph (1)(a) and (b)(i) are exempted if they arise solely by reason of—
>
> (a) contributions paid by an employer under a registered pension scheme, or overseas pension scheme, in respect of any individual,
>
> (b) a payment to a charity,
>
> (c) a payment to a person who, on the ground of sovereign immunity, cannot be liable for any relevant tax...

53.12 Payment to fund

Para 5 sch 4 FA 2019 provides:

> (5) The results described in sub-paragraph (1)(a) and (b)(i) are exempted if they arise solely by reason of...
>
> (d) a payment to an offshore fund or authorised investment fund—
>
> (i) which meets the genuine diversity of ownership condition (whether or not a clearance has been given to that effect), or
>
> (ii) at least 75% of the investors in which are, throughout the accounting period, registered pension schemes, overseas pension schemes, charities or persons who cannot be liable for any relevant tax on the ground of sovereign immunity.

53.13 Diversity of ownership

Para 11 sch 4 FA 2019 provides:

> In this Schedule-
>
> "genuine diversity of ownership condition" means—
>
> (a) in the case of an offshore fund, the genuine diversity of ownership condition in regulation 75 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001), and
>
> (b) in the case of an authorised investment fund,[16] the genuine diversity of ownership condition in regulation 9A of the Authorised Investment Fund (Tax) Regulations 2006 (S.I. 2006/964)

The two regulations are in similar terms: it is helpful to see them side by side:

Reg 75 OFTR	**Reg 9A AIFTR**
(1) The genuine diversity of ownership condition is met if the fund meets, or, in relation to a fund constituted by a class of interests in the main arrangements, the main arrangements meet, conditions A to C throughout the period of account.	(1) For the purposes of these Regulations, the genuine diversity of ownership condition is as follows. (2) The genuine diversity of ownership condition is that an authorised investment fund must— (a) meet conditions A to C throughout the accounting period; or (b) comply with paragraph (8).

[16] Defined para 11 sch 4 FA 2019: "authorised investment fund" means—
(a) an open-ended investment company within the meaning of section 613 of CTA 2010, or
(b) an authorised unit trust within the meaning of section 616 of that Act".

(2) Condition A is that the fund produces documents, available to investors and to HMRC, which contain— (a) a statement specifying the intended categories of investor, (b) an undertaking that interests in the fund will be widely available, and (c) an undertaking that interests in the fund will be marketed and made available in accordance with the requirements of paragraph (4)(a).	(3) Condition A is that the fund documents— (a) contain a statement that units in the fund will be widely available, (b) specify the intended categories of investor, and (c) specify that the manager of the fund must market and make available the units in the fund in accordance with paragraph 9A(6)(a).
(3) Condition B is— (a) that the specification of the intended categories of investor do not have a limiting or deterrent effect, and (b) that any other terms or conditions governing participation in the fund do not have a limiting or deterrent effect.	(4) Condition B is that neither— (a) the specification of the intended categories of investor, nor (b) any other terms or conditions governing participation in the fund, whether or not specified in the fund documents, have a limiting or deterring effect.
	(5) In paragraph (4) a limiting or deterring effect means an effect which— (a) limits investors to a limited number of specific persons or specific groups of connected persons, or (b) deters a reasonable investor within the intended categories of investor from investing in the fund.
(4) Condition C is— (a) that interests in the fund must be marketed and made available— (i) sufficiently widely to reach the intended categories of investors, and (ii) in a manner appropriate to attract those categories of investors, and (b) that a person who falls within one of the intended categories of investors can, upon request to the manager of this fund, obtain information about the fund and acquire units in it.	(6) Condition C is that— (a) units in the fund must be marketed and made available— (i) sufficiently widely to reach the intended categories of investors, and (ii) in a manner appropriate to attract those categories of investors; and (b) a person who is in an intended category of investor can, upon request to the manager of the fund, obtain information about that fund and acquire units in it. Condition C is subject to paragraph (7).

	(7) Condition C shall be treated as being met even if at the relevant time the fund has no capacity to receive additional investments, unless— (a) the capacity of the fund to receive investments in it is fixed by the fund documents (or otherwise), and (b) a pre-determined number of specific persons or specific groups of connected persons make investments in the fund which collectively exhausts all, or substantially all, of that capacity.
(5) A fund also meets the genuine diversity of ownership condition if— (a) an investor in the fund is an offshore fund, an open-ended investment company or an authorised unit trust scheme ("the feeder fund"), (b) conditions A to C are met in relation to the fund after taking into account— (i) the fund documents relating to the feeder fund, and (ii) the intended investors in the feeder fund, and (c) the fund and the feeder fund have the same manager (or proposed manager).	(8) An authorised investment fund also meets the genuine diversity of ownership condition if— (a) an investor in the fund is a unit trust scheme, an offshore fund or another authorised investment fund (a "feeder fund"); (b) conditions A to C are met in relation to the authorised investment fund after taking into account— (i) the fund documents relating to the feeder fund, and (ii) the intended investors in the feeder fund; and (c) the authorised investment fund and the feeder fund have the same manager (or proposed manager).

53.14 Double charge relief

Para 8 sch 4 FA 2019 provides:

> (1) This paragraph applies where—
> (a) the resident party has paid a relevant tax by virtue of the application of paragraph 7,
> (b) at any time, the resident party or another person pays—
> (i) a further amount of the relevant tax, or
> (ii) an amount of non-UK tax[17] corresponding to the relevant

[17] Defined by reference in para 11 sch 4 FA 2019: "non-UK tax" has the meaning given by section 187 of CTA 2010". Section 187 provides:
"(1) In this Part "non-UK tax" means a tax chargeable under the law of a territory outside the UK which—

tax, and

(c) the result is a double payment of tax calculated by reference to the same income or profits.

(2) In order to avoid the double payment of tax, the resident party may make a claim in writing for one or more consequential adjustments to be made in respect of the tax paid mentioned in sub-paragraph (1)(a).

(3) On a claim under this paragraph an officer of Revenue and Customs must make such of the consequential adjustments claimed (if any) as are just and reasonable.

(4) The amount of any consequential adjustments must not exceed the lesser of—

(a) the tax paid by the resident party as mentioned in sub-paragraph (1)(a), and

(b) the tax paid as mentioned in sub-paragraph (1)(b).

(5) Consequential adjustments may be made—

(a) in respect of any tax period,

(b) by way of an assessment, the modification of an assessment, the amendment of a claim or otherwise, and

(c) despite any time limit imposed by or under any enactment.

53.15 Reimbursement relief

Para 9 sch 4 FA 2019 provides:

> In calculating income, profits or losses for any tax purposes, no account is to be taken of any amount which is paid (directly or indirectly) by a person for the purposes of meeting or reimbursing the cost of tax charged on the resident party by virtue of the application of paragraph 7.

53.16 TAAR

Para 2(2) sch 4 FA 2019 provides:

> But arrangements are not "profit fragmentation arrangements" if...
>
> (b) it is not reasonable to conclude that the main purpose, or one of the main purposes, for which the arrangements were entered

(a) is charged on income and corresponds to UK income tax, or

(b) is charged on income or chargeable gains or both and corresponds to UK corporation tax.

(2) A tax is not outside the scope of subsection (1) by reason only that it—

(a) is chargeable under the law of a province, state or other part of a country, or

(b) is levied by or on behalf of a municipality or other local body."

> into was to obtain a tax advantage.

The double negative is non-standard wording, but I do not think that makes any difference.

Para 11 sch 4 FA 2019 sets out the GAAR definition of "tax advantage".[18] Tax here means income tax and corporation tax.

53.17 PFA: EU law

The PFA code is not EU-law compliant. Perhaps the drafter thought that no longer mattered. A case-law EU law defence must somehow be read it.

53.18 Partnerships

Para 10 sch 4 FA 2019 provides:

> (1) This paragraph applies where a person is a member of a partnership.
> (2) Any references in this Schedule to the expenses, income, profits or losses of, or to the adjustment of the expenses, income, profits or losses of, the person includes a reference to the person's share of the expenses, income, profits or losses of, or adjustment of the expenses, income, profits or losses of, the partnership.
> (3) For this purpose "the person's share" of an amount is determined by apportioning the amount between the members of the partnership on a just and reasonable basis.

53.19 "Partnership"/"Trust"

Para 11 sch 4 FA 2019 sets out foreign-entity definitions of partnership/ partner/trust/beneficiary; but these definitions are otiose; see 90.3.3 (Foreign-entity clauses).

53.20 Other anti-avoidance rules: Interaction

The INT Manual provides:

> **INTM610020: Introduction: Who do these rules apply to? / How will these rules be used?** [May 2019]
> The Profit Fragmentation legislation reinforces existing tax legislation. It will only apply after other existing provisions and only to the extent that the existing provisions have not fully counteracted any tax advantages arising from the arrangements. This means that if other tax

[18] See 3.19.1 (Tax advantage: Definitions).

legislation is being correctly applied such that the correct amount of UK tax is being paid by the resident party then the Profit Fragmentation legislation will not apply.

53.20.1 *PFA/transfer pricing/DPT*

The INT Manual provides:

> **INTM610210: Profit Fragmentation Adjustments: Hierarchy of Legislation [May 2019]**
> **Example 21 – Other Legislation Applying First** [Transfer pricing]
> A UK Company, the resident party, makes arrangements with a Bermudian company that meet all the conditions to be Profit Fragmentation Arrangements. The Bermudian company is owned by the same parent company as the UK Company.
> The UK Company makes a cash payment of £100,000 to the Bermudian company, however, the services the Bermudian company actually provide to the UK Company are only worth £10,000, this is the price that would be paid between independent parties acting at arm's length.
> The company makes transfer pricing adjustments to reduce the deduction claimed to £10,000 meaning there is no tax advantage gained from the arrangements.
> As the tax advantage has been fully counteracted by the transfer pricing adjustment it would not be just and reasonable to make further adjustments under the Profit Fragmentation legislation so not further adjustments should be made.
> **Diverted Profits Tax**
> DPT is a separate tax from income or corporation tax. If the Profit Fragmentation legislation leads to adjustments which bring any amount into charge, that amount will not be taxable diverted profits for the purposes of DPT. This is because S83(3), S84(2)(c), and S85(6)(b)(iii) FA 2015, remove any amount taken into account in an assessment to corporation tax from being considered diverted profits...

53.20.2 *PFA/s.720 interaction*

The INT Manual provides:

> **INTM610250: Interaction with Other Legislation: Income Chargeable to S720 or S727 ITA 2007** [May 2019]
> The pages describe the interaction between the Profit Fragmentation legislation, and the Transfer of Assets Abroad (TOAA) legislation which can be found at Chapter 2 Part 13 of The Income Tax Act 2007 (ITA 2007).

This guidance considers how the Profit Fragmentation legislation will apply to adjustments that are within the scope of both Paragraph 7 of the Profit Fragmentation legislation and S720 or S727 ITA 2007 of the TOAA legislation. In these circumstances S720 or S727 ITA 2007 should take precedence over the Profit Fragmentation legislation for the reasons that follow.

Paragraph 7 of the Profit Fragmentation legislation sets out the adjustments required in relation to the Profit Fragmentation arrangements. These adjustments are to be made in order to counteract any tax advantages arising from the Profit Fragmentation arrangements that remain after the application of other provisions.

Where S720 or S727 ITA 2007 has charged tax on the income such that any tax advantages arising from the Profit Fragmentation arrangements have been fully counteracted the Profit Fragmentation legislation will not apply. This is because if the individual did have Profit Fragmentation Arrangements as per the definition in paragraph 2, and S720 or 727 ITA 2007 are applied then no later adjustments will be required under paragraph 7 of the Profit Fragmentation legislation as the tax advantage will be counteracted.

If the tax advantage is only partially counteracted by the application of S720 or S727 ITA 2007 then adjustments should be made under paragraph 7 of the Profit Fragmentation legislation to counteract any remaining tax advantage. This could apply in circumstances where a resident party has incurred an expense reducing their taxable profits as a result of a payment to the overseas party. Part of the corresponding receipt is considered income in the accounts of the overseas party and is chargeable to S720 or 727 ITA 2007 on a UK resident individual, but part is treated for example as capital in the overseas party's accounts – Profit Fragmentation would still apply to correct the remaining tax advantage.

If the arrangements include a settlor interested trust and income arises to the settlement S624 Income Tax (Trading and Other income) Act 2005 (ITTOIA) may apply to counteract any tax advantage that arises under the Profit Fragmentation rules in the same way as S720 or S727 ITA 2007.

If an arrangement is covered by the Finance Act 2018 changes, such that there is relevant foreign income, this income is potentially caught by s731 ITA 2007. For information regarding the interaction of s731 ITA 2007 and the Profit Fragmentation arrangements please see 7.1.2 below.

For the purpose of these examples we refer solely to S720 ITA 2007, but if the capital sum conditions are in point this could be read as S727 ITA 2007, and the same conclusions would follow.

Example A - An individual makes a provision to transfer value via a UK resident company to an overseas company owned by an overseas trust in which the individual is settlor and beneficiary.

J, a UK resident and domiciled individual, owns all of the share capital in a UK resident company which makes a payment of £150,000 to an overseas company. The overseas company is owned by an overseas trust of which J is both the settlor and beneficiary. Following enquiries it transpires that the payment is made for services provided by the overseas company though the payments being made are inflated. The value of the services if they had been undertaken at arm's length are £100,000 not £150,000 though full amount of this receipt is treated as income in the overseas company's accounts. It is assumed for the purpose of this example that no other legislation applies.

The conditions for the application of TOAA are met and the profits of the overseas company will be assessable on J under S720 ITA 2007. The conditions to be Profit Fragmentation arrangements are also met. Assuming for the purpose of this example that the overseas company incurred no deductible expenditure the full amount of the £150,000 will be treated as income arising to J and they will be charged to tax on the full amount under S720 ITA 2007. This means that UK income tax has been paid on the full amount of the income and therefore there is no tax advantage as a result of the Profit Fragmentation arrangements.

Example B - An individual makes a provision to transfer value to an overseas company for the benefit of a connected person in circumstances when the conditions for s720 ITA 2007 are met.

A UK resident and domiciled individual (A) makes a payment of £150,000 to an overseas company which is owned by an overseas trust the settlor and beneficiary of which is another UK resident and domiciled individual (B). A and B are connected persons who pay income tax at the additional rate of income tax. The payment relates to services that are provided to him by the overseas company. The value that would have been transferred between independent parties acting at arm's length is £100,000 not £150,000 though full amount of this receipt is treated as income in the overseas company's accounts.

The conditions to be Profit Fragmentation arrangements are met, as we assume for the purpose of this example are the conditions for S720 ITA 2007 to apply.

The full amount of the £150,000 will be charged treated as income arising to B and they will be charged to tax on the full amount. This means that UK tax has been paid on the full amount of the income and therefore there is no tax advantage as a result of the Profit Fragmentation arrangements.

> **Example C- An individual makes a provision to transfer value directly to an overseas company owned by an overseas trust of which the individual is settlor and beneficiary.**
> A UK resident and domiciled individual makes a payment of £150,000 for services provided to him by an overseas company which is owned by an overseas trust of which he is the settlor and beneficiary. The services are provided by the overseas company though the payments being made are inflated. The value that would have been transferred between independent parties acting at arm's length is £100,000 not £150,000 though the full amount of this receipt is treated as income in the overseas company's accounts.
> The conditions to be Profit Fragmentation arrangements are met, as are the conditions for S720 ITA 2007 to apply.
> Assuming for the purposes of this example that the overseas company incurred no expenditure in respect of the services provided the full amount of the £150,000 will be charged treated as arising to the UK resident individual under S720 ITA 07 and they will be charged to tax on the full amount. This means that UK tax has been paid on the full amount of the income and therefore there is no tax advantage as a result of the Profit Fragmentation arrangements.

PFA	**ToA**
Applies to business income	Applies to any income
Transfer of assets	Value transferred
Individual transferor taxable	No transferor needed; anyone taxable
Distributed income not taxed again	No rule; maybe HMRC discretion
Motive defence: avoidance	Motive defence: Tax advantage

53.20.3 *PFA/s.731 interaction*

The INT Manual provides:

> **INTM610260: Interaction with Other Legislation: Income Chargeable to S731 ITA 2007** [May 2019]
> **Benefit Charge**
> If Profit Fragmentation legislation is applicable to arrangements under which a benefit charge under S731 ITA 2007 is later raised no relief will be available to set against the amount paid under S731 ITA 2007 to take account of the tax paid under the Profit Fragmentation legislation.
> There is no basis on which to give credit relief to the recipient of a benefit who is liable under S731 ITA 2007. Unlike the provisions of S720 and S727 ITA 2007, S731 does not deem particular income of the foreign person to be the income of the UK resident individual receiving the benefit but, rather, seeks to tax the value of a benefit actually

received by him, and then only if and to the extent that it can be matched by relevant income.

The relevant income itself is not being taxed as income of the UK resident individual, but the value of the benefit is. In arriving at the net figure for relevant income, deduction is made for any taxes, whether UK or foreign, and any expenses properly incurred against that income under S733(1) ITA 2007. This can include payments made by the overseas person to the resident party to cover the tax liability arising as a result of the Profit Fragmentation legislation.

The double taxation relief available under paragraph 8 of the Profit Fragmentation legislation will not be available in these circumstances as the charge under S731 ITA 2007 is on the benefit that arises and not on income attributed to the UK resident individual.

Example D-The application of the Profit Fragmentation rules when the benefit charge applies.

An overseas trust was settled by P, a UK resident and UK domiciled individual for the benefit of his two adult children. P is excluded from benefiting from the trust. A UK resident company makes a payment of £150,000 to an overseas company which is owned by the overseas trust. Services are provided by the overseas company though the payments being made are inflated. The value that would have been transferred between independent parties acting at arm's length is £100,000 not £150,000. Though full amount of this receipt is treated as income in the overseas company's accounts.

The conditions to be Profit Fragmentation arrangements are met so the UK resident company makes an adjustment to reduce their expenses by £50,000 under paragraph 7 of the Profit Fragmentation legislation.

The full amount of the £50,000 will be taxable on the UK resident company at 20% meaning the UK resident company pays £10,000 of tax. The overseas company makes a payment to the UK resident company for £10,000 to allow them to pay the tax due on the adjusted amount.

For the purposes of the transfer of assets legislation the remaining £140,000 will be relevant income under S733 ITA 07. For the purpose of this example it is assumed that there is no other relevant income in the structure. In the following tax year the overseas trustees make a capital distribution of £150,000 to one of P's children. The relevant income of £140,000 will be matched against the benefit under S733 ITA 07 resulting in a benefits charge on that individual under S731 ITA 2007of £140,000 assessable on the UK resident individual in this later year.

53.20.4 *PFA/Protected trusts interaction*

The INT Manual provides:

> **INTM610260: Interaction with Other Legislation: Income Chargeable to S731 ITA 2007** [May 2019]
>
> **Trust Protections**
>
> The 'trust protections' are the changes made by Finance Act 2017 and Finance Act 2018 to remove what is referred to as protected foreign source income arising in overseas trusts settled by non-UK domiciled settlors from a charge under S624 Income Tax Trading and Other Income Act 2005 ("ITTOIA 05"), S720 ITA 2007 and S727 ITA 2007 and the protected foreign source income of any underlying companies. Such income is instead brought within the scope of S731 ITA 2007 or S643A ITTOIA 05 so that the settlor and close family members are assessed on the benefits they receive from the trust and its underlying entities to the extent that this can be matched with the protected foreign source income arising within the structure.
>
> Protected foreign source income is defined at S628A ITTOIA 05, S721A and S729A ITA 2007. It is not affected by the Profit Fragmentation legislation for the reasons given below. This means that the trust protections will not be affected by the introduction of the Profit Fragmentation legislation.
>
> Paragraph 2 of the Profit Fragmentation legislation requires that there exists a material provision that results in a transfer of value from the resident party to the overseas party. The value transferred will be a transfer of value generated directly or indirectly from the profits of a business chargeable to UK income tax or corporation tax in the tax year or accounting period of the resident party.
>
> Protected foreign source income (PFSI) as defined at S721A ITA 2007, is foreign source income. As PFSI cannot represent value which derives directly or indirectly from the profits of a business chargeable to UK income tax or corporation tax, paragraph 2(1)(b) of the Profit Fragmentation legislation will not apply.
>
> PFSI cannot be income that the Profit Fragmentation legislation applies to, so there is no interaction between the Profit Fragmentation legislation and the TOAA legislation for this type of income.
>
> A "transfer of value" for the purpose of paragraph 2 of the Profit Fragmentation legislation will not therefore include genuine protected foreign source income chargeable in the UK under S731 ITA 2007.

53.20.5 *PFA/Carried interest/DIM interaction*

The INT Manual provides:

> **INTM610270: Interaction with Other Legislation: Carried Interest and Disguised Investment Management Fees** [May 2019]
> Remuneration for investment management services is typically divided between various parties to a fund arrangement. The fixed fee will show in the accounts of the investment management business as trading income, while the contingent fee element, typically referred to as carried interest, may be recognised in a special purpose vehicle and distributed. Where carried interest arises to individuals in respect of investment management services provided to a collective investment scheme, there are specific rules within Chapter 5, Part 4 of Taxation of Chargeable Gains Act 1992, that determine how this will be brought into account for tax purposes.
> It is expected that the value of the remuneration paid for the investment management services will be an arm's length value under a typical commercial arrangement. In circumstances where the contingent fee element of the remuneration includes 'disguised investment management fees', the existing legislation at Chapter 5E Part 13 ITA 07 applies in priority to the Profit Fragmentation rules and should result in the correct amount of UK tax being paid.

53.21 NICs

The INT Manual provides:

> **INTM610220: Profit Fragmentation Adjustments: NICs Consequences for Individuals** [May 2019]
> Section 15 and Schedule 2 to the Social Security Contributions and Benefits Act 1992 and the Social Security Contributions and Benefits (Northern Ireland) Act 1992 mean that profits adjusted under this Schedule are chargeable to Class 4 NICs where those profits are not from a trade, profession or vocation carried on wholly outside the UK.

53.22 Commencement

Para 12 sch 4 FA 2019 provides:

> This Schedule has effect—
> (a) for income tax purposes, in relation to any value transferred on or after 6 April 2019 as a result of a material provision, and
> (b) for corporation tax purposes, in relation to any value transferred on or after 1 April 2019 as a result of a material provision.

INTM provides:

INTM610030 Introduction: When Do These Rules Apply? [May 2019]

... **Example 1 –No Residual UK Business**

... In 2016 Company A, a UK resident research and development company, ("A Ltd") created a new type of high-tech micro-chip used in mobile phones. The technology was ahead of its time on creation and the company did not anticipate that it would need any technological maintenance for at least 4 years.

In 2018 the patent for the micro-chip was transferred to Company B ("B Ltd"). B Ltd is another group company, based in the British Virgin Islands (BVI), which holds all of the group's patents and exploits them all over the world. This transfer took place on arm's length terms: B Ltd paid a significant sum to A Ltd. in return for the patent

B Ltd. has a workforce based in the BVI responsible for exploiting the group's patents to customers. During the accounting period ending 31 December 2019 B Ltd. generated income of $1m from its customers relating to the patent.

The Profit Fragmentation legislation will not apply to the transfer of the patent in 2016 because the transfer took place in advance of the legislation applying. Furthermore, it will not apply to the income generated by B Ltd during the APE 31 December 2019 as this income is not properly attributable to the UK business.

Example 2 – Basic Post-Commencement Transfer

This example shows when the Profit Fragmentation legislation will apply to certain transfers occurring after 1 April 2019 (or 6 April 2019 for income tax purposes) in relation to transfers that have taken place before that date.

As with other examples in this guidance, it is likely (?) that accounting principles, other legislation or case law would ensure the appropriate amount of profits are charged to UK tax: the following example illustrates how Profit Fragmentation rules would apply if that were not the case.

The facts for this example are the same as those as set out in Example 1, but we are now considering the accounting period ended 31 December 2020.

In January 2020 it becomes apparent that the micro-chips will need updating to ensure the technology remains current. B Ltd. does not have the necessary expertise to update them, so A Ltd. updates the technology for B Ltd. but does not receive any remuneration for doing this. The service of updating the technology by A Ltd without receiving any remuneration results in a transfer of value to B Ltd.

The Profit Fragmentation legislation could apply to this transfer of value at the time this occurs (in this example this is during the accounting period ended 31 December 2020) provided the arrangements are Profit Fragmentation Arrangements and the exception conditions don't apply.

53.23 PFA impact

PFA condoc provides:

> This measure is expected to increase receipts by approximately up to £50 million per annum. The final costing will be subject to scrutiny by the Office for Budget Responsibility.
> This measure has no impact on compliant[19] businesses.
> It is likely to affect a small number of non-compliant businesses, estimated to be in the region of 4-5,000, which are currently involved in tax avoidance arrangements.

5,000 businesses, with a yield of £50m, suggests an average yield of £10k per business. That seems implausible, as one would not set up the arrangements at which PFA is targeted to gain an advantage of that amount. Perhaps the figure is not intended to be taken seriously.

Of course, if HMRC enforced the existing law, the yield should be nil.[20]

[19] For this tendentious use of the word "compliant" see App 1.4 ("Compliant").

[20] See 53.2 (The target).

CONTENTS AT A GLANCE

The chapters are organised thematically as follows:

Volume 1

Introduction and What's New

Obtaining further advice and disclaimer

A1 FIG Relief//Abolition of Domicile Rule

Non-dom policy & avoidance

1. Foreign Domicile: Tax Policy
2. Tax Avoidance
3. Targeted Anti-avoidance Rules (TAARs)

Domicile & residence

4. Domicile
5. Deemed Domicile
6. Residence of Individuals
7. Residence of Trustees

Volume 2

8. Residence of Companies
9. Treaty-Residence
10. Split Years
11. Temporary Non-residence
12. Exit Taxes
13. UK Arrival or Departure: Tax Checklist

Income tax: Principles & remittance basis

14. Income Categorisation
15. Income Recognition: Received /Entitled/Arise/Paid
16. Source/RFI/Territorial Principles
17. The Remittance Basis
18. The Meaning of Remittance
19. Remittance Reliefs
20. Mixed Funds

Income by category

21. Trading Income

Volume 3

22. Trading in Land
23. Performers
24. Property Income
25. Deduction of Interest from Property Income

26. Interest Income
27. Exempt Interest of Non-Residents
28. Accrued Income Profits
29. Deeply Discounted Securities
30. Dividend Income
31. Annual Payments
32. Intellectual Property Income
33. Misc Sweep-Up Income
34. Employment Income
35. Travel Expenses: Employment Income
36. PAYE
37. Employment Income: DT Relief

Volume 4

38. Pension and Annuity Income
39. Benefit in Kind: Family Home and Chattels
40. Benefit in Kind: Loans from Non-Resident Companies

IT: general

41. Discretionary Trusts: Income Tax
42. IIP Trusts: Income Tax
43. Rates of Income Tax: CGT
44. Personal Allowances
45. Non-Resident Income Tax Relief
46. National Insurance Contributions

IT avoidance codes

47. Settlor-Interested Trust Code
48. Transfer of Assets Abroad: Introduction
49. Transfer of Assets Abroad: Transferors
50. Transfer of Assets Abroad: Benefits
51. Transfer of Assets Abroad: Relief From Overlapping Charges
52. Transfer of Assets Abroad: Motive Defence
53. Profit Fragmentation

Volume 5

54. Transfer of Income Stream
55. Transactions in Securities

Capital Gains Tax

56. Chargeable Gains
57. UK Property held by Non-residents
58. Reorganisations
59. Residential Property: CGT
60. Gains of Non-resident Settlor-interested Trust: s.86
61. Capital Payments from Non-resident Trusts: s.87

62. Borrowing by Non-resident Trusts: Sch 4B
63. Sub-funds
64. Gains of Non-resident Companies
65. Capital Losses

Funds

66. FIG Relief - Abolition of Domicile Rule
67. Offshore Income Gains
68. Income from Offshore Funds
69. Unit Trusts

Volume 6

70. Life Policies and Contracts
71. Intermediated Securities
72. Investment Manager Exemptions
73. Investment Management Fees & Carried Interest

Inheritance Tax

74. IHT Terms and Concepts
75. Excluded Property: Definition
76. Excluded Property Exemptions
77. Wills and IOVs
78. Reservation of Benefit
79. Inter-trust Transfers: IHT
80. IHT Deduction for Debts
81. IHT Close-company Code
82. IHT Residential Property Code
83. Pe-owned Assets
84. Pension Schemes and IHT

Entities

85. Partnerships
86. Partnership Income Attribution

Volume 7

87. Settlement, Bare Trust and Associated Terminology
88. Estates of Deceased Persons: CGT
89. Estates of Deceased Persons: Income Tax
90. Foreign Entities
91. Hybrid Entities

Concepts & topics affecting more than one tax

92. Protected Trusts
93. Non-dom/Non-resident Spouse
94. Joint Accounts
95. Foreign Currency Issues
96. Cryptoassets

97. Unremittable Assets
98. ATED and SDLT
99. Who is the Settlor?
100. Multiple Settlors

Volume 8

101. Statutory Tax Indemnities
102. Situs of Assets for IHT
103. Situs of Assets for CGT
104. Control, Connected, Close and Related Expressions
105. Participation and % Interest Tests
106. Permanent Establishment and Branch/Agency

Double Taxation Agreements: IT/CGT

107. Double Taxation Arrangements: Introduction
108. DTA Anti-Abuse Rules
109. Third Party Relief/Savings Clause
110. Limitation on Benefits
111. Credit for Foreign Tax
112. Non-discrimination
113. Mutual Agreement Procedure

Double Taxation Agreements: IHT

114. IHT Double Taxation Treaties: Introduction
115. IHT DTAs: India, Pakistan, Italy, France
116. IHT DTA: Netherlands
117. IHT DTA: South Africa
118. IHT DTA: Switzerland
119. IHT DTA: USA
120. Credit for Foreign IHT

Administration

121. Reporting and Compliance
122. Tax Return Filing Position
123. Claims
124. Collection of Tax from UK Representatives

Volume 9

125. Reporting and Compliance: IHT
126. Penalties
127. Failure to Prevent Tax Evasion
128. Reporting Offshore Trusts
129. International Movement of Capital: Reports
130. Common Reporting Standard
131. Trust Registration
132. Customer Due Diligence
133. Money Laundering: POCA

Appendices

Words & Concepts

Appendix 1: Words of Dispute
Appendix 2: Common Legal Expressions
Appendix 3: Family Terminology
Appendix 4: Consideration, Arm's Length, Full Value
Appendix 5: Commercial/View to Profit
Appendix 6: Beneficial Ownership/Entitlement
Appendix 7: What Do We Mean by "Real"?

Construction of Statutes

Appendix 8: Deeming Provisions
Appendix 9: Purpose of Statute

Special Taxpayers

Appendix 10: Parliamentarians
Appendix 11: Visiting Forces
Appendix 12: Students and Teachers

Tax reform

CHAPTER FIFTY FOUR

TRANSFER OF INCOME STREAMS

54.1 Transfer of income streams
54.1.1 Income-stream codes: Navigation
54.1.2 Section numbering system
54.2 Is income transferable?
54.2.1 Income effectively transferable
54.2.2 Pre-2009 anti-avoidance rules
54.2.3 Earned income not transferrable
54.3 Application of IS code
54.4 Relevant receipts
54.5 Transfer of income, not asset
54.5.1 Annual Payments
54.5.2 Sale & repurchase agreement
54.6 "Transfer"
54.7 Charge on income-stream value
54.7.1 Relevant amount
54.7.2 Time income arises
54.8 Exceptions to charge
54.8.1 Amount otherwise taxed
54.8.2 Pension/life annuity
54.8.3 Transfer by way of security
54.8.4 Leases
54.8.5 Other exceptions
54.9 Transfer to partnership/trust
54.10 Position of transferee
54.11 Income streams: Trusts
54.12 Territorial limitation
54.13 Partnership income stream/asset
54.14 Application conditions
54.14.1 Chap 5D: Conditn B: Taxability
54.14.2 Family partnership exemption
54.14.3 Disposal
54.14.4 Associated partnership
54.14.5 Transferor/transferee
54.15 Charge on partnership transfer
54.15.1 Relevant amount: Chap 5AA
54.15.2 Relevant amount: Chap 5D
54.16 Chap 5AA/5D interaction
54.17 DT relief

54.1 Transfer of income streams

54.1.1 *Income-stream codes: Navigation*

This chapter considers the following topics:

Topic (my terminology)	**Legislation**	**Sections**
Income Tax income-stream codes	*Part 13 ITA*	
Main income-stream code	Chap 5A	809AZA-809AZG
Partnership income-stream code	Chapter 5AA	809AAZA-809AAZB
CGT: Disposal via partnership	Chapter 5D	809DZA-809DZB
CT income-stream code	*CTA*	
Company transferor	Chap 1 Part 6 CTA 2010	
Company transferee	Chap 2B Part 6 CTA 2009	

The background to the main income-stream code can be found in:

- HMRC, "Financial Products Avoidance: Consultation on Principles- Based Legislation" 2007
- HMRC, "Principles-based drafting: Transfers of Income Streams" 2009

I go beyond the themes of this book and address the topic as a whole.

54.1.2 *Section numbering system*

The ITA system of numbering sections is idiosyncratic. Section numbering begins with 809, followed by the Chapter letters, ie one of 809A/809AA/809D. The sections are then numbered ZA, ZB, etc. Hence:

- the 1st section of Chapter 5A is s.809AZA and the last is s.809AZG
- the 1st section of Chapter 5AA is s.809AAZA and the last is s.809AAZB

This is due to a misguided application of OPC drafting guidelines; see App.13.3 (Section numbering system).

54.2 Is income transferable?

It is helpful first to consider the position in the absence of the income-streams code or similar legislation.

54.2.1 *Income effectively transferable*

As a matter of property law, it is possible for a person:

(1) to transfer a right to a receipt which would constitute income (eg dividends/interest/royalties) if received by the transferor, and
(2) to do so without a transfer of the underlying asset (eg the shares/debt/ IP rights)

As a matter of tax law, in principle:

(1) The payment which the transferor receives for the transfer of the right to investment income is characterised as capital and not income.
(2) The receipt which the transferee receives is the income transferred (ie, specifically, the dividends/interest royalties).

It is helpful to coin a term for discussion here, and one may say that X **"tax-effectively transfers"** income if the transfer is effective for tax purposes as well as for property law purposes, ie:

(1) The payment which the transferor receives for the transfer is capital.
(2) The receipt of the transferee is regarded as the income transferred.

It may loosely (and pejoratively) be said that the transfer turns income into capital; but more accurately, it replaces what would have been the transferor's income receipt with a different receipt which is capital.

I say "in principle" as in two avoidance cases this analysis has been rejected, under *Ramsay* type arguments:

(1) *McGuckian v IRC*[1] concerned the sale of a right to dividends: the consideration received by the transferor for the sale was held to be income.

(2) *Hargreaves Property Holdings v HMRC*[2] concerned the sale of a right to interest: it was held that the transferee was not beneficially entitled to the interest (for the purpose of a relief from interest withholding tax). The reader may find that surprising, even in an avoidance case.

54.2.2 *Pre-2009 anti-avoidance rules*

Tax-effective transfers of income would allow scope for tax avoidance by the transferor.[3] This was countered by *ad hoc* anti-avoidance provisions, in particular:

ICTA 1988	**Topic**
s.730	Transfer of right to dividends
s.775A	Transfer of right to Annual Payments
s.785A	Transfer of chattel lease rent

EN FB 2009 provided:

> 48. These statutory rules are not comprehensive. There are also differences and inconsistencies in the way the various provisions work, and ... they have been the subject of attempts to avoid their operation.

These provisions were repealed on the introduction of the income-stream code in 2009.

54.2.3 *Earned income not transferrable*

On the other hand, certain types of income are not tax-effectively

[1] 69 TC 1.

[2] [2023] UKUT 120 (TCC); further consideration may be needed when the case is final. One might have thought that the transferor was caught by the income-stream code; this point was not raised; but why not?

[3] Of course the position of the transferee needed consideration, but I need not pursue that here.

transferable:

(1) Employment income is not tax-effectively transferable: ie if an employee assigns a right to earnings, the employee remains taxable, not the assignee.[4]

(2) Trading income is not in general tax-effectively transferable: ie if a trader sells a right to a trading receipt, the sale proceeds constitute a trading receipt, so the sale does not turn income into capital.[5] The disguised trading receipt rules need consideration; and the rules for appropriation from trading stock may also apply here.[6]

These rules are not affected by the income-stream code, because that code only applies if there would (but for the code) be a tax-effective transfer, ie:

(1) There is an effective transfer of income (a "relevant receipt")[7]

(2) The consideration for the transfer would not be subject to income tax[8]

In short, we are here considering transfers of an *investment* income stream.

[4] *RFC 2012 Plc v AG* [2017] UKSC 45 (the *Rangers* case).
Employment income of X is effectively transferable if:
(1) X ceases to be an employee and
(2) Y commences to be an employee.
But one might say that involves (in effect) a transfer of an underlying asset (the employment contract).

[5] Even consideration for an outright sale of royalties by an author carrying on a trade or profession is a receipt of the trade/profession.
Trading income of X is effectively transferable if:
(1) X ceases to trade and Y commences to trade, or
(2) X and Y commence to trade in partnership.
But that involves a transfer of the underlying asset (the trading business).

[6] On the other hand, partnership income is tax-effectively transferable, ie if a partner assigns a partnership share to a non-partner, the partner remains taxable on the partnership profits. This applies even where the partnership has no capital assets, and the income arises from the personal services of the partner. The position here has been clarified by *HMRC v BlueCrest Capital Management* [2023] EWCA Civ 1481. In a New Zealand case, a partner in a firm of accountants assigned a part of his partnership share to a non-partner. It was said that his partnership income arose from his personal services, not from the partnership agreement, and the assignment was held to be ineffective, in the sense that the income of the assigned share remained the income of the transferor for tax purposes: *Hadlee v CIR* [1993] AC 524. But *BlueCrest* decided that *Hadlee* is not applicable to UK partnership tax, which is different from that in New Zealand; see at [87].

[7] See 54.4 (Relevant receipts).

[8] See 54.8.1 (Amount otherwise taxed).

54.3 Application of IS code

EN FB 2009 provides a summary:

> 49.The new legislation sets out a general principle that a lump sum received for the sale or transfer of income stream is subject to tax in the transferor's hands in the same way that the income itself would have been (so there is no possibility of converting income into capital). The rule is subject to a number of exceptions.

Section 809AZA(1) ITA provides:

> This Chapter [Chap 5A, Income-streams code] applies where-
> (a) a person within the charge to income tax ("the transferor") makes a transfer to another person ("the transferee") of a right to relevant receipts (see subsection (2)), and
> (b) (subject to subsection (3)) the transfer of the right is not a consequence of the transfer to the transferee of an asset from which the right to relevant receipts arises.

I deal with these two conditions separately.

54.4 Relevant receipts

Section 809AZA ITA provides:

> (1) This Chapter [Chap 5A, Main income-stream code] applies where-
> (a) a person within the charge to income tax ("the transferor") makes a transfer to another person ("the transferee") of a right to relevant receipts

Section 809AZA(2) ITA provides:

> "Relevant receipts" means any income-
> (a) which (but for the transfer) would be charged to income tax as income of the transferor, or
> (b) which (but for the transfer) would be brought into account in calculating profits of the transferor for the purposes of income tax.

Relevant receipts is not a transparent term: I gloss it as relevant (income) receipts.

The CFM provides

CFM77050 Transfer Under Sale And Repurchase Agreement [Nov 2019]
Example 2 (Urban& Rural)
U Ltd sells securities to R plc under a sale and repurchase (or 'repo') agreement. Under the terms of the repo R will compensate U for not receiving the real income by the making of manufactured payments (CFM46010).
The manufactured payments represent consideration for the right to the income that U transfers as a result of the repo.
However, the income payments that are transferred are not relevant receipts. This is because relevant receipts are defined to be amounts that but for the transfer would be charged as income of the transferor. The transfer must therefore have the effect of causing the receipts not to be taxable income of the transferor. Where a sale is made under a standard repo this is not the case since the income is still treated as that of the seller - CTA09/S550. Accordingly, the transfers of income legislation will not apply.

54.5 Transfer of income, not asset

Section 809AZA ITA provides:

> (1) This Chapter applies where ...
> (b) (subject to subsection (3))[9] the transfer of the right is not a consequence of the transfer to the transferee of an asset from which the right to relevant [income] receipts arises.

The legislation distinguishes:
(1) A right to relevant (income) receipts
(2) An asset from which the right to relevant receipts arises

This is not always an easy distinction.

It is considered that a usufruct is an asset from which the right to relevant receipts arises, so the grant of a usufruct is not caught by the main income-stream code.

The CFM gives two straightforward examples: (1) sale of a business (not caught); (2) sale of a right to licence fees (caught).

CFM77030 Company Transferors [Nov 2019]
Example 1
A Ltd sells a picture-framing business to B. This includes assigning the

[9] See 54.5.1 (Annual Payments).

> lease for the premises and the sale of equipment and stock and the transfer of a number of income-producing assets.
>
> Although, there has, in a sense, been a transfer of an income stream from A Ltd to B (that is, the trading income), the transfer of income streams provisions will not apply. The underlying income-producing assets have been sold.
>
> **Example 2**
>
> C Ltd has a software development and consultancy business. In the course of the trade, the company develops a computer program in which there is commercial interest. C Ltd sets up a subsidiary company, D Ltd, to exploit and market the software.
>
> C Ltd enters into a licensing agreement granting D Ltd a 25-year licence on the source code and intellectual property rights in the software, in exchange for a licence fee paid quarterly. The agreement does not require C Ltd to further develop or maintain the software, or supply technical advice to users - this is all done by D Ltd.
>
> The licence fees are agreed to form part of C Ltd's trading income, and are reflected in the amount it returns as trading profits.
>
> C Ltd sells the right to the quarterly licence fees paid by D Ltd to an unconnected company, E Ltd.
>
> Depending on the facts of the case, the sale proceeds may be treated as trading income on first principles.

That is, D Ltd might be carrying on a trade.

> However, if they are not, then this is a sale of a right to relevant receipts without the transfer of the underlying asset and C Ltd should include the payment for the right to the income as trading income by virtue of S753(1).

54.5.1 *Annual Payments*

Section 809AZA(3) ITA provides:

> Despite paragraph (b) of subsection (1), this Chapter [Chap 5A, Main income-stream code] applies if the transfer of the right is a consequence of the transfer to the transferee of all rights under an agreement for annual payments ...

See 31.1 ("Annual Payment").

The CFM provides

> **CFM77040 Rights Under Agreement For Annual Payment** [Nov 2019]
>
> CTA10/S752(3) contains an exception to the requirement that the

> underlying asset is not transferred.

The CFM explains why:

> If the asset consists of all the rights under an agreement for annual payments then such an agreement is indistinguishable from a right to relevant receipts. So it is appropriate to treat the outright transfer of the agreement in the same way as a transfer of the right to relevant receipts. The transfer of all rights under an agreement for annual payments was previously taxed as income under ICTA88/S775A, which is repealed at FA09/SCH25/PARA9(1)(b).

The reader may doubt whether this policy argument is correct. The approach under the pre-2009 rules does not count for much, as the object of the income-stream code was said to be to rationalise inconsistent rules. But there it is. The point will not often arise.

> This rule applies only where the income that is transferred constitutes annual payments in the hands of the transferor. Where the transferor carries on a trade and the income stream would not have been pure income profit in his hands, S752(3) does not apply.
> **Example**
> Example 2 at CFM77030 describes the transfer of the right to licence fees from the holder of the licence, C Ltd, a trading company, to an unconnected company, E Ltd.
> If E Ltd does not carry on a trade then the fees are annual payments in its hands; they represent pure income profit.[10]
> If E Ltd then transfers the right to these annual payment to a third company, G Ltd, this may be the transfer of all rights under an agreement for annual payments.
> S752(3) makes it clear that, despite the fact that the underlying asset consists of all rights under an agreement for annual payments and this is what E Ltd transfers to G Ltd, the provisions of S753 apply.

54.5.2 *Sale & repurchase agreement*

Section 809AZA ITA provides:

> (3) ... for the purposes of that paragraph [s.809AZA(1)(b)[11]] the transfer of an asset under a sale and repurchase agreement is not to be regarded

[10] Whether or not the payments are Annual Payments is a complex issue, which depends on facts not supplied in the example; see 31.3.2 (Pure income profit).

[11] See 54.5 (Transfer of income, not asset).

> as a transfer of the asset.

The CFM provides

> **CFM77050 Transfer Under Sale And Repurchase Agreement** [Nov 2019]
> CTA10/S752(3) ensures that where a transfer of an asset is made under an agreement that provides for its repurchase, then for the purposes of S752(1) the asset is to be treated as not having been transferred.
> The legislation contains no definition of sale and repurchase agreement. HMRC considers that the expression covers not just agreements where there is a binding obligation to repurchase but to agreements that have the same practical effect (such as linked put and call options where it will always be a benefit for one party to exercise their option).

I think the last sentence is doubtful.

> It covers sale and repurchase of securities, but goes far wider.
> **Example 1**
> Town Ltd enters into a sale and repurchase agreement with Country Ltd under which an income generating asset is sold and repurchased. The income stream is retained by Country Ltd (and the consideration received by Town Ltd reflects that fact). Although the underlying asset is 'transferred', Town Ltd knows at all times that it will get it back and the effect of S752(3) is that the asset is treated as not having been transferred. So Town Ltd will be chargeable under S753 on the 'relevant amount' (see CFM77060).

54.6 "Transfer"

Section 809AZG ITA provides:

> (3) In this Chapter [Chap 5A, Main income-stream code]—
> (a) references to a transfer include
> [i] sale, exchange, gift and assignment (or assignation) and
> [ii] any other arrangement which equates in substance to a transfer, and

It is difficult to see the point of para [i], but it does no harm.

> (b) references to a transfer taking place are, in the case of an arrangement other than a sale, exchange, gift or assignment (or assignation), to the making of the arrangement.

I would have thought that was self-evident, but it does no harm.

A waiver of interest is not a transfer, or equivalent in substance to a transfer, so is not caught by the income-stream code. A waiver of a dividend might be equivalent in substance to a transfer if the consequence is that another shareholder receives a waiver-enhanced dividend.[12]

54.7 Charge on income-stream value

Section 809AZB(1) ITA provides:

> The relevant amount (see subsection (2)) is to be treated as income of the transferor chargeable to income tax in the same way and to the same extent as that in which the relevant [income] receipts-
> (a) would have been chargeable to income tax, or
> (b) would have been brought into account in calculating any profits for the purposes of income tax,
> but for the transfer of the right to relevant [income] receipts.

There is no purpose or motive defence.

54.7.1 *Relevant amount*

Section 809AZB(2) ITA provides:

> The relevant amount is-
> (a) (except where paragraph (b) applies) the amount of the consideration for the transfer of the right, or
> (b) where the amount of any such consideration is substantially less than the market value of the right at the time when the transfer takes place (or where there is no consideration for the transfer of the right), the market value of the right at that time.

Relevant amount is not a transparent term. I gloss it as relevant amount (consideration).

54.7.2 *Time income arises*

Section 809AZB(3) ITA provides:

> The income under subsection (1) is to be treated as arising in the chargeable period of the transferor in which the transfer takes place.

This differs from corporation tax where the default rule is that the income is to be allocated in accordance with accountancy practice.

[12] See 99.19 (Dividend-waiver settlement). Strictly speaking one might say that this is not a transfer of "a right"; but if "transfer" is widely defined, "right" should not be strictly construed.

The accountancy approach applies to trading/property income. Section 809AZB ITA provides:

> (4) But subsection (5) applies if (apart from the transfer) any of the relevant [income] receipts-
> (a) would have been brought into account in accordance with Part 2 or 3 of ITTOIA 2005 (trading income and property income) in calculating any profits for the purposes of income tax, and
> (b) in accordance with generally accepted accounting practice, would have been recognised otherwise than wholly in the chargeable period in which the transfer takes place.
>
> (5) If this subsection applies, the income under subsection (1) is to be treated as arising-
> (a) to the extent that it does not exceed the amount of the consideration for the transfer of the right, in the chargeable period or periods for which, in accordance with generally accepted accounting practice, the consideration for the transfer is recognised for accounting purposes in a profit and loss account or income statement of the transferor, and
> (b) otherwise, in the chargeable period or periods for which, in accordance with generally accepted accounting practice, the consideration for the transfer would be so recognised if it were of an amount equal to the market value of the right at the time when the transfer takes place.
>
> (6) But if in a case where the transferor is a company it at any time becomes reasonable to assume that the income (to any extent) is not, or would not be, treated by subsection (5) as arising in an accounting period of the transferor, the income is to that extent to be treated as arising immediately before that time.

54.8 Exceptions to charge

54.8.1 *Amount otherwise taxed*

Section 809AZC ITA provides:

> This Chapter [Chap 5A, Main income-stream code] does not apply if and to the extent that the income under section 809AZB(1) is (apart from this Chapter)-
> (a) charged to tax as income of the transferor,
> (b) brought into account in calculating the profits of the transferor, or
> (c) brought into account under CAA 2001.

The wording follows the definition of relevant receipt.[13] So settlor-interested trust rules have priority over the income-stream code.

54.8.2 *Pension/life annuity*

Section 809AZD provides:

> This Chapter [Chap 5A, Main income-stream code] does not apply to a transfer of a right to-
>
> (a) annual payments under a life annuity as defined in section 473(2) of ITTOIA 2005, or
>
> (b) annual payments under an annuity which is pension income within the meaning of Part 9 of ITEPA 2003 (see section 566(2) of that Act).

54.8.3 *Transfer by way of security*

Section 809AZE ITA provides:

> (1) This Chapter [Chap 5A, Main income-stream code] does not apply if-
>
> (a) the consideration for the transfer is the advance under a type 1 finance arrangement, and
>
> (b) the transferor is, or is a member of a partnership which is, the borrower in relation to the arrangement.
>
> (2) This Chapter does not apply if-
>
> (a) the consideration for the transfer is the advance under a type 2 finance arrangement or a type 3 finance arrangement, and
>
> (b) the transferor is a member of the partnership which receives that advance under the arrangement.
>
> (3) In this section-
>
> "type 1 finance arrangement" has the meaning given for the purposes of Chapter 5B by section 809BZA,
>
> "type 2 finance arrangement" has the meaning given for the purposes of Chapter 5B by section 809BZF, and
>
> "type 3 finance arrangement" has the meaning given for the purposes of Chapter 5B by section 809BZJ.

54.8.4 *Leases*

Section 809AZG(1) ITA provides:

> For the purposes of this Chapter [Chap 5A, Main income-stream

[13] See 54.4 (Relevant receipts).

> code]—
> (a) the grant or surrender of a lease of land is to be regarded as a transfer of the land, and
> (b) the disposal of an interest in an oil licence (within the meaning of section 809 of CTA 2009) is to be regarded as a transfer of the oil licence.

The CFM provides a straightforward example:

> **CFM77110 Transfers Of Certain Interests In Assets Regarded As Transfers Of Underlying Asset** [Nov 2019]
> Example
> Q Ltd is the tenant of property and the freehold is held by R Ltd. R grants a lease of the property to S Ltd, still subject to the sublease with Q Ltd. In this way R Ltd has transferred an income stream - the rentals from the sublease - to S Ltd.
> S757(1)(a) puts it beyond doubt that this is treated as a transfer of the asset from which the rental income from the sublease stems, so that the provisions of S753 do not therefore apply.

54.8.5 *Other exceptions*

Section 809AZG(2) ITA provides:

> The Treasury may by order make other provision for securing that other transactions are to be regarded as transfers of assets for those purposes.

No order has been made.

54.9 Transfer to partnership/trust

Section 809AZG(4) ITA provides:

> [a] A transfer to or by any partnership of which the transferor or transferee is a member, and
> [b] a transfer to the trustees of any trust of which the transferor is a beneficiary,
> counts as a transfer in relation to which this Chapter [Chap 5A, Main income-stream code] applies.

A gratuitous transfer to a trust of which the transferor is a beneficiary would in principle be caught by s.624 (settlor-interested trust code).
The income-stream rule can apply to a transfer for full consideration.

54.10 Position of transferee

Where the transferee is a company it is taxable only on its accounting profit from acquiring the income stream. This will generally be the difference between the cost of the income stream and the amount of income it actually receives. However, there is no similar relief or special treatment for a non-corporate transferee. The double taxation is presumably deliberate.

The reader may think that "principles-based" drafting is somewhat selective in its choice of principles.[14]

54.11 Income streams: Trusts

SAIM provides:

> **SAIM11040 Non-Corporate Transferors: Trust Issues** [Dec 2019]
> The transfers of income streams legislation applies only where the income which is transferred ceases to be taxable income of the transferor. The creation of an interest in possession by the trustees of a discretionary trust does not prevent the income being income of the trustees for the purposes of income tax.

The creation of an interest in possession - typically by deed of appointment - is not a transfer but it might, conceivably, be an arrangement which is in substance a transfer. Once one abandons legal concepts and looks for substance, anything becomes possible.[15]

> Similarly, a transfer by trustees of an existing interest in possession from one life tenant to another (?) does not prevent the income from being income of the trustees for income tax purposes. In both these cases the trustees remain taxable up to the basic rate as being in receipt of the income of the interest in possession part of the trust. This means that the transfers of income streams legislation will not apply to these transfers of income by trustees of a trust.
> If the beneficiary of a discretionary trust or an interest in possession trust sells their interest, they are transferring the asset from which the right to income arises. The underlying asset from which the right to relevant receipts arises is the interest in possession. Because the transfer of the income is the consequence of the transfer of an asset the transfers of income streams provisions will not apply.
> A discretionary beneficiary has no right to income, only a hope. Although he or she may be able to sell that interest to someone else (?) there is no transfer of a right to income. Even if there were such a

[14] See App 1.6 (Principles-based drafting).
[15] See App 7.6 (Real nature of transaction).

> transfer then the same reasoning as above would lead to the conclusion that the transfer is the consequence of the transfer of an asset from which the right arises.
>
> Where income to which a beneficiary is already beneficially entitled is mandated to him by the trustees then there is no transfer of a right since the beneficiary's right to the income already exists. Again the transfers of income streams legislation will not apply.

The author is this passage was not familiar with trust law or terminology. But clearly the income-stream code is not aimed at exercises of a power of appointment, and HMRC do not intend to apply it there.

The CFM provides:

> **CFM77030 Company Transferors** [Nov 2019]
>
> ... The transfer of income must be the consequence of the transfer of a right, and not simply an application of the transferor's income. So the legislation will not apply where, for example, trustees of a trust distribute trust income or apply trust income for the benefit of a beneficiary where the trustees remain liable to tax in respect of the income. ...

54.12 Territorial limitation

Section 809AZA ITA provides:

> (1) This Chapter [Chap 5A, Main income-stream code] applies where-
>
> (a) a person within the charge to income tax ("the transferor") makes a transfer

The transferor must be "within the charge to income tax".

A non-resident transferring a foreign income stream is not caught because:

(1) It is not "within the charge to IT".

(2) The foreign income stream would not be charged to income tax as income.

The same applies to a transfer during the overseas part of a split year.

The temporary non-residence rules do not apply.

A remittance basis taxpayer is within the charge to IT. The remittance basis applies, on the basis that the charge applies in the same way, and to the same extent, as the charge on relevant (income) receipts.[16]

[16] See 54.7 (Charge on income-stream value).

54.13 Partnership income stream/asset

Section 809AZF(1) ITA provides:

> For the purposes of this Chapter [Chap 5A, Main income-stream code] a transfer of a right to relevant receipts consisting of the reduction in a transferor's share in the profits or losses of a partnership is to be regarded as a consequence of a transfer of an asset from which the right arose (that is, the partnership property)

The result is (in short) to take partnerships outside the main income-stream code. Instead there is now a separate code.

The background can be found in consultation and response papers:[17]

- Partnerships: A review of two aspects of the tax rules (May 2013)
- Partnerships: A review of two aspects of the tax rules: Summary of Responses (Dec 2013)

These are now of historical interest only.

HMRC say:

> The legislation is designed to counter 'tax attribute' schemes involving the transfer of assets and income streams through or by partnerships. These schemes do not rely necessarily on the partnership comprising mixed membership [ie both a company and individuals], although mixed membership partnerships are within the scope of the rules. The transferor and transferee members may have different tax attributes if, for example:
>
> - the transferee is a company and the transferor is an individual
> - the transferee has losses to use whereas the transferor does not
> - the transferee and transferor are subject to different rate of tax
> - transferor and transferee are subject to differing tax computational rules in relation to the asset or income
>
> Where there is a disposal of an asset or income stream through or by a partnership and a main purpose is to secure an Income Tax or Corporation Tax advantage, the rules will impose a charge to tax on income on the person making the disposal.[18]

[17] *https://www.gov.uk/government/consultations/a-review-of-two-aspects-of-the-tax-rules-on-partnerships*

[18] *https://www.gov.uk/government/publications/mixed-membership-partnership-aifms-and-asset-disposal-rules-legislation-day-technical-note-and-guidance/partnerships-a-review-of-two-aspects-of-the-tax-rules#assets-income-streams*

It may be helpful to read the two Chapters on partnerships(5AA/5D) side by side.

In this area advisors also need to consider:

Settlor-interested trust code	99.21
Mixed partnership rules	86.3

54.14 Application conditions

s. 809AAZA(1) ITA	**s.809DZA ITA**
This Chapter [Chapter 5AA, partnership income streams] applies (subject to subsection (2)) if	(1) This Chapter [Chapter 5D, Asset disposed via partnership] applies if conditions A and B are met.
	(2) Condition A is (subject to subsection (3)) that
directly or indirectly in consequence of, or otherwise in connection with, arrangements[19] involving a person within the charge to income tax ("the transferor") and another person ("the transferee")—	directly or indirectly in consequence of, or otherwise in connection with, arrangements involving a person within the charge to income tax ("the transferor") and another person ("the transferee")—
(a) there is, or is in substance, a disposal of a right to relevant receipts[20] by the transferor to the transferee,	(a) there is, or is in substance, a disposal of an asset ("the transferred asset") by the transferor to the transferee,
(b) the disposal is effected (wholly or partly) by or through a	(b) [identical]

[19] Section 809AAZA(8)/809DZA(13) provide the standard (unnecessary) IT definition of "arrangements"; see App 2.2.3 (Definitions of "arrangement").

[20] Section 809AAZA(8) provides: "In this Chapter [Chapter 5AA, Partnership income-stream code]—

"relevant receipts" means any income—

(a) which (but for the disposal) would be charged to income tax as income of the transferor (whether directly or as a member of a partnership), or

(b) which (but for the disposal) would be brought into account as income in calculating profits of the transferor (whether directly or as a member of a partnership) for income tax purposes".

This is based on the Chapter 5A definition; see 54.4 (Relevant receipts).

partnership[21] (“the relevant partnership”),	
(c) at any time— (i) the transferor is a member of the relevant partnership or of a partnership associated with the relevant partnership, and (ii) the transferee is a member of the relevant partnership or of a partnership associated with the relevant partnership, and	(c) [identical]
(d) the main purpose, or one of the main purposes, of one or more steps taken in effecting the disposal is the obtaining of a tax advantage[22] for any person.	(d) [identical]

54.14.1 *Chap 5D: Condit^{n} B: Taxability*

Section 809DZA(9) ITA provides:

> Condition B is that it is reasonable to assume that, had the transferred asset instead been disposed of directly by the transferor to the transferee, the relevant amount [consideration] (or any part of it)—
> (a) would have been chargeable to income tax as income of the transferor, or
> (b) would have been brought into account as income in calculating profits of the transferor for income tax purposes.

There is no equivalent for Chapter 5AA (partnership income-stream code).

54.14.2 *Family partnership exemption*

s.809AAZA(2) ITA	**s.809DZA(3) ITA**
This Chapter [Chapter 5AA,	Condition A is not met if—

[21] Section 809AAZA(8)/809DZA(13) provide: “partnership” includes a limited liability partnership whether or not section 863(1) of ITTOIA 2005 applies in relation to it.

[22] Section 809AAZA(8)/809DZA(13) provide:
“tax advantage” means a tax advantage, as defined in section 1139 of CTA 2010, in relation to income tax or the charge to corporation tax on income.
See 3.19.1 (Tax advantage: Definitions).

Partnership income-stream code] does not apply if—	
(a) the transferor is the spouse or civil partner of the transferee and they are living together,[23] or (b) the transferor is a brother, sister, ancestor or lineal descendant of the transferee.	[identical]

Tax planning through close-family partnerships is unobjectionable.

54.14.3 *Disposal*

s.809AAZA ITA	**s.809DZA ITA**
(3) In subsection (1)(a)	(4) In subsection (2)(a)
the reference to a disposal of a right to relevant receipts includes anything constituting a disposal of such a right for the purposes of TCGA 1992.	the reference to a disposal of an asset includes anything constituting a disposal of an asset for the purposes of TCGA 1992.
(4) For the purposes of subsection (1)(b)	(5) For the purposes of subsection (2)(b)
the disposal might, in particular, be effected by an acquisition or disposal of, or an increase or decrease in, an interest in the relevant partnership (including a share of the profits or assets of the relevant partnership or an interest in such a share).	[identical]

54.14.4 *Associated partnership*

s.809AAZA ITA	**s.809DZA ITA**
(5) For the purposes of subsection (1)(c)	(6) For the purposes of subsection (2)(c)

[23] See App 3.4.3 (Living together: married couple).

it does not matter if the transferor and the transferee are not members of a partnership as mentioned at the same time.	[identical]
(6) For the purposes of subsection (1)(c)	(7) For the purposes of subsection (2)(c)
a partnership is "associated" with the relevant partnership if— (a) it is a member of the relevant partnership, or (b) it is a member of a partnership which is associated with the relevant partnership (whether by virtue of paragraph (a) or this paragraph).	[identical]

54.14.5 *Transferor/transferee*

s.809AAZA ITA	**s.809DZA ITA**
(7) In subsections (1)(c) and (5)	(8) In subsections (2)(c) and (6)
references to the transferor include a person connected with the transferor and references to the transferee include a person connected with the transferee.	[Identical]

54.15 Charge on partnership transfer

s.809AAZB ITA	**s.809DZB ITA**
(1) The relevant amount [consideration] is to be treated as income of the transferor chargeable to income tax in the same way and to the same extent as that in which the relevant receipts—	(1) The relevant amount [consideration] is to be treated as income of the transferor chargeable to income tax in the same way and to the same extent as that in which it—
(a) would have been chargeable to income tax as income of the transferor, or	(a) would have been chargeable to income tax as income of the transferor, or

(b) would have been brought into account as income in calculating profits of the transferor for income tax purposes,	(b) would have been brought into account as income in calculating profits of the transferor for income tax purposes,
but for the disposal.	as mentioned in section 809DZA(9).[24]

In the case of Chapter 5DD, one might have expected a CGT charge, as it is CGT which is avoided.

54.15.1 *Relevant amount: Chap 5AA*

Section 809AAZB ITA provides:

> (2) In subsection (1)
> [a] "the relevant amount" is to be read in accordance with section 809AZB(2)[25] and
> [b] section 809AZB(3) to (6) applies for the purpose of determining when income under subsection (1) is treated as arising.[26]
> (3) For this purpose, in section 809AZB(2) to (6) references to the transfer of the right are to be read as references to the disposal of the right.

Section 809DZB(2) ITA provides:

> Section 809AZB(3) to (6) applies for the purpose of determining when income under subsection (1) is treated as arising (reading references to the transfer of the right as references to the disposal of the transferred asset).

54.15.2 *Relevant amount: Chap 5D*

Section 809DZB provides:

> (10) In this Chapter [Chapter 5D, Asset disposed via partnership] "the relevant amount" means the amount of the consideration received by the transferor for the disposal.
> (11) If the transferor receives—
> (a) no consideration for the disposal, or
> (b) consideration which is substantially less than the market value

[24] See 54.14.1 (Chap 5D: Condit^{n} B: Taxability).

[25] See 54.7.1 (Relevant amount).

[26] See 54.7.2 (Time income arises).

of the transferred asset,

assume for the purposes of subsection (10) that the transferor receives consideration of an amount equal to the market value of the transferred asset.

(12) In subsection (11) references to the market value of the transferred asset are to that value at the time of the disposal.

54.16 Chap 5AA/5D interaction

s.809AAZB	**s.809DZB ITA**
(4) If, apart from this subsection and section 809DZB(3)—	(3) If, apart from this subsection and section 809AAZB(4)—
(a) both this Chapter [Chapter 5AA, Partnership income-stream code] and Chapter 5D [Asset disposed via partnership] would apply in relation to the disposal, and	(a) both this Chapter [Chapter 5D, Asset disposed via partnership] and Chapter 5AA [Partnership income-stream code] would apply in relation to the disposal, and
(b) Chapter 5D [Asset disposed via partnership] would give a greater amount of income of the transferor chargeable to income tax,	(b) Chapter 5AA [Partnership income-stream code] would give the same amount, or a greater amount, of income of the transferor chargeable to income tax,
this Chapter [Chapter 5AA] is not to apply in relation to the disposal.	this Chapter [Chapter 5D] is not to apply in relation to the disposal.

The larger of the two charges prevails. But this will not happen often.

54.17 DT relief

If the transferor is treaty-resident in a foreign state with a DTA in OECD Model form, DT relief will in principle be available under art 13 (Capital gains) or art 21 (Other Income).[27]

[27] See 33.20 (DT relief: "Other Income"); 56.23 (DT relief for capital gains).

- 55.17.6 Appeals

55.18 TiS clearance
- 55.18.1 Effect of clearance
- 55.18.2 Disclosure for valid clearance

55.1 Transactions in securities

This chapter considers the "lengthy and complicated"[1] topic of transactions in securities.

There are two sets of rules:

Tax	Provisions	Term (my terminology)
IT	Chap 1 Part 13 ITA: s.682-713	IT TiS code
CT	Part 15 CTA 2010: s.731-751	CT TiS code

The two codes diverged in 2010.[2] They have some terminology in common, but are now essentially distinct. It would be accurate to refer to TiS code (in the singular) before 2010, and codes (in the plural) after that date. But perhaps that is pedantic.

On the CT code, the textbook *Taxation of Companies and Company Reconstructions* (TCCR) states:[3]

> The CT provisions have long fallen into what appears to be complete disuse. The only way in which these provisions could realistically be brought to bear would be if the avoidance of corporation tax on capital gains (as well as income) was within their scope, but it is not...[4]

In 2009 HMRC promised to publish guidance "which meets our customers' requirements for certainty and clarity" but that never materialised.[5]

[1] *IRC v Laird Group* [2003] UKHL 54 at [13]. By the standards of modern anti-avoidance provisions the TiS code is not lengthy, and no more than averagely complicated. But the case law is lengthy and complicated, as:
(1) There are more cases than any other anti-avoidance code.
(2) The cases often concern complicated schemes.
(3) The TiS code has had a complicated evolution, which makes it hard to identify which points discussed in old case law may be relevant to TiS now.
(4) In order to understand the cases one needs to know what the tax analysis would be in the absence of TiS; this is often complicated, and older cases require a knowledge of long-obsolete tax rules.

[2] This was preceded by a consultation paper: HMRC, "Simplifying Transactions in Securities Legislation" (2009) *https://www.taxation.co.uk/docs/default-source/file/TransactionsSecuritiesLegislation.pdf*

[3] Looseleaf para W6.1.2.

[4] See 55.11.2 (CT/CGT advantage).

[5] The 2009 consultation paper sets out the structure of proposed guidance, but not its contents, so there is no help to be found there.

The IT TiS code was rewritten (again) in 2016. The 2016 reforms were preceded by shallow HMRC consultation and response documents[6] but these shed little light on the provisions. I do not consider the pre-2016 version of the rules, but for some time yet, cases on pre-2016 transactions will continue to come to the Courts, and so will need to be reviewed to see their relevance to the present law. Such are the appalling delays in tax litigation.

I go beyond the themes of this book and address the IT code as a whole, if not in full detail. I consider the CT code only when it sheds light on the IT code or on other themes of this book.

55.1.1 *TiS definitions: Navigation*

Defined term	**See para**
Company/Close Company	55.2.1
Dividend/distribution	55.2.2
Associate	55.2.3
Security	55.3.1
Transaction in securities	55.3.2
Relevant person	55.5.1
Transfer of Company Assets (my term)	55.6.1
Consideration/Relevant Consideration	55.9

55.1.2 *Construction of TiS code*

The provisions are broad and the courts construe them broadly.[7] In *IRC v Parker*:[8]

> The Statute mounted a massive attack against tax avoidance in many forms. One type of tax avoidance transaction at which the Act is evidently aimed is that generically known as 'dividend stripping'… I do not find it possible to discern in this Act any indication that it was the purpose of the legislature to limit it to any specific form of tax avoidance… we must take the Act as we find it and endeavour to see

[6] HMRC, "Company distributions: consultation document" (2015) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/483547/Company_distributions_-_consultation_document__7029_.pdf*
HMRC, "Company distributions: summary of responses" (2016) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/510263/Company_distributions_-_summary_of_responses.pdf*

[7] Contrast 48.2 (Construction of ToA provisions).

[8] 43 TC 396 at p.440.

> what it fairly covers.

Nowadays that would seem self-evident, though not in 1966, when *Parker* was decided. But the Courts have gone further. In *IRC v Joiner*:[9]

> ... the sections called for a different method of interpretation from that traditionally used in taxing Acts. For whereas it is generally the rule that clear words are required to impose a tax, so that the taxpayer has the benefit of doubts or ambiguities ... the scheme of the sections, introducing as they did a wide and general attack on tax avoidance, required that expressions which might otherwise have been cut down in the interest of precision were to be given the wide meaning evidently intended, even though they led to a conclusion short of which judges would normally desire to stop.

In *Greenberg v IRC*:[10]

> We seem to have travelled a long way from the general and salutary rule that the subject is not to be taxed except by plain words. But I must recognise that plain words are seldom adequate to anticipate and forestall the multiplicity of ingenious schemes which are constantly being devised to evade taxation. Parliament is very properly determined to prevent this kind of tax evasion[11] and, if the courts find it impossible to give very wide meanings to general phrases, the only alternative may be for Parliament to do as some other countries have done, and introduce legislation of a more sweeping character which will put the ordinary well-intentioned person at much greater risk than is created by a wide interpretation of such provisions as those which we are now considering.

What Lord Reid feared was a GAAR, which has now come to pass. Perhaps, but for his approach, it would have come sooner? or in a wider form which put the "ordinary well-intentioned person" at risk? or at greater risk? Discuss.

The TiS code may apply to:

(1) transactions which are not artificial or contrived; and
(2) transactions carried out on the open market.[12]

[9] 50 TC 449 at p. 480.

[10] 47 TC 240.

[11] Nowadays one would say "avoidance" not "evasion", see 2.2.2 (Avoidance/evasion distinction).

[12] This is self-evident but if authority is needed, see *Sema Group Pension Scheme v IRC* [2002] EWCA Civ 1857 at [91].

In *Grogan v HMRC:*[13]

> [The TiS code] should be construed purposively, to give effect to their self-evident objective of preventing disguised income receipts from being treated as capital (with or without the assistance of third parties).

Grogan rejected the argument that prescriptive tax codes by implication excluded the TiS code.[14] It is a matter of construction in each case, so it is theoretically possible that some codes might by implication exclude the TiS code, in some cases; but a strong case would be needed to justify that conclusion.

55.2 Minor definitions

It is helpful first to clear some minor definitions out of the way.

55.2.1 *"Close company"*

The TiS code is (broadly) restricted to close companies, because Circumstances A and B can only be met by transactions involving close companies.

Section 713(1) ITA provides:

> In this Chapter [Chapter 1 Part 13] ...
> "close company" includes a company that would be a close company if it were resident in the UK

This is a standard form.[15]

Section 713(1) continues:

> "company" includes any body corporate

This is not the standard definition of company. It is probably just for historical reasons.[16] It seems wider than the standard definition[17] because it does not have the exclusion for partnerships. Could a LLP fall within TiS? on the grounds that:

(1) it is a body corporate so

[13] [2010] UKUT 416 (TCC) at [79]:

[14] See at [114]. *Grogan* concerned the code for qualifying employee share ownership trusts.

[15] See 104.29.1 (Non-resident close company).

[16] This goes back to s.43 FA 1960, when there was no taxes-act wide definition of "company" (indeed there was no taxes act).

[17] See 90.8 (Definition of "company").

(2) it is a "company" for TiS purposes (or even a company in the general sense, the TiS definition being an inclusive one).

The answer must be no, for a variety of reasons any one of which would suffice:

(1) Although a LLP is a body corporate as a matter of general law, it is (generally) treated as a partnership, and so a non -body corporate, for IT purposes.
(2) Even if a LLP is a company for TiS purposes, it is not a close company
(3) Even if a LLP is a close company for TiS purposes, it is transparent for IT purposes, so it is not within the object of TiS, and cannot give rise to an IT advantage.

It would be a simplification to repeal the TiS definition and allow the standard tax definition of company to apply; but it does not much matter.

55.2.2 *Dividend/distribution*

The word dividend matters only for the definition of Relevant Consideration (which must, in short, represent the value of "assets which are available for distribution by way of dividend".

Section 713(1) ITA provides:

> In this Chapter [Chapter 1 Part 13]
> "dividends" includes references to other distributions and to interest...

Thus the word "distribution" is defined on two occasions, but only for the specific purposes of:

(1) The definition of dividend (above)
(2) The definition of IT Advantage

These definitions (slightly) modify the standard tax definition of distribution,[18] and are effectively identical:

s.713(2) ITA: defining dividend	**s.687(4) ITA: defining IT advantage**
In the definition of "dividends" given by subsection (1), "other distributions" does not include	In this section ... "distribution" does not include
a distribution which is a distribution	a distribution which is a distribution

[18] For the standard definition see 30.4 ("Distribution").

for the purposes of the Corporation Tax Acts only because it falls within paragraph C or D in section 1000(1) (redeemable share capital or security issued as bonus in respect of shares in, or securities of, the company).	for the purposes of the Corporation Tax Acts only because it falls within paragraph C or D in section 1000(1) of CTA 2010 (redeemable share capital or security issued as bonus in respect of shares in, or securities of, the company).

See 30.5.3 (Para C/D: Issue of securities).

Where the word distribution is used elsewhere, the standard tax definition applies.

55.2.3 *"Associate"*

"Associate" matters for:

(1) The exemption for fundamental change of ownership
(2) The definition of IT advantage, in the cap on consideration

Section 713(1) ITA provides:

> In this Chapter [Chapter 1 Part 13] ...
> "associate"[19]
> [a] is to be construed in accordance with section 681DL,
> [b] but as if subsection (4) of that section also included, as persons associated with each other, a person as trustee of a settlement and an individual, where one or more beneficiaries of the settlement are connected or associated with the individual

Amended as s.713(1) directs, s.681DL(2) ITA provides:

> Persons are associates if they are associated with each other.

Section 681DL(3) ITA deals with close family:

> The following are associated with each other—
> (a) an individual and the individual's spouse or civil partner or relative,
> (b) an individual and a spouse or civil partner of a relative of the individual,
> (c) an individual and a relative of the individual's spouse or civil

[19] The word "associate" is used in the definition of control/close company with a different meaning: see 104.6 (Associates). So strictly one should not use the term without a definition; but the context may provide the definition, and in this chapter the word is used in its TiS sense.

> partner,
> (d) an individual and a spouse or civil partner of a relative of the individual's spouse or civil partner.

Relative is defined in s.681DL(7) ITA:

> For the purposes of this section—
> (a) a relative is a brother, sister, ancestor or lineal descendant

Section 681DL(4) ITA (as amended by s.713(1) ITA) deals with trusts:

> The following are associated with each other—
> (a) a person as trustee of a settlement[20] and an individual who (in relation to the settlement) is a settlor, and
> (b) a person as trustee of a settlement and a person associated with an individual who (in relation to the settlement) is a settlor.
> [c] a person as trustee of a settlement and an individual, where one or more beneficiaries of the settlement are connected or associated with the individual.

Para [c] is wider than the definition of connected person, so an individual and a trustee may be associated without being connected persons.

Section 681DL(5) ITA deals with companies and partnerships:

> The following are associated with each other—
> (a) a person and a body of persons[21] of which the person has control,
> (b) a person and a body of persons of which persons associated with the person have control,
> (c) a person and a body of persons of which the person and persons associated with the person have control,
> (d) two or more bodies of persons associated with the same person under paragraphs (a) to (c).

"Control" is not defined here, so it has its strict sense.[22] I wonder if that

[20] Subsection (7) provides: "For the purposes of this section... (c) "settlement" and "settlor" have the meanings given by section 620 of ITTOIA 2005." In my terminology "settlement" means settlement-arrangement; see 87.4 (Settlement-arrangement definition).

[21] "Body of persons" is defined in ss.(7): "For the purposes of this section... (b) a body of persons includes a partnership". A partnership is a body of persons in the general sense, but probably not within the IT definition; see 9.22.1 (Partnership a treaty-person).

[22] The default definition of control applies "in relation to the control of a body corporate or a partnership"; see 104.2.3 (Default meaning of control). We are here looking at

is deliberate or accidental.

Section 681DL(6) ITA deals with joint ownership:

> In relation to a disposal by joint owners, the joint owners and any person associated with any of them are associated with each other.

55.3 Transaction in securities

55.3.1 *"Security"*

Section 713(1) ITA provides:

> In this Chapter [Chapter 1 Part 13] ...
> "securities"—
> (a) includes shares and stock, and
> (b) in relation to a company not limited by shares (whether or not it has a share capital) also includes a reference to the interest of a member of the company as such, whatever the form of that interest[23]

This represents the normal meaning of the word.[24]

"Securities" is not limited to securities in close companies, but the TiS code is (broadly) restricted to close companies, because Circumstances A and B (as they now stand) can only be met by transactions involving close companies.

For completeness: s.685(9) ITA provides two standard definitions taken from the distribution code:

> In this section—
> "security" includes securities not creating or evidencing a charge on assets;[25]
> "share" includes stock and any other interest of a member in a company.[26]

Williams v IRC[27] involved a loan secured on a gilt. Making the loan was

the control of a body of persons, but a body of persons is a body corporate or a partnership.

[23] This only matters in exceptional cases, such as a company limited by guarantee: see 103.2.1 (No share capital).

[24] See App 2.11 (Securities).

[25] This has no real effect: see App. 2.15.1 (Legal charge irrelevant).

[26] This is only a section-wide definition so it is repeated in s.700(4) ITA. It repeats the definition in s.713.

[27] 54 TC 257.

a transaction in securities, on the basis that:

(1) the gilt was a security; and the loan related to the gilt; or

(2) the loan was itself a security.

But it is not the case that every loan is a security.[28]

55.3.2 *"Transaction in" securities*

IT TiS code: s.684(2) ITA	**CT TiS code: s.751 CTA 2010**
In this Chapter [Chapter 1 Part 13] "transaction in securities" means	(1) In this Part [Part 15 CTA 2010] ... "transaction in securities" means
[A] a transaction, of whatever description, relating to securities,	[A] transactions, of whatever description, relating to securities,
[B] and includes in particular—	[B] and in particular—
(a) the purchase, sale or exchange of securities,	[identical]
(b) issuing or securing the issue of new securities,	[identical]
(c) applying or subscribing for new securities,	[identical]
(d) altering or securing the alteration of the rights attached to securities	[identical]
(e) a repayment of share capital or share premium, and	[no equivalent]
(f) a distribution in respect of securities in a winding up.	[no equivalent]

Thus the IT/CT codes use the same term (transaction in securities) but with a different definition. So strictly one should not use the term without a definition; but the context may provide the definition. Nowadays the IT TiS code, and so the IT definition, is what matters.

In *Parker v IRC*:[29]

> The particular instances given [now s.684(2)[B]] in my opinion do not

[28] See App 2.11 ("Security").

[29] 43 TC 396 at p.431. Similarly, *IRC v Joiner*: "we must continue to give to 'transactions in securities' the widest meaning: we can neither confine these expressions to the instances given in section 467(1) [the definition section], nor can we deduce from that enumeration any limitation upon their scope.".

> in any way restrict the meaning to be given to the general words which precede them. The redemption of the debentures was, in my opinion, a transaction relating to them and so a transaction in securities as defined.

And of course "relating to" is a wide expression:

> There could hardly be a wider net connecting transactions and securities.[30]

In *IRC v Joiner*[31] rights attached to a security were altered by a liquidation agreement; that was a transaction in securities.

A purchase of own shares is a transaction in securities.[32]

In *IRC v Laird Group*:[33]

> It would not be a normal use of language to describe the payment of a fixed dividend in respect of preference shares as a transaction relating to securities; and I would at least pause before attaching such a description to the payment of interest on a debt merely because it was secured by a debenture or unsecured loan note.[34] Neither the debt nor the rights attached to it, which include the right to receive interest payable in respect of it, is affected by the payment in any way. The debt merely provides the measure of the amount to be received by way of interest. The same applies to fixed dividends payable in respect of preference shares.

The reader may find this surprising, because "normal use of language" is not applicable: we have a wide definition. But there it is. The construction may be purposive: since a dividend or interest is income and taxable under basic principles, there is no need for the TiS code to apply.

Lairdn Group rejected the submission that there can be no transaction in or relating to securities where all that happens is that rights already inherent in the securities take effect.[35]

55.3.3 *Winding-up*

A distribution in a winding-up is a transaction in securities. In this context

[30] at p.409.

[31] 50 TC 499. See too 81.7.2 (Share alteration: Consequences).

[32] This is self-evident, but for an example, see *Sema Group Pension Scheme v IRC* [2002] EWCA Civ 1857.

[33] [2003] UKHL 54,at [29].

[34] Author's footnote: This suggests that a simple debt is not a "security".

[35] at [16].

the winding-up TAAR also needs consideration.[36]

CIOT say:

> All of the transactions that the [winding-up] TAAR considers are theoretically caught by the transactions in securities rules too, now that a transaction in securities includes a distribution in respect of securities on a winding up. What we think that this will mean is that any transaction where a taxpayer self-assesses that the TAAR does NOT apply is potentially open to counteraction under the transactions in securities rules. ...
>
> It is also extremely likely that, from now on, every liquidation is going to be the subject of a transactions in securities clearance application to HMRC...[37]

A transaction which falls within a straightforward exemption to the winding-up TAAR should not fall within the TiS code, but it does seem to do so.

The CTM comments on the interaction of the two codes:

> **CTM36350 Requests For Clearance** [Feb 2018]
>
> **... Transactions in Securities**
>
> ... Where S396B/404A [winding-up TAAR] applies to a distribution in a winding-up then Income Tax is payable on the distribution, and it follows that there can be no tax advantage for the purpose of the transactions in securities legislation. That means that the transactions in securities rules cannot apply where S396B/404A does, and a clearance under ITA07/S701 cannot extend to the application of S396B/404A. But clearance may still be relevant to the extent that S396B/404A does not apply.

This is correct as far as it goes. Of course, HMRC could if they wish give a clearance that neither set of provisions should apply to a proposed transaction. But there is no statutory duty to do that, and HMRC are not minded to assist their customers on the point, perhaps understandably.

55.4 TiS application conditions

Armed with these definitions, we turn to s.684 ITA which provides:

> (1) This section applies to a person ("the party") where—
>
> (a) the person is a party to a transaction in securities or two or more

[36] See 30.14 (Winding-up TAAR).

[37] CIOT, Letter to HMRC (June 2016).

> transactions in securities[38] ...
> (b) the circumstances are
> [i] covered by section 685 [TiS Circumstances] and
> [ii] not excluded by section 686 [substantial change of ownership],
> (c) the main purpose, or one of the main purposes, of the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage, and
> (d) the party or any other person obtains an income tax advantage in consequence of the transaction or the combined effect of the transactions.

This sets out four sets of conditions (**"TiS application conditions"**). In short:

(1) A transaction in securities
(2) TiS Circumstances
(3) No substantial change of ownership
(4) An IT Advantage:
    (a) Main purpose to obtain IT Advantage
    (b) Someone obtains an IT Advantage

55.5 TiS Circumstances

Section 685(1) ITA provides:

> The circumstances covered by this section are circumstances where condition A or condition B is met.

I refer to **"TiS Circumstances"**. Thus it appears there are two types of Circumstances, A and B; but there are 3 types of Circumstance A, which I call A(a), A(b) and A(c); it is easier to regard Circumstances A & B together as 4 distinct Circumstances.

Each Circumstance contains a set of four conditions. Two of these are common to all 4 Circumstances:

(1) a relevant person receives Relevant Consideration
(2) the relevant person does not pay income tax on the Consideration

55.5.1 *"Relevant person"*

"Relevant person" matters as all 4 Circumstances require that a relevant person receives Relevant Consideration. The definition is the same for all

[38] The words "or two or more transactions in securities" are otiose, but they do no harm.

Circumstances. Section 685(3A) ITA provides:

> In subsections (2) and (3) "relevant person" means-
> (a) the party, or
> (b) any person other than the party in relation to whom the condition in section 684(1)(d) is met.

Unpacking the definition, relevant person means:
(a) The parties to the transaction in securities and
(b) Any person within s.684(1)(d),[39] in short, a person who obtains an IT Advantage[40]

55.5.2 *No IT on Consideration*

All four Circumstances require that:

> the relevant person does not pay or bear[41] income tax on the consideration

If the relevant person did pay IT, there would usually be no IT Advantage. But there might be one, eg if the person was non-resident and
(1) paid IT but only at the dividend ordinary rate or
(2) qualified for non-resident relief

55.6 TiS Circumstances A(a)(b)(c)

Condition A has four sets of requirements. Section 685(2) ITA provides:

> Condition A is that,
> [1] as a result of the transaction in securities or any one or more of the transactions in securities,
> [2] a relevant person[42] receives relevant consideration
> [3] in connection with—
> (a) the distribution, transfer or realisation of assets of a close company,

[39] See 55.11.4 (IT advantage obtained).

[40] That is, para (b) should be read as if it had commas, thus:
"any person, other than the party, in relation to whom the condition in section 684(1)(d) is met".
In other words, the phrase *"in relation to whom the condition in section 684(1)(d) is met"* governs the words "any person"; not the words "other than the party".

[41] See App.2.3.2 (Bear tax by deduction or otherwise).

[42] See 55.5.1 ("Relevant person").

(b) the application of assets of a close company in discharge of liabilities, or[43]

(c) the direct or indirect transfer of assets of one close company to another close company,

[4] and the relevant person does not pay or bear income tax on the consideration (apart from this Chapter).

55.6.1 *Transfer of Company Assets*

It is necessary to have a label for dispositions (transfers, etc) within para [3](a)(b)(c). I describe these as **"Transfers of Company Assets"**, with initial capitals to indicate a technical term. Section 685[3] contains two requirements:

(1) There must be a Transfer of Company Assets
(2) There must be a connection[44] between :
  (a) the receipt of Relevant Consideration and
  (b) the Transfer of Company Assets

Transfer of Company Assets is very wide and includes making a loan, repaying a loan, and paying a purchase price.

55.7 TiS Circumstance B

Condition B also has 4 sets of requirements. Section 685(3) ITA provides:

> Condition B is that—
> (a) [i] a relevant person[45] receives relevant consideration
> [ii] in connection with[46] the transaction in securities or any one or more of the transactions in securities,
> (b) two or more close companies are concerned in the transaction or transactions in securities concerned, and
> (c) the relevant person does not pay or bear income tax on the consideration (apart from this Chapter).

55.7.1 *Irredeemable share capital*

For Circumstances A(c) and B, s.685(7) ITA provides a relief for

[43] An application in discharge of liabilities will normally fall within (a) as a transfer of assets; but it is just possible to conceive of examples where that is not the case. So para (b) is almost but not completely otiose.

[44] See App 2.4.2 (In connection with).

[45] See 55.5.1 ("Relevant person").

[46] See App 2.4.2 (In connection with).

irredeemable share capital:

> [a] So far as subsection (2)(c) or (3) [Circumstances A(c), B] relates to share capital other than redeemable share capital, it applies only so far as the share capital is repaid (on a winding up or otherwise);
> [b] and for this purpose any distribution made in respect of any shares on a winding up or dissolution of the company is to be treated as a repayment of share capital.

I refer to this as **"irredeemable share capital relief"** but the label is not entirely accurate, as the relief does not apply on a buy-back of own shares even if the shares are expressed to be "irredeemable". If irredeemable share capital is repaid:

(1) the relief does not apply; and
(2) the repayment of capital is itself a transaction in securities to which the TiS code may apply.

55.7.2 *Year of assessment*

For Circumstances A(c) and B, s.700 ITA provides a timing rule:

> (1) This section applies if section 684 (person liable to counteraction of income tax advantage) applies to a person because the person is in a position to obtain or has obtained an income tax advantage by falling within the circumstances mentioned in 685(2)(c) or (3) when share capital is repaid.[47]
> (2) An assessment to income tax made in accordance with a counteraction notice must be an assessment for the tax year in which the repayment occurs.

55.8 Circumstance A/B compared

Circumstances A(a)(b)(c)	**Circumstance B**
as a result of the transaction in securities or any one or more of the transactions in securities,	in connection with the transaction in securities or any one or more of the transactions in securities,[48]

[47] Section 700(3) ITA provides:
"The references in this section to the repayment of share capital include references to any distribution made in respect of any shares in a winding up or dissolution of the company."
This reflects the rule in s.685(7)[b] ITA.

[48] I have moved this phrase to facilitate the comparison.

a relevant person receives [type A] relevant consideration	a relevant person receives [type B] relevant consideration
in connection with— (a) the distribution, transfer or realisation of assets of a close company, (b) the application of assets of a close company in discharge of liabilities, or (c) the direct or indirect transfer of assets of one close company to another close company, [together, in my terminology, a Transfer of Company Assets]	[no equivalent]
the relevant person does not pay or bear income tax on the consideration (apart from this Chapter).	[identical]

55.9 "Relevant Consideration"

"Relevant Consideration" matters as:

(1) All 4 Circumstances require that a relevant person receives Relevant Consideration.

(2) The definition of IT Advantage asks (in short) whether income tax would be payable on the Relevant Consideration if it was a distribution.

Section 685 ITA provides two definitions and I coin terminology to describe them:

ITA	**Definition for**	**My terminology**	**See para**
s.685(4)	Circumstances A(a)(b)	Type A Relevant Consideration	55.9.1
s.685(5)	Circumstances A(c), B	Type B Relevant Consideration	55.9.1

This is not transparent terminology, but it is difficult to think of better. I use initial capitals, as befits complex defined terms.

The definitions apply for the purpose of the TiS Circumstances, but they are incorporated by reference elsewhere.[49]

[49] Section 687(4) ITA.

55.9.1 *Relevant Consideration*

Type A Consideration: s.685(4)ITA	**Type B Consideration: s.685(5)**
In a case within subsection (2)(a) or (b [ie, Circumstances A(a)(b)]	In a case within subsection (2)(c) or (3) [ie, Circumstances A(c), B]
"relevant consideration" [in my terminology, Type A Relevant Consideration] means consideration which—	"relevant consideration" [in my terminology, Type B Relevant Consideration] means consideration
[no equivalent]	[i] which consists of any share capital or any security issued by a close company and
(a) is or represents the value of—	[ii] which is or represents the value of assets which—
(i) assets which are available for distribution by way of dividend by the company, or	(a) are available for distribution by way of dividend by the company,
(ii) assets which would have been so available apart from anything done by the company,	(b) would have been so available apart from anything done by the company, or
(b) is received in respect of future receipts of the company, or	[no equivalent]
(c) is or represents the value of trading stock of the company.	(c) are trading stock of the company.

It is necessary to have a label for assets within paras (a)(b)(c). I describe these as **"Distributable Assets"** (with initial capitals to indicate a technical term). When it is necessary I distinguish:

Type A Distributable Assets: assets within s.685(4)(a)(b)(c)
Type B Distributable Assets: assets within s.685(5)(a)(b)(c)

Thus there are two steps to identifying Relevant Consideration:
(1) Identify the Distributable Assets
(2) Identify the asset which is or represents the value of Distributable Assets.

"Available" for distribution means distributable as a matter of company law, whether or not it is commercially possible to distribute.[50]

Cleary offers a straightforward illustration of para (a)(ii). A company purchased an asset.[51] The purchase price paid by the buyer was Distributable Assets because (but for the purchase) it would have been available for distribution.

"Trading stock" has the standard definition.[52] The point is that trading stock may represent unrealised (future) profits.

55.9.2 *"Consideration"*

Section 685(8) ITA provides an artificial definition:

> References in this section to the receipt of consideration include references to the receipt of any money or money's worth.

"Property" would be the more apt word. I write it with a capital letter.

55.9.3 *Foreign law rule*

Section 685(7A) ITA provides a rule about return of share capital by foreign companies, under the guise of a definition of "assets":

> The references in subsection (4)(a)(i) and (ii) to assets [available for distribution] do not include assets shown to represent return of sums paid by subscribers on the issue of securities merely because the law of the country in which the company is incorporated allows assets of that description to be available for distribution by way of dividend.

55.9.4 *Groups*

Section 685(7B) ITA deals with groups:

> The references in subsections (4)(a)(i) and (5)(a) to assets which are available for distribution by way of dividend by the company include assets which are available for distribution to the company by way of dividend by any other company it controls.

55.10 Fundamental change of ownership

Section 686(1) ITA provides:

[50] *Brown v IRC* 47 TC 217 at p.236.

[51] For this case, see 55.14.4 (Sale to close co for cash).

[52] Section 713 ITA provides a definition by reference: "trading stock" has the meaning given by section 174 of ITTOIA 2005.

> Circumstances are excluded by this section if—
> (a) immediately before the transaction in securities (or the first of the transactions in securities) the party holds shares or an interest in shares in the close company, and
> (b) there is a fundamental change of ownership of the close company.

55.10.1 *"Fundamental change"*

Section 686(2) ITA provides:

> There is a fundamental change of ownership of the close company if, as a result of the transaction or transactions in securities, the condition in subsection (3) is met.

So we turn to s.686(3) ITA:

> The condition in this subsection is that the original shareholder[53] or original shareholders taken together with any associate or associates[54]—
> (a) do not directly or indirectly hold more than 25% of the ordinary share capital of the close company,
> (b) do not directly or indirectly hold[55] shares in the close company carrying an entitlement to more than 25% of the distributions which may be made by the close company, and
> (c) do not directly or indirectly hold shares in the close company carrying more than 25% of the total voting rights in the close company.

I refer to this as the "sub-25% tests". Thus in order to apply this:

(1) One needs to identify:
 (a) The original shareholders, before the transaction in securities

[53] Section 686(4) ITA provides a commonsense definition: "In this section "original shareholder" means a person who, immediately before the transaction in securities (or the first of the transactions in securities), held any ordinary share capital of the close company."

[54] See 55.2.3 ("Associate").

[55] Section 686(5) ITA defines "holding" shares:
"For the purposes of this section, shares of or share capital in the close company which are held
[a] by a person controlled by an original shareholder, or
[b] by two or more original shareholders taken together,
count as shares or share capital held by that original shareholder or those original shareholders."
"Control" is not defined here, so it has its strict sense; see 104.2.3 (Default meaning of control).

    (b) The shares held by original shareholders (and associates) after the transaction in securities

(2) The total of the shares held by (b) must meet the sub-25% tests

(3) A causation test: The sub-25% tests must be met as a result of the transaction in securities. But I would have thought that would always be the case, if condition (2) is met.

55.11 TiS TAARs

IT TiS TAAR: s.684(1)(a) ITA	**CT TiS TAAR: s.734 CTA 2010**
(1) This section applies to a person where...	(1) Section 733 does not apply to a company in respect of a transaction in securities or two or more such transactions if the company shows that the transaction or transactions meet conditions A and B. .
[No equivalent]	(2) Condition A is that the transaction or transactions are effected— (a) for genuine commercial reasons, or (b) in the ordinary course of making or managing investments.
(c) the main purpose, or one of the main purposes, of the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage	(3) Condition B is that enabling corporation tax advantages to be obtained is not the main object or one of the main objects of the transaction or, as the case may be, any of the transactions

I refer to these provisions as the **"TiS TAARs"**.[56]

For discussion see 3.1 (TAAR/unallowable purpose test).

The CT TiS TAAR is important because there are many cases on this provision, starting with *Brebner*, which are relevant to other TAARs.

Old TiS TAAR cases often concern arrangements now caught by express provisions. For instance, the issue of redeemable shares in *Parker* would now be regarded as a distribution; TiS would not arise. That seems right:

[56] This was originally called the "escape clause", but I do not use that term here, and the many changes in the legislation have made it rather less apt.

where objective rules can be devised, it is good to avoid the difficulties and uncertainties which a TAAR entails.

Where an arrangement involves more than one transaction in securities, it is sufficient if only one of them has the purpose of obtaining of an Income Tax Advantage.[57] One tests all the relevant transactions in securities, ie those which lead to the TiS conditions being met. But one tests the purpose of each transaction in its wider context,[58] so the point is not likely to matter in practice.

55.11.1 *"Income Tax Advantage"*

"Income Tax Advantage" matters for two overlapping rules:

(1) The TiS TAAR
(2) s.684(1)(d) ITA, (in short) requiring that someone obtains an IT advantage

"Income Tax Advantage" is defined in s.687 ITA. Section 687(1) ITA provides:

> For the purposes of this Chapter [Chapter 1 Part 13] the person obtains an income tax advantage if—
> (a) [i] the amount of any income tax which would be payable by the person in respect of the relevant consideration[59] if it constituted a distribution[60] exceeds
> [ii] the amount of any capital gains tax payable in respect of it, or
> (b) [i] income tax would be payable by the person in respect of the relevant consideration if it constituted a distribution and
> [ii] no capital gains tax is payable in respect of it.[61]

This is not the standard definition of tax advantage[62] (which applied for the pre-2010 IT TiS rules and still applies for the CT TiS rules). The definition seems similar, but

(1) For the standard definition one must identify a possible comparator

[57] This is self-evident, but if authority is needed, see *Wroe v HMRC* [2022] UKFTT 143 (TC) at [115].

[58] See 3.4.2 (Test transaction in wider context).

[59] See 55.9 (Relevant Consideration).

[60] See 55.2.2 (Dividend/distribution).

[61] Para (b) adds nothing to para (a), so it is otiose, but that does not matter. The CT equivalent is in s.732 CTA 2010 but the definition is not identical.

[62] See 3.19.1 (Tax advantage: Definitions).

(2) in the TiS definition of IT Advantage, the comparator is specified.

It does not matter whether it is in fact possible for the Relevant Consideration to constitute a distribution.

Where Relevant Consideration is received by a UK individual or trust, it is (more or less) always the case that IT exceeds CGT, so there is (more or less) always an IT Advantage. I refer to this as "IT Advantage", with initial capitals to reflect the technical nature of the expression.

Where Relevant Consideration is received by a non-resident individual from a non-resident company the recipient does not obtain an IT Advantage as no income tax would be payable on a distribution. The same point sometimes applies to a non-resident trust.

There is in principle an IT Advantage if a company
- lends to a shareholder
- repays a debt to a shareholder

Section 687(2) ITA provides a cap:

> So much of the relevant consideration as exceeds the maximum amount that could in any circumstances have been paid to the person or an associate of the person by way of a distribution at the time when Condition A or B in section 685 is met is to be left out of account for the purposes of subsection (1)....

55.11.2 *CT/CGT advantage*

A CGT advantage does not count for the IT TiS rules: that is not an IT advantage. That is evident from the wording of the definition. This rule is deliberate. HMRC say:

> The proposed legislation, through the definition of tax advantage would make it clear that the TiS legislation does not apply to TiS where an advantage in relation to tax on chargeable gains is obtained. This would be more relevant for corporation tax where the position is not clear from the existing [pre 2010] legislation.[63]

HMRC accept that avoiding CT on chargeable gains does not amount to a CT advantage.[64]

[63] See HMRC , "Simplifying Transactions in Securities Legislation" (2009) para 3.3 *https://www.taxation.co.uk/docs/default-source/file/TransactionsSecuritiesLegislation.pdf*

[64] This appears from the passage cited above, and is confirmed by private correspondence mentioned in TCCR para W6.1.3.

55.11.3 *TiS/ToA motive defence compared*

In summary, the TIS TAAR and the ToA motive defence have the following real or apparent differences:

Transfer of Assets Abroad	**Transactions in securities**	**Which is stricter?**
Any purpose test	*Main* purpose test	Little difference
Avoidance of any tax	*IT* advantage needed	ToA stricter
Tax avoidance, not mitigation	"IT Advantage"	TiS stricter
"...reasonable to assume..."	no equivalent wording	No difference
Test associated operations	Test transactions in securities	ToA stricter
No clearance procedure	Clearance procedure	

It follows that TiS clearance does not entail that the ToA motive defence must also apply;[65] but TiS clearance will usually take one a long way there.

55.11.4 *IT advantage obtained*

Section 684 ITA provides:

> (1) This section applies to a person ("the party") where ...
>
> (d) the party or any other person obtains an income tax advantage in consequence of the transaction [in securities] or the combined effect of the transactions [in securities].

There are two requirements here:

(1) Someone obtains an IT Advantage

(2) A causation test: the Advantage must be obtained in consequence of the transaction(s) in securities

In *Grogan v HMRC*:[66]

(1) A company made a payment to a trust (not a transaction in securities)

(2) The trust used the money to purchase shares from an individual (the transaction in securities).

The taxpayer argued that the tax advantage was not obtained in consequence of transaction in securities (the sale) because it was obtained in consequence of two operations, one of which was not a transaction in securities. The argument was rejected. The causation test is not understood so strictly:

[65] For instance, if there is an non-IT avoidance purpose, say, IHT avoidance.

[66] [2010] UKUT 416 (TCC).

> [117] In *Williams*, Viscount Dilhorne referred to the scheme which produced the tax free gains. That scheme contained operations which did not fall within the definition of "transaction in securities"; but that did not result in the gains ceasing to be in consequence of such transactions. It is implicit in that analysis that the phrase 'in consequence of' does not mean 'in consequence only of' and, indeed, the Code would have almost no teeth at all if that were the case.
>
> [118] Further, I do not consider that such an operation has to be causally connected with the transaction in securities in the sense that it occurs as a result of that transaction. Thus, a complicated tax avoidance scheme may contain many operations which are not themselves transactions in securities but which take place after the first event which is a transaction in securities. Such operations may be a necessary ingredient of the scheme, without which the tax advantage would not be obtained. It may require active steps by a participant in the scheme to ensure that such an operation takes place. Such an operation takes place because there is a scheme, not because there has been a previous transaction in securities.
>
> [119] It can be seen therefore that a tax advantage can be obtained 'in consequence of' a transaction in securities notwithstanding
>
> (a) that another operation, which is not a transaction in securities, is a necessary ingredient and
>
> (b) that such other operation is not one which takes place 'in consequence of' the transaction in securities.
>
> I can see no reason in principle why the other operation has to take place after the transaction in securities itself. In my judgment, it is enough if the tax advantage is obtained as the result of an overall series of transactions which are linked together to form a scheme and where the relevant transaction in securities is part of that scheme.

55.11.5 *Amount of IT advantage*

The amount of IT Advantage has a commonsense definition in s.687(3) ITA:

> The amount of the income tax advantage is the amount of the excess or (if no capital gains tax is payable) the amount of the income tax which would be payable.

It is not clear what this is for, as the term "amount of the income tax advantage" is not used in the TiS code.

The amount of the IT advantage in general terms is relevant to:

(1) The terms of a counteraction notice

(2) The TiS TAAR (as a smaller advantage is less likely to be a main purpose)

But one does not need a definition for those purposes.

55.12 TiS issue list

To summarise the discussion so far. The best way to approach the TiS code is as follows:

Preparatory

(1) Identify the transaction(s) in securities
(2) Identify:
(a) the parties to the transaction in securities
(b) the persons who obtain an IT advantage
(together, "relevant persons")
(3) Identify the Consideration which the relevant person receives
(4) Identify the company with Distributable Assets
(5) Identify Relevant Consideration:

Type A Relevant Consideration	**Type B Relevant Consideration**
(5a) Identify assets representing Distributable Assets by the company	(5b) Identify share capital/security representing Distributable Assets by the company

(6) Consider the Circumstances:

Circumstances A(a)(b)(c)	**Circumstance B**
(6a) Identify Transfer of Company Assets	[not needed]
(6b) The necessary links: Is the Relevant Consideration received (i) as a result of the transaction(s) in securities and (ii) in connection with the Transfer of Company Assets	(6c) The necessary link: Is the Relevant Consideration received as a result of the transaction(s) in securities

Common to all cases

(7) Does the relevant person pay IT on the Relevant Consideration
(8) Identify the IT Advantage:
(a) Does anyone obtain an IT Advantage

(b) If so, do they obtain it in consequence of the transaction(s) in securities

(c) Is a main purpose of the transaction(s) to obtain IT Advantage

(9) Is there a substantial change of ownership

I refer to this as the **"TiS issue list"**. It needs to be applied:

- to each party to the transaction in securities if there is more than one within the scope of TiS[67]
- to each transaction in securities, if there is more than one

It will be apparent that a rigorous application of the issue list is a labourious exercise.

With this in mind I turn to consider some examples.

55.13 Examples

In the following examples when I say that arrangements in the example are "in principle" within TiS, I mean they fall within TiS assuming no TiS TAAR defence. That topic is not considered in the examples. I also leave out the question of what (if any) counteraction HMRC may choose to apply.

I first consider the position for UK companies and UK residents.

55.14 Individual sells shares to co

55.14.1 *Sale (not to close co) for cash*

Suppose:

(1) An individual (the seller) sells a company (T Ltd, for **T**arget co) for cash.

(2) The buyer is another individual, a trust or a non-close company.

(3) The buyer is an associate[68] of the seller

Applying the TiS issue list to the seller and buyer:

(1) The sale/purchase is a transaction in securities.

[67] We are concerned to parties to transactions in securities who are individuals, trusts or non-resident companies. A party to a transaction in securities which is a company subject to corporation tax is not subject to the IT TiS code, because the company is not subject to IT, and the CT TiS rules are (more or less) defunct.

[68] The example posits a sale to an associate because a sale to a non-associate would normally constitute a substantial change of ownership.

Position of seller	*Position of buyer*
(2)(a) The seller is party to the transaction in securities	(2)(a) The buyer is party to the transaction in securities
(b) The seller obtains an IT advantage	(b) Does the buyer obtain an IT advantage (as defined)?
so the seller is a relevant person.	so the buyer is a relevant person.
(3) The seller receives Consideration (the purchase price).	(3) The buyer receives Consideration (the purchase price).

(4) T Ltd (the company sold) has Distributable Assets (assume).
(5) The purchase price (the cash) is Type A Relevant Consideration.

But item (6) of the TiS issue list is not satisfied; the TiS Circumstances are not met:

(6)(a) Circumstance A is not met, because there is no Transfer of Company Assets
(b) Circumstance B is not met for two reasons (one would suffice):
(i) the Consideration is cash, not shares.
(ii) only one close company is concerned in the transaction

So TiS does not apply to the seller or buyer. It does not matter that most of the other requirements are met.

Of course, no-one would expect the buyer to be within TiS: the buyer does not obtain an IT Advantage in any meaningful sense. Whether the buyer obtains an IT Advantage within the definition might be debated, but the problem does not arise.

55.14.2 *Cash sale + extraction of cash*

If the arrangement consists of a cash sale and other transactions, then further thought is needed.

Suppose a cash sale (as above) followed by a further step (4):

(1) An individual (the seller) sells a company (T Ltd) for cash.
(2) The buyer is another individual, a trust or a non-close company.
(3) The buyer is an associate of the seller
Further step:
(4) (a) The buyer puts T Ltd (the company sold) into liquidation; or
(b) T Ltd (the company sold) purchases its own shares

Step (4) might be done, for instance, to raise funds to pay the purchase price, or to repay a short term loan used to pay the purchase price.

Step (4) is a transaction in securities and so there are two transactions in securities.

Starting with the TiS issue list for the seller, the first 5 items in the list are satisfied. Turning to item 6, the TiS Circumstances:

(6) Circumstance A is met as:
 (a) There is a Transfer of Company Assets (at step (4))
 (b) The necessary links are met: The Relevant Consideration is received:
  (i) as a result of the transaction(s) in securities and
  (ii) in connection with the Transfer of Company Assets (assume)

(7) The seller does not pay IT on the Relevant Consideration
(8) The IT Advantage:
 (a) The seller obtains an IT Advantage
 (b) The seller obtains it in consequence of the transaction in securities

So the seller is within TiS.

The buyer is also within TiS, as a result of step (4): see 55.15.2 (Purchase of own shares); 55.15.3 (Liquidation)

55.14.3 *Extraction of cash + sale*

Take the above example but reverse the order of events. Suppose the extraction of cash from the company occurs before the sale. In *Grogan v HMRC*:[69]

(1) A company made a payment to a qualifying employee share ownership trust (a Transfer of Company Assets).
(2) The trust used the cash to purchase shares from an individual (the transaction in securities).

Applying the TiS issue list for the seller, the first 5 items in the list are satisfied. Turning to item 6, the TiS Circumstances, TiS circumstance A is met because:

(a) There is a Transfer of Company Assets (at step (1))
(b) The necessary links are met: The Relevant Consideration is received:
 (i) as a result of the transaction(s) in securities and
 (ii) in connection with the Transfer of Company Assets

[69] [2010] UKUT 416 (TCC).

55.14.4 *Sale to close co for cash*

Suppose a sale as above, but the buyer is a close company:

(1) An individual (the seller) sells a company (T Ltd, for **T**arget co) to B Ltd (the buyer) for cash.
(2) The buyer (B Ltd) is a close company.
(3) B Ltd is an associate[70] of the seller.

Applying the TiS issue list to the seller:

(1) The sale is a transaction in securities.
(2) (a) The seller is a party to that transaction
 (b) The seller obtains an IT advantage
 so the seller is a relevant person.
(3) The seller receives Consideration (the purchase price).
(4) B Ltd has Distributable Assets (assume).
(5) The purchase price is Type A Relevant Consideration: the cash is (or represents the value of) an asset of B Ltd which would have been Available for Distribution by B Ltd (if not used for the purchase price).
(6) (a) The payment of the purchase price is a Transfer of Company Assets (assets of B Ltd) for two reasons (one would suffice):
 (i) it is a transfer of assets of B Ltd
 (ii) it is a payment in discharge of the liabilities of B Ltd.
(6) (b) Circumstance A is met.
(7) The relevant person does not pay IT on the Relevant Consideration.

So (subject to the substantial change of ownership/TiS TAAR defences) a sale of a company to another company is within TiS.

This has been discussed in a number of cases:

Cleary v IRC 44 TC 399
Brown v IRC 47 TC 217
Allam v HMRC [2021] UKUT 291 (TCC)

In *Cleary,* two joint shareholders sold their company to another company.

In *Brown*, the ownership of the purchaser (B Ltd) was not quite the same as the ownership of the target company (T Ltd); that made no difference.

In *Allam,* B Ltd (the purchaser) had sufficient Distributable Assets, so

[70] The example posits a sale to an associate because a sale to a non-associate would normally constitute a substantial change of ownership.

the purchase price it paid was Relevant Consideration. T Ltd (the company sold) did not have sufficient Distributable Assets, but that did not matter. That seems right, as a sale for cash effectively allows the extraction of cash from B Ltd, (perhaps also from T Ltd, the company sold), without the IT charge which would be payable on a dividend.

Although on the sale of T Ltd (the company sold) there is an income tax charge on the purchase price paid from B Ltd to the individual

(1) there is no reduction in the market value of the shares of B Ltd, and
(2) there is no increase in the base cost of those shares.

So there could be two charges to tax:

(1) A TiS IT charge on the sale of T Ltd
(2) A CGT charge on a future sale of B Ltd

But that seems right, because the same charges would arise if:

(1) Funds came from T Ltd (the company sold) by way of dividend (subject to IT); and
(2) B Ltd was sold (gain subject to CGT)

What if T Ltd (the company sold) has Distributable Assets, but B Ltd (the buyer) does not? Perhaps that will not often happen.

What if the asset sold to B Ltd was not shares in T Ltd, but securities, perhaps in a quoted non-close company? The TiS conditions are still met as the seller is party to a transaction in securities. But the TiS TAAR defence may be stronger.

It is suggested that the law would be simpler if a sale of a close company to another close company was deemed to be a distribution unless there is a substantial change of ownership. There should be no defence under the TiS TAAR. This would avoid the difficulties in the application of the TAAR illustrated by *Allam v HMRC*.[71]

55.14.5 *Sale for redeemable shares*

Suppose:

(1) An individual (the seller) sells a company (T Ltd, for **T**arget co) to B Ltd (the buyer)
(2) The buyer is an associate[72] of the seller

[71] See 3.12 (Consequence/purpose distinction).

[72] The example posits a sale to an associate because a sale to a non-associate would normally constitute a substantial change of ownership.

(3) The consideration is an issue of redeemable shares or loan notes by B Ltd.

Circumstance B is met and the transaction falls within TiS, just as for a cash sale. That seems right, as a sale for redeemable shares or loan notes is only a short step from a sale for cash; it amounts to a sale for cash, when the shares or loan notes are redeemed.[73]

55.14.6 *Sale for irredeemable shares*

Suppose:

(1) An individual (the seller) holds two companies (A Ltd and B Ltd)
(2) The individual transfers A Ltd to B Ltd, in consideration of an issue of irredeemable shares by B Ltd (new shares).

Applying the TiS issue list:

(1) The sale is a transaction in securities.
(2) The seller is a party to that transaction so a relevant person.
(3) The seller receives Consideration (the new shares)
(4) B Ltd has Distributable Assets
(5) The shares are Relevant Consideration Type A and Type B
(6) (a) The transfer of the A Ltd shares is a Transfer of Company Assets on the basis that it is an indirect transfer of assets of one close company to another close company,
 (b) Circumstance A(c) is therefore met.
 (c) Circumstance B is also met.
 However irredeemable share capital relief provides relief from Circumstances A(c) and B.[74]

So (in the absence of further steps) the TiS conditions do not apply.

HMRC do not object in principle to a simple sale for irredeemable shares. The CT Manual provides:

> **CTM36850: examples of common circumstances where clearance will be given** [Oct 2020]
> **Example 1**
> Mrs A and Mrs B jointly own all the share capital in companies C Ltd and D Ltd which operate similar trades. They decide to form a group

[73] See 55.14.4 (Sale to close co for cash).

[74] See 55.7.1 (Irredeemable share capital).

> for specified commercial reasons.[75] They form Newholdco Ltd which issues ordinary shares to Mrs A and Mrs B in exchange for their shares in C Ltd and D Ltd.

The difficulty comes if one adds a further step of a share buy-back:

(1) In my example, B Ltd might buy back its shares.
(2) In the HMRC example, Newholdco Ltd might buy back its shares.

That is not a distribution, ie not subject to IT, as the B shares were issued for consideration.[76] There is, in short, an uplift in the consideration of the shares for IT purposes. HMRC understandably do not like that:[77]

> 3.11 When a company repays part of the shareholders' capital, the payment is not treated as a distribution. This recognises that where the company is merely returning to the shareholder what the shareholder originally paid in, there should not be an income tax charge. The government is satisfied that this is the correct position.
> 3.12 However, where it is possible to increase the amount of 'capital' repaid to shareholders, the government is concerned that an opportunity to convert income to capital arises.
> *Example*
> S is the sole shareholder of SI Ltd, which was formed with £100 of share capital. After successfully trading for a number of years SI Ltd also has retained profits of £250,000 and no other assets.
> For a number of reasons, S is advised to create a new holding company, SI Holdings Ltd (SIH Ltd), which is achieved via a share for share exchange in which SIH Ltd issues £250,100 of share capital.
> S now holds all of the share capital in SIH Ltd, which holds all of the shares in SI Ltd. SIH can repay £250,000 of share capital to S. This

[75] Prior to Oct 2020, this read: "They decide to form a group to improve access to finance for expansion *and to benefit from group taxation provisions*." This is not an *Income* Tax Advantage, and not tax avoidance. (It is a CT advantage, but we are not concerned with CT TiS rules).
Does the new text reflect a change of practice, or is it simply that HMRC did not wish to give a hostage to fortune?
Under the post 2020 wording, the example is self-evident: since it seems to be posited that the sale is for commercial reasons only, it seems clear that the TiS TAAR provides a defence.

[76] See 30.5.2 (Para C/D: Issue of securities).

[77] HMRC, "Company distributions: consultation document" para 3.2.
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/483547/Company_distributions_-_consultation_document__7029_.pdf
I have altered the text of the example for clarity

transaction is classed as a repayment of capital and is subject to CGT.

These were the facts of *Wroe v HMRC*.[78]

It is suggested that the answer is to extend the definition of distribution so that the seller does not get the IT uplift, for which there is no tax justification. Then HMRC need not rely on TiS and TiS TAAR problems do not arise.

55.15 Capital distributions

55.15.1 *Repayment of debt security*

A redemption (repayment) of a debt security is in principle within TiS.

55.15.2 *Purchase of own shares*

A purchase of own shares is a transaction in securities.

In the case of a UK company, the proceeds of sale may be income.[79] If so, TiS does not in principle apply, as the vendor will in principle pay IT on the income.[80]

If the proceeds of sale are a capital receipt, as in the case of a non-UK company, this is in principle within TiS. The TiS TAAR may be a defence.

55.15.3 *Liquidation*

A liquidation is in principle within TiS.

The textbook TCCR considers the following "familiar problem":[81]

(1) Oldco has two businesses, one of which is sold, so it has the remaining business, and cash.

(2) Of course Oldco could distribute the cash by way of dividend, ie taxably. But instead:
   (a) Oldco is put into liquidation.
   (b) The remaining business is transferred to Newco in consideration of shares which are issued to the Oldco shareholders.[82]
   (c) The cash is paid to the shareholders by the liquidator.

[78] See 55.18.2 (Disclosure for valid clearance).

[79] See 30.5 (Para B: Other distributions).

[80] See 55.5.2 (No IT on Consideration).

[81] *Taxation of Companies and Company Reorganisations* (looseleaf) para W6.2.3

[82] Section 110 Insolvency Act 1986 confers power to do this. CGT reorganisation relief should apply.

Prior to 2016, this was already in principle within TiS. But now that transaction in securities includes a distribution in a winding up, the analysis is more straightforward, because every liquidation falls within the scope TiS (even if, say, Oldco had sold both of its business and only held cash).

The significance of the pre-2016 history is that it suggests that this "familiar problem" is a type of transaction where HMRC are likely to issue a counteraction notice. The TiS TAAR is the only defence.

55.16 Examples with foreign company

So far we have been considering a UK resident company. I turn to consider some examples where the company is non-resident.

55.16.1 *Non-resident*

There is in principle no Income Tax Advantage if a non-resident receives a distribution from a non-resident company (without further steps). TiS cannot apply unless someone obtains a tax advantage.

55.16.2 *Remittance basis taxpayer*

There is no Income Tax Advantage if:

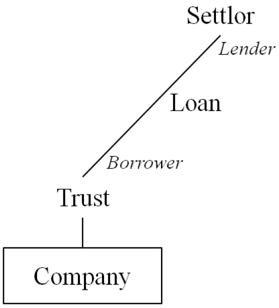
(1) the shareholder is a remittance basis taxpayer and

(2) the Consideration received by the individual from a non-resident company is not remitted to the UK

Even a dividend would not have been taxable.

55.16.3 *Foreign trust*

Suppose this common situation:



Assume the company and the trust are non-resident but the settlor is UK resident:

(1) The company buys back its own shares so the trust receives trust capital

(2) The trustees transfer the capital to the settlor[83]
  (a) by repayment of the loan
  (b) by making a new loan; or
  (c) by outright distribution

Applying the TiS issue list, to the trustee and to the settlor:

Position of trustee	**Position of settlor**
(1) The purchase of own shares is a transaction in securities.	
(2)(a) The trustee is a party to that transaction, so is a relevant person. (2)(b) The trustee does not obtain a tax advantage.	(2)(a) The settlor is not a party to that transaction. (2)(b) The settlor does obtain an IT Advantage, so is a relevant person.
(3) The trustee receives Consideration (cash from the company)	(3) The settlor receives Consideration (cash from the trustee)
(4) The company has Distributable Assets	
(5) The payment from the company is Type A Relevant Consideration	(5) The payment from the trust is Type A Relevant Consideration
(6) The payment of the cash from the company is a Transfer of Company Assets	
(7) The trustee (a relevant person) does not pay IT on the Relevant Consideration.	(7) The settlor (a relevant person) does not pay IT on the Relevant Consideration.

The settlor is not within TiS, as he/she is not a party to a transaction in securities. Could HMRC issue a counteraction notice on the trustees, who are not UK resident, in relation to a receipt from a non-resident company?[84] In practice it does not happen, or at least, has not happened. Would the TiS TAAR defence apply?

[83] The position is the same if the transfer is to any UK resident beneficiary.

[84] See 55.17.3 (Counteraction); 16.12 (Territorial principle: Application).

55.17 Counteraction

55.17.1 *TiS enquiry*

The TiS code is not within the standard IT/CT enquiry/discovery regimes. Section 695(1) ITA provides:

> An officer of Revenue and Customs may enquire into a transaction or transactions if—
> (a) the officer has reason to believe that section 684 (person liable to counteraction of income tax advantage) may apply to a person ("the taxpayer") in respect of the transaction or transactions, and
> (b) the officer notifies the taxpayer of his intention to do so.

I refer to this as a TiS enquiry.

Broadly speaking, the onus of proof lies on HMRC; but onus of proof does not matter much.[85]

55.17.2 *Time limits*

There is a time limit for starting a TiS enquiry. Section 695(2) ITA provides:

> The notification may be given at any time not more than 6 years after the end of the tax year to which the income tax advantage in question relates.

CIOT say:

> there are cases where HMRC have issued counteraction assessments under the transactions in securities rules for the year 2015/16, but done so only during the tax year 2021/22, mostly in the first three months of calendar year 2022. Under the rules that applied until 5 April 2016, it appears that the assessments had to be issued within four years of the end of the tax year in which the tax advantage arose, i.e. by 5 April 2020, in which case assessments raised by 5 April 2022 were two years too late.[86]

A test case is likely to follow.

55.17.3 *Counteraction*

Section 698(1) ITA provides:

[85] See 3.15 (Burden of proof).

[86] CIOT News, 24 Jan 2023.

> If on an enquiry under section 695 an officer of Revenue and Customs determines that section 684 [TiS] applies to the taxpayer, the income tax advantage in question is to be counteracted by adjustments, unless the officer is of the opinion that no counteraction is required.

The question is whether s.684 applies to the taxpayer. So we return to s.684, which provides:

> (1) This section applies to a person ("the party") where—
> (a) the person is a party to a transaction in securities ...

Thus the person who is within a counteraction notice must be a party to the transaction in securities.

Thus if a company lends to trustees, and trustees appoint the borrowed money to a beneficiary there can be no counteraction against the beneficiary, because the beneficiary is not a party to the transaction in securities.[87]

55.17.4 *Counteraction notice procedure*

Section 698 ITA provides:

> (2) The adjustments required to be made to counteract the income tax advantage and the basis on which they are to be made are to be specified in a notice served on the person by an officer of Revenue and Customs.
> (3) In this Chapter [Chapter 1 Part 13] such a notice is referred to as a "counteraction notice".
> (4) Any of the following adjustments may be specified—
> (a) an assessment,
> (b) the nullifying of a right to repayment,
> (c) the requiring of the return of a repayment already made, or
> (d) the calculation or recalculation of profits or gains or liability to income tax.

A counteraction notice generally leads to an assessment.

In the absence of a counteraction notice, there is no liability to tax. There is no duty to disclose to HMRC facts which might justify a counteraction notice.

Section 698 ITA provides:

> (5) An assessment may be made in accordance with a counteraction

[87] See 55.16.3 (Foreign trust).

> notice at any time (without regard to any time limit on making the assessment that would otherwise apply).
> (6) This section is subject to—
> [a] section 700 (timing of assessments),[88] and
> [b] section 702(2) (effect of clearance notification under s. 701).[89]
> (7) But no other provision in the Income Tax Acts is to be read as limiting the powers conferred by this section.

But while the assessment has no time limit, a taxpayer is protected by the 6 year TiS enquiry time limit.[90]

55.17.5 *No-counteraction notice*

Section 698A ITA provides:

> (1) If on an enquiry under section 695 an officer of Revenue and Customs is of the opinion that no counteraction is required, the officer must serve notice on the person (a "no-counteraction notice") stating that no counteraction is required and why.
> (2) The taxpayer may apply to the tribunal for a direction requiring an officer of Revenue and Customs to issue one of the following within a specified period—
> (a) a counteraction notice;
> (b) a no-counteraction notice.
> (3) Any such application is to be subject to the relevant provisions of Part 5 of TMA 1970 (see, in particular, section 48(2)(b) of that Act).
> (4) The tribunal must give the direction applied for unless satisfied that there are reasonable grounds for not serving either a counteraction notice or a no-counteraction notice within a specified period.

This is the equivalent of an application for a closure notice of a SA enquiry.[91]

55.17.6 *Appeals*

Section 705 ITA provides:

> (1) A person on whom a counteraction notice has been served may appeal on the grounds that—

[88] See 55.7.2 (Year of assessment).

[89] See 55.18.1 (Effect of clearance).

[90] The time limits for the pre-2016 rules are to be litigated in litigation at present reported only on preliminary issues: *Hunt v HMRC* [2024] UKFTT 78 (TC).

[91] See 121.21.1 (Application for closure notice).

> (a) section 684 (person liable to counteraction of income tax advantage) does not apply to the person in respect of the transaction or transactions in question, or
> (b) the adjustments directed to be made are inappropriate.
>
> (2) Such an appeal may be made only by giving notice to the Commissioners for HMRC within 30 days of the service of the counteraction notice.
>
> (3) On an appeal under this section that is notified to the tribunal, the tribunal may—
> (a) affirm, vary or cancel the counteraction notice, or
> (b) affirm, vary or quash an assessment made in accordance with the notice.
>
> (4) But the bringing of an appeal under this section does not affect—
> (a) the validity of the counteraction notice, or
> (b) the validity of any other thing done under or in accordance with section 698 (counteraction notices),
>
> pending the determination of the proceedings.

In *Allam v HMRC* the FTT held that s705(1)(b) ITA permits the Tribunal to hear a challenge to the validity of a counteraction notice on public law grounds, in short, acting wholly unreasonably.[92] But it remains to be seen if other tribunals will take the same view.

55.18 TiS clearance

Section 701 ITA provides:

> (1) A person may provide HMRC with particulars of a transaction or transactions effected or to be effected by the person in order to obtain a notification about them under this section...
>
> (4) The Commissioners must notify the person whether they are satisfied that the transaction or transactions, as described in the particulars, were or will be such that no counteraction notice ought to be served about the transaction or transactions.

The clearance application must be on behalf of all who may be within s.701, must include all relevant transactions, and must give full details.

The rest of s.701 deals with procedural matters relating to a clearance application:

> (2) If the Commissioners consider that the particulars, or any further

[92] [2020] UKFTT 216 (TC) at [225].

> information provided under this subsection, are insufficient for the purposes of this section, they must notify the person what further information they require for those purposes within 30 days of receiving the particulars or further information.
> (3) If any such further information is not provided within 30 days from the notification, or such further time as the Commissioners allow, they need not proceed further under this section...
> (5) The notification must be given within 30 days of receipt of the particulars, or, if subsection (2) applies, of all further information required.

The CT Manual provides:

> **CTM36840 transactions in securities: clearances** [Oct 2020]
> There is no obligation to seek clearance from HMRC in relation to transactions in securities and potential applicants may decide not to do so.
> A person may apply to the Commissioners for HMRC for clearance under ITA07/S701 or under CTA10/S748 that they will not be subject to counteraction. The application may be made before or after the transactions take place. It must be made by either a party to the transactions or an agent acting on their behalf.
> Applications may be made to reconstructions@hmrc.gov.uk or by post to: BAI Clearance, HMRC, BX9 1JL

SP 3/80 provides:

> **Reasons for Refusing Clearance**
> 1 Where the Commissioners for HMRC cannot give clearance under [s.701 ITA] they are not statutorily required to say why and at one time their practice was to decline to do so. With a view to removing misunderstanding in particular about the scope of [the TiS code] in relation to transactions with a commercial element, they later modified that practice.
> Where the applicant has given full reasons for his transactions and clearance has to be refused, the Commissioners for HMRC indicate, where possible, their main grounds for doing so. In appropriate cases where they do not think it right to give reasons the Commissioners for HMRC will invite the principals themselves as well as their advisers to an interview so that the Commissioners for HMRC can be certain they have fully appreciated the position.
> **Significance of Refusing Clearance**
> 2 The rules of the clearance procedure require the Commissioners for HMRC to say whether in their view [the TiS code] would not apply.

> They are not required to say whether in their view the section definitely would apply. It may not always be practicable to do so in advance of the transaction's actually being carried out, eg where the motive for it is a relevant factor. Nonetheless, it is not the practice of the Commissioners for HMRC to withhold consent under [s.701 ITA] unless they would, on the information available to them, expect to take counteraction under [the TiS code]. The then Financial Secretary to the Treasury stated this practice in the 1966 Finance Bill debates in the following words:
>
> > "The Revenue's approach is that it will not refuse a [s.701] clearance unless, having considered the transaction fully and all the circumstances of it, it would itself take action under the section if the transaction were completed."[93]

HMRC practice seems to have changed, and now in cases of doubt they refuse clearance and launch a TiS enquiry if the transaction goes ahead. It is safer and easier to refuse clearance than to give it.

There is no provision for appealing against a TiS clearance refusal. But it is possible to appeal against a refusal of a CGT clearance, which may determine (more or less) the same issues as a TiS clearance.[94]

55.18.1 *Effect of clearance*

Section 702 ITA provides:

> (1) This section applies if the Commissioners for Her Majesty's Revenue and Customs notify a person under section 701 that they are satisfied that a transaction or transactions, as described in the particulars provided under that section, were or will be such that no counteraction notice ought to be served about the transaction or transactions.
> (2) No such notice may be served on the person in respect of the transaction or transactions.
> (3) But the notification does not prevent such a notice being served on the person in respect of transactions including not only the ones to which the notification relates but also others.

55.18.2 *Disclosure for valid clearance*

Section 702(4) ITA provides:

> The notification is void if the particulars and any further information

[93] Hansard (13 July 1966) Vol 731 col 1566.

[94] See 58.6 (CGT reorganisation TAAR) and s.138(4) TCGA.

> given under section 701 about the transaction or transactions do not fully and accurately disclose all facts and considerations which are material for the purposes of that section.

In *Wroe v HMRC*:[95]

> In relation to non-statutory clearance applications ... "it is necessary that the taxpayer should have put all his cards face upwards on the table." I see no reason why a clearance application under section 701 should demand a lesser standard of disclosure from a taxpayer.

That is self-evident, but it is salutary to see it in black and white.

In *Wroe*[96] the accountants advised:

> We could apply for advanced clearance, prior to the redemption of any of the shares. However, to do so would simply flag the matter to HMRC

The taxpayer described this as mere "accountants' speak". Perhaps it was. But the judge inferred that the taxpayers and their advisers deliberately withheld information they considered material, and it supported the conclusion that the application did not fully disclose all material facts and considerations. Clearly, accountants need to be careful how they speak. One should bear in mind how notes of advice may be scrutinised unsympathetically a decade later. Though that is easier said than done.

The CT Manual provides:

> **CTM36845 Response To A Clearance Application** [Feb 2018]
> ... [The manual sets out s.702(4) and continues:]
> Clearance is given on the understanding that the person has come to HMRC with "all cards face up on the table". In particular an applicant should not consider that information previously supplied to another part

[95] [2022] UKFTT 143 (TC) citing *R v IRC ex p. MFK Underwriting Agencies Ltd* [1989] STC 873 at p.892.

[96] In *Wroe,* the arrangement consisted of two steps:

(1) A share for share exchange under which shareholders in company A acquired shares in company B.

(2) Company B purchased its own shares from the shareholders.

HMRC assessed income tax on the purchase under the TiS code.

The application for clearance did not mention the proposed purchase of own shares, and the clearance granted did not cover that. The clearance granted was invalid for lack of disclosure. But even if it were valid, it would not have covered step (2). The point is not mentioned in *Wroe*, perhaps because it did not arise.

of HMRC has been disclosed for the purposes of the clearance application.

There is no provision for “voiding” a clearance. Whether a clearance is, or is not, effective is ultimately a question of fact that would, ultimately, be determined by the Tribunal.

Where a clearance is void HMRC is free to apply, if appropriate, the relevant anti-avoidance provision.

CHAPTER FIFTY SIX

CHARGEABLE GAINS

56.1 2019 CGT rewrite: Navigation
56.2 Charge to CGT/CT on gains
- 56.2.1 Charge to CGT
- 56.2.2 Charge to CT

56.3 "Disposal" and "assets"

56.26 Immigrant trust: DTR override
56.27 Tax return: Gains

Cross references

The following topic is considered elsewhere:
43.13 (CGT rates)

This chapter is concerned with ordinary capital gains. Gains subject to income tax under special regimes (offshore funds, life policies, deeply discounted securities, etc) are considered separately in chapters on those topics.

56.1 2019 CGT rewrite: Navigation

FA 2019 rewrote the CGT legislation in Part 1 TCGA. It will take a decade before the CG Manual is (mostly) updated, and statutory instruments will not been updated at all; so readers will need to keep the old section numbers in mind:[1]

Topic	**Current TCGA**	**Pre-2019 TCGA**
Individuals/trusts	s.1A	s.1, 2
Branch/agency	s.1B	s.10
UK land	s.1C,1D	*new*
Losses	s.1E, 1F	s.2
Split year	s.1G	s.2
CGT rates	s.1H-1J	s.4-4BA
CGT annual exemption	s.1K, 1L	s.3
Temporary non-residence	s.1M, 1N	s.10A, 10AA
Companies	s.2-2G	s.8, 10B
Gains of non-resident company	s.3-3G	s.13-14A
CGT remittance basis	Sch 1	s.12

The rewrite was intended to restate the pre-rewrite law and not to change anything. Para 122 sch 1 FA 2019 provides for continuity of the law, as is standard form in rewrite legislation.[2]

56.2 Charge to CGT/CT on gains

56.2.1 *Charge to CGT*

Section 1(1) TCGA provides:

> Capital gains tax is charged for a tax year on chargeable gains accruing[3] in the year to a person on the disposal of assets.

Section 1(1) refers to a "person" so it applies to individuals, trustees, PRs, and, in theory, companies. But company gains within CT are taken out of

[1] For full tables of destinations/derivations see ICAEW Rep 105/18 Appendix 1 *https://www.icaew.com/-/media/corporate/files/technical/icaew-representations/2018/icaew-rep-105-18-chargeable-gains-accruing-to-non-residents-and-returns-for-disposals-of-land.ashx*
At the time of the rewrite I wrote: "Readers may doubt whether the benefit of the rewrite was worth the cost. One may also doubt whether the rewrite would have happened had there been a consultation." But practitioners have now become used to the new numbers, and the cost has been incurred, so this grumble is of historical interest only.

[2] This is discussed in more detail in the 2021/22 edition of this work para 53.1.2 (Pre-rewrite continuity) but I omit it now because no rewrite changes have been identified.

[3] See 15.2.4 (Accruing: Gains).

CGT, ie the CT charge where applicable has priority over CGT; see below.

IT is an annual tax, in the sense that the authority to levy it expires at the end of the tax year, and the tax is re-applied in each year's Finance Act.[4] This is not the case for CGT; but that does not make any difference. CGT is an annual tax, like IT, in the sense that assessments are made by reference to a tax year. In *Cooper v Billingham*:[5]

> an interest-free loan, even if repayable on demand, is a capital payment. It is therefore necessary ... to quantify the benefit conferred by it. In the ordinary course of events that process takes place at the end of a year of assessment, since it is only at the end of the year of assessment that the 'trust gains for the year' can be computed ... If that involves an element of retrospection it is implicit in the scheme of the legislation; capital gains tax, like income tax, is an annual tax.

56.2.2 *Charge to CT*

Section 2 CTA 2009 provides that CT is charged on profits of companies, defined to mean income and chargeable gains.[6]

Section 4 CTA 2009 provides:

> Capital gains tax is not charged on gains accruing to a company in respect of which the company is chargeable to corporation tax, or would be so chargeable but for an exemption.

This meshes with s.1(2) TCGA which provides:

> As a result of section 4 of CTA 2009, capital gains tax is not charged on gains accruing to a company, but corporation tax is chargeable instead in accordance with-
> (a) section 2 of CTA 2009,
> (b) Chapter 2 of this Part [Part 1 TCGA], and
> (c) other relevant provisions of the Corporation Tax Acts.

Thus companies are subject to CT on chargeable gains, and non-companies are subject to CGT.[7]

[4] See 14.3.4 (IT is an annual tax). CT is similar.

[5] [2001] EWCA Civ 1041 at [27].

[6] See 14.3.1 (Charge to IT/CT).

[7] A historical note: From 2013-2018 companies were subject to corporation tax on ordinary chargeable gains and to CGT on ATED and NRCGT gains. But we have now reverted to the straightforward pre-2013 rule.

56.3 “Disposal” and “assets”

56.3.1 *“Disposal”*

Disposal matters because CGT is charged on gains accruing on a disposal; in the absence of a disposal (normally) no gain accrues, or if it did, the gain is not charged under s.1 TCGA.

Section 24(1) TCGA provides:

> [a] Subject to the provisions of this Act and, in particular to sections 140A(1D), 140E(7) and 144,
> [b] the occasion of the entire loss, destruction, dissipation or extinction of an asset shall, for the purposes of this Act, constitute a disposal of the asset
> [c] whether or not any capital sum by way of compensation or otherwise is received in respect of the destruction, dissipation or extinction of the asset.

Section 21(2) TCGA deals with part disposals:

> For the purposes of this Act—
> (a) references to a disposal of an asset include, except where the context otherwise requires, references to a part disposal of an asset, and
> (b) there is a part disposal of an asset where an interest or right in or over the asset is created by the disposal, as well as where it subsists before the disposal, and generally, there is a part disposal of an asset where, on a person making a disposal, any description of property derived from the asset remains undisposed of.

See too 56.22.4 (“Disposal” of debt).

56.3.2 *“Assets”*

CGT is charged on gains accruing on a disposal of assets; in the absence of assets (normally) no disposal happens, and no gain accrues, or if it did, the gain is not charged under s.1 TCGA.

There is of course a wide definition. Section 21(1) TCGA provides:

> All forms of property shall be assets for the purposes of this Act, whether situated in the UK or not, including—
> (a) options, debts and incorporeal property generally, and
> (b) currency, with the exception (subject to express provision to the contrary) of sterling,
> (c) any form of property created by the person disposing of it, or otherwise coming to be owned without being acquired.

Almost anything is an asset, if a gain can be derived from it.[8]

56.4 Computation of gain

56.4.1 *General principles*

In *Cooling v HMRC*:[9]

> The Act is ... (famously) silent as to how computation [of gains] should be performed, except that s 38 [TCGA] makes certain stipulations as to permitted deductions. However, the issue has been clarified by the courts over the years.

Cooling cites *Spectros v Madden*:[10]

> In calculating the chargeable gain arising on the taxpayer's disposal of the shares, the starting point is to find the consideration for the disposal: that is implicit in [what is now s.38 TCGA]. Where the consideration is not in money or not wholly in money, it is necessary, in order to calculate the gain, to value the consideration in monetary terms in pounds sterling.

56.4.2 *Deferred/contingent consideration*

Under a contract, consideration may be:

(1) Deferred: payable in the future, not immediately

(2) Contingent: payable in the future but subject a contingency, not definitely

There are two possible analyses for CGT:

(1) *Section 48 analysis:* Treat deferred/contingent consideration as if it were paid immediately

(2) *Chose in action analysis*:[11] Treat the right to deferred/contingent consideration as a separate asset for CGT

The dividing line is whether the consideration is ascertainable, or at least, capped at an ascertainable sum.

56.4.3 *Section 48 analysis*

Section 48(1) TCGA provides:

[8] *O'Brien v Benson's Hosiery* 53 TC 241 (employer's rights under employment contract held to be an asset).

[9] [2015] UKFTT 223 (TC) at [11].

[10] [1997] STC 114 at p.135.

[11] Sometimes called a *Marren v Ingles* analysis.

> [a] In the computation of the gain consideration for the disposal shall be brought into account
> [i] without any discount for postponement of the right to receive any part of it
> [ii] and, in the first instance, without regard
> [A] to a risk of any part of the consideration being irrecoverable or
> [B] to the right to receive any part of the consideration being contingent;

There are two rules here. In each case, the rule is "pay up front" which seems to be unfair. But the unfairness of rule [i] is mitigated to some extent by installment relief.[12] The unfairness of rule [ii] is mitigated by irrecoverable consideration relief.

56.4.4 *Irrecoverable consideration relief*

Section 48(1) TCGA continues:

> [b] and if any part of the consideration so brought into account subsequently proves to be irrecoverable, there shall be made, on a claim being made to that effect, such adjustment, whether by way of discharge or repayment of tax or otherwise, as is required in consequence.

I refer to this as "**irrecoverable consideration relief**".

56.4.5 *Deferred foreign currency consideration*

The CG Manual provides:

> **CG14930: consideration irrecoverable** [Jul 2019]
> The immediate effect of the decision [in *Goodbrand v Loffland Brothers North Sea* 71 TC 57] is that where consideration for a disposal is payable in foreign currency that currency is to be brought into account at its value at the date of disposal. If the value of the currency subsequently falls, so that its value on receipt is less than the value brought into the account, the shortfall is not irrecoverable consideration and no claim can be made under Section 48.
> More generally, where consideration for a disposal takes the form of money's worth, so that it has to be valued at the time of the disposal for the purpose of the computation, any shortfall in the value of that

[12] Section 280 TCGA.

> money's worth on receipt cannot give rise to a claim under Section 48. Section 48 applies only where some or all of the actual consideration due under the contract is irrecoverable.

56.4.6 *Chose in action analysis*

In *HMRC v Collins*:[13]

> section 48 applies only to future consideration of an amount which is ascertained or ascertainable at the time of the disposal.
> Where future consideration is wholly uncertain in amount, and not merely subject to contingencies,
> [1] the amount that has to be brought into account on the making of the disposal is the value of the right to receive the future consideration,
> [2] and the right itself is treated as a separate asset for CGT purposes which is the subject-matter of a separate disposal when the future consideration is paid, giving rise to a chargeable gain or an allowable loss as the case may be.

The separate asset is a contractual claim, known as a chose in action.

In *Marren v Ingles*[14] the taxpayer sold shares for a sum defined as £750 per share plus half of the profit on a subsequent flotation. The consideration for the share sale was a chose in action, the right to the unascertainable sum. There was a minimum but no cap on that amount. So when two years later, following the flotation, the taxpayer received the purchase price, there was a second disposal (of the chose in action) in consideration for the cash finally received.

In *Marson v Marriage*[15] the taxpayer sold land for "two alternative considerations depending on events". If planning permission was granted the price was specified; but if the land was nationalised, the price was half of the proceeds of nationalisation. The consideration for the sale was a chose in action: at the time of the disposal (in short, the date of the contract) the purchaser could not say what the consideration would be.

For the position where a non-resident sells land /a land-rich company for unascertainable consideration, see 57.36 (Unascertainable consideration).

56.4.7 *s.48/chose in action analyses: Border*

The CG Manual provides:

[13] [2009] EWHC 284 (Ch) at [5].

[14] 54 TC 76.

[15] 54 TC 59.

> **CG14881 - What Is Ascertainable** [Dec 2021]
>
> The amounts of the future payments are ascertainable if at the date of disposal they are
>
> - known, or
> - ascertainable by calculations, or
> - ascertainable by making up an account AND all of the events which establish the AMOUNT have occurred by the date of the disposal.
>
> If the future payments are unascertainable see CG14940+.
>
> Examples of ascertainable future payments are
>
> - the agreement for the disposal of the asset provides for a consideration of £300,000, of which £100,000 is payable on completion and £200,000 will be payable in four annual instalments of £50,000, or
> - the agreement for the disposal of a business provides for a consideration of £100,000 and a sum equal to half of the taxable profits of the business for the year ended on the date of disposal, payable nine months after the date of the contract.
>
> Where the amount of the future consideration is ascertainable the full amount is included in the disposal proceeds. There are no tax consequences when the future amounts are received.

The CG Manual provides:

> **CG14883 - Ascertainable But Contingent** [Jul 2019]
>
> Payments which are ascertainable but contingent are treated in the same way as all other ascertainable amounts.
>
> The wording of the agreement will link the liability to pay the future amount or amounts with the occurrence or non-occurrence of a particular event.
>
> Examples of ascertainable but contingent payments are
>
> - the agreement for the sale of a business provides for a consideration of £250,000, of which £200,000 is payable on completion and £50,000 is payable if the profits of the year following the date of disposal exceed £100,000, or
> - the agreement for the sale of a piece of land provides for a consideration of £75,000, of which £50,000 is payable on completion and £25,000 is payable if planning permission is granted within two years of the date of the disposal.
>
> The defining feature of ascertainable deferred consideration is that all of the events which affect the AMOUNT occur before the date of the disposal.

56.4.8 *Deferred consideration: Critique*

Goodbrand v Loffland Brothers North Sea Inc explained the reason for the deferred consideration rule:[16]

> The Judge described [s.48 TCGA] as a departure from economic or commercial reality, but in truth it is a necessary and proper provision for the protection of the revenue. Where payment of the whole or part of the consideration is deferred, the total amount of the consideration will normally be increased in order to compensate the seller for interest forgone on that part of the consideration. In economic terms the transaction is equivalent to a sale for a price payable immediately, but with a loan to the purchaser of the deferred part of the price at interest. Such interest would be taxable. To prevent the loss of tax which would otherwise occur by structuring the transaction as a sale for a greater but deferred consideration, the amount of the consideration is taken into account at its face value without any discount for deferred payment. There is, therefore, nothing paradoxical or contrary to economic reality in aggregating future instalments or disallowing a discount for deferment. Any hardship results from the liability to pay the tax before the consideration is received, but this may be alleviated by [installment relief]

Marson v Marriage was more concerned about hardship in the rule:[17]

> In construing [what is now s.48] I think it is of some importance to look at it in the light of the burden which it imposes on a person who has to deposit in advance large amounts of tax against a speculative right to receive purchase money. It is an onerous provision, and if it is to apply I think that it must be demonstrated clearly that the case falls within the provision.

But the chose in action analysis is in general harsher than the s.48 treatment, as:

(1) tax is paid on the first disposal without installment relief; and
(2) while a loss may arise on a subsequent disposal of the chose in action, it cannot be carried back to set against the gain on the first disposal.

There are other ways to tax unascertainable consideration. Why not align the chose in action treatment with s.48, ie allow an instalment relief, with

[16] 71 TC 57 at p.71.
[17] 54 TC 59 at p.75.

a further payment or refund when the correct amount is ascertained? The SDLT rule is that uncertain or unascertained consideration is taxed on the basis of a reasonable estimate, with provision for adjustment later if needed.[18] Is that not preferable? Discuss.

56.4.9 *Contingent liabilities*

The rule for contingent liabilities is "wait and see". Section 49(1) TCGA initially disallows contingent liabilities:

> In the first instance no allowance shall be made in the computation of the gain—
>
> (a) in the case of a disposal by way of assigning a lease of land or other property, for any liability remaining with, or assumed by, the person making the disposal by way of assigning the lease which is contingent on a default in respect of liabilities thereby or subsequently assumed by the assignee under the terms and conditions of the lease,
>
> (b) for any contingent liability of the person making the disposal in respect of any covenant for quiet enjoyment or other obligation assumed as vendor of land, or of any estate or interest in land, or as a lessor,
>
> (c) for any contingent liability in respect of a warranty or representation made on a disposal by way of sale or lease of any property other than land.

Section 49(2) TCGA then allows the liabilities if and when they actually fall due:

> If any such contingent liability subsequently becomes enforceable and is being or has been enforced, there shall be made, on a claim being made to that effect, such adjustment, whether by way of discharge or repayment of tax or otherwise, as is required in consequence.

The 4-year time limit commences from when the position occurs to make the claim.[19]

This does not apply to indemnities, which may instead qualify for relief under para 13 ESC D33.

[18] See s.51 FA 2003.

[19] See CG14805 for s.49, CG14933 for s.48; Minutes of Capital Taxes Liaison Group meeting, March 2023; *https://www.gov.uk/government/groups/capital-taxes-liaison-group*

56.4.10 *Consideration/loan relationship*

For completeness: s.48(2)(3) TCGA deal with loan relationships (not discussed here):

> (2) Subsection (1) above does not apply in relation to so much of any consideration as consists of rights under a creditor relationship to which a company becomes a party as a result of the disposal.
> (3) In the computation of the gain in a case where subsection (2) above has effect in relation to any consideration, the amount to be brought into account in respect of that consideration is the fair value of the creditor relationship.
> (4) In this section—
> (a) "creditor relationship", and
> (b) "fair value", in relation to a creditor relationship,
> each have the same meaning as in Part 5 of CTA 2009 (see sections 302(5) and 313(6)).

56.4.11 *Asset derived from asset*

Section 43 TCGA provides:

> If and so far as,
> [1] in a case where assets have been merged or divided or have changed their nature or rights or interests in or over assets have been created or extinguished,
> [2] the value of an asset is derived from any other asset in the same ownership,

If these conditions are met, without (it is assumed) a CGT disposal, one reads on to the rule:

> an appropriate proportion of the sums allowable as a deduction in the computation of a gain in respect of the other asset under paragraphs (a) and (b) of section 38(1) shall, both for the purpose of the computation of a gain accruing on the disposal of the first-mentioned asset and, if the other asset remains in existence, on a disposal of that other asset, be attributed to the first-mentioned asset.

Apart from corporate reorganisations, this will not be common. For an example, see 96.22 (Blockchain forks).

56.4.12 *Interaction of CGT/IT*

Section 37(1) TCGA deals with the relationship between CGT/IT:

> There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money's worth
> [a] charged to income tax as income of, or
> [b] taken into account as a receipt in computing income or profits or gains or losses of,
> the person making the disposal for the purposes of the Income Tax Acts.

In short: IT has priority over CGT, and there is no double charge.

What is the position if foreign income of a remittance basis taxpayer is not remitted? Section 37(1) applies: the income is "charged to income tax" even if no tax is paid because of the remittance basis.[20] But this question will not often arise.[21]

For other aspects of s.37, see:

Topic	**See para**
Interaction of TiL/CGT	22.15.4
Interaction of disguised interest/CGT	26.25.4
Interaction of s.624/CGT	47.12

56.4.13 *Exceptions to s.37(1) rule*

For completeness: s.37(5) TCGA contains some exceptions to the general rule:

> This section shall not preclude the taking into account in a computation of the gain, as consideration for the disposal of an asset,
> [a] of the capitalised value of a rentcharge (as in a case where a rentcharge is exchanged for some other asset) or
> [b] of the capitalised value of a ground annual or feu duty, or
> [c] of a right of any other description to income or to payments in the nature of income over a period, or to a series of payments in the nature of income.

Rentcharges and ground/annual/feu duty (Scots law concepts) are obsolete.[22] That leaves para [c]. It is difficult to see the reason for it, but

[20] See App 2.3.1 (Unremitted RFI "chargeable").

[21] But it is possible to devise situations where the question could arise, for instance, if foreign source income arises to a remittance basis taxpayer from an asset which was UK situate for CGT purposes.

[22] Rentcharges cannot be created after 1977, and feu duty was abolished in 2004: s.3 Rentcharges Act 1977; s.7, 56(1) Abolition of Feudal Tenure etc (Scotland) Act 2000.

fortunately it rarely if ever arises in practice. The rule should be abolished, but the topic of Annual Payments is a dusty corner which needs review in its entirety.[23]

56.5 Amount charged to CGT/CT

The CGT/CT rules are in s.1(3)/2A(1) TCGA:

CGT: s.1(3) TCGA	**CT: s.2A(1) TCGA**
Capital gains tax is charged on the total amount of chargeable gains accruing to a person in a tax year after deducting-	The amount of chargeable gains to be included in a company's total profits for an accounting period is the total amount of chargeable gains accruing to the company in the period after deducting-
(a) any allowable losses accruing to the person in the tax year, and	(a) any allowable losses accruing to the company in the period, and
(b) so far as not previously deducted under this subsection, any allowable losses accruing to the person in any previous tax year.	(b) so far as not previously deducted under this subsection, any allowable losses previously accruing to the company while it was within the charge to corporation tax.

The rules are the same, except that companies are charged by reference to accounting periods and not tax years.

56.5.1 *CGT rules applied to CT*

Section 2D TCGA provides:

> (1) The total amount of chargeable gains to be included in a company's total profits for an accounting period is calculated for corporation tax purposes in accordance with capital gains tax principles.
> (2) All of the following questions are determined in accordance with the enactments relating to capital gains tax as if accounting periods were tax years-
> (a) any question as to the amounts to be, or not to be, taken into account as chargeable gains or allowable losses,
> (b) any question as to the amounts to be, or not to be, taken into

[23] See 31.13 (Annual Payments: Critique).

> account in calculating gains or losses,
> (c) any question as to the amounts charged to tax as a company's gains, and
> (d) any question as to the time when any amount is treated as accruing.
>
> (3) This section is subject to any provision made elsewhere by the Corporation Tax Acts.

I refer to CGT/CT (where CT refers specifically to the CT charge on chargeable gains). As the rules are (mostly) the same, the term CGT is sometimes used loosely (and conveniently, if strictly speaking, inaccurately) to include CT on chargeable gains.

56.5.2 *IT references in CT context*

Section 2E TCGA provides:

> (1) If the CGT enactments[24] contain any reference to-
> (a) income tax, or
> (b) the Income Tax Acts,
>
> the reference is, in relation to a company, to be read as a reference to corporation tax or the Corporation Tax Acts.
>
> (2) But-
> (a) this does not affect references to income tax in section 39(2), and
> (b) so far as the CGT enactments operate by reference to matters of any specified description, account is to be taken for corporation tax purposes of matters of that description confined to companies but not of any confined to individuals.

56.5.3 *Interaction of CT/CGT*

Section 2F TCGA provides:

> (1) This Act as it has effect in accordance with this Chapter is not to be affected in its operation by the fact that capital gains tax and corporation tax are distinct taxes.
>
> (2) But this Act is, so far as it is consistent with the Corporation Tax Acts, to apply in relation to capital gains tax and corporation tax on gains as if they were one tax.
>
> (3) Accordingly, a matter which in a case involving two individuals is

[24] Section 2E(3) TCGA provides a commonsense definition: "In this section "the CGT enactments" means the enactments relating to capital gains tax."

relevant to both of them in relation to capital gains tax is in a similar case involving an individual and a company-

(a) relevant to the individual in relation to capital gains tax, and
(b) relevant to the company in relation to corporation tax.

56.6 CGT/CT: Territorial scope

56.6.1 *"Chargeable" gain*

Section 15(2) TCGA provides:

> Every gain shall, except as otherwise expressly provided, be a chargeable gain.

The expression "chargeable" gain is a label which brings in an uncountable number of rules, for standard drafting to provide a CGT exemption is to direct that gains of a specified nature are not chargeable. However, the term "chargeable" gain does not bring in a territorial limitation: it does not mean gains on which CGT/CT is charged. Gains are in principle "chargeable" even if:

(1) The gains accrue to a non-resident or non-UK domiciled person; and
(2) The gains are not subject to CGT/CT.

56.6.2 *"Chargeable" asset*

The expression "chargeable asset" has at least 3 different definitions in the TCGA. This expression is found in:[25]

TCGA	**Topic**	**See para**
s.25	Asset ceases to be chargeable	56.8
s.159	Roll-over relief	*Not discussed*
s.139	Reconstructions	58.5
s.171	CG group relief	64.31
sch 4B para 10	Transfer linked with trustee borrowing	62.17
para 7 sch 7	Relief for gift of business asset	*Not discussed*

These definitions are as follows:

s.25/s.159	**s.171/s.139**	**para 10 sch 4B**
For the purposes of this section an asset is at any time a chargeable asset in relation to a person if,	For this purpose an asset is a "chargeable asset" in relation to a company at any time if, were the	For the purposes of sub-paragraph (1) an asset is a chargeable asset if

[25] This is not a complete list.

were it to be disposed of at that time,	asset to be disposed of by the company at that time,	
any chargeable gains accruing to him on the disposal would be chargeable to capital gains tax under section 1A(3)(a) or to corporation tax under section 2B(3).	any gain accruing to the company would be a chargeable gain chargeable to corporation tax as a result of section 2B(3) or (4).	a gain on a disposal of the asset by the trustees at the material time would be a chargeable gain.

Also note para 32 sch 7AC TCGA (substantial shareholding relief):

> Any exemption conferred by this Schedule shall be disregarded in determining whether shares are "chargeable shares", or an asset is a "chargeable asset", for the purposes of any enactment relating to corporation tax or capital gains tax.

One might use the expression "chargeable asset" loosely to mean an asset which gives rise to a gain within the territorial scope of CGT/CT. But given the different definitions, I prefer to avoid it as a general term, and I only use the expression in discussion of provisions where it is found, so it is clear which definition is applicable.

56.6.3 *Territorial scope: Summary*

There are four classes of the CGT/CT charge:

Taxpayer	**CGT**	**CT**	**See para**
UK resident	s.1A(1)	s.2B(1)	*See below*
Non-resident			
UK branch/agency/PE	s.1A(3)(a), s.1B	s.2B(3)	56.6.5
Interest in UK land	s.1A(3)(b), s.1C	s.2B(4)	57.6.3
Land-rich asset	s.1A(3)(c), s.1D	s.2B(4)	57.2

56.6.4 *CGT/CT charge: UK residents*

The CGT/CT rules for UK residents are in s.1A(1)/2B(1) TCGA:

CGT: s.1A(1) TCGA	**CT: s.2B(1) TCGA**
A person who is UK resident for a tax year is chargeable to capital gains tax on chargeable gains accruing to the person in the tax	A company which is resident in the UK in an accounting period is chargeable to corporation tax on chargeable gains accruing to the

year on the disposal of assets wherever situated.	company in the period on the disposal of assets wherever situated.[26]

Section 1A(4) TCGA provides:

> For the purposes of this Chapter [Chapter 1 Part 1 TCGA] a person is "UK resident" for a tax year if the person is resident in the UK during any part of the tax year.

Under the SRT, an individual is resident (or not) for an entire tax year and not during part of a year;[27] so for an individual, s.1A(4) restates the general rule.

The s.1A(4) rule matters for a trustee (a non-individual):

(1) For general tax purposes a trustee may be resident during part of a year;[28] but

(2) For the purposes of Chapter 1 Part 1 TCGA, ie for the purposes of the charge to CGT, trustees are resident for the whole tax year, and so chargeable on gains of a non-resident part of the year.[29] There is no split-year relief.

Thus one may not know until the end of the tax year whether a non-resident trust is subject to CGT. This might on occasion be helpful, in circumstances when tax on a UK trust is less than tax on a non-resident trust.[30]

56.6.5 *CGT/CT charge: non-residents*

A non-resident person is in general outside the scope of CGT. This is the case

– regardless of domicile and

[26] Section 2B(2) TCGA flags up an exemption which applies for CT and not for CGT: "This is subject to Chapter 3A of Part 2 of CTA 2009 (exemption from charge in respect of profits of foreign permanent establishments)."

[27] See 10.1 (Residence throughout tax year).

[28] See 10.17 (Split year of trustees and PRs).

[29] A historical note: the position was different pre-2019, though it makes no difference; see 9.9.3 (Trustee changes residence).

[30] This is (unsurprisingly) not common, but *Estera Trust (Jersey) v Singh* [2019] EWHC 2039 (Ch) offers an example: on a purchase of own shares, an appointment of UK trustees may reduce an IT charge to a CGT charge. And planning to obtain this tax advantage "is perfectly proper and no question of illegitimate tax avoidance arises"; see at [9].

– regardless of the situs of the asset disposed of (except for land/land rich assets).

(By contrast income tax is charged on UK source income, and IHT is charged on UK situate property, regardless of the residence or domicile of the individual.)

This general rule is subject to five exceptions. The first three are in s.1A/2B TCGA:

CGT: s.1A(3) TCGA	**CT: s.2B(3) TCGA**	**See para**
A person who is not UK resident for a tax year is chargeable to capital gains tax on chargeable gains accruing to the person in the tax year on the disposal of-	A company which is not resident in the UK is chargeable to corporation tax on chargeable gains that-	
[Branch/agency] (a) assets situated in the UK that [i] have a relevant connection to the person's UK branch or agency and [ii] are disposed of at a time when the person has that branch or agency (see section 1B),	*[Permanent Establishment]* (a) accrue to the company on the disposal of assets situated in the UK that have a relevant connection to the company's UK permanent establishment (see section 2C), (b) accrue at a time when it has that permanent establishment, and (c) are, in accordance with sections 20 to 32 of CTA 2009, attributable to that permanent establishment.	56.7
[UK land] (b) assets not within paragraph (a) that are interests in UK land (see section 1C), and	(4) In addition, a company which is not resident in the UK is chargeable to corporation tax on chargeable gains accruing to the company on the disposal of assets not within subsection (3) that are- (a) interests in UK land, or	57.2
[Land-rich asset] (c) assets (wherever situated)	(b) assets (wherever situated)	57.10

not within paragraph (a) or (b) that	not within paragraph (a) that
[i] derive at least 75% of their value from UK land [ii] where the person has a substantial indirect interest in that land (see section 1D and Schedule 1A).	[i] derive at least 75% of their value from UK land [ii] where the company has a substantial indirect interest in that land.

Other exceptions are:

Topic	**See para**
Temporary non-residents[31]	11.1
Exploration/exploitation assets on continental shelf	*Not discussed*

It follows that an individual (wherever domiciled) can in principle avoid CGT if they can arrange:
(1) to dispose of appropriate assets before they become UK resident or
(2) to postpone the disposal until they become non-resident.

A simple form of CGT planning for an individual whose stay in the UK is a short-term one is not to dispose of assets giving rise to chargeable gains while UK resident.

56.7 Trade through UK branch/PE

56.7.1 *"UK branch/PE"*

CGT: s.1B(1) TCGA	**CT: s.2C(1) TCGA**
For the purposes of section 1A(3)(a) a person has a UK branch or agency at any time if, at that time, the person carries on a trade, profession or vocation in the UK through a branch or agency there.	For the purposes of section 2B(3) a company has a UK permanent establishment at any time if, at that time, the company carries on a trade[32] in the UK through a permanent establishment there.

[31] This is not technically an exception to the general rule, as the legislation does not impose CGT on gains accruing to a non-resident. It deems the gains to accrue later, when the individual is resident. But it comes to the same thing.

[32] Section 2B(5) TCGA provides: "In this section references to a trade include an office and references to carrying on a trade include holding an office." But a company does not often hold an office, so this will not often arise.

56.7.2 *Relevant connection*

CGT: s.1B(2) TCGA	**CT: s.2C(2) TCGA**
For the purposes of section 1A(3)(a) an asset has a relevant connection to a person's UK branch or agency if-	For the purposes of section 2B(3) an asset has a relevant connection to a company's UK permanent establishment if-
(a) it is, or was, used in or for the purposes of the trade, profession or vocation at or before the time of the disposal,	(a) it is, or was, used in or for the purposes of the trade at or before the time of the disposal,
(b) it is, or was, used or held for the purposes of the branch or agency at or before that time, or	(b) it is, or was, used or held for the purposes of the permanent establishment at or before that time, or
(c) it is acquired for use by or for the purposes of the branch or agency.	(c) it is acquired for use by or for the purposes of the permanent establishment.

56.7.3 *Used in/for purposes of trade*

The expression "used in or for the purposes of a trade" is found in:

TCGA	**Topic**	**See para**
s.1B(2)/2C(2)	Territorial limits of CGT/CT on gains	*Discussed here*
s.80	Charge on emigration of trust	12.4
Sch 3ZAA	Exit charge payment by installments	12.7
Para 5 sch A1	Trading exemption for land-assets	57.8.5

This expression was discussed in *Marsh v HMRC*:[33]

> In a trade of property dealing in the UK by a non-resident the real property assets situated in the UK constitute the stock. Since stock is we think "used in … the trade" the assets disposed of are within [what is now s.1B(2)] TCGA.

That seems right. In *Marsh* this conclusion did not matter, because if the assets are trading stock then the chargeable gain would be nil.[34] The point

[33] [2017] UKFTT 320 (TC) at [77].

[34] at [78]. See 56.4.12 (Interaction of IT/CGT)

is however important for the application of the land-asset trading exemption to property trading/development companies.[35]

56.7.4 *1989 transitional relief*

For completeness: s.1B(4) TCGA provides:

> In the case of a profession or vocation carried on by a person, an asset does not have a relevant connection to the person's UK branch or agency if-
>
> (a) the asset was only used in or for the purposes of the profession or vocation before 14 March 1989, or
>
> (b) the asset was only used or held for the purposes of the branch or agency before that date.

It is difficult to imagine that this could now apply. It would be a simplification if it were repealed.

56.7.5 *DT relief*

s.1B(3)/2C(3) TCGA flag up DT relief for branch/agency and PE:

CGT: s.1B(3) TCGA	**CT: s.2C(3) TCGA**
Section 1A(3)(a) does not apply to a person who, as a result of Part 2 of TIOPA 2010 (double taxation arrangements), is exempt from income tax for the tax year in respect of the profits or gains of the branch or agency.	Section 2B(3) does not apply to a company which, as a result of Part 2 of TIOPA 2010 (double taxation arrangements), is exempt from corporation tax for the accounting period in respect of the profits of the permanent establishment.

56.8 Asset ceases to be chargeable

Section 25 TCGA supplements the charge on assets of a branch/agency:

> (1) Where an asset ceases by virtue of becoming situated outside the UK to be a chargeable asset in relation to a person, he shall be deemed for all purposes of this Act—
>
> (a) to have disposed of the asset immediately before the time when it became situated outside the UK, and
>
> (b) immediately to have reacquired it,
>
> at its market value at that time.
>
> (2) Subsection (1) above does not apply—

[35] See 57.8.5 (Property development company).

> (a) where the asset becomes situated outside the UK contemporaneously with the person there mentioned ceasing to carry on a trade[36] in the UK through a branch or agency, or
>
> (b) where the asset is an exploration or exploitation asset. [Not discussed in this work]
>
> (3) Where an asset ceases to be a chargeable asset in relation to a person by virtue of his ceasing to carry on a trade in the UK through a branch or agency, he shall be deemed for all purposes of this Act—
>
> (a) to have disposed of the asset immediately before the time when he ceased to carry on the trade in the UK through a branch or agency, and
>
> (b) immediately to have reacquired it, at its market value at that time.
>
> (3A) Subsection (3) above shall not apply if—
>
> (a) the person ceasing to carry on the trade is a company, and
>
> (b) on ceasing to carry on the trade the asset is disposed of in circumstances in which section 139 or 171 applies.
>
> (5) Subsection (3) above does not apply to an asset which is a chargeable asset in relation to the person there mentioned at any time after he ceases to carry on the trade in the UK through a branch or agency and before the end of the chargeable period in which he does so.
>
> ...

Section 25(7) TCGA provides the definition of chargeable asset:[37]

> For the purposes of this section an asset is at any time a chargeable asset in relation to a person if, were it to be disposed of at that time, any chargeable gains accruing to him on the disposal would be chargeable to capital gains tax under section 1A(3)(a) or to corporation tax under section 2B(3).

See too 12.7 (Payment by instalments).

56.8.1 *UK land within s.25*

Section 25ZA TCGA provides:

> (1) This section applies if an interest in UK land[38] is deemed to have

[36] Section 25(8) TCGA provides: "This section shall apply as if references to a trade included references to a profession or vocation."

[37] See 56.6.2 ("Chargeable" asset).

[38] Defined by reference in ss(8): "In this section "interest in UK land" has the meaning given by section 1C."

> been disposed of under section 25(3) by a person at any time.
> (2) The gain or loss that, but for this subsection, would have accrued to the person at that time is not to accrue at that time.
> (3) But, on a subsequent disposal by the person of the whole or part of the interest in UK land, the whole or a corresponding part of the gain or loss is treated as accruing on the subsequent disposal.
> (4) This gain or loss is in addition to any gain or loss that actually accrues on the subsequent disposal.
> (5) A disposal to which section 171 (transfers within a group) applies does not count as a subsequent disposal for the purposes of this section.
> (6) A person may elect for a disposal deemed to have been made under section 25(3) to be excluded from the operation of this section.
> (7) An election made by a company must be made within 2 years after the day on which the deemed disposal occurs.

56.9 Gain in split year

56.9.1 *Gain in split year: Individual*

Section 1G TCGA provides the usual split-year rule:

> (1) If, as respects any individual, a tax year is a split year, sections 1A(1)[39] and 1E[40] have effect subject to the modifications made by this section.
> (2) Gains accruing to the individual in the overseas part of the tax year are chargeable to capital gains tax only if they accrue on the disposal of assets within section 1A(3).[41]

Thus gains of the overseas part of a split year of an individual are in principle not subject to CGT.

56.9.2 *Gain in split year: Trust*

Trustees are subject to CGT on gains in the whole of a year in which they become non-resident or in which they become UK resident (unless DT relief applies).[42] There is no good reason for that rule and it gives rise to an anomaly:

(1) On emigration of a trust from the UK:

[39] See 56.6.4 (CGT/CT charge: UK residents).
[40] See 65.3 (Loss within scope of CGT).
[41] See 56.6.3 (Territorial scope: Summary).
[42] The position is different for IT: see 10.17 (Split year of trustees and PRs).

(a) If a UK trust becomes non-resident, gains of the entire year are in principle subject to CGT (DT relief might be available).
(b) If a UK trust transfers its assets to a non-resident trust, gains arising after the transfer are in principle not subject to CGT.

So a transfer could be better than appointment of non-resident trustees.[43]

(2) Similarly, on immigration of a trust to the UK:
(a) If a non-resident trust becomes UK resident, gains of the entire year are in principle subject to CGT (DT relief might be available).
(b) If a non-resident trust transfers its assets to a UK -resident trust, gains arising before the transfer are in principle not subject to CGT.

56.10 Date of disposal/acquisition

The date of disposal is fundamental for CGT as that is the date that the gain accrues. The acquisition date may also be important.

The CG Manual provides:

> **CG14250 date of disposal: introduction** [Jul 2019]
> You must establish the correct date of disposal of an asset. This will determine the correct period of assessment and the tax rules which apply. It may affect the rate of tax, relief for losses, valuation and so on.
> ..
> The date of disposal of the person who disposes of an asset will be the date of acquisition of the person who acquires it.

There is some scope to select the date of disposal, so this topic is also important for CGT planning.

56.10.1 *Unconditional contract*

Section 28(1) TCGA provides:

> Subject to section 22(2), and subsection (2) below, where an asset is disposed of and acquired under a contract the time at which the disposal and acquisition is made is the time the contract is made (and not, if different, the time at which the asset is conveyed or transferred).

The CG Manual provides:

[43] See too 12.4.1 (Trust emigration: Navigation).

> **CG14261 date of disposal: contracts for disposal** [Jul 2019]
> TCGA92/S28 comes into operation only if the contract is completed, or in other words, if the disposal actually takes place. It does not deem a disposal to take place. But when the disposal has taken place in accordance with the contract, it fixes the date of that disposal for capital gains purposes.
> This was confirmed in the House of Lords decision in *Jerome v Kelly*, 76 TC 147.

56.10.2 *Contract law background*

The question whether, and when, a contract is made is a matter of contract law. The CG Manual makes some comments:

> **CG14262 date of disposal: oral contracts** [Jul 2019]
> A contract, other than a contract in respect of land, need not necessarily be in writing....
> In considering whether an oral contract for sale existed, you will need to examine the facts of the case carefully, by reference to such documents and correspondence as exist, and in the light of the actions of the parties. The basic question will be whether the facts are consistent with an agreement which was binding on the parties.

56.10.3 *Oral contract: sale of land*

It is necessary to understand the land law background. In Scotland, and in England from 1989, an oral contract for the sale of land is not possible: a contract must be made in writing.

In England before 1989, the contract was valid but unenforceable. That made a difference. The CG Manual provides:

> **CG14262 date of disposal: oral contracts** [Jul 2019]
> A contract, other than a contract in respect of land, need not necessarily be in writing. An oral contract may not be enforceable, but this does not prevent it from being a contract of disposal for CGT purposes. There is authority for this in the case of *Thompson v Salah*, 47 TC 559: the principles of this case apply for CGT purposes although it concerned Case VII Schedule D (short term gains).
> *Thompson v Salah* involved an oral contract for the sale of land. It was possible for all contracts in respect of land to be oral up to 26 September 1989. With effect from 27 September 1989 onwards, however, the Law of Property (Miscellaneous Provisions) Act 1989 requires all contracts in respect of land in England and Wales to be in writing. ...

In England this is now of historical interest only. But in Northern Ireland, the land law remains as England was before 1989: an oral contact for the sale of land is unenforceable but not void.[44] So *Thompson v Salah* continues to be relevant there.

The CG Manual repeats these same points in CG25853 but it is not necessary to set that out here.

56.10.4 *Conditional contract*

Section 28(2) TCGA provides:

> If the contract is conditional (and in particular if it is conditional on the exercise of an option) the time at which the disposal and acquisition is made is the time when the condition is satisfied.

Eastham v Leigh London 46 TC 687 concerned a development lease, that is, the tenant undertook to put up a building on the land, in consideration for which the landlord promised to grant the lease. The language of the agreement was conditional in form:

> *If* the said building shall have been completely finished to the satisfaction of the said Surveyor ... and the Tenants shall have performed and observed all the stipulations and conditions on their part contained ... *then* the Landlords shall grant to the Tenants a Lease...

But this was not a conditional contract, in the s.28 sense, or in the ordinary sense (if different):

> Although clause 4 is couched in conditional language ... it amounts to no more than this: it provides that if the tenants perform their part of the contract then the landlords will perform their part of the contract; in other words, it is a recognition of the fact that the obligations of the parties are mutual and that the granting of the lease will in fact follow the completion of performance of the obligations of the tenants. That is not, in my judgment, a condition precedent to the contract at all; it is part of the terms of the contract. You may call it a condition if you please, but it does not make it a condition precedent to the existence of a contract, it merely indicates that it is part of the terms of the bargain, just as in all contracts for sale the terms of the bargain are customarily described as conditions of sale.

Similarly *Michaels v Harley House*:[45]

[44] See s.2 Statute of Frauds (Ireland) 1695; *Hamilton v Judge* [2010] NICA 49.

[45] [1998] Lexis Citation 3110.

> the important difference ... between a true condition precedent which it is not within a contracting party's power to bring about, even though he may undertake to use his best endeavours to bring it about, and a promissory condition which the party does have power to fulfil or to cause to be fulfilled. In this case the share sale agreement was said to be conditional on completion of the sale of the freehold to the company. But ... completion of the sale and purchase of the freehold was something that TWD had power to bring about, and which it undertook to bring about.

It seems to me that the terminology of condition precedent/subsequent, or true condition precedent/promissory condition, is not ideal for expressing this distinction. However that may be, at least the position is clear.

The CG Manual provides:

> **CG14270 date of disposal: conditional contracts** [Jul 2019]
> It can be difficult to recognise whether a contract is conditional. Many contracts contain conditions which are to be fulfilled. A contract is only conditional within the meaning of TCGA92/S28 if particular conditions have to be satisfied before the contract becomes a binding document. These are called 'conditions precedent'. When these conditions are met the contract becomes legally binding. At that point the contract has become unconditional. The date on which the conditions are met is the date of disposal.
>
> Other conditions in contracts are called 'conditions subsequent'. These may require the parties to do various things before completion or may establish how the contract is to be performed. But they do not prevent the contract from being binding with immediate effect. If they are not met the contract remains a binding contract but the vendor or purchaser may be able to sue for breach of contract.
>
> In *Lyon v Pettigrew* 58 TC 452, Walton J said
>
>> The words 'contract is conditional' have traditionally been used to cover really only two types of case. One is a 'subject to contract' contract, where there is clearly no contract at all ... and the other is where all the liabilities under the contract are conditional upon a certain event.
>
> He went on to give an example of a conditional contract:
>
>> It would, for example, be possible for a hotelier to make a booking with a tour operator conditionally upon the next Olympic Games being held in London. Then, until it had been decided that the next Olympic Games were going to be held in London, there would be no effective contract: the whole contract would be conditional, the

> whole liabilities and duties between the parties would only arise when the condition was fulfilled.

(There is a useful examination of the meaning of 'conditional' in *Eastham v Leigh London & Provincial Properties Ltd* 46 TC 687.)

56.10.5 *Options*

A full discussion of the CGT treatment of options requires a chapter. In short, options involve two disposals:

(1) A disposal of the option, when granted; and
(2) A disposal of the underlying property, when the option is exercised

The CG Manual provides:

> **CG14275 date of disposal: options** [Jul 2019]
> An option is not in itself a conditional contract but operates as an offer which is irrevocable during the option period. See CG12300+. The grant of an option, made either for good consideration or by deed, gives rise to a binding contract to keep the offer open.
> Where in the normal way the option agreement is unconditional, the date of the disposal of the option is given by TCGA92/S28 (1) as the date of that agreement.
> Where an option to buy is exercised, the offer is thereby accepted so that a separate unconditional contract is made in relation to the asset which is the subject of the offer. The date of the disposal of that asset is given by Section 28(1) as the date of exercise of the option.

56.10.6 *Postpone disposal date*

Obvious CGT planning for individuals is to postpone disposals until non-resident.[46] The CG Manual discussion is lengthy and pedestrian, but the practitioner needs to read it to see how HMRC may approach the issues. The CG Manual provides:

> **CG25800 avoidance risk on emigration** [Nov 2019]
> When an individual plans to emigrate from the UK they will often want to dispose of their assets located in the UK before departure. This is particularly true of privately run businesses carried on in the UK but it is often also true of other property located in the UK. For such assets it may be necessary, or at least convenient, for the individual to be in the UK to deal with negotiations for the sale. The individual may also need

[46] A pre-departure share for share/loan note exchange will not do; see 58.6.2 (CGT avoidance).

> to have a definite sale arranged in order to ensure he or she has funds for use in the country to which he or she is emigrating.
>
> The emigrating individual will have an expectation that their residence position may change and that this may affect their CGT liability.
>
> If the disposal occurs before the date of departure the individual will be liable to a charge to UK CGT in respect of the chargeable assets disposed of.
>
> But there is no form of capital gains ‘exit charge’ applying to individuals when they emigrate from the UK (see CG13400).
>
> ...For 2013-14 and later years an individual will either be resident or not resident in the UK for the year, however split year treatment may apply. If the disposal occurs in the non UK part of a split year the gain will normally be exempt because it is outside of the scope of TCGA92/S2 (unless the individual later resumes residence in the UK and the temporary non-residence rules in TCGA92/S2 or the other exceptions in CG10978 apply).
>
> So if the sale is genuinely postponed and the individuals residence position has changed by the date of disposal then there will be no charge to UK CGT. However, enquiries might reveal that despite appearances the disposal actually occurred on an earlier date ...
>
> **CG25805 establishing the correct time when a gain arises** [Nov 2019]
>
> An individual intending to emigrate from the UK and dispose of assets may arrange his or her affairs so that although they have certainty or near-certainty that the sale will occur before their UK residence position changes, it appears that the disposal for tax purposes takes place after that date.

The CG Manual then sets out three ways to attack this planning:

> There are a number of circumstances in which CGT liability may arise notwithstanding that the date of disposal appears to be after the date of emigration. These are where it can be shown that
>
> [1] there was a binding agreement or contract for sale on or before the date their residence position changes
>
> [2] a business was carried on in the UK through a branch or agency in the period from the date of emigration to the date of disposal...
>
> [3] The disposal falls in a period of temporary non residence see CG26100+.
>
> **CG25820 establishing the correct time when a gain arises: establishing basic facts** [Nov 2019]
>
> When an individual claims that a disposal is exempt because of the actual date of disposal (see CG12700+) you should firstly establish the

> facts concerning two basic points:
> - what is the date of disposal in a written contract? and
> - what is the individual's residence status on that date?
>
> In the case of a disposal under an unconditional contract the date of disposal is the date the contract is entered into not the date of completion .... However, it is not unknown for individuals and/or their agents to quote the date of completion as the disposal date.
>
> It can therefore be worth checking that the date quoted is not in fact the completion date.

Oh dear. Leaving aside unrepresented taxpayers, could that really happen very often?

> It can therefore be worth checking that the date quoted is not in fact the completion date.

56.10.7 *Binding contract pre-departure*

The CG Manual provides:

> **CG25850 delayed written contracts** [Nov 2019]
> The most common situation is for the individual to negotiate the terms for a disposal but to delay signing the written contract until after the date of departure from the UK. One indicator that this may have happened will be if there is a very short interval between the date their residence position changes and the date the contract is signed.
>
> Cases have been seen where the vendor leaves the UK with a copy of the contract in his possession and posts it from the foreign airport on arrival there. Alternatively, he gives his solicitor a power of attorney under which the solicitor can sign and exchange the contracts on behalf of the vendor once he is outside the UK. There are many other variations.

The author's apparent indignation seems to me to be misplaced; but it depends on whether one classifies the planning as "ordinary" or avoidance.

> In most straightforward cases, where there is no question of a continuing business ... it will not be possible to show there is liability to CGT. An agreement, oral or written, which remains 'subject to contract' is not a binding contract.
>
> Where a formal written contract is entered into after emigration, there is a presumption that the parties intend to leave the transfer unagreed until that time even if it is not explicitly 'subject to contract'. It may be possible to displace that presumption if evidence can be obtained ... that

> the disposal was not in fact conditional or 'subject to contract' at the time of emigration, see CG25805.
>
> **CG25860 binding contract pre-dating emigration** [Nov 2019]
>
> A disposal occurs at the earliest time at which there is a binding contract between the parties. Except where there is a statutory requirement for a contract to be in writing if it is to be valid (see CG25853 above), it does not matter whether the contract is oral or written. [The manual refers to *Thompson v Salah*, discussed 56.10.3 (Oral contract: sale of land), and continues:]
>
> Establishing the existence of a binding contract or agreement, oral or written, in advance of the formal contract presents considerable difficulty, see CG25850 above, and requires the facts of the case to be established in detail. Usually this will involve reviewing the correspondence, notes of meetings, telephone conversations, etc which have taken place between the vendor and purchaser (or more usually their professional representatives) prior to the date of signing the formal documents, to see whether there is evidence of a binding oral agreement or whether the correspondence itself constitutes a binding written agreement. It will not usually be worthwhile to undertake such a detailed review unless there are strong prima facie indications of a pre-emigration binding agreement.
>
> If a binding agreement prior to the date of formal documentation can be established, the date of the earlier agreement is the date of disposal for CGT purposes.

In circumstances like these, I would have thought a binding contract would be most unusual.

> ...**CG26020 splitting a single contract** [Nov 2019]
>
> In this type of case, what would normally have been included in a single contract for sale is split into two contracts. For example, a farmer owning a farmhouse and associated farmland emigrates; he claims to have sold the farmhouse prior to the date his residence position changes (possibly to give immediate access to capital) and the farmland after the date his residence position changes and this points to the fact that two separate contracts have been entered into. Relief under TCGA92/S222 is claimed on the disposal of the farmhouse. In such cases, it may be possible to sustain an argument that, in reality, there is only a single disposal for capital gains purposes, the date of disposal of the farmland and the farmhouse being the same: that is to say, the earlier of the two dates.

The argument seems far-fetched, though it depends on the facts.

> **CG26030 conditional contracts** [Nov 2019]
> Cases have been seen where it is claimed that the date of disposal for capital gains purposes does not occur until the satisfaction of a condition written into the terms of the agreement for sale. To decide whether a condition is such as to make a contract conditional within the terms of TCGA92/S28(2) can be difficult. You will need to consider the full facts of the case in the context of contract law. There is guidance on dates of disposal and conditional contracts at CG14250+ and CG14270+.
> **CG26040 options and cross-options** [Nov 2019]
> Sometimes the owner, before emigrating, grants an option to a potential purchaser to buy the asset, that option to be exercised during a specified period following the owner's emigration. ... With pure delay cases, however, there may be evidence to show that the option was a sham and that the vendor is assured of his sale before he leaves the UK.
> These are cases where the vendor and purchaser each grant an option to the other party to sell/buy the asset which is the subject of the agreements. Invariably in these cross-options cases, the options are granted before the vendor leaves the UK, but one of the options is exercised (usually by the purchaser) after the vendor's date of departure.
> ...

The sham argument seems very far-fetched, though it depends on the facts.

56.10.8 *Postpone disposal: GAAR*

The GAAR guidance provides:

> **D17 Unconditional contract**
> This example is intended to illustrate tax planning where arrangements are structured so that the disposal of an asset falls within a particular period.
> **D17.1 Background**
> D17.1.1 The Government announces at Autumn statement that, from 6 April 20XX, the rate at which chargeable gains are charged to tax will be reduced from the current level.
> **D17.2 The arrangements**
> D17.2.1 Taxpayer A has concluded negotiations to dispose of land and buildings to Taxpayer B with an intended completion date of 1 Jan 20XX. Taxpayer A having obtained tax advice renegotiates with Taxpayer B for the unconditional contract date and completion of the disposal to be after 6 April 20XX and to allow Taxpayer B exclusive occupation of the land and buildings rent free from 1 Jan 20XX.

D17.2.2 The sale is completed on 10 May which results in a substantial capital gain to Taxpayer A. The disposal takes place after 6 April 20XX for tax purposes.

D17.3 The relevant tax provisions

Sections 1, 2 and 28 TCGA 1992.

D17.4 The taxpayer's tax analysis

D17.4.1 The gain should be taxed according to the new rate of CGT in force from 6 April.

D17.5 What is the GAAR analysis under s207(2) of FA 2013

D17.5.1 Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether express or implied) and the policy objectives of those provisions?

The substantive results of the transactions are consistent with the principles on which the relevant provisions are based. The rate of capital gains tax has been reduced from 6 April and the disposal is charged according to the rule in s28 TCGA 1992 that a disposal by way of unconditional contract is treated as taking place at the time of the contract.

D17.5.2 Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?

Yes. The contract was delayed so as to take advantage of the reduced rate of tax applying after 5 April 20XX whilst the purchaser was given unusual rights of occupation from the originally agreed completion date.

D17.5.3 Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?

No. The gain is charged to tax at the rate of tax in force at the time.

D17.5.4 Does the arrangement include any of the indicators of abusiveness within s207(4) of FA 2013

No.

D17.5.5 Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?

Yes. Gains are charged at the rate of tax in force at the time of the contract for disposal.

D17.6 Conclusion

D17.6.1 On the facts the arrangements are not abusive and HMRC would not seek to apply the GAAR.[47]

As is common throughout the GAAR guidance, this example selects easy

[47] HMRC, "GAAR Guidance" (2017) Part D *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

facts, so the answer is straightforward and provides no help in borderline cases.

56.11 Pre-arrival rebasing

Unless the temporary non-resident rules apply, basic planning for someone coming to the UK is to realise gains when non-resident. I refer to this as **"pre-arrival rebasing"**. (Conversely, postpone realising losses until resident.)

56.12 Share pooling and matching

Davies v Hicks explains the background:[48]

> One matter on which [CGT has] always had detailed rules is the identification or matching of disposals of fungible assets (like shares of the same class) with acquisitions of assets of the same kind. If a taxpayer (1) acquires 100 ordinary shares in a company in year 1 for £x, (2) acquires another 100 shares of the same class in year 2 for £y, and (3) sells 100 shares in year 3 for £z, how is his CGT worked out? Which shares is he taken to have sold, and what is their base value for CGT? The legislation ... has always provided that the identification of shares disposed of with shares acquired (or the 'matching'... a more commonly used expression, though the statutes have used the word 'identify') is governed by specific rules laid down in the statutes from time to time, and is not determined by any specific matching which can be shown to have existed on the particular facts of any disposal.

This topic often arises in the context of non-residents/non-doms, so I consider it in the round. I refer to the rules as **"share pooling/matching"**, though the label is not wholly apt, as the rules apply to fungible assets, not just shares.

Sections 104-106A TCGA provide two approaches to the issue:

(1) Share pooling
(2) Arrangements of prompt acquisition/disposal, or prompt disposal/re-acquisition, informally known as bed-and-breakfasting. I refer to these as "**share-matching rules**".

A constant series of amendments over the years has resulted in scrappy drafting.

I do not consider:

[48] [2005] EWHC 847 (Ch) at [8].

- pre-2008 transitional rules
- reorganisations and stock dividends
- employee share rules
- CT rules

56.12.1 *Share pooling*

Section 104(1) TCGA provides for share pooling:

> Any number of securities of the same class acquired by the same person in the same capacity shall for the purposes of this Act (subject to express provision to the contrary) be regarded as
> [a] indistinguishable parts of a single asset
> [b] growing or diminishing on the occasions on which additional securities of the same class are acquired or some of the securities of that class are disposed of.

I refer to this single asset as the **"s.104 pool"**.

Share pooling is academic if all the pooled shares are disposed of in a single transaction, but it matters for a part-disposal of the pool.

The CG Manual provides:

> **CG51575 The Section 104 Holding In Detail** [May 2020]
> ...Because the Section 104 holding is treated as a single asset the part disposal rules of TCGA92/S42 apply on a disposal of less than all the shares in the holding. In strictness the apportionment should be made using the A/A+B formula where A equals disposal proceeds of sale and B the market value of the remaining asset. But in practice the apportionment may be made by reference to the number of shares sold.

The CG Manual gives examples:

CG51590 Share Identification Rules For Capital Gains Tax From 6.4.2008: Examples [May 2020]
In each example it should be assumed that all acquisitions and disposals are arm's length transactions in shares listed on the stock exchange. The shares are all of the same class in the same company and held by a UK taxpayer in the same capacity. Figures for disposal proceeds are net of incidental costs of disposal.

EXAMPLE 1 (Ms Davy)
D makes the following acquisitions and disposals[49]

[49] For clarity I have set this out in tabular form rather than the layout of the Manual.

Date	Transaction	No shares	Purchase/sale price
15 April 2006	buys	1,000	£1,300
4 August 2006	buys	1,000	£1,450
19 January 2007	buys	500	£950
16 March 2010	sells	2,000	£6,850
7 April 2010	buys	2,000	£6,790
10 December 2010	sells	2,200	£7,700

Some of D's purchases were made before 5 April 2008, but her disposals are made after that date so the pooling arrangements apply. Under TCGA92/S106A, see CG50464, her disposals must be identified with acquisitions in the following order

- disposal on 16 March 2010 - this is matched with the 2,000 shares acquired on 7 April 2010. A gain £60 (£6,850 − £6,790) arises. Because the shares bought on 7 April are identified under the "bed and breakfast" rule, they do not enter the pool.
- disposal on 10 December 2010 - this is a part disposal from the Section 104 holding.

Before the disposal, the Section 104 holding comprised the following -
Shares: 1,000 + 1,000 + 500 = 2,500
Cost: £1,300 + £1,450 + £950 = £3,700
D sold 2,200 out of 2,500 shares so on a simple apportionment the shares sold have a cost of £3,256. Her chargeable gain is therefore £7,700 − £3,256 = £4,444.
The Section 104 holding remaining after the disposal comprises 300 shares at a cost of £444.

EXAMPLE 2 (Mr Browne)
B makes the following acquisitions and disposals[50]

Date	Transaction	No shares	Purchase/sale price
17 August 2008	buys	10,000	£2,500
1 April 2009	buys	10,000	£2,600
8 October 2009	1 for 5 rights issue	4,000	£1060
10 December 2012	sells	7,500	£3,000

The 1 for 5 rights issue is a reorganisation of the company's share capital to which TCGA92/S127, see CG51700+, applies. The rights issue shares and their cost are simply added to the Section 104 holding.
Shares: 10,000 + 10,000 +4,000 = 24,000
Cost: £2,500 + £2,600 + £1060 = £6,160

[50] For clarity I have set this out in tabular form rather than the layout of the Manual.

B sold 7,500 out of 24,000 shares so on a simple apportionment the shares sold have a cost of £1,925. His chargeable gain is therefore £3,000 – £1,925 = £1,075.

The Section 104 holding remaining after the disposal comprises 16,500 shares at a cost of £4,236.

EXAMPLE 3 (Mrs Mountain)

M makes the following acquisitions and disposals[51]

Date	**Transaction**	**No shares**	**Purchase/sale price**
27 May 1979	buys	7,500	£18,750, worth £21,000 on 31/3/1982
6 February 1988	buys	4,000	£16,500
28 July 1993	buys	4,000	£17,000
31 March 2005	buys	6,000	£29,000
13 June 2013	sells	16,500	£114,675

Up to 5 April 2008, M’s 1979 purchase formed a 1982 holding, the 1988 and 1993 purchases together formed a Section 104 holding and the 1999 purchase were treated as a number of individual assets.

These distinctions are not relevant in calculating the chargeable gain on the disposal in 2013.

Before the disposal, the Section 104 holding comprised the following -

Shares: 7,500 + 4,000 + 4,000 + 6,000 = 21,500

Cost: £21,000 (market value at 31 March 1983 replaces cost for shares held on that date) + £16,,500 + £17,000 + £29,000 = £83,500

Note that the costs carried from the “old” Section 104 holding do not include indexation.

M sold 16,500 out of 21,500 shares so on a simple apportionment the shares sold have a cost of £64,081. Her chargeable gain is therefore £114,675 – £64,081 = £50,594.

The Section 104 holding remaining after the disposal comprises 5,000 shares at a cost of £19,419.

EXAMPLE 4

The trustees of the Peninsula Trust make the following acquisitions and disposals[52]

Date	**Transaction**	**No shares**	**Purchase/sale price**
24 September 1997	buy	15,000	£6,750
30 January 2001	3 for 5 rights issue	9,000	£3,600
14 June 2004	buy	12,000	£13,800

[51] For clarity I have set this out in tabular form rather than the layout of the Manual.

[52] For clarity I have set this out in tabular form rather than the layout of the Manual.

26 November 2005	1 for 4 rights issue	9,000	£9,450
23 February 2010	sell	20,000	£39,000

Up to 5 April 2008, the shares acquired on 24 September 1997 together with those acquired in the rights issue on 30 January 2001 and some of those acquired in the rights issue on 26 November 2005 formed a Section 104 holding. The shares acquired in June 2005 and the remaining shares acquired in the rights issue in November 2005 were treated as a number of individual assets.

These distinctions are not relevant in calculating the chargeable gain on the disposal in 2010. In particular, it is not necessary to break down the second rights issue to arrive at the trustees' chargeable gain on this disposal.

Before the disposal, the trustees' Section 104 holding comprised the following-

Shares: 15,000 + 9,000 + 12,000 + 9,000 = 45,000

Cost: £6,750 + £3,600 + £13,800 + £9,450 = £33,600

Note that the costs carried from the "old" Section 104 holding do not include indexation.

The trustees sold 20,000 out of 45,000 shares so on a simple apportionment the shares sold have a cost of £14,934. Their chargeable gain is therefore £39,000 – £14,934 = £24,066.

The Section 104 holding remaining after the disposal comprises 25,000 shares at a cost of £18,666.

56.12.2 *Share-matching*

On a disposal, the order of matching is:

(1) Assets acquired on the day of disposal (**"same-day rule"**)

(2) Assets acquired in 30 days from the date of disposal (**"30-day rule"**)[53]

(3) Assets in the s.104 pool

(4) Assets acquired following the disposal (and not already identified under stage (2) above), taking the earliest acquisition first: s.105(2) TCGA

The rules slightly restrict the scope for tax planning by prompt disposal and re-acquisition. This might be done:

(1) to obtain a tax advantage:

(a) to realise a capital loss

(b) to realise a gain within the annual exemption

(c) for pre-arrival rebasing

[53] HMRC describe this rule as the "bed and breakfast" rule. They do not refer to the same day rule as a bed and breakfast rule, which does have the connotation of an overnight stay.

but at the same time

(2) to effectively retain the asset, and minimise the commercial risk of holding cash and not the asset

The arrangement is known as bed-and breakfasting, and is said not to constitute tax avoidance.[54]

56.12.3 *Same-day rule*

Section 105(1) TCGA provides the same-day rule:

> Paragraphs (a) and (b) below shall apply where securities of the same class are acquired or disposed of by the same person on the same day and in the same capacity—
>
> (a) [i] all the securities so acquired shall be treated as acquired by a single transaction and
>
> [ii] all the securities so disposed of shall be treated as disposed of by a single transaction, and
>
> (b) all the securities so acquired shall, so far as their quantity does not exceed that of the securities so disposed of, be identified with those securities [ie, the securities acquired are identified with the securities disposed of].

56.12.4 *Analysis of identification rule*

The same-day/30-day rules both use the term identification. This is synonymous with "matching" which is the more commonly used word.[55]

Identification is a symmetrical relationship, ie if acquired securities are identified with disposed-of securities, then the disposed-of securities are identified with the acquired securities.

Davies v Hicks was a CGT avoidance scheme. In short:

(1) UK trustees sold shares and held cash

(2) Foreign trustees were appointed

(3) The foreign trustees reacquired the same shares within 30 days

The trustees made a disposal of shares at step (1). But under the 30-day rule, the disposed-of shares were identified with the re-acquired shares, and in computing the CGT computation on the disposal at step (1) the gain was computed as the sale price less the acquisition cost at step (3), and on

[54] See 3.20.9 (Established practice).

[55] That is self-evident, but if authority is needed, see the passage from *Davies v Hicks* set out above.

that basis no gain arose on that disposal.

The trustees also made a (deemed) disposal of the trust fund on the trust migration at step (2).[56] The trust fund was (actually) cash and no gain accrues on the disposal of cash. Here, HMRC argued that the effect of the 30-day rule was that the trustees were deemed to hold the shares not the cash, and so there was a deemed disposal of these deemed shares, on which a deemed gain accrued. So the Court had to consider the nature and effect of the share identification rule. HMRC's argument was rejected:

> 20.. In my view s.106A is a computational section, and I believe that that applies to s.106A(5)(a) just as much as to all the other detailed rules in the section. What triggers the operation of the section is a disposal of securities (see s.106A(1)), and the purpose of the section is to lay down rules as to how the chargeable gain or allowable loss on that disposal is to be computed. When that computation has been made the purpose of the section has been fulfilled.
> 21.. If there is not a disposal of securities the section does not begin to apply. Most disposals will be actual disposals. The section certainly can apply to deemed disposals, but the deemed disposal must be one provided for by some provision other than s.106A itself. Further, and even more importantly, for s.106A to apply the subject matter of the actual or deemed disposal must be securities... When there is a disposal, actual or deemed, of such assets ... , the shares disposed of are matched with shares acquired in accordance with the rules in s.106A . Once they have been so matched the gain or loss on the disposal is computed accordingly. When that process has been completed the application of s.106A to that particular disposal is at an end. The way in which the section operates on that disposal may affect the way in which it applies to future disposals by the same taxpayer of shares of the same class, but apart from that the section has no further statutory function to perform in consequence of the disposal of shares which caused it to apply in the first place. In particular it does not, in my judgment, operate additionally to cause the continuing settled property of the settlement to be treated for the purposes of different CGT provisions as consisting of assets different from those which actually are the continuing settled property.
> 23. ... So s.106A determined the CGT consequences of the actual disposal of AIT shares by the trustees on 24 October 2000, and the section could have had knock-on effects on the CGT consequences of future disposals of AIT shares by the same settlement. But in my firm

[56] See 12.4 (Charge on emigration of trust).

> opinion it could not and did not have the effect of changing the identity of other assets held by the trustees after they had sold the 100,000 shares, and causing those other assets to be regarded as shares in AIT when in fact they were not.

The reader may doubt whether a Court would make the same decision today. But the law is settled, at least below the level of the CoA, and if the same facts re-occurred, no doubt the GAAR would apply.

56.12.5 *Application of same-day rule*

Section 105(3) TCGA excludes share-pooling for securities acquired which fall within the same-day rule:

> None of the securities which, by virtue of this section, are identified with other securities shall be regarded as forming part of an existing section 104 holding or as constituting a section 104 holding.

Suppose T has a s.104 pool of securities. There are two possibilities:

(1) More securities are acquired and then disposed of on the same day. These are matched, they do not enter the s.104 pool, and there is no disposal from that pool.

(2) Existing securities are disposed of and then the same securities re-acquired on the same day. The securities acquired are identified with the securities disposed of, ie they are matched and so again, they do not enter the s.104 pool and there is no disposal from that pool.

The second case is more common. The identification here is fictional, in the sense that the disposed of securities would not (in the absence of the same-day rule) be identified with the acquired securities; because the disponor did not hold the acquired securities at the time of the disposal.

56.12.6 *30-day rule*

Section 106A TCGA provides:

> (1) This section has effect for the purposes of capital gains tax (but not corporation tax) where any securities are disposed of by any person.
> (2) The securities disposed of shall be identified in accordance with the following provisions of this section with securities of the same class that have been acquired by the person making the disposal.
> (3) The provisions of this section have effect in the case of any disposal notwithstanding that some or all of the securities disposed of are otherwise identified—

> (a) by the disposal, or
> (b) by a transfer or delivery giving effect to it;
>
> but where a person disposes of securities in one capacity, they shall not be identified under those provisions with any securities which he holds, or can dispose of, only in some other capacity.

Although s.106A(3) is expressed to apply for s.106A, the same principles would apply for s.105.

Section 106A(4) provides:

> Securities disposed of on an earlier date shall be identified before securities disposed of on a later date; and, accordingly, securities disposed of by a later disposal shall not be identified with securities already identified as disposed of by an earlier disposal.

Section 106A(5) TCGA provides the 30-day rule:

> Subject to subsection (4) above, if within the period of thirty days after the disposal the person making it acquires securities of the same class, the securities disposed of shall be identified—
> (a) with securities acquired by him within that period, rather than with other securities; and
> (b) with securities acquired at an earlier time within that period, rather than with securities acquired at a later time within that period.

Section 106A(5ZA) TCGA provides

> None of the securities which, by virtue of subsection (5) above, are identified with other securities shall be regarded as forming part of an existing section 104 holding or as constituting a section 104 holding.

This is the equivalent of s.105(3) TCGA.

Section 106A(9) TCGA provides:

> The identification rules set out in the preceding provisions of this section have effect subject to subsection (1) of section 105, and securities disposed of shall not be identified with securities acquired after the disposal except in accordance with that section or subsection (5) above.

So the same-day rule has priority over the 30 day rule.

The 30-day rule is disapplied for non-residents. Section 106(5A) TCGA provides:

> Subsection (5) above shall not require securities to be identified with

> securities which the person making the disposal acquires at a time when—
>
> (a) he is not resident in the UK, or
>
> (b) he is resident in the UK but is Treaty non-resident.

What matters is residence at the time of the acquisition, not at the time of disposal.

CG Manual offers some straightfoward examples:

> **CG51560 The "Same Day" And "Bed And Breakfast" Identification Rules** [May 2020]
>
> EXAMPLE 1
>
> Miss A has a Section 104 holding of 1,000 ordinary £1 shares in X plc.
>
> On 1 July 2011 she sells the whole 1,000 shares.
>
> She buys the same number of ordinary £1 shares in X plc on 31 July 2011.
>
> The acquisition is within the 30 day period after the disposal, so the disposal and later acquisition are matched in priority to identifying the disposal with the shares in the Section 104 holding.
>
> EXAMPLE 2
>
> Mr B has a Section 104 holding of 2,500 ordinary 10p shares in Y plc.
>
> On 27 March 2012 he sells 1,700 shares.
>
> On 30 March 2012 he buys another 500 10p shares in Y plc.
>
> The later acquisition of 500 shares does not become part of the Section 104 holding. They are identified with 500 of the shares disposed of on 27 March. The remaining 1,200 shares sold are identified with part of the Section 104 holding.
>
> EXAMPLE 3
>
> Mrs C has a Section 104 holding of 10,000 ordinary 25p shares in Z plc.
>
> On 28 February 2009 she sells 2,000 shares. On 31 March 2009 she buys another 3,000 of the same shares.
>
> Mrs C's acquisition is not within the 30 days after the disposal. So her disposal cannot be identified under the 30 day rule with 2,000 of the 3,000 shares bought on 31 March. The shares disposed of are therefore identified with part of the Section 104 holding.

56.12.7 *Disposal exceeds acquisitions*

Section 105(2) TCGA provides:

> Where the quantity of securities disposed of by any person exceeds the aggregate quantity of—
>
> (a) the securities (if any) which are required by subsection (1) above to be identified with securities acquired on the day of the

disposal [same-day rule],

(b) the securities (if any) which are required by section 106A(5) to be identified with securities acquired after the day of the disposal, [30 day rule] and

(c) the securities (if any) which are required by any of the provisions of sections 104, 106A or 107, or of Schedule 2, to be identified with securities acquired before the day of the disposal,

the disposal shall be treated as diminishing a quantity of securities subsequently acquired, and as so diminishing any quantity so acquired at an earlier date, rather than one so acquired at a later date.

This will not often arise.

56.12.8 *Share matching: Critique*

The main purpose of the share matching rules is to hinder bed-and-breakfasting, and the main purpose of bed-and-breakfasting was to use the CGT annual exemption. Now that the exemption is reduced to a trivial figure, the rules are not needed for that. The purposes remaining of bed-and-breakfasting are crystallization of losses and rebasing prior to becoming UK resident. It is suggested that the share matching rules should be repealed: that would be a significant simplification with little or no tax loss.

56.13 "Securities"

There are separate definitions for the same-day and 30-day rules.

56.13.1 *Relevant securities*

Both definitions use the term relevant securities. This term is defined twice, with the same meaning, though with trivial drafting differences:

s.108 TCGA	**s.106A(10) TCGA**
In this section "relevant securities" means —	In this section ..."relevant securities" means—
(a) securities, within the meaning of [Chapter 2 of Part 12 of ITA 2007 (accrued income profits);[57]	(a) [Identical
(aa) qualifying corporate bonds;	(b) qualifying corporate bonds, and

[57] See 28.2 (AIP securities),

(c) securities which are interests in a non-reporting fund, within the meaning of regulations [under section 354(1) of TIOPA 2010 (see Part 2 of [OFTR] 2009)	(c) securities which are interests in a non-reporting fund, within the meaning of [OFTR] 2009 (see regulation 4(2)).

Armed with this definition, we can turn to the two definitions of "securities"

Section 104(3) TCGA provides:

> For the purposes of this section [s.104] and sections 105, 107, 110 and 114 ...
> "securities" does not include relevant securities as defined in section 108 but, subject to that, means—
> (i) shares or securities of a company; and
> (ii) any other assets where they are of a nature to be dealt in without identifying the particular assets disposed of or acquired;...

The label "securities" is misleading as the rules apply to fungible assets which are not securities. But no short label could be entirely accurate, and I adopt the statutory term, as anything else is even more confusing.

Section 106A(10) TCGA provides:

> In this section ...
> "securities" means any securities within the meaning of section 104 or any relevant securities

I refer to "securities" within these definitions as "**s.104 Securities**" and **"s.106A Securities"** (the initial capital to signify the artificial nature of the definitions).

56.13.2 *Position of relevant securities*

Thus relevant securities are outside the same-day rule, and not subject to share pooling, but within the 30-day rule. That is significant for non-residents who are outside the 30-day rule. Is there any reason for treating relevant securities differently from other securities?

56.14 Pooling/matching: Cryptoassets

HMRC comment on the application of these rules in relation to cryptoassets:[58]

[58] See 96.2 (What cryptoassets are).

CRYPTO22200: Pooling [Feb 2022]

Pooling under TCGA92/S104 allows for simpler Capital Gains Tax calculations. Pooling applies to shares and securities of companies and also 'any other assets where they are of a nature to be dealt in without identifying the particular assets disposed of or acquired'.

Where the nature of the tokens means they are dealt in without identifying the particular tokens being disposed of or acquired then the tokens should be pooled as per TCGA92/S104(3)(ii) (CG11820). This is commonly referred to as a 'section 104 pool'. If TCGA92/S104(3)(ii) applies then the beneficial owner of the tokens will have a single pooled asset for Capital Gains Tax purposes that will increase or decrease with each acquisition, part disposal or disposal.

Non-Fungible Tokens (NFTs) are separately identifiable and so are not pooled.

Each type of token will need its own pool. For example, if a person owns bitcoin, ether and litecoin they would have three pools and each one would have its own 'pooled allowable cost' associated with it. This pooled allowable cost changes as more tokens of that particular type are acquired and disposed of.

Individuals must still keep a record of the amount spent on each type of token, as well as the pooled allowable cost of each pool.

Same day rule

TCGA1992/S105

Where an individual makes acquisitions and disposals of a particular type of tokens on the same day then the same day rules ensure that the maximum number of CGT computations the individual will need to produce for that token type is one per calendar day.

When tokens of the same type are acquired and disposed of by the same individual on the same day and in the same capacity then:

- all the tokens acquired shall be treated as acquired in a single transaction
- all the tokens disposed of shall be treated as disposed of in a single transaction

The tokens acquired will, as far as possible, be matched with the tokens disposed of so that those tokens don't go into the section 104 pool:

- if the quantity of tokens acquired exceeds the number disposed of then the excess tokens will then be considered for the 30 day rule (covered below) and if that doesn't apply then they will go into the section 104 pool
- if the quantity of tokens disposed of exceeds the number acquired then the excess tokens will then be considered for the 30 day rule (covered below) and if that doesn't apply then they will be treated as

a disposal from the section 104 pool.

Acquiring tokens within 30 days of selling TCGA1992/S106A

If an individual disposes of tokens and then acquires, in the same capacity, tokens of the same type within the next 30 days then:

- the same day rule (covered above) is applied first if applicable
- the tokens acquired to which the 30 day rule applies don't go into the section 104 pool but instead are matched to the earlier disposal (or disposals) of tokens
- the tokens acquired to which the 30 day rule applies are matched to disposals on the basis of earliest disposal first
- if the quantity of tokens so acquired exceeds the number of tokens disposed of in the preceding 30 days then the excess tokens will go into the section 104 pool.

Further guidance on these rules is at CG51560.

56.14.1 *Examples*

The Crypto Manual provides:

CRYPTO22251: Example 1 - basic section 104 pool disposal [Feb 2022]

This example provides a basic insight into how a section 104 pool operates.

Victoria bought 100 token A for £1,000. On 18 September 20XX Victoria bought a further 50 token A for £125,000. Victoria is treated as having a single section 104 pool of 150 of token A and total allowable costs of £126,000:

Date	**Quantity of token A**	**Pooled allowable costs**
Opening balance	100	£1,000
18/09/20XX	+50	+£125,000
Closing balance	150	£126,000

On 1 December 20XX Victoria sells 50 of her token A for £300,000. Victoria will be allowed to deduct a proportion of the pooled allowable costs when working out her gain:

Consideration		£300,000
Less allowable costs	£126,000 × (50 / 150)	(£42,000)
Gain		£258,000

Victoria will have a gain of £258,000 and she will need to pay Capital Gains Tax on this.

After the sale, Victoria will be treated as having a single section 104 pool of 100 token A and total allowable costs of £84,000:

Date	**Quantity of token A**	**Pooled allowable costs**
Opening balance	150	£126,000
01/12/20XX	(50)	(£42,000)
Closing balance	100	£84,000

If Victoria then sold all 100 of her remaining token A then she can deduct all £84,000 of the allowable costs when working out her gain/loss.

CRYPTO22252: Example 2 - application of the same day rule [Feb 2022]

This example shows how the same day rule operates, as well as showing what happens to any tokens that can't be matched to the disposal.

Martyn holds 5,000 token B in a section 104 pool. He spent a total of £500 acquiring them, which is his pooled allowable cost.

On 23 June 20XX Martyn enters into the following transactions:

- Morning – he disposes of 1,000 token B for £800.
- Afternoon – he acquires 1,600 token B for £1,000.
- Evening – he disposes of 500 token B for £600.

Martyn's disposals both take place on the same day, so they are treated as a single disposal of 1,500 token B for £1,400. Martyn's acquisition takes place on the same day, so the acquisition is matched with the disposal. Martyn will need to work out the gain on his disposal of 1,500 token B as follows:

Consideration	£800 + £600	£1,400
Less allowable costs	£1,000 × (1,500 / 1,600)	(£938)
Gain		£462

Martyn is unable to match the remaining 100 token B to disposals on the same day. Instead those100 token B and their associated cost of £62 (£1,000 × (100 / 1,600)) will go into the section 104 pool. The section 104 pool now contains 5,100 token B and total pooled costs of £562:

Date	**Quantity of token B**	**Pooled allowable costs**
Opening balance	5,000	£500
23/06/20XX	+100	+£62
Closing balance	5,100	£562

CRYPTO22253: Example 3 - application of the 30 day rule [Feb 2022]

This example shows how the 30 day rule operates, as well as showing what happens to any tokens that can't be matched to the disposal.

Rachel holds 2,000 token C in a section 104 pool. She spent a total of £1,000 to acquire them, which is her pooled allowable cost.

Rachel enters into the following series of transactions:

- On 31 March 20XX Rachel disposes of 1,000 token C for £400.
- On 20 April 20XX Rachel disposes of 500 token C for £150
- On 21 April 20XX Rachel acquires 700 token C for £175
- On 28 April 20XX Rachel acquires 500 token C for £100
- On 1 May 20XX Rachel acquires 500 token C for £150

Acquisitions within 30 days of a disposal are matched on the basis of the earliest acquisition being matched to a disposal. The acquisitions on 21 April 20XX and 28 April 20XX take place within 30 days of the disposal on 31 March 20XX. This means that the acquisitions are matched to the disposal on 31 March 20XX as far as is possible. The acquisitions on 28 April 20XX and 1 May 20XX take place within 30 days of the disposal on 1 May 20XX. This means that the acquisitions are matched to the disposal on 31 March 20XX as far as is possible.

Rachel will need to work out the gain on her two disposals as follows:

31 March 20XX

Consideration		£400
Less allowable costs – 30 day (21/04 – 700 token C)		(£175)
Less allowable costs – 30 day (28/04 – 300 token C)	£100 × (300 / 500)	(£60)
Gain		£165

20 April 20XX

Consideration		£150
Less allowable costs – 30 day (28/04 – 200 token C)	£100 × (200 / 500)	(£40)
Less allowable costs – 30 day (01/05 – 300 token C)	£150 × (300 / 500)	(£90)
Gain		£20

Rachel is unable to match the remaining 200 token C to acquisitions within 30 days of the disposal on 20 April 20XX. Instead those 200 token C and their associated cost of £60 (£150 × (200 / 500)) will go into the section 104 pool. The section 104 pool now contain 2,200 token C and total pooled costs of £1,060:

Date	**Quantity of token C**	**Pooled allowable costs**
Opening balance	2,000	£1,000
01/05/20XX	+200	+£60
Closing balance	2,200	£1,060

CRYPTO22254: Example 4 - interaction of same day rule with section 104 pool [Feb 2022]

This example shows how to the same day rule and a part disposal of the section 104 pool interact.

Daniel holds 8,000 token D in a section 104 pool. He spent a total of £1,000 acquiring them, which is his pooled allowable cost.

On 31 January 20XX Daniel enters into the following transactions:

- Disposal of 5,000 token D for £500.
- Acquisition of 4,000 token D for £320
- Acquisition of 1,000 token D for £75
- Acquisition of 1,000 token D for £70
- Disposal of 2,000 token D for £142
- Acquisition of 500 token D for £35

Daniel's disposals both take place on the same day, so they are treated as a single disposal of 7.000 token D for £642. Daniel's acquisitions all take place on the same day, so they are treated as a single acquisition of 6,500 token D for £500.

Daniel's acquisition and disposal take place on the same day, so the acquisition is matched with the disposal. The remaining 500 token D are treated as a part disposal of the section 104 pool. Daniel will need to work out the gain on his disposal as follows:

Consideration	£500 + £142	£642
Less allowable costs – same day (6,000 token D)	£320 + £75 + £70 + £35	(£500)
Less allowable costs – S104	£1,000 × (500 / 8,000)	(£63)
Gain		£79

Daniel will need to reduce his section 104 pool to 7,500 token D and total allowable costs of £937:

Date	**Quantity of token D**	**Pooled allowable costs**
Opening balance	8,000	£1,000
31/01/20XX	(500)	(£63)
Closing balance	7,500	£937

CRYPTO22255: Example 5 - interaction of 30 day rule with section 104 pool [Feb 2022]

This example shows how to the 30 day rule and a part disposal of the section 104 pool interact.

Melanie holds 14,000 token E in a section 104 pool. She spent a total of £200,000 acquiring them, which is her pooled allowable cost.

On 30 August 20XX Melanie sells 4,000 token E for £160,000.

Then on 11 September 20XX Melanie buys 500 token E for £17,500.

The 500 new tokens were bought within 30 days of the disposal, so they do not go into the section 104 pool. Instead, Melanie is treated as having disposed of:

- the 500 tokens she has just bought
- 3,500 of the tokens already in the section 104 pool

Melanie will need to work out her gain on the disposal of the 4,000 token E as follows:

Consideration		£160,000
Less allowable costs – 30 day		
(11/09 – 500 token E)		(£17,500)
Less allowable costs – S104		
(3,500 token E)	£200,000 × (3,500 / 14,000)	(£50,000)
Gain		£92,500

Melanie still holds a section 104 pool of 10,500 token E. The section 104 pool has allowable costs of £150,000 remaining:

Date	**Quantity of token E**	**Pooled allowable costs**
Opening balance	14,000	£200,000
30/08/20XX	(3,500)	(£60,000)
Closing balance	10,500	£140,000

CRYPTO22256: Example 6 - interaction of same day rule, 30 day rule and section 104 pool [Feb 2022]

This example shows how to the same day rule, 30 day rule and a part disposal of the section 104 pool interact.

Gulferaz holds 100,000 token F in a section 104 pool. He spent a total of £300,000 acquiring them, which is his pooled allowable cost.

Gulferaz enters into the following transactions:

- 31 July 20XX – acquisition of 10,000 token F for £45,000.
- 31 July 20XX – disposal of 30,000 token F for £150,000
- 5 August 20XX – disposal of 20,000 token F for £100,000
- 6 August 20XX – acquisition of 50,000 token F for £225,000
- 7 August 20XX – disposal of 100,000 token F for £150,000

Gulferaz's acquisition on 31 July 20XX takes place on the same day as a disposal so those transactions are matched as far as possible (that is 10,000 token F).

Gulferaz's acquisition on 6 August 20XX takes place within 30 days of the disposal on 31 July 20XX so that acquisition is matched with the disposal on 31 July 20XX as far as possible (that is 20,000 token F).

Gulferaz's acquisition on 6 August 20XX also takes place within 30 days of the disposal on 5 August 20XX so that acquisition is matched with the disposal on 5 August 20XX as far as possible (that is 20,000 token F).

The remaining 10,000 token F acquired on 6 August 20XX go into the section 104 pool as normal.

Gulferaz will need to work out his gains/losses on the three disposals as follows:

31 July 20XX

Consideration		£150,000
Less allowable costs – same day		
(10,000 token F)	£45,000	(£45,000)
Less allowable costs – 30 day		
(06/08 - 20,000 token F)	£225,000 × (20,000 / 50,000)	(£90,000)
Gain		£15,000

No token F go into or come out of the section 104 pool at this date.

5 August 20XX

Consideration		£100,000
Less allowable costs – 30 day		
(06/08 - 20,000 token F)	£225,000 × (20,000 / 50,000)	(£90,000)
Gain		£10,000

No token F go into or come out of the section 104 pool at this date.

6 August 20XX

The section 104 pool is changed as follows:

Date	**Quantity of token F**	**Pooled allowable costs**
Opening balance	100,000	£300,000
06/08/20XX	+10,000	+£45,000
Closing balance	110,000	£345,000

7 August 20XX

Consideration		£150,000
Less allowable costs – S104	£345,000 × (100,000 / 110,000)	(£313,637)
Loss		(£163,637)

The section 104 pool is changed as follows:

Date	**Quantity of token F**	**Pooled allowable costs**
Opening balance	110,000	£345,000
07/08/20XX	(100,000)	(£313,637)
Closing balance	10,000	£31,363

CRYPTO22257: Example 7 - disposal of tokens to acquire different tokens ('crypto-to-crypto' exchange) [Feb 2022]

Most types of tokens need to be purchased using another token. This means that a transaction may simultaneously affect two section 104 pools. This example illustrates how a transaction can affect two section 104 pools simultaneously.

Elina holds 100,000 token G in a section 104 pool. She spent a total of £300,000 acquiring them, which is her pooled allowable cost.

Elina enters into the following transactions:

- 31 August 20XX – acquisition of 10,000 token H (with a value of £3,200) for 1,000 token G (with a value of £3,200)
- 31 August 20XX – disposal of 5,000 token H (with a value of £1,700) for 600 token G (with a value of £1,920)
- 31 August 20XX – acquisition of 5,000 token H (with a value of £1,650) for 550 token G (with a value of £1,760)
- 4 September 20XX – disposal of 2,000 token H (with a value of £560) for 180 token G (with a value of £558)
- 16 September 20XX – acquisition of 4,000 token H (with a value of £1,080) for 400 token G (with a value of £1,080)

- 27 October 20XX – disposal of 12,000 token H (with a value of £2,400) for 900 token G (with a value of £2,430)

Elina entered into two acquisitions of token H on 31 August 20XX. These acquisitions are treated as a single acquisition of 15,000 token H on that date. That single acquisition is then matched as far as possible with the disposal of 5,000 token H on the same date. The remaining token H that were acquired go into a section 104 pool of token H.

Elina has also entered into two disposals of token G on 31 August 20XX. These two disposals are treated as a single disposal of 1,550 token G on that date. That single disposal is matched as far as possible with the acquisition of 600 token G on the same date. The disposal is then matched to the acquisition of 180 token G on 4 September 20XX. The remaining part of the disposal comes from the section 104 pool of token G.

Elina's disposal of 2,000 token H on 4 September 20XX is matched with the acquisition of 4,000 token H on 16 September 20XX as the acquisition takes place within 30 days of the disposal.

Elina's acquisition of 180 token G on 4 September 20XX goes into the section 104 pool for token G.

Elina's disposal of 400 token G on 16 September 20XX comes from the section 104 pool of token G.

Elina's disposal of 12,000 token H on 27 October 20XX comes from the section 104 pool for token H.

Elina's acquisition of 900 token G on 27 October 20XX goes into the section 104 pool for token G.

Elina will need to work out her gains/losses on the three disposals as follows:

31 August 20XX – disposal of token G

Consideration	Value of 15,000 token H acquired	£4,850
Less allowable costs – same day (600 token G)	Value of 5,000 token H disposed of on 31/08/20XX	(£1,700)
Less allowable costs – 30 day (04/09 – 180 token G)	Value of 2,000 token H disposed of on 04/09/20XX	(£560)
Less allowable costs – S104	£300,000 × 770 / 100,000 = £2,310	(£2,310)
Gain		£280

31 August 20XX – disposal of token H

Consideration	Value of token G acquired	£1,920
Less allowable costs – same day (5,000 token H)	(£3,200 + £1,760 = £4,960) × 5,000 / 15,000	(£1,653)
Gain		£267

4 September 20XX – disposal of token H

Consideration	Value of token G acquired	£558
Less allowable costs – 30 day (16/09 – 2,000 token H)	£1,080 × 2,000 / 4,000	(£540)
Gain		£18

16 September 20XX – disposal of token G

Consideration	Value of token H acquired	£1,080
Less allowable costs – S104	£297,690 × 400 / 99,230	(£1,200)
Loss		(£120)

27 October 20XX – disposal of token H

Consideration	Value of token G acquired	£2,430
Less allowable costs – S104		(£3,847)
Loss		(£1,417)

The section 104 pools are as follows:

Section 104 pool for token G

Date	**Quantity of token G**	**Pooled allowable costs**
Opening balance	100,000	£300,000
31/08/20XX - Disposal of 770 tokens	(770)	(£2,310)
Balance at 31/08/20XX	99,230	£297,690
16/09/20XX - Disposal of 400 tokens	(400)	(£1,200)
Balance at 16/09/20XX	98,830	£296,490
27/10/20XX - Acquisition of 900 tokens	+900	+£2,400
Balance at 27/10/20XX	99,730	£298,890

Section 104 pool for token H

Date	**Quantity of token H**	**Pooled allowable costs**
31/08/20XX - Acquisition of token H	+10,000	+£3,307
Balance at 31/08/20XX	10,000	£3,307
04/09/20XX - Acquisition of 2,000 tokens	+2,000	£540
Balance at 04/09/20XX	12,000	£3,847
27/10/20XX - Disposal of 12,000 tokens	(12,000)	(£3,847)
Pool ceases		£0

CIOT question the practicality of applying the rules to cryptoassets:[59]

> HMRC requires s.104 pooling and 30-day bed and breakfasting rules, as is used for shares for calculating the base cost for shares; yet over a given tax year it is possible for an individual to carry out thousands, hundreds of thousands or potentially even millions of micro transactions of tokens via automated trading routines, resulting in small portfolios with vast numbers of transactions unlike most 'standard' investment portfolios.

One hopes that HMRC will accept a reasonable estimate in appropriate circumstances.

56.15 Pooling/matching: ISAs

Reg 34 ISA regs 1998 provides:

> (1) For the purposes of capital gains tax on the occasion when the title to account investments is transferred from an account manager to an account investor there shall be deemed to be a disposal and reacquisition

[59] CIOT Response to the paper "Expanding the Investment Transactions List for the Investment Management Exemption and other fund tax regimes" (2022).

by the account investor of those investments for a consideration equal to their market value at the date of the transfer.

(2) Sections 104 to 114 of the Taxation of Chargeable Gains Act 1992 shall apply for the purposes of pooling and identifying account investments as if—

(a) in section 106A after subsection (11) there were added—

(12) This section and sections 104, 110, 110A and 114—

(a) shall apply separately in relation to any securities which are held by a person as account investments so long as they are so held, and

(b) shall apply in relation to any such securities which became account investments by being transferred or renounced to an account manager or to a nominee for an account manager in the circumstances specified in regulation 7(2)(h) and (10)(a), (b) or (ba) as if they had been account investments—

(i) in the case of securities acquired by that person in accordance with the provisions of a savings-related share option scheme, which were transferred in the circumstances specified in regulation 7(2)(h)(i) and (10)(a), from the date of their acquisition by him, or

(ii) in the case of securities appropriated to that person in accordance with the provisions of an approved profit sharing scheme, which were transferred in the circumstances specified in regulation 7(2)(h)(ii) and (10)(b), from the date when he directed the trustees to transfer the ownership of the securities to him or, if earlier, the release date in relation to those securities, or

(iii) in the case of securities which were plan shares of a Schedule 2 SIP before being transferred in the circumstances specified in regulation 7(2)(h)(iii) and (10)(ba), from the date when the securities ceased to be subject to the plan, and

(c) while applying separately to any such securities, shall have effect as if that person held them in a capacity other than that in which he holds any other securities of the same class whether under another such account or otherwise.

(13) In this section—

(a) "account", "account investment" and "account manager" have the same meanings as in the Individual Savings Account Regulations 1998 and "regulation" means a regulation of those Regulations;

(b) "approved profit sharing scheme" has the same meaning as in

Chapter IV of Part V of the Taxes Act and "savings-related share option scheme" has the meaning given by paragraph 1 of Schedule 9 to that Act.";

(c) "Schedule 2 SIP" and "ceased to be subject to the plan" shall be construed in accordance with the SIP code (see section 488(3) of ITEPA 2003); and

(d) "plan shares", in relation to a Schedule 2 SIP, shall be construed in accordance with the SIP code (see section 488(3) of ITEPA 2003) except that—

(i) paragraph 87(6) of Schedule 2 to ITEPA 2003 (meaning of the word "shares" in the context of company reconstructions) shall not apply, and

(ii) in paragraph 88(2) of that Schedule (treatment of shares acquired under rights issue) the words "or securities or rights" shall be treated as omitted.

(b) [This amended 110A, repealed 2008]

56.15.1 *Amendments to s.106A*

Reg 34 ISA regs 1998 provides:

> (3) Section 106A of the Taxation of Chargeable Gains Act 1992 shall apply for the purposes of identifying securities within the meaning of that section which are eligible to become account investments as if—
>
> (a) in subsection (4), there were added at the beginning the words "Subject to subsection (14) below";
>
> (b) in subsection (6), the words "subsections (4) and (5) above" were replaced with the words "subsections (4), (5) and (14)"; and

Amended as reg 34(3) directs, s.106A TCGA provides:

> (4) Subject to subsection (14) below securities disposed of on an earlier date shall be identified before securities disposed of on a later date; and, accordingly, securities disposed of by a later disposal shall not be identified with securities already identified as disposed of by an earlier disposal.
>
> ...
>
> (6) Subject to subsections ~~(4) and (5)~~ (4), (5) and (14) above, relevant securities disposed of shall be identified with relevant securities acquired at a later time, rather than with relevant securities acquired at an earlier time.

Reg 34 ISA regs 1998 provides:

> (3) Section 106A of the Taxation of Chargeable Gains Act 1992 shall apply for the purposes of identifying securities within the meaning of that section which are eligible to become account investments as if—
>
> (c) after subsections (12) and (13), as added by paragraph (2), there were added—
>
> "(14) Where a person disposes of securities and securities of the same class which were eligible for transfer to an account under regulation 7(2)(h) were—
>
> (a) held by him immediately before that disposal, or
>
> (b) acquired by him on the same day as that disposal, or
>
> (c) acquired by him within the period of thirty days after that disposal,
>
> and those securities were acquired in the circumstances specified in that regulation, he shall be treated as having first disposed of any securities of that class held or acquired by him which were not so eligible."

Reg 34(4) amends provisions relating to reorganisations, and is not discussed here.

56.16 2017 rebasing

56.16.1 *Rebasing reliefs*

This section discusses the relief in Para 41 sch 8 F(no.2)A 2017 which I call **"2017 rebasing"**. This is one of several rebasing reliefs:

Name of relief	**Provision**	**See para**
1982 rebasing	s.35 TCGA	*Not discussed*
2008 rebasing	para 126 Sch 7 FA 2008	61.46
2017 rebasing	para 41 sch 8 F(no.2)A 2017	*Discussed here*
UK land rebasing	sch 4AA TCGA	57.15
Rebasing on death	s.62(1) TCGA	88.5

Also see 20.13.14 (Rebasing/cleansing compared).

The professional bodies have published a set of Q&As with HMRC replies (**"Rebasing Q&As"**).[60] The edition history is:

[60] The full title is "Rebasing and Adjustment to the CGT Foreign Capital Losses Election Professional Bodies Q&A". See *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-09-19-foreign-capital-losses.ashx* or *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99*

Version	Date	ICAEW label
1	March 2018	Taxguide 06/18
2	May 2019	Taxguide 09/19

56.16.2 *2017 rebasing conditions*

Para 41 sch 8 F(no.2)A 2017 provides:

> (1) This paragraph applies to the disposal of an asset by an individual ("P") where-

P stands for person. But 2017 rebasing applies only to assets of individuals: it discriminates against assets held through trusts and companies. In the current HMRC view, it seems, the only acceptable form of ownership is direct absolute ownership.

There follow four conditions, or sets of conditions, which I call **"rebasing conditions (a) - (d)"**.

56.16.3 *Acquisition/disposal date*

Para 41 sch 8 F(no.2)A 2017 provides:

> (1) This paragraph applies to the disposal of an asset by an individual ("P") where-
> (a) the asset was held by P on 5 April 2017

Para 41 sch 8 F(no.2)A 2017 provides:

> (1) This paragraph applies to the disposal of an asset by an individual ("P") where ...
> (b) the disposal is made on or after 6 April 2017

56.16.4 *Condition (c): Situs of asset*

Para 41 sch 8 F(no.2)A 2017 provides:

> (1) This paragraph applies to the disposal of an asset by an individual ("P") where...
> (c) the asset was not situated in the UK at any time in the relevant period

The relevant period matters as the asset must not be UK situate during that period. Para 41(2) sch 8 F(no.2)A 2017 provides:

> The relevant period is the period which-

/225a7316-5841-4f2e-9a4b-cd789906664a/RebasingAdjustments.pdf

> (a) begins with 16 March 2016 or, if later, the date on which P acquired the asset, and
> (b) ends with 5 April 2017.

Perhaps this is an anti-forestalling rule.

56.16.5 *Qualifying individual*

Para 41 sch 8 F(no.2)A 2017 provides:

> (1) This paragraph applies to the disposal of an asset by an individual ("P") where...
> (d) P is a qualifying individual.

"Qualifying individual" is a label for a set of rules. Para 41 sch 8 F(no.2)A 2017 provides:

> (3) P is a qualifying individual if-

A set of four conditions then follow (**"qualifying individual conditions"**):

> (3) P is a qualifying individual if-
> (a) section 809H of ITA 2007 (claim for remittance basis by long-term UK resident: charge)[61] applied in relation to P for any tax year before the tax year 2017-18
> (b) P is not an individual who-
> (i) was born in the UK, and
> (ii) whose domicile of origin was in the UK

2017 rebasing does not apply to a formerly-domiciled resident.

> (3) P is a qualifying individual if ...
> (c) P was not domiciled in the UK at any time in a relevant tax year

A person who acquires a UK domicile of choice loses the relief.

> (3) P is a qualifying individual if ...
> (d) P met condition B in section 835BA of ITA 2007 [15-year rule][62] in relation to each relevant tax year.

It is difficult to see why qualifying individual condition (d) must be met for each relevant tax year (not just 2017/18); but it will be rare that the

[61] See 17.12.1 (7 & 12-year residence tests).

[62] See 5.4.3 (IT/CGT 15-year rule).

condition is met in 2017/18 and not subsequently (unless the individual leaves the UK and does not return, in which case 2017 rebasing ceases to be an issue).

56.16.6 *"Relevant tax year"*

"Relevant tax year" matters for two purposes:

Qualifying individual condition: Requirement
Condition (c): P must be non UK domiciled in each relevant tax year
Condition (d): P must meet the 15-year rule in each relevant tax year

Para 41(4) sch 8 F(no.2)A 2017 provides:

> The relevant tax years are-
> (a) the tax year 2017-18, and
> (b) if the disposal was made after that tax year, all subsequent tax years up to and including that in which the disposal was made.

"Relevant tax year" is distinct from the term "relevant period".[63]

56.16.7 *Effect of 2017 rebasing*

Assuming the rebasing conditions are satisfied, para 41(5) sch 8 F(no.2)A 2017 provides the relief:

> In computing, for the purpose of TCGA 1992, the gain or loss accruing on the disposal, it is to be assumed that P acquired the asset on 5 April 2017 for a consideration equal to its market value on that date.

I refer to this as **"2017 rebasing"** to distinguish it from rebasing under the 2008 rules, and other occasions of rebasing.
The wording is based on s.35 TCGA (1982 rebasing).
Para 41(8) sch 8 F(no.2)A 2017 provides:

> This Part of this Schedule has effect as if it were included in TCGA 1992.

The August 2016 consultation paper provides:

> [1] Rebasing will apply on an asset by asset basis and there will be no requirement that any part of the sales proceeds relating to the part of the gain which arose before April 2017 should be left outside the UK.
> [2] Where the asset was originally purchased with clean capital, the

[63] See 56.16.4 (Condition (c): Situs of asset).

> entire proceeds from the disposal can be brought to the UK without triggering a remittance. However, where it was purchased wholly or partly with foreign income and gains, an element of the disposal proceeds will still relate to[64] those income and gains and so will be subject to the remittance basis in the normal way when the proceeds are brought to the UK.

Point [2] is correct, because rebasing only applies "in computing... the gain or loss accruing on the disposal".

Offshore funds qualify for 2017 rebasing. The wording is designed to match reg 39(1) OFTR 2009 which provides that the starting point for calculating an offshore income gain is the amount which would be the gain on the disposal in question "for the purposes of TCGA 1992".[65] HMRC agree.[66]

Deeply discounted securities and life policy gains do not qualify for 2017 rebasing, since the chargeable amounts are not chargeable gains or computed on CGT principles.

Rebasing applies to assets held through partnerships.[67]

Taxpayers should keep evidence relating to value on 6 April 2017, and, in appropriate cases, instruct valuers to prepare valuations, as a contemporary valuation is easier, cheaper, and likely to be more accurate, than one made some years later.

56.16.8 *Inter-spouse transfer*

Para 41(6) sch 8 F(no.2)A 2017 provides:

> Sub-paragraph (5) applies notwithstanding section 58(1) of TCGA 1992 (disposals between spouses).

Where 2017 rebasing applies, an inter-spouse disposal does not cause it to be lost. Rebasing Q&As Q4 provides two straightforward examples, not set out here.

56.16.9 *Rebasing: share matching*

Rebasing Q&As Q7 (Kiki) provides:

[64] "Relate to" is an inaccurate paraphrase of the statutory wording, "derive from". But it does not matter.

[65] See 67.20.2 (Computation of OIG).

[66] Rebasing Q&As Q1; for Carried Interest, see 73.20 ("Permitted deductions").

[67] This is self-evident, but if authority is needed, see Rebasing Q&As Q2.

> K is deemed domiciled in 2017/18 and qualifies for rebasing. She has a mixed fund investment portfolio that contains a significant amount of clean capital which she wants to cleanse. K does not, however, want to be out of the market for long or acquire different investments. As such:
>
> - a new investment portfolio is opened for the clean capital;
> - all the investments are sold on 19 June 2018;
> - a cautious cleansing transfer (and nomination) to the new clean capital investment portfolio takes place;
> - on 20 June 2018 acquisitions are made such that, once all the acquisitions are made, across the two portfolios K is left with exactly the same investments and in the same quantities as she held on 19 June 2018.
>
> What is the tax analysis?
>
> *Suggested answer:*
>
> From a CGT perspective because there has been a re-acquisition within the period of 30 days after the disposal the base cost for the disposal is the acquisition cost of the new shares (that is the "bed and breakfasting rule"[68] applies).
>
> The base cost for the shares K has in her portfolios as at 20 June 2018 is the rebased 5 April 2017 amount...
>
> **HMRC Comment**
>
> The CG analysis is OK and looks to be another mechanism to convert an asset to cash that goes to an account that can then be cleansed. HMRC can agree the cleansing aspects of this.

56.16.10 *Rebasing: currency fluctuation*

Rebasing Q&As Q8 provides:

> HMRC's view ... is that if a taxpayer receives $1,000 of foreign income when it is worth £500 but brings it to the UK when it is worth £700 (due to forex movements) then he is considered to have made a taxable remittance of £700. (Equally if the funds are worth £300 when brought to the UK there is a taxable remittance of £300.)
>
> ... It should be noted that we think that the HMRC view is not the better technical interpretation ... [69]
>
> The issue is, however, thrown into sharp focus by rebasing since the HMRC view does not result in the results one would expect given the Chancellor's announcement
>
> Consider the following example:

[68] See 56.12.2 (Share-matching).

[69] The practitioners view is correct: see 95.6 (Remittance basis: Conversion date).

The taxpayer (who is deemed domiciled in 2017/18 and qualifies for rebasing) has $1 million of 2014/15 income which was worth £500,000 when received. It is then invested in an asset.

At 5 April 2017 it was worth $1.2 million (worth £900,000 at that date) and sold for that amount on 7 April 2017.

The taxpayer remits the $1.2 million (placed in a segregated account) to the UK immediately.

HMRC's interpretation is that the $1.2 million represents:

- the $1 million of original income, worth £750,000 at the date of remittance; and
- the £400,000 gain (that is £900,000 less £500,000) subject to rebasing relief.

Under this HMRC approach, since the entire mixed fund has been brought into the UK (so the remittance is not limited to the sterling value of the amount brought into the UK) the taxable remittance is £750,000 notwithstanding that the taxpayer has only remitted £900,000 of cash and expected to benefit from £400,000 rebasing relief.

In contrast, taking the alternative approach (as agreed by the professional bodies) with the same figures the $1.2 million represents:

- the $1 million of original income (£500,000); and
- the £400,000 gain (that is £900,000 less £500,000) subject to rebasing relief.

That is £900,000 is brought in per the mixed fund analysis, which agrees to the value of the sterling amount transferred. Only £500,000 is taxable meaning the taxpayer benefits in full from the £400,000 rebasing relief.

Given this issue what should be done in these circumstances?

Suggested Answer: Provided a consistent year on year approach is taken for each individual mixed fund bank account analysis the conversion of Remittance Basis foreign income to sterling can take place either on the date the income arises or when the income is remitted.

HMRC Comments

The gain is correct at £400k. HMRC's interpretation remains unchanged. The conversion of foreign currency into sterling is carried out using the spot rate on the date of remittance. HMRC does not agree the alternative approach suggested.

Rebasing Q&As Q9 provides:

Whilst HMRC in its manuals states that income in a foreign currency should be translated to sterling using the foreign exchange spot rate on remittance this is not the case for gains as there is clear case law to the contrary[70] ... As such, HMRC and practitioners agree on the position for gains.

How will rebasing work where just foreign chargeable gains were used wholly (or in part) to fund the acquisition?

Suggested Answer:

This is best explained by way of an example.

The taxpayer (who is deemed domiciled in 2017/18 and qualifies for rebasing) had $1 million within a bank account (this traced to the sale of an investment in 2009/10 and represented clean capital of £400,000 and Remittance Basis foreign chargeable gains of £200,000).

This $1 million was immediately re-invested in an asset such that the CGT base cost of the asset was £600,000 sterling.

At 5 April 2017 the new foreign asset was worth $1.2 million (worth £900,000 at that date) and sold for that amount on 7 April 2017.

The taxpayer remits the $1.2 million (placed in a segregated account) to the UK immediately.

The $1.2 million represents:

- the $1 million of original funds (£400,000 clean capital and £200,000 Remittance Basis foreign chargeable gains); and
- the £300,000 capital gain (that is £900,000 less £600,000).

That is £900,000 is brought to the UK per the mixed fund analysis, which agrees to the value of the sterling amount transferred.

HMRC Comments

I think the opening sentence is slightly confusing. Working out what gets remitted and how a gain is calculated are separate things.

On the example - I think it would be helpful if the example confirmed that the new asset was acquired straight after the sale of the investment, otherwise that raises questions on what the acquisition cost for CG would be. HMRC agrees the cleansing aspects of this.

Example adjusted in line with HMRC comments.

56.16.11 *Rebasing: Reorganisations*

Para 41(7) sch 8 F(no.2)A 2017 deals with reorganisations:

> Where under section 127 of TCGA 1992 (including that section as applied by sections 132, 135 and 136 of that Act) an original and a new holding of shares or other securities are treated as the same asset, the condition in sub-paragraph (1)(c) [non-UK situs][71] applies to both the original and the new holding.

[70] See 95.2 (CGT: Currency conversion date).

[71] See 56.16.4 (Condition (c): Situs of asset).

A reorganisation during the relevant period might convert a UK asset into a foreign asset which might arguably allow rebasing. A reorganisation after the relevant period should not matter.

One might have thought that the reorganisation TAAR would be sufficient to prevent abuse; but there it is.

56.16.12 *Rebasing: Remittance reliefs*

Para 42 sch 8 F(no.2)A 2017 deals with the interaction of 2017 rebasing and exempt property remittance relief:[72]

> (1) This paragraph applies for the purposes of paragraph 41(1)(c) [non-UK situs] in the case of an asset which, having been situated outside the UK, becomes situated in the UK before the end of the relevant period.
> (2) The asset is to be regarded as not situated in the UK at a time in the relevant period when—
> (a) it meets the condition in section 809Z(3)(a), (b) or (c) of ITA 2007 (public access),
> (b) it meets the condition in section 809Z3(3)(a), (b) or (c) of ITA 2007 (repairs),
> (c) the sole or principal purpose of its being situated in the UK is to sell it or put it up for sale, or
> (d) in the case of clothing, footwear, jewellery or a watch, it is for the personal use of—
> (i) P or a husband, wife or civil partner of P,[73] or
> (ii) a child or grandchild of a person within sub-paragraph (i), if the child or grandchild has not reached the age of 18.
> (3) The asset is to be regarded as not situated in the UK at any time in the relevant period if it is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) of ITA 2007 applies but—
> (a) by virtue of section 809X(5)(c) of ITA 2007 (notional remitted amount less than £1000) it is treated as not remitted to the UK, or
> (b) by the end of the relevant period it has not failed to meet the temporary importation rule in section 809Z4 of ITA 2007.

56.16.13 *Election out of 2017 rebasing*

Para 43(1) sch 8 F(no.2)A 2017 provides:

[72] See 19.29 (Exempt property).

[73] Para 41(4) provides: "Section 809M(3)(a) and (b) of ITA 2007 (persons living together) apply for the purposes of sub-paragraph (2)(d)(i)." See App.3.4.1 (Cohabitee treated as spouse).

> An individual may make an election for paragraph 41 not to apply to a disposal made by the individual.

This may be useful if a loss arises.
The standard claim procedure rules apply.[74]

Para 43 sch 8 F(no.2)A 2017 continues:

> (3) An election under this paragraph is irrevocable.
> (4) All such adjustments are to be made, whether by way of discharge or repayment of tax, the making of assessments or otherwise, as are required to give effect to an election under this paragraph.

56.16.14 *Rebasing: Critique*

2017 rebasing was an afterthought, first suggested in the 2016 Budget, and perhaps HMRC did not think very deeply about it. The August 2016 consultation paper provides:

> The government agrees that it would be punitive to require long-term resident non-doms to pay CGT on gains that have accrued on foreign assets held while the individual was a non-dom. To address these concerns, Budget 16 announced that those individuals who will become deemed-domiciled in April 2017 because they have been resident for 15 of the past 20 years will be able to rebase directly held foreign assets to their market value on 5 April 2017.

Rebasing is restricted to those who become deemed domiciled by clocking up 15 years residence by 2017/18. Someone who became UK resident in 2002/03 or before qualifies, and someone who became UK resident subsequently does not. What is the reason for that? It is a matter of speculation since no reason was ever given. Perhaps it is thought that those who do not become deemed domiciled in 2017/18:
(1) have more time in which to make disposals, taxed on the remittance basis, in anticipation of acquiring deemed domicile subsequently; or
(2) have more time in which to arrange to cease to be UK resident.

Or perhaps it was thought presentationally desirable to offer some relief, but the smaller the relief the better. As it stands, the largesse is significant but its application is random.

[74] See 123.2.5 (2017 rebasing election).

56.17 CGT remittance basis

Para 1 sch 1 TCGA provides:

> (1) This paragraph applies in the case of an individual to whom the remittance basis applies[75] for a tax year if—
>
> (a) in that year the individual disposes of foreign assets,[76]
>
> (b) chargeable gains accrue to the individual on the disposal of those assets, and
>
> (c) the gains are not taken outside the charge to capital gains tax as a result of section 1G (cases where tax year is a split year).
>
> (2) The gains are treated as accruing to the individual only so far as, and at the time when, they are remitted to the UK.
>
> (3) The amount treated as accruing is equal to the full amount remitted to the UK[77] at that time.

The use of the word "individual" means that trustees and personal representatives do not qualify for the remittance basis.

The CGT remittance basis applies to foreign *situate* assets.[78] By contrast, the RFI remittance basis applies to foreign *source* income, which is a different concept.[79]

See too 18.45 (Gain on disposal at undervalue).

56.17.1 *Disposal/accrual date*

The gain is treated as accruing at the date of the remittance. The gain is treated as not accruing on the date of the actual disposal, when it actually accrues. This is relevant for:

(1) Rate of CGT: rates depend on when gains accrue, so one applies the rate in the year of remittance, not the year of disposal.

[75] Para 5(2) sch 1 TCGA provides:
"For the purposes of this Schedule any reference to "the remittance basis" applying to an individual for a tax year is to section 809B, 809D or 809E of ITA 2007 applying to the individual for the year."

[76] Para 5(1) sch 1 TCGA provides a commonsense definition:
"For the purposes of this Schedule "foreign asset" means an asset situated outside the UK."

[77] Para 5(3) sch 1 TCGA provides:
"For the purposes of this Schedule any question as to whether, and when, amounts are "remitted to the UK" is determined in accordance with the rules in Chapter A1 of Part 14 of ITA 2007."

[78] See 103.1 (Situs of assets for CGT - Introduction).

[79] See 16.6 (No source/deemed source).

(2) EIS reinvestment relief: time limits for EIS relief depend on when gains accrue (not when the disposal takes place).[80]

Time limits for rollover relief depend on the date of disposal.[81] The drafter of the former para 16(4) schedule A1 TCGA clearly considered that the pre-2008 CGT remittance basis altered the date of disposal, ie the asset is regarded as disposed of at the time of remittance (not at the time of the actual disposal).[82] But for business asset disposal relief (formerly known as entrepreneurs' relief), HMRC regard the date of disposal as the date of the actual disposal, not the date of remittance.[83]

56.18 Remittance basis and taper/indexation

56.18.1 *Taper relief*

Para 56 sch 2 FA 2008 provides:

> (1) The amendments made by para 31(2) and (3) have effect where the intervening year is the tax year 2008-09 or any subsequent tax year.
> (2) The amendments made by paras 41 and 43 have effect where the eligible year is the tax year 2008-09 or any subsequent tax year.
> (3) The other amendments made by paras 23 to 55 have effect in relation to chargeable gains accruing or treated as accruing in the tax year 2008-09 or any subsequent tax year.

The important provision here is para 56(3).[84] This removes taper relief on gains on disposals before 2008/09 which are remitted after 2008/09. Computations of unremitted gains made before 2008 will need to be recomputed.

A different rule applies for s.1(3) amounts (trust gains).[85]

56.18.2 *Indexation relief*

Para 83 sch 2 FA 2008 provides:

> The amendments made by paragraphs 77 to 82 [which abolish the indexation allowance] have effect in computing gains on disposals made on or after 6 April 2008.

[80] Para 1 sch 5B TCGA.

[81] Section 152(3) TCGA

[82] See the 6th edition of this work, para 29.4.

[83] See 56.19.2 (Deadline for BADR claim).

[84] Para 56 (1)(2) relate to specialist topics, s.56A, 279A and 279B TCGA.

[85] See 61.42 (s.1(3) amount at 5/4/2008).

Assuming that this refers to the actual disposal, the effect is that indexation relief continues to apply to gains on pre-2008 disposals which are remitted after 6 April 2008. This is the HMRC view. The CG Manual provides:

> **CG25320 - Remittance basis: computing the foreign chargeable gain: indexation allowance and taper relief** [Nov 2019]
> When dealing with remittance basis cases the foreign chargeable gain should be computed as at the date of the disposal using all the normal computational rules.
> For disposals occurring after 5 April 1982 and before 6 April 1998 these rules will include an allowance for indexation up to the date of the disposal. No further allowance is due for indexation when the gain is remitted to the UK however long the interval is between the gain arising and the date of the remittance....

56.19 BAD relief: Remittance basis

The catchy name "business asset disposal relief" replaced "entrepreneurs' relief" in 2020. Presumably the old name had become an embarrassment. A full discussion of the relief needs a book to itself.

Taxguide 1/12 (Entrepreneurs' relief - practical points)[86] sets out the outcome of discussions with HMRC, and is discussed here. For other issues on BAD relief, see:

Topic	**See para**
TNR: BAD relief claim	11.9
BAD relief: Mixed fund	56.19.4
BAD relief: Trade group	64.35
s.86/87 and BAD relief interaction	60.17

56.19.1 *BADR and remittance basis*

Taxguide 1/12 provides:

> **EXAMPLE D1 – Foreign chargeable gains qualifying for ER fall within [what is now sch 1 TCGA, remittance basis]**
> 106 Section 169N(9) TCGA 1992 states that 'any gain or loss taken into account under subsection (1) is not to be taken account under this Act as a chargeable gain or an allowable loss.'
> 107 The Explanatory Notes published with the Finance Bill 2008

[86] *https://www.icaew.com/-/media/corporate/archive/files/technical/tax/taxguides/taxguide-1-12-er-final-at-25-jan-12.ashx*

indicate that the purpose of s 169N(9) is merely to ensure that where there is one ER disposal, and gains and losses are aggregated to determine the qualifying net ER gain, this cannot be segregated as gains and losses separately for CGT purposes. There have, however, been concerns about the interpretation of s 169N(9) and how it interacts with other provisions within TCGA 1992.

108 As can be seen from the responses to the following queries, HMRC considers that foreign chargeable gains qualifying for ER fall within [sch 1 TCGA] where such gains are realised by remittance basis users. The delay between the time the gains arises and when the remittance is made is no bar on the claiming of ER provided a valid ER claim is made within the specified time period (see Example D2).

56.19.2 *Deadline for BADR claim*

Taxguide 1/12 provides:

EXAMPLE D2 – The deadline for making an ER claim

109 The deadline for making an ER claim is linked to the tax year in which the qualifying business disposal is made, not to the tax year that the gain accrues to a taxpayer. Thus if a UK-resident foreign domiciliary wishes to make the claim for a qualifying business disposal of foreign property, it would seem that the following deadlines apply for disposals in the specified tax years, regardless of whether the chargeable gain has been remitted.

Tax year	**Claim deadline**
2008/09	31 January 2011
2009/10	31 January 2012
2010/11	31 January 2013
2011/12	31 January 2014

110 Does HMRC agree? How would it recommend that such a claim be made if it does not impact on the tax liability as there has been no remittance of the disposal proceeds?

HMRC response to Example D2

111 ER is only available on the making of a claim and such claim must be made within the statutory time limit which is set by reference to the date of the qualifying disposal (see s 169M(3) TCGA 1992). It is for the taxpayer to consider whether to submit a protective claim for ER within this time period.

Further note

112 This means that where a remittance basis user makes a qualifying gain in a tax year he or she has until the first anniversary of 31 January following the end of the tax year to decide whether or not to make the ER

> claim. The date that the proceeds are remitted is irrelevant.
> 113 For example: AB is a remittance basis user. He makes a £10m gain on a qualifying disposal in 2011/12 of shares in a foreign company (total proceeds £15m). He has not made any previous ER claims and so has the entire £10m ER allowance available. He does not expect to remit the proceeds from the gain for at least three years (having sufficient clean capital to supplement his UK income). If he wants to be able to benefit from ER on any eventual remittance of the proceeds he has until 31 January 2014 to make the ER claim. The fact that he will not have remitted the proceeds at that date is irrelevant to the claim deadline.
> 114 Where an ER claim is required prior to the gains being remitted there will be no gain shown on the tax return. The claim should be made by way of a note to the tax return, with the ER computation included.

56.19.3 *BAD relief limit*

There is a lifetime limit on BAD relief which has fluctuated wildly:

Date of disposal from	**Limit**
6 April 2008	£1 million.
6 April 2010	£2 million
23 June 2010	£5 million
6 April 2011	£10 million
11 March 2020	£1 million

Taxguide 1/12 provides:

> **EXAMPLE D3 – The raised ER limit**
> 115 It is understood that HMRC's settled view is that the ER limit to apply in respect of remittance basis gains is that which is in force when the gains arise.
> 116 For example, assuming there have been no other qualifying ER gains, where the disposal date for a qualifying ER gain of £5m (paid into a separate offshore bank account with interest being paid into a separate account) is 19 August 2008 and the proceeds are remitted on 25 October 2010, it is understood that HMRC believes that the £1m lifetime limit in force in 2008/09 applies, such that ER can only be claimed on £1m of the disposal. It would seem to follow from this that HMRC's view must be that the 4/9ths deduction applies to the gain rather than the special 10% tax rate. For a higher rate taxpayer this would mean that even the gain benefiting from ER will be subject to tax at 28% (meaning an effective 15.6% tax rate on the £1m gain benefiting from ER relief) with the £4m excess being taxed at 28%.
> 117 Can HMRC confirm that the above summarises its thoughts on the

issue?

HMRC response to Example D3

118 HMRC agree with the analysis. The ER limit to apply with respect to remittance basis gains is that which is in force when the qualifying disposal is made, not when any proceeds are remitted.

56.19.4 *BAD relief: Mixed fund*

Taxguide 1/12 provides:

EXAMPLE D4 – The ER provisions prior to 23 June 2010 and the mixed fund rules

119 The ER legislation at s 169N(4) TCGA 1992 states:

> The amount arrived at under subsections (1) to (3) is to be treated for the purposes of this Act as a chargeable gain accruing at the time of the disposal to the individual or trustees by whom the claim is made.

120 Does HMRC agree that this means that for the purposes of the mixed fund rules (s 809Q ITA 2007) the amount that will go into the foreign chargeable gains category is the amount of the gain after ER (ie after the 4/9ths reduction)?

HMRC response to Example D4

121 The amount to be included in a mixed fund under s 809Q(4) ITA 2007 is the gain as restricted by s 169N.

EXAMPLE D5 – How does ER relief work for remittance basis users given it is now a tax rate?

122 It is clear that without the 4/9ths discount provisions, which reduced the gain itself, the mixed fund rules work somewhat differently. It is unclear whether, in situations where the gain is in excess of the unused ER lifetime allowance, this means that:

- ER can be applied such that 10% tax is paid on the amount on which ER can be claimed (either the £10m lifetime limit or that limit less the aggregate of prior ER claims made) with future remittances being taxed at the full rates.
- Or, that a blended rate has to be used.

123 As an example: the capital gain on a disposal of shares by a UK-resident foreign domiciliary is, say, £13m. The individual has not made a prior ER claim and the first £10m is remitted over a number of years. Can you apply ER to this first £10m or do you have to use a blended rate because the actual gain exceeds £10m?

HMRC response to Example D5

124 Wherever there is a qualifying disposal and a chargeable gain that attracts the tax rate of 10% and there is a balance of that gain that is taxable at either 18% or 28% (and indeed where the individual may have other gains that do not qualify for ER), then the question arises of how

these elements are identified for the purposes of s 12 TCGA 1992.

86 HMRC considers that the mixed fund rules in ITA 2007 may be used to identify and quantify the remittance of the foreign chargeable gain. In the absence of a statutory rule for determining whether or not the gains brought into charge under s 12 are liable at the 10% rate, the onus is on the individual to nominate the 10% rate to apply to the maximum extent (by reference to the computational rules in ss (4)–(4B) of s 169N) in priority to other rates and the individual can do so as part of the normal self assessment process.

Further note

125 We have confirmed with HMRC that the above response means that in the example given the taxpayer would be able to claim on his or her self assessment return that the first £10m remitted is taxed at the special 10% rate.

127 For example: the disposal occurred in 2011/12 and pattern of remittance was as follows:

5m in 2011/12;
5m in 2012/13; and
3m in 2013/14.

Provided an ER claim is made the taxpayer can claim that the remittances in 2011/12 and 2012/13 are taxed at the 10% ER rate.

56.20 Winding-up offshore company

Suppose:

(1) F (a remittance basis taxpayer) owns non-UK situate shares.
(2) The company is put into liquidation and F receives a capital distribution from the liquidator.

F is treated as if F had disposed of the shares in consideration of the distribution.[87] The gain is taxable if the liquidator transfers to the shareholder money in the UK. So the liquidator should transfer the money to F’s account outside the UK.

The same applies if the liquidator transfers UK land to F, but this problem could only be avoided if the liquidator sold the land and transferred the proceeds to F outside of the UK.

56.21 Trust a taxable unit

The general scheme of CGT is that a trust is treated as a distinct taxable unit. A number of rules follow from or expand on this principle:

[87] Section 122 TCGA

Rule	**See para**	**Non-resident exception**
Gains taxed on trustees, not beneficiaries	56.21.1	60.1
Trust interest not a chargeable asset	56.21.2	56.21.3
Transfer to trust is a disposal	56.21.4	
Termination of trust is a disposal	56.21.5	
Trustees treated as distinct person	7.3	

The first two of these rules are modified for non-resident trusts, where they could be used for avoidance.

56.21.1 *CGT on UK resident trust*

A UK resident trust is in principle subject to CGT:

(1) the residence/domicile of settlor/beneficiaries is not relevant

(2) the situs of trust assets is not relevant.

The remittance basis does not apply as that only applies to individuals[88] and trustees are not individuals.

One might avoid this problem for gains accruing in the future by exporting the trust (appointing non-resident trustees) but there will in principle be a migration charge.[89]

One solution may be to transfer assets from the trust to UK resident foreign domiciled beneficiaries absolutely. Although this involves a disposal by the trustees, see below, it may be possible to claim CGT hold-over relief.[90] The relief applies on a disposal to a foreign domiciled beneficiary, even though that beneficiary may later be able to dispose of the asset without a CGT charge. This is confirmed, if confirmation is needed, in *McLaughlin v HMRC*.[91]

56.21.2 *Trust interest not chargeable asset*

Section 76(1) TCGA provides:

> Subject to subsection (1A) below
>
> [a] no chargeable gain shall accrue on the disposal of an interest created by or arising under a settlement (including, in particular, an annuity or life interest, and the reversion to an annuity or life interest)
>
> [b] [i] by the person for whose benefit the interest was created by the terms of the settlement or

[88] See 56.17 (CGT remittance basis).

[89] See 12.4 (Charge on emigration of trust).

[90] See 57.31 (Hold-over relief).

[91] [2012] UKFTT 174 (TC).

> [ii] by any other person except one who acquired, or derives his title from one who acquired, the interest for a consideration in money or money's worth, other than consideration consisting of another interest under the settlement.

A note on terminology. In English trust law, an interest created by or arising under a settlement is described as an "equitable interest". I prefer the expression "trust interest", which is also apt in trust jurisdictions without equity, such as Scotland and the Channel Islands.

56.21.3 *Non-resident trust interest*

Section 76 TCGA provides an exception to the relief for trust interests in s.76(1):

> (1A) Subject to subsection (3) below, subsection (1) above does not apply if—
> (a) the settlement falls within subsection (1B) below; or
> (b) the property comprised in the settlement is or includes property deriving directly or indirectly from a settlement falling within that subsection.
>
> (1B) A settlement falls within this subsection if there has been a time when the trustees of that settlement—
> (a) were not resident in the UK; or
> (b) fell to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.

This could lead to double taxation. The problem is exacerbated by the rule that when a trust interest is conferred on a beneficiary, the base cost of the interest is nil: acquisition is not at market value.[92] Fortunately, interests in non-resident trusts are generally subject to powers of appointment. So a beneficiary does not normally dispose of the interest (the exercise of the power of appointment is not a disposal); and if there is a disposal, it does not matter as the market value of the interest is nil.

If a beneficiary disposes of an interest under a trust for actual consideration, it is necessary to consider sch 4A TCGA. I do not discuss this here as in practice this (almost) never happens.

56.21.4 *Disposal on transfer into trust*

Section 70 TCGA provides:

[92] See App.4.8.1 (Acquisition without disposal).

> A transfer into settlement, whether revocable or irrevocable, is a disposal of the entire property thereby becoming settled property
> [a] notwithstanding that the transferor has some interest as a beneficiary under the settlement and
> [b] notwithstanding that he is a trustee, or the sole trustee, of the settlement.

56.21.5 *Disposal on trust termination*

Section 71(1) TCGA provides:

> On the occasion when a person becomes absolutely entitled to any settled property as against the trustee[93] all the assets forming part of the settled property to which he becomes so entitled shall be deemed to have been
> [a] disposed of by the trustee, and
> [b] immediately reacquired by him in his capacity as a trustee within section 60(1) [ie, as bare trustee],
> for a consideration equal to their market value.

The CG Manual discusses valuation issues on this deemed disposal:

> **CG37300 occasions of absolute entitlement** [Nov 2023]
> Where two or more beneficiaries simultaneously become absolutely entitled to unquoted shares held as settled property (for example on the death of a life tenant or on the occurrence of a contingency), the number of shares to be valued, see CG59590, is the total number of shares which are deemed to have been disposed of by the trustees on that occasion, and not the proportionate number of shares to which each beneficiary has become absolutely entitled. If possible you should agree with the trustees what is to be valued before completing the form CG30.
> Where, therefore, the total number of shares deemed to have been disposed of by the trustees represents a majority holding, the shares must be valued on that basis even though each of the beneficiaries may have become absolutely entitled to shares representing only a minority holding. The valuation of unquoted shares is a matter for Shares and

[93] The standard CGT definition applies, see 87.7.3 (Entitled against trustee), but is extended by s.71(3) TCGA:

> "References in this section to the case where a person becomes absolutely entitled to settled property as against the trustee shall be taken to include references to the case where a person would become so entitled but for being an infant or other person under disability."

The extended wording (more or less) matches the definition of bare trust for CGT; see 87.7 (Bare trust/nomineeship).

> Assets Valuation, but it is the officer's responsibility to tell SAV what is to be valued. (As a general rule the value per share increases as the percentage holding increases.)
>
> Where however, on the exercise of a Power of Appointment etc. under a single or successive deeds, two or more beneficiaries each become absolutely entitled as against the trustees to a specified number of shares, the parcels of shares appointed to each beneficiary should be valued separately.
>
> For example, if 50 shares are appointed to A and under the same, or a separate, deed, 50 shares are appointed to B the valuation should be on the basis of two parcels each of 50 shares for the purpose of computing the chargeable gain on the trustees' deemed disposals of the shares.

If the trustees and the beneficiaries are connected persons, see CG14590+, then consideration should be given to the application of TCGA92/S19, see CG14650+.

Section 71(2)-(2D) TCGA deal with losses on the deemed disposal, not discussed here.

Section 76 TCGA provides:

> (2) Subject to subsection (1) above, where a person who has acquired an interest in settled property (including in particular the reversion to an annuity or life interest) becomes, as the holder of that interest, absolutely entitled as against the trustee to any settled property,[94] he shall be treated as disposing of the interest in consideration of obtaining that settled property (but without prejudice to any gain accruing to the trustee on the disposal of that property deemed to be effected by him under section 71(1)).
>
> (3) Subsection (1A) above shall not prevent subsection (1) above from applying where the disposal in question is a disposal in consideration of obtaining settled property that is treated as made under subsection (2) above.

Since transfers of trust interests are rare, it is not usually necessary to consider this.

56.22 CGT treatment of debts

The legislation is in s.251, 252 TCGA. The drafting is convoluted; but it works.

[94] The standard CGT definition applies, see 87.7.3 (Entitled against trustee).

56.22.1 *CGT debt exemption*

Section 251(1) TCGA provides:

> [a] Where a person incurs a debt to another, whether in sterling or in some other currency, no chargeable gain shall accrue to
> [i] that (that is the original) creditor
> [ii] or his personal representative
> [iii] or legatee
> on a disposal of the debt,
> [b] except in the case of the[95] debt on a security (as defined in section 132).

I refer to this as **"CGT debt exemption"**.

I call debts within the exemption **"first-hand debts"** and debts outside the exemption are **"second-hand debts"**. These are slightly inaccurate labels (because debts acquired from a trust or estate may be within the exemption) but no short label will encapsulate the complex rules.

I discuss the following aspects elsewhere:

Topic	**See para**
Debt on a security	App 2.11
Foreign currency bank account	95.10
CGT base cost of debt	App 4.8.1

The CGT debt exemption has been described as a provision "of notable obscurity, the purpose and philosophy of which it is difficult to detect".[96] But it seems straightforward. A first-hand debt (other than a debt on a security) could give rise to a gain,[97] but is more likely to give rise to a loss.[98] If the gain is chargeable, the loss should be allowable. The balance of advantage to HMRC lies in exemption. Exemption is a simple if rough and ready solution. The same thinking lies behind the CGT exemption for cars.

[95] '*The* debt' is just a slip for '*a* debt', though comity seems to have prevented the courts from saying so. Nothing turns on the definite article, but it has perhaps added to the section's reputation for obscurity.

[96] *Marren v Ingles* 54 TC 76 at p.96.

[97] Sterling loans may give rise to a gain, eg a fixed term fixed interest rate loan where commercial interest rates fall; foreign currency debts may give rise to a currency gain; but if one assumes currencies or interest rates may equally likely move in either direction, losses are still more likely than gains,

[98] Because of the risk that the debt may become irrecoverable.

56.22.2 *Meaning of "debt"*

The word "debt" has a variety of meanings.[99] Debt is a common word in tax, but the problem of its meaning has not often arisen, except in the context of the CGT debt exemption. In this context, a contingent obligation to pay an uncapped, unascertainable amount at an unknown date is not a "debt".[100] Tax practitioners generally have this at the back of their minds when they use the word debt. But in other contexts the word has a wider meaning.[101]

It follows that an asset which is not a debt (because the amount is unascertainable) may become a debt (when the amount is ascertained). But the CGT debt exemption "only applies to an obligation which has been a debt from the time it came into existence, or at least from the time when it was acquired by the taxpayer".[102]

56.22.3 *Debt exemption for beneficiaries*

Under s.251(1) the persons qualifying for CGT debt exemption are:

(1) the original creditor
(2) their personal representative
(3) legatees

Section 251(5) TCGA extends the exemption to beneficiaries who acquire the benefit of a debt from a trust:

> Where the trustees of a settlement are the original creditor, subsections (1) and (4) above shall apply as if for the references to the original creditor's personal representative or legatee there were substituted references to any person becoming absolutely entitled, as against the trustees,[103] to the debt on its ceasing to be settled property, and to that person's personal representative or legatee

Amended as directed, s.251(1) provides (in short) that where a person incurs a debt to a trust:

> [a] no chargeable gain shall accrue to

[99] See *Marren v Ingles* 54 TC 76 at p.89-91, where several cases are cited, in a passage approved by HL at p.97A; see too 80.1 (Liability/debt compared).

[100] See *Marren v Ingles* 54 TC 76.

[101] For an example, see 102.25 (Insurance policy).

[102] 54 TC 76 at p.100.

[103] The standard CGT definition applies; see 87.7.3 (Entitled against trustee).

> [i] any person becoming absolutely entitled, as against the trustees, to the debt on its ceasing to be settled property,
> [ii] that person's personal representative or legatee
> on a disposal of the debt,
> [b] except in the case of the debt on a security ...

So the CGT debt exemption is quite restricted. If a creditor gives the benefit of the debt to a donee, the donee does not qualify for relief on a subsequent disposal. Indeed, they may be taxable on a gain from the debt without relief for losses. This applies even to a gift to a spouse.

56.22.4 *"Disposal" of debt*

Section 251(2) TCGA provides:

> [1] Subject to the provisions of sections 132, 135 and 136 [reorganisations]
> [2] and subject to subsection (1) above [CGT debt exemption],
> [3] the satisfaction of a debt or part of it (including a debt on a security as defined in section 132) shall be treated as a disposal of the debt or of that part by the creditor made at the time when the debt or that part is satisfied.

I would have thought that satisfaction of a debt was a disposal in the general sense, and a disposal in the s.24 sense as the debt ceases to exist;[104] but it does not matter if s.251(2) is strictly unnecessary.

56.22.5 *Acquisition in satisfaction of debt*

Section 251(3) TCGA needs to be split up into parts to make sense of it:

> Where property is acquired by a creditor in satisfaction of his debt or part of it, then
> [1] [a] subject to the provisions of sections 132, 135 and 136 [reorganisations]
> [b] the property shall not be treated as disposed of by the debtor or acquired by the creditor for a consideration greater than its market value at the time of the creditor's acquisition of it;

So in an arm's length disposal, the property is treated as disposed of/acquired for the lower of:
(1) Market value

[104] See 56.3.1 ("Disposal").

(2) the value of the consideration given for the asset (the value of the debt)

Section 251(3) continues:

> [2] [a]but if under subsection (1) above (and in a case not falling within section 132, 135 or 136 [reorganisations]
> [i] no chargeable gain is to accrue on a disposal of the debt by the creditor (that is the original creditor), and
> [ii] a chargeable gain accrues to him on a disposal by him of the property,
> the amount of the chargeable gain shall (where necessary) be reduced so as not to exceed the chargeable gain which would have accrued if he had acquired the property for a consideration equal to the amount of the debt or that part of it.

I find that a bit surprising.

56.22.6 *Loss on disposal of debt*

A loss on a first-hand debt is not allowable as the gain is not chargeable.[105] Section 251(4) TCGA deals with attempts to avoid the inconvenience of that rule:

> A loss accruing on the disposal of a debt
> [a] acquired by the person making the disposal from the original creditor or his personal representative or legatee
> [b] at a time when the creditor or his personal representative or legatee is a person connected with the person making the disposal,
> [c] and so acquired either directly or by one or more purchases through persons all of whom are connected with the person making the disposal,
> shall not be an allowable loss.

This prevents arrangements which could give rise to an allowable loss; eg a gift of a debt to a spouse. The rule could work unfairly, as the owner of the second-hand debt is subject to tax on the gain and has no relief for the loss; but there it is.

56.22.7 *Interest in debt*

Section 251(5A) TCGA provides:

> References in this section to the disposal of a debt include the disposal

[105] See 65.6 (Allowable loss).

> of an interest in a debt (and, in the case of an interest in a debt, the reference in subsection (3) to the amount of the debt is to the amount of the person's interest in the debt).

56.23 DT relief for capital gains

Art13(5) OECD Model	**Art 13(5) US/UK DTA**
Gains from the alienation of any property, other than that referred to in paragraphs 1, 2, 3 and 4, shall be taxable only in the Contracting State of which the alienator is a resident.	Gains from the alienation of any property other than property referred to in the preceding paragraphs of this Article shall be taxable only in the Contracting State of which the alienator is a resident.

The exceptions are:

OECD Model	**US DTA**	**Topic**	**See para**
Art.13(1)	13(1)(2)	Immovable property	56.24.1
Art.13(2)	13(3)	Permanent Establishment	56.24.2
Art.13(3)	13(4)	Ships/Aircraft	56.24.3
Art.13(4)	-	Land-rich company	56.24.4
-	13(6)	Former residents	

Subject to those exceptions, taxing rights are given to the residence State and not the source State.

For losses, see 65.24 (DT relief: gain + loss).

Article 9 BEPS MLI[106] makes provision for land-rich companies. The UK has opted out of this, so it will not be considered here, though it is found in some UK DTAs.

56.23.1 *"Gains"*

The text of art 13 refers to "gains" but the heading of the article is "capital gains".

OECD Commentary provides:

> 5. The Article does not give a detailed definition of capital gains. This is not necessary for the reasons mentioned above. ...
> 11. The Article does not distinguish as to the origin of the capital gain. Therefore all capital gains, those accruing over a long term, parallel to a steady improvement in economic conditions, as well as those accruing in a very short period (speculative gains) are covered. Also capital gains

[106] See 107.15 (BEPS multilateral instrument).

> which are due to depreciation of the national currency are covered. It is, of course, left to each State to decide whether or not such gains should be taxed.

In *Royal Bank of Canada v HMRC*:[107]

> As to what constitutes capital gains rather than income profits, the effect of Article 3(2) of the Treaty is that that question is determined by reference to the tax laws of the relevant Contracting State ... because the term is not defined in the Treaty.

56.23.2 *Gain subject to income tax*

OECD Commentary provides:

> 3.1 [a] ... The Article does not specify to what kind of tax it applies. It is understood that the Article must apply to all kinds of taxes levied by a Contracting State on capital gains.
>
> [b] The wording of Article 2 [Taxes Covered] is large enough to achieve this aim and to include also special taxes on capital gains.

The reference in para [b] is to art 2(1)(2) OECD Model. The difficulty in relying on those provisions as justification for the proposition at para [a] is that they are not usually included in UK DTAs.[108] But it is not necessary to rely on those provisions. In UK tax law the word "gain" is used to describe capital gains subject to income tax, such as chargeable-event gains, offshore income gains,[109] TiL gains,[110] and many other examples could be given. Income tax was once a tax on income, but it is not now.[111]

56.23.3 *Computation of gain*

The computation of gain does not matter if the gain is exempt under art 13(5) but it may matter if the gain is taxable but foreign tax credit relief applies.

OECD Commentary provides:

> 12. The Article does not specify how to compute a capital gain, this being left to the domestic law applicable. As a rule, capital gains are

[107] [2023] EWCA Civ 695 at [51].

[108] See 107.13 (Taxes Covered).

[109] See 67.25 (DT reliefs: OIG).

[110] See 22.12.4 (Capital gain).

[111] See 14.5 (Income Tax: a tax on income?)

calculated by deducting the cost from the selling price. To arrive at cost all expenses incidental to the purchase and all expenditure for improvements are added to the purchase price. In some cases the cost after deduction of the depreciation allowances already given is taken into account. Some tax laws prescribe another base instead of cost, e.g. the value previously reported by the alienator of the asset for capital tax purposes.

13. Special problems may arise when the basis for the taxation of capital gains is not uniform in the two Contracting States. The capital gain from the alienation of an asset computed in one State according to the rules mentioned in paragraph 12 above, may not necessarily coincide with the capital gain computed in the other State under the accounting rules used there. This may occur when one State has the right to tax capital gains because it is the State of situs while the other State has the right to tax because the enterprise is a resident of that other State.

14. The following example may illustrate this problem:

an enterprise of State A bought immovable property situated in State B. The enterprise may have entered depreciation allowances in the books kept in State A.

If such immovable property is sold at a price which is above cost, a capital gain may be realised and, in addition, the depreciation allowances granted earlier may be recovered.

State B, in which the immovable property is situated and where no books are kept, does not have to take into account, when taxing the income from the immovable property, the depreciation allowances booked in State A. Neither can State B substitute the value of the immovable property shown in the books kept in State A for the cost at the time of the alienation.

State B cannot, therefore, tax the depreciation allowances realised in addition to the capital gain as mentioned in paragraph 12 above.

15. On the other hand, State A of which the alienator is a resident, cannot be obliged in all cases to exempt such book profits fully from its taxes under paragraph 1 of the Article ... To the extent that such book profits are due to the realisation of the depreciation allowances previously claimed in State A and which had reduced the income or profits taxable in such State A, that State cannot be prevented from taxing such book profits.[112]

[112] The Commentary continues: “The situation corresponds to that dealt with in paragraph 44 of the Commentary on Article 23 A.” But as the UK does not adopt Article 23A, we need not pursue this here.

56.23.4 *Foreign currency gain*

OECD Commentary provides:

> 16. Further problems may arise in connection with profits due to changes of the rate of exchange between the currencies of State A and State B. After the devaluation of the currency of State A, enterprises of such State A may, or may have to, increase the book value of the assets situated outside the territory of State A. Apart from any devaluation of the currency of a State, the usual fluctuations of the rate of exchange may give rise to so-called currency gains or losses. Take for example an enterprise of State A having bought and sold immovable property situated in State B. If the cost and the selling price, both expressed in the currency of State B, are equal, there will be no capital gain in State B. When the value of the currency of State B has risen between the purchase and the sale of the asset in relation to the currency of State A, in the currency of that State a profit will accrue to such enterprise. If the value of the currency of State B has fallen in the meantime, the alienator will sustain a loss which will not be recognised in State B. Such currency gains or losses may also arise in connection with claims and debts contracted in a foreign currency. If the balance sheet of a permanent establishment situated in State B of an enterprise of State A shows claims and debts expressed in the currency of State B, the books of the permanent establishment do not show any gain or loss when repayments are made. Changes of the rate of exchange may be reflected, however, in the accounts of the head office. If the value of the currency of State B has risen (fallen) between the time the claim has originated and its repayment, the enterprise, as a whole, will realise a gain (sustain a loss). This is true also with respect to debts if between the time they have originated and their repayment, the currency of State B has fallen (risen) in value.
>
> 17. The provisions of the Article do not settle all questions regarding the taxation of such currency gains. Such gains are in most cases not connected with an alienation of the asset; they may often not even be determined in the State on which the right to tax capital gains is conferred by the Article. Accordingly, the question, as a rule, is not whether the State in which a permanent establishment is situated has a right to tax, but whether the State of which the taxpayer is a resident must, if applying the exemption method, refrain from taxing such currency gains which, in many cases, cannot be shown but in the books kept in the head office. The answer to that latter question depends not only on the Article but also on Article 7 and on Article 23 A. If in a given case differing opinions of two States should result in an actual

> double taxation, the case should be settled under the mutual agreement procedure provided for by Article 25.

56.23.5 *Sale for annuity*

OECD Commentary provides:

> 18. Moreover the question arises which Article should apply when there is paid for property sold an annuity during the lifetime of the alienator and not a fixed price. Are such annuity payments, as far as they exceed costs, to be dealt with as a gain from the alienation of the property or as "income not dealt with" according to Article 21? Both opinions may be supported by arguments of equivalent weight, and it seems difficult to give one rule on the matter. In addition such problems are rare in practice, so it therefore seems unnecessary to establish a rule for insertion in the Convention. It may be left to Contracting States who may be involved in such a question to adopt a solution in the mutual agreement procedure provided for by Article 25.

56.23.6 *Prizes*

OECD Commentary provides:

> 19. The Article is not intended to apply to prizes in a lottery or to premiums and prizes attaching to bonds or debentures.

56.23.7 *Share buy-back/liquidation*

The issue here is whether the proceeds of a purchase of own shares or liquidation are dividends (within art 10) or gains (within art 13).

OECD Commentary provides:

> 31. If shares are alienated by a shareholder in connection with the liquidation of the issuing company or the redemption of shares or reduction of paid-up capital of that company, the difference between the proceeds obtained by the shareholder and the par value of the shares may be treated in the State of which the company is a resident as a distribution of accumulated profits and not as a capital gain. The Article does not prevent the State of residence of the company from taxing such distributions at the rates provided for in Article 10: such taxation is permitted because such difference is covered by the definition of the term "dividends" contained in paragraph 3 of Article 10 and interpreted in paragraph 28 of the Commentary relating thereto, to the extent that the domestic law of that State treats that difference as income from shares. As explained in paragraphs 32.1 to 32.7 of the Commentary on Articles

> 23A and 23B, where the State of the issuing company treats the difference as a dividend, the State of residence of the shareholder is required to provide relief of double taxation even though such a difference constitutes a capital gain under its own domestic law. The same interpretation may apply if bonds or debentures are redeemed by the debtor at a price which is higher than the par value or the value at which the bonds or debentures have been issued; in such a case, the difference may represent interest and, therefore, be subjected to a limited tax in the State of source of the interest in accordance with Article 11 (see also paragraphs 20 and 21 of the Commentary on Article 11).
>
> 32. There is a need to distinguish the capital gain that may be derived from the alienation of shares acquired upon the exercise of a stock-option granted to an employee or member of a board of directors from the benefit derived from the stock-option that is covered by Article 15 or 16. The principles on which that distinction is based are discussed in paragraphs 12.2 to 12.5 of the Commentary on Article 15 and paragraph 3 of the Commentary on Article 16.

56.23.8 *"Alienation"*

OECD Commentary provides:

> 5. ...The words "alienation of property" are used to cover in particular capital gains resulting from the sale or exchange of property and also from
> [a] a partial alienation,
> [b] the expropriation,
> [c] the transfer to a company in exchange for stock,
> [d] the sale of a right,
> [e] the gift
> [f] and even the passing of property on death.
>
> 6. Most States taxing capital gains do so when an alienation of capital assets takes place. Some of them, however, tax only so-called realised[113] capital gains. Under certain circumstances, though there is an alienation no realised capital gain is recognised for tax purposes (e.g. when the alienation proceeds are used for acquiring new assets). Whether or not there is a realisation [in UK tax terms, whether a gain accrues on a disposal or whether it is a no gain/no loss disposal] has to be determined according to the applicable domestic tax law. No particular problems arise when the State which has the right to tax does not exercise it at the time the alienation takes place.

[113] UK tax lawyers do not use the word "realised" in this sense.

56.23.9 *Alienation: Deemed disposal*

The Supreme CoA of South Africa has held that "alienation" includes a deemed disposal:

> [24] Article 13 is widely cast. It includes within its ambit capital gains derived from the alienation of all property. It is reasonable to suppose that the parties to the DTA were aware of the provisions of the Eighth Schedule and must have intended Art 13 to apply to capital gains of the kind provided in the Schedule. It is of significance that no distinction is drawn in Art 13(4) between capital gains that arise from actual or deemed alienations of property. There is moreover no reason in principle why the parties to the DTA would have intended that Art 13 should apply only to taxes on actual capital gains resulting from actual alienations of property.
> [25] Having regard to the factors mentioned, I am of the view that the term 'alienation' as it is used in the DTA is not restricted to actual alienation. It is a neutral term having a broader meaning, comprehending both actual and deemed disposals of assets giving rise to taxable capital gains.[114]

The same point should apply in the UK, which is important because deemed disposals for CGT are very common.

OECD Commentary provides:

> 7. As a rule, appreciation in value not associated with the alienation of a capital asset is not taxed, since, as long as the owner still holds the asset in question, the capital gain exists only on paper. There are, however, tax laws under which capital appreciation and revaluation of business assets are taxed even if there is no alienation.
> 8. Special circumstances may lead to the taxation of the capital appreciation of an asset that has not been alienated. This may be the case if the value of a capital asset has increased in such a manner that the owner proceeds to the revaluation of this asset in his books. Such revaluation of assets in the books may also occur in the case of a depreciation of the national currency. A number of States levy special taxes on such book profits, amounts put into reserve, an increase in the paid-up capital and other revaluations resulting from the adjustment of the book-value to the intrinsic value of a capital asset. These taxes on capital appreciation (increment taxes) are covered by the Convention

[114] *Commissioner for the South African Revenue Service v Tradehold* [2012] ZASCA 61, 14 ITELR 967.

> according to Article 2 [Taxes Covered].[115]
>
> 9. Where capital appreciation and revaluation of business assets are taxed, the same principle should, as a rule, apply as in the case of the alienation of such assets. It has not been found necessary to mention such cases expressly in the Article or to lay down special rules. The provisions of the Article as well as those of Articles 6, 7 and 21 [immovable property/business profits/Other Income], seem to be sufficient. As a rule, the right to tax is conferred by the above-mentioned provisions on the State of which the alienator is a resident, except that in the cases of immovable property or of movable property forming part of the business property of a permanent establishment, the prior right to tax belongs to the State where such property is situated. Special attention must be drawn, however, to the cases dealt with in paragraphs 13 to 17 below.[116]
>
> 10. In some States the transfer of an asset from a permanent establishment situated in the territory of such State to a permanent establishment or the head office of the same enterprise situated in another State is assimilated to an alienation of property. The Article does not prevent these States from taxing profits or gains deemed to arise in connection with such a transfer, provided, however, that such taxation is in accordance with Article 7.

56.24 DT CGT relief: Exceptions

OECD Commentary provides:

> 4. It is normal to give the right to tax capital gains on a property of a given kind to the State which under the Convention is entitled to tax both the property and the income derived therefrom.

The OECD model has four exceptions to CG relief, and one further exception is quite commonly found. The exceptions are:

Topic	**Article**	**See para**
Immovable property	13(1)	56.24.1
Business property of a PE	13(2)	56.24.2
Ships/aircraft	13(3)	56.24.3
Land rich company	13(4)	56.24.4
Recently departed resident	-	56.24.5

[115] This should be so even in UK treaties which do not include art 2(1)(2) OECD Model. See 107.13 (Taxes Covered).

[116] See 56.23.3 (Computation of gain).

56.24.1 *Immovable property*

Article 13(1) OECD Model provides:

> Gains derived[117] by a resident of a Contracting State from the alienation of immovable property referred to in Article 6[118] and situated in the other Contracting State may be taxed in that other State.

56.24.2 *Business property of PE*

Article 13(2) OECD Model provides:

> Gains from the alienation of
> [a] movable property forming part of the business property of a permanent establishment[119] which an enterprise of a Contracting State has in the other Contracting State,
> [b] including such gains from the alienation of such a permanent establishment (alone or with the whole enterprise),
> may be taxed in that other State.

OECD Commentary provides:

> 4. The right to tax a gain from the alienation of a business asset must be given to the same State without regard to the question whether such gain is a capital gain or a business profit. Accordingly, no distinction between capital gains and commercial profits is made nor is it necessary to have special provisions as to whether the Article on capital gains or Article 7 on the taxation of business profits[120] should apply. It is however left to the domestic law of the taxing State to decide whether a tax on capital gains or on ordinary income must be levied. The Convention does not prejudge this question.

In many countries, though not in the UK, gains on business property of a PE are taxed as business income.

56.24.3 *Ships and aircraft*

For completeness: art 13(3) OECD Model provides:

> Gains from the alienation of ships or aircraft operated in international traffic, boats engaged in inland waterways transport or movable property

[117] See 15.11.1 ("Deriving" income).

[118] This incorporates the definition in Article 9(2); see 24.7.1 ("Immovable property").

[119] See 107.14 (Effectively connected with PE).

[120] See 21.23 (DT relief: trading income).

> pertaining to the operation of such ships, aircraft or boats, shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.

56.24.4 *Land-rich company*

Article 13(4) OECD Model provides:

> Gains derived by a resident of a Contracting State from the alienation of shares or comparable interests, such as interests in a partnership or trust, may be taxed in the other Contracting State if, at any time during the 365 days preceding the alienation, these shares or comparable interests derived more than 50 per cent of their value directly or indirectly from immovable property, as defined in Article 6, situated in that other State.

This clause is not often found in UK treaties but about half a dozen recent treaties have some wording along these lines.[121]

Article 9 BEPS MLI provides alternative rules, but the UK has reserved the right for this not to apply to its Covered Tax Agreements, so it need not be considered here.

56.24.5 *Recently departed resident*

The CG article in some DTAs restricts CG relief for residents of one State who have recently left the other State. This is not in OECD Model, but about one third of UK treaties have a restriction of this kind. A variety of wordings are found, and I take Italy and USA as examples.

Treaties are easier to follow if one notes in the text which Contracting State is which. Article 13(5) Italy/UK DTA provides:

> The provisions of paragraph (4) of this Article [CG relief] shall not affect the right of a Contracting State [UK] to levy according to its law a tax on gains from the alienation of any property derived by an individual who:
> (a) is a resident of the other Contracting State [Italy]; and
> (b) has been a resident of the first-mentioned Contracting State [UK] at any time during the five years immediately preceding the alienation of the property; and
> (c) is not subject to tax on those gains in the other Contracting State [Italy].

Article 13(6) USA/UK DTA is similar, but specifies 6 years instead of 5, and lacks para (c):

[121] Including: Hungary, Libya, Zambia, Senegal, China, Morocco, Ethiopia.

> The provisions of paragraph 5 of this Article [CG relief] shall not affect the right of a Contracting State [UK] to levy according to its law a tax on gains from the alienation of any property derived by an individual who
> [a] is a resident of the other Contracting State [US] and
> [b] has been a resident of the first-mentioned Contracting State [UK] at any time during the six years immediately preceding the alienation of the property.

This does not impose a charge, but it means that the CGT charge on temporary non-residents who return to the UK is consistent with the treaty. It does not strictly matter, for UK tax, as if the clause is not there, there is a treaty override in any event.[122] But it may matter to treaty-partners (and others) who think the UK ought not to impose tax in breach its treaty obligations. The USA/UK DTA Technical Explanation provides:[123]

> Paragraph 6 allows each Contracting State to tax gains derived by certain non-residents who used to be residents of that Contracting State. The rule is included in the Convention in order to allow the UK to apply its domestic law regarding such sales. Under UK law, a former resident who re-establishes residence in the UK within five years will remain subject to tax in the UK on any gains realized during the period of nonresidence. The analogous US rules of section 877 are preserved by paragraph 6 of Article 1 (General Scope).
>
> Although the rules allow each of the Contracting States to apply their domestic anti-abuse rules, the foreign tax credit rules provided in paragraphs 2 and 4 of Article 24 (Relief from Double Taxation) ensure that the Contracting State applying an anti-abuse rule to a resident of the other Contracting State maintains only a residual right to tax. The primary right to tax remains with the country of residence. Accordingly, pursuant to subparagraph (b) of paragraph 2 of Article 24, if the gains subject to this rule are derived while the former UK resident was a resident of the United States, then such gains are considered to be gains from sources within the United States. Pursuant to paragraph 4 of Article 24, the UK will grant a foreign tax credit for US tax imposed upon those gains.
>
> Example. In year 1, UK resident A purchases stock in a Country X company for $1,000. A moves to the United States in year 2, when the fair market value of the stock is $2,000. In year 3, while A is still a US resident, A sells the Country X stock. In year 4, after the sale of the

[122] See 11.8 (DTA override: Gains).

[123] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> Country X stock, A moves back to the UK and re-establishes residence. Under Article 13 (6), both the United States and the UK may tax the gain on the sale of the property in year 3. Under Article 24, however, the gain from the sale of the Country X stock is deemed to be from sources within the United States because A was a US resident when the sale occurred and gains from the stock could be taxed by the UK only pursuant to paragraph 6 of Article 13 (that is, the stock could not be taxed under paragraph 1 or 3 of Article 13). Thus the UK is required to provide a foreign tax credit for US taxes paid with respect to gain on the disposition of the Country X stock.

56.24.6 *Foreign tax credit relief*

Where the full CG relief does not apply, foreign tax credit relief applies to avoid double taxation. For an example of the operation of FTCR in the USA/UK DTA, see 111.24 (Credit for TNR CGT).

56.25 DT relief: Remittance basis

Section 12 TCGA provides:

> (1) This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
> (b) the individual is not domiciled in the UK in that year.
> (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
> (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year.

Art.13(5) OECD Model provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Suppose:

(1) A remittance basis taxpayer is UK-law UK resident and treaty-resident in a State with an OECD Model capital gains article.

(2) The taxpayer receives foreign gains which are in principle subject to CGT.

Can the individual claim DT relief? This raises a characterisation issue.[124]

[124] See para 107.22 (Characterisation).

Everyone agrees that DT exemption applies to gains taxable on the remittance basis. Section 12(2) TCGA imposes a deeming which changes timing, that is, the gains which actually accrue on disposal are deemed to accrue when remitted. Section 12(3) imposes a deeming which changes the amount. The character of the gains is not altered. That is, the chargeable gains which are "treated as accruing" are the actual gains which accrued to the individual, and not different (notional) gains.

DT relief requires in principle that the alienator is treaty-resident in the foreign State at the time the gain accrues.[125] What if the gain is a foreign gain of a remittance basis taxpayer? The gain is deemed to accrue at the time that the gain is remitted.[126] If that deeming applies for DT purposes, then odd consequences would follow. Suppose foreign gains accrue to a remittance basis taxpayer who is UK-law UK resident throughout. There are two possibilities:

	Treaty-resident in foreign State	
Case no.	*When gain actually arose*	*When gain remitted*
1	No	Yes
2	Yes	No

If the timing rule applies for DT purposes, DT relief applies in case 1 and not in case 2. That would be absurd: it would often lead to double taxation or double non-taxation. So it is considered that the timing rule does not apply for DT purposes, so DT relief can apply in case 2 but not in case 1.

56.26 Immigrant trust: DTR override

Section 83A TCGA blocks "Round the World" schemes.[127]

Section 83A(1) TCGA provides:

> This section applies if a chargeable gain accrues to the trustees of a settlement on the disposal by them of an asset in a year of assessment and the trustees—
>
> (a) are within the charge to capital gains tax[128] in that year of

[125] *Smallwood v HMRC* [2009] STC 1222.

[126] See 56.17.1 (Disposal/accrual dates).

[127] See 9.19.6 (Round the World schemes).

[128] Section 83A(3) gives this expression a commonsense definition:

"For the purposes of this section the trustees of a settlement are within the charge to capital gains tax in a year of assessment—

(a) if, during any part of that year of assessment, they are resident in the UK and

> assessment, but
> (b) are non-UK resident at the time of the disposal.

The expression "non-UK resident" in (b) is defined in s.83A(4) TCGA:

> For the purposes of this section the trustees of a settlement are non-UK resident at a particular time if, at that time,—
> (a) they are not resident in the UK, or
> (b) they are resident in the UK but are Treaty non-resident.

This is a slightly artificial definition, but it is difficult to think of a better label.

If these conditions are satisfied, s.83A(2) TCGA overrides DT relief:

> Where this section applies, nothing in any double taxation relief arrangements shall be read as preventing the trustees from being chargeable to capital gains tax (or as preventing a charge to tax arising, whether or not on the trustees) by virtue of the accrual of that gain.

EN FA 2005 explains the words in brackets:

> 4. Subsection (2) of section 83A has effect to provide that where section 83A applies, nothing in the terms of any Double Taxation Agreement (DTA) can be read as preventing the trustees being chargeable to capital gains tax, or of preventing a charge to tax arising (whether on the trustees or another person), by virtue of the accrual of the gain.
> 5. The reason for the reference to "another person" in paragraph 4 above is that, in certain circumstances where the trustees of a settlement are within the charge to capital gains tax in a tax year, the rules in section 77 TCGA provide that the trustees do not actually suffer a tax charge in respect of chargeable gains which arise to them on the disposal of settled property which originates from a UK resident or ordinarily resident settlor who has an interest in the settlement at any time in the year. Chargeable gains are instead treated as arising to the settlor, who is then chargeable to tax in respect of them.

Now that s.77 has been repealed, the words in brackets in s.83A(2) should be repealed, as they can never apply, but they do no harm. Section 83A is still needed in order to deal with the Round the World scheme.

Section 83A is somewhat wider than it needed to be in order to deal with round the world schemes, and care is needed where trustees become or

not Treaty non-resident".
(There is no para (b).)

cease to be treaty non-resident, but in practice difficulties are fairly rare.

56.27 Tax return: Gains

Gains are returned in Form SA108 (Capital Gains Tax summary).

SA108 Notes (2022/23) provides:

> Fill in the 'Capital Gains Tax summary' pages if:
>
> - you sold or disposed of chargeable assets which were worth more than £49,200
> - your chargeable gains before taking off any losses were more than £12,300 ('annual exempt amount')
> - you have gains in an earlier year taxable in this period
> - you want to claim an allowable capital loss or make a capital gains claim or election for the year
> - you were not domiciled in the UK and are claiming to pay tax on your foreign gains on the remittance basis
> - you're chargeable on the remittance basis and have remitted foreign chargeable gains of an earlier year
> - you made a direct or indirect disposal of the whole or part of an interest in UK property or land when either non-resident or UK resident and the disposal was in the overseas part of a split year

See 121.4.1 (Small gains).

The following topics are considered elsewhere:
121.23 (CT registration).

57.1 Introduction

This chapter considers gains accruing to non-UK residents from land/land-rich assets.

The development of the rules can be traced through:

- HMRC, "Taxing gains made by non-residents on UK immovable property: Consultation document" (Nov 2017)[1]
- HMC "Taxing gains made by non-residents on UK immovable property - Application of the anti-forestalling rule - Technical Note" (Nov 2017)[2]

[1] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/661467/Taxing_gains_made_by_non-residents_on_UK_immovable_property_-_consultation.pdf*

[2] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/661470/Taxing_gains_made_by_non-residents_on_UK_immovab*

- HMRC "Taxing gains made by non-residents on UK immovable property Summary of Responses" (July 2018)[3] (**"Consultation Response Document"**)
- Draft clauses (July 2018)

HMRC guidance is in the CG Manual.[4]

I do not consider the topics of property-rich collective investment schemes,[5] compliance, and payment, though I hope to do so in a future edition.

The current rules were introduced from 2019/20.

From 2015/16 to 2018/19 there was a charge on non-residents gains from UK residential property, which was called NRCGT. That term is sometimes used as an informal label for the current rules, but I think it is best to use "NRCGT" as the name for the previous tax regime, and not to use the same term for the current rules. The CG manual uses the term "NRCG" for the current rules, which is marginally less confusing but perhaps the best that can be done. "Non residents CGT/CT" might be clearer, if more clumsy.

For an overview, see Lawrance & Coward, "Non-residents and UK real estate: the April 2019 changes" Tax Journal, 29 June 2019.

57.1.1 *Navigation*

The layout of the provisions is as follows:

TCGA	**Topic**
s.1A(3)(b)/2B(4)(b)	CGT/CT charge on UK land
s.1A(3)(c)/2B(4)(c)	CGT/CT charge on land-rich assets
s.1C	Definition of "interest in UK land"
sch 1A	Definition of land-rich assets
sch 2	Reporting and payment
sch 4AA	UK-land rebasing
sch 5AAA	Collective investment vehicles

le_property_-_technical_note.pdf Despite its name, this note does not contain material which a practitioner would call "technical"; see App.1.9 (Technical Notes).

[3] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/722418/Taxing_gains_made_by_non-residents_on_UK_immovable_property_summary_of_responses.pdf*

[4] This replaces draft guidance formerly in App 14 CG Manual.

[5] HMRC have issued draft guidance on this: App 15 CG Manual: collective investment schemes *https://www.gov.uk/hmrc-internal-manuals/capital-gains-manual/cg-app15*

57.2 Charge on land/land-rich assets

The CGT/CT charge is in s.1A(3)/2B(4) TCGA. I set these out elsewhere[6] but it is convenient to recap:

s.1A TCGA: CGT	**s.2B TCGA: CT**
(3) A person who is not UK resident for a tax year[7] is chargeable to capital gains tax on chargeable gains accruing to the person in the tax year on the disposal of ...	(4) In addition, a company which is not resident in the UK is chargeable to corporation tax on chargeable gains accruing to the company on the disposal of
(b) assets not within paragraph (a) that are interests in UK land (see section 1C), and	assets not within subsection (3) that are- (a) interests in UK land, or
(c) assets (wherever situated) not within paragraph (a) or (b) that [i] derive at least 75% of their value from UK land [ii] where the person has a substantial indirect interest in that land (see section 1D and Sch 1A).	(b) assets (wherever situated) not within paragraph (a) that [i] derive at least 75% of their value from UK land [ii] where the company has a substantial indirect interest in that land.

In this book a **"land-rich asset"** is an asset within s.1A(3)(c), in short >75% value from land.

Statute frequently refers to **"assets within s.1A(3)(b) or (c)"**. I gloss that as "UK land/land-rich asset". Occasionally it is helpful to abbreviate that to **"land-asset"**, and a gain on such an asset is a "**land-gain**".

In short, a non-resident individual/trust pays CGT, and a non-resident company pays CT, on gains from UK land/land-rich assets.

57.2.1 *Reliefs/exemptions*

The Consultation Response Document provides:[8]

> Existing reliefs and exemptions will apply to non-residents as they do for residents.

[6] See 56.6.5 (CGT/CT charge: non-residents).

[7] See 56.6.4 (CGT/CT charge: UK residents).

[8] Para 3.11.

The document refers specifically to 3 reliefs:

Relief	**See para**
CGT annual exemption	44.2
Substantial Shareholdings Exemption	*Not discussed*
Group relief	57.8.4

57.3 Land-rich asset

Para 1(1) sch 1A TCGA provides:

> This Schedule makes provision, for the purposes of section 1A(3)(c) or 2B(4)(b), for determining in the case of any disposal of any asset—
> (a) whether the asset derives at least 75% of its value from UK land (see Part 2 of this Schedule) ...

Para 3(1) sch 1A TCGA provides:

> An asset derives at least 75% of its value from UK land if—
> (a) the asset consists of a right or an interest in a company, and
> (b) at the time of the disposal, at least 75% of the total market value of the company's qualifying assets derives (directly or indirectly) from interests in UK land.[9]

I refer to this as the **"land-rich test"**.

It is possible to envisage a company with, say, A and B shares, where the A shares do not derive their value from UK land; but they still fall within para 3(1) because *the company* has sufficiently valuable UK land. Perhaps that was deliberate.

The land-rich test is a "cliff-edge" test and that is deliberate. The Consultation Response Paper provides:

> 3.51. In looking at the gross asset value of an entity, the 75% property richness test mirrors the provisions in international treaties.[10]
> A different domestic test would still need to be underpinned by consideration of the Treaty test, to see whether the UK has taxing rights, meaning it would only add complexity to deviate from this.[11]
> The government also considers that a quantitative test is easier than a qualitative one.

[9] See 57.6.3 ("Interest in UK land").

[10] But the author wisely does not seek to identify these treaties. Article 13(4) OECD Model in fact has a 50% test; but this is not normally included in UK treaties; see 56.24.4 (Land-rich company).

[11] But consideration of DTAs is required under the current rules.

> 3.52. The government believes that setting the bar at 75% or more of the gross asset value is sufficiently high so as to catch only cases where an entity is, in essence, an envelope for UK land.

The last paragraph does not bear serious examination.

57.3.1 *Computation of gain*

The chargeable gain is computed by reference to the value of the interest disposed of. Thus in the case of a company that was only 75% property-rich, the remaining assets would be indirectly charged to UK tax. But HMRC were probably right to conclude that the alternative was not workable.

57.3.2 *Standard of care*

The Consultation Response Paper provides:

> 3.53. Officials will produce guidance making it clear what level of due diligence is required to assess the property richness test. In many cases, it will be sufficient to look at a balance sheet or similar statement that represent recent valuations of the assets.

The qualification "in many cases" means that one cannot rely on this. In any case, I would expect some back-tracking.

57.4 Derivation of value

Para 3 sch 1A TCGA provides:

> (2) Market value
> [a] may be traced through any number of companies, partnerships, trusts and other entities or arrangements but
> [b] may not be traced through a normal commercial loan.[12]
> (3) It is irrelevant whether the law under which a company, partnership, trust or other entity or an arrangement is established or has effect is—
> (a) the law of any part of the UK, or
> (b) the law of any territory outside the UK.

This provision does two things:

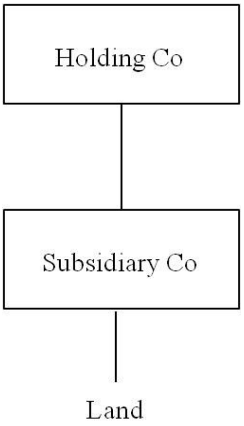
(1) It seeks to define derivation of value; the concept cannot sensibly be defined, but that did not stop the drafter from trying.[13]

[12] See 57.11 (Normal commercial loan).

[13] See App 2.9.8 (Derive/represent value).

(2) It also provides the exemption for normal commercial loans.

For example:



The subsidiary company is land-rich because it derives its value from UK land directly, and the holding company is land-rich as it derives its value from UK land indirectly.

Para 3(4) sch 1A TCGA discusses apportionment of value:

> The assets held by a company, partnership or trust or other entity or arrangement must be attributed to the shareholders, partners, beneficiaries or other participants at each stage in whatever way is appropriate in the circumstances.

Apart from the exception for a normal commercial loan, it comes down to a just and reasonable apportionment.

57.5 "Qualifying assets"

"Qualifying assets" matters because the land-rich test requires (in short) that at least 75% of the company's qualifying assets derives from UK land.

Para 3(5) sch 1A TCGA provides:

> For the purposes of this paragraph ...
> "qualifying assets" has the meaning given by paragraph 4.

Para 4(1) sch 1A TCGA provides:

> Subject as follows, all of the assets of the company are qualifying assets.

57.6 Chose in action disregard

The land-rich test disregards liabilities.

Para 4(2) sch 1A TCGA provides:

> An asset of the company is not a qualifying asset so far as it is matched to a related party liability...

I refer to this as the **"chose in action disregard"**.

57.6.1 *Chose in action*

Para 4 sch 1A TCGA provides:

> (4) An asset of the company is matched to a related party liability if—
> (a) the asset consists of a right under a transaction (for example, a right under a loan relationship or derivative contract),
> (b) the right entitles the company to require another person to meet a liability arising under the transaction...

I refer to an asset which meets this condition as a "chose in action" though the term is not completely apt. I refer to the other person as "the debtor."

57.6.2 *The debtor*

Para 4 sch 1A TCGA provides:

> (4) An asset of the company is matched to a related party liability if ...
> (c) the other person [the debtor]
> [i] is relevant to the paragraph 3 tracing exercise or
> [ii] is a related party of the company on the day of the disposal.

Para 4(5) sch 1A TCGA provides:

> For the purposes of this paragraph a person is relevant to the paragraph 3 tracing exercise if—
> (a) the person has assets that fall to be taken into account in the tracing exercise mentioned in paragraph 3, or
> (b) the person has obligations (whether as a trustee or otherwise) in relation to the holding of assets comprised in any trust or other arrangement that fall to be taken into account in that exercise.

57.6.3 *Interest in UK land*

The chose in action rule does not apply to an interest in UK land. Para 4(3) sch 1A TCGA provides:

> But an interest in UK land is a qualifying asset of the company even if it is matched to any extent to a related party liability.

Classifying non-land as non-qualifying assets makes it easier to pass the land-rich test.

57.6.4 *"Liability"*

Para 4(7) sch 1A TCGA provides a commonsense definition of liability:

> In this paragraph a liability includes a contingent liability (such as one arising as a result of the giving of a guarantee, indemnity or other form of financial assistance).

57.7 "Related party"

Para 4(6) sch 1A TCGA:

> [a] Whether, for the purposes of this paragraph, a person is a related party of the company on any day is determined in accordance with the rules in Part 8ZB of CTA 2010
>
> [b] but as if, in section 356OT(4) of that Act, the words ", within the period of 6 months beginning with that day" were omitted.

This adopts the transaction in land definition, with the tweak mentioned at para [b].

The definition is intricate. Section 356OT(1) CTA 2010 provides:

> For the purposes of this Part [Part 8ZB Transactions in UK Land] a person ("A") is related to another person ("B")—
>
> (a) throughout any period for which A and B are consolidated for accounting purposes,
>
> (b) on any day on which the participation condition is met in relation to them, or
>
> (c) on any day on which the 25% investment condition is met in relation to them.

57.7.1 *Consolidated accounts*

Section 356OT CTA 2010 provides:

> (2) A and B are consolidated for accounting purposes for a period if—
>
> (a) their financial results for a period are required to be comprised in group accounts,
>
> (b) their financial results for the period would be required to be comprised in group accounts but for the application of an exemption, or
>
> (c) their financial results for a period are in fact comprised in group accounts.

> (3) In subsection (2) "group accounts" means accounts prepared under—
>
> (a) section 399 of the Companies Act 2006, or
>
> (b) any corresponding provision of the law of a territory outside the UK.

57.7.2 *Participation condition*

Amended as para 4(6) sch 1A TCGA requires, s.356OT(4) CTA 2010 provides:

> The participation condition is met in relation to A and B ("the relevant parties") on a day if~~, within the period of 6 months beginning with that day—~~
>
> (a) one of the relevant parties directly or indirectly participates in the management, control or capital of the other, or
>
> (b) the same person or persons directly or indirectly participate in the management, control or capital of each of the relevant parties.

See 25.8 (Participation condition).

57.7.3 *25% investment condition*

Section 356OT(5) CTA 2010 provides:

> The 25% investment condition is met in relation to A and B if—
>
> (a) one of them has a 25% investment in the other, or
>
> (b) a third person has a 25% investment in each of them.

Section 356OT(6) CTA 2010 adopts the definition of "25% investment" in the hybrid entities code:

> Section 259NC of TIOPA 2010 applies for the purposes of determining whether a person has a "25% investment" in another person for the purposes of this section as it applies for the purposes of section 259NB(2) of that Act.

See 105.8 (% investment tests).

57.8 Trading exemption

Para 5(1) sch 1A(1) TCGA provides:

> A disposal of a right or interest in a company is not to be regarded as a disposal of an asset deriving at least 75% of its value from UK land if

> it is reasonable to conclude[14] that, so far as the market value of the company's qualifying assets derives (directly or indirectly) from interests in UK land[15]—
>
> (a) all of the interests in UK land are used for trading purposes ...

I refer to this as the **"trading exemption"**.

Trading companies must review their position. If they hold any non-trading land (more than insignificant) there is no relief. A group reorganisation may help.

A company which does not meet this trading exemption may still meet the trading requirement for the substantial shareholder exemption.

The trading exemption applies to a disposal of a company. If a trading company disposes of land, the disposal is taxable (though roll-over relief may apply).

57.8.1 *"Used for trading purposes"*

Para 5(2) sch 1A TCGA provides:

> An interest in UK land is "used for trading purposes" for the purposes of this paragraph if (and only if), at the time of the disposal—
>
> (a) it is being used in, or for the purposes of, a qualifying trade, or
>
> (b) it has been acquired for use in, or for the purposes of, a qualifying trade.

The CG Manual provides:

> **CG73946: Indirect disposals: The trading exception** [May 2020]
> Land can be counted as being used for trading where it is intended that it be so used. So a building that is under repair or being re-fitted can be considered - even if not occupied at the point of disposal - providing that the intention is to use it in the trade following the disposal.

57.8.2 *"Qualifying trade"*

Para 5(3) sch 1A TCGA provides:

> A trade is a "qualifying" trade for the purposes of this paragraph if—
>
> (a) [i] it has been carried on
>
> [A] by the company, or
>
> [B] by a person connected with the company,

[14] See App.2.24 (Reasonable-to-assume).

[15] The words "so far as the market value of the company's qualifying assets derives (directly or indirectly) from interests in UK land" are otiose; but it does not matter.

> [ii] throughout the period of one year ending with the time of the disposal
>
> [iii] on a commercial basis with a view to the realisation of profits,[16] and
>
> (b) it is reasonable to conclude[17] that the trade will continue to be carried on (for more than an insignificant period of time) on a commercial basis with a view to the realisation of profits.

The CG Manual provides:

> **CG73946: Indirect disposals: The trading exception** [May 2020]
> ... Whether a given trade continues is based on similar principles to those applied under Part 14 of CTA10 [change in company ownership]. It is necessary for the disponer to reasonably conclude that the trade is likely to continue for a 'more than insignificant' period of time – 'insignificant' in this context is a matter of degree, and should be taken in the context of these provisions to mean that the intention of the buyer is to continue to operate the trade. There may be circumstances where the trade is in distress and at risk of closing down after the sale; providing that there is a genuine understanding that the buyer is acquiring the land and trade with the intention of making the trade profitable this can meet the conditions.
> Letting out of property is not, in itself, a trade...

57.8.3 *Low-value non-trade interest*

Para 5(1) sch 1A(1) TCGA provides a de minimis test:

> A disposal of a right or interest in a company is not to be regarded as a disposal of an asset deriving at least 75% of its value from UK land if it is reasonable to conclude that, so far as the market value of the company's qualifying assets derives (directly or indirectly) from interests in UK land ...
>
> (b) all of the interests in UK land would be used for those [trading] purposes if low-value non-trade interests in UK land were left out of account.

Para 5(4) sch 1A TCGA provides:

> For the purposes of this paragraph, "low-value non-trade interests in UK land" means interests in UK land—

[16] See App 5.1 (Commercial basis/view to profit).

[17] See App.2.24 ("Reasonable-to-assume").

(a) which are not used for trading purposes, and
(b) the total market value of which is, at the time of the disposal, no more than 10% of the total market value at that time of the interests in UK land that are used for trading purposes.

The CG Manual provides:

> **CG73946: Indirect disposals: The trading exception** [May 2020]
> **... Land not being used in the trade**
> Either all of the UK land being disposed of must be used in a qualifying trade, or all but for low-value interests in UK land. This may be the case where, for example, a small amount of the value of UK land represents a dwelling for occupation by a member of staff (but not occupied for the purposes of the qualifying trade), or where there are derelict, low-value properties amongst otherwise occupied ones. This can include the letting out of surplus space by a trader. The scale of the portfolio of property being disposed of in the arrangement will be definitive in looking at the relative value of the amount of property not used in the trade.

57.8.4 *Inter-group transfer*

The CG Manual considers a pre-sale inter-group transfer:

> **CG73946: Indirect disposals: The trading exception** [May 2020]
> **... Transfers of UK land within a group ahead of a disposal**
> Under the NRCG rules UK land assets and shares in UK property rich companies are "chargeable assets". This means that intragroup transfers of these "chargeable assets" are undertaken on a tax neutral basis under TCGA 1992/s171...
> In a group context, it is common for properties used within the group to be held in a different company to the trading company. A group may have several different trades held via different subsidiaries (in different jurisdictions) and the group parent may be non-UK resident. In the year ahead of a disposal of one of the group's trades the properties used exclusively in that trade are transferred into a new property company. Where s171 applies the transfers involving UK land will be on a 'nil gain, nil loss' basis.
> If the relevant operating company and the property company are then sold together and the trade is expected to continue for the foreseeable future, then the conditions of the trading exception could be met. This would be a joint sale of the trading company and property-owning company as an ongoing trade.

> However, it is important to note that the trading exception applies only at the share asset tier. Depending on circumstances a degrouping charge could apply...

That seems straightforward.

57.8.5 *Property trading/development co*

The CG Manual provides:

> **CG73946: Indirect disposals: The trading exception** [May 2020]
> **... Application to Property Development Companies**
> Property Development Companies (PDC) can cover a range of activities associated with the development of UK land. This UK land is a principal asset such that they are likely to be UK property rich under Sch 1A.
> When considering the disposal of shares in a PDC consideration is first needed as to whether the disposal is charged under the 'Transactions in UK land' rules at [BIM60510+] which take priority. The 'Transaction in UK land' rules may apply to part or all of the gain.[18]
> If NRCG could apply to all or part of the gain then the trading exception can be considered, however it is unlikely the trading exception would apply. For example, it is unlikely
> [1] that the 'qualifying trade' will continue and
> [2] that the land being used in the 'qualifying trade' at the point of disposal would continue to be used in that 'qualifying trade'.
> Cases of doubt or difficulty should be referred to the CG Technical team using the submission template at CG99998.

But point [1] is a question of fact; and [2] is misconceived, as what matters is whether the trade continues, not whether the land continues to be used in the trade. The passage is perhaps considering the specific case of a SPV with one piece of land held as trading stock, selling to a purchaser who will use the land, so the trade will then cease and the trading exemption will not apply.

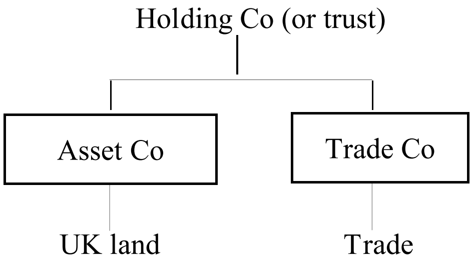
The Manual does accept, I think rightly, that land held as trading stock is "used in, or for the purposes of, a trade".[19] So the same point would apply to a property trading company, even if it is not carrying out development.

[18] See 22.5 (Transactions in land: Introduction).

[19] See 56.7.3 (Used in/for purposes of trade).

57.8.6 *Group structures*

In a typical structure, the land and the trade are held in two separate companies, thus:



Asset Co and Trade Co are connected persons. So a disposal of Asset Co by the shareholder is not subject to CGT/CT (though a direct disposal of the land by Asset Co would be subject to CT).

The very wide definition of connected person may be helpful here.

57.9 Linked disposals

Para 6 sch 1A TCGA provides:

> (1) This paragraph applies if—
> (a) there are two or more disposals of rights or interests in companies,
> (b) the disposals are linked with each other,
> (c) some but not all of the disposals would, apart from this paragraph, be disposals of assets deriving at least 75% of their value from UK land, and
> (d) if one of the companies included all of the assets of the others, a disposal of a right or interest in it would not be a disposal of an asset deriving at least 75% of its value from UK land...
>
> (3) In determining whether the condition in sub-paragraph (1)(d) is met in the case of a disposal of a right or interest in a company, it is to be assumed that, for the purposes of paragraph 4,[20] each of the other companies in which rights or interest are disposed of is (so far as this would not otherwise be the case) a related party of the company on the day of the disposal.

Assuming these conditions are met, the relief is in para 6(2) sch 1A TCGA:

[20] See 57.6 (Chose in action disregard).

> None of the disposals are to be regarded as disposals of assets deriving at least 75% of their value from UK land.

57.9.1 *"Linked"*

Para 6 sch 1A TCGA provides:

> (4) For the purposes of this paragraph a disposal of a right or interest in a company is linked with a disposal of a right or interest in another company if—
> (a) the disposals are made under the same arrangements,
> (b) the disposals are made by the same person or by persons connected with each other,
> (c) the disposals are made to the same person or to persons connected with each other, and
> (d) in the case of each disposal, the person making the disposal is connected with the company in which the right or interest is disposed of.
> (5) For the purposes of this paragraph, the question whether or not a person is connected with another is to be determined immediately before the arrangements are entered into.

Para 6(6) sch 1A TCGA extends the definition of connected person:

> Section 286 (connected persons: interpretation) has effect for the purposes of this paragraph as if, in subsection (4), the words "Except in relation to acquisitions or disposals of partnership assets pursuant to bona fide commercial arrangements," were omitted.

In short, partners and their spouses are all connected.[21]

Suppose a holding company has two subsidiaries of equal worth, one of which derived 100% of its value from UK property. The holding company is not property-rich, deriving only 50% of its value from UK property. If the holding company sells the subsidiaries separately, it would be chargeable on the disposal of the property-rich company. But if the disposals are "linked" this does not apply.

57.10 Substantial indirect interest

A disposal of a land-rich asset is only chargeable if the taxpayer has a "substantial indirect interest".[22]

Para 1 sch 1A TCGA provides:

[21] See 104.18 (Connected: Partners).

[22] See 57.2 (Charge on land/land-rich assets).

> This Schedule makes provision, for the purposes of section 1A(3)(c) or 2B(4)(b), for determining in the case of any disposal of any asset...
>
> (b) whether the person making the disposal has a substantial indirect interest in the UK land (see Part 3 of this Schedule).

Para 8(1) sch 1A TCGA provides:

> If—
>
> (a) a person disposes of an asset consisting of a right or an interest in a company, and
>
> (b) the asset derives at least 75% of its value from UK land,
>
> the person has a substantial indirect interest in UK land if, at any time in the period of 2 years ending with the time of the disposal, the person has a 25% investment in the company.

Para (a) is not a condition or requirement, but just a method of identifying the company referred to in the final paragraph.

Para (b) is otiose, as if the asset does not derived at least 75% of its value from UK land, the asset does not fall within s.1A(3)(c) TCGA, and the question whether the person has a substantial indirect interest does not arise. But it does not matter.

57.10.1 *Insignificant ownership period*

Para 8 sch 1A TCGA provides:

> (2) But a person is not to be regarded as having a 25% investment in the company at times falling in the person's qualifying ownership period if, having regard to the length of that period, the times (taken as whole) constitute an insignificant proportion of that period.
>
> (3) The "person's qualifying ownership period" means the period throughout which the person has held an asset consisting of a right or an interest in the company, but excluding times that fall before the beginning of the 2 year period mentioned in subparagraph (1).

57.10.2 *"Insignificant"*

This term is not defined. The CG Manual provides:

> **CG73936 Substantial indirect interest** [May 2020]
>
> As a general rule, HMRC will consider 'insignificant' to be 10% or less of the time (so 75[23] days or less for a full two year period). Where the total ownership period is very brief and the facts and circumstances

[23] Author's footnote: The correct figure is 73 (ignoring the complication of a leap year).

indicate that the person was never intended to hold a 25% or greater investment for any length of time, this may allow a greater leeway.

57.10.3 *"25% investment"*

For the definition see 105.8 (% investment tests).

57.10.4 *Partnership*

Para 9(11) sch 1A TCGA provides:

> Any reference in this paragraph, in the case of a person who is a member of a partnership, to the proceeds, amount or assets of the person includes the person's share of the proceeds, amount or assets of the partnership (apportioning those things between the partners on a just and reasonable basis).

57.11 Normal commercial loan

Normal commercial loan matters for:
(1) The derivation test in para 3 (Market value not traced through a NCL)
(2) The 25% test in para 9 (NCL does not count as equity)

The definition is intricate. It is taken from the CT group relief rules and illustrates how private client practitioners now have to extend their knowledge to matters which they could formerly have left to corporation tax practitioners.

Para 3(5) sch 1A TCGA provides:

> For the purposes of this paragraph-
> "normal commercial loan" means a loan which is a normal commercial loan for the purposes of section 158(1)(b) or 159(4)(b) of CTA 2010

That only applies for para 3, but the definition is repeated in para 9(5).

That takes us to s.162(1) CTA 2010 which provides:

> For the purposes of sections 158(1)(b) and 159(4)(b) "normal commercial loan" means a loan—
> (a) which is of or includes new consideration, and
> (b) in relation to which each of conditions A to D is met.

I refer to **"NCL conditions A-D"**.

57.11.1 *NCL cond. A: unconvertable*

Section 162(2) CTA 2010 provides:

> Condition A is that the loan does not carry any right to conversion into shares or securities other than a right to conversion into—
>
> (a) shares to which section 164(1) applies,
> (b) securities to which section 164(2) applies, or
> (c) shares or securities
>   [i] in a quoted unconnected company (see section 164(2A)) or
>   [ii] in the relevant company's quoted parent company (see section 164(3) to (7)).

Section 164 CTA 2010 provides:

> (1) This subsection applies to any shares—
> (a) in relation to which conditions A, C, D and E in section 160 are met, and
> (b) which do not carry any rights to conversion into shares or securities other than rights to conversion into shares or securities in the relevant company's quoted parent company (see subsections (3) to (6)).
>
> (2) This subsection applies to any securities—
> (a) which represent a loan of or including new consideration,
> (b) in relation to which conditions B, C and D in section 162 are met, and
> (c) which do not carry any rights to conversion into shares or securities other than rights to conversion into shares or securities in [a quoted unconnected company (see subsection (2A)) or in]1 the relevant company's quoted parent company.
>
> (2A) For the purposes of this section and section 162 a company is a quoted unconnected company if (and only if)—
> (a) its ordinary shares are listed on a recognised stock exchange,[24] and
> (b) it is not connected with the relevant company.
>
> (3) For the purposes of this section and sections 160 and 162 a company ("the candidate company") is the relevant company's quoted parent company if (and only if)—
> (a) the relevant company is a 75% subsidiary of the candidate company,
> (b) the candidate company is not a 75% subsidiary of any company, and
> (c) the candidate company's ordinary shares are listed on a recognised stock exchange.

[24] See App 2.18 (Listed/Recognised stock exchange).

> (4) In the case of a company whose]1 ordinary share capital is divided into two or more classes, subsections (2A)(a) and (3)(c) are met only if its ordinary shares of each class are listed on a recognised stock exchange.
> (5) In this section "ordinary shares" means shares forming part of ordinary share capital.
> (6) Subsection (7) applies if, in determining under subsection (3)(a) whether the relevant company is a 75% subsidiary of the candidate company, it is necessary to know, for the purposes of subsection (1)(b) or (2)(c) or section 160(4)(c) or 162(2)(c), whether the candidate company is the relevant company's quoted parent company.
> (7) It is to be assumed for those purposes that the candidate company is the relevant company's quoted parent company.

57.11.2 *Cond. B: no acquisition rights*

Section 162(3) CTA 2010 provides:

> Condition B is that the loan does not carry any right to the acquisition of shares or securities.

57.11.3 *NCL condition C: interest*

Section 162(4) CTA 2010 provides:

> Condition C is that the loan does not entitle the loan creditor to any amount by way of interest which—
> (a) depends to any extent on the results of the relevant company's business or on the results of any part of that business,
> (b) depends to any extent on the value of any of the relevant company's assets, or
> (c) exceeds a reasonable commercial return on the new consideration lent.
> This subsection needs to be read with section 163.

An interest-free loan satisfies condition C, and may therefore be a "normal commercial loan".

Section 163 CTA 2010 provides three exceptions:

> (1) Interest is not within section 162(4)(a) by reason only that the terms of the loan provide for the rate of interest—
> (a) to be reduced if the results of the relevant company's business or any part of the business improve, or
> (b) to be increased if such results worsen.
> (2) Interest is not within section 162(4)(b) by reason only that the terms

> of the loan provide for the rate of interest—
> (a) to be reduced if the value of any of the relevant company's assets increases, or
> (b) to be increased if the value of any such assets decreases.
>
> (3) Subsection (4) applies if—
> (a) a loan is made to the relevant company for the purpose of facilitating the acquisition of land,
> (b) the loan is made on the basis mentioned in subsection (5), and
> (c) none of the land that the loan is used to acquire is acquired with a view to resale at a profit.
>
> (4) Interest on the loan is not within section 162(4)(b) by reason only that the terms of the loan are such that the only way the loan creditor can enforce payment of an amount due is by exercising rights granted by way of security over the land that the loan is used to acquire.
>
> (5) The basis referred to in subsection (3)(b) is that—
> (a) the whole of the loan is to be applied in the acquisition of land by the relevant company or in meeting incidental costs incurred wholly and exclusively for the purpose of obtaining the loan or providing security for the loan,
> (b) the payment of any amount due in connection with the loan to the person making it is to be secured on the land that the loan is used to acquire, and
> (c) no other security is to be required for the payment of any such amount.
> (6) "Incidental costs" means expenditure on fees, commissions, advertising, printing or other incidental matters.

57.11.4 *NCL condition D: repayment*

Section 162(5) CTA 2010 provides:

> Condition D is that the loan is a loan in relation to which the loan creditor is entitled, on repayment, to an amount which—
> (a) does not exceed the new consideration lent, or
> (b) is reasonably comparable with the amount generally repayable (in relation to an equal amount of new consideration) under the terms of issue of securities listed on a recognised stock exchange.

57.12 Connected persons aggregated

Para 10(1) sch 1A TCGA provides:

> In determining for the purposes of paragraph 9 [definition of substantial

> indirect interest] the investment that a person ("P") has in a company, P is to be taken to have all of the rights and interests of any person connected with P.

I refer to this as the **"para 10 aggregation rule"**.

57.12.1 *"Connected"*

Para 10 sch 1A TCGA cuts down the standard definition of connected person, for the purposes of the para 10 aggregation rule:

> (2) A person is not to be regarded as connected with another person for the purposes of this paragraph merely as a result of their being parties to a loan that is a normal commercial loan for the purposes of paragraph 9.[25]
>
> (3) Section 286 (connected persons: interpretation)[26] has effect for the purposes of this paragraph—
>
> (a) as if, in subsection (2), for the words from ", or is a relative" to the end there were substituted "or is a lineal ancestor or lineal descendant of the individual or of the individual's spouse or civil partner", and
>
> (b) as if subsections (4) and (8) were omitted.

Section 286 TCGA as amended provides:

> (1) Any question whether a person is connected with another shall for the purposes of this Act be determined in accordance with the following subsections of this section (any provision that one person is connected with another being taken to mean that they are connected with one another).
>
> (2) A person is connected with an individual if that person is the individual's spouse or civil partner, ~~or is a relative, or the spouse or civil partner of a relative, of the individual or of the individual's spouse or civil partner~~ or is a lineal ancestor or lineal descendant of the individual or of the individual's spouse or civil partner.
>
> (3) A person, in his capacity as trustee of a settlement, is connected with—
>
> (a) any individual who in relation to the settlement is a settlor,
>
> (b) any person who is connected with such an individual,
>
> (c) any body corporate which is connected with that settlement,
>
> (d) if the settlement is the principal settlement in relation to one or more sub-fund settlements, the trustees of the sub-fund settlements, and
>
> (e) if the settlement is a sub-fund settlement in relation to a principal settlement, the trustees of any other sub-fund settlements in relation to the principal settlement.

[25] See 57.11 (Normal commercial loan).

[26] See 104.12 (Connected person).

> (3ZA) [definitions of "settlement" and "trustee"]
>
> (3A) For the purpose of subsection (3) above a body corporate is connected with a settlement if—
>
> (a) it is a close company (or only not a close company because it is not resident in the UK) and the participators include the trustees of the settlement; or
>
> (b) it is controlled (within the meaning of section 1124 of CTA 2010 [strict sense control]) by a company falling within paragraph (a) above.
>
> ~~(4) Except in relation to acquisitions or disposals of partnership assets pursuant to bona fide commercial arrangements, a person is connected with any person with whom he is in partnership, and with the spouse or civil partner or a relative of any individual with whom he is in partnership.~~
>
> (5) A company is connected with another company—
>
> (a) if the same person has control of both, or a person has control of one and persons connected with him, or he and persons connected with him, have control of the other, or
>
> (b) if a group of 2 or more persons has control of each company, and the groups either consist of the same persons or could be regarded as consisting of the same persons by treating (in one or more cases) a member of either group as replaced by a person with whom he is connected.
>
> (6) A company is connected with another person, if that person has control of it or if that person and persons connected with him together have control of it.
>
> (7) Any 2 or more persons acting together to secure or exercise control of a company shall be treated in relation to that company as connected with one another and with any person acting on the directions of any of them to secure or exercise control of the company.
>
> ~~(8) In this section "relative" means brother, sister, ancestor or lineal descendant.~~

57.13 TAAR/Treaty override

Para 11 deals with two distinct topics: a TAAR and a treaty override.

57.13.1 *Land-rich TAAR*

Para 11 sch 1A TCGA provides an application-disregard TAAR:[27]

> (1) This paragraph applies if a person has entered into any arrangements[28] the main purpose, or one of the main purposes, of which is to obtain a tax advantage[29] for the person as a result (wholly or partly) of—

[27] See 3.2 (Types of TAAR).

[28] Para 11(6) sch 1A TCGA provides, with minor contextual modification, the standard (unnecessary) definition: see App 2.2.3 (Definitions of "arrangement").

[29] Para 11(6) sch 1A TCGA sets out the GAAR definition of "tax advantage"; see 3.19.1 (Tax advantage: Definitions).

> (a) a provision of this Schedule applying or not applying ...

This applies if the advantage arises as a result of a provision of sch 1A or a DTA. An advantage arising as a result of other provisions does not count. An advantage arising as a result of sch 1A together with other provisions would be caught.

It is easy to see that an arrangement to secure that sch 1A does not apply could have a tax advantage. It is less obvious how an arrangement to secure that sch 1A *does* apply could have a tax advantage; an example is an arrangement to obtain land-asset hold-over relief or rebasing relief.

Para 11(6) sch 1A TCGA provides:

> In this paragraph ... "tax" means capital gains tax or corporation tax

The CG Manual provides:

> **CG73950 Indirect disposals: TAAR** [May 2020]
> Some examples of where this could apply would be:
> [1] Manipulating the company's assets such that it was not UK property rich when a disposal was made.
> [2] Ordering transactions to ensure a UK land disposal occurred at a time when the company had ceased to be UK property rich.
> [3] Undertaking a disposal where the 'linked disposals' exemption[30] would apply with the intention to onward sell some or all of the non-UK land assets such that the exemption would not have been available had just the remaining interests been disposed of.
> [4] A disposal to which the 'trading exemption' was met and then UK land used in the trade was disposed of as part of planned arrangements although the trade continued.
> [5] The use of back to back arrangements to break related party rules applying.
> [6] Delaying completion of a transaction to ensure the disposer had ceased to hold a significant indirect interest including by fragmentation
> ...
> **Restructuring of pre-April 2019 holdings**
> The extension in scope of the non-resident capital gains rules may have prompted some non-resident investors to consider how their interests in UK land were held.
> For example, an exempt investor holding interests in UK land indirectly via a holding company where the holding company is not UK property

[30] See 57.9 (Linked disposal).

rich but one or more of its subsidiaries are. In such a case the disposal of a UK property rich subsidiary would be a taxable disposal by the holding company.

To avoid this outcome the exempt investor may have decided to concentrate their UK property rich companies under a new directly held holding company which could then make an exemption election under Para 12 Sch 5AAA.

Where the restructuring was solely undertaken to allow Sch 5AAA elections i.e. the transparency or exemption elections, to apply it is not expected that the TAAR would apply. Cases of doubt or difficulty should be referred to the CG Technical team using the submission template at CG99998.

57.13.2 *Treaty override*

Para 11 sch 1A TCGA provides:

> (1) This paragraph applies if a person has entered into any arrangements[31] the main purpose, or one of the main purposes, of which is to obtain a tax advantage[32] for the person as a result (wholly or partly) of ...
>
> (b) double taxation arrangements[33] having effect despite a provision of this Schedule in a case where the advantage is contrary to the object and purpose[34] of the double taxation arrangements.

Para 11(4) Sch 1A TCGA provides a treaty override:

> The counteraction has effect in a treaty shopping case[35] regardless of section 6(1) of TIOPA 2010.

The wording is based on the OECD principal purpose test.[36]

The CG Manual provides:

[31] Para 11(6) sch 1A TCGA provides (with minor contextual modification) the standard (unnecessary) definition: see App 2.2.3 (Definitions of “arrangement”).

[32] Para 11(6) sch 1A TCGA sets out the GAAR definition of “tax advantage”; see 3.19.1 (Tax advantage: Definitions).

[33] Para 11(6) sch 1A TCGA provides the standard commonsense definition: “In this paragraph ... “double taxation arrangements” means arrangements that have effect under section 2(1) of TIOPA 2010”.

[34] See 108.7 (OECD-concept abuse).

[35] Defined para 11(6) sch 1A TCGA: "treaty shopping case" means a case where this paragraph applies as a result of sub-paragraph (1)(b).

[36] See 108.8 (OECD principal purpose test).

> **CG73950 Indirect disposals: TAAR** [May 2020]
> [The treaty override] is rooted in the internationally agreed principles governing what the Commentary to the OECD Model calls "improper use of the Convention", and is explored at length in the Commentary to Article 1 of the OECD Model (paragraphs 54 to 80 in the 2017 version)[37]...
> A DTA will always provide a tax benefit in relation to a particular state in circumstances where the allocation of taxing rights and the relative rates of tax in the contracting states means a person pays less tax in that state than they would absent the DTA. However, under the guiding principle outlined above, abuse arises where arrangements have been entered into to create that effect, and not for commercial or substantive reasons.
> HMRC will consider each case on its merits, but for example would in particular consider the application of the TAAR where historically a person or group of persons had used structures for holding UK land that would become taxable in the UK under these rules, but after becoming aware of the indirect disposal rules began to structure so that DTAs would restrict the UK's right to tax.

See too OECD, "Taxation of Offshore Indirect Transfers (Draft Toolkit)".[38]

57.13.3 *Treaty/TAAR counteraction*

Para 11 sch 1A TCGA provides:

> (2) The tax advantage is to be counteracted by the making of such adjustments as are just and reasonable.
> (3) The adjustments may be made (whether by an officer of Revenue and Customs or the person) by way of an assessment, the modification of an assessment, amendment or disallowance of a claim, or otherwise.

This is a counteraction-style TAAR.[39].

The Consultation Response Document provides:

> 3.160. The government believes that in practice, given the motive test, customers will have certainty as to whether actions they undertake could trigger the [anti-avoidance] rule.

[37] See 108.7 (OECD-concept abuse).

[38] *https://www.oecd.org/tax/taxation-of-offshore-indirect-transfers.htm*

[39] See 3.2.3 (Consequences of TAAR).

The reader may doubt if that is intended to be taken seriously.

57.14 Grant of option

Section 1C TCGA provides:

> (4) The grant of an option by a person binding the person to dispose of an interest in UK land is (so far as it would not otherwise be the case) regarded as a disposal of an interest in UK land by the person for the purposes of section 1A(3)(b).
> (5) This does not affect the operation of section 144 in relation to the grant of the option (or otherwise).[40]

This is derived from the former NRCGT rule. Why is it needed?

57.15 UK-land rebasing: Introduction

The rebasing rules (**"UK-land rebasing"**) are in sch 4AA TCGA.

There are three types of UK-land rebasing. I coin the following terminology:

Type of rebasing	**Rebase to**	**sch 4AA**	**Applies to:**
2019 rebasing	2019	Part 2	(a) indirect disposal (b) direct disposal, no residential use (c) direct disposal by non-chargeable person
2015 rebasing	2015	Part 3	Direct disposal, fully residential
2015/19 rebasing	2015/2019	Part 4	Direct disposal, partly residential use

The elections out of these rebasing rules are:

Type of rebasing	**Elections**	**Sch 4AA para**
2019 rebasing	Historic cost[41]	4
	Time apportionment	*Not available*
2015 rebasing	Historic cost	8
	Time apportionment	9
2015/19 rebasing	Historic cost	14
	Time apportionment	*Not available*

57.16 General rebasing conditions

Para 1(1) sch 4AA TCGA provides:

> Part 2, 3 or 4 of this Schedule applies on the first occasion on which a

[40] Para 4(4)(5) sch 1B TCGA makes the same provision for the purposes of that schedule.

[41] Statute calls this the retrospective basis of calculation, but I think my term is clearer.

> person disposes of an asset that the person held on 5 April 2019 where—
> (a) the disposal is either a direct or indirect disposal of UK land, and
> (b) the disposal is made by a non-resident or a UK resident in the overseas part of a tax year.

These requirements apply to each of the 3 types of UK-land rebasing. I refer to this as the **"general rebasing conditions"**.

57.16.1 *Direct/indirect disposal*

Para 1(3) sch 4AA TCGA provides a (relatively) commonsense definition of direct/indirect disposal of UK land, which is the requirement in general rebasing condition (a):

> For the purposes of this Schedule—
> (a) a disposal is a "direct disposal of UK land" if it is a disposal of an interest in UK land, and
> (b) a disposal by a person is an "indirect disposal of UK land" if it is a disposal of an asset (other than an interest in UK land) deriving at least 75% of its value from UK land where the person has a substantial indirect interest in that land.

The wording mirrors s.1A(3)/2B(4) TCGA.[42]

57.16.2 *Disposal by non-resident*

Para 1(4) sch 4AA TCGA (in short) provides a definition of "non-resident", which is the requirement in general rebasing condition (b):

> For the purposes of this paragraph, the disposal is made by a non-resident or a UK resident in the overseas part of a tax year if it is—
> (a) a disposal on which a gain accrues that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection [land/land-rich asset],[43]
> (b) a disposal on which a gain accrues that falls to be dealt with by section 1A(1) in accordance with section 1G(2) [split year] because the asset disposed of is within section 1A(3)(b) or (c) [land/land-rich asset],
> (c) a disposal on which a gain accrues that falls to be dealt with by

[42] See 57.2 (Charge on land/land-rich assets).

[43] See 57.2 (Charge on land/land-rich assets).

> section 2B(4),[44] or
> (d) a disposal of an asset
> [i] on which a gain does not accrue
> [ii] but which, had a gain accrued, would fall to be dealt with as mentioned in any of the preceding paragraphs of this subparagraph.

This is convoluted drafting, but it works.

Land rebasing is therefore an unusual relief: it applies (in short) to non-residents but it does not generally apply to UK residents.[45] It follows that the relief does not apply for the purpose of computing s.3 gains[46] or s.1(3) amounts (trust gains)[47].

57.17 2019 rebasing

Para 2(1) sch 4AA TCGA provides:

> This Part [Part 2] of this Schedule applies to-
> (a) all indirect disposals of UK land,
> (b) direct disposals of UK land that were not fully residential before 6 April 2019, and
> (c) direct disposals of UK land by persons who were not chargeable before 6 April 2019.

I refer to this as **"2019 rebasing heads (a)-(c)"**.

57.17.1 *Not fully residential: Head (b)*

2019 rebasing applies (under head (b)) to direct disposals of UK land that were not fully residential before 2019. Para 2(2) sch 4AA TCGA provides the definition:

> For the purposes of this paragraph a direct disposal of UK land made by a person was "not fully residential before 6 April 2019" if in the period-
> (a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 6 April 2015, and
> (b) ending with 5 April 2019,
> there was no day on which the land to which the disposal relates consisted of or included a dwelling.

[44] See 56.6.5 (Charge on non-resident co).

[45] But see 57.26 (Rebasing: Company onshoring).

[46] See 64.4 (Computing gains: CT rules).

[47] See 61.6.3 (s.1(3) amount: Exemptions/reliefs).

"Not fully residential" seems an odd way to express this concept: Not residential (or not fully or partly residential) would be clearer.

57.17.2 *Contract to buy off-plan*

Para 2(3) sch 4AA TCGA provides:

> If the disposal is of an interest in land subsisting under a contract for the acquisition of land that, at any time before 6 April 2019, consisted of or included a building to be constructed or adapted for use as a dwelling, the disposal is taken to be fully residential before that date.

57.17.3 *Non-chargeable person: Head (c)*

2019 rebasing applies to direct disposals of UK land by non-chargeable persons. Para 2 sch 4AA TCGA provides the definition:

> (4) For the purposes of this paragraph, a disposal is made by a person who was not chargeable before 6 April 2019 if, immediately before that date, the person was-
>
> (a) a company which was not a closely-held company (see sub-paragraph (5)),
>
> (b) a widely-marketed scheme (see sub-paragraph (6)), or
>
> (c) a company carrying on life assurance business (as defined in section 56 of the Finance Act 2012) where the interest in UK land was, immediately before that date, held for the purpose of providing benefits to policyholders in the course of that business.
>
> (5) The question as to whether a company is "a closely-held company" is determined in accordance with Part 1 of Schedule C1; but if-
>
> (a) the company is a divided company within the meaning of section 14G, and
>
> (b) the company would not otherwise be regarded as a closely-held company,
>
> the company is to be so regarded if the conditions in subsection (3) of that section are met.
>
> (6) A person is a "widely-marketed scheme" if-
>
> (a) the person is a scheme within the meaning of section 14F, and
>
> (b) condition A or B in that section is met, reading the reference in subsection (8)(a) of that section to the non-resident CGT disposal as a reference to the disposal mentioned in paragraph 1(1).
>
> (7) In determining for the purposes of this paragraph whether or not-
>
> (a) a person is a closely-held company, or

> (b) a person is a widely-marketed scheme,
>
> arrangements are to be ignored if the main purpose of, or one of the main purposes of, them is to secure a tax advantage as a result of the person not being a closely-held company or the person being a widely-marketed scheme.[48]
>
> (8) In this paragraph ...
>
> (b) any reference to section 14F, 14G or Schedule C1 are to those provisions as they had effect on 5 April 2019 (before their repeal by Schedule 1 to the Finance Act 2019).

Thus the complex pre-2019 provisions continue to matter for 2019 rebasing head (c).

57.18 2019 Rebasing: The relief

Assuming the general rebasing conditions are met, and one of 2019 rebasing heads (a)-(c) apply, para 3(1) sch 4AA TCGA provides the relief:

> In calculating the gain or loss accruing on the disposal it is [to[49]] be assumed that the asset was on 5 April 2019 sold by the person, and immediately reacquired by the person, at its market value on that date.

The wording is based on s.35 TCGA (1982 rebasing).

57.19 Election out of 2019 rebasing

Para 3(2) sch 4AA TCGA

> This paragraph [2019 rebasing relief] has effect subject to any election made by the person under paragraph 4 (retrospective basis of calculation).

So we turn to para 4(1) sch 4AA TCGA which provides:

> The person may make an election under this paragraph for the assumption that the asset is sold and reacquired as mentioned in paragraph 3 not to apply.

Statute calls this the retrospective basis of calculation, but I think "historic cost" is clearer. There is no time apportionment, so the entire historic gain

[48] Para 2 incorporates the standard definitions, but for some reason does so indirectly: "(8) In this paragraph ... (a) "arrangements" and "tax advantage" have the same meaning as in section 16A".

[49] Typos in Acts of Parliament are exceptional. But on this occasion the word "to" has been erroneously omitted.

(if any) will come into charge. So an election will rarely be advantageous. The Consultation Response document provides:

> 3.21. The government recognises the burden on taxpayers in having to obtain valuations, but believes that offering the retrospective basis as an option means those unable to get a valuation can use original cost. Time apportionment is still available on purely residential property disposals, and for commercial and mixed-use property it is likely most taxpayers will obtain a valuation for rebasing to ensure they use the most tax effective calculation method.

57.19.1 *Para 4 election: Loss*

Para 4(2) sch 4AA TCGA provides:

> If, in the case of an indirect disposal of UK land-
> (a) a person makes an election under this paragraph, and
> (b) a loss accrues on the disposal,
> the loss is not an allowable loss.

The Consultation Response document provides:

> 3.22. The government recognises that in some circumstances on indirect disposals it will not be practical to obtain a valuation at April 2019, and so will allow the retrospective basis to be used. To prevent this creating significant losses arising from assets that were not in the UK tax base prior to commencement, where the retrospective basis is used on indirect disposals, it will not be able to produce an allowable loss. Not allowing losses that accrued pre- commencement is coherent with the overall policy, and aligns with the treatment of gains.
> 3.23. Hence in indirect disposal cases the retrospective basis would only be capable of producing a chargeable gain. Any loss would not be an allowable loss...

This does not apply to a direct disposal. Why is that?

57.19.2 *Para 4 election: Residential property*

Para 5 sch 4AA TCGA provides:

> (1) This paragraph applies if-
> (a) a person makes an election under paragraph 4 in respect of a disposal on which a gain accrues, and
> (b) it is necessary to determine, in accordance with Schedule 1B, how much of the gain is a residential property gain.
> (2) Paragraph 2 of Schedule 1B has effect as if-

> (a) sub-paragraphs (5) and (6) of that paragraph were omitted, and
> (b) in that paragraph, "the applicable period" had the definition given by the next sub-paragraph.
>
> (3) "The applicable period" means the period-
> (a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 31 March 1982, and
> (b) ending with the day before the day on which the disposal is made.

Amended as para 5 requires, the key parts of para 2 sch 1B TCGA provide:

> 2 (1) The proportion of a chargeable gain attributable to residential property is equal to—
> (a) the relevant fraction of the gain, and
> (b) if there has been mixed use of the land to which the disposal relates on one or more days in the applicable period, the relevant fraction of the gain as adjusted, on a just and reasonable basis, to take account of the mixed use on the day or days.
>
> (2) The relevant fraction is A/B where—
> A is the number of days in the applicable period on which the land to which the disposal relates consists of or includes a dwelling, and
> B is the total number of days in the applicable period.
>
> (3) [Definition of "mixed use of land"]
>
> (4) [Contract for the acquisition of dwelling]
>
> ~~(5) In this paragraph "the applicable period" means the period—~~
> ~~(a) beginning with the day on which the person making the disposal acquired the interest in land being disposed of or, if later, the day from which the interest in land became chargeable, and~~
> ~~(b) ending with the day before the day on which the disposal occurs.~~
>
> ~~(6) For the purposes of this paragraph an interest in land became "chargeable"—~~
> ~~(a) in any case where the disposal is of an interest in land in the UK—~~
> ~~(i) by a person in a tax year in which the person is not UK resident, or~~
> ~~(ii) by a person in the overseas part of a tax year which is, as respects the person, a split year, from 6 April 2015, and~~
> ~~(b) in any other case, from 31 March 1982.~~

> (7) [Interests in land acquired by the person at different times].
> (x) “The applicable period” means the period-
> (a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 31 March 1982, and
> (b) ending with the day before the day on which the disposal is made.

57.20 2015 rebasing conditions

Para 6(1) sch 4AA TCGA provides:

> This Part [Part 3, 2015 rebasing] of this Schedule applies to any direct disposal of UK land if-
> (a) the person held the interest in UK land being disposed of throughout the period beginning with 6 April 2015 and ending with the disposal, and
> (b) the disposal was fully residential before 6 April 2019.

I refer to this as **“2015 rebasing conditions”**.

57.20.1 *“Fully residential”*

Para 6 sch 4AA TCGA provides:

> (2) For this purpose a direct disposal of UK land made by a person is “fully residential before 6 April 2019” if in the period-
> (a) beginning with 6 April 2015, and
> (b) ending with 5 April 2019,
> every day on which the land to which the disposal relates consisted of a dwelling.
> (3) If the disposal is of an interest in land subsisting under a contract for the acquisition of land that, at any time in that period, did not consist of a building to be constructed or adapted for use as a dwelling, the disposal is taken to be not fully residential before 6 April 2019.

57.20.2 *Interaction with 2019 rebasing*

Para 6(4) sch 4AA TCGA provides:

> This Part [Part 3] of this Schedule does not apply to
> [a] a direct disposal of UK land
> [b] made by a person who was not chargeable before 6 April 2019, as determined for the purposes of paragraph 2.[50]

[50] See 57.17.3 (Non-chargeable person).

Thus 2019 rebasing relief has priority, if the relevant conditions are met.

57.21 2015 rebasing relief

Para 7(1) sch 4AA TCGA provides:

> In calculating the gain or loss accruing on the disposal it is [to[51]] be assumed that the asset was on 5 April 2015 sold by the person, and immediately reacquired by the person, at its market value on that date.

The wording is based on s.35 TCGA (1982 rebasing).

57.22 Elections out of 2015 rebasing

Para 7(2) sch 4AA TCGA provides:

> This paragraph has effect subject to any election made by the person under either-
> (a) paragraph 8 (retrospective basis of calculation), or
> (b) paragraph 9 (straight-line time apportionment),
> (and an election may be made under only one of those paragraphs).

57.22.1 *Historic-cost election*

Para 8 sch 4AA TCGA provides:

> The person may make an election under this paragraph for the assumption that the asset is sold and reacquired as mentioned in paragraph 7 not to apply.

I call this a para 8 historic-cost election.

57.22.2 *Time-apportionment election*

Para 9 sch 4AA TCGA provides:

> (1) The person may make an election under this paragraph-
> (a) for the assumption that the asset is sold and reacquired as mentioned in paragraph 7 not to apply, and
> (b) for the gain or loss accruing on the disposal to be apportioned so that only the post-5 April 2015 proportion of it is treated as accruing on the disposal.
>
> (2) The "post-5 April 2015 proportion" is the proportion that the days in the post-5 April 2015 period bear to the days in the ownership period.

[51] Typos in Acts of Parliament are exceptional. But on this occasion the word "to" has been erroneously omitted.

> (3) For this purpose-
> "the post-5 April 2015 period" means the day beginning with 6 April 2015 and ending with the day on which the disposal is made, and
> "the ownership period" means the period beginning with the day on which the person acquired the interest disposed of or, if later, 31 March 1982 and ending with the day on which the disposal is made.

I call this a para 9 time-apportionment election.

The CG Manual gives a straightforward example:

> **CG73972 Direct disposals of pre-April 2015 assets fully chargeable before 6 April 2019** [Dec 2021]
> Disposal made in May 2019 (1500 days after 5 April 2015) and acquisition February 2011 (1500 days before in 6 April 2015).
> Gain before any apportionment £1,000.
> The post 5 April 2015 proportion of the gain would be £500
> i.e. 1,000 × (1,500/(1,500 + 1,500))

57.22.3 *Para 8/9 elections: Residential property gain*

Para 9 and 10 sch 4AA TCGA are best read side by side:

Para 9 sch 4AA: historic cost	**Para 10 sch 4AA: time apportion**
(1) This paragraph applies if-	(1) This paragraph applies if-
(a) a person makes an election under paragraph 8 in respect of a disposal on which a gain accrues, and	(a) a person makes an election under paragraph 9 in respect of a disposal on which a gain accrues, and
(b) it is necessary to determine, in accordance with Schedule 1B, how much of the gain is a residential property gain.	[identical]
(2) Paragraph 2 of Schedule 1B has effect as if-	[identical]
(a) sub-paragraphs (5) and (6) of that paragraph were omitted, and	[identical]
(b) in that paragraph, "the applicable period" had the definition given by the next sub-paragraph.	[identical]
(3) "The applicable period" means the period-	(3) "The applicable period" means the period-

(a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 31 March 1982, and	(a) beginning with 6 April 2015, and
(b) ending with the day before the day on which the disposal is made.	[identical]

These are the equivalents to para 5 sch 4AA TCGA but with different applicable periods; see 57.19.2 (Para 4 election: residential property).

57.23 2015/2019 rebasing conditions

Para 12 sch 4AA TCGA provides:

> (1) This Part [Part 4, 2015/2019 rebasing] of this Schedule applies to any direct disposal of UK land if-
> (a) neither Part 2 [2019 rebasing] nor Part 3 [2015 rebasing] of this Schedule applies to the disposal, and
> (b) the interest in UK land being disposed of was not a post-April 2015 asset that was fully residential before 6 April 2019.
>
> (2) For this purpose-
> (a) the interest in UK land being disposed of is a "post-April 2015 asset" if it was acquired by the person after 5 April 2015, and
> (b) the asset "was fully residential before 6 April 2019" if, in the period beginning with the day on which it was acquired and ending with 5 April 2019, every day on which the land to which the disposal relates consisted of a dwelling.
>
> (3) If the disposal is of an interest in land subsisting under a contract for the acquisition of land that, at any time in that period, did not consist of a building to be constructed or adapted for use as a dwelling, the disposal is taken to be not fully residential before 6 April 2019.

I refer to this as **"2015/2019 rebasing conditions"**.

57.24 2015/2019 rebasing: the relief

Assuming the general rebasing conditions and the 2015/2019 rebasing conditions are met, para 13 sch 4AA TCGA provides:

> (1) In calculating the gain or loss accruing on the disposal ("the actual disposal") it is [to[52]] be assumed that-

[52] Typos in Acts of Parliament are exceptional. But on this occasion the word "to" has been erroneously omitted.

> (a) the asset was on 5 April 2015 sold by the person, and immediately reacquired by the person, at its market value on that date (but see sub-paragraph (3)), and
> (b) in addition, the asset was on 5 April 2019 sold by the person, and immediately reacquired by the person, at its market value on that date.
>
> (2) In the case of the assumed sale on 5 April 2019, the gain or loss accruing on that sale is treated as accruing on the actual disposal (in addition to the gain or loss that actually accrues on the actual disposal).
>
> (3) If the asset was acquired by the person after 5 April 2015, the assumption that it is sold, and immediately reacquired, on 5 April 2015 is not to apply.

57.25 Election out of 2015/2019 rebasing

Para 13(4) sch 4AA TCGA provides:

> This paragraph has effect subject to any election made by the person under paragraph 14 (retrospective basis of calculation).

So we turn to para 14 sch 4AA TCGA which provides:

> The person may make an election under this paragraph for the assumptions that the asset is sold and reacquired as mentioned in paragraph 13 not to apply.

57.25.1 *Para 14 election: Residential property gain*

Para 15 sch 4AA TCGA provides:

> (1) This paragraph applies if-
> (a) a person makes an election under paragraph 14 in respect of a disposal on which a gain accrues, and
> (b) it is necessary to determine, in accordance with Schedule 1B, how much of the gain is a residential property gain.
>
> (2) Paragraph 2 of Schedule 1B has effect as if-
> (a) sub-paragraphs (5) and (6) of that paragraph were omitted, and
> (b) in that paragraph, "the applicable period" had the definition given by the next sub-paragraph.
>
> (3) "The applicable period" means the period-
> (a) beginning with the day on which the person acquired the interest in land being disposed of or, if later, 31 March 1982, and
> (b) ending with the day before the day on which the disposal is made.

This is the equivalent to para 5 sch 4AA TCGA but with a different applicable period; see 57.19.2 (Para 4 election: residential property).

57.26 Rebasing: Company onshoring

It is a general requirement of land-rebasing that the disposal is made by a non-resident (or in the overseas part of a split year): para 1(1)(b) sch 4AA TCGA.

Para 16 sch 4AA TCGA provides an exception:

> (1) This paragraph applies in any case where-
> (a) a company becomes resident in the UK after 5 April 2019,
> (b) the company makes a direct or indirect disposal of UK land after that date, and
> (c) (ignoring this paragraph) Part 2, 3 or 4 of this Schedule would have applied to the disposal but for the fact that it is made at a time when the company is resident in the UK.
> (2) In that case, Part 2, 3 or 4 of this Schedule applies in relation to the disposal (regardless of paragraph 1(1)(b)).

This only applies to companies, so individuals and trustees who become UK resident after 5 April 2019 do not qualify for rebasing. This anomoly is deliberate. The consultation response paper provides:

> 3.31. In order not to dis-incentivise on-shoring, the government is content to allow for companies who become UK resident to retain the ability to calculate their gains or losses using rebasing to April 2019.

The policy to facilitate onshoring companies, but discourage onshoring of trusts and individuals seems a strange one; but there it is.

57.27 Company/trust leaves UK

Similar rules apply to companies and trusts, and it is easiest to follow if the text is set out side by side:

Para 17 sch 4AA TCGA (trust)	**Para 18 sch 4AA TCGA (company)**
(1) This paragraph applies in any case where-	(1) This paragraph applies in any case where-
(a) the trustees of a settlement cease to be resident in the UK after 5 April 2019, and	(a) a company ceases to be resident in the UK after 5 April 2019, and
(b) the trustees make a direct or indirect disposal of UK land after that date.	(b) the company makes a direct or indirect disposal of UK land after that date.

(2) Nothing in Part 2, 3 or 4 of this Schedule applies to the disposal.	*Identical*
(3) The asset that is disposed of is excepted from the application of section 80(2) (deemed disposal of assets on trustees ceasing to be resident in UK).[53]	(3) The asset that is disposed of is excepted from the application of section 185(2) and (3) (deemed disposal of assets on company ceasing to be resident in UK).

In short, companies and trusts which cease to UK resident do not qualify for rebasing. But individuals who cease to be UK resident do qualify for rebasing.

57.28 Rebasing: Wasting asset

Para 19 sch 4AA TCGA provides:

> (1) This paragraph applies if, in calculating a gain or loss accruing to a person in a case where paragraph 3, 7 or 13 is applicable, it is necessary to make a wasting asset determination in relation to the asset disposed of.
> (2) The assumption that the asset was acquired on a date mentioned in paragraph 3, 7 or 13 (as the case may be) is to be ignored in making that determination.
> (3) In this paragraph "a wasting asset determination" means a determination whether or not an asset is a wasting asset, as defined for the purposes of Chapter 2 of Part 2 of this Act. Capital allowances

Para 20 sch 4AA TCGA provides:

> (1) This paragraph applies if, in calculating a gain or loss accruing to a person in a case where paragraph 3, 7 or 13 is applicable, it is to be assumed that the asset disposed of was acquired on a particular date for a consideration equal to its market value on that date.
> (2) For the purposes of that calculation-
> (a) section 41 (restriction of losses by reference to capital allowances and renewals allowances), and
> (b) section 47 (wasting assets qualifying for capital allowances),
> are to apply in relation to any allowance made in respect of the expenditure actually incurred in acquiring or providing the asset as if it were made in respect of the expenditure assumed to have been incurred.

[53] See 12.4.7 (Exit charge: UK land)

> (3) In this paragraph "allowance" means any capital allowance or renewals allowance.

57.29 Rebasing election procedure

Para 21 sch 4AA TCGA provides:

> (1) An election under any provision of this Schedule must (regardless of section 42(2) of the Management Act)[54] be made by being included in a relevant return relating to the disposal.
>
> (2) For the purposes of this paragraph a "relevant return" means—
>
> (a) an ordinary tax return, or
>
> (b) a return under Schedule 2 to the Finance Act 2019.
>
> (3) An election under any provision of this Schedule which is made by being included in a return under Schedule 2 to the Finance Act 2019 may be subsequently revoked by provision included in an ordinary tax return which is delivered on or before the filing date for the ordinary tax return.
>
> (4) Subject to that, an election under any provision of this Schedule is irrevocable.
>
> (5) All such adjustments are to be made, whether by way of discharge or repayment of tax, the making of assessments or otherwise, as are required to give effect to an election under any provision of this Schedule.
>
> (6) For the purposes of this paragraph, in the case of a person other than a company—
>
> "ordinary tax return" means a return under section 8 or 8A of the Management Act,[55] and
>
> "the filing date", in relation to that return, has the meaning given by section 9A(6) of that Act.
>
> (7) For the purposes of this paragraph, in the case of a company—
>
> "ordinary tax return" means a company tax return under Schedule 18 to the Finance Act 1998, and
>
> "the filing date", in relation to that return, has the meaning given by paragraph 14 of that Schedule.
>
> (8) For the purposes of this paragraph—
>
> (a) the reference to an election being included in a relevant return includes its being included as a result of an amendment of the return, and
>
> (b) the reference to the revocation of an election being included in

[54] See 123.5 (Tax return claims).

[55] See 121.4 (Notice to make return).

an ordinary tax return includes its being included as a result of an amendment of the return.

57.30 Interaction with anti-avoidance

57.30.1 *UK-land gain outside s.3*

Section 3(1) TCGA provides:

> (1) This section applies if ...
>
> (d) apart from this section, some or all of the gain would not be chargeable to corporation tax on the company.

A non-resident company is subject to CT directly, on gains from UK land/land-rich assets, so this takes the gains outside s.3, and avoids a double charge.

57.30.2 *UK-land gain outside s.86/87*

The wording follows a template, so it is helpful to read the provisions side by side:

s.86(4ZA) TCGA	**s.87(5A) TCGA**
Where (apart from this subsection) the amount mentioned in subsection (1)(e)[56] would include a chargeable gain or allowable loss to which section 1A(3)(b) or (c) applies (disposals by non-UK residents within the charge to capital gains tax [disposal of UK land/land-rich asset]),	Where (apart from this subsection) the amount mentioned in subsection (4)(a)[57] would include a chargeable gain or allowable loss to which section 1A(3)(b) or (c) applies (disposals by non-UK residents within the charge to capital gains tax),
so much of the gain or loss as would be so included is to be disregarded for the purposes of subsection (1)(e).	so much of the gain or loss as would be so included is to be disregarded for the purposes of determining the section 1(3) amount.

A non-resident trust is subject to CGT directly, on gains from UK land/land-rich assets, so this takes the gains outside s.86 and s.87 TCGA, and avoids a double charge.

[56] See 60.11 (Section 86 gains condition).

[57] See 61.6 (Section 1(3) amount).

57.31 Hold-over relief

CGT has two sets of hold-over reliefs, which (in short) may avoid the charge otherwise arising on gifts[58]:

(1) s.165 TCGA (business/agricultural property):

s.165 amended by	***Gift by***	***Asset***
(a) *unamended*	individual	business property
(b) para 1 sch 7	individual	agricultural property
(c) para 2 sch 7	trustee	business property
(d) para 3 sch 7	trustee	agricultural property

(2) s.260 TCGA: gift by individual/trustee:

(a) a chargeable transfer[59]

Both sets of reliefs apply in an amended way for land-gains. One might refer to them as **"land-asset s.165/s.260"**.

There are *four* versions of each set of reliefs:

Version		**Transferor**	**Transferee**
Standard (non land-assets)		Does not matter	Resident
Land-assets			
s.165(7A)-(7C)	s.260(6ZA)-(6ZC)	Non-resident	Resident
s.167A(2)	s.261ZA(2)	Resident	Non-resident
s.167(3)	s.261ZA(3)	Non-resident	Non-resident

Simplicity was not a consideration here; a full discussion would need a book to itself. [60]

57.32 Hold-over relief: Standard version

57.32.1 *s.165/260 application conditions*

s.165(1) TCGA	**s.260(1) TCGA:**
If—	If—
(a) an individual ("the transferor") makes a disposal otherwise than under a bargain at arm's length of an asset within subsection (2) below, and	(a) an individual or the trustees of a settlement ("the transferor") make a disposal within subsection (2) below of an asset

[58] I refer for simplicity to gifts, though the relief applies to all disposals at an undervalue.

[59] There are a further 9 categories of disposal within s.260 which are not discussed here.

[60] See Gunn, "Hold-over relief for land: did someone lose the plot" Tax Planning Review (2020) Vol 7 p.233.

	(b) the asset is acquired by an individual or the trustees of a settlement (“the transferee”), and
(b) a claim for relief under this section is made by the transferor and the person who acquires the asset ("the transferee") or, where the trustees of a settlement are the transferee, by the transferor alone,	(c) a claim for relief under this section is made by the transferor and the transferee or, where the trustees of a settlement are the transferee, by the transferor alone,
then, subject to subsection (3) and sections 166, 167, 167A, 169, 169B and 169C, subsection (4) below shall apply in relation to the disposal.	then, subject to subsection (6) below and sections 169, 169B, 169C, 261 and 261ZA, subsection (3) below shall apply in relation to the disposal.

I refer to the conditions in s.165(1)/s.260(1) as **“s.165/s.260 application conditions”** .

The last paragraph of s.165(1)/260(1) refers to some of the exceptions to hold-over relief; but it is more helpful to set out a complete list:

TCGA	**Topic**	**See para**
Hold-over relief disapplied		
s.166/261	Gift to non-resident	
s.167	Gift to foreign-controlled company	
s.167A/261ZA	Gift of land-asset to non-resident	
s.169	Gift to dual resident trust	
s.169B	Gift to settlor-interested trust	
Hold-over relief clawed back		
s.168	Gift to individual who becomes non-resident	8.2
s.169A	Gift to LLP which ceases business (this will rarely if ever happen)	
s.169C	Gift to trust which becomes settlor-interested	

The exceptions in the above table are effectively the same for s.165 and s.260.[61] The next requirement is what distinguishes s.165/260 reliefs:

[61] The drafting is erratic, in that on 2 occasions there are separate provisions for s.165/s.260 reliefs; on other occasions there is one single provision which applies to both reliefs. But it does not matter.

s.165(2) TCGA	**s.260(2) TCGA**
(2) An asset is within this subsection if— (a) it is, or is an interest in, an asset used for the purposes of a trade, profession or vocation carried on by— (i) the transferor, or (ii) his personal company, or (iii) a member of a trading group of which the holding company is his personal company, or	(2) A disposal is within this subsection if it is made otherwise than under a bargain at arm's length and—
(b) it consists of shares or securities of a trading company, or of the holding company of a trading group, where— (i) the shares or securities are not listed on a recognised stock exchange, or (ii) the trading company or holding company is the transferor's personal company.	(a) is a chargeable transfer within the meaning of the Inheritance Tax Act 1984 (or would be but for section 19 of that Act) and is not a potentially exempt transfer (within the meaning of that Act)...

Section 226A TCGA restricts private residence relief following a claim for hold-over relief under s.260; this is not discussed here.

57.32.2 *Restrictions on s.165 relief*

Section 165(3) TCGA provides 3 restrictions on s.165 hold-over relief, one of which has an equivalent in s.260(6) TCGA

s.165(3) TCGA	**s.260(6) TCGA:**
Subsection (4) below does not apply in relation to a disposal if—	
(ba) in the case of a disposal of shares or securities, the transferee is a company,	
(c) in the case of a disposal of qualifying corporate bonds, a gain is deemed to accrue by virtue of section 116(10)(b), or	Subsection (3) above does not apply in relation to a disposal of assets within section 115(1) on which a gain is deemed to accrue by virtue

	of section 116(10)(b) [QCBs].
(d) subsection (3) of section 260 applies in relation to the disposal (or would apply if a claim for relief were duly made under that section).	

The effect of para (d) is that s.260 has priority over s.165, if both apply. The point may be to avoid the apportionment which may apply under s.165 for a trading company with non-trading assets.

57.32.3 *Standard hold-over relief*

Assuming these conditions are satisfied, the standard relief is in s.165(4)/s.260(3) TCGA:

s.165(4) TCGA	**s.260(3) TCGA:**
(4) Where a claim for relief is made under this section in respect of a disposal—	Where this subsection applies in relation to a disposal—
(a) the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal, and (b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question, shall each be reduced by an amount equal to the held-over gain on the disposal.	[identical]

57.32.4 *Held-over gain*

s.165(6) TCGA	**s.260(4) TCGA:**
(6) Subject to Part II of Schedule 7 and subsection (7) below,	(4) Subject to subsection (5) below,
the reference in subsection (4) above to the held-over gain on a disposal is a reference to the	the reference in subsection (3) above to the held-over gain on a disposal is a reference to the

chargeable gain which would have accrued on that disposal apart from subsection (4) above,

and in subsection (7) below that chargeable gain is referred to as the unrelieved gain on the disposal.

chargeable gain which would have accrued on that disposal apart from this section.

57.32.5 *Actual consideration*

Section 165(7)/s.260(5) TCGA provide:

> In any case where—
> (a) there is actual consideration[62] (as opposed to the consideration equal to the market value which is deemed to be given by virtue of any provision of this Act) for a disposal in respect of which a claim for relief is made under this section, and
> (b) that actual consideration exceeds the sums allowable as a deduction under section 38,
> the held-over gain on the disposal shall be reduced by the excess referred to in paragraph (b) above.

Section 260(9) TCGA provides:

> Where subsection (3) above applies in relation to a disposal which is deemed to occur by virtue of section 71(1) or 72(1), subsection (5) above shall not apply.

Why is that needed?

57.32.6 *IHT added to base cost*

Section 260 TCGA provides:

> (7) In the case of a disposal within subsection (2)(a) above [(whether or not subsection (3) above applies in relation to it)]6 there shall be allowed as a deduction in computing the chargeable gain accruing to the transferee on the disposal of the asset in question an amount equal to whichever is the lesser of—
> (a) the inheritance tax attributable to the value of the asset; and
> (b) the amount of the chargeable gain as computed apart from this subsection.
> (8) Where an amount of inheritance tax is varied after it has been taken

[62] See App.4.2 (Consideration) and in particular App.4.4.3 (Transfer on divorce).

> into account under subsection (7) above, all necessary adjustments shall be made, whether by the making of an assessment to capital gains tax or by the discharge or repayment of such tax.

57.32.7 *Partial relief*

Section 260(10) TCGA provides:

> Where a disposal is partly within subsection (2) above, or is a disposal within paragraph (f) of that subsection on which there is a reduced charge such as is mentioned in that paragraph, the preceding provisions of this section shall have effect in relation to an appropriate part of the disposal.

57.32.8 *Making the claim*

As the claim is usually made by transferor and transferee, it is a freestanding claim, not made in the transferor's tax return.[63] There is an official form.[64] It seems that this form is also intended for use when the claim is made by the transferor alone.

57.33 Land-asset hold-over relief

The drafting is dense, and some readers may think, obtuse. The drafter was particularly fond of referential definitions, and of incorporating provisions with amendments. I expand the latter, thus setting the provision out in full, for the benefit of readers who do not possess instant recall of all the relevant provisions.

57.33.1 *"Land-asset"*

The statute frequently refers to assets "within s.1A(3)(b) or (c) TCGA". That means UK land or land-rich assets. I refer to that as a **"land-asset"**, and the gain on the disposal of a land-asset is a **"land-gain"**.

57.33.2 *Land disposal: non-residence condition*

The statute uses the clumsy expression "direct or indirect disposal of UK land which meets the non-residence condition." Section 165(7D)/260(6ZD) TCGA provide a clumsy referential definition of this term:

> For the purposes of subsections [subsections (7A) to (7C)/(6ZA) to

[63] See 123.6 (Free-standing claims).

[64] *https://www.gov.uk/government/publications/relief-for-gifts-and-similar-transactions-hs295-self-assessment-helpsheet*

> (6ZC)] a disposal is a "direct or indirect disposal of UK land which meets the non-residence condition" if it is—
>
> (a) a disposal on which a gain accrues that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection [land/land-rich asset], or
>
> (b) a disposal on which a gain accrues that falls to be dealt with by section 1A(1) in accordance with section 1G(2) [split years] because the asset disposed of is within section 1A(3)(b) or (c) [land/land-rich asset].

In short, this applies to a disposal of a land-asset by a non-resident.

The definition only applies for s.165/s.260, so it has to be repeated verbatim in s.261ZA(6) TCGA.

57.34 Land-asset: Resident transferee

s.165 TCGA	**s.260 TCGA**
(7A) Subsections (7B) and (7C) apply in any case where	(6ZA) Subsections (6ZB) and (6ZC) apply in any case where—
(a) the disposal is a direct or indirect disposal of UK land which meets the non-residence condition [disposal of land/land-rich asset by non-resident], and (b) the transferee is resident in the UK.	[identical]

If these conditions are met, the provisions of s.165/260 are amended as follows:

s.165 TCGA	**s.260 TCGA**
(7B) Subsections (4) and (6) have effect in relation to the disposal as if the references to "chargeable gain" were references to "so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (7D)(a) or (b)"	(6ZB) Subsections (3) and (4) have effect in relation to the disposal as if the reference to "chargeable gain" were a reference to "so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (6ZD)(a) or (b)".
(7C) Subsection (7) has effect in relation to the disposal as if the	(6ZC) Subsection (5) has effect in relation to the disposal as if the

reference to “the excess referred to in paragraph (b) above” were a reference to [“so much of the gain mentioned in subsection (7B)]10 which, ignoring this section and section 17(1), would accrue to the transferor on the disposal”.	reference to “the excess referred to in paragraph (b) above” were a reference to “so much of the gain mentioned in subsection (6ZB) which, ignoring this section and section 17(1), would accrue to the transferor on the disposal”.

Amended as ss 7B/6ZB require, s.165(4)/s.260(3) TCGA provide:

s.165 TCGA	**s.260 TCGA**
(4) Where a claim for relief is made under this section in respect of a disposal—	(3) Where this subsection applies in relation to a disposal—
(a) the amount of ~~any chargeable gain~~ so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (7D)(a) or (b) which, apart from this section, would accrue to the transferor on the disposal, and	(a) the amount of ~~any chargeable gain~~ so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (6ZD)(a) or (b) which, apart from this section, would accrue to the transferor on the disposal, and
(b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question,	[identical]
shall each be reduced by an amount equal to the held-over gain on the disposal.	[identical]

Amended as ss 7B/6ZB require, s.165(6)/s.260(4) TCGA provide:

s.165 TCGA	**s.260 TCGA**
Subject to Part II of Schedule 7 and subsection (7) below,	(4) Subject to subsection (5) below,
the reference in subsection (4) above to the held-over gain on a disposal is a reference to	the reference in subsection (3) above to the held-over gain on a disposal is a reference to
~~the chargeable gain~~ so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (7D)(a) or (b) which would have	~~the chargeable gain~~ so much of any gain accruing on the disposal as falls to be dealt with as mentioned in subsection (6ZD)(a) or (b) which would have

accrued on that disposal apart from subsection (4) above and (in appropriate cases) Schedule 6, and in subsection (7) below that chargeable gain is referred to as the unrelieved gain on the disposal.	accrued on that disposal apart from this section.

We therefore need to ascertain what is the "gain accruing on the disposal as falls to be dealt with as mentioned in subsection [(7D)(a) or (b)/(6ZD)(a) or (b)]". That is, in short, the gain on a land-asset disposed of by a non-resident.

In short, hold-over relief is reduced to the taxable, land-gain.

57.34.1 *Actual consideration*

Amended as s.165(7C)/s.260(6ZC) TCGA require, s.165(7)/s.260(5) provide:

> In any case where—
>
> (a) there is actual consideration (as opposed to the consideration equal to the market value which is deemed to be given by virtue of any provision of this Act) for a disposal in respect of which a claim for relief is made under this section, and
>
> (b) that actual consideration exceeds the sums allowable as a deduction under section 38,
>
> the held-over gain on the disposal shall be reduced by ~~the excess referred to in paragraph (b) above~~ so much of the gain mentioned in subsection [(7B)/(6ZB)] which, ignoring this section and section 17(1), would accrue to the transferor on the disposal.

57.35 Non-resident transferee

Section 166(1)/s.261(1) TCGA disallow standard hold-over relief on a gift to a non-resident transferee:

s.166 TCGA	**s.261 TCGA**
(1) Subject to section 167A, section 165(4) shall not apply where the transferee is not resident in the UK.	Subject to section 261ZA, section 260(3) shall not apply where the transferee is not resident in the UK.

That makes sense because a non-resident transferee would not be generally subject to CGT on the held-over gain, in the event of a later disposal. But UK land is different, so s.167A/s.261ZA TCGA provide different rules.

57.35.1 *Relevant gain*

For the definition, one needs to read together s.167A(6)(7)/s.261ZA(6)(7)

TCGA:

> (6) For the purposes of this section, a disposal is a "direct or indirect disposal of UK land which meets the non-residence condition" if it is—
> (a) a disposal on which a gain accrues that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection [land/land-rich asset], or
> (b) a disposal on which a gain accrues that falls to be dealt with by section 1A(1) in accordance with section 1G(2) [split year] because the asset disposed of is within section 1A(3)(b) or (c) [land/land-rich asset].
> (7) For the purposes of this section, a "relevant gain" means so much of any chargeable gain accruing on a disposal as falls to be dealt with as mentioned in subsection (6)(a) or (b).

In my terminology, the relevant gain is the land-gain.

57.35.2 *Disposal by UK resident to non-resident*

s.167A(1) TCGA	**s.261ZA(1) TCGA**
(1) This section applies where [A] the disposal in relation to which a claim could be made under section 165 is [i] a disposal of an asset within section 1A(3)(b) or (c)[land/land-rich asset] [ii] to a transferee who is not resident in the UK and,	(1) This section applies where [A] the disposal in relation to which a claim could be made under section 260 is [i] a disposal of an asset within section 1A(3)(b) or (c) [land/land-rich asset] [ii] to a transferee who is not resident in the UK and,
[B] ignoring section 165— (a) a gain would accrue to the transferor on the disposal, and (b) on the assumption that the disposal is a direct or indirect disposal of UK land which meets the non-residence condition (whether or not that is the case),	[B] ignoring section 260— (a) a gain would accrue to the transferor on the disposal, and (b) on the assumption that the disposal is a direct or indirect disposal of UK land which meets the non-residence condition (whether or not that is the case),
that gain would be a relevant gain (see subsections (6) and (7)).	that gain would be a relevant gain (see subsections (6) and (7)).

In these circumstances, s.167A(2)/s.261ZA(2) modify the standard hold-over relief:

Section 165(4) has effect in relation to the disposal as if it read—	(2) Section 260(3) has effect in relation to the disposal as if it read—

It may be helpful to contrast the standard reliefs and the land-asset reliefs:

Standard s.165 relief: s.165(4)	**Land-asset s.165 relief: s.167A(4)**
(4) Where a claim for relief is made under this section in respect of a disposal—	(4) Where a claim for relief is made under this section in respect of the disposal,
(a) the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal, and (b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question, shall each be reduced by an amount equal to the held-over gain on the disposal.	the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal, shall be reduced by an amount equal to the held-over gain on the disposal.
Standard s.260 relief: s.260(3)	**Land-asset s.260 relief: s.261ZA(2)**
Where this subsection applies in relation to a disposal—	Where this subsection applies in relation to a disposal,
(a) the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal, and	the amount of any chargeable gain which, apart from this section, would accrue to the transferor on the disposal,
(b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question,	

shall each be reduced by an amount equal to the held-over gain on the disposal.	shall be reduced by an amount equal to the held-over gain on the disposal.

57.35.3 *Disposal by non-resident to non-resident*

s.167A(3)	**s.261ZA(3)**
Where the disposal is a direct or indirect disposal of UK land which meets the non-residence condition—	[identical]
(a) section 165(4), as modified by subsection (2) of this section, has effect in relation to the disposal as if the reference to "chargeable gain" were a reference to "relevant gain", (b) section 165(6) has effect in relation to the disposal as if the references to "chargeable gain" were references to "relevant gain", and	(a) section 260(3), as modified by subsection (2) of this section, and section 260(4) have effect in relation to the disposal as if the references to "chargeable gain" were references to "relevant gain", and
(c) section 165(7) has effect in relation to the disposal as if the reference to "the excess referred to in paragraph (b) above" were a reference to "the relevant gain which, ignoring this section and section 17(1), would accrue to the transferor on the disposal".	(b) section 260(5) has effect in relation to the disposal as if the reference to "the excess referred to in paragraph (b) above" were a reference to "the relevant gain which, ignoring this section and section 17(1), would accrue to the transferor on the disposal".

Amended as these provisions require:

s.165(4) TCGA	**s.260(3) TCGA:**
(4) Where a claim for relief is made under this section in respect of a disposal—	Where this subsection applies in relation to a disposal—
the amount of any ~~chargeable gain~~ relevant gain which, apart from this	[identical]
section, would accrue to the transferor	

on the disposal, and	
(b) the amount of the consideration for which, apart from this section, the transferee would be regarded for the purposes of capital gains tax as having acquired the asset in question, shall each be reduced by an amount equal to the held-over gain on the disposal.	[identical]
(6) Subject to Part II of Schedule 7 and subsection (7) below, the reference in subsection (4) above to the held-over gain on a disposal is a reference to the ~~chargeable gain~~ relevant gain which would have accrued on that disposal apart from subsection (4) above and (in appropriate cases) Schedule 63, and in subsection (7) below that ~~chargeable gain~~ relevant gain is referred to as the unrelieved gain on the disposal.	[No equivalent]
(7) In any case where— (a) there is actual consideration (as opposed to the consideration equal to the market value which is deemed to be given by virtue of section 17(1)) for a disposal in respect of which a claim for relief is made under this section, and (b) that actual consideration exceeds the sums allowable as a deduction under section 38, the held-over gain on the disposal shall be the amount by which the unrelieved gain on the disposal exceeds ~~the excess referred to in paragraph (b) above~~ the relevant gain which, ignoring this section and section 17(1), would accrue to the transferor on the disposal.	(5) In any case where— (a) there is actual consideration (as opposed to the consideration equal to the market value which is deemed to be given by virtue of any provision of this Act) for a disposal in respect of which a claim for relief is made under this section, and (b) that actual consideration exceeds the sums allowable as a deduction under section 38, the held-over gain on the disposal shall be reduced by ~~the excess referred to in paragraph (b) above~~ the relevant gain which, ignoring this section and section 17(1), would accrue to the transferor on the disposal.

57.35.4 *Disposal by transferee*

Section 167A(4)/261ZA(4) TCGA deals with the position where:

(1) A gives a land-asset to B and claims s.260 hold-over relief

(2) B later disposes of the asset.

s.167A(4) TCGA	**s.261ZA(4) TCGA**
(4) Where a claim for relief is made under section 165 in relation to the disposal mentioned in subsection (1), on a subsequent disposal by the transferee of the whole or part of the asset within section 1A(3)(b) or (c) [land/land-rich asset] which is the subject of the disposal mentioned in subsection (1), the whole or a corresponding part of the held-over gain (see section 165(6))—	Where a claim for relief is made under section 260 in relation to the disposal mentioned in subsection (1), on a subsequent disposal by the transferee of the whole or part of the asset within section 1A(3)(b) or (c) [land/land-rich asset] which is the subject of the disposal mentioned in subsection (1), the whole or a corresponding part of the held-over gain (see section 260(4))—
(a) is deemed to accrue to the transferee (in addition to any gain or loss that actually accrues on that subsequent disposal), and (b) (if that would not otherwise be the case) is to be treated as a relevant gain.	(a) is deemed to accrue to the transferee (in addition to any gain or loss that actually accrues on that subsequent disposal), and (b) (if that would not otherwise be the case) is to be treated as a relevant gain accruing on a direct or indirect disposal of UK land which meets the non-residence condition.

57.35.5 *Subsequent disposal chargeable transfer*

s.167A(5) TCGA	**s.261ZA(5) TCGA**
(5) Where the subsequent disposal mentioned in subsection (4) is (or proves to be) a chargeable transfer for inheritance tax purposes, section 165(10) has effect in relation to the disposal as if—	Where the subsequent disposal mentioned in subsection (4) is a disposal within section 260(2)(a), subsection (7) of that section has effect in relation to the disposal as if—
(a) the reference to "the chargeable gain accruing to the transferee on the disposal of the asset" were a reference to the chargeable gain accruing on the disposal as computed apart from subsection (4), and	(a) the reference to "the chargeable gain accruing to the transferee on the disposal of the asset" were a reference to the chargeable gain accruing on the disposal as computed apart from subsection (4), and

(b) the reference in section 165(10)(b) to “the chargeable gain” were a reference to— (i) the chargeable gain chargeable to capital gains tax by virtue of any provision of this Act accruing on the disposal, and	(b) the reference in section 260(7)(b) to “the chargeable gain” were a reference to— (i) the chargeable gain (or, where the disposal is a a direct or indirect disposal of UK land which meets the non-residence condition, the relevant gain) accruing on the disposal, and
(ii) the held-over gain deemed to accrue under subsection (4).	(ii) the held-over gain deemed to accrue under subsection (4).

Amended as s.167A(5)/s.261ZA(5) TCGA direct:

s.165(10) TCGA	**s.260(7) TCGA**
Where a disposal [in relation to which subsection (4) above applies]7 is (or proves to be) a chargeable transfer for inheritance tax purposes, there shall be allowed as a deduction in computing (for capital gains tax purposes) ~~the chargeable gain accruing to the transferee on the disposal of the asset~~ the chargeable gain accruing on the disposal as computed apart from subsection (4) in question an amount equal to whichever is the lesser of—	In the case of a disposal within subsection (2)(a) above (whether or not subsection (3) above applies in relation to it) there shall be allowed as a deduction in computing ~~the chargeable gain accruing to the transferee on the disposal of the asset~~ the chargeable gain accruing on the disposal as computed apart from subsection (4) in question an amount equal to whichever is the lesser of—
(a) the inheritance tax attributable to the value of the asset, and (b) the amount of ~~the chargeable gain~~ (i) the chargeable gain chargeable to capital gains tax by virtue of any provision of this Act accruing on the disposal, and (ii) the held-over gain deemed to accrue under subsection (4) as computed apart from this subsection, and, in the case of a disposal which, being a potentially exempt transfer, proves to be a chargeable transfer, all necessary adjustments shall be made, whether by the discharge or repayment of capital gains tax or otherwise.	(a) the inheritance tax attributable to the value of the asset; and (b) the amount of ~~the chargeable gain~~ (i) the chargeable gain (or, where the disposal is a a direct or indirect disposal of UK land which meets the non-residence condition, the relevant gain) accruing on the disposal, and (ii) the held-over gain deemed to accrue under subsection (4) as computed apart from this subsection.

57.36 Unascertainable consideration

Section 48A TCGA deals with a disposal of UK land/land rich asset for unascertainable consideration.

Section 48A(1) TCGA provides:

> This section applies where—
>
> (a) a person ("P") has made a disposal ("the original disposal") on which a relevant non-resident gain or relevant non-resident loss accrued
>
> (b) P acquired a right as the whole or part of the consideration for that disposal,
>
> (c) on P's acquisition of the right, there was no corresponding disposal of it, and
>
> (d) the right is a right to unascertainable consideration (see subsections (4) to (6)).

If these conditions are met, we move on towards the rule in s.48A(2) TCGA:

> If
>
> [a] P subsequently receives consideration ("the ascertained consideration") representing the whole or part of the [unascertained] consideration referred to in subsection (1)(d) and
>
> [b] P is not UK resident for the tax year in which the ascertained consideration is received (as determined for the purposes of Chapter 1 of Part 1)—

We then turn to the rules where these conditions are met:

> (a) the ascertained consideration is treated as not accruing on the disposal of the right,
>
> (b) the costs of P's acquisition of the right (or, in the case of a part disposal of the right, those costs so far as referable to the part disposed of) are taken to be nil, and
>
> (c) the following steps are taken.
>
> *Step 1*
>
> Any amount by which
>
> [i] the ascertained consideration exceeds
>
> [ii] the relevant original consideration[65]

[65] Section 48A(3) TCGA provides: "In step 1 in subsection (2), "the relevant original consideration" means the consideration accruing on the original disposal, so far as

> is treated as consideration (or further consideration) accruing on the original disposal.
>
> If the relevant original consideration exceeds the ascertained consideration, the consideration accruing on the original disposal is treated as reduced by the amount of the excess.
>
> *Step 2*
>
> Compute the difference that the adjustment under step 1 makes to what (if any) relevant non-resident gain or relevant non-resident loss or loss or other gain or loss accrues on the original disposal (computing this separately for each type of gain or loss).
>
> The difference is "positive" if a loss is decreased (to nil or otherwise) or a gain created or increased.
>
> The difference is "negative" if a gain is reduced (to nil or otherwise) or a loss created or increased.
>
> *Step 3*
>
> Any positive amount computed under step 2 is treated for the purposes of this Act and the Management Act [TMA] as a gain (of the type appropriate to the computation) accruing to P at the time of the receipt of the ascertained consideration.
>
> Any negative amount computed under step 2 is treated for the purposes of this Act and the Management Act as a loss (of the type appropriate to the computation) accruing to P at the time of the receipt of the ascertained consideration.

Could the gain on the disposal of the right to unascertainable consideration qualify for DT relief, on the grounds that it is not a gain derived from the alienation of UK land?

57.36.1 *Unascertainable*

Section 48A(4) TCGA provides:

> A right is a right to unascertainable consideration if, and only if—
>
> (a) it is a right to consideration the amount or value of which is unascertainable at the time when the right is conferred, and
>
> (b) that amount or value is unascertainable at that time on account of its being referable, in whole or in part, to matters which are uncertain at that time because they have not yet occurred. This subsection is subject to subsections (5) and (6).

referable to the right mentioned in subsection (1)(b) (or, in the case of a part disposal of the right, referable to the part disposed of)."

Section 48A(5) TCGA provides:

> The amount or value of any consideration is not to be regarded as being unascertainable by reason only—
>
> (a) that the right to receive the whole or any part of the consideration is postponed or contingent, if the consideration or, as the case may be, that part of it is, in accordance with section 48, brought into account in the computation of the gain accruing to a person on the disposal of an asset, or
>
> (b) in a case where the right to receive the whole or any part of the consideration is postponed and is to be, or may be, to any extent satisfied by the receipt of property of one description or property of some other description, that some person has a right to select the property, or the description of property, that is to be received.

In these circumstances s.48 TCGA applies; it has priority over s.48A. See 56.4.3 (Section 48 analysis).

Section 48A(6) TCGA provides:

> A right is not to be taken to be a right to unascertainable consideration by reason only that either the amount or the value of the consideration has not been fixed, if—
>
> (a) the amount will be fixed by reference to the value, and the value is ascertainable, or
>
> (b) the value will be fixed by reference to the amount, and the amount is ascertainable.

57.36.2 *"Relevant gain/loss"*

Section 48A(7) TCGA provides:

> In this section—
>
> "relevant non-resident gain" means—
>
> (a) a gain that falls to be dealt with by section 1A(3) because the asset disposed of is within paragraph (b) or (c) of that subsection [land/land-rich asset], or
>
> (b) a gain that falls to be dealt with by section 1A(1) in accordance with section 1G(2) [split year] because the asset disposed of is within section 1A(3)(b) or (c) [land/land-rich asset], and
>
> "relevant non-resident loss" means an allowable loss accruing on a disposal which, had a gain accrued instead, would have been a relevant non-resident gain.

57.36.3 *Application to corporation tax*

CIOT say:[66]

> it is unclear whether s.48A applies only for the purposes of CGT (ie not corporation tax) on the basis that s.48A(7)(a) refers only to s.1A(3).[67]

It is difficult to see why the rules for CGT and CT should differ.[68] On the other hand, it may seem difficult to construe the reference to s.1A(3) to include other provisions. But a purposive construction will take us there, and the better view is that s.48A applies for CT. Perhaps in due course s.48A will be amended.

57.36.4 *Pre-2019 disposal*

The text set out above includes the amendments made by para 27 sch 1 FA 2019. Para 27 provides:

> (5) The amendments made by this paragraph have effect where the ascertained consideration is received on or after 6 April 2019, but, subject to the following modifications, in a case where the original disposal was made before that date.
> (6) In that case, section 48A of TCGA 1992—
> (a) has effect without the amendments made by sub-paragraphs (2) and (3)(b), and
> (b) has effect as if, in step 3 in subsection (2)(c) of that section, for "(of the type appropriate to the computation)" (in both places) there were substituted "(of a kind most closely corresponding to that accruing on the original disposal)".

This will not often apply now.

57.37 Residential property gain

57.37.1 *Residential property gain: outline*

This term matters for:

Topic	**See para**
UK-land rebasing	57.15

[66] CIOT, letter to HMRC 31 Oct 2023 re the UK/Luxembourg DTA *https://www.tax.org.uk/ref1240*

[67] See 57.2 (Charge on land/land-rich assets); for treaty relief, see 107.25.1 (Disposal for unascertained consideration).

[68] See 56.5.1 (CGT rules applied to CT).

Rates of CGT	43.13
Private residence relief	59.1

The definition is in:

(1) sch 1B TCGA

(2) sch 4AA TCGA (which amends the sch 1B rules where there is an election out of UK-land rebasing)

Para 1(1) sch 1B TCGA provides:

> For the purposes of Chapter 1 of Part 1 "residential property gain" means so much of a chargeable gain accruing to a person on a disposal of residential property as, in accordance with paragraph 2, is attributable to that property.

This definition is for the purposes of Chapter 1 Part 1, which contain s.1-1O TCGA, which includes the provisions governing rates of CGT. The definition is incorporated by reference where needed elsewhere.

The requirements are, in short:

(1) Disposal of a residence

(2) Gain attributable to the residence

A s.3 gain attributed to a UK resident will be a residential property gain where the company disposes of residential property; but a s.87 gain is not a residential property gain, even if matched to a gain on the disposal of residential property.

57.37.2 *Gain attributed to residence*

Para 2(1) sch 1B TCGA provides:

> The proportion of a chargeable gain attributable to residential property is equal to—
>
> (a) the relevant fraction of the gain ...

Para 2(2) sch 1B TCGA provides for time apportionment:

> The relevant fraction is A/B where—
>
> A is the number of days in the applicable period on which the land to which the disposal relates consists of or includes a dwelling, and
>
> B is the total number of days in the applicable period.

57.37.3 *Mixed use of land*

Para 2(1) sch 1B TCGA provides:

> The proportion of a chargeable gain attributable to residential property is equal to ...
>
> (b) if there has been mixed use of the land to which the disposal relates on one or more days in the applicable period, the relevant fraction of the gain as adjusted, on a just and reasonable basis, to take account of the mixed use on the day or days.

Para 2(3) sch 1B TCGA provides:

> There is mixed use of land on any day on which the land consists of—
>
> (a) one or more dwellings, and
>
> (b) other land.

57.37.4 *Disposal of contract*

Para 2(4) sch 1B TCGA provides:

> If the disposal is of an interest in land subsisting under a contract for the acquisition of land consisting of or including a building that is to be constructed or adapted for use as a dwelling, that land is taken to consist of or include a dwelling throughout the applicable period.

57.37.5 *Applicable period*

Para 2(5) sch 1B TCGA provides:

> In this paragraph "the applicable period" means the period—
>
> (a) beginning with
>
> [i] the day on which the person making the disposal acquired the interest in land being disposed of
>
> [ii] or, if later, the day from which the interest in land became chargeable, and
>
> (b) ending with the day before the day on which the disposal occurs.

Para 2(6) sch 1B TCGA provides:

> For the purposes of this paragraph an interest in land became "chargeable"—
>
> (a) in any case where the disposal is of an interest in land in the UK—
>
> (i) by a person in a tax year in which the person is not UK resident, or
>
> (ii) by a person in the overseas part of a tax year which is, as respects the person, a split year,

> from 6 April 2015, and
> (b) in any other case, from 31 March 1982.

57.37.6 *2 or more acquisitions*

Para 2(7) sch 1B TCGA provides:

> If the interest in land disposed of by the person results from interests in land acquired by the person at different times, the person is regarded for the purposes of this paragraph as having acquired the interest disposed of at the time of the first acquisition.

57.38 Residential property

A residential property gain requires a disposal of residential property.

Para 1(2) sch 1B TCGA provides:

> The question whether or not a person disposes of residential property is determined in accordance with paragraphs 3 to 7.

Para 3 sch 1B TCGA provides:

> (1) For the purposes of this Schedule a person "disposes of residential property" if the person disposes of an interest in land in a case where—
> (a) the land consisted of or included a dwelling at any time falling on or after the date on which the applicable period begins,
> (b) the interest in land subsisted for the benefit of land that consisted of or included a dwelling at any time falling on or after that date, or
> (c) the interest in land subsists under a contract for the acquisition of land consisting of or including a building that is to be constructed or adapted for use as a dwelling.
> (2) No account is to be taken for the purposes of this paragraph of any time falling on (or after) the day on which the disposal is made.

This is actually a definition of "residential property" (not a definition of "disposes" as the wording might suggest).

There are two conditions or sets of conditions:

(1) Interest in land; see App 2.21 (Interest in land/chargeable interest).
(2) Conditions (a) to (c), in short, a dwelling; see App 2.22 (Dwelling/residential property).

The term "residential property gain" includes gains from a foreign residence.

57.39 Commencement

Para 120 sch 1 FA 2019 provides:

> (1) The amendments made by this Schedule have effect-
> (a) for the purposes of capital gains tax, for the tax year 2019-20 and subsequent tax years, and
> (b) for the purposes of corporation tax, for accounting periods beginning on or after 6 April 2019.
>
> (2) The amendments made by this Schedule also have effect for the purposes of corporation tax in relation to disposals made on or after 6 April 2019 (whether in their application to accounting periods beginning on, and ending on or after, that date or to later accounting periods).

57.39.1 *Pre-2019 losses*

Para 121 sch 1 FA 2019 provides:

> 121 (1) This paragraph applies to—
> (a) allowable NRCGT losses accruing to a person before 6 April 2019, and
> (b) ring-fenced ATED-related allowable losses accruing to a person before that date,
>
> so far as they have not been deducted under section 2B, 8(1)(b)(ii), 14D or 188D of TCGA 1992 (as those provisions have effect before the amendments made by this Schedule) from chargeable gains accruing before that date.
>
> (2) If losses to which this paragraph applies accrued to a company, they are deductible in accordance with section 2A(1) of TCGA 1992 as if they had accrued to the company while it was within the charge to corporation tax.
>
> (3) If losses to which this paragraph applies accrued to any other person, they—
> (a) are deductible in accordance with section 1(3) of TCGA 1992, and
> (b) are to be treated for the purposes of section 1E of TCGA 1992 as if they accrued on a disposal of assets that were within section 1A(3) of that Act.
>
> (4) In this paragraph—
> (a) the reference to allowable NRCGT losses is to be read in accordance with Schedule 4ZZB to TCGA 1992 (as that Schedule has effect before its repeal by this Schedule), and
> (b) the reference to ring-fenced ATED-related allowable losses is to be read in accordance with section 2B of that Act (as that

section has effect before its repeal by this Schedule).

57.40 Non-residents CG/CT: History

From the inception of CGT until 2013, a non-resident did not pay CGT on disposals of UK land (except in the case of a non-resident trader with a UK PE/branch).

From 2013/14 there was a charge (ATED-CGT) on companies within ATED.

From 2015/16 there was a charge (NRCGT) on non-residents, but restricted to residential property.

In the 2017/18 edition of this work, I said:

> HMRC say:
>
> > "The government believes that it is right that CGT should apply to disposals of interests in UK residential property. **The government does not intend to broaden the scope of the charge and apply CGT to disposals of interests in non-residential property.** This change is focussed on rectifying the unfairness in the system that currently allows non-residents to escape UK CGT on disposals of UK property that are or could be used as a dwellinghouse."[69]
>
> The bold font is in the original. The author rightly considered the issue an important one. But no reason is given. The claim that this rectifies "unfairness" (and is "right") is a rhetorical device which avoids answering the question while appearing to do so.
>
> There is no need to justify the taxation of non-residents on gains accruing on UK land (or indeed other UK assets). That is consistent with the general principles of international tax law.[70] Many countries with CGT (perhaps a majority) impose tax in this situation. The question is why there should be a tax on *residential* property but not on non-residential; and why an exemption for widely held companies?...
>
> Is there any other country in the world which charges non-residents on gains from residential property, but not from non-residential property? ... The fact that the rest of the world is out of step does not prove that UK policy is wrong, but it might have given pause for thought - had there been time for thought. The legislation was published in draft in

[69] NRCGT response paper para 3.9. The same point was made in the NRCGT consultation paper para 2.3: "The government does not intend to change the tax treatment for property, such as office and industrial buildings, which cannot be used as and are not in the course of being converted to a place to live."

[70] OECD Model recognises this: see 56.24.1 (Immovable property in source state).

> December 2014, and completely recast in the Finance Bill. Because of the 2015 election, the Finance Bill was published on 24 March 2015 and enacted on 26 March, without consideration or amendment. Does anyone think that law enacted in this way is likely to be stable?

Does it now matter? Readers may think it pointless to cry "foul" in a game which has no referee, and whose result is now declared. But I think the story deserves to be recorded, as a lesson in how not to legislate, and as a warning to those minded to rely on HMRC promises about future tax reform.

57.41 Non-residents CGT/IT: Critique

The 2019 extension of CGT to non-residents holding UK land and land-rich assets is in line with the policy of many, perhaps most countries.

Policy considerations in favour of the reform are fairness and additional revenue.

Policy considerations in favour of the position as it was from the inception of CGT in 1965 to 2019 are: encouragement of inward foreign investment, avoiding the lock-in effect of CGT, and simplicity.[71]

Needless to say, there has been no informed debate on the challenge of finding a balance between the conflicting policy considerations.

This is illustrative of a wider problem: CGT as a whole is

> ... a highly unsatisfactory tax. Possibly more than any other tax, it has been subject to frequent, dramatic, and often controversial changes...[72]

[71] An indication of HMRC unease concerning the complication of the land-asset rules is that the consultation response document contains no less than six claims that its proposals constitute simplification.

[72] Mirrlees Review, "Tax by Design" (2011) p.326.

CHAPTER FIFTY EIGHT

REORGANISATIONS

58.1 Reorganisations: Introduction
58.2 Reorganisation relief
58.2.1 "Reorganisation"
58.2.2 Original shares/new holding
58.2.3 Allotment
58.2.4 Share alteration
58.2.5 Reduction of share capital
58.3 Share-for-share relief
58.4 Share issue/cancellation relief
58.5 Transfer of business relief
58.6 CGT reorganisation TAAR
58.6.1 Commercial reasons
58.6.2 CGT avoidance
58.7 Redomiciled (ex-UK) securities
58.7.1 Material interest
58.7.2 Minor definitions
58.7.3 Deemed UK situs for CGT
58.7.4 Election to disapply s.135/136
58.7.5 Deemed non RFI
58.7.6 Commencement

58.1 Reorganisations: Introduction

Corporate restructuring is a topic of "immense complexity"[1]. This chapter considers the CGT issues in the round, though with special consideration to residence aspects, and the reorganisation TAAR, because cases on that TAAR shed light on other TAARs.

We should start with an index of the statutory provisions, for the purposes of navigation:

TCGA	**Topic**
Definitions	
s.126	Reorganisation
s.126	Original shares/new holding
sch 5AA	Scheme of reconstruction
Reliefs	
s.116	Reorganisation involving qualifying corporate bonds
s.127	Reorganisation
s.135	Exchange of shares[2] for shares
s.136	Reconstruction + shares issued/cancelled

[1] The words are from *Taxation of Companies & Company Reconstructions* (looseleaf) para W1.1.1.

[2] References to shares here include debentures.

s.139	Reconstruction + transfer of business
TAARs restricting reliefs	
s.137	TAAR restricting s.135/136 reliefs
s.139(5)	TAAR restricting s.139 relief
s.138	Clearance procedure (for both TAARs)

The following topics are discussed elsewhere:

Topic	**See para**
Reorganisation & remittance investment relief	19.13.2
CGT group relief	64.24
QCB of non-resident co	64.33

Other taxes also need consideration; IHT[3] and Stamp duty/SDRT (not considered here).

58.2 Reorganisation relief

Section 127 TCGA provides:

> [1] Subject to sections 128 to 130,
> [2] a reorganisation shall not be treated as involving
> [a] any disposal of the original shares or
> [b] any acquisition of the new holding or any part of it,
> [3] but the original shares (taken as a single asset) and the new holding (taken as a single asset) shall be treated as the same asset acquired as the original shares were acquired.

58.2.1 *"Reorganisation"*

Section 126 TCGA provides:

> (1) For the purposes of this section and sections 127 to 131 "reorganisation" means a reorganisation or reduction of a company's share capital ...

58.2.2 *Original shares/new holding*

Section 126 TCGA continues:

> and in relation to the reorganisation—
> (a) "original shares" means shares held before and concerned in the reorganisation,
> (b) "new holding" means, in relation to any original shares, the shares in and debentures of the company which as a result of the

[3] See 81.7 (Change in share capital/rights).

> reorganisation represent the original shares (including such, if any, of the original shares as remain).

58.2.3 *Allotment*

Section 126(2) TCGA provides:

> The reference in subsection (1) above to the reorganisation of a company's share capital includes—
>
> (a) any case where persons are, whether for payment or not, allotted shares in or debentures of the company in respect of and in proportion to (or as nearly as may be in proportion to) their holdings of shares in the company or of any class of shares in the company...

58.2.4 *Share alteration*

Section 126(2) TCGA provides:

> The reference in subsection (1) above to the reorganisation of a company's share capital includes ...
>
> (b) any case where there are more than one class of share and the rights attached to shares of any class are altered.

58.2.5 *Reduction of share capital*

Section 126(3) TCGA provides:

> [a] The reference in subsection (1) above to a reduction of share capital does not include the paying off of redeemable share capital, and
>
> [b] where shares in a company are redeemed by the company
>
> [i] otherwise than by the issue of shares or debentures (with or without other consideration) and
>
> [ii] otherwise than in a liquidation,
>
> the shareholder shall be treated as disposing of the shares at the time of the redemption.

58.3 Share-for-share relief

Section 135(1) TCGA provides:

> This section applies in the following circumstances where a company ("company B") issues shares or debentures to a person in exchange for shares in or debentures of another company ("company A").

I refer to this as a **"share-for-share exchange"**. Thus there are three *dramatis personae*:

Company A (whose shares are transferred to company B)
Company B (who issues its shares to the person)
The person ("X") (to whom company B shares are issued)

The circumstances are in short:

Case	**Circumstance**
1	B acquires more than 25% ordinary share capital
2	General offer
3	B acquires more than half of the votes

In full detail, s.135(2) TCGA provides:

> The circumstances are:
> *Case 1*
> Where company B holds, or in consequence of the exchange will hold, more than 25% of the ordinary share capital[4] of company A.
> *Case 2*
> Where company B issues the shares or debentures in exchange for shares as the result of a general offer—
> (a) made to members of company A or any class of them (with or without exceptions for persons connected with company B), and
> (b) made in the first instance on a condition such that if it were satisfied company B would have control of company A.
> *Case 3*
> Where company B holds, or in consequence of the exchange will hold, the greater part of the voting power in company A.

On the question of to whom shares in the form of depositary receipts are issued, see 71.5 (Other CGT issues).

If these conditions are met, we move on to the relief. Section 135(3) TCGA provides:

> Where this section applies, sections 127 to 131 (share reorganisations etc) apply with the necessary adaptations as if company A and company B were the same company and the exchange were a reorganisation of its share capital.

[4] Defined s.135(4) TCGA: "In this section "ordinary share capital" has the meaning given by section 1119 of CTA 2010 and also includes—
(a) in relation to a unit trust scheme, any rights that are treated by section 99(1)(b) of this Act (application of Act to unit trust schemes) as shares in a company, and
(b) in relation to a company that has no share capital, any interests in the company possessed by members of the company."

I refer to this as **"share-for-share relief"**.

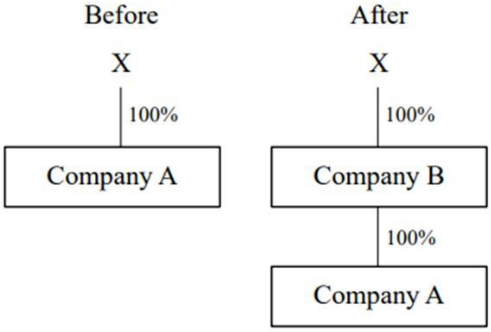
There are two important features of a share-for-share exchange:

(1) The base cost of the shares in company A (in the hands of company B, which acquires them) is their market value at the time of the acquisition, so CGT on a subsequent disposal is limited to any future increase in value. One might describe that CGT rebasing. This was the rule which offered (or seemed to offer) a tax advantage in *Furniss v Dawson*. But the CGT reorganisation TAAR restricts the CGT advantage.

(2) The new shares in company B are issued for full consideration and so IT on a purchase of own shares is limited to any future increase in value. One might describe that as rebasing for IT. But the TiS rules restrict the IT advantage.[5]

The paradigm example of a share-for-share exchange is a transaction (a hive-down) where X (who holds all the shares in company A) transfers them to a new company (company B) in exchange for an issue of shares in company B:

Hive-down



Note that companies A and B need not be incorporated in the UK, and X need not be UK resident.

58.4 Share issue/cancellation relief

Section 136(1) TCGA provides share issue/cancellation relief:

[5] See 55.14.5 (Sale for irredeemable shares).

This section applies where—

Three conditions, or sets of conditions, then follow:

(a) an arrangement between a company ("company A") and—
   (i) the persons holding shares in or debentures of the company, or
   (ii) where there are different classes of shares in or debentures of the company, the persons holding any class of those shares or debentures,

   is entered into for the purposes of, or in connection with, a scheme of reconstruction, and

(b) under the arrangement—
   (i) another company ("company B") issues shares or debentures to those persons in respect of and in proportion to (or as nearly as may be in proportion to) their relevant holdings in company A, and
   (ii) the shares in or debentures of company A comprised in relevant holdings are retained by those persons or are cancelled or otherwise extinguished.

If these conditions are met, we move on to the relief. Section 136 TCGA provides:

(2) Where this section applies—
   (a) those persons are treated as exchanging their relevant holdings in company A for the shares or debentures held by them in consequence of the arrangement, and
   (b) sections 127 to 131 (share reorganisations etc) apply with the necessary adaptations as if company A and company B were the same company and the exchange were a reorganisation of its share capital.

For this purpose shares in or debentures of company A comprised in relevant holdings[6] that are retained[7] are treated as if they had been

[6] Defined in s.136(4)(b): "In this section ...
(b) references to "relevant holdings" of shares in or debentures of company A are—
   (i) where there is only one class of shares in or debentures of the company, to holdings of shares in or debentures of the company, and
   (ii) where there are different classes of shares in or debentures of the company, to holdings of a class of shares or debentures that is involved in the scheme of reconstruction (within the meaning of paragraph 2 of Schedule 5AA);

[7] Defined in s.136(4)(c): "In this section ...
(c) references to shares or debentures being retained include their being retained with altered rights or in an altered form, whether as the result of reduction,

> cancelled and replaced by a new issue.
> (3) Where a reorganisation of the share capital of company A is carried out for the purposes of the scheme of reconstruction, the provisions of subsections (1) and (2) apply in relation to the position after the reorganisation.

58.5 Transfer of business relief

Section 139(1) TCGA provides transfer of business relief:

> Subject to the provisions of this section, where—

Three conditions, or sets of conditions, then follow:

> (a) any scheme of reconstruction involves the transfer of the whole or part of a company's business to another company, and
> (b) the conditions in subsection (1A) below are met in relation to the assets included in the transfer, and
> (c) the first-mentioned company receives no part of the consideration for the transfer (otherwise than by the other company taking over the whole or part of the liabilities of the business),

If these conditions are met, we move on to the relief:

> then, so far as relates to corporation tax on chargeable gains,
> [i] the 2 companies shall be treated as if any assets included in the transfer were acquired by the one company from the other company for a consideration of such amount as would secure that on the disposal by way of transfer neither a gain nor a loss would accrue to the company making the disposal,
> [ii] and for the purposes of Schedule 2 the acquiring company shall be treated as if the respective acquisitions of the assets by the other company had been the acquiring company's acquisition of them.

The second condition relates to residence/chargeability. Section 139(1A) TCGA provides:

> The conditions referred to in subsection (1)(b) above are—
> (a) that the company acquiring the assets is resident in the UK at the time of the acquisition, or the assets are chargeable assets in relation to that company immediately after that time, and
> (b) that the company from which the assets are acquired is resident

consolidation, division or otherwise".

> in the UK at the time of the acquisition, or the assets are chargeable assets in relation to that company immediately before that time.

Section 139(1A) TCGA then provides a definition of chargeable asset:[8]

> For this purpose an asset is a "chargeable asset" in relation to a company at any time if, were the asset to be disposed of by the company at that time, any gain accruing to the company would be a chargeable gain chargeable to corporation tax as a result of section 2B(3) or (4).

It is difficult to see the point of s.139(1A)(b). The consequence seems to be that s.139 relief is not available for a non-resident company within the scope of s.3 TCGA (except for its chargeable assets). Could that have been intended?

For completeness, s.139 TCGA continues:

> (1B) Nothing in section 179(3D) prevents the two companies being treated as mentioned in subsection (1).
> (2) This section does not apply in relation to an asset which, until the transfer, formed part of trading stock of a trade carried on by the company making the disposal, or in relation to an asset which is acquired as trading stock for the purposes of a trade carried on by the company acquiring the asset.
> Section 170(1) applies for the purposes of this subsection.
> (4) This section does not apply in the case of a transfer of the whole or part of a company's business to a unit trust scheme to which section 100(2) applies or which is an authorised unit trust or to an investment trust or a venture capital trust.

58.6 CGT reorganisation TAAR

The principal reorganisation reliefs are restricted by a TAAR:

s.137(1) TCGA	**s.139(5) TCGA**
[1] Subject to subsection (2) below [de minimis exemption], and section 138 [clearance],	This section does not apply
[2] neither section 135 nor section 136 shall apply to any issue by a company of shares in or debentures	

[8] See 56.6.2 ("Chargeable" asset).

of that company in exchange for or in respect of shares in or debentures of another company	
unless the exchange or scheme of reconstruction in question	unless the reconstruction
[a] is effected for bona fide commercial reasons and	[a] is effected for bona fide commercial reasons and
[b] does not form part of a scheme or arrangements of which the main purpose, or one of the main purposes, is avoidance of liability to capital gains tax or corporation tax.	[b] does not form part of a scheme or arrangements of which the main purpose, or one of the main purposes, is avoidance of liability to corporation tax, capital gains tax or income tax;

I refer to these together as the **"CGT reorganisation TAAR"**.

Section 137(2) TCGA provides a 5% *de minimis* exemption to the s.137 TAAR:

> Subsection (1) above shall not affect the operation of section 135 or 136 in any case where the person to whom the shares or debentures are issued does not hold[9] more than 5 per cent of, or of any class of, the shares in or debentures of the second company mentioned in subsection (1) above.

Section 137(4) TCGA provides an extended power of assessment, not discussed here. Sections 138/139(5) TCGA provide a clearance procedure, not discussed here; but see 55.18.2 (Disclosure for valid clearance).

58.6.1 *Commercial reasons*

In *Snell v HMRC*[10] the facts were simple:

(1) a UK resident shareholder exchanged shares for loan notes
(2) the shareholder's intention was to leave the UK in the following tax

[9] Section 137(3) TCGA provides an anti-fragmentation rule: "For the purposes of subsection (2) above shares or debentures held by persons connected with the person there mentioned shall be treated as held by him."

[10] [2006] EWHC 3350 (Ch). For completeness, the same issue arose in *Coll v HMRC* [2010] UKUT 114 (TCC) but this case primarily concerns the factual issue of what whether the taxpayer actually intended to leave the UK at the time of the reorganisation

> year and then to dispose of the loan notes free of CGT.

The share exchange passed the commercial reasons test:

> [The taxpayer] concentrated on the reason for the issue of the loan stock, and [HMRC] on the reason for the appellant choosing loan stock rather than cash. We are not convinced that one should make a comparison with a different transaction, a sale for cash, and ask if the exchange for loan stock, rather than cash, was effected for bona fide commercial reasons. Such a comparison that can fairly easily be made for an exchange of shares for short-term loan stock but much less easily for a share for share exchange or a reconstruction (which implies continuity of ownership) or amalgamation. We consider that one should take the actual transactions carried out, here the sale of shares to a third party in exchange for three different types of loan stock, and ask whether that was carried out for bona fide commercial reasons.

This was upheld on appeal:

> The question is whether ‘the exchange in question is effected for bona fide commercial reasons’. If the answer is in the affirmative it is irrelevant to consider the reasons why the parties chose to structure their transaction in that way.[11]

In *Delinian v HMRC*:[12]

> ... one can enter into a share exchange transaction for bona fide commercial reasons even if that transaction is wholly or partly tax driven. The “tax purpose” is the subject of inquiry under the second limb, not the first.

If the main purpose of the exchange is avoidance of foreign tax, or, say, IHT, it should pass the TAAR, on the basis that:

(1) the exchange is for bona fide commercial reasons, and
(2) it does not does not form part of a scheme or arrangements of which the main purpose is avoidance of liability to CGT/CT (or IT if relevant).

On the other hand, if the main purpose of the exchange is the avoidance of (say) CGT, it will still be a bona fide commercial transaction, but fail

[11] at [12].

[12] [2023] EWCA Civ 1281 at [43]; for the facts of *Delinian*, see 3.4.1 (Test whole arrangement). This case was reported under the name *Euromoney* in the FTT and UT, because Euromoney changed its name to Delian in 2023, following a takeover.

on the second limb of the TAAR.

58.6.2 *CGT avoidance*

Snell v HMRC illustrates that point. The taxpayer's success on the commercial reasons point did not help, as the taxpayer lost on the next part of the TAAR: the purpose was tax avoidance, not mitigation:[13]

> [The taxpayer] contended that the structure of capital gains tax was not to charge tax on disposals by non-residents and so it could not be contrary to the evident intention of Parliament if a person did not pay tax by reason of non-residence. In addition, the Appellant genuinely suffered the economic consequences of becoming non-resident. [HMRC] ... contends that but for s 135 capital gains tax would be payable on the contract of sale; Parliament's purpose in enacting s 135 is to allow a person to defer paying tax until he receives cash but not to create an exemption from tax.
>
> We agree with [HMRC]. We consider that [the taxpayer's] analysis considers the absence of liability to tax of non-residents in the abstract and ignores that tax avoidance is part of a purpose test aimed at the circumstances of the particular exchange. It is one thing for a person to enter into an exchange knowing that the consequence may be that as a result of a relief (on death, setting the gain against losses or annual exemptions, becoming non-resident or non-domiciled) no tax will ultimately be paid. It is another for a person to enter into the exchange with the main purpose that no tax should be paid as a result of obtaining a particular relief in a later year. It must be within the evident intention of Parliament that reliefs may result in no tax being paid in the future. But it does not follow that it is within the evident intention of Parliament that that one can enter into an exchange with the specific purpose of deferring tax so as to obtain a particular relief in a subsequent year... In principle, if one of the Appellant's main purposes of effecting the Arrangements is that capital gains tax should not be paid because the loan stocks will be redeemed while he is non-resident, that is avoidance of liability to capital gains tax within [the CGT reorganisation TAAR].

58.7 Redomiciled (ex-UK) securities

The legislation is slotted in after s.138 and before s.138A TCGA, so the

[13] [2006] UKSPC SPC00532 at [5]-[6], approved on appeal: [2006] EWHC 3350 (Ch) at [36].

sections are numbered s.138ZA to s.138ZC.[14]

Section 138ZA(1) TCGA provides:

> Section 138ZB applies where—
> (a) section 135 or 136 applies to an issue by a company ("company B") of shares in or debentures of that company ("the exchanged shares or debentures") in exchange for or in respect of shares in or debentures of another company ("company A"),
> (b) immediately before the issue is made, company A is a close company which is incorporated in the UK (whether or not it is resident in the UK),
> (c) immediately after the issue is made, company B is a close company which is not incorporated in the UK (whether or not it is resident in the UK), and
> (d) the person to whom the exchanged shares or debentures are issued ("P") is an individual who meets the conditions in subsection (2).

One might refer to this as "redomiciliation".[15]

Section 138ZA(2) TCGA provides:

> Those conditions are that—
> (a) immediately before the issue is made, P—
> (i) has a material interest in company A, and
> (ii) is a participator in company A, and
> (b) immediately after the issue is made, P—
> (i) has a material interest in company B, and
> (ii) is a participator in company B.

The rules only apply to individuals, so does not affect shares held in a trust or company.

58.7.1 *Material interest*

Section 138ZA TCGA provides the definition. It is very similar to the definition in s.457 CTA 2010, which I discuss in 11.12.3 (Material interest), and so I do not repeat the discussion here.

Section 138ZA(3) TCGA provides

> A person has a material interest in a company for the purposes of this section if condition A or B is met.

[14] See App.13.3 (Section numbering system).

[15] See 90.59 (Redomiciliation).

From this point the wording differs from s.457. As the wording of conditions A and B is not quite identical, it may be helpful to set them side by side:

s.1338ZA(4) TCGA	**s.457(2) CTA 2010**
Condition A is that	Condition A is that
[i] the person, an associate of the person, or [ii] the person or an associate of the person together with one or more associates	[i] the person (with or without one or more associates) or [ii] any associate of that person (with or without one or more other such associates)
is— (a) the beneficial owner of, or (b) directly or indirectly able to control, more than 5% of the ordinary share capital of the company.	is— (a) the beneficial owner of, or (b) directly or indirectly able to control, more than 5% of the ordinary share capital of the company.
s.1338ZA(5) TCGA	**s.457(3) CTA 2010**
Condition B is that	Condition B is that, in the case of a close company,
[i] the person, an associate of the person, or [ii] the person or an associate of the person together with one or more associates	[i] the person (with or without one or more associates) or [ii] any associate of that person (with or without one or more other such associates)
possesses or is entitled to acquire such rights as would— (a) in the event of the winding up of the company, or (b) in any other circumstances, give an entitlement to receive more than 5% of the assets which would then be available for distribution among the participators.	possesses or is entitled to acquire such rights as would— (a) in the event of the winding up of the company, or (b) in any other circumstances, give an entitlement to receive more than 5% of the assets which would then be available for distribution among the participators.

58.7.2 *Minor definitions*

Section 138ZA TCGA provides:

> (6) Chapter 2 of Part 10 of CTA 2010 (meaning of "close company" and related terms) applies for the purposes of this section but with the omission of section 442(a) (exclusion of non-UK resident companies).
> (7) In relation to a company that has no share capital, this section applies as if—
> (a) references to shares in, or debentures of, the company included any interests of the company possessed by members of the company, and
> (b) the reference in subsection (4) to the ordinary share capital of the company were to all such interests.
> (8) In this section "ordinary share capital" has the meaning it has in the Corporation Tax Acts (see section 1119 of CTA 2010).

58.7.3 *Deemed UK situs for CGT*

Section 138ZB TCGA provides:

> (1) Where this section applies (see section 138ZA), a security falling within subsection (2) is to be treated for the purposes of this Act as situated in the UK (whether or not it would otherwise be so treated) if—
> (a) it is held by P, other than as a result of a disposal of the security by P's spouse or civil partner ("S") to P to which section 58 (no loss or gain on disposals between spouses or civil partners) did not apply, or
> (b) is held by S, other than as a result of a disposal of the security by P to S to which that section did not apply.

I refer to securities within ss(2) as **"redomiciled (ex-UK) securities"**. Section 138ZB(2) TCGA provides:

> Those securities are as follows—
> (a) the exchanged shares or debentures;
> (b) a security of company B acquired by P on or after the day on which the exchanged shares or debentures are issued;
> (c) where—
> (i) there is a repo (within the meaning of section 263A) in respect of a security, and
> (ii) that security falls within any of the paragraphs of this subsection (including this paragraph), any similar security (see section 263AA(5) and (6)) that P, or a person connected with P, buys back under the repo;
> (d) where—
> (i) P transfers a security to another person under a stock lending arrangement (within the meaning of section 263B),

and

(ii) that security falls within any of the paragraphs of this subsection (including this paragraph),

any security of a similar description (see section 263B(6)) transferred back to P under the arrangement;

(e) a security of a company issued to P where—

(i) the security is issued in exchange for, or in respect of, another security,

(ii) section 135 or 136 applies to that issue,

(iii) the other security falls within any of the paragraphs of this subsection (including this paragraph), and

(iv) P has a material interest in the company (within the meaning of section 138ZA(3));

(f) where a security of a company, other than company B, falls within paragraph (e), a security of that company acquired by P on or after the first day on which a security of that company fell within that paragraph.

(3) For the purposes of paragraphs (b), (f) and (e) of subsection (2), it does not matter whether or not—

(a) consideration was given for the security acquired by P, or

(b) the security acquired by P is of a different class from the exchanged shares or debentures.

(4) If S acquires a security falling within subsection (2) as a result of a disposal by P to which section 58 applies, subsections (2) and (3) have effect, from the time of its acquisition by S (whether or not S continues to hold it), as if every reference to "P" were to "P or S".

(5) In this section—

"company B", "P", and "the exchanged shares or debentures" are to be construed in accordance with section 138ZA;

"security" means—

(a) shares in, or debentures of, a company, or

(b) interests of a company that has no share capital that are possessed by members of the company.

58.7.4 *Election to disapply s.135/136*

Section 138ZC TCGA provides:

(1) This section applies where section 138ZB would, but for an election under this section, apply in relation to the issue by a company of shares in or debentures of that company in exchange for, or in respect of, shares in or debentures of another company.

(2) The person to whom the shares or debentures are issued may elect

for section 135 or 136 not to apply to the issue, and accordingly—

(a) the exchange or scheme of reconstruction in question will not be treated as a reorganisation within the meaning of section 126, and

(b) section 138ZB will not apply in relation to the issue. (3) An election under this section must be made on or before the first anniversary of the 31 January following the tax year in which the shares or debentures are issued.

58.7.5 *Deemed non RFI*

Section 830(3A) ITTOIA provides:

> "Relevant foreign income" does not include income paid in respect of a security, within the meaning of section 138ZB of TCGA 1992, if—
>
> (a) the security is treated, for the purposes of that Act, as situated in the UK as a result of section 138ZB of that Act, and
>
> (b) that section applies in respect of the security as a result of an issue of shares in or debentures of a company in exchange for, or in respect of, shares in or debentures of another company that is incorporated, and is resident, in the UK.

The significance is that income of redomiciled (ex-UK) securities in the hands of the individual holder of the securities does not qualify for the remittance basis.

58.7.6 *Commencement*

Section 36 F(no.2) A 2023 provides:

> (4) The amendments made by subsections (2) and (3) [inserting s.138ZA - 138ZC) have effect in relation to an issue of shares or debentures made on or after 17 November 2022.
>
> (6) The amendment made by subsection (5) [inserting s.830(3A)] is treated as having come into force on 17 November 2022.

However where a redomiciliation took place before 17 November 2022, it is likely to be within the reorganisation TAAR, so reorganisation relief would not apply.

CHAPTER FIFTY NINE

RESIDENTIAL PROPERTY: CGT

59.1 Private residence relief
59.2 "Residence"
59.2.1 Private residence/territory-residence
59.2.2 Period of occupation
59.2.3 Mere temporary accommodation
59.2.4 Physical occupation
59.2.5 Interest in dwelling
59.2.6 Garden or grounds
59.2.7 Period of ownership
59.2.8 Inter-spouse transfer
59.3 Non-residents PRR disallowance
59.3.1 Introduction
59.3.2 Outline
59.3.3 The disallowance
59.3.4 "Non-qualifying tax year"
59.3.5 Partial tax years
59.4 Residence in territory of house
59.4.1 Residence condition A
59.4.2 Residence condition B
59.5 Day count test
59.5.1 Ownership in part of year
59.5.2 Days spent
59.5.3 Qualifying house
59.6 MPR notice
59.6.1 Power to make MPR notice
59.6.2 Time limit for notice
59.6.3 Period notice applies
59.6.4 Variation of MPR notice
59.6.5 Form of MPR notice
59.6.6 Procedure on receipt of notice
59.6.7 MPR notice under regime
59.7 Which is main residence
59.8 Spouses
59.9 MPR notice on marriage
59.9.1 MPR notice by spouses
59.10 Periods of absence relief
59.10.1 Permitted periods of absence
59.11 2015 transitional rules
59.12 Residence held by trust or PRs
59.13 Commencement of PRR rules
59.13.1 Pre-2015/16 years

59.1 Private residence relief

A full discussion of private residence relief ("PRR") requires a book to itself, and indeed such books have been written. This chapter focuses on matters closest to the themes of this book, but it is necessary to look wider to see the matter in its context.

I do not consider the topics of:

- job-related accommodation
- relief where part of the residence has been let: s.223B TCGA
- disposals by disabled persons or persons in care homes: s.225E TCGA
- relief where delay in moving into property: s.223ZA TCGA
- restriction on relief following a holdover claim: s.226A TCGA
- date of payment of residential property gains

FA 2020 made the following changes:

- Reducing final period exemption from 18 months to 9 months
- Amending lettings relief so that relief is only available where the owner remains in shared occupancy with the tenant.
- Extending job related accommodation relief for the armed forces
- Legislating extra-statutory concessions D21 and D49
- Amending rules for inter spouse transfer of residential property interests

For the background to these changes, see HMRC policy paper, “Changes to ancillary reliefs in Capital Gains Tax Private Residence Relief”.[1]

59.2 “Residence”

Section 222(1) TCGA provides:

> This section applies to a gain accruing to an individual so far as attributable to the disposal of, or of an interest in—
> (a) a dwelling-house or part of a dwelling-house which is, or has at any time in his period of ownership been, his only or main residence, or
> (b) land which he has for his own occupation and enjoyment with that residence as its garden or grounds up to the permitted area.

Residence (in the sense of private-residence[2]) is a key term for PRR.

The meaning is the same as “home” and so discussion on the meaning of “home” may be relevant here.[3]

[1] *https://www.gov.uk/government/publications/changes-to-ancillary-reliefs-in-capital-gains-tax-private-residence-relief/changes-to-ancillary-reliefs-in-capital-gains-tax-private-residence-relief* (July 2019).

[2] See 6.1 (Concepts of residence).

[3] See 6.21.3 (Home/residence compared).

59.2.1 *Private residence/territory-residence*

The CG Manual provides:

> **CG64455 Meaning of residence in a wider context** [Jul 2019]
> Outside the field of taxation there are many circumstances in which the identification of an individual's residence is important. Whilst the word must be construed by reference to its particular context, the use of the word in a similar context to that with which we are concerned assists in the interpretation to be used for private residence relief.
>
> One such example is the identification of the constituency in which an individual is resident for the purpose of voting. Under the Representation of the People Act 1948, entitlement to vote was given to persons resident in a constituency on a qualifying date. In the case of *Fox v Stirk, Ricketts v Registration Officer for the City of Cambridge* [1970] 3 All ER 7 the Court of Appeal considered whether students should be resident in the constituency of the University that they attended. In his judgment, Lord Denning M.R. cited a passage from the speech of Viscount Cave L.C. in *Levene v IRC* [1928] AC 217
>
> > "... the word 'reside' is a familiar English word and is defined in the Oxford English Dictionary as meaning 'to dwell permanently or for a considerable time, to have one's settled or usual abode, to live in or at a particular place'."
>
> Lord Denning went on to say
>
> > "I derive three principles. The first is that a man can have two residences. He can have a flat in London and a house in the country. He is resident in both. The second principle is that temporary presence at an address does not make a man resident there. A guest who comes for the weekend is not resident. A short stay visitor is not resident. The third principle is that temporary absence does not deprive a person of his residence. If he happens to be away for a holiday or away for the weekend or in hospital, he does not lose his residence on that account."
>
> Further to this Lord Widgery commented,
>
> > "This conception of residence is of a place where a man is based or where he continues to live, the place where he sleeps and shelters and has his home. It is imperative to remember in this context that 'residence' implies a degree of permanence. In the words of the Oxford English Dictionary, it is concerned with something which will go on for a considerable time. Consequently a person is not entitled to claim to be a resident at a given town merely because he pays a short, temporary visit. Some assumption of permanence, some degree of continuity, some expectation of continuity, is a vital factor which turns

> simple occupation into residence."
>
> These comments are regarded as equally applicable to private residence relief and were relied on in the case of *Goodwin v Curtis*, see CG64460.

Now, *Fox* and *Levine* are territory-residence cases. It seems to me one should not segue so lightly from the concepts of territory-residence (or tax residence) to private residence; the word is identical but the concepts are different.[4] But no doubt just as one has to live in a country for it to become one's territory-residence, one also has to live in a dwelling in order for it to become one's private residence. The same conclusion would have been reached even without referring to authority.

The reader may ask whether the reasoning matters, as the conclusion is clear. Perhaps not much. But it is good to know what one is talking about.

59.2.2 *Period of occupation*

If a residence is "a place where somebody lives", the question arises how long they have to live there for it to qualify as their residence.

The CG Manual provides:

> **CG64435 Meaning of residence: judicial interpretation** [Jul 2019]
>
> There is no minimum period of occupation that would enable an individual to establish a residence. This was confirmed by Millet J in *Moore v Thompson* (61 TC 15) where he stated,
>
> "It is clear that the Commissioners were alive to the fact that even occasional and short residence in a place can make that a residence; but the question was one of fact and degree for the Commissioners."
>
> Every case must be decided upon its own particular facts.

59.2.3 *Mere temporary accommodation*

The CG Manual provides:

> **CG64460 Meaning of residence: Goodwin v Curtis** [Jul 2019]
>
> The meaning of the word 'residence' was considered further in the case of *Goodwin v Curtis* (70 TC 478).
>
> In 1983 Mr Goodwin set up a company to acquire Hazleton Manor Farmhouse. At that time he was buying it with a view to making it a home for himself and his family. On 1 April 1985 Mr Goodwin

[4] See 6.1 (Concepts of residence).

acquired the farmhouse from the company, but prior to the completion of his purchase he had instructed agents to sell the farmhouse. At the time of his acquisition he had separated from his wife and he took up temporary residence in the farmhouse until 3 May 1985 when the farmhouse was sold. Mr Goodwin contended that the farmhouse was his only or main residence.

In the High Court, Sir John Vinelott drew heavily on the observations of Lord Denning and Widgery L.J. in *Fox v Stirk, Ricketts v Registration Officer for the City of Cambridge* [1970] 3 All ER 7, and he also quoted with approval the line taken by Brightman J in *Sansom v Peay* (52 TC 1).

Sir John said,

> "Amongst the factors to be weighed by the Commissioners are the degree of permanence, continuity and the expectation of continuity. ... in my judgment, they were fully entitled to take the view that the farmhouse was used not as a residence but as mere temporary accommodation for a period that the taxpayer hoped would be brief and which in fact lasted some 32 days between completion of the sale to him and the completion of the sale by him."

The Court of Appeal upheld the decision of the Commissioners and the High Court that Mr Goodwin had not established a residence in the farmhouse; it had merely provided temporary accommodation. Millett L J stated in the Court of Appeal,

> "What I derive from Viscount Cave's speech is that the word 'reside' is an ordinary word of the English language and is eminently suitable for a lay tribunal such as the General Commissioners to apply."

He went on,

> "they (the Commissioners) must be taken to have accepted the Revenue's submission that the quality of the taxpayer's occupation of the farmhouse did not have a sufficient degree of permanence, continuity or expectation of continuity to justify its description as residence."

And later,

> "Temporary occupation at an address does not make a man resident there. The question whether the occupation is sufficient to make him resident is one of fact and degree for the Commissioners to decide."

He went on to say,

> "The substance of the Commissioners' finding taken as a whole, in my judgment, is that the nature, quality, length and circumstances of the taxpayer's occupation of the Farmhouse did not make his occupation qualify as residence."

Schiemann LJ added,

> I agree with the judgment that has just been delivered. I accept, as did the Commissioners, the Crown's contention that in order to qualify for the relief a taxpayer must provide some evidence that his residence in the property showed some degree of permanence, some degree of continuity or some expectation of continuity.

59.2.4 *Physical occupation*

The CG Manual provides:

> **CG64465 Occupation is a requirement** [Jul 2019]
> Except in those cases where the legislation deems a dwelling house to be the residence of an individual which are summarised at CG64477, a dwelling house must have been physically occupied as a residence of the individual at some time during their period of ownership in order to qualify for relief.
> It is sometimes argued that private residence relief is due where an individual has acquired a dwelling house with the intention of making it their home, but for reasons outside their control they were forced to sell it without ever having occupied it. In these circumstances relief is not available; an intention to occupy is not enough.
> The requirement to physically occupy the dwelling house as a residence is made clear in the judicial comments set out at CG64455 and also in the legislation itself. For example,
>
> - TCGA1992/S222 (8) allows an individual currently living in job related accommodation relief in respect of a dwelling house which they intend to occupy as a residence in due course. See CG64555+. If occupation was not a pre-requisite to relief, this provision would not be necessary.
> - TCGA92/223 (3) allows relief during certain periods of absence from the dwelling house, see CG65030+. If occupation was not a pre-requisite to relief, absence from the dwelling house would not prevent relief from being available and this provision would be unnecessary.
> - TCGA92/224 (2) allows relief to be adjusted where there has been a change in what has been occupied as an individual's residence, see CG67460+. If occupation was not a pre-requisite to relief, a change in what is occupied as the residence would not affect the amount of relief due.

59.2.5 *Interest in dwelling*

The CG Manual provides:

> **CG64470 An interest in a dwelling house is a requirement** [Jul 2019]
>
> An individual must have an interest in a dwelling house used as his residence for it to be a residence within the meaning of TCGA92/S222. This is because relief is available on the disposal of, or of an interest in a dwelling house or part of a dwelling house. References to a residence in Section 222 should be interpreted on this basis. Therefore, when considering which of an individual's residences is their main residence for the purpose of private residence relief, it is only necessary to consider those in which that individual has an interest.
>
> An interest in a dwelling house means a legal or equitable interest. It includes all possible forms of ownership from owning the freehold to being the co-owner of a minimal tenancy. In most cases, where a residence is rented a tenancy exists, and such residences therefore remain within Section 222.
>
> The only circumstance in which an individual can reside in a dwelling house in which he or she has no legal or equitable interest is where the property is occupied under licence. A licence is a permission to reside in a property which may be contractual or gratuitous. For instance, staying in a hotel or in lodgings are examples of residence under contractual licence. And staying with family or friends is an example of residence under gratuitous licence.
>
> An individual's only or main residence may be in a home in which they have no interest. Where it is the case that their main home is occupied under licence but they also reside in another dwelling house in which they have an interest, the residence in which they have an interest will be the only or main residence within S222 because the word residence within Section 222 only refers to residences in which the individual owns an interest...

If this is right, then the meaning of the word "residence" for PRR differs from the ordinary meaning, at least in this one respect.

59.2.6 *Garden or grounds*

The CG Manual provides:

CG64360 Garden And Grounds: Definitions [Jan 2020]

Whether you can regard a particular piece of land as garden or grounds of a residence is a question which must be decided on the facts. The phrase 'garden or grounds' is not defined in the statute and neither has its meaning been considered in case law. Therefore the words must take their everyday meaning.

A useful dictionary definition of the word garden is,

'a piece of ground, usually partly grassed and adjoining a private house, used for growing flowers, fruit or vegetables, and as a place of recreation.'

The word 'grounds' infers a larger area than 'garden'. A useful dictionary definition of the word grounds is,

'Enclosed land surrounding or attached to a dwelling house or other building serving chiefly for ornament or recreation.'

Generally speaking you should accept that land surrounding a residence which is in the same ownership, is the grounds of the residence, unless it is in use for some other purpose.

Land which at the date of disposal is in use for some other purpose for example agricultural land, commercial woodlands, land under development or land in use for a trade or business should not be regarded as part of the garden or grounds.

The following land should not necessarily be excluded from the garden and grounds:

- Land which has traditionally been the garden and grounds of the residence but at the date of sale is unused or overgrown.
- Paddocks or orchards providing there is no significant business use.
- Land which has a building on it, see CG64200, unless that building is in use for a business or is let.

Where the land in question was acquired on a different date to the residence, it should also be accepted as garden or grounds providing it was subsequently brought into use as the garden or grounds of the residence and remains as garden or grounds at the date of disposal.

Mixed Use

To qualify for relief land does not have to be exclusively in use for recreational purposes. For example, the owner of a guest house may allow guests to use the garden. In these circumstances the garden will still qualify for relief if the other tests are satisfied.

CG64367 Garden And Grounds: Land Physically Separated [Jul 2019]

You may come across the argument that land which is some distance from the residence should qualify for relief because it is in the same ownership as the residence and is used as a garden. Generally speaking this argument should be resisted.

TCGA92/222 (1) (b) provides relief for land which the owner "has for his own occupation and enjoyment with the residence as its garden or grounds". Therefore the land which qualifies for relief must be the garden and grounds of the residence, not land which simply happens to be in the same ownership as the residence. Usually the garden and grounds will be the land which surrounds the residence and is enclosed with it. Land which is separated from the residence by other land which is not in the same ownership will not normally be part of the garden and grounds of the residence.

However if the facts show that land which is physically separated from the residence is naturally and traditionally the garden of the dwelling house and it would normally be passed on as such on conveyance, relief should be allowed. For example, in some villages it is common for the garden to be across the street from the dwelling house. This separation should not be regarded as a reason for denying relief if it can be shown that the land was naturally and traditionally the garden and grounds of that house.

Conversely, a keen gardener may buy a plot of land some distance from their dwelling house because the dwelling house itself may have an inadequate garden. Even though the plot of land may be fully cultivated and regarded as part of the garden by the owner, it will not qualify for relief.

CG64391 Garden And Grounds: Caravans And Boats [Jan 2020]
You may conclude that a caravan or a boat can be regarded as a dwelling house and so may qualify for relief under TCGA92/S222(1)(a), see CG64325 and CG64328. Where this is the case, land which can be regarded as the garden or grounds of the caravan or boat can also qualify for relief under TCGA92/S222 (1) (b).
This view was confirmed in *Moore v Thompson* (61 TC 15) in which the Judge stated, "Perhaps somewhat generously the Revenue have taken the view that if the caravan was a dwelling house, and it was at any time during the taxpayers period of ownership her only or main residence, then the land of the farm was in her occupation and enjoyment with that residence as its garden and grounds up to the permitted area."
A similar line was also taken in the earlier case of *Makins v Elson* (51 TC 437) and this remains the line that you should take.
You will often find that the reason for suggesting that a caravan or boat is a dwelling house is in order to obtain relief on the land on which it stands or is surrounded. This is because the land is often far more valuable that the caravan or boat itself. However if the other conditions for relief are fulfilled and there is land which is identifiably used as the garden and grounds of the caravan or boat, you should allow relief on the disposal of that land.

See App.2.22.1 (Garden or grounds).

59.2.7 *Period of ownership*

Section 222(7) TCGA provides:

> In this section and sections 222A to 226, "the period of ownership" where the individual has had different interests at different times shall be taken to begin from the first acquisition taken into account in arriving at the expenditure which under Chapter III of Part II is allowable as a deduction in the computation of the gain to which this section applies ...

59.2.8 *Inter-spouse transfer*

Section 222(7) TCGA provides:

> and in the case of an individual living with his spouse or civil partner living with him—
> (a) if the one disposes of, or of his or her interest in, a dwelling-house or part of a dwelling-house to the other, and in particular if it passes on death to the other as legatee, the other's period of ownership shall begin with the beginning of the period of ownership of the one making the disposal, and
> (b) if paragraph (a) above applies, but the dwelling-house or part of a dwelling-house was not the only or main residence of both throughout the period of ownership of the one making the disposal, account shall be taken of any part of that period during

which it was his only or main residence as if it was also that of the other.

59.3 Non-residents PRR disallowance

59.3.1 *Introduction*

PRR was curtailed in 2015, on the introduction of the short-lived charge on residential property of non-residents, known as NRCGT. The NRCGT consultation paper provided:

> Bringing non-residents into CGT without any changes could mean that non-residents invariably chose to nominate their UK residence as their main residence and obtain tax relief on gains made on that property, even where it was not in fact their main residence, yet not pay any UK CGT on gains relating to their other residences outside of the UK. This would undermine the extension of CGT to non-residents.[5]

The problem could not be avoided by restricting PRR to UK residents. The NRCGT consultation paper provided:

> 6.18 The government has sought legal advice and considers it would not be possible to restrict claims for PRR to EU or EEA residents.

No reason is given (readers may infer that a general object of the paper was to close discussion rather than to inform it). But the reason was that there would be a restriction on free movement of capital, which applies to non-EU states as well as within the EU.

The wording has been amended in consequence of the extension of CGT to non-residents in 2019, but there has been no change of substance.

59.3.2 *Outline*

In summary: a residence is treated as not being occupied as a residence (so it does not qualify for PRR) unless:

[5] (1) HMRC & HM Treasury, "Implementing a capital gains tax charge on non-residents: consultation" (March 2014) para 3.3. *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/298759/CGT_non-residents_condoc.pdf*
(2) HMRC & HM Treasury, "Implementing a capital gains tax charge on non-residents: summary of responses" (November 2014) *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/380397/Implementing_a_capital_gains_tax_charge_on_non_residents_disposing_of_UK_residential_property-_summary_of_responses_FINAL.pdf*

(1) The person is resident in the same territory as the residence; or
(2) The person is present in the residence for at least 90 days per annum. The statutory term for this is the **"day count test"**.

This is most important for non-residents who wish to claim PRR on a UK home; but it can also affect UK residents who wish to claim PRR on a non-UK home.

59.3.3 *The disallowance*

In order to follow the legislation, one needs to read s.222(1) TCGA and s.222B(1) TCGA together:

> **222(1)** This section applies to a gain accruing to an individual so far as attributable to the disposal of, or of an interest in—
> (a) a dwelling-house or part of a dwelling-house which is, or has at any time in his period of ownership been, his only or main residence...
> **222B(1)** For the purposes of sections 222 to 226 the dwelling-house or part of a dwelling-house mentioned in section 222(1) is treated as not being occupied as a residence by the individual so mentioned ("P") at any time in P's period of ownership which falls within—
> (a) a non-qualifying tax year, or
> (b) a non-qualifying partial tax year.
> In the remainder of this section the dwelling-house or part of a dwelling-house is referred to as "the dwelling-house".

This feeds into the rule that PRR relief is restricted where a property is not the residence throughout the period of ownership. Section 223 TCGA provides:

> *(*1) No part of a gain to which section 222 applies shall be a chargeable gain if the dwelling-house or part of a dwelling-house has been the individual's only or main residence throughout the period of ownership, or throughout the period of ownership except for all or any part of the last 9 months of that period.
> (2) Where subsection (1) above does not apply, a fraction of the gain shall not be a chargeable gain, and that fraction shall be—
> (a) the length of the part or parts of the period of ownership during which the dwelling-house or the part of the dwelling-house was the individual's only or main residence, but inclusive of the last 9 months of the period of ownership in any event, divided by
> (b) the length of the period of ownership.

So s.222B works to disallow PPR either wholly or in part. Section 223

TCGA defines the key term "period of ownership":

> (7) In this section "period of ownership"—
>
> (a) does not include any period before 31 March 1982, and
>
> (b) where
>
> [i] the whole or part of the gain to which section 222 applies is a residential property gain (as defined by Schedule 1B)[6]
>
> [ii] which is chargeable to capital gains tax because of section 1A(3)(b),[7]
>
> does not include any period before 6 April 2015 (but see subsection (7A)).
>
> (7A) Paragraph (b) of the definition of "period of ownership" does not apply in a case where paragraph 8 or 14 of Schedule 4AA applies (the individual has made an [historic-cost] election for the retrospective basis of computation to apply).

59.3.4 *"Non-qualifying tax year"*

Section 222B(3) TCGA provides:

> A tax year the whole of which falls within P's period of ownership is "a non-qualifying tax year" in relation to the dwelling-house if—
>
> (a) neither P nor P's spouse or civil partner was resident for that tax year in the territory in which the dwelling-house is situated, and
>
> (b) the day count test was not met by P with respect to the dwelling-house for that tax year (see section 222C).

59.3.5 *Partial tax years*

Section 222B(5) TCGA defines "partial tax year":

> Where part only of a tax year falls within P's period of ownership, that part is a "partial tax year" for the purposes of this section.

Section 222B(4) TCGA provides the rule:

> A partial tax year is "a non-qualifying partial tax year" in relation to the dwelling-house if—
>
> (a) neither P nor P's spouse or civil partner was resident for the tax year in question in the territory in which the dwelling-house is situated, and

[6] See 57.37 (Residential property gain).

[7] See 56.6.5 (CGT/CT charge: non-residents).

> (b) the day count test was not met by P with respect to the dwelling-house for that partial tax year.

59.4 Residence in territory of house

Section 222B(3) TCGA provides:

> A tax year the whole of which falls within P's period of ownership is "a non-qualifying tax year" in relation to the dwelling-house if—
> (a) neither P nor P's spouse or civil partner was resident for that tax year in the territory in which the dwelling-house is situated

A person who is not so resident will still be entitled to PRR if they meet the day count test.

The question whether an individual is resident in the UK is decided by the SRT.

Section 222B TCGA provides rules to identify when an individual is resident in a foreign state (**"overseas-residence")**. Section 222B(6) provides:

> For the purposes of this section an individual is resident in a territory outside the UK ("the overseas territory") for a tax year ("year X") in relation to which condition A or B is met.

I refer to **"foreign residence conditions A and B"**

59.4.1 *Residence condition A*

Section 222B(7) TCGA provides:

> Condition A is that the individual is, in respect of a period or periods making up more than half of year X, liable to tax in the overseas territory under the law of that territory by reason of the individual's domicile or residence.

The wording is loosely based on OECD Model definition of treaty-residence.[8]

"Tax" is not defined and it is considered that any residence-based tax[9] will count.

This deals with split years in the foreign state in a sensibly rough and ready manner.

[8] See 9.3 (Residence under art 4(1)).

[9] Or domicile-based tax, though I doubt if there are any.

59.4.2 *Residence condition B*

Where an individual is resident (in a normal sense of the word) in a country which does not impose residence-based tax, that individual will not meet foreign residence condition A. That may include states with no direct tax at all, such as Saudi Arabia, and states which only tax income from sources in that state, such as Singapore and Hong Kong. Such persons may still fall within foreign residence condition B. Section 222B TCGA provides:

> (8) Condition B is that the individual would be resident in the overseas territory for year X in accordance with the statutory residence test in Part 1 of Schedule 45 to the FA 2013, if in Parts 1 and 2 of that Schedule—
>
> (a) any reference to the UK (however expressed) were read as a reference to the overseas territory,
>
> (b) "overseas" meant anywhere outside that territory, and
>
> (c) in paragraph 26 (meaning of "work"), sub-paragraphs (2) to (4), (6) and (7) were disregarded.[10]
>
> (9) In applying the statutory residence test in accordance with subsection (8), any determination of whether—
>
> (a) the individual was resident in the overseas territory for a tax year preceding year X, or
>
> (b) another individual is resident in the overseas territory for year X,
>
> is to be made in accordance with the statutory residence test, as modified by subsection (8).

59.5 Day count test

Section 222B(3) TCGA provides:

> A tax year the whole of which falls within P's period of ownership is "a non-qualifying tax year" in relation to the dwelling-house if...
>
> (b) the day count test was not met by P with respect to the dwelling-house for that tax year (see section 222C).

Section 222C(1) TCGA provides:

> This section explains how P meets the day count test (see section 222B) with respect to the dwelling-house or part of a dwelling-house mentioned in section 222(1) for a full or partial tax year.

[10] These provisions deal with matters such as travelling and training: see 6.22 (Work).

> In the remainder of this section the dwelling-house or part of a dwelling-house is referred to as "the dwelling-house".

After this proem we move on:

> (2) P meets that test for a tax year with respect to the dwelling-house if, during that year, P spends at least 90 days in one or more qualifying houses.

Section 222C(6) TCGA explains how to count to 90:

> For the purposes of subsections (2) and (3) the days need not be consecutive...

59.5.1 *Ownership in part of year*

Where the property is owned for part of a year the 90 day requirement is reduced proportionately. Section 222C TCGA provides:

> (3) P meets that test for a partial tax year[11] with respect to the dwelling-house if, during that partial tax year, P spends at least the relevant number of days in one or more qualifying houses.
> (4) To find the relevant number of days for the purposes of subsection (3), multiply 90 days by the relevant fraction and round up the result to the nearest whole number of days if necessary.
> (5) The relevant fraction is (X ÷ Y)
> where—
> "X" is the number of days in the partial tax year;
> "Y" is the number of days in the tax year.

59.5.2 *Days spent*

Section 222C(8) TCGA provides:

> For the purposes of this section, a day counts as a day spent by an individual in a qualifying house if—
> (a) the individual is present at the house at the end of the day, or
> (b) the individual—
> (i) is present in the house for some period during the day, and
> (ii) the next day, has stayed overnight in the house.

The wording of (8)(a) is taken from the SRT[12] but is not appropriate here

[11] Section 222C(10) incorporates the definition by reference: In this section "partial tax year" has the meaning given by section 222B(5).

[12] See 6.15.1 (Ascertaining days spent in UK).

because under the SRT the question is whether the individual is present in the country, and here the question is whether the individual is present in the residence. The problem will often be solved by para (b). It is easy to envisage circumstances where, like Cinderella, P will need to leave the party before midnight in order to qualify for PRR. But fortunately that will not often be the case.

The rules are unnecessarily complicated. It would be sensible to use the SRT test (present in the dwelling-house on a day for at least some of the time, no matter how short a time).[13]

59.5.3 *Qualifying house*

Where more than one residence is owned in the same territory during the year, the day count test applies across the properties.

Section 222C(6) TCGA provides:

> For the purposes of subsections (2) and (3) ... days spent in different qualifying houses may be aggregated.

Section 222C(9) TCGA provides:

> For the purposes of this section—
> (a) the dwelling-house is a qualifying house in relation to P, and
> (b) any other dwelling-house or part of a dwelling-house which is situated in the same territory as the dwelling-house is a qualifying house in relation to P at any particular time if at that time any of the following has an interest in it—
> (i) P,
> (ii) an individual who is P's spouse or civil partner at that time, and
> (iii) an individual who is P's spouse or civil partner at the time of disposal of the dwelling-house.

59.6 MPR notice

59.6.1 *Power to make MPR notice*

Section 222(5) TCGA provides:

> So far as it is necessary for the purposes of this section to determine which of 2 or more residences is an individual's main residence for any period—

[13] See 6.11.3 (Sufficient time in UK home).

(a) the individual may conclude that question by notice to an officer of the Board given

[i] within 2 years from the beginning of that period

[ii] but subject to a right to vary that notice by a further notice to an officer of the Board as respects any period beginning not earlier than 2 years before the giving of the further notice.

I refer to this as **"a MPR notice"**.

59.6.2 *Time limit for notice*

The deadline for making the MPR notice is short, easy to overlook, and if remembered, it has to be made at a time when it may not be clear which is the best property to elect to be the main residence.

The CG Manual provides:

> **CG64495 two or more residences: time limit for nominating** [Nov 2019]
>
> TCGA92/222 (5) sets out that a notice nominating which of two or more residences is to be treated as the main residence must be given within two years from the date on which the individual has a particular combination of residences. Each time there is a change in the individual's combination of residences a new period begins and there is a new opportunity to make a nomination. This interpretation of the legislation was confirmed in the case of *Griffin v Craig Harvey*[14] ...
>
> Where a dwelling house is acquired, the date on which there is a new combination of residences will not necessarily be the date of acquisition, it will be the date on which the dwelling house was first used as a residence. Similarly, where an individual ceases to use a dwelling house as a residence, the date on which there is a new combination of residences will be the date on which the dwelling house is no longer used as a residence, it will not necessarily be the date on which that dwelling house is disposed of.
>
> *Example:*
>
> An individual has a single residence until 1 April 2015. On that date she acquired a dwelling house and immediately began to use it as a second residence. She has until 31 March 2017 to nominate which of these residences is to be treated as her main residence.
>
> On 23 November 2015 she acquired another dwelling house and began to use it as a third residence on 1 June 2016. A new period for

[14] 66 TC 396.

> nominating begins on 1 June 2016 giving her until 31 May 2018 to nominate which of her three residences is to be treated as her main residence.
>
> On 30 September 2016 she ceased to use one of her dwelling houses as a residence and subsequently disposed of it on 30 November 2016. A new period for nominating therefore begins on 30 September 2016; she has until 29 September 2018 to nominate which of her two remaining residences is to be treated as the main residence.

Section 222(5A) TCGA provides:

> But a notice or further notice under subsection (5)(a) determining which of 2 or more residences is an individual's main residence for any period may be given more than 2 years from the beginning of the period if during the period the individual has not held an interest of more than a negligible market value in more than one of the residences.

59.6.3 *Period notice applies*

The CG Manual provides:

> **CG64497 two or more residences: date from which a nomination applies** [Jul 2019]
>
> A nomination will apply from the beginning of a period to which it relates, i.e. the date on which the individual had that particular combination of residences giving rise to the need to determine which is the main residence.
>
> The nomination will have continuing effect until the earlier of,
>
> - The date on which the individual's combination of residences changes, or
> - The date from which a variation of the original notice is to apply.
>
> A variation of a notice will apply from the date specified in the notice of variation which may be up to two years before the giving of the notice.

59.6.4 *Variation of MPR notice*

The CG Manual provides:

> **CG64510 two or more residences: variation of a notice** [Jul 2019]
>
> A notice given under TCGA92/222 (5) can be varied by a further notice at any time. The further notice can be backdated to be effective from up to two years from the date that it was given.
>
> A variation will often be made when a disposal of a residence is in prospect or the disposal has already been made and the individual

> making the disposal wishes to secure the final period exemption. See CG64985+.
>
> For example, where an individual with two residences validly nominates house A, they may vary that nomination to house B at any time. The variation can then be varied back to house A within a short space of time. This will enable the individual to obtain the benefit of the final period exemption on house B with a loss of only a small proportion of relief of on house A.

59.6.5 *Form of MPR notice*

The CG Manual provides:

> **CG64520 two or more residences: form of notice** [Jul 2019]
>
> There is no statutory form for a notice under TCGA92/S222 (5) or for a variation of such a notice. However the following conditions must be fulfilled,
>
> - A nomination by an individual must be made to an officer of the Board and must be signed by the individual. TCGA92/S222 (5).
> - Spouses or civil partners who are living together[15] can only have one main residence between them for the purpose of private residence relief. If a nomination affects both of them it must be made by notice in writing to an officer of the Board and must be signed by both of them. TCGA92/S222 (5). See also CG64525 regarding elections on marriage or on registering as civil partners.
> - Where one of more of the residences is occupied by a person entitled to occupy it under the terms of a settlement, the notice must be writing to an officer of the Board and should be signed by both the trustees of the settlement and the person entitled to occupy the residence. TCGA92/S225 (b).
> - The signature of an agent is not sufficient.

59.6.6 *Procedure on receipt of notice*

The CG Manual provides:

> **CG64530 two or more residences: treatment of notice** [Jul 2019]
>
> If a notice or a variation of a notice is received, it should be acknowledged without any comment on its validity, and filed. On acknowledging the notice great care should be taken to avoid giving the impression that the notice is valid where the full facts are not available. In certain circumstances it may be appropriate to ask the taxpayer or

[15] See App 3.4.3 (Living together: married couple).

their agent for further information with regard to a notice. For example,

- It may be apparent that the notice has been given more than two years after the acquisition of a further dwelling house. This doesn't necessarily mean that the notice is late; the house may not have been occupied as a residence immediately on acquisition. So you should consider asking for more information to establish if the notice has been made after the expiry of the time limit.
- It may be apparent that the nominated dwelling house has not been a residence of the person giving the notice.
- If it appears that the nominated dwelling house is occupied under licence, see CG64536, or that the notice takes account of such a residence, you should consider asking the taxpayer or their agent for further information in order to confirm its validity.

Any enquiries that you do make should be to the extent of satisfying yourself, on the facts available, that the notice is valid or invalid. And, where it is invalid, explaining why to the person who has given the notice, or to their agent.

However until a dwelling house is sold any dispute over the validity of a notice will have no tax consequences. Therefore you should not take your enquiries beyond the stage at which, on the facts made available, you believe the notice to be invalid.

59.6.7 *MPR notice under regime*

The CGT charge on non-residents has a more generous rule for when it is possible to make or change a MPR notice. It is convenient to have different terms for the different types of notice, and in the following discussion I coin the following terms:

(1) **"a UK MPR notice"** is a an ordinary notice under s.222 TCGA.

(2) **"a overseas MPR notice"** is a notice under s.222A(2).

Section 222A(1) TCGA provides:

> This section applies where—
>
> (a) an individual ("P") makes a disposal of, or of an interest in—
>
> (i) a dwelling-house, or part of a dwelling-house, which was at any time in P's period of ownership occupied by P as a residence, or
>
> (ii) land (as mentioned in section 222(1)(b)) which P had for P's own occupation and enjoyment with that residence as its garden or grounds, and
>
> (b) the disposal is—
>
> (i) a disposal on which a residential property gain (as defined

> by Schedule 1B)[16] accrues which is chargeable to capital gains tax because of section 1A(3)(b), or
>
> (ii) a disposal on which a loss accrues but is one which, had a gain accrued, would be within sub-paragraph (i).
>
> In the remainder of this section the residence concerned is referred to as "the dwelling-house".

Section 222A(2) TCGA provides:

> So far as it is necessary for the purposes of section 222, P may determine, by a notice under this section, which of 2 or more residences (of which one is the dwelling-house) was P's main residence for any period within P's period of ownership of the dwelling-house.

The important point is that the time limits for a UK MPR notice do not apply to an overseas notice. Section 222A(3) provides:

> A notice under this section may vary, as respects any period within P's period of ownership of the dwelling-house, a notice previously given under section 222(5)(a)....

In principle a notice may be given at any time. Section 222A(4) imposes one limit:

> (4) A notice under this section may not vary a notice previously given under section 222(5)(a) as respects any period for which the previous notice had the effect of determining whether or not a disposed of residence was P's main residence.
>
> (5) In subsection (4) "disposed of residence" means one of P's residences which was disposed of (in whole or in part) before the date of the disposal mentioned in subsection (1)(a).

The expression "disposed of residence" is slovenly, verging on ungrammatical, but at least one drafter in the office of parliamentary counsel is fond of it. However clumsy, it is easier to follow the statutory usage.

The new notice can be backdated almost indefinitely.

Section 222A(6) TCGA then deals with procedure:

> A notice under this section—
>
> (a) must be given in the return under Schedule 2 to the Finance Act 2019 in respect of the disposal mentioned in subsection (1)(a),

[16] See 57.37 (Residential property gain).

and

(b) may not subsequently be varied, whether by a notice under this section or section 222(5)(a).

It will be necessary to consider the position at the time of a sale.

In short, the ability to elect operates more favourably as the determination is made at the time of the disposal in the sch 2 return. By contrast, the regime for UK residents remain restricted to a two-year time limit.

Having different time periods for notice (or determination) by residents and by non-residents raises issues for non-residents who become UK resident. A non-resident (with a house still in the UK) would be able to sell the house while away and make an notice at the time of sale. However, if individual became UK resident and then sold the house they could not elect.

To add to the confusion, the individual may not know whether they are UK resident until late in the tax year or some time after the year.

CIOT rightly observed that it would be better to align the provisions for UK and for offshore MPR notices.[17] But no-one took any notice of that.

59.7 Which is main residence

The question of identifying the "main" private residence arises in various tax contexts. It is not possible to give a full list, but they include:

(1) PRR, where there is no MPR notice
(2) Definition of Scottish/Welsh taxpayer[18]
(3) Council tax[19]

A similar question is which is the chief territory-residence for domicile purposes.[20]

How does one ascertain which of two competing private residences is the main residence? The test is multifactorial: no single factor is decisive. The question is one of fact and degree.[21]

The issue arose in *Frost v Feltham* where the taxpayer spent two or three

[17] CIOT "Draft FB15 Clauses on Disposals of UK residential interest by non-residents" (2015).

[18] See 6.43.6 (Two UK residences).

[19] Council tax cases offer further examples, but without, I think, taking the matter much further. See eg *Bennett (R oao) v Copeland Borough Council* [2004] EWCA Civ 672.

[20] See 3.9.3 (Which is chief residence).

[21] *Frost v Feltham* 55 TC 10 at p.14.

days a month at his property "Mount Severn". He spent the rest of the time in a pub, "The White Horse", where he was licensee. The judge noted that "viewed in isolation those are not long periods of time to spend at a house which can properly be described as the principal or more important residence of the persons concerned". Nevertheless, Mount Severn was his main residence:

> If someone lives in two houses the question, which does he use as the principal or more important one, cannot be determined solely by reference to the way in which he divides his time between the two. I can test that by reference to an example far removed from the facts of this case and the conditions of our own times. In his "Lives of the Lord Chancellors" Lord Campbell tells how Lord Eldon was often prevented by the burdens of his office from visiting his estate at Encombe in Dorset for long periods at a time. Sometimes he was only able to get down there for three weeks or so in the year, for the partridge shooting in September. True it was that Lord Eldon also had a good house in Hamilton Place, but it could not really have been suggested that he did not use Encombe as his principal or more important residence.[22]

The CG Manual provides:

> **CG64545 two or more residences: no valid notice made** [Jul 2019]
> Where an individual has two or more residences within the meaning of Section 222 it is not mandatory for that individual to make a notice nominating which is to be treated as the only or main residence.
> However where a notice is not made, or an invalid notice is made, the residence which attracts relief is the dwelling house which is the main residence as a matter of fact.

The Manual then turns to the question of which is the main residence as a matter of fact:

> All of the facts and circumstances of the particular case must be considered in order to conclude which the residence is the main residence.
> In practice the main residence is not necessarily the residence where the individual spends the majority of their time, although it commonly will be. [The Manual considers *Frost v Feltham* discussed above, and continues:]
> The following list of points to consider, although not exhaustive, may

[22] 55 TC 10 at p.13.

> be useful in establishing which is the main residence,
> - If the individual is married or in a civil partnership, where does the family spend its time?
> - If the individual has children, where do they go to school?
> - At which residence is the individual registered to vote?
> - Where is the individual's place of work?
> - How is each residence furnished?
> - Which address is used for correspondence?
>   - Banks & Building Societies
>   - Credit cards
>   - HMRC
> - Where is the individual registered with a doctor / dentist?
> - At which address is the individual's car registered and insured?
>
> Which address is the main residence for council tax?

Scottish Taxpayer Technical Guidance Manual adds to the list:

> **STTG3700: meaning of 'main place of residence'** [Jun 2016]
> - Location of social/non-work activity i.e. club membership/ participation, hobbies, etc
> - Where are the majority of the individual's possessions kept

59.8 Spouses

Section 222(6) TCGA provides:

> In the case of an individual living with his spouse or civil partner—
>
> (a) [i] there can only be one residence or main residence for both, so long as living together and,
> [ii] where a notice under subsection (5)(a) above affects both the individual and his spouse or civil partner, it must be given by both.

In short, spouses can only have one residence which qualifies for PRR. That made sense when the rule was introduced, in 1965, when spouses formed one taxable unit. But it is strange that this policy, which entails a significant discrimination against marriage, has survived independent taxation without more comment.[23] In a case where unmarried cohabitees each own a residence, on which each could claim PRR, marriage brings a significant CGT cost. Those who argue that the tax system should

[23] See Loutzenhiser, "Transferable Personal Allowances: A Small Step in the Wrong Direction" [2015] BTR 110.

support marriage, and those who argue it should be neutral, should be in favour of repeal of this rule, or its extension to cohabitees.

The principle that spouses form one taxable unit runs through to the overseas PPR provisions. Section 222C(7) TCGA provides:

> A day spent by P's spouse or civil partner in a dwelling-house or part of a dwelling-house which is a qualifying house in relation to P counts as a day spent by P in the qualifying house (but no day is to be counted twice as a result of this subsection).

59.9 MPR notice on marriage

The CG Manual provides:

> **CG64525 two or more residences: nominations on marriage or on registering as civil partners** [Jul 2019]
> TCGA92/S222 (6) sets out that spouses or civil partners who are living together can only have one main residence between them for the purpose of private residence relief. If when they marry or register as civil partners they each own a residence and they continue to use both as residences, they can jointly nominate which is to be treated as the main residence. The two year period for making the nomination commences on the date of marriage or the date of registration.
>
> Where one spouse or civil partner owns more than one residence, but the other spouse or civil partner does not own a residence and there is no change in this on marriage or registration as civil partners, then a fresh period for making a nomination does not begin. This is because neither spouse nor civil partner has had a change in their combination of residences, and neither of them needs to become a party to an existing nomination to which they were not already a party. A notice under TCGA92/S222 (5) only has to be made jointly where it affects both spouses or civil partners.
>
> Where the spouses or civil partners jointly own more than one residence at the date of marriage or on registering as civil partners, and neither separately owns any other residence, a new two year period for making a nomination begins. Even though both spouses or civil partners own the same residences as before, and even if they have both previously nominated the same residence, they now have to make a joint nomination in order for it to be valid from the date of marriage or from the date that they were registered as civil partners.

59.9.1 *MPR notice by spouses*

Section 222A(7) TCGA provides:

> Where a notice under this section affects both P and an individual ("X") who was, in the period to which the notice relates ("the relevant period"), P's spouse or civil partner living with P—
>
> (a) in a case where each of P and X is required to make a return under Schedule 2 to the Finance Act 2019 in respect of the disposal of an interest in the dwelling-house, notice given by P under this section is effective as respects any part of the relevant period when P and X were living together as spouses or civil partners only if notice to the same effect is also given under this section by X in respect of that period;
>
> (b) in any other case, notice given by P under this section is effective as respects any part of the relevant period when P and X were living together as spouses or civil partners only if it is accompanied by written notification from X agreeing to the terms of the notice in respect of that period.

In short, spouses must act jointly in giving a notice.

59.10 Periods of absence relief

59.10.1 *Permitted periods of absence*

Section 223(3) TCGA provides relief for certain periods of absence:

> For the purposes of sections 222(5) and 222A and subsections (1) and (2) above—
>
> (a) a period of absence not exceeding 3 years (or periods of absence which together did not exceed 3 years), and in addition
>
> (b) any period of absence throughout which the individual
>
> [i] worked in an employment or office all the duties of which were performed outside the UK or
>
> [ii] lived with a spouse or civil partner who worked in such an employment or office, and in addition
>
> (c) any period of absence not exceeding 4 years (or periods of absence which together did not exceed 4 years) throughout which the individual was prevented from residing in the dwelling-house or part of the dwelling-house
>
> [i] in consequence of the situation of his place of work or
>
> [ii] in consequence of any condition imposed by his employer requiring him to reside elsewhere, being a condition reasonably imposed to secure the effective performance by the employee of his duties, and in addition,
>
> (d) any period of absence not exceeding 4 years (or periods of

> absence which together did not exceed 4 years) throughout which the individual lived with a spouse or civil partner in respect of whom paragraph (c) applied in respect of that period (or periods),
>
> shall be treated as if in that period of absence the dwelling-house or the part of the dwelling-house were occupied by the individual as a residence if conditions A and B are met.

In short, conditions A and B require a period of residence before and after the period of absence. In full detail:

> (3A) Condition A is that before the period there was a time when the dwelling-house was the individual's only or main residence.
>
> (3B) Condition B is that after the period—
>
> (a) in a case falling within paragraph (a), (b), (c) or (d) of subsection (3), there was a time when the dwelling-house was the individual's only or main residence,
>
> (b) in a case falling within paragraph (b), (c) or (d) of that subsection, the individual was prevented from resuming residence in the dwelling-house in consequence of the situation of the individual's place of work or a condition imposed by the terms of the individual's employment requiring the individual to reside elsewhere, being a condition reasonably imposed to secure the effective performance by the employee of his duties, or
>
> (c) in a case falling within paragraph (b), (c) or (d) of that subsection, the individual lived with a spouse or civil partner to whom paragraph (b) of this subsection applied.

Section 222B TCGA provides:

> (11) Subsection (1) is subject to—
>
> (a) section 222(8) (job-related accommodation), and
>
> (b) section 223(3) (absence reliefs).

If these reliefs apply, a non-resident period is not disqualified from PRR. HMRC say:

> **Q11 I lived in the property for 20 years before leaving the UK in 2010 and had met all the conditions for PRR up to that date. Does this mean if I sell the property by 5 October 2016 there will be no CGT liability?**
>
> A11 Yes. If you can identify a time prior to 6 April 2015 that the property qualified for PRR then final period relief will be available i.e.

the last 18 months of ownership will be eligible for relief.[24]

59.11 2015 transitional rules

Draft clauses EN provides a summary:

> ... where a non-UK resident person disposes of a dwelling-house, the use of the property prior to 6 April 2015 is ignored in determining eligibility to private residence relief unless the person otherwise elects and specifies the date as to when, prior to then, the property was the person's only or main residence. Any absence from that date to 5 April 2015 is deducted from the amount of absence available for relief for periods after 5 April 2015.

Section 222B(2) TCGA provides:

> Except where the disposal mentioned in section 222(1) is a disposal falling within section 222A(1)(b) (non-resident disposals), subsection (1) does not have effect in respect of any tax year or partial tax year before the tax year 2015-16.

Section 223A TCGA provides:

> (1) This section applies where—
> (a) the individual mentioned in section 223(1) ("P") acquired the asset to which the gain mentioned in section 222(1) is attributable before 6 April 2015, and
> (b) P's period of ownership for the purposes of section 223 begins on that date because of section 223(7)(b).
> (2) Times before 6 April 2015 are to be ignored in determining whether or not condition A in section 223 is met in relation to a period of absence, unless P elects that this subsection is not to apply in relation to the period.
> (3) An election under subsection (2)—
> (a) must specify which day before 6 April 2015 P relies on in relation to the period of absence for the purpose of meeting condition A in section 223, and
> (b) must be made in the return under Schedule 2 to the Finance Act 2019 in respect of the disposal.

[24] HMRC, "Capital Gains Tax for non-UK residents: sales and disposals of UK residential property: Frequently Asked Questions" (March 2015). *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/413988/capital-gains-tax-non-uk-res.pdf*

> (4) Where P has made an election under subsection (2), section 223 applies as if relevant prior periods of absence counted against the maximum periods (and maximum aggregate periods) specified in subsection (3)(a), (c) and (d) of that section.
>
> (5) In relation to a maximum period (or maximum aggregate period) specified in paragraph (a), (c) or (d) of section 223(3), "relevant prior period of absence" means a period of absence which would have counted against that maximum period (or maximum aggregate period) if the bridge period were included in the period of ownership.
>
> (6) In subsection (5) "the bridge period" means the period beginning with the day specified in the election and ending with 5 April 2015.
>
> (7) In this section "period of absence" has the same meaning as in section 223.

59.12 Residence held by trust or PRs

Section 225 TCGA provides PRR for trusts. FA 2015 makes (relatively) straightforward amendments to bring this into line with the relief for individuals:

> (1) Sections 222 to 224 shall also apply in relation to a gain accruing to the trustees of a settlement on a disposal of settled property being an asset within section 222(1) where, during the period of ownership of the trustees, the dwelling-house or part of the dwelling-house mentioned in that subsection has been the only or main residence of a person ("B") entitled to occupy it under the terms of the settlement, and in those sections as so applied—
>
> (a) references to the individual shall be taken as references to the trustees except in relation to ~~the occupation of the dwelling-house or part of the dwelling-house~~ the matters dealt with in subsection (2), and
>
> (b) the notice which may be given to an officer of the Board under section 222(5)(a) shall be a joint notice by the trustees and ~~the person entitled to occupy the dwelling-house or part of the dwelling-house~~ B, and;
>
> (c) the notice which may be given by the trustees under section 222A is effective only if it is accompanied by written notification from B agreeing to the terms of the notice;
>
> but section 223 (as so applied) shall apply only on the making of a claim by the trustees.
>
> (2) In sections 222 to 224, as applied by subsection (1), references to the individual, in relation to-
>
> (a) the occupation of the dwelling-house or part of the

> dwellinghouse,
> (b) residence in a territory, or
> (c) meeting the day count test,
> are to be taken as references to B.

Trustees sometimes have a choice of who should be entitled to occupy a property, and that choice may confer (or deny) PRR.

Section 225A TCGA (not discussed here) provides PRR for personal representatives. The FA 2015 makes the corresponding amendments to bring this into line with the relief for individuals

59.13 Commencement of PRR rules

Para 10 sch 9 F(no.1)A 2015 provides:

> The amendments made by this Schedule have effect in relation to disposals made on or after 6 April 2015.

59.13.1 *Pre-2015/16 years*

Section 222B(2) TCGA provides:

> Except where the disposal mentioned in section 222(1) is a disposal falling within section 222A(1)(b) (non-resident disposals), subsection (1) does not have effect in respect of any tax year or partial tax year before the tax year 2015-16.

60.1 CGT on non-resident trusts

The scheme of the TCGA is that a trust is generally treated as a taxable unit.[1] If the trustees are UK resident, they are subject to CGT, even if the beneficiaries have no connection with the UK. Non-resident trustees are in principle not subject to CGT, even if beneficiaries are resident in the UK.[2] This rule presents an obvious means of CGT avoidance. HMRC's first answer to this is the anti-avoidance rules in ss.86, 87 TCGA.

In outline:

(1) A settlor is subject to CGT on gains accruing to a non-resident trust if:

(a) The settlor is UK resident and UK domiciled.

(b) The settlor has an "interest" in the settlement. (This is widely and artificially defined.)

I refer to this as the **"s.86 charge"** and the gains treated as accruing to the settlor under this section are **"s.86 gains"**.

(2) A beneficiary is subject to CGT if:

(a) The beneficiary is UK resident.

(b) The beneficiary receives a capital payment from the trust.

(c) The trust realises gains.

I refer to this as the **"s.87 charge"** or the **"s.87 capital payments basis"** and the gains treated as accruing to a beneficiary under this section are **"s.87 gains"**. This topic is discussed in the next chapter.

60.2 Section 86 charge

The s.86 charge is the subject of this chapter.

The charge was extended in 1991 and 1998 with transitional relief for:

(1) trusts made before 19 March 1991 ("**pre-1991 trusts**")

(2) trusts made before 17th March 1998 ("**pre-1998 trusts**")

I refer to trusts which qualify for these reliefs as "**pre-1991 protected trusts" and "pre-1998 protected trusts**".

[1] See 56.21 (Trust a taxable unit).

[2] See 56.6 (Territorial scope of CGT).

The charge does not apply to a deemed domiciled settlor if the trust is a protected trust.[3]

Section 86 may not have been EU-law compliant, but post-Brexit the point is not likely to arise.

Sloppy and repetitive drafting adds to the difficulties.

60.3 s.86 application conditions

Section 86(1) provides:

> This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...

There follow eight conditions, or sets of conditions. I refer to these as the "**s.86 application conditions**". In their statutory order they are:

(1) Qualifying settlement
(2) Trustee residence condition
(3) Settlor residence and domicile conditions
(4) Settlor-interested condition
(5)-(8) Death/divorce of settlor or certain beneficiares

Where these conditions are satisfied, I describe the trust as **"within s.86"**.

60.4 Minor definitions

It is helpful first of all to clear out some (relatively) minor definitions. They are repeated up to five times, verbatim: the repetition is because on each occasion the definitions are expressed to be for the purposes of the paragraph and not for the purposes of the schedule or the Act. I set out the para 9 version and give the references for the others.

60.4.1 *"Settlement" and "settlor"*

"Settlement" is not expressly defined so the standard IT/CGT definition applies.[4] Contrast the IT settlor-interested trust rules, and the s.87 rules, where the settlement-arrangement definition applies. It would be bold to plan on the assumption that this will not change.

For "settlor" see 99.2.11 (Settlor: CGT s.86 definition).

60.4.2 *"Control" and "participator"*

Para 9(9) sch 5 TCGA provides a slightly cut down form of the ultra-wide

[3] See 92.3 (s.86 protected-trust relief).

[4] See 87.3 (Settlement: Standard IT/CGT definition).

sense of control:[5]

> [a] For the purposes of sub-paragraph (7) above the question whether a company is controlled by a person or persons shall be construed in accordance with sections 450 and 451 of CTA 2010;
> [b] but in deciding that question for those purposes no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator in the company.

Paras 2(8), 2A(8) and 8(8) sch 5 TCGA and s 96(10) TCGA each repeat this definition.

Participator is relevant to this definition of control. Para 9(11) sch 5 TCGA provides the standard definition:

> In this paragraph ... "participator" has the meaning given by section 454 of CTA 2010.

Paras 2(10), 8(9) sch 5 TCGA and s.96(10) TCGA each repeat this definition verbatim.

Para 2A(10) also repeats the definition, but para 2A(9A) sch 5 TCGA cuts it down:

> For the purposes of sub-paragraphs (8) and (9) above a person is not to be regarded as a participator in a company controlled by the trustees of a settlement where the person has a share or interest in the capital or income of the company solely by virtue of an interest which the person has under the settlement.

There are (more or less) identical provisions in para 8(8A) and para 9 (10ZA) sch 5 TCGA.

60.4.3 *"Associated company"*

Para 9(10) sch 5 TCGA provides a slightly cut down form of the close-co definition:[6]

> [a] For the purposes of sub-paragraph (7) above the question whether one company is associated with another shall be construed in accordance with section 449 of CTA 2010;
> [b] but where in deciding that question for those purposes it falls to be

[5] For the ultra-wide sense of control, see 104.2.2 (Definitions of "control").

[6] See 104.17.1 ("Associated company").

> decided whether a company is controlled by a person or persons, no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator in the company.

Paras 2(9) and 2A(9) sch 5 TCGA repeat this definition.

60.4.4 *"Child" and "grandchild"*

Para 9(11) sch 5 TCGA provides:

> In this paragraph—
> "child" includes a step-child;
> "grandchild" means a child of a child;

This is repeated verbatim in para 2A(10) sch 5 TCGA.

60.4.5 *"Relevant property/income"*

Para 2(2) sch 5 TCGA provides:

> (a) relevant property is property originating from the settlor,
> (b) relevant income is income originating from the settlor.

This is repeated (more or less) verbatim in para 9(10D) sch 5 TCGA.

60.5 Settlor-interested condition

Section 86 TCGA provides:

> (1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...
>
> (d) at any time during the year the settlor has an interest in the settlement;

If a settlement becomes (or ceases to be) settlor-interested during a tax year, s.86 TCGA applies for the whole tax year. Perhaps there is a good reason for this, because the s.86 charge is on gains less losses for the entire year, and splitting the year would involve some trouble. The rule does however mean that CGT planning by excluding the settlor needs to be carried out some time in advance. (A similar rule applies for s.720, though not for s.624: If a settlor is excluded s.624 ITTOIA ceases to apply from the date of the exclusion, but s.720 continues to apply for the rest of the tax year.[7])

[7] See 47.6.6 (Settlor-interest ceases); 49.14 (Condition A: Power to enjoy).

60.5.1 *"Settlor-interested"*

The term "settlor-interested" in a s.86 context[8] is a label for a complex set of rules.

Para 2 sch 5 TCGA provides:

> (1) For the purposes of section 86(1)(d) a settlor has an interest in a settlement if—
>
> (a) any relevant property[9] which is or may at any time be comprised in the settlement is, or will or may become, applicable for the benefit of or payable to a defined person in any circumstances whatever,
>
> (b) any relevant income which arises or may arise under the settlement is, or will or may become, applicable for the benefit of or payable to a defined person in any circumstances whatever, or
>
> (c) any defined person enjoys a benefit directly or indirectly from any relevant property which is comprised in the settlement or any relevant income arising under the settlement;
>
> but this sub-paragraph is subject to sub-paragraphs (4) to (6) and paragraph 2A below.

The key term is "defined person". Para 2(3) sch 5 TCGA provides:

> For the purposes of sub-paragraph (1) above each of the following is a defined person—
>
> (a) the settlor,
>
> (b) the settlor's spouse or civil partner;
>
> (c) any child of the settlor or of the settlor's spouse or civil partner;
>
> (d) the spouse or civil partner of any such child;
>
> (da) any grandchild of the settlor or of the settlor's spouse or civil partner;
>
> (db) the spouse or civil partner of any such grandchild;
>
> (e) a company controlled by a person or persons falling within paragraphs (a) to (db) above;
>
> (f) a company associated with a company falling within paragraph (e) above.

The history has been one of gradual expansion, with the reference to children added in 1991 and paras (da) and (db) - dealing with

[8] The same term is used in an IT context with a different meaning: see 47.6.1 (Concepts of "settlor-interested").

[9] See 60.4.5 ("Relevant property/income").

grandchildren - added in 1998. Thus the definition of settlor-interested is wider than the IT equivalent in s.624, eg the settlor is chargeable on gains accruing to a trust from which their children or grandchildren could benefit even though there is no actual benefit to the settlor.

Para 2(4) sch 5 TCGA provides exceptions copied from the precedent of the IT settlor-interested trust rules; they have no significant application in practice.

The IT settlor-interested rules have a provision that references to spouses do not include separated or potential future spouses.[10] Unfortunately, the CGT settlor-interested rules do not have that rule. The omission raises a number of difficulties.

60.5.2 *Civil partner\same-sex spouse*

The Civil Partnership Act took effect on 5 December 2005. Before then, civil partners of the settlor were not expressly excluded in trust drafting, so a trust which merely excluded spouses might become settlor-interested from 2005! HMRC tactfully overlook that:

> For settlements made before 5 December 2005, the settlor may not have been considered to have retained an interest in the settlement for Income Tax purposes, as both the settlor and his spouse were specifically excluded from benefit under the particular terms of the settlement deed. Although such an 'exclusion clause' would not have included a 'civil partner', HMRC will not regard the settlor as retaining an interest unless and until a beneficiary becomes the civil partner of the settlor.[11]
>
> With regards to the provisions of Section 86 TCGA 1992, whereby the gains of a non-resident trust or dual resident trust are chargeable on the settlor. If such provisions did not apply in relation to a settlement made prior to 5 December 2005, and the deed was drafted in such an obvious way as to exclude spouses or future spouses without particular definition of those terms, that exclusion might reasonably be regarded in the context as covering civil partners and those treated as such under CPA who stand in the same position as spouses under the law from 5 December 2005. In such circumstances it will not be HMRC's intention to apply those provisions to a settlement only as a result of the coming into effect of the CPA. For settlements made on or after 5 December 2005, it is expected that the drafting of the settlement deed excludes the full list of 'defined persons' (Schedule 5, Para 2(3) TCGA 1992),

[10] See App 3.2 ("Spouse"); App 3.3 ("Civil partner").

[11] For IT, this rule is statutory; see App 3.2 ("Spouse"); App 3.3 ("Civil partner").

> including 'civil partners', from benefiting in any circumstances under the settlement, if it is intended for the settlement not to be caught by the provisions.[12]

This is just a concession and it may be in the interest of beneficiaries to argue that a pre-2005 settlement under which a future civil partner may benefit should be treated as settlor-interested for CGT purposes.

A similar problem arises with same-sex spouses, for trusts made before the Marriage (Same Sex Couples) Act 2013 came into force. A pre-Act exclusion clause which excludes "spouses" will not exclude a same-sex spouse: see para 1 sch 4 Marriage (Same Sex Couples) Act 2013. But I expect HMRC will operate a similar concession.

60.5.3 *Potential defined persons*

ICAEW guidance note on non-resident settlements (TAX 20/92) 14 December 1992 provides:

> 24 ... TCGA 1992 Sch 5 specifies the test as to whether the settlor has an interest. Each of sub-paragraphs 2(1)(a) and(b) uses the words "may…in any circumstances whatever". Interpreted literally, it appears virtually impossible to define a trust where the settlor does not have an interest, because any beneficiary may become a relative of the settlor as a result of subsequent marriages (or indeed subsequent births if necessary to imagine all conceivable possibilities). ...
> *Revenue response*: If the terms of a settlement are so framed that a clearly defined person can benefit, eg the class of beneficiaries includes "any spouse of the settlor" or "spouses of the settlor's children", or such persons could be added to the class of beneficiaries, then the settlor will be treated as having an "interest" in the trust. However, where there is no prima facie possibility of a defined person benefiting, the Revenue will not treat the settlor as having an "interest", unless the terms of the settlement and the circumstances of the case indicate an intention to benefit a person who is likely to become a defined person in the future, eg a settlement in favour of the fiancé of the settlor or of the settlor's child.

60.5.4 *Separated spouse*

ICAEW guidance note on non-resident settlements (TAX 20/92) 14 December 1992 provides:

[12] "HMRC Residency: Non-resident trusts" *https://www.gov.uk/non-resident-trusts*

> 25 Also on the question of whether a settlor has an interest in a trust, it would be helpful if the statement of practice could confirm that a separated spouse would not be regarded as the settlor's spouse for this purpose.
> *Revenue response*: A separated spouse would be regarded as a spouse for the purposes of these provisions unless, in accordance with existing practice (see para 13(a) Appendix B of the Resident trusts consultative document 19 March 1991)[13] on other provisions having a bearing on "settlor interest" trusts, the separation is permanent.

60.6 Pre-1998 protected trusts

Para 2A(1) sch 5 TCGA provides:

> [A] In determining for the purposes of section 86(1)(d) whether the settlor has an interest at any time during any year of assessment in a settlement created before 17th March 1998, paragraphs (da) and (db) of paragraph 2(3) above, and the reference to those paragraphs in paragraph 2(3)(e), shall be disregarded
> [B] unless—
> (a) that year is a year in which one of the four conditions set out in the following provisions of this paragraph becomes fulfilled as regards the settlement; or
> (b) one of those conditions became fulfilled as regards that settlement in any previous year of assessment ending on or after 5th April 1998.

In the following discussion:

(1) A trust qualifying for this relief is a "**pre-1998 protected trust**"

[13] The reference is to the former SP A30 which provided:
"The settlement legislation [now s.624 ITTOIA] includes provisions which may be applied to any settlement where the spouse or any possible future spouse of a settlor may be able to benefit from the income or capital of the settlement in any circumstances whatsoever. In relation to the concept of "possible future spouse" the Board of Inland Revenue have considered the scope of the decision reached in the case of *IRC v Tennant* (24 TC 215) and they take the view that that decision applies -
(a) where, although a settlor is not at the material time a party to a subsisting marriage, the terms of the settlement are such that a benefit may be conferred on substantially any person who may become the wife or husband of the settlor in future, or
(b) where, whether or not the settlor is married, the terms of the settlement are such as to indicate a specific intention that a future wife or husband of the settlor may be enabled to benefit."

(2) The conditions in para [B] are the "**s.86 trigger conditions**". Their effect is that the trust becomes settlor-interested, with the consequence that s.86 begins to apply.

In short, the relief is that a pre-1998 protected trust is allowed to benefit the settlor's grandchildren without becoming "settlor-interested".

60.6.1 *Trigger 1: Provide property*

Para 2A(2) sch 5 TCGA provides:

> The first condition is (subject to sub-paragraph (3) below) that on or after 17th March 1998 property or income is provided directly or indirectly for the purposes of the settlement—

Providing property is discussed in the chapter "who is the settlor": see 99.6 (Tainting).

There are three exceptions where provision of property is allowed. The first two are in Para 2A(2), which requires that the property is provided:

> (a) otherwise than under a transaction entered into at arm's length,
> (b) otherwise than in pursuance of a liability incurred by any person before that date.

Thirdly, para 2A(3) sch 5 TCGA provides:

> For the purposes of the first condition, where the settlement's expenses relating to administration and taxation for a year of assessment exceed its income for the year, property or income provided towards meeting those expenses shall be ignored if the value of the property or income so provided does not exceed the difference between the amount of those expenses and the amount of the settlement's income for the year.

I discuss these exceptions in the context of the 2017 protected trust rules, as that is where these issues now arise; see 88.4.4 (Gratuitous intent: Disregards (a)(b)); 88.4.7 (Expenses: Disregard (g)).

60.6.2 *Trigger 2: Emigrating trust*

Para 2A(4) sch 5 TCGA provides:

> The second condition is that—
> (a) the trustees cease on or after 17 March 1998 to be resident in the UK, or
> (b) the trustees, while continuing to be resident in the UK, become on or after 17th March 1998 trustees who fall to be regarded for

> the purposes of any double taxation relief arrangements as resident in a territory outside the UK.

60.6.3 *Trigger 3: Variation of trust*

Para 2A(5) sch 5 TCGA provides:

> The third condition is that on or after 17th March 1998 the terms of the settlement are varied so that any person falling within sub-paragraph (7) below becomes for the first time a person who will or might benefit from the settlement.

SP 5/92 provides:

> 36 This provision is concerned with situations where the terms of the settlement are varied by the beneficiaries or a court to admit new beneficiaries within the class of persons defined at TCGA 1992 Sch 5 para 9(7) without thereby bringing the settlement to an end and creating a new one. For example, where the terms of the trust include a power to appoint anyone within a specified range to be a beneficiary, exercise of that power after 19 March 1991 will not be regarded as a variation of the settlement...

60.6.4 *Trigger 4: Unexpected beneficiary*

Para 2A sch 5 TCGA provides:

> (6) The fourth condition is that—
> (a) on or after 17th March 1998 a person falling within sub-paragraph (7) below enjoys a benefit from the settlement for the first time, and
> (b) the person concerned is not one who (looking only at the terms of the settlement immediately before 17th March 1998) would be capable of enjoying a benefit from the settlement on or after that date.
>
> (7) Each of the following persons falls within this sub-paragraph—
> (a) any grandchild of the settlor or of the settlor's spouse or civil partner;
> (b) the spouse of or civil partner any such grandchild;
> (c) a company controlled by a person or persons falling within paragraph (a) or (b) above;
> (d) a company controlled by any such person or persons together with any person or persons (not so falling) each of whom is for the purposes of paragraph 2(1) above a defined person in relation to the settlement;

> (e) a company associated with a company falling within paragraph (c) or (d) above.

SP 5/92 provides:

> 37 For the purposes of clarification, this condition deals with "ultra vires" payments, ie cases where one of the persons defined at TCGA 1992 Sch 5 para 9(7) receives a benefit from the trust for the first time and that person is not a beneficiary under the terms of the trust deed. It may also apply where such a person benefits from a transaction with the settlement carried out, for example, under the trustees' investment powers.

This trigger condition may apply in the case of an ultra vires payment (ie a payment in breach of trust), but only if the payment is in fact a benefit.[14] A transaction under the trustees investment powers is not in principle a benefit, unless perhaps the transaction is a breach of trust, in which case it is not really "under the trustees investment powers".

60.7 Qualifying settlement

Section 86(1) provides:

> This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment—
> (a) the settlement is a qualifying settlement in the year;

"Qualifying" settlement is a label for a set of transitional rules.

60.7.1 *Post-1991 trust*

This is straightforward. Para 9(1) sch 5 TCGA provides:

> A settlement created on or after 19th March 1991 is a qualifying settlement for the purposes of section 86 and this Schedule in—
> (a) the year of assessment in which it is created, and
> (b) subsequent years of assessment.

60.8 Pre-1991 protected trusts

Para 9 continues with a complex transitional relief for what statute calls "protected settlements"; although it is generally better to adopt statutory terminology, I refer to these as "**pre-1991 protected trusts**". That terminology avoids confusion with pre-1998 protected trusts.

[14] See 50.4.11 ("Benefit" in breach of trust).

Para 9 (1A) sch 5 TCGA provides:

> Subject to sub-paragraph (1B) below, a settlement created before 19th March 1991 is a qualifying settlement for the purposes of section 86 and this Schedule in—
> (a) the year 1999–00, and
> (b) subsequent years of assessment.

The relief is in para 1B. Para 9(1B) sch 5 TCGA provides:

> Where a settlement created before 19th March 1991 is a protected settlement immediately after the beginning of 6th April 1999, that settlement shall be treated as a qualifying settlement for the purposes of section 86 and this Schedule in a year of assessment mentioned in sub-paragraph (1A)(a) or (b) above only if—
> (a) any of the five conditions set out in subsections (3) to (6A) below becomes fulfilled as regards the settlement in that year; or
> (b) any of those five conditions became so fulfilled in any previous year of assessment ending after 19th March 1991.

In the following discussion:

(1) A trust qualifying for this relief is a **" pre-1991 protected trust"**

(2) The conditions in para (a) are the "**s.86 trigger conditions**". Their effect is that the trust becomes a qualifying settlement, with the consequence that s.86 begins to apply. The drafting technique is different from that used for pre-1998 settlements but the end result is essentially the same.

60.8.1 *"Protected settlements"*

Para 9 sch 5 TCGA provides:

> (10A) Subject to sub-paragraph (10B) below, a settlement is a protected settlement at any time in a year of assessment if at that time the beneficiaries[15] of that settlement are confined to persons falling within

[15] Para 9(10C) defines beneficiary: "For the purposes of sub-paragraph (10A) above a person is a beneficiary of a settlement if—
(a) there are any circumstances whatever in which relevant property which is or may become comprised in the settlement is or will or may become applicable for his benefit or payable to him;
(b) there are any circumstances whatever in which relevant income which arises or may arise under the settlement is or will or may become applicable for his benefit or payable to him;
(c) he enjoys a benefit directly or indirectly from any relevant property comprised in

> some or all of the following descriptions, that is to say—
>
> (a) children of a settlor or of a spouse or civil partner of a settlor who are under the age of eighteen at that time or who were under that age at the end of the immediately preceding year of assessment;
>
> (b) unborn children of a settlor, of a spouse or civil partner of a settlor, or of a future spouse or civil partner of a settlor;
>
> (c) future spouses or civil partners of any children or future children of a settlor, a spouse or civil partner of a settlor or any future spouse or civil partner of a settlor;
>
> (d) a future spouse or civil partner of a settlor;
>
> (e) persons outside the defined categories.
>
> (10B) For the purposes of sub-paragraph (10A) above a person is outside the defined categories at any time if, and only if, there is no settlor by reference to whom he is at that time a defined person in relation to the settlement for the purposes of paragraph 2(1) above.

The point is that a pre-1991 protected trust may have minor children of the settlor as beneficiaries, but if it is to remain protected, it must exclude them before they become 18.

The trigger conditions are set out at length in para 9.

The relief for pre-1991 trusts was important in its day, and HMRC issued extensive guidance in SP 5/92. The guidance has ceased to be directly important (because there are now few pre-1991 protected trusts left) but it is still relevant where similar wording is used elsewhere.

60.8.2 *Trigger 1: Providing property*

Para 9(3) sch 5 TCGA provides:

> The first condition is that on or after 19th March 1991 property or income is provided directly or indirectly for the purposes of the settlement—
>
> (a) otherwise than under a transaction entered into at arm's length, and
>
> (b) otherwise than in pursuance of a liability incurred by any person before that date;
>
> but if the settlement's expenses relating to administration and taxation for a year of assessment exceed its income for the year, property or income provided towards meeting those expenses shall be ignored for the purposes of this condition if the value of the property or income so

the settlement or any relevant income arising under the settlement."

> provided does not exceed the difference between the amount of those expenses and the amount of the settlement's income for the year.

I discuss these conditions in the context of the 2017 protected trust rules, as that is where these issues now arise.[16]

60.8.3 *Trigger conditions 2-4*

Trigger condition 2 is the same as the s.86 trigger conditions which apply to pre-1998 protected trusts; it need not be separately set out here.[17]

The third and fourth conditions are based on the s.86 trigger conditions which apply to pre-1998 protected trusts with corresponding amendments in the wording. Para 9 sch 5 TCGA provides:

> (5) The third condition is that on or after 19th March 1991 the terms of the settlement are varied so that any person falling within sub-paragraph (7) below becomes for the first time a person who will or might benefit from the settlement.
> (6) The fourth condition is that—
> (a) on or after 19th March 1991 a person falling within sub-paragraph (7) below enjoys a benefit from the settlement for the first time, and
> (b) the person concerned is not one who (looking only at the terms of the settlement immediately before 19th March 1991) would be capable of enjoying a benefit from the settlement on or after that date.

Para 9(7) sch 5 TCGA provides:

> Each of the following persons falls within this sub-paragraph—
> (a) a settlor;
> (b) the spouse or civil partner of a settlor;
> (c) any child of a settlor or of a settlor's spouse or civil partner;
> (d) the spouse or civil partner of any such child;
> (da) any grandchild of a settlor or of a settlor's spouse or civil partner;
> (db) the spouse or civil partner of any such grandchild;
> (e) a company controlled by a person or persons falling within paragraphs (a) to (db) above;

[16] See 88.5.1 (Gratuitous intent: Disregards (a)(b)); 88.5.3 (Pre-2017 liability: Disregard (f)); 88.5.4 (Expenses: Disregard (g)).
Para 9(3) is the same as para 2A(2)(3); see 60.6.1 (Trigger 1: Providing property).

[17] Para 9(4) = para 2A(4); see 60.6.2 (Trigger 2: Emigrating trust).

> (f) a company associated with a company falling within paragraph (e) above.

See 60.6.3 (Trigger 3: Variation of trust); 60.6.4 (Trigger 4: Unexpected beneficiary).

60.8.4 *Trigger 5: Cease to be protected*

Para 9(6A) sch 5 TCGA provides:

> The fifth condition is that the settlement ceases to be a protected settlement at any time on or after 6th April 1999.

60.8.5 *Pre-1991 trusts: Critique*

These rules have been in place since 1991. Children then living (or born in the following decade) have reached 18. It is possible to envisage circumstances in which pre-1991 protected trusts could still exist but I suspect that there are no pre-1991 protected trusts now in existence. It is suggested in the interests of simplification that the transitional relief for pre-1991 protected trusts should now be withdrawn.

60.9 Trust residence condition

Section 86 TCGA provides:

> (1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...
> (b) the trustees of the settlement fulfil the condition as to residence specified in subsection (2) below;

This takes us to s.86(2) TCGA which provides:

> The condition as to residence is that—
> (a) there is no time in the year when the trustees are resident in the UK, or
> (b) there is such a time but, whenever the trustees are resident in the UK during the year, they fall to be regarded for the purposes of any double taxation relief arrangements[18] as resident in a territory outside the UK.

Condition (a) is that the trustees are non-resident; condition (b) is that the trustees are UK tax-resident but treaty-resident in a foreign state with a capital gains article (under the tie-breaker).[19]

[18] For the meaning of this term, see 12.6.1 ("DTR arrangements" for CGT).

[19] For treaty aspects, see 60.19 (DT reliefs: s.86 TCGA).

60.10 Settlor residence/domicile conditions

Section 86 TCGA provides:

> (1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...
>
> (c) a person who is a settlor in relation to the settlement ("the settlor")
>
> [i] is domiciled[20] in the UK at some time in the year and
>
> [ii] is resident in the UK for the year;

Section 86 does not apply to a foreign domiciled settlor, whether or not they claim the remittance basis. At first sight this seems a surprising inconsistency with the general scheme of taxation of foreign domiciliaries, introduced in 2008. It was however a deliberate decision.[21] No reason was given for it so it is tempting to speculate. Probably it reflects an understanding, which most readers would accept, that it is not appropriate to apply the rules to settlors and trustees from outside the UK because:

(1) the definition of "settlor-interested" for s.86 purposes is too wide, and

(2) the trigger conditions are too harsh and too complicated,

One must bear in mind that foreign settlors and trustees may not have had the same opportunities to consider UK legislation when making or administering their settlements.

That is actually quite a good reason, though one should not assume that rules of tax law, even important rules, are necessarily enacted for good reasons. Perhaps it was just a concession thrown without much rationalisation, to placate the lobby opposing the 2008 reforms, that is, the explanation may be located in tax politics rather than tax policy.

Although no claim is needed, the matter should be disclosed on a tax return, if one is completed: see 60.18.1 (Non-domiciled settlor).

60.11 Section 86 gains condition

Section 86 TCGA provides:

> (1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...

[20] Section 86(3A) TCGA provides: "Section 835BA (deemed domicile) applies for the purposes of subsection (1)(c)." This is the standard wording to apply the deemed domicile rules.

[21] Draft Finance Bill clauses which would have amended s.86 were withdrawn.

> (e) by virtue of disposals of any of the settled property originating from the settlor, there is an amount on which the trustees would be chargeable to tax for the year under section 1(3) if the assumption as to residence specified in subsection (3) below were made.

I refer to this as the "**s.86 gains condition**".

60.11.1 *Residence assumption*

The assumption as to residence is set out in s.86(3) TCGA but in order to follow it one must read it with s.86(2):

> (2) The condition as to residence is that—
> (a) there is no time in the year when the trustees are resident in the UK, or
> (b) [i] there is such a time but,
> [ii] whenever the trustees are resident in the UK during the year, they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK
> (3) [a] Where subsection (2)(a) above applies, the assumption as to residence is that the trustees are resident in the UK throughout the year; and
> [b] where subsection (2)(b) above applies, the assumption as to residence is that the double taxation relief arrangements do not apply.

I refer to the assumption as to residence in s.86(3)[a] as "the s.86 residence assumption".[22] The statutory residence assumption may be regarded as a deeming provision, or at least, like a deeming provision, it is construed purposively.[23]

In para (3)[b] the assumption is not in fact an assumption "as to residence": the assumption is a disapplication of treaty relief, but the meaning is clear, no short label could accurately summarise the position, and this point does not often arise. See 61.6.1 (s.87 residence assumption).

60.11.2 *Ascertaining s.86 gains*

The condition in s.86(1)(e) is that there is an amount, which I call the

[22] For statutory residence assumptions, see 61.6.1 (s.87 residence assumption).

[23] See App 8.1.2 (Statutory assumptions).

"**s.86 gains**". The quantum of the s.86 gains matters because the amount of the charge depends on that.

All the usual CGT reliefs are in principle applicable in computing the s.86 gains. For instance, hold-over relief is available on a transfer to a UK resident beneficiary, if the usual conditions are satisfied.[24]

Para 1(1) sch 5 TCGA provides:

> In construing section 86(1)(e) as regards a particular year of assessment, the effect of section 1K shall be ignored.

This disapplies the trust annual CGT exemption[25] (which is fair, because the settlor has their own annual exemption).

60.12 Death of settlor

Section 86 TCGA provides:

> (1) This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment ...
>
> (f) paragraph 3, 4 or 5 of schedule 5 does not prevent this section applying.

This sets out three conditions which are best considered separately.

Para 3 sch 5 TCGA provides:

> Section 86 does not apply if the settlor dies in the year.

What is the reason for this rule? Presumably it was thought unfair to tax the settlor's estate on post-death gains, and too much trouble to split the year into disposals before/after the death.

60.13 Death/divorce of beneficiaries

The last two s.86 conditions are set out in paras 4 and 5 sch 5 TCGA:

> 4(1) This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for one of the following reasons, namely, that—
>
> (a) property is, or will or may become, applicable for the benefit of or payable to one of the persons falling within para 2(3)(b) to (db) above,
>
> (b) income is, or will or may become, applicable for the benefit of or payable to one of those persons, or
>
> (c) one of those persons enjoys a benefit from property or income.

[24] See HMRC Helpsheet 295 quoted at 61.6.3 (s.1(3) amount: Exemptions/reliefs).

[25] See 44.2.4 (Annual exemptions: Trusts).

> (2) This paragraph also applies where sub-para (1) above is fulfilled by virtue of 2 or all of paras (a) to (c) being satisfied by reference to the same person.
> (3) Where this paragraph applies, section 86 does not apply if the person concerned dies in the year.
> (4) In a case where—
> (a) this paragraph applies, and
> (b) the person concerned falls within para 2(3)(b), (d) or (db) above,
> section 86 does not apply if during the year the person concerned ceases to be married to, or a civil partner of, the settlor, child or grandchild concerned (as the case may be).
> 5 (1) This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for the reason that there are 2 or more persons, each of whom—
> (a) falls within para 2(3)(b) to (db) above, and
> (b) stands to gain for the reason stated in sub-para (2) below.
> (2) The reason is that—
> (a) property is, or will or may become, applicable for his benefit or payable to him,
> (b) income is, or will or may become, applicable for his benefit or payable to him,
> (c) he enjoys a benefit from property or income, or
> (d) 2 or all of paras (a) to (c) above apply in his case.
> (3) Where this paragraph applies, section 86 does not apply if each of the persons concerned dies in the year.

I cannot see the point of this, though it does offer a kind of symmetry with para 3. I doubt if it ever has or ever will apply.

60.14 s.86 gains attributed to settlor

Assuming all eight s.86 application conditions are satisfied, we proceed to s.86(4) TCGA which provides:

> Where this section applies—
> (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor
> [i] in the year
> [ii] or if, as respects the settlor, the year is a split year, in the UK part of that year ...

The point of para [ii] is that there is no split-year relief.[26] The entire gains of the year are taxable, even if the settlor has a split year and the gains accrue during the offshore part of the year.

[26] See 10.3.3 (When no split-year relief).

60.14.1 *Residential property: CGT rate*

Suppose a gain accrues to a trust within s.86 on a disposal of residential property.

The gain is not within s.86 to the extent that it is charged on the trustees.[27] However, residential property gains may accrue to trustees on which they are not subject to CGT. This could occur where the gain accrues on a disposal of non-UK residential property, or where the trustees' gain subject to CGT is reduced by 2015 rebasing. Gains charged on the settlor under s.86 could therefore represent residential property gains.

What is the rate of tax on such gains? HMRC say that s.86 gains of the settlor are not the same as the actual gains of the trustees.[28] At first sight, therefore, the s.86 gains do not have the nature of residential property gains. On that basis the settlor would be subject to CGT on the gains at the normal CGT rates of 10% and 20%, not the higher CGT rates of 18% and 24% which apply to residential property gains.[29] But the definition of "residential property gains" is "a chargeable gain accruing to a person on a disposal of residential property".[30] That seems wide enough to include a s.86 gain which accrues to a person (the settlor) and does so on a disposal of residential property (it does not matter that the disposal is made by a trust or underlying company). The fact that the s.86 gains are not the same as the trustees gains does not stop them from both being residential property gains. This view fits the purpose of s.86, which is to put the settlor in the same position as if they had not made the settlement.

60.15 Interaction of s.86/s.3 TCGA

Suppose a settlor-interested trust within s.86 TCGA owns a non-resident company within s.3 TCGA, and a gain accrues to the company. The gain is treated as accruing to the trustees. In the absence of express provision, this gain would not fall within s.86 because the s.86 gains condition would not be satisfied: the gain does not accrue "by virtue of disposals of any of the settled property".[31] The company property is not settled property.

[27] See 57.30.2 (UK-land gain outside s.86/87).

[28] See 60.19.1 (Trust treaty-resident outside UK).

[29] See 43.14.1 (Residential property gain).

[30] See 57.37 (Residential property gain).

[31] See 60.11 (Section 86 gains condition).

Para 1(3) sch 5 TCGA deals with this:

> In a case where—
>
> (a) the trustees are participators in a company in respect of property which originates from the settlor, and
>
> (b) under section 3 gains or losses would be treated as accruing to the trustees in a particular year of assessment by virtue of so much of their interest as participators as arises from that property if the assumption as to residence specified in section 86(3) were made,
>
> the gains or losses shall be taken into account in construing section 86(1)(e) as regards that year as if they had accrued by virtue of disposals of settled property originating from the settlor.
>
> Section 3B(1) to (3) shall apply for the purposes of this sub-paragraph as they apply for the purposes of that section.

60.16 Corporate settlor

Section 86 TCGA will not apply to a company which creates a settlor-interested settlement, for the following reasons (any one would suffice):

(1) In the case of a commercial trust, the company is not a settlor.[32]

(2) Even assuming a trust made with bounty/gratuitous intent:

  (a) In the case of a close company, those who control it will usually be settlors, and the company will not be a settlor.[33]

  (b) Even if the company is a settlor:

    (i) Section 86 only applies if the company settlor is resident and domiciled (ie incorporated) in the UK, which is not likely to be the case.

    (ii) The context suggests that only individual settlors are intended to be caught.

60.17 s.86/87 & BAD relief interaction

This section considers whether business asset disposal relief[34] (formerly called “entrepreneurs’ relief) is available on a disposal by a non-resident trust, within s.86, assuming all the relevant conditions are satisfied (so that a disposal by a UK resident trust would qualify for the relief).

Section 169N TCGA provides (so far as relevant):

[32] See 99.39 (Pension/employee benefit trust).

[33] See 99.40.1 (Co settlor: s.86 definition).

[34] See 56.19 (BAD relief: Remittance basis).

> (1) Where a claim is made in respect of a qualifying business disposal—
>
> (a) the relevant gains (see subsection (5))[35] are to be aggregated, and
>
> (b) any relevant losses (see subsection (6)) are to be aggregated and deducted from the aggregate arrived at under paragraph (a).
>
> (2) The resulting amount is to be treated for the purposes of this Act as a chargeable gain accruing at the time of the disposal to the individual or trustees by whom the claim is made.
>
> (3) The rate of capital gains tax in respect of that gain is 10%, but this is subject to subsections (4) to (4B)...[36]
>
> (9) Any gain or loss taken into account under subsection (1) is not to be taken into account under this Act as a chargeable gain or an allowable loss.

The technical question is whether the gains which are treated as accruing to the settlor are the same gains as the gains accruing to the trustees. It is considered that one should apply a purposive construction so that the relief is available.[37] If that were wrong, UK law would not be EU-law compliant, which would give a further defence if the trustees were resident in a MS.

However if it is possible to make the trust UK resident in the year of the disposal, that would be better, as the issue would not arise.

On the other hand, BAD relief is probably not available if the trust is within s.87, as the s.87 gain accruing to a beneficiary is not the same gain.[38]

60.18 Tax return: s.86 gains

60.18.1 *Non-domiciled settlor*

This section considers the position where gains accrue to a settlor-interested trust, but s.86 does not apply because the settlor is not UK domiciled.

[35] Section 169N(5) TCGA provides: "In subsection (1)(a) "relevant gains" means—
(a) if the qualifying business disposal is of (or of interests in) shares in or securities of a company (or both), the gains accruing on the disposal (computed in accordance with the provisions of this Act fixing the amount of chargeable gains), and
(b) otherwise, the gains accruing on the disposal of any relevant business assets comprised in the qualifying business disposal (so computed)."

[36] Subsections (4) to (4B) impose a £10m cap which need not be considered here.

[37] A similar issue arises for DTAs; see 60.19.1 (Trustees treaty-resident outside UK).

[38] See 61.60.1 (Trustees treaty-resident outside UK).

If the settlor claims the remittance basis, and submits a tax return, they will have completed the relevant boxes in SA109 and no further return or disclosure is necessary.[39]

If the settlor does not claim the remittance basis, but does submit a tax return, then:

(1) It is necessary to tick box 23 in form SA109 (2022/23). The caption by this box states: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability for 2022–23, put 'X' in the box. Please explain in box 40 how your domicile is relevant to your Income Tax or Capital Gains Tax liability*. (There are further relevant boxes if this is the first domicile claim).

(2) It is not necessary to tick box 8 in form SA100 (2022/23). The caption by this box reads: *Residence, remittance basis etc. Were you, for all or part of the year to 5 April 2023, one or more of the following – not resident, not domiciled in the UK and claiming the remittance basis, dual resident in the UK and another country?*

If the settlor does not submit a tax return (because HMRC have not sent a notice to submit the return, and there are no income/gains requiring a return) then no claim or notification is needed.

60.18.2 *UK domiciled settlor*

Helpsheet HS299 (Non-resident trust and CGT) 2021 provides:

> If you're liable to tax when gains arise to one or both of the non-resident trustees of your trust and to relevant overseas private companies in which they invest, the trustees' net chargeable gains are attributed to you. You should include them in the overall figure in box 17 on your Capital Gains Tax summary pages. You should include details of these gains in your computations accompanying these pages.

60.19 DT relief: s.86 gains

60.19.1 *Trust treaty-resident outside UK*

Suppose:

(1) A trust within s.86.

(2) The trustees are treaty-resident in a foreign state whose DTA has a standard form CGT article.

[39] See 123.4 (Claim made in return).

(3) The settlor is UK tax-resident and not treaty-resident in a foreign state.

The question is whether the settlor qualifies for third-party DTA relief.[40] Where a Savings Clause applies, the answer is no.

What if the treaty does not have a Savings Clause? Section 86(4) TCGA provides:

> Where this section applies—
>
> (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in the year ...

In the HMRC view, the fact that the trustees are treaty-resident in a foreign state with standard form DTA CGT relief does not allow the settlor to claim third-party relief from s.86.

HMRC raise two arguments in the Manuals. The first is a categorisation, *Bricom*-type argument. The CG Manual provides:

> **CG38545: Double taxation relief** - TCGA92/S86 [Dec 2021]
> Articles in double taxation agreements which give sole taxing rights to the alienator's country of residence do not apply to the gain chargeable on the settlor under TCGA92/S86. That is because the person making the disposal is the trustees and not the settlor. Section 86 does not deem the trustees' gain to accrue to the settlor. Instead section 86(4) treats the settlor as accruing a gain equal to the gain that accrues to the trustees. This is a particular issue if the country of residence does not tax capital gains, for example, Mauritius or New Zealand. Some Double Taxation agreements, including Mauritius and New Zealand, have been amended to make it clear that the UK has the right to charge attributed gains.

I think this argument is debatable, but the Courts have accepted it in other avoidance contexts and so it would likely be accepted here.[41]

If needed, HMRC have a further argument, on which the CG Manual provides a hint, in a section (now withdrawn) discussing s.77 TCGA (long ago repealed). The Manual first explains why third–party DT relief did apply to s.77 TCGA[42] when trustees were treaty-resident in a foreign state

[40] See 107.21 (Third-party DT relief).

[41] See 109.4 (Characterisation: Same income?).

[42] Section 77(1) TCGA (now repealed) provided, so far as relevant:

> Where in a year of assessment—
>
> (a) chargeable gains accrue to the trustees of a settlement from the disposal of

with a capital gains article:

> ***CG34912. Double taxation relief*** *[Jul 2019]*
> *A settlor may be able to claim exemption [from s.77 TCGA] on some or all of the attributed trust gains, but this depends on the terms of the particular double taxation agreement. The gain which is chargeable on the settlor is not the same as the gain which accrues to the trustees. Therefore Articles which exempt trustees from UK tax on gains accruing on the disposal of particular property do not necessarily operate to exempt the settlor from liability under Section 77. However section 77(1)(b) requires there to be an amount on which the trustees would have been chargeable for the year in respect of the gains in question. So if the correct interpretation of the Double Taxation Agreement by reference to the relevant acts is that the trustees would be exempt if they were chargeable then there is no liability.*

HMRC say this argument does not run for s.86 because the legislation is differently worded:

> *This is by way of contrast with section 86 where there is a hypothesis in subsections (1)(e)(i) and (3) that the trustees are in fact resident in determining whether the section applies*[43] *and therefore one cannot take into account the actual non-residence. Compare Bricom Holdings v CIR 70 TC 272.*

This is not necessarily right[44] but the question is not likely to arise.

Another argument, if needed, is that s.86(3) envisages a charge in a case where trustees are dual resident in the sense of being UK tax-resident but treaty-resident in a foreign state. In that case the treaty is intended to be overridden. By implication the same should apply where the trustees are treaty-resident in a foreign state and not UK resident at all.

any or all of the settled property,

(b) after making any deduction provided for by section 2(2) in respect of disposals of the settled property there remains an amount [now, s.1(3)] on which the trustees would be chargeable to tax for the year in respect of those gains ... and

(c) at any time during the year the settlor has an interest in the settlement,

[i] the trustees shall not be chargeable to tax in respect of those gains but

[ii] instead chargeable gains of an amount equal to that referred to in para (b) shall be treated as accruing to the settlor in that year.

[43] See 60.11 (Section 86 gains condition).

[44] See 61.60.1 (Trustees treaty-resident outside UK) for the discussion on the point in the context of s.87.

In practice one should plan on the basis that the settlor will not qualify for third party DTA relief.

HMRC do accept that the settlor does qualify for third-party foreign tax credit relief, ie foreign tax paid by the trustees may be set against the s.86 charge. This is fair though not consistent with the HMRC argument on characterisation discussed above. The CG Manual provides:

> **CG38545: Double taxation relief - TCGA92/S86** [Dec 2021]
> Credit relief may be given for any foreign tax paid on the gains. This is because the gain chargeable on the settlor is calculated by reference to the gain that accrues to the trustees. Foreign tax credit is allowed either under the credit Article in a double taxation article by TIOPA10/S18(1) or unilaterally by TIOPA10/S9(2).

60.19.2 *Settlor treaty-resident outside UK*

Suppose:

(1) A trust within s.86.
(2) The settlor is UK tax-resident but treaty-resident in a foreign state.

Can the settlor claim direct relief? The point is the same as for s.3 gains. Art.13(5) OECD Model provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the *alienator* is [treaty-resident].

On a literal reading, the settlor does not qualify for treaty relief because (though treaty non-resident) the settlor is not the alienator. The trustees are the alienator but (on the facts of this example) the trustees are not treaty non-resident. So the terms of art.13(5) are not satisfied. The US treaty is wider and DT exemption applies to a settlor who is treaty-resident in the US.[45] Even under OECD Model, the same result is arguable on the grounds that the gain is treated as accruing to the settlor, they should be deemed to be the alienator; or the word "alienator" does not require that one must alienate property, only that the gain on the alienation accrues to the person.

60.19.3 *Trust co treaty-resident outside UK*

If a non-resident trust within s.86 owns a treaty non-resident company

[45] See 91.7.8 (s.624/720 income; s.3/86 gain).

which realises a gain, DT relief is disallowed and the settlor is taxable; see 64.41 (Trust participator: No DT relief).

CHAPTER SIXTY ONE

CAPITAL PAYMENTS FROM NON-RESIDENT TRUSTS: s.87 CODE

61.1 s.87 code: Introduction
61.2 "Settlement"/"settled property"
61.3 Non-classic trust
61.3.1 Outright transfer: s.87
61.3.2 Usufruct: s.87
61.3.3 s.87/s.3 relationship
61.3.4 Foundations: s.87
61.4 Non-resident trust condition
61.5 The s.87 charge
61.6 Section 1(3) amount
61.6.1 s.87 residence assumption
61.6.2 Trust outside s.87
61.6.3 s.1(3) amount: Exemptions/reliefs
61.6.4 Claims for relief
61.6.5 CGT annual exemption
61.6.6 UK land/land-rich asset
61.6.7 s.86 gain deducted
61.7 Capital payment
61.7.1 "Capital payment"
61.7.2 "Payment"
61.7.3 Termination of settlement
61.7.4 Benefit chargeable to IT
61.7.5 Payment from unremitted income
61.7.6 Payment from unremitted gains
61.7.7 Payment to non-resident
61.7.8 Arm's length relief

61.1 s.87 code: Introduction

This chapter considers CGT charges on beneficiaries who receive capital payments from non-resident trusts. I call this the **“s.87 code**”. This is set out in s.86A - s.97 and Sch 4C TCGA.

[1] (14th ed., 2024-25), Chapter 32 (Payments to Charity from Non-Resident Trusts) online version *http://www.taxationofcharities.co.uk*

There are *four* versions of the s.87 code:

Version	**Applies**	**See para**
Standard s.87 code	Generally	*Discussed here*
Sch4C s.87 code	After sch4B-transfer	62.19
Modified codes for offshore income gains		
Modified standard code for OIGs		67.13
Modified sch4C code for OIGs		62.32

The result is so intricate that no written description could do justice to its complexities.

The rules were introduced in 1981, extended in 1998, extended and rewritten in 2008, and extended again in 2017.

In the following discussion:

The **"pre-2008 s.87"** means s.87 as it was before the 2008 amendments.

The **"s.87 guidance note"** means HMRC's 54-page guidance note entitled "FA 2008 changes to the CGT charge on beneficiaries of non-resident settlements".[2]

61.2 "Settlement"/"settled property"

Section 97(7) TCGA provides:

> In sections 86A to 96 and Schedule 4C and in this section—
> "settlement" has the meaning given by section 620 of ITTOIA 2005, and
> "settled property" and references (however expressed) to property comprised in a settlement shall be construed accordingly.

"Settlement" here means settlement-arrangement.[3]

The estate of a deceased person is not a "settlement" in this sense.[4]

61.3 Non-classic trust

In practice, s.87 is normally concerned with trusts in the classic sense. But a settlement-arrangement need not be a classic trust. I refer to that here as a "settlement" with scare quotation marks.

Section 97(7A) TCGA provides the standard deemed-trustee rule to deal

[2] First published May 2009, 2nd version October 2009, *http://webarchive.nationalarchives.gov.uk/20140109143644/http://www.hmrc.gov.uk/cnr/beneficiaries-non-resident.pdf*

[3] See 87.4 (Settlement-arrangement definition of settlement).

[4] See 88.8.1 (Is estate a "settlement" for s.87).

with the situation where the settlement-arrangement is not a classic trust, and so does not have trust-law trustees.[5] It continues:

> (and a person who is treated as a trustee of the settlement by virtue of this subsection shall be treated as a trustee of the settlement for the purposes of section 69).

Thus for s.87 purposes the distinct-person rule,[6] and the standard IT/CGT test of trust residence, apply to the deemed trustee.

61.3.1 *Outright transfer: s.87*

Suppose P gives an asset[7] outright to C. There is no classic trust, but there is a "settlement".[8]

No-one thinks s.87 would apply to this "settlement", but it is helpful to ask why not, as the answer is relevant for analysis of other cases.

The "settlement" has no trust-law trustees. There will be a deemed trustee, namely, C, on the basis that the property is vested in C and the management, generally, is also vested in C.[9]

Section 87 does not apply here because:

(1) There are no s.1(3) amounts (trust gains): no gains accrue to the deemed trustee in their capacity as trustee. On a disposal of the asset, gains accrue to C in C's private capacity.

(2) There can be no capital payments (benefits) from the deemed trustees.

This fits the scheme of the legislation. There is no need for the s.87 rules: a disposal of the asset constitutes a disposal by C, on which gains accrue to C. The purpose of s.87 is to deal with cases where gains (trust gains) do not accrue to beneficial owners.

61.3.2 *Usufruct: s.87*

A usufruct[10] is not a classic trust but it is a "settlement" within the

[5] See 87.8.2 (Non-classic trust: Deemed trustee).

[6] See 7.3 (Trustees a distinct person).

[7] Further complications arise if the asset is a non-resident company, see 61.3.4 (s.87/s.3 relationship).

[8] See 87.4 (Settlement-arrangement definition). The main significance is that if C is a child of P, and under 18, P will be taxed on the income arising under the "settlement".

[9] It makes no difference if the property is vested in a nominee for C, because of the CGT bare trust disregard; see 87.7 (Bare trust/nomineeship).

[10] See 90.25 (Usufructs).

settlement-arrangement definition.

The "settlement" has no trust-law trustees.

Section 87 TCGA does not apply to this "settlement", for the following reasons:

(1) There is no settled property. There are two items of property, one belonging to the usufructuary and the other belonging to the encumbered owner.

(2) There is arguably no deemed trustee as there is no one person in whom the property or its management is vested.

If (contrary to the above) there was a deemed trustee, the analysis of an outright transfer becomes applicable:

(3) No gains accrue to the deemed trustees: on a disposal of the usufruct property, gains accrue to the usufructuary and the encumbered owner in their private capacities. So there are no s.1(3) amounts (trust gains).

(4) There are no capital payments from the deemed trustees.[11]

This fits the scheme of the legislation. There is no need for the s.87 rules: a disposal of the usufruct property constitutes disposals by the usufructuary/encumbered owner of their respective interests, on which gains accrue to them.

Points (1) and (2) also support the view that a usufruct is not a settlement in the IHT sense. While the concept of IHT-settlement includes non-trust arrangements which are equivalent in effect to a trust, IHT assumes that a settlement has a trustee and settled property, and if an entity does not, then it should not be regarded as a settlement for IHT purposes.

61.3.3 *s.87/s.3 relationship*

Suppose P gives a non-resident company to C outright. There is no classic trust, but there is a "settlement" (in the settlement-arrangement sense). No-one thinks s.87 would apply to this "settlement", but it is helpful to ask why not, as the answer is relevant for analysis of other cases.

The "settlement" has no trust-law trustees. Who is the deemed trustee?

(1) Perhaps C is the deemed trustee, on the basis that the property here should be taken to be the shares. In that case the analysis is like any other

[11] In particular, the termination of the usufruct is not a capital payment.

gift to C.[12]

(2) Perhaps the company is the deemed trustee, on the basis that the company's property and its management is vested in the company. In that case, the answer may be that there can be no capital payments (benefits) from the deemed trustee.

More fundamentally, the non-resident company falls within s.3 TCGA. As a general principle, one cannot apply s.3 *and* s.87 rules, because of the presumption against double taxation.

61.3.4 *Foundations: s.87*

After some vacillation, the analysis adopted in this book is that:

(1) A Foundation is in principle a settlement within the standard IT/CGT definition and a settlement-arrangement.

(2) A Foundation is not a company.[13]

It may be said that the "settlement" has no trust-law trustees. If so, there will be a deemed trustee, namely, the Foundation itself, on the basis that the property and its management is vested in the Foundation.[14]

On this analysis, the s.87/s.3 overlap or border issue does not arise.

However another possible view is that:

(1) A Foundation is not a settlement, in the standard IT/CGT sense, and

(2) A Foundation *is* a company.

As a Foundation is in principle a "settlement" (it is an arrangement) the question would then arise whether one would apply s.87 or s.3.

In order to apply s.87, one needs to identify the s.1(3) amount, ie the amount on which the deemed trustees would be chargeable under s.1(3) if they were UK resident. The Foundation (if UK resident) would be subject to CT, on the basis that it is a company and not a settlement. So at first sight, the amount chargeable under s.1(3) would be nil! But there are two answers to this:

[12] See 61.3.1 (Outright transfer: s.87).

[13] See 90.14 (Stiftung/Foundation). Different considerations apply to a Foundation with Founder's Rights.

[14] I have considered whether the members of the board of the Foundation may be a deemed trustee on the basis that the management of the property is vested in them; but the board is simply an organ of the Foundation itself. Where a company is a trustee, no-one says that its directors are trustees. Also no gains can be said to accrue to the directors.

(1) Section 97(7A) applies the distinct-person rule, so the deemed trustees are a separate person which is not a company.
(2) One does not apply the deeming to that extent.[15]

So s.87 can apply to a Foundation even if (contrary to the view taken here) it were held to be a company.

It is considered that the context shows that s.87 should apply in priority to s.3. This fits the scheme of the legislation, as apportioning trust gains to participators would be difficult.

Different considerations apply to a Foundation with Founder's Rights. That is a company within s.3, and not a settlement. Gains accruing to the Foundation would be attributable to the founder and no-one else.[16]

Note incidentally that this analysis will sometimes favour HMRC and sometimes not; this is not a case where one analysis will benefit HMRC and the other the taxpayer.

61.4 Non-resident trust condition

Section 87(1) TCGA sets out the fundamental condition for the application of s.87:

> This section applies to a settlement for a tax year ("the relevant tax year") if there is no time in that year when the trustees are resident in the UK.

Statute often refers to a settlement "to which s.87 applies"; this means (in short) a non-resident settlement. In full, it means:
(1) a non-resident settlement; or
(2) a dual-resident settlement (more accurately, UK tax-resident, but treaty non-resident under the tie-breaker).[17]

It is not necessary for the settlement to be in existence at the time when a capital payment is received.[18]

61.5 The s.87 charge

Section 87(2) TCGA provides:

> [a] Chargeable gains are treated as accruing in the relevant tax year to

[15] See App 8.2 (Deeming provisions: Construction).
[16] See 90.14.10 (Founder's Rights: a company).
[17] See 61.38 (Dual-Resident trust: s.88 TCGA).
[18] *Bowring v HMRC* [2015] UKUT 550 (TCC) at [65] - [71].

a beneficiary of the settlement

[b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year

[c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.1(3) amount for the relevant tax year or any earlier tax year.

The key requirements are "capital payment" "s.1(3) amount" and "matching".

I refer to gains treated as accruing as "**s.87 gains**". The term "deemed gains" is sometimes used, but my terminology is clearer.

A s.87 gain accrues in the year that a capital payment is matched with a s.1(3) amount. That may be later than the year that the capital payment is made.

Section 87 is not strictly a charging section, it feeds into s.2 TCGA which imposes the charge. But I use the expression "s.87 charge" as a convenient shorthand.

61.6 Section 1(3) amount

Section 87(4) TCGA provides:

> The s.1(3) amount for a settlement for a tax year for which this section applies to the settlement is—
>
> (a) the amount upon which the trustees of the settlement would be chargeable to tax under s.1(3) for that year if they were resident in the UK in that year ...[19]

The terminology has changed over time:

Date	**Term**
1981-2008	Trust gains
2008-2018	s.2(2) amount
2018 -	s.1(3) amount

"s.1(3) amount" has more or less the same meaning as the term "trust gains" in the pre-2008 s.87. The old terminology was clearer, and EN FB 2008 itself used the term "trust gains". It is usually better to adopt statutory terminology, rather than using a different term with the same meaning but the term "s.1(3) amount" is opaque, so I use the phrase "s.1(3) amounts (trust gains)" or just "trust gains".

[19] For s.87(4)(b) see 61.6.7 (s.86 gain deducted).

Some practitioners use the term "stockpiled gains" or describe a trust as having a pool of s.1(3) amounts.

Strictly one should not use the term "s.1(3) amount" in the abstract. A s.1(3) amount can exist only in relation to a particular trust, and for a particular tax year. That is, each s.1(3) amount is linked to a specific trust and a specific tax year. But where the context is clear it is permissible to refer to a s.1(3) amount in isolation (leaving the words "for a settlement and tax year" to be inferred). The expression "s.1(3) amounts" (in the plural) is appropriate where there are s.1(3) amounts for more than one tax year.

61.6.1 *s.87 residence assumption*

The definition of s.1(3) amount refers to the amount on which the trustees would be chargeable to tax "if they were resident in the UK in that year". This is a statutory assumption, which may be regarded as a deeming provision, or at least, like a deeming provision, it is construed purposively.[20]

Statutory residence assumptions are quite common. I list them here as discussion in one context can be relevant to the others:

Assumption (my term)	**Provision**	**See para**
s.87 residence assumption	s.87(4) TCGA	*Discussed here*
s.86 residence assumption	s.86(1)(3) TCGA	60.11
s.3 residence assumption	s.3G(3) TCGA	64.4; 11.6.2
CFC residence assumption	-	61.60.1
RFI residence assumption	*various*	16.9.3

61.6.2 *Trust outside s.87*

Section 87(5) TCGA provides:

> The s.1(3) amount for a settlement for a tax year for which this section does not apply to the settlement is nil.

This makes sense, of course, since if s.87 does not apply the trustees must be UK resident and within the scope of CGT.

The s.87 guidance note provides:

> 10. Section 87(5) ... In particular this is needed to deal with transfer between settlements. The transferee settlement may have a [s.1(3)]

[20] See App 8.1.2 (Statutory assumptions).

> amount for a year in which the trustees were resident in the UK. Section 87(5) ensures no account is taken of that amount. But it can still be treated as having a [s.1(3)] amount for that year from the transferor settlement.

61.6.3 *s.1(3) amount: Exemptions/reliefs*

All the usual CGT reliefs are in principle available for computing the s.1(3) amount.

For instance, hold-over relief is available on a transfer to a UK resident beneficiary, if the usual conditions are satisfied. HMRC accept this. Helpsheet 295 (Relief for gifts and similar transactions, 2021) provides:

> There's no need for the transferor to be resident in the UK. Therefore the relief is available for trustees of non-resident settlements where the chargeable gain would, or might otherwise be, charged on UK residents.[21]

For 1981/1988/2008 transitional rules, see 61.40 (Pre-1981 gain/capital payment) ff.

61.6.4 *Claims for relief*

What is the position where a claim is needed for a relief or exemption?[22] A common example is relief for capital losses. Other examples include an election under reg 48 OFTR where a non-reporting fund owned by the trust converts into a reporting fund,[23] and claims for DT relief. There are too many to give a full list.

One needs to review the wording of the provision requiring a claim but these tend to take a standard form. For loss relief, the relevant provision requires that a claim is made by the person to whom the loss accrues, so a claim could be made by the trustees.[24] It is considered that the s.87 residence assumption requires one to assume that the trustees would have made any claims which are beneficial, even though no claim is made. So the trustees do not actually need to make a claim. This raises the old question of how far to carry the deeming.[25] My construction gives the most sensible result, as a claim makes no difference to the trustees own

[21] For instance, the gain might be charged under s.86 or s.87 TCGA.

[22] I am grateful to John Barnett of Burges Salmon for his comments on this issue.

[23] See 67.26 (Fund becomes reporting fund).

[24] See 123.2.3 (Capital loss claims).

[25] See App 8.2 (Deeming provisions: Construction).

tax position, and losses may arise at a time when the trustees have no UK beneficiaries and cannot possibly be expected to consider UK tax issues. It is supported by *Bricom v IRC*, a case on the CFC residence assumption:[26]

> The computation of the profits on which corporation tax is chargeable... involves ascertaining ... the amount which would have represented the amount of such profits if the controlled foreign company had been resident in the UK and had made all necessary claims for relief.

Of course, if the trustees do make a claim then this issue does not arise. A claim could be made by submitting form 50(FS) with a computation attached detailing the losses. But I wonder how often that is done in practice.

However that may be, the beneficiary who receives the capital payment does not make the loss claim. That avoids the problem of different beneficiaries making different claims.

Similarly, an election under reg 48 OFTR is made by the "participant in the fund". Unlike capital losses, it may not be obvious whether it is better to elect. So the *Bricom* deeming of all necessary (or beneficial) claims may not apply, and the trustees should make the election.

61.6.5 *CGT annual exemption*

What about the CGT annual exemption?[27] The CG Manual provides:

> **CG38610: Trustees' gains - section [1(3)] amount** [Nov 2019]
> The trustees do not have an annual exempt amount which is deducted in calculating the section [1(3)] amount.

And again:

> 9. ... [The s.1(3) amount] is defined in section 87(4). It is the amount on which the trustees would be liable to CGT if they had been resident and ordinarily resident in the UK during the year. As in the original section 87 this is the amount of the gains after deducting losses and without giving any annual exempt amount.[28]

The underlined words are wrong as s.1K(1) TCGA (extended to trustees by sch 1C TCGA) provides: "the annual exempt amount for the year is to

[26] See 61.60 (DT relief: s.87 gain).

[27] See 44.2 (CGT annual exemption).

[28] Section 87 guidance note, para 9.

be deducted from" trustees gains.[29] So "the amount upon which the trustees would be chargeable to tax under s.1(3) for that year if they were resident" is reduced by the exempt amount.

The courts might disapply the plain words if the result were absurd, but it is not. There may be an element of double relief as beneficiaries may have their own annual exemption. This rule is nevertheless sensible because it saves trustees from having to keep track of small gains (and it avoids non-compliance so far as one could not reasonably expect trustees to actually do so). Perhaps the author confused the position for s.86, where the trustee annual exemption is disapplied.[30]

The trust is deemed UK resident and so grouped with any other UK trusts for the purpose of ascertaining the annual exemption.[31] But the trust is not grouped with any other non-resident trusts. That might allow scope for fragmentation, but costs (and the GAAR) prevent abuse.

Of course, there is not much tax at stake here, especially after the reductions in the CGT annual exemption in 2023 and 2024.

61.6.6 *UK land/land-rich asset*

UK-land rebasing does not apply in computing s.1(3) amounts (trust gain) because:

(1) it must be assumed that the trust is UK resident;[32] and
(2) rebasing does not apply to UK resident trusts[33]

So the gain on a disposal of UK land/land-rich asset is a s.1(3) amount. However the part of the gain which is actually chargeable to CGT (ie the gain post-rebasing) is not a s.1(3) amount.[34]

61.6.7 *s.86 gain deducted*

In the absence of relief, a gain accruing to a trust may be:

(1) a s.86 gain taxed on the settlor and
(2) a s.1(3) amount (trust gain)

Section 87(4)(b) TCGA provides relief for s.87 and so prevents double

[29] See 44.2.4 (Annual exemption: Trusts).
[30] See 60.11 (Section 86 gains condition).
[31] See 44.2.5 (Grouped trusts).
[32] See 61.6.1 (S.87 residence assumption).
[33] See 57.16 (General rebasing conditions).
[34] See 57.30.2 (UK-land gain outside s.86/87)

taxation. It is necessary to read the whole of s.87(4) in order to follow the sense:

> The section 1(3) amount for a settlement for a tax year for which this section applies to the settlement is—
> (a) the amount upon which the trustees of the settlement would be chargeable to tax under section 1(3) for that year if they were resident in the UK in that year, or
> (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

In short, s.86 in principle has priority over s.87. This applies even if the settlor does not pay the tax which is due under s.86. That rule seems generous at first sight. But it makes sense, as it is not practical for beneficiaries to check whether or not the settlor is tax compliant.

61.7 Capital payment

61.7.1 *"Capital payment"*

"Capital payment" is defined in s.97(1) TCGA:

> In sections 86A to 96 and Schedule 4C and this section "capital payment" —
> (a) means any payment which is neither—
> (i) chargeable to income tax on the recipient, nor
> (ii) chargeable to income tax on another person under any of sections 643A, 643J and 643L of ITTOIA 2005 and sections 733A, 733C and 733E of ITA 2007,
> or, in the case of a recipient who is not resident in the UK, any payment received otherwise than as income...

Section 731 ITA has similar rules. For the interaction with s.731, see 50.17 (s.731/s.87 interaction).

61.7.2 *"Payment"*

Section 97(2) TCGA provides:

> In subsection (1) above references to a payment include references to
> [a] the transfer of an asset and
> [b] the conferring of any other benefit, and to
> [c] any occasion on which settled property becomes property to

which s.60 applies [nominee property][35].

For the meaning of benefit, see 50.4 (Benefit).

61.7.3 *Termination of settlement*

The termination of a settlement constitutes a capital payment, so any s.1(3) amounts at that time will be attributed to the beneficiaries who become entitled to the trust property: s.97(2)[c] TCGA.

This rule should not, in practice, affect well drafted settlements, whose life may extend for a century or more. If action is taken in time it will generally be possible to extend the life of a settlement by appropriate exercise of trustees' powers. Trustees should if appropriate diarise the date when the settlement may come to an end so as to take action beforehand.

61.7.4 *Benefit chargeable to IT*

A payment is not in general a capital payment if it is chargeable to income tax.

The CG Manual provides:

> **CG38625: Capital payments** [Jul 2019]
> The exclusion for amounts chargeable to Income Tax includes both actual income receipts and amounts deemed to be income for tax purposes. For example:
> [1] [a] Trust income payable to a life tenant
> [b] including distributions of accumulated income.[36]
> [2] Distributions of income treated as income of the settlor when it arises, ITTOIA05/S624(1).

What is the position if a trust makes an income distribution[37] to a remittance basis taxpayer, which is not remitted? This is not a capital payment. The payment is "chargeable" to income tax even if no tax is paid because of the remittance basis.[38] If that were wrong:

(1) There would be double taxation, a s.87 gain and an IT charge, if the

[35] See 87.7 (Bare trust/nomineeship).

[36] I guess para [b] is referring to income of a life tenant retained in a trust and paid to the life tenant after some delay, though a trusts lawyer would call that retaining income, not accumulating income. But it does not matter.

[37] For what is an income distribution, see 41.8 (Trust payment: Income/capital).

[38] See 2.3.1 (Unremitted RFI "chargeable").

payment were remitted.

(2) The payment would be matched with s.1(3) amounts which would reduce tax on subsequent capital payments with odd results and some scope for tax planning.

Similarly a benefit which is within s.731, or within s.731 subject to the s.731 remittance basis, is not a capital payment.[39]

The same applies if a settlor-interested discretionary trust within s.624 makes a distribution out of its income to the settlor: that is not a capital payment. In this case there does seem at first sight to be a problem, as there is no income tax charge on receipt of the payment.[40] However the sum is treated for all purposes of income tax to be the income of the settlor and that deeming should be applied in order to determine whether the payment is chargeable to income tax for the purposes of the definition of capital payment.

The same applies if the settlor is within the s.624 remittance basis.

The same applies if a person abroad makes a distribution out of its income to a transferor within s.720, or a transferor within the s.720 remittance basis: that is not a capital payment. (This issue arises in the exceptional case of a trust within s.720 and not within s.624, and in the more common case of a payment from a company held by a trust.)

61.7.5 *Payment from unremitted income*

Suppose:

(1) A remittance basis taxpayer ("S") receives foreign income ("old income") which is not remitted to the UK and so not taxed.

(2) S transfers the old income to a non-resident trust.

(3) The trustees invest and realise gains ("trust gains") in a subsequent tax year. For simplicity, assume that no income accrues to the trustees, or any income which arises to them is paid out to the settlor.

(4) The trustees make a distribution to the settlor which is received in the UK and which is derived from the old income.[41]

It is considered that the distribution is not a capital payment as it is

[39] See 50.17 (s.731/s.87 interaction).

[40] See 47.10.3 (Relief for settlor).

[41] On the mixed fund rules which apply in this case, see 20.10.3 (Unremitted income given to trust).

chargeable to income tax. Otherwise there would appear to be double taxation on the distribution, an income tax charge and a s.87 charge.

61.7.6 *Payment from unremitted gains*

Suppose:

(1) A remittance basis taxpayer ("S") receives foreign gains ("old gains") which are not remitted to the UK and so not taxed.
(2) S transfers the old gains to a non-resident trust.
(3) The trustees invest and realise gains ("trust gains") in a subsequent tax year.
(4) The trustees make a capital payment to the settlor which is received in the UK and which is derived from the old gains.[42]

At first sight there is a double charge, CGT on the old gains on the remittance basis, and a s.87 charge. That can hardly be right.

The RDR Manual gives an example where the old gains arise on a disposal to a trust (but that makes no difference to the analysis):

> **RDRM31180. Foreign chargeable gains accruing on disposal made otherwise than for full consideration** [Jan 2019]
> Example 2 (Ahmeda)
> A transfers his property in Dubai to a [non-resident[43]] trust receiving no consideration in return.[44] The deemed gain computed using the market value of the property at date of transfer is £400,000.
> The trustees subsequently sell the property for £550,000.
> The trustees then make a capital payment of £300,000 to a UK close company in which A's spouse is a participator.[45]

I refer to the £400k gain accruing to A as A's old gain.

The HMRC analysis is as follows:

> [1] £300,000 of A's foreign chargeable gain [ie of A's old gain] has been

[42] On the mixed fund rules which apply in this case, see 20.10.3 (Unremitted income given to trust).

[43] The example does not specify that the trust is non-resident, but that is, I think, assumed. I do not consider the position if the trust is UK resident, which is not likely in practice.

[44] The analysis is much more complex if the sale is for consideration but the consideration is less than market value. But in practice that will not often happen.

[45] A capital payment to a UK company of which A's spouse is a participator seems somewhat implausible: one would expect a capital payment to A. The example is framed this way in order to illustrate the extent of the definition of relevant person.

> remitted to the UK. This is because
> [a] the property is treated as deriving from his gain (Section 809T ITA 2007)[46] and
> [b] the proceeds from the sale of the property therefore also derive from the [old] gain.

The position is more complicated than that. The analysis depends on the value of the property at the time of the transfer into the trust, which is not specified.

If the property is worth £550k when transferred into the trust, the trustees do not realise a gain when they sell it, and the HMRC analysis is correct.

Suppose however the property is worth £400k when transferred into the trust. The £550k proceeds of sale received by the trustees is a mixed fund, consisting of:

Item	**Amount**	**Mixed fund category: Note**
A's old gain	£400,000	(e): Or category (h) if gain subject to foreign tax
Trustees' gain	£150,000	(i): Or could it be category (e) or (h)?
Total	£550,000	

Applying the mixed fund rules, the capital payment out of the mixed fund is treated as coming first from the trustees gain (at least, if it accrues in a later year, let us assume that is so). So only £150k of the old gain is remitted.

The HMRC analysis continues:

> [2] The company is a relevant person (Section 809M(2)(f) ITA 2007)

This is correct.

> [3] and property (that is, money) which derives from A's gain has therefore been received in the UK by or for the benefit of a relevant person (Section 809L ITA 2007).

The example did not in fact specify that the money was received in the UK, only that it was received by a UK company (which is not the same); but let us take that as implicit in the example.

The HMRC analysis continues:

> [4] The gain which accrues to the trust on the actual sale of the property will be subject to normal rules.

[46] See 18.45.2 (Remittance of deemed gain).

What are the normal rules? The author of the example has given up here. The answer is that the capital payment is matched to the trust gain (if there is one). Eg if the trust gain is £150k, the recipient of the benefit (in the example, the UK company) is subject to a s.87 charge on £150k.

This analysis leads to a fair result:

(1) If there is no trust gain, then £300k of the old gain is remitted

(2) If there is a trust gain of £150k, then £150k of the old gain is remitted and there is a s.87 charge on the £150k matched to the trust gain

Possibly HMRC assume that there is a s.87 charge on the gain *and* a remittance of £300,000 of the old gain, leading to double taxation; if so they but tactfully refrain from saying so. The effective rate of CGT on a capital payment could be:

Tax	**Rate**	**Comment**
CGT on the old gain	20%	Can be 28% (upper rate gains)
CGT on capital payment	32%	Including full interest surcharge
Total tax	52%	

But on the above analysis there is no double charge. The problem could arise on more complex facts, eg if the trustees make a capital payment to a non-resident beneficiary and then make a payment to a UK beneficiary. In such a case, it is suggested that one should construe the legislation to avoid a double charge; the question is how best to reach that conclusion. Possibilities include:

(1) So far as the s.87 charge applies, the capital payment is not to be regarded as derived from the old chargeable gains.

(2) The reference to income tax in the definition of capital payment could be read purposively as extending to CGT so the payment is not a capital payment.[47] Or the old gains exclude the deeming under s.87.

These solutions would be consistent with the position where old income is settled.[48]

Another possibility is to say that the value of the benefit is reduced to reflect the fact that remittance gives rise to a charge on the old gains.

[47] Contrast the ToA rules where a reference to income tax was construed to include corporation tax in order to avoid double taxation; see 51.3.3 (HMRC counterarguments).
I have also considered s.809P(12) ITA and s.32 TMA but these do not easily help.

[48] See 61.7.5 (Payment from unremitted income).

The position is simpler where the payment is made to the settlor, and not to a third party (as in the HMRC example). But even then, none of these solutions are straightforward. Legislation enacted in the slapdash manner of the FA 2008 is bound to leave rough edges, and the courts should seek to find a construction which avoids double taxation and produces a workable result.

61.7.7 *Payment to non-resident*

Section 97(1) TCGA provides:

> ... "capital payment" —
> (a) means any payment ... in the case of a recipient who is not resident in the UK, any payment received otherwise than as income...

As to when a payment is received as income, see 41.8 (Trust payment: Income/ capital). But it does not usually matter if a payment to a non-resident is a capital payment, because of the non-resident disregard.[49]

61.7.8 *Arm's length relief*

Section 97(1) TCGA provides:

> In sections 86A to 96 and Schedule 4C and this section "capital payment"...
> (b) does not include a payment under a transaction entered into at arm's length if it is received on or after 19th March 1991.

I refer to this as **"s.87 arm's length transaction relief"** and use the following terminology:

Term	**Meaning**
Arm's length transaction	Transaction entered into at arm's length
Full consideration transaction	Transaction on market value terms
Connected person transaction	Transaction between connected persons

An arm's length transaction is usually for full consideration, and such a transaction is not a benefit, and so not a capital payment (or it is was, the amount of the capital payment would be nil).[50] In this case s.87 arm's length transaction rule is not needed.

An arm's length transaction might be for less than full consideration,

[49] See 61.21 (Non-resident disregard).

[50] See 50.9.1 ("Benefit" for full consideration).

because the parties made some valuation mistake. In such a case there is no capital payment, either because of s.87 arm's length transaction relief or because of the fair bargain rule, with which the s.87 relief overlaps.[51]

Section 87 arm's length transaction relief does apply when there is an arm's length loan, or lease, even though the consideration for the transaction (ie market interest or rent) may (and often will) be less than the value of the benefit under the statutory valuation rules.[52]

One might have thought that a connected person transaction does not qualify for s.87 arm's length transaction relief because:

(1) it is treated for CGT as not "a *bargain* made at arm's length"[53] and so
(2) it should be treated as not a *"transaction* entered into at arm's length".

One might say that proposition (2) follows from (1) under the principles of construction which apply to deeming provisions.[54] But really there is no meaningful difference between the two propositions: they are two ways of saying the same thing. However HMRC do not agree. The CG Manual provides:

> **CG38625: Capital payments** [Jul 2019]
> The exclusion for arm's length payments covers commercial transactions.
> It also allows the trustees to enter into commercial transactions with connected persons such as the settlor. This is because 'a transaction at arm's length', the term used in TCGA92/S97(1), is not the same as 'a bargain made at arm's length', the term used in TCGA92/S18(2).
> Section 18 treats an acquisition and disposal between connected persons as a bargain not made at arm's length and imposes the market value rule

[51] See 39.35.4 (Fair bargain rule). When s.87 arm's length transaction relief was introduced, in 1991, the overlap would not have been so clear, as the fair bargain cases came later.

[52] See 50.9 (Statutory valuation rules). The CG Manual appears to accept this:

> **CG38625: Capital payments [**Jul 2019]
> The exclusion for payments under arm's length transactions is also relevant to the provision of benefits, see CG38640. Trust property occupied by a beneficiary at a commercial rent or a loan on commercial terms would not be a capital payment.

But this passage was written in 2015, before the enactment of the statutory valuation rules in 2017. Although the text has not changed, it is not likely that HMRC have considered the issues of the 2017 reforms. So the taxpayer should not draw much comfort from these sentences.

[53] See App 4.10.9 (Deemed non-arm's length).

[54] See App 8.2 (Deeming provisions: Construction).

> in TCGA92/S17. So if the trustees buy an asset from the settlor sections 17 and 18 will treat the acquisition as taking place at market value whatever the terms of the contract. But if the trustees pay a commercial price for the asset the payment is not a capital payment for the purposes of section 87. If the trustees pay more than the market value that may be a capital payment.

The HMRC view is long-standing.[55] So it seems that a connected person transaction can qualify for arm's length transaction relief.

The point will not often arise, as transactions between trustees and beneficiaries are not generally entered into at arm's length: the fact that the transaction is on arm's length terms is not by itself enough to make it an arm's length transaction.[56]

61.8 Receipt from trustees

The s.87 charge applies where a beneficiary has received a capital payment from the trustees. There are two requirements here: a *receipt by a beneficiary*, and a receipt *from trustees*.

On the general meaning of "receipt by a beneficiary" see 50.5 (Who receives the benefit?).

Section 97(5) TCGA expands on these concepts:

> For the purposes of sections 86A to 90 and Schedule 4C a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
>
> (a) he receives it from them directly or indirectly, or
> (b) it is directly or indirectly applied by them in payment of any debt of his or is otherwise paid or applied for his benefit, or
> (c) it is received by a third person at the beneficiary's direction.

This does not extend the meaning of capital payment. It assumes that there is a capital payment (as defined) and addresses the questions of who is the recipient and whether the receipt is from the trustees.[57]

The explanation for s.97(5) is to be found in *Potts' Executors v IRC* 32 TC 211. This concerned (what is now) s.641 ITTOIA which (then) applied

[55] See SP 5/92 cited at 92.5.1 (Gratuitous intent: Disregards (a)(b)).

[56] See App 4.10 (Arm's length).

[57] This is clear from the wording, but if authority is needed, see *Burton v HMRC* [2009] SFTD 682 at [43]: "Section 97(5)(b) does not ... require that the benefit be received by the beneficiary but rather extends the circumstances in which a capital payment is treated 'as received' from the trustees."

to:

> Any capital sum paid directly or indirectly ... to the settlor.

In *Potts*, at the request of the settlor, a company connected with a settlement paid tax liabilities of the settlor.[58] The settlor did not actually receive the funds. The House of Lords (in the era of literal, perhaps over-literal, interpretation) held that this was not a payment to the settlor directly or indirectly, so (what is now) s.641 ITTOIA did not apply.
Lord Simonds said:

> It is sufficient to say that [the word 'indirectly'] cannot so enlarge the meaning of the words 'paid to the settlor' as to include payment to some other person than the settlor for his own use and benefit. I do not feel called upon to determine positively what transactions it might be apt to cover. It may be that it is not apt to cover any that are not already covered by the normal meaning of the words 'paid to the settlor'.

Lords Normand and Oaksey said:

> ...it was obviously necessary to provide for the case when persons accountable to the settlor are interposed between the payer and the settlor for the purpose of disguising the transaction. That is a satisfactory explanation of the use of the words "directly or indirectly".
> I think the words "paid directly or indirectly to the settlor" should be held to mean paid into the settlor's hands or into the hands of someone accountable to him.

Lord MacDermott said:

> [The payments] made to Mr. Potts' agents or in some circuitous way designed to put the money under his control eventually. Had they been, the word "indirectly" might have had a part to play, for in that case the issue would be whether, as a matter of fact, payment had been made one way or another to the settlor. In short, as it appears to me, the words "directly or indirectly" bear only on the mechanics of payment in fact.

It seems to me that there are three distinct views here:
(1)The word "indirectly" adds nothing or nothing much (Lord Simonds).
(2) The word "indirectly" applies to payments to X via someone accountable to X (Lords Normand and Oaksey).

[58] The trust also made other payments, such as payments to charities at the request of the settlor.

(3) The word “indirectly” applies to payments “in some circuitous way designed to put the money under his control eventually” (Lord MacDermott).

The second of these views was adopted in *Piratin v IRC* 54 TC 730. Here a payment was made from A to B on terms which obliged B to pay an equivalent sum to C. This was held not to amount to an indirect payment to C, because B was not “accountable” for the sum received. The Judge considered the comments of Lords Simonds, Normand and Oaksey set out above and continued:

> One thus finds both Lord Normand and Lord Oaksey expressing the opinion in the *Potts* case that a sum cannot be said to be “paid indirectly” to the settlor within the section, unless it is paid into the hands of someone accountable to him.

“Accountable” was understood strictly (I would have thought, excessively so):

> It is common ground that the word “accountable” in an English law sense is not apt to describe the position of a person who is under a mere contractual obligation, such as that owed by [B] to the two settlors. [Counsel for the Revenue] suggested that Lord Normand may have intended to use the word according to a broader meaning attributed to it by Scottish lawyers, but I can see no sufficient justification for that inference. I think that Lord Normand referred to strict accountability in English law, and Goff J. took the same view in *IRC v Wachtel* 46 TC 543 at page 555F....

He rejected the view that the word “indirectly” adds nothing but also rejected Lord MacDermott’s wide approach:

> The phrase “or indirectly” in the context of s 451(1) undeniably gives rise to problems of interpretation. If, however, a broader meaning is attributed to it than that attributed to it by Lord Normand and Lord Oaksey, so that it is capable of including payments to persons who are not accountable to the settlor, it is difficult to see where the line should be drawn.

In 1981 parliament reversed these decisions by adding a new subsection to (what was then) s.451 ICTA 1970:

> (9) For the purposes of this section there shall be treated as a capital sum paid to the settlor by the trustees of the settlement any sum which—
>
> (a) is paid by them to a third party at the settlor’s direction or by virtue of the assignment by him of his right to receive it; or

> (b) is otherwise paid or applied by them for the benefit of the settlor...

The 1981 Act also introduced s.87 code including the provision which is now s.97(5) TCGA:[59]

> ... a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
> (a) he receives it from them directly or indirectly, or
> (b) [i] it is directly or indirectly applied by them in payment of any debt of his or
> [ii] is otherwise paid or applied for his benefit, or
> (c) it is received by a third person at the beneficiary's direction.

The wording of (b) and (c) has its equivalents in s.451(9). In practice these paragraphs are not so important. However, the *Potts* and *Piratin* cases set out above are relevant to discussion of the meaning of "directly or indirectly" in paragraph (a), which is important, and to which I can now turn.

61.8.1 *Indirect receipt from trust*

Section 97(5) TCGA provides:

> ... a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
> (a) he receives it from them directly or indirectly...

What is the meaning of "receives *indirectly*"? It is some sort of anti-conduit rule.

Broadly speaking, there are two possible views:

(1) The word "indirectly" applies to payments to X via someone accountable to X (following the approach of Lords Normand and Oaksey in *Potts*). I refer to this as the "**narrow view**".

(2) The word "indirectly" applies to payments "in some circuitous way designed to put the money under his control eventually" (following the approach of Lord MacDermott in *Potts*). I refer to this as the "**wide view**".

There are two difficulties with the wide view. The first is raised in *Piratin*:

> If, however, a broader meaning is attributed to [indirectly] than that

[59] Then s.83(5) FA 1981.

> attributed to it by Lord Normand and Lord Oaksey, so that it is capable of including payments to persons who are not accountable to the settlor, it is difficult to see where the line should be drawn.

The reader may think that vagueness is such a common feature of contemporary anti-avoidance legislation that this objection may not have the weight it carried when *Piratin* was decided, in 1981.

Secondly, if it is possible for one person to receive a payment directly, and another to receive the same payment indirectly, there is the problem of double taxation, as each may be taxed on the payment. The double taxation problem arises (inter alia) if there is held to be an indirect payment to B in two cases:

Case (1):

(a) Trust 1 makes a payment to A; and
(b) A makes a payment to B.

Case (2):

(a) Trust 1 makes a payment to trust 2; and
(b) Trust 2 makes a payment to B.

In case (1) there is in principle double taxation in the form of tax on both A and B.[60] In case (2) there is in principle double taxation on B.[61] In some cases there is no double taxation,[62] but one cannot say that the question whether there is an indirect payment depends on whether there is double taxation.[63]

These considerations support the narrow view. After some vacillation, the courts upheld that view in *Bowring v HMRC*.[64] The facts were those of case (2) above.[65] The judge said:

> 55. In my view the natural meaning and effect of indirect receipt in ss.97(5)(a) is that a beneficiary is still to be taken to have received a payment from a settlement even if it is paid to him through an

[60] Assuming the payments to A and to B can be matched with a s.1(3) amounts (trust gains).

[61] Assuming the payment can be matched with a s.1(3) amounts in trust 1 and trust 2.

[62] Eg in case (1) if A is non-resident; or in case (2) if trust 1 has no trust gains.

[63] If the temporary non-resident rules are in point, ie if in case (1) A is temporarily non resident, it may not be determined for some years whether there is double taxation.

[64] [2015] UKUT 550 (TCC) reversing *Herman v HMRC* [2007] STC (SCD) 571, and adopting criticism of *Herman* set out in the 14th edition of this work.

[65] For case (1) (payment from trust to A, and from A to B) see 50.13.1 (Benefit to B1, used by B1 to benefit B2).

> intermediary. It is conceivable that a separate settlement could, depending on the circumstances, constitute such an intermediary, but the payment would not in those circumstances fall to be treated as "made by" and "received from" that intermediary for the purposes of the legislation....

When is a payment received "through an intermediary"?

> 89. I do not believe that assessment of the facts in a case such as this, in order to determine whether a capital distribution was received from/made by a particular settlement, is susceptible to the application of some more or less formulaic "test", whether by reference to the existence of a plan or otherwise. In my view the issue raised here requires all relevant factors to be considered, and each case will depend on its own facts. Relevant factors will no doubt include whether what is done is pursuant to a plan or understanding or agreement.

So far we are none the wiser. One might have thought that a trust was a clear case of an intermediary, on the basis that trustees merely "fill in the blanks" left by the settlor.[66] But in *Bowring* the payment was *not* through an intermediary:

> I note in particular that the trustee of [trust 1] made an outright, unconditional transfer of its settled property to [trust 2]. There was no agreement between the trustee of [trust 1] and the trustees of [trust 2], and the former admittedly had no say whatsoever in what the latter did with the transferred property, whether by way of distributions to the beneficiaries or otherwise. It is true that
> [1] there was a plan to enable capital payments to be made free of CGT,
> [2] that the plan envisaged virtually all the transferred property being paid to the beneficiaries of [trust 2] (who were also beneficiaries of [trust 1]), and
> [3] that both sets of trustees knowingly played a part in the realisation of the plan.
> However, the existence of the plan did not affect the fact that [trust 1]'s settled property was transferred to [trust 2] and was held on the terms of the latter settlement, and that when [trust 2] decided to make (and made) the capital payments, they did so entirely in the exercise of their own discretion - they alone decided on the amounts and dates of the payments, and they made those decisions after the trust assets had been transferred to them. This independence of decision-making is

[66] See 87.5.7 (Trust appointment: Filling blanks)

> underscored by the fact that *they decided to leave a substantial part of the trust assets undistributed, notwithstanding that the plan had envisaged otherwise*.
> ... the capital distributions in the present case were clearly received from/made by [trust 2], for the purposes of the legislation. ... I do not consider it possible, taking a realistic view of the facts here, to regard [trust 2] as a mere intermediary in the sense that would be necessary if the distributions were to be treated as received from/made by [trust 1] indirectly.[67]

The outcome would have been different if trust 2 had followed the original plan. If that is right, the facts of *Bowring* are quite unusual, for plans are usually followed through; and that might explain why there was no appeal.

The FTT reached the same conclusion on another aspect of this case where the facts were more striking:

(1) A trust made a payment of £400k to a beneficiary ("B"). This was on the non-binding understanding he would pay it on to two of his cousins (who were also beneficiaries).
(2) B gave the sum to his two cousins accordingly.

The reason was that B wished to pay the s.87 charge (if any) so the cousins took free of the s.87 charge. HMRC assessed B who then argued, unmeritoriously, that they should have assessed the cousins.

The question was whether the cousins received the sum from the trust "indirectly".[68]

> [The beneficiary] was not in law bound to pay the money on to his two cousins. Nor did he hold it on trusts which were essentially the same as the 1969 trusts. 'Tracing' does not apply because while the source of the money could be traced, it no longer was imprinted with a trust. Causation was broken.[69]

On the basis of the informal understanding, this is surprising, and I think it would not and should not be followed. It would be easy for another court to ignore it, either as turning on its own facts, or (better) on the grounds that the subsequent appeal restated the test for providing a benefit "indirectly". The reader may wonder whether the result would have been

[67] [2016] STC 816 at [90] (emphasis added).

[68] See 61.8.1 (Indirect receipt from trust).

[69] *Bowring v HMRC* [2014] SFTD 347 at [192]. This point was not considered on the appeal.

the same if HMRC had chosen to assess the cousins rather than B.

The onward-gift rules also need to be considered.[70]

61.9 Capital payment to/from company

61.9.1 *Terminology*

Section 96 TCGA contains two rules:

Rule (my terminology)	**Topic**	**See para**
s.96(1) rule	Capital payment received *from* close co	61.10
s.96(2) rule	Capital payment made *to* close co	61.11

These labels are not transparent, but it is difficult to think of better.

The rules are distinct, but they share some common definitions and concepts which I consider first.

61.9.2 *Control: s.96 sense*

"Control" in s.96 matters:

(1) For the s.96(1) rule, which (in short) applies where a capital payment is received from a company controlled by trustees

(2) For the s.96(2) rule, which deems a capital payment received by a non-resident company to accrue to those who control the company

"Control" is defined in s.96(10) TCGA:

> For the purposes of this section—
>
> (a) [i] the question whether a company is controlled by a person or persons shall be construed in accordance with sections 450 and 451 of CTA 2010,
>
> [ii] but in deciding that question for those purposes no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010] if he is not a participator in the company;

This is a slightly cut down form of the ultra-wide sense of control.[71]

There is also a slightly cut down form of the standard definition of participator. Section 96(10) TCGA provides:

> (aa) a person is not to be regarded as a participator in a company controlled by the trustees of a settlement where the person has a

[70] See 61.30 (Onward-gifts: Introduction).

[71] See 104.3 (Control: Ultra-wide sense).

> share or interest in the capital or income of the company solely by virtue of an interest which the person has under the settlement; ...
> (b) "participator" has the meaning given by section 454 of CTA 2010[72]

The same definitions are used in the context of s.86; for a discussion see 60.4.2 ("Control" and "participator").

61.9.3 *Capital payment to/from co*

A capital payment *from* a close company matters for the s.96(1) rule, which (in short) applies where a capital payment is received from a company controlled by trustees.[73]

A capital payment *to* a close company matters:

(1) For the s.96(2) rule, which deems a capital payment received by a non-resident company to accrue to those who control the company

(2) If the company is UK resident: the s.96(2) rule will not apply, but the company will in principle receive s.87 gains.

61.10 Payment *from* close co: s.96(1) rule

Section 96(1) TCGA provides:

> Where a capital payment is received from a qualifying company which is controlled by the trustees of a settlement at the time it is received, for the purposes of sections 87 to 90 and Schedule 4C it shall be treated as received from the trustees.

I refer to this as the "**s.96(1) rule**".

See too 88.10 (Capital payment from co in estate).

61.10.1 *"Qualifying company"*

Section 96(6) TCGA provides:

> For the purposes of subsection (1) above a qualifying company is
> [a] a close company[74] or
> [b] a company which would be a close company if it were resident in the UK.

[72] This is the standard definition, see 104.22 (Definitions of participator).

[73] See 30.13 (Distribution to non-shareholder) for a discussion as to whether a payment from a company held by a trust, to a beneficiary, is a capital or income payment.

[74] In practice it would be rare for s.96(1) to apply in relation to a (UK resident) close company, as a payment from a (UK resident) close company is not likely to be a capital payment.

On this terminology see 104.29.1 (Non-resident close company).

61.10.2 *"Controlled by the trustees"*

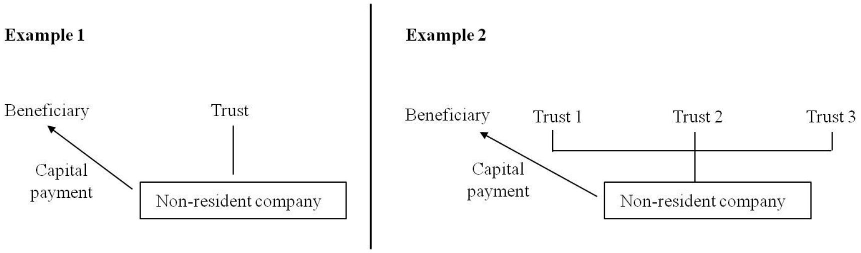
Section 96 TCGA provides:

> (7) For the purposes of subsection (1) above a company is controlled by the trustees of a settlement if it is controlled
> [a] by the trustees alone or
> [b] by the trustees together with a person who (or persons each of whom) falls within subsection (8) below.
>
> (8) A person falls within this subsection if—
> (a) he is a settlor in relation to the settlement, or
> (b) he is connected with a person falling within paragraph (a) above.

61.10.3 *s.96(1) rule: Examples*

The s.96(1) rule is needed because s.87 only applies if a beneficiary receives a capital payment from *the trustees*. A capital payment from a *company* which was not (directly or indirectly) from the trustees would not be caught.

In the following discussion it is important to distinguish between:
(1) Control in the s.96 sense[75]
(2) Control in the natural sense of the word



In example 1, the trustees control the company in the natural sense of control. The beneficiary receives the capital payment from the company directly, but from the trustees indirectly. The s.96(1) rule is not needed in this case, though it does no harm.

In example 2, the company is held in equal shares by three separate trusts. Assume they have the same settlor. No one trust has control in the natural

[75] See 61.9.2 (Control: s.96 sense).

sense of control. In the absence of s.96(1), it might perhaps be argued that a capital payment from the company is tax free, on the grounds that it is not received even indirectly from the trustees of any of the trusts. So the s.96(1) rule might perhaps be needed in a case where trustees "control" a company (in the s.96 sense) but do not control the company in the natural sense of control.

Where a capital payment is received from a company "controlled" (in the s.96 sense) by several persons, there is no apportionment provision (unlike the s.96(2) rule on a capital payment *to* a company). It is suggested that s.96(1) is a deeming provision which deems the payment to be received from the trustees, but the amount of the capital payment is not affected by the deeming. In example 2, the amount of the capital payment from each trust is not the amount received from the company but the amount actually attributable to the trust:

(1) If each trust holds a third of the company, and they act together to procure the payment, each makes a third of the capital payment.

(2) If:
(a) one trust has control (in the natural sense), and
(b) that trust is in a position to procure the capital payment
the capital payment is from that trust alone, and not from any other trust with some other interest in the company.[76]

61.11 Payment *to* close co: s.96(2) rule

Section 96(2) TCGA provides:

> Where
> [1][a] a capital payment is received from the trustees of a settlement
> [b] (or treated as so received by virtue of subsection (1) above)[77] and
> [2] it is received by a non-resident qualifying company,
> the rules in subsections (3) to (6) below shall apply for the purposes of sections 87 to 90 and Schedule 4C.

I refer to this as the "**s.96(2) rule**", and the company is the **"recipient company"**.

61.11.1 *"Non-resident qualifying co"*

Section 96(9) TCGA provides:

[76] Bur in practice, condition (2)(b) is not likely to be satisfied.

[77] See 61.10 (Payment from close co: s.96(1) rule).

For the purposes of subsection (2) above a non-resident qualifying company[78] is a company which is not resident in the UK and would be a close company if it were so resident.

61.11.2 *Consequence of payment to co*

The s.96(2) rule depends on whether the recipient company is controlled:
(1) by one person alone
(2) by 2 or more persons (taking each one separately)
(3) by 2 or more persons (taking them together)

Section 96(3)-(5) are conveniently read side by side:

s.96(3)	**s.96(4)**	**s.96(5)**
Control by: 1 person	**persons separately**	**persons together**
If the company is controlled by one person alone at the time the payment is received, and	If the company is controlled by 2 or more persons (taking each one separately) at the time the payment is received, then—	If the company is controlled by 2 or more persons (taking them together) at the time the payment is received-
that person is then resident in the UK, it shall be treated as a capital payment received by that person.	(a) if one of them is then resident in the UK, it shall be treated as a capital payment received by that person;	
	(b) if 2 or more of them are then resident in the UK ("the residents")	
	[i] it shall be treated as being as many equal capital payments as there are residents and	(a) it shall be treated as being as many capital payments as there are participators in the company at the time it is received, and
	[ii] each of them shall be treated as receiving one of the payments.	(b) each such participator (whatever his residence) shall be treated as receiving one of the payments, quantified on

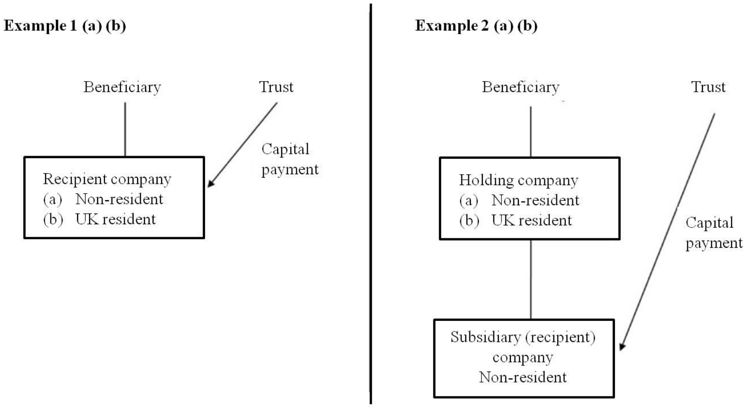
[78] For a note on this terminology, see 104.29.1 (Non-resident close company).

the basis of a just and reasonable apportionment,

but where (by virtue of the preceding provisions of this subsection and apart from this provision) a participator would be treated as receiving less than one-twentieth of the payment actually received by the company, he shall not be treated as receiving anything by virtue of this subsection.

For the meaning of "control" see 61.9.2 (Control: s.96 sense).

61.11.3 *Capital payment to co: Examples*



Example 1 (a) (b)
Beneficiary
Trust
Capital payment
Recipient company
(a) Non-resident
(b) UK resident
Example 2 (a) (b)
Beneficiary
Trust
Holding company
(a) Non-resident
(b) UK resident
Capital payment
Subsidiary (recipient) company
Non-resident

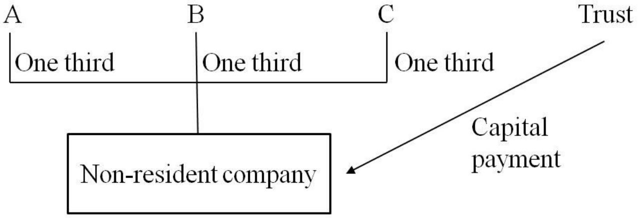
In example 1(a), a non-resident company receives a benefit directly from the trust. The company is a non-resident qualifying company, so under s96(2) the beneficiary (if UK resident) is treated as receiving the capital payment. In the absence of s.96(2) the position would have been less clear, but it is not necessary to consider that.

In example 1(b), a *UK resident* company receives a benefit directly from the trust. The company is not a non-resident qualifying company, so the s.96(2) rule does not apply. It is not needed, because the capital payment to a UK resident company gives rise to a s.87 gain which is subject to corporation tax. It might be said that the beneficiary receives a benefit indirectly, because the value of his company is increased. But that would lead to double taxation, so the better view is that would not count for the purposes of s.87: the benefit is too indirect.

In example 2(a), the non-resident subsidiary of a non-resident holding company receives a capital payment. Under s96(2) the beneficiary (if UK resident) is treated as receiving the capital payment.

In example 2(b), the non-resident subsidiary of a *UK resident* holding company receives a capital payment. One would expect the charge to lie with the UK company, though it needs a somewhat purposive construction to reach that result.

Example 3



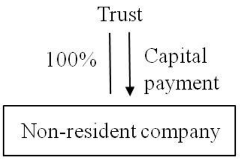
A
B
C
Trust
One third
One third
One third
Capital payment
Non-resident company

In example 3, if A, B and C are not associates, then s.96(5) applies and each is treated as receiving one third of the capital payment.

If A, B and C are associates, then each "controls" the company and s.96(4) applies. It is suggested that the outcome is the same. The capital payment which is treated received by each of them is of an amount equal to one third of the capital payment received by the company.

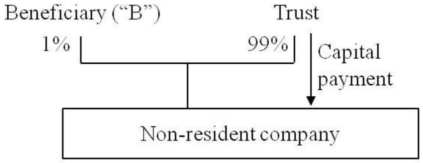
What if A held two thirds of the company and B and C had only one sixth each? It appears that the capital payment is still shared equally.

Example 4 (a)



Trust
100%
Capital payment
Non-resident company

Example 4 (b)



Beneficiary ("B")
Trust
1%
99%
Capital payment
Non-resident company

In example 4(a), the settlor "controls" NR Co in the ultra-wide sense, but does not "control" the company in the s.96 sense. If there were a capital payment from the trust to the company, it would not be treated as accruing to the settlor. But the trust/company group disregard[79] means that a capital payment from the trust to the company is not normally possible.

In example 4(b), the beneficiary ("B") is a participator. If B is the settlor, or a relative of the settlor, B has "control" of the company in the s.96 sense. If there were a capital payment from the trust to the company, it would be treated as accruing to B. It is suggested that the amount of the capital payment is only 1% of the value of the benefit to the company.

Suppose a trust subscribes for shares in a company which is not wholly owned by the trust.

(1) If the share subscription is on arm's length terms, that is not a benefit to anyone.

(2) If the terms are unfavourable to the trust (ie the shares which the trust acquires are worth less than the subscription price), it is suggested that:
   (a) There is still no benefit to the company, so the s.96(2) rule does not apply.
   (b) A benefit accrues to the other shareholders, if the value of their shareholdings is increased, and the amount of the benefit is the amount of that increase.

61.11.4 *Disregard of payment to co: s.87C*

Section 87C TCGA provides:

> (1) For the purposes of sections 87 and 87A as they apply in relation to a settlement, no account is to be taken of a capital payment (or a part of a capital payment) within subsection (2).
> (2) A capital payment is within this subsection if (and to the extent that) it is received (or treated as received) in a tax year from the trustees of the settlement by a company that—
> (a) is not resident in the UK in that year, and
> (b) would be a close company if it were resident in the UK,
> (and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

This is one of a number of capital payment disregards:

TCGA	Scope	See para
s.87C	Cap payment received by non-resident co w/i s.96(1)	*Discussed here*
s.87D	Cap payment received by any non-resident	61.21
-	Trust/company group disregard	61.12

[79] See 61.12 (Trust/company group disregard).

It is useful to have labels for these rules. I refer to the first as the **"s.87C disregard"**. I generally refer to the second as the **"non-resident disregard"**, but where it is necessary to distinguish it from the s.87C disregard, I call it the **"general (s.87D) disregard"**.

The s.87C disregard is (more or less) overtaken by the general (s.87D) disregard; though it is possible to envisage circumstances where s.87C may apply and s.87D does not (eg a capital payment in the final trust year).

Presumably the purpose of the s.87C disregard was to prevent tax avoidance by capital payments to non-resident companies intended to "wash" trust gains. It is not easy to see how that could have been achieved. But it does not much matter.

61.11.5 *Temporary non-resident beneficiary*

Section 96(9A) TCGA provides:

> For the purposes of this section an individual shall be deemed to have been resident in the UK at any time in any year of assessment for which he or she was not so resident if—
>
> (a) section 1M[80] applies to him or her, and
>
> (b) the year falls within the temporary period of non-residence.

Section 96(9B) TCGA deals with assessment time limits:

> If—
>
> (a) it appears after the end of any year of assessment that any individual is to be treated by virtue of subsection (9A) above as having been resident in the UK at any time in that year, and
>
> (b) as a consequence, any adjustments fall to be made to the amounts of tax taken to have been chargeable by virtue of this section on any person,
>
> nothing in any enactment limiting the time for the making of any claim or assessment shall prevent the making of those adjustments (whether by means of an assessment, an amendment of an assessment, a repayment of tax or otherwise).

61.11.6 *EU-law compliance*

The section 96(2) rule does not apply to a capital payment made to a UK resident company. That makes sense as the UK company would receive a s.87 gain on which it would be taxable. Perhaps the discrimination might not have been EU-law compliant? But if that were right, then perhaps the

[80] See 11.6 (TNR gain/loss).

entire s.87 code was not EU-law compliant, which seems far-fetched. Post-Brexit, the point may not arise.

61.12 Trust/company group disregard

SP 5/92 para 18 provides:

> In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are … not treated as capital payments within TCGA 1992 s 97.[81]

The paragraph sets out a commonsense definition of "wholly owned"[82], and includes a qualification in case of avoidance.[83]

I coin the following terminology. A trust and its wholly owned companies is a **"trust/company group structure"**. The rule set out above is the **"trust/company group disregard"**.

61.12.1 *Trust benefits wholly owned co*

Thus (say) an interest-free loan from trustees to a wholly owned company is not a capital payment. This fits the scheme of the Act, and no-one has ever suggested otherwise. But why not? This view can be justified on the basis that:

(1) An interest-free loan to a company wholly owned by the lender is a commercial transaction with no gratuitous intent.
(2) Whether such a transaction constitutes a "benefit" depends on the context, and the context shows that is not the case here.

In the normal case, no-one other than the trustees would "control" the wholly owned company, in the s.96 sense, so for the purposes of s.96(2) it would not matter if the loan were a capital payment. But it would matter if the company had a participator in the form of a loan creditor.

61.12.2 *Wholly owned co benefits trust*

What about an interest-free loan *from* a wholly owned company *to* the trust

[81] For settlor/tainting aspect of transactions within a trust/company group structure, see 99.24.1 (Transfer within trust/co group).

[82] "A company is treated as indirectly wholly owned by the trustees where the whole of its issued share capital is directly and beneficially owned by a company which is directly wholly owned by the trustees or it is the 100% subsidiary of such a company, or a chain of companies, which is indirectly wholly owned by the trustees."

[83] "This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage."

which owns it? That would also come within the trust/company group disregard, ie HMRC say it is not treated as a capital payment. Once again, this fits the scheme of the Act, and no-one has ever suggested otherwise. But why not? It seems hard to say that the loan is not a benefit and so a capital payment. The reason must be that the trust cannot be deemed to make a capital payment to itself.

SP 5/92 provides two examples of inter-group transactions:

> Intragroup payments which are not capital payments, for example
> [1] a capital distribution on winding up which represents merely a repayment of capital on shares, or
> [2] a distribution chargeable to corporation tax,
> do not fall within the ambit of TCGA 1992 s 96.

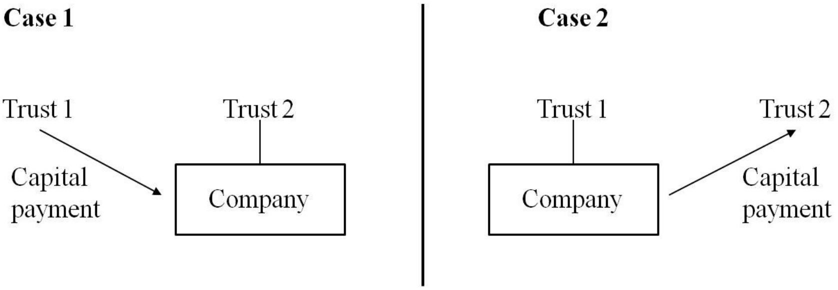
I think example [1] is misconceived, because a distribution on winding up is not a capital payment (it is not a benefit) and whether it represents merely a repayment of capital on shares is irrelevant. But if it were a benefit, it would fall within the trust/company group disregard.

Turning to example [2]: a capital payment is defined as a benefit which is not chargeable to *income* tax (or in the case of a non-resident, not received as income). The SP is considering a distribution chargeable to corporation tax. I am not sure how that could happen, in a case where the distribution is received by a non-resident company. However, a distribution is probably not a benefit, and if it were a benefit, it would fall within the trust/company group disregard.

61.13 Payment to/from co across trusts

The position is more complicated if two trusts are involved.

I here consider the s.96 issues: for a list of other issues on transfers to/from companies across trusts, see 79.14 (Transfers to/from underlying co).



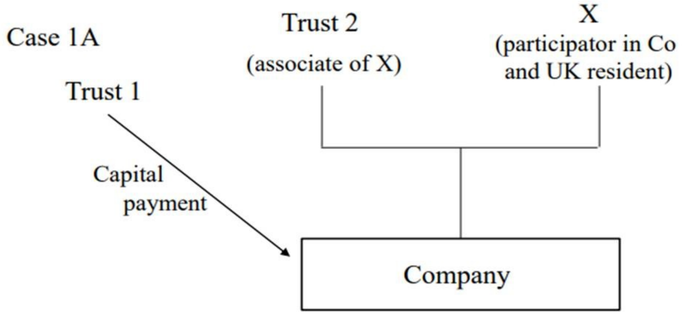
In both cases, the capital payment is not an inter-group transaction, and so the inter-group disregard does not apply.

In case 1, trust 1 makes a capital payment to a company held by trust 2, a separate non-resident trust. There is a capital payment from trust 1 to the company but:

(1) This capital payment is not treated as received by the settlor of trust 2, under the s.96(2) rule, because the settlor does not have "control" of the company.
(2) This capital payment is not treated as received by the trustees of trust 2, under s.96(3), as they are non-resident.
(3) This capital payment is not treated as received by any other person, under s.96(3)-(5), so it has to be disregarded under the s.87C disregard.[84]

Alternatively, it might be said that the trustees of trust 1 make a (separate) capital payment to trust 2, as they increase the value of the assets of trust 2, which is a benefit. But that would normally be disregarded under the general (s.87D) disregard.

The position would be different if there were a UK resident individual who was (1) a participator and (2) an associate of the trustees:



In this case the capital payment is treated as received by X! The rule would apply, for instance, if:

(1) X is a loan creditor, or a shareholder, (and so a participator); and
(2) X is either the settlor or a relative of the settlor (and so has "control" in the s.96 sense, because the trustees are associates of X).

[84] For completeness: The payment might also be disregarded under the general (s.87D) disregard. But that adds nothing to s.87C, so it does not matter.

This is so even if X's loan or shareholding is only a small one. The rule might be described as penal.

Turning to case 2: In this case a company held by trust 1 makes a capital payment to trust 2, a separate non-resident trust

There is a capital payment to trust 2 from the company, which is treated as received from trust 1, under the s.96(1) rule. Alternatively, it might be said that the trustees of trust 1 make a separate capital payment to trust 2, by procuring the company to make the payment.

The s.96(2) rule does not apply, and the s.87C disregard does not apply, because these only apply to a receipt *by* a company. But the capital payment is normally disregarded under the general (s.87D) disregard.

In short, the end result is that neither of the s.96 rules have a role to play in payments to/from companies across trusts (unless the company has a UK resident participator).

61.14 Payment to non-beneficiary

Section 87 gains are treated as accruing to *a beneficiary of the settlement* who has received a capital payment from the trustees.[85]

At first sight the charge only applies to beneficiaries, so if a capital payment is received by a non-beneficiary there is no charge. However, s.97(8) TCGA provides:

> In a case where—
> (a) at any time on or after 19th March 1991
> [i] a capital payment is received from the trustees of a settlement
> [ii] or is treated as so received by virtue of section 96(1),[86]
> (b) [i] it is received by a person,
> [ii] or treated as received by a person by virtue of section 96(2) to (5),[87]
> (c) at the time it is received or treated as received, the person is not (apart from this subsection) a beneficiary of the settlement, and
> (d) subsection (9) or (10) below does not prevent this subsection applying,
>
> for the purposes of sections 86A to 90 and Schedule 4C the person shall be treated as a beneficiary of the settlement as regards events occurring

[85] Section 87(2) TCGA.

[86] See 61.10 (Payment from close co: s.96(1) rule).

[87] See 61.10 (Payment to close co: s.96(2) rule).

at or after that time.

The drafting is clumsy. The s.87 charge applies to a "beneficiary" who receives a capital payment, but any person who receives a capital payment is treated as a beneficiary. It would have been simpler to say that the charge applies to a "person" who receives a capital payment, and drop the (notional) requirement that recipient has to be a beneficiary! But it comes to the same thing.

The reader may wonder how a capital payment could be received by a non-beneficiary. In general, trustees may only confer benefits on beneficiaries. However, there are cases where it could happen:

(1) An exercise of a power to apply capital for the benefit of B (a beneficiary) may take the form of a payment to a third person, X (not a beneficiary). This is not a capital payment received by B[88] but it is a capital payment received by X.

(2) Beneficiaries may authorise trustees to make a payment to a non-beneficiary.[89]

On the other hand if B (a beneficiary) *directs* trustees to make a payment to a third person, X, the benefit is treated as received by B (not X).[90]

If a payment is made in breach of trust, to a non-beneficiary (or indeed to a beneficiary) there is no capital payment (or the value of the benefit is nil).[91]

It is possible that a person may be a beneficiary at the time of a capital payment but not when the s.87 gain accrues (if the trust gain is matched in a later year and the person has then ceased to be a beneficiary). Section 97(8) TCGA does not apply in such a case, because the condition in s.97(8)(c) is not met. It is considered that s.87(2) can and should be construed so as to apply in this case; otherwise there would be a strange anomaly in the legislation. That is, when it states that s.87 gains accrue to "a beneficiary of the settlement who has received a capital payment" it is sufficient that the recipient is a beneficiary at the time they receive the

[88] See 50.4.8 (Moral/sentimental/hard to value benefit).

[89] Another case: suppose trustees make a capital payment to a non-resident close company which is treated as received by the persons who control it; see 61.11 (Payment to close co: s.96(2) rule). Perhaps those persons might not be beneficiaries. But it would be a rare case where trustees could properly make a payment to a company controlled by non-beneficiaries.

[90] See 61.8 (Receipt from trustees).

[91] See 50.4.11 ("Benefit" in breach of trust).

capital payment, it is not required that the recipient is also a beneficiary at the time that the s.87 gain accrues.

61.14.1 *Receipt by non-resident co*

Section 97(8)(d) signposts two exceptions to the rule in s.97(8). One concerns transfers between trusts and is discussed elsewhere.[92]

The other is s.97(9) TCGA which provides:

> Subsection (8) above shall not apply where a payment mentioned in para (a) is made in circumstances where it is treated (otherwise than by subsection (8) above) as received by a beneficiary.

This would apply where:

(1) Trustees make a capital payment to a non-resident company, which is not a beneficiary and

(2) The trustees are treated as making the payment to beneficiaries who control the company.[93]

The point of ss.(9) is that the company is not to be treated as a beneficiary.[94] But would it matter if it were? Perhaps it might have mattered before the enactment of the s.87C disregard, in 2008.

61.15 Matching

61.15.1 *Why matching matters*

The matching of capital payments with s.1(3) amounts is important for many reasons:

(1) *Time of charge:* The s.87 gains accrue in the year that a capital payment is matched with a s.1(3) amount.

[92] See 61.39.1 (Trust transfer: s.87 disapplied).

[93] See 61.11 (Payment to close co: s.96(2) rule).

[94] For completeness. Could ss(8) also apply in a case where a capital payment is received by two persons, one a beneficiary and the other a non-beneficiary? Suppose an arrangement where X receives property directly and Y later receives it indirectly. (The onward gift rules would also need consideration here.)

(1) Assume one of X or Y is a beneficiary but not both. Perhaps in this case the non-beneficiary is not charged, because the capital payment is "treated as received by a beneficiary". However, this is a case where the payment is *actually* received by the beneficiary (directly or indirectly), not a case where it is *treated* as received.

(2) Assume neither X nor Y are a beneficiary. In that case, X is treated as a beneficiary, but not Y. But this scenario is very far fetched.

(2) *Amount of charge:* The amount of the s.87 gain is the amount of the capital payment or the amount matched, if less.

(3) *Which beneficiaries come into charge:* if
   (a) more than one beneficiary receives capital payments, and
   (b) there are not enough s.1(3) amounts to match all the capital payments

   the question which capital payment is matched with a s.1(3) amount makes all the difference as to which beneficiary receives s.87 gains.

(4) *Which capital payments come into charge:* if
   (a) one beneficiary receives more than one capital payment, some in and some outside the UK; and
   (b) there are not enough s.1(3) amounts to match all the capital payments

   the question which capital payment is matched with a s.1(3) amount matters for the remittance basis. If a UK benefit is matched, there is a charge; if a non-UK benefit is matched, the s.87 remittance basis offers a defence to the charge.

(5) *The interest surcharge,* which depends on the time gap between a s.1(3) amount and the capital payment with which it is matched.

(6) *2008 transitional relief*, which applies where post-2008 capital payments are matched with pre-2008 s.1(3) amounts.

Matching is carried out on a LIFO (last in first out) basis. EN FB 2008 provides a summary:

> 452. Where the s.2(2) amount is equal to or greater than the capital payments then all the capital payments are matched:
> [1] any surplus s.2(2) amount is carried back to the year preceding the current tax year and any unmatched capital payments of that earlier year are matched to the surplus s.2(2) amount;
> [2] any surplus s.2(2) amount is carried back to the preceding year and matched with unmatched capital payments of that year, and so on, until the s.2(2) amount has been reduced to nil or there are no unmatched capital payments left in any earlier year; and
> [3] any surplus s.2(2) amount left after matching to previous years is available to match against future capital payments.
>
> 453. Where the amount of capital payments for the latest relevant tax year is greater than the s.2(2) amount for that year, then the surplus capital payments are carried back in the same way as surplus s.2(2) amounts, matching the surplus capital payments against the unmatched trust gains of each earlier year, starting with the latest year first and only

> moving back to an earlier year where there are no unmatched trust gains left in the later year. Any capital payments that remain unmatched are carried forward from the current tax year to be matched against the s.2(2) amounts of future years. ...
> 455. Note that:
> [1] the matching rules are modified by new subs.(4) of s.762 ICTA in relation to offshore income gains; and
> [2] capital payments are matched to trust gains within a given tax year on a pro rata basis, not on a daily basis.

The s.87 guidance note provides:

> 14. A key element of the FA 2008 changes is the introduction of rules for matching capital payments to section 2(2) amounts from 6 April 2008. The basic rules are set out in section 87A TCGA in a series of steps. Capital payments are matched against section 2(2) amounts in the following order:
> 15. First against section 2(2) amounts of the same year.
> 16. Second against unmatched section 2(2) amounts of earlier years taking the most recent year first.
> 17. Third against section 2(2) amounts of later years. In this case priority is given first to any capital payments received in that year and then to any capital payments brought forward. If capital payments are brought forward from more than one year the capital payment received in the latest year is matched first.

The rules changed from a FIFO to a LIFO basis in 2008. HMRC did not state why they made this change. I surmise that it was done to minimise the benefit of 2008 transitional relief, which applies if post-2008 capital payments are matched with pre-2008 s.1(3) amounts. The old rule would have maximised the benefit of the relief, so that trusts with substantial s.1(3) amounts may have been free of CGT for a substantial period of time. Had the reason been given, there might have been some debate about whether the benefit justified the change, but as it was, there was none. But there it is.

A note on terminology: the statutory language is to match s.1(3) amounts (trust gains) *with* capital payments; HMRC guidance tends to say: match *to* or *against* capital payments. It is better to use the statutory terminology rather than a paraphrase; though nothing actually turns on the preposition.

61.15.2 *The statute*

Section 87A TCGA provides:

> (1) This section supplements s.87.
>
> (2) The following steps are to be taken for the purposes of matching capital payments with s.1(3) amounts.
>
> *Step 1*
>
> Find the s.1(3) amount for the relevant tax year.
>
> *Step 2*
>
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

Armed with these figures we proceed to the matching rule:

> *Step 3*
>
> The s.1(3) amount for the relevant tax year is matched with—
>
> (a) if the total amount of capital payments received in the relevant tax year does not exceed the s.1(3) amount for the relevant tax year, each capital payment so received, and
>
> (b) otherwise, the relevant proportion of each of those capital payments.
>
> "The relevant proportion" is the s.1(3) amount for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.

I refer to a case within (a) as a "**surplus s.1(3) amount**" and a case within (b) as a "**surplus capital payment**".

The next step is a recomputation of the s.1(3) amount and of the amount of capital payments

> *Step 4*
>
> [1] If para (a) of Step 3 applies—

That is, if there is a surplus s.1(3) amount—

> (a) reduce the s.1(3) amount for the relevant tax year by the total amount of capital payments referred to there, and
>
> (b) reduce the amount of those capital payments to nil.

I refer to the s.1(3) amount after this reduction as the "**unmatched s.1(3) amount**".

> [2] If para (b) of that Step applies—

That is the case of a surplus capital payment—

> (a) reduce the s.1(3) amount for the relevant tax year to nil,
> and

(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

I refer to the amount of the capital payments after this deduction as the "**unmatched capital payments**".

Then one starts again at the beginning, but with modifications:

Step 5
[1] Start again at Step 1 (unless subs.(3) applies).
[2] If the s.1(3) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

I again refer to a case within step 5[2] (where there is an unmatched s.1(3) amount) as a "**surplus s.1(3) amount**".

Amended as step 5[2] directs, Steps 1-4 become:

Step 1
Find the s.1(3) amount for the relevant tax year [ie the unmatched s.1(3) amount].
Step 2
Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*
(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.
Step 3
The s.1(3) amount for the relevant tax year is matched with—
(a) if the total amount of capital payments received ~~in the relevant tax year~~ *in the latest tax year which—*
(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.
does not exceed the [unmatched] s.1(3) amount for the relevant tax year, each capital payment so received, and
(b) otherwise, the relevant proportion of each of those capital payments.
"The relevant proportion" is the [remaining] s.1(3) amount for the relevant tax year divided by the total amount of capital payments received ~~in the relevant tax year~~ *in the latest tax year which—*
(a) is before the last tax year for which Steps 1 to 4 have been

> *undertaken, and*
>
> *(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*
>
> *Step 4*
>
> If para (a) of Step 3 applies—
>
> (a) reduce the [unmatched] s.1(3) amount for the relevant tax year by the total amount of capital payments referred to there, and
>
> (b) reduce the amount of those capital payments to nil.
>
> If para (b) of that Step applies—
>
> (a) reduce the [unmatched] s.1(3) amount for the relevant tax year to nil, and
>
> (b) reduce the [unmatched] amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

Eventually the unmatched s.1(3) amount is reduced to nil (ie all the s.1(3) amount is matched). Then step 5[2] ceases to apply. Our journey then takes us to step 5[3]:

> *Step 5*
>
> [3] If the s.1(3) amount for the relevant tax year (as so reduced) is nil, read references to the s.1(3) amount for the relevant tax year as the s.1(3) amount for the latest tax year—
>
> (a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and
>
> (b) for which the s.1(3) amount is not nil.

I refer to a case within step 5[3] as a "**surplus capital payment**". This is a case where:

(1) there is no unmatched s.1(3) amount for the relevant year;

(2) there is a s.1(3) amount for an earlier year.

Amended as step 5[3] directs, steps 1-4 become:

> *Step 1*
>
> Find the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year* —
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.1(3) amount is not nil.*
>
> *Step 2*
>
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.
>
> *Step 3*
>
> The s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year*—
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.1(3) amount is not nil*
>
> is matched with—
>
> (a) if the total amount of capital payments received in the relevant tax year does

> not exceed the s.1(3) amount ~~for the relevant tax year~~, *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.1(3) amount is not nil.*
>
> each capital payment so received, and
>
> (b) otherwise, the relevant proportion of each of those capital payments.
>
> "The relevant proportion" is the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.1(3) amount is not nil.*
>
> divided by the total amount of capital payments received in the relevant tax year.
>
> *Step 4*
>
> If para (a) of Step 3 applies—
>
> (a) reduce the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.1(3) amount is not nil.*
>
> by the total amount of capital payments referred to there, and
>
> (b) reduce the amount of those capital payments to nil.
>
> If para (b) of that Step applies—
>
> (a) reduce the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.1(3) amount is not nil.*
>
> to nil, and
>
> (b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

61.15.3 *When to stop*

Section 87A(3) TCGA (incorporated at step 5[1]) states when one can stop repeating these steps:

> This subsection applies if—
>
> (a) all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil, or
>
> (b) the s.1(3) amounts for the relevant tax year and all earlier tax years have been reduced to nil.

That is, one stops when there are no unmatched capital payments or s.1(3) amounts.

Section 87A(4) TCGA provides:

> The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

That seems self-evident.

61.15.4 *Example: Surplus trust gains*

EN FB 2008 provides some examples. *Text in italics represents HMRC comments*:

> ***56. Section 87A: Example 1: section 2(2) amount is greater than the total amount of capital payments for latest tax year:***
> The facts assumed in the example are as follows:
> *2008-09: no surplus trust gains or surplus capital payments*

Year	***Capital payment***	***s.2(2) amount***
2009-10:	*£100k*	*nil*
2010-11:	*£200k*	*nil*
2011-12:	*£500k*	*nil*
2012-13:	*£500k*	*£2m*

I set out the text of the relevant steps in the analysis.

> *Step 1*
> Find the s.2(2) amount for the relevant tax year.
> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus s.1(3) amount, because "the total amount of capital payments received in the relevant tax year" (£500k) does not exceed "the s.1(3) amount for the relevant year" (£2m). Accordingly:

> *Step 3*
> The s.1(3) amount for the relevant tax year is matched with—
> (a) ... each capital payment so received,

Thus step 3 states that £2m (the s.1(3) amount for 2012/13) is matched with the £500k capital payment. There are two difficulties with this. First, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.1(3) amount, and step 3 tells us that the *s.1(3) amount* is matched with the capital payment. The answer is that matching is by implication a symmetrical relationship, ie if A is matched with B, then B is matched with A.

Secondly, applying step 3 literally, the capital payment (£500k) is matched with the *entire* s.1(3) amount (£2m). This does not matter because s.87(3) TCGA restricts the charge to the amount of the capital payment. In order to follow s.87(3) one needs to read it together with s.87(2):

> (2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.1(3) amount for the relevant tax year or any earlier tax year.
> (3) The amount of chargeable gains treated as accruing is equal to—
> (a) the amount of the capital payment, or
> (b) if only part of the capital payment is matched, the amount of that part.

But the HMRC analysis is as follows:

> *Match as follows:*
> *a. 2012-13 capital payments £500,000 match to £500,000 gains.*

The HMRC analysis (wisely) does not try to refer to the statutory steps which authorise this conclusion. (Indeed, there is no reason to think that the author of the HMRC example read the legislation.) But the end result is the same.

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

> *Step 4*
> If para (a) of Step 3 applies—
> (a) reduce the s.1(3) amount for the relevant tax year by the total amount of capital payments referred to there, and
> (b) reduce the amount of those capital payments to nil.

So our revised table becomes:

Year	***Capital payment***	***s.1(3) amount***
2009-10:	*£100k*	*nil*
2010-11:	*£200k*	*nil*
2011-12:	*£500k*	*nil*
2012-13:	*£0 ~~£500k~~*	*£1.5 ~~£2m~~*

The HMRC analysis is as follows:

> *[1] 2012-13 capital payments reduced to nil.*
> *[2] Unmatched 2012-13 trust gains reduced to £1.5 million.*

> *[3] Refer unmatched trust gains to preceding year.*

Point [1] is correct. Points [2] and [3] are a fair paraphrase.

Our journey takes us to step 5:

> *Step 5*
> [1] Start again at Step 1 (unless subsection (3) applies).
> [2] If the s.1(3) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
> (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
> (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

There is still a surplus s.1(3) amount (the s.1(3) amount for the relevant tax year is not nil, it is now £1.5m).

We revert to step 2 which now reads:

> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*
> *(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and*
> *(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries*

The "latest tax year" is now 2011-12 and we can take the figures from the revised table.

We move on to step 3. This is a surplus s.1(3) amount case, because "the total amount of capital payments received in the latest tax year" (£500k) does not exceed "the s.1(3) amount for the relevant year" (£1.5m). Accordingly:

> *Step 3*
> The s.1(3) amount for the relevant tax year is matched with—
> (a) ... each capital payment so received,

Thus step 3 states that £1.5m (the unmatched s.1(3) amount) is matched with the £500k capital payment. But the HMRC analysis is as follows:

> *b. 2011-12 unmatched capital payments £500,000 match to £500,000 gains.*

As noted, this is a loose paraphrase of step 3, but it does not matter.

We move on to step 4. Ours is a step 3(a) case, so step 4 provides:

> *Step 4*
> If para (a) of Step 3 applies—
> (a) reduce the s.1(3) amount for the relevant tax year by the total amount of capital payments referred to there, and
> (b) reduce the amount of those capital payments to nil.

So:
(a): reduce the s.1(3) amount for the relevant year thus: £1.5m −£500k = £1m.
(b): reduce the capital payment for the latest year [2011-12] to nil.
The HMRC analysis is as follows:

> *2011-12 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £1 million.*
> *Refer unmatched trust gains to preceding year.*

The process repeats once again, but "the latest tax year" now becomes 2009-10. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

> *2010-11 unmatched capital payments £200,000 match to £200,000 gains.*
> *2010-11 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £800,000.*
> *Refer unmatched trust gains to preceding year.*

The process repeats once again, but "the latest tax year" now becomes 2009-10. It is not necessary to set out the steps. The HMRC analysis (or paraphrase) is as follows:

> *d. 2009-10 unmatched capital payments £100,000 match to £100,000 gains.*
> *2010-11 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £700,000.*
> *Refer unmatched trust gains to preceding year.*

At this point s.87A(3) TCGA applies because "all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil". Accordingly the steps come to an end. The HMRC analysis is:

> *e. No unmatched capital payments in 2008-09 or earlier years.*

Lastly, the HMRC analysis provides:

> *Carry forward unmatched trust gains of 2012-13 of £700,000 to be matched against capital payments of 2013-14 and subsequent years.*

This is a reference to step 1 as amended by step 5[3] but the point does not actually arise under the facts of the HMRC example.

It is noteworthy that in order to deal with the HMRC example (which is a simplication of a typical real life case, for there is only one s.1(3) amount) one has to carry out 15 steps.

The s.87 guidance note provides:

> **Example 3: New section 87A - Section 2(2) amounts greater than capital payments in latest year**
>
> At the start of 2008-09 there are no unmatched capital payments or section 2(2) amounts.
>
> | Year | Capital payments | S.2(2) amount |
> |---|---|---|
> | 2008-09 | £10,000 | Nil |
> | 2009-10 | £15,000 | Nil |
> | 2010-11 | £2,000 | £24,000 |
>
> When the years 2008-09 and 2009-10 are considered immediately after the end of those years no chargeable gains accrue.
>
> In 2010-11 the capital payment of £2,000 is matched against the section 2(2) amount. A chargeable gain of £2,000 accrues in the year 2010-11. The capital payments for 2010-11 are reduced to nil. The section 2(2) amount is reduced to £22,000 (£24,000 – £2,000).
>
> The £22,000 section 2(2) amount for 2010-11 is matched against the capital payments of £15,000 in 2009-10. A chargeable gain of £15,000 accrues in the year 2010-11.
>
> The section 2(2) amount for 2010-11 is reduced to £7,000 (£24,000 – £2,000 – £15,000)
>
> The capital payments for 2009-10 are reduced to nil.
>
> The £7,000 section 2(2) amount for 2010-11 is matched against the capital payments of £10,000 for 2008-09. A chargeable gain of £7,000 accrues in the year 2010-11.
>
> The section 2(2) amount for 2010-11 is reduced to nil (£24,000 – £2,000 – £15,000 – £7,000). The capital payments for 2008-09 are reduced to £3,000 (£10,000 – £7,000). These capital payments will be set against future section 2(2) amounts.
>
> The chargeable gains for 2010-11 total £24,000 (£2,000 + £15,000 + £7,000).

61.15.5 *Example: Surplus capital payment*

HMRC's second example is as follows

> ***57. Section 87A: Example 2: capital payments are greater than section 2(2) amount for latest tax year: The facts assumed in the example are as follows:***
>
> *2008-09: no surplus trust gains or surplus capital payments*

Year	***Capital payment***	***s.2(2) amount***
2009-10:	*nil*	*£100k*
2010-11:	*nil*	*£200k*
2011-12:	*nil*	*£500k*
2012-13:	*£2m*	*£500k*

I set out the text of the relevant steps in the analysis.

> *Step 1*
> Find the s.2(2) amount for the relevant tax year.
> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus capital payment because "the total amount of capital payments received in the relevant tax year" (£2m) does exceed "the s.1(3) amount for the relevant year" (£500k). Accordingly:

> *Step 3*
> The s.1(3) amount for the relevant tax year is matched with—
> (b) ... the relevant proportion of each of those capital payments.

The relevant proportion" is the s.1(3) amount for the relevant tax year (£500k) divided by the total amount of capital payments received in the relevant tax year (£2m) = 0.25.

Thus step 3 states that £500k (the s.1(3) amount) is matched with one quarter of the capital payment = £500k. As noted, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.1(3) amount, and step 3 tells us that the *s.1(3) amount* is matched with the capital payment. The solution is that matching is a symmetrical relationship, ie if A is matched with B, then B is matched with A.

The HMRC analysis is as follows:

> *Match as follows:*
>
> *a. 2012-13 capital payments £500,000 match to £500,000 gains.*

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

> *Step 4*
>
> [2] If para (b) of that Step [step 3] applies—
>
> (a) reduce the s.1(3) amount for the relevant tax year to nil, and
>
> (b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

So our revised table becomes:

Year	**Capital payment**	**s.1(3) amount**
2009-10:	nil	£100k
2010-11:	nil	£200k
2011-12:	nil	£500k
2012-13:	£1.5 ~~£2m~~	£0 ~~£500k~~

The HMRC analysis is as follows:

Unmatched 2012-13 capital payments reduced to £1.5 million.
Refer unmatched capital payments to preceding year.

Our journey takes us to step 5.

> *Step 5*
>
> [1] Start again at Step 1 (unless subs.(3) applies)....
>
> [3] If the s.1(3) amount for the relevant tax year (as so reduced) is nil, read references to the s.1(3) amount for the relevant tax year as the s.1(3) amount for the latest tax year—
>
> (a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and
>
> (b) for which the s.1(3) amount is not nil.

This is a surplus capital payment case, (the s.1(3) amount for 2012–13 is now nil).

We revert to step 3 which now reads:

> *Step 3*
>
> The s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.1(3) amount is not nil*
>
> is matched with—
>
> (a) if the total amount of capital payments received in the relevant tax year does

> not exceed the s.1(3) amount ~~for the relevant tax year~~, *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken,*
>
> *(b) for which the s.1(3) amount is not nil.*
>
> each capital payment so received, and
>
> (b) otherwise, the relevant proportion of each of those capital payments.
>
> "The relevant proportion" is the s.1(3) amount ~~for the relevant tax year~~ *for the latest tax year*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken,*
>
> *(b) for which the s.1(3) amount is not nil*
>
> divided by the total amount of capital payments received in the relevant tax year.

The "latest tax year" is now 2011-12. This is a surplus capital payment case because "the total amount of capital payments received in the relevant tax year" (now £1.5m) does exceed "the s.1(3) amount for the latest year" (£500k). Accordingly:

> *Step 3*
>
> The s.1(3) amount for the latest tax year is matched with—
>
> (b) ... the relevant proportion of each of those capital payments.

The relevant proportion is one third.

The process repeats again and again. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

> *2012-13 trust gains reduced to nil.*
>
> *b. 2011-12: match 2012-13 capital payments £1.5 million to £500,000 gains.*
>
> *2011-12 trust gains reduced to nil.*
>
> *Unmatched 2012-13 capital payments reduced to £1 million.*
>
> *Refer unmatched capital payments to preceding year.*
>
> *c. 2010-11: match 2012-13 capital payments £200,000 to £200,000 gains.*
>
> *2010-11 trust gains reduced to nil.*
>
> *Unmatched 2012-13 capital payments reduced to £800,000.*
>
> *Refer unmatched capital payments to preceding year.*
>
> *d. 2009-10: match 2012-13 capital payments £100,000 to £100,000 gains.*
>
> *2010-11 trust gains reduced to nil.*
>
> *Unmatched 2012-13 capital payments reduced to £700.000.*
>
> *Refer unmatched capital payments to preceding year.*
>
> *e. No unmatched trust gains in 2008-09 or earlier years.*

> *Carry forward unmatched capital payments of 2012- 13 of £700,000 to be matched against trust gains of 2013-14 and subsequent years.*

It is noteworthy that in order to deal with the HMRC example (which is a simplication of a typical real life case, for there is only one capital payment in five years) one has to carry out 15 steps.

61.15.6 *Year of death of beneficiary*

If a beneficiary dies in a tax year, all gains accruing to the trustees in that year are s.1(3) amounts, which can be matched with capital payments made to the beneficiary, even post-death gains. However gains of a subsequent tax year cannot be matched. Section 87 does not say so expressly but the beneficiary could not be subject to CGT on s.87 gains, as the charge is limited to UK residents (s.2 TCGA) and a deceased person is not resident in the UK. That has to be the rule: otherwise it could happen that an estate of a beneficiary who received capital payments could not be completely administered, as there might be a possibility of gains accruing at any time in the future.

HMRC agree. The CG Manual provides:

> **CG38605: Beneficiary** [Nov 2019]
> If a beneficiary dies having received unmatched capital payments those payments cannot be matched against trustees' section [1(3)] amounts for years after the year of death. They can be matched section [1(3)] amounts for the year of death even if the trustees' disposal is after the date of death.

Contrast the rule for s.86 which does not apply to gains accruing to the trustees in the year that the settlor dies, even pre-death gains.[95] Perhaps the reason for the s.87 rule is that it works (slightly) more fairly when two beneficiaries receive capital payments in a tax year and one of them dies during that year.

61.15.7 *Method statements: Critique*

The pre-2008 s.87 provided:

> *(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments*

[95] See 60.12 (Death of settlor).

> *from the trustees in that year or have received such payments in any earlier year.*
> *(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.*
> *(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.*

No reader who labouriously works through the almost endless iterative steps of s.87A will consider the new style of wording is an improvement on the old. I first speculated whether the legislation was drafted by someone who trained to write computer programs rather than legislation. The correct explanation seems to be that "method statements" (ie step-based drafting) was an innovation of the Tax Law Rewrite project in the search for new and clearer methods of drafting; the drafter of the FA 2008 adopted the technique, but in more clumsy hands the technique delivered obscurity rather than clarity.

This does not necessarily mean that step-based drafting is a bad technique, but it certainly demonstrates how it can be used to bad effect. Finance Bills are generally drafted in a hurry (the FA 2008 was a mad panic) and clarity was a victim of the process.

The fundamental problem however is not the drafting, but the need to match capital payments with trust gains for a year.

61.16 Planning by matching

Matching is a rough and ready rule and trustees need to plan carefully to avoid unfairness.

61.16.1 *Planning: Remittance basis*

Suppose:

(1) Years 1–10: A beneficiary ("B") occupies a UK house held by a trust. This is a capital payment.

(2) Year 11: The house is sold for £1m gain and a s.1(3) amount arises.

In principle the s.1(3) amount in year 11 is matched with the capital payments in years 1–10. The s.87 gain is taxed on an arising basis of the benefit received in the UK. If B is UK resident in year 11, this is an expensive matter. Suppose:

(3) Year 11: The trustees make a capital payment of £1m to B outside the

UK.

The s.1(3) amount is matched with the £1m capital payment and the s.87 gain is taxed on the remittance basis.

61.16.2 *Planning: Interest surcharge*

Since the surcharge matches on a LIFO basis, the charge can be avoided by realising gains in the year that any capital payment is made, so as to frank any capital payment with current year gains. If gains are not actually realised, the rules in schedule 4B TCGA make it fairly easy to realise deemed gains which may do just as well.[96]

61.17 Interest surcharge

Section 91(1) TCGA provides:

> This section applies if—
> (a) chargeable gains are treated under s.87 or 89(2) as accruing to an individual directly or indirectly by virtue of the matching (under s.87A) of all or part of a capital payment with the s.1(3) amount for a tax year ("the relevant tax year"),
> (b) the individual is charged to tax by virtue of that matching, and
> (c) the capital payment was made more than one year after the end of the relevant tax year.

It is not enough that chargeable gains to accrue to a beneficiary, and that the beneficiary is charged to tax; this must be "by virtue of the matching". But since gains do not accrue unless there is matching, and the beneficiary is not charged unless there is matching, the words appear to be otiose.

Section 91(1A) deals with part matching:

> Where part of a capital payment is matched, references in subsections (2) and (3) to the capital payment are to the part matched.

We then turn to the tax increase:

> (2) [a] The tax payable by the individual in respect of the payment shall be increased by the amount found under subsection (3) below,
> [b] except that it shall not be increased beyond the amount of the payment;
> [c] and an assessment may charge tax accordingly.

[96] See 62.1 (Borrowing by non-resident trust).

Para 2[b] stops the Treasury increasing the tax rate above 100%. One would hope it is not necessary. Para 2[c] is otiose.

s91(1) and (2) were amended by FA 2018 schedule 10. Prior to these changes references to "the individual" above were to "the beneficiary". The change was presumably because the extended definition of beneficiary in s97(8) does not apply for the purposes of s91. But the change now suggests that if a (UK) company were a beneficiary that the interest surcharge would now not apply. A capital payment to a UK company is not likely to happen in practice.

Section 91(3) specifies the amount of the increase:

> The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this section) carried interest for the chargeable period at the rate of 10 per cent per annum.

Thus we have a notional 10% interest – the rate bears no relation to commercial interest rates – for a period called a chargeable period.

> (4) The chargeable period is the period which—
> (a) begins with the later of the 2 days specified in subsection (5) below, and
> (b) ends with 30th November in the year of assessment following that in which the capital payment is made.
> (5) The 2 days are—
> (a) 1st December in the tax year immediately after the relevant tax year, and
> (b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

I call this the "**interest surcharge.**" It is not interest in the true sense of the word, but the wording is designed to give the some of the appearance of interest.

The effect of s.91(1)(c) is that there is a one year grace period, the tax year after the gain accrued to the trustees, during which there may be a capital payment without a surcharge. On a payment after the one year grace period, the surcharge applies, backdated to 1 December in the "grace year". Odd; but there it is.

As the chargeable period cannot exceed 6 years, the maximum surcharge is 60% of the tax. As the top CGT rate is 20%, the maximum rate of tax on a capital payment is 32%. The top CGT rate is lower than top IT rates (though this has not always been the case).[97]

For completeness, the Treasury may alter the rules;[98] but they have never done so.

61.17.1 *HMRC example*

The s.87 guidance note gives an example:

> **Example 13: New section 91 - tax increase under section 91 TCGA**
> As at [the start of] 2008-09 there are no unmatched capital payments or section 2(2) amounts.

Year	**Capital payments**	**s.2(2) amount**
2008-09	£ 3,000	£17,000
2009-10	£ 5,000	£ 6,000
2010-11	£37,000	£16,000
Total	£45,000	£39,000

In summary, the capital payments for each year are matched with the section 1(3) amounts for each year as follows:

	Capital payment	s.1(3) amount	s.87 gain	Unmatched s1(3) amount	Unmatched capital payment
2008-09	3,000	17,000	3,000	14,000	
2009-10	5,000	6,000	5,000	1,000	
2010-11	37,000	16,000	16,000	nil	21,000

> In 2010-11 it is necessary to match the unmatched capital payments for that year against the unmatched section 2(2) amounts of earlier years. On a last in-first out basis £1000 is matched against the unmatched amount section 2(2) for 2009-10 and £14,000 against the unmatched section 2(2) amount for 2008-09.
> Total gains of £31,000 arise as a result of the capital payment in 2010-11 matched as follows:

2010-11	£16,000
2009-10	£1,000
2008-09	£14,000

> At the time of writing the annual exempt amount and rate of CGT are not known for 2010-11. This example assumes they are £10,200 and 18% respectively.
> The tax due for 2010-11 is £3744 ([£31,000 - £10,200] @ 18%).

[97] Up to 2015/16, where the full surcharge applied, there was not much difference between IT and the top CGT rate.

[98] Section 91(6)(7) TCGA.

> Section 91 TCGA will apply to increase the tax due on the gain £14,000. The taxpayer's annual exempt amount can be set against that part of the gain. The tax due on £14,000 – £10,200 is £3800 @ 18% = £684. This amount of tax is increased by 20% ie £136 making the total tax payable £3880 (£3,744 + £136).

In the terminology of s.91, so far as the s.87 gain is matched with the £14k s.1(3) amount for 2008/09:
The relevant tax year is 2008/09
The chargeable period begins 1 December 2009.
The chargeable period ends 30 November 2011.
Hence the rate of the interest surcharge is 20%.
There is no interest surcharge so far as the s.87 gain is matched with the s.1(3) amount for 2009/10 as the condition in s.91(1)(c) is not met. In short, the interest surcharge rule does not apply if only one year has passed since the s.1(3) amount (trust gain).

61.17.2 *Surcharge/remittance basis interaction*

What is the position if the s.87 remittance basis applies? Para 1(2) sch 1 TCGA provides:

> The [s.87] gains are treated as accruing to the individual only so far as, and at the time when, they are remitted to the UK.

One might argue that there is no interest surcharge, because the gains are not charged to tax by virtue of matching; they are charged by virtue of the remittance. But the better view is the surcharge applies (by reference to the year of capital payment, not by reference to the year of remittance). HMRC agree.[99]

There is a small planning point here for remittance basis taxpayers. One could avoid the interest surcharge if the trustees make capital payments in the year that s.1(3) amounts (trust gains) accrue, with a view to remittance in later years; whereas if the capital payment is made in the later year, followed by prompt remittance, there is an interest surcharge.

61.17.3 *Interest surcharge planning*

Realise gains later: It would be worthwhile where practical to realise gains, in order to match a capital payment to those later gains, rather than

[99] See 61.19.1 (HMRC examples).

matching to earlier gains which incurs the supplement.

Make capital payments sooner: If it is not possible to realise later gains, it would generally be better to make capital payments sooner, and pay the CGT sooner but without the surcharge, than to make the capital payments later and pay the surcharge.

61.17.4 *Interest surcharge: Critique*

What is the reason for the interest surcharge? It is to counter the perceived advantage that UK trusts pay CGT on an arising basis, but non-resident trusts (outside s.86) pay CGT on a capital payments basis, which is more favourable. But it works very oddly, particularly after the extension of s.87 to foreign domiciled settlors and beneficiaries in 2008. For instance, consider a trust set up some years ago by an Australian for Australian beneficiaries; one beneficiary comes to the UK and receives a capital payment here. Why should there be a surcharge?

As the rate is penal, the surcharge when it applies may be a late distribution penalty; or an incentive to distribute promptly. That might be regarded as a reason for the surcharge, if the policy object were to encourage prompt distributions. But the incentive only operates when a trust realises a single gain, and does not realise subsequent gains, so it seems unlikely that consideration was a reason for the surcharge.

The surcharge is not likely to bring in sufficient tax to justify the complications and unfairness that it causes. That makes a good case for repeal of the surcharge. But there is no reason to expect that. Anyway, what is needed is a review of s.87 more generally; and there is no likelihood at all of that.

61.18 s.87 gains of split year

Section 87(2A) TCGA provides:

> If the relevant tax year is a split year as respects the beneficiary, the gains are treated as accruing in the UK part of that year.

So all s.87 gains of a split year come into charge.

61.18.1 *s.87 split year: Critique*

At first sight, s.87 ought to operate the same split-year rule as ordinary gains: s.87 gains accruing in the overseas part of a split year should not be taxed. That would however require one to determine when in the split year s.87 gains accrue (or at least, whether gains accrue in the overseas part or the UK part of a split year).

In the following discussion, a **"split-year benefit"** is a benefit conferred during a split year.

In a simple case where trust gains of earlier years will exceed any split-year benefits, it is easy to see that s.87 gains accrue when the benefit is conferred. But where there are (or may be) insufficient trust gains of earlier years to match the split-year benefit, the question of when s.87 gains accrue is less clear. The amount of the s.87 gains depends on factors which are not determined until the end of the tax year:

(1) the total amount of trust gains (less losses) of the entire tax year and
(2) the total amount of capital payments to all beneficiaries in the entire tax year.

This was, I expect, the reason for the pre-2018 rule that s.87 gains accruing in a split year were time-apportioned across the year.

A fair and practical rule would be that benefits conferred on a beneficiary during the overseas part of their split year treated like benefits of a year of non-residence, ie (in short) disregarded.

The unfairness of the current rule is exacerbated by the uncertainty as to whether s.87 DT relief applies where a beneficiary is treaty-resident in an foreign state with a treaty in OECD model form.[100]

61.19 s.87 remittance basis

Section 87B TCGA provides what I call the "**s.87 remittance basis**".

Section 87B(1) provides:

> This section applies if—
> (a) chargeable gains are treated under s.87 as accruing to an individual in a tax year, and
> (b) s.809B, 809D or 809E (remittance basis) applies to the individual for that year.

In short, the relief applies to remittance basis taxpayers.

In order to understand the law one must carefully distinguish:

(1) trust gains (gains accruing to the trustees)
(2) s.87 gains (treated under s.87 as accruing to the beneficiary)

Section 87B(2) TCGA provides the relief:

[100] See 61.60.2 (Beneficiary treaty-resident outside UK).

> The chargeable gains [s.87 gains] are chargeable gains accruing on the disposal of an asset situated outside the UK.[101]

This incorporates the remittance basis.[102] It would not work by itself as s.87 gains (being fictional) do not exist and cannot be remitted. So s.87B(3) TCGA provides:

> For the purposes of Chapter A1 of part 14 of ITA 2007 (remittance basis) treat relevant property or benefits as deriving from the chargeable gains [the s.87 gains].

The definition of "relevant property or benefits" is convoluted, but ultimately what one would expect. Section 87B(4) TCGA provides:

> For the purposes of subsection (3) property or a benefit is "relevant" if the capital payment by reason of which the chargeable gains [the s.87 gains] are treated as accruing consists of—
> (a) [i] the payment or transfer of the property or
> [ii] its becoming property to which s.60 applies, or
> (b) the conferring of the benefit.[103]

I refer to this as the "**derivation fiction**".

Thus we have three fictions:

(1) We pretend the beneficiary receives s.87 gains: this is the basic s.87 fiction.
(2) We pretend the s.87 gains arise on the disposal of foreign situate assets.
(3) We pretend the capital payments derive from those s.87 gains (the derivation fiction).

The derivation fiction feeds into remittance condition B. There is a taxable remittance if (in short):

(1) *Property*[104] is brought/received/used in the UK (remittance condition A) and

[101] It would be more apt to say that the s.87 gains "are *treated as* chargeable gains accruing on the disposal of an asset situated outside the UK." But nothing turns on that.

[102] See 56.17 (CGT remittance basis).

[103] The wording follows the wording of the definition of capital payment: see 61.7.2 ("Payment").

[104] Or services, but for clarity I refer only to property. I also assume that the property is brought/received/used by a relevant person.

(2) That property is derived (indirectly) from foreign gains (remittance condition B).

Section 731 adopts a similar rule; for a fuller discussion see 50.39 (s.731 remittances: Operation).

A capital payment still reduces the s.1(3) amount (trust gains) even though the payment is (un)taxed under the s.87 remittance basis. This is sensible because other beneficiaries (and the trustees) could not know what the position was.

It does not matter whether the s.1(3) amounts (trust gains) accrue on disposals of UK or foreign assets. All that matters is whether the capital payment is remitted to the UK. HMRC agree. The s.87 guidance note provides:

> 43. The remittance basis applies to the s.87 gain not the gain that created the s.2(2) amount. For example,
> trustees dispose of an asset held outside the UK creating a s.2(2) amount.
> In the same year they make a capital payment outside the UK to a non-domiciled beneficiary.
> The capital payment is matched against the s.2(2) amount.
> A s. 87 gain accrues to the beneficiary who has claimed the remittance basis for that year.
> The trustees apply the proceeds of the disposal in buying investments in the UK.

The HMRC analysis is as follows:

> This remittance of the gain which created the s. 2(2) amount [the trust gain] is not treated as a remittance of the s.87 gain by the beneficiary.[105]

Relevant property/benefits may be received in the UK in a year before the s.87 gains accrue, due to the quirky matching rules. Suppose:

(1) Year 1: a beneficiary receives a benefit; there are no s.1(3) amounts (trust gains) so the benefit is not matched and no s.87 gain accrues.

(2) Year 2: the beneficiary remits the benefit to the UK. There is still no s.87 gain.

[105] Similarly, FAQ Residence & Domicile – NR trusts provides:
"**Does it make any difference if the assets in the non-resident trust or underlying non-resident company owned by the trust are UK situated?**
There is no difference in the CGT treatment of UK situated vs foreign situated assets when these are owned by a non-resident trust or underlying non-resident company."

(3) Year 3: trust gains accrue to the trustees and a s.87 gain accrues to the beneficiary.

The s.87 gain is deemed to be remitted in the year it arises (year 3) and not before.[106]

61.19.1 *Example: Outright payment*

The s.87 guidance note provides:

> **Example 8 – New section 87B - remittance of capital payment: payment**
> A is a UK resident and domiciled beneficiary of a non-UK resident settlement. B is a UK resident but non-UK domiciled beneficiary of the same settlement. The settlement owns shares in X Inc. X Inc is an American company registered on the New York Stock Exchange.[107]
> In 2008-09 the trustees sell shares in X Inc for $120,000 when the spot rate is £1 = $1.50. The acquisition cost of the shares was $20,000 when spot was also £1 = $1.50. This creates a section 2(2) amount of £66,666 for 2008-09, ie $100,000 @ 1.50.
> In 2010-11 the trustees make capital payments of $40,000 into the US bank accounts of each beneficiary. The spot rate of the US dollar at the date of the payment is £1 = $1.75. Chargeable gains of £22,857 accrue to each beneficiary under section 87 in 2010-11 in respect of these capital payments. $40,000 @ $1.75 = £22,857.
> At the time of writing the annual exempt amount and rate of CGT are not known for 2010-11 and 2012-13. This example assumes the rate of CGT is 18% for both years and the annual exempt amount was £10,000 in 2010-11 and £11,000 in 2012-13.

The example first deals with the position of A, the UK domiciled beneficiary:

> Beneficiary A has other gains in 2010-11. The overall position is as follows.
> - Section 87 gains £22,857
> - Other personal gains £40,000
> - Other personal losses £20,000
> - Annual exempt amount £10,000
>
> The amount on which CGT is chargeable is £32,857. The personal losses can be set only against the other personal gains but the annual exempt amount is allocated first to the section 87 gain leaving £12,857 of that part of the gain chargeable at 18%. The tax due on £12,857 is £2,314 (£12,857 @ 18%). This is increased by £462 (£2,314 @ 20%) because there is a delay of over one year in making the capital payment.

[106] See 18.48 (Remittance before income/gains arise).

[107] This sentence is irrelevant, as the situs of the trust asset does not matter for s.87 purposes.

The example then deals with the position of B, the remittance basis taxpayer:

> Beneficiary B claims the remittance basis for 2010-11 and leaves the $40,000 in the US bank account. B also has other gains in 2010-11. These gains and losses arise on the disposal of assets situated in the UK. The overall position is as follows.
>
> - Section 87 gains £22,857
> - Other personal gains on UK assets £40,000
> - Other personal losses on UK assets £20,000
>
> B does not have an annual exempt amount in 2010-11 because they have claimed the remittance basis. B is not liable to CGT on the section 87 gain of £22,857 because of section 87B. B is liable to CGT at 18% on the full amount of the other net personal gains £20,000.
>
> Because B has claimed the remittance basis they also have to decide whether or not to make an election under section 16ZA TCGA. The effect of that election is allow losses on the disposal of assets situated outside the UK to be set-off against gains, either foreign chargeable gains or gains on the disposal of assets situated in the UK. Unless the election is made the foreign losses will be lost. An effect of the election is that the annual exempt amount cannot be set foreign chargeable gains remitted to the UK, section 16ZB(4). B makes a valid election within the time limit, 31 January 2017.
>
> In 2012-13 B remits $30,000 of the $40,000 from the US bank to their UK bank where it is converted to sterling at a rate of £1 = $2.00 ie £15,000. B is not a remittance basis user in 2012-13. The rate of CGT is 18%. The annual exempt amount is £11,000. The remittance is a disposal of foreign currency in the US bank account giving a loss of £2,142 [$30,000 @ $2.00 = £15,000 – $30,000 @ 1.75 = £17,142].
>
> B is liable to CGT in 2012-13 on the following elements.
>
> The section 87 gain is a foreign chargeable gain. Section 12(2) and (3) TCGA provides this chargeable gain is treated as accruing in 2012-13 equal to the full amount of the gains remitted in 2012-13. B has remitted 75% of the £22,857 chargeable gain (30,000/40,000×£22,857) = £17,142. Section 2(4) TCGA prevents the personal losses, £2,142, being set against this gain. Because of the election under s16ZA neither can the annual exempt amount be set against this part of the gain. Tax is due at 18% on £17,142 = £3,085. This tax is subject to the increase in section 91 TCGA. This is calculated by reference to the year the gain was matched ie 2010-11 not the year the gain was remitted. The rate charged, 20%, will be the same that applied to beneficiary A. The total tax charged on this part of the gain is £3,085 + £617 = £3,702.
>
> If B had not made the election under s16ZA the annual exempt amount could be set against the remitted gains reducing the amount liable to the increase under s91. But they would lose the benefit of losses on any assets situated the UK.
>
> Additionally for 2012-13 B has other personal gains on UK assets of £18,000. Because of the election under s16ZA the personal losses £2,142 can be set against these gains as can the annual exempt amount £11,000. With a tax rate of 18% the total tax charged on the net gains of £4,858 is £971. The total CGT

payable for 2012-13 is £4,673 (£3,702 + £971).

61.19.2 *Example: Use of property*

The next HMRC example concerns capital payments which take the form use of accommodation, rather than an outright transfer. Omitting irrelevant detail, the example is as follows:[108]

> *Example 9 - New section 87B - Remittance of capital payment: benefit*
> C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement has s.2(2) amounts.
> The trustees (or underlying companies) allow C to use rent-free:
> (1) a property outside the UK and
> (2) a property in the UK.

The HMRC analysis is as follows:

> The use of both properties by C gives rise to a capital payment equal to the value of the benefit. These capital payments are matched against the section 2(2) amount and a s.87 chargeable gain accrues to C. Section 87B(2) TCGA provides this is a foreign chargeable s.87 gain.
> The use of the UK property meets remittance condition A in section 809L.
> Because section 87B(3) TCGA provides the benefits derive from the [s.87] chargeable gains the use of that property also meets remittance condition B in section 809L(3)(b) ITA 2007.
> C is treated as remitting the capital payment created [by] the use of the Devon property to the UK and C is liable to CGT on that [capital] payment.
> The use of the property outside the UK is not treated as a remittance to the UK and C is not liable to CGT on that payment.

Remittance conditions A and B are (so far as relevant):

[108] The example in full, including its irrelevant detail, is as follows:
"C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement owns 100% of the issued share capital of a Gibraltarian holding company which in turn owns 100% of the issued share capital of a Gibraltarian company. That company owns a property in Spain. Both companies are non-UK resident.
The company sells the property in Spain creating a section 2(2) amount of £120,000 through section 13 TCGA. The company invests some of the proceeds in the purchase of a smaller property in Spain. C is allowed to use the property rent-free. C is also allowed rent-free use of a cottage in Devon owned by the settlement."

> (2) Condition A is that—
>
> (a) money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person ...
>
> (3) Condition B is that ...
>
> (b) the property, [ie the property within (2)(a)]—
>
> (i) derives (wholly or in part, and directly or indirectly) from the ... chargeable gains, and
>
> (ii) ... is property of ... a relevant person...

Remittance condition A is satisfied on the basis that property (the Devon cottage) is used in the UK. Clarke questions whether remittance condition B is satisfied.[109] There is a relevant benefit: the rent free use of the cottage. That benefit is deemed to be derived from the s.87 gain. It does not follow from that deeming that the property (the Devon cottage) derives from the s.87 gain.

The correct analysis, it is suggested, is that:

(1) Condition A is satisfied because the right to use the cottage is itself property received or used in the UK; and

(2) That right is the benefit which is deemed to derive from the s.87 gain.

Clarke argues that "the issue stems from the fact that Conditions A and B in ITA 2007, s 809L require the money or other property used in the UK to be or be derived from the foreign income or gains in order for such income or gains to be remitted. But s 87B(3) deems the capital payment constituted by the use of the asset to be derived from the s 87 gain, not the asset itself. Similarly, it is the benefit, not the property over which the benefit is conferred, which is treated by s 735(4) as derived from the s 732 income." But if the benefit is derived from the s.87 gains, then the proprietary interest conferred by the benefit is also derived (indirectly) from the s.87 gains.[110]

61.20 Non-resident disregards: Outline

HM Treasury say:

> **2.3.1 Treatment of capital gains in trusts**
>
> ... where a beneficiary is not UK resident, no tax is due. Making a capital

[109] Woodward, *Clarke's Offshore Tax Planning — Trusts and Companies* (2023-24), para 63.18 (Benefits in kind: land and chattels).

[110] See too 50.40.2 (Beneficial loan).
For a similar argument in another context, see 18.17 (Property is the income or gains).

> payment to such a beneficiary has the effect of reducing the gains in the pool and the amounts available to match against any subsequent payments to UK resident beneficiaries. For tax purposes, the pool of gains has been depleted by the payments to non-residents – even though the non-residents did not pay tax on the gain.
> ... under the new [2018] regime capital payments to a non-resident beneficiary ... will ... not be matched against the pool of trust gains. This is regardless of the domicile status of the settlor and whether or not the recipient of the payment is the settlor or another beneficiary of the trust. This will ensure that the pool of gains against which payments to UK beneficiaries are matched will not be depleted because of payments made to non-residents.[111]

As usual, the policy can be stated in a few lines but its implementation requires a chapter to discuss.

61.20.1 *Navigation*

The following table may assist:

TCGA	**Topic**	**See para**
s.87D	Non-resident disregard	61.21
s.87E	Temporary non-resident	61.22
s.87F	Final trust year	61.24
s.87G-M	s.87 settlor-attribution	61.29
s.87N	Migrant disregard	61.23
s.87P	Temporary migrant	61.23.1

61.21 Non-resident disregard

Section 87D(1) TCGA provides:

> [a] For the purposes of sections 87 and 87A as they apply in relation to a settlement,[112] no account is to be taken of a capital payment (or a part of a capital payment) within subsection (2) ...

The section then signposts some exceptions:

> [b] but this—

[111] Reforms to the taxation of non-domiciles: response to further consultation (2016) para 2.3.5. *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf*

[112] Section 87D(1) refers to s.87/87A "as they apply in relation to a settlement" but the sections do not apply to anything else. The phrase is otiose, though it does no harm.

> (a) is subject to
> [i] subsection (3) [settlor-attribution rule] and
> [ii] section 87E [temporary non-residence], and
> (b) does not affect the operation of sections 87I to 87L [onward gifts] (see, in particular, sections 87K(2) and 87L(2) which apply sections 87 and 87A by reference to the payment mentioned in section 87I(1)(a)).

Section 87D(2) TCGA then identifies the disregarded payments:

> [a] A capital payment is within this subsection if (and to the extent that[113]) it is in a tax year received from the trustees of the settlement by a beneficiary who at all times in that year is not resident in the UK,
> [b] but this is subject to section 87F [final trust year].

I refer to this rule as the **"non-resident disregard"**. That is not a neat label, but it is difficult to think of a better one. The rule is one of a number of capital payment disregards.[114]

It follows that the non-resident beneficiary will not be taxed, even if the capital payment is matched at a later time when they have become UK resident.

There are five exceptions to the non-resident disregard; for some reason, 4 are mentioned in s.87D(1) and the fifth is mentioned in s.87D(2). They are:

TCGA section	**Topic**	**See para**
87D(3)	s.87 settlor attribution	61.21.2
87E	Temporary non-resident	61.22
87F	Final trust year	61.24
87K(2), 87L(2)	Onward gifts	61.33

What about a capital payment to a non-resident company which is treated as made to a UK resident participator, under the s.96(2) rule?[115] Context show that should not be disregarded.

61.21.1 *EU-law compliance*

Is the non-resident disregard EU-law compliant? The rule is particularly

[113] The words in brackets assume that one capital payment could be made partly to a non-resident; that seems a somewhat laboured view, but it does not matter.

[114] See 61.11.4 (Disregard of payment to co: s.87C).

[115] See 61.11 (Payment to close co: s.96(2) rule).

odd for charities, as a capital payment to a UK resident charity is not disregarded, but a capital payment to a non-resident charity is disregarded. That is likely a breach of EU law. But that point may not often arise.

61.21.2 *Preservation of s.87 settlor-attribution*

The non-resident disregard in s.87D(2) would apply where:

(1) There is a capital payment to a non-resident who is close-family of the settlor
(2) The settlor is UK resident and within the s.87 settlor-attribution rule[116]

In this case the non-resident disregard would help the taxpayer as it would disapply the s.87 settlor-attribution rule. Section 87D(3) TCGA prevents this:

> Subsection (1) does not apply in relation to a capital payment (or a part of a capital payment) if-
> (a) the recipient beneficiary is a close member of the settlor's family (see section 87H)[117] when the beneficiary receives (or is treated as receiving) the payment (or part),
> (b) the payment (or part) is received on or after 6 April 2018, and
> (c) the settlor is resident in the UK in the tax year in which the payment (or part) is received.

In short, the s.87 settlor-attribution rule has priority over the non-resident disregard.

61.21.3 *Planning*

Separate settlements (for UK and non-UK beneficiaries) are better than one settlement for both.

Where a single settlement currently exists, a transfer to separate settlements for separate branches of the family is likely to be advantageous.

61.21.4 *Pre-2018 payment to non-resident*

Para 1(12) sch 10 FA 2018 provides:

> The new sections 87D and 87E have effect—
> (a) except as provided by the new section 87D(3) [preservation of settlor-attribution rule], in relation to payments received in the tax

[116] See 61.26 (Settlor-attribution rules).
[117] See 61.27.2 ("Close-family").

year 2018-19 or a later tax year, and

(b) in the tax year 2018-19 and later tax years, also in relation to payments received before the tax year 2018-19 that have not been matched under section 87A of TCGA 1992 as it applies for tax years before the tax year 2018-19.

Pre-2018 payments to non-residents that are matched pre-2018 are unaffected.

Pre-2018 payments to non-residents that are unmatched pre-2018 are disregarded. Thus there is an element of retrospectivity in the rule.

61.22 Payment to temporary non-resident

The non-resident disregard in s.87D(2) would apply where:

(1) There is a capital payment to a non-resident who is temporarily non-resident

(2) The beneficiary becomes UK resident

In this case the non-resident disregard would help the taxpayer by taking the capital payment out of the s.87 TNR charge.[118]

Section 87E(1) TCGA prevents this:

> If-
>
> (a) as a result of section 87D, no account is taken of a capital payment (or a part of a capital payment) for the purposes of sections 87 and 87A,
>
> (b) the recipient beneficiary is an individual who is temporarily non-resident,[119] and
>
> (c) the payment (or part) is received in the beneficiary's temporary period of non-residence,
>
> the payment (or part) is treated for the purposes of sections 87 and 87A as received (by the beneficiary) in the beneficiary's period of return, and account is to be taken of it accordingly for those purposes.

The payment is disregarded in the year of payment, but taken into account in the year of return. For instance: Suppose a trust had trust gains of £3m

[118] See 11.6 (TNR gains/losses).

[119] Section 87E(2) TCGA incorporates the usual TNR definitions: "Part 4 of Schedule 45 to FA 2013 explains—

(a) when an individual is to be regarded as "temporarily non-resident", and

(b) what "the temporary period of residence" and "the period of return" mean."

This is repeated in s.87P(2) TCGA and para 2(4) sch 10 FA 2018.

(1) Year 1: Payment of £2m to X (temporarily non-resident). Payment is disregarded.
(2) Year 2: Payment of £2m to Y (UK resident). Payment is matched with trust gains and £2m s.87 gains accrue to Y.
(3) Year 3: X becomes UK resident. The year 1 payment is matched with the outstanding £1m trust gains, and £1m s.87 gains accrue to X.

By contrast, if X had returned in year 2, then £1.5m s.87 gains would accrue to each of X and Y.

61.22.1 *Pre-2015 migration*

Para 2 sch 10 FA 2018 provides:

> (1) Sub-paragraph (2) applies in a case where-
> (a) section 10A of TCGA 1992 (temporary non-residents) as substituted by paragraph 119 of Schedule 45 to FA 2013 applies in relation to an individual,

That is, a post-2013 migration.

> (b) the period of temporary non-residence[120] began before 8 July 2015, and
> (c) a capital payment (or part of a capital payment) is treated by
> [i] section 87E [payment to temporary non-resident] or
> [ii] 87P [payment to temporary migrant] of TCGA 1992
> as received by the individual in the period of return.
>
> (2) For the purposes of capital gains tax in respect of any chargeable gain treated by section 87 of TCGA 1992 as accruing to the individual as a result of matching of the payment (or part), section 809B(1A) of ITA 2007 does not have effect in relation to the tax year which consists of or includes the period of return.

Section 809B(1A) applies deemed domicile rules to s.809B (claim for remittance basis).[121] So the effect is to disapply deemed domicile.
Para 2(3) sch 10 FA 2018 provides:

> Where by virtue of sub-paragraph (2) the individual makes a claim under section 809B of ITA 2007 for any of the tax years 2018-19 to 2020-21 inclusive, sections 809C, 809G and 809H of ITA 2007 do not

[120] Para 2(4) incorporates the usual TNR definitions.
[121] Section 809B(1A) provides: "Section 835BA (deemed domicile) applies for the purposes of subsection (1)(b)."

apply to the individual for that tax year.

This disapplies the remittance basis charge, which seems generous, though it will not often arise.

61.23 Migrant disregard

The non-resident disregard in s.87D(2) would not apply where:

(1) There is a capital payment to a UK resident
(2) There are no trust gains, so there is no s.87 charge at that time
(3) The individual becomes non-resident
(4) Trust gains then accrue, which are matched with the earlier capital payment

Section 87N TCGA deals with this:

> (1) [a] For the purposes of sections 87 and 87A as they apply in relation to a settlement for a particular tax year, no account is to be taken of a capital payment (or part of a capital payment) within subsection (2),
> [b] but this is subject to section 87P [temporary migrant].

The wording is the same as the 87D disregard.

> (2) A capital payment is within this subsection—
> (a) if it is received by a beneficiary of the settlement before the particular tax year,
> (b) if the relevant person is resident in the UK in the tax year in which it is received,
> (c) if the relevant person is not resident in the UK in the particular tax year, and
> (d) so far as it has not been matched (under section 87A as it applies for tax years before the particular tax year) with—
> (i) the section 1(3) amount for any tax year before the particular tax year, but not earlier than the tax year 2018-19, in which the relevant person is resident in the UK, or
> (ii) the section 1(3) amount for any tax year earlier than the tax year 2018-19.
> (3) For the purposes of subsection (2), the beneficiary is "the relevant person" unless section 87G(2) applies in relation to the capital payment in which event the settlor is "the relevant person".

I refer to the beneficiary as the **"migrating beneficiary"**, and the rule is the **"migrant disregard"**.

61.23.1 *Temporary migrant*

Section 87P TCGA is the equivalent of s.87E TCGA.[122] The migrant disregard in s.87N(2) would apply where:

(1) There is a capital payment to a UK resident
(2) There are no trust gains, so there is no s.87 charge
(3) The beneficiary becomes temporarily non-resident
(4) Trust gains then arise

In this case the migrant disregard would help the taxpayer by taking the capital payment out of the normal TNR charge.[123]

Section 87P(1) TCGA prevents this:

> If—
> (a) as a result of section 87N, no account is taken of a capital payment (or a part of a capital payment) for the purposes of sections 87 and 87A as they apply in relation to a settlement for a particular tax year,
> (b) the recipient beneficiary (where section 87G(2) does not apply in relation to the capital payment), or the settlor (where section 87G(2) does apply in relation to the capital payment), is an individual who is temporarily non-resident,[124]
> (c) the whole or part of the particular tax year constitutes, or forms part of, that individual's temporary period of non-residence,
> (d) either—
> (i) that individual's temporary period of non-residence begins with the start of a tax year and the payment (or part) is received before that tax year, or
> (ii) that individual's temporary period of non-residence begins otherwise than at the start of a tax year and the payment (or part) is received before, or at any time in, the tax year in which that individual's temporary period of non-residence begins, and
> (e) the payment (or part) has not been matched (under section 87A as it applies for tax years before the particular tax year) with—
> (i) the section 1(3) amount for any tax year before the particular tax year, but not earlier than the tax year 2018-19, in which that individual is resident in the UK, or

[122] See 61.22 (Temporary non-resident: Payment postponed until return).
[123] See 11.6 (TNR gains/losses).
[124] Section 87P(2) incorporates the standard TNR definitions.

> (ii) the section 1(3) amount for any tax year earlier than the tax year 2018-19,
>
> the payment (or part) is treated for the purposes of sections 87 and 87A as received (by that individual) in that individual's period of return, and account is to be taken of it accordingly for those purposes.

The payment is disregarded in the year of payment, but taken into account in the year of return.

61.23.2 *Commencement*

Para 1(15) sch 10 FA 2018 provides:

> The new sections 87N and 87P have effect where the particular tax year is the tax year 2018-19 or a later tax year.

61.24 Final trust year

The policy seems to be that prompt termination of a trust is a public good; and in such a case there is a limited exception to the non-resident disregard.

Section 87F TCGA provides:

> (1) This section applies in relation to a settlement if-
> (a) in a particular tax year, the settlement ceases to exist,
> (b) two or more beneficiaries ("the recipients") in the year receive capital payments from the trustees, and
> (c) at least one of the recipients is, and at least one is not, a non-resident beneficiary.[125]
>
> (2) Those capital payments, so far as received by such of the recipients as are non-resident beneficiaries, are not within section 87D(2).

If capital payments are made to UK and non-UK beneficiaries the capital payment is apportioned between them.

This has important planning implications. Suppose a trust has £4m trust gains, £8m assets, and a UK and a non-resident beneficiary.

(1) Suppose there is a £4m capital payment to the non-resident beneficiary in year one, and the balance is paid to the UK resident in year 2. The £4m is taxable.

(2) Suppose the two payments are made in the same year. The UK tax charge is on £2m.

[125] Section 87F(3) provides: "In this section "non-resident beneficiary" means a beneficiary who at all times in the year is not resident in the UK."

There may be scope for planning by transferring funds to another settlement, and so terminating an existing settlement.

61.24.1 *Commencement*

Para 1(13) sch 10 FA 2018 provides:

> The new sections 87F [final trust year] ... and the amendments made by subparagraphs (4) and (10), have effect in relation to payments received in the tax year 2018-19 or a later tax year

61.25 Non-resident disregard: Critique

The pre-2018 matching rules were a rough and ready solution to the intractable problem of attributing trust gains to beneficiaries; but they were a solution of a kind. The 2018 rules attribute (more or less) all trust gains to UK residents. For multi-jurisdiction families, ie where family members are resident in different jurisdictions, they will lead to double or multiple taxation, as beneficiaries resident in non-UK jurisdictions (other than tax havens) will also be subject to tax on benefits. The tax may exceed the gains.

One might regard the disregard as an illustration of Brexit parochialism, but that is perhaps to over-intellectualise.

HMRC presented the disregard as a consequence of introducing the deemed domicile changes;[126] but that was the occasion and not the cause of the change.

61.26 Settlor-attribution: Introduction

Settlor-attribution rules apply where benefits within the scope of s.87, s.643A, or s.731 are received by close family of the settlor. If the relevant conditions (which I call attribution conditions) are satisfied, the s.87 gain

[126] Reforms to the taxation of non-domiciles: response to further consultation (2016) para 2.3.5: "The government is concerned that there will be an increased opportunity and incentive for those who are deemed domiciled and therefore benefit from the trust arrangements, to benefit further from existing rules that allow the "pool" of taxable gains in overseas trusts to be reduced when capital payments are made to non-resident beneficiaries. In order to address this opportunity for tax avoidance under the new regime capital payments to a non-resident beneficiary ... will therefore not be matched against the pool of trust gains."
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf

or s.643A/731 income is attributed to the settlor; that is, treated as arising to the settlor rather than the individual (close-family) receiving the benefit.[127]

These attribution rules are written out 3 times:

Section	**Topic**	**Supplement**	**See para**
s.87G TCGA	s.87 settlor-attribution rule	s.87H	61.29
s.643A(3)(4) ITTOIA	s.643A settlor-attribution rule	s.643E	47.28
s.733A(2)(3) ITA	s.731 settlor-attribution rule	s.733B	50.49

I refer to these together as **"settlor-attribution rules"**.

There is a further set of attribution rules which apply where:

(1) Benefits within the scope of s.87, s.643A or s.731 are received by a recipient who is not close-family of the settlor.

(2) The recipient gives the benefits to close family of the settlor.

Again, the s.87 gain or s.643A/s.731 income is in some cases attributed to the settlor, that is, treated as arising to the settlor rather than the individual (close-family) receiving the gift.

These attribution rules are also written out 3 times:

Section	**Name (my terminology)**	**See para**
s.87L TCGA	OG s.87 settlor-attribution rule	61.34
s.643L ITTOIA	OG s.643A settlor-attribution rule	47.36
s.733E ITA	OG s.731 settlor-attribution rule	50.57

I refer to these together as **"OG settlor-attribution rules"** (and they may be contrasted with the **"basic"** settlor-attribution rules mentioned above).

These uniform labels conveniently indicate a common template behind the rules, though they also conceal significant differences in the scope of the rules. It would have been neater if the attribution rules had been better aligned, but there it is.

The repetition does make it harder to write a comprehensible exposition. The reader does not want to read the same discussion three times or more. But cross referencing is also inconvenient. There is no solution to this. Sometimes I repeat material, and sometimes I cross reference to where

[127] The background can be traced in HMRC, "Reforms to the taxation of non-domiciles: response to further consultation" (2016) para 2.3.5. *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf* But this is now of historical interest only.

equivalent provisions are discussed in more detail.

61.27 "Close-family"

61.27.1 *Position from 2018/19*

A common definition of close-family applies for:
(1) The settlor-attribution rules
(2) The close-family s.643A/s.731 benefit charges

The definition is written out three times, but it suffices to set out s.87H(1) TCGA which provides:

> For the purposes of sections 87D, 87G and 87L as they apply in relation to a settlement, a person is a close member of the settlor's family at any time if the settlor is living at that time and—
> (a) the person is the settlor's spouse or civil partner at that time, or
> (b) the person—
> (i) is a child of the settlor, or of a person who at that time is the settlor's spouse or civil partner, and
> (ii) at that time has not reached the age of 18.[128]

Section 87H(2) TCGA extends this to cohabitees, using the standard formula.[129]

As the word "close" suggests, this is a narrow definition. In short, close-family means spouse/cohabitee and minor children. Minor grandchildren are not included.

Although not the statutory usage, I prefer to write "close-family" with a hyphen, to highlight the artificially defined nature of the term.

61.27.2 *2017/18: "Close-family"*

Section 731(1B)(b) ITA provides a fourth definition:

> a person is a close member of the family of the settlor of a settlement if the person is—

[128] The s.643A/s.731 equivalent definitions are in s.643H ITTOIA/s.733A(7) ITA. (For completeness: The original drafting of s.733A(7) was different, but it was amended in 2018 with retrospective effect from 2017/18 to bring it into line. This sort of mess is to be expected from the decision to bring the s.731 provisions into effect a year before the s.624A and CGT provisions. But this is now of historical interest only.)

[129] See App 3.4.1 (Cohabitee treated as spouse).

(i) the settlor's spouse or civil partner,[130] or
(ii) a child of the settlor, or of a person within sub-paragraph (i), if the child has not reached the age of 18;

That has not been amended so it remains in its original form. What a mess!

61.28 Settlor-attribution indemnity

Section 87G(3) TCGA provides:

> Where any tax is chargeable on the settlor as a result of subsection (2) and is paid, the settlor is entitled to recover the full amount of the tax from the original recipient.[131]

This is a common feature of all 3 close-family rules, and I refer to it as the **"settlor-attribution indemnity"**.

Tax charge under	**Indemnity**
s.643A settlor-attribution	s.643E ITTOIA
s.87 settlor-attribution	s.87G(4) TCGA
s.87 settlor-attribution	s.87L(5) TCGA
s.731 settlor-attribution	s.733A(5) ITA
s.731 settlor-attribution	s.733E(5) ITA

For a general discussion see 101.1 (Statutory tax indemnities).

The indemnity is from the beneficiary to the settlor (not from the trustees). That is right, as an indemnity from the trustees would not have been convenient.

Bearing in mind the limited scope of the settlor-attribution rules, the settlor-attribution indemnity is not important, except in cases of divorce or separation.

The settlor indemnity under the settlor-interested trust code is more sophisticated, dealing with the issues of (1) repayment of tax and (2) the quantum of tax.[132] It is suggested that similar rules ought to be implied for the settlor-attribution indemnities.

[130] The concluding words of s.731(1B(b) ITA are: "and section 733A(7) (persons living together) applies also for the purposes of paragraph (b)." That is a slip for s.733A(8), which extends para (a) to cohabitees, using the standard formula: see App 3.4.1 (Cohabitee treated as spouse).

[131] Section 87G(4) TCGA provides for HMRC to certify the amount of tax paid, in the standard form. See 101.2.1 (Certificate of tax paid).

[132] See 101.1 (Statutory tax indemnities).

61.29 s.87 settlor-attribution rule

61.29.1 *s.87 attribution rule: Outline*

Section 87G TCGA introduces what I call the **"s.87 settlor-attribution rule"**. This is one of a set of three rules which I call s.731/s.643A/s.87 settlor-attribution rules; see 50.4.11 (Settlor-attribution rules: Introduction).

In outline, a capital payment to close-family of the settlor is attributed to the settlor (if UK resident).

This will generally apply where the settlor and close-family beneficiary are both UK resident, but then the only effect is likely to be loss of the CGT annual exemption, and lower rate of CGT, which is not that significant.

This will also apply where the close-family beneficiary is non-resident, but the settlor is resident. Then what would be a non-chargeable benefit becomes chargeable, which could be important. However it will be rare to have a UK resident settlor and non-resident close-family, and even then, the remittance basis will often avoid the charge.

61.29.2 *s.87 attribution conditions*

Section 87G(1) TCGA provides:

> Subsection (2) applies if in the case of a settlement-

A set of three straightforward conditions then follow, which I call **"s.87 attribution conditions"**:

> (a) a beneficiary of the settlement receives a capital payment from the trustees in a tax year,
> (b) the settlor is resident in[133] the UK at any time in that year, and
> (c) the beneficiary ("the original recipient") is a close member of the settlor's family (see section 87H) at the time of receipt.

61.29.3 *s.87 settor-attribution rule*

Assuming the s.87 attribution conditions are met, we move on to the rule. Section 87G(2) TCGA provides:

> Sections 87 and 87A have effect as if the capital payment-
> (a) was received from the trustees by the settlor-

[133] The correct expression for residence of individuals is resident *for* the year; but it does not matter.

(i) as a beneficiary of the settlement (whether or not the settlor is otherwise a beneficiary of the settlement),[134] and

(ii) at the time it was received by the original recipient, and

(b) was not received by the original recipient.

I refer to this as the **"s.87 settlor-attribution rule"**.

The remittance basis will apply to a settlor who is a remittance basis taxpayer.

61.29.4 *Settlor-attribution/start date*

Para 1(13) sch 10 FA 2018 provides:

> The new sections ... 87G [s.87 settlor-attribution rule], and the amendments made by subparagraphs (4) and (11), have effect in relation to payments received in the tax year 2018-19 or a later tax year

A pre-2018 capital payment is not caught, even if matched with a post-2018 trust gain.

61.29.5 *s.87/IT attribution compared*

The s.87 attribution rule is unlike the s.643A/s.731 attribution rules in two important respects:

(1) The CGT rule applies to all trust gains; the s.643A/s.731 rules only apply in relation to protected income

(2) The s.87 settlor-attribution rule applies even if the close-family individual who received the benefit is UK resident and so could have been chargeable. The s.643A/s.731 settlor-attribution rule applies only if the beneficiary is not UK resident, or non-dom, and so not chargeable. In other words, for s.643A/s.731, the settlor is the fall-back taxpayer if the beneficiary is not taxable.

61.30 Onward-gifts: Introduction

The onward-gift rules[135] were introduced in 2018.

HM Treasury say:

> The government is aware that if payments are made from a trust
>
> [1] to a beneficiary who is not a close family member [ie not close-family of the settlor] and who is not UK-resident, or

[134] Para (i) is otiose; see 61.14 (Payment to non-beneficiary); but it does no harm.

[135] A note on terminology: The statutory term is "onward gifts". Consultation documents used the term "recycling" but the statutory term is better.

> [2] to a beneficiary who is a remittance basis user,
> the recipient could agree to hold the money for a period of time before giving or lending it back to a beneficiary in the UK. This would allow the UK-resident beneficiary to receive payments from the trust without paying any UK tax on the distribution.
> The government is concerned that this relatively straightforward tax planning could increase significantly once the new non-dom rules have been implemented...
> The government will take steps to ensure that, where payments are made from a trust to a nonresident or to a remittance basis user who gives or lends it back to a beneficiary in the UK ... the payment from the trust will be taxed on the UK-resident beneficiary.[136]

In fact this planning was not straightforward. Even before 2018 there were anti-conduit rules. For s.87, the arrangement could be caught as an indirect receipt;[137] for s.731 it could be caught as an associated operation.[138] Those provisions will still need to be considered in cases where the onward-gift rules do not apply. The overlap of those rules and the onward-gift rules may also be problematic, but perhaps no-one will worry about that.

Onward gifts also raise trust law issues which I only mention briefly. Trustees must exercise their powers in the interests of beneficiaries, not with a view to benefiting non-beneficiaries. If there is an arrangement under which:

(1) Trustees make a distribution to a beneficiary
(2) The beneficiary gives the distribution to a donee who is a non-beneficiary

then the distribution is in principle void under the proper purpose rule. But if the donee is also a beneficiary, this difficulty does not arise.

It is melancholic to compare the concept expressed in a few lines with the pages of dense legislation which implement it. Clumsy drafting adds to the complexity.

[136] Reforms to the taxation of non-domiciles: response to further consultation (2016) para 2.3.5.
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/574450/non_doms_consultation_response_final.pdf
Draft clauses were published Sept 2017, but that is now of historical interest only; *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/644270/settlements_draft_legislation.pdf*

[137] See 61.8.1 (Indirect receipt from trust).

[138] See 50.13.1 (B1 gives benefit to B2).

There are three sets of onward-gift rules, as follows:

Sections	**Name of rule (my term)**	**(Name sometimes used)**
s.87I -87M TCGA	s.87 onward-gift rule	(CGT onward-gift rule)
s.643I - 643N ITTOIA	s.643A onward-gift rule	
s.733B- 733E ITA	s.731 onward-gift rule	(ToA onward-gift rule)

These uniform labels conveniently indicate a common template, but they also conceal significant differences in the scope of the rules. It would have been better if the wording of the onward-gift rules had been more closely aligned, but there it is.

The repetition does make it harder to write a comprehensible exposition. The reader does not want to read the same discussion three times or more. But cross referencing is also inconvenient. There is no solution to this. Sometimes I repeat material, and sometimes I cross reference to where an identically worded provision is discussed in more detail.

Similar issues arise for IHT, where the arrangement is called "channelling"; this is addressed by the IHT associated operation rule.[139]

61.30.1 *Navigation*

There is a rough template which s.643A/s.731 mostly follow, and CGT sometimes follows:

Topic	**ITTOIA**	**ITA**	**TCGA**
Onward gift conditions	643I	733B	87I
s.643A/731 chargeable income arising to donee	643J	733C	-
s.643A/731 non-chargeable income arising to donee	643K	733D	-
[CGT] Relevant parts of payment from which onward gift derived	-	-	87J
[CGT] Attribution of s.87 gains/capital payments to donee	-	-	87K
Beneficiary exempt, settlor chargeable	643L	733E	87L
Onward gift to settlor/close-family	643M	-	-
Onward-gift remittance basis	643N	-	87M

The gateway requirements for the onward-gift rules ("onward-gift conditions") are in subsection (1) of s.87I/s.643I/s.733B. They can be tabulated as follows:

s.87 onward-gift	**s.643A/s.731 onward-gift**
s.87I(1) TCGA	*s.643I(1)/s.733B(1)*
(a) Payment to donor	(a) s.643A/s.731 income
	(b) Matched with benefit/to protected income

[139] See 74.16.1 (Channelling).

(b) Intention to give	(c) Intention to give
(c) Gift & time limit	(d) Gift & time limit
(d) Gift from cap. payment	(e) Gift from benefit
(e) Donee UK resident	
(f) Donor s.87-exempt	(f)(g) Donor outside close-family rule/ s.731
	643I(1)(h) Donee settlor/close family

61.30.2 *Onward-gift terminology*

The 3 onward-gift rules share some common terminology. Although it is normally best to adopt statutory terminology, I add a gloss for clarity:

Statutory term	***Term in this book***
Original beneficiary	Original beneficiary [donor]
Subsequent recipient	Subsequent recipient [donee]
Otherwise-liable person	Otherwise-liable person [donor/settlor]
Original payment	Original [capital] payment
Onward payment	Onward payment [gift]
Payment year	[Capital] payment year

61.30.3 *Compliance*

If a donor benefits a UK resident, the donee needs to consider if the donor derived the property from which the benefit is provided from an offshore trust, within the last 3 years.

The donee may not be a beneficiary of the trust, and so not entitled to the information needed to complete their tax return, which will largely (not entirely) be in the knowledge of the trustees. But if HMRC assess, the onus would be on the donee to show that the assessment is wrong.

61.31 s.87 onward-gift conditions

Section 87I(1) TCGA provides:

> Sections 87J and 87K apply if in the case of a settlement...

A set of 6 conditions then follow, which I call **"s.87 onward-gift conditions"**.

61.31.1 *Cond. (a): Payment to donor*

Section 87I(1) TCGA provides:

> Sections 87J and 87K apply if in the case of a settlement...
> (a) a capital payment ("the original [capital] payment") is received in a tax year ("the [capital] payment year") by a person ("the

original beneficiary" [donor]) from the trustees of the settlement

61.31.2 *Cond. (b): Intention to give*

Section 87I(1) TCGA provides:

> Sections 87J and 87K apply if in the case of a settlement...
> (b) at the time of receipt—
> (i) there are arrangements,[140] or there is an intention, as regards the (direct or indirect) passing-on of the whole or part of the original [capital] payment, and
> (ii) it is reasonable to expect[141] that, in the event of the whole or part of the original [capital] payment being passed on to another person as envisaged by the arrangements or intention, that other person will be resident in the UK when they receive at least part of what is passed on to them

The intention must be the intention of the donor, as no-one else is capable of making the onward payment (gift).

"Arrangement or intention" is a novel expression. It is difficult to envisage an arrangement without the intention, or an intention without the arrangement, since "arrangement" itself has an element of volition; it requires some sort of plan.[142] The reader may think this is slovenly drafting; but it does not matter.

It is suggested that making a will does not count as intention or arrangements, unless made specifically in order to deal with the capital payment.

Section 87I(8) TCGA provides a presumption as to intention:

> Where subsection (1)(c) and (d) are met in any case [gift made out of capital payment], it is to be presumed (unless the contrary is shown) that subsection (1)(b) [intention to give] is also met in that case.[143]

But this presumption is of little if any significance, as in a tax appeal the onus of proof is already on the taxpayer.[144]

[140] There is the standard (unnecessary) definition in s.87I(7) TCGA, s.643(7) ITTOIA, and s.733B(7) ITA; see App 2.2.3 (Definitions of "arrangement").

[141] See App 2.24 (Reasonable-to-assume).

[142] See App.2.2 (Arrangement).

[143] The IT equivalents are: s.643I(6), s.643M(5) ITTOIA/s.733B(6) ITA.

[144] See 6.36 (Residence: Burden of proof). And in any event, disputes are rarely decided by the burden of proof: see 4.7.3 (Standard of proof).

"Pass on" is layman's language. The professional bodies say:[145]

> **Example 5 "passing on"**
> The trustees of a settlement, established for primarily IHT planning reasons, de-envelope a valuable UK residential property and bring the settlement to an end by distributing the assets to the non UK resident and domiciled settlor.
> There is no income in the structure.[146]
> The settlement is brought to an end because the initial advice to envelope and settle is no longer considered appropriate...[147]
> At the time of the distribution of the UK property the settlor planned to retain the property and use it as a base when in the UK.
> However, he also intended to allow his two UK resident adult daughters to occupy the property.
> [1] He grants them a licence (non-exclusive, so the father can still occupy as before) when both were studying at UK universities.
> [2] Subsequently one daughter returned home [ie, ceased to occupy the property] and the other was given an assured shorthold tenancy in the property at a low rent.[148]
> The licence is gratuitous, non-exclusive and revocable at any time.
> The tenancy is exclusive and may run on from year to year.
> Both the licence and the tenancy are granted less than three years after the distribution.

The professional bodies' analysis is as follows:

> There has to be an arrangement or intention as regards the passing on of the whole or part of original property (i.e. something contained in the bundle of rights that father obtained when he replaced the trustees as the absolute owner of the land) in order for the onward gift rules to apply...
> [1] In the case of the licence the father has nothing less than he originally had, namely the same bundle of rights in relation to the same property and this should not, therefore, be seen as coming within the legislation as no part of the original trust distribution has

[145] I have slightly altered the text of the example, for clarity.

[146] This fact is not relevant to the example, though it may make the benefit subject to IT rather than CGT.

[147] This fact is not relevant to the example.

[148] This seems odd for the father to grant his daughter a lease; but that does not spoil the fact of the example. The example has to specify that rent is under market rent, otherwise there is no passing-on, no benefit and no charge. If the rent is low enough, the tenancy is not an assured shorthold tenancy but nothing turns on that.

been "passed on".

[2] In the case of the tenancy given to the daughter she is given an interest in the property. The father's rights have diminished (to what extent depends on the length of the tenancy). As such there has been a "passing-on" of part of the distribution received by the father and the onward gift rules would be engaged.[149]

Point [1] is a somewhat literal reading.

A similar question may arise with loans. Suppose:

(1) A trust has lent money interest free, repayable on demand to a UK beneficiary (B1).
(2) The trust transfers the debt to a non-resident beneficiary (B2)
(3) B2 leaves the loan outstanding.

Has B2 passed on part of the original capital payment? The professional bodies would say nothing has been passed on. But the reader may think the section should be construed less literally, particularly bearing in mind that "gift" is widely defined, to include any benefit.

61.31.3 *Condition (c): Gift*

Section 87I(1) TCGA provides:

> Sections 87J and 87K apply if in the case of a settlement...
> (c) the original beneficiary [donor] makes, directly or indirectly, a gift ("the onward payment") to a person ("the subsequent recipient" [donee])-
> (i) [A] at the time the original [capital] payment is received,
> [B] or at any later time in the 3 years beginning with the day containing the start time, or
> (ii) at any time before the original [capital] payment is received and, it is reasonable to assume, in anticipation of receipt of the original [capital] payment

There are two rules here:
(1) the original beneficiary (donor) makes a gift directly or indirectly to a subsequent recipient (donee); and
(2) a time limit for that gift.

[149] "Finance Act 2018 Section 35 and sch 10 Settlements: Anti-avoidance Notes on practical points and areas of uncertainty" (Mar 2019) *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-03-19-fa-2018-section-35.ashx*

Statute frequently refers to an onward payment (gift) "made as mentioned in s.87I(1)(c)(ii)". I refer to such a gift as a **"pre-capital payment gift"**. Section 87I(7) TCGA provides a wide definition of making a gift:

> In this section[150] ...
> "gift" includes any benefit, and
> "make", in relation to a gift that is a benefit, means confer.[151]

An arm's length transaction is not an onward payment (gift).

61.31.4 *Gift via trust*

Suppose:

(1) A capital payment to B1, a non-resident /remittance basis taxpayer.
(2) B1 transfers the benefit to a trust.
(3) The trustees benefit B2, a UK resident, within the 3 year time limit.

This raises two issues:

(1) Is s.87 onward-gift condition (b) met: in short, is there an arrangement/intention for passing on the benefit to a UK resident? It is a question of fact, but note that arrangement is a wide word, and includes arrangements which develop or take place over a period of time, as long as they have "sufficient unity".[152]
(2) Is s.87 onward-gift condition (c) met: in short, does B1 make a gift indirectly to B2? Similar wording is used elsewhere in s.87, and the question (in short) is whether there is a plan which is fulfilled.[153] So it overlaps with point (1) and is again a question of fact; but if in practice payments were made in and out of a trust, within a relatively short time, it may not be easy to convince a tribunal that there was no plan. But unless the trust is UK resident, the series of gifts rule will deem condition (c) to be satisfied in any event.[154]

61.31.5 *Onward gift time limit*

There is no time limit for the period between a pre-capital payment gift and the capital payment.

[150] This is only a section-wide definition, but it is incorporated by reference in s.87M(6) TCGA.
[151] The IT equivalents are: s.643I(7), 641M(8) ITTOIA; s.733B(7) ITA.
[152] See App 2.2.4 (Identifying the arrangement).
[153] See 61.8.1 (Indirect receipt from trust).
[154] See 61.36 (Series of gifts: A to B to C).

Otherwise, the requirement is that the original beneficiary (donor) must make the gift to the subsequent recipient (donee) within 3 years of the "start time".

In outline, there are 2 possible start times:

Para	***Circumstances***	***Start time***
87I(3)(a)	Direct gift	When benefit provided to donor
87I(3)(b)	Chain of gifts	Time of first gift

The start times are best read side by side; s.87I(3) TCGA provides:

> For the purposes of subsections (1)(c)(i) and (2)(b)(i)[155]—

(a) if the original [capital] payment is a capital payment other than one that is treated as received by section 87M, [For s.87M, see 61.35 (Donee remittance basis user)]	(b) if the original payment is a capital payment that is treated as received by [i] section 87M in connection with the operation of this section, and [ii] sections 87J and 87K, on a previous occasion,
"the start time" is the time the original payment is received	"the start time" is the time given by this subsection as the start time on that occasion

I do not understand para (b).

61.31.6 *Cond. (d): Gift from capital payment*

Section 87I(1) TCGA provides:

> Sections 87J and 87K apply if in the case of a settlement...
>
> (d) the gift is of or includes-
>
> (i) the whole or part of the original [capital] payment,
>
> (ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents,[156] the whole or part of the original [capital] payment, or
>
> (iii) any other property, but only if the original [capital] payment is made with a view to enabling or facilitating,[157] or

[155] See 61.36 (Series of gifts: A to B to C).

[156] See App.2.9 ('Representing' assets).

[157] The wording draws on s.103 FA 1986; see 80.12.6 (s.103(2) exceptions to s.103(1)(b)); but the drafter sought to widen it with the addition of "otherwise in connection with".

> otherwise in connection with, the making of the gift of the property to the subsequent recipient [donee]

If a capital payment is made to a company held by the donor, the shares are not derived from the capital payment but they might represent the capital payment.[158]

The donor may wish to segregate the original [capital] payment, in order to avoid making gifts out of it for 3 years. (If the capital payment is mixed with other funds, it would be necessary to apply the non-statutory mixed fund rules.[159])

That prevents a gift falling within (i)(ii), but para (iii) would still need consideration.

61.31.7 *Cond. (e): Donee UK resident*

Section 87I(1) TCGA provides:

> Sections 87J and 87K apply if in the case of a settlement...
> (e) the subsequent recipient [donee] is resident in the UK in the tax year in which the onward payment [gift] is received by the subsequent recipient ...[160]

61.31.8 *Cond. (f): Donor s.87-exempt*

Section 87I(1) TCGA provides:

> Sections 87J and 87K apply if in the case of a settlement...
> (f) in the period beginning with the start of the [capital] payment year and ending with the end of the gift year[161], there is at least one tax year-
> (i) for which the otherwise-liable person [donor/settlor] is not resident in the UK, or
> (ii) for which section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the otherwise-liable person [donor/settlor].

Section 87I(7) TCGA provides:

> In this section[162] ...

[158] See App 2.9.6 (Do shares represent co assets).

[159] See App 2.10 (Withdrawal from mixed fund).

[160] The words omitted here define “gift year”; see 61.32.3 (“Gift” year).

[161] See 61.32.3 (“Gift” year).

[162] This is only a section-wide definition, but it is incorporated by reference elsewhere: s.87M(6) TCGA.

> "the otherwise-liable person"
> [i] means the original beneficiary [donor]
> [ii] unless section 87G(2)[163] applies in relation to the original [capital] payment in which event the settlor is "the otherwise-liable person".

"Otherwise-liable person" is a clumsy expression, but it is transparent, and difficult to think of better.

61.31.9 *Time of pre-cap. payment gift*

Section 87I(4) TCGA provides:

> Where the onward payment [gift] is made as mentioned in subsection (1)(c)(ii) [pre-capital payment gift], the onward payment is to be treated—
> (a) for the purposes of the provisions of this section following subsection (1)(c), and
> (b) for the purposes of sections 87K to 87M,
> as made and received immediately after the original [capital] payment is received (and in the [capital] payment year).

The point is repeated (unnecessarily) in s.87M(6) TCGA:

> Section 87I(4) and (7) (interpretation of references to gifts and their making) apply also for the purposes of subsections (3) and (4) of this section.

61.31.10 *Several gifts in gift year*

Section 87I(5) TCGA provides:

> Where this section provides for section 87K to apply in relation to two or more gifts received from the original beneficiary [donor] in the gift year[164] by reference to the original [capital] payment—
> (a) treat that section as applying in relation to a single gift equal in amount to the total of the amount or value of each of the gifts (and as not applying in relation to each gift separately), and
> (b) apportion between the gifts (in proportion to their amounts or values)—
> (i) any capital payments given by section 87K(2),[165] and

[163] See 61.29 (s.87 settlor-attribution rule).

[164] See 61.32.3 ("Gift" year).

[165] See 61.33.1 (OG deemed capital payment).

> (ii) any gains given by section 87K(3),[166]
>
> as a result of applying section 87K in accordance with paragraph (a).

This would apply in the (somewhat contrived) case where a donor makes pre- and post-capital payment gifts.[167]

61.31.11 *Gift from pre-2018 original payment*

Para 1(14) sch 10 FA 2018 provides:

> The new sections 87I to 87M have effect in relation to onward payments [gifts] made on or after 6 April 2018, and do so even in cases where the original [capital] payment is received before that date.

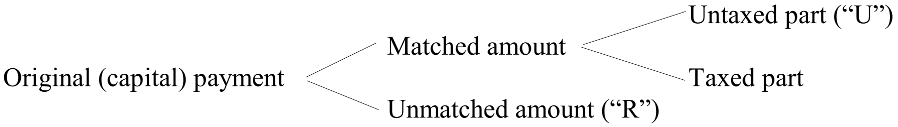
This rule will effectively cease to matter in April 2021.

61.32 s.87 onward-gift definitions

Assuming the s.87 onward-gift conditions are met, we move on. First it is helpful to set out some definitions.

61.32.1 *U, R, G*

The original (capital) payment is divided into two amounts (matched and unmatched) and the matched amount is divided into two parts, taxed and untaxed. Diagrammatically:



In full detail, s.87J(1) TCGA provides:

> Where this section applies (see section 87I) [s.87 onward-gift conditions are met], for the purposes of section 87K treat the original [capital] payment as divided into slices as follows-
>
> (a) a slice consisting of the taxed part (if any) of each matched amount (if any),
>
> (b) a slice ("U") consisting of the untaxed part (if any) of each matched amount (if any), and
>
> (c) a slice ("R") consisting of the rest (if any) of the original [capital] payment.

U stands for the **U**ntaxed part. R is presumably the **R**emaining amount (ie

[166] See 61.33.2 (OG deemed s.87 gain).

[167] See 61.31.3 (Condition (c): Gift).

the unmatched amount, but the abbreviation U had already been taken).

G is the **G**ift. Section 87K(1) TCGA provides:

> Where this section applies (see section 87I) [s.87 onward-gift conditions are met], G is—
>
> (a) the amount or value of so much of the original [capital] payment as is within any of sub-paragraphs (i) to (iii) of section 87I(1)(d) [gifted capital payment], or
>
> (b) if lower, the amount of the original [capital] payment.

61.32.2 *"Matching year"*

The "matching year" is the year in which the original (capital) payment is matched. The relevant part of s.87J(2) provides:

> if all or part of the original [capital] payment is, in a tax year ("the matching year") ... matched under section 87A with the section 1(3) amount for the matching year or any earlier tax year ...[168]

61.32.3 *"Gift year"*

The "gift year" is (in general) the tax year in which the onward payment [gift] is made. The relevant part of s.87I(1)(e) provides:

> the tax year in which the onward payment [gift] is received by the subsequent recipient ("the gift year", but see subsection (4))[169]

61.32.4 *"Matched amount"*

Section 87J(2) TCGA provides:

> For the purposes of this section, if all or part of the original [capital] payment is, in a tax year ("the matching year") not later than the gift year, matched under section 87A with the section 1(3) amount for the matching year or any earlier tax year, so much of the original [capital] payment as is so matched is a "matched amount".

61.32.5 *Taxed/untaxed parts of matched amount*

It is easier to follow if the two parts of the definition are read side by side. Section 87J(3)(4) TCGA provides:

[168] For the full text of this para, see 61.32.4 ("Matched amount").

[169] For the full text of this para, see 61.31.7 (Condition (e): Donee UK resident). For subsection (4), see 61.31.9 (Time of pre-cap. payment gift).

Donor/settlor on arising basis	**Donor/settlor on remittance basis**
(3) For the purposes of subsection (1), if—	(4) For the purposes of subsection (1), if—
(a) as a result of there being a matched amount, gains are treated by section 87 as accruing to the otherwise-liable person [donor/settlor], (b) the otherwise-liable person [donor/settlor] is resident in the UK for the matching year, and	(a) [identical]
(c) none of sections 809B, 809D and 809E of ITA 2007 applies to the otherwise-liable person	(b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the otherwise-liable person
[donor/settlor] for the matching year	[donor/settlor] for the matching year, and (c) the whole or part of those gains is remitted to the UK in a tax year— (i) that is not later than the gift year[170], and (ii) in which the otherwise-liable person [donor/settlor] is resident in the UK,
[I] the whole of the matched amount is its "taxed part"	[I] so much of the matched amount as is equal to so much of the gains as is remitted as mentioned in paragraph (c) is the matched amount's "taxed part",
[II] (and it has no "untaxed part").	[II] and the rest of the matched amount is its "untaxed part".

Section 87J(5) TCGA deals with the specialist case of sch 4C pools:

> For the purposes of subsection (1), if all or part of the original [capital] payment is in a tax year ("the pool-matching year") not later than the gift year matched, under section 87A as applied by paragraph 8 of

[170] See 61.32.3 ("Gift" year).

> Schedule 4C, with the section 1(3) amount in the Schedule 4C pool for the pool-matching year or any earlier tax year—
> (a) so much of the original [capital] payment as is so matched is a "matched amount", and
> (b) the whole of the matched amount is its "taxed part" (and it has no "untaxed part").

61.32.6 *s.87K application in later year*

Section 87I(6) TCGA provides:

> Where this section provides for sections 87J and 87K to apply in relation to a gift received in a tax year—
> (a) take the steps required by section 87J before applying section 87K in relation to the gift, but
> (b) in taking the steps required by section 87J, have regard to the application of section 87K in relation to gifts made in earlier tax years.

61.33 s.87 onward-gift rule

Armed with these definitions, and assuming the s.87 onward-gift conditions are satisfied, we turn to the rules in s.87K TCGA. In short:

Condition	**Consequence**	**Amount**	**Provision**
R>0 (unmatched amount)	Deemed cap payment	Smaller of R and G	s.87K(2)
U>0 (untaxed matched amount)	Deemed s.87 gain	Smaller of U and (G-R)	s.87K(3)

61.33.1 *OG deemed capital payment*

Section 87K(2) TCGA provides:

> If R is greater than nil, sections 87 and 87A have effect for the gift year[171] and later tax years-
> (a) as if a capital payment was received from the trustees by the subsequent recipient [donee]-
> (i) as a beneficiary of the settlement (whether or not the subsequent recipient is otherwise a beneficiary of the settlement),[172] and
> (ii) at the time the subsequent recipient received the onward payment [gift],

[171] See 61.32.3 ("Gift" year).

[172] The wording at para (a) matches s.87D(2) TCGA. It is otiose but it does no harm: see 61.29 (s.87 settlor-attribution rule).

> (b) as if that capital payment consisted of-
> (i) R, if G is greater than R, or
> (ii) so much of R as is equal to G, if G is not greater than R, and

I refer to this as a **"OG deemed capital payment"**.

Para (c) provides relief for the donor:

> (c) as if so much of the original [capital] payment as is equal to that capital payment was not received by the otherwise-liable person [donor/settlor].

61.33.2 *OG deemed s.87 gain*

Section 87K(3) TCGA provides:

> If G is greater than R, and if U is greater than nil-
> (a) chargeable gains are treated as accruing to the subsequent recipient [donee] in the gift year[173] (but see section 87L(3) and (4)),
> (b) the amount of those gains is-
> (i) U, if (G – R) is greater than U, or
> (ii) so much of U as is equal to (G – R) , if (G – R) is not greater than U

I refer to this as a **"OG deemed s.87 gain"**.

Para (c) provides relief for the donor:

> (c) the chargeable gains treated by section 87 as accruing to the otherwise-liable person [donor/settlor] by reason of the original [capital] payment are treated as from the end of the gift year[174] as reduced by that amount, with that reduction being made from so much of those gains as has not by then been remitted to the UK in a tax year in which the otherwise-liable person [donor] is resident in the UK.

61.33.3 *Pre-capital payment gift: R/U*

Section 87K(4) TCGA provides:

> If this section applies [s.87 onward-gift conditions are met] by reference to the original [capital] payment also in relation to a gift received from the original beneficiary [donor] in a tax year earlier than the gift year, this section applies in relation to the onward [capital] payment as if—

[173] See 61.32.3 ("Gift" year).

[174] See 61.32.3 ("Gift" year).

(a) the amount given by section 87J for R were reduced by the amount of any capital payment given by subsection (2) in relation to that earlier year, and

(b) the amount given by section 87J for U were reduced by the amount of any gains given by subsection (3) in relation to that earlier year.

61.34 Onward-gift to close-family: s.87 settlor-attribution rule

Suppose:

(1) A capital payment is made to a beneficiary (not close-family)

(2) The beneficiary makes an onward gift to close-family of the settlor

A direct capital payment to close-family is treated as made to the settlor, under the s.87 settlor-attribution rule.[175] Section 87L TCGA ensures that the same applies in the case of an onward gift to close-family. I refer to this as the **"s.87 OG settlor-attribution rule"**.

Section 87L TCGA provides distinct rules for:

(1) OG deemed capital payment[176]

(2) OG deemed s.87 gain[177]

The layout is: s.87L(1)(3) set out application conditions; s.87L(2)(4) set out the rules where those conditions are satisfied. It is easier to follow if the s.87L application conditions are read side by side. Section 87L(1)(3) TCGA provide:

OG deemed capital payment	**OG deemed s.87 gain**
(1) Subsection (2) applies where-	(3) Subsection (4) applies where-
(a) ignoring this section and section 87M [Donee remittance basis user], a person is treated by section 87K(2) as receiving a capital payment from the trustees of a settlement at a time ("the time of receipt") in a tax year,	(a) in the case of a settlement, chargeable gains are (ignoring this section and section 87M [Donee remittance basis user]) treated by section 87K(3) as accruing to a person in a tax year ("the subsequent recipient" [donee]),
(b) the settlor is resident in the UK at any time in that year, and	(b) [identical]

[175] See 61.26 (Settlor-attribution rules: Introduction).

[176] See 61.33.1 (OG deemed capital payment).

[177] See 61.33.2 (OG deemed s.87 gain).

(c) the person mentioned in paragraph (a) [the donee] is a close member of the settlor's family (see section 87H) at the time of receipt.	(c) the subsequent recipient [donee] is a close member of the settlor's family when the subsequent recipient receives the onward payment (see section 87I(1)(c)) by reference to which the chargeable gains are treated as accruing.

Assuming these conditions are satisfied, we move on to the rules.

Section 87L(2) TCGA provides the rule for an OG deemed capital payment:

> Sections 87 and 87A have effect for that year, and later tax years, as if the capital payment-
> (a) was received from the trustees by the settlor-
> (i) as a beneficiary of the settlement (whether or not the settlor is otherwise a beneficiary of the settlement),[178] and
> (ii) at the time of receipt, and
> (b) was not received by the person mentioned in subsection (1)(a) [the donee].

Section 87L(4) TCGA provides the rule for an OG deemed s.87 gain:

> [a] Section 87K(3)(a)[179] has effect as if its reference to the subsequent recipient were a reference to the settlor, and
> [b] references (however expressed) to chargeable gains treated as accruing by this section are to chargeable gains treated by section 87K(3)(a) as accruing to the settlor as a result of the operation of this subsection.

Amended as s.87L(4) directs, s.87K(3)(a) provides:

> (a) chargeable gains are treated as accruing to the ~~subsequent recipient~~ settlor in the gift year...

Section 87L(5) TCGA provides the settlor with the standard settlor-attribution indemnity.[180]

[178] The wording at para (a) matches s.87D(2) TCGA. It is otiose but it does no harm: see 61.29.3 (s.87 settor-attribution rule).

[179] See 61.33.2 (OG deemed s.87 gain).

[180] See 61.28 (Settlor-attribution indemnity).

61.35 Donee remittance basis user

Section 87M TCGA provides distinct rules for:

(1) OG deemed capital payment (s.87K(2) applies[181])

(2) OG deemed s.87 gain (s.87K(3) applies[182])

The layout is: s.87M(1)(3) set out application conditions; s.87M(2)(4) set out the rules where those conditions is satisfied.

It is easier to follow if the s.87M application conditions are read side by side. Section 87M(1)(3) TCGA provides:

OG deemed capital payment	**OG deemed s.87 gain**
(1) Subsection (2) applies where— (a) ignoring this section, a person is treated by section 87K(2) as receiving a capital payment from the trustees of a settlement at a time ("the time of receipt") in a tax year,	(3) The rules in subsection (4) apply where— (a) in the case of a settlement, chargeable gains are (ignoring this section) treated by section 87K(3), but not as a result of the operation of section 87L(4), as accruing to a person in a tax year by reference to a gift within section 87I(1)(d) made to the person,
(b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the person for that tax year, and	(b) [identical]
(c) the payment is not treated by section 87L(2) [onward-gift to close-family] as received by the settlor.	(c) none, or part only, of the gains is remitted to the UK in that tax year.

Section 87M(2) TCGA provides the rule for an OG deemed capital payment:

> Section 87I(1)(a) has effect as if
>
> [a] the capital payment were received from the trustees by the person at the time of receipt, and
>
> [b] section 87K(2)(a) and (b) do not have effect for the purposes of

[181] See 61.33.1 (OG deemed capital payment).

[182] See 61.33.2 (OG deemed s.87 gain).

> sections 87 and 87A in the case of the payment.

Section 87M(4) TCGA provides the rule for an OG deemed s.87 gain.

> The rules are—
>
> (a) section 87I(1)(a) has effect—
>
> (i) as if a capital payment were received from the trustees by the person at the time the gift is made, and
>
> (ii) as if the capital payment were equal in amount to so much of the gains as is not remitted in the tax year mentioned in subsection (3)(a) of this section,
>
> (b) for the purposes of section 87J—
>
> (i) the whole of the capital payment is a "matched amount", and
>
> (ii) the whole of the matched amount is its "untaxed part" (and the matched amount has no "taxed part"), and
>
> (c) the amount of the gains treated by section 87K(3)(a) and (b) as accruing to the person by reference to the gift[183] is reduced by the amount of the capital payment.

The professional bodies say:

> **Subsequent recipient a remittance basis user**
>
> The capital gains tax onward gift rule applies in an odd way where the subsequent recipient is a remittance basis user.
>
> Where the payment to the original beneficiary is not matched against gains the subsequent recipient is treated under section 87K as having received a capital payment. The effect of section 87M(1) and (2) is that the subsequent recipient is not taxable on that capital payment, even if it is remitted to the UK. The only consequence is that the subsequent recipient is treated as having received a capital payment for the purposes of the conduit rules and would therefore be within the scope of the conduit rules if he or she makes a further onward gift.
>
> The position is slightly different where the subsequent recipient is treated as if chargeable gains had accrued to him or her (as a result of the payment to the original beneficiary being matched against gains but not having been taxed). In these circumstances the effect of section 87M(3) and (4) is that the subsequent recipient is taxable if the onward payment is remitted in the year of receipt but is not taxed if it is remitted to the UK in a subsequent year. Instead, the subsequent recipient is again treated as having received a capital payment for the purposes of the rules and so will be within the scope of the onward gift rules if a

[183] See 61.33.2 (OG deemed s.87 gain).

further onward payment is made.

Whether or not a subsequent recipient who is a remittance basis user is taxable therefore depends on whether he or she is treated as receiving a capital payment or whether he or she is treated as if chargeable gains have accrued to them. In the former case, he or she will not be taxable but will be capable of making a further gift within the scope of the onward gift rules. In the latter case, he or she will be taxable to the extent that the onward payment is remitted in the year it is received but not if it is remitted in a later year.

The position is similar under the transfer of assets benefits charge. If the onward gift is not remitted to the UK in the charging year, the subsequent recipient is not taxable even if he or she remits the onward payment in a later year. The subsequent recipient is however, in these circumstances, treated as the recipient of a benefit for the purposes of the onward gift rule and so any further gift he or she makes may be taxable on the ultimate recipient.

Where the original beneficiary is a remittance basis user, remittance by the subsequent recipient only leads to him being taxed if the subsequent recipient is a relevant person (as defined by ITA 2007, s 809M(2)).[184]

61.35.1 *Previous onward gift*

Section 87M(5) TCGA provides:

> Where the capital payment mentioned in section 87I(1)(a) is one treated as received by subsection (2) or (4) of this section in connection with the operation of sections 87I to 87K on a previous occasion, section 87I(1) has effect—
>
> (a) with the omission of its paragraph (b),
>
> (b) as if the reference in its paragraph (c) to the original [capital] payment were, instead, to what was the original [capital] payment on that previous occasion, and
>
> (c) as if the references in its paragraph (d) to the original [capital] payment were, instead, to so much of that original [capital] payment as was on that previous occasion within any of subparagraphs (i) to (iii) of that paragraph.

Amended as s.87M(5) directs, s.87I(1) provides:

[184] "Finance Act 2018 Section 35 and sch 10 Settlements: Anti-avoidance Notes on practical points and areas of uncertainty" (Mar 2019) *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-03-19-fa-2018-section-35.ashx*

Sections 87J and 87K apply if in the case of a settlement—

(a) a capital payment ("the original payment") is received in a tax year ("the payment year") by a person ("the original beneficiary") from the trustees of the settlement,

~~(b) at the time of receipt—~~

~~(i) there are arrangements, or there is an intention, as regards the (direct or indirect) passing-on of the whole or part of the original payment, and~~

~~(ii) it is reasonable to expect that, in the event of the whole or part of the original payment being passed on to another person as envisaged by the arrangements or intention, that other person will be resident in the UK when they receive at least part of what is passed on to them,~~

(c) the original beneficiary [donor] makes, directly or indirectly, a gift ("the onward payment") to a person ("the subsequent recipient")—

(i) at the time what was the original payment on the previous occasion is received, or at any later time in the 3 years beginning with the day containing the start time, or

(ii) at any time before the original payment is received and, it is reasonable to assume, in anticipation of receipt of the original payment,

(d) the gift is of or includes—

(i) the whole or part of ~~the original payment~~, so much of that original [capital] payment as was on that previous occasion within any of subparagraphs (i) to (iii) of this paragraph

(ii) anything that (wholly or in part, and directly or indirectly) derives from, or represents, the whole or part of ~~the original payment~~, so much of that original [capital] payment as was on that previous occasion within any of subparagraphs (i) to (iii) of this paragraph or

(iii) any other property, but only if ~~the original payment~~ so much of that original [capital] payment as was on that previous occasion within any of subparagraphs (i) to (iii) of this paragraph is made with a view to enabling or facilitating, or otherwise in connection with, the making of the gift of the property to the subsequent recipient,

(e) the subsequent recipient is resident in the UK in the tax year in which the onward payment is received by the subsequent recipient ("the gift year", but see subsection (4)), and

(f) in the period beginning with the start of the payment year and

> ending with the end of the gift year, there is at least one tax year—
> (i) for which the otherwise-liable person is not resident in the UK, or
> (ii) for which section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the otherwise-liable person.

61.36 Series of gifts: A to B to C

Section 87I(2) TCGA provides:

> Where-

A set of six conditions then follow, which I call **"gift-series conditions"**:

> (a) there is a series of two or more gifts,[185]
> (b) the first gift in the series is made, directly or indirectly, by the original beneficiary [donor]—
> (i)[A] at the time the original [capital] payment is received,
> [B] or at any later time in the 3 years beginning with the day containing the start time, or
> (ii) at any time before the original payment is received and, it is reasonable to assume, in anticipation of receipt of the original payment,

That is, s.87 onward-gift condition (c) is met.[186]

> (c) the recipient of a gift in the series is the person who makes, directly or indirectly, the next gift in the series,
> (d) the recipient of the last gift in the series is resident in the UK in the tax year in which that gift is received,
> (e) as regards each earlier gift in the series, its recipient is not resident in the UK at any time in the tax year in which it is received, and
> (f) the condition in subsection (1)(d) is met in relation to each gift in the series,[187]

Assuming the gift-series conditions are met, we turn to the rule:

> the last gift in the series is treated for the purposes of subsection (1)(c)[188] as if its maker were the original beneficiary [donor] (and not its actual

[185] "Gift" includes any benefit; see 61.31.3 (Condition (c): Gift).

[186] See 61.31.3 (Condition (c): Gift).

[187] See 61.31.6 (Condition (d): Gift from capital payment).

[188] See 61.31.3 (Condition (c): Gift).

maker).

Section 87I(1)(c) provides:

> Sections 87J and 87K apply if in the case of a settlement...
> (c) the original beneficiary [donor] makes, directly or indirectly, a gift ("the onward payment") to a person ("the subsequent recipient" [donee])-
> (i) [A] at the time the original [capital] payment is received, or
> [B] at any later time in the 3 years beginning with the day containing the start time, or
> (ii) at any time before the original [capital] payment is received and, it is reasonable to assume, in anticipation of receipt of the original [capital] payment

The requirement is therefore that the last gift in the series is made within 3 years of the original (capital) payment; (or is a pre-capital payment gift within para (ii)).[189]

Also see 61.31.4 (Gift via trust).

61.37 Migrant settlement

61.37.1 *UK trust becomes non-resident*

Section 89(1) TCGA provides:

> Where
> [a] a period of one or more years of assessment for which s.87 applies to a settlement ("a non-resident period") succeeds
> [b] a period of one or more years of assessment for each of which s.87 does not apply to the settlement ("a resident period"),
> a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of sections 87 and 87A if it was not made in anticipation of a disposal made by the trustees in the non-resident period.

61.37.2 *Offshore trust comes to UK*

Section 89 TCGA provides:

[189] The professional bodies agree: see "Finance Act 2018 Section 35 and sch 10 Settlements: Anti-avoidance Notes on practical points and areas of uncertainty" (Mar 2019) *https://www.icaew.com/-/media/corporate/files/technical/tax/tax-faculty/taxguides/2019/taxguide-03-19-fa-2018-section-35.ashx*

> (1A) Subsection (2) applies to a settlement if—
>
> (a) a non-resident period is succeeded by a resident period, and
>
> (b) in relation to the last tax year in the non-resident period ("the last non-resident tax year"), s.87A(3) applied by virtue of para (a) of that provision (exhaustion of capital payments).[190]
>
> (2) Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under s.87A as it applies for that year) with the s.1(3) amount for the last non-resident tax year or any earlier tax year.
>
> (3) Section 87(3) and (4) and ss.87A to 87C apply for the purposes of subsection (2) as if the relevant tax year were the tax year mentioned in subsection (2).
>
> (4) Section 87B (remittance basis) applies in relation to chargeable gains treated under subsection (2) as accruing as it applies in relation to chargeable gains treated under s.87 as accruing.

61.38 Dual-Resident trust: s.88 TCGA

Section 88 TCGA applies to a trust where:

(1) The trust is:
   (a) UK tax-resident (ie UK resident under UK law); and
   (b) Treaty-resident in a foreign State (under the tie-breaker)

(2) The relevant DTA has an article conferring CGT relief

The heading to s.88 is "dual resident" trusts, and it is convenient to use that term to describe trusts which fall within s.88, though I use initial capitals as it is an artificial use of the term which would naturally be used with a somewhat wider meaning;[191]

A Dual-Resident trust is not subject to CGT (so far as the DTA provides exemption) but would not be within s.87.[192] This gap is filled by s.88(1) TCGA:

> Section 87 also applies to a settlement for any year of assessment beginning on or after 6th April 1991 if—
>
> (a) the trustees are resident in the UK during any part of the year, and
>
> (b) at any time of such residence they fall to be regarded for the

[190] See 61.15.3 (When to stop).

[191] On the terminology see 107.7 (Types of residence).

[192] See 61.4 (Non-resident settlement condition).

> purposes of any double taxation relief arrangements[193] as resident in a territory outside the UK.

There is also a special exit charge for Dual-Resident trusts; see 12.6 (Treaty-emigration of trust).

61.38.1 *Revised s.1(3) amount*

The usual definition of s.1(3) amount (trust gains) would not work for a Dual-Resident trust, so s.88(2) TCGA amends it:

> The section 1(3) amount for a tax year for which section 87 applies by virtue of this section is what it would be if the amount mentioned in section 87(4)(a) were the assumed chargeable amount.

Amended as s.88(2) directs, s.87(4) provides:

> The section 1(3) amount for a settlement for a tax year for which this section applies to the settlement is—
> (a) ~~the amount upon which the trustees of the settlement would be chargeable to tax under section 1(3) for that year if they were resident and ordinarily resident in the UK in that year~~ the assumed chargeable amount, or
> (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

The term "assumed chargeable amount" is defined in s.88(3) TCGA:

> For the purposes of subsection (2) above the assumed chargeable amount in respect of a year of assessment is the lesser of the following 2 amounts—

It may be helpful to read the two amounts side by side:

s.88(3)(a) TCGA	**s.88(3)(b) TCGA**
(a) the amount on which the trustees would be chargeable to tax for the year under section 1(3) on the assumption that the double taxation relief arrangements did not apply;	(b) the amount on which, by virtue of disposals of protected assets, the trustees would be chargeable to tax for the year under section 1(3) on the assumption that those arrangements did not apply.

Amount (b) will normally be smaller than amount (a) but it may be

[193] For the meaning of this term, see 12.6.1 ("DTR arrangements" for CGT).

different if there were losses.

61.38.2 *Protected assets*

Section 88 TCGA provides the definition:

> (4) For the purposes of subsection (3)(b) above assets are protected assets if—
> (a) they are of a description specified in the double taxation relief arrangements, and
> (b) were the trustees to dispose of them at any relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.
> (5) For the purposes of subsection (4) above—
> (a) the assumption specified in subsection (3)(b) above [that no DT relief applies] shall be ignored [ie assume DT relief does apply];
> (b) a relevant time is any time, in the year of assessment concerned, when the trustees fall to be regarded for the purposes of the arrangements as resident in a territory outside the UK;
> (c) if different assets are identified by reference to different relevant times, all of them are protected assets.

In short, "protected" assets are those whose gains are protected by a DTA. Most trust assets of a Dual-Resident trust are "protected assets;" the main exceptions being UK land and land-rich assets.[194]

61.38.3 *Underlying company of dual resident trust*

Suppose:

(1) A Dual-Resident trust (UK tax-resident, treaty non-resident) holds a company within s.3 TCGA
(2) A gain accrues to the company ("the company's gain") which is apportioned to the trustees under s.3

The company's gain is not within s.88 as it is not an assumed chargeable amount, and so not a s.1(3) amount (trust gain), and so not caught by s.88. But the trustees are subject to tax on the company's gain directly on the grounds that:

(1) The gain is attributed to the trustees under s.3
(2) The trustees (being UK resident) are taxable on the gain. They cannot

[194] See 56.23 (DT relief for capital gains).

claim DT relief for the company's gain (even if the company is resident in a jurisdiction with a UK treaty).

So it seems right that s.88 does not apply: there is no scope for avoidance here. That prevents a double charge.

61.38.4 *Planning: Avoid Dual Residence*

It is generally best to avoid Dual-Resident (ie, UK tax-resident, treaty non-resident) trusts because the tax treatment is more involved than UK resident or simple non-resident trusts:

(1) The trustees in principle pay:
    (a) CGT in the UK (so far as the treaty does not provide relief) *and*
    (b) tax in the treaty jurisdiction
(2) UK beneficiaries pay tax under s.87.

In practice such trusts mainly arise by accident.

61.39 Transfer between trusts

For trust transfers generally, see 79.1 (Inter-trust transfers: Navigation).

61.39.1 *Trust transfer: s.87 disapplied*

Suppose a trust (trust 1) transfers funds to another trust (trust 2). Section 87(2) TCGA does not apply, and trust 2 does not receive s.87 gains. No-one has ever suggested that it does. But why not, assuming of course that trust 2 is UK resident? The reason is that the trustees of trust 2 are not regarded as a beneficiary of trust 1. The word beneficiary may or may not include a trustee who has an interest under a trust which is not a beneficial interest.[195] The context must determine the issue and the context here (especially s.90 TCGA) shows that it does not.[196]

[195] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), paras 5.17 (Definition of "Beneficiaries").

[196] The drafter of s.97(8)(10) TCGA considered this to be the correct analysis, as they took special care to preserve it.

Section 97(8) TCGA provides that a non-beneficiary is treated as a beneficiary:

> "In a case where—
> (a) ... a capital payment is received from the trustees of a settlement...
> (b) it is received by a person ...
> (c) at the time it is received ... the person is not ... a beneficiary of the settlement...
> for the purposes of sections 86A to 90 ... the person shall be treated as a beneficiary of the settlement as regards events occurring at or after that time."

This might apply s.87 to an inter-trust transfer, but that is excluded by s.97(10):

61.39.2 *Trust gain transferred*

Section 90(1) TCGA provides:

> This section applies if the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement").

Section 90 applies on a transfer between settlements (ie between settlement-arrangements). But it has generally been accepted that two separate trusts constitute two separate arrangements, so in short, s.90 applies on a transfer between trusts.

The section only applies on a transfer of trust capital: if trustees of a discretionary trust distribute trust *income* to another trust, it is suggested that s.90 does not apply, because trust income is not "settled property".[197] There is no scope for avoidance in this view, since the transferee trust receives income which is within the scope of all the income tax anti-avoidance provisions.

Section 90(3) TCGA provides:

> Treat the s.1(3) amount for the transferee settlement for any tax year (not later than the year of transfer)[198] as increased by—
> (a) the s.1(3) amount for the transferor settlement for that year (as reduced under s.87A as it applies in relation to that settlement for the year of transfer and all earlier tax years), or
> (b) if part only of the settled property is transferred, the relevant proportion of the amount mentioned in para (a).

Section 90(5) TCGA provides corresponding relief for the transferor trust:

> Treat the s.1(3) amount for the transferor settlement for any tax year as

---

> "Subsection (8) above shall not apply so as to treat—
> (a) the trustees of the settlement referred to in that subsection, or
> (b) the trustees of any other settlement,
> as beneficiaries of the settlement referred to in that subsection."

It might alternatively be said that s.87(2) does not apply as there is no capital payment, on a transfer between trusts; but that seems a less attractive solution..

[197] This is consistent with the rule that undistributed discretionary trust income is not settled property for IHT purposes; see 87.6 (Definition of "IHT-settlement"). Though the CGT definition is not the same; see 87.3 (Settlement: Standard IT/CGT definition).

[198] Section 90(2) TCGA provides a commonsense definition: "In this section 'the year of transfer' means the tax year in which the transfer occurs."

> reduced by the amount by which the s.1(3) amount for the transferee settlement for that year is increased under subs.(3).

Section 90(7)(8) TCGA deal with timing issues:

> (7) The increase under subs.(3) has effect for the year of transfer and subsequent tax years.
> (8) The reduction under subs.(5) has effect for tax years after the year of transfer.

A loss accruing to the transferee trust cannot be set against the s.1(3) amount transferred from the transferor trust.

61.39.3 *Amount transferred*

Section 90(4) TCGA provides:

> "The relevant proportion" is—
> (a) the market value of the property transferred, divided by
> (b) the market value of the property comprised in the transferor settlement immediately before the transfer.

Gains are transferred on a proportionate basis, not LIFO or FIFO.

Section 90(9) TCGA deals with trust debts:

> When calculating the market value of property for the purposes of this section or s.90A in a case where the property is subject to a debt, reduce the market value by the amount of the debt.

61.39.4 *Transfer to UK trust*

Section 90(6) TCGA deals with a transfer to a UK resident settlement:

> If neither s.87 nor s.89(2) would otherwise apply to the transferee settlement for the year of transfer—
> (a) s.89(2) to (4) apply to the settlement for that year (and subsequent tax years), and
> (b) for this purpose, references there to the last non-resident tax year are to be read as the year of transfer.

Amended as s.90(6) directs, s.89(2) TCGA provides:

> Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under section 87A as it applies for that year) with the section 1(3) amount for the ~~last non-resident tax year~~ *year of transfer* or any earlier tax year.

See 61.37.2 (Offshore trust comes to UK).

61.39.5 *Transfer for consideration*

Section 90A TCGA provides:

> (1) Section 90 does not apply to a transfer of settled property made for consideration in money or money's worth if the amount (or value) of that consideration is equal to or exceeds the market value of the property transferred.
> (2) The following provisions apply if—
> (a) s.90 applies to a transfer of settled property made for consideration in money or money's worth, and
> (b) the amount (or value) of that consideration is less than the market value of the property transferred.
> (3) If the transfer is of all of the settled property, for the purposes of s.90 treat the transfer as being of part only of the settled property.
> (4) Deduct the amount (or value) of the consideration from the amount of the market value referred to in s.90(4)(a).

Section 90 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest-free loan repayable on demand, because the promise to repay is full consideration. For the same reason s.90 does not apply to repayment of a loan.

61.39.6 *Interaction with sch 4B*

Section 90(10) TCGA provides:

> This section does not apply to—
> (a) a transfer to which Schedule 4B applies, or
> (b) any s.1(3) amount that is in a Schedule 4C pool (see para 1 of Schedule 4C).

See 62.19 (Schedule 4C: The key condition).

61.39.7 *HMRC examples*

The s.87 guidance note provides some straightforward examples:

Example	**Transfer**	**Consideration for transfer**
14	Entire fund	None
15	Part fund	None
16	Entire fund	Market value
17	Entire fund	Less than market value
18	Part fund	Less than market value

19	Transferee trust has unmatched gains (not matched)
20	Gains of transferor trust matched first

The first example is a transfer of an entire trust fund:

Example 14 – New section 90 – All settled property transferred between settlements for nil consideration

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2008-09.

No capital payments have been made out of the transferor settlement.

The transferor settlement had the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transferee settlement acquires these unmatched section 2(2) amounts. They are added to any unmatched section 2(2) amounts it already has for the years 2005-06 and 2008-09. This applies whatever the residence status of the transferee settlement.

The unmatched section 2(2) amounts in the transferor settlement are now reduced to Nil.[199]

The next example is a transfer of part of a trust fund:

Example 15 – New section 90 – Part of settled property transferred between settlements for nil consideration

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement for nil consideration in 2008-09. The cash remains in the transferor settlement.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

It is only the 'relevant proportion' of these unmatched section 2(2) amounts that is transferred to the transferee settlement.

The relevant proportion is 4/5 (£400,000 / [£400,000 + £100,000]).

Transferee settlement

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06	£16,000	(£20,000 × 4/5)
2008-09	£60,000	(£75,000 × 4/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year. This applies whatever the residence status of the transferee settlement.

Transferor settlement

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement. The unmatched section 2(2) amounts become:

[199] Author's footnote: But the transferor settlement has ceased to exist.

2005-06	£4,000	(£20,000 − £16,000)
2008-09	£15,000	(£75,000 − £60,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

The next example is a transfer for full consideration:

Example 16 – New section 90A – All settled property transferred between settlements for consideration of market value

All the settled property of the transferor settlement is transferred to the transferee settlement in 2008-09. The transferee settlement pays market value to the transferor settlement for these assets.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

These unmatched section 2(2) amounts remain in the transferor settlement and can be matched with future capital payments from that settlement. None of the unmatched section 2(2) amounts are transferred to the transferee settlement.

The next example is a transfer at an undervalue:

Example 17 – New section 90A – All settled property transferred between settlements for consideration less than market value

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. All these assets are transferred to the transferee settlement in 2008-09. The transferee settlement pays £300,000 to the transferor settlement for these assets.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transfer is treated as if it was a transfer of part only of the settled property. This is to bring in the 'relevant proportion' rules in section 90(3) and (4) TCGA in deciding how much of the unmatched section 2(2) amounts are transferred to the transferee settlement. In calculating the 'relevant proportion' you deduct the amount paid by the transferee settlement from the 'market value of the property transferred'. The relevant proportion is 2/5 ([£400,000 + £100,000 − £300,000] / [£400,000 + £100,000]).

Transferee settlement

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06	£8,000	(£20,000 × 2/5)
2008-09	£30,000	(£75,000 × 2/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year. This applies whatever the residence status of the transferee settlement.

Transferor settlement

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement. The unmatched section 2(2) amounts become:

2005-06	£12,000	(£20,000 – £8,000)
2008-09	£45,000	(£75,000 – £30,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

Example 18 – New section 90A – Part of settled property transferred between settlements for consideration less than market value

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement in 2008-09. The cash remains in the transferor settlement. The transferee settlement pays £300,000 to the transferor settlement for the shares.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

This transfer of part of the settled property brings in the 'relevant proportion' rules in section 90(3) and (4) TCGA in deciding how much of the unmatched section 2(2) amounts are transferred to the transferee settlement. In calculating the 'relevant proportion' you deduct the amount paid by the transferee settlement from the 'market value of the property transferred'.

The relevant proportion is 1/5 ([£400,000 – £300,000] / [£400,000 + £100,000]).

Transferee settlement

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06	£4,000	(£20,000 × 1/5)
2008-09	£15,000	(£75,000 × 1/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year. This applies whatever the residence status of the transferee settlement.

Transferor settlement

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement. The unmatched section 2(2) amounts become:

2005-06	£16,000	(£20,000 – £4,000)
2008-09	£60,000	(£75,000 – £15,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

Example 19 – New section 90(7) – Unmatched section 2(2) amounts transferred on a transfer between settlements do not affect matching in earlier years in transferee settlement

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2008-09.

No capital payments have been made out of the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of all settled property	£75,000

The transferee settlement acquires these unmatched section 2(2) amounts. They are added to any unmatched section 2(2) amounts it already has. This applies whatever the residence status of the transferee settlement.

The unmatched section 2(2) amounts in the transferor settlement are now reduced to Nil.

In its own right the transferee settlement had:

2001-02	Trustees' gains (section 2(2) amount)	£10,000
2004-05	Capital payments	£30,000
2006-07	Trustees' gains (section 2(2) amount)	£50,000

This has resulted in chargeable gains treated as accruing to the beneficiary of:

2004-05	£10,000	(Also possible increase in tax charged under section 91)
2006-07	£20,000	

There is no reworking of this matching when section 2(2) amounts are transferred from the transferor settlement. So the 2005-06 section 2(2) amount transferred in is not matched with any of the 2004-05 capital payments. The transferee settlement has unmatched section 2(2) amounts to carry forward of:

2005-06	£20,000	From transferor settlement
2006-07	£30,000	In its own right
2008-09	£75,000	From transferor settlement

Example 20 – New section 90(3) – Capital payments out of transferor settlement in year of transfer matched with section 2(2) amounts of transferor settlement for that and earlier years before calculating section 2(2) amounts transferred

The transferor settlement's assets consist of shares with a market value of £400,000 and cash of £100,000. The shares are transferred to the transferee settlement for nil consideration in 2008-09. The cash remains in the transferor settlement.

The transferor settlement has the following gains made by the trustees:

2005-06	Trustees' gains (section 2(2) amount)	£20,000
2008-09	Section 2(2) amount on transfer of shares	£75,000

The first capital payment made out of the transferor settlement is made in 2008-09. It does not matter whether the capital payment is made before or after the transfer of the shares between settlements. The capital payment is £50,000 to a beneficiary. That £50,000 capital payment is matched with £50,000 of the 2008-09 section 2(2) amount and a chargeable gain of £50,000 is treated as accruing to the beneficiary under section 87 for 2008-09. The remaining unmatched section 2(2) amount for 2008-09 is reduced to £25,000 (£75,000 − £50,000).

It is only the 'relevant proportion' of the remaining unmatched section 2(2) amounts that is transferred to the transferee settlement.

The relevant proportion is 4/5 (£400,000 / [£400,000 + £100,000]).

Transferee settlement

The transferee settlement acquires the following unmatched section 2(2) amounts:

2005-06	£16,000	(£20,000 × 4/5)
2008-09	£20,000	(£25,000 × 4/5)

They are added to any unmatched section 2(2) amounts it already has and can be matched with capital payments made from the transferee settlement in 2008-09 or a later year. This applies whatever the residence status of the transferee settlement.

Transferor settlement

The unmatched section 2(2) amounts of the transferor settlement are reduced by the section 2(2) amounts that have been treated as transferred to the transferee settlement. The unmatched section 2(2) amounts become:

2005-06	£4,000	(£20,000 – £16,000)
2008-09	£5,000	(£25,000 – £20,000)

This reduction has effect for matching in the year after the year of transfer (2009-10) and subsequent years.

61.39.8 *Trust transfers: s.87 planning*

It is interesting to compare the technique of s.81 IHTA (deeming transferred property to remain in the original trust).[200] While that is not without its problems, it is a more effective anti-avoidance rule. The reason may be that s.90 is not (or not just) an anti-avoidance provision. It is intended to facilitate inter-trust transfers. Such transfers may be desirable:

(1) for non-tax reasons, to separate the interests of different branches of a family
(2) to avoid unfairness which otherwise follows from the operation of s.87.

To illustrate the fairness point. Suppose:

(1) Trustees hold a trust fund worth £2m with s.1(3) amounts of £1m
(2) Principal beneficiaries are B1/B2, both UK resident/domiciled
(3) The trustees wish to make a capital payment of £1m to B1

If they do so directly, then a subsequent distribution to B2 would be tax free. That would not be fair as between B1 and B2.

Instead:

(1) The trustees transfer half of the trust fund to a new trust.
(2) Either the old or the new trust makes the £1m capital payment to B1.

This in principle solves this unfairness: B1 pays tax on one half of the s.1(3) amount and B2 in due course will in principle pay tax on the other half, when that fund is transferred to B2.

Take the same facts but assume that B1 or B2 is non-resident. Prior to the introduction of the non-resident disregard, HMRC were content for payments to be timed so that B1 received his or her payment first and

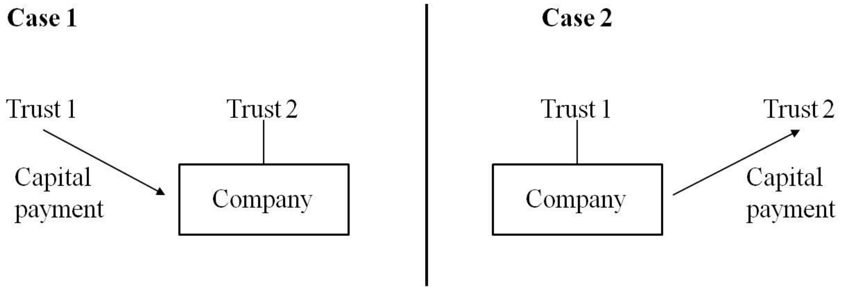
[200] See 79.10 (Same settlement fiction: s.81).

"washed" the trust gains.[201] The planning now would be to transfer a fund to a separate trust. Then make the payment to B1. A payment to the UK resident beneficiary only pays tax on half the gains. That seems a fair result. Could planning to obtain such a fair result constitute avoidance? It might be wise, at least, to arrange that the new trust is not wound up immediately after being created.

61.39.9 *Trust transfer via company*

The position is more complicated if an inter-trust transfer involves a payment from or to an underlying company.

I here consider the s.90 issues: for a list of other issues on transfers to/from companies across trusts, see 79.14 (Transfers to/from underlying co).



In case 1, there is a transfer from trust 1 to a company held by trust 2. At first sight, s.90 does not apply because it is not the case that the trustees of a trust 1 transfer *settled property* to the trustees of trust 2.

In case 2, there is a transfer from a company held by trust 1 to trust 2. At first sight, s.90 does not apply because it is not the case that the trustees of a trust 1 transfer settled property *to the trustees of trust 2*.

There might be a transfer from a company held by trust 1 to a company held by trust 2; in that case there are two independent reasons why s.90 does not apply. In these cases there is (in general) a *value shift* between trusts, but no *transfer of property* between trusts.

There is in principle a capital payment from trust 1 to trust 2. But it is difficult to say that a capital payment entails that there is deemed to be a transfer of settled property, even on a purposive construction, because the s.87C disregard and/or the general (s.87D) disregard apply.[202]

[201] See 61.57.1(Capital payment timing).

[202] See 61.13 (Payment to/from co across trusts).

Note however that there is (in general) a disposal of assets, by trust 1 (in case 1) or by the company (in case 2), on which a gain may accrue to the trust or company concerned.

Does this offer a means to avoid the application of s.90? If the issue arises in the context of a tax avoidance scheme, there is more to be said:

(1) One argument is that the trust/company structure constitutes one arrangement, and so one "settlement" for s.87 purposes. There is a transfer from one such arrangement to another.
(2) Alternatively, of course, the GAAR might apply.

Neither of those two arguments are straightforward, and both are fact sensitive; but we are fishing in murky waters.

61.40 Pre-1981 gain/capital payment

Para 116 sch 7 FA 2008 provides:

> For the purposes of sections 87 and 87A of TCGA 1992, no account is to be taken of—
> (a) any capital payment received before 10 March 1981, or
> (b) any capital payment received on or after that date but before 6 April 1984, so far as it represents a chargeable gain which accrued to the trustees before 6 April 1981.

Capital payments before 10 March 1981 are disregarded.

Capital payments before 6 April 1984 are disregarded if they represent a chargeable gain which accrued to the trustees before 6 April 1981. How does one decide whether a capital payment represents a pre-1981 gain? Presumably that is so if the capital payment is matched with a pre-1981 gain. But this question will not often arise now.

No account is taken of gains/losses before 1981/82 when the legislation was introduced.

61.41 Pre-1998 gain/capital payment

Para 118 sch 7 FA 2008 provides:

> (1) This paragraph applies if—
> (a) s.87 of TCGA 1992 applies to a settlement for the tax year 2008-09 or any subsequent tax year ("the tax year"),
> (b) the settlement was made before 17 March 1998,
> (c) none of the settlors fulfilled the residence requirements when the settlement was made, and
> (d) none of the settlors fulfils the residence requirements in the tax

> year.
> (2) For the purposes of that section as it applies to the settlement for the tax year, no account is to be taken of—
> (a) any gains or losses accruing to the trustees of the settlement before 17 March 1998, or
> (b) any capital payments received before that date.
> (3) A settlor "fulfils the residence requirements" when the settlor is—
> (a) resident or ordinarily resident in the UK, and
> (b) domiciled[203] in any part of the UK.

In principle, (inter alia) for foreign domiciled settlor settlements, one disregards gains and capital payments before 17 March 1998. But if in any year there is a UK resident and domiciled settlor, even only one of several, the relief is lost in that year. Thus, a "tainting" principle applies.[204] A small, even nominal contribution from a UK resident and domiciled settlor will forfeit the transitional relief for all years that that settlor is UK resident and domiciled.

One can envisage a case where it is better that this relief does not apply, in which case it would be possible to arrange to forfeit the relief, but this will not be common.

61.42 s.1(3) amount at 5/4/2008

The concept of s.1(3) amount[205] was introduced in the FA 2008 with effect from 2008/09. However it is necessary to compute the s.1(3) amount for earlier years in order to know what s.1(3) amount is carried forward to 2008/09 and subsequently.

Para 120 sch 7 FA 2008 provides:

> (1) This paragraph applies to a settlement if s.87 or s.89(2) of TCGA 1992 applied to it for the tax year 2007–08 or any earlier tax year.
> (2) The following steps are to be taken for the purposes of calculating the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.
> *Step 1*
> Calculate (in accordance with s.87 and, where appropriate, s.88) the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.

[203] See 61.53 (UK dom/Formerly-dom resident).

[204] See 99.6 (Tainting).

[205] It was then called a s.2(2) amount, but I use the modern reference for convenience.

> For this purpose, references in s.87(4) and (5) of TCGA 1992 (as substituted) to s.87 of that Act applying to a settlement for a tax year are to be read as references to s.87 of that Act (as it had effect before that substitution) applying to a settlement for a tax year.
>
> *Step 2*
>
> Find the total amount of chargeable gains treated under s.87 or 89(2) as accruing to beneficiaries of the settlement in the tax year 2007-08 or any earlier tax year ("the total deemed gains").

I prefer the label "pre-2008 s.87 gains".

> *Step 3*
>
> Find the earliest tax year for which the s.2(2) amount is not nil.
>
> If the s.2(2) amount for that year is less than or equal to the total deemed gains [pre-2008 s.87 gains], reduce that s.2(2) amount to nil.
>
> Otherwise, reduce that s.2(2) amount by the amount of the total deemed gains.
>
> *Step 4*
>
> Reduce the total deemed gains [pre-2008 s.87 gains] by the amount by which the s.2(2) amount was reduced under Step 3.
>
> *Step 5*
>
> If the total deemed gains [pre-2008 s.87 gains] is not nil, start again at Step 3.
>
> For this purpose, read references to the earliest tax year for which the s.2(2) amount is not nil as references to the earliest tax year—
>
> (a) which is after the last tax year for which Steps 3 and 4 have been undertaken, and
>
> (b) for which the s.2(2) amount is not nil.

EN FB 2008 provides an example:

> 60. Example: determining the s.2(2) amount for years preceding 2008-09:
>
> The s.2(2) amounts of a settlement were:
>
> 2004-05: £100,000
> 2005-06: £50,000
> 2006-07: £200,000
> 2007-08: £200,000
>
> Total deemed gains [pre-2008 s.87 gains] were £450,000.
>
> a. Subtract the s.2(2) (£100,000) amount for the earliest year from the total deemed gains. Section 2(2) amount for 2004-05 reduces to nil. Total deemed gains reduced to £350,000.
>
> b. Subtract the s.2(2) (£50,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2005-06

> reduces to nil. Total deemed gains reduced to £300,000.
> c. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2006-07 reduces to nil. Total deemed gains reduced to £100,000.
> d. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2007-08 reduces to £100,000. Total deemed gains reduced to nil.
> The s.2(2) amount for the settlement for 2007-08 is therefore £100,000.

In short, pre-2008 s.87 gains are deducted from pre-2008 s.1(3) amounts on a FIFO basis (first in first out). It is expressed in just about the most obscure way possible.[206]

The s.87 guidance note provides:

> **Identifying unmatched s.2(2) amount for years before 2008-09: para 120 Sch 7**
> 30. Although the new matching rules in section 87A take effect from 2008-09 they will apply to match capital payments received in 2008-09 and later against unmatched section 2(2) amounts of 2007-08 and earlier. This means it is necessary to calculate what those section 2(2) amounts are. Paragraph 120 of Schedule 7 explains how to do this in a series of steps. Capital payments matched with these section 2(2) amounts may be subject to the increased tax charge under section 91 TCGA.
> 31. First you calculate what the section 2(2) amount would be for each earlier year using the definition in the new section 87(4) but applying the CGT rules for the earlier year. So you give taper relief and indexation allowance as appropriate. These section 2(2) amounts include gains made by the trustees which have been matched with capital payments.
> 32. Second you identify the total chargeable gains that have accrued to beneficiaries under section 87 in the years up to and including 2007-08. This includes chargeable gains that have not been charged to tax – for example because of the non-UK residence or domicile status of the beneficiary. This figure is called the "total deemed capital gains".
> 33. Third you allocate the total deemed capital gains to years in which there is a section 2(2) amount taking the earliest year first. You reduce the section 2(2) amount by the amount of the total deemed gains [pre-2008 s.87 gains]. If the total deemed gains are greater than the section 2(2) amount the section 2(2) for the year is reduced to nil. A corresponding reduction is made in the total deemed gains. When all the total deemed gains have been allocated you are left with the unmatched

[206] For discussion of the drafting technique, see 61.15.7 (Method statements: Critique).

section 2(2) amounts for 2007-08 and earlier years. See example 5.

Example 5: Identifying unmatched s.2(2) amounts for years before 2008-09: para 120 Sch 7

The section 2(2) amounts for a settlement are:-

2005-06	£50,000
2006-07	£75,000
2007-08	£60,000

Up to and including 2007-08 capital payments of £90,000 have been received by beneficiaries and the total deemed gains [pre-2008 s.87 gains] are £90,000. None of the capital payments were received in the period 12 March to 5 April 2008. See example 12 for an example of payments received in this period by a non-UK domiciled beneficiary.

The total deemed gains are allocated against the section 2(2) amounts using the FIFO rules in paragraph 120 of Schedule 7 that apply to matching for 2007-08 and earlier years. They are allocated as follows:

	Original s2(2) amount	Total deemed gains	Deemed s2(2) amount
2005-06	£50,000	£50,000	Nil
2006-07	£75,000	£40,000	£35,000
2007-08	£60,000	Nil	£60,000

Suppose capital payments of £70,000 were received by beneficiaries in 2009-10 and there is no section 2(2) amount for that year or 2008-09. The £70,000 capital payments are matched under the LIFO rules in the new section 87A TCGA that apply for matching in 2008-09 and later years. £60,000 of those payments are matched against the section 2(2) amount for 2007-08 and £10,000 of those payments are matched against the section 2(2) amount for 2006-07. The total deemed gains are £70,000 (£60,000 + £10,000) treated as accruing in 2009-10. This leaves unmatched a deemed section 2(2) amount for 2006-07 of £25,000 (£35,000 – £10,000) available to match against capital payments made in 2010-11 or later years.

Assuming all the beneficiaries were resident in the UK in 2009-10 their liability to CGT on the section 87 gains accruing to them will depend on their domicile in 2009-10. If any of the beneficiaries are non-UK domiciled individuals paragraph 124(2)(b) of Schedule 7 will prevent them being charged to CGT. This applies whether or not they have claimed to use the remittance basis for 2009-10. If any of the beneficiaries are UK domiciled they will be charged to CGT on the section 87 gains. Any tax due on these gains will be increased by section 91 TCGA.

Assume the entire capital payment is received by a UK resident and domiciled beneficiary who has no other capital gains and losses in 2009-10. At the time of writing the annual exempt amount and rate of CGT are

> not known for 2009-10. This example assumes they are the same as for 2008-09 at £9,600 and 18% respectively. The annual exempt amount is set first against the gain accruing from the 2006-07 capital payment. Ie £10,000 – £9,800 = £200. The tax due on the gain accruing from the 2006-07 capital payment is £36 (£200 @ 18%). This tax is increased by £10 (£36 @ 30% = £10). The tax due on the gain accruing from the 2007-08 amount is £10,800 (£60,000 @ 18%). This tax is increased by £2,160 (£10,800 @ 20%). The total CGT payable for 2009-10 is £13006 (£36 + £10 + £10,800 + £2,160).

Para 120(3) provides for schedule 4B cases, though the drafter does not try very hard:

> If, before 6 April 2008, the trustees of the settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, sub-para (2) has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

61.42.1 *Pre-2008 OIG amounts*

Para 99 sch 7 FA 2008 applies the same rule to OIG amounts:

> Paragraphs 120 and 121 apply in relation to offshore income gains as if—
> (a) references to section 2(2) amounts were to OIG amounts,
> (b) references to chargeable gains were to offshore income gains, and
> (c) Step 1 of paragraph 120(2) provided that OIG amounts are to be calculated in accordance with—
> (i) section 762(2) of ICTA (the reference in the second sentence of that Step to section 87(4) of TCGA 1992 being read as a reference to section 762(2) of ICTA), or
> (ii) section 87(5) of TCGA 1992 as applied by section 762(3) of ICTA.

Section 762 ICTA is now repealed. The OFTR should have updated the references but (somewhat negligently) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new provisions should be implied.

61.43 Pre-2008 capital payments

In order to follow the present legislation, one needs to have in mind the original terms of s.87(6) TCGA, and in order to follow that, one needs to read all of the pre-2008 s.87(4)-(6) TCGA:

> *(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.*
> *(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.*
> *(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.*

Para 122 sch 7 FA 2008 provides:

> (1) If all of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced to nil.
> (2) If part of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced by the amount of that part.
> (3) If—
> (a) chargeable gains were treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing in the tax year 2007-08 or any earlier tax year to a beneficiary,
> (b) more than one capital payment that the beneficiary had received was taken into account for the purposes of determining the amount of chargeable gains treated as accruing to the beneficiary, and
> (c) the amount of those chargeable gains was less than the total amount of capital payments taken into account,
>
> for the purposes of this paragraph treat s.87(6) of TCGA 1992 as originally enacted as having effect in relation to earlier capital payments before later ones.

The point of this (I think) is to prevent double counting of a capital payment: it is set against s.1(3) amounts under para 120 and not a second time.

The s.87 guidance note provides:

> 34. In the same way that it is necessary to deal with unmatched section 2(2) amounts for a year before 2008-09 it is also necessary to deal with unmatched capital payments received before 2008-09. You have to identify the year in which

> an unmatched capital payment was received. This is dealt with in paragraph 122 of Schedule 7.
>
> 35. First you apply the rule in the original section 87(6) to determine if all or any of a capital payment would be left out of account. A payment would be left out of account to the extent that chargeable gains accrued to a beneficiary as a result of making the payment. In other words if the payment is matched against gains made by the trustees. See example 6.
>
> 36. If more than one capital payment is matched against the trustees' gains for a year and the total of the payments is greater than the chargeable gain that accrues the rule in paragraph 122(3) applies. You identify the year the unmatched payment was received by matching the payments received in the earliest years first. See example 7.
>
> **Example 6: Identifying unmatched capital payments received before 2008-09: para 122(1) & (2) Sch 7**

2005-06	Capital payments received	Beneficiary A	£15,000
		Beneficiary B	£12,000
	Trustees' gains (s.2(2) amount)		£37,000
2007-08	Capital payments received	Beneficiary A	£8,000
		Beneficiary B	£9,000

> In 2005-06 the capital payments £15,000 and £12,000 are matched against £37,000 trustees' gains and chargeable gains of £15,000 and £12,000 accrue to A and B. In 2008-09 and later years paragraph 122(1) of schedule 7 applies and the capital payments are reduced to nil. The unmatched trustees' gains of £10,000 are carried forward under the old section 87(2) to later years.
>
> In 2007-08 £10,000 trustees' gains are matched against the £17,000 capital payments received. Gains of £4,705 (£10,000 × 8,000/17,000) accrue to A and gains of £5,295 (£10,000 × 9,000/17,000) accrue to B. Their respective unmatched capital payments are reduced to £3,295 (£8,000 – £4,705) and £3,705 (£9,000 – £5,295). Paragraph 122(2) of Schedule 7 ensures only those unmatched parts of the capital payments are carried forward for use in 2008-09 or later years.

The s.87 guidance note provides:

> 36. If more than one capital payment is matched against the trustees' gains for a year and the total of the payments is greater than the chargeable gain that accrues the rule in paragraph 122(3) applies. You identify the year the unmatched payment was received by matching the payments received in the earliest years first. See example 7.

The s.87 guidance note provides:

> **Example 7: Identifying unmatched capital payments received before 2008-09: Para 122(3) Sch 7**

2005-06	Capital payments received	Beneficiary A	£16,000
		Beneficiary B	£14,000
	Trustees' gains (s.2(2) amount)		£ 5,000
2007-08	Capital payments received	Beneficiary A	£10,000
		Beneficiary B	£ 8,000

	Trustees' gains (s.2(2) amount)	£13,000
2008-09	Section 2(2) amount	£20,000

In 2005-06 gains of £2,667 (£5,000 × 16,000/30,000) would accrue to beneficiary A and the unmatched capital payment would be reduced to £13,333 (£16,000 – £2,667). Gains of £2,333 (£5,000 × 14,000/30,000) would accrue to beneficiary B and the unmatched capital payment would be reduced to £11,667 (£14,000 – £2,333).

In 2007-08 A receives a further capital payment of £10,000 giving them total unmatched capital payments of £23,333. B receives a further capital payment of £8,000 giving them total unmatched capital payments of £19,667. Gains of £7,054 (£13,000 × 23,333/43,000) accrue to A. Gains of £5946 (£13,000 × 19,657/43,000) accrue to B. A's unmatched capital payments to carry forward to 2008-09 are £16,279 (£23,333 – £7,054). B's unmatched capital payments are £13,721 (£19,667 – £5,946).

In 2008-09 the conditions for paragraph 122(3) of Schedule 7 are satisfied:

(a) Chargeable gains have accrued to both beneficiaries in 2007-08.

(b) Capital payments from 2005-06 and 2007-08 have been used for the purposes of determining those gains.

(c) The amount of the chargeable gains £13,000 is less than the total of the capital payments £43,000.

Paragraph 122(3) matches the £13,000 gains first against the capital payments received in 2005-06. In 2005-06 A's unmatched capital payments were £13,333. The 2007-08 gains of £7,054 are matched first against those payments reducing the unmatched capital payments to £6,279. B's unmatched capital payments were £11,667. The 2007-08 gains of £5,496 are matched first against those payments reducing the unmatched capital payments to £5,721. The total unmatched capital payments to carry forward to 2008-09 are then:

- To A £16,279 consisting of £6,279 from 2005-06 and £10,000 from 2007-08
- To B £13,721 consisting of £5,721 from 2005-06 and £8,000 from 2007-08

The ordinary rules of section 87A then apply for the purpose of matching the £20,000 2008-09 section 2(2) amount with the earlier years' capital payments. Gains of £10,000 accrue to A and gains of £8,000 accrue to B as a result of matching the section 2(2) amount against the capital payments received in 2007-08. That leaves £2,000 of the section 2(2) amount to match with capital payments from 2005-06. A gain of £1,046 (£2,000 × 6279/12,000) accrues to A and a gain of £954 (£2,000 × 5721/12,000) accrues to B as a result of matching that £2,000 of the section 2(2) amount. The total gains attributed under section 87 for 2008-09 are:

- To A £11,046 (£10,000 + £1,046)
- To B £8,954 (£8,000 + £954)

The total unmatched capital payments to carry forward to 2009-10 are then:

- To A £5,233 (£6,279 – £1,046) all from 2005-06
- To B £4,767 (£5,721 – £954) all from 2005-06.

Para 122 then imposes the same rules for OIGs:

> (4) References in this paragraph to s.87(6) of TCGA 1992 include that provision as it would (but for the amendments made by this Schedule) have applied by virtue of s.762(3) of ICTA (offshore income gains).
> (5) References in this paragraph to chargeable gains include offshore income gains.

Section 762 ICTA is now repealed. The OFTR should have updated the reference but (perhaps carelessly) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new provisions should be implied.

61.44 Pre-2008 capital payment/trust gain, matched post 2008

Para 124 sch 7 FA 2008 provides:

> (1) This paragraph applies if—
> (a) chargeable gains are treated under s.87 or 89(2) of TCGA 1992 as accruing to an individual in the tax year 2008-09 or any subsequent tax year, and
> (b) the individual is not domiciled[207] in the UK in that year.
> (2) The individual is not charged to capital gains tax on the chargeable gains if and to the extent that they are treated as accruing by reason of—
> (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
> (b) the matching of any capital payment with the s.2(2) amount for the tax year 2007-08 or any earlier tax year.

There are two reliefs here:

(1) Para (2)(a) provides relief for pre-2008 capital payments to foreign domiciliaries which are matched with post-2008 s.1(3) amounts.

(2) Para (2)(b) provides relief for post 2008 capital payments which are matched with pre-2008 s.1(3) amounts.

EN FB 2008 summarises the matter this way:

> 440. The overall effect of these new rules is that: ...
> [1] there will be no charge to tax in respect of capital payments made to non-UK domiciled beneficiaries who:
> [a] receive capital payments before 6 April 2008 that are matched to trust gains accruing on or after 6 April 2008; or
> [b] receive capital payments on or after 6 April 2008 that are matched to trust gains accruing before 6 April 2008.

[207] See 61.53 (UK dom/Formerly-dom resident).

This will be so irrespective of whether the non-UK domiciled beneficiary is a remittance basis user

The s.87 guidance note provides:

Example 10: Capital payments received by non-UK domiciled beneficiary before 6 April 2008 matched with s.2(2) amount for 2008-09 or later: para 124 Sch 7

2005-06	Capital payments received	£10,000
2008-09	Capital payments received	£16,000
	Section 2(2) amount	24,000

The capital payments are received by a beneficiary who is UK resident but non-UK domiciled in 2008-09. A chargeable gain of £24,000 accrues to the beneficiary in 2008-09. On the LIFO basis the capital payments received are matched £16,000 2008-09 and £8,000 2005-06. The beneficiary is liable to CGT on the £16,000 only. The beneficiary is not liable on the £8,000 because the section 2(2) amount realised in 2008-09 is matched to a capital payment received in 2005-06 by a person who is not domiciled in the UK. This applies whether or not the beneficiary is a remittance basis user.

The CGT due on the £16,000 will depend on whether the beneficiary is a remittance basis user and on whether the trustees had made an election under paragraph 126 of Schedule 7. If the trustees have made the election the gain will be restricted to the amount that relates to the growth in the value of the asset since 5 April 2008. If the beneficiary is a remittance basis user the gain will not be charged until it is remitted.

In any circumstances the settlement's section 2(2) amount for 2008-09 is reduced to nil. There are unmatched capital payments from 2005-06 of £2,000 (£10,000 − £8,000) to carry forward.

If the beneficiary was non-UK domiciled in 2005-06 but became UK domiciled sometime before the capital payment was received the condition in paragraph 124(1)(b) is not satisfied. The beneficiary is liable to CGT on the entire gain of £24,000. It is irrelevant whether the domicile status changed before or after 6 April 2008.

Example 11: Gain accruing in respect of s.2(2) amount for a year before 2008-09 when beneficiary non-UK domiciled: para 124 Schedule 7

2005-06	Capital payments received	Nil
	Section 2(2) amount	£ 7,000
2006-07	Capital payments received	Nil
	Section 2(2) amount	£ 5,000
2008-09	Capital payment received	£30,000
	Section 2(2) amount	£16,000

The capital payment in 2008-09 was received by a UK resident but non-UK domiciled beneficiary. A chargeable gain of £28,000 accrues in 2008-09. Using the last-in first-out basis of matching the capital payment £30,000 is matched against the section 2(2) amounts as follows.

2008-09	£16,000
2006-07	£ 5,000

2005-06	£ 7,000
	£28,000

The beneficiary is liable to CGT only on the £16,000 matched with the section 2(2) amount for the year 2008-09. The beneficiary is not liable to CGT on the section 87 gains that accrue as a result of matching the capital payment against section 2(2) amounts for 2006-07 and 2005-06. This is because the beneficiary was not domiciled in the UK in 2008-09 when the capital payment was received and the section 2(2) amounts are for years before 2008-09.

The CGT due on the £16,000 will depend on whether the beneficiary is a remittance basis user and on whether the trustees had made an election under paragraph 126 of Schedule 7. If the trustees have made the election the gain will be restricted to the amount that relates to the growth in the value of the asset since 5 April 2008. If the beneficiary is a remittance basis user the gain will not be charged until it is remitted.

In any circumstances the settlement's section 2(2) amounts for 2008-09, 2006-07 and 2005-06 are reduced to nil. The unmatched capital payments for 2008-09 are reduced to £2,000 (£30,000 – £28,000).

Suppose the beneficiary was non-UK domiciled in 2005-06 and 2006-07 but became UK domiciled in 2007-08 or 2008-09. They would be liable to CGT on the whole chargeable gain £28,000. The fact that they were non-UK domiciled in the years before 2008-09 when the section 2(2) amounts were realised is not relevant. The test in paragraph 124(1)(b) of Schedule 7 is the domicile status for the year in which the gain accrues as a result of matching those amounts with a capital payment.

61.44.1 *Pre-2008 capital payment and pre-2008 OIG amount*

Para 100 sch 7 FA 2008 provides the same rules for OIG amounts:

> (1) This paragraph applies if—
>
> (a) by virtue of section 87 or 89(2) of, or Schedule 4C to, TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001), income is treated under such regulations (regulation 17 of those Regulations[)] as arising to an individual in the tax year 2008–09 or any subsequent tax year, and
>
> (b) the individual is not domiciled[208] in the UK in that year.
>
> (2) The individual is not charged to income tax on the income if and to the extent that it is treated as arising by reason of—
>
> (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
>
> (b) the matching of any capital payment with the OIG amount for the tax year 2007–08 or any earlier tax year.

[208] See 61.53 (UK dom/Formerly-dom resident).

61.44.2 *Payment 12 Mar - 5 Apr 2008*

Para 125 sch 7 FA 2008 provides a special rule for these capital payments:

> (1) This paragraph applies in relation to a settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year") if—
>
> (a) an individual who was resident or ordinarily resident, but not domiciled, in the UK in the tax year 2007-08 received a capital payment from the trustees of the settlement on or after 12 March 2008 but before 6 April 2008, and
>
> (b) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.
>
> (2) For the purposes of sections 87 to 89 of TCGA 1992 as they apply in relation to the settlement for the relevant tax year, no account is to be taken of the capital payment.

One might refer to capital payments made between 12 March and 5 April 2008 as post-budget 2008 capital payments. There is no matching for post-budget 2008 capital payments, so such payments do not reduce s.1(3) amounts.

January 2009 Qs & As provides some background explanation:

> **Q4**: Paragraph 125(2) appears to disregard payments between 12 March and 5 April altogether, which is different to the treatment proposed in the Budget documentation published on 12 March.
>
> **A**: The original intention set out in the Budget documentation of 12 March and legislation was to allow the matching of capital payments between 12 March 2008 and 5 April 2008 with any gains relating to the period up to 5 April 2008 arising to the trustees after 5 April 2008. However, this proposal was dropped because it would have introduced additional and unnecessary complexity to the legislation.

This rule is not extended to offshore income gains. It is not clear if that was deliberate or an oversight.

The s.87 guidance note provides:

> **Non-UK domiciled beneficiaries: capital payments received 12 March to 5 April 2008: para 125 Sch 7**
>
> 50. Paragraph 125 of Schedule 7 is an anti-avoidance measure. Its purpose was to discourage trustees making large capital payments to non-UK domiciled beneficiaries immediately before the beginning of 2008-09. These would then be matched against section 2(2) amounts for 2008-09 or later and, unless they had become UK domiciled, the beneficiaries would not be liable to CGT on any gains accruing to them.

51. The paragraph provides that any capital payment received by a UK resident or ordinary resident beneficiary is ignored if it was received on or after 12 March and before 6 April 2008 by a non-UK domiciled beneficiary. The payment is ignored only if the chargeable gain accrues in 2008-09 or later and the beneficiary is still non-domiciled when the gain accrues. See example 12.

Example 12: Non-UK domiciled beneficiary: capital payment received 12 March to 5 April 2008: para 125 Sch 7

Year	**Capital payments**	**S.2(2) amount**
2007-08	£200,000	£ 50,000
2010-11	Nil	£ 80,000

The 2007-08 capital payment was made on 4 April 2008 to a UK resident but non-UK domiciled beneficiary.

A chargeable gain of £50,000 accrues to the beneficiary in 2007-08 but they are not liable to CGT on this gain. The settlement's section 2(2) amount for 2007-08 is reduced to nil. The unmatched capital payment for 2007-08 is reduced to £150,000.

If the beneficiary is non-UK domiciled in 2010-11 the unmatched capital payment £150,000 for 2007-08 is not matched against the section 2(2) amount £80,000 for 2010-11 and no section 87 gain accrues for that year. This is because the capital payment was received in the period 12 March 2008 to 5 April 2008 inclusive by a beneficiary who was not domiciled in the UK when they received the payment.

The settlement's unmatched section 2(2) amount for 2010-11 remains at £80,000.

The capital payment will remain unmatched against section 2(2) amounts for future years provided the beneficiary remains non-domiciled. If the taxpayer has become UK domiciled by the time a section 2(2) amount is realised in a future year the payment can be matched against that amount and a section 87 gain will accrue to the beneficiary in that year.

In the example suppose a section 2(2) amount of £20,000 is realised in 2011-12. There are no capital payments in that year. The beneficiary is still non-UK domiciled. The unmatched capital payment £150,000 from 2007-08 is not matched against this section 2(2) amount.

The beneficiary becomes UK domiciled in 2012-13 and stays UK domiciled in later years.

In 2014-15 a section 2(2) amount of £80,000 is realised. No capital payments are made in that year. Paragraph 125 of Schedule 7 does not apply to year 2014-15 because the taxpayer is UK domiciled in that year. The rules in section 87A match the section 2(2) amount for 2014-15 with the unmatched capital payment £150,000 2007-08. A chargeable gain of £80000 accrues to the beneficiary in 2014-15. At the time of writing the annual exempt amount and rate of CGT are not known for 2014-15. This example assumes they are £15,000 and 18% respectively. Assuming that the annual exempt amount is £15,000 and the rate of CGT 18% the beneficiary will be liable to £11,700 CGT on this gain.

The section 2(2) amount for 2014-15 is reduced to nil and the unmatched capital payment for 2007-08 is reduced to £70,000 (£150,000 – £80,000). This capital payment will be matched against section 2(2) amounts realised in later years. Applying the matching rules in section 87A TCGA to a section 2(2) amount for 2014-15 does not result in a capital payment received in 2007-08 being matched against section 2(2) amounts for years 2010-11 and 2011-12. The section 2(2) amounts for those years will be matched against capital payments received in years after 2014-15. The remaining unmatched capital payments for 2007-08 £70,000 will be matched against section 2(2) amounts for years after 2014-15.

61.45 Pre-2008 inter-trust transfer

Para 120(4) sch 7 FA 2008 disapplies the rules in para 120 where there was an inter-trust transfer before 2008/09[209] and para 121 sch 7 FA 2008 sets out its own set of rules:

> (1) If s.90 of TCGA 1992 (as originally enacted) applied to a transfer of settled property made before 6 April 2008, this paragraph applies in relation to the transferor settlement and the transferee settlement.
> (2) In this paragraph "the year of transfer" means the tax year in which the transfer occurred.
> (3) The following steps are to be taken for the purpose of calculating the s.2(2) amount for the transferor and transferee settlements for the tax year 2007-08 and earlier tax years.
> *Step 1*
> Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (at the end of the year of transfer) for the transferor settlement for the year of transfer and earlier tax years.
> For this purpose, read references there to the tax year 2007-08 as references to the year of transfer.
> *Step 2*
> Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (before the year of transfer) for the transferee settlement for the tax year before the year of transfer and earlier tax years.
> For this purpose, read references there to the tax year 2007-08 as references to the tax year before the year of transfer.
> *Step 3*
> Calculate the s.2(2) amount for the transferee settlement for the year of transfer.
> *Step 4*
> Treat the s.2(2) amount for the transferee settlement for the year of transfer or any earlier tax year (as calculated under Step 2 or 3) as increased by—
> (a) the s.2(2) amount for the transferor settlement for that year (as calculated under Step 1), or
> (b) if part only of the settled property was transferred, the relevant proportion of the amount mentioned in para (a).
> "The relevant proportion" here has the same meaning as in s.90(4) of TCGA 1992

[209] Para 120(4) provides:
This paragraph does not apply if s.90 of TCGA 1992 applied to a transfer of settled property by or to the trustees of the settlement that was made before 6 April 2008 (see para 121).

> (as substituted by this Schedule).
> *Step 5*
> Treat the s.2(2) amount for the transferor settlement for any tax year as reduced by the amount by which the s.2(2) amount for the transferee settlement for that year is increased under Step 4.
> *Step 6*
> Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferor settlement for the tax year 2007-08 and earlier tax years.
> For this purpose—
> (a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 1 and 5 above, and
> (b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 1 above.
> *Step 7*
> Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferee settlement for the tax year 2007-08 and earlier tax years.
> For this purpose—
> (a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 2 to 4 above, and
> (b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 2 above.

The drafter felt something should be done about multiple transfers, and sch 4B, but did not know what:

> (4) This paragraph applies with any necessary modifications in relation to a settlement as respects which more than one relevant transfer was made.
> (5) In sub-para (4) "relevant transfer" means a transfer—
> (a) made before 6 April 2008, and
> (b) to which s.90 of TCGA 1992 applied.
> (6) If, before 6 April 2008, the trustees of the transferor or transferee settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, this paragraph has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

Para 99 sch 7 FA 2008[210] applies the same rules for OIG amounts.

61.46 Pre-2008 trust immigration

In order to follow the present legislation, one needs to have in mind the original terms of s.89(2) TCGA, and in order to follow that it needs to be read with s.89(1):

> *(1) Where a period of one or more years of assessment for which section 87 applies to a settlement ("a non-resident period") succeeds a period of*

[210] Set out at 61.42.1 (Pre-2008 OIG amounts).

> *one or more years of assessment for each of which section 87 does not apply to the settlement ("a resident period"), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of section 87 if it was not made in anticipation of a disposal made by the trustees in the non-resident period.*
>
> *(2) Where*
>
> *(a) a non-resident period is succeeded by a resident period, and*
>
> *(b) the trust gains for the last year of the non-resident period are not (or not wholly) treated as chargeable gains accruing in that year to beneficiaries,*
>
> *then, subject to subsection (3) below, those trust gains (or the outstanding part of them) shall be treated as chargeable gains accruing in the first year of the resident period to beneficiaries of the settlement who receive capital payments from the trustees in that year; and so on for the second and subsequent years until the amount treated as accruing to beneficiaries is equal to the amount of the trust gains for the last year of the non-resident period.*

Para 123 sch 7 FA 2008 provides:

> Section 89(2) of TCGA 1992 as substituted applies to a settlement for the tax year 2008-09 (and subsequent tax years) if s.89(2) of that Act as originally enacted would (but for the amendments made by this Schedule) have applied to the settlement for the tax year 2008-09.

61.47 2008 rebasing election

61.47.1 *Need for rebasing election*

Para 126 sch 7 FA 2008 provides a relief which I call **"2008 rebasing relief".** This is one of several rebasing reliefs.[211]

Para 126 sch 7 FA 2008 provides:

> (1) The following provisions apply to a settlement if—
>
> (a) s.87 applies to the settlement for the tax year 2008-09, and
>
> (b) the trustees of the settlement have made an election under this subparagraph. ...
>
> (5) An election under sub-para (1) is irrevocable.

EN FB 2008 provides:

> 63. The provisions of para [126] are subject to an election rather than being mandatory because:

[211] See 56.16.1 (Rebasing reliefs).

> [1] depending on the assets comprised in the settlement as at 6 April 2008 it may not be advantageous for the paragraph to apply; and
>
> [2] the trustees will be required to provide additional information to HMRC about trust assets. Trustees of non-resident settlements have been assured in a letter from the Acting Chairman of HMRC, Dave Hartnett, dated 12 February 2008 that in applying the provisions set out in this Schedule, HMRC will not require any additional disclosure.[212]

As far as [1] is concerned, it can never be disadvantageous for para 126 to apply (the election cannot in any circumstances increase the tax liability). The s.87 guidance note provides:

> 79. The election ... cannot increase the tax payable by a beneficiary. Whether it improves the position of the beneficiary depends on the history of the assets disposed of.

Subject to point [2] (confidentiality) an election should be made in every case where it might be useful, which is generally the case where there are or might be UK resident foreign domiciled beneficiaries. I understand however that an election in relation to a trust unknown to HMRC will generally lead to enquiries.

61.47.2 *Election: Requirements*

The s.87 guidance note provides:

> 82. The election can be made only if the settlement was non-UK resident throughout 2008-09.

This follows from para 126(1)(a). The guidance note continues:

> Paragraph 126(1) requires that the election be made by the trustees of the settlement. It must be made by all the trustees or by a majority of them if they are permitted to act through a majority. It cannot be made by a beneficiary. If the beneficiary's Self Assessment tax return is taken up for enquiry an election may require additional disclosure to HMRC about assets held by the trustees in order to agree the valuation.

Para 126(6) sch 7 FA 2008 provides:

> An election under that sub-paragraph must be made in the way and form

[212] *http://webarchive.nationalarchives.gov.uk/20080305134412/http:/www.hmrc.gov.uk/news/residence-domicile.pdf*

> specified by the Commissioners for HMRC.

The s.87 guidance note provides:

> 89. ... HMRC have provided a form RBE1 to satisfy this requirement and all elections must be made on that form. The form asks for the name of the settlement and the date it was created. The date is used to distinguish between settlements with similar names in particular those created by settlors with a prevalent surname. The form also asks the trustees to identify if and when a trigger event has occurred. The RBE1 can be downloaded from the HMRC website[213]....
> 90. Some trustees may have made the election by writing to CAR Residency before the form was available. That election remains valid and there is no need to make a further election on the form.

61.47.3 *Election: Time limit*

Para 126(2) sch 7 FA 2008 provides:

> An election under sub-para (1) may only be made on or before the first 31 January to occur after the end of the first tax year (beginning with the tax year 2008-09) in which an event within either of the following paragraphs occurs—
> (a) a capital payment is received (or treated as received) by a beneficiary of the settlement,[214] and the beneficiary is resident in the UK in the tax year in which it is received, and
> (b) the trustees transfer all or part of the settled property to the trustees of another settlement, and s.90 of TCGA 1992 applies in relation to the transfer.

The time limit is crucial. The s.87 guidance note provides:

> 83. The relief is given only to individuals, paragraph 126(7), but the time limit is triggered if a capital payment is received by any UK resident

[213] *https://www.gov.uk/government/publications/non-resident-capital-gains-tax-rebasing-election-assets-held-in-non-uk-resident-settlement-at-5-april-2008-rbe1*

[214] Para 126 expands on this in sch 4C cases:
"(3) For a tax year as respects which the settlement has a Schedule 4C pool, the reference in sub-para (2)(a) above to a capital payment received (or treated as received) by a beneficiary of the settlement is to be read as a capital payment received (or treated as received) by a beneficiary of a relevant settlement from the trustees of a relevant settlement.
(4) Para 8A of that Schedule (relevant settlements) applies for the purposes of sub-para (3) above."

> beneficiary.

"Capital payment" is not defined in sch 7. The standard definition, in s.97 TCGA, is only "for the purposes of s.86A to 97 (and sch 4C)". Strictly that definition does not apply for the purposes of sch 7. It is considered however that the context shows that the usual definition is intended to apply, notwithstanding the absent-minded omission of a provision to that effect. If that is right, a benefit within s.731 is not a capital payment so does not trigger the deadline for an election. It is well arguable that a benefit within the scope of OIG s.87 (which is chargeable to income tax) is not a "capital payment" for the purposes of para 126,[215] but it would be best not to rely on that point and to make the election in good time.

The s.87 guidance note provides:

> 87. An election may be made before a triggering event happens.

This is important as it is convenient and (in cases of offshore income gains, may be necessary) to make the election before there is any capital payment. The s.87 guidance note continues:

> There is no requirement that the beneficiary receiving the payment was a beneficiary of the settlement as at 6 April 2008. The recipient may become a beneficiary at some later time. The time limit in paragraph 126(2) of Schedule 7 runs from the time the trustees first make a capital payment to a UK resident beneficiary. If the trustees make such a payment and do not make the election they may be out of time for making the election if they make a payment to a UK-resident but non-domiciled beneficiary at a later time. The election can be made even if there are no non-UK domiciled beneficiaries when the payment is made.
> 88. Any election made late will be considered in accordance with the guidance in paragraph 13801 onwards in HMRC's Capital Gains Tax Manual [*recte* Capital Gains Manual].[216]

61.48 2008 Rebasing: The relief

Assuming an election has been made, we can move on to consider the relief.

The s.87 guidance note provides:

> 80. The election is commonly known as a "rebasing" election ... But it is not rebasing as that term applies to section 35 TCGA and assets held at

[215] See 67.13.3 ("Capital payment").

[216] The reference is now CG13810.

> 31 March 1982. There is no across the board revaluation of the assets in the trust fund as at 6 April 2008.

Para 126(7) sch 7 FA 2008 provides:

> Sub-para (8) applies if—
> (a) by virtue of the matching of
> [i] a capital payment with
> [ii] the s.2(2) amount for the settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year"),
> chargeable gains are treated under s.87 or 89(2) of, or para 8 Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and
> (b) the individual is resident, but not domiciled,[217] in the UK in that year.

That is, in short, the relief applies if s.87 gains accrue to a foreign domiciliary. If that condition is satisfied, we turn to the relief in para 126(8):

> The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

EN FB 2008 provides:

> 64. It should be noted that para [126] does not affect the computation of the s.2(2) amount under s.87 for a year. It simply provides a mechanism for identifying an amount of the chargeable gain treated as accruing to a non-UK domiciled beneficiary that is not chargeable to tax because an element of the underlying s.2(2) amounts are attributable to the period before 6 April 2008, when non-UK domiciled beneficiaries were not chargeable to tax in respect of chargeable gains attributed to them under s.87.

But that generally comes to the same thing.

> 65. Para [126] applies to all non-UK domiciled beneficiaries of a settlement, the trustees of which have made a valid election. The non-UK domiciled beneficiary does not need to be a remittance basis user. Only once the provisions of para [126] have been applied is it necessary to see whether the amount of tax that is left in charge is chargeable on the arising basis, in the year in which the gains are treated as having accrued to the beneficiary, or on the remittance basis where one of s.809B, [809D

[217] See 61.53 (Formerly-domiciled resident).

> or 809E] applies.
> 66. ... Although there is only one s.87 pool for each tax year, where an election has been made under para [126](1) trustees will need to keep track of the separate elements of gains attributed to the period before and after 6 April 2008 within the pool.
> 67. There are no special rules to deal with assets where the market value as at 6 April 2008 was either higher or lower than both the cost of acquisition of the asset and the disposal proceeds....
> 81. The election has no effect on the matching of capital payments to section 2(2) amounts or the reduction of capital payments and section 2(2) amounts. It has no effect on gains accruing to UK domiciled beneficiaries.

61.48.1 *"Relevant proportion"*

Para 126(9) sch 7 FA 2008 provides:

> The relevant proportion is A ÷ B where—
> A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and
> B is the s.2(2) amount for the settlement for the relevant tax year.

In short, rebasing relief applies to relevant assets;
A = gain after rebasing
B = the historic gain (gain without rebasing)

61.48.2 *"Relevant asset"*

Para 126(10) sch 7 FA 2008 provides:

> For the purposes of sub-para (9) an asset is a "relevant asset" if—
> (a) by reason of the asset, a chargeable gain or allowable loss accrues to the trustees in the relevant tax year,[218] and
> (b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

The s.87 guidance note provides:

> 79. ... It is not possible to make the election only in respect of assets which have increased in value since 6 April 2008...

[218] The relevant tax year is the year that the trust gain (s.1(3) amount) accrues to the trustees.

> 97. You consider only the assets whose disposal gave rise to the section 2(2) amount. Any assets held at 6 April 2008 which are not disposed of are not included in the comparison. This means that assets held at 6 April 2008 need be valued only when they are disposed of.

61.48.3 *Asset in underlying company*

Para 126(11) extends rebasing relief to assets held by companies held by trusts:

> For those purposes, an asset is also a "relevant asset" if—
> (a) by reason of the asset, chargeable gains are treated under s.13[219] of TCGA 1992 as accruing to the trustees in the relevant tax year,
> (b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains, and
> (c) had the company disposed of the asset at any time in the relevant period,[220] part[221] of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to the trustees.

Para 11(a)(b) are the equivalent of para 10(a)(b) for directly held trust assets. Para (c) is new. A company's asset is not a relevant asset if a loss accrues on the disposal. But a trust asset can be a relevant asset even if a loss accrues on the disposal. It follows that one can envisage cases where the fraction A/B is greater than 1 (because an asset which gives rise to a loss on an actual disposal may be such that a gain would arise if the asset had been disposed of on 6/4/2008). However it does not matter if this is so. The relief is that:

> The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

So if the relevant proportion is greater than 1, no relief applies but the tax charge is not increased.

[219] Now s.3 TCGA.

[220] Para 126(12) provides: "In sub-para (11)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains."

[221] The context shows that this must mean: *all or* part.

61.49 2008 rebasing: HMRC examples

EN FB 2008 provides some examples. Example 1 is relatively straightforward:

> 68. *Example 1: basic mechanism of para [126(8)(9)]*:
> The trustees of a settlement make an election under para [126](1).
> In 2009-10 the trustees dispose of a property for £10 million. The chargeable gain accruing to the trustees is £8 million.
> The chargeable gain that would have accrued to the trustees if the gain had been computed using the market value of the property as at 6 April 2008 as the cost of acquisition is £1 million.
> The trustees make a capital payment to beneficiaries X and Y of £4 million each. X and Y are both resident in the UK but X is also domiciled in the UK whereas Y is not.
> There are no unmatched capital payments or trust gains relating to earlier years.

It is easier to follow in a table:

Gains		**A**	**B**	**A/B**	**Capital payment**	
Pre-08	*Post-08*				*to X*	*to Y (nondom)*
£7m	£1m	£1m	£8m	1/8	£4m	£4m

The HMRC analysis is as follows:

> a. Match the capital payments to the s.2(2) amount for the year. Capital payments total £8 million and match to the s.2(2) amount of £8 million. Chargeable gains of £4 million are treated as accruing to X and Y for 2009-10.
> X is chargeable to CGT in 2009-10 under s.87 on the gains of £4 million. Y is non-UK domiciled so para [126](1) applies to determine how much of the chargeable gains of £4 million is chargeable to tax.
> b. The s.2(2) amount for 2009-10 is £8 million ("B" in para [126(9)].
> c. The s.2(2) amount that would have applied if the trustees had sold the property and reacquired it immediately before 6 April 2008 is £1 million ("A" in para [126(9)].
> d. A/B is ⅛.
> e. Apply A/B to the chargeable gains of £4 million accruing to Y: the amount of the gains that is chargeable to tax under para [126(8)] is
> £4 million/8, i.e. Y is chargeable to CGT on £500,000.
> If Y is a remittance basis user there will be no charge to tax until Y remits gain to the UK.
> There are no surplus capital payments or trust gains for 2009-10.

Example 2 is more challenging.

> 69. *Example 2: matching capital payments across years and s.13 gains*
> The trustees of a settlement make an election under para [126](1)].
> The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK.
> There are no unmatched trust gains or capital payments relating to earlier years.
> In 2010-11 the trustees dispose of two assets:
> a. the chargeable gains are £8 million: the pre 6 April 2008 gains are £7 million and the post 5 April 2008 gains are £1 million;
> b. the overall loss is £5 million: the pre 6 April 2008 gain is £1 million and the post 5 April 2008 loss is £6 million.
> A capital payment of £5 million is made to beneficiary Y.
> In 2011-12 the trustees dispose of an asset. The chargeable gain is £5 million: the pre 6 April 2008 gain is £4 million and the post 5 April 2008 gain is £1 million.
> Capital payments are made to beneficiaries X and Y of £2 million each.
> In 2012-13 an underlying company within s.13 wholly owned by the trustees disposes of an asset.[222] The loss on the asset is £2 million.[223] But substituting the market value as at 6 April 2008 creates a post 5 April gain of £1 million. The trustees also dispose of an asset. The chargeable gain is £3 million: the pre 6 April 2008 gain is £2 million and the post 5 April 2008 gain is £1 million.
> Capital payments are made to beneficiaries X and Y of £2 million each.

The EN sets out a table to summarise these facts which for ease of reference I set out here slightly expanded. It is easier to follow the example with the fuller spreadsheet available online.[224]

	Gain (loss)		**A**	**B**	**A/B**	**Capital payment**	
	Pre-08	*Post-08*				**to X**	**to Y**
2010-11	£8m	(£5m)	£0	£3m	0	-	£5m
2011-12	£4m	£1m	£1m	£5m	⅕	£2m	£2m
2012-13	£2m	£2m	£2m(?)	£3m	⅔(?)	£2m	£2m

[222] The example confusingly adds that the disposal is for £5m. But that is irrelevant, as what matters for tax is the gain or loss on the disposal, not the amount of the sale proceeds.

[223] Author's footnote: This loss is not allowable; careful planning might have avoided that result.

[224] *http://www.kessler.co.uk/wp-content/uploads/2012/05/TFD_rebasing_computation.pdf* (not set out here because it requires an A4 sheet to fit in all the data).

The HMRC analysis is as follows:

2010-11

The s.2(2) amount is £3 million. Match capital payment of £5 million against trust gains of £3 million: chargeable gains of £3 million treated as accruing to Y. But Y is not UK domiciled so para [126] applies.

Only £3 million×(A÷B) of the matched capital payment is chargeable to tax. However, the s.2(2) amount based on the market value of the assets as at 6 April 2008 is £0. Therefore A÷B is zero and none of the chargeable gains treated as accruing to Y is chargeable to tax.

2010-11: £2 million unmatched capital payments to Y.

2011-12

The s.2(2) amount is £5 million. Match capital payments of £4 million in the year against trust gains of £5 million; chargeable gains of £2 million treated as accruing to each of X and Y.

There are £1 million trust gains of 2011-12 unmatched. Step 5 of s.87A(2) applies.

Match 2011-12 £1 million trust gains to unmatched capital payments of £2 million to Y of 2010-11.

Chargeable gains of £1 million treated as accruing to Y. Unmatched capital payment to Y of 2010-11 reduced to £1 million.

X is chargeable to tax on £2 million in respect of 2012-13.

Y has chargeable gains of £3 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)]£3 million×(A÷B) of the matched capital payment is chargeable to tax.

A÷B is 1/5 so £600,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.

£1 million unmatched capital payments to Y originating from 2010-11 to carry forward.

2012-13

The s.2(2) amount is £3 million. The disposal of the asset by the underlying company does not form part of the s.2(2) amount because only s.13 gains are brought into s.87. However, by applying the market values to the assets as at 6 April 2008 there is a gain attributable to the disposal of the asset by the company.

Match the capital payments of £4 million to the s.2(2) amount. Chargeable gains are treated as accruing to X and Y of £1.5 million each under part (b) of Step 3 of s.87A(2).

X is chargeable to tax on £1.5 million in respect of 2012-13.

Y has chargeable gains of £1.5 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)], £1.5 million×(A÷B) of the matched capital payment is chargeable to tax. A÷B is ⅔ so £1 million of the chargeable gains treated as accruing to Y in 2012-13 are taxable. While the kink in the value of the company's asset has increased the proportion of gains on which Y is chargeable to tax, Y is still better off than if no election had been made.

This assumes that the company's asset is a "relevant asset". However it is not a relevant asset, as it is not the case that "by reason of the asset, chargeable gains are treated under s.13 TCGA as accruing to the trustees in the relevant tax year." The correct figure for A/B is ⅓ and not ⅔ and the taxable gain after rebasing relief is £0.5m and not £1m.

> There are £1.5m unmatched capital payments to Y to carry forward - £1m from 2010-11 and £0.5m from 2012-13.
> There are £0.5m unmatched capital payments to X to carry forward all originating from 2012-13.
>
> 70. *Example 3: keeping track of pre 6 April and post 5 April gains and losses.*
> The trustees of a settlement make an election under para [126](1). The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK. There are no unmatched trust gains or capital payments relating to earlier years.
> In 2010-11 the trustees dispose of an asset. The chargeable gain is £8 million: the pre 6 April gain is £7 million and the post 5 April 2008 gain is £1 million.
> A capital payment of £2 million is made to each of beneficiaries X and Y.
> In 2011-12 the trustees make a further capital payment to X and Y of £2 million each.

The example is easier to follow if the facts are set out in a table:

	Gain	**Gain**	**A**	**B**	**A/B**	**Capital payment**	
	Pre 6/4/08	*Post 5/4/08*				**to X**	**to Y**
2010-11	£7m	£1m	£1m	£8m	⅛	£2m	£2m
2011-12	0	0	n/r	£5m	n/r	£2m	£2m

The HMRC analysis is as follows:

> ***2010-11***
> The s.2(2) amount is £8 million.
> Match capital payments of £4 million in the year against trust gains of £8 million: chargeable gains of £2 million treated as accruing to each of X and Y. X is chargeable to tax on £2 million in respect of 2010-11.
> Y has chargeable gains of £2 million in respect of 2010-11. But Y is not UK domiciled so para [126] applies.
> Under para [126(8)(9)] £2 million×(A÷B) of the matched capital payment is chargeable to tax.
> A÷B is ⅛ so £250,000 of the chargeable gains treated as accruing to Y in 2010-11 are taxable.
> The reduced s.2(2) amount for 2010-11 for the purposes of matching with future capital payments is £4m.
>
> ***2011-12***
> There is no s.2(2) amount for the year. Apply s.87A matching rules to earlier year.
> Match capital payments of £4 million in 2011-12 to s.2(2) amount (as reduced)

for 2010-11 of £4m:
chargeable gains of £2 million treated as accruing to each of X and Y.
X is chargeable to tax on £2m in respect of 2011-12.
Y has chargeable gains of £2 million in respect of 2011-12. But Y is not UK domiciled so para [126] applies.
Under para [126(7)(8)] £2 million×(A÷B) of the matched capital payment is chargeable to tax.
A÷B is 0.5/4 so £250,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.
The table below shows how the s.2(2) amount for the year and the underlying gains (or losses) relating to the period before and after 6 April 2008 are matched.

2010-11 matching of capital payments	**Pre 6 April gain/loss**	**Post 5 April gain/loss**	**Total trust gains (s.2(2) amount)**
2010-2011	£7m	£1m	£8m
Less matched to capital payment in 2010-11	£3.5m	£500,000	£4m
Unmatched in 2010-11	£3.5m	£500,000	£4m
Less matched to capital payments in 2011-12	£3.5m	£500,000	£4m
Unmatched in 2011-12	£0	£0	£0

The s.87 guidance note provides:

Example 22: Rebasing: basic operation: para 126 Sch 7
Settlement X is a non-UK resident settlement created in September 2000. The trust fund consists of a number of quoted investments. Some of these have been held since September 2000. Others have been acquired since 6 April 2008. The settlement has two UK resident beneficiaries. A is domiciled in the UK. B is not domiciled in the UK.
As at 6 April 2008 there are no unmatched capital payments and section 2(2) amounts.
2008-09
In 2008-09 a section 2(2) amount of £180,000 accrues to the trustees and capital payments of £50,000 are made to A and B. The capital payments are matched to the section 2(2) amount as shown below.

	2008-09	**Matched**	c/f
Section 2(2) amount	£180,000	£100,000	£80,000
Capital payments A	£50,000	£50,000	nil
Capital payments B	£50,000	£50,000	nil

A chargeable gain of £50,000 accrues to each beneficiary. Beneficiary A is liable to CGT on the full amount of £50,000. The trustees make a valid election under paragraph 126(1) of Schedule 7 before 31 January 2010. The effect of the election is to reduce the gains chargeable on beneficiary B in accordance with paragraph 126(8) of Schedule 7.
You calculate the section 2(2) amount that the trustees would have made if the gain were calculated by reference to the 6 April 2008 value of assets held at that date and included in the disposal.

	Held 6/4/08	**Acquired after 6/4/08**	**Total**
Disposal Proceeds	£180,000	£170,000	£350,000
Acquisition cost	– £10,000	– £160,000	– £170,000
Gain	£170,000	£10,000	£180,000

Disposal Proceeds	£180,000
6/4/08 value	– £165,000
Gain	£15,000

Relevant proportion of s87 gain £50,000 =

$$£50,000 \times \frac{15,000 + 10,000}{180,000} = £6944$$

Beneficiary B is liable to CGT on £6944 of the £50,000 capital payment. If beneficiary B is a remittance basis user the gain will be taxed only when the gain is remitted to the UK.

2009-10

The trustees dispose of assets creating a £20,000 section 2(2) amount. They make capital payments of £15,000 to each beneficiary. £10,000 of each capital payment is matched to the 2009-10 section 2(2) amount. Section 87 gains of £10,000 accrue to each beneficiary in respect of the 2009-10 section 2(2) amount. The £5,000 balance of each capital payment is matched to the £80,000 2008-09 section 2(2) amount. Section 87 gains of £5,000 accrue to each beneficiary in respect of the 2008-09 section 2(2) amount giving total chargeable gains of £15,000 for 2009-10 for each beneficiary. The capital payments for that year are reduced to nil. The section 2(2) amount for 2008-09 is reduced to £70,000.

	Amount/payment	**Matched**	**Year**	**c/f**
2009-10 s.2(2) amount	£20,000	£20,000	2009-10	Nil
Capital payments A	£15,000	£10,000	2009-10	Nil
		£5,000	2008-09	
Capital payments B	£15,000	£10,000	2009-10	Nil
		£5,000	2008-09	
2008-09 s.2(2) amount	£80,000	£10,000	2009-10	£70,000

Beneficiary A will be liable to CGT on the full £15,000 section 87 gain. Beneficiary B's liability will be reduced in accordance with paragraph 126(8) of Schedule 7. This has to be calculated separately for the £10,000 payment matched to the 2009-10 amount and the £5,000 payment matched to the 2008-09 amount. For 2009-10 the figures are:

	Held 6/4/08	**Acquired after 6/4/08**	**Total**
Disposal proceeds	£70,000	£100,000	£170,000
Acquisition cost	–£65,000	– £85,000	– £150,000
Gain	£5,000	£15,000	£20,000

Disposal proceeds	£70,000
6/4/08 value	£80,000
Loss	(£5,000)

The section 2(2) amount calculated using 6 April 2008 values is £10,000 ie

£15,000 – £5,000. The relevant proportion of the £10,000 section 87 gain is:

$$\pounds 10{,}000 \times \frac{10{,}000}{20{,}000} = \pounds 5{,}000$$

The CGT liability on the £5,000 section 87 gain relating to the 2008-09 section 2(2) amount is limited to:

$$\pounds 5{,}000 \times \frac{25{,}000}{180{,}000} = \pounds 694$$

B's total liability to CGT in 2009-10 is on gains of £5,694 (£5,000 + £694). If beneficiary B is a remittance basis user the gain will be taxed only when the gain is remitted to the UK.

Example 23: Rebasing: relevant proportion is 0: para 126 Sch 7
The facts are the same as that in example 22 year 2009-10 except for the 6 April 2008 value of the assets sold. This is £120,000.
The calculation is now:

	Held 6/4/08	**Acquired after 6/4/08**	**Total**
Gain	**£5,000**	**£15,000**	**£20,000**
Disposal proceeds	£70,000		
6/4/08 value	– £120,000		
Loss	£50,000		

The section 2(2) amount calculated using 6 April 2008 values is £15,000 – £50,000. This is restricted to 0 as a section 2(2) amount cannot be negative. Beneficiary B is not liable to CGT on any of the £10,000 2009-10 gain ie £10,000 × 0 = 0. B remains liable to CGT on the section 87 gain matched to the 2008-09 section 2(2) amount. As in example 22 this is £694.
B's capital payments for 2009-10 are still reduced to nil.

61.50 2008 rebasing: Minor rules

61.50.1 *Asset derived from asset*

Para 126(13) sch 7 FA 2008 extends the relief where one asset is derived from another asset without a disposal, ie a case where s.43 applies.[225] This will not be very common. Para 126(13) provides:

> If—
> (a) by reason of an asset which would not otherwise be a relevant asset ("the new asset"), chargeable gains or allowable losses accrue, or are treated under s.13 as accruing, to the trustees in the relevant tax year,
> (b) the value of the new asset derives wholly or in part from another asset ("the original asset"), and
> (c) s.43 of TCGA 1992 applies in relation to the calculation of the

[225] See 56.4.10 (Asset derived from asset).

chargeable gains or allowable losses,

the new asset (or part of that asset) is a "relevant asset" if the condition in sub-para (10)(b) or the conditions in sub-para (11)(b) and (c) would be met were the references there to the asset to be read as references to the new asset or the original asset.

61.50.2 *Inter-group transfer*

Para 126(14)(15) sch 7 FA 2008 extends rebasing relief where there is an inter-group transfer:

> (14) If—
>
> (a) on or after 6 April 2008, a company ("company A") disposes of an asset to another company ("company B"), and
>
> (b) s.171 of TCGA (transfers within groups) (as applied by s.14(2) of that Act) applies in relation to the disposal,
>
> for the purposes of sub-para (11) (and this sub-paragraph) treat company B as having owned the asset throughout the period when company A owned it.
>
> (15) If an asset is a relevant asset by virtue of sub-para (14), for the purposes of sub-para (9)—
>
> (a) treat the chargeable gains as having accrued to the company which owned the asset at the beginning of 6 April 2008, and
>
> (b) treat the proportion of those chargeable gains attributable under s.13 of TCGA 1992 to the trustees as being the proportion of the chargeable gains actually accruing that are so attributable.

Para 126(16) to (18) deals with the situation where an asset is held by a company, and the trustees have held different interests in the company at different times:

> (16) If—
>
> (a) an asset would otherwise be a "relevant asset" within sub-para (11), and
>
> (b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset ("the relevant proportion") is greater than the minimum proportion,
>
> for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.
>
> (17) "The minimum proportion" is the smallest proportion of chargeable gains (if any) that would have been attributable to the trustees on a disposal of the asset at any time in the relevant period (as defined by sub-para (12)).

> (18) "The appropriate proportion" is the minimum proportion divided by the relevant proportion.

This does not work. Suppose for example a trust held 50% of the shares in a non resident company, T Ltd before 2008, and later acquired all the shares. T Ltd realises a gain of £100 on an asset (the company's asset) held before 2008. The gain is deemed to accrue to the trust under s.13.
The terms of subpara 16 are met:

> (a) the company's asset would otherwise be a "relevant asset" within sub-para (11), and
> (b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset ("the relevant proportion" - 100%) is greater than the minimum proportion (which under the definition in 126(17) is 50%.

So subpara 16 directs:

> for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.

We need to ascertain the appropriate proportion. That is one half divided by the relevant proportion. So we need to know the relevant proportion. That is:

> A÷B where—
> A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and
> B is the s.2(2) amount for the settlement for the relevant tax year.

B is £100. In order to work out A we need to know what is the relevant asset, but we do not know what is a relevant asset until we have applied subpara 16. Presumably we are to ignore the subpara 16 reduction, in which case the company asset is the relevant asset. Assume that the company asset was worth £50 on 6 April 2008, so the relevant proportion is one half. Then the appropriate proportion is one-half divided by one-half, = one. I suspect that the drafter has confused "divided" with "multiplied". What a shambles! Fortunately the problem may not often arise.

61.51 2008 rebasing: OIG amounts

Para 101 sch 7 FA 2008 provides equivalent rebasing relief for OIGs:

> (1) This paragraph applies if—
>
> (a) the trustees of a settlement have made an election under paragraph 126(1) (re-basing election),
>
> (b) income is treated under regulation 17 of the Offshore Funds (Tax) Regulations 2009 as arising to an individual in the tax year 2008–09 or any subsequent tax year ("the relevant tax year") by reason of the matching, under section 87A of TCGA 1992 as applied by regulation 20 of those Regulations, of an OIG amount with a capital payment received by the individual from the trustees, and
>
> (c) the individual is resident or ordinarily resident, but not domiciled,[226] in the UK in the relevant tax year.
>
> (2) The individual is not charged to income tax on so much of the income as exceeds the relevant proportion of that income.
>
> (3) Sub-paragraphs (9) to (18) of paragraph 126 (meaning of "the relevant proportion") apply for the purposes of sub-paragraph (2) above as if—
>
> (a) references to section 2(2) amounts were to OIG amounts,
>
> (b) references to chargeable gains were to offshore income gains,
>
> (c) references to allowable losses were omitted, and
>
> (d) references to anything accruing were to it arising (and similar references were read accordingly).

Amended as para 101(3) requires, para 126(9) to (12) provide:

> (9) The relevant proportion is A÷B where—
>
> A is what would be the ~~section 2(2) amount~~ OIG amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and
>
> B is the ~~section 2(2) amount~~ OIG amount for the settlement for the relevant tax year.
>
> (10) For the purposes of sub-paragraph (9) an asset is a "relevant asset" if—
>
> (a) by reason of the asset, ~~a chargeable gain or allowable loss accrues~~ an offshore income gain arises to the trustees in the

[226] See 61.53 (Formerly-domiciled resident).

relevant tax year, and

(b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

(11) For those purposes, an asset is also a "relevant asset" if—

(a) by reason of the asset, ~~chargeable gains~~ offshore income gains are treated under section 13[227] of TCGA 1992 as ~~accruing~~ arising to the trustees in the relevant tax year,

(b) the company to whom the ~~chargeable gains~~ offshore income gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those ~~chargeable gains~~ offshore income gains, and

(c) had the company disposed of the asset at any time in the relevant period, part of the ~~chargeable gains~~ offshore income gains (if any) accruing on the disposal would have been treated under section 13 of TCGA 1992 as ~~accruing~~ arising to the trustees.

(12) In sub-paragraph (11)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the ~~chargeable gains~~ offshore income gains.

(It is not necessary to set out the rest of para 126, as amended).

61.52 Rebasing: Transfer between trusts

Para 127(1) schedule 7 FA 2008 provides:

This paragraph applies if—

(a) in the tax year 2008-09 or any subsequent tax year, the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement"),

(b) s.90 of TCGA 1992 applies in relation to the transfer,

(c) the trustees of the transferor settlement have made an election under para 126(1),

(d) by virtue of the matching of a capital payment with the s.2(2) amount for the transferee settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year"), chargeable gains are treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and

(e) the individual is resident, but not domiciled,[228] in the UK in that

[227] Now s.3 TCGA.

[228] See 61.53 (Formerly-domiciled resident).

year.

61.52.1 *Election to rebase*

Para 127(2) sch 7 FA 2008 provides:

> If the trustees of the transferee settlement have made an election under para 126(1), para 126(7) to (9) have effect in relation to the transferee settlement for that year as if the reference in para 126(9) to relevant assets included relevant assets within the meaning of this paragraph.

61.52.2 *No election to rebase*

Para 127 sch 7 FA 2008 provides:

> (3) If the trustees of the transferee settlement have not made an election under para 126(1), the individual is not charged to capital gains tax on so much of the chargeable gains mentioned in sub-para (1)(d) above as exceeds the relevant proportion of those gains.
>
> (4) The relevant proportion is A ÷ B where—
>
> A is what would be the s.2(2) amount for the transferee settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the company concerned and immediately re-acquired by it at the market value at that time, and
>
> B is the s.2(2) amount for the transferee settlement for the relevant tax year.
>
> (5) For the purposes of this paragraph an asset is a "relevant asset" if—
>
> (a) by reason of the asset, chargeable gains are treated under s.13 of TCGA 1992 as accruing to the trustees of the transferee settlement in the relevant tax year,
>
> (b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains,
>
> (c) had the company disposed of the asset at any time in the relevant period, part of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to—
>
> (i) the trustees of the transferor settlement (if the disposal had been made before the transfer), or
>
> (ii) the trustees of the transferee settlement (if it had not).
>
> (6) In sub-para (5)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains.
>
> (7) Sub-paras (13) to (18) of para 126 apply for the purposes of this paragraph (with such modifications as are necessary) as they apply for the

purposes of that paragraph.

January 2009 Qs & As provides:

> **Q7** In applying the allocation rules to transfers between settlements, the transferor trust gains carried across will be treated as having accrued to the transferee trust in the year in which they in fact accrued to the transferor trust. Those gains that have been matched with capital payments out of transferor trust in the year of transfer or previous years will be left out of account. Gains carried across will be allocated to a capital payment from the transferee trust on a 'last in first out' (LIFO) basis. Gains on such assets will be governed by whether or not the transferor trust has made a rebasing election under paragraph 126 sch 7 FA 2008.
>
> If the transferor settlement has made a rebasing election by the time of the transfer of the transferee settlement, then pre and post April 2008 gains which are deemed to have accrued on the actual disposal of an asset go across *pro rata*.
>
> If the transferor settlement has not made a rebasing election by the 31 January following the year of the transfer, then even if no capital payment has yet been made, the right to rebase is lost in relation to the transferred assets and any assets retained in the transferor trust.
>
> However, it should be noted that any transfers between settlements made prior to 6 April 2008 will not trigger a time limit on rebasing and any assets moving over to the transferee settlement as a result of a transfer made prior to 6 April 2008 will not be affected by any subsequent election for rebasing made by the transferor trust. If the asset appointed over to the transferee settlement before 6 April 2008 includes shares in a company within s.13 TCGA 1992, then the transferee settlement may wish to elect for rebasing in its own right. An election made by the transferee settlement may cover gains made by such a company – see para 127 Sch 7 FA 2008. Transferee settlements which receive property on or after 6 April 2008 cannot elect for rebasing in relation to the transferred assets – the decision is solely that of the transferor settlement.

The s.87 guidance note provides:

> **Rebasing and transfers between settlements**
>
> 110. A rebasing election made by the transferor settlement can cover gains made by that settlement after 5 April 2008 even if they are not brought into charge until they are matched with capital payments made by the transferee settlement. Transferee settlements receiving property on or after 6 April 2008 cannot elect for rebasing in relation to the transferred assets – the decision is solely that of the transferor settlement. See example 26.

111. An election made by the transferee settlement can cover gains made by that settlement after 5 April 2008 including those on assets received, prior to 6 April 2008, from another settlement.

Example 26 Effect of 'rebasing election' made by transferor settlement on gains made by transferor settlement treated as accruing when matched with capital payments made by transferee settlement: para 126 Sch 7

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2009-10. No capital payments have been made out of the transferor settlement. The transferor settlement had no gains made by the trustees prior to the transfer.

Gains arise on the transfer of £100,000. These are on the disposal of an asset which had been held by the trustees since 2001. The post 5 April 2008 element of the gain is £15,000 based on the difference between the value at 6 April 2008 and the value at the time it is transferred.

The transferee settlement has no unmatched section 2(2) amounts of its own. Its only unmatched section 2(2) amount is the £100,000 for 2009-10 it is treated as receiving on the transfer.

In 2010-11 the transferee settlement makes a capital payment of £300,000 to a UK resident but non-UK domiciled beneficiary. Under section 87 £100,000 of the capital payment is matched with the section 2(2) amount and a £100,000 chargeable gain is treated as accruing to the beneficiary.

If a valid election under paragraph 126 Schedule 7 has been made by the trustees of the transferor settlement then only the post 5 April 2008 element of the gain (£15,000) is chargeable to tax on the beneficiary. And that is subject to the remittance basis if the beneficiary is a remittance basis user.

If no valid election has been made by the trustees of the transferor settlement then the full £100,000 is chargeable to tax on the beneficiary. Again this is subject to the remittance basis if the beneficiary is a remittance basis user.

An election made by the trustees of the transferee settlement has no effect on this gain.

Rebasing and transfers between settlements owning non-UK resident companies: para 127 Sch 7

The transfer of settled property between settlements does not result in a disposal of the assets held in the underlying non-UK resident company. Where the transfer takes place after 5 April 2008 a disposal may subsequently be made by the underlying company of assets it acquired prior to 6 April 2008. In such a case the rules in paragraph 126 do not apply to any gains made by the underlying company as it has not been part of the transferee settlement structure since 5 April 2008 – paragraph 126(11)(c)

There are special rules in paragraph 127 to give 'rebasing election' relief in such cases.

113. For any relief to be available the trustees of the transferor settlement must have made a 'rebasing election'. How any relief is calculated depends on whether, or not, the trustees of the transferee settlement have also made a 'rebasing election'.

114. If the trustees of the transferee settlement have made a rebasing election then the assets disposed of by the underlying company are treated in the same way as

any assets the transferee settlement has owned from before 6 April 2008 – paragraph 127(2).

115. If the trustees of the transferee settlement have not made a rebasing election then you have to calculate a fraction 'A/B' called the 'relevant proportion' where (A) is defined as the section 2(2) amount for the transferee settlement for the year a gain is treated as accruing to the non-UK domiciled beneficiary on the assumption the underlying company had sold and immediately re-acquired all its relevant assets at market value immediately before 6 April 2008, divided by (B) is defined as the actual section 2(2) amount for the transferee settlement for the relevant tax year

116. The non-UK domiciled beneficiary is not charged to tax on so much of the gains treated as accruing to him that exceeds the 'relevant proportion' of those gains – paragraph 127(3) & (4). See example 27.

Example 27 Effect of 'rebasing election' made by transferor settlement on gains made by underlying non-UK resident close company after company has been transferred to another settlement: Para 127 Sch 7

All the settled property of the transferor settlement is transferred to the transferee settlement for nil consideration in 2009-10. No capital payments have been made out of the transferor settlement. The transferor settlement had no gains made by the trustees prior to the transfer.

The transferor settlement's only assets at the time of transfer are shares in a wholly owned non-UK resident company which it has owned since 2001. A gain arises on the transfer of £100,000. The post 5 April 2008 element of the gain is £15,000 based on the difference between the value at 6 April 2008 and the value at the time it is transferred.

The underlying non-UK resident company continues to own an asset which it acquired in 2002. That asset is sold in 2011-12 and produces an overall gain of £150,000. The post 5 April 2008 element of the gain is £20,000 based on the difference between the value at 6 April 2008 and the value at the time of its disposal.

The transferee settlement has no unmatched section 2(2) amounts of its own. Its only unmatched section 2(2) amount is the £100,000 for 2009-10 it is treated as receiving on the transfer.

In 2011-12 the transferee settlement makes a capital payment of £250,000 to a UK resident but non-UK domiciled beneficiary. Under section 87 £150,000 of the capital payment is matched with the £150,000 gain made by the underlying non-UK resident company in 2011-12. A £150,000 chargeable gain is treated as accruing to the beneficiary in 2011-12.

Under section 87 a further £100,000 of the capital payment is matched with the section 2(2) amount for 2009-10 and a £100,000 chargeable gain is treated as accruing to the beneficiary in 2011-12.

If no valid election has been made by the trustees of the transferor settlement then the full amount of the gains (£150,000 and £100,000 respectively) are chargeable to tax on the beneficiary in 2011-12. This is subject to the remittance basis if the beneficiary is a remittance basis user. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

If a valid election under paragraph 126 of Schedule 7 has been made by the trustees of both settlements only the post 5 April 2008 element of both of the gains (£20,000 for the 2011-12 section 2(2) amount and £15,000 for the 2009-10 section 2(2) amount) are chargeable to tax on the beneficiary in 2011-12. This is subject to the remittance basis if the beneficiary is a remittance basis user. The time limit for making the election is 31 January 2011 for the transferor settlement and 31 January 2013 for the trustees of the transferee settlement. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

If a valid election has been made by the trustees of the transferor settlement but not the trustees of the transferee settlement the formula in paragraph 127(4) applies to determine the relevant proportion of the gain on which the beneficiary is taxed. Suppose the facts are the same as the example but there is further section 2(2) amount for 2011-12 when the trustees dispose of an asset they have held since before 6 April 2008. The gain on this asset is £80,000. £80,000 of the capital payment made in 2011-12 is matched against this section 2(2) amount. The total amount matched against the 2011-12 section 2(2) amount is £230,000 leaving only £20,000 to be matched against the 2009-10 section 2(2) amount.

A in the formula in paragraph 127(4) is the transferee settlement's section 2(2) amount for 2011-12 if all the relevant assets had been sold and reacquired at their value immediately before 6 April 2008. These are the assets in the underlying company. This part of the section 2(2) amount is £20,000 to which you have to add the £80,000.

B in paragraph 127(4) is the full section 2(2) amount of the transferee settlement for 2011-12 of £230,000 (£150,000 + £80,000).

The UK resident but non-UK domiciled beneficiary is charged on £230,000 × £100,000/£230,000 = £100,000 of the gains matched to the 2011-12 section 2(2) amount. The gain on the payments matched against the section 2(2) amount on the transfer in 2009-10 is covered by the paragraph 126 election made the trustees of the transferor settlement. The amount of that gain charged to CGT on the UK resident but non-UK domiciled beneficiary is limited to £3000 (£20,000 × 15,000/100,000). The total gains chargeable in 2011-12 are £103,000. This is subject to the remittance basis if the beneficiary is a remittance basis user. The tax due on the gain relating to the 2009-10 section 2(2) amount will be increased by section 91.

61.52.3 *Transfer between trusts: OIG*

Para 102 sch 7 FA 2008 provides equivalent rules for OIG amounts:

> (1) This paragraph applies if—
> (a) in the tax year 2008–09 or any subsequent tax year, the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement"),
> (b) section 90 of TCGA 1992 applies in relation to the transfer,
> (c) the trustees of the transferor settlement have made an election

under paragraph 126(1),

(d) by virtue of the matching (under section 87A of TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001)) of a capital payment with an OIG amount of the transferee settlement, income is treated under such regulations (regulation 17 of those Regulations [)] as arising to an individual in a tax year ("the relevant tax year"), and

(e) the individual is resident or ordinarily resident, but not domiciled,[229] in the UK in the relevant tax year.

(2) If paragraph 101 applies in relation to the transferee settlement, paragraph 126(9) as applied by paragraph 101(3) has effect as if the reference there to relevant assets included relevant assets within the meaning of paragraph 127(4) (as modified by sub-paragraph (4)(b) below).

(3) If paragraph 101 does not apply in relation to the transferee settlement, the individual is not charged to income tax on so much of the income mentioned in sub-paragraph (1)(d) above as exceeds the relevant proportion of that income.

(4) Sub-paragraphs (4) to (7) of paragraph 127 (meaning of "the relevant proportion") apply for the purposes of sub-paragraph (3) above as if—

(a) references section 2(2) amounts were to OIG amounts,

(b) references to chargeable gains were to offshore income gains, and

(c) references to anything accruing were to it arising.

61.53 UK dom/formerly-dom resident

The 2008 transitional reliefs cease to apply to a non-dom who acquires an actual UK domicile.

The reliefs continue to apply to those who become deemed domiciled under the 15-year rule, but para 172 sch 7 FA 2008 removes the reliefs for formerly-domiciled residents. Para 172(1) provides:

> Sub-paragraph (2) has effect for the purposes of—[230]

Sch 7 para	**Topic**	**See**
100(1)(b)	OIG	61.44.1
101(1)(c)	OIG	61.51
102(1)(e)	OIG amounts	61.52.3
118(3)(b)[231]	Pre-1998 gain/capital payment	61.41

[229] See 61.53 (Formerly-domiciled resident).

[230] For clarity I have set this out in tabular form rather than the layout of the statute.

[231] so far as having effect for purposes of para 118(1)(d).

124(1)(b)	Pre-2008 gain/cap payment, matched post 2008	61.44
126(7)(b)	2008 rebasing relief	61.47
127(1)(e)	Rebasing: Transfer between trusts	61.52
151(1)(b)	Payment received 12 Mar 08 - 5 Apr 08	-

Assuming one of these transitional reliefs is in point, we read on:

> (2) An individual not domiciled in the UK at a time in the tax year 2017-18, or a later tax year, is to be regarded as domiciled in the UK at that time if—
>
> (a) the individual was born in the UK,
>
> (b) the individual's domicile of origin was in the UK, and
>
> (c) the individual is resident in the UK for the tax year concerned.

61.54 Non-resident trust: CGT planning

When are non-resident trusts advantageous for CGT?

One situation is to maximise use of losses: losses of remittance basis taxpayers are generally unallowable,[232] but losses of non-resident trusts can be set against s.1(3) amounts (trust gains). However no-one *plans* to realise losses so that is not generally a planning point.

61.54.1 *s.87 basis v. arising basis*

For taxpayers who are not UK domiciled (or deemed domiciled), non-resident trusts are direct ownership for property within the scope of UK CGT, ie

(1) For a remittance basis taxpayer: UK situate property and land-rich assets are within the scope of CGT

(2) For a taxpayer who does not claim the remittance basis: all assets. So even where an individual is not so wealthy that it is worth paying the remittance basis charge, it may still be worthwhile setting up a non-resident trust.

Also trusts are worthwhile for a taxpayer in anticipation of becoming deemed domiciled.

The CGT advantage of the trust is that that gains are taxed on a s.87 capital payment basis and not on the arising basis. That is, if property is held by the settlor directly, gains would be chargeable on an arising basis; if the same property is held on a trust, the gains are taxable on a capital payments basis.

[232] See 65.16 (Loss of remittance basis taxpayer).

61.54.2 *s. 87 basis v. remittance basis*

Non-resident trusts may be better than absolute ownership of foreign situate property by remittance basis taxpayers, as they may avoid the application of the mixed fund rule.

Example 1 (trust better than absolute ownership)
Suppose a foreign situate asset is acquired for £1m, sold for £2m, giving a gain of £1m.

If the asset is held by a remittance basis taxpayer (T) who remits £1m, there is a CGT charge on £1m as the remitted sum is all gain. By contrast, suppose:

(1) the asset is held in a non-resident trust.
(2) the trust makes a capital payment of £1m to T offshore.
(3) in the following year, the trust makes a capital payment of £1m to T onshore.

The offshore payment has reduced the s.1(3) amount to nil, so the second payment is free of CGT.

However to take advantage of this requires careful timing of gains and payments that is often not practical. Often, the remittance basis will be better than the capital payments basis.

Example 2 (trust worse than absolute ownership)
Suppose 3 foreign situate assets are each acquired for £1m, sold for £2m, giving a gain of £1m each.

If the assets are held by a remittance basis taxpayer (T) who remits the £2m proceeds of one of the assets, there is a CGT charge on £1m only. (Assume the proceeds are not paid into a singe account, ie are not mixed.)

By contrast, suppose:

(1) the assets are held in a non-resident trust.
(2) the trust makes a capital payment of £2m in the UK.

There is then a CGT charge on £2m.

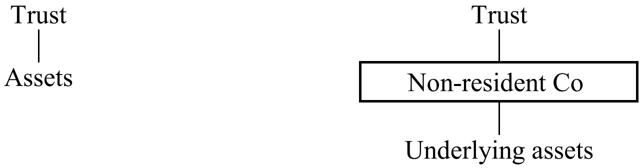
The solution may be to have three separate trusts, one for each asset.

61.54.3 *When non-resident trust not desirable*

Non-resident trusts are not desirable where the settlor is non-UK resident, since trust gains are s.1(3) amounts and gains accruing to the settlor are in principle CGT free.

61.55 Trust holding company

Trustees may hold trust assets directly or through a wholly-owned non-resident company (here called **“an underlying company”**).



Which is better? This is a very large question, raising many issues, for many taxes, and the following is more of a checklist.

61.55.1 *Holding co: Advantages*

The trustees have the option to sell the company rather than the underlying assets, potentially avoiding SDLT and, (subject to the land-rich asset rules) CGT which would otherwise arise on a disposal of UK assets.

There may be IT advantages, particularly for UK source income: depending on the type of income, the company only pays tax at the basic rate, or corporation tax rate.

For dividend income receipt by the company is tax free because the company qualifies for a tax credit. But if the income is distributed, or within the scope of s.731, UK beneficiaries will pay tax at their marginal rates, and the use of the company may increase effective tax rates.

There may be of course IHT advantages (the company being non-UK situate).[233]

A UK resident holding company may be advantageous if the income of the non-resident company falls within s.720, as it allows the income to be accumulated.

It is harder to utilise capital losses which accrue to the company.

61.55.2 *Asset extraction problem*

The extraction of assets from the company will generally give rise to a double charge:

(1) An extraction involves a disposal by the underlying company. Gains accruing to the company on that disposal may be attributed to the trustees under s.3 and so constitute trust gains (s.1(3) amounts).[234]

[233] See too 52.21 (Transfer: Trust to underlying co).

[234] See 64.1 (Section 3 TCGA: Introduction). But the motive defence may apply.

(2) In addition, there may be a further charge on extraction of an asset from the company:

(a) If the asset is extracted on a liquidation, the offshore trustees dispose of the company's shares and so further trust gains accrue.

(b) If asset is extracted by dividend, the dividend is income for tax purposes, raising IT issues.

There is normally no relief for that double charge.[235]

Other problems, usually less significant, are:

(1) Losses of the underlying company are restricted and easily lost altogether.

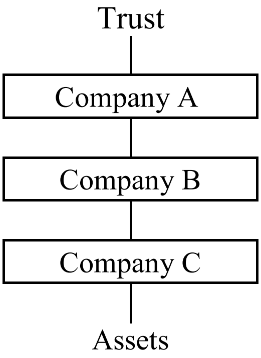
(2) If the property is a residence, CGT private residence relief (if otherwise available) is lost by use of a company.[236]

In short: an underlying company should not be used unless there is some good reason to justify the extraction of asset problem.

If the trustees need limited liability, a LLP (which is transparent for CGT) is an alternative which avoids the problems.

61.55.3 *Chain of cos: Disadvantages*

Suppose a chain of companies thus:



The asset extraction problem is now exacerbated.

(1) The asset may be extracted by a series of liquidations: C Ltd is liquidated and its asset transferred to B Ltd; B Ltd is liquidated and its

[235] There are some reliefs, eg s.3 distribution relief; but these only help the person who pays tax under s.3, so would only be relevant to a settlor-interested trust within s.86.

[236] See 64.34 (Private residence relief).

asset is transferred to A Ltd; A Ltd is liquidated and its asset is transferred to the trustees. This involves 6 disposals (3 disposals of the asset and disposals of the shares of A, B and C Ltd). The three disposals of the asset give rise to one chargeable gain (the first two disposals qualify for group relief) but the three disposals of the shares give rise to 3 sets of chargeable gain, with no group relief.[237] The position is worse than where there is no chain of companies.

(2) The asset may be extracted by a series of dividends: C Ltd transfers the asset in specie to B Ltd by way of dividend, B Ltd transfers the asset in specie to A Ltd by way of dividend, and A Ltd transfers the asset to the trustees by way of dividend. In this case there is again only one chargeable gain from the disposal of the asset. There is also only one set of income for s.720 or s.731 purposes.[238]

In short: chains of companies should in principle be avoided where possible.

61.56 Basic planning for s.87

In outline the position is as follows:

61.56.1 *Indefinite deferral*

Beneficiaries are only liable to the s.87 charge if they receive a capital payment. But there may be no need for a capital payment to be made. Instead, the capital of the trust fund may be retained. The beneficiaries of the settlement would enjoy a trust fund unreduced by the burden of CGT. In this way the charge may be postponed indefinitely.

61.56.2 *Non-resident beneficiary*

Section 1(3) amounts are treated as chargeable gains accruing to a beneficiary who receives capital payments. But a beneficiary who is not resident in the UK (and not temporarily non-resident[239]) is not subject to CGT on those gains. Such a beneficiary may therefore receive capital payments from the trust tax free, just as they can realise capital gains of their own without incurring a tax charge.

[237] See 64.24 (CG group reliefs).

[238] See 51.12 (Section 720 trust/co/and co/subsidiary structure); see 50.32 (Company income distributed).

[239] See 11.1 (Temporary non-residence).

61.56.3 *UK/nondom beneficiaries: Capital payment timing*

Section 1(3) amounts which have been matched with a capital payment to a beneficiary in an earlier tax year cease to be available for the purpose of the s.87 charge in the following year. This principle applies when the beneficiary is a remittance basis taxpayer. Suppose that s.1(3) amounts are matched with capital payments to a remittance basis beneficiary and the capital payments equal the total s.1(3) amounts. In subsequent tax years these are not taken into account and a capital payment may be made to a UK arising basis beneficiary without incurring any tax charge under s.87. Careful timing is needed. The payment to the remittance basis beneficiary must be made in one tax year and the payment to arising basis beneficiary must be postponed until the following tax year. Section 1(3) amounts accruing in a subsequent tax year may be taxed on that beneficiary.

In *McLaughlin v HMRC*[240]a marketed tax avoidance scheme involved bringing in a nondom beneficiary artificially. This survived a technical challenge; and (on its facts rather surprisingly) a *Ramsay*/realistic view challenge.

61.57 GAAR guidance

GAAR guidance provides two s.87 examples.

61.57.1 *Capital payment timing*

The first example is straightforward timing planning, which no-one would have thought was within the GAAR:

D20 Offshore trust and washing[241] out gains - example 1
This example illustrates that where the legislation sets precise boundaries the GAAR will not be in point where taxpayers satisfy the statutory conditions.
D20.2 The arrangements
D20.2.1 A discretionary trust resident outside the UK was set up by a now deceased foreign domiciled settlor.[242] The trust is worth £4m, has a pool of trust gains of £2.5m and no accumulated income or offshore income gains. There are

[240] [2012] UKFTT 174 (TC). The artificial planning in this case would now be caught by the GAAR.

[241] I would hesitate to use the term "wash", but the GAAR guidance uses it in an apparently neutral, non-pejorative sense.

[242] The example posits that the settlor is deceased:
(1) in order to avoid s.86 complications; and,
(2) perhaps, to establish the genuineness or long term nature of the trust.

no Sch 4C gains.

D20.2.2 There are four beneficiaries,

– two of whom are resident and domiciled in the UK and

– two of whom live permanently outside the UK [more analytically, are non-resident].

The trustees have made no capital distributions in recent years and it has been decided to end the trust.

The trustees have three options and the taxpayer's analysis on each is as follows:

Option 1 [Payment to all beneficiaries at once]

End the trust in Year 1 paying £1m to each beneficiary.

The UK resident beneficiaries will each pay UK tax on one quarter of the trust gains i.e. £625,000, at the appropriate rate, since the gains are allocated pro rata to the beneficiaries. The non-resident beneficiaries will pay no UK tax although half the trust gains are allocated to them.

Option 2 [Payment to UK beneficiaries first]

Pay the UK resident beneficiaries £2m in Year 1 and the non-resident beneficiaries £2m in Year 2.

The UK resident beneficiaries will each pay UK tax on £1m of gains since all the gains are allocated to them on a LIFO basis. The non-UK resident beneficiaries pay no UK tax and no gains are allocated to them.

Option 3 [Payment to foreign beneficiaries first]

Pay the non-UK resident beneficiaries £2m in Year 1 and the UK resident beneficiaries £2m in Year 2.

The non-UK resident beneficiaries pay no UK tax but the pool of trust gains that can be allocated to payments in the following year is reduced to £500,000. £2m of gains have been "washed out". The UK resident beneficiaries each pay CGT on £250,000.

D20.2.3 The trustees therefore choose option 3 resulting in the least amount of tax for the beneficiaries. The UK resident beneficiaries receive their payment later but with less tax payable.

D20.4 The taxpayer's tax analysis

D20.4.1 The taxpayer's analysis is as set out above. The taxpayer contends that LIFO should be applied.

D20.5 What is the GAAR analysis under s.207(2) FA 2013?

D20.6 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether expressed or implied) and the policy objectives of those provisions?*

The trustees are entitled to organise distributions in a way that minimises tax for the beneficiaries within the range of normal tax planning.

In relation to option 3 the substantive results of the transactions are consistent with the principles on which the relevant provisions are based. The trustees have three different ways of achieving the same result viz to end the trust and distribute property equally to the beneficiaries. They are not compelled to choose the one that raises the most tax or the "middle" option. Provided the payments to the non-resident beneficiaries in Year 1 are genuinely intended to benefit them (and the cash will not simply be passed back to the UK residents later) HMRC would not seek to invoke the GAAR.[243] It is clear that the policy of the capital gains tax legislation in relation to capital payments to beneficiaries is to operate a LIFO policy and in some cases this will result in greater tax on UK residents and in some cases less.

D20.6.1 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

The trustees of the discretionary trust making payment to the UK resident beneficiaries in the later year would not be regarded as a contrived or abnormal step.

D20.6.2 *Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

The anomalies that may arise under the LIFO rules are not seen as shortcomings in themselves but just a necessary result of having a system that allocates gains to capital payments in a certain order.

D20.6.3 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

The arrangements accord with established practice and HMRC has indicated acceptance of the practice.[244]

D20.7 Conclusion

D20.7.1 This is not regarded as an abusive tax arrangement and HMRC would not seek to invoke the GAAR.[245]

From 2018, this example is overtaken by the non-resident disregard.[246] But the same principle applies if:

(1) There were four beneficiaries of which two were domiciled in the UK, and two were resident non-domiciled remittance basis taxpayers, who received the payment first and did not remit.

(2) There were two non-resident beneficiaries, and the trustees adopted

[243] An arrangement under which the benefits non-resident beneficiaries will pass the benefit on to UK resident beneficiaries is caught without invoking the GAAR: see 61.8.1 (Indirect receipt from trust).

[244] The author is not aware of any publication where HMRC have accepted the practice (other than the GAAR guidance itself). But it does not matter.

[245] HMRC, "GAAR Guidance" Part D (Examples) (2017) *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

[246] See 61.21 (Non-resident disregard).

option 1 which may become the favoured option.

61.57.2 *Self-cancelling payment*

The second GAAR example concerns a scheme which no-one would have thought falls outside the GAAR (except that it would fail on traditional *Ramsay* grounds of circular, self cancelling arrangement/inserted steps):

D21 Offshore trusts and washing out gains - Example 2
This example illustrates that the inclusion of abnormal steps may cause the arrangement to become abusive in its own context.
D21.2 The arrangements
Mrs X is non-UK resident and domiciled.
Her son Y is UK resident but foreign domiciled and occupies a house owned by a non-UK resident company that is held within a trust.
The trustees own no other assets. The property is worth £10m. Gains that have accrued[247] post April 2008 are £4m (£2m on property and £2m on company).[248] The property has not increased in value since April 2013.[249]
The trustees do not want to pay ATED and decide to end the trust by liquidating the company [and then distributing the trust property]. The intention of the trustees and family is that the son should own the property.
There is no accumulated income or offshore income gains.
The trustees are advised on two options and the taxpayer's analysis on each is as follows:
Option 1 - Trustees pay [more correctly, transfer] the property to the son. He receives a capital payment of £10m in the UK to which gains of £4m are attributed [more correctly, matched]. He will pay tax on all the trust gains at 28%. The remittance basis does not apply. There is also a small inheritance tax exit charge.
Option 2 - The settlor[250] adds £4m cash to the trust in year 1.
In the same year the trust liquidates the company and holds the property direct thus realising the £4m gain.
It then pays the £4m cash back to the settlor in the same year.
Year 2 - the property is distributed to the son with a small amount of inheritance

[247] I think the reference is to unrealised gains.

[248] In fact the £2m gain accruing to the company is likely to qualify for the s.3 motive defence. But this does not spoil the point of the example.

[249] This is factually implausible, but it simplifies matters by avoiding the complication of CGT on the disposal, and does not affect the point of the example.

[250] It is, I think, implied that Mrs X is the settlor of the trust. But it does not matter whether the £4m is added by the settlor or some other non-resident, non-domiciled person.

tax. The £4m cash payment made in Year 1 washes out the trust gains and so on the distribution of the property to the son there is no CGT.
The trustees therefore choose option 2.

In this example the motive for the capital payment to the son is to avoid ATED. But that background is irrelevant: The same planning could arise whenever it was desired to make a capital payment to a UK beneficiary within the scope of s.87.

If one accepts that the trust must be unwound, there are better options. But those alternatives do not spoil the point of the example.

D21.4 The taxpayer's tax analysis

D21.4.1 The taxpayer's analysis is as set out above. The taxpayer contends that LIFO should be applied.

D21.5 What is the GAAR analysis under s207(2) FA 2013

D21.5.1 *Are the substantive results of the arrangements consistent with any principles on which the relevant tax provisions are based (whether expressed or implied) and the policy objectives of those provisions?*

The trustees are entitled to organise distributions in a way that minimizes tax for the beneficiaries within the range of normal tax planning.[251]

However, option 2 is not consistent with the principles on which the relevant tax provisions are based. LIFO was intended to operate on distributions of capital to beneficiaries by matching gains in a certain order. In this case the settlor has added the cash to the trust as part of a pre-arranged scheme to wash out the gains that she knows will be realised and on the basis that she will receive the cash back again. HMRC would seek to invoke the GAAR. The legislation was not intended to allow settlors to add cash to trusts on a short term basis only to receive it back again shortly thereafter and simply as an exercise to wash out gains.

D21.5.2 *Do the means of achieving the substantive tax results involve one or more contrived or abnormal steps?*

The addition of cash followed by the payment out is an abnormal step that is contrived.

D21.5.3 *Are the arrangements intended to exploit any shortcomings in the relevant tax provisions?*

This does intend to exploit a shortcoming in the legislation in a manner where the transactions are intended to have no economic consequences. The settlor has made the gift in the full expectation of receiving the monies back shortly and therefore not losing out.

The position would be different if the settlor had made the gift of cash and the

[251] This is a slightly loose paraphrase of the statutory rules, but I think unobjectionable in the context of the example.

trustees later independently decided in the exercise of their discretion to pay that cash out to other beneficiaries rather than as part of a pre-arranged circular scheme to pass the cash back to the settlor. Then the same issues would not arise.

D21.5.4 *Do the tax arrangements accord with established practice and has HMRC indicated its acceptance of that practice?*

HMRC has never accepted such practice.

D21.6 Conclusion

D21.6.1 HMRC would seek to apply the GAAR to such arrangements.

D21.7 Proposed counteraction

D21.7.1 The likely counteraction would be that the addition to the trust and payment of cash to the settlor would be ignored and the son will pay tax as under option 1.[252]

This seems right. The unfairness should be noted of imposing ATED on a company set up in accordance with standard practice, without a de-enveloping relief;[253] but that unfairness is one of the "principles on which the relevant tax provisions are based".

In practice, it is not actually worth paying CGT on £4m, or even £2m, just to avoid ATED, so the better option may be to leave the structure as it is (though IHT also need consideration). But that does not spoil the point of the example. Perhaps that is the point of the example.

As with most of the GAAR guidance, the answer to the posited example is easy and uncontroversial. What would the position be if the settlor made the payment to the trust, acknowledging the possibility (with a varied range of probabilities) of a capital payment to a non-resident beneficiary (not necessarily the settlor) in a few years time? The reader will not expect GAAR guidance to answer that.

From 2018, the example has been superseded by the non-resident disregard,[254] but the issue could arise in other circumstances, such as a UK resident remittance basis taxpayer beneficiary.

61.58 Record keeping for s.87/s.731

In cases where it is anticipated that s.87 charges are likely to arise, trustees (most likely using UK agents) should make an annual computation of s.1(3) amounts (trust gains). Likewise if it is anticipated that s.731 charges are

[252] HMRC, "GAAR Guidance" Part D (Examples) (2017) *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

[253] See 98.37 (De-enveloping).

[254] See 61.21 (Non-resident disregard).

likely to arise, trustees (most likely using UK agents) should make an annual computation of relevant income. It should be less work to do this annually than to wait until it matters and review back years after the event.

61.58.1 *Form 50(FS)*

A computation of relevant income, and s.1(3) amounts (trust gains), could be sent annually to HMRC in the voluntary form 50(FS). The TSE Manual provides:

> **TSEM10130 Non-resident trusts: issue of form 50FS** [Aug 2019]
> Although the trustees of a trust which has been non-resident throughout a tax year are not chargeable to Capital Gains Tax on the trust gains, the trust gains may be attributable to the settlor and/or beneficiaries who will be chargeable on the attributed gains in the year the gains arise or in a later year.
> SPT Personal Tax International issue forms 50FS to non-resident trusts that are notified to HMRC. The form is a non-statutory form requesting information on trust income and gains. It also asks for details of capital payments made by the trustees to enable HMRC to monitor liabilities arising to UK resident settlors and beneficiaries of non-resident trusts. Completion of the form is voluntary, but by completing the form and providing information which can be used to reconcile entries made on the settlors' and/or beneficiaries' tax returns, the trustees may prevent enquiries being made into those aspects of the settlors' and beneficiaries' tax returns.
> The forms can be issued to any person (including trustees, settlor or beneficiary) and are also available on the HMRC website for customers.

In the absence of immediate or closely anticipated tax charges, I wonder if it is worthwhile for trustees to complete the form.

What if no records are available? HMRC practice is pragmatic. The INT Manual provides:

> **INTM601700 Relevant income** [Jul 2023]
> For the purposes of calculating the liability of a UK resident beneficiary who receives a capital distribution or benefit it is important that the trustees of non-resident trusts maintain records of the income and gains that arise in the structure. They should maintain historical records for the purpose of matching the income and gains with the capital distributions and benefits they make. Sometimes, for various reasons, no historic record of the amounts of capital, income and gains arising in the funds under management are available. This presents trustees with specific difficulties

in notifying UK resident beneficiaries, who have received capital distributions or benefits from the trustees, of the income and gains against which such distributions can be matched which would give rise to a UK tax liability. Where this occurs, it may be necessary to estimate the capital, income and gains elements contained within funds under management for each year based upon the known facts.

Based upon the known facts available, any reasonable agreed basis may be adopted although no estimate should be applied if the actual information required to decide the matter can be obtained from third parties. In such cases the actual information should be sought and used.

Where it is necessary to estimate, either the Retail Prices Index (RPI), or the Consumer Prices Index (CPI) may be applied to an agreed year and scaled forward or backward as agreed to reach an agreed apportionment of the investment fund. Any known fact, such as the value of the opening capital settled, should also be factored into the analysis.

Alternatively, reference may be made to using investment performance information for each relevant year that may have been compiled by professional trust associations specifically for this purpose. This may provide an acceptable alternative to using an estimated calculation in situations where the original records are not held or cannot be obtained.

Where HMRC are advised that no records of historic funds under management have been maintained - or that estimated or investment performance tables have been used to reconstitute the capital, income or gain elements of such funds - a risk assessment of the tax impact should be undertaken. Where the suggested adjustment is considered to be material then the matter should be investigated further.

If technical advice is required by HMRC staff in these circumstances, they should contact Personal Tax International (see INTM604440).

61.58.2 *Pre-2008 records*

The s.87 guidance note provides:

> 133. Before 6 April 2008 trustees of non-UK resident settlements that have no UK domiciled beneficiaries, or beneficiaries who may become UK domiciled, will not have had to consider the possible UK CGT liabilities of the beneficiaries. From 6 April 2008 they will have to consider the possibility that a charge under section 87 or Schedule 4C TCGA may accrue to UK resident but non-UK domiciled beneficiaries.
>
> 134. In relation to pre 6 April 2008 transactions HMRC recognise that in such cases trustees
>
> - May not have kept sufficient records to calculate precisely the post 5 April 2008 CGT liabilities that may accrue on UK resident but

> non-UK domiciled beneficiaries, or
>
> - May not want to incur the expense of searching through old records to obtain all the necessary information to calculate precise CGT liabilities.
>
> 135. In such cases HMRC will consider any reasonable solution suggested to them. Usually proposed solutions will have to be considered on a case by case basis.

The guidance note concludes:

> One solution that HMRC will accept generally is that all assets held by trustees or underlying companies at midnight on 5 April 2008 are treated as having a zero acquisition cost. Provided the trustees make a valid election under paragraph 126 of Schedule 7 there will be no disadvantage to the beneficiaries. This is because the chargeable gain is restricted to the growth in the value of asset since 6 April 2008.

If a rebasing election is made, pre-2008 gains do not often matter, but there are situations in which it does matter.

61.59 Tax return: s.87 gain

Section 87 gains are returned in Box 18 in the Capital Gains Tax summary pages (form SA108) 2022/23. The note beside this box reads:

> Attributed gains where personal losses cannot be set off.

Form SA108 (notes) 2022/23 provides:

> Only fill in this box if you've received any gains, capital payments or benefits, as a beneficiary from a non-UK resident trust.

Helpsheet HS299 (Non-resident trust and CGT) 2023 provides:

> If you're liable to Capital Gains Tax as a beneficiary (whether or not you are also the settlor), because you directly or indirectly receive capital or some other benefit from the trust, then, details of such gains should be set out in a computation accompanying the Capital Gains Tax summary pages and the amount included in box 18.

61.60 DT relief: s.87 gain

61.60.1 *Trustee treaty-resident outside UK*

Suppose:

(1) Gains ("trust gains") accrue to a trust which is:

(a) not tax-resident but

(b) treaty-resident in a foreign state with a DTA with a CG article in standard OECD Model form.

(2) The beneficiary receives a capital payment so a s.87 gain accrues to them.

(3) The beneficiary is UK tax-resident and not treaty-resident in the foreign State.

The question is whether the beneficiary qualifies for third party DTA relief.[255] Where a Savings Clause applies, the answer is no.

What if the treaty does not have a Savings Clause? At first sight, the DTA offers no defence to the charge on the beneficiary. The trust gains accruing to trustees meet the requirements for DTR but the s.87 gain accruing to the beneficiary under s.87 TCGA is not the same gain as the trust gains accruing to the trustees.[256] Section 87 may be regarded as a charge on the capital payment, or a charge on fictional gains, but it is not a charge on the trust gains accruing to the trustees. That seems reasonably clear for several reasons:

(1) The wording of s.87(2) suggests that the s.87 gains and the trust gains are distinct.

(2) If the trust gains exceed the capital payment, it would not be clear which trusts gains were charged. Although there are matching rules, these rules only match capital payments to trust gains of a year; they do not match capital payments to specific gains within the year.

(3) For the purposes of the CGT remittance basis, the s.87 gain is treated as accruing on the disposal of a foreign situate asset, even if trust gains of the trustees accrue on the disposal of a UK situate asset.[257]

The absence of DT relief in this situation was always unjust, but following the extension of s.87 to foreign domiciliaries in 2008 it became a more significant injustice.

There is however an argument that the gains accruing to the trustees are not s.1(3) amounts (trust gains). The definition is:

> the amount upon which the trustees of the settlement would be chargeable to tax under s.1(3) for that year if they were resident in the UK in that year.

[255] See 109.2 (Third-party DT relief).

[256] See 107.22 (Characterisation).

[257] See 61.19 (s.87 remittance basis).

Applying this rule (the s.87 residence assumption), ie assuming the trustees were UK resident, they should still be treaty non-resident, so "the amount on which they would be chargeable to tax" would be nil![258] I refer to this as the **"DT argument"**. It is the old question of how far to carry the deeming.[259] The argument is supported by the fact that the s.86 residence assumption expressly deals with the treaty point.[260]

Unfortunately an argument of this kind was put in a similar context in *Bricom v IRC* where it was rejected. That was a case on the CFC residence assumption. The issue was to ascertain the chargeable profits of the CFC. The relevant legislation then provided:

> **Section 747(6) ICTA:** In relation to a company resident outside the UK—
> (a) any reference in this Chapter to its chargeable profits for an accounting period is a reference to the amount which, on the assumptions in Schedule 24, would be the amount of the total profits of the company for that period on which ... corporation tax would be chargeable.
>
> **Para 1(1) sch 24 ICTA:** The company shall be assumed to be resident in the UK.

The CFC was resident in the foreign state, and treaty-resident there, and it argued that although it was deemed to be UK resident, the deeming did not undo the fact of treaty non-residence. Accordingly, the CFC's chargeable profits should be ascertained on the assumption that the CFC was dual resident and entitled to DTA relief.

The CoA rejected the argument:

> ... para 1(1) of Sch 24 is a statutory assumption, and is ambiguous. The question is: what is the nature of the assumption?...
>
> In the present case the purpose for which the assumptions are required is self-evident (!). A controlled foreign company is ex hypothesis resident outside the UK. As a non-resident, it will not normally be subject to UK corporation tax and will have made no claim to relief from such tax. The computation of the profits on which corporation tax is chargeable, therefore, involves ascertaining a hypothetical amount, that is to say the amount which would have represented the amount of such profits if the

[258] This assumes that the trustees would claim treaty relief, see 61.6.4.
The position is different for gains accruing to underlying companies which are deemed to accrue to the trustees under s.3. See 61.6.1 (s.87 residence assumption).

[259] See See App 8.2 (Deeming provisions: Construction).

[260] See 60.11.1 (Residence assumption).

> controlled foreign company had been resident in the UK and had made all necessary claims for relief. The assumptions which Sch 24 requires are not additional assumptions to be made in combination with the actual facts. In relation to the matters which they cover they are substituted for the actual facts. [The CFC] was resident outside the UK; this means that it had no profits actually chargeable to corporation tax; accordingly its chargeable profits are to be ascertained on the footing that it was resident in the UK instead.

So far so good. The judgment continues:

> It is as simple as that. There is no question of dual residence.
> ... The chargeable profits referred to in s 747(4)(a) must be ascertained without reference to the double taxation agreement ....[261]

The reader may think that the Court has ignored, rather than answered the point, or may have thought that treaty-residence and UK tax residence were the same thing. Or perhaps this a particularly blatant case of assuming the answer and then construing the statute to yield that answer.

However that may be, *Bricom* is not a general rule for the construction of all statutory residence assumptions, but a case on the construction of the CFC residence assumption. The point in the s.87 code should be considered independently.

If the DT argument were correct, there would be an anomaly between:

(1) trusts which were UK-law non-resident and treaty non-resident, ie within the scope of a DTA; and
(2) trusts which were UK tax-resident and treaty non-resident, for these are caught by s.88 TCGA.[262]

The CG Manual provides:

> **CG38610 Trustees' gains - section [1(3)] amount** [Nov 2019]
> Foreign tax paid by the trustees may be deductible in calculating the trustees' section [1(3)] amount, TIOPA10/S113.

See 111.27 (CGT/IT computation deduction).

If third-party DT relief is not available, a CGT computation deduction is available so foreign tax paid by the trustee is deducted in computing the s.1(3) amount. This is because:

(1) The s.1(3) amount is the amount on which trustees would have been

[261] *Bricom v IRC* 70 TC 272 at p.289.
[262] See 61.38 (Dual-Resident trust: s.88 TCGA).

chargeable to tax if UK resident; and

(2) UK resident trustees would qualify for a CGT computation deduction, which reduces the amount on which trustees would be chargeable to tax.

61.60.2 *Beneficiary treaty-resident outside UK*

Suppose:

(1) Gains ("trust gains") accrue to a trust which is:
    (a) not tax-resident and not
    (b) treaty-resident in a foreign State.
(2) The beneficiary receives a capital payment so a s.87 gain accrues to them.
(3) The beneficiary is UK tax-resident and treaty-resident in a foreign State with a standard form CGT article.

Can the beneficiary claim treaty relief directly? Art.13(5) OECD Model provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

In 2018, I said:

> It is suggested that the beneficiary cannot claim DT relief because:
> (1) The beneficiary is not the alienator.[263]
> (2) The gain is not "from the alienation of any property".
> The contrary is arguable, but does require a very loose reading of the provision.

The position is however changed by the 2019 CGT rewrite, as s.87B(2) now reads:

> The chargeable gains [s.87 gains] are chargeable gains accruing on the disposal of an asset situated outside the UK.

So DT relief should apply, from 2019/20, at least if the beneficiary claims the remittance basis.

[263] See 64.40.1 (Individual treaty non-resident; company simple non-resident).

62.38 Critique

62.1 Borrowing by non-resident trust

This chapter considers schedules 4B and 4C TCGA, which are designed to counter a set of tax avoidance schemes informally known as flip-flop schemes.

62.1.1 *Loan issues: Navigation*

Trust loans can raise countless issues in addition to sch 4B/4C: if a full list could be written, it would include most chapters in this work. The following may serve as a starting point:

General loan issues	**See para**
General law loan issues	App 2.5
Taxation of interest (including situs of source)	26.1
Situs of benefit of debt	102.1
Trust borrower under loan	
Loan from individual lender to trust	
Remittances: are trustees relevant persons in relation to lender	18.6
s.624: is lender a settlor/is the loan an interest in the trust	47.6.4; 99.26
Could loan cause a POA intangible property charge	83.8
Repayment of trust borrowing to individual lender	
s.633/s.727: charge on repaying loan to settlor/transferor	47.14; 49.23
All loans to trusts	
IHT deduction for trust debt	80.1; 80.15
Tainting protected trusts	92.7
Trust lender under loan	
s.731/s.87 benefit	50.10
Loans to/from companies held by trusts	61.11

62.2 Flip-flop schemes

In order to understand the law it is helpful to review these schemes. They were designed avoid ss.86, 77 and 87 TCGA and I refer to them as "**s.86, 77, and 87 schemes**". (The catchy title "flip-flop" schemes seems inapt, though it is, perhaps, useful to have as a label.)

The s.86 scheme was as follows. Suppose a non-resident settlor-interested trust ("trust 1") wished to dispose of an asset. The gain on the disposal would in principle be taxed on the settlor under s.86 TCGA. The following steps could be taken:

(1) The trustees of trust 1 borrow money up to the value of the asset.
(2) They transfer the borrowed money to a second trust ("trust 2").
(3) The trustees exclude the settlor and designated persons from trust 1 so that s.86 ceases to apply to it.[1]
(4) In the following tax year, the trustees of trust 1 may sell the asset and realise a gain to which s.86 does not apply. They may then repay the loan.

This scheme was in principle successful.[2]

The s.77 scheme was designed to avoid s.77 TCGA. It involved (more or less) the same steps as the s.86 scheme. In this case however the legislation was (slightly) differently worded. It was litigated in *West v Trennery*[3], where the result (appropriately) flip-flopped: the first instance decision was reversed in the High Court, which was reversed in the Court of Appeal, which was reversed in the House of Lords. When the roulette wheel stopped spinning, the s.77 scheme turned out to be unsuccessful. Section 77 has long been repealed, so this is now of historical interest only, but the background explains one or two features which survive in the present legislation.

The s.87 TCGA schemes came in two versions. The first version was as follows. Suppose a non-resident trust ("trust 1") without any s.1(3) amount (trust gains) wished:

(1) to dispose of an asset on which trust gains would accrue, and
(2) to make a capital payment to UK beneficiaries.

[1] See 60.5 (Settlor-interested condition).

[2] *Burton v HMRC* [2009] UKFTT 203 (TC). At that time I said "It was striking that the transactions took place in 2000 but the appeal was not heard until a decade later." But nowadays such delay is so common that it does not excite comment.

[3] [2005] UKHL 5.

The beneficiaries would in principle be chargeable under s.87. The following steps could be taken:

(1) The trustees of trust 1 borrow money up to the value of the asset.
(2) They transfer the borrowed money to a second trust ("trust 2").
(3) The trustees of trust 2 made a capital payment to the beneficiary.
(4) In the following tax year, the trustees of trust 1 sell the asset and realise a gain. The capital payment from trust 2 is not matched with the gain in trust 1.
(5) The trustees may then repay the loan.

A second (and more common) version of the s.87 scheme could be used for a trust which did have trust gains. Suppose the trust wished to make a capital payment to UK beneficiaries. The beneficiaries would in principle be chargeable under s.87. The following steps could be taken:

(1) The trustees of trust 1 borrow money.
(2) They transfer the borrowed money to trust 2.
(3) The trustees of trust 2 make a capital payment to the beneficiary. The capital payment from trust 2 is not matched with the trust gains of trust 1. Section 90 TCGA would have stopped this scheme (it carried the trust gain across to trust 2, where the gain would be matched to the capital payment from trust 2). However this section was absentmindedly disapplied by sch 4B TCGA in 2000, which lead to a flurry of tax avoidance until the mistake was corrected in 2003.[4]
(4) In due course, the trustees of trust 1 may repay the loan.

In the 2015/16 edition of this work I said:

> The s.87 schemes were held to be unsuccessful in *Herman v HMRC*. It is striking that most of these expensive and widely marketed schemes failed, contrary (I think) to the general expectation of the profession. The reader may think that the taxpayer had the better argument, in *Trennary* and in *Herman*. What lessons should be learned from the debacle? I leave readers to ponder over that.

The courts subsequently reversed the decision in *Herman*,[5] so the s.87 schemes succeeded after all, or at least those of them which held out to the end of the battle. There is still food for thought in this eventful history, but perhaps less cause for gloom.

[4] See 61.39.6 (Interaction with sch 4B).

[5] See 61.8.1 (Indirect receipt from trust).

Be that as it may, the key features of the schemes were trustee borrowing and a transfer of trust property in year 1, followed by a disposal in a subsequent year. Schedule 4B produces a deemed disposal in year 1, which counteracts the s.86 (and s.77) schemes and the first version of the s.87 scheme. Schedule 4C contains a modified version of the s.87 regime, which allows gains of trust 1 to be matched with capital payments from trust 2; this counteracts the second version of the s.87 scheme.

62.2.1 *Income tax flip-flop scheme*

Since schedules 4B/4C only apply for CGT purposes, the reader may wonder if something similar to the s.86 scheme could work for IT. Suppose a non-resident settlor-interested discretionary trust ("trust 1") wished to receive income (for instance by receiving dividends) which would fall within s.624 or s.720. Could the following steps be taken:

(1) The trustees borrow money up to the anticipated income.
(2) They transfer the borrowed money to a second trust ("trust 2").
(3) The trustees use their powers to exclude the settlor (etc) from trust 1 so that trust ceases to be settlor-interested.
(4) In the following tax year, the trustees of trust 1 receive the income and repay the borrowing.

The answer is that income tax capital payment provisions, s.633 ITTOIA and s.727 ITA, fill that gap, not to mention the GAAR; but perhaps there may be occasions where planning of that kind is possible.

Similarly, since sch 4C only applies for CGT and OIG purposes, the reader may wonder if something similar to the s.87 schemes would work for s.731; the answer is no, as transfers between trusts do not isolate relevant income.[6] In this respect, s.731 operates rather like schedule 4C.

62.3 The key conditions

Para 1 sch 4B TCGA provides:

> (1) This Schedule applies where trustees of a settlement—
> (a) [i] make a transfer of value (see paragraph 2)
> [ii] in a year of assessment in which the settlement is within section 86 or 87 (see paragraph 3), and
> (b) in accordance with this Schedule the transfer of value is treated as linked with trustee borrowing (see paragraphs 4 to 9).

[6] See 50.13.2 (Transfer between trusts).

Thus there are three key conditions, or sets of conditions:

Condition	**See para**
Transfer of value (in my terminology, a " **sch4B-transfer**")	62.4
Trustee borrowing	62.10
The sch4B-transfer is "linked" with trustee borrowing	62.12

If these conditions are satisfied, there is what I call "**a sch4B-disposal**".[7]

62.4 Sch4B-transfer

The statutory term "transfer of value" is unfortunate. Firstly the term is usually used with its IHT meaning. Secondly, the term is artificially defined to include loans and other transactions which do not constitute a transfer of value in any normal sense of the term. Although it is usually better to adopt statutory terminology, in this case I think it is clearer to use the term "**sch4B-transfer**".

The fact that there is a sch4B-transfer does not necessarily mean that there is a sch4B-disposal: the transfer is only the first of the three conditions that must be met for a sch4B-disposal.

There are three types of sch4B-transfer. Para 2(1) sch 4B TCGA provides:

> For the purposes of this Schedule trustees of a settlement make a [sch4B] transfer of value if they—
> (a) lend money or any other asset to any person,
> (b) transfer an asset to any person and receive either no consideration or a consideration whose amount or value is less than the market value of the asset transferred, or
> (c) issue a security of any description to any person and receive either no consideration or a consideration whose amount or value is less than the value of the security.

Trustees do not make a sch4B-transfer:

(1) If an underlying company held by trustees lends, transfers, or issues a security.

(2) If trustees repay a loan.

I comment on the 3 types of sch4B-transfer in the order set out in the statute.

[7] See 62.17 (Sch4B-disposal).

62.5 Sch4B-transfer: Loan

Para 2(1) sch 4B TCGA provides:

> For the purposes of this Schedule trustees of a settlement make a [sch4B] transfer of value if they—
>
> (a) lend money or any other asset to any person...

The CG Manual provides:

> **CG35124. Transfer of value** [Jan 2015]
> Under TCGA 1992, SCH 4B, para 2(1) trustees make a transfer of value if they
>
> (a) lend money or any other asset, regardless of whether a commercial rate of interest or hire is charged...

The flip-flop schemes[8] used in practice involved a transfer of an asset, not a loan. But (were it not for this provision) there could be a s.87 scheme under which:

(1) trust 1 lent to trust 2, and
(2) trust 2 lent to a beneficiary (or acquired property used rent free by the beneficiary).

So the legislation needed to deal with loans as well as transfers of assets.

62.5.1 *Occupation of property*

RI 259 provides:

> **B2 Paragraph 2(1)(a)—beneficiary exercising rights under [TOLATA][9] 1996 s 12**
> In certain circumstances a beneficiary's occupation of property, instead of being the consequence of the volition of the trustees, may result from personal rights under Trusts of Land and Appointment of Trustees Act 1996 s 12. Our view is that if the rights of the beneficiary arise as a consequence of the wording of the deed or will, then the occupation does not give rise to a transfer of value. It may be otherwise where the rights have arisen as a consequence of the exercise by the trustees of a power of appointment or advancement.

But it is considered that a beneficiary's occupation of property is not a loan of an asset, and (unless the trustees grant a lease) it is not a part-

[8] See 62.2 (Flip-flop schemes).

[9] The original refers erroneously to the "Trustee etc Act".

disposal of the property, so it is not a sch4B-transfer, and the application or otherwise of TOLATA is not relevant.

RI 259 provides:

> **B7 What happens when trustees put money into a conventional current or deposit account at a bank or building society?**
> Although in general law this is regarded as a loan from the customer to the bank, in the context of this legislation we do not consider that this comes within the meaning of "lend" for the purposes of para 2(1)(a). The currency in which the deposit is made is immaterial.

This is purposive, bordering on wishful, thinking; but since it usually suits the taxpayer, it will not usually be challenged.

62.6 Sch4B-transfer: Asset

Para 2(1) sch 4B TCGA provides:

> For the purposes of this Schedule trustees of a settlement make a [sch4B] transfer of value if they...
> (b) transfer an asset to any person and receive either no consideration or a consideration whose amount or value is less than the market value of the asset transferred...

This is the most important type of sch 4B-transfer.

Para 13(1) sch 4B TCGA provides a commonsense definition of "asset":

> In this Schedule any reference to an asset includes money expressed in sterling.
> References to the value or market value of such an asset are to its amount.

This is needed as sterling is not usually regarded as an asset for CGT purposes.[10]

Para 13(2) sch 4B TCGA provides a wide definition of "transfer":

> Subject to sub-paragraph (3), references in this Schedule to the transfer of an asset include
> [a] anything that is or is treated as a disposal of the asset for the purposes of this Act,
> [b] or would be if sub-paragraph (1) above ["asset" includes £ sterling] applied generally for the purposes of this Act.

[10] See 56.3.2 ("Assets").

The CG Manual provides:

> **CG35125. Transfer of value** [Jan 2015]
> References to transfers of value include everything that is or is treated as a disposal under TCGA 1992, and also include transfers or loans of money, and loans of other assets. Note that this includes disposals of assets such as government stock or a dwelling house occupied as a beneficiary's principal private residence, even though there would be no chargeable gain on the disposal. It also includes the occasion of a beneficiary becoming absolutely entitled as against the trustee but in this context see CG35128...
> CG35124(b) above makes it clear that a sale of an asset, whether to an unconnected person or a beneficiary, is not a transfer of value provided it is for full consideration.

RI 259 provides:

> **B1 Paragraph 2(1)(b)—cash distributions which are income**
> Where trustees of a discretionary trust make a distribution which is income of the recipient for UK tax purposes, this is not a [sch4B] "transfer of value" within para 2, which is concerned with capital transactions.

This interpretation is not obviously what the legislation says. But it is a sensible view of the overall scheme of the legislation and, as it benefits the taxpayer, is unlikely to be challenged.

62.6.1 *Grant of lease*

Para 13(3) sch 4B TCGA provides:

> References in this Schedule to a transfer of an asset do not include a transfer of an asset that is created by the part disposal of another asset.

The CG Manual provides:

> **CG35125. Transfer of value** [Jan 2015]
> ... Some part disposals involve the creation of a new asset. In this situation any reference in the legislation to the transfer of an asset refers to the (part) disposal of the old asset.

RI 259 provides:

> **B8** ... Under paragraph 13(2) references to the transfer of an asset include references to anything that is a disposal, and under section 21(2) TCGA references to a disposal include references to a part

> disposal. [The manual sets out para 13(3) and continues:] The grant of a lease is a part disposal of the freehold interest and therefore the grant of a lease is a transfer of the freehold interest for the purposes of paragraph 2(1)(b) and is not regarded as the transfer simply of the lease.

62.7 Sch4B transfer: Security

Para 2(1) sch 4B TCGA provides:

> For the purposes of this Schedule trustees of a settlement make a [sch4B] transfer of value if they ...
>
> (c) issue a security of any description to any person and receive either no consideration or a consideration whose amount or value is less than the value of the security.

It is normally companies rather than trusts which issue securities, so this is of somewhat theoretical interest. RI 259 provides:

> **B3 Paragraph 2(1)(c)— "issue a security"**
> We have been asked what the expression "issue a security" covers. It caters for those exceptional circumstances where trustees issue to a beneficiary or to the trustees of another trust a document acknowledging liability. Schedule 4B para 13(2) provides that references to the transfer of an asset include everything that is or is treated as a disposal of an asset. The issue of a security is not in itself the disposal or part disposal of an asset. Therefore para 2(1)(b) does not apply to it, and it was necessary to have a specific provision to cover this possibility.

In practice, as far as I am aware, flip-flop schemes were not carried out by issuing a security but it would be possible: issuing the security at an undervalue is a capital payment. A neater solution would have been to define transfer to include the creation of an asset (as for the ToA provisions); but it works.

62.8 Amount of value transferred

Para 2 sch 4B TCGA provides:

> (3) In the case of a loan, the amount of value transferred is taken to be the market value of the asset.
> (4) In the case of a transfer, the amount of value transferred is taken to be—
>
> (a) if any part of the value of the asset is attributable to trustee borrowing, the market value of the asset;
>
> (b) if no part of the value of the asset is attributable to trustee

> borrowing, the market value of the asset reduced by the amount or value of any consideration received for it...
>
> (5) In the case of the issue of a security, the amount of value transferred shall be taken to be the value of the security reduced by the amount or value of any consideration received by the trustees for it.
>
> (6) References in this paragraph to the value of an asset are to its value immediately before the material time, unless the asset does not exist before that time in which case its value immediately after that time shall be taken.

The grant of a lease out of a freehold is treated as a sch4B-transfer of value of the freehold interest, and the amount of the value transferred is therefore the value of the freehold, not the value of the lease.

> **B8 What happens when money is borrowed to purchase the freehold interest of a property which is then rented on a commercial basis?**
>
> ... Under para 13(2) references to the transfer of an asset include references to anything that is a disposal, and under TCGA 1992 s 21(2) references to a disposal include references to a part disposal. Paragraph 13(3) provides that references to a transfer of an asset do not include the transfer of an asset which is created by the part disposal of another asset. The grant of a lease is a part disposal of the freehold interest and therefore the grant of a lease is a transfer of the freehold interest for the purposes of para 2(1)(b) and is not regarded as the transfer simply of the lease. If the freehold interest was bought with borrowed money it meets the test in para 2(4)(a), and the amount of value transferred equals the market value of the freehold.

62.9 Settlement within section 86/87

Para 3 sch 4B TCGA provides (more or less) commonsense definitions.

62.9.1 *Within s.86*

Para 3 sch 4B TCGA provides:

> (1) This paragraph explains what is meant in this Schedule by a settlement being "within section 86 or 87" in a year of assessment.
>
> (3) A settlement is "within section 86" in a year of assessment if, assuming—
>
> (a) that there were chargeable gains accruing to the trustees by virtue of disposals of any of the settled property originating from the settlor, and

> (b) that the other elements of[11] the condition in subsection (1)(e) of that section were met,
>
> chargeable gains would, under that section, be treated as accruing to the settlor in that year.
>
> Expressions used in this sub-paragraph have the same meaning as in section 86.

62.9.2 *Within s.87*

Para 3 sch 4B TCGA, as inserted by s.92(2) FA 2000, used to provide:

> *(4) A settlement is "within section 87" in a year of assessment if, assuming—*
>
> *(a) there were trust gains for the year within the meaning of subsection (2) of that section, and*
>
> *(b) that beneficiaries of the settlement received capital payments from the trustees in that year or had received such payments in an earlier year,*
>
> *chargeable gains would, under that section or section 89(2), be treated as accruing to the beneficiaries in that year.*
>
> *Expressions used in this sub-paragraph have the same meaning as in section 87.*

This para was rewritten by para 130 sch 7 FA 2008:

> In paragraph 3 of Schedule 4B (transfers of value by trustees linked with trustee borrowing: settlements), for sub-paragraph (4) substitute—
>
> "(4) A settlement is "within section 87" for a tax year if—
>
> (a) section 87 applies to the settlement for that year,[12] or
>
> (b) chargeable gains would be treated under section 89(2) as accruing in that year to a beneficiary who received a capital payment from the trustees of the settlement in that year.
>
> (5) The reference in subsection (4)(b) to chargeable gains treated as accruing includes offshore income gains treated as arising."

The drafter absentmindedly repealed the final sentence of para 4, "Expressions used in this sub-paragraph have the same meaning as in section 87".[13] However, that the context shows that the expressions in

[11] The words "the other elements of" are otiose: para 3(3)b) requires one to assume that the condition in s.86(1)(e) is met, in other words, the condition need not be met. That makes sense. For this condition, see 60.11 (Section 86 gains condition).

[12] See 61.4 (Non-resident settlement condition).

[13] Some databases failed to notice this (accidental) repeal and still include this sentence in para 3 sch 4B TCGA.

para 3(4) are nevertheless to be construed with their s.87 meanings.

62.10 Trustee borrowing

Para 4(1) sch 4B TCGA provides a wide definition of borrowing:

> For the purposes of this Schedule trustees of a settlement are treated as borrowing if—
> (a) money or any other asset is lent to them, or
> (b) an asset is transferred to them and in connection with the transfer the trustees assume a contractual obligation (whether absolute or conditional) to restore or transfer to any person that or any other asset.
>
> In the following provisions of this Schedule "loan obligation" includes any such obligation as is mentioned in paragraph (b).

RI 259 provides:

> **B4** ... The fact that money was borrowed before 21 March 2000 does not prevent it from being outstanding trust borrowing.
>
> Where trustees are presented with a bill, for example for repairs to trust property, bona fide delay in payment would not convert this into a borrowing for the purposes of paragraph 4.

The second paragraph is wrong, since a debt on a bill for *repairs* cannot constitute borrowing within para 4; para 4(1)(b) only applies on a loan or transfer of *assets*.

62.10.1 *Amount borrowed*

Para 4(2) sch 4B TCGA provides:

> The amount borrowed (the "proceeds" of the borrowing) is taken to be—
> (a) in the case of a loan, the market value[14] of the asset;
> (b) in the case of a transfer [ie a transaction within para 4(1)(b)], the market value of the asset reduced by the amount or value of any

[14] Defined para 4(3):
"References in this paragraph to the market value of an asset are to its market value immediately before the loan is made, or the transfer is effectively completed, unless the asset does not exist before that time in which case its market value immediately after that time shall be taken.
The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer."

consideration received for it.

62.11 Loan to/from underlying co

In the following discussion, a company wholly owned by a trust is called an "**underlying company**".

Where an underlying company lends to a trust, there is "trustee borrowing" for the purposes of sch 4B TCGA. RI 259 states that HMRC take this point:

> **B4 Paragraph 4(1): meaning of "borrowing"**
> It is not unusual for the trustees of a non-resident trust to borrow money from a non-resident company which they control. In this situation, if the company were resident in the UK, [s.455 CTA 2010 (loans to participators)] might well be applicable. It has been suggested that in this situation the trustees are effectively "borrowing" from themselves and therefore outside para 4(1). We consider this incorrect, particularly in the light of *Chamberlain v IRC*.[15] It does not matter whether the borrowing is from a company controlled by the trustees or their associates, or from an entirely unconnected company.

At first sight this rule seems unnecessary. If a trust borrows from an underlying company, rather than a third party, and makes a sch4B-transfer, it seems odd that there should be a sch4B-disposal and that sch 4C should apply. But in fact a flip-flop scheme could be carried out if trustees borrow from an underlying company, just when they borrow from a third party.

Where a trust lends to an underlying company, there is a sch4B-transfer.

One could in principle avoid the issue by making other arrangements, eg a capital payment from the company to a beneficiary, rather than a loan to trustees who make the capital payment.

Where mistakes have been made, sympathetic courts have set aside loans made in (understandable) ignorance of these counterintuitive rules.[16]

[15] 25 TC 317. But *Chamberlain* does not seem relevant here. For this case, see App. 2.2.7 (Pre-arrangement steps).

[16] *Re Leumi Overseas Trust* [2007] JRC 248; *Barclays Private Bank v Chamberlain* 9 ITELR 304. The Supreme Court in *Pitt v Holt* [2013] UKSC 26 (more or less) abolished the rule in *Hastings-Bass,* on which these decisions were based; but offshore jurisdictions continue regardless. See eg art 47B ff Trusts (Jersey) Law 1984; Smellie, "Dealing with Mistakes of Trustees or Settlors: the Outlook from the Offshore Bench" (2013) *http://judicial.ky/wp-content/uploads/publications/speeches/2013-11-19-Speech-*

62.12 Transfer linked with borrowing

62.12.1 *Terminology*

The expression "linked with trustee borrowing" is defined in para 5-8 sch 4B. These paragraphs employ the following terms:

Term	**See para**
Linked with trustee borrowing	62.12.2
Outstanding trustee borrowing	62.12.4
Normal trust purposes	62.13
Ordinary trust assets	62.14.1

These expressions are best regarded as labels for complex sets of rules. The labels are not particularly apt and the definitions can be described as artificial; the labels taken literally would be misleading. The cosy expressions conceal the complex and arbitrary nature of the rules to which they refer. However it is difficult to think of better terms, and for the purposes of discussion it is best to adopt the statutory terminology *faute de mieux*.

62.12.2 *"Linked" with trustee borrowing*

Para 5(1) sch 4B TCGA provides:

> For the purposes of this Schedule a [sch4B] transfer of value by trustees is treated as linked with trustee borrowing if at the material time there is outstanding trustee borrowing.

62.12.3 *"Outstanding" trustee borrowing*

Para 5(2) sch 4B TCGA provides:

> For the purposes of this Schedule there is outstanding trustee borrowing at any time to the extent that—
> (a) any loan obligation[17] is outstanding, and
> (b) there are proceeds of trustee borrowing that have not been either—
> (i) applied for normal trust purposes, or
> (ii) taken into account[18] under this Schedule in relation to an

CJ-DEALINGWITHMISTAKESOFTRUSTEESORSETTLORS.pdf

[17] Defined in para 4(1): see 62.10 (Trustee borrowing).

[18] Para 5(3) sch 4B TCGA provides a commonsense definition:
"An amount of trustee borrowing is "taken into account" under this Schedule in

> earlier [sch4B] transfer of value.

62.12.4 *The material time*

Para 2(2) sch 4B TCGA provides:

> References in this Schedule to "the material time", in relation to a [sch4B] transfer of value, are to the time when the loan is made, the transfer is effectively completed or the security is issued.
> The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer.

The CG Manual provides:

> **CG35128. The material time** [Jan 2015]
> The expression 'the material time' is important for two reasons.
> The first is that the test whether the transfer of value is linked with trust borrowing is applied at the material time.
> The second is that the deemed disposal by the trustees occurs at the material time.
> [The Manual sets out para 2(2) and continues] So if say trustees appoint a cash sum to a beneficiary, he would become unconditionally entitled when the money had been transferred to his bank account, not when the cheque was handed to him, for at that stage the trustees might have no funds to meet the cheque.[19]

62.13 Normal trust purposes

Para 6(1) sch 4B TCGA provides:

> For the purposes of this Schedule the proceeds of trustee borrowing are applied for normal trust purposes in the following circumstances, and not otherwise.

relation to a transfer of value if the transfer of value is in accordance with this Schedule treated as linked with trustee borrowing.
The amount so taken into account is—
(a) the amount of the value transferred by that transfer of value, or
(b) if less, the amount of outstanding trustee borrowing at the material time in relation to that transfer of value."

[19] It would be unusual for trustees to write a cheque if they are not in funds: the point is that a cheque is revocable until payment is made.

There are three types of "normal trust purposes":

Category	**See para**
Payment for ordinary trust asset	62.14
Repayment of loan	62.15
Payment of expenses	62.16

Para 9 sch 4B TCGA provides power to amend paras 6-8 by regulation. Presumably HMRC were worried that they might have left some loophole for future tax avoiders. In practice no regulations have been made.

62.14 Payment for ordinary trust asset

Para 6(2) sch 4B TCGA provides:

> They are applied for normal trust purposes if they are applied by the trustees in making a payment in respect of an ordinary trust asset and the following conditions are met—
> (a) the payment is made under a transaction at arm's length or is not more than the payment that would be made if the transaction were at arm's length;
> (b) [i] the asset forms part of the settled property immediately after the material time
> [ii] or, if it does not do so, the alternative condition in paragraph 8 below[20] is met; and
> (c) the sum paid is (or but for section 17 or 39 would be) allowable under section 38 as a deduction in computing a gain accruing to the trustees on a disposal of the asset.

62.14.1 *Ordinary trust asset*

The label "ordinary trust asset" is not apt and many common trust assets do not count as "ordinary". Para 7 sch 4B TCGA provides:

> (1) The following are "ordinary trust assets" for the purposes of this Schedule—
> (a) shares or securities;[21]
> (b) tangible property, whether movable or immovable, or a lease of such property;
> (c) property not within paragraph (a) or (b) which is used for the

[20] See 62.14.3 (Asset becomes valueless).

[21] Defined (after a fashion) in para 7(2): "In sub-paragraph (1)(a) "securities" has the same meaning as in section 132." See App 2.14 (s.132 TCGA definition). In this section I use the word "securities" to include shares.

> purposes of a trade, profession or vocation carried on—
> (i) by the trustees, or
> (ii) by a beneficiary who has an interest in possession in the settled property;
>
> (d) any right in or over, or any interest in, property of a description within paragraph (b) or (c).

Thus securities are ordinary trust assets but interests in securities are not. The distinction between securities and interests in securities raises some deep questions, though there is no reason to think that the drafter gave any thought to this.

If trustees lend to an underlying company they have not incurred normal trust expenditure.

If trustees subscribe for redeemable shares they have incurred normal trust expenditure (though redeemable shares may be commercially equivalent to a loan, and the TiS rules need consideration). The same would be the case if the trustees subscribe for a security issued by an underlying company.

RI 259 provides:

> We have been asked to say whether a futures contract relating to commodities is an "ordinary trust asset". Such a contract is not a tangible asset nor does it give the holder an interest in such an asset. Therefore, it is not an "ordinary trust asset".

62.14.2 *Grant of lease*

RI 259 provides:

> **B8 What happens when money is borrowed to purchase the freehold interest of a property which is then rented on a commercial basis?**
> ... Assuming that there is outstanding trustee borrowing at "the material time", which is defined in para 2(2) as the time the transfer is effectively completed, it is then necessary to consider whether the transfer of value is linked with trustee borrowing. Under para 7 tangible property, and any interest in such property falls within the expression "ordinary trust assets". However the property concerned must under para 6(2)(b) either form part of the settled property immediately after the material time, or meet the alternative condition in para 8(1)(b) that it is represented by ordinary trust assets which form part of the settled property immediately after the material time. Paragraph 6(2)(b) and para 8(1)(b) may be looked at together. In this situation we say that the reversion to the lease is still part of the settled property, and the lease itself is represented by

> the right to the rental stream.
>
> Therefore where trustees borrow money to acquire the freehold interest in a property which is then let commercially and, at the material time, there are no outstanding trustee borrowings other than those which have been applied for normal trust purposes, Sch 4B does not apply. But the position will be different if at that moment there are outstanding trustee borrowings applied for other purposes.
>
> The same considerations apply where trustees acquire a long lease which is sublet, and where the asset in question is a chattel rather than land or buildings.

62.14.3 *Asset becomes valueless*

Para 8 sch 4B TCGA provides:

> (1) The alternative condition referred to in paragraph 6(2)(b) in relation to an asset which no longer forms part of the settled property is that—
> - (a) the asset is treated as having been disposed of by virtue of section 24(1), or
> - (b) one or more ordinary trust assets which taken together directly or indirectly represent the asset—
>   - (i) form part of the settled property immediately after the material time, or
>   - (ii) are treated as having been disposed of by virtue of section 24(1).
>
> (2) Where there has been a part disposal of the asset, the condition in paragraph 6(2)(b) and the provisions of sub-paragraph (1) above may be applied in any combination in relation to the subject matter of the part disposal and what remains.
>
> (3) References in this paragraph to an asset include part of an asset.

62.15 Repayment of loan

Para 6(3) sch 4B TCGA provides:

> They are applied for normal trust purposes if—
> - (a) they are applied by the trustees in wholly or partly discharging a loan obligation of the trustees, and
> - (b) the whole of the proceeds of the borrowing connected with that obligation (or all but an insignificant amount) have been applied by the trustees for normal trust purposes.

62.16 Payment of expenses

Para 6(4) sch 4B TCGA provides:

> They are applied for normal trust purposes if they are applied by the trustees in making payments to meet bona fide current expenses incurred by them in administering the settlement or any of the settled property.

RI 259 provides:

> **B5 Paragraph 6(4)—application of proceeds to meet current expenses**
>
> We have been asked whether trustee borrowings to meet payments on account or provision for future or past expenses are covered by the expression "current expenses". One circumstance in which borrowings are applied for "normal trust purposes" (para 6) is where they are applied by the trustees in making payments to meet bona fide current expenses incurred by them.
>
> One may note that there are three tests to be met—
>
> – The borrowings have been applied by the moment of the transfer of value (para 5(2)(b)(i)).
> – They have been applied to meet bona fide "current expenses".
> – The expenses are expenses of "administering" the settlement or any of the settled property.
>
> In the case of borrowing to meet future expenses it is hard to see how the borrowings can be said to have been applied. But the time for making the test is not when the money is borrowed, but the time of the transfer of value (this is "the material time", as defined in para 2(2)). In the case of payments on account there would be the requisite application and the liability to pay would have been incurred.
>
> We do not regard "current" as restricting qualification to expenditure which for accounting purposes must fall in the year of borrowing, but we should regard it as excluding borrowing to make a provision for future expenditure or to meet expenditure that was incurred long before but left unpaid. In general where contracts for repairs of an ordinary kind have been entered into, we should regard the expenditure anticipated under those contracts to be current expenses at the moment of borrowing. Where trustees as the owner or tenant of a flat are obliged by contract or under the terms of the lease to make payments into a common fund to meet future maintenance or repair expenditure this would be regarded as a current expense.
>
> The expression "administering the settlement or any of the settled property" should be construed widely to cover not only those expenses properly chargeable to income, or which would be so chargeable but for express provisions of the trust deed, but also capital expenditure such as capital taxes in the UK or elsewhere, or legal costs of a reorganisation, in particular the costs of an application under the Variation of Trusts

> Act. Other capital expenditure would often be expenditure on the asset itself, and therefore qualify under para 6(2). Contributions to the day-to-day running costs of a nominee company controlled by the trustees would also qualify.

62.16.1 *Unproductive expenditure*

RI 259 provides:

> **B9 What happens when money is spent unproductively, for example on a planning application that fails?**
> Under para 6(2) there are three conditions that must be met by a payment in respect of "an ordinary trust asset" if it is to be regarded as applied for normal trust purposes. The third, in para 6(2)(c), is that the sum is allowable under TCGA 1992 s 38 (or would be but for s 17 or 39) as a deduction in computing a gain accruing to the trustees on a disposal of the asset. If an application for planning permission fails, then when the land is actually sold the costs relating to the application are generally not allowable; this is because they are not "reflected in the state or nature of the asset at the time of the disposal". Paragraph 6(2)(c) however must be referring to a notional disposal not to a real one. In the context of para 6 we consider that the reference can only be to a notional disposal taking place at the time when the expenditure is incurred.
> Although one could not lay down as a universal rule that the expenditure would always qualify, the test is whether the existence of the current application for planning permission is reflected in the state or nature of the asset at the time of the notional disposal.

62.17 Sch4B-disposal

Para 1(2) sch 4B TCGA provides an outline:

> Where this Schedule applies the trustees are treated as disposing of and immediately reacquiring the whole or a proportion of each of the chargeable assets that continue to form part of the settled property (see paragraphs 10 to 13).

I refer to this as a **"Sch4B-disposal"**. Para 10 sch 4B TCGA provides the details:

> (1) Where in accordance with this Schedule a [sch4B] transfer of value by trustees is treated as linked with trustee borrowing, the trustees are treated for all purposes of this Act—
>
> (a) as having at the material time[22] disposed of, and

[22] See 62.12.4 (The material time).

> (b) as having immediately reacquired,
>
> the whole or a proportion (see paragraph 11) of each of the chargeable assets that form part of the settled property immediately after the material time ("the remaining chargeable assets").
>
> (2) The deemed disposal and reacquisition shall be taken—
>
> (a) to be for a consideration equal to the whole or, as the case may be, a proportion of the market value of each of those assets, and
>
> (b) to be under a bargain at arm's length.[23]

62.17.1 *Chargeable asset*

The key term here is "chargeable asset". Para 10(3) sch 4B provides:

> For the purposes of sub-paragraph (1) an asset is a chargeable asset if a gain on a disposal of the asset by the trustees at the material time would be a chargeable gain.

An offshore fund (within the OIG regime) is not a chargeable asset as no chargeable gain can arise on a disposal.[24]

62.17.2 *Extent of disposal*

Para 11 sch 4B TCGA provides:

> (1) This paragraph provides for determining whether the deemed disposal and reacquisition is of the whole or a proportion of each of the remaining chargeable assets.
>
> (2) If the amount of value transferred—
>
> (a) is less than the amount of outstanding trustee borrowing, and
>
> (b) is also less than the effective value of the remaining chargeable assets,
>
> the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:
>
> VT÷EV
>
> where—
>
> VT is the amount of value transferred, and
>
> EV is the effective value of the remaining chargeable assets.
>
> (3) If the amount of value transferred—
>
> (a) is not less than the amount of outstanding trustee borrowing, but
>
> (b) is less than the effective value of the remaining chargeable assets,

[23] This deeming prevents hold-over relief (which might otherwise apply to a UK resident trust).

[24] See 56.6.2 ("Chargeable" asset).

> the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:
> TB÷EV
> where—
> TB is the amount of outstanding trustee borrowing, and
> EV is the effective value of the remaining chargeable assets.
> (4) In any other case the deemed disposal and reacquisition is of the whole of each of the remaining chargeable assets.
> (5) For the purposes of this paragraph the effective value of the remaining chargeable assets means the aggregate market value of those assets reduced by so much of that value as is attributable to trustee borrowing.
> (6) References in this paragraph to amounts or values, except in relation to the amount of value transferred, are to amounts or values immediately after the material time.

62.17.3 *Example: Part-disposal*

RI 259 provides an example:

> **B10 How should we compute the base cost of assets for future disposals?**
> ... Suppose that an asset cost £600,
> the trustees are treated as disposing of two thirds of the asset at the material time (paragraph 10(1)), and
> the respective values of two thirds and one third immediately after that time are £900 and £450.

HMRC compute the gain on the sch4B-disposal:[25]

Deemed Proceeds	900
Cost [two thirds of 600]	-400
Gain	500

HMRC compute the base cost for a future disposal:

Remaining original cost	600 - 400	200
Deemed Acquisition		900
Revised base cost		1100

62.18 Gain/loss on sch4B-disposal

62.18.1 *Gain on sch4B-disposal*

If a gain arises to a trust within s.86, on sch4B-disposal, the position is

[25] I have slightly amended the layout for clarity.

straightforward: the settlor is taxable on the gain.

If the trust is within s.87, the sch 4C rules apply as discussed below.

62.18.2 *Loss on sch4B-disposal*

If a loss arises on a sch4B-disposal, it can in principle be set against other gains of the trustees.

In the HMRC view, if a sch4B-disposal is deliberately made to realise a loss, the loss is disallowed under the capital loss TAAR.[26] CG Manual Appendix 9 provides:

> **Example 18 - trustees make a deliberate transfer of value** [Jun 2016]
> 1. A body of trustees who fall within the terms of Schedule 4B have outstanding borrowing which has not been used for trust purposes (Schedule 4B is a measure introduced to discourage trustees avoiding capital gains tax by incurring debt and advancing funds from the settlement). The trustees intentionally make a transfer of value which triggers off a charge under Schedule 4B, and as they expect this transaction results in a capital loss. The trustees have realised chargeable gains in the same year, and claim to set the loss against those gains.
> 2. It is necessary to look at the arrangements which have been entered into by the trustees to determine whether these have been entered into with a main purpose of securing a tax advantage. There are arrangements in this case, so the question is whether or not those arrangements were entered into with a main purpose of securing a tax advantage, and to decide this it is necessary to take account of all the circumstances surrounding the transactions. It will be relevant to consider what the trustees' overall economic objective was, and whether that objective is being fulfilled in a straightforward way, or whether additional, complex or costly steps have been inserted. It is significant that Schedule 4B is itself anti-avoidance legislation, intended to counter avoidance of tax on gains by contrived arrangements between settlements. The fact that the trustees have deliberately triggered the operation of the schedule is an indicator that one of their main purposes was to secure the advantage of the capital loss. In such a case, the TAAR [s.16A TCGA] will apply and the loss will not be an allowable loss.

62.19 Schedule 4C: Introduction

A sch4B-disposal takes a trust from the standard s.87 regime to the (even) more complicated rules which I call the **"sch 4C s.87 regime"**.

[26] See 65.21 (Capital loss TAAR).

Section 85A(1) TCGA provides:

> (1) Schedule 4C to this Act has effect with respect to the attribution of gains to beneficiaries where there has been a transfer of value to which Schedule 4B applies.
> (2) Sections 86A to 95 have effect subject to the provisions of Schedule 4C.

Para 1(1) sch 4C TCGA makes the same point:

> This Schedule applies where the trustees of a settlement ("the transferor settlement") make a transfer of value to which Schedule 4B applies ("the original transfer")....

Thus, the sch 4C s.87 regime applies if trustees make a sch4B-transfer which is linked to trustee borrowing.[27]

For completeness, para 1(1) sch 4C TCGA provides:

> References in this Schedule to a transfer to which Schedule 4B applies include any such transfer, whether or not any chargeable gain or allowable loss accrues under that Schedule by virtue of the transfer.

We need some terminology to deal with this, and so in this chapter:

The "**transferor trust"** is the trust which makes the sch 4B-transfer (I adopt the statutory term).

In the statute, the sch4B-transfer is called "the original transfer". I refer to it as the **"sch4B-transfer"** or if there is more than one, the "**original sch4B-transfer**".

The **"sch4B-transfer year"** is the year in which the sch4B-transfer is made.

62.20 Sch4C pool

The key to understanding sch 4C is to appreciate that following a sch4B-transfer, there are *two* pools of gains:

(1) *"Standard s.87 pool"*: The transferor trust may have a pool of s.1(3) amounts (trust gains) governed by the standard s.87 regime

(2) *"Sch 4C pool"*: The transferor trust may have a sch4C pool, governed by the sch4C s.87 regime

Para 1(2) sch 4C TCGA provides:

[27] See 62.3 (The key conditions).

> The transferor settlement is regarded for the purposes of this Schedule as having a "Schedule 4C pool".

I abbreviate this to "**Sch4C pool**". Para 1(3) sch 4C TCGA provides:

> The Schedule 4C pool contains the section 1(3) amounts for the settlement that are outstanding at the end of the tax year in which the original [Sch 4B-]transfer is made (see paragraph 1A).

Trust gains accruing in years after the sch4B-transfer year do not go into the sch4C pool (unless there is another sch4B-transfer). They go into the standard s.87 pool.

62.20.1 *"Outstanding s.1(3) amounts"*

We need to ascertain "the section 1(3) amounts for the settlement that are outstanding" at the end of the tax year when the sch4B-transfer is made. Para 1A(1) sch 4C TCGA provides:

> The following steps are to be taken for the purpose of calculating the section 1(3) amounts for a settlement that are outstanding at the end of a tax year ("the relevant tax year").

Step 1 provides a commonsense starting point:

> *Step 1* Find the section 1(3) amount[28] for the settlement for the relevant tax year and earlier tax years, as reduced under section 87A [matching] as it applies for the relevant tax year and earlier tax years....

So far the rules are the same as for standard s.87 trust gains, ie all the standard s.87 trust gains as at the end of the sch4B-transfer year go into the sch4C pool.

62.20.2 *Trust transfer in/before sch4B-transfer year*

Para 1A(2) sch4C TCGA deals with the special case of transfers between settlements:

> For the purposes of Step 1 of sub-paragraph (1) take into account the effect of section 90 in relation to any transfer of settled property from or to the trustees of the settlement made in or before the relevant tax year.

Section 90 TCGA does not apply to a sch4B-transfer, but it would apply

[28] See 61.6 (Section 1(3) amount).

if there had been an earlier transfer between trusts which was not a sch4B-transfer.[29]

So far the rules are still the same as for the s.87 trust gain pool.

62.20.3 *Payment to non-resident*

Para 1A(1) sch 4C TCGA provides:

> *Step 2* This Step applies if directly or indirectly, by virtue of the matching of the section 1(3) amount for the settlement for a tax year ("the applicable year") with a capital payment, chargeable gains are treated under section 87, 87K,[30] 87L[31] or 89(2) as accruing in the relevant tax year to an individual who is not chargeable to tax for that year.
> Increase the section 1(3) amount for the applicable year (found under Step 1) by the amount of the chargeable gains.
> ...
> (3) For the purposes of this Schedule an individual is "chargeable to tax" for a tax year if, as respects that year, the individual is UK resident for the tax year (as determined in accordance with Chapter 1 of Part 1 of this Act).

Thus capital payments to non-residents which (before 2017/18) reduced the standard s.87 pool are added to the sch4C pool. Effectively such payments do not take trust gains out of the sch4C pool. The same rule applies to capital payment to non-residents after the sch4B-transfer is made: see 62.24.3 (Sch4C matching rules).

The capital payments which are disregarded are those which are matched to s.87 gains accruing in the "relevant tax year".

62.21 Sch4B trust gains

62.21.1 *Sch4B gains added to Sch4C pool*

Section 85A(3) TCGA provides:

> [a] When calculating the section 1(3) amount for a settlement for a tax year (within the meaning of section 87), no account is to be taken of any chargeable gains or allowable losses accruing by virtue of Schedule 4B.

[29] See 61.39.6 (Interaction with sch 4B).

[30] See 61.33 (s.87 onward-gift rule).

[31] See 61.34 (Onward-gift to close-family: s.87 settlor-attribution rule).

> [b] Nothing in this subsection affects any increase in a section 1(3) amount by virtue of paragraph 1(3A) or 7B(2)(b)[32] of Schedule 4C.

Gains on the sch4B-disposal do not enter the standard s.87 pool. Instead para 1A(3A) sch 4C TCGA puts them in the sch4C pool:

> The section 1(3) amount for that tax year is increased by—
> (a) the amount of Schedule 4B trust gains accruing by virtue of the original [Sch 4B-]transfer (see paragraphs 3 to 7), and
> (b) the total amount of any further Schedule 4B trust gains accruing by virtue of any further transfers of value to which that Schedule applies that are made by the trustees in that tax year.

The key term here is "sch4B trust gains". This term is artificially defined: it does not mean the gains accruing on the sch4B-disposal. For clarity, I write the expression with scare quotation marks.

62.21.2 *"Sch4B trust gains"*

Para 3 sch 4C TCGA provides:

> (1) This paragraph explains what is meant for the purposes of this Schedule by "Schedule 4B trust gains".
> (2) The Schedule 4B trust gains are computed in relation to each transfer of value to which that Schedule applies.
> (3) In relation to a transfer of value the amount of the Schedule 4B trust gains for the purposes of this Schedule is given by—
> CA – SG – AL ...

In short:
CA is **C**hargeable **A**mount
SG is the **S**ettlor **G**ains
AL is **A**llowable **L**osses

Each of these terms is elaborately defined. Para 3(3) continues with an outline:

> CA is the chargeable amount computed under paragraph 4 or 5 below,
> SG is the amount of any gains attributed to the settlor that fall to be deducted under paragraph 6 below, and
> AL is the amount of any allowable losses that may be deducted under paragraph 7 below.

[32] See 62.23 (Second sch4B-disposal).

62.21.3 *Ch. amount: Non-resident trust*

Para 4 sch 4C TCGA provides:

> (1) If the [sch4B] transfer of value is made in a year of assessment during which the trustees of the transferor settlement are at no time resident in the UK the chargeable amount is computed under this paragraph.
> (2) Where this paragraph applies the chargeable amount is the amount on which the trustees would have been chargeable to tax under section 1(3) by virtue of Schedule 4B if they had been resident in the UK in the year (and had made the disposals which Schedule 4B treats them as having made).

Para 4(3) sch 4C TCGA deals with the special case of a disposal of land by a non-resident:

> Where (apart from this sub-paragraph) the chargeable amount mentioned in sub-paragraph (2) would include a chargeable gain or allowable loss to which section 1A(3)(b) or (c) applies (disposals by non-UK residents within the charge to capital gains tax), so much of the gain or loss as would be so included is to be disregarded for the purposes of determining the chargeable amount.

The wording is based on the s.87 definition of s.1(3) amount.[33]

62.21.4 *Ch. amount: Dual-resident trust*

Para 5 sch 4C TCGA provides:

> (1) If the [sch4B] transfer of value is made in a year of assessment where—
> (a) the trustees of the transferor settlement are resident in the UK during any part of the year, and
> (b) at any time of such residence they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,
>
> the chargeable amount is computed under this paragraph.
> (2) Where this paragraph applies the chargeable amount is the lesser of—
> (a) the amount on which the trustees would be chargeable to tax under section 2(2) by virtue of Schedule 4B on the assumption that the double taxation relief arrangements did not apply (and the disposals which Schedule 4B treats them as having made

[33] See 61.6 (Section 1(3) amount).

> were made), and
> (b) the amount on which the trustees would be so chargeable to tax by virtue of disposals of protected assets.
>
> (3) For this purpose "protected assets" has the meaning given by section 88(4).

The wording is based on the s.87 rules for dual-resident trusts.[34]

62.21.5 *Settlor gains*

Para 6(1) sch 4C TCGA provides:
