That is correct assuming there are no profits available for distribution carried forward from earlier years. Perhaps with small family companies that is typically the case.

> so the waiver arrangement enhanced the dividend paid to Mr H.

> £16,000 of the dividend paid to Mr H is attributed to Mrs H under ITTOIA/S624 because the waiver was a bounteous arrangement.

The implication is that if (or so far as) the company had sufficient profits to pay the dividends without the dividend waiver(s) then there is no income arising under the settlement, in my terminology, no waiver-enhanced dividends. And that seems right, because if the company did have sufficient profit to pay all the dividends without the waiver, the effect of the waiver is not to benefit the dividend recipient (typically the spouse) directly; the effect of the waiver is to benefit the company (which enures to the benefit of all shareholders including the waiving shareholder (who is typically the largest shareholder, as was the case in *Donovon* and *Buck*).

99.20 Alphabet share arrangement

This section considers arrangements under which a company with different classes of shares may pay dividends to one class, to the exclusion of others. This is sometimes called **"alphabet shares"** and I use that term for lack of better.[121] The effect is in some ways similar to a discretionary trust, but the powers of individual(s) with control are not fiduciary, and the tax analysis is different.

Running through the s.624 issue list[122] the position is in principle as follows:

(1) The arrangement is a settlement-arrangement.[123] I refer to this as an **"alphabet-share settlement"**.
(2) A person who controls the company[124] is the settlor of the dividends because they provide the dividends (indirectly).
(3) The income arising under the settlement is the whole of the dividends.
(4) The property from which that income arose is the shares which carry

[121] The idea is an old one: it was used in *Chamberlain v IRC* where it was defeated on the Revenue's second attempt, (1945) 28 TC 88, on the basis of (now repealed) close company apportionment provisions. Alphabet shares are similar to partnerships which provide that profits are payable to partners as the partners agree. So the arrangement should not be described as contrived or artificial.

[122] See 47.5 (Settlor-interested trust).

[123] This is self-evident, but if authority is needed, see *Patmore v HMRC* [2010] UKFTT 334 (TC) at [72]: "a decision by the controlling shareholder to only issue a dividend on one class of shares rather than another ... can be an arrangement caught by [s.624]."

[124] Further thought would be needed if there is no one person with control. If two persons have control, would they be joint settlors?

control together with the shares which pay the dividends.[125]

(5) The settlor has an "interest" in that property.[126]

(6) The s.624 spouse exemption does not apply.[127]

TSEM provides:

> **TSEM4225 dividend waiver: when settlements legislation may apply** [Sep 2021]
> **Example 13 - dividends on certain shares**[128]
> Mrs I owns 80 "A" shares and Mr I owns 20 "B" shares. Both A and B shares rank equally.
> Profits of £25,000 are made and a dividend of £20,000 is voted on the B shares while no dividend is voted on the A shares.

This describes an alphabet-share arrangement. Under the company articles, typically, Mrs I (as she has control) could procure the dividend to be paid any shareholder, including herself.

The HMRC analysis is as follows:

> Clearly by not voting dividends on the A shares (which rank equally with the B shares) this is a bounteous arrangement as the dividend paid on the B shares could only be paid if no dividend was declared in respect of the A shares.[129]

There is a bounteous arrangement (ie, a settlement-arrangement) whether or not a dividend could have been paid on the A shares, since Mrs I could have paid the dividends to herself.

> £16,000 of the dividend paid to Mr I is attributed to Mrs I under ITTOIA/S624 because the decision only to vote dividends on certain shares was a bounteous arrangement.

[125] See 47.3.1 (Property comprised in a settlement).

[126] See 47.6.2 ("Settlor-interested" for s.624).

[127] See 93.15 (s.624 spouse exemption). The moral is that H should give the shares to W outright, in which case the spouse exemption would apply.

[128] I have restated the facts for clarity. The original reads:
"As in example 1, [this should read, example 12, for which see 99.19 (Dividend-waiver settlement] but in this case Mrs I owns A shares and Mr I owns B shares. Both A and B shares rank equally. Again profits of £25,000 are made and a dividend of £20,000 is voted on the B shares while no dividend is voted on the A shares."

[129] Author's footnote: It is assumed there are no profits available for distribution carried forward from earlier years.

The entire dividend of £20k should be attributed to the settlor, not just 80%. The analysis of the Manual follows its analysis of dividend waivers. But the analogy is mistaken, assuming (as is typically but not necessarily the case) that the holder of B shares has no right to any dividends unless the shareholder with control votes to declare them.

What if the B shares were held by a person other than the spouse or minor child of the settlor? The example suggests that s.624 does not apply, though the contrary view is arguable.[130]

The topic arose in *Patmore v HMRC*[131] but the facts were unusual. The judge found that the beneficial ownership of the shares was as follows:

	A shares	**B shares**[132]	**Total**
H	57.5	0	67.5
W	42.5[133]	10	52.5
Total	100	10	110

Dividends were paid on A and B shares, the amounts varying from one year to the next. The judge's solution was:

(1) Ascertain the total annual dividends, whether paid on A or B shares
(2) 42.5% of the total is regarded as income of W
(3) The balance was regarded as income of H

This could be justified by a "broad and realistic" view of what is the income arising under the settlement.[134] The key fact was that W (in short) provided 42.5% of the consideration for the acquisition of the shares. More commonly, where alphabet shares and dividend waivers are concerned, the recipient-shareholder (typically, a spouse or children or a family trust) under the arrangement does not provide any consideration. Then the *Patmore* approach will not apply.

Alphabet shares raise other issues in addition to the settlor-interested trust code. The list includes:

[130] For the reasons see 99.19.1 (Donee not spouse/minor child).

[131] [2010] UKFTT 334 (TC).

[132] The B shares had no votes, but it would make no difference if they did have one vote each, as the A shares would still have control.

[133] This was on the basis of a somewhat implausible constructive trust, but the outcome should have been the same even without the constructive trust; what mattered was that W provided (in short) 42.5% of the consideration.

[134] The tax analysis proposed here is not quite that of the judge, but once again, the judge did not have the benefit of hearing Counsel for both sides.

(1) The dividends may be employment income[135]
(2) The shares may be employment-related securities (not discussed here)
(3) The creation of alphabet shares may give rise to an IHT charge[136]
(4) Importantly: company law issues. An arrangement which works when a family is united may become unsatisfactory when members of the family fall out. Do unfair prejudice rules constrain the power of controlling shareholder(s) to declare dividends on alphabet shares to the detriment of minority shareholders?

Further thought is needed if a recipient-shareholder is non-resident or non-domiciled (ToA needs consideration) or, of course, if the company is non-resident.

Although alphabet shares are sometimes recommended as a means of holding and transferring wealth, the reader may think that taxpayers may be playing with fire. But HMRC set up a unit to review the topic of family investment companies in 2019, and announced in August 2021 that no changes were thought necessary. So they appear to have accepted the status quo. Of course, the HMRC report was not published, exactly what practices were considered and found unobjectionable is a matter of speculation, and whatever HMRC decided then, they may change their minds in the future.

The transfer of funds to a UK resident family investment company (whether with alphabet shares or not) brings the cost of a double tax charge (tax on profits at company level and tax on extraction of profits). That significant cost (to the taxpayer), or gain (to HMRC), may have informed HMRC's thinking; again, a matter of speculation.

99.21 Partnership-settlement

A partnership may of course be a settlement. TSEM provides:

> **TSEM4215: Settlements legislation: partnerships** [Jul 2017]
> The creation of a partnership may be regarded as an arrangement for transferring income from a settlor to members of his or her immediate family - see BIM82065.
> Where the incoming partner receives a share of profits out of all

[135] See 14.7.12 (Dividend/employment income). Disguised remuneration also needs consideration.

[136] See 81.7 (Change in share capital/rights). But if the company is a trading company, IHT business property relief is likely to apply.

proportion to the contribution made to the partnership, the arrangement would include an element of bounty.

99.21.1 *Partnership with spouse*

This is a settlement-arrangement (assuming bounty/gratuitous intent) and so within s.624 unless the s.624 spouse exemption applies.[137]
TSEM provides:

> **TSEM4215: Settlements legislation: partnerships** [Sep 2021]
> Where the incoming partner is a spouse or civil partner and he or she acquires an unlimited share in the partnership assets and income and there are no other arrangements or conditions applied to the gift then the exemption for outright gifts will apply and a challenge under the settlements legislation is not appropriate.
> The settlements legislation will apply where there is an arrangement under which the property received by the spouse or civil partner is wholly or mainly a right to income.

HMRC give some straightforward examples:

Example	**Facts**	**Analysis**
8	Arm's length terms (no bounty)	No settlement
Arrangements with bounty:		
9	P'ship share of income + capital	Settlement but s.624 spouse exemption
10	P'ship share of income only	Settlement, no exemption
11	P'ship capital reverts to settlor	Settlement, no exemption

> **Example 8 sleeping partner - settlements legislation does not apply**
> Mr and Mrs O and their friend Mr P have a business idea. They want to open a Cycle Repair Shop. Mrs O does not want to work but agrees to invest in the business without taking an active part, that is to say she is a sleeping partner. Each partner invests £10,000 and the £30,000 is used to lease a shop, buy equipment and stock and keep the business going until trade builds up. Under the partnership agreement Mr O and Mr P receive £500 a week with all the remaining profits split three ways between the partners.
> The business is a huge success and makes large profits and continues to grow. Within five years Mrs O is receiving £50,000 a year as her share of the partnership profits.
> Although Mrs O does not work in the business, and her initial investment has turned out to be very successful, the settlements

[137] See 93.15 (s.624 spouse exemption).

legislation would not apply to treat her share of the partnership profits as Mr O's. Mrs O's original investment was vital to get the business started and she risked losing it if the business failed.

More analytically, there is no element of bounty (gratuitous intent) and so no settlement. Though had there been a settlement, it would not have been settlor-interested.

Example 9 - Gifted shares in partnership as an outright gift not wholly or substantially a right to income
Mr Alpha and Mr Beta are in partnership as second-hand car dealers. They own the freehold premises through which the partnership trades (valued at £200,000) and routinely carry a stock of 50 used cars. The business is successful and has established goodwill in the locality as a reliable trader. It employs a number of salesmen and office staff. Profits of £100,000 a year are split equally between the partners. They decide to admit their wives to the partnership and amend the partnership agreement in order to split profits and capital equally four ways. Mrs Alpha and Mrs Beta do no work in the partnership. Although this is a bounteous transaction it is an outright gift that is not substantially a right to income and is excluded from the definition of settlement by ITTOIA/S626.

Example 10 - sleeping partner - settlements legislation does apply
Mr Y, an architect, commences business as a sole trader. The business is successful and a few years later annual profits are in the region of £80,000. The business is transferred to a new partnership of Mr & Mrs Y. A deed is executed under which income profits are to be shared equally but the rights to share in capital profits belong solely to Mr Y. Mrs Y subscribes no new capital and carries out no work whatsoever for the partnership, that is to say she is a sleeping partner. Profits for the year are £80,000 and £40,000 belongs to Mrs Y. This is a bounteous arrangement transferring income from one spouse to another. The settlements legislation will apply and Mrs Y's share of the profits will continue to be assessed on Mr Y.

99.21.2 *Partnership with non-spouse*

Where the incoming partner is not a spouse or civil partner the legislation [the settlements code] will not apply unless there are arrangements or conditions where the property can revert to the settlor (or spouse or civil partner).

Example 11 - Gift with conditions attached
Mr T is in partnership with his wife Mrs T. Their daughter is a university student. The deed is altered to admit the daughter as a partner.

> All the partners agree that on finishing her course the daughter's interest in the partnership will come to an end. The amendment of the partnership agreement under which the daughter is included without any additional capital or value being added by her is an arrangement with the requisite element of bounty. The gift from the parents is subject to conditions under which the property given will revert to them. The daughter's income is therefore treated as the income of the parents under ITTOIA/S624...

The income-stream codes also need consideration.[138]

99.22 Resettlement by beneficiaries

99.22.1 *Power to vary/resettle: Trust law background*

Beneficiaries absolutely entitled[139] under a trust may in principle:

(1) transfer trust property to a distinct trust ("a resettlement") or
(2) vary the terms of a trust ("a variation").[140]

The same trust law rules apply to an estate of a deceased person: where an estate creates a will trust, or intestacy, the beneficiaries of the estate may in principle vary or resettle the property of the estate.[141]

The variation/resettlement distinction matters for various purposes; I discuss it here because one must identify the settlement in order to identify

[138] See 54.13 (Partnership income stream).

[139] If there are minor and unborn beneficiaries, a variation requires the consent of the court under the VTA 1958 discussed in the next section.

[140] See s.1(1) VTA 1958 which assumes that beneficiaries have power to vary a trust:

> "... the court may ... approve on behalf of [unborn or unascertained beneficiaries] any arrangement ... *varying* or revoking all or any of the trusts..."

The court only approves on behalf of unborn or unascertained beneficiaries, and adult beneficiaries can make a variation without approval of the court. See *Re Holt* [1969] 1 Ch 100 at p.120:

> "Any variation owes its authority not to anything in the initial settlement but to the statute and the consent of the adults coming, as it were, ab extra. *This certainly seems to be so in any case not within the Act where a variation or resettlement is made under the doctrine of Saunders v Vautier by all the adults joining together*; and I cannot see any real difference in principle in a case where the court exercises its jurisdiction on behalf of the infants under the Act of 1958."

Further consideration is required if the trust is not governed by English law, or by a jurisdiction which adopts English law principles.

[141] But the tax consequences for an estate may be different: see 99.37 (Trust made by deed of variation).

the settlor.

99.22.2 *Variation or resettlement?*

Careful drafting can normally achieve whichever is desired.

The leading case is *Roome v Edwards* where the issue was whether the exercise of a power of appointment gave rise to a new trust distinct from the original trust. The House of Lords comment on what constitutes a distinct trust:

> There are a number of obvious indicia which may help to show whether a settlement, or a settlement separate from another settlement, exists. One might expect to find
> [1] separate and defined property;
> [2] separate trusts;
> [3] separate trustees.
> [4] ... a separate disposition bringing the separate settlement into existence.

Nowadays one would also expect to find separate registration under CRS and TRS.[142] The case continues:

> These indicia may be helpful, but they are not decisive. For example, a single disposition, eg, a will with a single set of trustees, may create what are clearly separate settlements, relating to different properties, in favour of different beneficiaries, and conversely separate trusts[143] may arise in what is clearly a single settlement, eg when the settled property is divided into shares. There are so many possible combinations of fact that even where these indicia or some of them are present, the answer may be doubtful, and may depend upon an appreciation of them as a whole.
> ... I think that the question whether a particular set of facts amounts to a settlement should be approached by asking what a person, with knowledge of the legal context of the word under established doctrine and applying this knowledge in a practical and common-sense manner to the facts under examination, would conclude.[144]

[142] See 130.23.5 (Sub-funds).

[143] The term usually used now is “sub-funds”.

[144] 54 TC 359 at p.389. Practicality and common sense seem a sound basis for approaching most questions, but how far do they take us? I suspect they are invoked most often when the writer is unable to articulate anything precise or conceptual. Lord Wilberforce also said that “settlement” and “trusts” are “terms which are also used by businessmen or laymen in a business or practical sense.” But they are not.

The CG Manual provides:

> **CG 37881 Variations of trusts** [Dec 2021]
> It is also possible, with the consent of the trustees, to vary the terms of the trust. There are all kinds of variation possible. Some property may pass absolutely to beneficiaries or existing separate settlements. Clearly this must involve disposals under TCGA 1992, s. 71(1). Other property is held on the same trusts as before and/or on different trusts.
>
> **CG37882 Separate settlements: variations of trusts: by agreement** [Dec 2021]
> In such circumstances it is necessary to consider, in the light of the principles set out in the preceding paragraphs and also CG33290-33304, what the correct analysis is. The alternatives are
> [1] mere variation of the terms of the existing settlement
> [2] continuation of the old settlement as regards part of the property, with the remainder being held on one or more new settlements
> [3] termination of the old settlement in its entirety being replaced by one or more new settlements. This last is an unlikely analysis unless a significant part of the property is being distributed absolutely. In such circumstances it may be helpful to refer to *Ewart v Taylor*[145] where one reason for the court holding that a new settlement had come into existence was that it was part of a scheme for winding up the old settlement.
>
> ...
>
> **CG37887 Separate settlements: variations of trusts: instrument of variation of will or intestacy** [Dec 2021]
> If, however, in a case where there is no such election or statement of intent [under s.62(6)(7) TCGA], the will or intestacy provided for property to be held subject to trusts, and these trusts are varied or replaced by the deed of variation, then there are two questions to be answered.
> a. Is there a new separate settlement?
> b. If so, who is the settlor of that settlement?
>
> If there are only minor variations clearly there is no new settlement and the deceased remains the settlor. Minor variations would include for instance changes in the administrative powers of the trustees, or the provision of an ultimate gift over, that is, a provision saying to whom

If business or lay persons were asked what these terms meant, they would say "You had better ask a lawyer".

But perhaps nothing turns on these observations.

[145] 57 TC 401 at p.468, Section I.

> the property is to pass if the trusts fail, or the appropriation of property to particular funds within the settlement. Otherwise it is necessary to determine whether there is a new settlement in accordance with the principles explained at CG37882, and see CG37889. If there is a new settlement then the identity of the settlor should be determined in accordance with CG37900. ...

99.22.3 *Will varied: NRB band trust*

The CG Manual provides:

> **CG37889 Separate settlements: variations of trusts: instrument of variation of will or intestacy** [Dec 2021]
> One situation which has been quite common[146] is where under the will there is a life interest trust for the spouse of the deceased. For Inheritance Tax reasons this is partly varied so that there is a discretionary trust up to the amount of the Inheritance Tax nil rate band. In such a case, where the spouse continues to be a beneficiary of the new discretionary trust, it would often be appropriate to regard this, except for the purposes of Inheritance Tax, as little more than a cosmetic arrangement, particularly if the broad intention is that the bulk of the income should be paid to the spouse. So this would be regarded for Capital Gains Tax purposes as a variation of the original will trust, and not as giving rise to a new separate settlement. The deceased remains the settlor.

Is the arrangement is aptly described as "little more than cosmetic"? If that is how the parties understand it, have they have misunderstood the position? Discuss. But it does not much matter.

More analytically, whether or not the discretionary trust fund constitutes a distinct trust from the rest of the trust fund would depend on the drafting: it would be possible to achieve a resettlement. But in practice the drafting is not likely to be done that way. If the parties to the variation are the spouse and the trustees but not all the other beneficiaries, there could not be a resettlement. See too 99.17 (Beneficiary assigns interest).

99.22.4 *Resettlement: Who is settlor?*

A resettlement (unlike a variation) involves a possible change of settlor.

The CG Manual provides:

[146] Author's footnote: This ceased to be common after the introduction of transferable nil-rate bands in 2007, but that does not affect the point being made.

> **CG37900. Identity of settlor** [Dec 2021]
> Where there is a variation of a trust of the kind described in CG37880+ [variation by beneficiaries] it is necessary to identify the settlor. If the conclusion taken is that there are no new settlements then for CGT purposes the identity of the settlor is unaffected. However if in effect interests in income have passed from one person to another, the former may well be the settlor of an arrangement for Income Tax purposes.
>
> **CG37901. Identity of settlor** [Dec 2021]
> If however one or more new settlements have come into existence, then the settlors of those settlements are one or more of the parties to the variation. The question should be tackled on a practical basis by determining where each beneficiary's share has gone. ...
>
> **CG37903. Example** [Dec 2021]
> Under a settlement made by X, A and B are each entitled to half the income. On A's death his son P will get half absolutely. On B's death her daughter Q will get half absolutely. The values of their respective interests are, say:

A's life interest	£60,000 [30% total value]
P's remainder	£40,000 [20% total value]
B's life interest	£75,000 [37.5% total value]
Q's remainder	£25,000 [12.5% total value]

> Under the variation, executed when all the beneficiaries are adults, which is considered to terminate the old settlement:
> A takes 30% of the property.
> 20% goes to a new accumulation and maintenance settlement for P's children.
> B takes 25% of the property.
> The rest [25%] is held for Q for life with remainder to Q's son R.
> P should be regarded as the settlor, for the purpose of the annual exempt amount, of the accumulation and maintenance settlement, because this is how his share has been dealt with.
> B and Q should be regarded as the settlors of the other settlement. ...

B and Q are joint settlors: see 100.1 (Trusts with two settlors).

99.23 Variation under VTA 1958

99.23.1 *VTA law background*

Section 1 VTA 1958 provides (so far as relevant):

> (1) ... the court may ... approve on behalf of—
>
> (a) any person ... who by reason of infancy or other incapacity is incapable of assenting, or

> (b) any person ... who may become entitled... to an interest ... or
> (c) any person unborn, or
> (d) any person in respect of any discretionary interest of his under protective trusts ...
>
> any arrangement ... varying ... the trusts ...
> Provided that except by virtue of paragraph (d) of this subsection the court shall not approve an arrangement on behalf of any person unless the carrying out thereof would be for the benefit of that person.

The CG Manual summarises:

> **CG37883. Under Variation of Trusts Act** [Dec 2021]
> The trusts of an existing settlement may be varied (in particular when the interests of unborn or minor beneficiaries are involved) by way of an Arrangement agreed between those parties of full age and approved by a Court Order under the Variation of Trusts Act 1958 (in Scotland Section 1 Trusts (Scotland) Act 1961) on behalf of those unable to give consent. ...

99.23.2 *VTA variation or resettlement*

The CG Manual provides:

> **CG37884 Separate settlements: variations of trusts: under Variation of Trusts Act** [Dec 2021]
> If so the principles of CG37880 – CG37882 apply. The degree of variation may exceptionally be such as to involve the termination of the original settlement in whole or in part and the creation of a new settlement. The fact that the courts may only consent to variation of the trusts does not prevent this. (If so then consideration must be given to the identity of the settlor, see CG37900.) ...

But the power under the VTA is a power to *vary* trusts, so the court order cannot have the result of an inter-trust transfer. This is confirmed by *Wyndham v Egremont*:

> [25] ... The concern here is whether, on the ground that they give rise to a resettlement, the variations to the trust, principally the extension of the trust period, might be said to give rise to a 'deemed disposal' under s 71(1) TCGA or might lead to adverse consequences for inheritance tax or stamp duty land tax purposes. I propose to take this very shortly because, in my view, [*Roome v Edwards*] is in point. I do not consider ... that the arrangement does give rise to a resettlement.[147]

[147] 12 ITELR 461 at p.471.

99.23.3 *Tax consequences of variation*

Where a court approves a variation of trust on behalf of a minor beneficiary, under the VTA, it is considered that the minor beneficiary does not become a settlor for two reasons (either of which would suffice):

(1) It is not likely that the minor provides any property. The variation must be for the benefit of the minor.

(2) The court in giving its approval does not merely act on behalf of the minor: the court has a wider role.[148] The position is analogous to trustees exercising a power of advancement.[149]

HMRC may not agree with point (2). CG Manual provides:

> **CG37902 Minor as settlor** [Dec 2021]
> It is considered that where a court has given consent on behalf of a minor, that minor can be a settlor. The authority lies in *Yates v Starkey*, 32 TC 38, where it was held that a person could be a settlor under compulsion, and *Mills v IRC*, 49 TC 367, where it was held that a minor with very little involvement in the transactions could be the settlor because she provided the property.

Neither of these cases compels a court to accept the HMRC view. But in practice the issue is unlikely to arise.

99.24 Property provided to co in a trust

HMRC take the view that providing property to a company owned by a trust is in principle provision of property for the purposes of the trust, and so makes the provider a settlor. SP 5/92 provides:[150]

> 16 The condition in TCGA Sch 5 para 9(3) may be satisfied where property or income is provided to a company in which the trustees are participators.[151]

[148] *Re Steed* [1960] 1 Ch 407; *Re Remnant* [1970] Ch 560. This view is consistent with the fact that where a court approves a variation on behalf of an unborn beneficiary, that beneficiary clearly does not become a settlor.
Further consideration is needed if foreign trust laws apply.

[149] See 99.13 (Inter-trust transfer: Advancement).

[150] For SP 5/92 and para 9(3) see 99.2.4 (Guidance).

[151] The SP continues with an exception:
"Where, however, the transaction is carried out with the sole object of leaving funds within the company for the company's purposes and it can be shown that any indirect benefit to the trust is merely incidental to that object, the transaction

This is supported by some case law.[152] It is correct for 3 definitions of settlor: the standard IT/CGT definition, the settlement-arrangement definition and the IHT definition.

However, for the CGT s.86 definition of settlor, the question is not whether a person has provided property for the purpose of the settlement. The question is whether a person has provided *settled property*. So if a person only provides property for a company held by a trust, the person is not the settlor under this definition.[153] It is suggested that the s.86 definition wording ought to be aligned with the other definitions.

99.24.1 *Transfer within trust/co group*

SP 5/92[154] para 18 provides:

> In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are outside the scope of TCGA 1992 Sch 5 para 9(3).[155]

This is right. There can be no element of bounty (gratuitous intent) so a wholly-owned company cannot "provide" property to its owner, just as a 100% shareholder cannot "provide" property to their company.

> is disregarded for the purposes of para 9(3).
> 17 Examples of transactions which may be so disregarded are—
> – where another shareholder waives an entitlement to all or part of a dividend; or
> – where a director restricts withdrawals of remuneration voted,
> in order to assist the company's cash flow, and no payments are made, directly or indirectly, to the trustees as a result of this. All relevant factors will be considered in determining whether it is appropriate to apply this practice in a particular case."

[152] Comments in *Crossland v Hawkins* 39 TC at p.506 followed in *Mills v IRC* 49 TC 367.

[153] See *Coombes v HMRC* [2007] EWHC 3160 (Ch) discussed App 2.9.6 (Do shares represent co assets).

[154] For SP 5/92 and para 9(3), see 99.2.4 (Guidance).

[155] The SP sets out a commonsense definition of "wholly owned" and continues with a qualification:

> "This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage."

Similarly, para 17 Protected-trust Note provides:

> "A loan or other transaction between the trustees and a company wholly owned by the trust cannot result in tainting as no value is being provided to the trust structure."

For s.87 aspects of transactions within a trust/company structure, see 61.12 (Trust/company group disregard).

99.25 Provision of services

99.25.1 *Service envisaged at outset*

It is clear that a person who provides services ("a service-provider") may be a settlor; but not everyone who provides services is a settlor.

In the following discussion:

(1) **"Settlor-services"** make the service-provider a settlor
(2) **"Non-settlor services"** do not make the service-provider a settlor

Two cases (the "film star" cases) provide examples of settlor-services. In these cases:

(1) A friendly third party created a trust.
(2) The trust acquired a company.[156]
(3) A well-known actor (Jack Hawkins/Hayley Mills) entered into a contract[157] to provide services to the company at an undervalue.
(4) The company resold the actor's services and duly received what the earlier case described as an "enviable" fee.
(5) The company made profits and paid dividends to the trustees.

In both cases the classic trust created at step (1) was a settlement-arrangement. The question was who was the settlor. It now seems obvious that the actor was the settlor. By the time of *Jones v Garnett*, where Mr Jones worked at an undervalue for the one-man company owned by himself and his wife, everyone agreed he was the settlor.

Viscount Dilhorne in *Mills v IRC* considered two situations where the provision of services did not make a service-provider a settlor:

[156] The company was UK resident, so transfer of assets abroad issues did not arise. In *Crossland v Hawkins* the company was created first, and it was said (implausibly) that the trust was not contemplated at that time; but that made no difference: see App 2.2.4 (Identifying the arrangement).

[157] The position is clearer where there is a contract between the service-provider and the underlying trust company. Then the service-provider indirectly provides *two* assets for the purposes of the settlement:
(1) the contract; and
(2) the dividends
So then there are *two* reasons why the service-provider is a settlor. But provision of dividends alone, without a contract, is sufficient to make the service-provider a settlor. In *Jones v Garnett* there was no contract between the service-provider (Mr Jones) and the company, but that made no difference. A contract also makes no difference to the issue of bounty (gratuitous intent); see 87.5.4 (Applying bounty test).

(1) Employees of a company held by trustees increase the company's profits, and the trust income, by their work.
(2) A stockbroker who gives good advice increases the trust fund.

> in a sense all the employees of a public company, some shares in which are held by trustees of a settlement, could be said to contribute to the profits of the company and so to the shareholders' dividends or the value of their shares, and so to the income of the settlement or the value of its capital assets. If ... activities which result in an increase in the income or value of a settled fund can constitute the provision of funds for the settlement, it might be said that every employee of such a company in some measure provides funds for a settlement on the trusts of which some shares of the company are held; but it would be ridiculous to suppose that Parliament intended that in such a case every employee of the company should be treated as a settlor.
>
> A stockbroker who advised trustees of a settlement to invest part of their trust fund in shares of a company which he expects to be shortly taken over on advantageous terms, including, perhaps, a payment in cash over and above the existing market value of the shares, might in the event of his expectations being fulfilled be said in a sense to have provided funds for the purpose of the settlement. The exercise of his personal skill or specialised knowledge would have resulted in an increase in the assets of the trust, but I cannot suppose that Parliament intended that such a man should be treated as a settlor.

No-one would suggest otherwise, but why not? There are two reasons, either of which would suffice. The first is that the service-provider may not act with bounty (gratuitous intent). In the CoA:

> One reason, in my opinion, why the definition of "settlor" ... would not apply to either of these cases is that neither the employees of the company nor the stockbroker would have been concerned with the objects or purposes of the settlement. The employees of the company would in all probability have been entirely ignorant of the settlement.[158] The stockbroker would have been likely to have known of the settlement's existence and would have advised the trustees with a view to advancing the interests of the trust, but would have done so for reward in the ordinary course of his professional business.[159]

In these cases there is no element of bounty (gratuitous intent). Clearly a

[158] But nowadays the beneficial ownership of the company may be publically known.

[159] 49 TC 367 (CoA) at p.387.

service-provider is not a settlor unless they provide bounty (gratuitous intent) but what if they do act with gratuitous intent? For instance, suppose the stockbroker chose not to charge for their services?[160] Viscount Dilhorne did not rely only on the bounty point:

> The difference between those cases, on the one hand, and *Crossland v Hawkins* and this case [*Mills*], on the other, is that in *Crossland v Hawkins* and in this case funds which ordinarily would have been received by Mr. Hawkins and by Miss Mills for their acting were diverted to companies which were channels for their transmission to trustees. It is not the provision of services but of funds which comes within the section.[161]

The distinction is not between provision of services and provision of funds, because the actors did provide services; the key feature is the provision of services which yields funds *which would otherwise be received by the provider*. It is considered that someone who provides services is a settlor if one can identify funds which:

(1) would (in the absence of the settlement) have been received by the individual, but
(2) were diverted to the trust.

If that is right, settlor-services are effectively restricted to "one-man companies" with no substantial capital (as was the case in *Mills, Hawkins*, and *Jones v Garnett*).

It appears that HMRC agree. The TSE Manual provides:

> **TSEM4300 - Settlement For Minor Child** [Sep 2021]
> **...Indirect gift of shares from parent**
> Mr J owns 60 of the 100 issued £1 shares in J Limited. Mr J is the sole company director and is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but shortly afterwards she gifted them to her grandchildren.

There is clearly a settlement-arrangement, but who is the settlor, is it J or his mother? There are two reasons why J may be the settlor:

[160] It is still a principle (notwithstanding wide exceptions) that trustees should act gratuitously; but no-one suggests that trustees thereby become settlors.

[161] 49 TC 367 at p.408.

(1) J has provided the grandchildren's shares indirectly by an arrangement under which J provided the shares to his mother, and the grandmother to the grandchildren.
(2) J has provided the dividends paid to the grandchildren by providing his services to the company at an undervalue.

The HMRC analysis takes point 1:

> The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in *Jones v Garnett*). The true settlor here is Mr J rather than the children's grandmother. Section 629 [ITTOIA] therefore applies and attributes the dividends received by the children to Mr J for tax purposes.

The example derives from Tax Bulletin 64 Example 9, where the HMRC analysis takes point 2:

> Since Mr. J
> [1] is the person responsible for making the company's profits and
> [2] decides on the level of dividends paid,[162]
> it is Mr. J who is the settlor rather than the children's grandmother.[163]

Suppose an investment adviser who is well disposed to the trust (perhaps a trustee or a beneficiary or a parent of beneficiaries) gives free investment advice to trustees to invest in quoted (easily obtainable) investments, and the trust profits from acting on their advice. There is an element of bounty but the adviser has not provided funds and is not the settlor. One cannot identify funds which would ordinarily have been received by the adviser. On the contrary, the adviser was free (if they had the resources) to make the same investments as those recommended to the trustees. This is a clear case.

Suppose a property developer who is well disposed to the trust gives free property market advice to trustees, and the trustees use their own funds invest in land successfully because of the advice. The developer has not provided property and is not the settlor. One cannot identify funds which

[162] It is hard to see the relevance of [2]; point [1] is the key point.

[163] The passage continues: "The legislation could apply in a similar way if the children had subscribed for shares themselves with money received from a third party or even from bank accounts in their own names." That is correct as a matter of tax law, but from a company law viewpoint, the children (minors) could not properly subscribe for shares.)

would ordinarily have been received by the developer.[164]

Suppose a director of a company held on trust seems reasonably well remunerated but HMRC argue that the remuneration is insufficient. Even if HMRC are right, the individual is not the settlor, because one cannot identify funds which would have been received by the director.

99.25.2 *Service not envisaged at outset*

What is the position if:

(1) a company is up and running and well established;

(2) an individual ("T") *subsequently* provides services at an undervalue (to benefit shareholders).

The question may arise in three circumstances:

Case 1 Shares may be held by a spouse or minor children
Case 2 Shares may be held by a trust:
Case 2(a): of which some other person is the settlor; or
Case 2(b): of which T is the settlor

In case 1 there is (or may be) no settlement-arrangement before T begins to provide T's services. The question is whether a settlement-arrangement comes into existence.

In case 2 there is a settlement already. The question in Case 2(a) is whether T becomes the settlor. In case 2(b) T is already the settlor. The question is whether T provides further property (which might taint the settlement).[165] Of course, all these questions are related and they come down to the same question: does T (gratuitously) provide property for the purposes of the settlement? It is suggested that the answer is, strictly, yes, if one can identify funds that T has provided, in short, if T is a one-man company; see above. But it appears that HMRC do not take the point.[166]

99.25.3 *Providing investment opportunity*

Suppose:

(1) an individual ("T") has an opportunity of purchasing land, or shares in a private company;

(2) T allows the trust to take up the offer by advising the trust and not

[164] But the transactions in land code would need consideration; see 22.5 (Transactions in land: Introduction).

[165] See 99.6 (Tainting).

[166] See 87.5.6 (Retesting bounty).

pursuing the opportunity themselves;

(3) had the trust not taken up the offer T would have done so.

This may be regarded as the provision of a service; service is a wide word. But it is not exactly like the services provided by the actors which were sold on to third parties.

In this case is T a settlor? T has provided an opportunity, but that is not "property". In practice it may be hard to provide an opportunity without providing some property, as in *Butler v Wildin*, where the settlors provided a bank guarantee.

Perhaps T might be a settlor where the trust only invested a nominal amount in the project. But if the trust provides substantial funds for the development, one cannot identify any income as coming specifically from T. One should not apportion the profits between T's contribution (advice) and the settlement's contribution (finance). It is impractical to do so as there is no clear answer to how the apportionment should be made.

It is different if T has contractual rights to the assets, as then T has provided property.

If the trust is non-resident, ToA needs consideration.[167]

99.25.4 *Employment-related shares*

Protected-trust Q&As[168] Question 6 provides:

> **Does ongoing employment by the settlor taint a protected settlement**
> Assume that a protected settlement owns shares of a company in which the settlor is a senior employee. The shares contain the usual good-leaver / bad-leaver provisions, such that if the settlor leaves employment with the company then the shares are lost (either through forfeiture, conversion into deferred shares, change in share rights, sale back to the company, compulsory sale to other shareholders or some other similar mechanism). If the settlor is a 'bad-leaver' then the shares will be lost on disadvantageous terms (eg they may have to be sold back to the company for only £1).
> Does the settlor remaining in employment – thereby preserving the value of the shares for the trustees – constitute an 'addition of value' to the settlement thereby causing the settlement to lose protected status?
> *Suggested answer:* No. The settlor remaining in employment merely preserves the value of the shares rather than adding to their value.

[167] See 49.9 (Quasi-transferor when individual is direct transferor).

[168] For this document, see 92.1.1 (Protected-trust guidance).

> However, even if there were some enhancement of the value of the shares, the use of the term ‘provided’ in Condition D indicates, as in other tax contexts, that there must be some element of bounty or gratuitous intent on the part of the settlor ... Typically, the settlor will wish to remain in employment for other reasons unconnected to the shares. Except in extreme cases (for instance where the employment is contrived and the overall terms of employment are not undertaken on a commercially justifiable basis), it is not thought that this would constitute the direct or indirect provision of property or income within Condition D.

That must be right, assuming employment is fully remunerated.

> **Question 6a – share options or deferred shares**
> As above, save that the settlement owns shares under an American-style deferred shares plan (or alternatively owns options under a European-style option-scheme). Under the deferred shares plan, restrictions on the shares fall away as the shares ‘vest’. Typically, this will be because the settlor remains in employment with the company in question. This more clearly ‘enhances’ the value of the shares...
> *Suggested answer:* ... Although the settlor remaining in employment may enhance the value of the shares or options, as long as the overall terms of employment are undertaken on a commercially justifiable basis), this would not be considered to be the provision of property or income or the addition of value which disapplied Condition D. Only in extreme cases, where the settlor deliberately acted solely with the objective of enhancing the value of the shares or the share-option scheme was otherwise contrived to achieve this result, would this taint the settlement.

That is less clear, but the issue is fact-sensitive. The Protected-trust Note restates this view.[169]

[169] For the Protected-trust Note, see 99.2.4 (Guidance). It provides:

> “A trust may own shares/share options or an interest in a business which have been awarded as a result of the settlor's work/employment. These awards may be subject to vesting provisions (or the economic equivalent) under which the award may increase in value the longer the settlor works or if certain targets are met but which may also decrease in value or become worthless if the settlor ceases to work in the business or for the relevant company.
> As long as the award was held by the trust before the settlor became deemed domiciled, the fact it may increase in value as a result of the settlor's work is not in general considered to amount to a provision of property or an addition of value. The reason for this is that any gratuitous intent existed only when the award was

99.26 Loans

Lending on commercial terms will not make lender (or borrower) a settlor, as there is no element of bounty (gratuitous intent).

The following discussion mostly refers to interest-free loans, which are common; but the same will apply to a low-interest loan, or any loan on terms favourable to the borrower.[170]

99.26.1 *Making a loan*

A person who makes an interest-free loan to a trust[171] is in principle[172] a settlor. HMRC agree. SP 5/92[173] para 22 provides:

> A loan made, directly or indirectly to a relevant settlement after 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is regarded as a provision of funds for the purposes of TCGA 1992 Sch 5 para 9(3). This is the case whether the loan is for a fixed period or repayable on demand.[174]

While a person who lends interest-free is in principle a settlor, what is the property provided, and when is it provided? It is considered that the property provided is the money lent. It is provided at the time that the interest-free loan is made. If the money lent is spent on expenses, there is no property derived from the loan and the lender ceases to be a settlor.

made/transferred to the trust. The settlor has no gratuitous intent when continuing to work in the business or for the company.

The position may be different where the overall terms of the work/employment were or are not arms' length or the settlor deliberately acted with the objective of enhancing the value of the award held by the trust or the terms of the award were otherwise contrived to achieve this result. It is likely that, in these circumstances, such an arrangement would taint the settlement."

[170] As to whether an interest-free loan makes the trust a settlor-interested trust, see 47.6.4 (Beneficial loan or guarantee).

[171] Likewise a loan to a company held by a trust; see 99.24 (Property provided to co in a trust).

[172] It is assumed that the loan is made with gratuitous intent. The position is different if the loan (though on favourable terms) is made without gratuitous intent. That is conceivable, for instance, in the case of a loan from a life tenant, if trust income roughly matches interest foregone.

[173] For SP 5/92 and para 9(3), see 99.2.4 (Guidance).

[174] Likewise Tax Bulletin 8: "Our view is that a person making a loan to the trustees on better than commercial terms is ... a settlor ... and within the provisions of [Chapter 5 Part 5 ITTOIA] ..."

See too 101.5 (Failure to claim statutory indemnity).

99.26.2 *On-demand loan left unpaid*

This section considers whether a person provides property by allowing an interest-free repayable on demand loan to remain outstanding after it has been made. This typically arises where:

(1) Year 1: A settlor while non-domiciled lends money to a trust. The loan is interest-free and repayable on demand.
(2) Year 2: The settlor becomes deemed domiciled in the UK and leaves the loan outstanding.

It is suggested that the settlor has not provided property in year 2: for what is the "property" which the settlor has provided? It is not the funds lent, which were provided in year 1; it is not the interest foregone, as that does not exist.[175] If that is right, tainting rules only apply where the statute makes express provision for loans or adding value. This is consistent with the principle that failure to exercise a power of revocation is not providing property.[176]

99.26.3 *Fixed-term loan*

In practice fixed-term loans are less common that on-demand loans, but I will consider them here. There are two separate issues: the position during the term of the fixed-term loan, and the position if the loan is left outstanding at the end of the term.

SP 5/92 provides:

> 19 A fixed-period loan made, directly or indirectly, to a relevant settlement prior to 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is, generally, regarded as a provision of property in pursuance of a liability incurred before 19 March 1991, provided the loan remains outstanding on the same terms. As such, it falls within the terms of TCGA 1992 Sch 5 para 9(3)(b) and the first condition set out in para 9(3) is not met.[177]

[175] Contrast *Re Marshall* [1965] NZLR 851: the New Zealand CoA held that where interest on a debt is payable on demand, but the right to call for payment is not exercised, there is no gift of the interest foregone. Also see 83.6 ("Provide").

[176] See 99.15 (Power of revocation). The same reasoning may apply to the case considered in the next paragraph, of a fixed-term loan which is left outstanding, but that seems less clear.

[177] For SP 5/92 and para 9(3), see 99.2.4 (Guidance).

More correctly, a fixed-term loan, on favourable terms, is a provision of property at the time of the loan, and no property is provided subsequently during the term of the loan. It is not necessary to rely on para 9(3)(b). But the HMRC analysis leads to the same result.

Turning to the position if the loan is not repaid at the end of the term:

> 20 There would, however, be a direct or indirect provision of property for the purposes of the settlement where a fixed-period loan falls to be repaid after 18 March 1991 but repayment is not made and so becomes a repayable on demand loan.

This is in principle correct, for on the expiry of the fixed-term loan, credit is granted; in effect, a favourable loan comes into existence. This assumes the loan was deliberately left outstanding. It would be different if the repayment were simply overlooked.

For completeness: ESC D41 provided:

> **Non-resident Trusts: Loans Repayable on Demand**
> ... A repayable on demand loan which was made, directly or indirectly, to a relevant trust prior to 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest will, generally, be regarded as a provision of property for the purposes of the settlement. Consequently, where, after 18 March 1991, a loan has not been repaid or adjusted to commercial terms, the condition in TCGA 1992 Sch 5 para 9(3) would be met.

The concession was as follows:

> The condition is not, however, regarded as met where, before 31 July 1992, the loan is either -
> (a) repaid in full, together with any outstanding interest ; or
> (b)[i] made subject to fully commercial terms, including a commercial rate of interest payable at least annually for the year ending 5 April 1993 and subsequent years
> [ii] and, in addition, interest at a commercial rate or a sum in lieu thereof has been paid in respect of the year ended 5 April 1992.

The concession then discusses the consequences of paying a sum in lieu of interest (under para (b)[ii]):

> Amounts paid under an agreement entered into by the trustees after 5 April 1992 under (b) above in respect of the year ended 5 April 1992 are treated as capital payments under TCGA 1992 s 97, made in 1992-93.

> Where the lender is not a beneficiary of the trust, the payment is not treated as falling within the scope of TCGA 1992 Sch 5 para 9(6). In addition, where such payments are matched, under TCGA 1992 ss 92-95, to qualifying amounts for 1990-91, TCGA 1992 s 91(2) does not apply.
> Amounts paid under (b) above under an agreement entered into by the trustees before 6 April 1992, or in respect of periods after 5 April 1992, are regarded as interest in the hands of the recipient and taxable accordingly.[178]

99.26.4 *Back-to-back loan*

The same points apply to a back-to-back loan. In *IRC v Wachtel*:

(1) Trustees borrowed from a bank.
(2) An individual guaranteed the trustee loan and deposited with the bank funds equal to the trustee borrowing.
(3) The trustees paid only 1% interest on their loan.

The individual was rightly held to be a settlor.[179]

99.26.5 *Repayment of loan*

SP 5/92 para 23 provides:

> [1] The repayment of any loan made, directly or indirectly, to any person by the trustees is not generally regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).
> [2] This does not, however, apply where
> [a] more is repaid than is due under the original terms of the loan or,
> [b] in the case of loans made after 19 March 1991, where the interest charged under the terms of the loan exceeds a commercial rate.[180]

This is considering a loan the other way: a loan from the trust to another person.

The points made are straightforward, indeed self-evident. In case [1] there is no element of bounty (gratuitous intent). The borrower pays the trustees what is due. In case [2][a] the borrower provides bounty (repaying the trustees more than is due) and so becomes a settlor.

[178] [1992] STI p.535.

[179] 46 TC 543 at p.554I - 555.

[180] For SP 5/92 and para 9(3), see 99.2.4 (Guidance).

Similarly in case [2][b]: if the borrower pays the trustees interest exceeding a commercial rate, of course the borrower becomes a settlor (in principle by virtue of the loan agreement rather than by the subsequent payment, but that is not likely to matter). This point is not likely to arise as excessive interest (if it be interest) is likely to be taxable or raise other tax issues.

99.27 Indemnities and guarantees

A note on terminology:

Term	**Meaning**
Indemnity	Enforceable promise to reimburse for a specified loss
Warranty	Statement of fact in a contract, a contractual assurance, giving rise to damages if broken
Guarantee	A secondary liability that arises only on a default by another person (unlike an indemnity which is a primary liability)

However for present purposes (who is a settlor) these differences are not important.

Indemnities and guarantees may be given in a wide variety of circumstances.

An indemnity/guarantee may be given:

(1) with an element of bounty (gratuitous intent)

(2) without bounty (being part of a commercial transaction or for full consideration)

In the latter case the promisor/guarantor is not a settlor and giving the indemnity/guarantee is not provision of property or adding value.

99.27.1 *Giving an indemnity*

SP 5/92 provides:

> 34 An indemnity given by the new trustees to retiring trustees is not considered as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).[181]

This is right for two reasons (either would suffice):

(1) There is no element of bounty (gratuitous intent).

(2) The benefit of the indemnity is held by the *former* trustees, so it is not property comprised in the settlement.

[181] For SP 5/92 and para 9(3), see 99.2.4 (Guidance).

SP 5/92 continues:

> Other types of indemnity are considered in light of the facts of a particular case.

That is not exactly guidance.

It is standard form for a beneficiary who receives trust capital to give an indemnity to the trustees. This is not the provision of funds, it is made in consideration of the trustees releasing their trustee lien; there is no bounty (gratuitous intent).[182]

99.27.2 *Giving a guarantee*

If trustees borrow, the lender may require a guarantee.

SP 5/92 provides:

> 35 The giving of a guarantee is regarded as an indirect provision of funds under the terms of TCGA 1992 Sch 5 para 9(3).[183]

But para 6 Protected-trust Note[184] provides:

> Where trustees borrow commercially from a bank and pay an arm's length rate of interest the bank may require the settlor to guarantee the loan. The bank does not require collateral for the guarantee. No payment is made by the trustees to the settlor for giving the guarantee as there is no realistic risk that the trustees will not be able to repay the loan.
> SP5/92 takes the position on a generic basis that the guarantee by the settlor of an obligation of the trustees is to be treated as the provision of property for the purposes of the settlement. It was widely considered SP5/92 was incorrect in taking this position on the basis that there is no provision of property to the trustees unless and until the guarantee is

[182] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), para 34.3 (Trustees lien).

[183] SP 5/92 goes on to deal with the CGT implications of a guarantee given before 19 March 1991. This is not now important but is set out here for completeness:
"Payment of an obligation under a guarantee given before 9 March 1991 is, in general, regarded as a payment in pursuance of a liability incurred before 19 March 1991 and within para 9(3)(b). This may not, however, apply where-
- the contingent liability under the guarantee cannot be quantified with a sufficient degree of accuracy, eg where the guarantee is open-ended or the contingency is remote; or
- the guarantor does not take reasonable steps to pursue his rights against the debtor."

[184] For the Protected-trust Note, see 99.2.4 (Guidance).

> called. In the case of a loan the trustees have borrowed money but they have the obligation to repay the money along with an arm's length rate of interest. There is no risk in reality that they will default on their obligations.
>
> In practice, a third party providing a guarantee to the bank in these circumstances would charge a fee. On one view, failure by the settlor to charge a fee does not taint the settlement as it is not an addition of value to the particular items of property comprised in the settlement. The more prudent view is that this distinction is too technical, and accordingly that failure to charge a fee would amount to tainting.
>
> A secured guarantee could on one view be said to be the direct or indirect provision of the property over which security is provided even though the property in question never becomes comprised in the settlement. It is considered necessary for an arms' length fee to be charged in order to avoid any risk of the borrowing trust being tainted. The fee may be small if there is no realistic prospect of a default.

It may not be possible to identify the property which a guarantor provides.[185] If so, the guarantee may amount to tainting a trust, but it does not give rise to income/gains chargeable under s.624/s.86.

The position is different if there is not merely a guarantee but also a back-to-back arrangement of the kind found in *Wachtel*;[186] or if the trustees had no property of their own, as in *Butler v Wildin.*[187]

99.28 Transaction on favourable terms

A sale to a trust at a conscious undervalue is the provision of property: the seller is a settlor. Likewise a purchase from a trust at a conscious overvalue: the purchaser is a settlor.

Likewise a person is a settlor if they hold all the shares in a company and consent or procure the company to issue shares to a trust at a conscious undervalue.[188] The TSE Manual provides a straightforward example:

[185] A guarantee is a chose in action, but the owner of the chose in action may not be the trustee. Further consideration would be needed if the guarantee is called on. See too 99.2.9 (Undertaking to provide).

[186] See 99.26.4 (Back-to-back loan).

[187] 61 TC 666.

[188] This proposition is self evident but if authority is needed, see *Crossland v Hawkins* 39 TC 493 at pp.506–507; *Young v Pearce* 70 TC 331. An issue of shares at an undervalue also raises issues of value shifting for CGT purposes, the IHT close-company code, and if a non-resident trust or company is involved, ToA.

> **TSEM4120 Definition Of Settlor** [Sep 2021]
> ***Example 1***
> X is the director and owns all the 150 issued ordinary £1 shares of X Ltd. X Ltd issues 100 new ordinary £1 shares which are acquired for £100 by the X Family Trust.[189]
> The trust has been established for the benefit of X's family by his father, X Senior, who created the trust by settling cash of £100.
> Shortly after the issue of the new shares, a dividend of £100 per share is declared and paid and the trust receives dividends of £10,000.

The HMRC analysis is as follows:

> X controlled the arrangement for the issue of the shares at par followed by the dividend. X is therefore the true settlor of the settlement from which income of £10,000 arose. The original settlement of £100 by X Senior is usually disregarded on de minimis grounds.

A sale at market value is not the provision of property. HMRC agree. The CG Manual provides:

> **CG34891. Multiple settlors** [Jul 2019]
> Where property is acquired as a result of an arms length transaction the third party is not to be regarded as providing property for the purposes of the settlement, thereby becoming a settlor. Instead the property is regarded as representing the cash previously held.

A bargain at arm's length (at a price regarded by both sides as market value) is not the provision of property even if the parties have mistaken the value and the property is sold at an undervalue.[190]

Similar issues arise in multi-party transactions where a trust is one of the parties. For instance, a company may issue loan notes and shares, in a transaction where an individual subscribes to the loan notes and a trust subscribes to the shares. The question then arises how to apportion the total subscription price between the loan notes and the shares. An under apportionment to the trust would in principle make the individual a settlor. A valuation reached honestly and bona fide between parties acting at

[189] Author's footnote: The issue of shares at an undervalue would also constitute a transfer of value for IHT, and a value-shifting disposal for CGT, but it is not necessary to pursue that here.

[190] This is consistent with the principles that a settlement-arrangement must have an element of bounty: see 87.4 (Settlement-arrangement definition), and that arm's length sales confer no "benefit": see 50.4.1 (Arm's length transaction).

arm’s length binds HMRC.[191]

99.29 Payment of admin expenses

99.29.1 *Trust income used to pay expenses*

SP 5/92 specifies two cases where payment of capital expenses out of a life tenant’s income does not make the life tenant a settlor:[192]

> 29 An expense on capital account paid out of trust income is not treated as a provision of income by a beneficiary for the purposes of TCGA 1992 Sch 5 para 9(3) provided that either—
> [1] the trust deed permits payment of capital expenses from income and the beneficiary is entitled only to net income after such payments;[193] or
> [2] the trustees borrow money from the income account which is subsequently restored, along with interest over the period of the loan. The appropriate rate of interest is considered to be that which a Court of Equity would order on the replacement of trust income.[194]

The question, more analytically, is whether the life tenant has provided intentional and gratuitous benefit to the trust. Clearly, in the two cases mentioned, the life tenant does not do this and so does not become a

[191] See App 4.4 (Value of consideration).

[192] For SP 5/92 and para 9(3), see 99.2.4 (Guidance).

[193] For completeness, Tax Bulletin 8 expands on this:
“Para 29 of the Statement of Practice concerns, inter alia, trust deeds which permit capital expenses to be paid out of the income account. Neither the existence nor the exercise of this power would cause the trust to lose an interest in possession status for IHT purposes.”

[194] The words borrow and loan are used loosely here, as what is envisaged is not a loan or borrowing in the strict sense.
For completeness: Tax Bulletin 8 expands on this; it sets out para 29[2] and continues:

> “The appropriate rate of interest is considered to be equal to the rate payable on the Basic Account administered by the Court Office of the Supreme Courts of Justice. Such interest will constitute taxable income in the hands of the income beneficiary (either when it is credited in the case of a life tenant, or when it is paid or applied for the benefit of a discretionary beneficiary). It may also be treated as ‘relevant income’ for [s.731 ITA] purposes.
> Income beneficiaries will only be liable on the net amount of income available after deduction of any income which has been applied to meet expenses on capital account. Only when the income account is made good will that income become taxable on the beneficiary.”

settlor. The consent of the life tenant is not normally needed.

99.29.2 *Payment of expenses*

Where a trust has no income, someone (typically a beneficiary) may voluntarily pay trust expenses. In this case there may also be no gratuitous element. It may be in the beneficiary's interest to make the payment. Subject to that, the SP tacitly suggests that the intentional and gratuitous payment of trustees' expenses *does* make the payor a settlor. But this is not correct. First, in some cases, the payment of expenses may be a provision of services to the trust rather than the provision of property.[195] Secondly, if a non-settlor pays trustees expenses, or pays a sum to the trustees which are immediately consumed in payment of expenses "no property of which S is the settlor" is comprised in the settlement, so the payor of expenses is not the settlor.[196]

HMRC agree. A STEP/CIOT Q&A[197] considers the IHT issues that arise when:

(1) a person (after 2006) adds property to an estate IIP trust and
(2) the property is spent on trust expenses.

> **Question 37(2)**
> ... if an addition of cash was made which was then spent by the trustees and HMRC regard this addition as within the relevant property regime (eg an addition to pay expenses or improve properties), how would the proportion of the settled property subject to the new rules be calculated? Would a valuation be needed of the property before and after the improvement?
> **HMRC Answer**
> If a payment of cash was made and then spent immediately on, say, a tax liability or another administration expense, then that short period will be the extent of its time as "relevant property" and there will be no question of having to consider what proportion of the existing settled property represents it going forward.
> If a payment was made towards the improvement of a property, then this would appear to require "with" and "without" valuations when there is

[195] See 99.25 (Provision of services).

> a chargeable event.[198]
> *Note added 6 August 2008: HMRC have indicated that they are actively reconsidering this response with a view to producing further guidance shortly.*[199]

99.30 Property maintenance/management

This raises similar questions. Para 7 Protected-trust Note provides:[200]

> It is not considered the settlor taints a settlement where he keeps a trust property in good order and repair if he is living rent-free in the property and the cost to the settlor is no more than the rent he would have to pay if he was renting the property on arm's length terms. Should the settlor pay for improvements, it is considered tainting occurs if the value of the property is increased by the improvements.

Para 8 Protected-trust Note[201] provides:

> It is considered that tainting does not occur if the trustees own rental property and the settlor assists the trustees on an occasional basis with certain practical day-to-day matters such as interviewing new tenants, assisting with rent collection and generally in answering practical queries and passing these onto the trustees. The position could be otherwise if the settlor is in the business of property management and does not charge a fee.

99.31 Retaining life tenant income

SP 5/92 para 33 provides:

> A life tenant is not regarded as having provided income or property for the purposes of the settlement merely because there is an administrative

[198] The question goes on to ask: In HMRC's view, do all subsequent post Budget additions need to be kept physically segregated? HMRC say no, which is just as well as money spent can hardly be regarded as segregated:

> "It is clearly up to trustees to decide whether to keep post-Budget additions separate from the rest of the trust fund. We think that it may be sensible to do so—or, at least, to keep good records of additions. (The trustees of discretionary trusts already need to do this, of course, in order for the 10-year anniversary value of each addition to be identified correctly in light of the relief in s 66(2) IHTA for property that has not been 'relevant property' for a full 10-year period)."

[199] No guidance has been produced. Perhaps the issue was filed as too difficult, or perhaps on reconsideration HMRC were satisfied with their original answer.

[200] For the Protected-trust Note, see 99.2.4 (Guidance).

[201] For the Protected-trust Note, see 99.2.4 (Guidance).

> delay in paying out the income that has vested in that beneficiary. If, however, the beneficiary directs the trustees to retain this income on the terms of the settlement, this is regarded as a provision of funds within TCGA 1992 Sch 5 para 9(3).[202]

That is self-evident.

HMRC protected-trust guidance provides:

> 5.9 ... if the settlement is a life interest trust with underlying companies there is no requirement for the profits of those underlying companies to pay dividends up to the trustees of the settlement. The retention of such profits in the underlying companies will not be considered as an addition of value for the purposes of the tainting rules.

That is also self-evident.

99.32 Purpose: Inattentive settlor

In *Mills v IRC* 49 TC 367, the trust funds were derived from acting work of Hayley Mills, then aged 14. She was supposedly[203] unaware of the settlement to which at her direction her earnings were paid. The argument was that she had not provided funds for the *purpose* of the settlement. Viscount Dilhorne said:

> [1] I do not agree with Lord Denning MR that the word "purpose" in this section connotes a mental element or with Buckley LJ that there must be a motivating intention. I do not myself think that it assists to consider whether the question he posed is to be answered objectively or subjectively. I do not consider it incumbent, in order to establish that a person is a settlor as having provided funds for the purpose of a settlement, to show that there was any element of mens rea.

[202] The same point is made in para 5 Protected-trust Note. For SP 5/92 and para 9(3), see 99.2.4 (Guidance).

[203] The actual evidence recorded that she was "not very interested", which is not the same. The case should have been decided on the simple factual basis that Hayley Mills *did* intend to provide funds for the purpose of the settlement, even if she did not trouble to think very much about it. In the High Court, the judge made this point at p.378:

> "The case was put on a factual assumption that Hayley Mills did not subjectively intend to provide funds. This was factually incorrect, and not even conceivable, because it was completely inconsistent with the view that the contract she signed was valid. If Hayley had not thought about it at all, the contract which she signed would be void under the rule *non est factum*."

> [2] Where it is shown that funds have been provided for a settlement a very strong inference is to be drawn that they were provided for that purpose,
> [3] an inference which will be rebutted if it is established that they were provided for another purpose.

This is poorly expressed.[204] It is not that purpose is irrelevant: see [3]. The sentence at [1] might suggest the contrary, depending perhaps what Dilhorne meant by *mens rea*; but "purpose" inescapably connotes a mental element, and so does "provide"[205].

The explanation I prefer is that this passage is considering the situation like the facts in *Mills* where Hayley Mills *did* intend to provide funds for the purpose of her trust (in the sense that intention can be inferred by her signing a contract which had that effect); that is so even though she took (more or less) no personal interest in the matter, or had (more or less) no personal knowledge of it; she no doubt signed what was put in front of her. A person who is in that sense a source of funds is not permitted to say that they did not intend to provide them because they were not paying attention. The comment is applicable to a person who creates a settlement, as Britain was said to have conquered half the world, "in a fit of absence of mind".

An alternative explanation is that this is a case where the Courts just abandoned the usual concept of purpose (subjective intention) because the consequences were unacceptable; or to put it another way, it was such an obvious case that "the facts spokes for themselves".[206]

99.33 Purpose: Settlor's adviser/agent

In ascertaining purpose, one should have regard not only to the mind of the settlor, but also the mind of those acting for or advising them.[207] In *Crossland v Hawkins*:[208]

> The mere fact that he did not concern himself with some of the 'steps' in the legal machinery involved does not make it any the less his arrangement within the section. A man does not avoid the incidence of

[204] Dilhorne was "not in the highest flight of English lawyers" (Oxford Dictionary of National Biography).

[205] See 87.4 (Settlement-arrangement definition).

[206] See 3.8.1 (The limit of subjectivity).

[207] See too 3.10 (Purpose: Party's adviser/agent).

[208] 39 TC 439 at p.508.

> [the settlor-interested trust code] by merely being absent from and leaving to his solicitors and accountants certain parts of the legal machinery if he is aware of the proposals for an 'arrangement' or a settlement and actively forwards them by personally carrying out and assisting in the vital parts in which his performance and co-operation are necessary. Nor can he avoid liability by merely giving his solicitors carte blanche to effect some scheme for the benefit of his family and refusing to concern himself with its precise form.

On this analysis many apparent difficulties fall away.

In *Mills*, the father acted on behalf of the daughter.[209] The purpose of the father was to provide the daughter's funds for the purpose of the settlement. That suffices to make the daughter the settlor if she had no purpose of her own. Likewise in *Hatton*[210] the purposes of Mrs Cole's attorney was to provide funds for the settlement, and this purpose should be regarded as the purpose of Mrs Cole.

99.34 Trust by court: Person lacking capacity

The court has power to make a settlement for a person lacking capacity "on his behalf". It is considered that the person lacking capacity is the settlor.[211] The Court of Protection agree:

> Trusts set up by an order of the Court of Protection will take the form of a settlement, with the patient being the settlor. ... in the case of trusts set up by an order of the Court of Protection, provision can be made for income to be accumulated, if appropriate, for the lifetime of the patient as section 164(1)(a) Law of Property Act 1925 applies.[212]

99.35 Trust by compromise: Minor/person lacking capacity

Parties to litigation may make a settlement under a compromise on behalf

[209] See 49 TC 367 at p.382 and p.385.

[210] This is self evident, but if necessary, see 99.7 (A gives to B, B gives to trust).

[211] Sections 16, 18(h) Mental Capacity Act 2005. The tax position is the same for settlements made under the previous legislation, the Mental Health Act 1983. Further consideration would be needed in the case of Scotland or foreign jurisdictions.

[212] Court of Protection Practice Note, 15 November 1996, para 4. The point of the last sentence is that under pre-2009 law, accumulation was permitted during the lifetime of the settlor (but not during the lifetime of other persons). As the rule against accumulation is, happily, abolished, the Practice Note has become obsolete. But the implicit point that the patient is the settlor remains important.

of a claimant who is a minor or person lacking capacity.[213] The Court of Protection say:

> An award of damages can be settled, by consent, in trust for the patient as part of the terms of compromise of the action between the plaintiff and the defendant, with the approval of the High Court, in circumstances where the award never becomes the absolute property of the patient.
> Trusts set up following an order of the High Court can only be done in the form of a declaration of trust by the trustees ... . The period over which income can be accumulated by the trustees is restricted to 21 years.[214]

This assumes that the minor/person lacking capacity is not a settlor for trust law purposes. The first sentence (which is presumably the basis for the conclusion) is unsound. While the *award* never becomes the absolute property of the patient, the award represents the claim, which is the property of the claimant.[215]

But HMRC accept in practice that there is no settlor.[216] It would follow that trust property is excluded property if it is not UK situate, or an AUT/OEIC.

99.36 Trust under Criminal Injuries Compensation Scheme

An award under the Criminal Injuries Compensation Scheme (or the may be transferred to a trust.[217] The applicant under the Criminal Injuries Compensation Scheme is not the settlor of such a trust.[218] That is

[213] See Kessler et al, *Drafting Trusts & Will Trusts* (15th ed, 2023), Chapter 28 (Trusts of Damages).

[214] Court of Protection Practice Note on the settlement of personal injury awards to patients, 15 November 1996, paras 2 and 4; formerly set out in the White Book (Civil Procedure) para 6B-119.

[215] This is self-evident, but if authority is needed, see *Zim Properties v Proctor* 58 TC 371.

[216] Private correspondence.

[217] Para 106 Criminal Injuries Compensation Scheme 2012.

[218] The drafter of Part 2 Chapter 4 FA 2005 assumed this, though one needs to dig a little into the provisions to see why this is so:
(1) CICS trusts are within the provisions: s.35 FA 2005.
(2) Settlor-interested trusts are outside the scope of the provisions: see s.25(3) and 30 FA 2005. (In relation to CGT this was clearer before s.77 TCGA was repealed in 2008).
(3) The claimant under the CICS would always be a beneficiary, so if he was the

consistent with the position under the VTA. However, HMRC have apparently expressed the view that the claimant is the settlor, and in practice this view may well favour the taxpayer (as s.624 ITTOIA reduces the IT charge if the settlor is not a higher rate taxpayer).

The same applies to the Victims of Overseas Terrorism Compensation Scheme.[219]

99.37 Trust made by deed of variation

99.37.1 *The general rule*

Suppose:

(1) B inherits property absolutely from the estate of a deceased, D.[220]
(2) B varies the will so as to create a settlement of that property; and s.142 IHTA and s.62 TCGA apply.

B is clearly the settlor in the general sense.[221]

CG Manual provides:

> **CG37886. Instrument of variation of will or intestacy** [Dec 2021]
> It is quite common for instruments of variation of wills or intestacies to be executed within two years of the testator's (or intestate's) death. In England & Wales the usual form of the instrument is a deed. The general guidance is at IHTM35011+ and guidance on CGT at CG31600+. If an instrument of variation creates a continuing trust which replaces absolute interests in the original will, and there is no statement of intent in the deed or before 1 August 2002 no election, under Section 62(7) TCGA 1992, the person who gives up the absolute interest in favour of the trustees is to be regarded as the settlor for the purposes of the annual exempt amount. His personal position is considered at CG32000+, assuming the variation is gratuitous.

99.37.2 *Settlor for IHT*

For inheritance tax purposes, the effect of s.142 IHTA is probably to override the general sense; the settlor is D and not B. HMRC agree. (The

settlor the trust would be settlor-interested.

So the drafter must have assumed that the claimant was not the settlor, or the provisions make no sense.

[219] Para 99 Victims of Overseas Terrorism Compensation Scheme 2012.

[220] For where beneficiaries vary/resettle a will trust, see 99.22 (Resettlement by beneficiaries).

[221] See 99.7 (A gives to B, B gives to trust).

contrary view is arguable but it will not usually be in the taxpayer's interest to argue it.) IHT Manual provides:

> **IHTM35151 IHT implications of IOV: effect of coming within s.142**
> [May 2020]
> When a variation satisfies the requirements of s.142(1) IHTA and there is a valid election or, on or after 1 August 2002, a valid statement of intent
> - the variation is not a transfer of value, and
> - the IHTA applies as if the deceased had effected the variation
>
> Consequently, for example ...
> [1] if a variation sets up a non-interest in possession trust, the deceased is treated as the settlor, and
> [2] the GWR rules in s.102 FA 1986 cannot apply to a disposition which is accepted as a variation within s.142(1) IHTA. This is because the effect of s.142(1) IHTA is that the deceased is treated as the donor.

Point [1] states that the deceased is the settlor if a variation sets up a non-interest in possession trust. The same rule must in principle apply if the variation sets up an interest in possession trust (but with the added complication of s.80 IHTA rules, if applicable). Likewise Tax Bulletin 15 provides:

> Our view is that, as the relevant IHT legislation differs from the CGT provisions which were considered in *Marshall v Kerr*, that decision has no application to IHT. Variations which meet all the statutory conditions will continue to be treated for IHT purposes as having been made by the deceased.

99.37.3 *IT/CGT: IoV post-2006*

Section 470(2) ITA/s.68B(6) TCGA set out three exceptions to the IT/CGT appointment rule. The third is:

s.470(2) ITA	**s.68B(6) TCGA**
A transfer of property is excluded for the purposes of subsection (1) if ...	But subsections (3) and (4) do not apply in relation to a transfer of property ...
(c) section 473(4) applies in relation to it.	(c) to which section 68C(6) applies.

This excludes the operation of (what I call) the IT/CGT appointment rule. Instead the position is governed by s.472, 473 ITA. Section 472 ITA provides:[222]

> (1) This section applies if—
> (a) a disposition of property following a person's death is varied, and
> (b) section 62(6) of TCGA 1992 applies in relation to the variation.
>
> (2) [i] If property becomes settled property because of the variation
> [ii] and would not, but for the variation, have become settled property),
>
> a person within subsection (3) is treated for the purposes of the Income Tax Acts (except where the context otherwise requires)—
> (a) as having made the settlement, and
> (b) as having provided the property for the purposes of the settlement.
>
> (3) The persons within this subsection are—
> (a) a person who immediately before the variation was entitled to the property, or to property from which it derived, absolutely as legatee,[223]
> (b) a person who immediately before the variation would have been so entitled if that person had not been an infant or otherwise lacking legal capacity,
> (c) a person who, but for the variation, would have become so entitled, and
> (d) a person who, but for the variation, would have become so entitled if that person had not been an infant or otherwise

[222] The CGT equivalent is s.68C TCGA.

[223] Section 472 provides:
"(4) For the purposes of subsection (3)—
(a) 'legatee' includes a person taking property—
(i) under a testamentary disposition or on an intestacy or partial intestacy, whether beneficially or as trustee, or
(ii) under a donatio mortis causa, and
(b) a person who is a legatee as a result of para (a)(ii) is treated as acquiring the property when the donor dies.
(5) For the purposes of subsection (4)(a) property taken under a testamentary disposition or on an intestacy or partial intestacy includes any property appropriated by the personal representatives in or towards satisfaction of—
(a) a pecuniary legacy, or
(b) any other interest or share in the property devolving under the disposition or intestacy."
This is based on the CGT definition: see 88.7.2 ("Legatee").

lacking legal capacity.

Section 472 (and its CGT equivalent, s.68C TCGA) applies in the usual situation, where a beneficiary absolutely entitled to property under a will varies the will so as to create a settlement. Section 68C TCGA enacts the HMRC view that the beneficiary is the settlor for CGT. Section 472 confirms (which no-one ever doubted) that the beneficiary is the settlor for IT.

This applies not just for the standard IT/CGT definition, but for all purposes of IT and CGT. Although the drafter adds the words except "where the context otherwise requires", I cannot think of a case where the context would "otherwise require"; and I expect the drafter has copied without much thought the wording used (appropriately) in s.467 ITA.

Section 473 ITA provides:

> (1) This section applies if—
> (a) a disposition of property following the death of a person ("D") is varied, and
> (b) section 62(6) of TCGA 1992 applies in relation to the variation.
> (2) If—
> (a) property would have become comprised in a settlement within subsection (3), but
> (b) as a result of the variation, the property, or property derived from it becomes comprised in another settlement,
> D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.
> (3) A settlement is within this subsection if—
> (a) it arose on D's death (whether by D's will or on D's intestacy or in any other way), or
> (b) it was in existence immediately before D's death (whether or not D was a settlor in relation to it).
> (4) If—
> (a) immediately before the variation property is comprised in a settlement and is property of which D is a settlor, and
> (b) immediately after the variation the property, or property derived from it, becomes comprised in another settlement,
> D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.
> (5) A settlement treated as made by D as a result of this section is treated for the purposes of the Income Tax Acts as made by D

> immediately before D's death.
> (6) But subsection (5) does not apply in relation to a settlement which arose on D's death.

Section 473 applies in the highly unusual situation where property settled by will is re-settled by beneficiaries.[224] Here the opposite rule is enacted: the beneficiaries are *not* settlors for IT or CGT.

Where s.472 applies, s.472(2) imposes two rules:

(a) the beneficiary ("B") is deemed to have made the settlement;
(b) B is deemed to have provided the property for the purposes of the settlement.

By contrast, where s.473 applies, we only have rule (a): the deceased is deemed to have made the settlement. By implication, rule (b) must also apply: the deceased must be deemed to have provided the property.

CG Manual 37888 [June 2016] provides:

> Where the instrument was executed on or after 6 April 2006 and notice is given under Section 62(7) Section 68C TCGA 1992 applies with these consequences.
> - Where under the will or intestacy property was to pass absolutely to an individual, and a variation is executed settling that property (or property deriving from that property), then the person to whom the property would have passed is the settlor with regard to that property.
> - Where under the will or intestacy property was to be settled, but the variation is such that a new settlement is created (see CG37887) then the deceased is the settlor.
> - Where under the will or intestacy property was to be settled, but the variation is minor, then the deceased would be the settlor without the new legislation in FA 2006 and therefore this case is not provided for specifically.

99.37.4 *Settlor for IT: IoV Pre-2006*

B is the settlor for IT purposes in the case of variations made before 6 April 2006.

99.37.5 *Settlor for CGT: Pre-2006*

The identity of the settlor for CGT is an unresolved question.[225] The issue is whether s.62 TCGA overrides the general sense of settlor. The House

[224] See 99.22 (Resettlement by beneficiaries).
[225] See Sokol "*Marshall v Kerr* Revisited", Taxation, 3 May 2001.

of Lords held in *Marshall v Kerr*[226] that for CGT the settlor is the beneficiary making the variation, not the testator. However, the reasoning relies on the fact that the beneficiary settled a share in an unadministered estate. The position is therefore different if:

(1) the IoV is made after administration of the estate has been completed; or
(2) the will or intestacy is governed by the law of a jurisdiction (such as a civil law jurisdiction) which (unlike common law jurisdictions) does not recognise personal representatives and an administration period; or
(3) the disposition varied is a joint tenancy (because, as in (2), there is no administration period in respect of property passing by survivorship).

In the following discussion cases (1) to (3) above are called "non-administration" cases, and cases where the estate was in administration (like *Marshall v Kerr*) are called "administration cases".

The reasoning of the House of Lords suggests that the law is as follows:

(1) In non-administration cases whenever the IoV is made, the deceased is the settlor.
(2) In administration cases:
    (a) If the IoV is made before 31 July 1978 (the passing of the FA 1978) the beneficiary is the settlor: that, at least, is clear from *Marshall v Kerr*.
    (b) If the IoV is made after 31 July 1978, it is suggested that the deceased is the settlor. *Marshall v Kerr* has been reversed by (what is now) s.62(9) TCGA: this subsection was not in force in the tax years relevant to *Marshall v Kerr*.

To distinguish between administration and non-administration cases is highly anomalous, so this view of s.62(9) TCGA brings welcome consistency into the law. It also brings CGT into line with IHT.

It appears to be the HMRC view that the beneficiary is the settlor even in cases (2) and (3). CG Manual provides:

> **CG37886: instrument of variation of will or intestacy** [Dec 2021]
> ... The Revenue had always considered that Section 62(7) was

[226] 67 TC 56. Lord Walker found the House of Lords' reasoning unpersuasive: "'As If...'—The Wonderland of Statutory Hypotheses" [2016] Statute Law Rev 37. The reader may agree. But courts below the level of the Supreme Court ought to follow it.

> concerned with computational matters only, and had no effect on the question whether a new settlement had come into existence or the identity of the settlor. The majority of the House of Lords, in *Marshall v Kerr*, 67 TC 56, preferred slightly different reasoning in holding that a residuary legatee, who had executed an instrument of variation so that her 50 per cent share of the estate was settled, was the settlor for the purposes of TCGA92/S87 (charge on beneficiaries of non-resident settlements). It may be noted that the case was concerned with the pre-1978 version of the relevant legislation and it is considered that the Revenue's arguments in that case are stronger under the later legislation. Where the instrument was executed before 6 April 2006 this decision should be applied for the purposes of TCGA92/S77 & TCGA92/S86 (charge on settlors of certain settlements) and TCGA92/SCH1 (annual exempt amount for trustees).[227]

The author would have expected litigation on this aspect, but it has not happened. In view of the 2006 reforms, HMRC may not dispute the position for variations before 6 April 2006.

99.37.6 *Settlor of IoV: Critique*

What is the reason for s.473? Perhaps because it can be hard to identify settlors on variations of settlements. Perhaps because, if the will actually settled the property, there is little need or scope for tax planning by IoVs. In practice s.473 is not important. It appears to be dead letter tax law (not the only dead letter tax law enacted under the banner of trust modernisation). Does it matter to have on the statute book complex provisions that never apply and no-one need take notice of? I think it does, and maybe some day some reformer will sweep it away, and bring CGT and IHT into alignment. The IHT rule is a sensible one, for it fits the object of the IoV rules, which is to allow beneficiaries to avoid the tax unfairnesses of badly drafted wills, and to avoid the need for testators to review their wills annually, as tax law changes.

99.38 Charitable trust

HMRC say:

[227] Likewise TSEM1815 [January 2013]:
"The settlor of a trust created by a deed is not the deceased, unless it's a disclaimer (TSEM1840). It is the person who was entitled to the gift that has now gone into trust. The gift can be capital or income or both. The case of *Marshall v Kerr* (67 TC 56) is relevant. There may be more than one settlor."

> **Are donors to a charity to be treated as settlors and therefore his or her details need to be registered?**
> We do not consider donors to be settlors and therefore the details of a donor does not need to be included on the TRS as long as he or she has no influence or control over the trust nor receives a financial benefit from the trust.[228]

That seems a purposive interpretation, as donors do provide (some) property for the purposes of a charitable trust. But perhaps it is assumed that ordinary donations are spent, at which point the donor ceases to be a settlor. Or perhaps it is just impractical to keep track of small donors and so by implication the charity is not expected to.

The statement relates to TRS, but the same points apply to identifying settlors for tax purposes.

99.39 Pension/employee benefit trust

99.39.1 *Is pension/EBT a settlement*

Employers generally create pension trusts and employee benefit trusts for commercial reasons. There is typically:

(1) No bounty (gratuitous intent) on the part of the employer; and
(2) No bounty on the part of the employee, who is not in a position to negotiate or reject the arrangements.

Such a trust is here called "**a commercial trust**".

A commercial trust is a classic trust, and so is a settlement under the IT/CGT definition. However, a commercial trust is not a settlement under the settlement-arrangement definition.

HMRC agree. CG Manual provides:

> **CG14596 Pension funds** [Jul 2019]
> [1] ... It is considered that for the purposes of Income Tax[229] a pension fund, certainly an approved one, is not a settlement, because of the absence of 'bounty'; (see *Berry v Warnett*, 55 TC 92 for a discussion of the bounty test).

[228] TRS FAQs (2017). The point about the exceptional cases for influence/control/ financial benefit is that the donor will be a "beneficial owner" (as defined) without being a settlor. Though in practice a donor should not receive financial benefits from the trust.

[229] The author means, for the purposes of the settlement-arrangement definition of "settlement".

[2] Accordingly transfers of assets to Pension Funds are not connected persons transactions and there is no restriction of availability of losses under section 18(3) TCGA 1992.[230]

99.39.2 *Commercial trust: Settlor*

Since a commercial trust is not a settlement-arrangement, the question of who is the settlor does not arise when the settlement-arrangement definition of settlement is applicable. However the question arises as to who is the settlor of the commercial trust where a classic definition of settlement is applicable.

The answer depends on which definition of settlor applies.

99.39.3 *Settlor of commercial trust: IT/CGT/IHT definitions*

Let us look first at the standard IT/CGT definition and the IHT definition of settlor. Under these definitions "settlor" includes (1) the person who provides property and (2) the person who makes the settlement. It is considered that the position is as follows:

(1) Providing property requires an element of bounty, and no-one can be said to "provide" property to a commercial trust.
(2) To make (or enter into) a settlement does not require an element of bounty.

HMRC agree. The CG Manual provides:

> **CG33220: Basic terms** [Dec 2021]
> ... Basically under S68A(1) to (3) a person is a settlor if:
> [1] he made or entered into the settlement. This describes the person who has had the deed drawn up on his behalf. The property may come from elsewhere; or the transfer of property to the settlement may be without 'bounty' (see next bullet),
> [2] he has provided property for the purposes of the settlement. On the basis of *CIR v Leiner* 41 TC 589 these words are regarded as applying only where there is 'bounty'.
> [3] the property is settled as a result of his will or intestacy.

The employer normally "makes" a commercial trust (normally the employer is a party to the trust deed and the deed is drawn on his behalf)

[230] Point [2] is correct but only relevant for individuals, as a corporate settlor is not connected with the trustees; see 104.14.1 (Settlor/connected persons). For the restriction on losses, see 65.19 (Loss on connected person disposal).

and so the employer is a settlor under the standard IT/CGT definition and the IHT definition.

Similarly, HMRC Business Brief 18/11:

> The settlor of an Employee Benefit Trust will usually be the company, whether or not it is a Close Company.

If the employer is the settlor, and is a company, it follows that excluded property status depends on the domicile (ie place of incorporation) of the company. That is a relatively sensible rule. IHT cannot normally operate on the basis that employees are the settlors of an EBT, since they are normally a large and fluctuating body. It would be odd if an EBT had no settlor for IHT purposes.

99.39.4 *Settlor of commercial trust: s.86 definition*

The CGT s.86 definition of "settlor" is different and does *not* include the person who makes or enters into a settlement. So the employer is not a settlor for the purposes of s.86. HMRC agree:

> **CG38445: Settlor - TCGA92/S86** [Jul 2019]
> [The Manual refers to the CGT s.86 definition and continues:] The basic requirement is that the property is provided by them. *CIR v Leiner* 41 TC at page 596 shows that the word "provided" must connote bounty in appropriate circumstances. Therefore a settlement devoid of bounty is not within section 86. An example would be a genuine commercial arrangement by a company to attract, retain and motivate good quality staff. HMRC published this view in Tax Bulletin 16.

99.39.5 *Employee settlor of EBT*

CG Manual para 35020 [June 2016] states in relation to unapproved pension schemes:

> ... it can also be argued that the employees themselves are also settlors.

Similarly, the comment that employers and employees are not settlors is said in the passage set out above to apply only to "normal commercial arrangements".

Why are employees not settlors in normal cases? There may be two reasons:

(1) The employee may not have provided anything as they normally gave up no rights when the employer made the transfer to the trust. The trust is created at the discretion of the employer and these employees

play no part in it.

(2) Common form employee benefit trusts benefit a wide class of beneficiaries, so one may not be able to identify any particular part of the trust fund as provided by any particular employee (even if it is the case that a class of employees have jointly provided the trust property). That would preclude any charge to tax on any employee.

Employees may be settlors where these factors are both absent.

The TSE Manual provides:

> **TSEM5350 Settlements legislation for EFRBS** [Sep 2021]
> The Settlements legislation in Chapter 5 Part 5 ITTOIA will not apply if the scheme is operating on bona fide commercial lines, as part of an employment package. But in certain circumstances, the Settlements legislation may apply to charge the EFRBS trust's income on a director/member.
> The Settlements legislation provisions can apply if the trust is not genuinely to provide retirement benefits and/or the beneficiary of the trust has directly or indirectly provided funds for the settlement (see TSEM4120).
> The Settlements legislation will not apply where only the employer makes contributions - unless the contributions are
> - made by a close company which a member controls and
> - unrealistically large by normal commercial standards.
>
> For example, if there is only one director who is also the sole shareholder of the employing company and substantial contributions are made into the EFRBS, the Settlements legislation may apply to treat the director/shareholder as the settlor. The Settlements legislation will not apply if a member makes contributions that are reasonable compared to their salary. If you think the Settlements Legislation may apply, see (TSEM4000) onwards...

In *Brooks v Brooks*, a family law case:[231]

> The settlor was the husband [the employee] not the company. The company was not the settlor, because the provision it made for the husband by the scheme was in his capacity as an employee. This provision was in the nature of deferred remuneration. Thus this surplus, belonging as it does to the company, was never brought into the settlement made by the husband. It does not form part of the settled

[231] [1996] AC 375 at p.394.

property.
As between the company and the husband the scheme represented deferred remuneration. The position is different as between the husband and the wife. As between them the benefits which the husband and his family acquired under the scheme formed the property of a marriage settlement. But those benefits did not include any entitlement to the surplus money.

99.40 Property provided by company

The position is complicated by differences in the definitions of settlor.

99.40.1 *Co settlor: s.86 definition*

The s.86 definition of settlor is unique in that it makes express provision to treat shareholders and certain other participators as settlors, where a close company provides property.

Para 8(4) sch 5 TCGA provides:

> For the purposes of this paragraph...

The rule depends on whether the company is controlled:
(a) by one person alone
(b) by 2 or more persons (taking each one separately)
(c) by 2 or more persons (taking them together)

Para (a) - (c) are conveniently read side by side:

Para 8(4)(a) **Control by: one person**	**Para 8(4)(b)** **persons separat ely**	**Para 8(4)(c)** **persons together**
where property is provided by a qualifying company[1] controlled[2] by one person alone at the time it is provided,	where property is provided by a qualifying company controlled by 2 or more persons (taking each one separately) at the time it is provided	where property is provided by a qualifying company controlled by 2 or more persons (taking them together) at the time it is provided,
that person shall be taken to provide it;	those persons shall be taken to provide the property and	the persons who are participators[3] in the company at the time it is provided shall be taken to provide it and

	each one shall be taken to provide an equal share of it;	each one shall be taken to provide so much of it as is attributed to him on the basis of a just apportionment;
		but where a person would be taken to provide less than one-twentieth of any property by virtue of paragraph (c) above and apart from this provision, he shall not be taken to provide any of it by virtue of that paragraph.

[1] Para 8(5) sch 5 TCGA provides: "For the purposes of sub-paragraph (4) above a qualifying company is a close company or a company which would be a close company if it were resident in the UK." For a note on this terminology, see 104.29.1 (Non-resident close company).
[2] See 60.4.2 ("Control" and "participator").
[3] See 60.4.2 ("Control" and "participator").

The wording is based on s.96(3)-(5) TCGA; see 61.11.2 (Consequence of capital payment to co).

Why does the s.86 definition have this provision which is not found in any other definition of settlor? The answer may be because the s.86 definition is narrower than the others, lacking the rule that someone who makes a settlement is a settlor.[232]

If para 8 applies (so that identified person(s) are "taken to provide" the trust property) it is considered that no other person should be taken to provide the property; in particular, the close company itself is not the settlor for s.86 purposes (even if it may otherwise be said to provide property). But the point may not arise.[233]

99.40.2 *Co settlor: Other definitions*

In *Copeman v Coleman* a company held equally by husband and wife issued shares at an undervalue to their children. This was a settlement-arrangement and the husband was a settlor:

> [the husband] was a[234] 'settlor' ... I am unable to see how the word

[232] See 99.39.4 (Settlor of commercial trust: s.86 definition).
[233] See 60.16 (Corporate settlor).
[234] In fact, husband and wife were joint settlors, though this was not specifically addressed. It did not need to be, as at the time:

> "indirectly" can be limited in the way which is suggested so as to exclude the settlements which are made through the interposition of a company.[235]

The company may also be a settlor, having provided the property directly, but it will not normally matter if it is.[236]

Para 21 Protected-trust Note[237] provides:

> It is considered that a loan (unless on arms' length terms) or other provision to the trust by a company owned by the settlor normally amounts to a provision of property by the settlor. This may not be so if the provision is for the purposes of the company's business and is in the interests of the company as distinct from those of its shareholder(s).

In the 2023/24 edition of this work I summarised the law as follows:

> Where a company makes a settlement, by providing its own property or issuing shares at an undervalue, the individual controlling shareholder(s) will be settlor(s) on the basis that they have provided the property indirectly.
>
> In relation to companies with only one shareholder, it will usually be clear that the shareholder is providing property indirectly, assuming an element of bounty (gratuitous intent).
>
> The same applies to quasi-partnership companies, that is, companies that are in practical terms run as a partnership between the shareholders.

The question arises as to whether this is still right after *HMRC v Fisher*, which held where a company makes a transfer, the shareholders (even 100% shareholders) are not "transferors" for s.720 purposes.[238] The SC gave 4 reasons for its decision. They do not apply in the present context:

Reason 1: ToA had no apportionment provision. But for settlors, there is likely to be one.[239]

(1) Tax was deducted from dividends and could be reclaimed if the recipient was not taxable. The case concerned a claim by the children for a refund of tax.

(2) The income of a married woman was deemed to arise to her husband.

[235] 22 TC 594 at p.601, followed in *Young v Pearce* 70 TC 331. Further authority is not needed, but for completeness there is also *Bird v HMRC* [2008] UKSPC SPC00720 (noteworthy for finding that the taxpayer was not negligent for having failed to understand the definition of "settlement") and *Clipperton* discussed below.

[236] A corporate settlor matters for CRS, see 130.23.4 (Co settlor: change of owner).

[237] For the Protected-trust Note, see 99.2.4 (Guidance).

[238] See 49.6 (Shareholders not transferors).

[239] See for instance 100.1 (Trust with multiple settlors); but other provisions dealing with settlors often make provision for multiple settlors.

Reasons 2 & 3: If we have a rule for controlling shareholders, we need to know what is meant by control. A rule which distinguishes active/knowledgeable shareholders from passive ones is a difficult line to draw and ToA does not specify the tests. But for settlors, the bounty test deals with these points.

Reason 4: Motive defence issues, which apply for s.720 but not for provisions dealing with settlors.

SC were also influenced by what they regarded as the exceptionally penal nature of the ToA code.[240]

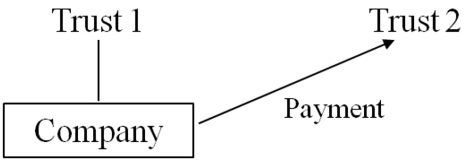
So *Fisher* does not alter the rule that shareholders may be settlors, provided their involvement with the company's actions which created the settlement contains an element of bounty. The position is perhaps clearer when the settlement-arrangement definition is applicable, as the involvement of shareholders may be one of the steps which may constitute the settlement-arrangement.[241] But the position is the same when the other definitions of settlement apply. In practice the issue does not arise for settlors as much as it does for ToA, because arm's length transactions for full value are transfers of assets, but not likely to create settlements.

99.40.3 *Transaction with underlying company*

Of course the position is different if a company is wholly owned by the trust: transactions between a trust and its underlying companies cannot amount to providing property, so the company cannot be a settlor.[242]

99.40.4 *Company held by trust*

Suppose a transfer from a company held by trust 1 to trust 2:



The settlor of trust 1 will be a settlor of trust 2, having provided the

[240] It is difficult to generalise, as "settlor" is used in so many cases. Some settlor rules may be regarded as penal, such as tainting rules, but still, not as penal as ToA.

[241] See *Clipperton*, discussed at App. 2.2.7 (Pre-arrangement steps).

[242] See 99.24.1 (Transfer within trust/co group).

property indirectly.

What about the s.86 definition? As trust 1 controls the company, para 8(4) states that the trustees of trust 1 are taken to have provided the property! But the context shows that here too, the settlor of trust 1 is the settlor of trust 2; and the para 8(4) deeming is not intended to apply to make the trustees of trust 1 settlors of trust 2: the scheme of the TCGA is that trustees are fiduciaries and cannot be settlors.

99.41 Planning to create excluded property trust

The "who is the settlor" question may arise in a tax planning context where it is desired to create an excluded property trust by transferring property to a foreign domiciliary, who will then make a settlement. These arrangements are always challenging and sometimes impossible to carry out in practice, for the outcome depends ultimately on intention, and that cannot be manufactured to suit the circumstances.

Example 1
(1) H (UK domiciled) gives property to W (not UK domiciled).
(2) W gives the property to a trust.

Who is the settlor: H or W or both?

The success of schemes involving a transfer to a foreign domiciliary who creates a settlement depends on how the transaction is carried out. Does W have a sufficiently independent role?[243] It is suggested that W should retain the property for at least one year; that no decision be made as to whether or not to create a settlement at the time of the gift from H to W; *a fortiori* no decision should be made on the terms of the trust; and W should receive independent legal[244] advice on any proposed gift to a settlement.

Example 2
(1) Trustees of a trust (with a UK domiciled settlor) appoint property to a beneficiary ("B") (not UK domiciled).
(2) B gives the property to a new trust.

In principle, the settlor of the new trust will be B, not the settlor of the old

[243] See 99.7 (A gives to B, B gives to trust).

[244] W may also need tax advice, but what matters here is that W has independent advice on the property law aspects of the gift.

trust.[245] But it is different if B is acting at the behest of the settlor.[246]

Watch the proper purpose rule, and the GAAR. It would be better if the terms of the new settlement are different from the terms of the old. For an (almost unbelievable) example of botched execution of this planning, see *Anker-Petersen v Christensen*.[247]

[245] See 99.9 (Trust appoints to B, B gives to new trust).

[246] See 99.8 (B makes trust at A's request).

CHAPTER ONE HUNDRED

MULTIPLE SETTLORS

100.1 Trust with multiple settlors
100.1.1 Where multiple settlor provision does not apply
100.1.2 Multiple settlor provisions
100.1.3 Originating
100.1.4 Two settlors: CGT guidance
100.2 Just & reasonable apportionment
100.2.1 Direct and indirect settlors
100.2.2 Loan/guarantee/paying trust expenses

Cross references

The following topics are considered elsewhere:

Topic	**See**
Settlor-interested trusts with only one settlor	47.1 (Income Tax); 60.1 (CGT)
Beneficiary relief conditions	47.10.1
IHT aspects of trusts with two or more settlors	79.2

100.1 Trust with multiple settlors

This chapter considers the IT and CGT position where a settlor-interested trust has more than one settlor. I deal with this in one chapter as the IT/CGT issues overlap. For IHT issues, see 79.5 (Separate-settlement fiction).

100.1.1 *Where multiple settlor provision does not apply*

In *Herbert v IRC*,[1] the facts (in short) were:

(1) Property was held on trust for L for life, remainder to R.
(2) L and R directed that the property should be transferred to a new trust.
(3) The trust was revocable (and so settlor-interested).

R was assessed on the income of the new trust under a provision

[1] 25 TC 93.

equivalent to s.624 ITTOIA.[2] The judge observed:

> [R] is not the only settlor. [L] is also a settlor... the Act does not prescribe what is to happen when there is more than one settlor ... It is not suggested that all the settlors can all be assessed in respect of all the income. That, indeed, would seem to be an extravagant proposition. Nor is it suggested by the Crown that the income should be distributed between them....
> The interpretation of the Section put forward on behalf of the [Revenue] was that where there are two or more settlors the Crown has the option to assess any one of the settlors to the exclusion of the other, and that, in the case of an assessment to Income Tax ... the option must be exercised by the local Inspector of Taxes and that there was no right of appeal by the taxpayer against the Inspector's choice. ... I find myself unable to accept that interpretation. It seems to me fantastic to suppose that Parliament has conferred upon Inspectors of Taxes, or even upon the Special Commissioners, a choice as to whether A, or B, or C should be liable to Income Tax...

What seemed "fantastic" in 1943 does not seem so today. The reader may wonder if a Court would have reached the same decision today: the answer is no, see below.

100.1.2 *Multiple settlor provisions*

Section 644 ITTOIA now makes provision for a settlement with multiple settlors:

> (1) In the case of a settlement where there is more than one settlor, this Chapter has effect in relation to each settlor as if that settlor were the only settlor.
> (2) This works as follows.
> (3) In this Chapter, in relation to a settlor—
> (a) references to the property comprised in a settlement include only property originating from the settlor, and
> (b) references to income arising under the settlement include only income originating from the settlor.
> [Subsections (4) and (5) deal with ss.629-632 ITTOIA (settlements for minor children of the settlor) which is not discussed here.]

Similarly, for s.86, para 7 sch 5 TCGA provides:

[2] I guess that L was not assessed because he was non-resident.

> For the purposes of section 86 and this Schedule, a person is a settlor in relation to a settlement if the settled property consists of or includes property originating from him.[3]

100.1.3 *Originating*

There are commonsense definitions of property/income “originating from” a person:

s.645 ITTOIA	**para 8 sch 5 TCGA**
(1) References in sections 628A and 644 to property originating from a settlor are references to—	(1) References in section 86 and this Schedule to property originating from a person are references to—
(a) property which the settlor has provided directly or indirectly[4] for the purposes of the settlement,	(a) property provided by that person;
(b) property representing[5] property so provided, and	(b) property representing property falling within paragraph (a) above;
(c) so much of any property which represents both property so provided and other property as, on a just and reasonable apportionment, represents the property so provided.	(c) so much of any property representing both property falling within paragraph (a) above and other property as, on a just apportionment, can be taken to

[3] See 60.11 (Section 86 gains condition); 99.2.11 (CGT s.86 definition of “settlor”).

[4] Section 645(3) ITTOIA deals with reciprocal arrangements: “In this section references to property or income which a settlor has provided directly or indirectly—
(a) include references to property or income which has been provided directly or indirectly by another person under reciprocal arrangements with the settlor, but
(b) do not include references to property or income which the settlor has provided directly or indirectly under reciprocal arrangements with another person.”
See 99.4 (Reciprocal arrangements).

[5] See App 2.9 (“Representing assets). There is the standard provision:

s.645(4) ITTOIA	**para 8(6) sch 5 TCGA**
In this section references to property which represents other property include references to property which represents accumulated income from the other property.	For the purposes of this paragraph references to property representing other property include references to property representing accumulated income from that other property.

	represent property so falling.
(2) References in sections 627 and 644 to income originating from a settlor are references to—	(2) References in this Schedule to income originating from a person are references to—
(a) income from property originating from the settlor, and (b) income provided directly or indirectly by the settlor.	(a) income from property originating from that person; (b) income provided by that person.
	(7) For the purposes of this paragraph property or income is provided by a person if it is provided directly or indirectly by the person.

Thus on the facts of *Herbert*, the income of the new trust would in principle be treated as the income of L for his life, under s.624, and as the income of R after the death of L. How would gains be apportioned? It is suggested, by reference to actuarial values at the date of the resettlement. But it will not happen often, if at all.

Section 644 applies where there is *one* settlement with more than one settlor. In some IT cases one might say that there are two settlement-arrangements. Eg suppose:

(1) S creates a trust
(2) Subsequently, and independently, X adds to it.

One might say that:

(1) there are two distinct settlement-arrangements (even if there is only one classic settlement)
(2) S and X are the (sole) settlors of their settlement-arrangement.

However s.644 is another route to the same destination. It does not matter which analysis one takes, though s.644 seems a clearer solution.

100.1.4 *Two settlors: CGT guidance*

The CG Manual contained guidance which related to s.77 -79 TCGA. Those sections were repealed in 2008 but the guidance remained in the Manual until 2020 when it was finally removed. I set it out here as it is still relevant to s.86:

> **CG34893 Multiple settlors** [Version of Jul 2019, removed 2020]
> Section 79 [TCGA] provides that trust gains are only to be attributed to each settlor to the extent that those gains accrue on property originating from that person. Where the assets provided by two or more settlors are managed as separate funds, there should be no difficulty in determining to which settlor the gains on the disposal of particular items of property should be attributed. Where the assets provided by different settlors are not appropriated into separate funds, the legislation provides for a just apportionment as between the settlors.
> **CG34894 Multiple settlors** [Version of Jul 2019, removed 2020]
> If HMRC Trusts Head Office Bootle or Financial Intermediaries and Claims Office (formerly Claims Branch) have given advice on apportionment for Income Tax purposes, this should be followed for CGT. Otherwise, if settlors together make the settlement, the gains in such a case should be apportioned according to the amounts each put in. If a settlor adds to a settlement, then the amount put in should be compared with the value of the settlement at that time. Trust Offices should endeavour to reach a fair and easily worked solution.
> **CG34895 multiple settlors** [Version of Jul 2019, removed 2020]
> If one settlor is within Section 79 [TCGA] and the other is not, the gains are apportioned on the lines suggested, but those relating to the settlor who is outside Section 79 are assessed on the trustees in the normal way after deducting the trustees' annual exempt amount.
> **CG34900 Example 1** [Version of Jul 2019, removed 2020]
> A and B each settle ordinary shares in X Limited on a trust under which both Mrs A and Mrs B have an interest as defined by the new provisions. A settles 500 such shares and B 1500. It is accepted that there is only one settlement for CGT purposes and the shares are not appropriated into separate funds.
> In 1988-89 there is a gain of £2,000 on the sale of some of the shares, [there is] a loss of £400 on the sale in 1989/90 of further shares and in 1990-91 a gain of £500 on the sale of shares in Y Limited acquired with the sale proceeds of the shares in X Limited.

The HMRC analysis is as follows:

> In 1988-89, as A and B settled property in the proportion 1:3, there is, on a just apportionment, a chargeable gain of £500 (2000 × ¼) accruing to A.
> Similarly a gain of £1500 is treated as accruing to B. Each is assessed as appropriate.

That is straightforward. The example then turns to consider the loss in the next year and the gain in the following year:

> The loss of £400 in 1989-90 is apportioned £100 to A and £300 to B. The gain of £500 in 1990-91 is apportioned £125 to A and £375 to B. The loss of £100 in respect of the property provided by A is set against the gain of £125, leaving a net gain of £25 to be attributed to A. Similarly the loss of £300 in respect of the property provided by B is set against the gain of £375 on the property provided by him, leaving a net gain of £75 assessable on B.

More analytically, the loss is not attributed to A or to B (either under the former s.77 or under the existing s.86.) It is carried forward and set against future gains of the trustees. The net gain in 1990/91 is £100 which is apportioned £25 to A and £75 to B. But the end result is the same.

> **CG34901 Example 2** [Version of Jul 2019, removed 2020]
> The facts are as in Example 1 except that by a deed executed during 1988-89 Mrs B irrevocably excludes herself from the class of beneficiaries.

The HMRC analysis is as follows:

> The gains of that year are apportioned and attributed as before because Mrs B had an interest in the settlement at some time during the year.

More analytically, this result obtains because at some time in the year *Mr* B had an interest in the settlement, for the purposes of s.77 TCGA, because his spouse Mrs B could benefit.[6] But the end result is the same.

> The losses of 1989-90 and the gains of 1990-91 are apportioned in the same way, and the net gains of £25 for 1990-91 are attributed to A.

More analytically, the losses are set against the trustees gains; but it is correct that of the net £100 gains, £25 is attributed to A on a just and reasonable apportionment.

> There can be no attribution to B in 1990-91 because neither he nor his spouse has an interest in the settlement in that year. Accordingly the gains on the assets deriving from the property provided by B are assessable on the trustees and the trustees can claim the annual

[6] The trust created in the example is unusual, because the settlors Mr A and Mr B are excluded, but their spouses are beneficiaries. But this might be done in practice, to avoid GWR issues.

exemption due to them...[7]

100.2 Just & reasonable apportionment

The multiple settlor provisions are straightforward if two individual ("A" and "B") directly transfer property to a trust. A and B are both settlors and the property originating from A and B can be identified.

100.2.1 *Direct and indirect settlors*

Suppose there is an arrangement under which:
(1) A makes a gift of property to B, and
(2) B gifts the property to a trust.

A is a settlor (having provided property indirectly) and it seems at first as if B is also a settlor (having provided the property directly).[8] But A and B have provided the *same* property. There is no provision how to apportion trust income or gains between A and B and, since the income and gains cannot be subject to tax twice, it is considered that s.624 and s.86 do not apply at all; see 100.1.1 (Where multiple settlor provision does not apply). The solution to the problem is that A is the "real" settlor, and B is not to be regarded as the settlor.

This issue sometimes arises in the context of failed tax planning of the kind discussed at 99.41 (Planning to create excluded property trust).

In *Clipperton*[9]

> 158. We consider that on a straightforward construction of sections 644 and 645, those provisions are sufficiently wide to encompass a situation where the same property can be said to have been provided by more than one settlor. The definition of "settlor" in section 620 is, as we have seen, very wide ... Where there is more than one person falling within the definition, Section 644(1) then operates to treat each of them as the only settlor, and to treat references in the settlements code to property comprised in the settlement or income arising under the settlement as including only property or income originating from the person treated as the only settlor.
>
> in principle sections 644 and 645 could lead to "double taxation".

[7] The Manual continues with some (I think erroneous) comments on the interaction of the annual exemption and loss relief; but it is not necessary to pursue that here.

[8] See 99.7 (A gives to B, B gives to trust).

[9] Clipperton is discussed 87.5.8 (No intention to benefit others).

It might have been different if *Herbert* had been cited. An easy way to conclude the matter is to say that for the purposes of the settlor-interested trust code, the shareholder should be treated as the real or effective settlor.

A higher court may well prefer the solution of a just and reasonable apportionment. But on the facts here, these are two different routes to the same destination

100.2.2 *Loan/guarantee/paying trust expenses*

Similar issues arise where:

(1) S makes a settlement; and

(2) X provides further funds indirectly to the settlement, for instance by way of beneficial loan, guarantee, or payment of trust expenses.

X may be a joint settlor, but (even if the trust is settlor-interested) s.624 still does not apply to X unless it is possible to identify the income provided by X, ie arising from X's act of bounty. In some cases one may say that all the income originates from S, so that s.624 applies to S but not to X. In other cases the contribution of S may be nominal, and one may be able to say that all the income originates from X.

CHAPTER ONE HUNDRED AND ONE

STATUTORY TAX INDEMNITIES

101.1 Statutory tax indemnities
101.2 Settlor trust-tax indemnities
101.2.1 Certificate of tax paid
101.3 Procedural issues
101.3.1 Indemnity time limit
101.3.2 Change of trustees
101.3.3 Enforceability of indemnity
101.4 Tax on indemnity payment
101.5 Failure to claim indemnity
101.5.1 Settlor/tainting issues
101.5.2 Failure to claim: IHT issues

101.1 Statutory tax indemnities

The taxes acts often authorise a taxpayer to recover tax from another person. I refer to these as **"statutory tax indemnities"**. They arise in a variety of cases.

Settlors have an indemnity in the following cases:

Tax charge on settlor	**Indemnity**	**Indemnity against**	**See**
s.624/629 ITTOIA	s.646 ITTOIA	Trustees + others	101.2
s.86 TCGA	para 6 sch 5 TCGA	Trustees	101.2
Policy/chargeable event gain	s.538 ITTOIA	Trustees	101.2
Settlor-attribution rules	s.87G(3) TCGA	Original recipient	61.28

Agents have an indemnity against their principal in the following cases:

Topic	**Indemnity**	**See para**
Non-resident landlord representative	s.971 ITA	24.17
Agent of non-UK resident	s.835X ITA	124.6.4

Other more specialist statutory tax indemnities include:

Topic	**Indemnity to**	**Statutory ref**	**See**
Clawback of hold-over relief	Donor	s.168(9) TCGA	12.2
Trust migration	Retired trustee	s.82(4) TCGA	12.5
Disposal of equitable interest	Disponor	para 11 sch 4A TCGA	-

In other cases there is no statutory indemnity, but there is some tax relief which allows the relevant person to make a payment to the taxpayer if they chose to do so, without the usual tax consequences of a voluntary payment.[1]

The focus of this chapter is settlor indemnities against trustees. However similar considerations can apply to other types of indemnity, including indemnities in non-tax statutes, and non-statutory indemnities.[2]

101.2 Settlor trust-tax indemnities

The indemnities for the settlor against trustees use standard form wording:

s.646(1) ITTOIA	**Para 6 sch 5 TCGA**	**s.538 ITTOIA**
“s.624 indemnity”	**“s.86 indemnity”**	**“chargeable event indemnity”**
	(1) This paragraph applies where any tax becomes chargeable on, and is paid by, a person in respect of gains treated as accruing to him in a year under section 86(4).	(1) This section applies if— (a) immediately before a chargeable event the rights under the policy or contract, or the part of or share in them in question, were held on non-charitable trusts, (b) an individual is liable for tax under this Chapter for the tax year on the gain from the event, and (c) the income tax for which the individual is liable for the tax year, after any relief available in respect of the gain under section 535 (top slicing relief),[3] exceeds that for which the individual would have been liable apart from the event.
A settlor is entitled to recover from— (a) any trustee, or	(2) The person shall be entitled to recover the amount of the tax from	(2) The individual is entitled to recover that excess from the trustees, subject to the

[1] See 64.22 (Reimbursement by non-resident co); 51.5 (Distribution relief).

[2] On whether person granting an indemnity to a trust provides property, or adds value, see 99.27 (Giving an indemnity).

[3] Section 538(4) ITTOIA provides

> “If the individual's relief under section 535 for the tax year does not relate only to the gain from the event in question, for the purposes of subsection (1)(c) a proportionate part of that relief is taken to be relief in respect of that gain.”

(b) any other person to whom the income is payable in connection with the settlement,[4] the amount of any tax paid by the settlor which became chargeable on the settlor under section 624 or 629.	any person who is a trustee of the settlement.	restriction specified in subsection (3).
[No equivalent]	[No equivalent]	(3) The amount recovered must not exceed the total of— (a) any sums received by the trustees because of the chargeable event, and (b) the value of any benefits so received.

These indemnities do not extend to interest or penalties.

The settlor may not need the s.624 indemnity, because in the case of a settlor-interested trust, the trustees will normally pay the tax (and the settlor will have a tax credit for that payment).[5] The s.624 indemnity might be needed if the trustees do not pay the tax (eg in the case of a non-resident settlor-interested trust). Though I wonder how often it is used. The chargeable event indemnity is niche. So the s.86 indemnity is the most important.

Where the settlor has an indemnity against the trustees it is the beneficiaries who ultimately bear the burden of the tax charge, but they do so at the settlor's marginal rates. This may favour the taxpayer, because trust income may otherwise be taxed at the trust rates, ie the top rates; so in a very rough and ready way the rules can mitigate the unfairness of taxing trust income at the trust rates, when beneficiaries may be lower rate taxpayers.

The s.624 indemnity is wider than the other two, as it allows a claim against any person to whom the income is payable in connection with the settlement, but I doubt if that is much used.

It might happen that:

(1) The settlor ("S") pays tax to HMRC

[4] The same wording is used in s.646(4), see 47.11.3 (Excess credit returned to trust).

[5] See 47.11 (Trustees of settlor-interested trust).

(2) S recovers that tax from the trustees under a statutory indemnity
(3) S later obtains a repayment of the tax from HMRC

The trustees would in principle have the right to recover the repayment under the law of restitution.

101.2.1 *Certificate of tax paid*

s.646 ITTOIA	**Para 6 sch 5 TCGA**	**s.538 ITTOIA**
(2) For this purpose, the settlor may require an officer of Revenue and Customs to provide the settlor with a certificate specifying— (a) the amount of income in respect of which the settlor has so paid tax, and	(3) For the purposes of recovering that amount, the person shall also be entitled to require an inspector to give him a certificate specifying— (a) the amount of the gains concerned, and	(5) An individual may require an officer of Revenue and Customs to certify an amount recoverable by the individual under this section.
(b) the amount of tax so paid.	(b) the amount of tax paid,	
(3) A certificate provided under subsection (2) is conclusive evidence of the facts stated in it.	and any such certificate shall be conclusive evidence of the facts stated in it.	(6) Such a certificate is conclusive evidence of the amount.

101.3 Procedural issues

101.3.1 *Indemnity time limit*

Section 9(1) Limitation Act 1980 provides:

> An action to recover any sum recoverable by virtue of any enactment shall not be brought after the expiration of six years from the date on which the cause of action accrued.

Different time limits may apply in foreign court proceedings.

The cause of action accrues when the tax due is paid. Tax may be assessed up to 20 years after the income or gain arises, and following assessment, tax may not be paid until subsequent appeal and collection proceedings have been completed, so it is possible that trustees may be subject to an indemnity to pay tax due in respect of income or gains which accrued 30 or more years previously; though one hopes that would rarely if ever happen in practice.

101.3.2 *Change of trustees*

As trustees are a single and continuing body, for tax purposes, it is suggested that the indemnity lies against the person who is trustee when proceedings for the indemnity commence, not the person (if different) who was trustee when the income/gains arose.

101.3.3 *Enforceability of indemnity*

For enforceability of statutory tax indemnities in foreign jurisdictions, see:

Campbell, " CGT: The Settlor's Predicament" [1999] PCB 277
Peacock, "CGT: A Worthless Right?" [1999] PCB 204
Sartin, "Tax Recovery Claims by the Settlor" [1999] PTPR 237

101.4 Tax on indemnity payment

SP 5/92 provides:

> 8[1] The settlor's right, under Para 6 Sch 5 TCGA, to reimbursement (or any payment in reimbursement) of tax paid under that Schedule is not regarded as creating an interest in a trust for the settlor under the provisions of [the settlor-interested trust code] where the settlor, the settlor's spouse, and any companies in which they are participators cannot otherwise benefit from the trust, eg where the only beneficiaries are the settlor's children.
> [2] Similarly, this statutory right to, or payment in, reimbursement is not regarded as bringing the settlor within the provisions of [s.633 ITTOIA, and the ToA provisions],
> [3] nor as a capital payment for the purposes of s.97 TCGA.[6]
> 9[1] Further, this statutory right is not regarded as a reservation of benefit for inheritance tax purposes;
> [2] nor is a provision in the trust deed either requiring the trustees to recognise the settlor's right to reimbursement under Para 6 Sch 5 TCGA

[6] The CG Manual makes same point:

> **"CG38625: Capital payments** [Jul 2019]
> A beneficiary or settlor who has pays tax in respect of a non-resident settlement may have a statutory right to recover that tax from the trustees. For example, a repayment of Income Tax to a settlor under ITTOIA05/S646 or Capital Gains Tax under TCGA92/Sch 5 para 6. This is not treated as a capital payment."

Likewise reimbursement is not a benefit for ToA purposes, the concept of benefit is the same. That is self-evident, but if authority is needed, see Protected-trust Note para 22: "Reimbursement of tax paid by the settlor is not a benefit under the transfer of assets rules provided the right to reimbursement is statutory".

> or to reimburse the settlor...[7]
>
> 10 A provision written into a settlement deed requiring the trustees to recognise the settlor's right to reimbursement under Para 6 Sch 5 TCGA, or to reimburse the settlor,
>
> [a] is not, of itself, regarded as giving the settlor an interest in the settlement for the purposes of Sch 5,
>
> [b] nor as bringing into play the provisions of [s.624 ITTOIA, and the ToA Provisions].

There are many points bundled in this list, but they all arise from the same fundamental point, namely, that a payment to the settlor under a settlor trust-tax indemnity is not a benefit to the settlor.

Why not, when the exercise of the indemnity involves the payment of a sum to the settlor? The answer may be that one looks at the matter as a whole: the settlor has received £x and paid £x in tax; so looked at overall, the settlor is no better off than before.

Another possible answer may be that before the repayment the settlor has a valuable right - the right to the repayment, so the settlor is no better off after the payment. This answer requires one to ignore the possibility, which will sometimes be the case, that the indemnity is not in fact enforceable.

The same applies to:

(1) All statutory tax indemnities
(2) Trust law indemnities[8]
(3) Contractual indemnities, such as may arise on retirement of trustees
(4) Equivalent foreign tax law indemnities

A settlor is not entitled to claim under the indemnity until they have paid the tax due to HMRC. What if reimbursement is made sooner, before the

[7] SP 5/82 makes similar points for the indemnity to a former trustee of an exit charge:

> 6 An amount recovered from present trustees by a former trustee in respect of capital gains tax under TCGA 1992 s 82 is not regarded as a capital payment under s 97. Further, such amounts do not fall within the provisions of [what is now s.720, 727 or 731 ITA] nor are there any inheritance tax implications.

See 12.5 (Trustees liable for exit charge).

[8] Eg s.31 Trustee Act 2000 which provides:

> "A trustee-
>
> (a) is entitled to be reimbursed from the trust funds, or
>
> (b) may pay out of the trust funds,
>
> expenses properly incurred by him when acting on behalf of the trust."

settlor has paid the tax? It is considered that there is no benefit (or the value of the benefit is nil) when trustees pay a sum to a settlor in *bona fide* settlement of a claim or prospective claim for reimbursement.[9]

Income spent in meeting a statutory indemnity ceases to be relevant income for s.731.[10] See too 98.27 (Indemnities and guarantees).

101.5 Failure to claim indemnity

101.5.1 *Settlor/tainting issues*

SP 5/92 para 24 provides:

> [1] Failure, by or on behalf of any relevant person, to exercise statutory rights to reimbursement e.g. under [s.646 ITTOIA],[11] may be regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).[12]

Point [1] only applies to a failure to exercise rights with gratuitous intent (ie with an element of bounty). This is the reason for the exceptional case which para 24 then mentions:

> [2] The settlement could (?) remain outside the terms of para 9(3) where the exercise of the right to reimbursement is unsuccessful, provided it could be shown that there had been a genuine attempt to enforce rights to reimbursement.

[9] HMRC once floated the contrary view, but it was a bad point, and perhaps they have now dropped it.

[10] See 50.28 (Relevant income spent).

[11] See 101.2 (Settlor trust-tax indemnities).

[12] For SP 5/92 and para 9(3), see 99.2.4 (Guidance).
For completeness, Tax Bulletin 8 correctly qualifies para 24:

> "Para 24 of the Statement of Practice [5/92] points out that failure to exercise statutory rights to reimbursement against non-resident trustees may be regarded as the provision of funds for the purposes of the settlement under para 9(3) of Schedule 5, TCGA 1992. This will not, however, apply in respect of a settlor's non-exercise of statutory rights to reimbursement out of the trust income account where the settlor has a life interest in all the assets of the trust. In such circumstances, failure to exercise the right to reimbursement would, effectively, not add funds to the trust since all income would, in any ease, either be paid to the settlor under the terms of the trust deed or be used to meet expenses chargeable against income.
> But even in such cases the settlor may have rights to reimbursement out of the trust capital account, eg in relation to accrued income charges, which if not exercised will be regarded as the provision of funds."

The exception is stingily worded.[13] It is not necessary to show "a genuine attempt to enforce rights to reimbursement". It is sufficient to show that:

(1) such rights are not enforceable, or
(2) a decision not to obtain reimbursement is a commercial one because enforcement, or even just taking advice on enforcement, would not be or does not seem cost-effective, or
(3) the point was simply overlooked and the decision not to claim reimbursement was not a conscious one.

It is strongly arguable that even a deliberate and gratuitous refusal to exercise a right of reimbursement does not amount to providing property. For what is the property provided? It would however count as adding value.

Protected-trust Note para 22 provides:[14]

> The published guidance indicates at the end of 5.5 that:
>
> *A failure by a settlor to reclaim tax from the trustees could taint a trust, but provided that the settlor claims reimbursement within a reasonable time the trust will not be regarded by HMRC as tainted.*
>
> In relation to income which arose before 6 April 2017, it is considered that if, prior to that date a reasonable time has passed since the right of reimbursement first arose, tainting has not occurred. This is because any addition would have taken place when the right had not been exercised within a reasonable time after it has arisen. There is no further addition if the settlor continues to fail to exercise the right.

I would have thought that what matters is not whether a reasonable time has passed (whatever that means) but whether the claim is statute barred.

101.5.2 *Failure to claim: IHT issues*

SP 5/92 provides:

> 9... where a settlor does not pursue the statutory right to reimbursement, the failure to exercise this right may give rise to an inheritance tax claim under s.3(3) IHTA,[15] in which case the usual rules for lifetime transfers would apply.

[13] Here, as elsewhere, SP 5/92 gives the impression that it was intended to make life as difficult as possible for offshore trusts. In 1992 that was considered striking; though nowadays it would hardly merit a mention.

[14] For this Note, see 92.1.1 (Protected-trust guidance).

[15] See 74.5 (Omission: Deemed disposition).

The IHT normal expenditure exemption may apply:

(1) In the case of income tax indemnities, if income arises regularly; and

(2) In the case of CGT indemnities, if such gains arise regularly and the tax is paid out of income.[16]

But the amounts are not likely to be so great.

A statutory indemnity is not a settlement power, and so does not qualify for settlement-power relief.[17]

[16] For completeness: the same could apply to chargeable event gains, but in practice that would be rare.

[17] See 74.10 (Settlement power).

CHAPTER ONE HUNDRED AND TWO

SITUS OF ASSETS FOR IHT

102.1 Concepts of situs
- 102.1.1 Situs in tax/private international law
- 102.1.2 History and terminology
- 102.1.3 Inconsistent case law

102.2 Intangible property has a situs
- 102.2.1 Is situs fictional?

Cross references

The following topics are considered elsewhere:

Topic	**See para**
Situs of unit trust	69.10
Situs of intermediated security	71.3
Situs of cryptoassets	96.6

102.1 Concepts of situs

Situs[1] of assets matters for many tax and some non-tax purposes. It is not practical to draw up a full list; the most important are:

(1) IHT excluded property (which applies to non-UK situate assets)

(2) CGT remittance basis (which applies to non-UK situate assets)

[1] A note on terminology. IHTA and TCGA generally refer to the “situation” of assets though the heading to s.275 TCGA refers to “location”. Section 59 Stamp Act 1891 (repealed) used the term “locally situate” and some older cases referred to the “local situation”. Practice Direction 6B (Service out of the Jurisdiction) refers to property “within” the jurisdiction:. These expressions are synonymous.
Some old cases were uncomfortable with the concept of situs of intangible property, and used the term “quasi locality”, but this has not been adopted and situs is the current term.
“Situs” has become adopted into legal English, and should not be written in italics.

(3) ITA remittance rules (there is a remittance if an asset is received in the UK, ie, UK situate when received)[2]

Situs (like domicile) is a concept of private international law[3] which has been adopted whenever tax statutes (or other statutes) refer to the location of property (typically referring to property "in" or "within" or "outside" a state). The rules are laid down by the common law.[4] The common law rules apply for tax, except so far as modified by specific rules in tax legislation. Thus one might refer to these rules as common law rules, private international law rules, or IHT rules.

IHT situs is almost entirely based on the common law rules. These are discussed in this chapter. Some IHT double tax treaties override the usual IHT situs rules.[5]

CGT has statutory situs rules which cover most situations, and the common law is only needed to fill a few gaps. So CGT situs is best regarded as a separate subject, though in a few cases the common law/IHT rules still apply for CGT. The statutory CGT rules are discussed in the next chapter.

The rules which determine the location of a source of income for income tax purposes are distinct from the rules which determine the situs of assets. For instance, the source of dividends is the place where the company is resident, but the situs of shares is the place where the shares are registered. Situs of assets only occasionally matters for IT, but where it does, then (subject to any overriding rule of IT law) the common law rules discussed in this chapter will apply.

As there are diverse statutory situs rules, one should (strictly speaking) not refer to situs in the abstract, but to situs for a specific purpose (CGT,

[2] Other tax issues where situs matters include:
(1) Foreign IHT and CGT credit relief
(2) Stamp duty; see s.14(4) Stamp Act 1891
(3) Penalties
In most cases the issue is whether or not the asset is situated in the UK, and if outside the UK it does not matter where. However in cases of foreign IHT and CGT credit relief, it may be necessary to identify the state where assets are situated.

[3] This topic is also called "Conflict of Laws" but (notwithstanding Dicey's book of that name) I think "private international law" is the better label.

[4] I use the term "common law" here to mean judge-made law, including the pre-1857 ecclesiastical law from which the present law is derived.

[5] See 115.10 (Treaty-situs); 119.9 (Dual-situate asset).

IHT, or whatever). However context may supply the reference, and in this chapter, situs means situs as determined by the common law rules which apply for IHT purposes.

Scots situs law is the same as English law,[6] except where situs depends on concepts of property law which are different in Scotland.[7] Northern Ireland situs law is the same as English law.

102.1.1 *Situs in tax/private international law*

In considering which country's laws should be used to determine the effect of property transactions, judges have traditionally applied the law of the country where the property is situated.

Dicey takes the view that situs for tax purposes may be different from situs for the purpose of private international law.[8] But this expression conceals a muddle or a mistake. One may correctly refer to situs for *specific* tax purposes, such as CGT, or IHT DTAs, which have statutory situs rules. But in the absence of contrary intention, references in a tax statute (or any statute) to the situs or location of property are taken as references to the private international law concept of situs. The law does not distinguish between situs for (general) tax purposes and situs for private international law purposes. *AG v Bouwens* (the leading tax case) adopts the situs rules which were developed "to prevent conflicting jurisdictions between different ordinaries".[9] Non-tax situs cases[10] routinely cite and follow tax cases, and vice versa. In a stamp duty case, Lord Lindley referred to situs "for *legal* purposes" (not *tax* purposes) and

[6] For instance, *Laidlay v Lord Advocate* (1890) 15 App Cas 468 followed the Scots case *Commissioner of Stamp Duty v Salting* [1907] AC 449; see 102.35 (Situs of partnership share).

[7] See 102.18.2 (Situs in Scots law).

[8] Dicey, Morris & Collins, *The Conflict of Laws* (16th ed, 2022) chap 23 frequently refers to situs for taxation purposes; eg para 23-032, 23-133 (Specialties).

[9] See the quote at 102.14 (Simple contract debt). The argument that situs rules should be limited to their original context of probate cases was rejected in *English, Scottish & Australian Bank v IRC* [1932] AC 238 at p.257:

> "It was suggested that the doctrine just enunciated was peculiar to probate cases. Apart from the illustrations of its application in other departments of the law which [counsel] adduced, I venture to express my agreement with Lord Lindley, who said: "The authorities which bear upon the locality of incorporeal personal property for purposes of probate appear to me to afford the best guides for the solution of the case before us."

[10] Such as *New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101.

added:

> It may perhaps be true that property which has no physical existence may, if necessary, be treated for some purposes in one locality, and for other purposes in some other locality. But, until the necessity for so treating it is apparent, I see no justification for introducing confusion by judicially holding the same property to be legally situate in two different places at one and the same time. But this confusion would be introduced if your Lordships were to decide that the analogy of probate cases was to be no guide in dealing with liability to stamp duty.[11]

It would of course be possible for the common law to develop different situs rules for different purposes. But (subject to statutory exceptions) a distinction between situs for one purpose and situs for another purpose should be avoided so far as possible, and in practice the common law has not gone down this path.[12]

The law of the jurisdiction where an asset is situate is conventionally called the *lex situs*. The role of situs (or *lex situs*) in private international law has decreased. Some say it would be better if it was not used at all.[13]

[11] *IRC v Muller & Co's Margarine* [1901] AC 217 at p.237.

[12] Except for a line of Canadian case law concerning expropriation, which requires a lot of explanation, but which does not affect the point being made here.

[13] See Rogerson "The Situs of Debts in the Conflict of Laws - Illogical, Unnecessary and Misleading" [1990] CLJ 441. Similarly, the UNCITRAL Legislative Guide on Secured Transactions (2010), Chapter X para 20 discussing conflict rules for security rights provides:

> "the Guide does not consider the location of the asset as being the appropriate connecting factor for intangible assets and favours an approach generally based on the law of the location of the grantor".

Similarly UK Jurisdiction Taskforce, Legal statement on cryptoassets & smart contracts (2019) para 96, 97; and Amy Held, "Crypto Assets and Decentralised Ledgers: Does Situs Actually Matter" (2023) *https://brill.com/edcollchap-oa/book/9789004514850/BP000017.xml?body=pdf-60830*

I do not set out the arguments against the use of situs in private international law, because this of only theoretical interest, at least to readers who are private client lawyers:

(1) Although private international law might improve if it did not use a concept of situs, in relation to intangible property, at present it still does.

(2) Even private international law was changed, so it did not refer to situs, the concept of situs would survive elsewhere as long as tax or other statutes continue to refer to the situation/location of assets.

But at present, situs still matters sometimes, in private international law.[14]

102.1.2 *History and terminology*

To understand the old case law one needs to know some of its history and historic terminology.[15]

As mentioned above, the common law has adopted situs rules which were originally developed "to prevent conflicting jurisdictions between different ordinaries".[16]

The "**ordinary**" was the judge of an ecclesiastical court with jurisdiction to grant probate for personal property situate in his province or diocese.

Blackstone explains:

> If all the goods of the deceased lie within the same jurisdiction, a probate before the ordinary, or an administration granted by him, are the only proper ones; but if the deceased had *bona notabilia*, or chattels to the value of a hundred shillings in two distinct dioceses or jurisdictions, then the will must be proved, or administration taken out, before the metropolitan of the province, by way of special prerogative; whence the court where the validity of such wills is tried... is called the prerogative court.[17]

[14] Eg, a claimant may serve a claim form out of the jurisdiction with the permission of the court where (inter alia) "The subject matter of the claim relates wholly or principally to property within the jurisdiction"; see Practice Direction 6B (service out of the jurisdiction) para 3.1(11).

[15] For a discussion of this interesting corner of legal history, see Outhwaite, *The Rise and Fall of the English Ecclesiastical Courts, 1500-1860.*

[16] See the quote at 102.14 (Simple contract debt).

[17] Commentary on the Laws of England, Book 2 p.509. There were about 250 local courts, and two prerogative courts, in Canterbury and York.
The Solicitor-General said in argument in *AG v Bouwens* (1838) 4 M & W 171 *http://www.commonlii.org* at p.189:

> "that doctrine [*bona notabilia*] has no application as between goods in one province or diocese, and out of the kingdom. The defendants must establish that these instruments have no value in the kingdom."

In order to understand this, one needs to understand what the Solicitor-General meant by the doctrine of bona notabilia. The Solicitor-General is *not* referring to the set of rules which determine where assets are situate. He is referring to the rule that where the deceased had bona notabilia in more than one diocese, the will must be proved in the prerogative court. Obviously that rule has no application in tax cases such as *Bouwens* where the issue is whether property is situate in the UK or outside the UK. This comment does not cast any doubt on the application of the situs principles developed in the ecclesiastical probate cases and now adopted in the common law.

The term "***bona notabilia***" in the wider sense meant "such goods and debts of a deceased person as require administration being taken thereto, [ie which require a grant of probate or administration] and are therefore denominated *notable*." The term was more often used to mean "goods and debts belonging or owing to any person at the time of his death, in any other diocese or peculiar jurisdiction, within the province... besides the goods in the diocese or peculiar jurisdiction where he dwelt".[18] The detailed rules of what counted as bona notabilia (and so required probate) need not be considered here.

In 1857 the jurisdiction of the ecclesiastical courts passed to the Court of Probate. The concept of bona notabilia (in the sense of assets not in the diocese where the deceased was resident) then became obsolete, though the term continued to be used: "bona notabilia" in a certain place became a traditional way of referring to the assets of the deceased situate in that place.

In 1875 the jurisdiction passed to the Chancery Division of the High Court.

102.1.3 *Inconsistent case law*

As in any large body of case law – and the body of situs case law is very large – it is usually possible to find cases or dicta supporting inconsistent views. In 1914, Hohfeld said of the subject of conflict of laws:

> This is a branch of municipal law as to which... the Anglo-American system ... has conspicuously failed both in England and in the United States. We have, even in relation to some of the most basic principles, which ought above all others to be uniform, certain, and knowable, a veritable chaos of opinion and decision.[19]

Private international law has largely been codified by international treaties. But some of this confusion survives today, particularly in the situs of debts secured on land. It may be possible to reconcile some

I mention this because the comment has sometimes been misunderstood.

[18] Lawton, *A Brief Treatise of Bona Notabilia* (1825) p.2. Comyn's Digest (Administration, B6): "If the testator had *bona notabilia*, the administration belongs to the archbishop of the province... If the testator had not *bona notabilia*, it belongs to the bishop of the diocese...".

[19] Hohfeld, "A vital school of jurisprudence and law: Have American universities awakened to the enlarged opportunities and responsibilities of the present day?"

inconsistent cases by saying that there is one situs for tax and another for private international law; or that an asset may be dual situate. But where inconsistency exists it would be better to grasp the nettle and prefer one line of authority to the other.

102.2 Intangible property has a situs

In *R v Williams*:[20]

> Shares in a company are "things in action" which have in a sense no real situs, but it is now settled law that for the purposes of taxation ... they must be treated as having a situs which may be merely of a fictional nature.

There are two points here:
(1) Shares (and other choses in action) have a situs.
(2) That situs is "fictional".[21]

The first point is a straightforward rule of law: all property has a situs.[22]

102.2.1 *Is situs fictional?*

The second point is a point of jurisprudence. It is of course true that intangible property, such as a debt, shares, or other chose in action, has no material position in the material world. Nevertheless a better analysis is to say that "situs" (of intangible property) is a term describing an abstract concept, not a physical concept. The situs of intangible property is not

[20] [1942] AC 541 at p.549.

[21] Similarly, in *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.119 the situs rules for choses in action were described as "legal fictions"; also *English Scottish & Australian Bank v IRC* [1932] AC 238 at p.248 ("*fictionem legis*").

[22] If further authority is needed, see *English Scottish and Australian Bank v IRC* [1932] AC 238 at p.244: "it is desirable that [debts] should possess a locality"; at p.248: the legal conception of property involves the legal conception of existence somewhere"; even, at p.251, with an element of hyperbole: " it is not easy to form a conception of property having no local situation". Similarly *IRC v Muller & Co's Margarine Ltd* [1901] AC 217 at p.236:

> "Goodwill is only taxable as property; and the legal conception of property appears to me to involve the legal conception of existence somewhere. Incorporeal property has no existence in nature and has, physically speaking, no locality at all. We, however, are dealing not with anything which in fact fills a portion of space, but with a legal conception, or, in other words, with rights regarded as property. But to talk of property as existing nowhere is to use language which to me is unintelligible."

"fictional", but "real" (or at least as real as other legal concepts such as "residence" or "domicile" or indeed "intangible property"). The concept may be described as technical. It might be described as metaphorical (at least in origin), or as "artificial" (though that also has a pejorative nuance which is not apt here). Lawyers are entitled to use ordinary words in special senses and to call a situs (of a chose in action) a "fiction" is inapt.[23] If we talk of fiction, we suggest that we are using words in their ordinary sense and are pretending that something exists to which they apply.[24] It would be better not to use the word fiction in this content. It may not matter, in that the use of the word "fiction" may not lead to difficulty or error, but it is good to see clearly what we are talking about.

Similarly, for private international law purposes, intangible property is categorised as movable or immovable property; but I am not aware of anyone describing that as a fiction.[25]

102.2.2 *Situs connecting factors*

Once one accepts that intangible assets (shares, debts, etc) have a situs, the law must choose connecting factors to identify the situs, in short, to link the asset to a jurisdiction. There is a large choice of possible connecting factors, and the selection of the determining factor must sometimes be arbitrary:

> probably any system of rules for determining the constructive locality of intangible property must be more or less arbitrary.[26]

One might think that it would not matter much what the rule was, as long as there is some rule and its application is clear. But sometimes choices have to be made between more formal rules (easy to apply) and more substantive rules (which aim to track the economic realities more

[23] See Baker, *The Law's Two Bodies* (2001), Lecture 2 ("Legal Fictions"); MacCormick, *Institutions of Law* (2007), p.136. Dumbledore makes the same point: "Of course it is happening inside your head, Harry, but why on earth should that mean that it is not real?"

[24] Hart, "Definition and Theory in Jurisprudence" (1953).

[25] "Much of the difficulty, as regards legal terminology, arises from the fact that many of our words were originally applicable only to physical things; so that their use in connection with legal relations is, strictly speaking, figurative, or fictional" Hohfeld, *Fundamental Legal Conceptions,* (1923) p.30.

[26] *Royal Trust Co v Provincial Secretary-Treasurer of New Brunswick* [1925] SCR 94 at p.99.

closely).[27] The desirable rule (at least from the HMRC viewpoint) is one which minimises the scope for persons to choose the situs of assets, as that would allow tax planning. The common law rules do not achieve that. Inasmuch as they were devised for conflicts purposes, there is no reason why they should. In the context of private international law, there is no objection to parties being able to choose a situs and it may be convenient if they can do so. The common law situs rules are not so well suited to serve as a territorial limitation for tax. It is not surprising that the common law rules have been modified for CGT.

102.3 Every asset has one situs

Under the common law rules, every asset is situate in a jurisdiction and only in one jurisdiction. In *R v Williams*:

> Property, whether movable or immovable, can ...[28] have only one local situation.[29]

This rule is self-evidently necessary if situs rules in private international law are to achieve their object, which is to resolve conflicts of jurisdiction, and if situs rules in tax law are to achieve the object of avoiding double taxation.

It is also implicit in the word situs: a physical object (let us ignore quantum physics) can be situate in only one place.

I stress this as some old cases considered one asset could be situate in two jurisdictions. They no longer represent the law. It is however possible that what appears at first sight to be one asset (eg copyright) is in

[27] A similar distinction arises in determining the location of a source of income: see 16.5 (Formal/substantive source rules).

[28] The omitted words are "... for the purposes of determining situs as among the different provinces of Canada in relation to the incidence of a tax imposed by a provincial law upon property transmitted owing to death". These words do not qualify the general principle as there is only one common law situs concept and (subject to statute) that applies for all purposes.

[29] [1942] AC 541 at p.559. Likewise *Laidlay v Lord Advocate* (1890) 15 App Cas 468 at p.483: "locality cannot be both England and India—the choice has to be made between the two". Likewise *Toronto General Trusts Co v The King* [1919] AC 679 at p.684: "it is plainly impossible to hold that [the debts] were situate in both provinces at once." Likewise *Ex p. Coote* (1948) 49 SR (NSW) 179 at p.184: "Unless there is some special reason which makes it necessary so to hold, property should not be regarded as legally situate in two different places at the same time." Likewise *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.120.

fact a set of distinct assets, situate in different jurisdictions.

An asset must be situate in a single legal jurisdiction. The expression "**UK situate**" is in a literal sense inapt because an asset must be situate in England, Scotland or Northern Ireland. It is, however, universally used to describe an asset which is situate in England, Scotland or Northern Ireland. For tax purposes it usually makes no difference where in the UK an asset is situate, though for non-tax purposes that could be important.

102.4 Situs of shares: General principle

In *Brassard v Smith*:[30]

> This is, in their Lordships' opinion, the true test. Where could the shares be effectively dealt with?

R v Williams referred to this and continued:[31]

> ... the phrase used in laying down the principle clearly means "where the shares can be effectively dealt with as between the shareholder and the company, so that the transferee will become legally entitled to all the rights of a member," e.g., the right of attending meetings and voting and of receiving dividends. If the phrase only meant "effectively dealt with as between transferor and transferee of shares," the test would obviously be almost completely useless, since the rights of a shareholder as between himself and a transferee can, speaking generally, effectively be transferred in any part of the world.

These cases concerned registered shares, but the principle applies to bearer shares too.

France and Italy IHT DTAs apply different rules.[32]

The question which follows from this test is: How to identify the place where shares can be dealt with?

102.5 Situs of registered shares

Place-of-register rule

In *AG v Higgins*:[33]

[30] [1925] AC 371 at p.376.

[31] [1942] AC 541 at p.557-558.

[32] See 115.10 (Treaty-situs).

[33] (1857) 2 H & N 339 at p.351 *https://www.kessler.co.uk/wp-content/uploads/2012/04/AGvHiggins.pdf* This passage was quoted and approved in *Brassard v Smith* [1925] AC 371 at p.376.

> the evidence of title to these shares is the register of shareholders, and that being in Scotland this property is located in Scotland

The IHT Manual states the same rule:

> **IHTM27121 Usual location** [July 2016]
> For the purposes of Inheritance Tax an inscribed[34] and registered security[35] (a shareholding in a Company, for example) is located at the place where the title of ownership must be registered – see *AG v Higgins*.
> It makes no difference that the business of the company is totally administered outside the country in which the register is kept: see *Baelz v Public Trustee* [1926] Ch 863.

I call this the "**place-of-register rule**". The rule is grounded on the general principle that shares are situate where they can be dealt with. Dicey states the same rule:

> If shares may be transferred only by registration on a particular register, they will be regarded as situate at the place where the register is kept.[36]

Underhill & Hayton, *Law of Trusts and Trustees* states the same rule:

> if shares are only transferable by entry on the register, they are situated in the country where the register is kept.[37]

102.5.1 *An incorporation test?*

I set this out at length because an alternative view has been suggested. In *Macmillan v Bishopsgate Trust (No. 3),* surprisingly, one judge stated without discussion that the situs is the place of incorporation, another inclined to the same view but expressed himself more cautiously, and a

Similarly *Baaelz v Public Trustee* [1926] Ch. 863 at p.868: "For the contributory's title to his shares, his status as a shareholder and the enforcement of his rights, recourse must be had to the statutory register, which remains localized at the registered office, and to the Court, with which alone, under [what is now s.125 CA 2006] , abides the power to rectify the register." And again, *Re Aschrott* [1927] 1 Ch 313 at p.33.

[34] Author's footnote: "Inscribed" securities are those whose legal owners are inscribed in a register; the term is, I think, an old-fashioned synonym of "registered".

[35] Author's footnote: "Securities" here includes shares as well as debt-securities.

[36] Dicey, Morris & Collins, *The Conflict of Laws* (16th ed, 2022) para 23-042 (Shares in companies) and 23-043.

[37] 20th ed (2022) para 104.128 (Intangible movable property).

third adopted the place-of-register rule.[38] *Akers v Samba Financial Group* also raised the possibility of an incorporation test for situs. Lord Mance (with whom the rest of the Court agreed) said:

> The situs or location of shares and of any equitable interest[39] in them is in the jurisdiction where the company is incorporated or the shares are registered (which is presently unimportant, since in this case they coincide in Saudi Arabia).[40]

The place-of-register rule and an incorporation test are conceptually distinct rules, but in practice they will almost always lead to the same result. That was the position in both *Macmillan* (incorporated and share register kept in New York) and *Akers* (incorporated and share register kept in Saudi Arabia). The rival tests might have different results, if:
(1) a company had two share registers (as in *R v Williams)* or
(2) a company has an overseas branch register

But I wonder if that will happen nowadays.

As *Akers* and *Macmillan* were cases where the court did not have to decide between place-of-register and place of incorporation as rival situs rules, the court's attention was not on the point and the relevant authorities were not discussed. If the question ever needed to be decided, a Court

[38] [1996] 1 WLR 387 at p.423F, p.405E, and p.411E.

[39] On the facts of the case, this is a reference to an equitable interest under a bare trust; different principles apply to an interest under a substantive trust and intermediated securities.

[40] [2017] UKSC 6 at [19]. Lord Manse mentioned 3 authorities without discussing them:
(1) Dicey, Morris & Collins, *The Conflict of Laws* (16th ed, 2022) para 23-042 (Shares in companies) and 23-043. But Dicey supports the place-of-register rule: see above.
(2) Underhill and Hayton, *Law of Trusts and Trustees* (20th ed, 2022), para 104.128-129. Lord Manse cited an old edition, and erroneous para reference. But both old and current editions of Underhill support the place-of-register rule: see above.
(3) *Re Berchtold* [1923] 1 Ch 192 and *Philipson-Stow v IRC* [1961] AC 727 at p.762. But these cases say nothing about the situs of shares.

To compound the confusion, in the same case Lord Sumption said at [80], inconsistently and evidently without consideration: "The ... lex situs... in the case of registered shares is the law of the company's incorporation, in this case Saudi Arabia. This proposition is well established and was not seriously disputed: see *Macmillan v Bishopsgate (No 3)*."

ought to reject the place of incorporation test and follow the well established principles. The overwhelming body of authority states that situs is the place where the register is kept.

The IHT Manual tactfully ignores these cases. The reader may think it unfortunate that *Macmillan* accidentally introduced into the law if not an uncertainty, at least an inconsistency which needs to be explained away.

See Venables, "The Situs of Registered Shares", PTPR Vol 9 p.115.[41]

102.5.2 *SDRT comparable rule*

The territorial limitation for SDRT also refers to where a share register is kept. In outline, s.99(4) FA 1986 provides:

> "Chargeable securities" does not include securities ... which are issued or raised by a body corporate not incorporated in the UK unless—
> (a) they are registered in a register kept in the UK by or on behalf of the body corporate by which they are issued or raised ...

So (more or less) the same test, and the same issues, arise for SDRT.

102.6 Place-of register rule: Application

102.6.1 *Company law background*

Since situs generally depends on where a company's share register is kept, it is necessary to consider the company law rules relating to share registers and their location. The following sets out the relevant UK company law. Further consideration is needed if foreign company law adopts different principles.

Section 113(1) CA 2006 provides:

> Every company must keep a register of its members.

Section 114(1) CA 2006 provides

> A company's register of members must be kept available for inspection—
> (a) at its registered office ...

There are minor exceptions to these requirements which are not relevant for present purposes.

When a company is formed, its registered office must be in the UK. A

[41] *http://www.khpplc.co.uk/reviews*

company may move its registered office but it must remain in the UK.[42]

102.6.2 *"Keeping" the register*

There are two aspects to "keeping" a register:

(1) Possessing and retaining the register

(2) Making new entries in the register, as share ownership changes, ie keeping it up to date.

Many, perhaps most, companies outsource share register administration to a third-party, known as a registrar. For listed UK companies, CREST keeps the share register.[43] That does not matter, the question becomes: where does the registrar or agent keep the share register on behalf of the company.

The place-of-register rule requires one to ask where the share register is kept. The rule arose at a time when the register was a paper book, and it was easy to see where the register was kept. Sometimes that will still be the case.

102.6.3 *Dematerialised register*

Nowadays share registers are likely to be computerised, not on paper.[44] It may still be possible to identify one computer on which the register is kept, but if, as I expect is commonly the case, the data is stored (or at least, backed up) on multiple servers, the share register has no simple single identifiable physical location. If the share register has no single physical location, the Court will need to devise some rule to determine where a share register is "kept".

It is suggested that a dematerialised register is "kept" where the company (or if appropriate, the company's registration agent or CREST) *effects*

[42] See s.9 and 87 CA 2006; Palmer's Company Law (looseleaf) para 2.507: "The company can change the situation of its registered office only in the part of Great Britain in which it is registered. Consequently, an English company cannot change its registered office to an address in Scotland nor vice versa."

[43] See 99.9 (CREST).

[44] Articles of association sometimes provide:

> "The register of members may be in any such form as the Directors may approve but, if it is in magnetic, electronic or other data storage form, the Company must be able to produce legible evidence of its contents."

But even without that provision, everyone would agree that a company may use an electronic register.

entries to the register, if that place can be identified. Making entries in the register may be described as "keeping" the register.

It may be that place cannot be identified, because entries in the register are made (or at least can be made) by authorised users logging on to the system anywhere in the world. In that case it is suggested that the solution is that the share register is "kept" where company law *requires the register to be to be kept available for inspection*. That is a single identifiable place. It is not difficult to say that a register is (at least, notionally) "kept" where it is required to be kept available for inspection.

An alternative approach is to say that where the place-of-register rule does not work, because no place can properly be identified, another rule is needed. If another rule is needed, the place of incorporation test is the best rule to apply. So far as we are dealing with a common law rule, the common law may develop in the light of changed circumstances. But this approach does not wholly solve the problem, because statutes refer to the place where the register is kept:

(1) for SDRT (as mentioned above)
(2) for CGT, the situs of shares in foreign companies is the place where they are registered (or where the principal register is kept).[45]

So in those contexts, at least, the question of where the share register is kept should be answered, it should not be abandoned in favour of another rule.

To summarise, the following rules should determine where the share register is kept, in order of priority:

(1) If the share register is kept on paper, where the paper share register is kept.
(2) If the share register is kept on one computer, where the computer is kept, if that can be identified.
(3) Where the company (or its agent) effects entries to the register, if that place can be identified
(4) Failing that, where company law requires the register to be to be kept available for inspection. (A less attractive alternative being where the company is incorporated, but in practice that broadly comes to the same thing).

The same rules should apply to other assets whose situs is determined by

[45] See 103.6 (Registered security: Non-UK co).

where the register of legal owners is kept, such as intermediated securities, and, perhaps, some types of cryptoasset.

102.7 More than one register

If a company has more than one register, in different jurisdictions, that raises a problem for a place-of-register rule.

102.7.1 *Overseas branch register*

A UK company may in some cases have an overseas branch register.[46] I wonder how often overseas branch registers are used now, since computerisation should make them unnecessary. I address the point for completeness, though the issue will not often arise, except, possibly, in some tax planning contexts.

Section 133 CA 2006 provides:

> (1) Shares registered in an overseas branch register must be distinguished from those registered in the main register.
> (2) No transaction with respect to shares registered in an overseas branch register may be registered in any other register.
> (3) An instrument of transfer of a share registered in an overseas branch register—
> (a) is regarded as a transfer of property situated outside the UK, and
> (b) unless executed in a part of the UK, is exempt from stamp duty.

In *Brassard v Smith*[47] the company (Royal Bank of Canada) was governed by a similar rule, and shares registered in a Novia Scotia branch office were situate there, though the head office of RBC was in Montreal, Quebec (as it still is).

Thus an overseas branch register, when company law permits, allows a UK company to have foreign situate shares.

The IHT Manual provides:

> **IHTM27122 Branch registers** [May 2020]
> ... If a company has more than one register, and any changes must be recorded on one of the registers, the relevant securities are sited in the place where that register is required by law to be kept – not in the place of the head office of the company. ...

This requires an examination of company law to identify which of the two

[46] Section 129 CA 2006.
[47] [1925] AC 371.

registers is the one where changes must be recorded. The IHT Manual summarises the UK company law background:

> **IHTM27124 Overseas branch registers of UK companies** [May 2020]
> ... Under UK law a share cannot, at one and the same time, be registered on more than one register.
> The rule applies even to overseas branch registers (these are branch registers of members resident in the country to which the register relates). ... shares on the overseas branch register of a UK company are situated, for Inheritance Tax purposes, in the country where the register is kept.

102.7.2 *Transfer office*

Another solution may be that the company has only one register and merely a "transfer office" elsewhere. The IHT Manual provides:

> **IHTM27125 Duplicate or multiple registers of non-UK companies** [May 2020]
> ... Some overseas company laws allow a shareholder to use duplicate (or multiple) share registers to record the transfer of their securities.
> The South African Companies Act, for example, authorises South African companies to maintain branch registers in any foreign country. Shares can be transferred on any register, but no transfer of shares passing on death can be registered in the UK until any death duty claimed by South Africa on the shares has been paid.
> Remember that some registers merely record information about transfer of securities without providing the legal basis for the transfer. These registers do not affect the locality of the security (IHTM27071)
> Details of transfer arrangements given in the Stock Exchange Year-Book[48] do not always make the position clear and, if necessary, you must ask the taxpayer to explain. ...

102.7.3 *Two effective registers*

In *R v Williams*[49] a company incorporated in Ontario had two share registers, in New York and in Ontario, and a transfer could have been dealt with in either jurisdiction. The share certificate, held in New York,

[48] Author's footnote: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

[49] [1942] AC 541.

was endorsed with a signed blank transfer form (that is, the name of the transferee was left blank). The Court held that where a company has more than one effective register, so the transfer may be dealt with in more than one jurisdiction, one must look for a tie-breaker test between the two competing jurisdictions.[50] In this case, the shares were situate where the share certificate/transfer form was situate: the form acted as the tie-breaker.[51] But these facts are not likely to arise now, because a company is not likely to have two share registers in different places, and because signed blank transfer forms, described as usual in 1942, are no longer usual.

R v Williams did not consider what tie-breaker would apply in the absence of the signed transfer form in one of the two competing jurisdictions.[52] But the IHT Manual provides:

> **IHTM27150 share certificates endorsed in blank** [Sep 2018]:
> If the company has more than one register on which the holding could be effectively transferred, and the share certificates are found at the material time at a place where a register is located, the holding is for Inheritance Tax purposes situated at that place – see *R v Williams* [1942] AC 541. Cases where none of the effective registers is located where the certificates are found must be referred to Technical.

This suggests that a share certificate which does not contain a signed transfer form in blank will still act as a tie-breaker. That seems sensible.

The IHT Manual discusses an alternative tie-breaker:

> **IHTM27125 - Duplicate or multiple registers of non-UK companies** [May 2020]
> Where there are many registers the register upon which the shares would normally be dealt with in the ordinary course of business is the register that determines the situs of the security – see *Treasurer of Ontario v Aberdein* [1947] AC 24.

But which is the register which would normally be used? The Manual explains:

> If the share certificates are in the UK, one of the alternative registers is in the UK, and transfers can be effected here the shares will normally

[50] at p.559.
[51] at p.560.
[52] at p.560.

> be regarded as legally situated here (*Re Clark, McKechnie v Clark* [1904] Ch 294.)

The IHT Manual continues:

> This is only an assumption and can be rebutted by the particular circumstances of the case (see *Standard Chartered Bank Ltd v IRC* [1978] 1 WLR 1160). But if tax is offered on shares in a foreign company with transfer facilities in the UK, you can assume that the register in the UK is the one on which the shares would normally be dealt with in the ordinary course of business.

102.7.4 *Ineffective register*

The IHT Manual provides:

> **IHTM27123 Effectiveness of register** [May 2020]
> ... If shares are entered on a list which does not affect the legal holding of the security (even though the list could be called a register) the location of the list does not affect the situs of the security.
> In *Erie Beach v AG for Ontario* [1930] AC 161, certain shares (on the view that they could, under the Ontario Companies Act, be effectively dealt with only in Ontario) were held to be situated in Ontario for the purposes of Ontario Succession Duty, although they had in fact been entered on a 'register' opened elsewhere.
> It was explained however, in *R v Williams*, that the *Erie Beach* decision was based on the finding that the particular shares in question could be dealt with effectively in Ontario only. In this case it was explained that the decision was 'not an authority for holding that any company subject to the Ontario Companies Act is precluded from establishing registers outside Ontario on which effective transfers can be made, and Ontario companies like other Canadian companies may establish branch registers kept by 'transfer agents' which are equivalent to duplicate or multiple registers (IHTM27125)'.

102.7.5 *Register of share transfers*

The IHT Manual provides:

> **IHTM27127 Transfer agencies** [May 2020]
> Many companies incorporated under Canadian law keep a register, or branch register, of transfers kept by one of the company's duly appointed 'transfer agents', not a register of shareholders as with UK companies.
> When considering the question 'where could the shares be effectively

dealt with?' (*Brassard v Smith*), to find out where the shares can be taxed we must find out where the company has established transfer agents to operate a register, or branch register, of transfers. There is usually more than one transfer agent to which the shareholder could transfer their holding, regardless of where the share certificate was issued. Some (but relatively few) companies have transfer agents in the UK. These equally available transfer arrangements in various places are said to be 'interchangeable'. For the purposes of situs in relation to Inheritance Tax they can be taken as equivalent to duplicate or multiple registers (IHTM27125).

This applies:

- to shares registered in the name of the taxpayer or their nominee (including marking names),
- whether or not the share certificates are endorsed in blank (*Treasurer of Ontario v Aberdein* [1947] AC 24),
- whether the company in question was incorporated under Canadian dominion or provincial law.

102.7.6 *Miscellaneous*

The IHT Manual provides:

> **IHTM27128 Branch registers of British Colombian and Newfoundland companies** [May 2020]
>
> Branch registers of companies in these two provinces of Canada can be kept outside the province, so the location of the shares will be determined by the location of the branch register.
>
> In certain circumstances shares registered on a branch register in the name of a deceased member can be transferred only on a duplicate register kept at the registered office of the company. This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.
>
> **IHTM27129 - Canadian companies: Nova Scotia companies** [May 2020]
>
> Every company incorporated under the laws of Nova Scotia must keep a duplicate of any branch register kept outside the province at its registered office in the province. In respect of lifetime transfers, we understand that there is a distinction between:
>
> - Companies incorporated under the Nova Scotia Companies Acts, in which case a lifetime transfer on a branch register appears to be valid and effective. Accordingly if the securities are registered on a branch register in the UK they must be treated as situated in the UK.
> - Companies incorporated under other Acts, in which case no transfer

> on a branch register is effective until entered in the principal register. In this case , registered securities may be regarded as situated in Nova Scotia, even though they may be registered on a branch register in the UK.
>
> This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.

102.8 Registered debt-securities

The rules for registered debt-securities[53] are, in general, the same as for registered shares; the passage from the IHT Manual set out above refers to securities, generally meaning both shares and debt-securities.

A UK company is not expressly required by company law to keep a register of debenture holders, but it is difficult to see how it could manage without one.[54] A register of debenture holders (like a share register) must be kept available for inspection in the UK.[55] But planning by converting registered securities into bearer securities may be possible.[56]

102.8.1 *Place-of-register v specialty rule*

Shares are not "specialties" so the specialty situs rule cannot apply to them.[57]

A debenture may be a specialty so the question arises as to the priority between the place-of-register rule and the specialty situs rule. The specialty situs rule overrides the place-of-register rule. For HMRC views as to which securities are "specialties", see 102.15.1 (Situs of specialty).

102.9 Bearer and negotiable instruments

102.9.1 *General law background*

"Bearer" shares or securities are transferable by delivery of the document of title, so that the person who holds the document has legal title to them.[58]

An instrument is "**negotiable**" if

[53] I use the term "debt-securities" to mean securities which are debts, not shares.

[54] A "register" is only a record of stockholders and their assignees; this is self-evident but if authority is needed, see *Ramsay v IRC* 54 TC 101 at p.133.

[55] Section 743 Companies Act 2006.

[56] See 102.9.2 (Bearer shares and securities).

[57] See 102.15 (Specialty obligation).

[58] Bearer shares are not possible in UK company law: s.84 Small Business, Enterprise and Employment Act 2015. But bearer debt-securities are possible, and bearer shares may remain possible for some foreign company laws.

(1) Legal title to it is transferable by delivery or by endorsement and delivery; and

(2) In the hands of a "holder in due course" (broadly a good faith purchaser for value without notice that has satisfied relevant formalities), it is enforceable despite a defect in the title of any prior holder. In other words, the transferor who negotiates a bill to a holder in due course can pass a better title than they themselves possess. The transferee has the right to sue in his own name all parties to the instrument.[59] Bills of exchange and promissory notes are typically (though not necessarily) negotiable.

Thus bearer instruments and negotiable instruments are distinct but overlapping categories: bearer instruments are negotiable but negotiable instruments are not necessarily bearer.

Negotiable instruments (other than shares) may be made by deed, and so specialties, in which case situs is governed by the specialty situs rule. But they may not be specialties, in which case the specialty situs rule does not apply.

102.9.2 *Bearer shares and securities*

The place-of-register rule cannot apply to bearer shares or securities as there is no register of shareholders or security holders.

The situs of bearer shares and bearer debt-securities is where the document is to be found. This is consistent with the nature of bearer and negotiable instruments:[60]

> ... commercial practice has over time resulted in certain types of document being elevated beyond a mere record of obligations in writing to something more — an *embodiment* of the right to claim performance of the obligations recorded in the document. These types of documents can be issued either as "bearer documents" or as "order documents". This determines the method of transfer used to transfer the document. ... the transfer of such a document does not require the consent of any other party, nor does it require any actions to be taken other than those described above. In the case of both bearer documents and order documents, the right to claim performance of the relevant obligation simply "travels with the document".

[59] *Byles on Bills of Exchange and Cheques* (30th ed., 2019), para 1-004 (Negotiability).

[60] Law Commission: Digital assets Final report (2023) para 4.56; footnotes omitted. *https://lawcom.gov.uk/project/digital-assets/*

The IHT Manual provides:

> **IHTM27076 Bearer securities**[61] [May 2020]
> A bearer security was situated, for Inheritance Tax purposes, in the place where the document of title is found at the material time. .. This does not apply to certain qualifying international securities (IHTM27141).

Dicey agrees:

> For taxation purposes, bonds, bills of exchange and other securities which can be validly and effectively transferred by delivery with or without endorsement are situate in the country where the paper representing the security is itself from time to time to be found.[62]

This is consistent with the general principle that shares are situate where legal title can be transferred.[63]

Situs of UK registered debt-securities can be changed by converting them into bearer securities and taking the document outside the UK. Similarly, foreign shares and securities could be made UK situate. Stamp duty needs consideration. This planning has been described as tax mitigation, not avoidance,[64] though views may differ, and the abolition of bearer shares for UK companies reduces the practical importance of the issue.

AG v Bouwens concerned foreign government bonds (not specialties) which were bearer instruments so it was not necessary to do any act outside England in order to transfer them. The court said:

> No ordinary[65] in England could perform any act of administration within his diocese, with respect to debts due from persons resident abroad, or with respect to shares or interests in foreign funds payable abroad, and incapable of being transferred here; and therefore no duty would be payable on the probate or letters of administration in respect

[61] Author's footnote: This passage applies to both shares and debt-securities.

[62] *Conflict of Laws* (16th ed., 2022), para 23-038 (Negotiable instruments and securities transferable by delivery). Dicey cites: *AG v Bouwens*; *AG v Glendining* (1904) 92 LT 87; *Winans v AG (no 2)* [1910] AC 27; *Provincial Treasurer of Manitoba v Bennett* (1937) 2 DLR 1; *Re Moore* [1937] 2 DLR 746; *Lunn v Barber* [1949] OR 34; *Favorke v Steinkopff* [1922] 1 Ch 174.

[63] See 102.4 (Situs of shares: General principle).

[64] See 52.21.2 (Transfer for avoidance).

[65] See 102.1.2 (History and terminology).

> of such effects. But, on the other hand, it is clear that the ordinary could administer all chattels within his jurisdiction; and if an instrument is created of a chattel nature, capable of being transferred by acts done here, and sold for money here, there is no reason why the ordinary or his appointee should not administer that species of property. Such an instrument is in effect a saleable chattel, and follows the nature of other chattels as to the jurisdiction to grant probate.[66]

102.9.3 *Negotiable instrument not bearer*

The IHT Manual gives guidance on bearer securities but does not consider other negotiable instruments (that is, those which are transferable by endorsement and delivery). But the passage from Dicey set out above states that the same rules apply. The same rule applies in Australia:

> *negotiable instruments and securities transferable by delivery* for taxation purposes, bonds, bills of exchange and other securities which can be validly and effectively transferred by delivery with or without endorsement are situate in the country where the paper representing the security is itself from time to time found.[67]

In *Bouwens* the court stressed that there was an active market in England for the bonds (the Royal Exchange). Some cases suggest that this might be a requirement for situs:

> A negotiable instrument will be situate where the instrument is, *at any rate where there is an available market for its negotiation*.[68]

However I think the general trend of the authorities is that the situs of the instrument prevails and whether or not there is a market (which in modern conditions would be difficult to determine) is not relevant.[69] This is the view of the textbooks cited above. In particular, it would be strange to draw a distinction between bearer instruments (which HMRC accept are situate where the document is, regardless of whether there is a market) and other negotiable instruments.

[66] (1838) 4 M & W 171 at p.192 *http://www.commonlii.org* This was approved in *AG v Winans (No. 2)* [1910] AC 27.

[67] Taxation Ruling TR 2008/9 *https://www.ato.gov.au/law/view/document?DocID=TXR/TR20089/NAT/ATO/00001*

[68] *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.732 (emphasis added); the same point is made in *AG v Bouwens* at p.192.

[69] But for a dissenting view, see 102.12 (Letter of allotment of shares).

102.9.4 *Eurobonds*

HMRC have commented specifically on the situs of eurobonds in a passage which I mention for completeness but which adds nothing to the general principles:

> ... in the Revenue's view, the *situs* for IHT purposes of Eurobonds and similar fungibles in any issue depends on the terms of that issue and, in particular, where under those terms the bondholder's rights to or rights of action for property exist. Those rights will be determined by reference to general, not Revenue, law principles. So where title to the rights under an issue passes by delivery, the *situs* for IHT purposes of such rights is where the instrument of title is physically.[70]

102.10 CREST

The Law Commission explain the securities law background:

> 2.21 Investment securities constituted under English, Scots and Northern Irish law can take either certificated or dematerialised ('uncertificated') form. CREST is the main securities settlement system in the UK and settles securities in uncertificated form. Unlike system operators in most national settlement systems, CREST does not hold domestically issued securities[71] as a central securities depository for account holders. CREST has no proprietary rights in the securities and is not treated as 'holding' these securities from the issuer on behalf of its participants. Rather, the CREST member is treated as holding directly from the issuer. This CREST member alone is entitled to exercise voting, dividend and other rights attaching to the shares and may do so directly against the issuer.

[70] [1994] PCB 139. For completeness, the passage concludes:

> "There is little we can add to the foregoing guidance. In particular we cannot offer any undertaking about the likely future IHT liability which may arise in respect of rights to particular Eurobond issues currently extant or which may be issued in future.
>
> However, in order to be as helpful as possible, we can say that where a Eurobond issue satisfies the terms and conditions of section 124 ICTA 1988, the Revenue will treat for IHT purposes the rights and interests of the beneficiary-investors in such issues as rights to and interests in a bearer security."

A eurobond within s.124 (now repealed) had to be a bearer security, so this does not take matters much further.

[71] Footnote original: That is, in the UK, Republic of Ireland, Isle of Man, Guernsey and Jersey.

> 2.22 Instead, it is the register operated by CREST which, in the case of UK securities, is actually constituted by statute[72] as the sole legal record of entitlement to the securities. Although the issuer will maintain a regularly reconciled record of what is held in CREST for corporate events purposes, it is the CREST register that confers legal title and which determines the person or entity named in the register as the shareholder for company law purposes.[73]

The first footnote at para 2.22 is important. It provides:

> For UK companies it is the entry in the CREST register that confers legal title on the owner.[74]
> For Irish, Manx, Guernsey and Jersey securities, the pre-2001 system still operates. Settlement is through CREST but legal title is transferred when the entry is made in the issuer's register.

Registered securities are in principle situate where the register of title is kept.

For listed UK companies, the register of legal title is the CREST register; the situs of the securities is in the UK, assuming (as is no doubt the case) that the CREST register is kept, or is regarded as kept, in the UK.[75]

For listed Irish, IoM and Channel Island companies whose shares are registered on CREST, the company law is different: the register of legal title is the company's register. So registering a security on CREST does not make any difference as to situs.[76]

It is possible for retail investors to have a personal CREST account, but it has become expensive and unusual. Securities are in practice held through intermediaries, which alters the situs position.[77]

[72] This footnote is set out in the text below.

[73] Law Commission, *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (2008). See too Law Commission, *Intermediated securities: who owns your shares?* (2020) para 2.12ff and 2.56ff.

[74] Reg 24, Uncertificated Securities Regulations 2001.

[75] This has the curious consequence that Scots and Northern Ireland companies registered on CREST are situate in England, not in Scotland or Northern Ireland. But this makes no difference for tax, and I suspect would only rarely matter for non-tax purposes.

[76] Further thought would be needed if the relevant company law were to change from the position which the Law Commission describe in 2008.

[77] See 71.1 (Intermediated securities).

102.11 Share certificate endorsed in blank

The IHT Manual explains the background law and practice as follows:

> **IHTM27150 Share certificates endorsed in blank** [May 2020]
> Certificates of many American and Canadian railroads and of certain other companies include a printed transfer form or power of attorney. When this is signed or endorsed by the registered holder it enables the certificates to be transferred by delivery.
> Often these certificates are 'endorsed in blank', This means the endorsement is to be signed by the registered owner as transferor, and the name of the transferee is left blank.
> Dividends are paid by the company to the registered owner, and if these shares have in fact changed hands by delivery, the beneficial owner for the time being recovers their dividends from the registered owner.
> Usually the shares are registered in the name of a recognised broker, bank or discount house. These are known in the UK as a 'good Marking Name' or, in the USA, as a 'Street Name'. This helps to make sure that the purchaser receives their dividends with minimum of trouble and risk.
> A list of good Marking Names recognised by the London Stock Exchange is printed in the Stock Exchange Official Year Book.[78]
> However the beneficial owner can have them registered in their own name, or in the name of some nominee other than a good Marking Name.

This is mainly of historical interest, but I set out the HMRC comments for completeness:

> The location of the shares for Inheritance Tax purposes is determined as follows:
> [a] If the registered owner is a good Marking Name, the shares are situated where the register is kept, not where the certificates are found. ...[79]
> [b] The location of the shares is determined in the same way if the registered owner is also the beneficial owner, or a nominee of the beneficial owner, or, in the case of settled property, the trustees of

[78] Author's footnote: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

[79] Omitted text set out at 102.7.1 (Overseas branch register).

> the settlement or their nominees.[80]

The HMRC view is that one ignores the fact a share transfer form has been endorsed in blank. This is right, because the endorsed certificate does not alter the place where registered shares are dealt with as between shareholder and company.[81] At this point the Manual becomes confused:

> [d] If the registered owner is neither:
> a good Marking Name,
> the beneficial owner, or
> any of the other persons named above, and
> the certificates are physically present in the UK at the material time,
> the shares are located in the UK for Inheritance Tax purposes, (Stern v The Queen [1896] 1 QB 211).

I find it hard to see how [d] can apply: the registered owner will always be one of the persons named at [b] (beneficial owner or a nominee).

> Certificates of this kind, that do not contain any express obligation or promise, are not specialty (IHTM27079) debts - see the *Williams* case at [1942] AC 556.

That is correct.

102.12 Letter of allotment of shares

A letter of allotment confers the right to an issue of shares. The letter is normally transferable by delivery: it is a bearer security. One would have thought that the bearer security situs rule would apply. However, in *Young v Phillips*[82] a letter of allotment in respect of a company with UK registered shares was held to be situate in the UK, not where the letter of allotment was held. Nicholls J cited the passage in *AG v Bouwens* set out

[80] The Manual continues:
> "[c] In the cases outlined in the bullet points above we consider that the only legal title the holder has to the shares is their registration as owner. If the owner brings the certificates to the UK they could sell the shares to a UK purchaser, so the equitable interest in the shares would be situated here. But, until the sale takes place the beneficial interest has not been severed from the legal interest so their location has not changed."

This is muddled and wrong.

[81] See 102.4 (Situs of shares: general principle).

[82] 58 TC 232 This case concerned the common law rules before s.275A TCGA and is still relevant for situs for IHT, and for CGT in the case of foreign incorporated companies.

above[83] and said:

> From this it is apparent that for an instrument to be treated as analogous to a chattel for situs purposes more is required of it than mere transferability of title by delivery. A simple contract debt owed by a foreign debtor to a person resident in England and evidenced by a promissory note might be, and normally would be, freely and effectively transferable in England, but such a debt has as its situs the country where the debtor resides, not the place where the creditor lives or currently holds the promissory note. What is required is that in practice the value of the instrument can be realised by a sale of the instrument for money in the country where the instrument is found: the reason being that if an instrument in England could be so sold, the ordinary could properly and effectively administer that asset by selling it here, there being no need in such a case to have recourse to where the foreign debtor lived. When so saleable an instrument is in practice realisable in the same way as a saleable, valuable chattel, and hence, for situs purposes, it falls to be treated in the same way. ...

This approach requires an investigation into whether a market exists. The judge said:

> In the instant case there are no grounds for concluding that in practice the value of the letters of allotment, *which were issued with a life-span of a little over two months*, could have been realised by a sale of those documents for money wherever they were to be found. The Special Commissioners pointed out that no evidence had been led before them to prove that there existed a market in letters of allotment of shares in private companies. Having regard to the fact that shares in private companies may not be the subject of a public issue, they expressed themselves as being far from prepared to assume the existence of such a market. With that approach I agree. And it is to be noted that the "sales" of the letters of allotment which did take place in Sark were not arm's length transactions but were to purchasers wholly under the control of the vendors, and they had been prearranged even before the letters of allotment were issued. Accordingly, applying the principles I have mentioned to the facts of this case, the renounceable letters of allotment in the UK companies do not fall to be treated as saleable chattels, realisable where they might be found from time to time. They are documents evidencing rights against UK companies, which rights were enforceable in the UK.
> (Emphasis added)

[83] See 102.9.2 (Bearer shares and securities).

The requirement for "marketability" is not supported in textbooks, or much supported in the cases, nor does it make good sense. A buyer could be found for any valuable asset in any community where private property exists, and one buyer makes a market.[84] Whether a market exists is a question of fact, so application of the marketability test will result in assets moving from one jurisdiction to another as markets come and go. It is conceivable that there was no market in Sark (population 600). But with improved communications markets are no longer local to jurisdictions, as was assumed in *Young v Phillips*. An asset can be sold anywhere, even in Sark.

It seems that *Young v Phillips* stretched the law in order to defeat a tax avoidance scheme, and in doing so has left something of a mess.

The CG Manual provides:

> **CG12440 Shares and securities etc** [May 2020]
> **Letters of allotment**
> Letters of allotment should be treated as located in the country where the company issuing the letters is registered. In the case of *Young v Phillips* 58 TC 232 bonus shares were issued in respect of registered shares located in the UK. The issue was made in letter of allotment form. The letters were then taken to the Channel Islands and disposed of there. It was held that the letters of allotment were located in the UK because they evidenced rights which were properly enforceable only in the UK.

Thus in the HMRC view *Young v Phillips* is relevant to letters of allotment only, it has no relevance to the situs of bearer debt-securities or shares.[85] It is suggested that the reasoning should be restricted to short life assets (such as the letters of allotment in that case which, it was stressed, had a life of only two months).

[84] This is self-evident, but for an illustration see *FGP v Union of India* 2004 (168) Excise Law Times 289 (Supreme Court of India)
https://www.kessler.co.uk/wp-content/uploads/2012/04/FGPvUnion-of-India.pdf
Contrast the sophisticated definition of "asset for which there is a liquid market" in ICAEW Tech 7/03 para 19 (Guidance on the determination of realised profits and losses in the context of company distributions).

[85] In *Mehjoo v Harben Barker* [2013] EWHC 1669 (QB) at [267] ff it was found that HMRC's practice was not to take any *Young v Phillips* point in relation to bearer shares. The point was not considered on appeal.

Even letters of allotment may be situate where the letter is situate, if there is a "market" there (whatever that may require).

102.13 International organisation security

For convenience this section deals with CGT situs as well as IHT situs, as the rules are the same. Exemptions are made pursuant to international agreements and the International Organisations Act 1968.

102.13.1 *Designated organisations*

It is helpful to read the IHT and CGT legislation side by side.

Section 126 FA 1984	**Section 265 TCGA**
(1) Where— (a) the UK or any of the Communities is a member of an international organisation; and (b) the agreement under which it became a member provides for exemption from tax in relation to the organisation, of the kind for which provision is made by this section;	[Identical]
the Treasury may, by order made by statutory instrument, designate that organisation for the purposes of this section.	the Treasury may by order designate that organisation for the purposes of this section.
(4) The Treasury may, by order made by statutory instrument, designate any of the Communities or the European Investment Bank for the purposes of this section, and references in subsections (2) and (3) above to an organisation designated for the purposes of this section include references to a body so designated by virtue of this subsection.	(2) The Treasury may by order designate any of the Communities or the European Investment Bank for the purposes of this section.
(2) Where an organisation has been so designated, the provisions mentioned in subsection (3) below shall, with the exception of any which may be excluded by the designation order, apply in relation to that organisation. .	

(3) The provisions are (b)[86] any security issued by the organisation shall be taken, for the purposes of capital transfer tax [now IHT[87]] to be situated outside the UK; ..	(3) Where an organisation has been designated for the purposes of this section, then any security issued by the organisation shall be taken, for the purposes of this Act, to be situated outside the UK.

The IHT Manual provides:

> **IHTM27141 List of non-UK situs organisations** [May 2020]
> Unless they are bearer securities (IHTM27076) and situated physically in the UK[88] securities issued by the following organisations are effectively outside the charge to IHT where:
>
> - they form part of the estate of a person domiciled outside the UK; or
> - they are comprised in a settlement and the settlor was not domiciled in the UK at the time the settlement was made:
> - ○ the International Monetary Fund:
>   ○ The Bretton Woods Agreement Order in Council, 1946, SR & O 1946 no.36
>   ○ the International Bank for Reconstruction and Development[89]:
>   ○ The Bretton Woods Agreement, as above
>   ○ the International Finance Corporation:
>   ○ The International Finance Corporation Order, 1955 (SI 1955/1954)
>   ○ the International Development Association:
>   ○ The International Development Association Order, 1960 (SI 1960/1383)
>
> This list of organisations may not be complete. If you receive a claim for exemption for a security issued by any other international body you should refer the case to Technical.
> **27142 Designated as non-UK by Treasury** [May 2020]
> ... The following organisations have been so designated.
>
> - The Asian Development Bank: under the International Organisations (Tax Exempt Securities) Order 1984 (SI 1984/1215) made on 2 August 1984
> - The African Development Bank: under the International Organisations (Tax Exempt Securities) (No 2) Order 1984 (SI 1984/1634) made on 22 October 1984
> - The European Community; The European Coal and Steel Community; The European Atomic Energy Community; The European Investment Bank - under the European Communities (Tax Exempt Securities) Order 1985 (SI

[86] para (a) has been repealed.
[87] See 74.1.1 ("CTT" now refers to IHT).
[88] I do not understand the basis for this exception, but in practice the point may never arise.
[89] Author's footnote: More commonly known as the World Bank.

1985/1172) made on 25 July 1985.

- The European Bank for Reconstruction and Development - under the International Organisations (Tax Exempt Securities) Order 1991 (SI 1991/1202) made on 16 May 1991.

Any security issued by these organisations automatically has a foreign situs for IHT, where the event occurred on or after the date of the order. ...

The CG Manual provides:

> **CG12440 Types of asset (2): Shares and securities etc** [May 2020]
> *Securities of International or European Organisations*
> Special rules are provided for dealing with securities issued by certain designated international organisations.
> Section 265 TCGA 1992 allows the Treasury to designate for special treatment certain organisations whose membership includes the UK or any of the Communities of which the UK is a member. Once such an organisation has been designated any securities issued by it are deemed for the purposes of Capital Gains Tax to be located outside the UK. The list of organisations that have been designated under this provision is as follows.
> - International Bank for Reconstruction and Development
> - Asian Development Bank
> - African Development Bank
> - The European Economic Community
> - The European Investment Bank
> - The European Bank for Reconstruction and Development
> - The European Coal and Steel Community
> - The European Atomic Energy Community ...

102.13.2 *Inter-American Development Bank/ OECD support fund*

Article XI Section 9 of the Agreement Establishing the Inter-American Development Bank provides:

> **Immunities from Taxation**
> a) The Bank, its property, other assets, income, and the operations and transactions it carries out pursuant to this Agreement, shall be immune from all taxation and from all customs duties. The Bank shall also be immune from any obligation relating to the payment, withholding or collection of any tax, or duty.
> b) No tax shall be levied on or in respect of salaries and emoluments paid by the Bank to executive directors, alternates, officials or employees of the Bank
> c) No tax of any kind shall be levied on any obligation or security issued by the Bank, including any dividend or interest thereon, by whomsoever held:
> i) which discriminates against such obligation or security solely

> because it is issued by the Bank; or
>
> ii) if the sole jurisdictional basis for such taxation is the place or currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by the Bank.
>
> d) No tax of any kind shall be levied on any obligation or security guaranteed by the Bank, including any dividend or interest thereon, by whomsoever held:
>
> i) which discriminates against such obligation or security solely because it is guaranteed by the Bank; or
>
> ii) if the sole jurisdictional basis for such taxation is the location of any office or place of business maintained by the Bank.

I suspect this is standard form for international organisations.

It is helpful to read the IHT/CGT exemptions side by side:

Section 131 FA 1976	**Section 266 TCGA**
A security issued by the Inter-American Development Bank shall be taken for the purposes of capital transfer tax [now IHT[90]] to be situated outside the UK.	A security issued by the Inter-American Development Bank shall be taken for the purposes of this Act to be situated outside the UK.

In practice one would expect the securities to be non-UK situate in any event, but this does no harm.

For completeness: s.4(1) OECD Support Fund Act 1975 provides similar relief for a financial support fund of the OECD, but despite an initial agreement to do so, the fund was never in fact established.[91] Perhaps at some point the Act will be repealed.

102.14 Simple contract debt

A "**simple**" debt is one which is not a specialty (in short, not made by deed).

The basic principles are well established:

> to prevent conflicting jurisdictions between different ordinaries, with respect to choses in action ... it was established as law, that judgment debts were assets, for the purposes of jurisdiction, where the judgment

[90] See 74.1.1 ("CTT" now refers to IHT).

[91] See Cohen, "The Financial Support Fund of the OECD: A Failed Initiative" (1997) *https://ies.princeton.edu/pdf/E204.pdf*

> is recorded; ... specialty debts, where the instrument happens to be; and simple contract debts, where the debtor resides ...[92]

The IHT Manual provides:

> **IHTM27091 Debts: contractual** [May 2020]
> In English law a **simple contract** debt is situated where the debtor resides: *AG v Bouwens*;[93] *English, Scottish and Australian Bank v IRC* [1932] AC 238...

Dicey states:

> Subject to the exceptions set out below, a debt is situate in the country where the debtor resides.[94]

I call this the "**place-of-debtor rule**". Along with the specialty situs rule, this rule can be traced back to Elizabethan times.[95]

There are many cases which state this rule: the most frequently cited, which may be called the leading cases, are *English, Scottish and Australian Bank* (mentioned above) and *New York Life Insurance Co v Public Trustee*[96] (affirming the passage from *Bouwens* set out above).

A winding-up order against the debtor does not affect the situs of a debt,[97] but judgment against the debtor (turning the debt into a judgment debt) does do so.[98]

France/Italy IHT DTAs apply different rules.[99]

102.14.1 *Debts within scope of rule*

The focus of discussion concerns debts. But the same rules apply to other choses in action,[100] which are not or may not be debts.[101] There does

[92] *AG v Bouwens* (1838) 4 M & W 171 *http://www.commonlii.org* The same applies in Australia: *Haque v Haque* (No.2) (1965) 114 CLR 98 at p.137.

[93] See above fn.

[94] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022) para 23-026 (Debts).

[95] See 102.15.1 (Situs of specialty).

[96] [1924] 2 Ch 101.

[97] *Wight v Eckhardt* [2004] 1 AC 147. In practice this issue will not usually arise.

[98] See 102.22 (Judgment debt).

[99] See 115.10 (Treaty-situs).

[100] Thus *Jabbour* applied the place-of-debtor rule for "not only debts, but also other choses in action"; see 102.14.7 (Place-of-enforceability: Synonym of place-of-debtor rule).

[101] "Debt" is not a very precise term, but so far as the same rules apply to debts and other chose in action, it is not necessary for situs purposes to determine what is or

however need to be an identifiable person, comparable to a debtor, whose residence should determine the situs under the place-of-debtor rule.

The position is different for swaps, spread bets, and similar financial instruments. These are choses in action. But during the lifetime of the contract, it is not clear which party will have to pay a sum to another. There is no identifiable "debtor" until the instrument matures. There is no authority, but:

(1) It is reasonably clear that the place-of-debtor rule cannot apply.
(2) It is considered the instrument (if not a specialty) is situated where payment is to be made, or where enforceable (which will normally be the same).
(3) It is suggested that the situs should not change when the instrument matures, ie the situs will not then be changed to the place of residence of the party who has to make the payment; though a judgment giving rise to a judgment debt could change the situs.

102.14.2 *"Jurisdiction-residence"*

In order to apply the place-of-debtor rule one needs to determine where the debtor resides.

"Residence" in this context is not quite the same as residence for tax purposes. It is necessary to have different terms: I use "**tax-residence**" and "**jurisdiction-residence**". It seems surprising to use the term "residence" in a non-tax sense but it is understandable when one bears in mind the history: the situs rule emerged in the context of private international law, not in the context of tax.

A UK incorporated company is deemed UK resident for IT/CT/CGT purposes.[102] This rule does not apply for the purpose of ascertaining the situs of debts owed by the company. Clearly the rule does not apply for IHT purposes, and even where situs is relevant for IT/CT/CGT purposes, it is considered that this deemed tax residence is to be ignored. But the question will not often arise.

The common law test of corporate residence for tax purposes (management and control) also does not apply. The test is where the company carries on business:

> Now, when you are dealing with a corporation, ... you have to examine

is not a debt; see too 102.25 (Insurance policy).

[102] See 8.3 (The incorporation rule).

> the question where the debt can be said to be situate. It appears to me plain that a corporation according to our law is deemed to reside for the purposes of suit in the place where it carries on business in its own name ...[103]

Moreover for this purpose a company is always resident in the place where it is incorporated and has its registered office, whether or not it is carrying on business in any other place.[104]

What is the test of residence of an individual, for the purposes of the place-of-debtor rule? Here jurisdiction-residence adopts the ordinary meaning of residence, sometimes called the common law meaning of residence.[105] This is (more or less) the same as the concept of residence applied for tax purposes before the SRT. In practice the SRT and jurisdiction-residence will usually come to the same thing, since the SRT is intended to encapsulate the ordinary meaning of the word residence. But there are some differences:

(1) Under the SRT, an individual is resident (or not) in the UK; for jurisdiction-residence the question is whether an individual is resident in England, or Scotland, or Northern Ireland, or in which jurisdiction they are resident outside the UK.

(2) Under the SRT, an individual is resident for a tax year. A person may be jurisdiction-resident in part of a tax year. Unlike the SRT, jurisdiction-residence commences immediately on arrival if the intention is to stay.[106]

102.14.3 *Dual-resident debtor*

A company may be jurisdiction-resident in two states. It has been said that an individual cannot be dual jurisdiction-resident.[107] But I do not

[103] *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.120; followed *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733.

[104] *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733. This may be justified on the basis that a company must be carrying on business where it has its registered office.

[105] *OJSC Oil Co Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) (also reported under the name *Yugraneft v Abramovich*) at [461]: "... the courts have sought to give the word [residence] the same 'ordinary' meaning in both tax cases ... and jurisdiction cases ... It makes sense to do so. Resident for jurisdiction purposes but not resident for tax purposes is a distinction to be avoided if possible."

[106] Similar issues arise for domicile-residence; see 4.6 ("Domicile-residence").

[107] *New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101 at p.114.

understand why; an individual could be dual tax-resident under the common law definition of residence.[108]

Where the debtor is jurisdiction-resident in two states, the place-of-debtor rule does not provide a solution. A tie-breaker is needed, and the solution adopted in *New York Life Insurance v Public Trustee*[109] is to prefer the state of jurisdiction-residence where the debt is payable.

The position where the debtor is jurisdiction-resident in two states and the debt is payable in a *third* state has not been considered. Perhaps in relation to a company this cannot happen, as if the debt is payable in a state the company will be carrying on business there, so it must be jurisdiction-resident there.

The position where the debtor is jurisdiction-resident in two states and the debt is payable in *both* states has not been considered. Some suitable tie-breaker must be devised; it is suggested that the proper law of the contract would be suitable.

102.14.4 *Identifying the debtor*

In order to apply the place-of-debtor rule one needs to identify the debtor. The identity of the debtor does not usually change, but it may do so:

(1) By operation of law (eg on death of the debtor) or
(2) By a novation (under which an existing debt is discharged and a new debt created)[110]

102.14.5 *Joint debtors*

Where a guaranteed debt is in default, the creditor may sue the debtor or the guarantor. This should not affect the situs of the debt, which is the jurisdiction-residence of the debtor, not the guarantor.

Hillside (New Media) v Baasland raised the problem of a debt under a contract with an agent acting for an undisclosed principal. The Judge said:

> [35] ... Hillside ... dealt with Mr Baasland in two capacities, (i) as principal in respect of [some funds] and (ii) as agents for an undisclosed principal (or undisclosed principals) in respect of [other funds]. In

[108] See the 2012/13 edition of this work para 3.13 (Dual residence/dual ordinary residence).

[109] [1924] 2 Ch 101 followed *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733.

[110] For an example of this issue arising (though on slightly unusual facts) see 26.10.4 (*Hafton Properties*).

> either case, Hillside are liable for the debt represented by the funds ... That chose in action was situate in England
> [36] However, if this analysis is correct, ... Hillside Gibraltar [a Gibraltar company], as an undisclosed principal of Hillside, would also have been liable to Mr Baasland in debt in respect of [certain funds], and that debt would have been situate in Gibraltar. Similarly, Bet 365 NV [a Netherlands Antilles company] would also have been liable for a debt in respect of [certain funds], and that debt would have been situate in the Netherlands Antilles.[111]

The better analysis of an undisclosed principal case is that the creditor has distinct claims (against the agent and against the undisclosed principal) but the claims relate to one single asset. An asset should be regarded as situate in only one place, so here we need a tie-breaker between the jurisdiction-residence of the agent and the jurisdiction-residence of the principal. The jurisdiction-residence of the undisclosed agent has the stronger claim as the test of residence. The position of the undisclosed principal is analogous to a guarantor. This is the practical solution, as the creditor needs to know the situs, but may not know about the residence, or even the existence, of the undisclosed principal.

There is no case discussing the situs of a debt owed by a partnership. On first principles, it is considered that the situs is where the partnership is jurisdiction-resident, on common law principles. That is where the partnership business is carried on.[112] If the partnership carries on business in more than one location, it is considered that the tie-breaker test should be the same as for a company which is dual resident, ie where the debt is due and payable.[113]

A debt may be owed by several debtors, whether jointly or severally, who are jurisdiction-resident in different places and not partners. Here again some tie-breaker is needed, and the logical one (as in the case of a dual-resident debtor) is the place where the sum is payable. This was the

[111] [2010] EWHC 3336 (Comm).

[112] See Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 11-043, 11-049 (Partnerships). Dicey records that before 1891, jurisdiction residence turned on the residence of the partners, not the place of business of the partnership; but it is suggested that situs of a partnership debt should follow the post-1891 test of jurisdiction.

[113] For partnership tax-residence see 85.23 (Residence of partnership). But here we are concerned with jurisdiction-residence.

solution adopted in *Cambridge Credit Corporation v Lissenden*[114] where the asset was an insurance policy issued by a dozen or more underwriters resident in the UK and the USA. Each underwriter was severally liable for a percentage of the amounts due under the policy. The policy was situate in New South Wales, where sums due were payable, even though none of the underwriters (debtors) were resident there.

102.14.6 *Place-of-enforceability: Rationale of place-of-debtor rule*

In *New York Life Insurance v Public Trustee* the court said:

> The rule of law with regard to the locality of simple contract debts is that it is determined by the residence of the debtor at the material moment. That has been well settled for a long time, and I think the reason for that is that it is
>
> [1] the residence of the debtor which determines the place where he may be sued, prima facie at all events, and
>
> [2] is in general the place where the means of satisfying any judgment may be discovered,
>
> but whatever the reason is, there is no doubt that this is the rule.[115]

These are not absolutely compelling reasons for the place-of-debtor rule. Even when the rule was first laid down, it was not necessarily the case that the debtor could only be sued in his place of residence, or that their assets were there and not elsewhere. Nowadays these are less safe assumptions than formerly; though even now, they are still the case more often than not. However there is no reason why the debt situs rule must have a compelling reason. In fact any situs rule is bound to be slightly arbitrary and any clear rule is better than none.

102.14.7 *Place-of-enforceability: Synonym of place-of-debtor rule*

In *Jabbour v Custodian of Absentee's Property* the court said:

> It is established by the decided cases that not only debts, but also other choses in action, are for legal purposes localised and are situated where they are properly recoverable and are properly recoverable where the debtor resides.[116]

[114] [1987] NSWLR 411 accessible *https://www.kessler.co.uk/wp-content/uploads/2015/07/Cambridge-Credit-Corp-v-Lissenden.pdf*

[115] [1924] 2 Ch 101 at p.114; similarly at p 119.

[116] [1954] 1 All ER 145 at p.151.

Similarly, Dicey rule 129 provides:

> Choses in action generally[117] are situate in the country where they are properly recoverable or can be enforced.[118]

I think that "properly recoverable" and "can be enforced" are synonyms, so Dicey is propounding one test expressed in two different ways. I call this the "**place-of-enforceability test**".

If this test is synonymous with jurisdiction-residence, it is correct. It is however a confusing and inapt way of expressing the place-of-debtor rule. It would be better to refer to place of residence rather than place of enforceability. All the leading cases use the term residence;[119] though there are some cases which (under the influence of Dicey) have expressed the rule in terms of a-place-of enforceability test.[120]

102.14.8 *Place-of-enforceability: Rival to place-of-debtor rule*

The difficulty with the place-of-enforceability test is that a debt is *not* necessarily recoverable in the place of residence of the debtor, and if that is understood, a place-of-enforceability test is not consistent with the place-of-debtor rule.

The question has been settled in a number of cases which have held that a debt is situate where the debtor is resident, even if the debt is enforceable elsewhere:

> a simple contract debt ... is deemed by English law to be situated in the place where the debtor resides. The reason for assigning this locality to a simple contract debt was that the place where the debtor resides was in nearly every case the place where it was recoverable. Even in earlier times, it might, of course, occasionally have happened that judgment could be obtained against a debtor in a country where he did not reside. But it was probably thought desirable for the sake of uniformity to adopt in all cases the test of residence rather than the test of recoverability.

[117] I think "generally" recognises (inter alia) the exceptional case that where the place of residence and the place of enforceability are different, the place of enforceability is not the situs of the debt; it also recognises other exceptions such as specialties, judgment debts).

[118] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), 23R-023 (1).The statement is found already in the 1st edition *A Digest of the Law of England with Reference to the Conflict of Laws* (1896) p.318.

[119] *AG v Bouwens*; *English, Scottish and Australian Bank v IRC* [1932] AC 238.

[120] For instance, *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728 at p.732.

> However, whatever the reason may have been, the rule was laid down, was I have stated it, in *AG v Bouwens*, and was recognised by this court as still being the rule in *New York Life Insurance v Public Trustee*.

A debt from a non-resident is recoverable in the UK if (in short) the court gives permission, but that does not alter situs:

> The debt was also recoverable here ... had the plaintiffs been successful in obtaining leave to serve the defendant bank out of the jurisdiction. But I know of no authority for the proposition that a simple contract debt is situate in this country, at a time when the debtor is not resident here, merely because he can be sued by putting into operation the provisions of R.S.C., Ord. 11.[121] It would be strange if it were so. For it is always in the discretion of the court in cases coming within the rule, to give or refuse leave for service out of the jurisdiction, a discretion depending upon the balance of convenience. A debt due from a debtor resident out of the jurisdiction cannot therefore be deemed to be in this country until an application has been made for service of the writ out of the jurisdiction and that application has been acceded to. If leave were obtained, the question would then arise whether the order granting leave brought the debt into this country for the first time, or established its presence here as from some earlier date... But I need not attempt to answer this question, for in my judgment the fact that a simple contract debt can be recovered here from a debtor out of the jurisdiction does not establish an English locality for the debt....[122]

I set this out at length because unfortunately the contrary view was reached in *Hillside (New Media) v Baasland*. In this case Baasland ("the creditor") deposited money with Hillside ("the debtor"), creating a debt. The debtor was resident in England. The court should have held that the debt was situate in England because of the residence of the debtor but it did not. The Judge cited the Dicey rule set out above[123] and continued:

> Although at common law this principle led to the general rule that (with some exceptions that are irrelevant for present purposes) debts are situate where the debtor resides...[124], its application in a case such as this, where

[121] Now 6.30 Civil Procedure Rules 1998.

[122] *Re Banque Des Marchands De Moscou (Koupetschesky)* [1954] 2 All ER 746 at p.752 citing *Deutsche Bank v Banque des Marchands de Moscou* (unreported). The passage was also followed in *Re Helbert Wagg & Co* [1956] 1 All ER 129 at p.137.

[123] 102.14.7 (Place-of-enforceability: Synonym of place-of-debtor rule).

[124] The judge refers to the 14th edition of *Dicey*. The text has not changed in the current 16th edition, now found at 23-026.

> the debtor is a corporation and the case is covered by the Lugano Convention, depends, as I see it, upon the debtor's domicile. That is the primary ground on which a court takes jurisdiction under article 2 of the Lugano Convention. The domicile of a corporation is determined in accordance with section 42 of the Civil Jurisdiction and Judgments Act, 1982. It depends upon where it has its "seat", and this in turn depends upon where it was incorporated and has its registered or other official address or where its central management and control is exercised.[125]

I do not think any weight should be given to the comments on situs in *Hillside*, as the relevant cases were not cited.[126] *Hillside* illustrates how the place-of-enforcement test can mislead if it is intended to be synonymous with the place-of-debtor rule: it ought to be abandoned.

Although jurisdiction was the historical reason for adopting the place-of-debtor rule, now the rule has been chosen, jurisdiction-residence determines situs regardless of where the debt would actually be enforced. So a debt is situate where the debtor resides even though enforceable elsewhere, eg under an exclusive jurisdiction clause in the debt contract. If the historical reason for the place-of-debtor rule now holds less validity, or even no validity (though I think that would be an exaggeration) the rule is still as good as any other. Well-established precedents are not overturned merely because the historical reason for selecting that rule has become less compelling.

The place-of-debtor situs rule is in fact better than a place-of-enforceability rule for several reasons:

(1) It is generally easier to ascertain where a debtor is resident than where a debt may be enforced.
(2) The place of enforcement changes with developments in international law.
(3) A debt may be enforceable in several places against the same debtor.

102.15 Specialty obligation

102.15.1 *Situs of specialty*

If any rule of law can be called established, it is the rule that a debt due

[125] [2010] EWHC 3336 (Comm) at [33]. The comment was not a necessary part of the decision, as the place of residence and place of enforceability were both in England, so it is not binding.

[126] The creditor (probably insolvent) was not represented.

under a deed or other specialty is situate where the deed is situate.[127] I call this the "**specialty situs rule**". This rule (along with the place-of-debtor rule) can be traced back to Elizabethan times.[128]

The same rule applies in Australia:

> *specialties* (such as a policy of insurance) - a debt created by deed (a 'specialty') has been held to be located where the deed itself is to be found...[129]

So a debt due from a UK resident can be made non-UK situate for IHT by drafting the debt as a specialty and keeping the document offshore. Conversely a debt, policies, and other specialities can be made UK situate for IHT by bringing the deed here.

France/Italy IHT DTAs apply different rules.[130]

102.15.2 *Reason for specialty situs rule*

What is the reason for the specialty situs rule? *R v Williams* offers this explanation:

> [A specialty debt] was for centuries treated as very different from an ordinary debt. Indeed, the act of creating a specialty by deed was at one time possible only to men of the highest rank. Unlike debt, it was enforced by an action of covenant.[131] The deed itself was the foundation of the action, the original debt, if any, being merged. The terms of the deed were conclusive. Specialty debts till recent [?] times conferred

[127] *AG v Bouwens* (1838) 4 M & W 171 *http://www.commonlii.org* This was approved in *AG v Winans (No. 2)* [1910] AC 27; *Comr of Stamps (New South Wales) v Hope* [1891] AC 476. Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 23-032 (Specialties) cite another half dozen cases and the discussion is found already in the first edition *A Digest of the Law of England with reference to the Conflict of Laws* (1896), p.320.

[128] *Byron v Byron* Cro. Eliz. 472: "The debt is where the bond is, being upon a speciality; but debt upon a contract follows the person of the debtor; and this difference has been oftentimes agreed."

[129] Taxation Ruling TR 2008/9 *https://www.ato.gov.au/law/view/document?DocID=TXR/TR20089/NAT/ATO/00001*
The Ruling cites: *Shaw v R* (1895) 21 VLR 338; 1 ALR 122; *Haque v Haque (No.2)* (1965) 114 CLR 98 at p.137.

[130] See 115.10 (Treaty-situs).

[131] The Privy Council refer to Holdsworth, *A History of English Law* (3rd ed., 1908), vol. iii., p.417; now Holdsworth, *A History of English Law* (5th ed., 1991), vol. iii., p.417. This rule was abolished by the Civil Procedure Act 1833.

> special rights. They used to rank in the administration of the estate of a deceased person in priority to simple contract debts;[132] and, unlike such debts, were enforceable against the real estate.[133] They were said to be "of a higher nature" than debts by contract. It is, therefore, not surprising that specialty debts by deed were treated from an early date as *bona notabilia*[134] where the deeds were found at the time of the death, unlike ordinary debts which were said "to follow the person of debtor".[135]

The higher status attributed to a deed made sense several centuries ago. Important legal arrangements were recorded in deeds. Less important or casual legal arrangements were not. The rule that a deed was of a higher nature than a simple contract reflected the views of the community and the manner in which business was conducted.

The specialty rules mentioned by the Privy Council had (by 1942) long ceased to be valid in English law, but it continues to be the case that a specialty has a higher status, for instance, preferential treatment in the law of limitation. In common law jurisdictions it is still the case, in Blackstone's words, that a deed is "the most solemn and authentic act that a man can possibly perform with relation to the disposal of his property".[136]

None of this justifies the specialty situs rule, but it does show that a distinction between situs rules for a specialty debt and other debts should not be regarded as surprising or anomalous. Still, one might conclude that the specialty situs rule has no reason, but *Commissioner of Stamps v Hope* offers a good explanation:

> ... the distinction drawn and well settled has been and is whether it is a debt by contract or a debt by specialty. In the former case, the debt being merely a chose in action – money to be recovered from the debtor and nothing more – could have no other local existence than the personal residence of the debtor, where the assets to satisfy it would presumably be, and it was held therefore to be bona notabilia[137] within the area of the local jurisdiction within which he resided; but this residence is of course of a changeable and fleeting nature, and depending upon the movements of the debtor, and inasmuch as a debt under seal or specialty had a species of corporeal existence by which its locality might be reduced to

[132] This rule was abolished by the Administration of Estates Act 1869.
[133] This rule was abolished by the Administration of Estates Act 1833.
[134] See 102.1.2 (History and terminology).
[135] [1942] AC 541 at p.555.
[136] Commentaries Book II (1st ed., 1766), p.297.
[137] See 102.1.2 (History and terminology).

> a certainty ... it was settled in very early days that such a debt was bona notabilia where it was "conspicuous", i.e. within the jurisdiction within which the specialty was found at the time of death: see *Wentworth on the Office of Executors*, ed. 1763, pp.45, 47, 60(1).[138]

The reason for the specialty situs rule is not that the specialty has a "species of corporeal existence" though of course the deed does have physical existence. The reason is that the physical existence of the specialty allows the location of the debt to be a matter of certainty: the rule is more certain and easier to apply than a place-of-debtor rule. There is good sense in that. The specialty situs rule reflects a rational choice in the policy dilemma - common in tax and other areas of law[139] - of balancing the advantage of certainty against other criteria.

102.15.3 *HMRC view(s)*

HMRC formerly accepted that the specialty situs rule was correct.[140] HMRC announced a change of practice in 2013, but rightly abandoned the position(s) that specialty debts were (or were likely to be), situate where the debtor resides.[141]

After a number of iterations, IHTM now provides:

> **IHTM27079 Specialty debts: bonds and debentures under seal** [May 2020]
> ... HMRC has revised its previous approach to the Inheritance Tax (IHT) treatment of such debts, which was that where the debt is situated depends on where the relevant document is to be found. HMRC will take the following approach, which will apply regardless of when the specialty debt was created.
> [Comment on secured specialty debts, discussed below; see 102.19 (Mortgage debt).]
> **Unsecured specialty debts**
> [1] Where the debt is not secured the view of the Courts is that the situs

[138] [1891] AC 476 at p.481. The passage from Wentworth is at *https://www.kessler.co.uk/wp-content/uploads/2013/12/wentworth-on-executors.pdf*

[139] See 16.5 (Formal/substantive source rules).

[140] The IHT Manual formerly provided:
*"**IHTM27091 Contractual** [February 2006]*
A specialty debt is situated where the instrument happens to be."

[141] The point was considered in detail in the 2017/18 edition of this work, para 94.13 (Specialty obligation), concluding: "It seems safe to predict that the statement will be withdrawn."

> of the debt is usually (!) where the relevant deed or instrument evidencing the debt is found. HMRC will generally adopt this approach to unsecured specialty debts.
> [2] However, it is possible to exploit this approach artificially by, for example, removing the document from the UK to avoid an IHT charge. Where the creditor and debtor are both resident in the UK but the deed evidencing the debt has been removed from the UK, it may be possible for HMRC to argue that the debt is nevertheless situated in the UK for the purposes of the IHT charge. For this reason all cases in which a specialty debt is claimed to be situated outside the UK should be referred to Technical.

The tentative[142] suggestion is that the speciality situs rule may not apply for IHT purposes where:
(1) the creditor is UK resident
(2) the debtor is UK resident
(3) the deed has been removed from the UK

There is no basis for this view, other than, conceivably, the GAAR, but I do not think it can sensibly be said that the example constitutes abusive arrangements, within the meaning of the GAAR. HMRC, I think wisely, do not give any reason. Nor do HMRC claim, as they did before, that their view is supported by legal advice. But condition (3) is not likely to arise (in practice the deed will never enter the UK) so the issue will probably never arise.

As the statement falls into the category of "clearly wrong" I see no need to disclose to HMRC occasions where a tax charge would arise if their view were right.[143]

Perhaps the passage is just there to minimise embarrassment at the change of position.

102.15.4 *Specialty situs rule: Critique*

There is something to be said for statutory abolition of the specialty situs rule.[144] The change would not bring in any significant amount of tax (as

[142] It is qualified by the words "for example" and "... it may be possible for HMRC to argue ..."

[143] See 122.9.2 (Disclosure to avoid misconduct).

[144] There are precedents for statutory reform: the specialty situs rule was amended for probate duty: s.39 Revenue Act 1862; and it does not usually apply for CGT. Dymond states:

> "It was formerly considered that s.39 Revenue Act 1862 (which provided that, for

debts could be held by companies whose shares would be non-UK situate) but it would be a simplification. The transitional rules would need thought. If the object is simplification, the new rules should not just apply to new debts. A fair rule would be to apply the new rules after a reasonable delay, say 12 months, to allow taxpayers to review their position. The cost of taxpayers reviewing their affairs ought to be taken into account. After factoring that in, I would not have thought that the improvement was worth the trouble involved in achieving it.

If it could be done as a quid pro quo of a wider review and simplification of the unsatisfactory CGT debt and debenture situs rules[145] the law would be left in a better state. But the best solution is to look at the wider picture altogether: treat all assets other than UK land and securities as non-UK situate for the purposes of IHT and CGT.[146]

102.16 Meaning of "specialty"

"Specialty" is an opaque technical term whose meaning can only be ascertained from the case law. Four categories of asset are "specialties":

(1) Obligations under deeds:
   (a) The paradigm example of a specialty is a debt due under a deed.
   (b) The term also applies to deeds which create or record obligations which are not (or may not be) debts.[147] A life policy, contract for deferred annuity, capital redemption policy and the like are specialties if made by deed. Shares are not specialties.[148]

(2) For completeness the term also includes some liabilities which are not deeds:

> Probate Duty purposes, specialty debts owing from persons in the UK, and forming part of the free estate, were to be treated as though they were simple contract debts), was incorporated for estate duty purposes... The Irish Court, however, decided in *Re Finance Act, 1894 and Deane* [1936] Ir R 556 that [this was not the case] and, accepting this interpretation as correct, such debts are to be regarded as subject to the ordinary rule applicable to specialty debts."

See Dymond's Death Duties (15th ed, 1973) p.1267. Of course all this is inconsistent with the current HMRC view.

[145] See 103.8.4 (Critique); 103.13.5 (UK law rule: Critique); 103.9 (Debt situs rule); 103.11 (Critique).

[146] See 102.37 (Reform of IHT/CGT situs rules).

[147] In *Aiken v Steward Wrightson Agency* [1995] 1 WLR 1281 the term was applied to a contract by deed to provide services (so a claim for breach of contract was "an action upon a specialty" which qualified for a 12-year limitation period).

[148] *R v Williams* [1942] AC 541 at p.556.

(a) A debt incurred under a statute.[149]
(b) Certain debts are by statute given the status of a specialty.[150]

So the terms "deed" and "specialty" are not strictly synonymous, but in most cases a deed is a specialty and vice versa.

102.16.1 *What is a "deed"*

Since a specialty is a deed, the question arises as to what is a deed.

For a document to be a "deed" in English law it was formerly a requirement that the document must be sealed but that is not usually now the case. The current rules of what is a deed govern the meaning of "specialty". So a seal is not usually required for an English law document to be a "specialty".[151] No particular form is necessary to be a "specialty" beyond the formalities of a deed.

The same applies in Northern Ireland.[152]

As a shorthand, a deed was formerly referred to as a document "under seal" and a non-deed as a document "under hand". This usage is now out of date (at least in England) but it is still found in HMRC Manuals.

A full discussion requires a long chapter to itself. I set out the current law, in less than full detail; though it will sometimes be necessary to consider the old law.

102.16.2 *Intended to be a deed*

Section 1(2)(a) Law of Property (Miscellaneous Provisions) Act 1989 sets out the first requirement which applies both to individuals and to companies:

> (2) An instrument shall not be a deed unless—
> (a) it makes it clear on its face that it is intended to be a deed by the person making it or, as the case may be, by the parties to it (whether by describing itself as a deed or expressing itself to be executed or signed as a deed or otherwise)...
>
> (2A) For the purposes of subsection (2)(a) above, an instrument shall not

[149] *Royal Trust v AG for Alberta* [1930] AC 144.

[150] In this category there now remain only a few Victorian antiquities of no practical importance, such as s.14 Metropolitan Fire Brigade Act 1865.

[151] The Law Commission took this view in Working Paper No. 85 (1985) and Report No. 253, para 2.12.44. Dicey agrees: *Conflict of Laws* (16th ed., 2022), [Dicey's footnote] para 23-032 footnote 86

[152] Article 3 Law Reform (Miscellaneous Provisions) (NI) Order 2005.

> be taken to make it clear on its face that it is intended to be a deed merely because it is executed under seal.

102.16.3 *Executed as a deed*

Section 1(2)(b) Law of Property (Miscellaneous Provisions) Act 1989 provides:

> (2) An instrument shall not be a deed unless ...
> (b) it is validly executed as a deed—
> (i) by that person or a person authorised to execute it in the name or on behalf of that person, or
> (ii) by one or more of those parties or a person authorised to execute it in the name or on behalf of one or more of those parties.

The phrase "validly executed as a deed" is a label for a set of requirements which vary depending on whether the party is an individual or a company.

102.16.4 *Execution by individual*

Section 1(3) Law of Property (Miscellaneous Provisions) Act 1989 provides:

> An instrument is validly executed as a deed by an individual if, and only if—
> (a) it is signed—
> (i) by him in the presence of a witness who attests the signature; or
> (ii) at his direction and in his presence and the presence of two witnesses who each attest the signature; and
> (b) it is delivered as a deed.

Land Registry Practice Guide 8 – Execution of deeds (June 2023)[153] contains a helpful summary. It comments on "delivery" and attestation:

> **2.1.3 Delivery**
> [The guidance sets out s.1(3)(b), LP(MP)A 1989 and continues]:
> Delivery requires that the person expressly or impliedly acknowledges, by words or conduct, an intention to be bound by its provisions.
> Where a conveyancer, in a transaction involving the disposal or creation of an interest in land, purports to deliver a document as a deed on behalf of a party to

[153] *https://www.gov.uk/government/publications/execution-of-deeds/practice-guide-8-execution-of-deeds*

> it, there is a conclusive presumption in favour of a purchaser that the conveyancer is authorised to deliver it (s.1(5), LP(MP)A 1989). In practice, we assume that a document has been delivered as a deed unless there is some indication to the contrary. So if, for example, the words of execution have been modified to provide that delivery has not taken place, or that delivery is not to be presumed until some condition has been fulfilled, we will require evidence that delivery has subsequently taken place.
>
> **2.2 Attestation clause**
>
> The general law does not require a particular attestation clause. It is sufficient if the clause makes clear that the signatures of the parties to the deed are intended to be by way of execution and that they were made in the presence of the witnesses. The wording should also state that the document has been executed "as a deed". Then, even if it is not clear elsewhere in the document that it is intended to be a deed, the words of execution will make this apparent ...

102.16.5 *Execution by company*

In relation to a company, the requirements for a deed are supplemented by requirements for execution of a document by a company which apply to deeds and to non-deeds. Section 44 CA 2006 provides:

> (1) Under the law of England and Wales or Northern Ireland a document is executed by a company—
>
> (a) by the affixing of its common seal, or
>
> (b) by signature in accordance with the following provisions.
>
> (2) A document is validly executed by a company if it is signed on behalf of the company—
>
> (a) by two authorised signatories, or
>
> (b) by a director of the company in the presence of a witness who attests the signature.
>
> (3) The following are "authorised signatories" for the purposes of subsection (2)—
>
> (a) every director of the company, and
>
> (b) in the case of a private company with a secretary or a public company, the secretary (or any joint secretary) of the company.

Section 46 CA 2006 provides:

> (1) A document is validly executed by a company as a deed for the purposes of section 1(2)(b) of the Law of Property (Miscellaneous Provisions) Act 1989 and for the purposes of the law of Northern Ireland if, and only if—
>
> (a) it is duly executed by the company, and
>
> (b) it is delivered as a deed.
>
> (2) For the purposes of subsection (1)(b) a document is presumed to be

delivered upon its being executed, unless a contrary intention is proved.

102.16.6 *Scottish company*

Land Registry Practice Guide 8 – Execution of deeds provides:

> **3.6 Execution by Scottish companies registered under the Companies Acts**
> The question of whether a disposition of land in England and Wales is formally valid must be determined in accordance with the lex situs, that is, the law of England and Wales. It is our view, therefore, that the requirements for an effective transfer etc. of registered land are the same where the disposition is by a Scottish company registered under the Companies Acts as for a disposition by English and Welsh companies so registered.
> S.48 CA 2006 provides that "a document signed or subscribed by or on behalf of the company in accordance with the provisions of the Requirements of Writing (Scotland) Act 1995 shall have effect" as if executed by a company affixing its common seal. However, the section begins: "The following provisions form part of the law of Scotland only." It is difficult to see, therefore, how s.48 CA 2006 can be relevant where it is registered land that is being disposed of.
> The Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 includes provisions as to execution by overseas companies, but a Scottish company is not an overseas company.

102.16.7 *LLPs*

Land Registry Practice Guide 8 – Execution of deeds provides:

> **5.2 Limited liability partnerships**
> ... Limited Liability Partnerships (Application of Companies Act 2006) Regulations 2009 (SI 2009/1804) applies ss.44-47, CA 2006 to limited liability partnerships, so they may execute deeds as provided by s.44 CA 2006. The regulations modify s.44 CA 2006 so that the references to a director and the secretary, or two directors, of the company are to be read as references to two members of the limited liability partnership (Regulation 4). ...

102.16.8 *Foreign company*

Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 provides:

> Sections 43, 44 and 46 of the Companies Act 2006 apply to overseas companies, modified so that they read as follows ...
>
> **44 Execution of documents**
>
> (1) Under the law of England and Wales or Northern Ireland a document is executed by an overseas company—
>
> (a) by the affixing of its common seal, or
>
> (b) if it is executed in any manner permitted by the laws of the territory in which the company is incorporated for the execution

> of documents by such a company.
>
> (2) A document which—
>
> (a) is signed by a person who, in accordance with the laws of the territory in which an overseas company is incorporated, is acting under the authority (express or implied) of the company, and
>
> (b) is expressed (in whatever form of words) to be executed by the company,
>
> has the same effect in relation to that company as it would have in relation to a company incorporated in England and Wales or Northern Ireland if executed under the common seal of a company so incorporated...
>
> (4) Where a document is to be signed by a person on behalf of more than one overseas company, it is not duly signed by that person for the purposes of this section unless he signs it separately in each capacity.
>
> (5) References in this section to a document being (or purporting to be) signed by a person who, in accordance with the laws of the territory in which an overseas company is incorporated, is acting under the authority (express or implied) of the company are to be read, in a case where that person is a firm, as references to its being (or purporting to be) signed by an individual authorised by the firm to sign on its behalf.
>
> (6) This section applies to a document that is (or purports to be) executed by an overseas company in the name of or on behalf of another person whether or not that person is also an overseas company.
>
> **46 Execution of deeds**
>
> (1) A document is validly executed by an overseas company as a deed for the purposes of section 1(2)(b) of the Law of Property (Miscellaneous Provisions) Act 1989 and for the purposes of the law of Northern Ireland if, and only if—
>
> (a) it is duly executed by the company, and
>
> (b) it is delivered as a deed.
>
> (2) For the purposes of subsection (1)(b) a document is presumed to be delivered upon its being executed, unless a contrary intention is proved.

Practice guide 78 (July 2023) provides:

> **5. Execution of deeds by overseas companies**
>
> The Overseas Companies (Execution of Documents and Registration of Charges) Regulations 2009 (OCR 2009) allow an overseas company to execute a document in one of the following three ways. The OCR 2009 apply section 44 of the Companies Act 2006 with some amendments.
>
> Questions as to who is duly authorised to act on behalf of an overseas company in making a contract or executing a document are determined by the law of the company's domicile, not the governing law of the contract or document (*Integral Petroleum SA v Scu-Finanz AG* [2015] EWCA Civ 144).

Unless the overseas company is already the proprietor of the land or charge, we will need to see evidence of their corporate status, which may consist of either a certificate in Form 7 provided by a qualified lawyer practising in the territory of incorporation or a certified copy of the constitution of the corporation - see Evidence required on registration of overseas company as proprietor of an estate or charge.

If the manner of execution by an overseas company includes an electronic signature, then the signature must comply with our requirements in practice guide 82: electronic signatures accepted by HM Land Registry. For the purposes of practice guide 82, "conveyancer" has the meaning given by rule 217A of the Land Registration Rules 2003 and "individual conveyancer" means an individual described in paragraph (2)(a) or (b) of that rule.

5.1 Execution under a common seal

An overseas company that has a common seal may execute deeds using that seal provided the deed is executed in a form appropriate to a company registered under the Companies Act, with such adaptations as may be necessary. Practice guide 8: execution of deeds – section 3.1 Execution by a company under its common seal sets out the methods by which a deed may be executed in this manner.

Where the seal is affixed in the presence of and attested by a permanent officer of the corporation who is not a clerk (or their deputy) or secretary (or their deputy), a note is required to be added to the description below the signature to the effect that the signatory is, in fact, a permanent officer of the corporation. A similar such note is required where the seal is affixed in the presence of and attested by a member of the governing body where their title does not make this clear...

5.2 Execution in a manner permitted by local law

Under Regulation 4 of the OCR 2009 a deed may be executed "in any manner permitted by the laws of the territory in which the company is incorporated for the execution of documents by such a company". In this instance we will require evidence (which might include a letter from a qualified lawyer practising in or familiar with the domestic legislation of the territory of incorporation) to establish that the manner of execution used is indeed effective according to the law of the territory of incorporation. Such evidence must not be conditional or qualified in any way.

Any documentation in a language other than English or Welsh must be accompanied by a certified or notarised translation.

5.3 Execution by signature of authorised persons

5.3.1 Authorised person as an individual

The OCR 2009 apply s.44(2), CA 2006 amended as follows:

> "(2) A document which:
>
> (a) is signed by a person who, in accordance with the laws of the territory in which an overseas company is incorporated, is acting under the authority (express or implied) of the company, and
>
> (b) is expressed (in whatever form of words) to be executed by the company,
>
> has the same effect in relation to that company as it would have in relation to a company incorporated in England and Wales or Northern Ireland if

> executed under the common seal of a company so incorporated." ...

102.16.9 *Which debts are specialties*

The specialty situs rule requires one to ascertain whether any particular debt is a specialty, which depends on the documentation. The specialty situs rule overrides the place-of-register rule: see 102.5 (Situs of registered shares).

The IHT Manual provides:

> **IHTM27080 specialty debts: Treasury Bills, British Savings Bonds, National Savings Income Bonds** [May 2020]
> Treasury Bills and British Savings Bonds are treated as specialty debts and situs will follow the normal principles for unsecured specialty debts (IHTM27079). Any claim that such assets should be regarded as non UK situs at a chargeable event must be referred to Technical.

It is difficult to see why the claim to apply "the normal principles for unsecured specialty debts" should be referred to Technical, but there it is. In practice I would not expect Technical to challenge situs.

> **IHTM27091: Foreign property: debts: contractual** [May 2020]
> ... Corporation mortgages, issued by local authorities under seal, and Northern Irish Land Bonds are examples of specialty debts. You should be careful not to confuse corporation mortgages with corporation stock, which is far more common and which is a registered security, situated where the register is kept.

102.16.10 *Isle of Man deeds*

The position is as follows:

> While there is no doubt that seals have never been used in the Isle of Man, except by corporations, and that the formality of affixing a seal has never been, and is not now, required in order to constitute a written paper a deed, in my view for a written paper to be a deed there must be some evidence that the parties intended it to be a deed. That will normally be found in the words of the document itself.[154]

102.17 Jurisdictions without "deeds"

Common law jurisdictions employ the concept of a "deed", ie

[154] *Aall Trust & Banking Corporation v Samuel McCormick* 2 OFLR 85, Butterworths Offshore Service Cases, Vol 2, p.479.

(1) They draw a distinction between:
   (a) a "deed" (a technical term meaning a document which meets some set of formal requirements of execution) and
   (b) an informal document (which does not meet those requirements).

(2) The distinction matters for various purposes, eg certain dispositions of land require a deed; limitation and situs rules differ; etc.

Both the requirements and the consequences of being a deed have varied over the years, but there is a sufficient core to yield a stable and meaningful concept. As far as I know, other jurisdictions do not have this concept or anything very closely comparable.

102.17.1 *Channel Islands*

Jersey and Guernsey law does not have the common law concept of a deed and prefer to avoid the word or (if used) to give it an express definition.[155]

102.17.2 *Scotland*

Scots law does use the word "deed"[156] but not as a technical term:

> [16]... it is clear that the word "deed" has no technical meaning in Scots law. In *Henderson's Trs v IRC*, 1913 SC 987, a case dealing with the question of whether a minute of acceptance of office by trustees engrossed upon a trust disposition and settlement was a deed for the purposes of the Stamp Act 1891, ... Lord Kinnear stated (at 990):
>
> > "... for the purpose of this case the word 'deed' is a word of ordinary language, because it is not in our system a term of art. I agree also that it is unnecessary to attempt any exact definition of what the word 'deed' means; but I take the definition ... that a deed was any formal instrument which creates a legal relation".
>
> ... It is unnecessary for present purposes to attempt any definition of the word "deed". Nevertheless, I take from these cases that the significant characteristics of a deed are first that it should have some degree of formality and secondly that it must demonstrate an intention to create a legal relation.
>
> [17] The minute of the board meeting of a company, duly signed by the chairman, is to my mind clearly a formal document. Section 382 of the

[155] Kessler & Matthams, *Drafting Trusts and Will Trusts in the Channel Islands* (2nd ed., 2013), para 9.1.

[156] For instance, "trust deed" (broadly defined) is used frequently in the Trusts (Scotland) Act 1921.

> Companies Act 1985 [now s.248 CA 2006]... provided ... that every company shall cause minutes of all proceedings at meetings of its directors to be entered in books kept for that purpose. The reason for that provision is that the minutes serve an important purpose in recording the formal decisions of the board, which is of course the body that is responsible for managing the company. Thus board minutes are important documents. Subsection (2) then provides:
>
> > "Any such minute, if purporting to be signed by the chairman of the meeting at which the proceedings were had... is evidence of the proceedings".
>
> That too indicates a degree of formality in the notion of board minutes; they may have to be relied on in future, and it is important to establish precisely what the directors decided on any particular matter. Apart from the provisions of the Companies Act, section 2 of the Trusts (Scotland) Act 1921 states that the expression "trust deed" shall mean and include "any... resolution of any corporation". That again suggests that formal resolutions taken by a company, whether in general meeting or through its board of directors, are to be regarded as documents that have the requisite degree of formality to constitute a deed. ...[157]

In short, Scots law has a concept of "deed" (albeit somewhat vague) but that is not the common law concept. The use of the same word should not be allowed to obscure the difference. Scots law does not have the concept of a "specialty".[158] Accordingly, Scots law cannot have the rule that a specialty is situate where the document is.

102.18 Specialties: Conflict of laws

102.18.1 *Situs in English law*

An English[159] court may have to determine the situs of a debt governed by a foreign law. If the foreign law recognises the concept of a deed (in practice, if it is a common law jurisdiction) then it is considered:

(1) The question whether the document is a deed (and so a specialty) is

[157] *Low & Bonar Pension Trustees v Mercer* [2010] CSOH 47.

[158] This is recognised in former companies act legislation; for instance, s.14(2) Companies Act 1985 provided: "Money payable by a member to the company under the memorandum or articles is a debt due from him to the company, and *in England and Wales* is of the nature of a specialty debt." There is no equivalent in the current companies legislation.

[159] The same would apply in Northern Ireland.

governed by the law of the document.[160]

(2) If the document is a specialty under that law, one applies the English law (common law) rule that the situs is where the document is.

It has been suggested that the specialty situs rule may only apply if the document is situate in a jurisdiction which applies the specialty situs rule. So the situs of a specialty debt would be (say) the Isle of Man if the document was there, but it would be the residence of the debtor if the document was moved to (say) Jersey or Scotland. But there is no authority which supports that, and it is clearly wrong on principle. The question of situs in an English court is decided according to English law rules and under English law an asset may be situate in (say) Ruritania even if under Ruritanian law the asset is not situate there. Those who are concerned about the point will keep the documents in a common law jurisdiction, but that is not strictly necessary.

What is the position if a document is governed by a law which does not have the concept of a deed? There is authority that the document will be a specialty if it is executed in accordance with the English law requirements of a deed.[161] But in practice if one wishes to rely on the specialty situs rule, it is possible to avoid the issue, and choose a common law governing law, which does recognise deeds so the issue need not arise.

102.18.2 *Situs in Scots law*

If one turns to the Scots law textbooks on private international law, one finds no discussion at all on the situs of debts. Scotland did not have the jurisdiction of the Ordinary, where the common law rules arose;[162] and its private international law has managed to develop without reference to the situs of debts. I would be grateful to any reader who could direct me to relevant Scots authority if there is any.

Whatever the rule of Scots law on the situs of debts, it seems safe to say that it does not apply the specialty situs rule as Scots law does not recognise that concept. It might apply the place-of-debtor rule: a debt is situate where the debtor resides. I would not have thought that was

[160] In practice it would be unusual that a document which is a deed under the governing law does not meet the English law requirements for a deed, so the issue of which law applies for this purpose will not often arise.

[161] *Alliance Bank of Simla v Carey* (1880) 5 CPD 429.

[162] See 102.1.2 (History and terminology).

inevitable. The common law cases are not binding in Scotland. But in the absence of other authority, a solution which is more consistent with foreign jurisdictions seems preferable. This is the view of Dymond's Death Duties:

> The English specialty rule is unknown to Scottish law, so that debts owing by a person resident in Scotland, whether secured by a document under seal or not, are situate there [under Scottish law].[163]

Take the following examples; assume a specialty debt, and (if it matters) governed by English or IoM law (ie a law recognising deeds):

Case	Specialty in	Debtor resident	Situs (Scots law)	Situs (English law)
1	IoM	Scotland	Scotland	IoM
2	Scotland	IoM	IoM	Scotland

The situs of the debt (and whether it is excluded property) can hardly depend on whether the issue is litigated in England or in Scotland. It is suggested that the solution to the conundrum is to say that an asset is situated in the UK if it is:

(1) situate in England according to English law
(2) situate in Scotland according to Scots law, or
(3) situate in Northern Ireland according to NI law.[164]

It is situate outside the UK if none of those apply.

On that analysis the debt in case 1 is situate in the UK and the debt in case 2 is situate outside the UK. The answer in case 2 is perhaps surprising but the facts of case 2 will not often arise.

The IHT Manual provides:

> **IHTM27092 debts in Scotland** [May 2020]
> In Scotland, the rule that a debt is situated where the debtor resides applies to both specialty debts (IHTM27079) and to those due on simple contract. For Inheritance Tax purposes debts due from people or companies who are resident or based in Scotland are regarded as situated there. If the taxpayer or agent disputes this rule, refer the case to Technical.
> Any case where a Scottish instrument under seal is outside the UK and the locality of the asset determines whether or not Double Taxation Relief under IHTA84/S159 (IHTM27185) applies must also be referred

[163] *Dymond's Death Duties* (15th ed., 1973), p.1267.
[164] See too 4.18 (Child's domicile: Scotland).

> to Technical.
> The guidance on this page relates to specialty debts generally. It covers, for example, mortgages under seal, policies under seal, and covenant debts, and also applies to debts due from the Crown, or due under a statute.

No reason is given, but the result (although surprising at first sight) is consistent with the analysis of case 1 above.

102.19 Mortgage debt

102.19.1 *Property law background*

This section considers the situs of a debt charged or secured on land ("**mortgage debt**"). The borrower is the "**mortgagor**" and the creditor is the "**mortgagee**". Although the discussion focuses on land, the same should apply if a debt is charged on other property, such as shares.

It is not necessarily the case that all mortgage debts should be treated the same way. In English law, mortgages have a long and complex history; in other jurisdictions the nature of a mortgage will vary. The rights of the mortgagee will also depend to some extent on the documentation. However the situs cases have never investigated this, and we may proceed on the basis that all mortgages should in principle be governed by the same situs test(s).

A mortgage debt has a twofold character:

(1) It is an interest in land, conferring (at least when the debt is due and unpaid):
 (a) right to possession
 (b) power of sale
 (c) right to foreclose

(2) It is a debt, conferring a right of action against the debtor (like an unsecured debt)

In short, a mortgage debt confers a bundle of rights. It should however be regarded as a single asset, and not as two assets. The bundle is indivisible:

> If [the mortgagee] sues on the covenant to pay he must reconvey the land on payment.[165] If he has parted with the land, otherwise than in exercise of a power of sale, he would be restrained from suing on the covenant...

[165] Author's footnote: The equivalent in modern law would be a duty to support an application to the land registry to de-register the mortgage.

> The result is that a mortgagee cannot assign the mortgage debt effectually without also transferring the security upon the land.[166]

Since rules applicable to land are often different from rules applicable to debts, the question of how to classify a mortgage debt has often arisen, and has been answered in different ways. That is not surprising, as a mortgage debt partakes of both qualities, and the answer has depended on the context.

At common law, on the death of an individual, real property passed to the heir and personal property passed to the personal representatives.[167] *Thornborough v Baker* held that a mortgage debt is personalty, so that on the death of the mortgagee it passed to his personal representatives. The mortgagee's legal title to the land passed to the heir but he held it on trust for the PRs:

> for in natural justice and equity the principal right of the mortgagee is to the money, and his right to the land is only as a security for the money.[168]

Again:

> a charge to secure a liability of the chargor to the chargee is a secondary benefit. It is available only for the purpose of enforcing the primary benefit, namely the underlying personal liability which the chargor owes him.[169]

On the other hand, a mortgage debt is an interest in land; a gift by will to a charity was void under the Charitable Uses Act 1735. In *Re Hoyles* a testator domiciled in England gave to charity mortgage debts charged on land in Ontario. The majority of the CoA held that a mortgage debt was immovable property, at least for the purpose of the conflicts rule that succession to immovable property was governed by the law of the place where the land was. The 1735 Act applied in Ontario, so the gift was void.

[166] *Re Hoyles* [1911] 1 Ch 179 at p.184. Although this relates to a pre-1925 mortgage (which took the form of the conveyance of land to the mortgagee subject to a right of reconveyance) the same applies to a modern mortgage (a charge by way of legal mortgage).

[167] Hence the name "personal representatives". After s.30 Conveyancing Act 1881, the mortgagee's legal title to the land passed to the PRs; but the point would still arise even now if a will gave real property to A and personal property to B: the mortgage debt would pass to B.

[168] (1675) 3 Swans 628 at 630 *http://www.commonlii.org*

[169] *SOCA v Szepietowski* [2013] UKSC 65 at [79].

The principle that a mortgage debt was personal property was limited (or brushed aside):

> It is true that a mortgage is as between mortgagor and mortgagee regarded as personal estate for many purposes; ... but the fact that it is so for certain purposes in questions between our fellow subjects here has no bearing on the question whether such a mortgage should be regarded as movable or not in questions of international law. The mortgage undoubtedly affects the land directly; the mortgagee can enter and take possession at any time after his estate has become absolute at law;[170] he can by foreclosure acquire the full title to the land in fee, and the [Charitable Uses Act 1735] has forbidden any devises of land for any estate or interest whatsoever in any way charged or incumbered by any person or persons whatsoever in trust or for the benefit of any charitable use whatsoever and has made them void.[171]

This was a case where the court decided the answer first and the analysis came second:

> [Counsel] invites us to leave the Mortmain Act out of sight and decide as a preliminary abstract question whether mortgages on land are movable or immovable. But we should fail in our duty if we did not consider that Act and the effect of our decision upon devises within it. We must have regard to the fact that such gifts have been regarded as prejudicial to and against the public utility and a public mischief, and we must accordingly come to such conclusion as will avoid these evils.[172]

102.19.2 *A principled analysis*

There are four possible solutions:

(1) The asset is situate only where the land is.
(2) The asset is situate only where the debt is.
(3) The asset is double situate, ie fully situate in both jurisdictions.
(4) The asset is partly situate in both jurisdictions:
    (a) situate where the land is, to the extent of the value of the land, and
    (b) situate where the debt is, if and so far as the value of the asset exceeds the value of the land.

[170] This is not the case for a mortgage under modern law.

[171] [1911] 1 Ch 179 at p.187.

[172] [1911] 1 Ch 179 at p.187.

Solution (3) must be rejected if one accepts the view in this book that one asset cannot be situate in two places.[173]

Solution (2) is rational. It provides a reasonable result even in a case where the debtor has no assets other than the land, so the debt is paid out of the land. An unsecured debt may be situate in state A even though the debtor's assets used to pay the debt are all in state B.

Solution (1) - that situs depends solely on location of the land - is not a sensible or workable rule for the following reasons:

(1) One debt may be charged on land in two different countries.
(2) The rule becomes absurd if a large debt happens to be secured on an asset of small value. Would one say a £100m debt is situate in Jersey if it is secured on Jesey land, or indeed shares, worth £100k?

Solution (4) may be said to best track the economic reality - though one might doubt how far economic reality may be said to apply to situs rules of unsecured debts. It is not necessarily inconsistent with the principle that a mortgage debt is one asset and not two. Perhaps it is like a chattel which might perch across both sides of a border, whose situs may be split in the same way. If situs depends on values of the debt and the land, the proportions may fluctuate from time to time, but that too is not an insuperable objection.

102.19.3 *Mortgage situs: Case law*

All the solutions have some support in case law.[174] At some point the courts will have to review the cases and decide which to prefer.

102.19.4 *Situs of debt prevails*

These cases in this camp go back at least to *Commissioner of Stamps v Hope* [1891] AC 476. Here:

(1) The testator entered into a contract to sell land in New South Wales for a purchase price payable (in part) by 12 promissory notes falling due at various dates. The contract and promissory notes created simple contract debts (not made by deed).
(2) Subsequently the purchaser granted a mortgage of the land by deed. This deed included a covenant to pay the promissory notes.

[173] See 102.3 (Every asset has one situs).

[174] See Hopley, "Reaping the Succession Duty Field: Mortgages and the One Local Situation Rule" (1958) 16 University of Toronto Faculty Law Review 8.

The testator died before the last promissory note was payable, so the question arose as to the situs of the debt. The Revenue argued that the testator held a simple contract debt situate where the debtor was resident (New South Wales). There was some debate about the simple contract debt had merged into the mortgage deed. Under the doctrine of merger, a simple contract debt could merge into a later deed (ie be superceded by the deed) in which case the simple contract debt ceased to exist.[175] Had that happened here then there would only have been a specialty debt. But the court did not have to decide whether there had been a merger, as even if that had not happened, the debt was a specialty debt:

> The [mortgage] deed contains an express covenant to ... pay the promissory notes; between the same parties it was an existing security under seal, at the time of the testator's death, for the balance then due; it would continue to be a security for a much longer period, and would be attended with advantages not belonging to debt by simple contract. Although it never became necessary to act upon the [mortgage] deed by taking possession or seeking any remedy under it, it was and remained ... of full force and validity. *There is but one debt*, whether in Victoria or New South Wales; and their Lordships fail to see how it can be said that that debt has not become a debt by specialty.[176]

Since the deed was kept in Victoria, the debt was situate there. The Revenue did not argue that the situs of the land in NSW made any difference to the situs of the debt but the court can hardly have overlooked that fact.

Toronto General Trust Corporation v The King [1919] AC 679 supports the same approach. Here a mortgage debt was represented by two duplicate deeds, one in Ottawa and one in Alberta. In such a case one cannot apply the rule that the debt is situate where the deed is situate. The court cited *Hope* and distinguished it (there was only one deed in that case) but would otherwise have followed it. Had there been only one deed, the court would have held the debt to be situate where the deed was.

A comment of the Special Commissioner in *Hafton Properties v McHugh* also supports this view[177] and the same view has been reached in India.[178]

[175] Merger was important when there were different remedies for simple contract debts and specialties; but now the doctrine is (more or less) obsolete.

[176] [1891] AC 476 at p.484

[177] "... the debt was a mortgage debt. Such a debt is regarded for private international law purposes ... as a speciality debt, the situs of which is to be found where the

102.19.5 *Situs of land prevails*

The starting point on this side of the fence is the decision of the Privy Council in *Walsh v The Queen*.[179] Here there were a variety of debts owed by non-residents secured on property in Queensland. The documents were kept outside Queensland. Whether one applied the place of debtor rule or the specialty rule, the debts were not situate in Queensland. It was held that the debt should be regarded as being in Queensland up to the lower of the value of the debt and the value of the Queensland property.[180]

I have wondered if one could explain *Walsh* on the basis that it did not concern the common law situs rule. The case turned on an income tax statute (the [Queensland] Dividend Duty Act 1890) which could have operated a different situs rule. But the view that *Walsh* only concerned the Dividend Duty Act and was not a common law situs case is difficult to maintain after the probate duty case *Henty v The Queen*. Here a debt was secured on land in New South Wales. In a comment which was not a necessary part of the decision, and so is non-binding, the Privy Council said:

> according to the principles recognised by this Board in *Walsh v. Reg*. the security held by [the creditor] is as much an asset in New South Wales as the real estate there which it affects.[181]

If the court was applying the common law situs rule, the Privy Council in should have referred to *Commissioner of Stamps v Hope* (which the taxpayer cited in argument) or to other leading situs cases. Perhaps the PC thought that *Hope* was wrong and chose to ignore it since they could not overrule it. Or perhaps they thought that the debt was dual-situate.

102.19.6 *Mortgage debt dual-situate*

Payne v R [1902] AC 552 concerned a debt charged on land in Victoria. The debtor was resident in New South Wales. The Privy Council held (without citing authority) that the mortgage debt was an asset in New

mortgage deed is to be found;" 59 TC 420 at p.426.

[178] *Dharanidhar Roy v Sethi AIR* 1933 Cal 379 *http://www.indiankanoon.org/doc/959534*

[179] [1894] AC 144 also reported under the name *Walsh v Regina.*

[180] Where the debt was secured on property in Queensland and elsewhere, there was an apportionment.

[181] [1896] AC 567 at p.574.

South Wales *and* tentatively suggested it was situate in Victoria too:

> The debtor as well as the testator resided in Victoria and was domiciled there. The debt, though a specialty debt in New South Wales, was a simple contract debt in Victoria. That being so, it seems to their Lordships that ... the debt was an asset in Victoria and recoverable under a Victorian probate, although it may well be that in order to discharge the mortgage probate duty would also have to be paid in New South Wales, and the debt, if recovered in Victoria, might be retained in Court until the mortgagees were in a position to discharge the mortgage.[182]

The attraction of this solution is that all the cases adopting the situs of debt approach can be reconciled with those adopting the situs of land approach. But there is only one asset which cannot be dual situate.[183] The comment in *Payne* was not a necessary part of the decision, and should be dismissed as now overruled.

102.19.7 *Textbooks*

Dicey notes that in practice mortgages on land in England are usually specialties and continues:[184]

> [1] A mortgage of land confers an interest in land and will be held situate where the land is situate,[185]
>
> [2] but where it is necessary (e.g. for taxation purposes) to distinguish between the situs of the mortgagee's interest in land and that of the mortgagor's personal obligation to repay, then the latter (if in the form of a specialty) will be held situate where the deed is situate from time to time.[186] …
>
> [3] In the conflict of laws the distinction between the interest in land and the personal obligation is not normally made for the purposes of situs, and the asset is regarded as a unity which is situate in the country where the land lies.[187]

[182] [1902] AC 552 at p.560

[183] See 102.3 (Every asset has one situs) and 102.1.3 (Inconsistent case law).

[184] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 23-033.

[185] [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179.

[186] [Dicey's footnote] See *Walsh v The Queen* [1894] AC 144; *Payne v R* [1902] AC 552. Also *Henty v The Queen* [1896] AC 567.

[187] [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179; *Dicey*; cf Falconbridge, *Selected Essays on the Conflict of Laws* (2nd ed., 1954), pp.573–580 for an acute discussion of the problem raised in this paragraph.

Dicey's view at [1] and [3] is that the location of the land prevails. This overlooks the authorities cited above. The case cited, *Re Hoyles*, does not support Dicey. It shows that the succession law which applies to a mortgage debt is the law where the land is situate. However, it does not follow from this that the debt should be regarded as situate in that country. This is a case where succession law does not follow the situs of the asset. Situs as such is nowhere discussed in *Re Hoyles*. The suggestion at [2] is that tax law may distinguish between the mortgagee's interest in land and the mortgagees's right to payment. But tax law does not have different situs rules from the general law.

HMRC adopt the view that the location of the land prevails. IHTM provides:

> **IHTM27079 Bonds and debentures under seal** [May 2020]
> **Secured specialty debts**
> Where the debt is solely secured on land or other tangible property situated in the UK the situs of the debt will also be in the UK. HMRC considers the situs of the debt follows the genuine interest of the creditor in the secured property, not merely the personal obligation of the debtor to repay (which may be situated elsewhere, for example where the debtor is resident).
> Any claim that a debt secured on UK assets is not UK situs property must be sent to Technical.

102.19.8 *Conclusion*

There is a lot to be said for the view that a mortgage debt is situate where the debt is, and not where the land is, and this was the view formerly taken in this work. But it is tentatively suggested that the best solution is solution (4), the situs is the situs of the land, except so far as the value of the debt exceeds the value of the land. This does mean that the situs of an debt can be changed by charging it on land; but that is not absurd, because the charge alters the nature of the asset. It may not be inconsistent with the HMRC view, as the Manual passage above may not be considering the case where the debt exceeds the value of the land.

102.20 Claim for breach of trust

If a trust makes a distribution in breach of trust, or a company makes an unlawful distribution, the transferor acquires two remedies:

(1) A claim *in personam* against the recipient, for an amount equal to the sum distributed

(2) A claim *in rem* for the asset transferred, which the recipient holds on constructive trust for the transferor

The transferor holds a chose in action which is one asset, not two. It is suggested that the situs of this asset is:

(1) The situs of the asset transferred, or assets to which it may be traced, up to the value of those assets; and
(2) If and so far as the value of the claim exceeds the value of those assets, the situs is where the recipient is resident.

The argument is similar to the situs of a mortgage, but stronger, in that the transferor has the beneficial interest, not just a security interest, in the asset transferred.[188]

102.21 Debt under letter of credit

The IHT Manual provides:

> **IHTM27091: debts: contractual** [May 2020]
> A debt under a letter of credit has been held to be situated in the place where it is in fact payable against documents (*Power Curber International Ltd v National Bank of Kuwait* [1981] 3 All ER 607).

In *Power Curber International*, the debtor bank was resident in Kuwait but the debt was payable in Carolina. The majority of the CoA held the debt was situate in Carolina. The decision on this point was not necessary for the decision, not fully argued, and the dissenting view was the better one. But the issue will not often arise in an IHT context, as letters of credit are likely to be held by companies, so the situs of the debt will not often matter for tax purposes. If it did arise, the lower courts are likely to follow the majority view of the CoA, and even the Supreme Court should prefer to maintain the stability which results from following a decision which has been unchallenged for so long. So the law should be regarded as settled.

102.22 Judgment debt

A judgment debt is situate where the judgment is recorded.[189] Obtaining judgment may therefore have the effect of changing situs, for better or worse.

[188] See 102.19 (Mortgage debt); 103.21 (Bare trust or nomineeship).

[189] *AG v Bouwens* (1838) 4 M & W 171 on *http://www.commonlii.org*

102.23 Bank account

The IHT Manual provides:

> **IHTM27093 Debts: Bank accounts** [May 2020]
> A bank account is a debt, and under general law is situated at the branch of the bank where the account is kept: *R v Lovitt*[190] [1912] AC 212...

This is not a special rule for bank accounts: it is an application of the general rule for debts; in particular, in the case of a company carrying on business in two places, a simple debt is situate where payable.[191]

UK bank accounts may qualify for IHT relief.[192] Guidance on what constitutes a branch of a bank can be found in the discussion of branch and PE.[193]

102.24 Building society account

A standard form building society account is not a debt, it is an interest in the society, so corporation situs rules rather than debt rules should be applied.

The IHT Manual provides:

> **IHTM27151 [Bank or]**[194] **building society accounts in Channel Islands and Isle of Man** [May 2020]
> Any case where it is claimed that an account with a UK Building Society must be treated as situated in the Channel Islands or the Isle of Man, so it is exempt from IHT, must be referred to Technical.

102.25 Insurance policy

For the purpose of common law situs rules a policy is treated in the same way as a debt, so the place-of-debtor and specialty situs rules apply.[195] That makes sense if one bears in mind the insurance law background: under insurance law/property law, a policy is classified as a contingent

[190] In the Law Reports the name of this case is: *The King v Lovitt.*

[191] See 102.14.3 (Dual resident debtor).

[192] See 76.13 (Foreign currency account).

[193] See 106.2 (Meanings of permanent establishment); 106.27 (Meaning of "branch or agency").

[194] The reference to a "bank" in the heading seems to be erroneous since the text only relates to building societies.

[195] *New York Life Assurance v Public Trustee* [1924] 2 Ch 101.

debt,[196] even though in a CGT context one would not describe a policy as a "debt", as policies are taxed differently from normal debts.[197]

France/Italy IHT DTAs apply different rules.[198]

The IHT Manual provides:

> **IHTM27101 Foreign Property: Money From A Life Policy: General Rule** [May 2020]
>
> When a life policy is not made by way of deed the policy monies are situated where the debtor (the company) is resident. This is generally the head office of the company.
>
> You can find more information on policies at IHTM20000 onwards.
>
> **IHTM27102 Payment Made At Place Other Than Head Office** [May 2020]
>
> Where under the terms of the policy, payment is to be made at some place other than the residence of the head office the monies are deemed to be situated at the place of payment' (*New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101).
>
> So, if the policy proceeds are to be paid in the UK the policy proceeds are UK sited and chargeable to Inheritance Tax.
>
> **HTM27103 Policy Issued At Branch Office** [May 2020]
>
> The proceeds of a policy are usually taxed where they are sited (IHTM27071).
>
> If a policy:
>
> - is issued by, or through, a branch office of a UK company that is outside the UK, and
> - no reference is made in the terms of the policy as to the place where the policy monies are to be paid,
>
> policy monies are to be treated as situated in the country of the branch office as long as the whole course of business in relation to the policy had been transacted in that country.
>
> The 'whole course of business' means that all the following events must happen in the country of the branch office:
>
> - The policy is issued to a resident in that country from the branch in that country.

[196] *Foskett v McKeown* [2001] 1 AC 102 at p.134: "The word "policy" is here used to describe the bundle of rights to which the policyholder is entitled in return for the premiums. These rights, which may be very complex, together constitute a chose in action, viz, the right to payment of a debt payable on a future event and contingent upon the continued payment of further premiums until the happening of the event."

[197] See 56.22.1 (CGT debt exemption).

[198] See 115.10 (Treaty-situs).

> - The holder of the policy remains resident and retains the policy there, pays the premiums to the branch there, and dies there.
> - The grant of representation to the policy holder's estate is taken out there and the proceeds are collected there.
>
> You should not assume that the policy was situated in the UK without considering all the circumstances surrounding the policy, even if, at the date of the life assured's death:
>
> - the policy is in the UK at the Assurance Company's head office, and
> - the life assured has assigned the policy to the assurance company as security for a loan.
>
> Each case must be considered on its own facts. If a small detail prevents the conditions from being fully met this may still mean that the policy is situated outside the UK. But any case where this applies, or where the locality of the policy has to be determined before the policy holder's death must be referred to Technical.
>
> Where a policy not made by way of deed has terms that provide for payment either at its head office or at a branch office, and the 'whole course of business', takes place in the country of the branch office, the monies are also treated as locally situated in that country.

Some of para 27103 is doubtful but the practice will normally favour the taxpayer so the issues will not often arise.

102.25.1 *Policy made by deed*

The IHT Manual provides:

> **IHTM27104 Policies Under Seal** [May 2020]
>
> Policies by way of deed or under seal are specialty debts (IHTM27079). Where the policy holder is non UK domiciled and there is no evidence to suggest the location of the policy documents has been artificially arranged, HMRC will treat such policies as situated where the deed is to be found. You should refer to Technical any case in which it is claimed that a policy under seal held by a person domiciled in the UK is not situated in the UK.

But if the policy is held by a UK domiciliary, the issue of situs will not often arise.

It is necessary to investigate whether policies are specialties. The IHT Manual gives a little guidance:

> Most Lloyds policies are embossed with a seal but they are not specialty debts unless they also bear the witnessed personal signature of the General Manager of Lloyds Policy Signing Office. Lloyds policies that

> do not bear this signature are chargeable to Inheritance Tax in the country where the debtor (the company) resides (IHTM27101).

On IHT treatment of UK situate policies see 70.23 (Policy held by non-dom: IHT).

102.26 Land

The IHT Manual provides:

> **IHTM27074 Land and interest in land** [May 2020]
> Immovable property is situated where it is actually located.

That seems self-evident; but if authority is needed, see *Haque v Haque (No 2)* (1965) 114 CLR 98 at p.136.

The Manual continues with a discussion of the meaning of "land":

> But, different legal systems may take opposing views as to whether some types of interest in land or relating to land are movable or immovable property.
> These differences are resolved (under Private International Law, and also by specific provision in Double Taxation Conventions where these apply)[199] by the adoption of the view taken by the law of the country in which the land itself is 'situated': *Johnstone v Baker* (1817) 4 Madd 474; *Macdonald v Macdonald* (1932) SLT (HL) 381.[200]
> Land is usually classed as immovable property, so is generally governed by the law of the country in which it is situated ...

102.27 Chattels

The rule is what one would expect. The IHT Manual provides:

> **IHTM27075 Chattels** [May 2020]
> ... (chattels) are situated where they happen to be at the relevant time.[201]

It is suggested that this applies even where:
(1) a chattel is moved out of the UK;
(2) the chattel is transferred to another person or trust;
(3) the chattel is returned to the UK.

The temporary removal of the asset at the time of the disposal cannot be

[199] See 24.7.1 ("Immovable property").

[200] Accessible *http://uniset.ca/other/cs5/1932SLT381.html*

[201] The text is found twice: IHTM21047 [May 2020] and IHTM27075 [May 2020]. For a concession on works of art see 76.14 (Works of art).

ignored, for tax purposes, even if the time spent out of the UK is short.

102.28 Ships and aircraft

The IHT Manual provides:

> **IHTM27073 Ships** [May 2020]
> A ship on the high seas is deemed to be situated at its port of registry but when it comes within territorial waters this artificial situs is displaced by the actual situs: *Trustees Executors & Agency Co Ltd v IRC* [1973] Ch 254.

Dornoch v Westminster International[202] raises the issue of the situs of a ship, but muddles what ought to be two distinct issues, namely, (1) situs and (2) what system of law governs the transfer of title to a ship.[203]

In *Air Foyle v Centre Capital*:

> Although there is a somewhat tentative and limited suggestion in Dicey that an aircraft "may at some times be deemed to be situate in its country of registration"[204], there are overwhelming reasons for treating an aircraft as situate in the State where it physically is for the time being, at least unless it is either over the high seas or over or on territory which is not under the sovereignty of any State.[205]

It is suggested that the ship rule is the most sensible solution for aircraft.

It is suggested that a satellite in orbit is situate where it is registered.

102.29 Goodwill

Goodwill is property, and the property is situate where the business to which it relates is carried on.[206] In *Star Industrial v Yap Kwee Kor*:[207]

> Goodwill, as the subject of proprietary rights, is incapable of subsisting by itself. It has no independent existence apart from the business to which it is attached. It is local in character and divisible; if the business is carried on in several countries a separate goodwill attaches to it in each.

[202] [2009] EWHC 889 (Admlty) at [90] - [103].

[203] This relates to the debate over the role of situs in private international law; see 102.1.1 (Situs in tax/private international law).

[204] The passage is still in the current ed: Dicey, Morris & Collins, *The Conflict of Laws* (16th ed, 2022), para 23E-060 (Exception 2).

[205] [2002] EWHC 2535 (Comm) at [40].

[206] *IRC v Muller & Co's Margarine Ltd* [1901] AC 217.

[207] [1976] FSR 256 at p.269.

102.30 Intellectual property

Intellectual property is likewise divisible, and is regarded as a separate asset situate in each jurisdiction where it can be enforced.[208] In *Peer International v Termidor Music Publishers*:[209]

> The essence of an intellectual property right is the owner’s right to take action to prevent others from engaging in certain types of activity in a given territory without the owner's permission. Although patents, trade marks and copyright are classified as moveables, they share some of the characteristics of immovables in the sense that the rights which they confer are territorially limited. It follows that a patent, a trade mark or copyright is situate in the country whose law governs its existence... although a wholly abstract concept, English copyright is inevitably located in England, or, as may be more appropriate in light of the provisions of the Copyright, Designs and Patents Act 1988, UK copyright is inevitably located in the UK.

The textbook *Copinger & Skone James on Copyright* explains:[210]

> ... there is no such thing as global or world-wide copyright... In respect of any particular work, separate copyrights or equivalent rights subsist in different territories throughout the world. Copyright is only situated here in so far as it is protected here by the Copyright, Designs and Patents Act 1988. The rights in works which are protected in other countries by other laws are situate in those countries and not in the UK.

A share in a patent granted in New South Wales, and a licence to use it in New South Wales, was (after some vacillation) held to be property situate in New South Wales.[211]

These issues will not often arise for IHT, because intellectual property is mostly held by companies or partnerships, not directly by individuals; and because of BPR.

102.31 Land subject to contract of sale

An interest in English land subject to a contract of sale is still situated in

[208] See 24.5 (Source of non-trade IP income); *Foster's Australia v CIT* 302 ITR 289 (AAR) 10 ITLR 939.

[211] *English Scottish & Australian Bank v IRC* [1932] AC 238 at p.249.

the UK. It is suggested that a contract of sale does not affect situs.[212]

102.32 Bare trust or nomineeship

The interest of a beneficial owner in property held by a nominee or bare trustee[213] is situate where the underlying asset is situate: a nomineeship or bare trust is transparent for situs. That is almost self-evident, but if authority is needed, see *Re Clore, IRC v Stype Investments* where a Jersey nominee held land in England:[214]

> Immediately after the conveyance of [the land] to [the Jersey nominee] and the execution of the declaration of trust which acknowledged that [the land] would "continue to remain in the beneficial ownership of Sir Charles," [the land] belonged in equity to Sir Charles in fee simple and his interest constituted property situate in England. [The Jersey nominee] was entitled to be paid any outgoings or charges in respect of the land, but this entitlement did not affect the nature, quality or situation of the interest of Sir Charles in the [land].

The position is different for unit trusts[215] and intermediated securities[216], which are not straightforward bare trusts, and best not described as bare trusts at all.[217]

102.33 Interest under substantive trust

The situs of an equitable interest under a substantive[218] trust is not often relevant for IHT, but it may matter, eg where a reversionary interest is not excluded property for IHT.

102.33.1 *Baker trusts*

An equitable interest under a *Baker* type trust (ie English law or a jurisdiction following English trust law principles)[219] has a twofold character:

[212] See *Re Clore, IRC v Stype Investments* [1982] STC 625; see too 82.19.2 (Contract to buy/sell asset).

[213] For present purposes the terms bare trustee/nominee are used synonymously.

[214] [1982] STC 625 at p.633-4.

[215] See 69.10 (Situs of unit).

[216] See 71.3 (Transparent intermediated security: Situs for IHT/IT).

[217] See 87.7.1 ("Bare trust" and related terms).

[218] By "substantive" I mean a trust other than a bare trust (nomineeship) or unit trust.

[219] For the trust law background, see 42.9 (Life tenant: Source of Income); 42.12 (Baker or Garland trust?).

(1) It provides rights enforceable against the trustee.
(2) It is an interest in the trust property.

There are many connecting factors which might be used to attribute a situs to an equitable interest, and the courts have not had to consider all possible permutations. *Favorke v Steinkopff*[220] concerned an English law will trust, with English trustees, but German situate property; the equitable interests of an annuitant, life tenant and remaindermen were held to be situate in England. It is suggested that an equitable interest is in principle situate where the trustees are resident. If the trustees are resident in different jurisdictions, situs would be determined by an exclusive jurisdiction clause if there is one, or failing that, by the proper law.[221]

This is consistent with the rule that the equitable interest is classified as moveable (not immovable) property. The High Court of Australia said:[222]

> The mere fact that there is land subject to the trust would not result in the beneficiary's interest in the fund being an immovable in the place where the land is situated. The interest in the fund is situated in the country which is the forum of administration of the trust or whose law is the proper law of the trust.

There is a sound basis to say that situs of the assets of the trust fund is not relevant to the situs of the equitable interest. If the trust assets are situate in different jurisdictions it would be impossible to ascertain the situs of the equitable interest (if the equitable interest is regarded as a single asset). An equitable interest such as a life or reversionary interest should not be regarded as several separate interests in as many assets as are held by the trustees. Such an equitable interest is generally regarded as one asset and not as many assets as there are items of trust property.

Where the equitable interest is a power of revocation the same applies, but situs does not matter for IHT because of settlement-power relief.[223]

Where the equitable interest is an annuity, it would often be impossible to locate the annuity by reference to the situs of the trust assets, because

[220] [1922] 1 Ch 174.

[221] For a contrary view see Harris, *The Hague Trusts Convention* (1st ed, 2002), Chapter 9 (Situs of equitable interests) and Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 23-046 (Interests under trusts).

[222] *Haque v Haque (No 2)* [1965] HCA 38; (1965) 114 CLR 98 at [2] citing *Ewing v Orr Ewing* (1883) 9 App Cas 34.

[223] See 74.10 (Settlement power).

one cannot identify any particular trust asset and say that asset is (to any fixed extent) the source of the annuity.

102.33.2 *Garland trusts*

An interest under a Scots law or other *Garland* type trust is not an interest in the trust property, so the situs of the trust property is irrelevant to situs.

102.34 Estate of deceased person

The IHT Manual provides:

> **IHTM27072 Unadminstered estates** [May 2020]
> In general, a person who takes an absolute interest in the residue of an estate is entitled, not to the assets **of the testator, but to a right of action**, enforceable against the executors. This is the case under English law and many other legal systems.[224]
> This means the executors must administer the estate and transfer the clear residue, or a share of it to the beneficiary. The same rule applies in the case of intestacy.
> This is a similar rule to the jus crediti to which a beneficiary is entitled in Scotland.

The chose in action is situate where it is enforced, ie where the executors are. The situs of the assets of the estate is not relevant. See *CSD v Livingston* [1965] AC 694. The IHT Manual continues:

> But, for IHT, the deceased is treated as having a direct interest (in the whole or a share) in the net assets of the residuary estate. See IHTM22031[225]
> For this reason you must consider the situs of each of the underlying assets separately.
> For example, the excluded property provisions in s.6(2) IHTA may apply to qualifying securities included in the unadministered estate (IHTM04260) and as a result they may not be chargeable to IHT.

102.35 Situs of partnership share

The situs of a partnership share may not matter for IHT, because:

- BPR may apply

[224] Author's footnote: Further consideration will be required for jurisdictions other than England and Wales, especially civil law jurisdictions.

[225] See s.91 IHTA.

- The value of a share in a partnership providing services may be nil, particularly at the time of the death of the partner

However the issue does arise for investment partnerships.

102.35.1 *Partnerships (except LLPs)*

A partnership share may be analysed as an asset (a chose in action) distinct from the assets of the partnership, or as co-ownership.[226] In the context of situs, the chose in action analysis applies, and so a partnership share has its own situs distinct from the situs of the partnership assets. That must be the appropriate analysis, given the impracticality of ascertaining all the assets of the partnership and their situs.

There are several factors that the court might have used to determine situs. In practice the situs of an interest in a partnership is the place where the partnership business is carried on.[227] I refer to that as the "**place-of-business situs test**".

On identifying the place where the partnership business is carried on, see 85.19.4 (Where is control/management).

What if a partnership carries on one business in two places? Dicey says: "Where the business is carried on in more than one country then it is submitted that the share is situate in the country where the headquarters of the business is to be found."[228] HMRC agree. The Partnership Manual provides:

> **PM274500 IHT: Situs of partnership interest** [Jul 2019]
> ... In relation to a partnership interest, situs will be in the jurisdiction in which the overall management and control of the business is exercised.

What if a partnership is carrying on *two* businesses in different places? This arose in *Beaver v Master in Equity*[229] where the partnership had three businesses, in London, Melborne and Adelaide. The solution adopted was

[226] See 85.3 (Nature of partnership share).

[227] See *Laidlay v Lord Advocate* (1890) 15 App Cas 468, a Scots case concerning an English partnership (see p.480). This was followed in *Commissioner of Stamp Duty v Salting* [1907] AC 449, an Australian case concerning an English or New South Wales partnership (the court did not ask which, no doubt it would make no difference).

[228] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 23-047 (Shares in a partnership business).

[229] [1895] AC 251.

that the partnership businesses were situate in different places; the Melborne business was therefore situate in the state of Victoria. The distinction between one single business and two (or more) separate businesses could be somewhat fragile. The issue will not often arise, except, possibly, in some tax planning contexts.

102.35.2 *Partnership holding land*

This section considers the position where partnership assets consist of or include land.

Dicey states (tentatively) that "A share in land belonging to the partnership may however be situate where the land is situated."[230] But there is only one case which takes that view. It is wrong in principle as a partnership share is one asset. "An interest in a partnership is not to be fragmented into as many different interests as the partnership has assets with the consequence that each fragment should be treated as located where the asset with which it is concerned might happen to be".[231] It is also out of line with the authorities. The law is correctly stated in *Livingston v Commissioner of Stamp Duties*:[232]

> the local situation of the interest in the partnership as a whole being considered in law to be where the business is carried on, so also is the partner's interest in a partnership asset:[233] it occurred to no one to distinguish for the purposes of locality between the interest in the partnership and the interest in the assets; and indeed in *Beaver v Master in Equity* the emphasis given by the Privy Council to the fact that the business of the partnership in Melbourne was a distinct business from others which the partnership carried on in London and Adelaide indicates that the partner's interest in the Melbourne assets would not have been treated as situate there if there had been only a single business and that had been carried on in London. There is a case in the Supreme Court of Canada in which the contrary view was taken by a majority of

[230] Dicey, Morris & Collins, *Conflict of Laws* (16th ed., 2022), para 23-047 (Shares in a partnership business). Dicey cites: *Boyd v AG for British Columbia* (1916) 54 SCR 532; *Haque v Haque (No. 2)* (1965) 114 CLR 98 but the majority in *Haque* do not support Dicey's view.

[231] *Haque v Haque (No 2)* [1965] HCA 38; (1965) 114 CLR 98 at [2].

[232] High Court of Australia, 107 CLR 411, at [14].

[233] The Court referred to: *In the Goods of Ewing* (1881) 6 PD 19, at p.23, *Laidlay v Lord Advocate* (1890) 15 App Cas 468, *Beaver v Master in Equity* [1895] AC 251 and *Stamp Duties Commissioner v Salting* [1907] AC 449.

> the Court, but, with respect, I would prefer the dissenting judgment of Anglin J: *Boyd v AG for British Columbia*[234].

This is consistent with the rule that even if partnership assets include land, a partnership share is classified as:
(1) moveable (not immovable) property[235] and
(2) personal (not real) property.[236]

The position is perhaps even clearer for a Scots partnership, under which the partners have no direct proprietary interest in the partnership assets.

HMRC agree.[237] The rule may work in favour of HMRC, in that a UK situate partnership with foreign land is a UK situate asset.

If the partnership business is letting land in the UK, it will be a business carried on in the UK and so the partnership interest is UK situate. If that is right, partnerships (unlike companies) cannot easily be used to transfer situs of property outside the UK.

It follows that the existence of a partnership may be important for situs, as the interest of a co-owner of land (in the absence of partnership) is situate where the land is situate. If what purports to be a partnership merely allows a partner to occupy the land, there is no business and so the arrangement does not constitute a valid partnership (which requires a business).[238]

[234] (1917) 36 DLR 266.

[235] *Re Stokes* (1890) 38 WR 535, 62 LT 176, 6 TLR 154; *Haque v Haque (No 2)* [1965] HCA 38; (1965) 114 CLR 98 Menzies J at [2] sets out the majority view.

[236] Until 1996 it was clear that a partnership interest was personal (not real) property, as there was a common law rule to that effect. The rule applied for fiscal purposes: *Forbes v Steven* (1870) LR 10 Eq 178. The rule was codified in s.22 Partnership Act 1890. TOLATA 1996 misguidedly repealed s.22 in England, leaving English law confused but probably unaltered. (Section 22 continues to apply in Scotland). But whatever the effect (if any) of the repeal of s.22, it does not affect situs.

[237] HMRC, "Technical Briefing on Non Dom/IHT Residential property changes" (2015) provides: "The government intends to amend the rules on excluded property so that trusts or individuals owning UK residential property through an offshore company, *partnership* or other opaque vehicle, will pay IHT on the value of such UK property..."
https://www.gov.uk/government/publications/technical-briefing-on-foreign-domiciled-personsinheritance-tax-residential-property-changes/technical-briefing-on-foreign-domiciled-personsinheritance-tax-residential-property-changes
This amendment was subsequently made; see 82.4 (Residence-partnership).

[238] See 85.12.2 (Partnership holding land).

102.35.3 *Situs of LLP*

An LLP is a body corporate. The situs of a member's interest in an LLP for the purposes of private international law will be determined by the rules applying to companies.

For IHT, however, s.267A IHTA provides:

> property to which a limited liability partnership is entitled, or which it occupies or uses, shall be treated as property to which its members are entitled, or which they occupy or use, as partners...[239]

A foreign LLP is not an LLP for this purpose[240] and references to an LLP in the discussion here are to a UK LLP.

Section 267A deems the LLP's property to be property to which its members are entitled *as partners*. It does not deem the members to be directly entitled to the assets: it puts an LLP in the same position as a general partnership. CIOT correctly say:

> The general intention of s.267A IHTA 1984 would appear to be to treat LLPs as though they were general partnerships for IHT purposes, and the wording of the section would seem to be sufficiently clear to achieve this.[241]

It follows that (for IHT) the place-of-business situs test determines the situs of an interest in an LLP, as for a general partnership. The same applies for IT.[242]

The place-of-business situs test does not work if the partners are not carrying on a business. In the case of a general partnership, this situation cannot arise. A partnership only exists while partners are carrying on a business. If they are not doing that, there is no partnership:[243] the arrangement is classified as joint ownership. An LLP which is not

[239] See 85.22.6 (LLPs: IHT).

[240] See 85.21.1 (Definition and nature of LLP); 90.37 (Foreign LLP).
HMRC agree: see ICAEW Tax Faculty, CIOT and STEP, "IHT Business Property Relief – Interests in Partnerships/LLPs and Surplus Cash Holdings" (2014) para 15: "We confirm that s.267A IHTA 1984 relates solely to UK LLPs."
https://www.icaew.com/restrictedmedia?mediaItemId=4aed2a6e-ed18-40ae-be24-83d1d761d297
ICAEW ref: TECH 01/14 TAX

[241] See 85.21.1 (Definition of LLP).

[242] See 85.22.2 (Income tax treatment of LLP).

[243] See 85.5.1 ("Business") .

carrying on a business is still an LLP. It is considered that for IHT purposes the members are then treated as joint owners.

The IHT Manual provides:

> **IHTM25094 Limited liability partnerships** [May 2020]
> ... [1] The effect of [s.267A] is that we look through LLPs so that they will be treated in the same way as traditional partnerships. The result of this is that:
>
> - Where a traditional partnership incorporates itself as a LLP, a partner's period of ownership for the purposes of qualifying for business (or agricultural) relief will not be regarded as being interrupted.
> - The normal reliefs and exemptions available to partners in a traditional partnership will also be available to members of a LLP...
>
> [2] A further change is that an interest in a LLP is deemed to be an interest in each and every asset of the partnership, while an interest in a traditional partnership is a 'chose in action', valued by reference to the net underlying assets of the business.
> [3] This may require you to consider issues of situs of assets. In cases of doubt refer to Technical for advice.

Paragraph [2] is terse. It floats the suggestion that an LLP is treated as co-ownership (rather than partnership) for IHT purposes, specifically for valuation, and (logically) for other purposes. But that is wrong and in practice HMRC do not apply that approach in relation, for instance, to BPR (which is considered later in the same paragraph of the Manual). I would be surprised if HMRC seriously argue that the test for situs of an interest in an LLP is different from the test for situs of an interest in a general partnership; I do not think that para [3] should be read as expressing a view on that question, beyond the instruction to refer difficulties on to TG.

102.36 Situs of pension and death benefits

Death in service benefits payable in respect of service under the Crown, local authorities or overseas governments are generally payable at discretion and so not liable to IHT. However the situs does matter in the exceptional case where the benefit is an asset in the estate of the deceased.

Section 153 IHTA provides:

> (2) For the purposes of this Act—
> (a) a pension paid under the authority of a scheme made under section 2 of the Overseas Pensions Act 1973 which

[i] is constituted by the Pensions (India, Pakistan and Burma) Act 1955 or

[ii] is certified by the Secretary of State for the purposes of this section to correspond to the said Act of 1955

shall be treated as if it had been paid by the Government of India or the Government of Pakistan (according as the arrangements in pursuance of which the pension was first paid under the said Act of 1955 were made with the one or the other Government);

(b) a pension paid out of any fund established in the UK by the Government of any country which, at the time when the fund was established, was, or formed part of, a colony, protectorate, protected state or UK trust territory shall, if the fund was established for the sole purpose of providing pensions, whether contributory or not, payable in respect of service under the Government be treated as if it had been paid by the Government by which the fund was established;

(c) a pension paid out of the Central African Pension Fund established by section 24 of the Federation of Rhodesia and Nyasaland (Dissolution) Order in Council 1963 shall be treated as if it had been paid by the Government of a territory outside the UK; and

(d) so much of any pension paid to or in respect of any person under—

(i) the scheme which by virtue of subsection (3) of section 2 of the Overseas Pensions Act 1973 is constituted under that section by section 2 or subsection (2) of section 4 of the Overseas Service Act 1958 or

(ii) such other scheme made under section 2 of the Overseas Pensions Act 1973 as is certified by the Secretary of State for the purposes of the Taxes Act to correspond to section 2 or subsection (2) of section 4 of the Overseas Service Act 1958

as is certified by the Secretary of State to be attributable to service under the Government of an overseas territory shall be treated as if it had been paid by the Government of that territory.

(3) ... for the purposes of subsection (2) above—

(a) "pension" includes a gratuity and any sum payable on or in respect of death, and a return of contributions with or without interest thereon or any other addition thereto;

(b) "UK trust territory" means a territory administered by the Government of the UK under the trusteeship system of the United Nations;

(c) "overseas territory" means any country or territory outside the UK;

(d) references to the Government of any such country or territory as is mentioned in paragraph (b) or (d) of that subsection include a Government constituted for two or more such countries or territories and any authority established for the purpose of providing or administering services which are common to, or relate to matters of common interest to, two or more such countries or territories.

(4) If, by reason of Her Majesty's Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under

> that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty's Government in the UK.

The important effect of this is that the pension (defined to include a death benefit) is not UK situate if it is treated as payable by a foreign government. The IHT Manual provides:

> **IHTM17058 Pensions: IHT charges: Crown, local authorities and overseas governments** [May 2020]
> Death in service benefits payable in respect of service under the Crown, local authorities or overseas governments are generally (but not always) payable at the discretion of the pension provider (IHTM17051), so they are not liable to Inheritance Tax.
> The following guidance is only general and will not cover every situation. Scheme rules may change and you should check the latest position or ask for advice from Technical. ...
> **Overseas Service**
> Sums payable on death to personal representatives by way of return of subscriptions under the regulations of:
> - the Indian Military Widows and Orphans Fund;
> - the Superior Services (India) Family Pension Fund
> - the Indian Military Service Family Pensions Fund; and
> - the Indian Civil Service family pension fund
>
> Are not included as part of the estate (IHTA84/S153 (1)).
> A lump sum payable on death to personal representatives under a scheme constituted under the Pensions (India, Pakistan and Burma) Act 1955 or a corresponding scheme (a foreign asset by virtue of S153 (2)(a) is part of the estate if the deceased died domiciled (IHTM13000) in the UK. It is excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.
> Benefits payable to personal representatives as of right on death of a Colonial Government servant (a foreign asset under S153 (2)(b) are part of the estate if the deceased died domiciled in the UK). They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.
> Benefits payable under s.1 Overseas Pensions Act 1973 other than 'statutory increases' thereof (a foreign asset by virtue of S153 (4) and S153 (2)(b)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.
> Benefits payable out of the Central African Pension Fund (a foreign asset by virtue of S153 (2)(c)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.
> Lump sum payable on death to personal representatives as of right under a scheme constituted under the Overseas Service Act 1958, or a corresponding

scheme (a foreign asset by virtue of S153 (2)(d)) are part of the estate if the deceased died domiciled in the UK. They are excluded property under IHTA84/S6 (1) if the deceased was domiciled outside the UK.

102.37 Reform of IHT/CGT situs rules

Amendment of situs rules for IHT purposes is difficult because of the problem of double inheritance taxation. To the extent that different states adopt the same common law situs rules, they effectively prevent double taxation which otherwise arises if state A regards an asset as situate in state A for IHT purposes and state B regards the same asset as situate in state B. That explains why in 1974 CTT (now IHT) adopted the common law situs rules and not the CGT statutory situs rules. The disparities between CGT and IHT situs are not accidental.[244]

The reform to improve the position would be to treat all assets as non-UK situate for the purposes of IHT (and also CGT) except for:
(1) UK land
(2) Securities (either all securities or just unquoted securities).

That would be a simplification and it is most unlikely that the IHT (or CGT) charge on such assets of foreign domiciliaries brings in any significant tax. There is a precedent in the abolition of stamp duty on UK situate property (other than securities and land).

[244] It could of course arise that state A regards an asset as situate in state A for CGT purposes and state B regards the same asset as situate in state B; however that is not likely to cause problems in practice, because (in short): (1) a non-resident does not usually pay CGT so double capital gains taxation does not usually arise; (2) a DTA following OECD Model convention will normally resolve the problem if it does arise.

CHAPTER ONE HUNDRED AND THREE

SITUS OF ASSETS FOR CGT

103.1 Asset situs for CGT: Introduction
103.2 "Shares" and "debentures"
103.2.1 No share capital

International organisation security	102.13

103.1 Asset situs for CGT: Introduction

This chapter deals with situs of assets for CGT. Strictly one should not refer to situs in the abstract, but to situs for a specific purpose (CGT, IHT, or whatever).[1] But the context may supply the reference, and in this chapter references to situs means situs for CGT purposes.

103.2 "Shares" and "debentures"

The CGT situs rules make specific provision for shares and debentures, so it is necessary to consider the meaning of these terms.

The meaning of debenture is particularly important, because there is an significant distinction for CGT situs between:

(1) Debts which are not debentures, whose situs is generally the residence of the creditor.[2]

(2) Debts which are debentures, whose situs is:
   (a) UK, if issued by UK incorporated company, or
   (b) if registered and issued by a non-UK incorporated company, the place of the register.

There are two statutory provisions which relate to the definitions but they are of limited scope. It is convenient to mention them first to clear them out of the way.

103.2.1 *No share capital*

Section 275(2)(a) TCGA provides:

> In subsection (1) above—
> (a) in paras (d), (da) and (e), the references to shares or debentures, in relation to a company that has no share capital, include any interests in the company possessed by members of the company ...

In UK company law, the only significant type of company with no share capital is a company limited by guarantee. There are also foreign entities which are classified as companies for tax purposes which have no share capital, but I cannot think of any to which s.275(2)(a) is likely to be significant.

So far as it concerns *shares* the rule makes sense. In particular, the

[1] See 102.1 (Concepts of situs).

[2] See 103.9 (Debt situs rule).

effect is that "shares" includes the interest of members of a guarantee company. In practice the situs of interests in guarantee companies will rarely if ever arise. A provision of this kind is quite common in tax.[3] The rule was enacted in other areas to prevent avoidance and perhaps the drafter put it in here without much thought as to whether it was actually needed.

The reference to *debentures* is otiose. A debenture is a right against the company, not an interest in the company. Whether a company has share capital is (in the absence of the definition) important in deciding whether an asset is a "share" but it is irrelevant in deciding whether an asset is a "debenture". In practice it does no harm.

103.2.2 *Securities of non-company*

Section 275(2)(b) TCGA provides:

> in paras (d) and (e), the references to debentures, in relation to a person other than a company, include securities.

This assumes that (in the absence of this definition) securities issued by a non-company would not be, or may not be, debentures. I think that is doubtful. The term "debenture" is normally used in the context of companies, but the concept is not restricted to companies.[4]

Section 275(1)(d) refers to debentures issued by a government authority.[5] Treasury gilts, though "securities", are not normally called "debentures" so perhaps the provision is useful to avoid doubt.

Similarly, other non-companies, such as trusts or individuals, can in theory issue "securities" and if such assets might not be regarded as "debentures" then this provision could be needed.

Even if unnecessary, this provision does no harm.

103.2.3 *Security/debenture distinction*

Before 2005 the legislation referred to "securities" where it now has the

[3] There are too many to list; see for instance s.135(4)(5) TCGA.

[4] See Gower and Davies, *Principles of Modern Company Law* (7th ed., 2003), p.806:

> "The word "debenture" is not restricted to securities of companies or bodies corporate. Clubs not infrequently issue debentures and the name may even be applied to bonds issued by an individual; eg to those issued by the Tichborne Claimant..."

This passage is not in the current edition but the point is sound.

[5] See 103.4 (Municipal/government security).

word “debentures.” HMRC explained the reason for the change:

> The scope of the existing rules in s 275 which apply in relation to securities will be extended so that they apply in relation to debentures - this means, for example, that ... all registered debentures (rather than just those which are securities) of a company which is not incorporated in the UK will be treated as being situated where they are registered ...[6]

HMRC were concerned that there might be a debenture which was not a security. One might have thought that a debenture must necessarily be a security.[7] Perhaps the point is that a “security” must be marketable and transferable; a debt which is not assignable, or which is repayable on demand, might not have been a security[8] for the purpose of the pre-2005 situs rules.[9]

The reform raises the question of whether a corporate debt could be a security but not a debenture; if there were such an asset the effect of the 2005 reform was to take it outside the scope of the statutory situs rules applicable to debentures, which was not intended! The better view is that any registered debt security is a debenture so this problem does not arise.

103.2.4 *“Debenture”*

In the absence of special context, the word “debenture” should be given its normal meaning. It is wide and vague:

> If we begin by asking what the word “debenture” means, apart from any definition, the reply must be that it has no precise meaning. Chitty J. observed[10] that the word “means a document which either creates a debt or acknowledges it, and any document which fulfills either of these conditions is a debenture.” ... Sir Nathaniel Lindley had previously stated simply, “What the correct meaning of ‘debenture’ is I do not know”.[11] In *Lemon v Austin Friars Investment Trust*[12], the same ignorance was professed in the Court of Appeal. Warrington LJ in

[6] BN 36, 16 March 2005.

[7] Contrast s.738 CA 2006: “In the Companies Acts “debenture” includes debenture stock, bonds and any other securities of a company...”

[8] See App.2.15.2 (Marketability).

[9] The concern that a debenture may not be a “security” (within the s.132 definition) is also found in s.251(6) TCGA: “... a debenture ... shall be deemed to be a security (as defined in section 132) ...”

[10] *Levy v Abercorris Slate and Slab Co* (1887) 37 Ch D 260.

[11] *British India Steam Navigation Co v IRC* (1881) 7 QBD 165.

[12] [1926] 1 Ch 1.

> particular, after observing that it had been said "by a wiser man than himself" that it was impossible to give an exhaustive definition of the word "debenture," went on to remark that he did not propose to incur the reproach of venturing where wise men fear to tread. The textbooks are agreed at least in this that no accurate definition of the word can be found.[13]

Company law draws a distinction between an ordinary debenture and debenture stock:

> Debenture stock is merely borrowed capital consolidated into one mass for the sake of convenience. Instead of each lender having a separate bond or mortgage, he has a certificate entitling him to a certain sum, being a portion of one large loan; and generally debenture stock differs from a debenture in form rather than in substance.[14]

No-one doubts that debenture stock is within the general meaning of "debentures".

In this chapter, I use the word "**securities**" to mean either shares or debentures.

103.3 Co-owned assets

Section 275C(1) TCGA provides:

> This section applies for determining for the purposes of this Act—
> (a) the situation of an interest (see subsection (4)) in an asset, or
> (b) whether the situation of an interest in an asset is in the UK.[15]

"Interest" is normally a wide term, but s.275C(4) defines it narrowly:

> In this section "interest", in relation to an asset, means an interest as a co-owner of the asset (whether the asset is owned jointly or in common and whether or not the interests of the co-owners are equal).

I refer to this as a "**co-ownership interest**". Section 275C applies to co-owned assets of all kinds but the most important cases are intermediated securities, and other co-owned securities, debts and cryptoassets.

Section 275C goes on to lay down the rules which govern situs of co-ownership interests:

[13] *Knightsbridge Estates Trust v Byrne* [1940] 1 AC 613 at p.621, approved *Fons HF v Corporal* [2015] 1 BCLC 320.

[14] *Re Herring* [1908] 2 Ch 493 at p.497.

[15] Paragraph (b) is otiose since the matter is fully covered by (a); but it does not matter.

> (2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.
> (3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

I refer to these as "**co-ownership situs rules**".

At first sight it is hard to see the point of these rules. If an asset is situate in a jurisdiction, a co-ownership interest would normally be situate in the same place and a statutory provision to that effect seems unnecessary. But s.275C does have a role to play, because:

(1) In the case of intermediated securities, the common-law situs of the co-ownership of the holders *is* different from the situs of the underlying securities.[16]

(2) Section 275 stipulates the situs of shares, debentures, debts, etc and it might be argued that a person who owns a co-ownership interest in a share, debenture, debt, etc does not own a share, debenture, debt, etc; so it might be argued that these statutory situs rules do not apply to co-ownership interests.[17]

Section 275C is also important where situs depends on the residence of the owner and the asset is co-owned. For instance, if a debt or a ship or a cryptoasset is jointly owned by two persons, one UK resident and one non-resident, the interest of the UK resident is regarded as UK situate and the interest of the non-resident is regarded as non-UK situate.

The CG Manual provides:

> **CG12470 interests of co-owners** [Nov 2023]
> ...Assets held by a partnership, in which the partners therefore each have an interest, are within the scope of this provision.

103.4 Municipal/government security

Section 275(1)(d) TCGA provides:

> shares or debentures[18] issued by any municipal or governmental

[16] See 71.4 (Proprietary intermediated security: Situs for CGT).

[17] Of course the context may show that a reference to a share includes a fractional share; for a discussion from another context, see Tax Policy Associates, "Fractional shares and ISAs – HMRC are probably wrong" *https://www.taxpolicy.org.uk/*

[18] For the meaning of "debentures" see 103.2.2 (Securities of non-company).

> authority, or by any body created by such an authority, are situated in the country of that authority.

The CG Manual provides:

> **CG12440 Location of assets: Shares and securities** [Nov 2023]
> [The Manual sets out s.275(1)(c) and continues:] This applies to shares and securities issued by such bodies whether they are in registered form or in bearer form. ...

103.5 Securities of UK company

Section 275(1)(da) TCGA provides:

> Subject to para (d) above, shares in or debentures of a company incorporated in any part of the UK are situated in the UK.

This rule prevents planning under which remittance basis taxpayers used to turn UK situate assets (securities in UK incorporated companies) into non-UK situate assets, by converting them to bearer securities or by foreign share registers.[19] There is still scope for planning if action is taken at the time the company is set up (rather than at the time of disposal). See too 58.7 (Redomiciled (ex- UK) securities)[20]

103.6 Registered security: Non-UK co

Section 275(1)(e) TCGA provides:

> subject to paras (d) and (da) above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.

This applies to shares/debentures of foreign incorporated companies but not UK incorporated companies. It (more or less) restates the common law rule.[21]

The CG Manual provides:

> **CG12440 Types of asset (2): Shares and securities etc** [Nov 2023]
> *Shares and securities*
> ...Registered shares and securities[22] other than those dealt with in the

[19] The spur to the 2005 reform was probably *Chandrasekaran v Deloitte & Touche* [2004] EWHC 1378 which discussed and raised awareness of this planning.

[20] See 103.24.4 (UK resident, non-UK situs).

[21] See 102.5 (Situs of registered shares).

[22] Following the 2005 reforms, the reference to securities should strictly read “debentures” as that is now the statutory term. But it makes no difference.

> previous two paragraphs are situated where they are registered. This will normally be in the country where the company was incorporated. If they are registered on more than one register then they are located where the principal register is located, Section 275(1)(e) TCGA 1992. Which register is the principal register is a question of fact.

103.7 Bearer shares

Bearer shares of non-UK incorporated companies are governed by the common law rule.[23] They are situate where the document is situate.

103.8 Bearer debenture: Non-UK co

What is the position for bearer debentures? Unless one of the statutory situs rules applies, the common law rule will apply and the debenture will be situate where the document is situate.

Debentures are normally registered or bearer. If not registered or bearer, they are at least negotiable and treated in the same way as bearer debentures. If neither bearer nor negotiable, the debt is not likely to be a debenture.

Two statutory rules need consideration: the debt situs rule and the UK-law rule.

103.8.1 *Does debt situs rule apply*

Section 275(1)(c) TCGA (the debt situs rule) provides:

> subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.[24]

Debenture stock is not a debt[25] so the debt situs rule does not apply to debenture stock.[26]

[23] See 102.9 (Bearer and negotiable instruments).

[24] See 103.9 (Debt situs rule).

[25] For the meaning of "debenture stock" see 103.2.4 ("Debenture"). A person who holds debenture stock is not a creditor: *Re Dunderland Iron Ore* [1909] 1 Ch 446. So the asset is not a "debt".

[26] Against this, it might be argued that the co-ownership situs rule applies so the situs of the debenture stock is the situs of the underlying debenture. But it is considered that (1) the co-ownership situs rule does not apply in this case and (2) even if it does, the situs of the underlying debenture is not governed by the debt situs rule as the underlying debenture is not a debt for the purposes of that rule.

An ordinary debenture (not debenture stock) is a debt in the normal sense of the word. At first sight it seems that the debt situs rule applies, so a bearer debenture is situate where the creditor is resident. If that were right the situs of the document of a bearer debenture would never determine situs. However it is considered that the context of s.275, the reference to a debt in the debt situs rule means a simple debt and not a debenture. The debt situs rule does not apply to any debentures.

HMRC agree. The CG Manual provides:

> **CG12440 Types of asset (2): Shares and securities etc** [Nov 2023]
> *Shares and securities*
> ... The location of bearer securities issued by any body other than
> - a municipal or governmental authority or
> - any body created by such an authority, or
> - a company incorporated in the UK
>
> is not covered by a specific capital gains rule. Therefore it has to be decided in accordance with general law, see CG12420-CG12421. General law provides that such securities are located where the certificate is located. As for chattels, the location can change if the certificate is moved in or out of the UK.

103.8.2 *Does UK-law rule apply*

A debenture is an intangible asset and if it is "subject to UK law" (as widely defined) then in principle it appears that the UK-law rule applies, and the debenture will be UK situate.[27]

The CG Manual does not refer to the UK-law rule. One might argue that the reference to an intangible asset in s.275A means intangible assets other than debentures, in which case a debenture of a foreign incorporated company is not UK situate even if it is subject to UK law. This appears to be the HMRC view since the Manual passage above says that the location of bearer securities "is not covered by a specific capital gains rule".

103.8.3 *Planning*

Remittance basis taxpayers will generally avoid investing in debentures which are UK situate for CGT purposes. Non-UK incorporated companies who issue debentures and want their investors to include remittance basis taxpayers will in principle wish to ensure that their

[27] See 103.13.4 (UK-law rule).

debentures should not be UK situate for CGT purposes.

To achieve this:

(1) The debenture could be registered and the register kept outside the UK; in that case the position is clear.

(2) The debenture could be a bearer instrument and
   (a) kept outside the UK and
   (b) not "subject to UK law" (as defined) though that may not be necessary.

103.8.4 *Security situs: Critique*

The combination of statutory and common law rules for securities of non-UK incorporated companies is intricate and sometimes impractical. It has never been thought through. It is suggested that *all* corporate securities should be situate in the place of incorporation of the company. That would be logical, and a simplification, with no loss of tax.

103.9 Debt situs rule

A debt is in some cases a chargeable asset for CGT, so its situs may be relevant for CGT. Section 275(1)(c) TCGA provides:

> subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.

I refer to this as "**the debt situs rule**". This is different from the common law rule because:

(1) Under the common law rule, a simple debt is situate where the *debtor* is resident.

(2) Under the common law rule, the test of residence is jurisdiction-residence; under the CGT rule, the test of residence is tax-residence (as residence in a tax statute means tax-residence). Thus a debt is UK situate under the CGT rule if the creditor is dual-resident.

It is suggested that "debt" has the same meaning as in the CGT debt exemption.[28]

This provision overrides the UK-law rule and common law rules such as the specialty rule and the bearer security rule. However, it is subject to the rules relating to:

[28] See 56.22 (CGT treatment of debts).

Topic	**See para**
Debentures	98.5; 98.6; 98.8
Judgment debts	98.10
Bank accounts	98.12

103.10 Judgment debt

Section 275(1)(k) TCGA provides:

> a judgment debt is situated where the judgment is recorded.

The CG Manual explains:

> **CG12430 Land, tangible property and debts** [Nov 2023]
> Judgment debts, that is, debts created by the judgments, decrees, etc, of courts of record, are located where the judgment is recorded, Section 275(1)(k) TCGA 1992.

Obtaining judgment may have the effect of changing situs.

103.11 Debt rules: Critique

The effect of the debt situs rule is generally[29] to disapply the CGT remittance basis for debts, because a debt owned by a remittance basis taxpayer is deemed UK situate so the gain from the debt is taxed on an arising basis. That is anomalous, counter-intuitive and a trap for the ill advised foreign domiciliary. I can see no good reason for the rule and it is suggested that s.275(1)(c) should be replaced by a statutory rule that a debt is situate where the debtor is resident (applying the UK tax definition of residence). This would bring CGT and IHT into line.

It is considered that there is no point in a separate rule for judgment debts, and s.275(1)(k) should be repealed. That would be a small but worthwhile simplification. The statutory rule is based on the common law rule, but that is no reason to retain it.

But the best solution is to look at the wider picture altogether: treat all assets other than UK land and securities as non-UK situate for the purposes of IHT and CGT.[30] The debt situs rule and judgement debt rule would fall by the wayside.

103.12 Bank account

A foreign currency bank account is not normally a chargeable asset for

[29] An exception is if the individual disposes of the debt while temporarily non-resident.
[30] See 102.37 (Reform of IHT/CGT situs rules).

CGT[31] so the question of situs does not normally arise.

If it mattered, s.275(1)(l) TCGA provides:

> a debt which—
> (i) is owed by a bank, and
> (ii) is not in sterling, and
> (iii) is represented by a sum standing to the credit of an account in the bank of an individual who is not domiciled[32] in the UK,
>
> is situated in the UK if and only if
> [a] that individual is resident in the UK and
> [b] the branch or other place of business of the bank at which the account is maintained is itself situated in the UK.

In short, for UK resident foreign domiciled individuals, the situs of a foreign currency account is the situs of the branch. This restates the common law rule for bank accounts; it is needed because without this provision the situs of the account would be the residence of the creditor (ie the account holder). In cases where the conditions (i), (ii) and (iii) are not all satisfied, the usual CGT debt rule applies.

Section 275(1)(l) only applies to individuals' bank accounts. However the situs of a bank account held by a trust or a company does usually matter for CGT.[33]

103.13 UK-law rule

Section 275A TCGA provides a situs rule for intangible assets which I call "**the UK-law rule**". It is convenient to deal with some definitions before turning to the rule itself.

103.13.1 *"Intangible asset"*

Section 275A(2) TCGA provides a commonsense definition of "intangible

[31] See 95.10 (Foreign currency bank account: CGT).

[32] Section 275(3A) TCGA provides: "Section 835BA (deemed domicile) applies for the purposes of subsection (1)(l)(iii)." This is the standard wording to apply the deemed domicile rules.

[33] If it did matter, the usual CGT debt rule would apply so all accounts held by a non-resident trust or non-resident company would be non-UK situate, as situs would depend on residence of the account holder. This means that UK services relating to the account qualify for foreign services relief under s.809W ITA. That could be important for a bank account held by a non-resident close company, which is a relevant person, but in practice the point will rarely if ever arise as such a company would not normally use a UK account.

asset":

> In this section "intangible asset" means—
> (a) intangible or incorporeal property and includes a thing in action[34], or
> (b) anything that under the law of a country or territory outside the UK corresponds or is similar to intangible or incorporeal property or a thing in action.

This includes policies and bonds, futures and options.

103.13.2 *Situs otherwise undetermined*

Section 275B(1) TCGA provides a commonsense explanation of "not otherwise determined":

> For the purposes of section 275A, the situation of an asset is not otherwise determined if, apart from that section, this Act does not make any provision for determining—
> (a) the situation of the asset, or
> (b) whether the situation of the asset is in the UK.

Thus the statutory situs rules in s.275 TCGA have priority to the UK-law rule. For instance, a debt held by a foreign creditor is not UK situate even if subject to UK law; an option to purchase a non-UK situate chattel is not UK situate, even if governed by UK law.[35]

103.13.3 *"Subject to UK law"*

The expression "subject to UK law" is widely defined in s.275B(2):

> For the purposes of section 275A, an intangible asset is subject to UK law at a particular time if any right or interest which comprises or forms part of the asset is, at that time,—
> (a) governed by, or otherwise subject to, or
> (b) enforceable under,
> the law of any part of the UK.

[34] A note on terminology. This is commonly called a chose in action. It is desirable to avoid Law French, where there is an alternative English term which is more easily understood; but "thing in action" is as opaque as "chose in action", if not more. But the Law Commission preferred "thing in action" in the consultation paper on digital assets (2022). For now, I prefer to use the traditional term, but it is possible that "thing in action" may become the standard term in the future.

[35] See 103.17 (Chattels).

Whether or not an asset is subject to UK law depends on the documentation. That will vary from case to case, but I understand that the position for some standard financial contracts is as follows.[36]

LIFFE FTSE 100 index future contracts are subject to UK (English) law.[37]

Eurex contracts and CME contracts are not subject to UK law. They are governed by German law[38] and US law.[39]

103.13.4 *UK-law rule*

Section 275A(1)(3) TCGA need to be read together to follow the sense:

> (1) This section applies for the purpose of determining whether the situation of an intangible asset ("asset A") is in the UK if the situation of asset A is not otherwise determined (see section 275B(1))...
> (3) If asset A is subject to UK law (see section 275B(2)) at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

103.13.5 *UK-law rule: Critique*

The UK-law rule was introduced (in accordance with the practice before the Tax Consultation Framework) without consultation or debate. It should be repealed as:

(1) It is impractical for remittance basis taxpayers who want to know how to invest or what to declare in their returns. Only the wealthiest taxpayers with a significant budget for UK tax advice can be expected to research what law governs the assets concerned.

(2) It is contrary to UK legal commercial interests, discouraging the use of UK law and UK jurisdictions (at least to the extent that those who draft contracts are aware of the rule.)

(3) It brings in no tax.

But the best solution is to look at the wider picture altogether: treat all

[36] I am grateful to Lindsay Pentelow of Mazars LLP for his research in this area.

[39] CME Chapter 9, Rule 905 (Choice of Law)
https://www.cmegroup.com/content/dam/cmegroup/rulebook/CME/I/9/9.pdf

assets other than UK land and securities as non-UK situate for IHT and CGT.[40] The UK-law rule would fall by the wayside.

103.14 Futures/options

Section 275A contains situs rules for futures and options which I call "**future/option rules**".

In the absence of these provisions, remittance basis taxpayers could invest in a foreign law future/option which tracks the value of UK situate intangible assets (because the underlying assets are UK situate). I surmise that these rules are intended to prevent that.

The drafting makes some formal gestures to the conventions of plain English legal drafting, but its structure is remarkably convoluted. If the Parliamentary Counsel Office held a competition for the most obscure drafting, within a plain legal English format, this should make the shortlist.

It is convenient to deal with some definitions before turning to the rule itself. The definitions are derived from the corporation tax derivatives code now in Part 7 CTA 2009. The definitions of expressions used in the UK-law rule are also relevant here.

103.14.1 *"Future"*

Section 275B(3) TCGA provides:

> In section 275A—
> "future" has the meaning given by section 581 of CTA 2009,

So we turn to s.581 CTA 2009 which defines a "future":

> (1) In this Part "future" means a contract for the sale of property under which delivery is to be made—
> (a) at a future date agreed when the contract is made, and
> (b) at a price so agreed,
> but this is subject to subsection (3).
> (2) For the purposes of subsection (1)(b), a price is agreed when the contract is made even if—
> (a) the price is left to be determined by reference to the price at which a contract is to be entered into on a market or exchange or could be entered into at a time and place specified in the contract, or

[40] See 102.37 (Reform of IHT/CGT situs rules).

(b) in a case where the contract is expressed to be by reference to a standard lot and quality, provision is made for a variation in the price to take account of any variation in quantity or quality on delivery.

103.14.2 *"Option"*

Section 275B(3) TCGA provides:

> In section 275A ...
> "option" has the meaning given by section 580 of [CTA 2009].

So we turn to s.580(1) CTA 2009 for a partial definition of option:

> In this Part "option" includes a warrant.

Section 710 CTA 2009 defines "warrant":

> In this Part [Part 7]
> "warrant" means an instrument which entitles the holder to subscribe for—
> (a) shares in a company, or
> (b) assets representing a loan relationship of a company,
> whether or not the shares or assets exist or are identifiable.

103.14.3 *Cash-settled future/option*

Sections 580/581 CTA 2009 exclude most cash-settled options and futures. They are conveniently read side by side:

s.580 CTA 2009 (Options)	**s.581 CTA 2009 (Futures)**
(2) References in this Part to an option do not include a contract whose terms—	(3) References in this Part to a future do not include a contract whose terms—
(a) provide— (i) that, after setting off their obligations to each other under the contract, a cash payment is to be made by one party to the other in respect of the excess, if any, or (ii) that each party is liable to make to the other party a cash payment in respect of all that party's obligations to the other under the contract, and	[identical]

(b) do not provide for the delivery of any property.	[identical]
(3) Subsection (2) does not prevent an option whose underlying subject matter is currency from being an option.	(4) Subsection (3) does not prevent a future whose underlying subject matter is currency from being a future.

So cash-settled futures and options do not count, except for currency futures. The exception does not matter as currency futures/options are outside the scope of the future/option rules.

103.14.4 *"Underlying subject matter"*

Section 275B(4) TCGA provides a commonsense definition:

> For the purposes of section 275A—
> (a) the underlying subject matter of a future is the property which, if the future were to run to delivery, would fall to be delivered at the date and price agreed when the contract is made, and
> (b) the underlying subject matter of an option is the property which would fall to be delivered if the option were exercised.

In the case of options, the language of s.275B(4)(b) seems to assume that the option is a call option and that the underlying subject matter is therefore what is received. However, options can also be structured as put options. It is unclear, with a put option, whether the underlying subject matter is what is put, or what is received in return. In a simple case where the price for delivery is currency, one assumes that the underlying subject matter is what is put. The position is more complex where the option is between two currencies (say sterling and dollars). In such a case it would be possible either to call for dollars (paying sterling) or to put sterling (being paid in dollars). However, this may not make a difference given the discussion below regarding options over currency. Presumably a situation where one tried to mis-characterise a call option as a put option - for instance purporting to put sterling in return for securities - would be looked through to the underlying reality and treated as a call option over the securities.[41]

[41] I am grateful to John Barnett for this observation.

103.14.5 *Futures/options rules*

Armed with these definitions, we can turn to the future/option rules.

Section 275A(4) TCGA provides:

> Subsections (5) to (9) below have effect if asset A [the intangible asset]—
> (a) is a future or option (see section 275B(3)), and
> (b) is not subject to UK law at the time it is created.

The point of (b) is that a future/option which is subject to UK law is UK situate under the UK-law rule and the future/option rules are not needed. We are therefore only concerned with a foreign law future/option.

One needs to read s.275A(5)(6) together to follow the sense, and it easier to read them in reverse order. Section 275A(6) TCGA provides:

> That rule is that where, in the case of any intangible asset,—
> (a) the asset is a future or option,[42]
> (b) the underlying subject matter (see section 275B(4)) of the asset consists of or includes an asset which is an intangible asset,
> and
> (c) either—
> (i)[A] that intangible asset [the underlying subject matter] is subject to UK law at the time it is created and,
> [B] on the assumption that there were no rights or interests in or over that asset,[43] the situation of that asset [the underlying subject matter] would not be otherwise determined, or
> (ii) that intangible asset is treated by this subsection as being so subject [ie subject to UK law] at that time,
> the intangible asset mentioned in para (a) above [i.e. the future/ option] is to be treated for the purposes of subsection (5) above and this subsection as being so subject [ie subject to UK law] at the time it is created.

This triggers s.275A(5) TCGA:

> If, as a result of the application of the rule in subsection (6) below in relation to asset A or any other asset or assets, asset A falls to be treated as being subject to UK law at the time it is created, it shall be taken for

[42] Para (a) is otiose, since it repeats s.275A(4)(a); but it does not matter.

[43] The words "on the assumption that there were no rights or interests in or over that asset" are difficult to understand, as situs of an asset does not depend of whether there are rights or interests in the asset. I think the words are otiose.

> the purposes of this Act to be situated in the UK at all times.

In short, a foreign law future/option over a UK law underlying intangible asset is UK situate.

EN FB 2005 explains the point of s.275A(6)(c)(ii):

> These rules apply recursively. In any case where there is a "nested sequence" of futures or options in which the underlying subject matter of each contract in the sequence consists of or includes the next contract in the sequence, subsection (5) has effect to provide that the first contract is taken for TCGA purposes to be situated in the UK at all times if the [relevant] requirements ... are met in relation to any of the contracts in the sequence.

Suppose:

(1) Option 1 is a foreign-law option over UK intangible property.
(2) Option 2 is a foreign-law option over option 1.

Option 1 is UK situate under s.275A(6)(c)(i) and option 2 is UK situate under s.275A(6)(c)(ii).

Section 275A(6) leaves one gap: it does not apply where the situs of the underlying subject matter is "otherwise determined".[44]

Suppose, for instance, a foreign-law option over shares in a UK incorporated company. That is not caught by s.275A(5)(6). The gap is filled by the second of the three future/option rules, which is in s.275A(7)(8). These subsections follow much of the format of s.275A(5)(6) and I need not repeat the drafting points that they have in common.

One needs to read (7) and (8) together to follow the sense and it easier to read them in reverse order. Section 275A(8) TCGA provides:

> That rule is that where, in the case of any intangible asset,—
> (a) the asset is a future or option, and
> (b) the underlying subject matter of the asset consists of or includes an asset—
> (i) which is, by virtue of
> [A] subsection (9) below or of

[44] At first sight there is a second gap: s.275A does not apply where the underlying subject matter of the future/option is a tangible asset. But that is not a gap, as in such a case the future/option is an interest in that asset, and situs is determined by s.275(1)(b) TCGA.

> [B] any provision of this Act apart from this section, situated in the UK at any time, or
>
> (ii) which is treated by this subsection as being so situated [ie UK situate] at any time,
>
> the intangible asset mentioned in para (a) above [the future/option] is to be treated for the purposes of subsection (7) above and this subsection as being so situated [ie UK situate] at that time.

This triggers s.275A(7) TCGA:

> If—
>
> (a) asset A [the future/option] is not taken to be situated in the UK by virtue of subsection (5) above, and
>
> (b) as a result of the application of the rule in subsection (8) below in relation to asset A or any other asset or assets, asset A falls to be treated as being situated in the UK at any time,
>
> it shall be taken for the purposes of this Act to be situated in the UK at that time.

Suppose:

(1) Option 1 is a foreign-law option over a UK security.

(2) Option 2 is a foreign-law option over option 1.

Option 1 is UK situate under s.275A(8)(b)(i) and option 2 is UK situate under s.275A(8)(b)(ii).

The rules in s.275A(5)(6) and (7)(8) only apply where there is an identifiable underlying asset in existence. A future/option over an asset class (such as gold) rather than any specific asset is not caught. If the underlying asset is currency, say, rather than a specific asset the future/option rules do not apply. Hence it does not matter that cash-settled currency future/option are within the definition of future/option, as they are not within the scope of the future/option rules.

103.14.6 *Unissued securities*

Section 275A(9) TCGA deals with the case where the underlying subject matter is unissued shares or debentures:

> Where—
>
> (a) the underlying subject matter of a future or option consists of or includes shares or debentures issued by a company incorporated in any part of the UK, but
>
> (b) at the time the future or option is created, those shares or debentures have not been issued,

> the underlying subject matter of the future or option, so far as consisting of or including those shares or debentures, is to be taken, for the purposes of subsection (8) above, to consist of or include an asset which is situated in the UK at all times.

103.15 Insurance policy

The situs of policies rarely matters for CGT, because of the relief for policies. UK policies will be UK situate under the UK-law rule and for others the common law rule will apply.[45]

103.16 Land

Section 275(1)(a) TCGA provides:

> the situation of rights or interests (otherwise than by way of security) in or over immovable property is that of the immovable property.

The CG Manual provides:

> **CG12430 Land, tangible property and debts** [Nov 2023]
> *Land and buildings (Section 275(1)(a) TCGA 1992)*
> Land and buildings are located in the country where they are found. This applies to all rights and interests in the land and buildings. It will therefore apply to leases of land, tenancies etc.

103.17 Chattels

Section 275(1)(b) TCGA provides:

> subject to the following provisions of this subsection,[46] the situation of rights or interests (otherwise than by way of security) in or over tangible movable property is that of the tangible movable property.

Thus an option to purchase a UK situate chattel (even if governed by a foreign law) is a UK situate asset. The CG Manual provides:

> **CG12430 Land, tangible property and debts** [Nov 2023]
> *Chattels (Section 275(1)(b) TCGA 1992)*
> Items of tangible moveable property (chattels) are located where they are found at any point in time. This applies to all rights and interests over such assets also. Therefore a lease of a chattel can change from being located in the UK to being located elsewhere if the chattel is

[45] A policy is not a debt for the purposes of the CGT debt situs rule.
[46] This is referring to the special rules for ships and aircraft.

removed from the UK to another country.

For chattels temporarily exported, see 102.27 (Chattels).

103.18 Ships and aircraft

Section 275(1)(f) TCGA provides:

> a ship or aircraft is situated in the UK if and only if the owner is then resident in the UK, and an interest or right in or over a ship or aircraft is situated in the UK if and only if the person entitled to the interest or right is resident in the UK.

The CG Manual provides:

> **CG12430 Land, tangible property and debts** [Nov 2023]
> *Ships and aircraft (Section 275(1)(f) TCGA 1992*)
> Contrary to the general rules of international law,[47] for capital gains purposes the location of a ship or aircraft does not depend on its country of registration. Instead the ship or aircraft is located in the UK if and only if the owner is resident in the UK. Similarly any interest or right in or over the ship or aircraft is located in the UK if and only if the owner of the interest or right is resident in the UK.

This generally[48] disapplies the CGT remittance basis since a ship/aircraft owned by a remittance basis taxpayer is deemed UK situate and the gain taxed on an arising basis. If the individual holds the ship/aircraft through a non-resident company the asset is treated as not UK situate which has two remittance basis advantages:

(1) The s.3 remittance basis is available on a disposal by the company.
(2) Relief is available under s.809W ITA for services relating to the asset.

103.19 Goodwill

Section 275(1)(g) TCGA provides:

> the situation of good-will as a trade, business or professional asset is at the place where the trade, business or profession is carried on.

[47] The Manual reflects Dicey's view (that under private international law ships and aircraft are situate where registered) but this is contentious: see 102.28 (Ships and aircraft).

[48] An exception is if the individual disposes of the asset while temporarily non-resident.

The CG Manual provides:

> **CG12450 Intangible assets - goodwill, patents, trademarks etc** [Nov 2023]
> *Goodwill (Section 275(1)(g) TCGA 1992)*
> Goodwill which is an asset of a trade, profession or vocation is located where the trade, profession or vocation is carried on. If the trade etc is carried on in more than one country part of the goodwill appropriate to the part of the trade etc carried on in any one country should be treated as located in that country.

103.20 Intellectual property

Section 275(1)(h) TCGA provides:

> [a] patents, trade marks, registered designs and corresponding rights[49] are situated where they are registered, and if registered in more than one register, where each register is situated, and
> [b] licences or other rights in respect of any such rights are situated in the UK if they or any right derived from them are exercisable in the UK

A different solution must be found for copyright and similar rights which do not need registration. Section 275(1)(j) TCGA provides:

> copyright, design right, franchises, and corresponding rights,[50] and licences or other rights in respect of any such rights, are situated in the UK if they or any right derived from them are exercisable in the UK.

This will not often concern remittance basis taxpayers. It could be important for non-residents carrying on a trade in the UK through a permanent establishment, who are (in short) subject to CGT/CT on UK situate trade assets.

It seems at first sight that intellectual property is (uniquely) capable of being situate for CGT purposes in more than one jurisdiction. But intellectual property exercisable in a number of jurisdictions should be regarded as a number of separate assets, one situate in each jurisdiction.[51]

[49] "Corresponding rights" has a commonsense definition in s.275(3) TCGA:

> In subsection (1) above, in each of paras (h) and (j), "corresponding rights" means any rights under the law of a country or territory outside the UK that correspond or are similar to those within that paragraph.

[50] See above footnote.

[51] See 102.30 (Intellectual property).

103.21 Bare trust or nomineeship

The interest of a beneficial owner in property held by a nominee or bare trustee is situate where the underlying asset is situate: the CGT bare trust disregard[52] reinforces the common law rule on this point.

Also see 69.10.2 (Situs of unit for CGT).

103.22 Substantive trust interest

The situs of an equitable interest under a substantive trust only rarely matters for CGT because of the exemption for equitable interests. However it may matter, eg in the case of a purchased interest or an interest under a non-resident trust.

If the trust is "subject to UK law" (as defined) the interest will be situate in the UK. This clearly includes the case of a trust with a UK governing law; it may arguably apply to any trust with UK trustees. In other cases the common law rules will apply.

103.23 Estate of deceased person

If the estate is subject to UK law, it is UK situate for CGT. Other estates are governed by the common law rule.[53]

103.24 Planning: Changing situs

103.24.1 *Moveable assets in UK*

Moveable assets could in principle be moved offshore prior to a disposal. Consider whether an export licence is needed.

103.24.2 *Unincorporated UK business*

A business could sometimes be transferred to a foreign incorporated company under s.162 TCGA and shares later sold.[54] Watch stamp duty. If the company were subsequently to become non-resident, eg on emigration of shareholder/directors, no tax would arise except on growth in value since transfer to the company.

103.24.3 *Debts*

There are two ways to deal with a UK situate debt on a security. It may

[52] See 87.7 (Bare trust/nomineeship).

[53] See 102.34 (Estate of deceased person).

[54] For an unsuccessful example of similar planning using hold-over relief, see 104.8 (Ultra-wide control: Critique).

be possible to make the asset non-UK situate. It might be possible to make the asset a simple debt (not a debt on a security) so it falls within the relief given by s.251 TCGA. It is important to do this by varying the existing debt, and not by ending the existing debt and creating a new one.[55]

103.24.4 *UK resident, non-UK situs*

It is not ideal for a foreign domiciled individual to hold a UK incorporated company directly, as a disposal of that asset would give rise to CGT. If the foreign domiciliary does not want to go to the trouble and expense of using an offshore trust, what is the alternative? One possibility is to use a foreign incorporated UK resident company. The shares in the company will not be UK situate for CGT.[56]

[55] But see App.2.15.8 (Date to test security).

[56] See 103.6 (Registered security: Non-UK co).

104.34.1 "Shares"
104.34.2 "Held by public"
104.34.3 Not "held by public"

104.1 Introduction

This chapter considers the terms "control", "connected person", "close company", and related terms such as "associate" and "participator".

Control is the most fundamental, as this term is used in the definitions of connected person and close company.

The layout of this chapter is as follows:

Topic	**See para**
Control	104.2
Associate	104.6
Connected person	104.12
Control/connected person: Examples	104.20

Participator	104.22
Close company	104.26

These terms are also used in non-tax law, with similar definitions, and discussion from there may be relevant for tax. See for instance Pollard, *Connected & Associated: Insolvency & Pensions Law* (1st ed, 2022).

104.2 Control

104.2.1 *Why control matters*

Control of a company is a concept used throughout tax legislation, and it is not practical to write a full list.

The concept is important in particular for the definition of connected person: a person is connected with a company they control. The concepts of control and connected overlap.

104.2.2 *Definitions of "control"*

There are two main definitions of control in tax legislation, as well as many other definitions. The legislation does not have terminology to describe them, so I coin the following:

Type of control	**Provision**	**See para**
Control in **ultra-wide** sense	s.450 CTA 2010	104.3
Control in **strict** sense	s.995 ITA; s.1124 CTA 2010	104.9
Other senses of control	*Meaning*	
Boardroom control	Power to make *directors* decisions	
Shareholder level control	Power to make *shareholders* decisions	
Control in **natural (undefined)** sense	Vague & context-sensitive	

The word control is used in accountancy, where it has another set of definitions again.[1] Those definitions do not apply for tax, so a person who has control in one of the tax senses may not be the person named in company accounts as the ultimate controlling party of the company.

Strictly, one should not use the word "control" without specifying which definition applies, but the context may make that clear.

It is not helpful, and perhaps not even meaningful, to refer to the "real" sense of control, for in the absence of context the word is vague: it has no precise fixed meaning. The strict sense of control is not exactly the

[1] FRS 102 (The Financial Reporting Standard applicable in the UK and Republic of Ireland) para 9.4; IFRS 10 (Consolidated Financial Statements) para 5.

natural (undefined) sense. The ultra-wide sense of control is very distant from the natural (undefined) sense.

Statute formerly used the expression "controlling interest" (undefined). This generated a large case law.[2] But it seems to me that those cases shed little light on the current statutory concepts of strict-sense/ultra-wide control, which are both elaborately defined. The drafter learnt the lesson that "control" is too vague a concept to use without some explanation. Careful thought is needed before using cases discussing "controlling interest" to shed light on the meaning of strict-sense or ultra-wide control.

Where there is control in the strict sense, there is usually control in the ultra-wide sense. Where appropriate, I refer to that as control **"in every sense"**.

104.2.3 *Default meaning of control*

s.989 ITA	**s.1316(2) CTA 2009 & s.1176(2) CTA 2010**	**s.288(1) TCGA**
The following definitions apply for the purposes of the Income Tax Acts— "control", in relation to the control of a body corporate or a partnership, is to be read in accordance with section 995.[3]	Section 1124 (meaning of control in relation to a body corporate or partnership) applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).	In this Act, unless the context otherwise requires— "control" shall be construed in accordance with sections 450 and 451 of CTA 2010;

Thus:

(1) For IT and CT the strict sense is the default meaning. However, in practice the ultra-wide sense is more commonly applied.

(2) For CGT the ultra-wide sense is the default meaning.

[2] These cases are discussed in Venables, "Corporate Relationships" (2003) Corporate Tax Review Vol 4 p.1.

[3] For completeness: The point is sometimes repeated elsewhere:

s.719 ITEPA/s.1021(2) ITA	**s.878(6) ITTOA**
Section 995 (meaning of "control") applies for the purposes of this Act unless otherwise indicated.	Section 995 of ITA 2007 (meaning of "control") applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).

This is not strictly necessary, but either for historical reasons or in accordance with a Plain English penchant for signposts.

For IHT, s.269 IHTA provides yet another definition of control. Such is the patchwork nature of UK taxation. The IHT definition is not discussed here as it does not arise in the IHT issues closest to the themes of this book.

104.3 Control: Ultra-wide sense

104.3.1 *Five heads of control*

This section considers the concept of control in the ultra-wide sense. Section 450(1) CTA 2010 provides:

> This section applies for the purpose of this Part [Part 10 CTA 2010, close companies].

The definition is also applied by reference in many other contexts.

> (2) A person ("P") is treated as having control of a company ("C") if P—
> (a) exercises,
> (b) is able to exercise, or
> (c) is entitled to acquire,
> direct or indirect control over C's affairs.
> (3) In particular, P is treated as having control of C if P possesses or is entitled to acquire—
> (a) the greater part of the share capital or issued share capital of C,
> (b) the greater part of the voting power in C,
> (c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators, entitle P to receive the greater part of the amount so distributed, or
> (d) such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive the greater part of the assets of C which would then be available for distribution among the participators.

Thus there are five heads of control in the ultra-wide sense:

Type of control	**CTA 2010**	**My term**
Control of company affairs	s.450(2)	General control
Majority of share capital	s.450(3)(a)	Para (a) control (shares)
Majority of voting power	s.450(3)(b)	Para (b) control (votes)
Majority of company income	s.450(3)(c)	Para (c) control (income)
Majority of company assets	s.450(3)(d)	Para (d) control (assets)

These rules overlap, and there is usually more than one reason why a person "controls" a company, in the ultra-wide sense, particularly after allowing for the associate-attribution rule, discussed below; but that does not matter.

104.3.2 *What rights are possessed?*

In order to apply these rules it is necessary to ascertain what are the rights which a person possesses.

In *HMRC v UBS*, the company's articles provided (in short) that while UBS was shareholder, its shares carried (more or less) no rights. The purpose was to ensure that when UBS held the shares it did not have control. An argument that this should be ignored as a sham was curtly rejected:

> There was no finding that the participants did not intend article 2(15) to take effect according to its terms and so the argument that it was a sham was rightly rejected. Once this point is reached, I am at a loss to know on what basis article 2(15) can be airbrushed out of the scheme.[4]

Sham is however fact sensitive, and in other circumstances an article of that kind might perhaps be ignored as a sham.

HMRC discuss the position of a vendor between contract and completion:[5]

> In order for capital treatment to apply, s.1042 CTA 2010 imposes a condition that the seller must not, immediately after the purchase, be connected with the company making the purchase (or any other company which is a member of the same group). Section 1062 CTA 2010 sets out when a person is connected with a company for these purposes, in particular that:
>
> A person is connected with a company if the person directly or indirectly possesses, or is entitled to acquire, more than 30% of–
>
> (a) the issued ordinary share capital of the company,
>
> (b) the loan capital and the issued share capital of the company, or
>
> (c) the voting power in the company.

This wording is drawn from the definition of control, and the same points arise. The HMRC analysis is as follows:

[4] [2014] EWCA Civ 452 at [107].

[5] *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/c0957d52-b133-4b2c-9743-88ba49b443f8/220218%20HMRC%20note%20on%20PoS.pdf* The note states that HMRC manuals will be updated to make this point.

> HMRC's view is that the word "possesses" in s.1062(2) CTA 2010 refers to legal, as opposed to beneficial, ownership. When shares are subject to a sale under a multiple completion contract, the seller may (depending on the terms of the contract) lose beneficial ownership of all of the shares on the date of the contract. However, the legal ownership of the shares is retained until the sale of those particular shares has completed. This is the case even if those remaining shares are converted to so-called deferred shares with no voting or economic rights in the company on completion of the first tranche.
>
> Therefore, as long as the seller remains a legal owner of so many "non-completed" shares that exceeds the 30% limit, they will remain connected with the company by virtue of s1062(2)(a) – possession of ordinary share capital. In such circumstances, the seller would not qualify for capital treatment under s1033 CTA 2010.

It is in principle correct that between contract and completion:

(1) The seller is said not to have beneficial ownership (or better, full beneficial ownership) of the shares.

(2) Pending payment of the purchase price, the seller owes duties to the purchaser, and is sometimes described as a trustee.

However this is an unusual kind of trust, under which the seller retains substantial rights over the property being sold. It is therefore correct to say that the seller "possesses" share capital, votes, and entitlements on a winding up, and so may have control; though to describe the seller as having mere "legal ownership" seems to me slightly misleading. But while one might refine the analysis, HMRC's conclusion is correct. The rather unsatisfactory body of case law on the meaning of beneficial ownership for the purposes of group relief[6] does not govern the meaning of the word possess, in this very different context.

While the position might be altered by the terms of the contract, in practice that would be unusual. If it is desired to avoid this outcome, the answer is to arrange that there is no gap between contract and completion. Indeed for share sale contracts (as opposed to sales of land) that is what is normally done, so this issue will not often arise.

104.3.3 *General control*

> *P is treated as having control of C if P—*
>
> *(a) exercises,*

[6] See App 6.2 (English-law beneficial ownership).

> *(b) is able to exercise, or*
> *(c) is entitled to acquire,*
> *direct or indirect control over C's affairs.*

I refer to this as **"general control under s.450(2)"**.

In the last line of this head, "control" is used in a natural (undefined) sense. So this head seems similar to strict-sense control (company affairs conducted in accordance with P's wishes).[7] But there are differences:

(1) Strict-sense control requires boardroom control, not control at shareholder level.
(2) Strict-sense control requires legal control conferred by a company's governing documents, not de facto control or control conferred in some other way.

Para (a) concerns someone who *actually* exercises control. That includes a case where P exercises *de facto* control but has no right of control.[8]

Para (b) concerns someone *able* to exercise control. It does not matter if they choose not to exercise control. It is suggested that although para (a) applies where P exercises mere *de facto* control, para (b) only applies if P has a right of control, ie *able* means legally entitled to. An attraction of this reading is that para (a) and (b) both have some role to play. For if para (a) required a right of control, then (b) would be otiose; if para (b) did not require a right of control, then para (a) would be otiose.[9]

However it may be rare for someone to actually exercise control without having a right to do so, and so fall within para (a) but not (b).

104.3.4 *Shareholder level control*

In *Steele v EVC International*:

> ... control of the affairs of the company in [s.450] means control at the level of general meetings of the company ... control at that level carries with it the power to make the ultimate decisions as to the business of the company and in that sense to control its affairs.[10]

[7] See 104.2.3 (Control: Strict sense).

[8] This was accepted as the position in *UBS v HMRC* where the issue was whether a company exercised *de facto* control despite having no legal power to do so.

[9] This view is also consistent with the meaning of "able to control" in ToA enjoyment condition E: see 49.17 (Enjoyment condition E: control).

[10] 69 TC 88 at p.127. See too 8.7 (Control: company law background).
I am not sure if it is necessary, even in a work which seeks to be comprehensive, to

The CT Manual provides:

> **CTM60220 Control: Over the company's affairs** [Nov 2020]
> ... As regards the level at which control is exercised, the judgment in *Steele v EVC International NV* 69 TC 88 confirms that what is required is control at the participator or general meeting level, not at administrative or board level.

SP 1/01 provides:

> 54. Where the establishment of a connected persons relationship depends on the question of whether a person falls to be regarded as having control of a company's affairs within the terms of [s.450 CTA 2010], it is not considered that a persons ability (whether de facto or de jure) to appoint the majority of the Board of directors will itself constitute control of the company's affairs unless, that is, the Board exercises powers which would normally be exercised by the shareholders at a general meeting.

Power to appoint directors confers boardroom control, but that is not the test of control in the ultra-wide sense. Appointment of directors is also one of the affairs of a company which is dealt with at shareholder level. But control of one isolated issue is not sufficient to constitute control of the company's *affairs* in general.

See too 8.7 (Control: company law background).

104.3.5 *Partial control*

The issue of partial control arises for:

(1) Ultra-wide sense of control first head (general control under s.450(2)): what is the position if a person has power of control over some of a company's affairs at shareholder level but not others?

(2) Strict-sense control: what is the position if a person has power of

refer to FTT decisions which overlook relevant case law. But for completeness; this was overlooked in the FTT decision of *Hunters Property v HMRC* [2018] UKFTT 96 (TC). In this case a group company was sole member of a company limited by guarantee ("the guarantee company"). The issue was whether the appellant "controlled" the guarantee company (in the ultra-wide sense). The FTT held that the appellant was had control under s.450(2)(b) (able to exercise control) as it could appoint and dismiss directors. The correct analysis was that the appellant had control under s.450(2)(b) because as the sole member of the guarantee company it had control at the level of company meetings. There is no difference between a guarantee company and a company with share capital. The test is control at shareholder/ company member level. But the end result would be the same.

> control over some of a company's affairs at boardroom level but not others?

Control (in its natural, undefined sense) is a matter of degree, and the law as so often has to resolve shades of gray into black/white, control/non-control.

The requirement is to have control over company "affairs" in general. Control over one matter alone is not control over affairs in general:

> ... ability to achieve an isolated result, the power to carry a particular resolution, is insufficient to establish control in the statutory sense; and that what is required is power to secure the continuing conduct of the company's affairs in accordance with the will of the person...[11]

The textbook TCCR agrees:

> the ability to control only some aspects of the company's affairs is insufficient.[12]

In *Keighley v HMRC*:[13]

> ... we do not agree .. that, as a general principle, if a single affair of the company is not conducted in accordance with the person's wishes, that person has no control. It would seem odd to us that if there was a provision in a shareholders agreement which obliged the majority shareholders to take into account the wishes of a minority shareholder if the company wants to buy more than 50 paperclips in one batch, then that would prevent those majority shareholders from controlling the company. To our mind when considering the affairs of the company, one needs to look more deeply into the affairs of the company.
>
> There must be a consideration in each particular case, which is bound to be fact dependent, as to whether the specific activities of the company in question are conducted in accordance with a person's wishes. And, without making any hard and fast rule (which we do not need to do in this case) the relevant affairs and activities of the company which need to be considered will vary on a case-by-case basis.

In that case, two shareholders had a majority of the shares, but a shareholders agreement with the third shareholder prevented them having

[11] *IRC v Lithgows* 39 TC 270 at p.278.

[12] *Taxation of Companies and Company Reconstructions*, Looseleaf, para D1.1.4 (General test of control).

[13] [2024] UKFTT 30 (TC) at [111] ff.

control over the affairs of the company:[14]

> It is our view that the provisions of clause 11 of the shareholders agreement, which contains a raft of restrictions on the otherwise unfettered right of the majority shareholders to control the company, mean that they do not control the company. The clause 11 actions require the consent of [the third shareholder]. These include changing the constitution the company or its name, issuing debt instruments, forming subsidiaries, merging or winding up the business, changing the nature of the business carried on by the company, making loans, permitting transactions with associated companies or shareholders, and other similar provisions.
>
> These matters are fundamental to the running of the company at both an operational and strategic level. They are clearly within the ambit of the affairs of the company. Since the majority shareholders do not have the power to secure that these are conducted in accordance with their wishes, it is our view that they do not have control of the company.

At the other extreme, all shareholders/directors are subject to some constraints on how they conduct the affairs of the company, at board/ shareholder level, for instance, restrictions on distributions; but that does not stop them having control over company affairs in general.[15]

It is suggested that the constraints on charitable companies are so far reaching that the members of a charitable company should not be regarded as having control of the company in the strict sense (though they do have control in the ultra-wide sense, because they possess voting power which confers para (b) control).[16] But this question will not often arise.

104.3.6 *De facto control*

If one accepts that de facto control is sufficient to amount to control in the

[14] [2024] UKFTT 30 (TC) at [115] ff.

[15] For completeness: An old case held that a 51% shareholder had a "controlling interest" (undefined); it was not relevant that a 75% majority was required to carry out some shareholder level decisions. See *British-American Tobacco v IRC* 29 TC 49 at p.67. But the relevance of cases on "controlling interest" to strict-sense and ultra-wide control is doubtful. This particular issue does not however arise, for those definitions, as:

(1) a 51% shareholder has strict-sense control (a 51% shareholder has power to appoint directors and so has boardroom control);

(2) a 51% shareholder has ultra-wide sense control (majority of voting power confers para (b) control).

[16] See 104.3.8 (Votes: para (b) control).

ultra-wide sense, it is necessary to identify what constitutes that control.

Mere influence does not constitute control: *de facto* control would only apply if the person with legal control surrenders independence and acts as a "rubber stamp".

In *HMRC v UBS* one issue was whether a company (DB) exercised *de facto* control over another (in which it was a minority shareholder), so that it had control in the ultra-wide sense:

> ... the scheme was pre-ordained and involved a co-ordinated course of action between the participants, with Investec and DB, two wholly independent companies, playing pre-ordained and co-ordinated roles, with each having its own commercial interests in bringing the scheme to fruition. It does not, however, begin to follow from this that DB was in relevant [ultra-wide sense] control of Investec. If
> [1] A Ltd proposes to B Ltd, an unconnected and independent company, a co-ordinated course of action with a view to achieving a commercial end to the benefit of both, and
> [2] B Ltd agrees to the proposal and co-operates in its implementation,
> it is beyond my comprehension why such a state of affairs should be thought to justify the inference that, in playing its own part in the operation, B Ltd is to be regarded as being 'controlled' in what it does by A Ltd. The proposition is wrong. B Ltd will, by inference, want to take part, and will do so. But there will ordinarily be no basis for an inference that the decisions it makes en route to the ultimate goal will be decisions it makes other than independently, and in its own interests, in achieving the proposed end.[17]

104.3.7 *Shares: Para (a) control*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (a) the greater part of the share capital or issued share capital of C.*

This is (relatively) straightforward.

104.3.8 *Votes: Para (b) control*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (b) the greater part of the voting power in C.*

Children's Investment Fund Foundation v AG considered whether a member of a charitable company was entitled to exercise voting power, for

[17] [2014] EWCA Civ 452 at [139].

the purpose of the Companies Act rule that a director is connected with a body corporate if:

> entitled to exercise ... more than 20% of the voting power.[18]

The member argued that she was not "entitled to exercise voting power", because of the extensive charity law restraints on use of that power.[19] This argument was summarily dismissed:

> The fact is that Ms Cooper is the only member of [the charity], which is a company limited by guarantee without a share capital. She is, therefore, entitled to exercise... 100% of the voting power in [the charity] ...[20]

It is suggested that the same applies for para (b) control: members of a charitable company possess voting power, and so "control" the company in the ultra-wide sense.

At first sight, para (b) control is otiose, since a person with the greater part of the voting power has general control under s.450(2) CTA 2010: they are able to exercise control over the company's affairs. But it might be argued that a 51% shareholder does not have general control, at shareholder level, as they are unable to pass a special resolution. In the case of a charity it might be argued that the members rights as a whole fall short of general control. So para (b) control (votes) is required to cover these cases.

104.3.9 *Income: Para (c) control*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators,[21] entitle P to receive the greater part of the amount so distributed.*

[18] s.254(2)(b) Companies Act 2006

[19] The member referred specifically to restraints due to:
(1) The Foundation's charitable objects
(2) Statutory rules such as s.201 Charities Act 2011
(3) Restricted uses to which charity funds could be put (a grant agreement required charity funds to be used as an endowment for specified charitable purposes)
But clearly one should look at the totality of the restraints imposed by charity law.

[20] [2017] EWHC 1379 (Ch) at [99]. The point was common ground on appeal. But see 104.23.10 (Member of charitable co).

[21] See 104.22 (Definitions of participator).

Section 450(4) CTA 2010 provides:

> Any rights that P or any other person has as a loan creditor are to be disregarded for the purposes of the assumption in subsection (3)(c).

This will not normally make any difference, as a company would not normally distribute income to loan creditors. But it would apply in special cases where interest is treated as a distribution.

The CT Manual provides:

> **CTM60240. Control: Summary** [Nov 2020]
> ... The test ... depends on the dividend rights of the issued capital and will be mainly of interest where shares with no voting rights carry the right to a high dividend..

But this is not the only case. The life tenant of an IIP trust holding a majority of the shares in a company in principle has control of the company under this head.

104.3.10 *Assets: Para (d) control*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (d) such rights as would entitle P,*
> *[i] in the event of the winding up of C*
> *[ii] or in any other circumstances,*
> *to receive the greater part of the assets of C which would then be available for distribution among the participators.*[22]

The CT Manual provides:

> **CTM60230. Control: Right to receive most assets** [Nov 2020]
> Control ... exists where a person or persons have a right to receive the greater part of the assets then available for distribution among participators, in any circumstances, (for example, on redemption of redeemable share capital or on repayment of loans to the company) but also, specifically, on a winding up of the company.
> ‘Participators’ for this purpose includes loan creditors (unlike (c) of CTM60220). ... If a loan creditor is an open company, see CTM60300. The test under CTA2010/S450 (3) ... only applies to the assets that would come to a participator in that capacity. In the case of a bank, for example, no regard would be had to any assets that would come to it in respect of loans made in the ordinary course of its banking business,

[22] See 104.22 (Definitions of participator).

> because it is not deemed to be a loan creditor (and, hence it is not a participator) in respect of such loans by virtue of CTA2010/S453 (4) ...

Suppose a company owes a debt of £x to a loan creditor. If the assets of the company are less than £2x, then the loan creditor has control. If the assets are more than £2x (plus a little for the notional costs of a notional liquidation) then the loan creditor does not have control under this head. It may not be easy to know whether they have control or not.

If a company has no net assets (liabilities exceed value of net assets) then shareholders do not have control under this head, because nothing would be distributed to them on a winding up. Loan creditors may still have control, unless the company has no assets at all.

"Other circumstances" means circumstances in which a distribution is made to participators. The example given in the CT Manual is a redemption of redeemable shares.[23] The CT Manual provides:

> **CTM60240. Control: Summary** [Nov 2020]
> ...The test in CTM60230 will normally be of interest only where
> [1] loan creditors are participators (see CTM60130) or
> [2] there exist special rights to participate in the assets available for distribution in a winding-up or in any other circumstances for example, on redemption of redeemable share capital.

But these are not the only cases where the test may be satisfied. If trustees hold a company on trust for A for life, remainder to B absolutely, then B has control under para (d) (assets): for B will in the future be entitled to the assets of the company. If trustees hold a company on trust for B contingently (eg on attaining the age of 25, if B is under 25) then B does not have control under para (d).

104.3.11 *"Entitled to acquire"*

Section 451 CTA 2010 provides:

> (1) This section applies for the purposes of section 450 ["control" in ultra-wide sense].
> (2) A person is treated as entitled to acquire anything which the person—
> (a) is entitled to acquire at a future date, or
> (b) will at a future date be entitled to acquire.

[23] In the absence of these words, avoidance might perhaps have been possible by giving redeemable shares smaller rights on a winding up than on a redemption.

I find the difference between para (a) and (b) hard to grasp, but it does not matter.

I refer to this as the **"entitled-to-acquire rule"**.

The wording is often used. The INT Manual comments on the rule in the CFC legislation:

> **INTM210050 'Entitled to acquire' and 'entitled to secure'** [May 2012]
>
> The terms 'entitled to acquire' and 'entitled to secure' in (a), (b) and (c) of INTM210040 apply both where a person is presently entitled to acquire or secure an asset at a future date and where a person will at a future date be entitled to acquire or secure that asset. They do not extend to situations where, in an entirely arm's length transaction, one party temporarily has future rights over the other's property, for instance, in the period between exchange of contracts and completion of a sale of land.
>
> A person whose entitlement to acquire or secure is contingent on a default of any person, including the controlled foreign company in question, will not be treated as having an interest in the controlled foreign company, unless that default has occurred.
>
> So, for example, a person will have an interest in a controlled foreign company if, by means of a contractual right or some other arrangement, he can
>
> - require a shareholder to transfer shares to him, or
> - secure the issue to him of unissued share capital of the company, or
> - secure that if a distribution is made by the company he has a share in the distribution or premium.
>
> A person will not have an interest in a controlled foreign company solely by virtue of rights over the income or assets of the company which are exercisable on the default of any person. Thus the contingent rights of banks, trade creditors, etc. to acquire some or all of the company's assets in the event of a default would not amount to an interest in the company in advance of the default.

See too 104.23.11 ("Entitled to do").

104.4 Trustees of settlement

This section considers trustees of a substantive trust.[24]

Trustee shareholders are constrained by fiduciary duties, for instance, they may be unable to remunerate themselves as directors. These

[24] For nominees, see the next section. Also see 104.10.1 (Trustee in personal capacity).

restraints do not prevent trustees from having control in the ultra-wide sense:

(1) Trustees may be said to be have general control. Fiduciary control is sufficient.
(2) Trustees may be said to "possess", or to be "entitled to acquire":
    (a) Share capital
    (b) Voting power
    (c) Share capital entitling them to receive income distributions
    (d) Rights entitling them to receive capital distributions

Words such as possess/entitled to, do not require *beneficial* possession/ entitlement. Trustees of a substantive trust have legal ownership, or the right to call for legal ownership, and a better title than any other single person to exercise powers over the trust property.

This is confirmed by the rule that trustees may be associates.

104.5 Nominees: Control

104.5.1 *Nominee-attribution rule*

Section 451(3) CTA 2010 provides (for the purposes of the definition of control in the ultra-wide sense):

> If a person—
> (a) possesses any rights or powers on behalf of another person (A), or
> (b) may be required to exercise any rights or powers on A's direction or behalf,
>
> those rights or powers are to be attributed to A.

I refer to this as the **"nominee-attribution rule"**.

104.5.2 *Position of beneficial owner*

In the case of a straightforward nomineeship, where N holds on trust for A, then A possesses and is entitled to the rights or powers of the trust property, and there is no need for the nominee-attribution rule.

Cases where a person "may be required to exercise rights on A's direction" extend beyond the case where the person is nominee for A in the strict sense of nominee. Even then, the rule is (more or less) otiose, for if a person may be required to exercise rights on the direction of A, or on behalf of A, then these are rights which A possesses or is entitled to acquire, so the rights would be taken into account in any event in the test of control.

So perhaps the point of the rule is that as the rights are to be attributed to A (the beneficiary) they are not to be attributed to the nominee.

It is unclear whether the nominee-attribution rule would apply where a person possesses rights on behalf of more than one person, but the question may not often arise.

104.5.3 *Position of nominee*

A nominee has some rights, and although it is usually the case that one ignores and looks through nominees for tax purposes[25] that is not an absolute rule.[26]

If N holds a majority shareholding on trust for B absolutely, it is suggested that N does not necessarily have control in the ultra-wide sense, on the basis that:

(1) The statutory words “possess” and “able to exercise” and “entitled”, while not requiring beneficial possession (etc), are not apt to describe the limited rights of a bare nominee.[27]

(2) The nominee-attribution rule which attributes rights (etc) to B, by implication requires that N does not possess (etc) those rights.[28]

On the other hand, if:

(1) N holds the shares on as nominee for a number of beneficiaries in undivided shares, and

(2) The beneficiaries are not entitled to call for the transfer of their shares or to give directions to N

then it is suggested that N may “possess” the share capital and voting power of the shares.

[25] See 87.7.4 (Tax treatment of bare trust).

[26] Contrast *Atlasview v Brightview* [2004] EWHC 1056 (Ch) which held that a nominee had an interest for the purposes of (what is now) s.994 Companies Act 2006 (unfair prejudice to shareholders).

[27] There is some support for this view at the CoA level in *Bibby v IRC* 27 TC 167 at p.173 where CoA said in a passing comment that a bare trustee did not have a "controlling interest" (the term was not defined). The point was left open by the House of Lords on the appeal, because it was appreciated that the term bare trustee was ambiguous and needed further consideration.

[28] Note that the nominee-attribution rule states that the rights “are to be” attributed to A; contrast the associate-attribution rule, which is that an associate’s rights “may be” attributed to a person; see 104.7 (Associate-attribution rule).

In other words, the term "nominee" actually covers a variety of different circumstances.[29]

A nominee may also have control in the ultra-wide sense on the basis that it exercises *de facto* control, but that depends on the facts.

A similar approach applies to the question whether a nominee is a participator; see 104.23.6 (Nominees: Participators).

104.6 Associates

104.6.1 *Associate/connected: Concepts*

"Associate" is one of a cluster of similar concepts:

Term	**Definition**	**Application**	**See**
Associate	s.448 CTA 10	*Various:*[30]	*Discussed here*
		- Associate-attribution rule	104.7
		- Loan/benefit from Close co	40.8; 40.9
		- Temporary non residence	11.12.2; 11.14.3
Associate	s.713(1) ITA	Transactions in securities	55.2.3
Associate	s.253 ITA	Enterprise investment scheme	*Not discussed*
Connected person	-	*Very widely used*	104.12
Associated co	*Various*	Small profits rate; Close co	104.17.1

The word "associate" has various definitions. So strictly one should not use the term without a definition; but the context may provide the definition and in this chapter the word is used in the s.448 sense.

The most important concepts in this list are associate (in the s.448 sense) and connected person. The definitions are similar but not the same. It may be that:

(1) A is connected with B but not an associate of B; or

(2) A is an associate of B but not connected with B.

I note the differences in the discussion below.

This section considers the definition of associate; the next section considers the associate-attribution rule; and the following section gives examples and discusses difficulties caused by the width of the definition.

[29] Lord Simonds made the point in *Bibby v IRC* 27 TC 167 at p.185: "I would reserve further consideration [for] the case of the so-called bare trustee. ...I should myself require a more satisfactory explanation than has yet been given of a term which, though it has statutory sanction, has never, I believe, received statutory definition."

[30] This list is not comprehensive.

104.6.2 *Definition of "associate"*

Section 448(1) CTA 2010 provides:

> In this Part [Part 10 CTA 2010, close companies] "associate", in relation to a person ("P"), means ...

There follows a set of seven categories of associate, as follows:

Type of associate	**s.448(1) para**	**See para**
Relatives	(a)	104.6.3
Partners	(a)	104.6.4
Trustees	(b)(c)(d)	104.6.6, 104.6.7
Companies	(e) (g)	104.6.8
Personal representatives	(f)	104.6.9

The definition refers to an associate *in relation to* P. The associate-attribution rule (and other rules) refer to an associate *of* a person ("P").[31] But nothing turns on the preposition: if X is an "associate in relation to P" then X is an "associate *of* P"; the expressions mean the same thing. But the latter expression is clearer, so that is the one I generally use.

Strictly one should not use the term "associate" in the abstract. An associate can exist only in relation to another person. But where the context is clear it is permissible to refer to "an associate" in isolation (meaning, an associate of P, but leaving the identity of P to be inferred).

104.6.3 *Associates: Relatives*

Section 448(1) CTA 2010 provides:

> In this Part [Part 10 CTA 2010, close companies] "associate", in relation to a person ("P"), means—
> (a) any relative ... of P

There are two distinct definitions of "relative" relevant for this chapter:
(1) The definition for "associate"
(2) The definition for "connected person"[32]

Strictly, one should not use the word "relative" without specifying which definition applies, but the context may make that clear.

Section 448(2) CTA 2010 defines relative for the purpose of "associate":

[31] Section 1069 CTA 2010 also refers to an associate *of* a participator.

[32] See 104.13.1 (Relative).

> In this section, "relative" means—
>
> (a) a spouse or civil partner,
> (b) a parent or remoter forebear,
> (c) a child or remoter issue, or
> (d) a brother or sister.[33]

The definition of "relative" for the connected person rule is wider. An individual is not an associate of the spouse of a sibling, etc, but the individual is connected with the spouse.[34]

104.6.4 *Associates: Partners*

Section 448(1) CTA 2010 provides:

> In this Part [Part 10 CTA 2010, close companies] "associate", in relation to a person ("P"), means—
>
> (a) any ... partner of P

The definition of connected person is slightly narrower, as (in short) it does not apply to commercial acquisitions/disposals of partnership assets.

104.6.5 *Trustees & settlor/relatives*

Section 448(1) CTA 2010 provides:

> In this Part [Part 10 CTA 2010, close companies] "associate", in relation to a person ("P"), means ...
>
> (b) the trustees of any settlement in relation to which P is a settlor,
> (c) the trustees of any settlement in relation to which any relative of P (living or dead) is or was a settlor

The definition of connected person is different in several ways. In particular:[35]

(1) After the death of a settlor: Trustees are associates of a relative of a deceased settlor, but the trustees are not connected with the relative. This is an important difference.

(2) "Settlement" here has the standard IT/CGT meaning. Contrast the definition of connected person where the word has the settlement-arrangement meaning.[36]

[33] For the meaning of these terms, see App 3.1 (Family terms: Introduction).

[34] See 104.13 (Connected: Family members).

[35] See 104.14 (Connected: Trustees).

[36] See 87.1 (Definitions of "settlement").

(3) The trustees are associates of the settlor, but the settlor is not an associate of the trustees.[37] Likewise, the trustees are associates of relatives of the settlor, but relatives of the settlor are not associates of the trustees.

A person may be a spouse at one time and not at another time. One must look at the position from time to time. Thus:

(1) If S is a settlor, the trustees are associates of the spouse of S; but if there is a divorce, the trustees cease to be associates of the (former) spouse under s.448(1)(c).[38]
(2) If S marries, then the trustees become associates of the spouse under s.448(1)(c).

The CT Manual provides:

> **CTM60170 trustees, executors, etc** [Dec 2021]
> [1] The trustee or trustees of any settlement to which (b) of CTM60150 applies[39] are associates of the participator and therefore any rights or powers which they possess as trustees of that settlement may be attributed to the participator.
> [2] This does not, however, apply to any rights or powers such trustees possess in other capacities, for example, in relation to shares owned by them personally or as trustees of other settlements of which neither the participator nor any of his or her relatives (living or dead) within (a)(ii) to (iv) of CTM60150 is or was the settlor.
> [3] You should note that the rights and powers of the settlor and his or her relatives may not be attributed to the settlement trustees under (b) of CTM60150, that is, this association is one way only.

Point [2] is right as trustees are deemed to be a separate person.

104.6.6 *Trustees and beneficiaries*

Section 448(1) CTA 2010 provides:

> In this Part [Part 10 CTA 2010, close companies] "associate", in relation to a person ("P"), means ...
> (d) if P has an interest in any shares or obligations of a company which are subject to any trust, the trustees of any settlement concerned

[37] See 104.6.7 (One-way association).

[38] But if P is a beneficiary, the trustees are associates of P under para (d).

[39] The reference is to s.448(1)(b).

If trustees hold shares or securities on trust for A for life, remainder to B, then the trustees are associates of A and B. The trustees are associates of any person entitled on the termination of the trust (the default beneficiary).

What if P is a beneficiary of a discretionary trust? The question is whether P has an "interest" in the company.[40] If so, the trustees are associates of P.

Trustees are not associates of P under s.448(1)(d) where P does not have an interest under the trust, even if P's relatives have an interest.[41]

There is no equivalent rule for connected persons, which is narrower on this point.

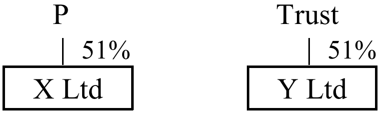
The CT Manual continues:

> **CTM60170 trustees, executors, etc** [Dec 2021]
>
> ...
>
> [1] Where (c) of CTM60150 applies,[42] a participator interested by virtue of the trust in shares or obligations of the company which are subject to the trust has as his or her associate only the trustee or trustees of that trust.
>
> [2] Any rights and powers they possess as trustees are deemed to belong to him or her but not any rights and powers they possess in any other capacity.
>
> [3] As with (b) of CTM60150 the association is one way only.[43]

The reason is the same as before. Point [2] is right as trustees are deemed to be a separate person. Point [3] is saying that the trustees are associates of the beneficiary, but the beneficiary is not an associate of the trustees.

104.6.7 *One-way association*

"Associate" is not a symmetrical relationship, that is to say, if A is an associate of B, it does not necessarily follow that B is an associate of A.[44] Suppose:



[40] See 104.23.4 (Trustees and beneficiaries).

[41] But if P (or a relative) is settlor, the trustees are associates of P under para (b) or (c).

[42] The text of CTM60150 seems to have changed, but the reference is to s.488(1)(d).

[43] See 104.6.5 (Trustees & settlor/relatives); 104.6.7 (One-way association).

[44] "Connected person" is different: see 104.12.4 (Reciprocity of connection).

Suppose the settlor of the trust is P or a relative of P:

(1) The trustees are associates of P. So P "controls" Y Ltd in the ultra-wide sense.

(2) P is not an associate of the trustees, so the trustees do not "control" X Ltd.

HMRC agree. See the Manual passages cited at 104.6.5 (Trustees & settlor/relatives) and 104.6.6 (Trustees and beneficiaries).

104.6.8 *Associates: Companies*

s.448(1)(e)	**s.448(1)(g)**
In this Part [Part 10 CTA 2010, close companies] "associate", in relation to a person ("P"), means ...	In this Part [Part 10 CTA 2010, close companies] "associate", in relation to a person ("P"), means ...
(e) if P—	(g) if P—
(i) is a company, and	(i) is a company, and
(ii) has an interest in any shares or obligations of a company which are subject to any trust,	(ii) has an interest in any shares or obligations of a company which are part of the estate of a deceased person,
any other company which has an interest in those shares or obligations	any other company which has an interest in those shares or obligations.

Section 448(1)(e) might apply if A Ltd is held on trust for X Ltd for a period, with remainder to Y Ltd, but it is not likely to arise in practice. Section 448(1)(g) is also a rare case.

If A controls a company, the company is connected with A, but the company is *not* an associate of A. For the purposes of the associate-attribution rule (discussed below), this rule makes no difference, as the associate-attribution rule attributes interests of controlled companies as well interests of associates. But it matters in other places where the term associate is used; for instance, the charge on benefits or loans from a close company, which applies if benefits or loans are conferred on a participator, or an associate.

104.6.9 *Personal representatives*

Section 448(1) CTA 2010 provides:

> In this Part "associate", in relation to a person ("P"), means ...

> (f) if P has an interest in any shares or obligations of a company which are part of the estate of a deceased person, the personal representatives of the deceased

There is no equivalent rule for connected persons, which is narrower on this point.

104.7 Associate-attribution rule

Section 451(4) CTA 2010 provides (for the purposes of the definition of control in the ultra-wide sense):

> There may also be attributed to a person all the rights and powers—
> (a) of any company of which the person has, or the person and associates of the person have, control,[45]
> (b) of any two or more companies within paragraph (a),
> (c) of any associate of the person, or
> (d) of any two or more associates of the person.[46]

In short, a person is treated as holding the rights of:
(1) their associates
(2) companies (not associates) which:
  (a) they control or
  (b) they and their associates control

I refer to this as the "**associate-attribution rule**". (This label is not ideal, as under the rule applies to controlled companies which are not associates; but no short label will neatly fit all the circumstances.)

Section 451(5) CTA 2010 provides (for the purposes of the definition of control in the ultra-wide sense):

> The rights and powers which may be attributed under subsection (4)—
> (a) include those attributed to a company or associate under subsection (3) [nominees], but
> (b) do not include those attributed to an associate under subsection (4).

One is not treated as holding the rights of an associate of an associate.

Section 451 uses the word "may". Section 451(6) CTA 2010 provides (for the purposes of the definition of control in the ultra-wide sense):

[45] Control here has the ultra-wide meaning: see s.450(1) CTA 2010 set out in 104.3.1 (Introduction).

[46] Para (b) and (d) must be otiose, but it does not matter.

> Such attributions are to be made under subsection (4) as will result in a company being treated as under the control of 5 or fewer participators if it can be so treated.

The point is that an attribution could have the result that a company is not a close company (because if the rights are attributed to the person, they are not attributed to the associate); in such a case the attribution is not to be made.

This rule does not apply for the purposes of the definition of participator (that is, the fact that A is an associate of a participator does not entail that A is a participator).

104.8 Ultra-wide control: Critique

In *R v IRC ex p. Newfields Developments*:

> [10] It will be seen that although this definition starts in subs (2) with a concept of control which reflects its meaning in ordinary speech ('a person shall be taken to have control of a company if he exercises, or is able to exercise or is entitled to acquire, direct or indirect control over the company's affairs'), that fairly simple notion is enormously widened by subsequent subsections. ...
> [11]… The effect of those cumulative definitions is that for the purpose of deciding whether a person 'shall be taken to have control of a company' under [what is now s.450], it may be necessary to attribute to him the rights and powers of persons over whom he may in real life have little or no power of control. Plainly the intention of the legislature was to spread the net very wide.[47]

The attribution rule - together with the wide definition of associates - is what makes the s.450 definition of control ultra-wide. It is so wide that the word "control" is not apt to describe the concept ("some loose association" would be nearer the mark). It is confusing to depart from statutory terminology, but where the ultra-wide sense of control is used, the actuality demands quotation marks. For instance:

(1) A has "control" of a company owned by a relative (say, a sister) even though A has no beneficial interest in the company, and, of course, A's knowledge of the company is limited to information in the public domain.
(2) A has "control" of a company owned by a trust of which a relative is

[47] 73 TC 532 at p.556.

a settlor, even though A is not a beneficiary and has no right to know that the trust had been made, or to know anything about the trust or its property. Indeed the relative need not be the settlor but only *a* settlor, so the rule would apply if (say) a sister provides a nominal amount of property to a trust.

(3) A partner has "control" of a company owned by a partnership even if it is an investment partnership with a large number of unconnected partners. The modern use of partnerships as a collective investment vehicle raises this problem, because investment partnerships have large numbers of partners,[48] and partners do not know who their fellow partners are.

Hold-over relief illustrates the problem. The relief applies on a gift of a business asset to a company. This rule formerly allowed (relatively) straightforward avoidance by a gift to a company held by a non-resident trust. To counter this, s.167 TCGA provides (so far as relevant):

> (1) [Hold-over relief] shall not apply where the transferee is a company which is within subsection (2) below.
> (2) A company is within this subsection if it is controlled by a person who, or by persons each of whom—
> (a) is not resident in the UK, and
> (b) is connected with the person making the disposal.

It is sensible that the relief should not apply on a gift to, say, a company owned by a non-resident. But the effect of the ultra-wide definition of control is that the relief is disapplied where there is any person in existence who:

(1) is an associate of the person
(2) is connected with the person and
(3) is non-resident

Such a person would "control" the company (because the powers of the associate are attributed to them). This arose in *Reeves v HMRC*[49] where the taxpayer made a gift to a company which he owned. The disponor had

[48] In 2014 there were 500 partnerships which filed an SA800 return and had more than 50 partners; some have more than 1,000 partners (unfortunately HMRC software did cope with more than 999) and, anecdotally, one had more than 20,000 partners; data from OTS "Review of partnerships: interim report" (2014) para 5.25 and appendix A. *https://www.gov.uk/government/publications/partnerships-review*

[49] [2018] UKUT 293 (TCC).

a wife and children who were not UK resident. Each of them "controlled" the company (in the ultra-wide sense) as the taxpayer was their associate, and his powers were attributed to them. So the relief was disapplied under s.167. Had the taxpayer been single, that is, unmarried and childless, the relief would have applied. How absurd is that? In this case, the UT somehow amended the provision under the guise of purposive construction. The reader may prefer the reasoning of the FTT, and suspect this will be a case more often cited than followed.

The vast extent of the ultra-wide definition of control has three noteworthy consequences.

The first is practical: it is not possible for a person to know whether they control a company, or to draw up a list of all companies which they control. In practice there is substantial innocent non-compliance, and selective or arbitrary enforcement, where HMRC sufficiently dislike a taxpayer to make enquiries not normally made.

The second point is presentational, but presentation is important: anti-avoidance provisions which refer to control appear to the non-tax specialist to be reasonable because control seems a sensible limiting factor; but they operate unreasonably widely (because the meaning of *control* is so wide).

Thirdly, this leads to complexity. On occasions, where the difficulty caused by the extravagant definition has been recognised, the definition of control[50] is restricted.[51] However this is done on a piecemeal basis, typically where taxpayer lobbying has for some reason given rise to government action. So the result is a complexity which would not arise if a more restrained definition of control had been adopted in the first

[50] or some concept in which the word control is used, such as associate or connected person.

[51] For instance, ss.27, 29, 30 CTA 2010. Section 27 CTA 2010 provides:

> "(2) In the application of section 451 (meaning of 'control': rights to be attributed) for the purposes of the determination, the references in section 451(4) and (5) to an associate of a person ("P") include a partner of the person only if the condition in subsection (3) below is met.
>
> (3) The condition is that tax planning arrangements which—
>
> (a) involve P and the partner, and
>
> (b) secure a relevant tax advantage,
>
> have at any time had effect in relation to the taxpayer company."

For other examples, see 60.4.2 ("Control" and "participator"); 72.10.3 (20% rule: HMRC practice); 129.8.2 ("Connected").

place.

The same difficulties apply to provisions using the term "connected person" (since that term uses the concept of "control" in the ultra-wide sense). It will in practice be impossible for a person to identify all persons who are "connected" with them. One individual might easily have 500 persons connected with them. If one could write a full list, it would vary continuously. Even an attempt to enquire would be grossly intrusive.

The point was made in responses to a consultation on the substantial donor rules:

> charities described the connected persons rule as an "impossible requirement", a "substantial administrative burden" and a "compliance nightmare".[52]

There was nothing particularly unusual in the substantial donor rules, except, perhaps, that the charities who responded to the consultation felt a greater obligation than most taxpayers to seek to comply with the law. This difficulty applies generally to the use of the concepts of control and connected persons. But there it is. HMRC's priority in anti-avoidance legislation is not to produce legislation with which everyone can comply: it is to produce legislation which catches everyone they wish to catch.[53]

104.9 Control: Strict sense

This section considers the concept which I call strict-sense control.[54] The definition is found in (at least) three places:

Definition (my terminology)	**Section**
IT/CT definition	s.995 ITA/1124 CTA 2010
Loan relationships definition	s.472 CTA 2009

s.995(1) ITA	**s.1124 CTA 2010**	**s.472 CTA 2009**
This section has effect for the purposes of the provisions of the Income Tax Acts which apply	This section has effect for the purposes of the provisions of the Corporation Tax Acts	This section has effect for the purposes of any provisions of this Part [Part 5, Loan

[52] HMRC, Substantial Donors to Charity Consultation Responses Document (2009), para 3.12, [2009] STI 65.

[53] Thus the definition of connected person in the tainted donation rules (which replaced the short-lived substantial donor rules) is even wider than the standard ultra-wide definition! See s.809ZQ ITA.

[54] See 104.2.2 (Definitions of "control").

this section.	which apply this section (or to which this section is applied).	Relationships] which apply this section (but this does not affect the application of section 1316(2) (meaning of “control”) for other purposes of this Part).

This is misleading as the IT/CT definition (in s.995/1124) is the default definition of control in the IT and CT Acts.[55] But it does not matter. The definition is as follows:

s.995(2) ITA/1124(2) CTA 2010 **IT/CT definition**	**s.472(2) CTA 2009** **Loan relationships definition**
In relation to a body corporate (“company A”), “control” means the power of a person (“P”) to secure—	For those purposes “control”, in relation to a company, means
	the power of a person to secure that the affairs of the company are conducted in accordance with the person's wishes—
(a) by means of the holding of shares or the possession of voting power in relation to that or any other body corporate, or	(a) by means of the holding of shares or the possession of voting power in or in relation to the company or any other company, or
(b) as a result of any powers conferred by the articles of association or other document regulating that or any other body corporate,	(b) as a result of any powers conferred by the articles of association or other document regulating the company or any other company.
that the affairs of company A are conducted in accordance with P’s wishes.	

The definitions are (more or less) identical, except that:

(1) The Loan Relationships definition refers to company rather than body

[55] See 104.2.3 (Default meaning of control).

corporate.[56]

(2) The Loan Relationships definition has further provisions relating to trading shares and partnerships, which I do not discuss here.

So cases on the Loan Relationships definition are relevant to the IT/CT definition.

104.9.1 *Boardroom control*

The CT Manual provides:

> **CTM80175: Groups: group relief: arrangements, effect** 2 [Jun 2016]
> ... **Control at various levels**
> The ability to secure that the affairs of the company are conducted in accordance with a persons wishes includes consideration of how the business of the company as managed by its Board. Usually shareholders cannot dictate to or overrule the Board on management matters entrusted to the Board. So a necessary element of control is the ability to determine the composition of the Board, or failing that, to appoint directors who have the power to impose their decisions on directors appointed by any other shareholder.
> The voting rights shareholders can exercise in general meetings will normally include the right to vote on the appointment and removal of directors. However, it is not safe to assume that possession of the majority of voting rights will bring automatic control of the Board. In *Irving v Tesco Stores (Holdings) Ltd* 58 TC 1, the claimant did not have Boardroom control of the surrendering company because:
> - more than half of the directors were to be appointed by the minority shareholder and could not be removed without his consent, and
> - the directors appointed by the claimant could not impose their decision on the directors appointed by the minority shareholder.

The Employee Tax Advantaged Share Scheme User Manual provides:

> **ETASSUM43140 Control of the scheme company** [Mar 2022]
> ... [The Manual refers to the definition of control in the strict sense, and continues:]
> Control will not necessarily be obtained simply because of the size of a share holding in the scheme company. Shareholders cannot ordinarily dictate to or overrule the Board of Directors in respect of matters of management entrusted to them. So a necessary element of control is (by

[56] See 90.9 (Body corporate).

> voting powers or other powers) to have economic control of the company and the power of a person to secure that the affairs of the company are conducted in accordance with their long term wishes. The ability to determine the composition of the Board, or failing that, to appoint directors who have the power to impose their decisions on directors appointed by any other shareholder are indicators of control.
>
> ...

The Corporate Finance Manual provides:

> **CFM35120. What is control?** [Aug 2018]
>
> ***Meaning of Control***
>
> Section 472 CTA 2009 gives the meaning of control.[57] The test is whether a person can 'secure that the company's affairs are conducted in accordance with his wishes'. A person (an individual or company) can do this by
>
> - holding most of the shares, or
> - holding most of the voting rights in the company (or another company, such as the ultimate parent), or
> - through any other powers, given through any document (such as the company's Memorandum and Articles of Association).
>
> ***Control through shares***
>
> A majority shareholding will usually ensure control, unless different classes of shares carry different voting rights. Share held on trading account and their voting rights are ignored for this purpose.
>
> ***Control through voting rights: example***
>
> MK Ltd's issued share capital is made up of
>
> - 1,000 ordinary shares, carrying one vote each
> - 2,000 'A' ordinary shares with no voting rights.
>
> KB Ltd owns 800 ordinary shares.
>
> JR Ltd owns 200 ordinary shares and 2,000 'A' ordinary shares.
>
> Although JR Ltd has the majority of the issued shares, KB Ltd has control because it has the majority of the shares with voting rights, and can therefore use those voting rights to ensure that MK Ltd acts according to its wishes.
>
> ***Control through other powers: example***
>
> AV Ltd owns 40% of the shares of BK Ltd, but it has the power, through BK Ltd's Articles, to appoint more than half of BK Ltd's board of directors. These directors will manage the business according to AV Ltd's wishes, so AV Ltd has control...

[57] Author's footnote: This definition is based on the definition of control in the strict sense.

The decision in *Tesco* - that strict-sense control refers to boardroom control - was approved in *Farnborough Airport v HMRC.*[58]

It follows that shareholders do not have strict-sense control after a receiver is appointed. They still have power to appoint directors, but that does not confer boardroom control, as the authority of the directors to carry out the business of the company is suspended.[59]

See too 8.7 (Control: company law background); 104.3.5 (Partial control).

104.9.2 *Joint control*

Two shareholder who together hold a majority of the shares may have joint control. In *Keighley v HMRC*:[60]

> Nor do we agree ... that the statutory test can be supplemented by a rule of thumb that the persons need to act "as one". We need to consider the statutory test. We ask ourselves whether the rights attaching to the shares, the articles, or the shareholders agreement (which in our view falls within the ambit of another document regulating the company) give [the two shareholders] the power to secure that the affairs of the company are conducted in accordance with their wishes.
>
> We also accept the argument that person for these purposes can be persons by dint of the Interpretation Act.

104.9.3 *Power to obtain control*

In *Farnborough,* although the shareholders lost strict-sense control on appointment of a receiver, they could at any time pay off the debt so that the receiver would cease to act. They were able (at a cost) to re-acquire control. That made no difference:

> 77. We can see that if this argument were correct, it would give rise to immense scope for avoidance of what we consider to be the clear purpose of these provisions. It would allow for the creation of structures in which control of a company would for all practical purposes be lost but could be retained for group relief purposes by the inclusion of artificial provisions in appropriate terms allowing for control to be "regained" at some future date. We do not consider such an

[58] [2019] EWCA 118 at [30]. See Howard, "Remote Control" Taxation Practitioner, Sep 2011 p.45.

[59] *Farnborough Airport v HMRC* [2019] EWCA 118.

[60] [2024] UKFTT 30 (TC) at [113] ff.

> interpretation of the provisions would be consistent with their overall purpose and we therefore reject it.

The difficulty with this purposive argument is that strict-sense control applies not only in the context of group relief, but in many other contexts, so there should be no scope for purposive construction based on what suits the group relief rules. But the conclusion could be justified without the purposive argument. The definition of strict-sense control (unlike control in the ultra-wide sense) does not have any provision about the ability to secure control.

The non-tax case *R v Radio Authority ex p. Guardian Media Group*[61] concerned statutory wording equivalent to strict-sense control. The parties entered into an arrangement with the intention that

(1) Company A should not have strict-sense control of company B; but
(2) A should have the ability to acquire control of B by use of put and call options.

The judgement discussed the expression "able to secure" without coming up with any clear answers, but it favoured the view that A did not have strict-sense control.

104.9.4 *Governing documents*

The power of control must arise:

> (a) by means of the holding of shares or the possession of voting power in relation to that or any other body corporate, or
> (b) as a result of any powers conferred by the articles of association or other document regulating that or any other body corporate ...

De facto control is not enough.[62] Legal power of control is not enough, unless it arises from matters within (a) or documents within (b). Thus directors by definition have boardroom control, but they do not necessarily have strict-sense control.

Farnborough Airport Properties v HMRC comments on what documents fall within (b):

> It is clear from the syntax that the words "regulating that or any other

[61] [1995] 1 WLR 334.

[62] This is self-evident, but if authority is needed, see *Keighley v HMRC* [2024] UKFTT 30 (TC) at [107].

> body corporate" refer back both to 'the articles of association" and to the 'other document' contemplated in section 1124(2)(b) [CTA 2010 = s.995(2)(b) ITA], and accordingly the type of regulation being referred to must be similar in relation to both. Therefore, the phrase 'other document regulating that or any other body corporate' when read in context must, in our view, refer to a constitutional document akin to articles of association (i.e. one which sets out the governance arrangements for a body corporate which is binding upon members and officers by virtue of their status as such, without the need for them to agree separately to its terms). We infer that in referring to "other document", the draftsman had mainly in mind the constitutional documents governing "non-standard" types of body corporate (e.g. companies incorporated overseas or bodies established by Royal Charter, where the legal terminology often does not include the phrase "articles of association").[63]

In *Farnborough Airport Properties v HMRC* the first-tier tribunal held that a receiver had power to secure that the affairs of the company were conducted in accordance with its wishes.[64] But even so, the receiver did not have control in the strict sense, according to the Upper Tribunal, because the debenture under which the receiver was appointed was not a "document regulating" the company. The issue did not arise in the CA. I do find that surprising, but the law is settled below the level of the CoA. The question may not often arise.

104.10 Strict-sense control: Trusts

104.10.1 *Trustee in personal capacity*

Trustees are generally treated as a separate notional person.[65] So an individual (or company) who is a trustee, even sole trustee, does not have control of a company owned by the trust, in their personal capacity, in any sense of control; only the trustees (the separate, notional trustee-person) can have control.

Cases from before the notional person rule was introduced are not now

[63] *Farnborough Airport Properties v HMRC* [2017] UKUT 394 (TCC) at [57].

[64] This point was left open at the UT appeal. In the CoA the issue did not arise and was not discussed. But the wide powers normally exercisable by a receiver clearly constitute boardroom control.

[65] See 7.3 (Trustees a distinct person).

relevant on this point.[66]

104.10.2 *Trustee as notional person*

Trustees of a substantive trust are constrained by fiduciary duties, for instance, they may be unable to remunerate themselves as directors. These matters do not prevent trustees from having strict-sense control of a company held by the trust.[67]

On the other hand, a person with power to appoint trustees does not have strict-sense control of a company held by a trust, as they cannot require the trustees to act in accordance with their wishes. The same applies to a person with power to appoint directors of a corporate trustee.

104.11 Control of partnership

Although there are two principal definitions for control of companies (ultra-wide and strict-sense), there is only one definition of control of partnerships, which one may therefore call the standard definition.

Section 995(3) ITA provides:

> In relation to a partnership, "control" means the right to a share of more than half the assets, or of more than half the income, of the partnership.

That might be regarded as a slightly artificial definition, as it has nothing to do with control in the natural sense, but it is precise.

104.12 Connected person

There are separate definitions for the separate taxes. There are more

[66] For completeness: In *IRC v Lithgows* 39 TC 270, an individual (Sir Andrew Macharg, a leading Scottish accountant) was one of four trustees of a trust. The trust held a company whose shares were registered in the names of the trustees. Sir Andrew was the first named on the share register. HMRC argued that Sir Andrew personally controlled the company. The court rejected that argument. Although his was the only vote counted by the company, see (what is now) s.286 Companies Act 2006, Sir Andrew was only one of the trustees, and had to use his vote in accordance with the direction of the trustee majority, regardless of his own wishes.

In *Bibby v IRC*, the trustees were directors; it was held that the trustees jointly had a "controlling interest" (the term was not defined).

[67] This is almost self-evident; but if authority is needed, see *Bibby v IRC* 27 TC 167 which held that trustees of a substantive settlement may have a "controlling interest" (the term was not defined): the fact that they were trustees was not relevant.

definitions elsewhere, sometimes the same and sometimes different. However the IT/CT/CGT definition(s) considered in this chapter may be considered to represent a single and (more or less) standard definition.

It is a pity that the Tax Law Rewrite did not tidy up this mess; but there it is. The following table may assist navigation:

Tax	**Definition**	**Applied by**
CGT	s.286 TCGA	-
IT	s.993/994 ITA	s.989 ITA
CT	s.1122(1) CTA 2010	s.1316 CTA 2009; s.1176(1) CTA 2010
IHT	s.270 IHTA	-

SDLT does not have a default definition of "connected person", but where the word is used, the CT definition is incorporated by reference.[68]

104.12.1 *Connected: IT/CGT/CT*

s.286 TCGA	**s.989 ITA**	**s.1122(1) CTA 2010**
Any question whether a person is connected with another shall for the purposes of this Act be determined in accordance with the following subsections of this section ...	The following definitions apply for the purposes of the Income Tax Acts— "connected", in relation to two persons being connected with one another, is to be read in accordance with sections 993 and 994.[69]	This section has effect for the purposes of the provisions of the Corporation Tax Acts which apply this section (or to which this section is applied).

The CGT and IT definitions are (almost[70]) the same, but the ITA drafting in some respects improves on the TCGA.

[68] Eg, s 53 and s.108 FA 2003

[69] For completeness: The point is sometimes repeated elsewhere:

s.1021(1) ITA	**s.718 ITEPA**	**s.878(5) ITTOIA**
Section 993 (meaning of "connected" persons) applies for the purposes of this Act unless otherwise indicated	Section 993 of ITA 2007 (how to tell whether persons are connected) applies for the purposes of this Act.	Section 993 of ITA 2007 (how to tell whether persons are connected) applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).

This is not strictly necessary, but either for historical reasons or in accordance with a Plain English penchant for signposts.

[70] See 104.18 (Connected: Partners).

For CT, at first sight it seems s.1122(1) CTA 2010 applies for limited, specified CTA purposes. But s.1176(1) CTA 2010 provides:

> Section 1122 (how to tell whether persons are connected) applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).

Section 1316 CTA 2009 is identical. Thus the CT s.1122 definition applies for the whole of the CTAs 2009 and 2010 unless disapplied. It could have been drafted more neatly.

The statutory expression is connected *with*, not connected *to.* Nothing should turn on the choice of preposition, but when using the term in the statutory sense it is better to follow the statutory language.

104.12.2 *Connected: IHT definition*

For IHT, s.270 IHTA provides:

> For the purposes of this Act any question whether a person is connected with another shall be determined as, for the purposes of the 1992 Act it falls to be determined under section 286 of that Act, but as if in that section
> [a] ‘relative’ included uncle, aunt, nephew and niece and
> [b] ‘settlement’, ‘settlor’ and ‘trustee’ had the same meanings as in this Act.

Thus IHT adopts the CGT definition of “connected person” with a little tweaking.

104.12.3 *Definition in outline*

The definition of connected person is set out in five parts:

(1) Family members
(2) Trustees
(3) Companies held by trusts
(4) Partnerships
(5) Companies generally

104.12.4 *Reciprocity of connection*

s.286(1) TCGA	**s.994(4) ITA/s.1123(4)CTA 2010**
... (any provision that one person is connected with another being taken	If any provision of section 993 provides that a person (“A”) is connected with

to mean that they are connected with one another)..	another person ("B"), it also follows that B is connected with A**.**

The meaning is that "connected" is a symmetrical relationship: if A is connected with B, then B is connected with A.

104.13 Connected: Family members

s. 286(2) TCGA	**s. 993(2) ITA/s.1122(5) CTA 2010**
A person is connected with an individual if that person is	An individual ("A") is connected with another individual ("B") if—
[a] the individual's spouse or civil partner,	(a) A is B's spouse or civil partner,
[b] or is a relative,	(b) A is a relative of B,
[c] or the spouse or civil partner of a relative,	(c) A is the spouse or civil partner of a relative of B,
[i] of the individual, or	(d) A is a relative of B's spouse or civil partner, or
[ii] of the individual's spouse or civil partner.	(e) A is the spouse or civil partner of a relative of B's spouse or civil partner.

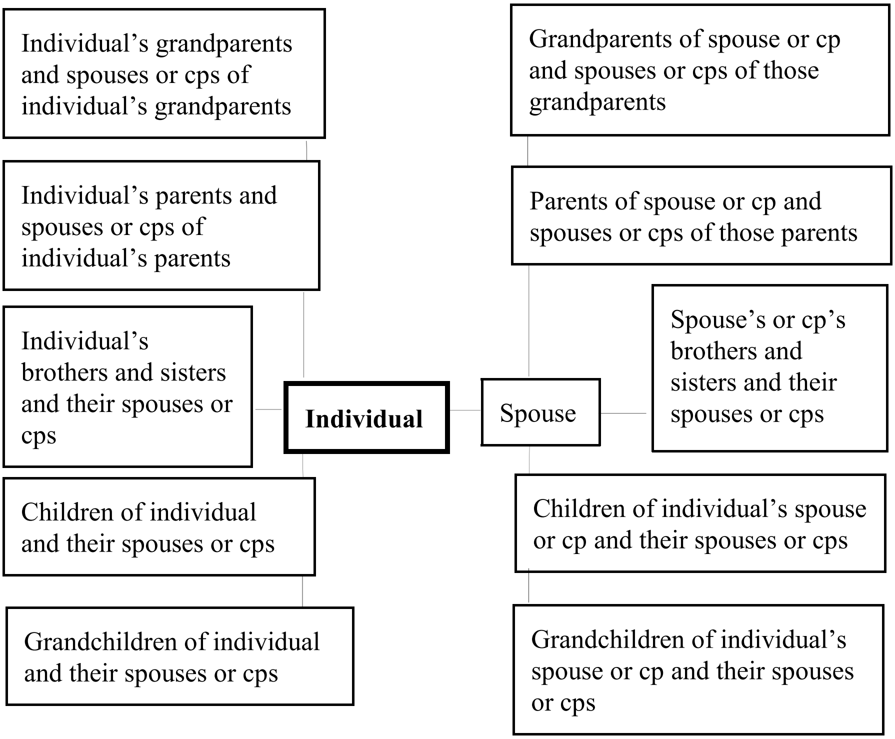
104.13.1 *Relative*

s. 286(8) TCGA	**s.994(1) ITA/s.1123(1) CTA 2010**
In this section	In [s.993 ITA/s.1122 CTA 2010] and this section–
"relative" means brother, sister, ancestor or lineal descendant.	"relative" means brother, sister, ancestor or lineal descendant,

The CG Manual provides:

> **CG14580. Connected persons** [Mar 2017]
> ... The term 'relative' does not cover all family relationships. In particular, it does not include nephews, nieces, uncles and aunts.
> **14580. Connected persons** [Mar 2017]
> The following diagram illustrates the provisions of Section 286(2) TCGA 1992. All of the people in the diagram are connected with the individual. They are not all connected with each other[71]

[71] In this diagram "spouse" includes civil partner.



Individual's grandparents and spouses or cps of individual's grandparents
Individual's parents and spouses or cps of individual's parents
Individual's brothers and sisters and their spouses or cps
Individual
Children of individual and their spouses or cps
Grandchildren of individual and their spouses or cps
Grandparents of spouse or cp and spouses or cps of those grandparents
Parents of spouse or cp and spouses or cps of those parents
Spouse
Spouse's or cp's brothers and sisters and their spouses or cps
Children of individual's spouse or cp and their spouses or cps
Grandchildren of individual's spouse or cp and their spouses or cps

All the persons in the diagram are connected with the individual. Excluded are the widows or widowers, or surviving civil partners, of deceased persons, or relatives of a deceased spouse or of a deceased civil partner unless connection can be established by a route not involving the deceased. A dissolution of a civil partnership or a divorce can similarly lead to persons in addition to the former civil partner or spouse ceasing to be connected with the individual.

Readers are invited to speculate whether this diagram is or is not a useful aid to comprehension.

In the definition of connected person for IHT, "relative" also includes an aunt, uncle, nephew and niece.[72] A two dimensional diagram could not do justice to that.

104.14 Connected: Trustees

104.14.1 *Settlor/connected persons*

s.286(3) TCGA	**s.993(3) ITA/s.1122(6) CTA 2010**
A person, in his capacity as trustee of a settlement, is connected with–	A person, in the capacity as trustee of a settlement, is connected with–

[72] See 104.12.2 (Connected: IHT definition).

(a) any individual who in relation to the settlement is a settlor,	(a) any individual who is a settlor in relation to the settlement,
(b) any person who is connected with such an individual ...	(b) any person connected with such an individual

A trustee is not connected with a corporate settlor, because the word used is "individual"; but that does not often arise.

The CG Manual provides:

> **CG14590. Connected persons: Trustees** [Jul 2019]
> ... The trustees are no longer connected to the persons connected to the settlor after the settlor has died.

More accurately, trustees are not connected with family or other individuals who would have been connected with the settlor when the settlor was alive.[73]

The CG Manual continues:

> A settlor is considered to be connected with the trustee at the moment when property is put into the settlement.

Thus if an individual gives property to a trust, a loss arising on the disposal is a clogged loss[74] even if the individual was not a settlor before the gift was made. That view is supported by the context.

The CG Manual continues:

> For the purposes of determining whether a trustee is connected with an individual, the identity of the trustee is irrelevant. So, for example, if the trustee is the spouse or civil partner of the individual, he or she is only connected in his or her capacity as trustee if the case is within one of the three cases in CG14590.

This is correct since trustees are regarded as a notional person distinct from the persons who are actually the trustees.

The CG Manual continues:

[73] The FTT took this view in *Harris v HMRC* [2010] UKFTT 385 (TC) at [33]: "Section 839(3)(b) [ICTA] is expressed in the present tense, and s 839(3)(a) requires the settler at the relevant time to be an individual who *is* the settlor. None of this is apt to include a deceased settlor." In s.993 ITA, the Tax Law Rewrite deleted the second *is*, but that makes no difference.
Contrast the definition of associates; see 104.6 (Associates).

[74] See 65.9 (Loss on connected person disposal).

> Although under the tests outlined an individual is not connected with particular trustees, this may not prevent him or her from being connected with a company controlled by the trustees.

This is correct: see 104.15 (Connected: company). The Manual continues:

> Under s.454 CTA, a beneficiary of a trust can be attributed with the rights and powers of trustees. In such circumstances he or she may control the company through the tests in s.450 CTA and hence be connected under s.286 TCGA.

There is no general rule that the rights of trustees are attributed to beneficiaries. However the attribution will often be made on the grounds that beneficiaries are relatives of the settlor[75] or (sometimes) that beneficiaries possess rights to income or capital.[76]

For the position if trusts own companies, see 104.20.5 (Two trusts each own company).

For completeness: s.286(3)(d)(e) TCGA deals with sub-fund settlements.[77] But since the sub-fund regime is dead-letter law (hardly ever found in practice) the point does not matter.[78]

104.14.2 *"Settlement"/"trustee"*

s.286(3ZA) TCGA	**s.994(1) ITA/s.1123(1) CTA 2010**
For the purpose of subsection (3) above– (a)"settlement" has the same meaning as in section 620 of ITTOIA 2005	In [s.993 ITA/s.1122 CTA 2010] and this section– "settlement" has the same meaning as in Chapter 5 of Part 5 of ITTOIA 2005 (see section 620 of that Act)

I refer to this as the "settlement-arrangement definition".[79]

Why is this definition applied here? (Contrast the definition of associate.)

Perhaps non-corporate employers complained that a transfer by them to a pension fund was (before 2006) a connected person transaction, whereas

[75] See 104.7 (Associate-attribution rule).

[76] See 104.3.9 (Income: Para (c) control); 104.3.10 (Assets: Para (d) control).

[77] "(d) if the settlement is the principal settlement in relation to one or more sub-fund settlements, the trustees of the sub-fund settlements, and
(e) if the settlement is a sub-fund settlement in relation to a principal settlement, the trustees of any other sub-fund settlements in relation to the principal settlement."

[78] See 63.2 (Sub-Fund regime).

[79] See 87.4 (Settlement-arrangement definition).

a transfer by a company to a pension fund was not. Now a transfer to a pension fund is not a connected person transaction, as the transferor is not in principle connected with the trustees of a pension trust.[80] But that is speculation as no reason was ever provided.

Before 2006, the settlement-arrangement definition applied for IT but not for CGT. Perhaps the reason for the CGT change might have been that the same rule should apply for both taxes. Of course an alternative would have been to bring IT in line with CGT. Had a reason for the change been given, the issues could have been discussed. But there it is.

A consequence is that will trusts are not settlements for the purposes of the connected persons rules, which is odd.[81] It does not matter for s.286(3)(a)(b) (settlor/settlor-connected persons) because that rule only applies when the settlor is alive. But it matters for s.286(3)(c) (company connected with trust participator).

Section 286(3ZA)(b) TCGA/s.994(3) ITA/s.1123(3) CTA 2010 provide the standard deemed-trustee rule to deal with the situation where the settlement-arrangement is not a classic trust, and does not otherwise have trustees.[82] Though in practice that problem will rarely arise.

There is no definition of settlor. Since settlement has the settlement-arrangement definition, it is considered that settlor should also have the settlement-arrangement definition.[83] But the point will not often arise.

For the definition of connected person for IHT, settlement (and the associated terms settlor/trustee) have their IHT meanings: s.270 IHTA.

104.15 Connected: Company

104.15.1 *Outline*

In outline:

Connection	**See para**
A *person* (individual/co/trust/PRs) may be connected with a co	
1 person has control	104.15.3
Connected persons have control	104.15.4
Persons act together to exercise control	104.15.8

[80] See 99.39.1 (Is pension/EBT a settlement).

[81] See 88.8.1 (Is estate a "settlement" for s.87). For completeness: This was overlooked in a passing comment in *Harris v HMRC* [2010] UKFTT 385 at [32] where the relevant authorities were not cited.

[82] See 87.8.2 (Non-classic trust: Deemed trustee).

[83] See 99.2 (Definitions of "settlor").

A *company* may be connected with another company	
One person has control of both companies	104.15.5
Connected persons have control of both companies	104.15.6
One group of persons has control of both companies	104.15.7

A *trust* may be connected with a company	
Close company in which the trust has an interest	104.16
Subsidiary of such a company	104.16

These rules overlap, so there may be more than one reason why a person is connected with a company, but that does not matter.

For completeness: the standard IT/CT definitions of company are disapplied for the purposes of the definition of connected person in s.993/994 ITA & 1122/1123 CTA 2010.[84] Instead, s.994 ITA/s.1123 CTA 2010 provide their own definition of company, in terms equivalent to the CGT definition of company.[85] But since all these definitions are (almost) the same, this makes (almost) no difference.[86]

104.15.2 *"Control" test*

s. 288(1) TCGA	**s.994(1) ITA/s.1123(1) CTA 2010**
In this Act, unless the context otherwise requires... "control" shall be construed in accordance with sections 450 and 451 of CTA 2010	In [s.993 ITA/s.1122 CTA 2010] and this section ... "control" is to be read in accordance with sections 450 and 451 of CTA 2010 (except where otherwise indicated)

"Control" in the connected person test is generally used in the ultra-wide sense. The words in brackets allude to two minor exceptions:

(1) In the phrase "acting together to secure or exercise control", the context shows that control is used in a natural sense.

[84] See 90.8 (Definition of "company").

[85] Section 994 ITA/s.1123 CTA 2010 provide:

> "(1) In section 993/1122 and this section ... 'company' includes any body corporate or unincorporated association, but does not include a partnership (and see also subsection (2)).
>
> (2) For the purposes of section 993/1122—
>
> (a) a unit trust scheme is treated as if it were a company, and
>
> (b) the rights of the unit holders are treated as if they were shares in the company."

[86] The only difference concerns the specialist topic of local authorities; see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 45.8.1 (Group relief) online version *https://www.taxationofcharities.co.uk*

(2) In the (relatively unimportant) context of s.993(3)(e)[87] the word control is used in the strict sense.

For this reason the concept of being connected with a company is ultra-wide, and no-one could draw a complete list of all the companies with which they are connected.

104.15.3 *Person controls company*

s. 286(6) TCGA	**s. 993 (6) ITA/s.1122(3) CTA 2010**
A company is connected with another person, if	A company is connected with another person ("A") if—
[a] that person has control of it ...	(a) A has control of the company

Since control is ultra-wide, this head of connection is also ultra-wide. See 104.20.2 (Two persons each own co).

104.15.4 *Connected persons control co*

s. 286(6) TCGA	**s. 993 (6) ITA/s.1122(3) CTA 2010**
A company is connected with another person, if...	A company is connected with another person ("A") if—
[b] if that person and persons connected with him together have control of it.	(b) A together with persons connected with A have control of the company.

If two persons ("X" and "Y") are associates, this is not needed because the rights of X are attributed to Y.[88] For instance, suppose:
(1) X and Y are relatives or partners.
(2) X and Y each own 30% of A Ltd.

X "controls" A Ltd so this provision is not needed. It is only relevant in a case where two persons are connected but not associates.
Suppose:
(1) A and B are connected persons but not associates.
(2) B controls X Ltd and A has no interest in X Ltd.

It is considered that A is connected with X Ltd. It might be argued that A

[87] See 104.16 (Company connected with trust).

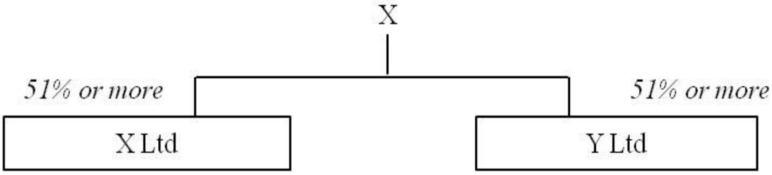
[88] See 104.7 (Associate-attribution rule).

and B do not *together* have control, but various anomalies would arise, and that is reading too much into the word *together*.

104.15.5 *One person controls 2 co's*

s. 286(5)(a) TCGA	**s. 993 (5) ITA/s.1122(2) CTA 2010**
A company is connected with another company	A company is connected with another company if–
(a) if the same person has control of both...	(a) the same person has control of both companies,

A simple case is if one person owns two companies:



X Ltd is connected with Y Ltd.

104.15.6 *Connected persons control 2 companies*

s. 286(5)(a) TCGA	**s. 993 (5) ITA/s.1122(2) CTA 2010**
A company is connected with another company	A company is connected with another company if–
(a) if .. [i] a person has control of one and [ii] [A] persons connected with him, or [B] he and persons connected with him, have control of the other	(b) a person ("A") has control of one company and persons connected with A have control of the other company,

If two persons ("X" and "Y") are associates, this is not needed because:

(1) the rights of X are attributed to Y,[89] so
(2) Y"controls" the company, so
(3) Y is connected with the company.

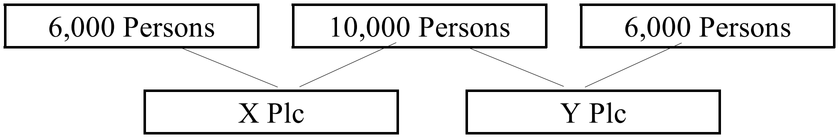
The rule is relevant in a case where two persons are connected but not associates.

[89] See 104.7 (Associate-attribution rule).

104.15.7 *Group controls 2 companies*

s. 286(5)(b) TCGA	**s. 993 (5) ITA/s.1122(2) CTA 2010**
A company is connected with another company...	A company is connected with another company if–
(b) if [i] a group of 2 or more persons has control of each company, and [ii] the groups either [A] consist of the same persons or [B] could be regarded as consisting of the same persons by treating (in one or more cases) a member of either group as replaced by a person with whom he is connected.	(d) a group of two or more persons has control of both companies and the groups either consist of the same persons or could be so regarded if (in one or more cases) a member of either group were replaced by a person with whom the member is connected.

The group may be vast and does not need any common purpose or identity. In *Kellogg Brown v HMRC*[90] two quoted companies each with over 16,000 shareholders were connected since there was sufficient overlap between the two groups.



X Plc and Y Plc are connected. The reader may think this a somewhat unimaginative construction of this head.

104.15.8 *Acting together to control*

s. 286(7) TCGA	**s. 993 (7) ITA/s.1122(2) CTA 2010**
Any 2 or more persons acting together to secure or exercise control of a company shall be treated in relation to that company as connected	In relation to a company, any two or more persons acting together to secure or exercise control of the company are connected with—
[i] with one another and	(a) one another, and
[ii] with any person acting on the directions of any of them to secure or exercise control of the company.	(b) any person acting on the directions of any of them to secure or exercise control of the company.

[90] *Kellogg Brown & Root Holdings (UK) v HMRC* [2010] EWCA Civ 118.

I refer to this as the **"acting-together rule"**. The CGT rule is narrower than the IT/CT rule as it only applies "in relation to the company".

The fact that persons are acting together, and so become connected with each other, may have the consequence that they become connected with the company.

For the purposes of discussion I abbreviate "secure or exercise control" to "control".

The CG Manual comments on the phrase "acting together to control":

> **CG14622 2 or more persons acting together to control** [Jul 2019]
> ... For this subsection to operate it is not sufficient for the persons to have control of the company, the persons do have to act in some way to control the company. However, for example, exercising control could mean refraining from voting in a particular way and so enabling another person to win a vote, as well as by actually voting.

In *Steele v EVC International* one issue was whether two joint shareholders were "acting together". The CoA said:[91]

> the mere coincidence of voting the same way at general meetings is insufficient. Likewise, combining together to carry a particular resolution would not normally be sufficient to constitute acting together to exercise control ...

So far so good. The court continued:

> ... the shareholders' agreement set out in great detail how EVC was to be constituted and administered. At all material times the agreement was in force and performed and observed by each of the shareholders. ... such performance and observation constituted the necessary "acting together".

The existence of a shareholder agreement does not show that the shareholders are acting together to control. It depends on the terms of the agreement. In *EVC*, most of the shareholder agreement seems to be indicative of each side protecting its interest acting separately! The agreement ensured that the company was deadlocked at board level as it was at general meeting level. However one important clause did suggest the shareholders were acting together:

[91] 69 TC 88 at p.127.

> EniChem and ICI should procure that not less than two-thirds of the profits of the joint venture available for dividend should be distributed to the shareholders and should procure that the shareholders vote accordingly to achieve this.

The issue of acting together has been discussed in the context of flat management companies, where there could be an ATED charge if the members of the company act together to exercise control.[92] CIOT express concern:

> This state of affairs might not be so unusual. Even if there is no formal agreement, there may be an understanding that decisions are only taken unanimously. While there are clearly cases where it would be possible to say that the shareholders of a flat management company, even if they are all directors, do not act in concert, there may be an agreement to that effect. In our members' experience, some management companies that act effectively as "cooperatives" will have put in place shareholder agreements that new flat owners have to sign up to as a condition of becoming shareholders that will produce the necessary nexus.[93]

The better view is that "acting together to control" requires more than acting collegiately, or even an agreement to act so far as possible with unanimity. If so it will be rare for the acting-together rule to apply to flat management companies. HMRC agree:

> we think that although this might be possible in the case of these types of companies, it must be unusual. You cite the case of *Steele v EVC International NV* (69 TC 88) which looked at the phrase "acting together". In that case the two shareholders entered into a shareholders agreement which continued to be recognised and implemented by the parties. The shareholders agreement was a very long document making the most extensive provision of the joint venture between two shareholders. It was found on those particular facts that the two were acting together.
>
> It seems unlikely that an ordinary memorandum and articles of association will constitute the shareholders "acting together". In fact, it would be unconscionable (?) because it would follow that all shareholders in a company would be connected. The cases it [the acting-together rule] would affect would be where there is a

[92] See 98.14.4 (Flat management company).

[93] CIOT, open letter to HMRC "Application of ATED to flat management companies" (2014).

> comprehensive shareholders agreement which would dictate how the company would be run.[94]

Of course the issue depends on the facts, and in particular on the terms of a shareholder agreement; but the fact that shareholders act collegiately should not be sufficient.

Foulser v MacDougall is another example of acting together, but the facts were unusual. An individual (in short) owned a company through a life policy wrapper. He arranged the sale of the company on behalf of its insurance company shareholder. The insurance company shareholder and the individual were held to be acting together to control.

A and B may be acting together even though A owns all the shares and B owns none. *Foulser* was such a case. The court said:

> there is no reason why the concept of two or more persons "acting together to … exercise control of a company" should, necessarily, be confined to cases where each of the persons acting together has less than a controlling shareholding, so that (absent some combination between them) none would be able to exercise control individually. It seems to me that the concept is sufficiently wide to include cases where one person (who has shareholder or voting control) agrees to exercise that control in accordance with the wishes of another.[95]

But in such a case the individual will also have general control under s.450(2); see 104.3.6 (De facto control).

The Takeover Code[96] has a comparable concept, "acting in concert", and guidance in the code may be relevant to the acting-together rule.

104.15.9 *Directors*

The CG Manual considers the position of directors:

> **CG14623. Directors of a company** [Jul 2019]
> Directors of a company are not necessarily connected persons in relation to transactions between themselves. Whether or not one of them controls the company or two or more together control the company, they are not connected persons unless they are 'relatives', see CG14580, or partners, see CG14610. TCGA92/S286 (7) makes two or more directors connected persons only in relation to transactions with the company.

[94] Open email from HMRC to CIOT (26 July 2015) (emphasis added).

[95] [2007] STC 973 at [42].

[96] *http://www.thetakeoverpanel.org.uk/the-code/download-code*

The last sentence means that if directors are shareholders and are acting together to control at shareholder level, they are connected persons only in relation to transactions with the company.

104.15.10 *Personal representatives*

The definition of connected person does not mention PRs (unlike the definition of "associates"). PRs cannot be connected with individuals or trustees.[97]

PRs may be connected with a company. They are "persons" so they are connected if (inter alia) they have control of the company or if they act together with others to exercise control.

104.16 Company connected with trust

s. 286(3)(3A) TCGA	**s.993(3) ITA/s.1122(6) CTA 2010**
A person, in his capacity as trustee of a settlement,[98] is connected with ...	A person, in the capacity as trustee of a settlement, is connected with–
(c) any body corporate[99] which is connected with that settlement, (3A) For the purpose of subsection (3) above a body corporate is connected with a settlement if- (a)[i] it is a close company (or only not a close company because it is not resident in the UK) and [ii] the participators[100] include the trustees of the settlement; or	(c) any close company whose participators include the trustees of the settlement, (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement,
(b) it is controlled (within the meaning of section 1124 of the Corporation Tax Act 2010 [control in strict sense]) by a	(e) any body corporate controlled (within the meaning of section 995) by a company within paragraph (c) or (d)

[97] The same conclusion was reached, though in a more roundabout way, in *Harris v HMRC* [2010] UKFTT 385 at [31] - [33].

[98] The phrase "A person, in his capacity as trustee of a settlement" is just a roundabout way of saying "a trustee", because a trustee is regarded as a distinct person.
A settlement here does not include a will trust: see 104.14.2 ("settlement/"trustee").

[99] It seems odd that the subsection refers to body corporate, rather than company. This is for historical reasons: the subsection originates from para 21 sch 7 FA 1965, which incorporated s.411(4) ITA 1952, in which the term used was "body corporate". But it does not matter, because unless the body corporate is a close company it does not fall within (3A). See 90.9 ("Body corporate").

[100] See 104.22 (Definitions of participator).

company falling within paragraph (a) above.

In TCGA, it is confusing that the drafter used the expression "connected with a settlement" since in that expression the term "connected" is not used in the normal CGT sense of connected persons. But it does not matter. The IT equivalent is better drafted.
Thus trustees are connected with a close company in which they have any interest, no matter how small, which is not the case for non-trustees.

104.17 Associated co/joint control

104.17.1 *"Associated company"*

There is no single or standard definition of associated company for tax purposes. Among others:

Definition	**Section**	**See para**
Close-co definition	s.449 CTA 2010	*Discussed here*
Small-profits definition	s.18E CTA 2010	*Discussed here*
Group relief definition		*Discussed elsewhere;* see 64.32.4

Strictly, one should not use the expression without specifying which definition applies; but the context may make that clear.

"Associated company" matters for the following topics:

Topic	**Applicable definition**	**See para**
Close company	Close-co definition	104.32; 104.34.3
s.86 TCGA	Close-co definition (tweaked)	60.4.3
Small profits rate	Small-profits definition	43.20.1
Group relief	Group relief definition	64.32.4

I consider the close-co and small-profits definitions together, as they are similar, so guidance on one sheds light on the other. The issue will arise most often in the context of the small profits rate.

Close-co definition: s.449 CTA 2010	**Small-profits definition: s.18E(4)**[101]
For the purposes of this Part [Part 10 CTA 2010, close companies], a	For the purposes of this Part, [Part 3A CTA 2010, small profits rate] a

[101] The definition of associated company was in s.25 CTA, which was repealed in 2014, but re-enacted in s.18E CTA 2010. Pre-2014 material which refers to associated companies is therefore relevant again today.

company is another's "associated company" at a particular time if, at that time or at any other time within the preceding 12 months— (a) one of them has control of the other, or (b) both are under the control of the same person or persons.	company is an associated company of another at any time when— (a) one of the two has control of the other, or (b) both are under the control of the same person or persons.

There are three possibilities which may make companies associated:
(1) One controls the other
(2) One person controls both
(3) The same group of persons controls both

I refer to (3) as **"joint control"**.

Associated companies will necessarily be connected with each other.

It is possible for connected companies not to be associated companies, though that will not often arise in practice. An example is if:
(1) A owns A Ltd
(2) B (who is connected with A but not an associate of A) owns B Ltd

A Ltd and B Ltd are connected with each other but not associated companies.

104.17.2 *Joint control*

Joint control matters for many purposes. The most important for this book are:
(1) Definitions of associated company
(2) Connected persons[102]

The CT Manual discusses the issue in the context of the small profits rate.

Section 450(5) CTA 2010 provides:

> If two or more persons together satisfy any of the conditions in subsections (2) and (3), they are treated as having control of C.

Suppose A and B (not associates) each hold 50% of a company. A does not have control, and B does not have control. A and B together do have control.

In *HMRC v UBS*:

[102] See 104.15.7 (Group controls 2 companies).

> The UT's view ... appears to have been that if DB controlled Investec in relation to the latter's voting at general meetings of Dark Blue, then 'the test of control in section 416(3) [ICTA = s.450(5) CTA 2010] was satisfied'. [Counsel for the taxpayer] submitted, and I agree, that section [450(5)] is irrelevant to our facts. Investec, by virtue of its holding in Dark Blue, was formally in control of Dark Blue within the meaning of section 416(1) [ICTA = 449 CTA 2010, definition of "associated company"]. The relevant question for our purposes, however, is whether Investec was, vis-à-vis its role as a Dark Blue shareholder, itself in the control of DB. If it was, the opening words of section 416(2) [ICTA = s.450(2) CTA 2010] are satisfied and DB and Dark Blue are associated companies. If it was not, those words are not satisfied. I do not understand what section [450(5)] is thought to have to do with it. It is contemplating a case in which, for example, DB and X Ltd together had relevant control of Dark Blue via their combined control of Investec. On no footing is that this case.[103]

The CT Manual provides:

> **CG60250 Control: In multiple** [Mar 2020]
> More than one person or one group of persons may 'control' a company. For example, one person may have the greater part of the voting power, while two people hold the greater part of the issued share capital and a group of three people are entitled to the greater part of the assets in a winding up. All three combinations of people can be taken to have control of the company at the same time.
> If say three persons, A, B and C, each hold one third of the shares in a company, and they are not connected[104] in any way which would allow the rights and powers of one to be attributed to another, then control is held by A and B, or B and C, or A and C but not A, B and C together. This is because in determining whether companies are 'associated companies' the focus is on 'minimum' controlling combinations, disregarding those containing superfluous members. Thus, a company controlled by unconnected persons A, B and C, but not by any one or two of them alone, is not regarded as associated with any company controlled by one of them alone (as in the first paragraph above) or by any two of them (as in the second paragraph). See CTM03730 for an example.
> However deciding on the 'minimum' controlling combination for any

[103] [2014] EWCA Civ 452 at [133].

[104] Author's footnote: The correct term is "associated".

of the tests set out at s.416(2)(a) to (d) CTA does not mean you have to establishing the smallest controlling combination of each company when determining whether companies are associated companies.

In his High Court judgment in *R v IRC ex p. Newfields Developments* (73 TC 532 at page 541B) Moses J said that [what is now s.450 CTA 2010] had to be exercised for the statutory purposes for which it was conferred:

> "In the context of Section 13 [ICTA, later s.24, 25 CTA 2010], that purpose is to ascertain whether, in the instant case, two companies are under the control of the same person pursuant to Section 13(4) [ICTA, later s.25(4) CTA 2010]. That is the statutory question. If it is possible to answer that in the affirmative, by exercising the power of attribution, in my judgment, that power must be exercised. Conversely, if that question, namely, are the two companies under the control of the same person, can only be answered in the affirmative by refraining from the exercise of the power, then the power should not be exercised".

So in the first sub-paragraph above, it may be able to determine that two companies are associated because the three people who together have an entitlement to the greater part of the assets in a winding up also together hold the greater part of the voting power in another company. In that case this group would control the company and not the single or two person combinations. The identical controlling combination does not need to be established by the same test in each company.

In *Ghelanis Superstore v HMRC*[105] two family companies were, I think, held as follows:

Shareholder	**Company X**		**Company Y**	
	Own	**Own + associates**	**Own**	**Own + associates**
Father	12.5%	50%[106]	9%	51%
Mother	12.5%	50%	8%	51%
Son 1 (S1)	12.5%	62.5%[107] [control]	17%	67% [control]
Wife of S1	12.5%	25%[108]	16%	33%
Son 2 (S2)	12.5%	62.5% [control]	17%	67% [control]
Wife of S2	12.5%	25%	16%	33%
Unconnected	25%	25%	17%	17%
Total	100%		100%	

[105] [2014] SFTD 835.

[106] The father's associates are the mother and the two sons.

[107] The son's associates are his wife, his brother, and his parents.

[108] The wife's associate is her husband.

The two companies are connected (and were associated companies) as they are both under the "control" (in the ultra-wide sense) of one person, namely S1 (and the same could be said of S2). If that is right, the tribunal (in which the parties were not represented by Counsel) reached the right result for the wrong reason.

Suppose the facts were those assumed by the Tribunal, in short:

Shareholder	**Company X**	**Company Y**
A[109]	25%	17%
B	25%	33%
C	25%	33%
D	25%	17%

Company X is controlled by any 3 of the 4 shareholders thus allowing the following combinations:

A+B+C	(75%)
A+B+D	(75%)
A+C+D	(75%)
B+C+D	(75%)

Company Y is controlled by any of the following combinations:

B + C	(66%)
A+B+D	(67%)
A+C+D	(67%)

On this basis:

(1) The companies were associated companies as one group (A + B + D) controlled both (the same could be said of the group A + C + D).

(2) The companies were also connected with each other, for that reason (along with others).

104.18 Connected: Partners

s. 286(4) TCGA	**s.993(4) ITA**	**s.1122(7)-(8) CTA 2010**
Except in relation to acquisitions or disposals of	A person who is a partner in a partnership is connected with—	(7) [identical to ITA]

[109] The tribunal treated married couples as one unit with no other associates; the fact that a parent and child are associates, and that siblings are associates, was overlooked.

partnership assets pursuant to bona fide commercial arrangements, a person is connected with		
[a] any person with whom he is in partnership,	(a) any partner in the partnership,	[identical to ITA]
[b] and with [i] the spouse or civil partner	(b) the spouse or civil partner of any individual who is a partner in the partnership, and	[identical to ITA]
[ii] or a relative of any individual with whom he is in partnership.	(c) a relative of any individual who is a partner in the partnership	[identical to ITA]
	But this subsection does not apply in relation to acquisitions or disposals of assets of the partnership pursuant to genuine commercial arrangements.	(8) But subsection (7) does not apply in relation to acquisitions or disposals of assets of the partnership pursuant to genuine commercial arrangements.

The CGT definition is narrower than the IT definition, as it contains the exception for disposals of partnership assets under commercial[110] arrangements.

A partner is connected with a company controlled by a partnership because the partner has "control" of the company[111] and a person is connected with a company which they "control".[112] See too 104.8 (Ultra-wide control: Critique).

104.19 Connected: Unit trust

A unit trust is not a settlement,[113] so the trustee connected person rules do not apply.

[110] See App 5.2.3 (Commercial).

[111] See 104.6.4 (Associates: Partners).

[112] See 104.15.3 (Person controls company).

[113] Because there is no element of bounty (gratuitous intent); see 104.14.2 ("settlement/"trustee").

TCGA	**s.994(2) ITA/s.1123(2) CTA 2010**
[No provision]	For the purposes of [s.993 ITA/s.11222 CTA 2010]– (a) a unit trust scheme is treated as if it were a company, and (b) the rights of the unit holders are treated as if they were shares in the company.

I refer to this as the **"deemed-company fiction"**. This applies the company connection person rules to a unit trust.

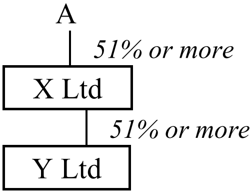
The deemed-company fiction generally applies for CGT (but it applies for all purposes, not just for the connected person rule).[114] But there is a gap: for CGT, the deemed-company fiction does not apply to a unit trust which is a transparent offshore fund.[115] So a unit trust of that kind is not connected with anybody.

104.20 Examples

The following examples address two questions:
(1) who has "control" (in the ultra-wide sense)
(2) who is connected

104.20.1 *Chain of companies*

Suppose a straightforward chain of companies:



Control
A controls X Ltd in every sense.
A controls Y Ltd in every sense. More specifically, A controls Y Ltd in the ultra-wide sense for two independent reasons:
(1) A has indirect control over the affairs of Y Ltd.
(2) A controls X Ltd so its rights are attributed to A.[116]

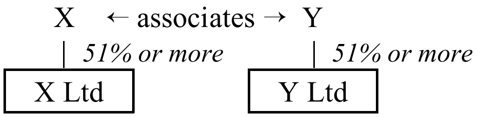
[114] See 69.8 (CGT: Deemed-company fiction).
[115] See 69.9 (Tax transparent funds).
[116] See 104.7 (Associate-attribution rule).

Connected persons
A is connected with X Ltd and with Y Ltd, because A has control of them.
X Ltd is connected with Y Ltd because X Ltd has control of it.

That is a commonsense result, but common sense does not take us far in this area of law.

104.20.2 *Two persons each own co*

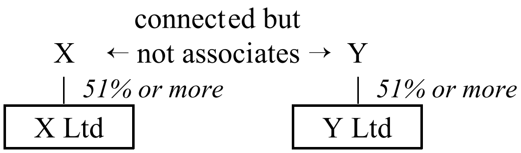
Suppose two individuals are associates and each own a company:



Control
X controls X Ltd in every sense.
X "controls" Y Ltd in the ultra-wide sense, because Y is an associate so the rights of Y are attributed to X.[117]

Connected persons
(1) X is connected with X Ltd and with Y Ltd (because X has "control").
(2) X Ltd is connected with Y Ltd (because one person has "control" of both companies).
(3) X is not necessarily connected with Y (because associates are not necessarily connected persons, though the definitions do overlap).

Suppose X and Y are connected individuals but not associates:



Control
X controls X Ltd in every sense.
X does not "control" Y Ltd.

Connected persons
(1) X is connected with X Ltd.
(2) It is considered that X is connected with Y Ltd (because a connected

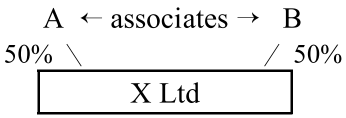
[117] See 104.7 (Associate-attribution rule).

person has control).[118]

(2) X Ltd is connected with Y Ltd (because X has control of X Ltd and a person connected with X has control of Y Ltd).[119]

104.20.3 *Two persons jointly own co*

Suppose individuals A and B are associates and each own 50% of X Ltd.

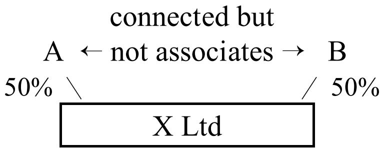


Control
A "controls" X Ltd in the ultra-wide sense, because B is an associate so the rights of B are attributed to A.[120]

Connected persons

(1) A is connected with X Ltd (because A has "control").
(2) A is not necessarily connected with B (because associates are not necessarily connected persons, though the definitions do overlap).

Suppose A and B are connected individuals but not associates: for instance, if they are acting together to control, so that they are treated in relation to that company as connected with one another:

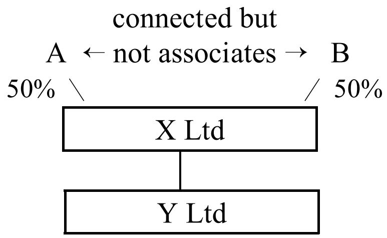


Control
A does not control X Ltd.

Connected person
A is connected with X Ltd (because A and a connected person together have control).[121]

Suppose X Ltd has a subsidiary thus:

[118] See 104.15.4 (Connected persons control co).
[119] See 104.15.6 (Connected persons control 2 companies).
[120] See 104.7 (Associate-attribution rule).
[121] See 104.15.4 (Connected persons control co).

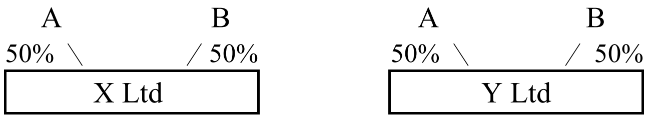


connected but
A ← not associates → B
50%
50%
X Ltd
Y Ltd

It is considered that A is connected with Y Ltd since A and persons connected with A (either B or X Ltd) together control Y Ltd.[122]

104.20.4 *Two persons jointly own 2 cos*

Suppose A and B jointly own two companies thus:



A
B
50%
50%
X Ltd
A
B
50%
50%
Y Ltd

X Ltd is connected with Y Ltd even if A and B are not connected and not associates, as the one group of persons (A and B) has control of each company.[123]

The same would apply if Y Ltd were owned by A and C, if C was connected with B.

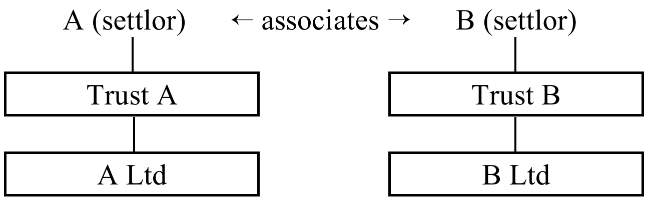
The same would apply if Y Ltd were owned by C and D, if C was connected with A, and D was connected with B.

104.20.5 *Two trusts each own company*

Suppose:

(1) A creates a trust (trust A) which owns a company (A Ltd)

(2) B (an associate of A) creates a trust (trust B) which owns a company (B Ltd), thus:



A (settlor)
← associates →
B (settlor)
Trust A
Trust B
A Ltd
B Ltd

[122] See 104.15.4 (Connected persons control co).

[123] See 104.15.7 (Group controls 2 companies).

Control

(1) A has "control" of A Ltd (the trustees of trust A are associates of A, because A is the settlor; so their rights are attributed to A)

(2) A has "control" of B Ltd (the trustees of trust B are associates of A; so their rights are attributed to A)

Connected person

(1) A is connected with Trust A (because A is the settlor)

(2) A is connected with A Ltd (because A "controls" A Ltd)

(3) A is connected with B Ltd (because A "controls" B Ltd)

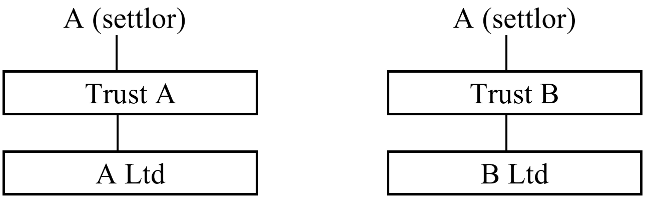
(4) A Ltd is connected with B Ltd (because A has "control" of both)

(5) A is not necessarily connected with B or trust B (because associates are not necessarily connected persons, though the definitions do overlap).

(6) The trustees of trust A are not connected with the trustees of trust B, but that does not stop their companies from being connected. Note that it is not necessarily possible for A Ltd or the trustees of trust A to know that A Ltd is connected with B Ltd.

What if A and B have died? If there is any person alive who is a relative of A and B, within the associates definition, that person has "control" of both companies and so A Ltd and B Ltd are still connected. But if A and B have no relatives (as defined) then the two companies are not in principle connected.

Suppose A is the settlor of both trusts, thus:



The analysis is as follows:

Control

(1) A has "control" of A Ltd and B Ltd.

Connected person

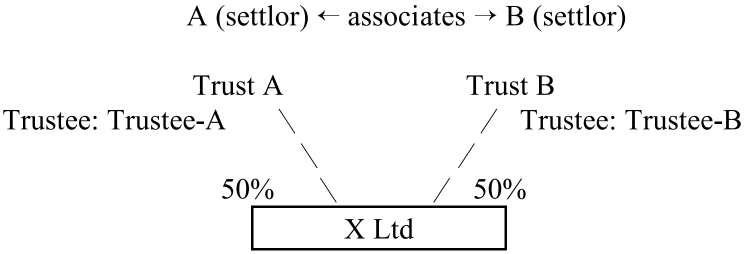
(1) A is connected with Trust A and with Trust B (because A is the settlor).

(2) A is connected with A Ltd and with B Ltd (because A has “control”).
(3) A Ltd is connected with B Ltd (because A has “control” of both).
(4) The trustees of trust A are not connected with the trustees of trust B but that does not stop their companies from being connected.

What if A has died? If there is any person alive who is a relative of A, within the associates definition, the relative has “control” of both companies and so A Ltd and B Ltd are still connected. But if A has no relatives (as defined) then the two companies are not in principle connected.

104.20.6 *Two trusts jointly own co*

Suppose individuals A and B are settlors of trusts which each own 50% of X Ltd. The trustees are Trustee-A and Trustee-B:



The analysis is as follows:

Control
(1) The trustees of trust A and trust B are associates of A.
(2) A has “control” of X Ltd (because the associates’ rights are attributed to A).

Connected person
(1) A is connected with Trust A (because A is the settlor).
(2) A is connected with X Ltd (because A “controls” X Ltd).
(3) A is not necessarily connected with B or trust B (because associates are not necessarily connected persons, though the definitions do overlap).

Suppose A is the settlor of both trusts. The analysis is as follows:

Control
(1) A has “control” of A Ltd and B Ltd.

Connected person

(1) A is connected with Trust A and with Trust B (because A is the settlor).

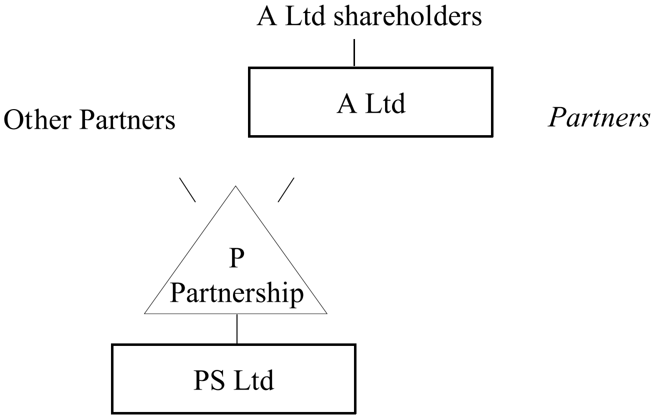
(2) A is connected with X Ltd (because A has "control").

(3) The trustees of trust A are not connected with the trustees of trust B but that does not stop A from being connected with X Ltd.

104.20.7 *Shareholders in partner co*

Suppose a partnership (P) has a corporate partner (A Ltd) and P holds an underlying company (PS Ltd).

Diagrammatically:



The partners in P are associates.

Each partner "controls" PS Ltd, because their associates' rights are attributed to them. So each partner is connected with PS Ltd.

PS Ltd is in principle close.[124]

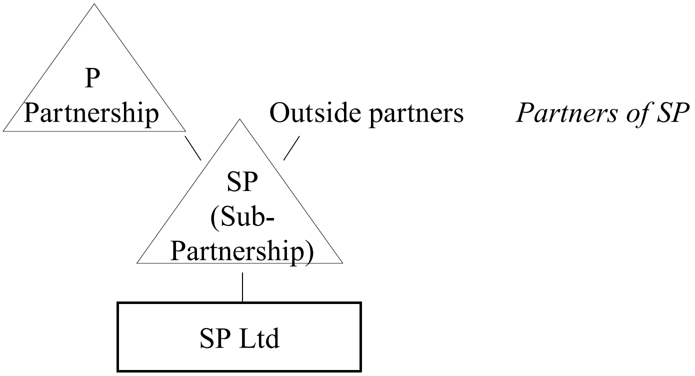
Are the A Ltd shareholders participators in PS Ltd, or connected with PS Ltd?

104.20.8 *Partnership is partner*

Suppose a partnership (P) is partner in a sub-partnership with outside investors. The sub-partnership has an company (SP Ltd)

Diagrammatically:

[124] Unless the partners are all open companies, see 104.31 (Open company exemption); but one individual or close company would lose the benefit of that exemption.



The position depends on whether the partners of P are regarded as partners in the sub-partnership; see 85.8 (Tiered partnership).

104.21 Why participators matter

The term "participator" is used frequently in tax legislation, and it is not practical to write a full list. For the purposes of this book, the term is important in particular in the following contexts:
(1) The definition of "relevant person" for the remittance basis
(2) s.3 TCGA (non-resident company gains attributed to participators)
(3) The definition of "close company"
(4) Ultra-wide sense "control" of a company
(5) Whether trustees are connected with a company[125]

104.22 Definitions of participator

There are two main definitions of participator in tax legislation (as well as numerous specialist definitions not considered here). The legislation does not have terminology to describe them, so I coin the following:

Definition	**Provision**	**See para**
Standard definition of participator	s.454 CTA 2010	104.23
Extended definition of participator	s.455(5) CTA 2010	104.24

104.23 Participator: Standard definition

104.23.1 *Participator: s.454 definition*

Section 454(1) CTA 2010 provides:

[125] See 104.16 (Company connected with trustees).

> For the purposes of this Part [Part 10 CTA 2010, close companies], "participator", in relation to a company, means a person having a share or interest in the capital or income of the company.

Section 454(2) CTA 2010 goes on to list five specific categories of participator:

> In particular, "participator" includes—
> (a) a person who possesses, or is entitled to acquire, share capital or voting rights in the company,
> (b) a loan creditor[126] of the company,
> (c) a person who possesses a right to receive or participate in
> [i] distributions[127] of the company or
> [ii] any amounts payable by the company (in cash or in kind) to loan creditors by way of premium on redemption,
> (d) a person who is entitled to acquire such a right as is mentioned in paragraph (c), and
> (e) a person who is entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for the person's benefit.

The wording is in part drawn from the definition of control in the ultra-wide sense, and some of the discussion on that is relevant here too.

Subsection (2) is so wide that it is hard to identify a case within subsection (1) which is not also within (2). A possible example is a beneficiary of a discretionary trust. The beneficiary does not fall within (2) but may arguably have an interest and so fall within (1).[128]

The definition is expressed to apply for the purposes of Part 10 CTA 2010, but it should be a taxes-act-wide definition. When the word participator is used in connection with close companies, this definition is generally incorporated and where there is no definition it may be implied.

The associate-attribution rule does not apply to determine who is a participator. Eg if A owns a company, then B (an associate of A) has "control" of it, in the ultra-wide sense, because A's rights are attributed to

[126] See 104.25 (Loan creditor).

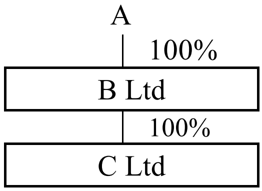
[127] Section 454(4) CTA 2010 tinkers with the standard definition of "distribution": "In subsection (2) 'distribution' is to be construed without regard to section 1000(2) (extended definition of distribution for close companies)."

[128] See 104.23.5 (Discretionary beneficiary).

B; but B is not a participator.

104.23.2 *Chain of wholly-owned co's*

Suppose a chain of wholly-owned companies:



B Ltd is obviously a participator in C Ltd. But A is also a participator in C Ltd, under:

(1) s.454(2)(a): A is entitled to acquire share capital in C Ltd
    (a) by putting B Ltd into liquidation or
    (b) by procuring B Ltd to make a dividend in specie of C Ltd shares;
(2) s.454(2)(e) CTA 2010: A is entitled to secure that income is applied for its benefit, by procuring dividends from C Ltd to B Ltd and from B Ltd to A.[129]

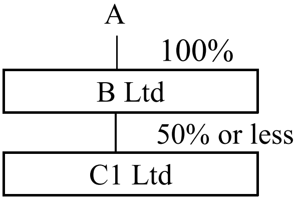
This is so wherever the companies are resident. The same applies to longer chains of 100% owned companies, and chains of less than 100% (as long as they confer control in the natural sense).

104.23.3 *Chain of partly-owned co's*

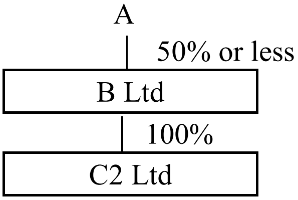
Suppose a chain of partly-owned companies which do not confer control (in the natural sense) such as:

[129] This view ("the wider view") is not universally held. On the alternative view ("the narrow view") , one company can sometimes be used to block a person from being a participator in another company. It comes down to the meaning of "entitled" to acquire/secure.
This does not much matter in practice, however, because other rules fill the gap, eg:
(1) Attribution rules which apportion gains, etc, to participators may allow further apportionment to participators of participators.
(2) Rules imposing charges on loans or benefits to participators also apply if the loan or benefit is provided to an associate of a participator.
In favour of the narrow view one might say that s.455(5) CTA 2010 (and perhaps other provisions) seem to be drafted on the assumption that the narrow view is correct; see 104.24 (Participator: extended definition).

Example 1



Example 2



A is obviously a participator in B Ltd.

In example 1, it is considered that A is a participator in C1 Ltd under s.454(2)(a): A is entitled to acquire share capital in C1 Ltd:

(a) by putting B Ltd into liquidation or
(b) by procuring B Ltd to make a dividend in specie of C1 Ltd shares.[130]

In example 2, it is considered that A is not a participator in C2 Ltd. It might be argued that A's rights as minority shareholder of B Ltd are such that A is a participator in C2 Ltd under s.454(2)(e) - ie that A has the right to secure that income or assets of C2 Ltd is applied for A's benefit. I refer to this as the wide view. But this is very doubtful and in practice it appears that HMRC do not take the wide view.[131] The extended definition of participator covers this case, if it applies.[132]

104.23.4 *Trustees and beneficiaries*

This section considers substantive trusts.[133]

Suppose trustees hold a shares in a company. The trustees are participators under s.454(1) CTA 2010. A person holding shares as trustee is not a participator in their personal capacity since trustees are (at least for IT/CGT/CT purposes) deemed to be a separate person.

Beneficiaries of a *Baker* trust, other than merely discretionary beneficiaries, are also participators under s.454(1) since they too have an interest in the trust property. Beneficiaries of a *Garland* trust do not have an interest in trust property. However they are participators under s.454(2)(a)(c)(d) by virtue of their right to compel administration of the trust.

[130] This view is not universally held; see above fn: the same arguments (more or less) apply. It comes down to the meaning of "entitled to acquire".

[131] See 104.24 (Participator: extended definition).

[132] See 104.24 (Participator: extended definition).

[133] For nominees, see the next section.

HMRC agree. The VC Manual provides:

> **VCM11100 the investor: meaning of 'associate'** [Mar 2022]
> **'Interested in'**
> For the purpose of d.[134], the words 'interested in' have a wide meaning. For example, where shares are held by trustees, the trustees, the beneficiaries and the remainderman (if any) of the trust are all interested in the shares. Where shares are held by trustees under a will for persons in succession, the life tenant and the remainderman, as well as the trustees, are interested in the shares. (See, in this connection, *CIR v Park Investments Ltd*, 43 TC 200, particularly the judgment of Danckwerts L J at page 225, *CIR v Tring Investments Ltd*, 22 TC 679, and *Alexander Drew and Sons Ltd v CIR*, 17 TC 140).

104.23.5 *Discretionary beneficiary*

What about beneficiaries of a discretionary trust? The question is whether they have an "interest" in the company. The general rule is that:

> A beneficiary under a discretionary trust has a right to be considered as a potential recipient of benefit by the trustees. That is an interest which equity will protect... But that right is not a proprietary interest in the assets held by the trustees, although it can be described as an interest of sorts.[135]

In short, the word "interest" is ambiguous and may or may not be taken to include the rights of a discretionary beneficiary: the context must decide

[134] The reference is so s.253(1)(c) ITA, which is equivalent to s.448(1)(d)(f) CTA 2010.

[135] *JSC Mezhdunarodniy Promyshlenniy Bank v Pugachev* [2015] EWCA Civ 139 at [13].
But contrast *Lewis v Tamplin* [2018] EWHC 777 (Ch) at [39]:

> "A beneficiary or object may have rights in relation to the trust fund which are good, not only against the trustees, but also against third parties, which thus may properly be called property rights, without necessarily having a vested interest in possession or in remainder in a particular income stream or capital asset. If the trustee of a discretionary trust in breach of trust gave away a trust asset to a third party, no-one can doubt that even a discretionary object of the trust in whose favour an appointment could still be made would have standing to sue the third party for the return of the asset to the trust fund."

If that is correct, a discretionary beneficiary has a right against third parties, which is the definition of a proprietary right. But I wonder if it is in fact correct.

the question.[136] The difficulty is that the concept of participator is used in many contexts, and the definition section itself does not offer much context. The textbook TCCR takes the view that beneficiaries of a discretionary trust are participators,[137] and for practical purposes it would be safest to proceed on the basis that this may well be correct.

104.23.6 *Nominees: Participators*

If N holds as nominee for B, then B is of course a participator.

The textbook TCCR states:

> A nominee shareholder is still a "participator".[138]

That is, the nominee is a participator in addition to the beneficiary.

The question is (in short) whether the words "share or interest" in the definition of participator include the interest of a bare nominee. The answer probably depends on the nature of the nomineeship.[139]

The question may arise, but not often:

(1) If the nominee is a participator, a loan from a UK resident close company to a nominee may be taxable;[140] but such loans are not likely to be made unless the nominee has some share or interest in the company in addition to holding as nominee (in which case the nominee is in any event a participator).

(2) If the nominee is a participator, that may make the company close; but only if (in short):
    (a) the participator can be said to exercise control, which depends on the facts; or
    (b) the participator can be said to possess share capital or voting rights, which again depends on the nature of the nomineeship.[141]

104.23.7 *Partnerships*

Suppose a partnership holds a company, thus:

[136] *Leedale v Lewis* 56 TC 501. The problem is fundamentally one of terminology. See *Comr of Stamp Duties v Livingston* [1965] AC 694 at p.712: "The terminology of our legal system has not produced a sufficient variety of words to represent the various meanings which can be conveyed by the word 'interest'."

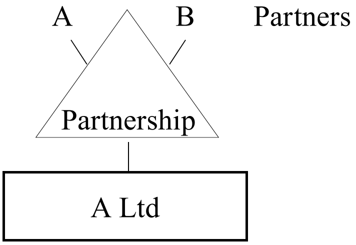
[137] *Taxation of Companies and Company Reconstructions* (looseleaf) para D1.2.4.

[138] *Taxation of Companies and Company Reconstructions* (looseleaf) para D1.1.8.

[139] See 104.5.3 (Position of nominee).

[140] See 40.8 (Loan to participators).

[141] See 104.5.3 (Position of nominee).



The partners are not participators under s.454(1) as they do not hold a share or interest in the company, at least if the partnership is a Scottish partnership, and arguably if it is an English partnership and one adopts the chose in action analysis. However that does not matter, because they are participators under s.454(2)(c)(d)(e) CTA 2010.

104.23.8 *PRs and beneficiaries of estate*

Suppose personal representatives hold shares in a company. The PRs are participators under s.454(1) CTA 2010.

A person holding shares as PR is not a participator in their private capacity for CGT purposes as for CGT the PRs are deemed to be a separate person. The Tribunal sensibly reached the same conclusion for IT purposes even in the absence of a provision expressly deeming PRs to be a separate person.[142]

Beneficiaries of an estate are not participators under s.454(1) since they do not have a legal or equitable "interest" (in the strict sense) in the assets of the estate. However they are participators under s.454(2)(a)(c)(d) by virtue of their right to compel administration of the estate.

The VC Manual provides:

> **VCM11100 the investor: meaning of 'associate'** [Mar 2022]
> **'Interested in'**
> ...The executors or administrators are interested in the assets of a deceased person's estate during the period of administration, (*Willingale v Islington Green Investment Co*, 48 TC 547). The beneficiaries should

[142] *Harris v HMRC* [2010] UKFTT 385 (TC) at [31]:
"There must be a distinction between a benefit being received by an individual beneficiary and a benefit being received, albeit by the same person, in a representative capacity.... Otherwise a different result would obtain depending on whether the residuary beneficiaries were the same persons as, or different persons from, the personal representatives."
However *Bibby v IRC* 29 TC 167 was not cited.

be regarded as interested in any assets of the estate from which they may benefit.

104.23.9 *Charge over shares*

Suppose a person has a charge over shares to secure a debt. The charge is an interest in the shares of the company, but is it an interest in the capital or income of the company? If not, a chargee is not necessarily a participator.

104.23.10 *Member of charitable co*

Is a member of a charitable company a participator in the company? Members do not fall within s.454(1) CTA 2010 (they have no share or interest in the capital or income of the company) and they do not fall within s.454(2)(b)-(e) (various financial rights). The question is whether a member falls within s.454(2)(a) on the ground that they possess "voting rights".

Members of a charitable company can of course vote, but they are curtailed in that the vote must be used for the charitable purposes of the company. The expression "voting *rights*" should be read in the context of the definition which refers to rights held beneficially as against the company. A member of a charitable company does not possess voting rights within the meaning of the provision. There are only voting duties.[143] So it is suggested that a member of a charitable company is not a participator.

A charitable company is close if (in short) it is under the control of 5 or fewer participators, so it would follow that a charitable company is not usually close.[144]

This view would reduce anomalies between charitable trusts and companies.

HMRC do not agree. The HMRC charity guidance note provides:

> Many charitable companies are close companies for tax purposes (that's under the control of 5 or fewer participators).[145]

[143] Note the corresponding company law provision, and the definition of control in the ultra-wide sense, refer to voting *power*, not voting *rights*; see 104.3.8 (Votes: para (b) control).

[144] A charitable company could be close if under the control of a loan creditor.

[145] HMRC, "Charities: detailed guidance notes" Annex III.8.1 *https://www.gov.uk/government/publications/charities-detailed-guidance-notes/a*

If that were right, then a charitable company would also be close if the directors (regardless of their number) were a majority of the members (and so "control" the company in the ultra-wide sense).

The issue is untested, and one should proceed on the cautious view that a member of a charitable company may be a participator, and a charitable company could be close. In practice it will not normally matter whether a charitable company is close or not.

104.23.11 *"Entitled to"*

"Entitled to" is used in:

(1) s.454(2)(a) and (d): entitled to acquire

(2) s.454(2)(3) entitled to secure

Section 454(3) CTA 2010 provides:

> For the purposes of subsection (2) [standard definition of participator[146]], a person is treated as entitled to do anything which the person—
>
> (a) is entitled to do at a future date, or
>
> (b) will at a future date be entitled to do.

In this definition, "to do" stands for the words which are used in s.454(2), ie, to acquire and to secure.

The CT Manual provides:

> **CTM60120. Entitled to acquire or secure** [Sep 2018]
>
> The words 'entitled to acquire' and 'entitled to secure' introduce the concept of a potential participator. So, for example, a person is a participator if, by means of a contractual right or by rights arising under a trust deed, they can:
>
> - require a shareholder to transfer shares to that person, or
> - secure the issue to that person of unissued capital of the company, or
> - secure that if the company makes a distribution or if a loan is redeemed by the company at a premium, that person has a share in the distribution or the premium. ...

Similarly, a person is a participator if by means of a contractual right or some other arrangement they can secure that income or assets of the company will be applied directly or indirectly for their benefit. See too

nnex-iii-approved-charitable-investments-and-loans

[146] See 104.23.1 (Participator: s.454 definition).

104.3.11 ("Entitled to acquire").

104.23.12 *Participator in non-resident co*

Where the term "close company" is extended to include a non-resident close company, the term "participator" is sometimes defined with a similarly extended meaning. For instance, s.102 IHTA:

> "participator", in relation to any company, means any person who is (or would be if the company were resident in the UK) a participator in relation to that company within the meaning given by section 454 of the Corporation Tax Act 2010...

But the underlined words are otiose, as the definition of "participator" is not limited to close companies. So it does not matter that in most cases where the term "close company" is extended to include non-resident close companies, the definition of "participator" is not extended in that way.

104.24 Participator: Extended definition

Occasionally the standard definition of participator is adopted with an extension. Section 454(6) CTA 2010 anticipates this:

> This section does not affect any provision of this Part requiring a participator in one company to be treated as being also a participator in another company.

Section 455(5) CTA 2010 provides:

> If a company (C) controls[147] another company (D), a participator in C is to be treated for the purposes of this section as being also a participator in D.

I refer to this as the **"extended definition of participator"**.

The extended definition is expressed to apply for s.455 (loans to participators), so it has to be repeated in 459(4) CTA 2010 (loan treated as made to participator). It is also incorporated by reference in a few other places, in particular:

Context	**See**
Definition of relevant person in ITA remittance basis	18.5.1
Benefit from close company to participator	40.9

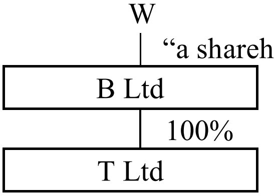
[147] The ultra-wide definition of "control" applies: see 104.3 (Control: Ultra-wide sense).

The CT Manual provides:

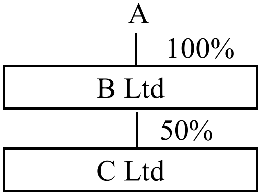
> **CTM60110 Participator: Extended meaning of** [Sep 2018]
> ... If, for example, Company B holds all the issued share capital of Company T and Company T makes a loan to W, a shareholder in Company B, that loan is within s.455 CTA 2010 [loans to participators] since W as well as being a participator in Company B is deemed also to be a participator in Company T.

Diagrammatically:

Example 1



Example 2



The HMRC example is example 1 above. Under the extended definition, W is a participator in T Ltd.[148]

What about example 2? A is a participator in C Ltd under the standard definition, and the extended definition is not needed.[149]

104.25 Loan creditor

104.25.1 *Why loan creditors matter*

The term "loan creditor" is used frequently in tax legislation, and it is not practical to write a full list. The term is important in the following contexts:

(1) A loan creditor is a participator.
(2) The expression is used in the definition of close company.

104.25.2 *"Loan creditor"*

This is a technical term. Section 453(1) CTA 2010 provides:

> For the purposes of this Part [Part 10 CTA 2010, close companies], "loan creditor", in relation to a company, means a creditor—

[148] This assumes that W (at least, if a minority shareholder) would not be a participator under the standard definition, ie what I call the wide view is not correct; that is why the extended definition of participator is needed. See 104.23.3 (Chain of partly owned co's).

[149] See 104.23.3 (Chain of partly owned co's).

> (a) in respect of any debt within subsection (2), or
> (b) in respect of any redeemable loan capital issued by the company.
>
> But this is subject to subsection (4).[150]

There are 3 categories of debts within para (a) and ss(2), so there are four altogether:

Category	**s.435(1)**	**s.435(2)**	**See para**
Debt for money/capital assets	(1)(a)	(2)(a)	104.25.3
Debt is right to income	(1)(a)	(2)(b)	104.25.4
Debt not for full consideration	(1)(a)	(2)(c)	104.25.5
Redeemable loan capital	(1)(b)	-	104.25.6

A creditor may be a participator even though they do not fall within these categories (and so are not a "loan creditor"). The CT Manual provides:

> **CTM60130. Loan creditor** [Dec 2021]
> It should be borne in mind that s.1000(1)(E) CTA 2010 ... provides that the interest etc on certain loans is a distribution. As regards such loans, the creditor is in any case a participator as he or she 'possesses a right to receive or participate in distributions of the company' (see [s.454(2)(c)]).[151]

104.25.3 *Debt for money/capital assets*

Section 453(2) CTA 2010 provides:

> (2) Debt is within this subsection if it is incurred by the company—
> (a) for any money borrowed or capital assets acquired by the company

This is the main category of loan creditor. Of course it does not cover all types of debt. The CT Manual provides:

> **CTM60130. Loan creditor** [Dec 2021]
> A person is not a participator merely because he or she is a normal trade creditor of the company.

A vendor under a hire purchase contract is not a loan creditor. The CT Manual provides:

> **CTM60130. Loan creditor** [Dec 2021]
> Payments to be made under a hire purchase agreement would not

[150] See 104.25.11 (Bank creditor).

[151] See 104.23.1 (Participator: s.454 definition).

> normally be regarded as part of the company's loan capital. This is because under the usual hire purchase agreement there will be no debt for capital assets acquired by the company. The terms of the typical agreement make it clear that the assets remain in the ownership of the hire company until the final instalment is paid. The payments not made in order to acquire a capital asset, but rather they are rent for the use of the asset.

104.25.4 *Debt is right to income*

Section 453(2) CTA 2010 provides:

> (2) Debt is within this subsection if it is incurred by the company ...
> (b) for any right to receive income created in favour of the company

The CT Manual provides:

> **CTM60130. Loan creditor** [Dec 2021]
> An example of a sum owing in the circumstances described in [s.453(2)(b)] is where a person contracts to make annual payments to the company, in return for a capital sum due at some later date. The capital sum is treated as loan capital of the company and the person will be a participator.

In practice this does not happen.

104.25.5 *Debt not for full consideration*

Section 453(2) CTA 2010 provides:

> (2) Debt is within this subsection if it is incurred by the company ...
> (c) for consideration the value of which to the company was (at the time when the debt was incurred) substantially less than the amount of the debt (including any premium on the debt).

If a company dividend is due and payable, but not paid, the shareholder has the benefit of a debt, but is not a loan creditor, as the debt is not incurred for consideration. The shareholder is a participator, so it will not usually matter whether they are also a loan creditor, but there are circumstances where it might matter.

If a company purchases its own shares, and the purchase price is due and payable but not paid, the vendor is a loan creditor. The debt is incurred for consideration (surrender of the shares) but the value to the company of the consideration is nil.

104.25.6 *Redeemable loan capital*

Section 453(1) CTA 2010 provides:

> "loan creditor", in relation to a company, means a creditor ...
> (b) in respect of any redeemable loan capital issued by the company.

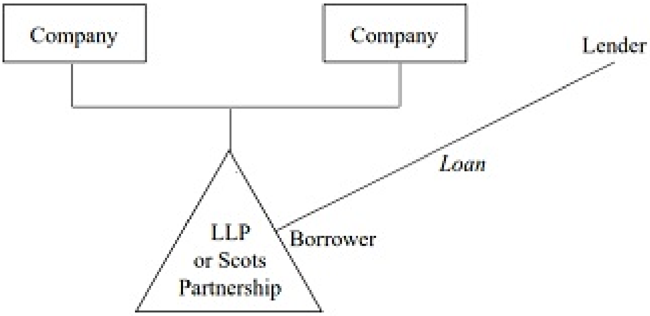
The CT Manual provides:

> **CTM60130. Loan creditor** [Dec 2021]
> As the normal debenture issued by a company is redeemable, debenture holders are participators.

A debenture is a debt, and the debenture holder is a loan creditor, under s.453(2)(a) (debenture issued for full consideration) or s.453(2)(c) (debenture issued for less than full consideration) or s.453(1)(b) (redeemable loan capital).

104.25.7 *Loan to corporate partnership*

Suppose a person lends to a LLP or Scots partnership which has corporate members, eg:



Is the lender a loan creditor of the companies? The question is whether the debt is incurred by the companies. As a matter of general law, it is not. But for tax purposes, it is suggested that one should treat the partnership as transparent, in the sense that the loan is regarded as made to the partners, and so the lender is a loan creditor of the companies.

104.25.8 *Promise to make loan*

In *Taylor v HMRC*:[152]

[152] [2010] UKFTT 115 (TC).

> [25] We think that the claimants are wrong in contending that the expression 'loan capital' covers amounts that [the borrower] company is entitled to receive as well as amounts actually received by the borrower company, ie Wrapit. The claimants say that principles of accrual accounting required by FRS 5 demands that Wrapit should recognise both the amounts actually paid by way of directors' loans and amounts that are committed to be paid later; these latter amounts should be recognised as assets or liabilities in its balance sheet.[153]
> [26] Focussing on Mr Taylor's commitment to provide a further £50,000 of loan to Wrapit at the end of 2004, it seems to us that at most Wrapit then had the benefit of his covenant to advance that amount. The covenant may have been enforceable but the £50,000 had not by then become 'loan capital' within the meaning of that expression in s 291B [ICTA 1988]. Subsection (7) defines loan capital as including 'any debt incurred by the company … for any money borrowed by the company'. At that time Wrapit had not borrowed the £50,000 and Mr Taylor had not lent it. There was no 'loan' of the £50,000 that could have ranked as such in law. We acknowledge that FRS5 might require the benefit of Mr Taylor's undertaking to lend £50,000 to be recognised in Wrapit's balance sheet ... But that does not make that amount 'loan capital' ...

As often happens, lawyers and accountants see things differently.

The question in *Taylor* was the amount of loan capital. It did not include the future borrowing. The entitled-to-acquire rule[154] apparently did not alter this conclusion.

104.25.9 *Series of loans*

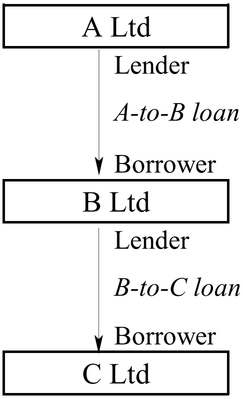
Suppose:

(1) A lends to B ("the A-to-B loan")
(2) B lends to C Ltd ("the B-to-C loan")

Diagrammatically:

[153] Para 20 FRS5 provided:
"Where a transaction results in an item that meets the definition of an asset or liability, that item should be recognised in the balance sheet if—
(a) there is sufficient evidence of the existence of the item (including, where appropriate, evidence that a future inflow or outflow of benefit will occur), and
(b) the item can be measured at a monetary amount with sufficient reliability."

[154] Section 291B(8) ICTA 1988 was equivalent to the current entitled-to-acquire rule; see 104.3.11 ("Entitled to acquire").



A is not a loan creditor of C Ltd.

Suppose in addition:

(3) The A-to-B loan is interest free, or on favourable terms, and
(4) B does not have the resources to pay the A-to-B loan, except by calling in the B-to-C loan

In those circumstances it may be said that A is a participator in C Ltd under 454(2)(e) CTA 2010 on the grounds that A will in the future be entitled to secure that assets of C Ltd will be applied indirectly for A's benefit.

104.25.10 *Interest in debt*

Section 453(3) CTA 2010 provides:

> A person who—
> (a) is not the creditor in respect of any debt or loan capital to which subsection (1) applies, but
> (b) has a beneficial interest in that debt or loan capital,
> is, to the extent of that interest, treated for the purposes of this Part as a loan creditor in respect of that debt or loan capital (but this is subject to subsection (4) [bank creditor]).

The words "to the extent of that interest" are not apt, since a person either is or is not a loan creditor. One cannot be a loan creditor "to an extent". But it does not matter.

104.25.11 *Bank creditor*

Section 453(4) CTA 2010 provides:

> A person carrying on a business of banking is not treated as a loan

> creditor in respect of any debt or loan capital incurred or issued by the company for money lent by the person to the company in the ordinary course of that business.

The CT Manual provides:

> **CTM60130. Loan creditor** [Dec 2021]
> *Banking business*
> ... There is no statutory definition of what constitutes carrying on a banking business (the definition of bank in s.1120 CTA 2010 ... does not apply to s.453 CTA 2010 ...) so we rely instead on the common characteristics of banking established in the (non-tax) case of *United Dominions Trust Ltd v Kirkwood* [1966] 2 QB 431 and endorsed in *Hafton Properties Ltd v McHugh* 59 TC 420...

104.26 Close company: Introduction

"Close" company is a concept used throughout tax legislation and it is not practical to write a full list. For the purposes of this book, the concept is important in particular in the definitions of relevant person (for remittances); connected person, and for the application of s.3 TCGA and IHT residential property rules.

A company which is not close is known as an "**open company**".

"Close company" is one of the most elaborately defined expressions in the taxes acts, and that is really saying something.

The definition in the CTA is for the purposes of the Corporation Tax Acts. This is extended to income tax and CGT:

s.989 ITA	**s.288(1) TCGA**
The following definitions apply for the purposes of the Income Tax Acts— "close company" is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act	In this Act, unless the context otherwise requires— "close company" shall be construed in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439) (subject to section 138ZA(6))[155]

An entity which is not a company[156], such as a partnership, cannot be a close company.

[155] It was unnecessary to flag up this niche exception; see 58.7 (Redomiciled (ex- UK) securities). But it does not matter.

[156] See 90.8 (Definition of "company").

As to whether a charitable company is close, see 104.23.10 (Member of charitable co).

104.27 Control test

Section 439(1) CTA 2010 provides:

> For the purposes of the Corporation Tax Acts, a "close company" is a company in relation to which condition A or B is met.

I refer to "**close co conditions A and B**"

Thus there are two tests of close, which I call:

(1) the control test
(2) the winding up test

104.27.1 *Condition A: Control test*

Section 439(2) CTA 2010 provides:

> Condition A is that the company is under the control—
> (a) of 5 or fewer participators[157]...

Control has the ultra-wide sense.

A company must in principle be close if:

(1) It has less than 10 shareholders , as 5 of them will have control.
(2) It has more than 10 shareholders, but less than 10 unassociated shareholders as 5 of them will have "control".

104.27.2 *Participator-directors*

Section 439(2) CTA 2010 provides:

> Condition A is that the company is under the control ...
> (b) of participators who are directors

This takes us to the idiosyncratic definition of director in s.452(1) CTA 2010:

> In this Part [Part 10 CTA 2010, close companies], "director", in relation to a company, includes—
> (a) a person occupying the position of director of the company, by whatever name called,
> (b) a person in accordance with whose directions or instructions the directors of the company are accustomed to act, and
> (c) a person within subsection (2).

[157] See 104.22 (Definitions of participator).

(1)(a)(b) are standard form; but (c) leads to a distinctly non-standard extension:

> (2) A person (P) is within this subsection if P—
> (a) is a manager of the company or otherwise concerned in the management of the company's trade or business, and
> (b) is—
> (i) the beneficial owner of, or
> (ii) directly or indirectly able to control,
> at least 20% of the ordinary share capital of the company.
>
> (3) For the purposes of subsection (2)(b), P is treated as owning or controlling (as the case may be) what any associate of P owns or controls.

Control of a company is a common concept in tax. But the issue here is control of shares. This means power to exercise rights of ownership, eg trustees have control of shares held in trust; shareholders of a parent company have (indirect) control of shares held by the company.

A company controlled by director-participators is a close company, even if the number of director-participators exceeds five. Directors have "control" of a company if (*inter alia*) they exercise direct or indirect control over the company's affairs. This is puzzling as (under standard articles)[158] company law directors manage the business of the company, and may exercise all the powers of the company. In one sense, directors always control their company. It cannot be that every company whose directors happen to be participators is made a close company under this part of the definition. The answer is that "control" here means control at shareholder level, the ability to pass an ordinary resolution in general meeting. Directors do not "control" a company, in the relevant sense, unless they control the company at that level.[159]

As to whether a foundation is a close company, see 90.14.4 (Foundation: IT/CGT trust).

104.27.3 *HMRC examples*

The CT Manual gives some examples:[160]

[158] Sch 1 para 3 Companies (Model Articles) Regulations 2008; (formerly Table A paragraph 70).

[159] See 104.3.4 (Shareholder level control).

[160] In these examples I omit internal Manual cross references and alter the formatting for increased clarity.

> **CTM60420 - Close companies: tests: examples** [Jun 2016]
> ... The examples refer to companies having shares that are not dealt in or quoted on a stock exchange.
> **Example 1** [attribution of trustee-associates]
> Company X has 1,000 issued shares of £1 held as below.
>
> | | |
> |---|---|
> | Trustees of A's settlement | 449 |
> | Mrs A (settlor) | 60 |
> | Ten other shareholders | 491 |
> | Total issued ordinary shares | 1,000 |
>
> The ten shareholders are not associated with each other or with A or Mrs A and no one of them holds more than 50 shares.
> The trustees of A's settlement are associates of Mrs A by virtue of CTA2010/S448 (1) (b) and (c) ... and their rights and powers may be attributed to Mrs A who therefore controls the company.
> Company X is therefore a close company.

This is correct, but it is not necessary to rely on the associate-attribution rule to reach the conclusion that the company is close. The company would be close even if Mrs A were not the settlor since it is under the control of two (less than five) persons.

The Manual continues:

> **CTM60420 - Close companies: tests: examples** [Jun 2016]
> ... **Example 2** [Ordinary shares & preference shares]
> The £1 issued shares in a trading company are owned as follows.
>
> | | |
> |---|---|
> | **Ordinary shares** | |
> | Directors | |
> | A | 4 |
> | B (cousin of A) | 4 |
> | Others: 12 individuals equally, none of whom is a nominee, associate, etc, of any other shareholder | 4,992 |
> | Total issued ordinary shares | 5,000 |
> | **5% preference shares** | |
> | A (see above) | 5,000 |
> | **Total nominal and issued capital** | 10,000 |
>
> There are no loan creditors ranking as participators or members.
> Control by reference to possession of the greater part of the issued share capital (s.450(3) CTA...).
> The company is a close company because A possesses more than half the issued capital.

This is straightforward.

The Manual continues:

> **CTM60420 - Close companies: tests: examples** [Jun 2016]
> ... **Example 3** [Associate-attribution rule]
> The issued ordinary shares in a trading company carry one vote each but the 'A' ordinary shares do not confer voting rights. The shareholders are as below.

	Ordinary	'A' ordinary
A	280	(non-voting)
Wife of A	100	
B (brother of A)	10	
Trustees of A's settlement	40	
Company X (controlled by A)	80	
Total	*510*	
Mrs C (daughter of B)	20	
10 other equal holdings	470	500
Total issued shares	1,000	500

> The shares carry equal rights to dividend. A's wife has made a loan of £20,000 to the company at 5% interest. There is no share premium account or other comparable account.
> Control by voting rights (CTA2010/S450 (3) ...
> The associates of A are:
> - his wife and his brother, (ICTA88/S417 (3)(a) and (4), ... and
> - the trustees of A's settlement, CTA2010/S448 (1) (b) and (c)...
> The rights and powers attributable to A are:
> - the rights and powers of his associates (CTA2010/S451 (4) to (6) ... and
> - the rights and powers of Company X (CTA2010/S451 (4) to (6)).
> As a total of 510 votes are thus possessed by A or attributable to him, the company is a close company controlled by one person.

This is correct, but it is not necessary to rely on the associates rule. The company would be close even if none of the shareholders were associates, since it is under the control of five participators. A's wife's loan is irrelevant and it is difficult to see why the example mentions it.

> Alternatively control by holding the greater part of the issued share capital, (s.450(3) CTA), - any eight of the other equal holdings will control the company by holding the greater part of the issued share capital.

I do not understand this comment. Perhaps the text of the example is corrupt.

CTM60420 - Close companies: tests: examples [Jun 2016]

... **Example 4**

The authorised and issued share capital of Company X is £1,000 in the form of 1,000 ordinary shares of £1 each, held as below.

A	200	20%
B	100	10%
C	50	5%
D	50	5%
E	40	4%
Company Y	99	9.9%
Other shareholders	461	46.1%
Total issued ordinary shares	1000	100%

A, B and C are directors.

The issued capital of Company Y, is £100 in the form of 100 ordinary shares of £1 each, held by:

F (son of E)	60
G	40
Total issued shares	100

The shareholders in Company X, other than Company Y, are all individuals and none are related or otherwise associated. No 'other shareholder' holds more than 50 shares.

The HMRC analysis is as follows:

Control - the rights in the shares held by Company Y in Company X may be attributed to F who controls that company (CTA2010/S451 (4) to (6) ...

F is an associate of E but the rights attributed to F cannot be further attributed to E (CTA2010/S451 (4) to (6)).

No group of five participators or fewer can control Company X, nor do the director/participators control, and nor would the winding up test be of assistance here.

Company X is not a close company.

CTM60420 - Close companies: tests: examples [Jun 2016]

... **Example 5**

The facts are the same as in Example 4 except that F is the holder of one share in Company X.

Control rights can be attributed to F as below.

Shares held in own right	1
Shares held by E (an associate)	40
Shares held by Company Y (controlled by F)	99
	140

> Thus A, B, C, D and F hold (or have attributed to them) the rights in 540 shares and control the company.
> Company X is a close company.

This example neatly illustrates the arbitrary border of the close/open distinction. At the margin, there is obviously some scope for planning.

> **CTM60420 - Close companies: tests: examples** [Jun 2016]
> ... **Example 6** [Entitlement to acquire shares]
> Company X has authorised capital of £5,000 in £1 ordinary shares of which £3,000 is issued as below.
>
> | | |
> |---|---|
> | A | 150 |
> | B | 150 |
> | C | 150 |
> | D | 250 |
> | E | 250 |
> | F | 250 |
> | 20 other shareholders (no one holder having over 100 shares) | 1800 |
> | Total issued ordinary shares | 3000 |
>
> The 20 other shareholders are individuals and none of the shareholders is an associate of any other. A, B and C are the directors. They each enter into a service agreement providing
> [1] that they are to remain directors for five years from 1 January 1992,[161] and
> [2] that on 31 December 1996, they shall each have the right to [subscribe for][162] 500 £1 shares in the company at par.
> Control - A, B and C each exercises or is entitled to acquire rights in 650 shares (CTA2010/S450 (3) ... and CTA2010/S451 (2) ...- CTM60220).
> Thus A, B, C, D and E (or A, B, C, D and F, or A, B, C, E and F) together constitute a group which is 'able to exercise or is entitled to acquire, control' of the company (with 2,450 shares out of 4,500, i.e. the 3,000 issued plus the 1,500 to be issued to the directors).
> The company is a close company from 1 January 1992.

104.28 Close co winding-up test

Condition B provides for a case where the participators have rights which do not confer control. I refer to this as the close co winding-up test.

[161] The entitlement to remain a director is not relevant.

[162] The Manual says "purchase"; it is later clarified that a share issue is contemplated.

It is helpful to read this side by side with the similar test for para (d) control (assets):

Close co winding-up test s.439(3) CTA 2010	**Control test para (d) (assets) s.450(3)(d) CTA 2010**
Condition B is that 5 or fewer participators, or participators who are directors, together possess or are entitled to acquire—	... P is treated as having control of C if P possesses or is entitled to acquire—
(a) such rights as would, in the event of the winding up of the company ("the relevant company") on the basis set out in section 440, entitle them to receive	(d) such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive
the greater part of the assets of the relevant company which would then be available for distribution among the participators, or	the greater part of the assets of C which would then be available for distribution among the participators
(b) such rights as would, in that event, so entitle them if there were disregarded any rights which any of them or any other person has as a loan creditor (in relation to the relevant company or any other company).	

The word "distribution" clearly includes repayment of a loan creditor.

Para (a) applies the test is applied on the basis that loan creditors are included as participators and para (b) on the basis that they are disregarded. The company is close if it satisfies the test on either basis.

104.28.1 *s.440 winding-up basis*

Section 440 CTA 2010 sets out the basis of the notional winding-up for the close co winding-up test:

> (1) This section applies for the purposes of section 439(3).
> (2) In the notional winding up of the relevant company, the part of the assets available for distribution among the participators which any person is entitled to receive is the aggregate of—
> (a) any part of those assets which the person would be entitled to

> receive in the event of the winding up of the relevant company, and
>
> (b) any part of those assets which the person would be entitled to receive if—
>
> (i) any other company which is a participator in the relevant company and is entitled to receive any assets in the notional winding up were also wound up on the basis set out in this section, and
>
> (ii) the part of the assets of the relevant company to which the other company is entitled were distributed among the participators in the other company in proportion to their respective entitlement to the assets of the other company available for distribution among the participators.
>
> (3) In the application of subsection (2)—
>
> (a) to the notional winding up of the other company mentioned in paragraph (b) of that subsection, and
>
> (b) to any further notional winding up required by that paragraph (or by any further application of that paragraph),
>
> references to "the relevant company" are to be read as references to the company concerned.

In short, the effect is to look through participators which are companies.

Section 441 CTA 2010 tweaks the definition of participator for this purpose. Section 441(1) CTA 2010 provides:

> The following provisions apply for the purpose of determining whether under subsection (3) of section 439
>
> [a] five or fewer participators, or
>
> [b] participators who are directors,
>
> together possess or are entitled to acquire rights such as are mentioned in paragraph (a) or (b) of that subsection.

That is, s.441 applies for all purposes of the close co winding-up test.

Section 441(2) CTA 2010 provides:

> A person is to be treated as a participator in or director of the relevant company if the person is a participator in or director of any other company which would be entitled to receive assets in the notional winding up of the relevant company on the basis set out in section 440.

This is comparable to the extended definition of participator.[163]

[163] See 104.24 (Participator: extended definition).

Section 441 CTA 2010 continues:

> (3) No account is to be taken of a participator which is a company unless the company possesses or is entitled to acquire the rights in a fiduciary or representative capacity.
> (4) But subsection (3) does not apply for the purposes of section 440.

This makes sense because for this test one looks through companies to non corporate shareholders.

104.28.2 *HMRC example*

The CT Manual provides an example of the close co winding-up test:

> **CTM60420 - Close companies: tests: examples** [Jun 2016]
> ... **Example 7** (Winding up test)
> The authorised and issued capital of an investment company is £33,000 and is owned equally by eleven individuals who are not associated.
> The loan creditors are:

A (director and shareholder)	£35,000
B (not a shareholder)	£13,500

> Neither A nor B is a bank. B is not an associate of a [participator].[164]
> In a winding up, the value of the net assets distributable among members, including loan creditors, would be £120,000 as below.

Deposits with local authorities	£30,000
Market value of quoted investments (representing the remainder of the assets)	£110,000
Total assets	£140,000
Deduct sundry creditors	
Management expenses	£300
Bank overdraft	£19,700
Total deductions	£20,000
Value of net assets	£120,000

The HMRC analysis is as follows:

> Control - the company cannot be shown to be controlled by five or fewer participators under CTA2010/S450 (3) (a) to (c)...

That is, the company is not close under the usual condition A test (control by 5 participators).

[164] The Manual says "director" but I think participator is the right word.

In a liquidation, the assets would, however, be distributed as below.

A as loan creditor	£35,000
B loan creditor	£13,500
Shareholders (£6,500 each)	£71,500
Value of net assets	£120,000

More than half of this sum would be received by three persons, that is:

A (£35,000 plus £6,500)	£41,500
B	£13,500
Any shareholder other than A	£6,500
Distribution to three persons	£61,500

The company is therefore a close company by reference to s.450(3)(d) CTA 2010[165] ... because the inclusion of loan creditors as participators shows that it is controlled by three participators.

104.29 Non-close companies

104.29.1 *Non-resident close company*

Section 442 CTA 2010 provides:

> A company is not to be treated as a close company if—
> (a) it is non-UK resident

A note on terminology. The rule that only a UK resident company counts as a close company is often disapplied. A variety of drafting techniques are used to achieve this:

(1) Refer to a company "which would be a close company if it were resident in the UK"[166]

(2) Extend (or redefine) the term "close company", to include a non-resident close company[167]

(3) Adopt the statutory definition "with the omission of section 442(a)"

(4) Use a separate term, defined to mean a close or a non-resident close company. The following have been used:

Term	**See**
Qualifying company	61.10.1; 99.40.1
Closely-held company	49.6.3

[165] See 104.3.10 (Assets: para (d) control).

[166] Eg s.809M(2)(f) ITA; see 18.5 (Relevant person: Companies).

[167] For examples, see 30.14.2 (Condition B: Close company); 55.2.1 ("Close company"); 81.1.1 ("Close company").

Thus there is no consistent terminology across tax legislation. Perhaps that is too much to expect. As long as the reader is aware, it does not matter much. In this book I refer to "**a non-resident close company**" which I think is the clearest term.

104.29.2 *Co-operative/community benefit/building society*

For completeness: s.442 CTA 2010 provides:

> A company is not to be treated as a close company if ...
> (b) it is a registered society, or
> (c) it is a building society.

104.30 State-controlled company

Section 443 CTA 2010 provides:

> (1) A company is not to be treated as a close company as a result of section 439(2) if it is controlled by or on behalf of the Crown.
> (2) A company is "controlled by or on behalf of the Crown", for the purposes of this section, if it is under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person.
> (3) But a company is not controlled by or on behalf of the Crown, for the purposes of this section, if it is a close company as a result of being under the control of persons acting independently of the Crown.

EN CTA 2010 provides:

> 1340. [The words *as a result of section 439(2)*] leave it open for a company controlled by or on behalf of the Crown to be a close company if condition B in section 439(3) is met.[168] ...
> 1342. In short, section 414(1)(c) of ICTA is a qualified exception to [close company condition A, control of five or fewer participators] but not an exception to [condition B, close co winding up test].

So strictly the exemption for crown controlled companies is limited. If the crown own all the shares, the company is close under close company condition B. The exemption would only apply if the crown held voting shares only. That must be rare.

It is not at all clear that that was in fact the pre-rewrite position, though if so it was more likely a mistake of the drafting than a deliberate decision.

[168] See 104.28 (Close co winding-up test).

Perhaps it will not often matter, but the CT Manual suggests that HMRC do not take that point:

> **CTM60270 Control: By the Crown** [Sep 2018]
> A company is to be treated as controlled by or on behalf of the Crown (and therefore not a close company) if, and only if, it is by any of the control tests under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person. If, however, it can be shown that under some other control test:
> - five or fewer participators, or
> - participators who are directors,
>
> control the company and those participators (or director/participators) act independently of the Crown, the company is a close company.
> The Crown for this purpose includes any Minister, Government Department or other person acting on behalf of the Crown.

104.30.1 *Foreign government/local authorities*

The next paragraph extends the exemption, though on what authority I do not know:

> **60280. Control: Overseas governments and local authorities** [Jun 2016]
> A company should not be treated as a close company if the only persons who can be taken to have control of that company are any of the following:
> - Overseas governments.
> - The Crown Agents for Overseas Governments and Administrations.
> - Local authorities or local authority associations exempt from tax under Section 984 CTA 2010 ...

This seems a somewhat loose reading of the statutory expression "the Crown"; but the outcome is sensible.

104.30.2 *State/open company control*

CT Manual provides:

> **CTM60280. Control: Overseas governments and local authorities** [Jun 2016]
> ... Nor should a company be treated as a close company if the only persons who can be taken to have control of that company are any of the above together with:
> - a company or companies resident in the UK which are not close, or

- an overseas company or companies which, if resident in the UK, would not be close.

104.31 Open company exemption

Section 444(1) CTA 2010 provides:

> A company is not to be treated as a close company if condition A or B is met.

I refer to **"open company conditions A and B"**.

Section 444(2) CTA 2010 concerns the main close co definition (control by 5 or fewer participators):

> (2) Condition A is that the company—
> (a) is controlled by one or more companies none of which is a close company, and
> (b) cannot be treated as a close company except by taking, as one of the 5 or fewer participators requisite for its being so treated, a company which is not a close company.
>
> (4) References in subsections (2) and (3) to a close company include a company which, if UK resident, would be a close company.

Section 444(3) CTA 2010 concerns the close co winding-up test:

> Condition B is that the company—
> (a) would not be a close company were it not for
> [i] paragraph (a) of section 439(3) [winding up test] or
> [ii] paragraph (d) of section 450(3) [winding up test], and
> (b) would not be a close company if the references in those paragraphs to participators did not include loan creditors which are companies other than close companies.

The CT Manual provides:

> **CTM60300 Open company loan creditor** [Sep 2018]
> [The Manual summarises s.444 (3) and continues:]
> If the open company loan creditor also holds shares in the company, it will remain a participator in respect of that holding and any amount which would be distributed to it in respect of those shares should be taken into account for the purposes of s.450(3)(d) CTA2010 and s.439(3)(a) CTA2010.

The CT Manual provides two straightforward examples of the open company exemption:

> **CTM60420 Close companies: tests: examples** [Jun 2016]
> ... **Example 8**
> The issued ordinary capital of a trading company (other issued capital having no voting rights) is held as below.

Company A (not a close company)	280
Company B (a close company)	270
Company C (not a close company)	230
D (director)	40
E (director)	30
F (an individual)	30
20 others	120
Total issued ordinary shares	1,000

> Control - the requirements of CTA2010/S444 (2)(a) ... are regarded as satisfied because, upon one combination of shareholdings, control is in the hands of Company A and Company C, even though by other combinations a controlling group which includes only one of those companies may be established.
> The company is not a close company if the requirements of CTA2010/S444 (2) (b) ... are also satisfied, that is, if none of the control tests enables control by five or fewer participators to be established without including a non-close company among those participators, and the company is not controlled by its directors and cannot be shown to be close on the or winding up test (CTM60320) without including a non-close company among the five or fewer participators (see, however, Example 9 below).

In short, the company is not close unless one adds to the facts, as in example 9:

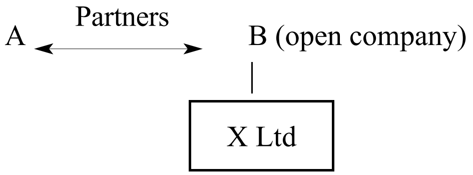
> **Example 9**
> The ordinary shares are held as in Example 8.
> G, an individual, holds redeemable loan stock and would receive in a winding-up more than half of the assets available for distribution among the participators.
> Control - as G is in control of the company by reference to s.450(3)(d) CTA 2010[169] ... the requirements of CTA2010/S444 (3) ... are not met and, irrespective of the control by open companies, the company is a close company.

More analytically:

[169] See 104.3.10 (Assets: para (d) control).

(1) Open company condition A is not met:
    (a) The requirement in s.444(2)(a) is met (control by open companies)
    (b) But the requirement in s.444(2)(b) is not met, because G "controls" the company
(2) Open company condition B is not met, because neither of the requirements in s.444(3) are met.

Suppose:



A "controls" X Ltd (because B's rights are attributed to A).
X Ltd is not close, as open company condition A is satisfied.

Now suppose A (not an open company) were either a loan creditor of X Ltd, or held say a 1% shareholding in X Ltd. A is now a participator in X Ltd. Construed strictly, X Ltd is now close: the open company exemption does not apply, as X Ltd is "controlled" by A. But that is a strange result, and one might construe the open company exemption purposively, so that it applies in this case to prevent the attribution.

104.32 Pension schemes

Section 445 CTA 2010 provides:

> (1) If shares in a company ("C") are held on trust for a registered pension scheme, the persons holding the shares are to be treated, for the purposes of section 444(2) and (3)—
> (a) as the beneficial owners of the shares, and
> (b) in that capacity, as a company which is not a close company.
> (2) But subsection (1) does not apply if the scheme is established wholly or mainly for the benefit of—
> (a) directors, employees, past directors or past employees of a company within subsection (3), or
> (b) dependants of an individual within paragraph (a).
> (3) The companies within this subsection are—
> (a) C,

> (b) an associated company[170] of C,
> (c) a company which is under the control of—
> (i) a director of C,
> (ii) an associate of a director of C, or
> (iii) two or more persons each of whom is such a director or associate, and
> (d) a close company.

The CT Manual summarises this and provides:

> **CTM60290 Control: By another company** [Sep 2018]
> The broad effect of the above conditions is that the fund or scheme must be one established for the benefit of employees, etc, of an unrelated company which is not close. A joint fund for the benefit of employees of two or more companies is not disqualified if the majority of the beneficiaries are or were employees of qualifying companies or are dependants of such employees.

104.33 Quoted company exemption

Section 446(1) CTA 2010 provides:

> A company is not to be treated as a close company at a particular time if—
> (a) shares in the company carrying at least 35% of the voting power in the company have been allotted unconditionally to, or acquired unconditionally by, and are at that time beneficially held by, the public, and
> (b) [i] any such shares have within the preceding 12 months been the subject of dealings on a recognised stock exchange,[171] and
> [ii] the shares have within those 12 months been listed on such an exchange.

104.34 Principal members: Vote cap

Section 446 CTA 2010 provides:

> (2) But subsection (1) does not apply to a company at any time when the total percentage of the voting power in the company possessed by all of the company's principal members exceeds 85%.
> (3) For the purposes of this section, a person is a principal member of a

[170] See 104.17.1 ("Associated company").

[171] See App 2.18 (Listed/Recognised stock exchange).

> company if the person possesses a percentage of the voting power in the company of more than 5% (but see subsection (4)).
> (4) If there are more than 5 persons within subsection (3), a person is a principal member of the company only if—
> (a) the person is one of the 5 persons who possess the greatest percentages, or
> (b) in a case where there are no such 5 persons because two or more persons possess equal percentages of the voting power in the company, the person is one of the 6 or more persons (including those two or more who possess equal percentages) who possess the greatest percentages.

Section 446(5) CTA 2010 applies the usual nominee and associate-attribution rules:[172]

> In determining for the purposes of this section the voting power which a person possesses, there is to be attributed to the person any voting power which would be attributed to the person if section 451(3) to (6) applied for the purposes of this section.

104.34.1 *"Shares"*

Section 446(6) CTA 2010 provides:

> In this section "shares"—
> (a) include stock, but
> (b) do not include shares entitled to a fixed rate of dividend, whether with or without a further right to participate in profits.

The CT Manual provides:

> **CTM60310 35% or more voting power held by public** [Sep 2018]
> ... The total voting power for the purpose of [s.446(1) and (2)] is that of all the issued shares (or stock) including that of shares, etc, entitled to a fixed dividend, etc, which are excluded under [s.446(1)] in determining the voting power in the hands of the public. ...

104.34.2 *"Held by public"*

Section 447 CTA 2010 defines "beneficially held by the public":

> (1) For the purposes of section 446, shares in a company (C) are beneficially held by the public if they are—
> (a) beneficially held by a UK resident company which is not a close

[172] See 104.5.1 (Nominee-attribution rule); 104.7 (Associate-attribution rule).

> company, or by a non-UK resident company which would not be a close company if it were UK resident,
>
> (b) held on trust for a registered pension scheme, or
>
> (c) not comprised in a principal member's holding...
>
> (4) The reference in section 446(1) to shares which have been allotted unconditionally to, or acquired unconditionally by, the public is to be read in accordance with subsections (1) to (3).
>
> (5) For the purposes of subsection (1), a principal member's holding consists of the shares which carry the voting power possessed by him.
>
> (6) The reference in subsection (2) to shares held by any person includes shares the rights or powers attached to which would be attributed to the person if section 451(3) applied for the purposes of that subsection.[173]
>
> (7) Subsections (3) to (5) of section 446 (meaning of "principal member" and determination of voting power possessed) apply for the purposes of this section as they apply for the purposes of that section.
>
> (8) In this section, "shares" includes stock.

The CT Manual provides:

> **CTM60310 35% or more voting power held by public** [Sep 2018]
> Where the company holding the shares loses its beneficial interest on commencement of winding-up (see CTM36125) you should not normally contend that a company which was not close before the commencement of that winding-up, thereby becomes a close company.
> Shares beneficially held by an authorised unit trust (see CTM48200 onwards) are to be regarded as beneficially held by a company which is not a close company unless five or fewer persons hold more than half of the units issued by the trust. In determining the number of units held by a person, there should be attributed to him or her any units held by his or her associates (see CTM60150) or by his or her nominees or by any company (or companies) of which he/she has, or he/she and his associates have, control...
> For the purpose of [s.447(1)], shares held in accordance with [s.447(1)(a) or (b)] are deemed to be beneficially held by the public (provided that they are not [otherwise] excluded) even if they are comprised in a principal member's holding.

104.34.3 *Not "held by public"*

Section 447 CTA 2010 provides:

[173] See 104.5.1 (Nominee-attribution rule); the associate-attribution rule is not applied here.

> (2) But shares are not beneficially held by the public if they are held—
>
> (a) by a director of C,
>
> (b) by an associate of such a director,
>
> (c) by a company which is under the control of one or more persons each of whom is such a director or associate,
>
> (d) by an associated company of C, or

The CT Manual provides:

> **CTM60310 35% or more voting power held by public** [Sep 2018] Where a company in [s.447(2)(c)(d)] above loses its beneficial interest in the shares, etc, on commencement of winding-up (see CTM36125) you should not normally accept that a company which was close before the commencement of that winding-up, thereby ceases to be close. ...

Section 447 CTA 2010 continues:

> (2) But shares are not beneficially held by the public if they are held ...
>
> (e) as part of a fund the capital or income of which is applicable or applied wholly or mainly for the benefit of any of individuals within subsection (3).
>
> (3) Those individuals are—
>
> (a) employees, directors, past employees or past directors of C or of any company within subsection (2)(c) or (d), and
>
> (b) dependants of any individuals within paragraph (a)...
>
> (6) The reference in subsection (2) to shares held by any person includes shares the rights or powers attached to which would be attributed to the person if section 451(3) applied for the purposes of that subsection.[174]

[174] See 104.5.1 (Nominee-attribution rule); the associate-attribution rule is not applied here.

CHAPTER ONE HUNDRED AND FIVE

PARTICIPATION & % INVESTMENT TESTS

105.1 Participation
105.2 Direct participation
105.2.1 Application of s.157
105.2.2 Direct participation test
105.3 Indirect participation tests
105.4 Indirect participation: s.159
105.4.1 Application of s.159
105.4.2 Indirect participation test
105.4.3 Attributed rights
105.4.4 Future rights
105.4.5 Beneficial/fiduciary rights
105.4.6 Connected person's rights
105.4.7 Indirectly connected rights
105.4.8 Joint powers
105.5 Major participant: s.160
105.5.1 Application of s.160
105.5.2 Major participant test
105.5.3 "Major participant"
105.5.4 40% test
105.5.5 Attributing rights for 40% test
105.6 s.161 test: s.148/175 financing
105.7 s.162 test: Other financing
105.8 % investment tests
105.8.1 The definition(s)
105.8.2 Which percentage?
105.8.3 "Equity in C"
105.8.4 Equity holder
105.8.5 "Receipt"
105.8.6 Commercial loan exemption
105.8.7 Connected persons
105.8.8 Acting together

105.1 Participation

This term is elaborately defined in s.159-162 TIOPA. The concept (subject to modifications here or there) is used in a number of contexts:

Topic	**Provision**	**See para**
Transfer pricing	Part 4 TIOPA	25.8
Royalty DTA override	s.917A ITA	32.13
Offshore receipts from IP	s.608U ITTOIA	32.33.2
Royalty influenced by special relationship	s.132 TIOPA	*Not discussed*
Hybrid entities	s.259NB TIOPA	91.25.2
Advance pricing agreements	s.219(2) TIOPA	*Not discussed*
Corporate interest restriction	s.463 TIOPA	*Not discussed*

So there is some economy of drafting, and it is convenient to consider the matter as a separate topic, rather than in any particular context in which it may arise.

A modified version also applies for diverted profits tax, but that is outside the scope of this book.

105.2 Direct participation

105.2.1 *Application of s.157*

Section 157(1) TIOPA provides:

> Subsection (2) applies for the purposes of—
> (a) this Part [Part 4 TIOPA Transfer pricing]
> (b) in Part 2, section 132(7)
> (c) in Part 5, section 219(2)
> (d) in Part 6A, section 259NB(4),
> (e) in Part 10, section 463(4), and
> (f) section 608T of ITTOIA 2005.

105.2.2 *Direct participation test*

Section 157(2) TIOPA provides:

> A person is directly participating in the management, control or capital of another person at a particular time if (and only if) that other person is at that time—
> (a) a body corporate or a firm, and
> (b) controlled by the first person.

"Control" means control in the strict sense.[1] But we then need to consider the indirect participation tests.

105.3 Indirect participation tests

Section 158 TIOPA provides:

> (1) This section is about how to read the references, in this Part and in some other provisions of this Act, to indirect participation.
> (2) For the purposes of sections 148(2)(a) and (3)(a) and 175(2)(a), a person is indirectly participating in the management, control or capital of another person only if section 159, 160 or 161 so provides.
> (3) For the purposes of sections 148(2)(b) and (3)(b) and 175(2)(b), a person is indirectly participating in the management, control or capital of another person only if section 159, 160 or 162 so provides.

[1] See s.217 TIOPA; 104.9 (Control: Strict sense).

(4) For the purposes of—
 (a) sections 154(5) and 204(4),
 (b) in Part 2, section 132(7)
 (c) in Part 5, section 219(2), and
 (d) in Part 6A, section 259NB(4),
a person is indirectly participating in the management, control or capital of another person only if section 159 or 160 so provides.

This is easier to follow in a table format:

Provision in TIOPA	**Topic**	**Apply**
148(2)(a)/(3)(a), 175(2)(a)	Transfer pricing	s.159/160/161
148(2)(b)/(3)(b), 175(2)(b)	Transfer pricing	s.159/160/162
154(5), 204(4)	Transfer pricing	s.159/160
132(7)	DT royalties article	s.159/160
219(2)	Advance pricing agreements	s.159/160
259NB(4)	Hybrid entities	s.159/160

105.4 Indirect participation: s.159

105.4.1 *Application of s.159*

Section 159(1) TIOPA provides:

> Subsection (2) applies for the purposes of—
> (a) sections 148(2) and (3), 154(5), 175(2) and 204(4),
> (b) in Part 2, section 132(7),
> (c) in Part 5, section 219(2),
> (d) in Part 6A, section 259NB(4),
> (e) in Part 10, section 463(4)]2[, and
> (f) section 608T of ITTOIA 2005.

Section 159 applies in all cases where the participation test is applied.

105.4.2 *Indirect participation test*

Section 159(2) TIOPA provides:

> A person ("P") is indirectly participating in the management, control or capital of another person ("A") at a particular time if
> [a] P would be directly participating in the management, control or capital of A at that time
> [b] if the rights and powers attributed to P included all the rights and powers mentioned in subsection (3) that are not already attributed to P for the purpose of deciding under section 157 whether P is directly participating in the management, control

or capital of A.

105.4.3 *Attributed rights*

Section 159(3) TIOPA provides:

> The rights and powers referred to in subsection (2) are—

There follow five paragraphs of attributed rights.

105.4.4 *Future rights*

Section 159(3) TIOPA provides:

> The rights and powers referred to in subsection (2) are—
> (a) rights and powers which P is entitled to acquire at a future date,
> (b) rights and powers which P will, at a future date, become entitled to acquire,

The wording is taken from the definition of control in the ultra-wide sense; see 104.3.11 ("Entitled to acquire").

Section 159(5) TIOPA provides:

> In subsections (3)(c) to (e) and (4), the references to a person's rights and powers include references to any rights or powers which the person either—
> (a) is entitled to acquire at a future date, or
> (b) will, at a future date, become entitled to acquire.

105.4.5 *Beneficial/fiduciary rights*

Section 159(3) TIOPA provides:

> The rights and powers referred to in subsection (2) are...
> (c) rights and powers of persons other than P so far as they are rights or powers falling within subsection (4),

That takes us to s.159(4) TIOPA:

> Rights and powers fall within this subsection so far as they—
> (a) are required, or may be required, to be exercised in any one or more of the following ways—
> (i) on behalf of P,
> (ii) under the direction of P, or
> (iii) for the benefit of P, and
> (b) are not confined, in a case where a loan has been made by one person to another, to rights and powers conferred in relation to

property of the borrower by the terms of any security relating to the loan.

105.4.6 *Connected person's rights*

Section 159(3) TIOPA provides:

> The rights and powers referred to in subsection (2) are...
> (d) rights and powers of any person with whom P is connected (see section 163),

Section 163 TIOPA defines "connected":

> (1) Subsections (2) and (3) apply for the purposes of section 159 and this section.
> (2) Two persons are connected with each other if one of them is an individual and the other is—
> (a) the individual's spouse or civil partner,
> (b) a relative of the individual,
> (c) a relative of the individual's spouse or civil partner, or
> (d) the spouse, or civil partner, of a person within paragraph (b) or (c).
> (3) Two persons are connected with each other if one of them is a trustee of a settlement and the other is—
> (a) a person who in relation to that settlement is a settlor, or
> (b) a person who is connected with a person within paragraph (a).
> (4) In this section—
> "relative" means brother, sister, ancestor or lineal descendant, and
> "settlement" and "settlor" have the same meaning as in section 620 of ITTOIA 2005.

This is a truncated version of the standard definition of "connected person".[2]

"Connected" is a symmetrical relationship: if A is connected with B, then B is connected with A.

If S is the settlor of two trusts (T1 and T2) then:

(1) S is connected with T1 and T2, under 163(3)(a).
(2) T1 and T2 are connected, under s.163(3)(b).

105.4.7 *Indirectly connected rights*

Section 159(3) TIOPA provides:

[2] See 98.12 (Connected person).

> The rights and powers referred to in subsection (2) are...
> (e) rights and powers which would be attributed by subsection (2) to a person with whom P is connected were it being decided under that subsection whether that connected person is indirectly participating in the management, control or capital of A.

Thus if A is connected to B, and B is connected to C, the rights of C are attributed to A.

Section 159(6) TIOPA provides:

> In paragraph (e) of subsection (3), the reference to rights and powers which would be attributed to a connected person includes a reference to rights and powers which, by applying that paragraph wherever one person is connected with another, would be so attributed to the connected person through a number of persons each of whom is connected with at least one of the others.

This seems to mean that if A is connected to B, and B is connected to C, and so on to Z and beyond, one attributes to A the rights of B, C, and so on to Z and beyond. There is no limit to the number of connected persons. No-one could draw up a list of persons to whom they may be connected via an unlimited number of intermediate connected persons. But unworkability is a common feature of connected person tests.

105.4.8 *Joint powers*

Section 159(7) TIOPA provides:

> References in this section—
> (a) to rights and powers of a person, or
> (b) to rights and powers which a person is or will become entitled to acquire,
>
> include references to rights or powers which are exercisable by that person, or (when acquired by that person) will be exercisable, only jointly with one or more other persons.

105.5 Major participant: s.160

105.5.1 *Application of s.160*

Section 160(1) TIOPA provides:

> Subsection (2) applies for the purposes of—
> (a) sections 148(2) and (3), 154(5), 175(2) and 204(4),

(b) in Part 2, section 132(7), and
(c) in Part 5, section 219(2)
(d) in Part 6A, section 259NB(4),
(e) in Part 10, section 463(4), and
(f) section 608T of ITTOIA 2005.

Section 160 applies in all cases where the participation test is applied.

105.5.2 *Major participant test*

Section 160(2) TIOPA provides:

> A person is indirectly participating in the management, control or capital of another person at a particular time if the first person is, at that time, one of a number of major participants in that other person's enterprise.

105.5.3 *"Major participant"*

Section 160(3) TIOPA provides the definition of "major participant"

> For the purposes of this section, a person ("A") is a major participant in another person's enterprise at a particular time if at that time—
> (a) that other person ("the subordinate") is a body corporate or firm, and
> (b) the 40% test is met in the case of each of two persons—
> (i) who, taken together, control the subordinate, and
> (ii) of whom one is A.

105.5.4 *40% test*

Section 160(4) TIOPA provides:

> For the purposes of this section, the 40% test is met in the case of each of two persons wherever each of them has interests, rights and powers representing at least 40% of the holdings, rights and powers in respect of which the pair of them fall to be taken as controlling the subordinate.

105.5.5 *Attributing rights for 40% test*

Section 160(5) TIOPA provides

> For the purposes of this section—
> (a) the question whether a person is controlled by any two or more persons taken together, and
> (b) any question whether the 40% test is met in the case of a person who is one of two persons,

> is to be determined after attributing to each of the persons all the rights and powers which would be attributed by section 159(2) to a person were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of another person.

Section 160(6) TIOPA copies s.159(7); see 105.4.8 (Joint powers).

105.6 s.161 test: s.148/175 financing

Section 161 TIOPA provides:

> (1) Subsection (2) applies for the purposes of sections 148(2)(a) and (3)(a) and 175(2)(a).
>
> (2) A person ("P") is indirectly participating in the management, control or capital of another ("A") at the time of the making or imposition of the actual provision if—
>
> (a) the actual provision relates, to any extent, to financing arrangements for A,
>
> (b) A is a body corporate or firm,
>
> (c) P and other persons acted together in relation to the financing arrangements, and
>
> (d) P would be taken to have control of A if, at any relevant time, there were attributed to P the rights and powers of each of the other persons mentioned in paragraph (c).
>
> (3) It is immaterial for the purposes of subsection (2)(c) whether P and the other persons acting together in relation to the financing arrangements did so at the time of the making or imposition of the actual provision or at some earlier time.
>
> (4) In subsection (2)(d) "relevant time" means—
>
> (a) a time when P and the other persons were acting together in relation to the financing arrangements, or
>
> (b) a time in the period of six months beginning with the day on which they ceased so to act.
>
> (5) In determining for the purposes of subsection (2)(d) whether P would be taken to have control of another person ("A"), the rights and powers of any person (and not just P) are to be taken to include those that would be attributed to that person by section 159(2) were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of A.
>
> (6) In this section "financing arrangements" means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

105.7 s.162 test: Other financing

Section 162 TIOPA provides:

> (1) Subsection (2) applies for the purposes of sections 148(2)(b) and (3)(b) and 175(2)(b).
> (2) A person ("Q") is indirectly participating in the management, control or capital of each of the affected persons at the time of the making or imposition of the actual provision if—
> (a) the actual provision relates, to any extent, to financing arrangements for one of the affected persons ("B"),
> (b) B is a body corporate or firm,
> (c) Q and other persons acted together in relation to the financing arrangements, and
> (d) Q would be taken to have control of both B and the other affected person if, at any relevant time, there were attributed to Q the rights and powers of each of the other persons mentioned in paragraph (c).
> (3) It is immaterial for the purposes of subsection (2)(c) whether Q and the other persons acting together in relation to the financing arrangements did so at the time of the making or imposition of the actual provision or at some earlier time.
> (4) In subsection (2)(d) "relevant time" means—
> (a) a time when Q and the other persons were acting together in relation to the financing arrangements, or
> (b) a time in the period of six months beginning with the day on which they ceased so to act.
> (5) In determining for the purposes of subsection (2)(d) whether Q would be taken to have control of another person ("A"), the rights and powers of any person (and not just Q) are to be taken to include those that would be attributed to that person by section 159(2) were it being decided under section 159(2) whether that person is indirectly participating in the management, control or capital of A.
> (6) In this section "financing arrangements" means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

105.8 % investment tests

This concept is elaborately defined. It is used in a number of contexts:

Topic	**Reference**	**Definition**	**See para**
Property-rich companies	para 9 sch 1A TCGA	Set out in full	57.7; 57.10
Transactions in land	s.356OT CTA 2010	Adopts s.259NC	22.9.3; 57.7

Intellectual property	s.608U ITTOIA	Set out in part	32.32
Hybrid entities	s.259NB TIOPA	Set out in full	91.25
Permanent establishment	s.1143 CTA 2010	Adopts s.259NC	106.20
Corporate interest restriction	s.464 TIOPA	Set out in full	*Not discussed*

So:
On 3 occasions, the definition is set out in full.
Once, in s.609U, the definition is set out in part.[3]
On 2 occasions, the s.259NC definition is incorporated by reference.

Such is the patchwork nature of taxation. There is however a common template so it is convenient to consider the matter as a separate topic, rather than in any particular context in which it may arise.

105.8.1 *The definition(s)*

In outline, the basic definition has four or five limbs, most of which have parallels in the definitions of control/close company, so discussion in that context is relevant here:

Limb	**Control**	**Close co**	**Notes**
Share capital	104.3.7		Only in s.259ND
Votes	104.3.8		
Receipt on disposal	-	-	
Income test	104.3.9		
Winding up test	104.3.10;	104.28	

In full detail:

para 9(1) sch 1A TCGA	**s.259ND(3) TIOPA/s.259ND(4) TIOPA**		**s.608U(1) ITTOIA**
A person ("P") has a 25% investment in a company ("C") if—	(3) A person ("P") has an X% investment in a company ("C") if it is reasonable to suppose[4] that—	(4) A person ("P") has an X% investment in another person ("Q") if it is reasonable to suppose that—	A person (P) has a 51% investment in another person (C) if any of the following apply—

[3] The other part incorporates the rules from the corporate interest definition. Section 608U ITTOIA provides:

> (3) Section 464(2) to (11) and section 465 of TIOPA 2010 apply for the purposes of subsections (1) and (2) of this section.
> (4) In the application of section 464(10) of TIOPA for the purposes of subsection (1), the reference to a "25% investment" is to be read as a "51% investment".

[4] See App.2.24 (Reasonable-to-assume).

	[***Share capital limb***] (a) P possesses or is entitled to acquire X% or more of the share capital or issued share capital of C,		
[***Voting limb***] (a) P possesses or is entitled to acquire 25% or more of the voting power in C,	(b) P possesses or is entitled to acquire X% or more of the voting power in C, or		(a) P possesses or is entitled to acquire more than half of the voting power in C;
[***Disposal limb***] (b) in the event of a disposal of the whole of the equity in C, P would receive 25% or more of the proceeds,	(c) if the whole of C's share capital were disposed of, P would receive (directly or indirectly and whether at the time of disposal or later) X% or more of the proceeds of the disposal.		(b) in the event of a disposal of the whole of the equity in C, P would receive more than half of the proceeds;
[***Distribution limb***] (c) in the event that the income in respect of the equity in C were distributed among the equity holders in C, P would receive 25% or more of the amount so distributed, or		(a) if the whole of Q's income were distributed, P would receive (directly or indirectly and whether at the time of the distribution or later) X% or more of the distributed amount, of	(c) in the event that the income in respect of the equity in C were distributed among the equity holders in C, P would receive more than half of the amount so distributed;
[***Winding-up limb***] (d) in the event of a winding-up of C or in any other		(b) in the event of a winding-up of Q or in any other	(d) in the event of a winding-up of C or in any other

circumstances, P would receive 25% or more of C's assets which would then be available for distribution among the equity holders in C in respect of the equity in C.		circumstances, P would receive (directly or indirectly and whether or not at the time of the winding-up or other circumstances or later) X% or more of Q's assets which would then be available for distribution.	circumstances, P would receive more than half of C's assets which would then be available for distribution among the equity holders in C in respect of the equity in C.

105.8.2 *Which percentage?*

s.259ND TIOPA	**s.608U ITTOIA**
(1) Where this section applies for the purposes of determining whether a person has a "50% investment" in another person for the purposes of section 259NB(6), references in this section to X% are to be read as references to 50%.	
(2) Where this section applies for the purposes of determining whether a person has a "25% investment" in another person for the purposes of section 259NC(2), references in this section to X% are to be read as references to 25%.	(2) A person (P) has a 25% investment in another person (c) where any paragraph of subsection (1) would apply if in that paragraph for "more than half" there were substituted "at least a quarter".

105.8.3 *"Equity in C"*

This expression is used several times in the % investment tests. Para 9(2) sch 1A TCGA/s.464(2) TIOPA provide:

> In this paragraph/section references to the equity in C are to—
> (a) the shares in C other than restricted preference shares, or
> (b) loans to C other than normal commercial loans.[5]

The definition of "equity in C" uses the expression "shares in C". Para

[5] See 57.11 (Normal commercial loan).

9(3) sch 1A TCGA/s.464(3) TIOPA provide:

> For this purpose "shares in C" includes—
> (a) stock, and
> (b) any other interests of members in C.

105.8.4 *Equity holder*

This expression is used several times in the % investment tests. Para 9(4) sch 1A TCGA/s.464(4) TIOPA provide:

> For the purposes of this paragraph/section a person is an equity holder in C if the person possesses any of the equity in C.

105.8.5 *"Receipt"*

This expression is used several times in the % investment tests:

para 9(7) sch 1A TCGA	**s.259ND(5) TIOPA**	**s.464(7) TIOPA**
In this paragraph references to a person receiving any proceeds, amount or assets include—	In this section, references to a person receiving any proceeds, amount or assets include	In this section references to a person receiving any proceeds, amount or assets include—
(a) the direct or indirect receipt of the proceeds, amount or assets, and		[Identical to para 9]
(b) the direct or indirect application of the proceeds, amount or assets for the person's benefit,	references to the proceeds, amount or assets being applied (directly or indirectly) for that person's benefit.	[Identical to para 9]
and it does not matter whether the receipt or application is at the time of the disposal, distribution, winding-up or other circumstances or at a later time.		[Identical to para 9]
(8) If— (a) here is a direct receipt or direct application of any proceeds, amount or assets by or for the		[Identical to para 9]

benefit of a person ("A"), and (b) another person ("B") directly or indirectly owns a percentage of the equity in A,	
there is, for the purposes of sub-paragraph (7), an indirect receipt or indirect application of that percentage of the proceeds, amount or assets by or for the benefit of B.	there is, for the purposes of subsection (7), an indirect receipt or indirect application of that percentage of the proceeds, amount or assets by or for the benefit of B.
(9) For this purpose the percentage of the equity in A directly or indirectly owned by B is to be determined by applying the rules in sections 1155 to 1157 of CTA 2010 with such modifications (if any) as may be necessary.[6]	[Identical to para 9]

105.8.6 *Commercial loan exemption*

Para 9(10) sch 1A TCGA	**s.464(10) TIOPA**
Sub-paragraph (7) is not to result in a person being regarded as having a 25% investment in another person merely as a result of their being parties to a normal commercial loan.[7]	Subsection (7) is not to result in a person being regarded as having a 25% investment in another person merely as a result of their being parties to a normal commercial loan.

Para 9(6) sch 1A TCGA/s.464(6) TIOPA provide:

> In a case where C is a company which does not have share capital, in applying for the purposes of this paragraph the definitions of "normal commercial loan" and "restricted preference shares"—
> (a) sections 160(2) to (7) and 161 to 164 of CTA 2010, and
> (b) any other relevant provisions of that Act,

[6] See 64.26.2 (Indirect ownership).

[7] See 60.12 (Normal commercial loan).

have effect with the necessary modifications.

105.8.7 *Connected persons*

Para 10 sch 1A TCGA	**s.456 TIOPA**
(1) In determining for the purposes of paragraph 9 the investment that a person (“P”) has in a company, P is to be taken to have all of the rights and interests of any person connected with P.	(1) In determining for the purposes of section 464 the investment that a person (“P”) has in another person, P is to be taken to have all of the rights and interests of— (a) any person connected with P, (b) any person who is a member of a partnership, or is connected with a person who is member of a partnership, of which P is a member, or (c) any person who is a member of a partnership, or is connected with a person who is a member of a partnership, of which a person connected with P is a member.

The standard definition of connected person is amended:

Para 10 sch 1A TCGA	**s.456 TIOPA**
(2) A person is not to be regarded as connected with another person for the purposes of this paragraph merely as a result of their being parties to a loan that is a normal commercial loan for the purposes of paragraph 9. (3) Section 286 (connected persons: interpretation) has effect for the purposes of this paragraph— (a) as if, in subsection (2), for the words from “, or is a relative” to the end there were substituted “or is a lineal ancestor or lineal descendant of the individual or of the individual's spouse or civil partner”, and (b) as if subsections (4) and (8) were omitted.	(2) For the purposes of subsection (1)— (a) section 1122 of CTA 2010 (“connected” persons) applies but as if subsections (7) and (8) of that section were omitted, but (b) a person is not to be regarded as connected with another person merely as a result of their being parties to a loan that is a normal commercial loan for the purposes of section 464.

These definitions have similarities but are not identical. I consider only the CGT definition here.

Amended as para 9(3)(a) directs, s.268(2) provides:

> A person is connected with an individual if that person is the individual's spouse or civil partner, ~~or is a relative, or the spouse or civil partner of a relative, of the individual or of the individual's spouse or civil partner~~ or is a lineal ancestor or lineal descendant of the individual or of the individual's spouse or civil partner.

The effect of deleting s.286(4) is that partners are not connected persons. Section 286(8) is the definition of relative; it is deleted for neatness as it is not needed, as a result of the amendment to s.268(2).

105.8.8 *Acting together*

The following rule does not apply for sch 1A TCGA:

s.259ND TIOPA	**s.465 TIOPA**
(6) For the purposes of subsections (3) and (4), in determining what percentage investment a person ("P") has in another person ("U"), where P acts together with a third person ("T") in relation to U, P is to be taken to have all of T's rights and interests in relation to U.[8]	(3) In determining for the purposes of section 464 the investment that a person ("P") has in another person ("U"), P is to be taken to have all of the rights and interests of a third person ("T") with whom P acts together in relation to U. ("P") has in another person ("U"),
(7) P is to be taken to "act together" with T in relation to U if (and only if) subsection (7A) or (7B) applies. (7A) This subsection applies if— (a) P and T are party to a partnership agreement that— (i) it is reasonable to suppose is designed to affect the value of any of T's rights or interest in relation to U, or (ii) relates to the exercise of any of T's rights in relation to U, or (b) the same person manages— (i) some or all of P's rights or interests in relation to U, and (ii) some or all of T's rights or interests in relation to U.	(4) For this purpose P "acts together" with T in relation to U if (and only if)— (a) for the purpose of influencing the conduct of U's affairs— (i) P is able to secure that T acts in accordance with P's wishes (or vice versa), or (ii) T can reasonably be expected to act, or typically acts, in accordance with P's wishes (or vice versa), (b) P and T are party to an arrangement that it is reasonable to conclude is designed to affect the value of any equity in U possessed by T, or (c) the same person manages some or all of any equity in U possessed by P and T. In paragraphs (b) and (c) references to equity in U are to be read in accordance with section 464.

[8] See 91.25.4 (Acting together).

(7B) This subsection applies if P has a relevant investment in U and—
(a) P and T are connected (within the meaning given by section 163),
(b) for the purposes of influencing the conduct of U's affairs—
(i) P is able to secure that T acts in accordance with P's wishes,
(ii) T can reasonably be expected to act, or typically acts, in accordance with P's wishes,
(iii) T is able to secure that P acts in accordance with T's wishes, or
(iv) P can reasonably be expected to act, or typically acts, in accordance with T's wishes, or
(c) P and T are party to any arrangement that—
(i) it is reasonable to suppose is designed to affect the value of any of T's rights or interests in relation to U, or
(ii) relates to the exercise of any of T's rights in relation to U.

(5) But P does not "act together" with T in relation to U under subsection (4)(c) if—
(a) the managing person does so as the operator of different collective investment schemes, and
(b) the management of the schemes is not coordinated for the purpose of influencing the conduct of U's affairs.
(6) For this purpose "collective investment scheme" and "operator" have the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see sections 235 and 237).

(7) In determining for the purposes of section 464 the investment that a person P is to be taken to have all of the rights and interests of one or more third persons with whom P has entered into a qualifying arrangement in relation to U.
(8) For this purpose P has entered into a qualifying arrangement with one or more third persons in relation to U if they are parties to an arrangement concerning U as a result of which, by reference to shares held, or to be held, by any one or more of them in U, they can reasonably be expected to act together—
(a) so as to exert greater influence in relation to U than any one of them would be able to exert if acting alone, or
(b) otherwise so as to be able to achieve an outcome in relation to U that, if attempted by any one of them acting alone, would be significantly more difficult to achieve.
(9) For this purpose the reference to shares in U includes shares in U that may be held as a result of the exercise of any right or power and includes rights or interests in U that are of a similar character to shares.
(10) In this section "arrangement" includes any agreement, understanding,

(7C) To determine whether P has a "relevant investment" in U at a particular time, subsections (3) and (4) apply but as if—
(a) for "an X%", in both places, there were substituted "a relevant", and
(b) for "X% or more", in each place, there were substituted "greater than 5%".
(7D) For that purpose—
(a) subsection (6) is to be ignored, and
(b) P's rights and interests are to be aggregated with the rights and interests of persons connected to P (within the meaning given by section 1122 of CTA 2010, ignoring subsection (4) of that section).

(8) P does not "act together" with T in relation to U under paragraph (b) of subsection (7A) where—
(a) the person who manages the rights or interests of P mentioned in sub-paragraph (i) of that paragraph, does so as the operator of a collective investment scheme,
(b) that person manages the rights or interests of T mentioned in sub-paragraph (ii) of that paragraph as the operator of a different collective investment scheme, and
(c) the Commissioners are satisfied that the management of the schemes is not coordinated for the purpose of influencing the conduct of U 's affairs.
(9) In subsection (8) "collective investment scheme" and "operator" have the same meaning as in Part 17 of the Financial Services and Markets Act 2000 (see sections 235 and 237 of that Act).

scheme, transaction or series of transactions (whether or not legally enforceable).

106.28 Branch/agency: Critique

106.1 PE: Introduction

It is not practical to set out a full list of the tax significance of a UK PE, but the following are the most important.

PE is central to the territorial limitations of corporation tax:

(1) A non-resident company trading through a PE is subject to corporation tax on income linked to the PE.[1] In the absence of a PE, a non-resident company trading in the UK is not subject to CT. Instead the company is in principle[2] subject to income tax on its income.

(2) A company trading in the UK through a PE is subject to corporation tax on gains linked to the PE.[3] In the absence of a PE, a non-resident company is not in general subject to CT/CGT on its gains.

PE is central to DT relief: In the absence of a PE, a person treaty-resident in a foreign State with a DTA in OECD Model form generally qualifies for relief for UK source trading income, dividends, interest, royalties, capital gains and other income. All these reliefs are restricted for income/gains linked to a PE.

Corporation Tax may be collected from the PE.[4]

PE of a corporate trustee is relevant to trust residence.

If a non-resident *individual or trustee* is carrying on a trade in the UK,

[1] See 21.6 (CT territorial limit: Trading).

[2] I say "in principle" because::
(1) It is unusual for activity of a non-resident company to constitute trading in the UK but not trading through a PE; see 106.24 (Trade in UK without PE); and
(2) If it did happen, investment manager exemptions or DT relief will often apply.

[3] See 56.7 (Trade through UK branch/PE).

[4] See 124.2 (Tax collected from UK representative).

the UK domestic law tax position is not affected whether or not they are carrying on their trade through a PE; but similar rules apply if they are carrying on business through a branch/agency, which is a similar concept.[5]

A PE or branch is not a "person"[6] though for many purposes it is treated as one.

The topic of PE need a long book to itself and several such books have been written.[7] This chapter is a (relatively) brief introduction.

106.2 PE: UK-law/OECD Model meanings

There are two principal definitions of PE in tax legislation:

My term	**INTM term**	**Defined**
UK-law PE	Domestic law PE	s.1141 CTA 2010
OECD Model PE	Treaty PE[8]	Art 5 OECD Model

There are 2 principal types of PE:

Type of PE	**CTA 2010**	**OECD Model**	**See para**
Fixed place of business PE	s.1141(1)(a)	Art 5(1)	106.5
Agency-PE	s.1141(1)(b)	Art 5(5)	106.12

106.2.1 *Pre/post-2017 OECD Model*

The OECD Model was amended in 2017, so I refer to:

(a) Pre-2017 Model form

(b) Post-2017 Model form

The OECD Commentary was also amended in 2017. It comments on the changes:

> 3. In 2017, a number of changes were made to this Commentary. Some of these changes were intended to clarify the interpretation of the Article and, as such, should be taken into account for the purposes of the interpretation and application of conventions concluded before their

[5] See 106.26 (Why branch/agency matters).

[6] See App.2.6 (Person/legal personality).

[7] There is a bibliography in Reimer, Urban and Schmid (ed), *Permanent Establishments* (2011), para 1.3. See too IFA, *Is there a Permanent Establishment?* Cahiers du Droit International (Vol 94a, 2009); [2006] BTR at p.722. For Australian Revenue views, see Taxation Ruling TR 2002/5.

[8] I prefer the term "OECD Model PE" because treaty definitions are not all the same; see 106.23 (PE: Pre-1963 DTAs).

> adoption because they reflect the consensus of the OECD member countries as to the proper interpretation of existing provisions and their application to specific situations (see paragraph 35 of the Introduction).[9]
> 4. Changes to this Commentary related to the addition of paragraph 4.1 and the modification of paragraphs 4, 5 and 6 of the Article that were made as a result of the adoption of the Report on Action 7 of the OECD/G20 Base Erosion and Profit Shifting Project were, however, prospective only and, as such, do not affect the interpretation of the former provisions of the OECD Model Tax Convention and of treaties in which these provisions are included, in particular as regards the interpretation of paragraphs 4 and 5 of the Article as they read before these changes (see paragraph 4 of that Report).

106.2.2 *Scope of UK-law definition*

Section 1141(1) CTA 2010 provides:

> For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if ...

This definition applies only for the purposes of the Corporation Tax Acts, so it needs to be incorporated when the same term is used elsewhere:

s.288 TCGA	**s.989 ITA**
In this Act, unless the context otherwise requires—	The following definitions apply for the purposes of the Income Tax Acts—
“permanent establishment”, in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010	“permanent establishment”, in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010

Thus the UK-law definition applies throughout the Taxes Acts, but it only applies in relation to companies.

If a UK tax statute used the expression PE in relation to a *non-company*, the statutory definition would not apply[10] and the expression would (subject to context) bear its normal meaning. I think OECD Model meaning is the normal meaning, though if the view expressed here is right, that UK-law PE has the same meaning as OECD Model PE, then it makes no difference.

[9] See 107.10.6 (Variations between DTAs).

[10] Unless expressly extended; for an example, see 32.8.3 (Deemed UK source).

106.2.3 *Role of OECD Model definition*

OECD Commentary provides:

> 9. ... the determination of whether or not an enterprise of a Contracting State has a permanent establishment in the other Contracting State must be made independently from the determination of which provisions of the Convention apply to the profits derived by that enterprise. For instance, a farm or apartment rental office situated in a Contracting State and exploited by a resident of the other Contracting State may constitute a permanent establishment regardless of whether or not the profits attributable to such permanent establishment would constitute income from immovable property covered by Article 6; whilst the existence of a permanent establishment in such cases may not be relevant for the application of Article 6, it would remain relevant for the purposes of other provisions such as:[11]
>
> | **Provision** | **Topic** | **See para** |
> |---|---|---|
> | Art 11(4) | Business income/interest overlap | 107.9.2 |
> | Art 11(5) | Source of interest | 26.27.6 |
> | Art 15(2) | Employment income: short term visitors | 37.12 |
> | Art 24(3) | Non-discrimination | - |

106.2.4 *Trading through PE*

UK tax provisions refer to a company carrying on a trade through a PE, so one might think that there are two distinct questions:

(1) whether a PE exists
(2) whether the company is carrying on a trade through the PE.

However PE is defined as "a fixed place of business through which the business of the company is carried on"; so if a company owns (say) an office building which it does not use (or which it does not use for its business) then strictly the office building is not a PE at all.

A let property is not normally a PE of the landlord; contrast 106.10.2 (Commencement/cessation of business).

106.2.5 *The future*

A consultation paper floats possible changes; see HMRC, "Reform of UK law in relation to transfer pricing, permanent establishment and Diverted

[11] For clarity I have set this out in tabular form rather than the layout of the Manual.

Profits Tax".[12]

106.3 PE in non-tax contexts

PE and branch/agency (or similar concepts) are also relevant for many non-tax purposes, such as civil jurisdiction.

In *Adams v Cape Industries*:[13]

> The English courts will be likely to treat a trading corporation incorporated under the law of one country ('an overseas corporation') as present within the jurisdiction of the courts of another country only if either (i) it has established and maintained at its own expense (whether as owner or lessee) a fixed place of business of its own in the other country and for more than a minimal period of time has carried on its own business at or from such premises by its servants or agents...; or (ii) a representative of the overseas corporation has for more than a minimal period of time been carrying on the overseas corporation's end business in the other country at or from some fixed place of business.

106.3.1 *Overseas Companies Regs 2009*

The concept of establishment is found in Overseas Companies Regulations 2009, which applies to an overseas company with a UK establishment. Reg 2 Overseas Companies Regulations 2009 provides:

> "establishment" means—
>
> (a) a branch within the meaning of the Eleventh Company Law Directive (89/666/EEC),[14] or
>
> (b) a place of business that is not such a branch,
>
> and "UK establishment" means an establishment in the United Kingdom;

We are in a similar line of country, here.

106.3.2 *VAT*

Section 9 VATA refers to a business establishment, or some other fixed establishment, again a similar line of country.

[12] *https://www.gov.uk/government/consultations/uk-law-reform-in-transfer-pricing-permanent-establishment-and-diverted-profits-tax/reform-of-uk-law-in-relation-to-transfer-pricing-permanent-establishment-and-diverted-profits-tax#permanent-establishments* (June 2023)

[13] [1990] 1 Ch 433.

[14] This directive, since repealed, used the word "branch" but did not provide a definition.

OECD Commentary provides:

> 5. In many States, a foreign enterprise may be allowed or required to register for the purposes of a value added tax or goods and services tax (VAT/GST) regardless of whether it has in that State a fixed place of business through which its business is wholly or partly carried on or whether it is deemed to have a permanent establishment in that State under paragraph 5 of Article 5. By itself, however, application of the definition of permanent establishment in the Convention; when applying that definition, one should not, therefore, draw any inference from the treatment of a foreign enterprise for VAT/GST purposes, including from the fact that a foreign enterprise has registered for VAT/GST purposes.[15]

106.4 Some general points

106.4.1 *Productive character irrelevant*

OECD Commentary provides:

> 7. It could perhaps be argued that in the general definition some mention should also be made of the other characteristic of a permanent establishment to which some importance has sometimes been attached in the past, namely that the establishment must have a productive character, i.e. contribute to the profits of the enterprise. In the present definition this course has not been taken. Within the framework of a well-run business organisation it is surely axiomatic to assume that each part contributes to the productivity of the whole. It does not, of course, follow in every case that because in the wider context of the whole organisation a particular establishment has a "productive character" it is consequently a permanent establishment to which profits can properly

[15] Footnote original: See paragraph 337 of the Report on Action 1 of the BEPS Project ("… it is important to underline that registration for VAT purposes is independent from the determination of whether there is a permanent establishment (PE) for income tax purposes."), OECD (2015), Addressing the Tax Challenges of the Digital Economy, Action 1 - 2015 Final Report, OECD/G20 Base Erosion and Profit Shifting Project, OECD Publishing, Paris, *https://doi.org/10.1787/9789264241046-en* Cf. footnote 24 of the International VAT/GST Guidelines ("For the purpose of these Guidelines, it is assumed that an establishment comprises a fixed place of business with a sufficient level of infrastructure in terms of people, systems and assets to be able to receive and/or make supplies. Registration for VAT purposes by itself does not constitute an establishment for the purposes of these Guidelines. Countries are encouraged to publicise what constitutes an "establishment" under their domestic VAT legislation."), OECD (2017), International VAT/GST Guidelines, OECD Publishing, Paris, *https://doi.org/10.1787/9789264271401-en*

be attributed for the purpose of tax in a particular territory (see Commentary on paragraph 4).

106.4.2 *Period of enquiry*

OECD Commentary makes an obvious point:

> 8. It is also important to note that the way in which business is carried on evolves over the years so that the facts and arrangements applicable at one point in time may no longer be relevant after a change in the way that the business activities are carried on in a given State. Clearly, whether or not a permanent establishment exists in a State during a given periodmust be determined on the basis of the circumstances applicable during that period and not those applicable during a past or future period, such as a period preceding the adoption of new arrangements that modified the way in which business is carried on.

106.5 Fixed place of business PE

The UK-law/OECD Model provisions are substantially the same:

s.1141(1) CTA 2010	**Art 5(1) OECD Model**
For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if)—	For the purposes of this Convention, the term "permanent establishment" means
(a) it has a fixed place of business there through which the business of the company is wholly or partly carried on	a fixed place of business through which the business of an enterprise is wholly or partly carried on.

OECD Commentary provides:

> 6... This definition ... contains the following conditions:
> [1] the existence of a "place of business", i.e. a facility such as premises or, in certain instances, machinery or equipment;
> [2] this place of business must be "fixed", i.e. it must be established at a distinct place with a certain degree of permanence;
> [3] the carrying on of the business of the enterprise through this fixed place of business. This means usually that persons who, in one way or another, are dependent on the enterprise (personnel) conduct the business of the enterprise in the State in which the fixed place is situated.

I refer to these as the geographic, permanence and personnel conditions.

106.6 Geographic condition

OECD Commentary provides:

> 10. The term "place of business" covers any premises, facilities or installations used for carrying on the business of the enterprise whether or not they are used exclusively for that purpose. A place of business may also exist where no premises are available or required for carrying on the business of the enterprise and it simply has a certain amount of space at its disposal. It is immaterial whether the premises, facilities or installations are owned or rented by or are otherwise at the disposal of the enterprise. A place of business may thus be constituted by a pitch in a market place, or by a certain permanently used area in a customs depot (e.g. for the storage of dutiable goods). Again the place of business may be situated in the business facilities of another enterprise. This may be the case for instance where the foreign enterprise has at its constant disposal certain premises or a part thereof owned by the other enterprise.
> 11. ... the mere fact that an enterprise has a certain amount of space at its disposal which is used for business activities is sufficient to constitute a place of business. No formal legal right to use that place is therefore required. Thus, for instance, a permanent establishment could exist where an enterprise illegally occupied a certain location where it carried on its business.

The Commentary defines "at the disposal of the employee":

> 12. Whilst no formal legal right to use a particular place is required for that place to constitute a permanent establishment, the mere presence of an enterprise at a particular location does not necessarily mean that that location is at the disposal of that enterprise. Whether a location may be considered to be at the disposal of an enterprise in such a way that it may constitute a "place of business through which the business of [that] enterprise is wholly or partly carried on" will depend on that enterprise having the effective power to use that location as well as the extent of the presence of the enterprise at that location and the activities that it performs there. This is illustrated by the following examples. Where an enterprise has an exclusive legal right to use a particular location which is used only for carrying on that enterprise's own business activities (e.g. where it has legal possession of that location), that location is clearly at the disposal of the enterprise. This will also be the case where an enterprise is allowed to use a specific location that belongs to another enterprise or that is used by a number of enterprises and performs its business activities at that location on a continuous basis during an extended period of time. This will not be the case, however, where the

> enterprise's presence at a location is so intermittent or incidental that the location cannot be considered a place of business of the enterprise (e.g. where employees of an enterprise have access to the premises of associated enterprises which they often visit but without working in these premises for an extended period of time). Where an enterprise does not have a right to be present at a location and, in fact, does not use that location itself, that location is clearly not at the disposal of the enterprise; thus, for instance, it cannot be considered that a plant that is owned and used exclusively by a supplier or contract-manufacturer is at the disposal of an enterprise that will receive the goods produced at that plant merely because all these goods will be used in the business of that enterprise (see also paragraphs 65, 66 and 121 below). ...
>
> 13. These principles are illustrated by the following additional examples where representatives of one enterprise are present on the premises of another enterprise.

The OECD commentary gives 4 examples. In outline:

Para: Facts	**PE**
14: Salesperson visits customer regularly	No
15: Employee of parent uses premises of subsidiary	Yes
16: Transportation enterprise uses delivery dock at customer's warehouse	No
17: Painter works in building 3 days/week for 2 years	Yes
18/19: Home office	Not usually[16]

> 14. A first example is that of a salesman who regularly visits a major customer to take orders and meets the purchasing director in his office to do so. In that case, the customer's premises are not at the disposal of the enterprise for which the salesman is working and therefore do not constitute a place of business through which the business of that enterprise is carried on (depending on the circumstances, however, paragraph 5 [agency-PE] could apply to deem a permanent establishment to exist).
>
> 15. A second example is that of an employee of a company who, for a long period of time, is allowed to use an office in the headquarters of another company (e.g. a newly acquired subsidiary) in order to ensure that the latter company complies with its obligations under contracts concluded with the former company. In that case, the employee is carrying on activities related to the business of the former company and the office that is at his disposal at the headquarters of the other company

[16] See 106.15 Remote working/home office).

> will constitute a permanent establishment of his employer, provided that the office is at his disposal for a sufficiently long period of time so as to constitute a "fixed place of business" (see paragraphs 28 to 34) and that the activities that are performed there go beyond the activities referred to in paragraph 4 of the Article [Preparatory/auxiliary activities].
>
> 16. A third example is that of a road transportation enterprise which would use a delivery dock at a customer's warehouse every day for a number of years for the purpose of delivering goods purchased by that customer. In that case, the presence of the road transportation enterprise at the delivery dock would be so limited that that enterprise could not consider that place as being at its disposal so as to constitute a permanent establishment of that enterprise.
>
> 17. A fourth example is that of a painter who, for two years, spends three days a week in the large office building of its main client. In that case, the presence of the painter in that office building where he is performing the most important functions of his business (i.e. painting) constitute a permanent establishment of that painter.

106.7 "Through which" enterprise carried on

The OECD commentary provides:

> 20. The words "through which" must be given a wide meaning so as to apply to any situation where business activities are carried on at a particular location that is at the disposal of the enterprise for that purpose. Thus, for instance, an enterprise engaged in paving a road will be considered to be carrying on its business "through" the location where this activity takes place.

106.8 Fixed/permanency condition

106.8.1 *"Fixed" place*

The OECD commentary provides:

> 21. According to the definition, the place of business has to be a "fixed" one. Thus in the normal way there has to be a link between the place of business and a specific geographical point. It is immaterial how long an enterprise of a Contracting State operates in the other Contracting State if it does not do so at a distinct place, but this does not mean that the equipment constituting the place of business has to be actually fixed to the soil on which it stands. It is enough that the equipment remains on a particular site (but see paragraph 57 below).
>
> 22. Where the nature of the business activities carried on by an enterprise is such that these activities are often moved between

neighbouring locations, there may be difficulties in determining whether there is a single "place of business" (if two places of business are occupied and the other requirements of Article 5 are met, the enterprise will, of course, have two permanent establishments). As recognised in paragraphs 51 and 57 below a single place of business will generally be considered to exist where, in light of the nature of the business, a particular location within which the activities are moved may be identified as constituting a coherent whole commercially and geographically with respect to that business.

23. This principle may be illustrated by examples. A mine clearly constitutes a single place of business even though business activities may move from one location to another in what may be a very large mine as it constitutes a single geographical and commercial unit as concerns the mining business. Similarly, an "office hotel" in which a consulting firm regularly rents different offices may be considered to be a single place of business of that firm since, in that case, the building constitutes a whole geographically and the hotel is a single place of business for the consulting firm. For the same reason, a pedestrian street, outdoor market or fair in different parts of which a trader regularly sets up his stand represents a single place of business for that trader.

24. By contrast, where there is no commercial coherence, the fact that activities may be carried on within a limited geographic area should not result in that area being considered as a single place of business. For example, where a painter works successively under a series of unrelated contracts for a number of unrelated clients in a large office building so that it cannot be said that there is one single project for repainting the building, the building should not be regarded as a single place of business for the purpose of that work. However, in the different example of a painter who, under a single contract, undertakes work throughout a building for a single client, this constitutes a single project for that painter and the building as a whole can then be regarded as a single place of business for the purpose of that work as it would then constitute a coherent whole commercially and geographically.

25. Conversely, an area where activities are carried on as part of a single project which constitutes a coherent commercial whole may lack the necessary geographic coherence to be considered as a single place of business. For example, where a consultant works at different branches in separate locations pursuant to a single project for training the employees of a bank, each branch should be considered separately. However if the consultant moves from one office to another within the same branch location, he should be considered to remain in the same

> place of business. The single branch location possesses geographical coherence which is absent where the consultant moves between branches in different locations.
> 26. A ship that navigates in international waters or within one or more States is not fixed and does not, therefore, constitute a fixed place of business (unless the operation of the ship is restricted to a particular area that has commercial and geographic coherence). Business activities carried on aboard such a ship, such as the operation of a shop or restaurant, must be treated the same way for the purposes of determining whether paragraph 1 applies (paragraph 5 could apply, however, to some of these activities, e.g. where contracts are concluded when such shops or restaurants are operated within a State).
> 27. [This para discusses the somewhat niche question of whether a geostationary satellite is a PE.]

106.8.2 *Degree of permanency*

The OECD Commentary provides:

> 28. Since the place of business must be fixed, it also follows that a permanent establishment can be deemed to exist only if the place of business has a certain degree of permanency, i.e. if it is not of a purely temporary nature.

That might also be inferred from the label *permanent* establishment. But what is "permanent" may be for quite a short period:[17]

> A place of business may, however, constitute a permanent establishment even though it exists, in practice, only for a very short period of time because the nature of the business is such that it will only be carried on for that short period of time. It is sometimes difficult to determine whether this is the case. Whilst the practices followed by member countries have not been consistent in so far as time requirements are concerned, experience has shown that permanent establishments normally have not been considered to exist in situations where a business had been carried on in a country through a place of business that was maintained for less than six months (conversely, practice shows that there were many cases where a permanent establishment has been considered to exist where the place of business was maintained for a period longer than six months).
> [1] One exception has been where the activities were of a recurrent

[17] Contrast 9.12.2 ("Permanent").

nature; in such cases, each period of time during which the place is used needs to be considered in combination with the number of times during which that place is used (which may extend over a number of years).

[2] Another exception has been made where activities constituted a business that was carried on exclusively in that country; in this situation, the business may have short duration because of its nature but since it is wholly carried on in that country, its connection with that country is stronger. ...

29. [Exception [1]] is illustrated by the following example. An enterprise of State R carries on drilling operations at a remote arctic location in State S. The seasonal conditions at that location prevent such operations from going on for more than three months each year but the operations are expected to last for five years. In that case, given the nature of the business operations at that location, it could be considered that the time requirement for a permanent establishment is met due to the recurring nature of the activity regardless of the fact that any continuous presence lasts less than six months; the time requirement could similarly be met in the case of shorter recurring periods of time that would be dictated by the specific nature of the relevant business.

30. [Exception [2]] is illustrated by the following example. An individual resident of State R has learned that a television documentary will be shot in a remote village in State S where her parents still own a large house. The documentary will require the presence of a number of actors and technicians in that village during a period of four months. The individual contractually agrees with the producer of the documentary to provide catering services to the actors and technicians during the four-month period and, pursuant to that contract, she uses the house of her parents as a cafeteria that she operates as sole proprietor during that period. These are the only business activities that she has carried on and the enterprise is terminated after that period; the cafeteria will therefore be the only location where the business of that enterprise will be wholly carried on. In that case, it could be considered that the time requirement for a permanent establishment is met since the restaurant is operated during the whole existence of that particular business. This would not be the situation, however, where a company resident of State R which operates various catering facilities in State R would operate a cafeteria in State S during a four-month production of a documentary. In that case, the company's business, which is permanently carried on in State R, is only temporarily carried on in State S.

...

> 32. As mentioned in paragraphs 44 and 55, temporary interruptions of activities do not cause a permanent establishment to cease to exist. Similarly, as discussed in paragraph 6, where a particular place of business is used for only very short periods of time but such usage takes place regularly over long periods of time, the place of business should not be considered to be of a purely temporary nature.
>
> 33. Also, there may be cases where a particular place of business would be used for very short periods of time by a number of similar businesses carried on by the same or related persons in an attempt to avoid that the place be considered to have been used for more than purely temporary purposes by each particular business. The remarks of paragraphs 52 and 53 on arrangements intended to abuse the twelve-month period provided for in paragraph 3[18] would equally apply to such cases.
>
> 34. Where a place of business which was, at the outset, designed to be used for such a short period of time that it would not have constituted a permanent establishment but is in fact maintained for such a period that it can no longer be considered as a temporary one, it becomes a fixed place of business and thus — retrospectively — a permanent establishment. A place of business can also constitute a permanent establishment from its inception even though it existed, in practice, for a very short period of time, if as a consequence of special circumstances (e.g. death of the taxpayer, investment failure), it was prematurely liquidated...

106.8.3 *Leasing*

OECD Commentary provides:

> 36. Where tangible property such as facilities, industrial, commercial or scientific (ICS) equipment, buildings, or intangible property such as patents, procedures and similar property, are let or leased to third parties through a fixed place of business maintained by an enterprise of a Contracting State in the other State, this activity will, in general, render the place of business a permanent establishment. The same applies if capital is made available through a fixed place of business. If an enterprise of a State lets or leases facilities, ICS equipment, buildings or intangible property to an enterprise of the other State without maintaining for such letting or leasing activity a fixed place of business in the other State, the leased facility, ICS equipment, building or intangible property, as such, will not constitute a permanent establishment of the lessor provided the contract is limited to the mere

[18] See 106.11.1 (Building/construction site).

leasing of the ICS equipment, etc. This remains the case even when, for example, the lessor supplies personnel after installation to operate the equipment provided that their responsibility is limited solely to the operation or maintenance of the ICS equipment under the direction, responsibility and control of the lessee. If the personnel have wider responsibilities, for example, participation in the decisions regarding the work for which the equipment is used, or if they operate, service, inspect and maintain the equipment under the responsibility and control of the lessor, the activity of the lessor may go beyond the mere leasing of ICS equipment and may constitute an entrepreneurial activity. In such a case a permanent establishment could be deemed to exist if the criterion of permanency is met. When such activity is connected with, or is similar in character to, those mentioned in paragraph 3, the time limit of twelve months applies. Other cases have to be determined according to the circumstances.

37. [This paragraph considers the niche topic of container leasing]

37. [This paragraph considers the niche topic of telecommunication networks]

106.8.4 *HMRC guidance*

The INT Manual provides:

INTM264435: fixed place of business [Jun 2023]

The following examples look at scenarios where employees of overseas businesses take advantage of increased flexibility and mobility in their working conditions to spend blocks of time working in the UK. This guidance focuses on the impact of the fixed place of business permanent establishment rules on these scenarios. In each case, a business would have to separately consider whether the trigger for a dependent agent PE may be met on the same facts and circumstances.

These examples are focused on corporation tax and therefore the personal or indirect tax consequences are not addressed here.

Example 1: [Juan]

J, who works for a foreign entity in State D, comes to Brighton on holiday and stays on to work here for a total of 40 calendar days including his holiday, using the office of a UK affiliate company as a base. He enjoys the experience so much he decides to do the same thing six months later.

Under such an arrangement, J's presence would not create a fixed place of business permanent establishment because, irrespective of any other conditions, the permanence test would not be met. However, if this arrangement was expected to be an annual occurrence for J and/or his

> successors or colleagues in his team, the business may have to consider whether the cumulative time spent in the UK could trigger a permanent establishment.

"The business may have to consider..." is not exactly guidance.

> *Example 2:* [Francine]
> F, a French national with an English partner, joins a French company on a permanent contract which permits her to spend a fixed three-month period each year working in the UK.
> Under such an arrangement, F's presence would meet the permanence test for a fixed place of business permanent establishment because the cumulative time she is anticipated to spend in the UK over the coming few years is significant and her presence in the UK is fixed and so not random or sporadic.
> Whether a PE would be created would depend on the wider facts and circumstances.

"Depends on the facts" is not exactly guidance".

> *Example 3:* [Alexei, Luca and Sara]
> Alexei, Luca and Sara all work for a foreign entity in State C. They come to the UK on holiday for the same part of the year with their families, staying at different addresses. They are all permitted to stay on an additional 30 days to work in the UK by their employer, using the office of a UK affiliate company as a base.
> Under such an arrangement, their presence would not create a fixed place of business permanent establishment because, irrespective of any other conditions, the permanence test would not be met.
> *Example 4:* [Company T]
> Company T has a team of staff in its Zurich office. Over the course of nine months, six staff are permitted to spend six weeks each, in turn, at an affiliate company's office in London working on a project. This scenario would meet the permanence test for a fixed place of business permanent establishment because the changing identity of the visiting personnel doesn't affect the continuity of Company T's presence in the UK.
> *Example 5:* [Jasmine]
> J, who works for a company based in the UK, is seconded to cover six months of maternity leave for a related foreign company in State E. She does this remotely from her UK office and her home in London.
> This will not automatically be exempted from triggering a fixed place of business PE of that related foreign company in the UK and the facts will have to be examined as usual in determining if a PE is triggered.

"The facts will have to be examined" is not exactly guidance.

106.9 Personnel condition

To apply the personnel condition one has to identify who are the personnel.

The OECD Model provides:

> 39. There are different ways in which an enterprise may carry on its business. In most cases, the business of an enterprise is carried on by the entrepreneur or persons who are in a paid-employment relationship with the enterprise (personnel). This personnel includes employees and other persons receiving instructions from the enterprise (e.g. dependent agents). The powers of such personnel in its relationship with third parties are irrelevant. It makes no difference whether or not the dependent agent is authorised to conclude contracts if he works at the fixed place of business of the enterprise (see paragraph 100 below).

106.9.1 *Formal v effective employment*

The OECD Commentary applies the distinction between formal/effective employers which is used in the short term business visitor rules:[19]

> 39... As explained in paragraph 8.11 of the Commentary on Article 15, however, there may be cases where individuals who are formally employed by an enterprise will actually be carrying on the business of another enterprise and where, therefore, the first enterprise should not be considered to be carrying on its own business at the location where these individuals will perform that work. Within a multinational group, it is relatively common for employees of one company to be temporarily seconded to another company of the group and to perform business activities that clearly belong to the business of that other company. In such cases, administrative reasons (e.g. the need to preserve seniority or pension rights) often prevent a change in the employment contract. The analysis described in paragraphs 8.13 to 8.15 of the Commentary on Article 15 will be relevant for the purposes of distinguishing these cases from other cases where employees of a foreign enterprise perform that enterprise's own business activities

106.9.2 *Subcontractors*

The OECD Commentary provides:

[19] See 37.9 (Labour-hire arrangement).

40. An enterprise may also carry on its business through subcontractors, acting alone or together with employees of the enterprise. In that case, a permanent establishment will only exist for the enterprise if the other conditions of Article 5 are met (this, however, does not address the separate question of how much profit is attributable to such a permanent establishment). In the context of paragraph 1, the existence of a permanent establishment in these circumstances will require that these subcontractors perform the work of the enterprise at a fixed place of business that is at the disposal of the enterprise. Whether a fixed place of business where subcontractors perform work of an enterprise is at the disposal of that enterprise will be determined on the basis of the guidance in paragraph 12; in the absence of employees of the enterprise, however, it will be necessary to show that such a place is at the disposal of the enterprise on the basis of other factors showing that the enterprise clearly has the effective power to use that site, e.g. because the enterprise owns or has legal possession of that site and controls access to and use of the site. Paragraph 54 illustrates such a situation in the case of a construction site; this could also happen in other situations. An example would be where an enterprise that owns a small hotel and rents out the hotel's rooms through the Internet has subcontracted the on-site operation of the hotel to a company that is remunerated on a cost-plus basis.

106.9.3 *Equipment not personnel*

41. Also, a permanent establishment may exist if the business of the enterprise is carried on mainly through automatic equipment, the activities of the personnel being restricted to setting up, operating, controlling and maintaining such equipment. Whether or not gaming and vending machines and the like set up by an enterprise of a State in the other State constitute a permanent establishment thus depends on whether or not the enterprise carries on a business activity besides the initial setting up of the machines. A permanent establishment does not exist if the enterprise merely sets up the machines and then leases the machines to other enterprises. A permanent establishment may exist, however, if the enterprise which sets up the machines also operates and maintains them for its own account. This also applies if the machines are operated and maintained by an agent dependent on the enterprise.

106.10 The enterprise

In order to have a PE, there has to be an enterprise; for the definition see 21.23.2 ("Enterprise").

The OECD Commentary considers what amounts to a distinct enterprise:

> 42. It follows from the definition of "enterprise of a Contracting State" in Article 3 that this term, as used in Article 7, and the term "enterprise" used in Article 5, refer to any form of enterprise carried on by a resident of a Contracting State, whether this enterprise is legally set up as a company, partnership, sole proprietorship or other legal form.
>
> Different enterprises may collaborate on the same project and the question of whether their collaboration constitutes a separate enterprise (e.g. in the form of a partnership) is a question that depends on the facts and the domestic law of each State. Clearly, if two persons each carrying on a separate enterprise decide to form a company in which these persons are shareholders, the company constitutes a legal person that will carry on what becomes another separate enterprise. It will often be the case, however, that different enterprises will simply agree to each carry on a separate part of the same project and that these enterprises will not jointly carry on business activities, will not share the profits thereof and will not be liable for each other's activities related to that project even though they may share the overall output from the project or the remuneration for the activities that will be carried on in the context of that project. In such a case, it would be difficult to consider that a separate enterprise has been set up.[20] Although such an arrangement would be referred to as a "joint venture" in many countries, the meaning of "joint venture" depends on domestic law and it is therefore possible that, in some countries, the term "joint venture" would refer to a distinct enterprise.

106.10.1 *PE of partnership*

The OECD Commentary provides:

> 43. In the case of an enterprise that takes the form of a fiscally transparent partnership, the enterprise is carried on by each partner and, as regards the partners' respective shares of the profits, is therefore an enterprise of each Contracting State of which a partner is a resident. If such a partnership has a permanent establishment in a Contracting State, each partner's share of the profits attributable to the permanent establishment will therefore constitute, for the purposes of Article 7,

[20] The Commentary continues:
But in English law, at least, "joint venture" is a loose phrase which is applicable to a wide variety of legal arrangements, and does not convey much information about their nature. Contrast 85.5.6 (Partnership v joint venture).

> profits derived by an enterprise of the Contracting State of which that partner is a resident (see also paragraph 56 below).[21]

106.10.2 *Commencement/cessation of business*

The OECD Commentary provides:

> 44. A permanent establishment begins to exist as soon as the enterprise commences to carry on its business through a fixed place of business. This is the case once the enterprise prepares, at the place of business, the activity for which the place of business is to serve permanently. The period of time during which the fixed place of business itself is being set up by the enterprise should not be counted, provided that this activity differs substantially from the activity for which the place of business is to serve permanently.
>
> The permanent establishment ceases to exist with the disposal of the fixed place of business or with the cessation of any activity through it, that is when all acts and measures connected with the former activities of the permanent establishment are terminated (winding up current business transactions, maintenance and repair of facilities). A temporary interruption of operations, however, cannot be regarded as a closure.
>
> If the fixed place of business is leased to another enterprise, it will normally only serve the activities of that enterprise instead of the lessor's; in general, the lessor's permanent establishment ceases to exist, except where he continues carrying on a business activity of his own through the fixed place of business.

106.11 Items included as PE

The PE definitions provide a list of items which constitute a fixed place of business PE. The first seven are:

s.1141(2) CTA 2010	**OECD Model Art 5(2).**
For this purpose a "fixed place of business" includes (without prejudice to the generality of that expression)—	2. The term "permanent establishment" includes especially:
(a) a place of management,	a) a place of management;
(b) a branch,[22]	b) a branch;

[21] For para 56, see 106.11.1 (Building/construction site).

[22] See 106.27.2 ("Branch").

(c) an office,	c) an office;
(d) a factory,	d) a factory;
(e) a workshop,	e) a workshop, and
(f) an installation or structure for the exploration of natural resources,[23]	[No equivalent]
(g) a mine, an oil or gas well, a quarry or any other place of extraction of natural resources; ...	[Identical]

The INTM para 266110 [Jun 2016] summarises the article and continues:

> The wording of article 5(2)[24] make it clear that this is not an exhaustive list of the places that could be a permanent establishment.

Obviously. The INTM continues:

> Furthermore, it is clear that, to be a treaty permanent establishment, any of these types of places would also need to have the general attributes of a fixed place of business, i.e. the geographic, period of duration and personnel conditions.

The point was less clear and it is helpful to see it in writing.

106.11.1 *Building/construction site*

This is the eighth item in the list in s.1141(2) CTA 2010; OECD Model moves this item into a paragraph of its own, and the wording is not the same.

s.1141(2) CTA 2010	**art 5(3) OECD Model**
For this purpose a "fixed place of business" includes (without prejudice to the generality of that expression) ... (h) a building site or construction or installation project.	A building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months.

[23] This is not in OECD Model definition.

[24] The text erroneously reads: 5(1).

This item, like the first seven in the list, is only a PE if it also meets the geographic, duration, and personnel conditions.

The INTM provides:

> **INTM266130 Building sites or construction or installation projects** [Aug 2017]
>
> The OECD Model Treaty Article 5 includes specific provisions in para 3 that a building site or construction or installation project constitutes a treaty permanent establishment only where it lasts more than 12 months. The commentary makes it clear that this includes also the construction of roads, bridges or canals, the renovation (involving more than mere maintenance or redecoration) of buildings, roads, bridges or canals, the laying of pipes-lines and excavating and dredging. Additionally, the term 'installation project' is not restricted to an installation related to a construction project; it also includes the installation of new equipment, such as a complex machine, in an existing building or outdoors.
>
> The OECD member states have made this type of activity the subject of a specific rule because of the frequency with which it caused difficulties of interpretation. And, for clarity in the model treaty, 12 months duration has been taken to be a sufficient indication that the activity is a fixed place of business permanent establishment. Of course particular treaties may vary from the model in this respect and indeed different durations are included in many of the UK's treaties all of which can be referred to in full at DT2140 onwards. The UK domestic charging provisions in s.1141(2)(h) CTA 2010] define permanent establishment (see INTM264050) in a way that specifically includes all building sites or construction or installation projects without duration qualification. Although initially this may [!] appear inconsistent you should remember that the treaty provisions will override the domestic legislation. In that way, any duration specified in any applicable treaty within which the site will become a permanent establishment will be the duration that applies.
>
> If the non-resident is involved (directly or indirectly through subcontractors) in more than one site or project, each should be considered as a potential permanent establishment separately from the others. The 12 months or other duration test applies to each site or project. A site or project should be regarded as a single potential permanent establishment even if it is based on several contracts provided that it forms a coherent whole commercially and geographically. If it appears that a single site or project has been fragmented to avoid the appearance of being a PE the facts of the original tendering should be investigated.
>
> A site or project exists from when the contractor begins work, including any preparatory work, in the country where the construction etc. is to be established. It continues to exist until the work is completed or permanently abandoned. Temporary discontinuation, seasonal or other temporary interruptions should be ignored.

The OECD Commentary provides:

> 56. In the case of fiscally transparent partnerships, the twelve-month test is applied at the level of the partnership as concerns its own activities. If the period

> of time spent on the site by the partners and the employees of the partnership exceeds twelve months, the enterprise carried on through the partnership will therefore be considered to have a permanent establishment. Each partner will thus be considered to have a permanent establishment for purposes of the taxation of his share of the business profits derived by the partnership regardless of the time spent by himself on the site. Assume for instance that a resident of State A and a resident of State B are partners in a partnership established in State B which carries on its construction activities on a construction site situated in State C that lasts 10 months. Whilst the tax treaty between States A and C is identical to the OECD Model, paragraph 3 of Article 5 of the treaty between State B and State C provides that a construction site constitutes a permanent establishment only if it lasts more than 8 months. In that case, the timethreshold of each treaty would be applied at the level of the partnership but only with respect to each partner's share of the profits covered by that treaty; since the treaties provide for different time-thresholds, State C will have the right to tax the share of the profits of the partnership attributable to the partner who is a resident of State B but will not have the right to tax the share attributable to the partner who is a resident of State A. This results from the fact that whilst the provisions of paragraph 3 of each treaty are applied at the level of the same enterprise (i.e. the partnership), the outcome differs with respect to the different shares of the profits of the partnership depending on the time-threshold of the treaty that applies to each share.

OECD Covid guidance[25] provides:

> 25.It appears that many activities on construction sites are being temporarily interrupted by the COVID-19 pandemic. The duration of such an interruption of activities should, however, be included in determining the life of a site and therefore will affect the determination whether a construction site constitutes a PE. In general, a construction site will constitute a PE if it lasts more than 12 months under the OECD Model or more than six months under the UN Model. Paragraph 55 of the Commentary on Article 5(3) of the OECD Model explains that a site should not be regarded as ceasing to exist when work is temporarily discontinued (temporary interruptions should be included in determining the duration of a site). Examples of temporary interruptions given in the Commentary are interruptions caused by bad weather, a shortage of material or labour difficulties.
>
> 26.The Commentary does not include a bright line test on the meaning of "temporary" interruption, thus jurisdictions may have different views of the duration of a "non-temporary" interruption and on other conditions that make the interruption of a different nature than the examples of interruptions in paragraph 55 of the Commentary. Accordingly, some jurisdictions may consider that particular periods of interruption required by domestic COVID-19 restrictions in their jurisdiction should not be included in the calculation of the time

[25] See 106.14.1 (OECD Covid guidance).

> thresholds for construction PEs. Such an approach would result in those jurisdictions not asserting the existence of a PE if the duration test would only be satisfied by including days during which operations were prevented on the construction site as a result of COVID-19 restrictions. As noted above, this guidance cannot be relied on to create instances of double non-taxation.
>
> 27.In conclusion, a construction site PE would not be regarded as ceasing to exist when work in the site is "temporarily" interrupted, but jurisdictions may consider, in light of the extraordinary circumstances of the COVID-19 pandemic and based on the facts and circumstances, that certain periods where operations are prevented as a public health measure imposed or recommended by the government where the site is located to reduce the spread of the COVID-19 virus constitute a type of interruption that should be excluded from the calculation of time thresholds for construction site PEs.

106.12 Agency-PE

There are three (main) definitions of agency-PE:

(1) UK-law agency-PE
(2) OECD Model agency-PE; this was amended in 2017, so I refer to:
 (a) Pre-2017 Model form
 (b) Post-2017 Model form

Section 1141(1) CTA 2010 provides the UK-law definition:

> For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if) ...
>
> (b) an agent acting on behalf of the company has and habitually exercises there authority *to do business on behalf of the company*.

Article 5(5) of the pre-2017 OECD Model provides:

> [a] Notwithstanding the provisions of paras 1 and 2, where a person – other than an agent of an independent status to whom para 6 applies – is acting on behalf of an enterprise and has, and habitually exercises, in a Contracting State an authority *to conclude contracts in the name of the enterprise*, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise,
>
> [b] unless the activities of such person are limited to those mentioned in para 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.[26]

[26] See 106.19 (Preparatory/auxiliary activities).

I refer to this as "**agency-PE**". The term "dependent agency PE" is sometimes used (as an independent agent is not a PE).

As usual, the wording has varied over the years,[27] but without any change of meaning. OECD Commentary formerly provided:

> 31... The paragraph was redrafted in the 1977 Model Convention to clarify the intention of the corresponding provision of the 1963 Draft Convention without altering its substance apart from an extension of the excepted activities of the person.

This matters as pre-1977 wording survives, for instance in the Luxembourg/UK DTA.

This was rewritten in 2017 as part of the BEPS Action 7, to deal with commissionnaire arrangements. Existing DTAs could have been brought into line with new wording under art 12 MLI. However the UK opted out of art 12. So UK DTAs existing at the current time will retain the pre-2017 wording. Presumably, future DTAs are likely to use that wording and not the post-2017 wording, but that will depend on the views of treaty-partners, and HMRC practice in the future.

It may be helpful to set out the pre- and post-2017 OECD Model wording, to highlight the differences (which the UK has chosen to reject):

Pre-2017 OECD Model Art 5	**Post-2017 OECD Model Art 5**
Notwithstanding the provisions of paragraphs 1 and 2	Notwithstanding the provisions of paragraphs 1 and 2 but subject to the provisions of paragraph 6,
where a person other than an agent of an independent status to whom paragraph 6 applies is acting on behalf of an enterprise	where a person is acting in a Contracting State on behalf of an enterprise
and has, and habitually exercises, in a Contracting State, an authority to conclude contracts,	and, in doing so, habitually concludes contracts, or habitually plays the principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprise,

[27] See Avery Jones, "The Origins of Article 5(5) and 5(6) of the OECD Model", 6 World Tax Journal 3 (2014).

	and these contracts are
in the name of the enterprise,	a) in the name of the enterprise, or b) for the transfer of the ownership of, or for the granting of the right to use, property owned by that enterprise or that the enterprise has the right to use, or c) for the provision of services by that enterprise,
that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.	that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

The post-2017 OECD Commentary will not be relevant to DTAs with pre-2017 wording, so far as it discusses the post-2017 wording; instead the pre-2017 Commentary will still be applicable.[28]

106.12.1 *Agency-PE: Policy*

OECD Commentary provides:

> 82. It is a generally accepted principle that an enterprise should be treated as having a permanent establishment in a State if there is under certain conditions a person acting for it, even though the enterprise may not have a fixed place of business in that State within the meaning of paragraphs 1 and 2. [Article 5(5)] intends to give that State the right to

[28] See 106.2.1 (Pre/post-2017 OECD Model).

tax in such cases. Thus paragraph 5 stipulates the conditions under which an enterprise is deemed to have a permanent establishment in respect of any activity of a person acting for it.

106.12.2 *OECD/UK-law compared*

Dawn Primarolo (then Paymaster General) explained why the wording of UK-law PE differs from pre-2017 OECD Model PE:

> **Dawn Primarolo**: ... the wording used in clause 147(1)(b) [FB 2003, now s.1141 CTA 2010] to define "dependent agent" varies from the exact wording in article 5(5) of the OECD model tax convention. Instead, it is based on guidance given in the commentary on article 5 ... because article 5 refers to an agent who has the authority to conclude contracts in the name of the enterprise. However, the OECD commentary on article 5 makes it clear that that phrase is not necessarily to be taken at face value. For instance, it covers contracts in the name of an enterprise, contracts binding on the enterprise but not in its name, and contracts recognised by the agent but signed by some other person, while excluding contracts that do not relate to the business proper of the enterprise, although concluded by the agent. The area is very complicated and there is an interaction between the commentary and the article itself.
>
> UK legislation cannot be directly interpreted by reference to the commentary,[29] so the phrase used in clause 147 is intended to encapsulate the current OECD interpretation in respect of dependent agents. That would not have been achieved if the wording in article 5(5) were copied directly into UK domestic law.
>
> **Mr. Burnett:** The Paymaster General will recall ... that the Inland Revenue confirmed that the reference to an agent in clause 147 is restricted to those persons who contractually can and do bind their principals and not to persons acting in some other representative capacity falling short of having such authority. The Paymaster General is obviously well aware of *Pepper v Hart* and the reliance people may put on what she says in Committee. I would welcome her comments on that point raised by the Law Society.
>
> **Dawn Primarolo**: I was coming to that important point, which was outlined in a letter to the Law Society and the Chartered Institute of Taxation on 8 May.
>
> I was trying to explain that the article wording must be read in parallel with the commentary. The commentary needed to be part of the description that went into UK legislation in order to make that clear. In drafting the legislation, the importance of maintaining certainty on international understanding and practice on the OECD guidelines and model conventions while understanding how the commentary affects their operation was one of the major points, which was continually made to the Revenue and me. That is how we chose the clause's wording.
>
> Amendment No. 101 seeks to add to the definition of dependent agent used in

[29] This is not correct, but fortunately no-one reminded Ms Primarolo of (what is now) s.164 TIOPA (Application of OECD principles).

> clause 147(1)(b). It would mean that an agent would be a dependent agent of a foreign company as long as they had the authority to enter into arrangements on its behalf and had entered into contractually binding arrangements with it. That may not have been the amendment's intended effect, but I ask the Committee to reject it nevertheless. The suggested addition is unnecessary and the language used in clause 147(1)(b) already reflects the current OECD position on dependent agents. As such, no further clarification or definition is required.... The Bill does not extend the charge to tax on non-resident companies and there is no less certainty for an agent of a non-resident company on whether they are within the charge to corporation tax. The rules are set out in the OECD treaty and commentary and in UK law, which has had and will have specific rules to facilitate foreign investment in the City.[30]

Similarly, the INTM provides:

> **INTM264050 Permanent establishment – Domestic law definition** [Apr 2020]
>
> The definition of domestic law permanent establishment is at [FA 03 s.148]. This is similar to and has the same broad effect as the OECD Model article 5 definition of permanent establishment which is an important factor bearing in mind that treaty law takes precedence over domestic law. So it is unlikely that the application of a treaty that followed the model article 5 would cause any variance to the UK domestic charge to tax on a non-resident trading in the UK through a permanent establishment as defined under domestic law. Because of the similarities of wording and effect between PE under domestic law and under the OECD Model the guidance on interpretation of treaty PE at INTM266000 is understandably substantially applicable to domestic law PE as well.
>
> A lot of our interpretation of treaty PE is based on the Commentary to Article 5 of the OECD Model (INTM266030). Although the Commentary is not imported into UK domestic law the UK has contributed to and agreed the content except in specific instances where the UK has put on record either an observation or a reservation to a specific section of the Commentary. So, where the wording of the UK domestic law PE provisions are the same as those used in the OECD Model Article 5 then the commentary interpretation on those words will apply to those provisions and this guidance will contain cross-references into the guidance on treaty PE at INTM266000. If the Commentary interpretation of PE were to materially vary through periodic update or

[30] House of Commons Standing Committee B *http://www.publications.parliament.uk/pa/cm200203/cmstand/b/st030520/pm/part1/30520s06.htm*

> amendment the changes would have to be accepted by the UK Parliament before they could be taken to apply also to interpretation of UK domestic law PE.

The simpler way to achieve the intention would have been to incorporate OECD definition by reference, but it is considered that the UK-law definition has reached that destination, though by a less satisfactory route.[31] EN CTA 2010 agrees:

> 3253. This Chapter determines what constitutes a permanent establishment in a territory of a company which is not resident in that territory. ...
> 3254. The determination is in line with various internationally recognised characteristics commonly used in the UK's double tax agreements.

Likewise an HMRC press release when the current law was enacted:

> The rules also alter our current terminology so that in future we tax "permanent establishments", (a term recognised internationally and used in our double taxation agreements), rather than "branches". The new rules are to be interpreted in accordance with OECD guidelines, to ensure that the UK is in accord with international consensus that reflects UK agreement. If internationally agreed changes are made in the future, then any new guidance can be included to assist in the interpretation of the UK rules, if the UK government decides it wishes to adopt them.[32]

106.13 OECD Model agency-PE

This section focuses on the pre-2017 OECD Model form, though parts of the discussion would also be relevant for the post-2017 model.

106.13.1 *Agent*

OECD Commentary provides:

> 83. Persons whose activities may create a permanent establishment for the enterprise are persons, whether or not employees of the enterprise, who act on behalf of the enterprise and are not doing so in the course of carrying on a business as an independent agent falling under para 6. Such persons may be either individuals or companies.

[31] If that is right, it answers the concerns expressed in Nias, "Taxation of non-resident companies and the meaning of agent" [2003] BTR 468.

[32] REV BN 25 para 8 (17 April 2002).

106.13.2 *Authority to conclude contract*

The phrase *authority to conclude contracts in the name of the enterprise* is at the heart of pre-2017 OECD Model agency-PE.

106.13.3 *In the name of the enterprise*

Pre-2017 OECD Commentary provided:

> 32.1 Also, the phrase "authority to conclude contracts in the name of the enterprise" does not confine the application of the paragraph to an agent who enters into contracts literally in the name of the enterprise; the paragraph applies equally to an agent who concludes contracts which are binding on the enterprise even if those contracts are not actually in the name of the enterprise.

The INTM provides:

> **INTM266160. UK common law varies from European civil law codes** [Apr 2020]
> The majority of European countries have civil law codes whereas the UK has a common law code. Any matters of interpretation of undefined terms used in the OECD Model, article 5 or any other article of a treaty should be interpreted in the UK under UK law or at least common meaning. The civil law concept of agency is different from that under common law in that civil law will not usually regard the actions of an agent as though they were the actions of the principal. Civil law separates the relationship between the principal and the agent on the one hand and that between the agent and the third party (including a customer) on the other. Thus civil law countries do not, as the UK does, necessarily see the presence of the non-resident principal in the actions of the resident agent. In the UK, under common law, we interpret any actions carried out by an agent as having been performed for the principal and binding the principal in the same way as though they had carried out those actions themselves. For example, a contract arranged by an agent in the UK to deliver goods owned by a foreign principal to a customer would be treated for UK tax purposes as though the foreign principal themselves had contracted in the UK for the delivery. This is the case, regardless of whether the contract is written in the name of the principal or in the name of the agent (commentary to model treaty article 5(5), para 32.1 of July 2010 version).

The former International Tax Handbook provided:

> **851.** Treaties following the example of the OECD Model are influenced by the civil law concept of agency. Para 5 of Article 5 of the Model

> deems an agent to be a permanent establishment if the agent has and habitually exercises an authority to conclude contracts in the name of the enterprise of the treaty partner state, unless the agent is an agent of independent status within para 6. There are two pointers here to civil law influence. One is 'contracts in the name of the enterprise', the other is 'agent of independent status'.
>
> **852. In the name of principal**
>
> The making of contracts in the name of the principal would be regarded by civil law countries as a characteristic of a dependent agent whereas contracts made in the agent's own name would be characteristic of independent status (though the wording of the Article does not preclude the possibility of independent status even if the contracts are in the name of the 'enterprise'). In our law, if the contracts are made on behalf of and with the authority of the principal the relationship of the agent to the principal is not affected by whether the contract is made in the name of the principal or in the agent's own name. So agents, who in all other respects would be dependent agents according to the OECD Model, could in our law make contracts in their own name. We would not wish such agents to be regarded as agents of independent status under a treaty and therefore resist the literal meaning of 'in the name of' and argue that the words should be interpreted as 'on behalf of', which is an acceptable translation of the words 'au nom de' which appear in the French version of the Model Convention. The commentary on Article 5 of the 1992 Model included a note of our view at para 45 and in 1994 a sentence was added to the commentary itself at para 32 confirming that this is now the accepted interpretation.

The INTM discussion of OECD Model PE at 266140 [September 2011] is a lightly adapted version of OECD Commentary, so is not set out here. Article 5(5) USA/UK DTA provides a definition of agency PE very similar to pre-2017 OECD Model form:

OECD Model para 5(5)	**USA/UK DTA para 5(5)**
Notwithstanding the provisions of paragraphs 1 and 2 where a person other than an agent of an independent status to whom paragraph 6 applies is acting on behalf of an enterprise and has, and habitually exercises, in a Contracting State, an authority to conclude contracts, in the name of the enterprise,	Notwithstanding the provisions of paragraphs 1 and 2 of this Article, where a person—other than an agent of an independent status to whom paragraph 6 of this Article applies—is acting on behalf of an enterprise and has and habitually exercises in a Contracting State an authority *to conclude contracts that are binding on the enterprise,*

that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.	that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities that the person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 of this Article that, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

The US Model DTA Technical Explanation provides:[33]

> The OECD Model uses the term "in the name of that enterprise" rather than "binding on the enterprise". There is no substantive difference. As indicated in paragraph 32 to the OECD Commentary on Article 5, paragraph 5 of the Article is intended to encompass a person who "concludes contracts which are binding on the enterprise, even if those contracts are not actually in the name of the enterprise".

106.13.4 *Authority to conclude contracts*

It seems to me that "agent" is used in (at least) three broad senses:

(1) A person who can *legally* enter into a contract which binds their principal. I refer to that as a "**contract-law agent**".

(2) A person who can *effectively decide* whether their principal will enter into a contract; and though a further step to create a contract is required, that may be regarded as a legal formality or "rubber stamping".

(3) In a looser, colloquial sense: an intermediary, spokesperson, or representative (who lacks power to make an effective decision)[34]

The meaning here is meaning (2). If in practice a person can give a commercial or substantial commitment, they will be regarded as having

[33] *http://www.irs.gov/pub/irs-trty/temod006.pdf*

[34] "The use of the word 'agent' in any mercantile transaction is, of itself, wholly uninformative of the legal relationship between the parties and the use of the words 'independent agent' takes the matter no further. Either is consistent with a self-employed person acting either as a true agent who puts his principal into a contractual relationship with a third party or with such a person acting as a principal." See *Potter v CE* [1985] STC 45 at p.51 cited with approval in *Umbro International v HMRC* [2009] STC 1345 at [29].

authority to conclude contracts, even if they lack formal authority of a contract-law agent, so that the contract needs to be "rubber stamped" by the principal before it takes effect.[35]

A company with an agent of this kind in a State may in fact be resident in that State: an agent who concludes contracts on behalf of the company in a State cause the effective management/management and control of the company to take place in that State.

106.13.5 *Exercise of authority in State*

What if negotiation is done by the agent in a State, but the contract is signed elsewhere? OECD Commentary provided:

> 97... Moreover, whether or not a person habitually concludes contracts or habitually plays the principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprise should be determined on the basis of the commercial realities of the situation. The mere fact that a person has attended or even participated in negotiations in a State between an enterprise and a client will not be sufficient, by itself, to conclude that the person has concluded contracts or played the principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprise. The fact that a person has attended or even participated in such negotiations could, however, be a relevant factor in determining the exact functions performed by that person on behalf of the enterprise.

OECD say:

> A commissionnaire arrangement may be loosely defined as an arrangement through which a person sells products in a State in its own name but on behalf of a foreign enterprise that is the owner of these products. Through such an arrangement, a foreign enterprise is able to sell its products in a State without technically having a permanent establishment to which such sales may be attributed for tax purposes and without, therefore, being taxable in that State on the profits derived from such sales. Since the person that concludes the sales does not own the products that it sells, that person cannot be taxed on the profits derived from such sales and may only be taxed on the remuneration that it receives for its services (usually a commission). A foreign enterprise that uses

[35] See Dunahoo, "Contract Conclusion and Agency Permanent Establishments: Here, There and Everywhere" in Baker & Bobbett (eds) *Tax Polymath: a Life in International Taxation: Essays in Honour of John F. Avery Jones* (2010).
The point has been decided the same way in relation to branch/agency: see 106.27.4 (Branch/agency distinction).

a commissionnaire arrangement does not have a permanent establishment because it is able to avoid the application of Art. 5(5) of the OECD Model Tax Convention, to the extent that the contracts concluded by the person acting as a commissionnaire are not binding on the foreign enterprise. Since Art. 5(5) relies on the formal conclusion of contracts in the name of the foreign enterprise, it is possible to avoid the application of that rule by changing the terms of contracts without material changes in the functions performed in a State. Commissionnaire arrangements have been a major preoccupation of tax administrations in many countries, as shown by a number of cases dealing with such arrangements that were litigated in OECD countries. In most of the cases that went to court, the tax administration's arguments were rejected.

Similar strategies that seek to avoid the application of Art. 5(5) involve situations where contracts which are substantially negotiated in a State are not formally concluded in that State because they are finalised or authorised abroad, or where the person that habitually exercises an authority to conclude contracts constitutes an "independent agent" to which the exception of Art. 5(6) applies even though it is closely related to the foreign enterprise on behalf of which it is acting.

...

6. BEPS concerns arising from commissionnaire arrangements may be illustrated by the following example, which is based on a court decision that dealt with such an arrangement and found that the foreign enterprise did not have a permanent establishment:

– XCO is a company resident of State X. It specialises in the sale of medical products.
– Until 2000, these products are sold to clinics and hospitals in State Y by YCO, a company resident of State Y. XCO and YCO are members of the same multinational group.
– In 2000, the status of YCO is changed to that of commissionnaire following the conclusion of a commissionnaire contract between the two companies. Pursuant to the contract, YCO transfers to XCO its fixed assets, its stock and its customer base and agrees to sell in State Y the products of XCO in its own name, but for the account of and at the risk of XCO.
– As a consequence, the taxable profits of YCO in State Y are substantially reduced.[36]

7. Similar strategies that seek to avoid the application of Art. 5(5) involve situations where contracts which are substantially negotiated in a State are not concluded in that State because they are finalised or authorised abroad, or where the person that habitually exercises an authority to conclude contracts constitutes an "independent agent" to which the exception of Art. 5(6) applies even though it is closely related to the foreign enterprise on behalf of which it is acting.[37]

[36] The reference is to *Société Zimmer Ltd v Ministre de l'Économie* (2010) 12 ITLR 739 (with an English translation).

[37] OECD/G20 "Preventing the Artificial Avoidance of Permanent Establishment Status ACTION 7 Final Report (2015) p.28

106.13.6 *Auxiliary/preparatory work*

The article 5(4) exemption (auxiliary & preparatory work, etc)[38] applies to agents:

> Since, by virtue of paragraph 4, the maintenance of a fixed place of business solely for purposes listed in that paragraph is deemed not to constitute a permanent establishment, a person whose activities are restricted to such purposes does not create a permanent establishment either.
>
> 33. The authority to conclude contracts must cover contracts relating to operations which constitute the business proper of the enterprise. It would be irrelevant, for instance, if the person has authority to engage employees for the enterprise to assist that person's activity for the enterprise or if the person were authorised to conclude, in the name of the enterprise, similar contracts relating to internal operations only.

The US Model DTA Technical Explanation provides a similar example:[39]

> The contracts referred to in paragraph 5 are those relating to the essential business operations of the enterprise rather than ancillary activities. For example, if the agent has no authority to conclude contracts in the name of the enterprise with its customers for the sale of the goods produced by the enterprise, but it can enter into service contracts in the name of the enterprise for the enterprise's business equipment used in the agent's office, this contracting authority would not fall within the scope of the paragraph, even if exercised regularly.

106.13.7 *Habitually*

"Habitually" echoes the requirement of "degree of permanency" for a fixed place of business PE. OECD Commentary provides:

> 83. ... The use of the term "permanent establishment" in this context presupposes, of course, that that person, or as a direct result of the actions of that person, takes place repeatedly and not merely in isolated cases.
>
> 33.1 The requirement that an agent must "habitually" exercise an authority to conclude contracts reflects the underlying principle in

http://www.oecd.org/ctp/preventing-the-artificial-avoidance-of-permanent-establishment-status-action-7-2015-final-report-9789264241220-en.htm

[38] See 106.19 (Preparatory/auxiliary activities).

[39] *http://www.irs.gov/pub/irs-trty/temod006.pdf*

> Article 5 that the presence which an enterprise maintains in a Contracting State should be more than merely transitory if the enterprise is to be regarded as maintaining a permanent establishment, and thus a taxable presence, in that State. The extent and frequency of activity necessary to conclude that the agent is "habitually exercising" contracting authority will depend on the nature of the contracts and the business of the principal. It is not possible to lay down a precise frequency test. Nonetheless, the same sorts of factors considered in para 6 would be relevant in making that determination.[40]

See too 106.14 (Home office due to Covid).

106.13.8 *Extent of agency-PE*

OECD comments on the extent of an agency-PE:

> 99. Where the requirements set out in paragraph 5 are met, a permanent establishment of the enterprise exists to the extent that the person acts for the latter, i.e. not only to the extent that such a person concludes contracts or plays the principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprise.

106.13.9 *Place of business/agency PE: Relationship*

OECD Commentary provides:

> 100. Under paragraph 5, only those persons who meet the specific conditions may create a permanent establishment; all other persons are excluded. It should be borne in mind, however, that paragraph 5 simply provides an alternative test of whether an enterprise has a permanent establishment in a State. If it can be shown that the enterprise has a permanent establishment within the meaning of paragraphs 1 and 2 (subject to the provisions of paragraph 4), [fixed place of business] it is not necessary to show that the person in charge is one who would fall under paragraph 5.

106.14 Home office due to Covid

106.14.1 *OECD Covid guidance*

OECD have produced a helpful paper (**"OECD Covid guidance"**). The edition history is:

[40] See 106.8.2 (Degree of permanency).

Apr 2020 Analysis of Tax Treaties and the Impact of the COVID-19 Crisis[41]
Jan 2021 Updated guidance on tax treaties and the impact of the COVID-19 pandemic[42]

References here are to the updated guidance.

106.14.2 *Fixed place of business*

OECD Covid guidance provides:

> 14.Whilst noting that the issue of whether a PE exists is a test based on facts and circumstances, in general, a place must have a certain degree of permanency and be at the disposal of an enterprise in order for that place to be considered a fixed place of business through which the business of that enterprise is wholly or partly carried on.
> 15.Paragraph 18 of the Commentary on Article 5 of the OECD Model explains that even though part of the business of an enterprise may be carried on at a location such as an individual's home office, that should not lead to the conclusion that that location is at the disposal of that enterprise simply because that location is used by an individual (e.g. an employee) who works for the enterprise. The carrying on of intermittent business activities at the home of an employee does not make that home a place at the disposal of the enterprise. A home office may be a PE for an enterprise if it is used on a continuous basis for carrying on business of that enterprise and the enterprise generally has required the individual to use that location to carry on the enterprise's business.
> 16.During the COVID-19 pandemic, individuals who stay at home to work remotely are typically doing so as a result of public health measures: it is an extraordinary event not an enterprise's requirement. Therefore, considering the extraordinary nature of the COVID-19 pandemic, teleworking from home (i.e. the home office) because of an extraordinary event or public health measures imposed or recommended by government would not create a PE for the business/employer, either because such activity lacks a sufficient degree of permanency or continuity or because the home office is not at the disposal of the enterprise. In addition, it still provides an office which in the absence of public health measures is available to the relevant employee. This applies whether the temporary work location is the individual's home or a temporary dwelling in a jurisdiction that is not their primary place of residence.
> 17.If an individual continues to work from home after the cessation of the public health measures imposed or recommended by government, the home office may

[41] OECD Secretariat(Apr 2020) *https://read.oecd-ilibrary.org/view/?ref=127_127237-vsdagpp2t3&title=OECD-Secretariat-analysis-of-tax-treaties-and-the-impact-of-the-COVID-19-Crisis*

[42] *https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic*
See too 9.31 (Covid and treaty-residence).

> be considered to have certain degree of permanence. However, that change alone will not necessarily result in the home office giving rise to a fixed place of business PE. A further examination of the facts and circumstances will be required to determine whether the home office is now at the disposal of the enterprise following this permanent change to the individual's working arrangements.
>
> 18.Paragraphs 18 and 19 of the Commentary on Article 5 of the OECD Model[43] indicate that whether the individual is required by the enterprise to work from home or not is an important factor in this determination. Paragraph 18 explains that where a home office is used on a continuous basis for carrying on business activities for an enterprise and it is clear from the facts and circumstances that the enterprise has required the individual to use that location (e.g. by not providing an office to an employee in circumstances where the nature of the employment clearly requires an office), the home office may be considered to be at the disposal of the enterprise. As an example, paragraph 19 notes that where a cross-border worker performs most of their work from their home situated in one jurisdiction rather than from the office made available to them in the other jurisdiction, one should not consider that the home is at the disposal of the enterprise because the enterprise did not require that the home be used for its business activities.
>
> 19.In conclusion, individuals teleworking from home (i.e. the home office) as a public health measure imposed or recommended by at least one of the governments of the jurisdictions involved to prevent the spread of the COVID-19 virus would not create a fixed place of business PE for the business/employer. Agency PE

106.14.3 *Agency PE*

OECD Covid guidance provides:

> 20.The question may also arise whether the activities of an individual temporarily working from home for a non-resident employer could give rise to a dependent agent PE. Under Article 5(5) of the OECD Model, the activities of a dependent agent such as an employee will create a PE for an enterprise if the employee habitually concludes contracts on behalf of the enterprise. Thus, in order to apply Article 5(5) in these circumstances, it will be important to evaluate whether the employee performs these activities in a "habitual" way.
>
> 21.An employee's or agent's activity in a jurisdiction is unlikely to be regarded as habitual if they are only working at home in that jurisdiction because of an extraordinary event or public health measures imposed or recommended by government. Paragraph 6 of the 2014 Commentary on Article 5 explains that a PE should be considered to exist only where the relevant activities have a certain degree of permanency and are not purely temporary or transitory. Paragraph 33.1 of the Commentary on Article 5 of the 2014 OECD Model provides that the requirement that an agent must "habitually" exercise an authority to conclude

[43] See 106.15 (Remote working/home office).

> contracts means that the presence which an enterprise maintains in a jurisdiction should be more than merely transitory if the enterprise is to be regarded as maintaining a PE, and thus a taxable presence, in that jurisdiction. Similarly, paragraph 98 of the 2017 OECD Commentary on Article 5 explains that the presence which an enterprise maintains in a jurisdiction should be more than merely transitory if the enterprise is to be regarded as maintaining a PE in that jurisdiction under Article 5(5).
>
> 22.A different approach may be appropriate, however, if the employee was habitually concluding contracts on behalf of enterprise in their home jurisdiction before the COVID-19 pandemic.
>
> 23.Likewise, if the employee continues to work from home for a non-resident employer after the COVID-19 pandemic, on a habitual basis and continues to conclude contracts on behalf of the enterprise, it would be more likely that the employee would be considered to habitually conclude contracts on behalf of the enterprise. As noted in paragraph 98 of the Commentary on Article 5 of the OECD Model, the extent and frequency of activity necessary to treat an agent as acting "habitually" depends on the nature of the contracts and the business of the enterprise. In that respect, the same sort of factors considered in paragraphs 28 to 30 of the Commentary on Article 5 of the OECD Model would be relevant. For example, those paragraphs, among other things, note that whilst the practices followed by member countries have not been consistent in so far as time requirements are concerned, experience has shown that PEs normally have not been considered to exist in situations where a business had been carried on in a country through a place of business that was maintained for less than six months (conversely, practice shows that there were many cases where a PE has been considered to exist where the place of business was maintained for a period longer than six months).
>
> 24.In conclusion, the agent's activity in a jurisdiction should not be regarded as "habitual" if they have exceptionally begun working at home in that jurisdiction as a public health measure imposed or recommended by at least one of the governments of the jurisdictions involved to prevent the spread of the COVID-19 virus and, therefore, would not constitute a dependent agent PE provided the person does not continue those activities after the public health measures cease to apply.

106.14.4 *HMRC view*

HMRC sing from the same songsheet:

> **INTM261010 HMRC Approach to UK Permanent Establishments in response to COVID-19 Pandemic** [May 2020]
>
> **Background**
>
> The COVID-19 pandemic has resulted in significant disruption to international travel and business operations, including the locations of directors, employees and other individuals.
>
> HMRC is very sympathetic to the disruption that is being endured.
>
> We have been asked about HMRC's response to the permanent establishment challenges posed by COVID-19. The presence of individuals in the UK as a

> consequence of COVID-19 raises questions about whether foreign companies could establish a taxable permanent establishment for UK corporation tax purposes
>
> **Overview**
>
> HMRC considers that the existing legislation and guidance in relation to permanent establishments, already provides flexibility to deal with changes in business activities necessitated by the response to the COVID-19 pandemic.
>
> We do not consider that a non-resident company will automatically have a taxable presence by way of permanent establishment after a short period of time. Similarly, whilst the habitual conclusion of contracts in the UK would also create a taxable presence in the UK, it is a matter of fact and degree as to whether that habitual condition is met. Furthermore, the existence of a UK PE does not in itself mean that a significant element of the profits of the non-resident company would be taxable in the UK...
>
> **UK Permanent Establishments**
>
> With regard to Permanent Establishments (PEs), we consider that the current legislation, treaties and related guidance provides sufficient flexibility with regard to whether a PE has been created in the UK. In particular, s1141(1) CTA 2010 requires either that a business is carried on through a fixed place of business in the UK, or that an agent acting on behalf of the company has and habitually exercises authority to carry out the company's business in the UK.
>
> As INTM264430 makes clear, HMRC considers that a non-resident company will not have a UK fixed place of business PE after a short period of time as a degree of permanence is required. Similarly, whilst the habitual conclusion of contracts in the UK would also create a Dependant Agent PE in the UK, it is a matter of fact and degree as to whether that habitual condition is met. Furthermore, the existence of a UK PE does not in itself mean that a significant element of the profits of the non-resident company would be taxable in the UK. The attribution of profits to a UK PE would depend on the level of activity in the UK, and the relative value of that activity, in accordance with the guidance at INTM26700 onwards.

RDR Manual provides:

> **RDRM13410 Annex D: International tax clarifications due to coronavirus (COVID 19) - Q&A** [Aug 2020]
>
> **Company residence**
>
> **12. Have HMRC considered the situation where people are working in a country they are not usually in and their company changing residence as a result of place of central management and control?**
>
> HMRC does not believe such travel restrictions will necessarily result in a change of a company's tax residence, or cause there to be a UK permanent establishment and has published guidance in INTM120185 and INTM261010. HMRC believes the guidance is consistent with the Analysis of Tax Treaties and the Impact of the COVID-19 pandemic guidance published by the OECD Secretariat on 3 April 2020.

106.15 Remote working/home office

The issue has become more important as home working has increased after Covid, including senior positions. The question arises whether the home office might be a PE.[44]

The OECD commentary discusses a home office.

> 18. Even though part of the business of an enterprise may be carried on at a location such as an individual's home office, that should not lead to the automatic conclusion that that location is at the disposal of that enterprise simply because that location is used by an individual (e.g. an employee) who works for the enterprise. Whether or not a home office constitutes a location at the disposal of the enterprise will depend on the facts and circumstances of each case. In many cases, the carrying on of business activities at the home of an individual (e.g. an employee) will be so intermittent or incidental that the home will not be considered to be a location at the disposal of the enterprise (see paragraph 12 above). Where, however,
>
> [1] a home office is used on a continuous basis for carrying on business activities for an enterprise and
>
> [2] it is clear from the facts and circumstances that the enterprise has required the individual to use that location to carry on the enterprise's business (e.g. by not providing an office to an employee in circumstances where the nature of the employment clearly requires an office),
>
> the home office may be considered to be at the disposal of the enterprise.
>
> 19. A clear example is that of a non-resident consultant who is present for an extended period in a given State where she carries on most of the business activities of her own consulting enterprise from an office set up in her home in that State; in that case, that home office constitutes a location at the disposal of the enterprise. Where, however, a cross-frontier worker performs most of his work from his home situated in one State rather than from the office made available to him in the other State, one should not consider that the home is at the disposal of the enterprise because the enterprise did not require that the home be used for its business activities. It should be noted, however, that since the vast majority of employees reside in a State where their employer has at its disposal one or more places of business to which these employees report, the question of whether or not a home office constitutes a location at the disposal of an enterprise will rarely be a practical issue. Also, the activities carried on at a home office will often be merely auxiliary and will therefore fall within the exception of paragraph 4 [Preparatory/auxiliary activities].

CIOT say:

> With traditional mobility (formal assignments) and business travel it is, generally, clearer that the individual would be working for the benefit of an

[44] There are also employment income and social security issues.

> entity in the destination country, including time physically in an office location there, working on projects with local staff or meeting local customers . In turn, these arrangements are more clear -cut and managed through secondment agreements clarifying the individuals are working for the benefit of the local entity, transfer pricing arrangements, payroll withholdings in the destination and so on. In remote work situations, these hallmarks tend not to be present, as individuals work from a home or holiday accommodation in the destination country and often have no interaction with the local entity, local teams or local customers.
>
> ... different countries take different interpretations of remote worker situations (and of the OECD guidance contained at paragraph 18 of the commentary) – some countries appear to have a default position that a home office cannot be at the disposal of the individual's employer, whilst other countries take the opposite view... In our view the OECD commentary [set out above] is not particularly helpful in the vast majority of situations that have arisen following the pandemic . This is because in these cases the choice to work remotely is the employee's, not the employer's, and it may only be for limited periods of time and not continuously, although many employees are now opting to work from home on a permanent basis.
>
> Issues on a practical level that must be considered include, inter alia, what activities the individual will be undertaking/how long for/whether other staff will be doing similarly in the same location/where the individual will be based . Where individuals are more senior and/or are front office staff then clearly the potential PE issue is accentuated. We recognise that the reality is that all the circumstances need to be worked through to determine the degree of risk in triggering a PE in the country concerned (and indeed in the UK when things are the other way round). ...
>
> The existing OECD guidance on PEs is potentially contradictory in places and more detail/clarification would be welcome. On the one hand, the guidance currently suggests that if there are relatively senior people in a territory making a significant contribution to the business, this activity cannot be preparatory or auxiliary in nature. Nevertheless, if they are working from home in that country including on a permanent basis, instead of being based in an office there, the guidance separately implies that cannot usually be a fixed place of business.[45]

See too 106.14 (Home office due to Covid).

106.16 Independent agent exemption

The rule in short is that an independent agent is not a PE. I refer to this as the "**independent agent exemption**".

There are three (main) versions of the independent agent exemption:

[45] CIOT, "Review of treaty policy positions - response" (2022) *https://www.tax.org.uk/ref1016*

(1) UK-law independent agent exemption
(2) OECD Model independent agent exemption; this was amended in 2017 so I refer to:
 (a) Pre 2017 OECD Model independent agent exemption
 (b) Post-2017 OECD Model independent agent exemption

Investment managers and brokers may be an agency-PE, but have a special exemption which is intended to clarify the independent agent exemption; see 72.1 (Investment manager exemptions - Introduction).

It is helpful to set out the UK-law and pre-2017 OECD model independent agent exemptions side by side:

s.1142(1) CTA 2010	**art 5(6) OECD Model (pre-2017)**
A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent's business.	An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

OECD Model is slightly differently worded, but the differences do not seem material.

OECD Model independent agent exemption was rewritten in 2017 as part of the BEPS project action 7, to deal with Commissionnaire arrangements. Existing DTAs could be brought into line with new wording under art 12 MLI. However the UK has opted out of art 12. So UK DTAs existing at the current time will retain the pre-2017 wording. Presumably, future DTAs are likely to use that wording and not the post-2017 wording, but that will depend on the views of treaty-partners, and HMRC practice in the future.

It may be convenient to set out the pre- and post-2017 OECD model wording, to highlight the differences (which the UK has chosen to reject):

Pre-2017 OECD Model	**Post 2017 OECD Model**
An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely	6. Paragraph 5 shall not apply where the person acting in a Contracting State on behalf of an

because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.	enterprise of the other Contracting State carries on business in the firstmentioned State as an independent agent and acts for the enterprise in the ordinary course of that business...

So far the post 2017 Model is just a plain English rewrite of the pre-2017 version, but the post-2017 Model then adds a further condition which has no equivalent in the earlier version:

> Where, however, a person acts exclusively or almost exclusively on behalf of one or more enterprises to which it is closely related, that person shall not be considered to be an independent agent within the meaning of this paragraph with respect to any such enterprise...
> 8. For the purposes of this Article, a person or enterprise is closely related to an enterprise if, based on all the relevant facts and circumstances, one has control of the other or both are under the control of the same persons or enterprises. In any case, a person or enterprise shall be considered to be closely related to an enterprise if one possesses directly or indirectly more than 50% of the beneficial interest in the other (or, in the case of a company, more than 50% of the aggregate vote and value of the company's shares or of the beneficial equity interest in the company) or if another person or enterprise possesses directly or indirectly more than 50% of the beneficial interest (or, in the case of a company, more than 50% of the aggregate vote and value of the company's shares or of the beneficial equity interest in the company) in the person and the enterprise or in the two enterprises.

The post-2017 OECD Commentary will not be relevant to DTAs with pre-2017 wording, so far as it discusses the post-2017 wording; instead the pre-2017 commentary will still be applicable.

OECD Commentary summarises:

> 36. Where an enterprise of a Contracting State carries on business dealings through a broker, general commission agent or any other agent of an independent status, it cannot be taxed in the other Contracting State in respect of those dealings if the agent is acting in the ordinary course of his business (cf. paragraph 32 above). Although it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise,

> paragraph 6 has been inserted in the Article for the sake of clarity and emphasis.

The point that the independent agent exemption is only inserted for the avoidance of doubt is important in contexts, such as pre-1963 DTAs, where the exemption is not stated expressly; but these are now rare.

> 37. A person will come within the scope of paragraph 6, i.e. he will not constitute a permanent establishment of the enterprise on whose behalf he acts only if
>
> a) he is independent of the enterprise both legally and economically, and
> b) he acts in the ordinary course of his business when acting on behalf of the enterprise.

The requirements of independent status and "ordinary course of business" overlap somewhat, but it is best to consider them separately.

106.17 Independent status

This is a multifactorial concept.

106.17.1 *Control by principal*

OECD Commentary provides:

> 104. Whether a person is independent of the enterprise represented depends on the extent of the obligations which this person has vis-a-vis the enterprise. Where the person's commercial activities for the enterprise are subject to detailed instructions or to comprehensive control by it, such person cannot be regarded as independent of the enterprise. Another important criterion will be whether the entrepreneurial risk has to be borne by the person or by the enterprise the person represents.
>
> 38.1 In relation to the test of legal dependence, it should be noted that the control which a parent company exercises over its subsidiary in its capacity as shareholder is not relevant in a consideration of the dependence or otherwise of the subsidiary in its capacity as an agent for the parent. This is consistent with the rule in paragraph 7 of Article 5. But, as paragraph 41 of the Commentary indicates, the subsidiary may be considered a dependent agent of its parent by application of the same tests which are applied to unrelated companies.
>
> 38.2 The following considerations should be borne in mind when determining whether an agent may be considered to be independent.
>
> 106. An independent agent will typically be responsible to his principal for the results of his work but not subject to significant control with respect to the manner in which that work is carried out. He will not be subject to detailed instructions from the principal as to the conduct of the work. The fact that the principal is relying on the special skill and knowledge of the agent is an

> indication of independence.
>
> 107. Limitations on the scale of business which may be conducted by the agent clearly affect the scope of the agent's authority. However such limitations are not relevant to dependency which is determined by consideration of the extent to which the agent exercises freedom in the conduct of business on behalf of the principal within the scope of the authority conferred by the agreement.
>
> 108. It may be a feature of the operation of an agreement that an agent will provide substantial information to a principal in connection with the business conducted under the agreement. This is not in itself a sufficient criterion for determination that the agent is dependent unless the information is provided in the course of seeking approval from the principal for the manner in which the business is to be conducted. The provision of information which is simply intended to ensure the smooth running of the agreement and continued good relations with the principal is not a sign of dependence.

106.17.2 *Multiple principals*

OECD Commentary provides:

> 109. Another factor to be considered in determining independent status is the number of principals represented by the agent. As indicated in paragraph 111, independent status is less likely if the activities of the agent are performed wholly or almost wholly on behalf of only one enterprise over the lifetime of the business or a long period of time. However, this fact is not by itself determinative. All the facts and circumstances must be taken into account to determine whether the agent's activities constitute an autonomous business conducted by him in which he bears risk and receives reward through the use of his entrepreneurial skills and knowledge. Where an agent acts for a number of principals in the ordinary course of his business and none of these is predominant in terms of the business carried on by the agent, dependence may exist if the principals act in concert to control the acts of the agent in the course of his business on their behalf.

The INTM provides:

> **INTM264080 Independent agents do not create a permanent establishment** [Apr 2020]
>
> [The INTM summarises s.1142(1) and continues:] Whether an agent is of independent status is tested by reference to the legal, financial and commercial characteristics of the particular business relationship between the non-resident and the agent. If the relationship between them is the same as a relationship between independent businesses dealing with each other at arms length then the agent will be 'an independent agent'. For example, an agent who acted for other independent unconnected businesses on the same terms as those under which he acted for the non-resident could be an 'independent agent' and it would be clear that the agent had been acting in the ordinary course of his business if his activities were repeated for various unconnected customers. Dependent or independent status does not turn on the shareholding relationship between

> principal and agent. The fact that an agent is a subsidiary company does not necessarily make it a dependent agent.[46] However, a subsidiary company will constitute a domestic law agency PE of its parent company in the same way as any other agent of the parent company if independence by reference to the factors detailed in the guidance that follows cannot be demonstrated.
>
> Whether an agent acts in the ordinary course of their own business is something that should be considered by reference to the behavioural facts as opposed to intentions not followed through in business performance. Matters relevant would include (but not necessarily be limited to) the number of unrelated principals that the agent acted for and the extent of the business activities customarily carried out by independent agents in the specific business sector concerned.
>
> Assuming they did act in the ordinary course of their own business, in general, an agent would be independent and would not constitute an agency PE of the foreign enterprise for which it acts where it is independent of the principal enterprise both legally and economically. The perspective of application of this test is with relevance to the business conducted by the agent for the principal rather than, for example, any shareholding relationship between the principal and agent. Other relevant factors of independence may include:
>
> - the extent of the obligations which the agent has vis-à-vis the non-resident;
> - whether the agent is subject to detailed instructions or comprehensive control;
> - whether the agent bears the entrepreneurial risk for the business that the agent carries out for the non-resident;
> - the degree of reliance on the agent's special skill and knowledge by the principal in the business done, and
> - Whether there is reference by the agent to the principal for approval of the manner in which the business is to be conducted.
>
> There will undoubtedly be circumstances where, whether deliberately or not, the relationship between a non resident and a UK agent is obscure or even where the declared terms of that relationship are very different from the actual terms. In such cases there is no substitute for detailed enquiry into the relationship to see whether it falls within the category of dependent or independent agent.

INTM discusses OECD Model wording. It partly duplicates the text of the discussion on domestic law agency-PE. The other parts provide:

> **INTM266150. Agent of independent status – Article 5(6)** [Aug 2017]
>
> ... The work done by an agent, where that work was all done for one non-resident client, is unlikely to be viewed as the conduct of his 'own business' but more likely that of the non-resident's business. An exception to that view might be where the concentration on one client was an unusual occurrence within a settled continuous trade involving several clients. ...

106.17.3 *"Ordinary course of business"*

OECD Commentary tries but cannot elucidate this:

[46] See 106.18 (Controlled companies/groups).

> 38.7 Persons cannot be said to act in the ordinary course of their own business if, in place of the enterprise, such persons perform activities which, economically, belong to the sphere of the enterprise rather than to that of their own business operations. Where, for example, a commission agent not only sells the goods or merchandise of the enterprise in his own name but also habitually acts, in relation to that enterprise, as a permanent agent having an authority to conclude contracts, he would be deemed in respect of this particular activity to be a permanent establishment, since he is thus acting outside the ordinary course of his own trade or business (namely that of a commission agent), unless his activities are limited to those mentioned at the end of paragraph 5.
>
> 38.8 In deciding whether or not particular activities fall within or outside the ordinary course of business of an agent, one would examine the business activities customarily carried out within the agent's trade as a broker, commission agent or other independent agent rather than the other business activities carried out by that agent. Whilst the comparison normally should be made with the activities customary to the agent's trade, other complementary tests may in certain circumstances be used concurrently or alternatively, for example where the agent's activities do not relate to a common trade.
>
> 39. [This deals with insurance companies and is not discussed here].

106.17.4 *USA DTA*

Article 4(6) USA/UK DTA is similar to OECD Model.[47]

The USA/UK DTA Technical Explanation provides:[48]

> Whether the agent and the enterprise are independent is a factual determination. Among the questions to be considered are the extent to which the agent operates on the basis of instructions from the enterprise. An agent that is subject to detailed instructions regarding the conduct of its operations or comprehensive control by the enterprise is not legally independent.
>
> In determining whether the agent is economically independent, a relevant factor is the extent to which the agent bears business risk. Business risk refers primarily to risk of loss. An independent agent typically bears risk of loss from its own activities. In the absence of other factors that would establish dependence, an agent that shares business risk with the enterprise, or has its own business risk, is economically independent because its business activities are not integrated with those of the principal. Conversely, an agent that bears little or no risk from the activities it performs is not economically independent and therefore is not described in paragraph 6.
>
> Another relevant factor in determining whether an agent is economically

[47] "An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent, or any other agent of an independent status, provided that such person is acting in the ordinary course of his business as an independent agent."

[48] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> independent is whether the agent has an exclusive or nearly exclusive relationship with the principal. Such a relationship may indicate that the principal has economic control over the agent. A number of principals acting in concert also may have economic control over an agent. The limited scope of the agent's activities and the agent's dependence on a single source of income may indicate that the agent lacks economic independence. It should be borne in mind, however, that exclusivity is not in itself a conclusive test; an agent may be economically independent notwithstanding an exclusive relationship with the principal if it has the capacity to diversify and acquire other clients without substantial modifications to its current business and without substantial harm to its business profits. Thus, exclusivity should be viewed merely as a pointer to further investigation of the relationship between the principal and the agent. Each case must be addressed on the basis of its own facts and circumstances.

106.17.5 *Broker/commission agent*

The precise meanings of broker and general commission agent in OECD Model PE definition do not greatly matter since both terms are subsumed into "other agent of independent status".

For completeness, "broker" is discussed at 72.5.2 ("Broker"). The former International Tax Handbook explained "general commission agent" in a passage too amusing to omit:

> **935. General commission agent**
> ... Although the words general commission agent appear in the legislation, nobody really knows what a general commission agent is and textbooks on agency make no reference to such a character; the expression is indeed used in our Double Taxation Agreements but it is not a term that our treaty partners are familiar with. They say it has no particular meaning for them and think that it is there because the British were rather insistent about it.
>
> **936. London Produce case**
> The one case to which we most often turn for guidance on who may or may not be a general commission agent is the London Produce case [*Fleming v London Produce Co* 44 TC 582]. The London Produce company acted as agents in importing meat from New Zealand and selling it for commission on the London market. 95% of its business was carried out for one principal. It claimed to be a general commission agent.
>
> Megarry J enjoyed himself with the expression saying that he found it puzzling and unidentified. He wondered whether he might get at a meaning by looking at the words general, commission and agent separately and then adding the constituent parts together. He felt, however, that that was not a good idea because one could not arrive at the meaning of a particular high office by adding together the separate words lord, privy and seal. He came to the conclusion that a general commission agent must have broker-like qualities as it is included in the term 'broker' in the Section and that it is someone who holds himself out as being ready to work for clients generally. In his view Section 82(1) [TMA] (then Section 373(1) ITA 1952) could not be relevant if 'in substance what is done is

> that (the non-resident) carries on business within the UK through the medium of an agent who is virtually a sole agent running the entire business for him and merely sending him remittances on request'. London Produce lost the case.
> The only other case is the earlier one of *Boyd v Stephen* [10 TC 698] (concerned with bacon) when Rowlatt rather summarily dismissed the suggestion that the agents were general commission agents on the grounds that they did much more than such an agent would normally do. What the words are probably getting at is somebody like an import commission agent. That is someone, probably more common in 1915, who, acting for a non-resident producer, will sell goods through a broker on the market in return for a commission. It is unlikely that the authors of the Section had in mind the smaller domestic markets such as meat and bacon.

106.17.6 *Agent of insurance company*

Article 5(6) of the UN Model Treaty provides:

> Notwithstanding the preceding provisions of this Article, an insurance enterprise of a Contracting State shall, except in regard to re-insurance, be deemed to have a permanent establishment in the other Contracting State if
> [a] it collects premiums in the territory of that other State or
> [b] insures risks situated therein through a person
> other than an agent of an independent status to whom paragraph 7 applies.

The General Insurance Manual provides:

> **GIM10121 permanent establishment** [Jun 2016]
> The OECD Model does not contain an Article on the lines of Article 5(6)[49] of the UN Model Treaty (this tends to give greater taxing rights to the Host State, and is more often encountered in relation to developing countries, but the actual Treaty should always be examined). This Article deems a permanent establishment to exist in a State if the activities there include collecting premiums or insuring risks other than through an independent agent. GIM10115 explains that intention is important in construing treaties, and so the absence of such an Article will found an argument on *a contrario* lines that these features are not sufficient unless the treaty does contain the UN Model Article.
> This proposition was considered and approved in a Canadian case involving an insurer, *Knights of Columbus v HM Queen*.[50]
> It was also concluded that

[49] The original erroneously reads: article 6(5).

[50] 2008 TCC 307.
http://www.dentons.com/~/media/FMC%20Import/misc/pdf/r/reasons%20for%20judgement.pdf

[1] if an agency is legally or economically dependent, then Article V(5) applies and activities will amount to a permanent establishment if there is an authority to conclude contracts in the name of the business
[2] if, on the other hand, the agent is independent, then there will be a permanent establishment only if Article V(1) applies and the activities carried on through a fixed place of business are the business of the insurance company
[3] distinguishing between a place used for the agent's own activities and one used by the agent for the insurer's activities is assisted by the reference in the OECD Model Commentary to a fixed place of business being 'at the disposal' of the enterprise (insurance company, in this context): this does not mean having the key, it must be a place of permanence, through which the business is carried on, and indicative factors for being at the insurer's disposal are that it pays the expenses, requires the agent to use it, stipulates what the office will contain and that customers will be met there

- once it has been determined that the agent is in business on its own account, it is illogical to find that administrative operations it conducts, even if not at the home office, are anything other than activities of its own business
- if there is a dependent agent permanent establishment, the Article V(6) exclusions are applied in the light of all the agent's activities (not just at the home office), but if applying it to a fixed place of business, only the activities there are considered.

Although this case is of only persuasive authority, it suggests that, provided the insurance risk is genuinely borne elsewhere (see GIM10220), and the agent is independent, significant insurance-related activities can take place in a State without giving rise to a permanent establishment. In that case, focus is on the service fee charged to the agent.

106.18 Controlled companies/groups

Article 5(7) OECD Model provides:

> The fact that a company[51] which is a resident of a Contracting State controls or is controlled by a company
> [a] which is a resident of the other Contracting State, or
> [b] which carries on business in that other State (whether through a permanent establishment or otherwise),
> shall not of itself constitute either company a permanent establishment of the other.

OECD Commentary provides:

> 115. It is generally accepted that the existence of a subsidiary company does not, of itself, constitute that subsidiary company a permanent establishment of its parent company. This follows from the principle that, for the purpose of taxation, such a subsidiary company constitutes an independent legal entity. Even the fact

[51] See 30.15.4 (Company: DTA definition).

> that the trade or business carried on by the subsidiary company is managed by the parent company does not constitute the subsidiary company a permanent establishment of the parent company.
>
> 116. A parent company may, however, be found, under the rules of paragraph 1 or 5 of the Article, to have a permanent establishment in a State where a subsidiary has a place of business. Thus, any space or premises belonging to the subsidiary that is at the disposal of the parent company (see paragraphs 10 to 9 above) and that constitutes a fixed place of business through which the parent carries on its own business will constitute a permanent establishment of the parent under paragraph 1, subject to paragraph 3 and 4 of the Article (see for instance, the example in paragraph 15 above). Also, under paragraph 5, a parent will be deemed to have a permanent establishment in a State in respect of any activities that its subsidiary undertakes for the condition of that paragraph are met (see paragraphs 82 to 99 above), unless paragraph 6 of the Article applies.
>
> 117. The same principles apply to any company forming part of a multinational group so that such a company may be found to have a permanent establishment in a State where it has at its disposal (see paragraphs 10 to 19 above) and uses premises belonging to another company of the group, or if the former company is deemed to have a permanent establishment under paragraph 5 of the Article(see paragraphs 82 to 99 above). The determination of the existence of a permanent establishment under the rules of paragraph 1 or 5 of the Article must, however, be done separately for each company of the group. Thus, the existence in one State of a permanent establishment of one company of the group will not have any relevance as to whether another company of the group has itself a permanent establishment in that State.
>
> 118. Whilst premises belonging to a company that is a member of a multinational group can be put at the disposal of another company of the group and may, subject to the other conditions of Article 5, constitute a permanent establishment of that other company if the business of that other company is carried on through that place, it is important to distinguish that case from the frequent situation where a company that is a member of a multinational group provides services (e.g. management services) to another company of the group as part of its own business carried on in premises that are not those of that other company and using its own personnel. In that case, the place where those services are provided is not at the disposal of the latter company and it is not the business of that company that is carried on through that place. That place cannot, therefore, be considered to be a permanent establishment of the company to which the services are provided. Indeed, the fact that a company's own activities at a given location may provide an economic benefit to the business of another company does not mean that the latter company carries on its business through that location: clearly, a company that merely purchases parts produced or services supplied by another company in a different country would not have a permanent establishment because of that, even though it may benefit from the manufacturing of these parts or the supplying of these services.

There is no equivalent of art 5(7) in UK-law PE, but it is considered that the same rules should be implied.

106.19 Preparatory/auxiliary activities

It may be helpful to set out the UK law and OECD Model rules side by side:

Section 1143 CTA 2010	**OECD Model para 5(4)**
(1) If the condition in subsection (2) is met, a company is not regarded as having a permanent establishment in a territory by reason of the fact that— (a) a fixed place of business is maintained there for the purpose of carrying on activities for the company, or (b) an agent carries on activities there for and on behalf of the company.	Notwithstanding the preceding provisions of this Article, the term “permanent establishment” shall be deemed not to include: any other activity;
(2) The condition is that, in relation to the business of the company as a whole, the activities carried on [a] are only of a preparatory or auxiliary character and [b] are not part of a fragmented business operation.[52]	[See proviso below]
(3) In this section “activities of a preparatory or auxiliary character” include (without prejudice to the generality of that expression)—	
(a) the use of facilities for the purpose of storage, display or delivery of goods or merchandise belonging to the company,	*a)* the use of facilities solely for the purpose of storage, display or delivery of goods or merchandise belonging to the enterprise;
(b) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of storage, display or delivery,	*b)* the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;

[52] See 106.20 (Fragmented business operation).

(c) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of processing by another person, and	*c)* the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;
(d) purchasing goods or merchandise, or collecting information, for the company.	*d)* the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;
	e) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise,
	f) the maintenance of a fixed place of business solely for any combination of activities mentioned in subparas *a)* to *e)*,
[See (2) above]	provided that such activity or, in the case of subpara *f)*, the overall activity of the fixed place of business, is of a preparatory or auxiliary character.

The differences in wording do not seem significant.

INTM para 264050 discusses this, but need not be set out as it only refers to (and repeats some material from) the INTM discussion of OECD Model PE:

> **INTM266120 activities specifically excluded from the definition of permanent establishment** [Apr 2020]
> Model treaty Article 5(4) lists certain activities that are not to be treated as permanent establishments even if they are carried on through a fixed place of business. ...

The Manual sets out a précis of the article and continues:

> In deciding whether or not a fixed place of business of a non-resident enterprise is used for activities of a preparatory or auxiliary nature, consider the following factors:
>
> 1. Are the services it performs so remote from the actual realisation of profits by the enterprise that it would be difficult to allocate any part of the profit to the fixed place of business? If they are, then the fixed place of business

> will not be a permanent establishment. The benchmark to gauge the activities against is that of the trade as a whole entity. So, for example, if the UK activities are no different to the essence of the trade, e.g. the UK personnel collect market research information and the non-resident company's main trade is concerned with market research, then the activities in the UK would not be preparatory or auxiliary and there could be a permanent establishment in the UK.

An example is a research division of a trading or manufacturing company.

> 2. Does the activity of the fixed place of business form an essential and significant part of the enterprise as a whole?

This sentence is from OECD Commentary but it cannot be a correct or helpful test since all the activities specified as auxiliary are significant and some of them are essential.

> A fixed place of business whose general purpose is identical to the general purpose of the enterprise is not used for activities of a preparatory or auxiliary nature. Examples of this are fixed places of business used for the purpose of managing an enterprise, or where a fixed place of business is maintained to supply spare parts of machinery supplied by the enterprise to customers and to service such machinery.
>
> Note that the exclusion of activities of a preparatory or auxiliary nature from the definition of a permanent establishment only applies if these activities are solely for the non-resident enterprise. If the activities are performed not only for the enterprise but also for other enterprises, including other companies in the same group, then the fixed place of business will not be within the scope of the exclusion.

I find the last paragraph rather surprising though it is in OECD Commentary. OECD Commentary explains the reason for the exemption for collecting information:

> The reference to the collection of information in subpara d) is intended to include the case of the newspaper bureau which has no purpose other than to act as one of many "tentacles" of the parent body; to exempt such a bureau is to do no more than to extend the concept of "mere purchase".

106.20 Fragmented business operation

Section 1143 CTA 2010 provides:

> (2A) Activities are "part of a fragmented business operation" if—
>
> (a) they are carried on (whether at the same place or at different places in the same territory) by the company or a person closely

> related to the company,
>
> (b) they constitute complementary functions that are part of a cohesive business operation, and
>
> (c) subsection (2B) applies.
>
> (2B) This subsection applies if—
>
> (a) the overall activity resulting from the combination of the functions mentioned in subsection (2A)(b) is not activity that is only of a preparatory or auxiliary character, or
>
> (b) the company or a person closely related to the company has a permanent establishment in the territory by reason of carrying on any of those functions.
>
> (2C) A person who is not a company is to be treated for the purposes of subsection (2B)(b) as having a permanent establishment in a territory if, were the person a company, the person would have a permanent establishment in the territory.
>
> (2D) For the purposes of this section, one person ("A") is closely related to another person ("B") if—
>
> (a) A is able to secure that B acts in accordance with A's wishes (or vice versa),
>
> (b) B can reasonably be expected to act, or typically acts, in accordance with A's wishes (or vice versa),
>
> (c) a third person is able to secure that A and B act in accordance with the third person's wishes,
>
> (d) A and B can reasonably be expected to act, or typically act, in accordance with a third person's wishes, or
>
> (e) the 50% investment condition is met in relation to A and B.
>
> (2E) The 50% investment condition is met in relation to A and B if—
>
> (a) A has a 50% investment in B (or vice versa), or
>
> (b) a third person has a 50% investment in each of A and B, and section 259ND of TIOPA 2010 (meaning of "50% investment") applies for the purposes of determining whether a person has a "50% investment".[53]

This is the statutory equivalent of the OECD fragmentation rule.

106.20.1 *OECD fragmentation rule*

Article 5 OECD Model provides:

> 4.1 Paragraph 4 shall not apply to a fixed place of business that is used or maintained by an enterprise if the same enterprise or a closely related enterprise carries on business activities at the same place or at another

[53] See 105.8 (% investment tests).

> place in the same Contracting State and
> a) that place or other place constitutes a permanent establishment for the enterprise or the closely related enterprise under the provisions of this Article, or
> b) the overall activity resulting from the combination of the activities carried on by the two enterprises at the same place, or by the same enterprise or closely related enterprises at the two places, is not of a preparatory or auxiliary character,
> provided that the business activities carried on by the two enterprises at the same place, or by the same enterprise or closely related enterprises at the two places, constitute complementary functions that are part of a cohesive business operation.
>
> 8.[a] For the purposes of this Article, a person or enterprise is closely related to an enterprise if, based on all the relevant facts and circumstances,
> [i] one has control of the other or
> [ii] both are under the control of the same persons or enterprises.
> [b] In any case, a person or enterprise shall be considered to be closely related to an enterprise if
> [i] one possesses directly or indirectly more than 50% of the beneficial interest in the other (or, in the case of a company, more than 50% of the aggregate vote and value of the company's shares or of the beneficial equity interest in the company) or
> [ii] if another person or enterprise possesses directly or indirectly more than 50% of the beneficial interest (or, in the case of a company, more than 50% of the aggregate vote and value of the company's shares or of the beneficial equity interest in the company) in the person and the enterprise or in the two enterprises.

106.20.2 *BEPS MLI: fragmentation*

OECD BEPS MLI has restricted the preparatory/auxiliary activities exemption.[54] IFS summarise:

> The BEPS process sought to deal with concerns that companies are avoiding tax by structuring themselves such that they do not have a

[54] OECD/G20 "Preventing the Artificial Avoidance of Permanent Establishment Status ACTION 7 Final Report (2015) p.28 *http://www.oecd.org/ctp/preventing-the-artificial-avoidance-of-permanent-establishment-status-action-7-2015-final-report-9789264241220-en.htm*

> taxable presence (a PE) in a foreign jurisdiction by broadening the definition of PEs in international tax rules. The revisions are particularly focused on tackling issues related to the digital economy. Notably, entities are currently exempt from PE status if they undertake only activities of a 'preparatory or auxiliary character', such as storage and distribution. This means that a UK consumer may purchase a good via the website of a foreign company (such as Amazon) that is then delivered from a UK distribution centre, and that transaction will not lead to a UK corporate tax liability because there was no UK PE involved. This is the correct outcome under current law. But it leads to concerns that some activities are being undervalued and countries therefore missing out on taxable income. Storage and distribution facilities may actually constitute core business activities that contribute to the creation of value added (for example, by providing quick distribution or high levels of customer service).
>
> ... The rules dictating PE status will be revised to move where the dividing line is drawn. In particular, the revised rules will specify that storage and distribution activities will constitute the operation of a PE unless the activities are genuinely only preparatory and auxiliary in nature, which is, of course, still somewhat subjective...
>
> Redefining PE status should result in taxing rights that better reflect the source of profits if countries find a way to adjust bilateral treaties to implement a new PE definition, and if that works to redefine some activities that are currently deemed auxiliary. It is worth noting that this change may work in both directions for the UK. For example, more income (and therefore tax) could be received from the UK storage and distribution facilities of foreign multinationals (such as Amazon) – although some companies may choose to adjust their activities to avoid becoming a PE. At the same time, some UK multinationals may receive less foreign income if their foreign storage and distribution facilities are given PE status.[55]

Article 13 BEPS MLI provides:

> 1. A Party may choose to apply paragraph 2 (Option A) or paragraph 3 (Option B) or to apply neither Option.

The UK has chosen not to apply option A or B, so we move on to art 13(4):

> 4. A provision of a Covered Tax Agreement[56] (as it may be modified by

[55] IFS, "Green Budget" (2016) *https://ifs.org.uk/sites/default/files/2022-08/gb2016.pdf*

[56] See 107.16.3 (Covered Tax Agreement).

> paragraph 2 or 3) that lists specific activities deemed not to constitute a permanent establishment shall not apply to a fixed place of business that is used or maintained by an enterprise if the same enterprise or a closely related enterprise carries on business activities at the same place or at another place in the same Contracting Jurisdiction and:
>
> a) that place or other place constitutes a permanent establishment for the enterprise or the closely related enterprise under the provisions of a Covered Tax Agreement defining a permanent establishment; or
>
> b) the overall activity resulting from the combination of the activities carried on by the two enterprises at the same place, or by the same enterprise or closely related enterprises at the two places, is not of a preparatory or auxiliary character,
>
> provided that the business activities carried on by the two enterprises at the same place, or by the same enterprise or closely related enterprises at the two places, constitute complementary functions that are part of a cohesive business operation.
>
> 5. ...
>
> b) Paragraph 4 shall apply to provisions of a Covered Tax Agreement (as they may be modified by paragraph 2 or 3) that list specific activities that are deemed not to constitute a permanent establishment even if the activity is carried on through a fixed place of business (or provisions of a Covered Tax Agreement that operate in a comparable manner).
>
> 8. Each Party that has not made a reservation described in subparagraph a) or c) of paragraph 6 and does not choose to apply an Option under paragraph 1 shall notify the Depositary of whether each of its Covered Tax Agreements contains a provision described in subparagraph b) of paragraph 5, as well as the article and paragraph number of each such provision. Paragraph 4 shall apply with respect to a provision of a Covered Tax Agreement only where all Contracting Jurisdictions have made a notification with respect to that provision under this paragraph or paragraph 7.

UK MLI Notifications[57] sets out the list of 121 DTAs which contain a provision described in art 13(5)(b), and so fall within the scope of art 13.

106.21 Services PE clause

106.21.1 *UN Model services PE*

Para 5(3) UN Model Treaty provides:

> 3. The term "permanent establishment" also encompasses ...
>
> (b) The furnishing of services, including consultancy services, by an enterprise through employees or other personnel engaged by

[57] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf*

> the enterprise for such purpose, but only if activities of that nature continue within a Contracting State for a period or periods aggregating more than 183 days in any 12-month period commencing or ending in the fiscal year concerned.

This clause is found in the UK/China DTA and is common for Asian treaties.

106.21.2 *OECD Model services PE*

OECD Commentary offers an optional clause which I call the **"OECD services PE clause"**. The clause is found in a few UK treaties,[58] though it is not common.

The clause has three limbs. It begins:

> [1] Notwithstanding the provisions of paragraphs 1, 2 and 3, where an enterprise of a Contracting State performs services in the other Contracting State
> a) [i] through an individual who is present in that other State for a period or periods exceeding in the aggregate 183 days in any twelve month period, and
> [ii] more than 50% of the gross revenues attributable to active business activities of the enterprise during this period or periods are derived from the services performed in that other State through that individual, or
> b) [i] for a period or periods exceeding in the aggregate 183 days in any twelve month period, and
> [ii] these services are performed for the same project or for connected projects through one or more individuals who are present and performing such services in that other State
> the activities carried on in that other State in performing these services shall be deemed to be carried on through a permanent establishment of the enterprise situated in that other State ...

Unpacking this clause, the requirements are:

(1) An enterprise of one State ("the enterprise State")
(2) The enterprise performs services in the other State ("the source State")
(3) The services are performed through an individual (or individuals)
(4) Conditions (a) or (b) are met:
   (a) Subparagraph a) looks at the duration of the presence of the individual through whom an enterprise derives most of its revenue

[58] Colombia, Kyrgystan, Norway, Panama.

(b) Subparagraph b) looks at the duration of the activities of the individuals

Para 132ff OECD Commentary discusses the policy background at some length, and is not discussed here.

I refer to a PE (or one might say, deemed PE) within this clause as a **"services PE"**.

106.21.3 *Services performed through an individual*

Para [3] of the Services PE clause explains what is meant by services performed by an enterprise through an individual:

> For the purposes of this paragraph, services performed by an individual on behalf of one enterprise shall not be considered to be performed by another enterprise through that individual unless that other enterprise supervises, directs or controls the manner in which these services are performed by the individual.

106.21.4 *Recipient of services unaffected*

OECD Commentary provides:

> 151. The provision applies to services performed by an enterprise. Thus, services must be provided by the enterprise to third parties. Clearly, the provision could not have the effect of deeming an enterprise to have a permanent establishment merely because services are provided to that enterprise. For example, services might be provided by an individual to his employer without that employer performing any services (e.g. an employee who provides manufacturing services to an enterprise that sells manufactured products). Another example would be where the employees of one enterprise provide services in one country to an associated enterprise under detailed instructions and close supervision of the latter enterprise; in that case, assuming the services in question are not for the benefit of any third party, the latter enterprise does not itself perform any services to which the provision could apply.

106.21.5 *Location of recipient n/r*

OECD Commentary provides:

> 152. Also, the provision only applies to services that are performed in a State by a foreign enterprise. Whether or not the relevant services are furnished to a resident of the State does not matter; what matters is that the services are performed in the State through an individual present in that State.

106.21.6 *Who performs services*

OECD Commentary provides:

> 153. The alternative provision does not specify that the services must be provided "through employees or other personnel engaged by the enterprise", a phrase that is sometimes found in bilateral treaties. It simply provides that the services must be performed by an enterprise. As explained in paragraph 39 above, the business of an enterprise (which, in the context of the paragraph, would include the services performed in a Contracting State)
>
> > "is carried on by the entrepreneur or persons who are in paid-employment relationship with the enterprise (personnel). This personnel includes employees and other persons receiving instructions from the enterprise (e.g. dependent agents)."
>
> For the purposes of the alternative provision, the individuals through which an enterprise provides services will therefore be the individuals referred to in paragraph 39,[59] subject to the exception included in the last sentence of that provision (see paragraph 164 below).

106.21.7 *Duration of residence*

The Services PE clause applies:

> where an enterprise of a Contracting State performs services in the other Contracting State
>
> a) [i] through an individual who is present in that other State for a period or periods exceeding in the aggregate 183 days in any twelve month period, and
>
> [ii] more than 50% of the gross revenues attributable to active business activities of the enterprise during this period or periods are derived from the services performed in that other State through that individual ...

OECD Commentary provides:

> 155. Subparagraph a) deals primarily with the situation of an enterprise carried on by a single individual. It also covers, however, the case of an enterprise which, during the relevant period or periods, derives most of its revenues from services provided by one individual. Such extension is necessary to avoid a different treatment between, for example, a case where services are provided by an individual and a case where similar

[59] See 106.9.1 (Formal v effective employment).

> services are provided by a company all the shares of which are owned by the only employee of that company.
>
> 156. The subparagraph may apply in different situations where an enterprise performs services through an individual, such as when the services are performed by a sole proprietorship, by the partner of a partnership, by the employee of a company etc...
>
> 157. The first condition refers to the days of presence of an individual. Since the formulation is identical to that of subparagraph a) of paragraph 2 of Article 15, the principles applicable to the computation of the days of presence for purposes of that last subparagraph are also applicable to the computation of the days of presence for the purpose of the suggested paragraph.[60]
>
> 158. For the purposes of the second condition, according to which more than 50% of the gross revenues attributable to active business activities of the enterprise during the relevant period or periods must be derived from the services performed in that State through that individual, the gross revenues attributable to active business activities of the enterprise would represent what the enterprise has charged or should charge for its active business activities, regardless of when the actual billing will occur or of domestic law rules concerning when such revenues should be taken into account for tax purposes. Such active business activities are not restricted to activities related to the provision of services. Gross revenues attributable to "active business activities" would clearly exclude income from passive investment activities, including, for example, receiving interest and dividends from investing surplus funds. States may, however, prefer to use a different test, such as "50% of the business profits of the enterprise during this period or periods is derived from the services" or "the services represent the most important part of the business activities of the enterprise", in order to identify an enterprise that derives most of its revenues from services performed by an individual on their territory.

106.21.8 *Para (a) examples*

The OECD Commentary provides 3 simple, self-evident examples, concerned with a sole proprietorship and with companies:

> 159. The following examples illustrate the application of subparagraph a) (assuming that the alternative provision has been included in a treaty between States R and S):

[60] See 37.13 (STBV condition a: 183-day rule).

Example 1:
W, a resident of State R, is a consultant who carries on her business activities in her own name (i.e. that enterprise is a sole proprietorship). Between 2 February 00 and 1 February 01,
[a] she is present in State S for a period or periods of 190 days and
[b] during that period all the revenues from her business activities are derived from services that she performs in State S.
Since subparagraph a) applies in that situation, these services shall be deemed to be performed through a permanent establishment in State S.

Example 2:
X, a resident of State R, is one of the two shareholders and employees of XCO, a company resident of State R that provides engineering services. Between 20 December 00 and 19 December 01,
[a] X is present in State S for a period or periods of 190 days and
[b] during that period, 70% of all the gross revenues of XCO attributable to active business activities are derived from the services that X performs in State S.
Since subparagraph a) applies in that situation, these services shall be deemed to be performed through a permanent establishment of XCO in State S.

Example 4:
Z, a resident of State R, is one of 10 employees of ACO, a company resident of State R that provides accounting services. Between 10 April 00 and 9 April 01,
[a] Z is present in State S for a period or periods of 190 days and
[b] during that period, 12% of all the gross revenues of ACO attributable to its active business activities are derived from the services that Z performs in State S.
Subparagraph a) does not apply in that situation and, unless subparagraph b) applies to ACO, the alternative provision will not deem ACO to have a permanent establishment in State S.

Example 3 concerns a partnership, which is less straightforward:

Example 3:
X and Y, who are residents of State R, are the two partners of X&Y, a partnership established in State R which provides legal services. For tax purposes, State R treats partnerships as transparent entities.
Between 15 July 00 and 14 July 01,
[a] Y is present in State S for a period or periods of 240 days and
[b] during that period, 55% of all the fees of X&Y attributable to X&Y's active business activities are derived from the services that

> Y performs in State S.
>
> Subparagraph a) applies in that situation and, for the purposes of the taxation of X and Y, the services performed by Y are deemed to be performed through a permanent establishment in State S.

106.21.9 *Duration of services*

The Services PE clause applies:

> where an enterprise of a Contracting State performs services in the other Contracting State ...
>
> b) [i] for a period or periods exceeding in the aggregate 183 days in any twelve month period, and
>
> [ii] these services are performed for the same project or for connected projects through one or more individuals who are present and performing such services in that other State

OECD Commentary provides:

> 160. Subparagraph b) addresses the situation of an enterprise that performs services in a Contracting State in relation to a particular project (or for connected projects) and which performs these through one or more individuals over a substantial period. The period or periods referred to in the subparagraph apply in relation to the enterprise and not to the individuals. It is therefore not necessary that it be the same individual or individuals who perform the services and are present throughout these periods. As long as, on a given day, the enterprise is performing its services through at least one individual who is doing so and is present in the State, that day would be included in the period or periods referred to in the subparagraph. Clearly, however, that day will count as a single day regardless of how many individuals are performing such services for the enterprise during that day.
>
> 161. The reference to an "enterprise … performing these services for the same project" should be interpreted from the perspective of the enterprise that provides the services. Thus, an enterprise may have two different projects to provide services to a single customer (e.g. to provide tax advice and to provide training in an area unrelated to tax) and whilst these may be related to a single project of the customer, one should not consider that the services are performed for the same project.
>
> 162. The reference to "connected projects" is intended to cover cases where the services are provided in the context of separate projects carried on by an enterprise but these projects have a commercial coherence (see paragraphs 24 and 25 above). The determination of whether projects are connected will depend on the facts and circumstances of each case but factors that would generally be relevant for that purpose include:
>
> – whether the projects are covered by a single master contract;
> – where the projects are covered by different contracts, whether these different contracts were concluded with the same person or with related persons and

whether the conclusion of the additional contracts would reasonably have been expected when concluding the first contract;

- whether the nature of the work involved under the different projects is the same;
- whether the same individuals are performing the services under the different projects.

163. Subparagraph b) requires that during the relevant periods, the enterprise is performing services through individuals who are performing such services in that other State. For that purpose, a period during which individuals are performing services means a period during which the services are actually provided, which would normally correspond to the working days of these individuals. An enterprise that agrees to keep personnel available in case a client needs the services of such personnel and charges the client standby charges for making such personnel available is performing services through the relevant individuals even though they are idle during the working days when they remain available.

164. As indicated in paragraph 153 above, for the purposes of the alternative provision, the individuals through whom an enterprise provides services will be the individuals referred to in paragraph 39 above. If, however, an individual is providing the services on behalf of one enterprise, the exception included in the last sentence of the provision clarifies that the services performed by that individual will only be taken into account for another enterprise if the work of that individual is exercised under the supervision, direction or control of the last-mentioned enterprise. Thus, for example, where a company that has agreed by contract to provide services to third parties provides these services through the employees of a separate enterprise (e.g. an enterprise providing outsourced services), the services performed through these employees will not be taken into account for purposes of the application of subparagraph b) to the company that entered into the contract to provide services to third parties. This rule applies regardless of whether the separate enterprise is associated to, or independent from, the company that entered into the contract.

165. The following examples illustrate the application of subparagraph b) (assuming that the alternative provision has been included in a treaty between States R and S):

- Example 1: X, a company resident of State R, has agreed with company Y to carry on geological surveys in various locations in State S where company Y owns exploration rights. Between 15 May 00 and 14 May 01, these surveys are carried on over 185 working days by employees of X as well as by self-employed individuals to whom X has sub-contracted part of the work but who work under the direction, supervision or control of X. Since subparagraph b) applies in that situation, these services shall be deemed to be performed through a permanent establishment of X in State S.
- Example 2: Y, a resident of State T, is one of the two shareholders and employees of WYCO, a company resident of State R that provides training services. Between 10 June 00 and 9 June 01, Y performs services in State S under a contract that WYCO has concluded with a company which is a resident of State S to train the employees of that company. These services are performed in State S over 185 working days. During the period of Y’s

presence in State S, the revenues from these services account for 40% of the gross revenues of WYCO from its active business activities. Whilst subparagraph a) does not apply in that situation, subparagraph b) applies and these services shall be deemed to be performed through a permanent establishment of WYCO in State S.

- Example 3: ZCO, a resident of State R, has outsourced to company OCO, which is a resident of State S, the technical support that it provides by telephone to its clients. OCO operates a call centre for a number of companies similar to ZCO. During the period of 1 January 00 to 31 December 00, the employees of OCO provide technical support to various clients of ZCO. Since the employees of OCO are not under the supervision, direction or control of ZCO, it cannot be considered, for the purposes of subparagraph b), that ZCO is performing services in State S through these employees. Additionally, whilst the services provided by OCO's employees to the various clients of ZCO are similar, these are provided under different contracts concluded by ZCO with unrelated clients: these services cannot, therefore, be considered to be rendered for the same or connected projects.

106.21.10 *Abuse: fragmentation*

OECD Commentary provides:

> 166. The 183-day thresholds provided for in the alternative provision may give rise to the same type of abuse as is described in paragraph 52 above.[61] As indicated in that paragraph, apart from the fact that such abuses may, depending on the circumstances, fall under the application of legislative or judicial anti-avoidance rules, these abuses could also be addressed through the application of the anti-abuse rule of paragraph 9 of Article 29. Some States, however, may prefer to deal with them by including a specific provision in the Article. Such a provision could be drafted along the following lines ...

106.21.11 *Scope of Services PE*

OECD Commentary provides:

> 167. According to the provision, the activities carried on in the other State by the individuals referred to in subparagraph a) or b) through which the services are performed by the enterprise during the period or periods referred to in these subparagraphs are deemed to be carried on through a permanent establishment that the enterprise has in that other State. The enterprise is therefore deemed to have a permanent establishment in that other State for the purposes of all the provisions of the Convention (including, for example, paragraph 5 of Article 11 and

[61] See 106.11.1 (Building/construction site).

> paragraph 2 of Article 15) and the profits derived from the activities carried on in the other State in providing these services are attributable to that permanent establishment and are therefore taxable in that State pursuant to Article 7.
>
> 168. By deeming the activities carried on in performing the relevant services to be carried on through a permanent establishment that the enterprise has in a Contracting State, the provision allows the application of Article 7 and therefore, the taxation, by that State, of the profits attributable to these activities. As a general rule, it is important to ensure that only the profits derived from the activities carried on in performing the services are taxed; whilst there may be certain exceptions, it would be detrimental to the cross-border trade in services if payments received for these services were taxed regardless of the direct or indirect expenses incurred for the purpose of performing these services.

106.21.12 *Preparatory/auxiliary services*

The second limb of the services PE clause is an exemption for preparatory/auxiliary services:[62]

> [2] unless these services are limited to those mentioned in paragraph 4 which, if performed through a fixed place of business (other than a fixed place of business to which paragraph 4.1 would apply), would not make this fixed place of business a permanent establishment under the provisions of that paragraph.

OECD Commentary provides:

> 169. This alternative provision will not apply if the services performed are limited to those mentioned in paragraph 4 of Article 5 which, if performed through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph. Since the provision refers to the performance of services by the enterprise and this would not cover services provided to the enterprise itself, most of the provisions of paragraph 4 would not appear to be relevant. It may be, however, that the services that are performed are exclusively of a preparatory or auxiliary character (e.g. the supply of information to prospective customers when this is merely preparatory to the conduct of the ordinary business activities of the enterprise; see paragraph 71 above) and in that case, it is logical not to consider that the performance of these services will constitute a permanent establishment.

[62] See 106.19 (Preparatory/auxiliary activities).

106.22 Alternative finance arrangements

Section 1144 CTA 2010 deals with sharia-compliant arrangements for interest. This is not discussed here.

106.23 PE: Pre-1963 DTAs

Pre-1963 DTAs[63] provide another definition of PE. I take art 2(1)(k) Belize/UK treaty as an example:

> [1] The term "permanent establishment", when used with respect to an enterprise of one of the territories, means
>
> [a] a branch, management or other fixed place of business,
>
> [b] but does not include an agency unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of such enterprise or has a stock of merchandise from which he regularly fills orders on its behalf.
>
> [2] An enterprise of one of the territories shall not be deemed to have a permanent establishment in the other territory merely because it carries on business dealings in that other territory through a bona fide broker or general commission agent acting in the ordinary course of his business as such.
>
> [3] The fact that an enterprise of one of the territories maintains in the other territory a fixed place of business exclusively for the purchase of goods or merchandise shall not of itself constitute that fixed place of business a permanent establishment of the enterprise.
>
> [4] The fact that a company which is a resident of one of the territories has a subsidiary company which is a resident of the other territory or which is engaged in trade or business in that other territory (whether through a permanent establishment or otherwise) shall not of itself constitute that subsidiary company a permanent establishment of its parent company.

The wording of [1] is based on s.17 FA 1930 and is clearly an ancestor of OECD Model PE.

106.24 Trade in UK without PE

In *Brackett v Chater*:

> ... I find it difficult to imagine how a non-resident company which carries on a trade with any degree of continuity in the UK can do so

[63] See 107.24 (Pre-1963 DTAs).

> otherwise than through a "branch or agency" as defined in the Taxes Management Act 1970.[64]

Given the breadth of the expression this seems right, but as a general rule, it is not as an absolute rule. This applies to a PE as well as to a branch/agency.

The former International Tax Handbook at para 846 took the view that trading in the UK without a branch or agency was rare:

> Although such cases are rare it is possible for a non-resident individual to trade here other than through a branch or agency. A non-resident individual might come to this country for a short time so as not to become resident and carry on an itinerant trade. There would in such a situation be no branch and no agency. It is rather more difficult to imagine situations of that sort where the person concerned is a company. But notwithstanding the judge's comments in the *Brackett* case there may be cases where the UK activities of a non-resident company are divided between various persons in such a way that, although the activities amount to trading here, no one person or group of persons can be identified as a branch or agency through which the trade is carried on.

Similarly HMRC say:

> a trade carried on in the UK otherwise than through a permanent establishment which, technically, remains within the charge to UK income tax ... in practice applies to only a very small number of companies.[65]

106.25 Definitions of PE: Critique

We only need one definition of PE and it is suggested that the UK-law definition of PE should be repealed and replaced by a rule that PE has the same meaning as in OECD Model definition at the current time. That is indeed what the current statutory definition is intended to achieve. There could usefully be a power to adopt subsequent changes to OECD Model definition by statutory instrument.

[64] 60 TC 134 at p.149.

[65] HMRC, "Non-resident companies chargeable to Income Tax and non-resident CGT (March 2017) para 2.4 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/601032/Non-resident_companies_chargeable_to_Income_Tax_and_non-resident_CGT_-_consultation.pdf*

106.26 Why branch/agency matters

It is not practical to set out a full list of the significance of branch/agency for tax, but the following are the most important.

In the absence of a branch/agency, a non-resident individual or trust is not generally subject to CGT. An individual or trust trading in the UK through a PE is subject to CGT on gains linked to the branch/agency.[66]

IT and CGT may be collected from the branch/agency.[67]

A branch/agency of an individual who is a trustee is relevant to trust residence.

Lastly, the branch/agency is likely to be a PE, which is relevant for DTAs.

Branch/agency is not relevant to companies. In theory one could envisage a situation where a non-resident company does not have a UK PE but does have a UK branch/agency, and such a company would be within the scope of CGT.[68] In practice, this does not happen, or if it does, no-one takes any notice.[69]

106.27 Meaning of "branch or agency"

106.27.1 *Statutory (non-)definition*

Section 1B(5) TCGA provides:

> In this Act, unless the context otherwise requires, "branch or agency"—
> (a) means any factorship, agency, receivership, branch or management, but
> (b) does not include any person within any of the exemptions under sections 835G to 835K of ITA 2007 (persons who are not UK representatives).

The exceptions in s.1B(5)(b) concern agents, brokers, investment managers, alternative finance arrangements (Sharia-compliance) and Lloyds agents.[70]

[66] See 56.7 (Trade through UK branch/PE).

[67] See 124.2 (Tax collected from UK representative).

[68] See 56.6.5 (CGT/CT charge: non-residents).

[69] See for instance the HMRC trustee residence guidance which states conveniently (if not strictly accurately):
"This is in line with [what is now s.2B(3) TCGA] *which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here*." (Emphasis added).

[70] See 124.5 (UK representatives: Exemptions).

The definition in s.1B(5)(a) is useless, since it incorporates both words being defined, merely adding three further obscure or archaic terms which seem to mean "agent" if they mean anything.[71] The INTM expresses the same point more tactfully:

> **INTM264090. Branch or agency – Statutory definition and practical recognition of a branch** [Apr 2020]
> ... There is a statutory definition of 'branch or agency' ... thus – "any factorship, agency, receivership, branch or management". This is not particularly helpful so we must look for authority elsewhere including case law.

106.27.2 *"Branch"*

The former International Tax Handbook stated at para 842:

> There is very little guidance on the meaning of 'branch'. We have been advised that the presence of a principal (in the case of a sole trader or partnership) or of employees on a more or less regular basis is likely to be an essential ingredient of a branch (though employees may also be agents).

That repeats the personnel condition in the definition of PE. The INTM provides:

> **INTM264090. Branch or agency – Statutory definition and practical recognition of a branch** [Apr 2020]
> ... Most people recognise a branch of a foreign business when they see one and the impression given to the public is helpful in deciding whether or not a branch exists. For example there are many branches of foreign banks that trade on the High Streets of many towns and cities in the UK. We know this, whether we bank with these branches or not,

[71] The former International Tax Handbook explained at 842:

> "Factorship and receivership are forms of agency and so, usually, would 'management' be. The former two categories are found in the 1842 machinery provisions, 'Management' was added in 1915 but has acquired more modern associations with the growth in the use of managers such as project managers and investment managers."

To be fair, s.1B(5)(a) was not intended to be a definition as such, but simply as an abbreviation, to avoid the more cumbersome wording of, e.g. s.370 ITA 1952:

> "A non-resident person shall be assessable and chargeable in respect of any profits or gains arising, whether directly or indirectly, through or from any factorship, agency, receivership, branch or management, and shall be so assessable and chargeable in the name of the factor, agent, receiver, branch or manager."

> because the name of the foreign bank will be displayed across the shop front of the UK branch. The personnel running the UK branch will be carrying on the part of the foreign bank's trade that takes place in the UK. This amounts to the UK presence of the foreign bank's trade, i.e. a branch of its trade. That's an easy example in part because banks actually call themselves branches but it is worth stressing that whatever terminology is used it is the activities carried on in the UK in relation to the foreign enterprise's overall business activities that are most relevant in deciding whether the UK activities are a branch of the foreign business.

See too 124.14.1 (Branch).

106.27.3 *"Agency"*

The "agent" need not be an agent in the contract law sense of a person empowered to enter into contracts on behalf of a principal.[72]

106.27.4 *Branch/agency distinction*

It is considered that "branch" should have (more or less) the same meaning as fixed place of business PE, and "agency" should have (more or less) the same meaning as agency-PE, so the composite expression has (more or less) the same meaning as PE.

HMRC agree. The SALF Manual provides:

> **SALF704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]
> *Definition of UK representative*
> Branch or agency has the statutory definition at s.126(8) FA 1995 of 'Any factorship, agency, receivership, branch or management' but it is interpreted on broadly equal lines to 'permanent establishment'...[73]

In *Brackett v Chater*,[74] the Special Commissioners took a different approach. They treated the term "branch or agency" as composite phrase containing a single concept. They did not think it correct to consider separately whether there was a branch, and whether there was an agent.

[72] See *Brackett v Chater* 60 TC 134.

[73] Similarly the HMRC trustee residence guidance: "The examples all relate to non-UK resident companies that are trustees. The same principles would apply for other non-UK resident persons who are trustees (and for whom the relevant UK-based entity would be a branch or agency rather than a permanent establishment)."

[74] 60 TC 134 & 639, at p.646.

The difficulty with this approach is that it is far from clear what the single concept is, if it is distinct from the concepts of branch and agency and PE. (The statutory definition, as noted, does not help.) The Special Commissioners' solution is to ignore the wording altogether.[75] It is not necessary to go that far, even when dealing with these 19th century fossils, and at a time when more emphasis is placed on a purposive approach.

The Special Commissioners continued:

> Mr. Brackett represents Drishane in this country and is in sole charge of the day to day conduct of the trading operations other than the formation of contracts. It is not straining language, in our opinion, to say that by entrusting those operations to his care Drishane has established at least a branch in this country. Alternatively Mr. Brackett can properly be described as the manager of those operations, because he personifies them. Nor can we accede to Mr. Brackett's argument that it is inappropriate to assess him as "agent for Drishane" because he does not have the status of an agent under the general law. The definition of "branch or agency" in s 118 Taxes Management Act adds that "branch or agent" shall be construed accordingly. We take that to mean that the term "agent" is used as the cognate noun to describe a person who represents a branch or agency. Mr. Brackett is undoubtedly the personification of the branch or management of Drishane's business in this country and is, in our opinion, properly assessed as "agent for Drishane" on the authority of s 79.

This conclusion does follow from the finding of fact in the first sentence, though the only support it received in the High Court was that the decision was one which the Special Commissioners were entitled to reach.

106.28 Branch/agency: Critique

The FA 2003 replaced "branch or agency" with "PE" for the purposes of corporation tax. The reason was to achieve consistency with international tax law. A press release explained the reason:

> The rules also alter our current terminology so that in future we tax "permanent establishments", (a term recognised internationally and used in our double taxation agreements), rather than "branches". The new rules are to be interpreted

[75] "It would, in our view, be perverse to hold that [the non-resident company], which was effectively trading only in this country, through Mr. Brackett, is not within the charge to tax because of some semantic difficulty in fitting its arrangements with him to the wording of the definition of a branch or agency."

> in accordance with OECD guidelines, to ensure that the UK is in accord with international consensus that reflects UK agreement.[76]

This was a good reason to change corporation tax, and it is an equally good reason to bring IT and CGT into line. We do not need both concepts. The term PE should replace "branch or agency" altogether. This would be a worthwhile and trouble-free simplification in the law. It would make no difference in practice, because in practice the two terms come to much the same thing, and no-one takes much notice of such differences as there may be, but the reform would remove some puzzles and much complexity and duplication.

[76] REV BN 25 para 8 (17 April 2002).

CHAPTER ONE HUNDRED AND SEVEN

DOUBLE TAXATION ARRANGEMENTS: INTRODUCTION

107.1 DT reliefs: Introduction
107.2 Treaty terminology
107.2.1 "State"/"Territory"
107.3 Types of double taxation
107.4 Co/shareholder double taxation
107.5 DT exemption/credit compared
107.5.1 DT exemption
107.5.2 DT credit
107.5.3 Exemption/credit terminology
107.6 Double non-taxation
107.6.1 Abusive double non-taxation
107.6.2 Acceptable double non-taxation
107.7 Types of residence/dual residence
107.8 DTA: Classes of residents
107.9 DTA income categories
107.9.1 Category overlaps
107.9.2 Income through PE
107.9.3 Other business profit overlaps
107.9.4 Other DTA category overlaps
107.10 DTA interpretation principles
107.10.1 Context of treaties
107.10.2 Material taken into account
107.10.3 DTA/UK statutes compared

Treaty-residence	9.1
DT relief: Partnership	85.25
DT relief: IP trusts	42.11
Discretionary trusts	41.9; 41.12

Charities	Kessler, Wong & Borlace, *Taxation of Charities & Nonprofit Organisations*[1]

I do not consider corporation tax.
I hope to address some post-Brexit issues in a future edition.

107.1 DT reliefs: Introduction

There are three model double tax treaties:

Short name	**Published by**	**Full name**
OECD Model	OECD	Model Tax Convention on Income and on Capital[2]
UN Model	United Nations	Model Double Taxation Convention between Developed and Developing Countries
US Model	United States	Model Income Tax Convention

The discussion in this book is mainly by reference to the OECD Model. This has been the basis for most tax treaties between developed countries since published (in draft in 1963, and finally in 1977). In particular, UK DTAs since 1963 have usually been based on OECD Model. But fortunately all 3 Models have much in common.

A new edition of the OECD Model was published in 1992. Since then OECD has published updates rather than a new edition. There have been updates every 2 or 3 years.

The US Model was revised in 1996, 2006 and 2016.[3] I do not consider this Model as such, but I do consider the USA/UK DTA (2001).

OECD publish a lengthy commentary on the OECD Model (**"OECD Commentary"**); the "condensed" version is nearly 700 pages. The UN also publish a commentary. The US have published commentaries on:

- the general US Model (**"US Model DTA Technical Explanation")**[4]
- the USA/UK DTA (**"USA/UK DTA Technical Explanation")**[5]

[1] (13th ed., 2022-23), Chapter 14 (Double Taxation Treaties and Charities) online version *https://www.taxationofcharities.co.uk*

[2] Where it is necessary to distinguish this from the OECD IHT Model, I refer to it as the **"IT/CG model"**.

[3] *https://www.irs.gov/businesses/international-businesses/united-states-model-tax-treaty-documents*

[4] *https://www.irs.gov/businesses/international-businesses/united-states-model-tax-treaty-documents* This has commentaries on the 1996 and 2006 US Models, but not on the 2016 Model.

[5] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf* The Courts have found this "helpful": *Aozora GMAC Investment (R, oao) v HMRC* [2017] EWHC 2881 (Admin) at [27].

A full discussion of the OECD Model would need a volume for every article, except art 7 (business profits) which would require several volumes. These books have been written, and the total would fill a bookcase. This literature includes a book on art 16 (directors fees) which is only a single sentence of 44 words. The OECD Model is used worldwide, so we benefit in the UK from scholars, practitioners, Revenue authorities, and case law, across the world - at least so far as written in English.

Of these books, *Vogel on Double Taxation Conventions* is the most frequently cited, with a judicial accolade in *O'Brien v Quigley*:[6]

> the academic work which I found most helpful of all of the documents put before the Court ... (no less than fifty-five in number)

But applying the treaty to UK tax legislation is of course a UK domestic law exercise.[7]

I only consider the UK side of the matter, ie whether a DTA provides exemption from UK tax and whether foreign tax can be used as a credit against UK tax. In any particular case it will also be necessary to consider the foreign tax position.

I refer at points to the UN Model and to specific treaties. In any particular case the DTA concerned would need to be reviewed.[8]

The UK's network of DTAs is extensive, there are more than 100 treaties. But there are gaps; for example, there is no treaty with Peru, and gaps in Africa include Tanzania and most Francophone countries.

107.2 Treaty terminology

OECD (both in the Model and in other materials, such as the Commentary and MLI) has a vocabulary, sometimes a technical (specialist) vocabulary, which can be unidiomatic.[9] But when discussing the Model, it is generally best to adopt the OECD dialect, because the alternative ends up even more confusing.

In the context of DTAs, the terms treaty/convention/arrangement/

[6] [2013] IEHC 398 at [41].

[7] See Avery Jones, "The Interaction Between Tax Treaty Provisions and Domestic Law" in Tax Treaties and Domestic Law (2006) ed Maisto, IBFD.

[8] Is this so obvious that it does not need saying? It is not: see *Evans v PricewaterhouseCoopers* discussed at 9.18.6 (A cautionary tale).

[9] But OECD- English has not drifted as far from British English as EU-law English.

agreement are synonymous. OECD Model use the word "convention" and UK tax legislation uses the term "double taxation arrangements". I prefer the word "treaty" as it seems clearest, but adopt the abbreviation DTA which has become standard usage.

The State where the income arises is the "**source State**" and the State where the individual is treaty-resident is the "**residence State**".

107.2.1 *"State"/"Territory"*

The OECD model refers to a "Contracting State" but I abbreviate this to "**treaty State**" or just "**State**" and where that State is not the UK, I refer to it as the "**foreign State**".

UK legislation generally uses the word "territory" which is wider than "State", and includes:

(1) Subdivisions and local authorities
(2) Crown dependencies and British Overseas Territories, which are territories but not (independent) States; the UK is responsible for their international relations[10]

OECD writes "State" with an initial capital.[11] I follow that here, though a lower case "s" is also acceptable and perhaps more common.

107.3 Types of double taxation

The expression "double taxation" seems straightforward, but it covers a variety of different situations.

The OECD Commentary begins:

> International juridical double taxation can be generally defined as the imposition of comparable taxes in two (or more) States
> [1] on the same taxpayer
> [2] in respect of the same subject matter and
> [3] for identical periods.

Anson v HMRC adopts this definition (but omits point [3]):[12]

> [*Juridical* double taxation] is usually considered to arise where two

[10] See 107.23 (Channel Islands/IoM DTAs).

[11] Perhaps this is influenced by the French version, where "État" is written with an initial capital, but Fowler's *Modern English Usage* (4th ed, 2015) also recommends an initial capital in this context.

[12] [2015] UKSC 44 at [57]. The definition in OECD Commentary on article 23A and 23B, para 1, 2 is (more or less) the same.

> jurisdictions impose income taxes on the same person in respect of the same income.
> [*Economic* double taxation] is usually considered to arise where there is taxation of the same or derivative income in separate hands.

The purposes of the OECD Model, as stated in its preamble, include "the avoidance of double taxation".[13] In *Anson v HMRC*:[14]

> The preamble does not indicate more precisely what is meant by double taxation: in particular, whether the Convention is restricted to 'juridical double taxation', or can also extend to 'economic double taxation'.

But it is well established that the OECD Model can provide relief in cases where taxes are imposed in two States on different taxpayers in respect of the same subject matter.[15]

107.4 Co/shareholder double taxation

In a domestic context, where a business is carried on by a company, there are two charges to UK tax:
(1) Corporation tax on the company profits
(2) Income tax on the distribution

This is not juridical double taxation, as tax is paid by different persons, and dividends are regarded as a separate source.[16] It is a case of economic double taxation. It is of course double taxation which the current UK tax system accepts, but various rules mitigate the double taxation. In particular:
(1) Profits are taxed in the hands of the company at a corporate tax rate, which is (generally) lower than personal income tax rates.
(2) Dividends are taxed at dividend rates, which are (slightly) lower than the main income tax rates.
(3) A company does not normally distribute all its profits.
(4) Proceeds of liquidation are subject to CGT, at CGT rates, not IT.[17]
(5) If the shareholder is a company, further reliefs are available: the

[13] See 108.2 (DTA title/preamble/purpose).
[14] [2015] UKSC 44 at [57].
[15] *Anson* is one such case; see 90.47.1 (LLC: Opaque). For another example, see 111.5.5 (Tax on different person/time).
[16] See 30.2 (Dividends a separate source).
[17] Subject to anti-avoidance rules such as the winding-up TAAR and Transactions in Securities.

dividend it receives from an underlying company may be exempt, or may qualify for group relief, or for a DT credit for foreign tax paid by the underlying company.

Similar points arise where:

(1) Income is received by a company in State A and taxed in State A; and
(2) The income is distributed to shareholders in State B and taxed in State B.

That is also a type of economic double taxation. It may be mitigated by the rules set out above. But the Courts may regard it with equanimity. The point arise in *Memec v HMRC:*[18]

> In so far as plc is claiming that it has the merits on its side, I do not think that these points carry much weight. Prior to the agreement, plc accepts, economic double taxation was suffered through the group structure it had chosen to adopt. It is common ground that the new structure has achieved its intended purpose of reducing the burden of German tax by eliminating German corporation tax in respect of plc's share of the profits of the silent partnership. Whether the new structure has achieved the further benefit for plc of a credit against UK corporation tax for the trade tax paid by the subsidiaries seems to me to be a dry question of law unencumbered by the merits.

That is right, because even in a purely domestic context, eg a UK company distributes profits to UK shareholders, there is an element of (domestic) double taxation: CT on the company and IT on the shareholders.

There are different types of economic double taxation; and relief is sometimes available and sometimes not. To ask whether the OECD Model applies to economic double taxation is to approach the issue at a high a level of generality. To answer the question in any particular case is a matter of descending to construe the relevant provisions ("a dry question of law unencumbered by the merits").

But merits may still affect outcomes. In *Anson v HMRC*,[19] the mitigation rules set out above did not apply: the LLC (albeit a company) had to distribute all its income, the taxpayer was subject to US tax at personal rates and UK tax at personal rates, the total rate being 67%.[20] Does this

[18] 71 TC 77 at p.106; for the *Memec* structure, see 90.28 (Stille Gesellschaft).

[19] See 90.46 (LLC US tax credit).

[20] [2015] UKSC 44 at [25]: "The question is whether he is liable to pay [at] an effective rate of taxation of 67% (ie £45 in US taxes for every £100 of income, plus £22 in UK

matter? The UT and CoA seemed unconcerned by that unfairness. Or perhaps they thought that hard cases make bad law? Or perhaps they were concerned not to upset existing arrangements? Did the perceived fairness of the outcome affect the FTT and SC decisions in favour of Mr Anson? Is there is simply judicial inconsistency, ie some judges are more concerned about fairness than others? Discuss.

107.5 DT exemption/credit compared

OECD Model confers two types of DT relief: Exemption and Credit.[21]

107.5.1 *DT exemption*

On 16 occasions, the OECD Model provides that income/gains *"shall be taxable only"* in one State. This is the wording used to confer exemption in the other State.

It may be helpful to outline the main cases of DTA exemption:

Art: Heading	**Income qualifying for exemption**	**Taxed in State of**
7: Business profits	Profits of enterprise of a Contracting State (in absence of PE)	Enterprise
12: Royalties	Royalties arising in Contracting State, beneficially owned by resident of other Contracting State	Residence
13: Capital gains	Most types of gains	Residence
15(1): Employment	Remuneration of resident of Contracting State (unless employment exercised in other Contracting State)	Residence
15(2): Employment	Short term business visitor	Residence
18: Pensions	Pensions paid to resident of Contracting State in consideration of past employment	Residence
19: Government service	Remuneration paid by Contracting State to individual in respect of services rendered to that State	Government
21: Other income	Income of resident of a Contracting State, not dealt with in other Articles	Residence

107.5.2 *FDT credit*

In 16 cases the OECD Model provides that income/gains *"may be taxed in that other State"* (that is, in the source State). In these cases, the residence State gives credit for the foreign tax. In the case of dividends

tax, calculated as 40% of the £55 remitted after payment of US taxes), or is entitled to double taxation relief."
Remitted dividends do not qualify for dividend rates. The 40% rate would now be 45% (47% in Scotland) so the effective rate of tax would now be about 70%.

[21] This is self-evident from the text of the OECD Model, though this observation has also been made judicially.

and interest there is also a limit on the source State's tax. It may be helpful to give an outline of the main cases of DTA credit:

Art:Heading	**Income subject to credit relief**
6: Immovable property	Income derived by resident of a Contracting State from immovable property situated in other Contracting State
7: Business profits of PE	Profits of PE of enterprise of a Contracting State if the enterprise carries on business in the other Contracting State through a PE situated therein
10: Dividends	Dividends paid by company which is a resident of a Contracting State to resident of the other Contracting State
11: Interest	Interest arising in a Contracting State and paid to resident of the other Contracting State
13: Capital gains	Gains derived by resident of a Contracting State from the alienation of immovable property situated in the other Contracting State
15(1): Employment	Remuneration derived by resident of a Contracting State in respect of an employment exercised in the other Contracting State
16: Directors fees	Directors' fees derived by resident of a Contracting State in his capacity as a member of the board of directors of a company which is a resident of the other Contracting State

107.5.3 *Exemption/credit terminology*

We need terms for the various types of DT relief, and in this chapter I use the following terminology.

"**DT exemption**" applies where a DTA provides an exemption from tax. **"Foreign tax credit relief"** applies where foreign tax is set against UK tax. This may be:

(a) "**DTA tax credit relief**" where a DTA confers a credit or

(b) "**Unilateral tax credit relief**" where UK tax law (not a DTA) confers a credit.

The terms sometimes used are "exemption" and "set-off" methods of relief.

"**IT/CGT computation deduction**" applies where foreign tax is deducted in computing income or gains.

I refer to these reliefs together as "**DT reliefs**".

107.6 Double non-taxation

Double non-taxation may arise because:

(1) Both States provide treaty relief on the same income/gains ("double exemption"); or

(2) One State provides treaty relief, and the other State does not seek to

tax the income/gains because there is no domestic-law charge, or some domestic-law relief applies.

These raise different issues, and confusion arises if they are bundled into a single category.

107.6.1 *Abusive double non-taxation*

Tax avoidance DTA cases will generally involve double non-taxation. In *Huitson (R, oao) v HMRC*:[22]

> [Double taxation agreements] respect the principle of taxation by the state of residence. They aim to avoid the taxation of residents twice over on the same income. What DTAs do not aim to do is
> [1] to facilitate the avoidance of tax, or
> [2] its reduction below the level of tax ordinarily paid by residents.[23]
> In those circumstances it is a legitimate aim of the public policy of the state in fiscal matters to ensure that DTAs relieve double taxation of residents rather than serve as an instrument used by taxpayers who choose to participate in artificial arrangements to avoid or reduce their level of taxation.

In *Bayfine UK v HMRC,* CoA commented on a DTA using the 1992 wording which referred to "the prevention of fiscal evasion":[24]

> These words ... make it clear (!) that the primary purposes of the Treaty are,
> [1] on the one hand, to eliminate double taxation and,
> [2] on the other hand, to prevent the avoidance of taxation.
> ... the Treaty should be interpreted to avoid the grant of double relief as well as to confer relief against double taxation.[25]

Similarly GAAR guidance provides:[26]

> ... The express purpose of DTAs is to avoid double taxation and prevent fiscal evasion, not to facilitate double non-taxation. This is clear from the judgment of the High Court and the Court of Appeal in *Huitson (R,*

[22] [2011] EWCA Civ 893 at [34].

[23] Limb [2] of this sentence is muddled or misconceived.

[24] The case concerned the 1980 USA/UK treaty. For the 1992 wording, see 108.2.3 (1992 form: Fiscal evasion).

[25] [2011] EWCA Civ 304 at [17].

[26] Para D 12.5.1. *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

oao) v HMRC, and the Court of Appeal in the case of *Bayfine UK v HMRC*.

In the context of avoidance cases this is not surprising, and the approach is now endorsed by BEPS MLI and the 2017 OECD Model. But how far does the principle apply that DTAs "should be interpreted to avoid the grant of double relief" when there is no avoidance in the strict sense?

107.6.2 *Acceptable double non-taxation*

Abuse will normally involve double non-taxation, and in such cases implied and express anti-avoidance rules can apply. But it is not the case that all double non-taxation constitutes abuse. DTA tax credit reliefs allow taxing rights to both States and seek only to avoid double taxation. DT exemptions assign taxing rights to one State alone. If that State chose not to exercise those taxing rights, a claim for treaty relief is not abuse, even though the result is double non-taxation.

Examples are:

(1) Foreign alimony payments received by UK residents. These are exempt from foreign tax under OECD Model, but the UK does not tax them.[27]

(2) Foreign income received by UK charity or pension scheme

In these cases DT relief on foreign income/gains results in double non-taxation, but not contrary to the intention of the treaties.

The purpose of double tax treaties may be to avoid double taxation, but one of the methods by which they do this is to allocate taxing rights between countries, which allows for the possibility of double non-taxation.

In other words, States sometimes *intend* double non-taxation. Suppose a country wished to encourage immigration, and did so by exempting foreign pension income of new immigrants. This policy would be frustrated if the effect of the domestic law exemption is just to replace domestic tax (residence-state tax) with foreign tax (source-state tax).[28] Contrary to the statement in *Bayfine*, DTAs are not, or not only, to avoid double taxation, but to allocate taxing rights; the State to which the taxing rights are allocated is not required to exercise those rights, and sometimes may want not to do so. The statement in *Bayfine* should be read in its context, which involved a tax avoidance scheme.

[27] See 31.9 (Foreign maintenance payments).

[28] The example is from Israel; see 108.13 ("Subject to tax").

In *Gladden Estate v The Queen*, the Canadian court said:

> ... double taxation is neither a condition nor a prerequisite for invoking the protection of the treaty. The non-resident can benefit from the exemption regardless of whether or not he is taxable on that capital gain in his own country.[29] If Canada or the U.S. were to abolish capital gains completely, while the other country did not, a resident of the country which had abolished capital gains would still be exempt from capital gains in the other country. This in effect was the situation between the time the treaty took effect and Canada in fact first imposed a capital gains tax. During that period Canadians could benefit from Article VIII.[30]

This is what happened in the India and Pakistan IHT DTAs. India and Pakistan abolished their estate duty, but the DTAs continues to provide exemption for UK IHT, and no-one suggests the contrary, notwithstanding the double non-taxation which results.[31]

Klaus Vogel agrees:

> Dual taxability of the income or capital is not necessary for residents to be entitled to treaty benefits... double non taxation is acceptable, because it is a conscious decision of the Contracting States whether or not they enter into a tax treaty which leaves open the possibility of double non-taxation.[32]

[29] Article VIII Canada/USA DTA (1942) provided: "Gains derived in one of the Contracting States from the sale or exchange of capital assets by a resident or a corporation or other entity of the other Contracting State shall be exempt from taxation in the former State, provided such resident or corporation or other entity has no permanent establishment in the former State."

[30] 85 DTC 5188 at p.5192.
Similarly, OECD Commentary on art.23A (exemption method) provides:
"33. In the Article it is laid down that the State of residence R shall exempt from tax income and capital which in accordance with the Convention "may be taxed" in the other State E or S.
34. The State of residence must accordingly exempt income and capital which may be taxed by the other State in accordance with the Convention whether or not the right to tax is in effect exercised by that other State. This method is regarded as the most practical one since it relieves the State of residence from undertaking investigations of the actual taxation position in the other State."
(Emphasis added).

[31] See 115.10.1 (Treaty-situs: India/Pakistan).

[32] 4th ed, 2015, para 4.26 (footnotes omitted).
Of course if the Contracting States do wish to restrict a DT exemption so it only

It is also desirable that treaties based on the OECD Model are so far as possible interpreted in the same way, which would not be the case if construction took into account foreign taxes which vary from one State to another, and indeed from one time to another.

This is confirmed by s.3(2) TIOPA:

> Section 2(1) gives effect to arrangements even if the arrangements include—
>
> (a) provision as to income that is not subject to double taxation[33]

Nevertheless. Except in clear or meritorious cases, if there are any, the Courts may be unsympathetic to taxpayers if the outcome is double non-taxation. In *Fowler v HMRC*:[34]

> 4. ... In fact, such an outcome [application of DT relief in the UK]could mean that Mr Fowler was not taxable in either country ... To the extent that domestic South African tax legislation did not tax the earnings of residents employed abroad he would not be taxable there or in the UK. There is no general provision in this Treaty, as there is in many others, to deal with what is called "double non-taxation".[35] But the question whether South Africa did tax the earnings of its residents employed abroad was not investigated in these proceedings so it would be inappropriate to place any weight on this consideration in construing the Treaty.

The reader may detect a hint that the Court would have been more sympathetic to the taxpayer if there had been evidence that he was in fact taxable in South Africa (as may indeed have been the case).

107.7 Types of residence/dual residence

The starting point is to note that there are (at least) three distinct concepts of residence. We need terms to describe them, and I coin the following terminology.

applies to income/gains actually subject to tax in the other State, it seems easy for a DTA to say so; see 108.13 ("Subject to tax"). But I do not think any inference should be drawn from an omission of those words, which are not common.

[33] The reference is to a "subject to tax" clause but these are in practice not general provisions nor are they used very often; see 108.13.7 (Subject to tax: Critique).

[34] [2020] UKSC 22.

[35] The judge is referring to a "subject to tax" restriction on treaty relief; but he is mistaken in assuming that such provisions are common; see 108.13 ("Subject to tax").

(1) "**UK-law residence**" means residence as defined in UK tax law.
 (a) A person who is resident in the UK within the UK tax law definition is "**UK-law UK resident**"
 (b) A person who is not resident in the UK within the UK tax law definition is "**UK-law non-UK resident**".
(2) "**Treaty-residence**" means residence as defined in a DTA.
 (a) A person who is a resident of the UK within a DTA definition is "**treaty-resident in the UK**".
 (b) A person who is resident in the foreign State within a DTA definition is "**treaty-resident in the foreign State**". One could use the term "treaty-resident outside the UK." Statute sometimes calls this "*treaty non-resident*" but I think my term is clearer.

"**Foreign-law residence**" means residence as defined in some foreign tax law.

"**Domestic law**" means the law of the UK, or of a foreign State, as opposed to treaty law or international law.

Since UK-law residence and treaty-residence are distinct concepts,[36] a person who is UK-law UK resident may be:
(1) treaty non-UK resident (under the tie-breaker test);[37] or
(2) not treaty non-UK resident: described as having "**sole UK residence**".[38]

These are somewhat clumsy terms but it is difficult to think of better. For a discussion of these terms, see 9.1 (Treaty-residence: Introduction).

"**Dual residence**" means residence in two countries, but is an ambiguous term until one specifies what types of residence are involved. In its widest sense it means a person who is UK-law UK resident and also foreign-law resident in a foreign State. A dual resident person in that sense may be:
(a) treaty-resident in a foreign State
(b) treaty-resident in the UK or
(c) not treaty-resident anywhere (if there is no applicable DTA).

[36] See 9.2 (Treaty/UK-law residence).

[37] It would be useful to have a short term to describe someone who is UK-law UK resident but treaty-resident outside the UK (= treaty non-UK resident). But *dual resident* and *semi-resident* do not encapsulate the concept; *treaty tie-breaker non-UK resident*" does encapsulate the concept but it is so long-winded it seems better just to use the full expression when it is needed.

[38] See 11.3.4 ("Sole UK residence").

The term "dual resident" is sometimes used specifically to mean a person within (a)[39] and that may be a convenient shorthand when the meaning is clear; but that usage is not adopted in this chapter.

107.8 DTA: Classes of residents

DT reliefs matter to all individuals, but different classes of individual are interested in different aspects of the reliefs. The permutations can be summarised thus:

Case (1): Individuals who are UK-law UK resident and not treaty-resident in a foreign State. Where there is an applicable DTA they will also be treaty-resident in the UK.

Case (2): Individuals who are UK-law UK resident and also resident in a foreign State under the tax laws of that State. These may be:
(a) treaty-resident in a foreign State
(b) treaty-resident in the UK or
(c) not treaty-resident anywhere (if there is no applicable DTA).

Case (3): Individuals who are not UK-law UK resident. These may be:
(a) treaty-resident in a foreign State
(b) not treaty-resident anywhere (if there is no applicable DTA).

Case 1: UK-law UK resident and not treaty-resident in a foreign State. These do not directly qualify for any DT exemption but they may qualify for foreign tax credit relief (or IT/CGT computation deduction). They may also qualify for third-party DT relief if income or gains accruing to a trust or company which is treaty-resident in a foreign State are deemed to accrue to them under an anti-avoidance provisions such as s.624, ToA, s.3, etc.

Case (2)(a): UK-law UK resident and treaty-resident in a foreign State. As UK residents they are in principle subject to IT or CGT on all UK and foreign income and gains (subject where applicable to the remittance basis). However as treaty-resident in a foreign State they may qualify for DT exemptions from UK and foreign source income and gains.

Case (2)(b)(c): UK law UK resident and treaty-resident in the UK or not treaty-resident anywhere. These are in the same position as case 1.

Case (3)(a): Not UK-law UK resident and treaty-resident in a foreign State. As non-residents they are in principle subject to IT on UK source

[39] See 61.38 (Dual resident trust: s.88 TCGA).

income only. As treaty-resident in a foreign State they may qualify for some DT exemptions (eg the Other Income article and relief for UK source interest under the some treaties).

Case (3)(b) Not UK-law UK resident and not treaty-resident anywhere. As non-residents they are in principle subject to IT on UK source income (though the non-residents exemption will mitigate this). They will not qualify for any DT exemptions.

107.9 DTA income categories

Under DTAs, income must be categorised according to its type, because different types of income are governed by different articles:

OECD Model article/Income type

6	Immovable property income	15	Employment income
7	Business profits	16	Directors' fees
8	Shipping/air transport	17	Entertainers and sportspersons
10	Dividends	18	Pensions
11	Interest	19	Government service
12	Royalties	20	Students
13	Capital gains	21	Other Income

DTA categorisation is not the same as UK domestic law.[40]

107.9.1 *Category overlaps*

These categories can overlap, and overlaps are addressed in the following articles:[41]

Article	**Overlap**	**See para**
6(4)	Immovable property	24.7.2
7(4)	Business income	107.9.3
10(4)	Dividends	107.9.2
11 (4)	Interest	107.9.2
12 (3)	Royalties	107.9.2
17(1)(2)	Entertainers/sportspersons	23.15
15(1), 18, 19(3)	Employment income/pensions	37.1; 38.8
21(2)	Other Income	107.9.2

107.9.2 *Income through PE*

Income may fall into two categories:

[40] See 14.6 (Income categories).

[41] This is a slightly more comprehensive list than that supplied in the Commentary.

(1) business profits and
(2) dividend/interest/royalty/Other Income.

OECD Model arts 10/11/12/21 address this and (in short) give priority to art 7 (business profits):

10(4): Dividends	**11(4): Interest**	**12(3): Royalties**	**21(2): Other Income**
The provisions of paragraphs 1 and 2 shall not apply if	The provisions of paragraphs 1 and 2 shall not apply if	The provisions of paragraph 1 shall not apply if	The provisions of paragraph 1 shall not apply to income, other than income from immovable property as defined in paragraph 2 of Article 6, if
the beneficial owner of the dividends,	the beneficial owner of the interest,	the beneficial owner of the royalties,	the recipient of such income,
being a resident of a Contracting State,	being a resident of a Contracting State,	being a resident of a Contracting State,	being a resident of a Contracting State,
carries on business in the other Contracting State of which the company paying the dividends is a resident through a permanent establishment situated therein	carries on business in the other Contracting State in which the interest arises through a permanent establishment situated therein	carries on business in the other Contracting State in which the royalties arise through a permanent establishment situated therein	carries on business in the other Contracting State through a permanent establishment situated therein
and the holding in respect of which the dividends are paid is effectively connected with such permanent establishment.	and the debt-claim in respect of which the interest is paid is effectively connected with such permanent establishment.	and the right or property in respect of which the royalties are paid is effectively connected with such permanent establishment.	and the right or property in respect of which the income is paid is effectively connected with such permanent establishment.
In such case the provisions of	[Identical]	[Identical]	[Identical]

Article 7 shall
apply.

See 107.14 (Effectively connected with PE).

107.9.3 *Other business profit overlaps*

Article 7(4) OECD Model deals with other overlap between business profits and other types of income:

> Where profits include items of income which are dealt with separately in other Articles of this Convention, then the provisions of those Articles shall not be affected by the provisions of this Article.

OECD Commentary on art 7 provides:

> 72. Absent [art 7(4)], this interpretation of the term "profits" could have given rise to some uncertainty as to the application of the Convention. If the profits of an enterprise include categories of income which are dealt with separately in other Articles of the Convention, e.g. dividends, the question would have arisen as to which Article should apply to these categories of income, e.g. in the case of dividends, this Article [art 7] or Article 10.
> 73. To the extent that the application of this Article and of the relevant other Article would result in the same tax treatment, there is little practical significance to this question.
> Also, other Articles of the Convention deal specifically with this question with respect to some types of income...
> 74. The question, however, could arise with respect to other types of income and it has therefore been decided to include a rule of interpretation that ensures that Articles applicable to specific categories of income will have priority over Article 7. It follows from this rule that Article 7 will [only] be applicable
> [1] to business profits which do not belong to categories of income covered by these other Articles, and, in addition,
> [2] to income which under paragraph 4 of Articles 10 and 11, paragraph 3 of Article 12 and paragraph 2 of Article 21, fall within Article 7.

Of course these rules only apply for treaty purposes:

> This rule does not, however, govern the manner in which the income will be classified for the purposes of domestic law; thus, if a Contracting State may tax an item of income pursuant to other Articles of this Convention, that State may, for its own domestic tax purposes, characterise such income as it wishes (i.e. as business profits or as a

> specific category of income) provided that the tax treatment of that item of income is in accordance with the provisions of the Convention.
> It should also be noted that where an enterprise of a Contracting State derives income from immovable property through a permanent establishment situated in the other State, that other State may not tax that income if it is derived from immovable property situated in the first-mentioned State or in a third State (see paragraph 4 of the Commentary on Article 21 and paragraphs 9 and 10 of the Commentary on Articles 23 A and 23 B).

Para 74 was followed in *Fowler v HMRC*.[42]

Marsh v HMRC considers the position of a person resident in a foreign treaty State, who carries on the trade of dealing in land in the UK, without a PE. Prior to the 2016 reforms, one would expect article 7(1) relief to have applied so the profits were not taxable in the UK.[43] But maybe not. To recap the relevant articles:

Article 7(1) UK/USA DTA is the same as the OECD Model:

> The business profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein.

Article 13(1) UK/USA DTA is the same as the OECD Model:

> Gains derived by a resident of a Contracting State that are attributable to the alienation of real property situated in the other Contracting State may be taxed in that other State.

Article 7(6) UK/USA DTA is the same as OECD Model art 7(4):

> Where business profits include items of *income* [emphasis added] that are dealt with separately in other Articles of this Convention, then the provisions of those Articles shall not be affected by the provisions of this Article.

The Tribunal said:[44]

> 86. Thus if “gains from the alienation of real property” are “income”

[42] [2018] EWCA Civ 2544 at [13], [47]. For another aspect of this case see 37.9.2 (Employment: OECD commentary).

[43] The position from 2016 is different: see 22.3 (Dealing/developing UK land).

[44] [2017] UKFTT 320 (TC) at [86] ff.

> for the purposes of the convention then article 13 takes precedence and no PE is required...
> 88. In the USA capital gains are included in income ... That this includes what would, in the UK, be regarded as capital gains...
> 91. In the UK a trade of dealing in real property will in nearly all cases involve the alienation of real property, and would in this case. But it could be difficult to characterise the sales of property in such a trade as themselves being "items of income": that term is much easier to ascribe to things such as interest or dividends received by a financial trader such as a bank or an insurance company.
> 92. We note though that art 13 of the UK/USA DTA is headed "Gains", but the equivalent article in the OECD Model is headed "Capital Gains". If art 13 of the UK USA DTA were headed "Capital Gains" it would be much easier to conclude that it did not cover gains that were made in the course of a trade. The difference must (?) be of some significance...
> 94. The answer may depend whether "income" in art 7(6) has an autonomous meaning or must be construed by reference to domestic law, and if so, which state's.

The question does not now arise for property development income, but it may arise in other cases.

107.9.4 *Other DTA category overlaps*

Avery Jones considers the position of share option gains which may be gains within art 13 and employment income within article 15:

> The problem is that these items fall within both the employment income and the capital gains articles. This is not a problem in internal law because something which is taxed as income and is also a capital gain cannot be taxed as a capital gain since the income tax charge has priority. But this is not an internal law question. The Model resolves a number of situations where articles overlap, but it does not deal with this one. It is suggested that the way to resolve the problem that two treaty articles are applicable is to look at the more specific article. This is clearly the employment income article as the items are peculiar to employment, whereas the capital gains article applies to all types of gain. These items should therefore for treaty purposes be treated as falling solely within the employment income article.[45]

[45] Avery Jones, "Problems of categorising income and gains for tax treaty purposes" [2001] BTR 382.

That may well be the right conclusion, though I would hesitate to use the word "clearly".

107.10 DTA interpretation principles

Short formulations of the principles of interpretation can only be expressed at a high level of generality which makes their application doubtful and their usefulness to the practitioner questionable. In short, as Voltaire is said to have observed, language is difficult to put into words. Nevertheless most treaty cases start with these generalities, so a brief summary is appropriate here.[46]

One might identify three approaches to interpretation, stressing:

(1) Objective interpretation (meaning of the words)
(2) Subjective interpretation (intention of the parties)
(3) Teleological/purposive interpretation (the purpose of the document)

The starting point is article 31(1) of the Vienna convention on the law of treaties[47] ("Vienna Convention") which draws on each of these:

> A treaty[48] shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose.

One can identify four elements here:

[46] See Bjorge, "The Vienna Rules on Treaty Interpretation Before Domestic Courts" [2015] LQR 78.

[47] The rules of interpretation in arts 31 and 32 Vienna Convention are rules of customary international law and so applicable even if a party to the treaty is not a party to the Vienna Convention. See for instance *Anson v HMRC* [2015] UKSC 44 at [54]: "as international treaties, the [USA/UK DTAs] have to be interpreted in accordance with articles 31 and 32 of the Vienna Convention on the Law of Treaties. That is so notwithstanding that, although the US is a signatory of the Vienna Convention, the US Senate has not given its consent to it: the provisions of articles 31 and 32 can in any event be applied, since they have been accepted by the International Court of Justice (and also, in this country, by the House of Lords) as being an accurate statement of customary international law."

[48] Article 2(1)(a) Vienna Convention provides:

> ""Treaty" means an international agreement concluded between States in written form and governed by international law, whether embodied in a single instrument or in two or more related instruments and whatever its particular designation".

That would include an Exchange of Notes. In *Macklin v HMRC* [2015] UKUT 39 (TCC) at [44]: "It was common ground that the Exchange of Notes can be taken into account when interpreting the DTA".

(1) Good faith
(2) Ordinary meaning
(3) Context
(4) Object and purpose

This is no different from the approach to UK statutory interpretation: while there are differences between treaty interpretation and UK statutory interpretation, it seems to me that they arise from differences of context, not from differences of fundamental principles.

"Object and purpose" is a composite phrase. In discussion of domestic law, English lawyers tend to use the word "policy" (though "purpose" is also common); but the meaning is the same.

107.10.1 *Context of treaties*

Article 31(2) Vienna Convention provides:

> 2. The context for the purpose of the interpretation of a treaty shall comprise, in addition to the text, including its preamble and annexes:
> (a) any agreement relating to the treaty which was made between all the parties in connection with the conclusion of the treaty;
> (b) any instrument which was made by one or more parties in connection with the conclusion of the treaty and accepted by the other parties as an instrument related to the treaty.

107.10.2 *Material taken into account*

Article 31 Vienna Convention provides:

> 3. There shall be taken into account, together with the context:
> (a) any subsequent agreement between the parties regarding the interpretation of the treaty or the application of its provisions;
> (b) any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation;
> (c) any relevant rules of international law applicable in the relations between the parties.
>
> 4. A special meaning shall be given to a term if it is established that the parties so intended.
>
> **Article 32 Supplementary means of interpretation**
>
> Recourse may be had to supplementary means of interpretation, including the preparatory work of the treaty and the circumstances of its conclusion, in order to confirm the meaning resulting from the application of article 31, or to determine the meaning when the interpretation according to article 31:

> (a) leaves the meaning ambiguous or obscure; or
> (b) leads to a result which is manifestly absurd or unreasonable.

There is a distinction between:

(1) Article 31(3) material (agreements, notes, protocols) etc which *must* be taken into account; and

(2) Article 32 material (OECD Commentary, statements of Revenue authorities, etc) which *may* be taken into account.

107.10.3 *DTA/UK statutes compared*

In the “well known passage”[49] of *Fothergill v Monarch Airlines*:[50]

> The language of an international convention has not been chosen by an English parliamentary draftsman. It is neither couched in the conventional English legislative idiom nor designed to be construed exclusively by English judges. It is addressed to a much wider and more varied judicial audience than is an Act of Parliament that deals with purely domestic law. It should be interpreted... "unconstrained by technical rules of English law, or by English legal precedent, but on broad principles of general acceptation."

107.10.4 *Summary*

IRC v Commerzbank[51] contains a convenient summary of principles, often approved:

> (1) It is necessary to look first for a clear meaning of the words used in the relevant article of the convention, bearing in mind that “consideration of the purpose of an enactment is always a legitimate part of the process of interpretation”... . A strictly literal approach to interpretation is not appropriate in construing legislation which gives effect to or incorporates an international treaty .... A literal interpretation may be obviously inconsistent with the purposes of the particular article or of the treaty as a whole. If the provisions of a particular article are ambiguous, it may be possible to resolve that ambiguity by giving a purposive construction to the convention, looking at it as a whole by reference to its language as set out in the relevant UK legislative instrument....

[49] *Royal Bank of Canada v HMRC* [2023] EWCA Civ 695 at [28].

[50] [1981] AC 251 at p.281; the observation applies to all international treaties, tax and non-tax.

[51] 63 TC 218 at p,235, What was (perhaps informally) still called England in 1990 became called the UK by the time of *Fowler* in 2015.

> (3) Among those principles is the general principle of international law, now embodied in Article 31(1) of the Vienna Convention on the Law of Treaties. ... references to the primary necessity of giving effect to “the plain terms” of a treaty or construing words according to their “general and ordinary meaning”, or their “natural signification” are to be a starting point or prima facie guide and “cannot be allowed to obstruct the essential quest in the application of treaties, namely the search for the real intention of the contracting parties in using the language employed by them”.
> (4) If the adoption of this approach to the article leaves the meaning of the relevant provision unclear or ambiguous or leads to a result which is manifestly absurd or unreasonable recourse may be had to “supplementary means of interpretation” including travaux préparatoires:
> ...
> (6) Aids to the interpretation of a treaty such as travaux préparatoires, international case law and the writings of jurists are not a substitute for study of the terms of the convention. Their use is discretionary, not mandatory, depending, for example, on the relevance of such material and the weight to be attached to it...[52]

And again, more recently:

> The terms of the 1975 Convention reflect the intentions of the US as much as those of the UK. They are intended to impose reciprocal obligations... . The terms ... are important to businesses in the US as well as to the UK investors ... In that context, one would be predisposed to favour an interpretation which reflected the ordinary meaning of the words used and the object of the Convention. This is indeed a point which has been repeatedly made, in other cases concerned with the construction of the UK/US double taxation conventions, in the face of narrow and technical constructions...[53]

107.10.5 *Treaty in two languages*

Article 33 Vienna Convention provides:

> 1. When a treaty has been authenticated in two or more languages, the text is equally authoritative in each language, unless the treaty provides or the parties agree that, in case of divergence, a particular text shall

[52] *IRC v Commerzbank* 63 TC 218 at p.235; I omit references given in the original. See Avery Jones, “More on Treaty Interpretation: IRC v Commerzbank” [1990] BTR 88; and “*Memec:* the treaty interpretation issue” [1997] BTR 194.

[53] *Anson v HMRC* [2015] UKSC 44 at [111].

> prevail.
> 2. A version of the treaty in a language other than one of those in which the text was authenticated shall be considered an authentic text only if the treaty so provides or the parties so agree.
> 3. The terms of the treaty are presumed to have the same meaning in each authentic text.
> 4. Except where a particular text prevails in accordance with paragraph 1, when a comparison of the authentic texts discloses a difference of meaning which the application of articles 31 and 32 does not remove, the meaning which best reconciles the texts, having regard to the object and purpose of the treaty, shall be adopted.

DTAs are of course in many languages, though in practice 80% of treaties have English as at least one of the languages.

I am not aware of any UK case where reference has been made to a language other than French. That is in fact quite pragmatic:

(1) A judge is not likely to have the necessary language skills.
(2) Use of experts to assist is expensive and the benefit is not likely to justify the cost (whether assessed on a case by case basis or overall).
(3) It is desirable that treaties based on the OECD Model are so far as possible interpreted in the same way. Of course that cannot be fully achieved; but it is desirable. If reliance is placed on particular foreign language in one treaty, it is likely that other treaties not in that language will be construed differently; or else any exercise of construction would have to review many or perhaps all foreign language versions of the Model treaty, and a polyglot exercise of that kind is impractical.

In the case of French, these objections apply to a lesser extent, as UK lawyers and judges are likely to have at least a basic knowledge of French.

The OECD Model and commentary are issued in English and French. Reference may be made to the French version even the treaty being considered is not itself in French. In *Hankinson v HMRC*:[54]

> In ... *Lingle v R* 12 ILTR 55, Campbell J makes the point that the French equivalent to an habitual abode is *où elle séjourne d'une façon habituelle* which means "where one stays[55] in an habitual way." He was

[54] [2009] UKFTT 384 (TC); the issue was not discussed in the appeal.

[55] Footnote original: We also point out that *séjourne* is also translated as "is present" in art 15(2)(c) of the Model: *le bénéficiaire séjourne dans l'autre État pendant une période ou des périodes n'excédant pas au total 183 jours durant toute période de*

> dealing with the US-Canada treaty the official languages of which are English and French whereas we are dealing with the Treaty, which is in English and Dutch but as the French is the same in the French official version of the OECD Model we consider that it is permissible to look at it to confirm the meaning of the expression in English ...

But in practice references to the French version are extremely rare.[56]

107.10.6 *Variations between DTAs*

In *Macklin v HMRC*:

> Comparison of the language of the DTA which we are called upon to construe with the language of another double taxation convention ... would be a very unsure basis to reach a conclusion contrary to the one we have reached by reference to directly related materials (particularly the exchange of notes) and we reject it.[57]

The Australian Taxation Office discuss this issue in more detail:

> 46. It is important for interpretation purposes to remember that each DTA is the product of a separate bilateral negotiation process. While, therefore, there is a general template structure to Australia's DTAs, each contains variations in terms from other DTAs because they are negotiated against the background of the particular languages, legal systems, tax rules, tax treaty and wider economic policies and expectations of the respective countries at the time, as well as some historical influences.
> 47. Those factors, and the fact that treaty negotiations are conducted against the general background of the OECD and United Nations Model Tax Conventions (which, being products of international compromise and consensus, are couched

douze mois….("the recipient is present in the other state for a period or periods not exceeding in aggregate 183 days in any twelve month period…").

[56] Examples are:
(1) *Royal Bank of Canada v HMRC* [2023] EWCA Civ 695 at [81]
(2) Reference OECD model French version; see 9.19.3 (POEM: Real management)
(3) Reference to OECD commentary French version: see 9.14 (Habitual abode)

[57] *Macklin v HMRC* [2013] UKFTT 554 (TC) at [109]. The Upper Tribunal agreed [2015] UKUT 39 (TCC) at [36].
The same point is made in *Fryett v HMRC* [2014] UKFTT 220 (TC) at [81]: "We approach with caution any suggestion that because one country has worded its DTA with another country in a particular way, the absence of wording or different wording can throw interpretative light on how a DTA negotiated between different countries should be interpreted. This is the case even if the DTA has one party in common. On this basis any insight that may be gained from looking at the UK's other DTAs, or at Hong Kong's other DTAs is immaterial to the matter before us."

in comparatively broad terms) mean that the Australian negotiators, administrators and courts cannot expect the terms of the DTAs to be expressed with the same precision as our ordinary domestic tax legislation. Nor is it possible to always maintain consistency in how the terms of a particular Article are expressed in the various DTAs, because of the different 'mix' of the above factors in different negotiations and the 'give and take' that is a necessary incident of international negotiations.

48. This is an important point to bear in mind, because it means that the network of DTAs is not drafted in an absolutely uniform manner in relation to residents of all treaty partners, or in relation to similar activities or situations.

49. Differing wording in two DTAs may represent the same intended meaning (such as, in the ATO's view, the terms 'beneficial entitlement' in the Dividends, Interest and Royalties Articles of some DTAs and 'beneficial ownership' in the corresponding Articles in other DTAs). Often such differences exist because a country wants to avoid unintentionally 'picking up' a domestic law usage for an undefined term that may be different to the international tax meaning of the phrase more usually relied on. Alternatively, it may be because a country does not recognise a particular concept and regards the use of a term as potentially creating uncertainty before its courts and in the administration of the DTA.

50. In other cases, differences in wording may represent specific negotiating intentions (e.g., the reference simply to 'income' rather than 'income, profits or gains' in many of our pre-capital gains DTAs is, in the ATO's view, significant as is noted in Taxation Ruling TR 2001/12).[58]

51. It is sometimes possible that the same wording in different DTAs could present a different intended meaning. DTA negotiators will generally seek to identify the differences between a DTA under negotiation and their existing treaty network wording and as far as possible avoid the same wording having different usages, but that will not always be possible.

52. One practical example of the potential significance of different wording between DTAs is that, although the business profits/ permanent establishment ('PE') principle is common to all the DTAs, the definition of a PE in one DTA may be substantively different to the definition in another DTA.

53. For example, the definition of a PE in the United States Convention is wider than the definition in the Japanese Agreement. Accordingly, Australia may have a taxing right under the Business Profits Article of the United States Convention in respect of certain profits of a United States enterprise but not under the Business Profits Article of the Japanese Agreement in respect of like profits of a comparable Japanese enterprise.[59]

OECD Commentary comments on the significance of changes between current and earlier OECD models:

[58] Footnote original: At paragraphs 56 and 59.

[59] Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements; some footnotes omitted.

> 35. Needless to say, amendments to the Articles of the Model Convention and changes to the Commentaries that are a direct result of these amendments are not relevant to the interpretation or application of previously concluded conventions where the provisions of those conventions are different in substance from the amended Articles (see, for instance, paragraph 4 of the Commentary on Article 5). ...
> 36. ... the Committee ... disagrees with any form of *a contrario* interpretation that would necessarily infer from a change to an Article of the Model Convention ... that the previous wording resulted in consequences different from those of the modified wording. Many amendments are intended to simply clarify, not change, the meaning of the Articles ... and such *a contrario* interpretations would clearly be wrong in those cases.

However the attitude of the UK courts has not been entirely consistent.[60]

107.10.7 *Amendments to DTAs*

In *HMRC v Smallwood*:[61]

> The introduction of provisions designed to deal with specific schemes and to resolve any issues as to whether they are effective under the existing legislation cannot be construed as statutory admissions that the provisions in their unamended form were inadequate. We are not therefore, in my view, assisted by the later version of Article 13(5) in determining the effect of Article 13(4).

107.10.8 *Foreign court decisions*

In *IRC v Commerzbank*[62]

> decisions of foreign courts on the interpretation of a convention or treaty text depend for their authority on the reputation and status of the Court in question...

The Australian Taxation Office discuss this issue:

> 119. Since Australian courts have recognised that interpretation in a way conducive to producing a uniform international interpretation is an important goal in interpreting treaties,[63] it follows that foreign court decisions on similar provisions may give valuable guidance about the meaning of a term. They need

[60] See *Royal Bank of Canada v HMRC* [2023] EWCA Civ 695 at [88].

[61] [2010] EWCA Civ 778 at [22].

[62] 63 TC 218 at p,235.

[63] See paragraph 87.

to be treated with some caution, since they may be founded on different interpretative principles or approaches. Some courts may, for example, less strictly follow the Vienna Convention rules, or may apply a domestic law meaning of a term when they should apply an accepted international tax meaning. A court may also, quite properly, apply a domestic law meaning to a term left undefined by the DTA, whereas the same approach before Australian courts may lead to a different domestic law meaning being 'picked up'.

120. Nevertheless, a foreign court's decisions, including on the foreign language text, may provide important insights. Some foreign courts have considerable experience and expertise in interpreting DTAs. In *Lamesa*, the Full Federal Court did not need to (or wish to) express a concluded view on the issue. The Court noted, however, that:[64]

> ... where the construction of an international treaty arises, evidence as to the interpretation of that or subsequent treaties in one of the participating countries forms part of a matrix of material to which reference could properly be made in an appropriate case. As presently advised we would not wish it to be thought that a limited view of the material to which reference could be made in interpreting a double tax treaty should be taken. Had there been some decision of an appropriate Dutch court interpreting a treaty with identical or similar language, then, in our view, evidence of such a decision might well have been admissible.

121. There are also strong reasons to consider, as a matter of practice, the decisions of courts from countries other than the treaty partner (an issue not addressed by the Lamesa Court). Any such consideration would need to be consistent with the comments of the High Court in *Cook v Cook*[65] that:

> Subject, perhaps, to the special position of decisions of the House of Lords given in the period in which appeals lay from this country to the Privy Council, the precedents of other legal systems are not binding and are useful only to the degree of the persuasiveness of their reasoning.[66]

107.10.9 *Foreign revenue guidance*

The Australian Taxation Office discuss this issue:

> 125. Extrinsic materials of various types are extensively relied on by some countries. Some, such as the 'Technical Explanations' which are a feature of United States domestic procedures for consideration of a DTA, may help explain the views being put by the relevant DTA partner or a taxpayer. As the 'Technical Explanations' are, however, developed as part of the internal processes of the United States when implementing a DTA, they are of little or no usefulness in objectively proving the

[64] 97 ATC 4229 at 4757.

[65] (1986) 162 CLR 376 at 390.

[66] Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

> intent of both parties to a DTA. They are primarily designed to reflect the views of the United States negotiators, upon which there may not necessarily be a consensus ad idem ('meeting of minds'), but they may in some cases provide useful signposts to that consensus.[67] Even if they might not be admissible in court, or might be of little probative value, they may better inform an understanding of the DTA as a whole.[68]

GE Financial Investments v HMRC took a more parochial view:[69]

> 48. I should also mention the 1992 MOU. Mr Miller drew attention to this in his expert report ... concluding that it appears to presuppose that a stapled Dutch corporation is a resident of the US for the purposes of the US-Netherlands treaty.
> 49. Mr Baker submits that the 1992 MOU is clarificatory and confirms that the US authorities regarded such a stapled corporation to be a resident of the US, a position accepted by the Dutch revenue authorities. However, I agree with Ms McCarthy that, in the absence of any similar memorandum between the UK and US, it is not possible to derive any assistance from the 1992 MOU (which was specifically negotiated between the US and the Netherlands), in interpreting Article 4(1) of the Convention.
> 50. Neither, for that matter, can I derive any assistance from the view of the IRS which would appear, from correspondence referred to me by Mr Baker, to be that it considered GEFI was resident in the US. The correspondence, as Mummery J observed in *Inland Revenue Comrs v Commerzbank AG* [1990] STC 285, at 301-302, in relation to a joint statement issued in 1977 by the IRS and the Board of Inland Revenue setting out their agreement on the treatment of dividends and interest as commercial profits under the Convention:
>
> > "… has no authority in the English courts. It expresses the official view of the Revenue authorities of the two countries. That view may be right or wrong. Although art XXA authorises the competent authorities to communicate with each other directly to implement the provisions of the convention and 'to assure its consistent interpretation and application' it does not confer any binding or authoritative effect on the views or statements of the competent authorities in the English courts."

But while no-one suggests that such materials have "binding or authoritative effect" it seems odd to disregard them completely, especially as regard is had to foreign case law.

[67] Footnote original: See on the use of United States materials and the different approaches taken to such materials by the courts of other countries, Edwardes-Ker *Tax Treaty Interpretation* (1994) at paragraph 25.04. Edwardes-Ker notes, importantly, that this does not supplant the rule that a treaty must be interpreted in accordance with the common intention of both States.

[68] Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

[69] [2021] UKFTT 210 (TC). But the case is not yet final.

107.10.10 *Retrospectivity*

Article 28 Vienna Convention provides:

> Unless a different intention appears from the treaty or is otherwise established, its provisions do not bind a party in relation to any act or fact which took place or any situation which ceased to exist before the date of the entry into force of the treaty with respect to that party.

In practice, as far as I am aware, DTAs are always expressed to be prospective in effect.

107.10.11 *Territorial extent*

Article 28 Vienna Convention provides:

> Unless a different intention appears from the treaty or is otherwise established, a treaty is binding upon each party in respect of its entire territory.

Tax advantaged zones within the territory of a Contracting State qualify for treaty relief, unless the treaty provides otherwise.

107.11 OECD Commentary

107.11.1 *Use of OECD Commentary*

In *Sun Life Assurance Co of Canada v Pearson*:

> ... the Commentaries can and indeed must be referred to as a guide to the interpretation of the Treaty.[70]

In *Smallwood v HMRC*:[71]

> ... how the commentary fits into arts 31 and 32 of the Vienna Convention. Our view is that the negotiators on both sides could be expected to have the commentary in front of them and can be expected to have intended that the meaning in the commentary should be applied in interpreting the treaty when it contains the identical wording.

The Commentary is relevant even if one or both parties to the treaty are not OECD members. *Smallwood* continues:[72]

[70] 59 TC 250 at p.310.

[71] [2008] UKSPC SPC669 at [98]. The point was not discussed on appeal.

[72] If further authority is needed, which I doubt, see *Oppenheimer v HMRC* [2022] UKFTT 112 (TC) at [24] concerning South Africa, which is not an OECD member,

> This is as much true of the UK which is a member of the OECD as it is of Mauritius, which is not. The difference is that the UK had the opportunity of stating that it disagreed with any part of the commentary by making an observation, while Mauritius did not, although the commentary does now contain observations by a number of non-OECD member countries, but not including Mauritius.

Smallwood continues:

> ... If the commentary contains a clear explanation of the meaning of the term [POEM] it seems clear that the parties to the treaty intended that such explanation should be more important than the ordinary meaning to be given to the terms of that phrase. This is either on the basis that the existence of the model and commentaries demonstrate that the parties intended it as a special meaning within art 31(4) of the Vienna Convention, or that the Vienna Convention does not purport to be a comprehensive statement of the method of treaty interpretation. Its own commentary states that 'Accordingly the [International Law] Commission confined itself to trying to isolate and codify the comparatively few general principles which appear to constitute general rules for the interpretation of treaties' (Introduction para (5))

HMRC have argued that recourse to the OECD Commentary is only relevant where there is ambiguity, but the better view is that it is always relevant; or perhaps there is always ambiguity.

Of course the OECD Commentary is not decisive, so it may not ultimately matter whether one says that one has no recourse to it on the grounds that the text is unambiguous; or that one has recourse to it but it does not affect the end result. But the latter is the better approach.

OECD have adopted the following formal recommendation:

> THE COUNCIL ... RECOMMENDS the Governments of Member countries ...
> 2. When concluding new bilateral conventions or revising existing bilateral conventions, to conform to the Model Tax Convention, as interpreted by the Commentaries thereon;
> 3. That their tax administrations follow the Commentaries on the Articles of the Model Tax Convention, as modified from time to time, when applying and interpreting the provisions of their bilateral tax conventions that are based on these Articles.[73]

though it is a “key partner”.

[73] C(97)195/FINAL 23 October 1997; I omit the recitals.

OECD Commentary provides:

> 29. As the Commentaries have been drafted and agreed upon by the experts appointed to the Committee on Fiscal Affairs by the Governments of Member countries, they are of special importance in the development of international fiscal law. Although the Commentaries are not designed to be annexed in any manner to the conventions signed by Member countries, which unlike the Model are legally binding international instruments, they can nevertheless be of great assistance in the application and interpretation of the conventions and, in particular, in the settlement of any disputes.
> 29.1 The tax administrations of Member countries routinely consult the Commentaries in their interpretation of bilateral tax treaties. The Commentaries are useful both in deciding day-to-day questions of detail and in resolving larger issues involving the policies and purposes behind various provisions. Tax officials give great weight to the guidance contained in the Commentaries.
> 29.2 Similarly, taxpayers make extensive use of the Commentaries in conducting their businesses and planning their business transactions and investments. The Commentaries are of particular importance in countries that do not have a procedure for obtaining an advance ruling on tax matters from the tax administration as the Commentaries may be the only available source of interpretation in that case.
> 29.3 Bilateral tax treaties are receiving more and more judicial attention as well. The courts are increasingly using the Commentaries in reaching their decisions. Information collected by the Committee on Fiscal Affairs shows that the Commentaries have been cited in the published decisions of the courts of the great majority of Member countries. In many decisions, the Commentaries have been extensively quoted and analysed, and have frequently played a key role in the judge's deliberations. The Committee expects this trend to continue as the world-wide network of tax treaties continues to grow and as the Commentaries gain even more widespread acceptance as an important interpretative reference.

The Australian Taxation Office refer to the OECD resolution and say:

> 101. ... While not binding (since they are not formal OECD 'Decisions', binding on OECD Members under the OECD Constitution), the OECD Model and Commentaries create a general or 'quasi-political', rather than 'legal', expectation that OECD Members will basically comply, subject to specific 'Observations' and 'Reservations' lodged with the OECD...
> 102. In *Thiel*, the High Court judges all accepted that the OECD Model Taxation

Convention's official Commentaries may be relevant to the interpretation of DTAs based on the OECD Model. In *Thiel*, McHugh J (with whom the majority agreed in their joint judgment) approved recourse to the OECD Model and Commentaries under Article 32 of the Vienna Convention (that is, as supplementary means only available for consideration when there is ambiguity or the like, or to confirm a meaning reached by examining Article 31 materials).[74]

103. Dawson J also approved reference to the Model and Commentaries 'as a supplementary means of interpretation to which recourse may be had under Article 32 of the Vienna Convention'.[75] His Honour went further than the other judges, however, by expressing the view that the OECD Model and Commentaries were also relevant under Article 31 of the Vienna Convention, as primary materials to be considered even when there was no ambiguity or the like.[76] In so doing, Dawson J nevertheless acknowledged that 'some doubts have been expressed about the applicability, as a matter of language, of Article 31 to the Commentaries in the case of a bilateral treaty such as a double taxation agreement'.[77]

104. The Commentaries, with the various Observations and Reservations of OECD Member countries which they reproduce (and which are further considered below),[78] therefore provide important guidance on interpretation and application of the OECD Model and as a matter of practice will often need to be considered in interpretation of DTAs, at least where the wording is ambiguous, which ... is inherently more likely in treaties than in general domestic legislation.

105. In addition, the Commentaries, with the Observations and Reservations, do provide part of the historical context of the DTA negotiations. They also have a role in testing the interpretation reached by other means, although if they conflict with, rather than confirm, that interpretation there may be an issue of whether this would be admissible in a court, since the matter was left unresolved by the *Thiel* judgments.[79]

[74] *Thiel v FCT* (1990) 90 ATC 4717, at 4727 and 4720. See 107.10.2 (Material taken into account).

[75] *Ibid*, at 4723.

[76] Footnote original: Dawson J, in his discussion of Article 31 of the Vienna Convention at 4723, had stated: "For my part, I do not see why the OECD Model convention and commentaries should not be regarded as having been made in connection with and accepted by the parties to a bilateral treaty *subsequently concluded* in accordance with the framework of the model". (emphasis added).

[77] Footnote original: *Thiel v FCT* (1990) 90 ATC 4717, at 4723. He cited, as to the doubts, Avery Jones et al Part II at 92. Edwardes-Ker *Tax Treaty Interpretation* (1994) similarly considers that OECD Commentaries do not fall within the meaning of Article 31(2) of the Vienna Convention: paragraph 15.03.

[78] Paragraph 109ff.

[79] Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.

See Lang and Brugger "The role of the OECD Commentary in tax treaty

107.11.2 *Post-DTA Commentary changes*

Where changes are made to the Commentary, which happens all the time, there are two possible approaches:

(1) **"Ambulatory"** : Consider the current form, including all changes

(2) **"Static"**: Disregard changes made after a treaty takes effect

An intermediate approach would be to consider the changes but give them a lower status or scrutinise them more carefully.

Fowler v HMRC deals with the point in one cursory sentence:[80]

> The OECD Commentaries are updated from time to time, so that they may (and do in the present case) post-date a particular double taxation treaty. Nonetheless they are to be given such persuasive force as aids to interpretation as the cogency of their reasoning deserves.

In *Irish Bank Resolution Corporation v HMRC*[81] the 2008 version of the Commentary was considered in interpreting a treaty made in 1976.

There are Rule of Law points here. To have regard to post-treaty changes in the Commentary breaches the rule that tax should be laid down by Parliament. To have regard to changes made after income/gains have accrued breaches the prohibition on retrospectivity. But the Rule of Law is only one virtue of a legal system; and if one calls this an infringement,

interpretation"(2008) 23 Australian Tax Forum *https://research.wu.ac.at/en/publications/the-role-of-the-oecd-commentary-in-tax-treaty-interpretation-14*

[80] [2020] UKSC 22 at [18]. This derives from *IRC v Commerzbank* 63 TC 218 at p,235:

> Subsequent commentaries on a convention or treaty have persuasive value only, depending on the cogency of their reasoning.

Likewise *Oppenheimer v HMRC* [2022] UKFTT 112 (TC) at [28]:

> "Technically, resort should be had to the commentary as in force at the date that the DTC was agreed and then more recent versions only to the extent that they are cogent and assist the determination by the Tribunal."

But the 2017 changes to the 2002 treaty were said to be helpful, and I expect that post-treaty changes almost always will be.

The 2020/21 edition of this work, para 71.8.2 (Changes to OECD Commentary), pursued other aspects of this issue, in particular the *Indofood* case where 2003 amendments to the Commentary were relevant to how the Indonesian courts would apply the Netherlands/Indonesia DTA which was made in 2002. But I omit that now as after *Fowler* this discussion is of very limited interest.

[81] [2020] EWCA Civ 1128.

the Rule of Law may be infringed to attain other ends.[82] This is not significantly different from the rule that the Courts may have regard to textbooks, even though written after the date of the statute under discussion.

The static approach has unattractive practical consequences:

(1) Anyone considering a treaty would need to note its date and apply the historical version of the Commentary in effect on that date.

(2) Identically worded treaties could be construed differently.

Under the ambulatory approach, anyone considering a decided case needs to note its date and consider whether subsequent changes in the Commentary may have altered the position. But:

(1) It is not difficult to do that.

(2) The problem can arise under the static approach, if when considering a treaty made on a later date, there is a relevant case on another treaty made at an earlier date, and the commentary has changed in the meantime.

Contrast the position for changes in the text of the OECD Model itself; see 107.10.6 (Variations between DTAs).

OECD Commentary provides:

> 35. Needless to say, amendments to the Articles of the Model Convention and changes to the Commentaries that are a direct result of these amendments are not relevant to the interpretation or application of previously concluded conventions where the provisions of those conventions are different in substance from the amended Articles (see, for instance, paragraph 4 of the Commentary on Article 5).[83] However, other changes or additions to the Commentaries are normally applicable to the interpretation and application of conventions concluded before their adoption, because they reflect the consensus of the OECD Member countries as to the proper interpretation of existing provisions and their application to specific situations.
>
> 36. Whilst the Committee considers that changes to the Commentaries should be relevant in interpreting and applying conventions concluded before the adoption of these changes, it disagrees with any form of *a contrario* interpretation that would necessarily infer from a change to an Article of the Model Convention or to the Commentaries that the

[82] See 2.8.2 (Rule of Law v. other values).

[83] See 106.12 (Agency-PE).

previous wording resulted in consequences different from those of the modified wording. Many amendments are intended to simply clarify, not change, the meaning of the Articles or the Commentaries, and such *a contrario* interpretations would clearly be wrong in those cases.

36.1 Tax authorities in Member countries follow the general principles enunciated in the preceding four paragraphs.

Avery Jones says:

> If the OECD suddenly came up with a better model, it would be a long time before it generally was adopted in practice and meanwhile, there would be a long transition while the existing 1,400 treaties were renegotiated. There is therefore a tendency to change the Commentary instead. The hope is that the new Commentary then will apply to all the existing treaties. As someone said, it is like the Bible; the words stay the same, only the commentary changes. Does anyone know what courts will do when they are faced with interpreting a treaty when the Commentary makes fundamental changes subsequent to the treaty? There are few cases so far, probably because many of the fundamental changes are recent. Unless there is a reasonable expectation that courts will give effect to some of the fundamental changes that are being made to the Commentary, and I doubt if this is the case, there is no point in making fundamental changes to the Commentary. In fact, from the point of view of the tax authority, changing the Commentary in this way could make matters worse. In light of statements in the Introduction to the Model Treaty that existing treaties should be interpreted in light of new Commentaries, the tax authority may feel that it cannot properly argue against the interpretation contained in Commentaries made later than the treaty in question, but the taxpayer can, and probably will succeed if he does. It follows that the only fundamental changes that can have effect are those in favour of the taxpayer, which may not be quite what tax authorities sitting round the OECD table in Paris intend.
>
> [Avery Jones sets out the comments of the Commentary on the issue and continues]: It seems to me that too little attention is paid to the legal effect of later Commentaries in internal law, and I am doubtful about whether any legal weight should be given to the Committee's retrospective views about proper interpretation. Tax treaties are different from normal international treaties under which the contracting states can agree to any interpretation;[84] they are also part of internal tax law affecting taxpayers and subject to interpretation by courts in that country. In relation to the latter, these statements in the Introduction may be wishful thinking on the part of the members of the Committee rather than a statement of what the legal position actually is. ...I think we would say in the UK, that later Commentaries should not even be considered.
>
> ...On the other hand, it does seem odd that if a country makes a new treaty today, which in a particular respect is in exactly the same form as an older one made

[84] Footnote original: Under art. 31(3) of the Vienna Convention on the Law of Treaties, subsequent agreements between the parties have the same status as context.

> with another country at the time of an earlier Commentary, the two treaties will have different meanings, which does seem contrary to the whole principle of having Commentaries. It is not as if parliaments (certainly in my country) take any notice of changes in the Commentary in approving treaties, particularly so when there is no mention of the Commentary in the treaty. If - and this may be a big if - parliaments were prepared to approve a statement in the treaty that it was to be interpreted in the light of the Commentaries from time to time in force, would this be desirable? It effectively would be a statement that the parties intended that a special meaning, determined in the future by the OECD, should apply, which as far as the two tax authorities are concerned, is of course exactly what they do intend, as the Introduction makes clear.[85]
>
> There must be a boundary between interpretation and change. If the later Commentary says that black now means white, there seems little doubt that article 32 will not help to give a treaty that interpretation. If, on the other hand, the parties have stated in advance that, as a special meaning to be determined later, black does mean white, a court might give effect to it. You may say that this is so extreme an example that it would never happen. Unfortunately, there are examples of the Commentary changing its meaning from black to white....[86]
>
> If changes in the Commentary in the past had been restricted to what might be argued to be interpretation, there would be a strong case for an approach giving effect to future Commentaries as a special meaning, always assuming that parliaments would accept it. But, as the OECD has made such major changes to later Commentaries, it is very doubtful that this solution will now be acceptable. ... The extent to which the later Commentary has effect is in the hands of the court, which will not accept that a change from black to white is confirming the ordinary meaning or resolving ambiguities or obscurity, or avoiding manifestly absurd or unreasonable results. On the other hand, it is likely that more minor changes will be effective, which will assist the harmonization of interpretation of treaties. It is already the case that courts in many countries do refer to later Commentaries in the case of minor changes and including something to that effect in the treaty will encourage courts in all countries to do so.[87]

The Australian Taxation Office say:

> **Subsequent revisions to OECD Commentaries**
>
> 106. There is some debate over whether subsequent changes to the OECD Commentaries should be used as an aid to interpretation of earlier DTAs. On one hand, there is the view that the OECD Commentaries are only relevant to those DTAs subsequently concluded. Einfeld J expressed this view in the Federal

[85] OECD Commentary, note 31, Introduction, PP33-36.

[86] Avery Jones gives the example of the 1992 change to the Commentary art 15(2) (Short Term Business Visitor relief); see 24.6.2 (Employment: OECD Commentary). Another example is the 1993 change discussing tax avoidance; see 72.2.4 (Avoidance: OECD Commentary).

[87] Avery Jones, “Are Tax Treaties Necessary?” (1999) 53 Tax Law Review 1.

Court decision of the first instance in *Lamesa Holdings BV v FC of T*. His Honour referred to the Full High Court decision in *Thiel* and to the comments made by Dawson J in that case:[88]

> Further extrinsic material, referred to in *Thiel* as permissible ... is consideration of the 1977 OECD Model and Commentaries in construing a double tax agreement. Dawson J added an important caveat to this view, namely that the OECD model and commentaries are only applicable to those bilateral treaties subsequently concluded.

107. On the other hand, the Introduction to the OECD Commentaries now indicates more clearly that the later Commentaries are intended by OECD Member states to be used for interpretation and application of DTAs concluded before their adoption, except where the OECD Model has been changed in substance. The Year 2000 update to the OECD Model and Commentaries states: [text set out above]...

108. These changes to the Commentaries reflect the fact that the Commentaries are usually expressed not as forming an agreement between countries as to a new meaning but as reflecting a common view as to what the meaning is and always has been. Accordingly, unless it is apparent that the substance of the OECD Model has itself changed since a DTA was negotiated or the treaty in question does not conform to the OECD Model, or unless the Commentaries make clear that a former interpretation has actually been substantively altered, rather than merely elaborated, the ATO considers it appropriate, as a matter of practice, to consider, at least, the most recently adopted/published OECD Commentaries ... as well as others which may have been available at the time of negotiation.[89] Often, if a DTA provision is to be fully understood, the changes that have occurred to the relevant OECD Commentaries over time will need to be examined and considered.[90]

[88] 97 ATC 4229 at 4237.

[89] Footnote original: This approach may also be justified in terms of Article 31(3) of the Vienna Convention, with the Commentaries representing either ‘a subsequent agreement between the parties regarding the interpretation of the treaty’ (Article 31(3)(a)) or ‘any subsequent practice in the application of the treaty which establishes the agreement of the parties relating to its interpretation’ (Article 31(3)(b)). In *Lamesa*, Einfeld J in fact referred to the 1977 OECD Commentaries when interpreting the 1976 Netherlands Agreement (Schedule 10 to the Agreements Act) on the basis that the relevant part was based on an OECD Report released in 1974 and widely available.

[90] Footnote original: An example is the amendment to paragraph 8 of the 1977 Model Commentaries on Article 5 (permanent establishments) by the 1992 Commentaries (in response to a 1983 Report). The amendments treated the leasing of industrial, scientific and commercial equipment as a matter for the Business Profits Article, rather than the Royalties Article. Australia and some other countries disagreed, and lodged a ‘Reservation’ (a concept discussed at paragraph 109ff) to OECD Model Royalties Article, to this effect: see paragraph 39 of OECD Commentary on Article 12. ...

CFE discuss the point in connection with use of the OECD Commentary to interpret EU directives:[91]

> ...it seems that the Court endorsed an ambulatory (dynamic) use of the OECD MC Commentaries by referring to its own descriptions of the "beneficial ownership" concept in the 1977 OECD MC and the 2003 OECD Update, which addressed certain conduit companies. The Court, however, did not (explicitly)[92] refer to the 2014 OECD Update,[93] which might either imply that it did not want to go "fully dynamic" or that it did not consider it necessary. Moreover, the Court's seemingly dynamic approach might not technically be "dynamic" at all: While the IRD was proposed in 1998, it was adopted in Council on 3 June 2003, whereas the 2003 OECD Update was adopted by the OECD Council already on 28 January 2003[94] and was based on an even earlier 2002 Report,[95] i.e., both before the IRD was passed. However, a dynamic approach would not be surprising as the ECJ in *Berlioz*[96] had already used the 2012 OECD MC Commentaries Update on Article 26 OECD MC[97] to interpret the concept of foreseeable relevance in the 2011

[91] CFE Opinion Statement ECJ-TF 2/2019. *https://taxadviserseurope.org/new_ahgency/wp-content/uploads/2019/06/ECJ-TF_2-2019_Beneficial-Ownership.pdf*

[92] Footnote original: It did, however, implicitly refer to a notion that was introduced by the 2014 OECD Update (the "in substance"-criterion) in explaining the indicia for abuse; see *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16), para. 132, and the discussion *infra* in Chapters II.3. and III.C..

[93] Footnote original: It should be noted that the Court referred to the "development - as set out in paragraphs 4 to 6 above - of the OECD Model Tax Convention and the commentaries", with paras 4 and 5 dealing with the 1977 OECD MC and para. 6 dealing with the revision of the OECD MC Commentaries in 2003, while para.7 of the judgment mentions the 2014 OECD Update of the commentaries (see *N Luxembourg I et al* [C-115/16, C-118/16, C-119/16 and C-299/16], paras. 9

[94] Footnote original: As "The 2002 Update to the Model Tax Convention".

[95] Footnote original: Entitled "Restricting the Entitlement to Treaty Benefits" (adopted by the OECD Committee ion Fiscal Affairs on 7 November 2002).

[96] Footnote original: ECJ (Grand Chamber), 16 May 2017, C682/15, *Berlioz Investment Fund SA v Directeur de l'administration des contributions directes*, EU:C:2017:373, para.66.

[97] Footnote original: "Update to Article 26 of the OECD Medoel Tax Convention and its Commentary", adopted by the OECD Council on 17 July 2012, and later included in the 2014 Update to the OECD Model Tax Convention, adopted by the OECD Council on 16 July 2014.

> Mutual Assistance Directive.[98] It is, however, hard to see how such dynamic understanding would fit into the EU legal order, since – as AG Kokott, who certainly prefers a static approach,[99] succinctly pointed out – "[o]therwise the contracting countries to the OECD would have the power to decide on the interpretation of an EU directive".[100]

107.11.3 *Incorporation of Commentary*

Sometimes the issue is addressed directly in the DTA. For instance, the Protocols to DTAs with Jersey, Guernsey, IoM and Gibraltar:

> It is understood that both Territories will apply this Agreement in the light of the Commentaries on the OECD Model Tax Convention as they may read from time to time, having regard to any observations or other positions that they may have expressed thereon.

107.11.4 *Commentary: Summary*

A great deal of ink has been spilt on this topic, but a reader inclined to legal realism, or a cynic, may conclude that all it comes down to is this: a judge may ignore OECD Commentary if sufficiently minded to do so, and may ignore post-treaty amendments to the Commentary with a relatively easy conscience; but if they want to they can and will rely on it.

For further reading, see Ward et al, *The Interpretation of Income Tax Treaties with Particular Reference to the Commentaries on OECD Model* (2006).

107.11.5 *Commentary in other contexts*

The US, as usual, marches to a different drum. It is a member of OECD but its treaties are based on the US model. However there is a good deal of

[98] Footnote original: Council Directive 2011/16/EU of 15 February 2011 on administrative cooperation in the field of taxation and repealing Directive 77/799/EEC, [2011] OJ L 64, p.1.

[99] Footnote original: See the Opinions of AG Kokott of 1 March 2018 in C-115/16 *(N Luxembourg 1,* EU:C:2018:143, para. 52), C-118/16 *(X Denmark*, EU:C:2018:146, para. 52), and C-119/16 (*C Danmark I*, EU:C:2018:147, para. 52), noting that "[a]t most, should it transpire from the wording and history of the directive that the EU legislature was guided by the wording of an OECD Model Tax Convention and the commentaries (available at the time) on that OECD Model Tax Convention, a similar interpretation might be appropriate".

[100] Footnote original: Opinion of A G Kokott in *Z Denmark* (C-299/16), para. 53.

common ground. In *Crown Forest Industries v Canada*[101] the Canadian Supreme Court had regard to OECD Commentary as extraneous material relevant to the 1980 US/Canada DTA (based on the US model).

The CJEU have used the OECD Commentary to explain the Interest and Royalties Directive, though perhaps that does not matter, post-Brexit.[102]

107.11.6 *Observations & reservations*

OECD Commentary Introduction provides:

> 30. Observations on the Commentaries have sometimes been inserted at the request of Member countries that are unable to concur in the interpretation given in the Commentary on the Article concerned. These observations thus do not express any disagreement with the text of the Convention, but usefully indicate the way in which those countries will apply the provisions of the Article in question. Since the observations are related to the interpretations of the Articles given in the Commentaries, no observation is needed to indicate a country's wish to modify the wording of an alternative or additional provision that the Commentaries allow countries to include in their bilateral conventions.
>
> **Reservations of certain Member countries on some provisions of the Convention**
>
> 31. Although all Member countries are in agreement with the aims and the main provisions of the Model Convention, nearly all have entered reservations on some provisions, which are recorded in the Commentaries on the Articles concerned. ... It is understood that insofar as a Member country has entered reservations, the other Member countries, in negotiating bilateral conventions with the former, will retain their freedom of action in accordance with the principle of reciprocity.
>
> 32. The Committee on Fiscal Affairs considers that these reservations should be viewed against the background of the very wide areas of agreement that has been achieved in drafting this Convention.

The Australian Taxation Office say:

> **Observations & Reservations**
>
> 109. A further point which needs to be considered is the relevance for interpretation purposes of the previously mentioned Observations and Reservations of individual OECD Member countries to the OECD Model Tax Convention and its Commentaries, as Australia, like some of its DTA

[101] [1995] 2 SCR 802 at [55].

[102] See 108.10.8 (Beneficial ownership: EU law).

> partners, sometimes depart significantly from the OECD Model. OECD Member Countries lodge 'Reservations' when they do not agree with either the relevant text of an OECD Model Article or any variations in text permitted by the Commentaries (and where they therefore wish to put other countries on notice of their views and intentions in negotiating the terms of the DTA). Countries enter 'Observations' if they do not object to the Model Article's text, but do not concur with the interpretation of that text set out in the Commentaries...
> 111. Observations and Reservations may be of considerable relevance in explaining variations from the OECD Model, both when interpreting implementing legislation under section 15AA of the [Australia] Acts Interpretation Act 1901 and when applying Article 31 of the Vienna Convention. They may not ultimately be admissible in court except to confirm the interpretations otherwise reached under those provisions or when considering ambiguous provisions under Article 32 of the Vienna Convention or, possibly, under section 15AB of the [Australia] Acts Interpretation Act 1901.[103]

107.11.7 *United Nations Commentary*

The UN Commentary to the UN Model is obviously relevant where:

(1) The OECD and UN models differ, and a treaty follows the latter; or

(2) Supplementary DTA materials[104] refer to the UN Model or Commentary

In other cases, the UN Commentary ought at least to have "persuasive value, depending on the cogency of its reasoning", like any other textbook. It is suggested that citation of the UN Model is best avoided where it contains only broad generalities and self-evident observations (as was the case in *Oppenheimer*). The 700 pages of the OECD Commentary are sufficient.

In *Oppenheimer v HMRC*[105] the FTT cited the UN Model in a case on treaty-residence under the South Africa/UK DTA, where the relevant text of the Models was the same. It did so "because the RSA is a signatory to the

[103] Taxation Ruling TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements.
See Lang and Brugger "The role of the OECD Commentary in tax treaty interpretation"(2008) 23 Australian Tax Forum
https://research.wu.ac.at/en/publications/the-role-of-the-oecd-commentary-in-tax-treaty-interpretation-14

[104] See 107.10.2 (Material taken into account).

[105] See 9.13.1 (CVI test).

UN Model Double Taxation Convention". In fact the UN Model does not have signatories, though South Africa is represented from time to time at meetings of the UN Tax Committee.[106] I am not aware of other cases citing the UN Commentary.

107.12 Undefined treaty terms

Terms in the OECD Model, or in any treaty, may have:

(1) a **"domestic-law meaning"** (the meaning in UK domestic law) or

(2) an **"autonomous meaning"**, or treaty-meaning, (distinct from UK law)

107.12.1 *Domestic-law meaning*

Article 3(2) OECD Model provides:

> [a] As regards the application of the Convention at any time by a Contracting State, any term not defined therein shall, unless
> [i] the context otherwise requires or
> [ii] the competent authorities agree to a different meaning pursuant to the provisions of Article 25 [mutual agreement],[107]
> have the meaning that it has at that time under the law of that State for the purposes of the taxes to which the Convention applies,
> [b] any meaning under the applicable tax laws of that State prevailing over a meaning given to the term under other laws of that State.

The wording of art 3(2) has changed over time, but the changes were said to clarify rather than to alter the meaning, so older treaties using the older wording should not have a different effect.

Avery Jones states:

> At first sight, it seems obvious that a treaty term should mean the same in both states, rather than have different internal law meanings in each of them; indeed, there are those who advocate this. But this approach overlooks that the tax systems in internal law do not have the same scope. Article 3(2) has the effect that the relieving provisions of the treaty correspond exactly to the taxing provisions of internal law. If expressions meant the same in both countries, this would not be the result. It would not lead to a sensible result if one country had a wider meaning of a type of income that it had to exempt than the other, and the treaty meaning was the same in both countries. The likely result would be that something covered by the internal law charge would not be exempt as a result of the

[106] Hattingh and Avery Jones [2022] BTR 245 at p.249.

[107] In practice this does not seem to be common.

> treaty, or, less importantly, part of the treaty meaning would have no effect.
>
> A problem that article 3(2) appears to encourage is for each state to use its own meaning of terms not only when relieving tax in the source state, which is mainly what the treaty is about, but also when it is giving relief as the residence state. This can lead to double taxation when the residence state says that if it had been the source state, it would not have taxed, so it will not give any relief for the tax that the source state, in fact, has charged because on its interpretation, the treaty does not prevent it. Or the reverse, when the residence state says that it would have taxed if it had been the source state, and so it will exempt the income even though the source state did not tax ... I do not believe that either result is intended by the Model Treaty; it would be a strange model treaty if it did. It would be nice if the Commentary said so plainly, rather than implying the reverse in an obscure section dealing with thin capitalization.[108] I shall not set out the arguments here as my co-authors and I have written extensively about it.[109] It would be a considerable improvement to the Model Treaty and Commentaries if this point were clarified.[110]

The solution to the problem lies in the words "unless the context otherwise requires."

In practice the UK courts have regard to the foreign State's understanding of the provisions, and may take expert evidence on the issue if relevant.[111]

107.12.2 *Time to ascertain meaning*

Article 3(2) OECD Model provides:

> As regards the application of the Convention at any time by a Contracting State, any term not defined therein shall ... have the meaning that it has at that time under the law of that State for the purposes of the taxes to which the Convention applies...

Thus the meaning of a word is its domestic-law contemporary meaning, rather than that historically used at the date of the treaty. But the words in

[108] See para 68 of OECD commentary to arts 23A and 23B.

[109] Footnote original: See Avery Jones *et al* "Credit and Exemption Under Tax Treaties in Cases of Differing Income Characterization" (1996), 36 European Taxation 118.

[110] Avery Jones, "Are Tax Treaties Necessary?" 53 Tax Law Review 1.

[111] *Macklin v HMRC* [2013] UKFTT 554 (TC) at [71] to [75]. The Upper Tribunal [2015] UKUT 39 (TCC) dismissed the evidence as inadmissible, but while experts should not opine on the meaning of the treaty, which is a matter for the court, they may be needed in relation to issues of foreign law and practice.

treaties are not likely to change meaning over time.

A note on terminology. In *Fowler v HMRC*:

> [Art 3(2)] provides an "always speaking" means of ascertaining the meaning of terms in the Treaty which are undefined therein. It is always speaking because it requires meaning to be ascertained by reference to the national law of a Contracting State "at that time", that is at the time when the Treaty falls to be applied.

I am not sure that "always speaking" is the best label to use here, because that term is quaint, and because it is best reserved for a principle which is wider than the mere interpretation of terms:

> In the classic work of Sir Rupert Cross (Statutory Interpretation, 3rd ed. (1995), pp. 51-52) the position is explained as follows:
>
>> The somewhat quaint statement that a statute is 'always speaking' ... is often taken to mean that a statutory provision has to be considered first and foremost as a norm of the current legal system, whence it takes its force, rather than just as a product of an historically defined Parliamentary assembly. It has a legal existence independently of the historical contingencies of its promulgation, and accordingly should be interpreted in the light of its place within the system of legal norms currently in force. Such an approach takes account of the viewpoint of the ordinary legal interpreter of today, who expects to apply ordinary current meanings to legal texts, rather than to embark on research into linguistic, cultural and political history, unless he is specifically put on notice that the latter approach is required.
>
> In other words, it is generally permissible and indeed necessary to take into account the place of the statutory provision in controversy in the broad context of the basic principles of the legal system as it has evolved.[112]

I prefer to describe the timing aspect of the art 3(2) rule as an **"ambulatory"** approach to construction. But it does not matter which term one uses.

OECD Commentary provides:

> 11. ... the question arises which legislation must be referred to in order to determine the meaning of terms not defined in the Convention, the choice being between the legislation in force when the Convention was signed or that in force when the Convention is being applied, i.e. when the tax is imposed. The Committee on Fiscal Affairs concluded that the latter

[112] *Turkington v Times Newspapers* [2000] UKHL 57.

interpretation should prevail, and in 1995 amended the Model to make this point explicitly.

107.12.3 *Tax meaning (if any)*

Article 3(2) OECD Model provides:

> ... any term not defined therein shall ...have the meaning that it has ... under the law of that State for the purposes of the taxes to which the Convention applies...

Thus the meaning of a word is its tax meaning, not any general law meaning, if different. This assumes of course that (1) domestic tax law does provide a meaning for a term; and (2) domestic tax law only provides one meaning. But where there are multiple definitions, as happens very often, it may be possible to identify a principal definition.

If domestic tax law does not provide a meaning, one would fall back on domestic general law (on the basis that tax law would adopt the general law meaning). It is possible that Scots general law and English general law may have different meanings, but that will not often, if ever, arise.

What if the treaty term is not used in domestic tax law? In practice I do not think there are any words in the OECD Model which are not also found in UK tax statutes, and the words as used in the UK tax statutes have UK tax meanings; and so there must in all cases be some UK tax law meaning. But those meanings may be context dependent and there may not be a general tax law meaning.

Avery Jones addresses this point when considering the meaning of "salaries, wages and other similar remuneration" in art 15:

> "Salaries, wages and other similar remuneration..." is not a term found in internal law since the internal law tax charge is on the emoluments of an office or employment...[113]
>
> Although Article 3(2) can be read more strictly as referring to the meaning of terms used in the treaty which are identical to those in internal law, this does not take into account the different terms which might be expected to be used in internal law in different countries. Although the particular treaty being interpreted is a bilateral one, it should be borne in mind that the treaty was not drafted solely with the particular countries' tax systems

[113] Author's footnote: the charge is now on earnings, which includes salary, wages and other profits; see 26.4.1 ("Ordinary" earnings). But that does not matter for the points being made here.

> in mind when it follows the wording of the Model. There can also be language differences in construing treaties, when two languages are equally authentic but terms have different meanings in each language. It is impossible to equate the meaning of treaty terms to identical internal law terms where the only official language of a treaty may not be the country's own language; some Japanese treaties are, for example, only in English. It seems necessary therefore to interpret undefined terms in the treaty in accordance with internal tax law, not only when the terms are identical, but also where they are recognisably the same concept. Thus "salaries, wages, and other similar remuneration … in respect of an employment" should ... be taken to mean anything taxed as employment income under internal law.[114]

OECD Commentary provides:

> 13.1 [Art 3(2)] was amended in 1995 to conform its text more closely to the general and consistent understanding of member states. For purposes of [art 3(2)], the meaning of any term not defined in the Convention may be ascertained by reference to the meaning it has for the purpose of any relevant provision of the domestic law of a Contracting State, whether or not a tax law. However, where a term is defined differently for the purposes of different laws of a Contracting State, the meaning given to that term for purposes of the laws imposing the taxes to which the Convention applies shall prevail over all others, including those given for the purposes of other tax laws.

The Australian Taxation Office follow OECD Commentary approach.[115]

107.12.4 *Subject to context*

The rule in art 3(2) applies "unless the context otherwise requires". OECD Commentary provides:

> 12. ... The context is determined in particular by the intention of the Contracting States when signing the Convention as well as the meaning given to the term in question in the legislation of the other Contracting State (an implicit reference to the principle of reciprocity on which the Convention is based)...

[114] Avery Jones, "Problems of categorising income and gains for tax treaty purposes" [2001] BTR 382.

[115] TR 2001/13 Income tax: Interpreting Australia's Double Tax Agreements para 63-76.

> 13. Consequently, the wording of [art 3(2)] provides a satisfactory balance between,
> [a] on the one hand, the need to ensure the permanency of commitments entered into by States when signing a convention (since a State should not be allowed to make a convention partially inoperative by amending afterwards in its domestic law the scope of terms not defined in the Convention) and,
> [b] on the other hand, the need to be able to apply the Convention in a convenient and practical way over time (the need to refer to outdated concepts should be avoided).

The context will often show that an autonomous meaning of undefined terms is appropriate. For examples see 109.4.1 (Characterisation: Better view); 9.26.2 (Substantial presence).

Art 3(2) does not apply to terms defined in the treaty. But treaty definitions are themselves subject to context, and context might suggest domestic-law meaning should apply. Also the definitions will themselves use undefined terms.

The position is normally put in terms of stark alternatives: the meaning must be either domestic-law or autonomous. But the context may support an intermediate position. One may start with domestic-law meaning, and generally stop there; but in limited aspects only where domestic-law does not fit the treaty, the domestic law meaning may not be applied. An example (a variant of the facts of *Fowler*) might be that the meaning of employment normally follows domestic law; but if domestic law deemed a diver's trade to be an employment, the deeming should not apply for treaty purposes.

107.13 Taxes Covered

107.13.1 *Scope of DTA*

I refer to article 2 OECD Model as the Taxes Covered clause, with initial capitals to reflect the technical nature of the expression.

Article 2(1) OECD Model provides:

> This Convention shall apply to
> [a] taxes on income and on capital
> [b] imposed on behalf of a Contracting State or of its political subdivisions or local authorities,
> [c] irrespective of the manner in which they are levied.

There are three distinct points here.

107.13.2 *Taxes on income and capital*

Art 2(2) OECD Model defines the expression "taxes on income and capital":

> There shall be regarded as taxes on income and on capital all taxes imposed on total income, on total capital, or on elements of income or of capital, including taxes on gains from the alienation of movable or immovable property, taxes on the total amounts of wages or salaries paid by enterprises, as well as taxes on capital appreciation

The OECD Commentary provides:

> 3. This paragraph gives a definition of taxes on income and on capital. Such taxes comprise taxes on total income and on elements of income, on total capital and on elements of capital. They also include taxes on profits and gains derived from the alienation of movable or immovable property, as well as taxes on capital appreciation. Finally, the definition extends to taxes on the total amounts of wages or salaries paid by undertakings ("payroll taxes"; in Germany, "*Lohnsummensteuer*"; in France, "*taxe sur les salaires*"). Social security charges, or any other charges paid where there is a direct connection between the levy and the individual benefits to be received, shall not be regarded as "taxes on the total amount of wages".
>
> 4. Clearly a State possessing the right to tax an item of income or capital under the Convention may levy the taxes imposed by its legislation together with any duties or charges accessory to them: increases, costs, interest, penalties etc. It has not been considered necessary to specify this in the Article, as it is obvious that a Contracting State that has the right to levy a tax may also levy the accessory duties or charges related to the principal duty. Most States, however, do not consider that interest and penalties accessory to taxes covered by Article 2 are themselves included within the scope of Article 2 and, accordingly, would generally not treat such interest and penalties as payments to which all the provisions concerning the rights to tax of the State of source (or situs) or of the State of residence are applicable, including the limitations of the taxation by the State of source and the obligation for the State of residence to eliminate double taxation. Nevertheless, where taxation is withdrawn or reduced in accordance with a mutual agreement under Article 25, interest and administrative penalties accessory to such taxation should be withdrawn or reduced to the extent that they are directly connected to the taxation (i.e. a tax liability) that is relieved under the mutual agreement. This would be the case, for example, where the additional charge is computed with reference to the amount of the underlying tax liability and the

> competent authorities agree that all or part of the underlying taxation is not in accordance with the provisions of the Convention. This would also be the case, for example, where administrative penalties are imposed by reason of a transfer pricing adjustment and that adjustment is withdrawn because it is considered not in accordance with paragraph 1 of Article 9.

107.13.3 *Subdivisions/local authorities*

Art 2(3) USA/UK DTA provides:

> The existing taxes to which this Convention shall apply are—
> (a) in the case of the United States—
> (i) the Federal income taxes imposed by the Internal Revenue Code (but excluding social security taxes); and
> (ii) the Federal excise taxes imposed on insurance policies issued by foreign insurers and with respect to private foundations;...

The USA/UK DTA differs from the OECD Model[116] in that it applies to federal taxes but not to state or city taxes. Perhaps there are constitutional principles involved here. But unilateral relief in principle applies where DTA tax credit is not available.

107.13.4 *Manner of levying tax*

Art 2(1)OECD Model directs that the treaty applies "irrespective of the manner in which the taxes are levied".

The OECD Commentary on art 2(1) explains what is meant by this:

> The method of levying the taxes is equally immaterial: by direct assessment or by deduction at the source, in the form of surtaxes or surcharges, or as additional taxes (*centimes additionnels*), etc.

Art 2(1) was relied on, though unnecessarily and perhaps only rhetorically, in *Fowler v HMRC.*[117]

107.13.5 *List of taxes covered*

Article 2(3) OECD Model provides for a list of taxes covered:

> The existing taxes to which the Convention shall apply are in particular:
> a) (in State A): ....
> b) (in State B): ....

[116] See 9.7 (State/subdivision/local authority).

[117] See 109.4.1 (Characterisation: Better view).

107.13.6 *Taxes covered: UK practice*

There are some UK treaties which adopt the wording of OECD Model art 2(1)(2). But much more often, these provisions are omitted and article 2 of the DTA (headed "Taxes Covered") provides: "The Agreement shall apply to the following taxes..." and sets out a list. Presumably that is thought to be more precise. I cannot see that the omission has any significance.

107.13.7 *Substantially similar taxes*

Article 2(4) OECD Model provides:

> [a] The Convention shall apply also to any identical or substantially similar taxes that are imposed after the date of signature of the Convention in addition to, or in place of, the existing taxes.
> [b] The competent authorities of the Contracting States shall notify each other of any significant changes that have been made in their taxation laws.

This is standard in UK treaties (unlike art 2(1)(2)).

107.14 Effectively connected with PE

This phrase is found in a number of OECD Model articles. Discussion on one may be helpful to the others, so it may be convenient to set out the list here:

Article	**Phrase (in outline)**	**See para**
10(4)	Holding in respect of which dividends are paid is effectively connected with a PE	107.9.2
11(4)	Debt-claim in respect of which interest is paid is effectively connected with a PE	107.9.2
11(5)	A PE in connection with which the indebtedness on which the interest is paid was incurred	26.27.6
12(3)	Royalties arise through a PE and the right or property in respect of which the royalties are paid is effectively connected with such PE	107.9.2
13(2)	Business property of a PE[118]	56.24.2
21(2)	The right or property in respect of which the income is paid is effectively connected with a PE	107.9.2

107.15 BEPS multilateral instrument

This section discusses the treaty whose long title is "the Multilateral

[118] This phrase is different but the meaning will be (more or less) the same.

Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting". I call it the "**BEPS MLI**" or where the context is clear, just MLI.

The MLI is supplemented by:

- An explanatory statement ("MLI ES")[119]
- A commentary
- Guidance for the development of synthesised texts[120]
- OECD Peer Review Report on Treaty Shopping[121]

The object and purpose of the MLI is to implement the BEPS measures which related to DTAs.[122] The background can be found in BEPS Action 15 Report, "Developing a Multilateral Instrument to Modify Bilateral Tax Treaties".

The MLI implemented the following BEPS Actions:

Action	**Topic**	**Adopted by UK**
2	Hybrids	Adopted in part
6	Treaty abuse	Adopted in part
7	Permanent Establishment	Adopted in part
14	Dispute resolution	Adopted but not discussed

OECD publish a database of countries which have signed the MLI and their choices of optional provisions.[123]

The UK has published a document ("UK MLI Notifications")[124] which set

[119] *https://www.oecd.org/tax/treaties/explanatory-statement-multilateral-convention-to-implement-tax-treaty-related-measures-to-prevent-BEPS.pdf*
Para 12 MLI ES provides: "While this Explanatory Statement is intended to clarify the operation of the Convention to modify Covered Tax Agreements, it is not intended to address the interpretation of the underlying BEPS measures (except with respect to the mandatory binding arbitration provision contained in Articles 18 through 26)."

[120] *http://www.oecd.org/tax/treaties/beps-mli-guidance-for-the-development-of-synthesised-texts.pdf* (Nov 2018)

[121] *https://www.oecd-ilibrary.org/docserver/9789264312388-en.pdf?expires=1550998970&id=id&accname=guest&checksum=0714C894B29FF51D6F78DD798D16F034* (2019)

[122] Para 12 MLI ES, referring to art 31 Vienna Treaty; see 107.10 (DTA interpretation principles).

[123] *http://www.oecd.org/tax/treaties/mli-database-matrix-options-and-reservations.htm*

[124] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf*

out:
(1) DTAs covered by the MLI
(2) UK opt-outs and opt-ins

The UK has not adopted some of the MLI provisions relating to Action 2 or Action 7, taking the view that current provisions are sufficient.

The MLI is incorporated into UK law by the Double Taxation Relief (Base Erosion and Profit Shifting) Order 2018.[125]

The MLI is in English and French, "both texts being equally authentic".[126] But I suspect that (as with the OECD Model) reference to the French version will be very rare.[127]

HMRC publish convenient synthesised texts of DTAs as amended by the MLI.[128]

107.15.1 *Navigation*

I discuss the specific MLI provisions in the context where they arise. This chapter covers MLI issues which are more conveniently dealt with as a discrete topic.

Article	**Topic**	**See**
Part I	*Scope and Interpretation*	
1	Scope	107.17
2	Interpretation	107.16
3(1)	Transparent Entities	91.4
3(2)	Transparent Entities	*Not adopted*

36	Entry into Effect of Part VI	
37	Withdrawal	
38	Relation with Protocols	
39	Depositary	

A full discussion requires a book to itself, and such books have been written.

107.16 Definitions

The MLI writes defined terms with initial capitals, so I adopt that here.

107.16.1 *Party*

Art 2(1) BEPS MLI provides:

> b) The term "Party" means:
> i) A State for which this Convention is in force pursuant to Article 34 (Entry into Force); or
> ii) A jurisdiction which
> [A] has signed this Convention pursuant to subparagraph b) or c) of paragraph 1 of Article 27 (Signature and Ratification, Acceptance or Approval)
> [B] and for which this Convention is in force pursuant to Article 34 (Entry into Force).

107.16.2 *Contracting Jurisdiction/Signatory*

Art 2(1) BEPS MLI provides some commonsense definitions:

> c) The term "Contracting Jurisdiction" means a party to a Covered Tax Agreement.

The term "Contracting Jurisdiction" refers to the States, jurisdictions or territories that are parties to a Covered Tax Agreement. It is used instead of the more common terms "Contracting State" (because the MLI may apply to DTAs to which a non-State jurisdiction is a party) and "Contracting Party" (because "Party" refers to a party to the MLI).

> d) The term "Signatory" means a State or jurisdiction which has signed this Convention but for which the Convention is not yet in force.

107.16.3 *Covered Tax Agreement*

Art 2(1)(a) BEPS MLI provides:

> The term "Covered Tax Agreement" means an agreement for the avoidance of double taxation with respect to taxes on income (whether or not other taxes are also covered):
> i) that is in force between two or more:
> A) Parties; and/or
> B) jurisdictions or territories which are parties to an agreement described above and for whose international relations a Party is responsible; and
> ii) with respect to which each such Party has made a notification to the Depositary listing the agreement as well as any amending or accompanying instruments thereto (identified by title, names of the parties, date of signature, and, if applicable at the time of the notification, date of entry into force) as an agreement which it wishes to be covered by this Convention.

Covered Tax Agreements are listed, so it is clear what is covered. UK IHT DTAs are not Covered Tax Agreements.

107.16.4 *Undefined terms*

Art 2(2) BEPS MLI provides:

> As regards the application of this Convention at any time by a Party, any term not defined herein shall, unless the context otherwise requires, have the meaning that it has at that time under the relevant Covered Tax Agreement.

For the position in the absence of express definitions, see 107.12 (Undefined treaty terms).

107.17 Scope of BEPS MLI

Article 1 provides:

> This Convention modifies all Covered Tax Agreements as defined in subparagraph a) of paragraph 1 of Article 2 (Interpretation of Terms).[129]

The MLI makes changes to DTAs where both States have opted to make the change. If both States select a particular amendment, it is included in the revised version of the treaty between them. If either State does not select it, it is not included and the original treaty provisions continue to apply.

UK MLI Notifications lists 121 UK DTAs which it wishes to be covered by the MLI. That is most but not quite all of the UK DTAs as at 2017.

The following States are not listed. Instead, bilateral negotiations have updated, or will update, these agreements:

State	**Status of DTA with UK**
Austria	New treaty (2018)
Colombia	New treaty (2016)
Germany	Existing treaty (2010) yet to be amended
Switzerland	Existing treaty (2012) amended 2017
Taiwan	Existing treaty (2002) yet to be amended

The following jurisdictions are not listed since these are Crown Dependencies/overseas territories. Some have new DTAs; presumably the others will be updated in due course, but have lower priority.

Jurisdiction	**Status of UK DTA**
Crown Dependencies	
Jersey	New treaty (2018)
Guernsey	New treaty (2018)
Isle of Man	New treaty (2018)
British overseas territories	
Cayman Islands	Existing treaty (2009) yet to be amended
Falkland Islands	Existing treaty (1997) yet to be amended
Gibraltar	New treaty (2019)
Montserrat	Existing treaty (1947, 2009) yet to be amended
British Virgin Islands	Treaty yet to be concluded

[129] See 107.16.3 (Covered Tax Agreement),

The US, as usual, marches to a different drum. It has not ratified the MLI. But some MLI provisions have followed US Model precedent.

107.18 BEPS MLI commencement

107.18.1 *Entry into force*

Entry into force is governed by Art 34(1)(2) BEPS MLI. I discussed that in detail in previous editions of this work[130] but time has passed, and it is sufficient to note that the MLI entered into force in the UK on 1 October 2018.

107.18.2 *Entry into effect*

Art 35 BEPS MLI provides:

> 1. The provisions of this Convention shall have effect in each Contracting Jurisdiction with respect to a Covered Tax Agreement:
>
> a) with respect to taxes withheld at source on amounts paid or credited to non-residents, where the event giving rise to such taxes occurs on or after the first day of the next calendar year that begins on or after the latest of the dates on which this Convention enters into force for each of the Contracting Jurisdictions to the Covered Tax Agreement; and
>
> b) with respect to all other taxes levied by that Contracting Jurisdiction, for taxes levied with respect to taxable periods beginning on or after the expiration of a period of six calendar months (or a shorter period, if all Contracting Jurisdictions notify the Depositary that they intend to apply such shorter period) from the latest of the dates on which this Convention enters into force for each of the Contracting Jurisdictions to the Covered Tax Agreement.[131]

[130] See the 2022/23 edition para 105.17.1 (Entry into force).

[131] Article 35 continues with two options, but the UK has not adopted these. They will be relevant of other Parties adopt them. These are:
"2. Solely for the purpose of its own application of subparagraph a) of paragraph 1 and subparagraph a) of paragraph 5, a Party may choose to substitute "taxable period" for "calendar year", and shall notify the Depositary accordingly.
3. Solely for the purpose of its own application of subparagraph b) of paragraph 1 and subparagraph b) of paragraph 5, a Party may choose to replace the reference to "taxable periods beginning on or after the expiration of a period" with a reference to "taxable periods beginning on or after 1 January of the next year beginning on or after the expiration of a period", and shall notify the Depositary accordingly."

There are further commencement rules (not discussed here) for mutual agreement procedures and arbitration, and some scope for States to amend these rules.

In short:

(1) Withholding tax changes have effect from 1 January 2019.

(2) Other tax changes have effect for taxable periods beginning on or after 1 April 2019.

This timetable applies to DTAs with the six States which ratified before the UK: Austria, New Zealand, Poland, Serbia, Slovenia and Sweden. For most treaties, commencement will take effect by reference to the date of entry into force of the other State.

On 15 March 2021, the Conference of the Parties to the MLI approved an opinion on art 35 MLI, in particular on withholding tax where the latest of the dates of entry into force of the MLI for a pair of Contracting Jurisdictions is on 1 January of a year.[132]

107.19 Incorporating DTAs in UK law

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by authority of statute. Accordingly, s.2(1) TIOPA provides:

> If Her Majesty by Order in Council declares—
>
> (a) that arrangements specified in the Order have been made in relation to any territory outside the UK with a view to affording relief from double taxation[133] in relation to taxes within subsection (3), and
>
> (b) that it is expedient that those arrangements should have effect,
>
> those arrangements have effect.

107.19.1 *DTA approval procedure*

Section 5(2) TIOPA provides a procedural rule:

> An Order under section 2 is not to be submitted to Her Majesty in Council

[132] *https://www.oecd.org/tax/treaties/oecd-publishes-30-country-profiles-applying-arbitration-under-the-multilateral-beps-convention.htm*

[133] This is expanded by s.2(1A) TIOPA which was added in order to authorise the BEPS MLI: "For the purposes of this section, arrangements made with a view to affording relief from double taxation include any arrangements which modify the effect of arrangements so made."

> unless a draft of the Order has been laid before and approved by a resolution of the House of Commons.

Art. 30 OECD Model provides:

> 1. This Convention shall be ratified and the instruments of ratification shall be exchanged at .... as soon as possible.
> 2. The Convention shall enter into force upon the exchange of instruments of ratification and its provisions shall have effect:
>   a) (in State A): ....
>   b) (in State B): ....

Thus for example art.31 (Entry into Force) of the UK/France DTA provides:

> (1) Each of the Contracting States shall notify to the other the completion of the procedures required by its law for the bringing into force of this Convention. This Convention shall enter into force on the date the later of these notifications has been received.
> (2) The provisions of this Convention shall have effect:
>   (a) in the UK:
>   (i) in respect of income tax and capital gains tax, for any year of assessment beginning on or after 6th April in the calendar year next following that in which this Convention enters into force;
>   (ii) in respect of corporation tax, for any financial year beginning on or after 1st April in the calendar year next following that in which this Convention enters into force;
>   (b) in France ...

The INTM summarises the procedure:

> **INTM152020 Negotiation of agreements** [Jan 2018]
> ... HMRC are responsible for the negotiation of the terms of agreements, subject to ministerial approval. Once the draft agreement is agreed by the representatives of both countries they initial the draft. The final text is subsequently signed on behalf of both countries and in the UK is then laid before the House of Commons in the form of a draft Statutory Instrument. When approved, it receives the Royal Assent by Order in Council (TIOPA10/S2).
> Each country has to notify the other that it has done everything necessary to give the agreement the force of law and only when each country has done so does the agreement come into force. ...

The UK parliamentary process is brief, and it is not usual to produce a detailed explanatory note. But other treaty States may produce such material, which is relevant in the UK.[134]

107.19.2 *Taxes within s.2 TIOPA*

Section 2(3) TIOPA provides:

> The taxes are—
> (a) income tax,
> (b) corporation tax,
> (c) capital gains tax,
> (d) petroleum revenue tax, and
> (e) any taxes imposed by the law of the territory that are of a similar character to taxes within paragraphs (a) to (d).

IHT has its own procedure.[135]

107.19.3 *Effect of DTAs*

Section 2(2) TIOPA provides:

> If arrangements have effect under subsection (1), they have effect in accordance with section 6.

So we turn to s.6 TIOPA. Section 6(1) provides:

> Subject to this Part and Part 18 of ICTA, double taxation arrangements have effect in accordance with subsections (2) to (4) despite anything in any enactment.

So DTAs override domestic UK tax legislation. In *Anson v HMRC*:[136]

> The provisions of the ... Convention therefore override inconsistent provisions in domestic UK tax legislation, other than those concerned with double taxation relief.

Section 6(2)(3) TIOPA set out the matters which a DTA can achieve for IT/CT and CGT: it is helpful to read them side by side:

s.6(2) TIOPA: IT/CT	**s.6(3) TIOPA: CGT**
Double taxation arrangements have effect in relation to income tax and corporation tax so far as the arrangements provide—	Double taxation arrangements have effect in relation to capital gains tax so far as the arrangements provide—

[134] See 107.10.9 (Foreign revenue guidance).

[135] See 114.6 (IHT DTAs: Incorporation in UK law).

[136] [2015] UKSC 44 at [112].

(a) for relief from income tax or corporation tax,	(a) for relief from capital gains tax,
(b) for taxing income of non-UK resident persons[137] that arises from sources in the UK,	(b) for taxing capital gains accruing to non-UK resident persons on the disposal of assets in the UK, .
(c) for taxing chargeable gains accruing to non-UK resident persons on the disposal of assets in the UK,	[no equivalent]
(d) for determining the income or chargeable gains to be attributed to non-UK resident persons,	(c) for determining the capital gains to be attributed to non-UK resident persons,
(e) for determining the income or chargeable gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons, or	(d) for determining the capital gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons, or
(f) for determining the income or chargeable gains to be attributed to UK resident persons who have special relationships with non-UK resident persons.[138]	(e) for determining the capital gains to be attributed to UK resident persons who have special relationships with non-UK resident persons

Para (a) is what one would expect. In practice, as far as I am aware, DTAs are not used for taxing income or chargeable gains, so s.6(2)(b)(c) and s.6(3)(b) are not needed.

Section 3(2) TIOPA extends this:

> Section 2(1) gives effect to arrangements even if the arrangements include—
> (a) provision as to income that is not subject to double taxation,
> (b) provision as to chargeable gains that are not subject to double taxation
> (c) [This relates to oil taxation]
> (d) provision conferring (with or without other functions) functions relating to the determination of matters arising under the

[137] Defined by reference in ss(7): "In subsection (3) 'UK resident person' and 'non-UK resident person' have the meaning given by section 989 of ITA 2007."

[138] This relates to adjustments under article 9.

> arrangements on a public authority in the UK or in a territory outside the UK.

These provisions give effect to most treaty provisions, though there could be gaps.[139]

DTA relief overrides domestic charging provisions, even if enacted after the DTA.[140]

107.19.4 *Retrospective relief*

Section 3(1) TIOPA authorises retrospective relief:

> Section 2(1) gives effect to arrangements even if the arrangements include—
> (a) provision for relief from tax for periods before the passing of this Act, or
> (b) provision for relief from tax for periods before the making of the arrangements.

107.19.5 *"Double taxation"*

Section 4 TIOPA provides:

> (1) For the purposes of sections 2 and 3, any amount within subsection (2) is to be treated as having been payable.
> (2) An amount is within this subsection if it is an amount of tax that would have been payable under the law of a territory outside the UK but for a relief—
> (a) given under the law of the territory with a view to promoting industrial, commercial, scientific, educational or other development in a territory outside the UK, and
> (b) about which provision is made in double taxation arrangements.
> (3) References in sections 2 and 3 to double taxation are to be read in accordance with subsection (1).

EN TIOPA provides:

> 35.Sections 2 and 3 [TIOPA] refer to "double taxation" in general terms. Broadly speaking, there is double taxation if the same (for example) income is taxed in more than one territory. But that will not be the case if

[139] *NEC Semi-Conducters Ltd v HMRC* [2006] EWCA Civ 25; *Boake Allen v HMRC* [2007] 1 WLR 1386.

[140] The doctrine of implied repeal does not operate to double tax treaties: see *Irish Bank Resolution Corporation Ltd v HMRC* [2020] EWCA Civ 1128 at [55]-[57].

> the income (in this example) is not in fact taxed in one of the territories concerned as a result of a relief. [Section 4] supplements sections 2 and 3. It requires certain reliefs to be ignored, with the result that one is to assume in certain cases that tax has been paid even though it has in fact not been paid. This deemed tax (in the territory giving the relief), taken with the actual tax (in the other territory), then means that there is "double taxation". As a result of this section, therefore, statutory effect can be given to provisions in arrangements which are about such cases.

107.19.6 *BEPS MLI*

Section 2(1A) TIOPA provides:

> For the purposes of this section, arrangements made with a view to affording relief from double taxation include any arrangements which modify the effect of arrangements so made.

This is intended to facilitate the implementation of the BEPS multilateral instrument.

107.19.7 *Revocation of DTAs*

The esoteric topic of revocation of DTAs enjoyed an unexpected outing in *Miller (R, oao) v Secretary of State for Exiting the European Union*, the cause célèbre which decided that government had no power to revoke EU treaties without authority of Parliament.

In the High Court, the government's skeleton argument provided:

> Double taxation treaties must be domestically implemented through secondary legislation to have effect upon the rights and liabilities of taxpayers, and are periodically renegotiated by the Crown. Such renegotiations involve terminating the existing treaty and enacting replacement secondary legislation. Parliament does not authorise the termination of an existing treaty, notwithstanding the effect that a change in the international rules is intended to produce on the rights and liabilities of taxpayers. Still less does it authorise the Crown to commence negotiations on changes to existing treaties. Its role is to scrutinise the secondary legislation implementing a new treaty once it has been agreed by the Crown. ... [s.2 TIOPA][141] authorised neither the termination of an existing treaty nor the commencement of negotiations on changes to an existing treaty nor the agreement of a new treaty. The fact that, under [s.5(2) TIOPA], the House of Commons (and not, it is to be noted,

[141] The original referred to ICTA 1988; but nothing turns on that.

> Parliament) had a role in scrutinising a new treaty once it had been agreed does not affect the point made.[142]

Where a new treaty replaces an old one, under the s.2 TIOPA procedure, there *is* statutory (parliamentary) authority for the revocation of the old treaty.

Section 5(1) TIOPA provides:

> If an Order under section 2 ("the later Order") revokes an earlier Order under that section, the later Order may contain transitional provisions that appear to Her Majesty to be necessary or expedient.

So the government's argument - that this situation constituted an example of the government's power to abolish statutory rights without authority of parliament - is invalid. The High Court, I think understandably, did not even mention it, and the Supreme Court dismissed it briefly:

> ... DTTs are an unsatisfactory analogy. By ... TIOPA, Parliament provided in primary legislation that arrangements agreed by ministers in a DTT at international level will have effect in national law, but only if those arrangements are specified in an Order in Council which is approved by the House of Commons. Thus, unlike EU law which becomes part of UK law automatically as a result of the 1972 Act, the arrangements under a DTT do not take effect automatically as a result of ... TIOPA, but only through a specific Order in Council which has to be approved by Parliament.[143]

On the other hand, if the government (acting under the dignified label, "the Crown") could validly revoke an existing DTA *without* any replacement (and thus without following the s.2 TIOPA procedure and without Parliamentary authority) then that would have supported the government's argument in *Miller* that the government could similarly revoke the EU treaty. The reader may think that if the government in *Miller* had wanted to

[142] *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/558592/Miller_v_SSExEU_-_Skeleton_Argument_of_the_Secretary_of_State_300916.pdf* (footnotes omitted).
The same point is made, more briefly, in the Crown's case before the Supreme Court, para 45: *https://www.supremecourt.uk/news/article-50-brexit-appeal.html*
The argument is discussed by Finnis at:
http://judicialpowerproject.org.uk/wp-content/uploads/2016/11/Finnis-2016-Supplementary-Note-pg.pdf

[143] *Miller (R, oao) v Secretary of State for Exiting the European Union* [2017] UKSC 5 at [89].

raise tax arguments, it would have done well to seek the input of tax counsel. But it seems unlikely that this argument, however put, would have affected the final result.

It was therefore doubtful whether the government could validly revoke an existing DTA without any replacement (and thus without following the s.2 TIOPA procedure, and without parliamentary authority). But now s.2(1A) TIOPA may fill that gap.

107.19.8 *DTA/UK law conflict*

The INTM provides:

> **INTM152020 Negotiation of agreements** [Jan 2018]
> ... In the UK, taxpayers have no rights under the agreement itself; the rights arise under the Statutory Instrument and the legislation which gives the agreement the force of law (*IRC v Collco Dealings Ltd* 39 TC 509).

In some States, treaty obligations override their domestic law; but if there is a conflict between the terms of a treaty and UK domestic law, UK domestic law prevails and overrides treaty obligations.[144]

However even in the UK, conflict matters, or should matter, as:

(1) It may affect construction: the courts should seek to construe domestic law consistently with treaty obligations.
(2) It may affect policy debate and law reform, at least to the extent that those framing UK taxation, or their treaty-partners, believe that the UK ought to comply with its treaty obligations and not to impose tax in breach of them.

107.20 Claim for DT reliefs

Section 6(6) TIOPA provides:

> Relief under subsection (2)(a), (3)(a) or (4) requires a claim.

Subsection (2)(a) and (3)(a) provide IT/CT and CGT relief.[145] (Subsection (4) relates to petroleum revenue tax, not discussed here)

In short, a claim for relief is needed in all cases.[146]

[144] *Padmore (No 2) v IRC* 73 TC 470.

[145] See 107.19.3 (Effect of DTAs).

[146] This seems self-evident, but the contrary view has been repeatedly argued, and rejected: *Davies v HMRC* [2020] UKUT 67 (TCC) at [84]; *Uddin v HMRC* [2020] UKFTT 441 (TC); *Hargreaves Property Holdings Ltd v HMRC* [2023] UKUT 120 (TCC) at [52].

Form HS302 (Dual residents) provides a claim form for individuals who are UK resident under the SRT, but treaty-resident in a foreign State.

In addition, dual resident companies must make a claim under the mutual agreement tie-breaker;[147] but perhaps that does not happen often.

107.21 Remittance basis income

107.21.1 *Unremitted income*

The Commentary to art 1 OECD Model provides:

> 108 ...[Remittance basis taxpayers are not] subject to potential double taxation to the extent that foreign income is not remitted to their State of residence and it may be considered inappropriate to give them the benefit of the provisions of the Convention on such income. Contracting States which agree to restrict the application of the provisions of the Convention to income that is effectively taxed in the hands of these persons may do so by adding the following provision to the Convention ...

The OECD proposed text is as follows:

> Where under any provision of this Convention
> [a] income[148] arising in a Contracting State is relieved in whole or in part from tax in that State and
> [b] under the law in force in the other Contracting State a person, in respect of the said income, is subject to tax by reference to the amount thereof which is remitted to or received in that other State and not by reference to the full amount thereof,
>
> then any relief provided by the provisions of this Convention shall apply only to so much of the income as is taxed in the other Contracting State.

See too 123.1 (Claims).

The application of s.6(2)(b)-(f) and s.6(3)(b)-(e) TIOPA does not depend on a claim, but these provisions are not reliefs: they may operate in favour of HMRC; see 107.19.3 (Effect of DTAs).

[147] See 107.20 (Tie-breaker: Mutual agreement).

[148] Author's footnote:
References to income in this discussion in principle include gains.
The draft clause refers only to income, but in the UK foreign gains also qualify for the remittance basis, so DTAs with a capital gains article generally extend the rule to gains.
If the applicable DTA fails to do this then there may appear to be double non-taxation in that gains which are (un)taxed in the UK on the remittance basis are not taxed in the foreign State because of DT relief. But the word "income" would probably be construed to include gains.

I refer to this as a "**remittance basis DTA override**".

Although this text was only added to OECD Commentary in 2003, a provision of this kind is found in most UK DTAs.[149]

USA/UK DTA Technical Explanation gives a straightforward example:[150]

> For example, if a UK resident who is not domiciled in the UK maintains a brokerage account in Ireland into which is paid $100 in U.S.-source dividend income, the United States may impose withholding tax at the statutory rate of 30% because the dividend income will not be taxed in the UK as it has not been remitted to the UK. If the dividend income instead is paid into a brokerage account in London, the UK resident will be subject to tax in the UK and the United States will reduce the rate of withholding tax to 15%.

Note that it is foreign tax (in this case, US tax), not UK tax, which is in issue here. (UK tax issues only arise where the UK has a treaty with another State where the *foreign* State has a remittance basis. The only examples of which I am aware are Ireland[151] and Japan.)

107.21.2 *Remitted income*

Suppose:

(1) Year 1: T (a remittance basis taxpayer) receives income subject to foreign tax

(2) Year 2: T remits the income

In year 1, no DT relief is available, and so foreign tax is payable without DT relief. In year 2, the foreign tax can then be reclaimed under the relevant DTA - if foreign law allows. And what are the time limits if the remittance takes place many years after receipt? It may be easier to remit the income in year 1.

A claim for relief should be made when the income is remitted, not when it arises.

107.22 Characterisation

OECD Model articles deal separately with particular types of income, so it is necessary to classify the type of income which the taxpayer receives, ie to

[149] See too 9.5 ("Liable to tax").

[150] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf* The remittance basis DTA override is in art 1(7) USA/UK DTA.

[151] Ireland/UK DTA art.6 (Limitation of relief) and art.14(5) (gains).

decide whether any particular item constitutes remuneration from an employment, or business income, or Other Income, etc. This is traditionally referred to as "characterisation" though those who prefer plain English may say "classification".

The borderlines between different types of income are often difficult to draw, and that needs to be discussed in the context of each article. The issue also arises in relation to third-party DT relief, which I consider elsewhere: see 109.4 (Characterisation: Same income?).

Hughes v Bank of New Zealand[152] concerned the domestic tax exemption for interest on FOTRA securities, not a DTA, but the issue of classification of income is not restricted to DT reliefs: it can arise wherever a rule applies to particular types of income.

(1) The taxpayer was a non-resident bank with a UK branch. The branch's profit was taxable in the UK.

(2) The branch's trading receipts included interest from FOTRA securities (exempt from UK tax in the hands of a non-resident).

The FOTRA exemption applied:[153]

> [*Hughes*] is authority for the proposition that exempt interest retains its character as interest even when it is taxable as a component element of the recipient's trading profits. ... Interest from exempt securities does not cease to be such by being included as a component element of the recipient's taxable profit.[154]

On the other side of the line, according to *Bricom*, is *IRC v Australian Mutual Provident Society*.[155]

(1) The taxpayer was a non-resident life assurance company with a UK branch. The branch's profit was taxable.

(2) The taxable profit was calculated in an unusual way: the relevant rule provided that an unidentifiable portion of the worldwide income of the company derived from the investment of its life assurance fund, calculated in accordance with a mathematical formula, should be charged to tax. That worldwide income included interest.

It was held that the rule did not tax the company's investment income as

[152] 21 TC 472.

[153] See 22.4.2 (Trading receipts/deductions).

[154] *Bricom v IRC* 70 TC 272 at p.290.

[155] 28 TC 388 "as explained by Lord Radcliffe" in *Ostime v Australian Mutual Society* 38 TC 492.

such but something different, described as "a conventional sum"; that sum was not interest, even though interest from FOTRA securities constituted an element in the computation:

> ... the question turns on the nature of the statutory process... where tax is charged on a conventional or notional sum which exists only as the product of a calculation, the fact that one of the elements in the calculation is measured by reference to the amount of exempted income does not make the exempted income the subject of the tax: *Australian Mutual Provident Society*.[156]

107.22.1 *Deemed classification*

The characterisation issue arose in *Fowler v HMRC*.[157] The taxpayer was an employed diver, whose employment was exercised in the UK, and so his remuneration was taxable in the UK under UK domestic law. He was treaty-resident in South Africa, but treaty relief under the employment income article did not apply.[158] However there is a special UK law rule for North Sea divers: for IT purposes their employment is treated as a trade.[159]

The taxpayer claimed treaty relief under the business profits article, on the basis that his income constituted business profits. The SC held that the deemed-trade fiction did not apply for treaty purposes so the income was not business profits and did not qualify for relief under that article. A number of reasons were given.

There were said to be some indications in the ITEPA wording, though the reader who studies the wording may regard this as less than decisive.

The application of the deemed-trade fiction to the DTA was said to be contrary to the purpose of the fiction:

> If one asks, as is required, for what purposes and between whom is the fiction created, it is plainly not for the purpose of rendering a qualifying diver immune from tax in the UK, nor adjudicating between the UK and South Africa as the potential recipient of tax. It is for the purpose of adjusting the basis of a continuing UK income tax liability which arises from the receipt of employment income. Therefore to apply the deeming provision in section 15(2) so as to alter the meaning of terms in the Treaty with the result of rendering a qualifying diver immune from UK taxation

[156] *Bricom v IRC* 70 TC 272 at p.290..

[157] [2020] UKSC 22.

[158] See 37.2 (Employment income DT relief).

[159] See 37.16.1 (Deemed non-employment).

> would be contrary to its purpose...[160]

There is a risk in this line of argument, as there is in all purposive arguments, of firstly assuming the answer and then identifying the purpose to fit.

Next, and more fundamentally, the deemed-trade fiction was contrary to the purpose of the DTA:

> 34. Nor should article 3(2) of the Treaty be construed so as to bring a qualifying diver within article 7 [business profits] rather than article 14 [employment income]. To do so would be contrary to the purposes of the Treaty. This is because, as is recognised by article 2(1), the Treaty is not concerned with the manner in which taxes falling within the scope of the Treaty are levied. Section 15 [ITEPA], understood in the light of section 6(5) of ITEPA, charges income tax on the employment income of an employed diver, but in a particular manner which includes the fiction that the diver is carrying on a trade.

It seems to me that art 2(1) does not shed much light on the issue.[161] There is however a sound argument in favour of the decision which is hinted in the above. Suppose one asks: should the deemed-trade fiction apply if it *disallowed* treaty relief, as opposed to conferring it? If so treaty relief could be unilaterally disapplied by a State which provided by its domestic law that, say, a trade was to be treated as an employment. Suppose, for instance, that the facts of *Fowler* were reversed. Suppose:

(1) The taxpayer was UK resident and UK treaty-resident.
(2) The taxpayer traded as a diver in South Africa.

Under the treaty, the profits of the trade would be taxable in the UK and not in South Africa, under art 7 (business profits). But suppose South Africa domestic law said that the trade was deemed to be an employment, and so taxable in South Africa, under article 15, thus disapplying art 7. Would that allow South Africa to tax the profits? The OECD Commentary says that is not the case.[162] The South African deeming provision would not determine the question of whether there is an employment for the purposes of the treaty. (It may be that South Africa could breach the treaty, but that would be a matter of treaty override, not treaty interpretation.)

Although not cited, this conclusion is consistent with *Melford*

[160] At [15].
[161] See 107.13.4 (Manner of levying tax).
[162] See 37.9.8 (Limit on source State powers).

Developments discussed elsewhere.[163]

On this analysis *Fowler* was correctly decided, though not for the most clearly expressed or best reasons. Does it matter? Discuss! The analysis above might perhaps help those who study the decision and would find it puzzling.

107.23 Channel Islands/IoM DTAs

A protocol to the Jersey/UK DTA provides:

> The Territories acknowledge that the UK continues to be responsible for the international relations of Jersey in international law. This Agreement cannot therefore create obligations which are binding under international law and is not intended to alter or affect the constitutional relationship between Jersey and the UK.

There is identical wording for Guernsey, IoM and Gibraltar.

The constitutional relationship between the Crown Dependencies and the UK raises deep questions. But this will not arise for day-to-day purposes of the DTA.

107.24 Pre-1963 DTAs

A few treaties survive from before the development of OECD Model. I refer to these as "**pre-1963 DTAs**". The expression sometimes used is "colonial model". This model was not published as such; the expression is used to refer to early UK DTA practice within the Commonwealth.

Pre-1963 DTAs survive in Greece and a few remote corners of the world:

Antigua (1947)
Belize (1947)
Brunei (1950)
Burma/Myanmar (1950)
Grenada (1949)
Greece (1953)
Kiribati (1950)
Greece (1953)
Kiribati (1950)
Malawi (1955)
Monserrat (1947)
St Kitts & Nevis (1947)
Tuvalu (1950)

Notwithstanding variations in the wording of standard definitions, a multiplicity of concepts should be avoided or minimised so far as possible. It is suggested that the courts ought to have regard to the general international law understandings and where the context permits, construe

[163] See 109.4.1 (Characterisation: Better view).

pre-1963 DTAs to be consistent with the OECD Model. Otherwise we will never know much about the pre-1963 DTAs as there will never be the litigation to answer all the puzzles which could arise.

It would be a simplification if the pre-1963 DTAs could be updated to OECD Model wording. The 2018 Channel Islands/IoM DTAs are a step in the right direction.

107.25 Treaty commencement dates

I take the 2022 Luxembourg/UK treaty as an example. Article 29 provides:

> The Contracting States shall notify each other in writing, through diplomatic channels, that the procedures required by its law for the entry into force of this Convention have been satisfied. This Convention shall enter into force on the date of receipt of the later notification and shall thereupon have effect:
>
> a) in the UK:
>
> (i) in respect of taxes withheld at source, to income derived on or after 1 January of the calendar year next following the year in which this Convention enters into force;
>
> (ii) in respect of income tax and capital gains tax, for any year of assessment beginning on or after 6 April of the calendar year next following the year in which this Convention enters into force;
>
> (iii) in respect of corporation tax, for any financial year beginning on or after 1 April of the calendar year next following the year in which this Convention enters into force;

The treaty entered into force on 27 November 2023, each State having given notice that their domestic procedures for entry into force were completed. It has effect in the UK as follows:

Context	**Effect from**
Withholding tax	Income derived (ie arising) on or after 1 January 2024
Income tax/CGT	6 April 2024
CT	Financial years beginning on or after 1 April 2024

Financial year has its UK law meaning.[164]

CIOT say:[165]

[164] See 107.12.1 (Domestic-law meaning); 14.3.2 (Tax year/financial year).

[165] CIOT, letter to HMRC 31 Oct 2023 re the UK/Luxembourg DTA *https://www.tax.org.uk/ref1240*

> For a company with an accounting period that straddles 1 April 2024 for example, a calendar year accounting period ending on 31 December 2024, the existing [Luxembourg/UK] treaty would apply to a gain accruing on or before 31 March 2024 and the new treaty to a gain accruing from 1 April 2024.
>
> We are also working on the basis that the normal rules apply to any capital gains realised by a company, ie any deferred and ascertainable consideration is treated as arising at the time of the contract for sale becoming unconditional and taxed according to the rules in place at that time. For instance, a disposal taking place prior to 31 March 2024 where some of the consideration is deferred (and ascertainable) and received after 1 April 2024 can still benefit from the old [Luxembourg/UK] treaty.

107.25.1 *Disposal for unascertained consideration*

CIOT continue with a point of somewhat specialist interest, relating to s.48A TCGA (disposal of land/land-rich asset for unascertainable consideration):[166]

> ... if it is considered that s.48A TCGA would apply for the purposes of corporation tax it is not clear that any gain that is treated as arising on or after 1 April 2024 (as determined under 'step 3' in s.48A(2)) would fall to be taxed in the UK (by virtue of article 13 of the new treaty) where the original disposal of UK property rich shares (falling within s.2B(4)(b) TCGA) arose before 1 April 2024. It would appear that the original disposal would not fall to be taxed in the UK under the existing [Luxembourg/UK] treaty and the disposal of the '*Marren v Ingles* right' would not fall to be taxed in the UK (under either the existing or the new treaty (article 13)).

It will be interesting to see how HMRC respond. But the point will not often arise.

107.26 The future

CIOT continue to lobby:

> following the UK's exit from the EU at the end of 2020, HMRC will continue to prioritise renegotiation of European DTAs to try and replicate the benefits of the Interest and Royalty and Parent and Subsidiary Directives. As we have previously noted, UK companies have also lost the benefit of the Merger Directive and would, therefore, benefit from a new

[166] See 57.36 (Unascertainable consideration),

> addition to Article 13 of the OECD Model for treaties with EU/EEA members that would extend the Merger Directive bilaterally.[167]

But that has not happened, or at least, not yet.

[167] Letter to HMRC, 25 January 2022 *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/979c1fc1-598a-4ab4-ae5b-e9f2f1a98c4e/220125%20Review%20of%20Double%20Taxation%20Treaties%202022-23%20-%20CIOT%20response.pdf*

108.1 DTA anti-abuse rules: Introduction

There are various types of DTA anti-avoidance rules:

Rule	**See para**
Express DTA rules:	
Principal purpose test	108.8
Savings Clause	109.5
Conduit arrangements	108.9
Beneficial ownership	108.10
Limitation on Benefits	110.1
Implied DTA anti-avoidance rule	108.6
Domestic law anti-avoidance rules:	108.5
The GAAR	
Treaty override provisions	

A full discussion of each rule requires a book to itself, and indeed many books have been written on these topics.

108.2 DTA title/preamble/purpose

The purpose of the OECD Model DTA, like the purpose of any legal document, should be construed from the DTA as a whole. However purpose may be stated expressly in the title, and/or in a preamble, and it may be discussed in the OECD Commentary.

The wording of these has changed over time.

108.2.1 *1963/1977: Double taxation*

The title in the 1963 Draft Model and the 1977 Model was:

> Convention between (State A) and (State B) *for the avoidance of double taxation* with respect to taxes on income and on capital

So the purpose, or at least the main purpose, was the avoidance of double taxation.

108.2.2 *1992 form: Fiscal evasion*

Subsequently, in 1992, the title of the OECD Model was amended to delete the reference to double taxation:

> Convention between (State A) and (State B) with respect to taxes on income and on capital.

This reflected an understanding that the OECD Model was not just for the avoidance of double taxation. Instead, a footnote provided:

> States wishing to do so may follow the widespread practice of including in the title a reference to either
> [1] the avoidance of double taxation or
> [2] to both the avoidance of double taxation and the prevention of fiscal evasion.

The UK followed approach [2] and the title to UK DTAs typically identified two purposes:

> Agreement between [the UK and State X] *for the avoidance of double taxation and the prevention of fiscal evasion* with respect to taxes on income and on capital[1]

The OECD Commentary did not discuss the meaning of "fiscal evasion". The expression could be used to include avoidance/abuse as well as fraud;[2] but I would have thought it self-evident that the reference in the context of a DTA was to articles 26 (exchange of information) and 27 (assistance in the collection of taxes). The evasion countered by the DTA is non-payment of tax lawfully due.[3] But the CoA stretched the expression to make it include tax avoidance.[4]

[1] Sometimes the wording is set out, or repeated, in a preamble. For instance the UK/USA DTA provides that the parties are:
"Desiring to conclude a new Convention for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and on capital gains".
But the title itself is relevant to interpretation, see 107.10.1 (Context of treaties), so a recital using the same words does not add anything except, perhaps, emphasis. That is the UK law rule; conceivably the preamble was thought to be significant in the USA.

[2] An avoidance/evasion distinction very similar to the present was recognised very early (and was surely self-evident at any time) but at first there was no terminology, or at least no commonly agreed terminology, to express it. In 1860 Turner LJ suggested evasion/contravention (where evasion stood for the lawful side of the divide). See 2.2.2 (Avoidance/evasion distinction).

[3] If authority is needed, see *Fowler v HMRC* [2020] UKSC 22 discussing the South Africa/UK DTA (2002). The treaty has a preamble in (more or less) standard 1992 form, referring to "a new Convention for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and on capital gains". SC stated at [15]: "the recited objective of dealing with tax evasion is dealt with by provisions for exchange of information and mutual assistance in tax collection in articles 25 and 25A".

[4] See 107.6.1 (Abusive double non-taxation).

108.2.3 *Avoidance: OECD Commentary*

Until 1977, OECD Commentary did not comment on avoidance or evasion.

In 1977 the following text was added:

> 7. The purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons; they should not, however, help tax avoidance or evasion. True, taxpayers have the possibility, double taxation conventions being left aside,[5] to exploit differences in tax levels between States and the tax advantages provided by various countries' taxation laws, but it is for the States concerned to adopt provisions in their domestic laws to counter such manoeuvres. Such States will then wish, in their bilateral double taxation conventions, to preserve the application of provisions of this kind contained in their domestic laws.

This made it clear that OECD Model did *not* contain an anti-abuse rule.

The text remained essentially unchanged until 2003, which substituted the current text:[6]

> 54. The principal purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons. *As confirmed in the preamble of the Convention, it is also part of the purposes of tax conventions to prevent tax avoidance and evasion.*

The second sentence is (more or less) the opposite of what was said in 1977. OECD described the change as "clarification"[7] but there is a long tradition of misdescribing substantial tax changes as clarification.[8]

[5] In 1995 there was a stylistic change which did not affect the meaning: the phrase "double taxation conventions being left aside" became: "irrespective of double taxation conventions".

[6] Pursuant to the 2002 Reports Related to the OECD Model Tax Convention: "Restricting the Entitlement to Treaty Benefits", "Treaty Characterisation Issues Arising from E-Commerce", "Issues Arising Under Article 5 (Permanent Establishment) of the Model Tax Convention".

[7] OECD/G20 "Base Erosion and Profit Shifting Project Preventing the Granting of Treaty Benefits in Inappropriate Circumstances (2015) provides: "In 2003, [paragraph 7] was amended *to clarify* that the prevention of tax avoidance was also a purpose of tax treaties."

[8] See App.1.2 (Clarify/modernise/reform).

108.2.4 *2017 Model form*

The current (2017) Model form has a revised title:

> ***Title***
> Convention between (State A) and (State B) for the elimination of double taxation with respect to taxes on income and on capital and the prevention of tax evasion and avoidance

The reference to fiscal evasion has been replaced by "the prevention of tax evasion and avoidance".

A new preamble also identifies the purpose(s) of the DTA:[9]

> ***Preamble to the Convention***
> (State A) and (State B),
> [1] Desiring to further develop their economic relationship and to enhance their co-operation in tax matters,
> [2] Intending to conclude a Convention for the elimination of double taxation with respect to taxes on income and on capital without creating opportunities for non-taxation or reduced taxation through tax evasion or avoidance (including through treaty-shopping arrangements aimed at obtaining reliefs provided in this Convention for the indirect benefit of residents of third States),
> Have agreed as follows...

I refer to these as:
(1) The economic co-operation preamble
(2) The tax avoidance preamble

It is difficult to see that the economic co-operation preamble has any legal effect, though I suppose the exhortation might inform the approach adopted by HMRC and their foreign counterparts.

108.3 BEPS MLI preambles

The BEPS MLI (in short) brings older DTAs into line with 2017 OECD Model form.

108.3.1 *Anti-avoidance preamble*

Art 6(1) BEPS MLI provides:

[9] In English domestic drafting, this would normally be called a recital, rather than a preamble, but the words are synonymous here. When discussing the OECD Model, it is normally better to use the OECD terminology, but it does not matter.

> 1. A Covered Tax Agreement[10] shall be modified to include the following preamble text:
>
> > "Intending to eliminate double taxation with respect to the taxes covered by this agreement without creating opportunities for non-taxation or reduced taxation through tax evasion or avoidance (including through treaty-shopping arrangements aimed at obtaining reliefs provided in this agreement for the indirect benefit of residents of third jurisdictions),".

This is substantially the same as the OECD model anti-avoidance preamble, with changes only to conform to MIL terminology.

Art 6(2) BEPS MLI provides:

> 2. The text described in paragraph 1 shall be included in a Covered Tax Agreement in place of or in the absence of preamble language of the Covered Tax Agreement referring to an intent to eliminate double taxation, whether or not that language also refers to the intent not to create opportunities for non-taxation or reduced taxation.

Art 6 BEPS MLI provides an opt-out:

> 4. A Party may reserve the right for paragraph 1 not to apply to its Covered Tax Agreements that already contain preamble language describing the intent of the Contracting Jurisdictions to eliminate double taxation without creating opportunities for non-taxation or reduced taxation, whether that language is limited to cases of tax evasion or avoidance (including through treaty-shopping arrangements aimed at obtaining reliefs provided in the Covered Tax Agreement for the indirect benefit of residents of third jurisdictions) or applies more broadly.

The UK has exercised this opt-out, but only in relation to the 3 contracting jurisdictions whose DTAs already contain the preamble: Belarus, Ukraine and Uzbekistan.[11]

108.3.2 *Economic cooperation*

Art 6 BEPS MLI provides:

[10] See 107.16.3 (Covered Tax Agreement).

[11] UK MLI Notifications *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf*

> 3. A Party may also choose to include the following preamble text with respect to its Covered Tax Agreements that do not contain preamble language referring to a desire to develop an economic relationship or to enhance co-operation in tax matters:
>
> > "Desiring to further develop their economic relationship and to enhance their co-operation in tax matters,".

This is identical to the OECD Model economic co-operation preamble. The UK has opted to adopt this provision. But as noted above, it will have little if any legal effect.

108.4 *Purpose of DTAs: Summary*

It is necessary to distinguish:
(1) Treaties using 2017 Model text, or BEPS MLI text
(2) Other DTAs ("Old-style DTAs").

The position for DTAs in the first category is clear. It is stated from the title or preamble that at least one of the purposes is the prevention of avoidance. As these treaties also have express principal purpose test, this text is simply dotting *I*'s and crossing *T*'s.

Old-style DTAs are diminish in number so the identifying their purpose is perhaps of decreasing interest. If one could apply a strict approach, the position must be that is no anti-abuse in the pre-MLI OECD Model, and no anti-abuse purpose should be implied:
(1) Pre-1995 DTAs should be construed without regard to the current commentary.
(2) 1977-1995 treaties should be construed on the basis that the then applicable commentary broadly regarded anti-avoidance as a matter of domestic law.
(3) Post-1995 treaties should be construed on the same basis, as the current commentary text is unjustified.

But courts hostile to abuse will not find that a palatable view.

Se non è vero, è ben trovato. The BEPS MLI introduced a principal purpose test[12] "to mirror the guidance".[13] That rather makes the point, as commentary is normally intended to mirror the text, rather than text inserted to mirror the commentary.

[12] See 108.8 (Principal purpose test).
[13] OECD Draft Commentary to principal purpose test, para 1.

108.5 Domestic anti-abuse rules

This section discusses the question whether domestic law anti-abuse rules which override a treaty would breach treaty obligations.[14]

OECD Commentary states that domestic law anti-abuse rules do not conflict with the Model treaty:

> ... as a general rule, there will be no conflict between [domestic anti-abuse] rules and the provisions of tax conventions.[15]

The GAAR guidance is therefore correct, or at least, supported by OECD Commentary, in stating that the GAAR may override DTAs:

> ... where there are abusive arrangements which try to exploit particular provisions in a double tax treaty, or the way in which such provisions interact with other provisions of UK tax law, then the GAAR can be applied to counteract the abusive arrangements. See the example at D12 (Huitson - DTAs).[16]

The reader may find OECD reasoning unconvincing;[17] but a breach of the treaty (even if there were a breach) would not matter in a jurisdiction like the UK where domestic law may override treaty agreements.

[14] As to how far a conflict actually matters, see 107.19.8 (Conflict between DTAs and UK law).

[15] OECD Commentary on Art 1, para 58.

[16] HMRC, "GAAR Guidance" (2017) para B5.3. *https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules*

[17] OECD Commentary on art 1 provides: "58. Many States address that question by taking account of the fact that taxes are ultimately imposed through the provisions of domestic law, as restricted (and in some rare cases, broadened) by the provisions of tax conventions. Thus, any abuse of the provisions of a tax convention could also be characterised as an abuse of the provisions of domestic law under which tax will be levied. For these States, the issue then becomes whether the provisions of tax conventions may prevent the application of the anti-abuse provisions of domestic law, which is the question addressed in paragraphs 66 to 80 below. As explained in these paragraphs, as a general rule, there will be no conflict between such rules and the provisions of tax conventions"

Para 22.1 formerly provided: "2.1 Such rules are part of the basic domestic rules set by domestic tax laws for determining which facts give rise to a tax liability; these rules are not addressed in tax treaties and are therefore not affected by them. Thus, as a general rule and having regard to paragraph 9.5, there will be no conflict."

108.6 Implied treaty anti-abuse rule

An implied treaty anti-abuse rule is important where there are no domestic anti-abuse rules, as was (more or less) the case in the UK before the GAAR.

An implied treaty anti-abuse rule may of course overlap with domestic law anti-abuse rules. Substance over form rules, or economic substance rules, may be classified as treaty-based (construction of the treaty), or as domestic anti-abuse rules. They are two routes to the same destination.

OECD Commentary on art 1 supports the view that the OECD model convention includes an implied anti-abuse rule:

> 59. Other[18] States prefer to view some abuses as being abuses of the convention itself, as opposed to abuses of domestic law. These States, however, then consider that a proper construction of tax conventions allows them to disregard abusive transactions, such as those entered into with the view to obtaining unintended benefits under the provisions of these conventions. This interpretation results from the object and purpose of tax conventions as well as the obligation to interpret them in good faith.[19]
>
> 60. Under both approaches, therefore, it is agreed that States do not have to grant the benefits of a double taxation convention where arrangements that constitute an abuse of the provisions of the convention have been entered into.

I am not sure about the reasoning, but the conclusion is clear.

In practice the courts will construe a DTA to avoid double non-taxation in abuse cases, and maybe even in some non-abuse cases: see 107.6 (Double non-taxation).

108.7 OECD-concept abuse

108.7.1 *"OECD concept abuse"*

If there is an anti-abuse rule in a DTA (or if domestic-law rules may override a treaty provision where there is abuse) then it is necessary to

[18] Strictly the reference to "other" states cannot be right: *all* states should seek to construe DTAs the same way. But the Commentary adopts a pragmatic approach. A state with domestic anti-avoidance rule need not bother about construction of the treaty: it does not matter what the treaty says.

[19] The Commentary refers to art 31 Vienna Convention; see 107.10 (DTA interpretation: Principles).

consider what constitutes abuse.

OECD Commentary provides:

> It is important to note, however, that it should not be lightly assumed that a taxpayer is entering into the type of abusive transactions referred to above.
>
> A guiding principle is that the benefits of a double taxation convention should not be available where
>
> [a] a main purpose for entering into certain transactions or arrangements was to secure a more favourable tax position and
>
> [b] obtaining that more favourable treatment in these circumstances would be contrary to the object and purpose of the relevant provisions.[20]

I refer to this as "**OECD-concept abuse**".

OECD Commentary uses the term avoidance as well as abuse, but does not draw a distinction between them, and I think they are used synonymously. Given OECD meaning, the term "abuse" seems more apt, at least for tax practitioners who choose their words carefully.

OECD Commentary gives two examples of abuse. The first example may be described as treaty-shopping:

> This would be the case, for example, if a person (whether or not a resident of a Contracting State), acts through a legal entity created in a State essentially to obtain treaty benefits that would not be available directly.[21]

Treaty-shopping was in the OECD view "unsatisfactory" as far back as 1986.

108.7.2 *Emigration to treaty-state*

The second example of abuse in OECD Commentary is emigration by an individual to a foreign treaty-state. The Commentary continues:

> Another case would be an individual
>
> [1] who has in a Contracting State ["the original home State"] both
>
> [a] his permanent home and
>
> [b] all his economic interests, including a substantial shareholding in a company of that State, and

[20] OECD Commentary on Art 1, para 61.

[21] OECD Commentary on Art 1, para 56.

> [2] who, essentially in order to sell the shares and escape taxation in that State on the capital gains from the alienation (by virtue of [Art 13(5), DTA CG relief]), transfers his permanent home to the other Contracting State, where such gains are subject to little or no tax.[22]

It is considered that emigration by an individual should not be categorised as abuse, even in a case where:

(1) the purpose of emigration to a treaty State is to qualify for DTA relief; and

(2) the individual retains their economic interests in the original State.[23]

Emigration by a *company* to a treaty jurisdiction might be abuse, in the absence of economic substance. That would be the EU-law approach.[24] But in the case of an individual, the permanent home (which is, in short, required to be treaty-resident) effectively constitutes economic substance.

Conceivably an individual approaches the abusive end of the spectrum if the period of treaty non-residence is kept as short as the "permanent home" requirement may permit.[25] The concept of abuse is not only vague and subjective but also very fact sensitive.

108.7.3 *UN Model Commentary*

The UN Model Commentary (rewritten in 2017) agrees with OECD, but contains a slightly more comprehensive discussion. The UN Commentary approves the OECD conclusion that "States do not have to grant the benefits of a double taxation convention where arrangements that constitute an abuse of the provisions of the convention have been entered into."[26] It continues:

> 23. That conclusion leads logically to the question of what is an abuse of a tax treaty. The OECD did not attempt to provide a comprehensive reply

[22] For this planning, see 11.2.1 (TNR gains).

[23] This view is supported by *McCabe v HMRC* [2022] UKFTT 356 (TC) at [216]. As this case concerns tax residence as well as treaty-residence, I discuss it at 6.39.1 (Avoidance irrelevant to residence).

[24] See 6.39 (Non-residence & tax avoidance).

[25] That may be quite short: see 9.12.2 ("Permanent"). In the UK planning by short-term residence in a foreign treaty-state would now be caught by the TNR rules. Prior to the introduction of those rules, HMRC accepted that DT relief could apply.

[26] See 108.6 (Implied treaty anti-abuse rule).

> to that question, which would have been difficult given the different approaches of its member countries. Nevertheless, the OECD presented the following general guidance, which was referred to as a "guiding principle".
>
> [The commentary quotes OECD Commentary on art 1, para 61[27] and continues]:
>
> 24. The members of the Committee endorse that principle. They considered that such guidance as to what constitutes an abuse of treaty provisions serves an important purpose as it attempts to balance the need to prevent treaty abuses with the need to ensure that countries respect their treaty obligations and provide legal certainty to taxpayers. Clearly, countries should not be able to escape their treaty obligations simply by arguing that legitimate transactions are abusive and domestic tax rules that affect these transactions in ways that are contrary to treaty provisions constitute anti-abuse rules.
>
> 25. Under the guiding principle presented above, two elements must therefore be present for certain transactions or arrangements to be found to constitute an abuse of the provisions of a tax treaty:
>
> [1] a main purpose for entering into these transactions or arrangements was to secure a more favourable tax position, and
>
> [2] obtaining that more favourable treatment would be contrary to the object and purpose of the relevant provisions.

This quotes the OECD commentary (more or less) exactly.

> 26. These two elements will also often be found, explicitly or implicitly, in general anti-avoidance rules and doctrines developed in various countries.
>
> 27. In order to minimize the uncertainty that may result from the application of that approach, it is important that this guiding principle be applied on the basis of objective findings of facts, not solely the alleged intention of the parties. Thus, the determination of whether a main purpose for entering into transactions or arrangements is to obtain tax advantages should be based on an objective determination, based on all the relevant facts and circumstances, of whether, without these tax advantages, a reasonable taxpayer would have entered into the same transactions or arrangements.

This is similar to the EU-law concept of abuse. That is not surprising. It is also similar to "abusive" as defined in the GAAR.

[27] See 108.7.1 ("OECD concept abuse").

GAAR guidance gives the scheme in *Huitson* as an example of an abuse which would be caught by the GAAR, and no doubt constitutes OECD-abuse.[28] As is common in GAAR guidance examples, that is both an easy case and somewhat academic (as the scheme has been stopped by legislation).

108.7.4 *Canadian approach*

Courts in other common law jurisdictions have not been as obliging in categorisation of abuse as tax administrations would desire. The Canadian Revenue say:

> ... the leading Canadian treaty shopping case involving the GAAR was decided in favour of the taxpayer. In *MIL (Investments) SA*,[29] the corporate taxpayer was continued [migrated] from Cayman Islands (a jurisdiction with which Canada does not have a tax treaty) to Luxembourg (a treaty country) shortly before it realized capital gains on the disposition of taxable Canadian property.[30]

In UK legal terminology, the company migrated to Luxembourg and became treaty-resident there. This is the example which OECD identified as abuse in the case of an individual;[31] one might have thought that the case of a company was clearer. But the court found this was not abuse:

> Upon its continuance [migration] to Luxembourg, the corporate taxpayer became a resident of Luxembourg for purposes of the Canada-Luxembourg Convention, positioning it to make a claim under the Convention to exempt the capital gain from tax in Canada. The Crown argued that this case involved treaty shopping and, as such, represented an abuse of the provisions of the Convention that exempted the capital gain from tax in Canada. The Tax Court of Canada concluded that the GAAR was not applicable and that there was no inherent anti-abuse rule in the Convention. The Tax Court stated:

[28] HMRC, "GAAR Guidance" (2017) para D12 *https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/605502/gaar-part-d-2017.pdf* for the *Huitson* scheme, see 85.25 (DT relief: Partnership).

[29] [2007] DTC 5437.

[30] Footnote original: A non resident of Canada is taxable in Canada on, among other things, capital gains arising on the disposition of taxable Canadian property, subject to the provisions of an applicable tax treaty.

[31] See 108.7.2 (Emigration to treaty-state).

> "…I do not agree that Justice Iaccobucci's obiter dicta can be used to establish a prima facie finding of abuse arising from the choice of the most beneficial treaty. There is nothing inherently proper or improper with selecting one foreign regime over another. Respondent's counsel was correct in arguing that the selection of a low tax jurisdiction may speak persuasively as evidence of a tax purpose for an alleged avoidance transaction, but the shopping or selection of a treaty to minimize tax on its own cannot be viewed as being abusive. It is the use of the selected treaty that must be examined."[32]

In a short decision, the Federal Court of Appeal dismissed the Crown's appeal in *MIL (Investments)* on the basis that it was unable to find an object or purpose of the exempting provision of the Convention whose abuse would justify a departure from the plain meaning of the words of the provision. This decision is a particularly strong statement by the Federal Court of Appeal, indicating that the courts in Canada require further legislative direction before finding that treaty shopping is an improper (and abusive) use of tax treaties.[33]

108.7.5 *Treaty-shopping*

OECD returned to this topic in 2015:

> *a) Treaty shopping*
>
> 17. The first requirement that must be met by a person who seeks to obtain benefits under a tax treaty is that the person must be "a resident of a Contracting State", as defined in Article 4 of the OECD Model Tax Convention. There are a number of arrangements through which a person who is not a resident of a Contracting State may attempt to obtain benefits that a tax treaty grants to a resident of that State. These arrangements are generally referred to as "treaty shopping". Treaty shopping cases typically involve persons who are residents of third States attempting to access indirectly the benefits of a treaty between two Contracting States.[34]

[32] See at [72].

[33] Department of Finance Canada "Consultation Paper on Treaty Shopping – The Problem and Possible Solutions" (2013) *https://thor.ca/blog/wp-content/uploads/2013/08/Consultation-Paper-on-Treaty-Shopping.pdf*

[34] Footnote original: Cases where a resident of the Contracting State in which income originates seeks to obtain treaty benefits (e.g. through a transfer of residence to the other Contracting State or through the use of an entity established in that other State)

108.8 Principal purpose test

108.8.1 *OECD Model/BEPS PPT*

The principal purpose test (PPT) in OECD Model and BEPS are effectively identical (with changes only to conform to MLI terminology):

Art 29(9) OECD Model	**Art 7(1) BEPS MLI**
Notwithstanding the other provisions of this Convention, a benefit under this Convention shall not be granted in respect of an item of income or capital	Notwithstanding any provisions of a Covered Tax Agreement, a benefit under the Covered Tax Agreement shall not be granted in respect of an item of income or capital
[a] if it is reasonable to conclude,[35] having regard to all relevant facts and circumstances, that obtaining that benefit was one of the principal purposes of any arrangement or transaction that resulted directly or indirectly in that benefit,	[a] [identical]
[b] unless it is established that granting that benefit in these circumstances would be in accordance with the object and purpose of the relevant provisions of this Convention.	[b] unless it is established that granting that benefit in these circumstances would be in accordance with the object and purpose of the relevant provisions of the Covered Tax Agreement.

The PPT is a TAAR by another name. Instead of "tax avoidance" (ie evident intention of parliament), we have "object and purpose" of the DTA. This is a nod to the Vienna Convention,[36] but the concepts are (more or less) the same.

Art 7(1) BEPS MLI continues:

> 2. Paragraph 1 shall apply in place of or in the absence of provisions of a Covered Tax Agreement that deny all or part of the benefits that would otherwise be provided under the Covered Tax Agreement where the principal purpose or one of the principal purposes of any arrangement or

could also be considered to constitute a form of treaty shopping...

[35] The wording adopts current UK drafting practice; see App.2.24 (Reasonable-to-assume).

[36] See 107.9 (DTA interpretation principles).

> transaction, or of any person concerned with an arrangement or transaction, was to obtain those benefits.
>
> 3. A Party that has not made the reservation described in subparagraph a) of paragraph 15 may also choose to apply paragraph 4 with respect to its Covered Tax Agreements.
>
> 4. Where a benefit under a Covered Tax Agreement is denied to a person under provisions of the Covered Tax Agreement (as it may be modified by this Convention) that deny all or part of the benefits that would otherwise be provided under the Covered Tax Agreement where the principal purpose or one of the principal purposes of any arrangement or transaction, or of any person concerned with an arrangement or transaction, was to obtain those benefits, the competent authority of the Contracting Jurisdiction that would otherwise have granted this benefit shall nevertheless treat that person as being entitled to this benefit, or to different benefits with respect to a specific item of income or capital, if such competent authority, upon request from that person and after consideration of the relevant facts and circumstances, determines that such benefits would have been granted to that person in the absence of the transaction or arrangement. The competent authority of the Contracting Jurisdiction to which a request has been made under this paragraph by a resident of the other Contracting Jurisdiction shall consult with the competent authority of that other Contracting Jurisdiction before rejecting the request.
>
> 5. Paragraph 4 shall apply to provisions of a Covered Tax Agreement (as it may be modified by this Convention) that deny all or part of the benefits that would otherwise be provided under the Covered Tax Agreement where the principal purpose or one of the principal purposes of any arrangement or transaction, or of any person concerned with an arrangement or transaction, was to obtain those benefits.

The UK has chosen to opt in to article 7(4).[37]

OECD Commentary is somewhat verbose, but it is necessary to consider all of it.

It has become common for UK domestic law to adopt this wording in a treaty-override:

Topic	**See para**	**Date**
Trading in land	22.4.2	2016
Transactions in land	22.16.1	2016

[37] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf*

Royalty withholding tax	32.13	2016
Offshore IP receipts	32.35	2019
UK land/land rich asset: Non-residents CGT/CT	57.13.2	2019

108.8.2 *PPT/LoB: Relationship*

OECD Commentary on art 29 provides:

> 171. Paragraph 9 supplements and does not restrict in any way the scope or application of the provisions
> [1] of paragraphs 1 to 7 (the limitation-on-benefits rule)[38] and
> [2] of paragraph 8 (the rule applicable to a permanent establishment situated in a third jurisdiction):
> a benefit that is denied in accordance with these paragraphs is not a "benefit under the Convention" that paragraph 9 would also deny. Moreover, the guidance provided in the Commentary on paragraph 9 should not be used to interpret paragraphs 1 to 8 and vice-versa.
> 172. Conversely, the fact that a person is entitled to benefits under paragraphs 1 to 7 does not mean that these benefits cannot be denied under paragraph 9. Paragraphs 1 to 7 are rules that focus primarily on the legal nature, ownership in, and general activities of, residents of a Contracting State. As illustrated by the example in the next paragraph, these rules do not imply that a transaction or arrangement entered into by such a resident cannot constitute an improper use of a treaty provision
> 173. ... Assume, for instance, that a public company whose shares are regularly traded on a recognised stock exchange in the Contracting State of which the company is a resident derives income from the other Contracting State. As long as that company is a "qualified person" as defined in paragraph 2, it is clear that the benefits of the Convention should not be denied solely on the basis of the ownership structure of that company, e.g. because a majority of the shareholders in that company are not residents of the same State. The object and purpose of subparagraph c) of paragraph 2 is to establish a threshold for the treaty entitlement of public companies whose shares are held by residents of different States. The fact that such a company is a qualified person does not mean, however, that benefits could not be denied under paragraph 9 for reasons that are unrelated to the ownership of the shares of that company. Assume, for instance, that such a public company is a bank that enters into a conduit financing arrangement intended to provide indirectly to a resident of a third State the benefit of lower source taxation under a tax treaty. In that case, paragraph 9 would apply to deny that benefit because

[38] See 110.1 (Limitation on Benefits).

> subparagraph c) of paragraph 2, when read in the context of the rest of the Convention and, in particular, its preamble, cannot be considered as having the purpose, shared by the two Contracting States, of authorising treaty-shopping transactions entered into by public companies.

108.8.3 *"Benefit"*

OECD Commentary provides:

> The term "benefit" includes
> [1] all limitations (e.g. a tax reduction, exemption, deferral or refund) on taxation imposed on the State of source under Articles 6 through 22 of the Convention,
> [2] the relief from double taxation provided by Article 23, and
> [3] the protection afforded to residents and nationals of a Contracting State under Article 24 or any other similar limitations.
> ... When a tax convention includes other limitations (such as a tax sparing provision), the provisions of this Article also apply to that benefit.[39]

108.8.4 *Directly or indirectly*

OECD Commentary on art 29 provides:

> 176. The phrase [arrangement or transaction] "that resulted directly or indirectly in that benefit" is deliberately broad and is intended to include situations where the person who claims the application of the benefits under a tax treaty may do so with respect to a transaction that is not the one that was undertaken for one of the principal purposes of obtaining that treaty benefit. This is illustrated by the following example:

The example is the assignment of a debt to a treaty resident group company:

> TCo, a company resident of State T, has acquired all the shares and debts of SCo, a company resident of State S, that were previously held by SCo's parent company. These include a loan made to SCo at 4% interest payable on demand.
> State T does not have a tax convention with State S and, therefore, any interest paid by SCo to TCo is subject to a withholding tax on interest at a rate of 25% in accordance with the domestic law of State S.
> Under the State R-State S tax convention, however, there is no withholding tax on interest paid by a company resident of a Contracting State and beneficially owned by a company resident of the other State;

[39] Commentary on art 29, para 175.

> also, that treaty does not include provisions similar to paragraphs 1 to 6. TCo decides to transfer the loan to RCo, a subsidiary resident of State R, in exchange for three promissory notes payable on demand on which interest is payable at 3.9%.
>
> In this example, whilst RCo is claiming the benefits of the State R-State S treaty with respect to a loan that was entered into for valid commercial reasons, if the facts of the case show that one of the principal purposes of TCo in transferring its loan to RCo was for RCo to obtain the benefit of the State R-State S treaty, then the provision would apply to deny that benefit as that benefit would result indirectly from the transfer of the loan.

This is the same as the example considered in the context of the US DTA conduit arrangement rule; see 108.9.3 (Conduit: Interest WHT).

108.8.5 *"Arrangement"*

OECD Commentary on art 29 provides:

> 177. The terms "arrangement or transaction" should be interpreted broadly and include any agreement, understanding, scheme, transaction or series of transactions, whether or not they are legally enforceable.

One can detect UK influence in the drafting here.[40]

> In particular they include the creation, assignment, acquisition or transfer of the income itself, or of the property or right in respect of which the income accrues. These terms also encompass arrangements concerning the establishment, acquisition or maintenance of a person who derives the income, including the qualification of that person as a resident of one of the Contracting States, and include steps that persons may take themselves in order to establish residence. An example of an "arrangement" would be where steps are taken to ensure that meetings of the board of directors of a company are held in a different country in order to claim that the company has changed its residence. One transaction alone may result in a benefit, or it may operate in conjunction with a more elaborate series of transactions that together result in the benefit. In both cases the provisions of paragraph 9 [PPT] may apply.

108.8.6 *Principal purpose*

OECD Commentary on art 29 provides:

> 178. To determine whether or not one of the principal purposes of any

[40] See App 2.2.3 (Definitions of "arrangement").

> person concerned with an arrangement or transaction is to obtain benefits under the Convention, it is important to undertake an objective analysis of the aims and objects of all persons involved in putting that arrangement or transaction in place or being a party to it. What are the purposes of an arrangement or transaction is a question of fact which can only be answered by considering all circumstances surrounding the arrangement or event on a case by case basis. It is not necessary to find conclusive proof of the intent of a person concerned with an arrangement or transaction, but it must be reasonable to conclude, after an objective analysis of the relevant facts and circumstances, that one of the principal purposes of the arrangement or transaction was to obtain the benefits of the tax convention. It should not be lightly assumed, however, that obtaining a benefit under a tax treaty was one of the principal purposes of an arrangement or transaction and merely reviewing the effects of an arrangement will not usually enable a conclusion to be drawn about its purposes. Where, however, an arrangement can only be reasonably explained by a benefit that arises under a treaty, it may be concluded that one of the principal purposes of that arrangement was to obtain the benefit...
> 180. The reference to "one of the principal purposes" in paragraph 7 means that obtaining the benefit under a tax convention need not be the sole or dominant purpose of a particular arrangement or transaction. It is sufficient that at least one of the principal purposes was to obtain the benefit.

There is an echo of *Brebner* here.[41]

> For example, a person may sell a property for various reasons, but if before the sale, that person becomes a resident of one of the Contracting States and one of the principal purposes for doing so is to obtain a benefit under a tax convention, paragraph 9 could apply notwithstanding the fact that there may also be other principal purposes for changing residence, such as facilitating the sale of the property or the re-investment of the proceeds of the alienation.

This is questionable.[42]

> 181. A purpose will not be a principal purpose when it is reasonable to conclude, having regard to all relevant facts and circumstances, that obtaining the benefit was not a principal consideration and would not have justified entering into any arrangement or transaction that has, alone

[41] See 3.12 (Consequence and purpose).
[42] See 108.7 (OECD-concept abuse).

> or together with other transactions, resulted in the benefit. In particular, where an arrangement is inextricably linked to a core commercial activity, and its form has not been driven by considerations of obtaining a benefit, it is unlikely that its principal purpose will be considered to be to obtain that benefit. Where, however, an arrangement is entered into for the purpose of obtaining similar benefits under a number of treaties, it should not be considered that obtaining benefits under other treaties will prevent obtaining one benefit under one treaty from being considered a principal purpose for that arrangement. Assume, for example, that a taxpayer resident of State A enters into a conduit arrangement with a financial institution resident of State B in order for that financial institution to invest, for the ultimate benefit of that taxpayer, in bonds issued in a large number of States with which State B, but not State A, has tax treaties. If the facts and circumstances reveal that the arrangement has been entered into for the principal purpose of obtaining the benefits of these tax treaties, it should not be considered that obtaining a benefit under one specific treaty was not one of the principal purposes for that arrangement. Similarly, purposes related to the avoidance of domestic law should not be used to argue that obtaining a treaty benefit was merely accessory to such purposes.
>
> 182. The following examples illustrate the application of the paragraph (the examples included in paragraph 187 below should also be considered when determining whether and when the paragraph would apply in the case of conduit arrangements)

A set of examples now follow. They are lengthy, but we are spared the childish names and irrelevant details that characterise examples in HMRC domestic-law guidance.[43] In summary:

Example	**Facts**	**Abuse**
A, B	Assignment of dividends	Yes
C, D	Investment in treaty jurisdiction	No
E	Acquisition to meet 25% (non-portfolio) test	No
F	Acquisition of Co	No
G, H	Setting up management Co	No
I	Copyright licence arrangement	No
J	Fragmentation to avoid PE	Yes

108.8.7 *Dividend assigned to treaty-co*

Example A is the assignment of a right to a dividend:

[43] See App 1.9 (Technical Notes).

> TCo, a company resident of State T, owns shares of SCo, a company listed on the stock exchange of State S. State T does not have a tax convention with State S and, therefore, any dividend paid by SCo to TCo is subject to a withholding tax on dividends of 25% in accordance with the domestic law of State S. Under the State R-State S tax convention, however, there is no withholding tax on dividends paid by a company resident of a Contracting State and beneficially owned by a company resident of the other State.
> TCo enters into an agreement with RCo, an independent financial institution resident of State R, pursuant to which TCo assigns to RCo the right to the payment of dividends that have been declared but have not yet been paid by SCo.

OECD analysis is as follows:

> In this example, in the absence of other facts and circumstances showing otherwise, it would be reasonable to conclude that one of the principal purposes for the arrangement under which TCo assigned the right to the payment of dividends to RCo was for RCo to obtain the benefit of the exemption from source taxation of dividends provided for by the State R-State S tax convention and it would be contrary to the object and purpose of the tax convention to grant the benefit of that exemption under this treaty-shopping arrangement.

Example B is the same, but the assignment is by way of a 3 year usufruct:

> SCo, a company resident of State S, is the subsidiary of TCo, a company resident of State T. State T does not have a tax convention with State S and, therefore, any dividend paid by SCo to TCo is subject to a withholding tax on dividends of 25% in accordance with the domestic law of State S. Under the State R-State S tax convention, however, the applicable rate of withholding tax on dividends paid by a company of State S to a resident of State R is 5%. TCo therefore enters into an agreement with RCo, a financial institution resident of State R and a qualified person under subparagraph 3 a) of this Article, pursuant to which RCo acquires the usufruct of newly issued non-voting preferred shares of SCo for a period of three years. TCo is the bare owner of these shares. The usufruct gives RCo the right to receive the dividends attached to these preferred shares. The amount paid by RCo to acquire the usufruct corresponds to the present value of the dividends to be paid on the preferred shares over the period of three years (discounted at the rate at which TCo could borrow from RCo).

OECD analysis is as follows:

> In this example, in the absence of other facts and circumstances showing otherwise, it would be reasonable to conclude that one of the principal purposes for the arrangement under which RCo acquired the usufruct of the preferred shares issued by SCo was to obtain the benefit of the 5% limitation applicable to the source taxation of dividends provided for by the State R-State S tax convention and it would be contrary to the object and purpose of the tax convention to grant the benefit of that limitation under this treaty-shopping arrangement.

108.8.8 *Investment in treaty State*

Example C is choice of investment in a treaty-favoured jurisdiction:

> RCo, a company resident of State R, is in the business of producing electronic devices and its business is expanding rapidly. It is now considering establishing a manufacturing plant in a developing country in order to benefit from lower manufacturing costs. After a preliminary review, possible locations in three different countries are identified. All three countries provide similar economic and political environments. After considering the fact that State S is the only one of these countries with which State R has a tax convention, the decision is made to build the plant in that State.

OECD analysis is as follows:

> In this example, whilst the decision to invest in State S is taken in the light of the benefits provided by the State R-State S tax convention, it is clear (!) that the principal purposes for making that investment and building the plant are related to the expansion of RCo's business and the lower manufacturing costs of that country. In this example, it cannot reasonably be considered that one of the principal purposes for building the plant is to obtain treaty benefits.
> In addition, given that a general objective of tax conventions is to encourage cross-border investment, obtaining the benefits of the State R-State S convention for the investment in the plant built in State S is in accordance with the object and purpose of the provisions of that convention.

The second argument is more convincing than the first, though either would suffice.

Example D is the same but the investor is a collective investment scheme:

> RCo, a collective investment vehicle resident of State R, manages a diversified portfolio of investments in the international financial market. RCo currently holds 15% of its portfolio in shares of companies resident

> of State S, in respect of which it receives annual dividends. Under the tax convention between State R and State S, the withholding tax rate on dividends is reduced from 30% to 10%.
> RCo's investment decisions take into account the existence of tax benefits provided under State R's extensive tax convention network. A majority of investors in RCo are residents of State R, but a number of investors (the minority investors) are residents of States with which State S does not have a tax convention. Investors' decisions to invest in RCo are not driven by any particular investment made by RCo, and RCo's investment strategy is not driven by the tax position of its investors. RCo annually distributes almost all of its income to its investors and pays taxes in State R on income not distributed during the year.

OECD analysis is as follows:

> In making its decision to invest in shares of companies resident of State S, RCo considered the existence of a benefit under the State R-State S tax convention with respect to dividends, but this alone would not be sufficient to trigger the application of paragraph 9 [PPT]. The intent of tax treaties is to provide benefits to encourage cross-border investment and, therefore, to determine whether or not paragraph 9 applies to an investment, it is necessary to consider the context in which the investment was made. In this example, unless RCo's investment is part of an arrangement or relates to another transaction undertaken for a principal purpose of obtaining the benefit of the Convention, it would not be reasonable to deny the benefit of the State R-State S tax treaty to RCo.

108.8.9 *Shares acquired to meet 25% test*

Example E is a share acquisition to meet a 25% test:

> RCo is a company resident of State R and, for the last 5 years, has held 24% of the shares of company SCo, a resident of State S. Following the entry-into-force of a tax treaty between States R and S (Article 10 of which is identical to Article 10 of this Model), RCo decides to increase to 25% its ownership of the shares of SCo. The facts and circumstances reveal that the decision to acquire these additional shares has been made primarily in order to obtain the benefit of the lower rate of tax provided by Article 10(2)a) of the treaty.

OECD analysis is as follows:

> In that case, although one of the principal purposes for the transaction through which the additional shares are acquired is clearly to obtain the benefit of Article 10(2)a), paragraph 9 [PPT] would not apply because it

> may be established that granting that benefit in these circumstances would be in accordance with the object and purpose of Article 10(2) a). That subparagraph uses an arbitrary threshold of 25% for the purposes of determining which shareholders are entitled to the benefit of the lower rate of tax on dividends and it is consistent with this approach to grant the benefits of the subparagraph to a taxpayer who genuinely increases its participation in a company in order to satisfy this requirement.

Example F is a commercial acquisition:

> TCO is a publicly-traded company resident of State T. TCO's information technology business, which was developed in State T, has grown considerably over the last few years as a result of an aggressive merger and acquisition policy pursued by TCO's management. RCO, a company resident of State R (a State that has concluded many tax treaties providing for no or low source taxation of dividends and royalties), is the family-owned holding company of a group that is also active in the information technology sector. Almost all the shares of RCO are owned by residents of State R who are relatives of the entrepreneur who launched and developed the business of the RCO group. RCO's main assets are shares of subsidiaries located in neighbouring countries, including SCO, a company resident of State S, as well as patents developed in State R and licensed to these subsidiaries. TCO, which has long been interested in acquiring the business of the RCO group and its portfolio of patents, has made an offer to acquire all the shares of RCO.

OECD analysis is as follows:

> In this example, in the absence of other facts and circumstances showing otherwise, it would be reasonable to conclude that the principal purposes for the acquisition of RCO are related to the expansion of the business of the TCO group and do not include the obtaining of benefits under the treaty between States R and S. The fact that RCO acts primarily as a holding company does not change that result. It might well be that, after the acquisition of the shares of RCO, TCO's management will consider the benefits of the tax treaty concluded between State R and State S before deciding to keep in RCO the shares of SCO and the patents licensed to SCO. This, however, would not be a purpose related to the relevant transaction, which is the acquisition of the shares of RCO.

108.8.10 *PPT: Treaty-shopping*

OECD Commentary provides:

> TCO, a company resident of State T, is a publicly-traded company

> resident of State T. It owns directly or indirectly a number of subsidiaries in different countries. Most of these companies carry on the business activities of the TCO group in local markets. In one region, TCO owns the shares of five such companies, each located in different neighbouring States. TCO is considering establishing a regional company for the purpose of providing group services to these companies, including management services such as accounting, legal advice and human resources; financing and treasury services such as managing currency risks and arranging hedging transactions, as well as some other non-financing related services. After a review of possible locations, TCO decides to establish the regional company, RCO, in State R. This decision is mainly driven by the skilled labour force, reliable legal system, business friendly environment, political stability, membership of a regional grouping, sophisticated banking industry and the comprehensive double taxation treaty network of State R, including its tax treaties with the five States in which TCO owns subsidiaries, which all provide low withholding tax rates.

OECD analysis is as follows:

> In this example, merely reviewing the effects of the treaties on future payments by the subsidiaries to the regional company would not enable a conclusion to be drawn about the purposes for the establishment of RCO by TCO. Assuming that the intra-group services to be provided by RCO, including the making of decisions necessary for the conduct of its business, constitute a real business through which RCO exercises substantive economic functions, using real assets and assuming real risks, and that business is carried on by RCO through its own personnel located in State R, it would not be reasonable to deny the benefits of the treaties concluded between State R and the five States where the subsidiaries operate unless other facts would indicate that RCO has been established for other tax purposes or unless RCO enters into specific transactions to which paragraph 7 [PPT] would otherwise apply (see also example F in paragraph 15 below with respect to the interest and other remuneration that RCO might derive from its group financing activities).
>
> TCO is a company resident of State T that is listed on the stock exchange of State T. It is the parent company of a multinational enterprise that conducts a variety of business activities globally (wholesaling, retailing, manufacturing, investment, finance, etc.). Issues related to transportation, time differences, limited availability of personnel fluent in foreign languages and the foreign location of business partners make it difficult for TCO to manage its foreign activities from State T. TCO therefore establishes RCO, a subsidiary resident of State R (a country where there

> are developed international trade and financial markets as well as an abundance of highly-qualified human resources), as a base for developing its foreign business activities. RCO carries on diverse business activities such as wholesaling, retailing, manufacturing, financing and domestic and international investment. RCO possesses the human and financial resources (in various areas such as legal, financial, accounting, taxation, risk management, auditing and internal control) that are necessary to perform these activities. It is clear that RCO's activities constitute the active conduct of a business in State R.
>
> As part of its activities, RCO also undertakes the development of new manufacturing facilities in State S. For that purpose, it contributes equity capital and makes loans to SCO, a subsidiary resident of State S that RCO established for the purposes of owning these facilities. RCO will receive dividends and interest from SCO.

OECD analysis is as follows:

> In this example, RCO has been established for business efficiency reasons and its financing of SCO through equity and loans is part of RCO's active conduct of a business in State R. Based on these facts and in the absence of other facts that would indicate that one of the principal purposes for the establishment of RCO or the financing of SCO was the obtaining of the benefits of the treaty between States R and S, paragraph 9 [PPT] would not apply to these transactions.

108.8.11 *Copyright licences*

OECD Commentary on art 29 provides:

> RCO, a company resident of State R, is one of a number of collective management organisations that grant licenses on behalf of neighbouring right and copyright holders for playing music in public or for broadcasting that music on radio, television or the internet. SCO, a company resident of State S, carries on similar activities in State S.
>
> Performers and copyright holders from various countries appoint RCO or SCO as their agent to grant licenses and to receive royalties with respect to the copyrights and neighbouring rights that they hold; RCO and SCO distribute to each right holder the amount of royalties that they receive on behalf of that holder minus a commission (in most cases, the amount distributed to each holder is relatively small).
>
> RCO has an agreement with SCO through which SCO grants licenses to users in State S and distributes royalties to RCO with respect to the rights that RCO manages; RCO does the same in State R with respect to the rights that SCO manages.

> SCO has agreed with the tax administration of State S that it will process the royalty withholding tax on the payments that it makes to RCO based on the applicable treaties between State S and the State of residence of each right holder represented by RCO based on information provided by RCO since these right holders are the beneficial owners of the royalties paid by SCO to RCO.

OECD analysis is as follows:

> In this example, it is clear that the arrangements between the right holders and RCO and SCO, and between SCO and RCO, have been put in place for the efficient management of the granting of licenses and collection of royalties with respect to a large number of small transactions. Whilst one of the purposes for entering into these arrangements may well be to ensure that withholding tax is collected at the correct treaty rate without the need for each individual right holder to apply for a refund on small payments, which would be cumbersome and expensive, it is clear that such purpose, which serves to promote the correct and efficient application of tax treaties, would be in accordance with the object and purpose of the relevant provisions of the applicable treaties.

108.8.12 *Fragmentation*

Example J is a division of a contract to avoid a PE:

> RCO is a company resident of State R. It has successfully submitted a bid for the construction of a power plant for SCO, an independent company resident of State S. That construction project is expected to last 22 months. During the negotiation of the contract, the project is divided into two different contracts, each lasting 11 months. The first contract is concluded with RCO and the second contract is concluded with SUBCO, a recently incorporated wholly-owned subsidiary of RCO resident of State R. At the request of SCO, which wanted to ensure that RCO would be contractually liable for the performance of the two contracts, the contractual arrangements are such that RCO is jointly and severally liable with SUBCO for the performance of SUBCO's contractual obligations under the SUBCO-SCO contract.

OECD analysis is as follows:

> In this example, in the absence of other facts and circumstances showing otherwise, it would be reasonable to conclude that one of the principal purposes for the conclusion of the separate contract under which SUBCO agreed to perform part of the construction project was for RCO and SUBCO to each obtain the benefit of the rule in paragraph 3 of Article 5

> of the State R-State S tax convention. Granting the benefit of that rule in these circumstances would be contrary to the object and purpose of that paragraph as the time limitation of that paragraph would otherwise be meaningless.

108.8.13 *EC principal purpose test*

The EC recommendation is slightly different:

> Where Member States, in tax treaties which they conclude among themselves or with third countries, include a principal purpose test based general anti-avoidance rule in application of the template provided for in the OECD Model Tax Convention, Member States are encouraged to insert in them the following modification:
>
> > "Notwithstanding the other provisions of this Convention, a benefit under this Convention shall not be granted in respect of an item of income or capital if it is reasonable to conclude, having regard to all relevant facts and circumstances, that obtaining that benefit was one of the principal purposes of any arrangement or transaction that resulted directly or indirectly in that benefit, unless it is established that it reflects a genuine economic activity or that granting that benefit in these circumstances would be in accordance with the object and purpose of the relevant provisions of this Convention."[44]

We will have to wait and see what effect this may have.

108.8.14 *IRD anti-abuse rule*

A different PPT is found in the Interest and Royalties Directive. Art 5 IRD provides:

> 1. This Directive shall not preclude the application of domestic or agreement-based provisions required for the prevention of fraud or abuse.
> 2. Member States may, in the case of transactions for which the principal motive or one of the principal motives is tax evasion, tax avoidance or abuse, withdraw the benefits of this Directive or refuse to apply this Directive.

CFE say:

[44] C(2016) 271 Commission Recommendation of 28.1.2016 on the implementation of measures against tax treaty abuse *https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32016H0136*

9. Secondly, the Court addressed the question whether there is the need for a specific domestic or agreement based provision implementing the general anti-abuse reservation of Article 5 of the IRD, according to which the IRD "shall not preclude the application of domestic or agreement-based provisions required for the prevention of fraud or abuse" and "Member States may, in the case of transactions for which the principal motive or one of the principal motives is tax evasion, tax avoidance or abuse, withdraw the benefits of this Directive or refuse to apply this Directive". The referring Danish court asked whether Danish domestic law or the beneficial ownership clauses in the applicable tax treaties were a sufficient implementation of Article 5 of the IRD. The Grand Chamber of the Court took a different approach: It discounted the implementation requirement seemingly established in *Kofoed*[45] (on which AG Kokott's Opinion relied in rejecting the idea that non-implemented anti-avoidance provisions of the company tax directives could be applied directly against taxpayers)[46] and instead focused on the "general legal principle that EU law cannot be relied on for abusive or fraudulent ends".[47] This general principle, according to the Court, has been established in the context of the fundamental freedoms,[48] in various fields of EU law,[49] and more specifically also in the area of customs (e.g., in *Emsland-Stärke*)[50] and VAT (e.g., in *Italmoda and Cussens*).[51] Applying that principle

and its considerations in Cussens to the IRD, the Court stated that where a case is about the abuse of a Directive's provision, the general principle of EU law applies irrespective of any domestic implementation:

> "In the main proceedings, the rules that are claimed by SKAT to have been abused are the provisions of [the IRD], which was adopted in order to foster the development of a single market having the characteristics of a domestic market and provides for an exemption, in the source Member State, of interest paid to an associated company established in another Member State. As is apparent from the proposal for a directive referred to in paragraph 90 above, certain definitions set out in Directive 2003/49 are based on the definitions in Article 11 of the OECD 1996 Model Tax Convention. […] Whilst Article 5(1) of [the IRD] provides that the directive is not to preclude the application of domestic or agreement-based provisions required for the prevention of fraud or abuse, that provision cannot be interpreted as excluding the application of the general principle of EU law […] that abusive practices are prohibited. The transactions alleged by SKAT to constitute an abuse of rights fall within the scope of EU law […] and could prove incompatible with the objective pursued by that directive. […] Furthermore, whilst Article 5(2) of [the IRD] provides that Member States may, in the event of evasion, avoidance or abuse, withdraw the benefits of the directive or refuse to apply it, that provision likewise cannot be interpreted as excluding the application of the principle of EU law that abusive practices are prohibited, since the application of that principle is not — as the provisions of the directive are — subject to a requirement of transposition […]".[52]

Focusing on the objective of the IRD to eliminate double taxation of interest and royalties, the Court noted that it would not be consistent with such objectives "[t]o permit the setting up of financial arrangements whose sole aim is to benefit from the tax advantages resulting from the application" of the IRD and, on the contrary, "would undermine economic cohesion and the effective functioning of the internal market by distorting the conditions of competition".[53] This would also be the case if the transactions do not exclusively pursue such an aim, as it is sufficient for the general principle of prohibition of abusive practices in tax matters to apply "where the accrual of a tax advantage constitutes the essential aim of the transactions at issue".[54] Neither taking advantage of tax

competition between Member States nor a taxpayer's right to pursue the most favorable regime allows a taxpayer to "enjoy a right or advantage arising from EU law where the transaction at issue is purely artificial economically and is designed to circumvent the application of the legislation of the Member State concerned".[55] It is therefore "incumbent upon the national authorities and courts to refuse to grant entitlement to rights provided for by [the IRD] where they are invoked for fraudulent or abusive ends",[56] even in the absence of domestic or agreement-based anti-abuse provisions.[57] The Court moreover held that Kofoed must not be misunderstood to require implementing legislation,[58] specifically

> "since […] abusive or fraudulent acts cannot found a right provided for by EU law, the refusal of an advantage under a directive […] does not amount to imposing an obligation on the individual concerned under that directive, but is merely the consequence of the finding that the objective conditions required for obtaining the advantage sought, prescribed by the directive as regards that right, are met only formally […]".[59]

This, however, is not only an option for Member States, but, as the Court stated, an obligation: The general principle that abusive practices are prohibited forces national authorities and courts to refuse the advantage resulting from the IRD in such circumstances, even if there are no domestic or agreement-based provisions providing for such a refusal.[60]

10. Thirdly, without mentioning the recent landmark decisions on the concept of abuse in the PSD in *Eqiom*[61] and *Deister and Juhler*,[62] the Court *(a)* identified a number of

constituent elements of an abuse of rights and the relevant evidence,[63] *(b)* determined the effect of tax treaty benefits on the finding of abuse,[64] and *(c)* addressed the allocation of the burden of proof:[65]

a. As for the constituent elements of an abuse of rights, the Grand Chamber of the Court clarified that abuse consists of an objective and a subjective element, noting that “proof of an abusive practice requires, first, a combination of objective circumstances in which, despite formal observance of the conditions laid down by the EU rules, the purpose of those rules has not been achieved and, second, a subjective element consisting in the intention to obtain an advantage from the EU rules by artificially creating the conditions laid down for obtaining it”.[66] This requires an examination of the facts to “establish whether the constituent elements of an abusive practice are present, and in particular whether economic operators have carried out purely formal or artificial transactions devoid of any economic and commercial justification, with the essential aim of benefiting from an improper advantage”.[67] While this is the task of the domestic court (including to establish whether the indications of abuse are objective and consistent, and whether the applicants in the main proceedings have had the opportunity to adduce evidence to the contrary), the Grand Chamber went on to specify a number of indicia: ? The Court first noted that “[a] group of companies may be regarded as being an artificial arrangement where it is not set up for reasons that reflect economic reality, its structure is purely one of form and its principal objective or one of its principal objectives is to obtain a tax advantage running counter to the aim or purpose of the applicable tax law. That is so inter alia where, on account of a conduit entity interposed in the structure of the group between the company that pays interest and the entity which is its beneficial owner, payment of the tax on the interest is avoided.”[68]

   - It is therefore an indication of the existence of an arrangement intended to obtain

improper entitlement to the exemption under the IRD "that all or almost all of the aforesaid interest is, very soon after its receipt, passed on by the company that has received it to entities which do not fulfil the conditions for the [IRD], either because those entities are not established in any Member State, or because they are not incorporated in one of the forms referred to in the annex to the directive, or because they are not subject to one of the taxes listed in Article 3(a)(iii) of the directive without being exempt, or because they do not have the status of associated company within the meaning of Article 3(b) of the directive."[69] This would be the case where the beneficial owners are entities resident for tax purposes outside the European Union.

- Likewise, "the artificiality of an arrangement is capable of being borne out by the fact that the relevant group of companies is structured in such a way that the company which receives the interest paid by the debtor company must itself pass that interest on to a third company which does not fulfil the conditions for the application of [the IRD], with the consequence that it makes only an insignificant taxable profit when it acts as a conduit company in order to enable the flow of funds from the debtor company to the entity which is the beneficial owner of the sums paid."[70] An entity's characteristic as a "conduit company" may be established where its "sole activity is the receipt of interest and its transmission to the beneficial owner or to other conduit companies".[71] The absence of actual economic activity must, "in the light of the specific features of the economic activity in question, be inferred from an analysis of all the relevant factors relating, in particular, to the management of the company, to its balance sheet, to the structure of its costs and to expenditure actually incurred, to the staff that it employs and to the premises and equipment that it has".[72]
- Also, "indications of an artificial arrangement may also be constituted by the various contracts existing between the companies involved in the financial transactions at issue, giving rise to intragroup flows of funds which, as is mentioned in Article 4 of [the IRD], may have the aim of transferring profits from a profit-making commercial company to shareholding entities in order to avoid the tax burden or reduce it as much as possible. The way in which the transactions are financed, the valuation of the intermediary companies' equity and the conduit companies' inability to have economic use of the interest received may also be used as indications of such an arrangement."[73]
- In that connection the Court also indirectly addressed a question that the

domestic referring court raised with regard to the 2014 OECD Update on "beneficial ownership",[74] where the OECD clarified that an entity is not the beneficial owner of interest income where "that recipient's right to use and enjoy the interest is constrained by a contractual or legal obligation to pass on the payment received to another person", a conclusion that would normally derive from relevant legal documents "but may also be found to exist on the basis of facts and circumstances showing that, in substance, the recipient clearly does not have the right to use and enjoy the interest unconstrained by a contractual or legal obligation to pass on the payment received to another person".[75] Addressing that "in substance"-determination, the Court noted that the above indications "are capable of being constituted not only by a contractual or legal obligation of the company receiving interest to pass it on to a third party but also by the fact that, 'in substance' […] that company, without being bound by such a contractual or legal obligation, does not have the right to use and enjoy those sums."[76]

- Finally, the Court argued that "such indications may be reinforced by the simultaneity or closeness in time of, on the one hand, the entry into force of major new tax legislation, such as the Danish legislation at issue in the main proceedings, which some of the groups of companies strive to circumvent and, on the other hand, the setting up of complex financial transactions and the grant of intragroup loans".[77]

b. The second and third issue, i.e., the impact of a tax treaty and the burden of proof, are somewhat intermingled: AG Kokott had, inter alia, argued that an abuse within the meaning of Art 5 of the IRD would only exist where "interest disbursed directly" to the (third state) beneficial owner "would have been taxed accordingly in Denmark".[78] Such taxation would, however, be precluded under Danish law if, disregarding the conduit companies, "the actual interest recipient is also an undertaking registered in a different Member State or the interest recipient is resident in a State with which Denmark has concluded a DTC".[79] Consequently, "in order to determine whether a more favourable tax result is achieved as a result of the arrangement qualified as abusive", AG Kokott concluded "that a Member State that does not wish to recognise a company resident in a different Member State, to which the interest was paid, as the beneficial owner of the interest must in principal state

[79] Footnote original: *Id.*

whom it considered to be the beneficial owner in order to assume that abuse exists", but that "[i]n particular in cross-border cases, the taxable person may have an enhanced duty to assist".[80] The Court's Grand Chamber, however, arrived at a different conclusion: "The existence of such a convention cannot in itself rule out an abuse of rights"[81] and that "the existence of a double taxation convention is not, as such, capable of establishing that a payment was really made to recipients resident in the third State with which that convention has been concluded",[82] but that (if the "beneficial owner" is not in a third State)[83]

> "it remains possible, in a situation where the interest would have been exempt had it been paid directly to the company having its seat in a third State, that the aim of the group's structure is unconnected with any abuse of rights. In such a case, the group cannot be reproached for having chosen such a structure rather than direct payment of the interest to that company".[84]

c. As for the burden of proof, the Court referenced the obligation of a company to establish that it is the beneficial owner of the interest (Art 1(11), (12) and (13)(b) of the IRD) on the one hand and the obligation of the tax authorities, when refusing the exemption under Art 1(1) IRD based on abuse, to establish the existence of elements constituting an abuse practice while taking account of all the relevant factors, in particular the fact that the company to which the interest has been paid is not its beneficial owner on the other hand.[85] However, as the Court found in contrast to AG Kokott's Opinions,[86] the tax authority has no obligation to identify the entity or entities which it regards as being the beneficial owner or owners of the interest. In the words of the Court, it:

> "has the task not of identifying the beneficial owners of that interest but of

[80] Footnote original: See the Opinions of AG Kokott of 1 March 2018 in C-115/16 (*N Luxembourg 1*, EU:C:2018:143, para. 96), C-118/16 (*X Denmark*, EU:C:2018:146, para. 105), C-119/16 (*C Danmark I*, EU:C:2018:147, para. 96), and C 299/16 (*Z Denmark*, EU:C:2018:148, para. 96).

[83] Footnote original: The Court had also noted the different effects of the beneficial ownership requirement and the anti-abuse principle, as – irrespective of any finding of fraud or abuse – "beneficial owners" in third states are not beneficiaries of the IRD in the first place (see *N Luxembourg I* et al [C-115/16, C-118/16, C-119/16 and C-299/16], para. 138).

[84] Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 137.

[85] Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), paras 140-142.

[86] Footnote original: See the Opinions of AG Kokott of 1 March 2018 in C-115/16 (*N Luxembourg 1*, EU:C:2018:143, para. 96), C-118/16 (*X Denmark*, EU:C:2018:146, para. 105), C-119/16 (*C Danmark I*, EU:C:2018:147, para. 94), and C 299/16 (*Z Denmark*, EU:C:2018:148, para. 96).

> establishing that the supposed beneficial owner is merely a conduit company through which an abuse of rights has been committed. Indeed, identification of that kind may prove impossible, in particular because the potential beneficial owners are unknown. Given the complexity of certain financial arrangements and the possibility that the intermediary companies involved in the arrangements are established outside the European Union, the national tax authority does not necessarily have information enabling it to identify those owners. That authority cannot be required to furnish evidence that would be impossible for it to provide. […] Furthermore, even if the potential beneficial owners are known, it is not necessarily established which of them are or will be the actual beneficial owners. Thus, where a company receiving interest has a parent company, which itself has a parent company, the tax authorities and courts of the source Member State are, in all probability, unable to determine which of those two parent companies is or will be the beneficial owner of the interest. Moreover, the allocation of that interest may have been decided upon after the tax authority's findings relating to the conduit company."[87] [88]

Clearly, treaty abuse is a subset of a wider set of issues relating to abuse of law.

108.9 USA DTA: Conduit arrangement

The USA/UK DTA adopts different anti-abuse methods:

(1) excluding conduit arrangements from relief[89]
(2) its own limitation on benefit rule[90]

OECD summarise:

> The United States has implemented LOB clauses in most of its agreements. It started to include anti-treaty-shopping measures in 1962, and since the seventies, LOB clauses (which initially targeted investment or holding companies) have appeared in agreements concluded by the United States. All of the United States' agreements are supplemented by its anti-conduit regulations.[91]

[87] Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), paras 143-144.

[88] CFE Opinion Statement ECJ-TF 2/2019 *https://taxadviserseurope.org/new_ahgency/wp-content/uploads/2019/06/ECJ-TF_2-2019_Beneficial-Ownership.pdf*

[89] The term is used in art 7 (Business Profits), art 10 (Dividends), art 11 (Interest), art 12 (Royalties), and art 22 (Other Income).

[90] See 110.1 (Limitation on benefits).

[91] Footnote original: See I.R.C. §7701(l), Treas. Reg. § 1.881-3, added to the Internal Revenue Code by section 13238 of the Omnibus Budget Reconciliation Act of 1993, P.L. 103-66. It allows the Internal Revenue Service to re-characterise any

> The 2016 US Model Convention contains an express statement that the tax treaty should not create opportunities for non-taxation or reduced taxation through tax evasion or avoidance (including through treaty-shopping arrangements aimed at obtaining reliefs provided in this Convention for the indirect benefit of residents of third states).
> The United States expects to comply with the minimum standard through a detailed LOB which is not available through the MLI. Therefore, the United States did not sign the MLI and will implement the minimum standard bilaterally.[92]

The term "conduit arrangements" is defined in article 3(1)(n) USA/UK DTA:

> the term "conduit arrangement" means a transaction or series of transactions—
> (i) which is structured in such a way that
> [A] a resident of a Contracting State entitled to the benefits of this Convention receives an item of income arising in the other Contracting State but
> [B] that resident pays, directly or indirectly, all or substantially all of that income (at any time or in any form) to another person
> [1] who is not a resident of either Contracting State and
> [2] who, if it received that item of income direct from the other Contracting State, would not be entitled under a convention for the avoidance of double taxation between the state in which that other person is resident and the Contracting State in which the income arises, or otherwise, to benefits with respect to that item of income which are equivalent to, or more favourable than, those available under this Convention to a resident of a Contracting State; and
> (ii) which has as its main purpose, or one of its main purposes, obtaining such increased benefits as are available under this Convention.

multiple-party financing transaction as being a transaction directly among any two or more of its parties whenever appropriate to prevent the avoidance of the United States' tax.

[92] OECD "OECD/G20 Base Erosion and Profit Shifting Project Prevention of Treaty Abuse - Peer Review Report on Treaty Shopping" (2019) p.241 *https://www.oecd-ilibrary.org/docserver/9789264312388-en.pdf?expires=1550998970&id=id&accname=guest&checksum=0714C894B29FF51D6F78DD798D16F034*

Although not treaty usage, I write Conduit Arrangement with initial capitals, to reflect the technical nature of this definition.

The US Treasury Technical Explanation of the Convention[93] provides:

> The term is not used in the OECD or U.S. Model, but is included here at the request of the UK in order to ensure that each of the Contracting States can prevent residents of third countries from improperly obtaining the benefits of the Convention. For the UK, these transaction-based anti-abuse rules are a necessary supplement to the entity-based anti-treaty shopping rules in Article 23 (Limitation on Benefits). On the other hand, U.S. domestic law provides specific anti-conduit rules ... as well as a number of other domestic anti-abuse principles (such as the business purpose doctrine) that apply in the treaty context.

An exchange of letters provides:

> With respect to the United States, we intend to interpret the conduit arrangement provisions of the Convention in accordance with U.S. domestic law as it may evolve over time. The relevant law currently includes in particular the rules of regulation section 1.881-3 and other regulations adopted under the authority of section 770 l(1) of the Internal Revenue Code. Therefore, the inclusion of the conduit arrangement rules in the Convention does not constitute an expansion (or contraction) of U.S. domestic anti-abuse principles (except with respect to the application of anti-conduit principles to the insurance excise tax).
>
> We understand that the UK does not have domestic law provisions relating to conduit transactions. It has, however, entered into a number of treaties which include provisions aimed at dealing with conduit-type arrangements. We understand that the UK will, subject to the limitations in Article 3(l)(n), interpret the provisions in the proposed convention in a manner consistent with its practice under those other treaties.
>
> In practice, of course, such general principles and practice will be applied to particular fact patterns in determining whether the anti-conduit provisions will apply. In order to further develop our mutual understanding of how we each propose to apply the language, I have set out below a number of examples together with the U.S. view regarding whether benefits would be denied in each case.

HMRC consider the same examples from a UK perspective: It is helpful to read the examples side by side, followed by the US/HMRC analyses. There are 6 examples:

4	Simple US/UK bank loan
5	"Normal" inter-group royalty
6	"Normal" inter-group finance

108.9.1 *Dividend withholding tax*

US example 1

UKCo, a publicly traded company organized in the UK, owns all of the outstanding stock of USCo. XCo, a company organized in a country that does not have a tax treaty with the US, would like to purchase a minority interest in USCo, but believes that the 30% U.S. domestic withholding tax on dividends would make the investment uneconomic.

UKCo proposes that

[1] USCo instead issue preferred stock to UKCo, paying a fixed return of 4% plus a contingent return of 20% of USCo's net profits. The maturity of the preferred stock is 20 years.

[2] XCo will enter into a separate contract with UKCo pursuant to which it pays to UKCo an amount equal to the issue price of the preferred stock and will receive from UKCo after 20 years the redemption price of the stock. During the 20 years, UKCo will pay to XCo [a fixed return of] 3% plus 20% of USCo's net profits.

UK example 1

UsCo, a publicly traded company organised in the US, owns all of the outstanding stock of UKCo. XCo, a company organised in a country that does not have a tax treaty with the UK, would like to purchase a minority interest in UKCo.

USCo proposes that

[1] UKCo issue preferred stock to USCo, paying a fixed return of 4% plus a contingent return of 20% of UKCo's net profits.

The maturity of the preferred stock is 20 years.

[2] XCo will enter into a separate contract with USCo pursuant to which it pays to USCo an amount equal to the issue price of the preferred stock and will receive from USCo after 20 years the redemption price of the stock. During the 20 years, USCo will pay to XCo 3 % [of the preferred stock subscription price] plus 20% of UKCo's net profits.

X Co

The US analysis is as follows:

> This arrangement constitutes a conduit arrangement because UKCo participated in the transaction in order to achieve a reduction in U.S. withholding tax for XCo.

The HMRC analysis is as follows:

> The UK considers this arrangement would meet the objective definition of a conduit arrangement at Article 3(l)(n)(i) but because the UK has no withholding tax on dividends the motive test at Article 3(l)(n)(ii) would not be met because no increased treaty benefit would be obtained by the routing through the U.S. Therefore the arrangement would not constitute a conduit arrangement as defined by the treaty.

108.9.2 *Simple inter-group dividend*

US example 2

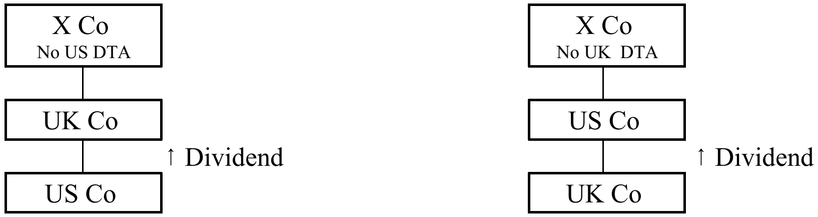
USCo has issued only one class of stock, common stock that is 100% owned by UKCo, a company organized in the UK. UKCo also has only one class of common stock outstanding, all of which is owned by XCo, a company organized in a country that does not have a tax treaty with the US. UKCo is engaged

UK example

UKCo has issued only one class of stock, common stock that is 100% owned by USCo, a company organized in the US. USCo also has only one class of common stock outstanding, all of which is owned by XCo, a company organized in a country that does not have a tax treaty with the UK. USCo is engaged in the manufacture of in the manufacture of electronics products, and USCo serves as UKCo's exclusive distributor in the US. Under paragraph 4 of Article 23 (Limitation on Benefits), UKCo will be entitled to benefits with respect to dividends received from USCo, even though UKCo is owned by a resident of a third country.

electronics products, and UKCo serves as USCo's exclusive distributor in the UK. Under paragraph 4 of Article 23 (Limitation on Benefits), USCo will be entitled to benefits with respect to dividends received from UKCo, even though USCo is owned by a resident of a third country.

Share structure:



The US analysis is as follows:

> Because the common stock owned by UKCo and XCo does not represent a "financing transaction" within the meaning of regulation section 1.881-3 as currently in effect, on these facts, this will not constitute a conduit arrangement.

The HMRC analysis is as follows:

> This seems to be a perfectly acceptable and normal commercial structure with real economic activity in both the U.S. and the UK The payment of dividends by subsidiary companies is a normal feature of commercial life. Accordingly, in the absence of evidence that dividends were flowed through to XCo, these transactions would not constitute a conduit arrangement.

This is straightforward.

108.9.3 *Conduit: Interest WHT*

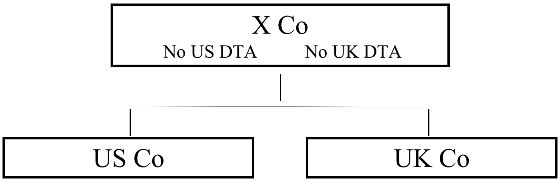
US example 3
XCo, a company organized in a country that does not have a tax treaty with the US, loans $1,000,000 to USCo, its wholly-owned U.S. subsidiary in

UK example 3
XCo, a company organized in a country that does not have a tax treaty with the UK, loans $1,000,000 to UKCo, its wholly-owned UK subsidiary in exchange for a note issued by UKCo.

exchange for a note issued by USCo. XCo later realizes that it can avoid the U.S. withholding tax by assigning the note to its wholly-owned subsidiary, UKCo. Accordingly, XCo assigns the note to UKCo in exchange for a note issued by UKCo. The USCo note pays 7% and the UKCo note pays 6%.

XCo later realizes that it can avoid the UK withholding tax by assigning the note to its wholly-owned subsidiary, USCo. Accordingly, XCo assigns the note to USCo in exchange for a note issued by USCo. The UKCo note pays 7% and the USCo note pays 6%.

Diagrammatically:



X Co
No US DTA
No UK DTA

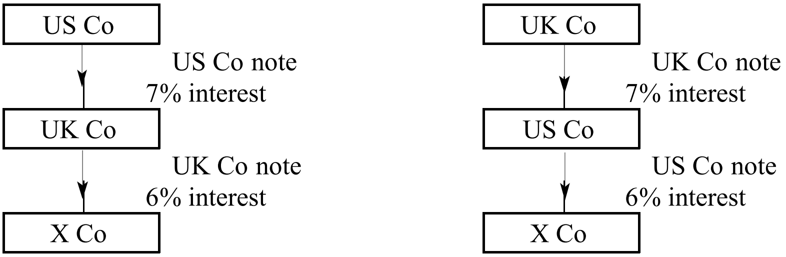
UK Co

Income flow:



US Co
US Co note
7% interest
UK Co
UK Co note
6% interest
X Co
UK Co
UK Co note
7% interest
US Co
US Co note
6% interest
X Co

This is a classic conduit arrangement, not just one within the DTA definition. This is the same as the example considered in the context of the PPT test; see 108.8.4 (Directly or indirectly).

It therefore also raises the question whether beneficial ownership requirement of DTA interest relief is met.[94] But because of the Conduit Arrangement provision, it is not necessary for the Revenue authorities to rely on that point.

The example does not consider the taxation of the 6% interest paid to X

[94] See 108.10 (DTA beneficial owner rule).

Co but no doubt it is assumed some relief applies.

The US analysis is as follows:

> The transaction constitutes a conduit arrangement because it was structured to eliminate the U.S. withholding tax that XCo otherwise would have paid.

The HMRC analysis is the same:

> The loan note was assigned to avoid UK income tax on the payment of interest. The transaction constitutes a conduit arrangement as defined in the treaty as both the objective definition and the motive test at Article 3(l)(n)(i) and (ii) respectively are met.

108.9.4 *Simple USA/UK bank loan*

US example 4

XCo, a company organized in Country X, which does not have a tax treaty with the US, owns all of the stock of USCo, a company resident in the US. XCo has for a long time done all of its banking with UKCo, a company organized in the UK, because the banking system in Country X is relatively unsophisticated. As a result, XCo tends to maintain a large deposit with UKCo. UKCo is unrelated to XCo and USCo.

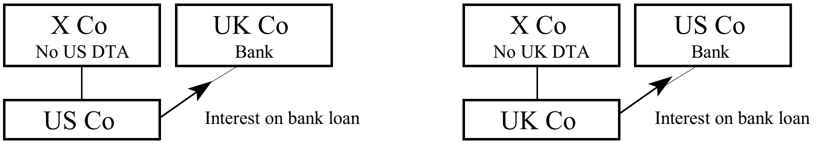
When USCo needs a loan to fund an acquisition, XCo suggests that USCo deal with UKCo, which is already familiar with the business conducted by XCo and USCo. USCo discusses the loan with several different banks, all on terms similar to those offered by UKCo, but eventually enters into the loan with UKCo, in part because interest paid to UKCo would not be subject to U.S. withholding tax, while interest paid to banks organized in Country X would be.

UK example 4

XCo, a company organized in Country X, which does not have a tax treaty with the UK, owns all of the stock of UKCo, a company resident in the UK. XCo has for a long time done all of its banking with USCo, a company organized in the US, because the banking system in Country X is relatively unsophisticated. As a result, XCo tends to maintain a large deposit with USCo. USCo is unrelated to XCo and UKCo.

When UKCo needs a loan to fund an acquisition, XCo suggests that UKCo deal with USCo, which is already familiar with the business conducted by XCo and UKCo. UKCo discusses the loan with several different banks, all on terms similar to those offered by USCo, but eventually enters into the loan with USCo, in part because interest paid to USCo would not be subject to UK withholding tax, while interest paid to banks organized in Country X would be.

Company/income flow diagram:



The US analysis is as follows:

> The US will consider the fact that UKCo is unrelated to USCo and XCo in determining whether there is a conduit arrangement. Accordingly, this will be treated as a conduit arrangement only if UKCo would not have entered into the transaction on substantially the same terms in the absence of the XCo deposit. Under these facts, there is no conduit arrangement.

The HMRC analysis is as follows:

> The fact that UK/US treaty benefits are available if UKCo borrows from USCo, and that similar benefits might not be available if it borrowed elsewhere, is clearly a factor in UKCo's decision (which may be influenced by advice given to it by its 100% shareholder). It may even be a decisive factor, in the sense that, all else being equal, the availability of treaty benefits may swing the balance in favour of borrowing from USCo rather than from another lender. However, whether the obtaining of treaty benefits was "the main purpose or one of the main purposes" of the transaction would have to be determined by reference to the particular facts and circumstances.
>
> Similarly, for the anti-conduit provision to apply it would have to be established that the interest paid by UKCo was "flowing through" USCo to XCo. The fact that XCo has historically maintained large deposits with USCo might, if anything, be a counter-indication. Against that, there is the question why a cash-rich company would want to increase its overall debt exposure in this way. XCo could redirect its balance with USCo and lend it to UKCo in which case it would face UK withholding tax. It chooses not to, so there is a possible argument that the transactions were structured to avoid UK withholding tax by obtaining benefits under the treaty.
>
> On the specific facts as presented, the transactions would not constitute a conduit arrangement as defined by the treaty.
>
> However, if USCo's decision to lend to UKCo was dependent on XCo providing a matching collateral deposit to secure the loan, the indication

would be that XCo was in substance lending to UKCo direct but in form routing the loan through a bank with whom it has a close relationship in order to obtain the benefit of the treaty. In such circumstances the transactions would constitute a conduit arrangement as defined by the treaty.

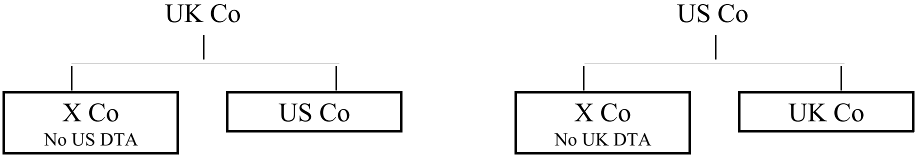
It would be surprising if an arrangement as simple as a single bank loan were caught.

108.9.5 *"Normal" inter-group royalty*

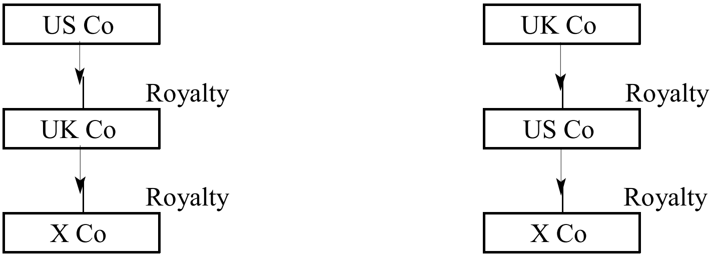
US example 5
UKCo, a publicly-traded company organized in the UK, is the holding company for a manufacturing group in a highly competitive technological field. The manufacturing group conducts research in subsidiaries located around the world. Any patents developed in a subsidiary are licensed by the subsidiary to UKCo, which then licenses the technology to its subsidiaries that need it. UKCo keeps only a small spread with respect to the royalties it receives, so that most of the profit goes to the subsidiary that incurred the risk with respect to developing the technology. XCo, a company located in a country with which the US does not have a tax treaty, has developed a process that will substantially increase the profitability of all of UKCo's subsidiaries, including USCo, a company organized in the US. According to its usual practice, UKCo licenses the technology and sub-licenses the technology to its subsidiaries. USCo pays a royalty to UKCo, substantially all of which is paid to XCo.

UK example 5
USCo, a publicly-traded company organized in the US, is the holding company for a manufacturing group in a highly competitive technological field. The manufacturing group conducts research in subsidiaries located around the world. Any patents developed in a subsidiary are licensed by the subsidiary to USCo, which then licenses the technology to its subsidiaries that need it. USCo keeps only a small spread with respect to the royalties it receives, so that most of the profit goes to the subsidiary that incurred the risk with respect to developing the technology. XCo, a company located in a country with which the UK does not have a tax treaty, has developed a process that will substantially increase the profitability of all of USCo's subsidiaries, including UKCo, a company organized in the UK. According to its usual practice, USCo licenses the technology and sub-licenses the technology to its subsidiaries. UKCo pays a royalty to USCo, substantially all of which is paid to XCo.

Company structure:



Income flow:



The US analysis is as follows:

> Because UKCo entered into these transactions in the ordinary course of its business, and there is no indication that it established its licensing business in order to reduce its U.S. withholding tax, the arrangements among USCo, UKCo and XCo do not constitute a conduit arrangement.

The HMRC analysis is as follows:

> Because XCo is conforming to the standard commercial organisation and behaviour of the group in the way that it structures its licensing and sub-licensing activities and assuming the same structure is employed with respect to other subsidiaries carrying out similar activities in countries which have treaties which offer similar or more favourable benefits, the inference would be that the absence of a treaty between country X and the UK is not influencing the motive for the transactions described.
>
> Therefore even though the specific fact pattern, as presented, meets the first part of the definition of a "conduit arrangement" at Article 3(l)(n)(i), on balance the conclusion would be that "the main purpose or one of the main purposes" of the transactions was not the obtaining of UK/US treaty benefits. So the structure would not constitute a conduit arrangement.

108.9.6 *"Normal" inter-group finance*

US example 6

XCo is a publicly traded company resident in Country X, which does not have a tax treaty with the US. XCo is the parent of a worldwide group of companies, including UKCo, a company resident in the UK, and USCo, a company resident in the US. USCo is engaged in the active conduct of a trade or business in the US. UKCo is responsible for coordinating the financing of all of the subsidiaries of XCo. UKCo maintains a centralized cash management accounting system for XCo and its subsidiaries in which it records all intercompany payables and receivables. UKCo is responsible for disbursing or receiving any cash payments required by transactions between its affiliates and unrelated parties. UKCo enters into interest rate and foreign exchange contracts as necessary to manage the risks arising from mismatches in incoming and outgoing cash flows. The activities of UKCo are intended (and reasonably can be expected) to reduce transaction costs and overhead and other fixed costs. UKCo has 50 employees, including clerical and other back office personnel, located in the UK.

XCo lends to UKCo DM 15 million (worth $10 million) in exchange for a 10-year note that pays interest annually at a rate of 5% per annum. On the same day, UKCo lends $10 million to USCo in exchange for a 10-year note that pays interest annually at a rate of 8% per annum.

UK example 6

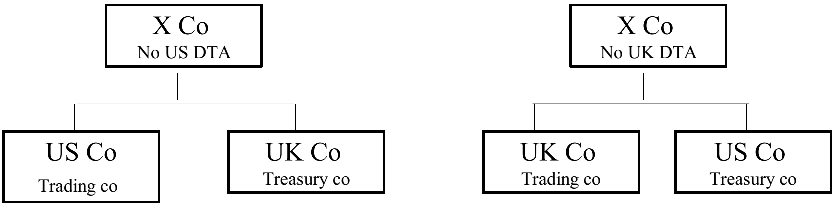
XCo is a publicly traded company resident in Country X, which does not have a tax treaty with the UK. XCo is the parent of a worldwide group of companies, including USCo, a company resident in the US, and UKCo, a company resident in the UK. UKCo is engaged in the active conduct of a trade or business in the UK. USCo is responsible for coordinating the financing of all of the subsidiaries of XCo. USCo maintains a centralized cash management accounting system for XCo and its subsidiaries in which it records all inter-company payables and receivables. USCo is responsible for disbursing or receiving any cash payments required by transactions between its affiliates and unrelated parties. USCo enters into interest rate and foreign exchange contracts as necessary to manage the risks arising from mismatches in incoming and outgoing cash flows. The activities of USCo are intended (and reasonably can be expected) to reduce transaction costs and overhead and other fixed costs. USCo has 50 employees, including clerical and other back office personnel, located in the US.

XCo lends to USCo DM 15million (worth $10 million) in exchange for a 10-year note that pays interest annually at a rate of 5% per annum. On the same day, USCo lends $10 million to UKCo in exchange for a 10-year note that pays interest

UKCo does not enter into a long-term hedging transaction with respect to these financing transactions, but manages the interest rate and currency risk arising from the transactions on a daily, weekly or quarterly basis by entering into forward currency contracts.

annually at a rate of 8% per annum. USCo does not enter into a long-term hedging transaction with respect to these financing transactions, but manages the interest rate and currency risk arising from the transactions on a daily, weekly or quarterly basis by entering into forward currency contracts.

Company structure:



X Co
No US DTA
US Co

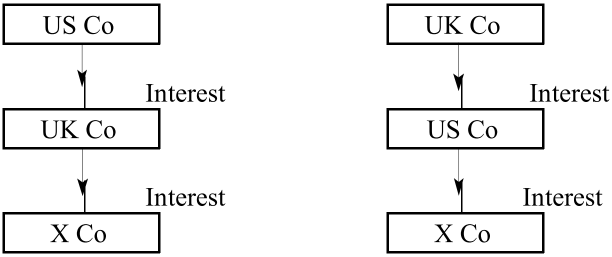
No UK DTA
UK Co
Trading co
US Co
Treasury co

Income flow structure:



US Co
Interest
UK Co
Interest
X Co
UK Co
Interest
US Co
Interest
X Co

The US analysis is as follows:

> Because UKCo performs significant activities with respect to the transactions between USCo and XCo, the participation of UKCo is presumed not to have as one of its main purposes the avoidance of U.S. withholding tax. Accordingly, based upon the foregoing facts, the loan from XCo to UKCo and the loan from UKCo to USCo do not constitute a conduit arrangement under the Convention.

The HMRC analysis is as follows:

> UKCo appears to be a real business performing substantive economic functions, using real assets and assuming real risks. USCo appears to be bearing the interest rate and currency risk. It is assumed that the

transactions are typical of USCo's normal treasury business and that that business was carried on in a commercial manner.
So, on the specific facts presented, the transactions would not constitute a conduit arrangement as defined by the treaty.

108.10 DTA beneficial owner rule

108.10.1 *Beneficial-owner reliefs*

Beneficial ownership is a requirement of DT relief in 3 OECD Model articles:

Article	**Topic**	**See para**	**OECD Commentary**
10	Dividends	30.15	Commentary on art 10, para 12
11	Interest	26.27	Commentary on art 11, para 9
12	Royalties	32.16	Commentary on art 12, para 4

I refer to these as the three **"beneficial-owner reliefs"**.

Beneficial ownership has various meanings[95] and I refer to the meaning here as "DTA beneficial ownership".

This concept of "beneficial owner" was introduced in 1977.

The Commentary material is repeated three times, in the Commentary on arts 10/11/12 (Dividends/Interest/Royalties). So it is sufficient to consider the Commentary on one article; I consider article 11.[96] This repetition tends to make discussion more difficult, but there it is.

108.10.2 *Beneficial owner: References*

DTA beneficial ownership in the following contexts is considered elsewhere:

Context	**See para**
Settlor-interested trusts	47.18.3
Fictional income	50.61.2
Hybrids	91.6.2

For further reading, see:

Wheeler, The Missing Keystone of Income Tax Treaties (2012) para 2.4.3 (Beneficial ownership)

[95] See App.6.1 (Beneficial ownership: Meanings).

[96] I select art 11 because in a UK private client context, the issues perhaps arise most often in relation to interest; though it does not matter.

OECD, “Report of the Informal Consultative Group on the Taxation of Collective Investment Vehicles” (2009) Annex 1: Background Regarding the Meaning of “Beneficial Owner” in Tax Treaties[97]
Avery Jones et al, “The Origins of Concepts and Expressions used in OECD Model” [2006] BTR 695 at p.747
JBD Oliver et al, “Beneficial Ownership and OECD Model” [2001] BTR 27

108.10.3 *Beneficial owner: Commentary*

DTA beneficial ownership is not defined, but it is discussed in the OECD Commentary. The Commentary is not lengthy, but it is of course important:

> The requirement of beneficial owner was introduced in [art 11(2)] to clarify the meaning of the words “paid to a resident” as they are used in [art 11(1)]. It makes plain that the State of source is not obliged to give up taxing rights over interest income merely because that income was paid direct to a resident of a State with which the State of source had concluded a convention.[98]

The word “clarify” would allow an argument that:

(1) Pre-1977 treaties, which do not refer to beneficial ownership, should be construed in the same way.
(2) Other articles of the OECD model, which do not refer to beneficial ownership, should be construed in the same way.[99]

But given the other DTA anti-abuse rules now applicable, the issue may not arise.

108.10.4 *DTA meaning: General*

OECD Commentary on art 11 provides:

> 9.1 Since the term “beneficial owner” was added to address potential difficulties arising from the use of the words “paid to a resident” in [art 11] paragraph 1, it was intended to be interpreted in this context and not to refer to any technical meaning that it could have had under the domestic law of a specific country (in fact, when it was added to the paragraph, the term did not have a precise meaning in the law of many countries). The term “beneficial owner” is therefore not used in a narrow

[97] *http://www.oecd.org/dataoecd/34/26/41974553.pdf*
[98] OECD Commentary on art 11, para 9.
[99] But see App.1.2 (Clarify/modernise/reform).

> technical sense[100] (such as the meaning that it has under the trust law of many common law countries[101]), rather, it should be understood in its context, in particular in relation to the words "paid to a resident", and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.

DTA beneficial ownership is distinct from (what I call) money-laundering beneficial ownership. OECD Commentary on art 11 discusses this:

> 10.4 The above explanations concerning the meaning of "beneficial owner" make it clear that the meaning given to this term in the context of [Article 11] must be distinguished from the different meaning that has been given to that term in the context of other instruments[102] that concern the determination of the persons (typically the individuals) that exercise ultimate control over entities or assets. That different meaning of "beneficial owner" cannot be applied in the context of the Convention. Indeed, that meaning, which refers to natural persons (i.e. individuals), cannot be reconciled with the express wording of subparagraph 2 a) of Article 10, which refers to the situation where a company is the beneficial owner of a dividend. In the context of Articles 10 and 11, the term "beneficial owner" is intended to address difficulties arising from the use of the words "paid to" in relation to dividends and interest rather than difficulties related to the ownership of the shares or debt-claims on

[100] Author's footnote: For "technical" as a term of abuse, see App 1.8 (Technical); for the 3 principal senses of beneficial ownership, see App 6.1 (Beneficial ownership: Meanings).

[101] Footnote original: For example, where the trustees of a discretionary trust do not distribute dividends earned during a given period, these trustees, acting in their capacity as such (or the trust, if recognised as a separate taxpayer), could constitute the beneficial owners of such income for the purposes of Article 11 even if they are not the beneficial owners under the relevant trust law.

[102] The Commentary gives 2 illustrations:
(1) A moneylaundering definition, from Financial Action Task Force, "International Standards on Combating Money Laundering and the Financing of Terrorism & Proliferation – The FATF Recommendations" (2012), which defines beneficial owner (at p.110): "the natural person(s) who ultimately owns or controls a customer and/or the person on whose behalf a transaction is being conducted. It also incorporates those persons who exercise ultimate effective control over a legal person or arrangement." This is standard in a moneylaundering context; see for example 131.15 (MLR beneficial ownership).
(2) OECD Steering Group on Corporate Governance, "Behind the Corporate Veil: Using Corporate Entities for Illicit Purposes" (2001), at p.14. I do not set out the definition here, as it does not take the discussion any further.

> which dividends or interest are paid. For that reason, it would be inappropriate, in the context of these Articles, to consider a meaning developed in order to refer to the individuals who exercise "ultimate effective control over a legal person or arrangement"

The INT Manual provides:

> **INTM332010 Double Taxation Claims And Applications: What Beneficial Ownership Is** [Jun 2016]
> Beneficial ownership can be defined as: 'the sole and unfettered right to use enjoy or dispose of' the asset or income in question.

This is not an accurate definition, though it may be a usable rule of thumb.

108.10.5 *Beneficial owner: agent/nominee*

OECD Commentary on art 11 provides:

> 10. Relief or exemption in respect of an item of income is granted by the State of source to a resident of the other Contracting State to avoid in whole or in part the double taxation that would otherwise arise from the concurrent taxation of that income by the State of residence. Where an item of income is paid to a resident of a Contracting State acting in the capacity of agent or nominee it would be inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption merely on account of the status of the direct recipient of the income as a resident of the other Contracting State. The direct recipient of the income in this situation qualifies as a resident but no potential double taxation arises as a consequence of that status since the recipient is not treated as the owner of the income for tax purposes in the State of residence.

That is not controversial; now comes the extended meaning to catch conduit companies:

108.10.6 *Beneficial owner: Conduit co*

OECD Commentary on art 11 provides:

> 10.1 It would be equally inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption where a resident of a Contracting State, otherwise than through an agency or nominee relationship, simply acts as a conduit for another person who in fact receives the benefit of the income concerned. For these reasons, the report from the Committee on Fiscal Affairs entitled "Double Taxation Conventions and the Use of Conduit Companies" concludes that a

> conduit company cannot normally be regarded as the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties.
>
> 10.2 In these various examples (agent, nominee, conduit company acting as a fiduciary or administrator), the direct recipient of the interest is not the "beneficial owner" because that recipient's right to use and enjoy the interest is constrained by a contractual or legal obligation to pass on the payment received to another person.
>
> Such an obligation will normally derive from relevant legal documents but may also be found to exist on the basis of facts and circumstances showing that, in substance, the recipient clearly does not have the right to use and enjoy the interest unconstrained by a contractual or legal obligation to pass on the payment received to another person. This type of obligation would not include contractual or legal obligations that are not dependent on the receipt of the payment by the direct recipient such as
>
> [1] an obligation that is not dependent on the receipt of the payment and which the direct recipient has as a debtor or as a party to financial transactions, or
>
> [2] typical distribution obligations of pension schemes and of collective investment vehicles entitled to treaty benefits under the principles of paragraphs 22 to 48 of the Commentary on Article 1.
>
> Where the recipient of interest does have the right to use and enjoy the interest unconstrained by a contractual or legal obligation to pass on the payment received to another person, the recipient is the "beneficial owner" of that interest. It should also be noted that Article 11 refers to the beneficial owner of interest as opposed to the owner of the debt-claim with respect to which the interest is paid, which may be different in some cases.

This passage was added to the OECD Commentary in 2003. But there is some tension if not inconsistency in saying:

(1) a company is not the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties; but

(2) This type of obligation would not include contractual or legal obligations that are not dependent on the receipt of the payment by the direct recipient such as

  (a) an obligation that is not dependent on the receipt of the payment and which the direct recipient has as a debtor or as a party to financial transactions, or

(b) typical distribution obligations of pension schemes and of collective investment vehicles

108.10.7 *Indofood*

In *Indofood*,[103] a company ("the Indonesian co") wished to borrow by issuing loan notes to investors ("noteholders") not resident in Indonesia. Had it done so itself, it would be obliged to deduct 20% withholding tax from (Indonesian-source) interest payable to the noteholders. So instead:

(1) A subsidiary in Mauritius ("the Mauritian SPV[104]") issued the loan notes.
(2) The Mauritian SPV lent the capital it raised to the Indonesian co.
(3) The Indonesian co paid (Indonesian-source) interest to the Mauritian SPV, but under the Indonesia/Mauritius DTA (which was so far as relevant in OECD Model form)[105] the rate of withholding tax on the interest was reduced to 10%.

This was a standard conduit arrangement. All went well until Indonesia decided to revoke the Mauritian DTA. In consequence the withholding tax on interest paid from the Indonesian co to the Mauritian SPV would increase to 20%.

The loan notes could be redeemed early if:

(1) There were a change in the law under which withholding tax on from interest payable from the Indonesian co to the Mauritian SPV exceeded 10%; and
(2) The withholding tax could not be avoided by taking "reasonable measures".

The noteholders[106] argued that the reasonable measure was an arrangement under which:

(1) The Mauritian SPV assigned the benefit of the debt to a new Netherlands company, ("the Dutch SPV"), in consideration of a new debt.

[103] *Indofood International Finance v JP Morgan Chase Bank* [2006] EWCA Civ 158.

[104] SPV is (as is often in this context) a euphemism for conduit company; but I use the more neutral term.

[105] See 26.27 (DT relief: Interest income).

[106] For completeness: the noteholders were represented by JP Morgan as trustee, but nothing turns on that so I refer to the noteholders.

(2) The Indonesian company would pay interest to the Dutch SPV. The Netherlands/Indonesia DTA was also (so far as relevant) in OECD Model form, so the rate of withholding tax should remain 10%.
(3) The Dutch SPV would pay interest to the Mauritian SPV, which would then pay the noteholders.

In short, this was the same conduit arrangement as before, but using a group company in the Netherlands rather than Mauritius, as the conduit company.

The question therefore arose whether the Dutch SPV would be the beneficial owner of the interest which the Indonesian co paid to it (ie whether the beneficial ownership requirement under the Netherlands/ Indonesia DTA was met. The CoA read the OECD Commentary and concluded that the beneficial ownership requirement would not be met:

> The fact that neither the Issuer [Mauritian SPV] nor Newco [the Dutch SPV] was or would be a trustee, agent or nominee for the noteholders or anyone else in relation to the interest receivable from the Parent Guarantor [the Indonesian co] is by no means conclusive. Nor is the absence of any entitlement of a noteholder to security over or right to call for the interest receivable from the Parent Guarantor. ... the term

> "beneficial owner" is to be given an international fiscal meaning not derived from the domestic laws of contracting states. As shown by those commentaries and observations, the concept of beneficial ownership is incompatible with that of the formal owner who does not have "the full privilege to directly benefit from the income"...

Turning to the facts:

> The legal, commercial and practical structure behind the loan notes is inconsistent with the concept that the Issuer or, if interposed, Newco could enjoy any such privilege. In accordance with the legal structure the Parent Guarantor is obliged to pay the interest two business days before the due date to the credit of an account nominated for the purpose by the Issuer. The Issuer is obliged to pay the interest due to the noteholders one business day before the due date to the account specified by the Principal Paying Agent. The Principal Paying Agent is bound to pay the noteholders on the due date. It is hard to see how Newco could be interposed in that chain without some change to the Loan Agreement, but, be that as it may, the Issuer is bound to pay on to the Principal Paying Agent that which it received from the Parent Guarantor because it is precluded from finding the money from any other source by the Note Conditions ...

Applying the law to these facts:

> But the meaning to be given to the phrase "beneficial owner" is plainly not to be limited by so technical and legal an approach. Regard is to be had to the substance of the matter. In both commercial and practical terms the Issuer is, and Newco would be, bound to pay on to the Principal Paying Agent that which it receives from the Parent Guarantor. ... In practical terms it is impossible to conceive of any circumstances in which either the Issuer or Newco could derive any 'direct benefit' from the interest payable by the Parent Guarantor except by funding its liability to the Principal Paying Agent or Issuer respectively. Such an exception can hardly be described as the 'full privilege' needed to qualify as the beneficial owner, rather the position of the Issuer and Newco equates to that of an "administrator of the income".

This was consistent with the purpose of a DTA:

> Such a conclusion appears to me to be consistent with the evident purpose and object of the Mauritian DTA and the Dutch DTA. Their primary purpose is apparent from their respective titles. Accepting that the Dutch DTA also had as its object the encouragement of long term foreign loans, hence the inclusion of Article 11.4, none of such purposes

> is furthered by affording tax relief to the Parent Guarantor because it has a Mauritian or Dutch Subsidiary when such relief would not have been afforded to the Parent Guarantor had the loan been made direct to it.[107]

It followed that the *original* structure should also not have worked: the Mauritian SPV was also not beneficial owner of the Indonesia-source interest. But there it is. The practice of the Indonesian Revenue had changed by the time the use of the Dutch SPV was proposed. No doubt at some point HMRC's own practice changed in the same way.

Would outcome have been different if the noteholders had offered to guarantee the Indonesian co's costs of trying out the proposed arrangement? It should have been easier to argue that was a reasonable measure, if it did not cost the Indonesian company anything. And how should loan note documentation be drafted if it is desired to address this issue in the light of *Indofood*? Discuss.

HMRC naturally approve of the *Indofood* decision. The INT Manual provides:

> **INTM332050 HMRC Reaction To Indofood Case** [Jun 2018]
> 1 As can be seen from the above, the Court did not interpret the various DTAs in the light of Indonesian law but adopted an interpretation consistent with OECD interpretations. Following legal advice, HMRC's view is that the "beneficial ownership" decision, as far as it relates to Double Taxation Conventions (DTCs), is now part of UK law.

More analytically, the decision is one of fact, not law (namely, how would Indonesian Court decide the matter?); so it is persuasive rather than binding in the UK. However the UK courts can be expected to follow this, so the matter is settled below the level of the Supreme Court.

> The decision is also likely to be of persuasive force where related issues for UK DTCs are being considered and that, where it is relevant, HMRC is obliged to follow it. Since the Court of Appeal decision is fully consistent with the UK's existing policy HMRC does not think that, in general, the case will have a significant impact on its current practice.

HMRC summarise the decision thus:

> 2 The key point is that, in Indofood, the Court of Appeal has simply confirmed that, in line with the OECD Commentary, beneficial ownership "should be understood in its context and in light of the object

[107] *Indofood* para [42] - [45].

> and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance" and that tests of the legal structure, and of the commercial and practical substance of the scheme, should be adopted to determine beneficial ownership. The Court of Appeal decision is consistent with HMRC's view of all DTC articles referring to beneficial ownership. This covers the Articles on interest, royalties and if appropriate dividends. The comments made in this guidance regarding interest will also apply to royalty and dividend payments.
> 3 It is HMRC policy that, where there is treaty abuse (such as, say, "treaty shopping"), interpreting "beneficial ownership" in what the Court of Appeal called its "narrow technical" UK domestic law meaning would not give effect to the purpose and object of the DTC of preventing fiscal evasion, indeed it would be contrary to the object of the DTC to allow such treaty abuse. On the other hand, interpreting "beneficial ownership" in what the Court of Appeal called its "international fiscal meaning" clearly gives effect to the purpose and object of the DTC by excluding abusive cases such as "treaty shopping" from the benefits of a DTC.

108.10.8 *Beneficial ownership: EU law*

Art 1(1) Interest and Royalties Directive[108] provides:

> Interest or royalty payments arising in a Member State shall be exempt from any taxes imposed on those payments in that State ... provided that the beneficial owner of the interest or royalties is
> [a] a company of another Member State or
> [b] a permanent establishment situated in another Member State of a company of a Member State.

In this case (unlike the OECD Model) there is a definition of beneficial ownership. Article 1(4) IRD provides:

> A company of a Member State shall be treated as the beneficial owner of interest or royalties only if it receives those payments for its own benefit and not as an intermediary, such as an agent, trustee or authorised signatory, for some other person.

Perhaps this does not take us far.

CJEU compared the different language versions of the directive, which express the beneficial ownership condition in different ways, whose

[108] 2003/49/EC (3 June 2003).

English equivalents are given as:

- Beneficiary/recipient[109]
- Beneficial owner/actual beneficiary[110]
- Owner/person entitled to use[111]
- Person entitled in the end[112]

CJEU said:

> The use of those various expressions underscores that the term ‘beneficial owner’ concerns not a formally identified recipient but rather the entity which benefits economically from the interest received and accordingly has the power freely to determine the use to which it is put...

Apart from the Dutch version, perhaps, the reader may question that reasoning; but there it is.

> 90 ... the directive draws upon Article 11 of the OECD 1996 Model Tax Convention and pursues the same objective, namely avoiding international double taxation. The concept of ‘beneficial owner’, which appears in the bilateral conventions based on that model, and the successive amendments of that model and of the commentaries relating thereto are, therefore, relevant when interpreting Directive 2003/49.
> 92 It is clear from the development ... of the OECD Model Tax Convention and the commentaries relating thereto that the concept of ‘beneficial owner’ excludes conduit companies and must be understood not in a narrow technical sense but as having a meaning that enables double taxation to be avoided and tax evasion and avoidance to be prevented.
> ... Article 1(1) of Directive 2003/49, read in conjunction with Article 1(4) thereof, must be interpreted as meaning that the exemption of interest payments from any taxes that is provided for by it is restricted solely to the beneficial owners of such interest, that is to say, the entities which actually benefit from that interest economically and accordingly have the power freely to determine the use to which it is put.

In principle this should be welcomed, as the fewer concepts of Beneficial Ownership, the better.

108.10.9 *Abuse of rights*

CJEU continue:

> The general principle of EU law that EU law cannot be relied on for abusive or fraudulent ends must be interpreted as meaning that, where there is a fraudulent or abusive practice, the national authorities and courts are to refuse a taxpayer the exemption of interest payments from any taxes that is provided for in Article 1(1) of Directive 2003/49, even if there are no domestic or agreement-based provisions providing for such a refusal.
>
> 127 A group of companies may be regarded as being an artificial arrangement where it is not set up for reasons that reflect economic reality, its structure is purely one of form and its principal objective or one of its principal objectives is to obtain a tax advantage running counter to the aim or purpose of the applicable tax law. That is so inter alia where, on account of a conduit entity interposed in the structure of the group between the company that pays interest and the entity which is its beneficial owner, payment of the tax on the interest is avoided.
>
> 128 Thus, it is an indication of the existence of an arrangement intended to obtain improper entitlement to the exemption provided for in Article 1(1) of Directive 2003/49 that all or almost all of the aforesaid interest is, very soon after its receipt, passed on by the company that has received it to entities which do not fulfil the conditions for the application of Directive 2003/49, either because those entities are not established in any Member State, or because they are not incorporated in one of the forms referred to in the annex to the directive, or because they are not subject to one of the taxes listed in Article 3(a)(iii) of the directive without being exempt, or because they do not have the status of associated company within the meaning of Article 3(b) of the directive.

108.10.10 *Beneficial owner/abuse compared*

CJEU continue:

> 131 The fact that a company acts as a conduit company may be established where its sole activity is the receipt of interest and its transmission to the beneficial owner or to other conduit companies. The absence of actual economic activity must, in the light of the specific features of the economic activity in question, be inferred from an analysis of all the relevant factors relating, in particular, to the management of the company, to its balance sheet, to the structure of its costs and to expenditure actually incurred, to the staff that it employs and to the premises and equipment that it has.

> 132 Indications of an artificial arrangement may also be constituted by the various contracts existing between the companies involved in the financial transactions at issue, giving rise to intragroup flows of funds which, as is mentioned in Article 4 of Directive 2003/49, may have the aim of transferring profits from a profit-making commercial company to shareholding entities in order to avoid the tax burden or reduce it as much as possible. The way in which the transactions are financed, the valuation of the intermediary companies' equity and the conduit companies' inability to have economic use of the interest received may also be used as indications of such an arrangement. In this connection, such indications are capable of being constituted not only by a contractual or legal obligation of the company receiving interest to pass it on to a third party but also by the fact that, 'in substance', ... that company, without being bound by such a contractual or legal obligation, does not have the right to use and enjoy those sums.
>
> 133 Moreover, such indications may be reinforced by the simultaneity or closeness in time of, on the one hand, the entry into force of major new tax legislation, such as the Danish legislation at issue in the main proceedings, which some of the groups of companies strive to circumvent and, on the other hand, the setting up of complex financial transactions and the grant of intragroup loans.

CFE say:

25. The concepts of beneficial ownership and abuse of law are intertwined in the Court's analysis. This may not seem surprising at first, considering the indubitable purpose of the beneficial ownership concept in tax treaties to counter some specific forms of tax avoidance, i.e., "those involving the interposition of a recipient who is obliged to pass on the interest to someone else".[113] Just like in the OECD MC, however, the "beneficial ownership" concept merely aims at avoiding specific types of abuses and not all possible avoidance structures. As pointed out by AG Kokott, the concerns addressed by the abuse concept and the beneficial ownership concept are fundamentally different,[114] and also the Court appears to recognize the difference between both concepts at certain stages of its analysis, making it clear that denial of a benefit based on a lack of "beneficial ownership" (e.g., because the beneficial owner is an entity resident in a non-EU Member State) does not require tax authorities to prove abuse of law.[115] That seems to be a reasonable understanding of the IRD, which explicitly contains a "beneficial owner" requirement, but needs some purposive interpretation of the PSD, which does not explicitly contain such

[113] Footnote original: See, e.g., Art 11 no. 10.3 OECD MC Comm. 2017.

[114] Footnote original: See, e.g., the Opinion of AG Kokott in *N Luxembourg 1* (C-115/16), para. 60.

[115] Footnote original: See *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 138, and *T Danmark et al* (C-116/16 and C-117/16), para. 111.

a requirement. Essentially avoiding the Danish court's question whether the tax treaty concept of beneficial ownership can constitute a legal basis for combating fraudulent and abusive practices in the context of (old) Art 1(2) PSD,[116] the Court took a different path from AG Kokott's Opinions[117] and seems to assume that a "beneficial owner" requirement is implicit in the PSD as stand-alone anti-avoidance tool.[118] Even in non-abuse situations, therefore, the PSD's withholding tax exemption in the source Member State would not be applicable if the "beneficial owner" of a dividend resides outside the EU. The Court finds support for that conclusion based on the aim of the PSD to avoid double taxation of profit distributions within the EU[119] and moreover ensures teleological consistency between the IRD and the PSD despite their different wording and definitions.

26. However, "beneficial ownership"-related elements also found their way into the Court's list of indicative criteria for abuse. As for "beneficial ownership" the Court confined itself to the statement that it is an economic concept denoting the "entity which benefits economically from the interest received and accordingly has the power freely to determine the use to which it is put".[120] The Court's subsequent analysis regarding the constituent elements of abuse of rights also employs some similar notions – e.g., the reference to "the conduit companies' inability to have economic use of the interest received"[121] or "that all or almost all of the aforesaid interest is, very soon after its receipt, passed on by the company that has received it to entities which do not fulfil the conditions

[116] Footnote original: *T Danmark et al* (C-116/16 and C-117/16), para. 93.

[117] Footnote original: See the Opinions of AG Kokott of 1 March 2018 in C-116/16 (*T Danmark*, EU:C:2018:144, paras 78-86) and C-117/16 (*Y Denmark*, EU:C:2018:145, paras 78-86).

[118] Footnote original: *T Danmark et al* (C-116/16 and C-117/16), para. 111 ("[W]here the beneficial owner of dividends paid is resident for tax purposes in a third State, refusal of the exemption provided for in Article 5 of [the PSD] is not in any way subject to fraud or an abuse of rights being found").

[119] Footnote original: See *T Danmark et al* (C-116/16 and C-117/16), para. 113: "The mechanisms of Directive 90/435, in particular Article 5, are therefore intended for situations in which, if they were not applied, the exercise by the Member States of their powers of taxation might lead to the profits distributed by the subsidiary to its parent company being subject to double taxation […]. Such mechanisms are not, on the other hand, intended to apply when the beneficial owner of the dividends is a company resident for tax purposes outside the European Union since, in such a case, exemption of those dividends from withholding tax in the Member State from which they are paid could well result in them not actually being taxed in the European Union." It might be noted in passing that this argument is not fully intuitive, as the PSD would always lead to non-taxation of the distribution (if the parent company's Member State has chosen the exemption method under Art 4 PSD); what the Court seems to imply is that a withholding tax exemption in a Member State should not economically benefit a third State.

[120] Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 89.

[121] Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 132.

for the [IRD]"[122] – but moreover refers to the situation of a recipient company that does not "in substance" have the right to use and enjoy the sum it received: Indications for abuse "are capable of being constituted not only by a contractual or legal obligation of the company receiving interest to pass it on to a third party but also by the fact that, 'in substance' […] that company, without being bound by such a contractual or legal obligation, does not have the right to use and enjoy those sums."[123] This ostensibly goes beyond the OECD MC Commentary's guidance on "beneficial ownership" since the 2014 Update, which confines the denial of treaty benefits to situations where such contractual or legal obligation exists.[124] While that conclusion would normally derive from relevant legal documents, it "may also be found to exist on the basis of facts and circumstances showing that, in substance, the recipient clearly does not have the right to use and enjoy the interest unconstrained by a contractual or legal obligation to pass on the payment received to another person".[125] While the latter "in substance"-determination under the OECD MC might reasonably be understood as a mere procedural standard of proof, the context of the Court's inquiry suggests that it did not interpret the concept of beneficial ownership in this context but rather within the concept of artificial arrangements. As a result, this may be best understood as clarifying the relationship between beneficial ownership and the abuse of law: An entity may well be the beneficial owner (as interpreted in conformity, most likely, with the OECD material), yet still be denied the directive's benefits due to the artificiality of the legal structure.

27. As for the constituent elements of an abuse of rights and the relevant evidence, it is quite surprising that the Court refrained from utilizing its recent decisions on the concept of abuse in the PSD in *Eqiom*[126] and *Deister and Juhler*.[127] Possibly creating "new" standards that foreshadow the imminent interpretation of the GAAR in Art 6 ATAD and the minimum anti-avoidance standard in (new) Art 1(2), (3) PSD, the Court identifies a set of indicia that national courts must take into account in assessing whether a transaction abusive.[128] Those criteria include the conduit role of an entity, lack of economic substance

and exercise of very limited activities (to be inferred from an analysis of all the relevant facts, including the management of the company, the cost structure, the presence of staff, premises and equipment) and that the structure was put in place simultaneously or shortly after the introduction of changes in the tax laws of the source EU Member State or any other (third) State.[129] Needless to say, all those criteria on one hand may help national courts to identify abusive situations but, on the other hand, they are necessarily vague and may lead to quite some uncertainty going forward.

28. It seems, moreover, that the Court wanted to put a "sword" in the hands of national tax authorities also with regard to the allocation of the burden of proof:

a. First, the Court was rather reluctant to fully embrace the obvious argument that no abuse exists where the same tax burden would result without the interposition of EU intermediary companies because a tax treaty would grant the same benefits also to the "direct" third-State recipients[130] (and the corresponding reasoning of AG Kokott).[131] It is, however, hard to see how a "tax advantage" (as required by the general principle as well as, e.g., by Art 6 ATAD) would be obtained if the "genuine" arrangement, e.g. direct ownership, would have triggered the same (low) tax burden in the source State.[132] The Court seems to recognize that argument half-heartedly by noting that "it remains possible, in a situation where the interest would have been exempt had it been paid directly to the company having its seat in a third State, that the aim of the group's structure is unconnected with any abuse of rights. In such a case, the group cannot be reproached for having chosen such a structure rather than direct payment of the interest to that company".[133] Moreover, the Court had also noted the different effects of the beneficial ownership requirement and the anti-abuse principle, as – irrespective of any finding of fraud or abuse – "beneficial owners" in third states are not beneficiaries of the IRD in the

[129] Footnote original: See *T Danmark et al* (C-116/16 and C-117/16), para. 106, referring to the United States legislation under the 2004 American Jobs Creation Act, which temporarily provided for a favorable repatriation of foreign profits.

[130] Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), paras 134-137, and *T Danmark et al* (C-116/16 and C117/16), paras 107-110.

[131] Footnote original: See the Opinions of AG Kokott of 1 March 2018 in C-115/16 (*N Luxembourg 1*, EU:C:2018:143, para. 96), C-118/16 (*X Denmark*, EU:C:2018:146, para. 105), C-119/16 (*C Danmark I*, EU:C:2018:147, para. 94), and C 299/16 (*Z Denmark*, EU:C:2018:148, para. 96) and in C-116/16 (*T Danmark*, EU:C:2018:144, paras 87-92) and C-117/16 (*Y Denmark*, EU:C:2018:145, paras 87-92).

[133] Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 137.

first place.[134]

b. Second, the Court found that the tax authorities are not even required to identify the entity which they regard to be the beneficial owner[135] (again departing from AG Kokott's conclusions).[136] The Court based that latter conclusion on the fact that "the national tax authority does not necessarily have information enabling it to identify those owners" so that it "cannot be required to furnish evidence that would be impossible for it to provide";[137] and even if they were known, said the Court, "it is not necessarily established which of them are or will be the actual beneficial owners".[138] That said, it is not entirely clear if the taxpayers could nevertheless show – in line with their burden of proof[139] – who the beneficial owner really is and claim corresponding benefits. Assume, for example, that the beneficial owner is a qualified EU company on top of a chain of (artificially interposed) third-State and EU-entities. In that case the Court – in line with the current OECD MC Commentaries[140] – clearly prefers an approach that "ignores" the non-beneficial owners and grants the IRD's benefits if the beneficial owner is indeed a qualified EU company.[141] [142]

[134] Footnote original: See *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 138.

108.10.11 *Beneficial owner in treaty State*

CJEU continue:

> 134 The referring courts are also unsure, in essence, whether there can be an abuse of rights where the beneficial owner of interest transferred by conduit companies is ultimately a company whose seat is in a third State with which the source Member State has concluded a tax convention under which no tax would have been withheld on the interest if the interest had been paid directly to the company having its seat in that third State.
>
> 135 In that regard, when examining the structure of the group it is immaterial that some of the beneficial owners of the interest paid by the conduit company are resident for tax purposes in a third State which has concluded a double taxation convention with the source Member State. The existence of such a convention cannot in itself rule out an abuse of rights. Thus, a convention of that kind cannot call into question that there is an abuse of rights where its existence is duly established on the basis of a set of facts showing that economic operators have carried out purely formal or artificial transactions devoid of any economic and commercial justification, with the essential aim of benefiting improperly from the exemption from any taxes that is provided for in Article 1(1) of Directive 2003/49.
>
> 136 It should be added that, whilst taxation must correspond to economic reality, the existence of a double taxation convention is not, as such, capable of establishing that a payment was really made to recipients resident in the third State with which that convention has been concluded. If the company owing the interest wishes to benefit from the advantages of such a convention, it is open to it to pay the interest directly to the entities that are resident for tax purposes in a State which has concluded a double taxation convention with the source State.
>
> 137 That said, it remains possible, in a situation where the interest would have been exempt had it been paid directly to the company having its seat in a third State, that the aim of the group's structure is unconnected with any abuse of rights. In such a case, the group cannot be reproached for having chosen such a structure rather than direct payment of the interest to that company.
>
> 138 Furthermore, where the beneficial owner of interest paid is resident for tax purposes in a third State, refusal of the exemption provided for in Article 1(1) of Directive 2003/49 is not in any way subject to fraud or an abuse of rights being found. As has been stated, in essence, in paragraph 86 above, that provision is designed to exempt interest payments in the source Member State only where the beneficial owner of the interest is

> a company established in another Member State or a permanent establishment situated in another Member State belonging to a company of a Member State.[143]

108.10.12 *Beneficial ownership: Transparent entity*

What is required is beneficial ownership of the dividend/interest/royalty; not beneficial ownership of the underlying shares/loan/intellectual property. See too 91.6.2 (Hybrid is nominee/agent).

108.11 Bona fide conduit co

The INT Manual provides:

> **INTM332050 HMRC Reaction To Indofood Case** [Jun 2018]
> 4 Although, in the context of DTCs, beneficial ownership will take what the Court of Appeal decision accepted as an "international fiscal meaning" rather than a UK domestic meaning, in HMRC's view there are unlikely to be many cases where the difference is material.

The reader may wonder about point 4. The next para of the INT Manual observes that "Many capital market transactions involve SPVs which may not satisfy the test of beneficial ownership under an international fiscal meaning." But the author is anticipating the passage which follows:

> ... The issue would only arise when the substance of an arrangement amounts to an improper use of the relevant DTC in the light of the DTC's object of prevention of fiscal evasion and avoidance, for example "treaty shopping". Treaty shopping is only likely to take place
> [1] where the "real" beneficial owner of the income, such as "the immediate underlying lender" in the case of interest, is resident in a state with which the UK has either no DTC or a DTC less favourable than the DTC applicable to the intermediate lender, or
> [2] if the recipient of an income stream into which an intermediate lender has been interposed is resident in such a state (regardless of whether they themselves are the beneficial owner).
> These are the only situations where HMRC believe further consideration of the "international fiscal meaning" will be needed.
> 5 Where both the intermediate and the underlying lender are resident in

[143] *Skatteministeriet v Danmark* C-115/16. See CFE Opinion Statement ECJ-TF 2/2019 *https://taxadviserseurope.org/new_ahgency/wp-content/uploads/2019/06/ECJ-TF_2-2019_Beneficial-Ownership.pdf*

states with which the UK has essentially similar DTCs, no issue is likely to arise, even where the intermediate lender is not, under the so called "international fiscal meaning" of the phrase, the beneficial owner of the interest, as there would be no fiscal evasion or avoidance. This is because in these circumstances it is unlikely that the effect of the arrangement is the avoidance of UK withholding tax, since the level of UK withholding tax would have been the same with or without the intermediate lending.

INTM332060 Indofood: Impact On Particular Cases [Jun 2018]
1 Many capital market transactions involve SPVs which may not satisfy the test of beneficial ownership under an "international fiscal meaning". Securitisation programmes, for example, in respect of mortgage backed loans and other debt receivables are commonplace ways of raising finance. Typically such programmes involve a SPV which issues bonds to third party investors and employs the proceeds from the bonds to purchase the receivables or debt secured on the receivables (see below where these are quoted Eurobonds). The SPV is typically required to pass on the income received from the underlying assets to the bondholders (subject to hedging arrangements and less a small spread to cover fees etc). Where the SPV is resident outside the UK, an application will have to be made by the non-resident to enable the interest that is backed by the receivables to be paid gross to the SPV. The SPV in such an arrangement may not be the beneficial owner of the income under the international fiscal meaning; it often has very narrow powers over the income and its obligations to the bondholder mean that it is unlikely to 'enjoy the full privilege to directly benefit from the income'.
2 However, as indicated above in applying the beneficial ownership concept in the context of Double Taxation Conventions (DTCs), regard should be had to the objective of the DTC. Where there is no abuse of the DTC, there is no need, in practice, to apply the "international fiscal meaning" of beneficial ownership. The object of the treaty is likely to be met just as easily using the UK domestic law meaning of beneficial ownership.
3 HMRC will also accept that there is no need to invoke the "international fiscal meaning" of beneficial ownership to deny treaty benefits where the lender receiving income directly from the SPV (the "true" beneficial owner of the interest) would, if they had been the direct recipient of the interest, have been entitled to treaty benefits as a resident of a state with which the UK has a DTC with zero withholding on

> interest. It is not necessary for the beneficial [owner[144]] in this scenario to have made a formal claim for treaty benefits in order to assess what entitlement to claim would have arisen.

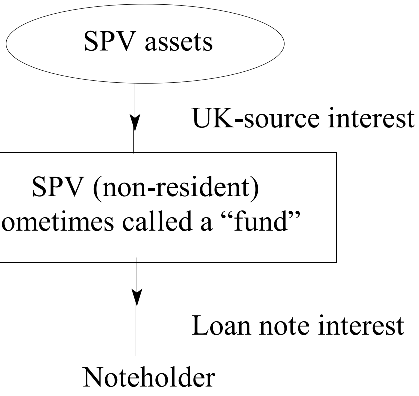
So HMRC allow the 3 beneficial-owner reliefs to a company where:

(1) The company is the beneficial owner in the English law sense (equitable ownership)
(2) The person is not the beneficial owner (in the DTA sense) but
(3) There is no treaty abuse

In the following discussion, I refer to the company as the **"bona fide conduit company"**, and the practice is the **"bona fide conduit concession"**.

The reader may think it a flaw in the *Indofood* decision that it did not mention these difficulties; but there it is.

The examples which follow concern the following structure (or some variant):



108.11.1 *Eurobonds*

The INT Manual continues:

> 1 Many of the transactions involve SPVs issuing Quoted Eurobonds. No UK withholding tax is payable on interest from Quoted Eurobonds so no treaty claim is needed.
> 2 HMRC therefore accept that the question of invoking the "international fiscal meaning" of beneficial ownership to deny treaty benefits will not arise where the bond issued by the non-resident SPV is a Eurobond as defined in ITA07/S987.

[144] The original erroneously reads: lender.

One might have thought that what matters is whether the bonds *acquired* by the SPV are Eurobonds (not the bond *issued* by the SPV). It is interest paid to the SPV frm the SPV assets which require withholding tax relief of one kind or another. Clearly if the SPV assets are quoted Eurobonds, which are not subject to withholding tax,[145] the issue of DTA relief does not arise.

108.11.2 *Fund investing in UK loans*

The INT Manual continues:

> 1 A recent capital market development has been the establishment of various types of European-based funds that purchase loans to UK borrowers. Funds of this type include Collateralised Debt Obligations (CDOs) and Collateralised Loan Obligations (CLOs) in addition to mezzanine funds. They will typically own a portfolio of assets and issue several classes of securities whose performance reflects the performance of the underlying assets. For a number of reasons such funds may not be resident in the UK. They are therefore required to make treaty applications to receive the interest of the purchased loan assets without deduction of tax.
> 2 As with securitisation SPVs, many of these arrangements may not satisfy the test of beneficial ownership under an "international fiscal meaning". The fund often has very narrow powers over the income and its obligations to the investors in the securities mean that it is unlikely to 'enjoy the full privilege to directly benefit from the income'. It may therefore appear that such funds would be denied treaty benefits under the "international fiscal meaning" of beneficial ownership.
> 3 However, as indicated above, [the bona fide conduit concession] in applying the beneficial ownership concept in the context of DTCs regard should be had to the object of the DTC. Where there is no abuse of the DTC, there is no need, in practice, to apply the "international fiscal meaning" of beneficial ownership. The object of the treaty is likely to be met just as easily using the UK domestic meaning.
> 4 As with securitisation SPVs, many of these types of transactions involve Quoted Eurobonds. For the reasons set out above, the intervention of the non-UK SPV does not reduce the level of UK withholding tax. HMRC will therefore accept that there is no need to invoke the "international fiscal meaning" of beneficial ownership to deny treaty benefits where the bond issued by the non-resident SPV is a Quoted Eurobond as defined in ITAO7/S987.

108.11.3 *Syndication/sub-participation*

The INT Manual continues:

> 1 A loan which is made as a normal part of banking business and which is subsequently subject to sub-participation, again in the ordinary course of banking business, is unlikely to have been so structured with the aim of taking advantage of treaty benefits. Subsequent participation will not cause HMRC to change its view on the application of the

[145] See 26.23.7 (Quoted Eurobond).

"international fiscal meaning" to the original lending.
2 However treaty abuse would arise where lenders who would not be entitled to treaty benefits, arrange for the loan to be initiated via a bank lender in a treaty country. HMRC does not consider this to be normal commercial syndication as part of the ordinary course of banking business - the interposition of the bank lender merely serves to gain treaty benefits that would not otherwise have accrued.
3 Examples of the application of the HMRC view are included at INTM332080. These are illustrative only and should not be taken as limiting the circumstances in which HMRC will apply the "international definition".
4 The general principle underlying HMRC interpretation is that treaty abuse will not normally arise where the interposition of an intermediate lender would not improve the withholding tax position of interest paid by the UK borrower, when compared to the withholding tax that would have arisen had that intermediate lender not been interposed. Cases falling outside the examples would need to be considered on an individual basis.

108.11.4 *Claims for DTA relief*

> **INTM332070 DT Applications And Claims: Indofood: Existing And New Cases** [May 2019]
> 1 Where structures are within the ambit of the Indofood decision, that is to say the structure has the accessing of treaty benefits as one of its effects, it is possible that applications to HMRC for benefits under a Double Taxation Convention (DTC) will fall at the first hurdle unless the applicant can demonstrate beneficial ownership. The application might simply be regarded as invalid and never reach the stage where it can be considered in terms of the object and purpose of the particular DTC under which the application is made.
> 2 However, where the claimant Special Purpose Vehicle (SPV) does not satisfy the "international fiscal meaning" of beneficial ownership but believes that it is still able to obtain treaty benefits because of the policy confirmed in this guidance, it should make its claim and include a note to that effect. To ease consideration of the claim, the note should include full details as to
> - A full structure diagram and explanation of the capital and interest flows;
> - why the SPV is considered to be the beneficial owner within the "international fiscal meaning"; or
> - demonstrate that the structure does not abuse the DTC under which the claim is made either relating the structure to the examples at INTM332080 or otherwise.

HMRC give 8 examples:

No	Facts	Relief
1	Securitisation using offshore SPV funded by listed bonds	Yes
2	Securitisation using offshore SPV funded by listed bonds and UK bank debt	Yes

3	Securitisation using offshore SPV funded by listed bonds and unlisted debt from resident of a "zero rate country"	Yes
4	Securitisation of non-corporate assets using offshore SPV	Yes
5	Access to US commercial paper market using US SPV	Yes
6	Access to US commercial paper market using US and Irish SPVs	Yes
7	Access to group-sourced funding from Non treaty country using Lux. conduit co	No
8	Access to group-sourced funding from Treaty country using Lux. conduit co	Yes

INTM332080 Double Taxation Applications And Claims: Indofood: Examples Of Application [Jun 2018]

Example 1: Securitisation using offshore Special Purpose Vehicle (SPV) funded by listed bonds

As part of a securitisation arrangement, an SPV is established in Ireland. It purchases UK interest bearing receivables, funding itself with listed bonds which, if issued by a UK resident company, would qualify for exemption from withholding tax by virtue of the quoted Eurobond exemption at ITA07/S882.[146] The UK source interest is paid to the SPV which, in turn, pays interest to the bondholders who are resident in a variety of different countries.

The SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase because it has only narrow powers over the income and its obligations to the bondholders mean that it is unlikely to 'enjoy the full privilege to directly benefit from the income'.

But in these circumstances, it is unlikely that the purpose of the arrangement is the avoidance of UK with holding tax, since the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/Ireland Double Taxation Convention (DTC) which provide for a zero rate of UK withholding tax on interest) as it is without the SPV (nil because of ITA07/S882).

Accordingly HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase.

In considering the purpose and effect of the interposing of an SPV, it is also necessary to look at other costs and activities of the SPV. However, expenses which are derived from the financing but which are incidental to the purpose of that financing (such as hedging costs) will not affect the HMRC view set out in this guidance.

Example 2: Securitisation using offshore SPV funded by combination of listed bonds and UK bank debt

The facts are the same as Example 1 except that the SPV also issues unlisted debt which is held by a UK financial institution sponsor.

As in Example 1, it is unlikely that the purpose of the arrangement is the avoidance of UK withholding tax since, again, the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/Ireland DTC) as it is without the SPV (nil: partly because of ITA07/S882 [quoted Eurobond exemption] and partly because of

[146] See 108.11.1 (Eurobonds).

section ITA07/S879(1) [interest paid to UK bank].[147]

As in Example 1, the SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase. But, again, HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase.

Example 3: Securitisation using offshore SPV funded by combination of listed bonds and unlisted debt from resident of a "zero rate country"

The facts are the same as Example 1 except that the SPV also issues unlisted debt which is held by a US company.

As in Examples 1 and 2, the SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase.

As in Examples 1 and 2, it is unlikely that the purpose of the arrangement is the avoidance of UK withholding tax, since, again, the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/Ireland DTC) as it is without the SPV (nil: partly because of ITA07/S882 and partly because of the terms of the UK/US DTC which provide for a zero rate of UK withholding tax on interest).

But, again, HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the in come within the "international fiscal meaning" of that phrase.

Example 4: Securitisation of non-corporate assets using offshore SPV

The facts are the same as Example 1 except that the assets being securitised are loans made by a UK bank to a partnership.

As in Examples 1, 2 and 3, the SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase.

As in Examples 1, 2 and 3, it is unlikely that the purpose of the arrangement is the avoidance of UK with holding tax, since, again, the UK withholding tax on the UK source interest is the same with the SPV (nil be cause of the terms of the UK/Ireland DTC) as it is without the SPV (nil: partly because of ITA07/S882 and partly because of ITA07/S879(1) [quoted Eurobond exemption/interest paid to UK bank].

But, again, HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase. The above principles would apply equally to collateralised loan arrangements - or indeed to any interest-bearing loans where the question of UK with holding tax is unaffected by the interposition of the intermediate lender.

Example 5: Access to US commercial paper market using US SPV

A US SPV is established to provide non-US borrowers with access to the US commercial paper market. On the instructions of a UK borrower, it issues discounted paper and passes the funds on to the UK borrower by way of an interest-bearing loan.

The SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase because it has only narrow powers over the income and its obligations to the bondholders mean that it is unlikely to 'enjoy the full privilege to

[147] See 26.23.3 (Interest paid to UK bank).

directly benefit from the income'.

But in these circumstances, it is unlikely that the purpose of the arrangement is the avoidance of UK with holding tax, since the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/US DTC which provide for a zero rate of UK withholding tax on interest) as it is without the SPV (nil because there is no UK withholding tax on discounts). HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the "international fiscal meaning" of that phrase.

Example 6: Access to US commercial paper market using US and Irish SPVs

The facts are the same as in Example 5 except that the US SPV acts on instructions of an Irish SPV who is, in turn, acting for the UK borrower. The additional step is introduced to provide the UK borrower with the security that its funding needs will be met notwithstanding the state of the US market. To provide this security, the Irish SPV enters into arrangements with a UK bank that ensure the bank will provide funds if money cannot be raised at short notice from the US.

Neither SPV is beneficial owner of the relevant income within the "international fiscal meaning" of that phrase because both have only narrow powers over the income and their obligations to their creditors mean that they are unlikely to 'enjoy the full privilege to directly benefit from the income'.

But in these circumstances, it is unlikely that the purpose of the arrangement is the avoidance of UK with holding tax. The UK withholding tax on the UK source interest is the same with the SPVs (nil because of the terms of the UK/US and UK/Ireland DTCs which provide for a zero rate of UK withholding tax on interest) as it is without the SPVs (nil partly because there is no UK withholding tax on discounts and partly because of ITA07/S878(1). HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the Irish SPV on the grounds that it is not the beneficial owner of the in come within the "international fiscal meaning" of that phrase.

Example 7: Access to group-sourced funding from a Non treaty country using Luxembourg conduit company

A claim is made under the UK/Luxembourg DTA for relief from UK withholding tax in respect of a loan from a Luxembourg resident company (LuxCo) to a UK group borrower.

- LuxCo was set up (or has been maintained in the group) specifically to deal with this intra group loan and is taxed on a small "turn" for administering loans;
- the source of the loan is an affiliate in a territory with which the UK has no DTA (NoA Co)
- the NoA Co/LuxCo loan agreement shows that this interest bearing loan was predetermined to be on-lent to the UK
- similarly, the interest payable by the UK on its loan from LuxCo is predetermined to be passed on to NoA Co.

The conduit company is not beneficial owner of the relevant income within the "international fiscal meaning", because it has clear obligations to forward the interest to NoA Co.

The terms and conditions of the loan agreements show that the flow of income out of the UK is predestined to be passed on to NoA Co. It is clear that one of the main purposes of the Luxembourg company is to avoid the withholding tax which would be due on payments of interest to NoA Co. The interest will not benefit from the Luxembourg/UK treaty and tax will be withheld.

Example 8: Access to group-sourced funding from a Treaty country using Luxembourg conduit company

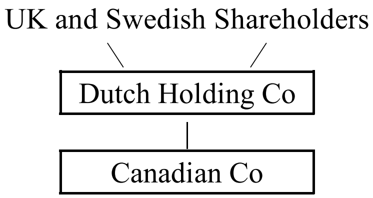
The facts are as in example 7 except that this time the source of the funds is a US taxpayer who receives interest directly from the Lux Company. If the interest had gone directly to the US recipient, it would have qualified for exemption under the US/UK treaty. Although the Lux Company will not satisfy the international fiscal meaning, this is irrelevant as its imposition into the arrangement does not affect the withholding tax position. The same conclusion could not be drawn if the US taxpayer had passed funds to a non treaty intermediary, which then lent the funds to the Lux Co.

108.12 Beneficial ownership: Canada

In Canada, treaty beneficial ownership has been understood more narrowly:

> In *Prévost Car Inc*,[148] the CRA challenged a treaty shopping case on the basis that a conduit entity was not the "beneficial owner" of the Canadian-source income on which treaty benefits were sought. The case involved dividends paid on the shares of a Canadian resident corporation that were held by a Dutch corporation which in turn was owned by corporate shareholders in Sweden and the UK.

Diagrammatically:



> The withholding tax rate on dividends paid to the Dutch holding company were lower than would have been the case had dividends been paid directly to the corporate shareholders in Sweden and the UK. Even though the terms of the shareholders agreement essentially required the Dutch holding company to pass through as dividends to its shareholders any dividends received from its Canadian subsidiary, the Tax Court found that the intermediary Dutch holding corporation was the beneficial owner of the dividends and the Federal Court of Appeal affirmed the Tax Court's interpretation of beneficial ownership.
>
> The narrow meaning ascribed to beneficial owner in *Prévost Car Inc* means that the beneficial ownership requirement in this context is not

[148] *Prévost Car Inc v The Queen* 2009 DTC 5053.

> sufficient to deny treaty benefits to an intermediary entity. In particular, even though the intermediary foreign holding company in this case was effectively a direct conduit (i.e., it did not pay tax on dividends received, distributed substantially all of its income to third country residents who owned it, and had no employees or activities other than with respect to the ownership of shares of a subsidiary), it was not denied treaty benefits on the basis of beneficial ownership.
>
> Similarly, the notion of beneficial owner was also argued by the Government in *Velcro Canada*[149] as the basis on which to deny treaty benefits in a treaty shopping case. In *Velcro Canada*, a corporation resident in the Netherlands Antilles, which would have been subject to a withholding tax rate in Canada of 25% on royalties paid by a Canadian company, incorporated an intermediary company in the Netherlands and essentially assigned to it the right to receive royalty payments from the Canadian company. The intermediary company in the Netherlands remitted 90% of the royalties received to its parent in the Netherland Antilles within 30 days, pursuant to a sub-licencing agreement between the Dutch intermediary and the Netherlands Antilles company. This was a classic "stepping stone" conduit structure.[150] The Government argued the case on the basis that the Dutch intermediary was not the beneficial owner of the royalties received. The court followed the decision in *Prévost Car Inc*.[151]

108.13 "Subject to tax"

Treaties occasionally provide exemption for income in one State only if it is "subject to tax" in the other State. This is not in OECD Model, and is only found in a diminishing number of treaties, but for instance Article XI(2) Israel/UK DTA formerly provided:

> Any pension ... derived from sources within the UK by an individual who is a resident of Israel and subject to Israel tax in respect thereof, shall be exempt from UK tax.[152]

[149] *Velcro Canada Inc v The Queen* 2012 DTC 1100.

[150] Footnote original: See OECD, "Double Taxation Conventions and the Use of Conduit Companies" (1986) para 4.

[151] Department of Finance Canada "Consultation Paper on Treaty Shopping – The Problem and Possible Solutions" (2013) *https://thor.ca/blog/wp-content/uploads/2013/08/Consultation-Paper-on-Treaty-Shopping.pdf*

[152] Under the 2019 Protocol, this has now been replaced by OECD model wording, resulting in double non-taxation of UK source pensions of residents in the foreign

In a treaty context, two issues may arise:

(1) Whether income is subject to UK tax, which matters in order to qualify for DT exemption in the foreign State

(2) Whether income is subject to foreign tax, which matters in order to qualify for DT exemption in the UK

Issue (1) would ultimately be decided by foreign tax authorities and courts, but the HMRC view of what counts as subject to UK tax may represent an international consensus.

108.13.1 *Subject to tax: History*

Avery Jones explains:

> The UK pioneered "subject to tax," including it in all its early treaties in relation to dividends, interest and royalties. The reason was not to cure the disconnect between the resident and the income but because of a quirk of UK tax law that would have enabled the UK to be used for what we would now call treaty shopping. In the absence of a subject to tax clause a resident of anywhere in the world (including a tax haven) could have held assets in the name of a UK resident nominee which would have enabled the taxpayer to have access to all the UK's tax treaties without paying any UK tax. This would have worked because of a combination of, first, the rule that a person receiving or entitled to income was taxable[153] ... thus making the nominee taxable in principle on account of receiving the income without being entitled to it.
>
> Secondly, just as a non-resident was not taxable on foreign income, a UK resident nominee for a non-resident was not taxable on foreign income either.[154]
>
> Thirdly, UK treaties defined resident for treaty purposes as a person who was resident in the UK and not resident in the other state, thus ducking the problem of dual residence.[155] The result was the same under the OEEC's definition of a resident as someone liable to tax as it did not then contain what is now the second sentence of Article 4(1) of the OECD Model,[156] which was not introduced until 1977.

treaty State. This is an example of intentional double non-taxation; see 107.6.2 (Acceptable double non-taxation).

[153] See 15.8 (Receipt by nominee/trustee).

[154] See 42.4 (Life tenant non-resident).

[155] See 9.29.2 (Residence: Pre-1963 DTAs).

[156] See 9.8 (Liable to source tax only). The OEEC (Organisation for European Economic Co-operation) became the OECD in 1961. OEEC's definition of

> Taking all three together resulted in the nominee being resident for the purposes of the treaty (either under the UK's usual [pre-1963] treaty definition, or under the OEEC's definition before the introduction of the second sentence). The ultimate recipient of the income would therefore have been entitled to the benefit of all UK treaties to reduce tax in the treaty partner state without actually being taxable on any such income in the UK because it was foreign income.
> Fortunately someone must have spotted this, and all UK treaties contained a subject to tax test for dividends, interest and royalties with the result that the treaty did not apply because the foreign dividends, interest and royalties were not subject to tax in the UK.[157]

The history does not much matter now. However this does explain what is otherwise puzzling, namely why "subject to tax" wording is found in pre-1977 treaties, but is (more or less) not found subsequently. The reason is that the wording was devised for a specifically UK problem, dealing with nominees, and since 1977 it ceased to be needed for that purpose.

108.13.2 *Subject to/liable: Ordinary meaning*

In ordinary speech, subject to tax and liable to tax are used synonymously, and the meaning is somewhat vague and context-dependent.

residence was (just about) the same as the first sentence of the OECD Model form. At first sight, a UK nominee for a non-resident principal would not be liable for tax "by reason of his residence". But there would be a possibility of a tax liability on foreign income which was not passed on to the principal, eg if retained for the nominees expenses. On that basis a UK nominee for a non-resident principal would be UK treaty-resident before the second sentence was introduced in 1977.

[157] Avery Jones, "Weiser v HMRC: why do we need 'liable to tax' and 'subject to tax' clauses?" [2013] BTR 9. Avery Jones discusses the point at greater length in "The Beneficial Ownership concept was never necessary in the Model", in Lang (ed) *Beneficial Ownership: Recent Trends* (2013).
Avery Jones continues with an intriguing comment: "Subject to tax is not a perfect solution because it prevents charities and pension funds from obtaining treaty benefits. Two solutions could deal with this. Either the second sentence of Article 4(1) of the OECD Model could be added, so that the nominee is no longer a treaty resident because he is not taxable on foreign income of a non-resident, coupled with the deletion of the subject to tax condition, which would enable charities and pension funds to qualify. Or, alternatively, "beneficial ownership" could be substituted for subject to tax, which would exclude nominees but include charities and pension funds. In fact, both solutions were adopted in the 1977 Model. Had anyone realised that the first alternative on its own would have sufficed we would not now still be arguing about the meaning of beneficial ownership."

In the context of the lower-paid employee exemption,[158] the RDR Manual provides:

> **RDRM0 - Remittance Basis: exemption for non-domiciles with small amounts of foreign employment income** [Jan 2019]
> *...Subject to Foreign Tax*
> Although 'subject to a foreign tax' might in some circumstances mean that the individual has actually paid some tax on the foreign income to a foreign tax authority, actual payment is not a necessary requirement to take advantage of this exemption.
> For example, given the levels of foreign income involved there might be nothing due to be paid on part or all of the income, as a result perhaps of a foreign countries' own personal allowances systems, or similar tax provisions which are akin to such allowances, such as a tax rate band of 0%. Such income would still be considered to be 'subject to a foreign tax' in the context of this exemption.

108.13.3 *Subject to/liable compared*

In a DTA context, subject to tax/liable to tax have distinct technical meanings, and discussion of one phrase sheds no light on the other. In *Weiser v HMRC*[159]:

> 22. ... There is, [counsel for HMRC] submitted, an internationally recognised distinction ... which gives the expression "liable to tax" a broader meaning that the expression "subject to tax"...
> 26. In *General Electric Pension Trust v Director of Income-tax* (2005) 8 ITLR 1053 ... Syed Shah Mohammed Quadri J said (at p 1061):
>
> > "It is worth pointing out that the phrase 'liable to tax' in para (1) and the phrase 'subject to tax' in proviso (b) are not synonymous. If both were read to be synonymous, proviso (b) would become otiose. Whereas para (1) speaks of being in the tax net, proviso (b) speaks of actual taxation."[160]

[158] See 34.42 (Lower-paid employee exemption).

[159] [2012] UKFTT 501 (TC).

[160] The definition provided: "For the purposes of this Convention, the term "resident of a Contracting State" means any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, citizenship, place of management, place of incorporation, or any other criterion of a similar nature, provided however, that
(a) this term does not include any person who is liable to tax in that State in respect only of income from sources in that State; and
(b) in the case of income derived or paid by a partnership, estate, or trust, this

> 34. ... the distinction that must in my view be drawn between the use, in double tax treaties, of the expressions "liable to tax" and "subject to tax" ...

For "liable to tax" see 9.5 ("Liable to tax");App.2.3 (Chargeable/liable to tax).

108.13.4 *Subject to tax: DTA meaning*

The INTM Manual provides:

> **INTM332210 Subject to tax: Background** [June 2018]
> The expression "subject to tax" usually means that the person must actually pay tax on the income in their country of residence.
> However, a person is still regarded as "subject to tax" if, for example, he or she does not pay tax because their income is sufficiently small that it is covered by personal allowances that are available to set against liability to tax in the other country.
> A person is not regarded as "subject to tax" if the income in question is exempted from tax because the law of the other country provides for statutory exemption from tax. For example
> - the income is that of a charity
> - the income is that of an exempt approved superannuation scheme (pension fund).
>
> In such cases the "subject to tax" condition is not met and relief is not allowable.[161]

term applies only to the extent that the income derived by such partnership, estate, or trust is subject to tax in that State as the income of a resident, either in its hands or in the hands of its partners or beneficiaries."

[161] In *Weiser v HMRC* the FTT agreed with this passage: [2012] UKFTT 501 (TC) at [38]. Similar points are made in INTM162090:

'Subject to tax' [Jan 2014]

... Examples of where the income is regarded as 'subject to tax' but on which no or little tax is actually paid may include the following:

- The customer does not pay any UK tax because their income is covered by personal allowances and reliefs.
- The foreign income arises in a penultimate year and no penultimate year adjustment is made, so the income falls out of assessment in the UK.
- The income is wholly covered by capital allowances so that no UK tax is payable.
- The customer is entitled to a deduction under ITEPA03/S341 or S376.
- The remittance basis applies: the person is subject to tax only on the sums remitted.

In *Weiser v HMRC*[162] the taxpayer (not represented by counsel) claimed relief under Art XI(2) Israel/UK DTA which is set out above. The taxpayer was treaty-resident in Israel but unfortunately qualified for an Israeli tax exemption which applied to foreign source income of new immigrants for a 10 year period. The pension income was not "subject to tax" in Israel, so the DT exemption did not apply:

> 22. ... "Subject to tax"... requires income actually to be within the charge to tax in the sense that a contracting state must include the income in question in the computation of the individual's taxable income with the result that tax will ordinarily be payable subject to deductions for allowances or reliefs, etc....
>
> 24. An Australian case, *Emanuel v FCT* [1968] HCA 57, concerned the Australia/UK double tax treaty. ... Under the treaty, [the rate of tax on dividends] was reduced to 15% in the case of such dividends to a UK resident "who is subject to UK tax in respect thereof". The UK resident recipient was not domiciled in the UK, and so, although generally within the scope of UK tax as a resident, was chargeable on income from non-UK sources only to the extent that the income was remitted to the UK. The dividends had not been so remitted.
>
> 25. In the High Court of Australia, Windeyer J held that the taxpayer was not entitled to the reduced rate of withholding tax. He said (at [15]):
>
>> "... in respect of the dividends in question the 'remittance' basis would apply. Therefore, in my opinion, unless and until they be remitted and received by him in the UK he is not "subject to UK tax in respect thereof". These words I think describe a present liability of a person to tax, not the character of income in respect of which he will if it comes to him in the UK in the future incur then a liability to tax."
>
> 26. In *General Electric Pension Trust v Director of Income-tax (International Taxation)* (2005) 8 ITLR 1053, the Indian Authority for Advance Rulings held that a pension fund which was exempt from tax in the US under US tax law was not "subject to tax" in the US ...
>
> 34. In my view, consistent with what I regard as the purpose of the treaty in this regard, the ordinary meaning of Art XI(2) is that pension income derived from UK sources is only exempt from UK tax if that

A person is not regarded as subject to tax in the UK if the income in question is exempted from UK tax by an extra-statutory concession or is statutorily exempt from tax, for example the income is that of a charity ..."

[162] [2012] UKFTT 501 (TC).

> income is chargeable to Israel tax such that Israel tax will ordinarily be payable in respect of that income, subject to deductions for allowances and reliefs, etc. This follows from the distinction that must in my view be drawn between the use, in double tax treaties, of the expressions "liable to tax" and "subject to tax", and also by the requirement, under Art XI(2), that the individual concerned should not only be a resident of Israel (that is, resident in Israel for the purposes of Israel tax), but should be subject to tax in respect of the relevant income. ... This provision is not concerned with the status of the individual, but with the chargeability to tax of the specific income. Income which is exempted from taxation cannot during the currency of that exemption be income in respect of which an individual can be said to be subject to tax.

On the same facts, but under OECD Model wording (lacking the words "subject to tax") treaty relief would apply.[163]

108.13.5 *Election to waive exemption*

The INT Manual provides:

> **INTM162020 certificates of residence: information to be supplied with a request** [Feb 2020]
>
> ...
>
> Note that, under CTA09/Part 9A, UK companies are usually exempt from tax on the great majority of dividends received (see INTM650000). If a UK company is exempt from tax on the dividends it receives, HMRC will not be able to issue a CoR [Certificate of Residence] where the DTA in question states that the dividends must be subject to UK tax.
>
> UK companies can, however, elect (under CTA09/S931R(2)) for this exemption not to apply. If such an election is made, the dividends would be subject to UK tax and HMRC could issue a CoR. The company would then be able to claim relief from the foreign tax and if any foreign tax remains payable, credit for that tax may be available against the UK tax chargeable on the same income.
>
> UK companies in this situation should therefore consider whether it is in their interest to make an election under S931R(2) (so that the dividends are charged to UK tax with relief being available for the foreign tax under the terms of the DTA) or not (so that the dividends are not subject to UK tax but with no relief being available under the DTA for the foreign tax suffered).
>
> In any case where a company does require a CoR to claim relief from

[163] See 38.8 (DT relief: pension income).

foreign taxes on dividends where the DTA provides that they must be subject to tax on those dividends, the company should provide a copy of the S931R(2) election with their request along with confirmation that the election has not been subsequently revoked.

108.13.6 *Subject to tax/Beneficial ownership compared*

The INT Manual provides:

> **INTM332020 Double Taxation Claims And Applications: Why Beneficial Ownership Matters** [Jun 2016]
> In some countries, no distinction is made between the concepts of legal and beneficial ownership, so beneficial ownership as a condition for relief may thus not appear in a double taxation agreement between the UK and one of those countries. But in such cases, the agreement usually requires the income to be subject to tax (INTM332200) in the other country. The person who is subject to tax on the income in question can usually be treated for practical purposes of relief under the agreement as if they were its owner.

The first sentence muddles different meanings of beneficial ownership. But as the passage overall suggests,"subject to tax" was in its origin an attempt to provide a rule similar to that which is nowadays expressed in terms of beneficial ownership.

108.13.7 *Subject to tax: Critique*

Avery Jones says:

> ... do subject to tax clauses not demonstrate that there is something wrong with the structure of tax treaties? That the resident might not be taxable on the particular item of income because of a transitional exemption, as in the *Weiser* case, is only the beginning of the problem. Other issues include the not-uncommon situation in which one state attributes income to one person and the other state to a different person, or the person may be liable to one type of tax covered by the treaty but not another, or one person may be liable to one tax covered by the treaty and a different person liable to another tax, or one state charges a tax covered by the treaty on a source basis and the other state has no equivalent type of tax, and so on. In such cases, which were not foreseen when the definition of resident was initially drafted, the problem is that by historical accident there is no real connection between the source provisions of the treaty, deriving from impersonal taxes, and the definition of resident, deriving from income taxes. The problem seems to lie not with *subject to tax* but with *liable to tax*. Why should the treaty

> relief in the source state depend on whether someone is liable to tax in principle on at least some foreign income? Would it not be better for treaties specifically to connect the income to the resident and give a reduction of tax in the source state on particular income only if the income was actually taxed in the residence state (or would have been taxed but for some reason that would be set out, such as an exemption for income of a charity)?[164]

In short, a "subject to tax" requirement would prevent double non-taxation. The EC have made the same point:

> **3. Limitation to the application of rules intended to avoid double taxation**
>
> 3.1. Where Member States, in double taxation conventions which they have concluded among themselves or with third countries, have committed not to tax a given item of income, Member States should ensure that such commitment only applies where the item is subject to tax in the other party to that convention.
>
> 3.2. To give effect to point 3.1, Member States are encouraged to include an appropriate clause in their double taxation conventions. Such clause could read as follows:
>
> > "Where this Convention provides that an item of income shall be taxable only in one of the contracting States or that it may be taxed in one of the contracting States, the other contracting State shall be precluded from taxing such item only if this item is subject to tax[165] in the first contracting State."
>
> ...
>
> 3.3. Where, with a view to avoid double taxation through unilateral national rules, Member States provide for a tax exemption in regard to a given item of income sourced in another jurisdiction, in which this item is not subject to tax, Member States are encouraged to ensure that the item is taxed.[166]

But in practice the "subject to tax" requirement is not used in modern

[164] [2013] BTR 9 at p.14 (footnotes omitted). This idea has been developed in Wheeler, *The Missing Keystone of Income Tax Treaties* (2012).

[165] The Recommendation recognises that the expression "subject to tax" can be problematic and provides: "3.4. For the purposes of points 3.1, 3.2 and 3.3 an item of income should be considered to be subject to tax where it is treated as taxable by the jurisdiction concerned and is not exempt from tax, nor benefits from a full tax credit or zero-rate taxation."

[166] EC "Recommendation of 6.12.2012 on aggressive tax planning" C(2012) 8806 *https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex%3A32012H0772*

treaties. There are various possible reasons for this.

(1) The requirement is conceptually problematic, as the discussion above shows.

(2) The requirement is not always effective. The practical effect of the rule that income in a State must be subject to tax can be avoided or mitigated by provisions in the domestic law of that State, such as:
(a) A rule that income is subject to tax at a very low rate, say 1%
(b) An exemption that can be waived[167]

But these objections do not seem so serious in practice. "Subject to tax" is a rough and ready solution to the problem of avoiding double non-taxation, but there is no short form perfect solution, and to ask for one is to cry for the moon. Tax law often has to settle for the second-best. The test is workability rather than perfection.

The true objection may be that States sometimes *intend* to have double non-taxation.[168]

[167] See 108.13.5 (Election to waive exemption).

[168] See 107.6 (Double non-taxation).

109.4.1 Characterisation: Better view
109.4.2 Characterisation: Courts view
109.5 Savings Clause
109.5.1 Terminology
109.5.2 The Savings Clauses
109.5.3 Exceptions to Savings Clauses
109.5.4 BEPS MLI Savings Clause Exceptions
109.5.5 Savings clause: Effect
109.5.6 "Residence" in Savings Clause
109.5.7 Application of BEPS Savings Clause

109.1 Third-party DT relief/credit

109.1.1 *The issue*

This chapter considers the position where:

(1) Income[1] arises to a person treaty-resident in a foreign treaty State (**"the foreign resident"**).

(2) A person who is tax-resident in the UK, and not treaty-resident in the foreign State (**"the UK resident"**) would under domestic law be taxed on the income.

How can it happen that a UK resident is taxable on income arising to the foreign resident? There are various possible reasons, including:

(1) Hybrid entities (UK-law transparent, foreign-law opaque)

(2) Anti-avoidance provisions (such as s.3, s.86, s.624, s.720, CFC rules)

The question is whether the UK resident qualifies for:

Relief	**Meaning**
Third-party DT relief	DT relief on the income
Third-party foreign tax credit	Credit for foreign tax paid on the income

[1] The same issues apply to gains, and references to income in this chapter include gains.

These raise similar questions but are best considered separately.

109.2 Third-party DT relief

109.2.1 *Third-party relief available*

Article 1 OECD Model provides:

> This Convention shall apply to persons who are residents of one or both[2] of the Contracting States.

DT relief is not in principle restricted to the person to whom the income arises. It can apply to any treaty-resident. Sections 2 and 6 TIOPA authorise DT relief to apply in this way, for they simply provide "relief", ie relief for anyone.[3]

So it seems self-evident that a UK resident can in principle qualify for third-party DT relief, and authority can be cited to that effect.

In *Padmore v IRC*[4] a partner was entitled to DT exemption on income of a Jersey partnership where the partnership was a person treaty-resident in Jersey but the partner was not.

Likewise, in *Lee v HMRC* trustees were entitled to DT exemption on a gain accruing to a Mauritian trust, which was a hybrid entity: it was regarded as a person in Mauritius, and treaty-resident in Mauritius; but in the UK the gain was regarded as accruing to the trustees who were not treaty-resident in Mauritius. The trustees could not be taxed on the same gain.[5]

In *Lord Strathalmond v IRC*:[6]

(1) US source income arose to Lady Strathalmond ("the wife") who was treaty-resident in the USA.

[2] The words "or both" are not otiose. Under the OECD Model, a person cannot usually be treaty-resident in *both* treaty States, given the tie-breaker; but, at least after 2017, it could happen for a dual-resident company if the Contracting States did not reach a mutual agreement .

[3] Wheeler discusses this issue in *The Missing Keystone of Income Tax Treaties* (2012) para 3.2 (Subjective/objective nature of treaties) but her proposed terminology (Objective/subjective) is not the most helpful.

[4] 62 TC 352. But the position for partnerships was later reversed by statute: see 85.25 (DT relief: Partnership).

[5] [2017] UKFTT 279 (TC) at [90]-[92]. The OECD hybrid-entity rule will now cover this case: see 91.4.2 (OECD hybrid-entity rule).

[6] 48 TC 537.

(2) The rule at that time (repealed in 1988) was that income of a married woman was deemed to arise to her husband, so in the absence of treaty relief, Lord Strathalmond would have been taxable. The husband was treaty-resident in the UK.

The husband was entitled to DT exemption. The treaty exempted the income, not the treaty-resident individual, so a third party otherwise taxed on the income could claim the benefit of treaty relief even though not treaty-resident in the USA. *Bricom v IRC* summarised the point:[7]

> [*Strathalmond*] shows that the relief from UK tax accorded by a double taxation agreement can enure for the benefit of a third party.

Other countries adopt the same view.[8]

109.2.2 *Third-party relief denied*

In all the above cases third-party DT relief produces a fair result. But in other cases it may override anti-avoidance provisions which deem foreign income of a non-resident to arise to a UK resident, and so it may facilitate tax avoidance.

One possible solution to this problem would be to construe it away; and there are occasional comments in case law[9] and in the OECD Commentary to the effect that DTAs generally do *not* provide third-party relief. But that cannot be right, at least as a general rule: it is contradicted by the authorities set out above.

A second possible reaction to the problem was ad hoc domestic law provisions overriding third-party DT relief, and there were examples of this:

Topic	**See para**
Trading income	21.23.7
Partnerships	85.25

A third solution is to say that the income which arises to the third party

[7] 70 TC 272 at p.290.

[8] In *Canada v Sommerer* 2012 FCA 207 a gain accrued to trustees who were treaty-resident in the foreign State. Under a Canadian tax legislation similar to s.86, the gain was deemed to accrue to the Canadian resident settlor. The Canadian Federal CoA held that the settlor could claim DT relief under a treaty in OECD Model form.

[9] See the Special Commissioner comments in *IRC v Willoughby* [1995] STC 143 at p.169.

under the anti-avoidance rules was different from that arising to the person treaty-resident in the treaty state. That raises the issue of characterisation, and examples of this are considered below.

What was needed was an amendment to DTAs generally. This was eventually achieved by the OECD Savings Clause, which is increasingly but not universally applicable.[10] When it applies it overrides all third-party DT relief.

109.3 Third-party tax credit relief

Similar points apply to third-party foreign tax credit. Suppose:

(1) Income arises to a person treaty-resident in a foreign treaty State (**"the foreign resident"**) who pays tax in that State.

(2) A person who is tax-resident in the UK, and not treaty-resident in the foreign State (**"the UK resident"**) would under domestic law be taxed on the same income.

Foreign tax credit is in principle available because s.6(1) TIOPA allows "credit" ie credit for anyone. In this case however it is always fair that the relief should be available, even in avoidance cases.

For examples of third-party tax credit relief see:

Topic	**See**
Company groups: SP 6/88 para 4 examples (ii)(iii)	111.1
Directors	37.19
s.86	60.19.1

Sometimes third-party tax credit relief is allowed by statute. A statutory provision is needed to confer the relief where the income of the UK resident is not the same as the income of the foreign resident. In other cases the statutory provision is not strictly needed, though it does not harm, and may be regarded as for the avoidance of doubt. Examples are:

Topic	**See**
ToA: s.720	49.30.1
Settlor-interested trusts: s.624	47.18.1

109.4 Characterisation: Same income?

Third-party DT relief is available only if the income of the the UK resident

[10] See 109.5.2 (OECD Model Savings Clause).

is the same as the income of the foreign person.[11] The characterisation (or classification) of income in the hands of the UK resident is therefore a central question. I refer to this as the "**characterisation issue**".

The way for a Court minded to deny third-party relief is to find that the income in the hands of the UK resident is not the same as the income of the foreign person. So the characterisation issue often arises in cases where third-party DTA relief is sought (though it is not restricted to such cases).

There are two possibilities:

(1)(a) Income arises to a person treaty-resident in a foreign State, which under the treaty cannot be taxed in the UK.

(b) The *same* income is deemed to arise to a UK resident.

(2)(a) Income arises to a person treaty-resident in a foreign State, which under the treaty cannot be taxed in the UK.

(b) *Different* income is deemed to arise to a UK resident: the deeming "changes the character" of the income

In case (1) DT relief/foreign tax credit in principle applies, and in case (2) it does not.[12]

In *Huitson* the rule is correctly stated, but in pejorative terms:

> [The DTA] issue has spawned a somewhat metaphysical debate as to whether the "notional" income under section 739 [ICTA, in my terminology, s.720 deemed income] is different from the "real" income in the hands of the foreign resident, so that taxation of the "notional" does not conflict with relief of the "real".[13]

[11] See 107.22 (Characterisation).

[12] The facts of *IRC v Willoughby* offer a clear example of case (2):

(1) A life assurance company was treaty-resident in the Isle of Man. The IoM DTA provided relief for the commercial profits of the company.

(2) UK resident was (in principle) subject to tax on the income arising to the life company from a premium he paid to the company for a policy.

The s.720 income on which the UK resident was taxed could not be characterised as the commercial profits of the life assurance company; the income was merely one (in the context of the whole, trivial) element by reference to which those profits were computed. So for this reason the UK resident could not claim third-party DT relief. Though this is not the way that the Special Commissioner dealt with the point: 70 TC 57 at p.90. The taxpayer wisely did not appeal on the DTA issue.

[13] *Huitson (R, oao) v HMRC* [2010] EWHC 97 (Admin) at [64]. The point was not discussed in the subsequent appeal.

The debate is no more metaphysical than any question raised by deeming provisions, which are very common in taxation.

109.4.1 *Characterisation: Better view*

Suppose:

(1) Income accrues to A ("A's actual income").

(2) A statutory provision ("the deeming provision") provides that income is deemed to accrue to B ("B's deemed income").

The deeming provision may or may not change the character of the income, that is, B's deemed income may or may not be a different type from A's actual income. It is a question of construction of the deeming provision.

When considering the characterisation issue in relation to deeming provisions, it is helpful to bear in mind that there are (at least) four different fictions that deeming provisions may be used to achieve:

(1) *Deeming which changes the recipient*: Statute may deem that although income actually arose to A, it is deemed to arise to B.

(2) *Deeming which changes timing*: Statute may deem that although income actually arose at one time, it is deemed to arise at another time.

(3) *Deeming which changes quantum*: Statute may deem that although the amount of income which actually arose to A was £x, it is deemed to be of a different amount, £y.

(4) *Deeming which changes character*:

   (a) Statute may deem that although income which actually arose was of type A, the taxpayer is deemed to receive income of another type (type B).

   (b) Statute may deem that although what arises is gains, it is deemed to be income.

   (c) Statute may deem that although no income arises to anyone, the taxpayer is deemed to receive income.

Case (1) does not by itself change the character of the income.

> Exempt income does not change its character or lose its exemption merely because it is deemed to be the income of another person or is imputed to him.[14]

[14] *Bricom v IRC* 70 TC 272 at p.290 citing *Strathalmond v IRC* 48 TC 537.

The same applies if the UK provision apportions income to the taxpayer: “apportion” has the same meaning as “deems to accrue to” or “impute”.[15] The term “attribute” is also the same.[16]

Likewise in cases (2) and (3) third-party DT relief can still apply.

In case (4)(a) DT relief applicable to type A income only (not type B income) will not exempt the taxpayer. Cases (4)(b)(c) need further consideration.

So the mere fact that the legislation uses the terminology or technique of deeming does *not* mean that DT relief ceases to apply. One must ask what is the deeming, and in particular, is it deeming which changes the character of the income?

If B’s deemed income is exactly equivalent in amount to A’s actual income, one might think that the character of the income should in prinicple be the same. That is, if there is a change in the character of the income, the legislation should say so.

One reason that this is the case is that otherwise there may be a breach of the treaty. If a DTA provides income is exempt, parliament may breach the treaty in a straightforward manner and provide that the income is still taxable. There is still a treaty breach, albeit of a more subtle manner, if Parliament recharacterises the income and taxes it under its new name. DTAs are not construed so technically. While the UK can breach a treaty, tax legislation should be construed in a treaty-consistent manner where possible.

A second reason is that in a simple case where B’s deemed income is exactly equivalent to A’s actual income, there is no rational distinction to be drawn between A’s income and B’s deemed income.

Statute sometimes refers to the income of the person abroad being treated as arising to the person in the UK, and sometimes it refers to “an amount equal to the income”. It might be argued that the different wording implies a different outcome, the latter (only) suggesting that the income has changed its character. The taxpayer raised the argument in *Bricom* but it was rejected.[17] Perhaps that is for the best. A general distinction

[15] *Bricom v IRC* 70 TC 272 at p.290.

[16] The terms “apportion” and “attribute” are used synonymously in s.3 TCGA; see 64.3 (s.3 gain attributed to participator).

[17] 70 TC 272 at p.289: “The taxpayer lays stress on the fact that what is apportioned under [the CFC rules] is not “a sum equal to the chargeable profits” but the chargeable profits themselves; and that the subject of the charge to tax in [the CFC

between income and "an amount equal to" is a distinction without a difference.

The Canadian Supreme Court decision *R v Melford Developments*[18] supports this view. It concerned the 1956 Canada/Germany DTA under which German residents were exempt from Canadian tax on (Canada source) industrial or commercial profits, but subject to tax on (Canada source) interest. Canada domestic law subsequently provided that interest included guarantee fees. The question was the characterisation of guarantee fees for the purposes of the DTA. The Revenue relied on (the equivalent of) OECD Model art 3(2) (that undefined terms have domestic law meanings).[19] But context showed that the domestic law meaning did not apply for treaty purposes:

> Laws enacted by Canada to redefine taxation procedures and mechanisms with reference to income not subjected to taxation by the Agreement are not, in my view, incorporated in the expression "laws in force" in Canada as employed [in the equivalent of OECD Model art 3(2)]. To read this section otherwise would be to feed the argument of the appellant, which in my view is without foundation in law, that subs. (2) authorizes Canada or Germany to unilaterally amend the tax Treaty from time to time as their domestic needs may dictate.[20]

But in practice the UK Courts have not gone down this path.

109.4.2 *Characterisation: Courts view*

Bricom v IRC concerned a claim for third-party DT relief against a CFC charge:

(1) Income accrued to a subsidiary company treaty-resident in a foreign State ("the CFC").
(2) The parent company ("the UK parent") was UK tax-resident and not treaty-resident in a foreign State.
(3) The parent was subject to tax under the Controlled Foreign Company ("CFC") provisions.

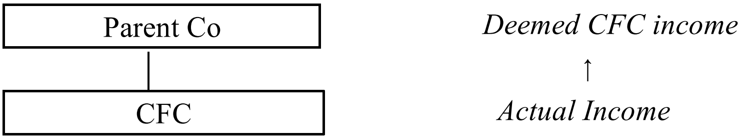
rules] is not "a sum equal to the apportioned part of the chargeable profits" but the apportioned part of the chargeable profits itself."

[18] [1982] 2 SCR 504 accessible *https://www.kessler.co.uk/tfd-archive*
Similar decisions were reached in *R v Associates Corporation of North America* 80 DTC 6094 and *Placements Serco v R* 84 DTC 6098.

[19] See 107.12 (Undefined treaty terms).

[20] at p.513

Diagrammatically:



According to CoA, the CFC provisions operate in three stages:

> Stage 1. *Ascertainment:* the CFC's chargeable profits are ascertained.
> Stage 2. *Apportionment*: the CFC's chargeable profits (less creditable tax) are apportioned among its shareholders. In *Bricom* the CFC was wholly-owned by the parent, so all its chargeable profits were attributed to the parent.
> Stage 3. *Assessment:* The parent is assessed on "a sum equal to corporation tax at the appropriate rate on that apportioned amount of profits" (less creditable tax) and the sum assessed is recoverable from the parent "… as if it were an amount of corporation tax chargeable on the parent".

The Special Commissioners held that interest received by the CFC lost its character as interest at stage 1. Millett LJ disagreed:

> It is ... a reflection of the Revenue's unsuccessful argument in *Hughes,* viz: that interest from exempt securities loses its character as income by being included in the computation of the recipient's trading profits.[21]

So far so good. But the interest lost its character at stage 2:

> The correct analysis is that the interest received by [the CFC] is not included in the sum apportioned to the taxpayer on which tax is chargeable. It merely provides a measure by which an element in a conventional or notional sum is calculated, and it is that conventional or notional sum which is apportioned to the taxpayer and on which tax is charged.[22]

In *Bricom* the parent company's income was not interest, because "the chargeable profits" as defined are *a notional sum.* Why are they more notional than the profits of any company?

> They do not represent any profits of [the CFC] on which UK

[21] *Hughes v Bank of New Zealand* 70 TC 272 at p.291; see xxx.
[22] 70 TC 272 at p.291.

> corporation tax is chargeable, for there are no such profits.[23]

This is no doubt correct, but why is it relevant? The question is not whether the parent's CFC income represented profits of the CFC *on which UK corporation tax is chargeable*. The question is whether it represented the profits of the CFC (or more accurately, whether its type is the same as those profits). The judgment then turns to this:

> Nor do they represent any actual payments or receipts of [the CFC], whether of interest or anything else.

Why not?

> They are merely the product of a mathematical calculation made on a hypothetical basis and making counterfactual assumptions.[24] The "chargeable profits" which are defined by s.747(6)(a) [ICTA] exist only as a measure of imputation. What is apportioned to the taxpayer and subjected to tax is not [the CFC's] actual profits but a notional sum which is the product of an artificial calculation.

The fact that taxable profits are ascertained by a mathematical calculation does not by itself change the character of the profits. The amount of profits on which tax is charged is in every case the product of a mathematical calculation.[25]

The result of *Bricom* may strike the reader as unfair, and the reasoning unconvincing.[26] However that may be, *Bricom* is clearly authority for two general propositions:

(1) The application of DT relief requires that the income of the taxpayer is the same income as that which qualifies for relief. (This is self-evident.)

(2) The characterisation issue is a matter of construction of the relevant provisions.

Bricom is authority for a third, narrower proposition: The CFC provisions

[23] 70 TC 272 at p.289.

[24] Millett wisely does not state what the hypothetical and counterfactual assumptions are: one must assume that the CFC is UK resident.

[25] CGT is charged on gains less losses; IT is charged on total income; CT is charged on profits.

[26] That unfairness may have been a factor in the ECJ decision that the CFC legislation was not EU-law compliant; see *Cadbury Schweppes v IRC* (2006) C-196/04. But post-Brexit, that does not matter.

specifically did alter the character of the income received by the parent.[27] The CFC provisions are now in Part 9A TIOPA, but no-one suggests that the position has changed.

The outcome in *Bricom* is supported by the OECD Commentary which states that the OECD Model is not intended to override CFC rules.[28] This is not mentioned in *Bricom*, but the Commentary, or the thinking behind it, lies behind the decision. The Savings Clause now gives effect to the Commentary's view.

The question after *Bricom* was whether its reasoning should be regarded as restricted to CFCs or whether it applied to other anti-avoidance provisions where third party-relief might apply. In earlier editions of this work I argued for the former view. But *Davies v HMRC*[29] applied *Bricom* reasoning in a ToA context, so I am now doubtful about that. Looking back on *Bricom*, after *Davies v HMRC,* it seems to me that

[27] I do not consider how convincing is the reasoning, but note that in France the opposite view was reached: *Re Société Schneider Electric* (2002) 4 ITLR 1077 (Conseil d'État).

[28] Article 7(1) OECD Model (business profits) provides:

> 1. Profits of an enterprise of a Contracting State shall be taxable only in that State ...

OECD Commentary on art 7 provides:

> 14. [Art 7(1)] does not limit the right of a Contracting State to tax its own residents under controlled foreign companies provisions found in its domestic law even though such tax imposed on these residents may be computed by reference to the part of the profits of an enterprise that is resident of the other Contracting State that is attributable to these residents' participation in that enterprise. Tax so levied by a State on its own residents does not reduce the profits of the enterprise of the other State and may not, therefore, be said to have been levied on such profits (see also paragraph 81 of the Commentary on Article 1).

This has been in the OECD Commentary since 2008; it was inserted following OECD Report "The 2008 Update to the Model Tax Convention". There was a trivial amendment in 2010, not relevant here.

The same point is made in OECD Commentary on article 1, which concludes:

> 81 ...whilst some countries have felt it useful to expressly clarify, in their conventions, that controlled foreign company legislation did not conflict with the Convention, such clarification is not necessary. It is recognised that controlled foreign company legislation structured in this way is not contrary to the provisions of the Convention.

A similar point is made in paragraphs 37 to 39 of the Commentary on art 10(5) (dividends), though that is not directly relevant in the UK as UK CFC rules do not work in the manner envisaged in those paragraphs.

[29] [2020] UKUT 67 (TCC).

recharacterisation has been used as a method of avoiding third-party relief, in the context of anti-avoidance provisions, where the Court considers that the relief ought not to apply: these are cases of result-driven reasoning.

In the following contexts, third-party DT relief is not available on the basis of *Bricom*-style reasoning:

Provision	**See**
s.720	49.30.3
s.86	60.19.1

In other contexts HMRC have accepted that third-party relief could be available, ie, the anti-avoidance rule did not change the character of the income:

Provision	**See**
s.624 ITTOIA	47.18.2
s.3 TCGA	64.40.2

s.77 TCGA (*repealed but HMRC formerly allowed 3rd- party relief)*; see 9.19.6

The reader may struggle to identify the difference in the statutory wording and wonder whether a Court would allow third-party relief here if it was challenged. But the question may never be litigated, because:

(1) Section 77 was long ago repealed.

(2) Going forward, the issue will generally be resolved in HMRC's favour by the Savings Clause

109.5 Savings Clause

109.5.1 *Terminology*

There are (at least) 3 DTA Savings Clause rules. I coin the following terminology:

Term	**Definition**
OECD Savings Clause(s):	
OECD Model Savings Clause	art 1(3) OECD Model
BEPS MLI[30] Savings Clause	art 11(1) BEPS MLI
US Savings Clause	art 1(4) USA/UK DTA

The term "Savings Clause" is used because, with limited exceptions, it preserves ('saves') the right of a State to tax its residents irrespective of other provisions of the treaty.

[30] See 107.15 (BEPS MLI).

I use initial capitals to reflect the technical nature of the expression.

109.5.2 *The Savings Clauses*

OECD Savings Clause **Art 1(3) OECD Model**	**BEPS MLI Savings Clause** **Art 11 BEPS MLI**	**US Savings Clause** **Art 1(4) USA/UK DTA**
		Notwithstanding any provision of this Convention except paragraph 5 of this Article,
[a] This Convention shall not affect the taxation, by a Contracting State, of its residents	1. A Covered Tax Agreement shall not affect the taxation by a Contracting Jurisdiction of its residents,	a Contracting State may tax [1] its residents (as determined under Article 4 (Residence), and [2] by reason of citizenship may tax its citizens, as if this Convention had not come into effect.
[b] except with respect to the benefits granted under paragraph 3 of Article 7, paragraph 2 of Article 9 and Articles 19, 20, 23 A [23 B], 24 and 25 and 28.	except with respect to the benefits granted under provisions of the Covered Tax Agreement: [for the list, See 109.5.4 (BEPS MLI Savings Clause Exceptions).	

109.5.3 *Exceptions to Savings Clauses*

The list of exceptions to the Savings Clause is quite limited

Article 1(3)[b] OECD Model provides 7 exceptions to the OECD Savings Clause:

Article	**Topic**
7(3)	Deduction for expenses of PE
9(2)	Transfer pricing
19	Government service
20	Students
23A/B	Foreign tax credit relief
24	Non-discrimination
25	Mutual agreement procedure

Art 1(5) USA/UK DTA sets out a list of exceptions to the US Savings

Clause, which is similar but not identical to the OECD Model:

> The provisions of paragraph 4 of this Article shall not affect—
>
> (a) the benefits conferred by a Contracting State under[31]

Article	**Topic**
Art 9(2)	Associated enterprises: transfer pricing
Art 17(1)(b), (3)-(5)	Pensions, social security, annuities, alimony, and child support
Art 18(1)(5)	Pension schemes
Art 24	Foreign tax credit relief
Art 25	Non-discrimination
Art 26	Mutual agreement procedure

The US Treasury Technical Explanation of the Convention[32] summarises the exceptions:

> Some provisions are intended to provide benefits to citizens and residents even if such benefits do not exist under internal law. Paragraph 5 sets forth certain exceptions to the saving clause that preserve these benefits for citizens and residents of the Contracting States.
>
> Subparagraph (a) lists certain provisions of the Convention that are applicable to all citizens and residents of a Contracting State, despite the general saving clause rule of paragraph 4:
>
> (1) Paragraph 2 of Article 9 (Associated Enterprises) grants the right to a correlative adjustment with respect to income tax due on profits reallocated under Article 9.
>
> (2) Subparagraph 1(b) and paragraphs 3 and 5 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support) provide exemptions from source or residence State taxation for certain pension distributions, social security payments and child support.
>
> (3) Paragraph 1 of Article 18 (Pension Scheme) provides an exemption for certain investment income of pension schemes located in the other State, while paragraph 5 provides benefits for certain contributions by or on behalf of a U.S. citizen to certain pension schemes established in the UK.
>
> (4) Article 24 (Relief from Double Taxation)[33] confirms the benefit of a credit to citizens and residents of one Contracting State for income taxes paid to the other, even if such a credit may not be available under the Code.

[31] For clarity, I set this out in a table format, and abbreviate the topic descriptions.

[32] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[33] See 111.25 (UK-resident USA citizen).

> (5) Article 25 (Non-Discrimination) requires one Contracting State to grant national treatment to nationals of the other Contracting State in certain circumstances. Excepting this Article from the saving clause requires, for example, that the United States give such benefits to a national of the UK even if that person is a citizen of the United States.
> (6) Article 26 (Mutual Agreement Procedure) may confer benefits on residents or nationals of the Contracting States. For example, the statute of limitations may be waived for refunds and the competent authorities are permitted to use a definition of a term that differs from the internal law definition. As with the foreign tax credit, these benefits are intended to be granted by a Contracting State to its citizens and residents.

The list of exceptions in art 1(5) continues:

> The provisions of paragraph 4 of this Article shall not affect ...
> (b) the benefits conferred by a Contracting State under
> [i] paragraph 2 of Article 18 (Pension Schemes) and
> [ii] Articles 19 (Government Service),
> [iii] Art 20 (Students),
> [iv] Art 20A (Teachers), and
> [v] Art 28 (Diplomatic Agents and Consular Officers)
> of this Convention, upon individuals who are neither citizens of, nor have been admitted for permanent residence in, that State.

The US Treasury Technical Explanation of the Convention[34] provides:

> Subparagraph (b) of paragraph 5 provides a different set of exceptions to the saving clause. The benefits referred to are all intended to be granted to temporary residents of a Contracting State (for example, in the case of the United States, holders of non-immigrant visas), but not to citizens or to persons who have acquired permanent residence in that State. If beneficiaries of these provisions travel from one of the Contracting States to the other, and remain in the other long enough to become residents under its internal law, but do not acquire permanent residence status (i.e., in the U.S. context, they do not become "green card" holders) and are not citizens of that State, the host State will continue to grant these benefits even if they conflict with statutory rules. The benefits preserved by this paragraph are: the host country exemptions for the following items: government service salaries and pensions under Article 19 (Government Service); certain income of visiting students, trainees, teachers, professors, and researchers under

[34] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> Articles 20 (Students) and 20A (Teachers); the income of diplomatic agents and consular officers under Article 28 (Diplomatic Agents and Consular Officers); and the beneficial tax treatment of pension fund contributions under paragraph 2 of Article 18 (Pension Schemes).

Green card holders are at a disadvantage compared to US citizens since they pay US taxes but do not have the same benefits under the treaty. HMRC say:

> HMRC explained that the UK was not obliged to give credit where the US taxed a green card holder on a world wide basis and the taxpayer was not tax resident in the US, but where we see a recharge to the US for US workdays we will accept the US has the primary taxing rights in the same way as for US citizens and we will give credit for the US tax paid on those US workdays by green cardholders. In the US a green card holder is debarred from claiming relief under a treaty. HMRC suggested that an individual who is taxed in the US on their world wide income because he retains his green card and so is treated as a resident of the US for the purposes of Article 1(4) even though they would be treaty resident in the UK may not have taken all reasonable steps to minimise their US liability, as required by s.795A ICTA if he were to qualify for credit relief. As such, although strictly Article 24(6) may not apply to green card holders in these circumstances, the effect of the minimisation requirement is that the UK will limit relief given in the UK under the treaty to that which would be given if Article 24(6) did apply. Representatives pointed out that giving up the green card might trigger expatriation taxes in the US.
>
> The HMRC position is that we will not give relief in the UK for tax paid in the US as a result of Article 1(4). We believe that the US will give unilateral relief for the UK tax paid on their income at least to the extent it arises in the UK so as far as we know this should not lead to double taxation although it could lead to higher tax payable in the US as a result of the alternative minimum tax provisions.[35]

109.5.4 *BEPS MLI Savings Clause Exceptions*

Article 11 BEPS MLI lists10 cases where the Savings Clause does not apply. Of course (unlike the OECD Model Savings Clause) this has to be specified in general terms, without reference to specific article numbers. The exceptions are benefits granted under provisions of the Covered Tax

[35] *http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/consultations/expat-mins-160409.htm*

Agreement:

Exception	**OECD Model**
a) which require that Contracting Jurisdiction to grant to an enterprise of that Contracting Jurisdiction a correlative or corresponding adjustment following an initial adjustment made by the other Contracting Jurisdiction, in accordance with the Covered Tax Agreement, to the amount of tax charged in the first-mentioned Contracting Jurisdiction on the profits of a permanent establishment of the enterprise or the profits of an associated enterprise;	7(3)
b) which may affect how that Contracting Jurisdiction taxes an individual who is a resident of that Contracting Jurisdiction if that individual derives income in respect of services rendered to the other Contracting Jurisdiction or a political subdivision or local authority or other comparable body thereof;	19
c) which may affect how that Contracting Jurisdiction taxes an individual who is a resident of that Contracting Jurisdiction if that individual is also a student, business apprentice or trainee, or a teacher, professor, lecturer, instructor, researcher or research scholar who meets the conditions of the Covered Tax Agreement;	20 -[36]
d) which require that Contracting Jurisdiction to provide a tax credit or tax exemption to residents of that Contracting Jurisdiction with respect to the income that the other Contracting Jurisdiction may tax in accordance with the Covered Tax Agreement (including profits that are attributable to a permanent establishment situated in that other Contracting Jurisdiction in accordance with the Covered Tax Agreement);	23A/B
e) which protect residents of that Contracting Jurisdiction against certain discriminatory taxation practices by that Contracting Jurisdiction;	24

g) which may affect how that Contracting Jurisdiction taxes an individual who is a resident of that Contracting Jurisdiction when that individual is a member of a diplomatic mission, government mission or consular post of the other Contracting Jurisdiction;	28
h) which provide that pensions or other payments made under the social security legislation of the other Contracting Jurisdiction shall be taxable only in that other Contracting Jurisdiction;	18

[36] Some treaties make provision for teachers etc, though this is not in the OECD Model.

i) which provide that pensions and similar payments, annuities, alimony payments or other maintenance payments arising in the other Contracting Jurisdiction shall be taxable only in that other Contracting Jurisdiction; or 18

j) which otherwise expressly limit a Contracting Jurisdiction's right to tax its own residents or provide expressly that the Contracting Jurisdiction in which an item of income arises has the exclusive right to tax that item of income. -

109.5.5 *Savings clause: Effect*

The effect (in the terminology of this book) is to override third-party DTA relief.[37]

The OECD drafting is based on the US Savings Clause. But the effect of the US Savings Clause is wider because the scope of US tax (citizenship-based taxation) is wider.

OECD commentary to art 1(3) provides:

> 17. Whilst some provisions of the Convention (e.g. Articles 23 A and 23 B) are clearly intended to affect how a Contracting State taxes its own residents, the object of the majority of the provisions of the Convention is to restrict the right of a Contracting State to tax the residents of the other Contracting State. In some limited cases, however, it has been argued that some provisions could be interpreted as limiting a Contracting State's right to tax its own residents in cases where this was not intended (see, for example, paragraph 81 below, which addresses the case of controlled foreign company provisions).
>
> 18. Paragraph 3 confirms the general principle that the Convention does not restrict a Contracting State's right to tax its own residents except where this is intended and lists the provisions with respect to which that principle is not applicable.

The suggestion is that the introduction of OECD Savings Clause does not change the law, and merely confirms the generally accepted interpretation. That is not correct, and the introduction of the OECD Savings Clause will have a significant effect in UK taxation.[38] But there is a long tradition of misdescribing substantial tax changes as clarification.

OECD had CFC rules in mind in particular. Whatever the position may have been before, third party DTA relief does not override CFC rules,

[37] See 109.1 (Third-party DT relief).

[38] See App 1.2 (Clarify/modernise/reform).

where a treaty includes the OECD Savings Clause. The Commentary to art 1(3) provides:

> 81. A significant number of countries have adopted controlled foreign company provisions to address issues related to the use of foreign base companies. Whilst the design of this type of legislation varies considerably among countries, a common feature of these rules, which are now internationally recognised as a legitimate instrument to protect the domestic tax base, is that they result in a Contracting State taxing its residents on income attributable to their participation in certain foreign entities. It has sometimes been argued, based on a certain interpretation of provisions of the Convention such as paragraph 1 of Article 7 and paragraph 5 of Article 10, that this common feature of controlled foreign company legislation conflicted with these provisions. Since such legislation results in a State taxing its own residents, paragraph 3 of Article 1 confirms that it does not conflict with tax conventions. The same conclusion must be reached in the case of conventions that do not include a provision similar to paragraph 3 of Article 1; for the reasons explained in paragraphs 14 of the Commentary on Article 7 and 37 of the Commentary on Article 10, the interpretation according to which these Articles would prevent the application of controlled foreign company provisions does not accord with the text of paragraph 1 of Article 7 and paragraph 5 of Article 10. It also does not hold when these provisions are read in their context. Thus, whilst some countries have felt it useful to expressly clarify, in their conventions, that controlled foreign company legislation did not conflict with the Convention, such clarification is not necessary. It is recognised that controlled foreign company legislation structured in this way is not contrary to the provisions of the Convention.

Similarly, with limited exceptions, the US Savings Clause preserves ('saves') the right of the US to tax its citizens/residents irrespective of any other provision of the treaty.

So subject to the art 1(5) exceptions:

(1) US may tax US citizens and US treaty-residents ignoring treaty relief.
(2) UK may tax UK treaty-residents ignoring treaty relief.

On the other hand, UK must allow treaty relief to US treaty-residents, and US must allow relief to UK treaty-residents who are not US citizens.

The US Treasury Technical Explanation of the Convention[39] provides:

[39] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> Paragraph 4 contains the traditional saving clause found in U.S. tax treaties. The Contracting States reserve their rights, except as provided in paragraph 5, to tax their residents and citizens as provided in their internal laws, notwithstanding any provisions of the Convention to the contrary. For example, if a resident of the UK performs professional services in the United States and the income from the services is not attributable to a permanent establishment in the United States, Article 7 (Business Profits) would by its terms prevent the United States from taxing the income. If, however, the resident of the UK is also a citizen of the United States, the saving clause permits the United States to include the remuneration in the worldwide income of the citizen and subject it to tax under the normal Code rules (i.e., without regard to Code section 894(a)). However, subparagraph 5(a) of this Article preserves the benefits of special foreign tax credit rules applicable to the U.S. taxation of certain U.S. income of its citizens resident in the UK. See paragraph 6 of Article 24 (Relief from Double Taxation).

109.5.6 *"Residence" in Savings Clause*

Of course "residence" here means treaty-residence. OECD Commentary provides:

> The term "resident", as used in paragraph 3 and throughout the Convention, is defined in Article 4. Where, under paragraph 1 of Article 4, a person is considered to be a resident of both Contracting States based on the domestic laws of these States, paragraphs 2 and 3 of that Article make it generally possible to determine a single State of residence for the purposes of the Convention. Thus, paragraph 3 does not apply to an individual or legal person who is a resident of one of the Contracting States under the laws of that State but who, for the purposes of the Convention, is deemed to be a resident only of the other Contracting State.[40]

The USA/UK DTA Savings Clause states expressly that residence means treaty-residence. The US Technical Explanation provides:

> For purposes of the saving clause, "residence" is determined under Article 4 (Residence). Thus, an individual who is a U.S. resident under the Internal Revenue Code but who is deemed to be a resident of the UK under the tie-breaker rules of Article 4 would be subject to U.S. tax only to the extent permitted by the Convention. For example, if an individual who is not a U.S. citizen is a resident of the United States under the

[40] Commentary on art 1, para 21.

> Code, and is also a resident of the UK under its law, and that individual has a permanent home available to him in the UK and not in the United States, he would be treated as a resident of the UK under Article 4 and for purposes of the saving clause. The United States would not be permitted to apply its statutory rules to that person if they are inconsistent with the treaty.[41]

109.5.7 *Application of BEPS Savings Clause*

Article 11(2) BEPS MLI provides:

> 2. Paragraph 1 shall apply in place of or in the absence of provisions of a Covered Tax Agreement stating that the Covered Tax Agreement would not affect the taxation by a Contracting Jurisdiction of its residents.

Article 11 BEPS MLI provides two possible opt-outs:

> 3. A Party may reserve the right:
> a) for the entirety of this Article not to apply to its Covered Tax Agreements;
> b) for the entirety of this Article not to apply to its Covered Tax Agreements that already contain the provisions described in paragraph 2.

The UK has not made either of the reservations described in art 11(3)(a)(b); in short, it has adopted the BEPS MLI Savings Clause.

> 4. [a] Each Party that has not made the reservation described in subparagraph a) or b) of paragraph 3 shall notify the Depositary of
> [i] whether each of its Covered Tax Agreements contains a

[41] The treaty continues with a comment that UK treaty-residence does not preclude US domestic-law residence, a point only relevant to the US (though a comparable rule applies in the UK): "However, the person would be treated as a U.S. resident for U.S. tax purposes other than determining the individual's U.S. tax liability. For example, in determining under Code section 957 whether a foreign corporation is a controlled foreign corporation, shares in that corporation held by the individual would be considered to be held by a U.S. resident. As a result, other U.S. citizens or residents might be deemed to be United States shareholders of a controlled foreign corporation subject to current inclusion of Subpart F income recognized by the corporation. See Treas. Reg. section 301.7701(b)-7(a)(3). The application of the saving clause to former citizens and long-term residents is addressed not in paragraph 4 but in paragraph 6."

provision described in paragraph 2,

[ii] and if so, the article and paragraph number of each such provision.

[b] Where all Contracting Jurisdictions have made such a notification with respect to a provision of a Covered Tax Agreement, [ie where all parties to a DTA have not opted out] that provision shall be replaced by the provisions of paragraph 1.

[c] In other cases, [ie where any party to a DTA has opted out] paragraph 1 shall supersede the provisions of the Covered Tax Agreement only to the extent that those provisions are incompatible with paragraph 1.

UK MLI Notifications[42] sets out a list of 23 jurisdictions which contain the provision described in art 11(2); these will fall within para 4[c] if the jurisdiction opts out of art 11.

[42] *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf*

CHAPTER ONE HUNDRED AND TEN

LIMITATION ON BENEFITS

110.1 Limitation on Benefits
110.1.1 Introduction
110.1.2 The LoB rule
110.2 Qualified persons
110.2.1 Individuals
110.2.2 Governmental entity
110.2.3 Quoted company
110.2.4 Subsidiary/consortium company
110.2.5 Charity/NPO
110.2.6 Pension scheme/EBT
110.2.7 Structures
110.2.8 Collective investment scheme
110.2.9 Trusts
110.3 Active business

110.6.9 "Qualifying intermediate owner"
110.6.10 "Tested group"
110.6.11 Share class arrangements
110.6.12 Gross income
110.6.13 In connection with business
110.6.14 Incidental to business
110.7 Channel Islands/IoM LoB
110.7.1 Conditions for full relief

110.1 Limitation on Benefits

110.1.1 *Introduction*

"Limitation on Benefits" ("LoB") is a label for provisions of the type found in:

(1) Article 23 USA/UK DTA (headed *Limitation on Benefits*)

(2) OECD treaties:

(a) OECD Model art 29 (headed *Entitlement to Benefits)*: the Model itself has only an outline, but the Commentary has
(ii) a simplified version
(iii) a detailed version (references below are to this version unless otherwise stated)

(b) BEPS MLI article 7(8) - (13), which MLI calls the *Simplified Limitation on Benefits Provision*

I write it with initial capitals, to reflect the technical nature of the term.[1]

The UK has opted out of the MLI Simplified Limitation on Benefits Provision.[2] However it is possible that future treaties will contain provisions of that kind.

110.1.2 *The LoB rule*

The rule is broadly that treaty benefits are limited to Qualified Persons (elaborately defined):

art 29(1) OECD Model	**art 23(1) USA/UK DTA**
Except as otherwise provided in this Article, a resident of a Contracting State shall not be entitled to a benefit that would otherwise be accorded by this Convention (other than a benefit under paragraph 3 of Article 4, paragraph 2 of Article 9 or Article 25) unless such resident is a "qualified person", as defined in paragraph 2, at the time that the benefit would be accorded.	Except as otherwise provided in this Article, a resident of a Contracting State that derives income, profits or gains from the other Contracting State shall be entitled to all the benefits of this Convention otherwise accorded to residents of a Contracting State only if [a] such resident is a "qualified person" as defined in paragraph 2 of this Article and [b] satisfies any other specified conditions for the obtaining of such benefits.

If the US LoB provision applies, it is at present disputed whether unilateral relief applies: see 111.12 (DTA/Unilateral Credit: Priority).

The OECD exceptions referred to are not very significant:

Art	**Topic**	**See para**
4(3)	Tie-breaker: Mutual agreement	9.18
9(2)	Transfer pricing adjustment	*Not discussed*
25	Mutual agreement procedure	*Not discussed*

See too 108.8.2 (PPT/LoB: relationship).

110.2.1 *Individuals*

art 29(2) OECD Model

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is:
a) an individual;

art 23(2) USA/UK DTA

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is either—
(a) an individual;

This is straightforward.

110.2.2 *Governmental entity*

art 29(2) OECD Model

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...
b) that Contracting State, or a political subdivision or local authority thereof, or an agency or instrumentality of that State, political subdivision or local authority;

art 23(2) USA/UK DTA

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is...
(b) a qualified governmental entity;

See 9.27.4 (Governmental entity).

110.2.3 *Quoted company*

art 29(2) OECD Model

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...
c) a company or other entity, if, throughout the taxable period that includes that time, the principal class of its shares (and any disproportionate class of shares) is regularly traded on one or more recognised stock exchanges,

and either:
(i) its principal class of shares is primarily traded on one or more recognised stock exchanges located in the Contracting State of which the company or entity is a resident;
or
(ii) the company's or entity's primary place of management and control is in the Contracting State of which it is a resident;

art 23(2) USA/UK DTA

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...
(c) a company, if
(i) the principal class of its shares
[a] is listed or admitted to dealings on a recognised stock exchange specified in clauses (i) or (ii) of sub-paragraph (a) of paragraph 7 of this Article and
[b] is regularly traded on one or more recognised stock exchanges,

The OECD simplified version provides:

> c) a company or other entity, if the principal class of its shares is regularly traded on one or more recognised stock exchanges;

110.2.4 *Subsidiary/consortium company*

art 29(2) OECD Model

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...
d) a company, if:
(i) throughout the taxable period that includes that time, at least 50% of the

art 23(2) USA/UK DTA

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...
(c) a company, if ...
(ii) shares representing at least 50% of the aggregate voting

aggregate vote and value of the shares (and at least 50% of the aggregate vote and value of any disproportionate class of shares) in the company	power and value of the company
is owned directly or indirectly by five or fewer companies or entities entitled to benefits under subparagraph c) of this paragraph,	are owned directly or indirectly by five or fewer companies entitled to benefits under clause (i) of this sub-paragraph,
provided that, in the case of indirect ownership, each intermediate owner is a resident of the Contracting State from which a benefit under this Convention is being sought or is a qualifying intermediate owner; and	provided that, in the case of indirect ownership, each intermediate owner is a resident of either Contracting State;
(ii) with respect to benefits under this Convention other than under Article 10, less than 50% of the company's gross income, and less than 50% of the tested group's gross income, for the taxable period that includes that time, is paid or accrued, directly or indirectly, in the form of payments that are deductible in that taxable period for purposes of the taxes covered by this Convention in the company's Contracting State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property, and in the case of a tested group, not including intra-group transactions) to persons that are not residents of either Contracting State entitled to the benefits of this Convention under subparagraph a), b), c) or e);	

Indirect ownership is ownership through a tier of companies.

110.2.5 *Charity/NPO*

art 29(2) OECD Model	**art 23(2) USA/UK DTA**
2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by	(2) A resident of a Contracting State is a qualified person for a taxable

the Convention if, at that time, the resident is ...
e) a person, other than an individual, that:
(i) is a [agreed description of the relevant non-profit organisations found in each Contracting State],

or chargeable period only if such resident is ...
(e) a person described in sub-paragraph ... (c) of paragraph 3 of Article 4 (Residence) of this Convention,[3]

The OECD simplified version provides:

d) a person, other than an individual, that:
   (i) is a [agreed description of the relevant non-profit organisations found in each Contracting State],
   (ii) is a recognised pension fund;

110.2.6 *Pension scheme/EBT*

art 29(2) OECD Model

e) a person, other than an individual, that: ...
(ii) is a recognised pension fund to which subdivision (i) of the definition of recognised pension fund in paragraph 1 of Article 3 applies, provided that more than 50% of the beneficial interests in that person are owned by individuals resident of either Contracting State, or more than [__%] of the beneficial interests in that person are owned by individuals resident of either Contracting State or of any other State with respect to which the following conditions are met
A) individuals who are residents of that other State are entitled to the benefits of a comprehensive convention for the avoidance of double taxation between that other

art 23(2) USA/UK DTA

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...
(e) a person described in sub-paragraph (a), (b) ... of paragraph 3 of Article 4 (Residence) of this Convention,[1] provided that, in the case of a person described in sub-paragraph (a) or (b) of that paragraph, more than 50% of the person's beneficiaries, members or participants are individuals who are residents of either Contracting State;

[3] See 9.27.3 (Charity/NPO).

State and the State from which the benefits of this Convention are claimed, and

B) with respect to income referred to in Articles 10 and 11 of this Convention, if the person were a resident of that other State entitled to all the benefits of that other convention, the person would be entitled, under such convention, to a rate of tax with respect to the particular class of income for which benefits are being claimed under this Convention that is at least as low as the rate applicable under this Convention; or

(iii) is a recognised pension fund to which subdivision (ii) of the definition of recognised pension fund in paragraph 1 of Article 3 applies, provided that it is established and operated exclusively or almost exclusively to invest funds for the benefit of entities or arrangements referred to in the preceding subdivision;

[1] See 9.27.1 (Pension scheme); 9.27.2 (Employee benefit trust).

110.2.7 *Structures*

Art 29(2) OECD Model provides:

> 2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...
>
> f) a person other than an individual, if
>
> (i) at that time and on at least half of the days of a twelve-month period that includes that time, persons who are residents of that Contracting State and that are entitled to the benefits of this Convention under subparagraph a), b), c) or e) own, directly or indirectly, shares representing at least 50% of the aggregate vote and value (and at least 50% of the aggregate vote and value of any

disproportionate class of shares) of the shares in the person, provided that, in the case of indirect ownership, each intermediate owner is a qualifying intermediate owner, and
(ii) less than 50% of the person's gross income, and less than 50% of the tested group's gross income, for the taxable period that includes that time, is paid or accrued, directly or indirectly, in the form of payments
[A] that are deductible for purposes of the taxes covered by this Convention in the person's Contracting State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property, and in the case of a tested group, not including intra-group transactions),
[B] to persons that are not residents of either Contracting State entitled to the benefits of this Convention under subparagraph a), b), c) or e) of this paragraph;

110.2.8 *Collective investment scheme*

Art 29(2) OECD Model provides:

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...
g) a collective investment vehicle [a definition of "collective investment vehicle" would then be included in paragraph 7]; *or*
g) a collective investment vehicle, but only to the extent that, at that time, the beneficial interests in the collective investment vehicle are owned by [residents of the Contracting Sate in which the collective investment vehicle is established or by[4]] equivalent beneficiaries; *or*
g) a collective investment vehicle, but only to the extent that, at that time, the beneficial interests in the collective investment vehicle are owned by residents of the Contracting State in which the collective investment vehicle is established.
or
g) a collective investment vehicle if the principal class of shares in the collective investment vehicle is listed and regularly traded on a recognised stock exchange.

Article 23 USA/UK DTA deals with unit trusts:

> (2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...

[4] Footnote original: The words "residents of the Contracting State in which the collective investment vehicle is established" would not be needed if the definition of "equivalent beneficiary" used for the purpose of that provision was identical to the detailed version of the definition of the term "equivalent beneficiary" in paragraph 7; see paragraph 145 below.

> (d) a person other than an individual or a company, if—
>
> (i) the principal class of units[5] in that person
>
> [a] is listed or admitted to dealings on a recognized stock exchange specified in clauses (i) or (ii) of sub-paragraph (a) of paragraph 7 of this Article and
>
> [b] is regularly traded on one or more recognised stock exchanges, or
>
> (ii) the direct or indirect owners of at least 50% of the beneficial interests in that person are qualified persons by reason of clause (i) of sub-paragraph (c) or clause (i) of this sub-paragraph;

110.2.9 *Trusts*

Article 23 USA/UK DTA deals with trusts

> (2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...
>
> (g) a trust or trustee of a trust in their capacity as such if at least 50% of the beneficial interest in the trust is held by persons who are either—
>
> (i) qualified persons by reason of sub-paragraphs (a), (b), clause (i) of sub-paragraph (c), clause (i) of sub-paragraph (d), or sub-paragraph (e) of this paragraph; or
>
> (ii) equivalent beneficiaries,
>
> provided that less than 50% of the gross income arising to such trust or trustee in their capacity as such for the taxable or chargeable period is paid or accrued, directly or indirectly, to persons who are not residents of either Contracting State in the form of payments that are deductible for the purposes of the taxes covered by this Convention in the Contracting State of which that trust or trustee is a resident (but not including arm's length payments in the ordinary course of business for services or tangible property and payments in respect of financial obligations to a bank, provided that where such a bank is not a

[5] Art 23(7) USA/UK DTA provides: (c) the term "units" as used in sub-paragraph (d) of paragraph 2 of this Article includes shares and any other instrument, not being a debt-claim, granting an entitlement to share in the assets or income of, or receive a distribution from, the person. The term "principal class of units" means the class of units which represents the majority of the value of the person. If no single class of units represents the majority of the value of the person, the "principal class of units" is those classes that in the aggregate represent the majority of the value of the person;

resident of a Contracting State such payment is attributable to a permanent establishment of that bank located in one of the Contracting States).

110.3 Active business

art 29(3) OECD Model	**art 23(3) USA/UK DTA**
3. a) A resident of a Contracting State shall be entitled to benefits under this Convention with respect to an item of income derived from the other Contracting State, regardless of whether the resident is a qualified person, if the resident is engaged in the active conduct of a business in the first-mentioned State and the income derived from the other State emanates from, or is incidental to, that business. For purposes of this Article, the term "active conduct of a business" shall not include the following activities or any combination thereof: (i) operating as a holding company; (ii) providing overall supervision or administration of a group of companies; (iii) providing group financing (including cash pooling); or (iv) making or managing investments, unless these activities are carried on by a bank or [list financial institutions similar to banks that the Contracting States agree to treat as such], insurance enterprise or registered securities dealer in the ordinary course of its business as such.	(a) Notwithstanding that a resident of a Contracting State may not be a qualified person, it shall be entitled to the benefits of this Convention with respect to an item of income, profit or gain derived from the other Contracting State, if the resident is engaged in the active conduct of a trade or business in the first-mentioned State (other than the business of making or managing investments for the resident's own account, unless these activities are banking, insurance or securities activities carried on by a bank, insurance company or registered securities dealer), the income, profit or gain derived from the other Contracting State is derived in connection with, or is incidental to, that trade or business and that resident satisfies any other specified conditions for the obtaining of such benefits.
b) If a resident of a Contracting State derives an item of income from a business activity conducted by that resident in the other Contracting State, or derives an item of income arising in the other State from a connected person, the conditions described in subparagraph a) shall be considered to be satisfied with respect to such item only if the business activity carried on by the resident in the first-mentioned	(b) If a resident of a Contracting State or any of its associated enterprises carries on a trade or business activity in the other Contracting State which gives rise to an item of income, profit or gain, sub-paragraph (a) of this paragraph shall apply to such item only if the trade or business activity in the first-mentioned State is substantial in relation to the trade or business activity in the other State. Whether a trade or

State to which the item is related is substantial in relation to the same or complementary business activity carried on by the resident or such connected person in the other Contracting State. Whether a business activity is substantial for the purposes of this paragraph shall be determined based on all the facts and circumstances.

business activity is substantial for the purposes of this paragraph shall be determined on the basis of all the facts and circumstances.

c) For purposes of applying this paragraph, activities conducted by connected persons with respect to a resident of a Contracting State shall be deemed to be conducted by such resident.

(c) In determining whether a person is engaged in the active conduct of a trade or business in a Contracting State under sub-paragraph (a) of this paragraph, activities conducted by a partnership in which that person is a partner and activities conducted by persons connected to such person shall be deemed to be conducted by such person. A person shall be connected to another if one possesses at least 50% of the beneficial interest in the other (or, in the case of a company, shares representing at least 50% of the aggregate voting power and value of the company or of the beneficial equity interest in the company) or another person possesses, directly or indirectly, at least 50% of the beneficial interest (or, in the case of a company, shares representing at least 50% of the aggregate voting power and value of the company or of the beneficial equity interest in the company) in each person. In any case, a person shall be considered to be connected to another if, on the basis of all the facts and circumstances, one has control of the other or both are under the control of the same person or persons.

110.4 Derivative Benefits

In the commentary on art 29(4), OECD offer various versions:

4. A company that is a resident of a Contracting State shall also be entitled to a benefit that would otherwise be accorded by this Convention if:

a) at the time when the benefit otherwise would be accorded and on at least half of the days of any twelve-month period that includes that time, at least 95% of the aggregate vote and value of its shares (and at least 50% of the aggregate vote and value of any disproportionate class of shares) is owned, directly or indirectly, by seven or fewer persons that are equivalent beneficiaries, provided that in the case of indirect ownership, each intermediate owner is a qualifying intermediate owner, and

b) less than 50% of the person's gross income, and less than 50% of the tested group's gross income, for the taxable period that includes that time, as determined in the person's Contracting State of residence, is paid or accrued, directly or indirectly, in the form of payments that are deductible for purposes of the taxes covered by this Convention in the person's Contracting State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property, and in the case of a tested group, not including intra-group transactions)
   i) to persons that are not equivalent beneficiaries;
   ii) to persons that are equivalent beneficiaries only by reason of paragraph 5 of this Article or of a substantially similar provision in the relevant comprehensive convention for the avoidance of double taxation;
   iii) to persons that are equivalent beneficiaries that are connected persons with respect to the company described in this paragraph and that benefit from a special tax regime, as defined in [reference to the paragraph of the convention that includes the definition of "special tax regime"] of this Convention, with respect to the deductible payment, provided that if the relevant comprehensive convention for the avoidance of double taxation does not contain a definition of a special tax regime analogous to the definition of that term included in this Convention, the principles of that definition shall apply, but without regard to the requirement in subdivision (v) of that definition; or iv) with respect to a payment of interest, to persons that are equivalent beneficiaries that are connected persons with respect to the company described in this paragraph and that benefit from notional deductions of the type described in [reference to the paragraph of Article 11 that relates to notional deductions for equity].

Alternatively:

4. A company that is a resident of a Contracting State shall also be entitled to a benefit that would otherwise be accorded by this Convention if:[6]

a) at the time when the benefit otherwise would be accorded and on at least

[6] or: 4. A company that is a resident of a Contracting State shall also be entitled to a benefit that would otherwise be accorded under Article 10 if:

half of the days of any twelve-month period that includes that time, at least 95% of the aggregate vote and value of its shares (and at least 50% of the aggregate vote and value of any disproportionate class of shares) is owned, directly or indirectly, by seven or fewer persons that are equivalent beneficiaries, provided that in the case of indirect ownership, each intermediate owner is a qualifying intermediate owner, and

b) less than 50% of the person's gross income, and less than 50% of the tested group's gross income, for the taxable period that includes that time, as determined in the person's Contracting State of residence, is paid or accrued, directly or indirectly, in the form of payments that are deductible for purposes of the taxes covered by this Convention in the person's Contracting State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property, and in the case of a tested group, not including intra-group transactions)
   i) to persons that are not equivalent beneficiaries; or
   ii) to persons that are equivalent beneficiaries only by reason of paragraph 5 of this Article or of a substantially similar provision in the relevant comprehensive convention for the avoidance of double taxation.

OECD simplified version is:

> 4. A resident of a Contracting State that is not a qualified person shall nevertheless be entitled to a benefit that would otherwise be accorded by this Convention with respect to an item of income if, at the time when the benefit otherwise would be accorded and on at least half of the days of any twelvemonth period that includes that time, persons that are equivalent beneficiaries own, directly or indirectly, at least 75% of the shares of the resident.

Article 23(3) USA/UK DTA provides:

> Notwithstanding that a company that is a resident of a Contracting State may not be a qualified person, it shall be entitled to the benefits of this Convention otherwise accorded to residents of a Contracting State with respect to an item of income, profit or gain if it satisfies any other specified conditions for the obtaining of such benefits and—
>
> (a) shares representing at least 95% of the aggregate voting power and value of the company are owned, directly or indirectly, by seven or fewer persons who are equivalent beneficiaries; and
>
> (b) less than 50% of the company's gross income for the taxable or chargeable period in which the item of income, profit or gain arises is paid or accrued, directly or indirectly, to persons who are not equivalent beneficiaries, in the form of payments that are deductible for the purposes of the taxes covered by this

Convention in the State of which the company is a resident (but not including arm's length payments in the ordinary course of business for services or tangible property and payments in respect of financial obligations to a bank, provided that where such a bank is not a resident of a Contracting State such payment is attributable to a permanent establishment of that bank located in one of the Contracting States).

110.5 Principal purpose test

LoB provides a principal purpose test for persons who would otherwise lose the benefit of the DTA. In other words, the LoB rule is a safe haven rule specifying those who do not need to pass the PPT:

OECD model	**USA/UK DTA art 23(6)**
5/6. If a resident of a Contracting State is neither a qualified person pursuant to the provisions of paragraph 2 of this Article, nor entitled to benefits under paragraph 3[or 4 (simplified version)] [, 4 or 5 (detailed version)], the competent authority of the Contracting State in which benefits are denied under the previous provisions of this Article may, nevertheless, grant the benefits of this Convention, or benefits with respect to a specific item of income or capital, taking into account the object and purpose of this Convention, but only if such resident demonstrates to the satisfaction of such competent authority that neither its establishment, acquisition or maintenance, nor the conduct of its operations, had as one of its principal purposes the obtaining of benefits under this Convention. The competent authority of the Contracting State to which a request has been made, under this paragraph, by a resident of the other State, shall consult with the competent authority of that other State before either granting or denying the request.	(6) A resident of a Contracting State that is neither a qualified person nor entitled to benefits with respect to an item of income, profit or gain under paragraph 3 or 4 of this Article shall, nevertheless, be granted benefits of this Convention with respect to such item if the competent authority of the other Contracting State determines that the establishment, acquisition or maintenance of such resident and the conduct of its operations did not have as one of its principal purposes the obtaining of benefits under this Convention. The competent authority of the other Contracting State shall consult with the competent authority of the first-mentioned State before refusing to grant benefits of this Convention under this paragraph.

An Exchange of Notes provides:

With reference to paragraph 6 of Article 23 (Limitation on benefits)—it is understood that in applying paragraph 6 of Article 23, the competent authorities will consider the obligations imposed upon the UK by its membership of the European Community and by its being a party to the European Economic Area Agreement, and on the United States by its being a party to the North American Free Trade Agreement. In particular, they will have regard to any legal requirements for the facilitation of the free movement of capital and persons, the differing internal tax systems, tax incentive regimes and existing tax treaty policies among Member States of the European Community or European Economic Area states, or, as the case may be, parties to the North American Free Trade Agreement.

Paragraph 6 of Article 23 requires the competent authority of the State from which benefits are claimed to consider whether the establishment, acquisition or maintenance of a resident and the conduct of its operations had as one of its principal purposes the obtaining of benefits under the Convention. That competent authority may determine under a given set of facts that a change in circumstances that would cause a qualified person to cease to qualify for treaty benefits under paragraph 2 of Article 23 need not result in a denial of benefits. Such changes in circumstances may include—

(a) a change in the state of residence of a major participator in a company;

(b) the sale of part of the ownership interests in a company to a resident of another Member State of the European Community or another European Economic Area state or, as the case may be, another party to the North American Free Trade Agreement; or

(c) an expansion of a company's activities in other Member States of the European Community or other European Economic Area states or, as the case may be, other parties to the North American Free Trade Agreement,

all under ordinary business conditions.

If the competent authority is satisfied that these changed circumstances are not attributable to tax avoidance motives, this will be a factor weighing in favour of granting benefits in accordance with paragraph 6 of Article 23.

110.6 LoB: Definitions

110.6.1 *Recognised Stock Exchange*

This is straightforward:

OECD detailed version	**Simplified version**	
OECD Art 29(7)(a)	**OECD Art 29(6)**	**Art 23(7)(a) USA/UK DTA**
the term “recognised stock exchange” means:	[identical]	[identical]
(i) [list of stock exchanges agreed to at the time of signature]; and	(i) any stock exchange established and regulated as such under the laws of either Contracting State; and	(i) the NASDAQ System and any stock exchange registered with the US Securities and Exchange Commission as a national securities exchange under the US Securities Exchange Act of 1934; (ii) the London Stock Exchange and any other recognised investment exchange within the meaning of the Financial Services Act 1986 or, as the case may be, the Financial Services and Markets Act 2000; (iii) the Irish Stock Exchange, the Swiss Stock Exchange and the stock exchanges of Amsterdam, Brussels, Frankfurt, Hamburg, Johannesburg, Madrid, Milan, Paris, Stockholm, Sydney, Tokyo, Toronto and Vienna; and
(ii) any other stock exchange agreed upon by the competent authorities of the Contracting States;	[identical to OECD detailed version]	(iv) any other stock exchange which the competent authorities agree to recognise for the purposes of this Article;

110.6.2 *“Shares”*

OECD Model (simplified and detailed version) provides:

> b) with respect to entities that are not companies, the term “shares” means interests that are comparable to shares

OECD commentary provides:

> 120. Neither the simplified nor the detailed version contains an exhaustive definition of the term “shares”, which, under paragraph 2 of Article 3, should generally have the meaning which it has under the domestic law of the State that applies the Article. Subparagraph b), however, provides that the term “shares”, when used with respect to entities that do not issue shares (e.g. trusts), refers to interests that are

> comparable to shares. These will typically be beneficial interests that entitle their holders to a share of the income or assets of the entity.

This applies to unit trusts.

Art 23(7)(b)(ii) USA/UK DTA provides:

> the term "shares" shall include depository receipts thereof or trust certificates thereof;

110.6.3 *"Principal class of shares"*

OECD detailed version	**Art 23(7)(b)(i) USA/UK DTA**
c) the term "principal class of shares" means the ordinary or common shares of the company or entity, provided that such class of shares represents the majority of the aggregate vote and value of the company or entity. If no single class of ordinary or common shares represents the majority of the aggregate vote and value of the company or entity, the "principal class of shares" are those classes that in the aggregate represent a majority of the aggregate vote and value;	the term "principal class of shares" means the ordinary or common shares of the company, provided that such class of shares represents the majority of the voting power and value of the company. If no single class of ordinary or common shares represents the majority of the aggregate voting power and value of the company, the "principal class of shares" is that class or those classes that in the aggregate represent a majority of the aggregate voting power and value of the company;

OECD simplified version provides:

> c) the term "principal class of shares" means the class or classes of shares of a company or entity which represents the majority of the aggregate vote and value of the company or entity;

110.6.4 *"Connected person"*

OECD Model simplified & detailed versions provides:

> d) two persons shall be "connected persons" if one owns, directly or indirectly, at least 50% of the beneficial interest in the other (or, in the case of a company, at least 50% of the aggregate vote and value of the company's shares) or another person owns, directly or indirectly, at least 50% of the beneficial interest (or, in the case of a company, at least 50% of the aggregate vote and value of the company's shares) in each person. In any case, a person shall be

connected to another if, based on all the relevant facts and circumstances, one has control of the other or both are under the control of the same person or persons.

110.6.5 *Regularly traded*

Art 23(7)(e) USA/UK DTA provides:

> For the purposes of paragraph 2 of this Article, the shares in a class of shares or the units in a class of units are considered to be regularly traded on one or more recognised stock exchanges in a chargeable or taxable period if the aggregate number of shares or units of that class traded on such stock exchange or exchanges during the twelve months ending on the day before the beginning of that taxable or chargeable period is at least six per cent of the average number of shares or units outstanding in that class during that twelve-month period.

An Exchange of Notes provides:

> With reference to sub-paragraph (e) of paragraph 7 of Article 23 (Limitation on benefits)—
> it is understood that, if a class of shares was not listed on a recognised stock exchange in the twelve months referred to in the sub-paragraph, that class of shares will be treated as regularly traded only if that class meets the aggregate trading requirements of the sub-paragraph for the taxable or chargeable period in which the income arises.

110.6.6 *Equivalent beneficiary*

OECD Model detailed version provides:

> e) the term "equivalent beneficiary" means:
> (i) a resident of any State, provided that:
> A) the resident is entitled to all the benefits of a comprehensive convention for the avoidance of double taxation between that State and the Contracting State from which the benefits of this Convention are sought, under provisions substantially similar to subparagraph a), b), c) or e) of paragraph 2 or, when the benefit being sought is with respect to interest or dividends paid by a member of the resident's multinational corporate group, the resident is entitled to benefits under provisions substantially similar to paragraph 5 of this Article in such convention, provided that, if such convention does not contain a detailed limitation on benefits article, such convention shall be applied as if the provisions of subparagraphs a) b), c) and e) of paragraph 2 (including the definitions relevant to the application of the tests in such subparagraphs) were contained in such convention; and

B) 1) with respect to income referred to in Article 10, 11 or 12, if the resident had received such income directly, the resident would be entitled under such convention, a provision of domestic law or any international agreement, to a rate of tax with respect to such income for which benefits are being sought under this Convention that is less than or equal to the rate applicable under this Convention. Regarding a company seeking, under paragraph 4, the benefits of Article 10 with respect to dividends, for purposes of this subclause:

I) if the resident is an individual, and the company is engaged in the active conduct of a business in its Contracting State of residence that is substantial in relation, and similar or complementary, to the business that generated the earnings from which the dividend is paid, such individual shall be treated as if he or she were a company. Activities conducted by a person that is a connected person with respect to the company seeking benefits shall be deemed to be conducted by such company. Whether a business activity is substantial shall be determined based on all the facts and circumstances; and

II) if the resident is a company (including an individual treated as a company), to determine whether the resident is entitled to a rate of tax that is less than or equal to the rate applicable under this Convention, the resident's indirect holding of the capital of the company paying the dividends shall be treated as a direct holding; or

2) with respect to an item of income referred to in Article 7, 13 or 21 of this Convention, the resident is entitled to benefits under such convention that are at least as favourable as the benefits that are being sought under this Convention; and

C) notwithstanding that a resident may satisfy the requirements of clauses A) and B) of this subdivision, where the item of income has been derived through an entity that is treated as fiscally transparent under the laws of the Contracting State of residence of the company seeking benefits, if the item of income would not be treated as the income of the resident under a provision analogous to paragraph 2 of Article 1 had the resident, and not the company seeking benefits under paragraph 4 of this Article, itself owned the entity through which the income was derived by the company, such resident shall not be considered an equivalent beneficiary with respect to the item of income;

(ii) a resident of the same Contracting State as the company seeking benefits under paragraph 4 of this Article that is entitled to all the benefits of this Convention by reason of subparagraph a), b), c) or e) of paragraph 2 or, when the benefit being sought is with respect to interest or dividends paid by a member of the resident's multinational corporate group, the resident is entitled to benefits under paragraph 5, provided that, in the case of a resident described in paragraph 5, if the resident had received such interest or dividends directly, the resident would be entitled to a rate of tax with respect to such income that is less than or equal to the rate applicable under this Convention to the company seeking benefits under paragraph 4; or

(iii) a resident of the Contracting State from which the benefits of this Convention are sought that is entitled to all the benefits of this Convention by reason of subparagraph a), b), c) or e) of paragraph 2, provided that all such residents' ownership of the aggregate vote and value of the shares (and any disproportionate class of shares) of the company seeking benefits under paragraph 4 does not exceed 25 per cent of the total vote and value of the shares (and any disproportionate class of shares) of the company.

Art 23(7)(d) USA/UK DTA provides:

an equivalent beneficiary is a resident of a Member State of the European Community or of a European Economic Area state or of a party to the North American Free Trade Agreement but only if that resident-

(i) (a) would be entitled to all the benefits of a comprehensive convention for the avoidance of double taxation between any Member State of the European Community or a European Economic Area state or any party to the North American Free Trade Agreement and the Contracting State from which the benefits of this Convention are claimed, provided that if such convention does not contain a comprehensive limitation on benefits article, the person would be a qualified person under paragraph 2 of this Article (or for the purposes of sub-paragraph (g) of paragraph 2, under the provisions specified in clause (i) of that sub-paragraph) if such person were a resident of one of the Contracting States under Article 4 (Residence) of this Convention; and

(b) with respect to income referred to in Article 10 (Dividends), 11 (Interest), 12 (Royalties) of this Convention, would be entitled under such convention to a rate of tax with respect to the particular class of income for which benefits are being claimed under this Convention that is at least as low as the rate applicable under this Convention; or

(ii) is a qualified person by reason of sub-paragraphs (a), (b), clause (i) of sub-paragraph (c), clause (i) of sub-paragraph (d), or sub-paragraph (e) of paragraph 2 of this Article.

For the purposes of applying paragraph 3 of Article 10 (Dividends) in order to determine whether a person, owning shares, directly or

> indirectly, in the company claiming the benefits of this Convention, is an equivalent beneficiary, such person shall be deemed to hold the same voting power in the company paying the dividend as the company claiming the benefits holds in such company.

CIOT ask:

> the US Limitation of Benefits tests includes tests for 'derivative benefits' and 'equivalent beneficiaries', which in some cases require investors to be located in the European Union (or EEA). We would be interested to understand what (if anything) HMRC is able to do to ensure continuation of benefits under the treaties between the US and other EU Member States with UK investors.[7]

110.6.7 *"Disproportionate class of shares"*

OECD Model detailed version provides:

> f) the term "disproportionate class of shares" means any class of shares of a company or entity resident in one of the Contracting States that entitles the shareholder to disproportionately higher participation, through dividends, redemption payments or otherwise, in the earnings generated in the other Contracting State by particular assets or activities of the company;

110.6.8 *"Primary place of management and control"*

OECD Model detailed version provides:

> g) a company's or entity's "primary place of management and control" is in the Contracting State of which it is a resident only if:
>
> (i) the executive officers and senior management employees of the company or entity exercise day-to-day responsibility for more of the strategic, financial and operational policy decision making for the company or entity and its direct and indirect subsidiaries, and the staff of such persons conduct more of the day-to-day activities necessary for preparing and making those decisions, in that Contracting State than in any other State; and
>
> (ii) such executive officers and senior management employees exercise day-to-day responsibility for more of the strategic, financial and operational policy decision-making for the

[7] Letter , 4 December 2019 *https://library.croneri.co.uk/system/files/assets/tat/cch_uk/tat/pdf%3A05-12-19-review-of-double-taxation-treaties-2019-20-ciot-response.pdf*

company or entity and its direct and indirect subsidiaries, and the staff of such persons conduct more of the day-to-day activities necessary for preparing and making those decisions, than the officers or employees of any other company or entity;

110.6.9 *"Qualifying intermediate owner"*

OECD Model detailed version provides:

> h) the term "qualifying intermediate owner" means an intermediate owner that is either:
> (i) a resident of a State that has in effect with the Contracting State from which a benefit under this Convention is being sought a comprehensive convention for the avoidance of double taxation; or
> (ii) a resident of the same Contracting State as the company applying the test under subparagraph d) or f) of paragraph 2 or paragraph 4 to determine whether it is eligible for benefits under the Convention.

110.6.10 *"Tested group"*

OECD Model detailed version provides:

> i) the term "tested group" means the resident of a Contracting State that is applying the test under subparagraph d) or f) of paragraph 2 or under paragraph 4 or 5 to determine whether it is eligible for benefits under the Convention (the "tested resident"), and any company or permanent establishment that:
> (i) participates as a member with the tested resident in a tax consolidation, fiscal unity or similar regime that requires members of the group to share profits or losses; or
> (ii) shares losses with the tested resident pursuant to a group relief or other loss sharing regime in the relevant taxable period.

110.6.11 *Share class arrangements*

Article 23(5) USA/UK DTA provides:

> Notwithstanding the preceding provisions of this Article, if a company that is a resident of a Contracting State, or a company that controls such a company, has outstanding a class of shares—
> (a) which is subject to terms or other arrangements which entitle its holders to a portion of the income, profit or gain of the company derived from the other Contracting State that is larger than the portion such holders would receive in the

absence of such terms or arrangements; and

(b) 50% or more of the voting power and value of which is owned by persons who are not equivalent beneficiaries,

the benefits of this Convention shall apply only to that proportion of the income which those holders would have received in the absence of those terms or arrangements.

110.6.12 *Gross income*

OECD Model detailed version provides:

> j) the term "gross income" means gross receipts as determined in the person's Contracting State of residence for the taxable period that includes the time when the benefit would be accorded, except that where a person is engaged in a business that includes the manufacture, production or sale of goods, "gross income" means such gross receipts reduced by the cost of goods sold, and where a person is engaged in a business of providing non-financial services, "gross income" means such gross receipts reduced by the direct costs of generating such receipts, provided that:
>
> (i) except when relevant for determining benefits under Article 10 of this Convention, gross income shall not include the portion of any dividends that are effectively exempt from tax in the person's Contracting State of residence, whether through deductions or otherwise; and
>
> (ii) except with respect to the portion of any dividend that is taxable, a tested group's gross income shall not take into account transactions between companies within the tested group;

An Exchange of Notes provides:

> With reference to Article 23 (Limitation on benefits)—
> it is understood that the term "gross income" means the total revenues derived by a resident of a Contracting State from its principal operations, less the direct costs of obtaining such revenues.

110.6.13 *In connection with business*

An Exchange of Notes provides:

> With reference to paragraph 4 of Article 23 (Limitation on benefits)—
> it is understood that an item of income, profit or gain is to be considered as derived "in connection" with an active trade or business in a Contracting State if the activity generating the item in the other Contracting State is a line of business which forms a part of, or is

> complementary to, the trade or business conducted in the first-mentioned State. The line of business in the first-mentioned State may be "upstream" to that going on in the other State (eg providing inputs to a manufacturing process that occurs in that other State), "downstream" (eg selling the output of a manufacturer which is a resident of the other State) or "parallel" (eg selling in one Contracting State the same sorts of products that are being sold by the trade or business carried on in the other Contracting State).

110.6.14 *Incidental to business*

An Exchange of Notes provides:

> It is understood that an item of income, profit or gain derived from a Contracting State would be considered "incidental" to the trade or business carried on in the other Contracting State if the item is not produced by a line of business which forms a part of, or is complementary to, the trade or business conducted in that other Contracting State by the recipient of the item, but the production of such item facilitates the conduct of the trade or business in that other Contracting State. An example of such "incidental" item of income, profit or gain is interest income earned from the short-term investment of working capital of a resident of a Contracting State in securities issued by persons in the other Contracting State.

110.7 Channel Islands/IoM LoB

Jersey/Guernsey//IoM have non-standard LoB provisions in arts 11-13 [Interest/Royalties/Capital gains]. Article 11 Jersey/UK DTA provides:

> 1. Interest arising in a Territory and beneficially owned by a resident of the other Territory may be taxed in that other Territory.
> 2. However, interest arising in a Territory may also be taxed in that Territory according to the laws of that Territory, but if
> [a] the beneficial owner of the interest is a resident of the other Territory and
> [b] at least one of the conditions mentioned in paragraph 3 is met,
> that interest shall be taxable only in that other Territory.

110.7.1 *Conditions for full relief*

So full relief is in principle available if the art 11(3) conditions are met. Article 11(3) Jersey/UK DTA provides:

> The conditions mentioned in paragraph 2 are that:
> (a) the interest is beneficially owned by:

There follows a list of 8 items which broadly correspond to "qualified person" in the OECD Model/USA DTA:

> (i) that other Territory itself, one of its political subdivisions, local authorities, its Central Bank, or its statutory bodies;[8]
> (ii) an individual;
> (iii) a company in whose principal class of shares there is substantial and regular trading on a recognised stock exchange;[9]
> (iv) a company less than 25% of whose shares or other rights are owned,[10] directly or indirectly, by persons who are not residents of that other Territory;
> (v) a pension scheme;[11]
> (vi) a bank or building society;
> (vii) any other financial institution unrelated to and dealing wholly independently with the payer;[12] or
> (viii) any other person provided that the competent authority of the Territory which has to grant the benefits determines that
> [A] the establishment, acquisition or maintenance of that person, or
> [B] the conduct of its operations,
> does not have as its principal purpose or one of its principal purposes to secure the benefits of this Article;

Lastly, art 11(3) Jersey/UK DTA provides:

> The conditions mentioned in paragraph 2 are that ...

[8] Defined in art 11(4): "For the purposes of paragraph 3(a)(i), the term "statutory bodies" includes any institution wholly or mainly owned directly or indirectly by the Government of either Territory as may be agreed from time to time by exchange of letters between the competent authorities of the Territories."

[9] The Protocol provides a definition of this term.

[10] The context suggests that this means owned beneficially, not by a trust.

[11] Defined in art 3(1)(k): "the term "pension scheme" means any scheme or other arrangement which:
(i) is generally exempt from income taxation; and
(ii) operates to administer or provide pension or retirement benefits or to earn income for the benefit of one or more such arrangements."

[12] Defined in para (vii): the term "other financial institution" here means an enterprise substantially deriving its profits by raising debt finance in the financial markets or by taking deposits at interest and using those funds in carrying on a business of providing finance.

(b) the interest is paid by a Territory, one of its political subdivisions, local authorities or statutory bodies.

107.1 (DT reliefs: Introduction)

111.1 Credit for foreign tax

Foreign tax credit arises where a UK tax liability is reduced by foreign tax. This chapter considers foreign tax credit for IT/CGT/CT.[1]

The term sometimes used is "Foreign Tax Credit Relief" (FTCR). The credit may be:

Relief (my term)	**Statutory term**	**Given by**[2]	**See para**
DTA Credit	Credit under s.18(2)	DTA	111.2
Unilateral Credit	Unilateral relief arrangements		
Generally	Credit under s.9	s.9 TIOPA	111.2
Accrued income profits	Credit under s.9 or 10	s.9,10 TIOPA	28.16.2
Foreign Tax Credits (all types)	Credit under s.18(2)	s.18(2) TIOPA	111.12
Underlying relief	tax on co profits from which dividend paid		

I write the terms DTA Credit/Unilateral Credit with initial capitals to reflect the technical nature of the terms, and I use the term FTC to apply to both.

I do not consider:

- Relief for UK resident companies, subject to corporation tax
- Relief for underlying tax

I hope to cover these in a future edition.

111.1.1 *Unilateral relief arrangements*

Section 8(1) TIOPA defines this term:

> In this Part [Part 2 TIOPA] "unilateral relief arrangements", in relation to a territory outside the UK, means the rules set out in sections 9 to 17.

Unilateral relief dates from 1950.

[1] For IHT, see 120.1 (Credit for foreign IHT).

[2] Supplemented in each case by Part 2 TIOPA

111.1.2 *FTC policy background*

The Royal Commission on the Taxation of Profits and Income provides:[3]

> The system of relief is founded on acceptance of the principle that, when double taxation tends to arise, the aim should be either–
>
> (1) an arrangement between the two countries as to which of them is to have the exclusive right of taxing particular kinds of income, or
>
> (2) if other kinds of income are agreed to be capable of being taxed by two countries, an arrangement as to how the two taxes are to be adjusted between them and which is to have priority of claim.

(1) is the exemption method and (2) is the credit method, which is the topic of this chapter.

> Under (2) the normal basis of adjustment appears to be that the taxpayer's home country (which taxes him on the grounds of residence) should do no more than bring up the weight of the foreign tax to the home tax, treating the two virtually as one composite tax on whatever income may be in question. So far as the owner of the income is concerned the grant by his home country of credit for the foreign tax paid against the home tax prospectively payable on the same income means that the income is effectively diminished by an amount equal to, but not more than, the higher of the two taxes.

111.2 DTA/Unilateral Credit compared

DTA Credit depends on the wording of the DTA in point. OECD Model provides two alternative forms of relief, in articles 23 A/B, described as the exemption/credit methods. UK DTAs generally adopt a credit method, and there is a relatively standard form, but it does not follow the OECD wording.

It is helpful to read side by side:

- DTA Credit (I take the USA/UK DTA as an example) and
- s.9(1)(2) TIOPA, which provide Unilateral Credit for IT/CT and CGT

Art 24(4) USA/UK DTA	**s.9(1) TIOPA: IT/CT**	**s.9(2) TIOPA: CGT**
Subject to the provisions of the law of the UK regarding the allowance as a credit against UK tax of tax payable in a territory outside the UK (which		

[3] Final Report (1953) Cmd 9474.

shall not affect the general principle hereof)—		
	Credit for tax—	[Identical to s.9(1)]
(a) United States tax payable under the laws of the United States and in accordance with this Convention, whether directly or by deduction,	(a) paid under the law of the territory,	[Identical to s.9(1)]
on profits, income or chargeable gains from sources within the United States	(b) calculated by reference to income arising, or any chargeable gain accruing, in the territory, and	(b) calculated by reference to any capital gain accruing in the territory, and
(excluding, in the case of a dividend, United States tax in respect of the profits out of which the dividend is paid)		
	(c) corresponding to UK tax,	[Identical to s.9(1)]
shall be allowed as a credit against any UK tax computed by reference to the same profits, income or chargeable gains by reference to which the United States tax is computed;	is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.	is to be allowed against any capital gains tax calculated by reference to that gain.

The differences between DTA/Unilateral Credit do not seem significant:

Requirement	**Comment**
Incorporation of general TIOPA rules	In opening words of DTA; not needed for Unilateral Credit
Tax paid/payable under laws of the territory	
Tax payable in accordance with DTA	Necessarily, applies to DTA only
...whether directly or by deduction...	Phrase not found in Unilateral Credit, but not significant
Foreign tax corresponds to UK tax	Unilateral Credit only (not needed for DTA as foreign tax is defined)

For Unilateral Credit, ss.9(1)(2) are identical, except that one refers to IT/CT, and the other refers to CGT. I comment on s.9(1) below but the same points will apply to s.9(2).

111.3 TIOPA restrictions on FTCR

DTAs incorporate the restrictions on FTCR which are set out in TIOPA. The wording varies, and I here set out for comparison the opening words of the Credit article of 2 sample DTAs:

USA/UK Credit art 24(4)	**Austria/UK Credit art24 (1)**
[*Proviso A*:] Subject to the provisions of the law of the UK regarding the allowance as a credit [i] against UK tax [ii] of tax payable in a territory outside the UK	[*Proviso A*:] Subject to the provisions of the law of the UK regarding the allowance as a credit [i] against UK tax [ii] of tax payable in a territory outside the UK
	[*Proviso B*] or, as the case may be, regarding the exemption from UK tax [i] of a dividend arising in a territory outside the UK or [ii] of the profits of a permanent establishment situated in a territory outside the UK
(which shall not affect the general principle hereof)–	[identical]

Proviso A (my terminology) authorises restrictions on FTCR under UK domestic law, such as:

- s.25-s.27 TIOPA (cases where credit not allowed)
- s.81-s.88 TIOPA (anti-avoidance)
- The GAAR

Of course these restrictions apply equally to Unilateral Credit.

111.4 Which foreign taxes give credit

Art 24(4) USA/UK DTA	**s.9(1) TIOPA: Unilateral Credit**
United States tax payable under the laws of the United States...shall be	Credit for tax (a) paid under the law of the

allowed as a credit against any UK tax	territory,... (c) corresponding to UK tax, is to be allowed against any income tax or corporation tax

111.4.1 *Which taxes: DTA Credit*

The USA/UK refers to "United States tax". The last sentence of art 24(4) USA/UK DTA incorporates the definition by reference:

> For the purposes of this paragraph, the income taxes referred to
> [i] in clause (i) of sub-paragraph (a) of paragraph 3[4] and
> [ii] in paragraph 4[5]
> of Article 2 (Taxes covered) of this Convention
> shall be considered United States tax.

111.4.2 *Which taxes: Unilateral Credit*

Section 9 TIOPA refers to tax "paid under the law of the territory". Section 8(2) TIOPA provides:

> In sections 11 to 17, and in Chapter 2 (except section 29) in its application to relief under unilateral relief arrangements, references to tax payable or paid under the law of a territory outside the UK include only—
> (a) taxes which are charged on income and which correspond to income tax,
> (b) taxes which are charged on income or chargeable gains and which correspond to corporation tax, and
> (c) taxes which are charged on capital gains and which correspond to capital gains tax.

Since this is expressed to apply only for the specified sections, the rule has to be set out again in s.9(4)(5) TIOPA.

"Correspondence" is a matter of degree. Section 8(3) TIOPA provides that local/provincial taxes may "correspond" to IT/CGT/CT, even though the latter are UK-wide taxes.[6]

[4] This refers to Federal income taxes imposed by the Internal Revenue Code (excluding social security taxes).

[5] This refers to identical/substantially similar taxes imposed in addition to/in place of existing taxes.

[6] See 43.3.5 (Devolved rates: DTAs).

> For the purposes of subsection (2), tax may correspond to income tax, corporation tax or capital gains tax even though it—
> (a) is payable under the law of a province, state or other part of a country, or
> (b) is levied by or on behalf of a municipality or other local body.

Since this is expressed to apply only for the specified sections, the rule has to be set out again in s.9(6) and 29(4) TIOPA.

The Royal Commission on the Taxation of Profits and Income Final Report provides:[7]

> 699. Some limitation to taxes that can be said to be in some sense equivalent to UK income tax and profits must, we think, be accepted. The forms of the taxes imposed throughout the world are multifarious and defy precise classification, but a "non-corresponding" tax will frequently belong to one or other of these four types—
> (1) a tax on articles of consumption comparable to the taxation administered in this country by the Commissioners of Customs and Excise—e.g., a general turnover tax having affinities with the UK purchase tax;
> (2) a payroll tax levied on employers as a contribution to the finances of a social security scheme;
> (3) a payment in the nature of a recurrent royalty which is exacted in return for the right to exploit certain natural resources;
> (4) a levy on real property appropriated towards the expenses of local government.
>
> Where trade is carried on in this country the trader's expenditure may well include the payment of excise duties, employer's national insurance contributions, mining royalties or local rates. It has never been suggested that his outlay of this sort should serve as an acquittance of the income tax and profits tax presumptively due from him. His outlay is simply a particular part of the costs he incurs for the purposes of his trade and the situation is sufficiently met by allowing him a deduction in arriving at the amount effectively charged as representing his net profit. If, however, parallel outlay in the case of trading operations that take place overseas, which is now a deduction in computing net taxable profit, were permitted instead to rank for tax credit relief the trader operating overseas would *pro tanto* receive more favourable tax treatment than that accorded when the trade is in this country. Each overseas tax ought to be tested on its own merits; and in the case of the overseas taxes under discussion we can see no way of devising a general rule to define how far, if at all, any of them ought to be regarded as a levy on the profits themselves rather

[7] (1953) Cmd 9474.

than a working expense in computing them. We therefore consider that the rule requiring the overseas tax to "correspond" to UK income or profits tax should be maintained.

700. In reaching this conclusion we have not ignored the fact that there may be territories which, for administrative or other reasons, are accustomed to rely upon such taxes as import and export duties for a much larger proportion of the total revenue than does a country with a fully developed system of taxes on profits and income. The duties levied in such a territory can be assumed to be in substitution for the taxation of profits and income that might have been levied there had conditions been more favourable; consequently, it is said, those duties do correspond in a special sense to UK income and profits tax. Nevertheless, we think that a general provision for unilateral relief much deal with broad categories only; a limited exception to the rule of correspondence for the purpose of meeting this situation would involve insuperable difficulties of demarcation.

111.5 Same income rule

Art 24(4) USA/UK DTA	**s.9(1) TIOPA: Unilateral Credit**
United States tax ... on profits, income or chargeable gains from sources within the United States ...	Credit for [foreign] tax ... (b) calculated by reference to income arising, or any chargeable gain accruing, in the territory ...
shall be allowed as a credit against any UK tax computed by reference to the same profits, income or chargeable gains by reference to which the United States tax is computed	is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.

I refer to this as the **"same income rule"**.

As far as this rule is concerned, there is no difference between DTA Credit and Unilateral Credit.[8]

111.5.1 *The same: pragmatic approach*

In *Anson v HMRC*:[9]

[8] This is self-evident, but if authority is needed, see *Anson v HMRC* [2015] UKSC 44. This concerned both types of Credit, DTA Credit for federal tax and Unilateral Credit for state tax; the SC clearly assumed that the same principles applied for both.

[9] [2015] UKSC 44 at [114]. See too at [53] suggesting "a less technical approach than that ordinarily adopted in UK tax law".

> The words 'the same' are ordinary English words. It should however be borne in mind that a degree of pragmatism in their application may be necessary in some circumstances if the object of the Convention is to be achieved.

What is "the same" raises the question of identity. Despite apparent rigidity, identity is a matter of degree. (Is the reader the same person as when they left school? or in the classical formation, can a person step into the same river twice? Discuss.) What is required is sufficient similarity. The courts have generally reached - there is no other word - similar conclusions in other contexts where the question of identity arises.[10] But pragmatism is particularly needed in the context of DTCs which are intended to relieve double taxation, and which are not drafted with the precision of a UK tax statute, because they have to use wording applicable in the foreign state as well as in the UK.[11]

But in the context of DT exemption (as opposed to FTCR) the courts have not allowed any degree of pragmatism, with the consequence that the object of the DTA was not achieved.[12]

For the application of the same income rule in the context of LLCs, see 90.46 (LLC: US tax credit).

The INT Manual provides:

> **INTM161040: double taxation relief: Same income** [Dec 2023]
> [The Manual refers to the same income rule and continues:]
> As held by the Supreme Court in *Anson v HMRC* [2015] UKSC 44, the approach to take when considering whether the same profits, income or gains have been taxed in both countries is to:
> 1. Identify the profits, income or gains by reference to which the UK tax liabilities are computed. As confirmed by the Supreme Court, this is primarily a question of UK tax law. How the person is taxed in the foreign country is not relevant to this part of the analysis...
> 2. Identify the profits, income or gains by reference to which the foreign tax liabilities are computed. This is primarily a question of foreign tax law. Officers should seek copies of the foreign tax returns and

[10] See 51.6.2 (Identity of income condition). The level or type of similarity required may vary from one context to another, so cases from other areas are not directly applicable here, but what matters is the general approach, ie that what is "the same" is a matter of degree.

[11] See 107.10.3 (DTA/UK statutes compared).

[12] See 61.60.1 (Trustee treaty-resident outside UK).

> computations to evidence this.
> 3. Compare whether the profits, income and gains identified as above are the "same".
> As held by the Supreme Court, a degree of pragmatism may need to be applied when deciding whether the tax in both countries has been computed by reference to the same profits, income or gains (for example where differences between UK and foreign accounting and tax rules prevent a precise matching of income).

So far so good. The Manual then becomes more contentious:

> However, HMRC does not believe this degree of pragmatism extends to treating profits and distributions of profits as the same income. In this regard, note that the Supreme Court rejected Mr Anson's first ground of appeal that even if he was liable to tax in the US on his share of the profits and in the UK only on any distributions, the US and UK tax were nevertheless charged on the same profits or income.
> (This content has been withheld because of exemptions in the Freedom of Information Act 2000)
> In *Anson v HMRC* [2013] EWCA Civ 63, Mr Anson raised a new argument, based on the exchange of notes dated 24 July 2001 in relation to Article 24 (and Articles 1(4) and 1(8)) of the 2001 UK/US Double Taxation Convention (DTC), that it was no longer necessary to show that the UK and US tax was paid on the same profits for credit to be due under that DTC. However, the Court of Appeal refused Mr Anson permission to appeal and HMRC continue to believe that this does not override the requirement for the UK and US tax to be computed by reference to the same profits, income or gains.

111.5.2 *Timing/assessment period*

The INT Manual provides:

> **INTM169150. Amount of foreign tax credit relief: basis of allowance** [Sep 2021]
> Credit may be claimed for the foreign tax paid on foreign capital gains against the UK tax due on the same gain, irrespective of the tax year in which the foreign tax is charged.

In *Anson v HMRC*:[13]

> ... differences between UK and foreign accounting and tax rules prevent a precise matching of the income by reference to which tax is computed

[13] [2015] UKSC 44 at [114].

in the two jurisdictions. It appears that some potential difficulties of this kind are in practice avoided by the Commissioners' accepting that the profits on which foreign tax is computed and in respect of which relief can be claimed are not confined to those arising under UK tax principles in individual UK chargeable periods.

111.5.3 *Preceding year basis*

The phrase "computed by reference to", in the FTC article replaced the words "payable in respect of", which had been used in the older treaties. The new wording was introduced following *Duckering v Gollan*[14] a case on the New Zealand/UK treaty which allowed a credit against UK tax "payable in respect of that income". In New Zealand the preceding year basis was abolished in 1958 (a reform which the UK finally adopted in 1996). The position was:

Country	**Year of assessment**	**Computation** *by ref to income of*	**Basis of assessment**
UK	1958-1959	1957-1958	Preceding year basis
New Zealand	1957-1958	1956-1957	Preceding year basis
New Zealand	1958-1959	1958-1959	Current year basis

The taxpayer obtained a credit against his UK tax for 1958-1959 for the tax paid in New Zealand in 1958-1959, on the basis that he had paid tax in both countries "in respect of" the same income, despite the fact that the income by reference to which his tax liability was computed in the two jurisdictions was not the same. In the light of that decision, the wording was changed to use the phrase "computed by reference to".

The International Manual provides:

> **INTM161140: root income basis, statutory income basis** [May 2020]
> The following definitions apply for the purposes of foreign tax credit relief:
>
> a) 'Credit on the root income basis' means credit allowed for foreign tax against any UK tax computed by reference to the same income by reference to which the foreign tax is computed. For example, if interest of £100 has been taxed by the foreign country on a current year basis in 2010/11 and is taxed in the UK on the preceding year basis for 2011/12, credit should be allowed for the foreign tax charged for 2010/11 against the UK tax charged for 2011/12. Credit

[14] 42 TC 333 discussed in *Anson v HMRC* [2015] UKSC 44 at [85].

on the root income basis is the usual way in which credit is given.

b) 'Credit on the statutory income basis' means credit allowed in accordance with the decision in *Duckering v Gollan* 42 TC 333, that is the foreign tax on the foreign income is the foreign tax payable in respect of the income from the source, for the same year as that for which the UK tax is assessed. If in the example referred to in (a) above, credit was due upon the statutory income basis, credit for the foreign tax charged for 2010/11 would be allowed against the UK tax charged on income from the same source for 2010/11. Credit against UK tax for 2011/12 would be allowed for the foreign tax paid for 2011/12. Where the foreign basis period for assessment does not coincide with the UK basis period see INTM161220. See SI1997/405 for the treatment of foreign tax paid in respect of profits or losses arising from the business of a Lloyd's underwriter.

INTM161160: 'Root income' basis - legal position [May 2020]

The authority for the `root income' basis is found in the credit Article in double taxation agreements which have been negotiated or amended since the decision in *Duckering v Gollan* referred to in INTM161140 paragraph (b). This says `… tax payable under the laws of … and in accordance with this convention, whether directly or by deduction, on profits income or chargeable gains from sources within … shall be allowed as a credit against any UK tax computed by reference to the same profits income or chargeable gains by reference to which the … tax is computed'. TIOPA10/S9 (1)-(3) is the authority for unilateral relief purposes.

There are still a few agreements in force which have not been revised or amended and which provide for credit relief to be given on the statutory income basis. See, however, INTM161170 for guidance on the practice to be adopted where the statutory income basis is the strict legal basis.

INTM161170: 'Root income' basis - practice [May 2020

Tax credit relief should be allowed in all cases and for all years on the root income basis. Where relief is due strictly on the statutory income basis (see INTM161160, second paragraph), relief will be allowed on the root income basis unless the taxpayer specifically asks for the statutory income basis. Where the root income basis applies and the same foreign income is assessed once to UK tax and more than once to foreign tax, the total foreign tax is available for credit against the UK tax. Where the same foreign income is assessable to Income Tax for more than one UK year of assessment see INTM165100 onwards. Where the foreign income is not assessed for any UK year of assessment, no credit relief can be given

> The summaries of agreements under the respective country entries will show specifically where the statutory income basis applies. For all other countries the root income basis will apply.

The preceding year basis is now a matter of history and perhaps this does not matter now.

111.5.4 *Ownership period/rebasing*

HMRC Brief 17/10 provides:

> **Introduction**
> The purpose of this brief is to publicise a change to the established practice of restricting the amount of Foreign Tax Credit Relief (FTCR) that can be deducted when calculating the amount of UK tax due on a chargeable gain.
>
> **Background**
> Where a gain is chargeable to UK Capital Gains Tax or UK Corporation Tax and the same gain has also been taxed in another country then FTCR can be claimed in respect of the foreign tax paid.
>
> Our practice has been to restrict the amount of FTCR if different periods of ownership of the asset are considered when arriving at the gain assessable in the UK and the foreign gain, or if the amount of the UK gain is less than the foreign gain.
>
> We have reconsidered our view and are revising our practice so that the whole of the foreign tax is allowable as FTCR up to the amount of the UK tax on the gain.
>
> **The current practice**
> The established practice has been to restrict the amount of FTCR in the following two situations:
>
> **Situation one [different ownership periods]**
> The amount of gain charged to foreign tax may be calculated by reference to a longer period of ownership than the period on which the gain charged to UK tax is based. The most common instance is where assets were acquired before the 31 March 1982 and the gain chargeable in the UK is based only on the period from 31 March 1982 onwards. In such cases the established practice has been to restrict the FTCR due by the following calculation:[15]
>
> A/B × foreign tax = allowable FTCR where
> A = period of time assessed by UK
> B = period of time assessed by foreign authority

[15] I have put the wording into mathematical terms, for clarity.

> For example:
>
> - asset acquired on 31 March 1971
> - asset rebased for UK CGT on 31 March 1982
> - asset disposed of on 31 March 1993
> - foreign tax of £10,000 charged
>
> The maximum amount of FTCR would be restricted as follows:
>
> (period 31 Mar 1982 to 31 Mar 1993 = 11 years) ÷ (period 31 Mar 1971 to 31 Mar 1993 = 22 years) = 0.5
>
> 0.5 × £10,000 foreign tax, equals £5,000 tax credit.
>
> **Situation two [foreign chargeable gain exceeds UK gain]**
>
> Where the gain charged in the UK is less than the gain charged to foreign tax, the established practice has been to restrict the maximum amount of FTCR due by the following calculation:
>
> (amount of UK assessment) ÷ (amount of foreign assessment)
> multiplied by foreign tax = allowable FTCR
>
> For example, where
> the UK assessed a gain of £55,000,
> the gain charged to foreign tax was £75,000 and
> the foreign tax was £15,000
> then the FTCR would be restricted as follows:
>
> (£55,000 ÷ £75,000) × £15,000 = £11,000
>
> **How we intend to implement the revised practice**
>
> ... In all cases where FTCR is claimed against UK tax on chargeable gains, the whole of the foreign tax will be allowable up to the amount of the UK tax on the gain, provided that the gain charged in both countries relates to the same disposal.
>
> In the examples above, the maximum allowable FTCR would now be the full £10,000 of foreign tax in the first case and the full £15,000 of foreign tax in the second, provided, in each case, that this amount was less than or equal to the UK tax.
>
> This change will bring the chargeable gains practice in line with the Income Tax practice, which does not restrict the amount of FTCR allowed where the amount assessed in the UK is less than the amount of income assessed to foreign tax...

Could it be that HMRC's pre-2010 view in situation 1 (different ownership periods) was correct, and the current practice is concessionary? The difficulty is that there are so many ways of computing a gain. There may be different rules not just relating to periods of ownership, but to acquisition cost and to allowable expenditure. It is not practical to seek to identify differences and say that only the sum computed on UK principles is the same gain, albeit computed by different methods. We need that element of pragmatism referred to in *Anson.*

HMRC's pre-2010 view in situation 2 seems difficult to defend and it is considered that the present view is correct as a matter of law.

111.5.5 *Tax on different person/time*

SP 6/88 provides:

> **Double taxation relief: chargeable gains**
> 3 The principal requirement for the granting of credit for overseas tax against liability to capital gains tax (or corporation tax on chargeable gains) is therefore that the overseas tax should be computed by reference to the same gain as the UK tax. There is no requirement that the respective tax liabilities should arise at the same time nor that they should be charged on the same person.

INTM169040 [May 2020] gives an example where tax is charged on a different person:

> overseas tax is payable in its country of residence by a non-resident company on the disposal of an asset and in the UK the gain is charged on a UK resident individual under s.3 TCGA

See 64.42 (Foreign tax credit relief: s.3).

The INTM provides:

> **INTM161040: double taxation relief: Same income** [Dec 2023]
> Note that for credit to be allowed, it is not a requirement that the foreign tax has to be borne by the same person who is liable to UK tax on the same profits, income or gains. For example, if the foreign country taxes a settlor on the income of a UK resident beneficiary, who is chargeable to UK tax on that income, credit may be given to the beneficiary for the foreign tax paid by the settlor. However, it must be the same income which is being taxed in both countries. See also Statement of Practice 6/88 and INTM169040 in the capital gains context.
> Where directors' fees are treated as income of a partnership or of a company under ESC/A37 (or the relevant enactment in legislation from 6 April 2018, see EIM02500) credit relief is available to the partnership or company, regardless of the fact that the foreign tax may have been suffered by the director.

111.5.6 *Gain treated as income*

SP 6/88 provides:

> 4 The Revenue's view is that the following sets of circumstances fall

> within the terms of the standard credit article and [Part 2 TIOPA, Unilateral Credit] and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains.
>
> (i) The overseas tax charges capital gains as income

This is consistent with the rule that a gain subject to income tax may qualify for DT relief under art 13(5) OECD Model.[16]

111.5.7 *Disposal after group transfer*

SP 6/88 provides:

> 4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and [Part 2 TIOPA, Unilateral Credit] and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains...
>
> (ii) [a] Overseas tax is payable on a disposal falling within TCGA 1992 s 171 (transfers within a group of companies treated as taking place on a no gain/no loss basis) and
>
> [b] a liability to UK tax arises on a subsequent disposal.[17]

The facts envisaged are:

(1) X transfers to Y within a group ("the first disposal"):
   (a) The disposal is not subject to UK tax (because of CG group relief)[18]
   (b) The disposal is subject to foreign tax (because the foreign tax does not allow a CG group relief)

(2) Y disposes of the property ("the second disposal")

The first disposal is treated for CGT as made for such amount as secures that no gain/loss accrues on the disposal, ie the historic base cost. On the second disposal, by Y, a chargeable gain accrues.[19] Foreign tax on the first disposal is regarded as tax on Y's gain. If one accepts that the foreign tax is on the same gain, it does not matter that:

[16] See 56.23.2 (Gain subject to income tax).

[17] The former International Tax Handbook para 619 explains the point more clearly: "A similar situation could occur with transfers under Section 171 TCGA 1992 between UK group companies. If the assets involved are situated abroad and the foreign tax authority taxes the UK company making the transfer, the benefit of that tax can be taken by the transferee group company when there is a disposal outside the group generating a UK tax charge on the relevant asset."

[18] See 64.24 (CG group reliefs).

[19] Assume the asset is sold for more than the historic base cost.

(1) X pays the foreign tax at the time of the first disposal.
(2) Y pays UK tax (subject to the tax credit) at the time of the second disposal.

111.5.8 *Foreign tax on unrealised gain*

SP 6/88 provides:

> 4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and [Part 2 TIOPA, Unilateral Credit] and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains...
> (iv)[a] Overseas tax is payable by reference to increases in the value of assets although there has been no disposal.
> [b] There is a subsequent disposal of the assets on which a liability to UK tax arises.

In the UK we do not usually tax chargeable gains without a disposal; but we often tax gains accruing on a deemed disposal, which comes to the same thing. In this case UK/foreign taxes are paid at a different times, but (at least in general) the taxes are paid by the same person.

111.6 Domestication relief

111.6.1 *The relief*

This is a niche topic, far from the interests of private client practitioners. But it illustrates the principle of what constitutes the same tax for the purposes of foreign tax credit. I set out only the provisions needed to understand the tax credit issue.

Section 140(1) TCGA provides:

> This section applies where a company resident in the UK carries on a trade outside the UK through a permanent establishment and—
> (a) that trade ...is transferred to a company not resident in the UK;
> (b) the trade ... is so transferred wholly or partly in exchange for securities consisting of shares, or of shares and loan stock, issued by the transferee company to the transferor company ...

HMRC refer to this as "domestication". Section 140 provides a form of incorporation relief:

> (2) In any case to which this section applies the transferor company may claim that this Act shall have effect in accordance with the following provisions.

> (3) ... (a) if the securities are the whole consideration for the transfer,
> [i] the whole of that gain shall be treated as not accruing to the transferor company on the transfer but
> [ii] an equivalent amount ("the deferred gain") shall be brought into account in accordance with subsections (4) and (5) below ...

111.6.2 *The clawback charges*

A clawback charge arises if the company disposes of the securities. Section 140 TCGA provides:

> (4) If at any time after the transfer the transferor company disposes of the whole or part of the securities held by it immediately before that time, there shall be deemed to accrue to the transferor company as a chargeable gain on that occasion the whole or the appropriate proportion of the deferred gain so far as not already taken into account under this subsection or subsection (5) below...
> (4A) A chargeable gain which is deemed to accrue under subsection (4) is in addition to any gain or loss that actually accrues to the transferor company on the disposal of the securities.

A clawback charge also arises if the subsidiary disposes of the trade. Section 140(5) TCGA provides:

> If at any time within 6 years after the transfer the transferee company disposes of the whole or part of the relevant assets held by it immediately before that time there shall be deemed to accrue to the transferor company as a chargeable gain on that occasion the whole or the appropriate proportion of the deferred gain...

SP 6/88 provides:

> 4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and [Part 2 TIOPA, Unilateral Credit] and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains...
> (iii)[a] An overseas trade carried on through a branch or agency is domesticated (ie transferred to a local subsidiary) and relief is given under TCGA 1992 s 140.
> [b] There is a subsequent disposal of the securities (or the subsidiary disposes of the assets within six years) giving rise to a liability to UK tax and overseas tax is charged in whole or in part by reference to the gain accruing at the

date of domestication.[20]

The facts envisaged are:

(1) X transfers a trade to Y, a subsidiary ("the first disposal"):
  (a) The disposal is not subject to UK tax (because of domiciliation relief)
  (b) The disposal is subject to foreign tax (because the foreign tax does not allow a domestication relief)

(2) A clawback charge on the disposal of the shares in the subsidiary by X, or on the disposal of the trade by Y ("the second disposal").

The first disposal is treated for CT as made for such amount as secures that no gain/loss accrues on the disposal, ie the historic base cost. On the second disposal a chargeable gain accrues. Foreign tax on the first disposal is regarded as a tax on the gain. This is a relatively easy case because:

(1) On a disposal of securities by X, a different asset is disposed of, but the gain accruing is "the deferred gain" (the gain otherwise payable on the first disposal)

(2) Likewise on a disposal of the trade by Y, the gain accrues to X.

111.7 Same gain: roll-over relief

111.7.1 *The relief*

We move on to a more familiar relief. Section 152(1) TCGA provides:

> (1) If
> [i] the consideration which a person carrying on a trade obtains for the disposal of, or of his interest in, assets ("the old assets") used, and used only, for the purposes of the trade throughout the period of ownership is applied by him in acquiring other

[20] The former International Tax Handbook para 619 explains the point more clearly: "An example of this situation is found in Section 140 TCGA 1992 which deals with the charge on capital gains where a branch or agency overseas is domesticated, that is to say transferred to a non-resident company in exchange for shares. In those circumstances a charge on the gains on branch assets transferred is deferred until either the transferor sells the shares or the transferee sells the assets (in the latter case the sale has to be within six years of the acquisition). In that latter instance where the transferee sells the asset, any foreign tax on the gains is paid by the transferee. But the UK company is charged in respect of the capital gains on those same assets and qualifies for credit relief because the gain has been taxed abroad, although the tax has actually been charged on the transferee."

> assets, or an interest in other assets ("the new assets") which on the acquisition are taken into use, and used only, for the purposes of the trade, and
>
> [ii] the old assets and new assets are within the classes of assets listed in section 155,
>
> then the person carrying on the trade shall, on making a claim as respects the consideration which has been so applied, be treated for the purposes of this Act—
>
> (a) as if the consideration for the disposal of, or of the interest in, the old assets were (if otherwise of a greater amount or value) of such amount as would secure that on the disposal neither a gain nor a loss accrues to him, and
>
> (b) as if the amount or value of the consideration for the acquisition of, or of the interest in, the new assets were reduced by the excess of the amount or value of the actual consideration for the disposal of, or of the interest in, the old assets over the amount of the consideration which he is treated as receiving under paragraph (a) above ...

111.7.2 *Roll-over: Foreign tax credit*

SP 6/88 provides:

> 5 ... where roll-over relief is claimed, for example under TCGA 1992 s 152, the gain on disposal of the old asset is not subjected to UK tax. The gain on realisation of the new asset remains a gain separate from that realised on sale of the old asset and overseas tax payable as a result of the sale of the old asset is not creditable against UK tax payable on the gain realised on sale of the new asset.

The facts envisaged are:

(1) A disposal of the old asset by X ("the first disposal") where the disposal is:

(a) not subject to UK tax (because of roll-over relief)

(b) subject to foreign tax (because the foreign tax does not allow a roll-over relief)

(2) A disposal of the new asset by X (the second disposal)

The first disposal is treated as made for an amount which secures that no gain/loss accrues on the disposal. On the second disposal a gain accrues. Foreign tax on the first disposal is *not* regarded as a tax on that gain.

What is the difference between (1) roll-over relief (no FTC) and (2) group/domiciliation reliefs (where Foreign Tax Credit applies)?

In a group relief case the gain arises on a disposal of the same asset. In the domestication case, there is tax on the deferred gain, ie the gain on the disposal of the first asset. But in a roll-over case there is a disposal of a different asset. In the HMRC view, the elastic of identity has snapped. The contrary is arguable, but what are the prospects of success? On one hand, the fact that HMRC's view has been unchallenged since (at least) 1988 is suggestive. On the other hand, *Anson* calls for "a degree of pragmatism, at least "in some circumstances".[21] The taxpayer has the merits; but (unlike *Anson)* the taxpayer has fall-back options of not claiming roll-over relief, or else a deduction for the tax. A topic for a student moot, perhaps? But I think HMRC have the stronger argument.

111.7.3 *Roll-over: Deduction*

SP 6/88 provides:

> However, in such circumstances [s.113 TIOPA] allows the overseas tax to be claimed as a deduction in computing the gain for roll-over relief purposes.

See 111.27 (CGT/IT computation deduction).

111.8 Foreign-source rule

Art 24(4) USA/UK DTA	**s.9(1) TIOPA: Unilateral Credit**
United States tax ... on profits, income or chargeable gains from sources within the United States ... shall be allowed as a credit against any UK tax	Credit for tax ... calculated by reference to income arising, or any chargeable gain accruing, in the territory... is to be allowed against any income tax or corporation tax

I refer to this as the **"foreign-source rule"**. It is therefore necessary to determine:

(1) For US FTCR, whether income/gains are from sources within the US
(2) For unilateral FTCR, where income/gains arise/accrue

This is the same question, though differently expressed

111.8.1 *Treaty-source rules*

DTAs may provide specific rules for determining the source of income,

[21] See 111.5.1 (The same: pragmatic approach).

for treaty purposes generally or for foreign tax credit specifically.[22]

DTAs may provide that for DTA purposes, interest, royalties and technical fees arise in the State where the payer is resident.[23]

Article 24(5) USA/UK DTA provides:

> For the purposes of paragraph 4 of this Article, profits, income and chargeable gains
> [a] owned[24] by a resident of the UK
> [b] which may be taxed in the United States in accordance with this Convention
> shall be deemed to arise from sources within the United States.

US Treasury refer to this rule as "re-sourcing".

The USA/UK DTA Technical Explanation provides:[25]

> Paragraph 5 provides a re-sourcing rule for gross income covered by paragraph 4 [UK FTCR]. This provision is intended to ensure that a UK resident can obtain a UK foreign tax credit for US taxes paid when the Convention assigns to the United States primary taxing rights over an item of gross income. Paragraph 5 provides that, if the Convention allows the United States to tax an item of gross income (as defined under UK law) derived by a resident of the UK, the UK will treat that item of gross income as gross income from sources within the United States for UK foreign tax credit purposes.

111.8.2 *Income from services/trading*

Section 9(3) TIOPA provides:

> For the purposes of subsection (1) [Unilateral Credit], profits from, or remuneration for, personal or professional services performed in the territory are to be treated as income arising in the territory.

In *Yates v GCA International*[26] a UK resident company provided services (an investigation into oil fields in Venezuela). Some of the work was done in Venezuela and some in the UK. The company (being UK resident) was in principle taxable on all trading income, but subject to foreign tax credit relief for Venezuela tax on income arising in Venezuela.

[22] See Avery Jones, "Tax treaty problems relating to source" [1998] BTR 222.

[23] See 21.26.6 (Source of interest for DTA); 24.16.7 (Source of royalties for DTA).

[24] See 15.11.2 ("Paid" and "payment").

[25] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[26] 64 TC 37.

Smidth principles were applied[27] and so (unsurprisingly) part of the profits were held to arise in Venezuela.

The INT Manual provides:

> **INTM161120 UK residents with foreign income or gains: double taxation relief** [May 2020]
>
> ... Where tax credit relief is allowable under a double taxation agreement, where a UK resident carries on a trade, profession or vocation etc. chargeable to either Income or Corporation Tax and earns profits partly in the UK and partly in a foreign country, that part of the profits earned in the foreign country is regarded, for credit purposes, as having a foreign source.
>
> Where tax credit relief is only allowable under the unilateral provisions, TIOPA10/S9(3) states that profits from, or remuneration for, personal or professional services performed in the foreign country are deemed to be income arising in that country. This is more narrowly drawn than the corresponding provision in an agreement (see above). In *Yates v GCA International Ltd* (64 TC 37), where services under a contract were performed partly in Venezuela and partly in the UK, it was held that unilateral credit relief was only allowable for the Venezuelan tax attributable to the fees paid for the services that were performed in Venezuela, limited to the UK tax charged on the profits to which those fees gave rise, after deduction of expenses.

111.8.3 *Channel Islands/Isle of Man*

Section 9(7) TIOPA provides:

> If the territory is the Isle of Man or any of the Channel Islands, subsections (1)(b) and (2)(b) have effect with the omission of "in the territory".

Amended as s.9(7) directs, s.9(1)(2) TIOPA provide:

s.9(1) TIOPA: IT/CT	**s.9(2) TIOPA: CGT**
Credit for tax—	[Identical to s.9(1)]
(a) paid under the law of the territory,	[Identical to s.9(1)]
(b) calculated by reference to income arising, or any chargeable gain accruing, ~~in the territory~~, and	(b) calculated by reference to any capital gain accruing ~~in the territory,~~ and

[27] See 21.14 (Services).

(c) corresponding to UK tax,	[Identical to s.9(1)]
is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.	is to be allowed against any capital gains tax calculated by reference to that gain.

Since the Channel Islands and the IoM do not have CGT, it is not immediately obvious what is the role of s.9(2). Perhaps it applies where a gain is subject to IT in the Islands but subject to CGT in the UK.

The INT Manual provides:

> **INTM161120 UK residents with foreign income or gains: double taxation relief** [May 2020]
> **Exceptions to the source rule**
> Certain exceptions to the source rule (INTM161110) are provided for by statute and under particular agreements as follows:
> 1. Isle of Man and Channel Islands. TIOPA10/S9(7) provides that the limitation of unilateral relief to foreign tax on income arising in the foreign country is not to apply where the country concerned is the Isle of Man or any of the Channel Islands. Company dividends and debenture interest are excluded from the scope of the agreements with the Isle of Man (DT9950+), Guernsey (DT8600+) and Jersey (DT10750+) by the credit Articles of those agreements. Unilateral relief is therefore available for Manx and Channel Islands tax on debenture interest and on company dividends wherever such income arises, except where the recipient is a portfolio shareholder (see INTM164010 paragraph (f). See also DT8606, DT9955 and DT10755...

This needs to be reviewed in the light of the new Channel Islands/IoM treaties.

111.9 Tax in accordance with DTA

Art 24 USA/UK DTA provides credit for:

> United States tax payable ... in accordance with this Convention...

The same phrase is used in art 23B OECD Model:

> 1. Where a resident of a Contracting State derives income ... which may be taxed in the other Contracting State in accordance with the provisions of this Convention (except to the extent that these provisions allow taxation by that other State solely because the income is also income derived by a resident of that State ...), the first-mentioned State shall allow:

> a) as a deduction from the tax on the income of that resident, an amount equal to the income tax paid in that other State...

The OECD Commentary is not usually relevant for DTA Credit, but on this point the wording is the same so it is applicable:

> 32.1 Both Articles 23 A and 23 B require that relief be granted, through the exemption or credit method, as the case may be, where an item of income or capital may be taxed by the State of source in accordance with the provisions of the Convention. Thus, the State of residence has the obligation to apply the exemption or credit method in relation to an item of income or capital where the Convention authorises taxation of that item by the State of source.
>
> 32.2 The interpretation of the phrase "may be taxed in the other Contracting State in accordance with the provisions of this Convention", which is used in both Articles, is particularly important when dealing with cases where the State of residence and the State of source classify the same item of income or capital differently for purposes of the provisions of the Convention.
>
> 32.3 Different situations need to be considered in that respect. Where, due to differences in the domestic law between the State of source and the State of residence,
>
> [1] the former applies, with respect to a particular item of income or capital, provisions of the Convention
>
> [2] that are different from those that the State of residence would have applied to the same item of income or capital,
>
> the income is still being taxed in accordance with the provisions of the Convention, as interpreted and applied by the State of source. In such a case, therefore, the two Articles require that relief from double taxation be granted by the State of residence notwithstanding the conflict of qualification resulting from these differences in domestic law.

In *G E Financial Investments v HMRC*:[28]

> the phrase "in accordance with the this Convention" requires that the imposition of US tax is not inconsistent with the Convention (ie is not tax in an amount in excess of that permitted by the Convention or on sums not taxable in the US under the terms of the Convention).

111.10 *Hybrid example: Tax a/c DTA*

The OECD Commentary gives the example of a hybrid entity:

[28] [2021] UKFTT 210 (TC) at [98].

> 32.4 This point may be illustrated by the following example.
> A business is carried on through a permanent establishment in State E by a partnership established in that State.
> A partner, resident in State R, alienates his interest in that partnership.
> State E treats the partnership as fiscally transparent whereas State R treats it as taxable entity.
> State E therefore considers that the alienation of the interest in the partnership is, for the purposes of its Convention with State R, an alienation by the partner of the underlying assets of the business carried on by the partnership, which may be taxed by that State in accordance with paragraph 1 or 2 of Article 13.
> State R, as it treats the partnership as a taxable entity, considers that the alienation of the interest in the partnership is akin to the alienation of a share in a company, which could not be taxed by State E by reason of paragraph 5 of Article 13.

OECD refer to this as a conflict of qualification, though this seems a rather opaque term. The OECD analysis is as follows:

> In such a case, the conflict of qualification results exclusively from the different treatment of partnerships in the domestic laws of the two States and State E must be considered by State R to have taxed the gain from the alienation "in accordance with the provisions of the Convention" for purposes of the application of Article 23 A or Article 23 B. State R must therefore grant an exemption pursuant to Article 23 A or give a credit pursuant to Article 23 B irrespective of the fact that, under its own domestic law, it treats the alienation gain as income from the disposition of shares in a corporate entity and that, if State E's qualification of the income were consistent with that of State R, State R would not have to give relief under Article 23 A or Article 23 B. No double taxation will therefore arise in such a case.

111.10.1 *Example: tax not a/c to DTA*

The OECD Commentary provides:

> 32.5 Article 23 A and Article 23 B, however, do not require that the State of residence eliminate double taxation in all cases where the State of source has imposed its tax by applying to an item of income a provision of the Convention that is different from that which the State of residence considers to be applicable. For instance, in the example above, if, for purposes of applying paragraph 2 of Article 13,
> [a] State E considers that the partnership carried on business through a

> fixed place of business but
>
> [b] State R considers that paragraph 5 applies because the partnership did not have a fixed place of business in State E,
>
> there is actually a dispute as to whether State E has taxed the income in accordance with the provisions of the Convention.
>
> The same may be said if State E, when applying paragraph 2 of Article 13, interprets the phrase "forming part of the business property" so as to include certain assets which would not fall within the meaning of that phrase according to the interpretation given to it by State R.
>
> Such conflicts resulting from different interpretation of facts or different interpretation of the provisions of the Convention must be distinguished from the conflicts of qualification described in the above paragraph where the divergence is based not on different interpretations of the provisions of the Convention but on different provisions of domestic law. In the former case, State R can argue that State E has not imposed its tax in accordance with the provisions of the Convention if it has applied its tax based on what State R considers to be a wrong interpretation of the facts or a wrong interpretation of the Convention. States should use the provisions of Article 25 (Mutual Agreement Procedure), and in particular paragraph 3 thereof, in order to resolve this type of conflict in cases that would otherwise result in unrelieved double taxation.

111.11 Tax credit: Dividends

Section 12(1) TIOPA provides:

> Credit under section 9 [Unilateral Credit] for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed only if section 13, 14, 15 or 16 so provides.

Section 13 TIOPA provides:

> (1) This section applies for the purposes of section 12(1).
>
> (2) Credit under section 9 for overseas tax on a dividend paid by a company ("P") resident in the territory is allowed if—
>
> (a) the overseas tax is charged directly on the dividend (whether by charge to tax, deduction of tax at source or otherwise), and
>
> (b) neither P nor the recipient of the dividend would have borne any of that tax if the dividend had not been paid.

Why is that needed?

Sections 12(2) and 14 - 17 TIOPA apply where the recipient of the dividend is a company, and are not discussed here.

111.11.1 *DTA credit: Exclusion of underlying tax*

Art 24 USA/UK DTA provides credit but adds in brackets:

> (excluding, in the case of a dividend, United States tax in respect of the profits out of which the dividend is paid)

Underlying tax is not discussed here. However in the USA/UK DTA, these words are otiose, and present for historical reasons: see *Anson v HMRC* [2015] UKSC 44 at [60] - [96].

111.12 DTA/Unilateral Credit: Priority

Section 11 TIOPA provides:

> (1) Credit for tax paid under the law of the territory is not allowed under section 9 or 10 in the case of any income or gains if any credit for that tax is allowable in respect of that income or those gains under double taxation arrangements made in relation to the territory.
> (2) If credit in respect of an amount of tax may be allowed under double taxation arrangements made in relation to the territory, credit is not allowed under section 9 or 10 in respect of that tax.

In short, DTAs have priority over Unilateral Credit. It could have been more concisely expressed, but there it is.

The INT Manual provides:

> **INTM161030 Unilateral relief** [May 2020]
> Unilateral relief may be available against UK tax to a person resident in the UK for foreign tax charged on income arising in that foreign country, if relief is not available under an agreement. The relief may be due where either
> 1 there is no agreement with the country concerned, or
> 2 the income arises in a country with which there is an agreement but the agreement does not cover the category of income or foreign tax involved. For example, the agreement with the United States of America only covers the Federal Income Taxes and particular Federal excise taxes but not the taxes levied by the individual states. Unilateral relief is available for many of these state taxes (see DT19855 for example).

111.13 *DTA excluding tax credit*

Section 11(3) TIOPA provides:

> If double taxation arrangements made in relation to the territory contain express provision to the effect that relief by way of credit is not to be given under the arrangements in cases or circumstances specified or described in the arrangements, credit is not allowed under section 9 or 10 in those cases or circumstances.

In *Aozora GMAC Investment (R, oao) v HMRC,*[29] a UK company received US source interest from its US subsidiary. US interest received by a UK resident normally qualifies for relief from US tax under art 11 USA/UK DTA. However on this occasion US relief was not available because of the US Limitation on Benefits rule.[30] HMRC say that is an "express provision to the effect that relief by way of credit shall not be given". So wherever the LoB rule applies, s.11(3) TIOPA disapplies unilateral relief. Aozora contend that art 23 is not an "express provision". The appeal is pending.

This rule does not apply to pre-2000 DTAs. Para 13 sch 9 TIOPA provides:

> Section 11(3) does not have effect in relation to arrangements made before 21 March 2000.

111.14 Method of providing credit

Section 18 TIOPA provides:

> (1) Subsection (2) applies if—
> (a) under double taxation arrangements, or
> (b) under unilateral relief arrangements for a territory outside the UK,
>
> credit is to be allowed against any income tax, corporation tax or capital gains tax chargeable in respect of any income or chargeable gain.
> (2) The amount of those taxes chargeable in respect of the income or gain is to be reduced by the amount of the credit.

Section 18(6) TIOPA provides:

> Credit against income tax is given effect at Step 6 of the calculation in section 23 of ITA 2007.

[29] [2019] EWCA Civ 1643. An application for judicial review, based on a passage in the HMRC manual, was not successful.

[30] See art 23 USA/UK DTA; 110.1.2 (The LoB rule); [2017] EWHC 2881 (Admin) at [12]-[13]. UK readers may find that somewhat surprising, but that is a matter of US tax law.

111.14.1 *"Credit"*

Section 18 TIOPA provides:

> (3) In subsection (1) "credit"—
>
> (a) in relation to double taxation arrangements, means credit for tax payable under the law of the territory in relation to which the arrangements are made, and
>
> (b) in relation to unilateral relief arrangements for a territory outside the UK, means credit for tax payable under the law of that territory,
>
> but see sections 12(3) and 63(5) (dividends: certain tax payable otherwise than under the law of a territory treated as payable under that law)[31]...
>
> (5) Credit is allowed under subsection (2) against any tax only if, under the arrangements concerned, credit is allowable against that tax.

Section 22 – 24 TIOPA deal with credits where same income is charged to income tax in more than one tax year. This is not discussed here.

111.15 Foreign tax credit: Claim

Section 19 TIOPA provides:

> (1) Subsections (2) and (3) apply to a claim for relief under section 18(2) [DTA/Unilateral credit].
>
> (2) If the claim is for credit for foreign tax in respect of any income or chargeable gain charged to income tax or capital gains tax for a tax year, the claim must be made on or before—
>
> (a) the fourth anniversary of the end of that tax year, or
>
> (b) if later, the 31 January following the tax year in which the foreign tax is paid.

The standard claim procedure rules apply.[32] The INT Manual provides:

> **INTM161070 Withdrawal of credit claims** [May 2020]
>
> A claim to credit relief, once made, may be withdrawn at any time before the assessment giving effect to the claim becomes final and conclusive. Under self assessment, a claimant may amend the claim at any time during the 12 month period following the date on which it was made, unless the claim is under enquiry.

[31] Section 12(3) and s.63 TIOPA concern dividends paid to UK resident companies, and are not discussed here.

[32] See 123.1 (Claims).

If it is under enquiry, the claimant will be able to amend the claim when the enquiry is complete. If the claim to credit relief is withdrawn, the foreign tax is deductible under TIOPA10/S112-S113.[33] See INTM162580 where there has been an adjustment to the amount of foreign tax paid.

111.15.1 *Claim time limits*

Section 19 TIOPA provides an extended time limit where tax is paid late:

> (1) Subsections (2) and (3) apply to a claim for relief under section 18(2).
> (2) If the claim is for credit for foreign tax in respect of any income or chargeable gain charged to income tax or capital gains tax for a tax year, the claim must be made on or before—
> (a) the fourth anniversary of the end of that tax year, or
> (b) if later, the 31 January following the tax year in which the foreign tax is paid.
> (3) If the claim is for credit for foreign tax in respect of any income or chargeable gain charged to corporation tax for an accounting period, the claim must be made not more than—
> (a) four years after the end of that accounting period, or
> (b) if later, one year after the end of the accounting period in which the foreign tax is paid.

111.16 Tax sparing arrangements

Section 20 TIOPA provides:

> (1) Subsections (2) and (4) apply if the arrangements are double taxation arrangements.
> (2) For the purposes of this Chapter, any amount within subsection (3) is to be treated as having been payable.
> (3) An amount is within this subsection if it is an amount of tax that would have been payable under the law of a territory outside the UK but for a relief—
> (a) given under the law of that territory with a view to promoting industrial, commercial, scientific, educational or other development in a territory outside the UK, and
> (b) about which provision is made in double taxation arrangements.
> (4) References in this Chapter—

[33] See 111.27 (CGT/IT computation deduction).

> (a) to tax payable or chargeable, or
> (b) to tax not chargeable directly or by deduction,
>
> are to be read in accordance with subsection (2).
>
> (5) Subsections (2) and (4) have effect subject to—
> (a) subsection (6), and
> (b) sections 31(4) and 32(5) (income and gains not to be increased in calculations under section 31 or 32 by amounts treated by this section as having been payable).
>
> (6) If section 63(5) applies because conditions A and B in section 63 are met, relief is not given in accordance with section 63(5) (relief for certain tax underlying dividends paid between related companies) because of this section unless double taxation arrangements make express provision for the relief.
>
> (7) Subsection (6) does not affect the operation of section 17(2) (treatment, for purposes of unilateral relief, of dividend paid by foreign company that has received dividends from a company benefiting from tax-sparing relief).

111.17 When credit not allowed

Sections 25-27 provide 3 cases where credit is not allowed:

TIOPA	**Topic**
s.25	Relief for foreign tax
s.26	Non-resident claimant
s.27	Election against credit

111.17.1 *Relief for foreign tax*

Section 25 TIOPA provides:

> (1) Subsection (2) applies if relief may be allowed—
> (a) under the arrangements, or
> (b) under the law of the non-UK territory in consequence of the arrangements,
>
> in respect of an amount of tax that would, but for the relief, be payable under the law of that territory.
>
> (2) Credit under section 18(2) [DTA/Unilateral credit] is not allowed in respect of that tax, whether or not the relief has been used.

It is not common for UK tax law to allow a relief for UK tax but it does happen.[34] No doubt the same applies in foreign tax laws.

[34] See eg 64.20 (s.3 distribution relief); 51.1 (Overlapping ToA charges: Relief).

111.18 Restriction to UK residents

Section 26 TIOPA provides:

> (1) Credit under section 18(2) [DTA/Unilateral credit] against income tax, corporation tax or capital gains tax for a chargeable period[35] is not allowed unless the person in respect of whose income or chargeable gains the tax is chargeable is UK resident[36] for that period.
> (2) Sections 28 to 30 (credit under unilateral relief arrangements allowed to some non-UK resident persons) contain exceptions to subsection (1).

The exceptions are:

Section	**Topic**
28	Isle of Man/Channel Islands
29	Employment income
30	Non UK tax on non UK resident's branch/agency

I only discuss s.29.

111.18.1 *FTCR: Employment income*

Section 29 TIOPA provides an exception to the general rule that credit is restricted to a UK resident:

> (1) Subsection (3) applies if the arrangements are unilateral relief arrangements for a territory outside the UK.
> (3) Credit for overseas tax[37] may be allowed under section 18(2) [DTA/Unilateral credit] against income tax for a tax year—
> (a) calculated by reference to that income, and

[35] Section 26(3) defines "chargeable period": "In subsection (1) so far as it relates to capital gains tax "chargeable period" means tax year (see section 288(1ZA) of TCGA 1992)."

[36] Section 26(4) TIOPA defines "UK resident": In subsection (1) so far as it relates to capital gains tax "UK resident" has the meaning given by section 989 of ITA 2007."

[37] Defined in s.29(2) TIOPA:
In subsection (3) "overseas tax" means tax—
(a) paid under the law of the territory,
(b) charged on income and corresponding to income tax or to corporation tax, and
(c) calculated by reference to income from an office or employment the duties of which are performed wholly or mainly in the territory.
Section 29(4) TIOPA provides that local/provincial taxes may "correspond" to IT/CT, repeating the wording in s.8(3); see 111.4.2 (Which taxes: Unilateral Credit).

> (b) charged on employment income,
>
> if the person performing the duties is resident in the UK, or resident in the territory, for that year.

HMRC say:

> **Bermuda Payroll Tax**
>
> Is Bermuda Payroll Tax an admissible income tax for UK foreign tax relief purposes? It is not covered in the HMRC Double Taxation Manual.
>
> **Answer**
>
> As there is no tax treaty with Bermuda, unilateral relief will be available.[38]

111.19 Election against credit

Section 27 TIOPA provides:

> Credit under section 18(2) [DTA/Unilateral credit] against income tax, corporation tax or capital gains tax charged on any income or chargeable gains of a person is not allowed if the person elects for credit not to be allowed in respect of that income or those gains.

Why should a person elect for credit not to be allowed, rather than simply not making a claim for credit?

111.20 Computing FTC: Income

111.20.1 *Arising basis*

Section 31 TIOPA deals with computation of income/gains on the arising basis:

> (1) Subsection (2) applies if—
>
> (a) under the arrangements, credit is to be allowed for foreign tax in respect of any income or gain, and
>
> (b) section 32(2) (cases where UK tax payable by reference to amount received in UK) does not apply.[39]
>
> (2) In calculating the amount of the income or gain for the purposes of income tax, corporation tax or capital gains tax—
>
> (a) no deduction is to be made for foreign tax or special withholding tax, whether in respect of the same or any other income or gain...

[38] Expat Forum Q&A log (July 2019) (informally circulated).

[39] See 111.20.3 (Remittance basis: non-dividends).

The INT Manual provides:

> **INTM165030 Computation – assessable amount** [Sep 2021]
> Where credit is claimed against UK Income Tax for foreign tax paid on income from a foreign source, the amount of that income for all UK tax purposes is:
> **a) Foreign income assessable on the arising basis**
> No direct foreign tax is to be deducted. Where, exceptionally, the double taxation agreement provides for relief for underlying tax on a dividend (see INTM164410) the underlying tax should be added to the amount of the income...[40]
> *Example:*
> An individual receives a dividend of 100 from which 15 foreign withholding tax was deducted. The amount of income assessable is 100.

111.20.2 *FTC: Property income*

The Property Income Manual provides:

> **PIM4705 Rent from property outside the UK: CT** [May 2020]
> ***Foreign tax***
> If the overseas income has suffered foreign tax and a claim to tax credit relief is made, it will be necessary, for the purposes of the source by source rules (see INTM161210), to identify the amount of UK tax attributable to income from each particular property. Where, therefore, tax credit relief is claimed, separate computations of profits and losses for each property will be required.
> For the purposes of calculating tax credit relief, losses should be deducted in the order most favourable to the taxpayer's claim. Normally, this will mean that losses should be allocated first against the source that has suffered the lowest rate of foreign tax. ...

111.20.3 *Remittance basis*

Section 32 TIOPA provides:

> (1) Subsection (2) applies if—
> (a) under the arrangements, credit is to be allowed for foreign tax in respect of any income or capital gain, and

[40] The Manual continues: "Treat the whole of a foreign pension as chargeable to UK tax notwithstanding the deduction of one tenth under ICTA88/S65 (2)." The 10% deduction is (more or less) abolished, but see 38.7.4 (Commonwealth pension: Charge).

> (b) income tax or capital gains tax is payable by reference to the amount received in the UK.
>
> (2) For the purposes of whichever of income tax and capital gains tax is payable as mentioned in subsection (1)(b), the amount received is to be treated as increased—
>
> (a) by the amount of the foreign tax in respect of the income or gain,
>
> (b) by the amount of any special withholding tax levied in respect of the income or gain, but see subsection (4)

The INT Manual provides:

> **INTM165030 Computation – assessable amount** [May 2020]
>
> Where credit is claimed against UK Income Tax for foreign tax paid on income from a foreign source, the amount of that income for all UK tax purposes is: ...
>
> ***b) Foreign income assessable on the remittance basis***
>
> Add the amount of direct foreign tax attributable to the amount of income remitted. Where, exceptionally, the agreement provides for relief for underlying tax on a dividend (see INTM164410), the underlying tax should also be added to the amount of the dividend remitted. If you have difficulty in determining the amount of foreign tax attributed to income remitted, refer to CSTD, BAI, Assets Residence & Valuation.
>
> *Example*

[Gross foreign income]	£1,000
Foreign tax	£400
Net foreign income	£600
Remitted to UK	£300
UK measure of the income	
Income remitted	£300
Plus foreign tax (300/600 × 400)	£200
Therefore UK measure is	£500

Similarly for CGT; the INT Manual provides:

> **INTM169080. Remittance basis** [Sep 2021]
>
> An individual who is resident or ordinarily resident[41] but not domiciled in the UK and who makes a chargeable gain on the disposal of an asset situated outside the UK is only liable on the amount of the gain received in the UK ... When such an individual is chargeable on the gain received

[41] The reference to ordinary residence is out of date since 2013.

> in the UK and claims credit for foreign tax charged on the same gain, the liability in the UK will be on the sum of the amount remitted to the UK plus the foreign tax attributable to the amount remitted.
> Any difficulty in determining the correct addition for the foreign tax, should be referred to Personal Tax International (part of Charity, Assets & Residence).

111.21 Computing FTC: CGT

The INT Manual provides:

> **INTM169100. Amount of foreign tax credit relief – general** [May 2020]
> Similar principles to those set out in INTM161210 onwards for Income Tax apply to Capital Gains Tax. The amount of credit for foreign tax is not to exceed the lesser of
> - the foreign tax charged on the foreign gain and
> - the UK tax charged on the doubly taxed gain at the taxpayer's marginal rate.
>
> If the foreign tax exceeds the UK tax, the excess can neither be deducted from the amount of the gain chargeable to Capital Gains Tax, nor can it be repaid.
> The foreign tax should not be increased by any indexation allowance.
> A taxpayer's marginal rate for Capital Gains Tax is the rate at which the tax is charged for the year of assessment.

111.21.1 *More than one gain*

The INT Manual provides:

> **INTM169110. Amount of foreign tax credit relief – more than one gain** [May 2020]
> The amount of foreign tax credit relief must be calculated separately for each gain. An excess of foreign tax over UK tax on one gain cannot be credited against UK tax on another foreign gain or on the gain on the disposal of a UK asset.

111.21.2 *FTC: Capital losses*

The INT Manual provides:

> **INTM169120. Amount of foreign tax credit relief – losses** [May 2020]
> Where foreign tax credit relief is due, allowable capital losses should be utilised in such a way as to reduce the taxable amount of a gain down to a level where the UK tax due on the gain equals the foreign tax paid, and

> then allocate the remaining part of the loss to another gain, and so on. Where gains are subject to differing rates of UK capital gains tax, it would be in the customer's interest to offset the capital losses against those gains where, following any claim for a foreign tax credit, there remains a liability to UK capital gains tax by sorting the gains in descending order of UK tax rates applicable to those gains and applying the allowable losses firstly against those gains where the highest UK tax rate is applicable. This should secure the maximum amount of foreign tax credit relief, while at the same time ensuring that the losses reduce the amount of gains which are subject to the highest UK tax rates, thus minimising the overall tax charge.

See 65.11 (Losses used in best way).

111.21.3 *FTCR: CGT annual exemption*

The INT Manual provides:

> **INTM169130. Amount of foreign tax credit relief – exemption from tax** [May 2020]
> Where the total of the chargeable gains in any year of assessment exceeds the exempt amount... the exempt amount should, as far as possible, consist of gains on which no foreign tax has been charged. This will enable credit for foreign tax charged on the gains to be allowed against the UK Capital Gains Tax charged on those gains. ...

111.21.4 *HMRC example*

The INT Manual provides an example of the interaction of FTCR with loss relief and the CGT annual exemption, where the taxpayer has three gains: a UK gain, and two foreign gains taxable at different rates.

> **INTM169130. Amount of foreign tax credit relief – exemption from tax** [May 2020]
> ... The following example demonstrates the application of this paragraph and of INTM169120
> In 2009–10, an individual has the following chargeable gains:

Country	**Gain**	**Foreign tax**
UK	£10,000	-
Country X	£20,000	£2,000
Country Y	£6,000	£2,700

> He has losses of £6,000 available for deduction.
> The exemption limit for 2009–10 is £9,600.

The computation of his liability is as follows:

	UK Gain	**Country X Gain**	**Country Y Gain**
	£10,000	£20,000	£6,000
Less Loss	£6,000		
	£4,000	£20,000	£6,000
Less Exempt Amount	£4,000	£5,600	
	0	£14,400	£6,000
Tax at 18%	0	£2,592	£1,080
Less FTCR	0	£2,000	£1,080
Tax Payable	Nil	£592	Nil

The balance of Country Y's tax of £1,620 (2,700 less 1,080) cannot be set off against the Capital Gains Tax payable on the Country X gain and cannot be repaid.

111.22 Minimisation of foreign tax

Section 33 TIOPA provides:

> (1) The credit under section 18(2) must not exceed the credit which would be allowed had all reasonable steps been taken—
>
> (a) under the law of the non-UK territory, and
>
> (b) under double taxation arrangements made in relation to that territory,
>
> to minimise the amount of tax payable in that territory.
>
> (2) The steps mentioned in subsection (1) include—
>
> (a) claiming, or otherwise securing the benefit of, reliefs, deductions, reductions or allowances, and
>
> (b) making elections for tax purposes.
>
> (3) For the purposes of subsection (1), any question as to the steps which it would have been reasonable for a person to take is to be determined on the basis of what the person might reasonably be expected to have done in the absence of relief under this Part.

111.23 Limit on credit relief

s.36 TIOPA	**s.40 TIOPA**
(1) This section is about the amount of credit allowed under section 18(2) [DTA/Unilateral credit] against a person's income tax for any tax year.	(1) This section is about the amount of credit allowed under section 18(2) [DTA/Unilateral credit] against a person's capital gains tax for any tax year.

(2) The amount of credit in respect of income from any particular source must not exceed the difference between—	(2) The amount of credit in respect of any particular capital gain must not exceed the difference between—
(a) the amount of income tax to which the person would be liable for the tax year if the person were charged to income tax on TI – X, and	(a) the amount of capital gains tax to which the person would be liable for the tax year if the person were charged to capital gains tax on TG – X, and
(b) the amount of income tax to which the person would be liable for the tax year if the person were charged to income tax on TI – (X + C)	(b) the amount of capital gains tax to which the person would be liable for the tax year if the person were charged to capital gains tax on TG – (X + C).

TI stands for **T**otal **I**ncome
C stands for **C**redit
TG stands for **T**otal **G**ains

In full detail,

s.36(4) TIOPA: IT/CT	**s.40(4) TIOPA: CGT**
In subsection (2)—	In subsection (2)—
TI is the person's total income for the tax year,	TG is the total amount of the chargeable gains accruing to the person in the tax year,
X is the income (if any) to which subsection (2) has already been applied, and	X is the total amount of the gains (if any) to which subsection (2) has already been applied, and
C is the income in respect of which the credit is to be allowed.	C is the amount of the gain in respect of which the credit is to be allowed.

s.36(3)(5) TIOPA: IT/CT	**s.40(3)(5) TIOPA: CGT**
(3) If credit is allowed (whether or not under the same tax-relief	(3) If credit is allowed (whether or not under the same tax-relief

arrangements[42]) in respect of income from more than one source, apply subsection (2) successively to the income from each source, taking the sources in the order which will result in the greatest reduction in the person's income tax liability for the tax year...	arrangements) in respect of more than one capital gain, apply subsection (2) successively to each capital gain, taking the gains in the order which will result in the greatest reduction in the person's capital gains tax liability for the tax year.
(5) The rules for calculating an amount of income tax under subsection (2) are—	(5) The rules for calculating an amount of capital gains tax under subsection (2) are—
(a) the calculation is to be made in accordance with sections 31 and 32, and	[identical]
(b) no credit is to be allowed for foreign tax, and	(b) no credit is to be allowed for foreign tax.
(c) no reduction is to be made under section 26 of FA 2005 (trusts for the benefit of a vulnerable beneficiary), but	
(d) any other income tax reduction under the Income Tax Acts is to be made.	

In short, foreign tax credit relief must not exceed the lesser of:
(1) the foreign tax, and
(2) the UK tax

Sections 37, 38 TIOPA contain further rules for trading income and royalties, not discussed here.

The Royal Commission on the Taxation of Profits and Income Final Report provides:[43]

[42] Defined in s.36(7)/40(6) TIOPA: "For the purposes of subsection (3) the following are "tax-relief arrangements"—
(a) double taxation arrangements, and
(b) unilateral relief arrangements for a territory outside the UK."

[43] (1953) Cmd 9474.

CARRY-OVER OF UNRELIEVED OVERSEAS TAX

732. The situation in which the overseas tax exceeds the UK tax so that part of it is excluded from credit attracted some attention in the evidence we received. It will, we think, be generally accepted that there could be no question of allowing the surplus overseas tax to rank for credit against the UK tax on some altogether different source of income for the same year. That course would be anomalous. To take an extreme example, it would mean that a man with an income of £1,000 from UK sources who possessed also a net overseas income of £150, being the balance remaining after a gross income of £500 had been subjected to overseas tax at an assumed rate of 70 per cent would be asked to pay *less* UK tax than another man with like personal circumstances who also possessed an income of £1,000 from UK sources but had no overseas income. If the UK were to abate its charge on income from UK sources in this way the situation would come close to being one in which the overseas country was indirectly levying tax on the UK income of UK residents.

111.23.1 *Interaction with Gift Aid*

Section 41 TIOPA provides:

> (1) In subsection (2) "the total credit" means F + G
> where—
> F is the total credit, under all tax-relief arrangements,[44] allowed under section 18(2) [DTA/Unilateral credit] against a person's income tax for any tax year, and
> G is the total credit, under all tax-relief arrangements, allowed under section 18(2) [DTA/Unilateral credit] against the person's capital gains tax for that tax year.
> (2) The total credit is not to be more than—
> I + C - A

In short, I stands for **I**ncome, C stands for **C**GT and A stands for **A**mount. In full:

> I is the total income tax payable by the person for the tax year,
> C is the total capital gains tax payable by the person for the tax year, and
> A is the total amount of the tax treated under section 414 of ITA 2007 (gift aid) as deducted from gifts made by the person in the tax year.
> (3) In calculating I and C for the purposes of subsection (2), no reduction is to be made for credit under section 18(2) [DTA/Unilateral credit].

[44] Section 41(5) TIOPA repeats the s.36 definition verbatim: see above footnotes.

(4) Subsection (2) applies in addition to sections 36 and 40.

111.24 Credit for TNR CGT

This section considers the position where:

(1) An individual who is treaty-resident in the US realises a gain. The gain is subject to US tax and not UK tax.

(2) The individual (who is temporarily non-resident) returns to the UK and the gain is subject to UK tax under the TNR rules.[45]

The USA/UK DTA Technical Explanation provides:[46]

> Although the rules allow each of the Contracting States to apply their domestic anti-abuse rules, the foreign tax credit rules provided in paragraphs 2 and 4 of Article 24 (Relief from Double Taxation) ensure that the Contracting State applying an anti-abuse rule to a resident of the other Contracting State maintains only a residual right to tax. The primary right to tax remains with the country of residence. Accordingly, pursuant to subparagraph (b) of paragraph 2 of Article 24, if the gains subject to this rule are derived while the former UK resident was a resident of the United States, then such gains are considered to be gains from sources within the United States.[47]
>
> Pursuant to paragraph 4 of Article 24, the UK will grant a foreign tax credit for US tax imposed upon those gains.
>
> Example
>
> In year 1, UK resident A purchases stock in a Country X company for $1,000.[48]
>
> A moves to the United States in year 2, when the fair market value of the stock is $2,000.[49]
>
> In year 3, while A is still a US resident, A sells the Country X stock.
>
> In year 4, after the sale of the Country X stock, A moves back to the UK and re-establishes residence.
>
> Under Article 13 (6),[50] both the United States and the UK may tax the gain on the sale of the property in year 3.

Actually, the UK taxes the gain in the year of return, year 4. But FTCR is available so the US tax is set against UK tax:

[45] See 11.6 (TNR gains/losses).

[46] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[47] See 111.2 (DTA/Unilateral Credit compared).

[48] This fact is stated so that TNR relief for post-departure acquisitions is not applicable.

[49] The value in year 2 is not relevant for UK tax, but perhaps it is relevant for US tax.

[50] See 56.24.5 (Recently departed resident).

> Under Article 24, however, the gain from the sale of the Country X stock is deemed to be from sources within the United States because A was a US resident when the sale occurred and gains from the stock could be taxed by the UK only pursuant to paragraph 6 of Article 13 (that is, the stock could not be taxed under paragraph 1 or 3 of Article 13). Thus the UK is required to provide a foreign tax credit for US taxes paid with respect to gain on the disposition of the Country X stock.

111.25 UK-resident USA citizen

This section considers income/gains arising to an individual who is a US citizen, and is treaty-resident in the UK.

The starting point here is that the individual is subject to UK tax (as a resident) *and* US tax (as a citizen). The individual does not qualify for treaty exemptions because of the US Savings Clause, but they do qualify for FTCR under art 24.[51]

The USA/UK DTA Technical Explanation provides:[52]

> By virtue of subparagraph (a) of paragraph 5 of Article 1 (General Scope), Article 24 is not subject to the saving clause of paragraph 4 of Article 1. Thus, the United States will allow a credit to its citizens and residents in accordance with the Article, even if such credit were to provide a benefit not available under the Code (such as the re-sourcing provided by paragraph 2 and subparagraph 3(d)).

111.25.1 *Source outside USA*

Article 24(6) USA/UK DTA provides:

> Where the United States taxes, in accordance with paragraph 4 of Article 1 (General scope) of this Convention, a United States citizen, or a former United States citizen or long-term resident, who is a resident of the UK–
>
> (a) the UK shall not be bound to give credit to such resident for United States tax on profits, income or chargeable gains from sources outside the United States as determined under the laws of the UK;

An Exchange of Notes on the date of the Convention provides:

> With reference to paragraphs 1 and 4 of Article 24 (Relief from double

[51] See 109.5 (Savings Clause).

[52] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> taxation)—
> it is understood that, if a resident of a Contracting State [UK] receives a dividend that is described in sub-paragraph (b) of paragraph 1 or sub-paragraph (b) of paragraph 4 of Article 24, such dividend will be deemed to be income from sources in the other Contracting State [US], even if it may be taxed only in the first-mentioned Contracting State [UK] because of sub-paragraph (a) of paragraph 3 of Article 10 (Dividends).[53]

The USA/UK DTA Technical Explanation provides:[54]

> However, paragraph 6 of this article provides special rules where a US citizen resident in the UK is subject to tax in the United States by reason of his citizenship under the saving clause of paragraph 4 of Article 1 (General Scope).
> According to the MOU, if a UK resident receives a dividend described in subparagraph (b) of paragraph 4, it will be deemed to constitute income from sources within the United States, even if the dividend may be taxed only in the UK because the zero rate of withholding applies to it.
> Paragraph 6 provides special rules for the tax treatment in both States of certain types of income derived from US sources by US citizens who are resident in the UK. Since US citizens, regardless of residence, are subject to United States tax at ordinary progressive rates on their worldwide income, the US tax on the US source income of a US citizen resident in the UK may exceed the US tax that may be imposed under the Convention on an item of US source income derived by a resident

[53] Article 10(3)(a) USA/UK DTA provides:
"(3) Notwithstanding the provisions of paragraph 2 of this Article, dividends shall not be taxed in the Contracting State [US] of which the company paying the dividends is a resident if the beneficial owner of the dividends is a resident of the other Contracting State [UK] and either—
(a) a company that has owned shares representing 80 per cent or more of the voting power of the company paying the dividends for a 12-month period ending on the date the dividend is declared, and that—
(i) owned shares representing, directly or indirectly, at least 80 per cent of the voting power of the company paying the dividends prior to October 1st, 1998; or
(ii) is a qualified person by reason of sub-paragraph (c) of paragraph 2 of Article 23 (Limitation on Benefits) of this Convention; or
(iii) is entitled to benefits with respect to the dividends under paragraph 3 or paragraph 6 of that Article".

[54] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> of the UK who is not a US citizen. This confirms that the UK retains primary taxing rights with respect to income derived by a resident that the United States may tax pursuant to section 877 of the Code. Subparagraph (a) of paragraph 6 carries over a rule from the prior Convention which states that the UK is not bound to provide a credit for US taxes with respect to income from sources outside the United States, as determined under UK law.
>
> Thus, for example, if a US citizen resident in the UK derives income from sources within France, as determined under the source rules of the UK, then the UK is not required to give a credit for US income tax imposed upon that income. In that case, the United States would give a credit for the tax paid to the UK, as well as any French taxes, with respect to such income. This rule ensures that, as between the State of residence and the State of citizenship, the State of residence takes priority.

111.25.2 *Source within USA*

Article 24(6) USA/UK DTA provides:

> Where the United States taxes, in accordance with paragraph 4 of Article 1 (General scope) of this Convention, a United States citizen, or a former United States citizen or long-term resident, who is a resident of the UK ...
>
> (b) in the case of profits, income or chargeable gains from sources within the United States, the UK shall take into account for the purposes of computing the credit to be allowed under paragraph 4 of this Article only the amount of tax, if any, that the United States may impose under the provisions of this Convention on a resident of the UK who is not a United States citizen;

The USA/UK DTA Technical Explanation provides:[55]

> Subparagraph (b) follows the US Model by providing, with respect to items of income from sources within the United States, special credit rules for the UK. These rules apply to items of US-source income that would be either exempt from US tax or subject to reduced rates of US tax under the provisions of the Convention if they had been received by a UK resident who is not a US citizen. The UK tax credit allowed under paragraph 4 with respect to such items need not exceed the US tax that may be imposed under the Convention, other than tax imposed solely by reason of the US citizenship of the taxpayer under the provisions of the

[55] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> saving clause of paragraph 4 of Article 1 (General Scope).
>
> For example, if a US citizen resident in the UK receives portfolio dividends from sources within the United States, the foreign tax credit granted by the UK would be limited to 15% of the dividend – the US tax that may be imposed under subparagraph (b) of paragraph 2 of Article 10 (Dividends) – even if the shareholder is subject to US net income tax because of his US citizenship. With respect to royalty or interest income, the UK would allow no foreign tax credit, because its residents are exempt from US tax on these classes of income under the provisions of Articles 11 (Interest) and 12 (Royalties).

111.25.3 *Computing USA tax*

Article 24(6) USA/UK DTA provides:

> Where the United States taxes, in accordance with paragraph 4 of Article 1 (General scope) of this Convention, a United States citizen, or a former United States citizen or long-term resident, who is a resident of the UK ...
>
> (c) [i] for the purposes of computing United States tax on the profits, income or chargeable gains referred to in sub-paragraph (b) of this paragraph, the United States shall allow as a credit against United States tax the income tax and capital gains tax paid to the UK after the credit referred to in sub-paragraph (b) of this paragraph;
>
> [ii] the credit so allowed shall not reduce the portion of the United States tax that is creditable against the UK tax in accordance with sub-paragraph (b) of this paragraph; and
>
> (d) for the exclusive purpose of relieving double taxation in the United States under sub-paragraph (c) of this paragraph, profits, income and chargeable gains referred to in sub-paragraph (b) of this paragraph shall be deemed to arise in the UK to the extent necessary to avoid double taxation of such profits, income or chargeable gains under sub-paragraph (c) of this paragraph.

The USA/UK DTA Technical Explanation provides:[56]

> Paragraph 6(c) eliminates the potential for double taxation that can arise because subparagraph 6(b) provides that the UK need not provide full relief for the US tax imposed on its citizens resident in the UK. The subparagraph provides that the United States will credit the income tax paid or accrued to the UK, after the application of subparagraph 6(b). It

[56] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> further provides that in allowing the credit, the United States will not reduce its tax below the amount that is taken into account in the UK in applying subparagraph 6(b).
>
> Since the income described in paragraph 6(b) is US source income, special rules are required to re-source some of the income to the UK in order for the United States to be able to credit the UK tax. This re-sourcing is provided for in subparagraph 6(d), which deems the items of income referred to in subparagraph 6(b) to be from foreign sources to the extent necessary to avoid double taxation under paragraph 6(c). In most cases, the income described in subparagraph 6(a) will be from sources outside the United States under US rules, so it is not necessary for paragraph 6(d) to re-source the income in order to relieve double taxation.
>
> Subparagraph 3(e) of Article 26 (Mutual Agreement Procedure) provides a mechanism by which the competent authorities can resolve any disputes regarding whether income is from sources within the United States.

111.25.4 *Source within USA: Examples*

The USA/UK DTA Technical Explanation provides:[57]

> The following two examples illustrate the application of paragraph 6 in the case of a US-source portfolio dividend received by a US citizen resident in the UK.
>
> In both examples, the US rate of tax on residents of the UK, under subparagraph (b) of paragraph 2 of Article 10 (Dividends) of the Convention, is 15%.
>
> In both examples, the US income tax rate on the US citizen is 36%.
>
> In example 1, the UK income tax rate on its resident (the US citizen) is 25% (below the US rate), and in example 2, the UK rate on its resident is 40% (above the US rate).

[Art 24(6)] sub para (b)	Example 1	Example 2
US dividend declared	$100.00	$100.00
Notional US withholding tax (Art10(2)(b))	15	15
UK taxable income	100	100
UK tax before credit	25	40
UK foreign tax credit	15	15
Net post-credit UK tax	10	25
[Art 24(6)] sub paras (c) and (d)		
US pre-tax income	$100.00	$100.00

[57] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

US pre-credit citizenship tax	36	36
Notional US withholding tax	15	15
US tax available for credit	21	21
Income re-sourced from US to UK (see below)	27.77	58.33
US tax on re-sourced income	10	21
US credit for UK tax	10	21
Net post-credit US tax	11	0
Total US tax	26	25

In both examples, in the application of subparagraph (b), the UK credits a 15% US tax against its residence tax on the US citizen. In the first example, the net UK tax after the UK foreign tax credit is $10.00; in the second example, it is $25.00. In the application of subparagraphs (c) and (d), from the US tax due before credit of $36.00, the United States subtracts the amount of the US source tax of $15.00, against which no US foreign tax credit is allowed. This subtraction ensures that the United States collects the tax that it is due under the Convention as the State of source.

In both examples, given the 36% US tax rate, the maximum amount of US tax against which credit for the UK tax may be claimed is $21 ($36 US tax minus $15 US withholding tax). Initially, all of the income in both examples was from sources within the United States. For a US foreign tax credit to be allowed for the full amount of the UK tax, an appropriate amount of the income must be re-sourced to the UK under subparagraph (d).

The amount that must be re-sourced depends on the amount of UK tax for which the US citizen is claiming a US foreign tax credit. In example 1, the UK tax was $10. For this amount to be creditable against US tax, $27.77 ($10 UK tax divided by 36% US tax rate) must be resourced to the UK. When the UK tax is credited against the US tax on this resourced income, there is a net US tax of $11 due after credit ($21 US tax minus $10 UK tax). Thus, in example 1, there is a total of $26 in US tax ($15 US withholding tax plus $11 residual US tax).

In example 2, the UK tax was $25, but, because the United States subtracts the US withholding tax of $15 from the total US tax of $36, only $21 of US taxes may be offset by UK taxes. Accordingly, the amount that must be resourced to the UK is limited to the amount necessary to ensure a US foreign tax credit for $21 of UK tax, or $58.33 ($21 UK tax divided by 36% US tax rate). When the UK tax is credited against the US tax on this re-sourced income, there is no residual US tax ($21 US tax minus $21 UK tax). Thus, in example 2, there is a total of $15 in US tax ($15 US withholding tax plus $0 residual US tax). Although the UK tax was $25 and the US tax available for credit was

$21, there is no excess US tax credit available for carryover.

111.26 Credit for underlying USA co tax

Article 24(4)(b)-(d) USA/UK DTA relate to FTCR for corporation tax, which is outside the scope of this chapter, but I set it out here for completeness.

Article 24(4)(b) USA/UK DTA provides:

> ...
>
> (b) in the case of a dividend
>
> [i] paid by a company which is a resident of the United States
>
> [ii] to a company[58] which is a resident of the UK
>
> [iii] and which controls directly or indirectly at least 10% of the voting power in the company paying the dividend,
>
> the credit shall take into account (in addition to any United States tax for which credit may be allowed under the provisions of sub-paragraph (a) of this paragraph) the United States tax payable by the company in respect of the profits out of which such dividend is paid;

Contrast s.63 TIOPA.

111.26.1 *Hybrids*

Article 24(4)(c) USA/UK DTA provides an anti-avoidance rule for hybrids:

> (c) United States tax shall not be taken into account under sub-paragraph (b) of this paragraph for the purpose of allowing credit against UK tax in the case of a dividend paid by a company which is a resident of the United States if and to the extent that
>
> (i) the UK treats the dividend as beneficially owned by a resident of the UK; and
>
> (ii) the United States treats the dividend as beneficially owned by a resident of the United States; and
>
> (iii) the United States has allowed a deduction to a resident of the United States in respect of an amount determined by reference to that dividend;

The USA/UK DTA Technical Explanation provides:[59]

> Subparagraph (c) eliminates the UK credit otherwise provided for in

[58] Including an LLC: see 90.48 (Credit for LLC's US tax).

[59] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

> subparagraph (b) in certain circumstances. The rule is limited to certain cases where the two countries have a different view as to the ownership of dividends and, as a result, the United States has provided a tax deduction for payments that are measured by reference to the dividend. This rule is intended to apply to a particular type of financing transaction that has been widely used by UK resident companies to finance their US operations. In this transaction, a US holding company would sell stock in another US company to a UK company. At the same time, it would enter into a repurchase agreement that would allow it to buy back the stock at a pre-determined price. The parties would structure the transactions in such a way that the sale and repurchase transactions would be treated as a loan for US tax purposes. As a result, the dividends paid to the UK company are treated as payments of interest on the loan from the UK company to the US company. The UK had seen a number of these transactions and was concerned about their potential impact.
>
> UK law provides no mechanism by which to treat the sale and re-purchase in accordance with its economic substance. Accordingly, the UK is required by UK domestic law to treat the UK company as the owner of the dividends for purposes of its rules, and to provide a foreign tax credit for the taxes paid by the US company paying the dividends. However, recent changes to UK foreign tax credit rules allow the UK to deny credits if a tax treaty specifically so provides. The UK asked for the exception in paragraph (c) in order to conform the UK treatment of these transactions to the US tax treatment. Because the rule applies only with respect to the indirect tax credit, it will apply only with respect to transactions involving persons who own more than 10% of the underlying company. Moreover, the rule applies only if the US company receives an interest deduction that is based on the dividends paid with respect to the stock, while the deductible payments arising from standard sale-repurchase agreements would be based on a completely different measure, the current cost of funds. Accordingly, the rule should not (and is not intended to) affect most repos and similar transactions that take place in the public markets.

Article 1(2) USA/UK DTA provides:

> This Convention shall not restrict in any manner any benefit now or hereafter accorded—
>
> (a) by the laws of either Contracting State; or
>
> (b) by any other agreement between the Contracting States.

Article 24(4)(d) USA/UK DTA provides:

> (d) the provisions of paragraph 2 of Article 1 (General scope) of this

> Convention shall not apply to sub-paragraph (c) of this paragraph.

The USA/UK DTA Technical Explanation provides:[60]

> Subparagraph (c) would not be effective without subparagraph (d). Subparagraph (c) limits benefits that are otherwise available under domestic law and therefore would be inconsistent with the rules of paragraph 2 of Article 1 (General Scope), which provide that the tax treaty cannot limit benefits that are available under domestic law. Subparagraph (d) provides an exception from paragraph 2 of Article 1 with respect to subparagraph (c).

In *Aozora GMAC Investment (R, oao) v HMRC*:[61]

> I did read Article 24(4)(c) several times, in a futile endeavour to understand its purpose. Some enlightenment did, however, emerge from the helpful [US Treasury Technical Explanation] ("the Note").
>
> It appears from the Note that Article 24(4)(c) was inserted in the Treaty at the behest of the UK Government, as an anti-avoidance provision to deal with what was perceived to be a very specific arbitrage device intended to generate a tax credit against UK corporation tax that was considered to be unjustified. In the relevant scenario a US corporation would sell stock in a US subsidiary to a UK resident company, with an obligation at some point to repurchase the stock ("a repo"). US revenue law looked at the commercial reality, treated the repo as a secured loan to the US corporation, any "dividend" paid to the UK company as a payment of interest by the US corporation, and, semble, the stock and "dividend" as beneficially owned by the debtor US corporation. For UK corporation tax, however, the "dividend" had to be treated as genuine, and the UK company would be positioned to obtain credit against UK tax in respect of an appropriate part of the profits of the US corporation, notwithstanding the fact that the US corporation had fully deducted the "dividend"/interest payment for the purposes of stating its US taxable income – a form of double tax relief successfully arbitraged through the different treatment of the transaction in the two jurisdictions.

111.27 CGT/IT computation deduction

111.27.1 *Computation deductions*

Section 112 TIOPA provides:

> (1) The amount of any income arising in any place outside the UK is reduced for the purposes of the Tax Acts—

[60] *https://home.treasury.gov/system/files/131/Treaty-UK-Protocol-TE-7-22-2002.pdf*

[61] [2017] EWHC 2881 (Admin) at [27]-[28].

> (a) by any amount which has been paid in respect of non-UK tax[62] on that income in the place where the income arose...

Section 113 TIOPA has the equivalent rule for CGT:

> (1) Subsection (2) applies to tax if it is—
> (a) chargeable under the law of any territory outside the UK on the disposal of an asset, and
> (b) borne by the person making the disposal.[63]
> (2) The tax is allowable as a deduction in the calculation of the gain.

The INT Manual provides:

> **INTM169090. Deduction not credit** [May 2020]
> A deduction for the foreign tax should be made in the computation of the gain or loss when there is no claim to foreign tax credit relief or when no UK tax is chargeable on a gain; for example, when the UK computation shows a loss on the disposal and consequently there is no UK tax against which credit for any foreign tax can be given. No deduction is due, however, when credit relief is claimed, for any part of the foreign tax paid on a gain which does not qualify for credit because it exceeds the UK tax chargeable on the same gain.

INT Manual provides:

> **INTM161050. Deduction instead of credit** [May 2020]
> ... Section 112 refers to 'any sum which has been paid in respect of non-UK tax' on income. This means tax alone and not, for example, interest paid in the foreign country for late payment of the foreign tax. Nor may a deduction be allowed for 'tax spared' (INTM161270) as it is not tax which has been paid; nor for underlying tax (INTM164060 and INTM164360) as it is not paid on the dividend in question; nor for taxes similar to UK VAT (see, however, INTM161080). Refer to CSTD Business, Assets & International Base Protection Policy Team, any case where it is not clear that the tax for which a deduction is sought under Section 112 is a tax on income.
> Section 112 allows a deduction for foreign tax paid on income 'in the place where the income arose'. Refer to CSTD Business, Assets &

[62] Section 112(6) TIOPA provides a commonsense definition: "In subsection (1) "non-UK tax" means tax under the law of a territory outside the UK."

[63] Section 113(4) TIOPA provides: "In subsection (1) "asset" and "disposal" have the same meaning as in TCGA 1992 (see, in particular, section 21 and the following provisions of TCGA 1992)."

International Base Protection Policy Team, any case where a deduction is sought for foreign tax paid on income which arises wholly or partly from work carried out in the UK....

INTM161080 Deduction for taxes [May 2020]
For a deduction to be given for a foreign tax, TIOPA10/S112 requires the tax to be charged on income. If a tax is not charged on income, it may be inadmissible for tax credit relief and will also not be deductible under section 112. Examples of such taxes are those charged on turnover or on the capital value of assets used in the business. A deduction for such taxes may, nevertheless, be an allowable expense in computing the income taxable in the UK. See BIM45900 onwards as regards trading income and SAIM1130 as regards savings and investment income.

111.27.2 *Restrictions on deductions*

Section 112 TIOPA provides:

(2A) But if X is less than Y, an amount equal to the difference between X and Y must be subtracted from the amount by which any income of a person ("the relevant income") is reduced under subsection (1)(a).
(2B) In subsection (2A)—
X is the amount of the relevant income that the person would (disregarding this section) be required to bring into account for income tax or corporation tax purposes, less any deduction that the person would be allowed to make for the amount paid in respect of non-UK tax, and
Y is the amount of the relevant income (that is to say, the amount on which the amount in respect of non-UK tax is paid).

INTM161085 Amount Brought Into Account [May 2020]
The FA 2010 introduced some clarifications to TIOPA10/S112. The amendments confirmed that a person may only deduct foreign tax from any foreign income where that person has not already reduced his income by reference to the foreign tax, so ensuring the foreign tax is only deducted once.
The new sections 112(2A) and (2B) determine whether the foreign tax has already been taken into account by comparing what income the person brings into account for income, capital gains or corporation tax purposes less any deduction that the person would be allowed to make for the non-UK tax (amount X) to the gross amount of income arising outside the UK (amount Y). If X is the same as Y then the person has not already reduced his income by reference to the foreign tax and so the person can use section 112 to reduce his taxable income by the amount

of foreign tax. If X is less than Y by the amount of the foreign tax then the person has already deducted the foreign tax and should not have a further deduction under section 112.

For example:

Branch profits

If a company's foreign branch receives 100 of foreign income and incurs 15 of tax on its profits in the branch, amount X will be 100 because the company will bring 100 into account for corporation tax purposes and cannot deduct the branch profits tax as an expense (*IRC v Dowdall O'Mahoney & Co Ltd* [1952] 33 TC 259). Amount Y will be 100 being the income arising outside the UK. As there is no difference between X and Y, the company can deduct the foreign branch tax of 15 under section 112(1)(a).

Company with share on its balance sheet

Scenario 1: Non-financial trader not otherwise entitled to a deduction for foreign tax.

Where a company holds a share on its balance sheet and receives a foreign dividend of 85 which has suffered 15 of withholding tax, amount X should be 100 because the company should bring the gross dividend into account and cannot deduct the foreign tax absent section 112. Amount Y will be 100, being the income arising outside the UK. As there is no difference between X and Y, the company can deduct the foreign branch tax of 15 under section 112(1)(a).

Scenario 2: Financial trader entitled to a deduction for foreign tax.

On the above facts, amount X will be 85 because the trader will initially recognise 100 as income but will also recognise an expense of 15 in respect of the foreign tax. Amount Y will be 100, being the income arising outside the UK. As X is less than Y by the amount of the foreign tax, then the trader has already reduced his income by reference to the foreign tax so no further relief is due under section 112(1)(a).

Company with share off balance sheet

Where a company does not hold the share on balance sheet, then it will not recognise the gross dividend (i.e. 100) in its income statement. However, it will recognise the net dividend (i.e. 85) as a component of the underlying calculation of the financing return on the transaction. As a result, amount X will be 85. Amount Y will be 100, being the income arising outside the UK. As X is less than Y by the amount of foreign tax, the company has already effectively had a deduction for the foreign tax and so cannot then use section 112 to reduce its income further.

Credit must be given for a foreign income tax repayment:

(3) If—

> (a) income of any person ("P") is reduced under subsection (1) by an amount paid in respect of tax on that income in the place where the income arose, and
> (b) a payment is made by a tax authority to P, or any person connected[64] with P, by reference to that tax, the amount of P's income is increased by the amount of the payment.
>
> (4) Subsection (1)—
> (a) has effect subject to section 31(2)(a) (no deduction for foreign tax if credit allowed and UK tax calculated otherwise than by reference to the amount received in the UK),
> (b) has effect subject to section 143(5) and (6) (no deduction for special withholding tax if UK tax calculated otherwise than by reference to the amount received in the UK),
> (c) does not apply to income the tax on which is to be calculated by reference to the amount of income received in the UK, and
> (d) does not require any income to be reduced by an amount of underlying tax which, under section 60(3), is to be left out of account for the purposes of section 57.

Section 113 TIOPA provides:

> (3) Subsection (2) is subject to—
> (a) Chapters 1 and 2 so far as they apply for corporation tax purposes (see, in particular, section 31),
> (b) Chapters 1 and 2 so far as they apply for capital gains tax purposes (see, in particular, section 31), and
> (c) section 143 (which includes provision about taking account of special withholding tax when calculating a gain for capital gains tax purposes).

111.27.3 *Tax Credit/deduction interaction*

Thus DTA/Unilateral Foreign Tax Credit (if claimed) has priority over an IT/CGT computation deduction.

The IHT Manual provides:

> **INTM161090 Credit or deduction** [May 2020]
> Relief for the foreign tax paid on a particular item of income or gain cannot be claimed partly by way of credit relief and partly by deduction under TIOPA10/S112 or S113 (see Section 112(4)(a) & 113(3)(a) &

[64] Defined s.112(7) TIOPA: "For the purposes of subsection (3), whether a person is connected with P is determined in accordance with section 1122 of CTA 2010."

> (b), the sections can only operate where a claim has not been made for credit relief that brings TIOPA10/S31 into operation). However, credit may be claimed for the foreign tax paid on one item of income or gain against the UK tax charged on that item; and a deduction may be given for the foreign tax on a different item of income or gain, in determining the amount of that item chargeable to UK tax.
> However, see INTM168110 when foreign tax paid on certain foreign loan interest exceeds the amount for which credit is allowed.

111.27.4 *Use of computation relief*

At first sight it is not obvious when an IT/CGT computation deduction would be better than foreign tax credit relief. One case is where foreign CGT is payable but UK CGT is not (because of a difference in valuation rules or because some UK relief applies). In such a case the computation deduction may:

(1) increase the loss allowable for UK CGT purposes (similarly for IT) or
(2) decrease the amount of held-over or rolled-over gain[65]

INT Manual provides:

> **INTM161050. Deduction instead of credit** [May 2020]
> It may sometimes be to the taxpayer's advantage not to make a claim to tax credit relief, for example where a business's trading profits are wholly covered by capital allowances so that there is no Income Tax or Corporation Tax payable on those profits, or where the trading results show a loss. If, for any reason, tax credit relief is not claimed, the foreign tax paid must be deducted from the income from the foreign source in computing the amount of the income for UK tax purposes (TIOPA10/S112-115). This may serve to create or increase a loss which can be dealt with under the normal provisions for losses...

111.27.5 *Accrued income scheme*

For completeness: the AIS needs a separate rule. Section 112 TIOPA provides:

> (1) The amount of any income arising in any place outside the UK is reduced for the purposes of the Tax Acts ...
> (b) if subsection (2) applies, by the lesser amount mentioned in that subsection.
> (2) This subsection applies if credit would, were it allowable in respect

[65] See 111.7 (Roll-over relief).

of the income, be reduced under section 39 (reduction by reference to accrued income losses) to the lesser amount given by section 39(5).

CHAPTER ONE HUNDRED AND TWELVE

NON-DISCRIMINATION

112.1 Non-discrimination: OECD Model
112.2 Nationals discrimination
112.2.1 "Nationals"
112.3 Stateless persons discrimination
112.4 PE discrimination
112.5 Discrimination in tax deductions
112.6 Enterprise owned in other state
112.7 "Taxes"
112.8 "Non-discrimination provision"
112.9 Channel Islands/IoM DTAs

112.1 Non-discrimination: OECD Model

This chapter discusses:

(1) The OECD Model non-discrimination provision

(2) The definition of "Non-discrimination Provision" which occurs in UK tax legislation

The OECD Model non-discrimination rule has a lengthy commentary, which I hope to discuss in a future edition. But a full discussion needs a book to itself, and indeed such books have been written.

112.2 Nationals discrimination

Article 24 OECD Model provides:

> 1. Nationals of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances, in particular with respect to residence, are or may be subjected.
> This provision shall, notwithstanding the provisions of Article 1 [Persons covered], also apply to persons who are not residents of one or both of the Contracting States.

112.2.1 *"Nationals"*

Article 3(g) OECD Model provides:

> the term "national", in relation to a Contracting State, means:
> (i) any individual possessing the nationality or citizenship of that Contracting State; and
> (ii) any legal person, partnership or association deriving its status as such from the laws in force in that Contracting State;

112.3 Stateless persons discrimination

Article 24(2) OECD Model provides:

> Stateless persons who are residents of a Contracting State shall not be subjected in either Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of the State concerned in the same circumstances, in particular with respect to residence, are or may be subjected.

This relates to the UN Convention relating to the Status of Stateless Persons (1954). There are approximately 10m stateless persons in the world, though I am not sure how often this provision will be relevant to them.

112.4 PE discrimination

Article 24(3) OECD Model provides:

> The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other State than the taxation levied on enterprises of that other State carrying on the same activities.
> This provision shall not be construed as obliging a Contracting State to grant to residents of the other Contracting State any personal allowances, reliefs and reductions for taxation purposes on account of civil status or family responsibilities which it grants to its own residents.

112.5 Discrimination in tax deductions

Article 24(4) OECD Model provides:

> Except where the provisions of paragraph 1 of Article 9, paragraph 6 of Article 11, or paragraph 4 of Article 12, apply, interest, royalties and other disbursements paid by an enterprise of a Contracting State to a resident of the other Contracting State shall, for the purpose of determining the taxable profits of such enterprise, be deductible under the same conditions as if they had been paid to a resident of the first-mentioned State. Similarly, any debts of an enterprise of a

> Contracting State to a resident of the other Contracting State shall, for the purpose of determining the taxable capital of such enterprise, be deductible under the same conditions as if they had been contracted to a resident of the first-mentioned State.

The 3 exceptions concern transfer pricing.

112.6 Enterprise owned in other state

Article 24(5) OECD Model provides:

> Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected.

112.7 "Taxes"

Article 24(6) OECD Model provides:

> The provisions of this Article shall, notwithstanding the provisions of Article 2 [Taxes Covered], apply to taxes of every kind and description.

112.8 "Non-discrimination provision"

This expression is used in a number of definitions:

Topic	**Definition**	**Reference**	**See para**
Transfer pricing	Qualifying territory	s.173 TIOPA	25.17.1
Exempt distributions	Qualifying territory	s.931C CTA 2009	-
Intangible property	Full treaty territory	s.608E ITTOIA	32.19.3

s.174(4) TIOPA	**s.931C(4) CTA 2009**	**s.608E(2) ITTOIA**
For the purposes of subsection (2)(b) a "non-discrimination provision", in relation to any double taxation arrangements, is	In subsection (1) "non-discrimination provision", in relation to double taxation relief arrangements, means	In subsection (1) "non-discrimination provision", in relation to double taxation arrangements, means
a provision to the effect that nationals of a state	[Identical to TIOPA]	a provision to the effect that nationals of a state
which is a party to those arrangements (a		which is a party to those arrangements (a

“contracting state”) are not to be subject in any other contracting state to— (a) any taxation, or (b) any requirement connected with taxation, which is other or more burdensome than the taxation and connected requirements to which nationals of that other state in the same circumstances (in particular with respect to residence) are or may be subjected.		"contracting state") are not to be subject in the other contracting state to- (a) any taxation, or (b) any requirement connected with taxation, which is other or more burdensome than the taxation and connected requirements to which nationals of that other contracting state in the same circumstances (in particular with respect to residence) are or may be subjected.

The small differences in wording are not significant.

s.174(5) TIOPA	**s.931C(5) CTA 2009**	**s.608E(5) ITTOIA**
(5) In subsection (4) “national”, in relation to a state, includes—	In subsection (4) “national”, in relation to a contracting state, includes—	(3) In subsection (2) "national", in relation to a contracting state, includes-
(a) any individual possessing the nationality or citizenship of the state, and (b) any legal person, partnership or association deriving its status as such from the law in force in that state.	(a) an individual possessing the nationality or citizenship of the contracting state, and (b) a legal person, partner-ship or association deriving its status as such from the laws in force in that contracting state.	[Identical to CTA 2009]

Again, the small differences in wording are not significant. The wording is the same as the OECD Model, except that the definition here is inclusive; but it is difficult to see that that could make any difference.

112.9 Channel Islands/IoM DTAs

The Guernsey DTA is typical. It is helpful to read the Crown Dependency treaty/OECD Model side by side:

Art 24(1) Guernsey DTA	**Art 24(1) OECD Model**
A legal person, partnership or association deriving its status as such from the laws in force in a Territory	Nationals of a Contracting State
shall not be subjected in the other Territory to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which a legal person, partnership or association of that other Territory in the same circumstances, in particular with respect to residence, is or may be subjected.	shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances, in particular with respect to residence, are or may be subjected...

The Guernsey DTA applies to a legal person/partnership/association. It does not apply to individuals (who are natural persons, not "legal" persons). One might have thought that the reason was that citizens of the Crown Dependencies are British citizens, so a rule preventing discrimination against them is not needed.

It follows however that the DTA does not contain a "Non-discrimination" Provision in the statutory sense. The definition is a technical one, which ought to be written with scare quotation marks.

It follows that Guernsey is not a qualifying territory/full-tax territory within the statutory definitions which restrict that concept to territories with a "Non-discrimination Provision".

HMRC take this point. ORIP draft guidance provides:

> 7.3...Examples of some territories with which the UK has a double taxation agreement but which do not contain a relevant non-discrimination article include the UK's double taxation agreements with the Crown Dependencies, some British Overseas Territories, and some other territories such as Hong Kong and Saudi Arabia.

This seems an obscure way to exclude Crown Dependencies etc from the definition and the reliefs to which the definitions relates. But there it is.

ORIP draft guidance sets out a list of full treaty territories (though that should not be relied on without checking.)

CHAPTER ONE HUNDRED AND THIRTEEN

MUTUAL AGREEMENT PROCEDURE

113.1 Presentation of case
113.2 Resolution of case
113.2.1 Interim payment of tax
113.3 Inter-state agreements
113.4 Inter-state communications
113.5 Arbitration

Cross references

The following topics are considered elsewhere:

Topic	**See para**
Treaty residence: Mutual agreement procedure	9.18.2

113.1 Presentation of case

Art 25 OECD Model

1. Where a person considers that the actions of one or both of the Contracting States result or will result for him in taxation not in accordance with the provisions of this Convention, he may, irrespective of the remedies provided by the domestic law of those States, present his case to the competent authority of either Contracting State. The case must be presented within three years from the first notification of the action resulting in taxation not in accordance with the provisions of the Convention.

Art 26 USA/UK DTA

(1) Where a person considers that the actions of one or both of the Contracting States result or will result for him in taxation not in accordance with the provisions of this Convention, he may, irrespective of the remedies provided by the domestic law of those States, present his case to the competent authority of the Contracting State of which he is a resident or national. The case must be presented within three years from the first notification of the action resulting in taxation not in accordance with the provisions of this Convention or, if later, within six years from the end of the taxable year or chargeable period in respect of which that taxation is imposed or proposed.

Under the treaty, the taxpayer is allowed to "present his case". Apart from that, the taxpayer has no control over the process, and only limited input as, at least in the US:[1]

> the negotiation of a MAP [mutual agreement procedure] is a government-to-government process. A taxpayer has no legal right to attend negotiations between the competent authorities or to observe the negotiations. However, it is also recognised that the taxpayer is a key stakeholder in the MAP process. The competent authorities therefore agree that they will keep taxpayers informed about the progress of a case under the MAP and will invite them to provide such further information as may be helpful in reaching a resolution. At their discretion, they may allow information to be provided to them in a joint presentation by the taxpayer.

113.2 Resolution of case

Art 25 OECD Model	**Art 26 USA/UK DTA**
2. The competent authority shall endeavour, if the objection appears to it to be justified and if it is not itself able to arrive at a satisfactory solution, to resolve the case by mutual agreement with the competent authority of the other Contracting State, with a view to the avoidance of taxation which is not in accordance with the Convention.	(2) The competent authority shall endeavour, if the objection appears to it to be justified and if it is not itself able to arrive at a satisfactory solution, to resolve the case by mutual agreement with the competent authority of the other Contracting State, with a view to the avoidance of taxation which is not in accordance with this Convention.
Any agreement reached shall be implemented notwithstanding any time limits in the domestic law of the Contracting States.	Any agreement reached shall be implemented notwithstanding any time limits or other procedural limitations in the domestic law of the Contracting States, except such limitations as apply for the purposes of giving effect to such an agreement.

113.2.1 *Interim payment of tax*

The Exchange of Notes for the USA/UK DTA provides:

> With reference to paragraph 2 of Article 26 (Mutual agreement procedure)—
> it is understood that where the competent authorities are endeavouring to resolve a case pursuant to the Article, neither Contracting State shall seek to collect the tax which is in dispute until the mutual agreement

[1] IRS Release IR-2000-79, 13 November 2000, page 2.

procedure has been completed. Any tax which is payable following the completion of the mutual agreement procedure shall, however, be subject to interest charges, and, if appropriate, surcharges or penalties, as long as it remains unpaid.

113.3 Inter-state agreements

Art 25 OECD Model	**Art 26 USA/UK DTA**
3. The competent authorities of the Contracting States shall endeavour to resolve by mutual agreement any difficulties or doubts arising as to the interpretation or application of the Convention. They may also consult together for the elimination of double taxation in cases not provided for in the Convention.	(3) The competent authorities of the Contracting States shall endeavour to resolve by mutual agreement any difficulties or doubts arising as to the interpretation or application of this Convention.

The US/UK DTA adds:

> In particular the competent authorities of the Contracting States may agree—
>
> (a) to the same attribution of income, deductions, credits, or allowances of an enterprise of a Contracting State to its permanent establishment situated in the other Contracting State;
>
> (b) to the same allocation of income, deductions, credits, or allowances between persons;
>
> (c) to the same characterisation of particular items of income, including the same characterisation of income that is assimilated to income from shares by the taxation law of one of the Contracting States and that is treated as a different class of income in the other Contracting State;
>
> (d) to the same characterisation of persons;
>
> (e) to the same application of source rules with respect to particular items of income;
>
> (f) to a common meaning of a term;
>
> (g) that the conditions for the application of
>
> [i] the second sentence of Paragraph 5 of Article 7 (Business profits),
>
> [ii] paragraph 9 of Article 10 (Dividends),
>
> [iii] paragraph 7 of Article 11 (Interest),
>
> [iv] paragraph 5 of Article 12 (Royalties), or
>
> [v] paragraph 4 of Article 22 (Other income)
>
> of this Convention are met; and

(h) to the application of the provisions of domestic law regarding penalties, fines, and interest in a manner consistent with the purposes of this Convention.

The Exchange of Notes for the USA/UK DTA provides for publication:

> With reference to paragraph 3 of Article 26 (Mutual agreement procedure)—
> it is understood that any principle of general application established by an agreement between the competent authorities shall be published by both competent authorities.

113.4 Inter-state communications

Art 25 OECD Model	Art 26 USA/UK DTA
4. The competent authorities of the Contracting States may communicate with each other directly, including through a joint commission consisting of themselves or their representatives, for the purpose of reaching an agreement in the sense of the preceding paragraphs.	(4) The competent authorities of the Contracting States may communicate with each other directly for the purpose of reaching an agreement in the sense of the preceding paragraphs.

It is not obvious that this is needed, though it does not harm.

In the context of a dispute about place of effective management, the FTT refused to order disclosure of documents relating to discussions between the UK and the foreign State.[2] That seems right, because what the States thought about POEM no relevance to the Tribunal hearing, which had to make up its own mind on the POEM issue on the basis of the factual evidence. It seems unlikely that the documents contained factual information about POEM unknown to the taxpayer. Perhaps this confidentiality facilitates frank discussion between States, though it can also cloud mistaken or improper decision making.

113.5 Arbitration

Art (5) of the OECD Model provides:

> 5. Where,
>
> a) under paragraph 1, a person has presented a case to the competent authority of a Contracting State on the basis that the

[2] *McCabe v HMRC* [2020] UKUT 266 (TCC).

> actions of one or both of the Contracting States have resulted for that person in taxation not in accordance with the provisions of this Convention, and
>
> b) the competent authorities are unable to reach an agreement to resolve that case pursuant to paragraph 2 within two years from the date when all the information required by the competent authorities in order to address the case has been provided to both competent authorities,
>
> any unresolved issues arising from the case shall be submitted to arbitration if the person so requests in writing. These unresolved issues shall not, however, be submitted to arbitration if a decision on these issues has already been rendered by a court or administrative tribunal of either State. Unless a person directly affected by the case does not accept the mutual agreement that implements the arbitration decision, that decision shall be binding on both Contracting States and shall be implemented notwithstanding any time limits in the domestic laws of these States. The competent authorities of the Contracting States shall by mutual agreement settle the mode of application of this paragraph.

There is no equivalent in the US treaty.

Arbitration under the New Zealand/UK treaty is governed by a Memorandum of Agreement (October 2023).

CIOT say:

> we would like to encourage the government to step up the UK's policy for seeking to negotiate mandatory binding arbitration provisions in its treaty network, to reflect the UK's support of such provisions in the discussions around Action 14 of the G20/OECD BEPS project and the changes to the DTA landscape as a result of the BEPS MLI.[3]

[3] Letter to HMRC, 22 November 2023.

CHAPTER ONE HUNDRED AND FOURTEEN

IHT DOUBLE TAXATION TREATIES: INTRODUCTION

114.1 IHT double taxation treaties

82.18 (DTA override) (residential property)

114.1 IHT double taxation treaties

In recent times the UK has had three death/gift taxes:

Tax	**Dates**
Estate duty	1894 - 1974
Capital transfer tax	1974 - 1986
Inheritance tax	1986 -

The UK has IHT DTAs with 10 countries. They can be divided into two groups, those made under Estate Duty, and those made subsequently:

Country	**Date**	**See para**
DTAs made under Estate Duty		
India	1956	115.1
Pakistan	1957	115.1
France	1963	115.1
Italy	1966	115.1
DTAs made under CTT/IHT		
Netherlands	1979	116.1
South Africa	1978	117.1
Switzerland	1993	118.1
USA	1978	119.1

Ireland	1977	*Not discussed*[1]
Sweden	1980	*Not discussed*

I discuss the four estate duty DTAs together in the next chapter, and then each of the subsequent DTAs has its own chapter, followed by a chapter on foreign IHT credit relief, see 120.1 (Credit for Foreign IHT). This chapter considers some general issues relating to IHT DTAs, and some issues which the CTT/IHT DTAs have in common.

I comment only on the UK aspects of the treaties. Foreign law advice will also be needed in any case where a treaty applies. The provisions relating to exchange of information are not discussed.

114.2 Estate and inheritance taxes

Many states (though by no means all) impose tax on the transfer of wealth on death. These taxes may be divided into two types:

(1) The taxable person may be the deceased or their estate
(2) The taxable persons may be the beneficiaries of the estate (the heirs)

In international tax terminology, type (1) is called an estate tax and type (2) is called an inheritance tax. Under this terminology IHT is more like an estate tax[2] and its title "inheritance tax" is a misnomer. However no confusion arises as long as one remembers that, and I use the term "inheritance taxes" to include both types.

Jurisdiction to charge inheritance tax (as for income tax) is normally based one of two criteria:

(1) personal nexus to the state: domicile, residence or nationality or the deceased or of the beneficiary;
(2) situs of assets (a source rule).

These criteria are the cause of double inheritance taxation:

(1) **Residence-source conflict** when
    (a) State A imposes tax on the deceased (estate tax) or the heir (inheritance tax) because of their personal nexus to the state

[1] See Anketell and O'Hanlon, "Cross-Border Inheritance Tax in Ireland" Irish Tax Review, (2012) No 4, p.117; Avery Jones, "The Capital Transfer Taxes Double Taxation Convention with Ireland" [1979] BTR 1. I hope to discuss Ireland and Sweden in future editions.

[2] IHT might be described as a hybrid tax, as the tax can be collected from transferor and transferee, but it is the position of the transferor which matters for the quantum of tax, for instance, it is the donor and not the donee who has a nil-rate band.

(residence, domicile or nationality),

(b) State B imposes tax because the assets are situate in that state.

A residence-source conflict results in double taxation of assets situate in state B.

(2) **Residence-residence conflict** when more than one state imposes tax on the same person because of their residence, domicile or nationality. A residence-residence conflict results in double taxation on worldwide assets.

(3) **Source-source conflict** where state A regards an asset as situate in state A and state B regards the asset as situate in state B, because they have different rules determining situs. A source-source conflict results in double taxation on the dual situate assets.

For a general discussion of these problems, see Study on Inheritance Taxes in EU Member States and Possible Mechanisms to Resolve Problems of Double Inheritance Taxation in the EU.[3]

114.3 OECD IHT Models

OECD have published two model conventions:

Full Name	**Date**
Draft Estate and Inheritance Model Convention	1966
Model Double Taxation Convention on Estates and Inheritances and on Gifts	1982

I refer to these as the **"1966/1982 OECD IHT Models"**.

The 1982 Model extends the 1966 Model to include lifetime gifts. In other respects it does not differ much from the previous model. The models use concepts and definitions draw from the OECD IT/CG Model, so discussion of that model can also be relevant for IHT DTAs. The 1982 Model has not been updated since publication.

The UK's Estate Duty/IHT treaties were made before the publication of the 1966 Model and follow a different form.

Subsequent CTT/IHT DTAs were made after the 1966 Model and broadly follow that form. The standard form of these treaties is as

[3] Copenhagen Economics, commissioned by the EC Directorate-General for Taxation and Customs Union, 2010. *https://taxation-customs.ec.europa.eu/system/files/2016-09/inheritance_taxes_report_2010_08_26_en.pdf*

follows:

(1) Immovable property, business permanent establishments and (normally) ships/aircraft can be taxed on a situs basis.

(2) For other property, the state where the individual is treaty-domiciled has the primary taxing right and the other state may[4] have the secondary right (with credit for the tax in the treaty domicile state). Treaty-domicile is decided by each state law, with a tie-breaker in cases of dual domicile.

This pattern is not followed by:

(1) Switzerland (which is also the only treaty made after the 1982 Model).

(2) Ireland

114.4 IHT DTAs: Taxes covered

Article 2 OECD IHT Model 1982 provides:

> 3 The existing taxes to which the Convention shall apply are:
> (a) (in State A) ....
> (b) (in State B) ....
>
> 4 The Convention shall apply also to any identical or substantially similar taxes which are imposed after the date of signature of the Convention in addition to, or in place of, the existing taxes. At the end of each year, the competent authorities of the Contracting States shall notify each other of changes which have been made in their respective taxation laws.

This is (more or less) the same as the OECD IT/CG Model.[5]

IHT DTAs made between 1975 and 1986, which refer to CTT, now apply for IHT.[6]

114.5 Treaty-domicile

IHT DTAs use the term "domicile" in a defined sense, which I call **"treaty-domicile"**.

Article 4 OECD IHT Model 1966 provides:

> 1. For the purposes of this Convention, the question whether a person

[4] For example, if the deceased had a treaty domicile within the previous 10 years (South Africa), or was a national of the other state (US), or both of these (Netherlands, Sweden).

[5] See 107.13 (Taxes Covered).

[6] See 74.1.1 ("CTT" now refers to IHT).

> at his death was domiciled in a Contracting State shall be determined according to the law of that State.

Article 4(1) of the CTT/IHT DTA treaties adopt this as a principle. They adopt a (more or less) standard form to define treaty domicile in the UK:[7]

> For the purposes of this Convention, a person was domiciled:
> (a) in the UK if
> [i] he was domiciled in the UK in accordance with the law of the UK or
> [ii] is[8] treated as so domiciled for the purposes of a tax which is the subject of the Convention;
> (b) in [the foreign treaty state] if ...

Para (a) applies to a person who is:
(1) UK-law domiciled or
(2) Deemed domiciled under the main deemed domicile rules (the 15-year rule, 3-year rule and formerly-domiciled residents)

Spouse-election deemed domicile does not apply for this purpose.[9]

The definition of treaty-domiciled in the foreign treaty state varies in each case to fit the foreign tax regime.

The 1966 Model follows with a tie-breaker in OECD Model form.

114.6 IHT DTAs: Incorporation in UK law

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by statute. Accordingly, s.158(1) IHTA provides:

> If Her Majesty by Order in Council declares—
> (a) that arrangements specified in the Order have been made with

[7]

Treaty	**For definition of treaty-domicile, see**
India/Pakistan/Italy/France DTAs	115.7 ff
Netherlands DTA	116.5
South Africa DTA	117.5
Switzerland DTA	118.5
USA DTA	119.5

[8] The provision twice uses the past tense ("was domiciled") which because it is looking back to the time of the death of the deceased. It seems strange that it here shifts to the present tense ("is treated"). Perhaps that is to match the use of the word "is" later in the sentence ("a tax which is the subject of the Convention") But it does not matter.

[9] See 115.8.2 (Spouse-election domicile disapplied).

> the government of any territory outside the UK with a view to affording relief from double taxation in relation to
> [i] capital transfer tax [now IHT][10] payable under the laws of the UK and
> [ii] any tax imposed under the laws of that territory which is of a similar character or is chargeable on or by reference to death or gifts inter vivos, and
>
> (b) that it is expedient that those arrangements should have effect,
>
> the arrangements shall, notwithstanding anything in this Act, have effect
> [i] so far as they provide for relief from capital transfer tax, or
> [ii] for determining the place where any property is to be treated as situated for the purposes of the tax.

Under s.158(1)(b)[ii], a DTA may *increase* the scope of IHT, by providing that property which is not UK situate on general principles is to be treated as UK situate.

For completeness: s.158 IHTA continues with some housekeeping rules:

> (1ZA) For the purposes of this section, arrangements made with a view to affording relief from double taxation include any arrangements which modify the effect of arrangements so made.
> (1ZB) Arrangements to which effect is given under this section may include provision conferring (with or without other functions) functions relating to the determination of matters arising under the arrangements on a public authority in the UK or in a territory outside the UK.
> (2) Any arrangements to which effect is given under this section may include provision for relief in cases occurring before the making of the arrangements and provisions as to property which is not itself subject to double taxation.
> (3) Any Order in Council under this section which revokes an earlier Order may contain such transitional provisions as appear to Her Majesty to be necessary or expedient.
> (4) An Order under this section shall not be submitted to Her Majesty in Council unless a draft of it has been laid before, and approved by resolution of, the House of Commons.
> (5) Where any arrangements have effect by virtue of this section, no obligation as to secrecy shall prevent the Board or an authorised officer of the Board from disclosing to any authorised officer of the government with which the arrangements are made such information as is required to be disclosed under the arrangements.

Section 158 is the IHT equivalent of s.2 TIOPA.[11]

[10] See 74.1.1 ("CTT" now refers to IHT). For Estate Duty treaties, see 115.2 (Estate duty DTAs applied to IHT).

[11] See 107.19 (Incorporation of DTAs in UK law).

114.7 Claims for IHT DTA reliefs

The position depends on what type of relief is in point:

(1) Claim for foreign IHT credit:
    (a) DTA IHT credit
    (b) Unilateral IHT credit
(2) Claim for IHT DTA exemption
(3) Claim for overpaid tax to be repaid

114.7.1 *UK domestic law*

There is no UK domestic law provision requiring a formal claim for unilateral IHT credit relief or for IHT DT relief (unlike the position for IT and CGT where a claim is required).

A formal claim is required to recover overpaid tax. Section 241(1) IHTA provides:

> If it is proved to the satisfaction of the Board that too much tax has been paid on the value transferred by a chargeable transfer or on so much of that value as is attributable to any property, the Board shall repay the excess unless the claim for repayment was made more than four years after the date on which the payment or last payment of the tax was made.

There is no requirement to make a formal claim for treaty IHT exemption. However if an IHT400 account is in principle required on a death,[12] the obligation to submit the account is not overridden by a treaty, even though it may provide that:

(1) duty "shall not be imposed"[13]
(2) property "shall not be taxable"[14] or "shall be taxable only" in the foreign state[15]
(3) "no account shall be taken in determining the amount or rate of duty of property situate outside [the UK]"[16]

Similarly, for an individual who is IHT deemed domiciled, the US treaty does not override the duty to disclose a lifetime chargeable transfer or the

[12] See 125.1 (Reporting on death).

[13] The wording of the India, France and Pakistan DTAs.

[14] The wording of the USA IHT DTA.

[15] The wording of the Netherlands and the Switzerland IHT DTAs.

[16] The wording of the Italy IHT DTA.

making of a non-resident settlement.[17]

So in these cases, the usual returns should be made, making it clear that DT exemption applies. The form IHT400 Calculation (12/19) has a section entitled Double taxation relief. The rubric at the top of this section provides:

> If you wish to claim double taxation or unilateral relief, enclose with form IHT400 a 'certificate of tax paid' from the overseas tax authority, if you already have one, showing the amount of foreign tax paid. We may ask more questions about the claim after the Grant is issued. You must also fill in schedule IHT417, 'Foreign assets' detailing the assets outside the UK.

The treaties alter the position slightly, as:

(1) They may assume that a claim is to be made for a credit and so by implication impose a formal claim requirement with a deadline for making the claim.

(2) They may alter the time limit for a claim to recover overpaid tax.

The Swiss IHT DTA does not refer to claims. In other cases, the wording varies between treaties.

114.7.2 *India and Pakistan*

Art 7 India & Pakistan DTAs	**Art 7 France & Italy DTAs**
1. Any claim for a credit or for a refund of duty founded on the provisions of the present Agreement shall be made within six years from the date of the death of the deceased person in respect of whose estate the claim is made,	1. Any claim for a credit or for a refund of duty founded on the provisions of the present Convention shall be made within five years from the date of the death of the deceased person in respect of whose estate the claim is made,
or, in the case of a reversionary interest where payment of duty is deferred until the date on which the interest falls into possession, within six years from that date. [note 1]	or, where the event causing duty to be payable occurs at some later date, within five years from that date.
2. Any such refund shall be made	2. Any such refund shall be made

[17] See 128.2 (IHT disclosure: creation of trust).

without payment of interest on the amount so refunded.	without payment of interest on the amount so refunded. [note 2]

Note 1: This refers to estate duty rules not now applicable.
Note 2: Italy DTA lacks para 2.

114.7.3 *USA and Netherlands*

Art 9(5) USA IHT DTA	**Art 14 Netherlands IHT DTA**
Any claim for a credit or for a refund of tax founded on the provisions of the present Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due.	Any claim for a credit or for a repayment of tax founded on the provisions of this Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due.
The competent authority may, in appropriate circumstances, extend this time where the final determination of the taxes which are the subject of the claim for credit is delayed.	[No equivalent]

114.8 Nil-rate band and DTAs

114.8.1 *General NRB*

If there would be a chargeable transfer, but for IHT DT relief, does a DTA (if applicable) make the transfer non-chargeable, so the nil-rate band, and (if appropriate) the unused transferable nil-rate band[18] is not used up by the transfer?

IHTM para 43025 provides:

[18] For the statutory provisions relating to the transferable general nil-rate band, see 86.5.2 (General nil-rate band). For present purposes, it is sufficient to note that the amount of the unused general nil-rate band depends on the amount of the chargeable transfer on the death of the first spouse to die. If there is no chargeable transfer, the full nil-rate band is unused and is transferable to the surviving spouse. See s. 8A(3)(4) IHTA.

> **interaction of ability to transfer unused nil rate band with double taxation agreements, double taxation relief and successive charges relief** [Sep 2018]
> The extent to which an estate is chargeable to tax may be governed by a double taxation Convention [IHTM27161], or a liability to tax may be reduced to nil by double taxation relief [IHTM27181] or successive charges relief [IHTM22041].
> [1] Where, under the terms of a double taxation Convention, an asset is not subject to tax, then if this means that the chargeable estate is below the nil rate band, the amount unused is available for transfer.
> [2] However, where there is a liability to tax that is reduced to nil by either
>
> [a] double taxation relief or
> [b] successive charges relief,
>
> the nil rate band remains fully used. We do not repay any 'excess' relief and 'excess' relief cannot be converted into unused nil rate band.

Unilateral IHT credit relief takes the form of a credit against IHT. It falls within [2]. Where that relief applies there is still a chargeable transfer so that transferable NRB relief does not become available. The same applies to foreign IHT credit relief under a DTA.

The India France and Pakistan IHT DTAs provide that "duty shall not be imposed" on certain property. The USA DTA provides that certain property "shall not be taxable" in the UK. These reliefs fall within [1]. It is not obvious that this prevents there being a chargeable transfer but it might be said to follow from a commonsense reading. Treaties are not to be construed technically. HMRC read the legislation in this way, so that the transferable nil-rate band is available to the surviving spouse.

The Italy IHT DTA provides that "no account shall be taken, in determining the amount or rate of duty" on death, in relation to certain property. It is considered that the effect is the same as the other estate duty/IHT DTAs.

114.8.2 *Residence NRB*

Does DTA relief reduce the value of the estate for the purposes of the residence nil-rate band?[19] In strictness the answer is no, but DTAs are not meant to be construed strictly.

[19] In short, there is a tapered reduction of the relief if the value of the person's estate immediately before death exceeds £2m; see 93.6 (Residence nil-rate band).

114.9 Deductions for DTA purposes

Minor differences in wording do not affect the meaning:

Art 5(1) Italy	**Art 10 Netherlands**	**Art 11(1) S. Africa**	**Art 8 USA DTA**
In determining the amount on which duty is to be computed, permitted deductions shall be allowed in accordance with the law in force in the territory in which the duty is imposed.	In determining the amount on which tax is to be computed deductions shall be allowed in accordance with the law of the State in which the tax is imposed.	In determining the amount on which tax is to be computed permitted deductions shall be allowed in accordance with the law in force in the territory in which the tax is imposed.	In determining the amount on which tax is to be computed, permitted deductions shall be allowed in accordance with the law in force in the Contracting State in which tax is imposed.

Equivalent or comparable wording is found in some other IHT treaties:

IHT DTA	**Article**	**Note**
Pakistan	5(3)	Text identical to Italy
Sweden	10	

This seems unnecessary. Perhaps there were estate duty or foreign law reasons for it? I would be grateful to any reader who could explain.

There is, or at least there was, a rule of Belgian tax law which disallowed a deduction for charges on Belgium property owned by a non-resident.[20] Maybe the provision was intended to undo discrimination of that kind? But the wording is not quite apt for that. Or possibly the point is to note for the avoidance of doubt that allocation of debt rules now in article 8 OECD IHT Model 1982 do not apply.

There is no equivalent in the India, France or Switzerland, DTA, but the omission does not seem to matter.

See too *Re Goetze, National Provincial Bank v Mond* [1953] Ch 96.

There is a similar rule in the OECD Model non-discrimination clause.[21]

[20] In *Eckelkamp* C-11/07 the rule was held to breach of EU free movement of capital.

[21] See 112.5 (Discrimination in tax deductions).

Cross references

Issues which the estate duty/IHT DTAs have in common with other treaties are discussed elsewhere:

Topic	**See para**
Introduction to IHT DTAs	114.1
Claims for IHT DTA reliefs	114.7
Nil rate band and DTAs	114.8
Credit for IHT paid in France/Italy	120.7
Deductions for DTA purposes	114.9

115.1 Estate duty/IHT treaties

This chapter considers the four IHT double tax treaties which were made in the estate duty era. I refer to these as the "**India/Pakistan/Italy/France IHT DTAs**" or together the "**estate duty/IHT DTAs**".

The India/Pakistan DTAs are important to those who are (in short) deemed UK domiciled, but actually domiciled in India/Pakistan.

The France/Italy DTAs are important to those who are:

(1) (a) deemed UK domiciled but not actually domiciled in the UK, and
(b) "domiciled" in Italy/France, under the law of those countries (roughly, tax-resident there) ; or

(2) (a) actually UK domiciled and
(b) "domiciled" in Italy/France, under the law of those countries (roughly, tax-resident there) and
(c) treaty-domiciled in Italy/France under the treaty tie-breaker

The 4 estate duty/IHT DTAs are similar but not identical. There are differences in wording which sometimes make no difference and sometimes do. This does make a coherent exposition more difficult. It is a pity that no standard model form was adopted, but there it is. It does make one appreciate the tremendous value of OECD IT/CG Model.

The treaties use Roman numbering, but for convenience I use normal (Arabic) numerals.

For some reason DTAs do not have short titles. The long titles are:

India DTA	*Pakistan DTA*	*France DTA*	*Italy DTA:*
Agreement between the Government of the United Kingdom and the Government of India	Agreement between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of Pakistan	Convention between the United Kingdom of Great Britain and Northern Ireland and France	Convention between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the Italian Republic
for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons	[same as India DTA]	for the avoidance of double taxation with respect to duties on the estates of deceased persons	[same as India DTA]
SI 1956/998	SI 1957/1522	SI 1963/1319	SI 1968/304

The UK/France IHT DTA is in English and French,;[1] likewise the UK/Italy DTA is in English and Italian. In each case, both languages equally authoritative.

115.2 Estate duty DTAs applied to IHT

India DTA art 1	*Pakistan DTA art 1*	*France DTA art 1*	*Italy DTA art 1*
(1) The duties which are the subject of the present Agreement are	(1) [same as India DTA]	(1) The present Convention shall apply:	(1) The duties which are the subject of the present Convention are
(a) In India, the estate duty imposed under the Estate Duty Act, 1953, and	(a) In the United Kingdom, the estate duty imposed in Great Britain, and	(a) in France, to the duty imposed on successions by death;	(a) in the United Kingdom of Great Britain and Northern Ireland : the estate duty imposed in Great Britain
(b) In the UK, the estate duty imposed in Great Britain.	(b) In Pakistan, the estate duty imposed in Pakistan by or under the law of the Central Government.	(b) in the United Kingdom of Great Britain and Northern Ireland, to the estate duty imposed in Great Britain.	(b) in Italy : the succession duty and the estate duty (imposta sull'asse ereditario globale) imposed in Italy.

115.2.1 *Application of treaties to IHT*

The treaties refer to UK estate duty, but they apply to IHT. Section 158(6) IHTA provides:

> Where arrangements with the government of any territory outside the UK are specified under any Order in Council which—
> (a) was made, or has effect as made, under
> [i] section 54 of the Finance (No 2) Act 1945 or
> [ii] section 2 of the Finance Act (Northern Ireland) 1946, and
> (b) had effect immediately before the passing of this Act,
> [a] the Order shall, notwithstanding the repeal of that section by the

[1] The French title is: La convention entre la France et la Grande-Bretagne tendant à éviter les doubles impositions en matière d'impôts sur les successions du 21 juin 1963. *https://www.impots.gouv.fr/sites/default/files/media/10_conventions/royaume-uni/royaume-uni_convention-avec-le-royaume-uni-successions_fd_1790.pdf*

Finance Act 1975 remain in force and have effect as if any provision made by those arrangements in relation to estate duty extended to capital transfer tax [now IHT[2]] chargeable by virtue of section 4 above;

[b] but the Order may be amended or revoked by an Order in Council made under this section.

115.2.2 *Substantially similar taxes*

Pakistan DTA art 1	*France DTA art 1*	*Italy DTA art 1*
(2) The present Agreement shall also apply to any other duties of a substantially similar character imposed by either Contracting Government subsequently to the date of signature of the present Agreement or by the Government of any territory to which the present Agreement is extended under Article IX or applies under Article X.	(2) The present Convention shall also apply to any other duties of a substantially similar character to the duties referred to in para (1) above which may be imposed in Great Britain or Italy subsequently to the date of signature of the present Convention.	(2) The present Convention shall also apply to any other duties of a similar character imposed in France or Great Britain after the date of its signature or in any territory to which it may be extended under Article IX or applies under Article X.

But section 158(6)[a] is still needed in all four cases, as:

(1) CTT was probably not "of a substantially similar character" to estate duty (though IHT is substantially similar).

(2) In any case, DTAs need to be expressly incorporated into UK domestic law.[3]

The wording is similar to the OECD model.[4]

There is no equivalent provision in the India IHT DTA, but it makes no difference.

115.2.3 *Application to Northern Ireland*

India DTA art 10	*Pakistan DTA art 10*	*France DTA art 10*	*Italy DTA art 1*0
The present Agreement shall	The present Agreement shall	The present Convention shall	The present Convention shall

[3] See 107.19 (Incorporation of DTAs in UK law); 114.6 (IHT DTAs: Incorporation in UK law).

[4] See 114.4 (IHT DTAs: Taxes covered).

apply in relation to the estate duty imposed in Northern Ireland as it applies in relation to the estate duty imposed in Great Britain, but shall be separately terminable in respect of Northern Ireland by the same procedure as is laid down in Article XII.	apply in relation to the estate duty imposed in Northern Ireland as it applies in relation to the estate duty imposed in Great Britain, but shall be separately terminable in respect of Northern Ireland by the same procedure as is laid down in paragraph (2) of Article XII.	apply in relation to the estate duty imposed in Northern Ireland as it applies in relation to the estate duty imposed in Great Britain, but shall be separately terminable in respect of Northern Ireland in accordance with the provisions of Article XII.	apply in relation to Northern Ireland and to the estate duty imposed in Northern Ireland as it applies in relation to Great Britain and to the estate duty imposed in Great Britain, but shall be separately terminable in respect of Northern Ireland in accordance with the provisions of Article XII.

The DTAs refer to estate duty imposed in Great Britain, but also apply to estate duty (and now IHT) in Northern Ireland. This was because Northern Ireland was from 1921 a separate unit for estate duty purposes.

115.3 Interpretation

Art 2(1) of each of Estate Duty/IHT treaty sets out standard definitions of the countries concerned, territory, duty, and the standard provision dealing with undefined terms. I set these out for completeness (readers can generally skip what follows):

115.3.1 *United Kingdom/Great Britain*

All 4 estate duty treaties provide in art 2(1):

> The term "United Kingdom" means Great Britain and Northern Ireland;

That is the usual meaning. "Great Britain" is in turn defined:

India/Pakistan/France DTAs	**Italy DTA art 2(1)(b)**
The term "Great Britain" means England, Wales and Scotland and does not include the Channel Islands and the Isle of Man;	The term "Great Britain" means England, Wales and Scotland

That is the usual meaning.

115.3.2 *India/Pakistan/France/Italy*

India DTA art 2(1)	*Pakistan DTA art 2(1)*	*France DTA art 2(1)*	*Italy DTA art 2(1)*
(a) The term "India" means all the States and territories comprised in the Union of India;	(b) The term "Pakistan" means the Provinces of Pakistan and the Capital of the Federation;	(a) the term "France" means metropolitan France and the overseas *départements*;	(c) the term "Italy" means the Italian Republic;

"Metropolitan France" is the portion of France in continental Europe. The overseas departments and regions of France are now French Guiana, Guadeloupe, Martinique, Mayotte and Réunion, which have the same status are the regions and departments of mainland France.

115.3.3 *Territory*

India DTA art 2(1)	*Pakistan DTA art 2(1)*	*France DTA art 2(1)*	*Italy DTA art 2(1)*
(d) The term "territory" when used in relation to one or the other Contracting Government means India or Great Britain, as the context requires;	(d) The term "territory" when used in relation to one or the other Contracting Government means Great Britain or Pakistan, as the context requires;	(d) the term "territory" when used in relation to one or the other Contracting Party, means France or Great Britain, as the context requires;	(d) the term "territory" when used in relation to one or the other Contracting Party, means Great Britain or Italy, as the context requires;

115.3.4 *Duty*

There is then a straightforward definition of "duty":

India DTA art 2(1)	*Pakistan DTA art 2(1)*	*France DTA art 2(1)*	*Italy DTA art 2*(1)
(e) The term "duty" means the estate duty imposed in India or the estate duty imposed in Great Britain, as the context requires	(e) The term "duty" means the estate duty imposed in Great Britain or the estate duty imposed in Pakistan by the Central Government, as the context requires.	(e) the term "duty" means, as the context requires, the duty imposed in France on successions by death, or the estate duty imposed in Great Britain.	(e) the term "duty" means the estate duty imposed in Great Britain or the succession duty and estate duty imposed in Italy, as the context requires.

115.3.5 *Undefined treaty terms*

India DTA art 2(3)	*Pakistan DTA art 2(3)*	*France DTA art 2(2)*	*Italy DTA art 2*(3)
In the application of the provisions of the present Agreement by either Contracting Government, any term not otherwise defined shall, unless the context otherwise requires, have the meaning which it has under the law of that Contracting Government relating to duty.	In the application of the provisions of the present Agreement by either Contracting Government any term not otherwise defined shall, unless the context otherwise requires, have the meaning which it has under the law of that Contracting Government relating to the duties which are the subject of the present Agreement.	In the application of the provisions of the present Convention by either Contracting Party any term not otherwise defined shall, unless the context otherwise requires, have the meaning which it has under the law of that Party relating to the duties which are the subject of the present Convention.	In the application of the provisions of the present Convention by either Contracting Party any term not otherwise defined shall, unless the context otherwise requires, have the meaning which it has under the law in force in the territory of that Party relating to the duties which are the subject of the Convention.

This is (more or less) standard OECD Model wording: see 107.12 (Undefined treaty terms).

115.4 Treaty IHT exemption

Each IHT DTA provides an IHT exemption (“**treaty IHT exemption**”.) I set out the exemptions separately, as the variations in wording are too great to set out the provisions side by side. The differences here are important.

115.4.1 *India DTA exemption*

Art 3(3) India IHT DTA provides:

> [a] Duty shall not be imposed in Great Britain on the death of a person who
>
> [i] was not domiciled at the time of his death in any part of Great Britain but
>
> [ii] was domiciled in some part of India
>
> on any property situated outside Great Britain:
>
> [b] Provided that nothing in this paragraph shall prevent the imposition of duty in Great Britain on any property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

115.4.2 *France IHT exemption*

Art 5(1) France IHT DTA	**Art 5(2) France IHT DTA**
Where a person was at the time of his death domiciled in some part of France duty shall not be imposed in Great Britain on any property which [a] neither is situated in Great Britain, [b] nor passes under a disposition or devolution regulated by the law of some part of Great Britain	Where a person was at the time of his death domiciled in some part of Great Britain duty shall not be imposed in France on any property not situated in France;
and, in determining the amount or rate of duty payable in Great Britain, such property shall be disregarded.	and in determining the amount or rate of duty payable on any property which is chargeable in France, any property not situated in France shall be disregarded.

115.4.3 *Italy IHT exemption*

Art 5(2) Italy IHT DTA provides:

> [a] Where duty is imposed in the territory of one Contracting Party on the death of a person who at the time of his death
> [i] was not domiciled in any part of that territory but
> [ii] was domiciled in some part of the territory of the other Contracting Party,
> no account shall be taken, in determining the amount or rate of such duty, of property situated outside the former territory,
> [b] provided that this paragraph shall not apply to duty imposed in the territory of a Contracting Party on property passing under a settlement governed by its law.

115.4.4 *Pakistan IHT exemption*

The Pakistan IHT DTA contains an amusing error. Art 5(2) Pakistan IHT DTA provides:

> Where a person at the time of his death was domiciled in some part of Pakistan and was not domiciled in some part of Great Britain, duty shall not be imposed in Great Britain on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—

> (a) is situated in Pakistan [!], or
> (b) passes under a disposition or devolution regulated by the law of some part of Great Britain;
>
> and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded.

There is an unfortunate typographical error here: the word "Pakistan" in (a) should read "Great Britain"![5] It is considered that the error can be corrected as a matter of construction under the slip rule. HMRC rightly adopt this view.[6]

115.4.5 *Scope of exemptions*

The exemption applies to duty imposed on death.[7] That includes the charge which applies to the following property (assuming the property is not UK situate):

(1) the individual's free estate
(2) property in an estate IIP trust

Property within the GWR charge on death ("GWR property") is treated as property to which the donor was beneficially entitled immediately before the death.[8] GWR property does not in fact "pass" on death, but it should

[5] I am grateful to Simon McKie for drawing this point to my attention. The corresponding mistake is made in Art 5(1):

> "Where a person at the time of his death was domiciled in some part of Great Britain and was not domiciled in some part of Pakistan, duty shall not be imposed in Pakistan on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—
> (a) is situated in Great Britain [!], or
> (b) is settled property of which the deceased was life tenant where the settlor was domiciled in some part of Pakistan at the time that the settlement took effect, or
> (c) passes under a devolution regulated by the law of some part of Pakistan and in determining the amount or rate of duty payable in Pakistan, property falling within (a), (b), or (c) shall be disregarded.
>
> and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded."

In some published versions the error has been corrected, but I am not aware of any authority for that. The original is at:
https://www.kessler.co.uk/wp-content/uploads/2012/05/Pakistan_IHT_DTT.pdf

[6] HMRC correspondence.

[7] This is stated expressly in the India, Pakistan and Italy IHT DTAs. In the France IHT DTA it is not stated expressly but is clearly implied.

[8] See 78.12 (GWR death charge).

be treated as if it did. GWR property does not in fact pass "under a disposition or devolution" but it should probably be treated as if it did. It is the old question of how far to carry the deeming.[9] But even then, the (deemed) disposition would not be not "regulated by the law of some part of Great Britain".

So under the India IHT DTA, it is considered that GWR property which is not situate in the UK may qualify for exemption, and is not within the proviso which applies to property which "passes under a disposition or devolution regulated by the law of some part of Great Britain." The same applies to Pakistan and France.

The position is the same in Italy, but clearer, as no-one could say that GWR property is caught by the proviso which applies to "property passing under a settlement governed by UK law".

115.4.6 *Failed PET*

What about the charge on a lifetime PET which becomes a chargeable transfer because the transferor dies within 7 years, known as a "**failed PET**"? The treaties must be considered separately, since the wording of each treaty IHT exemption varies.

India and Italy IHT DTAs provide exemption from duty *on the death*. In the case of a failed PET, the IHT charge is on the lifetime transfer of value. Strictly, the charge is not "on the death", even though it is only on the occasion of death that the transfer becomes chargeable. However a purposive construction is appropriate. The relief would have applied to the estate duty charge on lifetime gifts within 7 years of death. In substance the charge on failed PETs is a charge on death. This is a strong argument, for treaties are not interpreted strictly or literally. A relief for a charge "on" the death means a relief for a charge which becomes payable *at the time of* the death.[10]

In France, the IHT exemption does seem to apply to a failed PET since the words "on the death" are not present.

In Pakistan the case for IHT exemption seems somewhat weaker since it is a very loose construction to say that the charge on a failed PET is a

[9] See App 8.2 (Deeming provisions: Construction).

[10] Further support can be found from the area of transferable nil-rate bands. This relief increase the nil-rate band "for the purposes of the charge to tax *on the death* of the survivor"; see s.8A(3) IHTA. HMRC accept that this relief applies to the charge on a failed PET.

charge on property which "passes or is deemed to pass" on a death (the terminology is from estate duty legislation where it had a somewhat technical meaning). Nevertheless the purposive argument is still arguable.

However there is a serious difficulty. Section 158(6) IHTA provides that the estate duty/IHT DTAs:

> have effect as if any provision made by those arrangements in relation to estate duty extended to capital transfer tax chargeable by virtue of section 4 above ...

The treaties have effect in relation to IHT *chargeable by virtue of s.4 IHTA*. The IHT charge on a failed PET is not under s.4, so the treaty does not have effect in relation to that charge.[11] It is considered, therefore, that although the terms of the treaties of France (relatively clearly), India and Italy (reasonably clearly) and Pakistan (arguably) do provide relief for a failed PET, this does not help the taxpayer, because UK domestic law (in breach of the treaty obligations) does not do so.

Michael Firth argued against this view in an article I considered at length in the 2022/23 edition of the work.[12] I omit that here as I do not think the argument has gained much traction.

HMRC take the view that treaty relief does not apply to a failed PET. This can be inferred from a passage in the IHT Manual:

> **IHTM13024 Deemed Domicile** [Jan 2020]
> ... domicile does not include deemed domicile...when considering the double taxation agreements (IHTM27161) with France, Italy, India or Pakistan (though where there is a common law domicile in France, Italy, India or Pakistan, IHTA84/S267 can apply to chargeable lifetime transfers).

I agree: there is no treaty relief for a failed PET. This is odd, perhaps absurd. But the treaties give rise to many other anomalies. There is no relief on ten-year charges on trusts. There is no relief on a lifetime chargeable transfer which is not a PET, such as a lifetime gift to a trust.[13] That applies, I think, to the tax immediately payable, and the additional IHT payable within 3 years of death. The absence of treaty relief for a failed PET is consistent with that.

[11] For s.4 IHTA, see 76.4 (Death: IHT charge & exemption).

[12] Firth, "Failed PETs and Living Happily Ever After" [2016] PCB 1.

[13] It appears from an incoherent passage in IHTM para 13024 that HMRC agree.

115.4.7 *Planning*

This raises tricky choices for a person who qualifies for treaty IHT exemption. One approach is for an elderly individual *not* to make any gifts, to retain property until death. The lifetime gift may be taxable and the death estate tax free. But the risk of that approach is that by the time of the death:

(1) The treaty may have been repealed.[14]
(2) An inheritance tax in the foreign state may be re-imposed.

The lifetime gift may be better—if the donor survives seven, or at least three years.

Sometimes one spouse is and the other is not within the scope of the treaty. In that case inter-spouse gifts (or will trusts conferring an IIP on the spouse) will bring the property within the scope of treaty relief.

115.5 Reliefs extended: France

Art 5(3) France IHT DTA provides:

> Where a Contracting Party imposes duty on the death of a person who at the time of his death was domiciled in the territory of the other Contracting Party, the former Party shall allow any exemption, allowance or relief, or any remission or reduction of duty (other than in respect of duty imposed by the other Party or by any other country) which would have been applicable under its law if the deceased had been domiciled in its territory.

This is easier to follow if one specifies which State is which:

> Where [the UK] imposes duty on the death of a person who at the time of his death was domiciled in the territory of [France], [the UK] shall allow any exemption, allowance or relief, or any remission or reduction of duty (other than in respect of duty imposed by [France] or by any other country) which would have been applicable under its law if the deceased had been domiciled in [the UK].

I am unable to think of a case where this would apply in the UK, because there are no IHT reliefs which apply only if the deceased is UK domiciled. Perhaps the provision is aimed at French tax issues. That may explain why there is no equivalent in the other estate duty/IHT DTAs.

[14] See 115.12 (The future).

115.6 Proper-Law rule

Treaty IHT exemption in India, Pakistan and France does not apply to property which passes under a disposition or devolution regulated by the law of some part of Great Britain.[15] I refer to that as the "Proper-Law rule".

This rule follows estate duty principles. Section 28(2) FA 1949 provided estate duty did not apply if (among other conditions):

> ... the proper law regulating the devolution of the property so situate, or the disposition under or by reason of which it passes, is the law neither of England nor of Scotland

The Proper-Law rule is not appropriate for IHT, but logic is not to be expected when estate duty treaties are left unamended to apply to IHT.

As the drafting of the estate duty/IHT treaties is based on s.28(2) FA 1949, cases on that provision are relevant here.[16] The DTAs refer to "law" rather than "proper law" but that makes no difference: the word "proper" does not add anything.[17]

Italy is different. The restriction is that the exemption does not apply to property passing under a *settlement* governed by a UK law (so treaty exemption could apply in Italy to property passing under a UK law will).[18] I would be grateful for any reader who could suggest why this is the case.

Proper law is a complex topic.[19] The difficulty is that different laws may regulate different aspects of a disposition/devolution.

The starting point is *Philipson-Stow v IRC.*[20] This was a case on s.28(2) FA 1949, but the same principles will apply for the estate duty/IHT treaties, as the drafting is based on that section.

In *Philipson -Stow* a testator domiciled in England left a will governed

[15] See 115.4.1 (India DTA exemption); 115.4.2 (France IHT exemption); 115.4.4 (Pakistan IHT exemption).

[16] Similar rules also applied prior to 1949, so pre-1949 case law may also be relevant, though *Philipson-Stow* noted that the pre-1949 law may not have been identical.

[17] *Philipson-Stow v IRC* [1961] AC 727 at p.741: "I find myself unable to give any effective meaning to 'proper'." But it seems to me that "proper law" simply means, "applicable law".

[18] See 115.4.3 (Italy IHT exemption).

[19] For further discussion, see the scholarly Dymond's Death Duties, (15th ed., 1973), pp 1286–1312. See too 77.7.3 (Légitime and trust proper law).

[20] [1961] AC 727.

by English law. The estate included land[21] in South Africa. The proper law regulating the disposition of the land was the law of South Africa (not UK):

(1) on the death of the testator in 1908,[22] and

(2) on the subsequent death of the life tenant in 1954. The trust had retained the land; the position would have been different if the land had been sold before the death.) The domicile of the life tenant was irrelevant.

The following points were decided in *Philipson-Stow*:[23]

"Devolution" means devolution by operation of law, such as heirship, intestacy or survivorship. "Disposition" means a disposition by instrument, such as a will.[24] Devolution and disposition are mutually exclusive, and are exhaustive of the ways in which property can pass on death. So property passes on the death of a life tenant by a disposition (the testator's will) and not by devolution. (I am not sure this makes any difference, but it is good to know what we are talking about. In what follows I use the word "disposition" to include devolution.)

The "disposition" is not the will or settlement: it is the particular devise or bequest.

"Regulating" means the same as "governing" or "determining".

The disposition in *Philipson-Stow* was governed by South African law: "whether the question is one of capacity or formality or validity, it is South African law which governs the disposition, and it is in the courts of South Africa that the ultimate sanction for its enforcement lies". The validity of the will trust is itself a matter for South African law.[25] It is irrelevant that there is no conflict between the laws of England and South Africa: If there were a conflict, South African law would prevail.

Different dispositions in the same instrument may be governed by

[21] For completeness, the asset was a share in land, rather than land, but that made no difference.

[22] The testator was the diamond magnate Frederic Philipson-Stow. The issue in the case concerned tax on the death of the life tenant, not on the death of the testator, but it was said at p.742 that South African law governed the disposition of the South African land on death. This was common ground: p.749.

[23] The propositions are found in p.742-743 except where otherwise noted.

[24] at p.759. Disposition must also include a trust made orally, though in practice that may not arise.

[25] at p.745.

different laws. For instance:

(1) On the death of the testator, South African law applied to the disposition of his South African property, and English law to the disposition of his English property.

(2) On the death of the life tenant, South African law applied to the disposition of South African trust property, and English law to the disposition of English trust property.

The proper law may change with a change in the subject-matter. If the land in South Africa had been sold before the death of the life tenant, and not reinvested in other land, the disposition on the death of the life tenant would have been governed by English law.

A trust for sale made no difference, as it did not convert immovable property into movable property.[26]

115.6.1 *Choice of foreign law*

The position depends on whether the property concerned is immovable or movable.

For immovable property, the proper law is that where the land is situate, and no choice can be made (except by choosing where to buy land).

For movable property, a settlor can select the law which regulates dispositions under a lifetime trust.

A testator can also select the law which governs a will trust (as opposed to their estate). That is the law which regulates the dispositions made by the will trust, as the disposition is the provision of the will.

As a matter of English succession law, a testator cannot select the law which regulates the administration of their estate. The law which regulates the administration of movables in the estate must be the law of his domicile.[27] But it is common for a testator domiciled in one country to execute a will governed by the law of another. Suppose:

(1) A testator is UK domiciled (under UK law) but treaty-domiciled in France/Italy under the tie-breaker.

(2) The testator leaves a will governed by the law of another country, say, Jersey.

[26] I doubt if the question will now arise, but for completeness: In England the rule that a trust for sale converted real property into personal property was abolished by s.3 TOLATA 1996.

[27] See *Philipson-Stow* at p.748. Likewise Lord Denning at p.760-761. I expect the same rule applies in Scotland.

The proper law of the disposition should be that of Jersey. If the law of the domicile was dispositive, then the tie-breaker does not work.[28] This view also avoids an anomalous distinction between a lifetime trust and a will trust.

If treaty relief is lost, because English law governs a disposition, the problem might sometimes be solved by an IoV,[29] though the drafting would require some care.

115.6.2 *EU Succession Regulation*

EU regulation 650/2012 ("the Succession Regulation") applies to all EU states except Ireland and Denmark ("Succession Regulation states"). Art 22(1) Succession Regulation provides:

> A person may choose as the law to govern his succession as a whole the law of the State whose nationality he possesses at the time of making the choice or at the time of death.

Regulation 23(1) provides:

> The law determined pursuant to Article 21 or Article 22 shall govern the succession as a whole.

It does not matter that law chosen is not the law of a member state.[30] In short, a UK national may elect for UK law to apply to the succession as a whole. The election is effective in Succession Regulation states.

Suppose a UK national makes an election for UK law to apply to the succession. The position depends on whether the property concerned is:

(1) immovable and:
    (a) situate in a Succession Regulation state
    (b) situate elsewhere; or
(2) movable

For immovable property situate in a state other than a Succession Regulation state, the election makes no difference.

For immovable property situate in a Succession Regulation state, the

[28] Parkinson describes this as the view of most commentators: see his article, "A disposition or devolution regulated by the law of some part of Great Britain: the Proviso to the Limitation of Taxing Rights in the IHT Treaties with France, India and Pakistan" [2011] PCB 126.

[29] See 77.6 (Instrument of variation).

[30] Article 20

election does make a difference. The consequence is that the disposition of the immovable which (in the absence of an election) would be governed by the law of those states is instead governed by UK law. So treaty relief is not available for property in a Succession law state, under the India/Pakistan/France IHT DTAs.[31]

What if the testator makes an election for UK law to govern his estate, but leaves a will governed by another country? The election operates over French/Italian assets, which are governed by the law of the UK. But the election is not effective in the UK, so apart from that, the principles set out above continue to apply.

115.7 Domicile: applicable law

India DTA art 2(2)	*Pakistan DTA art 2(2)*	*France, art 2(3)(a)*	*Italy DTA art 2(2)(a)*
For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments shall be determined in accordance with the law in force in that territory.	For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of Great Britain or in any part of Pakistan shall be determined in accordance with the law in force in Great Britain and Pakistan respectively.	For the purposes of the present Convention, the question whether a deceased person was domiciled at the time of his death in any part of the territory of one of the Contracting Parties shall be determined in accordance with the law in force in that territory.	For the purposes of the present Convention, the question whether a deceased person was domiciled at the time of his death in any part of the territory of one of the Contracting Parties shall be determined in accordance with the law in force in that territory.

The wording varies but the meaning is the same:

(1) The question of whether a person is domiciled in the UK is determined according to UK legal principles.

[31] This was anticipated in *Philipson-Stow* [1961] AC 727 at p.741:

> "there may be ... cases where the law of a country, though it regards certain property as an immovable, may yet in certain circumstances regulate its devolution, etc., by reference to another law."

There is a contrary argument. Suppose (say) a UK national elects for English law which governs the succession of their land in France. It may be said that the disposition of the French land is governed by French law, because it is French law which determines that English law applies. In other words, English law is incorporated in and part of French law. But I think the better approach is to look at the substance, and the substance is that English law applies.

(2) The question whether a person is domiciled in the foreign state is determined according to the legal principles of that state.

This provision is needed in the UK for point (2) because (on general treaty interpretation principles[32]), in the application of the DTA in the UK, the term domicile would otherwise be given its UK law meaning.

115.8 UK-law domicile

UK-law domicile matters:

(1) For the India/Pakistan IHT DTAs where a requirement for IHT exemption in is that the individual must not be domiciled in the UK (according to UK law)
(2) For the France/Italy DTAs where the tie-breaker is only needed if the individual is domiciled in the UK (according to UK law)

115.8.1 *Deemed domicile disapplied*

Section 267(2) IHTA provides:

> Subsection (1) above ... shall not affect the interpretation of any such provision as is mentioned in section 158(6) above.

"Such provision as is mentioned in s.158(6)" means:

(1) the statutory provisions referred to [s.54 F (No 2) A 1945 and s. 2 FA (Northern Ireland) 1946] and
(2) The DTAs made pursuant to those provisions, ie the estate duty/IHT DTAs

Section 267(1) contains the main deemed domicile rules: the 15-year rule, 3-year rule and formerly-domiciled resident rule.[33] These rules are all disapplied by s.267(2).

The reason for disapplying deemed domicile is that estate duty had no equivalent of the CTT/IHT deemed domicile rules. The subsequent application of a deemed domicile rule to the estate duty/IHT DTAs would have raised a number of difficulties.[34] The obvious solution was to keep

[32] See 115.3.5 (Undefined treaty terms).

[33] See 5.2 (Deemed domicile: Outline).

[34] It is an interesting question whether it would have been a breach of the treaties. Even if not a technical breach, the treaty countries could reasonably have objected. IHT deemed domiciled individuals would have suffered double taxation.
An alternative would have been to renegotiate existing treaties (introducing new rules

the treaties free from the deemed domicile rules.

115.8.2 *Spouse-election domicile disapplied*

For spouse-election domicile,[35] s.267ZA(6) IHTA provides:

> An election under this section is to be ignored—
> (a) in interpreting any such provision as is mentioned in section 158(6)

Section 267ZA(6)(a) disapplies spouse-election domicile for IHT DTAs. The wording is based on s.267(2).

Section 267ZA(6)(b) provides:

> An election under this section is to be ignored...
> (b) in determining the effect of any qualifying double taxation relief arrangements in relation to a transfer of value by the person making the election.

"Qualifying" DTA is defined in s.267ZA(7) IHTA:

> For the purposes of subsection (6)(b) a qualifying double taxation relief arrangement is an arrangement which is specified in an Order in Council made under section 158 before the coming into force of this section [17 July 2013] (other than by way of amendment by an Order made on or after the coming into force of this section).

This disapplies spouse-election domicile for all of the UK's IHT DTAs, because they were all made before 2013.

115.9 Foreign-law domicile

The requirement for IHT exemption in each estate duty/IHT DTA is that the individual must be domiciled in the foreign state according to the law of that state. Since that law is not the same as UK law, I refer to **"India-law domicile"**, etc.

115.9.1 *India-law domicile*

The question whether an individual is domiciled in India is governed by the law of India.

The law of domicile in India is governed by the [India] Succession Act

at least for treaties which lacked a tie-breaker) but presumably that was thought to be impractical or too much trouble.

[35] See 5.14 (Spouse-election domicile).

1925.[36] That Act sets out statutory rules mostly based on the common law rules, and *Saini v State of Uttarakhand*[37] referred to Halsbury's Laws of England, so it seems that Indian domicile law has not moved from its common law origin. India still applies the common law rule (abolished in the UK in 1973) that a married woman has the domicile of her husband as a domicile of dependency.

There appear to be differences of view as to whether:

(1) India is a unitary state for domicile purposes, so a person is domiciled in India, not in any part of India; or

(2) India (like the UK) is a federal state for domicile purposes, so a person is strictly domiciled in one of the states which make up the Republic of India (and a reference to domicile in India strictly means domicile in any one of those states).

Perhaps one sometimes applies one rule and sometimes the other, depending on context.[38] In the context of the India IHT DTA, this issue will not often arise.

Section 11 [India] Succession Act 1925 contains one provision which is not in English law:

> Any person may acquire a domicile in India by making and depositing in some office in India, appointed in this behalf by the State Government, a declaration in writing under his hand of his desire to acquire such domicile; provided that he has been resident in India for one year immediately preceding the time of his making such declaration.[39]

[36] See Agrawal, Private International Law in India (1st ed., 2010) p.67; *Dr. Pradeep Jain v Union of India* AIR 1984 SC 1420; *Kedar Pandey v Narain Bikram Shah* 1966 AIR 160, 1965 SCR (3) 793.
The Succession Act is at *http://www.liiofindia.org/in/legis/cen/num_act/isa1925183/*
The part of the Act dealing with domicile does not apply if the deceased was a Hindu, Muslim, Buddhist, Sikh or Jaina, but I understand that the Act has been taken as stating the general law of domicile.

[37] AIR 2010 Utr 36 *https://indiankanoon.org/doc/42616100*

[38] See Noronha, *Private International Law in India* (2nd ed, 2013) chap 6 (Domicile). Article 3 India IHT DTA refers to a person being domiciled "in some part of India" so the drafter regarded India as a federal state for domicile purposes, at the time of the DTA (1956).

[39] This is derived from a UK statute: s.2 Domicile Act 1861. This anticipated conventions with foreign states under which such rules could be mutually agreed. But no conventions were ever concluded, so the 1861 Act was a dead letter and finally

But it has been said that this is dead letter law, as no offices are currently designated.[40]

115.9.2 *Pakistan-law domicile*

The question whether an individual is domiciled in Pakistan is governed by the law of Pakistan.

Dymond's Death Duties (15th ed., 1973) states at p. 1388:

> The Indian (and Pakistan) law (contained in the [India] Succession Act 1925) is basically similar to British law but somewhat less stringent in its requirements, ie. the conception of 'domicile' is a little nearer to that of 'residence'.

I would be grateful to any reader who could supply further information about Pakistani law of domicile.

115.9.3 *"Domicile" in France/Italy*

The question whether an individual is domiciled in France/Italy is governed by the law of France/Italy. The terms used for domiciled/ domicile in the French version of the treaty are *domiciliée* and *domicile*. But I suspect the meaning of the French term is not "domicile" as common lawyers understand it, but rather, is similar to habitual residence; and, I suspect, likewise in Italy[41] It is helpful to write "domicile" with scare quotation marks when used in the French/Italian law sense.

repealed in 1971.

[40] Mehta, "A tale of two domiciles" GITC Review Vol 15 (2019) *http://taxbar.com/wp-content/uploads/2018/03/NM_A-Tale-of-Two-Domiciles_GITCReview_XV_1.pdf*
If that is right, s.11 [India] Succession Act 1925 ought to be repealed in India, just as the UK 1861 Act has been repealed in the UK.

[41] Article 102 [French] Code Civil provides: "Le domicile de tout Francais est au lieu où il a son principal établissement" (The "domicile" of a French person is where he has his main establishment).
Article 43 [Italian] Codice Civile is headed: "Domicilio e residenza". It distinguishes the two terms:

> "Il domicilio di una persona è nel luogo in cui essa ha stabilito la sede principale dei suoi affari e interessi" (The "domicile" of a person is the place where he has established the main centre of his affairs and interests")
> "La residenza è nel luogo in cui la persona ha la dimora abituale" (Residence is in the place where the person has his habitual abode).

I would be grateful to any reader who could give references to further discussion.

It is therefore possible for an individual to be:

(1) "domiciled" in France/Italy (under French/Italian principles) and
(2) (a) deemed domiciled in the UK (but not actually UK domiciled) or
    (b) actually domiciled in the UK

In case (2)(a) the individual is treaty-domiciled in France/Italy, as deemed domicile does not count for the purposes of the DTAs. It is not necessary to rely on the tie-breaker.

The France/Italy DTAs have a tie-breaker for domicile in case (2)(b). (A tie-breaker is not needed for the India/Pakistan DTAs, where it is assumed that an individual could not be (or at least, in practice, would not be) actually domiciled in both countries[42]. The France/Italy tie-breaker is as follows:

Art 2(3)(b) France DTA

> Where by reason of the provisions of the preceding sub-paragraph [*Note 1*] a deceased person is deemed to be domiciled in the territory of each of the Contracting Parties, then this case shall be solved in accordance with the following rules:—

Art 2(2)(b) Italy DTA

> Where by reason of the provisions of the preceding paragraph [*Note 1*] a deceased person is deemed to be domiciled in the territory of each of the Contracting Parties, then this case shall be solved in accordance with the following rules:—

Note 1: For the "preceding paragraph" see 115.7 (Domicile: applicable law).

After that, the France/Italy tie-breakers continue in identical terms:

> (i) he shall be deemed to be domiciled in the territory of the Contracting Party in which he had a permanent home available to him at the time of his death; if he had a permanent home available to him in the territory of each of the Contracting Parties he shall be deemed to be domiciled in the territory of the Contracting Party with which his personal and economic relations were closest (centre of vital interests);

It is not often necessary to look beyond this point but, for completeness, the France/Italy DTAs continue, again in identical terms:

[42] One could imagine circumstances where a person is domiciled in (say) India for the purposes of Indian law, and domiciled in the UK for the purposes of UK law. An example is a woman domiciled in the UK (under UK law) married to a husband domiciled in India (who has a domicile of dependency under the law of India). As there is no tie-breaker, such a person would not qualify for treaty exemption under the India/UK treaty.

(ii) if the Contracting Party in whose territory he had his centre of vital interests cannot be determined, or if he had not a permanent home available to him in the territory of either Contracting Party, he shall be deemed to be domiciled in the territory of the Contracting Party in which he had an habitual abode;

(iii) if he had an habitual abode in the territory of each of the Contracting Parties, or in the territory of neither, he shall be deemed to be domiciled in that of which he was a national;

(iv) if he was a national of both territories or of neither of them, the taxation authorities of the Contracting Parties shall determine the question by mutual agreement.

The tie-breaker wording follows the tie-breaker in the definition of residence in the OECD income tax/CGT Model Convention, with immaterial differences. Reference should be made to the OECD Commentary.[43]

Exemption under the Italy IHT DTA requires that the person:

[i] was not domiciled in any part of that territory but

[ii] was domiciled in some part of the territory of the other Contracting Party,

Because of the tie-breaker, the words at [i] seem to be otiose. If Italy wins under the tie-breaker, the individual must be regarded as not UK domiciled. So the requirement at [i] to be non-UK domiciled seem to add nothing. (The answer cannot be that domicile here means domicile under UK/Italian law, not domicile under the tie-breaker, because then the tie-breaker would never apply.)

IHT exemption in the France IHT DTA (which also has a domicile tie-breaker) does not include the requirement that the individual is not domiciled in the UK. Since the Italy IHT DTA (1968) came after the France IHT DTA (1963) it is strange that the Italian wording did not copy the French precedent. But there it is.

115.10 Treaty-situs

The next requirement of treaty IHT exemption is that the property must not be situate in the UK. For this purpose the DTAs contain situs rules. It is therefore necessary to distinguish between ordinary IHT situs and what I call "**treaty-situs**". The rules are those recommended in a report

[43] See 9.11 (Tie-breaker tests: Individuals).

on Double Taxation prepared for the League of Nations in 1923 by Professors Bruins and Seligman and our own Sir Josiah (later, Lord) Stamp; the report is worth reading as it gives the background.

Some of the rules repeat the ordinary IHT situs rules and others are different.

115.10.1 *Treaty-situs: India/Pakistan*

Art 4(1) India IHT DTA provides:

> Subject to para (2) of this Article, where a person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments ...

This is the case we are considering.

> ... the situs of any property *which for the purposes of duty passes or is deemed to pass on his death* shall, for the purposes
> [a] of the imposition of duty and
> [b] of the credit to be allowed under Art. VI,
> be determined exclusively in accordance with the rules in Art. V of the present Agreement.

However there is a condition in Art 4(2):

> Para (1) of this Article shall apply if, and only if, apart from the said Art. V—
> (a) duty would be imposed on the property under the law of each of the Contracting Governments; or
> (b) duty would be imposed on the property under the law of one of the Contracting Governments and would, but for some specific exemption, also be imposed thereon under the law of the other Contracting Government.

This condition is not satisfied under the India IHT DTA, since estate duty in India was repealed in 1985. (Significantly, about the same time, the Thatcher Government was drawing the teeth of CTT, though the UK did not follow India all the way to abolition.) So the treaty-situs rules in the India IHT DTA will not apply, unless India re-imposes an estate duty. Instead the IHT/international law situs rules will apply.

Pakistan is the same: Art 3 Pakistan IHT DTA. Pakistan's estate duty was abolished in 1979. One wonders why these treaties have survived so many decades after losing their *raison d'être*.

Treaty-situs: France/Italy

Article 3 France IHT DTA provides:

> (1) Where a person was at the time of his death domiciled in any part of the territory of one of the Contracting Parties, the situs of any property shall for the purposes
> [a] of the imposition of duty and
> [b] of any credit to be allowed under Article VI[44]
> be determined exclusively in accordance with the rules in Article IV.
> (2) Paragraph (1) of this Article shall apply only if, apart from the said Article IV—
> (a) duty would be imposed on the property under the law of each Contracting Party; or
> (b) duty would be imposed on the property under the law of one of the Contracting Parties and would, but for some specific exemption, be imposed thereon under the law of the other Contracting Party.

France retains its duty on successions on death, so the condition in Art 3(2) is satisfied, and the treaty-situs rules are relevant. I here set out the rules in Art 4 France IHT DTA highlighting in italic those significantly different from IHT-situs:

> The rules referred to in paragraph 1 of Article III are:
> (a) [i] land shall be deemed to be situated at the place where it is located;
> [ii] rights or interests (otherwise than by way of security) which constitute immovable property shall be deemed to be situated at the place where the land to which they relate is located; the question whether rights or interests constitute immovable property shall be determined in accordance with the law of the place where the land to which they relate is located;
> (b) [i] tangible movable property (other than such property for which specific provision is hereinafter made) and rights or interests (otherwise than by way of security) therein shall be deemed to be situated at the place where it is located at the time of the deceased person's death or, *if in transitu, at the place of destination*; and
> [ii] bank or currency notes or other forms of currency recognised as legal tender in the place of issue shall be treated as tangible movable property for the purpose of this subparagraph;
> (c) *debts, secured or unsecured, excluding those for which specific provision is made in this Article, but including debentures and debenture stock issued by a company, bills of exchange, promissory notes and cheques shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;
> (d) *securities issued by any government, county council, dèpartement,*

[44] See 120.7 (France/Italy IHT credit).

municipality or other public authority shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;

(e) *shares or stock in a company (including any such property held by a nominee, whether the beneficial ownership is evidenced by scrip certificates or otherwise) shall be deemed to be situated at the place where the company was incorporated*;

(f) *moneys payable under a policy of assurance or insurance shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(g) [i] an interest in a partnership, which term includes a société en nom collectif, a société en commandite simple *and a société civile* under French law, shall be deemed to be situated at the place where the business is principally carried on;

[ii] and in the case of a société civile immobilière this shall be where the land developed in accordance with the objects of the société is located;

(h) goodwill as a trade, business or professional asset shall be deemed to be situated at the place where the trade, business or profession to which it pertains is carried on;

(i) ships and aircraft and shares thereof shall be deemed to be situated at the place of registration of the ship or aircraft;

(j) *patents, trade marks, designs, copyright, and rights or licences to use any patent, trade mark, design or copyrighted material shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(k) *rights or causes of action ex-delicto*[45] *surviving for the benefit of the estate of a deceased person shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(l) *judgment debts shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(m) *any other right or interest shall be deemed to be situated at the place determined by the law in force in the territory of the Contracting Party where the deceased person was not domiciled at the date of his death.*

The France IHT DTA may *increase* IHT on death, by providing that property which is not UK situate on general principles is to be regarded as UK situate.

For the position in Italy, see Saccardo, "Italian Inheritance and Gift Tax upon Non-residents" [2020] PCB 43.

115.11 Certificate of tax paid

115.11.1 *France*

The IHT Manual provides:

[45] ie torts, not contractual rights.

IHTM27174: certificate of tax paid: France [Oct 2016]

Certificate of French succession duty paid

Where the deceased had a fiscal domicile (IHTM13001) in France, the UK is required by Article V to waive its rights to tax on any of their assets that are deemed to be situated in France under the situs code at Article IV of the Double Taxation Convention. In view of the provisions of Article III (2), which restricts relief where the French tax has not been paid, it is desirable to have some confirmation of the French Revenue's position. Normally it will be sufficient to obtain a copy of the French return (Déclaration de Succession) and the French clearance certificate (Certificat d'Acquittement) to confirm that the French succession duty has been paid.

Where the deceased had a fiscal domicile (IHTM13001) in the UK and a double taxation credit is claimed from HMRC under Article VI, you may allow the amount shown in form IHT400 provisionally. But the case must not be closed until the payment has been certified by the French authorities. The form used for the certification is form No. 50, which is available from Technical.

If you think a credit is due, send two prints of form No. 50 to the taxpayer or agent. Ask them to complete the forms and return both copies to us. You should send the completed forms to Technical, who will send them on to the French authorities.

In due course, we will receive a certified form No. 50 back from France. You should check the certified form carefully, and allow the correct amount of credit. If you are uncertain about any aspect of the certified form No. 50, or you think that the Convention may not have been correctly applied, please refer the case to Technical, with a covering memo.

- The credit given for the French duty cannot be more than the amount of the UK tax due on the asset concerned.
- The provisions of the Convention only cover UK Inheritance Tax (IHT) that is due on death. They do not cover tax due on immediately chargeable lifetime transfers.

Certificate of IHT paid

Where the deceased had a fiscal domicile (IHTM13001) in the UK, France is required by Article V to waive its right to tax on any of their assets that are deemed to be situated in the UK under the situs code at Article IV of the Double Taxation Convention. You should consult Technical about any request for a confirmation of the UK's position in support of a claim to the French taxation authorities.

Where the deceased had a fiscal domicile (IHTM13001) in France and

> a double taxation credit is claimed from the French Revenue under Article VI a certificate of IHT paid is given on the French form No. 5180 once the IHT is finalised and paid.
> A stock of this form is held Technical. The taxpayer must complete it in triplicate and then return it to us.
> You should check the forms No. 5180. It is important that you do not mark the forms in any way. The file should be sent, with a note of any error or omission, to Technical. When the case is closed Technical will arrange for two copies to be certified and sent to the French authorities, together with a schedule of any amendments we have needed to make. We will keep the third copy of the form on our file. You should tell the taxpayer or agent that we have sent the certificate to France, and send them a copy of the schedule of amendments, if there is one.

115.11.2 *Italy*

The IHT Manual provides:

> **IHTM27175 certificate of tax paid: Italy** [Sep 2018]
> Where a double taxation credit is claimed for tax imposed in Italy or the taxpayer or agent asks for a certificate of the Inheritance Tax paid for the Italian authorities refer the file to Technical for advice.
> The Double Taxation Convention between the UK and Italy only covers the Italian equivalent of Inheritance Tax (known as imposta sulla successione). This tax was abolished for all deaths after 25 October 2001 but later reintroduced for deaths on or after 3 October 2006.
> You should also consider whether unilateral relief(IHTM27185) applies in respect of Italian taxes that fall outside the scope of the Double Taxation Convention. But it will only apply where the foreign tax is of a character similar to Inheritance Tax or is chargeable on or in connection with death or lifetime gifts. Italian imposta ipotecaria and imposta catastale are not of similar character to Inheritance Tax, because they are chargeable on a normal property purchase as well as on a death transfer.
> The provisions of the Convention only cover UK Inheritance Tax that is due on death. They do not cover tax due on immediately chargeable lifetime transfers.

115.12 The future

In 2015 the Law Society said:

> We understand the intention is for the UK to have priority taxing rights

> and to re-negotiate the [estate duty] treaties in the longer term.[46]

The lapse of time suggests the plan has been dropped. Could it be that the need to agree a post-Brexit trade agreement with India made this plan inopportune? No doubt HMRC would be pleased to respond to enquiries from their customers.

[46] Law Society, Response to HM Treasury consultation on reforms to the taxation of non-domiciles (2015).

France/Italy IHT credit	120.7
Deductions for DTA purposes	114.9

116.1 Netherlands IHT DTA

This chapter discusses the IHT treaty with the Netherlands , which I call the "Netherlands IHT DTA".[1]

116.2 Scope

Article 1 Netherlands IHT DTA provides:

[1] For some reason DTAs do not have short titles. The long title is: "Convention between the United Kingdom of Great Britain and Northern Ireland and the Kingdom of the Netherlands for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Estates of Deceased Persons and Inheritances and on Gifts"; SI 706/1980

> This Convention shall apply:
> (a) to estates of and gifts made by persons domiciled in one or both of the States at their death or at the time of the gift, as the case may be;
> (b) to property comprised in settlements made by persons domiciled in either State at the time when the settlement was made.

116.3 Taxes covered

Article 2(1) Netherlands IHT DTA provides:

> The taxes which are the subject of this Convention are:
> (a) in the UK, the [now IHT][2] (hereinafter referred to as "UK tax");
> (b) in the Netherlands, the succession duty (het recht van successie), the gift duty (het recht van schenking) and the transfer duty (het recht van overgang) (hereinafter referred to as "Netherlands tax").

Article 2(2) Netherlands IHT DTA extends the DTA to substantially similar taxes. The wording follows the OECD model.[3]

116.4 Definitions

The Netherlands IHT DTA provides commonsense definitions of the following terms, which are not discussed here: The Netherlands; UK; Competent Authority; State.

Article 3(1) Netherlands IHT DTA provides:

> (e) the term "tax" means United Kingdom tax or Netherlands tax as the context requires;
> (f) the term "person" includes an individual, a company and any other body of persons;

Article 3(2) Netherlands IHT DTA gives terms not otherwise defined their domestic law meanings, following OECD Model wording as it stood at the time of the DTA. See 107.12 (Undefined treaty terms).

116.4.1 *National*

Article 3(1) Netherlands IHT DTA provides:

[2] See 74.1.1 ("CTT" now refers to IHT). CTT/IHT are also "similar taxes" within art 2(2).

[3] See 114.4 (IHT DTAs: Taxes covered).

> (d) the term “national” means:
> (i) in relation to the UK, any British citizen or any British subject not possessing the citizenship of any other Commonwealth country or territory provided he had the right of abode in the UK at the time of the death or gift or any other material time;
> (ii) in relation to the Netherlands, any individual possessing the Nethzerlands nationality.

116.4.2 *Gift*

Article 3(1) Netherlands IHT DTA provides:

> (h) the term “gift” means in the UK a transfer of value other than one made on death and the term “donor” shall be construed accordingly.

116.5 Treaty-Domicile

Article 4 Netherlands IHT DTA provides:

> For the purposes of this Convention, a person was domiciled:
> (a) in the UK, if he was domiciled in the UK in accordance with its law or is treated as so domiciled for the purposes of a tax which is the subject of this Convention;[4]
> (b) in the Netherlands, if he was a resident of or is treated as a resident of the Netherlands for the purposes of a tax which is the subject of this Convention;
> provided that a person shall not be deemed to be domiciled in one of the States if on the death or gift that State imposes tax only by reference to property situated in that State.

116.5.1 *Tie-breakers*

Article 4 Netherlands IHT DTA provides:

> (2) Where by reason of the provisions of paragraph (1) of this Article an individual was domiciled in both States, then, subject to the provisions of paragraph (3) of this Article, his status shall be determined as follows:
> (a) he shall be deemed to be domiciled in the State in which he had a permanent home available to him; if he had a permanent

[4] Para (a) is standard wording, discussed at 114.5 (Treaty-domicile).

> home available to him in both States, the domicile shall be deemed to be in the State with which his personal and economic relations were closer (centre of vital interests);
>
> (b) if the State in which he had his centre of vital interests cannot be determined, or if he had not a permanent home available to him in either State, the domicile shall be deemed to be in the State in which he had an habitual abode;
>
> (c) if he had an habitual abode in both States or in neither of them, the domicile shall be deemed to be in the State of which he was a national;
>
> (d) if he was a national of both States or of neither of them, the competent authorities of the States shall settle the question by mutual agreement.

This is standard OECD Model wording.[5]

> (3) Notwithstanding the provisions of paragraph (2) of this Article, where by reason of the provisions of paragraph (1) of this Article an individual was at the time his domicile falls to be determined domiciled in both States and
>
> (a) was at that time a national of one of the States but not of the other, and
>
> (b) was resident in that other State but had been so resident for less than seven years out of ten years immediately preceding that time, and
>
> (c) did not intend to remain indefinitely in that other State,
>
> then he shall be deemed to be domiciled at that time in the State of which he was a national.
>
> For the purposes of this paragraph
>
> [A] where that other State is the UK the question whether a person was resident there shall be determined as for income tax purposes, but without regard to any dwelling-house available to him in the UK for his use[6] and
>
> [B] "years" shall be taken to mean income tax years of assessment ending with the year of assessment in which death or the making of a gift occurs.

[5] See 9.11 (Tie-breaker tests: Individuals).

[6] This sentence is based on wording formerly in the IHT deemed domicile rule, see 5.6.3 ("Residence" for 15-year rule). It is no longer appropriate, following the introduction of the statutory residence test, but in practice the point will only rarely arise.

116.6 Immovable property

Article 5 (more or less) follows the OECD IHT Model. Article 5 Netherlands IHT DTA provides:

> (1) Immovable property may be taxed in the State in which such property is situated.

Article 5(2) Netherlands IHT DTA defines "immovable property" in (more or less) OECD Model form:[7]

> (2) The term "immovable property" shall have the meaning it has under the law of the State in which the property in question is situated. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, an interest in the proceeds of sale of land which is held on trust for sale, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats, aircraft and debts secured by mortgage or otherwise shall not be regarded as immovable property.
> (3) The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of independent personal services.

116.7 Business property

Article 6 Netherlands IHT DTA provides:

> (1) Except for assets referred to in Articles 5 and 7 [immovable property/ships/aircraft], assets forming part of the business property of a permanent establishment of an enterprise may be taxed in the State in which the permanent establishment is situated.
> (2) For the purposes of this Convention, the term "permanent establishment" means a fixed place of business through which the business of an enterprise is wholly or partly carried on.
> (3) The term "permanent establishment" includes especially:
> (a) a place of management,
> (b) a branch,
> (c) an office,

[7] See 24.7.1 ("Immovable property").

(d) a factory,
(e) a workshop and
(f) a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

(4) A building site or construction or installation project constitutes a permanent establishment only if it lasts for more than twelve months.

(5) Notwithstanding the preceding provisions of this Article, the term “permanent establishment” shall be deemed not to include:

(a) the use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise;
(b) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;
(c) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;
(d) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;
(e) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character;
(f) the maintenance of a fixed place of business solely for any combination of activities mentioned in sub-paragraphs (a) to (e) of this paragraph provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

(6) Except for assets described in Article 5, assets pertaining to a fixed base used for the performance of independent personal services may be taxed in the State in which the fixed base is situated.

(7) The provisions of paragraphs (1) and (6) of this Article shall apply to an interest in a partnership if an enterprise is carried on, or independent professional services are performed, by the partnership.

116.8 Ships and aircraft

Article 7 Netherlands IHT DTA provides:

> Ships and aircraft operated in international traffic and boats engaged in inland waterways transport, and movable property pertaining to the operation of such ships, aircraft and boats, may be taxed in the State in which the place of effective management of the enterprise is situated.

116.9 Other property

Article 8 Netherlands IHT DTA provides the main treaty exemption:

> Subject to the provisions of Article 11 property wherever situated and not dealt with in Articles 5, 6 and 7 [immovable/business property/ships/aircraft] shall be taxable only in the State in which the deceased or the donor was domiciled at the time of the death or gift.

116.10 Conflict on property nature

Article 9 Netherlands IHT DTA provides:

> If,
> [1] by the law of one of the States, any right or interest is regarded as property not falling within any of Articles 5, 6 and 7 [immovable/business property/ships/aircraft],
> [2] but, by the law of the other State, that right or interest is regarded as property falling within those Articles,
> then that right or interest shall for the purposes of this Convention be regarded as property falling within those Articles.

This is not a standard provision. I wonder if it is directed at some particular point of conflict.

116.11 Deductions

Article 10 Netherlands IHT DTA provides:

> In determining the amount on which tax is to be computed deductions shall be allowed in accordance with the law of the State in which the tax is imposed.

This article is found in several IHT DTAs; for discussion, see 114.9 (Deductions for DTA purposes).

116.12 Limitations on relief

Article 11 Netherlands IHT DTA provides:

> (1) If the deceased or the donor was
> [a] domiciled in one of the States at the time of the death or gift and
> [b] was at that time a national of the other State and
> [c] had been domiciled in that other State at any time within the ten years immediately preceding the death or gift,
> that other State may impose tax according to its domestic law.

116.13 Settled property

Article 11 Netherlands IHT DTA provides:

> (2) The UK may impose tax by reference to property comprised in a settlement unless at the time when the settlement was made the settlor was:
>
> (a) domiciled in the Netherlands; and
>
> (b) not a national of the UK who had been domiciled in the UK at any time within the immediately preceding ten years.

116.14 Requirement to pay foreign tax

Article 11(3) Netherlands IHT DTA provides:

> If
>
> [a] under the provisions of Article 8 any property would be taxable only in the Netherlands and
>
> [b] the deceased or donor
>
> [i] is either a national of the UK and not a national of the Netherlands or
>
> [ii] is treated for the purposes of Netherlands tax as a resident of the Netherlands under its unilateral 10-year rule,
>
> the UK may also impose tax, according to its law, by reference to such property, if the competent authority of the Netherlands notifies the competent authority of the UK that the Netherlands tax chargeable with respect to such property has not been paid (otherwise than as a result of a specific exemption, deduction, credit or allowance).

The IHT Manual provides:

> **IHTM27171: certificate of tax paid: Netherlands** [Dec 2021]
>
> Where the transferor was, according to the Double Taxation Convention:
>
> - domiciled in the Netherlands, and
> - had not been domiciled in the UK within the 10 years of the transfer.
>
> the UK must waive its taxing rights on any asset the transferor held that was within Article 8, even if it was situated in the UK. You should consult Technical about any proof of taxation in the Netherlands.
>
> When a double taxation credit is due under Article 13, you may allow the amount claimed in IHT400 provisionally. But the case should not be closed until the payment of Dutch succession duty has been certified by the Dutch authorities. There is no special form for a certificate. You

should tell the taxpayer or agent to obtain a statement from the Dutch authorities showing:

(a) the total tax attributable to the property in question (excluding any interest and penalties)
(b) the property and its value on which that tax was charged
(c) the date of payment of that tax
(d) that the tax was computed in accordance with the Convention
(e) that the tax is final
(f) that no application for a refund of tax is now pending or authorised and that, if a refund is made, due notice will be given to this Office.

The Dutch authorities will send the certificate in the form of a letter direct to us.

If you have any difficulty calculating the tax attributable to property, after you have received the certificate, you should ask for advice from Technical.

The credit given cannot be more than the amount of UK Inheritance tax payable on the property concerned.

Certificate of IHT paid

A certificate of IHT paid will also be a letter that we will issue if the taxpayer or agent requests one. It is prepared by Technical and sent to the Dutch authorities, with a copy to the applicant. If there is any adjustment of tax after a certificate has been issued, refer the file back to Technical to issue an amending certificate.

You should also refer the file to Technical if the taxpayer or agent asks for proof that the assets are subject to Inheritance tax in the UK in connection with Article 8.

116.15 Spouse exemptions

Article 12 Netherlands IHT DTA provides:

(1) Where

[a] property other than community property passes from a deceased person who was domiciled in the Netherlands to his or her spouse, and
[b] that property may be taxed in the UK solely by reason of Article 5, 6 or 7, and
[c] the spouse was not domiciled in the UK but the transfer would have been wholly exempt if the spouse had been so domiciled,

the UK shall exempt the property from tax to the extent of not less than 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those

> for transfers between spouses.
> (2) Where
> [a] property other than community property passes from a deceased person who was domiciled in the UK to his or her spouse and
> [b] that property may be taxed in the Netherlands solely by reason of Article 5, 6 or 7,
>
> the Netherlands shall exempt from tax such property to the extent that 50 per cent of its value exceeds the amount of the personal exemption which under the law of the Netherlands is given to a surviving spouse. If however the deceased person was a resident of the Netherlands under its domestic law the preceding sentence shall apply only to the extent that it is shown that the tax so computed is not less than the tax which would have been imposed if the deceased person had been domiciled in the Netherlands for the purposes of this Convention.
> (3) Paragraph (2) shall not apply if at the time of death the UK under its domestic law taxes property passing from a deceased person to his or her spouse, who has the same domicile as that of the deceased person, to the extent of more than 50 per cent of its value.

116.16 Foreign tax credit

Article 13 Netherlands IHT DTA provides:

> (1) Where one of the States imposes tax in connection with any event by reference to any property which the other State may tax in accordance with Article 5, 6 or 7, the former State shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of tax so attributable) equal to so much of the tax imposed in the other State in connection with the same event as is attributable to such property.
> (2) Subject to paragraph (3) of this Article, where both States impose tax in connection with any event by reference to any property not being property referred to in Article 5, 6 or 7, the State which imposes tax by virtue of paragraph (1) of Article 11, shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of the tax so attributable) equal to so much of the tax imposed in the other State by virtue of Article 8 in connection with the same event as is attributable to such property.
> (3) Where by virtue of paragraph (2) of Article 11 the UK imposes tax in connection with any event by reference to any property comprised in a settlement not being property referred to in Article 5, 6 or 7, the UK shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of the

> tax so attributable to such property a credit (not exceeding the amount of the tax so attributable) equal to so much of the tax imposed in the Netherlands in connection with the same event as is attributable to such property.
>
> (4) For the purposes of this Article,
>
> (a) the tax attributable to any property imposed in one of the States is tax as reduced by the amount of any credit allowed by that State in respect of tax attributable to that property imposed in a territory other than one of the States;
>
> (b) where tax is imposed on the death of a person by reason of a gift made [within 7 years] preceding the death, whether in consequence of the fact that the gift is deemed to be derived from this estate or otherwise with respect to that gift, that tax shall be treated as if it were imposed in connection with that gift;
>
> (c) tax is imposed in one of the States if it is chargeable under the law of that State and duly paid.

116.17 Time limit

Article 14 Netherlands IHT DTA provides:

> Time Limit
>
> Any claim for a credit or for a repayment of tax founded on the provisions of this Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due.

116.18 Other articles

The following articles of the Netherlands IHT DTA are standard form and not discussed here:

Article	**Topic**
16	Mutual agreement procedure
17	Exchange of information
18	Diplomatic and consular officials
19	Territorial extension
20	Entry into force
21	Termination

117.1 Introduction

This chapter considers the IHT Treaty with South Africa, which I call the "SA IHT DTA".[1]

John Avery Jones explains the background:[2]

[1] For some reason DTAs do not have short titles. The long title is: "Convention Between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the Republic of South Africa for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Estates of Deceased Persons and on Gifts"; SI 1979/576

[2] Avery Jones, "The Estate and Gifts Tax Convention with South Africa" [1979] BTR 1. It is remarkable, almost unheard of, that tax scholarship more than 40 years old

The new South African convention relating to estate and gift taxes solves in a neat way the difficulties faced when one country taxes on the basis of domicile and the other on the basis of ordinary residence. The OECD Model singularly fails to do this in applying as the first test in the case of dual domicile, the country in which the taxpayer has a permanent home. A taxpayer from the "domicile" country acquiring a permanent home in the "ordinary residence" country will therefore under the Model shed his original domicile, while a taxpayer from the ordinary residence country is unlikely to acquire a domicile in the domicile country, and dual domicile will not therefore arise. Either way the domicile country loses.

The negotiators have solved this by applying a prior rule under which a person with UK, but not South African, nationality can be resident or ordinarily resident in South Africa for up to six out of the 10 tax yeas preceding the time of charge, without being considered to have a domicile in South Africa for the purposes of the convention. This provision is reciprocal in form but less likely to arise the other way round because either the visitor will not acquire a UK domicile or will not keep his South African ordinary residence. The same tests as in the OECD Model then apply only after the seven years or in the case of nationality in neither or both countries. A visitor from the UK, so long as he has UK nationality but not South African nationality, can therefore live in South Africa until he has been resident for seven tax years with immunity from South African gift and death duties, except on assets which South Africa can tax on the basis of situs.

When the seven years is reached he will, assuming he retains his UK domicile, have dual domicile under internal law which is solved for the purposes of the convention by applying the OECD Model tests in order. Normally he will have a permanent home in South Africa only which gives South Africa by the primary right to tax his world property, other than that which the UK can tax on the basis of situs under the convention: immovable property, permanent establishments, ships and aircraft, shares, debentures, and unit trusts. However, so long as he had a convention domicile within the UK during the previous 10 years the UK has a secondary right to tax his world assets after giving credit for the South African tax.[3] ...

remains of current significance. But such is the pace of change in the area of IHT DTAs.

[3] Footnote original: Arts. 5(1) and 12(2). This seems to be based on the proposal in para. 31 of the commentary on OECD Model Art. 10 but without using nationality as a test.

If the taxpayer had emigrated to South Africa and therefore in law shed his UK domicile immediately, the UK would claim deemed domicile for three years,[4] which, coupled with the seven out of 10 years rule, would make him remain domiciled in the UK for three years for the purposes of the convention, assuming that he had UK, but not South African, nationality. After that he would no longer have a double domicile and South Africa has taxing rights. The UK would theoretically have a secondary taxing right under the convention because of his domicile there within the 10 previous years. But there is no internal law permitting a charge, except on the basis of situs where the convention would not otherwise allow a charge, on an insurance policy for example. In relation to settlements, where the settlor had dual domicile when the settlement was made, but a convention domicile at that time in South Africa, the UK will not charge unless he had a convention domicile within the UK during the 10 previous years, which again means applying the OECD Model tests over this period.[5] In cases where the UK can charge, that is to say where the settlor did have a UK convention domicile within the previous 10 years, or a convention domicile in the UK when the settlement was made, South Africa has a primary right to charge where the person with an interest in possession is domiciled (for the purposes of the convention) in South Africa at the date of charge, and the UK would have a secondary taxing right.[6] In cases where this is not applicable, either because it is a discretionary trust or the person with an interest in possession is not domiciled for the purpose of the convention in South Africa, the UK would charge under internal law.

These provisions have an interesting effect in relation to new arrivals from South Africa who might be interested in making a settlement while still domiciled in South Africa which will therefore be outside the UK charge to capital transfer tax. Assuming such a person has South African, but not UK, nationality and still remains ordinarily resident in South Africa he will have a convention domicile in South Africa after arrival in the UK for up to seven tax years, although it is unlikely that ordinary residence in South Africa will last that long. The convention prohibits the UK from charging tax under such a settlement, assuming that there is no question of his having a UK convention domicile within the previous 10 years. It seems that settlements can be made in such a

[4] Footnote original: Under FA 1975, s.45(1)(a). The convention prohibits the extension of this period and therefore para (b) is inapplicable: Art. 4(4).

[5] Footnote original: Art. 5(2).

[6] Footnote original: Art. 12(3).

case even after arrival in the UK.

117.2 Scope

Article 1 SA IHT DTA provides:

> This Convention shall apply to any person who is within the scope of a tax which is the subject of this Convention.

117.3 Taxes covered

Article 2(1) SA IHT DTA provides:

> The taxes which are the subject of this Convention are--
> (a) in the UK, the capital transfer tax [now IHT[7]];
> (b) in South Africa, the estate duty and the donations tax.

Article 2(2) SA IHT DTA extends the DTA to substantially similar taxes. The wording follows the OECD model.[8]

117.4 Definitions

The SA IHT DTA provides commonsense definitions of the following terms, which are not discussed here: SA; UK; Competent Authority; Contracting State.

Article 3(2) SA IHT DTA gives terms not otherwise defined their domestic law meanings, following OECD Model wording as it stood at the time of the DTA. See 107.12 (Undefined treaty terms).

Article 3 SA IHT DTA provides:

> (1) In this Convention, unless the context otherwise requires--
> (c) the term "nationals" means--
> (i) in relation to the UK, any citizen of the UK and Colonies, or any British subject not possessing that citizenship or the citizenship of any other Commonwealth country or territory, provided in either case he had the right of abode in the UK at the time of the death or transfer or other material time;
> (ii) in relation to South Africa, any citizen of South Africa;
> (d) the term "tax" means--
> (i) the inheritance tax imposed in the UK, or
> (ii) the estate duty or the donations tax imposed in South Africa,

[7] See 74.1.1 ("CTT" now refers to IHT). CTT/IHT are also "similar taxes" within art 2(2).

[8] See 114.4 (IHT DTAs: Taxes covered).

or

(iii) any other tax imposed by a Contracting State to which this Convention applies by virtue of the provisions of paragraph (1) of Article 2,

as the context requires; ...

(g) the term "transfer" includes, in the case of South Africa, a donation and the term "transferor" shall be construed accordingly.

117.5 Treaty-domicile

Article 4(1) SA IHT DTA provides:

> For the purposes of this Convention an individual was domiciled--
>
> (a) in the UK if
>
> [i] he was domiciled in the UK in accordance with the law of the UK or
>
> [ii] is treated as so domiciled for the purposes of a tax which is the subject of this Convention;[9]
>
> (b) in South Africa if he was ordinarily resident in South Africa.

Article 4 SA IHT DTA then sets out two tie-breakers:

> (2) Subject to the provisions of paragraph (4) of this Article, where by reason of the provisions of paragraph (1) of this Article an individual was at any time domiciled in both Contracting States, and
>
> (a) was a national of the UK but not of South Africa, and
>
> (b) had not been resident or ordinarily resident in South Africa in seven or more of the ten income tax years of assessment immediately preceding that time,
>
> then he shall be deemed to be domiciled at that time in the UK.
>
> (3) Subject to the provisions of paragraph (4) of this Article, where by reason of the provisions of paragraph (1) of this Article an individual was at any time domiciled in both Contracting States, and
>
> (a) was a national of South Africa but not of the UK, and
>
> (b) had not been resident or ordinarily resident in the UK in seven or more of the ten income tax years of assessment ending with the year of assessment in which that time falls,
>
> then he shall be deemed to be domiciled at that time in South Africa. For the purposes of this paragraph the question whether an individual was resident or ordinarily resident in the UK shall be determined as for the purposes of income tax, but without regard to any dwelling-house

[9] Para (a) is standard wording, discussed at 114.5 (Treaty-domicile).

> available in the UK for his use.
> (4) An individual shall not, by virtue of paragraph (2) or (3) of this Article, be deemed to be domiciled at any time in a Contracting State if, under the law of that Contracting State other than its law relating to a tax which is the subject of this Convention, he had ceased to be domiciled in that Contracting State more than three years before that time.

If these tie-breakers fail to break the tie, then standard form OECD model tie-breakers apply.[10] Article 4(5) SA IHT DTA provides:

> Where by reason of the provisions of paragraph (1) of this Article, an individual was domiciled in both Contracting States, then, subject to the provisions of paragraphs (2), (3) and (4) of this Article, his status shall be determined as follows--
> (a) he shall be deemed to be domiciled in the Contracting State in which he had a permanent home available to him. If he had a permanent home available to him in both Contracting States, the domicile shall be deemed to be in the Contracting State with which his personal and economic relations were closer (centre of vital interests);
> (b) if the Contracting State in which he had his centre of vital interests cannot be determined, or if he had not a permanent home available to him in either Contracting State, the domicile shall be deemed to be in the Contracting State in which he had an habitual abode;
> (c) if he had an habitual abode in both Contracting States or in neither of them, the domicile shall be deemed to be in the Contracting State of which he was a national; and
> (d) if he was a national of both Contracting States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

117.6 Treaty reliefs

117.6.1 *Non-settled property*

Article 5(1) SA IHT DTA provides:

> Subject to the provisions of Articles 6, 7, 8 and 9 and the following paragraphs of this Article, if the deceased or the transferor was domiciled in, one of the Contracting States at the time of the death or

[10] See 9.11 (Tie-breaker tests: Individuals).

> transfer, property shall not be taxable in the other Contracting State unless he had been domiciled in the other Contracting State within the ten years immediately preceding the death or transfer.

The four exceptions referred to are:

Article	**Topic**	**See para**
6	Immovable property	117.8
7	Business property	117.9
8	Ships/aircraft	117.10
9	Shares/debentures/unit trusts	117.11

117.6.2 *Settled property*

Article 5(2) SA IHT DTA provides:

> [a] Paragraph (1) of this Article shall not apply in the UK to property comprised in a settlement;
> [b] but, subject to the provisions of Articles 6, 7, 8 and 9, such property shall not be taxable in the UK if at the time when the settlement was made
> [i] the settlor was domiciled in South Africa and
> [ii] had not been domiciled in the UK within the immediately preceding ten years.

117.7 Requirement to pay foreign tax

Article 5(3) SA IHT DTA provides:

> If by reason of paragraph (1) of this Article any property would be taxable only in one Contracting State and tax, though chargeable, is not paid (otherwise than as a result of a specific exemption, deduction, credit or allowance) in that Contracting State, tax may be imposed by reference to that property in the other Contracting State notwithstanding that paragraph.

117.8 Immovable property

Article 6(1) SA IHT (more or less) follows the OECD IHT Model.DTA:

> Immovable property may be taxed in the Contracting State in which such property is situated.

Article 6(2) SA IHT DTA defines "immovable property" in (more or less) OECD Model form:[11]

[11] See 24.7.1 ("Immovable property").

> (2) The term "immovable property" shall have the meaning which it has under the law of the Contracting State in which the property in question is situated provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats and aircraft shall not be regarded as immovable property.
>
> (3) The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of independent personal services.

117.9 Business property

Article 7 SA IHT DTA provides:

> (1) Except for assets referred to in Articles 6, 8 and 9, assets forming part of the business property of a permanent establishment of an enterprise may be taxed in the Contracting State in which the permanent establishment is situated.
>
> (2) --
>
> (a) For the purposes of this Convention, the term "permanent establishment" means a fixed place of business through which the business of an enterprise is wholly or partly carried on.
>
> (b) The term "permanent establishment" includes especially--
>
> (i) a place of management;
>
> (ii) a branch;
>
> (iii) an office;
>
> (iv) a factory;
>
> (v) a workshop;
>
> (vi) a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources; and
>
> (vii) a building site or construction or installation project which exists for more than 12 months.
>
> (c) Notwithstanding the preceding provisions of this paragraph, the term "permanent establishment" shall be deemed not to include--
>
> (i) the use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise;

(ii) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;

(iii) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;

(iv) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;

(v) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character; or

(vi) the maintenance of a fixed place of business solely for any combination of activities mentioned in (i) to (v) of this sub-paragraph provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

(d) Notwithstanding the provisions of sub-paragraphs (a) and (b), where a person--other than an agent of an independent status to whom sub-paragraph (e) applies--is acting on behalf of an enterprise and has, and habitually exercises in a Contracting State, an authority to conclude contracts in the name of the enterprise, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in sub-paragraph (c) which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that sub-paragraph.

(e) An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

(f) The fact that a company which is a resident of a Contracting State controls or is controlled by a company which is a resident of the other Contracting State, or which carries on business in that other State (whether through a permanent establishment or otherwise), shall not of itself constitute either company a permanent establishment of the other.

(3) Except for assets described in Article 6, assets pertaining to a fixed base used for the performance of independent personal services may be

taxed in the Contracting State in which the fixed base is situated.

117.10 Ships and aircraft

Article 8 SA IHT DTA provides:

> Ships and aircraft operated in international traffic and movable property pertaining to the operation of such ships and aircraft may be taxed in the Contracting State in which the place of effective management of the enterprise is situated.

117.11 Shares/debentures/unit trusts

Article 9 SA IHT DTA provides:

> Property consisting of--
> (a) shares, stock, debentures and debenture stock issued by companies incorporated in one of the Contracting States (including any such property falling within the provisions of Article 7 [business property), and
> (b) rights of unit holders in any unit trust scheme where the register of unit holders is kept in one of the Contracting States,
> may be taxed by that Contracting State.

117.12 Dual nature property

Article 10(1) SA IHT DTA provides:

> If the deceased or the transferor was domiciled in one of the Contracting States at the time of death or transfer, and
> (a) by the law of that Contracting State any right or interest is regarded as property not falling within Articles 6, 7, 8, or 9, but
> (b) by the law of the other Contracting State that right is regarded as property falling within those Articles.
> then the Article of the Convention under which the property falls shall be determined by the law of the other Contracting State.

117.13 Dual situate property

Article 10(2) SA IHT DTA provides:

> If the deceased or the transferor was domiciled in neither Contracting State at the time of the death or transfer, and each Contracting State would regard any property as situated in its territory and in consequence tax would be imposed in both Contracting States, the competent authorities shall determine the situs of the property by mutual agreement.

117.14 Deductions/allowances/reliefs

Article 11(1) SA IHT DTA provides:

> In determining the amount on which tax is to be computed permitted deductions shall be allowed in accordance with the law in force in the territory in which the tax is imposed.

Article 11(1) is found in several IHT DTAs; for discussion, see 114.9 (Deductions for DTA purposes).

Article 11(2) SA IHT DTA provides:

> Nothing contained in this Convention shall be construed as obliging either Contracting State to grant to individuals not domiciled in that Contracting State, or to the estates of such individuals, any of the personal allowances, reliefs, and reductions for tax purposes which are granted to individuals so domiciled, or to their estates.

117.15 Foreign tax credit

Article 12 SA IHT DTA provides:

> (1) Where a Contracting State imposes tax in connection with any event by reference to any property which the other Contracting State may tax in accordance with Articles 6, 7, 8 or 9, the former Contracting State shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of tax so attributable) equal to so much of the tax imposed in the other Contracting State in connection with the same event as is attributable to such property.
>
> (2) Subject to paragraph (3) of this Article, where a Contracting State imposes tax in connection with any event by reference to any property not referred to in paragraph (1) of this Article and the deceased or transferor was domiciled in the other Contracting State at the time of the death or transfer, the first-mentioned Contracting State shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of tax so attributable) equal to so much of the tax imposed in the other Contracting State in connection with same event as is attributable to such property.
>
> (3) Where--
>
> (a) under paragraph (2) of Article 5 the UK imposes tax in connection with any event by reference to any property which is not referred to in paragraph (1) of this Article and which is comprised in the settlement in which an interest in possession subsists, and

> (b) at the time of the event giving rise to the liability to tax the individual entitled to that interest was domiciled in South Africa.
>
> the UK shall allow against so much of its tax (as otherwise computed) as attributable to such property a credit (not exceeding the amount of tax so attributable) equal to so much of the tax imposed in South Africa in connection with the same event as attributable to such property.
>
> (4) For the purposes of this Article--
>
> (a) the tax attributable to any property imposed in a Contracting Sate is tax as reduced by the amount of any credit imposed in a territory other than a Contracting State;
>
> (b) tax is imposed in a Contracting State if its is chargeable under the law of that Contracting State and duly paid; and
>
> (c) where tax is imposed on the death of a transferor by reason of a transfer made within the three years immediately preceding the death of a transfer in the transferor's estate or otherwise with respect of the transfer, that tax shall be treated as if it were imposed in connection with that transfer.

117.16 Time limit

Article 13 SA IHT DTA provides:

> Any claim for a credit or for a repayment of tax founded on the provisions of this Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due. The competent authority of a Contracting State may, in appropriate circumstances, extend this time limit where the final determination or the payment of tax in the other Contracting State is delayed.

117.17 Non-discrimination

Article 14 SA IHT DTA provides:

> (1) The nationals of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other Contracting State in the same circumstances are or may be subjected.
>
> (2) The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other Contracting State than the taxation levied on enterprises of that other Contracting State carrying on the

same activities.

(3) Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of that first mentioned State are or may be subjected.

(4) Nothing contained in this Article shall be construed as restricting the provisions of paragraph (2) of Article 11.

(5) In this Article the term "taxation" means taxes covered by this Convention.

118.1 Swiss IHT treaty

This chapter considers the IHT treaty with Switzerland, which I call the "Swiss IHT DTA".[1]

The Swiss treaty does not follow the OECD IHT Models.[2] Avery Jones

[1] For some reason DTAs do not have short titles. The long title is: "The Convention between the UK of Great Britain and Northern Ireland and the Swiss Federation for the avoidance of double taxation with respect to taxes on estates and inheritances"; SI 1994/3214

[2] See 114.3 (OECD IHT Models).

explains why:

> Switzerland, or strictly the Swiss Cantons, tax worldwide assets if the deceased was resident but tax only immovable property on a situs basis if the deceased was not resident. The Swiss Cantons do not give any relief for double taxation except on foreign immovable property; the UK gives probably the most generous unilateral relief in the world. Thus in almost all cases the UK could only lose from the treaty and Switzerland could gain...
>
> The result was that the normal [OECD Model] pattern applies only in single domicile cases,[3] and a different approach is adopted in cases of dual domicile. Here it is the situs state which has primary taxation rights, and not the treaty domicile state.[4] The treaty domicile merely determines the extent of secondary taxing rights in the UK: in all cases if treaty domicile was in the UK but only on UK nationals domiciled in the UK within the previous five years if treaty domicile was in Switzerland.[5] Switzerland retains no secondary taxing rights.
>
> The logic of the treaty seems to be that in a dual domicile case there would be unrestricted taxing rights under internal law and these should not be given up completely to the other state merely on account of the application of the tie-breaker rules. Thus the UK is giving up the minimum amount of tax in such a case. When the UK wins under the tie-breaker it gives up taxing rights only to the extent of giving credit for Swiss tax on Swiss property; when the UK loses under the tie-breaker it gives up nothing in relation to UK situs property, and in relation to other property it only retains the right to tax British nationals who have recently gone to live in Switzerland. From the point of view of Switzerland, Switzerland has no secondary taxing rights, so that it gives up all taxing rights over UK situs property if it wins under the tie-breaker, and over all non-Swiss situs property if it loses. ...
>
> The worst feature of the treaty is the drafting ... First it deals with property situated in one of the states, with different primary taxing rights stated for single and dual domicile cases, to which there are three different UK secondary taxing rights. Next the primary taxing rights are set out for third state assets, again with a different rule for single and dual domicile cases, with a secondary taxing right for the UK, which is

[3] Footnote original: The UK has a secondary taxing right over shares in UK incorporated companies which is a reservation the UK made in the OECD Model estate tax treaty and sometimes succeeded in including in its treaties.

[4] Footnote original: Art. 8(1)(a)(ii) and 8(1)(b)(ii).

[5] Footnote original: Art 8(3), (4).

the same as one of the previous ones but set out again. By the end the reader is hopelessly lost. In tabular form it looks like this for property other than immovable property, business permanent establishments and ships and aircraft:

	Sole domicile in UK	**Sole domicile in Switzerland**
Property not covered by situs charges[6]	UK: sole taxing right	Switzerland: primary taxing right UK: secondary taxing right on shares in UK incorporated companies
	Tie-breaker UK domicile	**Tie-breaker Swiss domicile**
UK other property	UK: Sole taxing right Switzerland: none	UK Sole taxing right Switzerland: none
Swiss other property	Switzerland: primary taxing right UK: Secondary taxing right	Switzerland: primary taxing right UK: secondary taxing right if UK (only) national domiciled within the previous 5 years
Third state other property	UK: sole taxing right Switzerland: none	Switzerland: primary taxing right UK: secondary taxing right if UK (only) national domiciled within the previous 5 years[7]

118.2 Scope

Article 1 Swiss IHT DTA provides:

> This Convention shall apply:
>
> (a) to estates and inheritances where the deceased was domiciled, at the time of his death, in one or both of the Contracting States; and
>
> (b) to property comprised in a settlement made by a person who was domiciled, at the time the settlement was made, in one or both of the Contracting States.

118.3 Taxes covered

Article 2(1) Swiss IHT DTA provides:

> The existing taxes to which this Convention shall apply are:
>
> (a) in the UK, the inheritance tax, insofar as it applies to the estate

[6] Immovable property, business establishments and ships/aircraft.

[7] Avery Jones, "The New Inheritance Double Taxation Agreement with Switzerland" [1995] BTR 1.

> of a deceased person (hereinafter referred to as "UK tax");
>
> (b) in Switzerland, the cantonal and communal taxes imposed on estates and inheritances (hereinafter referred to as "Swiss tax").

Thus there is no relief for IHT on lifetime gifts or for 10-year/exit charges on trusts. There is relief for trusts conferring an estate interest in possession.

Article 2(2) Swiss IHT DTA extends the DTA to substantially similar taxes. The wording follows the OECD Model.[8]

118.4 Definitions

The DTA provides commonsense definitions of the following terms, which are not set out here: UK; Switzerland; Contracting State; Enterprise; Competent Authority; tax.

Article 3(2) Swiss IHT DTA gives terms not otherwise defined their domestic law meanings, following OECD Model wording, as it stood at the time of the DTA.[9]

118.4.1 *"National"*

Article 3(1)(g) Swiss IHT DTA provides:

> (g) the term "national" means:
>
> (i) in relation to the UK, any British citizen or any British subject not possessing the citizenship of any other Commonwealth country or territory, provided he has the right of abode in the UK and any legal person, partnership, association or other entity deriving its status as such from the law in force in the UK;
>
> (ii) in relation to Switzerland, any Swiss citizen and any legal person, partnership, association or other entity deriving its status as such from the law in force in Switzerland;

118.5 Treaty-domicile

Article 4 Swiss IHT DTA defines domicile for the purposes of the USA IHT DTA ("**treaty-domicile**").

118.5.1 *UK domicile under art 4(1)*

Article 4(1) Swiss IHT DTA provides:

[8] See 114.4 (IHT DTAs: Taxes covered).

[9] See 107.12 (Undefined treaty terms).

> For the purposes of this Convention, a deceased person was domiciled:
>
> (a) in the UK if
>
> [i] he was domiciled in the UK in accordance with the law of the UK or
>
> [ii] is treated as so domiciled for the purposes of a tax which is the subject of the Convention;[10]

I refer to this as **"UK domiciled under art 4(1)"**.

118.5.2 *Swiss domicile under art 4(1)*

Article 4(1) Swiss IHT DTA provides:

> For the purposes of this Convention, a deceased person was domiciled...
>
> (b) in Switzerland if he was domiciled or was resident in Switzerland in accordance with the law of Switzerland or if he was a Swiss national and Swiss civil law requires his succession to be ruled in Switzerland.

I refer to this as **"Swiss domiciled under art 4(1)"**.

This appears to mean that a person was domiciled in Switzerland if:

> [i] he was domiciled *in Switzerland in accordance with the law of Switzerland* or
>
> [ii] was resident in Switzerland in accordance with the law of Switzerland or
>
> [iii] if he was a Swiss national and Swiss civil law[11] requires his succession to be ruled in Switzerland.

That is, the phrase "and Swiss civil law requires his succession to be ruled in Switzerland" only governs [iii].

The definition of domiciled/resident in Switzerland in accordance with the law of Switzerland is crucial: this is a matter of Swiss law.[12]

[10] Para (a) is standard wording, discussed at 114.5 (Treaty-domicile).

[11] The 1993 Protocol provides: "The reference to Swiss civil law concerns chapter 6 of the loi fédérale sur le droit international privé [Federal Code on Private International Law] of 18th December 1987." An English translation is available on *https://www.hse.ru/data/2012/06/08/1252692468/SwissPIL%20%D0%B2%20%D1%80%D0%B5%D0%B4.%202007%20(%D0%B0%D0%BD%D0%B3%D0%BB.).pdf*

[12] See (1) Swiss Civil Code art. 22 -26 (domicile) An English translation is available on *https://www.admin.ch/opc/en/classified-compilation/19070042/index.html#a22)* (2) art.20 loi fédérale sur le droit international privé (Domicile, Residence, and Citizenship).

118.5.3 *Taxation by situs only*

Article 4(1) Swiss IHT DTA continues:

> However, a deceased person shall be deemed not to be domiciled in one of the States if that State imposes tax only by reference to property situated in that State.

This does not apply to the UK; it is relevant in Switzerland.

118.5.4 *Tie breaker*

Article 4(2) Swiss IHT DTA sets out a series of tie-breakers to deal with persons who under art 4(1) would be domiciled in both jurisdictions:

> Where by reason of the provisions of paragraph (1) of this Article a deceased person was domiciled in both States, then, subject to the provisions of the attached Protocol, his status shall be determined as follows:
>
> (a) he shall be deemed to have been domiciled in the State in which he had a permanent home available to him; if he had a permanent home available to him in both States, he shall be deemed to have been domiciled in the State with which his personal and economic relations were closer (centre of vital interests);
>
> (b) if the State in which he had his centre of vital interests cannot be determined, or if he did not have a permanent home available to him in either State, he shall be deemed to have been domiciled in the State in which he had an habitual abode;
>
> (c) if he had an habitual abode in both States or in neither of them, he shall be deemed to have been domiciled in the State of which he was a national;
>
> (d) if he was a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This is standard OECD Model wording.[13]

118.5.5 *Temporary employment*

The 1993 Protocol provides:

(3) OECD "Switzerland - Information on residency for tax purposes" *https://www.oecd.org/tax/automatic-exchange/crs-implementation-and-assistance/tax-residency/Switzerland-Residency.pdf*

[13] See 9.11 (Tie-breaker tests: Individuals).

> (1) With reference to Article 4:
> An individual
>
> [i] who was a national of one of the Contracting States without being a national of the other Contracting State and
>
> [ii] who was domiciled in the State of which he was a national immediately before coming to the other State
>
> shall not be domiciled in the other State for the purposes of this Convention if:
>
> (a) [i] he was temporarily present in that other State by reason only of his employment or
>
> [ii] was a spouse or other dependent of a person temporarily in that other State for such purpose; and
>
> (b) that individual had retained the domicile of the State of which he was a national; and
>
> (c) that individual had no intention of becoming a permanent resident of the other Contracting State.

This could help a Swiss national who is a long term employee in the UK as it could confer better treaty relief even after they become deemed UK domiciled, but that will not often arise. It could similarly hinder a UK national who is an employee in Switzerland as it could prevent them claiming relief.

Avery Jones explains:

> This is different from the equivalent provision in other treaties in that there is no time limit and it is restricted to employment. An unsatisfactory feature ... is that it is contained in a Protocol applying "with reference to article 4", and provisions of the treaty make a distinction between a person who is domiciled solely in one or in both states by virtue of article 4(1) of the treaty.[14] Where this provision applies the person may well be domiciled in both states under that article, but it is presumed that, as the effect of this provision is to give a single domicile, on a purposive construction this is to be treated as overriding the literal effect of article 4(1).[15]

118.5.6 *Types of domicile*

The Swiss IHT DTA distinguishes between:

(1) "A person domiciled by virtue of the provisions of paragraph (1) of

[14] Arts. 8(1)(a), 8(1)(1)(b).

[15] Avery Jones, "The New Inheritance Double Taxation Agreement with Switzerland" [1995] BTR 1.

Article 4 solely in one of the Contracting States". I call that "**solely UK/Swiss domiciled**".

(2) "A person domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States". I call that "**tie-breaker UK/Swiss domiciled**". Someone who is tie-breaker Swiss domiciled is UK domiciled under art 4(1) but treaty-domiciled in Switzerland because of the tie-breaker clause in art 4(2).

118.6 IHT exemptions

There are special rules for immovable property and permanent establishments (articles 5 and 6 discussed below) and ships/aircraft (article 7, not discussed here).

Subject to that, Article 8 Swiss IHT DTA provides various exemptions for individuals, which depend on domicile and situs.

118.6.1 *Situs rule*

The 1993 Protocol provides:

> (3) With reference to Article 8:
> The situs of any property dealt with in that Article shall be determined by the law of the UK in effect at the date of entry into force of this Convention.

Avery Jones explains:

> Given the importance given to situs it is surprising to find tucked away in the Protocol that this is to be determined by UK [sic] law[16] in force at the date of the entry into force of the treaty. Since Swiss Cantons tax only immovable property of those resident outside the Canton presumably there is no reason for Swiss law to have any situs rules, so they had to borrow the UK's and hide their embarrassment by putting it in the Protocol. If there is a conflict over whether property falls within the property taxable on a situs basis, immovable property, business establishments and ships and aircraft, this is determined by the state of non-treaty domicile in the same way as our other treaties.[17] This is likely to occur in relation to the question whether partnerships, trusts and

[16] Footnote original: Since English and Scots law could give a different answer, for example in relation to a specialty debt, the concept of which is unknown in Scotland, it is presumed that situs would be in practice be determined by the law of the applicable part of the UK. See 102.18.2 (Situs in Scots law).

[17] Footnote original: Art. 10(1).

unadministered estates are transparent.[18]

118.7 Solely Swiss domicile

118.7.1 *Swiss/UK property*

Article 8 Swiss IHT DTA provides:

> (1) Subject to the following provisions of this Convention:
> (a) property
> [i] not dealt with in Articles 5, 6 and 7
> [ii] which is situated in either Contracting State and
> [iii] forms part of the estate of a person ... (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States ...
> shall, subject to paragraph (2) of this Article, be taxable only in that latter Contracting State;

To this rule there are four exceptions. Firstly articles 5, 6, 7 (land, PEs, ships/ aircraft). Secondly, shares in UK incorporated companies, as art 8(2) provides:

> Shares in a company incorporated in the UK which form part of the estate of a person domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in Switzerland at the time of his death may also be taxed in the UK.

These are quite large exceptions, but this treaty exemption provides relief for:

(1) Other UK situate property: eg UK situate loans, debentures, chattels, bank accounts

(2) Sch A1 (de-excluded) property[19]

This could be particularly useful for UK situate chattels, residence-companies, and relevant (de-excluded) loans (in short, a loan to buy a UK residence).

118.7.2 *Non-UK/Non-Swiss property*

I refer to property outside the UK and Switzerland as "**third-country property**".

[18] Avery Jones, "The New Inheritance Double Taxation Agreement with Switzerland" [1995] BTR 1.

[19] See 82.2 (De-exclusion of sch A1 property) and 82.18 (DTA override).

Article 8 Swiss IHT DTA provides

> (1) Subject to the following provisions of this Convention...
> (b) property not dealt with in Articles 5, 6 and 7 which is not situated in either Contracting State and forms part of the estate of a person:
> (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States shall be taxable only in that Contracting State;

Before 2017, art.8(1)(b)(i) is not relevant for IHT since non UK situate property of a solely Swiss domiciliary was excluded property.[20] But now the rule is be important for sch A1 property which is de-excluded under the IHT residential-property code.

118.8 Tie-breaker Swiss domicile

118.8.1 *Swiss property*

Article 8(1) Swiss IHT DTA provides:

> (1) Subject to the following provisions of this Convention:
> (a) property
> [i] not dealt with in Articles 5, 6 and 7
> [ii] which is situated in either Contracting State and
> [iii] forms part of the estate of a person ... (ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States
>
> shall, subject to paragraph (3) of this Article, be taxable only in the Contracting State in which it is situated;

Thus in principle Swiss situate property of a tie-breaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is actually UK domiciled or IHT deemed domiciled). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(3) provides:

> Any property which is situated in Switzerland and which would be taxable only in Switzerland under paragraph (1)(a)(ii) of this Article may

[20] Except residence-value property, see 82.2 (De-exclusion of sch A1 property) and 82.18 (DTA override).

> also be taxed in the UK if the deceased was:
>
> (a) by virtue of the provisions of paragraph (2) of Article 4 domiciled in the UK at the time of his death; or
>
> (b) by virtue of those provisions domiciled in Switzerland at the time of his death but:
>
> (i) had been domiciled [ie treaty-domiciled] in the UK at any time within the five years preceding his death; and
>
> (ii) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national[21] cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is actually UK domiciled or IHT deemed domiciled could in principle do so.

118.8.2 *Non-UK/Non-Swiss property*

I refer to property outside the UK and Switzerland as "**third-country property**".

Article 8 Swiss IHT DTA provides

> (1) Subject to the following provisions of this Convention...
>
> (b) property not dealt with in Articles 5, 6 and 7 which is not situated in either Contracting State and forms part of the estate of a person ...
>
> (ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States shall, subject to paragraph (4) of this Article, be taxable only in the Contracting State in which, under paragraph (2) of Article 4, the deceased was domiciled at the time of his death.

In principle third-country property of a tie-breaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is actually UK domiciled or deemed domiciled). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(4) Swiss IHT DTA provides a rule equivalent to article 8(3):

[21] Unless also a Swiss national, ie a dual national.

> Any property which is not situated in either Contracting State and which would be taxable only in Switzerland under paragraph (1)(b)(ii) of this Article may also be taxed in the UK if the deceased:
> (a) had been domiciled [ie treaty-domiciled] in the UK at any time within the five years preceding his death; and
> (b) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national[22] cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is actually UK domiciled or deemed domiciled could in principle do so.

118.9 IHT spouse exemption extended

Under domestic IHT law, the usual IHT spouse exemption may be restricted when the transferor is UK domiciled and the spouse is foreign domiciled.[23] Article 10(2) Swiss IHT DTA restricts this restriction:

> Property which passes to the spouse from a deceased person who was domiciled in or a national of Switzerland and which may be taxed in the UK shall, where:
> (a) the spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
> (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention,
> be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

Civil partners are not mentioned (as the treaty was made before the introduction of civil partnerships). One might construe spouse widely, to include "civil partner", particularly if Swiss tax law treats civil partners like spouses.

118.10 Immovable property

Article 5 (more or less) follows the OECD IHT Model.

[22] Unless also a Swiss national, ie a dual national.

[23] See 93.2 (Restricted IHT spouse exemption).

Article 5(1) Swiss IHT DTA provides:

> Immovable property which forms part of the estate of a person domiciled in a Contracting State and which is situated in the other Contracting State may be taxed in that other State.

Article 5(2) Swiss IHT DTA defines "immovable property" in (more or less) OECD Model form:[24]

> [a] The term "immovable property" shall have the meaning which it has under the law of the Contracting State in which the property in question is situated provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property.
> [b] The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, an interest in the proceeds of sale of land which is held on trust for sale, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources;
> [c] ships and aircraft shall not be regarded as immovable property.

Article 5(3) Swiss IHT DTA deals with the interaction of articles 5 (immovable property) and 6 (business property):

> The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of professional services or other activities of an independent character.

Article 5 (more or less) follows the OECD IHT Model.

118.11 Business property

Article 6(1) Swiss IHT DTA provides:

> Except for assets referred to in Articles 5 and 7 and in paragraph (2) of Article 8, movable property of an enterprise which forms part of the estate of a person domiciled in a Contracting State which is the business property of a permanent establishment situated in the other Contracting State, may be taxed in that other State.

[24] See 24.7.1 ("Immovable property").

This (more or less) follows the OECD IHT Model.

I do not set out the lengthy provisions relating to permanent establishment, since this will rarely arise. They broadly follow the OECD IT/CG Model.

119.1 USA IHT treaty

This chapter considers the IHT treaty with the USA, which I call the "USA IHT DTA".[1]

[1] *http://uniset.ca/misc/us-uk_esttax.html*
For some reason DTAs do not have short titles. The full title is: "the Convention between the Government of the USA and the Government of the UK for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on estates of deceased persons and on gifts"; SI 1979/1454

119.1.1 *US/OECD Models compared*

US Treasury say:[2]

> **Question 1.** Explain the origin and development of the model estate and gift tax convention published by the Department of Treasury in 1977.
> **Answer.** The U.S. Treasury Department released its "model" estate and gift tax treaty on March 16, 1977 ... The general principle underlying the model is to grant to the country of domicile the right to tax the worldwide estate or gifts of a decedent or donor, with a credit for tax paid to the other State with respect to real property and business assets located therein.
> The emphasis on domiciliary-basis taxation also explains the origin of the model. All U.S. estate and gift tax treaties negotiated between 1946 and 1956 contain a comprehensive set of situs rules. Double taxation is eliminated by awarding the situs state the primary right to tax a given type of property. In 1966, however, the OECD published a model state tax convention (Draft Double Taxation Convention on Estates and Inheritances). The OECD model, which the United States helped develop, provides for domiciliary-basis taxation. ... Thus, the U.S. model estate and gift tax treaty reflects both the internationally-accepted concepts in the OECD model and our current treaty position.

119.1.2 *US Model & UK/USA DTA compared*

US Treasury say:[3]

> **Question 2.** Does the U.S.-U.K. Estate and Gift Tax Treaty differ from the U.S. model treaty, and if so, please explain the policy reasons for the difference.
> **Answer.** The U.S.-U.K. Estate and Gift Tax Treaty is similar, but not identical, to the model. It is similar in that both follow the principle of domiciliary-basis taxation. That is, the country of domicile may tax the worldwide estate or gifts of a decedent or donor. Immovable property and certain business assets are taxable in the Contracting State where situated.

[3] Written Responses by Treasury to Questions by the Committee Staff (1979) *https://uniset.ca/misc/us-uk1980.html*

> The U.S.-U.K. treaty is different from the model in that it includes the tax on generation-skipping transfers, imposed by the Tax Reform Act of 1976 [Pub. L. 94-455, 1976-3 C.B. (Vol. 1) 1]. This is purely a matter of timing. Although the model was not published until 1977, it was developed early in 1976. Consequently, it does not include the estate and gift tax modifications in the Tax Reform Act of 1976, which was signed in October of that year.
>
> Unlike the model, the U.S.-U.K. treaty does not provide for a reciprocal exemption of $30,000 for property that is taxable under the treaty on a situs basis. This part of the model refers to pre-Reform Act of 1976 law; the $30,000 exemption was converted to a $3,600 credit by the 1976 changes. This provision is not in the treaty because the U.K.'s capital transfer tax does not apply to the first £25,000 (roughly $50,000) of property transferred.

US Treasury have also published a technical explanation of the treaty.[4]

119.2 Scope

Article 1 USA IHT DTA provides:

> This Convention shall apply to any person who is within the scope of a tax which is the subject of this Convention.

Thus the DTA applies to trustees as well as to individuals, even if the trustees are not themselves US treaty-domiciled.

119.3 Taxes covered

Article 2(1) USA IHT DTA provides:

> The existing taxes to which this Convention shall apply are:
> (a) in the US: the Federal gift tax and the Federal estate tax, including the tax on generation-skipping transfers; and
> (b) in the UK: the capital transfer tax [now IHT[5]].

The DTA does not apply to US state taxes (though I do not know if there are any). In this respect the IHT DTA is similar to the IT/CGT DTA.[6]

Article 2(2) USA IHT DTA extends the DTA to substantially similar taxes. The wording follows the OECD model.[7]

[4] *https://uniset.ca/misc/us-uk1980.html*

[5] See 74.1.1 (“CTT” now refers to IHT).

[6] See 107.13.3 (Subdivisions/local authorities).

[7] See 114.4 (IHT DTAs: Taxes covered).

119.3.1 *"Tax"*

Article 3(1)(f) USA IHT DTA provides:

> the term "tax" means:
> (i) the Federal gift tax or the Federal estate tax, including the tax on generation-skipping transfers, imposed in the US, or
> (ii) the capital transfer tax [now IHT] imposed in the UK, or
> (iii) any other tax imposed by a Contracting State to which this Convention applies by virtue of the provisions of para (2) of Article 2 [substantially similar taxes], as the context requires.

119.4 Definitions

The USA IHT DTA provides commonsense definitions of the following terms, which are not discussed here: US; UK; Competent Authority; Contracting State.

Article 3(2) USA IHT DTA gives terms not otherwise defined their domestic law meanings, following OECD Model wording as it stood at the time of the DTA.[8]

119.4.1 *"National"*

Article 3(1)(e) USA IHT DTA provides:

> the term "nationals" means:
> (i) in relation to the US, US citizens, and
> (ii) in relation to the UK
> [A] any citizen of the UK and Colonies, or
> [B] any British subject not possessing that citizenship or the citizenship of any other Commonwealth country or territory,
> provided in either case he had the right of abode in the UK at the time of the death or a transfer.

119.4.2 *"Decedent"*

The USA IHT DTA uses the term "decedent" which is an Americanism for "deceased".

119.5 Treaty-domicile

Article 4 defines domicile for the purposes of the USA IHT DTA

[8] See 107.12 (Undefined treaty terms).

("**treaty-domicile**").

119.5.1 *US domicile under art 4(1)*

Article 4(1) USA IHT DTA provides:

> For the purposes of this Convention an individual was domiciled:
>
> (a) in the US:
>
> [i] if he was a resident (domiciliary) thereof or
>
> [ii] if he was a national thereof and had been a resident (domiciliary) thereof at any time during the preceding three years

I refer to this as **"US domiciled under art 4(1)"**.

The definition of "resident (domiciliary)" is crucial: this is a matter of USA law. It appears that the term "resident" here has a meaning broadly similar to "domiciled" in English law (there are some differences). The word in brackets (domiciliary) is intended as a synonym, or explanation, of "resident", in order to avoid confusion - though with perhaps the opposite effect.[9] It may aid clarity to write the word "resident" in this sense with scare quotation marks.

US Treasury say:[10]

> **Question 3.** How does the U.S.-U.K. treaty define domicile and how, or why, was this definition selected?
>
> **Answer.** ... The Convention uses the term "resident (domiciliary)" because U.S. domestic law equates the term "resident" with the term "domiciliary."
>
> The three-year rule simply parallels a provision in the U.K. capital transfer tax that a U.K. domiciliary will be deemed to be domiciled in the United Kingdom for a period of three years after a change of domicile is actually made. An individual is domiciled in the United Kingdom if he is (a) a U.K. domiciliary under general principles of U.K. law, or (b) treated as a U.K. domiciliary for purposes of the capital transfer tax.

US tax statutes do not define "resident" for estate and gift taxes (as they do for income and other taxes), but US Treasury Regulation 20.0-1(b)

[9] I am grateful to Ian Watson of 3 Stone Buildings, Lincoln's Inn for his help on this point.

[10] Written Responses by Treasury to Questions by the Committee Staff (1979) *https://uniset.ca/misc/us-uk1980.html*

states so far as relevant:

> A "resident" decedent is a decedent who, at the time of his death, had his domicile in the United States ... A person acquires a domicile in a place by living there, for even a brief period of time, with no definite present intention of later removing therefrom. Residence without the requisite intention to remain indefinitely will not suffice to constitute domicile, nor will intention to change domicile effect such a change unless accompanied by actual removal.[11]

I understand that a green card holder is not a "resident" of the US, for US estate tax purposes, unless domiciled in the relevant sense.

119.5.2 *UK domicile under art 4(1)*

Article 4(1) USA IHT DTA provides:

> For the purposes of this Convention an individual was domiciled: ...
> (b) in the UK:
> [i] if he was domiciled in the UK in accordance with the law of the UK
> [ii] or is treated as so domiciled for the purpose of a tax which is the subject of this Convention.[12]

I refer to this as **"UK domiciled under art 4(1)"**.

119.5.3 *Tie-breakers*

It is possible to be treaty domiciled under art 4(1) in both States (eg a US "resident" who is also deemed UK domiciled). So there are a series of tie-breakers to deal with this. It is helpful to read art 4(2)(3) side by side:

Art 4(2): UK national	**Art 4(3): US national**
Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and	Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and
(a) was a national of the UK but not of the US, and (b) had not been resident in the US	(a) was a national of the US but not of the UK, and (b) had not been resident in the UK

[11] *https://www.govinfo.gov/content/pkg/CFR-2008-title26-vol14/pdf/CFR-2008-title26-vol14-sec20-0-1.pdf*

[12] Para (a) is standard wording, discussed at 114.5 (Treaty-domicile).

for Federal income tax purposes in seven or more of the ten taxable years ending with the year in which that time falls,	in seven or more of the ten income tax years of assessment ending with the year in which that time falls,
he shall be deemed to be domiciled in the UK at that time.	he shall be deemed to be domiciled in the US at that time
	For the purposes of this paragraph, the question of whether a person was so resident shall be determined as for income tax purposes but without regard to any dwelling-house available to him in the UK for his use.

The last sentence of art 4(3) is based on wording formerly in the IHT deemed domicile rule.[13] It is no longer appropriate, following the introduction of the statutory residence test, but in practice the point will only rarely arise.

US Treasury say:[14]

> **Question 3.** How does the U.S.-U.K. treaty define domicile and how, or why, was this definition selected?
> **Answer.** ... Particularly important in this regard is the provision that a U.S. citizen, who is considered under the Convention to be domiciled in both the United Kingdom and the United States, shall be deemed to be domiciled in the United States if he had not been resident in the United Kingdom for at least 7 of the 10 years. This rule is based on the concept that a Contracting State should not tax the estate or other transfers of an individual on a domiciliary basis if the individual has not been present in that State for a significant period of time.
>
> **Question 5.** Why was the 7 out of 10 year rule used for the determination of domicile under the treaty?
> **Answer.** A basic concept of United States tax policy in this field is that a Contracting State should not tax the estate of other transfers of an individual on a domiciliary basis if the individual has not been present in that State for a significant period of time. Conversely, where an

[13] See 5.6.3 ("Residence" for 15-year rule).

[14] Written Responses by Treasury to Questions by the Committee Staff (1979) *https://uniset.ca/misc/us-uk1980.html*

> individual has been present for a significant period of time we believe that it is reasonable to permit the State to tax the individual's accumulation of wealth. The 7 out of 10 year rule represents, in our judgment, a sufficiently long period of presence to justify taxation and has been our treaty policy for a long time. ...
> It is also important to point out that a U.S. citizen will not automatically be deemed to be domiciled in the United Kingdom if he has been resident there for, say, 8 out of 10 years. In that case the determination of a single treaty domicile is settled by the tie-breaking rules. These are based on the concepts of permanent home, center of vital interests, habitual abode, nationality, and mutual agreement. Thus, it is possible that an individual could be resident in the United Kingdom for more than 7 years and still be treated as a U.S. domiciliary, if, for example, he maintained a permanent home in the United States.

Where these tie-breakers fail to break the tie, we turn to Art. 4(4):

> Where by reason of the provisions of para (1) an individual was domiciled in both Contracting States, then, subject to the provisions of paras (2) and (3), his status shall be determined as follows:
>
> (a) the individual shall be deemed to be domiciled in the Contracting State in which he had a permanent home available to him. If he had a permanent home available to him in both Contracting States, or in neither Contracting State, he shall be deemed to be domiciled in the Contracting State with which his personal and economic relations were closest (centre of vital interests);
> (b) if the Contracting State in which the individual's centre of vital interests was located cannot be determined, he shall be deemed to be domiciled in the Contracting State in which he had an habitual abode;
> (c) if the individual had an habitual abode in both Contracting States or in neither of them, he shall be deemed to be domiciled in the Contracting State of which he was a national; and
> (d) if the individual was a national of both Contracting States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

These tie-breaker rules are essentially those in the OECD and U.S. model treaties.[15]

119.5.4 *Resident of US possession*

Article 4(5) USA IHT DTA relates to nationality and treaty-domicile:

> An individual who was a resident (domiciliary) of a possession of the US

[15] See 9.11 (Tie-breaker tests: Individuals).

and who became a citizen of the US solely by reason of his

(a) being a citizen of such possession, or

(b) birth or residence within such possession,

shall be considered as neither domiciled in nor a national of the US for the purposes of this Convention.

US Revenue Ruling 109[16] lists the following as possessions of the United States: American Samoa, Puerto Rico, the Northern Mariana Islands, the United States Virgin Islands, Guam, and some (more or less) uninhabited islands.[17]

119.6 IHT exemptions: Individuals

Article 5 USA IHT DTA provides two exemptions for individuals. Article 5(1) provides:

(a) [i] Subject to the provisions of Articles 6 (Immovable Property (Real Property)) and 7 (Business Property of a Permanent Establishment and Assets Pertaining to a Fixed Base Used for the Performance of Independent Personal Services) and the following paragraphs of this Article,

[ii] if the decedent or transferor was domiciled in one of the Contracting States at the time of the death or transfer, property shall not be taxable in the other State.

(b) Sub-para (a) shall not apply if at the time of the death or transfer the decedent or transferor was a national of that other State.

This is easier to follow if one specifies which State is which:

UK treaty-domicile, US national	**US treaty-domicile, UK national**
(a) Subject to [Art 6, 7, and this Article],	(a) Subject to [Art 6, 7, and this Article],
if the decedent or transferor was domiciled in one of the Contracting States [the UK] at the time of the death or transfer, property shall not be taxable in the other State [the US].	if the decedent or transferor was domiciled in one of the Contracting States [the US] at the time of the death or transfer, property shall not be taxable in the other State [the UK].

[16] *https://www.irs.gov/irb/2003-42_IRB*

[17] Baker Island, Howland Island, Jarvis Island, Johnston Island, Kingman Reef, Midway Islands, Wake Islands.

(b) Sub-para (a) shall not apply if at the time of the death or transfer the decedent or transferor was a national of that other State [the US].	(b) Sub-para (a) shall not apply if at the time of the death or transfer the decedent or transferor was a national of that other State [the UK].

Para (b) is like the Savings Clause in the IT/CGT DTA,[18] and as a result, the relief is quite restricted. A US national does not get relief from US estate tax, and a UK national does not get relief from UK IHT. That is, to qualify for IHT exemption under Art. 5(1) the individual must be:

(1) treaty-domiciled in the USA and
(2) not a UK national.

In appropriate cases, UK nationals who are treaty-domiciled in the US may wish to consider renouncing UK citizenship, in order to qualify for this IHT exemption.

Article 5(2) USA IHT DTA provides:

> Subject to the provisions of the said Articles 6 and 7, if at the time of the death or transfer the decedent or transferor
> [a] was domiciled in neither Contracting State and
> [b] was a national of one Contracting State (but not of both),
> property which is taxable in the Contracting State of which he was a national shall not be taxable in the other Contracting State.

Can this confer IHT exemption? In order to need and qualify for IHT exemption under art. 5(2):

(1) The individual must be:
    (a) treaty-domiciled in neither state (so in particular not UK domiciled or deemed domiciled) and
    (b) a US national and not a UK national
(2) Property must be taxable in the UK (or no relief is needed) so it must be UK situate.
(3) The property must be taxable in the USA.

This is just possible. Condition (1) is possible because a US national is not necessarily treaty-domiciled in the USA. If such an individual held UK situate property, it would be exempt from IHT under Art. 5(2) provided it was taxable in the USA. In practice though this will be rare.

[18] See 109.5.2 (The Savings Clauses).

These two exemptions applies to charges on death and on lifetime gifts. The exemptions apply even to UK situate property (so long as the property is not land or a permanent establishment).

119.7 IHT exemptions: Trusts

Article 5(4) USA IHT DTA provides:

> [a] Paras (1) and (2) shall not apply in the UK to property comprised in a settlement;
>
> [b] but, subject to the provisions of the said Articles 6[19] and 7[20], tax shall not be imposed in the UK on such property if at the time when the settlement was made the settlor was domiciled in the US and was not a national of the UK.

Article 5(4)[b] provides exemption from:
(1) IHT 10 year and exit charges
(2) The charge on the death of an individual with an estate IIP
(3) GWR lifetime and death charges

To qualify for IHT exemption under Art. 5(4) the settlor must at the relevant time be:
(1) treaty-domiciled in the USA and
(2) not a UK national

The exemption applies even to UK situate assets (so long as the asset is not land or a permanent establishment).

It is an interesting question whether a common form grantor trust is a settlement for this purpose: it is (I think) a settlement for US purposes but not within the IHT definition.[21] It is also an interesting question whether or to what extent UK rules determining when a settlement is made (and who is the settlor) apply for the purposes of this relief. Subject to context, UK courts should apply the UK rules. But the best interpretation is that which gives effect to the object of avoiding double taxation without giving rise to double non-taxation.

119.8 Requirement to pay US tax

Article 5(5) USA IHT DTA provides:

[19] See 119.10 (Immovable property).

[20] See 119.11 (Business property).

[21] See 90.10 (American revocable trusts (grantor trust).

> If by reason of the preceding paragraphs of this Article
> [a] any property would be taxable only in one Contracting State and
> [b] tax, though chargeable, is not paid (otherwise than as a result of a specific exemption, deduction, exclusion, credit or allowance) in that State,
>
> tax may be imposed by reference to that property in the other Contracting State notwithstanding those paragraphs.

The IHT Manual provides:

> **27177 Certification of disclosure and tax enforcement procedure with the USA** [Dec 2022]
>
> Before we give up our right to tax assets under Article 5(1) of the double taxation convention (DTC) with the USA, we need the US authorities to certify that:
>
> - the assets have been disclosed to them and
> - any tax due has been paid or will be enforced.
>
> This is because Article 5(5) of the DTC allows us to tax the property if the USA is unable to enforce its right to tax. HMRC needs to give a similar certification if Article 5(1) of the DTC requires the US authorities to give up their right to tax property.
>
> Until we have a form 742[22] from the US authorities certifying that the property has been disclosed and that tax has been paid or will be enforced, you should not close any case where:
>
> Article 5(1) operates to exclude some UK property from the charge to IHT, and
>
> the case would be taxpaying without that exclusion.
>
> You should explain this requirement to the taxpayer and send them two prints of Form 742. You should draw their attention to the paragraphs of the form that they must complete. Where the UK is giving up its taxing rights under the convention, only para 1 applies and paras 2 to 7 are not appropriate. You can close your case when you have received a form that is correctly completed and certified. Refer the case to Technical if there are any errors or any problems arise.
>
> Where the USA gives up the right to tax property under Article 5(1), the US authorities will send two copies of US form 706 CE to us to certify.[23] Once you have checked the forms (you must not mark them in any way) you should send them to Technical together with the file and a note of

[22] Author's footnote: This is not a current form, and I wonder if it is in fact a typo: I would be grateful to any reader who can comment.

[23] Author's footnote: see *https://www.irs.gov/uac/form-706-ce-certificate-of-payment-of-foreign-death-tax*

any errors or omissions. Technical will then issue the appropriate certificate.

119.9 Dual-situate asset

Article 5(6) USA IHT DTA provides:

> If at the time of the death or transfer
> [a] the decedent or transferor was domiciled in neither Contracting State and
> [b] each State would regard any property as situated in its territory and
> [c] in consequence tax would be imposed in both States,
> the competent authorities of the Contracting States shall determine the situs of the property by mutual agreement.

This does not apply if the individual is treaty-domiciled in one or other contracting state, as then IHT exemption or USA tax exemption applies.

It is a different technique from dealing with the problem of dual-situate assets from that adopted in the estate duty DTAs, which set out their own treaty-situs rules (as did the former USA estate duty treaty).

119.10 Immovable property

Article 6 (more or less) follows the OECD IHT Models. Article 6(1) USA IHT DTA provides:

> Immovable property (real property) may be taxed in the Contracting State in which such property is situated.

Article 6(2) USA IHT DTA defines "immovable property" in (more or less) OECD Model form:[24]

> [a] The term "immovable property" shall be defined in accordance with the law of the Contracting State in which the property in question is situated,
> [b] provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property.
> [c] The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural

[24] See 24.7.1 ("Immovable property").

> resources;
> [d] ships, boats, and aircraft shall not be regarded as immovable property.

Article 6(3) USA IHT DTA deals with the interaction of articles 6 (immovable property) and 7 (business property):

> The provisions of paras (1) and (2) shall also apply
> [a] to immovable property of an enterprise and
> [b] to immovable property used for the performance of independent personal services.

119.11 Business property

Article 7(1) USA IHT DTA provides:

> Except for assets referred to in Article 6 (Immovable Property (Real Property)) assets forming part of the business property of a permanent establishment of an enterprise[25] may be taxed in the Contracting State in which the permanent establishment is situated.

Article 7(2) defines "permanent establishment" in (more or less) OECD Model form; this is not set out here, since it will rarely arise.

Article 7(3) provides:

> Except for assets described in Article 6 (immovable property (real property)), assets pertaining to a fixed base used for the performance of independent personal services may be taxed in the Contracting State in which the fixed base is situated.

119.12 IHT spouse exemption extended

Under domestic IHT law, the IHT spouse exemption may be restricted when the transferor is UK domiciled and the spouse is foreign domiciled.[26] Article 8 restricts this restriction, ie it extends the spouse exemption. There are separate provisions for absolute transfers and for transfers to a trust under which the spouse has an IIP. There is no relief for the situation where H has an interest in possession and on H's death W acquires an interest in possession (where the IHT spouse exemption is sometimes available under s.49D IHTA).

[25] Article 7(1) USA IHT DTA provides the definition: "the term "enterprise" means an industrial or commercial undertaking".

[26] See 93.2 (Restricted IHT spouse exemption).

119.12.1 *Absolute inter-spouse transfer*

Article 8(3) USA IHT DTA provides:

> Property which passes to the spouse from a decedent or transferor who was domiciled in or a national of the US and which may be taxed in the UK shall, where
> (a) the transferor's spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
> (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention,
> be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

In order for this to be needed and to apply the following conditions must be satisfied:

The transferor is:

(a) Treaty-domiciled in the US or a US national.
(b) UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).

The transferee (spouse) is:

(a) not treaty-domiciled in the UK.
(b) not UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).

This relief applies on death and on lifetime transfers.

119.12.2 *"Spouse" in USA IHT DTA*

For IHT purposes, the term "spouse" has its UK law meaning.[27] Strictly

[27] See 107.12 (Undefined treaty terms).
A person who has entered into a same-sex marriage may be regarded as a spouse for US tax purposes, see *Obergefell v Hodges*. IRS Revenue Ruling 2013-17 states: "For Federal tax purposes, the term "marriage" does not include registered domestic partnerships, civil unions, or other similar formal relationships recognized under state law that are not denominated as a marriage under that state's law, and the terms "spouse," "husband and wife," "husband," and "wife" do not include individuals who have entered into such a formal relationship. This conclusion applies regardless of whether individuals who have entered into such relationships are of the opposite sex or the same sex."

a civil partner is not a spouse, so this is one of the rare occasions where there is a difference between the taxation of spouses and civil partners; but the introduction of same-sex marriages reduces the significance of that.[28] It is arguable that the word "spouse" here should be construed purposively, to include civil partners.

119.12.3 *Settlement with spouse IIP*

Article 8(4) USA IHT DTA provides:

> (a) Property which on the death of a decedent domiciled in the UK became comprised in a settlement shall,
> [i] if the personal representatives and the trustees of every settlement in which the decedent had an interest in possession immediately before death so elect
> [ii] and subject to sub-para (b),
> be exempt from tax in the UK to the extent of 50 per cent of the value transferred (calculated as in para (3)) on the death of the decedent if:
> (i) under the settlement, the spouse of the decedent was entitled to an immediate interest in possession,
> (ii) the spouse was domiciled in or a national of the US,
> (iii) the transfer would have been wholly exempt had the spouse been domiciled in the UK, and
> (iv) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention.
>
> (b) Where the spouse of the decedent becomes absolutely and indefeasibly entitled to any of the settled property at any time after the decedent's death, the election shall, as regards that property, be deemed never to have been made and tax shall be payable as if on the death such property had been given to the spouse absolutely and indefeasibly.

In order for this to be needed and to apply the following conditions must be satisfied:
The transferor is:
(a) Treaty-domiciled in the UK.
(b) UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

[28] See App. 3.2 ("Spouse").

The transferee (spouse) is:

(a) treaty-domiciled in the US or a national of the US.

(b) not UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

In addition:

(1) An election is required.

(2) The spouse must be entitled to an immediate IIP (this probably rules out relying on s.144 IHTA (discretionary will trusts)).

(3) This relief only applies on the death of the transferor.

119.13 Non-discrimination

Article 10(1)(a) USA IHT DTA provides:

> Subject to the provisions of sub-para (b), nationals of a Contracting State shall not be subjected in the other State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances are or may be subjected.

This broadly follows OECD IHT Models.

It would extend IHT agricultural property relief to USA agricultural property, which could be relevant to companies holding agricultural land, but the point will not often arise.

Article 10 continues:

> (2) The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other State than the taxation levied on enterprises of that other State carrying on the same activities.
>
> (3) Nothing contained in this Article shall be construed as obliging either Contracting State to grant to individuals not domiciled in that Contracting State any personal allowances, reliefs and reductions for taxation purposes which are granted to individuals so domiciled.
>
> (4) Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected.
>
> (5) The provisions of this Article shall apply to taxes which are the subject of this Convention.

CHAPTER ONE HUNDRED AND TWENTY

CREDIT FOR FOREIGN IHT

120.1 Credit for foreign IHT
120.2 Unilateral IHT credit
120.3 Requirement to pay foreign IHT
120.4 Use of foreign IHT credit
120.5 Amount of credit
120.5.1 Situs in overseas territory
120.5.2 Situs in 3rd country/dual situate
120.5.3 Tax in more than 1 state
120.5.4 Interaction of s.159(2)(3)
120.5.5 Unilateral/DTA credit: Interaction
120.5.6 Canada estate duty: Concession
120.6 Planning
120.7 France/Italy IHT credit
120.8 USA IHT credit

Cross references

The following topics are considered elsewhere:
80.17 (Deduction for foreign taxes) (as opposed to credit)
80.17.5 (Foreign tax on UK shares)
114.8 (Nil-rate band and DTAs)

120.1 Credit for foreign IHT

"**Foreign IHT credit relief**" arises where foreign tax is set against UK IHT. This may be:

(1) "**DTA IHT credit**" where a DTA confers a credit or
(2) "**Unilateral IHT credit**" where UK tax law (not a DTA) confers a credit

In this chapter I consider unilateral IHT credit, the four estate duty/IHT DTAs and the USA IHT DTA. I hope to deal with other treaties in future editions.

120.2 Unilateral IHT credit

Unilateral IHT credit is important as the UK does not have many IHT DTAs.

Section 159(1) IHTA provides:

> Where the Board are satisfied that in any territory outside the UK (an "overseas territory") any amount of tax imposed by reason of any

> disposition or other event is attributable to the value of any property, then, if—
>
> (a) that tax is
>
> [i] of a character similar to that of capital transfer tax[1] or
>
> [ii] is chargeable on or by reference to death or gifts inter vivos, and
>
> (b) any capital transfer tax chargeable by reference to the same disposition or other event is also attributable to the value of that property,
>
> they shall allow a credit in respect of that amount ("the overseas tax") against that capital transfer tax in accordance with the following provisions.

Statute calls this "unilateral relief" but I prefer the term "**unilateral foreign IHT credit**" (or foreign IHT credit relief) which seems clearer. I refer to the foreign tax (which statute calls "the overseas tax" as "**foreign IHT**".

Unilateral relief is based on the international understanding that the state where an asset is located has the primary right of taxation, and the state whose claim to tax depends on a personal nexus (residence or, as in the UK, domicile) should provide unilateral relief from double taxation.

The IHT Manual provides:

> **IHTM27185 Introduction** [May 2020]
>
> ... Under IHTA84/S159, credit can be allowed on death and also in respect of lifetime dispositions where some type of gift tax is charged in the foreign country. The basic conditions to be satisfied in connection with a lifetime or death transfer are:
>
> - that both Inheritance Tax (IHT) and overseas tax must be chargeable by reference to the same event and attributable to the value of the same property, and
> - that the foreign tax is similar in character to IHT.
>
> In cases of doubt, you must ask for advice from Technical.

120.3 Requirement to pay foreign IHT

The requirement that the foreign IHT must actually be paid is slipped into the definition of "tax imposed". Section 159(6) IHTA provides:

> In this section references to tax imposed in an overseas territory are

[1] References to CTT include IHT: s.100(1)(b) FA 1986.

> references to tax chargeable under the law of that territory and paid by the person liable to pay it.

The IHT Manual provides:

> **IHTM27185. Introduction** [May 2020]
> ... Before the relief can be finalised, the taxpayer or agent must produce evidence of payment of the foreign tax. This must be in the form of the assessment of foreign tax (or other document showing details of the property charged) and the official receipt.
> Once you decide the amount of relief available this should be entered in the 'reliefs against tax' box in the appropriate COMPASS screen. If necessary, you must apportion the relief between the instalment and non-instalment option property assessments. (See IHTM31189)

120.4 Use of foreign IHT credit

Credit is only set against "that capital transfer tax" ie IHT attributable to the same property as is subject to the foreign IHT.
The IHT Manual provides:

> **IHTM27185. Introduction** [May 2020]
> ... the relief cannot exceed the amount of Inheritance Tax (IHT) charged with respect to the particular item of property.
> For these purposes, the IHT attributable to any asset that is wholly exempt from IHT is nil. Where the item is partly exempt, any IHT charged will be attributed to the chargeable part.
> Where Quick Succession Relief (IHTM22041) is allowed, the amount of IHT attributable to the property is the net amount after allowing the relief.

120.5 Amount of credit

The rules determining the amount of IHT credit differ depending on
(1) situs of property under UK law and
(2) situs of property under the foreign law

The IHT Manual provides:

> **IHTM27185. Introduction** [May 2020]
> ... Because of the terms of s.159 (2), (3) and (4) IHTA 1984 you will need to consider the situs (IHTM27071) of property according to UK law and, possibly, foreign law when allowing a credit for foreign tax. You must raise any questions to establish the situs as soon as it seems likely that a s.159 IHTA credit will be claimed.

... The amount of the credit allowed under IHTA84/S159 is the Sterling equivalent of the foreign tax paid (converted using the exchange rate on the date of payment) so far as that tax is attributable to the foreign property on which IHT has been paid. Any part of the sum paid to the foreign Revenue authorities representing interest or penalties should be excluded. So should any part of the foreign tax that is attributable to income accruing since the date of the transfer. ...Shares and Assets Valuation (Foreign) will provide the exchange rate...

IHTM27186 Procedure with non-convention countries: which provision apply? [May 2020]

To work out whether relief is due and which provisions it is due under you will need to consider the following questions:

Is the property situated in the UK under UK law?

- If the answer is 'yes' and the property is also situated in the foreign country under the law of that country, relief is due under IHTA84/S159(3)(b),
- If the answer is 'yes' but the property is not situated in the foreign country under their law, no relief is due.
- If the answer is 'no' but the property is situated in the foreign country under UK law, relief is due under IHTA84/S159(2).
- If the answer is 'no' and the property is not situated in the foreign country under UK law, relief is due under IHTA84/S159(3)(a).

Relief should be given under IHTA84/S159 (2) rather than S159 (3)(a) where tax is paid, under an agreement between the provinces concerned:

- in Quebec or Ontario, or Quebec and British Columbia,
- on shares which are situated in the other province, under UK law.

Any case where the taxpayer or agent disagrees with our view that UK law applies, should be referred to Technical.

120.5.1 *Situs in overseas territory*

Section 159(2) IHTA provides:

> Where the property is situated in the overseas territory and not in the UK, the credit shall be of an amount equal to the overseas tax.

The IHT Manual provides:

> **IHTM27187. Relief under IHTA84/S159 (2)** [May 2020]
>
> Where the property concerned is situated (under UK law) in the foreign country, relief is due under IHTA84/S159 (2) and the credit due is equal to the foreign tax paid.
>
> In practice, the credit cannot be more than the Inheritance Tax (IHT) attributable to the property concerned.

More accurately, the *credit* (as defined) can exceed the IHT attributable to the property, but this credit is only set against the IHT attributable to the property, so the amount of the relief is the lesser of the credit and that IHT. The IHT Manual goes on to give an example:

> *Example* (Bernice)
> B died in September 2002, leaving an apartment in Spain valued at £50,000. B's total estate amounts to £300,000 (there were no lifetime gifts), with total IHT payable of £20,000.
> The Spanish authorities charge tax equivalent to Sterling £4,000 on the apartment on B's death.
> The IHT payable on the apartment is:
> £50,000 × (£20,000 ÷ £300,000) = £3,333.33
> So, the double taxation credit due under IHTA84/S159 (2) is restricted to £3,333.33.

The effect of the credit is that the total tax paid is the higher of the UK and the foreign IHT rates.

120.5.2 *Situs in 3rd country/dual situate*

Section 159(3) IHTA provides:

> Where the property—
> (a) is situated neither in the UK nor in the overseas territory, or
> (b) is situated both in the UK and in the overseas territory,
> the credit shall be of an amount calculated in accordance with the following formula—
>
> $$\frac{A}{A+B} \times C$$
>
> where
> A is the amount of the capital transfer tax,
> B is the overseas tax and
> C is whichever of A and B is the smaller.

The IHT Manual provides:

> **IHTM27188. Relief under IHTA84/S159 (3) and S159 (4)** [May 2020]
> Relief is due under s.159(3) IHTA 1984 where both the UK and another foreign country charge tax on the same property and that property is situated:
>
> - neither in the UK nor in the foreign country, or
> - both in the UK and in the foreign country.

> Where relief is due under IHTA84/S159 (3), it is given on a split credit basis and will be less than the foreign tax paid. [The Manual sets out the formula in s.159(3) and continues:]
>
> *Example 1*
>
> Country X and the UK both tax an item of property which is situated neither in Country X or the UK.
>
> Country X charges tax of £40
> The UK charges IHT of £60
>
> The credit is: 60 ÷ (60 + 40) × 40 = £24

HMRC IHT Customer Guide gives two examples of unilateral relief calculations:[2]

> **Example 1**
>
> Ann is domiciled in Ruritania, but is also treated as domiciled in the UK. She makes a gift of property situated in Utopia.

Item	*Amount*
UK inheritance tax (A)	£3,000
Ruritanian inheritance tax (B)	£1,000
C is the smaller of A and B	£1,000

> Credit against UK IHT is £3,000 / (£3,000 + £1,000) × £1,000 = £750

Net UK tax	**£2,250**

> **Example 2**
>
> Tom is domiciled in Utopia but holds shares in a Ruritanian company, which maintains a duplicate share register in the UK. Under UK law we regard the shares as situated in the UK,[3] but Ruritanian law regards them as situated in Ruritania. Tom dies (but his estate is not liable to Utopian tax).

Item	*Amount*
UK inheritance tax (A)	£1,000
Ruritanian inheritance tax (B)	£4,000
C is the smaller of A and B	£1,000

> Credit against UK IHT is £1,000 / (£1,000 + £4,000) × £1,000 = £200

Net UK tax	**£800**

This will only eliminate double taxation if the foreign state has the same rules. Where an IHT DTA applies a more generous form of credit may apply.

[2] *https://www.gov.uk/inheritance-tax-double-taxation-relief#15*

[3] Author's footnote: This is not a correct statement of the situs rule, but it does not matter for the purposes of the example.

120.5.3 *Tax in more than 1 state*

Section 159(4) IHTA provides:

> Where tax is imposed in two or more overseas territories in respect of property which—
>
> (a) is situated neither in the UK nor in any of those territories, or
>
> (b) is situated both in the UK and in each of those territories, subsection (3) above shall apply as if, in the formula there set out,
>
> B were the aggregate of the overseas tax imposed in each of those territories and
>
> C were the aggregate of all, except the largest, of A and the overseas tax imposed in each of them. ...

The IHT Manual provides an example:

> **IHTM27188 Relief under IHTA84/S159 (3) and S159 (4)** [May 2020]
> *Example 2*
> Each of Country X, Country Y and the UK tax an item of property which is not situated in Country X, Country Y nor the UK.
> Country X charges £40
> Country Y charges £20
> The UK charges IHT of £60
> The credit is 60 ÷ (60+40+20) × (40+20) = £30

120.5.4 *Interaction of s.159(2)(3)*

Section 159(5) IHTA deals with the interaction of the two reliefs:

> Where credit is allowed under subsection (2) above or section 158 above in respect of overseas tax imposed in one overseas territory, any credit under subsection (3) above in respect of overseas tax imposed in another shall be calculated as if the capital transfer tax were reduced by the credit allowed under subsection (2) or section 158; and where, in the case of any overseas territory mentioned in subsection (3) or (4) above, credit is allowed against the overseas tax for tax charged in a territory in which the property is situated, the overseas tax shall be treated for the purposes of those provisions as reduced by the credit.

The IHT Manual provides:

> **IHTM27188 Relief under IHTA84/S159 (3) and S159 (4)** [May 2020]
> ... If relief is due under IHTA84/S159 (3)(a) or IHTA84/S159 (4)(a), IHTA84/S159 (5) must be considered when calculating the foreign tax

> paid (B in the formulas above). If the foreign country has allowed a credit against its tax for tax paid in another foreign country, please refer to Technical.
>
> Where relief is due under IHTA84/S159 (3)(b) or IHTA84/S159 (4)(b), above, the foreign tax at B is simply the gross amount paid. You do not need to take account of any credit for tax paid in another country.
>
> **IHTM27189. Procedure when both IHTA84/S159 (2) and S159 (3) apply** [May 2020]
>
> It may happen that relief is due under s.159(2) IHTA 1984 (or convention relief under s.158 IHTA 1984) and also under s.159(3) IHTA 1984.
>
> If this is the case, s.159(5) states that the credit allowed under Section 159(3) must be calculated on the basis that A in the formula (the Inheritance Tax paid) is the net amount of Inheritance Tax after allowing the credit under s.158 or s.159(2)

120.5.5 *Unilateral/DTA credit: Interaction*

Section 159(7) IHTA provides:

> Where relief can be given both under this section and under section 158 above [double tax treaties], relief shall be given under whichever section provides the greater relief.

The IHT Manual provides:

> **IHTM27200. Procedure when both forms of relief apply** [May 2020]
>
> Unilateral relief and relief under a double taxation convention (DTC) are **not** mutually exclusive. Where both reliefs would appear to be due on the same item of property, relief is restricted by IHTA84/S159 (7) to whichever is the greater. In practice, where the amount of credit is the same under either, the credit should be treated as convention relief.
>
> In cases where, either;
>
> - both reliefs are due, but the unilateral relief appears to be the greater or
> - the interaction of the two reliefs is particularly difficult.
>
> You must refer the case to Technical.
>
> Unilateral relief may be given for a State tax as well as unilateral or convention relief in respect of tax due in the country where the State is situated.
>
> *Example* (Giles)
>
> G, a British citizen, dies domiciled in the UK. His estate includes an apartment in New York, stocks and shares in US Companies and a New York bank account.

> The world-wide estate will be subject to UK tax, but US Federal Estate Tax will (because of the terms of the DTC) be payable only on the immovable property in the USA. The UK will give credit for the US tax under the DTC.
> NY State will also charge State Estate Tax on the movable assets situated there and the UK will give unilateral relief for this tax.
> But the total unilateral and convention credit cannot exceed the amount of UK IHT payable on the property concerned.

120.5.6 *Canada estate duty: Concession*

The IHT Manual provides:

> **IHTM27186 Procedure Chart** [May 2020]
> ... Relief should be given under IHTA84/S159 (2) rather than S159(3)(a) where tax is paid, under an agreement between the provinces concerned:
> - in Quebec or Ontario, or Quebec and British Columbia,
> - on shares which are situated in the other province, under UK law.
>
> Any case where the taxpayer or agent disagrees with our view that UK law applies, should be referred to Technical.

Canada abolished estate duty in 1972. This passage is therefore 50 years out of date! For the current Canadian position, see 80.17.4 (Canadian income tax). However it illustrates an approach which may perhaps be applied to federal estate duties in other federal jurisdictions, if there are any.

120.6 Planning

The rule is in short that the relief is the lesser of (1) foreign IHT and (2) UK IHT attributable to the same property. This requires careful planning to maximise the benefit of the relief.

Suppose T owns land in country X which on T's death will bear IHT in country X. If T makes a chargeable gift of the land (eg a gift by will to T's children) then the foreign IHT credit is available. If T makes an exempt gift (eg to T's spouse or to charity) the foreign IHT credit is lost. Foreign jurisdictions do not normally allow death duty exemption on the grounds that a gift is made to a UK charity.[4] For instance, suppose T wishes to makes a will giving foreign property to a UK charity. The gift may bear

[4] In some cases EU member states may allow relief.

foreign death duties which are set against UK IHT so the effective IHT burden is reduced or eliminated.[5] It would be better:

(1) to give the foreign property to beneficiaries who are chargeable under UK law.

(2) to give other (perhaps UK) property to the UK charity which would otherwise bear inheritance tax at the full rate.

In some cases the matter could be put right by a deed of variation.

120.7 France/Italy IHT credit

Art 6 UK/France IHT DTA	**Art 6 UK/Italy IHT DTA**
Where one Contracting Party imposes duty	(1) Where one Contracting Party imposes duty.
on the death of a person who was domiciled in its territory at the time of his death	[no equivalent]
on any property which, under the present Convention, is situated in the territory of the other Contracting Party,	on any property which is not situated in its territory but is situated in the territory of the other Contracting Party ,
the former Party shall allow against so much of its duty, ascertained in accordance with its law,	the former Party shall allow against so much of its duty (as otherwise computed)
as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed by the other Contracting Party as is attributable to such property.	as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed in the territory of the other Contracting Party as is attributable to such property

Art 6 UK/Italy IHT DTA follows with a provision not in the French DTA:

> (2) For the purposes of this Article, the amount of the duty of a Contracting Party attributable to any property shall be ascertained after taking into account any credit, allowance or relief, or any remission or reduction of duty other than in respect of duty payable in the territory of the other Contracting Party

This does not add much to the unilateral IHT credit otherwise available

[5] The position may be complicated further by foreign rules which make the rate of death duty depend on the relationship of the beneficiary to the deceased; forced heirship rules may also need to be considered.

under domestic law but it would be relevant for an asset which is UK situate under domestic IHT situs rules but not UK situate under treaty-situs rules.[6]

India and Pakistan DTAs have comparable articles but since these countries do not impose IHT, the articles have no effect.

120.8 USA IHT credit

Article 9 USA IHT DTA provides foreign tax credit relief. This is important because the DTA exemption is quite restricted.[7]

Article 9(1) USA IHT DTA (not discussed here) provides US relief where UK IHT is paid.

Article 9(2) USA IHT DTA provides UK relief for non-trust property where US tax is paid:

> Where
> [i] under this Convention the UK may impose tax with respect to any property
> [ii] other than property which the UK is entitled to tax in accordance with the said Article 6 or 7[8]
> [iii] (that is, where the decedent or transferor was domiciled in or a national of the UK),
>
> then, except in the cases to which para (3) applies, double taxation shall be avoided in the following manner:
>
> (a) Where the US imposes tax with respect to property in accordance with the said Article 6 or 7, the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.
>
> (b) Where
> [i] the US imposes tax with respect to property not referred to in sub-para (a) and
> [ii] the decedent or transferor was a national of the UK and was domiciled in the US at the time of the death or transfer,[9]
>
> the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the

[6] See 115.10 (Treaty-situs).

[7] See 119.6 (IHT exemptions: Individual).

[8] Articles 6 and 7 concern immovable and business property: see 24.7.1 (Immovable property); 119.11 (Business property).

[9] See 119.6 (IHT exemptions: Individual).

US with respect to that property.

Article 9(3) USA IHT DTA provides the rule for trust property:

> Where both Contracting States impose tax on the same event with respect to property which
>
> [a] under the law of the US would be regarded as property held in a trust or trust equivalent and
>
> [b] under the law of the UK would be regarded as property comprised in a settlement,
>
> double taxation shall be avoided in the following manner:
>
> (a) Where a Contracting State imposes tax with respect to property in accordance with the said Article 6 or 7, the other Contracting State shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the first-mentioned Contracting State with respect to that property.
>
> (b) Where the US imposes tax with respect to property which is not taxable in accordance with the said Article 6 or 7 then
>
> (i) where the event giving rise to a liability to tax was a generation-skipping transfer and the deemed transferor was domiciled in the US at the time of that event,
>
> (ii) where the event giving rise to a liability to tax was the exercise or lapse of a power of appointment and the holder of the power was domiciled in the US at the time of that event, or
>
> (iii) where (i) or (ii) does not apply and the settlor or grantor was domiciled in the US at the time when the tax is imposed,
>
> the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.
>
> (c) Where
>
> [i] the United States imposes tax with respect to property which is not taxable in accordance with the said Article 6 or 7 and
>
> [ii] sub-paragraph (b) does not apply,
>
> the United States shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the United Kingdom with respect to that property.

Article 9(4) USA IHT DTA provides some general rules for tax credits:

> [a] The credits allowed by a Contracting State according to the provisions of paras (1), (2) and (3) shall not take into account amounts of such taxes not levied by reason of a credit otherwise allowed by the other Contracting State.
>
> [b] No credit shall be finally allowed under those paragraphs until the tax (reduced by any credit allowable with respect thereto) for which the credit is allowable has been paid.
>
> [c] Any credit allowed under those paragraphs shall not, however, exceed the part of the tax paid in a Contracting State (as computed before the credit is given but reduced by any credit for other tax) which is attributable to the property with respect to which the credit is given.[10]

The IHT Manual explains the procedure for obtaining a credit:

> **IHTM27170: USA** [Dec 2021]
>
> ...Where a double taxation credit is due you may allow the amount claimed on form IHT400 provisionally but the case must not be closed until the payment has been certified by the US authorities on Form 742. If a credit seems appropriate, send the taxpayer or their agent two prints of Form 742, available from Technical. Ask them to complete the forms and to send both copies to the Washington address on the reverse
>
> Internal Revenue Service, 1111 Constitution Avenue NW:SE:LB:IN:ADCI:EOI M4-360, Washington DC 20224, United States of America.
>
> One of these copies is certified and returned to this office and the other is retained by the US authorities. The certified form must be checked and the appropriate credit allowed. If you have any difficulty applying the Double Taxation Convention or calculating the tax attributable to the property, please seek advice from Technical..
>
> The credit given cannot be more than the amount of tax payable in the UK on the property concerned.
>
> *Certificate of IHT paid for the US authorities*
>
> The US form 706 CE is forwarded to this Office in duplicate to be certified by us. The forms must be checked, but you must make sure you do not mark the forms themselves in any way. Send the forms and the file with a note of any error or omission to Technical once all the tax has been paid. If there no further enquiries and all the tax has been paid, Technical will arrange for one copy to be certified and sent with a schedule of any necessary amendments to the US authorities; the other copy is filed. The taxpayer is informed that the certificate has been sent

[10] Art 9(5) deals with claims; see 114.7 (Claims for IHT DTA reliefs).

and is provided with a copy of any amending schedule.

Where a certificate of tax paid cannot be issued on application - because the amount of tax has not been finalised and paid - you should explain this to the taxpayer or agents. You should also remind them that they can lodge a provisional claim for a credit with the US authorities (although there is a time limit – under Article 9). When the case is ready you should refer the application and the file to Technical to issue the certificate.

If there is any adjustment of tax after a certificate has been issued the file must again be referred to Technical to issue an amending certificate.

CHAPTER ONE HUNDRED AND TWENTY ONE

REPORTING AND COMPLIANCE

121.1 Reporting/compliance: Introduction
121.2 Duty to notify liability
121.2.1 Persons required to notify
121.2.2 Trustees duty to notify
121.2.3 Simple assessments
121.3 Duty to notify: Exemption
121.3.1 Payments within PAYE
121.3.2 Tax deducted at source
121.3.3 Dividends within dividend nil-rate
121.3.4 No tax liability
121.3.5 HMRC practice
121.3.6 Company director
121.4 Duty to make SA return
121.4.1 Small gains
121.4.2 Relevant trustees
121.4.3 Partnership
121.4.4 SA return time limits
121.4.5 Scope of SA return
121.4.6 Non-resident employer
121.4.7 Withdrawal of notice
121.4.8 Voluntary return
121.5 Reporting bare trusts
121.6 s.8 return: self-assessment
121.7 Amending a SA return
121.8 SA Enquiries
121.8.1 Enquiry time limit
121.8.2 Only one enquiry
121.8.3 Scope of enquiry
121.9 Assessment after enquiry window
121.9.1 Discovery requirement
121.9.2 HMRC delay
121.9.3 Prevailing practice defence
121.9.4 Carelessness condition
121.10 Full-disclosure requirement
121.11 Full-disclosure standard
121.11.1 Full-disclosure/discovery compared
121.11.2 Full disclosure/carelessness compared
121.11.3 Disclosing valuations
121.11.4 Allocation to income/capital
121.11.5 Disagreeing with HMRC view
121.11.6 Information available to HMRC
121.11.7 Information overload
121.12 Full-disclosure: Examples
121.12.1 Non-avoidance examples
121.12.2 Tax avoidance examples
121.13 IT/CGT assessment time limits
121.13.1 Summary and table
121.13.2 Time limits: Policy
121.14 4 year limit
121.14.1 Income received after tax year
121.15 6 year limit: Carelessness
121.15.1 Definition of "careless"
121.15.2 Failure to correct error
121.15.3 Careless/negligent compared
121.15.4 What is reasonable care
121.15.5 Careless: HMRC guidance
121.15.6 Carelessness of agent
121.15.7 Relying on advisers
121.15.8 Standard of care: Practitioners
121.15.9 Practitioners advising themselves
121.15.10 Careless: Causation
121.15.11 Carelessness: Onus of proof
121.16 12-year limit: Offshore Matter
121.16.1 Significantly harder to identify
121.16.2 12-year limit: Exceptions
121.16.3 Transfer pricing time limit
121.16.4 12-year limit: Commencement
121.16.5 12 year limit: Critique

121.17 20 year limit: deliberate error
121.17.1 Inaccuracy
121.17.2 “Deliberate” inaccuracy
121.17.3 Recklessness
121.17.4 Deliberate error of agent
121.17.5 Deliberate: HMRC examples
121.17.6 Partnership default
121.18 20 year limit: Failure to notify

121.20 Personal representatives
121.20.1 Liability of PRs
121.20.2 Time limits for assessing PRs
121.21 Enquiry ends: Closure notice
121.21.1 Application for closure notice
121.22 Appeals
121.22.1 Right of appeal
121.22.2 Determination of appeal
121.22.3 Further appeals
121.23 CT registration
121.23.1 1st accounting period: s.55 notice
121.23.2 Company within charge to CT
121.23.3 UK company starts business
121.23.4 Chargeable gain/allowable loss
121.23.5 When accounting period ends
121.23.6 Content of notice
121.23.7 Time limit for s.55 notice
121.23.8 HMRC practice: Registration
121.23.9 Reasonable excuse defence
121.23.10 HMRC practice: Returns
121.23.11 Company law requirements

Cross references

The question how specific types of income/gains are disclosed in a tax return is considered in chapters on that type of income:

Topic	**See para**	**Topic**	**See para**
Unremitted income/gains	17.27	Motive/EU-law defence	52.33
Discretionary trust income	41.3.6	Chargeable event	70.21
s.624 income	47.17	Disguised IM fees	73.33
s.720 income	49.29	Chargeable gains	56.27
s.731 income	50.60	s.87 gains	61.59

121.1 Reporting/compliance: Introduction

The layout of discussion as follows:

Topic	**See para**
Enquiries, assessment, carelessness/deliberate error: IT/CGT	*This chapter*
Tax return filing positions	122.1
Claims	123.1
Collection of IT/CGT from UK Representatives	124.1
Reporting/compliance for IHT	125.1
Penalties	126.1
Failure to prevent tax evasion	127.1
Reporting beneficial ownership/money laundering	
Common Reporting Standard	130.1
Trusts Registration Service	131.2
Customer Due Diligence	132.1
Reporting non-resident trusts	128.1
International movement of capital	129.1

Proceeds of Crime Act 2002	133.1

I go beyond the themes of this book and address the topics as a whole. But I do not seek to be completely comprehensive: a full discussion would need volumes.

Further disclosure duties may arise under:

(1) DOTAS (on which books have been written)
(2) DAC 6[1]

I do not consider these topics here, though I hope to do so in a future edition.

121.2 Duty to notify liability

The starting point is that a taxpayer liable to tax must give notice of liability to HMRC.

s.7(1) TMA (IT/CGT)	**para 2 sch 18 FA 1998** (CT)
Every person who—	(1) A company which—
(a) is chargeable to income tax or capital gains tax for any year of assessment, and	(a) is chargeable to tax for an accounting period, and
(b) falls within subsection (1A) or (1B),	b) has not received a notice requiring a company tax return,
shall, subject to subsection (3) below, within the notification period, give notice to an officer of the Board that he is so chargeable.	must give notice to an officer of Revenue and Customs that it is so chargeable.
	(2) The notice must be given within twelve months from the end of the accounting period.

I refer to this as a "notice of liability".[2]

Section 7(2) TMA defines the notification period:

[1] The Directive on Administrative Co-operation (2011/16/EU) with regard to cross-border arrangements, implemented by The International Tax Enforcement (Disclosable Arrangements) Regulations 2020 but partly repealed post-Brexit.

[2] Section 7(1) uses the word chargeable, but the heading to s.7, and s.7(7), use the word "liable". The two words have the same sense here, and are used interchangeably.

> In subsection (1) "the notification period" means—
> (a) in the case of a person who falls within subsection (1A), the period of 6 months from the end of the year of assessment, or
> (b) in the case of a person who falls within subsection (1B)—
> (i) the period of 6 months from the end of the year of assessment, or
> (ii) the period of 30 days beginning with the day after the day on which the notice under section 8 was withdrawn,
> whichever ends later.

For consequences of failure to comply see 121.18 (20 year limit: Failure to notify); 120.5 (Failure to notify liability).

In *Owens v HMRC* the taxpayer's accountant wrote to say "We are writing to give notice of liability to tax under TMA 1970 s 7(1) for tax year SA17." The FTT said:[3]

> Both parties accept that there is no specified wording for a taxpayer to notify HMRC of their chargeability to tax. However, the wording used by the Agent in his six letters to HMRC falls far short of the ordinary meaning of s7 TMA 1970. Upon receipt of the letters dated 5 February 2018 and 16 January 2019 HMRC were given no information as to what sort of tax the Appellant was liable for, no indication of the amount and no information concerning the source of the taxable income.

This is plainly wrong: the provision requires notice that the individual is chargeable to IT or CGT; and no further information is required to satisfy s.7. The recourse for HMRC is to issue a notice requiring a tax return, which requires the information.

121.2.1 *Persons required to notify*

Section 7 TMA provides:

> (1A) A person falls within this subsection if the person has not received a notice under section 8 requiring a return for the year of assessment of the person's total income and chargeable gains.
> (1B) A person falls within this subsection if the person—
> (a) has received a notice under section 8 requiring a return for the year of assessment of the person's total income and chargeable gains, and

[3] [2024] UKFTT 192 (TC) at [55]. But the parties were not represented by Counsel.

> (b) has received a notice under section 8B withdrawing the notice under section 8.

The starting point is that everyone is required to notify unless they receive a s.8 notice which requires them to put in a tax return, (in which case a s.7 notice is obviously unnecessary).

121.2.2 *Trustees duty to notify*

Section 7(2) TMA provides:

> In the case of persons who are chargeable as mentioned in subsection (1) above as the relevant trustees[4] of a settlement, that subsection and subsections (1A) to (1C) have effect as if references to a notice under section 8 were references to a notice under section 8A.

In *Trustees of the Paul Hogarth Life Interest Trust v HMRC:*[5]

> [Section 7 TMA] uses the word "persons" in relation to trustees and s 7(2) assumes that the persons who are chargeable, and who therefore have the obligation to notify, are "the relevant trustees". This is consistent with s 474 ITA.

121.2.3 *Simple assessments*

Section 7(2A) TMA provides:

> A person who—
> (a) falls within subsection (1A) or (1B), and
> (b) is notified of a simple assessment for the year of assessment,
> is not required to give notice under subsection (1) for that year unless the person is chargeable to income tax or capital gains tax for the year of assessment on any income or gain that is not included in the assessment.

121.3 Duty to notify: Exemption

Section 7(3) TMA provides:

> A person shall not be required to give notice under subsection (1) above in respect of a year of assessment if for that year—
> (a) the person's total income consists of income from sources falling within subsections (4) to (7) below,

[4] See 121.4.2 (Relevant trustees).

[5] [2018] UKFTT 595 (TC) at [18].

> (b) the person has no chargeable gains, and
> (c) the person is not liable to a high income child benefit charge.

Subsections (4) to (7) contain a set of 5 income categories which fall within this exemption.

121.3.1 *Payments within PAYE*

Section 7 TMA provides:

> (4) A source of income falls within this subsection in relation to a year of assessment if—
> (a) all payments of, or on account of, income from it during that year, and
> (b) all income from it for that year which does not consist of payments,
> have or has been taken into account in the making of deductions or repayments of tax under PAYE regulations.
> (5) A source of income falls within this subsection in relation to any person and any year of assessment if all income from it for that year has been or will be taken into account—
> (a) in determining that person's liability to tax, or
> (b) in the making of deductions or repayments of tax under PAYE regulations.

121.3.2 *Tax deducted at source*

Section 7(6) TMA provides:

> A source of income falls within this subsection in relation to any person and any year of assessment if
> [A] all income from it for that year is—
> (a) income from which income tax has been deducted; or
> (b) income from or on which income tax is treated as having been deducted or paid,
> [B] and that person is not for that year liable to tax at a rate other than the basic rate, the dividend nil rate, the Scottish basic rate, a Scottish rate below the Scottish basic rate, the Scottish intermediate rate, the Welsh basic rate, the dividend ordinary rate, the savings nil rate or the starting rate for savings.

Persons within [B] would once have been called basic rate taxpayers. Is it possible to read that list without a sigh for the simpler, pre-devolution days?

121.3.3 *Dividends within dividend nil-rate*

Section 7(6A) TMA provides:

> A source of income falls within this subsection in relation to any person and any year of assessment if for that year—
> (a) all income from the source is dividend income (see section 19 of ITA 2007),[6] and
> (b) the person—
> (i) is UK-resident,[7]
> (ii) is not liable to tax at the dividend ordinary rate,
> (iii) is not liable to tax at the dividend upper rate,
> (iv) is not liable to tax at the dividend additional rate, and
> (v) is not charged to tax under section 832 of ITTOIA 2005 (relevant foreign income charged on remittance basis) on any dividend income.

121.3.4 *No tax liability*

Section 7(7) TMA provides:

> A source of income falls within this subsection in relation to any person and any year of assessment if all income from it for that year is income on which he could not become liable to tax under a self-assessment made under section 9 of this Act in respect of that year.

This would apply to interest income taxable at the 0% rate.[8]

What about a person whose income falls within the personal allowance? The answer is that the personal allowance requires a claim,[9] so unless a claim is made, which is normally done in a return, notification is strictly required.

121.3.5 *HMRC practice*

HMRC offer an online tool which provides:[10]

> Use this tool to find out if you need to send a tax return for the 2022 to 2023 tax year (6 April 2022 to 5 April 2023).

[6] See 43.4.1 ("Dividend Income").

[7] If the individual is non-resident, dividend income of a basic rate taxpayer falls within s.7(6) because the non-resident has a tax credit: see 30.7 (Non-resident recipient).

[8] See 43.8 (Starting rate for savings); 43.9 (Savings nil rate).

[9] See 44.3 (IT personal allowances).

[10] *https://www.gov.uk/check-if-you-need-tax-return*

Context shows that this is referring to the duty to notify liability under s.7 TMA.

The user will be told “You do not need to send a Self Assessment tax return” (more accurately, a notice of liability) if (inter alia) meet the following conditions:

1 Have not worked as a sole trader, a business partner or a director of a limited company.
2. Did not work as an ‘off-payroll worker’ ie did not provide services to a client through an intermediary such as: a own limited company, partnership, personal service company, an individual
3 Total income less than £50k
4 No income from UK property or land
5 Less than £10k from dividends or savings and investments[11]
6 No need to pay tax on: trust income, foreign income, £2.5k commission or cash in hand payments, a private pension, a Self-Employment Income Support Scheme grant
7 No need to pay CGT
8 Not a religious minister, Lloyd’s underwriter, examiner, exam moderator or invigilator, or share fisherman

This is strictly a concession. It would be desirable to amend s.7, or to express the concession more formally, but there it is. In practice a person who meets these criteria cannot be expected to put in a notice of liability.

121.3.6 *Company director*

It is obvious that being a company director is not by itself sufficient to require a notice of liability under s.7. HMRC have *twice* argued the contrary, on the basis of their own guidance: but the guidance was simply wrong.[12]

121.4 Duty to make SA return

The rules are in s.8(1)/8A(1) TMA:

s.8(1) TMA: Non-trustees	**s.8A(1) TMA: Trustees**
For the purpose of establishing	For the purpose of establishing

[11] Author’s footnote: Presumably the £10k limit applies to the total of dividends and interest income.

[12] *Kadhem v HMRC* [2017] UKFTT 466 (TC). The reader may wonder how this ever came to the FTT. Yet the same point had to be made again in *Symes v HMRC* [2018] UKFTT 42 (TC).

[i] the amounts[13] in which a person is chargeable to income tax and capital gains tax for a year of assessment, and	[i] the amounts in which the relevant trustees of a settlement, and the settlors and beneficiaries, are chargeable to income tax and capital gains tax for a year of assessment, and
[ii] the amount payable[14] by him by way of income tax for that year,	[ii] the amount payable by him by way of income tax for that year,
he may be required by a notice given to him by an officer of the Board-	an officer of the Board may by a notice given to any relevant trustee require the trustee-
(a) to make and deliver to the officer, a return containing such information as may reasonably be required in pursuance of the notice, and	(a) to make and deliver to the officer, on or before the day mentioned in subsection (1A) below a return containing such information as may reasonably be required in pursuance of the notice, and
(b) to deliver with the return such accounts, statements and documents, relating to information contained in the return, as may reasonably be so required.	(b) [identical]
	and a notice may be given to any one trustee or separate notices may be given to each trustee or to such trustees as the officer thinks fit.

[13] Section 8(1AA)/8A(1AA) TMA provide: "For the purposes of subsection (1) above-
(a) the amounts in which a person is chargeable to income tax and capital gains tax are net amounts, that is to say, amounts which take into account any relief or allowance a claim for which is included in the return".

[14] Section 8(1AA)/8A(1AA) TMA provide: "(b) the amount payable by a person by way of income tax is the difference between the amount in which he is chargeable to income tax and the aggregate amount of any income tax deducted at source.
Section 8(5) TMA provides: "In this section and sections 8A, 9 and 12AA of this Act, any reference to income tax deducted at source is a reference to income tax deducted or treated as deducted from any income or treated as paid on any income."

Statute frequently refers to "a return under section 8 or 8A". I gloss that as a **"SA return"**.

121.4.1 *Small gains*

There is a relief for reporting small gains (within the CGT annual exemption). Section 8C(1) TMA provides:

> This section applies if—
>
> (a) the amount of chargeable gains accruing to a person in a tax year does not exceed the annual exempt amount for the year applicable to the person under section 1K of the 1992 Act,[15]
>
> (b) the total amount or value of the consideration for all chargeable disposals[16] of assets made by the person in the year does not exceed £50,000,
>
> (c) the person is not a remittance-basis individual for the year, and
>
> (d) a notice under section 8 or 8A is given to the person requiring information for the purpose of establishing the amount in which the person is chargeable to capital gains tax for the year.

Assuming these conditions are satisfied, s.8C(2) provides the relief:

> If the person makes a statement confirming the matters set out in subsection (1)(a) to (c), the statement constitutes sufficient compliance with that requirement.

Section 8C(4) TMA defines "remittance-basis individual":

> For the purposes of this section an individual is "a remittance-basis individual" for a tax year if—
>
> (a) section 809B of ITA 2007 applies to the individual for the year, or
>
> (b) paragraph 2 of Schedule 1 to the 1992 Act applies in relation to any gains that are treated as accruing to the individual in the

[15] See 44.2 (CGT annual exemption).

[16] Defined in s.8C(3) TMA:

(3) For the purposes of this section every disposal is a "chargeable disposal" other than–

(a) a disposal on which any gain accruing is not a chargeable gain, and

(b) a disposal to which section 58 of the 1992 Act applies (spouses and civil partners).

> year as a result of paragraph 1 of that Schedule.[17]

This disapplies the relief for reporting small gains where the CGT annual exemption is disapplied.[18]

121.4.2 *Relevant trustees*

The term "relevant trustees" matters for the duty to notify chargeability, to make a SA return, and for penalties.

Section 7(9) TMA provides:

> For the purposes of this Act the relevant trustees of a settlement are—
> (a) in relation to income (other than gains treated as arising under Chapter 9 of Part 4 of ITTOIA 2005),
> [i] the persons who are trustees when the income arises and
> [ii] any persons who subsequently become trustees; and
> (aa) in relation to gains treated as arising under Chapter 9 of Part 4 of ITTOIA 2005 [chargeable-event gains],
> [i] the persons who are trustees in the year of assessment in which the gains arise and
> [ii] any persons who subsequently become trustees; and
> (b) in relation to chargeable gains,
> [i] the persons who are trustees in the year of assessment in which the chargeable gains accrue and
> [ii] any persons who subsequently become trustees.

In *Trustees of the Paul Hogarth Life Interest Trust v HMRC:*[19]

> [1] The effect of the definition in s 7(9) is that a trustee who has ceased to act before the income or gain arises or accrues is not a relevant trustee for the purposes of notifying chargeability for the tax year in which the income arises.
> [2] But a trustee who is appointed after the date the income or gain arises or accrues is a relevant trustee (of course only if they are appointed before the obligation to notify has arisen).

Point [2] is not self-evident.

Hogarth also found that a notice to file cannot be given to the trustees of an IIP trust with all income mandated ot the life tenant and with no chargeable gains; that seems surprising.

[17] See 65.18 (Effect of loss election).
[18] See 44.6 (Allowances: remittance basis user).
[19] [2018] UKFTT 595 (TC) at [19].

Section 8A(5) TMA provides:

> The following references, namely-
>
> (a) references in section 9 or 28C of this Act to a person to whom a notice has been given under this section being chargeable to tax; and
>
> (b) references in section 29 of this Act to such a person being assessed to tax,
>
> shall be construed as references to the relevant trustees of the settlement being so chargeable or, as the case may be, being so assessed.

121.4.3 *Partnership*

Section 8 TMA provides:

> (1B) In the case of a person who carries on a trade, profession, or business in partnership with one or more other persons, a return under this section shall include each amount which, in any relevant statement, is stated to be equal to his share of any income, loss, tax, credit or charge for the period in respect of which the statement is made.
>
> (1C) In subsection (1B) above "relevant statement" means a statement which, as respects the partnership, falls to be made under section 12AB of this Act for a period which includes, or includes any part of, the year of assessment or its basis period.

121.4.4 *SA return time limits*

Section 8(1D) TMA provides:

> A return under this section for a year of assessment (Year 1) must be delivered-
>
> (a) in the case of a non-electronic return, on or before 31st October in Year 2, and
>
> (b) in the case of an electronic return,[20] on or before 31st January in Year 2.

There are minor exceptions. Section 8 TMA provides:

> (1E) But subsection (1D) is subject to the following two exceptions.
>
> (1F) Exception 1 is that if a notice in respect of Year 1 is given after 31st July in Year 2 (but on or before 31st October), a return must be delivered-

[20] Section 8(1H) TMA provides: "The Commissioners-
(a) shall prescribe what constitutes an electronic return, and
(b) may make different provision for different cases or circumstances."

> (a) during the period of 3 months beginning with the date of the notice (for a non-electronic return), or
> (b) on or before 31st January (for an electronic return).
> (1G) Exception 2 is that if a notice in respect of Year 1 is given after 31st October in Year 2, a return (whether electronic or not) must be delivered during the period of 3 months beginning with the date of the notice.

Section 8A TMA makes identical provision for trustees, but the provisions are s.8A(1D)-(1F).

121.4.5 *Scope of SA return*

Section 8(3)/8A(3) TMA provide:

> A notice under this section may require different information, accounts and statements for different periods or in relation to different descriptions of source of income.

Section 8(4)/8A(4) TMA provide:

> Notices under this section may require different information, accounts and statements in relation to different descriptions of person.

> Notices under this section may require different information, accounts and statements in relation to different descriptions of settlement.

That seems self-evident.

121.4.6 *Non-resident employer*

Section 8 TMA provides:

> (4A) Subsection (4B) applies if a notice under this section is given to a person within section 8ZA of this Act (certain persons employed etc by person not resident in UK who perform their duties for UK clients).
> (4B) The notice may require a return of the person's income to include particulars of any general earnings (see section 7(3) of ITEPA 2003) paid to the person.

Section 8ZA TMA provides:

> (1) For the purposes of section 8(4A) of this Act, a person ("F") is within this section if each of conditions A to C is met.
> (2) Condition A is that F performs in the UK, for a continuous period of 30 days or more, duties of an office or employment.

> (3) Condition B is that the office or employment is under or with a person who-
>
> (a) is not resident in the UK, but
>
> (b) is resident outside the UK.
>
> (4) Condition C is that the duties are performed for the benefit of a person who-
>
> (a) is resident in the UK, or
>
> (b) carries on a trade, profession or vocation in the UK.

121.4.7 *Withdrawal of notice*

Section 8B TMA provides:

> (1) This section applies to a person who is given a notice under section 8 or 8A.
>
> (2) Before the end of the withdrawal period, HMRC may withdraw the notice (whether at the request of the person or otherwise).
>
> (3) But the notice may not be withdrawn if-
>
> (a) the person has made a return under section 8 or 8A [SA return][21] in pursuance of the notice under that section, or
>
> (b) the person has been served with notice of a determination under section 28C by virtue of the notice under section 8 or 8A having been given to the person.
>
> (4) If HMRC decide to withdraw the notice under section 8 or 8A they must do so by giving the person a notice under this section.
>
> (5) A notice under this section must specify the date on which the notice under section 8 or 8A is withdrawn.
>
> (6) For the purposes of subsection (2) “the withdrawal period” means-
>
> (a) the period of 2 years beginning with the end of the year of assessment to which the notice under section 8 or 8A relates, or
>
> (b) in exceptional circumstances, such extended period as HMRC may determine2.
>
> (7) Withdrawal of a notice given to a person under section 8 or 8A in relation to a year of assessment does not prevent HMRC from giving the person a further notice under that section in relation to that year.
>
> (8) See paragraph 17A of Schedule 55 to FA 2009 as to the cancellation of liability to a penalty under any paragraph of that Schedule by including provision in a notice under this section.

I wonder how often that happens.

[21] See 121.4 (Duty to make SA return).

121.4.8 *Voluntary return*

Section 12D TMA provides:

> (1) This section applies where—
> (a) a person delivers a purported return ("the relevant return") under section 8, 8A or 12AA ("the relevant section") for a year of assessment or other period ("the relevant period"),
> (b) no notice under the relevant section has been given to the person in respect of the relevant period, and
> (c) HMRC treats the relevant return as a return made and delivered in pursuance of such a notice.
>
> (2) For the purposes of the Taxes Acts—
> (a) treat a relevant notice as having been given to the person on the day the relevant return was delivered, and
> (b) treat the relevant return as having been made and delivered in pursuance of that notice (and, accordingly, treat it as if it were a return under the relevant section).
>
> (3) "Relevant notice" means—
> (a) in relation to section 8 or 8A, a notice under that section in respect of the relevant period;
> (b) in relation to section 12AA, a notice under section 12AA(3) requiring the person to deliver a return in respect of the relevant period, on or before the day the relevant return was delivered (or, if later, the earliest day that could be specified under section 12AA).
>
> (4) In subsection (1)(a) "purported return" means anything that—
> (a) is in a form, and is delivered in a way, that a corresponding return could have been made and delivered had a relevant notice been given, and
> (b) purports to be a return under the relevant section.
>
> (5) Nothing in this section affects sections 34 to 36 or any other provisions of the Taxes Acts specifying a period for the making or delivering of any assessment (including self-assessment) to income tax or capital gains tax.[22]

121.5 Reporting bare trusts

Trustees of a bare trust are not "relevant trustees" as they are not trustees of a settlement. Although they are persons, they are not normally subject

[22] This reverses the decision in *Patel v HMRC* [2018] UKFTT 185 (TC). Section 87 FA 2019 provided a transitional rule for pre-2018 returns, now spent.

to reporting duties. TSEM provides:

> **TSEM1563: bare or simple trust** [Sep 2021]
>
> [1] The trustees of a bare trust may pay the tax due to HM Revenue & Customs on behalf of a beneficiary, but it is the beneficiary who is strictly chargeable to tax. The trustees are not required to make a tax return. They may complete the Trust and Estate Tax Return and account for any basic rate tax due on income.
>
> [2] However, bare trustees cannot return capital gains or any gains on life insurance policies, life annuities or capital redemption policies; these continue to be the beneficiaries' responsibility only.

Point [2] is soundly based on the CGT bare trust disregard and the chargeable events code. There is no express statutory provision for point [1], but the rule (or, if concessionary, the practice) is obviously sensible. The practice does not apply if bare trustees retain funds for their own benefit, in breach of trust.[23]

121.6 s.8 return: self-assessment

Section 9 TMA provides:

> (1) Subject to subsections (1A) and (2), every return under section 8 or 8A of this Act shall include a self-assessment, that is to say—
>
> (a) an assessment of the amounts in which, on the basis of the information contained in the return and taking into account any relief or allowance a claim for which is included in the return, the person making the return is chargeable to income tax and capital gains tax for the year of assessment; and
>
> (b) an assessment of the amount payable by him by way of income tax, that is to say, the difference between the amount in which he is assessed to income tax under paragraph (a) above and the aggregate amount of any income tax deducted at source
>
> but nothing in this subsection shall enable a self-assessment to show as repayable any income tax treated as deducted or paid by virtue of section 246D(1)of the principal Act, section 626 of ITEPA 2003 or section 399(2) or 530(1) of ITTOIA 2005.
>
> (1A) The tax to be assessed on a person by a self-assessment shall not include any tax which—
>
> (a) is chargeable on the scheme administrator of a registered

[23] See 87.7.6 (Bare trusts: Navigation).

pension scheme under Part 4 of the Finance Act 2004,

(aa) is chargeable, on the scheme manager of a qualifying recognised overseas pension scheme or a former such scheme, under Part 4 of the Finance Act 2004,

(ab) is chargeable on the sub-scheme administrator of a sub-scheme under Part 4 of the Finance Act 2004 as modified by the Registered Pensions (Splitting of Schemes) Regulations 2006, or

(b) is chargeable on the person who is (or persons who are) the responsible person in relation to an employer-financed retirement benefits scheme under section 394(2) of ITEPA 2003.

(2) A person shall not be required to comply with subsection (1) above if he makes and delivers his return for a year of assessment—

(a) on or before the 31st October next following the year, or

(b) where the notice under section 8 or 8A of this Act is given after the 31st August next following the year, within the period of two months beginning with the day on which the notice is given.

(3) Where, in making and delivering a return, a person does not comply with subsection (1) above, an officer of the Board shall if subsection (2) above applies, and may in any other case—

(a) make the assessment on his behalf on the basis of the information contained in the return, and

(b) send him a copy of the assessment so made;

(3A) An assessment under subsection (3) above is treated for the purposes of this Act as a self-assessment and as included in the return.

121.7 Amending a SA return

Section 9ZA TMA provides:

(1) A person may amend his return under section 8 or 8A [SA return] of this Act by notice to an officer of the Board.

(2) An amendment may not be made more than twelve months after the filing date.

(3) In this section "the filing date", in respect of a return for a year of assessment (Year 1), means—

(a) 31st January of Year 2, or

(b) if the notice under section 8 or 8A is given after 31st October of Year 2, the last day of the period of three months beginning with the date of the notice.

In *Re Webster*[24] a taxpayer sought to amend his return by the equitable remedy of rectification. No-one had ever thought of that before. A High Court master held that it had no jurisdiction to rectify a tax return, and while not strictly a citable precedent, because only one party was represented, that seems clearly right. Amendment is only possible under the statutory procedure.

121.8 SA Enquiries

Section 9A(1) TMA provides:

> An officer of the Board may enquire into a return under section 8 or 8A of this Act [SA return][25] if he gives notice of his intention to do so ("notice of enquiry")—
> (a) to the person whose return it is ("the taxpayer"),
> (b) within the time allowed.

HMRC do not need any justifiable suspicion in order to open an enquiry. That is inconsistent with the HMRC Charter ("We'll assume you're telling the truth, unless we've good reason to think you're not."). But no-one takes any notice of that.

121.8.1 *Enquiry time limit*

Section 9A(2) TMA provides:

> The time allowed is—
> (a) if the return was delivered on or before the filing date,[26] up to the end of the period of twelve months after the day on which the return was delivered;
> (b) if the return was delivered after the filing date, up to and including the quarter day[27] next following the first anniversary of the day on which the return was delivered;
> (c) if the return is amended under section 9ZA of this Act, up to and including the quarter day next following the first anniversary of the day on which the amendment was made.

[24] [2020] EWHC 2275 (Ch).

[25] See 121.4 (Duty to make SA return).

[26] Section 9A(6) TMA provides: "In this section "the filing date" means, in relation to a return, the last day for delivering it in accordance with section 8 or 8A."

[27] Section 9A(2) TMA provides: "For this purpose the quarter days are 31st January, 30th April, 31st July and 31st October."

In short, HMRC have 12 months in which to begin an enquiry into a tax return. I refer to this as the **"one-year enquiry window"**.

121.8.2 *Only one enquiry*

Section 9A(3) TMA provides:

> A return which has been the subject of one notice of enquiry may not be the subject of another, except one given in consequence of an amendment (or another amendment) of the return under section 9ZA of this Act.

In short, only one enquiry is allowed. But as an enquiry will normally take at least one year, this will not often arise.

121.8.3 *Scope of enquiry*

Section 9A TMA provides:

> (4) An enquiry extends to—
> (a) anything contained in the return, or required to be contained in the return, including any claim or election included in the return,
> (b) consideration of whether to give the taxpayer a transfer pricing notice under section 168(1) of TIOPA 2010 (provision not at arm's length: medium-sized enterprise),
> (c) consideration of whether to give the taxpayer a notice under section 81(2) of TIOPA 2010 (notice to counteract scheme or arrangement designed to increase double taxation relief),
> but this is subject to the following limitation.
> (5) If the notice of enquiry is given as a result of an amendment of the return under section 9ZA of this Act—
> (a) at a time when it is no longer possible to give notice of enquiry under subsection (2)(a) or (b) above,
> (b) after a final closure notice has been issued in relation to an enquiry into the return, or
> (c) after a partial closure notice has been issued in such an enquiry in relation to the matters to which the amendment relates or which are affected by the amendment,
> the enquiry into the return is limited to matters to which the amendment relates or which are affected by the amendment.

121.9 Assessment after enquiry window

Section 29(1) TMA provides an assessment may be made after the one-year enquiry window in certain cases:

> If an officer of the Board or the Board discover, as regards any person (the taxpayer) and a year of assessment—
>
> (a) that any income which ought to have been assessed to income tax, or chargeable gains which ought to have been assessed to capital gains tax, have not been assessed, or
>
> (b) that an assessment to tax is or has become insufficient, or
>
> (c) that any relief which has been given is or has become excessive,
>
> the officer or, as the case may be, the Board may, subject to subsections (2) and (3) below, make an assessment in the amount, or the further amount, which ought in his or their opinion to be charged in order to make good to the Crown the loss of tax.

Assessments under s.29 are known as "**discovery assessments**", but apart from s.29, there is no further power or kind of assessment.

Statute frequently refers to:

> the situation mentioned in subsection (1) above

I gloss this as the "**insufficiency in the assessment**" or just "**insufficiency**".

Discovery assessments are subject to a number of restrictions:

Restriction	**TMA**	**See para**
IT/CGT assessment time limits	*Various*	121.13
Prevailing practice defence	s.29(2)	121.9.3
Carelessness condition	s.29(4)	121.9.4
Full-disclosure requirement	s.29(5)	121.10

121.9.1 *Discovery requirement*

The requirement that HMRC must "discover" an insufficiency is not onerous, and taxpayers have not generally succeeded on arguments that an assessment is invalid because there have been no "discovery". In *Charlton v HMRC*:[28]

> [37] In our judgment, no new information, of fact or law, is required for there to be a discovery. All that is required is that it has newly appeared to an officer, acting honestly and reasonably, that there is an insufficiency in an assessment. That can be for any reason, including a change of view, change of opinion, or correction of an oversight. The

[28] [2012] UKUT 770 (TCC).

> requirement for newness does not relate to the reason for the conclusion reached by the officer, but to the conclusion itself...
> [44] ...a discovery assessment can be made merely where the original officer of HMRC changes his mind or where a different officer takes a different view.

121.9.2 *HMRC delay*

Delay by HMRC does not mean that there is no discovery. Efficiency and expedition in tax administration would no doubt be desirable; but the legislation does not make this a requirement. In *HMRC v Tooth*:[29]

> there is no place for the idea that a discovery which qualifies as such should cease to do so by the passage of time. That is unsustainable as a matter of ordinary language and, further, to import such a notion of staleness would conflict with the statutory scheme. That sets out a series of limitation periods for the making of assessments to tax, each of them expressed in positive terms that an assessment "may be made at any time" up to the stated time limit... it is perfectly possible, as a matter of ordinary language, to speak of someone making a discovery for himself or herself even if it is something already known to others. ... since section 29(1) is concerned, so far as is relevant, with a discovery made by an officer of the Board, the question is whether the officer of the Board who is deciding whether to make a discovery assessment under that provision has subjectively made a discovery that there has been an under-assessment of tax.

There is the possibility of judicial review in an extreme case; but the facts would have to be very unusual, and I doubt if it would ever happen.

121.9.3 *Prevailing practice defence*

Section 29(2) TMA provides:

> Where—
> (a) the taxpayer has made and delivered a return under section 8 or 8A of this Act [SA return][30] in respect of the relevant year of assessment, and
> (b) the situation mentioned in subsection (1) above [the insufficiency] is attributable to an error or mistake in the return as to the basis on which his liability ought to have been computed,

[29] [2021] UKSC 17 at [76]-[78].
[30] See 121.4 (Duty to make SA return).

> the taxpayer shall not be assessed under that subsection in respect of the year of assessment there mentioned if the return was in fact made on the basis or in accordance with the practice generally prevailing at the time when it was made.

What constitutes the "practice generally prevailing" is a question of fact.[31] A clear statement in an HMRC Manual is not conclusive proof of HMRC practice, but it is strong evidence.

The term is equivalent to "established practice" which is found in other contexts:

Context	**See para**
Meaning of avoidance/abuse	3.20.9; 3.26.1
Disqualified advice	126.12.2

The issue has given rise to much litigation. *Hargreaves v HMRC* summarised the law in numbered propositions:

> (1) The practice has to be one adopted by taxpayers and HMRC alike;
> (2) The practice must be capable of being readily ascertainable by the parties ie it must have substance (in the sense of not being inchoate), and be sufficiently precise and devoid of uncertainty as to its application;
> (3) A practice would not exist if it was equivocal or dependent on the ascertainment of facts, except where the criteria for its application by reference to the facts were themselves understood with a sufficient degree of precision so as the make the practice one that can be readily applied in any given case;
> (4) The practice must have been adopted by HMRC and generally, if not universally, by the taxpayer community;
> (5) A practice will not be generally prevailing if it is not agreed, or respected, as a whole, either by HMRC failing to apply every element of the practice in every case where it should be applied, or by taxpayers adopting only those parts that are favourable to them, but disputing others that are not;
> (6) The practice must be settled which will not be the case if it is articulated or applied otherwise than in a consistent manner or if it is based on criteria which are subject to change depending on the particular circumstances or the facts of a particular case;
> (7) If the facts are relevant to the application of a practice, the relevant

[31] This is self-evident, but if authority is needed, see *Boyer Allan Investment Services v HMRC* [2012] UKFTT 558 (TC); *Turners (Soham) v HMRC* [2019] UKFTT 131.

> factors must themselves be clear and unequivocal; and
> (8) Mere inactivity can in appropriate circumstances give rise to a practice. But such an omission must also be capable of articulation in the same way as a positive act. It must have both clarity and substance. Its parameters must be clearly defined so that the general acceptance amounts to the same unequivocal understanding.[32]

121.9.4 *Carelessness condition*

Section 29 TMA provides:

> (3) Where the taxpayer has made and delivered a return under section 8 or 8A of this Act [SA return][33] in respect of the relevant year of assessment, he shall not be assessed under subsection (1) above—
> (a) in respect of the year of assessment mentioned in that subsection; and
> (b) in the same capacity as that in which he made and delivered the return,
>
> unless one of the two conditions mentioned below is fulfilled.
> (4) The first condition is that the situation mentioned in subsection (1) above [the insufficiency] was brought about carelessly or deliberately by the taxpayer or a person acting on his behalf.

I refer to this condition as the **"carelessness condition"**.

121.10 Full-disclosure requirement

Section 29 TMA provides:

> (3) Where the taxpayer has made and delivered a return under section 8 or 8A of this Act [SA return][34] in respect of the relevant year of assessment, he shall not be assessed under subsection (1) above—
> (a) in respect of the year of assessment mentioned in that subsection; and
> (b) in the same capacity as that in which he made and delivered the return,
>
> unless one of the two conditions mentioned below is fulfilled...

The second condition is:

> (5) The second condition is that at the time when an officer of the Board—

[32] [2019] UKFTT 244 (TC) at [24].

[33] See 121.4 (Duty to make SA return).

[34] See 121.4 (Duty to make SA return).

> (a) ceased to be entitled to give notice of his intention to enquire into the taxpayer's return under section 8 or 8A of this Act [SA return] in respect of the relevant year of assessment;[35] or
> (b) in a case where a notice of enquiry into the return was given—
>   (i) issued a partial closure notice as regards a matter to which the situation mentioned in subsection (1) above [the insufficiency] relates, or
>   (ii) if no such partial closure notice was issued, issued a final closure notice,
>
> the officer could not have been reasonably expected, on the basis of the information made available[36] to him before that time, to be aware of the situation mentioned in subsection (1) above [the insufficiency].

The wording is a little convoluted, but the question is essentially a short one: could HMRC be expected to be aware of the insufficiency?

Hicks v HMRC outlines the principle:

> The taxpayer is incentivised by the legislation to place HMRC in a position where he can put them to proof at the close of the enquiry window with the question "what more need I have disclosed to have placed the officer in a position to be justified in raising an assessment?"[37]

In the following discussion:

"Full disclosure" is disclosure that meets the condition in s.29(5)[38]

The officer in s.29(5) is the **"hypothetical officer"** or just "HMRC"

The advantage of full disclosure is that after the one-year enquiry window has passed, HMRC cannot raise a discovery assessment.[39] If a taxpayer wants finality, that a matter will be closed at the end of the enquiry year, it is therefore necessary to disclose sufficient facts that HMRC should be aware of any insufficiency.

Full disclosure is a voluntary matter. Taxpayers are entitled to weigh up the advantages of full disclosure (finality after the one-year enquiry

[35] See 121.8.1 (Enquiry time limit).

[36] See 121.11.6 (Information available to HMRC).

[37] [2018] UKFTT 22 (TC) at [87].

[38] "Full disclosure" is a context-sensitive term, but I use it to mean disclosure which meets the high standard which precludes a discovery assessment after the one-year enquiry window. I am not using the term literally, as obviously one cannot disclose everything.

[39] Except on the basis of careless/deliberate error.

window) against the advantages of lesser disclosure (letting sleeping dogs lie), provided they do disclose so far as required by law.[40]

121.11 Full-disclosure standard

Sanderson v HMRC sets out the law in numbered paragraphs:[41]

> (1) the officer [referred to in s.29(5)] is not the actual officer who made the assessment ... but a hypothetical officer;
> (2) the officer has the characteristics of an officer of general competence, knowledge or skill which include a reasonable knowledge and understanding of the law;

The hypothetical[42] officer is the counterpart of the reasonable taxpayer who sets a taxpayer's standard of care.

> (3) where the law is complex even adequate disclosure by the taxpayer may not make it reasonable for the officer to have discovered the insufficiency on the basis of the information disclosed at the time: see *Lansdowne* at [69];[43]

But in these complex cases, the taxpayer can deal with this by explaining in addition to the facts:
(1) The law
(2) The practice and guidance, where relevant (which it would be, if the taxpayer is not following HMRC practice or guidance)

> (4) what the hypothetical officer must have been reasonably expected to be aware of is an actual insufficiency: see *Langham v Veltema*:[44]
> 33. [Section 29(5)] is concerned, not with what an Inspector could reasonably have been expected to do, but with what he could have been reasonably expected to be aware of. It speaks of an Inspector's objective awareness, from the information made available to him by the taxpayer, of ... an actual insufficiency in the assessment, not an objective

[40] See 122.8 (Disclosing doubt/further information).

[41] [2016] EWCA Civ 19 at [17].

[42] Although the word hypothetical is always employed in this context, it does not add much. The hypothetical reasonable inspector is no more hypothetical than the reasonably careful taxpayer, or advisor, or anyone who is judged by an objective standard of reasonable care. But it does not matter.

[43] "...even where the taxpayer has disclosed enough factual information, there may be circumstances in which an officer could not reasonably be expected to be aware of an insufficiency by reason of the complexity of the relevant law."

[44] [2004] EWCA Civ 193.

> awareness that he should do something to check whether there is such an insufficiency...
>
> 34. ... the subsection provides an objective test of awareness of insufficiency... It also allows, as section 29(6) expressly does, for constructive awareness of insufficiency, that is, for something less than an awareness of an insufficiency, in the form of an inference of insufficiency.[45]

In *Langham v Veltema* the taxpayer argued that a reasonable officer should have:

(1) taken the view that an assessment based on a valuation needs checking (as the HMRC Manual directed);
(2) instructed Valuation Office to check, which would have revealed the £45k shortfall.

The CoA rejected the argument. The reader might think that the decision of the High Court, which CoA rejected, provided a better balance between the conflicting policy aims, that HMRC should collect tax where due, and that taxpayers should be able to obtain finality, so they can better conduct their lives; but the law is settled.

121.11.1 *Full-disclosure/discovery compared*

There can be an overlap between the issues in:

(1) The full-disclosure requirement in s.29(5) (HMRC expected to be aware of insufficiency)
(2) The discovery requirement in s.29(1)[46] (HMRC discover an insufficiency)

In *Sanderson v HMRC*:[47]

> The exercise of the s.29(1) power [to make a discovery assessment] is made by a real officer who is required to come to a conclusion about a possible insufficiency based on all the available information at the time when the discovery assessment is made.
>
> Section 29(5) operates to place a restriction on the exercise of that power by reference to a hypothetical officer who is required to carry out an evaluation of the adequacy of the return at a fixed and different point in time on the basis of a fixed and limited class of information. The

[45] [2016] EWCA Civ 19.

[46] See 121.9.1 (Discovery requirement).

[47] [2016] EWCA Civ 19 at [25].

> purpose of the condition is to test the adequacy of the taxpayer's disclosure, not to prescribe the circumstances which would justify the real officer in exercising the s.29(1) power.
> Although there will inevitably be points of contact between the real and the hypothetical exercises which ss.29(1) and (5) involve, the tests are not the same.

In *Hicks v HMRC*:[48]

> We know that by summer of 2014 the evidence of the real officer—relevant to subsection (1) but not subsection (5)—was that he had crossed the threshold for a discovery. While the real officer must not be confused with the hypothetical officer, it is in my opinion not unreasonable to assume that the hypothetical officer would be likely to be in a similar position by that stage in terms of his awareness of an insufficiency in the 2010-11 return.

121.11.2 *Full disclosure/carelessness compared*

A discovery assessment may raise issues of carelessness and full disclosure. There may be some tension between the two lines of argument. In *Cooke v HMRC*:[49]

> HMRC are arguing that the appellant's accountant was careless in not identifying that the claims were excessive, but at the same time an HMRC officer could not have been expected to pick the point up. The appellant argues the opposite: the accountant was not careless but an HMRC officer should have been able to spot the problem.

On the facts of that case, the taxpayer was not careless (having reasonably relied on faulty software) but the hypothetical officer should have been aware of the insufficiency.

121.11.3 *Disclosing valuations*

SP 1/06 provides:

> Most taxpayers who use a valuation in completing their tax return and state in the Additional Information space at the end of the Return that
> [1] a valuation has been used,
> [2] by whom it has been carried out, and
> [3] that it was carried out by a named independent and suitably qualified

[48] at [109].
[49] [2017] UKFTT 844 (TC) at [28].

> valuer if that was the case, on the appropriate basis,
>
> will be able, for all practical purposes, to rely on protection from a later discovery assessment, provided those statements are true.

The statements do not actually meet the full-disclosure standard, as interpreted in *Veltema,* because the hypothetical officer would not know the expert valuation was wrong. So this practice is concession not law.

A post-transaction valuation offers a route to finality; the form is CG34 (Post-transaction valuation checks for capital gains).[50]

121.11.4 *Allocation to income/capital*

SP 1/06 provides:

> Most taxpayers will be able to gain finality with exceptional items in accounts. An example might be a deduction in the accounts under Repairs. If an entry in the Additional Information space points out that a programme of work has been carried out that included repairs, improvements and new building work and that the total cost has been allocated to revenue and capital on a particular basis, the inspector should not enquire after the closure of the enquiry period unless he becomes aware that the statement was patently untrue or unreasonable.

This is unobjectionable as far as it goes; though in practice everything would depend on the wording of the statement in the return.

Would it suffice if the information was in a note to the accounts rather than in the white space in the return? Discuss.

121.11.5 *Disagreeing with HMRC view*

SP 1/06 provides:

> ***Taking a Different View***
>
> 18. It is open to a taxpayer properly informed or advised to adopt a different view of the law from that published as HMRC's view. To protect against a discovery assessment after the enquiry period, the return or accompanying documents would have to indicate that a different view had been adopted. This might be done by comments to the effect that the taxpayer has not followed HMRC guidance on the issue or that no adjustment has been made to take account of it. This would offer an opportunity to HMRC to take up the return for enquiry. It is not necessary to provide all the documentation that HMRC might need to quantify that insufficiency if an enquiry into the Return is made.

[50] See too 98.10 (Valuation for ATED); 122.9 (When disclosure required).

> 19. Provided the point at issue is clearly identified and the stance adopted is not wholly unreasonable, the existence of an under-assessment or insufficiency is demonstrated by the statement that a different view of the law has been followed. In these circumstances the taxpayer achieves finality if no enquiry is opened within the statutory time limit.

This applies when the HMRC view is published in a clear statement, typically in a SP or in a Manual. I think in principle if a failure to follow published guidance is not drawn to HMRC's attention they could not reasonably be expected to be aware of an insufficiency, so the full-disclosure requirement is not met.[51] This would not apply if the HMRC view was clearly wrong or out of date or not clearly stated.

By contrast, if there is no publically published view, there is no need to indicate that a different view has been adopted from one which may, or may not, be the HMRC view on this occasion.

In *Pattullo*[52] the taxpayer entered into a CGT avoidance scheme. He did not disclose that he had taken a different view from the CG manual.[53] The judge approved a submission made by HMRC in an earlier case, that:[54]

> Taxpayers who adopt a different view of the law from that published as HMRC's can protect against a discovery assessment after the enquiry period. The return and accounts would have to indicate that a different view had been adopted by entering comments to the effect that they did not follow HMRC guidance on the issue or that no adjustment had been made to take account of it.

Perhaps in a tax avoidance context, a higher standard is required to meet the full-disclosure requirement.

121.11.6 *Information available to HMRC*

Section 29(6) TMA provides:

[51] If the circumstances are such that a reasonable taxpayer would disclose, non-disclosure may constitute a failure to take reasonable care, see 122.9.2 (Disclosure that HMRC disagree).

[52] *Pattullo, Re Judicial Review* [2009] CSOH 137. For other aspects of this case, see above.

[53] That may be factually incorrect, the judge did not set out the relevant text of the Manual, but that does not affect the point of principle.

[54] [2009] CSOH 137 at [113] (claiming support from *Household Estate Agents v HMRC* 78 TC 705, I think wrongly, but that does not ultimately matter.)

> For the purposes of subsection (5) above, information is made available to an officer of the Board if—
>
> (a) [i] it is contained in the taxpayer's return[55] under section 8 or 8A of this Act [SA return] in respect of the relevant year of assessment (the return), or
>
> [ii] in any accounts, statements or documents accompanying the return;
>
> (b) [i] it is contained in any claim made as regards the relevant year of assessment by the taxpayer acting in the same capacity as that in which he made the return, or
>
> [ii] in any accounts, statements or documents accompanying any such claim;
>
> (c) it is contained in any documents, accounts or particulars which, for the purposes of any enquiries into the return or any such claim by an officer of the Board, are produced or furnished by the taxpayer[56] to the officer; or
>
> (d) it is information the existence of which, and the relevance of which as regards the situation mentioned in subsection (1) above [the insufficiency]—
>
> (i) could reasonably be expected to be inferred by an officer of the Board from information falling within paragraphs (a) to (c) above; or
>
> (ii) are notified in writing by the taxpayer to an officer of the Board.

These are the only sources of information to be taken into account for that purpose. That is, information counts as available *only* if it falls within the categories of s.29(6).[57]

Other information does not count as available, such as:

(1) Information (such as a valuation) not supplied to HMRC (though they

[55] Section 29(7) TMA provides: "In subsection (6) above—
(a) any reference to the taxpayer's return under section 8 or 8A of this Act in respect of the relevant year of assessment includes—
(i) a reference to any return of his under that section for either of the two immediately preceding years of assessment..."

[56] Section 29(7) TMA provides: "In subsection (6) above... (b) any reference in paragraphs (b) to (d) to the taxpayer includes a reference to a person acting on his behalf."

[57] This is self-evident, but if authority is needed, see *Sanderson v HMRC* [2016] EWCA Civ 19; *Langham v Veltema* [2004] EWCA Civ 193 at [36].

could and should have asked for it)[58]

(2) Form P11D (employee benefits) provided by the employer to HMRC;[59] or form P14 provided by the employer to the employee[60]

(3) Information obtained by HMRC as a result of its own investigation[61]

(4) Material which HMRC requested in correspondence but not supplied[62]

(5) Information supplied orally (unless later put in writing)[63]

Information which does count as "available" includes:

(1) Information which scheme promoters supplied HMRC in form AAG1 (DOTAS notification by scheme promoter) when the taxpayer gave the DOTAS reference number in the return. This is information "available" under s.29(6)(d)(i).[64] Information can fall within s29(6)(d)(i) even if it does not come from the taxpayer.

(2) Information in taxpayer correspondence with HMRC. This is information "available" under s.29(6)(d)(ii).[65]

121.11.7 *Information overload*

To provide HMRC with too much information may make it harder to identify what is relevant. Where does a wise man hide a leaf?

SP 1/06 provides:

> 9. A taxpayer can further restrict the opportunity for discovery [assessments] by providing enough information for an HMRC officer to realise within the enquiry period that the self-assessment is insufficient. However taxpayers are encouraged to submit the minimum necessary to make disclosure of an insufficiency. The *Veltema* judgement does not require the provision of enough information to quantify the effect on the assessment. Information will not be treated as being made available where the total amount supplied is so extensive that an officer 'could not have been reasonably expected to be aware' of the significance of

[58] See *Langham v Veltema* [2004] EWCA Civ 193 at [51]; followed on this point in *HMRC v Household Estate Agents* 78 TC 705.

[59] *Veltema v HMRC.*

[60] HMRC would know that the form existed, but not that it held relevant information: *Blum v HMRC* [2018] UKFTT 152.

[61] *Sanderson v HMRC* at [40].

[62] *Hicks v HMRC* at [100].

[63] *HMRC v Landsowne Partners Ltd Partnership* [2012] STC 533 at [48].

[64] *Charlton v HMRC.*

[65] *HMRC v Landsowne Partners Ltd Partnership* [2012] STC 533 at [63].

particular information and the officer's attention has not been drawn to it by the taxpayer or taxpayer's representative.

121.12 Full-disclosure: Examples

There are hundreds of cases. Although the decisions are "not always readily reconcilable"[66] there is no more disarray than usual in a large body of case law.

121.12.1 *Non-avoidance examples*

In *Langham v Veltema*[67] a company transferred a property to a director, whose income tax liability therefore depended on the market value of the property. The taxpayer obtained a professional valuation which valued the land at £100k. It was in fact worth £145k.

The return provided:

> Assets transferred/payments made for you: £100,000
> Other benefits-in-kind: Asset placed at disposal of Employee: £100,000

This indicated that the company had transferred an asset to the taxpayer, but did not identify the asset.[68]

It was said that the officer could reasonably infer that the tax return depended on a valuation (though that does not seem self-evident, if the asset transferred is not identified).

The disclosure fell short of the full-disclosure requirement:

> 38. On the facts of the case before the General Commissioners... there was no basis upon which they could have found that the Inspector ought reasonably to have been aware ... that information may well have led him to conclude that the assessment had been based on a valuation of £100,000, but there was nothing to suggest that the valuation was unreliable.

Once one accepts that the test is what the officer is aware of, rather than what the officer should be aware of if they made the enquiries they should, this answer is inevitable.

[66] *Hicks v HMRC* at [2018] UKFTT 22 (TC) at [76].

[67] [2004] EWCA Civ 193.

[68] The company's form P11D (employee benefits) identified the asset as a house, but that form was not "available" to the officer; see 121.11.6 (Information available to HMRC). In any case it would have made no difference if the asset had been identified as the house.

In *Cooke v HMRC*[69] the return gave the following information about foreign dividends:

Country	**Income before tax taken off**	**Foreign tax taken off/paid**
France	103,083	30,523
Canada	15,636	3,845

The mistake (caused by software error) was that claim for foreign tax credit relief was too large. It overlooked that the French/Canadian DTAs (following the OECD Model) reduced the French/Canadian tax on the dividend to 15% of the dividend.[70]

The tax return met the full-disclosure requirement:

> 37 ... the hypothetical officer ... could have been reasonably expected to be aware that the double tax relief claims in the appellant's return were excessive. I would expect any HMRC officer of general competence, knowledge or skill to have some understanding of double tax relief, including that there are limitations on the relief that can be claimed. 15% rate is a standard rate, and in fact generally the maximum treaty rate, for portfolio dividends from companies in jurisdictions with which the UK has double tax arrangements in place... The point is not a complex one, and in my view it did not require any "white space" entry or other flagging up ... A hypothetical officer with a "reasonable knowledge and understanding of the law" ... should have been able to ascertain that the claims were excessive. Although percentages are not included, it is pretty obvious from looking at the figures ... that the amounts claimed were materially in excess of 15%. The percentages claimed could readily be calculated from the figures in the return. This is well illustrated by the fact that [HMRC] did not require any additional information in order to raise the discovery assessment, or to conclude the enquiry for the subsequent year.
>
> 38. ... I do not think that a claim to double tax relief in respect of withholding tax on dividends is a matter of any real complexity or that it requires particular specialist knowledge within HMRC.

Thus the hypothetical reasonable inspector is expected to have a sound knowledge of tax; and the reader may think that is quite right, while still doubting how many inspectors actually pass that standard.

[69] [2017] UKFTT 844 (TC).

[70] See 30.15 (DT relief: Dividend income).

121.12.2 *Tax avoidance examples*

In *Pattullo, Re Judicial Review,*[71] the taxpayer entered into a CGT avoidance scheme using second-hand policies. The return provided:

> On [date] I settled an interest in possession trust with £6k.
> I had borrowed on commercial terms a sum of £2.665m from Investec Bank UK Ltd and settled this amount into the trust.
> The trustees used the funds to acquire a number of capital redemption contracts [and transferred them][72] to me on [date].
> I surrendered the capital redemption contracts on [date] and received redemption proceeds of £2.6m.
> This has given rise to a capital loss as a consequence of s.37(1) TCGA 1992 amounting to £2.665m.

This sets out exactly what happened. However the Court of Session held that this did not reach full-disclosure requirement. An officer knowing these facts would not be aware of an insufficiency:

> [114] ...the white space does not contain the following:
> 1. A statement that Mr Pattullo was a participant in the CRC Mark II tax avoidance scheme.

The important point was not the name of the scheme but that it was a marketed scheme. But this is not likely to arise now, because of DOTAS (and the GAAR).

> 2. A statement that the petitioner and his advisers had adopted a different view of the law from that published as HMRC's....[73]
> 3. There is no explanation as to how Mr Pattullo contends that Section 37 operates in order to produce the capital loss.
> 4. The details other than the basics of the transactions which have been entered into are not contained within the white space.

The judge wisely does not seek to identify what details were missing.

> 5. There is no indication of any doubt in the disclosure that the petitioner is entitled to the loss. I accept ... that the taxpayer does not require in order to clearly alert to say there is an insufficiency as of course that is not his position. However, in circumstances such as this a reference to doubt or as I have said to the fact that it is, a position contrary to

[71] [2009] CSOH 137.

[72] The context shows that some words like this were omitted from the law report.

[73] See 121.11.5 (Disagreeing with HMRC view).

> HMRC's would be necessary to comply with the duty incumbent upon him.
>
> In the absence of information of the type as above described an inspector ... could not in my judgment have been aware of actual insufficiency. ...

The judge does not say whether it is generally necessary to indicate a doubt in order to meet the full-disclosure requirement. It is suggested that this should not be necessary except in special cases. There must always be some doubt when there is a white box disclosure, for if there is no doubt, what is the point of disclosure?

A less onerous view of the full-disclosure requirement was taken in *Charlton v HMRC.*[74] This was another second-hand policy scheme, so the taxpayer was no more meritorious. The disclosure was essentially as follows:

> I acquired a life policy on [date] for £205k.
>
> I made a partial surrender of the policy on [date] for £192k.
>
> I sold my residual interest in the policy on [date] for £10k.
>
> The loss on sale is calculated as the difference between the sale proceeds and the cost of acquisition.
>
> Proceeds from the partial surrender are excluded from the capital gains calculation as they have already been taken into account as a receipt in computing income for the purposes of income tax.

The DOTAS scheme number was disclosed on the return so the disclosure was better that *Pattullo* in that respect.[75]

It was not mentioned that the scheme had been held to be unsuccessful by the Special Commissioners in *Drummond v HMRC*,[76] the advisers having formed the bold view that *Drummond* was wrongly decided.[77]

This met the full-disclosure requirement:

> [93] We do not accept that
>
> [1] there is any overriding requirement that the information has to explain how the scheme works ... nor
>
> [2] that the information must specify, if it be the case, that the view

[74] [2012] UKFTT 770 (TCC).

[75] This did not happen in *Pattullo* because the transactions were carried out before DOTAS.

[76] 79 TC 793.

[77] The FTT (the reader may think, surprisingly) found this to be a reasonable view, though it turned out to be wrong, as the Special Commissioner's decision was subsequently upheld.

> adopted by the taxpayer is different from that taken by HMRC.
> It is a question of degree in all cases. ... the factors the tribunal identified as being those the hypothetical officer would have known from the information made available to him ... were of themselves sufficient so that the hypothetical officer should have been aware of the insufficiency. It is not necessary that the hypothetical officer should have been able to comprehend all the workings of the scheme, or the legal and factual arguments that might arise, or be able to form a reasoned view of those matters. Having regard to the knowledge and understanding that we consider the hypothetical officer might reasonably be expected to have, the difference between the allowable loss claimed and the income declared was enough, in our judgment, to justify an officer making the assessment.[78]

That was a good win, and out of line with other cases.

Sanderson concerned a CGT avoidance scheme known as the Castle Trust. The disclosure was:

> I am entitled to the loss of £1,825,663 by virtue of the provisions of TCGA 1992 s.71(2). The loss is part of a loss of £1,000,000,000, which accrued to the Trustees of the Castle Trust on 8th April 1997, on the disposal of a European Average rate Option (Trade No. 82831) relating to shares in Deutsche Telecom.
> On 24th November 1998, I purchased for a fee (part of which is contingently payable) from the Trustees of the Charter Trust 2.273% of their beneficial interest in the Trust Fund of the Castle Trust. The interest determined on 25th November 1998, when I became absolutely entitled to receive from the Trustees of the Castle Trust the sum of £16.04.

This did not begin to meet the full-disclosure requirement. The return only disclosed half the steps under which the loss accrued to the trust.[79]

Hicks v HMRC concerned an IT avoidance scheme. The information available on the tax return included the following:

> Occupation: trader, with trading turnover of approximately £2.7 million and trading expenses of approximately £2.5 million.
> The return also shows a further deduction of £1.5 million, and a non-taxable receipt of £1.5 million.

[78] [2012] UKFTT 770 (TCC) at [93].

[79] In short: The scheme steps included an option and a counter-option and a migration to the UK; [2016] EWCA Civ 19.

> The carried forward loss is shown as approximately £1.2 million.

The information available (via DOTAS form AAG1) was:

> The arrangement is available to self employed derivative traders who work at least 10 hours per week on average in the trade. The trader acquires dividend rights but while the cost of such rights is a deductible expense of the trade the income is not taxable per section 730 TA 1988
> 1. An individual is a self employed trader carrying on business on a commercial basis with a view to profit.
> 2. The trader acquires at a discount the right to receive dividends declared but not yet paid.
> 3. The income is on the other hand not taxable due to section 730 TA 1988. The result is a net loss for tax purposes to the trader.
> 4. Those traders who meet the condition of working in their trade on average 10 hours per week may be able to offset any loss for sideways loss relief purposes

This was sufficient to meet the full-disclosure requirement:

> the hypothetical officer had sufficient information available ... at closure of the enquiry window to make it reasonable for him to have been justified in raising an assessment for the insufficiency. The central issues, relating to section 730 and trading, were not matters of such complexity that the disclosure did not achieve this result.

In *Smith v HMRC*[80] the disclosure was:

> During the period Mr Smith acquired a non-qualifying second hand insurance bond for £532,695.
> This bond was subsequently redeemed in full, on 6 March 2001 for an amount of £483,228.93.
> For tax purposes the surrender proceeds fall to be taxed under both s.54 1TA 1988 (income) and s.22 TCGA 1992 (capital gains).
> For income purposes a charge arises equal to the excess of surrender proceeds over premiums paid into the policy. In the case of Mr Smith the income arising is:
>
> | | |
> |---|---|
> | Proceeds received on surrender | 483,228 |
> | Premiums paid into the policy | (510,000) |
> | Income Charge | Nil |
>
> In calculating the capital gain arising on the final surrender the proceeds

[80] *Smith v HMRC* [2013] UKFTT 368 (TC).

> are again the amount received on surrender. However, s.37 TCGA 1992 provides that sale proceeds which have been taken into account for income purposes should not be taken into account for capital gains purposes. As the proceeds of £483,228.93 have been taken into account above in calculating the chargeable event gain, the proceeds for capital gains tax purposes are-
>
> | | |
> |---|---|
> | Proceeds received on surrender | 483,228 |
> | Less amounts excluded under s.37 TCGA 1992 | (483,228) |
> | Proceeds for capital gains purposes | Nil |
>
> The expenditure incurred for capital gains purposes is the amount paid by Mr Smith for the bond i.e. £532,695.
>
> The capital gains tax computation on surrender of the bond is:
>
> | | |
> |---|---|
> | Sale proceeds (as above) | 0 |
> | Allowable expenditure (as above) | (532,695) |
> | Capital gain/(loss) | (532,695) |

This was not sufficient to amount meet the full-disclosure requirement:

> 79. The return does not specifically draw the officer's attention to the fact that Mr Smith participated in a tax avoidance scheme during the year. That was held to be a relevant factor in the Scottish case of *Pattullo* (at [115]). In our view, although it is relevant it is only one of several relevant factors (and we understand the Outer House to be saying as much at [114]) – we note that the Tribunal in *Blumenthal* took a different view (at [204 – 205]). (In *Charlton* the point did not arise – or more accurately, was a foregone conclusion – because the return included a registered tax avoidance scheme reference number.)
>
> 80. The white space entries describe the acquisition and redemption of the bond; they cross-refer between the income pages and the capital gain pages; they cite s 541 TA 1988 and ss 22 & 37 TCGA 1992; they show the (simple) calculation of nil income and a £532,695 capital loss on redemption; and they give a short description of how those results are obtained.
>
> 81. An important and relevant point arising from *Lansdowne Partners* concerns the degree of complexity of the legal position governing the matter under consideration. In that case the contentious item concerned the deductibility of payments to partners, a matter on which there was clear House of Lords authority (see [50]). Moses LJ stated:
>
> > [69] … The legal points were not complex or difficult. As the Chancellor points out (at [56]), awareness of an insufficiency does not require resolution of any potential dispute. After all, once an amendment is made, it may turn out after complex debate in a succession of appeals as to the facts or law, that the profits stated

> were not insufficient. I have dwelt on this point because I wish to leave open the possibility that, even where the taxpayer has disclosed enough factual information, there may be circumstances in which an officer could not reasonably be expected to be aware of an insufficiency by reason of the complexity of the relevant law.

82. In our opinion the relevant law relating to the scheme adopted by Mr Smith was of a degree of complexity such as to make it unreasonable for the officer to be aware of an insufficiency on the basis of the information contained in Mr Smith's tax return.

We do consider that the information was sufficient to warrant the hypothetical officer opening a s 9A enquiry – but that is not the relevant test.[81]

We note that a similar conclusion was reached by the Tribunal in *Blumenthal* (at [206]) on the facts in that case.

83. *Charlton* ... rejected the validity of the s 29 assessment. There were two important factual distinctions from the current case.

(1) First, in *Charlton* the taxpayers' returns included the scheme reference number that had been allocated by HMRC when the tax avoidance scheme had been registered by the scheme promoters. The relevant legislation post-dates the 2000-01 tax year in point in the current case.

(2) Secondly, in *Charlton* before the taxpayers submitted their returns the Special Commissioners had already decided in *Drummond* that the scheme failed. Further, the High Court had affirmed the decision of the Special Commissioner ... before the expiry of the relevant enquiry window on 31 January 2009. HMRC accepted that by 31 January 2009 HMRC technical specialists had formed a view as to the efficacy of the scheme. In the current case, obviously, *Drummond* was still several years away when the enquiry window closed in January 2003. ... at 31 January 2003 HMRC were ruminating ... Accordingly, the hypothetical officer, even if he could or should have accessed the minds of HMRC's technical specialists, "could not have been reasonably expected, on the basis of the information made available to him before that time, to be aware of the [insufficiency]".

121.13 IT/CGT assessment time limits

121.13.1 *Summary and table*

IT/CGT enquiry/assessment time limits can be summarised as follows:

[81] This is mistaken, as no justification at all is needed to open an enquiry. But it does not matter here.

Time limit	**Facts**	**TMA s.**	**See para**
Enquiry			
1 year	Enquiry period	29	121.8
Assessment			
4 years	Return made	34	121.14
6 years	Careless error	36(1)	121.15
12 years	Offshore Matter	36A	121.16
20 years	Deliberate error	36(1A)(a)	121.17
20 years	Failure to notify	36(1A)(b)	121.18
20 years	DOTAS breach	36(1A)(c)(d)	*Not discussed*

It may be useful to set out an aide memoire of IT/CGT time limits:

TAX YEAR	**LAST ASSESSABLE DATE**				
	Not Offshore Matter		**Offshore Matter**[82]		
	Not careless[83]	***Careless***[84]	***Not careless***	***Careless***	***Deliberate***[85]***/ failure to notify***
2003/04	-	-	-	-	5/4/2024
2004/05	-	-	-	-	5/4/2025
2005/06	-	-	-	-	5/4/2026
2006/07	-	-	-	-	5/4/2027
2007/08	-	-	-	-	5/4/2028
2008/09	-	-	-	-	5/4/2029
2009/10	-	-	-	-	5/4/2030

2011/12	5/4/2016	5/4/2018	-	-	5/4/2032
2012/13	5/4/2017	5/4/2019	-	-	5/4/2033
2013/14	5/4/2018	5/4/2020	-	5/4/2026	5/4/2034
2014/15	5/4/2019	5/4/2021	-	5/4/2027	5/4/2035
2015/16	5/4/2020	5/4/2022	5/4/2028	5/4/2028	5/4/2036
2016/17	5/4/2021	5/4/2023	5/4/2029	5/4/2029	5/4/2037
2017/18	5/4/2022	5/4/2024	5/4/2030	5/4/2030	5/4/2038
2018/19	5/4/2023	5/4/2025	5/4/2031	5/4/2031	5/4/2039
2019/20	5/4/2024	5/4/2026	5/4/2032	5/4/2032	5/4/2040
2020/21	5/4/2025	5/4/2027	5/4/2033	5/4/2033	5/4/2041

Where the date is shaded, the Requirement to Correct code extended the time limit if the RTC conditions are satisfied: the RTC deadline of 5 April 2021 applied instead of the earlier date set out shaded in the table.[86] But

[82] See 121.16 (12-year limit: Offshore Matter).

[83] See 121.14 (4 year limit).

[84] See 121.15 (6 year limit: Carelessness).

[85] See 121.17 (20 year limit).

[86] See 121.19 (RTC time limit: 5/4/21).

that deadline has now passed.

This chapter focuses on the current rules. The rules have changed over time, so the older versions of the rules would need to be checked for older years.

For income/gains taxable under the remittance basis, what matters is not the date when the income/gain arose, but the date it is remitted and so assessable.

121.13.2 *Time limits: Policy*

In *Birmingham City Council v Abdulla*:

> ... issues of limitation are bedevilled by an unarticulated tendency to treat it as an unmeritorious procedural technicality. This is, I think, unjustified. Limitation in English law is ... not a technicality, nor is it necessarily unmeritorious... Limitation reflects a fundamental and all but universal legal policy that the litigation of stale claims is potentially a significant injustice. Delay impoverishes the evidence available to determine the claim, prolongs uncertainty, impedes the definitive settlement of the parties' mutual affairs and consumes scarce judicial resources in dealing with claims that should have been brought long ago or not at all.[87]

121.14 4 year limit

s.34(1) TMA	**para 46(1) sch 18 FA 1998**
Subject to the following provisions of this Act, and to any other provisions of the Taxes Acts allowing a longer period in any particular class of case,	Subject to any provision of the Taxes Acts allowing a longer period in any particular class of case
an assessment to income tax or capital gains tax may be made at any time not more than 4 years after the end of the year of assessment to which it relates.	no assessment may be made more than [4 years] after the end of the accounting period to which it relates.

For worked examples, see 125.14 (Assessment time limit: Table).

[87] [2012] UKSC 47 at [41]. I am grateful to Keith Gordon for drawing this comment to my attention.

121.14.1 *Income received after tax year*

Section 35 TMA provides:

> (1) Where income to which this section applies is received in a year of assessment subsequent to that for which it is assessable, an assessment to income tax as respects that income may be made at any time not more than 4 years after the end of the year of assessment in which it was received.
> (2) This section applies to—
> (a) employment income,
> (b) pension income, and
> (c) social security income.

When will this apply?

121.15 6 year limit: Carelessness

s.34(2) TMA	**para 46(2) sch 18 FA 1998**
An assessment on a person in a case involving a loss of income tax or capital gains tax brought about carelessly by the person may be made at any time not more than 6 years after the end of the year of assessment to which it relates	An assessment in a case involving a loss of tax brought about carelessly by the company (or a related person) may be made at any time not more than 6 years after the end of the accounting period to which it relates
(subject to subsection (1A) and any other provision of the Taxes Acts allowing a longer period).	(subject to sub-paragraph (2A) and to any other provision of the Taxes Acts allowing a longer period).

In short, there is normally an (approximately) 4-year limit on assessments. In the case of carelessness, the time limit is 6 years. For worked examples, see 125.14 (Assessment time limit: Table).

121.15.1 *Definition of "careless"*

Careless is relevant for the TMA rules discussed in this chapter, and for penalties. The term is defined twice but with the same meaning, so it is convenient to consider the definitions together:

s.118(5) TMA	**para 3(1) sch 24 FA 07**
For the purposes of this Act a loss of tax or a situation is brought about carelessly by a person if the	For the purposes of a penalty under paragraph 1, inaccuracy in a document given by P to HMRC is –

person fails to take reasonable care to avoid bringing about that loss or situation.	(a) "careless" if the inaccuracy is due to failure by P to take reasonable care ...

121.15.2 *Failure to correct error*

s.118(6) TMA	**para 3(2) sch 24 FA 07**
Where – (a) information is provided to Her Majesty's Revenue and Customs,	An inaccuracy in a document given by P to HMRC, which was neither careless nor deliberate on P's part when the document was given, is to be treated as careless if P –
(b) the person who provided the information, or the person on whose behalf the information was provided, discovers some time later that the information was inaccurate, and	(a) discovered the inaccuracy at some later time, and
(c) that person fails to take reasonable steps to inform HMRC,	(b) did not take reasonable steps to inform HMRC.
any loss of tax or situation brought about by the inaccuracy shall be treated for the purposes of this Act as having been brought about carelessly by that person.	

See too 122.9.1 (Disclosure of weak position).

121.15.3 *Careless/negligent compared*

A note on terminology. Enquiry Manual provides:

> **EM5125 Neglect, Negligence and Negligent Conduct** [Jul 2020]
> The terms neglect, negligence and negligent conduct are interchangeable.

The definition of careless - "failure to take reasonable care" - is the definition of negligence. So "careless" is just a Plain English synonym of "negligent". The change from neglect (the pre-2008 term) to carelessness (the current term) is one of terminology and not of substance.

121.15.4 *What is reasonable care*

There are hundreds of cases discussing what is reasonable care by a taxpayer.

In *Hanson v HMRC*:

> What is reasonable care in any particular case will depend on all the circumstances. In my view this will include the nature of the matters being dealt with in the return, the identity and experience of the agent, the experience of the taxpayer and the nature of the professional relationship between the taxpayer and the agent.[88]

In *Alan Anderson:*

> The "reasonable care" which should be taken is to be assessed by reference to what a reasonable and prudent taxpayer would do looking at an objective hypothetical standard. But what that reasonable and prudent taxpayer would do is not assessed in a vacuum but by reference to the actual circumstances of the taxpayer in question.[89]

The question must be decided in the light of the position as it was at the relevant time without the benefit of hindsight. The fact that a view turns out to be mistaken does not show that it was careless to form that view. Otherwise any judge whose decision is reversed on appeal would be guilty of carelessness and how often does that happen!

121.15.5 *Careless: HMRC guidance*

> **EM5125: neglect, negligence and negligent conduct** [Jul 2020]
> ... Baron Alderson in *Blyth v Birmingham Waterworks Co*, 1856, 11 Ex 781, p784, which was concerned with the law of tort says
>
> > Negligence is the omission to do something which a reasonable man, guided upon those considerations which ordinarily regulate the conduct of human affairs, would do, or doing something which a prudent and reasonable man would not do. The defendants might be liable for negligence, if, unintentionally, they omitted to do that which a reasonable person would have done, or did that which a person taking reasonable precautions would not have done.

Blyth is a classic statement of negligence, but it is not now necessary to refer to a 19th century case on a negligent waterworks company. There is

[88] [2012] UKFTT 314 (TC) at [21].

[89] at [123], approved *Hicks v HMRC* [2018] UKFTT 22 (TC) at [141].

plenty of authority closer to home.

The EM continues:

> We can assume that a reasonable person would, amongst other things
>
> - comply with the requirements of the law by, for example, notifying their chargeability
> - make, promptly, a complete and correct return of their income and gains when required to do so under statutory authority
> - keep such records as are necessary to enable them to make accurate returns or prepare accurate accounts
> - read carefully the notes supplied with the return form, so far as they affect their own circumstances
> - seek professional help with matters, such as the preparation of accounts, which they are unable to cope with satisfactorily alone.
>
> The longstanding concept in general law of "negligence" can be linked to the concept of "failure to take reasonable care" for penalties under FA07/Sch24. Although it is not binding, the First Tier Tribunal (FTT) case, *David Collis v HMRC Commissioners* [2011] UKFTT 588(TC), provides a clear link between these two concepts. In this case "reasonable care" was defined as being "that of a prudent and reasonable taxpayer in the position of the taxpayer in question". For further guidance, see CH53400.

The CH Manual provides:

> **CH53400 What Is Careless Behaviour** [May 2020]
>
> ... This is not a question of whether or not the person knew about an inaccuracy in a return or document or their failure to comply with an obligation. If they did that would be deliberate, see CH53700. It is simply a question of examining what the person did or failed to do and asking whether a prudent and reasonable person taking reasonable care would have done that or failed to do that in those circumstances.
>
> Repeated inaccuracies may form part of a pattern of behaviour which suggests a lack of care by a person in developing adequate systems for the recording of transactions or preparing tax returns. Similarly, repeated failures in relation to the relevant obligations in CH53900 to CH54100 inclusive may suggest a lack of care. It is, however, important to keep a sense of proportion. For example, repetition of the same inaccuracy would not always, of itself, indicate a failure to take reasonable care.
>
> People do make mistakes. We do not expect perfection. We are simply seeking to establish whether the person has given the care and attention that could be expected from a reasonable person taking reasonable care

> in similar circumstances.
>
> For examples of careless behaviour and its effect upon the assessing time limit, see CH53500. You will find further help in establishing behaviour in the guidance for the specific offence that has led to the under-assessment or over-repayment of tax.

121.15.6 *Carelessness of agent*

Section 36(1B) TMA provides:

> In subsections (1) and (1A), references to a loss brought about by the person who is the subject of the assessment include a loss brought about by another person acting on behalf of that person.

CT achieves this by its reference to a related person. Para 46(2B) sch 18 FA 1998 provides:

> (2B) In this paragraph "related person", in relation to a company, means—
> (a) a person acting on behalf of the company, or
> (b) a person who was a partner of the company at the relevant time.

What is the meaning of "on behalf of"*?* In *Hicks v HMRC*:[90]

> the expression "person acting on…behalf" is not apt to describe a mere adviser who only provides advice to the taxpayer or to someone who is acting on the taxpayer's behalf. In our judgment the expression connotes a person who takes steps that the taxpayer himself could take, or would otherwise be responsible for taking. Such steps will commonly include steps involving third parties, but will not necessarily do so. Examples would in our view include completing a return, filing a return, entering into correspondence with HMRC, providing documents and information to HMRC and seeking external advice as to the legal and tax position of the taxpayer. The person must represent, and not merely provide advice to, the taxpayer.

In *Shakoor v HMRC*:[91]

> 24. ... If a taxpayer claims that his accountant has been negligent, for example, by failing to meet a deadline for filing a return or undertaking

[90] [2020] UKUT 12 (TCC) at [122]. In *Hicks* the taxpayer conceded that his accountant acted on his behalf, see at [126]; but applying this test, so far as the accountant gave (negligent) tax advice, as opposed to (say) negligently forgetting to file the the tax return, the accountant was not acting on behalf of the taxpayer..

[91] *Shakoor v HMRC* [2012] UKFTT 532 (TC) at [9].

> some or other administrative task, then the negligence of the accountant will not usually provide a defence to a penalty because the accountant is simply acting as the taxpayer's agent or functionary in filing the document that needs to be filed by a particular deadline. In other words, he is acting as a mere agent or functionary for his principal; but not as an independent professional adviser.

But professional advice is different:

> However, in a situation where a professional adviser is not retained simply to act as a functionary, but is retained to give professional advice based upon the best of his skill and professional ability, he is not then a functionary or agent for his principal. He is a professional person acting under a retainer to give professional advice upon identified issues. He is bound to provide that advice to the best of his professional skill and ability, whilst taking reasonable care in and about preparing and giving that advice. In other words, he is acting as a true professional, rather than as an agent or functionary.

This is perhaps a generous reading, but it leads to a sensible result:

> 25. In our judgement, where an accountant acts as a mere agent, administrator or functionary, he is acting as the taxpayer's agent and his default (whether negligent or not) will usually provide a taxpayer with little opportunity to claim that he is not in default of a particular obligation. However, when a professional person acts in a truly professional advisory capacity, the situation is otherwise and reliance upon properly provided professional advice, absent reason to believe that it is wrong, unreliable or hedged about with substantial caveats, will usually lead to the conclusion that a taxpayer has not been negligent if she has taken and acted upon that advice.[92]

121.15.7 *Relying on advisers*

A taxpayer who is not an expert in taxation must leave technical tax issues to their professional advisers. When tax law is complicated a properly represented taxpayer cannot be expected to identify their advisers' mistakes. The Tribunal has often affirmed this:

> In preparing and submitting his return, [the taxpayer] relied on [an accountant]. In all the circumstances I do not consider that he failed to take reasonable care in doing so. A taxpayer, particularly one ... who

[92] [2012] UKFTT 532 (TC).

> lacked any real tax expertise, is entitled to rely on his adviser, with some caveats.

Four caveats are identified:

> [1] The taxpayer should reasonably believe that the adviser is competent in the field in question, if necessary with the assistance of third parties for information, technical input or expert advice;
> [2] he should ensure that he supplies the adviser with the information the adviser needs to prepare and complete the return;
> [3] he should check the adviser's work to the extent he is able to do so, and
> [4] he should not rely blindly on the adviser's advice if it is obviously wrong or adopts a clearly untenable position.[93]

A fifth caveat is if the disqualified advice rules apply.[94]

For an example of an individual able to rely on his adviser to avoid an accusation of carelessness, see 17.12.1 (7 & 12-year residence tests) where the taxpayer's accountants ticked the wrong long-term residence box. For an example of an individual unable to rely on advice, see *Thomson v HMRC*:[95]

> [Counsel's] opinion would not, however, have given a reasonable taxpayer in Mr Thomson's position comfort that he was carrying on a trade on a commercial basis with a view to profit since the advice on this

[93] *Hicks v HMRC* [2018] UKFTT 22 (TC) at [200]; likewise *AB v HMRC* [2007] STC (SCD) 99 at [105]; *Shakoor v HMRC* [2012] UKFTT 532 (TC) at [21]; and many examples could be given.
Hicks has clearly been influenced by submissions based on "Modernising Powers, Deterrents and Safeguards: Working with Tax Agents" (2009).
"A taxpayer who
[1] goes to an ostensibly competent professional adviser,
[2] provides a full and accurate account of the facts,
[3] checks that advice to the limit of his or her ability and competence,
[4] and then follows the agent's advice (or signs the return prepared on that basis) has not been negligent. He or she has taken reasonable care. If it turns out that the agent has made a careless error in giving the advice or in preparing the tax return the taxpayer who has taken reasonable care will not be penalised."
This wording was somewhat overfavourable to HMRC (depending on what nuance one puts on the expressions used) and the Tribunal toned down the rigour of paragraphs [2] and [3].

[94] See 126.11 (Disqualified advice codes).

[95] [2018] UKFTT 396 (TC) at [223].

issue was generic and did not take into account the actual transactions that Mr Thomson had effected.

What should the taxpayer do if two advisers disagree? A safe course (if the amounts involved make this reasonable) is to seek the advice of counsel, or more senior counsel, or a KC, but what is to be done if two KCs disagree or if the amount at stake does not justify the expense? It is suggested that the correct course is as follows:

(1) The individual must consider whether one view or the other is obviously or glaringly wrong. However it is not to be expected that this will often provide a solution.

(2) Subject to that, the individual can in principle follow whichever view suits them, provided that the person whose advice is adopted is suitably experienced, has seen the contrary advice and maintains their view. Then (even if the practitioner whose view is adopted turns out to be wrong) any error is non-careless and a reasonable-excuse error. Either position passes the properly-arguable standard, indeed both may pass the reasonably-arguable standard.

121.15.8 *Standard of care: Practitioners*

Carelessness by tax practitioners may matter for various purposes, including:

(1) Time limit for assessment (where the agent is acting on behalf of the taxpayer)

(2) Negligence claim against the practitioner

(3) Professional conduct (mere carelessness is not misconduct, but sufficiently gross carelessness can be)

The question here is what a tax practitioner should do in advising or completing a client's tax return. The standard of care is that to be expected of a reasonable practitioner.[96]

A solicitor or accountant is entitled to rely on advice given by an appropriate expert counsel (provided it is not obviously or glaringly

[96] The adviser's duty is not merely (merely?) to understand the law. They should explain it clearly and record it in writing; (is this so obvious that it is unnecessary to say? It is not: *Chandrasekaran v Deloitte & Touche Wealth Management* [2004] EWHC 1378 at [72]). They should explain risks: *Barker v Baxendale Walker* [2018] STC 310 at [59] - [73]; though the extent of the duty to explain risks is "highly fact-sensitive" and *Baxendale Walker* is likely to be an outlier.

wrong). A person who acts in this way is not careless.[97] This rule applies in the completion of a tax return.

What should a practitioner do if the law is so unclear that they are unable to form a view? In many cases the only honest answer to the question of how a court would decide is "I don't know" or "toss a coin". This includes some basic issues, such as the source of interest. In such cases the proper course is to file the tax return on whichever view best suits the client. Both views may pass the reasonably-arguable standard.

A trickier question is where professional views differ between views A and B, the practitioner prefers view A, but view B suits the client. It is suggested the practitioner can advise the client to fill in their return on view B. Take, for example, the old chestnut problem of GWR and trusts. Some practitioners thought there is no IHT charge on the death of an individual who has a GWR in an excluded property trust even if they are IHT deemed domiciled (or indeed actually UK domiciled). Some practitioners (I think, a minority) took the view that there is a charge and for a decade or so HMRC also officially took that view.[98] Should they really advise their clients to file the return on that basis? I would have thought not. If that were wrong, then the best advice one could give would be to change advisers, which can hardly be right.

121.15.9 *Practitioners advising themselves*

In *Thomson v HMRC*:[99]

> If Mr Thomson had performed a proper analysis of the law and applied that to his own activities, it might have been reasonable for Mr Thomson to rely on his own belief that the Pendulum arrangements produced the relievable trading loss he was claiming. However, Mr Thomson performed no such proper analysis. Moreover, a reasonable tax professional would have realised that his own analysis of the efficacy of the arrangements might be influenced by a wish to obtain the tax saving

[97] See Jackson & Powell, *Professional Liability* (8th ed, 2016), para 11-120; *Langsam v Beachcroft LLP* [2012] EWCA Civ 1230 at [85].
Contrast *Hicks v HMRC* at [2018] UKFTT 22 (TC) at [206] where an accountant was not negligent for relying on advice from a scheme provider, even though that was not an independent source of advice. But see 126.11 (Disqualified advice).

[98] This paragraph was written before HMRC issued guidance accepting the view put forward in this book, which for practical purposes resolves the problem; but I retain the text as the example neatly illustrates the issue.

[99] [2018] UKFTT 396 (TC) at [224].

> that was being offered and taken particular care to ensure that, if he "advised himself" on the arrangements, his advice was appropriately objective and dispassionate. Mr Thomson took no such care. No doubt because he wanted to reduce his tax liability he performed only the most cursory analysis of the law before concluding that he could properly claim the loss. That falls short of taking reasonable care.

121.15.10 *Careless: Causation*

The issue is not whether a person is careless in general or in the abstract, but whether their failure to take reasonable care brought about the insufficiency.[100] There must be causal carelessness. In *Marsh v HMRC*:[101]

> Because income from property is always taxable irrespective of a person's residence status it was in our view careless of the appellant to omit it from her returns. The discovery assessment is therefore justified in relation to this income. But this small amount does not we think act as a peg, or jumping off point, to justify the much larger CGT assessment. We think that s 29(1) TMA must be considered separately in relation to each source at least as far as income and chargeable gains are concerned.

121.15.11 *Carelessness: Onus of proof*

The onus of proof rests on HMRC to prove carelessness. In the 2013/14 edition of this work I said:

> An allegation of carelessness is a serious one and it should not be lightly made. I stress these points because HMRC ignore them and allege neglect as a matter of course, whenever carelessness is necessary to justify out of time assessments.[102]

There has been Tribunal criticism:

> It is ... curious that of the 134 clients that had implemented the scheme, that did not escape penalties by having died, emigrated or become insolvent, all, bar the possible exception of one, were subjected to

[100] See *Hicks v HMRC* [2018] UKFTT 22 (TC) at [187].

[101] [2017] UKFTT 320 (TC) at [133].

[102] International Manual which formerly contained this revealing statement:
*"**INTM268520 Assessing time limits** [June 2022]*
If we come to the reasonable conclusion that there is a PE, or that the company is resident in the UK, there must have been careless or deliberate conduct in the failure to notify."
It is encouraging to note that this sentence was deleted May 2023.

> penalties. When the test of reasonable conduct must indicate on these facts that all 134 or 133 participants uniformly had standards that fell below that of the reasonable man, the obvious question must be posed as to whether the standards of the reasonable man have been pitched too high.[103]

HMRC practice did not change, and the criticism was repeated in *H&H Contract Scaffolding Ltd v HMRC*:[104]

> The Respondents' case therefore appears to be that if the Appellant cannot show that it qualified for the claim made then the Appellant would have been careless. The Tribunal disagrees. ... The existence of the inaccuracy does not answer whether the inaccuracy itself is careless.

See too 4.24.9 (Allegation of carelessness).

121.16 12-year limit: Offshore Matter

Section 36A TMA provides:

> (1) This section applies in a case involving a loss of income tax or capital gains tax, where—
>
> (a) the lost tax involves an offshore matter, or
>
> (b) the lost tax involves an offshore transfer which makes the lost tax significantly harder to identify.
>
> (2) An assessment on a person ("the taxpayer") may be made at any time not more than 12 years after the end of the year of assessment to which the lost tax relates.
>
> This is subject to
>
> [a] section 36(1A) above[105] and
>
> [b] any other provision of the Taxes Acts allowing a longer period.

Section 36A(11) TMA provides:

> Section 36(2) to (3A) applies for the purposes of this section (as if references to section 36(1) or (1A) were to subsection (1) of this section).

This applies rules concerning partnerships[106] and claim time limits[107].

[103] *Herefordshire Property Company v HMRC* [2015] UKFTT 79 (TC) at [46].

[104] [2024] UKFTT 151 (TC) at [12].

[105] See 121.17 (20 year limit: deliberate error).

[106] See 121.17.6 (Partnership default).

[107] See 123.8 (Late claim: Culpable taxpayer).

For the definitions of Offshore Matter/Transfer, see 126.23 (Offshore/ domestic matters).

121.16.1 *Significantly harder to identify*

This is required for an Offshore Transfer but not for an Offshore Matter.

Where:

(1) there is not an Offshore Matter, and

(2) there is an Offshore Transfer, made before the relevant date,

it may be desired to make an appropriate disclosure in the white space of a tax return. Then lost tax (if there is any) is not "significantly harder to identify" and the 12-year assessment period will not apply. But of course in a case where there might be lost tax, disclosure may be necessary, or desirable, for other reasons.

Section 36A(6) TMA elucidates the concept of "significantly harder to identify":

> Where lost tax involves an offshore transfer, the cases in which the transfer makes the lost tax significantly harder to identify include any case where, because of the transfer—
>
> (a) HMRC was significantly less likely to become aware of the lost tax, or
>
> (b) HMRC was likely to become aware of the lost tax only at a significantly later time.

That seems (more or less) self-evident.

121.16.2 *12-year limit: Exceptions*

Section 36A TMA provides:

> (7) But an assessment may not be made under subsection (2) if—
>
> (a) before the time limit that would otherwise apply for making the assessment, HMRC received relevant overseas information on the basis of which HMRC could reasonably have been expected to become aware of the lost tax, and
>
> (b) it was reasonable to expect the assessment to be made before that time limit.
>
> (8) In subsection (7)(a) "relevant overseas information" means information which is provided to HMRC by an authority in a territory outside the UK under—
>
> (a) any provision of EU law relating to any tax, or

> (b) an agreement to which the UK and that territory are parties, with or without other parties.

The House of Lords Economic Affairs Committee said:

> We see no logic in applying an exclusion from the time limit to situations where information has been supplied by overseas tax authorities, but not where that same information has been supplied by the taxpayer.[108]

But there it is.

121.16.3 *Transfer pricing time limit*

For completeness: s.36A(9) TMA provides:

> An assessment may also not be made under subsection (2) to the extent that liability to the lost tax arises as a result of an adjustment under Part 4 of TIOPA 2010 (transfer pricing adjustments).

121.16.4 *12-year limit: Commencement*

Section 36A was introduced by s.80 FA 2019. Section 80(5) FA 2019 provides:

> The amendments made by this section have effect—
> (a) in relation to assessments on a person relating to the 2013-14 year of assessment and subsequent years of assessment, where the loss of tax is brought about carelessly by that person or by a person acting on that person's behalf, and
> (b) in any other case, in relation to assessments relating to the 2015-16 year of assessment and subsequent years of assessment.

That is, the 12 year time limit applies to assessments which were in time to assess in 2019/20 (ie on 5 April 2020).

In the absence of carelessness, the years 2013/14 and 2014/15 cannot be assessed under the 12 year time limit. Those years could have been assessed up to 5/4/2021, under the RTC time limit[109] which does not require carelessness; but that power to assess has now lapsed.

[108] Economic Affairs Committee, "The Powers of HMRC: Treating Taxpayers Fairly" (2018) para 42 *https://publications.parliament.uk/pa/ld201719/ldselect/ldeconaf/242/242.pdf*

[109] See 121.19 (RTC time limit: 5/4/21). For completeness: This view is confirmed by *Scott v HMRC* [2023] UKFTT 360 (TC).

121.16.5 *12 year limit: Critique*

The House of Lords Economic Affairs Committee said:

> 41. This proposal places burdens on all those with offshore elements to their tax affairs to retain records for long periods of time to deal with potential HMRC questions. HMRC already has a 20-year time limit to deal with fraud. We consider the extension of time limits to 12 years for offshore matters unreasonably onerous and disproportionate to the risk.
> ...
> 43. It is wrong if, rather than funding HMRC sufficiently to conduct offshore enquiries in a timely manner, the Government is placing disproportionate burdens on taxpayers and eroding important taxpayer safeguards.
> 44. There was deep and consistent opposition from our witnesses to the proposed legislation to extend the offshore time limits for assessment. Witnesses felt this measure was unnecessary and undesirable. We recommend that it is withdrawn.
> 45. The Government should start a fresh dialogue with representatives of tax professionals to consider how offshore tax matters can be managed more effectively. Any revised measure should be more proportionate and targeted.[110]

This may be seen in the context of a longstanding struggle by the Lords for involvement in Finance Bills, which the Government have consistently resisted. The controversy - combined with a lack of a Government majority - did lead to an unusual provision requiring a government review on the topic.[111] The review was duly published,[112] but it was just a restatement of the HMRC case for the legislation. A statutory provision requiring the Government to assess the success of its own policy, in an area of political controversy, is not likely to be productive.

[110] Economic Affairs Committee, "The Powers of HMRC: Treating Taxpayers Fairly" (2018) *https://publications.parliament.uk/pa/ld201719/ldselect/ldeconaf/242/242.pdf*

[111] Section 95(1) FA 2019 provided: "The Chancellor of the Exchequer must review the effects of the changes made by sections 80 and 81 to TMA 1970 and IHTA 1984, and lay a report on that review before the House of Commons not later than 30 March 2019."

[112] HM Treasury, "Section 95 of the Finance Act 2019: report on time limits and the charge on disguised remuneration loans" (2019) *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/789160/DR_loan_charge_review_web.pdf*

121.17 20 year limit: deliberate error

s.36(1A) TMA	**para 46(2A) sch 18 FA 1998**
An assessment on a person in a case involving a loss of income tax or capital gains tax —	(2A) An assessment in a case involving a loss of tax—
(a) brought about deliberately by the person ...	(a) brought about deliberately by the company (or a related person) ...
may be made at any time not more than 20 years after the end of the year of assessment to which it relates (subject to any provision of the Taxes Acts allowing a longer period).	may be made at any time not more than 20 years after the end of the accounting period to which it relates (subject to any provision of the Taxes Acts allowing a longer period).

There are no provisions allowing a longer period: the drafter copied the words in brackets inappropriately, from s.36(1).

For worked examples, see 125.14 (Assessment time limit: Table).

121.17.1 *Inaccuracy*

In order to determine whether a tax return is inaccurate, one has to read the whole of it.[113]

121.17.2 *"Deliberate" inaccuracy*

HMRC v Tooth has explained "deliberate inaccuracy". It means:

> An inaccuracy in a document is a statement which is inaccurate. Thus the required intentionality is attached both to the making of the statement and to its being inaccurate... for there to be a deliberate inaccuracy in a document ... there will have to be demonstrated an intention to mislead the Revenue on the part of the taxpayer as to the truth of the relevant statement or, perhaps, (although it need not be decided on this appeal) recklessness as to whether it would do so.[114]

A deliberate error is in general also likely to be dishonest, indeed it is the

[113] The reader may think that so obvious it did not need saying, and so did the Supreme Court ("This is, with respect, a very unattractive argument"). But a majority of the CoA had reached the opposite conclusion.

[114] [2021] UKSC 17 at [42, [47]; reversing the CoA decision which this work had described as astonishing.

paradigm of tax-dishonesty. However the two concepts are not quite the same.[115] It is possible to envisage a deliberate error which is not (or at least, may not be) dishonest, eg:

(1) Where the amount involved is immaterial, and less than the cost of finding the right figure

(2) Where everyone else, or at least most others, are doing the same

(3) Where the taxpayer reasonably believes that such is the case

121.17.3 *Recklessness*

Canada Square Operations Ltd v Potter[116] considered the meaning of deliberately concealment in the Limitation Act 1980, noting that "Although 'deliberate' is a common English word, I do not consider that there is a clear, 'natural' meaning in this context". The word includes actual awareness of the commission of the act or concealment, and wilful blindness to the same. It also encompassed recklessness.

Although *Tooth* left the point open, it is considered that recklessness should suffice for deliberate behaviour. This raises the question of what amounts to recklessness. In *Canada Square Operations Ltd v Potter:*[117]

> a person acts recklessly with respect to a circumstance when he is aware of a risk that it exists or will exist and it is, in the circumstances known to him, unreasonable to take the risk. A person acts recklessly with respect to a result when he is aware of the risk that it will occur and it is, in the circumstances known to him, unreasonable to take that risk.

In *Clynes v HMRC*:[118]

> ... an inaccuracy may also be held to be deliberate where it is found that the person consciously or intentionally chose not to find out the correct position, in particular, where the circumstances are such that the person knew that he should do so. A person cannot simply escape liability by claiming complete ignorance where the person clearly knew that he should have taken steps to ascertain the position. We view the case where a person makes such a conscious choice not to take such steps

[115] This is self-evident, but if authority is needed, see *Clynes v HMRC* [2016] UKFTT 369 (TC) at [80]: "cases on the meaning of "dishonesty" are not of material assistance in interpreting the provisions of schedule 24 as regards "deliberate" conduct."

[116] [2021] EWCA Civ 339 at [86] ff.

[117] [2021] EWCA Civ 339 at [87].

[118] [2016] UKFTT 369 (TC) at [86] followed in *Grangewood Enterprises v HMRC* [2021] UKFTT 323 (TC).

> with the result that an inaccuracy occurs, as no less of a "deliberate inaccuracy" on that person's part than making the inaccuracy with full knowledge of the inaccuracy.

In *Rodriguez-Issa v HMRC:*[119]

> We agree that an inaccuracy may be held to be deliberate where it is found that the person consciously or intentionally chose not to find out the correct position. However, as the Tribunal indicated in *Clynes*, this will be a question of fact and degree that must be determined on a case by case basis. Care must be taken not to blur the line between careless and deliberate conduct.

121.17.4 *Deliberate error of agent*

Section 36(1B) TMA provides:

> In subsections (1) and (1A), references to a loss brought about by the person who is the subject of the assessment include a loss brought about by another person acting on behalf of that person.

The same agency rule applies for carelessness and for deliberate error; see 121.15.6 (Carelessness of agent).

Section 118(7) TMA provides:

> In this Act references to a loss of tax or a situation brought about deliberately by a person include a loss of tax or a situation that arises as a result of a deliberate inaccuracy in a document given to Her Majesty's Revenue and Customs by or on behalf of that person.

Thus the s.36(1A) rule applies if:

(1) There is an inaccuracy in a document
(2) The inaccuracy is deliberate
(3) The document is given to HMRC (typically, a tax return)
(4) The document is given by/on behalf of the individual

121.17.5 *Deliberate: HMRC examples*

The Compliance Handbook offers some common examples of deliberate behaviour:

> **CH53700 What is deliberate behaviour?** [Nov 2019]
>
> ...
>
> - knowingly failing to record all sales, especially where there is a

[119] [2021] UKFTT 154 (TC) at [22].

pattern to the under-recording, such as omitting all transactions with a particular customer or at a particular time of the week, month or year

- describing transactions inaccurately or in a way likely to mislead
- giving a VAT return to HMRC that includes a figure of net VAT due that is too low because the person does not have the cash at that time to pay the full amount, and later telling HMRC the true figure when he has the funds to pay
- similarly declaring less tax due for aggregates levy, climate change levy, landfill tax or excise duty because the person does not have the funds at that time to pay the full amount
- claiming a deduction for personal expenses of such a size or frequency that the inaccuracy must have been known
- knowingly making an understatement of consideration on SDLT1 compared to Land Registry form (TR1) to reduce the SDLT payable
- knowingly making a duplicated claim for repayment of SDRT
- knowingly claiming a higher (than is just and reasonable) proportion of shared costs in a taxable field for petroleum revenue tax
- knowingly omitting or understating the value of a property for inheritance tax...

121.17.6 *Partnership default*

Section 36(2) TMA provides:

> [a] Where the person mentioned in subsection (1) or (1A) [person who commits careless/deliberate error] ("the person in default") carried on a trade, profession or business with one or more other persons at any time in the period for which the assessment is made,
>
> [b] an assessment in respect of the profits or gains of the trade, profession or business in a case mentioned in subsection (1A) or (1B) [deliberate error] may be made not only on the person in default but also on his partner or any of his partners.

This seems to apply only in a s.36(1A) case, ie deliberate error/failure to notify/breach of DOTAS.

121.18 20 year limit: Failure to notify

s.36(1A) TMA	**para 46 sch 18 FA 1998**
An assessment on a person in a case involving a loss of income tax or capital gains tax ...	An assessment in a case involving a loss of tax—

(b) attributable to a failure by the person to comply with an obligation under section 7 ...	(b) attributable to a failure by the company to comply with an obligation under paragraph 2 ...
may be made at any time not more than 20 years after the end of the year of assessment to which it relates (subject to any provision of the Taxes Acts allowing a longer period).	may be made at any time not more than 20 years after the end of the accounting period to which it relates (subject to any provision of the Taxes Acts allowing a longer period).

For the obligation to notify liability under s.7/para 2, see 121.2 (Duty to notify HMRC).

There are no provisions allowing a longer period than 20 years: the drafter copied the words in brackets, inappropriately, from s.36(1).

For worked examples, see 125.14 (Assessment time limit: Table).

This applies even if the person was not careless or dishonest, eg if they reasonably thought that they were under no duty to notify.

If a person puts in a notice of liability late, there is a failure to comply with s.7/para 2, but the loss of tax may not be attributable to that failure.

121.19 RTC time limit: 5/4/21

Para 26 sch 18 F(no.2)A 2017 provides:

> (1) This paragraph applies where-
> (a) at the end of the tax year 2016-17 a person has relevant offshore tax non-compliance to correct,[120] and
> (b) the last day on which it would (disregarding this paragraph) be lawful for HMRC to assess[121] the person to any offshore tax[122] falls within the period beginning with 6 April 2017 and ending with 4[123] April 2021.
>
> (2) The period in which it is lawful for HMRC to assess the person to the offshore tax is extended by virtue of this paragraph to end with 5

[120] See 126.44 (Relevant offshore tax non-compliance).

[121] Tax includes IHT, and "assess" includes an IHT notice of determination: see 126.49 (RTC: Interpretation).

[122] Para 26(3) sch 18 F(no.2)A 2017 provides: "In this paragraph "offshore tax", in relation to any relevant offshore tax non-compliance, means tax corresponding to the offshore PLR [potential lost revenue] in respect of the non-compliance." See 126.31 (Offshore PLR).

[123] This seems to be a slip for 5 April.

April 2021.

This was a stop gap, pending the introduction of the 12 year time limit for Offshore Matters, in 2019.[124] The rule effectively lapsed on 6 April 2021.

Normal assessing rules apply to decide whether HMRC is able to raise an assessment in the period 6/4/2017 - 4/4/2021. For worked examples, see 125.14 (Assessment time limit: Table).

An assessment under the extended RTC time limit is possible even though:

(1) A taxpayer has a reasonable excuse, and so is not subject to a penalty under the RTC rules; and

(2) The taxpayer has not been careless.

121.20 Personal representatives

121.20.1 *Liability of PRs*

The starting point is that PRs step into the shoes of the deceased. Section 74 TMA provides:

> (1) If a person chargeable to income tax dies, the executor or administrator of the person deceased shall be liable for the tax chargeable on such deceased person, and may deduct any payments made under this section out of the assets and effects of the person deceased.
> (2) On neglect or refusal of payment, any person liable under this section may be proceeded against in like manner as any other defaulter.

I cannot find an equivalent for CGT, but no-one doubts that the same principle applies.

121.20.2 *Time limits for assessing PRs*

Section 40(1) TMA provides a time limit for assessing PRs:

> (1) For the purpose of the charge of tax[125] on the executors or administrators of a deceased person in respect of the income, or chargeable gains, which arose or accrued to him before his death, the time allowed by section 34, 35, 36 or 36A above shall in no case extend

[124] See 121.16 (12-year limit: Offshore Matter).

[125] Section 40(3) provides:
In this section "tax" means income tax or capital gains tax.
That is unnecessary as the general definition in the TMA would have the same effect, but it does no harm.

> more than 4 years after the end of the year of assessment in which the deceased died.

Section 40(2) TMA provides:

> In a case involving a loss of tax brought about carelessly or deliberately by a person who has died (or another person acting on that person's behalf before that person's death), an assessment on his personal representatives to tax for any year of assessment ending not earlier than six years before his death may be made at any time not more than 4 years after the end of the year of assessment in which he died.

By implication, HMRC cannot assess PRs for years of assessment ending earlier than 6 years before death. It may be useful to set out an aide memoire of IT/CGT time limits for PRs:

Year of death	**Tax years in time to assess**		**Last assessment date**
	Not careless	*Careless/deliberate*	
2018/19	2014/15	2012/13	5 April 2023
2019/20	2015/16	2013/14	5 April 2024
2020/21	2016/17	2014/15	5 April 2025
2021/22	2017/18	2015/16	5 April 2026

121.21 Enquiry ends: Closure notice

Section 28A TMA provides:

> (1A) Any matter to which the enquiry relates is completed when an officer of Revenue and Customs informs the taxpayer by notice (a "partial closure notice") that the officer has completed his enquiries into that matter.
>
> (1B) The enquiry is completed when an officer of Revenue and Customs informs the taxpayer by notice (a "final closure notice")—
>
> (a) in a case where no partial closure notice has been given, that the officer has completed his enquiries, or
>
> (b) in a case where one or more partial closure notices have been given, that the officer has completed his remaining enquiries.
>
> (2) A partial or final closure notice must state the officer's conclusions and—
>
> (a) state that in the officer's opinion no amendment of the return is required, or
>
> (b) make the amendments of the return required to give effect to his conclusions.
>
> (3) A partial or final closure notice takes effect when it is issued.

121.21.1 *Application for closure notice*

Section 28A TMA provides:

> (4) The taxpayer[126] may apply to the tribunal for a direction requiring an officer of the Board to issue a partial or final closure notice within a specified period.
> (5) Any such application is to be subject to the relevant provisions of Part 5 of this Act (see, in particular, section 48(2)(b)).
> (6) The tribunal shall give the direction applied for unless satisfied that there are reasonable grounds for not issuing the partial or final closure notice within a specified period.
> (8) In the Taxes Acts, references to a closure notice under this section are to a partial or final closure notice under this section.

121.22 Appeals

A discussion of tax appeals needs a book to itself, and a number of such books have been written.

121.22.1 *Right of appeal*

Section 31(1) TMA confers the right to appeal:

> An appeal may be brought against—
> (a) any amendment of a self-assessment under section 9C of this Act (amendment by Revenue during enquiry to prevent loss of tax),
> (b) any conclusion stated or amendment made by a closure notice under section 28A or 28B of this Act (amendment by Revenue on completion of enquiry into return),
> (c) any amendment of a partnership return under section 30B(1) of this Act (amendment by Revenue where loss of tax discovered), or
> (d) any assessment to tax which is not a self-assessment.

The rest of s.31 provides minor supplemental rules.

> (2) If an appeal under subsection (1)(a) above against an amendment of a self-assessment is made while an enquiry is in progress in relation to any matter to which the amendment relates or which is affected by the amendment none of the steps mentioned in section 49A(2)(a) to (c) may

[126] Section 28ZA(7) provides: "In this section "the taxpayer" means the person to whom notice of enquiry was given."

be taken in relation to the appeal until a partial closure notice is issued in relation to the matter or, if no such notice is issued, a final closure notice is issued.

(3A) In the case of a simple assessment, the right to appeal under subsection (1)(d) does not apply unless and until the person concerned has—

(a) raised a query about the assessment under section 31AA, and

(b) been given a final response to that query.

(4) This section has effect subject to any express provision in the Taxes Acts, including in particular any provision making one kind of assessment conclusive in an appeal against another kind of assessment.

121.22.2 *Determination of appeal*

Section 50 TMA provides:

(6) If, on an appeal notified to the tribunal, the tribunal decides—

(a) that the appellant is overcharged by a self-assessment;

(b) that any amounts contained in a partnership statement are excessive; or

(c) that the appellant is overcharged by an assessment other than a self-assessment,

the assessment or amounts shall be reduced accordingly, but otherwise the assessment or statement shall stand good.

(7) If, on an appeal notified to the tribunal, the tribunal decides—

(a) that the appellant is undercharged to tax by a self-assessment;

(b) that any amounts contained in a partnership statement are insufficient; or

(c) that the appellant is undercharged by an assessment other than a self-assessment,

the assessment or amounts shall be increased accordingly.

(7A) If, on an appeal notified to the tribunal, the tribunal decides that a claim or election which was the subject of a decision contained in a closure notice under section 28A of this Act should have been allowed or disallowed to an extent different from that specified in the notice, the claim or election shall be allowed or disallowed accordingly to the extent that the tribunal decides is appropriate, but otherwise the decision in the notice shall stand good.

(8) Where, on an appeal notified to the tribunal against an assessment (other than a self-assessment) which—

(a) assesses an amount which is chargeable to tax, and

(b) charges tax on the amount assessed,

the tribunal decides as mentioned in subsection (6) or (7) above, the

> tribunal may, unless the circumstances of the case otherwise require, reduce or, as the case may be, increase only the amount assessed; and where any appeal notified to the tribunal is so determined the tax charged by the assessment shall be taken to have been reduced or increased accordingly.
>
> (9) Where any amounts contained in a partnership statement are reduced under subsection (6) above or increased under subsection (7) above, an officer of the Board shall by notice to each of the relevant partners amend—
>
> (a) the partner's return under section 8 or 8A of this Act [SA return], or
>
> (b) the partner's company tax return,
>
> so as to give effect to the reductions or increases of those amounts.

121.22.3 *Further appeals*

Section 50 TMA provides:

> (10) Where an appeal is notified to the tribunal, the decision of the tribunal on the appeal is final and conclusive.
>
> (11) But subsection (10) is subject to—
>
> (a) sections 9 to 14 of the TCEA [Tribunals, Courts and Enforcement Act] 2007,
>
> (b) Tribunal Procedure Rules, and
>
> (c) the Taxes Acts.

121.23 CT registration

121.23.1 *1st accounting period: s.55 notice*

Section 55(1) FA 2004 provides:

> A company[127] must give notice to the Board—
>
> (a) of the beginning of its first accounting period,[128] and
>
> (b) of the beginning of any subsequent accounting period that does not immediately follow the end of a previous accounting period.

I refer to this as a "**s.55 notice**".

[127] Section 55(5) FA 2004 provides: "In this section ... (b) "company" means a body corporate and does not include an unincorporated association or a partnership." This is a non-standard definition as company normally includes an unincorporated association; see 90.8 (Definition of "company"). I would be interested if readers could suggest the reason, perhaps it lies in the history of the provision. But the point will not often arise.

[128] Section 55(5) FA 2004 provides: "In this section— (a) "accounting period" means an accounting period for the purposes of corporation tax".

The rules defining accounting periods are in Chapter 2 Part 2 CTA 2009. I do not consider the rules relating to companies in administration or winding up.

In short, merely holding an asset does not bring a company within the requirement to serve a s.55 notice. There must be one of the following:

(1) profits within CT
(2) a UK company carries on a business (even if not producing profits)
(3) a chargeable gain/allowable loss

121.23.2 *Company within charge to CT*

Section 9(1) CTA 2009 provides the general rule:

> An accounting period of a company begins—
> (a) when the company comes within the charge to corporation tax, or
> (b) immediately after the end of the previous accounting period of the company, if the company is still within the charge to corporation tax.

This applies in particular if:

(1) An offshore company carried on a UK property business prior to the introduction of CT on its property income; the first accounting period begins 6 April 2020, so a notice was required by 6 June 2020.
(2) A non-resident company deals in/develops UK land and realises a profit

121.23.3 *UK company starts business*

Section 9(2) CTA 2009 provides:

> For the purposes of this section a UK resident company is treated as coming within the charge to corporation tax when it starts to carry on business, if it would not otherwise be within the charge to corporation tax.

121.23.4 *Chargeable gain/allowable loss*

Section 9(3) CTA 2009 provides:

> If a chargeable gain or allowable loss accrues to a company at a time which is not (ignoring this subsection) within an accounting period of the company—
> (a) an accounting period of the company begins at that time, and
> (b) the gain or loss accrues in that accounting period.

The context shows that there is only a duty to put in a s.55 notice where a chargeable gain is within the scope of CT.[129]

What if a loss is in principle allowable but no notice is given under s.16(2A) TCGA? This is not an allowable loss so no s.55 notice is strictly needed.[130] HMRC guidance seems to assume that a s.55 notice is expected. But there is no clear statement to that effect: it appears HMRC have not noticed this point. However in practice the company would normally put in s.55 notice, either for the avoidance of doubt, or because the company wants to have the allowable loss, in order to set it against a future chargeable gain.

121.23.5 *When accounting period ends*

Section 10 CTA 2009 provides:

> (1) An accounting period of a company comes to an end on the first occurrence of any of the following—

There follow a list of 10 circumstances when an accounting period ends:

> (a) the ending of 12 months from the beginning of the accounting period,
> (b) an accounting date of the company,
> (c) if there is a period for which the company does not make up accounts, the end of that period,
> (d) the company starting or ceasing to trade,
> (e) if the company carries on only one trade, coming, or ceasing to be, within the charge to corporation tax in respect of that trade,
> (f) if the company carries on more than one trade, coming, or ceasing to be, within the charge to corporation tax in respect of all the trades it carries on,
> (g) the company becoming, or ceasing to be, UK resident,
> (h) the company ceasing to be within the charge to corporation tax,
> (i) the company entering administration, and
> (j) the company ceasing to be in administration.

If a company not otherwise required to register disposes of a land-rich asset:

(1) An accounting period begins as it will in principle realise a gain or a loss.

[129] The drafter has overlooked the definition of chargeable gain; see 56.6.1 ("Chargeable" gain).

[130] See 123.2.3 (Capital loss claims).

(2) The accounting period ends the next day, as it ceases to be within the charge to CT.[131]

So a notice is required each time there is a disposal of a land-rich asset.

121.23.6 *Content of notice*

Section 55(2) FA 2004 provides:

> The notice required by this section—
> (a) must be in writing;
> (b) must state when the accounting period began;
> (c) must contain such other information as may be prescribed;
> (d) may be given to any officer of the Board ...

Reg 2 Corporation Tax (Notice of Coming within Charge - Information) Regulations 2004 provides:

> (1) For the purposes of [s.55(2)(c) FA 2004] the information specified in the following paragraphs of this regulation is prescribed.
> (2) In the case of the company's accounting period falling within either paragraph (a) or (b) of [s.55(1) FA 2004], the prescribed information is the date on which that accounting period commenced (within the meaning of [s.12(2) ICTA 1988) [now, s.9 CTA 2009]), together with the information in paragraph (3).
> (3) The information to be given in respect of any company to which the section applies is–
> (a) the company's name and its registered number;
> (b) the address of the company's registered office;
> (c) the address of the company's principal place of business;
> (d) the nature of the business being carried on by the company;
> (e) the date to which the company intends to prepare accounts;
> (f) the full name and home address of each of the directors of the company;
> (g) if the company has taken over any business, including any trade, profession or vocation formerly carried on by another–
> (i) the name and address of that former business; and
> (ii) the name and address of the person from whom the business was acquired;
> (h) if the company is deemed, by virtue of [s.413(3) ICTA 1988, now s.152 CTA 2010], to be a member of a group of companies

[131] It is suggested that a company ceases to be within the charge even if it realised a loss on the disposal.

> for the purposes of [Chapter 4 Part 10 ICTA, now Part 5 CTA 2010], the name of the parent company and the address of its registered office; and
>
> (i) in the case of a company which, at the time it gives notice under the section, has been obliged to comply with the requirements of the Income Tax (Pay as You Earn) Regulations 2003, the date on which that obligation first arose.

The CTM provides:

> **COM40030: Case records: new company records: information a company must provide to HM Revenue and Customs** [Nov 2019]...
> **Companies newly coming within the charge to CT**
> When a company registers at Companies House, they have the opportunity to supply the required information if it is available. However, many companies do not start to trade immediately and do not have all the necessary information at the time of registration.
> COTAX issues a CT41G to newly incorporated companies when they are set up on COTAX. That form gives the company their UTR and explains that, if they were unable to supply the information needed to satisfy S55 at the time of registration, the easiest way to supply it is by using the Online Tax Registration Service (OTRS), although we do accept the information in a letter...

121.23.7 *Time limit for s.55 notice*

Section 55(2) FA 2004 provides:

> The notice required by this section ...
>
> (e) must be given not later than three months after the beginning of the accounting period.

121.23.8 *HMRC practice: Registration*

HMRC say:[132]

Who should register

Register if you dispose of UK property or land and any of the following apply:

- you're a non-resident company and not registered with UK Companies House
- you're a collective investment vehicle (CIV) deemed as a company (as long as you have not elected for transparent or exempt treatment)

Re-register if you were previously registered for UK Corporation Tax but your company has since been dormant for Corporation Tax purposes.

[132] HMRC, *"*Register a non-resident company for Corporation Tax*"* (Oct 2020) *https://www.gov.uk/guidance/register-a-non-resident-company-for-corporation-tax*

If you are an agent acting on behalf of a company you can still register, even if you do not have authorisation to act on your client's behalf for all Corporation Tax affairs through form 64-8.

If you're an offshore property development company dealing in or developing UK land, use the register as an overseas company guide to register for Corporation Tax. This will also tell you what to do if you do not have a base in the UK.

If you are a non-resident landlord now required to submit a Corporation Tax return you should not use this g-form but should instead contact non-resident landlords.

Exemptions

You do not have to register if any of the following apply:

- the disposal is an excluded disposal
- an exemption applies
- no chargeable gain or allowable loss arises

Examples include:

- no gain or no loss transfers
- a disposal where no gain arises because sales proceeds equal the acquisition cost
- the substantial shareholding exemption applies to a disposal
- the disposal is a grant of a lease for no premium
- the disposal has an appropriate connection to a CIV and relief is provided under the terms of the relevant Double Taxation Treaty (HMRC is applying a concessionary treatment to these disposals which is subject to review - 'appropriate connection' is defined at CG73996J)

You can still register and submit returns in such cases if you want to disclose your disposals and the applicable exemptions.

There's no need to register unless there's a disposal of an interest in UK land or property. So holding an asset does not bring a non-resident company within the charge to Corporation Tax.

When to register

You must register within 3 months of the date you become chargeable to UK Corporation Tax.

You become chargeable when you sell, give or transfer ownership of UK property or land. This date cannot be before 6 April 2019 or after the date you register.

What you'll need

If you're registering for the first time or re-registering a company you'll need the:

- company name, registered address and contact details (HMRC will use the registered office address for initial contact)
- previous company name (if there was one)
- incorporation date and country of incorporation (or for a CIV the date of establishment)
- company registration or incorporation number (if it has one)
- director's name, address and contact details (or for a CIV, somebody authorised to act on behalf of the CIV)
- date of the disposal of interests in UK property or land
- Income Tax Self Assessment Unique Taxpayer Reference (UTR), if you have received UK rental income not subject to tax deducted at source

If you're re-registering, you'll also need the Corporation Tax UTR from any previous correspondence with HMRC.

How to register

If you already have a Government Gateway user ID and password

You'll need the Government Gateway user ID and password you used in previous registration for Corporation Tax. If you have recently registered for online services it can take 2 to 8 weeks to receive your codes. They will arrive at the overseas registered office.

If you do not have a Government Gateway user ID and password

Register online if you do not have a Government Gateway user ID and password.

After you've registered

After you've registered HMRC will:

- set up a HMRC record for the company
- send you a Corporation Tax UTR
- send you more information by post about what you need to do next

HMRC aim to deal with your registration within 15 working days. This information will arrive at the overseas registered office. It can take up to 2 to 8 weeks to arrive.

When you receive your UTR you can then register for HMRC online services so that you can file a Corporation Tax Return and pay any tax due. You cannot register for HMRC online services and file your return before you receive your UTR.

Your online services activation codes will arrive at the overseas registered office. It can take 2 to 8 weeks to receive them.

121.23.9 *Reasonable excuse defence*

Section 55(4) FA 2004 provides:

> A company that has a reasonable excuse for failing to give notice as required by this section—
>
> (a) is not to be regarded as having failed to comply with this section until the excuse ceases, and
>
> (b) after the excuse ceases is not to be regarded as having failed to comply with this section if the required notice is given without unreasonable delay after the excuse ceases.

See 126.10 (Reasonable excuse).

HMRC say:

Chapter 4: Obligations of Non-UK resident Company Landlords

... HMRC would regard as a reasonable excuse for not notifying HMRC within this three month time period the need for any true-up of the amount withheld on account of tax under the Non-residents Landlord Scheme at the end of the annual period, and its comparison with the calculation of non-UK resident company landlord's Corporation Tax liability for the accounting period which relates to the annual period in order to establish any shortfall.

However, HMRC would consider that this reasonable excuse is one which is capable of being resolved with twelve months from the end of the company's accounting period. This means that HMRC would expect a company that has a shortfall of Corporation Tax after taking into account the amount on account of tax withheld to give notice of its chargeability within twelve months from the end of its accounting period.

121.23.10 *HMRC practice: Returns*

HMRC say:[133]

Returns

If you have no other business in the UK, file a single return for the date of the disposal.

If you have another disposal at a later date, you'll need to send a new return for each disposal.

If you are a non-resident company landlord and have previously been exempted from notifying chargeability to Corporation Tax because your tax liability was fully offset by tax deducted under the non-resident landlord scheme, the exemption will cease to apply if you make a disposal in an accounting period ending on or after 6 April 2020.

From that point you will be sent a notice requiring you to report your property income annually via a Corporation Tax return until the property business ceases, even if you continue receiving your rents with tax deducted under the non-resident landlord scheme.

You may be liable to financial penalties if you do not file a Corporation Tax return when we ask you to do so.

Contact Non-UK resident landlords team in writing if you believe that you would continue to qualify for the exemption going forward in later accounting periods. You must notify HMRC if you cease to qualify for the exemption.

You must submit the return online and it must include:

- CT600 return form
- iXBRL tagged computations

You do not need to submit iXBRL tagged accounts for a one day accounting period.

If you're a CIV or a company that has or expects to have 4 or more disposals in a financial year, by concession, there will be a 12 month accounting period. You will need to submit:

- a CT600 return form
- iXBRL tagged accounts and computations

So that HMRC does not have to contact you for additional information in relation to the disposal, your computation should include details of how you have utilised any losses, exemptions and reliefs.

It should give a clear breakdown of how you have calculated the gain or loss on the disposal.

Additionally, the type of asset should be identified from one of the following along with the address of the property:

- residential property or land
- non-residential property or land
- mixed use (the property or land was partly residential during ownership)
- indirect disposal of UK land

Alternatively, this information can be provided in a covering letter accompanying your CT600.

Accounts forming part of an online return must be in XBRL format.

[133] HMRC, *"*Register a non-resident company for Corporation Tax*"* (Oct 2020) *https://www.gov.uk/guidance/register-a-non-resident-company-for-corporation-tax*

You do not need to tag the accounts in XBRL if the following apply:

- there's no appropriate taxonomy for the accounting standard the accounts have been prepared
- the HMRC online service does not accept the taxonomy.

If you use an unsupported standard, then submit your accounts in PDF format.

After you've re-registered

If you're re-registering for Corporation Tax we'll use the information provided to update our records. You'll then be able to use HMRC online services to file returns and make payments.

Paying Corporation Tax

When you pay Corporation Tax will depend on your taxable profits and length of your accounting period.

If you hold no other chargeable interests in UK property or land after the disposal, you'll stop being chargeable to UK Corporation Tax. You'll also have a one day accounting period.

The rules for paying in instalments mean your tax may be due on the date of the disposal. HMRC will apply concessionary treatment in these cases. Payment of Corporation Tax will be due 3 months and 14 days after the end of your one day accounting period.

Non-resident landlord scheme guidance provides:[134]

4.3 Exception to duty to give notice

A non-UK resident company landlord will not be required to give notice of its coming within the charge to Corporation Tax or to notify its chargeability to Corporation Tax if:

- it has not been given a notice to file a tax return,
- it has borne (or it will bear) Income Tax by deduction on all the income on which it is chargeable to Corporation Tax for the accounting period,
- its liability to Corporation Tax for the accounting period will be fully offset, for instance by the amounts withheld under the Non-residents Landlord Scheme, and
- it has no chargeable gains for that period.

4.4 Example

In the example at Chapter 3, ABC Ltd has the following items to consider when determining its liability to Corporation Tax for the accounting period which includes the four quarters to 31 March 2021:

Rental income	£7,500
Deductible expenses other than financing costs	£1,200
Financing costs	£1,700
[Net income	£4,600]
[Corporation tax £4,600 @19%	£874]
Income Tax deducted at source [£4,600 @ 20%]	£920

If the annual period straddles two of ABC Ltd's accounting periods because the date to

[134] HMRC, "The Non-resident Landlords Scheme: Guidance notes for letting agents and tenants" (2016) *https://www.gov.uk/government/publications/non-resident-landord-guidance-notes-for-letting-agents-and-tenants-non-resident-landlords-scheme-guidance-notes*

which it makes up is financial statements ends on a date other than 31 March, the amounts should be apportioned between the accounting periods on a just and reasonable basis.

The amount of financing costs that can be included in determining the Corporation Tax liability of ABC Ltd for an accounting period depends on the application of the TIOPA Corporate Interest Restriction rules according to the specific circumstances of the company.

If ABC Ltd is a singleton company, the amount of financing costs would be below the de minimis exemption available under the Corporate Interest Restriction rules and none of the financing costs would be capped.

In these circumstances it is likely that the amounts withheld at source under the Non-residents Landlord Scheme has met ABC Ltd's Corporation Tax liability (assuming it has no further chargeable income and it has no chargeable gains).

In this situation, if ABC Ltd has not already registered for Corporation Tax, it is not required to notify HMRC that it has come within the charge for Corporation Tax for an accounting period provided that it has no chargeable gains in that period and has not already received a notice to file a tax return.

If ABC Ltd considers that its Corporation Tax liability for the relevant accounting period is less than the Income Tax deducted at source under the Non-residents Landlord Scheme, it can choose to register and file a Company Tax Return in order to claim a repayment of the difference.

IT deducted at source will generally exceed CT, as the IT rate is higher. But this will cease to apply when the CT rate increases above the IT basic rate, in 2023.

If ABC Ltd considers that its Corporation Tax liability for the relevant accounting period is more than the Income Tax deducted at source under the Non-residents Landlord Scheme, it must register and file a Company Tax Return in order to pay the balance due. It must do this within twelve months from the end of the relevant accounting period.

Once registered for Corporation Tax, HMRC will send ABC Ltd a notice to file a Company Tax Return for each subsequent accounting period.

121.23.11 *Company law requirements*

An overseas company which opens a "UK establishment" (as defined) also needs to register under reg 4 Overseas Companies Regulations 2009. The deadline is " within one month of having opened a UK establishment".

CHAPTER ONE HUNDRED AND TWENTY TWO

TAX RETURN FILING POSITION

122.1 Codes of conduct
122.1.1 Status of PCRT
122.1.2 HMRC standard for agents
122.2 Adviser's duties
122.2.1 Advocate for client
122.2.2 Reliance on client
122.2.3 No duty of consistency
122.3 Tax return filing position
122.4 Properly-arguable standard
122.4.1 HMRC's compliance duties
122.5 SPTS examples
122.5.1 Examples: Enactment history
122.5.2 Examples: HMRC guidance
122.6 Low detection risk
122.7 Cost and estimates
122.8 Disclosing doubt/further information
122.8.1 No general duty of disclosure
122.8.2 Disclosure required/advisable
122.9 When disclosure required
122.9.1 Disclosure of weak position
122.9.2 Disclosure that HMRC disagree
122.9.3 Large business disclosure
122.10 Disclosure for good HMRC relations
122.10.1 HMRC/taxpayer relationship
122.11 Certificate of tax position
122.12 Professional conduct: Back duty

122.1 Codes of conduct

There are many codes of conduct and a full discussion requires a book to each one. I discuss the following:[1]

(1) *Professional Conduct in Relation to Taxation* ("PCRT").[2] This is framed in terms of Fundamental Principles and Standards, supplemented by non-binding guidance in:

(a) Helpsheets[3] A-E:
A: Submission of tax information and Tax filings
B: Tax Advice

[1] Further consideration may be needed for those governed by Scots/Northern Ireland or other codes of conduct.

[2] *https://www.tax.org.uk/professional-conduct-in-relation-to-taxation-pcrt*
For an introduction to PCRT, see *Hannah (R, oao) v CIOT* [2021] EWHC 1069 (Admin). For PCRT on tax avoidance, see 2.5.8 (Codes of practice/regulators).

[3] PCRT says "Help Sheet" A-E, not Helpsheet; but I write it here as one word, not two, as that is the standard usage.

C: Dealing with errors
C2: Dealing with errors - Members in business
D: Request for data by HMRC
E: Members' Personal Tax Affairs[4]

(b) 2 sets of Q&As, entitled: PCRT member QAs, and FAQs

(2) *Bar Code of Conduct*, part of the BSB Handbook ("Bar Code"). This is framed in terms of Core Duties, Rules and Guidance.

(3) *SRA Code of Conduct for Solicitors* ("SRA Code")[5]

(4) *ICAEW Code of Ethics* ("ICAEW Code")

Each code has a technical vocabulary of its own (beginning with idiosyncratic use of the cuddly words Handbook and Helpsheet); it is not practical to discuss them without using this terminology. I use initial capitals, to reflect the technical nature of the words.

CIOT formerly published "Standards for the Provision of Taxation Services", a series which included SPTS no.2 (Tax Return Filing Positions).[6] SPTSs were withdrawn in 2011 because the topics were thought to be covered by PCRT. But PCRT does not have the same level of detail. I think SPTS2 still offers good guidance; it is the most detailed guidance available on tax return filing positions.

122.1.1 *Status of PCRT*

CIOT set out the recent edition history of PCRT[7]

Effective from: 1 March 2017
Republished: 1 March 2019

[4] CIOT formerly published Helpsheets numbered numerically: 1: Tax evasion, 2: Tax returns, 3: Voluntary disclosures under disclosure facilities, 4: The GAAR. These are now withdrawn.

[5] Nov 2019, replacing the Code of Conduct 2011.

[6] The same or similar issues arise in foreign jurisdictions, and there is some interaction or influence between jurisdictions.
SPTS2 is influenced by US practice: AICPA, "Statement on Standards for Tax Services No. 1, Tax Return Positions" is substantially the same as SPTS2, at some points using the same wording; though it uses the expression "reasonable basis" where SPTS has "tenable" and does not offer examples.
https://www.aicpa.org/content/dam/aicpa/interestareas/tax/resources/standardsethics/statementsonstandardsfortaxservices/downloadabledocuments/ssts-interpretations-no-1-tax-return-positions.pdf
An international survey would be an informative exercise.

[7] *https://www.tax.org.uk/professional-conduct-in-relation-to-taxation-pcrt*

> Republished: 1 January 2023 - this document was reviewed by the PCRT Group in September 2022 to consider if it needed any updating; it was agreed that no updating of substance was required although some minor updating of references was made.

PCRT applies to members of CIOT, STEP, and accountancy bodies.[8]

It is not binding on solicitors or barristers unless they are members of CIOT/STEP (which for private client practitioners is often the case). In the event of conflict, the Bar/SRA Codes prevail over PCRT:

> ... nothing in PCRT shall override a member's professional duties or be interpreted so as to give rise to any conflict under general law, statutory regulation, or professional regulation of solicitors or barristers, and in the event of any conflict general law, statutory regulation or such professional regulation shall prevail.[9]

SRA say that solicitors should "be familiar with the PCRT and adhere to its standards".[10] So PCRT is indicative of good practice for solicitors. PCRT is not recognised by the Bar, but it should again be taken as indicative of good practice.

HMRC endorse PCRT.[11]

122.1.2 *HMRC standard for agents*

HMRC issue a code of conduct: *HMRC: the standard for agents* ("HMRC Standard").[12] This is now in its third edition:

Edition	**Date**
1	Aug 2016
2	Jan 2018
3	Jan 2023

The HMRC Standard applies to:

> individuals and businesses who are tax agents. Tax agents are agents

[8] Namely: Association of Accounting Technicians, Association of Chartered Certified Accountants, Association of Taxation Technicians, ICAEW, and Institute of Chartered Accountants of Scotland.

[9] Para 1.6 PCRT.

[10] *https://www.sra.org.uk/solicitors/guidance/tax-avoidance-duties/*
For tax avoidance aspects of PCRT, see 2.5.8 (Codes of practice/regulators).

[11] HMRC Standard para 1.1.

[12] *https://www.gov.uk/government/publications/hmrc-the-standard-for-agents/hmrc-the-standard-for-agents*

> and advisers, based in the UK or in other countries, who are acting professionally in relation to the tax affairs of others. This includes third party agents and advisers, whether acting in respect of UK or offshore tax affairs, and to all dealings they have with HMRC.[13]

Since HMRC do not regulate tax practitioners, the question arises as to what is the sanction if the Standard is breached. The HMRC Standard provides:

> **4.2 What happens when the standard is breached**
> The options may include:
> - blocking access to HMRC's agent services
> - dishonest tax agent conduct notices, with the potential for further penalties and publication
> - criminal investigation if an offence is suspected
> - refusing to deal with an agent altogether
>
> When appropriate, relevant professional bodies will be informed directly about misconduct by their members in a Public Interest Disclosure.[14]

HMRC say:

> **5. How HMRC and professional body standards are related**
> ... The HMRC standard for agents does not override legal professional privilege or professional duties set by relevant professional bodies.

But there is nothing in the HMRC Standard which is not in PCRT:

> 5.1 ... If agents meet their professional body's code of ethics, however, the HMRC standard for agents should not place further requirements on them.

I suspect that the HMRC Standard is addressed to tax agents who are not members of a professional body, and so not subject to any other code of conduct; it should have no relevance to those who are governed by any of the professional codes of conduct. I do not discuss it further here.

[13] The HMRC Standard does not apply to Trusted Helpers, HMRC terminology meaning a friend or relative authorised to manage a person's tax affairs; *https://www.gov.uk/appoint-tax-agent*

[14] HMRC expand on these sanctions in "Raising standards in the tax advice market - HMRC's review of powers to uphold its Standard for Agents" (March 2022) *https://www.gov.uk/government/publications/raising-standards-in-the-tax-advice-market-hmrcs-review-of-powers-to-uphold-its-standard-for-agents*

122.2 Adviser's duties

122.2.1 *Advocate for client*

SPTS2 provided:

> 4. When recommending a filing position, a member has both the right and responsibility to be an advocate for the taxpayer with respect to any position satisfying the aforementioned guidance. ...

Similarly Bar Code of Conduct:

> **CD2** You must act in the best interests of each client[15]
> **gC6** You are obliged by CD2 to promote and to protect your client's interests so far as that is consistent with the law and with your overriding duty to the court under CD1.

There is no resounding equivalent expressed in PCRT or the ICAEW code. On the contrary, the ICAEW code expresses itself in terms which could be taken as rather different in its emphasis:

> A distinguishing mark of the accountancy profession is its acceptance of the responsibility to act in the public interest.[16]

But I would have thought that the duty of care which an accountant owes to their client when acting as their tax agent (as opposed to auditing work) comes to the same effect as the duty (in the words of the Bar code) to promote and protect the client's interest, so far as consistent with the law. Though curiously, or perhaps significantly, the accountancy profession does not proclaim it so openly.

122.2.2 *Reliance on client*

PCRT provides:

> A member must act honestly in all their dealings with their clients, all tax authorities and other interested parties, and do nothing knowingly or carelessly that might mislead either by commission or omission.[17]

PCRT provides:

> Where acting as a tax agent, a member is not required to audit the

[15] Likewise SRA Principle 7.
[16] para 100.1.
[17] Para 2.4 PCRT.

> figures in the books and records provided or verify information provided by a client or by a third party. However, a member should take care not to be associated with the presentation of facts they know or believe to be incorrect or misleading ...[18]

Likewise ICAEW Code:

> 110.2 A professional accountant shall not knowingly be associated with reports, returns, communications or other information where the professional accountant believes that the information:
> (a) Contains a materially false or misleading statement;
> (b) Contains statements or information furnished recklessly; or
> (c) Omits or obscures information required to be included where such omission or obscurity would be misleading.
> When a professional accountant becomes aware that the accountant has been associated with such information, the accountant shall take steps to be disassociated from that information.

This contrasts with the Bar Code of Conduct:

> **rC6** Your duty not to mislead the court will include the following obligations:
> .1 you must not:
> .a make submissions, representations or any other statement; or
> .b ask questions which suggest facts to witnesses,
> which you know, or are instructed, are untrue or misleading.
> .2 you must not call witnesses to give evidence or put affidavits or witness statements to the court which you know, or are instructed, are untrue or misleading, unless you make clear to the court the true position as known by or instructed to you.
>
> ***Guidance***
>
> **gC6** ... Your duty to the court does not prevent you from putting forward your client's case simply because you do not believe that the facts are as your client states them to be (or as you, on your client's behalf, state them to be), as long as any positive case you put forward accords with your instructions and you do not mislead the court. Your role when acting as an advocate or conducting litigation is to present your client's case, and it is not for you to decide whether your client's case is to be believed.
>
> **gC7** For example, you are entitled and it may often be appropriate to draw to the witness's attention other evidence which appears to conflict

[18] Para 13 PCRT Helpsheet A.

> with what the witness is saying and you are entitled to indicate that a court may find a particular piece of evidence difficult to accept. But if the witness maintains that the evidence is true, it should be recorded in the witness statement and you will not be misleading the court if you call the witness to confirm their witness statement.[19]

On this point PCRT and the Bar/SRA Codes conflict and (for solicitors/ barristers) the Bar/SRA Codes prevail.[20] This is an aspect of a broader distinction of outlook:

> It is easy for a lawyer to adopt an undivided loyalty to a client; for better or for worse, that is his professional tradition and obligation. The accountant's tradition is quite the opposite: he is proud of his "independent" status as a certifier of statements. In the exercise of this function, he is the adversary of his client, and his liability is to the creditors who rely upon him. Of course, he is paid by the client, and his certification is ultimately in the client's interest, but he trusts his client as his own peril. In this respect, the accountant is more policeman than counselor. The accountant's advisory function, which for a long time was quite secondary, blossomed into a major activity with the growth of the income tax. In some instances, this conversion has been very marked: the accountant is often the client's confidant as the lawyer is not. But even in these cases the relics of the past may intrude. Will the accountant always prepare a tax return in the client's best interest, if he knows that he must certify a statement of the tax liability which has a substantial possibility of being an understatement?[21]

Lawyers are more sensitive to the need for legal representation, which is a requirement of the Rule of Law.[22] But perhaps the issue does not often arise.[23] Accountants are not mind-readers, and, particularly when the tax

[19] Para gC6, gC7 *https://www.barstandardsboard.org.uk/the-bsb-handbook.html* The SRA Code of Conduct is, I think, the same on this point, though it is not so clearly expressed.

[20] See 122.1.1 (Status of PCRT).

[21] Johnson, "Does the Tax Practitioner Owe a Dual Responsibility to his Client and to the Government?", in Bitker (ed), *Professional Responsibility in Federal Tax Practice* (1970), Chapter 9, p.170. See too Moraine, "Loyalty Divided: Duties to Clients and Duties to Others—the Civil Liability of Tax Attorneys Made Possible by the Acceptance of a Duty to the System" The Tax Lawyer Vol. 63, No. 1 (2009).

[22] See 2.8 (The Rule of Law).

[23] Brandeis, "The Opportunity in the Law" (1914): "As a practical matter, the lawyer is not often harassed by this problem; partly because he is apt to believe, at the time, in most of the cases that he actually tries; and partly because he either abandons or

issue is one which turns on the client's intention, they are entitled to believe their clients unless it is clear that the client is lying.[24] There must be an objective element in the test of belief, or a jaded and cynical practitioner could not practice.

122.2.3 *No duty of consistency*

The 2011 version of PCRT provided:

> *2.7 In principle it is possible to put forward different tenable positions for different clients with different circumstances.*

That is omitted from subsequent editions, but it must be right. It follows from the duty to act in the best interest of the client. If it were not right, the firm could not properly act for both clients, which would be surprising.

On the other hand, HMRC ought to be consistent. While they may change their mind, they should not put forward different positions for different taxpayers, even if both positions are tenable.[25]

122.3 Tax return filing position

Section 8(2) TMA provides:

> Every return under this section[26] shall include a declaration by the person making the return to the effect that the return is to the best of his knowledge correct and complete.

There is no difference of principle between completing a tax return and other HMRC correspondence; but the issues arise most pressingly in a tax return, which presents a series of questions which the taxpayer has to answer.[27]

In short:

There are two levels, or standards of confidence, in a tax position:

settles a large number of those he does not believe in."

[24] Indeed, even HMRC say that "We'll assume you're telling the truth, unless we've good reason to think you're not." Though no-one takes any notice of that; see 6.36 (Residence: Burden of proof).

[25] HMRC Litigation and Settlement Strategy (2017) provides: "HMRC ... must apply the law fairly and consistently." *https://www.gov.uk/government/publications/litigation-and-settlement-strategy-lss*

[26] See 121.4 (Notice to make return). As this only applies to s.8, it has to be repeated verbatim for trust returns in s.8A(2) TMA.

[27] See s.8(1)(a) TMA set out in 121.4 (Notice to make return).

(1) Properly-arguable (or sustainable or tenable)
(2) More than 50% (or realistic possibility)[28]

A position which does not pass the first standard should not be taken at all.

A position which passes the first but not the second standard may be taken, but should be accompanied by disclosure of relevant facts. CIOT agree:

> Under the self-assessment system the taxpayer reaches its own view of the correct tax that should be assessed and, in doing so, may take the benefit of any doubt. Indeed, if there is a doubt on a matter, a taxpayer is bound to take the benefit of it in filing a self-assessment, as the alternative is that it volunteers tax that may not actually be due. When it does so, it will obviously need to consider what additional 'white space' disclosure it should make to minimise the risk of penalties for an incorrect or careless return.[29]

A position which passes the second standard may be taken without disclosure of doubts, or facts which may raise doubts; (full disclosure may be advantageous but is not compulsory).

122.4 Properly-arguable standard

PCRT provides:

> a member should take care not to ... assert tax positions in a tax filing which they consider to have no sustainable basis.[30]

The Bar Code provides:

> rC9 ...
> .2 you must not draft any statement of case, witness statement, affidavit or other document containing:
> .a any statement of fact or contention which is not supported by your client or by your instructions;

[28] For this standard, see 122.9.1 (Disclosure of weak position).

[29] CIOT, "Notification of uncertain tax treatment: CIOT response" (August 2020) *https://assets-eu-01.kc-usercontent.com/220a4c02-94bf-019b-9bac-51cdc7bf0d99/2ff47477-af4f-4c8f-b1ab-f6ac2669439c/200826%20Notification%20of%20uncertain%20tax%20treatment%20by%20large%20businesses%20-%20CIOT%20response.pdf*

[30] Para 13 PCRT Helpsheet A.

> .b any contention which you do not consider to be properly arguable;
>
> ...
>
> .d (in the case of a witness statement or affidavit) any statement of fact other than the evidence which you reasonably believe the witness would give if the witness were giving evidence orally;
>
> .3 you must not encourage a witness to give evidence which is misleading or untruthful;

Similarly the SRA Code:

> 2.4 You only make assertions or put forward statements, representations or submissions to the court or others which are properly arguable.

Although the Bar/SRA Codes are concerned with a lawyer's submissions to a court, the same applies for a professional's submission to HMRC. In *Altus Group v Baker Tilly*:

> ... a professional would be expected to adopt any filing position that was *properly arguable* and was in the client's best interests, while at the same time making full disclosure of any matter that would be necessary for HMRC to understand and appraise the filing position.[31]

Sustainable (PCRT), *properly arguable* (Bar/SRA Codes, *Altus Group*), and *tenable* (SPTS2) are all vague and evaluative words. It seems to me that they are different ways of expressing the same test, a standard below which it would not be proper to raise an argument, or file a return, even if accompanied by a full disclosure. I refer to this as the **"properly-arguable"** standard.

This is a low standard:

> Applicants with weak cases are entitled to seek to advance their case and have it adjudicated upon; that is a fundamental aspect of having a right of access to a court.[32]

The distinction is between a weak case and one bound to fail. Examples of arguments which falls short of the properly-arguable standard (if indeed they are bona fide arguments) would include:

(1) Mr Trull, who said he was exempt from the community charge/poll-

[31] [2015] EWHC 12 (Ch) at [64].

[32] *Sathivel (R, oao) v Secretary of State for the Home Department* [2018] EWHC 913 (Admin) at [16].

tax by virtue of letters patent issued by Henry VII in 1508.[33]

(2) Chris Coverdale, who said it would be a criminal offence to pay Council Tax because it would be used by the Ministry of Defence to commit war crimes.[34]

The test in the Codes of Conduct is a subjective one: the question in each Code is whether the adviser *considers* the argument to be properly arguable.

122.4.1 *HMRC's compliance duties*

Does the same rule apply to HMRC? Or are HMRC subject to stricter principles, as a public body?

Ad Hoc Property Management v HMRC[35] suggests the same principles apply. In this case, leading counsel advised HMRC that they were likely to lose a tax appeal. HMRC defended the appeal regardless, and backed down much later in the day. An application for costs on an indemnity basis was not successful. The point was that Counsel had not gone so far as to advise that the case was hopeless.

Perhaps without realising the disturbing implications, the Tribunal held that "this was not conduct outside the norm". The reader may wonder whether HMRC's main object, in pursuing appeals it knows it is likely to lose, as far as the door of the Court but no further, is to test whether the taxpayer had the gumption to proceed with the appeal; especially in circumstances where HMRC's resources outweigh those of the taxpayer.

Would the result have been different if the Tribunal had been referred to the HMRC Litigation and Settlement Strategy, which states that where HMRC believes that it is unlikely to succeed in litigation it will concede the issue?[36] Discuss.

[33] See Baker, "The Curious Case of Mr Trull" in Harris & Cogan (ed) *Studies in the History of Tax Law* vol 8. Similar pseudolegal arguments echo through social media, propounded by movements such as "Freemen on the land", who contend that they are not bound by law to which they do not consent (!); though they have not yet troubled the FTT.

[34] *https://taxpolicy.org.uk/2024/03/19/fake-anti-war/*

[35] [2019] UKFTT 315 (TC).

[36] HMRC, "Litigation and Settlement Strategy" para 18. (This is subject to exceptions in special circumstances which do not seem to be applicable here.) See *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/655344/HMRC_Resolving_tax_disputes.pdf*
Less charitably, the HMRC tactic might be called bluffing if not oppressive; see

Of course in practice the taxpayer is not likely to know exactly what advice HMRC have received, as HMRC will not waive legal privilege.

BPP Holdings v HMRC[37] discussed this question in circumstances where HMRC failed to comply with an "unless" order and were debarred from defending an appeal:

> [Counsel for HMRC] argued that the Judge should have ... taken into account, the fact that the debarring order in this case prevents HMRC from discharging its public duty and could lead to the public interest being harmed in that VAT which should be paid may not be recovered. I consider that it would set a dangerous precedent if that point were accepted, as it would discourage public bodies from living up to the standards expected of individuals and private bodies in the conduct of litigation. It seems to me that there is at least as strong an argument for saying that the courts should expect higher standards from public bodies than from private bodies or individuals.

The question whether HMRC are bound by the same standards as individuals, or lower or higher, is too general to admit an answer. It depends on the context. But the starting point should be that the same standards are to be expected.

122.5 SPTS examples

It may be helpful to summarise the SPTS examples in a table:

Example	***Legislation***	***Enactment history***	***Pro-taxpayer filing position***
1	unfavourable	neutral	untenable
2	unfavourable	favourable	realistic possibility
3	unfavourable	arguably some support	tenable
	Legislation	***HMRC guidance***	
4	unfavourable	favourable	tenable
5	unfavourable	"technical correction" proposed	tenable
6	unfavourable	favourable statement withdrawn	untenable
	Case law	***HMRC guidance***	
10	inconsistent	unfavourable	tenable
	Reason for non-compliance		
7	HMRC may not notice		untenable
8	Compliance cost exceeds tax		untenable
9	Estimate in good faith		tenable

The examples are helpful, as far as they go, though in practice matters

122.10.1 (HMRC/taxpayer relationship).

[37] [2017] UKSC 55 at [30].

may be very fact sensitive.

122.5.1 *Examples: Enactment history*

In the first set of illustrations, enactment history is (or may be) more favourable to the taxpayer than the statutory law. SPTS2 provides:

> **15. Illustration 1.**
> A taxpayer has engaged in a transaction that is adversely affected by a new statutory provision. Prior law supports a position favourable to the taxpayer. The taxpayer believes, and the member concurs, that the new statute is constitutional, clearly drafted, and unambiguous. The legislative history (as recorded in Hansard) discussing the new statute contains general comments that do not specifically address the taxpayer's situation.
> **Conclusion**
> The member should recommend the filing position supported by the new statute. A position contrary to a constitutional, clear, and unambiguous statute would not be considered to be a tenable position.

Illustration 1 is straightforward; its purpose is to set the scene for the more interesting set of illustrations where legislative history (including Hansard but not limited to that) is (or may be) more favourable to the taxpayer than the statutory law:

> **16. Illustration 2**
> The facts are the same as in illustration 1 except that the legislative history discussing the new statute specifically addresses the taxpayer's situation and supports a position favourable to the taxpayer.
> **Conclusion**
> In a case where the statute is clearly unambiguously against the taxpayer's position but a contrary position exists based on legislative history specifically addressing the taxpayer's situation, a filing position based either on the statutory language or on the legislative history satisfies the realistic possibility standard.
> **17. Illustration 3**
> The facts are the same as in illustration 1 except that the legislative history can be interpreted to provide some evidence or authority in support of the taxpayer's position; however, the legislative history does not specifically address the situation.
> **Conclusion**
> In a case where the statute is clear and unambiguous, a contrary position based on an interpretation of the legislative history that does not explicitly address the taxpayer's situation does not meet the realistic

possibility standard. However, because the legislative history provides some support or evidence for the taxpayer's position, such a filing position is not untenable. A member may recommend the position to the taxpayer if the member also recommends appropriate disclosure.

122.5.2 *Examples: HMRC guidance*

In the next set of illustrations, HMRC guidance is (or may be) more favourable to the taxpayer than the statutory law. SPTS2 provides:

> **18. Illustration 4**
> A taxpayer is faced with an issue involving the interpretation of a new statute. Following its passage, the statute was widely recognised to contain a drafting error, and a technical correction proposal has been introduced. The tax authority issues a pronouncement indicating how it will administer the provision. The pronouncement interprets the statute in accordance with the proposed technical correction.
> **Conclusion**
> Filing positions based on either the existing statutory language or the Inland Revenue pronouncement satisfy the tenable view.
> **19. Illustration 5**
> The facts are the same as in illustration 4 except that no Inland Revenue pronouncement has been issued.
> **Conclusion**
> In the absence of Inland Revenue pronouncement interpreting the statute in accordance with the technical correction, only a return position based on the existing statutory language will meet the realistic possibility standard. A filing position based on the proposed technical correction may be recommended if it is appropriately disclosed, since it is a tenable view.
> **20. Illustration 6**
> A tax form published by the Inland Revenue is incorrect, but completion of the form as published provides a benefit to the taxpayer. The member knows that the Inland Revenue has published an announcement acknowledging the error.
> **Conclusion**
> In these circumstances, a return position in accordance with the published form is not a tenable argument.

This can be contrasted with a case where HMRC guidance is (or may be) less favourable than the strict law:

> **24. Illustration 10**
> On a given issue, a member has located and weighed two authorities

> concerning the treatment of a particular expenditure. The Inland Revenue has issued an administrative ruling that required the expenditure to be capitalised and amortised over several years.
> On the other hand, a court opinion permitted the current deduction of the expenditure.
> The member has concluded that these are the relevant authorities, considered the source of both authorities, and concluded that both are persuasive and relevant.
> **Conclusion**
> The tenable view standard is met by either position.

122.6 Low detection risk

Para 3.2 PCRT provides:

> Tax advice must not rely for its effectiveness on HMRC having less than the relevant facts. Any disclosure must fairly represent all relevant facts.

SPTS 2 provides:

> 3. A member should not recommend a filing position or prepare a return reflecting a position that the member knows:-
> a) Takes advantage of the enquiry selection process of the Inland Revenue, or other tax authority where relevant.
> b) Serves as a mere arguing position advanced solely to obtain leverage in the bargaining process of settlement negotiation with a taxing authority.

The next set of examples discuss these excuses for incorrect returns. The examples are mundane, but I set them out for completeness. SPTS2 provides:

> **21. Illustration 7**
> A taxpayer wants to take a position that a member has concluded is not tenable. The taxpayer maintains that even if the Inland Revenue examines the return, the issue will not be raised.
> **Conclusion**
> The member should not consider the likelihood of an enquiry when determining whether the realistic possibility standard has been met. The member should not prepare a return that contains an untenable position even if it is fully disclosed.

Similarly for accounting purposes. IFRIC 23 provides:

> An entity is to assume that a taxation authority with the right to

examine any amounts reported to it will examine those amounts and will have full knowledge of all relevant information when doing so.

122.7 Cost and estimates

SPTS 2 provides:

> **22. Illustration 8**
> A statute is passed requiring capitalisation of certain expenditure. The taxpayer believes, and the member concurs, that to comply fully, the taxpayer will need to acquire new computer hardware and software and implement a number of new accounting procedures.
> The taxpayer and member agree that the costs of full compliance will be significantly greater than the resulting increase in tax due under the new provision. Because of these cost considerations, the taxpayer makes no effort to comply. The taxpayer wants the member to prepare a return on which the new requirement is simply ignored.
> **Conclusion**
> The return position proposed by the taxpayer is not tenable, and the member should not prepare the return.
> **23. Illustration 9**
> The facts are the same as in illustration 8 except that the taxpayer has made a good-faith effort to comply with the law by calculating an estimate of expenditure to be capitalised under the new provision.
> **Conclusion**
> In this situation, the tenable view standard has been met.[38]

122.8 Disclosing doubt/further information

I distinguish between three types of disclosure:

Disclosure	**Required by law**	**Sanction**
Voluntary	No	No, but disclosure may have advantages
Necessary	Yes	Yes: penalties/disciplinary proceedings
Precautionary	Position unclear	Risk , but disclosure avoids the risk

122.8.1 *No general duty of disclosure*

Everyone responsible for completing a tax return has to ask themselves questions and decide on the answers. If an answer is reached, with sufficient confidence, there is in general no obligation to disclose to HMRC the reasons, or doubts, or information which might support a

[38] SA100 (2023) box 20 allows for this. The rubric provides: “If this tax return contains provisional figures, put ‘X’ in the box”.

different tax treatment. Failure to disclose these things does not in principle render answers in the return to be deliberate or careless errors (even if they turn out to be wrong).

In particular, the fact that there is a possibility that the courts might disagree with an adviser's view does not in itself require disclosure.

This applies to both sides. When HMRC assess tax to the best of their judgement, they must specify what tax they honestly and reasonably consider due, but are under no obligation to disclose doubts or information which might support a different tax treatment.

PCRT used to say that clearly:

> *In the preparation of a tax return, there is no duty to provide more information to the tax authorities than the return requires simply because some pieces of information known to the member might support a different tax treatment from that which the member, after due consideration of all the information available to him, honestly considers to be the tax treatment.*[39]

That continues to be the law, but the current version of PCRT no longer has the confidence to express it in such clear and uncompromising terms. However one can infer that the authors' view has not changed, as PCRT refers to "the minimum information required by law".[40]

In the 2019/20 edition of this work I said:

> The law could not sensibly be otherwise, as that possibility almost always exists, even if the law seems clear.[41]

Perhaps this had an element of rhetorical hyperbole. But there will often be doubt about whether a matter is one of doubt. Or to be more precise, whether the matter is of sufficient doubt to require disclosure, as "doubt"

[39] PCRT 2004 version, para 3.10.
The Keith Committee recommended that taxpayers should be required to disclose doubts to HMRC but the recommendation was rightly rejected as impractical: see Committee on Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.6 and HMRC consultation papers "The Inland Revenue and the Taxpayer" and "Keith: Further Proposals" (1988).

[40] Para 19 PCRT Helpsheet A: "If a client is unwilling to include in a tax filing the minimum information required by law, the member should follow the guidance in Helpsheet C: Dealing with Errors."

[41] The text continued: "Readers will easily bring to mind examples of mistaken or improbable decisions, some corrected on appeal and others not, to illustrate the uncertainties – or (which comes to the same thing) the lottery element in litigation."

is a matter of degree which cannot easily be resolved into a binary question; and a phrase such as "substantial doubt" is no clearer.

122.8.2 *Disclosure required/advisable*

Notwithstanding the general principle, there are situations where fuller disclosure is required, and situations where disclosure is voluntary but advisable.

SPTS2 distinguished between 2 standards:

(1) *Realistic possibility* standard: a position which has a realistic possibility of being sustained
(2) *Tenable* (properly-arguable) standard: a position which is merely tenable/properly arguable

The point of the distinction is that a filing which depends on a merely tenable argument should be supplemented by further disclosure. A filing which reaches the higher standard does not or may not require to be supplemented by further disclosure.

A distinction of this kind makes sense, but the SPTS terminology is imprecise and perhaps not the ideal.

Disclosure may be required (not merely voluntary) in circumstances where a reasonable taxpayer would disclose.[42]

Voluntary disclosure (in the words of PCRT, "fuller disclosure than is strictly necessary") may be desirable, or even essential, for the following reasons:

(1) It may prevent a discovery assessment after the one-year enquiry window[43]
(2) It may facilitate good relations with HMRC
(3) It may help avoid allegations of misconduct

122.9 When disclosure required

There are some circumstances where a reasonable taxpayer would make some disclosure beyond giving short answers in a tax return or making a claim.

The duty may be based on:

(1) The principle that one need not disclose matters of doubt does not apply where silence may be said to mislead.

[42] See 122.9.2 (When disclosure required).

[43] See 121.10 (Full-disclosure requirement).

(2) The duty to act as a reasonable taxpayer: if a reasonable taxpayer would disclose, a failure to do so would be regarded as careless, and if the weak argument turns out to fail, penalties would be due accordingly.

Perhaps those are two different ways of making the same point.

Disclosure in these circumstances is not voluntary.

In this respect I suspect that the law has evolved in recent years; but reasonable conduct is a flexible standard which may change over time.

The questions then are:

(1) In what circumstances is disclosure required
(2) What must be disclosed.

PCRT provides:

> 21. It may be advisable to consider fuller disclosure than is strictly necessary. Reference to 'The Standards for Tax Planning' in PCRT may be relevant.[44] The factors involved in making this decision include:
> - A filing relies on a valuation;
> - The terms of the applicable law;
> - The view taken by the member;
> - The extent of any doubt that exists;
> - The manner in which disclosure is to be made; and
> - The size and gravity of the item in question.[45]

This list of factors is not exactly guidance, but it is perhaps a start. But the reference to *fuller disclosure than is strictly necessary* suggests that we are not dealing with a *duty* of disclosure.

An example of this category is where a taxpayer wishes to resile from an agreed post-transaction valuation.[46] The CG Manual provides:

[44] This refers to para 3.8 PRCT which provides:
[a] Disclosure should be made whenever required by law and
[b] fuller disclosure must be recommended to clients wherever it is appropriate given a wider relationship or dialogue with HMRC relevant to that client.
[c] What is actually to be disclosed will inevitably reflect a professional judgement taking into account all relevant facts and law specific to the case in question and what the client consents should be disclosed.
But para [a] is obvious, and para [b] gives no guidance as to when disclosure is "appropriate".

[45] Para 21 PCRT Helpsheet A.

[46] It would be sensible if a post-transaction valuation were binding on the taxpayer, once agreed. But that would require legislation, and in practice the issue will rarely arise.

> **CG16612: post transaction valuation checks: action on receipt of return** [May 2020]
> ... Agreement to a valuation by the use of this service will normally lead to the use of that valuation in the Return. But agreement does not bind the customer to using that valuation. In rare cases they may discover that a relevant fact has been overlooked or feel on reflection that agreement was inappropriate. If an agreed valuation is not followed in making a Return we would expect a note drawing our attention to the change of view.

This is a case where silence may be said to mislead, as HMRC would reasonably expect an agreed valuation to be adopted.

Likewise if a taxpayer disagrees with refusal of a non-statutory clearance:

> If you disagree with HMRC's advice you may complete your return in line with your own view of the proper tax treatment, but you should draw HMRC's attention to the particular entry in your return and explain what you've done.[47]

122.9.1 *Disclosure of weak position*

I think a filing position which passes the properly-arguable test may still be so weak that a reasonable taxpayer would disclose the relevant facts so HMRC can fairly form their own view. In *Altus Group v Baker Tilly*:

> a professional would be expected to adopt any filing position that was properly arguable and was in the client's best interests, *while at the same time making full disclosure of any matter that would be necessary for HMRC to understand and appraise the filing position.*[48]

The sanction for failing to disclose when a reasonable taxpayer would do so would be penalties on the basis of carelessness, (assuming tax was held to be due).

What constitutes a weak position, in the sense that a disclosure is required? I think it is in principle one which reaches the merely tenable

So the change would be more trouble than it is worth, unless part of a wider review of the law.

[47] HMRC, Non-Statutory Clearance Service *https://www.gov.uk/guidance/non-statutory-clearance-service-guidance* (accessed May 2021)

[48] [2015] EWHC 12 (Ch) at [64].

standard, so it may be properly taken; but its prospects of success are judged at less than 50%.[49] This may be what SPTS2 means in referring to the "realistic possibility" standard. But one may also have regard to the other factors, in particular the amount at stake. If the amounts are larger, the reasonable taxpayer should take more care, and vice versa.

If the position is judged sufficiently weak, the relevant facts should be disclosed. I see no general duty to disclose that an argument/filing position is judged a weak one, or to set out the argument in detail, if a reasonably competent officer can work it out for themselves from the facts disclosed.

Precautionary disclosure arises for a position which the adviser does not consider to be a weak one, but there is a risk that others may think it so. In particular if the adviser is following a view in the profession which is very much a minority view, even if the adviser does share that view.[50]

This view is consistent with accountancy principles. IFRIC 23 provides:

> An entity has to consider whether it is probable that the relevant authority will accept each tax treatment, or group of tax treatments, that it used or plans to use in its income tax filing.
> If the entity concludes that it is probable that a particular tax treatment is accepted, the entity has to determine taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatment included in its income tax filings. If the entity concludes that it is not probable that a particular tax treatment is accepted, the entity has to use the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates. The decision should be based on which method provides better predictions of the resolution of the uncertainty.

HMRC note that IFRIC only applies to income taxes.[51] But logically it

[49] Clarke broadly agrees, suggesting that the taxpayer should disclose unless he considers the prospects of success are better than 50:50: Lawrance & Harrison, *Clarke's Offshore Tax Planning — Foreign Domiciliaries* (2023-24) para 93.16 (Proceeding without disclosure).

[50] But this assumes that there is a "view in the profession"; which is by no means necessarily true, or easy to ascertain.

[51] Para 3 provides:

> 'tax treatments' refers to the treatments used by an entity or that it plans to use in its income tax filings.

That should include corporation tax on chargeable gains.

should apply to all tax risks.

What is the position if:

(1) A return is (correctly) submitted without further information on the basis that the prospects of success reach the realistic possibility/50% standard.
(2) Subsequently it emerges that the taxpayer's position is still a tenable one but less than the realistic possibility/50% standard.

It is suggested that there is no duty to disclose, unless information actually provided was inaccurate, which requires reasonably-known inaccuracy, not merely the possibility of inaccuracy.[52]

122.9.2 *Disclosure that HMRC disagree*

Suppose a taxpayer takes a position which is not regarded as weak, but which is contrary to a HMRC view which has been formally published in a SP. I think a reasonable taxpayer will generally disclose the fact that the position adopted is contrary to an SP unless the SP is clearly wrong.

The same applies if the HMRC view is clearly and cogently expressed in less formal sources:

(1) RI or Business Briefs, or correspondence formally published by the professional bodies
(2) Private correspondence addressed to the taxpayer (but not if addressed to others)

unless the HMRC view expressed is thought likely (on the balance of probabilities) to be wrong.

The same applies if the HMRC view is clearly and explicitly expressed in the HMRC Manuals, but it should be borne in mind that the Manuals are a vast ocean, of mixed quality, frequently out of date, and at least in its origin, it was intended for internal HMRC use, not for taxpayers.[53] So it is easier to disregard this than formal statements of HMRC views.

Hyman v HMRC contains a more sceptical view of the quality of HMRC

[52] See 121.15.2 (Failure to correct error).

[53] See *Aozora GMAC Investment, R (oao) v HMRC* [2019] EWCA Civ 1643 at [23]. But while in origin the Manuals were only for internal use, they are now sometimes (I would say, generally) used as a platform to set out HMRC guidance for its customers. There seems to be a trend for guidance published separately to be moved to the Manuals, (eg RDR3, DIMF guidance); and for important guidance to be published in the Manuals (eg the *Anson* guidance in 2023).

guidance, SPs as well as Manuals:[54]

> The guidance [in Statements of Practice and the HMRC Manual] was non-statutory guidance. Such guidance can in some cases be persuasive when a court or tribunal is asked to construe legislation. However, it does not differ from a statement by an academic author in a text book or an article and it does not enjoy any particular legal status; there is no presumption that the guidance is correct... It is by no means unprecedented for the court or tribunal to say that the guidance is simply wrong.

Full disclosure is obviously required if it is desired to make full disclosure to prevent HMRC making a discovery which would authorise an assessment after the enquiry period.[55] But that is a different question from whether non-disclosure could be regarded as careless or in any way improper.

122.9.3 *Large business disclosure*

Sch 15 FA 2022 requires large companies to disclose "uncertain tax treatment".[56] This is defined (in short) to mean:

(1) accounts reflect that it is probable (more likely than not) that a different tax treatment applies;[57] or
(2) the taxpayer knows that HMRC disagree.

The new code will have no significant impact, because:

(1) Only very large businesses are affected, in short, turnover over £200m

[54] [2021] UKUT 68 (TCC) at [42]. The position may be compared to the OECD Commentary to the Model Convention, which has been said to have only "such persuasive force as aids to interpretation as the cogency of their reasoning deserves"; see 107.11.2 (Post-DTA Commentary changes).

[55] See 121.11.5 (Disagreeing with HMRC view).

[56] The background can be traced in a series of HMRC consultation & response papers: See "Notification of uncertain tax treatment by large businesses" (Mar 2020), followed by:
• a summary of responses (Mar 2021)
• a second consultation (Mar 2021)
• a second summary of responses (Jul 2021)
https://www.gov.uk/government/publications/large-businesses-notification-of-uncertain-tax-treatment
These are now of historic interest only.

[57] IFRIC 23; see 122.9.1 (Disclosure of weak position).

or balance sheet over £2 billion,[58] and tax at stake over £5m
(2) Penalty for breach is nominal: £5k, or £50k for 3rd & later breaches[59]
(3) The definition of uncertain tax treatment is narrow[60]

I do not discuss the rules in detail here: that would need a chapter to itself.

One might have hoped that a consultation paper proposing new law would summarise the existing law: that is, to consider to what extent the current law requires the taxpayer to disclose matters of doubt. But that is not mentioned. Presumably it was just too obscure.

One might infer that since only large businesses are subject to the new code, no duty to disclose these matters rests on taxpayers who are not large businesses. But that is an argument from redundancy, and it is considered that no inference should be drawn as to the general law of disclosure.[61]

The Code of Practice on Taxation for Banks requires that banks disclose "significant uncertainties in relation to tax matters".

122.10 Disclosure for good HMRC relations

PCRT formerly provided:

> *It may be in the client's best interest to furnish more information than he is strictly required to do because this is likely to lead to a more reasonable approach by the tax authorities, thereby saving money and time in the long run ...*

PCRT was tentative (note the *may*) and the validity of the point is not easy to assess: it may vary from client to client, from time to time, and from department to department. Disclosure in these circumstances is voluntary.

[58] Following the model of Senior Accounting Officer regime (Sch 46 FA 2009) and Publication of Tax Strategies regime (Sch 19 FA 2016).

[59] Though there is also a possible reputational cost.
It is possible that the scope of the code will be extended in the future, and penalties increased; as we have seen with DOTAS. An extended assessment time limit for breach of the duty, for a start. Time will tell.

[60] The original proposals were wider, including a duty to disclose "substantial doubt" but this was withdrawn because businesses objected, rightly, that "substantial doubt" was too vague. This was a rerun of the Keith Committee debate; see 122.8.1 (No general duty of disclosure).
The reader may infer that lobbying on behalf of large businesses is more effective than for other taxpayers.

[61] See App 2.1.2 (Argument from redundancy).

In the 2010/11 edition of this work I commented:

> It seems to me that the only tangible incentive for above-minimum disclosure is to curtail the enquiry period, and obtaining "a more reasonable approach by the tax authorities" is uncertain, unquantifiable, unenforceable and ultimately chimerical. But readers who deal directly with HMRC on a daily basis will be in a better position to form a view on this issue, and this is (understandably) an attitude that HMRC wish to encourage.[62]

The authors of PCRT may agree, since in 2011 they watered down this passage; it now reads:

> *In general,* it is *likely* to be in a client's own interests to ensure that factors relevant to their tax liability are adequately disclosed to HMRC because:
>
> - Their relationship with HMRC is *more likely* to be on a satisfactory footing if they can demonstrate good faith in their dealings with them.[63]

If it is anticipated that questions will be asked, it is sensible to anticipate them by providing details in a tax return or elsewhere.

122.10.1 *HMRC/taxpayer relationship*

The debate about disclosure should be seen in the context of a broader controversy concerning the relationship between HMRC and the taxpayer. The traditional view has been that:

(1) The relationship is adversarial: the interests of HMRC and taxpayer are distinct and each acts in their own interest.

(2) The relationship should be characterised by adherence to legal rules (substantive tax rules determining the amount of tax due, and the requirement of honesty) supplemented by procedural rules of conduct (such as courtesy and efficiency).

A rival (and more recent[64]) view is the opposite:

[62] See comments on the "enhanced relationship" in OECD, Study into the Role of Tax Intermediaries, 2008, *http://www.oecd.org/dataoecd/28/34/39882938.pdf* and OECD "Engaging with High Net Worth Individuals on Tax Compliance" (May 2009);*http://www.keepeek.com/Digital-Asset-Management/oecd/taxation/engaging-with-high-net-worth-individuals-on-tax-compliance_9789264068872-en*

[63] Para 20 PCRT Helpsheet A.

[64] It is difficult to identify a specific date when this school of thought emerged, but I think it reflects a change of administration around the beginning of the second term

(1) The relationship should be a collaborative one, taxpayer and HMRC working together in harmony towards a common goal, to ascertain the right amount of tax.

(2) The right amount of tax[65] is defined only partly in legal rules but also discernable from a more insubstantial spirit of the rules.[66] (Perhaps HMRC consider themselves the arbiter of this spirit, or perhaps no arbiter is needed: so far as the point is not governed by law, the question can be fudged.)[67]

I refer to the traditional view as the **"adversarial approach"**, and the rival view as the "**collaborative approach**". A range of positions are possible between the two extremes.

The controversy raises various questions:

(1) Empirical questions: do HMRC and taxpayers actually regard the collaborative approach as the model of their relationship, or to what extent do they do so, or pretend to do so

(2) Political and moral questions: should they do so, or to what extent should they do so[68]

(3) Legal questions: do the courts enforce a collaborative approach, or to

of the Labour Government (2001). Contrast the use of the term "compliant" and "customer"; see App 1.4 ("Compliant"), App.1.5 ("Customers" of HMRC).

[65] Also called "the proper amount of tax".

[66] An example is the Code of Practice on Taxation for Banks, (introduced 2009, current version 2013, with commentary periodically updated). This provides:

> "Relationships with HMRC should be transparent and constructive, based on mutual trust" [adding with jarring realism: "wherever possible"].
>
> "The features of this relationship should include disclosing fully the significant uncertainties in relation to tax matters... engaging in a co-operative, supportive and professional manner in all interactions ... working collaboratively...."

https://www.gov.uk/government/publications/code-practice-taxation-banks/code-of-practice-on-taxation-for-banks

Similarly, "A European Taxpayers Code" (2016): Tax administrations should "aim to engage full-heartedly and in a spirit of cooperation with taxpayers to resolve tax issues".

https://taxation-customs.ec.europa.eu/system/files/2016-11/guidelines_for_a_model_for_a_european_taxpayers_code_en.pdf

[67] HMRC say: "Any disagreements arising under the Code will be dealt with using existing processes." See "A Code of Practice on Taxation for Banks - Consultation Response Document" (2009).

[68] Different considerations apply to a charity: see Kessler, Wong & Shah, *Taxation of Charities and Nonprofit Organisations*, (14th ed., 2024-25), para 47.2 (Charity/ HMRC relationship).

what extent do they do so

The short answer to the legal question seems to be that the courts will not enforce a collaborative approach. So far as it happens at all, it rests outside the law.[69] Here are three examples:

Bampton Property Group (R, oao) v King:[70] HMRC noticed that a company had failed to put in a loss election, but did not inform the company until the deadline for the election had passed. The court held that there was nothing wrong in that.

MPTL Ltd v HMRC:[71] the taxpayer told HMRC that they intended to appeal but did not file a notice of appeal with the Tribunal. The Tribunal held that HMRC were under no duty to inform a taxpayer about that.

Kriticos v HMRC:[72] an unrepresented taxpayer owed tax of £1,010 and £800 penalties for late payment of previous tax. He paid HMRC £1,010 but failed to direct whether it should be used in payment of the penalties or the tax. This was said to give HMRC a discretion, and HMRC allocated the payment in the way most detrimental to the taxpayer and most advantageous to HMRC: towards the penalties. Thus £810 tax liability remained outstanding and attracted further penalties for late payment. The Tribunal found nothing wrong in that.

I am not saying that these are wrong; but it is not the co-operation model, and it is difficult to describe the tax paid by the taxpayers as "the right amount of tax" if that expression means anything other than the amount of tax due by law.

HMRC Settlement and Litigation Strategy states that HMRC will handle disputes by working collaboratively with its customers, and that a collaborative approach requires the parties to be open and transparent. But it is easier to preach the virtues of openness and transparency that to act on them. In practice:

(1) HMRC are not open or transparent when it comes to documents which qualify for legal professional privilege.[73] The Strategy

[69] HMRC rightly say (under the heading "The Rule of Law"): The Code is not law. See "A Code of Practice on Taxation for Banks - Consultation Response Document" (2009).

[70] [2012] EWCA Civ 1744.

[71] [2022] UKFTT 472 (TC).

[72] [2019] UKFTT 0677 (TC).

[73] See HMRC, "Litigation and Settlement Strategy" (Oct 2017) *https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attac*

document did not shed much light on how the Tribunal should exercise its discretion to direct disclosure.[74]

(2) HMRC Solicitors Office act adversarially and not collaboratively.[75]

There are at least three reasons to regard the collaborative approach with suspicion:

(1) It has resource implications for HMRC.
(2) It may lead away from the view that tax should be governed by law.
(3) It is more difficult (and perhaps not reasonable to expect) that one side should act collaboratively unless it is satisfied that the other will also do so; and that requires mutual trust which will not generally exist.

For a restatement of the traditional view, see the speech of Anthony Thomas, then CIOT president:

> We need to return to the "healthy tension" between HMRC and the tax profession that existed 10 to 20 years ago: no special relationships, no cosy conferences; no favours, deals and understandings; no inside tracks and private access. ... Senior tax officials did not subject directors, businesses and the professions to the kind of lectures one would expect from a politician. The job of civil servants is, and always has been, to apply the rule of law in an even handed manner.[76]

hment_data/file/655344/HMRC_Resolving_tax_disputes.pdf

[74] *McCabe v HMRC* [2020] UKUT 266 (TCC) at [56]; for this case see 9.18 (Tie-breaker: Mutual agreement); see too 122.4.1 (HMRC's compliance issues).

[75] In *Thakoral Tailor v HMRC* [2017] UKFTT 845 (TC) the taxpayer was elderly, unrepresented, in difficult financial circumstances, and with cognitive impairment. Even in those circumstances, HMRC acted adversarially. The Tribunal urged HMRC to consider the "unfairness which should have been apparent" (the taxpayer had fallen into the *Lobler* trap, yet again); but was otherwise impotent.

In *Oppenheimer v HMRC* [2022] UKFTT 112 (TC) at [219] the Tribunal noted with some exasperation:

> "... at a meeting between Mr Oppenheimer' advisers, the HMRC officer who was conducting the enquiry and a Mr Thomas of the UK Competent Authority Treaty Claims unit of HMRC, Mr Thomas, whose field of expertise it is, confirmed that in his view the issues were finally balanced. HMRC confirmed that again on a number of occasions in subsequent correspondence.
>
> We agree, but it would have been very difficult to have discerned that from the Skeleton Arguments, Notes on Evidence and Closing Submissions since, on the face of it, the parties were diametrically opposed on almost every issue and on the approach to those issues."

[76] "We Need Trust", Taxation Magazine (2 June 2011) p.7.

That was said in 2011. I am not sure how far this view prevails today.

A full discussion lies beyond the scope of this book, but the issues are deep, and will not go away.

122.11 Certificate of tax position

CIOT say:

Background
Over the past couple of years, HMRC have been sending out letters to UK individuals who they have identified as having received income, gains or assets from overseas accounts or investments. These have been prompted by information HMRC have been receiving from overseas tax authorities under Automatic Exchange of Information (AEOI) agreements about UK residents with financial accounts and investments overseas.[77] As noted, the letters are targeted at individuals whom the data identifies as having received income, gains or assets from overseas accounts or investments, and HMRC also undertake some additional risk assessment before sending the letters...

What's in the letters?
HMRC's letters use standard wording and start by informing the individual that HMRC have information which shows that they have an interest in overseas property or ay have received overseas income or gains which may be taxable in the UK.

Some of the letters the CIOT is aware of are:

March 2017: based on information from the US IRS under the IGA to improve international tax compliance and implement FATCA

February 2018: based on information from AEOI with the Crown Dependencies and Overseas Territories

February 2019: based on information from tax information exchange agreements with other countries, including as a result of the CRS.

February 2020: based on information from tax information exchange agreements with other countries, including as a result of the CRS (with some changes in the wording of the letter and Certificate of Tax position compared to the February 2019 version).

The most recent letters have come from HMRC's "Risk and Intelligence Service, Offshore". Some of them include a "Certificate of Tax Position" form which HMRC ask the individual to complete and return whether they have additional tax liabilities to disclose or not. We understand that one reason why HMRC use the "Certificate of Tax Position" is because it helps them minimise the number of "no response" cases they would otherwise need to follow up.

On the certificate, the individual is asked to sign and make a declaration to the effect that:

a) The information they provide on the certificate will be "correct and complete to the best of their knowledge and belief"- [this is identical to the declaration on the self-assessment tax return Box 22 of SA100] and

b) They understand that choosing to make a false statement or complete a false certificate is a criminal offence that can result in investigation and prosecution -

[77] See 130.1 (CRS & other information sources).

[this is similar, but not identical, to the declaration on the SA100 which is "I understand that I may have to pay financial penalties and face prosecution if I give false information].

They are also asked to tick that either:

a) Their tax affairs need to be brought up to date and they will make a disclosure of irregularities through the Worldwide Disclosure Facility (WDF); or

b) Their tax affairs do not need updating and they do not have additional tax to pay. There is then a further declaration: "I have declared all of my offshore income, assets and gains". Previous versions of the letter included the words "which are taxable in the UK" at the end of the sentence.

What you should do if a client receives one of these letters from HMRC

1. Check the position.

It should be noted that HMRC are saying in the letter that they are aware the person has overseas income, not that their tax return is necessarily wrong. However, HMRC do carry out some risk assessment before sending a letter, so it will clearly be essential to check whether the individual's tax affairs are correct and complete to the best of their knowledge and belief before responding to the letter.

We are also aware that discrepancies in the data may exist due to it often relating to a calendar year, thereby crossing over two UK tax years, and because it does not come into HMRC in a standard format. This is expected to affect mainly the early years of data exchange and should become less of an issue as we move into future tax years and HMRC's systems become more sophisticated at analysing the data they receive.

2. Respond to HMRC's letter, whether or not there is anything to disclose.

a. If a disclosure needs to be made, use the WDF (or another appropriate method).

If a disclosure is required, the letter advises that this must be made via the WDF. However, HMRC cannot compel a taxpayer to use any specific method for their disclosure and using the WDF may not necessarily be the most appropriate method. Depending on the individual circumstances of the taxpayer, other approaches may be better e.g. COP9 (Contractual Disclosure Facility). Agents should therefore consider their client's specific circumstances and advise on the most appropriate method for a disclosure. As noted, this may not always be the WDF.

A CIOT member must comply with the fundamental principle of professional competence and due care as set out in PCRT. This means that they should not undertake professional work which they are not competent to perform unless they obtain appropriate assistance from a suitably qualified specialist. Advice from another adviser specialising in tax disputes may therefore be needed if the agent does not have the necessary expertise to handle a disclosure themselves.

It is also important to note that there is no de mimimis level below which mistakes do not need to be disclosed.

b. If no disclosure is needed, the person should consider sending HMRC an explanation by letter.

HMRC will accept a response by letter should an individual choose not to complete the "Certificate of tax position" (see 3. below).

Where no response is received, HMRC will follow up so not responding at all will attract more attention from HMRC. Follow up is likely to be by a further letter in the first instance. If no response is forthcoming after the second letter, HMRC will consider the most appropriate action to take next following further risk assessment. This could range from contacting the person by telephone to opening an enquiry or investigation.

Responding to the initial letter will therefore mitigate the risks of further action being taken by HMRC.

If possible, try to respond within the 30 days provided by HMRC. However, if it is not possible or practical to respond fully to the letter within this timescale consider contacting HMRC either by telephone or letter to agree a more realistic timescale with them.

3. In view of the serious consequences of making a false declaration, consider very carefully whether to sign and return the "Certificate of tax position".

Although the declarations in the "Certificate of tax position" are similar, if not completely identical, to those on the self-assessment tax return, there are two important differences.

Unlike the tax return:

- There is no legal obligation on the individual to complete the "Certificate of tax position" and return it to HMRC; and
- The period covered by the "Certificate of tax position" - and therefore the declarations - is not restricted to a particular tax year. It applies to all years.

The certificate does not have a de minimis level.

The individual should consider very carefully whether to sign and return the certificate, regardless of whether they have irregularities to disclose or not. When advising a client who has received one of these letters, it will clearly be important that these consequences are made clear to them.

In discussions between the CIOT and HMRC, HMRC have agreed that there is no legal obligation for the individual to complete and return the certificate to them. They have told us that they will accept a response by letter as an alternative should an individual choose not to complete the declaration.

As mentioned, in view of the serious consequences of making a false declaration, it may therefore be preferable to respond by letter to HMRC, particularly if, after reviewing their tax affairs, the individual believes that their affairs are correct and up to date and they do not need to make a disclosure. The wide wording of the declaration (which, as mentioned above, no longer limits it to offshore income, assets and gains taxable in the UK), also indicates that a response by letter would be preferable since responding by letter enables an explanation to be included, which could pre-empt further queries by HMRC. For example, in the case of a non-UK domiciled individual, to confirm that no funds were remitted to the UK and that all the funds deposited into the account came from funds on which UK tax was paid as appropriate in past years (i.e. that there may have been offshore income, gains or assets which have legitimately not been disclosed). As mentioned, HMRC's letter does require a response, in one form or another. If the individual needs to make a disclosure but chooses not to complete the "Certificate of tax position", it would be good practice to respond to HMRC's letter in writing and advise HMRC that a disclosure via the WDF (or other method) is being made.

With data from overseas now being constantly received under AEOI agreements, HMRC are adopting an approach of sending out batches of letters at regular intervals.

Members should be aware that this approach will continue for the foreseeable future.[78]

122.12 Professional conduct: Back duty

This topic was covered by PCRT Helpsheet 3 (Voluntary disclosures under disclosure facilities) and now by Helpsheets C1 and C2, which I hope to consider in a future edition.

CHAPTER ONE HUNDRED AND TWENTY THREE

CLAIMS

123.1 Claims
123.2 Standard claim rules
123.2.1 s.42 claim-procedure rules
123.2.2 Claim time limit
123.2.3 Capital loss claims
123.2.4 Remittance basis claims
123.2.5 2017 rebasing election
123.3 Quantification of claim
123.4 Types of claim
123.5 Tax return claims
123.5.1 Amendment window
123.6 Free-standing claims
123.6.1 Amending freestanding claim
123.7 Late claim: Non -culpable taxpayer
123.7.1 Late claim after assessment
123.7.2 Cap on late claim/amendment
123.7.3 Late claim after return amended
123.7.4 Late claim for tax repayment
123.8 Late claim: Culpable taxpayer

123.1 Claims

This chapter discusses procedures for making claims and their time limits.

123.2 Standard claim rules

123.2.1 *s.42 claim-procedure rules*

Statutory terminology refers to claims, elections and notices.

Section 42(1) TMA 1970 provides:

> Where any provision of the Taxes Acts provides for relief to be given, or any other thing to be done, on the making of a claim, this section shall, unless otherwise provided, have effect in relation to the claim.

In short, s.42 sets out default rules for “claims”. I refer to this as the **“s.42 claim-procedure rules”**.

Where the statutory rule does not use the word “claim”, but some other term such as election or notice, the s.42 rules would not apply, but sometimes they are incorporated by reference, with or without some amendment. I set out the examples relevant to this book in the next section.

123.2.2 *Claim time limit*

Section 43(1) TMA provides:

> Subject to any provision of the Taxes Acts prescribing a longer or shorter period, no claim for relief in respect of income tax or capital gains tax may be made more than 4 years after the end of the year of assessment to which it relates.

In short, s.43 sets out the default time limit for claims for relief. I refer to this as the **"s.43 claim time limit"**. The rule and its wording is aligned with the 4 year time limit for assessments.[1]

The s.43 claim time limit only applies to a "claim for relief".[2] As worded, it does not apply in the case of:

(1) A statutory provision which does not use the word "claim", or

(2) A statutory provision which is not a claim "for relief".

But sometimes the s.43 time limit is incorporated by reference.

It may be useful to set out an aide memoire of s.43 claim time limits:

Tax Year	Last date for claim	Tax Year	Last date for claim
2015/16	5/4/2020	2019/20	5/4/2024
2016/17	5/4/2021	2020/21	5/4/2025
2017/18	5/4/2022	2021/22	5/4/2026
2018/19	5/4/2023	2022/23	5/4/2026

I refer to s.42 claim-procedure rules and the s.43 claim time limit together as **"s.42/43 claim procedure rules"**.

123.2.3 *Capital loss claims*

Section 16(2A) TCGA provides:

> [i] A loss accruing to a person in a year of assessment shall not be an allowable loss for the purposes of this Act unless, in relation to that year, he gives a notice to an officer of the Board quantifying the amount of that loss;
>
> [ii] and sections 42 and 43 of the Management Act shall apply in relation to such a notice as if it were a claim for relief.

This notice is not a claim, or at least, not described as a claim, but the s.42/43 claim procedure rules apply as if it were. It would have been

[1] See 121.14 (4 year limit).

[2] Contrast s.42 which applies on (1) a claim for relief or (2) a claim for any other thing to be done.

easier to say that an allowable loss requires a "claim"; or is there some difference which follows from using the word "notice" and incorporating s.42/43 "as if the notice were a claim"?

Similarly for a foreign-loss election by a remittance basis taxpayer.[3] Section 16ZA(4) TCGA provides:

> Sections 42 and 43 of the Management Act (procedure and time limit for making claims), except section 42(1A) of that Act,[4] apply in relation to an election under this section as they apply in relation to a claim for relief.

For losses and s.1(3) amounts (trust gains) see 61.6.4 (Claims for relief).

123.2.4 *Remittance basis claims*

For these claims, see 17.7 (Remittance-basis claim: s.809B).

Section 809B(3) ITA applies the standard claim procedure rules to remittance basis claims subject to some tinkering:

> Sections 42 and 43 of TMA 1970 (procedure and time limit for making claims), except s.42(1A) of that Act, apply in relation to a claim under this section as they apply in relation to a claim for relief.

The relevant section actually refers to a "claim" for the remittance basis, so the s.42 claim procedure rules would apply to a remittance basis claim in any event.[5] Presumably the point here is to disapply s.42(1A).[6] It seems a slightly roundabout way to achieve that, but there it is. The drafter has perhaps adopted precedents found elsewhere. However that may be, a remittance basis claim of unremitted income/gains does not need to be quantified, that is, it is not necessary to specify the amount of unremitted income/gains.

The s.43 claim time limit would only apply to a claim for the remittance basis if the claim were a claim "for relief", which it is not, at least in the strict sense, so s.809B(3) applies s.43 expressly.

123.2.5 *2017 rebasing election*

For these elections, see 56.16.13 (Election out of 2017 rebasing).

[3] See 64.16.4 (Foreign-loss election).

[4] See 123.3 (Quantification of claim).

[5] Even if the claim is not a "claim for relief", it is a claim for a "thing to be done".

[6] See 123.3 (Quantification of claim).

Para 43(2) sch 8 F(no.2)A 2017 provides:

> Sections 42 and 43 of TMA 1970 (procedure and time limit for claims), except section 42(1A) of that Act, apply in relation to an election under this paragraph as they apply in relation to a claim for relief.

This follows the wording used for foreign-loss elections.

123.3 Quantification of claim

Section 42(1A) TMA provides:

> Subject to subsection (3) below,[7] a claim for a relief, an allowance or a repayment of tax shall be for an amount which is quantified at the time when the claim is made.

Quantification may be estimated: In *Claimants Listed in Class 8 of the Group Register of the CFC and Dividend GLO v HMRC*:[8]

> ... that provision makes no reference to the amount being accurate, only to it being quantified. And one can quite see why quantification is necessary in a self-assessment system, where paragraph 7 of schedule 18 provides for taxpayers to make a self-assessment tax return "of the amount of tax which is payable by the company for that period … (a) on the basis of the information contained in the return, and (b) taking into account any relief … for which a claim is included in the return". Moreover, paragraph 56 allows for a supplementary claim to be made to correct an original claim.

123.4 Types of claim

There are two types of claim:

Type of claim (my term)	**Where made**	**See**
Tax return claim	In tax return	20.5
Free-standing claim	Outside tax return	20.6

The practical difference is that tax return claims are governed by the procedures for enquiry and appeals which apply to tax returns. Freestanding claims are governed by sch 1A TMA.

123.5 Tax return claims

Section 42(2) TMA 1970 provides (so far as relevant):

[7] Subsection (3) deals with PAYE and is not discussed here.

[8] [2019] EWHC 338 (Ch) at [99]-[100].

> [a] Subject to subsections (3) to (3ZC) below,[9]
> [b] where notice has been given under
>   [i] section 8 [personal return][10]
>   [ii] 8A [trustee return] or
>   [iii] 12AA of this Act [partnership return]
> [c] a claim shall not at any time be made otherwise than by being included in a return[11] under that section if it could, at that or any subsequent time, be made by being so included.

Thus the starting point is that a claim should be made in a tax return, not as a free-standing claim.

123.5.1 *Amendment window*

A taxpayer may amend a return.[12] If a tax return is submitted without a remittance basis or other claim, the claim can be made by amending the return; similarly, if a tax return is submitted with a claim, the claim can be withdrawn by amending the return.

HMRC agree. The RDR Manual provides:

> **RDRM32020 Claiming the remittance basis: Making a claim** [Jan 2019]
> ... If the return is subsequently amended, the claim may be included then or a previously made claim may be amended or deleted (s.42(5) TMA 1970).

However the time limit for amending a tax return is quite short, one year from the filing date. I refer to this period as the **"amendment window"**.

The RDR Manual provides:

> **RDRM32020 Claiming the remittance basis: Making a claim** [Jan 2019]
> ... when the time period for making an amendment has passed, the

[9] The exceptions referred to in para [a] are specialist cases where a tax return is not expected to be made:

Subsection	**Topic**
3	PAYE claim
3ZA, 3ZB	Charity tax relief/tax repayment claim
3ZC	GAAR claim

[10] See 121.4 (Notice to make return).

[11] Section 42(5) TMA provides: "The references in this section to a claim being included in a return include references to a claim being so included by virtue of an amendment of the return."

[12] See 106.4 (Amending a return).

> claim may not be withdrawn even if the making of the claim turns out to have been an error. This is because error or mistake relief does not apply to claims made to use the remittance basis under s.809B ITA 2007 (s.33(2A)(c) TMA 1970).

Section 33(2A)(c) TMA formerly provided that no relief was given under s.33 for an error or mistake consisting of the making of a remittance basis claim. The reference in the Manual is out of date as the legislation was rewritten in 2009. The provisions are now in sch 1AB TMA, which does not refer expressly to remittance basis claims, but the new provisions only apply where tax has been paid, or assessed, which is not due. That is not the case where making a remittance basis claim was a mistake in the sense that it was not beneficial. So the position remains as before. That is, after amendment window has closed, it is only possible to withdraw a remittance basis or other claim in the circumstances below.

123.6 Free-standing claims

A free-standing claim is made if:

(1) HMRC do not give notice to complete a tax return[13]
(2) It is too late to make or amend a return
(3) Fo some other reason a claim cannot be made in a return (for instance, a claim for hold-over relief generally needs to be made by transferor and transferee, so cannot be made in the transferor's return).

Freestanding claims are governed by sch 1A TMA. I do not discuss this here, though I hope to do so in a future edition.

In the absence of an official form, a free-standing claim could be made informally, eg by letter.

Where a free-standing claim is needed because there was no notice to submit a tax return, I suspect it is common practice to voluntarily submit a return (despite the absence of a notice requiring one) and make the claim in that return.[14]

Once the return is made, and the deadline for amending the return has passed, the claim cannot subsequently be included in the return; and that

[13] Form SA316. In practice a person who wishes to make a remittance basis or other claim will usually receive a notice to complete a tax return.

[14] A claim in an unsolicited tax return is an effective claim; see 121.4.8 (Voluntary return) and, if authority is needed, *Weerasinghe v HMRC* [2013] UKFTT 144 (TC).

opens up the possibility of making the claim outside the return, subject to the 4 year time limit.

HMRC agree. A consultation paper in 2015 summarised the position for remittance basis claims:[15]

> - the [remittance basis] claim will continue to be made on the self-assessment tax return, which has a deadline for filing at the end of January of the following year. For example, the return for 2013-14 is due by 31 January 2015. This means individuals will have a good understanding of their income and gains for up to 21 months of the 36 months covered by the claim
> - individuals will continue to be able to amend their self-assessment tax returns within 12 months of the statutory filing date, so individuals will be able to change a decision on a claim within that time limit if they choose to do so
> - individuals who pay tax on the arising basis [because they did not make a remittance basis claim] will continue to have four years after the end of the tax year in which to claim the remittance basis, which also allows individuals to make a final decision based on a full understanding of their worldwide income and gains in those circumstances if they choose to do so

The RDR Manual provides:

> **RDRM32030 Claims - Time Limits** [Jan 2019]
> The time limits for making claims are set out in Section 43 TMA 1970. The general time limit as set out in TMA70/s43(1) for making a claim also applies to making a claim for the remittance basis.

The Manual adds:

> If there is a likelihood that the claim might not be made within the general time limit for making the claim, then the individual must tell HMRC of the intention to make the claim. This must stipulate:
> - the nature of the claim, and
> - the year for which it is to be made

[15] HMRC "Non-UK domiciled individuals: consultation on a minimum claim period for the remittance basis charge" (2015) *https://www.gov.uk/government/consultations/non-uk-domiciled-individuals-consultation-on-a-minimum-claim-period-for-the-remittance-basis-charge*
The proposal in this consultation paper was abandoned, presumably because it was overtaken by the more far-reaching deemed domicile rules, but that does not affect the points made here.

But I think what the Manual describes as "telling HMRC of the intention to make the claim" actually amounts to making a claim.

123.6.1 *Amending freestanding claim*

Para 3 sch 1A TMA provides:

> (1) Subject to sub-paragraph (2) below—
> (a) at any time before the end of the period of nine months beginning with the day on which a claim is made, an officer of the Board may by notice to the claimant so amend the claim as to correct any obvious errors or mistakes in the claim (whether errors of principle, arithmetical mistakes or otherwise); and
> (b) at any time before the end of the period of twelve months beginning with the day on which the claim is made, the claimant may amend his claim by notice to an officer of the Board.
> (2) No amendment of a claim may be made under sub-paragraph (1) above at any time during the period—
> (a) beginning with the day on which an officer of the Board gives notice of his intention to enquire into the claim, and
> (b) ending with the day on which the officer's enquiries into the claim are completed.

123.7 Late claim: Non -culpable taxpayer

123.7.1 *Late claim after assessment*

Section 43(2) TMA permits a late claim following an assessment:

> [a] A claim (including a supplementary claim) which could not have been allowed but for the making of an assessment to income tax or capital gains tax after the year of assessment to which the claim relates
> [b] may be made at any time before the end of the year of assessment following that in which the assessment was made.

Section 43A TMA provides:

> (1) This section applies where—
> (a) by virtue of section 29 of this Act an assessment to income tax or capital gains tax is made on any person for a year of assessment, and
> (b) the assessment is not made for the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by that person or by someone acting on behalf of

that person.

(2) Without prejudice to section 43(2) above but subject to section 43B below, where this section applies—

The rules which follow are best read side by side:

Making a claim: s.43A(2)(a)	**Revoking/varying claim: s.43A(2)(b)**
(a) any relevant[16] claim, election, application or notice which could have been made or given within the time allowed by the Taxes Acts may be made or given at any time within one year from the end of the year of assessment in which the assessment is made, and	(b) any relevant claim, election, application or notice previously made or given may at any such time be revoked or varied— (i) in the same manner as it was made or given, and (ii) by or with the consent of the same person or persons who made, gave or consented to it (or, in the case of any such person who has died, by or with the consent of his personal representatives),

except where by virtue of any enactment it [the claim, etc] is irrevocable.

123.7.2 *Cap on late claim/amendment*

Section 43B TMA provides a cap on the relief given by a late claim or

[16] Section 42A TMA provides:
"(2B) For the purposes of this section and section 43B below, a claim under Schedule 1AB is relevant in relation to an assessment for a year of assessment if it relates to that year of assessment.
(3) For the purposes of this section and section 43B below, any other claim, election, application or notice is relevant in relation to an assessment for a year of assessment if—
(a) it relates to that year of assessment or is made or given by reference to an event occurring in that year of assessment, and
(b) it or, as the case may be, its revocation or variation has or could have the effect of reducing any of the liabilities mentioned in subsection (4) below.
(4) The liabilities referred to in subsection (3) above are—
(a) the increased liability to tax resulting from the assessment,
(b) any other liability to tax of the person concerned for—
(i) the year of assessment to which the assessment relates, or
(ii) any year of assessment which follows that year of assessment and ends not later than one year after the end of the year of assessment in which the assessment is made."

revocation:

> (3) In any case where—
>
> (a) one or more relevant claims, elections, applications or notices are made, given, revoked or varied by virtue of the application of section 43A above in the case of an assessment, and
>
> (b) the total of the reductions in liability to tax which, apart from this subsection, would result from the action mentioned in paragraph (a) above would exceed the additional liability to tax resulting from the assessment,
>
> the excess shall not be available to reduce any liability to tax.
>
> (4) Where subsection (3) above has the effect of limiting either the reduction in a person's liability to tax for more than one period or the reduction in the liability to tax of more than one person, the limited amount shall be apportioned between the periods or persons concerned—
>
> (a) except where paragraph (b) below applies, in such manner as may be specified by the inspector by notice in writing to the person or persons concerned, or
>
> (b) where the person concerned gives (or the persons concerned jointly give) notice in writing to the inspector within the relevant period, in such manner as may be specified in the notice given by the person or persons concerned.
>
> (5) For the purposes of paragraph (b) of subsection (4) above the relevant period is the period of 30 days beginning with the day on which notice under paragraph (a) of that subsection is given to the person concerned or, where more than one person is concerned, the latest date on which such notice is given to any of them.

A typical case is if no remittance basis claim was made as a taxpayer reasonably considered that some relief applied. Likewise a late claim for DT relief may be made if a taxpayer reasonably considered that some other relief was available.

HMRC agree. The Self Assessment Claims Manual provides:

> **SACM9015. Non-Culpable Additions** [Feb 2019]
>
> Where you
>
> - amend a return in an SA enquiry closure notice, or
> - make a discovery assessment for reasons other than careless or deliberate behaviour
>
> the taxpayer can make a relevant out-of-time claim, election, application or notice within one year from the end of the year of assessment in which the notice is issued. S.43A and s.43C(2).

In s.43A for a claim, election, application or notice to be relevant to an amendment or assessment it must

- relate to the same year of assessment, or
- be made or given by reference to an event in that year, see s.43A(3) TMA 1970).

The taxpayer can also

- revoke a claim, election, application or notice already made, or
- amend a claim, election, application or notice, except where it is irrevocable in law.

The effect of the taxpayer making, revoking or amending a claim, election, application or notice is limited to the additional liability to tax resulting from the assessment or your amendment.

So if an ITSA enquiry increases a taxpayer's self assessment by £1,500 tax, the effect of any out-of-time claims or elections is limited to £1,500, see s.43B(3) TMA 1970. Any "excess" tax effect of the claim or election "shall not be available to reduce any liability to tax".

123.7.3 *Late claim after return amended*

Section 43C(2) TMA applies the same following amendment of a return (as opposed to an assessment):

> Where-
>
> (a) a return is amended under section 28A(2)(b) [amendment on closure of enquiry][17] and
>
> (b) the amendment is not made for the purpose mentioned in subsection (1)(b) above [ie not for "the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by the taxpayer or a person acting on his behalf"]
>
> sections 43(2), 43A and 43B apply in relation to the amendment as they apply in relation to any assessment under section 29.

Amended as s.43C directs, these statutory provisions become:

Section 43(2) TMA:

> [a] A claim (including a supplementary claim) which could not have been allowed but for the making of an ~~assessment~~ amendment to a return to income tax or capital gains tax after the year of assessment to which the claim relates
>
> [b] may be made at any time before the end of the year of assessment following that in which the ~~assessment~~ amendment to a return was made.

[17] See 121.21 (Enquiry ends: Closure notice).

Section 43A TMA:

(1) This section applies where—

(a) by virtue of section 29 of this Act an ~~assessment~~ amendment to a return to income tax or capital gains tax is made on any person for a year of assessment, and

(b) the ~~assessment~~ amendment to a return is not made for the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by that person or by someone acting on behalf of that person.

(2) Without prejudice to section 43(2) above but subject to section 43B below, where this section applies—

Making a claim: s.43A(2)(a)

(a) any relevant[18] claim, election, application or notice which could have been made or given within the time allowed by the Taxes Acts may be made or given at any time within one year from the end of the year of assessment in which the ~~assessment~~ amendment to a return is made, and

Revoking/varying claim: s.43A(2)(b)

(b) any relevant claim, election, application or notice previously made or given may at any such time be revoked or varied—

(i) in the same manner as it was made or given, and

(ii) by or with the consent of the same person or persons who made, gave or consented to it (or, in the case of any such person who has died, by or with the consent of his personal representatives),

[18] Section 42A TMA provides:

"(2B) For the purposes of this section and section 43B below, a claim under Schedule 1AB is relevant in relation to an ~~assessment~~ amendment to a return for a year of assessment if it relates to that year of assessment.

(3) For the purposes of this section and section 43B below, any other claim, election, application or notice is relevant in relation to an ~~assessment~~ amendment to a return for a year of assessment if—

(a) it relates to that year of assessment or is made or given by reference to an event occurring in that year of assessment, and

(b) it or, as the case may be, its revocation or variation has or could have the effect of reducing any of the liabilities mentioned in subsection (4) below.

(4) The liabilities referred to in subsection (3) above are—

(a) the increased liability to tax resulting from the assessment,

(b) any other liability to tax of the person concerned for—

(i) the year of assessment to which the assessment relates, or

(ii) any year of assessment which follows that year of assessment and ends not later than one year after the end of the year of assessment in which the ~~assessment~~ amendment to a return is made."

> except where by virtue of any enactment it [the claim, etc] is irrevocable.

Section 43B TMA provides:

> (3) In any case where—
>
> (a) one or more relevant claims, elections, applications or notices are made, given, revoked or varied by virtue of the application of section 43A above in the case of an ~~assessment~~ amendment to a return , and
>
> (b) the total of the reductions in liability to tax which, apart from this subsection, would result from the action mentioned in paragraph (a) above would exceed the additional liability to tax resulting from the ~~assessment~~ amendment to a return ,
>
> the excess shall not be available to reduce any liability to tax.
>
> (4) Where subsection (3) above has the effect of limiting either the reduction in a person's liability to tax for more than one period or the reduction in the liability to tax of more than one person, the limited amount shall be apportioned between the periods or persons concerned—
>
> (a) except where paragraph (b) below applies, in such manner as may be specified by the inspector by notice in writing to the person or persons concerned, or
>
> (b) where the person concerned gives (or the persons concerned jointly give) notice in writing to the inspector within the relevant period, in such manner as may be specified in the notice given by the person or persons concerned.
>
> (5) For the purposes of paragraph (b) of subsection (4) above the relevant period is the period of 30 days beginning with the day on which notice under paragraph (a) of that subsection is given to the person concerned or, where more than one person is concerned, the latest date on which such notice is given to any of them.

So in short, if:

(1) HMRC raise a late assessment, and

(2) there is no carelessness/deliberate error

it is possible to make a late remittance basis claim if the claim is one "which could not have been allowed but for the making of an amended return". That would be the case if there is no income returned against which the claim could be allowed.

123.7.4 *Late claim for tax repayment*

ESC B41 provides:

> Under the Taxes Management Act, unless a longer or shorter period is prescribed, no statutory claim for relief is allowed unless it is made within four years from the end of the tax year to which it relates.
>
> However, repayments of tax will be made in respect of claims made

> outside the statutory time limit where an over-payment of tax has arisen because of an error by the Inland Revenue or another government department, and where there is no dispute or doubt as to the facts.

The SAC Manual provides:

> **SACM10040 Late Claims** [Jan 2019]
> ... For example, you might accept a late claim under ESC B41 where, before the time limit for making the claim, an HMRC officer
>
> - told a person that they could make a claim or election later than the statutory time limit, or
> - wrongly advised them that a claim or election was not possible, where the officer ought to have known, from the information given to them, that this advice was incorrect.
>
> If an error like this comes to a person's attention, they must notify HMRC as soon as they reasonably can that they will want to make a late claim.

123.8 Late claim: Culpable taxpayer

In cases of carelessness, or deliberate error, late claims may still be permitted under s.36(3) TMA:

> If the person on whom the assessment is made so requires, in determining the amount of the tax to be charged for any chargeable period in any assessment made in a case mentioned in subsection (1) or (1A) above, [extended assessment period due to carelessness, deliberate error, breach of DOTAS][19] effect shall be given to any relief or allowance to which he would have been entitled for that chargeable period on a claim or application made within the time allowed by the Taxes Acts.

Section 43C TMA provides:

> (1) Where—
> (a) a return is amended under section 28A(2)(b) ... and
> (b) the amendment is made for the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by the taxpayer or a person acting on his behalf,
>
> sections 36(3) and 43(2) apply in relation to the amendment as they apply in relation to any assessment under section 29.
> (2) Where—

[19] See 121.13 (IT/CGT assessment time limits).

(a) a return is amended under section 28A(2)(b) ... and

(b) the amendment is not made for the purpose mentioned in subsection (1)(b) above,

sections 43(2), 43A and 43B apply in relation to the amendment as they apply in relation to any assessment under section 29.

(3) References to an assessment in sections 36(3), 43(2), 43A and 43B, as they apply by virtue of subsection (1) or (2) above, shall accordingly be read as references to the amendment of the return.

CHAPTER ONE HUNDRED AND TWENTY FOUR

COLLECTION OF IT/CGT FROM UK REPRESENTATIVES

124.1 Tax collected from non-resident
124.2 Tax collected from UK representative
124.3 UK representative
124.3.1 Why UK representatives matter
124.3.2 Definition of "UK representative"
124.3.3 Representative ceasing to act
124.3.4 Separate personality
124.4 Partnership: UK representative
124.5 UK representatives: Exemptions
124.5.1 Casual agent
124.5.2 Broker/Investment manager
124.6 Subsidiary points
124.6.1 HMRC procedures
124.6.2 Notices and information
124.6.3 Criminal offences/penalties
124.6.4 Indemnities
124.7 Agents/investment managers

124.1 Tax collected from non-resident

The former International Tax Handbook provided:

> **903. Machinery of assessment: direct charge on non-residents**
> It always was and still is possible to assess a non-resident directly if, in the words of the Courts, he can be reached. A simple example of such a situation arose in the case of *Tischler v Apthorpe* [2 TC 89]. Mr Tischler was not resident. He was a partner in a French wine firm who spent four months or so a year in England. He lived then in a London hotel and sold wine to English customers. His firm also employed London agents and the question was whether the English profits could be assessed directly on Mr Tischler or whether such assessments should, Mr Tischler being non-resident, be made only on the English agents. The High Court held that an assessment made directly on the firm was good and that Mr Tischler was obliged to make a return served on him. In the words of Mathew J
> 'If the principal can be got at there is no need to have recourse to Section 41' (of the 1842 Act which was consolidated in Section 78 TMA 1970).
> An individual, clearly, can be physically present in this country without being resident here and we used to have to rely on the principle established by the Tischler case in reaching the profits made by overseas sportsmen and women and artistes who come to this country for quite brief engagements. The modern view certainly, is that a non-resident company which trades here equally is here and that it may similarly be reached. If the company has a branch presence here

> with all the physical trappings of its trade it is visibly here and will have a registered place of business, an address at which it may be found and at which legal notices may be served.
>
> The principle of direct assessment is not confined to non-residents who actually come here. There is no bar on direct assessment of non-residents who are not here whether or not they have agents in the UK. This was made clear in the case of *Werle v Colquhoun* [2 TC 402]. The difficulty with direct assessment on a person who is not here lies in recovering the tax, although now that the Supreme Court rules allow service of writs abroad this may be a little easier provided there are assets in the UK. But it is still true to say that if a non-resident company acting through an agent has no such physical presence here and has nothing here the Revenue cannot, in practice, impose its charge effectively without more adequate machinery including that for the service of notices and returns as well as for the actual gathering of the tax. It was in such situations – where the non-resident had only an agent here – that the original form of Part VIII was intended to come to the Revenue's aid. In practice Part VIII is normally used today even in those cases where the taxpayer can be reached directly ...

This was written before the 1995 changes and before the mutual collection of tax agreements but the point is still valid.

124.2 Tax collected from UK representative

The rules are set out three times:

(1) For IT the rules are in Chapters 2B and 2C Part 14 ITA. This does not apply to companies[1] so effectively this applies to non-resident individuals and trusts.
(2) For CGT the rules are in Part 7A TCGA.
(3) For CT the rules are in Chapter 6 Part 22 CTA 2010.

This does make a coherent discussion somewhat harder. In this chapter I set out the IT rules in full, and (in the absence of material differences) give CGT and CT references in a footnote only.

Section 835U(1) ITA provides the basic rule:

> The obligations and liabilities of a non-UK resident are to be treated, for the purposes of the enactments to which this Chapter applies,[2] as if they

[1] Section 835D ITA provides:
"This Chapter does not apply in relation to income tax chargeable on income of a company otherwise than as a trustee."

[2] This relates back to s.835T ITA which provides:
(1) This Chapter applies to the enactments relating to income tax so far as they make provision for or in connection with the assessment, collection and recovery of tax,

> were also the obligations and liabilities of the UK representative of the non-UK resident.

This is a collection provision (the metaphor often used is "machinery provision[3]") and not a charging provision: the UK representative is only subject to tax if there is a charge to tax on usual principles on the non-resident principal. The INT Manual provides:

> **INTM268010 Introduction - What are the machinery provisions for assessment and collection?** [May 2019]
> ... The machinery provisions alone cannot create or extend a tax liability on the non-resident. There has to be a charge to tax in respect of the non-resident under the domestic provisions in the first place. The provisions work by treating the tax obligations and liabilities of the non-resident as though they were additionally the obligations and liabilities of the UK representative. This provides a practical assessment and collection mechanism for non-residents. Once either the non-resident or the UK representative has paid the liabilities both parties are treated as having met their liabilities. ...

Section 835U goes on to deal with the discharge of obligations:

> (2) Subsection (3) applies if—
> (a) the UK representative of a non-UK resident discharges an obligation or liability imposed by this section that corresponds to one to which the non-UK resident is subject, or
> (b) a non-UK resident discharges an obligation or liability that corresponds to one to which the non-UK resident's UK representative is subject by virtue of this section.
> (3) The corresponding obligation or liability—
> (a) of the non-UK resident (in a case within subsection (2)(a)), or
> (b) of the UK representative (in a case within subsection (2)(b)),
> is discharged.
> (4) A non-UK resident is bound, as if they were the non-UK resident's own, by acts or omissions of the non-UK resident's UK representative in the discharge of the obligations and liabilities imposed on the representative by this section. ...

or of interest on tax.

(2) Those enactments have effect in accordance with section 835U in relation to amounts in respect of which a branch or agency is to be treated as the UK representative of a non-UK resident under Chapter 2B.

[3] See App.1.7 (Machinery/mechanism metaphor).

124.3 UK representative

124.3.1 *Why UK representatives matter*

A UK representative is important for two reasons:

(1) A UK representative is liable for tax due from the non-resident principal, the topic of this chapter.

(2) Income in relation to which a non-UK resident has a UK representative falls outside non-resident IT relief.[4]

124.3.2 *Definition of "UK representative"*

Section 835E ITA gives the basic definition for IT:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) any trade, profession or vocation through a branch or agency in the UK.
> (2) The branch or agency is the UK representative of the non-UK resident in relation to—
> (a) the amount of any income from the trade, profession or vocation that arises (directly or indirectly) through or from the branch or agency, and
> (b) the amount of any income from property or rights which are used by, or held by or for, the branch or agency.

Thus for IT and CGT a UK representative is in short a branch or agency.

For CT, the term PE is used instead of branch/agency. Section 969(3) CTA 2010 provides:

> For the purposes of this Chapter, the following rules apply to a permanent establishment in the UK through which a non-UK resident company carries on a trade.
> *Rule 1*
> The permanent establishment is the UK representative of the non-UK resident company in relation to chargeable profits of the company attributable to that establishment.

In the following discussion the "**non-resident principal**" is the person for whom the UK representative is a representative (which the statute calls "the non-UK resident").

The question whether the non-resident principal is trading is crucial for the UK representative rules, because these rules only apply if the non-

[4] See 45.5 (Disregarded income).

resident principal is carrying on a trade, profession or vocation.[5]

The INT Manual provides:

> **INTM268030 Extent of UK representative's liability** [Jun 2018]
> A person can only be the UK representative in respect of the permanent establishment/branch or agency with which they are linked. Where a non-resident has more than one UK permanent establishment/branch or agency, then it is possible that each will have a different UK representative. In those circumstances, each UK representative would only be responsible in respect of the part of their non-resident's liabilities and obligations arising from their own permanent establishment/branch or agency [*Neilsen Andersen v Collins*, and *Tarn v Scanlan* 13 TC 91].

The former International Tax Handbook explained "directly or indirectly" in s.835E(2)(a):

> **914. General**
> Section 79 [TMA 1970] is another 1915 amendment. It provides that a non-resident shall be chargeable on profits or gains arising directly or indirectly through any branch, agency etc here. The sort of thing that was happening, before this provision was introduced, was that an agent for a non-resident would negotiate a contract here and at the end of the oral negotiations the agent and the third party would agree to sign the formal documents abroad. The view the Revenue took, and defensibly so, was that in substance all had been done here apart from signing a piece of paper and that it was wrong for liability so to be avoided.
> Problems of that sort are really problems of fact and proof as was mentioned in chapter 8 (ITH822). If the Revenue could have proved that there was an unwritten agreement made in London, it would have succeeded in a claim that the non-resident was trading here, and that is what we would argue today. Millions of pounds worth of business are done in the City of London every day on the basis of spoken agreements which are later confirmed in writing and nobody wishes to deny that the word is the contract. But, when the parties to the contract do not wish to act openly, proof is difficult to come by. What these words were meant to do was to enable the Revenue to say – "we must accept that this contract was made abroad because we cannot prove otherwise but a lot of negotiation took place in London and we want to look at the substance of the matter and the words 'directly or indirectly' will enable us to do that".

[5] See 72.15 (What is a financial trade?).

124.3.3 *Representative ceasing to act*

Rule 1 s.835E(3) ITA provides for the UK representative ceasing to act:

> *Rule 1*
> The UK representative continues to be the UK representative of the non-UK resident in relation to the amount even after ceasing to be a branch or agency through which the non-UK resident carries on the trade, profession or vocation concerned.

The INT Manual provides:

> **INTM268040 What assessments should be raised and how is that done?** [May 2019]
> ... Where the trading activities in the UK have ceased, the UK permanent establishment / branch or agency retains the obligations and liabilities as the UK representative even after the cessation. This provision is at ITA07/S835E Rule1 and ITTOIA05/Sch6 Para 3 (old FA95/S126 (3)) for income tax and at CTA10/S969(3) Rule 3 (old FA03/S150(2)(c)) for corporation tax. So assessments can still be raised on the UK representative subject to the usual assessing time limits. Where however the trading was conducted through a branch or fixed place of business and that presence has discontinued there may be difficulties identifying any person as the UK representative or any assets within the UK upon which recovery may rely. It is therefore recommended that assessments for such UK branches are raised and tax brought into charge at as early a stage as possible.
> Additionally, by EU Directive member states of the European Union are able to seek the assistance of another member state in the recovery of direct and indirect taxes (see the guidance at DMBM560010).

124.3.4 *Separate personality*

Rule 2 s.835E(3) ITA provides for deemed separate personality:

> *Rule 2*
> The UK representative is treated in relation to the amount as a distinct and separate person from the non-UK resident (if the representative would not otherwise be so treated).

The SALF Manual provides:

> **SALF704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]
> *UK representative is treated as a separate person*
> The UK representative and the non-resident are treated as separate

persons. This allows, for example, service of notices and collection to take place at the branch or agency/permanent establishment.

124.4 Partnership: UK representative

Rule 3 s.835E(3) ITA provides:

> *Rule 3*
> If the branch or agency is carried on by persons in partnership, the partnership, as such, is treated in relation to the amount as the UK representative of the non-UK resident.

Section 835F ITA provides:

> (1) Subsection (2) applies if a trade or profession carried on by a non-UK resident through a branch or agency in the UK is carried on by the non-UK resident in partnership.
> (2) The trade or profession carried on through the branch or agency is, for the purposes of section 835E and Chapter 2C, to be treated as including the notional trade or profession.
> (3) Subsection (4) applies (in addition to subsection (2) if that subsection also applies) if—
> (a) a trade or profession carried on by a non-UK resident in the UK is carried on by the non-UK resident in partnership, and
> (b) any member of the partnership is resident in the UK.
> (4) The notional trade or profession is, for the purposes of section 835E and Chapter 2C, to be treated as being a trade carried on in the UK through the partnership as such.
> (5) In this section "the notional trade or profession" means the notional trade from which the non-UK resident's share in the partnership's profits or losses is treated for the purposes of section 852 of ITTOIA 2005 as deriving.

The INT Manual provides:

> **INTM268020 Who can be the non-resident's UK representative?**
> [Jun 2018]
> ***Partnerships can be the UK representative of a non-resident***
> A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK though the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident. This provision is at ITA07/S835E and TIOPA10/S835E for income tax and is implicit in CTA10/S969 for

> corporation tax.
>
> Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a permanent establishment / branch or agency, the permanent establishment / branch or agency is the UK representative of each non-resident partner. This provision is at ITA07/S835F and TIOPA10/S835F for income tax and is implicit in CTA10/S969 for corporation tax.
>
> Where a business is carried on in the UK by a partnership that includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit. This provision is at ITA07/S835F and TIOPA10/S835F for income tax and is implicit in CTA10/S969 for corporation tax.

The SALF Manual provides:

> **SALF704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]
>
> *A partnership can be the UK representative of a non-resident*
>
> A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK though the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident.
>
> *Partnership, which includes non-resident partners, trading in the UK through a branch or agency/permanent establishment: the branch or agency/permanent establishment is treated as the UK representative of non-resident partners*
>
> Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a branch or agency/permanent establishment, the branch or agency/permanent establishment is treated as the UK representative of each non-resident partner.
>
> *Partnership trading in the UK which includes resident and non-resident members is treated as UK representative of non-resident partners*
>
> Where a business is carried on in the UK by a partnership which includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit.

124.5 UK representatives: Exemptions

Sections 835G-K set out 5 exemptions:

Section	**Topic**
835G	Agents
835H	Brokers
835I	Investment managers
835J	Alternative finance arrangements (Sharia-compliant arrangements)
835K	Lloyds agents

I consider the first three of these here; the last two are of specialist interest.

124.5.1 *Casual agent*

Section 835G ITA provides:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an agent in the UK.
> (2) The agent is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) arising to the non-UK resident from—
> (a) so much of the non-UK resident's business as relates to disregarded transactions, or
> (b) property or rights which, as a result of disregarded transactions, are used by, or held by or for, the agent on behalf of the non-UK resident.
> (3) "Disregarded transactions" are transactions—
> (a) carried out through the agent in the UK, and
> (b) in respect of which the agent does not act in the course of carrying on a regular agency for the non-UK resident.

I call this the "**casual agent exemption**".

The INT Manual provides:

> **INTM268020 Who can be the non-resident's UK representative?**
> [Jun 2018]
> Schedule 6 paragraphs 5-9 TIOPA 2010 and Subsections 835G-835K ITA 2007 ... lists the persons who cannot be the UK representative for income tax and capital gains tax:
> 1) Agents who are not regular agents. In general if a non-resident is trading in the UK through an agent that agent should be regarded as a regular agent. This was considered in the cases of *Neilsen Andersen v Collins* and *Tarn v Scanlan* (13 TC 91 at p.121–2) when

> Scrutton LJ considered "the contrast intended to be drawn is between casual employment, temporary employment, for a transaction or few transactions, and regular appointment of a permanent agent who is there as representing the foreigner". ...

The former International Tax Handbook provided:

> **942. NRs: accepting TMA 70 s.82 exemption: regular agency**
> ... casual agents are protected from assessment. As a general rule if there is UK source income and there is an agent we would want to assess the agent. A non-resident trading here through an agent will usually clearly do so through a regular agency.
> It may be less clear whether an agent is a regular agent when he acts for his principal in only one transaction. This was the issue in the case of *Willson v Hooker* 67 TC 585. Acting for an Isle of Man company, Mr Willson instructed a firm of surveyors to bid for some land in the UK and instructed solicitors concerning the purchase and sale of the land. The Court said that a regular agency is any agency that is not a casual or occasional agency and that it was impossible to regard Mr Willson as a casual or occasional agent. He was the person through whom all the transactions of the company in the UK were carried out in the relevant period and so did not enjoy protection.

CT does not need the same exemption, as a casual agent is not a PE.

124.5.2 *Broker/Investment manager*

The exemptions are in s.835H and s.835I ITA. They are easier to follow if set side by side:

Section 835H (Brokers)	**Section 835I (Investment Managers)**
(1) This section applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the UK.	(1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the UK.
(2) The broker is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—	(2) The investment manager is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
(a) the amount is transaction income in relation to a transaction carried out through the broker in the UK on behalf of the non-UK resident, and	(a) the amount is transaction income in relation to an investment transaction carried out through the investment manager in the UK on

	behalf of the non-UK resident, and
(b) the independent broker conditions are met in relation to the transaction (see section 835L).	(b) the independent investment manager conditions are met in relation to the investment transaction (see section 835M).
(3) In subsection (2) "transaction income", in relation to a transaction carried out through a broker in the UK on behalf of a non-UK resident, has the same meaning as in Chapter 1 (see section 814(5)).	(3) In subsection (2) "transaction income", in relation to a transaction carried out through an investment manager in the UK on behalf of a non-UK resident, has the same meaning as in Chapter 1 (see section 814(5)).

124.6 Subsidiary points

124.6.1 *HMRC procedures*

The INT Manual provides:

> **INTM268040 What assessments should be raised and how is that done?** [May 2019]
>
> As already explained above (INTM268030)) both the non-resident and their UK representative have a personal responsibility for the tax obligations and liabilities arising from the UK permanent establishment/branch or agency. Either party is able to discharge those obligations and liabilities. So we can assess either or both parties if necessary. Once one party has paid, the personal responsibility on the other party lapses for that self assessment period. Obviously in cases where self assessments are returned by or for a non-resident taxpayer and tax payments are made at the appropriate times no further action would be needed. This guidance concerns the practicalities of how to handle cases where obligations and liabilities are not met.
>
> Because the UK representative is personally responsible for the non-residents tax obligations and liabilities, a unique tax reference should be allocated to the UK representative in that capacity. Where the UK representative is an agent (rather than a branch or fixed place of business permanent establishment) that unique tax reference should be a distinct and different reference to the one allocated to the agent for their own business. Non-resident companies intending to set up places of business in the UK are obliged to notify Companies House (see **Self assessment** at INTM261000). The consequential process in place automatically generates tax references and allocates them to the office responsible for the UK registered office address. Where that process has not happened, or for non-corporates, a taxpayer record with unique tax reference will need to be created on notification or discovery of liability.
>
> The High Court held in the case of *Tischler v Apthorpe* [2 TC 89] that a non-resident could be assessed directly "wherever he could be reached"

including the UK branch address. The decision in that case was that an assessment raised directly on the non-resident at the UK branch address was valid, even though there was also a UK representative who could have been assessed under the machinery provisions (for the TMA 1970 version *see* INTM268010). It is probably unusual for a non-resident to have both a physical UK branch and an appointed UK agent but the reasoning in that case supports the equal validity of assessments made on the non-resident either directly at their UK branch or at the overseas address. In that case, of course, the UK agent could not be responsible for the tax assessed as he had not been notified.

So, on a practical level, assessments should be addressed in the manner most suited to the facts of the case and with the object of informing the relevant persons of the liability and securing the necessary payment of tax. Depending upon how near to expiry the assessing time limits are this could include any but possibly all of the following:

Assessment for a branch or fixed place of business in the UK

- Assess in the name of the non-resident individual or company at the UK business address.
- Send a copy also, for information, to the non-resident's address abroad if known.
- Assess any person who clearly has the capacity of "UK representative" e.g. the manager of the UK operations, as "Mr X as UK representative of XYZ".

Assessment for UK trade carried out through an agent

- Assess in the form "Mr X as agent for XYZ" sent to the agent's address.
- Send a copy of the assessment on the agent, for information, to the non-resident at their address abroad if known.
- Assess the non-resident individual or company at their address abroad if known.

Partners and partnerships

Where the UK representative is a UK partnership the partnership itself is the UK representative. In such circumstances the partners in the UK partnership will be jointly liable for the tax payable by the non-resident. It follows that any assessment that is required should be made on the partnership as agent for the non-resident. Where a non-resident is a partner in a partnership which trades in the UK directly, typically through a UK branch or fixed place of business, the form of assessment depends on whether there is a partner resident in the UK. If there is a UK resident partner the assessment should be made on the partnership as a whole but the UK resident partner will be jointly liable for the tax payable by the entire partnership. Where there is no UK resident partner then assessments on the branch profits of the non-resident partners should be made on the UK branch of the partnership.

The SALF Manual provides:

SALF704 UK representatives of non-residents chargeable under Case I and II Schedule D [Jan 2019]

General rule for the obligations and liabilities of UK representatives

The general rule is that UK representatives are jointly responsible with the non-resident for all the tax obligations and liabilities in relation to the trade, profession or vocation carried on through the branch or agency/permanent establishment.

This joint responsibility extends to all matters relating to the assessment of tax and to the collection and recovery of tax. For example, it extends to all the mechanisms of self assessment, including notification of chargeability, the obligation to make a tax return and self assessment, liability to make interim and final payments of tax, and liability to surcharges, interest and penalties in connection with those obligations and liabilities.

Either party is able to discharge the obligations and liabilities arising, but equally any acts or omissions of the non-resident are treated as acts or omissions of the UK representative (but see also the first two paragraphs under Offences below in relation to tax offences).

Where the trigger for an obligation or liability is the receipt of formal notification, then the obligation or liability only falls on the UK representative once they have received the relevant notification (or a copy).

124.6.2 *Notices and information*

Section 835V ITA provides:

> (1) An obligation or liability attaching to a non-UK resident ("X") by reason of a notice or other document having been given or served on X does not also attach to the UK representative of X by virtue of section 835U unless the notice or other document (or a copy of it) has been given to or served on the representative.
>
> (2) An obligation or liability attaching to X by reason of a request or demand having been received by X does not also attach to the UK representative of X by virtue of section 835U unless the representative has been notified of the request or demand.
>
> (3) Subsection (4) applies to obligations relating to the provision of information that are imposed on the UK representative of X by section 835U in a case where the representative is X's independent agent.
>
> (4) The obligations do not require the UK representative to do anything except so far as it is practicable for the representative to do so.
>
> (5) For this purpose, the representative must act to the best of the representative's knowledge and belief after taking all reasonable steps to obtain the necessary information.
>
> (6) An obligation of X to provide information is not discharged by virtue of section 835U in a case where the UK representative of X has discharged the obligation only so far as required by subsection (4) of this

> section.
>
> (7) X is not bound by virtue of section 835U by mistakes in information provided by the UK representative of X in discharging, so far as required under subsection (4) of this section, an obligation imposed on the representative by section 835U unless—
>
> (a) the mistake is the result of an act or omission of X, or
>
> (b) the mistake is one to which X consented or in which X connived.
>
> (8) In this section "information" includes anything contained in a return, self-assessment, account, statement or report required to be provided to the Commissioners for Her Majesty's Revenue and Customs or to any officer of Revenue and Customs.

124.6.3 *Criminal offences/penalties*

Section 835W ITA provides:

> (1) A person is not by virtue of section 835U liable to be proceeded against for a criminal offence unless the person—
>
> (a) committed the offence, or
>
> (b) consented to or connived in its commission.
>
> (2) An independent agent of a non-UK resident is not by virtue of section 835U liable to any civil penalty or surcharge in respect of an act or omission if conditions A and B are met.
>
> (3) Condition A is that the act or omission is not—
>
> (a) an act or omission of the independent agent, or
>
> (b) an act or omission to which the agent consented or in which the agent connived.
>
> (4) Condition B is that the independent agent is able to show that the amount of the penalty or surcharge will not be recoverable out of the sums mentioned in section 835X(3) (after being indemnified for any other liabilities under section 835X).

The SALF Manual provides:

> **SALF704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]
>
> *Offences*
>
> The criminal and civil liabilities of a UK representative in respect of the non-resident's tax affairs are limited in certain circumstances.
>
> UK representatives cannot be guilty of a criminal offence under these rules as a result of something done by the non-resident unless:
>
> - they committed the offence
> - consented to its commission, or

- connived in its commission.

The same applies for the non-resident in relation to the acts of the UK representative.

UK representatives who are independent agents are not liable to civil penalties and surcharges unless:

- they committed an act or omission or consented to, or connived in, its commission, or
- they will be able to recover the penalty out of monies of the non-resident.

124.6.4 *Indemnities*

Section 835X ITA provides:

> (1) An independent agent of a non-UK resident is entitled to be indemnified for the amount of any liability of the non-UK resident which the agent has discharged by virtue of section 835U.
>
> (2) An independent agent of a non-UK resident is entitled to retain, from the sums mentioned in subsection (3), amounts sufficient to meet any liabilities which by virtue of section 835U the agent has discharged or to which the agent is subject.
>
> (3) The sums are those which—
>
> (a) (ignoring subsection (2)) are due from the independent agent to the non-UK resident, or
>
> (b) are received by the independent agent on behalf of the non- UK resident.

124.7 Agents/investment managers

An "independent agent" has three advantages:

(1) Lower information requirements; see 124.6.2 (Notices and information)

(2) Lower liabilities for penalties: see 124.6.3 (Criminal offences/ penalties)

(3) A right to an indemnity: see 124.6.4 (Indemnities)

Section 835Y ITA provides the definition:

> (1) In this Chapter "independent agent", in relation to a non-UK resident ("X"), means a person who is the UK representative of X in respect of any agency in which the person is acting on behalf of X in an independent capacity.
>
> (2) For this purpose a person does not act in an independent capacity on behalf of X unless the relationship between them, having regard to its characteristics, is a relationship between persons carrying on

independent businesses dealing with each other at arm's length.

This is based on the definition in the IME rules.[6]

Investment managers and brokers may qualify for the IME exemptions.[7]

The SALF Manual provides:

> **SALF704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]
>
> *Obligations and liabilities are limited where the UK representative is independent of the non-resident*
>
> Where the UK representative is an independent agent of the non-resident acting in the ordinary course of business, its obligations to provide information are limited to ones within its competence to act for the non-resident.
>
> 'Independent agent' is defined at Paragraph 7 Schedule 23 FA 1995. The definition is based on that used in OECD Model Tax Convention and UK double taxation agreements. Broadly, to be an 'independent agent', the agent must be both legally and economically independent of the non-resident. As an independent agent is not within the definition of permanent establishment for corporation tax purposes such an agent could not become the UK representative of a non-resident company.
>
> The rules recognise that, where the UK representative is an independent agent, the agent may not be able to provide complete information about the affairs of the non-resident. The agent is therefore required to provide any information requested, for example a return, to the best of its knowledge and belief after taking all reasonable steps to obtain the information. The non-resident remains responsible for completing or correcting the information where necessary.
>
> However, the non-resident can correct any error or omission made by the UK representative provided the non-resident did not know about it or participate in it.

[6] See 72.9 (Cond. C: Independent relationship) and 106.16 (Independent agent exemption).

[7] See 72.1 (Investment manager exemptions).

Cross references

The following topics are considered elsewhere:
124.6.3 (Criminal offences/penalties)
114.7 (Claims for IHT DTA reliefs)

125.1 IHT compliance: Introduction

This chapter considers the following topics:
(1) Who is liable for IHT
(2) Reporting duties
(3) IHT recovery time limits
(4) The Inland Revenue charge

I go beyond the themes of this book and address the topic as a whole.

125.2 Meaning of "PRs" for IHT

The definition of "personal representatives" matters for all these topics. Section 272 IHTA provides:

> In this Act, except where the context otherwise requires ...
> "personal representatives" includes[1]
> [a] any person by whom or on whose behalf an application
> [i] for a grant of administration or
> [ii] for the resealing of a grant made outside the UK
> is made, and
> [b] any such person as mentioned in section 199(4)(a) above;

Para [b] takes us to s.199(4)(a) IHTA which refers to:

> (a) [i] any person who takes possession of or intermeddles with, or otherwise acts in relation to, property so as to become liable as executor or trustee[2]
> [ii] (or, in Scotland, any person who intromits with property or has become liable as a vitious intromitter) ...

[1] The definition is inclusory but it is difficult to think of a person who is a PR in the general sense but who is not within s.272.

[2] This wording derives from s.55 Administration of Estates Act 1925 ("... any person who takes possession of or intermeddles with the property of a deceased person without the authority of the personal representatives or the court...").

I refer to this as "de facto executor"; the traditional English succession law term is executor *de son tort* but it is not necessary, or desirable, to use antique Law French.[3]

The only reported case in a CTT/IHT context is *IRC v Stype Investments*[4] where a Jersey nominee held land in England subject to a contract for sale. That was a UK situate asset. The beneficial owner died and the Jersey nominee directed the sale proceeds to be paid outside the UK. That act made it a de facto executor, and so a PR for IHT purposes.[5]

A person who applies for a foreign grant which is not resealed in the UK is not a PR within the IHT definition; otherwise para [a][ii] would be unnecessary.

The IHM Manual provides:

> **IHTM30031 Personal Representatives** [Sep 2018]
> ... In Scottish law 'personal representatives' has no precise meaning. It should be regarded as comprising in Scotland those persons who would answer the description in English law (including the extension by IHTA84/S272). Any question of whether a Judicial Factor is included in the term should be referred to Technical in Edinburgh.

The IHT definition of PRs is different from the IT/CGT definition.[6]

125.3 Who is liable for IHT

In outline, the rules are as follows:

IHT charge	IHTA	Primary liability	See para
Lifetime transfer			
– lifetime IHT	s.199(1)	Transferor	125.3.1
– IHT on death	s.199(2)	PRs	125.3.2
Transfer on death	s.200	PRs	125.3.1
Trust IHT	s.201	Trustees	125.3.4
Close co transfer of value	s.202	Company	81.11

The primary liability is where one might expect. But the picture is a complex one, because:

[3] The same applies to the expression trustee *de son tort*; see 7.2 (Who are the trustees).

[4] [1982] STC 625.

[5] The taxpayer was unmeritorious (perhaps dishonest) and this is a case (as happened with more than one Templeman decision) where the Court decided the answer first and the reasoning second.

[6] See 88.3 (PRs: meaning for CGT/IT/CT).

(1) The full list of persons liable for IHT is wider and includes (in short) donees, nominees, life tenants and beneficiaries.
(2) There are many distinct charges to IHT, which require separate rules for liability.

I do not consider rules relating to Scotland or the power to collect IHT from a spouse (s.203 IHTA).

125.3.1 *Lifetime transfer/transfer on death*

It is helpful to read s.199/s.200 (lifetime/death transfer) side by side because they have some wording in common:

Lifetime transfer: s.199(1)	**Transfer on death: s.200(1)**
The persons liable for the tax on the value transferred by a chargeable transfer made by a disposition[7] (including any omission treated as a disposition under section 3(3) above)[8] of the transferor are—	The persons liable for the tax on the value transferred by a chargeable transfer made (under section 4 above)[9] on the death of any person are —
(a) the transferor;	(a) so far as the tax is attributable to the value of property which either— (i) was not immediately before the death comprised in a settlement, or (ii) was so comprised and consists of land in the UK which devolves upon or vests in the deceased's personal representatives, the deceased's personal representatives;
(b) any person the value of whose estate is increased by the transfer;	(b) so far as the tax is attributable to the value of property which, immediately before the death, was comprised in a settlement, the trustees of the settlement;
(c) so far as the tax is	(c) [same]

[7] See 76.2 (Lifetime IHT charge).

[8] See 74.5 (Omission: Deemed disposition).

[9] See 76.4 (Death: IHT charge & exemption).

attributable to the value of any property,	
[i] any person in whom the property[10] is vested[11] (whether beneficially or otherwise) at any time after the transfer,	[i] any person in whom the property is vested (whether beneficially or otherwise) at any time after the death,
[ii] or who at any such time is beneficially entitled to an interest in possession in the property;	[ii] or who at any such time is beneficially entitled to an interest in possession in the property;[12]
(d) where by the chargeable transfer any property becomes comprised in a settlement,	(d) so far as the tax is attributable to the value of any property which, immediately before the death, was comprised in a settlement,
any person for whose benefit any of the property or income from it is applied.	any person for whose benefit any of the property or income from it is applied after the death.

[10] Section 199(5) IHTA provides (perhaps unnecessarily, but it does not matter):

> "References in this section to any property include references to any property directly or indirectly representing it."

See App.2.9 ('Representing' assets). The same rule applies for s.200: see s.200(5) IHTA.

[11] Section 199(4) IHTA provides an extended definition of "vested":

> "For the purposes of this section—
> (a) any person who takes possession of or intermeddles with, or otherwise acts in relation to, property so as to become liable as executor or trustee (or, in Scotland, any person who intromits with property or has become liable as a vitious intromitter), and
> (b) any person to whom the management of property is entrusted on behalf of a person not of full legal capacity,
> shall be treated as a person in whom the property is vested."

The wording is discussed elsewhere: see 125.2 (Meaning of "PRs" for IHT).

Section 199(4) also applies for s.200: see s.200(5) IHTA.

[12] Section 200(3) IHTA provides:

> "For the purposes of subsection (1) above a person entitled to part only of the income of any property shall, notwithstanding anything in section 50 above, be deemed to be entitled to an interest in the whole of the property."

This does not apply for s.199.

125.3.2 *Nature of PRs liability*

In *IRC v Stannard,* PRs were liable for IHT. The question was whether liability was:

(1) personal liability of the PRs
(2) representative liability, ie enforceable only against the assets of the estate:

> It is plain, in my view, from [s.200] that the liability in respect of capital transfer tax for which a personal representative becomes liable is not and could never have been a liability of the deceased. It is necessarily an original liability which is in terms imposed on the personal representative. There is nothing in the statutory scheme which in express terms limits the liability of the personal representative to assets of the estate except in so far as such limitation is found in [s.204] of the Act. There is... nothing in [s.200] which justifies limiting the liability of a personal representative to liability in a representative capacity only. The relevant limitation is that limitation which is provided by [s.204] and which goes to the extent of the liability, not its character. There is no basis, as it seems to me, for distinguishing between the liability of personal representatives imposed under para (a) and the liability of trustees imposed under para (b). Both incur original liability, both are plainly designated as persons liable, and in respect of neither is there any indication apt to render liability anything other than personal liability.
> ... "Thus, if an administrator dies intestate while duty payable by him is outstanding, his administrator, although not in the chain of representation to the first intestate, is liable for the unpaid duty. So also is the executor or administrator of one of several trustees, notwithstanding that other trustees survive."
> In my judgment, the same is true in respect of capital transfer tax.
> Accordingly, in my judgment, the appropriate order where the Crown establishes liability to capital transfer tax against a personal representative is an order in the *de bonis propriis* [personal liability] form.
> An order in the *de bonis testatoris* [representative liability] form seems to me only to be justified where the liability of the executor which is being reflected in the order is a liability transmitted from the deceased whose liability it originally was. This can never be true of capital transfer tax except in the case where the deceased was liable for the tax.[13]

[13] [1984] STC 245.

The point will not often matter

125.3.3 *Additional IHT on death: PRs*

On death:

(1) IHT may become due on a failed PET

(2) Additional tax may fall due on a chargeable transfer within 5 years of death

Section 199(2) IHTA provides:

> Subsection (1)(a) above shall apply in relation to—
>
> (a) the tax on the value transferred by a potentially exempt transfer; and
>
> (b) so much of the tax on the value transferred by any other chargeable transfer made within seven years of the transferor's death as exceeds what it would have been had the transferor died more than seven years after the transfer,
>
> with the substitution for the reference to the transferor of a reference to his personal representatives.

125.3.4 *Liability for trust IHT*

Section 201 IHTA provides:

> (1) The persons liable for the tax on the value transferred by a chargeable transfer made under Part III of this Act are—
>
> (a) the trustees of the settlement;[14]
>
> (b) any person entitled (whether beneficially or not) to an interest in possession in the settled property;
>
> (c) any person for whose benefit any of the settled property or income from it is applied at or after the time of the transfer;
>
> (d) where the transfer is made during the life of the settlor and the trustees are not for the time being resident in the UK, the settlor.
>
> (2) Where the chargeable transfer
>
> [a] is made within seven years of the transferor's death
>
> [b] but is not a potentially exempt transfer,
>
> subsection (1)(d) above shall not apply in relation to so much of the tax as exceeds what it would have been had the transferor died more than seven years after the transfer.[15]

[14] See 7.2 (Who are the trustees).

[15] For completeness: there follow two transitional provisions now of limited interest:

> (3) Subsection (1)(d) above shall not apply in relation to a settlement made before

125.3.5 *Liability for GWR*

Section 204(9) IHTA deals with GWR:

> Where by virtue of subsection (3) of section 102 of the Finance Act 1986 the estate of a deceased person is treated as including property which would not apart from that subsection form part of his estate, a person shall be liable under section 200(1)(a) above as personal representative[16] for tax attributable to the value of that property
> [a] only if the tax remains unpaid twelve months after the end of the month in which the death occurs and, subject to that,
> [b] only to the extent of the assets mentioned in subsection (1) above.

125.3.6 *Liability: Asset cap*

Section 204 IHTA caps liability for PRs and trustees, by reference to the value of their assets. The rules are conveniently read side by side:

s.204(1): PRs	**s.204(2): trustees**
A person shall not be liable under section 200(1)(a) above for any tax as a personal representative of a deceased person, except to the extent of the following assets, namely—	A person shall not be liable for tax as trustee in relation to any property, except to the extent of—
(a) so far as the tax is attributable to the value of any property other than such as is mentioned in paragraph (b) below,	
the assets (other than property so mentioned) which he has received as personal representative or might	(a) so much of the property as he has actually received or disposed of or as he has become liable to

11th December 1974 if the trustees were resident in the UK when the settlement was made, but have not been resident there at any time during the period between 10th December 1974 and the time of the transfer.
(3A) Subsection (1)(d) above shall not apply in relation to the tax chargeable on the value transferred by a potentially exempt transfer which proves to be a chargeable transfer in a case where the settlement was made before 17th March 1987 if the trustees were resident in the UK when the settlement was made, but have not been resident there at any time between 16th March 1987 and the death of the transferor.

[16] See 125.3.1 (Lifetime transfer/transfer on death).

have so received but for his own neglect or default; and	account for to the persons beneficially entitled thereto, and
(b) so far as the tax is attributable to property which, immediately before the death, was comprised in a settlement and consists of land in the UK,	
so much of that property as is at any time available in his hands for the payment of the tax, or might have been so available but for his own neglect or default.	(b) so much of any other property as is for the time being available in his hands as trustee for the payment of the tax or might have been so available but for his own neglect or default.

Section 204(3) IHTA provides similar relief for a nominee/life tenant:

> A person not liable as mentioned in subsection (1) or (2) above but
> [a] liable for tax as a person in whom property is vested or
> [b] liable for tax as a person entitled to a beneficial interest in possession in any property
> shall not be liable for the tax except to the extent of that property.

Section 204(5) IHTA provides similar relief for beneficiaries:

> [a] A person liable for tax as a person for whose benefit any settled property, or income from any settled property, is applied, shall not be liable for the tax except to the extent of the amount of the property or income
> [b] (reduced in the case of income by
> [i] the amount of any income tax borne by him in respect of it, and
> [ii] in the case of other property in respect of which he has borne income tax by virtue of Chapter 2 of Part 13 of the Income Tax Act 2007 [Transfer of Assets Abroad] by the amount of that tax).

125.4 Priority of persons liable

Section 205 IHTA provides:

> Except as otherwise provided, where under this Act two or more persons are liable for the same tax, each of them shall be liable for the whole of it.

Nevertheless, there are rules for priority.

125.4.1 *Transferor/PRs/trustees primary liability*

Section 204(6) IHTA makes transferor/PRs/trustees primarily liable over other categories:

> Where a person is liable for any tax—
>
> (a) under section 199 above [lifetime disposition by transferor] otherwise than as transferor or personal representative of the transferor, or
>
> (b) under section 201 [trusts] above otherwise than as trustee of the settlement,
>
> [A] he shall be liable only if the tax remains unpaid after it ought to have been paid and,
>
> [B] in a case where any part of the value transferred is attributable to the tax on it, shall be liable to no greater extent than he would have been had the value transferred been reduced by the tax remaining unpaid.

125.4.2 *Transferor/PRs/trust secondary liability*

Section 204(7) IHTA disapplies this rule for failed PETs/additional tax on death:

> Where the tax exceeds what it would have been had the transferor died more than seven years after the transfer, subsection (6) above shall not apply in relation to the excess.

Instead, s.204(8) provides the opposite rule:

> A person liable by virtue of section 199(2) above for any tax as personal representative of the transferor shall be liable only to the extent that either—
>
> (a) in consequence of subsections (2), (3) and (5) above, no person falling within paragraphs (b) to (d) of section 199(1) above is liable for the tax, or
>
> (b) the tax remains unpaid twelve months after the end of the month in which the death of the transferor occurs,
>
> and, subject to that, shall be liable only to the extent of the assets mentioned in subsection (1) above.

IHTM provides:

> **IHTM30044: PETs: practice relating to PRs** [Sep 2018]
>
> The liability of the transferor’s personal representatives (IHTM05012)

> is a sensitive area of the legislation. You must alert the personal representatives at an early stage where recourse to them might occur.
>
> In cases where the transferee (IHTM30051) is not resident in the UK we are likely to be aware of that fact from the replies on the schedule IHT403, but nevertheless we should still warn the personal representatives of their potential liability, if the transferee and any other persons who may be liable under IHTA84/S199 (1) do not pay.
>
> Similarly Shares and Assets Valuation (SAV) should be alert to any valuation in which it is evident that the value of the assets transferred is far less than the value transferred and where tax will be payable on the gift. SAV should give a warning to this effect as soon as possible to whoever issued the valuation request and it will then be their responsibility to decide what further action to take.
>
> You must remember that the facility to have recourse to the transferor's personal representatives is not to be regarded as a soft option. We are to make all the attempts at recovering from the persons liable under IHTA84/S199(1) that we would presently contemplate in a similar situation against any liable person. But having warned the personal representatives that we may look to them to discharge the tax liability, we must ensure firstly that they are kept fully in the picture and secondly that a decision actually to collect from them is not delayed for years...
>
> Note that tax collected from personal representatives of the transferor under IHTA84/S199 (2) was never a liability of the transferor. Accordingly IHTA84/S5 (4) cannot apply and
>
> - the tax so collected is not deductible against the transferor's taxable estate and
> - there is no question of grossing up (IHTM14593) the lifetime transfer

125.5 Reporting duties

Section 216(1) IHTA provides the standard reporting duties.

These duties are slightly relaxed by 3 regulations, which together I call the **"Excepted Disclosure regulations"**. Their full names are too long to use, so I abbreviate as follows:

My term	Full name
EER 2004	IHT (Delivery of Accounts) (Excepted Estates) Regs 2004
ESR 2008	IHT (Delivery of Accounts) (Excepted Settlements) Regs 2008
ETR 2008	IHT (Delivery of Accounts) (Excepted Transfers & Excepted Terminations) Regs 2008

I discuss EER and ESR, and hope to consider ETR in a future edition.

125.6 Standard reporting duties

s.**216(1) IHTA**	**Type of charge**	**See para**
Except as otherwise provided by this section or by regulations under section 256 below,[17]		
the personal representatives of a deceased person	IHT on death	125.3.3
and every person who—		
(a) is liable as transferor for tax on the value transferred by a chargeable transfer, or would be so liable if tax were chargeable on that value, or	Lifetime chargeable transfer	125.3.1
(b) is liable as trustee of a settlement for tax on the value transferred by a transfer of value, or would be so liable if tax were chargeable on that value, or	Trust IHT	125.3.1
(bb) is liable under section 199(1)(b) above for tax on the value transferred by a potentially exempt transfer which proves to be a chargeable transfer, or would be so liable if tax were chargeable on that value, or	Failed PET	125.3.1
(bc) is liable under section 200(1)(c) above for tax on the value transferred by a chargeable transfer made on death, so far as the tax is attributable to the value of property which, apart from section 102(3) of the Finance Act 1986 would not form part of the deceased's estate, or would be so liable if tax were chargeable on the value transferred on the death, or	GWR	125.3.5
(bd) is liable under section 201(1)(b), (c) or (d) above for tax on the value transferred by a potentially exempt transfer which is made under section 52 above and which proves to be a chargeable transfer, or would be so liable if tax were chargeable on that value, or	Trust property failed PET	125.4

[17] See 125.7 (Excepted estates).

(c) is liable as trustee of a settlement for tax on an occasion on which tax is chargeable under Chapter III of Part III of this Act (apart from section 79), or would be so liable if tax were chargeable on the occasion,	Trust:10-year & exit charges	125.4
shall deliver to the Board an account specifying to the best of his knowledge and belief all appropriate property and the value of that property.		

The word "account" is an archaic term for a tax return. The drafter has copied the wording from the old estate duty provision;[18] but it oes not much matter. I refer to it as an "**IHT Account**" (with initial capitals to reflect the technical nature of the expression); or more specifically:
IHT400 Account: the form on death
IHT100 Account: the form on a lifetime transfer, 10 year or exit charge

The expression "would be liable if tax were chargeable" is apt to cover cases where
(1) the value is low and falls within nil rate thresholds; and
(2) 100% BPR/APR applies

125.6.1 *"Appropriate property"*

There are two definitions of "appropriate property", for PRs and for non-PRs.

For PRs, s.216(3) IHTA provides (so far as relevant):

> Subject to subsections (3A) and (3B) below,[19] where an account is to be delivered by personal representatives (but not where it is to be delivered by a person who is an executor of the deceased only in respect of settled land in England and Wales), the appropriate property is—
> (a) [i] all property which formed part of the deceased's estate immediately before his death
> [ii] other than property which would not, apart from section 102(3) of the FA 1986, form part of his estate [GWR property]; and
> (b) all property to which was attributable the value transferred by

[18] Section 6(4) FA 1894.
[19] Subsections (3A) and (3B) are not relevant here.

> any chargeable transfers made by the deceased within seven years of his death.

Excluded property is not appropriate property for PRs, as:
(a) it does not form part of the deceased's estate immediately before death
(b) A lifetime gift of excluded property is not a chargeable transfer

For persons other than PRs, s.216(4) IHTA provides:

> Where subsection (3) above does not apply the appropriate property is any property to the value of which the tax is or would be attributable

"Would be attributable" means "would be attributable if tax is chargeable". That is apt to include the cases where value is low and within IHT thresholds, or where 100% BPR/APR applies. But context shows it does not include excluded property. That view meets territorial limitations, and is consistent with the position for PRs.

The term "appropriate property" is not the most transparent of labels, but it is best to adopt the statutory terminology.

125.6.2 *PRs: No appropriate property*

There is no obligation to deliver an IHT400 Account if there is no appropriate property, ie if:

(1) the deceased had no chargeable (non-excluded) property at the time of death, and
(2) has made no chargeable transfers within 7 years of death.

An IHT400 Account may be required for a standard estate even though no IHT is payable on the death (eg because the chargeable property falls within the nil rate band). But in practice one would expect foreign PRs to disregard trivial UK situate assets, if there is no need for a grant of probate in the UK.

125.6.3 *PRs with appropriate property*

In other cases (eg if the deceased had some UK property, even if of little value) PRs have an obligation to deliver an IHT400 Account, giving details of the appropriate property.

Question 6 IHT400 (2022) provides:

> **Where was the deceased domiciled at the date of death? ...**
> - England and Wales
> - Scotland

- Northern Ireland
- other country, specify country below

IHT400 Notes (2022) comments on this box:

> If ... the deceased is treated for Inheritance Tax purposes as being domiciled in the UK, you should still enter the name of the foreign country in the box, but fill in the rest of the form as if the deceased was domiciled in the UK. Write in the 'Additional information' boxes on form IHT400 page 16 that the deceased was treated as domiciled (or 'deemed domiciled') in the UK for Inheritance Tax purposes.
>
> If the special rules [deemed domicile] do not apply and the deceased was domiciled outside the UK, you should fill in Schedule IHT401, 'Domicile outside the United Kingdom' to give us details. Fill in the IHT400 with details of assets in the UK only.

There is no statutory obligation to disclose excluded property. However Question 23 in form IHT401 (2022) (Domicile outside the UK) asks:

> Did the deceased leave any assets outside the UK? No/Yes – Give approximate value.

There is no legal duty to supply this information.[20] But refusal to answer the question may give rise to further enquiries.

There is no statutory duty to disclose details of gifts of excluded property which the deceased made before death. However form IHT400 (10/22) Question 30 asks:

> **Gifts and other Transfers of Value**: Did the deceased make any lifetime gifts or other transfers of value on or after 18 March 1986?

It is considered that the reference in the question to "gifts" means gifts which are transfers of value so that if the deceased made gifts of excluded property it is correct to answer "no". The guidance in IHT400 Notes (2022) is consistent with this:

> **Gifts and other transfers of value**
>
> You can tick 'No' and do not need to fill in Schedule IHT403 if the

[20] The former HMRC form D2 (Notes, 12/05) tacitly recognised this:
"*If the deceased was domiciled outside the UK when they died, any assets they owned abroad will not be liable to inheritance tax. Even so, you can help us to deal with this estate more quickly if you can give us a rough idea of the value of all of the deceased's estate outside the UK.*"
I have not found a similar comment in the current forms.

> only gifts made by the deceased were in the following categories:
> - to their spouse or civil partner and Spouse or Civil Partner Exemption applies
> - outright gifts to any individual which do not exceed £250 in any one year (these will be covered by the Small Gifts Exemption)
> - outright gifts to any individual of money or listed stocks and shares that are wholly covered by the Annual Exemption
> - outright gifts made regularly from income where the total gifts did not exceed £3,000 in each year...
>
> If the deceased had made any other gifts or 'transfers of value' since 18 March 1986, including transfers into trust, payment of insurance premiums for the benefit of another person, advances out of a trust fund or any assets that were taken out of a trust before death, you must fill in Schedule IHT403, 'Gifts and other transfers of value'. In general, a 'transfer of value' is any transaction where the deceased did not receive full value in exchange.

Question 45 IHT400 (2022) provides:

> **Assets held in trust**: Did the deceased have any right to benefit from any assets held in trust (including the right to receive assets held in a trust at some future date)? No/Yes – Use Schedule IHT418.

The word "right" only includes fixed interests, it is not apt to describe discretionary trusts. But it appears that "right to benefit" here is used (confusingly) to mean a right to an estate IIP. IHT400 Notes (2022) provides:

> ***Schedule IHT418 Assets held in trust***
> You must complete Schedule IHT418 if the deceased had an interest in possession and the trust is one of the following:
> - a trust that was set up before 22 March 2006 from which the deceased
>   was entitled to benefit
> - an immediate post-death interest
> - a disabled person's interest
> - a transitional serial interest

This would include an excluded property trust where the deceased had an estate IIP. In such a case the answer to Question 45 is, "yes". However only limited information needs to be disclosed in form IHT418. IHT400 Notes (2022) provides:

> **Foreign trusts** If the deceased had a right to benefit from settled

property where the assets are overseas, and the person who set up the trust was domiciled outside the UK when the trust was created, please answer questions 2 to 5 only.

125.6.4 *No PRs within 1 year*

Section 216(2) IHTA provides:

> Where in the case of the estate of a deceased person no grant of representation or confirmation has been obtained in the UK before the expiration of the period of twelve months from the end of the month in which the death occurred—
>
> (a) every person in whom any of the property forming part of the estate vests (whether beneficially or otherwise) on or at any time after the deceased's death or who at any such time is beneficially entitled to an interest in possession in any such property, and
>
> (b) where any of the property is at any such time comprised in a settlement and there is no person beneficially entitled to an interest in possession in that property, every person for whose benefit any of that property (or income from it) is applied at any such time,
>
> shall deliver to the Board an account specifying to the best of his knowledge and belief the appropriate property vested in him, in which he has an interest or which (or income from which) is applicable for his benefit and the value of that property.

125.6.5 *Reporting time limits*

Section 216(6) IHTA provides:

> An account under the preceding provisions of this section shall be delivered—[21]

Case	Time limit
(a) in the case of an account to be delivered by personal representatives,	[i] before the expiration of the period of twelve months from the end of the month in which the death occurs, [ii] or, if it expires later, the period of three months beginning with the date on which the personal representatives first act as such;

[21] I set out the words of the statute in tabular form for clarity.

(aa) in the case of an account to be delivered by a person within subsection (1)(bb) or (bd) above [failed PETs],	before the expiration of the period of twelve months from the end of the month in which the death of the transferor occurs;
